More than 350 localities (including more than seventy in Florida), as well as three states, have enacted retail pet sales legislation in order to effectively address the problem of puppy and kitten mills from the point of sale. While statewide commercial breeder regulation is important, it should not preclude localities from taking even more stringent steps to eliminating the puppy and kitten mill problem in their own communities. Allowing a corporation that profits from the sale of puppies from mills to determine how localities choose to regulate their businesses is not in the best interest of those communities, nor of the state.

Best Friends and our members thank you in advance for your careful consideration and we strongly urge you to vote NO on Senate Bill 1698, in order to protect Florida consumers, pets and taxpayers.

Respectfully,

Elizabeth Oreck

AMERICAN OVERSIGHT

Differences in behavioral characteristics between dogs obtained as puppies from pet stores and those obtained from noncommercial breeders

Franklin D. McMillan, DVM, DACVIM; James A. Serpell, PhD; Deborah L. Duffy, PhD; Elmabrok Masaoud, PhD; Ian R. Dohoo, DVM, PhD

Objective—To compare the owner-reported prevalence of behavioral characteristics in dogs obtained as puppies from pet stores with that of dogs obtained as puppies from noncommercial breeders.

Design—Cross-sectional study.

Animals—Dogs obtained as puppies from pet stores (n = 413) and breeder-obtained dogs (5,657).

Procedures—Behavioral evaluations were obtained from a large convenience sample of current dog owners with the online version of the Canine Behavioral Assessment and Research Questionnaire, which uses ordinal scales to rate either the intensity or frequency of the dogs' behavior. Hierarchic linear and logistic regression models were used to analyze the effects of source of acquisition on behavioral outcomes when various confounding and intervening variables were controlled for.

Results—Pet store–derived dogs received significantly less favorable scores than did breeder-obtained dogs on 12 of 14 of the behavioral variables measured; pet store dogs did not score more favorably than breeder dogs in any behavioral category. Compared with dogs obtained as puppies from noncommercial breeders, dogs obtained as puppies from pet stores had significantly greater aggression toward human family members, unfamiliar people, and other dogs; greater fear of other dogs and nonsocial stimuli; and greater separation-related problems and house soiling.

Conclusions and Clinical Relevance—Obtaining dogs from pet stores versus noncommercial breeders represented a significant risk factor for the development of a wide range of undesirable behavioral characteristics. Until the causes of the unfavorable differences detected in this group of dogs can be specifically identified and remedied, the authors cannot recommend that puppies be obtained from pet stores. (*J Am Vet Med Assoc* 2013;242:1359–1363)

It has long been an article of faith among veterinarians and canine professionals that dogs obtained as puppies from pet stores have a higher prevalence of health and behavioral problems.[1] However, there has been a dearth of empirical studies to support this notion. In a retrospective survey of the owners of 737 adult dogs, Jagoe[a] found that dogs obtained from pet shops had a significantly higher prevalence of owner-directed (dominance-type) aggression and social fears (fear of strangers, children, and unfamiliar dogs) than did dogs from 5 other sources: breeders, animal shelters, friends or relatives, found or rescued off the streets, and home bred (ie, bred and reared in the current owner's home).[2] However, the sample size of pet store dogs in that study[a] was small (n = 20).

Bennett and Rohlf[3] investigated the frequency of potential problematic behavior patterns as reported by owners in a convenience sample of 413 companion dogs, of which 47 were obtained from pet stores. Results indicated that dogs purchased from pet shops or shelters were considered by their owners to be more unfriendly or aggressive than were dogs purchased from breeders and significantly more nervous than dogs bred by the present owner. However, by using broadly defined behavioral subscales rather than discrete behaviors, the researchers were not able to ascertain whether pet shop dogs had specific problematic behaviors more frequently than did dogs from other sources.

Mugford[4] reported analyzing a sample of 1,864 dogs with various behavioral problems and determined that "only 10% of purebred dogs obtained directly from breeders presented separation-related problems, whereas 55% of purebred dogs originating from so-called 'puppy farms' or 'puppy mills' present such problems." Sample sizes and the way in which it was determined

that the dogs came from puppy farms or puppy mills were not reported.

Some inconsistent findings have also been reported. Pierantoni et al[5] compared owner-reported behaviors between 70 adult dogs separated from their litters at 30 to 40 days of age and 70 adult dogs separated from their litters at 2 months of age. Their analysis included the source of the dog classified into 3 categories: breeder, pet shop, or friend or relative. The researchers found no significant association between the source of the dog and the behavioral categories examined. In a study of the efficacy of a dog-appeasing pheromone in reducing stress associated with social isolation in puppies recently acquired from pet stores, Gaultier et al[6] noted that their data did not seem to support the hypothesis that puppies from pet stores constitute a special, at-risk population for the development of behavioral problems. The researchers reported that the puppies in that study[6] (n = 66) did not appear to disturb their owners any more than those in a previous study by Taylor and Mills[7] involving puppies acquired from local pedigree dog breeders. However, the breeders in the latter study[7] included a semicommercial breeder and at least 1 puppy mill.[b]

Most puppies sold by pet stores in the United States are purchased from brokers, who may themselves be breeders but overwhelmingly acquire their puppies from high-volume breeding facilities, or CBEs, located throughout the United States.[8] Conditions in the CBEs, which supply tens of thousands of puppies to retail pet stores each year, vary widely. Conditions in CBEs range from modern, clean, and well-kept to squalid, noxious, and gravely detrimental to animal health and welfare.[9–11]

The purpose of the study reported here was to evaluate the hypothesis that dogs obtained as puppies from pet stores would be reported to have an increased prevalence of behavioral problems, compared with dogs obtained as puppies from NCBs.

Materials and Methods

Data collection—Behavioral evaluations of the dogs were obtained by use of the online version of the C-BARQ, a standardized survey instrument with established reliability and validity characteristics.[12] The C-BARQ is designed to provide quantitative assessments of a wide array of behavioral characteristics of dogs and has been widely used as a research tool for comparing behavior in different dog populations.[13–15] The questionnaire consists of 100 items that ask respondents to indicate on a series of 5-point ordinal rating scales their dogs' typical responses to a variety of everyday situations during the recent past. The scales rate either the intensity (aggression, fear, and excitability subscales) or frequency (all remaining subscales and miscellaneous items) of the behaviors, with a score of 0 indicating the absence of the behavior and a score of 4 indicating the most intense or frequent form of the behavior. The C-BARQ currently comprises 14 behavioral factors or subscales and a further 22 miscellaneous stand-alone items. Higher scores are generally less favorable for all items and subscales, with the exception of trainability, for which higher scores are more desirable. Owners were also asked to indicate the dog's current age at the time the survey was completed, whether there were other dogs living in the same household, and whether the dog was used for specific working or recreational roles, including breeding or showing, field trials or hunting, other sports (eg, agility, racing, or sledding), and working roles (eg, search and rescue, service, or sheep herding). To obtain information on the source from which the dog was acquired, owners were also asked to respond to the question, "where did you acquire this dog?" Possible responses included the following: bred him/her myself; from a breeder; from a shelter or rescue group; from a neighbor, friend, or relative; bought from a pet store; adopted as a stray; and other. Consistent with the 2 previous studies[3,a] that offered pet-owning participants the choice of breeder as the source of the dog, the question in the C-BARQ regarding the source of the dog does not define the term breeder.

Sample—The online C-BARQ was advertised originally via an article in the newsmagazine of the Veterinary Hospital of the University of Pennsylvania and by notices sent to Philadelphia-area veterinary clinics and the top 20 US breed clubs, as determined on the basis of American Kennel Club registrations. Availability of the survey then spread via word of mouth. No geographic limitations were applied, and participation included residents of the United States as well as other countries. A subset of these data consisting entirely of pet dogs whose owners reported obtaining them either from breeders (n = 5,657) or pet stores (413) was used for analysis. Breeder-obtained dogs were selected as the comparison group for the following reasons: age at the time of acquisition would most closely match pet store–obtained dogs; for the most part, breeder-obtained dogs are purebred as are those from pet stores; and the life history of the dog prior to purchase in breeder-obtained puppies is relatively standardized, thereby reducing the amount of environmental variability among the dogs of this group. These assumptions apply to the United States and may have less validity in other countries.

Statistical analysis—Two-level hierarchic linear or logistic regression models were used to analyze the data on behavioral measures.[16] The outcome variables (attachment and attention seeking, chasing, trainability, excitability, and energy) in the hierarchic linear model were treated as normally distributed continuous variables. All other behavioral variables were dichotomized (eg, 0 or > 0) because they were typically highly skewed and it was impossible to identify a suitable transformation method to normalize their distribution. These were analyzed with 2-level mixed logistic models. Both types of model aimed to assess the relationship between source of acquisition (eg, pet store vs breeder) and behavior while controlling for various confounding variables (other dogs in household, working or recreational roles, sex, and body weight) or intervening variables (neutered vs sexually intact and age at the time of evaluation). All possible 2-way interactions between source of acquisition and confounding and intervening variables were explored and accounted for in the modeling process. Nonsignificant confounding and intervening variables and interaction effects were removed from the

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-005374

model. Breed was also included in both models as a random effect to account for clustering of dogs at the breed level. Linear and logistic models were fit via restricted and full maximum likelihood estimation procedures. The analysis was performed with statistical software[17] by use of subject-specific models.[c,d] For all comparisons, a value of $P < 0.05$ was considered significant.

Results

According to the results of the multiple regression analyses, dogs acquired from pet stores differed significantly from those acquired from breeders on 12 of 14 of the C-BARQ behavioral subscales. In no category did pet store dogs have a more desirable score than breeder dogs (**Tables 1 and 2**). The strongest effects were observed in relation to aggressive behavior. For example, sexually intact pet store dogs were 3 times as likely to have owner-directed aggression as were sexually intact dogs acquired from breeders, and pet store dogs were nearly twice as likely to have aggression toward unfamiliar dogs (dog-directed aggression). Pet store dogs were also 30% to 60% more likely to have stranger-directed aggression, aggression to other household dogs, fear of dogs and nonsocial stimuli, separation-related problems, and touch sensitivity. In addition, they were somewhat more excitable, energetic, and attention seeking and generally less trainable, although this was only true for dogs that did not participate in working or recreational activities. The only C-BARQ subscales that were not significantly different between pet store and breeder-derived dogs were chasing and stranger-directed fear. In addition, pet store–obtained dogs had a range of miscellaneous behavioral problems at significantly higher frequencies than did those acquired from breeders (eg, escaping from the home, sexual mounting of people and objects, and most forms of house-soiling).

Discussion

Results of this study supported the view that dogs obtained as puppies from pet stores are more likely to develop behavioral problems as adults, compared with dogs obtained from NCBs. The retrospective nature of the data used in this analysis did not permit determinations of causality. However, there are several potential explanations for the differences between pet store and NCB dogs.

Table 1—Results of linear regression models comparing behavioral variables in dogs obtained from pet stores versus dogs obtained from NCBs.

Variable	Other variables controlled	Predictor	Effect	95% CI	*P* value
Excitability	1,2,3,4,6	PS	0.204	0.12 to 0.29	< 0.001
Energy	1,2,3,4,6	PS	0.109	0.004 to 0.21	0.043
Chasing		PS	0.002	–0.13 to 0.10	0.769
Attachment and attention seeking	1,2,3,4,5,6	PS	0.204	0.12 to 0.29	< 0.001
Trainability	1,2,3,4,5,6	PS–Not working dog	–0.195	–0.26 to –0.13	< 0.001
		PS– Working dog	0.098	–0.07 to 0.27	0.262

PS = Acquired from pet store.

Other variables controlled were as follows: 1 = other dogs, 2 = dogs with working or recreational roles, 3 = sex, 4 = weight, 5 = neutered, 6 = age at time of evaluation (nonsignificant intervening variables [those variables that intervene the relationship between variable and predictor] were removed from the analyses).

Table 2—Results of logistic regression models comparing behavioral variables in dogs obtained from pet stores versus dogs obtained from NCBs.

Variable	Other variables controlled	Predictor	OR	95% CI	*P* value
Separation-related behavior	1,2,3,4,5,6	PS	1.58	1.19–2.11	0.002

The formative stages of the puppy's life in the CBE are periods where stress may exert an impact on brain development. Although no studies on sources of stress in CBEs or their potential effects on the well-being of the dogs have been published, sources of stress have been investigated in dogs living in confinement in kennels,[18–21] animal shelters,[22,23] and laboratories.[24,25] Similar stressors have been documented in the CBE environment,[10] and it is therefore reasonable to suggest that the effects applied also to the dogs in the present study, despite some differences in background, housing, and husbandry. Specific factors that have been determined to be associated with stress in dogs living in confined environments include spatial restriction,[18,19,23] extreme temperatures,[9,26] aversive interactions with kennel staff,[26,27] lack of perceived control or the capacity to avoid or regulate exposure to aversive stimuli,[20–23] and limited access to positive human and conspecific social interactions.[18,24,25] A recent study[11] on the mental health of dogs formerly used as breeding stock in CBEs found severe and long-lasting adverse effects in dogs living in this type of environment, offering evidence of the magnitude of stressors in CBEs.

The stressors in the CBE environment may have acted at 2 stages of the developing puppies' lives: the prenatal period and the first 8 weeks after birth. A large body of research in humans and other animals has convincingly determined that prenatal stress (ie, stress experienced by a pregnant female) causes alterations to the hypothalamic-pituitary-adrenal axis of the developing fetus that may manifest later in life as an impaired ability to cope with stress,[22] abnormal social behavior,[28,29] and increased emotionality and fear-related behavior.[30] All of these outcomes are consistent with the differences detected in pet store– versus NCB-obtained dogs (ie, increased aggression, fear of dogs and nonsocial stimuli, and excitability). Substantial evidence in humans and other animals indicates that stressful experiences in early life may have extensive and enduring effects with strong correlations to later development of behavioral abnormalities and psychopathologic abnormalities.[31–35] In dogs, Fox and Stelzner[36] detected a short period at approximately 8 weeks of age when puppies are hypersensitive to distressing psychological or physical stimuli and during which a single unpleasant experience could result in long-term aversive or abnormal effects. Transport-related stress was suggested by both Mugford[4] and Gaultier et al[6] to be a potentially critical factor in the early lives of puppies from CBEs as they are shipped to pet stores throughout North America. Mugford,[4] Serpell and Jagoe,[2] and Bennett and Rohlf[3] have each suggested that a reason for pet store and CBE puppies to have a high prevalence of behavioral problems later in life is inadequate early socialization. In addition, genetic influences may play a role in the differences between pet store and NCB dogs, because a genetic basis for behavioral traits in dogs is consistent with findings observed in dogs of the present study, including fear, aggression, emotional reactivity, and nonspecific alterations in temperament and personality.[27,37,38]

The reported differences in the 2 groups of dogs in the present study could be attributable to a number of owner-related factors. It is possible that people who buy puppies from pet shops may use different degrees or methods of training than people who buy puppies from an NCB. The importance of training in the development of problem behaviors was recently elucidated in the study[3] of the relationship of potentially problematic behaviors with other variables. The researchers found that for the 5 behavioral subscales, the strongest predictor for scoring undesirably in 3 of the 5 subscales was the level of training the dog received. The present study did not attempt to collect demographic or background information on the dog owners; therefore, the degree to which such factors may have contributed to the findings could not be assessed. An additional owner-related consideration is that it is possible that people who buy puppies from pet stores simply report potentially problematic behaviors more readily than do others, irrespective of the dog's actual behavior.

The data support the notion that dogs obtained as puppies from pet stores have substantial adverse behavioral differences, compared with dogs obtained from NCBs. Taken individually, however, the specific factors that differ between the 2 groups are not readily attributable to a single definitive explanation. For example, stranger-directed aggression may be attributable to inadequate socialization, maltreatment by humans, genetic factors, and prenatal stress. Taken collectively, no single explanatory factor appears capable of accounting for the differences between the 2 groups. For example, although inadequate socialization may explain increased aggression, the most prominent emotional consequence of insufficient socialization is fear,[27,39] and whereas aggression toward humans (owners and unfamiliar people) was increased, fear toward humans was not.

There were a number of limitations to the present study. The sample of dog owners was self-selected and therefore a potential source of bias. The question in the C-BARQ regarding the source of the dogs did not define breeder, leaving the participants to define the term for themselves. Accordingly, a breeder source could have indicated either type of NCB (hobby breeder or backyard breeder), and the level and type of care differ between the 2 types. These differences are presumably minor in comparison to the differences between NCBs and CBEs. It is also conceivable that the source of some dogs specified by the owner as breeder was a CBE; however, it is reasonable to conclude that there would be no overlap between breeder and pet store categories (ie, no owner with a dog coming from a pet store would select breeder as a source, and no owner with a dog coming from a breeder would select pet store as a source).

Results of the present study indicated that compared with dogs obtained as puppies from NCBs, dogs obtained as puppies from pet stores had significantly greater aggression toward human family members, unfamiliar people, and other dogs; fear of other dogs and nonsocial stimuli; separation-related problems; and urination and defecation problems in the home. On almost all behavioral variables measured, pet store dogs received less favorable scores than breeder-obtained dogs. The diversity of behavioral differences between pet store–obtained and breeder-obtained dogs suggests a multifactorial cause and, accordingly, a multifactorial approach to correction; however, the data did not permit determination of the specific contributory factors and the degree of influence they exerted. In addition,

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-005376

because we did not compare the 2 groups of dogs in this study with other sources of dogs, the results should not be interpreted as an endorsement of any particular source of dogs. On the basis of these findings combined with earlier findings regarding pet store–obtained dogs, until the causes of the unfavorable differences detected in this group of dogs can be specifically identified and remedied, we cannot recommend that puppies be obtained from pet stores.

Subject: Opposition to SB1128 on Home Rule

I am a full time Florida resident and a guaranteed voter. I am deeply opposed to the above legislature which is once again submitted for approval to this legislation. Florida residents are continually being harassed by the big corporate interests who are behind this proposed legislation. This has been voted down repeatedly but nonetheless keeps coming back like a fungus or weed. One can only be very suspicious of the reasons why this is so.

In my opinion this legislation is Unconstitutional for many reasons. First, it is attempting to make illegal something which was legal when executed thereby making it an unconstitutional Ex post facto law. Second, it is interfering with my existing contractual rights. I live in a community which has an HOA. I intentionally bought in this community with its restrictive covenants on renting for less than 6 months because I did not want to have revolving neighbors. If SB1128 is passed it will allow homeowners to ignore rules and regulations which they contractually agreed to at the time they bought into the community. If they can ignore this particular rule why not any others because the rationale being used to promote this legislation would be equally applicable to any number of other restrictive covenants. If homeowners in an HOA can ignore the renting restriction why should they be obligated to abide by other restrictive covenants? Where will it stop? If approved, this legislation would completely undermine HOA frameworks which exists throughout most of Florida. What percentage of home ownership in Florida is governed by HOA restrictions? Has anyone calculated the cost of the uncertainty and potential litigation that this proposal would cause to everyday citizens whose existing property rights are being impaired by the legislature.

Lastly, it is apparent that large corporations such as Marriott are now trying to enter the niche market of leasing out homes for short term rentals and it would change the make up of this community into a commercial one as opposed to the peaceful residential one that I presumed I was buying into when I purchased in 2004. Is this just a backdoor way to rezone a residential area into a commercial one?

DO NOT PASS SB1128

Catherine M Regan, 31 San Jose Drive, Palm Coast Fl 32137

Comment or Question:
Good morning Senator Brandes,

My name is Steven Sergent and I am the Pinellas County Students Working Against Tobacco (S.W.A.T.) Coordinator. I wanted to inform you that on February 17th, eight S.W.A.T. Students from Pinellas County Schools will be visiting Tallahassee in honor of Kick Butts Day.
The students would like to schedule a meeting with you to inform you of the success the tobacco prevention programs have had locally and state wide and the advocacy work they have done in Pinellas County to help other youth to stay tobacco free. It would be a brief presentation on the programs successes battling Big Tobacco and how they try to lure youth to be replacement users for the 1,300 people who die each day from tobacco use. The presentation will take 10-15 minutes of your time. The students have been working vigorously throughout the year to educate their peers and community about the same issues.
Municipalities throughout our county have passed flavored tobacco resolutions (Pinellas County Board of Commission, St. Petersburg, Pinellas Park, Safety Harbor, Indian Rocks Beach, Clearwater, Dunedin, Largo, Oldsmar and Kenneth City). And though there is no a federal age restriction and limited e-cig flavor restriction, there is still more work to do to curb youth tobacco initiation and deglamorize big tobacco. The students involved in S.W.A.T. will continue to educate their community and peers throughout the year.

Thank you and we look forward to meeting with you
Steven Sergent

Subject: Our offbeat debrief of the off-year elections: Trump ‘always makes it about him’

AMERICAN OVERSIGHT

Image

Image

Listen to this media in a new window/tab

It is tempting to read into the 2019 campaign results, so-called off-year elections, for signs of what's to come in next year's big political brouhaha. Political prognosticators beware!

But while we don't want to look too much into what happened in high-profile gubernatorial and special elections that President Donald Trump campaigned in, there are a few key data points to consider, particularly a growing rural-suburban partisan divide that showed up in places as disparate as Pennsylvania, North Carolina, Louisiana, Kentucky and Virginia.

Oh, and also: The president tends to make things about himself. "The biggest concern Republicans should have with what's happened over the last couple of months is that the president always makes everything about him. He wants to be on the stage. He wants to be the center of attention," CQ Roll Call elections analyst Nathan L. Gonzales says on the latest Political Theater podcast.

That strategy is a solid one, according to the president's team. And they are not about to change now, says CQ Roll Call White House correspondent John T. Bennett. In addition to reporting from the executive mansion, Bennett also covered a rally the president held for Fred Keller, the Republican who won a May special election in a mostly rural Pennsylvania district to replace GOP Rep. Tom Marino. The enthusiasm and support there for the president was obvious. It's one of those data points we can point to as evidence of Trump's popularity in such parts of the country.

The question is whether that will be enough for him to win reelection in 2020, and what it means for his Republican colleagues in the House, Senate and in state races for legislature and governor. While both sides can take some solace from this year's election results, Democrats can point to higher-profile statewide wins, at least this month, as a show of momentum.

Subject: Panel backs Broward sheriff's removal, insurance for armed teachers and more

View this at redefinED

Good Morning,

redefinED's daily roundup is Florida's most comprehensive source for quick links to the latest education news.

Panel backs Broward sheriff's removal, insurance for armed teachers and more

A sheriff's hearing: After hearing 10 hours of testimony on Monday, the Florida Senate Rules Committee voted 9-7 to recommend that the full Senate uphold Gov. Ron DeSantis' suspension of Broward Sheriff Scott Israel for his agency's failures during the shootings at Marjory Stoneman Douglas High School in 2018. Israel was removed in January, but appealed. A special Senate master who heard the case recommended his reinstatement, saying DeSantis had not made his case for Israel's removal. That decision was bitterly opposed by parents of victims, who lobbied senators against allowing Israel to retain his job. The committee recommendation now goes to the full Senate for a vote Wednesday. *Sun Sentinel*. *Miami Herald*. *Politico Florida*. *GateHouse*. *News Service of Florida*. *Associated Press*. *Florida Politics*. *WLRN*.

Armed teachers' insurance: Armed teachers in Florida schools will be covered through the state's liability insurance as long as they act within their lawful duties, Florida Department of Education officials have announced. It's a reversal of a 2018 decision to specifically exclude armed teachers. But other armed school employees will have to be covered by their districts since they still will not have coverage from the state. The DOE is asking for an additional $200,000 from the Legislature to pay the increased costs. *Tampa Bay Times*.

District faulted by judge: An administrative law judge has found that the Sarasota County School District falsified records to push a special-needs student into a specialized program for students with the most severe cognitive impairments. Doing so denied the student a "free and appropriate public education," the judge ruled. The district has been ordered to pay for tutoring and private school to help the student make up for the six years he was in the program. *Sarasota Herald-Tribune*.

Portables for school: A dozen portable classrooms are arriving at Lakeland Kathleen Middle School, which lost much of its roof after a tornado struck Friday. The school is closed to students again today, but officials hope to have the portables in place and operational so students can return Wednesday. *WTSP*.

Sales tax hike lawsuit: The legal dispute between the city of Jacksonville and the Duval County School District over the district's request to put a sales tax hike on the ballot was argued Monday before a circuit court judge. The district sued the city for delaying consideration of the sales tax hike. City attorneys are arguing that under the charter, the district is part of the city's consolidated government and therefore doesn't have the authority to file a suit. *Florida Times-Union*. *WJXT*.

Security in schools: Four large Florida school districts are receiving federal grants to improve safety in schools. The Broward County School District is receiving $1.5 million, Hillsborough $1.2 million, the Miami-Dade district $979,700 and the Palm Beach district $500,000. Florida school districts and law enforcement agencies are getting about $27 million of the $85.3 million handed out nationwide. *Sun Sentinel*. *Gradebook*. A leading group for school superintendents, the American Association of School Administrators, is raising ethical questions by recommending the services of school security companies in exchange for a fee. *The 74*. Active-shooter drills in schools can be traumatizing for children, says the past president of the National Association of School Psychologists. Melissa Reeves, in a Q&A with Politico, says the drills are taking an unnecessary risk, and there are better ways to prepare students. *Politico Florida*.

Academic standards: The value of changing the state's academic standards was debated at Monday's stop in the Department of Education's listening tour in St. Johns County, but most in attendance agreed that they want less standardized testing for students and more hands-on learning in schools. The tour makes its final two stops today in Hamilton County and tomorrow in Walton County. *WJAX*.

Politics and charters: Democratic presidential candidate Elizabeth Warren says if she's elected, she'll cut off federal funding for charter schools, ban for-profit charter schools and require the same accountability rules for charters that public schools must meet. She also said she'd push for a 2 percent "wealth tax" on households worth $50 million or more to increase funding for K-12 public schools. *Associated Press*. *Florida Phoenix*. *Education Week*. *Chalkbeat*.

School elections: A graduation enhancement teacher at a Pasco County middle school says she's running next year for

AMERICAN OVERSIGHT

the district superintendent's job. The job is now held by Kurt Browning, who has yet to announce if he's running for a third term. Cynthia Thompson, 38, who works at Bayonet Point Middle School, says the superintendent should be an educator, which Browning has not been. *Gradebook*.

Personnel moves: Steve Hegarty has been hired as the communications director for the Pasco County School District. He starts in January and will replace Linda Cobbe, who is retiring in March. *Gradebook*.

District survey says: The Flagler County School District should concentrate on hiring and retaining quality teachers and focus on the safety and mental well-being of its students, according to the results of an online survey. About 75 percent of respondents say they are satisfied with the district. *Flagler Live*.

School's utility bill suit: A Manatee County social activist says she'll file a lawsuit against the mayor of Palmetto for creating a "fraudulent utility bill for Lincoln Memorial Academy," which was taken over by the Manatee County School District. Michelle Williams accuses the mayor of working with the district to create an appearance of financial problems so the district could take over the charter school. *Bradenton Herald*.

One dead in school bus crash: A 70-year-old Umatilla woman was killed when she drove into the back of a stopped Marion County school bus Monday morning. A student who was getting on the bus and a bus aide were slightly injured. *WKMG*. *Ocala Star-Banner*.

Student hit by vehicle: Two students from Lincoln High School in Tallahassee were taken to a hospital for treatment after being hit by a vehicle just after school let out Monday. The injuries are not life-threatening, according to district officials. *Tallahassee Democrat*.

School consultant arrested: An insurance consultant for the Walton County School Board has been arrested and accused of bid tampering. Florida Department of Law Enforcement officials say John Bradley Hoard, 49, used his position to get information about a competitor's bid on a telemedicine services contract and then altered his company's bid after the deadline. *Northwest Florida Daily News*.

Opinions on schools: Maybe it's time for Gov. Ron DeSantis to go back to his roots as a public school graduate and focus on visiting traditional public schools that enroll the vast majority of students in Florida. Let's face it: Ignoring them is a slap in the face. *Diane Rado, Florida Phoenix*. Families should have the option to choose how to spend their K-12 scholarships from the state to maximize the value of their funds given the particular needs and aspirations of the student. *Matthew Ladner, redefinED*. As charter school enrollment increases as a percentage of the total students within a district, a Fordham Institute report has shown, the achievement gains of all students, within both charter and district, improve.*Patrick R. Gibbons, redefinED*. Misplaced nostalgia should not be an excuse to deny giving more parents more choices in their children's education. Education should reflect the way the world is, not the way people want it to be. *Scott Kent, redefinED*. Rather than complaining about or prohibiting the loss of students away from "regular" public schools, we should welcome more charter schools because they offer a faster way to improve student performance. *Len Cabrera, Gainesville Sun*.

Student enrichment: Julietta Ramirez, a 4th-grader at Pine Forest Elementary School in Jacksonville, is named the winner of the state's Hispanic Heritage Month essay contest for her profile of Judge Tatiana Radi Salvador of the 4th Judicial Circuit Court of Florida. *Florida Times-Union*. Creating a farm-to-schools process has been more difficult than imagined for Hernando County school officials, but a recent Fresh from Florida Plate Day event at the Challenger K-8 School in Spring Hill demonstrated the potential. *Tampa Bay Times*. Timothy Rodriguez, from Leesburg High School, has been chosen to be a drum major for Macy's Great American Marching Band during the Thanksgiving parade. *Daily Commercial*. The playground at Eustis Elementary School is getting a "buddy bench" where students can sit to make new friends. *Daily Commercial*. Corie McGraw-Abel, a vocational culinary arts teacher at Coral Shores High School in Monroe County, is awarded a $50,000 grant from the Florida Restaurant and Lodging Association Educational Foundation to renovate the school's kitchen. *Key West Citizen*.

The post Panel backs Broward sheriff's removal, insurance for armed teachers and moreappeared first on redefinED.

Review of Proposed 2020 Florida Senate Bill

Prepared for: Sen. Jeff Brandes, Florida State Senate

Prepared by: Len Gilroy, Vice President, Government Reform
Ryan Frost, Policy Analyst, Pension Integrity Project

Project Date: November 11, 2019

Comments on Proposed Legislation

1. Section 1 changes - S 121.4501 § 4(b)
    a. Removed lead-in statement from 3(a).

2. Section 2 changes - S 121.571 § 4
    a. Replaced "salary" with "compensation" in two places. There is no definition of "salary" under Title X, Chapter 121, but "compensation" is clearly defined.
        i. *""Compensation" means the monthly salary paid a member by his or her employer for work performed arising from that employment."*

3. Section 3 changes - S 121.71 § 3(b)
    a. Recommend moving the current member rate up to 5% sooner than 2024. Current members will still be at 5% one year later than post-July 2020 hires with this change.

4. Section 4 changes - S 121.72 § 5-8
    a. Removed needless end dates due to new start dates being added in the next subsection.

5. Section 10 changes
    a. Small edits for sentence flow.

A bill to be entitled

An act relating to the Florida Retirement System Investment Plan; amending s. 121.4501, F.S.; specifying applicability of employee and employer contribution rates for employees who default into the investment plan; amending s. 121.571, F.S.; authorizing investment plan members to make voluntary contributions to the plan, subject to certain limitations; amending s. 121.71, F.S.; revising required employee contribution rates for the investment plan; conforming provisions to changes made by the act; amending s. 121.72, F.S.; revising the percentage of gross compensation allocated to investment plan member accounts to conform to changes made by the act; amending ss. 121.051, 121.055, 121.35, and 1012.875, F.S.; conforming cross-references to changes made by the act; revising required employer retirement contribution rates to fund the benefit changes made by the act; providing a directive to the Division of Law Revision; requiring the State Board of Administration to prepare a report regarding income annuities; requiring the state board to submit the report to the board trustees and the Legislature by a specified date; providing a declaration of important state interest; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

AMERICAN OVERSIGHT

FL SEN 20-0201 B 20-0202 A 005389

Section 1. Paragraph (b) of subsection (4) of section 121.4501, Florida Statutes, is amended to read:

121.4501 Florida Retirement System Investment Plan.—

(4) PARTICIPATION; ENROLLMENT.—

(b)1. With respect to employees who become eligible to participate in the investment plan by reason of employment in a regularly established position commencing on or after January 1, 2018, or who did not complete an election window before January 1, 2018, any such employee shall be enrolled in the pension plan at the commencement of employment and may, by the last business day of the eighth month following the employee's month of hire, elect to participate in the pension plan or the investment plan. Eligible employees may make a plan election only if they are earning service credit in an employer-employee relationship consistent with s. 121.021(17)(b), excluding leaves of absence without pay.

2. The employee's election must be made in writing or by electronic means and must be filed with the third-party administrator. The election to participate in the pension plan or investment plan is irrevocable, except as provided in paragraph (f).

3.a. Except as provided in subparagraph 4., if the employee fails to make an election to either the pension plan or the investment plan during the 8-month period following the month of hire, the employee is deemed to have elected the investment plan and shall default into the investment plan retroactively to the employee's date of employment. The employee's option to participate in the pension plan is forfeited, except as provided in paragraph (f). ~~Notwithstanding that the default to the~~

AMERICAN OVERSIGHT

~~investment plan is retroactive to the employee's date of hire,~~ ~~t~~The employee and employer shall begin paying employee and employer contributions at the applicable rate for investment plan members prescribed in s. 121.71(3) only after the default has occurred and not retroactively for the initial 8-month period following the date of hire.

b. The amount of the employee and employer contributions paid through the date of default to the investment plan shall be transferred to the investment plan and shall be placed in a default fund as designated by the State Board of Administration. The employee may move the contributions once an account is activated in the investment plan.

4. If the employee is employed in a position included in the Special Risk Class and fails to make an election to either the pension plan or the investment plan during the 8-month period following the month of hire, the employee is deemed to have elected the pension plan and shall default into the pension plan retroactively to the employee's date of employment. The employee's option to participate in the investment plan is forfeited, except as provided in paragraph (f).

5. Effective the first day of the month after an eligible employee makes a plan election of the pension plan or investment plan, or the first day of the month after default, the employee and employer shall pay the applicable contributions based on the employee membership class in the program.

Section 2. Subsection (2) of section 121.571, Florida Statutes, is amended, and subsection (4) is added to that section, to read:

121.571 Contributions.—Contributions to the Florida

AMERICAN OVERSIGHT

Retirement System Investment Plan shall be made as follows:

(2) CONTRIBUTION RATES GENERALLY.—Contributions to fund the retirement, disability, and line-of-duty death benefits provided under this part must be based on the uniform contribution rates established by s. 121.71 and on the membership class or subclass of the member, except for voluntary contributions made pursuant to subsection (4). Such contributions must be allocated as provided in ss. 121.72, 121.73, and 121.735.

(4) VOLUNTARY CONTRIBUTIONS.—An employee may elect to contribute voluntary contributions from his or her ~~salary~~compensation, after the computation of applicable federal taxes, to his or her investment plan account subject to the applicable contribution limitations established under s. 415 of the Internal Revenue Code. The employer shall deduct the voluntary contribution from the employee's monthly ~~salary~~compensation, and the contribution shall be submitted to the division and credited to the account of the employee.

Section 3. Subsections (2) and (3) of section 121.71, Florida Statutes, are amended to read:

121.71 Uniform rates; process; calculations; levy.—

(2) Based on the uniform rates set forth in subsections (3), (4), and (5), employees and employers shall make monthly contributions to the Division of Retirement as required in s. 121.061(1), which shall initially deposit the funds into the Florida Retirement System Contributions Clearing Trust Fund. A change in a contribution rate is effective the first day of the month for which a full month's employer and employee contribution may be made on or after the beginning date of the change. ~~Beginning July 1, 2011,~~ Each employee shall contribute

AMERICAN OVERSIGHT

the contributions required in subsection (3) according to the employee's retirement plan and initial date of entry into the Florida Retirement System. The rates established in subsection (3) do not include any voluntary contributions that an employee has contributed to his or her investment plan account. The employer shall deduct the contribution from the employee's monthly salary, and the contribution shall be submitted to the division. These contributions shall be reported as employer-paid employee contributions, and credited to the account of the employee. The contributions shall be deducted from the employee's salary before the computation of applicable federal taxes and treated as employer contributions under 26 U.S.C. s. 414(h)(2). The employer specifies that the contributions, although designated as employee contributions, are being paid by the employer in lieu of contributions by the employee. The employee does not have the option of choosing to receive the contributed amounts directly instead of having them paid by the employer to the plan. Such contributions are mandatory, and each employee is considered to have consented to payroll deductions. Payment of an employee's salary or wages, less the contribution, is a full and complete discharge and satisfaction of all claims and demands for the service rendered by employees during the period covered by the payment, except their claims to the benefits to which they may be entitled under this chapter.

(3)(a) Required employee retirement contribution rates for each membership class and subclass of the Florida Retirement System for the pension plan ~~both retirement plans~~ are as follows:

AMERICAN OVERSIGHT

Membership Class	Percentage of Gross Compensation, Effective July 1, 2011
Regular Class	3.00%
Special Risk Class	3.00%
Special Risk Administrative Support Class	3.00%
Elected Officers' Class— Legislators, Governor, Lt. Governor, Cabinet Officers, State Attorneys, Public Defenders	3.00%
Elected Officers' Class— Justices, Judges	3.00%
Elected Officers' Class— County Elected Officers	3.00%

AMERICAN OVERSIGHT

Senior Management Service Class	3.00%
DROP	0.00%

(b) Required employee retirement contribution rates for each membership class and subclass of the Florida Retirement System for the investment plan, for members initially enrolled before July 1, 2020, are as follows:

Membership Class	Percentage of Gross Compensation, Effective July 1, 2011	Percentage of Gross Compensation, Effective July 1, 2021	Percentage of Gross Compensation, Effective July 1, 2022	Percentage of Gross Compensation, Effective July 1, 2023	Percentage of Gross Compensation, Effective July 1, 2024
Regular Class	3.00%	~~3.50~~ 5.00%	~~4.00~~ 5.00%	~~4.50~~ 5.00%	5.00%
Special Risk Class	3.00%	3.50%	4.00%	4.50%	5.00%

AMERICAN OVERSIGHT

Special Risk Administrative Support Class	3.00%	3.50%	4.00%	4.50%	5.00%
Elected Officers' Class— Legislators, Governor, Lt. Governor, Cabinet Officers, State Attorneys, Public Defenders	3.00%	3.50%	4.00%	4.50%	5.00%
Elected Officers' Class— Justices, Judges	3.00%	3.50%	4.00%	4.50%	5.00%
Elected Officers' Class— County Elected Officers	3.00%	3.50%	4.00%	4.50%	5.00%

AMERICAN OVERSIGHT

Senior Management Service Class	3.00%	3.50%	4.00%	4.50%	5.00%

(c) Required employee retirement contribution rates for each membership class and subclass of the Florida Retirement System for the investment plan, for members initially enrolled on or after July 1, 2020, are as follows:

Membership Class	Percentage of Gross Compensation, Effective July 1, 2020
Regular Class	5.00%
Special Risk Class	5.00%
Special Risk Administrative Support Class	5.00%
Elected Officers' Class—Legislators, Governor, Lt. Governor,	5.00%

AMERICAN OVERSIGHT

Cabinet Officers, State Attorneys, Public Defenders	
Elected Officers' Class— Justices, Judges	5.00%
Elected Officers' Class— County Elected Officers	5.00%
Senior Management Service Class	5.00%

Section 4. Subsections (1) and (5) of section 121.72, Florida Statutes, are amended, and subsections (6) through (9) are added to that section, to read:

121.72 Allocations to investment plan member accounts; percentage amounts.—

(1) The allocations established in subsections (4) through (9) ~~subsection (4)~~ shall fund retirement benefits under the investment plan and shall be transferred monthly by the Division of Retirement from the Florida Retirement System Contributions Clearing Trust Fund to the third-party administrator for deposit in each participating employee's individual account based on the membership class of the participant. Such allocations do not include any voluntary contributions that an employee has made

AMERICAN OVERSIGHT

toward his or her investment plan account.

(5) Effective July 1, 2012, ~~through June 30, 2021,~~ allocations from the Florida Retirement System Contributions Clearing Trust Fund to investment plan member accounts, for members initially enrolled before July 1, 2020, are as follows:

Membership Class	Percentage of Gross Compensation
Regular Class	6.30%
Special Risk Class	14.00%
Special Risk Administrative Support Class	7.95%
Elected Officers' Class— Legislators, Governor, Lt. Governor, Cabinet Officers, State Attorneys, Public Defenders	9.38%
Elected Officers' Class— Justices, Judges	13.23%
Elected Officers' Class—	11.34%

AMERICAN OVERSIGHT

County Elected Officers

Senior Management Service Class	7.67%

(6) Effective July 1, 2021, ~~through June 30, 2022,~~ allocations from the Florida Retirement System Contributions Clearing Trust Fund to investment plan accounts, for members initially enrolled before July 1, 2020, are as follows:

Membership Class	Percentage of Gross Compensation
Regular Class	7.30%
Special Risk Class	15.00%
Special Risk Administrative Support Class	8.95%

AMERICAN OVERSIGHT

Section 5. Paragraph (c) of subsection (2) of section 121.051, Florida Statutes, is amended to read:

121.051 Participation in the system.—

(2) OPTIONAL PARTICIPATION.—

(c) Employees of public community colleges or charter technical career centers sponsored by public community colleges, designated in s. 1000.21(3), who are members of the Regular Class of the Florida Retirement System and who comply with the criteria set forth in this paragraph and s. 1012.875 may, in lieu of participating in the Florida Retirement System, elect to withdraw from the system altogether and participate in the State Community College System Optional Retirement Program provided by the employing agency under s. 1012.875.

1.a. Through June 30, 2001, the cost to the employer for benefits under the optional retirement program equals the normal cost portion of the employer retirement contribution which would be required if the employee were a member of the pension plan's Regular Class, plus the portion of the contribution rate required by s. 112.363(8) which would otherwise be assigned to the Retiree Health Insurance Subsidy Trust Fund.

b. Effective July 1, 2001, through June 30, 2011, each employer shall contribute on behalf of each member of the optional program an amount equal to 10.43 percent of the employee's gross monthly compensation. The employer shall deduct an amount for the administration of the program.

c. Effective July 1, 2011, through June 30, 2012, each member shall contribute an amount equal to the employee contribution required under s. 121.71(3)(a) ~~s. 121.71(3)~~. The

AMERICAN OVERSIGHT

employer shall contribute on behalf of each program member an amount equal to the difference between 10.43 percent of the employee's gross monthly compensation and the employee's required contribution based on the employee's gross monthly compensation.

d. Effective July 1, 2012, each member shall contribute an amount equal to the employee contribution required under s. 121.71(3)(a) ~~s. 121.71(3)~~. The employer shall contribute on behalf of each program member an amount equal to the difference between 8.15 percent of the employee's gross monthly compensation and the employee's required contribution based on the employee's gross monthly compensation.

e. The employer shall contribute an additional amount to the Florida Retirement System Trust Fund equal to the unfunded actuarial accrued liability portion of the Regular Class contribution rate.

2. The decision to participate in the optional retirement program is irrevocable as long as the employee holds a position eligible for participation, except as provided in subparagraph 3. Any service creditable under the Florida Retirement System is retained after the member withdraws from the system; however, additional service credit in the system may not be earned while a member of the optional retirement program.

3. An employee who has elected to participate in the optional retirement program shall have one opportunity, at the employee's discretion, to transfer from the optional retirement program to the pension plan of the Florida Retirement System or to the investment plan established under part II of this chapter, subject to the terms of the applicable optional

AMERICAN OVERSIGHT

retirement program contracts.

a. If the employee chooses to move to the investment plan, any contributions, interest, and earnings creditable to the employee under the optional retirement program are retained by the employee in the optional retirement program, and the applicable provisions of s. 121.4501(4) govern the election.

b. If the employee chooses to move to the pension plan of the Florida Retirement System, the employee shall receive service credit equal to his or her years of service under the optional retirement program.

(I) The cost for such credit is the amount representing the present value of the employee's accumulated benefit obligation for the affected period of service. The cost shall be calculated as if the benefit commencement occurs on the first date the employee becomes eligible for unreduced benefits, using the discount rate and other relevant actuarial assumptions that were used to value the Florida Retirement System Pension Plan liabilities in the most recent actuarial valuation. The calculation must include any service already maintained under the pension plan in addition to the years under the optional retirement program. The present value of any service already maintained must be applied as a credit to total cost resulting from the calculation. The division must ensure that the transfer sum is prepared using a formula and methodology certified by an enrolled actuary.

(II) The employee must transfer from his or her optional retirement program account and from other employee moneys as necessary, a sum representing the present value of the employee's accumulated benefit obligation immediately following

AMERICAN OVERSIGHT

the time of such movement, determined assuming that attained service equals the sum of service in the pension plan and service in the optional retirement program.

4. Participation in the optional retirement program is limited to employees who satisfy the following eligibility criteria:

a. The employee is otherwise eligible for membership or renewed membership in the Regular Class of the Florida Retirement System, as provided in s. 121.021(11) and (12) or s. 121.122.

b. The employee is employed in a full-time position classified in the Accounting Manual for Florida's Public Community Colleges as:

(I) Instructional; or

(II) Executive Management, Instructional Management, or Institutional Management and the community college determines that recruiting to fill a vacancy in the position is to be conducted in the national or regional market, and the duties and responsibilities of the position include the formulation, interpretation, or implementation of policies, or the performance of functions that are unique or specialized within higher education and that frequently support the mission of the community college.

c. The employee is employed in a position not included in the Senior Management Service Class of the Florida Retirement System as described in s. 121.055.

5. Members of the program are subject to the same reemployment limitations, renewed membership provisions, and forfeiture provisions applicable to regular members of the

AMERICAN OVERSIGHT

Florida Retirement System under ss. 121.091(9), 121.122, and 121.091(5), respectively. A member who receives a program distribution funded by employer and required employee contributions is deemed to be retired from a state-administered retirement system if the member is subsequently employed with an employer that participates in the Florida Retirement System.

6. Eligible community college employees are compulsory members of the Florida Retirement System until, pursuant to s. 1012.875, a written election to withdraw from the system and participate in the optional retirement program is filed with the program administrator and received by the division.

a. A community college employee whose program eligibility results from initial employment shall be enrolled in the optional retirement program retroactive to the first day of eligible employment. The employer and employee retirement contributions paid through the month of the employee plan change shall be transferred to the community college to the employee's optional program account, and, effective the first day of the next month, the employer shall pay the applicable contributions based upon subparagraph 1.

b. A community college employee whose program eligibility is due to the subsequent designation of the employee's position as one of those specified in subparagraph 4., or due to the employee's appointment, promotion, transfer, or reclassification to a position specified in subparagraph 4., must be enrolled in the program on the first day of the first full calendar month that such change in status becomes effective. The employer and employee retirement contributions paid from the effective date through the month of the employee plan change must be

AMERICAN OVERSIGHT

transferred to the community college to the employee's optional program account, and, effective the first day of the next month, the employer shall pay the applicable contributions based upon subparagraph 1.

7. Effective July 1, 2003, through December 31, 2008, any member of the optional retirement program who has service credit in the pension plan of the Florida Retirement System for the period between his or her first eligibility to transfer from the pension plan to the optional retirement program and the actual date of transfer may, during employment, transfer to the optional retirement program a sum representing the present value of the accumulated benefit obligation under the defined benefit retirement program for the period of service credit. Upon transfer, all service credit previously earned under the pension plan during this period is nullified for purposes of entitlement to a future benefit under the pension plan.

Section 6. Paragraph (d) of subsection (6) of section 121.055, Florida Statutes, is amended to read:

121.055 Senior Management Service Class.—There is hereby established a separate class of membership within the Florida Retirement System to be known as the "Senior Management Service Class," which shall become effective February 1, 1987.

(6)

(d) *Contributions.*—

1.a. Through June 30, 2001, each employer shall contribute on behalf of each member of the Senior Management Service Optional Annuity Program an amount equal to the normal cost portion of the employer retirement contribution which would be required if the member were a Senior Management Service Class

AMERICAN OVERSIGHT

member of the Florida Retirement System Pension Plan, plus the portion of the contribution rate required in s. 112.363(8) that would otherwise be assigned to the Retiree Health Insurance Subsidy Trust Fund.

b. Effective July 1, 2001, through June 30, 2011, each employer shall contribute on behalf of each member of the optional annuity program an amount equal to 12.49 percent of the employee's gross monthly compensation.

c. Effective July 1, 2011, through June 30, 2012, each member of the optional annuity program shall contribute an amount equal to the employee contribution required under s. 121.71(3)(a) ~~s. 121.71(3)~~. The employer shall contribute on behalf of such employee an amount equal to the difference between 12.49 percent of the employee's gross monthly compensation and the amount equal to the employee's required contribution based on the employee's gross monthly compensation.

d. Effective July 1, 2012, each member of the optional annuity program shall contribute an amount equal to the employee contribution required under s. 121.71. The employer shall contribute on behalf of such employee an amount equal to the difference between 9.27 percent of the employee's gross monthly compensation and the amount equal to the employee's required contribution based on the employee's gross monthly compensation.

e. The department shall deduct an amount approved by the Legislature to provide for the administration of this program. Payment of the contributions, including contributions made by the employee, shall be made by the employer to the department, which shall forward the contributions to the designated company or companies contracting for payment of benefits for the member

AMERICAN OVERSIGHT

under the program.

2. Each employer shall contribute on behalf of each member of the Senior Management Service Optional Annuity Program an amount equal to the unfunded actuarial accrued liability portion of the employer contribution which would be required for members of the Senior Management Service Class in the Florida Retirement System. This contribution shall be paid to the department for transfer to the Florida Retirement System Trust Fund.

3. An Optional Annuity Program Trust Fund shall be established in the State Treasury and administered by the department to make payments to provider companies on behalf of the optional annuity program members, and to transfer the unfunded liability portion of the state optional annuity program contributions to the Florida Retirement System Trust Fund.

4. Contributions required for social security by each employer and employee, in the amount required for social security coverage as now or hereafter may be provided by the federal Social Security Act shall be maintained for each member of the Senior Management Service retirement program and are in addition to the retirement contributions specified in this paragraph.

5. Each member of the optional annuity program may contribute by way of salary reduction or deduction a percentage amount of the employee's gross compensation not to exceed the percentage amount contributed by the employer to the optional annuity program. Payment of the employee's contributions shall be made by the employer to the department, which shall forward the contributions to the designated company or companies contracting for payment of benefits for the member under the

AMERICAN OVERSIGHT

program.

Section 7. Paragraph (a) of subsection (4) of section 121.35, Florida Statutes, is amended to read:

121.35 Optional retirement program for the State University System.—

(4) CONTRIBUTIONS.—

(a)1. Through June 30, 2001, each employer shall contribute on behalf of each member of the optional retirement program an amount equal to the normal cost portion of the employer retirement contribution which would be required if the employee were a regular member of the Florida Retirement System Pension Plan, plus the portion of the contribution rate required in s. 112.363(8) that would otherwise be assigned to the Retiree Health Insurance Subsidy Trust Fund.

2. Effective July 1, 2001, through June 30, 2011, each employer shall contribute on behalf of each member of the optional retirement program an amount equal to 10.43 percent of the employee's gross monthly compensation.

3. Effective July 1, 2011, through June 30, 2012, each member of the optional retirement program shall contribute an amount equal to the employee contribution required in s. 121.71(3)(a) ~~s. 121.71(3)~~. The employer shall contribute on behalf of each such member an amount equal to the difference between 10.43 percent of the employee's gross monthly compensation and the amount equal to the employee's required contribution based on the employee's gross monthly compensation.

4. Effective July 1, 2012, each member of the optional retirement program shall contribute an amount equal to the employee contribution required in s. 121.71(3)(a) ~~s. 121.71(3)~~.

AMERICAN OVERSIGHT

The employer shall contribute on behalf of each such member an amount equal to the difference between 8.15 percent of the employee's gross monthly compensation and the amount equal to the employee's required contribution based on the employee's gross monthly compensation.

5. The payment of the contributions, including contributions by the employee, shall be made by the employer to the department, which shall forward the contributions to the designated company or companies contracting for payment of benefits for members of the program. However, such contributions paid on behalf of an employee described in paragraph (3)(c) may not be forwarded to a company and do not begin to accrue interest until the employee has executed a contract and notified the department. The department shall deduct an amount from the contributions to provide for the administration of this program.

Section 8. Paragraph (a) of subsection (4) of section 1012.875, Florida Statutes, is amended to read:

1012.875 State Community College System Optional Retirement Program.—Each Florida College System institution may implement an optional retirement program, if such program is established therefor pursuant to s. 1001.64(20), under which annuity or other contracts providing retirement and death benefits may be purchased by, and on behalf of, eligible employees who participate in the program, in accordance with s. 403(b) of the Internal Revenue Code. Except as otherwise provided herein, this retirement program, which shall be known as the State Community College System Optional Retirement Program, may be implemented and administered only by an individual Florida College System institution or by a consortium of Florida College System

AMERICAN OVERSIGHT

institutions.

(4)(a)1. Through June 30, 2011, each college must contribute on behalf of each program member an amount equal to 10.43 percent of the employee's gross monthly compensation.

2. Effective July 1, 2011, through June 30, 2012, each member shall contribute an amount equal to the employee contribution required under s. 121.71(3)(a) ~~s. 121.71(3)~~. The employer shall contribute on behalf of each program member an amount equal to the difference between 10.43 percent of the employee's gross monthly compensation and the employee's required contribution based on the employee's gross monthly compensation.

3. Effective July 1, 2012, each member shall contribute an amount equal to the employee contribution required under s. 121.71(3)(a) ~~s. 121.71(3)~~. The employer shall contribute on behalf of each program member an amount equal to the difference between 8.15 percent of the employee's gross monthly compensation and the employee's required contribution based on the employee's gross monthly compensation.

4. The college shall deduct an amount approved by the district board of trustees of the college to provide for the administration of the optional retirement program. Payment of this contribution must be made directly by the college or through the program administrator to the designated company contracting for payment of benefits to the program member.

Section 9. (1) In order to fund the benefit changes provided by this act, the required employer contribution rates for the members of the Florida Retirement System established in s. 121.71(4), Florida Statutes, are increased as follows:

AMERICAN OVERSIGHT

(a) By X.XX percentage point for the Regular Class.

(b) By X.XX percentage point for the Special Risk Class.

(c) By X.XX percentage point for the Special Risk Administrative Support Class.

(d) By X.XX percentage point for the Elected Officers' Class—Legislators, Governor, Lt. Governor, Cabinet Officers, State Attorneys, Public Defenders.

(e) By X.XX percentage point for the Elected Officers' Class—Justices, Judges.

(f) By X.XX percentage point for the Elected Officers' Class—County Elected Officers.

(g) By X.XX percentage point for the Senior Management Service Class.

(2) In order to fund the benefit changes provided by this act, the required employer contribution rate for the unfunded actuarial liability of the Florida Retirement System established in s. 121.71(5), Florida Statutes, are increased as follows:

(a) By X.XX percentage point for the Regular Class.

(b) By X.XX percentage point for the Special Risk Class.

(c) By X.XX percentage point for the Special Risk Administrative Support Class.

(d) By X.XX percentage point for the Elected Officers' Class—Legislators, Governor, Lt. Governor, Cabinet Officers, State Attorneys, Public Defenders.

(e) By X.XX percentage point for the Elected Officers' Class—Justices, Judges.

(f) By X.XX percentage point for the Elected Officers' Class—County Elected Officers.

(g) By X.XX percentage point for the Senior Management

AMERICAN OVERSIGHT

Service Class.

(3) The adjustments provided in subsections (1) and (2) are in addition to any other changes to such contribution rates which may be enacted into law to take effect on July 1, 2020. The Division of Law Revision is directed to adjust accordingly the contribution rates provided in s. 121.71, Florida Statutes.

Section 10. The State Board of Administration shall prepare a report that examines the adequacy and ~~the~~ use of current income annuity options available to members of the Florida Retirement System Investment Plan.~~,~~ The report should recommend ~~and~~ strategies on how to further increase access to income annuity options and any additional options for guaranteed lifetime income that would assist in providing greater retirement security for investment plan retirees. The state board shall propose any legislative changes that are necessary in order to implement any of the strategies outlined in its report. By March 1, 2021, the state board shall submit the report to the board's trustees, the President of the Senate, and the Speaker of the House of Representatives.

Section 11. The Legislature finds that a proper and legitimate state purpose is served when employees, officers, and retirees of the state and its political subdivisions, and the dependents, survivors, and beneficiaries of such employees, officers, and retirees, are extended the basic protections afforded by governmental retirement systems. These persons must be provided benefits that are fair and adequate and that are managed, administered, and funded in an actuarially sound manner as required by s. 14, Article X of the State Constitution and part VII of chapter 112, Florida Statutes. Therefore, the

AMERICAN OVERSIGHT

Legislature determines and declares that this act fulfills an important state interest.

Section 12. This act shall take effect July 1, 2020.

AMERICAN OVERSIGHT

Review of Proposed 2020 Florida Senate Bill

Prepared for: Sen. Jeff Brandes, Florida State Senate

Prepared by: Len Gilroy, Vice President, Government Reform
Ryan Frost, Policy Analyst, Pension Integrity Project

Project Date: November 11, 2019

Summary of Proposed Legislation

1. **Clarifying Contribution Rates for Defaulted Members**
    a. Employee and Employer rates for members who default into the Investment Plan (due to failure to make an election in either pension plan after 8 months of employment) will begin after the default has occurred

2. **Allowing Voluntary Contributions for Investment Plan Participants**
    a. Employees who participate in the investment plan will now be allowed to voluntarily contribute a higher amount (subject to limitations under s. 415 of the IRC).
        i. For 2019, total contributions to a s. 415 plan is $56,000.
        ii. Employees, due to limits under s. 402(g), may contribute up to $19,000.
        iii. For employees over age 50, an additional $6,000 may be contributed annually (only authorized if employee is already contributing the 2019 max of $19,000).

3. **Increasing Investment Plan Contribution Rates**
    a. Increases the required employee contribution (for active members) by 50 basis points per year over 4 years to arrive at a 5% employee rate.
        i. Employees hired after July 1, 2020 will begin paying a 5% rate immediately.
    b. Increases the required employer contribution rate (on active member accounts) by 100 basis points per year over 4 years to arrive at a 7.3% employer rate.
        i. Employer rate for members hired after July 1, 2020 will be 7.3% immediately.

4. **Employer Cost to Fund Benefit Changes**
    a. Section 9 will, we're assuming, be calculated by the plan actuaries prior to bill introduction.

5. **Study on Annuity Options**
    a. The State Board of Administration will conduct a study to examine the adequacy and use of income annuity options available to Investment Plan members.
        i. Study is due to the legislature by March 1, 2021.

A bill to be entitled

An act relating to the Florida Retirement System Investment Plan; amending s. 121.4501, F.S.; specifying applicability of employee and employer contribution rates for employees who default into the investment plan; amending s. 121.571, F.S.; authorizing investment plan members to make voluntary contributions to the plan, subject to certain limitations; amending s. 121.71, F.S.; revising required employee contribution rates for the investment plan; conforming provisions to changes made by the act; amending s. 121.72, F.S.; revising the percentage of gross compensation allocated to investment plan member accounts to conform to changes made by the act; amending ss. 121.051, 121.055, 121.35, and 1012.875, F.S.; conforming cross-references to changes made by the act; revising required employer retirement contribution rates to fund the benefit changes made by the act; providing a directive to the Division of Law Revision; requiring the State Board of Administration to prepare a report regarding income annuities; requiring the state board to submit the report to the board trustees and the Legislature by a specified date; providing a declaration of important state interest; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

AMERICAN OVERSIGHT

Section 1. Paragraph (b) of subsection (4) of section 121.4501, Florida Statutes, is amended to read:

121.4501 Florida Retirement System Investment Plan.—

(4) PARTICIPATION; ENROLLMENT.—

(b)1. With respect to employees who become eligible to participate in the investment plan by reason of employment in a regularly established position commencing on or after January 1, 2018, or who did not complete an election window before January 1, 2018, any such employee shall be enrolled in the pension plan at the commencement of employment and may, by the last business day of the eighth month following the employee's month of hire, elect to participate in the pension plan or the investment plan. Eligible employees may make a plan election only if they are earning service credit in an employer-employee relationship consistent with s. 121.021(17)(b), excluding leaves of absence without pay.

2. The employee's election must be made in writing or by electronic means and must be filed with the third-party administrator. The election to participate in the pension plan or investment plan is irrevocable, except as provided in paragraph (f).

3.a. Except as provided in subparagraph 4., if the employee fails to make an election to either the pension plan or the investment plan during the 8-month period following the month of hire, the employee is deemed to have elected the investment plan and shall default into the investment plan retroactively to the employee's date of employment. The employee's option to participate in the pension plan is forfeited, except as provided in paragraph (f). Notwithstanding that the default to the

AMERICAN OVERSIGHT

investment plan is retroactive to the employee's date of hire, the employee and employer shall begin paying employee and employer contributions at the applicable rate for investment plan members prescribed in s. 121.71(3) only after the default has occurred and not retroactively for the initial 8-month period following the date of hire.

b. The amount of the employee and employer contributions paid through the date of default to the investment plan shall be transferred to the investment plan and shall be placed in a default fund as designated by the State Board of Administration. The employee may move the contributions once an account is activated in the investment plan.

4. If the employee is employed in a position included in the Special Risk Class and fails to make an election to either the pension plan or the investment plan during the 8-month period following the month of hire, the employee is deemed to have elected the pension plan and shall default into the pension plan retroactively to the employee's date of employment. The employee's option to participate in the investment plan is forfeited, except as provided in paragraph (f).

5. Effective the first day of the month after an eligible employee makes a plan election of the pension plan or investment plan, or the first day of the month after default, the employee and employer shall pay the applicable contributions based on the employee membership class in the program.

Section 2. Subsection (2) of section 121.571, Florida Statutes, is amended, and subsection (4) is added to that section, to read:

121.571 Contributions.—Contributions to the Florida

AMERICAN OVERSIGHT

Retirement System Investment Plan shall be made as follows:

(2) CONTRIBUTION RATES GENERALLY.—Contributions to fund the retirement, disability, and line-of-duty death benefits provided under this part must be based on the uniform contribution rates established by s. 121.71 and on the membership class or subclass of the member, except for voluntary contributions made pursuant to subsection (4). Such contributions must be allocated as provided in ss. 121.72, 121.73, and 121.735.

(4) VOLUNTARY CONTRIBUTIONS.—An employee may elect to contribute voluntary contributions from his or her salary, after the computation of applicable federal taxes, to his or her investment plan account subject to the applicable contribution limitations established under s. 415 of the Internal Revenue Code. The employer shall deduct the voluntary contribution from the employee's monthly salary, and the contribution shall be submitted to the division and credited to the account of the employee.

Section 3. Subsections (2) and (3) of section 121.71, Florida Statutes, are amended to read:

121.71 Uniform rates; process; calculations; levy.—

(2) Based on the uniform rates set forth in subsections (3), (4), and (5), employees and employers shall make monthly contributions to the Division of Retirement as required in s. 121.061(1), which shall initially deposit the funds into the Florida Retirement System Contributions Clearing Trust Fund. A change in a contribution rate is effective the first day of the month for which a full month's employer and employee contribution may be made on or after the beginning date of the change. ~~Beginning July 1, 2011,~~ Each employee shall contribute

AMERICAN OVERSIGHT

the contributions required in subsection (3) according to the employee's retirement plan and initial date of entry into the Florida Retirement System. The rates established in subsection (3) do not include any voluntary contributions that an employee has contributed to his or her investment plan account. The employer shall deduct the contribution from the employee's monthly salary, and the contribution shall be submitted to the division. These contributions shall be reported as employer-paid employee contributions, and credited to the account of the employee. The contributions shall be deducted from the employee's salary before the computation of applicable federal taxes and treated as employer contributions under 26 U.S.C. s. 414(h)(2). The employer specifies that the contributions, although designated as employee contributions, are being paid by the employer in lieu of contributions by the employee. The employee does not have the option of choosing to receive the contributed amounts directly instead of having them paid by the employer to the plan. Such contributions are mandatory, and each employee is considered to have consented to payroll deductions. Payment of an employee's salary or wages, less the contribution, is a full and complete discharge and satisfaction of all claims and demands for the service rendered by employees during the period covered by the payment, except their claims to the benefits to which they may be entitled under this chapter.

(3)(a) Required employee retirement contribution rates for each membership class and subclass of the Florida Retirement System for the pension plan ~~both retirement plans~~ are as follows:

AMERICAN OVERSIGHT

Membership Class	Percentage of Gross Compensation, Effective July 1, 2011
Regular Class	3.00%
Special Risk Class	3.00%
Special Risk Administrative Support Class	3.00%
Elected Officers' Class— Legislators, Governor, Lt. Governor, Cabinet Officers, State Attorneys, Public Defenders	3.00%
Elected Officers' Class— Justices, Judges	3.00%

Section 4. Subsections (1) and (5) of section 121.72,

AMERICAN OVERSIGHT

Florida Statutes, are amended, and subsections (6) through (9) are added to that section, to read:

121.72 Allocations to investment plan member accounts; percentage amounts.—

(1) The allocations established in subsections (4) through (9) ~~subsection (4)~~ shall fund retirement benefits under the investment plan and shall be transferred monthly by the Division of Retirement from the Florida Retirement System Contributions Clearing Trust Fund to the third-party administrator for deposit in each participating employee's individual account based on the membership class of the participant. Such allocations do not include any voluntary contributions that an employee has made toward his or her investment plan account.

(5) Effective July 1, 2012, through June 30, 2021, allocations from the Florida Retirement System Contributions Clearing Trust Fund to investment plan member accounts, for members initially enrolled before July 1, 2020, are as follows:

Membership Class	Percentage of Gross Compensation
Regular Class	6.30%
Special Risk Class	14.00%
Special Risk Administrative Support Class	7.95%
Elected Officers' Class—	9.38%

AMERICAN OVERSIGHT

Elected Officers' Class— County Elected Officers	15.34%
Senior Management Service Class	11.67%

Section 5. Paragraph (c) of subsection (2) of section 121.051, Florida Statutes, is amended to read:

121.051 Participation in the system.—

(2) OPTIONAL PARTICIPATION.—

(c) Employees of public community colleges or charter technical career centers sponsored by public community colleges, designated in s. 1000.21(3), who are members of the Regular Class of the Florida Retirement System and who comply with the criteria set forth in this paragraph and s. 1012.875 may, in lieu of participating in the Florida Retirement System, elect to withdraw from the system altogether and participate in the State Community College System Optional Retirement Program provided by

AMERICAN OVERSIGHT

the employing agency under s. 1012.875.

1.a. Through June 30, 2001, the cost to the employer for benefits under the optional retirement program equals the normal cost portion of the employer retirement contribution which would be required if the employee were a member of the pension plan's Regular Class, plus the portion of the contribution rate required by s. 112.363(8) which would otherwise be assigned to the Retiree Health Insurance Subsidy Trust Fund.

b. Effective July 1, 2001, through June 30, 2011, each employer shall contribute on behalf of each member of the optional program an amount equal to 10.43 percent of the employee's gross monthly compensation. The employer shall deduct an amount for the administration of the program.

c. Effective July 1, 2011, through June 30, 2012, each member shall contribute an amount equal to the employee contribution required under s. 121.71(3)(a) ~~s. 121.71(3)~~. The employer shall contribute on behalf of each program member an amount equal to the difference between 10.43 percent of the employee's gross monthly compensation and the employee's required contribution based on the employee's gross monthly compensation.

d. Effective July 1, 2012, each member shall contribute an amount equal to the employee contribution required under s. 121.71(3)(a) ~~s. 121.71(3)~~. The employer shall contribute on behalf of each program member an amount equal to the difference between 8.15 percent of the employee's gross monthly compensation and the employee's required contribution based on the employee's gross monthly compensation.

e. The employer shall contribute an additional amount to

AMERICAN OVERSIGHT

the Florida Retirement System Trust Fund equal to the unfunded actuarial accrued liability portion of the Regular Class contribution rate.

2. The decision to participate in the optional retirement program is irrevocable as long as the employee holds a position eligible for participation, except as provided in subparagraph 3. Any service creditable under the Florida Retirement System is retained after the member withdraws from the system; however, additional service credit in the system may not be earned while a member of the optional retirement program.

3. An employee who has elected to participate in the optional retirement program shall have one opportunity, at the employee's discretion, to transfer from the optional retirement program to the pension plan of the Florida Retirement System or to the investment plan established under part II of this chapter, subject to the terms of the applicable optional retirement program contracts.

a. If the employee chooses to move to the investment plan, any contributions, interest, and earnings creditable to the employee under the optional retirement program are retained by the employee in the optional retirement program, and the applicable provisions of s. 121.4501(4) govern the election.

b. If the employee chooses to move to the pension plan of the Florida Retirement System, the employee shall receive service credit equal to his or her years of service under the optional retirement program.

(I) The cost for such credit is the amount representing the present value of the employee's accumulated benefit obligation for the affected period of service. The cost shall be calculated

AMERICAN OVERSIGHT

as if the benefit commencement occurs on the first date the employee becomes eligible for unreduced benefits, using the discount rate and other relevant actuarial assumptions that were used to value the Florida Retirement System Pension Plan liabilities in the most recent actuarial valuation. The calculation must include any service already maintained under the pension plan in addition to the years under the optional retirement program. The present value of any service already maintained must be applied as a credit to total cost resulting from the calculation. The division must ensure that the transfer sum is prepared using a formula and methodology certified by an enrolled actuary.

(II) The employee must transfer from his or her optional retirement program account and from other employee moneys as necessary, a sum representing the present value of the employee's accumulated benefit obligation immediately following the time of such movement, determined assuming that attained service equals the sum of service in the pension plan and service in the optional retirement program.

4. Participation in the optional retirement program is limited to employees who satisfy the following eligibility criteria:

a. The employee is otherwise eligible for membership or renewed membership in the Regular Class of the Florida Retirement System, as provided in s. 121.021(11) and (12) or s. 121.122.

b. The employee is employed in a full-time position classified in the Accounting Manual for Florida's Public Community Colleges as:

AMERICAN OVERSIGHT

(I) Instructional; or

(II) Executive Management, Instructional Management, or Institutional Management and the community college determines that recruiting to fill a vacancy in the position is to be conducted in the national or regional market, and the duties and responsibilities of the position include the formulation, interpretation, or implementation of policies, or the performance of functions that are unique or specialized within higher education and that frequently support the mission of the community college.

c. The employee is employed in a position not included in the Senior Management Service Class of the Florida Retirement System as described in s. 121.055.

5. Members of the program are subject to the same reemployment limitations, renewed membership provisions, and forfeiture provisions applicable to regular members of the Florida Retirement System under ss. 121.091(9), 121.122, and 121.091(5), respectively. A member who receives a program distribution funded by employer and required employee contributions is deemed to be retired from a state-administered retirement system if the member is subsequently employed with an employer that participates in the Florida Retirement System.

6. Eligible community college employees are compulsory members of the Florida Retirement System until, pursuant to s. 1012.875, a written election to withdraw from the system and participate in the optional retirement program is filed with the program administrator and received by the division.

a. A community college employee whose program eligibility results from initial employment shall be enrolled in the

AMERICAN OVERSIGHT

optional retirement program retroactive to the first day of eligible employment. The employer and employee retirement contributions paid through the month of the employee plan change shall be transferred to the community college to the employee's optional program account, and, effective the first day of the next month, the employer shall pay the applicable contributions based upon subparagraph 1.

b. A community college employee whose program eligibility is due to the subsequent designation of the employee's position as one of those specified in subparagraph 4., or due to the employee's appointment, promotion, transfer, or reclassification to a position specified in subparagraph 4., must be enrolled in the program on the first day of the first full calendar month that such change in status becomes effective. The employer and employee retirement contributions paid from the effective date through the month of the employee plan change must be transferred to the community college to the employee's optional program account, and, effective the first day of the next month, the employer shall pay the applicable contributions based upon subparagraph 1.

7. Effective July 1, 2003, through December 31, 2008, any member of the optional retirement program who has service credit in the pension plan of the Florida Retirement System for the period between his or her first eligibility to transfer from the pension plan to the optional retirement program and the actual date of transfer may, during employment, transfer to the optional retirement program a sum representing the present value of the accumulated benefit obligation under the defined benefit retirement program for the period of service credit. Upon

AMERICAN OVERSIGHT

transfer, all service credit previously earned under the pension plan during this period is nullified for purposes of entitlement to a future benefit under the pension plan.

Section 6. Paragraph (d) of subsection (6) of section 121.055, Florida Statutes, is amended to read:

121.055 Senior Management Service Class.—There is hereby established a separate class of membership within the Florida Retirement System to be known as the "Senior Management Service Class," which shall become effective February 1, 1987.

(6)

(d) *Contributions.*—

1.a. Through June 30, 2001, each employer shall contribute on behalf of each member of the Senior Management Service Optional Annuity Program an amount equal to the normal cost portion of the employer retirement contribution which would be required if the member were a Senior Management Service Class member of the Florida Retirement System Pension Plan, plus the portion of the contribution rate required in s. 112.363(8) that would otherwise be assigned to the Retiree Health Insurance Subsidy Trust Fund.

b. Effective July 1, 2001, through June 30, 2011, each employer shall contribute on behalf of each member of the optional annuity program an amount equal to 12.49 percent of the employee's gross monthly compensation.

c. Effective July 1, 2011, through June 30, 2012, each member of the optional annuity program shall contribute an amount equal to the employee contribution required under s. 121.71(3)(a) ~~s. 121.71(3)~~. The employer shall contribute on behalf of such employee an amount equal to the difference

AMERICAN OVERSIGHT

between 12.49 percent of the employee's gross monthly compensation and the amount equal to the employee's required contribution based on the employee's gross monthly compensation.

d. Effective July 1, 2012, each member of the optional annuity program shall contribute an amount equal to the employee contribution required under s. 121.71. The employer shall contribute on behalf of such employee an amount equal to the difference between 9.27 percent of the employee's gross monthly compensation and the amount equal to the employee's required contribution based on the employee's gross monthly compensation.

e. The department shall deduct an amount approved by the Legislature to provide for the administration of this program. Payment of the contributions, including contributions made by the employee, shall be made by the employer to the department, which shall forward the contributions to the designated company or companies contracting for payment of benefits for the member under the program.

2. Each employer shall contribute on behalf of each member of the Senior Management Service Optional Annuity Program an amount equal to the unfunded actuarial accrued liability portion of the employer contribution which would be required for members of the Senior Management Service Class in the Florida Retirement System. This contribution shall be paid to the department for transfer to the Florida Retirement System Trust Fund.

3. An Optional Annuity Program Trust Fund shall be established in the State Treasury and administered by the department to make payments to provider companies on behalf of the optional annuity program members, and to transfer the unfunded liability portion of the state optional annuity program

AMERICAN OVERSIGHT

contributions to the Florida Retirement System Trust Fund.

4. Contributions required for social security by each employer and employee, in the amount required for social security coverage as now or hereafter may be provided by the federal Social Security Act shall be maintained for each member of the Senior Management Service retirement program and are in addition to the retirement contributions specified in this paragraph.

5. Each member of the optional annuity program may contribute by way of salary reduction or deduction a percentage amount of the employee's gross compensation not to exceed the percentage amount contributed by the employer to the optional annuity program. Payment of the employee's contributions shall be made by the employer to the department, which shall forward the contributions to the designated company or companies contracting for payment of benefits for the member under the program.

Section 7. Paragraph (a) of subsection (4) of section 121.35, Florida Statutes, is amended to read:

121.35 Optional retirement program for the State University System.—

(4) CONTRIBUTIONS.—

(a)1. Through June 30, 2001, each employer shall contribute on behalf of each member of the optional retirement program an amount equal to the normal cost portion of the employer retirement contribution which would be required if the employee were a regular member of the Florida Retirement System Pension Plan, plus the portion of the contribution rate required in s. 112.363(8) that would otherwise be assigned to the Retiree

AMERICAN OVERSIGHT

Health Insurance Subsidy Trust Fund.

2. Effective July 1, 2001, through June 30, 2011, each employer shall contribute on behalf of each member of the optional retirement program an amount equal to 10.43 percent of the employee's gross monthly compensation.

3. Effective July 1, 2011, through June 30, 2012, each member of the optional retirement program shall contribute an amount equal to the employee contribution required in s. 121.71(3)(a) ~~s. 121.71(3)~~. The employer shall contribute on behalf of each such member an amount equal to the difference between 10.43 percent of the employee's gross monthly compensation and the amount equal to the employee's required contribution based on the employee's gross monthly compensation.

4. Effective July 1, 2012, each member of the optional retirement program shall contribute an amount equal to the employee contribution required in s. 121.71(3)(a) ~~s. 121.71(3)~~. The employer shall contribute on behalf of each such member an amount equal to the difference between 8.15 percent of the employee's gross monthly compensation and the amount equal to the employee's required contribution based on the employee's gross monthly compensation.

5. The payment of the contributions, including contributions by the employee, shall be made by the employer to the department, which shall forward the contributions to the designated company or companies contracting for payment of benefits for members of the program. However, such contributions paid on behalf of an employee described in paragraph (3)(c) may not be forwarded to a company and do not begin to accrue interest until the employee has executed a contract and notified

AMERICAN OVERSIGHT

the department. The department shall deduct an amount from the contributions to provide for the administration of this program.

Section 8. Paragraph (a) of subsection (4) of section 1012.875, Florida Statutes, is amended to read:

1012.875 State Community College System Optional Retirement Program.—Each Florida College System institution may implement an optional retirement program, if such program is established therefor pursuant to s. 1001.64(20), under which annuity or other contracts providing retirement and death benefits may be purchased by, and on behalf of, eligible employees who participate in the program, in accordance with s. 403(b) of the Internal Revenue Code. Except as otherwise provided herein, this retirement program, which shall be known as the State Community College System Optional Retirement Program, may be implemented and administered only by an individual Florida College System institution or by a consortium of Florida College System institutions.

(4)(a)1. Through June 30, 2011, each college must contribute on behalf of each program member an amount equal to 10.43 percent of the employee's gross monthly compensation.

2. Effective July 1, 2011, through June 30, 2012, each member shall contribute an amount equal to the employee contribution required under s. 121.71(3)(a) ~~s. 121.71(3)~~. The employer shall contribute on behalf of each program member an amount equal to the difference between 10.43 percent of the employee's gross monthly compensation and the employee's required contribution based on the employee's gross monthly compensation.

3. Effective July 1, 2012, each member shall contribute an

AMERICAN OVERSIGHT

amount equal to the employee contribution required under s. 121.71(3)(a) ~~s. 121.71(3)~~. The employer shall contribute on behalf of each program member an amount equal to the difference between 8.15 percent of the employee's gross monthly compensation and the employee's required contribution based on the employee's gross monthly compensation.

4. The college shall deduct an amount approved by the district board of trustees of the college to provide for the administration of the optional retirement program. Payment of this contribution must be made directly by the college or through the program administrator to the designated company contracting for payment of benefits to the program member.

Section 9. (1) In order to fund the benefit changes provided by this act, the required employer contribution rates for the members of the Florida Retirement System established in s. 121.71(4), Florida Statutes, are increased as follows:

(a) By X.XX percentage point for the Regular Class.

(b) By X.XX percentage point for the Special Risk Class.

(c) By X.XX percentage point for the Special Risk Administrative Support Class.

(d) By X.XX percentage point for the Elected Officers' Class—Legislators, Governor, Lt. Governor, Cabinet Officers, State Attorneys, Public Defenders.

(e) By X.XX percentage point for the Elected Officers' Class—Justices, Judges.

(f) By X.XX percentage point for the Elected Officers' Class—County Elected Officers.

(g) By X.XX percentage point for the Senior Management Service Class.

AMERICAN OVERSIGHT

(2) In order to fund the benefit changes provided by this act, the required employer contribution rate for the unfunded actuarial liability of the Florida Retirement System established in s. 121.71(5), Florida Statutes, are increased as follows:

(a) By X.XX percentage point for the Regular Class.

(b) By X.XX percentage point for the Special Risk Class.

(c) By X.XX percentage point for the Special Risk Administrative Support Class.

(d) By X.XX percentage point for the Elected Officers' Class—Legislators, Governor, Lt. Governor, Cabinet Officers, State Attorneys, Public Defenders.

(e) By X.XX percentage point for the Elected Officers' Class—Justices, Judges.

(f) By X.XX percentage point for the Elected Officers' Class—County Elected Officers.

(g) By X.XX percentage point for the Senior Management Service Class.

(3) The adjustments provided in subsections (1) and (2) are in addition to any other changes to such contribution rates which may be enacted into law to take effect on July 1, 2020. The Division of Law Revision is directed to adjust accordingly the contribution rates provided in s. 121.71, Florida Statutes.

Section 10. The State Board of Administration shall prepare a report that examines the adequacy and the use of current income annuity options available to members of the Florida Retirement System Investment Plan, and strategies on how to further increase access to income annuity options and any additional options for guaranteed lifetime income that would assist in providing greater retirement security for investment

AMERICAN OVERSIGHT

plan retirees. The state board shall propose any legislative changes that are necessary in order to implement any of the strategies outlined in its report. By March 1, 2021, the state board shall submit the report to the board's trustees, the President of the Senate, and the Speaker of the House of Representatives.

Section 11. The Legislature finds that a proper and legitimate state purpose is served when employees, officers, and retirees of the state and its political subdivisions, and the dependents, survivors, and beneficiaries of such employees, officers, and retirees, are extended the basic protections afforded by governmental retirement systems. These persons must be provided benefits that are fair and adequate and that are managed, administered, and funded in an actuarially sound manner as required by s. 14, Article X of the State Constitution and part VII of chapter 112, Florida Statutes. Therefore, the Legislature determines and declares that this act fulfills an important state interest.

Section 12. This act shall take effect July 1, 2020.

Subject: Please Amend SB 1128

Dear Senator Brandes and members of the Senate Committee on IIT,

As owners of a one-bedroom condo, our legal residence, we are concerned about Senate Bill 1128 as currently proposed.

My association and we as individuals request that the current SB 1128 be amended to assure that duly adopted condominium and home owner association deed restrictions and governing documents will not be "superseded". Our current restrictions can be protected by REMOVING Lines 87-90 and Lines 96-98 so that SB 1128 is consistent with legislation on this topic adopted in 2019.

Thank you for considering our request. We appreciate your voice on our behalf in the highest levels of our state government.

Regards,

Howard & Janis Crosson

CRIMINAL JUSTICE

Correlates of Intimate Partner Homicide in the Rural United States: Findings From a National Sample of Rural Counties, 2009–2016

Intimate partner homicide in the U.S. rural context has increased in recent years while other types of homicide have decreased. This suggests that some rural structural characteristics make intimate partner homicide more likely in rural communities than other forms of homicide. This study used multilevel models to examine individual- and community-level characteristics' association with intimate partner homicide in rural counties between 2009 and 2016 in the United States. Overall, individual-level correlates were more strongly associated with intimate partner homicide than community-level correlates, although increased economic need was associated with intimate partner homicide in one of the models. Implications for individual-level intervention, policy, and future research are discussed.

Criminal Justice Reform in the Fentanyl Era: One Step Forward, Two Steps Back

The U.S. is in the throes of a deadly overdose crisis that claimed almost 70,000 lives in 2018. Of those, around 30,000 deaths involved synthetic opioids like fentanyl. Since 2011, 45 states have proposed legislation to increase penalties for fentanyl while 39 states and Washington D.C. have passed or enacted such legislation. This paper aims to shine a light on the danger that harsh fentanyl penalties present to the criminal justice reform movement and efforts to end the war on drugs such as exacerbating the overdose crises, inability to differentiate between people who use or sell drugs, and disproportionate targeting of people of color. In addition, the paper includes evidence-based public health and harm reduction recommendations for policymakers such as expanding 911 Good Samaritan Laws, expanding community-based naloxone access and distribution, and improving drug checking, surveillance, and data collection.

The Benefits of Bridging Divides: How YouthBuild Philly Shares its Supportive Practices to Build Business Value and Better Jobs

AMERICAN OVERSIGHT

Many workforce development organizations have expertise in supportive strategies that help people succeed at work. By learning how to translate these practices to their business partners, workforce organizations can provide greater value to employers – helping improve their management practices, reduce turnover costs, and create better jobs. This report documents how YouthBuild Philly partners with retail businesses like Gap Inc. and Brown's Superstores Inc. — ShopRite! to shape the workplace experiences of the young people the organization serves. YouthBuild Philly translates its internal culture of respect and belonging into training and capacity-building services for front-line retail supervisors. This includes treating students as assets to the business, flexible work scheduling to accommodate students' educational and career goals, providing a clear pathway for advancement within the company, and providing a support system to promote employee stability and retention. Businesses report that the supportive practices supervisors learn are useful for improving engagement and retention across their entire workforce. The report highlights three key practices YouthBuild Philly uses that other organizations can adopt to engage retail businesses and strengthen equity, inclusion, and retention: 1) identifying "good-fit" business partnerships that set young people up for success; 2) strengthening front-line management through coaching and feedback; and 3) providing customized training to help business partners institutionalize supportive culture and management.

Dual Enrollment Access

Dual enrollment programs allow students to earn high school and college credit simultaneously. Such programs support students in their transition from high school to college in two ways: first, students access advanced learning experiences that can help them prepare academically for college; second, through early credit accumulation, students have the potential to reduce the total cost of their college degree. In addition, research indicates that participating in dual enrollment increases the chance that a student will attend and graduate from college. As dual enrollment programs have grown, policymakers across the country have been increasingly attentive to the issue of who has access to these courses. While states have consistently sought to ensure broad access to dual enrollment courses, both dual enrollment generally and the specific issue of dual enrollment access received a significant amount of legislative focus in the past year. In 2019, states considered at least 219 bills related to dual enrollment; nearly half of those involved provisions about access to the courses. In this analysis of enacted 2019 legislation, which focused specifically on access, four themes arose across the states: 1) reducing the cost for students, 2) removing barriers to participation, 3) expanding student eligibility, and 4) increasing qualified educators. In this report, Florida House Bill 7071 from the 2019 legislative session (which added a requirement for each school district to establish a career dual enrollment agreement between each high school and the regional career center) is highlighted.

Increasing Community College Graduation Rates with a Proven Model

AMERICAN OVERSIGHT

The nation's community colleges play a central role in producing a more educated workforce and promoting social mobility. They serve about 40% of all college students and, not surprisingly, they serve a disproportionate number of low-income and underrepresented students. But most students who enter these colleges do not graduate — only about a third of entering students earn a degree or certificate within six years. Among the many programs that have attempted to increase graduation rates, one program stands out. Developed by the City University of New York (CUNY), the Accelerated Study in Associate Programs (ASAP) is a comprehensive program that provides students with up to three years of financial and academic support and other support services. Along with those services and other forms of support comes an obligation to attend full time and participate in essential program services. An experimental evaluation of CUNY Accelerated Study in Associate Programs found that the program nearly doubled graduation rates after three years. This report presents findings through three years from a replication of the Accelerated Study in Associate Programs model at three community colleges in Ohio. The findings include that the Ohio programs were generally managed and staffed as planned and implemented as designed and that the programs created a noticeable contrast between the experiences of program and control group students in all areas where the model had components. The Ohio programs nearly doubled degree receipt through three years and led to an increase in transfers to four-year colleges in addition to having a positive effects on enrollment, full-time enrollment, and credits earned. The Ohio programs had positive effects for various types of students, including those who entered with and without developmental (remedial) education requirements. Although the Ohio programs cost more per student than traditional services, they also led to a lower cost per degree.

High School GPAs and ACT Scores as Predictors of College Completion: Examining Assumptions about Consistency across High Schools

High school GPAs are often perceived to represent inconsistent levels of readiness for college across high schools, whereas test scores (e.g., ACT scores) are seen as comparable. This study tests those assumptions, examining variation across high schools of both high school GPAs and ACT scores as measures of academic readiness for college. The authors found students with the same high school GPA or the same ACT score graduate at very different rates based on which high school they attended. Yet, the relationship of high school GPAs with college graduation is strong and consistent and larger than school effects. In contrast, the relationship of ACT scores with college graduation is weak and smaller than high school effects, and the slope of the relationship varies by high school.

Florida Growth Fund Program Investments Provided More Than $432 Million in Florida Retirement System (FRS) Distribution

AMERICAN OVERSIGHT

As of June 30, 2019, the Florida Growth Fund Program had committed to invest $721.1 million in 53 technology and growth companies and 37 private equity funds. Since the previous report, the two fund managers made new investments totaling $83.6 million in six technology and growth companies and four private equity funds. Florida investments were dispersed across 14 counties, with amounts ranging from $6.8 million in Manatee County to $177.5 million in Palm Beach County. From fund inception to June 30, 2019, the program had distributed $432.9 million to the Florida Retirement System trust fund. Since its inception, both the Florida Growth Fund I and Florida Growth Fund II have exceeded benchmarks set for each of these funds. Net internal rates of return since inception range from 12.2% to 9.1%, varying by tranche. The program's investments resulted in reported economic benefits to the state. The Florida Growth Fund Program's investments also resulted in reported economic benefits to the state. Companies that received investments reported creating 20,906 jobs as of June 30, 2019. Fund managers reported that current investments created jobs that paid average salaries of $55,116. These salaries exceed the state's 2018 annual mean income of $50,092. One fund manager reported that companies and private equity funds receiving investments reported making $111.0 million in capital investments between July 1, 2018 and June 30, 2019, bringing total capital expenditures to $865.6 million since the fund's inception.

Leveling the Playing Field Between Inherited Income and Income from Work Through an Inheritance Tax

The core objectives of tax policymaking should be to raise revenue in an efficient and equitable manner. Current taxation of estates and gifts (and non-taxation of inheritances) fails to meet these goals, perpetuating high levels of economic inequality and impeding intergenerational mobility. The current system also provides an intense incentive to delay realization of capital gains until death. These shortcomings distort capital markets, encourage nonproductive estate tax planning, and limit the effectiveness of the overall tax code. The U.S. tax code plays a key role. Inherited income is taxed at less than one-seventh the average tax rate on income from work and savings. This report proposes a major step toward leveling the playing field by requiring wealthy heirs to pay income and payroll taxes on inheritances they receive above a large lifetime exemption.

Source: Brookings Institute

Evidence-Based Retirement Policy: Necessity and Opportunity

Retirement saving plays an important role in the U.S. economy. Americans hold more than $18 trillion in private retirement accounts like 401(k)s and IRAs, while defined benefit pensions in the private and public sector hold trillions more. Social Security and Medicare comprise nearly 40% of the federal budget. Despite existing research, policymakers do not have access to robust empirical consensus when making decisions that affect the retirement security of tens of millions of families. There are many major outstanding questions such as the following: How well are households preparing for retirement? Why does consumption fall at retirement? Do tax-based savings incentives raise net wealth accumulation? Obtaining better answers to these questions and using the insights they provide to guide changes in the American retirement system could improve living standards for generations of retirees and control the federal budget. But to obtain these answers, researchers and policy makers need better information. The authors recommend devoting a percent of program funds to evaluation, evaluating retirement saving tax expenditures, and collecting comprehensive, linked data.

HEALTH AND HUMAN SERVICES

How Can Policy and Practice Support an Innovating Healthcare System?

AMERICAN OVERSIGHT

The British National Health Service is under increasing pressure to meet rising and changing demand for healthcare services, driven in part by an ageing population and growing numbers of people living with chronic conditions. It confronts these demands with limited resources. Policymakers are increasingly recognizing the potential of innovation to support a thriving health and care system. This study recommends actions to strengthen innovation in the National Health Service based on four principles: 1) innovation strategies and policy should be rooted in a whole care-pathway approach; 2) success requires balancing shorter term (quick win) actions with longer term transformational interventions; 3) it is critical to assess how new policies and interventions relate to the existing policy infrastructure; and 4) the need for cultural and behavioral change is critical if innovating is to happen at scale and sustainably.

Source: RAND Corporation

Trends in Unmet Need for Physician and Preventive Services in the United States, 1998-2017

Improvements in insurance coverage and access to care have resulted from the Affordable Care Act (ACA). However, a focus on short-term pre- to post-ACA changes may distract attention from longer-term trends in unmet health needs, and the problems that persist. The goal of this study was to identify changes from 1998 to 2017 in unmet need for physician services among insured and uninsured adults aged 18 to 64 years in the United States. Among the adults aged 18 to 64 years in 1998 (n = 117,392) and in 2017 (n = 282,378) who responded to the Centers for Disease Control and Prevention Behavioral Risk Factors Surveillance System (mean age was 39.2; 50.3% were female; 65.9% were white), uninsurance decreased by 2.1 percentage points (from 16.9% to 14.8%). However, the adjusted proportion unable to see a physician owing to cost increased by 2.7 percentage points overall, by 5.9 percentage points among the uninsured and 3.6 percentage points among the insured (from 7.1% to 11.5%, unadjusted). The adjusted proportion of persons with chronic medical conditions who were unable to see a physician because of cost also increased for most conditions. Results indicate that despite coverage gains since 1998, most measures of unmet need for physician services have shown no improvement, and financial access to physician services has decreased.

Accounting for the Burden And Redistribution of Health Care Costs: Who Uses Care and Who Pays For It

In 2015, health care spending accounted for nearly 18% of the U.S. gross domestic product, a measure of the total value of goods produced and services provided by the nation. Ultimately all health care costs are paid by households, either in obvious ways such as through insurance premiums or out-of-pocket costs, in addition to less-visible ways such as employer-paid premiums and taxes. The researchers analyzed a variety of sources of information to examine the burden that different families face to pay for health care, as well as the relationship between who pays for care and who receives care. Results indicate that higher-income American households pay the most to finance the nation's health care system, but the burden of payments as a share of income is greatest among households with the lowest incomes. Households in the middle three income tiers pay between 19.8% and 23.2% of their income toward health care. The analysis considered all payments made by households to support health care, including taxes and employer contributions.

GRADUATE STUDENT POSITION

AMERICAN OVERSIGHT

OPPAGA is currently accepting applications for a part-time, academic year Graduate Student Position. OPPAGA is an ideal setting for gaining hands-on experience in policy analysis and working on a wide range of issues of interest to the Florida Legislature. OPPAGA provides an opportunity to work in a legislative policy research offices with a highly qualified, multidisciplinary staff that includes public administrators, social scientists, accountants, MBA graduates, and others. For more information on application requirements, click here.

EMPLOYMENT OPPORTUNITIES

OPPAGA is currently seeking applications for **Legislative Policy Analysts** (salary range $38,220 to $82,608) and **Senior Legislative Analysts** (salary range $52,632 to $105,576). Positions are available in the following policy areas: Criminal Justice, Education, Government Operations, and Health and Human Services. Salary is commensurate with experience, and OPPAGA offers excellent employee benefits. For more information on application requirements, click here.

GOVERNMENT PROGRAM SUMMARIES (GPS)

www.oppaga.state.fl.us/government/

Government Program Summaries (GPS) is a free resource for legislators and the public that provides descriptive information on over 200 state government programs. CRIMINAL JUSTICE

Reimagining Prison

The prison experience today is harsh, restrictive, and dehumanizing—resulting in the loss of each incarcerated person's sense of self, autonomy, and capacity to control his or her own destiny. Today's American prison system did not arise fully formed out of 20th century politics and policies, but is interwoven with this country's deep and divisive history of unequal race relations. To transform the goals and experience of incarceration in this country requires that the bold but simple value of human dignity govern all facets of a newly shaped prison system. This report reimagines the how, what, and why of incarceration and asserts a new governing principle on which to ground prison policy and practice: human dignity. Basing American corrections practice on human dignity acknowledges and responds to the role formal state punishment systems have played in creating and perpetuating inequality. The authors propose three practice principles to support this tenet: (1) respect the intrinsic worth of each human being; (2) elevate and support personal relationships; and (3) respect a person's capacity to grow and change.

Implementing Gunshot Detection Technology: Recommendations for Law Enforcement and Municipal Partners

This practitioner guide synthesizes findings from an evaluation of gunshot detection technology in three cities (Denver, Colorado; Milwaukee, Wisconsin; and Richmond, California) to guide law enforcement and government officials in decisions to invest in, continue, or expand the technology in efforts to reduce violent crime. Gunshot detection technology (GDT) is a system that uses a network of outdoor acoustic sensors to automatically detect gunfire and promptly alert law enforcement officers. The evaluation finds that GDT is most effective when law enforcement agencies thoroughly incorporate the technology into day-to-day procedures and operations and when the data generated by GDT is integrated into other data and investigative systems. The guidebook details best practices in GDT training, policy development, deployment, alert response, use in investigations, and communication with community members. Key recommendations include developing clear policies and procedures prior to GDT implementation, placing GDT sensors in areas where violent crime is most concentrated, making training an ongoing priority, and communicating with community members early and often.

AMERICAN OVERSIGHT

States' Use of the Child Care and Development Block Grant Funding Increase

In 2014, Congress reauthorized the Child Care and Development Block Grant (CCDBG), setting new standards around eligibility for child care subsidies, child care quality, health and safety, access to child care, and workforce supports for early childhood educators. The 2014 reauthorization law included policy changes requiring states to: 1) Set provider payment rates to promote equal access to the child care market for parents receiving child care subsidies; 2) Implement family-friendly eligibility policies that help families keep their subsidy without interruptions; 3) Enhance health and safety practices for all CCDBG providers, including health and safety training and inspections and comprehensive background checks; 4) Expand consumer education, which includes increasing online access to information on child development and other financial assistance programs and creating a hotline to report safety concerns; 5) Increase the amounts of set-asides that states must spend toward supporting the quality and development of the child care workforce; and 6) Expand access to child care for vulnerable families and priority groups whose needs and characteristics limit the child care options currently available to them. Florida, specifically, will use additional funding to increase the number of child care subsidies, increase payment rates for child care services, and to expand child care slots for children experiencing homelessness. In addition, Florida will use additional funds to allocate money to child care workforce training, investments in infant/toddler care, investments in home-based care, and to cover enrollment registration fees.

Learning from Peers on a Large Scale: Teachers in High-Poverty Schools Find Value in Results of National Educator Surveys

Teachers in the United States are encouraged to continuously improve their teaching practice, and one method of doing so is learning from peers. Learning from peers can take many forms, such as pursuing formal or informal collaboration, accessing research results through professional networks, or seeking guidance from peers about interventions and instructional strategies. Many opportunities for peer-to-peer learning occur through one-on-one or small-group interactions. Larger-scale opportunities for learning, such as conferences and online communities, may be useful channels for building peer connections, but are unlikely to provide teachers with systematic information about what their peers are doing nationally. Researchers know little about the extent to which teachers would find national survey data about their peers' teaching practice useful, as little research exists on which topics might be perceived as useful for reflection and improvement. In addition, researchers do not know how school characteristics affect teachers' perceptions of the usefulness of such information. Nationally representative data from the web-based American Teacher Panel survey provide insight into the degree to which teachers believe national survey data would be useful for thinking about how they could improve their practice and the extent to which their perceptions vary by school characteristics. The authors found that more than 80% of teachers reported that survey data about social and emotional learning, interventions to support student outcomes, curriculum, and supporting students with high-incidence disabilities would be useful. In addition, they found that teachers in higher-poverty schools were significantly more likely to report that national survey data on many topics would be somewhat or very useful for improving their instruction than teachers in lower-poverty schools. The authors recommend that researchers who collect and analyze national survey data, as well as funders and policymakers who use and disseminate such data, should consider making the results — particularly if they address any of the topics included in the American Teacher Panel — available directly to teachers.

Beyond the Schoolhouse: Overcoming Challenges & Expanding Opportunity for Black Youth in Los Angeles County

AMERICAN OVERSIGHT

In California, despite the state's growing commitment to equity, black children consistently lag behind their peers on standardized assessments and graduation rates. This is also the case in Los Angeles County, the large metropolitan area that is the subject of this report. Black students in Los Angeles County are overrepresented among those who are under-prepared for college, who are subject to punitive forms of discipline, and who are chronically absent from school. Moreover, a disproportionate number of black students in Los Angeles County attend schools that the state has identified as "low-performing" and they are also more likely to be enrolled in schools where critical resources (e.g. school counselors, nurses, social workers, highly qualified teachers, etc.) are in short supply. This report provides detailed analysis of how school-based and environmental factors interact to shape the academic and developmental outcomes of black children. The authors offer five findings: 1) Place matters: Academic performance and health are highly correlated with where a child lives; 2) The majority of black students in Los Angeles County are enrolled in racially isolated (e.g. predominantly black and Latinx students) schools located in impoverished communities; 3) Most of the schools where black children are concentrated have limited resources despite having high numbers of very disadvantaged students (e.g. students in foster care, students who are homeless, in special education, etc.); 4) Key academic and school climate indicators illustrate distinct differences between black students and students of other racial and ethnic groups; 5) Social, environmental and health data reveals that black children and families are more likely to be negatively impacted by their surroundings. The authors provide recommendations for the school, district, city, county, state and federal levels. These recommendations include adopting a Multi-Tiered System of Support, investing in longitudinal data systems, and expanding full-service community schools to support primary health, mental health, and dental care in schools.

Fewer Children Left Behind: Lessons From the Dramatic Achievement Gains of the 1990s and 2000s

This study reports that from the mid- to late 1990s until 2010, fourth and eighth grade National Assessment of Educational Progress scores for the lowest-achieving children, and for students of color, increased in reading, mathematics, and most other academic subjects. At the end of this period black, Hispanic, and low-achieving students were reading and doing mathematics two or three grade levels above their equivalent peers in the early 1990s. This report concludes that schools and school reform are only part of the reason for these educational achievements. Significant improvements in social and economic conditions for the poorest students during this same time period – especially the rapid decrease in rates of violence and child poverty –more likely account for why students started to make significant educational gains.

GOVERNMENT OPERATIONS

Department of Veterans Affairs: Improved Succession Planning Would Help Address Long-Standing Workforce Problems

AMERICAN OVERSIGHT

The U.S. Department of Veterans Affairs (VA) operates one of the largest health care delivery systems in the nation and provides billions of dollars in benefits and services to veterans and their families. However, the VA) faces serious and long-standing problems with management challenges and veterans' access to care and disability benefits. For example, as of December 2018, the VA reported an overall staff vacancy rate of 11% at Veterans Health Administration (VHA) medical facilities, including vacancies of more than 24,000 medical and dental positions, and around 900 human resource positions. Ensuring VA, VHA, and Veterans Benefit Administration (VBA) have a pipeline of talent to fill leadership positions and mission-critical occupations is key to addressing these challenges. The VA Choice and Quality Employment Act of 2017 includes a provision for the Government Accountability Office to review succession planning policies and guidance at VA and its administrations. This report addresses the extent to which succession planning policies and procedures at VA, VHA, and VBA are consistent with key leading practices. The authors reviewed agency documents related to succession planning for leadership positions and mission-critical occupations, and interviewed agency officials. To identify key leading practices, the authors reviewed the Government Accountability Office's past work and Office of Personnel Management guidance. The authors recommend that VA should develop a department-wide succession plan and update its succession planning directive and that VHA and VBA should fully incorporate key leading practices for succession planning. VA agreed with the recommendations.

Will America Embrace National Service?

America's civic health is in significant decline. The percentage of Americans who say others can be trusted fell from 46% in 1972 to just 31% in 2016, with 36% of whites and 17% of blacks expressing such trust; and, in recent years, trust in the media, government, and the courts has fallen to historic lows. It is no surprise that communities are fraying in places like Charlottesville, Ferguson, and Baltimore, and that America is not fulfilling its potential, as political institutions suffer from partisan gridlock, and the institutions that serve as checks on power and as guarantors of individual rights are increasingly under attack. This paper recommends that any universal voluntary national service program to address civic engagement be available to all, bring together youth of different backgrounds in common purpose, permit participant choice between military or non-military service, reward participants with increased opportunities, allow for local priorities to be honored, and build on existing federal, state, and local programs.

Vote Harvesting: A Recipe for Intimidation, Coercion, and Election Fraud

Giving third parties who have a stake in the outcome of an election access to voters and their absentee ballots in an unsupervised setting is not wise, and is a proven threat to the integrity of the election process. The handling of absentee ballots should be restricted to voters, most immediate family members, or an individual residing in their household. This will prevent campaigns, political parties, and other third parties from handling absentee ballots. Vote harvesting is the collection of absentee ballots from voters by a third party who then delivers them to election officials. The term "vote harvesting" was essentially unknown to the general public until the North Carolina State Board of Elections overturned the results of the 2018 election for the Ninth Congressional District due to illegal vote harvesting, what the board called a "coordinated, unlawful and substantially resourced absentee ballot scheme." Twenty-seven states (including Florida) and the District of Columbia have legalized vote harvesting. This report recommends that the practice should be prohibited.

Explaining the Black-White Homeownership Gap: A Closer Look at Disparities across Local Markets

The gap in the homeownership rate between black and white households is the highest it has been in 50 years. This brief examines key variables that explain the black/white homeownership gap, and estimates the role that income, education, credit score, and marital status play both nationally and locally in 105 metropolitan statistical areas with large black populations. The researchers determine that roughly 17% of the homeownership gap remains unexplained by observed variables and could be caused by differences in parental wealth, information networks or the vestiges of policies and structures that have made it difficult for black households to obtain and benefit from homeownership. The researchers also recommend specific policy actions for officials across federal, state, and local government as well as institutional policy changes.

2018 Sexually Transmitted Disease Surveillance Report

This report provides trends in sexually transmitted disease (STDs) to inform prevention and control strategies. This overview summarizes national surveillance data for 2018 on the three notifiable diseases for which there are federally funded control programs: chlamydia, gonorrhea, and syphilis. In 2018, a total of 1,758,668 cases of Chlamydia trachomatis infection were reported to the U.S. Centers for Disease Control and Prevention (CDC), making it the most common notifiable condition in the United States. This case count corresponds to a rate of 539.9 cases per 100,000 population, an increase of 2.9% compared with the rate in 2017. During 2017–2018, rates of reported chlamydia increased among both males and females, in all regions of the United States, and among all racial/Hispanic ethnicity groups. In 2018, a total of 583,405 cases of gonorrhea were reported to the CDC, making it the second most common notifiable condition in the United States. Rates of reported gonorrhea have increased 82.6% since the historic low in 2009. During 2017–2018, the overall rate of reported gonorrhea increased 5.0%, and rates increased among both males and females, in all regions of the United States, and among all racial/Hispanic ethnicity groups. In 2018, 115,045 cases of all stages of syphilis, were reported, including 35,063 cases of primary and secondary syphilis, the most infectious stages of the disease. Since reaching a historic low in 2000 and 2001, the rate of primary and secondary syphilis has increased almost every year, increasing 14.9% during 2017–2018. Rates increased among both males and females, in all regions of the United States, and among all racial/Hispanic ethnicity groups. In addition to the above findings, the Centers for Disease control ranked each state by rates of reported cases of STDs. Florida ranks 29th with 104,758 cases.

Employers, Work-Family Supports, and Low-Wage Workers

AMERICAN OVERSIGHT

Employers shape the work conditions that parents face, and they play a central role in policy debates about how to address work-family pressures. To better understand employer perspectives on these issues, this report presents findings from interviews with 16 organizations that represent or directly work with employers. Focusing on three policy areas central to parents' ability to manage work and family—paid leave, workplace flexibility and control, and child care—the report explores three research questions: 1) What are employers' perceived motivations and barriers for providing work-family supports to low-wage workers?; 2)What role do employers see for public policy or employer policy in each area?; 3) How do employers think about relationships between different work-family supports and other benefits they might provide low-wage workers? This research suggest several considerations to inform future policy and research. These include that employers may need more information to understand issues facing their workforces and the options available to address these issues. There are varying perspectives on the best ways to provide paid leave, workplace flexibility and control, and child care, but there is broad consensus that these supports are valuable. Employer perspectives could evolve with more information on, experience with, and public attention to different approaches to address these work-family challenges. In addition, respondents portrayed employer perspectives on their role relative to public policy as different across policy areas. Employer costs vary, but public policy could help address them without excluding workers from benefits. Concerns about the costs of providing public or employer-sponsored work-family supports are real. But employers might be willing to absorb some costs associated with supports that they see as benefiting business. More research, knowledge, and innovation could inform cross-domain policy design. Employers, researchers, policymakers, and advocates tend to think of work-family supports in silos. Further research is needed to understand how both public and employer-based policies related to paid leave, workplace flexibility, and child care can be designed strategically and in an integrated fashion.

CRIMINAL JUSTICE

On Track: How Well Are States Preparing Youth in the Juvenile Justice System for Employment?

In 2018, the Council of State Governments (CSG) Justice Center partnered with the Council of Juvenile Correctional Administrators to send an electronic survey to juvenile correctional agencies in all 50 states. This survey asked questions about the delivery of workforce development services to the approximately 32,000 incarcerated youth who are committed to state custody nationwide as part of a court disposition, with a focus on the 23,000 youth incarcerated in secure facilities typically managed by state agencies. All 50 states completed the survey. Authors found that 1) most incarcerated youth are not provided the workforce development services necessary to obtain viable employment in the community after release; 2) most state juvenile correctional agencies lack the partnerships needed to help incarcerated youth overcome barriers to obtaining viable employment in the community; and 3) most states do not track key employment outcomes for incarcerated youth while they are in facilities and after their release. Additionally, the authors provide best practices including checklists for creating workforce development activities in facilities and in the community, checklists for partnering with other entities (agencies, employers, educational entities, etc.), and collecting more data related to youth outcomes.

Incorporating Strategies Informed by Procedural Justice into Child Support Services

The Procedural Justice-Informed Alternatives to Contempt (PJAC) demonstration project integrates procedural justice principles into child support enforcement business practices in six child support agencies across the United States. Procedural justice is the idea of fairness in processes that resolve disputes and result in decisions. Research has shown that if people perceive a process to be fair, they will be more likely to comply with the outcome of that process whether or not the outcome was favorable to them. The project's target population is non-custodial parents who are not compliant with their child support obligations, but who have been determined to be able to pay their child support. The goal of PJAC is to improve consistent payment among non-custodial parents who are at the point of being referred to the legal system for civil contempt of court for failure to comply with their child support orders. PJAC aims to accomplish its goal by addressing parents' barriers to providing reliable payments and by promoting positive engagement with the child support program and the other parent. Case managers receive continuing training and support as they employ strategies informed by procedural justice throughout their work on the PJAC project. The follow-up training provides an important opportunity for staff members to assess their use of procedural justice strategies and to adapt their approaches as they encounter new situations, gain experience, and learn what is most effective in their work with parents.

Immigrants' Deportations, Local Crime, and Police Effectiveness

This paper analyzes the impact of immigrant deportations on local crime and police efficiency. The authors' identification relies on increases in the deportation rate driven by the introduction of the Secure Communities program, an immigration enforcement program based on local-federal cooperation, which was rolled out across counties between 2008 and 2013. The authors measure the deportation rate by examining the introduction of Secure Communities with the local presence of likely undocumented in 2005, prior to the introduction of Secure Communities. The authors document a surge in local deportation rates under Secure Communities, and show that deportations increased the most in counties with a large undocumented population. The authors find that Secure Communities-driven increases in deportation rates did not reduce crime rates for violent offenses or property offenses. Estimates are small and precise, so the authors can rule out meaningful effects. The authors do not find evidence that Secure Communities increased either police effectiveness in solving crimes or local police resources. Finally, the authors do not find effects of deportations on the local employment of unskilled citizens or on local firm creation.

EDUCATION

Long-Term Impacts of Knowledge is Power Program (KIPP) Middle Schools on College Enrollment and Early College Persistence

This report presents the results of a long-term tracking study that follows 1,177 students who applied to enter 1 of 13 oversubscribed Knowledge is Power Program (KIPP) middle schools through a 5th or 6th grade admissions lottery in 2008 or 2009. Those students are now old enough to have attended college for at least two years. This study uses a randomized controlled trial design to ensure that students who were offered admission to a KIPP middle school (the treatment group) are similar on average to students who did not receive an offer of admission (the control group) on both observable characteristics, such as prior test scores, and unobservable characteristics, such as levels of motivation and parental support. After adjusting for which students attended KIPP after the lottery in our exploratory analysis, we find that 33.2% of students who attended KIPP enrolled immediately in a four-year college program after high school and persisted in college for four consecutive semesters, compared to 24.2% of students who did not attend KIPP. While rates of entering and persisting in college were higher in the treatment group, the difference between the two groups was not large enough to be statistically significant. For the students in this study, it is too early to know whether KIPP will ultimately produce improvements in college graduation rates.

When Is a School Segregated? Making Sense of Segregation 65 Years after Brown v. Board of Education

AMERICAN OVERSIGHT

Much research on segregation relies on an absolute measure of segregation, which evaluates exposure and isolation between students of different racial groups within individual schools. But these measures can be misleading because they are strongly influenced by the racial composition of students in the neighborhood or system. Schools in areas with few white students could be considered “hyper-segregated” for simply reflecting the pool of students they draw from. On the other hand, because these metrics often consider exposure of historically underserved populations—blacks and Hispanics—to other students—whites and Asians—they can miss schools that are predominantly white and Asian with a small minority community while penalizing schools that are predominantly black or Hispanic. The authors’ Segregation Contribution Index assesses how much each school within a system—whether a district, county, or city—contributes to segregation by examining what would happen to segregation within the system if a school’s actual racial composition were perfectly integrated—that is, replaced with a composition corresponding to that of the school system. Because redistributing students across a system could require students to travel long distances or create other logistical problems, the authors also assess whether system wide integration would be improved if schools more closely resembled their neighborhoods. The authors’ Segregation Contribution Index allows stakeholders to see which schools in a system contribute most to segregation or integration, helping policymakers better target their school integration efforts. The authors find that holding school size constant, private and charter schools tend to have higher average contributions to segregation than traditional public schools, charter schools are overrepresented among schools that are both significantly more and less black and Hispanic than the surrounding neighborhood, and in neighborhoods with low shares of black and Hispanic students, private schools are 30% more likely than traditional public schools to segregate the system.

Source: Urban Institute

Rising Tide: Charter School Market Share and Student Achievement

Plenty of studies have compared the progress of students in charter schools versus traditional public schools. And more than a dozen have examined the “competitive effects” of charters on neighboring district schools. Yet, to the authors’ knowledge, no prior study has directly addressed whether overall achievement increases as the “market share” of charter schools grows. The findings from this study include that in large urban areas, higher charter market share is associated with significant achievement gains for black and Hispanic students; in suburban and rural areas, higher charter market share is associated with significant achievement gains for Hispanic students, and black students in rural districts also see gains. Also, there is no evidence that higher charter market share is associated with achievement gains for white students. In short, the report is consistent with prior research that suggests black and Hispanic students learn more in charter schools and that competition from charter schools has a positive, or at worst neutral, effect on traditional public schools.

GOVERNMENT OPERATIONS

Energy Efficiency Jobs in America: 2019

Energy efficiency is the fastest-growing segment of the U.S. energy industry. More than 2.3 million people nationwide worked in the field in 2018, up 76,000 from the previous year. In Florida, 118,400 people worked in energy efficiency in 2018, up 5% and ranking Florida fourth in the nation for energy efficiency jobs. Most were with businesses that employ fewer than 20 people. They did everything from designing sustainable buildings to repairing energy-efficient lighting systems. Energy efficiency jobs make up 17% of all construction jobs in Florida and 36% of all energy sector jobs in the state. This sector’s strong year-over-year job growth—and growing integration in the economic value chain and built environment—is turning the industry into the energy sector’s most viable and efficient job creator.

An Opportunity Zone Guide for Governors and a Case Study of South Carolina

Created by the Tax Cuts and Jobs Act of 2017, the federal government's latest economic development incentive, Opportunity Zones, is currently in the beginning stages of implementation. While it has the potential to stimulate significant cash flow across the country, its success partially depends on localized execution. Restrictions on what investments qualify are light compared to other federal programs. Because of the limited federal accountability, state-level policy potentially has a large role to play in facilitating capital flow into projects that 1) do no harm to communities and 2) bolster investments in communities in ways that benefit low- and moderate-income residents. To better guide governors when implementing policy related to the Opportunity Zones, researchers have determined a five-step process to create thriving and supported zones. These steps are: 1) to select state-level guiding principles; 2) to create support systems for projects and investments; 3) to assist aspiring opportunity fund managers; 4) to engage with opportunity fund investors; and 5) to recruit other mission-driven financial actors. Of South Carolina's 1,103 census tracts, 67% were eligible for Opportunity Zone designations. Of these, 135 tracts across the state's 46 counties were chosen. South Carolina's approach to Opportunity Zones has straddled the line on the issues listed above, often opting for broad incentives that apply (much like the federal legislation) to any Opportunity Zone investment. Ultimately, South Carolina should consider additional action based on the priorities described in this brief: incorporating community voices, goals, and needs; promoting transparency, monitoring, learning, and evaluation; thinking and acting locally; being cost-effective; doing no harm; and aligning with the original incentive.

HEALTH AND HUMAN SERVICES

Mortality Patterns Between Five States With Highest Death Rates and Five States with Lowest Death Rates: United States, 2017

In 2017, the five states with the highest age-adjusted death rates were Alabama, Kentucky, Mississippi, Oklahoma, and West Virginia. The five states with the lowest age-adjusted death rates were California, Connecticut, Hawaii, Minnesota, and New York. The average age-adjusted death rate for the five states with the highest rates (926.8 per 100,000 standard population) was 49% higher than the rate for the five states with the lowest rates (624.0). Age-specific death rates for all age groups were higher for the states with the highest rates compared with the states with the lowest rates. Age-adjusted death rates were higher for non-Hispanic white and non-Hispanic black populations but lower for the Hispanic population in states with the highest rates than in states with the lowest rates. The age-adjusted death rates for chronic lower respiratory diseases and unintentional injuries for the states with the highest rates (62.0 and 65.5, respectively) were almost doubled compared with the states with the lowest rates (31.0 and 35.8).

Poverty: 2017 and 2018, American Community Survey Briefs

AMERICAN OVERSIGHT

In 2018, 13.1% of the U.S. population had income below the poverty level, a decline from 13.4% in 2017. This is the fifth consecutive annual decline in the American Community Survey national poverty rate. The poverty rate declined in 14 states and Puerto Rico between 2017 and 2018. In three of those states (Arizona, Illinois, and New York), poverty declined for a fourth consecutive year. Four states (California, Florida, Georgia, and North Carolina) had declining poverty rates for a fifth year in a row. The poverty rate increased in only one state, Connecticut. In seven of the 25 most populous metropolitan areas, the poverty rate declined between 2017 and 2018. The poverty rate declined for the fourth consecutive year in five of these seven areas. An additional four metropolitan areas showed poverty rate declines in three of the last four years. Poverty did not increase in 2018 for any of the 25 most populous metropolitan areas. In 2018, the proportion of people with income less than 50% of their poverty threshold declined in seven states, and in three of the 25 most populous metropolitan areas. The proportion of people with an income-to-poverty ratio less than 50% increased in two states (Michigan and Rhode Island) but in none of the 25 most populous metropolitan areas.

A New Vision for Health Reform

Health spending is the largest component of the federal budget. Left unchecked, federal health spending is expected to double over the next decade. A similar sharp increase in health spending is projected for consumers, employers, and state governments. A viable agenda for growing the economy must include policies to control the growth of health care spending while promoting access to affordable, quality health care and better health outcomes. Otherwise, there is a big risk that much of the federal budget and the economy's future growth will be absorbed by an excessively costly health system without appreciable gains in health. Controlling costs will require a comprehensive approach that addresses the root causes of high spending. It must increase competitive pressures on health care prices, both from the demand- and supply-sides, allowing pressure from patients to help control costs. This report details how to arm purchasers – consumers, physicians, insurers, employers, and the government – to make cost-effective decisions in a competitive market environment. Key elements include: promoting competition among health care providers and insurers to lower health care prices; improving information on prices and outcomes to help patients and their physicians make more cost-effective decisions; shifting to new ways of paying for health care that promote efficiency, innovation, and better outcomes; and recognizing the appropriate and necessary role of regulation where markets are not workable.

Title XLVIII
K-20 Education Code

Chapter 1007
Articulation and Access

1007.25 General education courses; common prerequisites; other degree requirements.—

(1) The department shall identify the degree programs offered by public postsecondary educational institutions.

(2) The department shall identify postsecondary career education programs offered by Florida College System institutions and district school boards. The department shall also identify career courses designated as college credit courses applicable toward a career education diploma or degree. Such courses must be identified within the statewide course numbering system.

(3) The chair of the State Board of Education and the chair of the Board of Governors, or their designees, shall jointly appoint faculty committees to identify statewide general education core course options. General education core course options shall consist of a maximum of five courses within each of the subject areas of communication, mathematics, social sciences, humanities, ~~and~~ natural sciences, and civic literacy. The core courses may be revised, or the five-course maximum within each subject area may be exceeded, if approved by the State Board of Education and the Board of Governors, as recommended by the subject area faculty committee and approved by the Articulation Coordinating Committee as necessary for a subject area. Each general education core course option must contain high-level academic and critical thinking skills and common competencies that students must demonstrate to successfully complete the course. Beginning with students initially entering a Florida College System institution or state university in ~~2015-2016~~ 2020-2021 and thereafter, each student must complete at least one identified core course in each subject area as part of the general education course requirements, with the exception of civic literacy which will require the student to complete at least one course each in American government and American history. All public postsecondary educational institutions shall accept these courses as meeting general education core course requirements. The remaining general education course requirements shall be identified by each institution and reported to the department by their statewide course number. The general education core course options shall be

AMERICAN OVERSIGHT

adopted in rule by the State Board of Education and in regulation by the Board of Governors.

(4) Beginning with students initially entering a Florida College System institution or state university in the ~~2018-2019~~ 2020-2021 school year and thereafter, each student must demonstrate competency in civic literacy. Students must have the option to demonstrate competency through successful completion of ~~a civic literacy~~ both an American government and an American history course or by achieving a passing score on an assessment. The State Board of Education must adopt in rule and the Board of Governors must adopt in regulation at least one ~~existing~~ assessment in existence prior to January 1, 2018 that measures competencies consistent with the following required course competencies. ~~outlined in paragraph (b). The chair of the State Board of Education and the chair of the Board of Governors, or their respective designees, shall jointly appoint a faculty committee to:~~

~~(a) Develop a new course in civic literacy or revise an existing general education core course in American History or American Government to include civic literacy.~~

~~(b) Establish course~~ Civic literacy competencies ~~and identify~~ outcomes ~~that~~ must include, at a minimum~~,~~:

(a) an understanding of the basic principles of American democracy and how they are applied in our republican form of government~~,~~;

(b) an understanding of the United States Constitution~~,~~;

(c) knowledge of the founding documents and how they have shaped the nature and functions of our institutions of self-governance~~, and~~;

(d) an understanding of landmark Supreme Court cases, executive, and legislative actions, and their impact on law and society~~,~~;

(e) a knowledge and understanding of prominent individuals and their contributions to changing political, social, and cultural movements in the United States~~;~~ and

(f) a knowledge and understanding of United States military history.

(5) The department shall identify those courses offered by universities and accepted for credit toward a degree. The department shall identify courses designated as either general education or required as a prerequisite for a degree. The courses shall be identified by their statewide course numbers.

(6) The department shall identify common prerequisite courses and course substitutions for degree programs across all institutions. Common degree program prerequisites shall be offered and accepted by all state universities and Florida College System institutions, except in cases approved by the State Board of Education for Florida College System institutions and the Board of Governors for state universities. The

AMERICAN OVERSIGHT

department shall develop a centralized database containing the list of courses and course substitutions that meet the prerequisite requirements for each baccalaureate degree program.

(7) The universities and Florida College System institutions shall work with their school districts to ensure that high school curricula coordinate with the general education curricula and to prepare students for college-level work. General education curricula for associate in arts programs shall be identified by each institution and include ~~36~~ 42 semester hours in the subject areas of communication, mathematics, social sciences, humanities, and natural sciences.

(8) An associate in arts degree shall require no more than 60 semester hours of college credit and include ~~36~~ 42 semester hours of general education coursework. Beginning with students initially entering a Florida College System institution or state university in 2014-2015 and thereafter, coursework for an associate in arts degree shall include demonstration of competency in a foreign language pursuant to s. 1007.262. Except for developmental education required pursuant to s. 1008.30, all required coursework shall count toward the associate in arts degree or the baccalaureate degree.

(9) A baccalaureate degree program shall require no more than 120 semester hours of college credit and include ~~36~~ 42 semester hours of general education coursework, unless prior approval has been granted by the Board of Governors for baccalaureate degree programs offered by state universities and by the State Board of Education for baccalaureate degree programs offered by Florida College System institutions.

(10) A student who received an associate in arts degree for successfully completing 60 semester credit hours may continue to earn additional credits at a Florida College System institution. The university must provide credit toward the student's baccalaureate degree for an additional Florida College System institution course if, according to the statewide course numbering, the Florida College System institution course is a course listed in the university catalog as required for the degree or as prerequisite to a course required for the degree. Of the courses required for the degree, at least half of the credit hours required for the degree shall be achievable through courses designated as lower division, except in degree programs approved by the State Board of Education for programs offered by Florida College System institutions and by the Board of Governors for programs offered by state universities.

(11) Students at state universities may request associate in arts certificates if they have successfully completed the minimum requirements for the degree of associate in arts (A.A.). The university must grant the student an associate in arts degree if the student has successfully completed minimum requirements for college-level communication and

AMERICAN OVERSIGHT

computation skills adopted by the State Board of Education and 60 academic semester hours or the equivalent within a degree program area, including ~~36~~ 42 semester hours in general education courses in the subject areas of communication, mathematics, social sciences, humanities, and natural sciences, consistent with the general education requirements specified in the articulation agreement pursuant to s. 1007.23.

(12) The Commissioner of Education shall appoint faculty committees representing both Florida College System institution and public school faculties to recommend to the commissioner for approval by the State Board of Education a standard program length and appropriate occupational completion points for each postsecondary career certificate program, diploma, and degree offered by a school district or a Florida College System institution.

History.—s. 351, ch. 2002-387; s. 107, ch. 2004-357; s. 115, ch. 2007-217; s. 20, ch. 2009-59; s. 93, ch. 2011-5; s. 8, ch. 2011-177; s. 10, ch. 2012-195; s. 15, ch. 2013-51; s. 18, ch. 2017-116.

1001.64 Florida College System institution boards of trustees; powers and duties.—

(1) The boards of trustees shall be responsible for cost-effective policy decisions appropriate to the Florida College System institution's mission, the implementation and maintenance of high-quality education programs within law and rules of the State Board of Education, the measurement of performance, the reporting of information, and the provision of input regarding state policy, budgeting, and education standards.

(2) Each board of trustees is vested with the responsibility to govern its respective Florida College System institution and with such necessary authority as is needed for the proper operation and improvement thereof in accordance with rules of the State Board of Education.

(3) A board of trustees shall have the power to take action without a recommendation from the president and shall have the power to require the president to deliver to the board of trustees all data and information required by the board of trustees in the performance of its duties. A board of trustees shall ask the Commissioner of Education to authorize an investigation of the president's actions by the department's inspector general if the board considers such investigation necessary. The inspector general shall provide a report detailing each issue under investigation and shall recommend corrective action. If the inspector general identifies potential legal violations, he or she shall refer the potential legal violations to the Commission on Ethics, the Department of Law Enforcement, the Attorney General, or another appropriate authority.

AMERICAN OVERSIGHT

(4)(a) The board of trustees, after considering recommendations submitted by the Florida College System institution president, may adopt rules pursuant to ss. 120.536(1) and 120.54 to implement the provisions of law conferring duties upon it. These rules may supplement those prescribed by the State Board of Education if they will contribute to the more orderly and efficient operation of Florida College System institutions.

(b) Each board of trustees is specifically authorized to adopt rules, procedures, and policies, consistent with law and rules of the State Board of Education, related to its mission and responsibilities as set forth in s. 1004.65, its governance, personnel, budget and finance, administration, programs, curriculum and instruction, buildings and grounds, travel and purchasing, technology, students, contracts and grants, or college property.

(5) Each board of trustees shall have responsibility for the use, maintenance, protection, and control of Florida College System institution owned or Florida College System institution controlled buildings and grounds, property and equipment, name, trademarks and other proprietary marks, and the financial and other resources of the Florida College System institution. Such authority may include placing restrictions on activities and on access to facilities, firearms, food, tobacco, alcoholic beverages, distribution of printed materials, commercial solicitation, animals, and sound.

(6) Each board of trustees has responsibility for the establishment and discontinuance of program and course offerings in accordance with law and rule; provision for instructional and noninstructional community services, location of classes, and services provided; and dissemination of information concerning such programs and services. New programs must be approved pursuant to s. 1004.03.

(7) Each board of trustees has responsibility for: ensuring that students have access to general education courses as identified in rule; requiring no more than 60 semester hours of degree program coursework, including ~~36~~ 42 semester hours of general education coursework, for an associate in arts degree; notifying students that earned hours in excess of 60 semester hours may not be accepted by state universities; notifying students of unique program prerequisites; and ensuring that degree program coursework beyond general education coursework is consistent with degree program prerequisite requirements adopted pursuant to s. 1007.25(6).

(8) Each board of trustees has authority for policies related to students, enrollment of students, student records, student activities, financial assistance, and other student services.

(a) Each board of trustees shall govern admission of students pursuant to s. 1007.263 and rules of the State Board of Education. A board of trustees may establish additional admissions criteria, which shall be included in the dual enrollment articulation

AMERICAN OVERSIGHT

agreement developed according to s. 1007.271(21), to ensure student readiness for postsecondary instruction. Each board of trustees may consider the past actions of any person applying for admission or enrollment and may deny admission or enrollment to an applicant because of misconduct if determined to be in the best interest of the Florida College System institution.

(b) Each board of trustees shall adopt rules establishing student performance standards for the award of degrees and certificates pursuant to s. 1004.68.

(c) Boards of trustees are authorized to establish intrainstitutional and interinstitutional programs to maximize articulation pursuant to s. 1007.22.

(d) Boards of trustees shall identify their general education curricula pursuant to s. 1007.25(7).

(e) Each board of trustees must adopt a written antihazing policy, provide a program for the enforcement of such rules, and adopt appropriate penalties for violations of such rules pursuant to the provisions of s. 1006.63.

(f) Each board of trustees may establish a uniform code of conduct and appropriate penalties for violation of its rules by students and student organizations, including rules governing student academic honesty. Such penalties, unless otherwise provided by law, may include fines, the withholding of diplomas or transcripts pending compliance with rules or payment of fines, and the imposition of probation, suspension, or dismissal.

(g) Each board of trustees pursuant to s. 1006.53 shall adopt a policy in accordance with rules of the State Board of Education that reasonably accommodates the religious observance, practice, and belief of individual students in regard to admissions, class attendance, and the scheduling of examinations and work assignments.

(9) A board of trustees may contract with the board of trustees of a state university for the Florida College System institution to provide developmental education on the state university campus.

(10) Each board of trustees shall establish fees pursuant to ss. 1009.22, 1009.23, 1009.25, 1009.26, and 1009.27.

(11) Each board of trustees shall submit an institutional budget request, including a request for fixed capital outlay, and an operating budget to the State Board of Education for review in accordance with guidelines established by the State Board of Education.

(12) Each board of trustees shall account for expenditures of all state, local, federal and other funds in the manner described by the Department of Education.

(13) Each board of trustees is responsible for the uses for the proceeds of academic improvement trust funds pursuant to s. 1011.85.

AMERICAN OVERSIGHT

(14) Each board of trustees shall develop a strategic plan specifying institutional goals and objectives for the Florida College System institution for recommendation to the State Board of Education.

(15) Each board of trustees shall develop an accountability plan pursuant to s. 1008.45.

(16) Each board of trustees must expend performance funds provided for workforce education pursuant to the provisions of s. 1011.80.

(17) Each board of trustees is accountable for performance in certificate career education and diploma programs pursuant to s. 1008.43.

(18) Each board of trustees shall establish the personnel program for all employees of the Florida College System institution, including the president, pursuant to the provisions of chapter 1012 and rules and guidelines of the State Board of Education, including: compensation and other conditions of employment; recruitment and selection; nonreappointment; standards for performance and conduct; evaluation; benefits and hours of work; leave policies; recognition; inventions and work products; travel; learning opportunities; exchange programs; academic freedom and responsibility; promotion; assignment; demotion; transfer; ethical obligations and conflict of interest; restrictive covenants; disciplinary actions; complaints; appeals and grievance procedures; and separation and termination from employment.

(19) Each board of trustees shall appoint, suspend, or remove the president of the Florida College System institution. The board of trustees may appoint a search committee. The board of trustees shall conduct annual evaluations of the president in accordance with rules of the State Board of Education and submit such evaluations to the State Board of Education for review. The evaluation must address the achievement of the performance goals established by the accountability process implemented pursuant to s. 1008.45 and the performance of the president in achieving the annual and long-term goals and objectives established in the Florida College System institution's employment accountability program implemented pursuant to s. 1012.86.

(20) Each board of trustees is authorized to enter into contracts to provide a State Community College System Optional Retirement Program pursuant to s. 1012.875 and to enter into consortia with other boards of trustees for this purpose.

(21) Each board of trustees is authorized to purchase annuities for its Florida College System institution personnel who have 25 or more years of creditable service and who have reached age 55 and have applied for retirement under the Florida Retirement System pursuant to the provisions of s. 1012.87.

AMERICAN OVERSIGHT

(22) A board of trustees may defray all costs of defending civil actions against officers, employees, or agents of the board of trustees pursuant to s. 1012.85.

(23) Each board of trustees has authority for risk management, safety, security, and law enforcement operations. Each board of trustees is authorized to employ personnel, including police officers pursuant to s. 1012.88, to carry out the duties imposed by this subsection.

(24) Each board of trustees shall provide rules governing parking and the direction and flow of traffic within campus boundaries. Except for sworn law enforcement personnel, persons employed to enforce campus parking rules have no authority to arrest or issue citations for moving traffic violations. The board of trustees may adopt a uniform code of appropriate penalties for violations. Such penalties, unless otherwise provided by law, may include the levying of fines, the withholding of diplomas or transcripts pending compliance with rules or payment of fines, and the imposition of probation, suspension, or dismissal. Moneys collected from parking rule infractions shall be deposited in appropriate funds at each Florida College System institution for student financial aid purposes.

(25) Each board of trustees constitutes the contracting agent of the Florida College System institution. It may when acting as a body make contracts, sue, and be sued in the name of the board of trustees. In any suit, a change in personnel of the board of trustees shall not abate the suit, which shall proceed as if such change had not taken place.

(26) Each board of trustees is authorized to contract for the purchase, sale, lease, license, or acquisition in any manner, including purchase by installment or lease-purchase contract which may provide for the payment of interest on the unpaid portion of the purchase price and for the granting of a security interest in the items purchased, subject to the provisions of subsection (38) and ss. 1009.22 and 1009.23, of goods, materials, equipment, and services required by the Florida College System institution. The board of trustees may choose to consolidate equipment contracts under master equipment financing agreements made pursuant to s. 287.064.

(27) Each board of trustees shall be responsible for managing and protecting real and personal property acquired or held in trust for use by and for the benefit of such Florida College System institution. To that end, any board of trustees is authorized to be self-insured, to enter into risk management programs, or to purchase insurance for whatever coverage it may choose, or to have any combination thereof, in anticipation of any loss, damage, or destruction. A board of trustees may contract for self-insurance services pursuant to s. 1004.725.

AMERICAN OVERSIGHT

(28) Each board of trustees is authorized to enter into agreements for, and accept, credit card, charge card, and debit card payments as compensation for goods, services, tuition, and fees. Each Florida College System institution is further authorized to establish accounts in credit card, charge card, and debit card banks for the deposit of sales invoices.

(29) Each board of trustees may provide incubator facilities to eligible small business concerns pursuant to s. 1004.79.

(30) Each board of trustees may establish a technology transfer center for the purpose of providing institutional support to local business and industry and governmental agencies in the application of new research in technology pursuant to the provisions of s. 1004.78.

(31) Each board of trustees may establish economic development centers for the purpose of serving as liaisons between Florida College System institutions and the business sector pursuant to the provisions of s. 1004.80.

(32) Each board of trustees may establish a child development training center pursuant to s. 1004.81.

(33) Each board of trustees is authorized to develop and produce work products relating to educational endeavors that are subject to trademark, copyright, or patent statutes pursuant to chapter 1004.

(34) Each board of trustees shall administer the facilities program pursuant to chapter 1013, including but not limited to: the construction of public educational and ancillary plants; the acquisition and disposal of property; compliance with building and life safety codes; submission of data and information relating to facilities and construction; use of buildings and grounds; establishment of safety and sanitation programs for the protection of building occupants; and site planning and selection.

(35) Each board of trustees may exercise the right of eminent domain pursuant to the provisions of chapter 1013.

(36) Each board of trustees may enter into lease-purchase arrangements with private individuals or corporations for necessary grounds and buildings for Florida College System institution purposes, other than dormitories, or for buildings other than dormitories to be erected for Florida College System institution purposes. Such arrangements shall be paid from capital outlay and debt service funds as provided by s. 1011.84(2), with terms not to exceed 30 years at a stipulated rate. The provisions of such contracts, including building plans, are subject to approval by the Department of Education, and no such contract may be entered into without such approval.

AMERICAN OVERSIGHT

(37) Each board of trustees may purchase, acquire, receive, hold, own, manage, lease, sell, dispose of, and convey title to real property, in the best interests of the Florida College System institution.

(38) Each board of trustees is authorized to enter into short-term loans and installment, lease-purchase, and other financing contracts for a term of not more than 5 years, including renewals, extensions, and refundings. Payments on short-term loans and installment, lease-purchase, and other financing contracts pursuant to this subsection shall be subject to annual appropriation by the board of trustees. Each board of trustees is authorized to borrow funds and incur long-term debt, including promissory notes, installment sales agreements, lease-purchase agreements, certificates of participation, and other similar long-term financing arrangements, only as specifically provided in ss. 1009.22(6) and (9) and 1009.23(11) and (12). At the option of the board of trustees, bonds issued pursuant to ss. 1009.22(6) and (9) and 1009.23(11) and (12) may be secured by a combination of revenues authorized to be pledged to bonds pursuant to such subsections. Revenue bonds may not be secured by or paid from, directly or indirectly, tuition, financial aid fees, the Florida College System Program Fund, or any other operating revenues of a Florida College System institution. Lease-purchase agreements may be secured by a combination of revenues as specifically authorized pursuant to ss. 1009.22(7) and 1009.23(10).

(39) Each board of trustees shall prescribe conditions for direct-support organizations to be certified and to use Florida College System institution property and services. Conditions relating to certification must provide for audit review and oversight by the board of trustees.

(40) Each board of trustees may adopt policies pursuant to s. 1010.02 that provide procedures for transferring to the direct-support organization of that Florida College System institution for administration by such organization contributions made to the Florida College System institution.

(41) The board of trustees shall exert every effort to collect all delinquent accounts pursuant to s. 1010.03.

(42) Each board of trustees shall implement a plan, in accordance with guidelines of the State Board of Education, for working on a regular basis with the other Florida College System institution boards of trustees, representatives of the university boards of trustees, and representatives of the district school boards to achieve the goals of the seamless education system.

(43) Each board of trustees has responsibility for compliance with state and federal laws, rules, regulations, and requirements.

AMERICAN OVERSIGHT

(44) Each board of trustees may adopt rules, procedures, and policies related to institutional governance, administration, and management in order to promote orderly and efficient operation, including, but not limited to, financial management, budget management, physical plant management, and property management.

(45) Each board of trustees may adopt rules and procedures related to data or technology, including, but not limited to, information systems, communications systems, computer hardware and software, and networks.

(46) Each board of trustees may consider the past actions of any person applying for employment and may deny employment to a person because of misconduct if determined to be in the best interest of the Florida College System institution.

(47) Each contract or employment agreement, or renewal or renegotiation of an existing contract or employment agreement, containing a provision for severance pay with an officer, agent, employee, or contractor must include the provisions required in s. 215.425.

(48) Each board of trustees shall use purchasing agreements and state term contracts pursuant to s. 287.056 or enter into consortia and cooperative agreements to maximize the purchasing power for goods and services. A consortium or cooperative agreement may be statewide, regional, or a combination of institutions, as appropriate to achieve the lowest cost, with the goal of achieving a 5-percent savings on existing contract prices through the use of new cooperative arrangements or new consortium contracts.

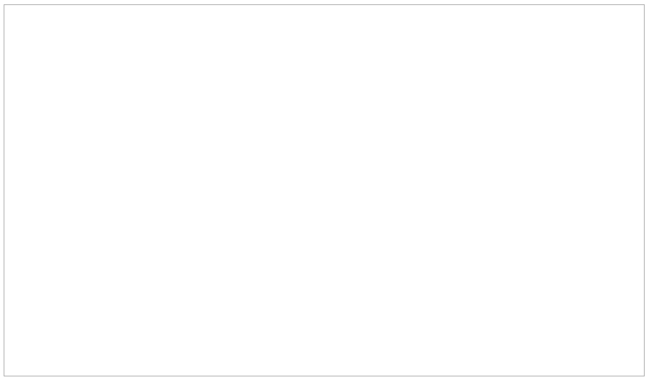
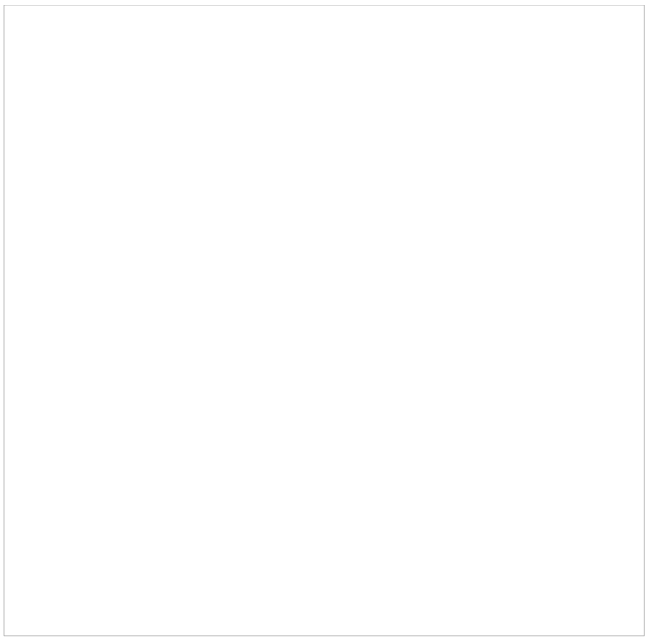
Subject: President Trump is fighting for seniors



Volusia County GOP Executive Committee

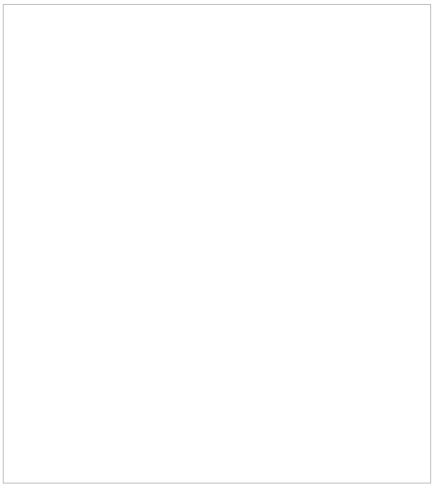
Friend --

Paul Deering

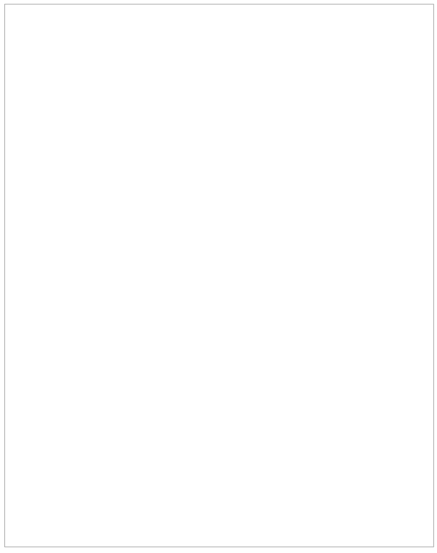


Volusia County Republican Chairman

President Trump has fought fiercely for us against overwhelming odds....a rabid corrupt fake news media, desperate and delusional Democrats, and a Deep State infected with plotters who want to undo your clear mandate to make America great again!

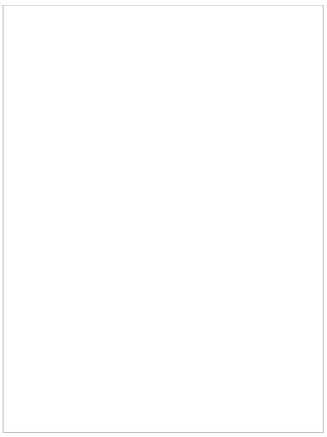


A lesser man would have collapsed under such an onslaught. President Trump will not surrender and he will not fail. He has kept his promises to us and he's still working to finish the job.



AMERICAN OVERSIGHT

He fulfilled another promise to American seniors on Thursday during a visit to the Villages here in Florida.



President Trump signed an executive order to provide seniors with new affordable options with Medicare Advantage coverage and policies to further drive down the cost of prescription drugs.

Subject: President Trump Signs USMCA Trade Agreement

INTERNATIONAL TRADE AND INVESTMENT

Local Businesses, Jobs and Economy Win with USMCA Trade Agreement

Selling more Florida goods and services around the world is vital to creating jobs, and helping local businesses grow Florida's economy from the 17th largest in the world to the 10th largest.

With President Donald Trump's signature, the new U.S. Mexico Canada Agreement (USMCA) law will help preserve and strengthen U.S. trade ties to Canada and Mexico – **two of Florida's top six countries for Florida-origin exports.**

"With more than 2.5 million high-wage Florida jobs depending on international trade, the Florida Chamber of Commerce thanks President Trump for signing the USMCA trade agreement. USMCA will benefit Florida's agriculture industry, manufacturers and local businesses, and will help grow Florida's $57 billion exports of goods and $43 billion in exports of services," said **Bob Grammig**, Chair, Florida Chamber of Commerce's International Trade Division, and Partner, Holland & Knight. "The **Florida Chamber's International Trade Division** will continue fighting to strengthen Florida's position as a global trade leader and will continue working to ensure Florida's exports in goods double and exports in services triple by 2030."

Data from **TheFloridaScorecard.org** shows just how important trade is to Florida's economy:

"Leveling the playing field for Florida and the rest of the nation, as well as increasing access to foreign markets is critical to growing the U.S. economy and creating good-paying jobs," **U.S. Rep. Vern Buchanan**, Past Chair of the Florida Chamber, explained earlier this month to the Florida Chamber Board of Directors.

In uniting Florida's business community for good, the Florida Chamber stood up for local businesses in supporting USMCA in the halls of Congress, on **editorial pages** and in **letters to lawmakers**, and we're committed to ensure protecting this important economic engine.

Exporting to Another Country?

Does your company need verification that exports are freely marketed without restriction and approved for sale in the United States and Florida? The Florida Chamber's International Trade Division issues **Certificates of Free Sale** and **Certificates of Origin** and can help.

Subject: Proposed Legislation - Address Appearing on Identification Presented at Polls
Attachment(s): "billdraft75627.elections.docx"

Senator Brandes –

As a follow up to our phone conversation last week:

Your draft bill 24-01581-20 (attached) strikes the following language in 101.043(1)(b) – "The address appearing on the identification presented by the elector may not be used as the basis to confirm an elector's legal residence or otherwise challenge an elector's legal residence."

Supervisors of Elections support this change because it allows poll workers to ask the voter if the address on their ID is current.

- If it is, the voter is in the correct voting precinct and will receive the correct ballot.
- If the address is not current but the voter lives in the precinct, the voter may file an address change and vote a regular ballot.
- If the address is not current and the voter does not live in the precinct, the voter will be given directions to the correct precinct polling place where they can file an address change and receive the correct ballot.

Supervisors of Elections support this change because it gives us the ability to ensure voters are casting ballots in their home precincts, as required by F.S. 101.045(1) – "A person is not permitted to vote in any election precinct or district other than the one in which the person has his or her legal residence…"

Poll workers only use picture and signature identification to confirm the voter's identity, as provided in F.S. 101.043 (1)(a) – "…for the purpose of identifying the elector at the polls…"

Identification is not used to determine whether the voter is eligible to vote.

Supervisors feel strongly that confirming voters' residential addresses to ensure they are given correct ballots is essential to the integrity of the election process.

If you have any additional questions, please contact me at (727) 424-0088.

Respectfully,

Deb

Subject: Legislation - Request for Input (Senator Brandes)

Vanessa –

I support the attached bill and appreciate Senator Brandes providing the opportunity to review the language.

Specifically, I want to thank Senator Brandes for proposing additional time to conduct the First Logic and Accuracy Test (line 43) from 10 days to 25 days. This will provide us with additional time to conduct pre-election activities, e.g., program voting equipment. The proposed language also helps to correct a technical issue created in SB 7066. The language the Senator is proposing allows Canvassing Boards to take full advantage of being able to canvass mail ballots 22 days prior to the election.

Also attached are the Florida Supervisors of Elections (FSE) legislative priorities for further consideration.

AMERICAN OVERSIGHT

If you have any questions, my email address is dclark@votepinellas.com; this can be used for all direct correspondence rather than sending to election@votepinellas.com.

Have a safe and happy holiday season.

Sincerely,

Deborah Clark, CERA

AMERICAN OVERSIGHT

24-01581-20

A bill to be entitled

An act relating to elections; amending s. 101.043, F.S.; deleting a provision that prohibits the use of an address appearing on identification presented by an elector at the polls as a basis to confirm or otherwise challenge an elector's legal residence; amending s. 101.5612, F.S.; revising the timeframes for conducting public preelection testing of automatic tabulating equipment; amending s. 101.5614, F.S.; removing the requirement that duplicate ballots be made of vote-by-mail ballots containing overvoted races; amending s. 101.6103, F.S.; revising the timeframe in which the supervisor of elections must mail ballots in elections conducted under the Mail Ballot Election Act; amending s. 103.091, F.S.; expanding the timeframe within which candidates for political party executive committees may qualify for office; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Paragraph (b) of subsection (1) of section 101.043, Florida Statutes, is amended to read:

101.043 Identification required at polls.—

(1)

(b) If the picture identification does not contain the signature of the elector, an additional identification that provides the elector's signature shall be required. ~~The address appearing on the identification presented by the elector may not~~

AMERICAN OVERSIGHT

~~be used as the basis to confirm an elector's legal residence or otherwise challenge an elector's legal residence.~~ The elector shall sign his or her name in the space provided on the precinct register or on an electronic device provided for recording the elector's signature. The clerk or inspector shall compare the signature with that on the identification provided by the elector and enter his or her initials in the space provided on the precinct register or on an electronic device provided for that purpose and allow the elector to vote if the clerk or inspector is satisfied as to the identity of the elector.

Section 2. Subsection (2) of section 101.5612, Florida Statutes, is amended to read:

101.5612 Testing of tabulating equipment.—

(2) On any day not more than 25 ~~10~~ days before ~~prior to~~ the commencement of early voting as provided in s. 101.657, the supervisor of elections shall have the automatic tabulating equipment publicly tested to ascertain that the equipment will correctly count the votes cast for all offices and on all measures. If the ballots to be used at the polling place on election day are not available at the time of the testing, the supervisor may conduct an additional test not more than 10 days before election day. Public notice of the time and place of the test shall be given at least 48 hours prior thereto by publication on the supervisor of elections' website and once in one or more newspapers of general circulation in the county or, if there is no newspaper of general circulation in the county, by posting the notice in at least four conspicuous places in the county. The supervisor or the municipal elections official may, at the time of qualifying, give written notice of the time and

AMERICAN OVERSIGHT

location of the public preelection test to each candidate qualifying with that office and obtain a signed receipt that the notice has been given. The Department of State shall give written notice to each statewide candidate at the time of qualifying, or immediately at the end of qualifying, that the voting equipment will be tested and advise each candidate to contact the county supervisor of elections as to the time and location of the public preelection test. The supervisor or the municipal elections official shall, at least 30 ~~15~~ days before ~~prior to~~ the commencement of early voting as provided in s. 101.657, send written notice by certified mail to the county party chair of each political party and to all candidates for other than statewide office whose names appear on the ballot in the county and who did not receive written notification from the supervisor or municipal elections official at the time of qualifying, stating the time and location of the public preelection test of the automatic tabulating equipment. The canvassing board shall convene, and each member of the canvassing board shall certify to the accuracy of the test. For the test, the canvassing board may designate one member to represent it. The test shall be open to representatives of the political parties, the press, and the public. Each political party may designate one person with expertise in the computer field who shall be allowed in the central counting room when all tests are being conducted and when the official votes are being counted. The designee shall not interfere with the normal operation of the canvassing board.

Section 3. Paragraph (a) of subsection (4) of section 101.5614, Florida Statutes, is amended to read:

AMERICAN OVERSIGHT

101.5614 Canvass of returns.—

(4)(a) If any vote-by-mail ballot is physically damaged so that it cannot properly be counted by the automatic tabulating equipment, a true duplicate copy shall be made of the damaged ballot in the presence of witnesses and substituted for the damaged ballot. ~~Likewise,~~ A duplicate ballot must also ~~shall~~ be made of ~~a vote-by-mail ballot containing an overvoted race or~~ a marked vote-by-mail ballot in which every race is undervoted, including ~~which shall include~~ all valid votes as determined by the canvassing board based on rules adopted by the division pursuant to s. 102.166(4). Upon request, a physically present candidate, a political party official, a political committee official, or an authorized designee thereof, must be allowed to observe the duplication of ballots. All duplicate ballots shall be clearly labeled "duplicate," bear a serial number which shall be recorded on the defective ballot, and be counted in lieu of the defective ballot. After a ballot has been duplicated, the defective ballot shall be placed in an envelope provided for that purpose, and the duplicate ballot shall be tallied with the other ballots for that precinct.

Section 4. Subsection (1) of section 101.6103, Florida Statutes, is amended to read:

101.6103 Mail ballot election procedure.—

(1) Except as otherwise provided in subsection (7), the supervisor of elections shall mail all official ballots with a secrecy envelope, a return mailing envelope, and instructions sufficient to describe the voting process to each elector entitled to vote in the election not sooner than the 40th ~~20th~~ day before the election and not later than the 10th day before

AMERICAN OVERSIGHT

the date of the election. All such ballots shall be mailed by first-class mail. Ballots shall be addressed to each elector at the address appearing in the registration records and placed in an envelope which is prominently marked "Do Not Forward."

Section 5. Subsection (4) of section 103.091, Florida Statutes, is amended to read:

103.091 Political parties.—

(4) Any political party other than a minor political party may by rule provide for the membership of its state or county executive committee to be elected for 4-year terms at the primary election in each year a presidential election is held. The terms begin ~~shall commence~~ on the first day of the month following each presidential general election,~~;~~ but the names of candidates for political party offices may ~~shall~~ not be placed on the ballot at any other election. The results of such election shall be determined by a plurality of the votes cast. In such event, electors seeking to qualify for such office shall do so with the Department of State or supervisor of elections no ~~not earlier than noon of the 71st day, or~~ later than noon of the 67th day~~,~~ preceding the primary election. The outgoing chair of each county executive committee shall, within 30 days after the committee members take office, hold an organizational meeting of all newly elected members for the purpose of electing officers. The chair of each state executive committee shall, within 60 days after the committee members take office, hold an organizational meeting of all newly elected members for the purpose of electing officers.

Section 6. This act shall take effect July 1, 2020.

AMERICAN OVERSIGHT

24-01576-20

A bill to be entitled

An act relating to contractor services; amending s. 468.603, F.S.; revising the definition of the term "plans examiner" to include one- and two-family dwelling plans examiners; amending s. 468.609, F.S.; revising eligibility requirements to take the examination for certification as a building code inspector or plans examiner to include the completion of certain internship programs; increasing the number of years for which provisional certificates are valid; requiring the Florid Building Code Administrators and Inspectors Board to develop a one- and two-family dwelling inspector internship program, a one- and two-family plans examiner internship program, and a roofing inspector internship program which meet certain requirements; providing eligibility requirements for the internship programs; amending s. 468.8312, F.S.; limiting the amount that the Department of Business and Professional Regulation may charge for a certain examination fee; amending s. 468.8313, F.S.; revising the types of examinations the department may review and approve; amending s. 489.1195, F.S.; requiring a newly designated qualifying agent to apply for a change of contractor within a specified period of time in each jurisdiction in which the previous qualifying agent held an active permit; prohibiting a qualifying agent from letting an active permit expire without taking certain actions; authorizing a project owner to submit a change of

AMERICAN OVERSIGHT

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

contractor form and hold harmless affidavit under certain circumstances; authorizing a local building official to limit the number of new permits obtained by a qualifying agent under certain circumstances; requiring a project owner to take certain steps if a qualifying agent declines to or is unable to sign a change of contractor form; prohibiting a qualifying agent from being held liable for the work of his or her predecessor; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Paragraph (e) is added to subsection (8) of section 468.603, Florida Statutes, to read:

468.603 Definitions.—As used in this part:

(8) "Plans examiner" means a person who is qualified to determine that plans submitted for purposes of obtaining building and other permits comply with the applicable building, plumbing, mechanical, electrical, gas, fire prevention, energy, accessibility, and other applicable construction codes. The term includes a residential plans examiner who is qualified to determine that plans submitted for purposes of obtaining building and other permits comply with the applicable residential building, plumbing, mechanical, electrical, gas, energy, accessibility, and other applicable construction codes. Categories of plans examiners include:

(e) One- and two-family dwelling plans examiner.

Section 2. Paragraph (c) of subsection (2), paragraph (a) of subsection (7), and paragraph (b) of subsection (10) of

AMERICAN OVERSIGHT

section 468.609, Florida Statutes, are amended to read:

468.609 Administration of this part; standards for certification; additional categories of certification.—

(2) A person may take the examination for certification as a building code inspector or plans examiner pursuant to this part if the person:

(c) Meets eligibility requirements according to one of the following criteria:

1. Demonstrates 5 years' combined experience in the field of construction or a related field, building code inspection, or plans review corresponding to the certification category sought;

2. Demonstrates a combination of postsecondary education in the field of construction or a related field and experience which totals 4 years, with at least 1 year of such total being experience in construction, building code inspection, or plans review;

3. Demonstrates a combination of technical education in the field of construction or a related field and experience which totals 4 years, with at least 1 year of such total being experience in construction, building code inspection, or plans review;

4. Currently holds a standard certificate issued by the board or a firesafety inspector license issued pursuant to chapter 633, has a minimum of 3 years' verifiable full-time experience in inspection or plan review, and has satisfactorily completed a building code inspector or plans examiner training program that provides at least 100 hours but not more than 200 hours of cross-training in the certification category sought. The board shall establish by rule criteria for the development

AMERICAN OVERSIGHT

and implementation of the training programs. The board shall accept all classroom training offered by an approved provider if the content substantially meets the intent of the classroom component of the training program;

5. Demonstrates a combination of the completion of an approved training program in the field of building code inspection or plan review and a minimum of 2 years' experience in the field of building code inspection, plan review, fire code inspections and fire plans review of new buildings as a firesafety inspector certified under s. 633.216, or construction. The approved training portion of this requirement shall include proof of satisfactory completion of a training program that provides at least 200 hours but not more than 300 hours of cross-training that is approved by the board in the chosen category of building code inspection or plan review in the certification category sought with at least 20 hours but not more than 30 hours of instruction in state laws, rules, and ethics relating to professional standards of practice, duties, and responsibilities of a certificateholder. The board shall coordinate with the Building Officials Association of Florida, Inc., to establish by rule the development and implementation of the training program. However, the board shall accept all classroom training offered by an approved provider if the content substantially meets the intent of the classroom component of the training program;

6. Currently holds a standard certificate issued by the board or a firesafety inspector license issued pursuant to chapter 633 and:

a. Has at least 5 years' verifiable full-time experience as

AMERICAN OVERSIGHT

an inspector or plans examiner in a standard certification category currently held or has a minimum of 5 years' verifiable full-time experience as a firesafety inspector licensed pursuant to chapter 633.

b. Has satisfactorily completed a building code inspector or plans examiner classroom training course or program that provides at least 200 but not more than 300 hours in the certification category sought, except for one-family and two-family dwelling training programs, which must provide at least 500 but not more than 800 hours of training as prescribed by the board. The board shall establish by rule criteria for the development and implementation of classroom training courses and programs in each certification category; or

7.a. Has completed a 4-year internship certification program as a building code inspector or plans examiner while employed full-time by a municipality, county, or other governmental jurisdiction, under the direct supervision of a certified building official. Proof of graduation with a related vocational degree or college degree or of verifiable work experience may be exchanged for the internship experience requirement year-for-year, but may reduce the requirement to no less than 1 year.

b. Has passed an examination administered by the International Code Council in the certification category sought. Such examination must be passed before beginning the internship certification program.

c. Has passed the principles and practice examination before completing the internship certification program.

d. Has passed a board-approved 40-hour code training course

AMERICAN OVERSIGHT

in the certification category sought before completing the internship certification program.

e. Has obtained a favorable recommendation from the supervising building official after completion of the internship certification program.

8. Completes a one- and two-family dwelling inspector internship program under subparagraph (10)(b)7.

9. Completes a one- and two-family plans examiner internship program under subparagraph (10)(b)8.

(7)(a) The board shall provide for the issuance of provisional certificates that are valid for 2 years ~~1 year~~, as specified by board rule, to any building code inspector or plans examiner who meets the eligibility requirements described in subsection (2) and any newly employed or promoted building code administrator who meets the eligibility requirements described in subsection (3). The provisional license may be renewed by the board for just cause; however, a provisional license is not valid for longer than 3 years.

(10)

(b) The board shall by rule establish:

1. Reciprocity of certification with any other state that requires an examination administered by the International Code Council.

2. That an applicant for certification as a building code inspector or plans examiner may apply for a provisional certificate valid for the duration of the internship period.

3. That partial completion of an internship program may be transferred between jurisdictions on a form prescribed by the board.

AMERICAN OVERSIGHT

4. That an applicant may apply for a standard certificate on a form prescribed by the board upon successful completion of an internship certification program.

5. That an applicant may apply for a standard certificate at least 30 days and no more than 60 days before completing the internship certification program.

6. That a building code inspector or plans examiner who has standard certification may seek an additional certification in another category by completing an additional nonconcurrent 1-year internship program in the certification category sought and passing an examination administered by the International Code Council and a board-approved 40-hour code training course.

7. A one- and two-family dwelling inspector internship program. The program must include 4 years of training, including at least 1 year of on-the-job training in each of the building, electrical, plumbing, and mechanical categories under the supervision of a standard certified inspector. The 4-year internship program may be reduced to no less than 2 years for candidates who have verifiable experience or education, including at least 6 months of on-the-job training under the supervision of a standard certified inspector in each of the building, electrical, plumbing, and mechanical residential inspector categories.

a. To participate in the program, an individual must:

(I) Hold an International Code Council (ICC) certification as a residential or commercial inspector in each of the building, electrical, plumbing, and mechanical categories; or

(II) Hold a standard certification as an inspector in any of the categories listed in s. 468.603(5) and have completed an

AMERICAN OVERSIGHT

internship program that included not less than 6 months of on-the-job training in each of the following categories in which the applicant does not hold standard certification: building, plumbing, electrical, and mechanical, under the supervision of a standard certified inspector.

b. As part of the course, the intern must complete a 40-hour training course on the one- and two-family dwelling inspector code.

8. A one- and two-family plans examiner internship program under the supervision of a standard certified plans examiner. The program must include 4 years of training, but may be reduced to no less than 2 years for candidates who have verifiable experience or education, according to department rule.

a. To participate in the program, an individual must hold an ICC certification as a one- and two-family dwelling plans examiner prior to entering the internship program.

b. As part of the program, the intern must complete a 40-hour training course on the one- and two-family plans examiner code.

9. A roofing inspector internship program that includes on-the-job training as a roofing inspector under the supervision of a standard certified commercial building inspector or roofing inspector. The program must include 1 year of training.

a. To participate in the program, an individual must:

(I) Hold an ICC certification as a roofing inspector in this state; or

(II) Hold a standard certificate as a residential building inspector and complete an internship program in which at least 200 hours were completed under the supervision of a standard

AMERICAN OVERSIGHT

certified commercial building inspector or roofing inspector.

b. As part of the program, the intern must complete a 40-hour roofing inspector training course.

Section 3. Subsection (2) of section 468.8312, Florida Statutes, is amended to read:

468.8312 Fees.—

(2) The initial application and examination fee may ~~shall~~ not exceed $125 plus the actual per applicant cost to the department to purchase an examination, if the department chooses to purchase the examination. The examination fee shall be in an amount that covers the cost of obtaining and administering the examination, but may not exceed $200, and shall be refunded if the applicant is found ineligible to sit for the examination. The application fee shall be nonrefundable.

Section 4. Subsection (4) of section 468.8313, Florida Statutes, is amended to read:

468.8313 Examinations.—

(4) The department may review and approve examinations that the department has certified as meeting generally accepted testing standards and the requirements of a national examination as provided in s. 455.217(1)(d) ~~by a nationally recognized entity that offers programs or sets standards that ensure competence as a home inspector~~.

Section 5. Subsection (4) is added to section 489.1195, Florida Statutes, to read:

489.1195 Responsibilities.—

(4) Within 60 days after a change in qualifying agents, a newly designated qualifying agent must apply for a change of contractor in each jurisdiction in which the previous qualifying

AMERICAN OVERSIGHT

agent held an active permit.

(a) A qualifying agent may not allow an active permit to expire without properly closing the permit. However, if a permit does expire and the permit remains open, the project owner may submit a change of contractor form and a hold harmless affidavit without any further notification to the previous qualifying agent. The local building official may limit the number of new permits obtained by a qualifying agent with open or expired permits.

(b) When requested, a qualifying agent may sign a change of contractor form provided by the jurisdiction.

1. If a qualifying agent declines to sign a change of contractor form, is unavailable, or is deceased, the owner of the project must:

a. Serve notice to the qualifying agent's corporate address; and

b. Submit a change of contractor form, a written statement, and a hold harmless affidavit to the jurisdiction.

2. The jurisdiction, upon receipt of the statement and affidavit required under subparagraph 1., shall process a change of contractor to a new qualifying agent without requiring any further notifications.

(c) A qualifying agent that is designated pursuant to a change of contractor under this subsection may not be held liable for the work of his or her predecessor but is responsible for any corrective work or new work that he or she performs.

Section 6. This act shall take effect July 1, 2020.

AMERICAN OVERSIGHT

24-01581-20

A bill to be entitled

An act relating to elections; amending s. 101.043, F.S.; deleting a provision that prohibits the use of an address appearing on identification presented by an elector at the polls as a basis to confirm or otherwise challenge an elector's legal residence; amending s. 101.5612, F.S.; revising the timeframes for conducting public preelection testing of automatic tabulating equipment; amending s. 101.5614, F.S.; removing the requirement that duplicate ballots be made of vote-by-mail ballots containing overvoted races; amending s. 101.6103, F.S.; revising the timeframe in which the supervisor of elections must mail ballots in elections conducted under the Mail Ballot Election Act; amending s. 103.091, F.S.; expanding the timeframe within which candidates for political party executive committees may qualify for office; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Paragraph (b) of subsection (1) of section 101.043, Florida Statutes, is amended to read:

101.043 Identification required at polls.—

(1)

(b) If the picture identification does not contain the signature of the elector, an additional identification that provides the elector's signature shall be required. ~~The address appearing on the identification presented by the elector may not~~

AMERICAN OVERSIGHT

~~be used as the basis to confirm an elector's legal residence or otherwise challenge an elector's legal residence.~~ The elector shall sign his or her name in the space provided on the precinct register or on an electronic device provided for recording the elector's signature. The clerk or inspector shall compare the signature with that on the identification provided by the elector and enter his or her initials in the space provided on the precinct register or on an electronic device provided for that purpose and allow the elector to vote if the clerk or inspector is satisfied as to the identity of the elector.

Section 2. Subsection (2) of section 101.5612, Florida Statutes, is amended to read:

101.5612 Testing of tabulating equipment.—

(2) On any day not more than 25 ~~10~~ days before ~~prior to~~ the commencement of early voting as provided in s. 101.657, the supervisor of elections shall have the automatic tabulating equipment publicly tested to ascertain that the equipment will correctly count the votes cast for all offices and on all measures. If the ballots to be used at the polling place on election day are not available at the time of the testing, the supervisor may conduct an additional test not more than 10 days before election day. Public notice of the time and place of the test shall be given at least 48 hours prior thereto by publication on the supervisor of elections' website and once in one or more newspapers of general circulation in the county or, if there is no newspaper of general circulation in the county, by posting the notice in at least four conspicuous places in the county. The supervisor or the municipal elections official may, at the time of qualifying, give written notice of the time and

AMERICAN OVERSIGHT

location of the public preelection test to each candidate qualifying with that office and obtain a signed receipt that the notice has been given. The Department of State shall give written notice to each statewide candidate at the time of qualifying, or immediately at the end of qualifying, that the voting equipment will be tested and advise each candidate to contact the county supervisor of elections as to the time and location of the public preelection test. The supervisor or the municipal elections official shall, at least 30 ~~15~~ days before ~~prior to~~ the commencement of early voting as provided in s. 101.657, send written notice by certified mail to the county party chair of each political party and to all candidates for other than statewide office whose names appear on the ballot in the county and who did not receive written notification from the supervisor or municipal elections official at the time of qualifying, stating the time and location of the public preelection test of the automatic tabulating equipment. The canvassing board shall convene, and each member of the canvassing board shall certify to the accuracy of the test. For the test, the canvassing board may designate one member to represent it. The test shall be open to representatives of the political parties, the press, and the public. Each political party may designate one person with expertise in the computer field who shall be allowed in the central counting room when all tests are being conducted and when the official votes are being counted. The designee shall not interfere with the normal operation of the canvassing board.

Section 3. Paragraph (a) of subsection (4) of section 101.5614, Florida Statutes, is amended to read:

AMERICAN OVERSIGHT

101.5614 Canvass of returns.—

(4)(a) If any vote-by-mail ballot is physically damaged so that it cannot properly be counted by the automatic tabulating equipment, a true duplicate copy shall be made of the damaged ballot in the presence of witnesses and substituted for the damaged ballot. ~~Likewise,~~ A duplicate ballot must also ~~shall~~ be made of ~~a vote-by-mail ballot containing an overvoted race or~~ a marked vote-by-mail ballot in which every race is undervoted, including ~~which shall include~~ all valid votes as determined by the canvassing board based on rules adopted by the division pursuant to s. 102.166(4). Upon request, a physically present candidate, a political party official, a political committee official, or an authorized designee thereof, must be allowed to observe the duplication of ballots. All duplicate ballots shall be clearly labeled "duplicate," bear a serial number which shall be recorded on the defective ballot, and be counted in lieu of the defective ballot. After a ballot has been duplicated, the defective ballot shall be placed in an envelope provided for that purpose, and the duplicate ballot shall be tallied with the other ballots for that precinct.

Section 4. Subsection (1) of section 101.6103, Florida Statutes, is amended to read:

101.6103 Mail ballot election procedure.—

(1) Except as otherwise provided in subsection (7), the supervisor of elections shall mail all official ballots with a secrecy envelope, a return mailing envelope, and instructions sufficient to describe the voting process to each elector entitled to vote in the election not sooner than the 40th ~~20th~~ day before the election and not later than the 10th day before

AMERICAN OVERSIGHT

the date of the election. All such ballots shall be mailed by first-class mail. Ballots shall be addressed to each elector at the address appearing in the registration records and placed in an envelope which is prominently marked "Do Not Forward."

Section 5. Subsection (4) of section 103.091, Florida Statutes, is amended to read:

103.091 Political parties.—

(4) Any political party other than a minor political party may by rule provide for the membership of its state or county executive committee to be elected for 4-year terms at the primary election in each year a presidential election is held. The terms begin ~~shall commence~~ on the first day of the month following each presidential general election,~~;~~ but the names of candidates for political party offices may ~~shall~~ not be placed on the ballot at any other election. The results of such election shall be determined by a plurality of the votes cast. In such event, electors seeking to qualify for such office shall do so with the Department of State or supervisor of elections no ~~not earlier than noon of the 71st day, or~~ later than noon of the 67th day~~,~~ preceding the primary election. The outgoing chair of each county executive committee shall, within 30 days after the committee members take office, hold an organizational meeting of all newly elected members for the purpose of electing officers. The chair of each state executive committee shall, within 60 days after the committee members take office, hold an organizational meeting of all newly elected members for the purpose of electing officers.

Section 6. This act shall take effect July 1, 2020.

Hi Beth,

It was great to see you at FAV. I'm sorry we didn't get to chat more! I had a great holiday. I hope you did, as well.

I would like to introduce to you Zach Hubbard in our office. He is handling our mobility legislation now, so he can speak to you best on this topic.

I hope I get to see you again soon!

Hi Melissa,

It was great to see you at FAV, and hope you had a wonderful Thanksgiving. I thought I'd catch up with you to find out if there is any CAV legislation in process this year. If so, can you share the key proposed bills?

Thanks much and have a great weekend!

AMERICAN OVERSIGHT

24-00656D-20

A bill to be entitled

An act relating to electric vehicles; amending s. 316.003, F.S.; revising definitions; authorizing the Department of Transportation to adopt rules; amending s. 334.046, F.S.; revising the department's goals relating to mobility; creating s. 339.0802, F.S.; requiring that certain funds be used for specified purposes relating to the Electric Vehicle Infrastructure Grant Program, beginning in specified years; providing for future repeal of the requirement; creating s. 339.286, F.S.; requiring the department to establish the Electric Vehicle Infrastructure Grant Program; providing the purpose of the program; providing for the distribution of grants to certain entities to install electric vehicle charging infrastructure; providing grant requirements; providing requirements for equipment installed using grant funds; providing criteria for the distribution of grants; requiring that the department continually review emerging research, policies, and standards; authorizing the department to develop a model plan for local governments; requiring the department to adopt rules; amending s. 366.94, F.S.; specifying that certain rules adopted by the Department of Agriculture and Consumer Services may not require specific methods of sale for electric vehicle charging equipment used in this state; providing effectives dates.

Be It Enacted by the Legislature of the State of Florida:

AMERICAN OVERSIGHT

Section 1. Subsections (2) and (55) of section 316.003, Florida Statutes, are amended to read:

316.003 Definitions.—The following words and phrases, when used in this chapter, shall have the meanings respectively ascribed to them in this section, except where the context otherwise requires:

(2) AUTOCYCLE.—A three-wheeled motorcycle that has two wheels in the front and one wheel in the back; is equipped with a roll cage or roll hoops, a seat belt for each occupant, antilock brakes that meet the requirements of Federal Motor Vehicle Safety Standard No. 122, a steering ~~wheel~~ mechanism, and seating that does not require the operator to straddle or sit astride it; and is manufactured in accordance with the applicable federal motorcycle safety standards in 49 C.F.R. part 571 by a manufacturer registered with the National Highway Traffic Safety Administration.

(55) PERSONAL DELIVERY DEVICE.—An electrically powered device that:

(a) Is operated on sidewalks and crosswalks and intended primarily for transporting property;

(b) Has a weight that does not exceed the maximum weight established by Department of Transportation rule ~~Weighs less than 80 pounds, excluding cargo~~;

(c) Has a maximum speed of 10 miles per hour or, if the Department of Transportation establishes by rule a maximum speed, has a speed that does not exceed that maximum; and

(d) Is equipped with technology to allow for operation of the device with or without the active control or monitoring of a

AMERICAN OVERSIGHT

natural person.

A personal delivery device is not considered a vehicle unless expressly defined by law as a vehicle. A mobile carrier is not considered a personal delivery device. The Department of Transportation may adopt rules to implement this subsection.

Section 2. Paragraph (c) of subsection (4) of section 334.046, Florida Statutes, is amended to read:

334.046 Department mission, goals, and objectives.—

(4) At a minimum, the department's goals shall address the following prevailing principles.

(c) *Mobility.*—Ensuring a cost-effective, statewide, interconnected transportation system. Improvement of travel choices to ensure mobility includes planning and establishment of infrastructure for innovative technologies, including electric vehicle charging infrastructure.

Section 3. Effective upon Senate Bill ___ or other similar legislation being enacted in the 2020 Regular Session or an extension thereof and becoming a law, section 339.0802, Florida Statutes, is created to read:

339.0802 Allocation of increased license tax revenues from licensure of electric and hybrid vehicles.—Funds that result from increased revenues to the State Transportation Trust Fund derived under s. 320.08001(2), (3), and (4) must be used as set forth in this section, notwithstanding any other provision of law.

(1) Beginning in the 2020-2021 fiscal year, and annually for 5 years thereafter, all increased revenues must be used to fund the Electric Vehicle Infrastructure Grant Program.

AMERICAN OVERSIGHT

(2) Beginning in the 2025-2026 fiscal year, and annually for 5 years thereafter, half of the increased revenues must be used to fund the Electric Vehicle Infrastructure Grant Program.

(3) This section expires on July 1, 2030.

Section 4. Section 339.286, Florida Statutes, is created to read:

339.286 Electric Vehicle Infrastructure Grant Program.—

(1) The department shall establish the Electric Vehicle Infrastructure Grant Program. The purpose of the program is to provide financial assistance to encourage the installation of electric vehicle charging infrastructure.

(2) State agencies, public universities, public transit agencies, ports, airports, and local governments, including local housing authorities and libraries, may apply to the department for grants for the purpose of installing electric vehicle charging infrastructure.

(3) A grant may be awarded for:

(a) Technical assistance for the development and adoption of:

1. A local or regional plan that establishes an electric vehicle charging infrastructure;

2. Any action plans necessary to address any infrastructure gaps; and

3. Steps necessary to complete the infrastructure plan.

A plan must address actions to deploy the necessary infrastructure in high-density housing areas and low- to moderate-income areas.

(b) Assistance with the purchase of related equipment and

AMERICAN OVERSIGHT

the costs of installation of that equipment to provide electric vehicle charging. Such equipment must be capable of collecting and reporting data and must use standard connectors.

(4)(a) An applicant may apply for a grant for both technical assistance and equipment purchase and installation. A grant for technical assistance requires a minimum match of funds from the applicant of 30 percent of the grant award, but such match is not required for an applicant that is located in a fiscally constrained county. A grant for equipment purchase and installation requires a minimum match of funds from the applicant of 50 percent of the grant award, or 20 percent for an applicant that is located in a fiscally constrained county. The matching funds must be from nonstate resources, but may include private funds provided through a partnership with a private entity or in-kind contributions such as the donation of equipment, services, or land or use of land for establishment of the electric vehicle charging infrastructure. Grant funds may not subsidize the cost for the use of electricity.

(b) The department shall maintain a prioritized list of approved grant applications. The prioritized list must include recommended funding levels for each application and, if staged implementation is appropriate, provide funding requirements for each stage. Grants must be prioritized based on the extent to which the activities of the grant will encourage growth in the use of electric vehicles and increase the availability of charging locations along evacuation routes. A grant for equipment purchase and installation that will immediately and most effectively serve those who currently own or operate electric vehicles may receive priority.

AMERICAN OVERSIGHT

(5) The department shall continually review emerging research, policies, and standards related to electric vehicle infrastructure. Using such information, the department shall publish best practices for the establishment of electric vehicle charging infrastructure, model infrastructure plan development and components, and other significant information for the implementation and use of electric vehicle charging infrastructure. The department may develop a model plan that local governments may use as a guide to establish an electric vehicle charging infrastructure plan.

(6) The department shall adopt rules to administer this section.

Section 5. Section 366.94, Florida Statutes, is amended to read:

366.94 Electric vehicle charging stations.—

(1) The provision of electric vehicle charging to the public by a nonutility is not the retail sale of electricity for the purposes of this chapter. The rates, terms, and conditions of electric vehicle charging services by a nonutility are not subject to regulation under this chapter. This section does not affect the ability of individuals, businesses, or governmental entities to acquire, install, or use an electric vehicle charger for their own vehicles.

(2) The Department of Agriculture and Consumer Services shall adopt rules to provide definitions, methods of sale, labeling requirements, and price-posting requirements for electric vehicle charging stations to allow for consistency for consumers and the industry. Rules implemented under this subsection may not require specific methods of sale for electric

AMERICAN OVERSIGHT

vehicle charging equipment used in this state.

(3)(a) It is unlawful for a person to stop, stand, or park a vehicle that is not capable of using an electrical recharging station within any parking space specifically designated for charging an electric vehicle.

(b) If a law enforcement officer or specialist finds a motor vehicle in violation of this subsection, the officer or specialist shall charge the operator or other person in charge of the vehicle in violation with a noncriminal traffic infraction, punishable as provided in s. 316.008(4) or s. 318.18.

Section 6. Except as otherwise expressly provided in this act, this act shall take effect July 1, 2020.

Subject: Draft EV Bill

Good Morning,
Here is the latest draft of the EV bill with changes based on our last meeting. Just a few things to note:

AMERICAN OVERSIGHT

- The Autocycle and PDD issues could be removed and the bill would then relate only to “electric vehicles” and this would match the current “relating to” clause, otherwise the title needs to be expanded.
- The issues in section 7 related to PSC rate filings needs review by the Innovation, Industry, and Technology Committee.

Please let us know if you have any questions.
Phillip

A bill to be entitled

An act relating to electric vehicles; amending s. 316.003, F.S.; revising the definition of the terms "autocycle" and "personal delivery device"; creating s. 339.286, F.S.; requiring the Department of Transportation to create the Electric-Vehicle Infrastructure Grant Program; providing the purposes of the program; providing for the distribution of grants to certain entities to install electric-vehicle charging infrastructure; providing grant requirements; providing requirements for equipment installed using grant funds; providing criteria for the distribution of grants; amending s. 366.94, F.S.; prohibiting state agencies that implement certain rules from requiring specific methods of sale for electric vehicle charging equipment used in this state; requiring the Florida Public Service Commission to direct all public utilities to file for approval and implement approved rate designs to accommodate and optimize electric vehicle charging activities, subject to certain requirements; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Subsections (2) and (55) of section 316.003, Florida Statutes, is amended to read:

316.003 Definitions.—The following words and phrases, when used in this chapter, shall have the meanings respectively ascribed to them in this section, except where the context

AMERICAN OVERSIGHT

otherwise requires:

(2) AUTOCYCLE.—A three-wheeled motorcycle that has two wheels in the front and one wheel in the back; is equipped with a roll cage or roll hoops, a seat belt for each occupant, brakes meeting the Federal Motor Vehicle Safety Standard 122, a steering mechanism, and seating that does not require the operator to straddle or sit astride it; and is manufactured in accordance with the applicable federal motorcycle safety standards in 49 C.F.R. part 571 by a manufacturer registered with the National Highway Traffic Safety Administration.

(55) PERSONAL DELIVERY DEVICE.—An electrically powered device that:

(a) Is operated on sidewalks and crosswalks and intended primarily for transporting property;

(b) Weighs less than 120 ~~80~~ pounds or, if the Department of Transportation establishes by rule a maximum weight, has a weight that does not exceed that maximum, excluding cargo;

(c) Has a maximum speed of 10 miles per hour or, if the Department of Transportation establishes by rule a maximum speed, has a speed that does not exceed that maximum; and

(d) Is equipped with technology to allow for operation of the device with or without the active control or monitoring of a natural person.

A personal delivery device is not considered a vehicle unless expressly defined by law as a vehicle. A mobile carrier is not considered a personal delivery device.

Section 2. Paragraph (c) of subsection (4) of section 334.046, Florida Statutes, is amended to read:

AMERICAN OVERSIGHT

334.046 Department mission, goals, and objectives.—

(4) At a minimum, the department's goals shall address the following prevailing principles.

(c) *Mobility.*—Ensuring a cost-effective, statewide, interconnected transportation system. Improvement of travel choices to ensure mobility includes planning and establishment of infrastructure for innovative technologies, including electric vehicle charging infrastructure.

Section 3. Section 339.286, Florida Statutes, is created to read:

339.286 Electric Vehicle Infrastructure Grant Program.—

(1) The department shall establish the Electric-Vehicle Infrastructure Grant Program. The purpose of the program is to provide financial assistance to encourage the installation of electric vehicle charging infrastructure.

(2) State agencies, public universities, public transit agencies, ports, airports, and local governments, including local housing authorities and libraries, may apply to the department for grants for the purpose of installing electric vehicle charging infrastructure.

(3) A grant may be awarded for:

1. Technical assistance for the creation and adoption of a local or regional plan that establishes an electric vehicle charging infrastructure and the necessary action plans to address any infrastructure gaps and steps to complete the infrastructure plan. A plan must address actions to deploy the necessary infrastructure in high-density housing areas and low- to moderate-income areas.

2. Assistance with the purchase of related equipment and

AMERICAN OVERSIGHT

the costs of installation of that equipment to provide electric vehicle charging. Such equipment must be capable of collecting and reporting data and must use standard connectors.

(4)(a) An applicant may apply for a grant for both technical assistance and equipment purchase and installation. A grant for technical assistance requires a minimum match of funds from the applicant of 30 percent of the grant award, but such match is not required for an applicant that is located in a fiscally constrained county. A grant for equipment purchase and installation requires a minimum match of funds from the applicant of 50 percent of the grant award, or 20 percent for an applicant that is located in a fiscally constrained county. The matching funds must be from nonstate resources, but may include private funds provided through a partnership with a private entity or in-kind contributions such as the donation of equipment, services, or land or use of land for establishment of the electric vehicle charging infrastructure. Grant funds may not subsidize the cost for the use of electricity.

(b) The department shall maintain a prioritized list of approved grant applications. The prioritized list must include recommended funding levels for each application and, if staged implementation is appropriate, provide funding requirements for each stage. Grants must be prioritized based on the extent to which the activities of the grant will encourage growth in the use of electric vehicles and increase the availability of charging locations along evacuation routes. A grant for equipment purchase and installation that will immediately and most effectively serve those who currently own or operate electric vehicles may receive priority.

AMERICAN OVERSIGHT

(5) The department must continually review emerging research, policies, and standards related to electric vehicle infrastructure. Using such information, the department must publish best practices for the establishment of electric vehicle charging infrastructure, model infrastructure plan development and components, and other significant information for the implementation and use of electric vehicle charging infrastructure. The department may develop a model plan that local governments may use as a guide to establish an electric vehicle charging infrastructure plan.

(6) The department shall adopt rules to administer this section.

Section 4. Contingent upon the enactment of Senate Bill XXXX (EV FEES) or other similar legislation enacted in the 2020 Regular Session or an extension thereof, section 339.0802, Florida Statutes, is created to read:

339.0802 .—Allocation of increased revenues derived from amendments to s. 320.0801 by this act.—Funds that result from increased revenues to the State Transportation Trust Fund derived from the amendments to s. 320.0801 made by this act must be used as set forth in this section, notwithstanding any other provision of law.

(1) Beginning in the 2020-2021 Fiscal Year and annually for 5 years thereafter, all increased revenues must be used to fund the Electric Vehicle Infrastructure Grant Program.

(2) Beginning in the 2025-2025 Fiscal Year and annually for 5 years thereafter, half of the increased revenues must be used to fund the Electric Vehicle Infrastructure Grant Program.

(3) This section expires on July 1, 2030.

AMERICAN OVERSIGHT

CONSIDERATION - I think you need to get a revenue estimate, and do a set amount (or file this as is, get the REC estimate, and then amend accordingly). I think it'll be hard (maybe?) for the department to know how much revenue they are going to get in a year and fund projects. If you do set amounts, then we'd do a subsection (3) and throw the remainder of increased revenues into the work program or whatever.

Section 5. Paragraph (c) of subsection (7) of section 339.175, Florida Statutes, is amended to read:

339.175 Metropolitan planning organization.—

(7) LONG-RANGE TRANSPORTATION PLAN.—Each M.P.O. must develop a long-range transportation plan that addresses at least a 20-year planning horizon. The plan must include both long-range and short-range strategies and must comply with all other state and federal requirements. The prevailing principles to be considered in the long-range transportation plan are: preserving the existing transportation infrastructure; enhancing Florida's economic competitiveness; and improving travel choices to ensure mobility. The long-range transportation plan must be consistent, to the maximum extent feasible, with future land use elements and the goals, objectives, and policies of the approved local government comprehensive plans of the units of local government located within the jurisdiction of the M.P.O. Each M.P.O. is encouraged to consider strategies that integrate transportation and land use planning to provide for sustainable development and reduce greenhouse gas emissions. The approved long-range transportation plan must be considered by local governments in the development of the transportation elements in local

AMERICAN OVERSIGHT

government comprehensive plans and any amendments thereto. The long-range transportation plan must, at a minimum:

(c) Assess capital investment and other measures necessary to:

1. Ensure the preservation of the existing metropolitan transportation system including requirements for the operation, resurfacing, restoration, and rehabilitation of major roadways and requirements for the operation, maintenance, modernization, and rehabilitation of public transportation facilities; and

2. Make the most efficient use of existing transportation facilities to relieve vehicular congestion, improve safety, and maximize the mobility of people and goods. Such efforts must include, but are not limited to, consideration of infrastructure and technological improvements necessary to accommodate advances in vehicle technology, such as automated driving systems, electric vehicles and electric vehicle charging stations, and other developments.

In the development of its long-range transportation plan, each M.P.O. must provide the public, affected public agencies, representatives of transportation agency employees, freight shippers, providers of freight transportation services, private providers of transportation, representatives of users of public transit, and other interested parties with a reasonable opportunity to comment on the long-range transportation plan. The long-range transportation plan must be approved by the M.P.O.

Section 6. Paragraph (c) of subsection (3) of section 339.64, Florida Statutes, is amended to read:

AMERICAN OVERSIGHT

339.64 Strategic Intermodal System Plan.—

(3)

(c) The department shall coordinate with federal, regional, and local partners, as well as industry representatives, to consider infrastructure and technological improvements necessary to accommodate advances in vehicle technology, such as automated driving systems, electric vehicles and electric vehicle charging stations, and other developments, in Strategic Intermodal System facilities.

Section 7. Section 366.94, Florida Statutes, is amended to read:

366.94 Electric vehicle charging stations.—

(1) The provision of electric vehicle charging to the public by a nonutility is not the retail sale of electricity for the purposes of this chapter. The rates, terms, and conditions of electric vehicle charging services by a nonutility are not subject to regulation under this chapter. This section does not affect the ability of individuals, businesses, or governmental entities to acquire, install, or use an electric vehicle charger for their own vehicles.

(2) The Department of Agriculture and Consumer Services shall adopt rules to provide definitions, methods of sale, labeling requirements, and price-posting requirements for electric vehicle charging stations to allow for consistency for consumers and the industry. Rules implemented under this subsection may not require specific methods of sale for electric vehicle charging equipment used in this state.

(3)(a) It is unlawful for a person to stop, stand, or park a vehicle that is not capable of using an electrical recharging

AMERICAN OVERSIGHT

station within any parking space specifically designated for charging an electric vehicle.

(b) If a law enforcement officer or specialist finds a motor vehicle in violation of this subsection, the officer or specialist shall charge the operator or other person in charge of the vehicle in violation with a noncriminal traffic infraction, punishable as provided in s. 316.008(4) or s. 318.18.

(4) The commission shall direct all public utilities to file for approval of rate designs, and to implement approved rate designs, to accommodate and optimize electric vehicle charging activities. Rates filed under this subsection must be submitted to the commission by October 1, 2020, and approved rates must remain in effect for at least 5 years. Rates that must be approved and implemented under this subsection include, but are not limited to, both of the following:

(a) Revisions to capacity or demand charges for publicly available, privately operated high-powered charging.

(b) Time-of-use rates for residential charging activities to encourage off-peak charging activities.

Section 8. The Division of Law Revision is directed to replace the phase "this act" wherever it occurs in this act with the chapter law number.

Section 9. Except as otherwise expressly provided, this act shall take effect July 1, 2020.

Hey guys,

Here is the most up to date version we have in bill drafting currently.

Let me know of any necessary changes.

Thanks!

Hey Lena,

I hope you had a nice Thanksgiving! As we get back into gear before Christmas I wanted to make sure we got the exact proposed edits that were discussed at the FAV conference to drafting. Are you and your client able to provide a bullet list of the changes they want and where they want them in the bill language?

Thank you,

Clayton Clemens

Clay -here's the comments to the EV bill we discussed today. Lena

AMERICAN OVERSIGHT

24-00656D-20

A bill to be entitled

An act relating to electric vehicles; amending s. 316.003, F.S.; revising definitions; authorizing the Department of Transportation to adopt rules; amending s. 334.046, F.S.; revising the department's goals relating to mobility; creating s. 339.0802, F.S.; requiring that certain funds be used for specified purposes relating to the Electric Vehicle Infrastructure Grant Program, beginning in specified years; providing for future repeal of the requirement; creating s. 339.286, F.S.; requiring the department to establish the Electric Vehicle Infrastructure Grant Program; providing the purpose of the program; providing for the distribution of grants to certain entities to install electric vehicle charging infrastructure; providing grant requirements; providing requirements for equipment installed using grant funds; providing criteria for the distribution of grants; requiring that the department continually review emerging research, policies, and standards; authorizing the department to develop a model plan for local governments; requiring the department to adopt rules; amending s. 366.94, F.S.; specifying that certain rules adopted by the Department of Agriculture and Consumer Services may not require specific methods of sale for electric vehicle charging equipment used in this state; providing effectives dates.

Be It Enacted by the Legislature of the State of Florida:

AMERICAN OVERSIGHT

Section 1. Subsections (2) and (55) of section 316.003, Florida Statutes, are amended to read:

316.003 Definitions.—The following words and phrases, when used in this chapter, shall have the meanings respectively ascribed to them in this section, except where the context otherwise requires:

(2) AUTOCYCLE.—A three-wheeled motorcycle that has two wheels in the front and one wheel in the back; is equipped with a roll cage or roll hoops, a seat belt for each occupant, antilock brakes that meet the requirements of Federal Motor Vehicle Safety Standard No. 122, a steering ~~wheel~~ mechanism, and seating that does not require the operator to straddle or sit astride it; and is manufactured in accordance with the applicable federal motorcycle safety standards in 49 C.F.R. part 571 by a manufacturer registered with the National Highway Traffic Safety Administration.

(55) PERSONAL DELIVERY DEVICE.—An electrically powered device that:

(a) Is operated on sidewalks and crosswalks and intended primarily for transporting property;

(b) Has a weight that does not exceed the maximum weight established by Department of Transportation rule ~~Weighs less than 80 pounds, excluding cargo~~;

(c) Has a maximum speed of 10 miles per hour or, if the Department of Transportation establishes by rule a maximum speed, has a speed that does not exceed that maximum; and

(d) Is equipped with technology to allow for operation of the device with or without the active control or monitoring of a

AMERICAN OVERSIGHT

natural person.

A personal delivery device is not considered a vehicle unless expressly defined by law as a vehicle. A mobile carrier is not considered a personal delivery device. The Department of Transportation may adopt rules to implement this subsection.

Section 2. Paragraph (c) of subsection (4) of section 334.046, Florida Statutes, is amended to read:

334.046 Department mission, goals, and objectives.—

(4) At a minimum, the department's goals shall address the following prevailing principles.

(c) *Mobility.*—Ensuring a cost-effective, statewide, interconnected transportation system. Improvement of travel choices to ensure mobility includes planning and establishment of infrastructure for innovative technologies, including electric vehicle charging infrastructure.

Section 3. Effective upon Senate Bill ___ or other similar legislation being enacted in the 2020 Regular Session or an extension thereof and becoming a law, section 339.0802, Florida Statutes, is created to read:

339.0802 Allocation of increased license tax revenues from licensure of electric and hybrid vehicles.—Funds that result from increased revenues to the State Transportation Trust Fund derived under s. 320.08001(2), (3), and (4) must be used as set forth in this section, notwithstanding any other provision of law.

(1) Beginning in the 2020-2021 fiscal year, and annually for 5 years thereafter, all increased revenues must be used to fund the Electric Vehicle Infrastructure Grant Program.

AMERICAN OVERSIGHT

(2) Beginning in the 2025-2026 fiscal year, and annually for 5 years thereafter, half of the increased revenues must be used to fund the Electric Vehicle Infrastructure Grant Program.

(3) This section expires on July 1, 2030.

Section 4. Section 339.286, Florida Statutes, is created to read:

339.286 Electric Vehicle Infrastructure Grant Program.—

(1) The department shall establish the Electric Vehicle Infrastructure Grant Program. The purpose of the program is to provide financial assistance to encourage the installation of electric vehicle charging infrastructure.

(2) State agencies, public universities, public transit agencies, ports, airports, and local governments, including local housing authorities and libraries, may apply to the department for grants for the purpose of installing electric vehicle charging infrastructure.

(3) A grant may be awarded for:

(a) Technical assistance for the development and adoption of:

1. A local or regional plan that establishes an electric vehicle charging infrastructure;

2. Any action plans necessary to address any infrastructure gaps; and

3. Steps necessary to complete the infrastructure plan.

A plan must address actions to deploy the necessary infrastructure in high-density housing areas and low- to moderate-income areas.

(b) Assistance with the purchase of related equipment and

AMERICAN OVERSIGHT

the costs of installation of that equipment to provide electric vehicle charging. Such equipment must be capable of collecting and reporting data and must use standard connectors.

(4)(a) An applicant may apply for a grant for both technical assistance and equipment purchase and installation. A grant for technical assistance requires a minimum match of funds from the applicant of 30 percent of the grant award, but such match is not required for an applicant that is located in a fiscally constrained county. A grant for equipment purchase and installation requires a minimum match of funds from the applicant of 50 percent of the grant award, or 20 percent for an applicant that is located in a fiscally constrained county. The matching funds must be from nonstate resources, but may include private funds provided through a partnership with a private entity or in-kind contributions such as the donation of equipment, services, or land or use of land for establishment of the electric vehicle charging infrastructure. Grant funds may not subsidize the cost for the use of electricity.

(b) The department shall maintain a prioritized list of approved grant applications. The prioritized list must include recommended funding levels for each application and, if staged implementation is appropriate, provide funding requirements for each stage. Grants must be prioritized based on the extent to which the activities of the grant will encourage growth in the use of electric vehicles and increase the availability of charging locations along evacuation routes. A grant for equipment purchase and installation that will immediately and most effectively serve those who currently own or operate electric vehicles may receive priority.

AMERICAN OVERSIGHT

(5) The department shall continually review emerging research, policies, and standards related to electric vehicle infrastructure. Using such information, the department shall publish best practices for the establishment of electric vehicle charging infrastructure, model infrastructure plan development and components, and other significant information for the implementation and use of electric vehicle charging infrastructure. The department may develop a model plan that local governments may use as a guide to establish an electric vehicle charging infrastructure plan.

(6) The department shall adopt rules to administer this section.

Section 5. Section 366.94, Florida Statutes, is amended to read:

366.94 Electric vehicle charging stations.—

(1) The provision of electric vehicle charging to the public by a nonutility is not the retail sale of electricity for the purposes of this chapter. The rates, terms, and conditions of electric vehicle charging services by a nonutility are not subject to regulation under this chapter. This section does not affect the ability of individuals, businesses, or governmental entities to acquire, install, or use an electric vehicle charger for their own vehicles.

(2) The Department of Agriculture and Consumer Services shall adopt rules to provide definitions, methods of sale, labeling requirements, and price-posting requirements for electric vehicle charging stations to allow for consistency for consumers and the industry. Rules implemented under this subsection may not require specific methods of sale for electric

AMERICAN OVERSIGHT

vehicle charging equipment used in this state.

(3)(a) It is unlawful for a person to stop, stand, or park a vehicle that is not capable of using an electrical recharging station within any parking space specifically designated for charging an electric vehicle.

(b) If a law enforcement officer or specialist finds a motor vehicle in violation of this subsection, the officer or specialist shall charge the operator or other person in charge of the vehicle in violation with a noncriminal traffic infraction, punishable as provided in s. 316.008(4) or s. 318.18.

Section 6. Except as otherwise expressly provided in this act, this act shall take effect July 1, 2020.

Ahhhhh the details.....

Sorry, just arrived back to my office. I've attached a flier on the event that gives the basics for tech companies who are enrolling to participate. If for any reason Jamie decides not to sponsor the event from the House we can change out his information.

I am working on the promotion flier that will feature the Courtyard and AV/EV event. If there is any special information you would like me to include in that flier just let me know. Also if you have a picture of Jeff, or other wording you would prefer, I'm happy to make any changes.

2020 Annual Tech Day at the Capitol
Featuring, "The Future of Transportation"
February 19th, 2020
9am - 3pm

Opening Remarks 10am
3rd Floor w/podium and media
We are sending an email today requesting Governor DeSantis open Tech Day as a way of supporting his technology push in our state. We are hoping Senator Brandes and Representative Grant will also be able to speak on the important work they are doing in technology, especially in the areas of AV and AI.

Legislative Lunch 1:00-200.
We can feature Senator Brandes, and EV partners, addressing the future of Florida's travel during this lunch if this would be of interest to the Senator.

Courtyard
We are partnering with Sustainable Tallahassee and Sustainable Florida to fill the courtyard with EV's from across the state. We would appreciate any connections for AV, and have plenty of space in the courtyard as well as inside the Capitol on the plaza, 2nd and 3rd floors for booth displays.

Tech Day at the Capitol was created by the Florida Technology Council with sponsorship by L3Harris. Participation in this event is free and open to all tech businesses who support our mission of building a better, stronger, safer and more efficient Florida.

Subject: RE: FL Tech Day - Sen. Brandes & Rep. Grant

Hey there,

I'm sure you're correct and that he won't mind but I'll check with him and get back with you shortly. As a sponsor, do we need to do anything/set anything up or are they handling the logistics? Either way, I'll get back to you with an answer.

Thanks,

Patrick Steele

Ahhhhh the details.....

Sorry, just arrived back to my office. I've attached a flier on the event that gives the basics for tech companies who are enrolling to participate. If for any reason Jamie decides not to sponsor the event from the House we can change out his information.

I am working on the promotion flier that will feature the Courtyard and AV/EV event. If there is any special information you would like me to include in that flier just let me know. Also if you have a picture of Jeff, or other wording you would prefer, I'm happy to make any changes.

2020 Annual Tech Day at the Capitol
Featuring, "The Future of Transportation"

AMERICAN OVERSIGHT

February 19th, 2020
9am - 3pm

Opening Remarks 10am
3rd Floor w/podium and media
We are sending an email today requesting Governor DeSantis open Tech Day as a way of supporting his technology push in our state. We are hoping Senator Brandes and Representative Grant will also be able to speak on the important work they are doing in technology, especially in the areas of AV and AI.

Legislative Lunch 1:00-200.
We can feature Senator Brandes, and EV partners, addressing the future of Florida's travel during this lunch if this would be of interest to the Senator.

Courtyard
We are partnering with Sustainable Tallahassee and Sustainable Florida to fill the courtyard with EV's from across the state. We would appreciate any connections for AV, and have plenty of space in the courtyard as well as inside the Capitol on the plaza, 2nd and 3rd floors for booth displays.

Tech Day at the Capitol was created by the Florida Technology Council with sponsorship by L3Harris. Participation in this event is free and open to all tech businesses who support our mission of building a better, stronger, safer and more efficient Florida.

All the best,

- Jim

Jim,

Just wanted to touch base. Rep. Grant will sponsor on the House side, and I have cc'd his legislative aide, Patrick, on this email.

I have looked over the agenda (Patrick, for reference it is below), and as it stands I can probably have Senator Brandes swing by the lunch. Unfortunately, we typically have a committee meeting that either starts at 8:30am or 10am on Wednesdays. We will not know the schedule until the week before, either. They like to keep us on our toes here. So if we can get the Senator over to the 10am press conference we absolutely will. I, of course, cannot speak to what Representative Grant may be able to do.

I will keep in touch on the Senator's availability, and in the meantime, we will work on getting some AV's to the event.

Thanks!

Subject: Re: Following Up

Vanessa, Melissa & Patrick,

Melissa, thank you for the follow up. We have Senator Brandes confirmed for 2/19 on the Historic Steps at 9:30am addressing AVs and EVs, with enough time to make it back to committee by 10am. Thank you as well for also confirming his ability to stop by the reception that evening on the 22nd floor. Please know your entire team is warmly invited to join us for food, music and drinks at the reception.

Patrick, if at all possible we would like to have Representative Grant address Florida's tech leaders for a brief press event on the 3rd floor of the Capitol at 10:30am. We are working with Deputy Chief of Staff David Clark's schedule as well in hopes he may join us. Jamie's enthusiasm and excitement is exactly what this industry, and our state, needs right now.

Representative Grant, and your team, are also invited to join us for the legislative reception that evening on the 22nd floor from 4:30-7pm.

Thank you again for your sponsorship, and I look forward to hearing if Representative Grant is available at 10:30. (We can adjust that time if necessary)

Jim,

Just wanted to touch base. Rep. Grant will sponsor on the House side, and I have cc'd his legislative aide, Patrick, on this email.

I have looked over the agenda (Patrick, for reference it is below), and as it stands I can probably have Senator Brandes swing by the lunch. Unfortunately, we typically have a committee meeting that either starts at 8:30am or 10am on Wednesdays. We will not know the schedule until the week before, either. They like to keep us on our toes here. So if we can get the Senator over to the 10am press conference we absolutely will. I, of course, cannot speak to what Representative Grant may be able to do.

I will keep in touch on the Senator's availability, and in the meantime, we will work on getting some AV's to the event.

Thanks!

Sorry, just arrived back to my office. I've attached a flier on the event that gives the basics for tech companies who are enrolling to participate. If for any reason Jamie decides not to sponsor the event

AMERICAN OVERSIGHT

from the House we can change out his information.

I am working on the promotion flier that will feature the Courtyard and AV/EV event. If there is any special information you would like me to include in that flier just let me know. Also if you have a picture of Jeff, or other wording you would prefer, I'm happy to make any changes.

2020 Annual Tech Day at the Capitol
Featuring, "The Future of Transportation"
February 19th, 2020
9am - 3pm

Opening Remarks 10am
3rd Floor w/podium and media
We are sending an email today requesting Governor DeSantis open Tech Day as a way of supporting his technology push in our state. We are hoping Senator Brandes and Representative Grant will also be able to speak on the important work they are doing in technology, especially in the areas of AV and AI.

Legislative Lunch 1:00-200.
We can feature Senator Brandes, and EV partners, addressing the future of Florida's travel during this lunch if this would be of interest to the Senator.

Courtyard
We are partnering with Sustainable Tallahassee and Sustainable Florida to fill the courtyard with EV's from across the state. We would appreciate any connections for AV, and have plenty of space in the courtyard as well as inside the Capitol on the plaza, 2nd and 3rd floors for booth displays.

Hi Jim. I have looped Melissa from our office in on this email as she handles the Senator's schedule. We are happy to get something set up. Next week is very difficult for the Senator, but we can look at the following week if it works on your end.

Additionally, if you get me the information for AV/EV day at the Capitol we are happy to help out however you need us to!

Thanks,

Vanessa Thompson

Vanessa,

It was great seeing you the other day. As we discussed, I wanted to get you in touch with Jim Taylor from the Florida Technology Council. Like I mentioned, Jim would love the opportunity to speak with Senator Brandes about the prison education program.

Also, Jim can you get Vanessa more info on the electric/autonomous vehicle day at the capitol?

Thanks again for everything.

Jim,

Just wanted to touch base. Rep. Grant will sponsor on the House side, and I have cc'd his legislative aide, Patrick, on this email.

I have looked over the agenda (Patrick, for reference it is below), and as it stands I can probably have Senator Brandes swing by the lunch. Unfortunately, we typically have a committee meeting that either starts at 8:30am or 10am on Wednesdays. We will not know the schedule until the week before, either. They like to keep us on our toes here. So if we can get the Senator over to the 10am press conference we absolutely will. I, of course, cannot speak to what Representative Grant may be able to do.

I will keep in touch on the Senator's availability, and in the meantime, we will work on getting some AV's to the event.

Thanks!

Vanessa Thompson
Legislative Assistant to State Senator Jeff Brandes

Ahhhhh the details.....

Sorry, just arrived back to my office. I've attached a flier on the event that gives the basics for tech companies who are enrolling to participate. If for any reason Jamie decides not to sponsor the event from the House we can change out his information.

I am working on the promotion flier that will feature the Courtyard and AV/EV event. If there is any special information you would like me to include in that flier just let me know. Also if you have a picture of Jeff, or other wording you would prefer, I'm happy to make any changes.

2020 Annual Tech Day at the Capitol
Featuring, "The Future of Transportation"
February 19th, 2020
9am - 3pm

Opening Remarks 10am
3rd Floor w/podium and media
We are sending an email today requesting Governor DeSantis open Tech Day as a way of supporting his technology push in our state. We are hoping Senator Brandes and Representative Grant will also be able to speak on the important work they are doing in technology, especially in the areas of AV and AI.

Legislative Lunch 1:00-200.
We can feature Senator Brandes, and EV partners, addressing the future of Florida's travel during this

AMERICAN OVERSIGHT

lunch if this would be of interest to the Senator.

Courtyard
We are partnering with Sustainable Tallahassee and Sustainable Florida to fill the courtyard with EV's from across the state. We would appreciate any connections for AV, and have plenty of space in the courtyard as well as inside the Capitol on the plaza, 2nd and 3rd floors for booth displays.

Tech Day at the Capitol was created by the Florida Technology Council with sponsorship by L3Harris. Participation in this event is free and open to all tech businesses who support our mission of building a better, stronger, safer and more efficient Florida.

Thank you Vanessa and Brody.

Melissa the week of the 27th works well on our end. Please let me know if you have a particular day and time range you would like me to set aside.

Vanessa I will be sure to get you information for AV/EV Tech Day before the end of the day. If possible it would be wonderful to have the Senator and Representative Grant be our legislative sponsors for this day.

- Jim

Thanks, Brody!

Hi Jim. I have looped Melissa from our office in on this email as she handles the Senator's schedule. We are happy to get something set up. Next week is very difficult for the Senator, but we can look at the following week if it works on your end.

Additionally, if you get me the information for AV/EV day at the Capitol we are happy to help out however you need us to!

Thanks,

Vanessa Thompson

Vanessa,

It was great seeing you the other day. As we discussed, I wanted to get you in touch with Jim Taylor from the Florida Technology Council. Like I mentioned, Jim would love the opportunity to speak with Senator Brandes about the prison education program.

Also, Jim can you get Vanessa more info on the electric/autonomous vehicle day at the capitol?

Thanks again for everything.

Best,

Brody

Maggie –

We are going to have a bill that touches Graham Miller. Ours is going to up the age from 18 to 25, but the same statutes are open. The draft I've attached is what we just got back from committee staff and also includes a PRR provision. Let me know what you think about your language being married up with this guy, and let's go from there!

AMERICAN OVERSIGHT

I am sending a copy of the bill draft, together with an outline that helps to explain the need for making the juvenile sentencing provisions retroactive to those juveniles who were previously sentenced to Life with eligibility for Parole after serving 25 years.

Thanks.

Charlie Cofer

A bill to be entitled

An act relating to criminal justice~~sentence review hearings~~; providing a short title; amending s. 775.082, F.S.; providing that certain persons who are otherwise eligible for sentence review under s. 921.1401 or s. 921.1402 may be resentenced and released in specified circumstances; reenacting and amending s. 921.1402, F.S.; revising the offenses the committing of which would preclude a juvenile offender from being entitled to a review of his or her sentence after a specified timeframe; creating s. 921.1403, F.S.; defining the term "young adult offender"; precluding eligibility for a sentence review for young adult offenders who previously committed, or conspired to commit, specified offenses; providing timeframes under which young adult offenders who commit specified crimes are entitled to a review of their sentences; providing applicability; requiring the Department of Corrections to notify young adult offenders in writing of their eligibility under certain timeframes; requiring a young adult offender seeking a sentence review or a subsequent sentence review to submit an application to the original sentencing court and request a hearing; providing for legal representation of eligible young adult offenders; providing for one subsequent review hearing for the young adult offender after a certain timeframe if he or she is not resentenced at the initial sentence review hearing; requiring the original sentencing court to hold a

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

sentence review hearing upon receiving an application from an eligible young adult offender; requiring the court to consider certain factors in determining whether to modify the young adult offender's sentence; providing requirements if the court makes certain determinations regarding the young adult offender; amending s. 944.705, F.S.; requiring the Department of Corrections to provide inmates with certain information upon release; creating s. 951.30, F.S.; requiring administrators of county detention centers to provide inmates with certain information upon release; amending s. 1009.21, F.S.; providing that a specified period of time spent in a county detention facility or state correctional facility can be credited toward the 12-month residency requirement for tuition; requiring the Office of Program Policy and Governmental Accountability (OPPAGA) to conduct a study of various opportunities available to persons returning to the community from imprisonment, including any barriers to such opportunities and what, if any, collateral consequences are present for persons who are released from incarceration into the community; providing study requirements; requiring OPPAGA to submit a report to the Governor and the Legislature by a certain date; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005592

Section 1. This act may be cited as "The Second Look Act."

Section 2. Paragraph (b) of subsection (9) of section 775.082, Florida Statutes, is amended to read:

775.082 Penalties; applicability of sentencing structures; mandatory minimum sentences for certain reoffenders previously released from prison.—

(9)

(b)1. —Except as provided for in sub-subparagraph 2., a~~A~~ person sentenced under paragraph (a) shall be released only by expiration of sentence and shall not be eligible for parole, control release, or any form of early release. Any person sentenced under paragraph (a) must serve 100 percent of the court-imposed sentence.

2. A juvenile or young adult offender that is eligible for review of his or her sentence under s. 921.1401 or s. 921.1402, respectively, may be resentenced and released from imprisonment if a court deems such resentencing is appropriate in accordance with the review requirements of such sections.

Section 3. Paragraph (a) of subsection (2) of section 921.1402, Florida Statutes, is amended, and subsection (4) of that section is reenacted, to read:

921.1402 Review of sentences for persons convicted of specified offenses committed while under the age of 18 years.—

(2)(a) A juvenile offender sentenced under s. 775.082(1)(b)1. is entitled to a review of his or her sentence after 25 years. However, a juvenile offender is not entitled to review if he or she has previously been convicted of any ~~one~~ of the following offenses, or conspiracy to commit any ~~one~~ of the following offenses, and if the offense for which the person was

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005593

previously convicted was part of a separate criminal transaction or episode ~~than~~ that ~~which~~ resulted in the sentence under s. 775.082(1)(b)1.:

1. Murder; or

2. ~~Manslaughter.;~~

~~3. Sexual battery;~~

~~4. Armed burglary;~~

~~5. Armed robbery;~~

~~6. Armed carjacking;~~

~~7. Home-invasion robbery;~~

~~8. Human trafficking for commercial sexual activity with a child under 18 years of age;~~

~~9. False imprisonment under s. 787.02(3)(a); or~~

~~10. Kidnapping.~~

(4) A juvenile offender seeking sentence review pursuant to subsection (2) must submit an application to the court of original jurisdiction requesting that a sentence review hearing be held. The juvenile offender must submit a new application to the court of original jurisdiction to request subsequent sentence review hearings pursuant to paragraph (2)(d). The sentencing court shall retain original jurisdiction for the duration of the sentence for this purpose.

Section 4. Section 921.1403, Florida Statutes, is created to read:

921.1403 Review of sentences for persons convicted of specified offenses committed while under 25 years of age.—

(1) As used in this section, the term "young adult offender" means a person who committed an offense before he or she reached 25 years of age and for which he or she is sentenced

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005594

to a term of years in the custody of the Department of Corrections, regardless of the date of sentencing. The term does not included a young adult offender who committed an offense under s. 782.04.

(2) A young adult offender is not entitled to a sentence review under this section if he or she has previously been convicted of committing, or of conspiring to commit ~~,~~ murder, ~~any of the following offenses and~~ if the offense was part of a separate criminal transaction or episode that resulted in the sentence under s. 775.082(3)(a)1., 2., 3., 4., or 6., or (b)1.~~:~~

~~(a) Murder.~~

~~(b) Manslaughter.~~

(3)(a)1. A young adult offender who is convicted of an offense that is a life felony, that is punishable by a term of years not exceeding life imprisonment, or that was reclassified as a life felony, which was committed after the person attained 18 years of age and who is sentenced to a term of more than 20 years under s. 775.082(3)(a)1., 2., 3., 4., or 6., is entitled to a review of his or her sentence after 20 years.

2. This paragraph does not apply to a person who is eligible for sentencing under s. 775.082(3)(a)5.

(b) A young adult offender who is convicted of an offense that is a felony of the first degree or that was reclassified as a felony of the first degree and who is sentenced to a term of more than 15 years under s. 775.082(3)(b)1. is entitled to a review of his or her sentence after 15 years.

(4) The Department of Corrections must notify a young adult offender in writing of his or her eligibility to request a sentence review hearing 18 months before the young adult

Commented [TV1]: We want to make sure felony murder is excluded here.

Commented [TV2]: We want to make sure felony murder is excluded here.

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005595

offender is entitled to a sentence review hearing or notify him or her immediately in writing if the offender is eligible as of July 1, 2020.

(5) A young adult offender seeking a sentence review under this section must submit an application to the original sentencing court requesting that the court hold a sentence review hearing. The young adult offender seeking a subsequent sentence review hearing must submit a new application to the original sentencing court to request a subsequent sentence review hearing pursuant to subsection (7). The original sentencing court retains jurisdiction for the duration of the sentence for this purpose.

(6) A young adult offender who is eligible for a sentence review hearing under this section is entitled to be represented by an attorney, and the court must appoint a public defender to represent the young adult offender if he or she cannot afford an attorney.

(7)(a) If the young adult offender seeking sentence review under paragraph (3)(a) is not resentenced at the initial sentence review hearing, he or she is eligible for one subsequent review hearing ~~10~~ 5 years after the initial review hearing.

(b) If the young adult offender seeking sentence review under paragraph (3)(b) is not resentenced at the initial sentence review hearing, he or she is eligible for one subsequent review hearing 5 years after the initial review hearing.

(8) Upon receiving an application from an eligible young adult offender, the original sentencing court must hold a

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005596

sentence review hearing to determine whether to modify the young adult offender's sentence. When determining if it is appropriate to modify the young adult offender's sentence, the court must consider any factor it deems appropriate, including, but not limited to, any of the following:

(a) Whether the young adult offender demonstrates maturity and rehabilitation.

(b) Whether the young adult offender remains at the same level of risk to society as he or she did at the time of the initial sentencing.

(c) The opinion of the victim or the victim's next of kin. The absence of the victim or the victim's next of kin from the sentence review hearing may not be a factor in the determination of the court under this section. The court must allow the victim or victim's next of kin to be heard in person, in writing, or by electronic means. If the victim or the victim's next of kin chooses not to participate in the hearing, the court may consider previous statements made by the victim or the victim's next of kin during the trial, initial sentencing phase, or previous sentencing review hearings.

(d) Whether the young adult offender was a relatively minor participant in the criminal offense or whether he or she acted under extreme duress or under the domination of another person.

(e) Whether the young adult offender has shown sincere and sustained remorse for the criminal offense.

(f) Whether the young adult offender's age, maturity, or psychological development at the time of the offense affected his or her behavior.

(g) Whether the young adult offender has successfully

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005597

obtained a high school equivalency diploma or completed another educational, technical, work, vocational, or self-rehabilitation program, if such a program is available.

(h) Whether the young adult offender was a victim of sexual, physical, or emotional abuse before he or she committed the offense.

(i) The results of any mental health assessment, risk assessment, or evaluation of the young adult offender as to rehabilitation.

(9)(a) If the court determines at a sentence review hearing that the young adult offender who is seeking sentence review under paragraph (3)(a) has been rehabilitated and is reasonably believed to be fit to reenter society, the court ~~must~~ may modify the sentence and impose a term of probation of at least 5 years.

(b) If the court determines at a sentence review hearing that the young adult offender who is seeking sentence review under paragraph (3)(b) has been rehabilitated and is reasonably believed to be fit to reenter society, the court ~~must~~ may modify the sentence and impose a term of probation of at least 3 years.

(c) If the court determines that the young adult offender seeking sentence review under paragraph (3)(a) or (3)(b) has not demonstrated rehabilitation or is not fit to reenter society, the court must issue a written order stating the reasons why the sentence is not being modified.

Section 5. Paragraph (a) of subsection (7) of section 944.705, Florida Statutes, is amended to read:

944.705 Release orientation program.—

(7)(a) The department shall notify every inmate in the inmate's release documents:

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005598

1. Of all outstanding terms of the inmate's sentence at the time of release to assist the inmate in determining his or her status with regard to the completion of all terms of sentence, as that term is defined in s. 98.0751. This subparagraph does not apply to inmates who are being released from the custody of the department to any type of supervision monitored by the department;

2. Of the dates of admission to and release from the custody of the department, including the total length of the term of imprisonment for which he or she is being released; and

3.~~2.~~ In not less than 18-point type, that the inmate may be sentenced pursuant to s. 775.082(9) if the inmate commits any felony offense described in s. 775.082(9) within 3 years after the inmate's release. This notice must be prefaced by the word "WARNING" in boldfaced type.

Section 6. Section 951.30, Florida Statutes, is created to read:

951.30 Release documents requirements.—The administrator of a county detention facility must provide to each inmate upon release from custody of the facility the dates of admission to and release from the custody of the facility, including the total length of the term of imprisonment for which he or she is being released.

Section 7. Paragraph (a) of subsection (2) and paragraphs (b) and (c) of subsection (3) of section 1009.21, Florida Statutes, are amended to read:

(2)(a) To qualify as a resident for tuition purposes:

1. A person or, if that person is a dependent child, his or her parent or parents must have established legal residence in

Formatted:

Formatted:

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005599

this state and must have maintained legal residence in this state for at least 12 consecutive months immediately prior to his or her initial enrollment in an institution of higher education. The 12 consecutive months immediately prior to enrollment may include time spent incarcerated in a county detention facility or state correctional facility.

2. Every applicant for admission to an institution of higher education shall be required to make a statement as to his or her length of residence in the state and, further, shall establish that his or her presence or, if the applicant is a dependent child, the presence of his or her parent or parents in the state currently is, and during the requisite 12-month qualifying period was, for the purpose of maintaining a bona fide domicile, rather than for the purpose of maintaining a mere temporary residence or abode incident to enrollment in an institution of higher education.

(3)

(b) Except as otherwise provided in this section, evidence of legal residence and its duration shall include clear and convincing documentation that residency in this state was for a minimum of 12 consecutive months prior to a student's initial enrollment in an institution of higher education. Time spent incarcerated in a county detention facility or state correctional facility must be credited toward the residency requirement, with any combination of documented time living in Florida prior and post incarceration.

(c) Each institution of higher education shall affirmatively determine that an applicant who has been granted admission to that institution as a Florida resident meets the

Formatted:

Formatted:

Formatted:

Formatted:

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005600

residency requirements of this section at the time of initial enrollment. The residency determination must be documented by the submission of written or electronic verification that includes two or more of the documents identified in this paragraph. No single piece of evidence shall be conclusive.

1. The documents must include at least one of the following:

a. A Florida voter's registration card.

b. A Florida driver license.

c. A State of Florida identification card.

d. A Florida vehicle registration.

e. Proof of a permanent home in Florida which is occupied as a primary residence by the individual or by the individual's parent if the individual is a dependent child.

f. Proof of a homestead exemption in Florida.

g. Transcripts from a Florida high school for multiple years if the Florida high school diploma or high school equivalency diploma was earned within the last 12 months.

h. Proof of permanent full-time employment in Florida for at least 30 hours per week for a 12-month period.

2. The documents may include one or more of the following:

a. A declaration of domicile in Florida.

b. A Florida professional or occupational license.

c. Florida incorporation.

d. A document evidencing family ties in Florida.

e. Proof of membership in a Florida-based charitable or professional organization.

f. Any other documentation that supports the student's request for resident status, including, but not limited to,

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005601

utility bills and proof of 12 consecutive months of payments; a lease agreement and proof of 12 consecutive months of payments; or an official local, state, federal, or court document evidencing legal ties to Florida.

Section 8. The Office of Program Policy and Governmental Accountability (OPPAGA) must conduct a study to evaluate the various opportunities available to persons returning to the community from imprisonment. The study's scope must include, but need not be limited to, any barriers to such opportunities; the collateral consequences that are present, if applicable, for persons who are released from incarceration into the community; and methods for reducing such collateral consequences. OPPAGA must submit a report to the Governor, the President of the Senate, and the Speaker of the House of Representatives by November 1, 2020.

Section 96. This act shall take effect July 1, 2020.

Subject: RE: Legislation - Request for Input (Senator Brandes)

Supervisor –

Our bill drafting came back to us with a few comments:

Hey Vanessa, a few edits in the attachment didn't make sense:
-In s. 101.5614, based on what was stricken, I couldn't tell exactly what was meant since the sentence wasn't complete. I kept the requirement for duplicate ballots as to ballots with undervotes.
-In s. 101.6103, it appeared that the change was trying to line up with the general vote-by-mail statute but the timing didn't make sense in this case in all-mail elections since voters don't request ballots. So, I made it so the ballots can be mailed anytime between 10 and 40 days before the election.

Please let me know if these changes are okay. If so, we will file the bill soon.

Thank you so much!

Subject: Legislation - Request for Input (Senator Brandes)

Vanessa –

I support the attached bill and appreciate Senator Brandes providing the opportunity to review the language.

Specifically, I want to thank Senator Brandes for proposing additional time to conduct the First Logic and Accuracy Test (line 43) from 10 days to 25 days. This will provide us with additional time to conduct pre-election activities, e.g., program voting equipment. The proposed language also helps to correct a technical issue created in SB 7066. The language the Senator is proposing allows Canvassing Boards to take full advantage of being able to canvass mail ballots 22 days prior to the election.

Also attached are the Florida Supervisors of Elections (FSE) legislative priorities for further consideration.

If you have any questions, my email address is dclark@votepinellas.com; this can be used for all direct correspondence rather than sending to election@votepinellas.com.

Have a safe and happy holiday season.

Subject: Legislation - Request for Input (Senator Brandes)

Vanessa –

I support the attached bill and appreciate Senator Brandes providing the opportunity to review the language.

Specifically, I want to thank Senator Brandes for proposing additional time to conduct the First Logic and Accuracy Test (line 43) from 10 days to 25 days. This will provide us with additional time to conduct pre-election activities, e.g., program voting equipment. The proposed language also helps to correct a technical issue created in SB 7066. The language the Senator is proposing allows

AMERICAN OVERSIGHT

Canvassing Boards to take full advantage of being able to canvass mail ballots 22 days prior to the election.

Also attached are the Florida Supervisors of Elections (FSE) legislative priorities for further consideration.

If you have any questions, my email address is dclark@votepinellas.com; this can be used for all direct correspondence rather than sending to election@votepinellas.com.

Have a safe and happy holiday season.

Sincerely,

Deborah Clark, CERA
Supervisor of Elections
Pinellas County, Florida

Subject: Senator Brandes - Legislation

Supervisor Clark,

Senator Brandes has been asked to file 2 pieces of legislation that he would like to run by you before doing anything.

At your convenience, would you be able to review and let us know your thoughts?

Thank you so much,

Vanessa Thompson
Legislative Assistant to State Senator Jeff Brandes

Hey Melissa!

Carol Bracy would like to request time with Senator Brandes during the week of October 21, for herself and Bill Murphy with Clear Ballot. They would like to discuss some possible legislation for elections reform and auditing.

Bill will be in town from Tampa that week. As we get closer, please let me know what might be available on the calendar.

Thanks so much!
Cindy

Subject: Meeting Request - Week 3

Hey Melissa!

Carol Bracy would like to request time with Senator Brandes during the week of October 21, for herself and Bill Murphy with Clear Ballot. They would like to discuss some possible legislation for elections reform and auditing.

Bill will be in town from Tampa that week. As we get closer, please let me know what might be available on the calendar.

Thanks so much!
Cindy

Hi Melissa. I believe it was Florida LamdaRail that no longer needed the meeting after we discovered the State and FTC already have what we need to make this happen without involving LamdaRail.

I am more than happy to meet during committee week in December.

All the best,

- Jim

Sent: Thursday, December 12, 2019 1:32 PM EST
To: elimeyer1993@gmail.com <elimeyer1993@gmail.com>
Subject: RE: Other (flsenate.gov)

Good morning Mr. Meyer,

Thank you for reaching out to the legislative office of State Senator Jeff Brandes. State Senator Brandes appreciates the time you have taken to share your thoughts.

As a member of the Florida Senate, not the US Senate, State Senator Jeff Brandes does not have the ability to vote in federal issues, like impeachment proceedings. You are welcome to reach out to your federal elected officials, who may be more impactful. These officials are: US Congressman Charlie Crist (https://crist.house.gov/contact/), US Senator Marco Rubio (https://www.rubio.senate.gov/public/index.cfm/tampa-office), and US Senator Rick Scott (https://www.senate.gov/senators/116thCongress/ScottRick.htm).

Again, thank you for sharing. Please let us know if you have any state legislative questions or concerns.

Kind regards,

Melissa Meshil
Legislative Assistant to State Senator Jeff Brandes

_____

Comment or Question:
Over the past few months our democratic system has gone through an extremely volatile time between the two major parties in our political system (Republicans and Democrats) over the potential right to impeach the current citizen who holds presidential office Honorable Donald J. Trump and remove him from office and potential nomination of any political office in the future. After the numerous committee's performed, witnesses and professional evaluations given, and with the current debate on the House panel where representatives argue between one another on articles of impeachment and try to defame each other's reputation on each side worries me as an independent voter and citizen within this wonderful country. After reviewing numerous amounts of information released to the public it is deemed in my opinion that our current president is in violation of his official duties without the current role. Whether all the representatives of both parties want to dispute which words mean what in a document released that they all want to classify is a "phone call transcript" is invalid. The document can not be legally classified as a transcript by either party due to no audio recording ever being released to the public to validate the words of this document nor has it been mentioned that there ever was audio recorded between both the president of the U.S. and the current president of Ukraine.

As well multiple investigations have been conducted that debunk false narratives stating Ukraine not Russia interfered in the 2016 United States elections by governmental agencies, yet continuously these assumptions are announced by representatives allowing false information to reach the public. It is dismaying that still many representatives who were just elected into office this past election continue to remain silent while our democratic system continues to fall apart in partisan politics by the two major parties in our country.

It is now time for all of the elected officials in congress to resolve their differences within the next year before our 2020 presidential elections so that we can protect the integrity of our political system. This starts as well with the removal of a citizen who has violated public trust while in holding the presidential office Honorable Donald J. Trump.

AMERICAN OVERSIGHT

A concerned citizen and independent voter,

Eliajah Meyer

CAUTION: This email originated from outside of your organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Senator Brandes –

As a follow up to our phone conversation last week:

Your draft bill 24-01581-20 (attached) strikes the following language in 101.043(1)(b) – "The address appearing on the identification presented by the elector may not be used as the basis to confirm an elector's legal residence or otherwise challenge an elector's legal residence."

Supervisors of Elections support this change because it allows poll workers to ask the voter if the address on their ID is current.

- If it is, the voter is in the correct voting precinct and will receive the correct ballot.
- If the address is not current but the voter lives in the precinct, the voter may file an address change and vote a regular ballot.
- If the address is not current and the voter does not live in the precinct, the voter will be given directions to the correct precinct polling place where they can file an address change and receive the correct ballot.

Supervisors of Elections support this change because it gives us the ability to ensure voters are casting ballots in their home precincts, as required by F.S. 101.045(1) – "A person is not permitted to vote in any election precinct or district other than the one in which the person has his or her legal residence…"

Poll workers only use picture and signature identification to confirm the voter's identity, as provided in F.S. 101.043 (1)(a) – "…for the purpose of identifying the elector at the polls…"

Identification is not used to determine whether the voter is eligible to vote.

Supervisors feel strongly that confirming voters' residential addresses to ensure they are given correct ballots is essential to the integrity of the election process.

If you have any additional questions, please contact me at (727) 424-0088.

Respectfully,

Deb

Deborah Clark, CERA

Subject: Legislation - Request for Input (Senator Brandes)

Vanessa –

I support the attached bill and appreciate Senator Brandes providing the opportunity to review the language.

Specifically, I want to thank Senator Brandes for proposing additional time to conduct the First Logic and Accuracy Test (line 43) from 10 days to 25 days. This will provide us with additional time to conduct pre-election activities, e.g., program voting equipment. The proposed language also helps to correct a technical issue created in SB 7066. The language the Senator is proposing allows Canvassing Boards to take full advantage of being able to canvass mail ballots 22 days prior to the election.

Also attached are the Florida Supervisors of Elections (FSE) legislative priorities for further consideration.

If you have any questions, my email address is dclark@votepinellas.com; this can be used for all direct correspondence rather than sending to election@votepinellas.com.

Have a safe and happy holiday season.

Sincerely,

Deborah Clark, CERA

Attachment(s): "2020 Bicycle Amendments.docx"

Happy First Day of Session!

I realize it is a busy time, but I did want to follow up on this email to see if you have any questions.

Thank you for the consideration,
Becky

>
> The Florida Bicycle Association is supportive of SB 1148 and HB 971. During our conversation on December 20, I asked the Senator to consider a few amendments to SB 1148 (attached as well):
>
> **Regarding bicycle helmets:**
> **316.2065 Bicycle regulations (current)**–
> (2)(d) A bicycle rider or passenger who is under 16 years of age must wear a bicycle helmet that is properly fitted and is fastened securely upon the passenger's head by a strap and that meets the federal safety standard for bicycle helmets, final rule, 16 C.F.R. part 1203. ~~A helmet purchased before October 1, 2012, which meets the standards of the American National Standards Institute (ANSI Z 90.4 Bicycle Helmet Standards), the standards of the Snell Memorial Foundation (1984 Standard for Protective Headgear for Use in Bicycling), or any other nationally recognized standards for bicycle helmets adopted by the department may continue to be worn by a bicycle rider or passenger until January 1, 2016.~~* As used in this subsection, the term "passenger" includes a child who is riding in a trailer or semitrailer attached to a bicycle.
>
> *FBA recommends an amendment to SB 1148 and HB 971 to strike out the language above due to the years in the current statute being past.
>
> **Regarding bicycle seat height:**
> **316.003 Definitions (current)** –
> (4) BICYCLE.—Every vehicle propelled solely by human power, and every motorized bicycle propelled by a combination of human power and an electric helper motor capable of propelling the vehicle at a speed of not more than 20 miles per hour on level ground upon which any person may ride, having two tandem wheels, and including any device generally recognized as a bicycle though equipped with two front or two rear wheels. The term does not include ~~such a vehicle with a seat height of no more than 25 inches from the ground when the seat is adjusted to its highest position or~~* a scooter or similar device. A person under the age of 16 may not operate or ride upon a motorized bicycle.
>
> * FBA recommends an amendment to SB 1148 and HB 971 to strike out the language above due to the restriction being imposed prior to the popularity of adult recumbents and recumbent tricycles. FBA has been informed by membership that insurance companies will not insure their recumbent bicycles or tricycles due to this restriction. These bicycles may be valued at $2,000 or more. The deletion has been discussed with the Florida Department of Transportation and is felt to be the best way to adjust the definition as opposed to creating definitions with every advance in technology.
>
> **Regarding current Bicycle definition and proposed Electric Bicycle definitions and Micro Mobility devices:**
> **316.003 Definitions (current)** –
> (4) BICYCLE.—Every vehicle propelled solely by human power, ~~and every motorized bicycle propelled by a combination of human power and an electric helper motor capable of propelling the vehicle at a speed of not more~~

AMERICAN OVERSIGHT

~~than 20 miles per hour on level ground upon which any person may ride~~*, having two tandem wheels, and including any device generally recognized as a bicycle though equipped with two front or two rear wheels. The term does not include such a vehicle with a seat height of no more than 25 inches from the ground when the seat is adjusted to its highest position or a scooter or similar device. A person under the age of 16 may not operate or ride upon a motorized bicycle.

***SB 1148 and HB 971 propose the above strikeout language to current Bicycle statute** (FBA is recommending the highlighted language to be stricken, see above.)

SB 1148 and HB 971 provide the following for Electric Bicycle definitions:
(22) ELECTRIC BICYCLE.—A bicycle or tricycle equipped with fully operable pedals, a seat or saddle for the use of the rider, and an electric motor of less than 750 watts which meets the requirements of one of the following three classifications: (a) "Class 1 electric bicycle" means an electric bicycle equipped with a motor that provides assistance only when the rider is pedaling and that ceases to provide assistance when the electric bicycle reaches the speed of 20 miles per hour. (b) "Class 2 electric bicycle" means an electric bicycle equipped with a motor that may be used exclusively to propel the electric bicycle and that ceases to provide assistance when the electric bicycle reaches the speed of 20 miles per hour. (c) "Class 3 electric bicycle" means an electric bicycle equipped with a motor that provides assistance only when the rider is pedaling and that ceases to provide assistance when the electric bicycle reaches the speed of 28 miles per hour.
(language highlighted to demonstrate need for amendment)

316.003 Definitions (current) –
(38) MICROMOBILITY DEVICE.—Any motorized transportation device made available for private use by reservation through an online application, website, or software for point-to-point trips and which is not capable of traveling at a speed greater than 20 miles per hour on level ground. This term includes motorized scooters and bicycles as defined in this chapter.*
(language highlighted to demonstrate need for amendment)

*FBA recommends an amendment to SB 1148 and HB 971 to change Micromobility Device definition to reflect a **Class 2 Electric Bicycle** as only the proposed Class 1 and Class 2 Electric Bicycle definitions would match up best with the Bicycle definition proposed by SB 1148 and HB 971 because both these Classes keep human power in the definition.

I appreciate your time and consideration of these proposed amendments. If you have any questions, please don't hesitate to contact me.

Happy 2020!
Becky

AMERICAN OVERSIGHT

Regarding bicycle helmets:
316.2065 Bicycle regulations (current)–
(2)(d) A bicycle rider or passenger who is under 16 years of age must wear a bicycle helmet that is properly fitted and is fastened securely upon the passenger's head by a strap and that meets the federal safety standard for bicycle helmets, final rule, 16 C.F.R. part 1203. ~~A helmet purchased before October 1, 2012, which meets the standards of the American National Standards Institute (ANSI Z 90.4 Bicycle Helmet Standards), the standards of the Snell Memorial Foundation (1984 Standard for Protective Headgear for Use in Bicycling), or any other nationally recognized standards for bicycle helmets adopted by the department may continue to be worn by a bicycle rider or passenger until January 1, 2016.~~* As used in this subsection, the term "passenger" includes a child who is riding in a trailer or semitrailer attached to a bicycle.

*FBA recommends an amendment to SB 1148 and HB 971 to strike out the language above due to the years in the current statute being past.

Regarding bicycle seat height:
316.003 Definitions (current) –
(4) BICYCLE.—Every vehicle propelled solely by human power, and every motorized bicycle propelled by a combination of human power and an electric helper motor capable of propelling the vehicle at a speed of not more than 20 miles per hour on level ground upon which any person may ride, having two tandem wheels, and including any device generally recognized as a bicycle though equipped with two front or two rear wheels. The term does not include ~~such a vehicle with a seat height of no more than 25 inches from the ground when the seat is adjusted to its highest position or~~* a scooter or similar device. A person under the age of 16 may not operate or ride upon a motorized bicycle.

* FBA recommends an amendment to SB 1148 and HB 971 to strike out the language above due to the restriction being imposed prior to the popularity of adult recumbents and recumbent tricycles. FBA has been informed by membership that insurance companies will not insure their recumbent bicycles or tricycles due to this restriction. These bicycles may be valued at $2,000 or more. The deletion has been discussed with the Florida Department of Transportation and is felt to be the best way to adjust the definition as opposed to creating definitions with every advance in technology.

Regarding current Bicycle definition and proposed Electric Bicycle definitions and Micro Mobility devices:
316.003 Definitions (current) –
(4) BICYCLE.—Every vehicle propelled solely by human power, ~~and every motorized bicycle propelled by a combination of human power and an electric helper motor capable of propelling the vehicle at a speed of not more than 20 miles per hour on level ground upon which any person may ride~~*, having two tandem wheels, and including any device generally recognized as a bicycle though equipped with two front or two rear wheels. The term does not include such a vehicle with a seat height of no more than 25 inches from the ground when the seat is adjusted to its highest position or a scooter or similar device. A person under the age of 16 may not operate or ride upon a motorized bicycle.

***SB 1148 and HB 971 propose the above strikeout language to current Bicycle statute** (FBA is recommending the highlighted language to be stricken, see above.)

SB 1148 and HB 971 provide the following for Electric Bicycle definitions:
(22) ELECTRIC BICYCLE.—A bicycle or tricycle equipped with fully operable pedals, a seat or saddle for the use of the rider, and an electric motor of less than 750 watts which meets the requirements of one of the following three classifications: (a) "Class 1 electric bicycle" means an electric bicycle equipped

Vanessa –

As we discussed on the phone -

- The FSE supports ***inserting*** the following language in Section 5.

  "Notwithstanding the qualifying period prescribed in this section, a qualifying office may accept and hold qualifying papers submitted not earlier than 14 days prior to the beginning of the qualifying period, to be processed and filed during the qualifying period."

  Same language that is in F.S. 99.061(8).

- The FSE support ***keeping*** "not earlier than noon of the 71st day, or" (line 135). No strikethrough.

Please let me know if you have any questions.

Thank you for your time and consideration.

Subject: Re: SB 1372 Voter ID Provision

Senate Bill 1372 was a list of concepts and clean up language brought to me by the Florida Supervisors of Elections (FSE) and unanimously approved by their bipartisan board.

The language in Section 1 is an attempt to clean up a conflict in Florida law. The language drafted by staff did not accurately portray the intent of the clarification.

Poll workers in Florida take an oath to uphold Florida's election laws (§101.24 and 102.012, F.S.). When those laws conflict as it relates to their duties, we must try and resolve those conflicts. Florida Statute 101.043 is one of those statutes.

Paragraph (b) in section 1 of that statute requires that:

"The address appearing on the identification presented by the elector may not be used as the basis to confirm an elector's legal residence or to otherwise challenge an elector's legal residence."

Compare this to the language in paragraph (c) of that same section:

"When an elector presents his or her picture identification and the elector's address on the picture identification matches the elector's address in the supervisor's records, the elector may not be asked to provide additional information or to recite his or her home address."

The very act seemingly required in paragraph (c) – matching the address on the ID with the address in the supervisor's records – clearly violates the provision in paragraph (2) that the "address appearing on the identification presented . . . **may not** be used . . . to **confirm** an elector's legal residence . . . [emphasis added]."

The best way to resolve this would be to strike only the provision against "confirming" the address by matching it; thus keeping the protection for the voter that the address on their ID cannot be used as the sole basis to challenge a voter's eligibility.

Happy to talk by phone my number is 727-408-0543.

To my understanding the clerk would now be able to say they noticed my driver's license doesn't match my address on file and I would have to let them know I still intend on voting with respect to the address I have on file. Would I then just go ahead and vote anyhow once I have provided that additional information and assured them I'm voting in the right precinct?

AMERICAN OVERSIGHT

Feedback for Senator Brandes' Adult-Use Bill

We are grateful for Sen. Brandes' leadership on marijuana policy and his receptivity to suggestions. Below is sample language for some of the areas where we recommended additions or tweaks to the draft bill, along with two additional general recommendations.

Clarifying that Adult-Use Only Businesses Are Allowed (new recommendation)

- We understand the intent is to allow adult-use *only* growers, processors, and retailers, not just MMTCs. However, the bill refers only to MMTCs when it refers to cannabis businesses. We recommend clarifying the language throughout to ensure there are clear legal protections, regulatory requirements, and licensing procedures for adult-use only businesses.

  For example:
  - Ø lines 445-448 only reference employee identification cards for MMTCs.
  - Ø lines 450-471 only reference MMTCs in reference to seed-to-sale tracking.
  - Ø lines 472-1121, 1174-1375 refer to registration procedures, inspections, and rules for MMTCs only.
  - Ø The legal protections in lines 1487-1496 and 1505-1511 only apply to MMTCs.
  - Ø lines 439-440 clarify that MMTCs are medical marijuana treatment centers, providing "medical marijuana treatment centers (MMTCs)."

Ensuring Free Market Licensing (new recommendation)

- We suggest including more specific language to ensure the licensing is truly free-market, and that all applicants that meet the requirements — and are allowed locally — are issued licenses by a date certain (such as within 90 days of submitting their application).

  Possible language:

  (xx) Within 90 days after receiving an application or renewal application, the department shall issue a registration to the [adult-use business] applicant, unless the department finds:
  (i) the applicant did not submit the materials required by section [xx], or
  (ii) the applicant is not in compliance with regulations enacted pursuant to [xx], or
  (iii) the department is notified by the relevant locality that the applicant is not in compliance with ordinances and regulations made pursuant to [xx].

Defining a Possession Limit

- Rather than allowing a "70-day supply" for adults, there should be a clear, specific possession limit for non-flower marijuana (lines 1542-1543)

AMERICAN OVERSIGHT

- Ten grams of concentrates and infused products up to 2,000 mg THC are about the equivalent of 2.5 ounces of flower.
- The weight/ THC-based limit should also be used for dispensing to adults, rather than a 70-day supply. (lines 860-868)

Since the limit will likely be referenced in many places, it is easiest to make it a defined term.

Suggested language:

"Possession limit" means:
(i) 2.5 ounces of marijuana, not including concentrated marijuana and marijuana products;
(ii) 10 grams of concentrated marijuana; and
(iii) Marijuana products containing no more than 2,000 milligrams of THC.

"Marijuana products" means products that are comprised of marijuana and other ingredients and are intended for use or consumption, including but not limited to, edible products, ointments, and tinctures.

Authorizing — and Regulating — Paraphernalia

- We recommend allowing adults 21+ to possess paraphernalia (for storage, not just delivery).
- In addition, the manufacture and sale of paraphernalia by businesses other than MMTCs should be explicitly "authorized."
  - Otherwise, cannabis businesses buying equipment to grow and store marijuana from other vendors would likely be illegal if the vendor has reason to know what it's intended for, which would be pretty obvious.

If paraphernalia is *authorized* under state law, it's federally legal, too. 21 USC 863(f)

It may also be a good idea to include language directing the health department to regulate paraphernalia used for inhalation, in light of the recent lung illnesses.

Suggested language:

(a) Notwithstanding any other provision of law, except as provided in this section, it is not unlawful and shall not be an offense under Florida law or the law of any political subdivision of Florida or be a basis for seizure or forfeiture of assets under Florida law for persons 21 years of age or older to manufacture, possess, or purchase marijuana paraphernalia, or to distribute or sell marijuana paraphernalia to a person who is 21 years of age or older.
(b) Except as provided in this section, a person who is 21 years of age or older is authorized to manufacture, possess, and purchase marijuana paraphernalia,

AMERICAN OVERSIGHT

and to distribute or sell marijuana paraphernalia to a person who is 21 years of age or older.
(c) This section is intended to meet the requirements of subsection (f) of Section 863 of Title 21 of the United States Code (21 U.S.C. Sec. 863(f)) by authorizing, under state law, any person in compliance with this section to manufacture, possess, or distribute marijuana paraphernalia.
(d) This section does not allow any person to manufacture, distribute, or sell marijuana paraphernalia that violates reasonable regulations enacted by the department.

[and the department-developed regulations will include]
(xx) Reasonable health and safety restrictions on marijuana paraphernalia that may be manufactured or sold in Florida. The department may prohibit vaporizers that are reasonably believed to pose hazards, but may not completely prohibit or unreasonably restrict the manufacture or sale of vaporization devices.

Sharing Marijuana Among Adults, Clarifying Legal Protections

- The bill should allow sharing with other adults of the personal-use amounts. Adults use marijuana socially. Adults who live together, including spouses, typically share cannabis products, rather than buying separate supplies, just as they do with all kinds of other consumable items (wine, food, etc.).

The below suggestion would also ensure that localities cannot criminalize cannabis possession and would otherwise clarify legal protections for adults.

Suggested language to replace 1535-1550:

(a) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other provision of law, except as otherwise provided in this chapter, the following acts are not unlawful and shall not be a criminal or civil offense under Florida law or the law of any political subdivision of Florida or be a basis for seizure or forfeiture of assets under Florida law for persons 21 years of age or older:
(1) Possessing, consuming, using, purchasing, or transporting an amount of marijuana that does not exceed the possession limit;
(2) Possessing, purchasing, manufacturing, or transporting marijuana paraphernalia, or selling it to a person who is 21 years of age or older;
(3) Transferring an amount of marijuana that does not exceed the possession limit to a person who is 21 years of age or older without remuneration. For purposes of this section, a transfer is for remuneration if marijuana is given away contemporaneously with another transaction between the same parties, if a gift of marijuana is offered or advertised in conjunction with an offer for sale of goods or services, or if the gift of marijuana is contingent upon a separate transaction for goods or services.

AMERICAN OVERSIGHT

(b) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other provision of law, except as otherwise provided in this chapter, the following acts, when performed by a licensed MMTC ***[or other adult-use licensee?]****, or a person 21 years of age or older who is acting in his or her capacity as an owner, employee, or agent of a licensed MMTC* ***[or other adult-use licensee?]****, are not unlawful and shall not be an offense under [State] law or be a basis for seizure or forfeiture of assets under [State] law: Engaging in any activities involving marijuana or marijuana products if the activities are within the scope of activities the MMTC* ***[or other adult-use licensee?] is permitted to engage in pursuant to a facility permit****.*
(c) Nothing in this section prevents the imposition of penalties for violating this chapter or rules adopted by the department or localities pursuant to this chapter.

Protections for Property Owners and Renters

- The bill should provide that landlords may not prevent tenants from possessing or using marijuana via non-smoked means. (lines 1549-1550)

Rather than "This section does not limit the ability of a private property owner to restrict the use of marijuana on his or her private property," this language could be used:

(a) Except as provided in this section, the provisions of this chapter do not require any person, corporation, or any other entity that occupies, owns, or controls a property to allow the consumption, cultivation, display, sale, or transfer of marijuana on or in that property.
(b) In the case of the rental of a residential dwelling, a landlord may not prohibit the possession of marijuana or the consumption of marijuana by non-smoked means unless:
(1) The tenant is a roomer who is not leasing the entire residential dwelling;
(2) The residence is incidental to detention or the provision of medical, geriatric, educational, counseling, religious, or similar service;
(3) The residence is a transitional housing facility; or
(4) Failing to prohibit marijuana possession or consumption would violate federal law or regulations or cause the landlord to lose a monetary or licensing-related benefit under federal law or regulations.

Home Cultivation Study

- The bill should create a formal study on home cultivation to report back with findings and recommendations by a certain date.

Possible language:

The department shall commission or conduct a study to determine if adults who are 21 years of age or older should be allowed to cultivate marijuana for personal

AMERICAN OVERSIGHT

use, and to determine what restrictions should apply to home cultivation. The study shall include consideration of:
(a) reasonable precautions to ensure that the plants are secure from unauthorized access or access by any individual under 21 years of age,
(b) the location where such marijuana may be grown, and
(c) any other related public safety or regulatory issues the department deems necessary.
Not later than January 1, 2021, the department shall report the conclusions of the study to the [xx committees of the] legislature.

***Note**: We are checking with an ally regarding suggestions to this language and my circle back with a modified recommendation.*

Social Equity and Diversity

- The bill should include provisions to foster equity and diversity in the industry.

  At a minimum, it should include language such as:

  [Regulators must develop …] Procedures and policies to promote and encourage full participation in the regulated marijuana industry by people from communities that have previously been disproportionately harmed by marijuana prohibition and enforcement and to positively impact those communities.

  — and —

  Requiring yearly reporting by each [MMTC and other cannabis business] to the department regarding the diversity of its workforce, managerial positions, and ownership, the overall percentages of which the department shall make available to the public.

  Other worthwhile possibilities include:
  - Providing technical assistance for social equity applicants (and defining such applicants, such as those from communities with disproportionate marijuana arrests or those from communities with high poverty and high unemployment)
  - Providing for low-interest loans for social equity applicants, which can be funded by marijuana tax revenue
  - Providing a head start for applications filed by social equity applicants
  - Requiring licensees to establish and adhere to policies to encourage diversity in the workplaces

Consumer Privacy

- The bill should ensure regulators do not require information to be collected on adult-use consumers to protect privacy and in light of federal law. It should also protect consumers from improper data disclosure from businesses.

AMERICAN OVERSIGHT

Suggested language:

(xx) In order to ensure that individual privacy is protected, the department shall not require a consumer to provide a [MMTC or other licensee] with personal information other than government-issued identification to determine the consumer's age, and a [MMTC or other licensee] shall not be required to acquire and record personal information about consumers.

— and —

[around line 1336, listing conduct an MMTC can be fined for]

5. Improperly disclosing information about customers, including sharing names, addresses, and contact information of customers without their permission.

Preventing Medical Marijuana Shortages

- The bill should include language to avoid medical cannabis shortages and price hikes for patients during a transition period.

Sample language:

Any MMTCs applying to the Department of Business and Professional Regulation [for a license to serve adult-use consumers] must submit a plan explaining how the MMTC intends to continue serving qualified patients without increasing prices or reducing product availability.
[Regulators must establish]
(ii) procedures to suspend any MMTC licensed as an [adult-use business] that has failed to maintain reasonable prices and product availability for qualified patients during the first two years after the MMTC was issued [an adult-use license].

It may also be a good idea to allow regulators to take other actions if there are widespread issues with price hikes and shortages of medical cannabis. For example, if such issues arise, they could be allowed to impose smaller purchase limits for non-patients or even suspend adult-use sales.

Anti-Discrimination Protections

- We recommend including non-discrimination protections so cannabis consumers aren't denied medical care, child custody, and/or employment. The bill should include exceptions for if there's a clinical reason for denying the medical care, a parent endangers a child, an employee is impaired at work, or federal law or contracts require the action to be taken.

AMERICAN OVERSIGHT

Suggested language:

(a) (1) Except as provided in this section, an employer may not discipline, refuse to hire, or take adverse action against an employee or prospective employee because the person uses or used marijuana outside of work.
(2) Except as provided in this section, an employer may not discipline, refuse to hire, or take adverse action against an employee or prospective employee due to the presence of metabolites or components of marijuana in a person's bodily fluids.
(3) Nothing in this section prohibits an employer from disciplining, discharging, or otherwise taking an adverse employment action against an employee for working while under the influence of marijuana or for possessing or using marijuana during work hours or at a place of employment.
(b) (1) Medical care, including an organ or tissue transplant, may not be denied based on the status of marijuana under federal law.
(2) The use of marijuana or presence of metabolites or components of marijuana in a person's bodily fluids may only be considered with respect to the possible denial of medical care, including an organ transplant, in terms of evidence-based clinical criteria.
(c) A person shall not be denied custody of or visitation rights or parenting time with a minor solely due to the use of marijuana, or other actions allowed under this chapter, and there shall be no presumption of neglect or child endangerment unless the person's behavior is such that it creates an unreasonable danger to the safety of the minor as established by clear and convincing evidence.
(d) The rights provided by this section do not apply to the extent that they conflict with an employer or other person's obligations under federal law or regulations, or to the extent that they would disqualify an employer or other person from a monetary or licensing-related benefit under federal law or regulations.

Prohibiting Host Community Agreements

- In Massachusetts, localities negotiate specific "host community agreements" with cannabis businesses, which involve financial benefits that the individual business agrees to. This has caused a lot of controversy and an air of impropriety and unfair favoritism. A mayor has been indicted for bribery in relation to local licensing.

Possible language (line 1109):

Municipalities may not require, request, or accept financial contributions or similar benefits from marijuana businesses other than generally applicable taxes and fees.

Ensuring Appropriate Names/Logos

AMERICAN OVERSIGHT

- The bill provides "An MMTC's trade name and logo may not contain wording or images … which promote recreational use of marijuana." We recommend revising this to be more specific regarding what is prohibited. The current language is vague and almost any name or logo could arguably be prohibited since the signs will all be for stores that sell adult-use marijuana. (1185-1186).

  Suggested language:

  [The department shall develop:]

  - *requirements that the [business's] trade name, logo, advertising, and signage must be tasteful and that it may not appeal to minors, contain cartoon-like figures, attempts at humor, or marijuana-related slang; and*
  - *requirements that the [business] must submit any logo or trade name for review to regulators in accordance with regulations.*

Enforceability of Contracts

- The bill should provide that it's the policy of Florida that contracts related to marijuana are enforceable (such as a contract between a landlord and a cannabis business, or between two cannabis businesses). Otherwise, courts may rule that entire contracts are void and contrary to public policy, due to federal law.

Suggested language:

It is the public policy of this state that contracts related to the operation of a MMTC [or other marijuana establishment] should be enforceable. It is the public policy of this state that no contract entered into by a MMTC [or other marijuana establishment] or its employees or agents, or by those who allow property to be used by an establishment, its employees, or its agents, shall be unenforceable on the basis that cultivating, obtaining, manufacturing, distributing, dispensing, transporting, selling, possessing, or using marijuana is prohibited by federal law.

Professional Licensing

- The bill should provide that CPAs, lawyers, and other professionals who provide services to marijuana businesses and applicants cannot be subject to professional discipline on the basis that marijuana is illegal under federal law.

Suggested language:

(a) A holder of a professional or occupational license may not be subject to professional discipline for providing advice or services related to a MMTC [or other marijuana establishment] or applications to operate marijuana establishments on the basis that marijuana is illegal under federal law.
(b) An applicant for a professional or occupational license may not be denied a license based on previous employment related to MMTCs [or other marijuana establishments] in accordance with state law.

To: Brandes, Jeff <BRANDES.JEFF@flsenate.gov>
Subject: Re: Short Term Rentals

Senator Brandes,

While we acknowledge and appreciate the progress of this legislation from previous years, especially with the addition of language intended to not "supersede" community associations and their duly adopted governing documents, this legislation now creates, at a minimum, significant concerns for Redington Towers Condominium Association, Inc. Association for these reasons:

1. **Insufficient Protections for Homeowners.** In the original bill, Lines 202-208 provide some needed protections for Community Association documents by stating "the Legislature does not intend to supersede" an Association's governing documents. However, the question then becomes: what if the legislation does supersede an Association's governing documents related to short term rentals? Our solution would be to replace the current language in Section 6 with the following:

   "This act does not supersede restrictions, that prohibit or limit public vacation rentals or public lodging establishments, which are contained within any current or future declaration or declaration of condominium adopted pursuant to chapter 718, Florida Statutes, cooperative documents adopted pursuant to chapter 719, Florida Statutes, or governing documents adopted pursuant to chapter 720, Florida Statutes, or within amendments to any of the foregoing."

2. **Constitutional Property Rights for Short Term Rental Operators.** Lines 86-90 of the original bill state the following "constitutional right" for Short Term Rental operators:

   "Property owners who choose to use their property as a vacation rental have constitutionally protected property rights and other rights that must be protected, including the right to use their residential property as a vacation rental." By stating a constitutional right for short term rental operators, the bill disregards a homeowner's legal obligation to comply with the rules when they purchased their home, as everyone else must do. We request you REMOVE this language from the bill.

3. Permitting Unauthorized Short Term Rentals in Neighborhoods. Lines 96-98 of the original bill state unequivocally:

   "Vacation rentals are residential in nature, a residential use, and thus permitted in residential neighborhoods." In other words, short term rentals could be allowed regardless of whether an Association's governing documents authorizes them because short term rentals are "residential". We request you REMOVE this language from the bill.

At best, the legislation, as drafted without our requested changes, contradicts itself and creates significant uncertainty as to whether the rules of a Community Association apply to everyone.

At worst, the legislation exposes homeowners and their Community Associations to legal liability by statutorily authorizing short term rentals regardless of whether or not a Community Association authorizes them.

Please make the changes we have suggested to this legislation to protect your homeowners.

As owners and as an Association, we have worked very hard to keep our property attractive and in good repair. Our documents state a 3 month minimum rental, because we found that short-term renters quite often do not treat our property or other residents with the respect that is deserved. Our owners, themselves, made the decision to restrict rentals to a 3 month minimum, so this restriction should be allowed to prevail.

AMERICAN OVERSIGHT

Thank you for your consideration.

Sincerely,

Christine M. Cook, Owner, Former Board Member and Treasurer

Redington Towers Condominium Association, Inc.

Redington Shores, Florida

Subject: RE: VA Benefits
Attachment(s): "38 CFR 36.4362 Lending Rule for VA.pdf"

Dear Director Burgess,

The issue at hand is related to the right of first refusal and the VA lending guidelines. As you see from the attached rule, VA does back loans for housing that is subject to a first right of refusal. Many governing documents in condominiums have a first right of refusal clause that could be beneficial for the financial integrity of the community. Even if the community were to choose to remove the first right of refusal, it is very challenging for community associations to amend covenants as the amendment process typically sets forth a process that requires 2/3 of the owners in the community to vote to support the amendment. The problem is not usually related to support of an issue rather it is related to getting people to vote. The VA lending guidelines are attached and the specific clause regarding Right of First Refusal is below.

(5) *Right of first refusal.* The right of a unit owner to sell, transfer, or otherwise convey his or her unit in a condominium shall not be subject to any right of first refusal or similar restriction if the declaration or similar document is recorded on or after December 1, 1976. If the declaration was recorded prior to December 1, 1976, the right of first refusal must comply with § 36.4854(b)(5)(ii); Provided, however, restrictions on the basis of age or restrictions established by a State, Territorial, or local government agency as part of a program for providing assistance to low- and moderate-income purchasers shall be governed by § 36.4854(b)(5)(iv).

I welcome the opportunity to participate in the conversation moving forward. Thank you for your service and your leadership.

Very truly yours,

Danny Burgess Executive Director of Veterans Affairs
35358 State Road 54
Zephyrhills Fl. 33541

Dear Director,
Please let me take this opportunity to introduce myself. My name is Dominick Scannavino President of the Council of Neighborhood Associations (CONA) and a Delegate with the Community Association Institutes Florida Legislative Alliance (CAI-FLA). I met you several times while you were in the legislature and a recent West Pasco Republican Club dinner.
During our groups visit to Tallahassee last week, among the thirty legislators we met with, we met with Senator Brandes. Our discussion was confined to common interest communities. During that conversation the topic of Veterans came up. Apparently Veterans desirous of obtaining a V.A. Loan to purchase a condominium and in certain Home Owner associations are disqualified because of a first right of refusal language in the associations governing documents placed by developers while they were or are in control of the associations. After control of the association is turned over to the membership the documents can be amended,

AMERICAN OVERSIGHT

however it would require a super majority of the membership to change the documents which is almost an impossible task. Senator Brandes indicated that if we could find the wording necessary to present to the legislature this would be a tremendous accomplishment.
Subsequent our meeting with Senator Brandes I met with Representative Sprowls, who I dearly support, and presented this very delicate challenge to him. Chris suggested I bring this matter to you for guidance and help.
I will also contact Congressman Bilirakis for his guidance as well.
Director I'm sure you agree that giving a life time service to our Country by our Vet's, only to be turned down for a benefit Veterans rightly deserve is a travesty.
I look forward to speaking with you regarding this most urgent matter.

Dominick Scannavino, President
Management And Associates

AMERICAN OVERSIGHT

AUTHENTICATED U.S. GOVERNMENT INFORMATION GPO

other enabling documentation must be approved by the Secretary. The declarant should have proposed amendments reviewed prior to recordation. This provision does not apply to amendments which annex additional phases to the condominium regime in accordance with a general plan of development (§§ 36.4864(a)(3) and 36.4865(b)(6)).

(Authority: 38 U.S.C. 3703(c)(1), 3710(a)(6))

(d) *Real property descriptions in the declaration*—(1) *Clarity—conformity with the law of the jurisdiction.* The description of the units, common elements, any recreational facilities and other related amenities, and any limited common elements shall be clear and in conformity with the law of the jurisdiction where the project is located. Responsibility for maintenance and repair of all portions of the condominium shall be set forth clearly.

(2) *Developmental plan—proposed condominiums.* The declaration or other legally enforceable and binding document must state in a reasonable manner the overall development plan of the condominium, including building types, architectural style and the size of the units for those phases of the condominium which are required to be built. Under the applicable provisions of the declaration or such other legally enforceable and binding document, the development of the required portion of the condominium must be consistent with the overall plan, except that the declarant may reserve the right to change the overall plan or decide not to construct planned units or improvements to the common elements if the declaration sets forth the conditions required to be satisfied prior to the exercise of that right the time within which the right may be exercised, and any other limitations and criteria that would be necessary or appropriate under the particular circumstances. Such conditions, time restraints and other limitations must be reasonable in light of the overall plan for the condominium. In an expandable project, additional phases which are not required to be built may be described in the development plan in very general terms, or the declaration may provide that the declarant makes no assurances concerning the construction, building types, architectural style and size of the units, etc. of these phases. However, the minimum number of units to be built should be that which would be adequate to reasonably support the common elements. (See § 36.4864(a)(6).)

(Authority: 38 U.S.C. 3703(c)(1), 3710(a)(6))

(The Office of Management and Budget has approved the information collection requirements in this section under control number 2900–0448)

§ 36.4362 Rights and restrictions.

(a) *Declarant's rights and restrictions*—(1) *Disclosure and reasonableness of reserved rights.* Any right reserved by the declarant must be reasonable and set forth in the declaration.

(2) *Examples of reserved rights of declarant, sponsor, or affiliate of declarant which are usually unacceptable.* Binding the owners' association either directly or indirectly to any of the following agreements is not acceptable unless the owners' association shall have a right of termination thereof which is exercisable without penalty at any time after transfer of control, upon not more than 90 days' notice to the other party thereto:

(i) Any management contract, employment contract or lease of recreational or parking areas or facilities.

(ii) Any contract or lease, including franchises and licenses, to which a declarant is a party.

(iii) The requirements of paragraphs (a)(2)(i) and (ii) of this section do not apply to acceptable ground leases.

(3) *Examples of reserved rights which are usually acceptable.* The following rights in the common elements may usually be reserved by the declarant for a reasonable period of time, subject to a concomitant obligation to restore:

(i) Easement over and upon the common elements and upon lands appurtenant to the condominium for the purpose of completing improvements for which provision is made in the declaration, but only if access thereto is otherwise not reasonably available.

(ii) Easement over and upon the common elements for the purpose of making repairs required pursuant to the declaration or contracts of sale made with unit purchasers.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005663

(iii) Right to maintain facilities in the common areas which are identified in the declaration and which are reasonably necessary to market the units. These may include sales and management offices, model units, parking areas, and advertising signs.

(Authority: 38 U.S.C. 3704(c)(1), 3710(a)(6))

(b) *Owners' association's rights and restrictions*—(1) *Right of entry upon units and limited common elements.* The owners' association shall be granted a right of entry upon unit premises and any limited common elements to effect emergency repairs, and a reasonable right of entry thereupon to effect other repairs, improvements, replacement or maintenance as necessary.

(2) *Power to grant rights and restrictions in common elements.* The owners' association should be granted other rights, such as the right to grant utility easements under, through or over the common elements, which are reasonably necessary to the ongoing development and operation of the project.

(3) *Responsibility for damage to common elements and units.* A provision may be made in the declaration or bylaws for allocation of responsibility for damages resulting from the exercise of any of the above rights.

(4) *Assessments*—(i) *Levy and collection.* The declaration or its equivalent shall describe the authority of the owners' association to levy and enforce the collection of general and special assessments for common expenses and shall describe adequate remedies for failure to pay such common expenses. The common expenses assessed against any unit, with interest, late charges, costs and a reasonable attorney's fee shall be a lien upon such unit in accordance with applicable law. Each such assessment, together with interest, late charges, costs, and attorney's fee, shall also be the personal obligation of the person who was the owner of such unit at the time the assessment fell due. The personal obligation for delinquent assessments shall not pass to successors in title or interest unless assumed by them, or required by applicable law. Common expenses as used in this subdivision shall mean expenditures made or liabilities incurred by or on behalf of the owners' association, together with any assessments for the creation and maintenance of reserves.

(ii) *Reserves and working capital.* There shall be in new or proposed condominium projects (including conversions) a provision for an adequate reserve fund for the periodic maintenance, repair and replacement of the common elements, which fund shall be maintained out of regular assessments for common expenses. Additionally, a working capital fund must be established for the initial months of the project operations equal to at least a 2 months' estimated common area charge for each unit.

(iii) *Priority of lien.* Any assessment lien must be subordinate to any Department of Veterans Affairs guaranteed mortgage except as provided in § 36.4856. A lien for common expense charges and assessments shall not be affected by any sale or transfer of a unit except that a sale or transfer pursuant to a foreclosure of a first mortgage shall extinguish a subordinate lien for common expense charges and assessments which became payable prior to such sale or transfer. Any such sale or transfer pursuant to a foreclosure shall not relieve the purchaser or transferee of a unit from liability for, nor the unit so sold or transferred from the lien of, any common expense charges thereafter becoming due.

(Authority: 38 U.S.C. 3703(c)(1), (d)(3), 3710(a)(6))

(c) *Unit owners' rights and restrictions*—(1) *Obligation to pay expenses.* The declaration or equivalent document shall establish a duty on each unit owner, including the declarant, to pay a proportionate share of common expenses upon being assessed therefor by the owners' association. Such share may be allocated equally to each unit, may be proportionate to that unit's common element interest, relative size or value, or may be allocated according to any other specified criteria provided that the method chosen is equitable and reasonable for that condominium.

(2) *Voting rights.* The declaration or equivalent document shall allocate a portion of the votes in the association

AMERICAN OVERSIGHT FL-SEN-20-0201-B, 20-0202-A-005664

to each unit. Such portion may be allocated equally to each unit, may be proportionate to that unit's common expense liability, common element interest, relative size or value, or may be allocated according to any other specified criteria provided that the method is equitable and reasonable for that condominium. The declaration may provide different criteria for allocations of votes to the units on particular specified matters and may also provide different percentages of required unit owner approvals for such particular specified matters.

(3) *Ingress and egress of unit owners.* There may not be any restriction upon any unit owner's right of ingress and egress to his or her unit.

(4) *Encroachments*—(i) *Easements for encroachments.* In the event any portion of the common elements encroaches upon any unit or any unit encroaches upon the common elements or another unit as a result of the construction, reconstruction, repair, shifting, settlement, or movement of any portion of the improvements, a valid easement for the encroachment and for the maintenance of the same shall exist so long as the encroachment exists. The declaration may provide, however, reasonable limits on the extent of any easement created by the overlap of units, common elements, and limited common elements resulting from such encroachments; or

(ii) *Monuments as boundaries.* If permitted by the governing law within the jurisdiction where the project is located, the existing physical boundaries of a unit or a common element or the physical boundaries of a unit or a common element reconstructed in substantial accordance with the original plats and plans thereof become its boundaries rather than the metes and bounds expressed in the deed, plat or plan, regardless of settling or lateral movement of the building, or minor variance between boundaries shown on the plats, plans or in the deed and those of the building. The declaration should provide reasonable limits on the extent of any such revised boundary(ies) created by the overlap of units, common elements, and limited common elements resulting from such encroachments.

(5) *Right of first refusal.* The right of a unit owner to sell, transfer, or otherwise convey his or her unit in a condominium shall not be subject to any right of first refusal or similar restriction if the declaration or similar document is recorded on or after December 1, 1976. If the declaration was recorded prior to December 1, 1976, the right of first refusal must comply with § 36.4854(b)(5)(ii); Provided, however, restrictions on the basis of age or restrictions established by a State, Territorial, or local government agency as part of a program for providing assistance to low- and moderate-income purchasers shall be governed by § 36.4854(b)(5)(iv).

(Authority: 38 U.S.C. 3703(c))

(6) *Leasing restrictions.* Except as provided in this paragraph, there shall be no prohibition or restriction on a condominium unit owner's right to lease his or her unit. The following restrictions are acceptable:

(i) A requirement that leases have a minimum initial term of up to 1 year; or

(ii) Age restrictions or restrictions imposed by State or local housing authorities which are allowable under § 36.4809(e) or § 36.4854(b)(5)(iv).

(d) *Rights of action.* The owners' association and any aggrieved unit owner should be granted a right of action against unit owners for failure to comply with the provisions of the declaration, bylaws, or equivalent documents, or with decisions of the owners' association which are made pursuant to authority granted the owners' association in such documents. Unit owners should have similar rights of action against the owners' association.

(Authority: 38 U.S.C. 3703(c)(1), 3710(a)(6))

§ 36.4363 Miscellaneous legal requirements.

(a) *Declarant transfer of control of owners' association*—(1) *Standards for transfer of control.* The declarant shall relinquish all special rights, expressed or implied, through which the declarant may directly or indirectly control, direct, modify, or veto any action of the owners' association, its executive board, or a majority of unit owners,

Dominick and Dawn,

Thank you both very much for your emails and I hope you are having a nice start to your week. I appreciate you sharing this information and by way of a separate email I am asking my team to look into this issue and advise. I share your concerns and desire to rectify any barrier to housing that may exist for our servicemembers and their families. I wanted to provide you with my department email address in case you have any additional information you would like to provide as we research this issue: BurgessD@fdva.state.fl.us.

Subject: VA Benefits

Danny Burgess Executive Director of Veterans Affairs
35358 State Road 54
Zephyrhills Fl. 33541

Dear Director,
Please let me take this opportunity to introduce myself. My name is Dominick Scannavino President of the Council of Neighborhood Associations (CONA) and a Delegate with the Community Association Institutes Florida Legislative Alliance (CAI-FLA). I met you several times while you were in the legislature and a recent West Pasco Republican Club dinner.
During our groups visit to Tallahassee last week, among the thirty legislators we met with, we met with Senator Brandes. Our discussion was confined to common interest communities. During that conversation the topic of Veterans came up. Apparently Veterans desirous of obtaining a V.A. Loan to purchase a condominium and in certain Home Owner associations are disqualified because of a first right of refusal language in the associations governing documents placed by developers while they were or are in control of the associations. After control of the association is turned over to the membership the documents can be amended, however it would require a super majority of the membership to change the documents which is almost an impossible task. Senator Brandes indicated that if we could find the wording necessary to present to the legislature this would be a tremendous accomplishment.
Subsequent our meeting with Senator Brandes I met with Representative Sprowls, who I dearly support, and presented this very delicate challenge to him. Chris suggested I bring this matter to you for guidance and help.
I will also contact Congressman Bilirakis for his guidance as well.
Director I'm sure you agree that giving a life time service to our Country by our Vet's, only to be turned down for a benefit Veterans rightly deserve is a travesty.
I look forward to speaking with you regarding this most urgent matter.

Dear Senator Brandes,
Several other members from the American Advertising Federation (AAF) - Tampa Bay and I will be visiting Tallahassee with other AAF members from around the State on November 5th for “Advertising Day.” The AAF has chapters across the United States, and Florida chapters will be sending about 50 representatives to Tallahassee to discuss our advertising interests, goals, and contributions to the Florida economy.

Our representatives from Tampa Bay would like to set up a brief appointment with you on November 5th. I can be reached by email at kate@socialforces.com and directly on my mobile phone via call or text at 813-545-8560.

Thank you in advance for your time!

Thank you so much for getting back to me. Unfortunately, our group will have already left to travel back to Tampa Bay at that time. We know Senator Brandes time is limited. Would it be possible to stop by the office earlier in the day to drop off some literature and maybe speak to you or one of the other Legislative Assistants for a few minutes? Thank you so much!

2020 Black History Month Contests

Submissions due Tuesday, January 21 by 5 pm (ET)

Volunteer Florida is thrilled to share First Lady Casey DeSantis' 2020 Black History Month Contests for Florida students and educators. This year's theme is *"Celebrating Untold Stories and Contributions of African Americans in Florida."*

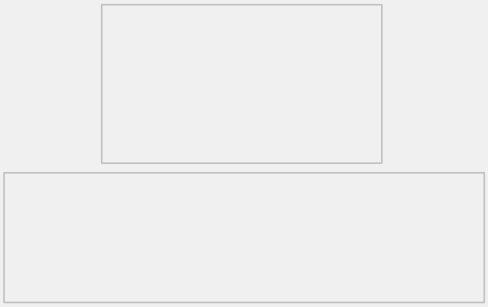
Students in grades K-3 are invited to participate in an art contest while students in grades 4-12 are invited to participate in an essay contest. Additionally, students, parents, teachers and principals are invited to nominate full-time educators of all student grades for the Black History Month Excellence in Education Award.

More information about the contests may be found below. Entries must be received by Volunteer Florida in the mail or online by Tuesday, January 21 at 5 pm (ET).

About the Student Art Contest
First Lady Casey DeSantis' Black History Month Art Contest is open to all K-3 students in Florida. Each student will submit original, two-dimensional artwork based on this year's theme. Two winners will be selected.

About the Student Essay Contest
First Lady Casey DeSantis' Black History Month Essay Contest is open to all 4-12 students in Florida. Each student will submit one essay no longer than 500 words based on this year's theme. Three winners will be selected: one elementary school student (grades 4-5), one middle school student (grades 6-8) and one high school student (grades 9-12). Each winner will receive a 4-Year Florida College Plan scholarship provided by the Florida Prepaid College Foundation.

About the Excellence in Education Award
First Lady Casey DeSantis' Black History Month Excellence in Education Award Contest is open to all full-time educators in an elementary, middle, or high school in Florida. Three winners will be selected: one elementary school teacher (grades K-5), one middle school teacher (grades 6-8) and one high school teacher (grades 9-12). Nominations may be submitted by a principal, teacher, parent/guardian or student.



Contest Entries and Nominating Forms and Guidelines
Student contest forms and educator nomination forms must be mailed to Volunteer Florida or submitted online at www.FloridaBlackHistory.com.

Volunteer Florida
Black History Month Committee
1545 Raymond Diehl Road, Suite 250
Tallahassee, Florida 32308

All entries must be received by 5 pm (ET) on Tuesday, January 21, 2020.

AMERICAN OVERSIGHT

Volunteer Florida thanks Florida Prepaid College Foundation and the Florida Lottery for sponsoring the 2020 Black History Month Contests.

About Volunteer Florida

Volunteer Florida is Florida's lead agency for volunteerism and national service, administering more than $43 million in federal, state and local funding to deliver high-impact national service and volunteer programs in Florida. Volunteer Florida promotes and encourages volunteerism to meet critical needs across the state. Volunteer Florida also serves as Florida's lead agency for volunteers and donations before, during and after disasters. For more information, please visit www.volunteerflorida.org.

Introducing Volunteer Connect

Volunteer Florida is proud to introduce Volunteer Connect, the State of Florida's official volunteer opportunities platform. Volunteer Connect serves as an intermediary between 501(c)(3) organizations and governmental entities that mobilize volunteers and Floridians who are interested in engaging in community service. To learn more or to find a volunteer opportunity in your community, please click here.

Subject: REMINDER: CELEBRATING 100 YEARS OF WOMEN'S SUFFRAGE
Attachment(s): "Keep Roaring On - 1920-2020.png"

Good afternoon!

On Wednesday, February 12, I will host***Keep Roaring On: 1920 – 2020***, a celebration of the 100th anniversary of women's suffrage in the United States.

Keep Roaring On: 1920 – 2020 will honor the significant contributions of women to the State of Florida and I will recognize the outstanding achievements of distinguished women with Edna Giles Fuller Awards. Edna Giles Fuller was the first female member of the Florida House of Representatives. She served two terms from 1929-1933 and championed women's suffrage and the right for women to serve on juries.

Please join us from **8:00 – 10:00 AM on the 22nd floor of the Florida Capitol on Wednesday, February 12** for this wonderful celebration of women and women's rights (and an excellent kosher breakfast)! The ceremony will be followed by a tour of the Historic Capitol's brand new women's suffrage exhibit. Feel free to share the attached graphic and post it to your social media feeds.

Please direct all questions and RSVPs to my Legislative Assistant, Jack Anderson, atJack.Anderson@myfloridahouse.gov.

I looks forward to seeing you there!

—

INTRODUCTORY SECTION

AMERICAN OVERSIGHT

December 20, 2019

The Honorable Ron DeSantis, Governor
The Honorable Bill Galvano, President of the Senate
The Honorable Jose Oliva, Speaker of the House of Representatives

To Governor DeSantis, President Galvano, and Speaker Oliva:

We are pleased to submit the Florida Lottery's (Lottery) Comprehensive Annual Financial Report (CAFR) for the fiscal years ended June 30, 2019, and 2018 in accordance with Section 24.123, Florida Statutes (F.S.). This report is prepared in accordance with generally accepted accounting principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB).

Lottery management is responsible for the accuracy and completeness of all data and disclosures in this report. To the best of our knowledge, the information presented is accurate and complete in all material respects and fairly depicts the financial activities and position of the Lottery.

The Auditor General has issued an opinion on the Lottery's financial statements for the fiscal years ended June 30, 2019, and 2018. The independent auditor's report is located at the front of the financial section of this report. Also, the Auditor General has issued an opinion on internal control over financial reporting for the fiscal year ended June 30, 2019, which is located after the statistical section of this report.

Management's Discussion and Analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview, and analysis of the basic financial statements. The MD&A complements this letter of transmittal and should be read in conjunction with it.

PROFILE OF THE LOTTERY

The operation of the Lottery by the State of Florida was authorized by a constitutional amendment approved by Florida voters in November of 1986. The Lottery was established as a state agency in 1987 with the enactment of the Florida Public Education Lottery Act, as amended, the purpose of which is to implement Section 15, Article X of the Florida Constitution. The Lottery's mission is to maximize revenues for the enhancement of public education while upholding the highest standards of integrity and public trust.

The Lottery is included within the financial reporting entity of the State of Florida as an enterprise fund. The fund is operated in a manner similar to a private business enterprise.

During its 31 years of operation, the Lottery has offered a variety of Scratch-Off and Draw game products and promotions, which have generated over $110.4 billion in revenues. Since inception, the Lottery has transferred approximately $35.5 billion to education. In fiscal year ended June 30, 2019, the Lottery had its eighth consecutive all-time record-breaking sales year of approximately $7.15 billion which provided more than $1.92 billion in contributions to education.

To date the Lottery has introduced more than 1,100 new Scratch-Off games and continues to market approximately 40 new games each year. The portfolio of games offered at any given time provides a wide range of play styles, game themes, and price points to appeal to a wide range of players. Prizes have included free tickets, merchandise, vacations, and jackpots of up to $15 million. With the exception of fiscal year 2009 during the height of the Great Recession, Scratch-Off

AMERICAN OVERSIGHT

sales have increased annually over the past 19 years. Scratch-Off sales surpassed $4.93 billion in fiscal year 2018-19. The Lottery has had measurable success strategically launching several "families of games" and has highlighted several key Scratch-Off games in its total advertising efforts. Product placement initiatives focused on increased facings/footprint at the point-of-sale.

Terminal games were expanded to include a $5 price point for the FAST PLAY™ game with two $5 games released in fiscal year 2018-19. In January of 2019, JACKPOT TRIPLE PLAY™ was introduced, which replaced LUCKY MONEY™. The Lottery currently offers the following Terminal games: FLORIDA LOTTO®, FANTASY 5®, PICK 2™, PICK 3™, PICK 4™, PICK 5™, LUCKY MONEY™, POWERBALL®, MEGA MILLIONS®, FAST PLAY, and CASH4LIFE™. FLORIDA LOTTO, FANTASY 5, LUCKY MONEY, and JACKPOT TRIPLE PLAY are pari-mutuel games in which the actual prize amounts depend on the sales and the number of winners for the draws. Prizes are divided among the winners in each prize category. POWERBALL, MEGA MILLIONS, and CASH4LIFE are set prize payout games except that the jackpot is shared among winners in all participating states. PICK 2, PICK 3, PICK 4, PICK 5, MILLIONAIRE RAFFLE™, and FAST PLAY are set prize payout games. The Lottery also offers add-on features, such as EZmatch™, Power Play®, Megaplier®, XTRA, and Combo™ in conjunction with certain games to increase a player's prize amount for additional dollars.

The Lottery's budget is prepared using the processes set forth in Chapter 216, F.S. The budgetary process for state agencies is outlined in the Other Required Supplementary Information Section of the State of Florida's CAFR or publications of the State of Florida Department of Financial Services, Office of the Chief Financial Officer.

ECONOMIC CONDITION AND FINANCIAL INFORMATION

The main economic factors affecting lottery sales are population growth, personal income growth and employment. Based on the July 2019 Florida Economic Estimating Conference (Conference), Florida's population is forecasted to increase 1.658% and 1.573% for the fiscal years ending June 30, 2020, and 2021, respectively. Additionally, the Conference produced forecasts for real personal income growth of 4.7% and 4.4%, for the fiscal years ended June 30, 2020, and 2021, respectively, while total non-farm employment is forecasted to increase by 2.1% and 1.5%, respectively. According to the Conference, Florida's unemployment rate of 3.4% in February was lower than the nation as a whole. Florida's unemployment rate is now below the "full employment" unemployment rate (assumed to be 4%).

ACCOUNTING SYSTEMS AND POLICIES

As an enterprise fund of the State of Florida, the Lottery operates as a business within the state government structure. The Lottery uses the accrual basis of accounting, following GAAP and GASB pronouncements.

INTERNAL CONTROLS

The Lottery maintains a system of internal controls to safeguard assets, prevent fraud and abuse, and ensure the accuracy of financial information. Employee, retailer, and contractor standards are in place to minimize risk of loss or theft. There are inherent limitations with internal controls. Because the cost of an internal control should not exceed the benefits derived from it, the objective is to provide reasonable, rather than absolute assurance, that the financial statements are free of any material misstatements. A second inherent limitation of internal control is the risk of management override due to their levels of access. In addition, internal controls are primarily designed to prevent one individual from being able to steal assets, commit fraud or abuse, or to manipulate the financial records of an entity. Some internal controls can be circumvented when two or more employees collude together.

DEBT ADMINISTRATION

Long-term liabilities are primarily installment payments owed to certain prize winners. Prize liabilities are funded by investments in U.S. Treasury Strips. These liabilities are paid as the securities mature (refer to Note 2 and Note 7 to the financial statements for additional details).

CASH MANAGEMENT

Cash from retailers is collected on a weekly basis through electronic funds transfer and is deposited into the Lottery's bank account. Cash balances are used to fund daily operations, including prize and vendor payments. Surplus cash is

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005685

maintained in the State Treasury's general pool of investments (refer to Note 2 to the financial statements for additional details).

MAJOR INITIATIVES

The Lottery continuously works on new ways to attract players and increase sales to supports its goal of maximizing contributions to enhance education. Some of the strategies that we continue to actively pursue are:

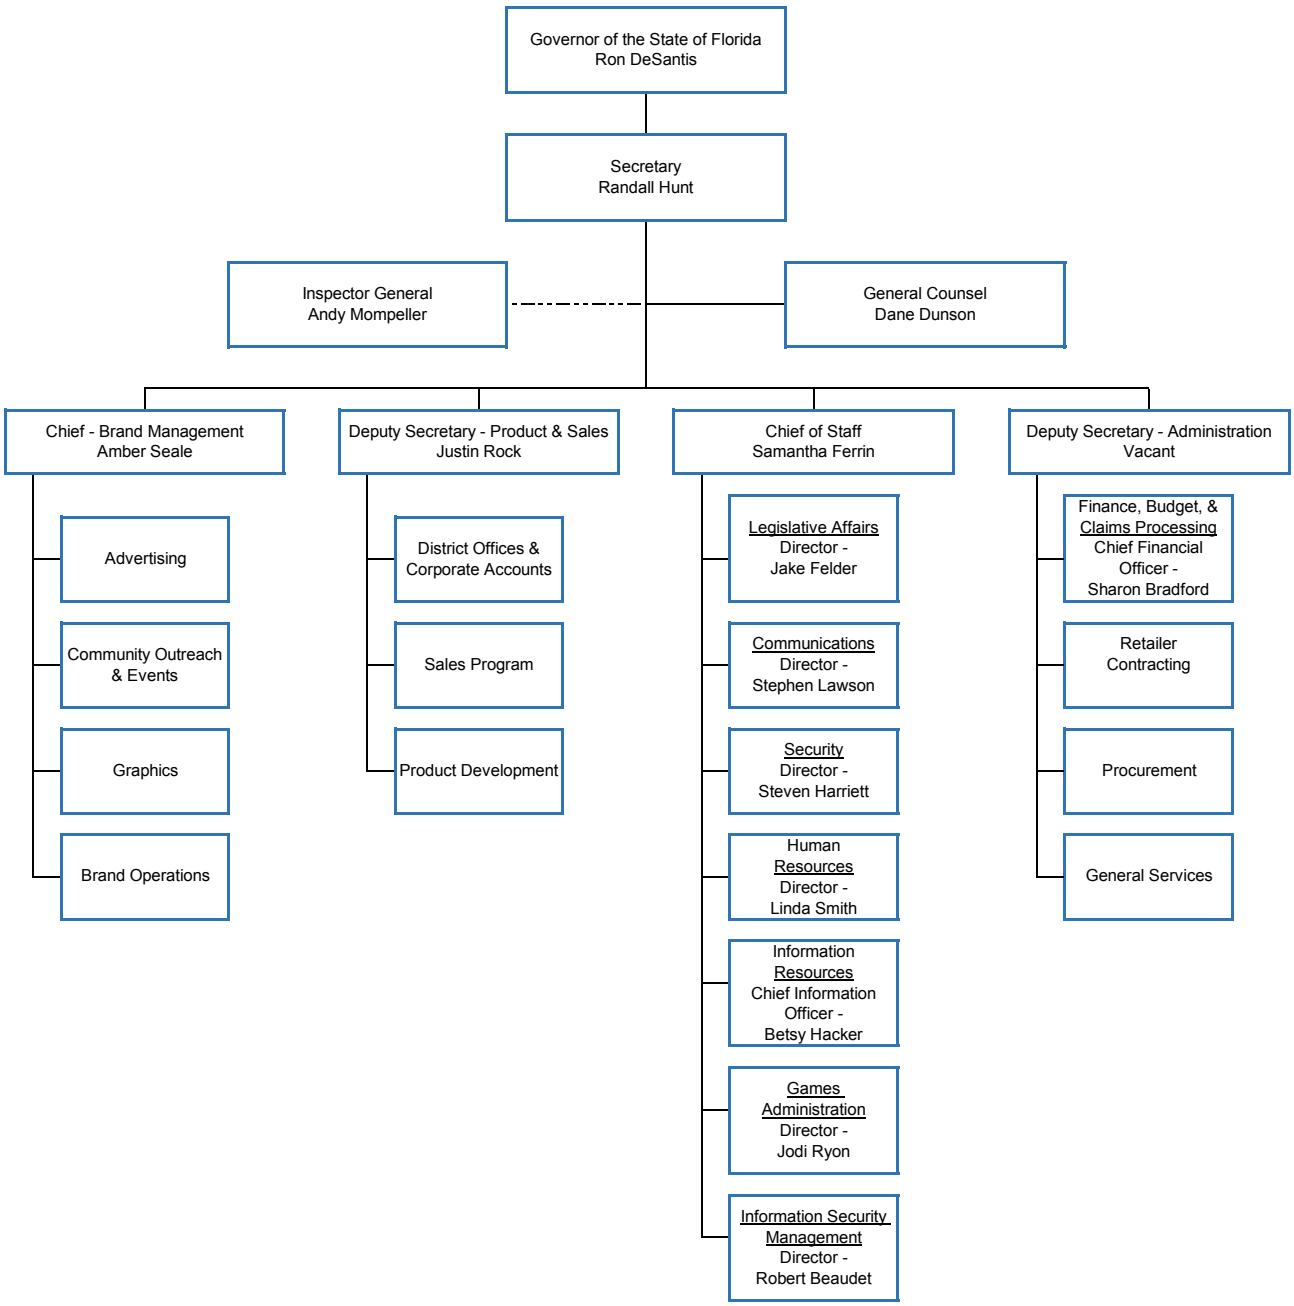
- Increase the Lottery's player base with innovative new products;
- Refresh the Lottery brand through innovative approaches to technology;
- Improve market penetration through recruitment and diversification of the Lottery's retailer network; and
- Maximize the effectiveness of the Lottery through execution of best practices.

AWARDS AND ACKNOWLEDGMENTS

The Government Finance Officers Association (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Lottery for its CAFR for the fiscal year ended June 30, 2018. This was the second year that the Lottery achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both GAAP and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and are submitting it to the GFOA to determine its eligibility for another certificate.

Preparation of the CAFR requires a significant investment of time and resources and would not be possible without the efficient and dedicated efforts of our accounting staff. Their remarkable efforts make this report possible.



Respectfully submitted,

Randall Hunt,	Sharon Bradford,	Gina Ballard, CPA,
Secretary	Chief Financial Officer	Accounting Director

INDEPENDENT AUDITOR'S REPORT

Report on the Financial Statements

We have audited the accompanying financial statements of the Department of the Lottery (Lottery), an enterprise fund of the State of Florida, as of and for the fiscal years ended June 30, 2019, and June 30, 2018, and the related notes to the financial statements, which collectively comprise the Lottery's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005691

policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above, present fairly, in all material respects, the respective financial position of the Lottery as of June 30, 2019, and June 30, 2018, and the respective changes in financial position and cash flows, for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 1, the financial statements of the Lottery present the financial position, the changes in financial position, and cash flows of only that portion of the business-type activities and major funds of the State that is attributable to the transactions of the Lottery. These financial statements do not purport to, and do not, present fairly the operations of the State of Florida as of June 30, 2019, and June 30, 2018, or the changes in its financial position and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that **MANAGEMENT'S DISCUSSION AND ANALYSIS** (pages 17 through 25) and schedules of the Lottery's proportionate share of the net pension liability and contributions (pages 60 through 63) and the Lottery's proportionate share of the other postemployment benefits liability (page 64) be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Lottery's basic financial statements. The Introductory Section, on pages 5 through 10, and the Statistical Section, on pages 65 through 91, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005692

The Introductory and Statistical Sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by *Government Auditing Standards*

In accordance with auditing standards generally accepted in the United States of America and applicable *Government Auditing Standards*, we have also issued our report dated December 20, 2019, on our audit of the Lottery's internal control over financial reporting, and on our tests of the Lottery's compliance with certain provisions of laws, rules, regulations, contracts, and other matters included under the heading **INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS***. The purpose of that report is to describe the scope of our testing of the Lottery's internal control over financial reporting as of June 30, 2019, based on criteria established in the *Internal Control – Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission, and to express an opinion on the effectiveness of the Lottery's internal control over financial reporting. With respect to compliance, the purpose of that report is not to provide an opinion on compliance, but rather to describe the scope of our testing of compliance and the results of that testing. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Lottery's internal control over financial reporting and compliance.

Respectfully submitted,

MANAGEMENT'S DISCUSSION AND ANALYSIS

The information presented in the Management's Discussion and Analysis (MD&A) introduces the Florida Lottery's (Lottery) financial statements and provides readers an analytical overview of the Lottery's financial activities and performance for the fiscal years ended June 30, 2019, and 2018. We encourage readers to consider the information presented here in conjunction with the transmittal letter beginning on page 6 of this report and Lottery's financial statements and notes to the financial statements, which begin on page 26.

Financial Highlights

The Lottery has as its mission the maximization of revenues for the benefit of education in a manner consistent with the dignity of the State of Florida and the welfare of its citizens. The Lottery is considered a mature lottery and offers its players a full range of both Scratch-Off and Draw products. The Lottery has been successful in sustaining ticket sales in excess of $2 billion for the thirtieth consecutive fiscal year, with the past seven fiscal years exceeding $5 billion. During the same thirty year period, the transfer to the Educational Enhancement Trust Fund (EETF) has been a minimum of $800 million annually, with the fiscal year 2019 transfer exceeding $1 billion for the seventeenth consecutive year.

For the fiscal year ended June 30, 2019:

- Transfers to the EETF were approximately $1.93 billion this fiscal year compared to $1.76 billion in the prior fiscal year.
- The Lottery's ticket sales increased by 6.72 percent over the prior fiscal year from approximately $6.70 billion to $7.15 billion.
- Approximately 69.05 percent of total sales were provided by the Scratch-Off product line which decreased 0.38 percent from the prior fiscal year. The 0.38 percent decrease in Scratch-Off sales as a percentage of total sales as compared to the prior fiscal year was primarily due to record sales of Draw products.
- Prize expense increased $244.09 million, which represents a 5.55 percent increase during fiscal year 2019. The Lottery has the authority to vary the prize expense in order to maximize transfers. This expense typically increases or decreases in proportion to ticket sales and represented approximately 64.86 percent of ticket sales.
- The gaming vendors' fees and retailer commissions are based on sales and therefore fluctuate in direct correlation with sales revenue. Fiscal year 2019 expenses for these items increased 6.83 percent over the prior fiscal year expenses in conjunction with the increase in sales.
- Administrative operating expenses, which include advertising, salaries and benefits, rent, utilities and maintenance, professional fees, depreciation, and other administrative expenses, experienced an increase of approximately $994,000. Administrative operating expenses for fiscal years 2019 and 2018 were $82.20 million and $81.20 million, respectively.
- Nonoperating income increased $37.71 million over the prior fiscal year. The increase was primarily due to an increase of $34.28 million in net appreciation (depreciation) in fair value of investments.
- EETF transfers from unclaimed prize money increased $12.48 million over the prior fiscal year. This increase was primarily due to the closing of two Scratch-Off games with unclaimed amounts exceeding $7.0 million each.

Overview of the Financial Statements

The Lottery is accounted for as an enterprise fund, reporting transactions using the accrual basis of accounting similar to the method used by business entities. This MD&A is intended to serve as an introduction to the Lottery's basic financial statements, including the notes to the financial statements. The Statements of Net Position on page 26, the Statements of Revenues, Expenses, and Changes in Net Position on page 28, and the Statements of Cash Flows on page 29 report the Lottery's net position and changes therein. The notes to the financial statements provide additional information that is essential to a reader's understanding of the data provided in the financial statements. This report also includes supplementary information intended to furnish additional detail to support the basic financial statements themselves.

The Lottery transfers its net profits each fiscal year to the EETF. As a result, the Lottery's net position consists of funds invested in capital assets, unrestricted net position, and restricted net position. Unrestricted net position consists of liabilities for which no cash payments will be made. The restricted net position consists of the investments being held by the Lottery to fund deferred prize payouts, 20 percent of unclaimed prizes designated for future prize payouts or promotions, and the Multi-State Lottery Association (MUSL) deposit amounts. The financial statements do include the cumulative effect of periodic adjustments to recognize the fair value of the grand prize investments despite the fact that the Lottery purchased the investments with the intention of holding the investments until maturity in order to meet the future obligations and, therefore, would not realize any gains or losses related to these investments for distribution as net proceeds.

Summary of Net Position

Table 1 presents a comparative summary of the Lottery's Statements of Net Position for fiscal years 2019, 2018, and 2017.

Table 1 - Condensed Statements of Net Position
As of June 30, 2019, 2018, and 2017

Financial Analysis

Assets

Total assets at the end of fiscal year 2019 increased $52.85 million from $598.68 million at June 30, 2018, to $651.53 million at June 30, 2019. At the end of fiscal year 2018, total assets were $20.84 million more than the $577.84 million at the end of fiscal year 2017.

- The increase in total assets in from 2018 to 2019 is primarily related to an increase of $40.24 million of investments in the State Treasury.
- The increase in total assets in 2018 over 2017 is primarily related to an increase of $13.14 million of cash in the State Treasury.

Deferred Outflows of Resources

Total deferred outflows of resources as of June 30, 2019, were $11.97 million reflecting an increase of $723,000 over the June 30, 2018, amount of $11.25 million. At the end of fiscal year 2018, deferred outflows increased $1.37 million over June 30, 2017, which was $9.87 million for pension and other postemployment benefits related items (refer to Note 9 to the financial statements for additional details).

Liabilities

Total liabilities at June 30, 2019, were $569.84 million, which was approximately $14.73 million higher than the total liabilities of $555.11 million at June 30, 2018. The total liabilities at June 30, 2018, were $46.80 million higher than the June 30, 2017, amount of $508.31 million.

- Current liabilities increased by $18.19 million from June 30, 2018, to June 30, 2019. This increase can be primarily attributed to the increase of $11.19 million for the amount owed to prizewinners.
- Noncurrent liabilities principally consist of the long-term portion of grand prizes payable, which represents the amount to be paid to grand prizewinners in future years. Correlative to current grand prizes payable, the long-term grand prizes payable increased $12.16 million from $229.66 million at June 30, 2017, to $241.82 million at June 30, 2018. The purchase of $23.42 million in investments related to winners who chose installment payments for grand prizes contributed to this increase.

Deferred Inflows of Resources

Total deferred inflows of resources as of June 30, 2019, were $9.09 million reflecting an increase of $2.51 million over the June 30, 2018, amount of $6.58 million. At the end of fiscal year 2018, deferred inflows increased $5.57 million over June 30, 2017, which was $1.01 million for pension and other postemployment benefits related items (refer to Note 9 to the financial statements for additional details).

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005697

Net Position

Net position increased $36.33 million from June 30, 2018, to June 30, 2019. Net position at June 30, 2019, 2018, and 2017 were $84.56 million, $48.24 million, and $78.40 million, respectively.

- The $36.33 million increase in net position at June 30, 2019, is primarily due to a $12.22 million increase in the amount of restricted cash and cash equivalents for future prize promotions and a $19.28 million increase in the amount restricted for undistributed appreciation on restricted investments due to an increase in net appreciation (depreciation) in fair value of investments.
- The $30.16 million decrease in net position at June 30, 2018, is primarily related to a prior period adjustment of $24.62 million for the implementation of Governmental Accounting Standards Board (GASB) Statement No. 75 which relates to postemployment benefits other than pensions. (Refer to Note 9 to the financial statements for further details.)

The Lottery joined MUSL ten years ago in order to participate in the Powerball® with Powerplay® game and on May 15, 2013, the Lottery began participating in Mega Millions® with Megaplier®. In accordance with MUSL's rules, the Lottery must contribute to various prize reserve funds maintained by MUSL for unforeseen prize payouts related to the Powerball with Powerplay and Mega Millions with Megaplier games. The Lottery's deposits in reserve funds with MUSL totaled $33.75 million and $26.68 million as of June 30, 2019, and June 30, 2018, respectively. (Refer to Note 6 to the financial statements for further details.)

Summary of Revenues, Expenses, and Changes in Net Position

The most important element demonstrated with the Lottery's financial statements is the transfer to the EETF. Accordingly, the primary focus of these financial statements is determining net income available for transfer, rather than the change in net position of the Lottery, which primarily reflects the changes in fair value of restricted investments.

Table 2 presents the Condensed Statements of Revenues, Expenses, and Changes in Net Position for the fiscal year ended June 30, 2019, and the prior fiscal years ended June 30, 2018, and June 30, 2017, as derived from the Lottery's Statements of Revenues, Expenses, and Changes in Net Position.

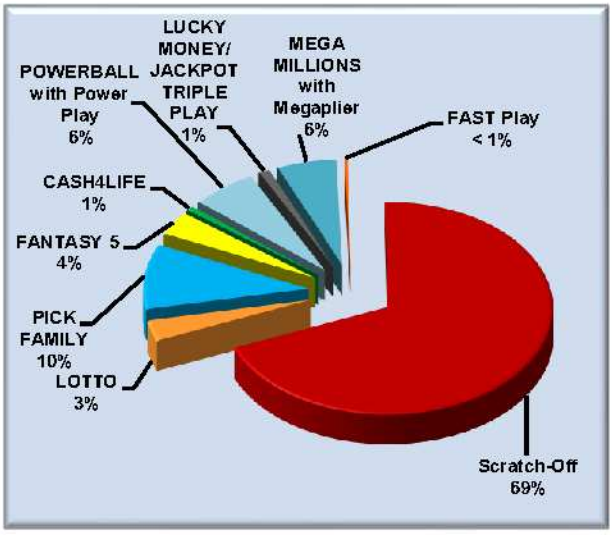
Financial Analysis

Sales

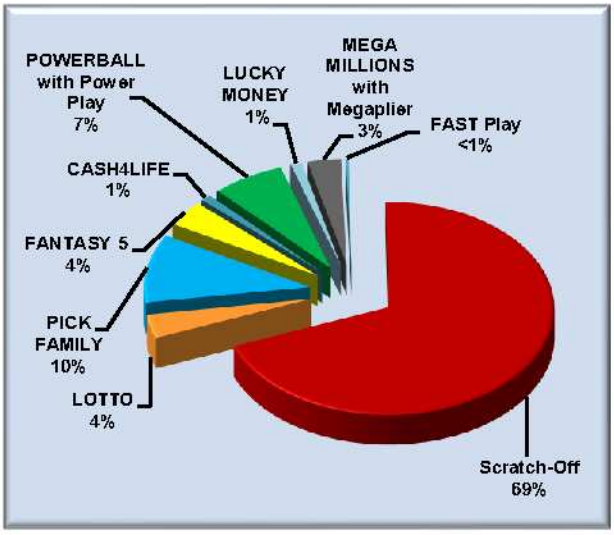
Total sales for the fiscal year 2019 increased $450.43 million from $6.70 billion for the fiscal year 2018, to $7.15 billion for fiscal year 2019. At the end of fiscal year 2018, total sales were $544.33 million more than the $6.16 billion for the fiscal year 2017.

- Scratch-Off sales increased by $285.48 million in fiscal year 2019. The introduction of the Gold Rush Classic family of games and the Gold Rush Special Edition $30 ticket contributed $1.19 billion to sales, and the Monopoly™ Jackpot family of games contributed $622.01 million. Draw Game sales increased by $164.94 million in fiscal year 2019. The increase was primarily related to an increase in Mega Millions sales of $196.34 million over the prior year with a jackpot that reached $1.54 billion in October 2018.
- The increase in ticket sales from fiscal year 2017 to fiscal year 2018 include Mega Million sales which increased $73.24 million for a growing jackpot that reached $451 million in January 2018. A $30 Scratch-Off ticket was introduced in February 2018 with sales reaching $352.34 million in fiscal year 2018.



AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005699



Bad debt expense is reported as a reduction in gross revenue in accordance with GASB requirements. The amount of bad debt expense for the fiscal years ended June 30, 2019, 2018, and 2017, was $1.04 million, $1.16 million, and $1.07 million, respectively.

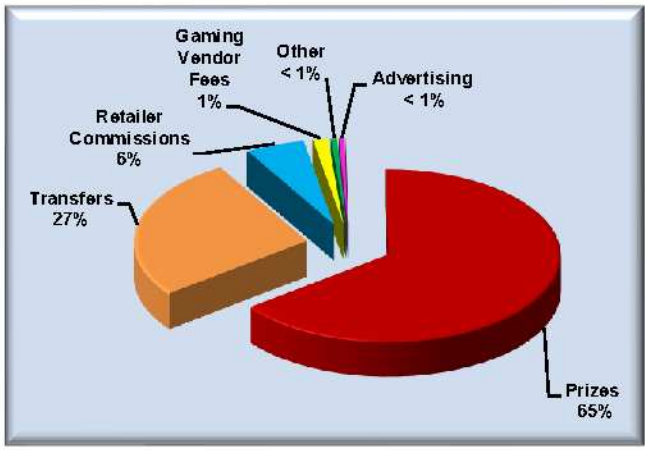
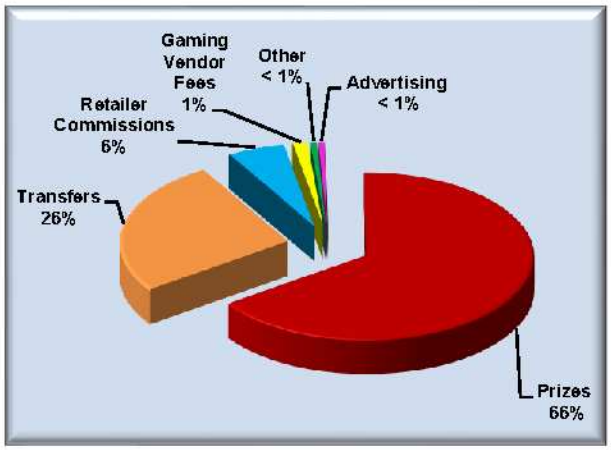
Expenses



Section 24.121, Florida Statutes, stipulates that funds remaining in the Operating Trust Fund after the transfer to the EETF shall be used for the payment of administrative expenses of the Lottery. These expenses include Draw game expenses, Scratch-Off ticket expenses, advertising, and other expenses required for the day-to-day operations of the Lottery.

AMERICAN OVERSIGHT



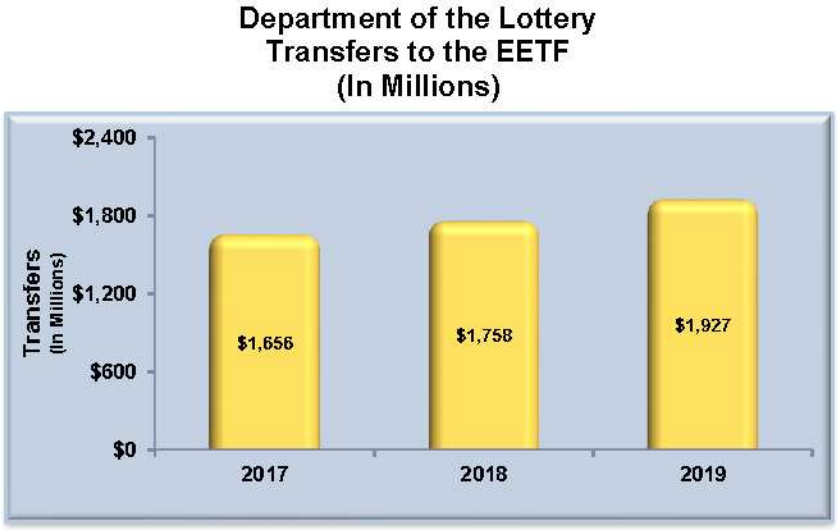
FL-SEN-20-0201-B, 20-0202-A-005701

The following charts show the major components of Lottery operating expenses and transfers as a percentage of ticket sales for the 2019 and 2018 fiscal years:

Operating Expenses and Transfers Fiscal Year 2018-19

Operating Expenses and Transfers Fiscal Year 2017-18

Prizes, commissions, and gaming vendor fees are directly related to sales and fluctuate accordingly. In fiscal year 2019, these expenses changed proportionally; yet as a percentage of total expenses they remained constant. The other expenses, which consisted of advertising, salary and benefits, professional fees, rent, maintenance, and depreciation, increased slightly. Fiscal year 2019, 2018, and 2017 administrative expenses were $82.20 million, $81.20 million, and $80.80 million, respectively.



Transfers

Since its inception, the Lottery's total transfers to the EETF were $35.47 billion. The Lottery's contribution to the EETF for fiscal year ended June 30, 2019, was $1.93 billion. The Lottery has contributed over $1 billion for the seventeenth consecutive year.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005702

The following chart shows the total transfers to the EETF for the past three years:

Economic Factors and Future Impacts

The main economic factors affecting lottery sales are population growth, personal income changes, tourism, and competition for discretionary consumer spending. Florida's unemployment rate dropped from 3.8 percent in fiscal year 2018 to 3.4 percent during fiscal year 2019. In fiscal year 2019, Lottery sales exceeded $7.15 billion, setting new sales records for Draw, Scratch-Off, and total game sales. The Lottery's strategies have revolved around enhancing Draw and Scratch-Off games, increasing retailer penetration in the State, and refreshing the Lottery's brand.

Financial Contact

The Lottery's financial statements and this MD&A are designed to give a general overview to the reader. If you have any questions regarding this report or require additional information, please contact the State of Florida, Department of the Lottery, Director of Accounting, 250 Marriott Drive, Capitol Complex, Tallahassee, Florida 32399.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005707

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Reporting Entity

The State of Florida, Department of the Lottery (the Lottery) was established as a State agency with the enactment of the Florida Public Education Lottery Act (the Act) in 1987. The purpose of the Act is "to implement Section 15, Article X of the State Constitution in a manner that enables the people of the State to benefit from significant additional moneys for education and also enables the people of the State to play the best lottery games available."

In evaluating the Lottery as a reporting entity, management has addressed all potential component units for which the Lottery may be financially accountable and, as such, be includable in the Lottery's financial statements. The Lottery is financially accountable if it appoints a voting majority of the organization's governing board and (1) it is able to impose its will on the organization or (2) there is a potential for the organization to provide specific financial benefit to or impose specific financial burden on the Lottery. Additionally, the primary government is required to consider other organizations for which the nature and significance of their relationship with the primary government is such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete. Management's analysis has disclosed no component units that should be included in the Lottery's financial statements.

B. Basis of Presentation

The Lottery is accounted for as a proprietary type enterprise fund. Enterprise funds are used to account for activities that are financed and operated in a manner similar to private business enterprises: (1) where the costs of providing goods and services to the general public on a continuing basis are to be financed through user charges; or (2) where the periodic determination of net income is considered appropriate. The Lottery is reported as an enterprise fund within the State of Florida's Comprehensive Annual Financial Report.

C. Basis of Accounting

Basis of accounting refers to when the revenues, expenses, transfers, related assets, deferred outflows of resources, liabilities, and deferred inflows of resources are recognized in the accounts and reported in the financial statements. The financial statements are prepared on the accrual basis of accounting in accordance with generally accepted accounting principles. Under this method, revenues are recognized when they are earned, and expenses are recognized when they are incurred.

The measurement focus of proprietary fund types is on a flow of economic resources method, which emphasizes the determination of net income, financial position, and cash flows. All

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005708

fund assets and liabilities, current and noncurrent, are accounted for on the Statements of Net Position.

The Lottery's operating revenues and expenses generally result from the sale and marketing of lottery tickets and the payment of related prizes. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

D. Cash and Cash Equivalents

The Lottery considers all highly liquid investments with an original maturity of three months or less when purchased to be cash equivalents. This includes cash in banks, petty cash, balances held by the State Board of Administration (SBA), and pooled investments in the State Treasury.

E. Investments

Florida Statutes authorize the Lottery to invest in certain instruments. The Lottery reports investments at fair value. Fair values for investments that are not publicly quoted are estimated by the investment custodian using independent third party pricing vendors. Details of investments are included in Note 2.

F. Allowance for Doubtful Accounts

The allowance for doubtful accounts is based on an analysis of collectability of accounts receivable, which considers the age of the accounts.

G. Inventories

Supply inventory and promotional items are valued at cost, using the first-in, first-out method. Supply inventory comprised game merchandise, prepaid postage, and prepaid tolls.

H. Prepaid Expenses

Prepaid expenses represent warranty agreements and advanced payments for services paid for during the current year but will not be consumed or used up until a future period.

I. Capital Assets

Capital assets are stated at cost less accumulated depreciation. As required by Chapter 273, Florida Statutes, a capitalization threshold of $1,000 and useful life extending beyond one year are employed for tangible personal property. The Lottery's capitalization threshold

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005709

for intangible assets is $100,000. Depreciation on all capital assets is computed using the straight-line method over the following estimated useful lives:

Data processing equipment	3 to 5 years
Office furniture and fixtures	3 to 15 years
Vehicles and other equipment	3 to 20 years
Software	3 to 15 years

When capital assets are retired or otherwise disposed of, the costs and related accumulated depreciation are removed from the accounts and any resulting gain or loss is reflected in the Statements of Revenues, Expenses, and Changes in Net Position in the period of disposal. See Note 5 for more detailed information on capital assets.

J. Deferred Outflows of Resources

A consumption of net position by the government that is applicable to a future reporting period is presented as a deferred outflow of resources. See Note 9 for more information on deferred outflows of resources.

K. Long-term Liabilities

Refer to Note 7 for information on grand prizes payable, compensated absences payable, postemployment healthcare benefits liability, and net pension liability, along with changes in long-term liabilities. Also, refer to Note 9 for additional information on net pension liability and postemployment healthcare benefits liability.

L. Compensated Absences

Employees earn the right to be compensated during absences for vacation, illness, and unused special compensatory leave earned for hours worked on legal holidays. Compensated absences for annual leave are recorded as a liability when the benefits are earned. Compensated absences for sick leave are calculated based on the vesting method. Within the limits established by law or rule, unused leave benefits are paid to employees upon separation from State service. The cost of vacation and calculated sick leave benefits is accrued in the period in which the benefits are earned. The compensated absences are based on current fiscal year-end salary rates and include employer social security and pension contributions at current rates.

M. Deferred Inflows of Resources

A deferred inflow of resources is an acquisition of net position by the government that is applicable to a future reporting period. See Note 9 for more information on deferred inflows of resources.

N. Net Position

Net position includes categories for invested in capital assets, restricted for undistributed appreciation on restricted investments, restricted for future prizes or special prize promotions,

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005710

restricted for the Multi-State Lottery Association (MUSL), and unrestricted net position resulting from liabilities for which no cash payments will be made. See Note 1.U. for more information on unrestricted net position.

The invested in capital assets category represents the investment in capital assets, recorded at cost less accumulated depreciation.

The restricted for undistributed appreciation on restricted investments category primarily represents the undistributed appreciation for all restricted asset accounts.

The restricted for future prizes or special prize promotions category represents the portion of unclaimed prize obligations legally reverted back to the Lottery and restricted for use in the payment of future prize pools or special prize promotions in accordance with Section 24.115(2), Florida Statutes.

The restricted for MUSL category represents the amount placed into reserve for the Florida Lottery by the MUSL. See Note 6 for more information on MUSL.

O. Revenue Recognition

Lottery games are sold to the public by contracted retailers. Revenue is recognized when Draw game tickets are sold to players and when books of Scratch-Off tickets are settled. Certain games include tickets that entitle the holder to exchange one ticket for another (free tickets). Such tickets are deemed to be replacements and, therefore, are not included in ticket sales.

P. Commissions

Retailers receive a commission of 5 percent on ticket sales. The commission on ticket sales for games is based upon total tickets distributed to the players (including free tickets) which, when compared to revenue, causes the percentage to be slightly higher or lower than 5 percent at any given time. Additionally, retailers are paid commissions through a 1 percent cashing bonus on redemption of tickets (including free tickets).

Q. Prizes

In accordance with the Act, variable percentages of the gross revenue from the sale of Draw and Scratch-Off lottery tickets shall be returned to the public in the form of prizes paid by the Lottery or retailers as authorized.

Prize expense for Draw games is recorded based on prizes won by the players, as revenue is recognized. Any prize that remains unclaimed at the end of a 180-day period following a draw is considered unclaimed.

Prize expense for Scratch-Off games is recorded based on the predetermined prize structure for each game, as revenue is recognized. Any prize that remains unclaimed 60 days after a Scratch-Off game is closed is considered unclaimed.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005711

Effective July 1, 2005, 80 percent of all unclaimed prize money is deposited in the Educational Enhancement Trust Fund (EETF). The remaining 20 percent of unclaimed prize money is added to the pool from which future prizes are to be awarded or used for special prize promotions and is reported as restricted for future prizes or special prize promotions.

All prizes are recorded at the actual amount except for the annuity-funded prizes, which are paid out on a deferred basis. The actual prize expense for these types of prizes is based on the present value of an annuity using the interest yield on the investments acquired to fund the annuity.

R. Self-Insurance

The Lottery participates in the various self-insurance programs established by the State of Florida for property and casualty losses and employee health insurance. Coverage includes property, general liability, automobile liability, workers' compensation, court-awarded attorney fees, and Federal civil rights actions. The property insurance program self-insures the first $2 million per occurrence for all perils except named windstorm and flood. For named windstorm and flood, the property insurance program self-insures the first $2 million per occurrence but with an annual aggregate retention of $40 million. Commercial excess insurance is purchased for losses over the self-insured retention up to $68.5 million per occurrence for named windstorm and flood losses and $225 million per occurrence for all other perils. Workers' compensation is provided to comply with the applicable law. The employee health and dental insurance program provides for payment of medical claims of employees and covered dependents. Settlements of claims did not exceed insurance coverage in each of the past three fiscal years.

S. Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, deferred outflows of resources, liabilities, deferred inflows of resources, restricted net position, revenues, and expenses, and disclosures of contingent assets and liabilities. Actual results could differ from those estimates.

T. Bad Debt Expense

Bad debt expense is reported as a reduction in gross revenue. Bad debt expense is recognized when a Lottery retailer's uncollected revenue is past due. The amount of expense is based on an accounts receivable age analysis. The bad debt expense for the fiscal years ended June 30, 2019, and June 30, 2018, was $1,041,000 and $1,158,000, respectively.

U. Unrestricted Net Position Deficit

The unrestricted net position deficits of $53,165,000 and $50,743,000 for the fiscal years ended June 30, 2019, and June 30, 2018, respectively, includes the cumulative effect of the Lottery's postemployment healthcare benefits, compensated absences, and net pension

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005712

liabilities, along with the deferred outflows of resources and deferred inflows of resources for pension and postemployment healthcare benefits related items. As a result of these items being recorded for reporting purposes only and being excluded from the calculation of transfers to the EETF, the effect is a deficit balance in unrestricted net position.

2. CASH AND INVESTMENTS

A. Cash and Cash Equivalents

Cash is held in demand deposits at various financial institutions. These deposits, with a book value of approximately $576,000 at June 30, 2019, and $9,033,000 at June 30, 2018, were insured by either the State's collateral for public deposits in accordance with Section 280.04, Florida Statutes, or Federal depository insurance.

Chapter 280, Florida Statutes, generally requires public funds to be deposited in a Qualified Public Depository, which is a bank or savings association that is designated by the State of Florida Chief Financial Officer (State CFO) as authorized to receive deposits in the State and that meets the collateral requirements. The State CFO determines the collateral requirements and collateral pledging level for each Qualified Public Depository following guidelines outlined in Section 280.04, Florida Statutes, and Chapter 69C-2, Florida Administrative Code. Collateral pledging levels include 25, 50, 110, and 150 percent of a Qualified Public Depository's average daily deposit balance or, if needed, an amount as prescribed by the State CFO. Collateral may be held by another custodian with approval of the State CFO if conditions are met that protect the State's interest. Eligible collateral includes federal, federally-guaranteed, state and local government obligations, corporate bonds, and other securities designated allowable under conditions set by the State CFO.

Florida Statutes provides that if a loss to public depositors is not covered by deposit insurance, demands of payment under any letters of credit, and the proceeds from the sale of securities pledged by the defaulting depository, the difference will be provided by an assessment levied against other Qualified Public Depositories according to a statutory based ratio.

Due to the investing policy of the Lottery, book overdrafts were approximately $3,949,000 at June 30, 2019, and $853,000 at June 30, 2018, representing outstanding prize payment checks and retailer payment checks. These outstanding checks are included as a component of prizes payable and accounts payable. The Lottery has an agreement with a financial institution to honor prize payments and retailer payments, as they are presented to the bank, up to $75 million.

Surplus cash is maintained in the State Treasury's general pool of investments. The State CFO pools funds from all State agencies. Pooled investments with the State Treasury are not registered with the Securities and Exchange Commissions. Oversight of the pooled investments with the State Treasury is provided by the Treasury Investment Council per Section 17.575, Florida Statutes. The authorized investment types are set forth in Section 17.57, Florida Statutes.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005713

The Lottery's share of this investment pool was approximately $249,551,000 and $209,309,000 at June 30, 2019, and 2018, respectively. Participants contribute to the pool on a dollar basis. These funds are commingled, and a fair value of the pool is determined from the individual values of the securities. The fair value of the securities is summed, and a total pool fair value is determined. The fair value factor is calculated by dividing the pool's total fair value by the pool participant's total cash balances. The fair value factor is the ratio used to determine the fair value of an individual participant's pool balance.

No allocation will be made as to the Lottery's share of the types of investments or their risk categories. The Lottery's share of the assets and liabilities arising from the securities lending agreements administered by the State Treasury will likewise not be carried on the Statements of Net Position since the State Treasury operates on a pooled basis and to do so may give the misleading impression that the Lottery itself has entered into such agreements. For further information, refer to the State of Florida's Comprehensive Annual Financial Report or publications of the State of Florida Department of Financial Services, Office of the Chief Financial Officer.

B. Investments, Grand Prize

The grand prize investments primarily consist of U.S. Government obligations held on the Lottery's behalf by the SBA. Grand prize investments and related grand prizes payable are not presented in current assets or liabilities. They are not part of current operations but instead are restricted assets and liabilities that are held by the Lottery for grand prize winnings to be paid on a deferred basis if the cash payment option is not selected.

Grand prize investments are shown at fair value, and the related grand prizes payable are adjusted to the net present value using the yield on the investments. The difference between the fair value of the investments and the net present value of the grand prizes payable is reflected as restricted for undistributed appreciation on restricted investments in net position. This represents the unrealized gains on the investments. Because these investments are held restrictively for grand prizewinners, this balance is not available for transfer to the EETF.

Interest accreted on grand prize investments during the year is reflected as an increase in the carrying value of grand prizes payable on the Statements of Net Position, and as a nonoperating revenue (expense) on the Statements of Revenues, Expenses, and Changes in Net Position. Net appreciation (depreciation) in fair value of investments is reflected as a nonoperating revenue (expense) on the Statements of Revenues, Expenses, and Changes in Net Position, and includes all changes in fair value that occurred during the year, including purchases, maturities, and sales.

C. Investment Credit Risk

Lottery grand prizewinner investments have been limited to U.S. Government guaranteed securities.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005714

The State Treasury Investment Pool's current rating by S&P was AA-f as of June 30, 2019.

D. Investment Interest Rate Risk

The investment policy objective is to match maturities of investments with the maturities of the Lottery prizewinner annuities. Therefore, investments are held to maturity after they are purchased thereby eliminating interest rate risk. Listed below are the Lottery's investments in U.S. Treasury Strips (in thousands):

As of June 30, 2019		As of June 30, 2018	
Time to Maturity	**Fair Value**	**Time to Maturity**	**Fair Value**
< 1 year	$ 22,078	< 1 year	$ 21,713
> 1 year to 3 years	43,108	> 1 year to 3 years	41,798
> 3 years to 5 years	42,433	> 3 years to 5 years	39,445
> 5 years to 10 years	98,907	> 5 years to 10 years	92,260
> 10 years to 15 years	54,716	> 10 years to 15 years	58,979
> 15 years to 20 years	21,633	> 15 years to 20 years	19,690
> 20 years to 25 years	13,294	> 20 years to 25 years	12,937
> 25 years	5,607	> 25 years	4,485
Total	**$ 301,776**	**Total**	**$ 291,307**

The effective duration of the State Treasury Investment Pool at June 30, 2019, and June 30, 2018, was approximately 2.71 years and 3.00 years, respectively.

E. Investment Concentration of Credit Risk

Since all long-term investments are in U.S. Government guaranteed securities, the Lottery has not adopted a policy regarding concentration of credit risk.

F. Investment Custodial Credit Risk

Custodial credit risk is defined as the risk that an entity may not recover securities held by another party. The Lottery does not have a formal policy regarding custodial credit risk.

At June 30, 2019, and June 30, 2018, all investments held were either insured or registered and held by the Lottery or its agents in the Lottery's name and thus were not subject to custodial credit risk.

G. Foreign Currency Risk

The Lottery had no exposure to foreign currency risk as of June 30, 2019, and June 30, 2018.

H. Fair Value Hierarchy

The Lottery categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005715

The Lottery's investments are measured and reported at fair value and classified according to the following hierarchy:

Level 1 – Investments reflect unadjusted quoted prices in active markets for identical assets.

Level 2 – Investments reflect prices that are based on inputs that are either directly or indirectly observable for an asset (including quoted prices for similar assets), which may include inputs in markets that are not considered to be active.

Level 3 – Investments reflect prices based upon unobservable inputs for an asset.

The categorization of investments within the hierarchy is based upon the pricing transparency of this instrument and should not be perceived as the particular investment's risk.

Level 1 – Debt securities classified in Level 1 of the fair value hierarchy are valued by the custodian bank's external pricing vendors using prices quoted in active market for those securities.

Level 2 – Debt securities classified in Level 2 of the fair value hierarchy are valued by the custodian bank's external pricing vendors using pricing methodology that involves the use of evaluation models such as matrix pricing, which is based on a security's relationship to benchmark quoted prices.

Level 3 – Debt securities classified in Level 3 of the fair value hierarchy are valued by the custodian bank's external pricing vendors and are subject to being priced by an alternative pricing source utilizing discounted cash flow models and broker bids, or may have an estimated fair value equal to cost, due to a lack of an independent pricing source.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005716

The following schedules summarize all investments by fair value hierarchy level at June 30 (in thousands):

Investments, grand prize	291,307	-	-	291,307
Totals	$ 500,616	$ 303	$ 8,730	$ 509,649

3. ACCOUNTS RECEIVABLE

Accounts receivable as of June 30, consisted of (in thousands):

	2019	2018
Ticket sales receivable	$ 58,355	$ 53,610
Other receivables	-	173
Total receivables	58,355	53,783
Less allowance for doubtful accounts	(4,125)	(3,090)
Accounts receivable, net	$ 54,230	$ 50,693

4. SECURITY DEPOSITS AND DEPOSITS PAYABLE

The Lottery receives certificates of deposit and cashier's checks from certain vendors and retailers in order to secure contract performance. Certificates of deposit are held in trust by the State with any interest earnings being credited to the vendor or retailer. Cashier's checks are held as cash by the Lottery. These deposits are established to reduce the potential financial risk to the Lottery in the event of a breach of contract. The certificates appear on the Statements of Net Position, in assets as security deposits, and in liabilities as deposits

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005718

payable. The checks appear on the Statements of Net Position, in assets as cash, and in liabilities as deposits payable.

6. MULTI-STATE LOTTERY ASSOCIATION

MUSL is a non-profit government-benefit association created for the purpose of administering joint lottery games. MUSL included 34 state lottery entities, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands during fiscal year 2019. Through membership in the association the Lottery is eligible to participate in Powerball with Powerplay, Mega Millions with Megaplier, and several other Draw games in participating states. The chief executive officer of each member lottery serves on the MUSL board of directors.

As a member of MUSL, the Lottery is required to contribute to various prize reserve funds maintained by MUSL. The prize reserve funds serve as a contingency reserve to protect MUSL from unforeseen prize payments. MUSL periodically reallocates the prize reserve funds among the states based on relative Powerball with Powerplay and Mega Millions with Megaplier sales levels. All remaining funds remitted, and the related interest earnings (net of administrative costs), will be returned to the Lottery upon leaving MUSL, less any portion of unanticipated prize claims that may have been paid from the fund.

As of June 30, 2019, and June 30, 2018, the Lottery had deposits with MUSL of $33,745,088, and $26,675,900, respectively, representing the Lottery's deposits of reserve funds.

A copy of the MUSL financial statements may be obtained by submitting a written request to MUSL, 4400 N.W. Urbandale Drive, Urbandale, Iowa 50322.

8. DUE TO EDUCATIONAL ENHANCEMENT TRUST FUND

In accordance with the Act, effective July 1, 2005, variable percentages of the gross revenue from the sale of Draw games and Scratch-Off lottery tickets as determined by the Lottery, and other earned revenue, excluding application processing fees, shall be deposited in the EETF as provided in Section 24.121, Florida Statutes, as amended. The amount transferred to the EETF was $1,927,054,000 for the fiscal year ended June 30, 2019, (26.9 percent of revenues), and $1,758,329,000 (26.2 percent of revenues) for the fiscal year ended June 30, 2018.

Because the net appreciation in fair value of investments and amortization of grand prizes payable, included in nonoperating revenue and expenses, relate to valuations of the restricted grand prize investments and grand prizes payable, they are excluded from the determination of transfers to the EETF.

Effective July 1, 2005, provisions of the Act relating to the allocation of revenues for public education were revised. The changes in the provisions were designed to maximize the transfers of moneys to the EETF. These revisions resulted in changes in the methodology used to calculate the transfer based on a business model of revenue minus expenses rather than a percent of revenue.

9. PENSIONS AND OTHER POSTEMPLOYMENT BENEFITS

A. Retirement Programs

The Florida Department of Management Services (DMS) administers the State's pension plans referenced below. Financial statements and other required supplementary information for the plans are included in the Florida Department of Management Services' Florida Retirement System Pension Plan and Other State Administered Systems Comprehensive Annual Financial Report (Pension CAFR). Copies of the Pension CAFR can be obtained from the DMS, Division of Retirement (Division), Research and Education Section , P.O. Box 9000, Tallahassee, Florida 32315-9000; by telephone at 844-377-1888 or 850-907-6500; by e-mail at rep@dms.myflorida.com; or at the Division's Web site (www.frs.myflorida.com).

Florida Retirement System. The Florida Retirement System (FRS) is a State-administered cost-sharing multiple-employer retirement plan administered by the DMS that offers members

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005723

(Regular Class, Special Risk Class, and Senior Management Service Class)[1] an initial choice between participating in a defined benefit plan (FRS Pension Plan) or a defined contribution plan (FRS Investment Plan) and one additional choice to change plans before retirement. FRS provisions are established by Chapters 121, 122, and 238, Florida Statutes; Chapter 112, Part IV, Florida Statutes; and Florida Retirement System Rules, Chapter 60S, Florida Administrative Code; wherein eligibility, required employer and employee contributions, and benefits are defined and described in detail. Unless otherwise provided, all employees of participating employers in regularly established positions must be enrolled as members of the FRS or other non-integrated defined contribution plans in lieu of FRS membership.

Benefits in the FRS Pension Plan vest at six years of service for members initially enrolled before July 1, 2011, and at eight years for members initially enrolled on or after July 1, 2011. For members initially enrolled before July 1, 2011, Special Risk Class members are eligible for normal retirement benefits at age 55 and vested or after 25 years of service at any age. All other members initially enrolled before July 1, 2011, are eligible for normal retirement benefits at age 62 and vested or at any age after 30 years of service. For members initially enrolled on or after July 1, 2011, Special Risk Class members are eligible for normal retirement benefits at age 60 and vested or after 30 years of service at any age. All other members initially enrolled on or after July 1, 2011, are eligible for normal retirement benefits at age 65 and vested or at any age after 33 years of service.

Early retirement is available but imposes a penalty for each year a member retires before his or her normal retirement age. Retirement, disability, and death benefits are provided. Retirees with service prior to July 1, 2011, receive annual cost-of-living adjustments. Retirees only with service accrued on or after July 1, 2011, do not receive annual cost-of-living adjustments. Benefits are calculated at retirement based on the age, years of service, accrual value by membership class, and average final compensation (average of highest five fiscal years' salaries if initially enrolled before July 1, 2011, or the average of highest eight fiscal years' salaries if initially enrolled on or after July 1, 2011).

Members of the FRS Pension Plan who reach normal retirement may participate in the Deferred Retirement Option Program (DROP), subject to provisions of Section 121.091(13), Florida Statutes. DROP participants are technically retired, deferring termination and receipt of monthly retirement benefits for up to 60 months. During the period of DROP participation, deferred monthly benefits are held in the FRS Trust Fund and accrue interest.

FRS Investment Plan benefits are established in Part II, Chapter 121, Florida Statutes, and participation is available to all FRS members in lieu of the FRS Pension Plan. Members vest after one year of creditable service for Investment Plan contributions. If an accumulated benefit obligation for service credit originally earned under the FRS Pension Plan is

[1] Regular Class includes members of the FRS who do not qualify for membership in the other classes. Special Risk Class includes members who are employed as law enforcement officers and the Senior Management Service Class includes members in senior management level positions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005724

transferred to the FRS Investment Plan, six years or eight years depending upon initial enrollment date of service (including the service credit represented by the transferred funds) is required to be vested for these funds and the earnings on the funds. Benefits under the FRS Investment Plan are based on the account balance at retirement composed of contributions plus investment gains less investment losses and fees. If the member is totally and permanently disabled from all employment, the member can transfer the account balance to the FRS Pension Plan to receive a monthly disability benefit. Employer and employee contributions are a percentage of salary based on membership class. Contributions are directed to individual member accounts and the individual members allocate contributions and account balances among various approved investment choices offered under the plan. Additionally, state agencies are required to make a contribution as a percent of covered payroll that is transferred to the FRS Trust Fund to help amortize the unfunded actuarial liability (UAL). The required UAL contribution rates for the fiscal year ended June 30, 2019, were 3.50 percent for regular class, 10.60 percent for special risk class, and 17.89 percent for senior management service class. The Lottery's contributions for the fiscal years ended June 30, 2019, June 30, 2018, and June 30, 2017, totaled $603,035, $540,210, and $402,691, respectively.

The Florida Legislature established uniform contribution rates for participating FRS employees. FRS employers pay the same contribution rate by membership class regardless of whether the members participate in the FRS Pension Plan or FRS Investment Plan. Contribution rates as a percentage of gross salary are as follows:

Class	Employee Rate Fiscal Year Ended June 30, 2019	Employer Rate Fiscal Year Ended June 30, 2019[1]	Employee Rate Fiscal Year Ended June 30, 2018	Employer Rate Fiscal Year Ended June 30, 2018[1]
Senior Management Service	3.00 percent	24.06 percent	3.00 percent	22.71 percent
Regular	3.00 percent	8.26 percent	3.00 percent	7.92 percent
Special Risk	3.00 percent	24.50 percent	3.00 percent	23.27 percent
DROP - Applicable to members from all of the above classes	0.00 percent	14.03 percent	0.00 percent	13.26 percent

[1] Total employer contribution rates above include 1.66 percent for the fiscal years ended June 30, 2019, and June 30, 2018, for the Retiree Health Insurance Subsidy Program. Also, employer rates, other than for DROP participants, include 0.06 percent for fiscal years ended June 30, 2019, and June 30, 2018, for administration costs of the financial education program and the FRS Investment Plan. Required employee contributions are deducted on a pre-tax basis.

Senior Management Service Optional Annuity Program. Some Lottery employees also participate in the Senior Management Service Optional Annuity Program (SMSOAP). Offered in lieu of FRS participation, the SMSOAP is a defined contribution plan that provides retirement and death benefits to the participant pursuant to Section 121.055, Florida Statutes. Participants have full and immediate vesting of all contributions paid on their behalf to the participating provider companies to invest as directed by the participants. Employees in

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005725

eligible State positions may make an irrevocable election to participate in the SMSOAP in lieu of the Senior Management Service Class. Employers contributed 6.27 percent of covered payroll for July 2016 through June 2019. This contribution rate includes a contribution that would otherwise be paid to the Retiree Health Insurance Subsidy Program (HIS) described below so the SMSOAP retiree is not eligible to receive monthly HIS benefits. Additionally, State agencies are required to make a contribution as a percent of covered payroll that is transferred to the FRS Trust Fund to help amortize the UAL. The required UAL contribution rate for the fiscal year ended June 30, 2019, was 17.89 percent. A participant may contribute by salary reduction an amount not to exceed the percentage contributed by the employer. The Lottery's contributions for the fiscal years ended June 30, 2019, June 30, 2018, and June 30, 2017, totaled $5,456, $25,025, and $47,344, respectively.

Retiree Health Insurance Subsidy Program. The HIS was created by the Florida Legislature in 1987 to assist FRS retirees in paying health insurance costs. HIS is a non-qualified, cost-sharing multiple-employer defined benefit pension plan established under Section 112.363, Florida Statutes. For the fiscal years ended June 30, 2019, 2018, and 2017, eligible retirees or beneficiaries received a monthly HIS payment equal to the number of years of creditable service completed at the time of retirement multiplied by $5. The payments to individual retirees or beneficiaries were at least $30 but not more than $150 per month. To be eligible to receive HIS, an FRS retiree must apply for the benefit, certify health insurance coverage, which can include Medicare, and be approved.

HIS is funded by required contributions from FRS participating employers. For the fiscal years ended June 30, 2019, 2018, and 2017, required contributions were 1.66 percent of payroll for all active employees covered by the FRS, pursuant to Section 112.363, Florida Statutes. For the fiscal years ended June 30, 2019, 2018, and 2017, the Lottery contributed $303,072, $296,152, and $285,895, respectively, in employer contributions to the HIS. HIS contributions are deposited in a DMS trust fund from which HIS payments are authorized. HIS benefits are not guaranteed and are subject to legislative appropriation. If these contributions or appropriation fail to provide full subsidy benefits to all participants, the Legislature may reduce or cancel the subsidy payments.

Deferred Compensation Plan. The Lottery, through the State of Florida, offers its employees a deferred compensation plan created in accordance with Section 457 of the Internal Revenue Code. The plan (refer to Section 112.215, Florida Statutes), available to all regular payroll State employees, permits them to defer a portion of their salaries until future years. The deferred compensation is not available to employees until termination, retirement, death, or an unforeseen emergency.

All amounts of compensation deferred under the plan, all property and rights purchased with those amounts, and all income attributable to those amounts, property, or rights are held in trust for the exclusive benefit of participants and their beneficiaries as mandated by Title 26, Section 457(g)(1), United State Code.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005726

The Lottery does not contribute to the plan. Participation under the plan is solely at the discretion of the employee.

The State has no liability for losses under the plan but does have the duty of due care that would be required of an ordinary and prudent investor. Pursuant to Section 112.215, Florida Statutes, the Deferred Compensation Trust Fund is created in the State Treasury.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions. For purposes of measuring the net pension liabilities, pension expense, and related deferred outflows/inflows of resources, information about the fiduciary net position of the Plans and additions to/deductions from the Plans' fiduciary net position have been determined on the same basis as they are reported by the DMS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when currently due and payable in accordance with the benefit terms. Investments are reported at fair value. Detailed information about the Plans' fiduciary net position is available in the Pension CAFR.

At June 30, 2019, the Lottery reported a net pension liability of $16,229,921 for its proportionate share of the FRS Pension Plan's net pension liability and $5,779,995 for its proportionate share of the HIS net pension liability, for a total net pension liability of $22,009,916. The net pension liability was measured as of June 30, 2018, and the total pension liability used to calculate the net pension liability was based on actuarial valuations as of July 1, 2018, for the FRS Pension Plan and HIS. The Lottery's proportionate share of the net pension liability was based on 2017-18 fiscal year contributions to the Plans relative to the total 2017-18 fiscal year contributions of all participating members. At June 30, 2018, the Lottery's proportionate share of the FRS Pension Plan net pension liability was 0.053883272 percent, which was a 1.88 percent increase from its proportionate share measured as of June 30, 2017, of 0.052889273 percent. The Lottery's proportionate share of the HIS net pension liability at June 30, 2018, was 0.054610115 percent, which was a 1.09 percent increase from its proportion as of June 30, 2017, of 0.054020990 percent. For the fiscal year ended June 30, 2019, the Lottery recognized pension expense of $3,093,679 for the FRS Pension Plan and $391,991 for the HIS, for pension expense totaling $3,485,670. At June 30, 2019, the Lottery reported deferred outflows of resources and deferred inflows of resources related to the Plans from the following sources:

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005727

FRS Pension Plan

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ 1,374,918	$ 49,903
Changes in assumptions	5,303,149	-
Net difference between projected and actual earnings on pension plan investments	-	1,253,959
Changes in proportion and differences between employer contributions and proportionate share of contributions	987,635	591,987
Employer contributions subsequent to the measurement date	1,674,809	-
Totals	$ 9,340,511	$ 1,895,849

HIS

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ 88,489	$ 9,820
Changes in assumptions	642,807	611,109

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005728

Actuarial Methods and Assumptions. Actuarial assumptions for both defined benefit cost-sharing plans, the FRS Pension Plan and the HIS, are reviewed annually by the Florida Retirement System Actuarial Assumptions Conference. The most recent experience study for the FRS Pension Plan was completed in 2014 for the period July 1, 2008, through June 30, 2013. Because the HIS is funded on a pay-as-you-go basis, no experience study has been completed for this program.

The total pension liability for FRS Pension Plan and HIS were determined by actuarial valuations as of July 1, 2018, using the entry age normal actuarial cost method. Inflation increases for both plans is assumed at 2.60 percent. Payroll growth for both Plans is assumed at 3.25 percent.

Both the discount rate and the long-term expected rate of return used for FRS Pension Plan investments are 7.00 percent. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that contributions from participating employers will be made at the statutorily required rates. Based on these assumptions, the FRS Pension Plan's fiduciary net position was projected to be available to make all projected future benefit payments to current active and inactive employees. Therefore, the discount rate for calculating the total pension liability is equal to the long-term expected rate of return and was applied to all periods of projected benefit payments to determine the total pension liability.

Because the HIS uses a pay-as-you-go funding structure, a municipal bond rate of 3.87 percent was used to determine the total pension liability for the plan. Mortality assumptions for both plans were based on the Generational RP-2000 with Projection Scale BB tables (refer to the valuation reports at www.frs.myflorida.com for more information).

There were no changes in benefit terms for either the FRS Pension Plan or the HIS that affected the total pension liability since the prior measurement date. There were no changes between the measurement date and the reporting date which significantly impact the Lottery's proportionate share of the net pension liability, deferred outflows of resources, deferred inflows of resources, and pension expense for either the FRS Pension Plan or the HIS.

The following changes in actuarial assumptions occurred in 2018:

FRS Pension Plan: As of June 30, 2018, the discount rate and the long-term expected rate of return decreased from 7.10 percent to 7.00 percent.

HIS: The municipal rate used to determine total pension liability increased from 3.58 percent to 3.87 percent.

The long-term expected rate of return on FRS Pension Plan investments was determined using a forward-looking capital market economic model, which includes an adjustment for the inflation assumption.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005729

The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

Asset Class	Target Allocation	Arithmetic Real Rates of Return
Cash	1.00%	2.90%
Fixed income	18.00%	4.40%
Global equity	54.00%	7.60%
Real estate (property)	11.00%	6.60%
Private equity	10.00%	10.70%
Strategic investments	6.00%	6.00%
	100.00%	

Sensitivity Analysis. The following tables demonstrate the sensitivity of the net pension liability to changes in the discount rate. The sensitivity analysis shows the impact to the Lottery's proportionate share of each plan's net pension liability if the discount rate was 1.00 percent higher or 1.00 percent lower than the current discount rate at June 30, 2018.

FRS Pension Plan			HIS		
1% Decrease 6.00%	Current Discount Rate 7.00%	1% Increase 8.00%	1% Decrease 2.87%	Current Discount Rate 3.87%	1% Increase 4.87%
$ 29,620,286	$ 16,229,921	$ 5,108,431	$ 6,583,077	$ 5,779,995	$ 5,110,582

B. Postemployment Healthcare Benefits

Effective July 1, 2017, the Lottery implemented GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, for certain postemployment healthcare benefits administered by the State of Florida's State Employees' Group Health Insurance Program (Program) which significantly changed the Lottery's accounting for Other Postemployment Benefits (OPEB).

General Information about the OPEB Plan

Plan Description. The Lottery participates in the Program, a multiple-employer defined benefit plan that provides group health benefits. Pursuant to the provisions of Section 112.0801, Florida Statutes, all employees who retire from the State of Florida are eligible to participate in the Program. Retirees and their eligible dependents shall be offered the same health and hospitalization insurance coverage as is offered to active employees at a premium cost of no more than the premium cost applicable to active employees. A retiree means any officer or employee who retires under a State retirement system or State optional annuity or retirement program or is placed on disability retirement and who begins receiving retirement benefits immediately after retirement from employment. In addition, any officer or employee

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005730

who retires under the Florida Retirement System Investment Plan is considered a "retiree" if he or she meets the age and service requirements to qualify for normal retirement or has attained the age of 59.5 years and has the years of service required for vesting. The State of Florida subsidizes the premium rates paid by retirees by allowing them to participate in the OPEB Plan at reduced or blended group (implicitly subsidized) premium rates for both active and retired employees. These rates provide an implicit subsidy for retirees because retiree healthcare costs are generally greater than active employee healthcare costs. No assets are accumulated in a trust that meets the criteria in paragraph 4 of GASB Statement No. 75. The OPEB Plan contribution requirements and benefit terms necessary for funding the OPEB Plan each year is on a pay-as-you-go basis as established by the Governor's recommended budget and the General Appropriations Act. Retirees are required to enroll in the Medicare program for their primary coverage as soon as they are eligible.

Benefits Provided. The OPEB Plan provides healthcare benefits for retirees and their dependents. The OPEB Plan only provides an implicit subsidy as described above.

The total number of OPEB Plan employees covered by the benefit terms at July 1, 2017, were as follows:

Inactive plan members or beneficiaries currently receiving benefits	37,046
Inactive plan members entitled to, but not yet receiving benefits*	-
Active plan members	153,620
Total	190,666

*There are currently zero inactive plan members entitled to but not yet receiving benefits because the Program does not provide a vested termination benefit. As a part of normal retirement, a retiree has 60 days after separation to elect postretirement health coverage. After 60 days, they are no longer entitled to benefits.

Proportionate Share of the Total OPEB Liability

The Program's total OPEB liability of $10,560,332,000 was measured as of June 30, 2018, and was determined by an actuarial valuation as of July 1, 2017. The Lottery's proportionate share of that liability reported at June 30, 2019, was $30,417,848. At June 30, 2018, the Lottery's proportionate share, determined by its proportion of total Lottery employees as compared to total OPEB Plan employees, was 0.288278422 percent, which was a 3.05 percent increase from its proportionate share measured as of June 30, 2017, of 0.279755700 percent.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005731

***Actuarial Assumptions and Other Inputs*.** The total OPEB liability was determined using the following actuarial assumptions and other inputs, applied to all periods included in the measurement, unless otherwise specified:

Inflation	2.6 percent
Discount rate	3.87 percent
Healthcare cost trend rates	8.8 percent for Preferred Provider Organizations (PPO) and 6.2 percent for Health Maintenance Organizations (HMO) for fiscal years 2018 to 2019, decreasing to an ultimate rate of 3.8 percent for fiscal year 2075 and later years
Retirees' share of benefit-related costs	7.5 percent of projected health insurance premiums for Pre-Medicare eligible and Medicare-Eligible employees

The discount rate was based on the Bond Buyer General Obligation 20-year Municipal Bond Index.

Mortality rates were based on the Generational RP-2000 with Projected Scale BB.

The demographic actuarial assumptions for retirement, disability incidence, and withdrawal used in the July 1, 2017, valuation were based on the results of an actuarial experience study for the period January 1, 2010, through December 31, 2014, adopted by the FRS. The remaining actuarial assumptions (e.g., initial per capita costs, health care cost trends, rate of plan participation, rates of plan election, etc.) used in the July 1, 2017, valuation were based on a review of recent plan experience done concurrently with the July 1, 2017, valuation.

The following changes have been made since the July 1, 2017, valuation:

- The discount rate as of the measurement date for GASB Statement No. 75 purposes was changed to 3.87 percent. The prior GASB Statement No. 75 report used 3.58 percent. The discount rate is based on the 20-year municipal bond rate as of June 28, 2018.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005732

The Lottery's changes in total OPEB Liability for the fiscal year are as follows:

	Increase(Decrease) Total OPEB Liability
Balance at June 30, 2018	$ 30,246,920
Changes for the year:	
Service cost	1,298,727
Interest	1,153,020
Changes of assumptions or other inputs	(2,685,011)
Employer benefits payments	(534,563)
Changes in proportionate share	938,755
Net changes	170,928
Balance at June 30, 2019	$ 30,417,848

Sensitivity of the Lottery's Share of the Total OPEB Liability to Changes in the Discount Rate. The following table presents the Lottery's proportionate share of the total OPEB liability, as well as what the Lottery's proportionate share of the total OPEB liability would be if it were calculated using a discount rate that is 1.00 percentage point lower (2.87 percent) or 1.00 percentage point higher (4.87 percent) than the current rate:

1% Decrease 2.87%	Current Discount Rate 3.87%	1% Increase 4.87%
$ 36,996,673	$ 30,417,848	$ 25,296,006

Sensitivity of the Lottery's Share of the Total OPEB Liability to Changes in the Healthcare Cost Trend Rates. The following table presents the Lottery's proportionate share of the total OPEB liability, as well as what the Lottery's proportionate share of the total OPEB liability would be if it were calculated using healthcare cost trend rates that are 1.00 percentage point lower or 1.00 percentage point higher than the current healthcare cost trend rates:

1% Decrease	Healthcare Cost Trend Rates	1% Increase
$ 24,604,641	$ 30,417,848	$ 38,220,170

FL-SEN-20-0201-B, 20-0202-A-005733

OPEB Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB.

For the fiscal year ended June 30, 2019, the Lottery recognized OPEB expense of $1,039,014. At June 30, 2019, the Lottery reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

Description	Deferred Outflows of Resources	Deferred Inflows of Resources
Change of assumptions or other inputs	$ -	$ 6,013,542
Changes in proportions and differences between Lottery benefit payments and proportionate share of benefit payments	821,405	200,349
Transactions subsequent to the measurement date	564,536	-
Totals	$ 1,385,941	$ 6,213,891

Of the total amount reported as deferred outflows of resources related to OPEB, $564,536 resulting from transactions (e.g., benefit payments and administrative expense) subsequent to the measurement date and before the end of the fiscal year will be included as a reduction of the total OPEB liability and included in OPEB expense in the year ended June 30, 2020. Other amounts reported as deferred inflows of resources and deferred outflows of resources related to OPEB will be recognized in OPEB expense as follows:

Year Ending June 30	Amount
2020	$ (877,035)
2021	(877,035)
2022	(877,035)
2023	(877,035)
2024	(877,035)
Thereafter	(1,007,311)
Totals	$ (5,392,486)

10. OPERATING LEASES

The Lottery has entered into operating leases for the rental of office and warehouse space for the headquarters and district offices as well as the rental of office equipment. Certain leases are renewable at the option of the Lottery.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005734

Future minimum rental payments as of June 30, 2019, are scheduled as follows (in thousands):

Year Ending June 30	Headquarters	Districts	Office Equipment	Total
2020	$ 2,724	$ 1,218	$ 63	$ 4,005
2021	2,777	1,031	22	3,830
2022	2,805	1,026	3	3,834
2023	2,834	984	1	3,819
2024	2,862	968	-	3,830
2025-2029	11,850	5,124	-	16,974
2030-2034	-	3,129	-	3,129
Totals	$ 25,852	$ 13,480	$ 89	$ 39,421

Rental expense under all operating leases totaled approximately $3,977,000 and $3,941,000 for the fiscal years ended June 30, 2019, and June 30, 2018, respectively.

11. VENDOR SUPPORT FUNDS

Each of the gaming vendor contracts requires the vendors to provide a fund for marketing support activities as directed by the Lottery. The vendors are required to make deposits into the designated accounts either weekly or monthly and distribute the funds as directed by the Lottery. The funds are used for market research and other expenses directly linked to product sales. Vendor balances committed for marketing research vary with timing of marketing initiatives, industry developments, and changes in technology. Actual cash balances for these funds at June 30, 2006, through June 30, 2019, ranged from $1,058,000 to $5,196,000. Each contract requires that any funds remaining in the accounts at the end of each contract's term will be returned to the Lottery for transfer to the EETF. Historically, no balances have reverted to the Lottery.

Vendor support fund activities are summarized as follows (in thousands):

2018-19 Vendor Support Funds

	Balance June 30, 2018	Additions	Deletions	Balance June 30, 2019
IGT	$ 212	$ 360	$ (155)	$ 417
Scientific Games	4,452	4,740	(5,798)	3,394
Total Vendor Support	$ 4,664	$ 5,100	$ (5,953)	$ 3,811

2017-18 Vendor Support Funds

	Balance June 30, 2017	Additions	Deletions	Balance June 30, 2018
IGT	$ 147	$ 360	$ (295)	$ 212
Scientific Games	5,049	5,200	(5,797)	4,452
Total Vendor Support	$ 5,196	$ 5,560	$ (6,092)	$ 4,664

AMERICAN OVERSIGHT

12. OTHER COMMITMENTS

The Lottery has contractual agreements under which Draw and Scratch-Off lottery game vendors provide gaming systems, tickets, and related services. The Lottery's Draw gaming vendor was compensated at a rate of 1.0699 percent of net Draw game ticket sales through April 14, 2019. The Draw gaming vendor was compensated at a rate of 0.7384 percent of net Draw and Scratch-Off ticket sales beginning April 15, 2019. The vendor's compensation for Draw games, gaming equipment, and for the provision of full service vending machines for the fiscal years ended June 30, 2019, and 2018, was $38,275,000 and $31,863,000, respectively.

The Lottery's Scratch-Off ticket vendor is currently compensated at rates that range from 0.9746 percent to 2.3421 percent based on ticket price points and total annual sales. Compensation under this agreement and the agreement for the provision of instant ticket vending machines amounted to $64,935,000 for the fiscal year ended June 30, 2019, and $63,654,000 for the fiscal year ended June 30, 2018.

13. LITIGATION

The Lottery is involved in litigation and other claims incidental to the ordinary course of its operations. In the opinion of Lottery management, based on the advice of legal counsel, the ultimate disposition of these lawsuits and claims will not have a material adverse effect on the financial position of the Lottery.

Other Services[1]	354	4.00%	301	4.11%
Total	6,892	77.86%	5,617	76.69%

Note: Privacy requirements prevent the state from obtaining and reporting specific information about the largest employers in the state's jurisdiction. Reporting by industry reveals the degree of concentration in the state's total employment base.

In December 2018, Florida's seasonally adjusted total nonagricultural employment was 8,892,000, an increase of 225,800 jobs (+2.6 percent) over the year. Florida's annual job growth rate had been positive for 89 out of 90 months. The only month not positive was due to Hurricane Irma that hit the state in September 2017. In December 2018, all ten major industries gained jobs over the year with professional and business services (+43,200 jobs) gaining the most followed by education and health services (+41,800 jobs).

(1) "Other Services" include the following: Repair and maintenance, automotive repair and maintenance, personal and laundry services, and religious, grantmaking, civic, professional, and similar organizations.

(2) "Employment" is being calculated based on average total employment by industry for each calendar year. Percentages of "Total" employment are based on the following:

	2018	2009
Total non-agricultural employment	8,782	7,235
Total agricultural employment	68	88
Total employment	8,850	7,323

AUDITOR GENERAL
STATE OF FLORIDA

Sherrill F. Norman, CPA
Auditor General

Claude Denson Pepper Building, Suite G74
111 West Madison Street
Tallahassee, Florida 32399-1450

Phone: (850) 412-2722
Fax: (850) 488-6975

The President of the Senate, the Speaker of the
House of Representatives, and the
Legislative Auditing Committee

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

We have audited the Department of the Lottery's (Lottery's) internal control over financial reporting as of June 30, 2019, based on criteria established in the *Internal Control – Integrated Framework* (2013), issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Management's Responsibility for Internal Control Over Financial Reporting

Management is responsible for designing, implementing, and maintaining effective internal control over financial reporting, and for its assessment about the effectiveness of internal control over financial reporting, included in the accompanying **MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING**.

Auditor's Responsibility

Our responsibility is to express an opinion on the Lottery's internal control over financial reporting based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

An audit of internal control over financial reporting involves performing procedures to obtain audit evidence about whether a material weakness exists. The procedures selected depend on the auditor's judgment, including the assessment of the risks that a material weakness exists. An audit includes obtaining an understanding of internal control over financial reporting and testing and evaluating the design and operating effectiveness of internal control over financial reporting based on the assessed risk.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

AMERICAN OVERSIGHT

Definition and Inherent Limitations of Internal Control Over Financial Reporting

An entity's internal control over financial reporting is a process effected by those charged with governance, management, and other personnel, designed to provide reasonable assurance regarding the preparation of reliable financial statements in accordance with accounting principles generally accepted in the United States of America. An entity's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures of the entity are being made only in accordance with authorizations of management and those charged with governance; and (3) provide reasonable assurance regarding prevention, or timely detection and correction of unauthorized acquisition, use, or disposition of the entity's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent, or detect and correct, misstatements. Also, projections of any assessment of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Lottery maintained, in all material respects, effective internal control over financial reporting as of June 30, 2019, based on criteria established in the *Internal Control – Integrated Framework* (2013) issued by COSO.

Report on Financial Statements

We have also audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the Lottery, as of and for the fiscal year ended June 30, 2019, and the related notes to financial statements, which collectively comprise the Lottery's basic financial statements, and our report dated December 20, 2019, expressed an unmodified opinion.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Lottery's financial statements are free from material misstatement, we performed tests of the Lottery's compliance with certain provisions of laws, rules, regulations, and contracts, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

AMERICAN OVERSIGHT

Additional Matters

We noted certain additional matters related to information technology controls and minority retailer participation that we reported to management as Findings 1 and 2 in the ***FINDINGS AND RECOMMENDATIONS*** accompanying this report.

Management's Response to Findings

The Lottery's response to the findings described in the ***FINDINGS AND RECOMMENDATIONS*** accompanying this report is included as ***MANAGEMENT'S RESPONSE***. The Lottery's response was not subjected to the auditing procedures applied in the audit of the financial statements, and accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and to provide an opinion on the effectiveness of the Lottery's internal control but not to provide an opinion on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Lottery's internal control and compliance. Accordingly, this report is not suitable for any other purpose.

Respectfully submitted,

Sherrill F. Norman, CPA
Tallahassee, Florida

Management's Report on Internal Control Over Financial Reporting

The Florida Lottery's internal control over financial reporting is a process effected by those charged with governance, management, and other personnel, designed to provide reasonable assurance regarding the preparation of reliable financial statements in accordance with accounting principles generally accepted in the United States of America. An entity's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures of the entity are being made only in accordance with authorizations of management and those charged with governance; and (3) provide reasonable assurance regarding prevention, or timely detection and correction of unauthorized acquisition, use, or disposition of the entity's assets that could have a material effect on the financial statements.

Management is responsible for designing, implementing, and maintaining effective internal control over financial reporting. Management assessed the effectiveness of the Florida Lottery's internal control over financial reporting as of June 30, 2019, based on the framework set forth by the Committee of Sponsoring Organizations of the Treadway Commission in the *Internal Control – Integrated Framework* (2013). Based on that assessment, management concluded that, as of June 30, 2019, the Florida Lottery's internal control over financial reporting is effective based on the criteria established in the *Internal Control – Integrated Framework* (2013).

Internal control over financial reporting has inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control also can be circumvented by collusion or improper management override. Because of its inherent limitations, internal control over financial reporting may not prevent, or detect and correct misstatements. Also, projections of any assessment of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Florida Lottery

Randall Hunt

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005775

FINDINGS AND RECOMMENDATIONS

ADDITIONAL MATTERS

Finding 1: Information Technology Controls

Information technology (IT) controls are intended to protect the confidentiality, integrity, and availability of data and IT resources. During our audit, we identified the need for enhancements to certain Lottery IT controls. To avoid the possibility of compromising Lottery information, specific details of these issues are not disclosed in this report. However, we have notified appropriate Lottery management of the specific issues.

Without adequate IT controls, the risk is increased that the confidentiality, integrity, and availability of Lottery data and IT resources may be compromised.

Recommendation: We recommend that Lottery management make the necessary IT control enhancements to address the issues identified.

Finding 2: Minority Retailer Participation

Section 24.113, Florida Statutes, requires that 15 percent of the Lottery's retailers be minority business enterprises, as defined in Section 288.703(3), Florida Statutes; however, no more than 35 percent of such retailers shall be owned by the same type of minority person, as defined by Section 288.703(4), Florida Statutes.

In prior audit reports, most recently in our report No. 2019-090 (Finding 2), we disclosed that retailers comprising one minority type totaled more than 35 percent of the total number of the Lottery's minority retailers. Although the Lottery has developed an outreach program to increase retailer participation in under-represented minority groups, our audit disclosed that, contrary to State law, as of June 30, 2019, retailers comprising one minority type totaled approximately 66.8 percent of the total number of minority retailers.

Recommendation: We recommend that the Lottery continue its efforts to increase retailer participation in under-represented minority groups.

AMERICAN OVERSIGHT

December 20, 2019

Sherrill F. Norman, CPA
Florida Auditor General
Claude Pepper Building, Suite G74
111 West Madison Street
Tallahassee, Florida 32399-1450

Dear Ms. Norman:

The Lottery has received your December 16, 2019, list of preliminary and tentative audit findings and recommendations resulting from your audit of the Lottery's Financial Statements for the fiscal year ended June 30, 2019. Below is our response to each finding and recommendation:

Finding 1: Information Technology Controls
Recommendation: We recommend that Lottery management make the necessary IT control enhancements to address the issues identified.

Lottery's Response: The Lottery has made the necessary enhancements presented by this audit or is in the process of implementing the enhancements. The Lottery has an ongoing process to improve IT controls and will continue to reengineer where necessary to tighten controls.

Finding 2: Minority Retailer Participation
Recommendation: We recommend that the Lottery continue its efforts to increase retailer participation in under-represented minority groups.

Lottery's Response: We will continue to look for opportunities to recruit retailers, including those in under-represented minority groups. We will also continue to work with retailer trade associations to reach out to minority-owned businesses. Finally, our sales force will continue to recruit minority-owned businesses as a part of their standard sales practices.

Thank you for your audit efforts and recommendations. I look forward to receiving your final report.

Sincerely,

Randall Hunt

Attachment(s): "Electric Vehicle Legislation.pdf"

Dear Senator Brandes,

Thank you for reaching out to NCSL for information about electric vehicle legislation. My colleague, Doug Shinkle, forwarded me your request. The attached response identifies policy resources and recently enacted state legislation in the areas of electric vehicle fees, charging infrastructure and planning, EV purchasing incentives and requirements for EV infrastructure at multi-family dwellings.

Please let me know if you would like any additional information on this topic. I would be happy to answer any questions you may have.

Sincerely,

Laura Shields

Electric Vehicle Legislation

October 4, 2019

Laura Shields, Energy Policy Associate, laura.shields@ncsl.org

---

In recent years, several states have enacted legislation to support electric vehicle (EV) deployment. In addition to the recently enacted legislation described below, there are a number of policy toolkits and guides that could be useful in identifying examples of effective state electric vehicle policies. The Department of Energy's Alternative Fuel Database Center (AFDC) provides a comprehensive compilation of laws, regulations and incentives focused on increased adoption of alternative fuel technologies. Such policies often include regulations and incentives that support electric vehicle adoption and infrastructure deployment. The AFDC tool allows you to search for existing electric vehicle laws and incentives by state. The tool also allows you to search for laws and incentives by technology, and regulation type. Additionally, the National Association of State Energy Officials (NASEO) released an electric vehicle Policy Evaluation Rubric in 2018 to assist policy makers by evaluating the effectiveness of various EV-focused policies. Below, you'll find links to additional existing resources as well as a summary of recent state legislative actions focused on electric vehicle fees, charging infrastructure, purchase or lease incentives, and charging capability at multi-family dwellings.

Comprehensive Electric Vehicle Legislation

A number of states have recently enacted comprehensive legislation incentivizing electric vehicle deployment. Such legislation aims to support state charging infrastructure development and electric vehicle adoption.

Maine

Policy Elements: electric vehicle adoption fund; rebate for new vehicle lease/purchase; charging infrastructure fund.

Description: Maine enacted comprehensive electric vehicle legislation that encourages electric vehicle adoption and funds infrastructure growth and development. In particular, the bill establishes a non-lapsing Electric Vehicle Fund to encourage adoption of electric vehicles and support EV purchases in the state. The bill also establishes a rebate program for electric vehicles purchased or leased for at least 36 months. It also supports electric vehicle charging deployment by establishing a non-lapsing Electric Vehicle Charging Infrastructure Fund. House Paper 442 (2019).

Maryland

Policy Elements: increased excise tax exemption; expanded scope of infrastructure coordinating council to include new technologies; extended reporting requirements.

Description: In 2019, Maryland enacted legislation that bolstered existing incentives for electric vehicle adoption and infrastructure. In particular, the bill expanded the state's existing excise tax for electric vehicles, which had previously been determined by the vehicle's battery capacity and capped at $3,000.

AMERICAN OVERSIGHT

The updated exemption provides for a $3,000 excise tax exemption for all battery electric vehicles, regardless of battery capacity. The legislation also raises the purchase cost cap for the exemption from $60,000 to $63,000. Additionally, the bill expands the state's Electric Vehicle Infrastructure Council to include representatives of fuel cell vehicle manufacturing and infrastructure interests and expands the directives of the Council to include streamlining of hydrogen refueling infrastructure planning and evaluation of total vehicle lifecycle costs. The bill also extends reporting requirements out to 2019. House Bill 1246 (2019).

Oregon

Policy Elements: zero-emission vehicle deployment targets; progress reporting; state agency purchase/lease requirements.

Description: Oregon enacted Senate Bill 1044 in 2019, comprehensive legislation supporting widespread deployment of electric vehicles in the state. In particular, the bill requires the state Department of Energy to submit to the Governor and Legislative committee a biennial report on state adoption of zero-emission vehicles identifying any barriers to adoption in the state, assessing progress toward reducing greenhouse gas emissions from the state's transportation sector and forecasting whether the state is meeting the following zero-emission vehicle deployment targets:

- 50,000 registered ZEVs by 2020;
- 250,000 registered ZEVs by 2025;
- 25% of all motor vehicles registered and 50% of all new motor vehicles sold per year are ZEVs by 2030;
- 90% of new motor vehicles sold per year are ZEVs by 2035.

The report must also assess charging infrastructure as well as the cost of purchasing electric vehicles and offer recommendations if goals are not being met. The bill also requires that 25% of the new vehicles leased or purchased by state agencies be ZEVs by 2025. Senate Bill 1044 (2019).

***Washington**

Policy Elements: Sales and use tax exemptions; removed utility spending restrictions on electric vehicle deployment planning; extension of existing tax credits for leased or purchased vehicles; sales tax exemption for battery purchases (including fuel cell) and infrastructure installation; directs study on barriers to low-income resident adoption; establishes a grant fund aimed at reducing carbon pollution from the transportation sector.

Description: Washington enacted comprehensive electric vehicle legislation in 2019 that removes cost restrictions and provides new funding mechanisms to support electric vehicle deployment in the state. In particular, HB 2042 removed a provision restricting electric utility transportation plans to only include measures that did not increase costs to customers above a certain threshold.

It also extended the existing tax credit for alternative vehicle purchases to cover up to 75% of incremental costs, provides for a tax credit covering up to 50% of the cost to purchase electric vehicle infrastructure and rescinds the previous tax credit expiration date of 2021 and instead provides that such credit will be available so long as funding is available. The bill also provides certain tax exemptions for alternative and hybrid vehicles, including sales and use tax exemptions for vehicles that are purchased or leased within a certain price range. It also amends the existing state sales tax exemption for electric vehicle battery purchases or installation—including infrastructure installation—to include fuel cells and hydrogen fueling stations and exempts the sale of zero-emission buses from sales taxes.

AMERICAN OVERSIGHT

Additionally, the bill directs the state Department of Commerce to conduct a study on barriers to electric vehicle adoption by lower-income residents, addressing opportunities to overcome such barriers and establishes a Green Transportation capital grant program to help fund projects to reduce carbon emissions from the state's transportation system. House Bill 2042 (2019).

Electric Vehicle Fees

Several states have enacted legislation imposing fees on electric vehicle owners to compensate for declining gas tax revenues resulting from the increasing efficiency of passenger vehicles. NCSL's Electric Vehicle Fee webpage provides information about such state policies, highlighting those states that had enacted relevant legislation as of October 2018. Below you'll find a summary of recent states legislation in this area.

Alabama enacted legislation in 2019 imposing an additional license tax and registration fee on electric vehicle owners of $200 and hybrid vehicles owners of $100 effective January 1, 2020. House Bill 2 (2019).

Arkansas enacted legislation in 2019 that imposes an additional fee on electric and hybrid vehicle owners of $200 and $100 respectively. Senate Bill 336 (2019).

Hawaii enacted legislation in 2019 that imposes an additional fee of $50 on electric and alternative fuel vehicles. Senate Bill 409 (2019).

Illinois enacted legislation in 2019 that assesses an additional $100 fee on electric vehicle owners in lieu of the payment of gasoline taxes, effective 2020. Ill. Rev. Stat. ch. 625 § 5/3-805.

Iowa enacted legislation in 2019 that requires an additional battery electric motor vehicle registration fee starting at $65 annually in 2020, increasing to $97 in 2021, up to $100 in 2022 and every year thereafter. Under the law, hybrid vehicle owners would also owe an additional plug-in hybrid registration fee starting at $32.50 annually in 2020, increasing to $48.75 in 2021, up to $65 in 2022 and every year thereafter. House File 767 (2019).

Kansas enacted legislation in 2019 that increased annual registration fees for hybrid and electric vehicles to $50 and $100 respectively compared to a standard passenger vehicle registration fee of $30 or $40 depending on vehicle weight. House Bill 2214 (2019).

North Dakota enacted legislation in 2019 imposing an additional road use fee on electric and hybrid vehicle owners of $20 and $50 respectively. Senate Bill 2061 (2019).

Ohio enacted legislation in 2019 imposing an additional fee on electric and hybrid vehicle owners of $200 and $100 respectively effective January 1, 2020. House Bill 62 (2019).

Washington was the latest state to enact legislation imposing fees on hybrid and EV owners. However, the fee was designed to support electric vehicle infrastructure and deployment as opposed to compensating for lost gas tax revenues. Washington state had previously exacted an electric vehicle registration renewal fee requiring EV owners to pay an additional $100 fee to compensate for lost gas tax revenue. Wa. Rev. Code 46.17.323. The state's new law requires electric vehicle owners to pay a separate $75 transportation electrification fee due at the time of registration renewal. Additionally, effective October 1, 2019, hybrid vehicle owners are subject to the $75 fee provided the vehicle owner is not subject to the $100 EV registration renewal fee described above. House Bill 2042 (2019).

Wyoming enacted legislation in 2019 increasing the annual registration (decal) fee for electric vehicle owners from $50 to $200, effective July 1, 2019. House Bill 166 (2019).

AMERICAN OVERSIGHT

Electric Vehicle Infrastructure

Alabama enacted House Bill 2 in 2019, establishing a state Electric Vehicle Transportation Infrastructure Grant Program to be administered by the state department of transportation. The bill also supports charging infrastructure deployment and a growing EV market by directing a certain percentage of an additional EV and hybrid registration fee to fund charging infrastructure until annual registrations of EVs and plug-in hybrids exceed 4% of all registered vehicles in the state. Once this 4% deployment target is reached, additional annual fees on electric vehicles and hybrids decrease by $50 and $25 respectively. House Bill 2 (2019).

California enacted Senate Bill 676 (2019) focusing on electric vehicle grid integration. In particular, the bill requires electric utilities to consider electric vehicle grid integration in their integrated resource planning and community choice aggregators to submit an annual report to the state public utility commission describing how current transportation electrification planning is expected to advance electric vehicle grid integration. It also tasks the state public utility commission with reviewing load-serving entity progress toward advancing electric vehicle grid integration. Senate Bill 676 (2019).

Colorado enacted Senate Bill 77 in 2019, which allows public utilities to recover costs for providing electric vehicle charging ports as a regulated service. It also requires that public utilities apply for utility commission approval to build charging facilities and places certain restrictions on rates for service. Additionally, the retail rate impact of a utility's electric vehicle infrastructure development must not exceed 0.5% of a utility's total annual revenue requirements. Senate Bill 77 (2019).

The state also enacted House Bill 1198 (2019), which modified the Washington's Electric Vehicle Grant Fund to allow for funding to install EV charging stations. It also strengthened funding requirements for the program by providing for continuous appropriation. The fund was previously subject to annual appropriation by the General Assembly. House Bill 1198 (2019).

Hawaii enacted House Bill 1585 (2019), authorizing the state public utility commission to administer a rebate program incentivizing installation of electric vehicle charging stations, including upgrades to existing charging facilities after December 31, 2019, provided the facility or upgrade meets certain statutory requirements. Installations of Level 2 charging stations are eligible for a $4,500 rebate and installations of direct fast charging stations are eligible for a $35,000 rebate. Upgrades to Level 2 charging stations are eligible for a $3,000 rebate and upgrades to direct fast charging station are eligible for a $28,000 rebate. Total rebates are capped at $500,000 per fiscal year. House Bill 1585 (2019).

New Mexico enacted legislation in 2019 that requires public utilities to file an application to expand transportation electrification with the state regulatory commission no later than January 1, 2021. Such applications may include investments or incentives aimed at increasing deployment of electric vehicle charging infrastructure, electrification of public transit, and customer education programming. House Bill 521 (2019).

Nevada amended its existing Electric Vehicle Infrastructure Demonstration Program to authorize incentive payments to public schools that install EV infrastructure or purchase electric vehicles to transport students. The incentives are capped at 75% of the cost of the infrastructure or vehicle. Senate Bill 299 (2019).

Virginia enacted legislation in 2018 requiring electric utilities to submit an annual plan for electric distribution grid transformation projects to the state corporation commission for review and approval. The bill defines electric distribution grid transformation projects to include "*electrical facilities and*

AMERICAN OVERSIGHT

infrastructure necessary to support electric vehicle charging systems." It also declares that such projects are in the public interest. Senate Bill 966 (2018)**.**

Washington enacted House Bill 1512 which authorizes municipal electric utility and utility district regulators to adopt transportation electrification plans. The bill also authorizes electric utilities regulated by the state public utilities and transportation commission to submit transportation electrification plans that deploy EV supply equipment or otherwise incentivize transportation electrification programing. Costs to consumers associated with such transportation electrification programming is capped at 0.25% above benefits to all consumers. House Bill 1512 (2019).

The state also enacted comprehensive energy efficiency legislation that, in part, requires all new buildings providing on-site parking to provide electric vehicle charging capability. House Bill 1257 (2019).

Rebates, Tax Credits and other Consumer Incentives

Maine, as part of the comprehensive legislation described above, established a rebate program for EV purchases and leases. It also established a non-lapsing Electric Vehicle Fund to support programs that encourage EV adoption in the state. House Paper 442 (2019).

Maryland, as part of the comprehensive legislation described above, Maryland increased the state's existing excise tax for electric vehicles to $3,000 regardless of battery capacity. It also raised the exemption's purchasing cost cap from $60,000 to $63,000.House Bill 1246 (2019).

Vermont, as part of a comprehensive transportation bill, directs the state transportation agency to implement an electric vehicle incentive program that includes a new plug-in electric vehicle lease incentive program. The program must offer incentives to lower-income households and has an expenditure requirement of at least $1.1 million. House Bill 529 (2019).

EV Infrastructure at Multi-Family Housing Units

California passed Senate Bill 638 in 2019 (sent to Governor Newsom for signature on Sept. 20), which would remove the requirement that a lessee seeking to install an electric vehicle charging station maintain a general liability insurance policy of $1,000,000 and instead require the lessee to obtain personal liability coverage not to exceed 10 times annual rent. Senate Bill 638 (2019).

Hawaii enacted House Bill 1585 in 2019, requiring the public utility commission to provide rebates to persons who install a new electric charging vehicle system or upgrade an existing EV charging system. Allows for 'homeowners associations' under the definition of applicant for the program. House Bill 1585 (2019).

Maryland enacted House Bill 1246 in 2019 creating a Maryland Zero Emission Electric Vehicle Infrastructure Council… to assist in developing and coordinating standards for permitting and installation of residential and commercial EV charging stations, including at multi-dwelling units, and develop a recommendation for a statewide EV charging infrastructure plan. House Bill 1246 (2019).

New York passed Senate Bill 5157 in 2019 (awaiting Governor's approval), which provides that no covenant, restriction, or condition contained in any deed, contract, security instrument, or other instrument affecting the transfer or sale of any interest in a condominium any by laws that prohibits or unreasonably restricts the installation of use of an EV charging station is void. Senate Bill 5157 (2019).

Subject: RETROACTIVITY FOR AGGRAVATED ASSAULT

October 3, 2019

Hello Governor DeSantis, Representatives and Senators,

I am writing to thank you for working on Criminal Justice Reform this year, i want to bring to your attention a wrong that started on July 1, 1999, Florida's 10-20-life went into effect. "USE A GUN AND YOUR DONE". Little did we know that in this included Aggravated Assault, which in the State of Florida Aggravated Assault is a 3rd degree felony, a verbal threat only. No physical harm could have been done to any victim in order for a person to be charged with aggravated assault. Before being swept up and included in 10-20-life, aggravated assault carried either a fine and probation or 5 years imprisonment, (with gain time). After July 1st 1999 firing a warning shot, no one hurt, the person received 20 years day for day no gain time.

Advance to 2016 17 years later, SB228 is written to correct this wrong. It is unanimously voted on in favor, one news article notes "The 38-0 vote reflects a growing belief by political leaders inflexible minimum mandatory sentencing laws can produce arbitrary and unjust penalties. The new legislation is supported by prosecutors and public defenders and has breezed through three House committees without a dissenting vote". It is passed and good riddens to this horrible sentence for a third degree felony. The people already serving 20 years for aggravated assault, finally had a little glimpse of hope, many already have served over 10 years. But wait, it is not made retroactive, why? A little thing called the "savings clause" this held up relief for approximate 180 people serving 20 years on a third degree felony.

Now we enter November 2018, Amendment 11 is passed by Florida voters, amending the Savings Clause. Prior to the amendment, the Savings Clause prohibited retroactive application of statutes or amendments that made a substantive change to a criminal law. The revision removed the word "amendment" so that only the repeal of a criminal law may not be retroactively applied. This change permits the legislature to retroactively apply an amendment to a criminal statute that decreases a criminal penalty.) Once again the glimmer of hope comes back to those trapped in the FLDOC nightmare a path to relief has been opened! But, once again another road block, called HB7069, halting the possibility for retroactivity on aggravated assault for 2019.

It has been said that after Amendment 11 passed a group of inmates records were reviewed, I know this for a fact as i received a call asking for names. Within the group of names reviewed, two names who were serving 20 years for aggravated assault as result of a plea deal. If retroactivity was granted for aggravated assault they would have benefited. That put the breaks on retroactivity in 2019 for the ones originally charged with aggravated assault. Another news article notes "Concerned that a "technical" constitutional amendment approved by voters last November could unintentionally lead to the repeal of innumerable criminal statutes, a House subcommittee has passed a clarifying bill. A comment was made, "bewildered at what appears to be the apathy of our House Representatives by not making retroactive Senate Bill 228 from 2016 in which aggravated Assault with a Firearm was removed from the mandatory 20-year sentence structure and became a maximum sentence of 5 years. If the sentencing was so harsh back in 2016 that it was reduced, how cruel is it to leave those that were sentenced under the old law without any legislative remedy? We simply cannot understand why House Representatives would not support retroactivity like the voters wanted, making this small simple change by implementing retroactivity on the reduced aggravated assault bill from 2016. This provision would have affected around 150 prisoners, that's than ¼ of 1 percent of the total prison population, hardly a jail break. It feels as if our House Representatives do not care about what the voters wanted when they overwhelmingly voted for retroactivity with the passage of Amendment 11 in the November elections. The passing of this amendment was the signal for legislators to pass retroactive reforms this year, which did not happen".

It is September 2019, Retroactivity must be provided to those who were charged with aggravated assault originally and are serving 20 years mandatory minimum due to the 10-20-life law. Third degree felonies should never have been part of the 10-20-life. If the person was originally charged with aggravated assault, again it is a verbal threat only, out of fear, they threatened to due harm, they had the means in which to do it. But their God given conscious did not allow them to harm anyone, instead out of fear they fired a warning shot to stop the madness from the other person(s). I heard one person say "they did the crime, they can serve the time". Yes the correct time 5 years with gain time, that is what they should serve. The i's have been dotted and all the t's crossed. It is now in your hands, you have the power and it is your moral responsibility to correct this terrible wrong from so long ago. Please do not make them wait any longer for the relief they are deserved.

Respectfully,

Jill Trask

seat or saddle for the use of the rider and is designed to travel with not more than two wheels in contact with the ground, but excludes a tractor, an electric bicycle, or a moped.

Section 2. Present subsections (22) through (104) of section 316.003, Florida Statutes, are redesignated as subsections (23) through (105), respectively, a new subsection (22) is added to that section, and subsection (4) and present subsections (41), (43), (44), (45), and (61) of that section are amended, to read:

316.003 Definitions.—The following words and phrases, when used in this chapter, shall have the meanings respectively ascribed to them in this section, except where the context otherwise requires:

(4) BICYCLE.—Every vehicle propelled solely by human power~~, and every motorized bicycle propelled by a combination of human power and an electric helper motor capable of propelling the vehicle at a speed of not more than 20 miles per hour on level ground upon which any person may ride~~, having two tandem wheels, and including any device generally recognized as a bicycle though equipped with two front or two rear wheels. The term does not include such a vehicle with a seat height of no more than 25 inches from the ground when the seat is adjusted to its highest position or a scooter or similar device. ~~A person under the age of 16 may not operate or ride upon a motorized bicycle.~~

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

(22) ELECTRIC BICYCLE.— A bicycle or tricycle equipped with fully operable pedals, except as provided for in subsection (b), a seat or saddle for the use of the rider, and an electric motor of less than 750 watts which meets the requirements of one of the following three classifications:

(a) "Class 1 electric bicycle" means an electric bicycle equipped with a motor that provides assistance only when the rider is pedaling and that ceases to provide assistance when the electric bicycle reaches the speed of 20 miles per hour.

(b) "Class 2 electric bicycle" means an electric bicycle, with or without operable pedals, equipped with a motor that may be used exclusively to propel the electric bicycle and that ceases to provide assistance when the electric bicycle reaches the speed of 20 miles per hour.

(c) "Class 3 electric bicycle" means an electric bicycle equipped with a motor that provides assistance only when the rider is pedaling and that ceases to provide assistance when the electric bicycle reaches the speed of 28 miles per hour.

(42) ~~(41)~~ MOPED.—Any vehicle with pedals to permit propulsion by human power, having a seat or saddle for the use of the rider and designed to travel on not more than three wheels, with a motor rated not in excess of 2 brake horsepower and not capable of propelling the vehicle at a speed greater than 30 miles per hour on level ground and with a power-drive system that functions directly or automatically without clutching or shifting gears by the operator after the drive

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

system is engaged. If an internal combustion engine is used, the

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

displacement may not exceed 50 cubic centimeters. The term does not include an electric bicycle.

(44) ~~(43)~~ MOTOR VEHICLE.—Except when used in s. 316.1001, a self-propelled vehicle not operated upon rails or guideway, but not including any bicycle, electric bicycle, motorized scooter, electric personal assistive mobility device, mobile carrier, personal delivery device, swamp buggy, or moped. For purposes of s. 316.1001, "motor vehicle" has the same meaning as provided in s. 320.01(1)(a).

(45) ~~(44)~~ MOTORCYCLE.—Any motor vehicle having a seat or saddle for the use of the rider and designed to travel on not more than three wheels in contact with the ground. The term includes an autocycle, but does not include a tractor, a moped, an electric bicycle, or any vehicle in which the operator is enclosed by a cabin unless it meets the requirements set forth by the National Highway Traffic Safety Administration for a motorcycle.

(46) ~~(45)~~ MOTORIZED SCOOTER.—Any vehicle or micromobility device that is powered by a motor with or without a seat or saddle for the use of the rider, which is designed to travel on not more than three wheels, and which is not capable of propelling the vehicle at a speed greater than 20 miles per hour on level ground. ~~The term does not include an electric bicycle.~~

(62) ~~(61)~~ PRIVATE ROAD OR DRIVEWAY.—Except as otherwise provided in paragraph (84)(b) ~~(83)(b)~~, any privately owned way

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

or place used for vehicular travel by the owner and those having express or implied permission from the owner, but not by other persons.

Section 3. Paragraph (b) of subsection (1) of section 316.027, Florida Statutes, is amended to read:

316.027 Crash involving death or personal injuries.—

(1) As used in this section, the term:

(b) "Vulnerable road user" means:

1. A pedestrian, including a person actually engaged in work upon a highway, or in work upon utility facilities along a highway, or engaged in the provision of emergency services within the right-of-way;

2. A person operating a bicycle, an electric bicycle, a motorcycle, a scooter, or a moped lawfully on the roadway;

3. A person riding an animal; or

4. A person lawfully operating on a public right-of-way, crosswalk, or shoulder of the roadway:

a. A farm tractor or similar vehicle designed primarily for farm use;

b. A skateboard, roller skates, or in-line skates;

c. A horse-drawn carriage;

d. An electric personal assistive mobility device; or

e. A wheelchair.

Section 4. Subsection (1) of section 316.083, Florida Statutes, is amended to read:

CODING: Words stricken are deletions; words underlined are additions.

AMERICAN OVERSIGHT

316.083 Overtaking and passing a vehicle.—The following rules shall govern the overtaking and passing of vehicles proceeding in the same direction, subject to those limitations, exceptions, and special rules hereinafter stated:

(1) The driver of a vehicle overtaking another vehicle proceeding in the same direction shall give an appropriate signal as provided for in s. 316.156, shall pass to the left thereof at a safe distance, and shall not again drive to the right side of the roadway until safely clear of the overtaken vehicle. The driver of a vehicle overtaking a bicycle or other nonmotorized vehicle, or an electric bicycle, must pass the bicycle, ~~or~~ other nonmotorized vehicle, or electric bicycle at a safe distance of not less than 3 feet between the vehicle and the bicycle, ~~or~~ other nonmotorized vehicle, or electric bicycle.

Section 5. Section 316.1995, Florida Statutes, is amended to read:

316.1995 Driving upon sidewalk or bicycle path.—

(1) Except as provided in s. 316.008, s. 316.20655, s. 316.212(8), or s. 316.2128, a person may not drive any vehicle other than by human power upon a bicycle path, sidewalk, or sidewalk area, except upon a permanent or duly authorized temporary driveway.

(2) A violation of this section is a noncriminal traffic infraction, punishable as a moving violation as provided in chapter 318.

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

(3) This section does not apply to motorized wheelchairs.

Section 6. Section 316.20655, Florida Statutes, is created to read:

316.20655 Electric bicycle regulations.—

(1) Except as otherwise provided in this section, an electric bicycle or an operator of an electric bicycle shall be afforded all the rights and privileges, and be subject to all of the duties, of a bicycle or the operator of a bicycle, including s. 316.2065. An electric bicycle is a vehicle to the same extent as a bicycle.

(2) An electric bicycle or an operator of an electric bicycle is not subject to the provisions of law relating to financial responsibility, driver or motor vehicle licenses, vehicle registration, title certificates, off-highway motorcycles, or off-highway vehicles.

(3) Beginning on January 1, 2021, manufacturers and distributors of electric bicycles shall apply a label that is permanently affixed in a prominent location to each electric bicycle. The label must contain the classification number, top assisted speed, and motor wattage of the electric bicycle.

(4) A person may not tamper with or modify an electric bicycle so as to change the motor-powered speed capability or engagement of an electric bicycle, unless the label indicating the classification number required in subsection (3) is replaced after such modification.

CODING: Words stricken are deletions; words underlined are additions.

AMERICAN OVERSIGHT

(5) All ~~An~~ electric bicycle components must comply with the equipment and manufacturing requirements for bicycles adopted by the United States Consumer Product Safety Commission under 16 C.F.R. part 1512.

(6) An electric bicycle must operate in a manner so that the electric motor is disengaged or ceases to function when the rider stops pedaling or when the brakes are applied.

(7)(a) An operator may ride an electric bicycle where bicycles are allowed, including, but not limited to, streets, highways, roadways, shoulders, bicycle lanes, and bicycle or multiuse paths.

(b) Following notice and a public hearing, a municipality, county, or agency of the state having jurisdiction over a bicycle or multiuse path may restrict or prohibit the operation of an electric bicycle on the path if the municipality, county, or agency finds that such a restriction is necessary in the interest of public safety or to comply with other laws or legal obligations.

Section XXXX

Section 316.003, Florida Statutes, is amended to read:

Section 316.003 Definitions.

(38) MICROMOBILITY DEVICE. —Any motorized transportation device made available for private use by reservation through an online application, website, or software for point-to-point trips and which is not capable of traveling at a speed greater than 20 miles per hour on level ground. This term includes motorized scooters, electric bicycles and bicycles

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

as defined in this chapter.

Section XXXX

Section 316.2128, Florida Statutes, is amended to read:

316.2128 Micromobility devices, motorized scooters, and miniature motorcycles; requirements.—

(7)To be eligible and qualified to offer motorized scooters or micromobility devices for hire, the provider shall make a helmet available to its users at the time of each use, including without limitation, by physically attaching a helmet to such device.

Section 7. Paragraph (e) of subsection (2) of section 316.613, Florida Statutes, is amended to read:

316.613 Child restraint requirements.—

(2) As used in this section, the term "motor vehicle" means a motor vehicle as defined in s. 316.003 that is operated on the roadways, streets, and highways of the state. The term does not include:

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-005801

(e) A motorcycle, a moped, a ~~or~~ bicycle, or an electric bicycle.

Section 8. Paragraph (a) of subsection (3) of section 316.614, Florida Statutes, is amended to read:

316.614 Safety belt usage.—

(3) As used in this section:

(a) "Motor vehicle" means a motor vehicle as defined in s. 316.003 which is operated on the roadways, streets, and highways of this state. The term does not include:

1. A school bus.

2. A bus used for the transportation of persons for compensation.

3. A farm tractor or implement of husbandry.

4. A truck having a gross vehicle weight rating of more than 26,000 pounds.

5. A motorcycle, a moped, a ~~or~~ bicycle, or an electric bicycle.

Section 9. Paragraph (a) of subsection (1) of section 320.01, Florida Statutes, is amended to read:

320.01 Definitions, general.—As used in the Florida Statutes, except as otherwise provided, the term:

(1) "Motor vehicle" means:

(a) An automobile, motorcycle, truck, trailer, semitrailer, truck tractor and semitrailer combination, or any other vehicle operated on the roads of this state, used to

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

transport persons or property, and propelled by power other than muscular power, but the term does not include traction engines, road rollers, motorized scooters, micromobility devices, personal delivery devices and mobile carriers as defined in s. 316.003, special mobile equipment as defined in s. 316.003, vehicles that run only upon a track, bicycles, electric bicycles, swamp buggies, or mopeds.

Section 10. Subsections (27) and (44) of section 322.01, Florida Statutes, are amended to read:

322.01 Definitions.—As used in this chapter:

(27) "Motor vehicle" means any self-propelled vehicle, including a motor vehicle combination, not operated upon rails or guideway, excluding vehicles moved solely by human power, motorized wheelchairs, and electric ~~motorized~~ bicycles as defined in s. 316.003.

(44) "Vehicle" means every device in, upon, or by which any person or property is or may be transported or drawn upon a public highway or operated upon rails or guideway, except a bicycle, motorized wheelchair, or electric ~~motorized~~ bicycle.

Section 11. Subsection (1) of section 324.021, Florida Statutes, is amended to read:

324.021 Definitions; minimum insurance required.—The following words and phrases when used in this chapter shall, for the purpose of this chapter, have the meanings respectively ascribed to them in this section, except in those instances

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

where the context clearly indicates a different meaning:

(1) MOTOR VEHICLE.—Every self-propelled vehicle that is designed and required to be licensed for use upon a highway, including trailers and semitrailers designed for use with such vehicles, except traction engines, road rollers, farm tractors, power shovels, and well drillers, and every vehicle that is propelled by electric power obtained from overhead wires but not operated upon rails, but not including any personal delivery device or mobile carrier as defined in s. 316.003, bicycle, electric bicycle, or moped. However, the term "motor vehicle" does not include a motor vehicle as defined in s. 627.732(3) when the owner of such vehicle has complied with the requirements of ss. 627.730-627.7405, inclusive, unless the provisions of s. 324.051 apply; and, in such case, the applicable proof of insurance provisions of s. 320.02 apply.

Section 12. Paragraph (b) of subsection (1) of section 403.717, Florida Statutes, is amended to read:

403.717 Waste tire and lead-acid battery requirements.—

(1) For purposes of this section and ss. 403.718 and 403.7185:

(b) "Motor vehicle" means an automobile, motorcycle, truck, trailer, semitrailer, truck tractor and semitrailer combination, or any other vehicle operated in this state, used to transport persons or property and propelled by power other than muscular power. The term does not include traction engines,

CODING: Words stricken are deletions; words underlined are additions.

AMERICAN OVERSIGHT

road rollers, vehicles that run only upon a track, bicycles, electric bicycles, mopeds, or farm tractors and trailers.

Section 13. Subsection (14) of section 681.102, Florida Statutes, is amended to read:

681.102 Definitions.—As used in this chapter, the term:

(14) "Motor vehicle" means a new vehicle, propelled by power other than muscular power, which is sold in this state to transport persons or property, and includes a recreational vehicle or a vehicle used as a demonstrator or leased vehicle if a manufacturer's warranty was issued as a condition of sale, or the lessee is responsible for repairs, but does not include vehicles run only upon tracks, off-road vehicles, trucks over 10,000 pounds gross vehicle weight, motorcycles, mopeds, electric bicycles, or the living facilities of recreational vehicles. "Living facilities of recreational vehicles" are those portions designed, used, or maintained primarily as living quarters and include, but are not limited to, the flooring, plumbing system and fixtures, roof air conditioner, furnace, generator, electrical systems other than automotive circuits, the side entrance door, exterior compartments, and windows other than the windshield and driver and front passenger windows.

Section 14. Section 320.08, Florida Statutes, is amended to read:

320.08 License taxes.—Except as otherwise provided herein, there are hereby levied and imposed annual license taxes for the

CODING: Words stricken are deletions; words underlined are additions.

AMERICAN OVERSIGHT

operation of motor vehicles, mopeds, ~~motorized bicycles as defined in s. 316.003(4),~~ tri-vehicles as defined in s. 316.003, and mobile homes as defined in s. 320.01, which shall be paid to and collected by the department or its agent upon the registration or renewal of registration of the following:

(1) MOTORCYCLES AND MOPEDS.—

(a) Any motorcycle: $10 flat.

(b) Any moped: $5 flat.

(c) Upon registration of a motorcycle, motor-driven cycle, or moped, in addition to the license taxes specified in this subsection, a nonrefundable motorcycle safety education fee in the amount of $2.50 shall be paid. The proceeds of such additional fee shall be deposited in the Highway Safety Operating Trust Fund to fund a motorcycle driver improvement program implemented pursuant to s. 322.025, the Florida Motorcycle Safety Education Program established in s. 322.0255, or the general operations of the department.

(d) An ancient or antique motorcycle: $7.50 flat.

(2) AUTOMOBILES OR TRI-VEHICLES FOR PRIVATE USE.—

(a) An ancient or antique automobile, as defined in s. 320.086, or a street rod, as defined in s. 320.0863: $7.50 flat.

(b) Net weight of less than 2,500 pounds: $14.50 flat.

(c) Net weight of 2,500 pounds or more, but less than 349 3,500 pounds: $22.50 flat.

(d) Net weight of 3,500 pounds or more: $32.50 flat.

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

(3) TRUCKS.—

(a) Net weight of less than 2,000 pounds: $14.50 flat.

(b) Net weight of 2,000 pounds or more, but not more than 3,000 pounds: $22.50 flat.

(c) Net weight more than 3,000 pounds, but not more than 5,000 pounds: $32.50 flat.

(d) A truck defined as a "goat," or other vehicle if used in the field by a farmer or in the woods for the purpose of harvesting a crop, including naval stores, during such harvesting operations, and which is not principally operated upon the roads of the state: $7.50 flat. The term "goat" means a motor vehicle designed, constructed, and used principally for the transportation of citrus fruit within citrus groves or for the transportation of crops on farms, and which can also be used for hauling associated equipment or supplies, including required sanitary equipment, and the towing of farm trailers.

(e) An ancient or antique truck, as defined in s. 320.086: $7.50 flat.

(4) HEAVY TRUCKS, TRUCK TRACTORS, FEES ACCORDING TO GROSS VEHICLE WEIGHT.—

(a) Gross vehicle weight of 5,001 pounds or more, but less than 6,000 pounds: $60.75 flat.

(b) Gross vehicle weight of 6,000 pounds or more, but less than 8,000 pounds: $87.75 flat.

(c) Gross vehicle weight of 8,000 pounds or more, but less

CODING: Words stricken are deletions; words underlined are additions.

AMERICAN OVERSIGHT

than 10,000 pounds: $103 flat.

(d) Gross vehicle weight of pounds or more, but 10,000 less than 15,000 pounds: $118 flat.

(e) Gross vehicle weight of pounds or more, but 15,000 less than 20,000 pounds: $177 flat.

(f) Gross vehicle weight of pounds or more, but 20,000 less than 26,001 pounds: $251 flat.

(g) Gross vehicle weight of pounds or more, but 26,001 less than 35,000: $324 flat.

(h) Gross vehicle weight of pounds or more, but 35,000 less than 44,000 pounds: $405 flat.

(i) Gross vehicle weight of pounds or more, but 44,000 less than 55,000 pounds: $773 flat.

(j) Gross vehicle weight of pounds or more, but 55,000 less than 62,000 pounds: $916 flat.

(k) Gross vehicle weight of pounds or more, but 62,000 less than 72,000 pounds: $1,080 flat.

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

(l) Gross vehicle weight of 72,000 pounds or more: $1,322 flat.

(m) Notwithstanding the declared gross vehicle weight, a truck tractor used within the state or within a 150-mile radius of its home address is eligible for a license plate for a fee of $324 flat if:

1. The truck tractor is used exclusively for hauling forestry products; or

CODING: Words stricken are deletions; words underlined are additions.

AMERICAN OVERSIGHT

2. The truck tractor is used primarily for the hauling of forestry products, and is also used for the hauling of associated forestry harvesting equipment used by the owner of the truck tractor.

(n) A truck tractor or heavy truck, not operated as a for-hire vehicle and which is engaged exclusively in transporting raw, unprocessed, and nonmanufactured agricultural or horticultural products within the state or within a 150-mile radius of its home address is eligible for a restricted license plate for a fee of:

1. If such vehicle's declared gross vehicle weight is less than 44,000 pounds, $87.75 flat.

2. If such vehicle's declared gross vehicle weight is 44,000 pounds or more and such vehicle only transports from the point of production to the point of primary manufacture; to the point of assembling the same; or to a shipping point of a rail, water, or motor transportation company, $324 flat.

Such not-for-hire truck tractors and heavy trucks used exclusively in transporting raw, unprocessed, and nonmanufactured agricultural or horticultural products may be incidentally used to haul farm implements and fertilizers delivered direct to the growers. The department may require any documentation deemed necessary to determine eligibility before issuance of this license plate. For the purpose of this

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

paragraph, "not-for-hire" means the owner of the motor vehicle must also be the owner of the raw, unprocessed, and nonmanufactured agricultural or horticultural product, or the user of the farm implements and fertilizer being delivered.

(5) SEMITRAILERS, FEES ACCORDING TO GROSS VEHICLE WEIGHT; SCHOOL BUSES; SPECIAL PURPOSE VEHICLES.—

(a)1. A semitrailer drawn by a GVW truck tractor by means of a fifth-wheel arrangement: $13.50 flat per registration year or any part thereof.

2. A semitrailer drawn by a GVW truck tractor by means of a fifth-wheel arrangement: $68 flat per permanent registration.

(b) A motor vehicle equipped with machinery and designed for the exclusive purpose of well drilling, excavation, construction, spraying, or similar activity, and which is not designed or used to transport loads other than the machinery described above over public roads: $44 flat.

(c) A school bus used exclusively to transport pupils to and from school or school or church activities or functions within their own county: $41 flat.

(d) A wrecker, as defined in s. 320.01, which is used to tow a vessel as defined in s. 327.02, a disabled, abandoned, stolen-recovered, or impounded motor vehicle as defined in s. 320.01, or a replacement motor vehicle as defined in s. 320.01: $41 flat.

(e) A wrecker that is used to tow any nondisabled motor

CODING: Words stricken are deletions; words underlined are additions.

AMERICAN OVERSIGHT

vehicle, a vessel, or any other cargo unless used as defined in paragraph (d), as follows:

1. Gross vehicle weight of 10,000 pounds or more, but less than 15,000 pounds: $118 flat.

2. Gross vehicle weight of 15,000 pounds or more, but less than 20,000 pounds: $177 flat.

3. Gross vehicle weight of 20,000 pounds or more, but less than 26,000 pounds: $251 flat.

4. Gross vehicle weight of 26,000 pounds or more, but less than 35,000 pounds: $324 flat.

5. Gross vehicle weight of 35,000 pounds or more, but less than 44,000 pounds: $405 flat.

6. Gross vehicle weight of 44,000 pounds or more, but less than 55,000 pounds: $772 flat.

7. Gross vehicle weight of 55,000 pounds or more, but less than 62,000 pounds: $915 flat.

8. Gross vehicle weight of 62,000 pounds or more, but less than 72,000 pounds: $1,080 flat.

9. Gross vehicle weight of 72,000 pounds or more: $1,322 flat.

(f) A hearse or ambulance: $40.50 flat.

(6) MOTOR VEHICLES FOR HIRE.—

(a) Under nine passengers: $17 flat plus $1.50 per cwt.

(b) Nine passengers and over: $17 flat plus $2 per cwt.

(7) TRAILERS FOR PRIVATE USE.—

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

(a) Any trailer weighing 500 pounds or less: $6.75 flat per year or any part thereof.

(b) Net weight over 500 pounds: $3.50 flat plus $1 per cwt.

(8) TRAILERS FOR HIRE.—

(a) Net weight under 2,000 pounds: $3.50 flat plus $1.50 per cwt.

(b) Net weight 2,000 pounds or more: $13.50 flat plus $1.50 per cwt.

(9) RECREATIONAL VEHICLE-TYPE UNITS.—

(a) A travel trailer or fifth-wheel trailer, as defined by s. 320.01(1)(b), that does not exceed 35 feet in length: $27 flat.

(b) A camping trailer, as defined by s. 320.01(1)(b)2.: $13.50 flat.

(c) A motor home, as defined by s. 320.01(1)(b)4.:

1. Net weight of less than 4,500 pounds: $27 flat.

2. Net weight of 4,500 pounds or more: $47.25 flat.

(d) A truck camper as defined by s. 320.01(1)(b)3.:

1. Net weight of less than 4,500 pounds: $27 flat.

2. Net weight of 4,500 pounds or more: $47.25 flat.

(e) A private motor coach as defined by s. 320.01(1)(b)5.:

1. Net weight of less than 4,500 pounds: $27 flat.

2. Net weight of 4,500 pounds or more: $47.25 flat.

(10) PARK TRAILERS; TRAVEL TRAILERS; FIFTH-WHEEL TRAILERS;

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

35 FEET TO 40 FEET.—

(a) *Park trailers.*—Any park trailer, as defined in s. 320.01(1)(b)7.: $25 flat.

(b) *Travel trailers or fifth-wheel trailers.*—A travel trailer or fifth-wheel trailer, as defined in s. 320.01(1)(b), that exceeds 35 feet: $25 flat.

(11) MOBILE HOMES.—

(a) A mobile home not exceeding 35 feet in length: $20 flat.

(b) A mobile home over 35 feet in length, but not exceeding 40 feet: $25 flat.

(c) A mobile home over 40 feet in length, but not exceeding 45 feet: $30 flat.

(d) A mobile home over 45 feet in length, but not exceeding 50 feet: $35 flat.

(e) A mobile home over 50 feet in length, but not exceeding 55 feet: $40 flat.

(f) A mobile home over 55 feet in length, but not exceeding 60 feet: $45 flat.

(g) A mobile home over 60 feet in length, but not exceeding 65 feet: $50 flat.

(h) A mobile home over 65 feet in length: $80 flat.

(12) DEALER AND MANUFACTURER LICENSE PLATES.—A franchised motor vehicle dealer, independent motor vehicle dealer, marine boat trailer dealer, or mobile home dealer and manufacturer

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

license plate: $17 flat.

(13) EXEMPT OR OFFICIAL LICENSE PLATES.—Any exempt or official license plate: $4 flat, except that the registration or renewal of a registration of a marine boat trailer exempt under s. 320.102 is not subject to any license tax.

(14) LOCALLY OPERATED MOTOR VEHICLES FOR HIRE.—A motor vehicle for hire operated wholly within a city or within 25 miles thereof: $17 flat plus $2 per cwt.

(15) TRANSPORTER.—Any transporter license plate issued to a transporter pursuant to s. 320.133: $101.25 flat.

Section 15. Paragraph (a) of subsection (3) of section 316.306, Florida Statutes, is amended to read:

316.306 School and work zones; prohibition on the use of a wireless communications device in a handheld manner.—

(3)(a)1. A person may not operate a motor vehicle while using a wireless communications device in a handheld manner in a designated school crossing, school zone, or work zone area as defined in s. 316.003(105) ~~s. 316.003(104)~~. This subparagraph shall only be applicable to work zone areas if construction personnel are present or are operating equipment on the road or immediately adjacent to the work zone area. For the purposes of this paragraph, a motor vehicle that is stationary is not being operated and is not subject to the prohibition in this paragraph.

2.a. During the period from October 1, 2019, through

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

December 31, 2019, a law enforcement officer may stop motor vehicles to issue verbal or written warnings to persons who are in violation of subparagraph 1. for the purposes of informing and educating such persons of this section. This sub-subparagraph shall stand repealed on October 1, 2020.

b. Effective January 1, 2020, a law enforcement officer may stop motor vehicles and issue citations to persons who are driving while using a wireless communications device in a handheld manner in violation of subparagraph 1.

Section 16. Subsection (1) of section 655.960, Florida Statutes, is amended to read:

655.960 Definitions; ss. 655.960-655.965.—As used in this section and ss. 655.961-655.965, unless the context otherwise requires:

(1) "Access area" means any paved walkway or sidewalk which is within 50 feet of any automated teller machine. The term does not include any street or highway open to the use of the public, as defined in s. 316.003(84)(a) or (b) ~~s. 316.003(83)(a) or (b)~~, including any adjacent sidewalk, as defined in s. 316.003.

Section 17. This act shall take effect July 1, 2020.

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

Subject: SB 1148 E-Bikes

Sen. Brandes,

Thank you for taking my call and agreeing to removing the language of concern to our municipalities. Per our discussion, listed below is the language we would like removed from SB 1148:

Lines 211 – 217:

(b) Following notice and a public hearing, a municipality, county, or agency of the state having jurisdiction over a bicycle or multiuse path may restrict or prohibit the operation of an electric bicycle on the path if the municipality, county, or agency finds that such a restriction is necessary in the interest of public safety or to comply with other laws or legal obligations.

As always, I look forward to our continue work on Transportation issues.

Subject: SB 1148
Attachment(s): "2020 Bicycle Amendments.docx"

Melissa and Zach,

I do hope both of you and Senator Brandes had a wonderful holiday break. I also wish to thank the Senator again for meeting with me prior to Christmas to discuss SB 1148.

The Florida Bicycle Association is supportive of SB 1148 and HB 971. During our conversation on December 20, I asked the Senator to consider a few amendments to SB 1148 (attached as well):

Regarding bicycle helmets:
316.2065 Bicycle regulations (current)–
(2)(d) A bicycle rider or passenger who is under 16 years of age must wear a bicycle helmet that is properly fitted and is fastened securely upon the passenger's head by a strap and that meets the federal safety standard for bicycle helmets, final rule, 16 C.F.R. part 1203. ~~A helmet purchased before October 1, 2012, which meets the standards of the American National Standards Institute (ANSI Z 90.4 Bicycle Helmet Standards), the standards of the Snell Memorial Foundation (1984 Standard for Protective Headgear for Use in Bicycling), or any other nationally recognized standards for bicycle helmets adopted by the department may continue to be worn by a bicycle rider or passenger until January 1, 2016.~~* As used in this subsection, the term "passenger" includes a child who is riding in a trailer or semitrailer attached to a bicycle.

*FBA recommends an amendment to SB 1148 and HB 971 to strike out the language above due to the years in the current statute being past.

Regarding bicycle seat height:
316.003 Definitions (current) –
(4) BICYCLE.—Every vehicle propelled solely by human power, and every motorized bicycle propelled by a combination of human power and an electric helper motor capable of propelling the vehicle at a speed of not more than 20 miles per hour on level ground upon which any person may ride, having two tandem wheels, and including any device generally recognized as a bicycle though equipped with two front or two rear wheels. The term does not include ~~such a vehicle with a seat height of no more than 25 inches from the ground when the seat is adjusted to its highest position or~~* a scooter or similar device. A person under the age of 16 may not operate or ride upon a motorized bicycle.

* FBA recommends an amendment to SB 1148 and HB 971 to strike out the language above due to the restriction being imposed prior to the popularity of adult recumbents and recumbent tricycles. FBA has been informed by membership that insurance companies will not insure their recumbent bicycles or tricycles due to this restriction. These bicycles may be valued at $2,000 or more. The deletion has been discussed with the Florida Department of Transportation and is felt to be the best way to adjust the definition as opposed to creating definitions with every advance in technology.

Regarding current Bicycle definition and proposed Electric Bicycle definitions and Micro Mobility devices:
316.003 Definitions (current) –
(4) BICYCLE.—Every vehicle propelled solely by human power, ~~and every motorized bicycle propelled by a combination of human power and an electric helper motor capable of propelling the vehicle at a speed of not more than 20 miles per hour on level ground upon which any person may ride~~*, having two tandem wheels, and including any device generally recognized as a bicycle though equipped with two front or two rear wheels. The term does not include such a vehicle with a seat height of no more than 25 inches from the ground when the seat is adjusted to its highest position or a scooter or similar device. A person under the age of 16 may not operate or ride upon a motorized bicycle.

***SB 1148 and HB 971 propose the above strikeout language to current Bicycle statute** (FBA is recommending the highlighted language to be stricken, see above.)

SB 1148 and HB 971 provide the following for Electric Bicycle definitions:
(22) ELECTRIC BICYCLE.—A bicycle or tricycle equipped with fully operable pedals, a seat or saddle for the use of the rider, and an electric motor of less than 750 watts which meets the requirements of one of the following three classifications: (a) "Class 1 electric bicycle" means an electric bicycle equipped with a motor that provides assistance only when the rider is pedaling and that ceases to provide assistance when the electric bicycle reaches the speed of 20 miles per hour. (b) "Class 2 electric bicycle" means an electric bicycle equipped with a motor that may be used exclusively to propel the electric bicycle and that ceases to provide assistance when the electric bicycle reaches the speed of 20 miles per hour. (c) "Class 3 electric bicycle" means an electric bicycle equipped with a motor that provides assistance only when the rider is pedaling and that ceases to provide assistance when the electric bicycle reaches the speed of 28 miles per hour.

AMERICAN OVERSIGHT

(language highlighted to demonstrate need for amendment)

316.003 Definitions (current) –
(38) MICROMOBILITY DEVICE.—Any motorized transportation device made available for private use by reservation through an online application, website, or software for point-to-point trips and which is not capable of traveling at a speed greater than 20 miles per hour on level ground. This term includes motorized scooters and bicycles as defined in this chapter.*
(language highlighted to demonstrate need for amendment)

*FBA recommends an amendment to SB 1148 and HB 971 to change Micromobility Device definition to reflect a **Class 2 Electric Bicycle** as only the proposed Class 1 and Class 2 Electric Bicycle definitions would match up best with the Bicycle definition proposed by SB 1148 and HB 971 because both these Classes keep human power in the definition.

I appreciate your time and consideration of these proposed amendments. If you have any questions, please don't hesitate to contact me.

Happy 2020!
Becky

RE: Written Testimony – SB 1354

Dear Chairman Baxley and members of the committee:

On behalf of more than 130,000 members and supporters state-wide, the American Civil Liberties Union (ACLU) of Florida provides this written testimony on SB 1354, re: Statewide Voter Registration Application. We respectfully request that this testimony be included in the record of the meeting and made available to the public in the committee packet/record meeting notes.

Further, we support SB 1354 in substance, with the following observations.

In order to achieve a fair and uniform electoral process, the uniform statewide voter registration application needs to be concise, readily understandable and easy to complete. An excess of questions lends to confusion and difficulties designing a voter registration form that is readily understandable and easy to use by individual Floridians who wish to participate in our electoral process. Prior to SB 7066, question #2 of the pre-2019 form asked individuals to "*affirm that I am not a convicted felon, or if I am, my right to vote has been restored.*" The present legislation (SB 1354) eliminates additional questions required by SB 7066 and nearly conforms the wording of the form to its pre-2019 version. We note that the proposed wording in SB 1354 is not an exact match to the pre-2019 form, stating "*I affirm I have never been convicted of a felony or, if I have been, my rights relating to voting have been restored.*" (line 23-25).

While there seems to be no substantive difference between the pre-2019 prior form and the proposed new language, the statutory wording varies slightly. While this may just be a drafting oversight, we are concerned that, because of the difference, someone might assert that a new form needs to be promulgated instead of reverting back to the pre-2019 form. This would delay implementation and add further confusion for voters. In order to ensure that upon the effective date of the legislation the pre-2019 form can continue to be used without interruption we respectfully request that the statutory language conform to the pre-2019 form that is presently in use.

Thank you for your consideration of the above and please do not hesitate to contact me at kbailey@aclufl.org (786) 363-2713, if you have any questions or would like any additional information.

Sincerely,

Kirk Bailey
Political Director

AMERICAN OVERSIGHT

SB 1372 by Senator Brandes
Senate Ethics and Elections Committee
February 3 - 4:00pm

This explains the strike all.

This bill was brought to me by the Florida Supervisors of Elections to handle some technical issues that need to be addressed in Florida's election laws. There are five issues in this bill:

First, in last year's bill we allowed canvassing of mail petitions up to 22 days prior to the early voting to deal with the increased volume of vote by mail ballots. What we didn't do was extend when the Supervisors needed to complete their Logistics & Accuracy Testing to prior to the canvassing taking place, so the bill moves this testing to 25 days before the start of early voting (was 10 days).

Second, last year we extended many of the time frames for vote by mail for regular elections to give voters more time to return their ballots. We did not change those for Mail Only Elections, which we match up with this bill.

We remove the requirement to duplicate over-voted ballots in the law. Today's technology counts them as over-votes already and are not counted, and if a ballot needs to be duplicated because it was damaged or is otherwise flawed, then it is unnecessary to spend the time to duplicate an over-voted ballot.

Fourth, we allow state committeeman and women to prequalify 14 days before qualifying week just like any other candidate. Currently they were only allowed to qualify during qualifying week which added additional workload during a Supervisor's qualifying week. (in the bill as filed it eliminates the start date, which could allow people to qualify years in advance - the strike all matches it up with the two week prequalifying times of other candidates)

Last, we fix a conflict in 101.043 where one section of law says you can confirm the residency of a voter using their drivers license and the next paragraph says you cannot use the address to confirm their legal residence. This strikes the inconsistency and leaves the law that when you use a Drivers License or I.D. card and your address matches it confirms your legal residency for voting. As a side note and a reminder, of the twelve valid forms of photo ID allowed under Florida law only these two I mentioned have an address - the remaining 10 either do not have or have no requirement under law to have a voters residence address on them. (the bill as filed inadvertently eliminated too much of the language in the bill, and we cleaned that up with the strike all)

Subject: SB 1372 Voter ID Provision

Good afternoon,

My name is Zachariah Chou and I am writing a freelance op-ed for The Guardian. I wanted to ask you about your recently filed bill.

Concerning the striking out of "The address appearing on the identification presented by the elector may not be used as the basis to confirm an elector's legal residence or otherwise challenge an elector's legal residence," I wanted to ask what is the intention behind this change and if the addresses on the IDs will need to match where people are registered.

Additionally, in what instances would a person's address need to be confirmed or challenged?

Best,
Zachariah Chou

Subject: SB 1716 and Proposed Amendment
Attachment(s): "OffenderReentryProgramAmendment 1.10.2020.pdf","WORD Cover letter for Senators 1.10.2020.docx"

Dear Senator Jeff Brandes:

Greetings:

My name is Pam Cassidy

First, I would like to thank you and voice my support, as well as all of my family's, support for SB 1716, introduced by you. This bill would reduce prison costs millions over the next few years, not to mention, the reuniting of many with their loving family. We have prayed very hard for something like this to be introduced. We now pray with all of our hearts it is passed. You can put a face to the name by looking at the 'Wasted Minds' article by Gatehouse Media. My son Roger Cassidy is one they interviewed who is taking classes at Tomoka through Stetson University.

Second is to inform you of Initiative 19-04, a proposed Florida Constitutional Amendment titled the "Offender Reentry Program" Amendment (ORPA) sponsored by Floridians For Redeemable People (FFRP). ORPA will add to Article IV, section 8 of the Florida Constitution, a subsection (c): "Offender Reentry Program" and will extend the authority of the Commission on Offender Review to review individuals, including juveniles, currently ineligible for parole for "Reintegration Status"—think of it as parole, but a completely new and distinct release mechanism. Eligible individuals will have an opportunity to earn Reintegration Status by completing certain requisites set by the Commission. Individuals will demonstrate personal merit through institutional conduct and by focusing on prolonged and sustained participation in educational and rehabilitative programming. We ask that you read the attached cover letter and the reasoning behind it (ORPA Manifesto), both attached hereto. Also attached in the Manifesto you will find a copy of the Petition 19-04. We are positioning ourselves to have this amendment placed on the 2022 ballot.

Thank you for your time.

Thank you

AMERICAN OVERSIGHT

Introduction

Shortcomings in Florida's current criminal justice policies foster an oppressive and hopeless prison culture. For example, Florida provides inadequate educational and rehabilitative programming opportunities for incarcerated individuals in general, but especially for individuals with lengthy sentences. Further, Florida offers no incentives for incarcerated individuals to participate in available programs and no review mechanism for their early release under any circumstance. Such policies, taken together, have led to a myriad of complications such as mental health issues, violence, drug use, death by drug overdose, and suicide inside Florida's prisons. Moreover, these policies, the result of decades of overly punitive sentencing, have resulted in sky-high recidivism rates for individuals after release from prison and a growing yearly corrections budget approaching 3 billion dollars annually.

The Offender Reentry Program Amendment (**ORPA**) is a proposed Florida Constitutional Amendment sponsored by *Floridians For Redeemable People* (FFRP) and introduced via Citizen Initiative 19-04. Initiative 19-04 is a growing movement by Floridians exhausted by the Legislature's inaction, year after year, on the issues of mass incarceration in the sunny State of Florida and the high percentage of tax dollars spent housing individuals sentenced to overly punitive prison terms that harm, rather than help, individuals and the community.

ORPA will add to Article IV, section 8 of the Florida Constitution, a subsection (c): "Offender Reentry Program." This subsection will extend the authority of the Florida Commission on Offender Review (the Commission) to review individuals pursuant to a new form of supervised release termed "Reintegration Status." **ORPA**'s purpose is two-fold: (1) to foster a prison culture conducive to rehabilitation, and (2) to provide a review mechanism for individuals which incentivizes self-betterment through prolonged and sustained participation in

AMERICAN OVERSIGHT

educational and/or rehabilitative programming. **ORPA** will provide a legal mechanism for the redemption of rehabilitated individuals, the restoration of families, and the successful reintegration of redeemed people back into society.

What follows here is a brief explanation of why **ORPA** is necessary (Part 1), an overview and key features (Part 2), and a preliminary financial impact statement (Part 3). Initiative 19-04 is attached at Appendix A. For more information, visit Floridians For Redeemable People on Facebook or contact:

AMERICAN OVERSIGHT

Part 1

Why **ORPA** is Necessary: A Description of Problem Areas

AMERICAN OVERSIGHT

No Review Mechanism for Florida's Incarcerated

Florida is one of only a handful of states in the nation that has no review mechanism or active parole system, but has the third largest prison population in the country.[1] In general, Florida provides no review mechanism or parole for ANY offender under ANY sentence under ANY circumstance for offenses committed after October 1, 1983.[2] The Florida Commission on Offender Review[3] (FCOR) exists primarily for the purposes of reviewing for parole consideration those individuals who remain incarcerated for offenses committed prior to October 1, 1983 (less than 4,600 remaining offenders out of nearly 100,000, *see* n. 2) and supervising those previously incarcerated individuals who are on parole.[4]

Over the past few decades, the Florida Legislature has steadily increased general penalties for crimes, removed sentencing discretion from judges by creating numerous minimum mandatory sentencing schemes, and decreased the amount of gain time incarcerated individuals can earn thereby removing incentives for program participation. The result is more individuals are spending more time incarcerated under very long sentences[5] with no legal mechanism to provide them an opportunity for early release.[6] The Florida Department of Corrections (FDC) has further exacerbated these circumstances by providing minimal opportunities for self-betterment and rehabilitation, especially for incarcerated individuals serving lengthy sentences. The effects are an oppressive prison culture and dire system of punishment that churns out a twenty-five to thirty percent inmate recidivism[7] rate,[8] while keeping those serving lengthy sentences in a hopeless state of repression.

The trend in criminal justice policies focused on increasing the punitive nature of sentencing can be traced back to the opioid scare of the late 1970s and the crack cocaine epidemic of the 1980s. In efforts to combat the drug crises, the Florida Legislature declared a

AMERICAN OVERSIGHT

"War on Drugs," a policy of enhanced penalties for drug possession,[9] generally, and harsh mandatory minimum sentences for specific drug offenses under the so-called "drug trafficking" law.[10] The Florida Legislature, in 1982, created the Sentencing Commission, which developed the Florida Sentencing Guidelines that became effective on October 1, 1983.[11] Prior to the Guidelines, "courts sentenced in accordance with provisions of law that permitted a wide range of judicial discretion in the sentencing decision."[12] Judges, upon sentencing defendants, were permitted to "not impose a sentence of imprisonment *unless, after considering the nature and the circumstances of the crime and the prior criminal record, if any,* of the defendant, the court [found] that *imprisonment* [*was*] *necessary for the protection of the public because. . .*"[13] of various circumstances.[14] After the Guidelines went into effect, judges' authority to exercise their discretion in the length of sentence to impose was generally limited within a range provided for by a scoresheet contained in the Guidelines.[15] Judges could impose a departure sentence either downward or upward *only* under specific delineated reasons.[16] The Legislature, simultaneously with the implementation of the Guidelines, abolished parole for defendants whose offenses occurred on or after October 1, 1983.[17] When these changes occurred there were approximately 20,000 inmates in Florida prisons.[18]

During the 1990s, the Florida Legislature—following the lead of the Federal government and then-President Bill Clinton's campaign for increased sentencing and mandatory minimum laws through the Violent Crime Control Act (of 1994) and decreased access to federal court review of federal and state convictions and sentences via the Anti-Terrorism and Effective Death Penalty Act (of 1996)—took a more rigid "tough on crime" stance, enacting policies creating mandatory minimum sentencing schemes under catchy labels such as "The Reoffender Act,"[19] "10-20-Life,"[20] and "Three Strikes,"[21] and by decreasing the amount of gain time incarcerated

AMERICAN OVERSIGHT

individuals could earn under any other sentence.[22] During its 1997 session, the Florida Legislature further ratcheted up the punitive nature of sentencing by implementing a new sentencing policy titled "the Criminal Punishment Code" (CPC). At the time the CPC took effect, the prison population had already increased to approximately 70,000 inmates[23]—a three hundred and fifty percent increase over 1983's total. The CPC replaced the sentencing Guidelines[24] and took effect on October 1, 1998. The CPC remains the current sentencing policy in place and states, "The primary purpose of sentencing is to punish the offender. Rehabilitation is a desired goal of the criminal justice system but is subordinate to the goal of punishment."[25]

Over the past four decades, the wholesale increase in general penalties, the passage of mandatory minimum sentencing schemes, and the decrease in the amount of gain time incarcerated individuals may earn coupled with the abolishment of parole, coincide with the increased sentences being served, the explosion of the prison population, and the overall hopeless situation many individuals find themselves in within Florida's correctional system.[26] These overly punitive and antiquated sentencing laws implemented decades ago do a disservice to both those individuals under sentence and the State of Florida in general. Such sentencing policies are not geared toward the betterment of individuals or the community at large, but to the "goal of punishment," and neither reflect the needs or values of today's society nor heed current criminological studies that show most people age out of criminal behavior and do not pose the same risks to public safety as they grow older.[27] Some of the practical effects of such harsh policies are: the FDC's incarcerated population ballooned from approximately 20,000 in 1980 to nearly 100,000 in 2019—*a five hundred percent increase*[28]—and Florida subsequently expanded the FDC's prison-industrial complex by building 46 new prisons and 34 new smaller facilities

AMERICAN OVERSIGHT

between 1987 and 2011,[29] and has a total of 143 facilities statewide,[30] resulting in a current FDC fiscal budget of over 2.7 billion dollars.[31]

Lack of Sufficient Programs Offered in the FDC

It is difficult for incarcerated individuals to enter existing educational and rehabilitative programs within the FDC, when they can be found at all. The reason for this is two-fold: (1) well-meaning individuals and organizations too often encounter difficulties in bringing programs into the FDC, and (2) there is a severe shortage of state funds or will to support such programs.

For example, the Horizon Communities in Prison Faith and Character Base program[32] is offered at Tomoka Correctional Institution (TCI) in Daytona Beach, Florida. Designated program dormitories are set up within the institution where visiting community volunteers teach courses and classes on victim impact, anger management, drug and alcohol counseling, character development, life skills, employability, and personal finance. The program has 260 available beds within the 1,300-bed TCI. The program has for years attempted to expand, not only inside TCI, but also to other institutions. In the twenty years of Horizons' existence, it has been successful in expanding into only four other institutions in the state with a total bed space for approximately 700 inmates.[33]

Another example is the Community Education Project (CEP)[34] at TCI sponsored by Stetson University in Deland, Florida. Professors at Stetson University created and brought the CEP to TCI in 2015. The CEP, after much work, now offers college credit-bearing courses to TCI students. The CEP currently has a student body of 25 students at TCI—25 out of the hundreds of individuals at Tomoka and thousands of others across the state who would benefit from similar programs.[35] This particular higher education in prison program was brought about solely by the

AMERICAN OVERSIGHT

dedication of Stetson University's CEP professors, and the accreditation was made possible by both Stetson University and a monetary grant provided by the Laughing Gull Foundation.[36]

The overarching problem is that the FDC does not seek out such programs or generally provide such programming opportunities to incarcerated individuals, especially for those serving lengthy sentences,[37] even while studies consistently show that providing incarcerated individuals education opportunities, rehabilitative programs, and marketable job skills drastically decrease recidivism rates[38] and benefit society in common sense ways such as reuniting the family unit and paying taxes. Moreover, most programs offered within the FDC are developed and geared toward incarcerated individuals with three years or less remaining on their sentence. I argue that educational and rehabilitative programming should be available to all individuals regardless of length of sentence remaining so that the benefits may be absorbed into the prison culture.

Programs such as those mentioned above struggle to gain or retain a foothold in the FDC because the FDC has been legislatively sanctioned to foster a punitive atmosphere of punishment and repression, not rehabilitation and redemption. (*See* n. 25 and accompanying text.) The overall oppressive and hopeless nature of Florida corrections can, thus, be attributed to there being no current review/release mechanism in place for those serving non-parolable sentences and the lack of educational and rehabilitative opportunities. The interconnectedness of these two problems areas—the lack of hope of any type of early release and the lack of opportunities for educational and rehabilitative programming—cannot be overstated, as they go hand-in-hand. Such deeply engrained problems are of a structural dimension and require a "bottom-up" approach to correct, thus validating the appropriateness of this citizen initiative.[39] A Florida Constitutional Amendment is necessary both to bring about the needed change that has not been and is not being addressed

AMERICAN OVERSIGHT

sufficiently by the Florida Legislature and to ensure that such problems do not again overtake the corrective processes of Florida's criminal justice system.

ORPA's Purpose

As stated, **ORPA**'s purpose is two-fold: (1) to foster a "prison culture" conducive to education and rehabilitation by *creating a demand* for such opportunities, and (2) to provide an incentive for individuals to seek such opportunities by creating a safety-valve to allow the supervised release of individuals, including juveniles, who have both served significant portions of their sentences and proven themselves worthy of a second chance through prolonged and sustained participation in educational and/or rehabilitative programming. These purposes may be achieved by extending the authority of the existing FCOR to review eligible incarcerated individuals, including juveniles, sentenced to non-parolable terms, and to release on "Reintegration Status" those who qualify by meeting certain requisites.

ORPA follows in the footsteps of Florida Constitutional Amendment 4, the Voting Restoration Amendment, which Floridians recently voted into law in November 2018. Whereas Amendment 4 restores voting rights to ex-offenders, **ORPA** seeks to educate and rehabilitate individuals while they are incarcerated. **ORPA** is the bottom-up approach to fulfilling the top-down change to criminal justice policy that many law makers and judges in this state agree needs to be done—safely decrease the prison population, lower recidivism rates, and lessen the burden on tax payers due to excessive and very long sentences.

How **ORPA** Will Work

ORPA will incentivize individuals to seek out betterment opportunities while incarcerated. This, in turn, will create a demand for more educational and rehabilitative programming in the FDC, which will be in line with the FDC's stated vision of "Inspiring

AMERICAN OVERSIGHT

success by transforming one life at a time."[40] The FDC will be obligated to come up to speed with societal standards—there will be a need for new programs to fill the demand of the incentivized individuals. Sponsors of educational and rehabilitative programs will no longer struggle to provide such programming opportunities, but will be welcomed to implement those programs within carceral spaces. Incarcerated individuals will be incentivized to "clean up their act" by having real opportunities for redemption, motivating many individuals to take responsibility for their actions and moving them to participate in available programs. By focusing on these positive endeavors, incarcerated individuals will develop the knowledge, skills, habits, and self-confidence necessary to successfully reenter and reintegrate into society—positive habits become lifestyle. These positive habits will be developed not only for use in society, but also will be reflected within the penitentiary setting, creating an atmosphere that will facilitate positive influences on other individuals just arriving in prison.

This positive atmosphere will have an even further reaching and secondary effect of helping to alleviate those hopeless conditions that lead to violence and drug use, which are the primary factors contributing to the many deaths recently occurring in Florida prisons.[41] Moreover, those hopeless conditions that lead negative personality characteristics for incarcerated individuals and prison officials alike[42] will be reconciled with new incentives and the implementation of educational, vocational, and rehabilitative programs geared toward the individual's release, resulting in a less dangerous and stressful "prison culture"—hope fosters motivation, determination, and change.

Nearly every year, individual senators in Florida who are privy to the problem of mass incarceration draft and sponsor proposed legislative bills to address the issue.[43] The Legislature thereafter displays a cursory concern and minimal effort toward this problem—a problem

AMERICAN OVERSIGHT

recognized by prominent Florida judges[44]—by leaving these proposed bills wrapped up in legislative committees without a vote, or by the end of the debate over House and Senate versions of bills, they are gutted so that they are but shells of the original bills and miss the original intent. [45] The yearly regular legislative sessions end with no action taken or the enactment of a shell bill. It is the inaction of the Florida Legislature on the issues of meaningful criminal justice reforms addressing overly punitive sentencing, no review/release mechanism, and the corresponding mass incarceration problem that has made necessary **ORPA**'s movement to create incentivized programming and a right to review for those individuals who meet certain requisites.

When we speak of efforts at criminal justice reform we need to be aware of who is the focus of such efforts and cognizant of the realities these individuals face. One in every one hundred Florida citizens is incarcerated (the current incarceration rate in Florida is over 833 per 100,000),[46] and the recidivism rate of the FDC's releases is nearly one-third. These are our mothers and fathers, sons and daughters, our childhood friends. What they face and what is at stake is what every incarcerated individual deals in: Time. Time is the most precious resource in humanity's existence that cannot be renewed or replenished. Sand cannot be put back into the hourglass, and if lawmakers could be made to understand that incarcerated individuals will strive to obtain some of their precious time back, and those lawmakers give a time incentive for the completion of certain qualifying educational and rehabilitative programming to earn some of it back, it would change from within the entire dynamic of Florida corrections and the current "prison culture." However, as it is, many lose hope in Florida's current broken system that primarily warehouses people and throws away the key. We can give incarcerated individuals a fighting chance for redemption and restoration, but we must go about it wisely.

AMERICAN OVERSIGHT

Johnny: A Case Study

The following depicts the profile of the average Florida prisoner:[47]

Johnny was nineteen years old when he got caught in an armed trafficking offense and was sentenced to twenty-five years in state prison. He has two young children, four years and three years old, and, unfortunately, the children's mother was also arrested while he faced his charges before trial. The children were held in custody of the Department of Children and Families, awaiting a court order for termination of parental rights to be placed in permanent foster homes. Johnny scores out with a ninth grade education, but has no practical knowledge or skills besides street life and dope dealing. Johnny's dad is in prison, and now he's in prison at the front-end of a fresh twenty-five year sentence. When Johnny initially arrived to his permanent institution, his first roommate was a middle-aged man serving a life sentence who had been down for twenty-one years with no hope of being released. He lives the gang life within prison, sells dope, and robs old and vulnerable inmates for their canteen and property now and again. He's back and forth to confinement, but it's all "part of the game." Johnny saw how his roommate lived, that he made some money, and fell easily into the same lifestyle. Johnny will one day be released back into the community likely with, still, no practical or job-related skills, but hardened by a thug mentality and lifestyle that is not conducive to living in society. Will he become another statistic, a recidivist? Who will become his victim(s)? What about his children? *How* do we break this cycle?

Now, imagine this scenario: Johnny goes to prison and sees his roommate working a program, involved in his family's life, and receiving the necessary education and skills training to live a lawful life outside of prison. The same roommate, the same life sentence, but the difference: there's a policy in place that has given the incarcerated individual an incentive to

AMERICAN OVERSIGHT

rehabilitate—a chance for early release. His whole outlook has changed. He strives. Over the days and years, his positive habits have become his lifestyle that he can take with him back into society. And his actions are noticed by those around him. He's a good influence on his roommate—Johnny or any other young adult just coming into the system—and now that young person falls in line with that influence. By having a release mechanism in place—by offering HOPE to incarcerated individuals—we can imagine the contrast between these two scenarios and the ripple effect that such policies would create: costs to society becoming benefits that carry over to subsequent generations.[48]

Real examples like this are what the general public need to hear about and policy makers need to understand: We need to connect the dots between no hope in our state prisons to the violence inside that spills over into society, to all the recent deaths by drug overdoses in Florida's prisons, to broken families in society from a cyclical system that churns out an extremely high recidivist rate.

ORPA is a Beacon of Hope for those who want a better life, a second chance. Our nation was built upon second chances by those tired, poor, huddled masses yearning to breathe free. Our states were created in that image. Our communities are bound by this common thread: the fostering of hope and the opportunity of redemption and second chances for those who diligently seek them. This movement gives voice to those many incarcerated individuals trying to find or hang onto hope and who would thrive under hopeful circumstances. Mass incarceration, oppression of individuals, and a reflection of moral disregard for the lives of those who seek better is neither what our society was built upon nor what we as a society are about. Initiative 19-04 moves to action our cause to remedy the situation in Florida where the government's function to address our concerns over unviable criminal justice policies remains unaddressed. This is the

AMERICAN OVERSIGHT

way our society evolves in the face of governmental oppression: We the People put a "check" on that system. By ORPA's passage into law, we will be putting the "correction" into Florida's criminal justice system and the Florida Department of Corrections that has too long been missing.

Personal Story

My name is Roger Cassidy and I wrote **ORPA** contained in Initiative 19-04. I created this initiative because right now there is no parole or other review/release mechanism in Florida for incarcerated individuals sentenced after October 1, 1983 (*see* n. 17), and that, coupled with the lack of sufficient educational and rehabilitative opportunities within the FDC, especially for those with lengthy sentences, creates the oppressive and hopeless atmosphere reflected in the prison culture, which carries over into society—I have seen it and I have lived it for nearly twenty years. The primary purpose of **ORPA** is to provide a safety valve to the criminal justice system to allow for the review/release of incarcerated individuals who have both served a significant portion of their sentence and successfully participated in extensive betterment programming, which will give them the skills, tools, and confidence necessary to successfully reenter society.

I became addicted to drugs at the age of nineteen. For the next three years, my life was a series of ups and downs, but the weight of addiction finally throttled my positive efforts and I crashed into an abyss. In June 1998, at the age of twenty two, I was charged with multiple non-violent property crimes. One of the burglary offenses was of a pawn shop, and recorded footage from a Sheriff's helicopter was televised and showed me on the roof in the middle of the morning while under the influence of drugs and alcohol. During my sentencing hearing, I requested that the court and the state prosecutor allow me to enter into and complete a drug

AMERICAN OVERSIGHT

rehabilitation program of the court's choice. The court, following the prosecutor's recommendation, denied my request and subsequently sentenced me to twenty-seven months incarceration pursuant to a plea deal my public defender arranged with the state prosecutor. The court, however, recommended in its written judgment that I be classified to the "Tier" drug treatment program within the FDC.

In October 1998, upon my initial screening into the FDC, I also requested to be sent to the Tier program, which is no longer offered. After interviews by a psychologist and drug counselor, I was recommended for the Tier Four program—the longest and most intensive program offered. Instead of being placed in the program, I was classified to a work camp where I worked Monday through Friday for the Department of Transportation (FDOT) on an odd assortment of jobs. Through the use of contracted FDOT inmate labor crews, I worked on roadways and in parks cutting down and clearing bush, mowing, and essentially helped provide an income for the FDC. During these daily excursions into the public, inmates had contacts drop off drugs; mostly marijuana and crack cocaine. I personally had random people throw money and dope to me while working on the side of a roadway more times than I can count. During my time in the FDC while working on the FDOT inmate labor crews, there was hardly a day I did not have dope or access to it.

On January 7, 2000, I received a disciplinary report for a random drug urinalysis that I tested positive for marijuana and cocaine. I spent sixty days in "the box" and then was sent back to work on the FDOT inmate labor crews. At every six-month classification review, I renewed my request to be placed in the Tier program. Each time, I was informed bed space was not available. I was released from the FDC in September 2000, still a drug addict with virtually no clean time under my belt and no personal betterment achieved.

AMERICAN OVERSIGHT

Subsequently, in July 2001, at the age of twenty five, I was arrested for robbing a convenience store with a pocketknife while under the influence. The victim was not touched, but a verbal threat was made. I was charged with robbery with a deadly weapon for taking 61 dollars for drug money. I'd never before been charged with a violent crime. The state prosecutor, Thomas Hastings, Jr., offered no plea deal and I was put to trial. After the jury returned a verdict of guilty as charged, Mr. Hastings successfully sought to have me sentenced pursuant to the Prison Releasee Reoffender Punishment Act (PRRPA). The PRRPA is a mandatory minimum sentencing statute where the judge's authority to exercise sentencing discretion by considering the specific facts of a case and imposing an informed and appropriate penalty is removed.

The PRRPA is an exceptionally harsh sentencing statute, as it completely removes sentencing discretion from the judicial branch of government (judge) and places it in the executive branch (prosecutor), as it mandates that

> (a) . . . .
>
> 3. If the state attorney determines that a defendant is a prison releasee reoffender . . . the state attorney may seek to have the court sentence the defendant as a prison releasee reoffender. Upon proof from the state attorney that establishes by a preponderance of the evidence that a defendant is a prison releasee reoffender as defined in this section, such defendant is *not eligible for sentencing under the sentencing guidelines and must be sentenced as follows*:
> **a. For a felony punishable by life, by a term of imprisonment for life;**
> b. For a felony of the first degree, by a term of imprisonment of 30 years;
> c. For a felony of the second degree, by a term of imprisonment of 15 years; and
> d. For a felony of the third degree, by a term of imprisonment of 5 years.
>
> **(b) A person sentenced under paragraph (a) shall be released only by expiration of sentence and shall not be eligible for parole, control release, or any form of early release. Any person sentenced under paragraph (a) must serve 100 percent of the court-imposed sentence.**

Section 775.082(9)(a)3, *Florida Statutes* (2001)(emphasis added)

AMERICAN OVERSIGHT

The court sentenced me to life without the possibility of parole. I am now within the nineteenth year of my walking death sentence.

During my time of incarceration, I have struggled to find betterment opportunities. Program availability is the main issue. The lack of bed space prioritizes those incarcerated individuals with short sentences. I have, however, been able to earn certificates as Peer Health Counselor, Master of Wellness, and Inmate Teaching Assistant (for GED students). After many requests over an extended period of time, I was able to enter and complete a Faith and Character Base Reentry Program. Currently, I work during the day as a certified Inmate Law Clerk and attend college credit bearing courses through Stetson University's Community Education Project. My most important accomplishment, however, is being drug free.

I was fortunate during my time of need to have someone who cared about my well-being and brought hope to me when I had none. They took the time to convince me that I could overcome my drug addiction and not be defined by my circumstances. They told me something that has stuck with me ever since: everyone they ever knew who had been addicted to drugs, particularly crack cocaine, ended up either in prison or dead. That statement had a profound effect on me. I realized I had a choice to live clean or die an addict in prison. I made a promise to that person and to myself that I would never use drugs again. As of February 14, 2020, I am sixteen years drug free.

I have also come to realize that no matter what good I do or how reformed I become within the fences, there is no further hope for redemption in Florida's current criminal justice system. By my sentence, I have been discarded as irredeemable, not fit for society. There is no review mechanism in the current system to deem me otherwise. I'd always heard the saying, "Be the change you want to see in the world." I want to help bring hope into a hopeless place. To

AMERICAN OVERSIGHT

make a difference in the lives of others who are not as fortunate as I was to have someone on their side in their time of need. And to provide a mechanism for review of those incarcerated individuals who prove themselves rehabilitated. By creating a right to review mechanism to apply to everyone—*everyone* will have a chance to become redeemable.

AMERICAN OVERSIGHT

Part 2

ORPA Overview, Key Features, and Function

AMERICAN OVERSIGHT

ORPA Overview

ORPA will add to Article IV, section 8 of the Florida Constitution, a subsection (c): "Offender Reentry Program." This subsection will extend the authority of the Florida Commission on Offender Review (the Commission) to review/release individuals currently ineligible for parole pursuant to a new form of supervised release, termed "Reintegration Status." This was necessary because the Commission already has its rules and procedures for paroling those who were sentenced prior to October 1, 1983—procedures that are unfair and inequitable. However, if **ORPA** only extended "parole" to those who are ineligible, it would have extended such an "act of grace" and not a "right" to review. Moreover, had **ORPA** included those who are under the old parole system, it would have necessarily forced the Commission to rewrite its rules and procedures to comply with it. This would "substantially alter or perform the function of multiple branches of government" so as to possibly run afoul of the Florida constitution's "single subject" requirement for initiative-based changes in law.[49] Thus, that scenario was avoided by creating the new term "Reintegration Status" and leaving it up to the Commission to create the procedures by which they must carry out the new constitutional mandate. That said, **ORPA** does include specific language essential for the Commission to actually review and release individuals on Reintegration Status.

Key Features

Reasonable requisites

Subsection (c)(2) Applicability, includes the requirement that

> The Florida Commission on Offender Review *shall* make available *to all* eligible offenders a reentry program and *shall place all qualifying offenders* on Reintegration Status. The Florida Commission on Offender Review *shall* annually place *a minimum of three percent of the total* of the Florida Department of Corrections' offender population on Reintegration Status.

AMERICAN OVERSIGHT

Proposed subsection (c), Article IV, section 8, *Florida Constitution* (emphasis added). In addition, in subsection (c)(4)b., the term "Qualifying Offender" is defined as "A person who has met both the eligibility requirement and the reasonable requisites of the Florida Commission on Offender Review." These requirements, taken together, will mandate the Commission to set "reasonable" requisites that incarcerated individuals can actually attain in order for the Commission to meet that mandate. That said, if the Commission were to ONLY release the required 3% yearly, that number would be roughly 2,850 and would decrease slightly year over year. Still, the FDC's population would be decreased by roughly 27% in ten years. We're talking significant savings to State of Florida (taxpayers) when you consider it costs the state $27,000/yr. average to house someone in the FDC allowing the state to allocate the funding to other important areas of concern such as public schools, infrastructure, and etc. Moreover, the Commission could use this amendment as a safety valve at any time to decrease the overall prison population to whatever level it or other authority deems necessary or desirable.

Incarcerated individuals will be required to serve a minimum of half of their court-imposed sentence—in many cases a significant amount of time.[50] However, those individuals will have a real and obtainable opportunity for release that they otherwise would not have.

Ineligibility of certain offenders

(c)(4)a. Eligible offender. Individuals under "a sentence of death or a sentence for capital sexual battery" are ineligible for Reintegration Status. This is due to the fact that society generally frowns upon individuals with such sentences. It was the bare minimum necessary to omit from eligibility in order to appeal to the masses to vote **ORPA** into law. As for not going further and excluding those individuals convicted of murder, it is because there are many people incarcerated for such offenses (whether premeditated, felony murder, murder in principle), and to

AMERICAN OVERSIGHT

deny them all a chance for Reintegration Status would both decrease the support from within the fences and their families and supporters and, just as importantly, create a tension within the fences between those eligible and ineligible individuals. Such tensions could lead to violence for those who are eligible. Sustainability had to be considered and sensibility used in recognition of real people with real lives at stake in a hopeless situation.

Requirement that the Commission annually place a minimum of 3% of offenders on Reintegration Status

(c)(2) Applicability. Subsection a. This provision mandates the Commission to "annually place a minimum of three percent of the total of the Florida Department of Corrections' offender population on Reintegration Status." The logic behind this provision is simple: the Commission will not be able to put off individuals who qualify indefinitely. It was the only way to provide a guarantee that the amendment will be an effective review/release mechanism. Meaning, the Commission cannot set qualifications so stringent that no one can meet them and the Commission will actually be required to release those who meet the qualifications they set.

Purpose of Reintegration Status as opposed to Parole

The Commission has rules and procedures in place for parole qualification, review dates, presumptive parole release dates, supervision, etc.[51] Had **ORPA** required the Commission to change these, it would have created the possibility that the Florida supreme court, upon issuing its advisory opinion, would find that **ORPA** ran afoul of the "single subject" inquiry. The single subject requirement disallows a constitutional amendment by initiative to either "encompass more than one subject" or "substantially alter or affect multiple branches of government."[52] To be safe, **ORPA** neither creates a new division of the Commission nor imposes requirements necessitating the Commission to rewrite its existing rules and procedures. It will be up to the Commission to write its own rules and procedures to comply with **ORPA**.

AMERICAN OVERSIGHT

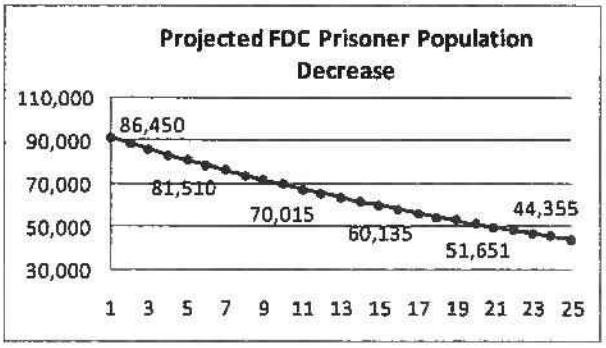
ORPA is primarily for those who are not eligible for parole under the old system, including juveniles. That said, there may be Equal Protection challenges down the road from those under the old parole system concerning the "new" constitutional right to review being applicable to them as well; such a successful challenge would be welcomed as those persons under the old parole system would then be eligible for Reintegration Status. It is, by design, a way to replace the old broken parole system without directly challenging it or doing away with it—it's an upgrade.

ORPAs Function

***ORPA** will transform Florida's criminal justice system from the bottom up by creating demand for educational and rehabilitative programming*

One of **ORPA**'s most important aspects is that it will create the demand for educational and rehabilitative programming within the FDC. **ORPA**'s passage into law will create a demand for programs to be implemented within the FDC. By shifting the focus from mass incarceration warehousing of human beings to that of educational and rehabilitative opportunities it will transform the criminal justice system from one of retribution and oppression to one of rehabilitation and redemption. Providing such opportunities to incarcerated individuals with a real chance of release will help alleviate hopeless situations, which result in violence, drug use, and high recidivism rates.

***ORPA** will restore families and parity in Florida's criminal justice system*



By providing rehabilitated individuals a chance for redemption, it will foster restoration of families and successful reintegration, helping to enfranchise those who otherwise would have no voice. Recent studies show that racial disparity in sentencing is a real and credible threat to the fair dispensing of sentences in Florida.[53] **ORPA** will level the playing field by offering each and every

AMERICAN OVERSIGHT

incarcerated individual the opportunity to stand on their own merit to earn supervised release on Reintegration Status.

***ORPA** will safely decrease the prison population by 27% in ten years*

ORPA is a safe and sustainable way to decrease the prison population. Releasing on Reintegration Status *only* the required 3% of the inmate population annually will equate to 2,850 the first year (based on a current inmate population of 95,000), and will gradually decrease year over year. By the Commission releasing only the minimum 3%, after five years the total inmate population will be decreased by 14% to 81,500 and after ten years by 27% to 70,015. (*See* Illustration, at right). **ORPA**'s projected decrease of the FDC's population is also in line with a growing number of policy experts and advocacy organizations, as reported by the Sentencing Project,[54] calling for a substantial decrease in the prison population, and a recent article in the *Tampa Bay Times*, in which Mark Inch, Secretary, Department of Corrections, was reported as expressing concern over the conditions in Florida's prisons being compared to that of New Mexico Santa Fe's penitentiary in 1980, when it was overtaken by inmates, and scores of officers and inmates alike were injured and killed. Moreover, the Commission could at any time adjust this mechanism to decrease the prison population to a level it or other authority deems necessary or safe.

In sum, **ORPA** is a safe and sustainable way to decrease the prison population that can be varied by rate up or down by the Commission according to the needs of society and **ORPA**'s success.

AMERICAN OVERSIGHT

Part 3

ORPA Preliminary Financial Impact Statement

AMERICAN OVERSIGHT

Preliminary Financial Analysis

Financial considerations pertaining to new staffing responsibilities of the Commission are analyzed based on the Commission's requirement of releasing 2,850 incarcerated individuals in the first year,[1] caseload standards for parole and probation officials, and current salaries. It is recommended, although not mandated, that the Commission create a new division within its existing structure, which could be named the Florida Division of Offender Reintegration ("the DOOR").

Front-end costs

ORPA will require the release of approximately 2,850 incarcerated individuals in the first year, decreasing slightly year-to-year, and create a supervisory responsibility of the Commission requiring a budgetary commitment on the front-end, estimated as follows:

- 75 new hires:[2]
  - 60 added parole examiners (ideally, one assigned to each major correctional facility)
  - 45 added supervisory and supportive staff

@ $60,000 (avg. annual salary w/benefits)[3]

105 * $60,000 = $6,300,000

[1] Costs are based on **ORPA**'s requirement of three percent of the total FDC population estimated at 2,850 being released in the first year on Reintegration Status. (Proposed) Article IV, section 8(2)(c), *Florida Constitution.*

[2] Staffing considerations were calculated using the "Caseload Standards for Parole and Probation (September 2006)." Bill Burrell. Temple University; "The American Probation and Parole Association (1991). *Issue Paper on Caseload Standards* (Cited in <https://www.appa-net.org/eweb/docs/APPA/stances/ip_CSPP.pdf>) Adult caseloads for parole officers is estimated based on evidence-based practice under an administrative/low risk/moderate to high risk/intensive model. 200 cases seem to be the median number of cases under this model of spectrum of risk.

[3] The average parole officer salary in Florida is $54,533 as of November 25, 2019, and ranges between $48,439 and $60,628 depending on location and other various factors. <http://www.salary.com> Accessed 30 Dec. 2019.

AMERICAN OVERSIGHT

- Additional office space and equipment $680,000

Total front-end costs $5,000,000

Back-end savings

The 2,850 individuals released the first year on Reintegration Status will create a back-end savings of $27,000 per individual[4] resulting in savings of

- 2,850 individuals placed on Reintegration Status
  - @ $27,000/year housing (cost savings) $76,950,000

Back-end revenue +

  - @ $720/year (current rate of supervision) $2,052,000

Total back-end savings $79,002,000

As these figures suggest, by releasing the minimum required 3% of the incarcerated population annually, even with 105 new parole examiners and field officers at the high end of the average salary spectrum, would result in a net savings to the State of Florida of $80 million in the first year. This figure, dependent upon the total number of individuals the Commission releases, will compound exponentially year over year with additional individuals placed on Reintegration Status. After five years, **ORPA** will have saved the state $364,230,000 and created revenue in the amount of $9,712,800, for a total back-end savings of $373,942,800.

Timing and Support

As for **ORPA**'s timing, it is the PERFECT time. Citizens of Florida are familiar with the voting process and initiative petitions, particularly having just gone through it last year—the Amendment 4, Voting Rights Restoration, was big news and passed into law. **ORPA** follows

[4] Cost estimates based on figures taken from the Florida Commission on Offender Review Annual Report: 2016-17.

AMERICAN OVERSIGHT

directly in the footprints of Amendment 4, and it just makes sense. Moreover, the political climate is perfect—everyone, including the general public, knows that the broken system needs to be fixed.

What is needed in order to get this initiative to the next level is pretty straightforward: get the cause to the masses. Through social media, news publications, and networking we can accomplish this. FFRP has already been contacted by several committees, organizations, and individuals who have shown interest in our cause:

- ACLU, Florida Chapter
- African American Reentry Program
- Campaign for Prison Reform
- Families Ministering Families
- Florida Action Committee
- Florida Cares Charity
- Florida Democratic Voter Registration Committee of Brevard County
- Reform Alliance
- Stan Van Gundy (ex-head coach of the Orlando Magic and Detroit Pistons, current NBA analyst)
- The Action Committee
- The Ambassador Project at Everglades CI
- Women's League of Voters, Florida Chapter

We are attempting to get politically minded people involved. We have reached out to the Reform Alliance, recently created by Meek Mill, Jay Z, and sports professionals who are lobbying for criminal justice reform. They have responded that they look forward to collaboration with us. We have spoken with Mr. Stan Van Gundy, ex-head coach of the Orlando Magic and Detroit Pistons. He is adamant about **ORPA** making sense both in its timing and aim.

AMERICAN OVERSIGHT

He is in contact with Mr. Desmond Meade who created and successfully ran the Amendment 4 campaign. We are currently attempting to get Mr. Meade on board with our movement.

Conclusion

ORPA is a workable solution to the growing threat of mass incarceration and is in line with reforms suggested by leading studies on Florida's criminal justice system. **ORPA** will offer a time incentive to Florida's incarcerated population and encourage prolonged participation in betterment programming. The demand for betterment programs will transform the FDC from a breeding ground for violence and drug use into a place of rehabilitation. **ORPA** will provide the opportunity for incarcerated individuals to stand on their own merit to demonstrate rehabilitation and bring parity to Florida's criminal, justice system. **ORPA** can be adjusted up or down by the Commission based on the qualifiers; however, the Commission cannot set standards so high that they are unattainable. Finally, **ORPA** is a safe and cost-effective way to decrease the prison population.

AMERICAN OVERSIGHT

Notes

[1] Cyrus O'Brien, "Florida Criminal Justice Reform: Understanding the Challenges and Opportunities" (2017), *Project on Accountable Justice,* Ed. Deborrah Brodsky, Florida Institute of Government, Florida State University, 3; 12. <http://projectonaccountablejustice.org>. Accessed 2 Jan. 2020.

[2] Due to a convoluted legislative body of criminal law, there are exceptions to the general rule of no parole, as follows: Any offender who (1) committed a first-degree murder, a felony murder, or the crime of making, possessing, throwing, projecting, placing, or discharging a destructive device (or the attempt of) prior to May 25, 1994; (2) committed any other capital felony prior to October 1, 1995; (3) committed a continuing criminal enterprise prior to June 17, 1993; (4) any inmate who committed a murder of a law enforcement officer (or any other specified officer) prior to January 1, 1990; (5) committed a murder of a justice or judge prior to October 1, 1990; (6) elected to be sentenced outside the guidelines for felonies committed prior to July 1, 1984; and (7) received a habitual felony offender sentence prior to October 1, 1988. As of May 31, 2016, there were approximately 4,552 offenders eligible for parole. What is Parole?, Florida Commission on Offender Review 2014. <https://www.fcor.state.fl.us/>. Accessed 10 Feb. 2019.

[3] In 1996, the Florida Parole Commission was renamed the Florida Commission on Offender Review.

[4] The Commission's responsibilities are framed as such: "The Commission on Offender Review performs a vital role in Florida's criminal justice system by preserving the autonomy needed in post-release decisions affecting inmates and ex-offenders. The commission functions as a quasi-judicial, decision-making body. Commissioners preside over approximately 36 meetings annually at the central office in Tallahassee and at various locations throughout the state as required by statute. During these public proceedings, the commission make a variety of determinations regarding parole and other releases." <https://jobs.myflorida.com>. Accessed 2 Jan. 2020.

[5] The *Project on Accountable Justice* defines very long sentences as twelve years or longer. ("Most people currently in prison are serving very long sentences.") O'Brien, at 5.

[6] For an in-depth report and fact-based analysis of Florida's Correctional System and contrast with other state's correctional systems, See O'Brien, "Project on Accountable Justice." <http://projectonaccountablejustice.org>

[7] The FDC defines "inmate recidivism" as a return to prison, as the result of either a new conviction or a violation of post-release supervision, within three years of their prison release date. In 2009, inmate recidivism was 27.6%, and in 2015, 24.7%. "Florida Prison Recidivism Report: Releases from 2010 to 2017." Florida Department of Corrections, Mark S. Inch. Office of Strategic Initiatives. June 2019 <https://www.dc.state.fl.us/>. Accessed 10 Feb. 2019. It is worth noting that a leading national study (that included Florida) used a model for recidivism based solely on arrests for new offenses regardless of whether they resulted in a new prison

AMERICAN OVERSIGHT

sentence, and the numbers were 63.5% and 60.2% in 2011 and 2015, respectively. "2018 Update on Prisoner Recidivism: A 9-Year Follow-up Period (2005-2014)." [32] The Horizon Communities in Prison is paid for and sponsored by outside volunteers. Ike and Mickey Griffin founded the program based on a program model in Brazil and implemented the program at TCI in 1999.

[33] At present, Wakulla, Everglades, and Lowell Correctional Institutions are the only other institutions to offer the Horizon Communities program. Each institution has one designated dormitory designed to hold between 132 and 158 offenders apiece.

[34] Stetson University/Community Education Project. "Our Mission: The Community Education Project is a non-profit multi-disciplinary college in prison program at Stetson University committed to offering quality liberal arts education and learning opportunities in Florida prisons. Access to a liberal arts education offers incarcerated individuals meaningful opportunities for personal growth and intellectual engagement, which benefits our community as a whole." <https://stetson.edu/other/cep/>.

[35] The only other program in the FDC similar to the CEP is a partnership between FDC and Florida Gateway College (FGC) at Columbia Correctional Institution. On May 20, 2019, the FDC announced "the first class of [47] college graduates from the Florida Gateway College (FGC) Second Chance Pell Program . . . The first of Florida's graduates participated in a traditional graduation ceremony at Columbia Correctional Institution Annex in Lake City, Florida on May 17. . . . The Second Chance Pell Pilot Program offers Pell Grant eligibility to inmates selected and supervised by FDC who are eligible for upcoming release *within the next five years*." "FDC Held Groundbreaking Inmate College Graduation." <www.dc.state.fl.us/comm./press/2019/05-20-Graduation.html>. The CEP and the Horizons Communities are two rare examples of programs within the FDC that do not limit participation to individuals with short sentences; however, these programs are severely limited in their financial capabilities to provide opportunities for many participants. (*See* n. 31, above, and accompanying text.)

[36] The In 2018, the Laughing Gull Foundation awarded the CEP a $230,000 grant over a three-year period. One of the Laughing Gull Foundation's aims is to increase incarcerated students' access to college courses. <http://www.laughinggull.org>.

AMERICAN OVERSIGHT

[37] Section 944.7065, Florida Statutes (2018) "Transition course for inmates" states: "In an effort to ensure that inmates released from the Department of Corrections successfully reenter the community, beginning December 1, 2002, each inmate released from incarceration by the department must complete a 100-hour comprehensive transition course that covers job readiness and life management skills." Said ex-Secretary of FDC Julie Jones, "The more prepared our inmates are for release, the more likely they will gain employment and become contributing members in their local communities." The FDC, on June 18, 2017, launched the COMPASS 100. According to the information provided on NorthEscambia.com, "COMPASS 100 is an integrative curriculum for inmates nearing release, allowing them to develop targeted and personalized life skills in combination with their current educational courses and substance abuse treatment." "Florida Department of Corrections Launches Compass 100." <http://www.CenturyNorthEscambia.com>. Accessed 24 Feb. 2019.

The COMPASS 100 textbook states, "*COMPASS 100* is a 100-hour, comprehensive, individualized community readiness course that covers job readiness and life management skills for all residents releasing from the Florida Department of Corrections . . . .

"Individuals within three (3) years of release are eligible to participate in COMPASS 100 and it is *mandatory* that *COMPASS 100* be completed prior to EOS." COMPASS 100-Hybrid Navigator's Guide 2016 Florida Department of Corrections, 2 (emphasis in original). As the workbook states, the curriculum focuses on individuals within three years of release; however, it should be noted that the failure of an individual to complete, or even participate in, the program will not stop them from being released at their end of sentence date. From my experience, it is the individuals with longer sentences who are more open to participation in such programs. I argue that programs offered in the FDC should be available to *all* individuals to create a restorative prison culture and positive habits and individuals will develop into positive lifestyles and facilitate their successful reintegration back into the community.

[38] Education's role in recidivism reduction is substantial. One study shows that providing correctional education opportunities reduce the likelihood of returning to prison by 43%. <http://www.socialsolutions.com/blog/educations-role-recidivism>. October 18, 2016. Accessed 31 Dec. 2018. According to a report by PRIDE (Prison Rehabilitative Industries and Diversified Enterprises), only 9.89% of PRIDE's former workers recidivate. PRIDE is an FDC sponsored corporation that provides training in diversified fields such as garment and apparel, furniture manufacturing, vehicle restoration, and metal fabricating. PRIDE utilizes a labor force of approximately 3,000, mostly low and medium custody, inmates for contracted jobs and pay begins at twenty cents/hour and tops out at fifty-five cents/hour. <http://www pride-enterprises.org>. Accessed 31 Dec. 2018.

[39] Florida's state criminal justice system is divided in a 3-tiered order of authority that can be compared to a pyramid. First (the top tier), is the state Constitution, second, legislation in the form of statutes, and third, court opinions that interpret and apply those authorities to the specific facts of individual cases. Those court opinions then take on the force of law (precedent) and are applied to subsequent cases containing the same or similar factual circumstances. All law and authority flows from the Constitution and all legislation and court opinions must adhere to the fundamental principles contained in the Constitution. Citizen initiatives, however, are

AMERICAN OVERSIGHT

"grassroots" movements for the people by the people, which, by definition, are bottom-up approaches to changes in the law.

[40] On the FDC's website, at the very top of the page these words hang over all else. <www.dc.state.fl.us>. Accessed 6 Jan. 2020.

[41] "More inmates died in Florida prisons last year than in any other year on record . . . [t]he tally, 427 inmate deaths in 2017 . . . showed a 20 percent increase over previous years." Howard Simon, executive director of the Florida American Civil Liberties Union, said, "Florida prisons are full of addicts and drug offenders, due to Florida's mandatory sentencing laws." John Rivera, executive director of the union representing prison guards, said, "You have inmates that have nothing to look forward to, very little hope." Sarah Blaskey. "Record number of inmates died in Florida last year. And they died younger than past years." January 21, 2018. <https://www.miamiheraldnews.com/news/local/community/miami-dade/article195837959.html>. Accessed Jan. 25, 2019.

[42] As reported in the *Tampa Bay Times,* FDC Secretary Mark Inch was recognized as being aware of FDC's "cultural issues," and comparing the conditions in Florida's prisons to that New Mexico State Penitentiary at Santa Fe in 1980, where 12 correctional officers were taking hostage and 33 inmates were murdered. The *Times* reports that Mark Inch, during a meeting in his conference room in Tallahassee's Farris Bryant building, "point[ed] to a white board on the wall and a graph that show[ed] how Florida's prison system had 'gone from excellence, to satisfactory to marginal'—just as New Mexico's did." Moreover, "At a recent training for lieutenants and captains in the officer corps, the instructor asked them to do some self-reflection and write down three negative personality characteristics they have developed since taking [] leadership position[s]. He read down the list of answers: 'low regard toward humanity and the world,' 'inability to vent or relieve stress,' 'started drinking,' 'short tempered,' 'no sleep,' 'attitude change at home almost caused my divorce.'" "Florida prisons can't go on like this, new chief says." Mary Ellen Klas. *Tampa Bay Times.* Dec. 1, 2019. <https://www-tampabay-com.cdn.ampproject.org. Accessed 7 Jan. 2020. These are real examples of how criminal justice policies affect the prison culture and, in turn, those working in the correctional field and, in turn, society at large.

[44] For examples of cases requiring mandatory minimum sentences, which include sentencing judges' opinions as to propriety of such sentences, visit our Facebook page at Floridians For Redeemable People.

[45] "It costs the state about 22,000 each year for each inmate" Gloria, Cat. "Legislators Drop Proposal that Would Reduce Prison Terms for Nonviolent Offenders." *WUFT News* May 1, 2019. <https://www.wuft.org/news/2019/05/01/legislators-drop-proposals-that-would-reduce-prison-terms-for-nonviolent-offenders/>. In February, there was a push from the Florida Senate through the Public Safety Bill 642 to increase the amount of gain-time nonviolent offenders could earn, which would have required nonviolent offenders to serve a minimum of two-thirds of

AMERICAN OVERSIGHT

their sentences instead of 85%, as is the current law. However, the House refused to allow the provision in their final version, HB 7125, which covered such various acts as redacting mandatory minimum sentences for selling horse meat and reducing the offense severity of certain crimes relating to keeping a gambling house or possessing certain gambling apparatuses. The Senate gain-time provision would have cut the prison population by 7,596 non-violent offenders in the first year, which would have amounted to $167,112,000 in savings to the state.

[46] Figure taken from Jarmusz, T.S. 5/8/2019. "Stetson Professors Venture to Prison to Educate Inmates." *Daytona Beach News Journal online.* <https://www.newsjournalonline.com/news/20190508/stetson-professors-venture-to-prison-to-educate-inmates>, citing a prisonpolicy.org report. Accessed 10 May 2019.

[47] O'Brien points out that the profile of the average Florida prisoner serving a very long sentence is not only an individual with property or drug offenses, but is designated as "violent" as well. This profile makes up 83% of the prison population. O'Brien, at 11.

[48] Julian Savulescu, a world-renown geneticist, has argued that environment can profoundly affect biology, and that these genetic changes may be passed on to the next generation. *See* Savulescu, Julian. "Genetic Interventions and the Ethics of Enhancement of Human Beings." *The Oxford Handbook of Bioethics.* Ed. Bonnie Steinbock (Oxford University Press 2007). pp. 521-535. *See also* "It Can't Be Fixed Because It's Not Broken." *Disability Incarcerated: Imprisonment and Disability in the United States and Canada.* "When people get out of prison, many leave with what has been termed 'Post-Incarceration Syndrome' (PICS), which are understandable responses to living in oppressive, restrictive, violent, and dehumanizing environment. [Terrence] Gorski defines PICS as a cluster of symptoms that are usually present in prisoners and ex-prisoners caused by long periods of incarceration. Prolonged incarceration where there is a lack of education and no job training or "rehabilitation," coupled with punishment, ensures that people coming out of prison are worse off than when they went into prison." p. 171.

[49] "Article XI, section 3, of the Florida Constitution provides that any proposed citizen initiative amendment 'shall embrace but one subject and matter directly connected therewith.' Art. XI, 3, Fla. Const. 'In evaluating whether a proposed amendment violates the single-subject requirement, the Court must determine whether it has a 'logical and natural oneness of purpose.'' *Advisory Op. to Att'y Gen. re Amend. to Bar Gov't from Treating People Differently Based on Race in Pub. Educ.,* 778 So.2d 888, 891-92 (Fla. 2000)(quoting *Fine v. Firestone,* 448 So.2d 984, 990 (Fla. 1984)). This single-subject rule prevents a proposal 'from engaging in either of two practices: (a) logrolling; or (b) substantially altering or performing the functions of multiple branches of state government.'" *Advisory Opinion to the Attorney General Re Use Of Marijuana for Debilitating Medical Conditions,* 181 So.3d 471, 477 (Fla. 2015)(quoting *Advisory Op. to Att'y Gen. re Water & Land Conservation,* 123 So.3d 47, 50 (Fla. 2013)).

[50] ORPA's requirement of individuals serving half of their court-imposed sentence coincides with the Rules of Executive Clemency for those serving mandatory minimum sentences, and is even more stringent than the requirement for individuals serving a standard term-of-years

AMERICAN OVERSIGHT

sentences, which is the completion of one-third of their court-imposed sentences. See Rule 8(A), *Rules of Executive Clemency* (Commutation of Sentence).

[51] See generally section 947, Florida Statutes (2019).

[52] *See* n. 48, above.

[53] A recent study conducted by Florida State University on criminal justice reveals sentencing disparities based on race within Florida's 18 judicial circuits, specifically finding that "In Florida's criminal justice system, your ZIP code and the color of your skin can sometimes matter more than your behavior." O'Brien, at 8. The disparities reported are profound: "When racial and jurisdictional differences compound, the disparities can be astounding. Black adults in the 19th Circuit (Okeechobee) are 110 times more likely to be incarcerated for drugs that white adults in Palm Beach. Put another way, if the general populations were equivalent, for every white prisoner incarcerated for drugs from Palm Beach there would be 110 black prisoners from Okeechobee." O'Brien, at 9.

[54] "The growing recognition of the scale and urgency of mass incarceration is now voiced by leaders as diverse as Sen. Corey Booker and former House Speaker Newt Gingrich. A growing number of policy experts and advocacy organizations are now calling for a 50 percent cut in the U.S. prison population within the next 15 years. These include the UCLA, the #Cut50 initiative led by Van Jones, and Just Leadership USA—a national group led by formerly incarcerated individuals . . . . But the sobering reality is that at the pace of decline since 2009, it will take until 2093 to cut the U.S. prison population by 50%." "Can We Wait 75 Years to Cut the Prison Population in Half?: Expediting the end of mass incarceration will require accelerating the end of the Drug War and scaling back sentences for serious crimes." Voter Registration Number: _____ **or Date of Birth:** _____

I am a registered voter of Florida and hereby petition the Secretary of State to place the following proposed amendment to the Florida Constitution on the ballot in the general election:

BALLOT TITLE: Offender Reentry Program Amendment

BALLOT SUMMARY: Extends the Florida Commission on Offender Review's authority to develop a standardized offender reentry program, to place on supervised release (reintegration status) all qualifying offenders, including juvenile offenders, who have both served minimum sentence requirement and demonstrated an ability to live lawful, productive lives in society, and to terminate reintegration status of offenders who meet all obligations. Capital sexual offenders and death sentenced offenders are ineligible.

ARTICLE AND SECTION BEING CREATED OR AMENDED: Amends Article IV, section 8.

FULL TEXT OF THE PROPOSED CONSTITUTIONAL AMENDMENT:

SECTION 8. Clemency.—

(a) Except in cases of treason and in cases where impeachment results in conviction, the governor may, by executive order filed with the custodian of state records, suspend collection of fines and forfeitures, grant reprieves not exceeding sixty days and, with the approval of two members of the cabinet, grant full or conditional pardons, restore civil rights, commute punishment, and remit fines and forfeitures for offenses.

(b) In cases of treason the governor may grant reprieves until adjournment of the regular session of the legislature convening next after the conviction, at which session the legislature may grant a pardon or further reprieve; otherwise the sentence shall be executed.

(c) There may be created by law a parole and probation commission with power to supervise persons on probation and to grant paroles or conditional releases to persons under sentences for crime. The qualifications, method of selection and terms, not to exceed six years, of members of the commission shall be prescribed by law.

(1) Offender Reentry Program. The Florida Commission on Offender Review shall develop a standardized offender reentry program for all eligible offenders and shall place on reintegration status all qualifying offenders, including juvenile offenders, who have both served the minimum sentence requirement and demonstrated an ability to live lawful, productive lives in society as determined by the Florida Commission on Offender Review and consistent with the objectives of rehabilitation.

AMERICAN OVERSIGHT

(2) Applicability.

a. The Florida Commission on Offender Review shall make available to all eligible offenders a reentry program and shall place all qualifying offenders on reintegration status. The Florida Commission on Offender Review shall annually place a minimum of three percent of the total of the Florida Department of Corrections' offender population on reintegration status.

b. Eligibility. An offender who meets the definition of eligible offender as defined in this section shall have the right to qualify for reintegration status. Offenders who are eligible for parole prior to the effective date of this amendment shall not be eligible for reintegration status.

c. Qualification. An offender who meets both the eligibility requirement and the reasonable requisites of the Florida Commission on Offender Review shall qualify for reintegration status and shall have the right to be placed on reintegration status. Qualifying offenders shall be placed on reintegration status within a reasonable time or not later than six months after meeting the reasonable requisites.

d. Notice. An offender who may meet the eligibility requirement shall be given notice in writing of the reasonable requisites for qualification as determined by the Florida Commission on Offender Review and no later than two years before meeting the eligibility requirement, when practicable due to length of sentence remaining. Offenders may complete the reasonable requisites at any time during their court-imposed sentence.

(3) Termination of reintegration status. An offender on reintegration status shall remain thereon for the remainder of their court-imposed sentence unless terminated by proper authority. The Florida Commission on Offender Review shall terminate reintegration status of offenders who have met all obligations of their supervised release, and paid all fines, fees, restitution, or other costs, as determined by the Florida Commission on Offender Review.

(4) Definitions. For purposes of this section, the following terms shall have the stated meanings:

a. Eligible offender. Regardless of any mandatory minimum court-imposed sentence: a person under sentence or cumulative sentences totaling 40 years or less for any non-capital offense(s) who has served one half of the court-imposed sentence; a person under sentence or cumulative sentences totaling more than 40 years for any non-capital offense(s) who has served 20 years of the court-imposed sentence; a person under sentence for life or for life and a term of years for any non-capital offense(s) who has served 20 calendar years of the court-imposed sentence; or a person under any sentence for a capital felony except a sentence of death or a sentence for capital sexual battery who has served 25 calendar years of the court-imposed sentence.

b. Qualifying offender. A person who has met both the eligibility requirement and the reasonable requisites of the Florida Commission on Offender Review.

c. Reintegration status. The state of a person on supervised release from the Florida Department of Corrections under the terms and conditions set by the Florida Commission on Offender Review.

(5) This amendment shall take affect one year from the date it is voted into law.

A Political Committee dedicated to:

Redemption of Rehabilitated *Individuals*
Restorations of *Families*
Reintegration of Redeemed into *Society*

Dear Senator Jeff Brandes

Greetings. This letter is to inform you of Initiative 19-04, a proposed Florida Constitutional Amendment titled the "Offender Reentry Program" Amendment (**ORPA**) sponsored by Floridians For Redeemable People (FFRP). **ORPA** will add to Article IV, section 8 of the Florida Constitution, a subsection (c): "Offender Reentry Program" and will extend the authority of the Commission on Offender Review to review individuals, including juveniles, currently ineligible for parole for "Reintegration Status"—think of it as parole, but a completely new and distinct release mechanism. Eligible individuals will have an opportunity to earn Reintegration Status by completing certain requisites set by the Commission. Individuals will demonstrate personal merit through institutional conduct and by focusing on prolonged and sustained participation in educational and rehabilitative programming. We ask that you read the text of the proposed amendment (Initiative 19-04 petition)[1] and the reasoning behind it (**ORPA** Manifesto), both attached hereto.

This movement follows in the footsteps of last year's Amendment the Voting Restoration Amendment. Whereas Amendment 4 restored voting rights to ex-offenders, **ORPA** seeks to motivate individuals while they are incarcerated to participate in rehabilitative programming that will prepare them for reintegration with society. **ORPA** is a practical way to address the incarcerated population as a whole—those under sentence for non-violent and violent offenses—without resorting to using labels. Initiative 19-04 is a bottom-up approach to lessen the burden on tax payers due to excessive and overly punitive sentences, safely decrease the prison population, and lower recidivism rates.

The proposed criminal justice bills for this legislative session (particularly SB-1308), do not go far enough, as they are only for individuals sentenced for "non-violent" offenses and individuals who

Reintegration of Redeemed into *Society*

were 24 years old or younger on the date of their offenses and sentenced to non-capital life sentences. It is generally feared that the minimal measures taken now through these bills will be the only measures taken. Criminal reform must cross the plain to those under mandatory minimum sentences and life sentences as **ORPA** does, and this is the year for such reforms.[2]

Why ORPA is necessary:

- Right now there is **NO parole** in Florida for **ANYONE** under **ANY** circumstance under **ANY** sentence after October 1, 1983, with few exceptions for capital offenses up to October I, 1995.
- **ORPA** will create participatory demand for educational and rehabilitative programming within the FDC by incentivizing individuals to seek such programming, transforming the current system from one of mass incarceration and the warehousing of human beings into one of reentry programs and rehabilitating individuals with a real chance of redemption
- **ORPA** will shift focus from mass incarceration and warehousing to one of rehabilitation and reentry and will add elements of hope to the prison culture and redemption to the criminal justice system, which have too long been missing
- **ORPA** will give individuals a chance for redemption, safely decrease the current incarcerated population by 27% in ten years, foster the restoration of families and the successful reintegration of redeemed people back into society, and help to enfranchise those who would otherwise have no voice
- **ORPA** will safely decrease the incarcerated population and will save the State of Florida hundreds of millions of dollars yearly

With 176,000 individuals incarcerated in Florida at a rate of 833/100,000 (http://www.prisonpolicy.org), nearly everyone in this state has a friend or family member who has been affected by incarceration. These are our mothers and fathers, sons and daughters, our childhood friends. We can give them a fighting chance for redemption and restoration. For more information please visit us at Facebook at *Floridians For Redeemable People*. If you have any questions, concerns, suggestions, please contact me above. Thank you and God bless you and our community.

[2] It is worth noting that ORPA could be as a legislative bill to amend sections 775.082, 775.084 944.70 (Conditions for release from incarceration), 944.705 (Release orientation program), 9447065 (Transition course for inmates), 944.803 (Faith- and character-based programs), 946,501 (Inmate Labor and Correctional Work Programs), and 947.1405 (Conditional release program), to implement this reform.

Support Senate Bill 802 / House Bill 733

Marketable Record Title Act (MRTA)

SUMMARY: The bill makes 2 revisions to the Marketable Record Title Act to clarify how restrictions and easements are extended and preserved, and it adds a new provision to MRTA that provides a procedure for the formal elimination of "discriminatory covenants" such as those that were found in Tallahassee's Betton Hills neighborhood this summer and provides a for a public recording to evidence the extinguishment.

SECTION BY SECTION SUMMARY

Section 1. Clarifies that recordings in the public records that are intended to extend an easement, restriction or other interest that affects real property beyond 30 years must include an affirmative statement of the parties' intention to make the extension.

Section 2. Clarifies the application of MRTA to zoning, building, and development permits based on the 3rd District Court of Appeals holding in *Save Calusa Trust v. St. Andrews Holdings* (2016), *cert. denied* by Florida Supreme Court. The bill preserves conditions imposed by zoning, land development regulations and building codes.

Section 3. Defines "discriminatory restrictions" and provides new procedures to formally extinguish of "discriminatory restrictions." Allows the board of directors of an owner's association to remove discriminatory restrictions by majority vote.

Section 4. Provides a conforming change to recognize the changes associated with *Save Calusa Trust v. St. Andrews Holdings*.

Section 5. Provides an affirmative statement that the technical changes are to clarify existing law.

Section 6. Provides a one-year grace period to permit a property owner to file a notice to preserve an easement or restriction.

Section 7. Is a bill drafting edit and instructions to the Division of Law Revision.

Section 8. Provides for an effective date.

Subject: SB810 & SB 1394

Hello all:

I'd like for you to please think about these two bulls being introduced. One is about a tax of tobacco products and another is about restriction of delivery of tobacco products.

I'd like for you guys to please listen to constituents on these issues. A tax on these products is going to cause me, someone who vapes more money. I understand a tax on regular tobacco, but when the term "tobacco products" is used, it's a blanket statement that covers across the board, vape products, smoking, smokeless tobacco. Regular loose leaf tobacco or combustible tobacco causes more hard than smokeless tobacco or vaping products and we should be encouraging smokers to change to vaping because we know there is proof of lowered health concerns when it comes to vaping.

Now, the concern over health with vaping is not my point. My point is that it's going to cost me, the consumer, more for the products that I use by choice. It is a luxury and is a vice, but I choose to use it instead of combustible tobacco. What's going to happen is this will cause me to find ways around the tax, which I have already thought of several ways. This will not solve any problems in the state of Florida and I feel as though this tax will only cause more damage. Small businesses will be forced to close, like vape shops who help people to stop smoking and damaging their lungs with tar, chemicals, and residue from combusting tobacco.

Vape shops should be protected. We NEED vape shops around. Let me tell you why: It's because vape shops main purpose is to defeat smoking and defeat big tobacco. I understand the state makes money from taxes on tobacco products already, and I know vape products hurt the state's tax revenue which could be why these laws are even being decided on. These taxes will destroy vape shops because there is less incentive to start vaping and stop smoking if it's more expensive for consumers.

These laws are not consumer friendly or small business friendly. I think that's where it's drawing the line and overreaching in my opinion. I don't think it's fair for us to be overtaxed due to state overreach and state corporate greed. I work harder for the amount of money I make and if it's going to cost me more, I live close enough to Alabama that I can just drive over the state line and I'd rather my taxes go to them than Florida. I don't have to buy my products in Florida and I won't continue to if it costs more. For what? To pay you more, for something you don't work for? No thanks, I won't have it. I have friends who drive into Florida from Alabama who can buy products for me instead of me going there. There's plenty of options for me to stop buying products in Florida if that's the case.

Instead of my taxes going to you, they'll go elsewhere.

Instead of you being voted back in this year, we can vote you back out. We vape and we vote. Don't forget that. You represent US and our needs and wants. You represent the constituents who voted you in and have the power to vote you back out.

Signed,
Carson Bennett

Good afternoon, Education Committee Members + Partners!

On behalf of **Commissioner Richard Corcoran** and the **Florida Department of Education (FDOE)**, we would like to inform you of the **State Board of Education (SBOE) Meeting** that is taking place this week, on Wednesday, February 12, at 9:00 am EST, at FDOE in Tallahassee. Please see the agenda and meeting details HERE. You can also watch the meeting live online via the Florida Channel. If you are interested in joining us in person, we would love to have you! Please RVSP to Jessica.Fowler@fldoe.org by Tuesday, Feb. 11.

Additionally, the **Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards** were released Friday, Jan. 31 and will be on the agenda during this meeting. They are available online HERE. You can also find more information on the Standards and the revision process in the attached memo from Chancellor Oliva to district Superintendents.

If you have any questions, please let us know!

Best,
Jes

MEMORANDUM

Contact Information:
Kathy Nobles
850-245-0423
Kathy.Nobles@fldoe.org
DPS: 2020-17

DATE: January 31, 2020

TO: School District Superintendents

FROM: Jacob Oliva

SUBJECT: **Proposed Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

One year ago today, Governor DeSantis issued Executive Order 19-32 to eliminate Common Core, develop a roadmap to have the #1 standards in the nation, increase curricular quality, streamline testing, raise the bar for civic literacy and become the most literate state in the nation.

On January 24, 2020, Governor DeSantis announced that he approved the roadmap to adopt the B.E.S.T. Standards in English language arts (ELA) and mathematics for grades K-12, which are posted along with summary documents at www.fldoe.org/standardsreview. The State Board of Education will take action to adopt the proposed standards on February 12, 2020, at their meeting in Tallahassee.

Over the past year, the department collaborated with colleagues and the public across Florida to develop these standards. Florida teacher experts participated in 154 virtual and 11 face-to-face meetings. National content experts and more than 80 Florida-based education stakeholder groups provided input. Nine Florida Standards Listening Tour stops were held around the state last October to collect public comments, and over 100,000 reviews were made online by the public on drafts of new standards.

Through these immense and important efforts, you will find that the B.E.S.T. Standards:

- Were created by Florida experts and eliminate Common Core;
- Are content-rich and developmentally appropriate;
- Go back-to-basics, building a foundation in the early grades;
- Are understandable, concise and set clear expectations for students, teachers and parents;
- Imbed Civics throughout K-12 and include the only Civics reading list for ELA in the nation;
- Include the only comprehensive K-12 reading list in the nation;
- Offer flexibility for teachers with a focus on great content; and
- Include clear expectations for progression year-to-year through great course alignment.

Once adopted, teacher professional development will begin, a new instructional materials adoption process will be conducted and new test development activities will commence. By 2022-2023, all new standards will be taught, classroom materials will be aligned and new statewide assessments will measure a baseline of their impact.

We appreciate all of the contributions of school district staff and teachers to bring you the B.E.S.T. Standards, and we look forward to working with you on successful implementation.

JACOB OLIVA
CHANCELLOR OF PUBLIC SCHOOLS

Supreme Court of Florida

No. SC19-1341

ADVISORY OPINION TO THE GOVERNOR RE: IMPLEMENTATION OF AMENDMENT 4, THE VOTING RESTORATION AMENDMENT.

January 16, 2020

PER CURIAM.

By letter dated August 9, 2019, Governor Ron DeSantis requested the opinion of the justices of this Court as to the interpretation of a portion of the Florida Constitution upon a question affecting his executive powers and duties. We have jurisdiction. *See* art. IV, § 1(c), Fla. Const.

Specifically, the Governor requests advice regarding the meaning of certain language that was added to article VI, section 4 of the Florida Constitution by the approval on November 6, 2018, of an initiative petition—commonly referred to as "Amendment 4"—that restores the voting rights of certain convicted felons "upon completion of all terms of sentence including parole or probation." Art. VI, § 4(a), Fla. Const. The Governor asks whether the phrase "all terms of sentence" encompasses legal financial obligations (LFOs)—fines, restitution, costs, and

AMERICAN OVERSIGHT

fees—ordered by the sentencing court. We answer in the affirmative, concluding that "all terms of sentence" encompasses not just durational periods but also all LFOs imposed in conjunction with an adjudication of guilt.

The Governor's letter in relevant part states:

> I request your interpretation of whether "completion of all terms of sentence" encompasses financial obligations, such as fines, fees and restitution ("legal financial obligations" or "LFOs") imposed by the court in the sentencing order.
>
> Prior to Amendment 4's placement on the ballot, this Court was asked to determine whether the amendment met the legal requirements under Florida's Constitution. On March 6, 2017, during a colloquy between the justices and Amendment 4's sponsor, Floridians for a Fair Democracy ("Sponsor"), this Court was assured the Amendment presented a "fair question" and "clear explanation" to voters. Transcript of Oral Argument at 2, *Advisory Op. to the Attorney General Re: Voting Restoration Amend.*, 215 So. 3d 1202 (Fla. 2017) (Nos. SC16-1785 and SC16-1981). Addressing a question posed by Justice Polston as to whether "completion of [all] terms" included "full payment of any fines," the Sponsor responded, "Yes, sir . . . All terms means all terms within the four corners." *Id.* at 4. Justice Lawson similarly asked, "You said that terms of sentence includes fines and costs . . . that's the way it's generally pronounced in criminal court, would it also include restitution when it was ordered to the victim as part of the sentence?" *Id.* at 10. The Sponsor answered, "Yes." *Id.* Justice Pariente posited the inclusion of fees, fines, and restitution as part of the completion of sentence "would actually help the state because if fines, costs and restitution are a requirement . . . for those that want to vote, there's a big motivation to pay unpaid costs, fines and restitution." *Id.* at 11. Ultimately, the Court found Amendment 4 clearly and unambiguously informed voters the chief purpose of the proposed amendment was to "automatically restore voting rights to felony offenders, except those convicted of murder or felony sexual offenses, *upon completion of all terms of their sentence*." *Advisory Op.*, 215 So. 3d at 1208 (emphasis added).

AMERICAN OVERSIGHT

In alignment with the colloquy with the Florida Supreme Court, after Amendment 4 was approved by voters, the ACLU of Florida, League of Women Voters of Florida, LatinoJustice, and the Florida Rights Restoration Coalition delivered a letter to former Secretary of State Ken Detzner regarding implementation of Amendment 4. Exhibit 1, December 13, 2018 Letter. In part, the letter explained,

> The phrase "completion of all terms of sentence" includes any period of incarceration, probation, parole and financial obligations imposed as part of an individual's sentence. *The financial obligations may include restitution and fines, imposed as part of a sentence or a condition of probation under existing Florida statute. Fees not specifically identified as part of a sentence or a condition of probation are therefore not necessary for 'completion of sentence' and thus, do not need to be paid before an individual may register.* We urge the Department to take this view in reviewing eligibility of individuals registered to vote as outlined in Chapter 98, Florida Statutes.

Ex. 1, p. 3 (emphasis added).

During the 2019 Legislative Session, legislators in both chambers debated legislative implementation of Amendment 4. Ultimately, both chambers passed CS/SB 7066 and, on June 28, 2019, I signed it into law. *See* Ch. 2019-162, Laws of Fla. In relevant part, chapter 2019-162, section 25, Laws of Florida, creating section 98.0751, Florida Statutes, provided guidance on restoration of voting rights and determination of ineligibility pursuant to the amendment of Article VI, section 4 of the Florida Constitution. Section 98.0751, Florida Statutes, defines "[c]ompletion of all terms of sentence" as "any portion of a sentence that is contained in the four corners of the sentencing document." § 98.0751(2)(a), Fla. Stat. (2019). The Legislature provided five categories of terms included in the sentencing document: . . . (5) full payment of LFOs ordered by the court as part of the sentence. *See* § 98.0751(2)(a)l.-5., Fla. Stat. (2019).

On June 15, 2019, Luis Mendez filed a complaint in the Northern District of Florida seeking injunctive and declaratory relief and mandamus challenging chapter 2019-162, Laws of Florida. In

AMERICAN OVERSIGHT

part, Mendez alleges chapter 2019-162, Laws of Florida, violates Article VI, section 4 of the Florida Constitution because it adds requirements for the restoration of voting rights above what was prescribed in the Florida Constitution. Additional complaints were filed by numerous plaintiffs, including organizations referenced above, alleging provisions of chapter 2019-162, Laws of Florida violate the First, Eighth, Fourteenth and Twenty-Fourth Amendments of the United States Constitution. These challenges are only directed at chapter 2019-162, Laws of Florida, and do not question the constitutionality of Article VI, section 4 of the Florida Constitution.

Article IV, section 1(a) of the Florida Constitution prescribes the supreme executive power shall be vested in the Governor, that he "shall take care that the laws be faithfully executed" and "transact all necessary business with the officers of government." Article IV, section 6 of the Florida Constitution places direct administration and supervision of all functions of the executive branch, including the Department of State, under the constitutional authority of the Governor. *See also* § 20.02(3), Fla. Stat. (the administration of any executive branch entity shall at all times be ["]under the constitutional executive authority of the Governor"); § 20.10, Fla. Stat. (creating the Department of State, headed by the Secretary of State who is appointed by the Governor). Furthermore, the Secretary of State is the chief elections officer with the responsibility to maintain uniformity in the interpretation and implementation of voter registration and election laws. *See* § 97.012, Fla. Stat.

. . . .

I, as Governor of Florida, . . . want to ensure the proper implementation of Article VI, section 4 of the Florida Constitution and, if applicable, chapter 2019-162, Laws of Florida. This includes the ability to direct the Department of State to fully implement Article VI, section 4 of the Florida Constitution by determining whether a convicted felon has completed *all* terms of their sentence, including the satisfaction of LFOs. I will not infringe on the proper restoration of an individual's right to vote under the Florida Constitution.

Understanding there is ongoing litigation in federal court challenging chapter 2019-162, Laws of Florida under the First, Eighth, Fourteenth and Twenty-Fourth Amendments of the United States Constitution, I do not ask this Court to address any issues regarding chapter 2019-162, Laws of Florida or the United States Constitution.

AMERICAN OVERSIGHT

> Therefore, I respectfully request an opinion of the Justices of the Supreme Court of Florida as to the question of whether "completion of all terms of sentence" under Article VI, section 4 of the Florida Constitution includes the satisfaction of all legal financial obligations—namely fees, fines and restitution ordered by the court as part of a felony sentence that would otherwise render a convicted felon ineligible to vote.

Letter from Governor Ron DeSantis to Chief Justice Charles T. Canady dated August 9, 2019, at 1-4 (some alterations in original) (footnote omitted).

After concluding that the Governor's request was within the purview of article IV, section 1(c) of the Florida Constitution, we agreed to exercise our discretion to provide an advisory opinion. We also permitted interested parties to file briefs and to present oral argument before the Court. *See* art. IV, § 1(c), Fla. Const.[1] During oral argument, counsel for the Governor made clear that the Governor requests advice solely as to the narrow question of whether the phrase

1. Timely initial briefs were submitted by the following: (1) Governor Ron DeSantis; (2) The Florida Senate; and Bill Galvano, in his official capacity as President of the Florida Senate; (3) The Florida House of Representatives; (4) Secretary of State, Laurel M. Lee; (5) Adam Richardson; (6) Mark R. Schlakman, joined by The Florida Association of Criminal Defense Lawyers; (7) Fair Elections Center; (8) The American Civil Liberties Union Foundation of Florida, American Civil Liberties Union Foundation, NAACP Legal Defense and Educational Fund, Inc., Brennan Center for Justice at NYU School of Law, Florida State Conference of Branches and Youth Units of the NAACP, Orange County Branch of the NAACP, and League of Women Voters of Florida; (9) Jennifer LaVia and Carla Laroche; and (10) Bonnie Raysor, Diane Sherrill, and Lee Hoffman.

AMERICAN OVERSIGHT

"all terms of sentence" includes LFOs ordered by the sentencing court. We answer only that question.

The arguments presented by the interested parties generally fall into one of two categories. On the one hand, the Governor, the Florida Senate, the Florida House of Representatives, and the Secretary of State (collectively, the State Parties) all argue that "all terms of sentence" includes all LFOs ordered by the sentencing judge. They largely rely on plain language, case law, and the common understanding of penalties imposed for criminal acts. On the other hand, the remaining interested parties (collectively, the Non-State Parties) present varying arguments against some or all LFOs being included within the scope of "all terms of sentence." Some Non-State Parties argue that "all terms of sentence" refers to durational periods rather than to obligations and thus contemplates only periods of imprisonment and supervised release. Others assume that "all terms of sentence" refers to obligations including some LFOs, but they argue for the exclusion of certain LFOs. These latter Non-State Parties focus on what they label as punitive aspects of a sentence and on what they consider to be the technical components of a criminal sentence.

The answer to the Governor's question largely turns on whether "all terms of sentence" encompasses all obligations or only durational periods. We conclude that the phrase, when read and understood in context, plainly refers to obligations

AMERICAN OVERSIGHT

and includes "all"—not some—LFOs imposed in conjunction with an adjudication of guilt. Before explaining our opinion, we briefly address our jurisdiction as well as the Secretary of State's concerns that the events leading up to the adoption of Amendment 4 and the subsequent legal challenges to chapter 2019-162 amount to a "bait and switch" attempt to amend our State's governing document.

JURISDICTION

Article IV, section 1(c) of the Florida Constitution authorizes the Governor to "request in writing the opinion of the justices of the supreme court as to the interpretation of any portion of this constitution upon any question affecting the governor's executive powers and duties." Upon receiving such a request, "the justices shall determine whether the request is within the purview of article IV, section 1(c)." Fla. R. App. P. 9.500(b). Here, we readily concluded that the Governor's question is answerable. In particular, the question affects the Governor's constitutional responsibility to "take care that the laws be faithfully executed," art. IV, § 1(a), Fla. Const., and the exercise of his clemency powers, art. IV, § 8(a), Fla. Const.

Certain Non-State Parties nevertheless question our jurisdiction, but their arguments are meritless. These Non-State Parties argue, for example, that it is inappropriate for this Court to issue an advisory opinion on the constitutionality of a statute and that the Governor in effect impermissibly seeks advice regarding the

AMERICAN OVERSIGHT

necessity or validity of chapter 2019-162 and the interpretation of its provisions. But neither the existence of chapter 2019-162 nor the possibility that our advice may touch upon that legislation precludes us from answering the Governor's question. Indeed, though the Governor's request does not ask us directly to address the constitutionality of chapter 2019-162, we note that this Court since 1968[2] has issued advisory opinions to the Governor addressing the validity of legislation that affected his executive powers and duties. *E.g.*, *In re Advisory Opinion of Governor Civil Rights*, 306 So. 2d 520, 521-22 (Fla. 1975) (concluding that the Florida Correctional Reform Act of 1974—an act that had already been signed into law and that purported to reinstate the civil rights of convicted felons under certain circumstances—"constitute[d] a clear infringement upon the constitutional power of the Governor to restore civil rights").[3] In any event, given the narrow question presented here, we need not address chapter 2019-162.

---

2. The 1968 Constitution for the first time permitted interested parties to be heard in advisory opinion cases. *See In re Advisory Opinion to Governor*, 243 So. 2d 573, 576 (Fla. 1971) (examining the constitutionality of a proposed corporate income tax and recognizing that "Section 1(c), Article IV, Constitution of 1968, enlarged to some extent the power of this Court to be of assistance"); *Opinion to the Governor*, 239 So. 2d 1, 8 (Fla. 1970) (examining the constitutionality of the 1970 General Appropriations Act and recognizing that it was "noteworthy that in the 1968 constitutional revision, authority and direction were given this Court to permit interested persons to be heard").

3. *Civil Rights* reiterated this Court's long-held view "that the power of pardon is reposed exclusively in the . . . executive" and is not to be infringed upon by the other branches. 306 So. 2d at 522; *see also Sullivan v. Askew*, 348 So. 2d

AMERICAN OVERSIGHT

These Non-State Parties additionally argue among other things that the Governor's request impermissibly concerns the duties of his subordinates rather than his sole authority. But in *Advisory Opinion to Governor—1996 Amendment 5 (Everglades)*, 706 So. 2d 278, 280-81 (Fla. 1997), this Court's conclusion that the question there fell "within the purview of article IV, section 1(c)" was based in part on the fact that the constitutional amendment at issue directly affected the Governor's constitutional duty to faithfully execute the laws, including the duty to provide certain agencies "with direction as to their enforcement responsibilities." Here, the Governor's question about the meaning of Amendment 4 similarly affects among other things his general constitutional duties, including the duty to provide the Department of State with necessary direction regarding the implementation of voter registration laws.

The Governor's request satisfies the requirements of article IV, section 1(c).

AMENDMENT 4—BACKGROUND

Prior to Amendment 4's adoption, article VI, section 4(a) of the Florida Constitution permanently disenfranchised all felons absent a grant of executive clemency. *See Richardson v. Ramirez*, 418 U.S. 24, 54 (1974) ("[T]he exclusion

---

312, 315 (Fla. 1977) (noting that article IV, section 8 of the Florida Constitution "vest[ed] sole, unrestricted, unlimited discretion exclusively in the executive" in restoring civil rights).

AMERICAN OVERSIGHT

of felons from the vote has an affirmative sanction in § 2 of the Fourteenth Amendment . . . .”). The text of Amendment 4, which amended article VI, section 4, provided in pertinent part:

> Article VI, Section 4. **Disqualifications.—**
>
> (a) No person convicted of a felony, or adjudicated in this or any other state to be mentally incompetent, shall be qualified to vote or hold office until restoration of civil rights or removal of disability. Except as provided in subsection (b) of this section, any disqualification from voting arising from a felony conviction shall terminate and voting rights shall be restored upon completion of all terms of sentence including parole or probation.
>
> (b) No person convicted of murder or a felony sexual offense shall be qualified to vote until restoration of civil rights.

In 2016—two years before the voters approved Amendment 4—this Court was asked by the Attorney General whether Amendment 4 met the legal requirements for placement on the ballot. *Advisory Op. to Att’y Gen. re Voting Restoration Amendment*, 215 So. 3d 1202 (Fla. 2017). This Court unanimously answered in the affirmative. *Id.* at 1209. In its brief to this Court arguing in support of Amendment 4 being placed on the ballot, Amendment 4’s sponsor, Floridians for a Fair Democracy (the Sponsor), asserted: “Specifically, the drafters intend that individuals with felony convictions, excluding those convicted of murder or a felony sexual offense, will automatically regain their right to vote *upon fulfillment of all obligations imposed under their criminal sentence*.” Initial Brief of Sponsor at 2, *Advisory Op. to Att’y Gen. re Voting Restoration*

AMERICAN OVERSIGHT

Amendment, 215 So. 3d 1202 (Fla. 2017) (Nos. SC16-1785 & SC16-1981) (emphasis added). In other words, the Sponsor intended that "all terms" refer to obligations, not durational periods. No briefs were submitted in opposition to Amendment 4.

Oral argument in that case took place on March 6, 2017. During the oral argument, counsel for the Sponsor stated—consistent with the Sponsor's brief—that the operative language in Amendment 4 "means all matters—anything that a judge puts into a sentence." As noted in the Governor's letter, that oral argument involved discussion of LFOs—including fines, costs, and restitution—as well as the process for confirming payment of LFOs. Counsel for the Sponsor summed up by reiterating that Amendment 4 was intended to be "a restoration of voting rights under these specific conditions." It is beyond dispute that the Sponsor expressed the intention that "all terms of sentence" include all LFOs ordered by the sentencing judge.

As the Secretary notes here, the Sponsor advertised a similar message to the voting public via its "Paid Political Advertisement" website. *See* Initial Brief of Secretary of State at 7, and App. at 33-68. Among other things, the website states in bold-italicized text that "Amendment 4 restores the eligibility to vote to people with past felony convictions who ***fully complete*** their entire sentence – including any probation, parole, and restitution – before earning back the eligibility to vote."

AMERICAN OVERSIGHT

As the Secretary also notes, similar messages were disseminated by some of the very same nonprofit organizations that are currently involved in the lawsuits challenging chapter 2019-162 and that now argue to this Court that "all terms of sentence" simply refers to durational periods. *See* Initial Brief of Secretary at 9. For example, the American Civil Liberties Union Foundation of Florida (ACLU of Florida) in its 2018 voter guide informed voters that Amendment 4 "includ[ed] any probation, parole, fines, or restitution." *See id.* at 7, and App. at 69. Indeed, the ACLU of Florida and other organizations along with the Sponsor spread a consistent message before and after Amendment 4's adoption. As noted in the Governor's letter, the signatories of the December 2018 letter to then-Secretary Detzner asserting in part that Amendment 4 required payment of "financial obligations imposed as part of an individual's sentence" included the ACLU of Florida as well as Florida Rights Restoration Coalition, the organization that, according to the Secretary, created the Sponsor.[4]

Although the representations to this Court and to the public close the door on any credible suggestion that "all terms of sentence" was *intended* by the Sponsor to refer only to durational periods, we need not address whether Amendment 4

4. In a subsequent March 2019 letter to current Secretary Lee, those same organizations and others identified themselves as the "organizations that led the effort to pass Amendment 4." *See* Initial Brief of Governor at 5, and App. at 8, 12.

AMERICAN OVERSIGHT

involved a "bait and switch" attempt to amend our State's constitution. Indeed, our opinion is based not on the Sponsor's subjective intent or campaign statements, but rather on the objective meaning of the constitutional text. The language at issue, read in context, has an unambiguous "ordinary meaning" that the voters "would most likely understand," *Everglades*, 706 So. 2d at 283, to encompass obligations including LFOs. The Sponsor's expressed intent and campaign statements simply are consistent with that ordinary meaning that would have been understood by the voters.

ANALYSIS

The Governor asks whether the phrase "all terms of sentence," as used in article VI, section 4, encompasses LFOs imposed by the sentencing court. The interpretation of a constitutional provision involves "a question of law." *Crist v. Fla. Ass'n of Criminal Def. Lawyers, Inc.* (*FACDL*), 978 So. 2d 134, 139 (Fla. 2008). In interpreting constitutional language, "this Court follows principles parallel to those of statutory interpretation. First and foremost, this Court must examine the actual language used in the Constitution. If that language is clear, unambiguous, and addresses the matter in issue," then our task is at an end. *Graham v. Haridopolos*, 108 So. 3d 597, 603 (Fla. 2013) (quoting *FACDL*, 978 So. 2d at 139-40).

AMERICAN OVERSIGHT

But this Court has sometimes suggested that the first step in construing a constitutional provision may involve something other than determining the objective meaning of the text. *See, e.g.*, *Williams v. Smith*, 360 So. 2d 417, 419 (Fla. 1978) ("In construing the Constitution, we first seek to ascertain the intent of the framers and voters, and to interpret the provision before us in the way that will best fulfill that intent."). We believe that such statements can be misleading because they may be understood to shift the focus of interpretation from the text and its context to extraneous considerations. And such extraneous considerations can result in the judicial imposition of meaning that the text cannot bear, either through expansion or contraction of the meaning carried by the text. We therefore adhere to the "supremacy-of-text principle": "The words of a governing text are of paramount concern, and what they convey, in their context, is what the text means." Antonin Scalia & Bryan A. Garner, *Reading Law: The Interpretation of Legal Texts* 56 (2012).

We also adhere to the view expressed long ago by Justice Joseph Story concerning the interpretation of constitutional texts (a view equally applicable to other texts): "[E]very word employed in the constitution is to be expounded in its plain, obvious, and common sense, unless the context furnishes some ground to control, qualify, or enlarge it." Joseph Story, *Commentaries on the Constitution of the United States* 157-58 (1833), *quoted in* Scalia & Garner, *Reading Law* at 69.

AMERICAN OVERSIGHT

This Court in construing constitutional language approved by the voters often "looks to dictionary definitions of the terms because we recognize that, 'in general, a dictionary may provide the popular and common-sense meaning of terms presented to the voters.' " *Advisory Op. to Att'y Gen. re Use of Marijuana for Certain Med. Conditions*, 132 So. 3d 786, 800 (Fla. 2014) (quoting *Everglades*, 706 So. 2d at 282). The dictionary meaning of the word "terms," when viewed in isolation, can refer either to multiple durational periods or to multiple obligations or conditions. *See The American Heritage Dictionary* 1796 (5th ed. 2011) (defining "term" as "[a] limited or established period of time that something is supposed to last, as . . . a prison sentence"; and as "a condition").

But the fact that the word "terms" itself can carry different meanings does not render the phrase "all terms of sentence," as used in Amendment 4, susceptible to more than one natural reading. *See Smith v. United States*, 508 U.S. 223, 233 (1993) ("[A] single word cannot be read in isolation . . . ."). As the Supreme Court has explained, "[I]t is a 'fundamental principle of statutory construction (and, indeed, of language itself) that the meaning of a word cannot be determined in isolation, but must be drawn from the context in which it is used.' " *Textron Lycoming Reciprocating Engine Div., Avco Corp. v. United Auto., Aerospace, Agric. Implement Workers of Am., Int'l Union*, 523 U.S. 653, 657 (1998) (quoting *Deal v. United States*, 508 U.S. 129, 132 (1993)). And when viewed in context,

AMERICAN OVERSIGHT

"all terms of sentence" has only one natural reading—one that refers to all obligations, not just durational periods.

As the Governor and others correctly note, Amendment 4 refers to the voting disqualification arising from "a felony conviction" and later refers to "all terms of" the singular "sentence" resulting from that singular conviction. *See* art. VI, § 4(a), Fla. Const. We know from its explicit reference to "parole or probation" that Amendment 4 uses the term "sentence" to designate more than just imprisonment. And an overall "sentence"—as that word is used in Amendment 4—is naturally viewed as having only one durational term rather than multiple durational terms.

For example, in *Ramirez*, in which the Supreme Court concluded that the Fourteenth Amendment affirmatively authorizes felon disenfranchisement, the Court despite referring collectively to the respondents' "terms of incarceration and parole," 418 U.S. at 34, referred in the singular to an individual felon having "completed the serving of his term," 418 U.S. at 55; *see also id.* at 56-57 (Marshall, J., dissenting) ("Each of the respondents . . . had fully served his term of incarceration and parole."). It would be entirely unnatural, of course, to say that a felon convicted of a singular felony had "completed the serving of his terms" when the time of his incarceration and parole had been completed. Although a singular, overall "sentence" naturally has only one durational term (albeit sometimes with

AMERICAN OVERSIGHT

distinct components), it can have multiple conditions or obligations—i.e., "terms." Indeed, that is the only natural reading of "all terms of sentence."

Certain Non-State Parties advance various arguments for why we should in fact read the words "all terms" to refer solely to durational periods. We are not persuaded by their arguments.

At first blush, the strongest argument advanced by these Non-State Parties is a contextual one. They note that Amendment 4 does not expressly mention LFOs but does mention "parole or probation," which are forms of supervised release that, like incarceration, can each be said to have a durational "term." They thus argue that those two forms of supervised release provide an "illustrative list" to guide this Court "in [its] interpretation of" Amendment 4. *White v. Mederi Caretenders Visiting Servs. of Se. Fla., LLC*, 226 So. 3d 774, 784 (Fla. 2017). This line of reasoning, however, is ultimately premised upon two canons of construction that do not apply in this context.

First, under the *expressio unius est exclusio alterius* canon, "the mention of one thing implies the exclusion of another." *Id.* at 781. But this Court has noted that "[g]enerally, it is improper to apply *expressio unius* to a statute in which the Legislature used the word 'include,' " as that is "a word of expansion, not one of limitation." *Id.* Here, the phrase "parole or probation" comes immediately after the word "including."

AMERICAN OVERSIGHT

Second, under the *ejusdem generis* canon, "where general words or phrases follow an enumeration of specific words or phrases, 'the general words are construed as applying to the same kind or class as those that are specifically mentioned.' " *Marijuana for Certain Med. Conditions*, 132 So. 3d at 801 (quoting *Fayad v. Clarendon Nat'l Ins. Co.*, 899 So. 2d 1082, 1088-89 (Fla. 2005)). Application of the canon thus requires that the enumeration of specifics precede the general words. But Amendment 4 involves the exact opposite: the specific words ("parole or probation") follow the general words ("all terms").

A glaring problem with the arguments advanced by these Non-State Parties is that their preferred reading of Amendment 4 effectively renders superfluous the words "all terms of" in the constitutional text. These Non-State Parties interpret Amendment 4 as if it had *omitted* the words "all terms of" and simply read: "upon completion of sentence including parole or probation." The words "all terms of" serve no meaningful purpose under the reading advanced by these Non-State Parties. This Court, of course, ordinarily avoids interpretations that "render any language superfluous." *Dep't of Envtl. Prot. v. Millender*, 666 So. 2d 882, 886 (Fla. 1996). Indeed, just as we do not "add words" to a constitutional provision, we are similarly "not at liberty to . . . ignore words that were expressly placed there at the time of adoption of the provision." *Pleus v. Crist*, 14 So. 3d 941, 945 (Fla. 2009).

AMERICAN OVERSIGHT

In the end, Amendment 4 was not drafted to require completion of "the term of sentence including parole or probation." Nor was it drafted to require completion of "all terms of . . . incarceration, probation, and parole." *Johnson v. Governor of State of Fla.*, 405 F.3d 1214, 1216 (11th Cir. 2005) (describing the status of members of plaintiff class in that case). Amendment 4 was drafted to require completion of "all terms of sentence." Art. VI, § 4(a), Fla. Const. That language—which appears to be new to Florida jurisprudence—has only one natural reading.

Perhaps not coincidentally, certain courts—in the specific context of rejecting various challenges to re-enfranchisement schemes that require payment of certain LFOs—have used language similar to "all terms of sentence" to refer to obligations. These cases further undercut the argument that Amendment 4 refers only to durational periods. They demonstrate that phrases such as "all terms of sentence" are naturally understood to encompass more than durational periods.

Most notably, the Supreme Court of Washington used nearly identical language to that at issue here in upholding against certain attacks a re-enfranchisement scheme that required a felon to complete "all requirements of the sentence, including any and all legal financial obligations." *Madison v. Washington*, 163 P.3d 757, 763 (Wash. 2007) (quoting Wash. Rev. Code 9.94A.637(1)(a) (2004)). The LFO requirement there specifically included costs

AMERICAN OVERSIGHT

and fees. *Id.* at 761 n.1. In describing the respondents who were suing to have their voting rights restored, the court noted that each "has satisfied *all of the terms of his sentence, with the exception of full payment of his LFOs*." *Id.* at 762 (emphasis added); *see also State v. Donaghe*, 256 P.3d 1171, 1178 (Wash. 2011) ("In *Madison* . . . , we upheld the disenfranchisement of felons who have satisfied the terms of their sentences, except for paying legal financial obligations."). *Madison*'s reference to "all of the terms of" a singular, overall "sentence" refers to requirements or obligations in addition to durational periods. 163 P.3d at 762.

Two Circuit Courts of Appeals have used somewhat similar language in a related context. *See Johnson v. Bredesen*, 624 F.3d 742, 745, 749 (6th Cir. 2010) (rejecting certain challenges to Tennessee's re-enfranchisement scheme that required felons to among other things have paid all restitution, and describing *Madison* as having upheld "a statute conditioning re-enfranchisement on completion of all terms of felons' sentences, including full payment of their financial legal obligations"); *Harvey v. Brewer*, 605 F.3d 1067, 1070, 1079 (9th Cir. 2010) (rejecting certain challenges to Arizona's re-enfranchisement scheme that required felons to among other things have paid all fines and restitution, and concluding that the state had "a rational basis for restoring voting rights only to those felons who have completed the terms of their sentences, which includes the

AMERICAN OVERSIGHT

payment of any fines or restitution orders"—that is, "only those who have satisfied their debts to society through fulfilling the terms of a criminal sentence").

The similar language used by these courts—all in the specific context of felon re-enfranchisement—underscores that the phrase "all terms of sentence" naturally encompasses obligations. Indeed, in the unrelated context of lawyer discipline, the Supreme Court of South Carolina used a similar phrase in a similar manner. *See In re Allmon*, 753 S.E.2d 544, 545 (S.C. 2014) ("Respondent shall complete all terms of his criminal sentence, including payment of restitution and completion of probation, prior to filing a Petition for Reinstatement.").

We conclude that "all terms of sentence" plainly encompasses not only durational terms but also obligations and therefore includes all LFOs imposed in conjunction with an adjudication of guilt. As explained next, we reject as overly technical the arguments advanced by certain Non-State Parties that Amendment 4 encompasses only some LFOs.

One Non-State Party argues that costs and fees are categorically excluded from "all terms of sentence" because those LFOs do not bear any of the hallmarks of a "sentence." Another Non-State Party argues that Amendment 4 includes only those LFOs mentioned in Florida Rule of Criminal Procedure 3.986(d) (Form for Sentencing) and excludes all LFOs listed in any of rule 3.986's other forms (e.g., Form for Restitution Order (rule 3.986(g)). But these Non-State Parties improperly

AMERICAN OVERSIGHT

view the phrase "all terms of sentence" as a term of art that turns on a nuanced legal analysis of the word "sentence." Indeed, their attempts to isolate and parse the word "sentence" to carve out certain LFOs improperly interprets that word "in a technical sense" absent any "suggest[ion]" in the text of Amendment 4 that the word was to be given something other than its "most usual and obvious meaning." *Wilson v. Crews*, 34 So. 2d 114, 118 (Fla. 1948) (quoting *City of Jacksonville v. Glidden Co.*, 169 So. 216, 217 (Fla. 1936)). These opponents also implausibly suggest that the voters who adopted Amendment 4 would have understood the comprehensive phrase "all terms" to include only those terms that courts deem "punitive." Here, "the natural and popular meaning in which," *id.*, the voters would understand the broad phrase "all terms of sentence" is that it includes all obligations imposed in conjunction with an adjudication of guilt.

The word "sentence" is not defined in the Florida Constitution or seemingly anywhere in the Florida Statutes. But the word is defined in various dictionaries. *See, e.g.*, Sentence, *Black's Law Dictionary* 1569 (10th ed. 2014) ("The judgment that a court formally pronounces after finding a criminal defendant guilty; the punishment imposed on a criminal wrongdoer"). The word is also defined in Florida Rule of Criminal Procedure 3.700(a) to mean "the pronouncement by the court of the penalty imposed on a defendant for the offense of which the defendant has been adjudged guilty." Rule 3.701(b)(2) later explains that punishment is the

AMERICAN OVERSIGHT

"primary" but not the sole "purpose of sentencing." That rule also uses the words "penalty" and "sanction." Fla. R. Crim. P. 3.701(b)(3)-(4).

As one example of why the word "sentence" cannot be construed in an overly technical fashion here, Amendment 4 expressly includes "parole" within its scope, and yet courts have explicitly or implicitly distinguished parole from a "sentence." *E.g.*, *Ramirez*, 418 U.S. at 26 (noting that the respondents had "completed the service of their respective sentences and paroles"). It is for a similar reason—among many others—that the answer to the Governor's question cannot be limited to any one form set forth in rule 3.986. Indeed, parole cannot be captured by any of those forms. Parole, of course, is granted, and its terms set, by the Florida Commission on Offender Review, not by a sentencing judge. *See generally* chs. 947-49, Fla. Stat. (2019). In other words, parole is not "pronounce[d] by the court." Fla. R. Crim. P. 3.700(a).

Amendment 4 thus uses the word "sentence" in its plain, common sense. And it does so in the context of the broad phrase "all terms of sentence." Absent any suggestion in the context of Amendment 4 that the word "sentence" carries a technical meaning restricting its scope, there is no basis to conclude that "all terms of sentence" excludes any LFOs ordered by the sentencing judge. Indeed, an abundance of statutory and case law supports the conclusion that fines, restitution,

AMERICAN OVERSIGHT

and fees and costs all comfortably fit within the ordinary meaning of "all terms of sentence."

Beginning with restitution, this Court has referred to that obligation as part of a "sentence," and even as "punishment." *See, e.g.*, *Noel v. State*, 191 So. 3d 370, 375 (Fla. 2016) ("The 'purpose of restitution is not only to compensate the victim, but also to serve the rehabilitative, deterrent, and retributive goals of the criminal justice system.' " (quoting *State v. Hawthorne*, 573 So. 2d 330, 333 (Fla. 1991))); *Kirby v. State*, 863 So. 2d 238, 244 (Fla. 2003) (recognizing "the trial court's statutory obligation to impose restitution as part of the criminal sanction"); *Glaubius v. State*, 688 So. 2d 913, 914 (Fla. 1997) ("As part of his sentence, he was also ordered to pay restitution to Beall's."); *State v. Champe*, 373 So. 2d 874, 880 (Fla. 1978) ("Punishment in the form of restitution is not a novel concept . . . ."). Indeed, the Supreme Court itself has noted that "[s]entencing courts are required to impose restitution as part of the sentence for specified crimes." *Manrique v. United States*, 137 S. Ct. 1266, 1270 (2017). Certain legislative enactments also support including restitution within the meaning of "all terms of sentence." *See, e.g.*, § 812.15(7), Fla. Stat. (2019) ("The court shall, in addition to any other sentence authorized by law, sentence a person convicted of violating this section to make restitution as authorized by law."); § 921.0026(2)(e),

AMERICAN OVERSIGHT

Fla. Stat. (2019) (authorizing downward departure sentences if "[t]he need for payment of restitution to the victim outweighs the need for a prison sentence").

An analysis of fines looks remarkably similar. Indeed, this Court has referred to fines as part of a "sentence." *E.g.*, *Morganti v. State*, 573 So. 2d 820, 821 (Fla. 1991) ("A lawful sentence may comprise several penalties, such as incarceration, probation, and a fine."); *see id.* ("[A] sentence of five and one-half years' incarceration, eighteen months' probation, and a $10,000 fine is clearly not a more severe sentence than fifteen years' incarceration."). So, too, has the Supreme Court. *See S. Union Co. v. United States*, 567 U.S. 343, 349-50 (2012) (observing that criminal fines "undeniably" fall within the purview of a "sentence"). And, again, certain legislative enactments support including fines within the ordinary meaning of "all terms of sentence." *See, e.g.*, § 775.083(1), Fla. Stat. (2019) ("A person who has been convicted of an offense other than a capital felony may be sentenced to pay a fine in addition to any punishment described in s. 775.082 . . . .").

Lastly, although fees and costs can reasonably be said to differ in many respects from restitution and fines, various court pronouncements and statutory provisions similarly support including them within the scope of Amendment 4's phrase "all terms of sentence." *See, e.g.*, *Osterhoudt v. State*, 214 So. 3d 550, 551 (Fla. 2017) ("[T]rial courts must individually pronounce discretionary fees, costs,

AMERICAN OVERSIGHT

and fines during a sentencing hearing to comply with due process requirements."); *Rollman v. State*, 887 So. 2d 1233, 1234 (Fla. 2004) ("[T]he same sentencing judge pronounced Rollman's sentence, which imposed ten years in prison, ten years of probation, and the payment of restitution and court costs."); *Bassett v. State*, 23 So. 3d 236, 236 (Fla. 2d DCA 2009) ("Bassett was sentenced to five years' prison to be followed by five years' probation. As part of his sentence he was ordered to pay certain costs and fees."); § 27.52(1)(b)1., Fla. Stat. (2019) (authorizing the court to "[a]ssess the application fee [for the appointment of a public defender] as part of the sentence"); § 435.07(1)(b), Fla. Stat. (2019) (referring to "any fee, fine, fund, lien, civil judgment, application, costs of prosecution, trust, or restitution" ordered by the court "as part of the judgment and sentence"); § 633.107(1), Fla. Stat. (2019) (similar).

This Court's decision in *Jackson v. State*, 983 So. 2d 562 (Fla. 2008), is instructive. *Jackson* among other things clarified the definition of a "sentencing error" for purposes of Florida Rule of Criminal Procedure 3.800(b). After noting that the commentary to rule 3.800 technically distinguished "orders of probation, orders of community control, [and] cost and restitution orders" from "the sentence itself," 983 So. 2d at 572 (quoting Fla. R. Crim. P. 3.800 court cmt.), *Jackson* construed "*a defendant's sentence*" to encompass the various "*orders* entered as a result of the sentencing process"—i.e., those "related to the ultimate sanctions

AMERICAN OVERSIGHT

imposed, whether involving incarceration, conditions of probation, or costs," *id.* at 572-73; *see also Kirby*, 863 So. 2d at 244 (referring to "the trial court's statutory obligation to impose restitution as part of the criminal sanction").

Amendment 4's use of the broad phrase "all terms of sentence" can only reasonably be understood to similarly encompass "the ultimate sanctions imposed," including "costs." *Jackson*, 983 So. 2d at 573. Or in the words of the Sponsor's counsel, the phrase encompasses "all obligations" or "all matters."

CONCLUSION

We answer Governor DeSantis's question by stating that it is our opinion that the phrase "all terms of sentence," as used in article VI, section 4, has an ordinary meaning that the voters would have understood to refer not only to durational periods but also to all LFOs imposed in conjunction with an adjudication of guilt. We express no opinion on any question other than the narrow one presented to us.

It is so ordered.

CANADY, C.J., and POLSTON, LAWSON, and MUÑIZ, JJ., concur.
LABARGA, J., concurs in result and dissents in part with an opinion.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-005927

LABARGA, J., concurring in result and dissenting in part.

I concur with the majority's ultimate decision that the phrase "all terms of sentence," as used in article VI, section 4 (Amendment 4), encompasses all "legal financial obligations" (LFOs) imposed by the sentencing judge. I do not concur, however, with the majority's conclusion that the phrase "all terms of sentence," as used in Amendment 4, "has an ordinary meaning that the voters would have understood" to include LFOs. Nor do I concur with the majority's strict adherence to the application of the theory referred to as the "supremacy-of-text principle" to the exclusion of available extrinsic evidence that would assist the Court in elucidating the meaning of the text in question.

According to the majority, it adheres to the "supremacy-of-text principle": "The words of a governing text are of paramount concern, and what they convey in this context, is what the text means." Majority op. at 14 (quoting Antonin Scalia & Bryan A. Garner, *Reading Law: The Interpretation of Legal Texts* 56 (2012)). Context is the operative word of this theory. As explained by Justice Scalia in his dissent in *King v. Burwell*, 135 S. Ct. 2480, 2497 (2015), "[S]ound interpretation requires paying attention to the whole law, not homing in on isolated words or even isolated sections. Context always matters." As noted by the majority, the discussion of this approach to interpretation of constitutional texts, later coined "textualism," dates back to as early as the 1800s when Justice Joseph Story, who

AMERICAN OVERSIGHT

served on the United States Supreme Court from 1812 to 1845, emphasized that in interpreting the Constitution, every word must be afforded its "plain, obvious, and common sense" meaning, "unless the text furnishes some ground to control, qualify, or enlarge it." Majority op. at 14. Since that time, textualism has been advocated by justices such as Hugo Black and, in recent history, Antonin Scalia, an ardent supporter of the theory. To be sure, it is a sound theory of interpretation which, in most instances, proves to be determinative. My concern is with its strict disapproval of consideration of extrinsic sources which, in some instances, such as in this case, prove to be not only helpful, but dispositive.

The problem usually arises when the constitutional language in question is uncertain. In such situations, the majority suggests referring to dictionary definitions because "in general, a dictionary may provide the popular and common-sense meaning of terms presented to the voters." Majority op. at 15 (quoting *In re Advisory Op. to Atty. Gen.*, 132 So. 3d 786, 800 (Fla. 2014)). As more fully discussed below, in many instances it is not that simple.

Indeed, this Court has considered other avenues to construe a constitutional provision when the text is unclear or ambiguous. One such avenue is to seek to ascertain the intent of the framers and voters, an approach which, as discussed later, proved to be not only helpful, but determinative in this case.

AMERICAN OVERSIGHT

This Court has long observed that "[t]he fundamental object to be sought in construing a constitutional provision is to ascertain the intent of the framers and the provision must be construed or interpreted in such manner as to fulfill the intent of the people, never to defeat it. Such a provision must never be construed in such manner as to make it possible for the will of the people to be frustrated or denied." *Gray v. Bryant*, 125 So. 2d 846, 852 (Fla. 1960); *see also In re Senate Joint Resolution of Legislative Apportionment 1176,* 83 So. 3d 597, 599 (Fla. 2012) ("When interpreting constitutional provisions, this Court endeavors to ascertain the will of the people in passing the amendment."); *Zingale v. Powell*, 885 So. 2d 277, 282 (Fla. 2004) ("[T]his Court endeavors to construe a constitutional provision consistent with the intent of the framers and the voters." (quoting *Carib. Conserv. Corp. v. Fla. Fish & Wildlife Conserv. Comm'n*, 838 So. 2d 492, 501 (Fla. 2003))); *Williams v. Smith*, 360 So. 2d 417, 419 (Fla. 1978) ("[I]n construing the Constitution, we first seek to ascertain the intent of the framers and voters, and to interpret the provision before us in the way that will best fulfill that intent.").

In taking issue with this consistently applied approach, the majority contends "that such [extraneous considerations] can be misleading because they may be misunderstood to shift the focus of interpretation from the text and its context to such extraneous considerations. And such extraneous considerations can result in the judicial imposition of meaning that the text cannot bear, either through

AMERICAN OVERSIGHT

expansion or contraction of the meaning carried by the text." Majority op. at 14. Thus, according to the majority's approach, clear and unambiguous extrinsic evidence of the true intent of the framers and voters, such as the evidence available in this case, must be disregarded. I respectfully disagree.

Textualist abhorrence of consideration of the intent of the framers of a constitutional or statutory provision has been persistently and stubbornly present throughout the theory's history. Justice Oliver Wendell Holmes, for instance, was quite explicit on the question of intent: "[W]e ask, not what this man meant, but what those words would mean in the mouth of a normal speaker of English, using them in the circumstances in which they were used . . . . We do not inquire what the legislature meant; we ask only what the statute means." Oliver Wendell Holmes, *The Theory of Legal Interpretation*, 12 Harv. L. Rev. 417-19 (1899).

I agree with the majority that the lodestar of constitutional and statutory interpretation should be, in the first instance, the application of the words of the governing text read in context. However, the analysis should provide some allowance for consideration of the intent of the framers and voters in instances where it will assist in elucidating the meaning of the text in question.

The majority opinion in this case extensively refers to reliable and unambiguous extrinsic evidence that is dispositive of any question concerning whether the phrase "all terms of sentence" encompasses all LFOs imposed by the

AMERICAN OVERSIGHT

sentencing judge. Nevertheless, in strict adherence to the "supremacy-of-text principle," the majority has chosen to disregard this revealing and helpful extrinsic evidence and rely strictly on its interpretation of the meaning of "all terms of sentence."

The majority opened its opinion with Governor DeSantis's letter of August 9, 2019, requesting this advisory opinion. The letter, includes, inter alia, the responses by counsel for the sponsor of Amendment 4, Floridians for a Fair Democracy, to questions posed by Justices Polston and Lawson during oral argument in 2017. Arguably, these exchanges provide the most helpful revelations concerning what "completion of all terms of sentence" encompassed. Justice Polston pointedly asked whether "completion of [all] terms" included "full payment of any fines," and counsel for the sponsor responded: "Yes, sir . . . all terms mean all terms within the four corners." Majority op. at 2. Justice Lawson similarly asked, "You said that terms of sentence includes fines and costs . . . that's the way it's generally pronounced in criminal court, would it also include restitution when it is ordered to the victim as part of a sentence?" Counsel answered, "Yes." Majority op. at 2.

The majority opinion also includes revelations made in the sponsor's brief, which clearly express the sponsor's intention that payment of all LFOs would be required. The sponsor's brief asserted: "Specifically, the drafters intend that

AMERICAN OVERSIGHT

individuals with felony convictions, excluding those convicted of murder or a felony sexual offense, will automatically regain their right to vote upon fulfillment of all obligations imposed under their criminal sentence." Majority op. at 10. The majority summed up the sponsor's position with the following statement: "In other words, the Sponsor *intended* that 'all terms' refer to obligations, not durational periods. No briefs were submitted in opposition to Amendment 4." Majority op. at 11 (emphasis added).

As a follow-up, the majority included a similar statement, made during oral argument, that the operative language in Amendment 4 "means all matters—anything that a judge puts into a sentence." Majority op. at 11. The majority added:

> As noted in the Governor's letter, that oral argument involved discussion of LFOs—including fines, costs, and restitution—as well as the process for confirming payment of LFOs. *Counsel for the Sponsor summed up by reiterating that Amendment 4 was intended to be "a restoration of voting rights under these specific conditions." It is beyond dispute that the Sponsor expressed the intention that "all terms of sentence" include all LFOs ordered by the sentencing judge*.

Majority op. at 11 (emphasis added).

In further consideration of the sponsor's intent, the majority opinion included an advertisement from the sponsor's paid political website which included the following assurances to prospective voters in bold-italicized text: "Amendment 4 restores the eligibility to vote to people with past felony

AMERICAN OVERSIGHT

convictions who fully complete their entire sentence – including any probation, parole, and restitution – before earning back the eligibility to vote." Majority op. at 11.

Finally, the majority included in its opinion the American Civil Liberties Union Foundation of Florida's 2018 voter guide which informed voters that Amendment 4 "includ[ed] any probation, parole, fines, or restitution." Majority op. at 12.

The majority wraps up its discussion of these "extraneous considerations" with the following revealing statement: "The Sponsor's expressed intent and campaign statements *simply are consistent with that ordinary meaning that would have been understood by voters*." Majority op. at 13 (emphasis added).

This evidence clearly resolves any question regarding the meaning of the phrase "all terms of sentence" and should not be excluded from consideration. Surely, if the text in this case had said, "all terms of sentence, *including payment in full of all financial obligations imposed by the court,*" or conversely, "*upon completion of all terms of incarceration of the sentence*," consideration of extrinsic sources, including dictionaries, would not have been necessary. Unfortunately, for whatever reason, it did not.

Moreover, textualism, for all its usefulness, is less reliable when the text in question, such as the four-word text in this case, is not sufficiently developed to

AMERICAN OVERSIGHT

allow its full meaning to be discernable. In such instances, consideration of unambiguous extrinsic evidence is essential to determine the meaning of the text in question. Unfortunately, given the majority's decision today setting forth the so-called "supremacy-of-text principle" as the law of constitutional and statutory interpretation in Florida, such valuable extrinsic evidence will no longer be afforded its due consideration. While I agree that the initial step in resolving questions of constitutional and statutory interpretation should be to carefully examine the words of the governing text in context, I disagree with the summary exclusion from consideration of extrinsic credible information that would assist in determining the meaning of the text—including the intent of the framers and voters as we have consistently done in the past.

Indeed, without the existence and consideration of the extrinsic evidence concerning the intention of the sponsor and others involved in the process of proposing Amendment 4, based on this record, I could not concur with the majority based solely on the theory that "the only objective evidence for the intent of a text is what the text says understood in context"—not in this case.

Accordingly, I concur with the majority's ultimate decision that the phrase "all terms of sentence" encompasses all "legal financial obligations." I am able to do so only because the extrinsic evidence presented concerning the sponsor's intent assisted me. I dissent to the majority's position that the phrase "all terms of

AMERICAN OVERSIGHT

sentence" is unambiguous and that the voters would "most likely understand" it to include all LFOs—without more. I also dissent to the majority's unbending application of the "supremacy-of-text principle" to Florida law, to the exclusion of available extrinsic evidence that would assist the Court in construing constitutional and statutory provisions.

Subject: Scientific Evidence Omitted from Bear Management Plan
Attachment(s): "BB_Hab_Mgmt_Guide.pdf","Habitat Modifications_BWU.pdf","Chief Inspector General Letter_2nd Update.pdf"

Dear Senators,

Please see attached letter to Chief Inspector General and supporting documents. Attached is a copy of the Black Bear Habitat Management Guidelines for Florida, a document published by the Florida Fish and Wildlife Conservation Commission in 2001. At the very least, I would urge you to become familiar with the highlighted sections within the first few pages. This document was published before accelerating longleaf pine projects were considered. The information within this document corroborates well with the articles written for Bear Warriors United, also attached.

Please tune in to The Florida Channel on the morning of December 11, 2019 to hear testimony from Karl Ambrose, Founder, Independent Black Bear Group.

Agenda for FWC Commissioner Meeting, Wednesday, December 11th:

https://myfwc.com/about/commission/commission-meetings/december-2019/ :

Staff Report – Bear Management Plan
Staff is seeking approval of the draft update of the Bear Management Plan. The draft plan includes results from new research, updates on management activities, a new section on population management options, as well as other changes. The presentation to the Commission will provide an overview of the draft update as well as feedback received from stakeholder groups and the public.

Thank you for your attention in this matter.

Sincerely,

Alexis Foxx
Independent Black Bear Group

Abstract

The fragmented and patchy arrangement of black bear (*Ursus americanus floridanus*) populations throughout Florida is a daunting management challenge in this developed state. Successful management prescriptions must consider highly variable food habits as well as the effects of fire, timber management, and expanding development on this Threatened species. Saw palmetto (*Serenoa repens*) appears to be the single-most important food that is also common in all of the species' subpopulations. Fire may be the most important abiotic influence on bear nutrition, reproduction, and mortality. Winter burns have the potential to alter the fruiting phenology of important food plants and can cause direct mortality on neonatal cubs. Highways are problematic because they isolate bear populations, create travel barriers, and cause direct mortality. Opportunities for secure den sites and escape cover are likely more numerous in large patches of older forests. The limited use of hollow trees as den sites in Florida is likely linked to the relatively young age of most of Florida's forests. Generally, most widely used forest management practices (i.e., prescribed fire, herbicides, clear-cutting) are compatible with bear habitat management, especially if conducted in the context of large forests. Population viability analyses indicate that small populations such as those found in Highlands County and in the Greater Chassahowitzka Ecosystem are likely doomed to extinction without management intervention that promotes or restores landscape connectivity with other, larger populations. A metapopulation approach is recommended because the protection and reconnection of isolated population fragments will enhance the survival probabilities of the smallest populations as well as those of the entire population. The black bear would make an excellent flagship species for a statewide approach to ecosystem and landscape restoration.

AMERICAN OVERSIGHT

INTRODUCTION

The relation between the Florida black bear (*Ursus americanus floridanus*) and saw palmetto (*Serenoa repens*) epitomizes the complexities and challenges in developing habitat management guidelines for the Southeast's largest land mammal. Both species were once widespread throughout Florida, but now exhibit patchy distributions throughout the state. Both species provide keystone processes for the ecosystems in which they reside: the black bear as a seed disperser (Maehr 1984*a*, 1997*a*) and saw palmetto as preferred food and cover for hundreds of animal species (Maehr and Layne 1996*a,b*). The black bear lives at low density, but has extensive movement capabilities. Saw palmetto frequently grows profusely in dense thickets, but its heavy-seeded fruits require the transportation services of a large vertebrate to facilitate dispersal (Maehr and Layne 1996*a,b*, Abrahamson 1999). The fruit and heart of saw palmetto are depended upon by bears like few other plant species in Florida (Maehr and Brady 1982*a*, 1984*a,b*; Maehr and DeFazio 1985) (Table 1), and impenetrable thickets of saw palmetto provide bears with the most frequently used den cover in the state. Both species are affected by, and dependent upon, fire for the maintenance of environmental conditions that promote proper nutrition and reproduction (Maehr and Brady 1982*a*, Tanner et al. 1996, Abrahamson 1999). Today, both species face the threat of unmitigated harvest of saw palmetto fruit for the production of pharmaceutical products to treat human prostate hypertrophy (Maehr and Layne 1996*a,b*, Abrahamson 1999)—and Florida's human population continues to grow by about 700 each day (Royse 1997). Although the black bear can use a wide variety of plant communities and is still found in 50 of Florida's 67 counties (Brady and Maehr 1985), it is no exaggeration to suggest that the future of both the bear and this key element of its habitat are intertwined.

After more than two decades of research by state and federal agencies and universities, it is likely that most of the environmental conditions preferred, tolerated, or avoided by the Florida black bear have been described. With a distribution that ranged from the central Keys to the Okefenokee Swamp, and from the Perdido River to Daytona Beach, the black bear was one of Florida's most cosmopolitan animals. It could be argued that it would be easier to describe those habitats bears avoid than to characterize those habitats bears use. Today, the species in Florida is an obligate forest animal (Maehr and Wooding 1992, Maehr 1997*a*), and the state's largest populations are associated with large tracts of forest centered on public land. The purpose of this report is to synthesize the literature relevant to black bear habitat use in Florida, to synthesize literature relevant to the ecology and management of biotic communities used by bears in the southeastern coastal plain, and to offer guidelines that can serve as a practical handbook for the management of Florida black bear habitat.

Myers and Ewel, in their classic 1990 text, *Ecosystems of Florida,* recognized 13 major ecosystem categories in the state. Among these, the black bear was listed as a resident species in five: flatwoods and dry prairies (Abrahamson and Hartnett 1990), scrub and high pine (Myers 1990), south Florida rockland (Snyder et al. 1990), swamps (Ewel 1990), and mangroves (Odum and McIvor 1990). Another five ecosystems were implicated as black bear habitat by virtue of overlapping distribution (Maehr 1984*b*): temperate hardwood forests (Platt and Schwartz 1990), freshwater marshes (Kushlan 1990), dunes and maritime forests (Johnson and Barbour 1990), salt marshes (Montague and Wiegert 1990), and inshore marine habitats (Livingston 1990). Only lakes (Brenner et al. 1990), rivers and springs

Table 1. Dominant foods, by frequency of occurrence, in diets of the Florida black bear. Food items are listed in descending order of importance within each study area (across rows).

Location	Reference	Food 1	Food 2	Food 3
Osceola National Forest	Maehr and Brady 1982*a*	Saw palmetto	Swamp tupelo	Yellow jacket

Eglin Air Force Base	Stratman 1998	Acorns	Saw palmetto	Beetles

AMERICAN OVERSIGHT

(Nordlie 1990), and coral reefs (Jaap and Hallock 1990) appear insufficient, in and of themselves, to support the species. Nonetheless, landscape features such as rivers, springs, and lakes may be important components of habitats occupied by the black bear in Florida. Even coastal regions were noted for their attractiveness to bears by several early naturalists (Chapman 1894, Bangs 1898, Bartram 1766), but this may have been as much a function of bear distribution as it was a human preference for more scenic and less insect-infested regions of the state.

In pre-Columbian North America, the black bear was one of the most abundant large mammals in the forests of the east (Bakeless 1961). This was true also for Florida—the black bear was commonly observed by early explorers and naturalists throughout the territory. Indeed, observations of the species from as far south as Matecumbe Key in Monroe County (De Pourtales 1877), the origin of the subspecific type specimen emanating from Key Biscayne (Merriam 1896), the consumption of crocodile (*Crocodylus actus*) eggs by bears in the Everglades (Moore 1953), and unpublished accounts of black bears excavating sea turtle (Family Chelonidae) nests near Daytona Beach (C. Chappell, Florida Fish and Wildlife Conservation Commission [FWC] personal communication), point to a cosmopolitan distribution that transcends the simple availability of forest. The black bear was common throughout Florida until the late nineteenth century, when it became restricted to large isolated tracts (Maynard 1883, Hamilton 1941, Davis 1943). As late as 1959 (Hall and Kelson 1959), nonetheless, all of peninsular Florida was still recognized as the range of the subspecies. Early- to mid-twentieth century population centers were Royal Palm State Park in the Everglades (Safford 1919), Okefenokee Swamp (Harper 1927), east coast scrublands (Howell 1929), Lee County (Hamilton 1941), Highlands County (Rand and Host 1942), Welaka (Moore 1946, 1949), Gulf Hammock (Pearson 1954), Volusia County (Harlow 1959), Palm Valley (Ivey 1959), Paisley (Harlow 1962*a*), Ormond Beach and Panama City (Smith 1971), and Collier County (Layne 1974). The black bear was still considered a part, albeit rare, of the fauna of the west-central Florida phosphate lands, where a remnant population occurred in Sarasota and Manatee counties (Layne et al. 1977). While all current estimates of its modern Florida distribution emphasize the strong relation between bears and forest cover (Maehr 1984*b*, Brady and Maehr 1985, Maehr and Wooding 1992, Wooding et al. 1994), the presettlement landscape in the state likely supported the species in every available terrestrial and shallow wetland habitat. Today, the species is still found in 50 of Florida's 67 counties (Brady and Maehr 1985).

Despite the widespread occurrence of the black bear in Florida, most estimates of even the largest populations were small to modest (Rand and Host 1942; Cahalane 1948; U.S. Department of Interior 1969, 1979; Schemnitz 1972, 1974). The totaling of such estimates yielded statewide populations of some several hundred animals (Frye et al. 1950, Harlow 1962*a*, Smith 1971, Pelton and Nichols 1972, East 1977). This is in contrast to modern population estimates that have been based on radio-telemetry studies throughout the state, and which have been used by the U.S. Fish and Wildlife Service to deny petitions to federally list the Florida black bear as Threatened (U.S. Fish and Wildlife Service 1998*b*). In its review of the petition, the U.S. Fish and Wildlife Service (1998*b*) recognized 9 separate populations of the Florida subspecies, including populations in Alabama ($N = 50$), Apalachicola National Forest and vicinity ($N > 400$), Big Cypress Swamp ($N = 390$), Chassahowitzka ($N < 20$), Eglin Air Force Base ($N = 60$–100), Highlands County ($N = 85$), Ocala National Forest ($N =$ "several hundred"), and Osceola National Forest/Okefenokee Swamp ($N = 1{,}200$), as well as the St. Johns population for which no estimate was given. In addition, these findings suggested that Green Swamp in Polk County had the potential to support 24–48 bears, but currently does not support a population. The wide distribution of populations that vary according to ecological regions and in size by an order of magnitude presents a unique management challenge. Some populations, such as Chassahowitzka and Highlands County, have been portrayed as declining (Cox et al. 1994, U.S. Fish and Wildlife Service 1998*a*), whereas others, such as Osceola/Okefenokee and south Florida (including Big Cypress Swamp), have relatively large populations that may be increasing. Layne (1974) recognized Big Cypress Swamp as the population center of the south Florida population more than 2 decades ago. Maehr's (1997*a*) estimate of over 1,000 for the south Florida bear population includes Collier County, where complaints of nuisance bears increased steadily during the last decade of the twentieth century (J. Schortemeyer, FWC, personal communication). Clearly, no single set of management guidelines is appropriate for all populations in Florida. On the other hand, before European settlement, Florida's black bears interacted as a single population unit without any known demographic barriers. This perspective may have important ramifications for future bear habitat management in Florida as both habitat fragmenting and landscape restoration efforts continue in this development state.

AMERICAN OVERSIGHT

Habitat Use

"The concept of habitat—fundamental to the study of ecology and management of wild populations—is centuries old.... Broadly defined, habitat is the place an organism lives or where you can find it..." (Schoen 1990, 143). This clearly led to the observation by the outspoken West Virginia black bear biologist and philosopher, Joe Rieffenberger, that black bear habitat is, simply, "where you find them" (paraphrase from many black bear workshops). Schoen (1990, 146) went on to observe that,

> ...many species of bears have relatively broad habitat requirements. A recurrent theme of many papers covering a variety of bear species and geographical regions is that mortality increases, and populations decline as forest clearing and roads penetrate bear habitat. However, bears can generally accommodate substantial human activity and some habitat alteration if humans can tolerate their presence without killing them.... Because human tolerance for bears is generally low, inaccessible, forested habitat appears to be a prerequisite for their continued existence near or adjacent to human populations....

Habitat management for the black bear is further complicated because they are most appropriately considered as landscape species, which means their habitat is not a specific vegetation type but rather an interspersion of various vegetation associations that occur across and within regions (Rogers and Allen 1987, Harris and Kangas 1988, Schoen 1990). Hillman and Yow (1986, 126) suggested that U.S. Forest Service managers should focus on 6 habitat elements: "freedom from constant human access, diversity, hard mast, soft mast and forage, dens, and key areas." They suggested that black bears should be relatively easy to incorporate into forest management plans because the species has such generalized habitat requirements and adapts well to variable habitat conditions.

More has likely been written about black bear use of available habitat than any other aspect of its ecology, and few agree on the most important aspects of this variable and how to quantify it (McLaughlin and Maehr 1986). Despite this, the information tells us relatively little about black bear habitat requirements. For example,

> The best bear range in Florida is a mixture of flatwoods, swamps, scrub-oak, ridges, bayheads and hammock habitats thoroughly interspersed. These types of vegetation possess the most varied food conditions in greatest abundance (McDaniel 1974, 157).

One needs only to glance at the rich literature on bear diets to see that the family Ursidae exhibits extreme variation among and within taxa (Eisenberg 1981). The black bear exemplifies the generalist ursid in terms of diet, which is a reflection of its very broad tolerance for a variety of plant communities. As observed earlier, it may be a simpler matter to develop a list of foods bears do not eat (i.e., citrus) versus a comprehensive list of foods they do eat. What one derives from a close examination of the literature is not a list of habitats the black bear prefers, but a suggestion of the amount of forest cover necessary to support a population (Hellgren and Maehr 1992). For example, preserves of less than 10,000 ha may be insufficient to support black bear populations unless they are adjacent to larger tracts of occupied habitat (Maehr and Hellgren 1992). This issue will be developed further in the discussion of landscape issues and the Florida black bear.

Are any habitat use patterns of particular importance to managers? Certainly the issue of outright loss may override any other habitat issue, particularly when one considers the fact that Florida has more imperiled species and ecosystems than any other southeastern state (Ricketts et al. 1999). Florida is also highly ranked in national and continental analyses of environmental impacts and setting conservation priorities (Noss and Peters 1995). Jonkel and Cowan (1971) may have been the first to suggest that microhabitat variables are less important than regional landscape characteristics in their study of the black bear in the spruce-fir forest, an ecosystem that dominates the north-central Rocky Mountains Terrestrial Ecoregion (Ricketts et al. 1999) and includes parts of Montana, Idaho, Washington, Alberta, and British Columbia. This is clearly a very large region. Many studies have concluded that black bear habitat preferences are simply a function of food availability (Hatler 1967, Beeman 1975, Amstrup and Beecham 1976, Garshelis 1978, Fuller and Keith 1980, Carlock et al. 1983, Kendall 1983, Irwin and Hammond 1985, Grenfell and Brody 1986, Pelchat and Ruff 1986, Young and Beecham 1986, Elowe 1987, Rogers 1987*a*, Hellgren and Vaughan 1988,

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-005949

Mykytka and Pelton 1990, Noyce and Coy 1990, Raine and Kansas 1990, Smith and Pelton 1990, Schwartz and Franzmann 1991, Samson and Huot 1998), that the species can exhibit extensive spatial overlap and sharing of resources (Horner and Powell 1990), and that management should focus on maintaining a diverse array of available plant communities (Smith and Pelton 1990), especially because oaks (*Quercus* spp.) (often considered a key food source [Rogers 1976]) are frequently not reliable acorn producers (Beck 1977; Arimond 1979; Grenfell and Brody 1983, 1986; Smith and Pelton 1990; Reagan 1991). Samson and Huot (1998) found that female black bears drawn out of a park due to a paucity of soft mast–producing habitat were more vulnerable to human-related mortality. Although small sanctuaries may provide nutritional and survival benefits to local black bear populations (Beringer et al. 1998), preserves that are intended to support all of the habitat needs of wide-ranging species must consider the complex of seasonal habitats that are utilized in concordance with fruiting phenology. Such dynamics also occur in Florida. For example, black bears routinely abandoned core habitat areas and occasionally moved more than 20 km to access distant saw palmetto fruit (Maehr 1996). These movements often involved traveling through private land and crossing highways.

AMERICAN OVERSIGHT

Food Habits

Martin et al. (1951, 1) observed that,

> As the wilderness gave way to farms and factories, deer, bear, wild turkey, and chickadees have had to adapt themselves to altered conditions. And the remarkable thing is that most wildlife species could and did adjust. The secret of success in this shift from primitive to artificial...conditions is largely in the food habits of wildlife.

More is likely known about the diet of the Florida black bear than any other aspect of its natural history. Although latitude may be a more powerful predictor of regional den entrance patterns, diet has been implicated as a proximate determinant of den entry date (Schooley et al. 1994) and as the primary factor determining reproductive success in the black bear (Rogers 1976). Mast failures can result in reduced litter size, interrupted reproductive cycles, and low cub survival (Rogers 1976, Eiler 1981, Beck 1991), and have been implicated in litter abandonment and wide-ranging movements of prematurely independent cubs and yearlings (Fair 1977).

Food habits studies have been conducted in every major population in the state as well as in adjoining states. The most detailed analyses were conducted in south Florida (Maehr 1997*a*), where 739 scats revealed the typical pattern of a plant- and insect-dominated diet. In this subtropical environment the two most common palms, saw palmetto and sabal palm (*Sabal palmetto*), dominated all other foods consumed. Both saw palmetto and sabal palm provided fat-rich seeds during fall and starchy apical meristems throughout the year. No single insect predominated the invertebrate portion of the diet; however, a variety of wasps and ants accounted for about 20% of the frequency of foods in every season. In the other extreme of the state, Stratman (1998) and Stratman and Pelton (1999) found that saw palmetto and insects, especially beetles, provided similar year-round nutrition on Eglin Air Force Base in the northwestern panhandle. Further, Stratman determined that saw palmetto fruit was preferred over acorns when both were available. In nearby Alabama, acorns were the dominant fall and winter foods, whereas corn and herbaceous plant parts were important during spring and summer (Dusi et al. 1987). Insects also appeared to be important year-round. In central Florida, Roof (1997) identified saw palmetto as prominent fruit and fiber components of bear diets in the central Florida Wekiva River basin bear population. Acorns were most frequently consumed during fall. In north-central Florida, Maehr and Brady (1982*a*) found that saw palmetto far outweighed all other food items (Table 1). Insects, especially beetles and wasps, were of secondary importance. In Apalachicola National Forest, saw palmetto was an element of the fall diet, but its importance was overshadowed by swamp tupelo (*Nyssa biflora*) and odorless bayberry (*Myrica inodora*) (Maehr and Brady 1984*a*). Gallberry (*Ilex glabra*) was an unimportant dietary element despite its abundance in both Apalachicola and Osceola national forests (Maehr and Brady 1984*a*). From statewide perspectives, fruit and fibers of saw palmetto and sabal palm far exceeded all other foods in terms of frequency of occurrence (Maehr and Brady 1984*b*, Maehr and DeFazio 1985). These general patterns were also recognized by Harlow (1961), Williams (1978), and Maehr and Wooding (1992). The only location in which saw palmetto was not a dominant food of the subspecies was outside of the species' range in southwestern Alabama (Dusi et al. 1987).

It is likely that the modern diet of the Florida black bear is nearly identical to that of its precolonial ancestors. However, several exotics, including nine-banded armadillo (*Dasypus novemcinctus*), wild hog (*Sus scrofa*), honey bee (*Apis mellifera*), and Brazilian pepper (*Schinus terebinthefolius*), account for nearly 10% of the black bear's diet today, and sea turtle eggs have become unavailable, due primarily to development of east coast forests (Maehr and DeFazio 1985). Other foods of marine origin such as eggs of American crocodile may still be consumed in extreme south Florida where mangrove forests provide important denning and foraging habitat for the black bear (Maehr 1997*a*).

As in all of the species' range in North America (Pelton 1982), diet quality varies seasonally in Florida. Although the spatial and temporal distributions of food have been examined in Florida, only Maehr (1997*a*) has examined the nutritional characteristics of preferred foods. The patterns found in south Florida are likely representative of the rest of the state. In spring, diet quality is lowest because foods are dominated by high-fiber vegetation. These foods, which include the apical meristem of palms, can, however, be rich in total protein. Summer diets are higher in crude fat with the emergence of soft

AMERICAN OVERSIGHT

mast such as wild grape (*Vitis* spp.), but protein content is generally low. Fall and winter foods dominated by acorns and fruits of sabal palm and saw palmetto are high in carbohydrates and crude fat, and are critical in supporting successful reproduction in winter (Rogers 1976). It is these foods, in addition to one of the longest growing seasons in occupied black bear range, that may also explain the fast growth-rates and large sizes of bears in Florida (Maehr 1996).

The black bear's diet is dissimilar to that of other native Florida carnivores; however, it exhibits a 42% dietary overlap with the naturalized coyote (*Canis latrans*) (Maehr 1997*a*). The coyote in Florida has been observed to use saw palmetto for both cover (Maehr et al. 1996) and food (Maehr, personal observation; Weeki Wachee State Preserve), and it has been implicated as a potential competitor with the black bear (Maehr 1997*a*). As coyote populations continue to expand in Florida, and as increasing pressure is placed upon saw palmetto fruit by this naturalized omnivore as well as by humans, black bear diets may become locally compromised. Saw palmetto fruit is increasingly used as an herbal remedy for prostatic hypertrophy (enlarged prostate) (Maehr and Layne 1996*a*, Tanner et al. 1996), and the primary source is naturally occurring populations (Abrahamson 1999).

The diet of the black bear in Florida is so variable that it might be easier to list species that it does not consume. One of the more remarkable items on this list, given its increasing presence in the southern portion of the Florida black bear's range and its proximity to abundant bear populations, is citrus. Among the hundreds of items documented in the diet of the species, oranges are not among them.

AMERICAN OVERSIGHT

Den Ecology

The black bear is the largest cavity nester in the southeastern United States (Maehr 1997*b*). Throughout its range, the species utilizes a variety of sites for day use and reproductive purposes. The activities involved in the construction of ground dens have been recognized as a zoogeomorphological force that affects soil turnover and local erosion (Butler 1995). While hollows in trees may be preferred winter den sites, the black bear's behavioral plasticity permits continued occupancy of relatively young forests when den trees are absent (Carlock et al. 1983). The quality of available den sites is a significant management consideration for some bear populations because, after human disturbance, ground dens are more readily abandoned than are more secure locations (Johnson and Pelton 1979, Pelton et al. 1980). Hamilton and Marchinton (1980) found that bears occupying ground dens in coastal North Carolina were easily aroused from hibernation and usually abandoned such sites. Accordingly, black bears, especially females, prefer cavities in trees to other den sites (Pelton et al. 1980, Wathen 1983, Smith 1986, Wathen et al. 1986). Thick understory cover appears to be a prerequisite for successful natal ground dens (Martorello 1998). In coastal North Carolina, natal ground dens were characterized by 74% shrub canopy coverage, 0.79 m^2-basal area, 74-cm shrub height; 18.2 stems per m^2, mean stem diameter of 0.64 cm, and an overall cover density of 72% (Martorello 1998). Because this landscape is similar to much of Florida in terms of climate, topography, and vegetation, these values may be useful targets for natal den microhabitat in Florida.

Apparently, because most North American forests are relatively young second- or third-growth stands, most black bears use ground dens and utilize a variety of protective cover as a substitute for the more substantial visual and thermal benefits of wood. In Idaho, Michigan, south-central Montana, parts of Tennessee, and Colorado most dens were excavations into hillsides or under tree roots or shrubs (Eubanks 1976, Beecham et al. 1983, Manville 1987, Mack 1990, Beck 1991). Most (89%) Ontario winter dens in second-growth deciduous and boreal forest were excavations—only 2 out of 113 were located in hollow trees (Kolenosky and Strathearn 1987). In Alaska, where black bears may remain in winter dens for more than 240 days, excavated and other ground locations predominated, but use of trees was not uncommon in the virgin timber of a coastal rain forest (Schwartz et al. 1987). Jonkel and Cowan (1971) and Lindzey and Meslow (1976) found that most bear dens in Montana and Washington were in hollow trees. All dens in central Arizona were ground excavations under boulders and protected by dense vegetation (LeCount 1980). In the southern Appalachians, chestnut oak (*Quercus prinus*) was the most frequently used den species (Wathen et al. 1986). Interestingly, even an American chestnut (*Castanea dentata*) snag was used as a den site. The black bear in coastal North Carolina is predominantly a ground nester in forests that were previously heavily logged (Hellgren and Vaughan 1989, Lombardo 1993, Martorello 1998). Taylor (1971) found dens ranging from 2 to 30 m above the ground in a variety of Louisiana wetland tree species. Although Taylor (1971) did not describe the study site in great detail, the diameters of den trees suggest old-growth conditions. Beecham and Rohlman (1994, 211) observed that where soil conditions are not conducive for digging ground dens, "they may depend more on old-growth timber stands for denning sites." Thus, where black bears inhabit seasonally flooded forests such as are found in Louisiana and Florida, the lack of old-growth characteristics may limit bear populations. At the very least, allowing the return of some old-growth characteristics such as large, hollow trees may facilitate population survival and production (Hellgren 1988, Martorello 1998).

All female dens in Ocala National Forest and Apalachicola National Forest were ground nests in dense vegetation (Hardisky and Wooding 1988; Seibert 1993, 1995). In south Florida, nearly all natal dens and winter male dens were located on or near the ground (Maehr 1997*a*). The only exception was the den of a female that utilized the same 2-m-tall cypress stump for 2 consecutive litters. Although south Florida may support the state's largest bear population, it inhabits an area that was heavily logged as little as 50 years ago. With the exception of a few isolated remnants of old-growth, such as Corkscrew Swamp, the forests of the region (as in the rest of the state) are young second-growth that do not provide secure den locations. Remarkably, females have chosen dens in dense mangrove swamps where tidal fluctuations are sufficient to flood dens and cause abandonment of litters (Maehr 1997*a*). In addition, females in south Florida have denned within 1 km of inhabited human dwellings (Maehr 1997*a*).

Secure, insulated dens such as those found in hollow trees may not be needed in Florida to

AMERICAN OVERSIGHT

ameliorate cold winter temperatures (Johnson et al. 1978, Hellgren and Vaughan 1989), but they may be important for sustained successful reproduction especially in small, isolated populations where human activities occur nearby or within bear-inhabited plant communities. Several studies have noted the propensity for black bears to abandon ground dens when approached by researchers (Poelker and Hartwell 1973, Hamilton and Marchinton 1980, Wathen 1983, Smith 1986, Hardisky and Wooding 1988, Mack 1990, Beecham and Rohlman 1994), a pattern most consistent in southern latitudes, where den occupants are more easily aroused. Den abandonment following disturbance by researchers appears less common in northern latitudes (e.g., Alt 1983). In south Florida, the only denning black bear that allowed approach to within an arm's reach was an adult female that used the hollow stump of a logged cypress tree in Fakahatchee Strand (Maehr, personal observation). In this case the bear lifted her head when researchers peered over the rim of the cavity, but she made no effort to escape. She was, however, too alert to permit handling of her two cubs. In most other instances, ground-nesting bears abandoned dens long before researchers could see them, even if cubs were present. While most females returned to their cubs after an encounter with researchers, some abandoned litters and, at the very least, the absence of the female from a helpless litter rendered cubs vulnerable to predation and thermal compromise. Thus, where ground locations predominate Florida winter dens, protection from physical disturbances near the den should be an important management consideration. Hellgren (1988) and Martorello (1998) both suggested that secure den sites are critical to maintaining productive bear populations, and that dense vegetation at the den is part of this requirement. Thus, in order to maximize bear populations on industrial timber lands or on national forests, silvicultural practices in bear habitat should strive to maintain dense, shrubby vegetation as den habitat, and should consider avoiding intense forest management during the winter denning season when cubs are vulnerable. In particular, burning of potential black bear den habitat should be avoided during winter. Powell et al. (1997, 72) summarized the necessary components of black bear den habitat as "...late successional forest with large trees and forest that protects bears from disturbance by humans, dogs or wild predators such as coyotes."

AMERICAN OVERSIGHT

The Florida Black Bear and Saw Palmetto

Saw palmetto is clearly the most universal component of the black bear's diet in Florida (Table 1), and it serves as important winter cover for both males and females (Maehr 1997*a*). This plant has already suffered tremendous range contractions as pine flatwoods and dry prairies have been converted to cattle pasture, and saw palmetto was specifically targeted for eradication (Hilmon 1969). In addition, the widespread practice of winter burning may have altered patterns of flowering and fruiting in this diminutive palm (see below). Despite this, saw palmetto is likely the most important biotic component of black bear habitat. One of the most daunting challenges facing managers will be balancing the increasing human demands for saw palmetto fruit with the continuing reliance of the black bear on this ubiquitous plant. Maehr and Layne (1996*b*, 10) asked,

> What impact does the annual disappearance of millions of pounds of a preferred food have on the wildlife species that depend on it? While this kind of harvest is prohibited on most public lands in Florida, private lands ranging in size from one-acre lots to 100,000-acre ranches support this growing industry. No studies have examined the effects of localized, annual palmetto famines on resident wildlife. However, potential impacts include forced shifts to other, perhaps less desirable foods; expansions in home ranges to accommodate alternate food searches; home range abandonments; and local population declines. Highly mobile species such as the black bear may suffer increased exposure to vehicular traffic and higher mortality as some individuals are forced to travel more widely in search of their favorite fall food. Together with loss of palmettos through development and conversion of wildlands to improved pasture, citrus groves, or other types of intensive agriculture, the human harvest of saw palmetto fruit poses an additional threat to the ability of Florida's natural areas to support a diverse fauna.
>
> For a plant as common and widespread as saw palmetto, it seems contradictory to suggest that it deserves special attention. But when one considers the myriad of processes and interrelationships in which it is at the center, saw palmetto emerges as a keystone species in many of Florida's biotic communities. The fact that hundreds of animals depend, in varying degrees, on this diminutive palm, should be reason enough to elevate saw palmetto to the status of live oak, cabbage palm, longleaf pine, and other plants recognized for both their beauty and their value to wildlife.

There is likely no other native mammal in Florida that depends on saw palmetto to the extent that the black bear does.

Saw palmetto, like scrub palmetto (*Sabal etonia*), is a fire-prone palm that can tolerate hot and frequent fires (Abrahamson 1999), as well as grazing by cattle that are compelled to consume its coarse leaves when provided food supplements containing urea-based nitrogen compounds (Tanner at al. 1996). Saw palmetto is found in a wide range of dry environments, but it can tolerate a variety of habitats with high water tables or those bordering wetlands (Brown et al. 1990). Saw palmetto grows slowly (Abrahamson 1995), and some individuals may exceed 500 years of age (Tanner et al. 1996). Saw palmetto has also been a perennial target of range-improvement programs that seek to eradicate it from native prairies and pine flatwoods (Tanner et al. 1988). Many studies of this species have occurred in longleaf pine (*Pinus palustris*)–sandhill communities, where saw palmetto is usually less common than in pine flatwoods and where other mast producing plants are equally scarce (Glitzenstein et al. 1995, Abrahamson and Abrahamson 1996, Gilliam and Platt 1999).

Abrahamson (1999) observed that saw palmetto flowered profusely after each of 3 fires conducted during an 8-year period. Although he equated flowering with reproduction, no measures of fruit production were made. Gholz et al. (1999) found that flowering occurred consistently from year to year, but that fruit production occurred irregularly. Hilmon's (1969) studies, which were conducted in pine habitats utilized by black bears, suggested that saw palmetto responds to burning with vegetative growth, but that fruit production did not resume immediately. He observed that,

> Fire stimulates frond growth during the winter when unburned palmettos are relatively dormant, and plants regain 80% of their

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-005955

> crown coverage the first year after burning. Burning reduces the incidence of flowering and fruiting. Flowering increases significantly after 5 years of fire protection and substantial fruit crops are produced after 6 to 9 years of fire protection (Hilmon 1969, iv).

Hilmon's botanical dissertation (the research was not conducted with wildlife in mind) is of tremendous importance for managers of black bear habitat. Florida land management programs in upland sites often call for frequent (~3-year-interval) burns as a means to reduce fuel loads and promote plant diversity. It is likely that current burning programs in Florida occur at a rate and during a time of year that artificially reduces fruit production in Florida's most important black bear food plant. Maximum fruit production is likely obtained in areas that approach or exceed a 10-year burn interval.

AMERICAN OVERSIGHT

Forest Management and the Florida Black Bear

Fire in Florida Black Bear Habitat

As Christensen (1985, 86) observed,

> ...fires play a significant role in the maintenance of community structure and function, and have been important selective forces in the evolution of plant form and life history.... Fires are patchy phenomena and contribute significantly to temporal and spatial heterogeneity....

The use of fire as a wildlife management tool has a long history in post-Columbian America and likely was used by aboriginal Americans long before recorded history (Komarek 1981). We are aware of few studies that specifically addressed fire as a black bear management tool; however, a number of studies allude to fire as an important habitat variable, and Hamilton (1981) provided the only overview of the effects of this abiotic process on the species. Robbins and Myers (1992) concluded that information is insufficient to determine the effects of burn season on black bear habitat in Florida. Hamilton's (1981) synopsis of the relation between black bear productivity and burning was in keeping with the period's prevailing view of fire as a management tool: short-rotation fires were a valuable influence that facilitated soft mast production, increased habitat heterogeneity, and generally improved conditions for black bears. On the other hand, Hamilton (1981, 132) advised that fire should be "restricted from other areas due to possible detrimental effects on bear den trees, escape cover and hardwood regeneration." Further, Langdon (1981, 145) observed that

> ...successive annual burns imposed when food reserves are low may lower plant vigor to the point that it finally succumbs. Season or frequency of burning may break the reproductive portion of the life cycle of plants and thereby eliminate a species from a given community.

At the very least, managers should be sensitive to the link between the historical pattern of summer fire and the flowering and fruiting phenology of important black bear foods plants such as saw palmetto. An artificial switch to winter burns set at short intervals may override the adaptations that some plants have developed in response to lightning-induced burning that may have occurred over longer intervals than are traditionally practiced in Florida forests.

Stratman (1998) found that fires set at 3- to 5-year intervals encouraged fruit production in huckleberry (*Gaylussacia* spp.), dwarf blueberry (*Vaccinium* spp.), sweet gallberry (*Ilex coriacea*), bitter gallberry (*I. glabra*), and greenbriar (*Smilax* spp.) at Eglin Air Force Base. More than 5 years appeared necessary for blueberry (*Vaccinium* spp.), sparkleberry (*V. arboreum*), blackgum (*Nyssa sylvatica*), persimmon (*Diospyros virginiana*), and other hard mast species to recover from fire. Although saw palmetto was preferred in this area, Stratman (1998) did not report an optimal recovery interval for this species. Nonetheless, it appears that optimal burning frequencies for black bear food production and other habitat characteristics may well exceed standard prescribed fire protocols.

Of Florida's 13,990,000 ha of land area, nearly half (6,700,000 ha) remains forested (Powell et al. 1993). Fire is a naturally occurring force in every forested terrestrial plant community in the state. Maehr and Brady (1982*a*, 569) suggested that, "The effects of burning on black bear foods and food preferences should be investigated further to outline procedures for restoring bear habitats, especially pine flatwoods, to their apparent, historic productivity." The black bear in Florida clearly is a forest obligate, as has been found elsewhere in the southeastern United States (Wooding et al. 1994, Nyland and Pace 1997), but it does not utilize all forests with the same predilection. This pattern is best exemplified by the species' avoidance of sandhill habitats (Wooding and Hardisky 1988), where natural fire most likely occurred with greater frequency than in any other plant community in Florida. Such short intervals between fires likely reduced mast-producing species, such as saw palmetto and oaks, and eliminated escape and denning cover.

Fire Frequency

The original sandhills which covered up to about 20% of the state (Davis 1967) were dominated by the keystone species longleaf pine which, along with wire grass (*Aristida stricta*), sandy well-drained soil, and summer lightning resulted in natural fires that occurred at 1- to 3-year intervals (Wells and Shunk 1931, Parrott 1967, Platt et al. 1988, Stout and Marion 1993). Such frequent fires resulted in the

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-005957

creation of parklike understories with scattered turkey oak (*Quercus laevis*)—conditions that apparently do not provide sufficient food or cover for black bears. It could be argued that loss of sandhill communities throughout Florida have had little impact on the black bear. However, widespread distribution of sandhills in the upper peninsula and panhandle suggest that such habitat provided connections between adjacent systems of scrub, swamp, and hammock forests. At the very least, sandhill communities may provide some measure of the forest conditions preferred by the black bear—open, savannalike pinelands are avoided as permanent habitat, whereas closed-canopy forests with dense understories are preferred.

Fire may be the most important factor in maintaining conditions attractive to the black bear in Florida. Timing and frequency of burns can affect structural characteristics of the understory, and, subsequently, black bear habitat. Langdon (1981) found that unburned southern pine forests had higher stem densities than forests that experienced a variety of burning regimes. Conversely, among a variety of treatments, including periodic winter and summer burns, the lowest stem densities were found in pine forests burned on an annual basis (winter or summer). In addition, more frequent fires result in increased mortality of hardwoods such as blackgum and oaks (*Quercus* spp.) (Langdon 1981)—important black bear food plants. Less-frequent summer fires encourage hardwood survival and facilitate vegetative growth of blueberry. Thus, natural fire season burns appear to be optimal for maintaining bear food plants in southern pine forests.

While the complete exclusion of fire in fire-adapted ecosystems may be as detrimental as burning too frequently, where prescribed fire occurs more than once every 6 to 9 years (as suggested by fruiting phenology in post-fire saw palmetto; see Hilmon 1969), habitat suitability for the black bear may decline. Traditional pine flatwoods management for cattle typically involves burning on a 2-year rotation (Wade et al. 1980). This same interval has been recommended for increasing productivity of the northern bobwhite (*Colinus virginianus*) (Moore 1972), an animal that prefers early successional habitats. While frequent fires generally help maintain herbaceous forage plants for species that require early successional habitats and help reduce fuel loads that can support catastrophic fires, such short fire-intervals are not typical in most Florida ecosystems. For example, fires may occur just a few times per century in cypress (*Taxodium distichum*) swamps (Ewel 1990), every 3 to 15 years in south Florida rocklands (Snyder et al. 1990), and less than once every 50 years in hammock forests (Duever et al. 1986). Florida scrub habitats experience a natural fire interval of 10 to 100 years (Myers 1990). Fires may even occasionally occur in mangrove forests as the result of an accumulation of woody debris transported by hurricanes, but these events are rare (Craighead 1971). Although the range in expected fire frequencies is tremendous in various black bear habitats, it is generally recognized that more-frequently burned pine flatwoods have sparse understories and fewer mast-producing species such as saw palmetto and oaks (Harper 1914, Heyward 1939, Edmisten 1963, Moore et al. 1982). In general, dry season fires in Florida have become more destructive to native plant communities where forests have been logged and where water tables have dropped (Hofstetter 1984).

Fire Season

> Florida plant and animal communities have evolved with summer lightning fires (Komarek 1964); thus it is reasonable to assume that out-of-season fires may be disrupting the life cycles of some native plants and animals and perhaps favoring some exotic species (Duever et al. 1986, 216–218).

Perhaps the most graphic example of the threat of out-of-season fires to the black bear is the direct mortality that can result from prescribed burns set during the winter denning period. Such a situation destroyed a litter of cubs in Florida Panther National Wildlife Refuge during the early 1990s (Land 1994). The fate of this litter was known because the denning female was radio-collared. Stratman (1998) also documented the abandonment of a den by an adult female following a prescribed fire on Eglin Air Force Base. It is unknown to what degree the common practice of winter burning has increased Florida black bear mortality throughout the state, especially for bears that den in highly flammable saw palmetto thickets. Pine flatwoods containing saw palmetto were the second most used cover type for denning black bears in south Florida (Maehr 1997*a*). Clewell (1971) and Maehr and Brady (1982*a*) have suggested that winter fires in north Florida pine flatwoods may increase the vegetative spread of saw palmetto while reducing the abundance of other mast producers.

> Apparently, the practice of winter burning encourages rapid regrowth of palmetto as well

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-005958

as gallberry (Hughes and Knox 1964, Hough 1965), resulting in a competitive advantage over other flatwoods mast producers such as runner oak (*Quercus pumila*) and blueberry (*Vaccinium* spp.) (A Stockle, pers. commun.). It is likely, due to the higher nutrition and probably greater palatability of these species, that runner oak acorns and blueberries made up most of the fall black bear diet before the advent of intensive timber management in north Florida. With decreased availability of acorns and blueberries in Baker and Columbia counties, bears may have, out of necessity, turned to saw palmetto as their major food source during fall (Maehr and Brady 1982*a*, 568).

This may not, however, be a completely accurate statement inasmuch as fires that may be responsible for these changes were winter prescribed burns. While recent nutritional analyses have suggested that saw palmetto is important from a nutritional standpoint (Maehr 1997*a*), and the dominance of palmetto fruit in bear diets suggests that it is indeed a preferred species, fire is still likely to have altered the availability of this and other foods that could be important dietary components during periodic saw palmetto mast failures. Black bear diets are likely not compromised when feeding solely on saw palmetto fruit, but in years when it is not abundant, other mast-producing species must be available to avoid the negative consequences of reduced caloric intake on reproduction and overwintering condition (Rogers 1976).

Forest and Timber Management

Since the time of Spanish rule, the trend in natural resources use in Florida has been toward increasing intensity (Harris 1980, 310–311):

> Exploitative timbering, suppression of summer fires, and cultivation have brought about great floristic changes in the southeastern forest. Both the removal of large diameter-class hardwoods, and fire suppression, which has occurred both on former hardwood sites and apparently on many former pineland sites as well, have facilitated the increase of second growth (Quarterman and Keever 1962, Knight and McClure 1971). Unfortunately, the increased density and distribution of many hardwoods of marginal value to wildlife has necessitated expensive brush control practices. The proliferation of water oak (*Quercus nigra*) throughout pinelands seems particularly problematic inasmuch as it is an intermediate host for fusiform rust (*Fomes pini*) (Schmidt 1978); furthermore its mast appears to be of marginal value to wildlife (Swindell 1949, Beckwith 1957). A more recent trend involves the reforestation of cutover sites with slash and loblolly pine plantations. The original 25 million ha of open longleaf pine has been reduced to about 10 percent of its original extent (Croker 1979).
>
> About 60 percent of the southeastern land area remains forested today, 90 percent of which is considered commercial (USDA 1978). Of the 80 million ha of forest land in the Southeast (Virginia, North Carolina, Tennessee, Arkansas, Oklahoma, Texas, Louisiana, Mississippi, Alabama, Georgia, South Carolina, Florida), slightly more than 70 percent is privately owned. Of this privately owned land, approximately 50 percent is softwood and 50 percent hardwood (USDA 1978). About 280,000 ha of pine are planted annually, bringing the total area of pine plantations to approximately 8 million ha.
>
> The general competition for forest land in the Southeast is intense, despite the high yield of forest products. For example, Florida's forest acreage has been reduced by an average of nearly 50,000 ha per year for the last 25 years (USDA 1978). A recent analysis of land-use dynamics by the Soil Conservation Service identifies a loss of 11.1 million ha, or 12.6 percent, of southeastern forest acreage in the last 8 years. Surprisingly, the losses to urbanization and recreational use account for only a small percentage of the decrease (Dideriksen et al. 1977).

Handley (1979, 333–334) cited Lewis's (1928) observation in the Great Dismal Swamp, Virginia, that,

> When a logging gang goes into a section of the swamp the bears move out and are seen no more until the cutting is finished and the roar of the "skidders," the crash of falling trees and the whistle of the "dinky" locomotives has died away; and then, almost as soon as the tracks are pulled up, they are back again.

On the other hand, a detailed behavioral study in British Columbia indicated that female grizzly bears (*Ursus arctos*) exhibited profound responses to

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-005959

logging-truck traffic and did not habituate to the disturbance (Archibald et al. 1987). Similar findings were observed in bottomland forest black bear habitat in Louisiana (Weaver et al. 1990). Further, such reactions may result in abandonment of otherwise productive habitat and a reduction in effective carrying capacity. Where logging activities are not followed by forest regeneration, habitat loss results. The lack of stand replacement helps to explain the modern distributions of the species in Florida (Brady and Maehr 1985), Mississippi (Shropshire 1996), and eastern North America (Maehr 1984*b*). In areas where forests are permitted to regenerate, black bear populations can expand sufficiently so that within 10 years female productivity declines, intraspecific aggression increases, and resident animals expand home ranges in response to declining food resources (Lindzey et al. 1986). Forest management for timber production usually involves the construction of access roads, which are subsequently used by hunters to access local black bear populations (Brody and Stone 1987). Whereas some clearcutting operations may temporarily improve forage conditions for the black bear (Lindzey and Meslow 1977), increased hunter access and concomitant mortality may outweigh the benefits of increased fruit production (Brody and Stone 1987). Similar access issues are evident in other extractive industries such as surface mining for minerals (McLellan 1990).

Even-aged forests and pine plantations have been implicated in reducing the ability of forest lands to support the black bear in Florida (Maehr and Wooding 1992) and elsewhere in the southeastern United States (Perry et al. 1999). Site preparation reduces midstory and shrub layers in pine plantations (Harris et al. 1974) and reduced solar radiation further compromises the ability of masting species to produce fruit (Umber and Harris 1974)—changes that eliminate food and cover needed by the black bear. The most intensive site preparation eliminates almost all woody debris, increases erosion, and promotes loss of nutrients (Vitousek and Matson 1984, Hunter 1990). While erosion is generally not a problem in most of Florida, loss of all woody materials would greatly reduce carpenter ant (*Campanotus floridanus*) and termite populations—important black bear foods—in addition to reducing biodiversity in general. Loss of structural diversity, a common consequence of tree plantations, results in fewer wildlife species (Moore and Allen 1999). In Florida, loss of large downed logs may eliminate preferred female black bear den cover, especially where large hollow trees, extensive saw palmetto thickets, or other dense cover is rare or absent. Young and Beecham (1986) and Zager (1981) cautioned that minimally scarified clearcuts may require 10 to 20 years for bear foods to recover. Studies suggest that bear food production increases quickly after small-scale logging (Rogers 1976, Lindzey and Meslow 1977, Mealy 1977, Zager 1980, Young and Beecham 1986). Clearcuts that include areas greater than 125 m from a forest edge may experience reduced bear use (McLaughlin et al. 1986). In general, fruit production increases from 3 to 5 years following intensive management such as a clearcut or shelterwood cut, but fruit production declines with canopy closure unless silvicultural treatments are regularly applied (Perry et al. 1999).

Bottomland hardwood forests have been recognized as an important component of black bear habitat (Harris and Gosselink 1990). These often linear systems are frequently positioned within a matrix of pine-dominated uplands, and provide hard mast such as acorns and sabal palm fruit and soft mast such as tupelo (*Nyssa* spp.) during fall and early winter, after the availability of saw palmetto fruit has waned. Although water levels can periodically be high in hardwood swamps, the seasonal nadirs in fluctuating hydrology normally occur in late fall and winter as foods in upland sites disappear. In places such as Osceola National Forest, heavy feeding on abundant fall fruits directly precedes selection of den sites and initiation of hibernation (D. Maehr, personal observation). In such pineland-dominated landscapes it is not unusual for black bears to spend more than half the year in hardwood bottomlands. During the latter half of the nineteenth century many of Florida's bottomland forests were drained (Harris and Gosselink 1990). Such activities frequently led to forest clearing. While clearing led to immediate loss of wildlife habitat, the direct impacts were temporary if hydrology was maintained and trees were allowed to regenerate. However, such activities were precursors to the construction of levees and dams—structures intended to create relatively permanent changes for the sake of flood control and agriculture. The responses of native fauna to human activities in bottomland forests follows a gradient ranging from alarm reactions that create stress and subsequent physiological responses such as abnormal reproduction to range restriction that follows reproductive declines—the result of reduced recruitment and range abandonment—to loss of genetic heterogeneity as populations (such as the Florida panther [*Puma concolor coryi*]) become small and isolated (Harris and Gosselink 1990).

AMERICAN OVERSIGHT

It is virtually a truism that black bears require a variety of successional and habitat types for optimal productivity. Few efforts have been made, however, to quantify habitat variables with viable bear populations. Rogers and Allen (1987) recognized that seasonal variation in movements and habitat use was primarily the result of changing food supplies. Their habitat suitability index model (HSI), however, went beyond simple subjective measures of black bear habitat relations. They observed that,

> Ideally, a measure of cover type interspersion of food and cover resources could be used to evaluate the quality of black bear habitat. Presumably, greater interspersion of cover types providing required resources would reflect habitat of higher suitability than would an equally sized area with low interspersion...1) correlations between a cover type interspersion in relation to habitat quality and black bear response (e.g., improved physiological condition, higher reproductive rates) are undetermined; and 2) black bears are highly mobile and are capable of making long movements in relatively short periods of time. For example, in Minnesota sows with cubs traveling to known sources of food had average movements of 12.1 km/day, whereas, sows without cubs had average movements of 23.2 km/day (Rogers 1987*a*). A 4-year-old male traveling to a familiar feeding area moved at a rate of 7.0 km/hr. Additionally, black bears appear to be capable of learning the locations of food-rich areas that are well outside their home range. Knowledge of these sites may be passed on from generation to generation and movements to them may be extensive. The sites are normally used for a relatively short period of time before the bears return to their normal home range. Therefore, due to the potentially large areas and the mobility of the species, evaluation of cover type interspersion may have little merit in the evaluation for the species.
>
> This model, however, is based on the assumption that overall cover type composition is important in the evaluation of black bear habitat quality. ...for optimal conditions, 7% to 50% of an evaluation area must be in wetland cover types to provide spring food, 25% to 50% of an area must be in cover types that produce summer food, >35% of an area must be in cover types that produce fall foods.

This led Rogers and Allen (1987, 31) to examine seasonal cover type requirements that may be useful for forest managers who wish to promote black bear populations. They concluded the following.

1. Maximum availability of summer food occurs in areas where tree canopies are <25%, and are ≤250 m from forest cover types that compose 25–50% of the evaluation area.
2. Summer foods decrease where nonforested cover types >250 m from forest cover account for >50% of the total evaluation area.
3. Where nonforest accounts for >50% of the area, forest area is reduced, resulting in inadequate cover and reduced access to food.
4. The absence of hard mast reflects poor-quality fall black bear habitat.
5. Maximum availability of fall food occurs when ≥35% of the area is in cover types that have ≥1% canopy cover of hard mast–producing species.

The black bear can also be a significant problem in silvicultural operations because some trees provide edible bark (Poelker and Hartwell 1973). In Washington, the tree-girdling problem was so severe that harvest limits were increased in the early 1970s in order to reduce bear damage to valuable softwood species (Poelker and Parsons 1980). Liberal spring hunting seasons resulted in a 30% annual harvest increase in special damage abatement units and were deemed successful. Black bear depredation on plantation trees has not been documented in Florida.

Herbicides

Although Rogers (1987*a*) advised against the use of broad spectrum herbicides due to the likelihood that bear foods would be negatively impacted, we are unaware of studies that have examined the effects of such chemicals on black bear habitat. Herbicides received scant treatment in each of the last three wildlife techniques manuals (i.e., Giles 1971, Schemnitz 1980, Bookhout 1994). Giles (1971) mentioned herbicides only in passing. Schemnitz (1980) suggested use of chemicals as a means of manipulating habitat for ungulates such as deer (*Odocoileus virginianus*) and elk (*Cervus elaphus*), but also observed that the outcomes of herbicide applications were often unpredictable and more study was warranted. Bookhout (1994) addressed herbicides only from the standpoint of wetlands

AMERICAN OVERSIGHT

management. Among surveyed users of herbicides, chemical impacts on wildlife were not research priorities (Campbell and Howard 1993).

Herbicides are commonly used in Florida and elsewhere to control exotic species (Johnson and Barbour 1990), maintain rights-of-way easements, improve growing conditions for plantation-grown trees (Monsanto 1994), and create early successional openings for wildlife (Yoakum et al. 1980, Thompson et al. 1991). Herbicides can enhance wildlife habitat by decreasing overstory foliage and enhancing grass and forb production for a variety of species (Yoakum et al. 1980, Thompson et al. 1991). On the other hand, reductions in small mammal abundance can occur as a result of declines in plant and invertebrate foods (Santillo 1987). Increased edge and decreased forest interior can result from herbicide applications at herbaceous/forest interfaces. Such changes might locally increase soft mast production if herbicides are selectively applied to trees and shrubs that are not important bear food plants. Increased light and reduced competition may increase fruit productivity in blueberries and blackberries (*Rubus* spp.); however, these species are often targeted in conifer release efforts. Such local improvement in habitat productivity may, however, be offset if herbicides are administered indiscriminately or if they reduce forest interior conditions needed by black bears for escape cover or denning habitat.

During the early years of herbicide use in forestry operations, their application was viewed as primarily beneficial to early successional species such as white-tailed deer. Wagner and Zasada (1991, 506) captured the production-oriented philosophy of most herbicide applications by observing that,

> Forest managers across North America need to consider the potential effects of forest weeds or noncrop vegetation on nearly every hectare being considered for reforestation or afforestation. Competition for limited environmental resources (light, water, and nutrients) between crop species and noncrop vegetation is one of the primary factors determining the survival and growth of young trees. Therefore, vegetation management is strongly linked to reforestation success and future wood supplies.

This production-oriented perspective has expanded to consider herbicide impacts on more than just edge wildlife species and plant communities. Freedman et al. (1993) noted that after application of glyphosate to kill "silvicultural weeds," raspberry (*Rubus* sp.) was drastically reduced and most individuals of huckleberry, cherry (*Prunus* spp.), and blueberry (woody soft mast–producing shrubs) were killed after initial application. However, within 1 to 2 years raspberries had recovered, and no extinctions of woody shrubs occurred. Apparently, if the duration of suppression is limited, conifer release can occur and still allow vegetation to recover quickly.

> Provided that conifers have been satisfactorily released, the vigorous regeneration of angiosperm shrubs also may not be an important silvicultural problem, and may result in an enhancement of browse present at a suitable height to allow use by ungulates, as well as other wildlife values (Freedman et al. 1993, 2310).

Subsequent studies have examined herbicide use from larger spatial and temporal perspectives. Although Lautenschlager (1993) noted that plant response to herbicide is largely species specific, and that some browse species are 3 to 7 times more abundant after 8 years, he suggested that herbicide use should be examined from a larger spatial scale.

> Regardless of the effects of any silvicultural technique, including conifer release with herbicides, the shape of the forest system is not limited to specific managed forests or treated blocks, but rather to the landscape on which management is practiced. Managers, using a diverse set of tools, can produce a maximum diversity and abundance of wildlife, along with timber yield, if they understand the number of animals and (or) habitats desired, and that treated areas are only part of the total landscape (Lautenschlager 1993, 2297).

Sullivan et al. (1998) noted that plant species richness declined, but shrub diversity and small mammal diversity did not change 5 years after herbicide application. Like Lautenschlager's (1993) study, Sullivan et al. (1998) suggest that temporal considerations are important—short-term reductions in plant diversity and abundance are usually compensated for within a few years after treatment if herbicides are not continually applied.

> Diversity, in fact, may even be enhanced if different types of habitat (such as conifer-dominated stands with associated shrub and

AMERICAN OVERSIGHT

herbaceous species or areas with extended time periods of early seral plant communities), which support particular wildlife communities, are part of the overall landscape mosaic (Sullivan et al. 1998, 176).

On 3 sites in north Florida, Wilkins et al. (1993) observed that plant response to the herbicide hexazinone (Velpar, DuPont) was species specific and related to application rate, edaphic conditions, and adaptive strategies of resident plant species. In a xeric sandhill in Gilchrist County, several black bear foods (*Quercus, Vaccinium, Rubus*, and *Asimina* [pawpaw]) were reduced over a 3-year period, whereas, *Smilax* (greenbriar; a relatively unimportant bear food) increased over the same time period. In a mesic flatwoods in Alachua County, oaks and gallberry increased, whereas several plants not eaten by bears decreased in percent foliar coverage. In a hydric hammock in Levy County, grapes, oaks, persimmon, and greenbriar decreased, whereas sabal palm increased. Although available herbicides can control many woody plant species (Table 2), managers should be aware of potential toxic effects on nontarget species, including wildlife, and resistance that varies regionally.

Six herbicides are commonly used in forests of the southeastern United States: Arsenal, Krenite, Velpar, Roundup, Tordon, and Garlon (Table 2). In general, if these herbicides are applied using broadcast methods, mortality among many species may occur. Most are used to enhance pine (*Pinus* spp.) seedling establishment or to release young pines from competition (American Cyanamid Co. 1988*a*). In such situations, chemicals are applied in restricted

areas or to leaves, bark, or cut stumps of individual plants (American Cyanamid Co. 1988*a*, Monsanto Co. 1994). These chemicals do not present long-term environmental contamination problems, but botanically simplified communities that offer less food and cover for black bears may result if herbicides are applied repeatedly. Most of these products are suggested to be wildlife-friendly; however, because they promote the rapid re-establishment of grasses and forbs—vegetation types that are often equated with productive white-tailed deer and northern bobwhite populations (Anonymous 1990, 1991)—the resulting communities may be less likely to retain attributes that enhance black bear habitat.

Where the black bear is a featured target of management in industrial forest lands, herbicide use should be applied with a landscape perspective in mind (Harris 1984, Lautenschlager 1993, Sullivan et al. 1998). When used in a patchy distribution over both space and time, pine release and reduced competition will be less likely to reduce the use of affected areas by black bears. Reduced structural and species diversity are the intended results of herbicide applications to understory vegetation in pine plantations—the antithesis of most occupied bear habitat in Florida. However, if used for only short time-periods to promote young pine establishment, black bear food plants should not experience long-term declines, especially when the landscape matrix contains biotically diverse habitat patches.

AMERICAN OVERSIGHT

Exotic Species

Biological invasions are an integral part of global biogeography and explain, in part, much of the biodiversity that we are familiar with on a day-to-day basis, particularly in urban areas. They are also powerful agents of extinction. Indeed, human colonization of North America during the Pleistocene glaciation as little as 10,000 to 12,000 years ago may help explain the pulse of extinctions that resulted in the elimination of at least 40 large mammal species (Noss and Cooperrider 1994). Florida is more impacted by exotic species than any other state in the continental United States (Simberloff et al. 1997, xi)—23% of the flora is of alien origin (Ricketts et al. 1999). While space is insufficient in this report to address the issue of exotics, several species may have relevance to black bear management in Florida. Maehr and DeFazio (1985, 8) observed that,

> ...several introduced species appear to be important foods. Brazilian pepper is a common winter food in south Florida, providing bears with abundant fruits during a period usually characterized by a food shortage. The honey bee, introduced to Florida by early European settlers, is the most commonly eaten insect. Because honey bees are normally obtained at commercial apiaries (beeyards), a serious conflict between black bears and beekeepers has developed (Maehr and Brady 1982*b*). Armadillos are the most common vertebrate in Florida black bear diets. Inasmuch as armadillos are "destroying the organization and productivity of the leaf-mold stratum of the forest" (A. Carr 1983), black bears might be important in regulating armadillo numbers in occupied bear range. Exotics account for 7% of the food items used by bears, and for 9% of total frequency.

Exotic Species and Black Bears

Brazilian pepper is frequently consumed by bears in parts of Florida that escape frequent winter freezes, and it provides a highly nutritious seed that rivals other native foods (Maehr 1997*a*). It is unknown to what degree this dietary supplement has affected bear productivity, but it may reduce weight loss during winter, enhance cub survival, and allow adults to reach breeding condition earlier. The highly invasive Brazilian pepper (Ewel et al. 1982, Loope and Urban 1980), which covers at least 284,708 ha in Florida (Schmitz et al. 1997), presents a problem for managers of natural landscapes because it is increasingly a target for eradication (Ewel et al. 1982, Doren and Jones 1997) at the same time that it may locally increase habitat carrying capacity for the black bear. The black bear itself may be an agent in the spread of this exotic because Brazilian pepper seeds appear to benefit from digestion and dissemination by bears (Maehr 1984*a*). Where intensive eradication efforts are planned on public lands, the potential impact of the loss of this important food should be evaluated. It is likely that the loss of any other exotic plant food would not carry similar consequences.

Melaleuca (*Melaleuca quinquenervia*) is second only to Brazilian pepper in areal coverage of a woody exotic species in south Florida (Schmitz et al. 1997). Although melaleuca is not eaten by bears, nor has it been identified as a negative or positive component of black bear habitat, its wide and expanding distribution has altered forest habitat conditions in south Florida. Indeed, the colonization of wet prairies, native range, and other nonforested habitat, may facilitate bear movement through areas that were previously unforested. However, where melaleuca reaches high stem densities, productive understory food plants such as saw palmetto may become intolerably shaded. Additional study is necessary to accurately describe the relation between melaleuca and the Florida black bear and to determine its actual impacts on Florida biota.

The nine-banded armadillo is the vertebrate most frequently consumed by the black bear (Maehr and DeFazio 1985). During the 1970s the armadillo exhibited a spotty distribution in Florida (Layne 1974), but it is now widespread and one of the state's most abundant mammals (Layne 1997). While the wild hog has been a disruption in Florida's biotic communities (Maffei 1997) since the 1500s (Bakeless 1961), and suggested as a competitor with a variety of native mammals (Layne 1997), it is not uncommon as a part of the black bear's diet (Maehr and DeFazio 1985). Exotic vertebrates may provide occasional supplements to the black bear's predominately vegetable fare, but they appear to be no more than opportunistic nutritional bonuses. Should armadillos and wild hogs ever be successfully controlled in Florida, their loss would likely not negatively impact the black bear.

AMERICAN OVERSIGHT

HIGHWAYS, DEVELOPMENT, AND THE FLORIDA BLACK BEAR

Maehr (1994, 145) observed that few studies have been conducted that examine development impacts on the black bear:

> Summer homes in the southern Appalachians may leave plenty of good bear habitat but they bring with them seasonally high levels of human activity and many intolerant summer house owners. In New England, ski resorts have a very similar influence, and golf course developments, especially in the southeast, directly eliminate bear habitat. Government subsidized drainage in the coastal plain has reduced the quality of bear habitat and increased human access to these denatured landscapes. Hellgren and Maehr (1992)...indicated that areas smaller than 10,000 ha are unlikely to support a black bear population unless it is adjacent to a larger tract of public-owned land. Examples from other taxa included giant pandas [*Ailuropoda melanoleuca*] living in forest fragments of 10,000 ha and extinctions of mountain lions [*Puma concolor*] in urban California where travel corridors have been lost.

Kautz (1984) recognized the need for effective planning to prevent the continuation of wildlife habitat loss to development in Florida. The challenge is complicated by the

> ...large number of species, the habitat values of different plant community types, and the effects of various perturbations. Florida, for example, is inhabited by more than 150 species of reptiles and amphibians, 425 species of birds, and approximately 80 species of mammals...that are distributed over 17 major habitat types excluding open water estuarine and marine habitats...(Kautz 1984, 121).

Kautz did not specifically analyze the kinds of development that threaten wildlife in Florida, but concluded that development not only caused habitat loss but also fragmentation and isolation of remaining populations. Partial solutions to counteract such losses for the black bear are habitat corridors sufficiently wide to offset edge effects and other disturbances inherent to suburbs and other human developments.

Human activities ranging from industrial development to housing developments have affected bear habitat use, quality, and availability in a variety of ways (Mattson 1990). Highways are perhaps the most obvious of the anthropogenic threats to bears and bear populations (Wooding and Maddrey 1994). Although highways can exact considerable mortality on black bears through vehicle collision, the effects of such losses on populations are unknown. Nonetheless, highway underpasses, advisory road signs, and educational pamphlets for motorists have been employed in an effort to reduce the number of bear/vehicle collisions in Florida (Maehr and Wooding 1992). Highways may influence bear habitat in a more insidious manner by providing hunters access to bears (Wooding and Maddrey 1994), fragmenting habitat, and reducing local and regional carrying capacity (Martorello 1998). Powell et al. (1997) observed that,

> Roads, including logging roads that are gated or otherwise closed, provide hunters and poachers with access to bears (Beringer et al. 1990, Brody 1984, Powell et al. 1992, 1996). Of the black bears harvested in the mountains of North Carolina, 50% and 73% are killed within 0.8 km (1/2 mi) and 1.6 km (1 mi) of a road usable by a four-wheel drive vehicle (Collins 1983).

Several North American black bear populations inhabit forests that are near human settlements and highways. Several locations are notable due to the absence of highway collision as a mortality statistic: Washington (Poelker and Hartwell 1973), Idaho (Beecham and Rohlman 1994), Apalachicola National Forest (Seibert 1993), and coastal North Carolina (Martorello 1998). Most bear populations near highways, however, exhibit some form of vehicle-related mortality, but it is generally not high. Dusi and King (1990) reported a single bear/vehicle collision in a 2-year study of 4 radio-collared bears in southwestern Alabama. Anderson (1997) recorded a single highway mortality among 20 radio-collared black bears in a fragmented, agricultural landscape in Louisiana. And Maehr et al. (1993) and Land (1994) recorded 3 highway mortalities among 60 radio-collared black bears in south Florida—vehicle collision accounted for 30% of the total recorded mortality in this population. Nonetheless, from a behavioral perspective, high-speed, high-volume highways such as interstates appear to diminish

AMERICAN OVERSIGHT

crossings by black bears, and may result in local reductions in bear abundance (Brody and Pelton 1989).

Ocala National Forest in central Florida is notorious for producing abundant highway mortality statistics for the black bear (Cox et al. 1994). This situation precipitated an examination of wildlife underpasses as a solution to the continuing bear/vehicle collision problem in central Florida. Although bears used an underpass structure incorporated into State Road 46 (Roof and Wooding 1996), the results of the study were equivocal. Bears continued to use unfenced portions of the highway to cross, and there were no significant differences (for all mammal species) in the use of the crossing location during pre- and post-underpass construction surveys. Although underpasses seem to be effective for the Florida panther (Foster 1992, Maehr 1997*b*), and fencing appears to be an important component of the overall design, black bears may not perceive the integrated system of barrier (fence) and passageway (underpass) in the same way that panthers do. Interestingly, when considering relative population densities of the two species, bear use of underpasses in south Florida was an order of magnitude lower than the rate of use exhibited by the Florida panther (Lotz et al. 1997).

Black bears seem less encumbered by apparent landscape barriers as evidence by the long-distance dispersal (including large portions of treeless improved pasture) of a radio-collared male from Collier County to Highlands County (Maehr et al. 1988), the wide-ranging movements of an adult female in northwestern Florida (Wooding et al. 1992), and bears' occasional fence-crossings in sections of Interstate 75 that are far from underpasses (D. Maehr, personal observation). It is possible that the panther is more dependent upon forest cover for making routine movements and dispersal, and that it is apt to climb only when pursued. Thus, bears are less apt to benefit from the intended funneling effect of fences when incorporated into an underpass system.

Roads have also been examined for more subtle effects on bear behavior and demographics. P. C. Carr (1983) suggested that road access in bear habitat should be minimized to protect females from overharvest. Beecham and Rohlman (1994) found that Idaho black bears stayed more than 50 yards (45 m) away from dirt and gravel roads. Seibert (1989) and Beringer et al. (1990) observed that black bears in North Carolina avoided roads with high traffic volume, and were more susceptible to hunting in areas of high road density. Lentz et al. (1980) found that potential responses of black bears to roads occurred from <1 km to >5 km. However, Manville (1983) found that black bears in Michigan used oil pipeline rights-of-way, oil well service lanes, and lumber roads for travel. Maehr (1997*a*) suggested that female panthers are less tolerant of human disturbance and vehicle-related noise because female black bears selected den sites that were closer to roads. Whereas panther natal dens were always >1 km away from a road, some black bears denned within 0.06 km of a road (Maehr 1997*a*). Quigley (1982) found that black bears, especially females, in Great Smoky Mountain National Park avoided areas within 200 m of roads. Female black bears in the Ozark Mountains avoided areas within 240 m of roads (Clark et al. 1993). Kasworm and Manley (1990) found that bears tended to avoid areas within 274 to 914 m of an open road or trail in northwest Montana, depending on the season. They argued that road closures were a necessary management tool for reducing the impacts of roads on black bears and grizzly bears. Martorello (1998) made a similar recommendation for restricting road access in coastal North Carolina bear habitat. Mattson et al. (1987) found that primary roads in Yellowstone National Park not only were avoided by grizzly bears, but that home range shifts by dominant individuals placed subordinate individuals at a competitive disadvantage because they were forced to use habitat adjacent to human developments and human activities. McCutchen (1990) found that black bears in Colorado avoided interactions with humans and developed environments to the extent that otherwise productive habitat was effectively lost to the population. Similar patterns also pertained to back-country grizzly bears, although some individuals became habituated to people (Gunther 1990). Habituated bears became more susceptible to "being removed from the population due to concern for human safety" (Gunther 1990, 77).

AMERICAN OVERSIGHT

HUMAN-RELATED MORTALITY

The cessation of black bear hunting in 1993 effectively ended nearly 5 centuries of bear harvest by Europeans and their ancestors in Florida and followed the observation by Wooding (1990) that, "In Osceola National Forest...harvests have been excessive. In Apalachicola National Forest, the record high number of bears killed in 1989/90 is cause for concern." Despite this insight, the effects of hunting on eastern bear populations are largely unknown (Maehr 1994). On a local scale, hunting was thought to be the major factor leading to the extirpation of the species from Levy County (Pearson 1954, Cox et al. 1994). According to Beringer et al. (1999, 727),

> Hunting has a large influence on survival rates of black bears (Cowan 1972, Bunnell and Tait 1981, Schwartz and Franzmann 1991), a species with a low reproductive rate (Rogers 1976, Bunnell and Tait 1981, Rogers 1983, 1987*b*, Elowe and Dodge 1989, Schwartz and Franzmann 1991). Therefore, given the low reproductive rate and human-influenced survival (Jonkel and Cowan 1971, Glenn et al. 1976, Kolenosky 1990), conservative harvests are warranted, especially for populations where detailed population data are lacking (Miller 1990).

Although many black bear populations are harvested without negative impact (Burton et al. 1994), there is ample evidence that human harvest can have a depressing influence on bear populations (Poelker and Parsons 1980, Beck 1991). In addition, hunting activity can alter movements and enlarge home ranges (Clevenger 1986), and can push bears toward nocturnal activity (Garris 1983). Males are particularly susceptible to harvest (Bunnell and Tait 1981, 1985; Kolenosky 1986; Beck 1991; Schwartz and Franzmann 1992), primarily due to their more wide-ranging movements. Because there are no current plans to reinitiate bear hunting in Florida, legal harvest is unlikely to influence Florida black bear dynamics in the near future, except in north-central Florida where the population is contiguous with Okefenokee Swamp, Georgia, where hunting still occurs.

Maehr and Wooding (1992, 269) observed that, "Illegal killing and roadkill mortality are probably a significant consideration only at the fringes of occupied range where potential colonizers are eliminated from suitable habitat and small, isolated populations." The relatively recent closings of bear hunting seasons in Florida, coupled with the species' low reproductive rates, may explain, in part, some local population rebounds. Although increased encounters with people as a result of increasing human numbers may also be a factor, steady increases in nuisance complaints in south Florida over the last 2 decades may be the result of a population that has been expanding since the 1960s, when bear seasons were closed statewide. Furthermore, recent trapping success in Osceola National Forest is in sharp contrast to the 6 bears that were caught over a 2-year period in the early 1980s, when fall hunting was legal in Baker and Columbia counties (Brady 1985). Comparable data are unavailable for Apalachicola National Forest, which was closed to hunting in 1993.

Small populations that are not hunted can experience mortality that simulates the numbers lost to harvest alone. In these cases, remaining habitat can be viewed as sanctuaries in the sense of Wharburton (1984), McCullough (1996), Powell et al. (1996), and Beringer et al. (1998). Small populations such as those found in Greater Chassahowitzka Ecosystem and in Highlands County might experience nonhunting-related mortality that could drive them to extinction and impact statewide metapopulation dynamics. McCullough (1996, 5) warned that

> Harvesting could, and likely would, affect a metapopulation in two different but related ways. First, harvest would increase the likelihood of extinction in the habitat patches to which it was applied unless the harvest was completely compensated by reduction in alternative causes of mortality. Complete compensation seems unlikely in most scenarios. Second, harvest would decrease the probability of dispersal. Because harvest changes the two critical variables in metapopulation persistence (local extinction rate and dispersal rate), both in directions inimical to persistence, on the face of it a metapopulation structure could be concluded to have little prospect for sustainable harvest of any magnitude.

Thus, in order to encourage metapopulation dynamics within the Florida black bear, nonharvest-related mortality needs to be considered. Such mortality may be sufficient to prevent dispersal and genetic exchange among subpopulations—especially since young males (the currency of black bear population interchange) are so susceptible to a wide variety of mortality factors.

AMERICAN OVERSIGHT

Landscape Ecology and Management

Landscape Ecology

Landscape ecology emphasizes broad spatial scales and the interaction between spatial patterning and ecological processes (Turner 1989, Forman 1995). Landscape ecology research has led to a significant broadening in the focus of conservation research, planning, and management (Forman 1987, Pickett et al. 1997), and has become an increasingly important aspect of black bear management (Maehr 1997*a*). The landscape needs of the Florida black bear have been recognized in part for nearly 2 decades (Kautz 1984).

Coupled with the growth of this discipline has been an increasing awareness (within the synthetic discipline of conservation biology) of the spatial needs and landscape considerations involved in protecting viable populations of large carnivores and other wide-ranging species (Schoen 1990, Noss et al. 1996, Samson and Huot 1998). A landscape ecology perspective is necessary due to the importance of habitat heterogeneity and the large spatial scales needed to maintain many species and ecological processes. The effective conservation of wide-ranging species depends on a landscape focus that incorporates natural levels of spatial and temporal heterogeneity while minimizing the negative effects of artificial edges and barriers (Harris et al. 1996).

The black bear can be considered a landscape species because of large-size home ranges and typical dependence on more than one vegetation association or ecological community type (Harris and Kangas 1988, Schoen 1990, Maehr 1997*a*, Samson and Huot 1998). Schoen (1990, 146) explicitly links bear management to landscape ecology:

> In fact, a narrow concept of habitat may be inapplicable for bears, which are wide-ranging creatures of landscapes rather than habitat types per se.... Clearly, the normal movements of bears are so extensive that bear habitat must be evaluated and managed on a landscape scale often exceeding thousands of square kilometers.... Even in large areas, managers should be as concerned about the composition and status of the surrounding habitat as they are about the area they wish to conserve.

Habitat loss and fragmentation are key reasons for landscape-level management. Essentially all bear species have been impacted by habitat loss and fragmentation that have resulted in range contractions, smaller populations, and, frequently, populations that are isolated from one another. Habitat fragmentation refers to the loss of habitat accompanied by a decrease in habitat patch size and increasing isolation between patches and is considered by many biologists to be the greatest global threat to biodiversity conservation (Wilcox and Murphy 1985, Wilcove et al. 1986, Harris and Silva-Lopez 1992).

The direct impact that outright loss of habitat has on black bears is obvious: less habitat means fewer bears. However, effects of fragmentation are more subtle, yet pernicious. As habitat patches become smaller, bear populations also are reduced in size, and populations become more isolated or often completely separated. This reduction in population size and increasing isolation can lead to several processes adversely affecting the survivability of small populations: demographic stochasticity, inbreeding, negative edge effects, and catastrophic events (Harris and Silva-Lopez 1992). Even if a small population does persist, it will probably lose genetic diversity through genetic drift and, therefore, have a reduced ability to survive future environmental changes.

In Florida the significance of landscape ecology principles and landscape management considerations are extremely significant due to rapid human population growth and concomitant habitat loss and fragmentation (Kautz 1984). This rapid loss of habitat has resulted in Florida having the third highest number of threatened and endangered species behind Hawaii and California, and 31 species have been extirpated or become extinct since the arrival of Europeans (Kautz 1993). In addition, at least 44% of Florida's vertebrate species are declining in population (Millsap et al. 1990).

Habitat loss and fragmentation have resulted in vast reductions in the area occupied by black bears. The black bear used to be found throughout North America wherever sufficient forest cover existed, which was essentially everywhere except for prairie, desert, and tundra (Maehr 1984*b*, Pelton 1986). As forests have been cleared for agriculture, industry, and housing, occupied black bear range has receded into more remote, inaccessible areas such as mountainous regions, extreme northern forests, and large swamp

areas. In the eastern United States, and especially the Southeast, black bear habitat is quickly being relegated to only scattered, large public lands (Pelton 1986).

The range of the Florida black bear shows the same trend of range contraction and fragmentation of populations (Hellgren and Maehr 1992, Cox et al. 1994). Although bears probably occurred throughout most of Florida, several prevalent community types, such as dry prairies, large marshes, and open sandhills, are not primary bear habitat. These plant communities dominate several areas. Sandhills were found in large expanses on the ridge systems from the panhandle through north-central Florida and down the Lake Wales Ridge almost to Lake Okeechobee. Large, marsh-dominated landscapes include the Everglades as well as the headwaters of the St. Johns River, and dry prairies were common in south-central Florida. Bear densities in such areas must have always been fairly low, though bears probably utilized saw palmetto, hammock patches, and wetland strands in dry prairie marsh systems, and oak scrub patches found within sandhills. The Florida black bear is now restricted to approximately 27% of its former range. Currently, at least 7 "more-or-less separate" populations of Florida black bears (U.S. Fish and Wildlife Service 1998*b*) are centered primarily in Florida, with bears also occurring in the Okefenokee region in southeast Georgia and in a small population in southwest Alabama.

In Florida, the bulk of the former and existing range of the Florida black bear, secluded forests vital to bears, are quickly being whittled away and fragmented. Approximately 40% of potential bear habitat in Florida is in public ownership, and private lands are under ever-increasing development pressure as human populations continue to grow. The U.S. Fish and Wildlife Service (1998*b*) suggested that 4 of the populations (Apalachicola, Osceola-Okefenokee, Ocala, and southwest Florida) are viable, though they acknowledge that at least 2 of these (Ocala and southwest Florida) will suffer from continued habitat loss and fragmentation. Land development trends near Jacksonville and in the panhandle (such as a new emphasis on residential development by St. Joe Paper Company) suggest that they also underestimate the future loss of habitat in the other 2 populations. Florida currently has 15 million human residents and is projected to add 3 million more by 2010. In addition, the comprehensive growth management plans for the entire state would allow approximately 100 million people in build-out scenarios. It seems unlikely that Florida will attain such a population; however, the threat of significant habitat loss and fragmentation over the coming decades is severe. In Florida, the rate of annual deforestation has been estimated to be as high as 150,000 acres (60,000 ha) per year (Harris and Scheck 1991), although more recent estimates of rural land loss (including both agricultural lands and natural communities) using aerial photography and satellite imagery indicates that approximately 130,000 acres (50,000 ha) are being destroyed each year through conversion to residential, commercial, and industrial developments (J. Reynolds, University of Florida, personal communication). At this rate at least 25% of private rural lands (over 6 million acres [2.5 million ha]) will be converted to intensive development in the next 50 years.

The pattern of habitat loss may be more important than the actual amount lost. For instance, depending on where habitat loss actually occurs, the smaller bear populations that now exist may be extirpated. Inappropriately placed development can sever areas that now serve as links between various bear populations, or "subpopulations," including the Chassahowitzka, Highlands, St. Johns, Eglin, and southwestern Alabama populations. The importance of maintaining existing and potential connectivity between these smaller populations and the 4 larger "core" populations is discussed in more detail below. Regardless of the outcome of the Vortex-based population viability models presented later in this report and the opinion of the U.S. Fish and Wildlife Service (1998*b*), Cox et al. (1994) determined that a long-term, minimally viable population of 200 black bears would require at least 500,000 to 1,000,000 acres (200,000–400,000 ha) of suitable habitat. Only the Apalachicola, Okefenokee, and southwest Florida populations currently have protected habitat that exceeds the lower end of this threshold. Other estimates indicate that formerly widespread species may need effective populations on the order of at least 500 to 5,000 to maintain long-term viability and evolutionary potential (Franklin 1980, Lande 1995, Noss et al. 1997).

Reserve Design Principles

Well before the popularization of island biogeography theory, wildlife biologists noticed that national parks were not of sufficient size to maintain many wildlife species, especially wide-ranging species (Wright et al. 1933, Shelford 1936, Cahalane 1948). One of the suggestions for improving this situation was to create buffer zones around these parks that would provide a moderate level of security for

AMERICAN OVERSIGHT

animals that needed more space to meet seasonal habitat requirements or enough space to support a viable population (Wright and Thompson 1934, Shelford 1936).

Island biogeography theory (McArthur and Wilson 1967) helped spur discussion of the relevance of insularity to habitat fragments in continental landscapes (Wilson and Willis 1975, Shafer 1990). Though these discussions also included red herring debates such as SLOSS (single large or several small reserves) (Shafer 1990), conservation biologists and ecologists agreed that to conserve species sensitive to fragmentation and biodiversity, many large and strategically located reserves would be needed (Wilcox and Murphy 1985, Soule and Simberloff 1986). Furthermore, the disciplines of conservation biology and landscape ecology substantiated some of the reserve design principles proposed initially through the application of island biogeography and provided new principles as well (Noss and Cooperrider 1994, Forman 1995). Some of the most commonly considered rules of thumb for reserve design (Thomas et al. 1990, Soule 1991, Noss and Cooperrider 1994, Noss et al. 1997) include the following:

1. Large reserves (or blocks of habitat) are preferable to smaller reserves. Such reserves will tend to have larger blocks of habitat and larger populations of black bear; have more potential for supporting various ecological communities (and therefore more diversity); be resistant and resilient to disturbances; be more likely to support natural, functional disturbance regimes and other ecological processes; and be better insulated from potentially incompatible land uses outside the reserve (Harris 1984, Soule and Simberloff 1986, Thomas et al. 1990, Soule 1991, Noss and Cooperrider 1994, Noss et al. 1997).
2. Functionally interconnected reserves are preferable to isolated reserves. Depending on the situation and species, connectivity could be provided through corridors or landscape linkages providing at least suitable dispersal habitat, or through compatibly managed multiple-use landscapes surrounding reserves. Reserves that are close together may also provide functional connectivity for species that are either able to fly or, as is the black bear, able to traverse the matrix surrounding the reserves (Harris 1984; Noss and Harris 1986; Harris and Scheck 1991; Soule 1991; Noss 1993; Noss and Cooperrider 1994; Noss et al. 1996, 1997; Beier and Noss 1998; Soule and Terborgh 1999).
3. Reserves in contiguous or consolidated blocks are preferable to fragmented blocks. Types of fragmentation within reserves could include roads, inholdings with incompatible land uses, or clear cuts (Harris and Silva-Lopez 1992, Noss and Cooperrider 1994, Noss et al. 1997).
4. Reserves that are roadless, or otherwise inaccessible to humans, are better than conservation areas with roads (Noss and Cooperrider 1994, Noss et al 1996). This principle is born out of the established relationship between areas of high road-density and avoidance of, or absence from, such areas by a number of wide-ranging species sensitive to humans in general or prone to hunting, poaching, and roadkills. These species include the grizzly bear (Mattson et al. 1987, McLellan and Shackleton 1988), wolf (*Canis lupus*) (Thiel 1985, Mech et al. 1988, Mladenoff 1995), elk (Lyon 1983), cougar (*Puma concolor*) (Van Dyke et al. 1986), and black bear (Brody 1984, Brody and Pelton 1989). Black bears clearly respond negatively to the influences of roads (see section on roads and development).
5. Reserves with native carnivores and wide-ranging species are preferred to reserves without these species (Terborgh 1988, Soule 1991, Noss et al 1996). Although the rationale for this principle can be simply aesthetic or programmatic (such as a directive to maintain or restore all native species), sound ecological conservation reasons exist for maintaining and restoring such species and their habitats. Carnivores are often keystone species that affect the structure of entire communities by, for example, controlling seed predators in tropical forests (Terborgh 1988); providing carrion for other species as wolves now do in Yellowstone National Park (K. Murphy, National Park Service, personal communication); or controlling meso-omnivores such as raccoons, opossums, and feral cats that can reduce ground/shrub dwelling and nesting species (Soule 1991). Carnivores can also be important in

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-005971

maintaining functional evolutionary relationships between predator and prey (Maehr et al., in press *a*).

6. Species well-distributed across their native range and in several reserves will have a better opportunity to maintain genetic variation and adaptability to environmental changes. This will make them less prone to extinction than species confined to a small portion of their former range (Thomas et al. 1990, Wilcove and Murphy 1991, Noss and Cooperrider 1994, Noss et al. 1997).

Obviously, these principles should be regarded as rules of thumb that can be used as general guidelines for designing reserves and managing habitat for the black bear, as well as for biodiversity and ecological systems. Exceptions are always possible, and options must be weighed carefully when addressing specific situations (Noss et al. 1997).

Along with the development of reserve design principles, the increasing recognition of the need for large areas to maintain wide-ranging species, intact ecological gradients, and ecological integrity have led to integrated regional landscape approaches to conservation (Noss 1983, Harris 1984, Noss and Harris 1986, Noss 1987, Noss and Cooperrider 1994, Harris et al. 1996, Noss et al. 1996, Soule and Terborgh 1999). Regional landscapes reflect the appropriate scale for conservation because they tend to be big enough to comprise diverse, interacting ecosystems; incorporate large natural disturbances; and maintain viable populations of large, wide-ranging species (Noss and Cooperrider 1994, Harris et al. 1996). While research and management at other scales is still important (i.e., autecology, community ecology), landscape ecology is increasingly necessary for addressing the effects of ongoing habitat destruction and fragmentation (Harris et al. 1996). A regional landscape conservation strategy also stresses the importance of interactions between the urban environment, rural lands, and native ecosystems by incorporating planning and management at large spatial and temporal scales so that land uses are effectively integrated to maximize compatibility and ensure the conservation of biological diversity (Harris 1984, Noss and Harris 1986, Harris et al. 1996).

The need for regional landscape approaches to black bear conservation stems from increasing attention on the design and protection of integrated reserve networks that incorporate landscapes apportioned into functional networks of reserves, multiple-use buffer zones, and landscape linkages (Harris 1984, Noss and Harris 1986, Noss and Cooperrider 1994, Harris et al. 1996, Soule and Terborgh 1999). The overarching goals for such systems could include those described by Noss (1996, 95–96):

1. Represent, in a system of protected areas, all native ecosystem types and seral stages.
2. Maintain viable populations of all native species in natural patterns of abundance and distribution.
3. Maintain ecological and evolutionary processes, such as disturbance regimes, hydrological processes, nutrient cycles, and biotic interactions.
4. Design and manage the system to be responsive to short-term and long-term environmental change and to maintain the evolutionary potential of lineages.

Obviously, although such reserve systems include as the primary goal conserving biological diversity, landscape ecology and regional conservation strategies are relevant to conservation efforts for carnivores and other wide-ranging species. This has led to the zoning approach of biosphere reserves and multiple-use modules (see Noss and Cooperrider 1994) wherein core preserves that are protected from exploitation and receive low-intensity human uses are surrounded by increasing human uses. In an article focused on conservation strategies for carnivores in the Rocky Mountains, Noss et al. (1996, 955–956) elucidate the importance of regional conservation approaches:

> The overwhelming message from population viability studies of large carnivores is that conservation planning must be undertaken at vast spatial scales and must consider connectivity.... If maintaining viable populations of species that have large home ranges and are vulnerable to human activities is an objective, then the conservation planner must grapple with the design and management of entire landscapes. Thus a zoning approach has come to dominate conservation strategies for large carnivores. Zoned landscapes should include refugia that are strictly protected, but they will often be dominated by multiple-use lands.

This review's section on black bear habitat management clearly indicates that many reserve design principles and a regional landscape

AMERICAN OVERSIGHT

conservation approach are applicable to conservation and management for the Florida black bear. Black bears have large home ranges and need diverse plant communities in relatively close proximity to provide seasonally available food sources. Large areas are needed to support viable populations. Black bears also have low reproductive potential, making them potentially sensitive to hunting and poaching pressure. In addition, bears come into conflict with humans due, for example, to apiary depredations, garbage raiding, and occasional livestock depredations. Black bear populations are influenced by major roads and road densities which cause roadkills, fragment bear habitat, and allow hunters and poachers access to bears. Florida black bears are at least partially dependent on natural fire regimes in flatwoods and other fire-adapted habitat types, and these fire regimes are best generated in large, intact landscapes and over long temporal scales. For example, because of the many years required for saw palmetto to regain fruiting productivity after a burn, prescribed fires in bear habitat must be planned over large areas in order to provide a mosaic of fruit-producing palmetto stands. Furthermore, large, well-buffered reserves are easier to manage with prescribed fire than are small reserves surrounded by urban land. Bears are, however, also capable of exploiting, and sometimes benefitting from, some human activities such as timber management that allows effective integration of core areas strictly managed for biodiversity with buffer zones that support low- to moderate-intensity land uses. Finally, the once widespread and abundant Florida black bear has now been fragmented into several isolated populations that are arguably not large enough to support long-term viability of the species. This leads us to a specific list of potentially relevant landscape-management guidelines for conserving the Florida black bear.

Protect and Restore Landscapes with Functional Gradients and Juxtapositions of Natural Communities

Most habitat suitability models for black bears (Rogers and Allen 1987), including Cox et al. (1994) for the Florida black bear, consider plant community diversity (often called habitat diversity). The assumption is that areas with a higher diversity of plant communities used by black bears will have a higher probability of supporting a diverse array of food sources and act as a buffer during mast crop failures (Schoen 1990, Samson and Huot 1998). In Florida most plant communities can be considered primary or secondary bear habitat in landscapes that historically supported gradients of communities that provided resource diversity for bears. Of particular importance are gradients between swamps and upland forests. In many cases, wetland and riparian communities still exist, but uplands have often been converted to uses that either range from being potentially suitable for bears (e.g., pine plantations, dependent on management activities such as the use of prescribed fire and site preparation) to low or no suitability (e.g., most agricultural and other intensive land uses). Therefore, maintenance of existing mosaics of large wetland and upland communities and restoration of such mosaics where feasible should be considered important management objectives for the Florida black bear (as well as for biodiversity conservation as a whole).

Although there may be intact sites with abrupt habitat gradients containing a variety of food sources, bears often have to move long distances seasonally or in response to mast failures to find suitable foraging sites, which can lead to conflicts in human-dominated landscapes. Schoen (1990, 147) observed that,

> Although there may be a reasonable mix of productive foraging sites within a bear's normal range of movements, it may be forced to traverse many habitat types in search of those productive sites. And herein lies one of the most serious problems facing bear managers throughout the world—habitat fragmentation.

Maintaining and restoring relatively intact landscapes that can support such spatially demanding habitat and population requirements such as foraging, denning, and dispersal are relevant to the following guidelines.

Land Use Zoning

Zoning is potentially relevant to conserving black bear populations in Florida (Samson and Huot 1998). This zoning approach is based on 2 primary considerations. First, black bear populations either require or can greatly benefit from "wilderness" conditions that insulate them from human persecution and vehicle collision, and may support other favorable habitat conditions that are not typically found in human-dominated landscapes (Lentz et al. 1980). Second, viable black bear populations may need more space than that found in strictly protected areas, and they may benefit from human activities such as clear-cutting or other human land use activities that create

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-005973

successional habitats. Samson and Huot (1998) found that many black bears in a relatively small national park in southeastern Quebec frequently ranged outside the park, either seasonally or in years when certain mast crops failed, to forage in early successional habitats created by clear-cutting on adjacent lands. Bears that ventured out the park were, however, also subject to higher mortality due to hunting, poaching, and vehicle collision. Samson and Huot (1998) recommended 2 complimentary approaches: control the loss of females by closing the fall hunting period, when females were most likely to be out of the park, while maintaining the spring hunt, when more bears were typically harvested anyway; and use prescribed fire to create early successional habitat within the national park.

Although hunting of black bears is currently not permitted in Florida, poaching and other forms of human-related mortality still occur. Furthermore, intense human activities, such as off-road vehicle use, may reduce the quality of potential bear habitat. Establishing sanctuaries, or core habitat, for females may be a useful strategy for re-establishing populations in the southern half of the Big Bend, Green Swamp, and other areas that could contribute to metapopulations dynamics. A zoning approach to black bear management in Florida might limit off-road vehicle use and prohibit the harvest of saw palmetto fruit to protect den sites and food sources. Harris (1984) and Noss and Harris (1986) recommended that multiple-use modules (MUMs) with strictly protected areas and buffer zones can be applied at various scales. For example, red-cockaded woodpecker (*Picoides borealis*) colonies are protected using a small buffer zone where no timber harvest is allowed (Noss and Harris 1986). This area is then surrounded by buffer zones that allow harvest compatible with foraging needs of the species. In regard to black bear habitat management, Florida has essentially no old-growth forest left; therefore, few areas offer large tree cavities, which, when available, tend to be preferred den sites. Also, the availability of thick, shrubby cover for ground nests could, in some cases, conflict with land use practices on private timber lands and the current emphasis of frequent fire regimes on public lands. Allowing old-growth forest to return on strictly protected public lands should be considered a priority. In addition, patches of old-growth allowed to regenerate on multiple-use public lands could serve as den site core areas in landscapes that otherwise provide suitable foraging habitat. The rapid clearing of forested wetland domes and strands on private lands in north Florida (S. Vince, University of Florida, personal communication) and elsewhere in bear habitat is also a potential concern. It might be possible to adopt an incentive approach to maintain and restore core sites on private lands to provide optimal denning sites.

Road Considerations

The susceptibility of black bears to highway mortality in Florida is well-documented. Roads both fragment forested landscapes and increase the likelihood that bears and humans will interact in some way. Although the black bear can survive in areas with roads, landscape management can target restoring bear habitat with as few roads as possible or minimizing the impact of existing and proposed roads. Several papers suggest a relationship between road densities and productive bear habitat (e.g., Brody 1984, Brody and Pelton 1989). Roads cut up blocks of once-isolated bear habitat and almost invariably make these blocks more accessible to humans. This usually means that bears are more susceptible to hunting and poaching (Kellyhouse 1977, Landers et al. 1979, Pelton 1986). The kinds of roads that can influence bear habitat range from unpaved trails through forests, where bears could benefit from mast-producing shrubs or suffer from increased human access, to major highways that bisect occupied range or travel corridors and cause direct mortality due to vehicle collision. In an area of intense hunting pressure in Alaska, 16 of 18 monitored dispersing subadult males were shot next to roads (Schwartz and Franzmann 1992). The maintenance of existing larger roadless areas (Hellgren and Maehr [1992] suggested that 10,000 ha [25,000 acres] may be a minimal size for occupation) on public lands is essential, and restoring roadless areas by closing nonessential roads on public lands should be considered whenever possible. Overall road density is also important. Brody (1984) suggested that black bear populations may not be maintainable in the Appalachians, where road density exceeds 0.8 miles per square mile (0.5 km/km^2). Pelton (1986) recommended that a very conservative approach be taken on planning new roads in bear habitat where road densities exceed 0.5 km per square km. A general guideline is that road densities below 0.5 miles per square mile (0.3 km/km^2) are optimal for core areas. Road densities within buffer zones or multiple-use areas should be under 1 mile per square mile (0.6 km/km^2) (Noss 1992). Florida currently has few areas with road densities below 1 mile per square mile, and many that do exist are found within occupied bear habitat (T. S. Hoctor, University of Florida, unpublished data). On the other hand, if an area is particularly productive and provides

AMERICAN OVERSIGHT

sufficiently remote habitat for denning and other key behaviors, black bears can exist in the face of extensive road networks. In Florida, Ocala National Forest serves as an example of this phenomenon. The Greater Chassahowitzka Ecosystem bear population, on the other hand, may be sufficiently small that road construction and concomitant development may render it unsustainable. Maintaining roadless areas and areas of low road density on privately owned bear habitat will be difficult without incentives and conservation easements. Impacts to bears in areas with high road densities might be reduced by discouraging poaching through education and law enforcement (Noss and Cooperrider 1994).

Black bears tend to avoid crossing major roads with high traffic-volume, such as interstate highways (Brody and Pelton 1989). All very large blocks (50,000–100,000 acres [20,000–40,000 ha] or greater) of bear habitat with no major roads (Cox et al. 1994) should be maintained. New highway projects in low road density areas should be avoided, and construction of new highways within occupied habitat should also be avoided in general. Widening and intensification of use of existing roads and highways should be monitored in black bear habitat. All roads within the Florida Department of Transportation Intrastate Highway Plan should be assessed for their potential to conflict with black bear conservation, since the plan calls for widening many of these roads in the near future.

The potential utility of road underpasses to reduce roadkills and promote connectivity has been discussed briefly. Although bears may be less prone to use underpasses, they are still one of the few options available to reduce roadkills and maintain or restore habitat integrity, especially in a state with such an intensive, and growing, major road network. New road construction, which facilitates massive growth, new residents, and seasonal migrations of millions of tourists yearly, has averaged about 5 miles (8 km) of new roadway per day for the last 50 years (Harris and Hoctor 1992). The preferred option to ameliorate road impacts would be to build larger elevated road spans or a series of underpasses, similar to those along Interstate 75, instead of narrow, single underpasses like that used on State Road 46 and the one planned for Suncoast Parkway within Annuteliga Hammock CARL Project. Such bridge expanses or underpass arrays would be much more likely to promote use by black bears, as well as a whole suite of sensitive species that may not be able to find or use isolated underpass structures (T. S. Hoctor, University of Florida, unpublished report). Another potentially significant opportunity is the planned widening of many bridges throughout the state (Dan Smith, University of Florida, personal communication). In some cases, black bears use riparian features as movement corridors (Kellyhouse 1977, Mollohan and LeCount 1989, Weaver et al. 1990); therefore, widening bridges in black bear habitat and along potential dispersal corridors may be very important.

Landscape Connectivity and Managing for a Statewide/Rangewide Population

A regional landscape approach to conservation is based on the thesis that an integrated system of reserves would be of greater function than the sum of its parts. Noss (1992, 11) suggested that,

> Connectivity is in many respects the opposite of fragmentation. A reserve system with high connectivity is one where individual reserves are functionally united into a whole that is greater than the sum of its parts.

A connectivity approach to conservation is simply an attempt to protect landscapes from further fragmentation and, where possible, to restore connectivity to culturally altered landscapes. Connectivity should not be used to link populations that were naturally isolated (Noss et al. 1996, 1997; Beier and Noss 1998).

Before the advent of cities, roads, housing developments, and large agricultural areas, bears roamed freely across the landscape. Although not all areas were prime habitat, bears were still capable of dispersing through such places to reach suitable habitat. Furthermore, even in marginal habitats, stepping stones or corridors of suitable habitat occurred. For instance, on sandhills, various sized scrub areas occurred in patches and linear strands. In and of themselves, these patches were probably insufficient to support intrinsically viable populations of bears, but they were sustained by repeated colonization. River systems provide another example. The Withlacoochee River begins in Green Swamp and runs between two ridge systems that once supported vast sandhills. The river incorporates several large expanses of swamp as it runs to the northwest and eventually empties into the Gulf of Mexico. At its outlet is a vast forest of flatwoods, swamp, and hammock. Although bears probably crossed sandhill areas, such rivers constituted the more natural dispersal corridors. The Withlacoochee River probably served as a landscape linkage for a large bear population that used its headwaters delta forest.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-005975

While the previous passage is a speculative illustration of black bear movement through the pre-European Florida landscape, the primary point is that the Florida black bear used to be one large, interacting population. Today, as a result of habitat loss and fragmentation, it functions primarily as a seven-part metapopulation (Levins 1970). It is possible that some populations are completely isolated, but there is also evidence and a strong likelihood that several populations are currently linked through occasional dispersal. In one instance, the Ocala and Okefenokee/Osceola populations may have enough interaction to be considered one population. A recent range map for bear populations in the southeastern United States also suggests that these populations are connected (Wooding et al. 1994). However, current conservation recommendations for the Florida black bear have focused on attempting to protect habitat around the 5 largest populations (southwestern Florida, Ocala, Okefenokee/Osceola, Eglin Air Force Base, and Apalachicola) to provide additional security (Cox et al. 1994). In several cases, Cox recommended Strategic Habitat Conservation Areas for the Florida black bear that include providing some local connectivity. The recommendation for the Okefenokee/Osceola population includes primarily Pinhook Swamp, which would ensure protection of a landscape linkage between Osceola National Forest and Okefenokee National Wildlife Refuge. The recommendation for the Eglin population includes protecting habitat linkages between air force property, Blackwater River State Forest, and Northwest Florida Water Management District lands along the Choctawhatchee River. The Ocala recommendation includes habitat linkages from Ocala National Forest to the Wekiva River conservation lands complex, which contains a high-density bear population (Roof and Wooding 1996), and across the St. Johns River to bear habitat on private timberlands and Tiger Bay State Forest. These areas cover approximately one million acres (400,000 ha) (Cox et al. 1994). We believe that the recommended Strategic Habitat Conservation Areas are essential to effectively conserve the Florida black bear. However, we also believe that there are other opportunities that would enhance the conservation recommendations. Cox et al. (1994) suggested that smaller populations such as Chassahowitzka and Highlands County are too small, potentially too isolated, and too threatened by encroaching development to warrant conservation attention.

> The chances of an area supporting a stable population without recurring immigration is another criterion that should be used to evaluate minimum habitat conservation priorities. The level of immigration required to sustain some of the smaller populations described may be achieved through the establishment of habitat corridors, but required immigration rates may also be higher than habitat corridors alone can provide. The small populations described for Chassahowitzka National Wildlife Refuge, Durbin and Twelvemile swamps, Green Swamp, and other areas would also require major new land conservation efforts in order to provide a sufficient habitat base to sustain these populations for acceptable lengths of time. Cox et al. (1994, 60)

This strategy will most likely ensure the loss of smaller populations/subpopulations, unless land-saving actions are taken quickly to protect or restore components of the Florida black bear metapopulation. We agree that funds, time, and political will to protect everything are limited (Simberloff et al. 1992, Cox et al. 1994), and that options must be weighed carefully, including detailed assessments of opportunities for connectivity and for conserving biological diversity (Noss et al. 1996, Beier and Noss 1998, Dobson et al. 1999).

Recent state and national trends suggest that regional and continental conservation is feasible (Soule and Terborgh 1999). National opinion polls suggest that Americans strongly support efforts to protect green space and wildlife. Florida has followed suit by renewing aggressive land protection efforts by passing the Forever Florida bill, which could provide as much as 300 million dollars per year for conservation efforts through 2010. Congress is close to passing comprehensive, landmark legislation that would fully fund the Land and Water Conservation Fund at 300 million dollars per year, and much of this money is to be funneled to the states for land and water conservation projects. Conservation easements are being increasingly used in Florida, allowing more land to be protected for less money, keeping lands in private ownership and on tax rolls, and reducing management costs, while maintaining land uses compatible with conservation objectives such as black bear habitat. Furthermore, University of Florida recently completed a 4-year modeling effort to identify a statewide ecological network, which may help protect a large, connected reserve system that stretches from the Everglades to the Perdido River in Alabama. The Florida Legislature passed a greenways implementation plan to support these efforts as part of the Florida Forever legislation.

AMERICAN OVERSIGHT

Recent trends in land conservation efforts in Florida black bear habitat suggest that efforts to conserve the smaller populations may also be feasible. The state recently closed on a 60,000-acre (24,000-ha) acquisition and easement project in the Fisheating Creek basin with Lykes Brothers Corporation. An additional 80,000-acre (32,000-ha) conservation easement in the same area is planned. This project protects habitat that is likely essential to the Highlands County bear population because it secures an important part of existing habitat while protecting connectivity with the larger population south of the Caloosahatchee River. A conservation coalition including The Nature Conservancy is working with large landowners in southern Duval County and St. Johns County to protect a conservation network that may help maintain a bear population in the Durbin and Twelvemile Swamp area despite ongoing development in the region. The Nature Conservancy has also established a conservation partnership with Eglin Air Force Base, Georgia-Pacific, Blackwater River State Forest, and Conecuh National Forest in southern Alabama to integrate conservation and land use activities to conserve biological diversity in that region. These efforts include securing habitat connections that may support the continued existence of the Eglin bear population.

Recent demographic trends and individual phenomena bode well for future bear metapopulation management in Florida. Roadkills and anecdotal evidence suggest that the Apalachicola population is expanding to the east and south through coastal and riverine conservation lands and private timber lands in the Big Bend. Existing conditions and recent experiments in Lower Suwannee National Wildlife Refuge and surrounding lands supported the notion that the area could maintain a bear population (Wooding 1995, 1996). An adult male bear was recently captured on Goethe State Forest in the southern Big Bend and has exhibited a stable home range since capture and collaring in 1999 (D. Maehr, unpublished data). Wooding et al. (1992) documented the movements of an adult female to Alabama and, more recently, a subadult bear from the Eglin population moved to Alabama (M. Sunquist, University of Florida, personal communication), suggesting a dispersal linkage between northwestern Florida and southern Alabama. A relocated adult male bear recently traveled from Putnam County to Brooksville (Greater Chassahowitzka Ecosystem population) covering a straight-line distance of about 130 km through a highly fragmented and denatured landscape. Thus, the idea of a Florida black bear metapopulation is more than an armchair hypothesis.

Seasonal movements and dispersal events are the most important considerations for a connectivity approach to conserving the Florida black bear. After den emergence black bears steadily increase their activity, and their home ranges usually expand accordingly (Rogers 1987*a*). In some areas this can include complete shifts in home ranges as food availability changes and as males seek mates during the summer breeding season (Garshelis and Pelton 1981, Klenner 1987, Wooding and Hardisky 1988, Mollohan and LeCount 1989, Maehr 1997*a*). Such shifts can exceed 20 km (Maehr 1997*a*). In Minnesota, both male and female black bears moved considerable distances out of normal home ranges to utilize more abundant food resources in late summer and fall (Rogers 1987*a*). Trips of up to 83 km, with an average of 29.5 km, were recorded to reach one particular food resource, and one adult male went on a 13-week trip of 201 km, the longest movement recorded for a nondispersing bear (Rogers 1987*a*).

Dispersal refers to the movement of animals from their area of origin (Brown and Gibson 1983). In the black bear, dispersal usually occurs at 2 to 4 years of age (Pelton 1982; Rogers 1987*a,b*). Subadult females usually stay in the immediate area of their mother's home range, whereas subadult males may disperse widely either in response to "social pressure" from resident adult males (Pelton 1982) or due to socially independent factors (Rogers 1987*b*). In a sample of 51 subadults in Alaska, all males dispersed, whereas only 3% of females dispersed (Schwartz and Franzmann 1992). In Minnesota, dispersal distances ranged from 13 to 219 km, with an average of 61 km (Rogers 1987*a,b*). There was also evidence of a dispersal event over 324 km (Rogers 1987*a,b*). In north-central Florida, dispersal of 4 subadult males ranged from 22 to 56 km (Wooding and Hardisky 1988), and another subadult male moved 140 km in southwest Florida (Maehr et al. 1988). The longest known dispersal distance of a subadult female in Florida covered 60 km in southern Florida (Maehr 1997*a*).

Dispersal is an important demographic factor that plays a key role in population regulation (Kemp 1976, Bunnell and Tait 1981, LeCount 1982, Beecham 1983, Rogers 1987*b*). In Alberta, 26 adult males were removed from an experimental study area, and a large number of subadult males quickly moved in to take their territories (Kemp 1976). Other studies indicate that many transient subadult males routinely travel through occupied territories (Beecham 1983, Rogers 1987*a,b*). This ranging behavior of subadult males attempting to establish territories is a key factor in linking regional bear populations.

AMERICAN OVERSIGHT

Corridors and landscape linkages (areas that link larger core reserves) are common connectivity tools. For bears and other species, these landscape features serve at least three purposes related to connectivity: 1) facilitate daily or seasonal movements; 2) allow dispersal that might facilitate gene flow between populations, buffer small populations, or recolonize vacant areas; and 3) allow range shifts in response to catastrophic events or long-term environmental change (Noss 1993).

Functional connectivity is more likely in corridors that not only support movement, but support home ranges as well (Harrison 1992, Noss and Cooperrider 1994, Noss et al. 1996). Based on the average home range requirements for male Florida black bears, a corridor would have to be at least 13 km wide for a "square" home range or 9 km wide if the home range was twice as long as wide. Landscape linkages could be much bigger. The best regional example is the Pinhook Swamp, which connects Osceola National Forest and Okefenokee National Wildlife Refuge.

Dispersal distance is an important consideration for landscape planning or restoration. Cox et al. (1994) chose 60 km as the average effective dispersal distance for Florida black bears. This value was halved and used to identify primary and secondary habitat surrounding core areas. Based on the known performance of dispersing bears in Florida, this estimate likely underestimates their dispersal capabilities.

The most common argument by those unconvinced of the utility of a landscape connectivity approach is that there is little evidence that corridors "work" (Simberloff et al. 1992). Corridor and connectivity experiments are especially difficult (or even impossible) to conduct at scales relevant to wide-ranging species. Although more evidence is accumulating, there is still a dearth of information on corridor function (Beier and Noss 1998). Observations of animal movement across naturally and culturally fragmented landscapes, however, provide ample evidence of corridor use (Maehr 1990; Harris and Scheck 1991; Beier 1995, 1996; Noss et al. 1996). Kellyhouse (1977) and Weaver et al. (1990) found that black bears used riparian strips to move within fragmented landscapes. In agricultural landscapes, bears restricted movements to wooded areas such as ravines, shelterbelts, and riparian zones (Klenner 1987, Weaver et al. 1990). Where suitable cover was limited in a naturally fragmented landscape, bears used vegetated canyon corridors to make seasonal forays (Mollohan and LeCount 1989). Beecham (1983, 411) concluded that,

> ...migration corridors connecting the study area with other bear habitat to the north and south are critical in maintaining black bear numbers. These corridors tend to funnel dispersing subadult bears through the area, masking the influence of hunting on population size. If the migration corridors are not maintained, a significant decline in bear numbers can be expected unless hunting pressure is reduced.

A strategy that emphasizes broad landscape linkages and maintaining landscapes with low-intensity land uses will generally be more useful and successful for providing connectivity between bear populations than a system of narrow corridors. This view is supported by Noss et al. (1996), who reviewed and discussed the application of landscape conservation techniques for large carnivores.

> Collectively these data suggest that in most cases connectivity will be best provided by broad, heterogeneous linkages, not narrow, strictly defined corridors.... With these in mind, biologists have recommended the retention or restoration of wide habitat linkages between population centers for large carnivores. ...reserves play vital roles in these networks, but so does the surrounding semi-natural matrix. The regional landscape must be considered and managed as a whole. Noss et al. (1996, 958–959)

Some suggest that instead of protecting linkages and pursuing a connectivity approach, intensive management such as translocation should be used (Simberloff et al. 1992). However, this view misses the point that conservation of biological diversity transcends species and even pattern. Soule and Terborgh (1999, 200) claim that,

> Humans and nature can coexist, but peaceful coexistence cannot come about under present conditions. The revival and survival of nature across North America will require the establishment of a network of large nature reserves. Large areas managed for biodiversity are needed to ward off a host of ecological pathologies. Through conservation-oriented management of

AMERICAN OVERSIGHT

extensive core and multiple-use areas, the vital abiotic and biotic processes that sustain biodiversity can be perpetuated.

The protection of ecological and evolutionary processes such as herbivory, migration, dispersal, gene flow, and predation are just as important and are also essential components of effective biodiversity conservation. A landscape connectivity approach would be, at the very least, an important part of meeting these conservation objectives. It should be the goal of wildlife managers to conserve self-managing systems that sustain natural processes, including evolution, a notion that is as old as the Wildlife Society (Bennitt et al. 1937, Errington and Hamerstrom 1937). Translocation of animals should be avoided when landscape connectivity approaches are still possible. Highly manipulative and artificial strategies should be viewed as last resorts and not blithely accepted as equal alternatives.

Connectivity Beyond Bears

Although this is meant to be a discussion about the applicability of landscape approaches to black bear conservation, it is extremely important to note that bear corridors and landscape linkages could serve many other functions. Bear movement is only a part of a connectivity approach to conserve biodiversity through the maintenance or restoration of natural landscape patterns and processes.

First, the black bear plays a potentially significant role in ecosystem dynamics. This role may not be as important as that of top-level carnivores such as the panther or red wolf, but bears are important seed and nutrient dispersers. Studies show that black bears may improve the germination of seeds that pass through their digestive tracts (Rogers and Applegate 1983, Maehr 1984*a*). Bears may also be particularly important seed dispersers of heavier fruits that cannot be carried by birds (Rogers and Applegate 1983). Therefore, although it is extremely important to design a conservation strategy for the black bear that will protect viable populations, it may also be advisable to maintain smaller populations and facilitate movement into smaller habitat patches. In other words, reserves that do not have bears are missing a potentially important ecological component (not to mention their aesthetic value).

Riparian corridors may be an important part of a linkage system that targets bears. They also tend to have diverse flora and fauna, are highly productive, and can serve as important buffer zones to protect hydrological processes and water quality (Schaefer and Brown 1992). If wide enough, these areas can also serve as important habitat for forest interior bird species and cavity nesters (Harris 1989). Riparian strips could also serve as important habitat and corridors for otters and mink (Harris 1989).

The protection or restoration of landscape connectivity for the Florida black bear may also have important benefits for the Florida panther. Panthers have even larger habitat requirements than do bears, and it is extremely unlikely that any one core area now existing in Florida will be capable of supporting even a minimally viable population (Cox et al. 1994). However, a strategically connected reserve system might protect a viable and ecologically functional population of panthers (Harris and Gallagher 1989, Harris et al. 1996). Finally, the Florida black bear is a flagship and umbrella species that can be an important catalyst for protecting a statewide, integrated system of reserves that will benefit many native species sensitive to habitat fragmentation (Cox et al. 1994). Although managers must realize that umbrella species will never cover the habitat requirements for all species needing conservation attention (Caro and O'Doherty 1999), we tend to agree with Schoen (1990, 152) that, "It is highly probable that if we can maintain a region's capability for supporting bears, we will also have achieved the greater goal of maintaining the earth's biodiversity."

Specific Landscape Conservation Opportunities

The potential for creating an interconnected system of reserves for black bear conservation is very high. A number of active CARL projects will enhance connectivity of Florida black bear populations. The best known of these are the Wekiva River basin and Pinhook Swamp. Although both projects have already resulted in significant habitat protection, neither linkage has been completely protected.

Another linkage of significance is the Etoniah Creek-Camp Blanding landscape linkage between the Osceola-Okefenokee core area and Ocala National Forest. Etoniah Creek CARL Project is the lynchpin, which encompasses 50,000 acres (20,000 ha) between Interlachen and Palatka. In addition, St. Johns River Water Management District has been considering the purchase of land that would connect Etoniah Creek CARL Project to Camp Blanding. To complete the linkage to Osceola National Forest, a span of several miles between Camp Blanding and Raiford Wildlife Management Area (WMA) to the west would need protection. Finally, Raiford WMA is

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-005979

connected to Osceola National Forest by a private WMA (Lake Butler). To ensure protection of this area, an easement or other incentives might need to be considered. These areas show up on the maps of Cox et al. (1994) as an area of secondary habitat that links Osceola National Forest with Ocala National Forest. This proposed corridor is a large landscape linkage containing a mosaic of flatwoods, pine plantations, forested wetlands, riparian hammocks, scrub, and sandhill of over 200,000 acres (80,000 ha) that already supports a bear population. Indeed, further research may show that these areas support a single population.

There is also an opportunity to protect linkages from Ocala National Forest to southern Duval County and to northern Brevard County. This region represents an expanse of over 1 million acres (400,000 ha) of occupied and potential bear habitat (Cox et al. 1994). However, less than 10% of this area is in public ownership. Therefore, if the linkages between Ocala National Forest and this St. Johns River bear region are to be protected, the best strategy will most likely be to seek conservation easements or agreements with industrial forest companies. Such action needs to occur quickly because of development pressure from Daytona/Ormond Beach and St. Augustine. Based on present land use, it would be feasible to protect 4 larger core areas (approximately 100,000–200,000 acres [40,000–80,000 ha] each) from north to south that could be connected by corridors from 2 to 5 miles (3–8 km) in width and 5 to 10 miles (8–16 km) long, extending from southeastern Duval County to northern Brevard County. Protection of this landscape, which could be connected with corridors as noted above, may also enhance the survival probability of a small population of bears in Tosohatchee State Reserve (Cox et al. 1994). Connectivity between the Ocala population and the large habitat area east of the St. Johns River is dependent on the maintenance of two linkages across the St. Johns, which were both included in the Strategic Habitat Conservation Area recommendation for the Ocala population (Cox et al. 1994).

The panhandle and the Big Bend region provide an opportunity to enhance the Apalachicola population with linkages to other populations. Cox et al. (1994) estimated that the Big Bend supports up to 1.5 million acres (600,000 ha) of potential bear habitat. It also contains a number of state and federal coastal conservation lands that connect with Greater Chassahowitzka Ecosystem. Inland of these conservation projects is a vast landscape of pine plantations, forested wetlands, and shrub swamps associated with the headwaters of the Aucilla River, San Pedro Bay, Mallory Swamp, the Suwannee River, and Goethe State Forest. Although much of the area is intensively managed, it has very few paved roads and very low human population densities. As is suggested by the apparent growth of the Apalachicola bear population, this entire region could support a large population of bears that is distributed from Apalachicola National Forest to Goethe State Forest. Although it is likely that females will slowly colonize areas to the south, we recommend that the Florida Fish and Wildlife Conservation Commission consider the active establishment of females, as was started in Lower Suwannee National Wildlife Refuge (Wooding 1996). The presence of a radio-collared adult male in Goethe State Forest (D. Maehr, unpublished data) suggests the suitability of the region for black bears.

Goethe State Forest may be the strategic link for restoring connectivity to the small Chassahowitzka population (T. S. Hoctor, University of Florida, unpublished report). The long-term viability of the Chassahowitzka population may depend on such connectivity to a large, stable population. Although much of the land between occupied range in Greater Chassahowitzka Ecosystem and Goethe State Forest is protected, gaps and potential bottlenecks still need protection (i.e., near Homosassa and Crystal rivers, the Crystal River power plant, mouth of the Cross-Florida Barge Canal, and the Withlacoochee River). However, development in this region is rapid, and existing habitat and corridor protection efforts will have to happen in the near future. We also recommend that bear habitat managers consider restoring a bear population in Green Swamp. In a landscape analysis of bear habitat and potential connectivity in the region surrounding the Chassahowitzka core area from the Lower Suwannee River to Ocala National Forest and south to the upper Peace River, Green Swamp contained the largest areas of suitable habitat (T. S. Hoctor, University of Florida, unpublished data). Establishment of a population in Green Swamp, coupled with the protection of key corridors, might create a functional metapopulation in the Chassahowitzka region. A Green Swamp population may also serve as a key node linking the southwest Florida bear population with conspecifics to the north.

The most isolated core population of Florida black bears is in southwest Florida. The re-

AMERICAN OVERSIGHT

establishment of small populations of bears and connectivity in south-central Florida may be augmented by dispersal from this large population. The highest connectivity priority is the linkage between the Big Cypress core population and the Highlands County subpopulation. Completion of the Fisheating Creek basin conservation project (potentially as much as 180,000 acres [73,000 ha] eventually protected primarily through conservation easements, with 60,000 acres [24,000 ha] recently secured) will be an important milestone, but efforts to protect habitat between Big Cypress National Preserve and the Caloosahatchee River are also essential. Successful protection and restoration of phosphate mines in the Peace River basin could provide additional habitat and connectivity for Green Swamp.

Many of these opportunities for landscape linkages have already been identified by University of Florida as part of the Florida Greenways Project, which used a broad, landscape-based approach to identify a statewide Ecological Network (Carr et al. 1998, Hoctor et al. 2000). Although all of the above suggestions for establishing functional connectivity between various populations (or metapopulations), or even re-establishing statewide/rangewide connectivity, have real potential, in most cases a more thorough analysis needs to be conducted. This work will continue with the application of a model developed for Greater Chassahowitzka Ecosystem (T. S. Hoctor, University of Florida, unpublished data) to a connectivity simulation for Florida's entire bear population.

POPULATION VIABILITY ANALYSIS

Population viability analysis (PVA) can be a useful tool for modeling the effects of demographics, environmental variability, habitat loss, catastrophes, and genetics on the persistence of small populations (Shaffer 1990; Meffe and Carol 1997, 215; Maehr et al., in press *b*). While management decisions should not be based solely on these simulations, PVAs have become virtual prerequisites to planning for listed species.

We used Vortex Version 8.21 (Miller and Lacy 1999) to simulate various future Florida black bear population scenarios with varying degrees of habitat availability, inbreeding depression, and metapopulation interchange. Population estimates for 9 Florida black bear populations (Tables 3–11) were derived from U.S. Fish and Wildlife Service (1998*b*) and Maehr (1997*a*). In the first 3 iterations of the model each population was simulated independently from the other 8. The final variants modeled a rangewide metapopulation with genetic interchange between adjacent populations. In all variations each model was simulated for 100 years and repeated 100 times. Extinction was defined as no animals in one of either gender. Recolonization of extinct populations was allowed per metapopulation theory. Age of first reproduction was 3 years for females and males, maximum breeding age was 14 years, and the gender ratio at birth was 50:50. All models portrayed breeding as polygynous, with 50% of males in the breeding pool, and 50% of females breeding in any given year. Of those females producing litters, 25% produced 1 cub; 50%, 2 cubs; 20%, 3 cubs; and 5%, 4 cubs. Female mortality was 40% between the ages of 0 and 1 year (SD = 10%), 10% between the ages of 1 and 2 years (SD = 3%), 10% between the ages of 2 and 3 years (SD = 3%), and 5% among adults between the ages 3 and 14 years (SD = 1%). Mortality of males was 40% between the ages of 0 and 1 year (SD = 10%), 10% between the ages of 1 and 2 years (SD = 3%), 20% between the ages of 2 and 3 years (SD = 3%), and 10% among adults

3	1,200	1,480	100	0.0	0.108

between the ages of 3 and 14 years (SD = 3%). Environmental variation in reproduction and mortality was considered concordant. The first of each individual population simulation ignored inbreeding depression, the second modeled inbreeding depression with 3.14 lethal equivalents per individual, and the third modeled the same inbreeding depression value and added a 5% probability of an annual catastrophe that reduced reproduction by 50% and reduced survival by 10%. Beginning populations and carrying capacities for all simulations were Alabama, 40 and 80; Apalachicola, 400 and 800; Big Cypress Swamp, 1,000 and 1,600; Greater Chassahowitzka Ecosystem, 20 and 30; Eglin Air Force Base, 80 and 100; Green Swamp, 2 and 100; Highlands County, 50 and 90; Ocala National Forest, 400 and 600; and Osceola National Forest, 1,200 and 1,500. Environmental variation in carrying capacity was set at 5% of the total population. When habitat loss was simulated for a particular population the rate ranged from 1 to 3% per year for 20 years (Tables 12–14).

All populations that were modeled individually exhibited a high probability of surviving for 100 years, except for the colonizing population of Green Swamp (Tables 3–11). Similarly, most populations, with the exception of Green Swamp and Chassahowitzka, maintained numbers near carrying capacity. In the larger established populations that

[b]Habitat loss (carrying capacity reduction) was simulated as an annual loss of 2% per year for 20 years in Alabama and Chassahowitzka, 3% per year for 20 years in Ocala, and 1% per year for 20 years Big Cypress Swamp, Highlands County, and Green Swamp.

began with at least 40 animals and had carrying capacities of at least 80, neither inbreeding depression nor the periodic occurrence of reproductive failures and survival declines appeared to affect survival over 100 years. Smaller populations exhibited theoretical problems related to these variables. Statewide, the total population ranged from 4,737 to 4,812 after 100 years (Table 15). Such an increase over current estimates seems possible, given apparent population growth in various portions of Florida black bear range. These results may not be realistic over the long term, given ongoing loss of forest cover in parts of Florida; however, continuing land acquisition and forest recovery in some areas may offset some of these losses.

Metapopulation modeling (Fig. 1) produced similar total population results, but perhaps was more realistic because these simulations incorporated occasional exchange among adjacent populations as is supported by recent dispersal records (Maehr et al. 1988, Wooding et al. 1992), and several included habitat loss, especially in rapidly developing portions of the state. A metapopulation model that allowed interchange and included inbreeding depression, but was otherwise similar to the individual simulations, derived a final population of 4,816 (nearly identical to the sum of individual simulations) (Table 16). Further, the exchange between populations seemed to maintain population productivity where populations were already low. The addition of periodic reproductive failure and declines in survival produced a statewide population decline of about 1%. Removing inbreeding depression, eliminating periodic reproductive failure, and adding habitat loss resulted in a 15% decline in the statewide population. Returning periodic reproductive failure to the latter model created an additional 1% decline. Thus, the most influential variable in this set of simulations appears to be the trend in habitat availability. No other variable produced more than a 1% change in the final outcome of any model.

Within the metapopulation model, simulated habitat loss in areas where human populations are growing rapidly caused reductions of final population size ranging from 19% in Green Swamp, to 60% in Ocala National Forest, to 74% in Greater Chassahowitzka Ecosystem (Tables 12–14). The importance of metapopulation structure is most apparent for Chassahowitzka, where 7 simulations resulted in recolonization after a mean of 2 years following extinction (3 re-extinctions after a mean of 15 years), and for Green Swamp, where 8 recolonizations occurred after a mean of 1 year following extinction (2 re-extinctions after a mean of

Table 15. Total Florida population based on the sums of independent simulations.

Simulation	Total Population
1 No inbreeding depression; no catastrophes	4,812
2 Inbreeding depression; no catastrophes	4,790
3 Inbreeding depression; probability of annual catastrophe = 0.05	4,737

Table 16. Total Florida population based on metapopulation simulations.

Simulation	Total Population
1 Inbreeding depression; no catastrophe	4,816
2 Inbreeding depression; catastrophe	4,784
3 No inbreeding depression; habitat loss; no catastrophe	4,068
4 No inbreeding depression; habitat loss; catastrophe	4,033

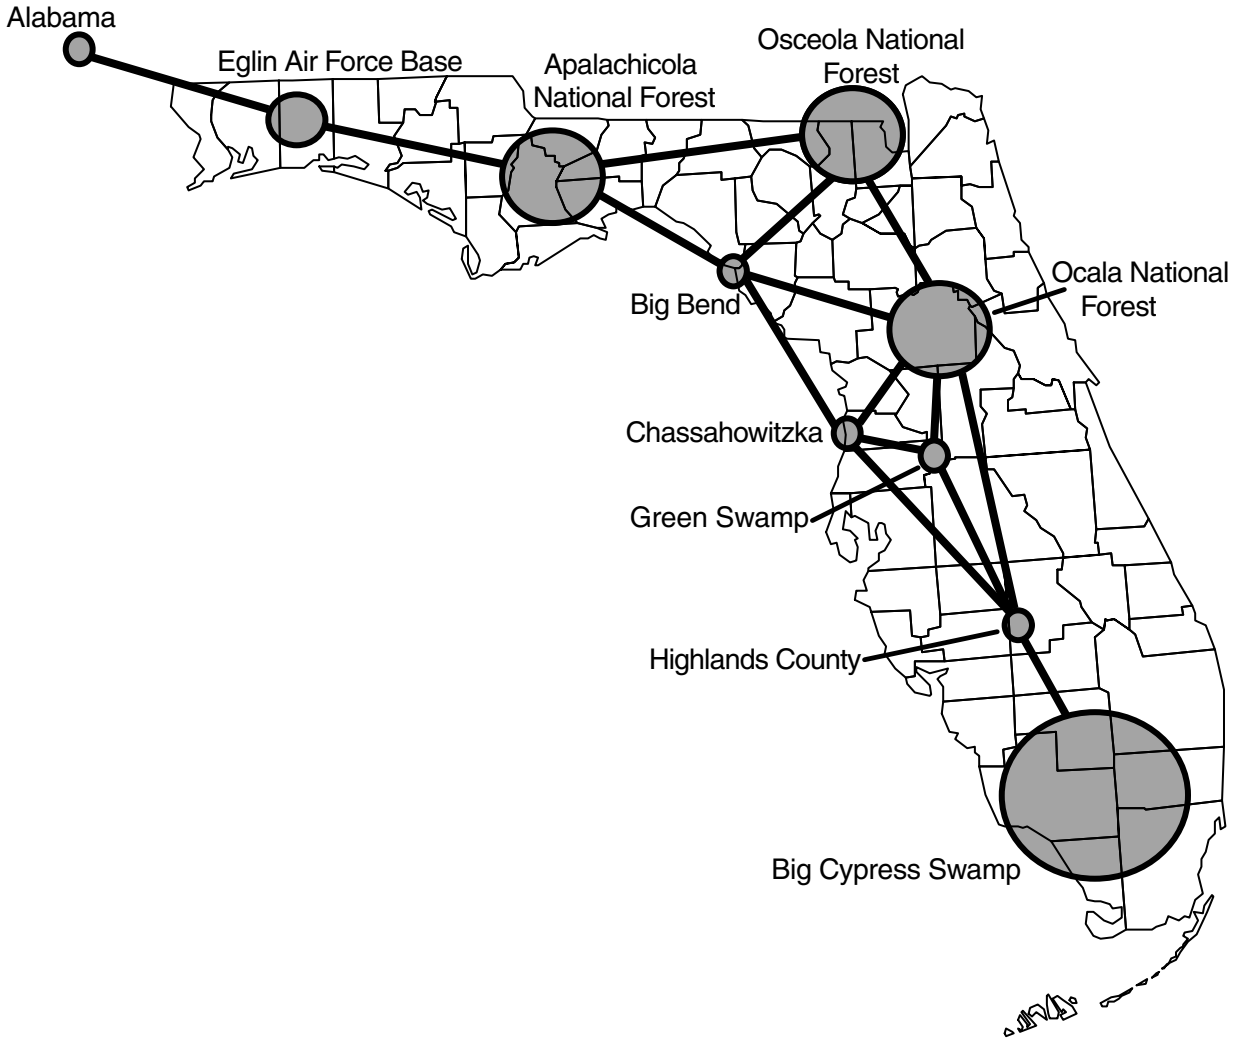

Fig. 1. Hypothetical metapopulation connections between black bear populations in Florida.

5 years). These simulations considered only the potential for natural dispersal to link areas in a metapopulation framework. Other solutions to isolation should also be considered by managers. However, these simulations are based in large measure on theoretical considerations such as the impact of inbreeding on demographics of bear populations. For example, despite clear genetic evidence that the black bear population in Chassahowitzka has been isolated for a considerable time period (M. Cunningham, FWC, personal communication), there has not been a concomitant increase in observed reproductive problems. The basic message in these analyses is that the future for individual bear populations in Florida is not absolutely clear, but that habitat loss should be the primary concern of managers. Further, whereas genetic problems do not yet appear to be a problem for the Florida black bear, these Vortex simulations may have underestimated rates of habitat loss, or they may have been too optimistic with regard to interchange among populations. If nothing else, these simulations can serve as a baseline to which future simulations can be compared as additional genetic and demographic data are collected, and as better estimates of habitat change are developed. Another model that might be instructive to investigate would be a spatially explicit simulation that links the probability of successful dispersal to landscape structure and predicts habitat loss patterns based on human population growth projections and development pressure within particular regions.

Black Bear Habitat Management Guidelines for Florida

> Until recently, habitat management for bears was really management by default. No longer is this kind of approach acceptable, however. Instead we must clearly define specific, long-term population goals, and then determine what quantity, quality, and juxtaposition of habitats within the larger landscape mosaic are necessary to meet those goals. (Schoen 1990, 150)

Schoen (1990, 152) concluded a review of the status of worldwide bear habitat management with 5 recommendations:

1. quantitatively define the biological requirements of bears;
2. develop, in cooperation with an informed public, objectives for the management and conservation of bear populations and their habitat;
3. develop models to predict the effects of human activities on bear habitat and populations;
4. develop a clear and objective public education program describing bear habitat requirements and the influence of human activities; and
5. recognize the significant impacts on bear populations throughout the world created by the economic, political, and social pressures of the 5 billion people now inhabiting the earth.

Of course the human population of Earth is now more than 6 billion—which emphasizes that bear management is increasingly the challenge of modifying human demands on nature. In a growth state like Florida, this challenge is more acute than in most parts of the black bear's fragmented range. The literature review upon which the following guidelines are based is firmly anchored in empirical studies of black bear behavior and demographics, as well as literature on landscape ecology. Thus, our efforts have addressed only two of the recommendations listed above: defining biological requirements and developing predictive models. Certainly, a strong biological foundation for an agency's management philosophy is a critical component of successful black bear conservation, but human sociological issues will ultimately determine the fate of black bears and the management programs intended to perpetuate them. Perhaps this literature review and the accompanying recommendations can serve as a starting point for an effective program that not only addresses black bear habitat needs, but also addresses the task of communicating this information to the public and developing a strong base of support for statewide management of the species. Nonetheless, several issues emerge as important considerations for managers of the Florida black bear.

Common themes that run through the reports, studies, papers, monographs, theses, and books examined in this review include the following.

1. Black bears are negatively impacted by roads.
2. Black bears require diverse habitats that are sufficiently large to satisfy seasonally changing food requirements.
3. Black bears in Florida utilize many habitats that are evolutionarily adapted to fire.
4. Fire frequency impacts the fruiting phenology and fruiting abundance of many bear food plants, including both hard and soft mast.
5. Fire season is an important determinant of subsequent flowering and fruiting performance of several important bear food plants and successional patterns of black bear habitat.
6. Improperly placed and timed fires can cause mortality to black bear cubs.
7. Saw palmetto is the most important plant to black bears in Florida.
8. Traditional silvicultural methods such as clearcutting can temporarily increase soft mast production, but intensively managed pine plantations and standard site preparation techniques eliminate cover for denning and escape, and reduce the abundance of mast-producing plants and invertebrate food resources.
9. Old-growth forest characteristics tend to offer black bears the most secure habitat conditions, especially with regard to den sites.
10. Black bears prefer tree cavities as den sites, but are capable of successful overwintering and cub-rearing if ground dens are located in dense, well-drained vegetation and are not disturbed.
11. Habitat loss is a generally accepted

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-005987

aspect of black bear distribution in Florida; however, some areas appear to be experiencing population growth.
12. Exotic plants appear to have minimal impact on black bear ecology in Florida.
13. Some exotic wildlife species are occasionally eaten by black bears, but only the coyote has the potential to compete with the black bear for food.
14. Legal harvest and poaching of black bears has the potential to reduce population numbers and constrict inhabited range.
15. Some populations may still be recovering from legal bear hunting seasons.
16. Large, interconnected forest systems are the most important landscape features that explain the presence of black bear populations.
17. The black bear is a landscape species that requires regional planning and management to effectively conserve populations.
18. Dispersing animals are critical to maintaining the genetic variability of naturally diverse, evolutionarily adaptable black bear populations.
19. The dispersal capabilities of the black bear may be sufficient to link all of Florida's subpopulations as a single, interacting metapopulation.
20. Connectivity between populations can best be maintained or enhanced by protecting wide swaths (or landscape linkages) of low-intensity, multiple-use landscapes between subpopulations. Although smaller subpopulations such as Chassahowitzka, Highlands County, northeast Florida, and southwest Alabama will be harder to conserve, especially if habitat loss continues, opportunities to maintain or restore connectivity to larger populations are still possible.
21. Black bears are an important component of Florida's native landscapes. Therefore, efforts to maintain small populations may benefit both bear conservation and ecological integrity.
22. Population viability analyses suggest that most of Florida's bear populations are relatively secure for the next 100 years, but that interconnectivity among subpopulations enhances survival probabilities.
23. Black bears will use highway underpasses designed to reduce traffic-related injury and mortality, but such wildlife crossings are not completely practical for the species.
24. Harvest-free sanctuaries appear to be useful tools in maintaining core bear populations that provide the reproduction needed to maintain regional populations.
25. Forest patches that are at least 10,000 ha seem to be minimal units of occupied black bear range.
26. All Florida black bear populations have at least a significant portion of their habitat in private ownership. In addition, all opportunities for connectivity between populations are largely dependent on private lands. Since black bear habitat requirements can be compatible with private land management, conservation easements and agreements are a viable, cost-effective option.
27. The Florida black bear is a flagship species for the conservation of Florida's native landscapes and natural heritage. In this context all populations should be considered important.

Specific Black Bear Habitat Management Guidelines for Florida

1. Because forest patch size seems to be the best predictor of black bear occupation, efforts should be made to maintain forest conditions for Florida's largest bear populations, and to increase available forest cover in the smaller, more marginal populations. Forest patches of 10,000 ha, especially if close to large occupied habitat, appear to be a rule of thumb as a minimal occupied unit. Large forest patches are better capable of withstanding harvest (legal or otherwise), fragmentation, unpredictable food availability, mast failures, and human disturbance.

2. The Florida black bear should be managed as a metapopulation. This requires that the landscape matrix between populations is managed to encourage natural interchange among subpopulations. Corridors and landscape linkages that possess characteristics of occupied home ranges (diverse forest cover, abundant food resources, dense understories for denning and escape) should be protected or restored.

AMERICAN OVERSIGHT

3. Managers should consider extending the time between prescribed fires in occupied bear range. Short fire rotations (2–3 years) in upland sites may be insufficient to allow important mast-producing species to recover peak fruiting performance (flowering does not equal fruiting). Specifically in habitats where saw palmetto—the most universally important plant in the range of the Florida black bear—is a dominant food, and where it is a featured management target, fire rotations should likely not be more frequent than 10 years. Ecosystem approaches to management on public lands may dictate prescribed fire regimes that are not always optimal for bears (i.e., some public lands include timber harvesting as a primary objective, and others are very close to urban areas). In these cases, a multiple use module (MUM) approach could be applied to create natural, heterogeneous landscapes that also provide high-quality habitat nodes, such as old-growth forest for high-quality den sites, and altered fire regimes to provide dense stands of infrequently burned saw palmetto for food and cover.

4. Palmetto fruit harvesting on public land should be completely prohibited or severely limited in occupied bear range. On the other hand, because of its economic significance, saw palmetto fruit harvesting could be used as an incentive to private landowners to maintain natural conditions that favor the black bear.

5. Prescribed fires in occupied black bear range should be avoided during the winter denning period. Summer, lightning-season fires would not only reduce the potential for causing cub mortality, but would encourage fruit production in many plant species that evolved under a regime of periodic rainy season burns.

6. Forest management in occupied black bear range, or in forests targeted for restoring bear populations, should encourage dense understory vegetation and important mast-producing plants. Intensive site-preparation generally reduces the value of an area to black bears; however, small clearcuts in a larger forest matrix may encourage production of soft mast. Clearcuts larger than 250 m in diameter may discourage bear use even if productive food supplies occur there.

7. Roads are universally detrimental to black bear populations. Wherever possible, logging roads should not only be closed to human access, but reclaimed after timber harvest. Black bear managers should encourage regional developers and highway planners to avoid new roads through black bear habitat. As a general guideline, road densities in bear habitat should preferably be below 1 mile per square mile (0.6 km/km^2).

8. Construction of new highways or intensification of existing highways within bear habitat should be avoided, especially in large blocks of habitat currently without major roads. Road projects planned in bear habitat should require very significant road-crossing and habitat mitigation. Where roads must be built through occupied black bear range, or through potential corridors and landscape linkages, pavement should be elevated to allow for unrestricted travel. Underpasses, because of their equivocal utility to black bears should be used only when other impact-mitigating measures cannot be taken.

9. Managers of black bear populations should encourage forest managers to promote old-growth characteristics in occupied black bear range in Florida. Hollow logs, cavities in large trees, and downed timber provide important winter dens for pregnant females. Such sites are usually more protected from severe flooding and from human disturbance.

10. Because of the species' inherent rarity and slow reproductive rate, hunting can easily reduce black bear densities and cause range constrictions. This fact has led to effective nuisance management in western states, and likely explains the increasing population in north Florida national forests. If hunting seasons for the Florida black bear are reconsidered, regulations should be sufficiently conservative to maintain core populations and allow continued dispersal for maintaining the statewide metapopulation.

11. Managers should develop a bear sanctuary philosophy where important core areas are managed to enhance reproduction and production of dispersing animals that link adjacent populations. Buffer zones would support multiple uses and greater human activity than would be permitted in core or sanctuary areas. Such a strategy is in keeping with black bear social structure, their response to human activity, and the principles of landscape ecology.

Amstrup, S. C., and J. Beecham. 1976. Activity patterns of radio-collared black bears in Idaho. Journal of Wildlife Management 40:340–348.
Females were more active than males in early spring and late fall in west-central Idaho. Phenological patterns of 7 key food plants appeared to govern bear movements and habitat preferences. Females occupied well-defined home ranges that remained stable from year to year and varied from 16.6 to 130.3 km^2. Overlap of home ranges was extensive. Females entered dens between 9 October and 27 November, and emerged from dens in April.

Anderson, D. R. 1997. Corridor use, feeding ecology, and habitat relationships of black bears in a fragmented landscape in Louisiana. Thesis, University of Tennessee, Knoxville, Tennessee, USA.
Telemetry locations (n = 2,417) obtained from 19 radio-collared bears (13 females, 6 males) were used to determine mean annual home-ranges (41.6 km^2 for males, 13.2 km^2 for females). Bears were located more often than expected in corridors and forested tracts and less often than expected in agricultural fields. Males do not seem to be affected as much as females by the level of fragmentation. Fifty-two percent of male tract-to-tract movements and 100% of female tract-to-tract movements were linked with a corridor. A subadult male was the first bear documented to have dispersed out of the study area and was the first bear within the Tensas River basin documented to cross Interstate 20. Seasonal and annual diets were determined from analyses of 249 scats. Agricultural crops comprised 49% of the annual diet by volume. All bears denned in bottomland hardwood habitat, mostly using ground dens. Mean litter size was 1.8 cubs.

The impact of truck traffic was studied using sound levels recorded along transects

AMERICAN OVERSIGHT

perpendicular to a logging road which bisected the home range of 2 radio-collared adult female grizzly bears. Both females were alienated from the zone of hauling activity for 14 hours per day. This area encompassed 3–23% of their home ranges. Both females returned to the zone of hauling activity when logging truck traffic was absent. The authors believe that if a survival cost is associated with avoiding the active hauling zone, grizzly bears will move into the zone and become habituated to the disturbance.

Arimond, S. R. 1979. Fruit production in black bear *Ursus americanus* habitat of northeastern Minnesota. Thesis, University of Minnesota, Duluth, Minnesota, USA.
Low-density stands (<800 trees/ha) showed significantly more total fruit production (blueberry, raspberry, and cherry) than high-density stands (1,000–2,100 trees/ha). Wild sasparilla was more productive in high-density stands, while hazelnut production showed no significant relationship to tree density. Stands with low tree-density constitute a critical component of favorable black bear habitat in Minnesota. Manipulation of tree density to less than 800 trees per hectare creates potentially favorable bear habitat. However, managing for fruit production satisfies only one critical habitat requirement.

Beck, T. D .I. 1991. Black bears of west-central Colorado. Technical Publication No. 39. Colorado Division of Wildlife, Fort Collins, Colorado, USA.
Past hunting pressure created long-lasting demographic effects on this population. Human-caused mortality was the leading cause of death. Mast failures resulted in reduced cub production the following spring.

Beckwith, S .L. 1957. Purple squirrels. Florida Wildlife 11(5):18–20.
Beckwith suggested that acorns preferred by wildlife in Florida are of the wide oak group including live oak and bluejack oak.

Beecham, J. J. 1983. Population characteristics of black bears in west central Idaho. Journal of Wildlife Management 47:405–412.

Beecham, J. J., D. G. Reynolds, and M. G. Hornocker. 1983. Black bear denning activities and den characteristics in west-central Idaho. International Conference on Bear Research and Management 5:79–86.
Den entry and emergence varied among bears and years, and the denning season extended from mid-October through mid-April. Forty-seven of 65 dens were ground dens excavated into a hillside or under the base of a tree, stump, or shrub. Thirteen of 65 dens were located in the base of hollow trees and 5 were in hollow logs or rock cavities. Bears denned at various elevations, slopes, and aspects, and under a variety of canopies. Four instances of den reuse were observed. Concealment was important for bears denning at mid- to low elevations. Protection from exposure to inclement conditions appeared important. In areas where soil conditions are not suitable for excavation, black bears may depend on old-growth timber stands for denning sites.

Beecham, J. J., and J. Rohlman. 1994. A shadow in the forest: Idaho's black bear. University of Idaho Press, Moscow, Idaho, USA.
This book summarizes the results of the Idaho Department of Fish and Game's biological data collected for the development of a comprehensive management program for black bears in 6 geographically separate populations. Timber was the most frequently used

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-005991

habitat on the Council study area. Priest Lake bears preferred more diverse habitats created by selection-cut logging and wildfires, with timber areas being second in preference. Bears avoided clearcuts and roads. The authors recommended that forest managers use logging techniques that minimize soil disturbance. Hunting pressure can affect population age structures, with adult males particularly vulnerable. Habitat quality and quantity were important factors controlling population size because they influenced bear reproduction. Forty-five of 56 dens were ground dens dug into a hillside or under the base of a tree, stump, or fallen tree, and 11 were tree dens. Tree dens were found at higher elevations than ground dens, possibly because preferred tree species were found at higher elevations. Dens at lower elevations were located within dense vegetation. Most bears preferred secure areas for denning.

Beier, P. 1995. Dispersal of juvenile cougars in fragmented habitat. Journal of Wildlife Management 59:228–237.
This study in southern California found that cougars in a small population were willing to use explicit, low-quality corridors to get to larger habitat blocks. Guidelines include minimizing nighttime lighting, which seem to negatively affect the ability of cougars to move through potential low-quality corridors.

Beier, P. 1996. Metapopulation models, tenacious tracking, and cougar conservation. Pages 293–323 *in* D. R. McCullough, editor. Metapopulations and wildlife conservation. Island Press, Washington, D.C., USA.
Beier presents an integrated account of all the research on a small cougar population in southern California. The study demonstrated the importance of habitat connectivity for maintaining small populations of cougars in the region. It also outlines the difficulties of maintaining corridors in the face of intense development pressure, and the importance of assuming that connectivity is significant for maintaining populations.

Beier, P., and R. F. Noss. 1998. Do habitat corridors provide connectivity? Conservation Biology 12:1241–1252.
Beier and Noss review much of the literature on experiments to test whether habitat corridors facilitate movement of focal species. They argue that small-scale experiments with experimental nontarget organisms are not very relevant to conservation decisions. Well-designed, observation-based studies can be very useful to demonstrate the importance of corridors for connectivity. Real, natural landscapes tend to be connected, therefore a connectivity approach is the opposite of fragmentation and should be considered desirable unless proven otherwise.

Bennitt, R., J. S. Dixon, V. H. Cahalane, W. W. Chase, and W. L. McAtee. 1937. Statement of policy. Journal of Wildlife Management 1:1–2.

Beringer, J. J., S. G. Seibert, and M. R. Pelton. 1990. Incidence of road crossing by black bears on Pisgah National Forest, North Carolina. International Conference on Bear Research and Management 8:85–92.
This study related the number of times bears crossed roads to the road density within their home range and to the traffic volume associated with the roads. Bears strongly avoided roads with traffic volumes of 10,000+ vehicles per day, and avoided the roads more as road density within home ranges increased. Bears crossed roads with high traffic volumes significantly less often than they crossed roads with traffic volumes less than 100 vehicles per day. Bears crossed roads more frequently during daylight hours than at night. Management implications include the following: high traffic volumes impede bear movements; accessibility that roads provide to hunters may be detrimental to bear populations; impact on the local bear population should be considered before constructing new roads in bear habitat; unused roads should be closed permanently to reduce hunter access and illegal hunting; other roads should be gated and locked.

AMERICAN OVERSIGHT

Beringer, J., S. G. Seibert, S. Reagan, A. J. Brody, M. R. Pelton, and L. D. Vangilder. 1998. The influence of a small sanctuary on survival rates of black bears in North Carolina. Journal of Wildlife Management 62:727–734.
Hunting-free areas appear to be effective in protecting adult female black bears and promoting reproduction that is need to repopulate adjacent areas where bear hunting occurs. Males that dispersed from sanctuary natal ranges were usually killed. Threats to females using sanctuaries are primarily related to logging and road construction.

Brady, J. R. 1985. Black bear habitat studies. Annual Performance Report. Florida Game and Fresh Water Fish Commission, Tallahassee, Florida, USA.
Two years of intensive trapping in Osceola National Forest produced 6 captures of black bears. Although forest management did not appear to reduce food availability, there was no speculation about the role of hunting on this population. "Big Gum Swamp, a large forested wetland dominated by swamp tupelo *(Nyssa biflora)* was a common feature in 5 of 6 home ranges. The swamp provided escape cover during the hunting season for 5 bears, fall food for 4 bears and winter den cover for 2 bears. Bears not using Big Gum Swamp at these times utilized similar areas nearby."

Brady, J. R., and D. S. Maehr. 1985. Distribution of black bears in Florida. Florida Field Naturalist 13:1–7.
The black bear exhibits a patchy distribution in Florida, but is still found in 50 of 67 counties. The species was once widespread throughout the state, and even occurred in the Florida Keys.

Clark, J. D., J. E. Dunn, and K. G. Smith. 1993. A multivariate model of female black bear habitat use for a geographic information system. Journal of Wildlife Management 57:519–526.
Female black bears used areas within 240 m of roads and >600 m from streams less than expected in the Ozark Mountains of Arkansas.

Clevenger, A. P. 1986. Habitat and space utilization of black bears in Cherokee National Forest, Tennessee. Thesis, University of Tennessee, Knoxville, Tennessee, USA.
Bears used habitat in a fashion typical of the southern Appalachians. Increases in male home ranges were attributed to hunting activities in the national forest. Illegal hunting of this population is exacerbated by easy access into the forest. A nearby sanctuary appeared beneficial to the local bear population.

Dusi, J. L., and D. T. King. 1990. The black bear in southwestern Alabama. Journal of the Alabama Academy of Science 61:41–49.
Study objectives were to determine the feasibility of delineating ecological characteristics of a low density black bear population. Three areas were looked at: black bear movement ecology in Alabama, black bear population density and distribution, and optimal black bear habitat requirements. The study determined that titi swamps were the most critical habitat. Management suggestions included protection of remaining choice habitat; exclusion of bears from areas where they are causing damage (bee yards, gardens, field crops); removal of the cause of the trouble rather than the nuisance bear; and production of an intensive educational program about bears and other wildlife.

Forman, R. T. T. 1987. The ethics of isolation, the spread of disturbance, and landscape ecology. Pages 213–229 *in* M. G. Turner, editor. Landscape heterogeneity and disturbance. Springer-Verlag, New York, New York, USA.
The author outlines some of the significant emerging principles of landscape ecology. He also recommends adoption of the ethics of isolation in land use and conservation planning: "Simply stated, in land use decisions and actions, it is unethical to evaluate an area in isolation from its surrounding or from its development over time. Ethics impel us to consider an area in its broadest spatial and temporal perspectives."

Forman, R. T. T. 1995. Land mosaics: the ecology of landscapes and regions. Cambridge University Press, Cambridge, U.K.
This book is a broad review of the principles of landscape ecology and the relevant literature. It is an excellent source for the principles undergirding the importance of connectivity and landscape-level approaches to conservation.

Foster, M. L. 1992. Effectiveness of wildlife crossings in reducing animal/auto collisions on Interstate 75, Big Cypress Swamp, Florida. Thesis, University of Florida, Gainesville, Florida, USA.
In addition to radio telemetry on 26 bobcats, Foster monitored 4 wildlife crossings with infrared game counters and cameras for periods of 2–16 months. Certain species seem to favor using certain crossings and different species used the crossings at different times of day. Most species exhibited seasonal peaks in the frequencies of crossings. The level and frequency of use of a crossing varied according to the location and configuration of home ranges and movement patterns and density of individuals in the area. Most successful applications of wildlife underpasses have identified wildlife trails and placed crossing structures in or near these traditional paths. The underpass should provide animals with an unobstructed view of the habitat or horizon on the far side of the underpass. Medians should be open rather than covered.

Fuller, T. K., and L. B. Keith. 1980. Summer ranges, cover-type use, and denning of black bears near Fort McMurray, Alberta. Canadian Field Naturalist 94:80–83.
Adult females without cubs occupied average areas of 7.5 km^2. Dens were excavated on level ground in stands of mixed aspen and birch, which were likely excavated in previous years. All females denned on or near the periphery of the ranges they occupied during the summer. The proportion of bears excavating dens is correlated with decreasing winter temperatures and the need for increased insulation.

Gunther, K. A. 1990. Visitor impact on grizzly bear activity in Pelican Valley, Yellowstone National Park. International Conference on Bear Research and Management 8:73–78.
Gunther used visual observations to determine if human recreational activity affected grizzly bear use of open meadow areas. When the valley was open to visitors, bear activity in areas greater than 500 m from forest cover was significantly reduced and bears avoided areas around occupied back-country campsites. No differences in diurnal hourly activity patterns were observed among open, restricted, and closed periods. Foot parties were more likely to be charged by a grizzly than people on horseback. All incidences in which hikers were charged by bears involved groups of one or two people. Restricting public use during peak grizzly activity time-periods prevents human-caused displacement of bears from productive open habitats, as well as allows

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-005997

recreational use and limits opportunities for bear/human encounters. Subadults and females with cubs of the year are more day-active and therefore more vulnerable to disturbance by recreational activity.

Harris, L. D. 1980. Forest and wildlife dynamics in the Southeast. Transactions of the North American Wildlife and Natural Resources Conference 45:307–322.
High regional human population growth and increased agriculture and rangeland are exerting severe pressure on southeastern forest lands. There is a trend of annual loss of forest acreage with the remaining forest being managed more intensively. Loss of former within-stand habitat diversity must be compensated for by between-stand heterogeneity. Planning for wildlife should be an integral part of current reforestation decisions if forests of the future are to be of maximum value to wildlife. Attention should be focused on the role of forest habitats during winter months, when resident wildlife remain more active than northern counterparts and migrants become abundant. Management should focus on time-space interactions in order to ensure habitat quality throughout the year.

Harris, L. D. 1984. The fragmented forest. University of Chicago Press, Chicago, Illinois, USA.
This classic work was one of the first to point out the dangers of increasing artificial patchiness in North America's forests. Wide-ranging forest species, such as bears and panthers, are especially vulnerable to these influences. Among other recommendations, the author stresses the need to manage forests in a mosaic that maintains old-growth conditions for interior-sensitive wildlife.

Harris, L. D. 1989. The faunal significance of fragmentation of southeastern bottomland

Harris, L. D., and J. G. Gosselink. 1990. Cumulative impacts of bottomland hardwood forest conversion on hydrology, water quality, and terrestrial wildlife. Pages 259–322 *in* J. G. Gosselink, L. C. Lee, and T. A. Muir, editors. Ecological processes and cumulative impacts: illustrated by bottomland hardwood wetland ecosystems. Lewis Publishers, Chelsea, Michigan, USA.
Forest loss at local sites may have only a moderate impact on the natural services of bottomland hardwood ecosystems. The cumulative impact of small conversion actions may be significant and include less-frequent flooding during normal weather conditions and higher downstream stages with increasingly unstable streams during severe floods. As watersheds are cleared, erosion increases and streamwater quality decreases. Bottomland hardwood forest loss is first felt by individual species, which suffer abnormalities in reproduction, range restriction, and loss of genetic heterogeneity. Black bears will frequently be among the first that are lost. As the cumulative stress level increases and the whole ecosystem is modified, trophic webs become simplified, biotic community composition and structure are modified, and native species are lost due to invasion by exotic species, parasites, and diseases. The ecosystem collapses and is transformed, with resulting extinctions of native species and depletion of migrant bird populations.

Harris, L. D., T. Hoctor, D. S. Maehr, and J. Sanderson. 1996. The role of networks and corridors in enhancing the value and protection of parks and equivalent areas. Pages 173–197 *in* R. G. Wright, editor. National parks and protected areas. Blackwell Science, Cambridge, Massachusetts, USA.
The authors suggest that the traditional park paradigm for conserving biodiversity is insufficient, particularly from the perspective of wide-ranging wildlife species and long-term ecosystem change. A landscape approach must be embraced that allows not only movement of individuals and populations over space and time, but that allows entire biotic communities to shift with changing climatic conditions.

Harris, L. D., and J. Scheck. 1991. From implications to applications: the dispersal corridor approach to the conservation of biological diversity. Pages 189–220 *in* D. A. Saunders and R. J. Hobbs, editors. Nature conservation 2: the role of corridors. Surrey Beatty and Sons, Chipping Norton, New South Wales, Australia.
This book chapter reviews and explores the application of the corridor concept to the conservation of biological diversity. There are examples of corridors being used in wildlife conservation across the globe and even early in the twentieth century and before. Applications range from using small linear features such as hedgerows to maintain some forest species in predominantly agricultural landscapes, to protecting riparian forests to maintain connectivity in timber plantations, to broader corridors and landscape linkages facilitating regional connectivity.

on north Florida wildlife and habitat. Proceedings of the Annual Conference of the Southeastern Association of Fish and Wildlife Agencies 28:659–667.
Bird and small mammal abundance and diversity were much greater in mature longleaf pine forests than in nine-year-old slash pine and other mature natural stands. Low-intensity preparation of sites generally resulted in greater numbers of birds and small mammals than the high-intensity plots. In general, high-intensity silvicultural practices reduce biodiversity in Florida pine forests.

Harrison, R. L. 1992. Toward a theory of inter-refuge corridor design. Conservation Biology 6:293–295.
The author argues that corridors may be most effective when they can incorporate habitat that will support individuals of the target species and assesses how wide corridors might need to be to incorporate home ranges of selected large carnivores.

Hellgren, E. C. 1988. Ecology and physiology of a black bear population in the Great Dismal Swamp and reproductive physiology in the captive female black bear. Dissertation, Virginia Polytechnic Institution and State University, Blacksburg, Virginia, USA.

Hellgren, E. C., and D. S. Maehr. 1992. Habitat fragmentation and black bears in the eastern United States. Proceedings of the Eastern Black Bear Workshop on Management and Research 11:154–165.
Habitat fragmentation impacts several biological factors, including reductions in distribution, habitat population size, potential effects on genetic diversity, demographics, range dynamics, and dispersal. Internal habitat fragmentation by roads is of particular interest to managers of hunted black bear populations. Low-density populations and slow rates of population growth increase the susceptibility of bears to local extinctions by making them more vulnerable to stochastic demographic or genetic effects or environmental variation. However, black bears have considerable dispersal abilities, are ecological generalists, do not have highly fluctuating populations, are long-lived, and can exploit modified habitats, which partially mitigates the effects of habitat fragmentation. The dispersal abilities of bears can naturally overcome most geographic barriers to periodically augment many fragmented populations. Fragmented bear populations may become vulnerable to changes in habitat productivity due to climate change. If habitat conditions change, then population dynamics can change. Population models need to include habitat projections if they are to be applicable. Management of human access and activity is paramount for bear populations in fragmented and fissured landscapes.

Hellgren, E. C., and M. R. Vaughn. 1988. Seasonal food habits of black bears in Great Dismal Swamp, Virginia-North Carolina. Proceedings of the Annual Conference of the Southeastern Association of Fish and Wildlife Agencies 42:295–305.

Hellgren, E. C., and M. R. Vaughan. 1989. Denning ecology of black bears in a southeastern wetland. Journal of Wildlife Management 53:347–353.
Den types included 14 ground nests, 11 excavated ground cavities, 2 ground-level tree cavities, 1 above-ground-level tree cavity, and 1 stump den. Tree den availability was not estimated, although 25% of the study area appeared to contain potential tree dens. Denning was 11–48 days shorter on average than in other regions with mild winter climates. The authors concluded that large den trees may not be necessary for successful denning and reproduction in certain southeastern wetlands because bears can use dense cover and microelevational factors to overwinter. Flooding and human disturbance may be stronger forces affecting den site selection than energetics in regions that have very mild winter climates. Timber harvest probably would decrease the number of available tree dens, but may not seriously affect overall den availability. Hollow trees with diameters >1 m should be left standing. Also, denning chronology of adult females with newborn cubs should be

AMERICAN OVERSIGHT

considered before winter burns are planned. Den availability is not a problem in southeastern wetlands if bears are provided with habitat patches large enough to offer seclusion from human disturbance.

Heyward, F. 1939. The relation of fire to stand composition of longleaf pine forests. Ecology 20:287–304.

Hillman, L. L., and D. L. Yow. 1986. Timber management for black bear. Eastern Workshop on Black Bear Management and Research 8:125–134.
The authors suggested that black bears need freedom from constant human access, diversity, hard mast, soft mast and forage, dens, and key areas. They suggested that black bears should be relatively easy to incorporate into forest management plans because the species has such generalized habitat requirements and adapts well to varying habitat conditions. They also suggested that connectivity, with "travelways," was important among forest patches.

Hilmon, J. B. 1969. Autecology of saw palmetto (*Serenoa repens* (Batr.) Small). Dissertation, Duke University, Durham, North Carolina, USA.
In this examination of methods to control saw palmetto, Hilmon discovered that this extremely important black bear food plant does not recover its fruiting potential until 6–9 years after a fire. Given the generally short fire rotation prescription on many upland forests in Florida, saw palmetto fruit production may be artificially reduced throughout the state.

Jonkel, C. J., and I. M. Cowan. 1971. The black bear in the spruce-fir forest. Wildlife Monographs 27:1–55.
The *Picea-Abies/Pachistima* association was important during all seasons. Clearcut logged areas were avoided. Home ranges were very small compared to those in other regions. Bears den 1.5 months longer than in other regions due to severe winters. Territorial behavior is strongly indicated. Cub survival was high from 0.5 to 1.5 years of age, but the young then rapidly disappear from the population through death and dispersal.

Kasworm, W. F., and T. L. Manley. 1990. Road and trail influences on grizzly bears and black bears in northwest Montana. International Conference on Bear Research and Management 8:79–84.
The study examined 3 grizzly bears and 26 black bears to determine the effects of roads and trails on seasonal habitat use patterns. Grizzly bears avoided habitat within 914 m of open roads and black bears avoided habitat within 274 m of open roads. Trails displaced both species less than open roads; road closures are suggested as a tool for bear habitat management. Grizzly bear avoidance of high-quality habitat near roads and trails may lessen the opportunity for individuals to obtain food and increase intraspecific competition by further forcing bears into limited remote habitat. Black bear tolerance of disturbance may provide an opportunity for black bears to exploit habitat in the relative absence of grizzly bears.

Kautz, R. S. 1984. Criteria for evaluating impacts of development on wildlife habitats. Proceedings of the Annual Conference of the Southeastern Association of Fish and Wildlife Agencies 38:121–136.
Factors that influence biotic diversity on a site include habitat type, successional stage, habitat island size, presence or absence of connecting corridors, edge effects, interspersion of habitat types, and presence of snags and fallen logs.

Kendall, K. C. 1983. Use of pine nuts by black and grizzly bears in the Yellowstone area. International Conference on Bear Research and Management 5:166–173.
Spring use of pine nuts appeared to be correlated with cone production in the preceding year, while fall use was correlated with the current crop. Most of the nuts eaten by bears came from cones cached by red squirrels. Pine nuts were a nutritious food which was often present in early spring and late fall, when alternate foods were scarce or low in digestible energy and when nutritional requirements of bears were high.

Klenner, W. 1987. Seasonal movements and home range utilization patterns of the black bear, *Ursus americanus*, in western Manitoba. Canadian Field-Naturalist. 101:558–568.
Subadult males had greater home range (506.4 km^2) than subadult (35.2 km^2) or adult females (29.1 km^2). Males used larger seasonal ranges than females and showed much greater variability in utilization patterns. Adult and subadult females showed up to 100% overlap of their home range, indicating that the overlap was both spatial and temporal. Movements in agricultural zones were restricted primarily to wooded areas, ravines, and shelter belts. High mortality and population rates were observed. Klenner recommends a program of preventative measures aimed at protecting apiaries and livestock, along with selective

AMERICAN OVERSIGHT

removal of problem animals for management and control of depredations by bears in agriculture-forest ecotones, rather than removing or destroying animals at the site of damage. "The removal of resident animals will likely be offset by the recruitment of animals through reproduction by remaining residents and the immigration of bears from adjacent areas."

Knight, H. A., and J. P. McClure. 1971. Florida's timber, 1970. U.S. Department of Agriculture Forest Service, Southeastern Forest Experiment Station Research Bulletin 20.

Kolenosky, G. B. 1986. Effects of hunting on an Ontario black bear population. International Conference on Bear Research and Management 6:45–55.
Hunting reduced population size and lowered the mean age of captured males. Delayed maturation in Ontario black bears and increased vulnerability of females with increased hunting pressure suggest the need for conservative harvest strategies.

Kolenosky, G. G. 1990. Reproductive biology of black bears in east-central Ontario. International Conference on Bear Research and Management 8:385–392.

Kolenosky, G. B., and S. M. Strathearn. 1987. Winter denning of black bears in east-central Ontario. International Conference on Bear Research and Management 7:305–316.
The authors examined 110 dens of black bears in east-central Ontario. Den entrance order was yearlings, pregnant females, solitary females, females with cubs, adult males, and subadults of both sexes. Eighty-nine percent of dens were excavations below ground-level and 84% occurred on well-drained upland sites. Suitable tree dens were scarce in the study area. Smaller dens were energetically more efficient than larger dens. Most dens were only large enough to accommodate the occupants. Den location may be related to social status of the individual. Young bears exhibited greater alertness and abandoned dens more frequently. There was no indication of den reuse. Bears that fed on acorns denned later than those that did not. Males emerged from dens first, females with cubs emerged from dens last. The study recommended closing spring bear hunt season earlier to protect females with cubs.

Land, E. D. 1994. Southwest Florida black bear habitat use, distribution, movements, and conservation strategy. Final Report. Florida Game and Fresh Water Fish Commission, Tallahassee, Florida, USA.
Habitat use and activity data from 60 radio-instrumented black bears were analyzed. Cabbage palm fruit, Brazilian pepper fruit, ants, and aquatic emergent vegetation were important bear foods in southwest Florida. Average litter size was 1.8. Average annual home range sizes were 57 km^2 for adult females and 303 km^2 for adult males. Poaching and roadkills were responsible for 80% of all mortalities.

Lande, R. 1995. Mutation and conservation. Conservation Biology 9:782–791.
This paper suggests that a population will often have to be much bigger (approximately an order of magnitude larger) than Franklin's (1980) recommendation of an effective population of 500 to maintain genetic diversity and evolutionary potential.

Landers, J. L., R. J. Hamilton, A. S. Johnson, and R. L. Marchinton. 1979. Foods and habitat of black

Lindzey, F. G., K. R. Barber, R. D. Peters, and E. C. Meslow. 1986. Responses of a black bear population to a changing environment. International Conference on Bear Research and Management 6:57–63.
Varying levels of food abundance caused by normal succession in the vegetative communities of clear-cut areas caused changes to the local bear population. Changes in black bear population size corresponded to changes in food resources. Variations in levels of production, cub survival, recruitment, dispersal of progeny and adults, and conspecific aggression within the population facilitated both growth and decline. Poor nutrition led to termination of pregnancy or the death of

AMERICAN OVERSIGHT

cubs shortly after birth as well as loss of entire litters after leaving the den. Adults (male and female) emigrated from the island. The authors expected the bear population to continue to decline until the island was logged again, providing greater food resources.

Lindzey, F. G., and E. C. Meslow. 1976. Characteristics of black bear dens on Long Island. Northwest Science 50:36–42.

Lindzey, F. G., and E. C. Meslow. 1977. Home range and habitat use by black bears in southwestern Washington. Journal of Wildlife Management 41:413–425.
Average home range for adult males was 505 ha and for adult females was 235 ha—smaller than home range estimates for bears in other regions of the United States. Richness of habitat presumably allowed the smaller home ranges. Home ranges did not appear to be physically confined by the size of the island. Population density did not affect home range size. Home ranges of sex and age groups overlapped with use of shared areas apparently determined by a social hierarchy. Bears apparently selected areas logged since 1963 over areas logged before 1935. This may be due to availability of soft mast, as fruit-producing shrubs were 7 to 8 times more abundant in recently logged areas. The relationship between bears and clearcuts, based principally on food availability, should be recognized in the formulation of timber management programs that include clearcutting and in the formulation of management plans for the black bear.

Loope, L. L., and N. H. Urban. 1980. A survey of fire history and impact in tropical hardwood hammocks in the east Everglades and adjacent portions of Everglades National Park. Report T-592. National Park Service, Homestead, Florida, USA.
Burning in subtropical hammocks severely reduces plant diversity. However, diversity increases with hammock recovery and maturation of a period of several decades. The exotic species melaleuca and Brazilian pepper are encouraged by fire.

Lotz, M. A., E. D. Land, and K. G. Johnson. 1997. Evaluation and use of precast wildlife crossings by Florida wildlife. Proceedings of the Annual Conference of the Southeastern Association of Fish and Wildlife Agencies 51:311–318.
Bear use of wildlife underpasses was much lower (order of magnitude) than that exhibited by the Florida panther, when, in fact, it should have been an order of magnitude higher, given the relative difference in population densities.

Lyon, L. J. 1983. Road density models describing habitat effectiveness for elk. Journal of Forestry 81:592–595.

Mack, J. A. 1990. Black bear dens in the Beartooth Face, south-central Montana. International Conference on Bear Research and Management 8:273–277.
Dens (n = 33) were located on steep slopes at high elevations. Most dens were associated with rock structures. Excavated dens made up 71% of the total. Most bears entered dens between 8 October and 15 October. Twenty percent of radio-collared bears abandoned den sites and relocated to new dens during the two years of study. Security of dens appeared to be important.

Maehr, D. S. 1984*a*. The black bear as a seed disperser in Florida. Florida Field Naturalist 12:40–42.
The black bear in Florida, as elsewhere in its range, provides an important ecosystem function as a seed scarifier and disseminator. Germination of cabbage palm seeds, red bay seeds, and Brazilian pepper seeds were documented. Black bears may distribute more seeds farther than do other mammals because of larger scat volume and potentially extensive daily movements.

Maehr, D. S. 1984*b*. Distribution of black bears in eastern North America. Eastern Workshop on Black Bear Management and Research 7:74.
The original distribution of the black bear in eastern North America was continuous

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006005

and extensive throughout all forested landscapes. Today, the range of the species is very patchy and reflects human development throughout this part of the continent. The map of the modern distribution of black bears in eastern North America was based on a survey of black bear biologists and other qualified persons. Black bears have been extirpated from approximately half of their historic range in the east. The isolation of once-interacting black bear populations may have significant negative impacts on the species. The area of greatest concern appears to be all of the southeastern United States.

Maehr, D. S. 1990. The Florida panther and private lands. Conservation Biology 4:167–170.

Maehr, D. S. 1994. Sustainable development and black bears. Eastern Workshop on Black Bear Management and Research 12:144–147.
Eastern states exhibit a variety of population objectives for the black bear: increase, stability, and decrease. This summary of this workshop discussion raised several questions that need to be addressed in eastern North America. 1) What is a viable population? 2) Is there an area threshold below which black bears disappear? 3) How does habitat quality influence population viability and area requirements? 4) What level of human activity is compatible with bears? 5) How do preserve design and corridors influence bear sustainability? 6) What do we need to know about genetics to properly manage bears? 7) How does poaching affect bear sustainability?

Maehr, D. S. 1996. The comparative ecology of bobcat, black bear and Florida panther in south Florida. Dissertation, University of Florida, Gainesville, Florida, USA.
Similar to Maehr (1997*a*), but includes an appendix that compares black bear mass growth in south Florida with a Mexican bear population at similar latitude. Florida black bears tended to grow faster and reach adult size sooner than conspecifics in Mexico. This is likely due to warmer temperatures, more soil moisture, and a longer growing season in Florida. Such conditions may enhance potential productivity of the bear population.

Maehr, D. S. 1997*a*. The comparative ecology of bobcat, black bear, and Florida panther in south Florida. Bulletin of the Florida Museum of Natural History 40:1–176.
Dietary comparisons indicated low overlap among black bear, bobcat, and Florida panther. Coyotes exhibited a food resource overlap of 0.38 with panthers, 0.43 with black bears, and 0.64 with bobcats. Such high levels of dietary overlap may have negative consequences on large native carnivores. Seasonally changing habitat requirements that compel extensive movements make bears vulnerable to changes in outlying portions of their range. Restricted nutritional opportunities caused by coyote competition may reduce overall bear numbers, but not to the point where black bear persistence will be in jeopardy. Conservation of these species involves the management of landscapes. If meeting the needs of one landscape-level species satisfies the need of the others, then conservation dollars can be more efficiently distributed. Large preserve size is, in and of itself, insufficient for the conservation of large carnivores. Successful conservation of large carnivores depends on lands that are not owned by the public. Corridors between large preserves are used when they are available. Large carnivores use corridors for seasonal movements, dispersal, and protection from anthropogenic disturbances. Planning for wide-ranging species must go beyond the traditional approach of static-boundary nature preserves.

Maehr, D. S. 1997*b*. The Florida panther: life and death of a vanishing carnivore. Island Press, Covelo, California, USA.
Maehr mentions the black bear as the largest cavity nester in Florida.

Maehr, D. S., and J. R. Brady. 1982*a*. Fall food habits of black bears in Baker and Columbia counties, Florida. Proceedings of the Annual Conference of the Southeastern Association of Fish and Wildlife Agencies 36:565–570.
The authors examined the stomachs of 36 hunter-harvested black bears. Saw palmetto was the most important item in the diet. Other important foods included black gum, gallberry, yellow jackets, and armadillo. Findings support the claim that

AMERICAN OVERSIGHT

black bears in Florida require a mixture of habitats for their survival. The practice of winter burning may have artificially increased the importance of saw palmetto to bears. The effects of burning on black bear foods and food preferences should be investigated further to outline procedures for restoring bear habitats to their apparent historic productivity. A diverse autumn food supply in Osceola National Forest would reduce the possible deleterious impacts of a saw palmetto mast failure. Substantial differences in food habits between Baker and Columbia counties and Ocala National Forest were noted. The authors suggested the initiation of food habits studies throughout Florida to pinpoint habitats essential to the production of preferred or heavily utilized food sources. This information would allow important food-producing habitats to be acquired or otherwise protected and managed to benefit local black bear populations.

Maehr, D. S., and Brady, J. R. 1982*b*. Florida black bear-beekeeper conflict: 1981 beekeeper survey. American Bee Journal 122:372–375.
Annual losses from black bear depredations on apiaries were estimated at $100,000. The majority of the state experienced a peak in bear depredations in May; south Florida did not experience an annual peak. Electric fences were the preferred method of protection. The cost of an electric fence and regular maintenance is much less than the losses sustained by an unprotected apiary. Electric fences should be required in bear habitat before responses to nuisance complaints are made by Florida Fish and Wildlife Conservation Commission personnel. Differing seasonal rates of depredation should indicate when special attention should be given to apiary protection (March–July in central and north Florida, year-round in south Florida). Brochures should be created to disseminate information to Florida beekeepers.

Maehr, D. S., and J. R. Brady. 1984*a*. Food habits of Florida black bears. Journal of Wildlife Management 48:230–235.
The dominance of plant foods in the diets of black bears in Florida is consistent with studies from other locations. The food items appearing most often and in the greatest volume and frequencies were seasonally available fruits and colonial insects. Because many of the habitats used by bears in Florida produce food throughout the year, substantial shifts in habitat use were not apparent. The use of plants by bears in Florida changes from mostly herbaceous matter in spring to soft mast in summer and hard mast during fall. Spring foods were dominated by cabbage palm hearts, early growths of alligator flag, and saw palmetto hearts. Summer foods were dominated by blueberries, berries of inkberry holly, raspberries, and saw palmetto fruit. Insects provided most of the nonvegetable protein in the summer diet. Fall food dominance varied by region and reflected locally abundant hard mast sources. Diverse habitats are required to satisfy bear diets. The substantial and regional differences in diet appear to be a function of habitat variation and food availability. Mast production must be considered in management of Florida black bears. Forest management practices such as conversion of mast-producing flatwoods and hardwood communities to slash pine plantations and winter burning to control the understory growth may reduce the availability of mast and other foods important to bears.

Maehr, D. S., and J. R. Brady. 1984*b*. Comparison of food habits in two north Florida black bear populations. Florida Scientist 47:171–175.
This study indicated a less diverse habitat in Osceola National Forest than in Apalachicola National Forest. Although saw palmetto was the most important food item in Osceola, it was insignificant in Apalachicola diets. A palmetto mast failure would have minimal impacts on Apalachicola bears because of the availability of fall foods such as odorless bayberry, but could cause an energetic hardship on bears in Osceola.

Maehr, D. S., and J. T. DeFazio. 1985. Foods of black bears in Florida. Florida Field Naturalist 13:8–12.
The authors present a comprehensive list of foods eaten by black bears in Florida. The use of distinctly different foods from a

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006007

variety of plant and animal taxa emphasizes the extremely opportunistic and omnivorous habits of black bears. Less common or unpreferred foods may serve as replacements during years of mast failures or otherwise low food availability. It may be the presence of less commonly eaten foods that distinguishes occupied bear habitat from other apparently suitable forest land. The majority of food items are native plants and animals. However, several introduced species, including Brazilian pepper and honey bees, appear to be important foods.

Maehr, D. S., T. S. Hoctor, and L. D. Harris. In press *a*. Using the Florida panther as a flagship in regional ecological restoration. *In* D. S. Maehr, R. F. Noss, and J. L. Larkin, editors. Large animal restoration challenges for the 21st century. Island Press, Washington, D.C., USA.
Large, wide-ranging carnivores are valuable from a conservation standpoint, not only because they are popular with the public, but because they provide keystone ecological services and drive evolutionary processes.

Maehr, D. S., R. C. Lacy, E. D. Land, O. L. Bass, and T. S. Hoctor. In press *b*. A reassessment of Florida panther population viability analysis and recovery efforts from multiple perspectives. *In* S. R. Beissinger and D. R. McCullough, editors. Population viability analysis. University of Chicago Press, Chicago, Illinois, USA.
Even small populations, such as those of the Florida panther, may have good survival probabilities for 100 years without measurable consequences of inbreeding. This suggests that small populations of the Florida black bear, such as the one inhabiting Greater Chassahowitzka Ecosystem, may have a reasonable probability for persisting in its remnant forests. Establishing or maintaining demographic linkages within a metapopulation framework increases survival prospects for small populations.

Maehr, D. S., E. D. Land, and J. C. Roof. 1993. Southwest Florida black bear habitat use, distribution, movements, and conservation strategy. Annual Report. Florida Game and Fresh Water Fish Commission, Tallahassee, Florida, USA.
This study of the southernmost black bear population in eastern North America confirmed the species as an obligate forest animal that used even mangrove swamps for denning and other activities.

Maehr, D. S., and J. N. Layne. 1996*a*. Saw palmetto. Gulfshore Life 26(7):38–41, 56–58.
Saw palmetto is likely a keystone species in Florida by providing food and cover to hundreds of species ranging from insects to black bears. This raises the question of potential impacts on the black bear of palmetto harvest by humans.

Maehr, D. S., and J. N. Layne. 1996*b*. The saw palmetto: Florida's all-purpose plant. The Palmetto 16(4):6–10, 15, 21.
This is an expansion of Maehr and Layne (1996*a*).

Manville, A. M. 1983. Human impact on the black bear population in Michigan's Lower Peninsula. International Conference on Bear Research and Management 5:20–33.
Positive effects of humans on bears included changes in hunting regulations possibly resulting in an increasing bear

AMERICAN OVERSIGHT

population, as well as oil pipeline rights-of-way, oil well service lanes, and lumber roads frequently used by bears as travel routes; early-successional vegetation induced by roadside cutting, commercial lumbering, clear-cutting for deer management projects, and controlled burns; and bee-keeping. Negative effects included loss of habitat due to human encroachment, heavy automobile traffic, hunting aided by service roads, poaching, and disturbances from approaching researchers which caused bears to flee their dens. Average home range was 150.4 km^2 for males and 68.9 km^2 for females. Large landscapes need to be protected from human encroachment.

Mattson, D. J. 1990. Human impacts on bear habitat use. International Conference on Bear Research and Management 8:33–56.
Human-origin bear foods have supplanted native bear foods on some wildlands converted to agriculture. Human intolerance has made most human foods unavailable in bear habitat due to the elimination of bears, and virtually all remaining bear populations depend on wild native foods. Bear populations that rely heavily on human foods do so only in areas where sufficient secure habitat is available. Human-induced changes in wildlands are probably of greater significance to surviving bear populations than is introduction of exotic foods. Humans have disrupted (i.e., through fire control, timber harvest, game management, and atmospheric pollution) otherwise stable, dynamically equilibrated processes in virtually all wildland ecosystems occupied by bears. Increased isolation and fragmentation of bear populations continue. Habitat available to a bear population must be sufficiently large so that perturbations can be averaged across the landscape. Subadult males and adult females tend to forage closer to humans because of their energetic predicament and because more secure sites are often preempted by adult males. Although male bears are typically responsible for most livestock predation, adult females and subadult males are more likely habituated to humans. Elimination of human-habituated bears predictably reduces effective carrying capacity and is more likely to be a factor in preserving bear populations where humans are present in moderate to high densities. If humans desire to preserve viable bear populations, they will either have to accept increased risk of injury associated with preserving habituated animals or continue to crop habituated bears while at the same time preserving large tracts of wildlands free from significant human intrusion.

Mattson, D. J., R. R. Knight, and B. M. Blanchard. 1987. The effects of developments and primary roads on grizzly bear habitat use in Yellowstone National Park, Wyoming. International Conference on Bear Research and Management 7:259–273.
Grizzly bear occupancy of habitat near human facilities was reduced, efficient foraging strategies were disrupted, and cohorts tending to be subordinate or security-conscious were displaced into habitat closer to developments by more dominant cohorts, particularly during summer and fall. Adult females and subadults bore a disproportionate part of costs associated with avoiding roads and developments; therefore, avoidance of developments and roads may have resulted in higher mortality and lower productivity among the adult female cohort.

McLaughlin, C., and D. Maehr. 1986. Evaluating black bear habitat (panel discussion). Eastern Workshop on Black Bear Management and Research 8:185–195.
In Florida, those factors that have led to local population extinctions need to be identified before populations can be successfully restored. Bear habitat analyses in the East address a range of issues from long-term planning, species management, impact assessment, and mitigation.

McLaughlin, C. R., G. J. Matula, and J. H. Hunt. 1986. A draft habitat suitability index model for black bears in the conifer-deciduous forests of New England: its application in Maine. Eastern Workshop on Black Bear Management and Research 8:137–167.
This planning exercise indicated that black bears seldom venture further than 125 m into unforested patches of early successional habitat. The authors recognized the importance of interspersion of habitat types, but cautioned that the relation between black bear ecology and plant community variability is poorly understood. They assumed, however, that bear densities are inversely related to the level of human development.

McLellan, B. N. 1990. Relationships between human industrial activity and grizzly bears. International Conference on Bear Research and Management 8:57–64.
Resource extraction activities can affect individual bears by 1) causing strong, energetically expensive reactions that disrupt normal behavior; 2) displacing bears from areas of human use; 3) altering habitats in which bears live; 4) disrupting the bears' social system; and 5) directly killing bears or increasing mortality rates indirectly by improving access for hunters, poachers, other resource users, and settlers. Increased motorized access that results in a long-term increase in human activity and/or settlement with a consequent increase in bears being shot is the most significant impact of industrial developments. Closing access to bear habitat after job completion is necessary to maintain the bear population at a satisfactory level.

Mykytka, J. M., and M. R. Pelton. 1990. Management strategies for Florida black bears based on home range habitat composition. International Conference on Bear Research and Management 8:161–167.
Large swamp systems and surrounding pine flatwoods were major components of bear habitat in north-central Florida. Upland forest cover (pine stands) represented 60% of the composite home range. Wetland forests represented 40% of the composite home range. Road density was a major factor affecting bear vulnerability during hunting seasons (increased access). Preservation and restoration of the interconnectivity of large swamps and forested upland buffers surrounding these swamps (>300 ha), and maintaining longer timber rotation, would encourage use by bears and reduce vulnerability of bears to overharvest. Construction of new roads should be restricted and those that bisect swamp systems and upland buffers should be closed. Forest management practices that promote stand diversity and mast production should be used.

The author outlines the theory behind a regional landscape approach for conserving biological diversity, especially large, wide-ranging species that are extremely sensitive to habitat fragmentation and human disturbance. Goals for a reserve system include representing all native ecological communities, maintaining viable populations of all native species, maintaining ecological and evolutionary processes, and maintaining or restoring the potential for response to environmental change such as global warming. The paper also includes various recommendations on the size of reserves, characteristics of core areas and buffer zones, and design considerations for corridors.

Poelker, R. J., and H. D. Hartwell. 1973. Black bear of Washington. Washington State Game Department, Olympia, Washington, USA.
This state-produced monograph includes examinations of bear/forest relationships, natural history, and management. Study objectives were to 1) determine why black bears feed on sapwood of coniferous trees (see Poelker and Parsons 1980), 2) determine population densities of black bears in various forest types and forest successional stages, 3) study distribution patterns and the effect of food supplies on these patterns, 4) examine and evaluate available information concerning food habits of black bears, and 5) study the effect of hunter harvest and/or control measures on black bear populations and determine the maximum allowable harvest consistent with good game management principles.

Poelker, R. J., and L. D. Parsons. 1980. Black bear hunting to reduce forest damage. International Conference on Bear Research and Management 4:191–193.
Prior to 1973, the state of Washington had a spring black bear season from 1 April through 30 June, as well as extensive efforts by professional control hunters to attempt to alleviate damage to forest tree reproduction. After 1973 an effort was made to concentrate hunting in problem damage areas, ending the spring hunt and establishing a system of special hunts. Bear harvest increased by 230 animals, suggesting that the sport-hunting program succeeded in harvesting bears in problem areas and preserving bears in nonproblem areas. Field surveys showed that bear damage was reduced or eliminated in most problem areas. They recommended making this system a permanent program for timber protection and also recommended hunting with hound as essential for adequate harvesting of damage-causing bears.

Powell, R. A., J. W. Zimmerman, and D. E. Seaman. 1997. Ecology and behaviour of North American black bears: home ranges, habitat and social organization. Chapman and Hall, London, England.
This project was a theoretical modeling effort to understand bear habitat use in western North Carolina (despite the suggestion of the title that it covers a wider area). They observed that, “Home ranges should not always be quantified with respect to time that an animal spends, or is predicted to spend, in different places. Most researchers use time to index importance, but what really counts is fitness. For some questions, home ranges need to be quantified by probability

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006013

density functions of energy expenditure or energy acquisition. Ultimately, home ranges should be quantified as probability density functions for contributions to fitness."

Powell, R. A., J. W. Zimmerman, D. E. Seaman, and J. F. Gilliam. 1996. Demographic analyses of a hunted black bear population with access to a refuge. Conservation Biology 10:224–234.
Pisgah Bear Sanctuary in North Carolina provides dispersing bears for hunters and provides some protection for resident bears. The sanctuary may not, however, provide resident bears with enough protection to maintain a viable breeding population within its boundaries. Reducing human access to bears and their habitat appears crucial, either by making large sanctuaries or by eliminating roads.

Raine, R. M., and J. L. Kansas. 1990. Black bear seasonal food habits and distribution by elevation in Banff National Park, Alberta. International Conference on Bear Research and Management 8:297–304.
The 4 black bear food seasons were defined as 1) den exit to mid-June, horsetails and graminoid vegetation as the dominant food source; 2) mid-June to mid-July, ants and ant larvae as the dominant food source; 3) mid-July to end of August, buffaloberry as the dominant food source; and 4) end of August to den entry, alternate foods such as crowberry, bearberry, and juniper berry as dominant foods. The mean elevation of habitats used during the first three seasons ranged from 1,500 to 1,543 m and increased to 1,694 m during the fourth season.

Rogers, L. L. 1976. Effects of mast and berry crop failures on survival, growth, and reproductive success of black bears. Transactions of the North American Wildlife and Natural Resources Conference 41:431–438.
The social system of black bears varies with the distribution and abundance of food and probably serves to increase foraging efficiency, which leads to increased survival and enhanced reproductive success. Failures of berry and mast crops correlate with marked increases in bear damage to farm crops, beehives, and livestock. Assessment of the foods of the black bear makes it apparent that most are available only briefly or are too small and scattered to be gathered rapidly. The few foods that potentially are abundant, long-lasting, and easily secured are dependent upon the annual vagaries of temperature and precipitation, with the result that over much of the range of the black bear there tends to be a surfeit of food in some years and absolute or relative shortages in others. Rogers describes the effects of shortages of mast (*Corylus cornuta*) and berries (*Vaccinium* spp., *Prunus* spp., *Cornus* spp., and *Rubus* spp.) on survival, growth, maturation, and reproductive success of black bears as determined during a 7-year study in the aspen-birch-conifer forests of northeastern Minnesota.

Rogers, L. L. 1987*a*. Effects of food supply and kinship on social behavior, movements, and

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006014

population growth of black bears in northeastern Minnesota. Wildlife Monographs 97:1–72.
Fruit and mast crop failures reduced bear reproductive rates to less than half the biological potential. Cub survival was 59 to 88% depending on the food supply in the year of conception and year of birth. Females first reproduced at 4–8 years of age, depending upon food supply, and produced subsequent litters at 2- to 4-year intervals. Annual cycle of behavior was closely tied to the annual cycle of plant growth and fruiting. Large areas of unbroken habitat are needed when food sources are unreliable. Management considerations include protecting important food sources (e.g., oaks, ash), limiting unspecific herbicides, leaving islands in large clearcuts, leaving hollow trees for den sites, and closing logging roads to limit human access.

Rogers, L. L. 1987*b*. Factors influencing dispersal in the black bear. Pages 75–84 *in* B. D. Chepko-Sade, and Z. T. Halpin, editors. Mammalian dispersal patterns: the effects of social structure on population genetics. University of Chicago Press, Chicago, Illinois, USA.
Male dispersal appears voluntary and not forced by conspecifics. Although male black bear dispersal effectively reduces the potential for inbreeding, this did not seem to be the driving force behind subadult movements away from natal areas. Female black bears tend to establish home ranges adjacent to or within the home ranges of their mothers.

Rogers, L. L., and R. D. Applegate. 1983. Dispersal of fruit seeds by black bears. Journal of Mammalogy 64:310–311.
This study compared the germination of seeds retrieved from feces of black bears with germination of seeds of ripe, uneaten fruit from northeastern Minnesota. The habits of swallowing small fruits whole and of traveling long distances could make black bears particularly important dispersers of fruit seeds if enough defecated seeds germinate. Germination rates of seeds from feces were higher than those of seeds in uneaten fruits for all species. Differences were significant in 5 of 8 taxa.

Roof, J. C. 1997. Black bear food habits in the Lower Wekiva River basin. Florida Field Naturalist 25:92–97.
Acorns, saw palmetto, sabal palm, walking sticks, blueberries, tupelo fruit, bessie bugs, and carpenter ants were the most commonly eaten foods. Variation in diet among years was due to differential availability, and suggests the need to maintain diverse food supplies over large areas so that black bears can successfully incorporate spatial and temporal uncertainty into their diets.

Roof, J., and J. Wooding. 1996. Evaluation of S.R. 46 wildlife crossings. Technical Report #54. Florida Cooperative Fish and Wildlife Research Unit, University of Florida, Gainesville, Florida, USA.
This study evaluated an experimental wildlife crossing and adjacent barrier fencing on S.R. 46 near Ocala National Forest. The system was designed to allow black bears to safely cross the highway. Five black bears used the crossing as the result of 50 encounters with the fence or the highway. In 1,033 documented instances in which animals encountered the fence or crossing, 69% did not cross the highway, 27% used the wildlife crossing, and 4% crossed the highway by crawling under the fence or entering at the end. Barrier fencing was effective in keeping bears and other large mammals off the fenced section of highway in the vicinity of the crossing. With a series of crossings, structures should be spaced no further than 1 km apart and should be located at points where bears and other species cross the highway with the greatest frequencies.

vegetation type in southern Quebec. Journal of Wildlife Management 62:718–727.
Declining use of a national park was attributed to a paucity of early successional stands and resulted in increased bear mortality outside of the park. Increasing early successional patches and creating a buffer zone (excluding agriculture and residential development) around the park would reduce bear movements outside of the protected area.

Scheick, B. K. 1999. Black bear diet, movements, and habitat selection in north Florida and south Georgia. Thesis. University of Florida, Gainesville, Florida, USA.
Acorns, saw palmetto, and swamp tupelo dominate the diet of black bears in this population, although some variation occurred between Florida and Georgia. Radio-collared females preferred loblolly forest and cypress swamp over slash pine forest, and tended to use forests that were older than 16 years. Although nutrition in Georgia was superior to north Florida, black bears benefitted in Florida from hunting season closures and corn used to attract deer.

Short supplies of hard mast in fall stimulate early den entry of females in poorer condition than when beech nuts are abundant.

Schwartz, C. C., and A. W. Franzmann. 1991. Interrelationship of black bears to moose and forest succession in the northern coniferous forest. Wildlife Monographs 113.
Schwartz and Franzmann compared characteristics of 2 black bear populations living in middle-aged and recently burned forests in Alaska. Population density and sex ratios were similar between areas. Age structures differed, with more yearlings in the recently burned area due to higher cub production and survival. Females in the middle-aged burn area produced litters at an older age and weaned yearlings later than females in the recent-burn area. Cub survival was lower in the middle-aged burn area. Superior growth and reproduction of black bears in the recent-burn area was attributed to greater consumption of moose calves.

Schwartz, C. C., and A. W. Franzmann. 1992. Dispersal and survival of subadult black bears from the Kenai Peninsula, Alaska. Journal of Wildlife Management 56:426–431.
All male subadults dispersed, as opposed to only 3% of females, which tended to establish home ranges adjacent to their mothers'. Larger litters also tended to stay

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006016

together longer. Gender-related differences in dispersal must be considered when managing heavily harvested populations or those that are geographically isolated. In continuous habitat, local overharvest of females can reduce sustained yields; in fragmented habitat an adequate reservoir of females must be maintained to ensure population stability.

Schwartz, C. C., S. D. Miller, and A. W. Franzmann. 1987. Denning ecology of three black bear populations in Alaska. International Conference on Bear Research and Management 7:281–291.
Mean number of days spent in dens varied from 189 to 233. Timing of emergence in the spring and entrance in the fall appeared to be related to weather, snow accumulation and melt, and food availability. Chronology of denning differed among pregnant females and other sex and age groups with overlap occurring among all age and sex groups. Site selection, vegetation type, and den type varied with area and was related to winter weather conditions, soil type, and topography.

Seibert, S. G. 1989. Black bear habitat use and response to roads on Pisgah National Forest, North Carolina. Thesis, University of Tennessee, Knoxville, Tennessee, USA.

Seibert, S. G. 1993. Status and management of black bears in Apalachicola National Forest. Final Report. Florida Game and Fresh Water Fish Commission, Tallahassee, Florida, USA.
Minimum bear density for the Apalachicola National Forest was 1 bear/19 km^2. The total population estimate was 126 ± 67 bears. Male bear home ranges averaged 109 ± 46 (SE) km^2. Female home ranges averaged 65 ± 22 km^2. Pregnant females entered dens earlier, emerged later, and denned for longer periods of time than other sex and age classes. Denning periods ranged from 13 to 150 days. Den types of 2 pregnant females included a hollow stump and an excavated ground cavity. Habitat preference was not detected, although freshwater marsh and shrub and brush habitats were avoided. Estimated harvest rate for bears was 42%. Saw palmetto and black gum were the most important fall foods. Management implications include wise management of the remaining large forests in Florida, with forest management limiting the amount of acreage in young plantations at any given time; limiting the amount of mechanical soil disturbance during site-preparation activities; maintaining a variety of stand ages and a diversity of forest types, especially hardwood/cypress swamps; and controlling or discouraging new road construction and road improvements.

Smith, T. R. 1986. Activity and behavior of denned black bears in the lower Mississippi River valley. International Conference on Bear Research and Management 6:137–143.
Mean activity level of radio-collared black bears declined from 53% to 29% between mid-October and early December before the denning period began. Denning length ranged from 37 to 141 days. The transition to dormancy began before den entry and a shift in behavior toward activity commenced before den emergence. Mean level of activity of denned bears was significantly lower than that of bears before denning and following den emergence. Nine of 14 cases of den abandonment were attributed to research activities, 4 to flooding, and 1 was unexplained.

Smith, T. R., and M. R. Pelton. 1990. Home ranges and movements of black bears in a bottomland hardwood forest in Arkansas. International Conference on Bear Research and Management 8:213–218.
Smith and Pelton studied movements of 23 radio-collared bears in a remnant bottomland hardwood forest. The size of annual home range was inversely related to habitat diversity and, in adult males, to weight. Typically, bears used significantly larger ranges in summer than in spring or fall–winter. Radio-tagged bears did not disperse from the study area nor did they move far from their natal ranges, indicating that this remnant population is closed. Bears relied almost exclusively on one food type in spring and one in fall–winter, making them vulnerable to annual vagaries in abundance and distribution of these foods. Management strategies should emphasize maintenance of forest diversity to provide alternate sources of fall mast critical to bears when staple mast-producing species fail.

Stratman, M. R., and M. R. Pelton. 1999. Feeding ecology of black bears in northwest Florida. Florida Field Naturalist 27:95–102.
The authors analyzed 259 scats collected on Eglin Air Force Base from 1994 to 1996. Spring diets were dominated by insects and hearts of saw palmetto (*Serenoa repens*). Early summer diets consisted primarily of blueberries (*Vaccinium* spp.). Late summer diets were primarily sweet gallberry (*Ilex coriacea*) and acorns (*Quercus* spp.). Fall food varied per year between saw palmetto fruit and acorns. Seasonal shifts in feeding ecology of black bears on Eglin Air Force Base were similar to other studies. In saw palmetto, starch content decreases and sugar production increases during spring and summer, corresponding to the time when bears consume the largest amount of saw palmetto hearts. Soft mast (blueberries) provides necessary proteins for growth and rebuilding of muscle mass. Bears may be selecting saw palmetto fruit over acorns. Acorns and saw palmetto fruit likely serve as replacements for each other during years of mast failures or low food availability.

Taylor, D. F. 1971. A radio-telemetry study of the black bear (*Euarctos americanus*) with notes on its history and present status in Louisiana. Thesis, Louisiana State University, Baton Rouge, Louisiana, USA.
One hundred sixty-one black bears from Minnesota were released in Madison, Tensas, and Pointe Coupee parishes in Louisiana. Bears dispersed into 37 parishes in Louisiana and into Texas, Arkansas, and Mississippi. Six bears were radio-collared. Minimum male home ranges were 27,440 acres (11,109 ha); minimum female home ranges averaged 4,866 acres (1,970 ha). Dens were in standing hollow trees. Temperature appeared to be unrelated to denning activities. Taylor concluded that the continued clearing of bottomland hardwood forests will result in a declining bear population.

Wathen, W. G. 1983. Reproduction and denning of black bears in the Great Smoky Mountains. Thesis, University of Tennessee, Knoxville, Tennessee, USA.
Average denning period was 113 days. Den types included 25 ground dens and 33 tree dens. Food availability influenced minimum reproductive age, productivity, and cub survival. White oak mast availability was correlated with the percentage of females with newborn cubs in winter dens.

Wathen, W. G., K. G. Johnson, and M. R. Pelton. 1986. Characteristics of black bear dens in the southern Appalachian region. International Conference on Bear Research and Management 6:119–127.
Most dens were located in tree cavities high above ground. Entrance height differed among tree species. Species differed with elevation, macrotopography, and microtopography. Chestnut oaks and northern red oaks comprised 10 of 15 tree dens outside of Great Smoky Mountains National Park. Timber management should be coordinated with den tree use and based on short-term and long-term management strategies. Short-term management should assess the availability of den trees and ensure preservation of individual den trees through careful coordination of logging activities. Long-term considerations should include initiating research to determine site and vegetative characteristics useful in quantitatively classifying and mapping areas with high potential for den tree production. Areas with high potential should be placed in old-growth management compartments or wilderness areas.

Wooding, J. B. 1990. Black bear harvest analysis. Final Report. Florida Game and Fresh Water Fish Commission, Tallahassee, Florida, USA.
A long history of liberal hunting

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006020

regulations may have threatened the black bear's continued existence in two north Florida national forests. The study noted that the black bear is slow to recover from overharvest and recommended conservative changes to the next year's hunting season. Season dates were delayed in both areas to facilitate female survival.

Wooding, J. B. 1995. Black bear reintroduction planning study. Final Report. Florida Game and Fresh Water Fish Commission, Tallahassee, Florida, USA.
In many parts of Florida the black bear is below carrying capacity and is a good candidate for restocking. The Big Bend area, in particular, would be a good place for a preliminary field study.

Wooding, J. B. 1996. Feasibility of stocking black bears in the Big Bend region. Final Report. Florida Game and Fresh Water Fish Commission, Tallahassee, Florida, USA.
Two yearling female black bears established home ranges and behaved in a manner that suggests that the Big Bend region is capable of supporting a black bear population. Natural recolonization will likely occur, but it will be a very slow process. The study concludes that a breeding population should be established on Lower Suwannee National Wildlife Refuge.

Wooding, J. B., J. A. Cox, and M. R. Pelton. 1994. Distribution of black bears in the southeastern coastal plain. Proceedings of the Annual Conference of the Southeastern Association of Fish and Wildlife Agencies 48:270–275.
Most "primary" black bear habitat in the southeastern coastal plain has been eliminated, and most of what remains is privately owned.

Wooding, J. B., and T. S. Hardisky. 1988. Black bear habitat study. Final Performance Report, W-42-35. Florida Game and Fresh Water Fish Commission, Tallahassee, Florida, USA.

Wooding, J. B., and R. C. Maddrey. 1994. Impacts of roads on black bears. Eastern Workshop on Black Bear Management and Research 12:124–129.
In most areas highway mortality is readily compensated for by local black bear populations. However, highways cause outright habitat loss and provide hunter access to bear populations, thus increasing the black bear's vulnerability.

Wooding, J. B., S. M. Shea, M. L. Richardson, and D. Y. Dowling. 1992. Movements of a female black bear in northwestern Florida. Florida Field Naturalist 20:46–48.
The authors speculate that the wide-ranging movements (77 km) of an adult female black bear that was originally captured as a nuisance may be related to habitat alteration in her original home range.

Young, D. D., and J. J. Beecham. 1986. Black bear habitat use at Priest Lake, Idaho. International Conference on Bear Research and Management 6:73–80.
Habitat use was determined from radio locations of 9 adult bears. Black bears preferred selectively logged areas during spring, summer, and fall; clearcuts were avoided during all seasons. Females preferred forested habitats and avoided roads. Males used timber and roads in proportion to their availability. Food production should be maintained or enhanced using a let-burn fire management policy and prescribed burns. Food production should be maintained or improved on logged sites. Soil scarification should be minimized to prevent damage to vegetatively reproducing food species. Disturbances to bears should be minimized by coordinating logging activities with seasonal habitat use patterns of bears. Timber should be retained near potential

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006021

or existing feeding areas, leaving patches of timber or strips within cutting units. Clearcuts with irregular borders provide greater cover. Coordinate logging activities to maintain an acceptable mix of different aged cutting units. Leave mature standing trees in cutting units.

Supplemental Literature Not Cited In Text

Applegate, R. D., et al. 1979. Germination of cow parsnip seed from grizzly bear feces. Journal of Mammalogy 60:655.
Rates of germination of seeds which passed through the digestive tracts of bears were higher than those that did not. Bears are also important dispersal mechanisms.

Beeman, L. E. 1971. Seasonal food habits of the black bear in the Smoky Mountains of Tennessee and North Carolina. Thesis, University of Tennessee, Knoxville, Tennessee, USA.
Analyses of scat and stomachs collected during 1969 and 1970 indicated that herbaceous species were most common in spring, and soft mast was most common in fall. Animal foods were not common. Colonial insects were found in small amounts. Food habits of cubs were similar to those of adults. Direct relationships were found between garbage consumption and increased camping and picnicking by people.

Beeman, L. E., and M. R. Pelton. 1980. Seasonal foods and feeding ecology of black bears in the Smoky Mountains. International Conference on Bear Research and Management 4:141–147.
Seventy-five stomachs and 1,025 scats from black bears in Great Smoky Mountains National Park were examined between June 1969 and January 1972. Diets consisted of 81% plant matter (grasses, other herbaceous leaves, stems, squawroot [*Conopholis americana*], huckleberries [*Gaylussacia* spp.], black cherry [*Prunus serotina*], acorns [*Quercus* spp.], blackberries [*Rubus* spp.], and blueberries [*Vaccinium* spp.]); 11% animal matter (predominantly Coleoptera and Hymenoptera); 6% artificial food of human origin; and 2% debris.
Spring diet was 90% grasses and other herbaceous stems and leaves and 10% squawroot. Summer diet consisted primarily of fruits and seeds. Early fall diet consisted of a variety of fruits. Late fall was a critical season and diet was primarily oak, hickory, and beech mast. Overall, the diet had high carbohydrate content, but low protein. Bear mortality, due to both legal and illegal means, increased during years of low mast production.

Black Bear Conservation Committee. 1992. Black bear management handbook for Louisiana, Mississippi, and East Texas.
The Louisiana black bear (*U. a. luteolus*) is jeopardized by habitat alteration and/or reduction. Forest management practices that can be advantageous to black bears are also compatible with normal management activities and are beneficial to other wildlife species. This text lists agricultural management practices that can enhance black bear habitat. Additional management strategies should focus on protection through prevention and resolution of human/bear conflicts and on public education.

Bowman, J. L., M. J. Chamberlain, B. D. Leopold, and H. A. Jacobson. 1996. An evaluation of two censusing techniques to estimate black bear population size on White River National Wildlife Refuge, Arkansas. Proceedings of the Annual Conference of the Southeastern Association of Fish and Wildlife Agencies 50:614–621.
Bowman et al. describe techniques which could be used to monitor bear population response to habitat change: hunter surveys of bear sighting during two-day deer hunt with Peterson-Lincoln estimator and cameras triggered by infrared monitors using both CAPTURE and Minta-Mangel mark-resight model. CAPTURE was the most reliable estimate, although flaws in the data collection were present in all estimates.

Clark, J. D., and F. T. Van Manen. 1992. Geographic information systems and black bear habitat analyses. Proceedings of the Eastern Black Bear Workshop on Management and Research 11:137–153.
Clark and Van Manen discuss different approaches to modeling, including habitat suitability indices, cumulative effects, and biometric models for habitat analyses using GIS.

Conti, J. A., D. J. Forrester, and J. R. Brady. 1983. Helminths of black bears in Florida. Proceedings of the Helminthological Society of Washington 50:252–256.
Fourteen species of helminth parasites were observed in examinations of 46 black bears.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006023

Observations included 12 nematodes, 1 trematode, and 1 acanthocephalan. The mean number of parasite species per bear was 4, with no significant differences observed among sexes and ages. Mean intensities were significantly higher in males.

Doan-Crider, D. L., and E. C. Hellgren. 1996. Population characteristics and winter ecology of black bears in Coahuila, Mexico. Journal of Wildlife Management 60:398–407.
Doan-Crider and Hellgren studied the Serranias del Burro population from 1991 to 1994. They captured 42 bears and collared 28. All pregnant females denned, 2 of 5 females with yearlings denned, and all other bears remained active throughout the winter. Dates of den entry and exit were late December and late April, respectively. The study estimated survival of adult females, cubs, and subadult males. Population density was estimated at 0.35 bears/km^2. The area could serve as a source of bears for relocation/emigration to western Texas.

Eason, T. H. 1995. Weights and morphometrics of black bears in the southeastern United States. Thesis, University of Tennessee, Knoxville, Tennessee, USA.
Eason found evidence of weight variance and morphometric differences in black bears supporting subspecies demarcations, but also found evidence that subspecies demarcations may not account for all of the morphometric variation found in black bears in the eastern United States. Differences were not correlated with regional habitat quality indices as measured by crop yields, latitude, actual evapotranspiration, and soil fertility. Black bears may respond temporally to habitat quality at a subregional level.

Eiler, J. H. 1981. Reproductive biology of black bears in the Smoky Mountains of Tennessee. TWRA Technical Report No. 81-4. University of Tennessee.
Denning of bears in the Smoky Mountains averaged 114 days, starting in the first 3 weeks of December and ending in April. Dens were usually located in trees. Average litter size during 1979-80 was 2.5 cubs. Breeding activity was observed during the last week of June and the first 3 weeks of July. Minimum reproductive age was 4 to 5 years.

Foster, G. W., and T. A. Cames. 1995. Chewing lice, *Trichodectes pinquis euarctidos*, from a black bear in Florida. Florida Field Naturalist 23:17–18.

Hardisky, T. S., and J. B. Wooding. 1988. Black bear habitat study. Final Performance Report, Statewide Wildlife Research. Florida Game and Fresh Water Fish Commission, Tallahassee, Florida, USA.
This report was based on 9 bears captured and radio-collared in Ocala National Forest. Habitat use appeared to shift with changes in food availability. Study animals used densely vegetated areas for winter bedding. Tentative mean home range sizes were 99 ± 19 (SE) km^2 for males and 28 ± 7 (SE) km^2 for females.

Harlow, R. F. 1962*b*. Osteometric data for the Florida black bear. Florida Scientist 25:257–273.

Harris, L. D. 1988. The nature of cumulative impacts on biotic diversity of wetland vertebrates. Environmental Management 12:675–693.
Wetlands help maintain the biotic diversity within and among vertebrate populations. Environmental perturbations can interact to reduce biotic diversity. Habitat fragmentation can have severe effects at all levels, reducing the usable range of the larger habitat generalists while threatening the genetic integrity of small, isolated populations. Impacts must be assessed on a landscape or regional scale to produce informed management decisions. Harris concludes that a system of replicate wetland reserves that are allowed to interact naturally with the surrounding landscape will be more effective in preserving biotic diversity than will isolated sanctuaries.

Harris, L. D. 1999. Remembering Florida's ancient forests: old Florida in words and pictures. Special Bulletin. Summer. Florida Defenders of the Environment.
This pictorial examination of Florida's ancient forests suggests that the state was richly populated with extensive forests that included very large trees. These trees likely supported a different set of animal communities that required old-growth conditions.

Harris, L. D., and P. Kangas. 1979. Designing future landscapes from principles of form and function.

AMERICAN OVERSIGHT

Pages 725–729 *in* National Conference on Applied Techniques for Analysis and Management of the Visual Resources. General Technical Report PSW-35. U.S. Department of Agriculture Forest Service, Washington, D.C., USA.

Future landscapes will consist of a gradient of types ranging from wilderness areas to totally "humanized" environments. The future environment will necessarily serve multiple functions. The landscape level of hierarchy has been neglected by the disciplines of ecology and planning. By coupling basic principles of form and function with the demands of future society we may leave behind a planned rather than a default environment.

Hellgren, E. C., and M. R. Vaughan. 1994. Conservation and management of isolated black bear populations in the southeastern Coastal Plain of the United States. Proceedings of the Annual Conference of the Southeastern Association of Fish and Wildlife Agencies 48:276–285.

Hellgren and Vaughan offer a strategy for maintaining large, contiguous forest tracts with minimal human disturbance. The authors indicate that identification, maintenance, and enhancement of key habitat patches, such as pocosins and mesic islands, are also important. They suggest the use of remote sensing data to identify corridors to be targeted for conservation. Large tracts of occupied bear range serve as reservoirs for black bear reproduction and dispersal into smaller, more fragmented habitats. Determining female survival rates and maintaining contiguous forest blocks are the most critical conservation needs. A second strategy consists of restricting human access.

Hunt, C. L. 1984. Behavioral responses of bears to tests of repellents, deterrents, and aversive conditioning. Thesis, University of Montana, Bozeman, Montana, USA.

Deterrents and repellents were tested on 31 free-ranging black bears visiting baits at a sanitary landfill. Ammonia and male human urine deterred most bears from eating. Test responses were the result of the effect of a stimulus on an individual bear, dominance activities by other bears at the site, and availability of natural foods in the area. Certain bears appeared to tolerate the more noxious deterrents or returned repeatedly following tests of the triggered repellents. Stimuli can be developed that will repel most bears. Inclusion of an odor cue with a repellent stimulus seemed to increase its effectiveness. Effective stimuli appeared to reduce aggression in subsequent encounters. Bears not repelled or submissive in response to a stimulus were more aggressive during later encounters.

Irvine, J. E., B. L. Legendre, and H. P. Fanguy. 1983. Selective bear damage and deterioration in sugarcane varieties. The Sugar Journal 46(3):25–26.

Selection by bears among varieties of sugarcane was "especially evident"at farms near Atchafalaya swamp of southern Louisiana.

Kasbohm, J. W., M. R. Vaughan, and J. G. Kraus. 1994. Black bear harvest and nuisance behavior in response to gypsy moth infestation. Proceedings of the Annual Conference of the Southeastern Association of Fish and Wildlife Agencies 48:261–269.

Gypsy moth infestation from 1987 to 1990 resulted in widespread defoliation and acorn failure. The number of bears harvested during infestation increased from pre-infestation numbers. The proportion of females harvested also increased. These increases may have resulted from increased bear movements in fall and greater bear susceptibility to hunting during infestation. Nuisance behavior was not affected by canopy loss or acorn failure. Defoliation enhanced soft mast production and may have allowed bears to avoid turning to high levels of nuisance activity that might be expected during conventional hard mast failures.

Kordek, W. S. 1973. An investigation of the structure, stability, and movements of Pennsylvania black bear with particular emphasis on Pike County. Thesis, Pennsylvania State University, State College, Pennsylvania, USA.

Survival rate was 68% for males and 71% for females in Pike County. A pattern of reproductive synchrony was apparent. Females were observed to have a more restricted range than males. Survivability

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006025

statewide for males was determined to be 63.3% in 1971 and 67.8% in 1972 and 70.4% and 77.0% for females during the same periods.

Landers, J. L., R. J. Hamilton, A. S. Johnson, and R. L. Marchinton. 1979. Foods and habitat of black bears in southeastern North Carolina. Journal of Wildlife Management 43:143–153.
Landers et al. analyzed 732 fecal droppings and 28 stomach contents and radio-monitored 10 bears. They determined that bears in the region need large areas with a variety of habitat types to meet annual food and cover requirements.

LeCount, A. L. 1986. Black bear field guide: a manager's manual. Special Report No. 16. Arizona Game and Fish.
A basic management guide including how to recognize sign; capture, immobilization, and transportation methodology; marking devices; collection of data and biological samples; and handling of bear depredation problems.

Lentz, W. M., R. L. Marchinton, and R. E. Smith. 1983. Thermodynamic analysis of northeastern Georgia black bear dens (*Ursus americanus*). Journal of Wildlife Management 47:545–550.
Denning locations of selected bears captured from 1 July 1972 through 15 November 1976 were revealed through the use of radio collars. A metal cylinder holding a propane lantern was used to measure relative heat retention. Ninety-six percent of the heat retention of a den was accounted for by three variables: bedchamber height (59%), thickness of wood surrounding the bed chamber (26%), and whether the entrance was on the top or side of the den cavity (11%).

Maddrey, R. C., and M. R. Pelton. 1995. Black bear damage to agricultural crops in coastal North Carolina. Proceedings of the Annual Conference of the Southeastern Association of Fish and Wildlife Agencies 49:570–579.
Hunting can be used to reduce bear densities and thus reduce bear/farmer conflict and bad public relations. Bear/farmer conflict occurs due to habitat fragmentation and agricultural development. Bears will use fragmented habitat and the nonforested habitat matrix if food resources are high in the matrix.

McCullough, D. R. 1981. Population dynamics of the Yellowstone grizzly bear. Pages 173–196 *in* Dynamics of large mammal populations. John Wiley and Sons, New York, New York, USA.
McCullough analyzed and synthesized the available data on the Yellowstone population of *Ursus arctos horribilis* and offered an alternative interpretation of the dynamics of the population. The study includes segments on total population size, recruitment of juvenile classes, cause of suppression of recruitment, sex ratios, time lags, expected response of the population to exploitation, MSY and population stability, and comparison with other Yellowstone grizzly bear models.

Mealey, S. P. 1977. Method for determining grizzly bear habitat quality and estimating consequences of impacts on grizzly bear habitat quality. Final draft. U.S. Department of Agriculture Forest Service, Region 1, Missoula, Montana, USA.

Miller, D. A., H. A. Jacobson, and B. D. Leopold. 1994. Effects of vegetation composition and land-use variables on bait station visitations by black bears. Proceedings of the Annual Conference of the Southeastern Association of Fish and Wildlife Agencies 48:252–260.
The authors investigated influences of habitat characteristics on bait station visitations. Vegetation and land-use variables were evaluated using overstory, midstory, and understory vegetation composition at bait stations visited and not visited by black bears on two islands in Arkansas. The site-specific variables measured had no influence on the probability of a bait station being visited.

Miller, D. A., B. D. Leopold, and H. A. Jacobson. 1995. Use of bait stations to monitor black bear populations in the Mississippi alluvial valley. Proceedings of the Annual Conference of the Southeastern Association of Fish and Wildlife Agencies 49:560–569.
Experimental bait station surveys were conducted from May to August to evaluate effect of bait type, sampling duration, and sampling month on bait station visitation rates by black bears. The authors

AMERICAN OVERSIGHT

recommend conducting bait station surveys in August using fish. Bait station surveys should be conducted annually where visitation rates allow monitoring of population trends and every 3–5 years in areas of low bear density to provide baseline distributional information.

Modafferi, R. D. 1982. Black bear movements and home range study. Alaska Department of Fish and Game.
Population identity, density, habitat use, sex and age composition, vulnerability to hunting, and behavior of black bears were determined from 60 live-captured bears (41 individual bears, 30 radio collared). Movement patterns are related to habitat use, feeding strategy, and reproductive behavior. Large bodies of saltwater, large glaciers, and extensive snowfields were not barriers to movement.

Mykytka, J. M., and M. R. Pelton. 1988. Evaluation of four standard home range methods based on movements of Florida black bear. Pages 159–164 *in* Tenth international symposium on biotelemetry. Department of Zoology, University of Arkansas, Fayetteville, Arkansas, USA.
Home range data from 8 Florida black bears were utilized to evaluate the convex polygon, the modified minimum area, the elliptical or bivariate normal model, and the harmonic mean measure of activity model. None of the models accurately delineated the areas used by all 8 bears. A method's ability to estimate home range size and describe boundaries of space used depended upon the degree of conformance of the locational data to the assumptions of the methods.

Newton, M. 1975. Constructive use of herbicides in forest resource management. Journal of Forestry 73:329–336.

Pence, D. B., J. M. Crum, and J. A. Conti. 1983. Ecological analyses of helminth populations in the black bear, *Ursus americanus*, from North America. Journal of Parasitology 69:933–950.
Faunal similarity was determined using a data base of 23 helminth species from 104 black bears collected in the southeastern United States. Studies such as this may lead to a more decisive means of delineating predictive models for the parasite species involved in epidemics.

Pursley, D. 1974. History and status of black bear in West Virginia. Thesis, West Virginia University, Parkersburg, West Virginia, USA.
A strong protective attitude towards the black bear existed among state residents. The West Virginia Department of Natural Resources should initiate information and education programs to inform the public about the contemporary status of black bears, including present and potential problems, bear research projects, and management goals. Pursley recommended research goals that included evaluation of black bear activities with regard to roads, livestock grazing, apiaries, and other agricultural areas; seasonal movements; and vegetational and physical components of existing bear habitat. Management goals should include preservation of existing bear habitat, evaluations of potential black bear habitat, and reintroduction of bears into suitable areas.

Radwan, M. A. 1969. Chemical composition of the sapwood of four tree species in relation to feeding by the black bear. Forest Science 15:11–16.
The contents of sugars, nitrogen, and mineral elements of 4 tree species were determined on 2 areas in western Washington. One area was subject to considerable damage by black bears and the other showed very little damage. Total sugars and ash were the only components which seemed to be related to bear preference. Chemical analysis alone was not sufficient to explain the problem of bears feeding on tree sapwood.

Rogers, L. L. 1977. Social relationships, movements, and population dynamics of black bears in northeastern Minnesota. Dissertation, University of Minnesota, Minneapolis, Minnesota, USA.
Rogers describes social relationships and population dynamics of black bears in northeastern Minnesota, based on a 7-year telemetry study. One hundred eleven individuals were collared and monitored. Rogers compared social interactions between related and unrelated adults. Findings emphasized the annual cycle of behavior and changes in behavior that occur as young

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006027

bears grow to maturity and establish permanent ranges. Rogers concluded that family members behave in ways that benefit close kin in accordance with kinship theory.

Rogers, L. L., D. W. Kuehn, A. W. Erickson, E. M. Harger, L. J. Verne, and J. J. Ozoga. 1976. Characteristics and management of black bears that feed in garbage dumps, campgrounds, or residential areas. International Conference on Bear Research and Management 3:169–175.
More males than females were found to supplement their diets with garbage. Females that supplemented their diets with garbage had higher than average numbers of cubs per litter than females that did not.

Rogers, L. L., and S. M. Rogers.1976. Parasites of bears: a review. International Conference on Bear Research and Management 3:411–430.
This is a summary of the available information for 77 species of parasites including species of host, pathological effects, whether hosts were captive or wild, and proportion of infected bears from a given geographical region.

Scott, M. G. 1991. Body fat prediction, nutrition and reproduction of black bears in the interior highlands of Arkansas. Thesis, University of Arkansas, Fayetteville, Arkansas, USA.
Easily measured and reliable indices to predict body fat in black bears are necessary for evaluation of the nutritional condition of live and harvested animals, as well as for the standardization of physiological indicators in nutrition research. Techniques to predict body fat in other animals appear to have little predictive value for black bears. Because body fat is strongly correlated with body water, new techniques such as isotope dilution may hold some promise for future attempts to estimate fat stores in bears.

Stirling, I., C. Jonkel, P. Smith, R. Robertson, and D. Cross. 1977. The ecology of the polar bear (*Ursus maritimus*) along the western coast of Hudson Bay. Occasional Paper Number 33. Canadian Wildlife Service.
This paper summarizes 10 years of data collected by the Canadian Wildlife Service and the Manitoba Department of Renewable Resources and Transportation Services. It includes a summary of historical records of polar bears in the Manitoba area, development of polar bear management in Manitoba, and documentation of bear-man problems in the Churchill area. Two hundred twenty-seven polar bears were ear-tagged and 23 were radio collared. Movement data and tag returns show that bears move on to the newly formed ice in early November and winter on the ice to the north and east of the Cape Churchill area, returning to the southern Manitoba coast in late July to August when the final ice remnants dissipate. A crude population estimate of the Churchill area was 308 bears. The polar bear problem in the Churchill area should be reduced once the garbage problem is resolved. Additional management options in Manitoba include establishment of an annual harvest and utilization of polar bears as a tourist attraction.

Tisch, E. L. 1961. Seasonal food habits of the black bear in the Whitefish Range of northwestern Montana. Thesis, Montana State University, Bozeman, Montana, USA.
Tisch examined 815 scats and 4 stomachs to determine the food habits of black bears in the Whitefish Range. Spring foods were predominantly herbaceous. Summer foods were herbaceous until the middle of July, when fruits matured. Berries and pine-nuts comprised most of the fall diet. Plant material occurred in 99.9% of the samples, insects in 45.3%, mammals in 5.0%, and birds occurred in 0.4%. There was an apparent correlation between the availability of huckleberry and its intake by bears in the fall.

van Manen, F. T., and M. R. Pelton. 1997. A GIS model to predict black bear habitat use. Journal of Forestry 95(8):6–12.
Possible consequences of forest management were assessed to produce habitat use models using GIS data of forest types, and male and female black bear habitat use on the nearly 500-km^2 Tellico Ranger District of the Cherokee National Forest in eastern Tennessee. Several variables were used to describe habitat use by female bears (overstory vegetation type, proximity to streams, elevation, aspect, stand age richness, proximity to improved roads, and proximity to human activity

AMERICAN OVERSIGHT

sites) and male bears (overstory vegetation type, overstory vegetation richness, understory vegetation type, proximity to streams, aspect, landform index, proximity to improved roads, and proximity to human activity sites). Elevation accounted for most variation in the female habitat use model, while most variation in the male model was explained by proximity to human activity sites.

Willey, C. H. 1974. Aging black bears from first premolar tooth sections. Journal of Wildlife Management 38:97–100.
The first premolar was ascertained to be equally as reliable as the canine tooth as an age indicator of black bears. Advantages of the first premolar over the canine include ease of collection, near elimination of tooth replacement costs, and increased sample size.

Willey, R. D., J. W. Butfiloski, and T. T. Fendley. 1996. Population characteristics and female denning of black bears in a managed South Carolina forest. Proceedings of the Annual Conference of the Southeastern Association of Fish and Wildlife Agencies 50:599–608.
Radio-tracked adult females in a managed forest in the mountains of South Carolina exhibited a mean litter size of 2.3 (n = 7); suspected mean age at primiparity was 4 years, and interbirth interval was 2.2 years. These parameters suggested a productive population and good-quality habitat. Dens included ground nests, root systems, tree cavities, brush piles, and hollow logs. Most dens were associated with early successional communities.

Wooding, J. B. 1987. Black bear hibernation study. Final Performance Report. Florida Game and Fresh Water Fish Commission, Tallahassee, Florida, USA.
Wooding investigated hibernation by using serum levels of urea and creatinine collected from 24 bears. There was no significant difference in the urine/creatinine ratio between serum collected December–March and that collected April–November. Low urea levels, believed a result of a low-protein diet, limit the usefulness of the urea/creatinine ratio as an indication of hibernation. Hibernation in Florida black bears may be restricted to females producing cubs.

Wooding, J. B., and B. J. Bakata. 1996. Litter size and age of first breeding of Florida black bears. Proceedings of the Annual Conference of the Southeastern Association of Fish and Wildlife Agencies 50:609–613.
Wooding and Bakata examined 139 female reproductive tracts. Corpora lutea occurred in 81 of the tracts. Most females (75%) bred initially when 2.5 years old and the remainder at 3.5 years. Their results were "comparable to those found in other productive areas of eastern North America."

Wooding, J. B., and T. S. Hardisky. 1987. Black bear population index and estimation development. Final Performance Report. Florida Game and Fresh Water Fish Commission, Tallahassee, Florida, USA.
Bait stations were not effective as a population estimate due to low visitation rate. Bear track counts conducted on Ocala National Forest from 1983 to 1986 were analyzed. This method is sensitive only to major changes in the mean number of tracks observed. The authors present recommendations for estimating bear population trends with track counts and an evaluation of mast production on Ocala National Forest.

December 4, 2019

Ms. Melinda Miguel
Chief Inspector General
400 S. Monroe Street, Suite 1902
Tallahassee, FL 32399

Dear Ms. Miguel,

In our letter dated January 28, 2019, we expressed our concerns regarding Thomas Eason, Ph.D., then Director of Habitat and Species Conservation of the Florida Fish and Wildlife Conservation Commission (FWC). We stated our concern that Dr. Eason had deliberately misled the public while testifying under oath on October 1, 2015 regarding Florida's black bear population and habitat. In our follow-up letter dated March 22, 2019, we reiterated our concerns and furnished additional evidence about the way bears are being mismanaged in the state.

During the intervening months, our concerns have escalated as our knowledge and evidence of mismanagement have increased. Motivated by the incongruities, misleading and false information in the 2019 draft Bear Management Plan (the Plan), we have uncovered crucial variables that have been deliberately omitted, therefore misleading the public.

While habitat manipulations and frequent fire intervals and winter burning have been largely rationalized away as being inconsequential despite the published, peer-reviewed literature stating otherwise, other variables which also affect the bears have been completely ignored. Our evidence strongly suggests that the dispersal of bears has been caused by the agency itself through the running of hunting dogs on public land. We have illustrated, through Wildlife Management Area (WMA) maps and dog-running dates, that bears are being pushed out of primary bear habitat and being dispersed into less suitable habitat and even into residential areas. This is occurring nearly six (6) months per year on public lands.

There is little question that increases in human-bear conflict and vehicle-bear collisions have been the product of FWC and partner agency actions, especially since around 2010, whether through mismanagement of bear habitat or expansion of dog-running on public lands. We suspect that the combination of these variables has been responsible for bear

AMERICAN OVERSIGHT

dispersal, leading to increased human-bear conflicts and vehicle-bear collisions. We touched on this in our last letter, but the evidence is now too overwhelming to dismiss. We have witnessed how the Florida black bear is being affected by these activities, but it is now apparent that the maps fortify our suspicions.

Once again, we are requesting a legislative investigation into the agency's words and deeds with respect to the public and the Florida black bear. The FWC is the agency that is entrusted by the people of the state to protect our wildlife under the Public Trust Doctrine, while upholding public safety. Instead, it is clear that this agency has been responsible for increasing human-bear conflicts and vehicle collisions, both of which are serious public safety issues. Ignoring these public safety and mismanagement issues will not make them disappear.

We are attaching a series of questions that should assist you in the investigatory process, as well as a sampling of supporting documentation and supplementary materials.

Thank you for your attention to this very important matter. Please reach out to us with any questions or concerns you may have.

Respectfully,

Karl Ambrose
Alexis Foxx

Independent Black Bear group

Investigatory Questions

1. On April 30, 2010, U.S. Forest Service with the cooperation of FWC, The Nature Conservancy, and Tall Timbers, proposed to start modifying the forests in the Bear Management Units (BMUs) where bears are most abundant. That same year, they expanded where deer, small game, and foxes and coyotes could be chased and hunted with dogs, which also include areas where the bears are most abundant. **We would like to know why the Florida public was not informed, and why this information was not included in the 2012 Florida Black Bear Management Plan.** These two variables, modifying habitat **and adding an invasive species to the landscape where bears are most abundant**, are significant. In the interest of transparency, it should have been stated that habitat manipulations and expanded dog-running could disperse bears, leading to increased human-bear conflict and vehicle-bear collisions (See Figure 1, p. 2 in supporting document: *Habitat Modifications within the Forests and Effects on the Florida Black Bear*. See also the planned prescribed burning maps in Figure 11, p. 13 and FWC's slide titled: "Bears may explore new areas if food is limited." This slide should have been included in the 2012 Florida Black Bear Management Plan. It demonstrates that FWC is aware that their policies can result in bears dispersing. Why weren't they included in the Bear Management Plan?)
2. We have physical evidence that shows that during dog-running season, Florida black bears are being moved out of the areas where they are most abundant (See supporting documentation. Study title: *Demographics of the Apalachicola Subpopulation of Bears*). Bears were also dispersed during the accelerating longleaf pine projects and continue to be dispersed during prescribed burning. Why are these crucial variables not mentioned in the 2019 draft Bear Management Plan? **The Plan must not be implemented until this question is adequately addressed for the Florida public. It is both a mismanagement issue and a serious public safety issue.**
3. As stated in our letter dated January 28, 2019, Thomas Eason, Ph.D. misled the public while under oath by stating that Florida has "awesome" bear habitat. He also omitted important and relevant information pertaining to the destruction of saw palmetto berries (Please refer to **Thomas Eason, Ph.D. Misleads the Public While Under Oath).** We would like an inquiry into why Dr. Eason misled the public while under oath.

AMERICAN OVERSIGHT

Supporting Documentation

AMERICAN OVERSIGHT

Thomas Eason, Ph.D. Misleads the Public While Under Oath

Dr. Eason was misleading the Judge and the State of Florida during the injunction hearing on October 1, 2015. He indicated that state land managers are protecting saw palmetto (*Serenoa repens*) berries. He failed to mention the three national forests, Apalachicola, Osceola, and Ocala. We have documentation that land managers are obliterating *Serenoa repens* all over these three national forests, in which three of our largest bear subpopulations are located.

Note: The roller chopping and mulching was destroying all of the spring bear food as well. This is still occurring in Osceola national forest. They are destroying three important food sources: gallberry (*Ilex glabra*), blueberry (*Vaccinium* species), and saw palmetto berry (*Serenoa repens*) due to accelerating longleaf pine restoration projects in northeast Florida.

This alone could cause bear dispersal in the northern Bear Management Unit.

AMERICAN OVERSIGHT

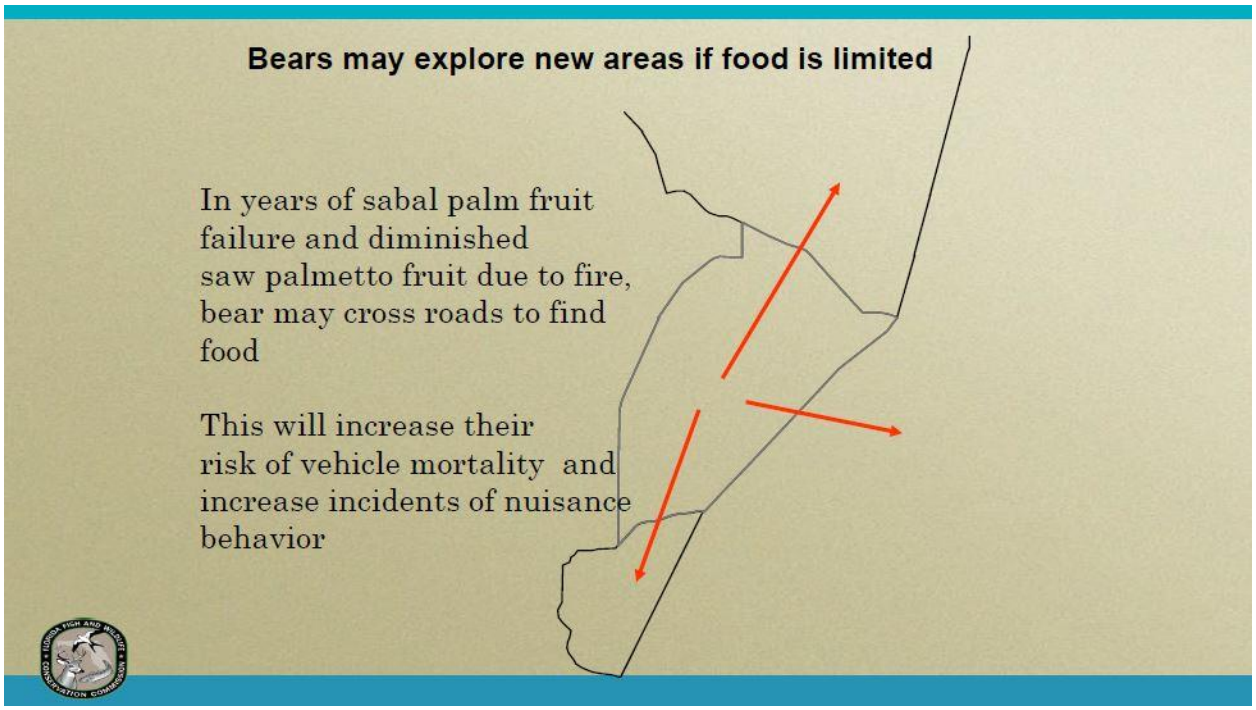
Q You've heard also some real brief testimony and there's been a lot of allegations in the press by Mr. O'Neal that the big issue and what would solve the whole problem with bears is that we've got a lot of people out there stealing palmetto berries.

If we did something -- well, first of all, have we taken action to address the palmetto berry issue? And would that solve all of the issues with regards to black bears?

A Yes. We've taken action to address the palmetto berry harvest. It has never happened on state parks, to my knowledge. We stopped any harvest on lands that we manage about ten years ago and then we've recently worked with the Florida Forest Service to close any permits that they had to allow palmetto berry harvest on state lands.

Excerpt of Dr. Thomas Eason's testimony regarding saw palmetto berries

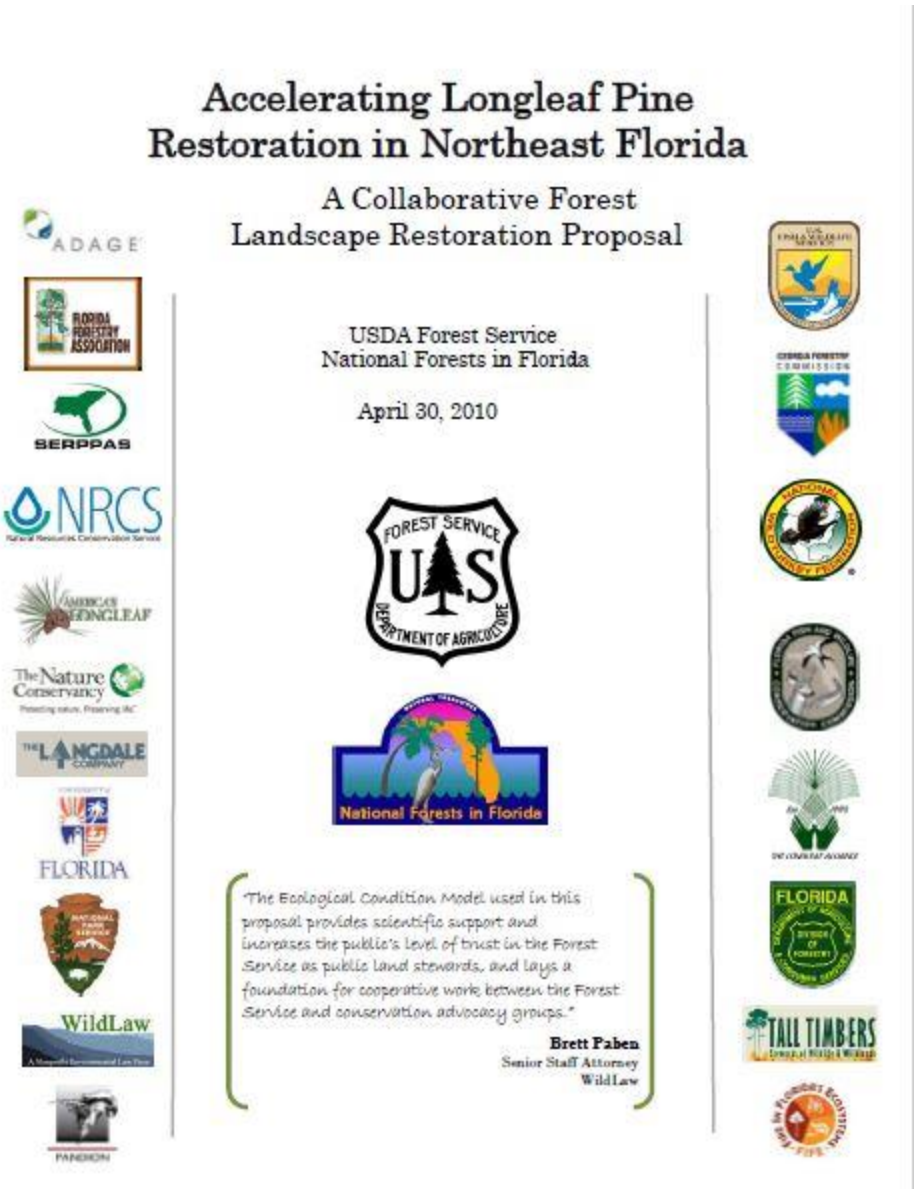
So one direct way is Florida is blessed with a lot of awesome people and a lot of awesome bear habitat and they, in many places, come right up next to each other. Central Florida's a great example.



Excerpt of Dr. Thomas Eason's testimony regarding bear habitat. He failed to mention that primary bear habitat was being destroyed throughout the state. Shortly after this, he mentioned the "large home ranges" of male bears being "over 60,000 acres" in Florida. This is a very large home range, which indicates **poor habitat and food sources**. The more abundant the food sources, the smaller the home range. Frequent mention was also made of the "expanding" bear population. Bears are known to travel widely when natural food sources are scarce, but FWC fails to mention this fact. Instead, it is inferred or directly stated

AMERICAN OVERSIGHT

to be equated with a growing bear population. This is not necessarily the case and is **highly misleading** to a public who would not know otherwise.



The 2019 draft Bear Management Plan states that bear range has expanded to 49% of historic range. This is very misleading. Bears are being dispersed by prescribed burning and other habitat manipulations, the running of hunting hounds (October through April), bombing in Ocala National Forest including the dropping of live ordnance, ATVs, and other human activities of millions of visitors. Why is none of this information in the Plan?

In reference to the 2019 draft Bear Management Plan on page 54: Just because bears are being "seen" more now (by camera in many cases) doesn't mean their range has expanded. Their natural food sources may be scarce, so they have to travel farther to find food. On page 58, this is even correctly stated. There is an admission that human-bear conflict increases when natural foods are scarce. See also Table 11, Action item 3.1.15 on page 59.

FWC slide indicating that bears may disperse when food sources are scarce.

Accelerating Longleaf Pine Restoration in Northeast Florida

A Collaborative Forest Landscape Restoration Proposal

USDA Forest Service
National Forests in Florida

April 30, 2010

"The Ecological Condition Model used in this proposal provides scientific support and increases the public's level of trust in the Forest Service as public land stewards, and lays a foundation for cooperative work between the Forest Service and conservation advocacy groups."

Brett Paben
Senior Staff Attorney
WildLaw

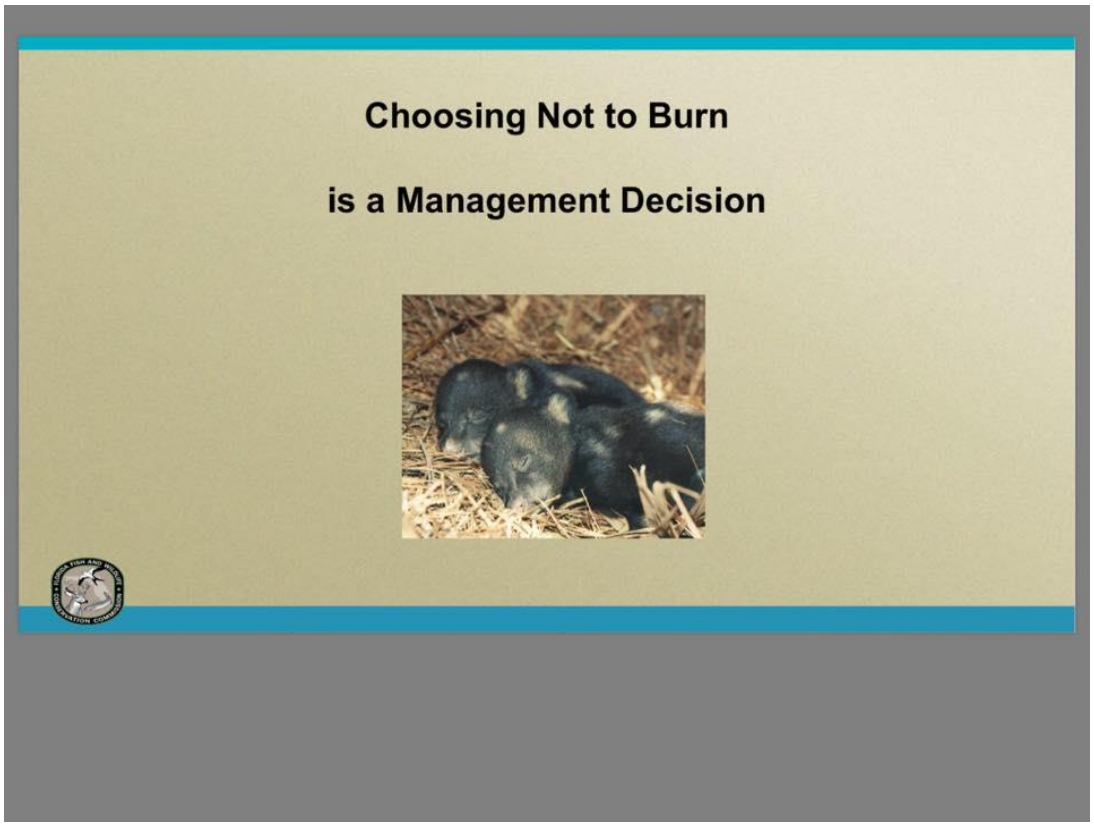
Document cover. Excerpts describing habitat manipulations follow. FWC was aware (see logo on cover), yet they failed to disclose this information to the public, nor did they include it in the Bear Management Plan.

Groundcover Restoration - Healthy LLP Ecosystems harbor some of the richest biological diversity in the country, most of which occurs on the forest floor in the form of grasses and herbaceous vegetation. Many wildlife and plant species, however, begin to decline as sunlight is shaded by an overly dense forest canopy or midstory. Saw palmetto, a naturally occurring shrub in LLP flatwoods, usually occurs in sparse clumps. However, when LLP forests are fire suppressed, saw palmetto densities increase dramatically and replace the diverse understory. When the density of saw palmetto exceeds 33% cover, imperiled grassland birds such as Bachman's sparrow, Henslow's sparrow and bobwhite are no longer present. A common and effective method of reducing saw palmetto coverage and increasing grass and herbaceous species is to use a single pass roller chopper followed closely by the application prescribed fire. Timber stands with high basal areas of small diameter pines will be thinned, chopped, and burned on a 2-3 year rotation, stimulating the grass and herbaceous ground cover. During the 10 year period of this proposal, 21,000 acres will be treated by roller chopping to restore native groundcover.

AMERICAN OVERSIGHT

Need to Restore Groundcover – Due to historic fire suppression and altered fire regimes, saw palmetto and woody shrubs have become dominant in many pine flatwoods of the U.S. southeastern coastal plain, including those on the ONF. This has led to the degradation of large, remaining portions of the pine flatwoods. Areas of the ONF that haven't been recently burned or have not burned with at least one moderately severe fire within the last ten years are now dominated by saw palmetto and/or woody shrubs. This has suppressed or eliminated the original groundcover normally dominated by bunch grasses and forbs. Approximately 21,000 acres of groundcover restoration will be accomplished by light roller drum chopping of overly abundant saw palmetto with this proposal, see page 22 of the Landscape Strategy (Available at ftp2.fs.fed.us/incoming/r8/Florida/CFLR/CFLRLandscapeStrategy.docx). These activities will benefit 38 of 39 sensitive plant species from the R8 Regional Forester's list that are known or considered likely to occur on the ONF, as well as 36 species of amphibians, 49 species of reptiles and 51 species of land birds.

Overview of Pine Flatwoods Ecology - Pine flatwoods, their pyrogenic groundcover, and associated wildlife evolved with regularly occurring lightning fires on a 2–3 year interval. In fact, the reproductive strategies of many flatwoods species (including LLP) depend on such frequent fires. In ECM Tiers 1 and 2, frequent prescribed fire that mimics the natural fire return interval and severity prevents a shift in the understory from native grasses and forbs to saw palmetto and woody shrubs, and prevents the less fire tolerant slash pine from invading and dominating LLP sites. On the ONF only 14,148 acres are currently in Tier 1 and 2 and require only the application of prescribed fire to maintain desired future conditions. In the absence of frequent fire the percent cover of saw palmetto and woody shrub species dramatically increases, resulting in decline of herbaceous cover and diversity and shift to lower quality ECM Tiers 3-5.



AMERICAN OVERSIGHT

Email from David Telesco

See last paragraph of email from Dave Telesco, below. In it, he acknowledges that the Florida Black Bear Management Plan is but one document that "guides how FWC manages bears." In other words, other agencies do not have to abide by it. It is merely a suggestion.

Note how Mr. Telesco trivializes the impact that habitat modifications, specifically prescribed fire, has on bears. He does not acknowledge the scope or aggressiveness of recent habitat modifications for accelerating longleaf pine projects (from 2010 onward) including clearcutting and prescribed burning. Nor does he acknowledge the effects they have on bears and formerly primary bear habitat. This is in contrast to the scientific literature. Please see the attached Habitat Modifications document for more information and citations. For the sake of transparency, this and planned prescribed burn maps should be in the Bear Management Plan. It is highly relevant to the management of Florida black bears and their habitat. The public deserves to know. FWC is the agency entrusted by the people of the state to protect Florida's wildlife for all.

FWC acknowledges that bear cubs may succumb to fire during winter prescribed burns.

Subject: RE: National Forest Core BMU'S

Karl,

I am Sarah's supervisor and am aware of your inquiries to our agency regarding bears. Before responding to your most recent email to Thomas, I checked with Sarah to get more details on your interactions with her.

Your correspondence with our Division Director seems to imply that you are not receiving adequate customer service from my employee, which concerned me. After reviewing Sarah's correspondence with you, I saw that she has responded to over 100 emails you have sent to her since May of 2015, and all provided you with thorough, professional, and prompt answers. It is clear to me that she has spent considerable time and effort to provide you with assistance. In the future, if you have concerns about any of my employees' performances, please feel free to contact me so that I can address it.

Your most recent inquiry regarding whether there were any requests from the Federal government to hunt bears required Sarah to seek out multiple staff members who may have had contact with Federal partners, and that is why you did not receive an immediate response. I reviewed and agree with her response, we are not aware of any request from the Federal government to hunt bears.

The 2012 Florida Black Bear Management Plan is only one document that guides how FWC manages bears. The Plan was not written to supersede or replace other agency documents that relate to managing bear habitat, such as the U.S. Forest Service. Our Plan does acknowledge forest management and its effect on bear habitat, but does not go into detail on specific management prescriptions by partner agencies. The displacement of bears by prescribed fire is temporary, and because different forest units are burned on different schedules, bears have an opportunity to move from an area currently being burned to another that is not. As Sarah indicated to you in a previous email, forest management practices as a whole are beneficial to bears, even if they temporarily displace bears.

Sincerely,

David Telesco

Inquiry to FWC About Dogs on the Landscape

The following email sent to Sarah Barrett on Feb. 23, 2016 was not even acknowledged. This is when Karl started to realize there was a dog problem in the forest.

From: Karl Ambrose <faunasafeaquatic@gmail.com>
Date: February 23, 2016 at 1:04:30 PM EST
To: Sarah Barrett <Sarah.barrett@myfwc.com>
Subject: Impact Studies

Hi Sarah,

It's been a while. I hope you are doing well.

I was wondering if you or anyone else have done any impact studies or written any articles on the effects of running dogs in our BMU's.

If so, where can I obtain those?

Have a wonderful day.

GO BEARS!

Sincerely,

Karl

AMERICAN OVERSIGHT

Study title: Demographics of the Apalachicola Subpopulation of Bears

We have physical evidence that shows during deer-dog season, Florida black bears are dispersing out of the areas where they are most abundant (Study title: Demographics of the Apalachicola Subpopulation of Bears).

Each yellow dot represents the location of one radio-collared female bear, with each photo showing the different locations of one bear. Notice how the bears are close to US98 and residential areas. The bears are south of Tate's Hell State Forest, and some have crossed US98 as well as State Road 65.

Note: Since Apalachicola National Forest is primarily longleaf pine habitat, the bears in the "Apalachicola Subpopulation of Bears" are actually in Tate's Hell.

This is not mentioned in the 2019 draft Black Bear Management Plan. This information is highly relevant from a management perspective as well as a public safety perspective. The draft cannot move forward until this is adequately addressed for the Florida public.

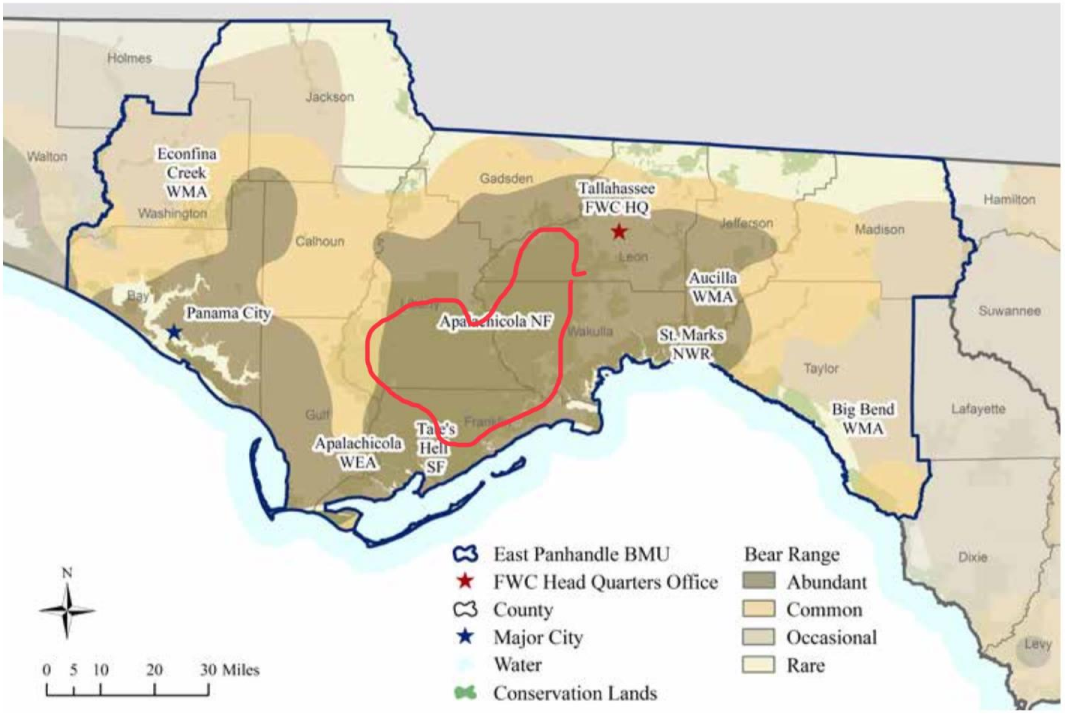

Figure 15. Bear range (FWC, unpublished data, 2019) and Conservation Lands (FNAI 2019) in the East Panhandle BMU.

Subpopulation Description:

Bears in the East Panhandle BMU (EPBMU) are part of the Apalachicola subpopulation, named after the Apalachicola NF, which encompasses a large portion of occupied bear range in this BMU. The Apalachicola subpopulation abundance estimates have increased significantly from 2002 (Simek et al. 2005) to 2015 (Humm et al. 2017) (Table 21). It is one of three Florida subpopulations with over 1,000 adult bears and is above the minimum abundance objective of 570 adult bears (Table 6); therefore, the management objective is to maintain the number of adult bears in this BMU.

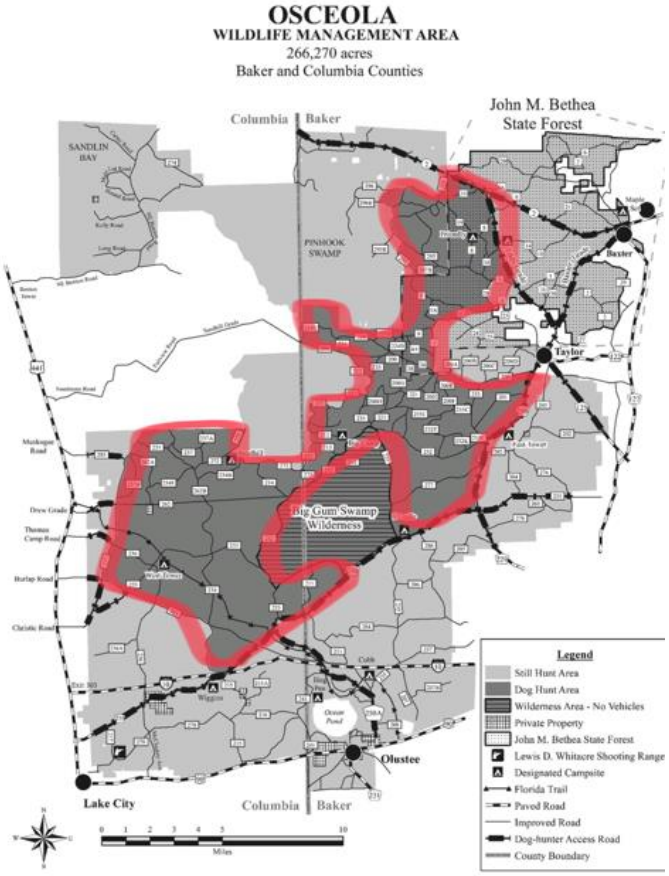

Table 21. Subpopulation abundance estimates from 2002 (Simek et al. 2005), 2015 (Humm et al. 2017), and predicted abundance in 2027 (FWC 2017) in the East Panhandle BMU.

2002 Estimate (Mean)	2015 Estimate (Mean)	Percent change (2002 to 2015)	2027 Predicted Estimate (Mean)
568	1,060	+86.6%	2,611

DRAFT

As can be seen by the maps, dog-running is occurring in areas where bears are most abundant. This is not even addressed in the 2012 Bear Management Plan or the 2019 draft. Dog-running was expanded, especially with respect to time extensions, in 2010. None of this was mentioned in the Bear Management Plan. Until this is properly addressed in the Plan, it cannot be approved.

This email is important because it shows that they already started practicing with dogs and it shows that the bears are moving south. It's a document that shows the bears are being dispersed.

Note:
Dave Telesco had stated in the most recent bear webinars (10/24/19 and 10/25/19) that acorns are not that important to the Florida black bear. Were Walt's observations based on scat that he observed which contained acorns, or was this pure speculation? Regardless, we believe that the bears are being dispersed by the dog hunting occurring both within Apalachicola National Forest and Tate's Hell State Forest.

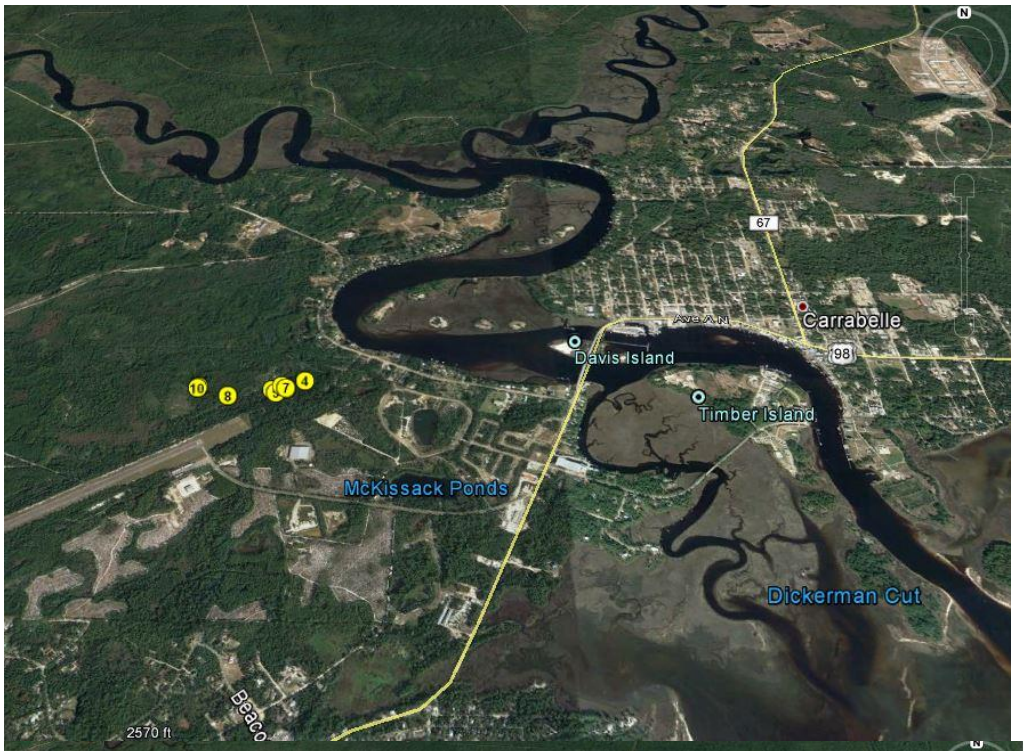
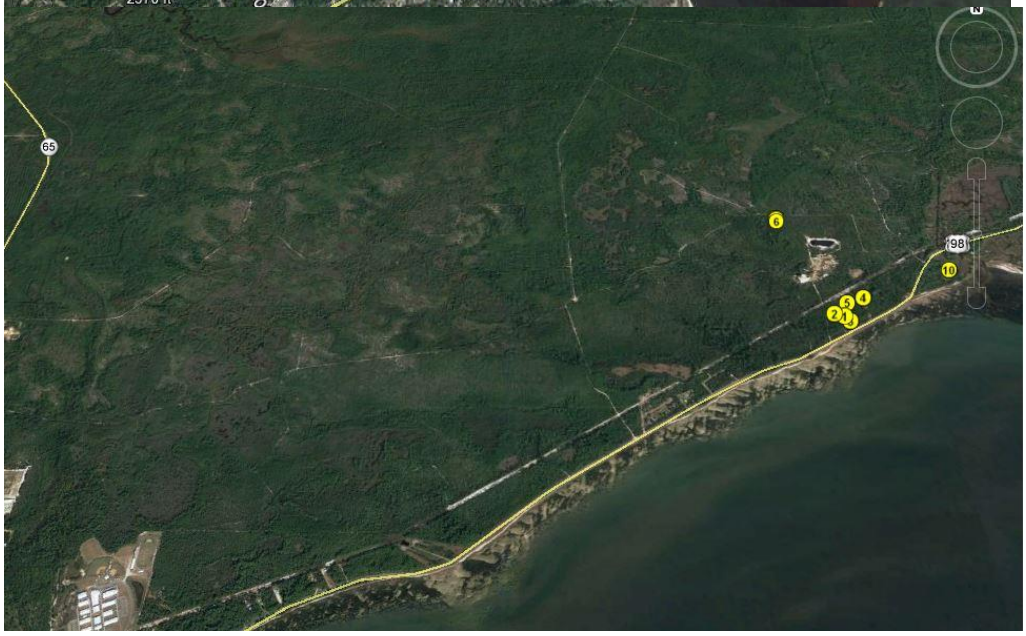
Subject: RE: Contact with David

Hi Karl, I have attached the 10 most recent locations for each of our 16 females. I fiddled with the magnifications and center points of the maps to try to capture a landmark to help orient you. I might not have been successful on all maps. If you can't see all 10 locations it is because the missing locations are under the visible locations. Except for F615 all bears reported today so these locations are near-current. We quit getting GPS locations from F615 on 10/4/2016. We walked in on her VHF signal a few times since then and know that she is still alive and mobile. Just a collar that went bad. It happens.



Several bears have come south to avail themselves of the acorns growing in the coastal oaks along US-98. Previously, 3-4 bears have even been located south of US-98 (although only of these bears show a 10 most recent location south of 98) .



I have been trying to figure out what F613, F607, and F608 are doing in that unattractive brown-looking stuff in the middle of Tate's Hell. Each of them have spent the better part of 3 weeks in there. It is part of a wet prairie restoration project and all the trees were clear cut and then the area was roller-chopped a couple of times and burned 2 springs ago - according to Florida Forest Service and then left to regenerate. Our biologist up there sent me a photo in which I could discern smilax and (I think) gall berry that bears might be eating. Whatever it is, bears approve of it.

Regards,

Walt McCown

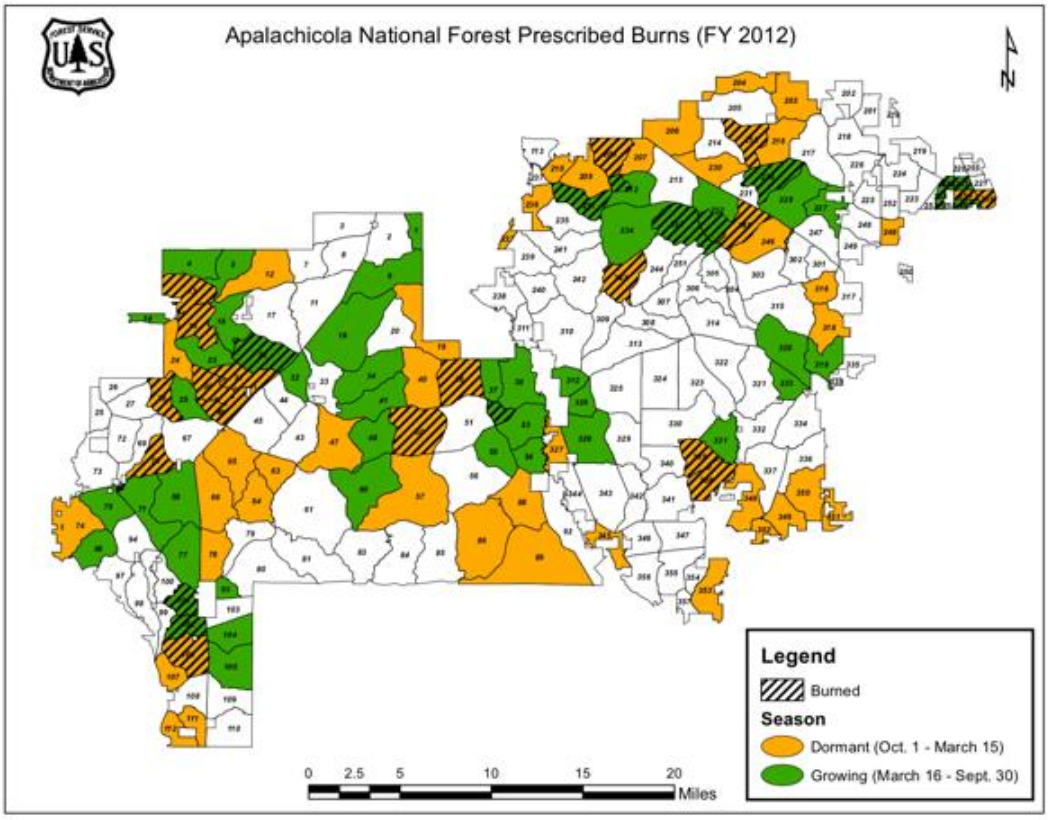
Miscellaneous Maps

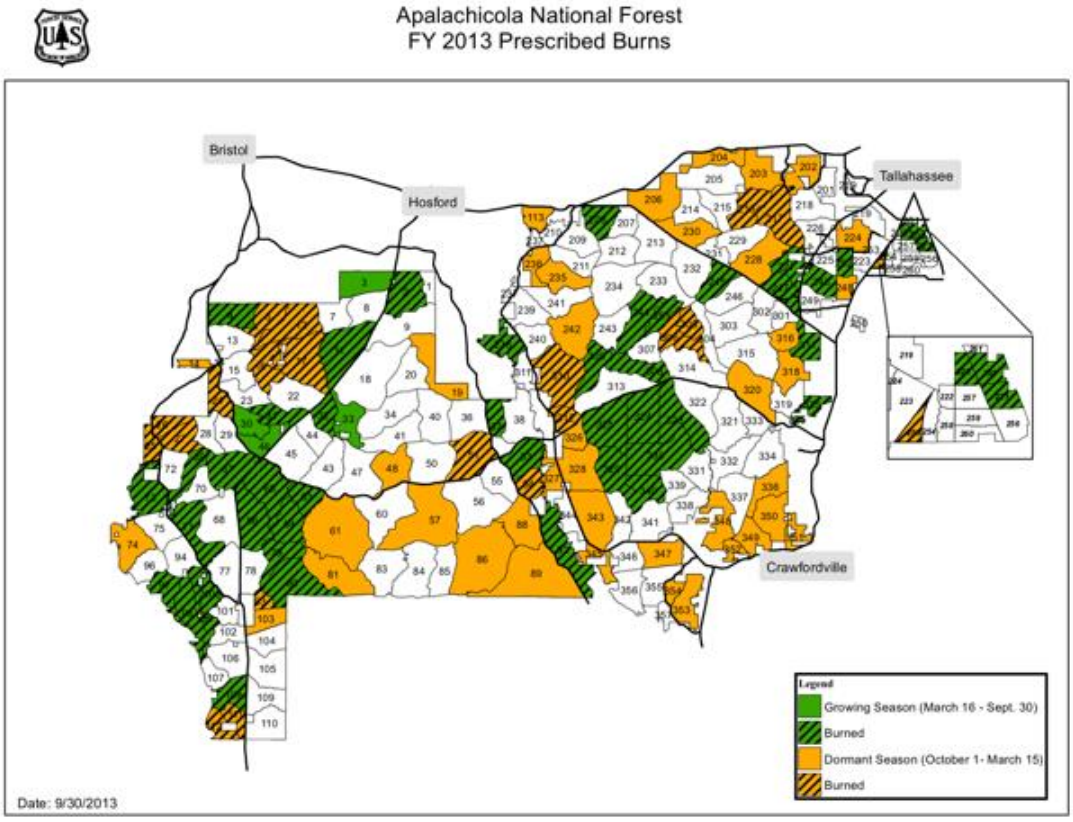
This 2019 burn map of Ocala National Forest depicts areas of dog-running (yellow), the Navy bombing range (red), a clearcut area (black), and burning (green).

AMERICAN OVERSIGHT

This map is important because it shows that the entire Goethe State Forest is open to hunting with dogs. Goethe is commonly where FWC translocates orphaned cubs after they have been rehabilitated.

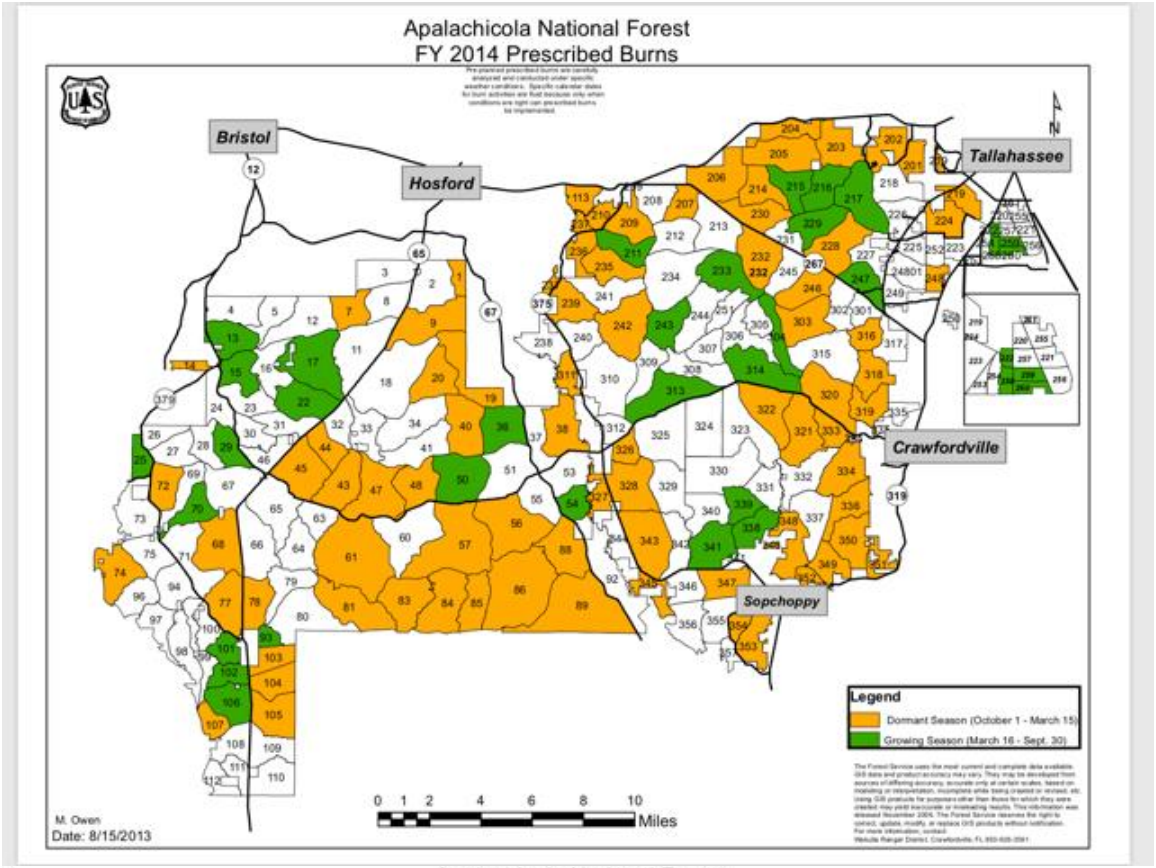


AMERICAN OVERSIGHT



Burn Maps Apalachicola National Forest

The following maps show where burning has occurred within Apalachicola National Forest. These are burn maps from 2012, 2013, 2014, and 2015. The green areas are where burns occurred during growing season, whereas the orange areas indicate where winter burning was performed.



Winter is dennning season for bears, when they become less active (den or hibernate) and when females have cubs. Over ¼ of the forest was burned every year. This is not in the Bear Management Plan. Habitat manipulations affecting Florida black bears to this extent should be in the Plan.

Wildlife Service Dogs

The use of Wildlife Service Dogs (WSD) has been undertaken by a limited number of agencies. Two types of WSD are most commonly used by agencies: the Karelian Bear Dog and the Black Mouth Cur. Due to their fearlessness and aggressive barking, these dogs are adept at locating concealed bears, tracking and treeing bears for capture purposes, and locating dead animals. When bears are candidates for capture and release, the WSD may be used for AC on release of the bear to help make it warier. Bear dogs may act as ambassadors for the education messages that agencies are trying to spread.

Working these dogs off-leash allows them to approach closely, barking within a meter or so of the bear, while avoiding defensive swipes and charges. Unlike typical hound dogs used for hunting bears, WSDs will return to the handler when called. Wildlife Service Dogs can work silently and less aggressively than hound dog breeds, especially on-leash, which is important when tracking a tranquilized animal or locating injured or orphaned wildlife. Their personalities allow them to be used at education events, surrounded by people and pets

This comment from Lackey et al. (2018) acknowledges that hunting dogs cannot be controlled. They are free to roam to trample on delicate ecosystems and to harm, harass, pursue, and molest wildlife, including bears.

AMERICAN OVERSIGHT

The Florida black bear (*Ursus americanus floridanus*) is an iconic keystone species whose fate is intricately interrelated with that of its habitat. These wide-ranging omnivorous seed-dispersers establish the food sources their offspring will need, then train their cubs to search for those resources seasonally. Because black bears opportunistically eat a wide variety of foods and roam over large convoluted areas of landscape to do so, precisely defining, measuring, or evaluating their habitat is challenging. Examining current habitat quantity and quality carefully is nevertheless critical because we are raising a generation of orphaned, displaced, injured, relocated, and garbage- and bait-addicted bears who lack the training and experience to use suboptimal habitat efficiently.

Biologists are taught to look at four factors to determine whether a landscape provides suitable habitat for a given species: space, food, shelter, and breeding sites. In seeking to understand what is going on with Florida black bear habitat, we need to examine each of these factors in terms of past, current, and future extent and quality.

SPACE

Viewed simply, habitat space can be seen as the area of the landscape supporting vegetation types historically used by bears. Flatwoods, forested wetlands, and scrub are the most important of these, but bears often utilize other natural communities.

The areal extent of bear habitat is constantly being reduced through urbanization and related processes. Human population growth replaces forests with buildings, concrete, and lawns. Highway and airport expansions cover more and more habitat with asphalt and adjacent lawn-covered clear zones, terminals, and service areas. The coastal wildlands where bears used to seasonally seek seafoods and fruits like hogplums, cocoplums, and seagrapes have been bulldozed for hotels, restaurants, and parking lots. More habitat is removed for rural homes, farm buildings, livestock enclosures, tracks and arenas, intensive agriculture, solar farms, mines, shooting ranges, campgrounds, and borrow pits. Irrigated bahiagrass pastures for grass-fed beef are now replacing native rangelands. As land is modified to accommodate such uses, bear habitat is obliterated.

Vast areas of additional land are becoming increasingly less accessible to bears due to fragmentation and human disturbance. Expanding networks of roads, fences, and housing developments prevent bears from moving across the landscape to escape disturbance and/or take advantage of seasonal resources. As bears attempt to negotiate these barriers, they are subject to high rates of roadkill and “nuisance bear” destruction or removal demanded by residents unaccustomed to co-existing with wildlife.

People moving into the wildland interface disrupt bear foraging habits by attracting them into their yards with unsecured garbage cans, pet and livestock foods, greasy barbecue grills, bird feeders, unharvested garden produce, and poorly secured chicken coops.

Even within the forests and preserves shaded green on maps, human disturbance severely limits the areas where bears can live normally. Wide swaths are cleared for transmission lines and pipelines, then left unrestored and/or kept open with herbicides. Land management activities, often involving heavy machinery or burning, disrupt peaceful environments, stressing and displacing bears. OHVs roar through many areas so frequently that animals abandon them. Game baiting stations and beehives in remote

AMERICAN OVERSIGHT

locations draw bears into destructive behavior that leads to them being killed or removed. Both legal and illegal hunting, facilitated by modern electronics, traumatize bears with gunshots and dog harassment. Unwanted hounds dumped into the forests prolong this stress. Even well meaning hikers may alarm and distract wild animals. Irresponsible tourists harass wildlife and leave trash that attracts bears to picnic areas, subjecting them to plastic ingestion and/or "nuisance" removal.

FOOD

Natural forests vary greatly in their ability to provide adequate quantities of nutritious bear foods at the times they are most needed. Multiple land management trends are now modifying "preserved" habitat in ways that further reduce bear food availability.

Most of Florida's core bear habitat is actually managed for timber production, rather than wildlife. On these de facto tree farms, heavy machinery is used to prepare sites for planting high-yield pine varieties. This often involves bedding that turns up berry-producing shrubs and piles them in rows. Many areas are sprayed with herbicide to discourage shrub competition as the timber grows. Thinning the stand causes additional soil and groundcover gouging, scraping, crushing, and compacting. Eventually the remaining trees are clearcut and hauled away, thereby repeatedly draining the forest of nutrients and leaving vast expanses of mangled debris, which may or may not then be burned before more pines are planted. These repeated cycles of disturbance prevent natural understory recovery by depleting native soil seed banks.

Burning a mosaic of vegetation types/ages during the natural lightning fire season produces ideal bear habitat, Unfortunately, most land managers have fallen into the habit of burning in the fall-winter, which is severely degrading to natural groundcover and the bear food it provides. Burning after October destroys the spring crop of blueberries baby cubs delight in as they learn to eat solid foods.

Roller-chopping and similar mechanical treatments are now widely applied to natural lands with insufficient regard for longterm impacts. In fall-winter such treatments have shortterm impacts similar to off-season burning. The longterm effect on bear food is greater since chopping up the rhizomes decreases saw palmetto berry production for decades.

Managing for red-cockaded woodpeckers is the current fashion amongst sandhill and flatwoods managers, but good rcw habitat is not good bear habitat. Pursuing a vision of vast seas of wiregrass dotted with mighty pines, managers remove too many of the wrong kinds of oaks, thereby greatly reducing acorn crops and forcing acorn-seeking bears into suburban backyards. They also tend to push fires and machines too deep into drainageways instead of encouraging pyrodiversity to create the berry-producing shrub thickets bears need. Firebreaks are usually plowed through the edges most valuable to bears.

Uncontrolled recreation impinges on bear food supplies in some areas. OHVs plow up dry wetlands, which decreases their ability to provide crayfish and other high-protein foods during the wet season. The growing popularity of "wildcrafting" encourages humans to compete with bears for mushrooms, berries, and the like. Improved regulations are decreasing palmetto berry picking problems, but largescale commercial harvest is ongoing.

Increasing populations of feral hogs root through the landscape, competing for bear food, damaging habitat, and encouraging invasion by an expanding number of aggressive non-native non-food-producing plants. Careless overuse of herbicides to control such invasives does even more damage to native vegetation.

AMERICAN OVERSIGHT

Insects, especially bee larvae, but also including palmetto weevils, striped walkingsticks, bessie bugs, and many others, are important sources of the high-protein food bears need to reproduce optimally. But we are now in the midst of an "insect apocalypse" as widespread pesticide spraying, destruction of native vegetation, and other impacts are causing arthropod numbers to plummet.

Other forms of pollution and the algal blooms they promote affect bears along with humans and other wildlife as climate change intensifies droughts, wildfires, floods, and storms, impacting food sources for all of us.

SHELTER

As big conspicuous animals that have been hunted by humans for centuries, whether legally or illegally, bears do not like to wander far from cover. Recent trends away from natural habitat mosaics and towards industrial-style large-block land management thus leave extensive areas in the centers of open habitat polygons virtually useless to bears. This impacts the recovery potential of large clearcuts and burns because the berry-carrying bears only deposit seeds close to forest edges.

Bears need caves, hollows, or dense thickets to bed down in for winter "hibernation". During cold north Florida winters, they may actually go into a coma-like state during this period, whereas in south Florida they just become lethargic. Regardless, each bear needs a protected hidden bed for this long winter nap. They typically choose a dense clump of the ancient palmettos most often targeted for roller-chopping destruction. If the palmettos are spared chopping and the site is burned during the winter, these patches of extremely flammable vegetation go up in flames and the groggy bear is evicted into a conflagration.

BREEDING SITES

Female bears need safe places to give birth to and nurture their young. They typically do so in their palmetto-clump winter denning sites, where the baby bears are less likely to successfully escape fire than the more mobile adults.

To prevent excessive inbreeding and maintain longterm genetic health, an occasional bear needs to leave his home territory and join a distant population. This requires permeable landscapes with safe movement corridors between core habitat areas. Instead, urbanization keeps further restricting bear movement.

AMERICAN OVERSIGHT

Habitat modifications within the forests and effects on the Florida black bear

Alexis Foxx

Introduction

In 2015, the Florida Fish and Wildlife Conservation Commission (FWC) voted to hold a Florida black bear hunt for the first time since 1994. In 2012, this subspecies of American black bear was removed from the state's threatened species list. Although the seven genetically distinct and geographically isolated subpopulations continued being squeezed by development and an exploding human population which had surpassed 20 million in 2015, up from over 14 million in 1994, the public was led to believe that the bear population was "large and growing," which was leading to increased vehicle strikes and human-bear interactions as bears dispersed into neighborhoods and roadways. The population was then believed to be hovering at approximately 3,000 bears.

By FWC's own admission, the 2015 Florida black bear hunt was *not* intended to decrease the incidence of human-bear conflict. Nor, by FWC's own admission, was a bear hunt "necessary" to decrease the population. Hunting, per the North American Model of Wildlife Conservation, is designed to attain maximum sustainable yield and therefore strives to maintain at least slightly increasing populations of "game" species.

AMERICAN OVERSIGHT

The population goal is highly dependent on cultural carrying capacity, which is the population level of a given species that humans will tolerate on the landscape. When asked, bear biologists admitted these facts at the 17th Annual Umatilla Wildlife (formerly Black Bear) Festival in 2016, as well as during a bear stakeholder group meeting that same year. However, something about the situation with the Florida black bear seemed different.

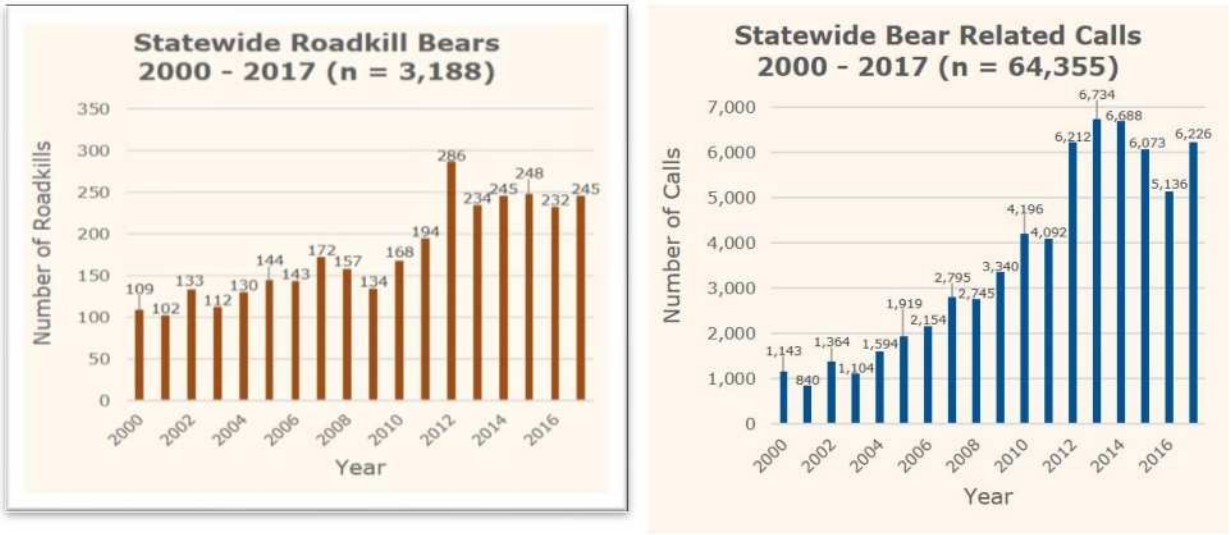

Figure 1. Number of bears killed on roads (left) and bear-related calls by year (2000-2017). From FWC website https://myfwc.com/wildlifehabitats/wildlife/bear/numbers/

Observing the data from Figure 1, the trend in both roadkill bears and bear-related calls is obvious. For example, there was a dramatic increase in bear-related calls in 2010 compared to previous years. The calls climbed even higher between 2012-2014 and 2017 saw a dramatic increase once again. The pattern is similar for roadkill bears, with the number of bears killed on roads annually approaching 200 in 2011 and maintaining at a level above 200 each year thereafter. What could possibly be the cause of this increase?

AMERICAN OVERSIGHT

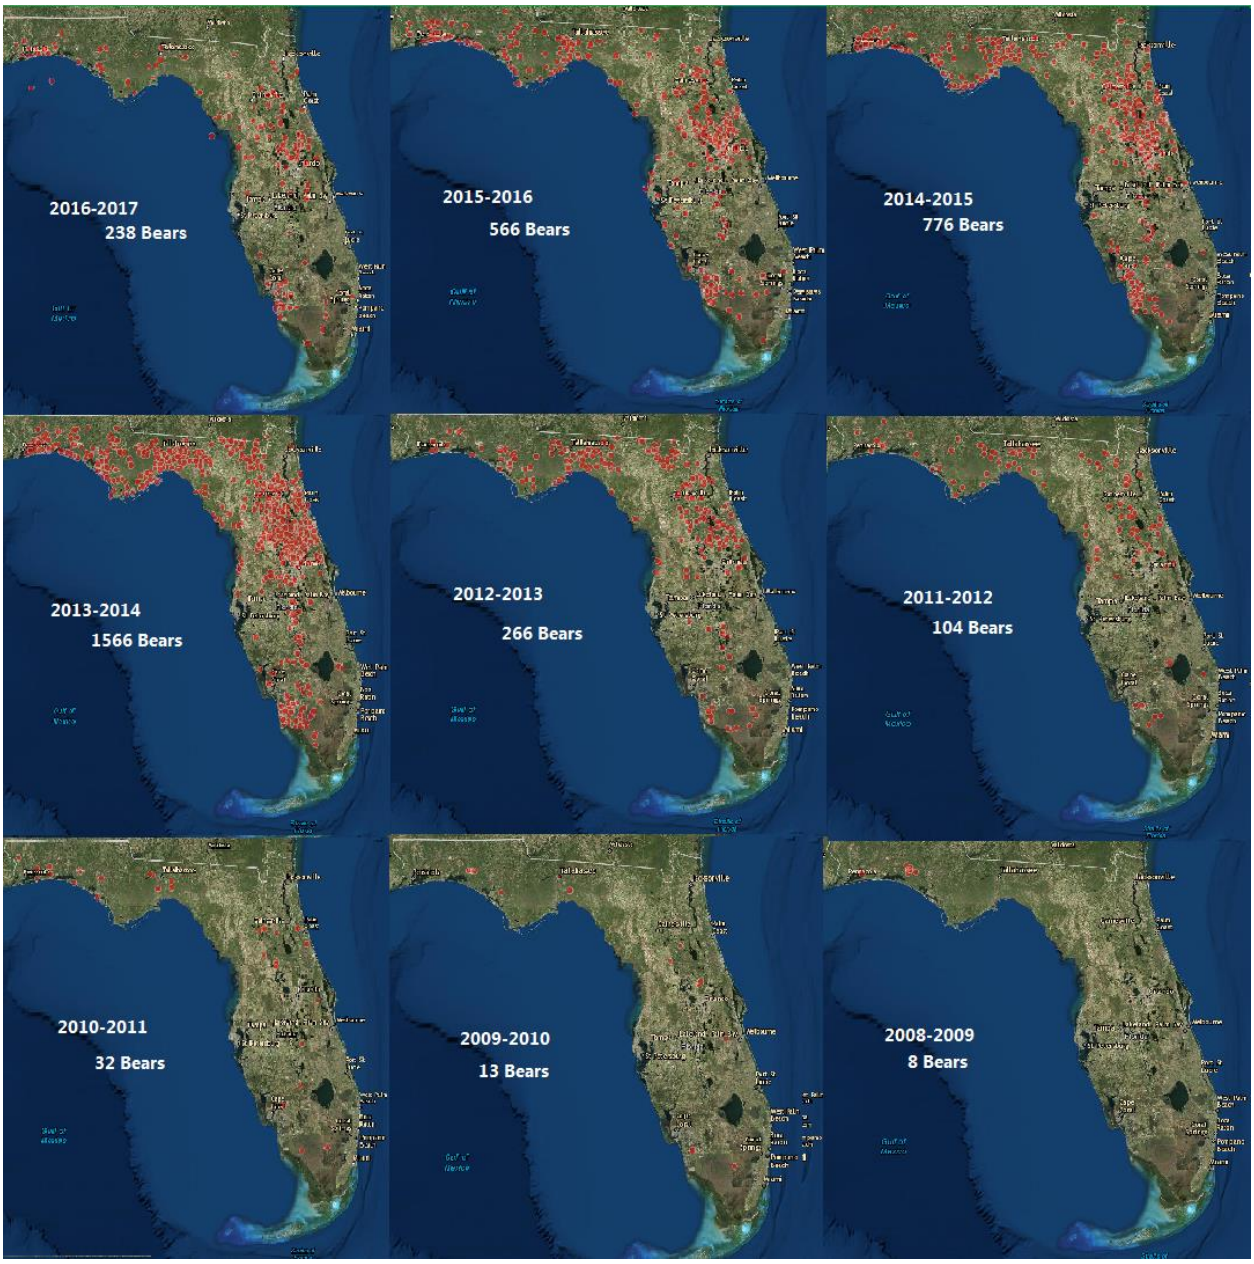

Figure 2. Bear sightings reports. Each red dot corresponds to a bear sighting. Notice the dramatic increase between the 2010-2011 and 2013-2014 pictographs.

One thing seemed certain: the population of bears in Florida was not suddenly "growing and expanding" to this degree. These upticks in roadkill bears, nuisance bear calls and complaints could not possibly be due to a sudden increase in bear numbers, nor could the growing and expanding human population fully account for the spikes at these particular times. Bears have one of the lowest reproductive rates of any mammal with a population growth rate between 0-2% per year. Typically, a female will produce an average of two cubs every two years. However, she may not produce young for 3-4 years if insufficient food is available to support the pregnancy. In addition, Florida black bears have the highest cub mortality of any black bear population in the country at over 55 percent. This is not even taking into consideration mortality related to these habitat

AMERICAN OVERSIGHT

manipulations. For example, there have been documented cases of mothers forced to abandon their cubs and of cubs perishing in fires (see Stratman, 1998; Weaver, 2000).

Accelerating Longleaf Pine Restoration

What was causing this pattern of increased nuisance complaints, vehicular collisions, and bear sightings? In 2010, accelerating longleaf pine (*Pinus palustris*)/wiregrass restoration projects began. Besides being a major disruption to the bears with home ranges in and around these areas, the bulldozing, clear-cutting, roller-chopping, mulching, and prescribed burning destroyed much of the bears' food supply and primary habitat.

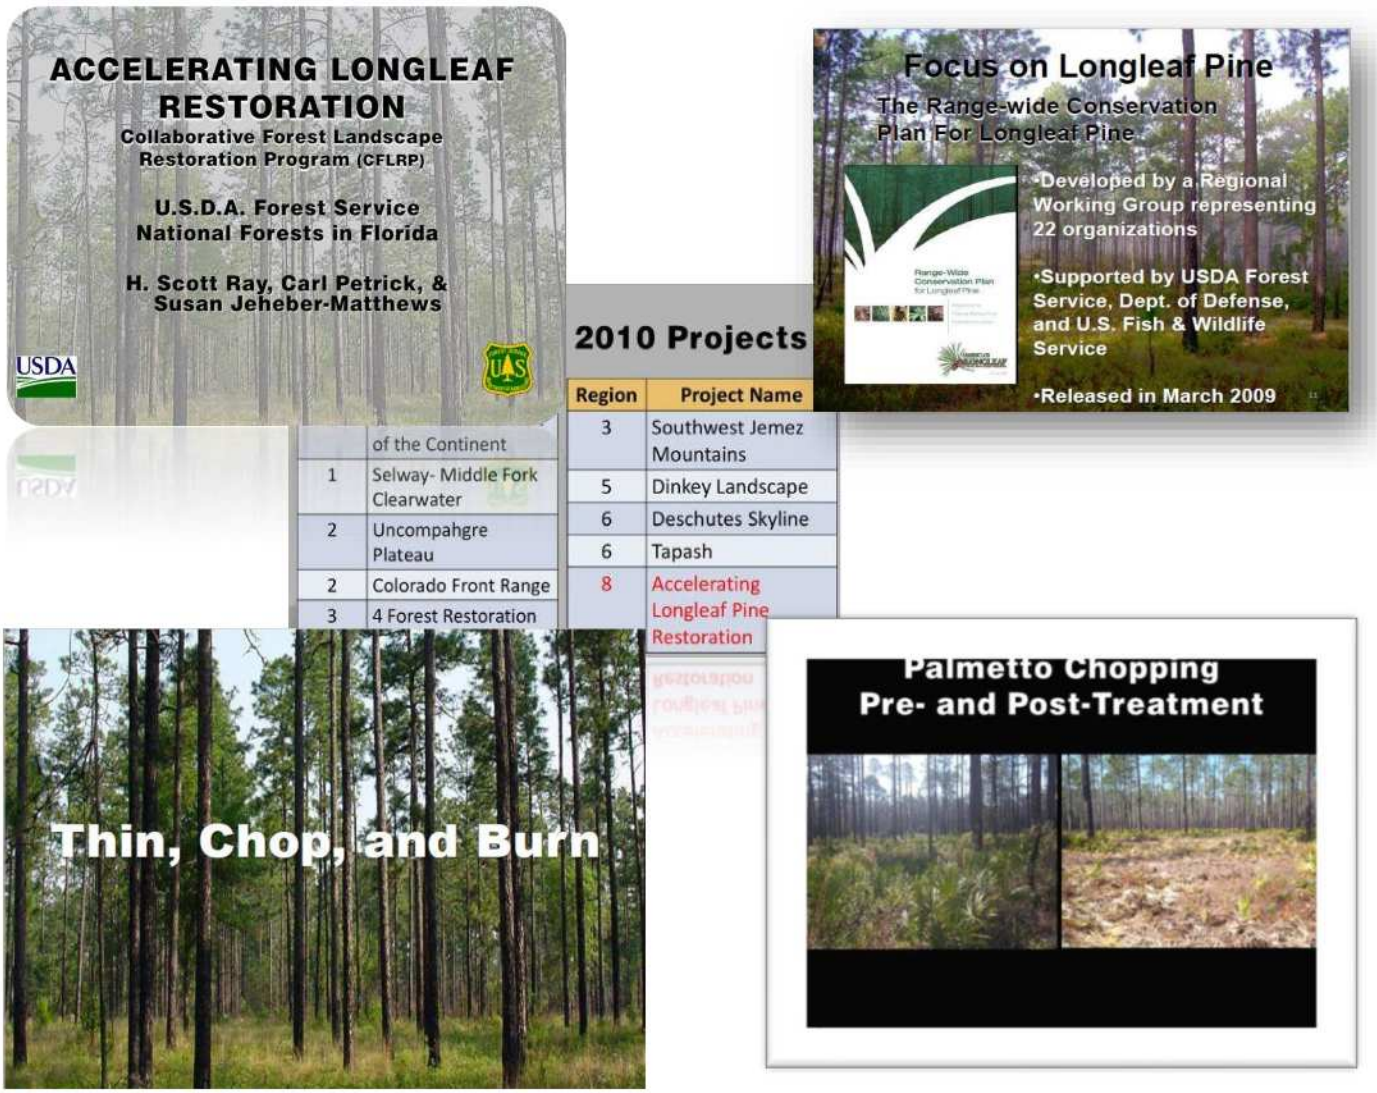

Figure 3. Slides from Ray, Petrick, & Jeheber-Matthews (n.d.)

Bears require dense cover for habitat as well as certain food sources. Frequent burning is often done in the winter instead of during growing season when lightning strikes are naturally more likely to cause a forest fire. Plants are killed before they have had a

AMERICAN OVERSIGHT

chance to mature or before they have set sufficient seed to ensure population recovery. Much of the bears' food sources require less frequent fire intervals. For example, *Vaccinium* species (blueberries) are maximized at approximately 4 years, whereas stands of saw palmetto (*Serenoa repens*) at least 5 years of age are required for cover as well as food. Burning certain areas in the winter equates to very little to no natural foods for bears in the spring and in many cases, in the summer and fall as well.

Saw palmetto plants are very important to the Florida black bear. Besides using the stands for cover, black bears eat the berries in the fall and also consume the hearts of the plant. Shortly before the 2015 black bear hunt, the state stopped issuing permits to pick saw palmetto berries because it was believed that this was leading to a shortage of food for bears. On July 17, 2018, the Florida Department of Agriculture and Consumer Services, along with the Endangered Plant Advisory Council, added saw palmetto to the commercially exploited plant list. While berry picking was certainly problematic, it was only part of what was happening.

The 2017 spike in bear nuisance complaints can be explained by the widespread, increased frequency and intensity of prescribed burning throughout the state. A record number of controlled burns occurred in the winter of 2017. There were 81,174 authorized prescribed burns encompassing 2 million acres of land, according to Florida Forest Service data provided to the Southern Fire Exchange.

Unfortunately, this disruption and bear habitat destruction causes bears to move around more in search of food and sufficient habitat, which often leads them into trouble with humans. The movement of bears into residential areas as they forage for food, for example, makes it appear as if there are "too many" bears and that they are so "overpopulated" that they are "dispersing" onto roadways and into neighborhoods where, incidentally, unsecured trash and other attractants can often be found. With an insufficient supply of natural foods, hungry bears also end up at hunters' bait stations where they are unwelcome.

AMERICAN OVERSIGHT

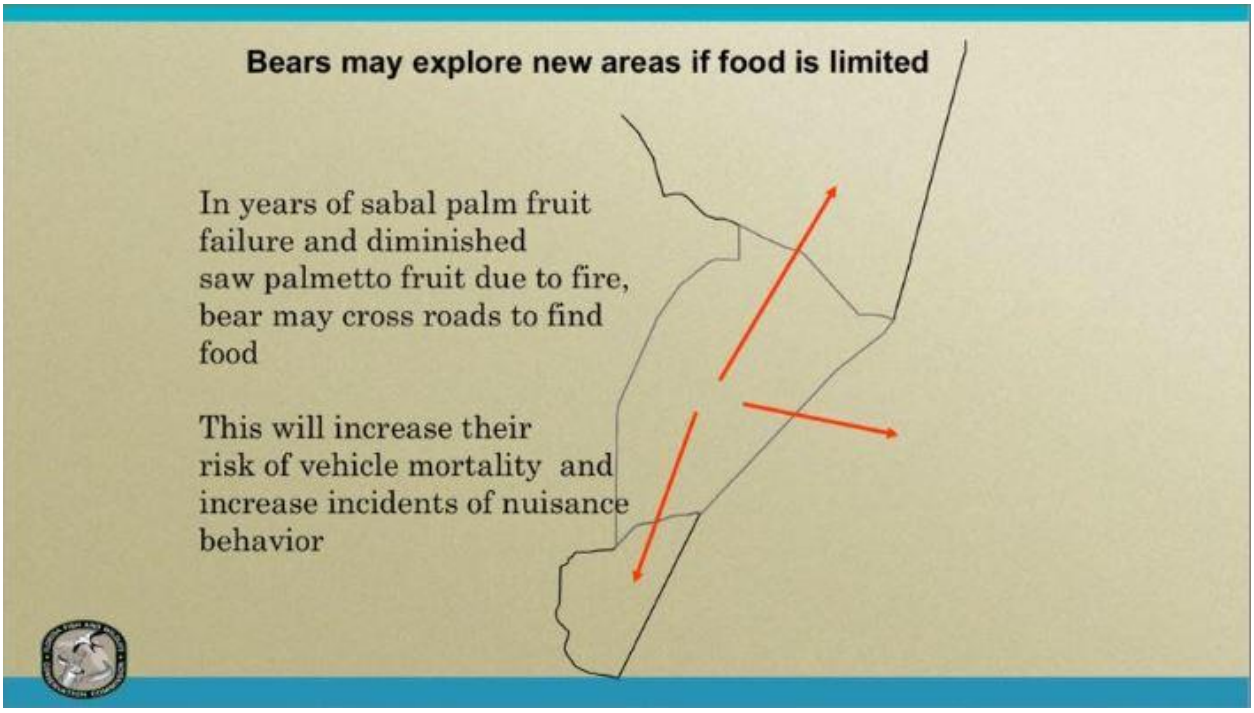

Figure 4. Bears disperse when food is limited. Courtesy of FWC.

Some examples of habitat modifications in Florida

Most (78%) of the bears killed during the 2015 Florida black bear hunt were killed on private property. While bears prefer natural over human-provided food sources, something was driving the bears to hunter bait stations. In fact, hunters had been complaining that bears were getting into their bait stations, which was one driving factor leading to the hunt.

The Lake Mary human-bear conflicts in 2014 through 2016 correlate with approximately 63,000 acres bulldozed in the southern part of Ocala National Forest. The bears in the southern part of the forest were displaced due to habitat modifications taking place. It is conceivable that many bears translocated further south into the Lake Mary area. If they had traveled north, they would most likely have encountered bears already established in their territories. It is believed that over 150 bears were displaced as a result of these forest activities, including burning and removal of acorn-producing oak trees, a much-needed source of calories for bears during the autumn months.

AMERICAN OVERSIGHT

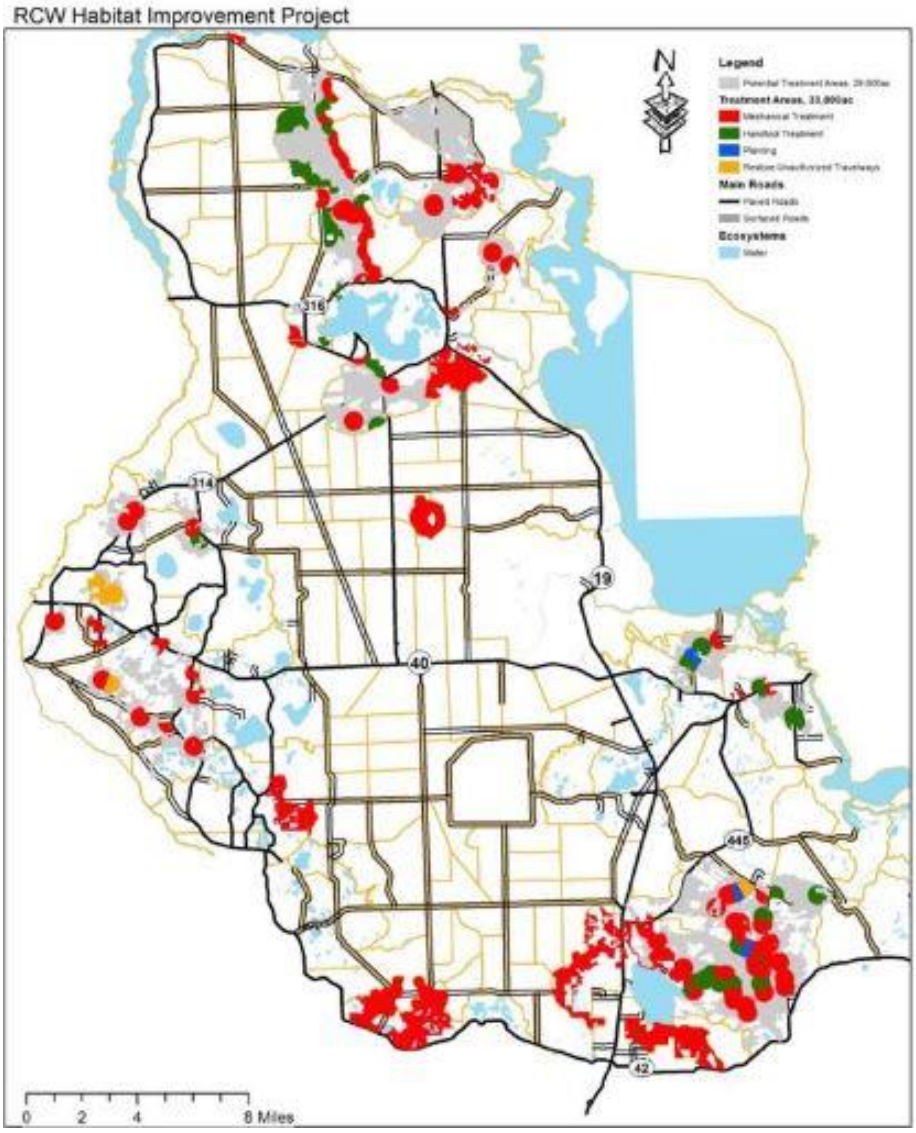

Figure 5. Habitat Improvement Project treatment areas within Ocala National Forest for the federally-protected red-cockaded woodpecker. The red indicates areas of mechanical treatment, while green is hand-tool treatment. From Ramirez, 2015.

In February of 2017, the FWC released 3 orphaned yearlings into Goethe State Forest, about a week before a large prescribed burn of approximately 1.6 km^2 (395 acres) in the northern part of the forest. A large bulldozed area was nearby. In the southern part of the forest, roller-chopping had recently occurred. After the burn, at least one yearling was seen in a residential/farming area east of the northern tip of the forest around

AMERICAN OVERSIGHT

Figure 6. Goethe State Forest in Feb. 2017. In the top left photo, results of roller-chopping can be seen. The photos beneath that show a large bulldozed area. The photos on the right show results of prescribed burning. All photos taken on the same day.

Williston. Residents were threatening to kill the young bear. Another or perhaps the same yearling was later seen wandering through residential neighborhoods traveling north. It is possible that this was a cub from the Santa Rosa area (see below) attempting to get back home.

In Gulf Breeze, Santa Rosa county in February of 2017, the mother of these three yearlings was killed by FWC when she defensively attacked a dog and man after he got between the bear and his dog. Eglin Air Force Base is burned every 2-3 years, and it

AMERICAN OVERSIGHT

was confirmed that roller-chopping and burning were occurring during that time in the Eglin area.

ABSTRACT

Understanding fine-scale habitat needs of species and the fac
neous use of habitat within home range would help identify lim
habitat management practices. This information is especially im
living in fragmented habitats where resources may be scarcer
uted than in contiguous habitats. Using bihourly Global Positi
data collected from 10 individuals during 2011–2014, we inve
tures of areas within home ranges that received high vs. low
black bears (*Ursus americanus floridanus*) in north-central, Flo
receiving high and low levels of use by bears based on their utilization distributions estimated with the dynamic Brownian bridge movement model, and performed vegetation sampling at bear locations within high- and low-use areas. Using univariate analyses and generalized linear mixed models, we found that (1) canopy cover, visual obstruction, and hardwood density were important in defining high-use sites; (2) the probability of high use was positively associated with principal components that represented habitat closer to creeks and with high canopy and shrub cover and higher hardwood densities, likely characteristic of forested wetlands; and (3) the probability of high use was, to a lesser extent, associated with principal components that represented habitat with high canopy cover, high pine density, and low visual obstruction and hardwood density; likely representing sand pine and pine plantations. Our results indicate that the high bear-use sites were in forested wetlands, where cover and food resources for bears are likely to occur in higher abundance. Habitat management plans whereby bears are a focal species should aim to increase the availability and quality of forested wetlands.

Discussion

This report is in no way meant to be an exhaustive compilation of bear habitat areas and potential bear habitat areas that have been modified or otherwise destroyed in the state of Florida. Rather, the examples provided are but a small sample depicting a much larger phenomenon that has been occurring throughout the state for a number of years.

Effects on Habitat

Accelerated longleaf pine restoration projects have been in process throughout the state since 2010, and this has necessarily destroyed primary bear habitat. Areas of dense cover and impenetrable vegetation limiting visibility and hindering access by humans and dogs are necessary for day beds and escape cover. With the dearth of large expanses of contiguous forest or mountainous, inaccessible forested terrain in Florida, the presence of escape cover is even more crucial for bears. As the Florida Black Bear Management Plan (2012) states, the use of fire reduces vegetation and negatively impacts bears.

For thousands of years, Native Americans used fire to clear the land to, among other things, improve hunting. Early European settlers used fire to clear the land for agriculture and cattle production. Together with the effects of lightning strikes, this

AMERICAN OVERSIGHT

cumulative utilization of fire encouraged the growth of longleaf pine over other community types. In the quest to rapidly restore longleaf pine/wiregrass forests to pre-Columbian times throughout Florida, land managers have greatly amplified the deleterious effects fire has had on bears and many other native wildlife species.

Longleaf pine/wiregrass ecosystems, with their open canopy and park-like appearance, do not provide bears the habitat of "very thick cover" (Telesco, Fish & Wildlife Conservation Commission Bear Management Webinar) required for their ability to thrive. Rather, these areas serve merely as corridors and as secondary bear habitat at best.

With the focus on eradication of oaks, restoration to longleaf pine/wiregrass forests often equates to the lack of large (>20 inches dbh) trees. The presence of large trees in bear habitat for safe climbing is vital. Bears have evolved to climb trees to escape danger, and females will often choose the largest tree in the area for a denning site (Weaver, 2000). Cubs sometimes fall from trees with slippery, shaggy, or scaly bark (such as longleaf pine, which has scaly bark evolved to slough off during fires). Therefore, mothers strongly select trees with sturdy, creviced bark as refuge trees (Rogers, 1993).

Ideally, scattered large trees should be available throughout the forest to afford escape opportunities for bears. Cover is essential for thermal regulation as well, and the importance of this in the heat and humidity of Florida cannot be overemphasized. Understanding the distinction between habitat types and the effects these projects have and will continue to have on Florida black bear subpopulations, as well as the individuals within them, is crucial when discussing and implementing bear habitat management in Florida.

Effects on Food

Black bears are not as resilient when it comes to their food supply as commonly thought. It is erroneously believed that when preferred foods are scarce, bears will be able to find sufficient foods to sustain them because they are omnivores. During hard and soft mast failures, black bears are much more likely to come into contact with humans. In artificially creating these mast failures, we have seen an increase in human-bear conflicts, vehicle-bear collisions, and bear sightings. As Moyer et al. (2007) have stated, bears' space requirements (particularly those of females with cubs) increase greatly during years of mast failures, and also possibly in response to other unfavorable environmental conditions.

Research has shown that certain foods that are important to bears require ≥5 years following fire to produce significant yields. Fire rotations of 10-23 years during growing seasons have been recommended for bear habitat. This kind of approach has been recommended for the adequate maintenance of saw palmetto habitat for carnivores in south Florida (see Stratman & Pelton, 2007). Fruit production in saw palmetto can be

AMERICAN OVERSIGHT

delayed for 6-9 years following a fire. It has been suggested that maintaining a mosaic of burned habitats with a diversity of burn ages would be optimum for black bears.

Besides its effects on saw palmetto fruit and other soft mast, frequent burning suppresses the growth of mid-story oaks (*Quercus* spp.). By itself, this oak suppression could negatively impact the long-term survival of bear populations in the Southeastern Coastal Plain. According to Clark (2004), bears could not survive without oak mast; black bear reproduction and mortality are directly linked to the accessibility of oak mast. It has been shown to affect population growth, bear numbers, fall feeding movements, and denning chronology (Weaver, 2000).

Conclusion

Florida black bears and bear populations are suffering from the effects of widespread and accelerating habitat modifications and frequent burning. Once the projects are completed, frequent fire intervals will continue to negatively impact bears into the foreseeable future. These impacts will be heightened by burning during winter months (see ***Figure 11*** for example of burn plans in the three national forests).

Burning and destruction of bear food and primary bear habitat results in bears dispersing, potentially increasing human-bear conflicts and vehicle collisions. As Rogers (1993) has stated, when and where food is scarce, black bears may wander far beyond their home range and even “sometimes beyond the normal range of the species.” If primary bear habitat is decreasing to this extent, the bear subpopulations are inevitably decreasing as well.

Habitat manipulations are not the only threat to bear habitat or populations. According to Murphy et al. (2017), the Big Cypress subpopulation, which is supposedly the second largest in the state, is in danger of potentially rising sea levels and increasing urban development. The South-Central subpopulation (now estimated at <100 bears) is in imminent danger of heading into an extinction vortex if habitat fragmentation and loss continue at expected rates. More than 50% loss of available habitat is expected in the coming decades. All measures of genetic diversity are low, which makes this subpopulation vulnerable. Of course, the Chassahowitzka subpopulation at perhaps 11-17 individuals is in peril as well and in imminent danger of disappearing.

One migrant per generation (~6.3 years) is the general rule for the prevention of genetic deterioration in wild populations, but at least 3 are usually needed to increase variation and influence population fitness (Murphy et al., 2017). We do not see this kind of genetic interchange between any of the bear subpopulations.

Many lives have been senselessly lost due to misinformation and mismanagement of the lands as well as this large and charismatic species which has been under immense anthropogenic pressure. Florida is exquisitely unique with respect to its ecology, habitat types, topography, and climate. In addition, it is the third most populous state in the

AMERICAN OVERSIGHT

nation. Adding these intensive habitat modifications to the mix, the pressures exerted on the Florida black bear are unparalleled.

According to Weaver (2000), the greater the quality of bear habitat, the less chance of human-bear conflict. With shortages of natural foods comes an increase in complaints of bears getting into garbage or causing property damage. Because bears are an umbrella species, other wildlife as well as people would be the beneficiaries of efforts to properly manage bear habitat. All of the factors discussed need to be considered in black bear management moving forward, allowing the precautionary principle to guide our actions.

Re: Legal Review of Florida Black Bear Delisting by FWC from Threatened Status

Dear Katrina,

Please see my attached memorandum regarding the FWC delisting of the Florida Black Bear. It is my legal opinion that the Florida Black Bear was improperly delisted by FWC. It is my further legal opinion that the FWC administrative rules governing species designated as "threatened" pursuant to the Florida Endangered and Threatened Species Act, section 379.2291, Florida Statutes constitute an invalid exercise of legislative power. FWC improperly implemented the statutory mandate set forth in the Act with respect to "threatened" species. My determination is based on the very explicit statutory mandate that a species becomes legally threatened when it is likely to become endangered due to ongoing habitat modification. The FWC rules governing threatened species do not adequately address the environmental problem of habitat modification.

Sincerely yours,

Lesley Blackner

AMERICAN OVERSIGHT

FWC's Erroneous Implementation of the Florida Endangered and Threatened Species Act as It Pertains to the Florida Black Bear

BEAR WARRIORS UNITED is a Florida not-for-profit established in 2016 for the purpose of protecting the Florida Black Bear and its habitat. The Bear Warriors Mission Statement provides: We pledge ourselves to Saving Bear Lives. We will pursue and accomplish our mission by:

*Ending the hunting of bears

*Expanding love and appreciation of bears through education

*Establishing bear refuges

*Reducing negative bear-human interactions.

*Supporting bear protection legislation

*Protecting and improving bear habitat

THE FLORIDA BLACK BEAR

The Florida Black Bear (*Ursus americanus floridanus*) "is a unique subspecies of the American black bear (*Ursus americanus*) that historically ranged throughout Florida and the southern portions of adjoining states." See Florida Black Bear Management Plan (Florida Fish and

AMERICAN OVERSIGHT

Wildlife Conservation Commission 2012) ("FWC Black Bear Plan") at p. 1. Today, the Florida Black Bear only occupies a small portion of its historic range.

The Florida Black Bear was listed as a Threatened species by the State of Florida in 1974 and de-listed in 2012. FWC authorized a hunt of the Florida Black Bear in 2015 and sold 3,776 permits. FWC reports that 304 bears were killed during a three day October hunt. See 2015 Florida Black Bear Hunt Summary Report.

The FWC Black Bear Plan states that "[b]ears are solitary, reclusive and live at relatively low densities over large landscapes--characteristics that make a direct count of bears infeasible." FWC Black Bear Plan at p. 7. The Plan further finds that "[t]he large spatial requirements of bears, fragmented nature of the bear population, and increasing human development that leads to conflicts will play significant roles in the future of bears in Florida." Id. at p. 1.

Florida Law Governing the Florida Black Bear

Section 379.2291, Florida Statutes, established the "Florida Endangered and Threatened Species Act" ("Act"). The Act's Declaration of Policy provides, in relevant part:

AMERICAN OVERSIGHT

> The Legislature recognizes that the State of Florida harbors a wide diversity of fish and wildlife and that it is the policy of this state to conserve and wisely manage these resources, with particular attention to those species defined by the Fish and Wildlife Conservation Commission, the Department of Environmental Protection, or the United States Department of Interior, or successor agencies, as being endangered or threatened. As Florida has more endangered and threatened species than any other continental state, it is the intent of the Legislature to provide for research and management to conserve and protect these species as a natural resource.

§379.2291(2), Fla. Stat. The Act defines "Threatened species" to mean:

> any species of fish and wildlife naturally occurring in Florida which may not be in immediate danger of extinction, but which exists in such small populations as to become endangered if it is subjected to increased stress as a result of further modification of its environment.

§379.2291(3)(c), Fla. Stat.

In 2011, FWC promulgated Rule 68A-270001 to declare the "purpose and intent" of Rule Chapter 68A, which implements the Act. Rule 68A-270001 provides in relevant part:

> (1) The purpose and intent of this rule chapter, in concert with an objective that lawful nature-based recreational activities may be managed to be compatible with such

AMERICAN OVERSIGHT

> species protection measures, is to conserve or improve the status of endangered and threatened species in Florida to effectively reduce the risk of extinction through the use of a science-informed process that is objective and quantifiable, that accurately identifies endangered and threatened species that are in need of special actions to prevent further imperilment, that identifies a framework for developing management strategies and interventions to reduce threats causing imperilment, and that will prevent species from being threatened to such an extent that they become regulated and managed under the federal Endangered Species Act of 1973, as amended, 16 U.S.C. §1531 et seq.

In 2011, FWC promulgated Rule 68A-27.001 to establish definitions for Rule Chapter 68A. Rule 68A-27.001(3) provides a definition for "State-designated Threatened Species."

In January 2017, FWC amended Rule 68A-27.0012, which establishes "Procedure for Listing and Removing Species from Florida's Endangered and Threatened Species List." The 2017 rule revision was adopted "to remove a subsection of the rule referring to a moratorium that is no longer in effect."

In January 2017, FWC amended Rule 68A-27.007, which establishes "Permits and Authorizations for the Take of Florida Endangered and Threatened Species." This rule was first established in 2010 and has been

AMERICAN OVERSIGHT

revised in 2013, 2015, 2016 and 2017. "Take" is defined in Rule 68A-27.001(4) as:

> to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in such conduct. The term "harm" in the definition of take means an act which actually kills or injures fish or wildlife. Such act may include significant habitat modification or degradation where it actually kills or injures wildlife by significantly impairing essential behavioral patterns, including breeding, feeding or sheltering. The term "harass" in the definition of take means an intentional or negligent act or omission which creates the likelihood of injury to wildlife by annoying it to such an extent as to significantly disrupt normal behavioral patterns which include, but are not limited to, breeding, feeding or sheltering.

In July 2015, Rule 68A-4.009, which provides for "Florida Black Bear Conservation" was adopted by FWC. This rule allows FWC to authorize and/or forbid any person to "take, possess, injure, shoot, collect, or sell black bear or their parts…" 68A-4.009(1).

FWC is not complying with Florida Law

Section 120.52(8), Fla. Stat. defines "invalid exercise of delegated legislative authority "as "action which goes beyond the powers, functions, and duties delegated by the Legislature." The provision further states that:

> [a] grant of rulemaking authority is necessary but not sufficient to allow an agency to adopt a rule; a

AMERICAN OVERSIGHT

> specific law to be implemented is also required. An agency may adopt only rules that implement or interpret the specific powers and duties granted by the enabling statute. No agency shall have authority to adopt a rule only because it is reasonably related to the purpose of the enabling legislation and is not arbitrary and capricious or is within the agency's class of powers and duties, nor shall an agency have the authority to implement statutory provisions setting forth general legislative intent or policy. Statutory language granting rulemaking authority or generally describing the powers and functions of an agency shall be construed to extend no further than implementing or interpreting the specific powers and duties conferred by the enabling statute.

This language was intended to restrict agency rulemaking. *State Bd. of Trustees of the Internal Improvement Trust Fund v. Day Cruise Ass'n*, 794 so.2d 696, 699 (Fla. 1st DCA 2001).

Rulemaking by FWC relating to state endangered and threatened species is governed by Chapter 120, Florida Statutes. *Wilkinson v. Florida Fish and Wildlife Commission*, 853 So.1088 (Fla. 1st DCA 2003).

FWC rules relating to threatened species constitute an invalid exercise of legislative power because they fail to conform to the rulemaking requirements established in §120.54(3)(a)1, Fla. Stat., as required by § 120.52(8)(b), Fla. Stat. Specifically, the rules at issue fail to make "a reference to the grant of rulemaking authority pursuant to which the rule is adopted; and a reference to the section or subsection of the Florida Statutes

AMERICAN OVERSIGHT

or the Laws of Florida being implemented or interpreted[]" as required by §120.54(3)(a)1, Fla. Stat. Although the contested rules reference rulemaking authority from the Florida Constitution, Article IV, Section 9, they fail to reference *any* statutory rulemaking authority, rending the contested rules invalid. *State of Florida, Dept. of Financial Services v. Brown*, 108 So.3d 723 (1st DCA 2013).

Although the Florida Endangered and Threatened Species Act, § 379.2291, Fla. Stat. expressly provides that a threatened species is one that "exists in such small populations as to become endangered if it is subjected to increased stress as a result of further modification of its environment[,]" §379.2291(3)(c), Fla. Stat., the contested rules fail to follow the statute's plain language. The contested rules do not address the Legislature's determination that "increased stress as a result of further modification of its environment" is a key element in determining which species are to be classified as threatened. This key provision is ignored in the rules. Thus, the contested rules improperly modify and contravene the Act, in violation of §120.52(8)(c), Fla. Stat.:

a. Rule 68A-270001, which establishes the "purpose and intent" of FWC's Endangered and Threatened Species program, fails to include, require and/or provide for "the increased stress as a result of further

AMERICAN OVERSIGHT

modification of its environment" upon "state-designated threatened species," as required by § 379.2291, Fla. Stat.

b. Rule 68A-27001(3), which establishes FWC's administrative definition of "state-designated threatened species," fails to include, require and/or provide for any analysis of "increased stress as a result of further modification of [a species'] environment[,]" as required by § 379.2291, Fla. Stat. Instead, the rule erroneously fixates on an agency determination based upon "reduction in population size" (Rule 68A-27001(3)(a)), *or* "geographic range" (Rule 68A-27001(3)(b)), *or* "extreme fluctuations" (Rule 68A-27001(3)(c)) *or* "very small or restricted" population size (Rule 68A-27001(3)(d)). The rule thus violates §120.52(8)(c), Fla. Stat.

c. Rule 68A-27.0007, which establishes "permits and authorizations for the take of Florida endangered and threatened species, fails to include, require and/or provide for any required analysis of "increased stress as a result of further modification of [a species'] environment[,]" as required by §379.2291, Fla. Stat., in violation of §120.52(8)(c), Fla. Stat.

d. Rule 68A-27.0012, which establishes "Procedure for Listing and Removing Species from Florida's Endangered and Threatened Species List[,]" does not include, require and/or provide for analysis of "increased

AMERICAN OVERSIGHT

stress as a result of further modification of [a species'] environment" into the FWC procedure for determining whether a species should be listed or de-listed as threatened. Subsection 68A-27.0012(2)(a) erroneously fails to incorporate, require and/or provide for analysis of "increased stress as a result of further modification of [a species'] environment[,]" in its criteria for designating those species to whom the state threatened designation shall not apply, in contravention of § 379.2291, Fla. Stat. Similarly, subsection 68A-27.0012(2)(b), which requires evaluation requests for a state designated threatened species, does not include any criteria requiring analysis of "increased stress as a result of further modification of [a species'] environment[,]" in its criteria of those species to whom the state threatened designation shall not apply, in contravention of § 379.2291, Fla. Stat. Subsection 68A-27.0012(2)(c) provides a procedure for "[determining when changes in listing status are warranted," yet fails to include any requirement for analyzing "increased stress as a result of further modification of [a species'] environment[,]" in its evaluation criteria for those species to whom the state threatened designation shall not apply, in contravention of § 379.2291, Fla. Stat. The "Biological vulnerability screening" protocol set forth in 68A-27.0012(2)(c)(1) for determining if a state designated threatened species merits a listing status change establishes

AMERICAN OVERSIGHT

a "final biological score" that fails to include any assessment of whether there is "increased stress as a result of further modification of its environment" to a species under review, again in contravention of § 379.2291, Fla. Stat. Finally, the "Biological Status Review" protocol set forth in 68A-27.0012(2)(c)2 fails to incorporate any assessment or consideration of whether there is "increased stress as a result of further modification of its environment" to a state designated threatened species under review, again in contravention of § 379.2291, Fla. Stat.

Rule 68A-4.009, entitled "Florida Black Bear Conservation" was adopted as a new rule in August 2012, after the erroneous de-listing of the Florida Black Bear as a threatened species. This contested rule thus violates § 120.52(8), Fla. Stat. because the de-listing of the bear was unlawful.

RELIEF REQUESTED

In a spirit of cooperation and good faith, Bear Warriors United asks the FWC to grant the following relief:

a. FWC enters into new rulemaking necessary to lawfully implement section 379.2291, Florida Statutes in connection with "threatened species."

b. Rescind the de-listing of the Florida Black Bear from threatened status.

To: Brandes, Jeff <BRANDES.JEFF@flsenate.gov>
Subject: Senate bill 1128 ; impairment of contract ?

Dear Senator,

Recently we became condo owners in a community that restricts rental activity. Senate bill 1128 appears to be an effort to negate that restriction which is part of the overall contract which includes the declaration of condominium and present rules established under the authority of the declaration.

The concept of freeing owners from contract provisions in condominium communities is not new to Florida. Back in the mid 1970s the legislature passed a law negating escalation clauses in leases associated with condominium property.

In Fleeman v Case 342 So2nd 815 (Fl 1976) the Florida Supreme Court held that such contractual matters were protected by the contract clause of the Florida Constitution. The Court ruled the statute unconstitutional as an invasion of contractual agreements.

Upon reading Senate Bill 1128 it appears that application of the terms of the bill might well fall under Fleeman as impairment of contract. Please consider having legal staff review the question prior to further consideration of the bill.

The retro / contract clause question could be remedied with a short sentence added to the bill noting that the bill only applies prospectively. The principle of law that contracts incorporate the law at the time of entering the contract would be upheld.

Regards , Walt Logan

Subject: Senator Brandes - Adult Use Marijuana Draft
Attachment(s): "Adult Use Draft 1.3.20 for Senator Brandes (with comments).docx"

Hi Joey,

Thanks for the heads up on the Senator's interview today.

Attached you will find the almost complete draft of the marijuana bill. You will not see substantial changes in the language moving forward before the bill is filed – only technical things.

Hopefully this gives you something concrete to go off of.

Please let me know if you need anything at all.

Best,

Vanessa Thompson
Legislative Assistant to State Senator Jeff Brandes
Thompson.Vanessa@flsenate.gov
District: (727) 563-2100
Capitol: (850) 487-5024
Jeff Brandes – District 24

AMERICAN OVERSIGHT

24-00725-20

A bill to be entitled

An act relating to the availability of marijuana for adult use; amending s. 212.08, F.S.; revising the sales tax exemption for the sale of marijuana and marijuana delivery devices to only include sales to qualified patients or caregivers; amending s. 381.986, F.S.; revising provisions related to the licensure and functions of medical marijuana treatment centers (MMTCs); requiring the Department of Health to adopt by rule certain operating standards and procedures; requiring the department to adopt by rule a certain MMTC registration form; specifying registration requirements; providing that a registration expires within a specified timeframe; specifying that registration is not sufficient for certain operations; requiring an MMTC to obtain separate operating licenses for certain operations; specifying application requirements for MMTCs to obtain cultivation licenses and processing licenses; providing for the expiration of and renewal of such licenses; requiring an MMTC to obtain a facility permit before cultivating or processing marijuana in the facility; authorizing MMTCs licensed to cultivate or process marijuana to use contractors to assist with the cultivation and processing of marijuana under certain conditions; providing for the destruction of certain marijuana byproducts within a specified timeframe after their production; authorizing MMTCs licensed to cultivate and process marijuana to

Commented [GO1]: Vanessa, this draft incorporates the language given to us by the Criminal Justice Committee (I've highlighted those portions to make it easier for you to review. I've also left the outstanding comments and questions for you to share with the Senator. This bill still needs to go through a final technical edit so I'm sharing this with you now and will release the final edited version this afternoon. If the Senator wants to make any changes, please let me know as soon as possible today, otherwise you will need to put in a redraft request once we've release the bill to you guys.

Thanks!
Oaj

before hiring or contracting with any such person; requiring the department to adopt by rule a registration form that includes specified information; requiring the department to register persons who satisfy specified conditions and issue them MMTC employee identification cards; requiring a registered person and the MMTC to update the department within a specified timeframe if certain information or the person's employment status changes; authorizing the department to contract with vendors to issue MMTC employee identification cards; requiring the department to inspect an MMTC and its facilities upon receipt of a complaint and to inspect each permitted facility at least biennially; authorizing the department to conduct additional inspections of a facility under certain circumstances; authorizing the department to impose administrative penalties on an MMTC for violating certain provisions; requiring the department to refuse to renew an MMTC's cultivation, processing, retail, or transportation license under certain circumstances; revising provisions related to penalties and fees to conform to changes made by the act; providing construction; conforming provisions to changes made by the act; creating s. 381.990, F.S.; authorizing an adult 21 years of age or older to purchase, possess, use, transport, or transfer to another adult 21 years of age or older marijuana products and marijuana delivery devices under certain circumstances; providing that such marijuana products

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006122

or marijuana delivery devices must be purchased from an MMTC licensed by the department for the retail sale of marijuana and registered with the Department of Business and Professional Regulation (DBPR) for sale of marijuana for adult use; clarifying that a private property owner may restrict the smoking or vaping of marijuana on his or her property but may not prevent his or her tenants from using marijuana by other means; providing that certain provisions do not exempt a person from prosecution for a criminal offense related to impairment or intoxication related to the use of marijuana and do not relieve a person from any legal requirement to submit to certain tests to detect the presence of a controlled substance; requiring the Department of Agriculture and Consumer Services to conduct a study on the advisability of allowing the cultivation of marijuana by members of the public for private use, including use of a specified model; requiring the department to report the results of the study to the Governor and the Legislature by a specified date; amending s. 893.13, F.S.; amending s. 893.13, F.S.; authorizing a person 21 years of age or older to possess marijuana products in a specified amount and to deliver marijuana products to another person 21 years of age or older, under certain circumstances; providing criminal penalties for the delivery or possession of marijuana products by a person younger than 21 years of age under certain circumstances; creating s. 893.1352, F.S.; providing

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006123

legislative intent; providing for the retroactive applicability of s. 893.13, F.S.; requiring certain sentences for specified offenses; requiring sentence review hearings for individuals serving certain sentences for specified crimes; providing resentencing procedures; requiring the waiver of certain conviction-related fines, fees, and costs under certain circumstances; amending s. 893.147, F.S.; authorizing a person 21 years of age or older to possess, use, transport, or deliver, without consideration, a marijuana delivery device to a person 21 years of age or older; providing criminal penalties for a person younger than 21 years of age who possesses, uses, transports, or delivers, without consideration, a marijuana delivery device to a person 21 years of age or older; creating s. 943.0586, F.S.; defining terms; authorizing an individual convicted of certain crimes to petition the court for expunction of his or her criminal history under certain circumstances; requiring the individual to first obtain a certificate of eligibility from the Department of Law Enforcement; requiring the department to adopt rules establishing the procedures for applying for and issuing such certificates; requiring the department to issue a certificate under certain circumstances; providing for the expiration of the certificate; providing requirements for the petition for expunction; providing penalties; providing for the court's authority over its own

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006124

procedures, with an exception; requiring the court to order the expunction of a criminal history record under certain circumstances; clarifying that expunction of certain criminal history records does not affect eligibility for expunction of other criminal history records; providing procedures for processing expunction petitions and orders; providing that a person granted an expunction may lawfully deny or fail to acknowledge the underlying arrest or conviction, with exceptions; providing that a person may not be deemed to have committed perjury or otherwise held liable for giving a false statement if he or she fails to recite or acknowledge an expunged criminal history record; amending s. 893.15, F.S.; conforming a provision to changes made by the act; providing effective dates.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Paragraph (l) of subsection (2) of section 212.08, Florida Statutes, is amended to read:

212.08 Sales, rental, use, consumption, distribution, and storage tax; specified exemptions.—The sale at retail, the rental, the use, the consumption, the distribution, and the storage to be used or consumed in this state of the following are hereby specifically exempt from the tax imposed by this chapter.

(2) EXEMPTIONS; MEDICAL.—

(l) Marijuana and marijuana delivery devices, as defined in

Commented [GO2]: This may trigger a tax bill -- need to discuss with Finance & Tax Committee. It's not explicitly authorizing a tax but by revising this exemption, the effect will be that adult use marijuana may be taxed. If the intent is to impose a tax, perhaps the Senator should prescribe the amount in a separate tax bill.

Commented [RJ3R3]: Please see: s. 19(d)(2)c., Art. VII of the State Constitution, which provides that decreasing or eliminating a state tax or fee exemption or credit falls within the definition of "raise."

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006125

s. 381.986, are exempt from the taxes imposed under this chapter when they are purchased by a qualified patient or a caregiver, as those terms are defined in s. 381.986.

Section 2. Paragraphs (d) through (h), (j), and (k) of subsection (1), paragraph (b) of subsection (3), paragraph (f) of subsection (4), paragraphs (a) and (f) of subsection (5), paragraph (b) of subsection (6), subsections (8) through (12), paragraphs (a), (b), (c), and (e) of subsection (14), and subsection (17) of section 381.986, Florida Statutes, are amended to read:

381.986 Medical use of marijuana.—

(1) DEFINITIONS.—As used in this section, the term:

(d) "Edibles" means commercially produced food items made with marijuana oil, but no other form of marijuana, that are produced and dispensed by a medical marijuana treatment center (MMTC).

(e) "Low-THC cannabis" means a plant of the genus Cannabis, the dried flowers of which contain 0.8 percent or less of tetrahydrocannabinol and more than 10 percent of cannabidiol weight for weight; the seeds thereof; the resin extracted from any part of such plant; or any compound, manufacture, salt, derivative, mixture, or preparation of such plant or its seeds or resin that is dispensed from an MMTC ~~a medical marijuana treatment center~~.

(f) "Marijuana" means all parts of any plant of the genus Cannabis, whether growing or not; the seeds thereof; the resin extracted from any part of the plant; and every compound, manufacture, salt, derivative, mixture, or preparation of the plant or its seeds or resin, including low-THC cannabis, which

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006126

are dispensed from an MMTC ~~a medical marijuana treatment center~~ for medical use by a qualified patient.

(g) "Marijuana delivery device" means an object used, intended for use, or designed for use in preparing, storing, ingesting, inhaling, or otherwise introducing marijuana into the human body, ~~and~~ which object is dispensed from an MMTC ~~a medical marijuana treatment center~~ for medical use by a qualified patient; however, such objects ~~except that delivery devices~~ that are intended solely for the medical use of marijuana by smoking need not be dispensed from an MMTC and ~~a medical marijuana treatment center in order to~~ qualify as marijuana delivery devices.

(h) "Marijuana testing laboratory" means a facility certified by the department pursuant to s. 381.988 which ~~that~~ collects and analyzes marijuana samples from an MMTC ~~a medical marijuana treatment center and has been certified by the department pursuant to s. 381.988~~.

(j) "Medical use" means the acquisition, possession, use, delivery, transfer, or administration of marijuana authorized by a physician certification. The term does not include:

1. Possession, use, or administration of marijuana that was not purchased or acquired from an MMTC ~~a medical marijuana treatment center~~.

2. Possession, use, or administration of marijuana in the form of commercially produced food items other than edibles or of marijuana seeds.

3. Use or administration of any form or amount of marijuana in a manner that is inconsistent with the qualified physician's directions or physician certification.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006127

4. Transfer of marijuana to a person other than the qualified patient for whom it was authorized or the qualified patient's caregiver on behalf of the qualified patient.

5. Use or administration of marijuana in the following locations:

a. On any form of public transportation, except for low-THC cannabis not in a form for smoking.

b. In any public place, except for low-THC cannabis not in a form for smoking.

c. In a qualified patient's place of employment, except when permitted by his or her employer.

d. In a state correctional institution, as defined in s. 944.02, or a correctional institution, as defined in s. 944.241.

e. On the grounds of a preschool, primary school, or secondary school, except as provided in s. 1006.062.

f. In a school bus, a vehicle, an aircraft, or a motorboat, except for low-THC cannabis not in a form for smoking.

6. The smoking of marijuana in an enclosed indoor workplace as defined in s. 386.203(5).

(k) "Physician certification" means a qualified physician's authorization for a qualified patient to receive marijuana and a marijuana delivery device from an MMTC ~~a medical marijuana treatment center~~.

(3) QUALIFIED PHYSICIANS AND MEDICAL DIRECTORS.—

(b) A qualified physician may not be employed by, or have any direct or indirect economic interest in, a medical marijuana treatment center (MMTC) or marijuana testing laboratory.

(4) PHYSICIAN CERTIFICATION.—

(f) A qualified physician may not issue a physician

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006128

certification for more than three 70-day supply limits of marijuana or more than six 35-day supply limits of marijuana in a form for smoking. The department shall quantify by rule a daily dose amount with equivalent dose amounts for each allowable form of marijuana dispensed by a medical marijuana treatment center (MMTC). The department shall use the daily dose amount to calculate a 70-day supply.

1. A qualified physician may request an exception to the daily dose amount limit, the 35-day supply limit of marijuana in a form for smoking, and the 4-ounce possession limit of marijuana in a form for smoking established in paragraph (14)(a). The request shall be made electronically on a form adopted by the department in rule and must include, at a minimum:

a. The qualified patient's qualifying medical condition.

b. The dosage and route of administration that was insufficient to provide relief to the qualified patient.

c. A description of how the patient will benefit from an increased amount.

d. The minimum daily dose amount of marijuana that would be sufficient for the treatment of the qualified patient's qualifying medical condition.

2. A qualified physician must provide the qualified patient's records upon the request of the department.

3. The department shall approve or disapprove the request within 14 days after receipt of the complete documentation required by this paragraph. The request shall be deemed approved if the department fails to act within this time period.

(5) MEDICAL MARIJUANA USE REGISTRY.—

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006129

(a) The department shall create and maintain a secure, electronic, and online medical marijuana use registry for physicians, patients, and caregivers as provided under this section. The medical marijuana use registry must be accessible to law enforcement agencies, qualified physicians, and medical marijuana treatment centers (MMTCs) to verify the authorization of a qualified patient or a caregiver to possess marijuana or a marijuana delivery device and record the marijuana or marijuana delivery device dispensed. The medical marijuana use registry must also be accessible to practitioners licensed to prescribe prescription drugs to ensure proper care for patients before medications that may interact with the medical use of marijuana are prescribed. The medical marijuana use registry must prevent an active registration of a qualified patient by multiple physicians.

(f) The department may revoke the registration of a qualified patient or caregiver who cultivates marijuana or who acquires, possesses, or delivers marijuana from any person or entity other than an MMTC ~~a medical marijuana treatment center~~.

(6) CAREGIVERS.—

(b) A caregiver must:

1. Not be a qualified physician and not be employed by or have an economic interest in a medical marijuana treatment center (MMTC) or a marijuana testing laboratory.

2. Be 21 years of age or older and a resident of this state.

3. Agree in writing to assist with the qualified patient's medical use of marijuana.

4. Be registered in the medical marijuana use registry as a

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006130

caregiver for no more than one qualified patient, except as provided in this paragraph.

5. Successfully complete a caregiver certification course developed and administered by the department or its designee, which must be renewed biennially. The price of the course may not exceed $100.

6. Pass a level 2 background screening pursuant to chapter 435 ~~subsection (9)~~, unless the patient is a close relative of the caregiver. In addition to the disqualifying offenses specified in s. 435.04(2) and (3), a person may not serve as a caregiver if he or she has an arrest awaiting final disposition for; has been found guilty of, regardless of adjudication; or has entered a plea of nolo contendere or guilty to an offense under chapter 837, chapter 895, or chapter 896 or a similar law of another jurisdiction.

(8) MEDICAL MARIJUANA TREATMENT CENTERS.—

~~(a) The department shall license medical marijuana treatment centers to ensure reasonable statewide accessibility and availability as necessary for qualified patients registered in the medical marijuana use registry and who are issued a physician certification under this section.~~

~~1. As soon as practicable, but no later than July 3, 2017, the department shall license as a medical marijuana treatment center any entity that holds an active, unrestricted license to cultivate, process, transport, and dispense low-THC cannabis, medical cannabis, and cannabis delivery devices, under former s. 381.986, Florida Statutes 2016, before July 1, 2017, and which meets the requirements of this section. In addition to the authority granted under this section, these entities are~~

Commented [GO4]: Revised because we took out the background screening requirements under subsection (9)

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006131

~~authorized to dispense low-THC cannabis, medical cannabis, and cannabis delivery devices ordered pursuant to former s. 381.986, Florida Statutes 2016, which were entered into the compassionate use registry before July 1, 2017, and are authorized to begin dispensing marijuana under this section on July 3, 2017. The department may grant variances from the representations made in such an entity's original application for approval under former s. 381.986, Florida Statutes 2014, pursuant to paragraph (e).~~

~~2. The department shall license as medical marijuana treatment centers 10 applicants that meet the requirements of this section, under the following parameters:~~

~~a. As soon as practicable, but no later than August 1, 2017, the department shall license any applicant whose application was reviewed, evaluated, and scored by the department and which was denied a dispensing organization license by the department under former s. 381.986, Florida Statutes 2014; which had one or more administrative or judicial challenges pending as of January 1, 2017, or had a final ranking within one point of the highest final ranking in its region under former s. 381.986, Florida Statutes 2014; which meets the requirements of this section; and which provides documentation to the department that it has the existing infrastructure and technical and technological ability to begin cultivating marijuana within 30 days after registration as a medical marijuana treatment center.~~

~~b. As soon as practicable, the department shall license one applicant that is a recognized class member of Pigford v. Glickman, 185 F.R.D. 82 (D.D.C. 1999), or In Re Black Farmers Litig., 856 F. Supp. 2d 1 (D.D.C. 2011). An applicant licensed~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006132

~~under this sub-subparagraph is exempt from the requirement of subparagraph (b)2.~~

~~c. As soon as practicable, but no later than October 3, 2017, the department shall license applicants that meet the requirements of this section in sufficient numbers to result in 10 total licenses issued under this subparagraph, while accounting for the number of licenses issued under sub-subparagraphs a. and b.~~

~~3. For up to two of the licenses issued under subparagraph 2., the department shall give preference to applicants that demonstrate in their applications that they own one or more facilities that are, or were, used for the canning, concentrating, or otherwise processing of citrus fruit or citrus molasses and will use or convert the facility or facilities for the processing of marijuana.~~

~~4. Within 6 months after the registration of 100,000 active qualified patients in the medical marijuana use registry, the department shall license four additional medical marijuana treatment centers that meet the requirements of this section. Thereafter, the department shall license four medical marijuana treatment centers within 6 months after the registration of each additional 100,000 active qualified patients in the medical marijuana use registry that meet the requirements of this section.~~

~~5. Dispensing facilities are subject to the following requirements:~~

~~a. A medical marijuana treatment center may not establish or operate more than a statewide maximum of 25 dispensing facilities, unless the medical marijuana use registry reaches a~~

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006133

~~total of 100,000 active registered qualified patients. When the medical marijuana use registry reaches 100,000 active registered qualified patients, and then upon each further instance of the total active registered qualified patients increasing by 100,000, the statewide maximum number of dispensing facilities that each licensed medical marijuana treatment center may establish and operate increases by five.~~

~~b. A medical marijuana treatment center may not establish more than the maximum number of dispensing facilities allowed in each of the Northwest, Northeast, Central, Southwest, and Southeast Regions. The department shall determine a medical marijuana treatment center's maximum number of dispensing facilities allowed in each region by calculating the percentage of the total statewide population contained within that region and multiplying that percentage by the medical marijuana treatment center's statewide maximum number of dispensing facilities established under sub-subparagraph a., rounded to the nearest whole number. The department shall ensure that such rounding does not cause a medical marijuana treatment center's total number of statewide dispensing facilities to exceed its statewide maximum. The department shall initially calculate the maximum number of dispensing facilities allowed in each region for each medical marijuana treatment center using county population estimates from the Florida Estimates of Population 2016, as published by the Office of Economic and Demographic Research, and shall perform recalculations following the official release of county population data resulting from each United States Decennial Census. For the purposes of this subparagraph:~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006134

~~(I) The Northwest Region consists of Bay, Calhoun, Escambia, Franklin, Gadsden, Gulf, Holmes, Jackson, Jefferson, Leon, Liberty, Madison, Okaloosa, Santa Rosa, Taylor, Wakulla, Walton, and Washington Counties.~~

~~(II) The Northeast Region consists of Alachua, Baker, Bradford, Clay, Columbia, Dixie, Duval, Flagler, Gilchrist, Hamilton, Lafayette, Levy, Marion, Nassau, Putnam, St. Johns, Suwannee, and Union Counties.~~

~~(III) The Central Region consists of Brevard, Citrus, Hardee, Hernando, Indian River, Lake, Orange, Osceola, Pasco, Pinellas, Polk, Seminole, St. Lucie, Sumter, and Volusia Counties.~~

~~(IV) The Southwest Region consists of Charlotte, Collier, DeSoto, Glades, Hendry, Highlands, Hillsborough, Lee, Manatee, Okeechobee, and Sarasota Counties.~~

~~(V) The Southeast Region consists of Broward, Miami-Dade, Martin, Monroe, and Palm Beach Counties.~~

~~c. If a medical marijuana treatment center establishes a number of dispensing facilities within a region that is less than the number allowed for that region under sub-subparagraph b., the medical marijuana treatment center may sell one or more of its unused dispensing facility slots to other licensed medical marijuana treatment centers. For each dispensing facility slot that a medical marijuana treatment center sells, that medical marijuana treatment center's statewide maximum number of dispensing facilities, as determined under sub-subparagraph a., is reduced by one. The statewide maximum number of dispensing facilities for a medical marijuana treatment center that purchases an unused dispensing facility slot is~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006135

~~increased by one per slot purchased. Additionally, the sale of a dispensing facility slot shall reduce the seller's regional maximum and increase the purchaser's regional maximum number of dispensing facilities, as determined in sub-subparagraph b., by one for that region. For any slot purchased under this sub-subparagraph, the regional restriction applied to that slot's location under sub-subparagraph b. before the purchase shall remain in effect following the purchase. A medical marijuana treatment center that sells or purchases a dispensing facility slot must notify the department within 3 days of sale.~~

~~d. This subparagraph shall expire on April 1, 2020.~~

~~If this subparagraph or its application to any person or circumstance is held invalid, the invalidity does not affect other provisions or applications of this act which can be given effect without the invalid provision or application, and to this end, the provisions of this subparagraph are severable.~~

~~(b) An applicant for licensure as a medical marijuana treatment center shall apply to the department on a form prescribed by the department and adopted in rule. The department shall adopt rules pursuant to ss. 120.536(1) and 120.54 establishing a procedure for the issuance and biennial renewal of licenses, including initial application and biennial renewal fees sufficient to cover the costs of implementing and administering this section, and establishing supplemental licensure fees for payment beginning May 1, 2018, sufficient to cover the costs of administering ss. 381.989 and 1004.4351. The department shall identify applicants with strong diversity plans reflecting this state's commitment to diversity and implement~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006136

~~training programs and other educational programs to enable minority persons and minority business enterprises, as defined in s. 288.703, and veteran business enterprises, as defined in s. 295.187, to compete for medical marijuana treatment center licensure and contracts. Subject to the requirements in subparagraphs (a)2.-4., the department shall issue a license to an applicant if the applicant meets the requirements of this section and pays the initial application fee. The department shall renew the licensure of a medical marijuana treatment center biennially if the licensee meets the requirements of this section and pays the biennial renewal fee. An individual may not be an applicant, owner, officer, board member, or manager on more than one application for licensure as a medical marijuana treatment center. An individual or entity may not be awarded more than one license as a medical marijuana treatment center. An applicant for licensure as a medical marijuana treatment center must demonstrate:~~

~~1. That, for the 5 consecutive years before submitting the application, the applicant has been registered to do business in the state.~~

~~2. Possession of a valid certificate of registration issued by the Department of Agriculture and Consumer Services pursuant to s. 581.131.~~

~~3. The technical and technological ability to cultivate and produce marijuana, including, but not limited to, low-THC cannabis.~~

~~4. The ability to secure the premises, resources, and personnel necessary to operate as a medical marijuana treatment center.~~

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006137

~~5. The ability to maintain accountability of all raw materials, finished products, and any byproducts to prevent diversion or unlawful access to or possession of these substances.~~

~~6. An infrastructure reasonably located to dispense marijuana to registered qualified patients statewide or regionally as determined by the department.~~

~~7. The financial ability to maintain operations for the duration of the 2-year approval cycle, including the provision of certified financial statements to the department.~~

~~a. Upon approval, the applicant must post a $5 million performance bond issued by an authorized surety insurance company rated in one of the three highest rating categories by a nationally recognized rating service. However, a medical marijuana treatment center serving at least 1,000 qualified patients is only required to maintain a $2 million performance bond.~~

~~b. In lieu of the performance bond required under sub-subparagraph a., the applicant may provide an irrevocable letter of credit payable to the department or provide cash to the department. If provided with cash under this sub-subparagraph, the department shall deposit the cash in the Grants and Donations Trust Fund within the Department of Health, subject to the same conditions as the bond regarding requirements for the applicant to forfeit ownership of the funds. If the funds deposited under this sub-subparagraph generate interest, the amount of that interest shall be used by the department for the administration of this section.~~

~~8. That all owners, officers, board members, and managers~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006138

~~have passed a background screening pursuant to subsection (9).~~

~~9. The employment of a medical director to supervise the activities of the medical marijuana treatment center.~~

~~10. A diversity plan that promotes and ensures the involvement of minority persons and minority business enterprises, as defined in s. 288.703, or veteran business enterprises, as defined in s. 295.187, in ownership, management, and employment. An applicant for licensure renewal must show the effectiveness of the diversity plan by including the following with his or her application for renewal:~~

~~a. Representation of minority persons and veterans in the medical marijuana treatment center's workforce;~~

~~b. Efforts to recruit minority persons and veterans for employment; and~~

~~c. A record of contracts for services with minority business enterprises and veteran business enterprises.~~

~~(c) A medical marijuana treatment center may not make a wholesale purchase of marijuana from, or a distribution of marijuana to, another medical marijuana treatment center, unless the medical marijuana treatment center seeking to make a wholesale purchase of marijuana submits proof of harvest failure to the department.~~

(a)~~(d)~~ Department responsibilities.—The department shall do all of the following:

1. Adopt by rule all of the following:

a. Operating standards for the cultivation, processing, packaging, and labeling of marijuana.

b. Standards for the sale of marijuana.

c. Procedures and requirements for all of the following:

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006139

(I) The registration and registration renewal of medical marijuana treatment centers (MMTCs).

(II) The issuance and renewal of cultivation, processing, retail, and transportation operating licenses.

(III) The issuance and renewal of cultivation, processing, dispensing, and storage facility permits and of vehicle permits.

(IV) The registration of all principals, employees, and contractors of an MMTC who will participate in the operations of the MMTC.

(V) The issuance of MMTC employee identification cards to registered principals, employees, and contractors of MMTCs.

2. Establish, maintain, and control a computer software tracking system that traces marijuana from seed to sale and allows real-time, 24-hour access by the department to data from all MMTCs ~~medical marijuana treatment centers~~ and marijuana testing laboratories. The tracking system must allow for integration of other seed-to-sale systems and, at a minimum, include notification of when marijuana seeds are planted, when marijuana plants are harvested and destroyed, and when marijuana is transported, sold, stolen, diverted, or lost. Each MMTC must ~~medical marijuana treatment center shall~~ use the seed-to-sale tracking system established by the department or integrate its own seed-to-sale tracking system with the seed-to-sale tracking system established by the department. Each MMTC ~~medical marijuana treatment center~~ may use its own seed-to-sale system until the department establishes a seed-to-sale tracking system. The department may contract with a vendor to establish the seed-to-sale tracking system. The vendor selected by the department may not have a contractual relationship with the department to

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006140

perform any services pursuant to this section other than the seed-to-sale tracking system. The vendor may not have a direct or indirect financial interest in an MMTC ~~a medical marijuana treatment center~~ or a marijuana testing laboratory.

(b) Registration.—

1. The department shall adopt by rule an MMTC registration form that must require at least all of the following:

a. The applicant's full legal name.

b. The physical address of each location where the applicant will apply for a facility permit to cultivate, process, dispense, or store marijuana.

c. The name, address, and date of birth of the applicant's principals.

d. The name, address, and date of birth of the applicant's current employees and contractors who will participate in the operations of the MMTC.

e. The operation or operations in which the applicant intends to engage, which may include one or more of the following:

(I) Cultivation.

(II) Processing.

(III) Retail sales.

(IV) Transportation.

2. To be registered as an MMTC, an applicant must submit all of the following to the department:

a. The applicant's completed registration form.

b. Personnel registration application forms, as described in subsection (9), for all principals, employees, and contractors listed on the applicant's registration form who will

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006141

participate in the operations of the MMTC. The department may not register the applicant as an MMTC until all principals, employees, and contractors listed on the applicant's registration form have registered with the department and are issued MMTC employee identification cards.

c. Proof that all principals listed on the applicant's registration form who will not participate in the operations of the MMTC have passed a level 2 background screening pursuant to chapter 435 within the previous year.

d. Proof that the MMTC has the capability to comply with seed-to-sale tracking system requirements.

e. Proof of the applicant's financial ability to maintain operations for the duration of the registration.

f. A $500,000 performance and compliance bond, or a $1 million performance and compliance bond if the MMTC intends to cultivate or process marijuana, which will be forfeited if the MMTC fails to comply with:

(I) Registration requirements in this subsection during the registration period; or

(II) Material requirements of this section which are applicable to the functions the applicant intends to perform, as indicated on the registration form.

3. A registration expires 2 years after the date it is issued.

4. In addition to obtaining registration pursuant to this paragraph, an MMTC must obtain an operating license for each operation it will perform as provided in paragraph (c), paragraph (d), or paragraph (f), as applicable.

(c) Cultivation licenses and processing licenses.—

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006142

1. A registered MMTC may apply for a cultivation license or a processing license. When applying, the MMTC shall provide the department with at least all of the following:

a. A completed cultivation license or processing license application form.

b. The physical address of each location where marijuana will be cultivated, processed, or stored.

c. As applicable to the requested license or licenses:

(I) Proof of an established infrastructure, or the ability to establish an infrastructure in a reasonable amount of time, which is designed for cultivation, processing, testing, packaging, and labeling marijuana; maintaining the infrastructure's security; and preventing the theft or diversion of any marijuana.

(II) Proof that the applicant possesses the technical and technological ability to cultivate and test or process and test marijuana.

d. Proof of operating procedures designed to secure and maintain accountability for all marijuana and marijuana-related byproducts that come into the applicant's possession, and to comply with the required seed-to-sale tracking system.

2. Cultivation licenses and processing licenses expire 2 years after the date they are issued. To renew a license, the licensee must meet all of the requirements for initial licensure; must provide all of the documentation required under subparagraph 1.; and must not have any uncorrected substantial violations of the standards adopted by department rule for the cultivation, processing, testing, packaging, and labeling of marijuana.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006143

3. Before beginning cultivation or processing at any location, the licensee must obtain a facility permit from the department for that location pursuant to paragraph (g).

4. Licensees under this subsection may use contractors to assist with the cultivation or processing of marijuana, as applicable, but the licensee is ultimately responsible for all of the operations performed by each contractor relating to the cultivation or processing of marijuana and is responsible for maintaining physical possession of the marijuana at all times. All work done by a contractor must be performed at a location that has a facility permit issued by the department. A licensee using a contractor must register any principal or employee of a contractor who will be participating in the operations of the licensee as provided in subsection (9). Such principal or employee may not begin participating in the operations of the licensee until he or she has received an MMTC employee identification card from the department.

5. All marijuana byproducts that cannot be processed or reprocessed must be destroyed by the cultivation licensee or the processing licensee or their respective contractors within 30 days after the production of the byproducts.

6. Licensees under this subsection may wholesale marijuana only to other registered MMTCs. Before wholesaling marijuana, the wholesaling MMTC shall provide the purchasing MMTC with documentation showing that the marijuana meets the testing, packaging, and labeling requirements of this section. The purchasing MMTC shall review such documentation to determine that the marijuana is in compliance with this section before taking possession of the marijuana.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006144

7. Transportation or delivery of marijuana outside of the property owned by a licensee under this subsection may be performed only by an MMTC that holds a transportation license issued pursuant to paragraph (f).

~~(c) A licensed medical marijuana treatment center shall cultivate, process, transport, and dispense marijuana for medical use. A licensed medical marijuana treatment center may not contract for services directly related to the cultivation, processing, and dispensing of marijuana or marijuana delivery devices, except that a medical marijuana treatment center licensed pursuant to subparagraph (a)1. may contract with a single entity for the cultivation, processing, transporting, and dispensing of marijuana and marijuana delivery devices. A licensed medical marijuana treatment center must, at all times, maintain compliance with the criteria demonstrated and representations made in the initial application and the criteria established in this subsection. Upon request, the department may grant a medical marijuana treatment center a variance from the representations made in the initial application. Consideration of such a request shall be based upon the individual facts and circumstances surrounding the request. A variance may not be granted unless the requesting medical marijuana treatment center can demonstrate to the department that it has a proposed alternative to the specific representation made in its application which fulfills the same or a similar purpose as the specific representation in a way that the department can reasonably determine will not be a lower standard than the specific representation in the application. A variance may not be granted from the requirements in subparagraph 2. and~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006145

~~subparagraphs (b)1. and 2.~~

~~1. A licensed medical marijuana treatment center may transfer ownership to an individual or entity who meets the requirements of this section. A publicly traded corporation or publicly traded company that meets the requirements of this section is not precluded from ownership of a medical marijuana treatment center. To accommodate a change in ownership:~~

~~a. The licensed medical marijuana treatment center shall notify the department in writing at least 60 days before the anticipated date of the change of ownership.~~

~~b. The individual or entity applying for initial licensure due to a change of ownership must submit an application that must be received by the department at least 60 days before the date of change of ownership.~~

~~c. Upon receipt of an application for a license, the department shall examine the application and, within 30 days after receipt, notify the applicant in writing of any apparent errors or omissions and request any additional information required.~~

~~d. Requested information omitted from an application for licensure must be filed with the department within 21 days after the department's request for omitted information or the application shall be deemed incomplete and shall be withdrawn from further consideration and the fees shall be forfeited.~~

~~Within 30 days after the receipt of a complete application, the department shall approve or deny the application.~~

~~2. A medical marijuana treatment center, and any individual or entity who directly or indirectly owns, controls, or holds~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006146

~~with power to vote 5 percent or more of the voting shares of a medical marijuana treatment center, may not acquire direct or indirect ownership or control of any voting shares or other form of ownership of any other medical marijuana treatment center.~~

~~3. A medical marijuana treatment center may not enter into any form of profit-sharing arrangement with the property owner or lessor of any of its facilities where cultivation, processing, storing, or dispensing of marijuana and marijuana delivery devices occurs.~~

~~4. All employees of a medical marijuana treatment center must be 21 years of age or older and have passed a background screening pursuant to subsection (9).~~

~~5. Each medical marijuana treatment center must adopt and enforce policies and procedures to ensure employees and volunteers receive training on the legal requirements to dispense marijuana to qualified patients.~~

8.~~6.~~ When growing marijuana, a licensed cultivation MMTC ~~medical marijuana treatment center~~:

a. May use pesticides determined by the department, after consultation with the Department of Agriculture and Consumer Services, to be safely applied to plants intended for human consumption, but may not use pesticides designated as restricted-use pesticides pursuant to s. 487.042.

b. Shall ~~Must~~ grow marijuana within an enclosed permitted cultivation facility ~~structure~~ and in a room separate from any other plant.

c. Shall ~~Must~~ inspect seeds and growing plants for plant pests that endanger or threaten the horticultural and agricultural interests of the state in accordance with chapter

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006147

581 and any rules adopted thereunder.

d. Shall ~~Must~~ perform fumigation or treatment of plants, or remove and destroy infested or infected plants, in accordance with chapter 581 and any rules adopted thereunder.

~~7. Each medical marijuana treatment center must produce and make available for purchase at least one low-THC cannabis product.~~

9.~~8.~~ An MMTC ~~A medical marijuana treatment center~~ that produces edibles must hold a permit to operate as a food establishment pursuant to chapter 500, the Florida Food Safety Act, and must comply with all the requirements for food establishments pursuant to chapter 500 and any rules adopted thereunder. ~~Edibles may not contain more than 200 milligrams of tetrahydrocannabinol, and a single serving portion of an edible may not exceed 10 milligrams of tetrahydrocannabinol.~~ Edibles may have a tetrahydrocannabinol potency variance of no greater than 15 percent. Edibles may not be attractive to children; be manufactured in the shape of humans, cartoons, or animals; be manufactured in a form that bears any reasonable resemblance to products available for consumption as commercially available candy; or contain any color additives. To discourage consumption of edibles by children, the department shall determine by rule any shapes, forms, and ingredients allowed and prohibited for edibles. MMTCs ~~Medical marijuana treatment centers~~ may not begin processing or dispensing edibles until after the effective date of the rule. The department shall also adopt sanitation rules providing the standards and requirements for the storage, display, or dispensing of edibles.

~~9. Within 12 months after licensure, a medical marijuana~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006148

~~treatment center must demonstrate to the department that all of its processing facilities have passed a Food Safety Good Manufacturing Practices, such as Global Food Safety Initiative or equivalent, inspection by a nationally accredited certifying body. A medical marijuana treatment center must immediately stop processing at any facility which fails to pass this inspection until it demonstrates to the department that such facility has met this requirement.~~

~~10. A medical marijuana treatment center that produces prerolled marijuana cigarettes may not use wrapping paper made with tobacco or hemp.~~

10.~~11.~~ When processing marijuana, a licensed processing MMTC shall ~~medical marijuana treatment center must~~:

a. Process the marijuana within an enclosed permitted processing facility ~~structure~~ and in a room separate from other plants or products.

b. Comply with department rules when processing marijuana with hydrocarbon solvents or other solvents or gases exhibiting potential toxicity to humans. The department shall determine by rule the requirements for the ~~medical marijuana treatment centers to~~ use of such solvents or gases by MMTCs ~~exhibiting potential toxicity to humans~~.

c. Comply with federal and state laws and regulations and department rules for solid and liquid wastes. The department shall determine by rule procedures for the storage, handling, transportation, management, and disposal of solid and liquid waste generated during marijuana production and processing. The Department of Environmental Protection shall assist the department in developing such rules.

Commented [GO5]: This was added last year and was missing from the draft you sent -- does the Senator want to strike it or keep it as-is in standing text? We've struck it for now, but please advise if the Senator wants to keep it as-is.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006149

d. Test the processed marijuana using a medical marijuana testing laboratory before it is sold or dispensed. Results must be verified and signed by two MMTC ~~medical marijuana treatment center~~ employees. Before selling, wholesaling, or dispensing, the MMTC shall ~~medical marijuana treatment center must~~ determine that the test results indicate that low-THC cannabis meets the definition of low-THC cannabis, the concentration of tetrahydrocannabinol meets the potency requirements of this section, the labeling of the concentration of tetrahydrocannabinol and cannabidiol is accurate, and all marijuana is safe for human consumption and free from contaminants that are unsafe for human consumption. The department shall determine by rule which contaminants must be tested for and the maximum levels of each contaminant which are safe for human consumption. The Department of Agriculture and Consumer Services shall assist the department in developing the testing requirements for contaminants that are unsafe for human consumption in edibles. The department shall also determine by rule the procedures for the treatment of marijuana that fails to meet the testing requirements of this section, s. 381.988, or department rule. The department may select a random sample from edibles available for purchase in a dispensing facility, which must ~~shall~~ be tested by the department to determine that the edible meets the potency requirements of this section and~~,~~ is safe for human consumption~~,~~ and that the labeling of the tetrahydrocannabinol and cannabidiol concentration is accurate. An MMTC ~~A medical marijuana treatment center~~ may not require payment from the department for the sample. An MMTC shall ~~A medical marijuana treatment center must~~ recall edibles,

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006150

including all edibles made from the same batch of marijuana, which fail to meet the potency requirements of this section, which are unsafe for human consumption, or for which the labeling of the tetrahydrocannabinol and cannabidiol concentration is inaccurate. An MMTC shall ~~The medical marijuana treatment center must~~ retain records of all testing and samples of each homogenous batch of marijuana for at least 9 months. An MMTC shall ~~The medical marijuana treatment center must~~ contract with a marijuana testing laboratory to perform audits on the MMTC's ~~medical marijuana treatment center's~~ standard operating procedures, testing records, and samples and provide the results to the department to confirm that the marijuana or low-THC cannabis meets the requirements of this section and that the marijuana or low-THC cannabis is safe for human consumption. An MMTC ~~A medical marijuana treatment center~~ shall reserve two processed samples from each batch and retain such samples for at least 9 months for the purpose of such audits. An MMTC ~~A medical marijuana treatment center~~ may use a laboratory that has not been certified by the department under s. 381.988 until such time as at least one laboratory holds the required certification~~, but in no event later than July 1, 2018~~.

e. Package the marijuana in compliance with the United States Poison Prevention Packaging Act of 1970, 15 U.S.C. ss. 1471 et seq.

f. Package the marijuana in a receptacle that has a firmly affixed and legible label stating the following information:

(I) That the marijuana or low-THC cannabis meets the requirements of sub-subparagraph d.

(II) The name of the MMTC ~~medical marijuana treatment~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006151

~~center~~ from which the marijuana originates.

(III) The batch number and harvest number from which the marijuana originates and the date that the marijuana is sold or dispensed.

(IV) ~~The name of the physician who issued the physician certification.~~

~~(V) The name of the patient.~~

~~(VI)~~ The product name, if applicable, and dosage form, including concentration of tetrahydrocannabinol and cannabidiol. The product name may not contain wording commonly associated with products marketed by or to children.

(V) ~~(VII)~~ The recommended dose.

(VI) ~~(VIII)~~ A warning that it is illegal to transfer ~~medical~~ marijuana to a ~~another~~ person younger than 21 years of age.

(VII) ~~(IX)~~ A marijuana universal symbol developed by the department.

11. ~~12.~~ The MMTC that packages the marijuana ~~medical marijuana treatment center~~ shall include in each package an ~~a patient package~~ insert with information on the specific product dispensed related to:

a. Clinical pharmacology.

b. Indications and use.

c. Dosage and administration.

d. Dosage forms and strengths.

e. Contraindications.

f. Warnings and precautions.

g. Adverse reactions.

12. ~~13.~~ In addition to the packaging and labeling requirements specified in subparagraphs 10. and 11. ~~and 12.~~,

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006152

marijuana in a form for smoking must be packaged in a sealed receptacle with a legible and prominent warning to keep the receptacle away from children and a warning that states that marijuana smoke contains carcinogens and may negatively affect health. Such receptacles for marijuana in a form for smoking must be plain, opaque, and white without depictions of the product or images other than the MMTC's ~~medical marijuana treatment center's~~ department-approved logo and the marijuana universal symbol.

13.~~14.~~ The department shall adopt rules to regulate the types, appearance, and labeling of marijuana delivery devices dispensed from an MMTC ~~a medical marijuana treatment center~~. The rules must require marijuana delivery devices to have an appearance consistent with medical use.

14.~~15.~~ Each edible must ~~shall~~ be individually sealed in plain, opaque wrapping marked only with the marijuana universal symbol. ~~Where practical,~~ Each edible must ~~shall~~ be marked with the marijuana universal symbol. In addition to the packaging and labeling requirements in subparagraphs 10. and 11. ~~and 12.~~, edible receptacles must be plain, opaque, and white without depictions of the product or images other than the MMTC's ~~medical marijuana treatment center's~~ department-approved logo and the marijuana universal symbol. The receptacle must also include a list of all the edible's ingredients, storage instructions, information on the estimated amount of time for the edible to take effect, an expiration date, a legible and prominent warning to keep the receptacle away from children and pets, and a warning that the edible has not been produced or inspected pursuant to federal food safety laws.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006153

(d) Retail licenses.—

1. A registered MMTC may apply for a retail license. When applying, the MMTC must provide the department with at least all of the following:

a. A completed retail license application form.

b. A statement by the applicant which indicates whether the applicant intends to dispense by delivery. A retail licensee may not deliver marijuana without also obtaining a transportation license pursuant to paragraph (f).

c. The physical address of each location where the applicant will dispense or store marijuana.

d. Identifying information for all other current or previous retail licenses held by the applicant or any of the applicant's principals.

e. Proof of operating procedures designed to secure and maintain accountability for all marijuana that the applicant receives and possesses, to ensure that only the allowed amount of marijuana is sold or dispensed, to ensure that the specified type of marijuana is correctly dispensed to a qualified patient or his or her caregiver pursuant to a physician certification, and to monitor the medical marijuana patient registry and electronically update the registry with dispensing information.

2. A retail license expires 2 years after the date it is issued. The retail licensee must apply for license renewal before the expiration date. To renew a license, a retail licensee must meet all of the requirements for initial licensure; must provide all of the documents required under paragraph (b); and must not have any outstanding substantial violations of the applicable standards adopted by department

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006154

rule.

3. Before beginning to sell, dispense, or store marijuana, the licensee shall obtain a facility permit from the department for each location where marijuana will be sold, dispensed, or stored. If a facility's permit expires or is suspended or revoked, the MMTC must cease all applicable operations at that facility until the department inspects the facility and renews or reinstates the facility's permit.

4. A dispensing facility may not repackage or modify marijuana that has already been packaged for sale by a cultivation licensee or processing licensee, unless the repackaging is of unprocessed marijuana; is done in accordance with instructions from the cultivator; and is documented in the required seed-to-sale tracking system.

5. A retail licensee may contract with an MMTC that has a transportation license to transport marijuana between properties owned by the retail licensee, to deliver the marijuana for sale or dispensing, and to pick up returns of marijuana.

6. Onsite consumption or administration of marijuana at a dispensing facility is prohibited.

7.~~16.~~ When dispensing marijuana or a marijuana delivery device, a licensed retail MMTC ~~medical marijuana treatment center~~:

a. May dispense any active, valid order for low-THC cannabis, medical cannabis and cannabis delivery devices issued pursuant to former s. 381.986, Florida Statutes 2016, which was entered into the medical marijuana use registry before July 1, 2017.

b. May not dispense more than one ~~a~~ 70-day supply of

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006155

marijuana within any 70-day period to a qualified patient or caregiver and~~.~~ may not dispense more than one 35-day supply of marijuana in a form for smoking within any 35-day period to a qualified patient or caregiver. A 35-day supply of marijuana in a form for smoking may not exceed 2.5 ounces unless an exception to this amount is approved by the department pursuant to paragraph (4)(f).

c. Shall require ~~Must have~~ the MMTC's ~~medical marijuana treatment center's~~ employee who dispenses the marijuana or a marijuana delivery device to enter into the medical marijuana use registry his or her name or unique employee identifier.

d. When dispensing to a qualified patient or caregiver, shall ~~must~~ verify that the qualified patient and, if applicable, the caregiver~~, if applicable,~~ each have an active registration in the medical marijuana use registry and an active and valid medical marijuana use registry identification card; that~~,~~ the amount and type of marijuana dispensed matches the physician certification in the medical marijuana use registry for that qualified patient;~~,~~ and that the physician certification has not already been filled.

e. When dispensing to a qualified patient or caregiver, shall label the marijuana or the marijuana delivery device with the name of the physician who issued the physician certification and the name of the patient for whom the certification was issued before it is dispensed.

f.~~e.~~ May not dispense marijuana to a qualified patient who is younger than 18 years of age. If the qualified patient is younger than 18 years of age, marijuana may ~~only~~ be dispensed only to the qualified patient's caregiver.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006156

g. May sell marijuana to an adult 21 years of age or older pursuant to s. 381.990, provided that the MMTC is registered with the Department of Business and Professional Regulation pursuant to that section. When selling marijuana pursuant to that section, the employee selling the marijuana must determine that the appearance of the buyer is such that a prudent person would believe the buyer to be 21 years of age or older or must carefully check the buyer's driver license, identification card issued by this state or another state of the United States, passport, or United States Armed Services identification card to determine the buyer's age. Other than for the purpose of determining a buyer's age, an MMTC may not request or store any personal information provided by the buyer.

h.~~f.~~ May not dispense or sell any ~~other type of cannabis,~~ alcohol~~,~~ or illicit drug-related product~~, including pipes or wrapping papers made with tobacco or hemp, other than a marijuana delivery device required for the medical use of marijuana and which is specified in a physician certification~~.

i.~~g.~~ ~~Must,~~ Upon dispensing the marijuana or marijuana delivery device to a qualified patient or caregiver, shall record in the registry the date, time, quantity, and form of marijuana dispensed; the type of marijuana delivery device dispensed; and the name and medical marijuana use registry identification number of the qualified patient or caregiver to whom the marijuana delivery device was dispensed.

j.~~h.~~ Shall ~~Must~~ ensure that patient records are not visible to anyone other than the qualified patient, his or her caregiver, and authorized MMTC ~~medical marijuana treatment center~~ employees.

Commented [GO6]: These changes were made last year and not in your draft. We've struck it since the surrounding language was struck in your draft. Please advise if the Senator does not want to strike this language.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006157

(e)~~(f)~~ Security.—To ensure the safety and security of premises where the cultivation, processing, storing, or dispensing of marijuana occurs, and to maintain adequate controls against the diversion, theft, and loss of marijuana or marijuana delivery devices, an MMTC ~~a medical marijuana treatment center~~ shall do all of the following:

1.a. Maintain a fully operational security alarm system that secures all entry points and perimeter windows and is equipped with motion detectors; pressure switches; and duress, panic, and hold-up alarms.~~; and~~

b. Maintain a video surveillance system that records continuously, 24 hours a day, and meets all of the following criteria:

(I) Cameras are fixed in a place that allows for the clear identification of persons and activities in controlled areas of the premises. Controlled areas include grow rooms, processing rooms, storage rooms, disposal rooms or areas, and point-of-sale rooms.

(II) Cameras are fixed in entrances and exits to the premises in a place that allows recording~~, which shall record~~ from both indoor and outdoor, or ingress and egress, vantage points.

(III) Produces recorded images that ~~must~~ clearly and accurately display the time and date of recording.

c.~~(IV)~~ Retain video surveillance recordings for at least 45 days or longer upon the request of a law enforcement agency.

2. Ensure that the MMTC's ~~medical marijuana treatment center's~~ outdoor premises have sufficient lighting from dusk until dawn.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006158

3. Ensure that the indoor premises where dispensing occurs include ~~includes~~ a waiting area with sufficient space and seating to accommodate qualified patients and caregivers and at least one private consultation area that is isolated from the waiting area and the area where dispensing occurs. An MMTC ~~A medical marijuana treatment center~~ may not display products or dispense marijuana or marijuana delivery devices in the waiting area.

4. Cease dispensing ~~Not dispense from its premises~~ marijuana or ~~a~~ marijuana delivery devices from its premises ~~device~~ between the hours of 11 p.m. ~~9 p.m.~~ and 7 a.m., but may perform all other operations and deliver marijuana to qualified patients 24 hours a day.

5. Store marijuana in a secured, locked room or a vault.

6. Require at least two of its employees, or two employees of a security agency with whom it contracts, to be on the premises ~~at all times~~ where cultivation, processing, or storing of marijuana occurs, at all times.

7. Require each employee or contractor to wear a photo identification badge at all times while on the premises.

8. Require each visitor to wear a visitor pass at all times while on the premises.

9. Implement an alcohol and drug-free workplace policy.

10. Report to a local law enforcement agency within 24 hours after the MMTC ~~medical marijuana treatment center~~ is notified or becomes aware of the theft, diversion, or loss of marijuana.

(f) Transportation licenses; vehicle permits.—

1. A registered MMTC may apply for a transportation

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006159

1248 license. When applying, the MMTC shall provide the department
1249 with at least all of the following:
1250 a. The physical address of the MMTC's place of business.
1251 b. Proof that the MMTC has a documentation system in
1252 accordance with the required seed-to-sale tracking system,
1253 including transportation manifests, for transporting marijuana
1254 between licensed facilities and to qualified patients.
1255 Transportation manifests may be electronically stored and
1256 presented.
1257 c. Proof of the MMTC's compliance with health and
1258 sanitation standards for the transportation of marijuana.
1259 d. Proof that all marijuana transported between licensed
1260 facilities will be transported in tamper-evident shipping
1261 containers.
1262 2. An MMTC with a transportation license may not transport
1263 marijuana on the property of an airport, a seaport, a spaceport,
1264 or any property of the Federal Government.
1265 3. An MMTC with a transportation license may transport
1266 marijuana and marijuana delivery devices only in a vehicle that
1267 is owned or leased by the MMTC or the MMTC's contractor and for
1268 which a valid vehicle permit has been issued by the department.
1269 4. An MMTC with a transportation license may obtain a
1270 vehicle permit upon submission of an application. The MMTC must
1271 designate as the driver for each permitted vehicle an employee
1272 or contracted employee who is registered with the department and
1273 who is authorized to possess marijuana when not on the property
1274 of the MMTC. Such designation must be displayed in the vehicle
1275 at all times. Each permitted vehicle must be GPS monitored. A
1276 vehicle permit remains valid and does not expire unless the MMTC

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006160

or its contractor disposes of the permitted vehicle or the MMTC's registration or transportation license is transferred, canceled, not renewed, or revoked by the department. The department shall cancel a vehicle permit upon the request of the MMTC or its contractor.

5. When transporting marijuana, a permitted vehicle is subject to inspection and search without a search warrant by authorized employees of the department, sheriffs, deputy sheriffs, police officers, or other law enforcement officers to determine that the MMTC is operating in compliance with this section.

6. An MMTC with a transportation license may deliver, or contract for the delivery of, marijuana and marijuana delivery devices to other MMTCs, to qualified patients and caregivers within this state, and to adults 21 years of age or older within this state. A county or municipality may not prohibit deliveries of marijuana and marijuana delivery devices to qualified patients within the county or municipality. Deliveries may be made only to the qualified patient who placed the order or his or her caregiver. When delivering to a qualified patient or caregiver, an MMTC or its contractor shall verify the identity of the qualified patient upon placement of the delivery order and, again, upon delivery. When delivering marijuana to an adult 21 years of age or older, an MMTC or its contractor shall verify the age of the buyer upon placement of the order and, again, upon delivery. In order to verify the age of the buyer, the MMTC must determine that the appearance of the buyer is such that a prudent person would believe the buyer to be 21 years of age or older or must carefully check the buyer's driver license,

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006161

identification card issued by this state or another state of the United States, passport, or United States Armed Services identification card to determine the buyer's age. The department shall adopt rules specific to the delivery of marijuana which include both of the following:

a. Procedures for verifying the age and identity of the person submitting and receiving a delivery, as appropriate, including required training for delivery personnel.

b. A maximum dispensary value for all marijuana and currency that may be in the possession of a registered MMTC employee or contractor while he or she makes a delivery. The maximum value established by rule may not be less than $5,000.

7. Licensees under this subsection may use contractors to assist with the transportation of marijuana, but the licensee is ultimately responsible for all of the actions and operations of each contractor relating to the transportation of marijuana and must know the location of all marijuana at all times. To participate in the operations of a licensee under this subsection, a principal or employee of a contractor contracted by the licensee must first register with the department and be issued an MMTC employee identification card.

(g) Facility permits.—

1. Before cultivating, processing, dispensing, or storing marijuana at any location, an MMTC shall apply to the department for the applicable facility permit for that facility. The department shall adopt by rule an application form. Upon receiving a request for a permit from a licensee, the department shall inspect the facility for compliance with this section and rules adopted hereunder, and, upon a determination of

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006162

compliance, shall issue a permit to the facility. The department shall issue or deny a facility permit within 30 days after receiving the request for the permit.

2. A facility permit expires 2 years after the date it is issued. Each facility must be inspected by the department for compliance with this section and department rules before the facility's permit is renewed.

3. If a facility permit expires or is suspended or revoked, the MMTC must cease all applicable operations at that facility until the department inspects the facility and renews or reinstates the facility's permit.

4. Cultivation facilities and processing facilities:

a. Shall maintain insurance with at least $1 million of hazard and liability insurance per location; and

b. Must be secure, closed to the public, and, unless an ordinance allows the facility to be located closer, must be located at least 1,000 feet away from any existing public or private elementary or secondary school, a child care facility as defined in s. 402.302, or a licensed service provider offering substance abuse services.

5. All matters regarding the permitting and regulation of cultivation facilities and processing facilities, including the location of such facilities, are preempted to the state.

6. Dispensing facilities and storage facilities:

a. Shall maintain insurance with at least $500,000 of hazard and liability insurance for each facility where marijuana is dispensed or stored; and

b. Unless an ordinance allows the facility to be located closer, must be located at least 1,000 feet away from any

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006163

existing public or private elementary or secondary school, child care facility as defined in s. 402.302, or licensed service provider offering substance abuse services.

7. The governing body of a county or municipality, by ordinance, may prohibit or limit the number of dispensing facilities located within its jurisdiction but may not prohibit an MMTC with a retail license or its permitted storage facility from being located within its jurisdiction if the licensee is delivering or contracting to deliver marijuana within that jurisdiction. The department may not issue a facility permit for a dispensing facility in a county or municipality in which the board of county commissioners or other local governing body, as applicable, has adopted such an ordinance. A county or municipality may not require, request, or accept financial contributions or similar benefits from MMTCs, but, in addition to other taxes authorized by law, a county or municipality may levy a local business tax on a dispensing facility. An ordinance adopted by a municipality or county pursuant to this paragraph may not do any of the following:

a. Provide exclusive access to one or several individuals or entities to operate dispensing facilities within the jurisdiction.

b. Prohibit specific individuals or entities from operating a dispensing facility within the jurisdiction if the ordinance allows dispensing facilities to operate in the jurisdiction.

c. Prohibit the delivery of marijuana within the jurisdiction by a properly licensed MMTC located within the jurisdiction.

8. The department may adopt by rule additional requirements

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006164

for the permitting of cultivation, processing, dispensing, and storage facilities to ensure the sanitary, safe, and secure cultivation, processing, dispensing, storage, and sale of marijuana.

~~To ensure the safe transport of marijuana and marijuana delivery devices to medical marijuana treatment centers, marijuana testing laboratories, or qualified patients, a medical marijuana treatment center must:~~

~~1. Maintain a marijuana transportation manifest in any vehicle transporting marijuana. The marijuana transportation manifest must be generated from a medical marijuana treatment center's seed-to-sale tracking system and include the:~~

~~a. Departure date and approximate time of departure.~~

~~b. Name, location address, and license number of the originating medical marijuana treatment center.~~

~~c. Name and address of the recipient of the delivery.~~

~~d. Quantity and form of any marijuana or marijuana delivery device being transported.~~

~~e. Arrival date and estimated time of arrival.~~

~~f. Delivery vehicle make and model and license plate number.~~

~~g. Name and signature of the medical marijuana treatment center employees delivering the product.~~

~~(I) A copy of the marijuana transportation manifest must be provided to each individual, medical marijuana treatment center, or marijuana testing laboratory that receives a delivery. The individual, or a representative of the center or laboratory, must sign a copy of the marijuana transportation manifest acknowledging receipt.~~

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006165

~~(II) An individual transporting marijuana or a marijuana delivery device must present a copy of the relevant marijuana transportation manifest and his or her employee identification card to a law enforcement officer upon request.~~

~~(III) Medical marijuana treatment centers and marijuana testing laboratories must retain copies of all marijuana transportation manifests for at least 3 years.~~

~~2. Ensure only vehicles in good working order are used to transport marijuana.~~

~~3. Lock marijuana and marijuana delivery devices in a separate compartment or container within the vehicle.~~

~~4. Require employees to have possession of their employee identification card at all times when transporting marijuana or marijuana delivery devices.~~

~~5. Require at least two persons to be in a vehicle transporting marijuana or marijuana delivery devices, and require at least one person to remain in the vehicle while the marijuana or marijuana delivery device is being delivered.~~

~~6. Provide specific safety and security training to employees transporting or delivering marijuana and marijuana delivery devices.~~

(h) Advertising.—An MMTC ~~A medical marijuana treatment center~~ may not engage in advertising that is visible to members of the public from any street, sidewalk, park, or other public place, except:

1. An MMTC dispensing facility ~~The dispensing location of A medical marijuana treatment center~~ may have a sign that is affixed to the outside or hanging in the window of the premises which identifies the dispensing facility ~~dispensary~~ by the

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006166

licensee's business name, a department-approved trade name, or a department-approved logo. An MMTC's ~~A medical marijuana treatment center's~~ trade name and logo may not contain wording or images commonly associated with marketing targeted toward children ~~or which promote recreational use of marijuana~~.

2. An MMTC ~~A medical marijuana treatment center~~ may engage in Internet advertising and marketing under the following conditions:

a. All advertisements must be approved by the department.

b. An advertisement may not have any content that specifically targets individuals under the age of 18, including cartoon characters or similar images.

c. An advertisement may not be an unsolicited pop-up advertisement.

d. Opt-in marketing must include an easy and permanent opt-out feature.

(i) Online retail catalogs.—Each retail MMTC ~~medical marijuana treatment center~~ that dispenses marijuana and marijuana delivery devices shall make available to the public on its website:

1. Each marijuana and low-THC product available for purchase, including the form, strain of marijuana from which it was extracted, cannabidiol content, tetrahydrocannabinol content, dose unit, total number of doses available, and the ratio of cannabidiol to tetrahydrocannabinol for each product.

2. The price for a 30-day, 50-day, and 70-day supply at a standard dose for each marijuana and low-THC product available for purchase.

3. The price for each marijuana delivery device available

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006167

for purchase.

4. If applicable, any discount policies and eligibility criteria for such discounts.

(j) Sourcing of marijuana for medical use.—MMTCs ~~Medical marijuana treatment centers~~ are the sole source from which a person ~~qualified patient~~ may legally obtain marijuana.

(k) Rulemaking.—The department may adopt rules pursuant to ss. 120.536(1) and 120.54 to implement this subsection.

(9) MEDICAL MARIJUANA TREATMENT CENTER PERSONNEL; REGISTRATION; EMPLOYEE IDENTIFICATION CARDS.—

(a) The department shall adopt rules to administer the registration of medical marijuana treatment center (MMTC) principals, employees, and contractors who participate in the operations of an MMTC. Before hiring or contracting with any individual who is not registered with the department or who does not possess a current MMTC employee identification card, an MMTC must apply to the department to register that person as an MMTC employee. The department shall adopt by rule a form for such applications for registration, which must require the applicant to provide all of the following:

1. His or her full legal name, social security number, date of birth, and home address.

2. A full-face, passport-type, color photograph of the applicant taken within the 90 days immediately preceding submission of the application.

3. Proof that he or she has passed a level 2 background screening pursuant to chapter 435 within the previous year.

4. An indication as to whether the applicant will be authorized by the MMTC to possess marijuana while not on MMTC

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006168

property.

(b) Once the department has received a completed application form from an MMTC, the department shall register the principal, employee, or contractor associated with the MMTC and issue him or her an MMTC employee identification card that, at a minimum, includes all of the following:

1. The employee's name and the name of the MMTC that employs him or her.

2. The employee's photograph, as required under paragraph (a).

3. The expiration date of the card, which must be 1 year after the date it is issued.

4. An indication of whether the employee is authorized by the MMTC to possess marijuana while not on MMTC property.

(c) If any information provided to the department for the registration of an MMTC principal, employee, or contractor or in the application for an MMTC employee identification card changes or if the registered person's employment status with the MMTC changes, the registered person and the MMTC must provide the department with the new information or status within 7 days after the change.

(d) The department may contract with one or more vendors for the purpose of issuing MMTC employee identification cards under this subsection.

~~BACKGROUND SCREENING.—An individual required to undergo a background screening pursuant to this section must pass a level 2 background screening as provided under chapter 435, which, in addition to the disqualifying offenses provided in s. 435.04, shall exclude an individual who has an arrest awaiting final~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006169

~~disposition for, has been found guilty of, regardless of adjudication, or has entered a plea of nolo contendere or guilty to an offense under chapter 837, chapter 895, or chapter 896 or similar law of another jurisdiction.~~

~~(a) Such individual must submit a full set of fingerprints to the department or to a vendor, entity, or agency authorized by s. 943.053(13). The department, vendor, entity, or agency shall forward the fingerprints to the Department of Law Enforcement for state processing, and the Department of Law Enforcement shall forward the fingerprints to the Federal Bureau of Investigation for national processing.~~

~~(b) Fees for state and federal fingerprint processing and retention shall be borne by the individual. The state cost for fingerprint processing shall be as provided in s. 943.053(3)(c) for records provided to persons or entities other than those specified as exceptions therein.~~

~~(c) Fingerprints submitted to the Department of Law Enforcement pursuant to this subsection shall be retained by the Department of Law Enforcement as provided in s. 943.05(2)(g) and (h) and, when the Department of Law Enforcement begins participation in the program, enrolled in the Federal Bureau of Investigation's national retained print arrest notification program. Any arrest record identified shall be reported to the department.~~

(10) MEDICAL MARIJUANA TREATMENT CENTER INSPECTIONS; ADMINISTRATIVE ACTIONS.—

(a) ~~The department shall conduct announced or unannounced inspections of medical marijuana treatment centers to determine compliance with this section or rules adopted pursuant to this~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006170

~~section.~~

~~(b) The department shall inspect a medical marijuana treatment center~~ Upon receiving a complaint or notice that a ~~the~~ medical marijuana treatment center (MMTC) has dispensed marijuana containing mold, bacteria, or another ~~other~~ contaminant that may cause or has caused an adverse effect to human health or the environment, the department shall inspect the MMTC, its facilities, and, as appropriate, any cultivation or processing facility of the MMTC from which the batch of marijuana was purchased.

(b) ~~(c)~~ The department shall conduct at least a biennial inspection of each MMTC ~~medical marijuana treatment center~~ to evaluate its ~~the medical marijuana treatment center's~~ records, personnel, equipment, processes, security measures, sanitation practices, and quality assurance practices.

(c) The department shall conduct at least a biennial inspection of each permitted facility. The department may conduct additional announced or unannounced inspections of a permitted facility within reasonable hours in order to ensure compliance with this section and rules adopted hereunder.

(d) The Department of Agriculture and Consumer Services and the department shall enter into an interagency agreement to ensure cooperation and coordination in the performance of their obligations under this section and their respective regulatory and authorizing laws. The department, the Department of Highway Safety and Motor Vehicles, and the Department of Law Enforcement may enter into interagency agreements for the purposes specified in this subsection or subsection (7).

(e) The department shall publish a list of all approved

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006171

MMTCs ~~medical marijuana treatment centers~~, medical directors, and qualified physicians on its website.

(f) The department may impose administrative penalties, including reasonable fines not to exceed $10,000, on an MMTC ~~a medical marijuana treatment center~~ for any of the following violations:

1. Violating this section or department rule.

2. Failing to maintain qualifications for approval.

3. Endangering the health, safety, or security of a qualified patient or an adult purchasing marijuana pursuant to s. 381.990.

4. Improperly disclosing personal and confidential information of the qualified patient.

5. Attempting to procure MMTC ~~medical marijuana treatment center~~ approval by bribery, fraudulent misrepresentation, or extortion.

6. Being convicted or found guilty of, or entering a plea of guilty or nolo contendere to, regardless of adjudication, a crime in any jurisdiction which directly relates to the business of an MMTC ~~a medical marijuana treatment center~~.

7. Making or filing a report or record that the MMTC ~~medical marijuana treatment center~~ knows to be false.

8. Willfully failing to maintain a record required by this section or department rule.

9. Willfully impeding or obstructing an employee or agent of the department in the furtherance of his or her official duties.

10. Engaging in fraud or deceit, negligence, incompetence, or misconduct in the business practices of an MMTC ~~a medical~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006172

~~marijuana treatment center~~.

11. Making misleading, deceptive, or fraudulent representations in or related to the business practices of an MMTC ~~a medical marijuana treatment center~~.

12. Having a license or the authority to engage in any regulated profession, occupation, or business that is related to the business practices of an MMTC ~~a medical marijuana treatment center~~ suspended, revoked, or otherwise acted against by the licensing authority of any jurisdiction, including its agencies or subdivisions, for a violation that would constitute a violation under Florida law.

13. Violating a lawful order of the department or an agency of the state, or failing to comply with a lawfully issued subpoena of the department or an agency of the state.

14. Failing to adequately determine the age of a buyer who is not a qualified patient or caregiver.

(g) The department may suspend, revoke, or refuse to renew an MMTC's registration, operating licenses, and any vehicle permits or facility permits ~~a medical marijuana treatment center license~~ if the MMTC ~~medical marijuana treatment center~~ commits any of the violations specified in paragraph (f).

(h) The department shall refuse to renew the cultivation, processing, retail, or transportation license of an MMTC that has been issued such a license and has not begun to cultivate, process, dispense, or transport marijuana, as applicable, by the date that the MMTC is required to renew such license.

(i)~~(h)~~ The department may adopt rules pursuant to ss. 120.536(1) and 120.54 to implement this subsection.

(11) PREEMPTION.—Regulation of cultivation, processing, and

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006173

delivery of marijuana by medical marijuana treatment centers (MMTCs) is preempted to the state except as provided in this subsection.

(a) An MMTC ~~A medical marijuana treatment center~~ cultivating or processing facility may not be located within 500 feet of the real property that comprises a public or private elementary school, middle school, or secondary school.

(b)1. A county or municipality may, by ordinance, ban MMTC ~~medical marijuana treatment center~~ dispensing facilities from being located within the boundaries of that county or municipality. A county or municipality that does not ban dispensing facilities under this subparagraph may not place specific limits, by ordinance, on the number of dispensing facilities that may locate within that county or municipality.

2. A municipality may determine by ordinance the criteria for the location of, and other permitting requirements that do not conflict with state law or department rule for, MMTC ~~medical marijuana treatment center~~ dispensing facilities located within the boundaries of that municipality. A county may determine by ordinance the criteria for the location of, and other permitting requirements that do not conflict with state law or department rule for, all such dispensing facilities located within the unincorporated areas of that county. Except as provided in paragraph (c), a county or municipality may not enact ordinances for permitting or for determining the location of dispensing facilities which are more restrictive than its ordinances permitting or determining the locations for pharmacies licensed under chapter 465. A municipality or county may not charge an MMTC ~~a medical marijuana treatment center~~ a license or permit

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006174

fee in an amount greater than the fee charged by such municipality or county to pharmacies. A dispensing facility location approved by a municipality or county pursuant to former s. 381.986(8)(b), Florida Statutes 2016, is not subject to the location requirements of this subsection.

(c) An MMTC ~~A medical marijuana treatment center~~ dispensing facility may not be located within 500 feet of the real property that comprises a public or private elementary school, middle school, or secondary school unless the county or municipality approves the location through a formal proceeding open to the public at which the county or municipality determines that the location promotes the public health, safety, and general welfare of the community.

(d) This subsection does not prohibit any local jurisdiction from ensuring that MMTCs ~~medical marijuana treatment center~~ facilities comply with the Florida Building Code, the Florida Fire Prevention Code, or any local amendments to the Florida Building Code or the Florida Fire Prevention Code.

(12) PENALTIES.—

(a) A qualified physician commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083, if he or she ~~the qualified physician~~ issues a physician certification for the medical use of marijuana for a patient without a reasonable belief that the patient is suffering from a qualifying medical condition.

(b) A person who fraudulently represents that he or she has a qualifying medical condition to a qualified physician for the purpose of being issued a physician certification commits a

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006175

misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083.

(c)1. A person ~~qualified patient~~ who uses marijuana, not including low-THC cannabis, or a caregiver who administers marijuana, not including low-THC cannabis, in plain view of or in a place open to the general public is subject to a civil fine not exceeding $100.

2. A person who uses marijuana, not including low-THC cannabis, ~~;~~ in a school bus, a vehicle, an aircraft, or a boat; or on the grounds of a school except as provided in s. 1006.062, commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083.

(d) A person ~~qualified patient or caregiver~~ who cultivates marijuana or who purchases ~~or acquires~~ marijuana from any person or entity other than a medical marijuana treatment center (MMTC) violates s. 893.13 and is subject to the penalties provided therein.

Commented [GO7]: Revised per CJ Committee

~~(e)1. A qualified patient or caregiver in possession of marijuana or a marijuana delivery device who fails or refuses to present his or her marijuana use registry identification card upon the request of a law enforcement officer commits a misdemeanor of the second degree, punishable as provided in s. 775.082 or s. 775.083, unless it can be determined through the medical marijuana use registry that the person is authorized to be in possession of that marijuana or marijuana delivery device.~~

~~2. A person charged with a violation of this paragraph may not be convicted if, before or at the time of his or her court or hearing appearance, the person produces in court or to the clerk of the court in which the charge is pending a medical~~

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006176

~~marijuana use registry identification card issued to him or her which is valid at the time of his or her arrest. The clerk of the court is authorized to dismiss such case at any time before the defendant's appearance in court. The clerk of the court may assess a fee of $5 for dismissing the case under this paragraph.~~

(e) ~~(f)~~ A caregiver who violates any of the applicable provisions of this section or applicable department rules, for the first offense, commits a misdemeanor of the second degree, punishable as provided in s. 775.082 or s. 775.083 and, for a second or subsequent offense, commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083.

(f) ~~(g)~~ A qualified physician who issues a physician certification for marijuana or a marijuana delivery device and receives compensation from an MMTC ~~a medical marijuana treatment center~~ related to the issuance of a physician certification for marijuana or a marijuana delivery device is subject to disciplinary action under the applicable practice act and s. 456.072(1)(n).

(g) ~~(h)~~ A person transporting marijuana or marijuana delivery devices on behalf of an MMTC ~~a medical marijuana treatment center~~ or marijuana testing laboratory who fails or refuses to present a transportation manifest, whether in paper or electronic format, upon the request of a law enforcement officer commits a misdemeanor of the second degree, punishable as provided in s. 775.082 or s. 775.083.

(h) ~~(i)~~ Persons and entities conducting activities authorized and governed by this section and s. 381.988 are subject to ss. 456.053, 456.054, and 817.505, as applicable.

(i) ~~(j)~~ A person or entity that cultivates, processes,

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006177

distributes, sells, or dispenses marijuana, as defined in s. 29(b)(4), Art. X of the State Constitution, and is not licensed as an MMTC ~~a medical marijuana treatment center~~ violates s. 893.13 and is subject to the penalties provided therein. This paragraph does not apply to a transfer of marijuana products or marijuana which is authorized by this section, s. 381.990, or s. 893.13.

(j) ~~(k)~~ A person who manufactures, distributes, sells, gives, or possesses with the intent to manufacture, distribute, sell, or give marijuana or a marijuana delivery device that he or she holds out to have originated from a licensed MMTC ~~medical marijuana treatment center~~ but that is counterfeit commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084. For the purposes of this paragraph, the term "counterfeit" means marijuana; a marijuana delivery device; or a marijuana or marijuana delivery device container, seal, or label which, without authorization, bears the trademark, trade name, or other identifying mark, imprint, or device, or any likeness thereof, of a licensed MMTC ~~medical marijuana treatment center~~ and which thereby falsely purports or is represented to be the product of, or to have been distributed by, that licensed MMTC ~~medical marijuana treatment facility~~.

(k) ~~(l)~~ Any person who possesses or manufactures a blank, forged, stolen, fictitious, fraudulent, counterfeit, or otherwise unlawfully issued medical marijuana use registry identification card commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

(14) EXCEPTIONS TO OTHER LAWS.—

(a) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or

Commented [GO8]: Added per CJ Committee

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006178

any other ~~provision of~~ law, but subject to the requirements of this section, a qualified patient and the qualified patient's caregiver may purchase from a medical marijuana treatment center (MMTC) for the patient's medical use a marijuana delivery device and up to the amount of marijuana authorized in the physician certification, but may not possess more than a 70-day supply of marijuana, or the greater of 4 ounces of marijuana in a form for smoking or an amount of marijuana in a form for smoking approved by the department pursuant to paragraph (4)(f), at any given time and all marijuana purchased must remain in its original packaging.

(b) Notwithstanding paragraph (a), s. 893.13, s. 893.135, s. 893.147, or any other ~~provision of~~ law, a qualified patient and the qualified patient's caregiver may purchase and possess a marijuana delivery device intended for the medical use of marijuana by smoking from a vendor other than an MMTC ~~a medical marijuana treatment center~~.

(c) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other ~~provision of~~ law, but subject to the requirements of this section, an approved MMTC ~~medical marijuana treatment center~~ and its owners, managers, and employees may manufacture, possess, sell, deliver, distribute, dispense, and lawfully dispose of marijuana or a marijuana delivery device as provided in this section, s. 381.988, s. 381.990, and by department rule. For the purposes of this subsection, the terms "manufacture," "possession," "deliver," "distribute," and "dispense" have the same meanings as provided in s. 893.02.

(e) A licensed MMTC ~~medical marijuana treatment center~~ and its owners, managers, and employees are not subject to licensure

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006179

or regulation under chapter 465 or chapter 499 for manufacturing, possessing, selling, delivering, distributing, dispensing, or lawfully disposing of marijuana or a marijuana delivery device, as provided in this section, in s. 381.988, and by department rule.

~~(17) Rules adopted pursuant to this section before July 1, 2020, are not subject to ss. 120.54(3)(b) and 120.541. Notwithstanding paragraph (8)(e), a medical marijuana treatment center may use a laboratory that has not been certified by the department under s. 381.988 until such time as at least one laboratory holds the required certification pursuant to s. 381.988, but in no event later than July 1, 2020. This subsection expires July 1, 2020.~~

Section 3. Section 381.990, Florida Statutes, is created to read:

381.990 Adult use of marijuana.—

(1) A person 21 years of age or older may purchase marijuana products containing up to 2,000 milligrams of tetrahydrocannabinol; up to 2.5 ounces of marijuana in a form for smoking; and one or more marijuana delivery devices, as defined in s. 381.986, provided that such marijuana products, marijuana, and marijuana delivery devices are purchased from a medical marijuana treatment center (MMTC) that is licensed by the department pursuant to s. 381.986 for the retail sale of marijuana and is registered by the Department of Business and Professional Regulation for the sale of marijuana for adult use. A violation of this subsection is punishable as provided in s. 893.13.

(2) A person who purchases marijuana products, marijuana in

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006180

a form for smoking, or marijuana delivery devices in accordance with subsection (1) may possess, use, transport, and transfer, without consideration, to a person 21 years of age or older such products or devices. However, a person may not possess at any given time marijuana products that contain, in total, more than 2,000 milligrams of tetrahydrocannabinol or more than 4.0 ounces of marijuana in a form for smoking. A violation of this subsection is punishable as provided in s. 893.13.

(3) This section does not limit the ability of a private property owner to restrict the smoking or vaping of marijuana on his or her private property; however, a landlord may not prevent his or her tenants from possessing or using marijuana by other means.

(4) This section does not exempt a person from prosecution for a criminal offense related to impairment or intoxication resulting from the use of marijuana or relieve a person from any requirement under law to submit to a breath, blood, urine, or other test to detect the presence of a controlled substance.

Section 4. Effective July 1, 2020, the Department of Agriculture and Consumer Services shall conduct a study on the potential harms and benefits of allowing the cultivation of marijuana by members of the public for private use, including the use of a cooperative model. The department shall report the results of the study to the Governor, the President of the Senate, and the Speaker of the House of Representatives by January 1, 2021.

Section 5. Subsection (3) and paragraphs (a) and (b) of subsection (6) of section 893.13, Florida Statutes, are amended to read:

Commented [GO9]: Revised per CJ Committee

Commented [GO10]: Added since we changed effective date to January 1, 2021. Please advise if you would rather this report be due July 1, 2021.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006181

893.13 Prohibited acts; penalties.—

(3)(a) A person 21 years of age or older may deliver, without consideration, to another person 21 years of age or older:

1. Marijuana products that contain a total of 2,000 milligrams or less of tetrahydrocannabinol; and

2. A quantity of 2.5 ounces or less of cannabis, as defined in this chapter.

(b) A person younger than 21 years of age who delivers, without consideration, to another person marijuana products that contain a total of 2,000 milligrams or less of tetrahydrocannabinol or a quantity of 2.5 ounces or less of cannabis, as defined in this chapter, commits a misdemeanor of the second degree, punishable as provided in s. 775.082 or s. 775.083, for a first conviction of a violation of this paragraph and commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083, for a second or subsequent conviction of a violation of this paragraph ~~who delivers, without consideration, 20 grams or less of cannabis, as defined in this chapter, commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083. As used in this subsection, the term "cannabis" does not include the resin extracted from the plants of the genus Cannabis or any compound manufacture, salt, derivative, mixture, or preparation of such resin~~.

(6)(a) Except as otherwise provided in this subsection, a person may not be in actual or constructive possession of a controlled substance unless such controlled substance was lawfully obtained from a practitioner or pursuant to a valid

prescription or order of a practitioner while acting in the course of his or her professional practice or to be in actual or constructive possession of a controlled substance except as otherwise authorized by this chapter. A person who violates this provision commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

(b)1. A person 21 years of age or older may possess marijuana products that contain a total of 2,000 milligrams or less of tetrahydrocannabinol and may possess 4.0 ounces or less of cannabis, as defined in this chapter ~~If the offense is the possession of 20 grams or less of cannabis, as defined in this chapter, the person commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083. As used in this subsection, the term "cannabis" does not include the resin extracted from the plants of the genus Cannabis, or any compound manufacture, salt, derivative, mixture, or preparation of such resin~~.

2. A person under 21 years of age who possesses marijuana products that contain a total of 2,000 milligrams or less of tetrahydrocannabinol or who possesses 4 ounces or less of cannabis, as defined in this chapter, commits a misdemeanor of the second degree, punishable as provided in s. 775.082 or s. 775.083, for a first conviction of a violation of this paragraph, and a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083, for a second or subsequent conviction of a violation of this paragraph.

Section 6. Section 893.1352, Florida Statutes, is created to read:

893.1352 Retroactive application of s. 893.13.—

Commented [GO13]: Section added per CJ Committee

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006183

(1) It is the intent of the Legislature to retroactively apply amendments to s. 893.13 to certain persons who were convicted of possession of cannabis, before January 1, 2021.

(2) As used in this section, a reference to "former s. 893.13, Florida Statutes 2020," is a reference to s. 893.13 as it existed at any time before January 1, 2021.

(3)(a) A person who was convicted of a violation of former s. 893.13, Florida Statutes 2020, by possessing 4 ounces or less of cannabis as defined in chapter 893, but was not sentenced under that section before January 1, 2021, must be sentenced in accordance with s. 775.082, s. 775.083, or s. 775.084, for the degree of offense as provided for in s. 893.13.

(b) A person who was convicted of a violation of former s. 893.13, Florida Statutes 2020, by possessing 4 ounces or less of cannabis as defined in chapter 893, was sentenced before January 1, 2021, to a term of imprisonment or probation pursuant to former s. 893.13, Florida Statutes 2020, and who is serving the term of imprisonment or probation on or after January 1, 2021, must have an opportunity for a sentence review hearing. If the person requests a sentence review hearing, he or she must be resentenced in accordance with paragraph (c).

(c) Resentencing under this section must occur in the following manner:

1. The Department of Corrections shall notify the person described in paragraph (b) of his or her eligibility to request a sentence review hearing.

2. A person seeking sentence review under this section may submit an application to the court of original jurisdiction requesting that a sentence review hearing be held. The

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006184

sentencing court retains original jurisdiction for the duration of the sentence for the purpose of this review.

3. A person who is eligible for a sentence review hearing under this section is entitled to representation by legal counsel. If the person is indigent and unable to employ counsel, the court shall appoint counsel under s. 27.52. Determination of indigence and costs of representation is as provided in ss. 27.52 and 938.29.

4. Upon receipt of a request for a sentence review hearing, the court of original jurisdiction shall hold such a hearing to determine if the person meets the criteria for resentencing under this section. If the court determines by a preponderance of the evidence that the person is currently serving a sentence for a violation of former s. 893.13, Florida Statutes 2020, and that the violation was for possession of cannabis in the amount of 4 ounces or less, the court shall resentence the person in accordance with this section. If the court determines that the person does not meet the criteria for resentencing under this section, the court must provide written findings as to why the person does not meet the criteria.

5. If the court finds that the underlying facts of the person's conviction that is subject to resentencing are classified as a crime under s. 893.13, the person must be resentenced to a term that would not exceed the maximum sentence provided by that section. The person is entitled to receive credit for his or her time served.

6. If the court finds that the underlying facts of the person's conviction that is subject to resentencing are not classified as a crime under s. 893.13, the person must be

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006185

resentenced to time served and released from supervision as soon as reasonably possible.

(4) Notwithstanding any other law, a person who has been convicted of a crime under former s. 893.13, Florida Statutes 2020, and whose offense would not be classified as a crime under s. 893.13, must have all fines, fees, and costs related to such conviction waived.

Section 7. Present subsections (5), (6), and (7) of section 893.147, Florida Statutes, are redesignated as subsections (6), (7), and (8), respectively, a new subsection (5) is added to that section, and subsections (1), (2), and (4) of that section are amended, to read:

893.147 Use, possession, manufacture, delivery, transportation, advertisement, or retail sale of drug paraphernalia, specified machines, and materials.—

(1) USE OR POSSESSION OF DRUG PARAPHERNALIA.—Except as provided in subsection (5), it is unlawful for any person to use, or to possess with intent to use, drug paraphernalia:

(a) To plant, propagate, cultivate, grow, harvest, manufacture, compound, convert, produce, process, prepare, test, analyze, pack, repack, store, contain, or conceal a controlled substance in violation of this chapter; or

(b) To inject, ingest, inhale, or otherwise introduce into the human body a controlled substance in violation of this chapter.

Any person who violates this subsection is guilty of a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083.

Commented [GO14]: Section added per CJ Committee

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006186

(2) MANUFACTURE OR DELIVERY OF DRUG PARAPHERNALIA.—Except as provided in subsection (5), it is unlawful for any person to deliver, possess with intent to deliver, or manufacture with intent to deliver drug paraphernalia, knowing, or under circumstances where one reasonably should know, that it will be used:

(a) To plant, propagate, cultivate, grow, harvest, manufacture, compound, convert, produce, process, prepare, test, analyze, pack, repack, store, contain, or conceal a controlled substance in violation of this act; or

(b) To inject, ingest, inhale, or otherwise introduce into the human body a controlled substance in violation of this act.

Any person who violates this subsection is guilty of a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

(4) TRANSPORTATION OF DRUG PARAPHERNALIA.—Except as provided in subsection (5), it is unlawful to use, possess with the intent to use, or manufacture with the intent to use drug paraphernalia, knowing or under circumstances in which one reasonably should know that it will be used to transport:

(a) A controlled substance in violation of this chapter; or

(b) Contraband as defined in s. 932.701(2)(a)1.

Any person who violates this subsection commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

(5) ACTS INVOLVING A MARIJUANA DELIVERY DEVICE.—

(a) A person 21 years of age or older may possess, use,

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006187

transport, or deliver, without consideration, to a person 21 years of age or older a marijuana delivery device, as defined in s. 381.986.

(b) A person younger than 21 years of age who possesses, uses, transports, or delivers, without consideration, to a person 21 years of age or older a marijuana delivery device, as defined in s. 381.986, commits a misdemeanor of the second degree, punishable as provided in s. 775.082 or s. 775.083 for a first conviction of a violation of this paragraph, and a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083, for a second or subsequent conviction of a violation of this paragraph.

Section 8. Section 943.0586, Florida Statutes, is created to read:

943.0586 Cannabis expunction.—

(1) DEFINITIONS.—As used in this section, the term:

(a) "Cannabis" has the same meaning as provided in chapter 893.

(b) "Expunction" has the same meaning and effect as provided in s. 943.0585.

(c) "Former s. 893.13, Florida Statutes 2020," is a reference to s. 893.13 as it existed at any time before January 1, 2021.

(2) ELIGIBILITY.—Notwithstanding any other law, a person is eligible to petition a court to expunge a criminal history record for the conviction of former s. 893.13, Florida Statutes 2020, if:

(a) The person received a withhold of adjudication or adjudication of guilt for a violation of former 893.13, Florida

Commented [GO15]: Section added per CJ Committee

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006188

Statutes 2020, for the possession of cannabis;

(b) The person possessed 4 ounces or less of cannabis; and

(c) The person is no longer under court supervision related to the disposition of arrest or alleged criminal activity for which the petition to expunge pertains.

(3) CERTIFICATE OF ELIGIBILITY.—Before petitioning a court to expunge a criminal history record under this section, a person seeking to expunge a criminal history record must apply to the department for a certificate of eligibility for expunction. The department shall adopt rules to establish procedures for applying for and issuing a certificate of eligibility for expunction.

(a) The department shall issue a certificate of eligibility for expunction to a person who is the subject of a criminal history record under this section, if that person:

1. Satisfies the eligibility criteria in subsection (2);

2. Has submitted to the department a written certified statement from the appropriate state attorney or statewide prosecutor which confirms the criminal history record complies with the criteria in subsection (2);

3. Has submitted to the department a certified copy of the disposition of the charge to which the petition to expunge pertains; and

4. Remits a $75 processing fee to the department for placement in the Department of Law Enforcement Operating Trust Fund, unless the executive director waives such fee.

(b) A certificate of eligibility for expunction is valid for 12 months after the date of issuance stamped by the department on the certificate. After that time, the petitioner

Commented [GO16]: Fee bill needed - could also consider removing this fee

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006189

must reapply to the department for a new certificate of eligibility. The petitioner's status and the law in effect at the time of the renewal application determine the petitioner's eligibility.

(4) PETITION.—Each petition to expunge a criminal history record must be accompanied by:

(a) A valid certificate of eligibility issued by the department.

(b) The petitioner's sworn statement that he or she:

1. Satisfies the eligibility requirements for expunction in subsection (2); and

2. Is eligible for expunction to the best of his or her knowledge.

(5) PENALTIES.—A person who knowingly provides false information on such sworn statement commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

(6) COURT AUTHORITY.—

(a) The courts of this state have jurisdiction over their own procedures, including the maintenance, expunction, and correction of judicial records containing criminal history information to the extent that such procedures are not inconsistent with the conditions, responsibilities, and duties established by this section.

(b) A court of competent jurisdiction shall order a criminal justice agency to expunge the criminal history record of a person who complies with this section. The court may not order a criminal justice agency to expunge a criminal history record under this section until the person seeking to expunge a

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006190

criminal history record has applied for and received a certificate of eligibility under subsection (3).

(c) Expunction granted under this section does not prevent the person who receives such relief from petitioning for the expunction or sealing of a later criminal history record as provided for in ss. 943.0583, 943.0585, and 943.059, if the person is otherwise eligible under those sections.

(7) PROCESSING OF A PETITION OR AN ORDER.—

(a) In judicial proceedings under this section, a copy of the completed petition to expunge shall be served upon the appropriate state attorney or the statewide prosecutor and upon the arresting agency; however, it is not necessary to make any agency other than the state a party. The appropriate state attorney or the statewide prosecutor and the arresting agency may respond to the court regarding the completed petition to expunge.

(b) If relief is granted by the court, the clerk of the court shall certify copies of the order to the appropriate state attorney or the statewide prosecutor and the arresting agency. The arresting agency shall forward the order to any other agency to which the arresting agency disseminated the criminal history record information to which the order pertains. The department shall forward the order to expunge to the Federal Bureau of Investigation. The clerk of the court shall certify a copy of the order to any other agency which the records of the court reflect has received the criminal history record from the court.

(c) The department or any other criminal justice agency is not required to act on an order to expunge entered by a court if such order does not comply with the requirements of this

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006191

section. Upon receipt of such an order, the department shall notify the issuing court, the appropriate state attorney or statewide prosecutor, the petitioner or the petitioner's attorney, and the arresting agency of the reason for noncompliance. The appropriate state attorney or statewide prosecutor shall take action within 60 days to correct the record and petition the court to void the order. No cause of action, including contempt of court, may arise against any criminal justice agency for failure to comply with an order to expunge if the petitioner for such order failed to obtain the certificate of eligibility as required by this section or such order does not otherwise comply with the requirements of this section.

(8) EFFECT OF CANNABIS EXPUNCTION ORDER.—

(a) The person who is the subject of a criminal history record that is expunged under this section may lawfully deny or fail to acknowledge the arrests and convictions covered by the expunged record, except if the person who is the subject of the record:

1. Is a candidate for employment with a criminal justice agency;

2. Is a defendant in a criminal prosecution;

3. Concurrently or subsequently petitions for relief under this section, s. 943.0583, s. 943.059, or s. 943.0585;

4. Is a candidate for admission to The Florida Bar;

5. Is seeking to be employed or licensed by or to contract with the Department of Children and Families, the Division of Vocational Rehabilitation within the Department of Education, the Agency for Health Care Administration, the Agency for

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006192

Persons with Disabilities, the Department of Health, the Department of Elderly Affairs, or the Department of Juvenile Justice or to be employed or used by such contractor or licensee in a sensitive position having direct contact with children, persons with disabilities, or the elderly;

6. Is seeking to be employed or licensed by the Department of Education, any district school board, any university laboratory school, any charter school, any private or parochial school, or any local governmental entity that licenses child care facilities;

7. Is seeking to be licensed by the Division of Insurance Agent and Agency Services within the Department of Financial Services; or

8. Is seeking to be appointed as a guardian pursuant to s. 744.3125.

(b) A person who has been granted an expunction under this section and who is authorized under paragraph (a) to lawfully deny or fail to acknowledge the arrests and convictions covered by an expunged record may not be held under any law of this state to commit perjury or to be otherwise liable for giving a false statement by reason of such person's failure to recite or acknowledge an expunged criminal history record.

Section 9. Section 893.15, Florida Statutes, is amended to read:

893.15 Rehabilitation.—Any person who violates s. 893.13(6)(a) ~~or (b)~~ relating to possession may, in the discretion of the trial judge, be required to participate in a substance abuse services program approved or regulated by the Department of Children and Families pursuant to the provisions

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006193

of chapter 397, provided the director of such program approves the placement of the defendant in such program. Such required participation shall be imposed in addition to any penalty or probation otherwise prescribed by law. However, the total time of such penalty, probation, and program participation shall not exceed the maximum length of sentence possible for the offense.

Section 10. Except as otherwise expressly provided in this act and except for this section, which shall take effect upon becoming a law, this act shall take effect January 1, 2021.

AMERICAN OVERSIGHT

23-00493-20

A bill to be entitled

An act relating to ballot collection practices; amending s. 104.0616, F.S.; defining terms; prohibiting a person from knowingly collecting a vote-by-mail ballot from another person; providing a penalty; providing exceptions; prohibiting any person from providing or offering to provide, and any person who accepts, a pecuniary or other benefit in exchange for handling a vote-by-mail ballot; providing an exception; providing a penalty; amending s. 101.62, F.S.; restricting who an elector may designate to pick up a vote-by-mail ballot to conform to changes made by the act; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Section 104.0616, Florida Statutes, is amended to read:

104.0616 Vote-by-mail ballots and voting; violations.—

(1) For purposes of this section, the term:

(a) "Caregiver" means a person who provides medical or health care assistance to a voter in a residence, nursing home facility, hospice facility, assisted living facility, residential care facility, adult day care center, or adult foster care home.

(b) "Collects" or "collecting" means to gain possession or control of a vote-by-mail ballot.

(c) "Household member" means a person who resides at the same residence as a voter.

AMERICAN OVERSIGHT

(d) "Immediate family" means a person's spouse or the parent, child, grandparent, or sibling of the person or the person's spouse.

(2) Any person who knowingly collects a vote-by-mail ballot from another person, regardless of whether the ballot has been voted, commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083. This subsection does not apply to:

(a) An election official, a United States Postal Service employee, or any other person who is authorized by law to transmit United States mail so long as the official, employee, or other person is engaged in official duties within the scope of employment.

(b) A caregiver, a household member, a legal guardian, or a member of the immediate family of a voter.

(3) Any person who provides or offers to provide, and any person who accepts, a pecuniary or other benefit in exchange for distributing, ordering, requesting, collecting, delivering, or otherwise physically possessing the ~~more than two~~ vote-by-mail ballot of another person ~~ballots per election in addition to his or her own ballot or a ballot belonging to an immediate family member~~, except as provided in ss. 101.6105-101.694 and not including the ballot of another person if an individual is a caregiver, a household member, a legal guardian, or a member of the immediate family of the voter, commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or~~,~~ s. 775.083~~, or s. 775.084~~.

Section 2. Paragraph (c) of subsection (4) of section 101.62, Florida Statutes, is amended to read:

AMERICAN OVERSIGHT

101.62 Request for vote-by-mail ballots.—

(4)

(c) The supervisor shall provide a vote-by-mail ballot to each elector by whom a request for that ballot has been made by one of the following means:

1. By nonforwardable, return-if-undeliverable mail to the elector's current mailing address on file with the supervisor or any other address the elector specifies in the request.

2. By forwardable mail, e-mail, or facsimile machine transmission to absent uniformed services voters and overseas voters. The absent uniformed services voter or overseas voter may designate in the vote-by-mail ballot request the preferred method of transmission. If the voter does not designate the method of transmission, the vote-by-mail ballot shall be mailed.

3. By personal delivery before 7 p.m. on election day to the elector, upon presentation of the identification required in s. 101.043.

4. By delivery to a designee on election day or up to 9 days prior to the day of an election. Any elector may designate in writing a person to pick up the ballot for the elector; however, the person designated by the elector must be the elector's caregiver, a household member, a legal guardian of the elector, or a member of the elector's immediate family ~~may not pick up more than two vote-by-mail ballots per election, other than the designee's own ballot, except that additional ballots may be picked up for members of the designee's immediate family~~. For purposes of this section, the terms "caregiver," "household member," and "immediate family" have the same meaning as defined in s. 104.0616 ~~means the designee's spouse or the parent, child,~~

AMERICAN OVERSIGHT

~~grandparent, or sibling of the designee or of the designee's spouse~~. The designee shall provide to the supervisor the written authorization by the elector and a picture identification of the designee and must complete an affidavit. The designee shall state in the affidavit that the designee is authorized by the elector to pick up that ballot and shall indicate if the elector is a member of the designee's immediate family and, if so, the relationship, or if the designee is a caregiver, household member, or legal guardian of the elector. The department shall prescribe the form of the affidavit. If the supervisor is satisfied that the designee is authorized to pick up the ballot and that the signature of the elector on the written authorization matches the signature of the elector on file, the supervisor shall give the ballot to that designee for delivery to the elector.

5. Except as provided in s. 101.655, the supervisor may not deliver a vote-by-mail ballot to an elector or an elector's designee ~~immediate family member~~ on the day of the election unless there is an emergency, to the extent that the elector will be unable to go to his or her assigned polling place. If a vote-by-mail ballot is delivered, the elector or his or her designee shall execute an affidavit affirming to the facts which allow for delivery of the vote-by-mail ballot. The department shall adopt a rule providing for the form of the affidavit.

Section 3. This act shall take effect July 1, 2020.

AMERICAN OVERSIGHT

24-01581-20

A bill to be entitled

An act relating to elections; amending s. 101.043, F.S.; deleting a provision that prohibits the use of an address appearing on identification presented by an elector at the polls as a basis to confirm or otherwise challenge an elector's legal residence; amending s. 101.5612, F.S.; revising the timeframes for conducting public preelection testing of automatic tabulating equipment; amending s. 101.5614, F.S.; removing the requirement that duplicate ballots be made of vote-by-mail ballots containing overvoted races; amending s. 101.6103, F.S.; revising the timeframe in which the supervisor of elections must mail ballots in elections conducted under the Mail Ballot Election Act; amending s. 103.091, F.S.; expanding the timeframe within which candidates for political party executive committees may qualify for office; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Paragraph (b) of subsection (1) of section 101.043, Florida Statutes, is amended to read:

101.043 Identification required at polls.—

(1)

(b) If the picture identification does not contain the signature of the elector, an additional identification that provides the elector's signature shall be required. ~~The address appearing on the identification presented by the elector may not~~

AMERICAN OVERSIGHT

~~be used as the basis to confirm an elector's legal residence or otherwise challenge an elector's legal residence.~~ The elector shall sign his or her name in the space provided on the precinct register or on an electronic device provided for recording the elector's signature. The clerk or inspector shall compare the signature with that on the identification provided by the elector and enter his or her initials in the space provided on the precinct register or on an electronic device provided for that purpose and allow the elector to vote if the clerk or inspector is satisfied as to the identity of the elector.

Section 2. Subsection (2) of section 101.5612, Florida Statutes, is amended to read:

101.5612 Testing of tabulating equipment.—

(2) On any day not more than 25 ~~10~~ days before ~~prior to~~ the commencement of early voting as provided in s. 101.657, the supervisor of elections shall have the automatic tabulating equipment publicly tested to ascertain that the equipment will correctly count the votes cast for all offices and on all measures. If the ballots to be used at the polling place on election day are not available at the time of the testing, the supervisor may conduct an additional test not more than 10 days before election day. Public notice of the time and place of the test shall be given at least 48 hours prior thereto by publication on the supervisor of elections' website and once in one or more newspapers of general circulation in the county or, if there is no newspaper of general circulation in the county, by posting the notice in at least four conspicuous places in the county. The supervisor or the municipal elections official may, at the time of qualifying, give written notice of the time and

AMERICAN OVERSIGHT

location of the public preelection test to each candidate qualifying with that office and obtain a signed receipt that the notice has been given. The Department of State shall give written notice to each statewide candidate at the time of qualifying, or immediately at the end of qualifying, that the voting equipment will be tested and advise each candidate to contact the county supervisor of elections as to the time and location of the public preelection test. The supervisor or the municipal elections official shall, at least 30 ~~15~~ days before ~~prior to~~ the commencement of early voting as provided in s. 101.657, send written notice by certified mail to the county party chair of each political party and to all candidates for other than statewide office whose names appear on the ballot in the county and who did not receive written notification from the supervisor or municipal elections official at the time of qualifying, stating the time and location of the public preelection test of the automatic tabulating equipment. The canvassing board shall convene, and each member of the canvassing board shall certify to the accuracy of the test. For the test, the canvassing board may designate one member to represent it. The test shall be open to representatives of the political parties, the press, and the public. Each political party may designate one person with expertise in the computer field who shall be allowed in the central counting room when all tests are being conducted and when the official votes are being counted. The designee shall not interfere with the normal operation of the canvassing board.

Section 3. Paragraph (a) of subsection (4) of section 101.5614, Florida Statutes, is amended to read:

AMERICAN OVERSIGHT

101.5614 Canvass of returns.—

(4)(a) If any vote-by-mail ballot is physically damaged so that it cannot properly be counted by the automatic tabulating equipment, a true duplicate copy shall be made of the damaged ballot in the presence of witnesses and substituted for the damaged ballot. ~~Likewise,~~ A duplicate ballot must also ~~shall~~ be made of ~~a vote-by-mail ballot containing an overvoted race or~~ a marked vote-by-mail ballot in which every race is undervoted, including ~~which shall include~~ all valid votes as determined by the canvassing board based on rules adopted by the division pursuant to s. 102.166(4). Upon request, a physically present candidate, a political party official, a political committee official, or an authorized designee thereof, must be allowed to observe the duplication of ballots. All duplicate ballots shall be clearly labeled "duplicate," bear a serial number which shall be recorded on the defective ballot, and be counted in lieu of the defective ballot. After a ballot has been duplicated, the defective ballot shall be placed in an envelope provided for that purpose, and the duplicate ballot shall be tallied with the other ballots for that precinct.

Section 4. Subsection (1) of section 101.6103, Florida Statutes, is amended to read:

101.6103 Mail ballot election procedure.—

(1) Except as otherwise provided in subsection (7), the supervisor of elections shall mail all official ballots with a secrecy envelope, a return mailing envelope, and instructions sufficient to describe the voting process to each elector entitled to vote in the election not sooner than the 40th ~~20th~~ day before the election and not later than the 10th day before

AMERICAN OVERSIGHT

the date of the election. All such ballots shall be mailed by first-class mail. Ballots shall be addressed to each elector at the address appearing in the registration records and placed in an envelope which is prominently marked "Do Not Forward."

Section 5. Subsection (4) of section 103.091, Florida Statutes, is amended to read:

103.091 Political parties.—

(4) Any political party other than a minor political party may by rule provide for the membership of its state or county executive committee to be elected for 4-year terms at the primary election in each year a presidential election is held. The terms begin ~~shall commence~~ on the first day of the month following each presidential general election,~~;~~ but the names of candidates for political party offices may ~~shall~~ not be placed on the ballot at any other election. The results of such election shall be determined by a plurality of the votes cast. In such event, electors seeking to qualify for such office shall do so with the Department of State or supervisor of elections no ~~not earlier than noon of the 71st day, or~~ later than noon of the 67th day~~,~~ preceding the primary election. The outgoing chair of each county executive committee shall, within 30 days after the committee members take office, hold an organizational meeting of all newly elected members for the purpose of electing officers. The chair of each state executive committee shall, within 60 days after the committee members take office, hold an organizational meeting of all newly elected members for the purpose of electing officers.

Section 6. This act shall take effect July 1, 2020.

Subject: Senator Brandes Draft Marijuana Legislation
Attachment(s): "Brandes Adult Use.DOCX"

Hi Olivia,

Senator Brandes asked that I send our draft marijuana legislation your way.

The Senator is hoping to get your thoughts on the bill overall and potentially talk through a taxing structure.

Please let me know if you need anything else. I look forward to speaking with you in the near future.

Kind Regards,

Vanessa Thompson
Legislative Assistant to State Senator Jeff Brandes
Thompson.Vanessa@flsenate.gov
District: (727) 563-2100
Capitol: (850) 487-5024
Jeff Brandes – District 24

AMERICAN OVERSIGHT

By Senator Brandes

24-00500-19 20191322__

A bill to be entitled

An act relating to the availability of marijuana for ~~medical~~adult use; amending s. 381.986, F.S.; redefining the term "medical use" to include the possession, use, or administration of marijuana in a form for smoking; conforming a provision to changes made by the act; revising provisions related to the licensure of and functions of medical marijuana treatment centers (MMTCs); requiring the Department of Health to adopt by rule certain operating standards and procedures; requiring the department to adopt by rule a certain MMTC registration form; specifying registration requirements, including the submission of a specified performance and compliance bond that may be forfeited for failure to comply with certain provisions; requiring an applicant for an MMTC to submit registration forms for certain principals, employees, and contractors listed on the application; prohibiting the department from registering an applicant as an MMTC until such principals, employees, and contractors are registered and issued MMTC employee identification cards; providing for expiration of an MMTC registration; specifying that a registered MMTC must obtain separate operating licenses for the cultivation, processing, dispensing, and transportation of marijuana; specifying application requirements for an MMTC to obtain cultivation licenses and processing licenses; providing for the expiration of and renewal of such

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

licenses; specifying that an MMTC facility must obtain a facility permit before cultivating or processing marijuana; authorizing an MMTC licensed to cultivate or process marijuana to use contractors to assist with the cultivation and with the processing of marijuana under certain conditions; providing for the destruction of marijuana byproducts within a specified timeframe after their production; providing requirements for the cultivation and for the processing of marijuana; removing the requirement that each MMTC produce and make available for purchase at least one low-THC cannabis product; removing tetrahydrocannabinol limits for edibles; requiring a licensed processing MMTC to test marijuana before it is sold or dispensed; providing marijuana packaging requirements; providing application requirements for an MMTC to obtain a retail license; providing for the expiration of and renewal of such licenses; requiring an MMTC to obtain a facility permit before dispensing and before storing marijuana; prohibiting onsite consumption of or administration of marijuana at a dispensary facility; providing requirements for the dispensing of marijuana; deleting a provision prohibiting an MMTC from dispensing or selling specified products; providing application requirements for an MMTC to obtain a transportation license; providing marijuana transportation requirements; providing a process for the issuance and cancellation of vehicle permits; requiring that each permitted

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006207

vehicle be GPS-monitored; specifying that a permitted vehicle is subject to inspection and search without a search warrant by specified persons when transporting marijuana; authorizing an MMTC licensed to transport marijuana and marijuana delivery devices to deliver or contract for the delivery of marijuana to other MMTCs and to qualified patients and caregivers within this state; requiring a person delivering marijuana and a marijuana delivery device to a qualified patient or his or her caregiver to verify the identity of the qualified patient; establishing that a county or municipality may not prohibit deliveries of marijuana to qualified patients and caregivers within the county or municipality; requiring the department to adopt certain rules for the delivery of marijuana; providing for the permitting of cultivation, processing, dispensary, and storage facilities; requiring the department to adopt by rule a facility permit application form; requiring the department to issue or deny a facility permit within a specified timeframe; providing for the expiration of facility permits; requiring the department to inspect a facility for compliance before the renewal of a facility permit; requiring an MMTC to cease applicable operations if a facility's permit expires or is revoked; requiring cultivation facilities and processing facilities to be insured with specified hazard and liability insurance; providing cultivation facility and processing facility requirements; preempting to the state all matters

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006208

regarding the permitting and regulation of cultivation facilities and processing facilities; requiring dispensary facilities and storage facilities to be insured with specified hazard and liability insurance; providing dispensary facility and storage facility requirements; clarifying that a county or a municipality may prohibit a dispensary facility from being located in its jurisdiction, but may not prohibit a licensed retail MMTC or its permitted storage facility from being located in such county's or municipality's jurisdiction if the MMTC is delivering marijuana to qualifying patients; prohibiting the department from issuing a facility permit for a dispensary facility in a county or municipality that adopts a certain ordinance; authorizing a county or municipality to levy a local tax on a dispensary facility; authorizing the department to adopt specified requirements by rule; requiring the department to adopt rules to administer the registration of certain MMTC principals, employees, and contractors by a specified date; requiring an MMTC to apply to the department for the registration of certain persons before hiring or contracting with any such person; requiring the department to adopt by rule a registration form that includes specified information; requiring the department to register persons who meet specified conditions and issue MMTC employee identification cards; requiring a registered person and the MMTC to

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006209

update the department within a specified timeframe if the person's employment status changes; authorizing the department to contract with vendors to issue MMTC employee identification cards; requiring the department to inspect an MMTC and its facilities upon a complaint and to biennially inspect each permitted facility; authorizing the department to conduct additional inspections of a facility; conforming a provision to changes made by the act; establishing that each MMTC licensed by the department before a specified date may continue operations under s. 381.986, F.S. (2018), and any rules adopted thereunder until the department is able to register MMTCs and to issue operational licenses and facility permits under this act; requiring the department to register such licensed MMTC and issue it cultivation, processing, retail, and transportation licenses and the appropriate facility and vehicle permits as soon as practicable; providing for the expiration of such registration, operating licenses, and facility permits; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Paragraph (l) of subsection (2) of section 212.08, Florida Statutes, is amended to read:

212.08 Sales, rental, use, consumption, distribution, and storage tax; specified exemptions.—The sale at retail, the rental, the use, the consumption, the distribution, and the

Commented [LD1]: New. This will allow medical marijuana to remain tax free while recreational marijuana will be taxed.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006210

storage to be used or consumed in this state of the following are hereby specifically exempt from the tax imposed by this chapter.

(2) EXEMPTIONS; MEDICAL.—

(l) Marijuana and marijuana delivery devices, as defined in s. 381.986, are exempt from the taxes imposed under this chapter when purchased by a qualified patient or caregiver, as defined in s. 381.986.

Commented [LD2]: new.

Section 21. Paragraph (j) of subsection (1) and subsections (8), (9), (10), and (17) of section 381.986, Florida Statutes, are amended to read:

381.986 Medical use of marijuana.—

(1) DEFINITIONS.—As used in this section, the term:

(j) "Medical use" means the acquisition, possession, use, delivery, transfer, or administration of marijuana authorized by a physician certification. The term does not include:

1. Possession, use, or administration of marijuana that was not purchased or acquired from a medical marijuana treatment center.

2. Possession, use, or administration of marijuana in ~~a form for smoking, in~~ the form of commercially produced food items other than edibles~~,~~ or of marijuana seeds ~~or flower, except for flower in a sealed, tamper-proof receptacle for vaping~~.

3. Use or administration of any form or amount of marijuana in a manner that is inconsistent with the qualified physician's directions or physician certification.

4. Transfer of marijuana to a person other than the qualified patient for whom it was authorized or the qualified

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006211

patient's caregiver on behalf of the qualified patient.

5. Use or administration of marijuana in the following locations:

a. On any form of public transportation, except for low-THC cannabis.

b. In any public place, except for low-THC cannabis.

c. In a qualified patient's place of employment, except when permitted by his or her employer.

d. In a state correctional institution, as defined in s. 944.02, or a correctional institution, as defined in s. 944.241.

e. On the grounds of a preschool, primary school, or secondary school, except as provided in s. 1006.062.

f. In a school bus, a vehicle, an aircraft, or a motorboat, except for low-THC cannabis.

For the purposes of this subparagraph, the exceptions for low-THC cannabis do not include the smoking of low-THC cannabis.

(8) MEDICAL MARIJUANA TREATMENT CENTERS.—

(a) ~~The department shall license medical marijuana treatment centers to ensure reasonable statewide accessibility and availability as necessary for qualified patients registered in the medical marijuana use registry and who are issued a physician certification under this section.~~

~~1. As soon as practicable, but no later than July 3, 2017, the department shall license as a medical marijuana treatment center any entity that holds an active, unrestricted license to cultivate, process, transport, and dispense low-THC cannabis, medical cannabis, and cannabis delivery devices, under former s. 381.986, Florida Statutes 2016, before July 1, 2017, and which~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006212

~~meets the requirements of this section. In addition to the authority granted under this section, these entities are authorized to dispense low-THC cannabis, medical cannabis, and cannabis delivery devices ordered pursuant to former s. 381.986, Florida Statutes 2016, which were entered into the compassionate use registry before July 1, 2017, and are authorized to begin dispensing marijuana under this section on July 3, 2017. The department may grant variances from the representations made in such an entity's original application for approval under former s. 381.986, Florida Statutes 2014, pursuant to paragraph (e).~~

~~2. The department shall license as medical marijuana treatment centers 10 applicants that meet the requirements of this section, under the following parameters:~~

~~a. As soon as practicable, but no later than August 1, 2017, the department shall license any applicant whose application was reviewed, evaluated, and scored by the department and which was denied a dispensing organization license by the department under former s. 381.986, Florida Statutes 2014; which had one or more administrative or judicial challenges pending as of January 1, 2017, or had a final ranking within one point of the highest final ranking in its region under former s. 381.986, Florida Statutes 2014; which meets the requirements of this section; and which provides documentation to the department that it has the existing infrastructure and technical and technological ability to begin cultivating marijuana within 30 days after registration as a medical marijuana treatment center.~~

~~b. As soon as practicable, the department shall license one applicant that is a recognized class member of *Pigford v.*~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006213

~~*Glickman*, 185 F.R.D. 82 (D.D.C. 1999), or *In Re Black Farmers Litig.*, 856 F. Supp. 2d 1 (D.D.C. 2011). An applicant licensed under this sub-subparagraph is exempt from the requirement of subparagraph (b)2.~~

~~c. As soon as practicable, but no later than October 3, 2017, the department shall license applicants that meet the requirements of this section in sufficient numbers to result in 10 total licenses issued under this subparagraph, while accounting for the number of licenses issued under sub-subparagraphs a. and b.~~

~~3. For up to two of the licenses issued under subparagraph 2., the department shall give preference to applicants that demonstrate in their applications that they own one or more facilities that are, or were, used for the canning, concentrating, or otherwise processing of citrus fruit or citrus molasses and will use or convert the facility or facilities for the processing of marijuana.~~

~~4. Within 6 months after the registration of 100,000 active qualified patients in the medical marijuana use registry, the department shall license four additional medical marijuana treatment centers that meet the requirements of this section. Thereafter, the department shall license four medical marijuana treatment centers within 6 months after the registration of each additional 100,000 active qualified patients in the medical marijuana use registry that meet the requirements of this section.~~

~~5. Dispensing facilities are subject to the following requirements:~~

~~a. A medical marijuana treatment center may not establish~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006214

~~or operate more than a statewide maximum of 25 dispensing facilities, unless the medical marijuana use registry reaches a total of 100,000 active registered qualified patients. When the medical marijuana use registry reaches 100,000 active registered qualified patients, and then upon each further instance of the total active registered qualified patients increasing by 100,000, the statewide maximum number of dispensing facilities that each licensed medical marijuana treatment center may establish and operate increases by five.~~

~~b. A medical marijuana treatment center may not establish more than the maximum number of dispensing facilities allowed in each of the Northwest, Northeast, Central, Southwest, and Southeast Regions. The department shall determine a medical marijuana treatment center's maximum number of dispensing facilities allowed in each region by calculating the percentage of the total statewide population contained within that region and multiplying that percentage by the medical marijuana treatment center's statewide maximum number of dispensing facilities established under sub-subparagraph a., rounded to the nearest whole number. The department shall ensure that such rounding does not cause a medical marijuana treatment center's total number of statewide dispensing facilities to exceed its statewide maximum. The department shall initially calculate the maximum number of dispensing facilities allowed in each region for each medical marijuana treatment center using county population estimates from the Florida Estimates of Population 2016, as published by the Office of Economic and Demographic Research, and shall perform recalculations following the official release of county population data resulting from each~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006215

~~United States Decennial Census. For the purposes of this subparagraph:~~

~~(I) The Northwest Region consists of Bay, Calhoun, Escambia, Franklin, Gadsden, Gulf, Holmes, Jackson, Jefferson, Leon, Liberty, Madison, Okaloosa, Santa Rosa, Taylor, Wakulla, Walton, and Washington Counties.~~

~~(II) The Northeast Region consists of Alachua, Baker, Bradford, Clay, Columbia, Dixie, Duval, Flagler, Gilchrist, Hamilton, Lafayette, Levy, Marion, Nassau, Putnam, St. Johns, Suwannee, and Union Counties.~~

~~(III) The Central Region consists of Brevard, Citrus, Hardee, Hernando, Indian River, Lake, Orange, Osceola, Pasco, Pinellas, Polk, Seminole, St. Lucie, Sumter, and Volusia Counties.~~

~~(IV) The Southwest Region consists of Charlotte, Collier, DeSoto, Glades, Hendry, Highlands, Hillsborough, Lee, Manatee, Okeechobee, and Sarasota Counties.~~

~~(V) The Southeast Region consists of Broward, Miami-Dade, Martin, Monroe, and Palm Beach Counties.~~

~~c. If a medical marijuana treatment center establishes a number of dispensing facilities within a region that is less than the number allowed for that region under sub-subparagraph b., the medical marijuana treatment center may sell one or more of its unused dispensing facility slots to other licensed medical marijuana treatment centers. For each dispensing facility slot that a medical marijuana treatment center sells, that medical marijuana treatment center's statewide maximum number of dispensing facilities, as determined under sub-subparagraph a., is reduced by one. The statewide maximum number~~

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006216

~~of dispensing facilities for a medical marijuana treatment center that purchases an unused dispensing facility slot is increased by one per slot purchased. Additionally, the sale of a dispensing facility slot shall reduce the seller's regional maximum and increase the purchaser's regional maximum number of dispensing facilities, as determined in sub-subparagraph b., by one for that region. For any slot purchased under this sub-subparagraph, the regional restriction applied to that slot's location under sub-subparagraph b. before the purchase shall remain in effect following the purchase. A medical marijuana treatment center that sells or purchases a dispensing facility slot must notify the department within 3 days of sale.~~

~~d. This subparagraph shall expire on April 1, 2020.~~

~~If this subparagraph or its application to any person or circumstance is held invalid, the invalidity does not affect other provisions or applications of this act which can be given effect without the invalid provision or application, and to this end, the provisions of this subparagraph are severable.~~

~~(b) An applicant for licensure as a medical marijuana treatment center shall apply to the department on a form prescribed by the department and adopted in rule. The department shall adopt rules pursuant to ss. 120.536(1) and 120.54 establishing a procedure for the issuance and biennial renewal of licenses, including initial application and biennial renewal fees sufficient to cover the costs of implementing and administering this section, and establishing supplemental licensure fees for payment beginning May 1, 2018, sufficient to cover the costs of administering ss. 381.989 and 1004.4351. The~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006217

~~department shall identify applicants with strong diversity plans reflecting this state's commitment to diversity and implement training programs and other educational programs to enable minority persons and minority business enterprises, as defined in s. 288.703, and veteran business enterprises, as defined in s. 295.187, to compete for medical marijuana treatment center licensure and contracts. Subject to the requirements in subparagraphs (a)2.-4., the department shall issue a license to an applicant if the applicant meets the requirements of this section and pays the initial application fee. The department shall renew the licensure of a medical marijuana treatment center biennially if the licensee meets the requirements of this section and pays the biennial renewal fee. An individual may not be an applicant, owner, officer, board member, or manager on more than one application for licensure as a medical marijuana treatment center. An individual or entity may not be awarded more than one license as a medical marijuana treatment center. An applicant for licensure as a medical marijuana treatment center must demonstrate:~~

~~1. That, for the 5 consecutive years before submitting the application, the applicant has been registered to do business in the state.~~

~~2. Possession of a valid certificate of registration issued by the Department of Agriculture and Consumer Services pursuant to s. 581.131.~~

~~3. The technical and technological ability to cultivate and produce marijuana, including, but not limited to, low-THC cannabis.~~

~~4. The ability to secure the premises, resources, and~~

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006218

~~personnel necessary to operate as a medical marijuana treatment center.~~

~~5. The ability to maintain accountability of all raw materials, finished products, and any byproducts to prevent diversion or unlawful access to or possession of these substances.~~

~~6. An infrastructure reasonably located to dispense marijuana to registered qualified patients statewide or regionally as determined by the department.~~

~~7. The financial ability to maintain operations for the duration of the 2-year approval cycle, including the provision of certified financial statements to the department.~~

~~a. Upon approval, the applicant must post a $5 million performance bond issued by an authorized surety insurance company rated in one of the three highest rating categories by a nationally recognized rating service. However, a medical marijuana treatment center serving at least 1,000 qualified patients is only required to maintain a $2 million performance bond.~~

~~b. In lieu of the performance bond required under sub-subparagraph a., the applicant may provide an irrevocable letter of credit payable to the department or provide cash to the department. If provided with cash under this sub-subparagraph, the department shall deposit the cash in the Grants and Donations Trust Fund within the Department of Health, subject to the same conditions as the bond regarding requirements for the applicant to forfeit ownership of the funds. If the funds deposited under this sub-subparagraph generate interest, the amount of that interest shall be used by the department for the~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006219

~~administration of this section.~~

~~8. That all owners, officers, board members, and managers have passed a background screening pursuant to subsection (9).~~

~~9. The employment of a medical director to supervise the activities of the medical marijuana treatment center.~~

~~10. A diversity plan that promotes and ensures the involvement of minority persons and minority business enterprises, as defined in s. 288.703, or veteran business enterprises, as defined in s. 295.187, in ownership, management, and employment. An applicant for licensure renewal must show the effectiveness of the diversity plan by including the following with his or her application for renewal:~~

~~a. Representation of minority persons and veterans in the medical marijuana treatment center's workforce;~~

~~b. Efforts to recruit minority persons and veterans for employment; and~~

~~c. A record of contracts for services with minority business enterprises and veteran business enterprises.~~

~~(c) A medical marijuana treatment center may not make a wholesale purchase of marijuana from, or a distribution of marijuana to, another medical marijuana treatment center, unless the medical marijuana treatment center seeking to make a wholesale purchase of marijuana submits proof of harvest failure to the department.~~

~~(d)~~ *Department responsibilities.*—The department shall:

1. Adopt by rule:

a. Operating standards for the cultivation, processing, packaging, and labeling of marijuana;

b. Standards for the sale of marijuana; and

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006220

c. Procedures and requirements for:

(I) The registration and registration renewal of medical marijuana treatment centers (MMTCs);

(II) The issuance and renewal of cultivation, processing, retail, and transportation operating licenses;

(III) The issuance and renewal of cultivation, processing, dispensary, and storage facility permits and of vehicle permits;

(IV) The registration of all principals, employees, and contractors of an MMTC who will participate in the operations of the MMTC; and

(V) The issuance of MMTC employee identification cards to registered principals, employees, and contractors of MMTCs.

2. Establish, maintain, and control a computer software tracking system that traces marijuana from seed to sale and allows real-time, 24-hour access by the department to data from all MMTCs ~~medical marijuana treatment centers~~ and marijuana testing laboratories. The tracking system must allow for integration of other seed-to-sale systems and, at a minimum, include notification of when marijuana seeds are planted, when marijuana plants are harvested and destroyed, and when marijuana is transported, sold, stolen, diverted, or lost. Each MMTC must ~~medical marijuana treatment center shall~~ use the seed-to-sale tracking system established by the department or integrate its own seed-to-sale tracking system with the seed-to-sale tracking system established by the department. Each MMTC ~~medical marijuana treatment center~~ may use its own seed-to-sale system until the department establishes a seed-to-sale tracking system. The department may contract with a vendor to establish the seed-to-sale tracking system. The vendor selected by the department

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006221

may not have a contractual relationship with the department to perform any services pursuant to this section other than the seed-to-sale tracking system. The vendor may not have a direct or indirect financial interest in an MMTC ~~a medical marijuana treatment center~~ or a marijuana testing laboratory.

(b) *Registration.*—

1. The department shall adopt by rule an MMTC registration form that must, at a minimum, require an applicant to provide:

a. Its full legal name;

b. The physical address of each location where it will apply for a facility permit to cultivate, process, dispense, or store marijuana;

c. The name, address, and date of birth of its principals;

d. The name, address, and date of birth of its current employees and contractors who will participate in the operations of the MMTC; and

e. The operation or operations in which it intends to engage, which may include one or more of the following:

(I) Cultivation.

(II) Processing.

(III) Retail.

(IV) Transportation.

2. To be registered as an MMTC, an applicant must submit to the department:

a. The applicant's completed registration form;

b. Personnel registration forms, as described in subsection (9), for all principals, employees, and contractors listed on the applicant's registration form who will participate in the operations of the MMTC. The department may not register the

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006222

applicant as an MMTC until all principals, employees, and contractors listed on the applicant's registration form have registered with the department and are issued MMTC employee identification cards;

c. Proof that all principals listed on the applicant's registration form who will not participate in the operations of the MMTC have passed a level 2 background screening pursuant to chapter 435 within the previous year;

d. Proof that the MMTC has the capability to comply with seed-to-sale tracking system requirements;

e. Proof of the applicant's financial ability to maintain operations for the duration of the registration; and

f. A $1 million performance and compliance bond, to be forfeited if the MMTC fails to comply with:

(I) Registration requirements in this subsection during the registration period; or

(II) Material requirements of this section which are applicable to the functions the applicant intends to perform, as indicated on the registration form.

3. A registration expires 2 years after the date issued.

4. An MMTC must obtain an operating license for each operation it will perform. Registration as an MMTC is not sufficient to cultivate, process, dispense, or transport marijuana.

(c) *Cultivation licenses and processing licenses.*—

1. A registered MMTC may apply for a cultivation license, a processing license, or both. When applying, the MMTC must provide the department, at a minimum, all of the following:

a. A completed cultivation license or processing license

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006223

application form.

b. The physical address of each location where marijuana will be cultivated, processed, or stored.

c. Proof of an established infrastructure or the ability to establish an infrastructure in a reasonable amount of time which is designed for cultivation, processing, testing, packaging, and labeling marijuana and to maintain the infrastructure's security and prevent the theft or diversion of any marijuana, as applicable to the license or licenses requested.

d. Proof that the applicant possesses the technical and technological ability to cultivate and test marijuana or process and test marijuana, as applicable to the license or licenses requested.

e. Proof of operating procedures designed to secure and maintain accountability for all marijuana and marijuana-related byproducts that come into the applicant's possession, and to comply with the required seed-to-sale tracking system.

2. Cultivation licenses and processing licenses expire 2 years after the date issued. In order to renew a license, the licensee must meet all of the requirements for initial licensure; must provide all of the documentation required under subparagraph 1.; and must not have any uncorrected substantial violations of the standards adopted by department rule for the cultivation, processing, testing, packaging, and labeling of marijuana.

3. Before beginning cultivation or processing at any location, the licensee must obtain a facility permit from the department for that location pursuant to paragraph (g).

4. Licensees under this subsection may use contractors to

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006224

assist with the cultivation or processing of marijuana, as applicable, but the licensee is ultimately responsible for all of the operations performed by each contractor relating to the cultivation or processing of marijuana and is responsible for the physical possession of all marijuana. All work done by a contractor must be performed at a location with a facility permit issued by the department. All principals and employees of contractors who participate in the operations of the licensee must be registered with the department and issued MMTC employee identification cards.

5. All marijuana byproducts that cannot be processed or that cannot be reprocessed must be destroyed by the cultivation licensee or processing licensee or its contractor within 30 days after the production of the byproducts.

6. Licensees under this subsection may wholesale marijuana only to other registered MMTCs.

7. Transportation or delivery of marijuana outside of the property owned by a licensee under this subsection may be performed only by an MMTC that holds a transportation license issued pursuant to paragraph (f).

~~(e) A licensed medical marijuana treatment center shall cultivate, process, transport, and dispense marijuana for medical use. A licensed medical marijuana treatment center may not contract for services directly related to the cultivation, processing, and dispensing of marijuana or marijuana delivery devices, except that a medical marijuana treatment center licensed pursuant to subparagraph (a)1. may contract with a single entity for the cultivation, processing, transporting, and dispensing of marijuana and marijuana delivery devices. A~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006225

~~licensed medical marijuana treatment center must, at all times, maintain compliance with the criteria demonstrated and representations made in the initial application and the criteria established in this subsection. Upon request, the department may grant a medical marijuana treatment center a variance from the representations made in the initial application. Consideration of such a request shall be based upon the individual facts and circumstances surrounding the request. A variance may not be granted unless the requesting medical marijuana treatment center can demonstrate to the department that it has a proposed alternative to the specific representation made in its application which fulfills the same or a similar purpose as the specific representation in a way that the department can reasonably determine will not be a lower standard than the specific representation in the application. A variance may not be granted from the requirements in subparagraph 2. and subparagraphs (b)1. and 2.~~

~~1. A licensed medical marijuana treatment center may transfer ownership to an individual or entity who meets the requirements of this section. A publicly traded corporation or publicly traded company that meets the requirements of this section is not precluded from ownership of a medical marijuana treatment center. To accommodate a change in ownership:~~

~~a. The licensed medical marijuana treatment center shall notify the department in writing at least 60 days before the anticipated date of the change of ownership.~~

~~b. The individual or entity applying for initial licensure due to a change of ownership must submit an application that must be received by the department at least 60 days before the~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006226

~~date of change of ownership.~~

~~c. Upon receipt of an application for a license, the department shall examine the application and, within 30 days after receipt, notify the applicant in writing of any apparent errors or omissions and request any additional information required.~~

~~d. Requested information omitted from an application for licensure must be filed with the department within 21 days after the department's request for omitted information or the application shall be deemed incomplete and shall be withdrawn from further consideration and the fees shall be forfeited.~~

~~Within 30 days after the receipt of a complete application, the department shall approve or deny the application.~~

~~2. A medical marijuana treatment center, and any individual or entity who directly or indirectly owns, controls, or holds with power to vote 5 percent or more of the voting shares of a medical marijuana treatment center, may not acquire direct or indirect ownership or control of any voting shares or other form of ownership of any other medical marijuana treatment center.~~

~~3. A medical marijuana treatment center may not enter into any form of profit-sharing arrangement with the property owner or lessor of any of its facilities where cultivation, processing, storing, or dispensing of marijuana and marijuana delivery devices occurs.~~

~~4. All employees of a medical marijuana treatment center must be 21 years of age or older and have passed a background screening pursuant to subsection (9).~~

~~5. Each medical marijuana treatment center must adopt and~~

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006227

~~enforce policies and procedures to ensure employees and volunteers receive training on the legal requirements to dispense marijuana to qualified patients.~~

8.~~6.~~ When growing marijuana, a licensed cultivation MMTC ~~medical marijuana treatment center~~:

a. May use pesticides determined by the department, after consultation with the Department of Agriculture and Consumer Services, to be safely applied to plants intended for human consumption, but may not use pesticides designated as restricted-use pesticides pursuant to s. 487.042.

b. Must grow marijuana within an enclosed permitted cultivation facility ~~structure~~ and in a room separate from any other plant.

c. Must inspect seeds and growing plants for plant pests that endanger or threaten the horticultural and agricultural interests of the state in accordance with chapter 581 and any rules adopted thereunder.

d. Must perform fumigation or treatment of plants, or remove and destroy infested or infected plants, in accordance with chapter 581 and any rules adopted thereunder.

~~7. Each medical marijuana treatment center must produce and make available for purchase at least one low-THC cannabis product.~~

9.~~8.~~ An MMTC ~~A medical marijuana treatment center~~ that produces edibles must hold a permit to operate as a food establishment pursuant to chapter 500, the Florida Food Safety Act, and must comply with all the requirements for food establishments pursuant to chapter 500 and any rules adopted thereunder. ~~Edibles may not contain more than 200 milligrams of~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006228

~~tetrahydrocannabinol, and a single serving portion of an edible may not exceed 10 milligrams of tetrahydrocannabinol.~~ Edibles may have a potency variance of no greater than 15 percent. Edibles may not be attractive to children; be manufactured in the shape of humans, cartoons, or animals; be manufactured in a form that bears any reasonable resemblance to products available for consumption as commercially available candy; or contain any color additives. To discourage consumption of edibles by children, the department shall determine by rule any shapes, forms, and ingredients allowed and prohibited for edibles. MMTCs ~~Medical marijuana treatment centers~~ may not begin processing or dispensing edibles until after the effective date of the rule. The department shall also adopt sanitation rules providing the standards and requirements for the storage, display, or dispensing of edibles.

~~9. Within 12 months after licensure, a medical marijuana treatment center must demonstrate to the department that all of its processing facilities have passed a Food Safety Good Manufacturing Practices, such as Global Food Safety Initiative or equivalent, inspection by a nationally accredited certifying body. A medical marijuana treatment center must immediately stop processing at any facility which fails to pass this inspection until it demonstrates to the department that such facility has met this requirement.~~

10. When processing marijuana, a licensed processing MMTC ~~medical marijuana treatment center~~ must:

a. Process the marijuana within an enclosed permitted processing facility ~~structure~~ and in a room separate from other plants or products.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006229

b. Comply with department rules when processing marijuana with hydrocarbon solvents or other solvents or gases exhibiting potential toxicity to humans. The department shall determine by rule the requirements for MMTCs ~~medical marijuana treatment centers~~ to use such solvents or gases exhibiting potential toxicity to humans.

c. Comply with federal and state laws and regulations and department rules for solid and liquid wastes. The department shall determine by rule procedures for the storage, handling, transportation, management, and disposal of solid and liquid waste generated during marijuana production and processing. The Department of Environmental Protection shall assist the department in developing such rules.

d. Test the processed marijuana using a medical marijuana testing laboratory before it is sold or dispensed. Results must be verified and signed by two MMTC ~~medical marijuana treatment center~~ employees. Before dispensing, the MMTC ~~medical marijuana treatment center~~ must determine that the test results indicate that low-THC cannabis meets the definition of low-THC cannabis, the concentration of tetrahydrocannabinol meets the potency requirements of this section, the labeling of the concentration of tetrahydrocannabinol and cannabidiol is accurate, and all marijuana is safe for human consumption and free from contaminants that are unsafe for human consumption. The department shall determine by rule which contaminants must be tested for and the maximum levels of each contaminant which are safe for human consumption. The Department of Agriculture and Consumer Services shall assist the department in developing the testing requirements for contaminants that are unsafe for human

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006230

consumption in edibles. The department shall also determine by rule the procedures for the treatment of marijuana that fails to meet the testing requirements of this section, s. 381.988, or department rule. The department may select a random sample from edibles available for purchase in a dispensing facility which shall be tested by the department to determine that the edible meets the potency requirements of this section, is safe for human consumption, and the labeling of the tetrahydrocannabinol and cannabidiol concentration is accurate. An MMTC ~~A medical marijuana treatment center~~ may not require payment from the department for the sample. An MMTC ~~A medical marijuana treatment center~~ must recall edibles, including all edibles made from the same batch of marijuana, which fail to meet the potency requirements of this section, which are unsafe for human consumption, or for which the labeling of the tetrahydrocannabinol and cannabidiol concentration is inaccurate. The MMTC ~~medical marijuana treatment center~~ must retain records of all testing and samples of each homogenous batch of marijuana for at least 9 months. The MMTC ~~medical marijuana treatment center~~ must contract with a marijuana testing laboratory to perform audits on the MMTC's ~~medical marijuana treatment center's~~ standard operating procedures, testing records, and samples and provide the results to the department to confirm that the marijuana or low-THC cannabis meets the requirements of this section and that the marijuana or low-THC cannabis is safe for human consumption. An MMTC ~~A medical marijuana treatment center~~ shall reserve two processed samples from each batch and retain such samples for at least 9 months for the purpose of such audits. An MMTC ~~A medical~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006231

~~marijuana treatment center~~ may use a laboratory that has not been certified by the department under s. 381.988 until such time as at least one laboratory holds the required certification~~, but in no event later than July 1, 2018~~.

e. Package the marijuana in compliance with the United States Poison Prevention Packaging Act of 1970, 15 U.S.C. ss. 1471 et seq.

f. Package the marijuana in a receptacle that has a firmly affixed and legible label stating the following information:

(I) The marijuana or low-THC cannabis meets the requirements of sub-subparagraph d.

(II) The name of the MMTC ~~medical marijuana treatment center~~ from which the marijuana originates.

(III) The batch number and harvest number from which the marijuana originates and the date sold or dispensed.

~~(IV) The name of the physician who issued the physician certification.~~

~~(V) The name of the patient.~~

(IV) ~~(VI)~~ The product name, if applicable, and dosage form, including concentration of tetrahydrocannabinol and cannabidiol. The product name may not contain wording commonly associated with products marketed by or to children.

(V) ~~(VII)~~ The recommended dose.

(VI) ~~(VIII)~~ A warning that it is illegal to transfer medical marijuana to another person.

(VII) ~~(IX)~~ A marijuana universal symbol developed by the department.

11. The MMTC that packages the marijuana ~~medical marijuana treatment center~~ shall include in each package a patient package

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006232

insert with information on the specific product dispensed related to:

a. Clinical pharmacology.

b. Indications and use.

c. Dosage and administration.

d. Dosage forms and strengths.

e. Contraindications.

f. Warnings and precautions.

g. Adverse reactions.

12. Each edible shall be individually sealed in plain, opaque wrapping marked only with the marijuana universal symbol. Where practical, each edible shall be marked with the marijuana universal symbol. In addition to the packaging and labeling requirements in subparagraphs 10. and 11., edible receptacles must be plain, opaque, and white without depictions of the product or images other than the MMTC's ~~medical marijuana treatment center's~~ department-approved logo and the marijuana universal symbol. The receptacle must also include a list all of the edible's ingredients, storage instructions, an expiration date, a legible and prominent warning to keep away from children and pets, and a warning that the edible has not been produced or inspected pursuant to federal food safety laws.

(d) *Retail licenses.*—

1. A registered MMTC may apply for a retail license. When applying, the MMTC must provide the department, at a minimum, all of the following:

a. A completed retail license application form.

b. A statement by the applicant indicating whether the applicant intends to dispense by delivery. A retail licensee may

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006233

not deliver marijuana without also obtaining a transportation license pursuant to paragraph (f).

c. The physical address of each location where marijuana will be dispensed or stored.

d. Identifying information for all other current or previous retail licenses held by the applicant or any of the applicant's principals.

e. Proof of operating procedures designed to secure and maintain accountability for all marijuana that the applicant receives and possesses; to ensure that the allowed amount of marijuana and the specified type of marijuana is correctly dispensed to a qualified patient or his or her caregiver pursuant to a physician certification; and to monitor the medical marijuana patient registry and electronically update the registry with dispensing information.

2. A retail license expires 2 years after the date it is issued. The retail licensee must apply for a renewed license before the expiration date. In order to renew a license, a retail licensee must meet all of the requirements for initial licensure; must provide all of the documents required under paragraph (a); and must not have any outstanding substantial violations of the applicable standards adopted by department rule.

3. Before beginning to dispense or store marijuana, the licensee must obtain a facility permit from the department for each location where marijuana will be dispensed or stored. If a facility's permit expires or is suspended or revoked, the MMTC must cease all applicable operations at that facility until the department inspects the facility and renews or reinstates the

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006234

facility's permit.

4. A dispensary facility may not repackage or modify marijuana that has already been packaged for dispensary sale by a cultivation licensee or processing licensee, unless the repackaging is of unprocessed marijuana and is done in accordance with instructions from the cultivator and such repackaging is documented in the required seed-to-sale tracking system.

5. A retail licensee may contract with an MMTC that has a transportation license to transport marijuana between properties owned by the retail licensee, to deliver the marijuana ~~to the residence of a qualified patient~~, and to pick up returns of marijuana.

6. Onsite consumption or administration of marijuana at a dispensary facility is prohibited.

7.~~13.~~ When dispensing marijuana or a marijuana delivery device, a licensed retail MMTC ~~medical marijuana treatment center~~:

a. May dispense any active, valid order for low-THC cannabis, medical cannabis and cannabis delivery devices issued pursuant to former s. 381.986, Florida Statutes 2016, which was entered into the medical marijuana use registry before July 1, 2017.

b. May not dispense more than a 70-day supply of marijuana ~~to a qualified patient or caregiver~~.

c. Must have the MMTC's ~~medical marijuana treatment center's~~ employee who dispenses the marijuana or a marijuana delivery device enter into the medical marijuana use registry his or her name or unique employee identifier.

Formatted:

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006235

d. Unless dispensing pursuant to s. 381.990, ~~M~~must verify that the qualified patient and the caregiver, if applicable, each have an active registration in the medical marijuana use registry and an active and valid medical marijuana use registry identification card, the amount and type of marijuana dispensed matches the physician certification in the medical marijuana use registry for that qualified patient, and the physician certification has not already been filled.

e. Unless dispensing pursuant to s. 381.990, ~~M~~must label the marijuana or the marijuana delivery device with the name of the physician who issued the physician certification and the name of the patient for whom the certification was issued before it is dispensed.

f.~~e.~~ May not dispense marijuana to a qualified patient who is younger than 18 years of age. If the qualified patient is younger than 18 years of age, marijuana may only be dispensed to the qualified patient's caregiver.

g. May sell marijuana to an adult 21 years of age or older pursuant to s. 381.990. When selling marijuana pursuant to s. 381.990, the employee selling the marijuana must determine that the appearance of the buyer is such that a prudent person would believe the buyer to be 21 years of age or older or must carefully check the buyer's driver license, identification card issued by this state or another state of the united states, passport, or United States Armed Services identification card to determine the buyer's age. Prior to selling marijuana pursuant to this sub-subparagraph, an MMTC must be authorized to make such sales by the Department of Business and Professional Regulation. In order to obtain such authorization an MMTC must

Formatted:

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006236

demonstrate: XXXXXXX.

hg.~~f.~~ May not dispense or sell any ~~other type of cannabis,~~ alcohol~~,~~ or illicit drug-related product~~, including pipes, bongs, or wrapping papers, other than a marijuana delivery device required for the medical use of marijuana and which is specified in a physician certification~~.

ih.~~g.~~ Must, upon dispensing the marijuana or marijuana delivery device to a qualified patient or caregiver, record in the registry the date, time, quantity, and form of marijuana dispensed; the type of marijuana delivery device dispensed; and the name and medical marijuana use registry identification number of the qualified patient or caregiver to whom the marijuana delivery device was dispensed.

ji.~~h.~~ Must ensure that patient records are not visible to anyone other than the qualified patient, his or her caregiver, and authorized MMTC ~~medical marijuana treatment center~~ employees.

(e)~~(f)~~ *Security.*—To ensure the safety and security of premises where the cultivation, processing, storing, or dispensing of marijuana occurs, and to maintain adequate controls against the diversion, theft, and loss of marijuana or marijuana delivery devices, an MMTC ~~a medical marijuana treatment center~~ shall:

1.a. Maintain a fully operational security alarm system that secures all entry points and perimeter windows and is equipped with motion detectors; pressure switches; and duress, panic, and hold-up alarms; and

b. Maintain a video surveillance system that records continuously 24 hours a day and meets the following criteria:

Commented [LD3]: I'm still working on this part. I am currently unsure of what an MMTC must be required to show to the DBPR to obtain an authorization. If the senator has any specifics he would like included here, please let me know!

Formatted:

Formatted:

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006237

(I) Cameras are fixed in a place that allows for the clear identification of persons and activities in controlled areas of the premises. Controlled areas include grow rooms, processing rooms, storage rooms, disposal rooms or areas, and point-of-sale rooms.

(II) Cameras are fixed in entrances and exits to the premises, which shall record from both indoor and outdoor, or ingress and egress, vantage points.

(III) Recorded images must clearly and accurately display the time and date.

(IV) Retain video surveillance recordings for at least 45 days or longer upon the request of a law enforcement agency.

2. Ensure that the MMTC's ~~medical marijuana treatment center's~~ outdoor premises have sufficient lighting from dusk until dawn.

3. Ensure that the indoor premises where dispensing occurs includes a waiting area with sufficient space and seating to accommodate qualified patients and caregivers and at least one private consultation area that is isolated from the waiting area and area where dispensing occurs. An MMTC ~~A medical marijuana treatment center~~ may not display products or dispense marijuana or marijuana delivery devices in the waiting area.

4. Not dispense from its premises marijuana or a marijuana delivery device between the hours of 9 p.m. and 7 a.m., but may perform all other operations and deliver marijuana to qualified patients 24 hours a day.

5. Store marijuana in a secured, locked room or a vault.

6. Require at least two of its employees, or two employees of a security agency with whom it contracts, to be on the

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006238

premises at all times where cultivation, processing, or storing of marijuana occurs.

7. Require each employee or contractor to wear a photo identification badge at all times while on the premises.

8. Require each visitor to wear a visitor pass at all times while on the premises.

9. Implement an alcohol and drug-free workplace policy.

10. Report to local law enforcement within 24 hours after the MMTC ~~medical marijuana treatment center~~ is notified or becomes aware of the theft, diversion, or loss of marijuana.

(f) *Transportation licenses; vehicle permits.*—

1. A registered MMTC may apply for a transportation license. When applying, the MMTC must provide the department, at a minimum, all of the following:

a. The physical address of the MMTC's place of business.

b. Proof of a documentation system in accordance with the required seed-to-sale tracking system, including transportation manifests, for transporting marijuana between licensed facilities and to qualified patients.

c. Proof of health and sanitation standards for the transportation of marijuana.

d. Proof that all marijuana transported between licensed facilities will be transported in tamper-evident shipping containers.

2. Marijuana may not be transported on the property of an airport, a seaport, a spaceport, or any property of the Federal Government.

3. A transportation licensee may transport marijuana and marijuana delivery devices only in a vehicle that is owned or

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006239

leased by the licensee or a contractor of the licensee and for which a valid vehicle permit has been issued by the department.

4. A vehicle permit may be obtained by an MMTC holding a transportation license upon submission of an application. The MMTC must designate as the driver for each permitted vehicle an employee or contracted employee who is registered with the department and who is authorized to possess marijuana when not on the property of the MMTC. Such designation must be displayed in the vehicle at all times. Each permitted vehicle must be GPS-monitored. A vehicle permit remains valid and does not expire unless the MMTC or its contractor disposes of the permitted vehicle or the MMTC's registration or transportation license is transferred, canceled, not renewed, or revoked by the department. The department shall cancel a vehicle permit upon the request of the MMTC or its contractor.

5. When transporting marijuana, a permitted vehicle is subject to inspection and search without a search warrant by authorized employees of the department, sheriffs, deputy sheriffs, police officers, or other law enforcement officers to determine that the MMTC is operating in compliance with this section.

6. An MMTC with a transportation license may deliver, or contract for the delivery of, marijuana and marijuana delivery devices to other MMTCs, ~~and~~ to qualified patients and caregivers within this state, and to adults over the age of 21 within this state. When delivering to a qualified patient or caregiver, an MMTC or its contractor must verify the identity of the qualified patient upon placement of the delivery order and again upon delivery. When delivering marijuana to an adult age 21 or older,

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006240

the an MMTC or its contractor must verify the age of the buyer upon placement of the order and again upon delivery. In order to verify the age of the buyer, the MMTC must determine that the appearance of the buyer is such that a prudent person would believe the buyer to be 21 years of age or older or must carefully check the buyer's driver license, identification card issued by this state or another state of the united states, passport, or United States Armed Services identification card to determine the buyer's age. Deliveries may only be made to the same qualified patient who placed the order or his or her caregiver. A county or municipality may not prohibit deliveries of marijuana and marijuana delivery devices to qualified patients within the county or municipality. The department shall adopt rules specific to the delivery of marijuana ~~to qualified patients and caregivers~~. Such rules must include:

a. Procedures for verifying the age and identity of the person submitting and receiving a delivery, as appropriate, including required training for delivery personnel; and

b. A maximum dispensary value for all marijuana and currency that may be in the possession of a registered MMTC employee or contractor while he or she makes a delivery. The value established by rule may not be less than $5,000.

7. Licensees under this subsection may use contractors to assist with the transportation of marijuana, but the licensee is ultimately responsible for all of the actions and operations of each contractor relating to the transportation of marijuana and must know the location of all marijuana at all times. All principals and employees of contractors contracted by a licensee under this subsection who will participate in the operations of

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006241

the licensee must be registered with the department and issued MMTC employee identification cards.

(g) *Facility permits.*—

1. Before cultivating, processing, dispensing, or storing marijuana at any location, an MMTC must apply to the department for the applicable facility permit for that facility. The department must adopt by rule an application form. Upon receiving a request for a permit from a licensee, the department shall inspect the facility for compliance with this section and rules adopted hereunder, and, upon a determination of compliance, shall issue a permit to the facility. The department must issue or deny the facility permit within 30 days after receiving the request for a permit.

2. A facility permit expires 2 years after the date it is issued. Each facility must be inspected by the department for compliance with this section and rules adopted hereunder before the facility's permit is renewed.

3. If a facility permit expires or is suspended or revoked, the MMTC must cease all applicable operations at that facility until the department inspects the facility and renews or reinstates the facility's permit.

4. Cultivation facilities and processing facilities must be:

a. Insured with at least $1 million of hazard and liability insurance per location; and

b. Secure, closed to the public, and unless an ordinance allows the facility to be located within 1,000 feet, be located at least 1,000 feet away from any existing public or private elementary or secondary school, a child care facility as defined

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006242

in s. 402.302, or a licensed service provider offering substance abuse services.

5. All matters regarding the permitting and regulation of cultivation facilities and processing facilities, including the location of such facilities, are preempted to the state.

6. Dispensary facilities and storage facilities must be:

a. Insured with at least $500,000 of hazard and liability insurance for each facility where marijuana is dispensed or stored; and

b. Located at least 1,000 feet away from any existing public or private elementary or secondary school, child care facility as defined in s. 402.302, or licensed service provider offering substance abuse services.

7. The governing body of a county or municipality may, by ordinance, prohibit or limit the number of dispensary facilities ~~from being~~ located within its jurisdiction but may not prohibit an MMTC with a retail license or its permitted storage facility from being located within its jurisdiction if the licensee is delivering or contracting to deliver marijuana ~~to qualifying patients~~ within the jurisdiction. The department may not issue a facility permit for a dispensary facility in a county or municipality where the board of county commissioners of that county or the city council or other legislative body of that municipality has adopted such an ordinance. A county or municipality may levy a local business tax on a dispensary facility. An ordinance adopted by a municipality or county pursuant to this paragraph may not:

a. Provide exclusive access to one or several individuals or entities to operate dispensary facilities within the

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006243

jurisdiction.

b. Prohibit specific individuals or entities from operating a dispensary facility within the jurisdiction if the ordinance allows dispensary facilities to operate in the jurisdiction.

c. Prohibit the delivery of marijuana ~~to qualifying patients~~ within the jurisdiction by a properly licensed MMTC located within the jurisdiction.

8. The department may adopt by rule additional requirements for the permitting of cultivation, processing, dispensary, and storage facilities to ensure the sanitary, safe, and secure cultivation, processing, dispensing, storage, and sale of marijuana.

~~(g) To ensure the safe transport of marijuana and marijuana delivery devices to medical marijuana treatment centers, marijuana testing laboratories, or qualified patients, a medical marijuana treatment center must:~~

~~1. Maintain a marijuana transportation manifest in any vehicle transporting marijuana. The marijuana transportation manifest must be generated from a medical marijuana treatment center's seed-to-sale tracking system and include the:~~

~~a. Departure date and approximate time of departure.~~

~~b. Name, location address, and license number of the originating medical marijuana treatment center.~~

~~c. Name and address of the recipient of the delivery.~~

~~d. Quantity and form of any marijuana or marijuana delivery device being transported.~~

~~e. Arrival date and estimated time of arrival.~~

~~f. Delivery vehicle make and model and license plate number.~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006244

~~g. Name and signature of the medical marijuana treatment center employees delivering the product.~~

~~(I) A copy of the marijuana transportation manifest must be provided to each individual, medical marijuana treatment center, or marijuana testing laboratory that receives a delivery. The individual, or a representative of the center or laboratory, must sign a copy of the marijuana transportation manifest acknowledging receipt.~~

~~(II) An individual transporting marijuana or a marijuana delivery device must present a copy of the relevant marijuana transportation manifest and his or her employee identification card to a law enforcement officer upon request.~~

~~(III) Medical marijuana treatment centers and marijuana testing laboratories must retain copies of all marijuana transportation manifests for at least 3 years.~~

~~2. Ensure only vehicles in good working order are used to transport marijuana.~~

~~3. Lock marijuana and marijuana delivery devices in a separate compartment or container within the vehicle.~~

~~4. Require employees to have possession of their employee identification card at all times when transporting marijuana or marijuana delivery devices.~~

~~5. Require at least two persons to be in a vehicle transporting marijuana or marijuana delivery devices, and require at least one person to remain in the vehicle while the marijuana or marijuana delivery device is being delivered.~~

~~6. Provide specific safety and security training to employees transporting or delivering marijuana and marijuana delivery devices.~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006245

(h) *Advertising.*—An MMTC ~~A medical marijuana treatment center~~ may not engage in advertising that is visible to members of the public from any street, sidewalk, park, or other public place, except:

1. An MMTC dispensary facility ~~The dispensing location of A medical marijuana treatment center~~ may have a sign that is affixed to the outside or hanging in the window of the premises which identifies the dispensary by the licensee's business name, a department-approved trade name, or a department-approved logo. An MMTC's ~~A medical marijuana treatment center's~~ trade name and logo may not contain wording or images commonly associated with marketing targeted toward children or which promote recreational use of marijuana.

2. An MMTC ~~A medical marijuana treatment center~~ may engage in Internet advertising and marketing under the following conditions:

a. All advertisements must be approved by the department.

b. An advertisement may not have any content that specifically targets individuals under the age of 18, including cartoon characters or similar images.

Commented [LD4]: Keep at 18 or make 21?

c. An advertisement may not be an unsolicited pop-up advertisement.

d. Opt-in marketing must include an easy and permanent opt-out feature.

(i) *Online retail catalogs.*—Each retail MMTC ~~medical marijuana treatment center~~ that dispenses marijuana and marijuana delivery devices shall make available to the public on its website:

1. Each marijuana and low-THC product available for

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006246

purchase, including the form, strain of marijuana from which it was extracted, cannabidiol content, tetrahydrocannabinol content, dose unit, total number of doses available, and the ratio of cannabidiol to tetrahydrocannabinol for each product.

2. The price for a 30-day, 50-day, and 70-day supply at a standard dose for each marijuana and low-THC product available for purchase.

3. The price for each marijuana delivery device available for purchase.

4. If applicable, any discount policies and eligibility criteria for such discounts.

(j) *Sourcing of marijuana for medical use.*—MMTCs ~~Medical marijuana treatment centers~~ are the sole source from which a qualified patient may legally obtain marijuana.

Commented [LD5]: Adults also?

(k) *Rulemaking.*—The department may adopt rules pursuant to ss. 120.536(1) and 120.54 to implement this subsection.

(9) MEDICAL MARIJUANA TREATMENT CENTER PERSONNEL; REGISTRATION; EMPLOYEE IDENTIFICATION CARDS.—

(a) By October 3, 2019, the department shall adopt rules to administer the registration of MMTC principals, employees, and contractors who participate in the operations of an MMTC. Before hiring or contracting with any individual who is not registered with the department or who does not possess a current MMTC employee identification card, an MMTC must submit to the department an application to register that person as an MMTC employee. The department shall adopt by rule a form for such applications which requires the applicant to provide all of the following:

1. His or her full legal name, social security number, date

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006247

of birth, and home address.

2. A full-face, passport-type, color photograph of the applicant taken within the 90 days immediately preceding registration.

3. Proof that he or she has passed a level 2 background screening pursuant to chapter 435 within the previous year.

4. Whether the applicant will be authorized by the MMTC to possess marijuana while not on MMTC property.

(b) Once the department has received a completed application from an MMTC, the department shall register the principal, employee, or contractor associated with the MMTC and issue him or her an MMTC employee identification card that, at a minimum, includes all of the following:

1. The employee's name and the name of the MMTC that employs him or her.

2. The employee's photograph, as required under paragraph (a).

3. The expiration date of the card, which is 1 year after the date of its issuance.

4. Whether the employee is authorized by the MMTC to possess marijuana while not on MMTC property.

(c) If any information provided to the department for the registration of an MMTC principal, employee, or contractor or in the application for an MMTC employee identification card changes or if the registered person's employment status with the MMTC changes, the registered person and the MMTC must update the department with the new information or status within 7 days after the change.

(d) The department may contract with one or more vendors

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006248

for the purpose of issuing MMTC employee identification cards under this subsection.

~~(9) BACKGROUND SCREENING.—An individual required to undergo a background screening pursuant to this section must pass a level 2 background screening as provided under chapter 435, which, in addition to the disqualifying offenses provided in s. 435.04, shall exclude an individual who has an arrest awaiting final disposition for, has been found guilty of, regardless of adjudication, or has entered a plea of nolo contendere or guilty to an offense under chapter 837, chapter 895, or chapter 896 or similar law of another jurisdiction.~~

~~(a) Such individual must submit a full set of fingerprints to the department or to a vendor, entity, or agency authorized by s. 943.053(13). The department, vendor, entity, or agency shall forward the fingerprints to the Department of Law Enforcement for state processing, and the Department of Law Enforcement shall forward the fingerprints to the Federal Bureau of Investigation for national processing.~~

~~(b) Fees for state and federal fingerprint processing and retention shall be borne by the individual. The state cost for fingerprint processing shall be as provided in s. 943.053(3)(e) for records provided to persons or entities other than those specified as exceptions therein.~~

~~(c) Fingerprints submitted to the Department of Law Enforcement pursuant to this subsection shall be retained by the Department of Law Enforcement as provided in s. 943.05(2)(g) and (h) and, when the Department of Law Enforcement begins participation in the program, enrolled in the Federal Bureau of Investigation's national retained print arrest notification~~

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006249

~~program. Any arrest record identified shall be reported to the department.~~

(10) MEDICAL MARIJUANA TREATMENT CENTER INSPECTIONS; ADMINISTRATIVE ACTIONS.—

~~(a) The department shall conduct announced or unannounced inspections of medical marijuana treatment centers to determine compliance with this section or rules adopted pursuant to this section.~~

(a) ~~(b)~~ The department shall inspect an MMTC and its facilities, as appropriate, ~~a medical marijuana treatment center~~ upon receiving a complaint or notice that the MMTC ~~medical marijuana treatment center~~ has dispensed marijuana containing mold, bacteria, or other contaminant that may cause or has caused an adverse effect to human health or the environment.

(b) ~~(c)~~ The department shall conduct at least a biennial inspection of each MMTC ~~medical marijuana treatment center~~ to evaluate the MMTC's ~~medical marijuana treatment center's~~ records, personnel, equipment, processes, security measures, sanitation practices, and quality assurance practices.

(c) The department shall conduct at least a biennial inspection of each permitted facility. The department may conduct additional announced or unannounced inspections of a permitted facility within reasonable hours in order to ensure compliance with this section and rules adopted under this section.

(d) The Department of Agriculture and Consumer Services and the department shall enter into an interagency agreement to ensure cooperation and coordination in the performance of their obligations under this section and their respective regulatory

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006250

and authorizing laws. The department, the Department of Highway Safety and Motor Vehicles, and the Department of Law Enforcement may enter into interagency agreements for the purposes specified in this subsection or subsection (7).

(e) The department shall publish a list of all approved MMTCs ~~medical marijuana treatment centers~~, medical directors, and qualified physicians on its website.

(f) The department may impose reasonable fines not to exceed $10,000 on an MMTC ~~a medical marijuana treatment center~~ for any of the following violations:

1. Violating this section or department rule.

2. Failing to maintain qualifications for approval.

3. Endangering the health, safety, or security of a qualified patient or adult purchasing marijuana pursuant to s. 381.990.

4. Improperly disclosing personal and confidential information of the qualified patient.

5. Attempting to procure MMTC ~~medical marijuana treatment center~~ approval by bribery, fraudulent misrepresentation, or extortion.

6. Being convicted or found guilty of, or entering a plea of guilty or nolo contendere to, regardless of adjudication, a crime in any jurisdiction which directly relates to the business of an MMTC ~~a medical marijuana treatment center~~.

7. Making or filing a report or record that the MMTC ~~medical marijuana treatment center~~ knows to be false.

8. Willfully failing to maintain a record required by this section or department rule.

9. Willfully impeding or obstructing an employee or agent

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006251

of the department in the furtherance of his or her official duties.

10. Engaging in fraud or deceit, negligence, incompetence, or misconduct in the business practices of an MMTC ~~a medical marijuana treatment center~~.

11. Making misleading, deceptive, or fraudulent representations in or related to the business practices of an MMTC ~~a medical marijuana treatment center~~.

12. Having a license or the authority to engage in any regulated profession, occupation, or business that is related to the business practices of an MMTC ~~a medical marijuana treatment center~~ suspended, revoked, or otherwise acted against by the licensing authority of any jurisdiction, including its agencies or subdivisions, for a violation that would constitute a violation under Florida law.

13. Violating a lawful order of the department or an agency of the state, or failing to comply with a lawfully issued subpoena of the department or an agency of the state.

(g) The department may suspend, revoke, or refuse to renew an MMTC's registration, operating ~~a medical marijuana treatment center~~ license, and any vehicle permits or facility permits if the MMTC ~~medical marijuana treatment center~~ commits any of the violations in paragraph (f).

(h) the department shall refuse to renew the cultivation, processing, retail, or transportation license of an MMTC that has been issued such a license and has not to cultivate, process, dispense, or transport marijuana, respectively, by the date that the MMTC is required to renew such license.

(i) ~~(h)~~ The department may adopt rules pursuant to ss.

120.536(1) and 120.54 to implement this subsection.

~~381.986 Medical use of marijuana.—~~

(12) PENALTIES.—

(a) A qualified physician commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083, if the qualified physician issues a physician certification for the medical use of marijuana for a patient without a reasonable belief that the patient is suffering from a qualifying medical condition.

(b) A person who fraudulently represents that he or she has a qualifying medical condition to a qualified physician for the purpose of being issued a physician certification commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083.

(c) A qualified patient who uses marijuana, not including low-THC cannabis, or a caregiver who administers marijuana, not including low-THC cannabis, in plain view of or in a place open to the general public; in a school bus, a vehicle, an aircraft, or a boat; or on the grounds of a school except as provided in s. 1006.062, commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083.

(d) A qualified patient or caregiver who cultivates marijuana or who purchases or acquires marijuana from any person or entity other than a medical marijuana treatment center violates s. 893.13 and is subject to the penalties provided therein.

(e)1. A qualified patient or caregiver in possession of marijuana or a marijuana delivery device who fails or refuses to present his or her marijuana use registry identification card

Commented [LD6]: added

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006253

upon the request of a law enforcement officer commits a misdemeanor of the second degree, punishable as provided in s. 775.082 or s. 775.083, unless it can be determined through the medical marijuana use registry that the person is authorized to be in possession of that marijuana or marijuana delivery device.

2. A person charged with a violation of this paragraph may not be convicted if, before or at the time of his or her court or hearing appearance, the person produces in court or to the clerk of the court in which the charge is pending a medical marijuana use registry identification card issued to him or her which is valid at the time of his or her arrest. The clerk of the court is authorized to dismiss such case at any time before the defendant's appearance in court. The clerk of the court may assess a fee of $5 for dismissing the case under this paragraph.

(f) A caregiver who violates any of the applicable provisions of this section or applicable department rules, for the first offense, commits a misdemeanor of the second degree, punishable as provided in s. 775.082 or s. 775.083 and, for a second or subsequent offense, commits a misdemeanor of the first degree, punishable as provided in s. 775.082 or s. 775.083.

Commented [LD7]: Review these to determine which are still applicable.

(g) A qualified physician who issues a physician certification for marijuana or a marijuana delivery device and receives compensation from a medical marijuana treatment center related to the issuance of a physician certification for marijuana or a marijuana delivery device is subject to disciplinary action under the applicable practice act and s. 456.072(1)(n).

(h) A person transporting marijuana or marijuana delivery devices on behalf of a medical marijuana treatment center or

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006254

marijuana testing laboratory who fails or refuses to present a transportation manifest upon the request of a law enforcement officer commits a misdemeanor of the second degree, punishable as provided in s. 775.082 or s. 775.083.

(i) Persons and entities conducting activities authorized and governed by this section and s. 381.988 are subject to ss. 456.053, 456.054, and 817.505, as applicable.

(j) A person or entity that cultivates, processes, distributes, sells, or dispenses marijuana, as defined in s. 29(b)(4), Art. X of the State Constitution, and is not licensed as a medical marijuana treatment center violates s. 893.13 and is subject to the penalties provided therein.

Commented [LD8]: Still applicable?

(k) A person who manufactures, distributes, sells, gives, or possesses with the intent to manufacture, distribute, sell, or give marijuana or a marijuana delivery device that he or she holds out to have originated from a licensed medical marijuana treatment center but that is counterfeit commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084. For the purposes of this paragraph, the term "counterfeit" means marijuana; a marijuana delivery device; or a marijuana or marijuana delivery device container, seal, or label which, without authorization, bears the trademark, trade name, or other identifying mark, imprint, or device, or any likeness thereof, of a licensed medical marijuana treatment center and which thereby falsely purports or is represented to be the product of, or to have been distributed by, that licensed medical marijuana treatment facility.

(l) Any person who possesses or manufactures a blank, forged, stolen, fictitious, fraudulent, counterfeit, or

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006255

otherwise unlawfully issued medical marijuana use registry identification card commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

(14) EXCEPTIONS TO OTHER LAWS.—

Commented [LD9]: added

(a) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other provision of law, but subject to the requirements of this section, a qualified patient and the qualified patient's caregiver may purchase from a medical marijuana treatment center for the patient's medical use a marijuana delivery device and up to the amount of marijuana authorized in the physician certification, but may not possess more than a 70-day supply of marijuana, or the greater of 4 ounces of marijuana in a form for smoking or an amount of marijuana in a form for smoking approved by the department pursuant to paragraph (4)(f), at any given time and all marijuana purchased must remain in its original packaging.

(b) Notwithstanding paragraph (a), s. 893.13, s. 893.135, s. 893.147, or any other provision of law, a qualified patient and the qualified patient's caregiver may purchase and possess a marijuana delivery device intended for the medical use of marijuana by smoking from a vendor other than a medical marijuana treatment center.

(c) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other provision of law, but subject to the requirements of this section, an approved medical marijuana treatment center and its owners, managers, and employees may manufacture, possess, sell, deliver, distribute, dispense, and lawfully dispose of marijuana or a marijuana delivery device as provided in this section, s. 381.988, s. 381.990, and by department rule. For the

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006256

purposes of this subsection, the terms "manufacture," "possession," "deliver," "distribute," and "dispense" have the same meanings as provided in s. 893.02.

(d) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other provision of law, but subject to the requirements of this section, a certified marijuana testing laboratory, including an employee of a certified marijuana testing laboratory acting within the scope of his or her employment, may acquire, possess, test, transport, and lawfully dispose of marijuana as provided in this section, in s. 381.988, and by department rule.

(e) A licensed medical marijuana treatment center and its owners, managers, and employees are not subject to licensure or regulation under chapter 465 or chapter 499 for manufacturing, possessing, selling, delivering, distributing, dispensing, or lawfully disposing of marijuana or a marijuana delivery device, as provided in this section, in s. 381.988, and by department rule.

(f) This subsection does not exempt a person from prosecution for a criminal offense related to impairment or intoxication resulting from the medical use of marijuana or relieve a person from any requirement under law to submit to a breath, blood, urine, or other test to detect the presence of a controlled substance.

(g) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other provision of law, but subject to the requirements of this section and pursuant to policies and procedures established pursuant to s. 1006.62(8), school personnel may possess marijuana that is obtained for medical use pursuant to this

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006257

section by a student who is a qualified patient.

(h) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other provision of law, but subject to the requirements of this section, a research institute established by a public postsecondary educational institution, such as the H. Lee Moffitt Cancer Center and Research Institute, Inc., established under s. 1004.43, or a state university that has achieved the preeminent state research university designation under s. 1001.7065 may possess, test, transport, and lawfully dispose of marijuana for research purposes as provided by this section.

Section 3. Section 381.990 of the Florida Statutes is created to read:

381.990 Adult Use of Marijuana.-

(1) Notwithstanding s. 893.13, s. 893.135, s. 893.147, or any other provision of law but subject to the requirements of this section an adult 21 years of age or older may purchase from a medical marijuana treatment center licensed for retail sale by the department pursuant to s. 381.986 and authorized for sale of marijuana for adult use by the Department of Business and Professional Regulation, possess, use, and transport up to a 70 day supply of marijuana or 2.5 ounces of marijuana in a form for smoking and one or more marijuana delivery devices, as defined in s. 381.986. This section does not authorize any person or entity other than a medical marijuana treatment center to cultivate or sell marijuana. Marijuana authorized by this section may not be used in any public place. This section does not limit the ability of a private property owner to restrict the use of marijuana on his or her private property.

Subject: **South Florida Water Management District Preliminary Budget Submission for Fiscal Year 2020-2021**

Dear President Galvano, Speaker Oliva, and Legislative Committee Chairs:

Pursuant to Section 373.535, Florida Statutes, the South Florida Water Management District (District) Governing Board respectfully submits a preliminary budget for October 1, 2020 – September 30, 2021 (Fiscal Year 2020-2021) of $1,023,069,964. This preliminary budget continues to support priorities identified by the Legislature and implement Governor DeSantis' Achieving More Now for Florida's Environment Executive Order.

Our preliminary budget demonstrates our commitment to the District's mission of ecosystem restoration, flood protection, and water supply. Please contact Candida Heater at cheater@sfwmd.gov or (561)682-6486 if you have questions about our submission.

Thank you,

Drew Bartlett
Executive Director

I. FOREWORD

This Preliminary Budget report has been prepared to satisfy the requirements of Senate Bill 1986 (Chapter 2012-126, Laws of Florida), which made significant revisions to sections 373.503, 373.535 and 373.536, Florida Statutes (F.S.), and provided the Legislature additional oversight of the water management districts' budgets. This report provides the Legislature with a comprehensive budget that allows for an analysis that coincides with the annual legislative session and enables the Legislature to review the effectiveness of the districts' utilization of taxpayer resources to meet core mission responsibilities. The Preliminary Budget also provides a fiscal analysis determination regarding the progress of each District in meeting its 20-year projected water supply demands, including funding for alternative sources and conservation. The report will highlight projects dedicated to supporting the districts' core missions of water supply, water quality, flood protection and floodplain management, and natural systems.

The content and format of this report were developed collaboratively by the staffs of the Executive Office of the Governor (EOG), Senate, House of Representatives, Florida Department of Environmental Protection (FDEP), and all five water management districts. The report's standardized format utilizes six statutorily identified District program areas listed below.

- Water Resources Planning and Monitoring
- Land Acquisition, Restoration, and Public Works
- Operation and Maintenance of Lands and Works
- Regulation
- Outreach
- District Management and Administration

The Legislature may annually review the Preliminary Budget for each District. On or before March 1 of each year, the President of the Senate and the Speaker of the House of Representatives may submit comments regarding the Preliminary Budget to the districts and provide a copy of the comments to the EOG. Each District is required to respond to any comments in writing on or before March 15 of each year to the President of the Senate, the Speaker of the House of Representatives, and the EOG. If, following such review, the Legislature does not take any further action on or before July 1 of each year, a water management district may proceed with Tentative Budget development.

In compliance with statutory requirements, the South Florida Water Management District submits this January 15 Preliminary Budget for review to the President of the Senate, the Speaker of the House of Representatives, and the chairs of each legislative committee and subcommittee having substantive or fiscal jurisdiction over water management districts, as determined by the President of the Senate or the Speaker of the House of Representatives.

Standardized definitions and acronyms that may help the reader in reviewing this document have been provided on the Department of Environmental Protection's website at https://floridadep.gov/water-policy/water-policy/documents/wmd-budget-definitions-and-acronyms.

AMERICAN OVERSIGHT

II. INTRODUCTION

A. History of All Water Management Districts

Due to extreme drought and shifting public focus on resource protection and conservation, legislators passed four major laws in 1972: The Environmental Land and Water Management Act, the Comprehensive Planning Act, the Land Conservation Act, and the Water Resources Act. Collectively, these policy initiatives reflected the philosophy that land use, growth management and water management should be joined.

Florida's institutional arrangement for water management is unique. The Florida Water Resources Act of 1972 (WRA) (Chapter 373, F.S.) granted Florida's five water management districts broad authority and responsibility. Two of the five districts existed prior to the passage of the WRA (South Florida and Southwest Florida), primarily as flood control agencies. Today, however, the responsibilities of all five districts encompass four broad categories: water supply (including water allocation and conservation), water quality, flood protection and floodplain management, and natural systems.

The five regional water management districts, established by the Legislature and recognized in the Florida Constitution, are set up largely on hydrologic boundaries. Water management districts are funded by ad valorem taxes normally reserved for local governments using taxing authority which emanates from a constitutional amendment passed by Floridians in 1976. The water management districts are governed regionally by boards appointed by the Governor and confirmed by the Senate. There is also general oversight at the state level by the Department of Environmental Protection.

In Florida, water is a resource of the state, owned by no one individual, with the use of water overseen by water management districts acting in the public interest. Florida law recognizes the importance of balancing human needs for water with those of Florida's natural systems.

Each of Florida's five water management districts has a history that cannot be completely detailed here. South Florida's subtropical extremes of hurricane, flood and drought, combined with efforts to populate this "new frontier," led the U.S. Congress to adopt legislation creating the Central and Southern Florida Flood Control (C&SF) Project in 1948, the largest civil works project in the country at that time.

The C&SF Project's primary goal was to serve the needs of the region's growing agricultural and urban populations and to protect and manage water resources. The United States Army Corp of Engineers (USACE) would, over the following decades, design and build a vast network of levees, canals and other improved waterways, and water control structures designed to help manage the often-unpredictable weather extremes of the region. Construction began in 1949 and continued for more than 20 years.

In 1949, the Florida Legislature created the Central and Southern Florida Flood Control District (FCD) to act as the local sponsor for this federal project by operating and maintaining the water control network system.

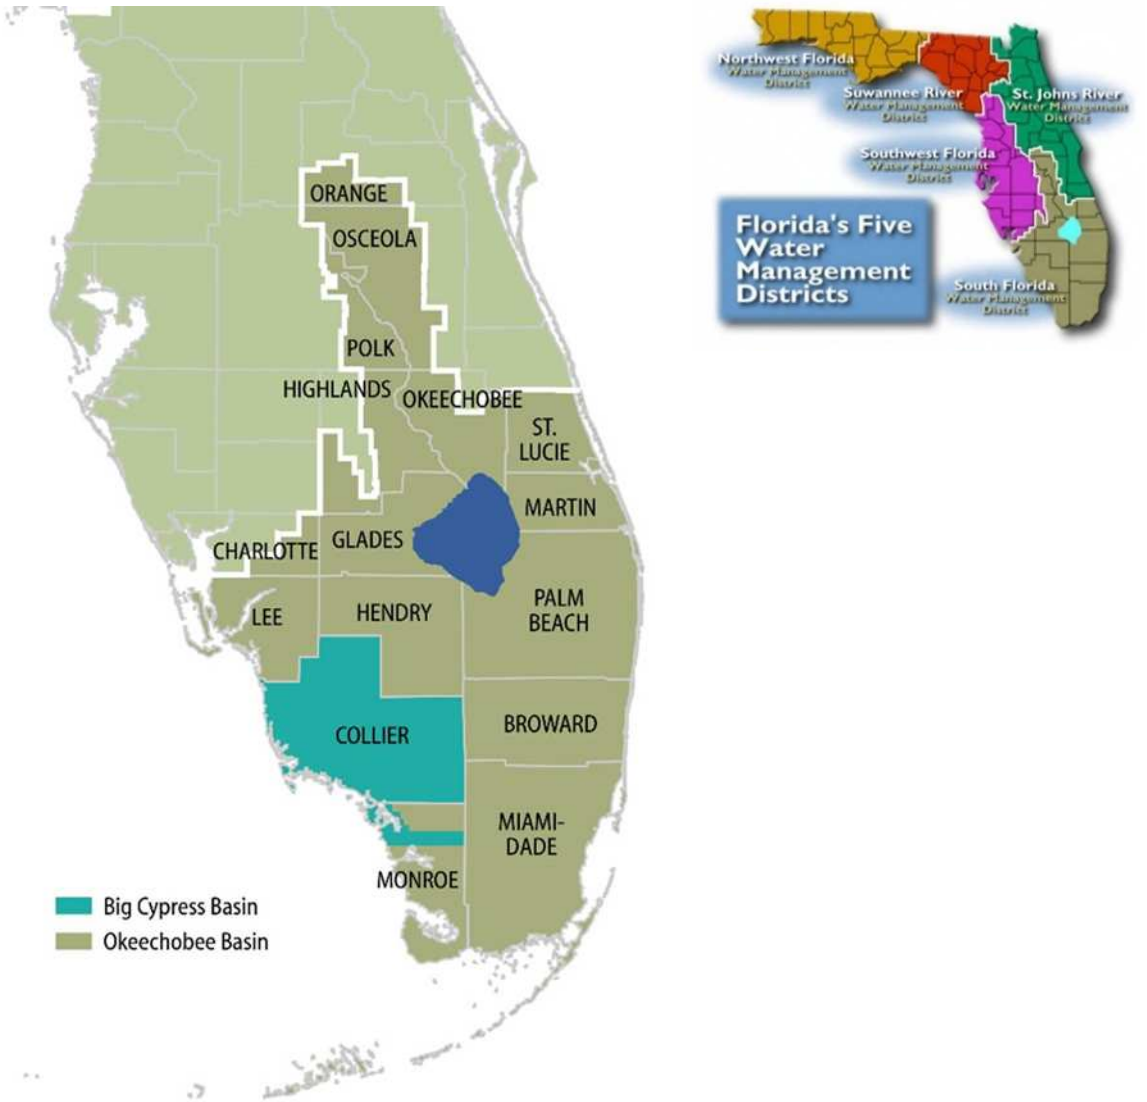
Throughout its history, the agency evolved to meet gubernatorial and legislative direction. After the Florida Water Resources Act of 1972 greatly expanded the responsibilities of the existing FCD, it was renamed the South Florida Water Management District in 1976, and new boundaries were drawn to encompass the region's primary water sheds.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006270

II. INTRODUCTION

Together, these unique organizations work with state agencies and local governments to ensure there are adequate water supplies to meet growing demands while: protecting and restoring the water resources of the state; addressing water quality issues; protecting natural systems in Florida through land acquisition, land management, and ecosystem restoration; and promoting flood protection. For additional information, interested readers should review the districts' websites and contact officials at each District. The South Florida Water Management District's website is *sfwmd.gov*.

AMERICAN OVERSIGHT



II. INTRODUCTION

B. Overview of the District

The South Florida Water Management District includes about 30 percent of the state's total area, 18,000 square-miles, serving and protecting 8.7 million people. The District encompasses all or part* of the 16 counties, spanning from Orlando to Key West including:

Broward	Charlotte*	Collier	Glades
Hendry	Highlands*	Lee	Martin
Miami-Dade	Monroe	Okeechobee*	Orange*
Osceola *	Palm Beach	Polk*	St. Lucie

Figure 1. District Map

AMERICAN OVERSIGHT

II. INTRODUCTION

There are two primary basins contained within the District's boundaries, the **Okeechobee Basin** and the **Big Cypress Basin.** The Okeechobee Basin is based on the sprawling Kissimmee-Okeechobee-Everglades ecosystem, which stretches from Central Florida's Chain of Lakes to Lake Okeechobee and south to the Florida Keys. It includes the 700,000 acres within the Everglades Agricultural Area, the heavily developed southeast coast and Everglades National Park. The Okeechobee Basin includes 15 of the 16 counties. The Okeechobee Basin excludes Collier County and a small portion of mainland Monroe County.

The Big Cypress Basin includes all of Collier County and a small portion of mainland Monroe County, including the Big Cypress National Preserve and the 10,000 Islands. The Big Cypress Basin primarily provides flood control and stormwater management to the citizens of Collier County and works in cooperation with Collier County and other local governments on water resource, water resource development, and alternative water supply issues.

Governing Board

The District's Governing Board sets policy and direction for the entire agency. The Governing Board is composed of nine members appointed from specific geographic areas within the District. The members are appointed by the Governor and confirmed by the Florida Senate. Appointments are made on a staggered basis as vacancies occur. Board members serve without salary for a term of four years. The Governing Board elects its own officers, including a chairman and vice-chairman.

Legislation creating water management districts established two basin boards within the boundaries of the District. The Big Cypress Basin Board oversees water resource issues within Collier County and a small portion of mainland Monroe County. It is chaired by the District's Governing Board member representing that area along with five Basin residents appointed by the Governor and confirmed by the Florida Senate. Big Cypress Basin Board members serve terms of three years and receive no compensation. The Okeechobee Basin Board (the District's nine-member Governing Board) oversees water resource issues within the remaining counties.

Executive Office

The Governing Board appoints the agency's Executive Director and the Inspector General. The Florida Senate confirms the Executive Director. The Executive Director is responsible for administering the directives of the board and managing day-to-day District activities. The Inspector General is responsible for reviewing and evaluating internal controls to ensure the fiscal accountability of the agency, and for conducting financial and performance audits.

General Responsibilities

The District's responsibilities have expanded significantly since 1949 when it was originally created by the legislature as the Central and Southern Florida Flood Control District tasked with providing flood control at the core of its mission. The District now operates and maintains the C&SF Project, develops and implements water supply plans, conducts ecosystem research and monitoring, regulates water use, manages land acquisition and implements water quality improvement and ecosystem restoration plans.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006273

To meet these core mission responsibilities, the District's proposed staffing for the Fiscal Year 2020-21 Preliminary Budget is 1,475 regular full-time equivalent (FTE) positions. District staff is located at facilities across the District's 16-county jurisdiction to provide the public more direct and responsive access to permitting and other agency functions. These facilities include eight field stations located in Big Cypress Basin (Naples), Clewiston, Fort Lauderdale, Homestead, Miami, Okeechobee, St. Cloud, and West Palm Beach and four service centers located in Big Cypress Basin (Naples), Fort Myers, Okeechobee, and Orlando. The District's central headquarters are located in West Palm Beach. The District's annual budget is funded predominantly by state sources and property taxes as well as federal and local revenue, licenses, permit fees, grants, investment earnings, and reserve balances.

The District's major responsibilities are highlighted below:

Operations and Maintenance

The District's operations and maintenance consists of activities to effectively manage the primary canals and associated structures in South Florida. Operation and maintenance program activities include the C&SF Project, as well as the Big Cypress Basin, as authorized by Chapter 373 F.S. and as directed by the USACE Regulation Schedule. Activities include the operation and maintenance of a multi-purpose water management system comprising of approximately 2,179 miles of canals and 2,131 miles of levees/berms, 87 pumping stations, 781 water control structures and weirs, and 621 project culverts, which send water south and through waterways eastward and westward to both coasts.

Regulatory

The District has a number of regulatory programs designed to manage and protect regional water resources, including wetlands, rivers, lakes, estuaries, and groundwater supplies. The South Florida Water Management District's responsibilities are shared with the DEP and other state and local governments.

The types of permits issued by the District are listed below.

- **Environmental Resource Permits (ERPs)** regulate certain land use or construction activities that could affect wetlands or alter surface water flows that can contribute to water pollution. The District regulates residential and commercial developments, roadway construction and agriculture while the DEP regulates power plants, ports, wastewater treatment plants and single-family home projects.

  An ERP covers activities such as dredging and filling in wetlands or surface waters, constructing flood protection facilities, providing storm water containment and treatment, site grading, building dams or reservoirs and other activities affecting state waters.

- **Everglades Works of the District (EWOD) Permits** are required of landowners or entities within or discharging to drainage basins in the Everglades Agricultural Area (EAA) or C-139 Basin to reduce phosphorus flowing from the EAA or C-139 Basin into the Everglades. An EWOD Permit outlines targeted reductions in phosphorus as well as monitoring and reporting requirements and Best Management Practices (BMPs) for private and public landowners in these basins.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006274

- **Consumptive Water Use Permits** allow the holder to withdraw a specified amount of water, either from the ground (aquifers), or a canal, lake or river (surface waters). These water use permits are typically used for public supply, agricultural and nursery plant irrigation, golf course irrigation, commercial use, dewatering/mining activities and power generation. Water uses not covered by these permits include domestic uses, home irrigation and water used for firefighting.

- **Well Construction Permits** ensure that wells are built by licensed water well contractors and conform to water well construction permit standards. Unless exempt, a well construction permit must be obtained from the District or an agency delegated by the District prior to the construction, repair, modification or abandonment of any water well, test well or monitor well within the District's jurisdiction. A consumptive use permit may be required before the well construction permit can be issued. The District regulates the location, construction, repair, and abandonment of water wells in Monroe and Charlotte Counties, and for wells larger than 12 inches in diameter in Broward County. The District has delegated the location construction, repair, and abandonment of water wells in its remaining counties to their respective health departments or other delegated agencies. The dates when these agreements were signed between the District and the Health Departments are listed in Chapter 40E-3 and provided below.
    - Hendry and Osceola – April 18, 2005
    - Collier, Glades, Orange, Palm Beach, Polk – May 11, 2005
    - Broward – June 8, 2005
    - Miami-Dade – June 10, 2005
    - City of Cape Coral – August 10, 2005
    - Lee – September 13, 2005
    - Highlands, Okeechobee, Martin, St. Lucie – May 13, 2010
- **Right of Way Permits** protect the South Florida Water Management District's ability to effectively and safely use the canal and levee rights of way in the regional system while providing for compatible public and private uses such as docks, fences or walkways. The regional system includes canals and levees, major rivers and lakes, water conservation areas, the works of the Big Cypress Basin and certain other canals and rights of way.

Water Resource System

The **Kissimmee Basin** encompasses more than two dozen lakes in the Kissimmee Chain of Lakes, their tributary streams and associated marshes and the Kissimmee River and floodplain. The basin, which defines the northern-most region of the District, forms the headwaters of Lake Okeechobee and the Everglades. Major initiatives in the Kissimmee Basin are: the Kissimmee River Restoration Project which includes construction projects, the Kissimmee River Restoration Evaluation Program, and the Kissimmee Chain of Lakes and Kissimmee Upper Basin Monitoring and Assessment Project. Other programs and activities are associated with these projects, including ecosystem restoration, evaluation of restoration efforts, aquatic plant management, land management, water quality improvement, and water supply planning. The 56-mile channelized (C-38) Kissimmee River connects Lake Kissimmee and Lake Okeechobee. So far, three backfilling phases are now complete, and continuous water flow has been re-established to 24 miles of the meandering Kissimmee River.

Lake Okeechobee—meaning "big water" in the Seminole Indian language—spans 730 square-miles and is the largest lake in the southeastern United States. Lake Okeechobee and its

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006275

wetlands are at the center of the Greater Everglades Watershed, which stretches from the headwaters of the Kissimmee River, through the Everglades and, finally, into Florida Bay. Lake Okeechobee restoration efforts are underway pursuant to the Northern Everglades and Estuaries Protection Program, under which the Lake Okeechobee Protection Program was expanded to strengthen protection for the Northern Everglades, restoring and preserving the Lake Okeechobee watershed and the Caloosahatchee and St. Lucie estuaries.

The **Caloosahatchee River and Estuary** extends 70 miles, from Lake Okeechobee west to San Carlos Bay on Florida's southwest coast. Programs to improve the estuarine habitat, water quality, and water supply include minimum flows and levels, the Northern Everglades and Estuaries Protection Program, and implementation of the Comprehensive Everglades Restoration Plan, as well as local BMPs and stormwater retrofit projects.

The **Lower Charlotte Harbor** watershed covers more than 2,230 square-miles in the lower west coast region of Florida, including the Cape Coral and Fort Myers metropolitan areas. Goals for restoring, protecting and managing the surface water resources of the watershed are outlined in the lower Charlotte Harbor watershed SWIM plan.

The **Estero Bay** watershed includes Central and Southern Lee County, and parts of Northern Collier and Western Hendry counties. The Estero Bay watershed assessment contains proposed management practices to improve water quality and to improve the timing and volume of freshwater inputs.

The **Indian River Lagoon** is a series of three distinct, but interconnected, estuarine systems, which extend 156 miles from Ponce Inlet to Jupiter Inlet on Florida's east coast. The District and the St. Johns River Water Management District share responsibility for restoring and protecting this lagoon. Components of the Indian River Lagoon – South Restoration Project will benefit the quantity, quality, and timing and flows of water for the Indian River Lagoon and the St. Lucie River and Estuary.

The **St. Lucie River and Estuary** includes the north fork and south fork of the St. Lucie River. The south fork of the St. Lucie River connects with the 152-mile Okeechobee waterway. Programs and initiatives to improve the timing, distribution, quality, and volume of freshwater entering the estuary include the Indian River Lagoon - South Restoration Project and the Northern Everglades and Estuaries Protection Program, as well as local BMPs and stormwater retrofit projects.

The 240 square-mile **Loxahatchee River** watershed covers parts of Palm Beach and Martin Counties and includes the communities of Hobe Sound, Tequesta, Jupiter, Jupiter Island, Jupiter Inlet Colony, Jupiter Farms, Juno Beach, and Palm Beach Gardens. To improve and protect the Loxahatchee River and Estuary, the District is implementing plans and initiatives in partnership with other agencies and organizations, including the DEP, the Loxahatchee River Management Coordinating Council, and Loxahatchee River District. These include the Loxahatchee River Initiative, the Loxahatchee River National Wild and Scenic River Management Plan, the 2002 technical documentation to support development of minimum flows and levels for the northwest fork of the Loxahatchee River, the 2010 Loxahatchee River Science Plan, and the 2006 Restoration Plan for the northwest fork of the Loxahatchee River and its 2011 addendum.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006276

The **Lake Worth Lagoon** watershed covers more than 450 square miles that contribute flows to Lake Worth and South Lake Worth in Palm Beach County. Goals for restoring and managing the watershed are found in the Lake Worth Lagoon Management Plan.

Within the historical **Everglades**, three **Water Conservation Areas** (WCAs*)* and the Everglades National Park preserve about half of the original Everglades, which covered nearly 11,000 square-miles of South Florida. The WCAs are located in the western portions of Palm Beach, Broward and Miami-Dade Counties and encompass 1,337 square-miles. Everglades Restoration programs and projects include: research projects; implementation of the Comprehensive Everglades Restoration Plan (CERP); RECOVER (REstoration COordination and VERification); the Long-Term Plan for Achieving Water Quality Goals for the Everglades Protection Area Tributary Basins, the Northern Everglades and Estuaries Protection Program; Restoration Strategies, which includes additional water quality improvement projects to assist existing stormwater treatment areas to achieve the Everglades phosphorus criterion; and water supply planning.

Biscayne Bay is a subtropical estuary that includes 428 square-miles of marine ecosystem and 938 square-miles of watershed along the coast of Miami-Dade and northeastern Monroe counties. Projects to restore and preserve Biscayne Bay are included in the implementation of the Comprehensive Everglades Restoration Plan. The Nearshore Central Biscayne Bay Water Reservation has been adopted as part of CERP.

Florida Bay and Estuary comprise a shallow inner-shelf lagoon between the southern tip of the Florida mainland and the Florida Keys where fresh water from the Everglades mixes with the salty waters from the Gulf of Mexico to form an estuary. There are nearly 1,000 square-miles of interconnected basins and 200 mangrove islands in the bay and estuary. Through implementation of the Comprehensive Everglades Restoration Plan, the District is focused on changing freshwater flow and improving the water quality and ecology of Florida Bay.

The **Big Cypress Basin** includes the natural lands of the Corkscrew Swamp and Sanctuary, the Big Cypress National Preserve, the Florida Panther National Wildlife Refuge, the Fakahatchee Strand, the Corkscrew Regional Ecosystem Watershed, Picayune Strand State Forest, and the 10,000 Islands. Programs include the Big Cypress Basin Watershed Management Plan, stormwater projects, and other capital improvements projects to store additional water, recharge groundwater, and improve water quality in Naples Bay.

The **Western Basins** region, comprised of the Feeder Canal Basin and the C-139 Annex, is part of a Water Resource Evaluation effort to evaluate potential hydrologic and water quality improvements in upstream flows from lands and water bodies within the Feeder Canal drainage basin, C-139 Annex drainage basin.

Comprehensive Everglades Restoration Plan (CERP)

The Comprehensive Everglades Restoration Plan provides a framework and guide to restore, protect, and preserve the water resources of Central and Southern Florida, including the Everglades. It covers 16 counties over an 18,000 square-mile area and centers on an update of the C&SF Project. The goal of CERP is to capture fresh water that now flows unused to the ocean and the gulf and redirect it to areas that need it most. Most of the water will be devoted to environmental restoration; the remaining water will benefit cities and farmers by enhancing water supplies for the South Florida economy.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006277

II. INTRODUCTION

For more than fifty years, the C&SF Project has performed its designed function well, but it has had unintended adverse effects on the unique and diverse South Florida ecosystem. Improvements through structural and operational modifications to the C&SF Project will improve the quality, quantity, timing and distribution of water deliveries for the environment; improve protection of the aquifer; improve the integrity, capability, and conservation of urban and agricultural water supplies; and improve other water-related purposes.

The Water Resources Development Acts provided the USACE with the authority to re-evaluate the performance and impacts of the C&SF Project and to recommend improvements and/or modifications to the project in order to restore the South Florida ecosystem and to provide for other water resource needs. The resulting plan was designed to capture, store and redistribute fresh water previously lost to tide and to regulate the quality, quantity, timing, and distribution of water flows.

The CERP was approved by Congress as a framework for Everglades Restoration under Title VI, Section 601 of the Water Resources Development Act of 2000. The CERP includes more than 60 major components and will vastly increase storage and water supply for the environment, as well as for urban and agricultural needs, while maintaining the current levels of service for flood control provided by the C&SF Project. In the Water Resources Development Act of 2007 (WRDA 2007), Congress authorized three CERP Projects for construction – Indian River Lagoon South – Phase 1, Site 1 Impoundment (Fran Reich Preserve), and Picayune Strand Restoration. In WRDA of 2014, Congress authorized another four CERP Projects for construction - Caloosahatchee River (C-43) West Basin Storage Reservoir, Biscayne Bay Coastal Wetlands, Broward County Water Preserve Areas, and C-111 Spreader Canal Western Project.

In the Water Resources Development Act of 2016 (WRDA 2016), Congress authorized the Central Everglades Planning Project (CEPP). This project implements increments of six components included in the Comprehensive Everglades Restoration Plan to accomplish the restoration objectives by improving the quantity, quality, timing and distribution of water flows to Water Conservation Area 3, Everglades National Park and Florida Bay, with ancillary benefits to the St. Lucie and Caloosahatchee estuaries, while increasing water supply for municipal and agricultural users while maintaining flood protection. In the Water Resources Development Act of 2018 (WRDA 2018), Congress authorized the EAA Reservoir.

Section 373.1501, F.S., provides a legislative finding that the CERP is important for restoring the Everglades ecosystem and for sustaining the environment, economy, and social well-being of South Florida. Furthermore, this section ensures that all project components are consistent with the balanced policies and purposes of Chapter 373, F.S., and specifically Section 373.026, F.S. In Subsection 373.026(8)(b), F.S., the DEP is directed to collaborate with the District and to approve each project component with or without amendments within a specified time frame. CERP components will be implemented through the execution of multiple projects. CEPP project components will take more than 30 years to construct and will be cost-shared equally among the federal government and local sponsors, of which the District is the major local sponsor.

Northern Everglades Initiative

In 2007, the Florida legislature substantially expanded the Lake Okeechobee Protection Act to the Northern Everglades and Estuaries Protection Program (NEEPP) (Section 373.4595, F.S.). As required by the NEEPP, the coordinating agencies, comprising the District, DEP, and the

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006278

Florida Department of Agriculture and Consumer Services (FDACS), developed Watershed Protection Plans for the Lake Okeechobee, St. Lucie River, and Caloosahatchee River watersheds to identify and implement programs and projects necessary to achieve water quality and quantity objectives for the watersheds. Water quality objectives are based on Total Maximum Daily Loads (TMDLs) established by the DEP, while storage targets are aimed at achieving appropriate water levels in Lake Okeechobee and target salinities within the estuaries. The coordinating agencies last updated the Lake Okeechobee Protection Plan in 2014, and the St. Lucie and the Caloosahatchee River Watershed Protection Plans in 2015.

In recent years, DEP adopted the Basin Management Action Plans (BMAPs) for Lake Okeechobee (2014), St. Lucie Estuary (2013), and Caloosahatchee Estuary (2012), which are designed to implement nutrient reductions established by the TMDLs for these Northern Everglades basins. During the 2016 legislative session, the Florida legislature amended NEEPP to strengthen provisions for implementing the respective BMAPs and further clarify the roles and responsibilities, coordination, implementation, and reporting efforts among the coordinating agencies. In accordance with the current NEEPP legislation, DEP takes the lead on water quality protection measures through BMAPs adopted pursuant to Section 403.067, F.S.; the District takes the lead on hydrologic improvements pursuant to the Watershed Protection Plans; and FDACS takes the lead on agricultural interim measures, BMPs, and other measures adopted pursuant to Section 403.067, F.S. DEP has published the Florida Statewide Annual Report on Total Maximum Daily Loads, Basin Management Action Plans, Minimum Flows or Minimum Water Levels and Recovery or Prevention Strategies on its website pursuant to Section 403.0675, F.S. This report, published by July 1 each year beginning in 2018, includes the status of protection and restoration actions through total maximum daily loads, basin management action plans, minimum flows or minimum water levels and recovery or prevention strategies. Visit *www.floridadep.gov/star* for more information.

District Everglades

The Everglades Construction Project was the first major step in Everglades Restoration and a requirement of the Everglades Forever Act (EFA), passed by the Florida Legislature in 1994. It is also one of the largest environmental restoration public works projects in the nation. The cost associated with implementing the Everglades Construction Project is shared among the District, state and federal governments. The major funding sources identified in the Everglades Forever Act were ad valorem property taxes, agricultural privilege taxes, state land funds, federal funds, Alligator Alley toll revenues, and other environmental mitigation funds.

The EFA directed the District to implement regulatory source control programs in all areas tributary to the Everglades Protection Area (EPA) to reduce phosphorus in stormwater runoff. The District was also required to acquire land, then design, permit, construct and operate a series of treatment wetlands, referred to as Everglades Stormwater Treatment Areas (STAs), to reduce phosphorus levels from stormwater runoff and other sources before it enters the EPA. The STAs, which were originally planned to consist of approximately 40,000 acres, were expanded by approximately 5,000 acres in 2006 and 12,000 acres in 2012 for a current total of approximately 57,000 acres of effective treatment area.

Despite the success of the STAs and source control programs in removing phosphorus from stormwater, the existing STAs in combination with Best Management Practices had not achieved compliance with the Everglades numeric phosphorus criterion. To address this issue, the District, the Florida Department of Environmental Protection, and the United States Environmental Protection Agency engaged in technical discussions starting in 2010. The

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006279

primary objectives were to establish a Water Quality Based Effluent Limit (WQBEL) for phosphorus in discharges from Everglades STA that would achieve compliance with the State of Florida's numeric phosphorus criterion in the EPA and to identify a suite of additional water quality projects to work in conjunction with the existing STAs to meet the WQBEL.

Based on this collaborative effort, a suite of projects that would achieve the WQBEL were identified in 2012 and are prescribed by DEP consent orders associated with EFA and National Pollutant Discharge Elimination System permits. Under the District's Restoration Strategies Program, the projects have been divided into three flow paths - Eastern, Central, and Western. The identified projects primarily consist of Flow Equalization Basins (FEBs), STA expansions, and associated infrastructure and conveyance improvements. The primary purpose of FEBs is to attenuate peak stormwater flows prior to delivery to STAs, while the primary purpose of STAs is to utilize biological processes to reduce phosphorus concentrations in order to achieve the WQBEL. Some of the key components are listed below, several of which are operational, in the design phase, or under construction:

- The Eastern flow path contains STA-1E and STA-1W. The additional water quality projects for this flow path include the L-8 FEB with approximately 45,000 acre-feet of storage and an STA expansion of approximately 6,500 acres (5,900 acres of effective treatment area) that will operate in conjunction with STA-1W. The L-8 FEB was complete in 2017 and is operating. The first phase of the STA-1W Expansion (4,300 acres of effective treatment area) was substantially completed in December 2018. The second phase of the STA-1W Expansion is currently being designed, all land acquisition for the expansion has been acquired. Three conveyance improvement projects have been completed to date: S-5AS Structure Modifications were completed in May 2016, the L-8 Divide Structure (G-541) was completed in July 2016, and the S-375 Expansion (G-716) was completed in April 2017. Construction of the Bolles East Canal component of the G-341 Related Conveyance Improvements is currently underway, and survey work to support the design of the remaining conveyance components is ongoing. Design of STA-1E Repairs and Modifications is ongoing.

- The Central flow path contains STA-2 (including Compartment B) and STA-3/4. The additional project for this flow path is the A-1 FEB with approximately 60,000 acre-feet of storage that attenuates peak stormwater flows prior to delivery to STA-2 and STA-3/4. A-1 FEB operations began in November 2015.

- The Western flow path contains STA-5/6 (including Compartment C). There are two additional projects planned, the C-139 FEB which will have approximately 11,000 acre-feet of storage and internal improvements within STA-5/6 to increase the effective treatment area by approximately 800 acres. Design activities for the C-139 FEB started in 2018 and construction is scheduled for completion by 2023. STA-5/6 internal improvements are ongoing, using district in-house staffing resources and equipment providing a significant cost savings versus contracting the project out to external vendors and is expected to be completed by December 2020.

Water Supply

The District encompasses nearly 18,000 square miles divided into five distinct planning regions: Upper Kissimmee (now made part of the Central Florida Water Initiative [CFWI] planning area), Lower Kissimmee, Upper East Coast, Lower East Coast and Lower West Coast. Development of comprehensive water supply plans customized to each region is key to identifying and

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006280

understanding current and future water needs. Based on a 20-year outlook, these plans provide detailed, basin-specific information and recommended actions. The plans highlight areas where historically used sources of water will not be adequate to meet future demands and evaluate several water source options – including water conservation and alternative water supply – to meet those demands.

The 2005 Florida Legislature enacted the Water Protection and Sustainability Program. This precedent-setting law encourages cooperation between municipalities, counties and the state's five water management districts to protect and develop water supplies in a sustainable manner. Water management districts promote and support local government alternative water supply projects that support smart growth and reduce the use of fresh ground and surface water supplies, such as aquifers and lakes for a sustainable future.

Other District Programs

The District's responsibilities extend far beyond regulatory programs, Everglades restoration, water supply plan implementation, and flood control operations.

Partnership and coordination with other levels of government and other agencies help to support water resource development projects, development of alternative water supplies, water conservation, reuse, and stormwater management goals.

Research, data collection, and analysis help ensure District projects and programs are effective. Emergency operations and management is a cornerstone of District operations, especially during the hurricane season or in times of drought. The District is also a leader in melaleuca, aquatic weed, and other exotic pest and plant control.

AMERICAN OVERSIGHT

II. INTRODUCTION

C. Mission and Guiding Principles of the District

The Governing Board has adopted the following Mission Statement and has made it an integral part of its overall strategic budget philosophy and structure:

The Mission of the South Florida Water Management District is to safeguard and restore South Florida's water resources and ecosystems, protect our communities from flooding, and meet the region's water needs while connecting with the public and stakeholders.

The District has established a goal that acts as a guiding principle for each of the four areas of responsibility (AORs). To guide the agency in meeting its mission-critical responsibilities, strategic priorities support core missions encompassing the AORs and include:

Restoration of Water Resources and Ecosystems – Safeguarding and Restoring South Florida's Delicate Ecosystem (Natural Systems / Restoration) through the strategic priority:

Expediting critical Everglades restoration projects by:

- Advancing the 29 Key Everglades Restoration Projects identified in Governor DeSantis' *Achieving More Now for Florida's Environment* Executive Order 2019-12,
- Maximizing use of available water storage features, such as reservoirs and flow equalization basins (FEBs),
- Implementing solutions to improve water quality treatment, reduce nutrient loads and reduce the likelihood of harmful algal blooms,
- Managing invasive exotic and nuisance vegetation, and
- Increasing access and recreational opportunities on public lands, when it does not conflict with restoration efforts.

Flood Protection – Protecting South Florida's Communities from Flooding, Ensuring and Management Water Flow through the strategic priority:

Refurbishing, replacing, improving and managing the components of our water management system by:

- Implementing flood protection infrastructure refurbishment projects,
- Incorporating new works into water management system operations,
- Operating the water management system to meet flood protection and water supply needs into the future considering sea level rise and the impacts of a changing climate,
- Coordinating with the U.S. Army Corps of Engineers on infrastructure inspections and results,
- Coordinating with state/federal partners and assisting local governments to determine level of flood protection, and
- Optimizing infrastructure maintenance by adhering to, or exceeding, industry standards and best practices.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006282

Water Supply – Ensuring Water for South Florida's Communities through the strategic priority:

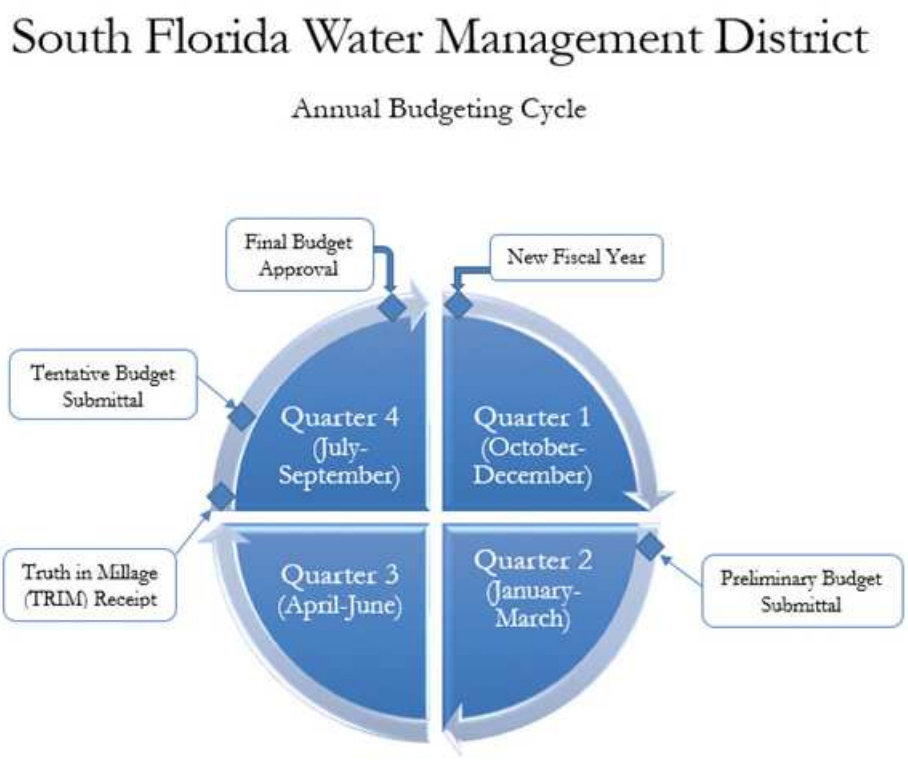
Meeting the water needs of the environment and preparing for current and future demands of water users by:

- Encouraging development of alternative water supply projects to diversify water supply,
- Planning for region's water resource needs with consideration for challenges of climate change and sea level rise,
- Developing and implementing regional water supply plans in coordination with local governments and the public,
- Promoting water conservation measures,
- Utilizing regulatory permitting and compliance authority, and
- Using water reservation and minimum flow & minimum water level authorities to protect water for natural systems.

In addition to the four Areas of Responsibility (AORs), described above, the District has an additional strategic priority:

Public Engagement & Administration – Delivering efficient and cost-effective services through the strategic priority:

Ensuring South Florida taxpayers receive efficient and effective customer service by:



- Focusing resources on core functions, minimizing administrative costs and measuring performance,
- Ensuring accountability, transparency and public involvement in agency decisions, and
- Employing and developing a high-quality, diverse workforce.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006283

II. INTRODUCTION

D. Development of the District Budget

This District's fiscal year runs from October 1 through September 30. The budget development process takes place throughout the fiscal year with guidance from the Governing Board. All meetings of the Governing Board, its committees and subcommittees are advertised to provide the public with an opportunity to discuss issues and concerns prior to the adoption of the budget. The chart below shows the cyclical nature of this process.

Prior to adoption of the final budget and in compliance with Section 200.065, F.S., the District will advise all county property appraisers within its jurisdiction, as required by the Truth in Millage (TRIM) process, of the proposed millage rates for Fiscal Year 2020-21, as well as the rolled-back rates and the date, time, and location of the public hearings on the matter.

The District will hold two TRIM public hearings in September. The first public hearing will take place on Thursday, September 10, 2020, at 5:15 P.M. at District Headquarters located at 3301 Gun Club Road, West Palm Beach, Florida. The second and final public hearing will take place on Tuesday, September 22, 2020, at 5:15 P.M., also at District Headquarters located at 3301 Gun Club Road, West Palm Beach, Florida. Written disapprovals of any provision in the Tentative Budget by the EOG or Legislative Budget Commission must be received by September 15, 2020, at least five business days prior to the final budget adoption hearing.

The District's Fiscal Year 2020-21 Preliminary Budget is designed to stay within the District's means and meet statutory mandates. The District continues to operate on a pay-as-you-go basis without new debt. The Preliminary Budget maintains an operating profile consistent with Fiscal Year 2019-20 and in-line with current revenue levels to ensure sustainability.

AMERICAN OVERSIGHT

II. INTRODUCTION

E. Budget Guidelines

The District developed its budget under the previously established guidelines which include:

- Reviewing, on an ongoing basis, personnel, programs and activities to ensure that each District is meeting its core mission areas without raising costs for the taxpayers they serve,
- Ensuring that District employee benefits are consistent with those provided to state employees,
- Continuing District implementation plans for the beneficial use of excess fund balances; and
- Avoiding new debt.

The District's specific guidelines developed by the Governing Board and management staff include budget preparation assumptions approved by the Governing Board and include:

- Focus on core mission to safeguard and restore South Florida's water resources and ecosystems while protecting communities from flooding and meeting the region's present and future water supply needs through activities and projects supporting Governor DeSantis' ***Achieving More Now for Florida's Environment***, such as refurbishment of the Central and South Florida flood control system,
- Implement efficiencies that reduce operational expenses, non-core costs and administrative overhead,
- Direct funding to restoration and public works,
- Continue implementation plans for beneficial use of Reserves,
- Maintain an adequate reserve balance for emergencies, and
- Issue no additional debt.

Statutory authority in Subsection 373.536(5)(c), Florida Statutes, states that the Legislative Budget Commission (LBC) may reject district Tentative budget proposals based on the statutory thresholds described below. The thresholds in this Preliminary Budget are presented below for informational purposes.

- A single purchase of land in excess of $10 million, except for land exchanges.
    - The District **does not** have a single purchase of land in excess of $10 million in the Preliminary Budget.
- Any cumulative purchase of land during a single fiscal year in excess of $50 million.
    - The District **does not** have a cumulative purchase of land in excess of $50 million in the Preliminary Budget.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006285

- Any issuance of debt on or after July 1, 2012.
    - The District **does not** have any issuance of debt in the Preliminary Budget.
- Any individual variances in a district's Tentative Budget in excess of 25 percent from a district's Preliminary Budget.
    - Not Applicable for Preliminary Budget Submittal.
- Any program expenditures as described in Subsection 373.536(5)(e)4.e,(Outreach) and f. (Management and Administration) in excess of 15 percent of a district's total budget.
    - The District's Outreach and Management and Administration programs **do not** exceed 15 percent of the District's total budget as illustrated below.

State Program	FY2020-21 Preliminary Budget	% of Total Budget
5.0 Outreach	$1,122,971	0.1%
6.0 District Management & Administration	$39,108,329	3.8%
Grand Total (Programs 1.0 through 6.0)	**$1,023,069,964**	**100%**
5.0 & 6.0 Total	**$40,231,300**	**3.9%**

AMERICAN OVERSIGHT

II. INTRODUCTION

F. Budget Development Calendar and Milestones

Date	Activity
October 1st	New Fiscal Year Begins.
October	Preliminary Budget Development Begins.
October – December	Present draft Preliminary Budget to the Governing Board.
December	Preliminary Budget due to DEP for review.
January 1st	TRIM Certification of Compliance or Noncompliance with Section 200.065, F.S. due to the Department of Financial Services (s. 373.503(6), F.S.)
January 15th	Preliminary Budget due to Legislature (s. 373.535(1)(a), F.S.)
March 1st	Legislative Preliminary Budget comments due to the districts (s. 373.535(2)(b), F.S.)
March 15th	Districts must provide written response to any legislative comments (s. 373.535(2)(b), F.S.)
April – May	District continues evaluation and refinement of the budget.
June 1st	Estimates of taxable values from the county property appraisers are received by the District.
July 1st	If no action is taken by the Legislature, development of the Tentative Budget proceeds (s. 373.535(2)(c), F.S.) Property Appraisers provide certified taxable values to Districts – TRIM (ss. 193.023, F.S. & 200.065(1)).
July 15th or sooner	District Governing Board adopts the proposed millage rates and approves the August 1st submittal of the Tentative Budget pursuant to s. 373.536(2), F.S. on July 11th.
July 15th	Tentative Budget due to DEP for review.
August 1st	Tentative Budget due to the Governor and Legislature as well as Secretary of the DEP and governing bodies of each county in the district (s. 373.536(5)(d), F.S.)
August (TBD)	Tentative Budget presented to legislative staff.
August 4th (day 35 of TRIM cycle)	TRIM – DR-420 forms shall be submitted to county property appraisers (s. 200.065(2)(b), F.S.)

AMERICAN OVERSIGHT

II. INTRODUCTION

Date	Activity
September 5th	Comments on the Tentative Budget due from legislative committees and subcommittees (s. 373.536(5)(f), F.S.)
September 8th	Tentative Budget is posted on the District's official website 2 days prior to the public hearings (s. 373.536(5)(d), F.S.)
September 10th	Public hearing at 5:15 p.m. to adopt the Tentative Budget and Tentative Millage Rates at the SFWMD District Headquarters located at 3301 Gun Club Road, West Palm Beach, FL 33406 (ss. 373.536(3) and 200.065(2)(c), F.S.)
September 15th	Certify by resolution the Everglades and C-139 agricultural privilege tax roll to the tax collector of each county in which a portion of the EAA/C-139 is located (ss. 373.4592(6)(b) and 373.4592(7)(b), F.S.) Submit DR-408A Certificate to Non-Ad Valorem Assessment Rolls to the county tax collectors.
September 22nd	Public hearing at 5:15 p.m. to adopt the Final Budget and Final Millage Rates at the SFWMD District Headquarters located at 3301 Gun Club Road, West Palm Beach, FL 33406 (ss. 373.536(3) and 200.065(2)(d), F.S.)
September 25th	Submit copies of the resolution adopting the millage rates and budget to the property appraisers/tax collectors within 3 days after adoption (s. 200.065(4), F.S.)
September 30th	District Fiscal Year Ends.
October 1st	District Fiscal Year Begins
October 2nd	District submits the Adopted Budget for current fiscal year to the Legislature (s. 373.536(6)(a)1, F.S.)
October 22nd	District submits TRIM certification package to the Department of Revenue (s. 200.068, F.S.)

AMERICAN OVERSIGHT

III. BUDGET HIGHLIGHTS

A. Current Year Accomplishments and Efficiencies

This budget, submitted January 15, has been drafted after one quarter of the current fiscal year. Thus, this section will be completed in the Tentative Budget to include all the major Fiscal Year 2019-20 accomplishments. Below are highlights of what has been accomplished this fiscal year to date and what is anticipated to be completed during the remainder of Fiscal Year 2019-20.

Accomplishments

1.0 Water Resources Planning and Monitoring

This program includes all water management planning, including water supply planning, development of minimum flows and levels, and other water resources planning; research, data collection, analysis, and monitoring; and technical assistance (including local and regional plan and program review).

Water Supply

- Water Supply Plan Updates –
    - Lower West Coast (LWC): Completed final calibration and scenario application of the West Coast Floridan Model and final calibration, peer review, and scenario application of the LWC Surficial Aquifer System/Intermediate Aquifer System Model, including conducting modeling public workshops.
    - Lower Kissimmee Basin (LKB): The Governing Board approved the 2019 LKB Water Supply Plan Update in December 2019. This included completion of the draft plan, conducting a public workshop and comment period, and revising the draft to address public comment.
    - Upper East Coast (UEC): Initiated the 5-Year update to the UEC Water Supply Plan. Established internal team and held internal kick-off meeting and conducted public stakeholder kick-off workshop. Developed demand projections through 2040, continued coordination with the SJRWMD, and completed several draft chapters in support of the 2021 UEC Update.
    - Central Florida Water Initiative (CFWI): Completed the Public Draft of the 2020 CFWI RWSP update and anticipate approval by the Governing Board in November 2020. Completed final calibration, model documentation, scenario application, and model application documentation of the East Central Florida Transient Expanded (ECFTX) Model.
- CFWI Well Drilling and Data Collection - Completed construction of one Upper Floridan aquifer well; two Lower Floridan aquifer wells; and two Avon Park Permeable Zone wells as part of CFWI Data Monitoring and Investigation Team (DMIT) efforts.
- Completed the draft and final updates to the 2019 saltwater interface maps in SFWMD's coastal aquifers.
- Hosted Water Conservation Expo at District headquarters. This conservation themed seminar attracted participants from local governments, utilities, agriculture,

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006289

manufacturers, other water users and interested public and discussed studies, research and experiences on the importance of conserving water.

- Cooperative Funding Program (CFP) – Staff implemented the FDEP Alternative Water Supplies grant program and the Water Protection and Sustainability grant program for Fiscal Year 2019-20. The grant programs have funded AWS and water conservation projects, which have completion dates out to Fiscal Year 2024-25.

Big Cypress Basin

- Execute Big Cypress Basin (BCB) Regional Partnership agreements (work to be completed Fiscal Year 2020-21) to provide cost-share funding for flood control and/or water quality improvements:
    - City of Naples Beach Restoration and Water Quality Improvement project
    - Collier County – Cocohatchee/Palm River Conveyance Improvement – improving downstream flood control conditions
    - Collier County – Griffin Road Area Improvements
    - Collier County – Gordon River Water Quality Park improvements (aka Freedom Park)
    - Conservancy of SWFL – Filter marsh expansion
    - Audubon Florida Corkscrew Swamp Sanctuary – monitoring enhancement
- Administer five interlocal contracts for services including the Collier County surface water and ground water monitoring, Rookery Bay National Estuarine Reserve for shared water quality monitoring, SR 29 Canal maintenance and the Collier County Secondary System MOU.
- Administer interlocal contracts for water quality improvement projects for Lake Trafford

Water Quality

- South Florida Environmental Report (SFER): Completed internal and external peer review of draft sections of the 2020 SFER. The final 2020 SFER is scheduled to be published and submitted to the Governor, Legislature, and other key stakeholders on March 1. This report serves as the District's mandated Annual Consolidated Report required of Water Management Districts (Section 373.036(7), Florida Statutes (F.S.)) and consolidates peer-reviewed research, data analyses, financial updates, a searchable database of environmental projects, annual permit reports, and project status updates.

- Laboratory Information Management System (LIMS) Upgrade: The LIMS client server was upgraded to a fully supported web-based system (version 12.8). To increase efficiency in the field to collect environmental samples and provide better interoperability of electronic field data transmission to the laboratory, an upgraded field deployed mobile data collection application was rolled out to agency wide organizations. Originally, the mobile app was limited in use. The upgraded system will enhance the process to submit environmental samples to the District's laboratory from many organizations (District and external researchers, contractors, and universities) that submitted paper copies of field collected information that required time-consuming transcription upon submission to the laboratory.
- Automated Temperature Monitoring System: The laboratory management team identified the need for an automated temperature monitoring system to improve staff

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006290

efficiencies and program quality and reduce liabilities. All laboratory refrigerators, freezers and ovens require daily temperature logs to comply with NELAC certification requirements; and all temperatures must be stable within specified ranges. Further, all temperature measurement devices must be calibrated or replaced annually. This has been accomplished with paper logs and replaceable thermometers. Non-weekday monitoring has been accomplished with max/min thermometers. To modernize this process, the laboratory management team identified several suppliers of systems which would fully automate the process and assure constant monitoring and alerts for any exceedances. At the end of Fiscal Year 2018-19, a PO was issued to MESA labs to implement their system. Installation is scheduled for early December 2019. This new system will eliminate the daily task of manually recording 25 temperature-controlled devices and provide for annual calibration services.

- Automated Plate Reader: As part of the ongoing laboratory capital replacement plan, a BioTek Synergy 2 plate reader was recently purchased and deployed in the laboratory. This instrument is used for measurement of Microcystin LR by the Competitive Enzyme-Linked Immunosorbent Assay (ELISA) technique and for measurement of Alkaline Phosphate Activity (APA). This equipment will assist with improving the capabilities of the SFWMD to support the Governor's Water Quality Initiatives outlined in the Governor's Executive Order (EO) 19-12 and facilitate monitoring and analytical support to the Florida Department of Environmental Protection (FDEP) and other state and federal agencies tasked with oversight of blue-green algae blooms, cyanobacteria and nutrient pollution programs. For this replacement, the new instrument was upgraded from the existing filter-based fluorometer to a monochromator-based fluorescence system to allow greater sensitivity and flexibility in method development. This flexibility allows for the design of a new procedure for measurement of phycocyanin which is of interest in monitoring algae and algae blooms. Together with chlorophyll-a, chlorophyll-b and pheophytin by our existing HPLC Method, this suite of measurements will provide a good indication of the dominant type of algae blooms. Method development for phycocyanin is in progress. The new instrument is also expandable and capable of incorporating an automated micro imaging system for scanning purposes or an automated reagent dispenser to allow for development of compatible high throughput procedures.
- Expanded Water Quality Monitoring: The Water Quality Bureau is supporting EO 19-12, Achieving More Now for Florida's Environment, by expanding water quality monitoring in Lake Okeechobee, in the Northern Everglades Basins, in the C51/L8 Basin Upstream Tributaries, and in the St. Lucie and Caloosahatchee River Basins. Expanded monitoring encompasses adding new monitoring locations, increasing frequency of monitoring, and increasing analytical parameters. Additionally, the Water Quality Bureau will be expanding its continuous monitoring network by adding new remote continuous data sondes in the Lake Worth Lagoon and in Lake Okeechobee. The goal is to transmit real time data via telemetry to District Scientists. Laboratory and remote data will assist scientists with better predicting and analyzing blue green algae bloom conditions.

Applied Sciences

- Completed Caloosahatchee River Estuary (CRE) Minimum Flows and Minimum Water Levels Rule Making, including holding several meetings with stakeholders to share information and a public meeting to present the recommendations to the Governing Board. Completed draft plan for the CRE MFL Recovery Strategy monitoring.

AMERICAN OVERSIGHT

- Edited by D. Childers, E. Gaiser and L. Ogden, the Oxford University Press released the seminal review of The Coastal Everglades; a nine-chapter description of the dynamics of social-ecological transformation in the south Florida landscape. District co-authors include Fred Sklar, Mark Cook, Carlos Coronado, Chris Madden and Walter Wilcox.

- Published updated Lake Okeechobee Watershed Research and Water Quality Monitoring Plan in the 2020 South Florida Environmental Report. The Plan describes recently completed and ongoing work and proposes research, monitoring, and modeling that will help the State of Florida achieve the Lake Okeechobee total daily maximum load for total phosphorus.

- Implemented drawdown of East Lake Tohopekaliga requested by the Florida Fish and Wildlife Commission (FWC) and approved by USACE. The project is a habitat improvement project that will be completed by June 2020.

- Completed the August 2020 annual Lake Okeechobee Submerged Aquatic Vegetation (SAV) mapping.

- Developed an improved Lake Okeechobee stage envelope target, which will be used as a performance measure by RECOVER in evaluating projects that may affect lake stages, either CERP-related or the upcoming Lake Okeechobee System Operation Manual (LOSOM). Currently under review with RECOVER staff.

Hydrology and Hydraulics

Canal Conveyance Analyses and Structure Flow Ratings

- Completed the C-1W, C-1N Belaire canal conveyance evaluations as well as the assembling of background information and hydraulic design evaluation of C-14.

- Completed the calibration and validation of the Upper Kissimmee MIKESHE (an integrated hydrological modelling system for building and simulating surface and groundwater flow). Completed the model simulations needed to evaluate conveyance of the Upper Kissimmee canal system along with proposed structural improvements; completed the draft report.

- Completed the compilation and review of the background design information and original design conditions for several canal reaches including the C-111.

- Completed the conveyance evaluation of the L-29 borrow canal.

- Completed flow rating development, calibration and/or verification for over 35 new structures and resolved Flow Rating issues at over 22 structures.

Hydraulic Design and Technical Review

- Completed hydraulic design for S-333N structure.

- Completed the sizing and initial S-49 spillway replacement and initiated the S-65D spillway replacement study using Computational Fluid Dynamics (CFD).

- Completed hydraulic design for replacement culverts at L-61/L-50 Crossing.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006292

- Analyzed and developed conceptual hydraulic designs for the S-332 B & C Pump stations replacement project.

- Perform in-depth technical reviews of hydraulic, hydrologic and geotechnical designs/studies for over 20 priority agency projects including A2 STA SOW, A2 FEB Preliminary Seepage Analysis, LOWRP, and C-43 Reservoir.

- Conducted reviews of plans and specifications in support of the Herbert Hoover Dike Culvert Replacement project.

Water Control Plans/Operation Plans/VDUP

- Developed or reviewed Operating Manual and Operation Plans for several critical assets and district projects. Completed revised Operation Plans for C-4 Impoundment, STA5/6 and Lakeside Ranch STA.

- Completed water control regulation schedule conversion to NAVD88 vertical datum at 19 water bodies and engaged the USACE.

- Quarterly Report and Presentation - C-111 Spreader Canal Western Project Phase 1.

- Prepared and circulated Monthly Dynamic Position Analysis (DPA) for complete water management system, Mid-Months DPA to support High Water Emergency operations.

- Developed a methodology and associated tool for Maximum Allowable Gate Opening at gravity water control structures.

Everglades Restoration and USACE Support - Modeling and Analyses

- Provided modeling support to complete the USACE Combined Operational Plan (COP) effort including the development of the first real-time operating protocol (the Tamiami Trail Flow Formula) the realizes a new restoration-based operational protocol as originally envisioned in CERP planning two decades ago. Also complemented implementation and began application of the highly detailed 15-minute MDRSM model for use in flood evaluation.

Flood Protection Level of Service and Sea Level Rise

- Identified capital projects and initiatives based on the findings of the Flood Protection Level of Service Study for specific watersheds in Big Cypress Basin.

- Initiated Flood Protection Level of Service Assessment for Broward County and Miami-Dade County.

- Initiated the tidal structure assessment project to determine the relative susceptibility of 27 low-lying tidal structures to sea level rise and to prioritize mitigation strategies for the most susceptible.

- Initiated system resilience initiatives with improvements to controls at coastal structures.

AMERICAN OVERSIGHT

Everglades and Estuaries Protection

- Initiated Rule Development to amend Chapter 40E-61, of the Florida Administrative Code, relative to the Lake Okeechobee Watershed and for the Caloosahatchee and St. Lucie River Watersheds as directed by NEEPP. Section 373.4595, F.S.

- Initiated the expansion of the water quality monitoring networks in the Northern Everglades to ensure appropriate representative data to evaluate trends, identify water quality issues, prioritize resources, measure potential water quality impacts of activities to SFWMD projects/works, and assist in selection of appropriate technologies, projects, and solutions to address issues. The expanded network will also support FDEP's Basin Management Action Plan in the Northern Everglades and the Blue-Green Algae Task Force recommendations.

2.0 Land Acquisition, Restoration, and Public Works

This program includes the development and construction of all restoration capital projects, including water resource development projects/water supply development assistance, water control projects, and support and administrative facilities construction; cooperative projects; land acquisition and the restoration of lands and water bodies.

Everglades Water Quality Improvement

- Received approval from FDEP for STA-1W Expansion #1 flow-through based on results of startup water quality monitoring.
- Completed construction of STA-5/6 Cells 2A and 3A internal improvement grading to allow for sustainable vegetation and improved treatment performance.
- STA-3/4 Energy Dissipators placed immediately downstream of the 17 inflow culverts to the STA to deflect the inflow and dissipate the energy allowing EAV to grow closer to the distribution canal and prevent short-circuiting.
- Completed Feasibility Study for STA-5/6 Connection to Lake Okeechobee, which will identify the volume of Lake Okeechobee water that can be sent to STA-5/6 and still meet the Water Quality-Based Effluent Levels, and initiated design based on findings.
- Complete design of STA1W Expansion #2 by mid spring 2020.
- Initiated construction of the G-341 Bolles Canal East Canal Segment 4. Construction of STA-3/4 Energy Dissipaters and STA-1E Cell 5 and 7 Internal Improvements is planned to start January and February 2020 respectively.
- Initiated monitoring for an upstream monitoring network in the C-51 West Basin to identify nutrient sources to Stormwater Treatment Area (STA) 1 East and devise appropriate strategies towards achieving Water Quality-based Effluent Limits for the Eastern Flow-path of the Southern Everglades.
- Conducted in-depth Best Management Practice (BMP) inspections for priority permit basins in the Everglades Agricultural Area to develop tailored approaches to reduce phosphorus nutrients in STA inflows; quality assurance analyses of permittee-collected data procedures, and BMP research.
- Initiated evaluation of sub-regional source control projects to address priority areas in the S-5A Sub-basin.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006294

Comprehensive Everglades Restoration Plan

- Central Everglades Planning Project (CEPP) - Completed design and initiated construction for the removal of Old Tamiami Trail to reduce impediments to sheetflow. Completed construction of S-333N to improve the delivery efficiency of moving water south from Water Conservation Area (WCA) 3A into Everglades National Park. Successfully negotiated with Florida Crystals for an early termination of leased fields under the expedited construction schedule for the STA component of the EAA Reservoir Project. Completed construction of the A-2 STA Clearing, Grubbing and Muck Removal. Construction of the A-2 STA Inflow/Outflow Canal is planned to start May 2020. Coordinating with the USACE on completion of the Assistant Secretary of the Army's CEPP Post Authorization Change Report (PACR) Review Assessment by May 2020. Executed the Pre-Partnership Credit Agreements for the CEPP North, South and New Water components to preserve program implementation construction credit. Execution of the CEPP South Project Partnership Agreement for implementation of the CEPP components that reduce constraints in sending water from WCA 3A to Everglades National Park on track for completion by July 2020.

- Completed design and initiated construction of the C-43 Reservoir S-470 Pump Station, reservoir embankment and associated structures. Developed the C-43 Reservoir Post Authorization Report for inclusion in WRDA 2020 to ensure adequate federal program spending authority to complete construction of the C-43 Reservoir project.

- Completed the Loxahatchee River Watershed Restoration Project 1501 Compliance Report and received Secretarial Order of Approval from FDEP. Released the Draft Project Implementation Report for public and agency review. Released the Final Project Implementation Report for public and agency review and inclusion in WRDA 2020.
- Completed construction of the C-44 STA Cells 1-3 & Hydration Pump Station S-401T. Identified alignment for the C-23 to C-44 Interconnect (southern diversion) and initiated documentation to include this feature into an Integral Determination Report to ensure program work-in-kind credit and amend the IRL-S Project Partnership Agreement, by December 2019. Determined final footprints and the remaining land acquisition required for the C-23/C-24 Reservoirs and STAs and initiated design activities.
- Release of the Final Project Implementation Report on track for public and agency review and inclusion in WRDA 2020 in February 2020. Execution of the Pre-Partnership Credit Agreement for the Lake Okeechobee Watershed Restoration Project to preserve ASR implementation program construction credit is anticipated in early 2020.

- Initiated design of the remaining components of the Biscayne Bay Coastal Wetlands Phase I L-31E Flow Way and the Cutler Flow Way. Design is expected to be completed in Fiscal Year 2020-21. Developed a cost share agreement with Miami-Dade County for design of the Biscayne Bay Coastal Wetlands Phase I Cutler Flow Way. Acquired 4 tracts containing 34.58 acres for the Biscayne Bay Coastal Wetlands Phase 1 Project in Miami-Dade County. The District is working to acquire the remaining 2 tracts needed in the Biscayne Bay Coastal Wetlands Phase I Project during this fiscal year.

AMERICAN OVERSIGHT

- Developed a Grant Work Plan with FDEP to utilize State appropriations for the Biscayne Bay Coastal Wetlands Phase II planning project. Completed development of the Project Management Plan and initiated project scoping for the Biscayne Bay Coastal Wetlands Phase II project. Kick off for the Biscayne Bay Coastal Wetlands Phase II planning project is expected in July of 2020.

- Completed plan formulation and evaluation for the C-111SD project resulting in a Tentatively Selected Plan to replace the temporary S332B and S332C Pump Stations. Developed the C-111 South Dade Post Authorization Change Report for congressional approval in WRDA 2020 to replace the temporary S332B and S332C Pump Stations. Acquired 12 tracts containing 23.08 acres for the C-111 South Dade Southern Glades Project in Miami-Dade County. The District continues to acquire the remaining land interests needed in the C-111 South Dade Project from willing sellers. Deviation to operate S20 structure, part of the C111 SCW Project, was approved. The deviation will modify operations by up to 0.5 feet for the next two years to increase water stages in the model lands.

- Completed the Broward County Water Preserve Area geotechnical investigations and seepage modeling to support design of the C-11 Impoundment. Initiated power line relocation, removed site debris, and conducted soil sampling in preparation for C-11 Impoundment construction.

- Initiated construction of the Picayune Strand Restoration Project (PSRP) Project Miller Road and Tram removal. Continued plugging of the Stair Step discharge canal. Completed modeling for the Southwest Protection Feature and initiated design for the conveyance features under US 41 and County Road 92. Design/build contracts to be awarded in January 2020. The District continues to acquire the remaining land interests needed in the Fakahatchee component of the Picayune Strand Project.

- Updated the South Florida Ecosystem Restoration Integrated Delivery Schedule to sequence and advance key ecosystem restoration projects to provide more system-wide operational flexibility to better manage Lake Okeechobee, reduce undesirable discharges to the northern Estuaries and send additional flow to the central Everglades including Everglades National Park.

- Completed project scoping with the USACE on the Lake Okeechobee System Operation Manual (LOSOM) and initiated project plan formulation.

- Lead the effort to update the RECOVER Northern Estuaries Salinity Performance Measure (PM). It has been 12 years since the PM was last updated. New modeling approaches and current available data on the indicators are being used to improve the accuracy and usefulness of the PM. The PM is scheduled to go out for review and be finalized early in 2020 for use in the LOSOM update. LOSOM will just be one of the CERP uses of this PM.

AMERICAN OVERSIGHT

- RECOVER scientists, working with the Interagency Modeling Team (IMT), completed the computer modeling of the performance measures and indicators associated with the Comprehensive Everglades Restoration Plan (CERP) requirement to conduct an Interim Goals and Interim Targets (IGIT) analysis. This multi-agency effort will assist decision-makers with the timing, planning and implementation of CERP projects, inform adaptive management actions, and identify uncertainties that need further study to assure restoration success. The assessment of the IGIT modeling output is expected to be completed by January 2020.

- Completed design of the Loxahatchee Impoundment Landscape Assessment (LILA) Improvements.

- Took over responsibility for Phase 2 of the Decomp Physical Model from USACE. In Phase 2, active vegetation management techniques are being used to restore connectivity between degraded sloughs in WCA-3B, allowing increased propagation of flow in the Everglades landscape. In Phase 1, increased flow was shown to shift algal communities and reduce canal exports of phosphorus downstream. Phase 2 is exploring the implications of algal shifts and canal backfilling. The Decomp Physical Model project will continue through Fiscal Year 2020-21.

Northern Everglades and Estuaries Protection Program (NEEPP)

- Construction completion of the Brighton Valley Northern Everglades Public-Private Partnership (NE-PPP) Project is on schedule for December 2019. This project will treat rainfall and excess water pumped from the C-41A canal on approximately 8,142 acres of private agriculture lands. It is estimated that the project will treat an average of 39,765 acre-feet of water per year with an estimated average water quality benefit of 3.2 metric tons of total phosphorus and 27.3 metric tons of total nitrogen per year.
- Completion of the Lake Okeechobee Watershed Protection Plan Update is on schedule for publication March 2020. Initiated the St. Lucie River Watershed Protection Plan Update planned for publication in 2021.
- Initiated planning and conceptual design of the Flow Equalization Basin (FEB) and C-43 Water Quality Treatment and Testing Facility Project – Phase II Field-Scale Cells Study at the ~1,800-acre Boma property, along the Caloosahatchee River (C-43 Canal).
- Initiated Brady Ranch FEB & Aquifer Storage and Recovery (ASR) Feasibility Study, which will evaluate the project location and water availability to develop project alternatives and inform future design within the ~1,800-acre property in the Lake Okeechobee watershed.
- Initiated design of Grassy Island FEB & ASR Project.
- Commenced operations of the constructed 670-acre Lake Hicpochee Hydrologic Enhancement Project in the Caloosahatchee River Watershed. Initiated evaluation of project alternatives for a ~2,400-acre expansion; draft Design Documentation Report (DDR) planned for completion by summer 2020.
- Initiated the C43 Water Quality Feasibility Study in a public process to investigate technology options and identify three conceptual alternatives to provide additional treatment and improve water quality entering and/or leaving the C-43 Reservoir.
- Reviewed USACE biological assessment (BA) and system operating manual (SOM) for the Kissimmee River Restoration Project Headwaters Revitalization regulation schedule for the S-65 water control structure at the outlet of Lakes Kissimmee, Cypress, and Hatchineha. Approval of the schedule is anticipated in mid- to late-2020, after completion of project construction by USACE.

AMERICAN OVERSIGHT

- The District initiated rulemaking to amend Chapter 40E-61 of the Florida Administrative Code (40E-61), also known as the Lake Okeechobee Works of the District Basin rule, to address the legislative directives in Section 373.4595, Florida Statutes or NEEP. The Office of Counsel, in conjunction with Regulatory staff, will draft rule text based on statutory requirements and public feedback. The Office of Counsel anticipates final rule adoption by the end of Fiscal Year 2020. The legislature required the District at a minimum to:
  - Amend Chapter 40E-61 of the Florida Administrative Code to be consistent with NEEPP and Section 403.067, Florida Statues;
  - Adopt new rules for the Caloosahatchee and St. Lucie River Watersheds;
  - Provide a water quality monitoring program for nonpoint source dischargers required to monitor under Section 403.067, Florida Statutes; and
  - Provide for the results of that monitoring to be reported to the coordinating agencies.

3.0 Operations and Maintenance of Lands and Works

This program includes all operation and maintenance of facilities, flood control and water supply structures, lands, and other works authorized by Chapter 373, F.S.

Field Operations

- Cleared approximately 2.8 miles of canal bank along C-40 for an upcoming FWC muck removal project.

- Completed 825 planned preventative maintenance activities on District infrastructure including pump stations, gravity control structures, electrical and instrumentation components, canals, levees, fleet vehicles and heavy equipment.

- Performed repair and grading of 380 miles of roads.

- To ensure proper operation of the District flood control system, 7,291 cubic yards of aquatic vegetation were removed from canals.

- To control invasive plants and protect the integrity of District levees, 11 acres of terrestrial vegetation were mechanically removed.

- District pump stations collectively pumped 331,402 acre/feet of water from October through November 12, 2019.

- Planning the installation of 17 energy dissipaters at the inflow structures for STA 3/4 consisting of 8,300 Tons of rip rap and 9,160 Tons of bedding stone.

- Planning the installation of filter fabric, bedding stone and rip rap along 5,350 linear feet of STA 1 East to complete erosion repairs from Hurricane Irma. This will include approximately 12,220 Tons of rip rap, 4,160 Tons of bedding stone and 3,000 sq. yds. of sod.

- Planning to clear 5,000 feet of woody vegetation, construct 20,000 linear feet of levee, install four culverts and excavate and haul 133,000 Tons of fill material for the Allapattah Flatts Wetland Restoration project.

AMERICAN OVERSIGHT

- Planning the installation of three 60" x 80' culverts at L-50 and L-61.
- Planning the replacement of the G-78 culverts.
- Planning the stabilization of 300 feet of bank along the east side of C-38 south of S-65A.
- Planning in-house backup generator replacement at 5 water control structures.
- Planning the overhaul of 10 engines, six pumps and one gearbox from District pump stations.
- Planning 10 major gate overhauls and two hydraulic cylinder overhauls at District structures.
- Planning hazardous tree, debris and trash removal from 2.5 miles along the Golden Gate Main Canal.
- Through October 31, 2019, processed 55 permit applications and issued 39 Right-of-Way Occupancy Permits/Modifications. This monthly average would yield 660 applications and 468 permits for Fiscal Year 2019-20.
- Continued with day-to-day routine helicopter maintenance.

Engineering and Construction

- Completed construction of S-72 Structure Refurbishment, L-8 Dupuis Culvert Replacements, S-151 Replacement, S-140 PS Refurbishment, WPB Paint Shop Facility, Big Cypress Basin (BCB) Remote Monitoring and Communications Phase 3, Culvert 8 Pump Attachment, Gate Overhaul Fall Protection Installations, Tower Program Repairs, and the C-100A Tree Removal Segment 7.
- Initiated construction of the Nubbin Slough STA Repairs, G-420/G-420S PS Modifications, G-370/G-372/G-310/G-335 Tower Grounding Modifications, Microwave Tower Loop Radio Replacements, IT Shelter Replacements at Miami Field Station & Miami South Towers, S-40/S-41/S-44 Refurbishments, S-169W Structure Replacement, BCB Electrification Phase 1, L-50 Culvert, FTL Field Station Overhead Crane, Kissimmee SCADA Site Replacements, Miller Weir #3 Gate Replacement, and S-176 Roller Gate Conversion.
- Completed design of the C-139 Annex Restoration Phase 2 and Agricultural Area Stormwater Rerouting, S-135 By-pass Culvert Abandonment, S-179 Roller Gate Conversion, G-310 & G-335 Trash Rakes, S-319 & S-362 Generator Replacement and Relocation, Loxahatchee Impoundment Landscape Assessment (LILA) Improvements, BCB Electrification Phase 2, and Homestead & Okeechobee Project Culvert Replacements.
- Initiated design of the STA-1W Levee Modifications, Storm Surge Protection for Miami-Dade Coastal Structures, L-31N Miami-Dade Curtain Wall, BCB SCADA Sites, BCB Canal Improvements, WPBFS Sandblast Facility, St. Cloud and Clewiston Project Culvert Replacements, HHD (S-285 & S-290) SCADA Automation, G-404 Roof Replacement, and Okeechobee & Clewiston Field Station Replacements.

AMERICAN OVERSIGHT

- Inspection Programs: The Structure Inspection Program (SIP) completed 138 multi-disciplined engineering inspections which assist in identifying capital projects & maintenance items. Another 37 inspections were completed through the Roof, Tower and Bridge inspection programs. There were 75 overhead crane inspections & 241 vibration analyses completed.

- Unscheduled Requests: During the year, around 140 unscheduled requests are received. These typically involve urgent maintenance/repair of the District's water control system, and include issues with major pump stations, water control structures, roofs, manatee protection systems, and miscellaneous issues (e.g., towers, erosion, permits, fuel, generators, seawalls, levees, canal banks, bridges, field station facilities).

- Planning to complete over 250 Surveying/Mapping service requests for the current year.

- Managed contract surveying services supporting the EAA Reservoir/STA Canal Conveyance Modeling efforts on ~100 miles of segments along the Miami Canal, North New River and L13, L14, and L15 Canal Segments.

- Managed contract surveying services supporting Canal Conveyance Modeling efforts on ~80 miles of segments along the C6, C18 and L29 Canal Segments.

Real Estate

- Acquired 4 tracts containing 4.92 acres for the Shingle Creek Project in Orange County.

- Received 3rd and final installment payment from Palm Beach County and conveyed all remaining interest in Tract W9100-176 ("Pero Farms" property).

- Processed 6 release of reservations applications.

- Extended 5-year cattle grazing lease on 4,466.34 acres in Okeechobee County.

Land Resources

- Treated 2,324 acres for invasive upland and wetland vegetation to maintain the ecological function and values of native plant communities on conservation lands. The majority of contracted exotic plant control work will occur during quarters three and four with a goal of treating 60,000 acres of District-managed lands for exotic vegetation.

- Managed contracts for biological control development and implementation resulting in six releases of approximately 40,500 Old World climbing fern defoliating moths within the Kissimmee River floodplain. Additional targets for Fiscal Year 2019-20 include 200 releases of water hyacinth leaf hoppers, 250 releases of agents to control Old World climbing fern, and 100 releases of the recently approved agent for control of Brazilian pepper.

- The District's Python Management Program removed 223 Burmese pythons in the first 40 days of Q1 Fiscal Year 2019-20, bringing the total number of animals removed since the project's inception to 2,696. The program goal for removed pythons during Fiscal Year 2019-20 is 1,500 pythons.

AMERICAN OVERSIGHT

- Two green iguana removal projects were initiated on District canals to assess efficacy of standard iguana control techniques to reduce levee damage.

- In collaboration with the University of Florida, the District completed four invasive animal survey routes within the Everglades footprint, with a goal of completing 24 systematic surveys during Fiscal Year 2019-20. The data collected from these surveys allows the District to detect population trends of priority invasive animals as well as trends for native wildlife.

- Completion of thirteen (13) planned hazardous and exotic vegetation removal projects in Homestead, Okeechobee, West Palm Beach and Big Cypress Basin Areas. Completion of sixteen (16) aerial projects to treat exotic vegetation on District properties.

- Coordinate efforts with the Florida Fish and Wildlife Commission and the Army Corps of Engineers for aquatic treatments of the Alligator Chain of Lakes and Lake Okeechobee, while considering other methods of treatment. Mechanically harvested one hundred and twenty (120) acres of floating vegetation in Lake Kissimmee. Working with Dr. Leary (Univ. of Florida) to evaluate mechanical harvesting cost/benefit analysis.

- Treated 616 acres of undesirable vegetation and planted 90 acres of emergent vegetation within the District Stormwater Treatment Area (STA) system

- Conducted prescribed burns on 2,618 acres of fire-dependent plant communities and wetlands on District acquired conservation and project lands during quarter 1 to maintain and improve the ecological values associated with these habitat types. Acres of prescribe burning completed to date represent 16% of the established prescribe burn goal (16,000 acres) for the year.

- Abiaki Prairie Wetland Restoration Project: Conducted ongoing, monthly regulatory teleconferences with USACE/EPA/FWS to facilitate project permitting, completed draft 2020 exotic and nuisance vegetation treatment plan for phases 1 and 2 of the restoration project, completed planting of lateral 15 habitat islands, and completed site preparation activities for the planting of 500 acres of native ground cover in January 2020 in phase 1 of the wetland restoration project.

- Administered 44 cattle grazing leases on conservation and project lands as a cost-effective land management tool to manage herbaceous vegetation on public lands, developed land management and BMP requirements for 1 new grazing lease, and monitored BMP compliance to assure grazing activities are carried out in an environmentally appropriate manner.

- Provided recreation opportunities including hiking, camping, hunting, fishing, bicycling, wildlife viewing, and equestrian use on over 686,000 acres of District lands.

AMERICAN OVERSIGHT

Hydrology and Hydraulics

- Processed 88,500 station days (242 station years) of real-time data (out of a projected 1.2M station days for a full year).
- Completed quality assurance on over 320 legally mandated sites (2,300 station-days out of a projected 28,000 station-days for a full year).
- Extended the historical records and improved data acquisition of Next Generation Weather Radar rainfall, Geostationary Operational Environmental Satellite solar radiation, potential and reference evapotranspiration (ET) parameters, and generated an extra 10 instantaneous and daily flow single time series.
- Performed 9 discharge measurements (stream gaging), site visits, and reconnaissance trips (8 for rating improvements and 1 for a sediment trap study) maximizing opportunity to secure measurements based on weather conditions.

Information Technology Operations

- All critical SCADA sites will be on the Emerson Ovation System
- SCADA Design, Installation, and Maintenance
    - Perform 1,715 preventative maintenance site visits
    - Perform 992 site repairs
    - Complete 23 NAVD88 datum conversions
    - Perform equipment installation / upgrades consisting of RTU program upgrades at 210 sites, Solar Panel upgrades at 44 sites, and Bird Deterrent installation at 32 sites
    - Complete 3 site rebuilds
    - Complete 15 Motorola ACE 3600 new and upgraded sites, 35 Campbell CR1000 new and upgraded sites, 50 panel builds
    - Participate in 31 construction project design reviews
    - Complete 47 field certifications

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006302

General Services

- Planning the replacement of the B-2 air condition chiller.
- Planning the renovations and repairs on the B-1 headquarters restrooms, breakroom and Communication media room.
- Planning the replacement of the parking lot lights with energy efficient LED lights.
- Working with FP&L on the installation of Electric Vehicle charging stations for public and staff use.
- Completing the replacement of analog security cameras at all Field Stations, FOC and Headquarters with new digital cameras.
- Planning the replacement of the Access Control System security, badge reader upgrade and replacement.
- Planning the replacement of the perimeter protection systems at the West Palm Beach and Ft. Lauderdale Field Stations.

Emergency Management

- Prepared the District for response to Hurricane Dorian, including activation and staffing of the District's Emergency Operations Center.

Human Resources

- Held fire prevention training throughout the District; led annual fire evacuation drill of entire Headquarters campus.
- Conducted onsite safety training including CPR, AED, First Aid and Secure Motor Vehicle Loading at multiple locations.

Operations

- Operating the water management system 24/7/365 to meet flood control and water supply needs.
- Maximizing use of available water storage features to attenuate runoff and meet seasonal demands. The L8 FEB was filled to 16.4 feet NGVD in October 2019 as the wet season ended and the dry season began.
- Enhanced weather equipment and applications to leverage the advances in weather reporting and forecasting and to make informed operational decisions to provide better levels of flood control and in drier conditions providing water supply to affected communities.
- Provided increased monitoring and operations to accommodate the S-72 structure emergency repairs for the duration of the Fiscal Year 2019-20 dry season.

AMERICAN OVERSIGHT

- Continuing efforts to upgrade the hardware and software of our SCADA system to utilize the latest technologies available today. The SCADA Replacement Project is steadily progressing and in the process of adding and testing additional structures across the District to the new system each week. Working with our District SCADA team and the consultant, to ensure the initial requirements and system redundancies are fully implemented as intended to ensure the robustness of our SCADA system.

- Working with SCADA and Construction to fast-track the S-476 pump operations in the new SCADA system currently being developed.

- Continuing to work with Engineering regarding the Okeechobee Field Station relocation design. Providing the Office of Operations with needs, input, and guidance for the design and implementation of a 24/7 fully operable Backup Control Center to be located within the new Okeechobee Field Station.

- Provide 298 Special District and local governments Operational Coordination calls for extreme weather and rainfall events.

4.0 Regulation

This program includes water use permitting, water well construction permitting, water well contractor licensing, environmental resource and surface water management permitting, permit administration and enforcement, and any delegated regulatory program.

Regulatory Streamlining and Consistency

- Participated in discussions on updates to the Operating Agreement with FDEP and the other Water Management Districts.

- Water Use staff continue to participate in Central Florida Water Initiative (CFWI) Regulatory Team's Uniform Agricultural Demands Workgroup (led by FDACS). This Workgroup is charged with developing a tool that can be used to calculate uniform agricultural demands for agricultural permits in the CFWI area.

- Water Use staff are actively participating on the CFWI Regulatory Team and the ongoing rule development process led by FDEP. The Regulatory Team is tasked with, among other things, establishing consistent rules and regulations for the three water management districts within the CFWI area. Staff reviews draft rules, provides input and attends publicly noticed workshops.

- Regulation staff coordinated with the Information Technology team to implement new software for a complete update of permit and post permit compliance database. Currently finishing permitting, migrating data and compliance for ERP which is scheduled to be completed in the first half of Fiscal Year 2019-20 at which time the water use aspect of the system will be addressed.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006304

Application Review and Public Involvement

- Application Reviews – the District will provide timely evaluation and review of an estimated 2,400 Environmental Resource and 1,900 Water Use Permit Applications (including transfers).

- Public Involvement – Continue to host quarterly public meetings to provide opportunities for the public to comment on pending Water Use and Environmental Resource Permit applications.

- Staff has held numerous outreach meetings throughout the course of the year with various governmental entities. Staff also continues to work on several projects throughout the District such as the Central Florida Water Initiative (CFWI) and the Kissimmee Water Reservation Project.

- Water Use Staff have enhanced the level of coordination with Water Supply Planning to further strengthen the linkage as described in the FDEP guidance memorandum on the subject. These enhancements include staff review of utility profiles, and increased coordination on the review of utility profiles, and increased coordination on the review of conservation plans and population projections.

- Water Use staff engage in monthly telephone conferences with regulatory staff from SJRWMD and SWFWMD to coordinate the review of proposed withdrawals in one district which may impact resources in another district as stipulated in the Memorandum of Understanding executed by the three water management districts on October 24, 2000.

ePermitting

- Regulation staff will coordinate with the Information Technology team to transition the ePermitting external interface to the Permitting Portal (Pega) application, providing one location for permitting/application submittals, review, post-permit tracking, and document retrieval for both Environmental Resource Permits (ERPs) and Consumptive Use Permits (CUPs).

AMERICAN OVERSIGHT

5.0 Outreach

This program includes all environmental education activities, such as water conservation campaigns and water resource education; public information activities; all lobbying activities relating to local, regional, state, and federal governmental affairs; and all public relations activities, including public service announcements and advertising in any media.

- Planned, conducted and hosted two major public events commemorating priority projects as part of Governor DeSantis' "Achieve More Now for Florida's Environment" Executive Order:

- Oct. 25 (Groundbreaking Event) – Caloosahatchee River (C-43) West Basin Storage Reservoir Project Event with Governor DeSantis as keynote speaker

    - a milestone restoration effort to improve water quality in the Caloosahatchee River and Estuary.

- Nov. 8 (Ribbon-Cutting Event) – C-44 Stormwater Treatment Area with Governor DeSantis as keynote speaker

    - a milestone restoration effort to improve water quality in the St. Lucie River and Estuary, providing water quality improvements before the U.S. Army Corps of Engineers completes the reservoir.

- Created 13 new videos for SFWMD-TV.

- Wrote and disseminated news releases as well as created Op Eds, letters to the editor, public officials' talking points and speeches. Developed presentations for Governing Board members and Executive team as well as numerous topical fact sheets for the public.

- External website received 698,200+ page-views during this quarter.

- Improved website accessibility in tandem with IT for ADA-certification.

- Retooled existing FTE to create a Digital and Social Media Strategist position. Social media program currently has 5,503 Facebook followers and 15,041 Twitter followers. Relaunched Flickr and launched Instagram.

- Post meeting materials for publicly noticed Governing Board Meetings

- Hosted several emergency livestreams in preparation for Hurricane Dorian

- Hosted public engagement events on Everglades Restoration project priorities for Governor DeSantis

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006306

6.0 District Management and Administration

This program includes all governing and basin board support; executive support; management information systems; unrestricted reserves; and general counsel, ombudsman, human resources, budget, finance, audit, risk management, and administrative services.

Administrative Services

Finance

- The Finance Bureau has coordinated and spearheaded the two-year-plus effort of obtaining reimbursement funding from the Federal Emergency Management Agency (FEMA) as well as the Florida Department of Emergency Management (FDEM) related to Hurricane Irma. The District has received over $4 million thus far and has additional claims of approximately $19 million, which are currently being reviewed by these agencies. Some of the Project Worksheets related to District claims involve permanent restoration, which hasn't been fully completed by the District and thus the receipt of such claims is uncertain. The Finance Bureau continually pursues every legal opportunity to maximize FEMA reimbursement funding and satisfies formal (as well as informal) FEMA/FDEM requests for additional information in a timely manner.

- Asset Management - Annual Physical Asset Inventory expected to be greater than 98 percent find rate. Anticipate processing greater than 4,000 units for disposal with the majority being sold via online auction. Revenue from sales of surplus assets projected to be greater than $400,000.

- CAFR – The District plans to issue the CAFR on time and receive a "clean" opinion from the external auditors with respect to financial reporting, federal and state grant accounting and internal controls. The Finance Bureau is expected to earn the GFOA's Certificate of Achievement for Excellence in Financial Reporting for the 31st consecutive year.

Budget

- Coordinated and developed the Fiscal Year 2020-21 Preliminary Budget.

- Updated the five-year reserve allocation plan for the Fiscal Year 2020-21 Preliminary Budget, identifying funds from accumulated reserves to implement the priorities of the Governing Board in support of critical water resource projects.

- Received Compliance Certification of Truth in Millage (TRIM) submittal from the Florida Department of Revenue for the Fiscal Year 2019-20 Budget.

- Coordinated the update of future cost estimates for new works of the District for water management systems operations.

- Updated the 5-year forecast and presented the draft Preliminary Fiscal Year 2020-21 Basin Budget to the Big Cypress Basin Board.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006307

Projects & Processes

- Leading the District's Team effort to implement SAP Material Resource Planning (MRP) module. To date, five field stations are on-line with automatic parts orders into newly established warehouse operations. Effort includes bringing scanner capabilities into the field station warehouse operations that fully automate the receiving, inventorying and issuing of parts through the use of parts and work order bar coding.

- Reviewed and developed alignment of the performance metrics for the District's 2018 Strategic Plan, Annual Work Plan (SFER VOL II Chapter 2), the DEP Water Management District Performance metrics and the annual Budget Performance metrics. Revisions included elimination of some metrics and adding others to better measure the District's execution of its long-term goals. Strategic Plan was submitted and accepted by the Governing Board on schedule. Completed redesign effort of the existing FY19 Strategic Plan and incorporated a new automated web-based public comment review process into the Strategic Plan development approach.

Human Resources

- Implemented agency-wide reorganization, effective 11/2019 with impacts to Finance, Budget, IT and HR.

- Delivered 2020 Annual Healthcare Renewal with no increase to the District in partnership with our insurance broker, Gehring Group.

- Implement new Recruitment & Onboarding System.

- Refinement of Fidelity retirement accounts; (removal of the 401A account).

- Begin offering new training curricula: Effective Management for new supervisors, Teambuilding, Respect in the Workplace.

Procurement Bureau

- All Contracts and Purchasing Specialists completed the Florida Certified Contract Manager (FCCM) training in order to obtain certification through the Florida Department of Management Services, Division of State Purchasing. Certification requires successful completion of eight online training modules, a two-day instructor-led training and a final assessment. All professional procurement staff are now FCCM certified.

- The Purchasing unit processed 760 purchase orders during the first month of Fiscal Year 2019-2020. The Purchasing unit will establish additional price agreements for alternate automotive and heavy equipment. These price agreements will support the Material Requirements Planning (MRP) project for field operations.

- The Contracts & Purchasing unit issued fifteen (15) solicitations the first month of the new Fiscal Year 2019-2020. Among those solicitations was the CEPP New Waters STA A-2 Distribution Canal Clearing, Grubbing and Much Removal, to clear and grub approximately 240 acres of EAA agricultural vegetation located on the future EAA A2 STA site.

AMERICAN OVERSIGHT

- A Design/Build solicitation was issued for the new Okeechobee Field Station. Eight (8) responses are currently under evaluation. A recommendation to enter into contract negotiations with the top ranked firms is anticipated to be taken to the District's Governing Board for approval in March 2020.

- Procurement's Small Business Enterprise (SBE) unit participated in an outreach event to showcase how to do business with the District. Staff met with attendees to distribute vendor registration and SBE certification applications and provide information about current & upcoming solicitations. The event was hosted by the School District of Palm Beach County. The intent of the event is to educate small, minority and women-owned businesses on how to do business with all public agencies in Palm Beach County.

- Central Master Data Management will partner with IT and Process and Projects to implement SAP Bill of Materials (BOMs) across Field Operations for vehicles. The basic functions of BOMs include maintaining the list of components required to maintain and repair a piece of equipment, provides accurate parts ordering, and increases staff efficiencies. The BOM project has direct ties to the MRP project as it ensures parts are available for planned and/or corrective maintenance. Once BOMs for vehicles is implemented across all Field Stations other equipment types will be added.

Information Technology

- Release the SAP SuccessFactors Employee Central, Recruiting and Onboarding modules. New employees will be able to complete their new employee forms (e.g. I9, W2, benefits) electronically prior to their first day of employment. This will bring many needed efficiencies to the paper onboarding processes used today.

- Water Quality parameters (i.e. Phosphorus, Nitrogen, Chlorophyll) will be added to the processing by exception automation tool. These features will be integrated into the Graphical Verification Analysis (GVA) application.

- Complete the overbuild network for the South Loop.

- Complete the Windows 10 Rollout and Desktop Refresh within the Wide Area Network (100% complete for all locations).

General Counsel

- Office of Counsel was recently realigned to better provide the District with comprehensive legal support for implementing the District's mission, including the Governor's environmental and Everglades restoration priorities. The realignment organized the Office in two distinct substantive sections, one that focuses on the District's mission to champion Everglades restoration and environmental policy, and the other that concentrates on the District's general agency legal needs and civil litigation matters.

AMERICAN OVERSIGHT

Office of Inspector General

Fiscal Year 2019-20 Q1

- Completed, or substantially completed, 4 audit projects.
- Commenced 3 audit projects.
- Completed quarterly Audit Recommendations Follow-Up reports.
- Coordinated execution of new contract for financial statement audit services.
- Submitted Fiscal Year 2019-20 Audit Plan to Audit and Finance Committee for Approval.
- Perform other projects and administrative activities per the annual audit plan.

Fiscal Year 2019-20 ANTICIPATED

- Complete 8 to 10 audit and review projects.
- Evaluate all complaints regarding allegation of fraud, waste, mismanagement, misconduct, and other abuses in the District, and perform investigations as deemed necessary.
- Complete quarterly Audit Recommendations Follow-Up reports.
- Coordinate financial statement audit with external accounting firm.
- Complete other projects and administrative activities per the annual audit plan.

Efficiencies

The District continues to evaluate programs to increase efficiency and effectiveness and maximize the use of funds spent on protecting and improving the state of Florida's water resources.

1.0 Water Resources Planning and Monitoring

- The Water Quality Bureau (WQB) has continued implementation of a process for providing agency-level review and support on requests for water quality monitoring, laboratory analyses, and other bureau support services leading to more responsive customer service, more comprehensive quality assurance and more complete data management plans. The entire process is under the umbrella of the Bureau's Environmental Monitoring Review Team (EMRT) which has been comprehensively redesigned with multi-disciplinary expertise and professional process coordination to provide effective technical support to District programs and projects.
- Successfully negotiated with FDEP the permit reporting requirements for four projects (Buttermilk Packingham Slough, C-4 Emergency Detention Basin, G-160 and G-161) from annual to quinquennial, resulting in cost and staffing resource savings.

AMERICAN OVERSIGHT

2.0 Land Acquisition, Restoration, and Public Works

- Implemented cooperative partnership between Miami-Dade County and the district to cost share design services expenses for the Biscayne Bay Coastal Wetlands Phase I Cutler Wetlands Component.

- Implemented routine coordination meetings with Florida Power and Light regarding restoration project utility requirements that have led to an increase in productive communications and issue resolution.

- The Permitting Acquisition and Compliance Section implemented a standardized process for developing Biological Services Scopes of Work (SOW) and in-house expertise training goals. The process includes standardized SOW language and tasks to maintain consistencies across contracts, which will assist staff in evaluating vendor effectiveness and efficiency and in evaluating the efficient use of in-house staff resources versus outside vendors. In-house staff has and will continue to be trained in biological services tasks, including but not limited to: wildlife surveys, wetland evaluation and delineations, and other licensed services (e.g. Gopher tortoise agent, Florida burrowing owl agent, increasing levels of qualified manatee observers, Qualified caracara observers, etc.) to maximize effective use of in-house staff in the performance of project-related tasks. The goal of the standardized process is to provide management with cost and schedule efficiencies for consideration in project staff utilization, budgeting and schedule decisions.

- Evaluated floating cattail tussocks with Unmanned Aerial Vehicles, saving time and effort from observing them by boat.

3.0 Operation and Maintenance of Lands and Works

Land Resources

- In collaboration with other Bureaus, implemented DBHYDRO Insights database to track and communicate STA operations and water quality treatment data during decision making meetings.

- Initiated substantial program alignments between District and FWC python management programs including standardization of program requirements and substantial expansion of the Everglades Cooperative Invasive Species Management Area (ECISMA) research coordination to develop interagency research priorities for python management.

- Managed the District's volunteer program which is expected to provide 4,211 hours of volunteer time performing functions such as trail and facility maintenance, water-way clean-ups, campground host activities, and providing environmental education programs by the end of quarter 1. This program will provide in-kind services valued at $101,232 at the standard volunteer rate of $24.04 per hour.

Field Operations

- Pumps are being utilized to hydrate the treatment cells to facilitate grow-in of the wetland plants, which in turn will allow the treatment cells to be placed into operation once the permit start-up criteria have been met.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006311

Engineering and Construction

- Equipment, training, staffing, and cost-savings advancements were made towards Operation of Unmanned Aerial Systems (UAS) Drone and Hydrographic surveying standardization.

4.0 Regulation

- Water Use and ERP staff continue to work with applicants in the pre-application and pre-submittal phases of the permitting process in an effort to reduce the number of requests for additional information (RAI) letters and the overall length of time a permit application is in-house prior to final action. This effort has resulted in a reduction in the time applications are in-house.

- ePermitting - Increased electronic submittals from 85 percent to 86 percent of all application submittals. Outreach efforts continued to promote the use of ePermitting. Staff continued to provide training for the regulated community and internal staff to increase skill level and familiarity with ePermitting with increasing use of live training via the web.

- Water Use Bureau staff established a Public Water Supply Task Force where client relationship managers have been assigned to utilities in various geographic areas. These employees are building relationships by working very closely with the utility to get them fully in compliance in a positive and collaborative manner. The level of Public Water Supply utility compliance continues to increase since implementation of this effort.

- Water Use Compliance staff continue to work with permittees to train them (including in field, hands on training) on the use of ePermitting for compliance submittals. The number of water use compliance submittals submitted through ePermitting continues to increase since implementation of this effort.

- Both Environmental Resource Permitting (ERP) and Consumptive Use Permitting (CUP) authorizations are meeting FDEP's established quarterly performance metrics goals of 25 days for ERPs and 33 days for CUPs.

5.0 Outreach

- Brought professional video/streaming capability in-house with existing staff instead of contractors

- Implemented GovDelivery for efficient information distribution to the public

- Developed 3 new products:
    - Daily morning clip reports
    - Monthly Governing Board agenda summary sheet
    - EAA Progress Fact Sheet

- Provided all uniformed staff with updated and consistent SFWMD branded uniforms

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006312

- Created Water Resource Accountability and Collaboration (WRAC)

6.0 District Management & Administration

- Continued developing efficiency methods to develop the Annual Work Plan for the South Florida Environmental Report. Project Management performance is measured using industry standard earned value measurement system that integrates measurements of project milestones, planned versus actual expenditures and change management. Enhanced SAP Earned Value Report that gives anyone at the District the ability to measure earned value performance with a single easy to run report in SAP. District-wide Process Management System that provides monthly efficiency and effectiveness metric performance measurements across the District's core processes. The metric measurement system acts as a single database for semi-automated data-based reporting in fulfillment of numerous legal reporting requirements (SFER Report, Annual Work Plan Report, Governor Performance Metric report, DEP Water Management Metric Reports).

- Directed data-mining process across all the District's databases to ensure that the FL-SOLARIS Facility Inventory Tracking System (FITS) Report was updated, QA/QC'd and delivered to State of Florida Department of Management Services (DMS) over thirty days prior to the June deadline. Removed enormous amounts of District FTE effort from the old report development method by working with the GIS Section to create an automation tool that determines tax rates of each facility directly from District GIS databases. Utilized SAP Business Warehouse capabilities to preliminarily pull most of the required data fields from SAP and sent these reports to the Team members to review. These efforts considerably reduced the District FTE time required to develop, update, and review the report this year.

- The Central Master Data Management (CMDM) unit Partnered with IT and Process and Projects to implement SAP Materials Requirements Planning (MRP) across Field Operations for an initial inventoried materials list. The basic functions of MRP include inventory requirements planning, inventory control (maintaining low inventory levels), bill of materials processing, and automated requisitioning and purchasing activities. Upcoming MRP activities include bringing other District facilities online with MRP, increasing the number of inventoried materials on MRP, and implementing non-stock MRP types.

AMERICAN OVERSIGHT

III. BUDGET HIGHLIGHTS

B. Goals, Objectives and Priorities

Chapter 373, F.S., authorizes the District to direct a wide range of initiatives, programs, and actions. These responsibilities are grouped under four core mission areas by statute: water supply, water quality, flood protection and floodplain management, and natural systems.

The District's objective in developing its budget is ensuring South Florida taxpayers receive efficient and effective customer service and protect the region's water resources. To that end, the District's available resources in the Fiscal Year 2020-21 Preliminary Budget are allocated to advance the 29 Key Everglades Restoration Projects identified in Governor DeSantis' ***Achieving More Now for Florida's Environment*** in addition to ensuring support of key activities within its core mission: restoration of water resources and ecosystems, flood protection, water supply and natural systems / water quality.

The Strategic Plan is a key component of the District's integrated business cycle. It establishes the overall policy direction and strategic priorities set by the Governing Board to carry out the agency's core mission responsibilities. Serving as the agency blueprint for long-term planning and implementation, the Strategic Plan provides overarching guidance in development of the annual budget and work plan and the success indicators used for measuring progress.

The District has developed and the Governing Board has approved the Fiscal Year 2020-2025 Strategic Plan, which is available online at *www.sfwmd.gov*. This Strategic Plan reflects the District's commitment to meeting the four core mission areas outlined below.

1. Restoration of Water Resources and Ecosystems (Natural Systems / Water Quality): Safeguarding and Restoring South Florida's Delicate Ecosystem.

2. Flood Protection: Protecting South Florida's Communities from Flooding, Ensuring and Managing Water Flow.

3. Water Supply: Ensuring Water for South Florida's Communities.

4. Public Engagement & Administration: Delivering Efficient and Cost-Effective Services on Behalf of South Florida Citizens.

AMERICAN OVERSIGHT

III. BUDGET HIGHLIGHTS

Area of Responsibility (AOR)	Strategic Plan Goal	Fiscal Year 2020-21 Preliminary Budget
Restoration of Water Resources and Ecosystems (Natural Systems / Water Quality): Expediting critical Everglades restoration projects by:	• Advancing the 29 Key Everglades Restoration Projects identified in Governor DeSantis' *Achieving More Now for Florida's Environmen*t Executive Order • Maximizing use of available water storage features, such as reservoirs and flow equalization basins (FEBs) • Implementing solutions to improve water quality treatment, reduce nutrient loads and reduce the likelihood of harmful algal blooms • Managing invasive exotic and nuisance vegetation • Increasing access and recreational opportunities on public lands, when it does not conflict with restoration efforts	$606,134,408
Flood Protection: Refurbishing, replacing, improving and managing the components of our water management system by:	• Implementing flood protection infrastructure refurbishment projects • Incorporating new works into water management system operations • Operating the water management system to meet flood protection and water supply needs into the future considering sea level rise and the impacts of a changing climate • Coordinating with the U.S. Army Corps of Engineers on infrastructure inspections and results • Coordinating with state/federal partners and assisting local governments to determine level of flood protection • Optimizing infrastructure maintenance by adhering to, or exceeding, industry standards and best practices	$167,391,438
Water Supply: Meeting the water needs of the environment and preparing for current and future demands of water users by:	• Encouraging development of alternative water supply projects to diversify water supply • Planning for region's water resource needs with consideration for challenges of climate change and sea level rise • Developing and implementing regional water supply plans in coordination with local governments and the public • Promoting water conservation measures • Utilizing regulatory permitting and compliance authority • Using water reservation and minimum flow & minimum water level authorities to protect water for natural systems	$210,435,789
Public Engagement & Administration: Ensuring South Florida taxpayers receive efficient and effective customer service by:	• Focusing resources on core functions, minimizing administrative costs and measuring performance • Ensuring accountability, transparency and public involvement in agency decisions • Employing and developing a high-quality, diverse workforce	$39,108,329

III. BUDGET HIGHLIGHTS

C. Budget Summary

1. Overview

The Fiscal Year 2020-21 Preliminary Budget demonstrates the District's commitment to protecting Florida's water and restoring water resources. The District continues to focus on mission critical areas, completing District projects and funding capital investment in the region.

The Fiscal Year 2020-21 Preliminary Budget is $1,023,069,964 which is $33,273,310 (3.4 percent) higher than the Adopted Fiscal Year 2019-20 Budget of $989,796,654. The increase is primarily due to additional state funds from the Governor's 2020 Proposed Budget, and fund balance included in the budget for projects. The District's largest revenue sources are state sources ($435,535,207), ad valorem property taxes ($286,938,400), and prior year cash balances ($226,773,544).

The Fiscal Year 2020-21 Preliminary Budget includes $286,938,400 of ad valorem property tax revenue. This estimated ad valorem revenue is based on rolled-back millage rates with modest estimated growth in new construction to offset the reduction from the Value Adjustment Board petition hearing decisions. Estimated ad valorem revenues are $286,938,400 (28 percent) of total projected revenue sources, compared to $284,266,900 (28.7 percent) of the Fiscal Year 2019-20 Adopted Budget.

Total anticipated state sources in the Fiscal Year 2020-21 Preliminary Budget are $435,535,207 (42.6 percent) and the total estimated federal sources are $9,411,305 (0.9 percent). In the Fiscal Year 2019-20 Adopted Budget, the total state sources are $424,711,718 (42.9 percent) and the federal sources are $9,155,354 (0.9 percent).

The revenue sources that make up the remaining portion of the Fiscal Year 2020-21 Preliminary Budget are agricultural privilege taxes, permit fees, reserves, and other sources for $290,715,852 which represent 28.4 percent of the total budget, up from the $269,833,482 or 27.3 percent of the Fiscal Year 2019-20 Adopted Budget for the same revenue sources, due to the higher allocated reserves.

In accordance with Section 373.536(5), F.S., the District is submitting this Fiscal Year 2020-21 Preliminary Budget for legislative review on January 15, 2020. The table on the following page provides a summary of the source and use of funds, fund balance, and workforce and includes a comparison of the Fiscal Year 2019-20 Adopted Budget to the Fiscal Year 2020-21 Preliminary Budget.

2. Adequacy of Fiscal Resources

Evaluation of Fiscal Resources Over a Five-Year Horizon:

The evaluation of fiscal resources over a five-year span is required to ensure sustainable funding for all projects and plans set forth by the District. This evaluation includes the District's long-term funding plan, demonstrating the District's ability to adequately address the core mission AORs.

The District's Fiscal Year 2020-21 Preliminary Budget of $1,023,069,964 and future years horizon is focused on ongoing progress in environmental restoration and water resource projects throughout South Florida while ensuring the District continues to deliver on its mission-critical responsibilities, strategic priorities of flood control, water supply, water quality and natural systems.

Fiscal Year 2020-21 Preliminary Budget development was discussed October through January. There are several revenue and resource uncertainties such as growing health insurance costs, assurance of outstanding federal revenues from the USACE for OMRR&R cost share, the impacts of Value Adjustment Board (VAB) petition hearings, New Construction growth of Ad Valorem, and appropriations from the 2020 Legislative Session. District staff will continue to work with the Governing Board, FDEP and USACE on these uncertainties during the remainder of the budget development cycle up through the adoption of the Fiscal Year 2020-21 budget. Pending the closing of Fiscal Year 2018-19 Additional direction on usages of reserve balances and any recurring revenues to implement the District's mission-critical responsibilities may be discussed prior to the Fiscal Year 2020-21 tentative and final budget adoption in September. For the current Fiscal Year 2020-21 development and future budgets, the District will align available sources to focus support of Governor DeSantis' Achieving More Now for Florida's Environment Executive Order.

As illustrated in the long-term funding plan graph presented later in this section, over the next five-years, the District's reserve balances have been dedicated to multi-year projects/efforts necessary to improve the quantity, quality, timing and distribution of water in the Northern and Southern Everglades and implementation of improvements to support the operation and maintenance of the water management system. The District's projected recurring revenues are projected to be equivalent to its operating expenses.

District Revenue Sources:

Ad Valorem Tax Revenue

The District continues the commitment to deliver on our core mission functions while delivering efficient and cost-effective services on behalf of South Florida taxpayer investments. Fiscal Year 2020-21 Preliminary Budget estimates $286,938,400 which is $2,671,500 more than the Fiscal Year 2019-20 Adopted revenue of $284,266,900. The estimated increase of $2,671,500 includes conservative new construction growth estimates and moderate impacts from Value Adjustment Board petition hearing impacts. As part of the anticipated recurring revenue sources, the following five-year expenditure and revenue financial forecast table includes revenue growth estimates based on the Office of Economic and Demographic Research (EDR) estimates. The growth in ad valorem revenue is used to

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006319

fund Operations and Maintenance of new facilities projected to come online and refurbishment projects in support of the Operations and Maintenance capital program of the water management system.

The District's work is achieved through ad valorem revenues and continued support from the Florida Legislature through state appropriations. The District also relies on federal and local funding sources, reserve balances, fees, investment earnings and agricultural privilege taxes to deliver the current level of service to our customers.

State Revenue Sources

The District's 2020-21 Preliminary Budget contains $435,535,207 in state revenue sources: $102,624,918 from prior year state appropriations, $7,012,200 from Florida Fish and Wildlife Conservation Commission, $200,000 Everglades License Tag, $124,230 from FDACS for prescribed burns and $322,939,991 proposed new state revenues released by the Governor in November to be evaluated during the upcoming 2020 Legislative Session. The proposed Legislative funding includes the continuation of land management, the Restoration Strategies Plan for addressing Everglades water quality, Comprehensive Everglades Restoration Plan (CERP) projects such as the Everglades Agricultural Area Storage Reservoir, C-43 West Basin Storage Reservoir, planning of future CERP projects, and for Northern Everglades & Estuaries Protection Program projects such as Dispersed Water Management and the Lakeside Ranch Stormwater Treatment Area.

Future state revenue source requests are consistent to support multi-year restoration projects such as Restoration Strategies, CERP in accordance with the integrated delivery schedule, dispersed water management recurring operational requirements and Northern Everglades. The Everglades restoration state appropriations are classified as recurring over this five-year horizon in support of the Governor's Executive Order 19-12.

Future state sources for non-project related expenses such as land acquisition trust fund for land management and dispersed water management operations and Florida Fish and Wildlife Conservation Commission revenues for exotic and aquatic plant control are classified as recurring state sources to cover recurring expenses.

The District works cooperatively with FDEP prior to the Legislative Session to provide the upcoming multi-year project needs through a legislative budget request as well as with Florida Fish and Wildlife to identify upcoming exotic and aquatic plant control work plan tasks. The District's funding requests to the Florida Legislature support continued commitment to Everglades Restoration for Restoration Strategies, CERP, NEEPP and land management.

Other Revenue Sources

Other sources include environmental resource, water use, compliance and right-of-way permit fees, lease revenue, investment earnings, local and federal sources, surplus sale of District property. Fiscal Year 2020-21 projected forecasts include increases in ERP and Right of Way permits of $130,000 based on permit trends and activity. Federal revenues from USACE are forecasted to increase in Fiscal Year 2020-21 by $1,673,236 and continue to increase over the five-year horizon for the OMRR&R cost share, mostly for CERP new works planned to come online over the next five years. The receipt of federal revenues from USACE continue to have uncertainties. Other Federal revenue forecasts have declined

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006320

$1.4 million from NRCS, FEMA, and DOI from Fiscal Year 2019-20 due to coverage of one-time project activities.

Accumulated Reserves

The District categorizes Reserves into two groups to aid with Governing Board discussions - **with** restrictions and **without** restrictions.

- With Restrictions – fund balances that Governing Board has limited allocation authority due to pre-defined restrictions.

- Without Restrictions – fund balances that Governing Board has discretionary allocation authority.

The District's total unaudited prior year accumulated Reserves at this time is $405,885,498. The $405,885,498 is comprised of $20,597,011 of non-spendable Reserves, $254,915,958 of Reserves with restrictions and $130,372,529 of Reserves without restrictions. The $20,597,011 of non-spendable funds represents the value of inventory on hand such as fuel and chemicals, and wetlands mitigation permanent fund for long term land management on specific wetland mitigation projects and bank. The non-spendable funds are not available to be used on projects and have not been included in the Long-Term Funding Graph nor the District's 5-Year Reserve Allocation.

The remaining reserve balance amount of $385,288,487 is available for usage towards funding the Districts future budgets, but some of the funds have restrictions on their usages. $254,915,958 of the available Reserves with restrictions may only be used on expenses as defined by the source. Balances are listed below and are included in the Projected Utilization of Reserves Table:

The Fiscal Year 2020-21 Preliminary Budget includes $226,773,544 from accumulated Reserves; $40,164,352 are Reserves without restrictions and $186,609,192 are Reserves with restrictions. At the Governing Board's direction, $61,255,337 of restricted Reserves are maintained annually to address hurricane/tropical weather impacts or emergencies.

It is assumed at the end of the five-year plan, the Hurricane/Emergency Reserves of $61,255,337 will be re-appropriated within each fiscal year and remain available in addition to the $36,072,060 retained (excludes the $20,597,011 non-spendable), unless needed or appropriated by the Governing Board prior to the Adopted Budget. More detail on the retained balances follow.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006322

Long-term Funding Plan

The District continues to look for efficiencies and cost saving measures. The District has also taken measures, as indicated in the 5-Year Reserve Allocation, to set aside sufficient reserve balances. To stay abreast of future increases, the District has developed a financial forecast to project estimated long-term revenue and expenditures for the operations and maintenance and monitoring of newly completed restoration projects, Everglades Restoration, flood control system capital refurbishment, Big Cypress Basin operations, and Restoration Strategies. The District's reserve balances have been dedicated to multi-year projects/efforts necessary to improve the quantity, quality, timing and distribution of water in the Northern and Southern Everglades and implementation of improvements to support the operation and maintenance of the water management system. Additionally, at any time and in accordance with Chapter 373, F.S., the District Governing Board may also change the priorities and usages of the remaining cash balances as the 5-Year reserves allocations are planned usages.

III. BUDGET HIGHLIGHTS

Below is a graph that displays the Fiscal Year 2020-21 Preliminary Budget and proposed expense and revenue growth through Fiscal Year 2024-25. The bars represent expenses and the lines represent the projected revenues with the use of Reserves filling in for the revenue gap. The information in the graph below shows the rates at which Reserves (not including Nonspendable) are projected to being spent down, with an assumption of $97,327,397 fund balance retained due to restricted, committed, or assigned uses after Fiscal Year 2024-25. The $97,327,397 includes $61,255,337 for Emergency Reserves; $8,284,319 for future land acquisitions from sale of surplus land sales, $3,724,321 for Everglades License Tag and Alligator Alley for conservation and protection of the Everglades; $6,762,038 lake belt mitigation funds to cover lake belt committee priorities, C-139 restoration project and land management as well as wetlands mitigation funds to cover future land management on wetlands projects and banks; $7,512,308 from lease revenues including leases on lands purchased with federal funds; $734,339 of Big Cypress Basin funds for the Basin Board to allocate for priorities; $8,743,555 to cover actuarially determined Self-Insurance Liabilities and Office of Insurance Regulation Health Insurance Claims requirements; $69,951 for Florida Bay Seagrass Monitoring and $241,229 for budget stabilization, to cover unanticipated revenue shortages or costs, and for future allocation by the District Governing Board for priorities. The $61,255,337 hurricane/emergency reserve is shown re-budgeted every year in anticipation of not having to utilize the authority.

* The Use of Reserves line represents the amount above (beyond) the Anticipated Revenues that will be required to meet both the Recurring and Non-Recurring costs for each fiscal year. This amount is provided above the column for each fiscal

III. BUDGET HIGHLIGHTS

C. Budget Summary

4. Major Source of Funds Variances

This narrative describes major revenue variances between the Adopted Budget for Fiscal Year 2019-20 and the Preliminary Budget for Fiscal Year 2020-21 by revenue source.

District Revenues

- Estimated ad valorem revenues in the Preliminary Budget increased by $2.6 million (0.9 percent) over the current fiscal year. The Fiscal Year 2020-21 Preliminary Budget estimates Ad Valorem Taxes of $286.9 million which is $2.6 million more than the Fiscal Year 2019-20 Adopted Ad Valorem Taxes of $284.3 million. The estimated increase of $2.6 is the net impact of new construction growth and reductions from Value Adjustment Board petition hearings.

- Estimated non-ad valorem Agricultural privilege taxes in the Fiscal Year 2020-21 Preliminary Budget is the same amount as the Fiscal Year 2019-20 Adopted Budget.

- The permit, license and fees category contain right of way, water use permit and environmental resource permit fees. The budget for permit fees shows a net decrease of $79,700 from the current budget. Estimates for ERP and Right of Way permits are higher by $100,000 and $30,000 respectively. Compliance fees amount of $209,700 was moved to miscellaneous revenues below. Lake Belt mitigation funds are not included and will be budgeted for activities based on the actions of the Lake Belt Mitigation Committee. The District administers the Lake Belt Mitigation Trust Fund pursuant to Section 373.41495, F.S.

- Miscellaneous revenues reflect an estimated $49.5 million in Fiscal Year 2020-21 which is the same as was reflected in the Fiscal Year 2019-20 Adopted Budget. The components of the estimated $49.5 million include $34.5 million for the District's Health/Self Insurance contribution, $7.9 million for Investment Earnings, $6 million for Leases, $330,000 for Sale of District Assets/Property, $209,700 for Compliance Fees, and $446,000 of miscellaneous sources.

Reserves

- The appropriated reserves included in the Fiscal Year 2020-21 Preliminary Budget increased $21 million (10 percent) from the amount used in Fiscal Year 2019-20 Adopted Budget based on updated project needs and timelines for Restoration Strategies and Everglades Restoration.

Debt

- The Fiscal Year 2020-21 Preliminary Budget includes no new debt.

AMERICAN OVERSIGHT

Local Revenues

- At this time, funds expected from cooperative agreements with local agencies decreased by $1.4 million. That change includes a cooperative agreement with Miami-Dade County for $1.3 million on Cutler Bay Wetland design for Fiscal Year 2019-20, which at this time is expected to be executed in the current year. Staff has not yet determined what, if any, amount will be in Fiscal Year 2020-21. Also, $60,000 was moved to Other State Revenues for the Model Archive project with the other Water Management Districts and the State.

State Revenues

- General revenues of $55.5 million in the Preliminary Budget decreased by $88.5 million from the Adopted Budget. This decrease is due to removal of the 2019 Legislative Session Specific Appropriations 1640 (Everglades Restoration $69.7 million), 1642A (Lake Okeechobee Watershed $50 million), 1641 (Northern Everglades and Estuaries $4.7 million). These amounts net against rebudget of $40 million of 1642A and $15 million from the Governor's proposed 2020 budget. $0.5 million remains for Corbett Levee from the 2016 Legislative Session Specific Appropriation 1600A and proposed new funding (SA1621) of $1.7 million for NEEPP for Grassy Island FEB project.

- Land Acquisition Trust Fund amount of $369.4 million is $102.1 million (38.2 percent) higher than the Adopted Budget. The increase is due to inclusion of the Governor's proposed budget for 2020 state appropriations. Included in this amount is $254.6 million for CERP (SA 1620) including $140.5 million for C-43 Reservoir, $32 million recurring funds for Restoration Strategies, $64 million for the Everglades Agricultural Area Storage Reservoir Conveyance Improvements and Stormwater Treatment Area, $4 million for CERP Planning and $11.9 million for land acquisition and $3 million for C-44/C-23 Interconnect. $45.3 million (SA1621) for NEEPP which includes $28.5 million for Dispersed Water Management Program. Also included are $2.3 million for land management, $5 million (SA 1616) for Dispersed storage and $62.1 million rebudget of Fiscal Year 2019-20 appropriations balance.

- Save Our Everglades Trust Fund (SOETF) amount of $668,382 shows a decrease of $2.5 million (79 percent) in the Fiscal Year 2020-21 Preliminary Budget. This variance resulted from removal of 2019 State Appropriation 1640 ($3 million) for CERP and a grant ($188,625), and addition of the Governor's proposed budget ($668,382) for Restoration Strategies Regional Water Quality Plan.

- The budget for Alligator Alley tolls is $2.5 million, 2.8 percent decrease over the Fiscal Year 2019-20 Adopted Budget and is based on the amount in the Memorandum of Agreement with the state.

- Other state revenue of $7.5 million decreased by $232,503 (3 percent) from Fiscal Year 2019-20 Adopted Budget. The decrease is due primarily to removal of $300,000 of Water Protection and Sustainability Trust funds appropriated in the current year. The Other State revenue category includes $7.4 million from FWC for vegetation management, $124,230 from FDACS for prescribe burns and $278,788 of License Tag revenue for Everglades and Indian River Lagoon.

AMERICAN OVERSIGHT

Federal Revenues

- Federal revenues in the Fiscal Year 2020-21 Preliminary Budget decrease by $255,951 or 2.8 percent from the Adopted Budget. A grant from NRCS decreased by $1,057,685 million as did a DOI grant for $284,600 and $75,000 from FEMA for a total reduction of $1,417,285 for the three grants. Federal funds increased by $1,673,236 in projected funds to be reimbursed from the USACE for Operation, Maintenance, Repair, Replacement and Rehabilitation (OMRR&R) Costs related to completed CERP and foundation projects. This increase reflects the calculated revenue based on reimbursement agreements with the USACE.

AMERICAN OVERSIGHT

C. Budget Summary

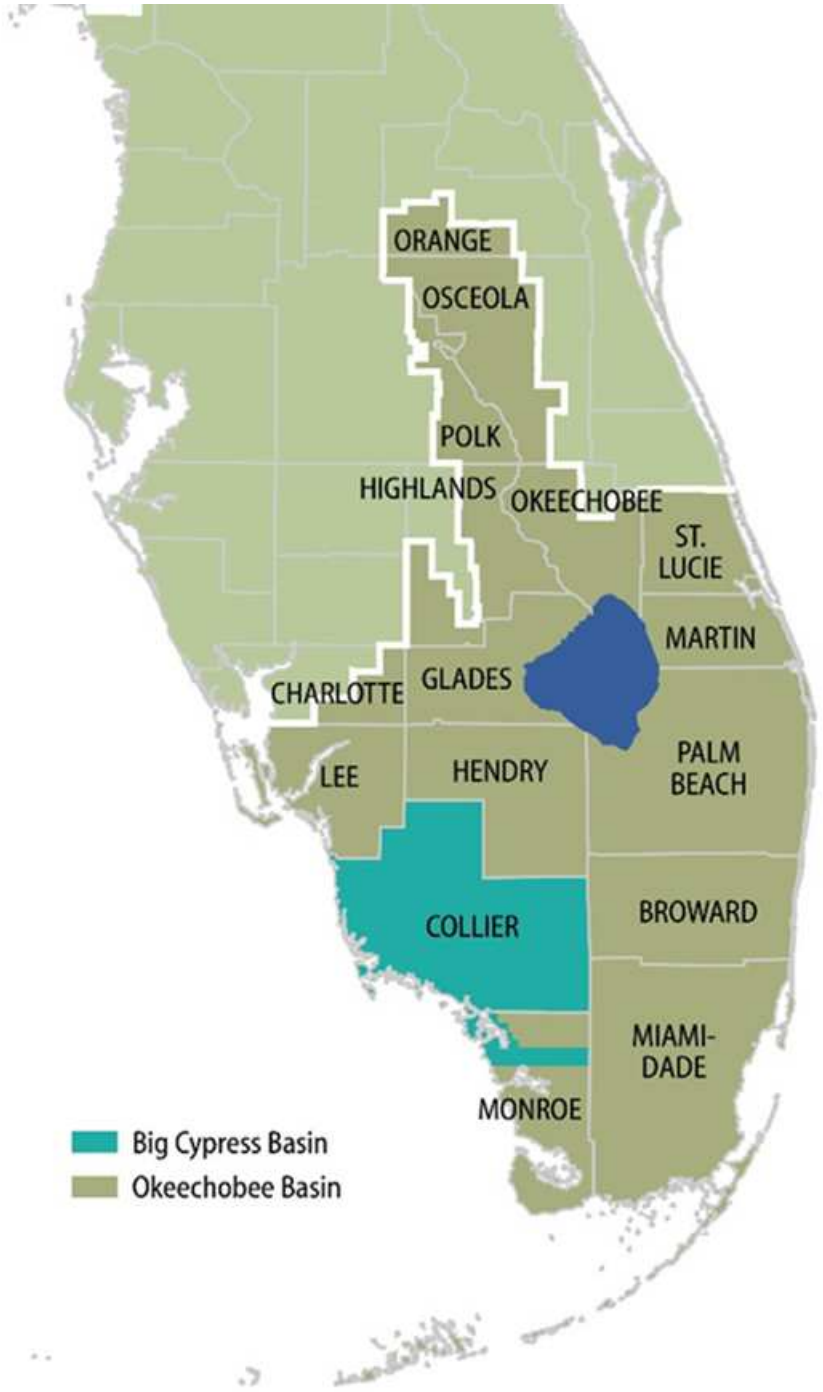
6. Proposed Millage Rates

Ongoing policy direction is to levy rolled-back millage rates. In accordance with Florida Statute, the rolled-back millage rate is calculated in the following manner:

> *The form on which the certification is made shall include instructions to each taxing authority describing the proper method of computing a millage rate which, exclusive of new construction, additions to structures, deletions, increases in the value of improvements that have undergone a substantial rehabilitation which increased the assessed value of such improvements by at least 100 percent, property added due to geographic boundary changes, total taxable value of tangible personal property within the jurisdiction in excess of 115 percent of the previous year's total taxable value, and any dedicated increment value, will provide the same ad valorem tax revenue for each taxing authority as was levied during the prior year less the amount, if any, paid or applied as a consequence of an obligation measured by the dedicated increment value. That millage rate shall be known as the "rolled-back rate." [Excerpt from section 200.065(1), F.S.]*

When certified property values are received from the property appraisers in July, the datum from all counties in the District's jurisdiction is compiled and calculated to determine the rolled-back rates for the District. The annual property tax cycle known as TRIM (Truth in Millage) as defined by Florida Statute begins with the certification of taxable values every July 1st so taxing authorities can determine the millage rates to levy ad valorem taxes.

The District continues the commitment to deliver on our core mission functions while delivering efficient and cost-effective services on behalf of South Florida taxpayer investments. The Fiscal Year 2020-21 Preliminary Budget estimates $286,938,400 which is $2,671,500 more than the Fiscal Year 2019-20 Adopted revenue of $284,266,900. The estimated increase of $2,671,500 includes conservative new construction growth estimates and moderate impacts from Value Adjustment Board petition hearings.



Pursuant to section 373.503(3), F.S., taxes levied by each (water management district) Governing Board may be separated into a millage necessary for the purposes of the District and a millage necessary for financing basin functions. The tax levies of the South Florida Water Management District are set by the Governing Board for each of the two basins within the District: the Okeechobee Basin and the Big Cypress Basin. Each basin millage rate is then combined with an overall "District-at-large" millage rate which determines the total millage to be assessed upon property owners within each basin.

The following table illustrates the estimated ad valorem tax revenue for the Fiscal Year 2020-21 Preliminary Budget. The net increase of 0.9 percent over the current year adopted ad valorem tax revenue is the combined result of conservative new construction growth, and a moderate impact from the Value Adjustment Board (VAB) petition hearings.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006335

III. BUDGET HIGHLIGHTS

The estimated rolled-back millage rates in the following table for Fiscal Year 2020-21 are based on a combination of estimated data from the Office of Economic and Demographic Research and trend analysis. Actual rolled-back millage rates will be calculated in July following the certification of tax rolls by each county property appraiser in the District's jurisdiction.

C. Budget Summary

8. Major Use of Funds Variances

The table below illustrates major variances between the Adopted Budget for Fiscal Year 2019-20 and the Preliminary Budget 2020-21 highlighting significant variances at the program level. Each of these major variances is explained below the table.

Expenditures by Program	Fiscal Year 2019-20 (Adopted)	Fiscal Year 2020-21 (Preliminary Budget)	Difference in $ (Preliminary -- Adopted)	% of Change (Preliminary -- Adopted)
1.0 Water Resources Planning and Monitoring	$54,299,689	$51,660,435	($2,639,254)	-4.9%
2.0 Land Acquisition, Restoration and Public Works	$564,625,144	$590,300,595	$25,675,451	4.5%
3.0 Operation and Maintenance of Lands and Works	$310,215,112	$319,000,727	$8,785,615	2.8%
4.0 Regulation	$21,767,846	$21,876,907	$109,061	0.5%
5.0 Outreach	$1,214,274	$1,122,971	($91,303)	-7.5%
6.0 District Management and Administration	$37,674,589	$39,108,329	$1,433,740	3.8%
Total	**$989,796,654**	**$1,023,069,964**	**$33,273,310**	**3.4%**

1.0 Water Resources Planning and Monitoring

The Fiscal Year 2020-21 Preliminary Budget is $51.7 million, which is a 4.9 percent ($2.6 million) decrease from the Fiscal Year 2019-20 Adopted Budget of $54.3 million. The reduction is primarily due to decreases in Fixed Capital Outlay ($1.9 million) for Central Florida Water Initiatives in the current budget. In addition, model development for Coastal Resilience ($950,000) was moved from Contracted Services in this program to Operations & Maintenance of Lands and Works Program. Interagency Expenditures decrease ($455,810) is due primarily to removal of fund balance in the current budget planned for Indian River Lagoon initiatives. Operating Capital Outlay decrease ($69,500) results from one-time funding to be used for equipment purchase in the current year. Operating Expense decrease ($128,500) is primarily for tools, field and lab supplies expected to be acquired in the current year for monitoring and assessment. The only increase is in Salaries & Benefits ($420,073) and is due to turnover in positions and the hiring process, forecasted increase in FRS contributions and a job study. The job study was conducted comparing the District to other governmental agencies across the State of Florida, resulting in select job categories increasing to more competitive levels while FTEs at or above the job study levels were not increased.

2.0 Land Acquisition, Restoration and Public Works

The program's Fiscal Year 2020-21 Preliminary Budget is $590.3 million, which is $25.7 million, or a 4.5 percent increase from the Adopted Budget for Fiscal Year 2019-20 of $564.6 million. The increase of $61.2 million in Fixed Capital Outlay, as well as decreases in Contracted Services ($3.1 million), Operating Expenses ($4.2 million), Operating Capital Outlay ($7.4 million), and Interagency Expenditures ($21 million), totaling $36 million, are primarily due to new and prior year state appropriated funding, as well as shifts in state and one-time fund balance cash flow requirements across the expense categories for the implementation of CERP/CEPP, Restoration Strategies, NEEPP, and Alternative Water Supply. Increases in Salaries and Benefits ($239,516) are due to turnover in positions and the hiring process, forecasted increase in FRS contributions and a job study. The job study was conducted comparing the District to other governmental agencies across the State of Florida, resulting in select job categories increasing to more competitive levels while FTEs at or above the job study levels were not increased.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006340

3.0 Operation and Maintenance of Lands and Works

The program's Fiscal Year 2020-21 Preliminary Budget is $319 million, which is a $8.8 million, or a 2.8 percent increase from the Adopted Budget for Fiscal Year 2019-20 of $310.2 million. The largest increase is in Operating Capital Outlay of $6 million and is primarily due to the additional Lake Belt Mitigation funds for the on-going design and construction on the C-139 Annex Restoration project in addition to Operations and Maintenance Refurbishment Program projects moving into the design phase. Increases in Operating Expenses of ($9.7 million) are primarily due to new works of the District coming online as well as ongoing repairs and maintenance of the C&SF System and Operations and Maintenance Refurbishment Program. Contracted Services decreased ($3.7 million) primarily due to the decrease in multi-year project needs for the Operations Decision Support System, the Vertical Datum (NAVD88) upgrades, Lake Belt Monitoring needs and planning and field investigations for coastal resiliency projects. An overall decrease in Fixed Capital Outlay of ($4.4 million) reflects the Operations and Maintenance Refurbishment Programs multi-year project cash flow requirements for completion, continuation of design and construction requirements for the first-year construction for projects underway. Salaries and Benefits has a 1.6 percent ($1.1 million) increase due to additional staff being allocated to support the program and turnover in positions and the hiring process, forecasted increase in FRS contributions and a job study. The job study was conducted comparing the District to other governmental agencies across the State of Florida, resulting in select job categories increasing to more competitive levels while FTEs at or above the job study levels were not increased.

4.0 Regulation

The program's Fiscal Year 2020-21 Preliminary Budget is $21.9 million, which represents a $109,061 or a 0.5% increase from the Adopted Budget for Fiscal Year 2019-20 of $21.7 million. The increase is primarily attributed to ($326,761) in Salaries and Benefits due to turnover in positions and the hiring process, forecasted increase in FRS contributions and a job study. The job study was conducted comparing the District to other governmental agencies across the State of Florida, resulting in select job categories increasing to more competitive levels while FTEs at or above the job study levels were not increased. There was also an increase in Operating Expenses ($59,500) tied to flight operation service costs. There is a reduction in Contracted Services ($277,200) due to the Regulation software upgrade to the e-Permitting system eliminating the need for IT consulting services and has offset a large majority of other increased costs.

5.0 Outreach

The program's Fiscal Year 2020-21 Preliminary Budget is $1.1 million, which is a $91,303 or a 7.5 percent decrease from the Adopted Budget for Fiscal Year 2019-20 of $1.2 million. The variance is due primarily to a ($125,000) decrease in Contracted Services for a one-time outreach activity. Increases in Salaries and Benefits ($33,697) are due to turnover in positions and the hiring process, forecasted increase in FRS contributions and a job study. The job study was conducted comparing the District to other governmental agencies across the State of Florida, resulting in select job categories increasing to more competitive levels while FTEs at or above the job study levels were not increased.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006341

6.0 District Management and Administration

The program's Fiscal Year 2020-21 Preliminary Budget is $39.1 million, which is a $1.4 million or a 3.8 percent increase from the Adopted Budget for Fiscal Year 2019-20 of $37.7 million. The increase is a result of a ($687,500) increase in Operating Capital Outlay primarily due to telemetry equipment. There is a ($563,480) increase in Contracted Services for IT consulting services for enterprise software development, a ($15,236) increase in Operating Expenses for computer software maintenance, and a ($167,434) increase in Salaries and Benefits due to turnover in positions and the hiring process, forecasted increase in FRS contributions and a job study. The job study was conducted comparing the District to other governmental agencies across the State of Florida, resulting in select job categories increasing to more competitive levels while FTEs at or above the job study levels were not increased. Also, the budgeted salaries for vacant positions in the FY2020-21 Preliminary budget were increased based on the job study.

AMERICAN OVERSIGHT

IV. PROGRAM ALLOCATIONS

A. Program and Activity Definitions, Descriptions and Budget

This section provides the Fiscal Year 2020-21 Preliminary Budget organized by program and activity. The water management districts are responsible for six program areas pursuant to Subsection 373.536(5)(e)4, Florida Statutes: Water Resources Planning and Monitoring; Land Acquisition, Restoration, and Public Works; Operation and Maintenance of Works and Lands; Regulation; Outreach; and District Management and Administration.

The following information is provided for all PROGRAMS:

- Program by Expenditure Category
- Source of Funds
- Rate, Operating and Non-Operating
- Workforce
- Reductions - New Issues Summary

In addition, for each PROGRAM, ACTIVITY, and SUB-ACTIVITY, narratives include a Program Title, District Description, Changes and Trends, Budget Variances and Major Budget Items.

The following information is provided for each ACTIVITY and SUB-ACTIVITY:

- Activity (or Sub-activity) by Expenditure Category
- Source of Funds
- Operating and Non-Operating Expenses

IV. PROGRAM ALLOCATIONS

1.0 Water Resources Planning and Monitoring

This program includes all water management planning, including water supply planning, development of minimum flows and levels, and other water resources planning; research, data collection, analysis, and monitoring; and technical assistance (including local and regional plan and program review).

District Description

This program encompasses a broad scope of activities including water supply planning, minimum flows and levels and other water resources planning. This includes the stormwater projects, cooperative funding, water supply plan development, hydrogeologic data collection, Caloosahatchee peer review, nutrient budget analysis for the St. Lucie watershed, research and monitoring and support of St. Lucie and Caloosahatchee Rivers watershed protection plan implementation, Florida Bay trend assessments and modeling, and Indian River Lagoon National Estuary Program. The program also supports research, data collection and analysis and monitoring for ongoing C&SF project, water quality monitoring, flood protection level of service modeling and analysis, STA operations and monitoring, everglades research and evaluation.

Continuing efforts include implementing and updating the plans described above as required, monitoring inflow and nutrient loading to Lake Okeechobee and the Northern Estuaries, and evaluating progress towards meeting the new phosphorus criterion for the Everglades, as well as levels and limits set by the Everglades Settlement Agreement.

Working proactively on the “front end” of the planning and evaluation processes, collaboratively addressing water resource issues, and building successful alliances continues to be an important policy direction. Since the adoption of the Community Planning Act the number of requests for technical assistance has increased.

IV. PROGRAM ALLOCATIONS

South Florida Water Management District
REDUCTIONS - NEW ISSUES
1.0 Water Resources Planning and Monitoring
Fiscal Year 2020-21
Preliminary Budget - January 15, 2020

	FY 2019-20 Budget (Adopted)		**235**	**54,299,689**	
	Reductions				
Issue	Description	Issue Amount	Workforce	Category Subtotal	Issue Narrative
Salaries and Benefits			-	-	
Other Personal Services				-	
Contracted Services				(2,045,803)	
1	Decrease in C&SF Monitoring & Assessment	(480,000)			Removal of one time fund balance for sediment discharge in St.Lucie/Caloosahatchee ($450,000); BCB Structure Rate development reduced ($60,000) netted against increase for Actual ET Data Acquisition $30,000.
2	Decrease in Central Florida Coordination	(245,476)			Central Florida Water Initiative project balance for on-going work in the current year is not included in the FY21 budget at this time ($245,476).
3	Decrease in Everglades Research & Evaluation - Ecosystem Response to Hydrology	(6,000)			Tree Island Nutrient Analysis contract is budgeted for the current year but not next year ($6,000).
4	Decrease in Everglades Research & Evaluation - Multi-Disciplinary Research	(121,827)			Fund balance for Active Marsh Improvement in Water Conservation Area budget in the current year was removed from the Preliminary budget ($121,827).
5	Decrease in Lake Okeechobee In-Lake Assessment	(172,500)			Lake Okeechobee In Lake Assessment shows a decrease in fund balance for Lake Okeechobee Sediment Map & Nutrient Flux (150,000) and Lake Okeechobee/St Lucie/Caloosahatchee Algae Bloom ($65,000). These decreases netted against an increase of $42,500 for Lake Okeechobee Aerial Imagery resulting in an overall decrease of $172,500.
6	Decrease in Regional Modeling - Model Implementation/Applications	(950,000)			Model development for Coastal Resilience which was moved to Operations and Maintenance of Lands & Works Program ($800,000) and BCB LOS model refinement ($150,000).
7	Decrease in Regional Modeling - Model Maintenance/Enhance	(50,000)			Reduction in funds for Emergency Modeling Tool which is also in the current year budget ($50,000).
8	Decrease in SLR & IRL Development/Implementation Source Control Strategies	(20,000)			Fund balance decrease in Source Control Strategies is for NEEPP SLRW ($20,000).
Operating Expenses				(162,000)	
9	Decrease in Central Florida Coordination	(30,000)			Reduction in travel and other operating estimates for Central Florida Water Initiative for next year ($30,000).
10	Decrease in Everglades Program Support	(77,000)			Float equipment planned to be acquired in the current year ($67,100).
11	Decrease in Lake Worth Lagoon Local Initiatives	(55,000)			Equipment, parts and supplies for SCADA Still Well planned to be acquired in the current year ($55,000).
Operating Capital Outlay				(77,500)	
12	Decrease in Caloosahatchee River & Estuary - Estuary Protection Plan	(3,500)			Chlorophyll Probe planned to be acquired this year ($3,500).
13	Decrease in Lake Okeechobee Water Quality Assessment and Reporting	(34,000)			Streamgauge field equipment for Lakeside Ranch planned to be purchased in the current year ($34,000).
14	Decrease in Lake Worth Lagoon Local Initiatives	(40,000)			Equipment for SCADA Still Well planned to be acquired in the current year($40,000).
Fixed Capital Outlay				(1,932,314)	
15	Decrease in Central Florida Coordination	(1,857,314)			Staff has not yet determined how much of the current year fund balance for the Central Florida Coordination Project may need to be in the FY21 budget ($1,857,314).
16	Decrease in Lake Worth Lagoon Local Initiatives	(75,000)			Monitoring contract for SCADA Still Well planned for the current year($75,000). Possible coded to the incorrect expense category.
Interagency Expenditures (Cooperative Funding)				(669,212)	
17	Decrease in Indian River Lagoon License Tag Program	(169,212)			Decrease in Indian River Tag Program due to available fund balance at this time ($169,212).
18	Decrease in Local Initiatives - Indian River Lagoon Initiatives Team	(500,000)			Fund balance being used in the current year for Indian River Lagoon initiatives ($500,000).

IV. PROGRAM ALLOCATIONS

South Florida Water Management District
REDUCTIONS - NEW ISSUES
1.0 Water Resources Planning and Monitoring
Fiscal Year 2020-21
Preliminary Budget - January 15, 2020

New Issues					
Issue	Description	Issue Amount	Workforce	Category Subtotal	
Salaries and Benefits			-	420,073	Salaries and Benefits increased in the FY2020-21 Preliminary budget for various reasons. Turnover in positions and the hiring process, forecasted increase in FRS contributions and a job study. The job study was conducted comparing the District to other governmental agencies across the State of Florida, resulting in select job categories increasing to more competitive levels while FTEs at or above the job study levels were not increased.
1	Increase in Total Fringe Benefits	290,708			
2	Increase in Total Salaries and Wages	129,365			
Other Personal Services				-	
Contracted Services				1,572,600	
3	Increase in Everglades Construction Project - Analysis & Interpretation	250,000			Water Quality Modeling support for this Everglades project ($250,000).
4	Increase in Hydrogeologic Data Gathering	600,000			Funding for USGS Monitor Well Network, Wellhead surveys ($600,000).
5	Increase in Lake Okeechobee WOD	5,000			Slight increase in contractual services for the Northern Everglades and Estuaries Protection Program ($5,000).
6	Increase in Lake Worth Lagoon Local Initiatives	93,000			Funding for C-51 sediment trap analysis (93,000).
7	Increase in Regional Water Quality Monitoring - Analytical Services Internal	80,000			IT support for Upgrade to Horizon Field App ($80,000).
8	Increase in Regional Water Quality Monitoring - Assessment & Reporting	221,600			Development and analysis of new Nutrient Load Program ($221,600).
9	Increase in Regional Water Quality Monitoring - Field Operations Internal	23,000			C-44 Project STA water quality monitoring contractual services ($23,000).
10	Increase in Water Supply Plan Development	300,000			Funds for update to Water Supply Cost Estimation Survey ($300,000).
Operating Expenses				33,500	
11	Increase in Big Cypress Basin	10,000			Increase in ground and surface water monitoring in Collier County ($10,000).
12	Increase in Caloosahatchee River & Estuary - Estuary Protection Plan	3,500			Water quality instrumentation for the Estuary Protection Plan ($3,500).
13	Increase in Florida Bay and Florida Keys Applied Research & Model Development	10,000			Nitrogen assessment ($5,000) and increase in travel for field work in Florida Bay ($5,000).
14	Increase in Regional Water Quality Monitoring - Analytical Services External	3,000			Planned lab supplies for Allapattah restoration ($3,000).
15	Increase in Regional Water Quality Monitoring - Field Operations Internal	7,000			Funds for C-44 Project STA lab supplies ($4,000) and field supplies for Allapattah restoration ($3,000).
Operating Capital Outlay				8,000	
16	Increase in Lake Okeechobee In-Lake Assessment	8,000			Sediment corer for continual in-house sediment sample collections to evaluate sediment/nutrient fluxes and cyanobacterial dynamics.
Fixed Capital Outlay				-	
Interagency Expenditures (Cooperative Funding)				213,402	
17	Increase in Big Cypress Basin	99,302			Increase funding for intergovernmental projects in Collier County ($99,302).
18	Increase in C&SF Monitoring & Assessment	49,200			increase in USGS groundwater core network monitoring ($49,200).
19	Increase in Florida Bay and Florida Keys Applied Research & Model Development	17,000			Increase in funds for Lakes Trophic Dynamics ($17,000).
20	Increase in Hydrogeologic Data Gathering	15,500			increase in USGS groundwater core network data gathering ($49,200).
21	Increase in Loxahatchee River and Estuary Applied Research & Model Development	1,200			Increase for USGS surface water Loxahatchee MFLs ($1,200).
22	Increase in Regional Water Quality Monitoring - Field Operations Internal	26,500			Funds for C-44 mercury lab analysis ($16,000) and fish collection ($10,500).
23	Increase in SLR & IRL Applied Research & Model Development	2,900			Increase for USGS surface water Indian River Lagoon ($2,900).
24	Increase in SLR & IRL Estuary Protection Plan	1,800			Increase for USGS surface water St. Lucie Estaury ($1,800).

Changes and Trends

In the Fiscal Year 2019-20 Adopted Budget this program reflected an increase in Operating Expenses due to the way our actual insurance expenditures post through payroll, an accounting practice which is continued in the Fiscal Year 2020-21 Preliminary Budget. Postings are based on where staff charges versus where staff is budgeted, coupled with budgeting the Districts full insurance exposure. Fixed Capital Outlay increases over the last several fiscal years are a result of the construction of three monitoring wells for the Central Florida Water Initiative (CFWI). Contracted services increased in Fiscal Year 2019-20 with one-time funding for Operations Emergency Operations Model Forecasting tool, interagency model archiving efforts and mitigation funding in the water conservation area.

This program represents a continued level of service consistent with Fiscal Year 2019-20.

Updates to the District's regional water supply plans have been initiated or planned. The five-year update to the Lower East Coast was completed in the first quarter of Fiscal Year 2018-19. The schedule for completion of the five-year updates are Lower Kissimmee Basin in Fiscal Year 2019-20; CFWI in Fiscal Year 2020-21; Upper East Coast in Fiscal Year 2020-21 and Lower West Coast in Fiscal Year 2022-23.

Budget Variances

The Fiscal Year 2020-21 Preliminary Budget is $51.7 million, which is a 4.9 percent ($2.6 million) decrease from the Fiscal Year 2019-20 Adopted Budget of $54.3 million. The reduction is primarily due to decreases in Fixed Capital Outlay ($1.9 million) for Central Florida Water Initiatives in the current budget. In addition, model development for Coastal Resilience ($950,000) was moved from Contracted Services in this program to Operations & Maintenance of Lands and Works Program. Interagency Expenditures decrease ($455,810) is due primarily to removal of fund balance in the current budget planned for Indian River Lagoon initiatives. Operating Capital Outlay decrease ($69,500) results from one-time funding to be used for equipment purchase in the current year. Operating Expense decrease ($128,500) is primarily for tools, field and lab supplies expected to be acquired in the current year for monitoring and assessment. The only increase is in Salaries & Benefits ($420,073) and is due to turnover in positions and the hiring process, forecasted increase in FRS contributions and a job study. The job study was conducted comparing the District to other governmental agencies across the State of Florida, resulting in select job categories increasing to more competitive levels while FTEs at or above the job study levels were not increased. Also, the budgeted salaries for vacant positions in the FY2020-21 Preliminary budget were increased based on the job study.

Major Budget Items for this program include the following:

- Major Projects under this program are funded with Salaries and Benefits (included in the Salaries and Benefits number above) and Contracted Services.

AMERICAN OVERSIGHT

IV. PROGRAM ALLOCATIONS

Major Budget Items not found in The Major Project Table are provided by budget category below:

- Salaries and Benefits ($25.2 million) (235 FTEs).
- Other Personal Services ($136,580) (1 OPS).
- Contracted Services:
    - C&SF Monitoring Assessment ($671,160)
    - Everglades Construction – Analysis and Interpretation ($279,500).
    - Everglades Research & Evaluation ($469,000)
    - Hydrogeologic Data Gathering ($846,365).
    - Lake Okeechobee Upstream Monitoring ($534,888)
    - Lake Okeechobee In-Lake Assessment ($460,331)
    - Lake Worth Lagoon Initiatives ($100,000).
    - Modeling & Scientific Support ($152,765).
    - Regional Modeling ($448,841).
    - Regional Water Quality Monitoring ($470,182).
    - Water Supply Plan Development ($300,000).
- Operating Expense:
    - Water Supply Program Support ($10.6 million) for Self-Insurance Programs (comprised of health insurance, workers compensation, property insurance, general liability).
    - Everglades Program Support ($1.9 million), which includes:
        - Property appraiser and tax collector fees ($1.2 million).
    - Big Cypress Basin ground and surface water monitoring ($145,000).
    - Caloosahatchee River & Estuary - Estuary Protection Plan ($269,040).
    - Everglades Construction Project - Operations Monitoring ($128,611).
    - Florida Bay and Florida Keys Applied Research & Model Development ($133,283).
    - Modeling & Scientific Support – IT Support ($997,923).

AMERICAN OVERSIGHT

- Regional Water Quality Monitoring ($637,391)

- Operating Capital Outlay:
  - Lake Okeechobee In-Lake Assessment ($373,365)
  - Regional Water Quality Monitoring ($96,500)

- Interagency Expenditures:
  - Big Cypress Basin ($2.8 million), which includes:
    - Intergovernmental Local Agreement Projects, including Collier County Settlement Agreement ($2.5 million)
    - Lake Trafford Watershed Monitoring ($250,000).
  - C&SF Project Monitoring and Assessment ($987,635), which includes:
    - USGS Ground Water and Surface Water Core Network Monitoring ($944,681).
  - Florida Bay and Florida Keys Applied Research & Model Development ($505,500).
  - Hydrogeologic Data Gathering ($326,476).
  - Indian River Lagoon License Tag Program ($78,788).
  - Regional Water Quality Monitoring ($446,526).

AMERICAN OVERSIGHT

1.1 District Water Management Planning *- Local and regional water management and water supply planning, minimum flows and levels, and other long-term water resource planning efforts. The District Water Management Plans developed pursuant to Section 373.036, F.S., are the District-wide planning documents which encompass other levels of water management planning.*

District Description

Five planning areas, which together encompass the entire District, address the unique resources and needs of each region. Regional water supply plans have been prepared and approved by the Governing Board for these areas. The water supply plans forecast water demands over a 20-year planning horizon and identify programs and projects to ensure that adequate and sustainable water supplies are available to meet existing and future water supply needs while protecting the environment and water resources. Water supply plans are required to identify specific water resource and water supply development projects to meet future demands.

The plans identify a series of water source options for each of the planning areas. The options are as prescribed by Section 373.709, F.S., Regional Water Supply Planning, and incorporate traditional and alternative water supply projects, including water conservation, to meet existing and future reasonable-beneficial uses while sustaining water resources and related natural systems of each planning area. The District is implementing its updated regional water supply plans, which are updated every five years, over a 20-year planning horizon. The Upper East Coast Plan was updated in Fiscal Year 2015-16. The Lower West Coast Plan was updated in Fiscal Year 2017-18. The Lower East Coast Plan was updated in Fiscal Year 2018-19 and the Lower Kissimmee Basin Plan Update is scheduled for completion in Fiscal Year 2019-20. The District's Upper Kissimmee Basin is included in the Central Florida Water Initiative (CFWI) planning area. The CFWI is a collaborative effort between three water management districts with other agencies and stakeholders to address current and long-term water supply needs in a five-county area of Central Florida where the three districts' boundaries meet. In November 2015, the Governing Boards of the three districts approved the 2015 CFWI Regional Water Supply Plan (RWSP), including the 2035 Water Resources Protection and Water Supply Strategies Plan. Development of the 2020 update for the CFWI RWSP began in Fiscal Year 2016-17 and is scheduled for completion in Fiscal Year 2020-21.

Local governments are required to adopt water supply facilities work plans and incorporate them into their comprehensive plans within 18 months of the respective regional water supply plan update being approved by the Governing Board. The water supply facilities work plans are then reviewed for their consistency with the water supply plans. All proposed comprehensive plan amendments are reviewed to ensure that there is sufficient water to accommodate the proposed amendment as well as all the local government's other demands.

Changes and Trends

This activity represents a continued level of service consistent with Fiscal Year 2019-20.

In the Fiscal Year 2018-19 Adopted Budget, this program reflected an increase in Operating Expenses due to the way our actual insurance expenditures post through payroll an accounting practice which is continued in the Fiscal Year 2020-21 Preliminary Budget. Postings are based on where staff charges expenditures versus where staff is budgeted, coupled with budgeting the District's full insurance exposure. There is a slight increase in Salaries and Benefits due to an increase in FRS employer contributions.

Budget Variances

This activity has an 11.6 percent ($2.4 million) decrease in comparison to the Fiscal Year 2018-19 Adopted Budget of $21 million. Salaries and Benefits increase of $29,642 is due to increase in FRS employer contributions. The Contracted Services increase of $147,524 resulted from the Water Supply Cost Estimation Study and C-51 Sediment Trap Analysis; Operating Expenses decrease of $71,500 is due to the multi-year funding requirement for the SCADA Still Well/Platform project and Operating Capital Outlay decrease of $43,500 is also due to the multi-year funding requirement for the SCADA Still Well/Platform project and a Chlorophyll Probe. Fixed Capital Outlay decrease of $1,932,314 resulted primarily from the CFWI project and are explained in sub-activity 1.1.1 below and Interagency Expenditures decrease of $568,110 in Indian River Lagoon initiatives.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006354

Major Budget Items for this activity include the following:

- Salaries and Benefits ($4.2 million).
- Contracted Services:
  - Lake Worth Lagoon Initiatives ($100,000).
  - Water Supply Cost Estimation Study update ($300,000).
- Operating Expense:
  - Water Supply Program Support ($10.6 million) for Self-Insurance Programs (comprised of health insurance, workers compensation, property insurance, general liability).
  - Big Cypress Basin ground and surface water monitoring ($145,000).
  - Caloosahatchee River & Estuary Protection Plan ($269,040).
- Interagency Expenditures:
  - Big Cypress Basin ($2.8 million), which includes:
    - Intergovernmental Local Agreement Projects ($1.5 million)
    - Collier County Settlement Agreement ($1 million)
    - Lake Trafford Watershed Monitoring ($250,000).
  - Indian River Lagoon License Tag Program ($78,788).

AMERICAN OVERSIGHT

1.1.1. Water Supply Planning - Long-term planning to assess and quantify existing and reasonably anticipated water supply needs and sources, and to maximize the beneficial use of those sources, for humans and natural systems. This includes water supply assessments developed pursuant to Section 373.036, F.S., and regional water supply plans developed pursuant to Section 373.0361, F.S.

District Description

Long-term planning to assess and quantify existing and reasonably anticipated water supply needs and sources, and to maximize the beneficial use of those sources, for humans and natural systems. This includes water supply assessments developed pursuant to Section 373.036, F.S., and regional water supply plans developed pursuant to Section 373.0361, F.S. Five planning areas, which together encompass the entire District, address the unique resources and needs of each region. Regional water supply plans have been prepared and approved by the Governing Board for these areas. The water supply plans forecast water demands over a 20-year planning horizon and identify recommended sources and projects to satisfy those demands. Implementation of recommendations is essential to ensuring that sufficient quantities of water will be available when needed.

Changes and Trends

This activity represents a continued level of service consistent with Fiscal Year 2019-20. In the Fiscal Year 2019-20 Adopted Budget, this program reflected an increase in Operating Expenses due to the way our actual insurance expenditures post through payroll (an accounting practice which is continued in the Fiscal Year 2020-21 Preliminary Budget.) Postings are based on where staff charges versus where staff is budgeted, coupled with budgeting the Districts full insurance exposure. The continued implementation of the CFWI monitoring well project has resulted in fluctuations to Fixed Capital Outlay and Contracted

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006356

Services over the five-year period. This is because access agreements with public and private entities are required to be in place prior to well installation, and the timeliness of securing such agreements is highly variable. The decrease in Interagency Expenditures is due to end of hydrogeologic data gathering project with Department of Interior. Updates to the District's regional water supply plans have been initiated or planned. The five-year update to the Lower East Coast was completed in Fiscal Year 2018-19. The schedule for completion of the five-year updates are Lower Kissimmee Basin in Fiscal Year 2019-20; CFWI in Fiscal Year 2020-21; Upper East Coast in Fiscal Year 2020-21 and Lower West Coast in Fiscal Year 2022-23.

Budget Variances

This sub-activity has a 11.6 percent ($1.8 million) decrease from the Fiscal Year 2019-20 Adopted Budget of $15.6 million. Fixed Capital Outlay decrease of $1,857,314 in CFWI is because these funds are planned to be used in the current year and a determination has not yet been made of how much may need to be brought into next year's budget. Contracted Services increased by a net of $54,524 due primarily to planned updates to the Water Supply Cost Estimation Study.

Major Budget Items for this sub-activity include the following:

- Salaries and Benefits ($2.8 million).

Major Projects that are funded with Salaries and Benefits (included in the salaries and benefits number above) and Contracted Services.

Project Name	Salaries and Benefits	Other Personal	Contracted Services	Operating Expenses	Operating Capital	Fixed Capital Outlay	Interagency Expenditures	Debt	Reserves	Grand Total
Central Florida Water Initiative	$ 825,687	$ -	$ 25,000	$ -	$ -	$ -	$ -	$ -	$ -	$ 850,687
Grand Total	**$ 825,687**	**$ -**	**$ 25,000**	**$ -**	**$ -**	**$ -**	**$ -**	**$ -**	**$ -**	**$ 850,687**

The following are the other Major Budget items not included in Major Projects:

- Operating Expense:
    - Water Supply Program Support ($10.6 million) for Self-Insurance Programs (comprised of health insurance, workers compensation, property insurance, general liability).

One item is funded with Reserves without restrictions – Water Supply Cost Estimation Study ($300,000).

1.1.2 Minimum Flows and Levels - The establishment of minimum surface and ground water levels and surface water flow conditions required to protect water resources from significant harm, as determined by the District Governing Board.

District Description

The establishment of minimum flows and minimum water levels (MFLs) for lakes, rivers, wetlands, estuaries, and aquifer are required to protect water resources from significant harm, as determined by the District Governing Board. MFLs identify the point at which further withdrawals will cause significant harm to the state's surface water and ground water resources. MFL criteria are adopted by Section 373.042, F.S. For waterbodies that do not currently meet the MFL criteria, each water management district must develop a recovery strategy that outlines a plan to meet MFL criteria. A prevention strategy must be developed if it is expected that an MFL will not be met within the next 20-year planning horizon [Subsection 373.0421(2), F.S.].

To date, nine MFLs have been adopted within District boundaries, which includes 40 different MFL compliance monitoring sites. In 2001, MFLs were adopted for the Caloosahatchee River, Lake Okeechobee, Everglades (Water Conservation Areas 1, 2 and 3, Everglades National Park, and the Rotenberger and Holey Land Wildlife Management Areas), Biscayne Aquifer, and Lower West Coast Aquifers (Tamiami, Sandstone, and Mid-Hawthorn). In 2002, an MFL was adopted for the St. Lucie River and Estuary, and in 2003 an MFL was adopted for the Northwest Fork of the Loxahatchee River. In 2006, MFLs were adopted for Lake Istokpoga and Florida Bay. The District has adopted several water reservation rules and restricted allocation area rules, as discussed below, to provide resource protection to multiple waterbodies since 2006. The District periodically re-evaluates adopted MFL criteria to ensure continued protection of natural systems. In 2014, the District conducted a re-evaluation of MFL criteria for Florida Bay. The results of the re-evaluation indicated that the existing MFL criteria and prevention strategy are sufficient to protect the existing resources within Florida Bay.

From 2011-2017, District scientists completed a comprehensive assessment of the science and research for the Caloosahatchee River Estuary (CRE) to re-evaluate the MFL. District scientists used a resource-based approach, which involved using multiple ecological indicators in the CRE to evaluate their responses to low flow conditions during the dry season. An MFL technical support document was also developed in 2017. This MFL technical document was subject to a scientific peer review by an independent panel of experts. Overall, the peer review was very positive and did not identify any major deficiencies. In 2018, District staff began the rule development process and held two separate public rule development workshops. In September of 2018 the Governing Board adopted recommended MFL rule language. A rule challenge was filed, and a two-day administrative hearing occurred at the end of October 2018. In March of 2019, the Administrative Law Judge ruled in favor of the District and determined that the proposed rule was a valid exercise of delegated authority. Notwithstanding, in April 2019, the Governing Board directed staff to further engage with stakeholders and to consider additional mathematical and statistical approaches for the MFL. Three additional public workshops were held on May 31, June 20, and September 20, 2019. In October 2019, the Governing Board adopted revised MFL rule language. This adopted MFL rule language became effective on December 9, 2019.

AMERICAN OVERSIGHT

Water Reservations and Restricted Allocation Areas: In addition to MFLs, the District has established water reservations and restricted allocation areas by rule to protect water for the natural system. Water reservations serve to reserve water for the protection of fish and wildlife or public health and safety [Subsection 373.223(4), F.S.]. Water reservations can be used to aid in a recovery or prevention strategy for an established MFL waterbody.

To date, the District has adopted five water reservations. The first two of these were adopted in 2009 for Picayune Strand and Fakahatchee Estuary. In 2010, a water reservation was adopted for the North Fork of the St Lucie River. In 2013 and 2014, two water reservations were adopted in support of Comprehensive Everglades Restoration Plan (CERP) projects. These include a water reservation for Nearshore Central Biscayne Bay, which was adopted in 2013, in support of the CERP Biscayne Bay Coastal Wetlands (Phase 1) Project, and the Caloosahatchee River (C-43) West Basin Storage Reservoir water reservation, adopted in 2014, to help promote a more balanced and healthy salinity regime for the Caloosahatchee River. In 2015, the District continued rulemaking for establishment of water reservations for the Kissimmee River and floodplain, and Kissimmee Chain of Lakes (Upper Chain of Lakes and Headwater Revitalization Lakes). Two public workshops were held to update stakeholders on the Kissimmee rulemaking process. The draft rule and its supporting technical document have been released for public review and comment. After the last public workshop, the District received multiple public comments from various stakeholder groups, which are in the process of being incorporated into revised technical criteria. In 2016, the District developed a modeling tool to assist with addressing the fish and wildlife issues and other technical concerns received during the public comment period. Staff continues to perform technical evaluations to address these comments. In 2018-2019, additional public workshops are planned to address the technical issues and revise the draft rules where necessary.

Like water reservations, Restricted Allocation Areas (RAAs) are another water resource protection tool that is implemented for geographic areas where water allocations from specific water resources are limited. Additional allocations beyond the established limitation are restricted or prohibited because there is a lack of water available to meet the projected needs, to protect water for natural systems and future restoration projects or is part of an MFL Recovery or Prevention Strategy. RAAs' traditional water sources beyond the specified limitations are not relied upon to be available to meet the projected needs of a region. RAA criteria are based on Subsection 373.223(1), F.S., which specifies a three-prong test used for issuing consumptive use permits. RAAs adopted since 1981 for specific areas of the District are listed in Sub-Activity 3.2.1 of the *Applicant's Handbook for Water Use Permit Applications*, which is incorporated by reference into Chapter 40E-2, Florida Administrative Code. The RAAs include the Lake Istokpoga/Indian Prairie Canal System; L-1, L-2 & L-3 Canal System; C-23, C-24 & C-25 Canal System; North Palm Beach/Loxahatchee River Watershed Waterbodies and Lower East Coast Everglades Waterbodies; Lake Okeechobee and Lake Okeechobee Service Area; and Floridan Wells in Martin and St. Lucie Counties.

Interagency Expenditures (Cooperative Funding)	$ -	$ -	$ -
Debt	$ -	$ -	$ -
Reserves - Emergency Response	$ -	$ -	$ -
TOTAL	$ 332,999	$ -	$ 332,999

Changes and Trends

Within the last five years, funding in this sub-activity has decreased overall due to a reduction in needed FTEs and contractual needs associated with Peer Reviews and Statements of Estimated Regulatory Costs evaluations.

Budget Variances

This sub-activity has a 1.2 percent ($4,130) decrease between the Fiscal Year 2019-20 Adopted Budget and the Fiscal Year 2020-21 Preliminary Budget due to less staff time needed in support of this activity.

Major Budget Items for this sub-activity include the following:

- Salaries and Benefits ($332,999).

There are no items funded with Reserves.

AMERICAN OVERSIGHT

1.1.3 Other Water Resource Planning - District water management planning efforts not otherwise categorized above, such as comprehensive planning, watershed assessments and plans, SWIM planning, and feasibility studies.

District Description

Other water resource planning includes a variety of efforts in the planning phase such as activities under the Northern Everglades Watershed Protection Plans, the South Miami-Dade Water Management Plan, the South Lee County Watershed Plan, and the Estero Bay Watershed management strategies. Planning efforts also include implementation of state appropriation supported flood mitigation, stormwater improvement, restoration, and water quality projects.

TOTAL	$ 2,624,583	$ 1,854,940	$ 4,479,523

Changes and Trends

Continuing efforts include implementing and updating the Plans described above as required, monitoring inflow and nutrient loading to Lake Okeechobee and the Northern Estuaries and evaluating progress towards meeting the phosphorus criterion for the Everglades as well as levels and limits set by the Everglades Settlement Agreement. In Fiscal Year 2019-20 the Applied Research and Coastal Watersheds activities were moved from Program Activity 1.1.3 to 1.2 causing reductions across most of the expense categories. However, Lake Worth Lagoon (LWL) Local Initiatives is currently trending upwards in the Contracted Services category as are Big Cypress Basin Intergovernmental Projects within the Interagency Expenditures category.

AMERICAN OVERSIGHT

Budget Variances

This sub-activity has a 12.2 percent ($624,566) decrease between the Fiscal Year 2019-20 Adopted Budget and the Fiscal Year 2020-21 Preliminary Budget. In Fiscal Year 2019-20 the Applied Research and Coastal Watersheds activities were moved from Program Activity 1.1.3 to 1.2 causing reductions across most of the expense categories. The increases in Salaries and Benefits ($10,544) due to projected increase in FRS employer contributions and Contracted Services ($93,000) for the LWL Local Initiatives C-51 Sediment Trap Analysis. However, these increases are offset by decreases in Operating Expenses ($41,500) for LWL Monitoring supplies, equipment, and services; Operating Capital Outlay ($43,500) for Monitoring Equipment; Fixed Capital Outlay ($75,000) for LWL Monitoring; and an overall decrease in Interagency Expenditures ($568,110) primarily in the Indian River Lagoon (IRL) License Tag Program and IRL National Estuary Program.

Major Budget Items for this sub-activity include the following:

- Salaries and Benefits ($1.1 million).
- Operating Expenses:
    - Big Cypress Basin ($145,000) for Groundwater Monitoring and Surface Water Quality Monitoring.
    - Caloosahatchee River & Estuary Protection Plan ($269,040), which includes:
        - Boma Cost to Cure project ($261,940)
- Contracted Services:
    - Lake Worth Lagoon Local Initiatives ($100,000) for C-51 Sediment Trap Survey and Analysis.
- Interagency Expenditures:
    - Big Cypress Basin ($2.8 million), which includes:
        - Intergovernmental Local Agreement Projects ($1.5 million).
        - Collier County Settlement Agreement ($1 million).
        - Lake Trafford Watershed Monitoring ($250,000).
    - Indian River Lagoon License Tag Program in Martin, Palm Beach, and St. Lucie counties ($78,788).

Item funded with Reserves without restrictions is C-51 Sediment Trap Survey ($93,000)

Items funded with Reserves with restrictions include Big Cypress Basin (BCB)-Intergovernmental Local Agreement Projects ($1.5 million) and Boma Improvement-FDOT SR80 Widening ($261,940).

AMERICAN OVERSIGHT

1.2 Research, Data Collection, Analysis and Monitoring *- Activities that support District water management planning, restoration, and preservation efforts, including water quality monitoring, data collection and evaluation, and research.*

District Description

Activities that support South Florida Water Management District (District) water management planning, restoration, and preservation efforts, including water quality monitoring, data collection and evaluation, and research. This agency work includes research, modeling, environmental monitoring, and assessment activities that support various regulatory-driven mandates/agreements and comply with federal and state-issued permits such as Everglades Settlement Agreement/Consent Decree, Clean Water Act, Comprehensive Everglades Restoration Plan, Everglades Forever Act, Restoration Strategies, Environmental Resource Permitting, and the Northern Everglades and Estuaries Protection Program (NEEPP).

Program-related activities include comprehensive monitoring and laboratory analysis; quality assurance/quality control; data management; hydrologic modeling; water quality and ecological modeling; remote sensing; operational monitoring for the Central and Southern Florida Project and Everglades Stormwater Treatment Areas (STAs); Geographic Information Systems development; applied research (field and laboratory); Best Management Practices (BMP) technologies; pollutant load reduction goals development; and technical reporting and publication.

In 2012, the State of Florida and the U.S. Environmental Protection Agency reached consensus on new Restoration Strategies for further improving water quality in the Everglades. These strategies build upon the existing projects, and further improve the quality of stormwater entering the Everglades. The strategies are anticipated to achieve compliance with the total phosphorus water quality standard established for the Everglades (www.sfwmd.gov/restorationstrategies). In September 2012, the Department of Environmental Protection (DEP) issued the District Consent Orders associated with Everglades STA permits, which outline a suite of projects with deadlines for completion. The identified projects primarily consist of reservoirs referred to as flow equalization basins, STA expansions, and associated infrastructure and conveyance improvements. These projects, several of which are completed and operational, are being designed and constructed at a total cost of approximately $880 million. Pursuant to the DEP Consent Orders, the District is also implementing a Science Plan for the Everglades STAs to investigate the critical factors that collectively influence phosphorus removal and better understand the ability to meet the phosphorus removal goals and the sustainability of STA performance at low phosphorus concentrations.

The NEEPP mandates the coordination of agencies, which includes the District, DEP, and Florida Department of Agriculture and Consumer Services to develop and implement Watershed Protection Plans for Lake Okeechobee and the Caloosahatchee and St. Lucie River watersheds. The Lake Okeechobee Watershed Protection Plan was initially developed in 2004 and has been subsequently updated in 2007, 2011, and 2014. The Phase II Technical Plan for the Lake Okeechobee Watershed Construction Project was completed in 2008. The Caloosahatchee and St. Lucie River Watershed Protection Plans were developed in 2009 and updated in 2012 and 2015. The Plans include nutrient source controls (e.g., BMPs) and several sub-regional and regional technologies, such as STAs and alternative treatment technologies, to improve the quality of water within the watersheds and of the water delivered downstream to Lake Okeechobee and the Northern Estuaries. Several measures are also included in the Plans to improve water levels within Lake Okeechobee, and the quantity and timing of

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006363

discharges from the Lake and its downstream estuaries to achieve more desirable salinity ranges. These measures include reservoirs, aquifer storage and recovery wells, and dispersed water management projects. In addition, the Plans include respective Research and Water Quality Monitoring Programs for the Lake and Estuaries that include water quality and ecological monitoring and assessment, and related research studies.

Central and South Florida (C&SF) monitoring and assessment is the performance of field measurements, data collection, and instrument maintenance used to monitor flow conditions in support of flood control operations and analysis. This is performed at all C&SF sites and structures.

Pursuant to Chapter 2005-36, Laws of Florida, and Subsection 373.036 (7), F.S., the District in cooperation with the DEP, publishes and submits the S*outh Florida Environmental Report* (SFER) to the Florida legislature, governor, and other key stakeholders on March 1 each year (www.sfwmd.gov/science-data/sfer). This unified reporting details the restoration, management, and protection activities associated with the Kissimmee Basin, Northern Everglades (Lake Okeechobee, St. Lucie Estuary, and Caloosahatchee Rivers and Estuaries), and the Southern Everglades. Other agency reporting requirements, including annual plans and reports required of all Florida water management districts as well as those mandated in the federal and state-issued permits, are also incorporated to enhance reporting efficiencies.

Continuing efforts include monitoring to determine progress toward meeting Lake Okeechobee phosphorus loading targets, the phosphorus criterion for the Everglades, as well as levels and limits set by the Everglades Settlement Agreement. Other monitoring activities include Lake Okeechobee ecological monitoring; assessment of downstream effects of the STAs; assessment of the hydrologic needs of the Everglades (as mandated by the Everglades Forever Act); system-wide conditions monitoring under REstoration COordination & VERification (RECOVER); and monitoring support for CERP projects.

The Everglades STAs continue to show excellent annual performance. During Water Year 2019 (May 1, 2018 to April 30, 2019), the combined STAs treated approximately 1.4 million acre-feet of water; reducing flow-weighted mean phosphorus concentration to 23 parts per billion. During this water year, the STAs removed 179 metric tons of TP, which is 81 percent of the phosphorus load. To date, the STAs combined have removed approximately 2,783 metric tons of phosphorus that otherwise would have gone to the Everglades Protection Area.

Changes and Trends

Overall funding for the last few years has moderately fluctuated in this activity. Increases in all budget categories from Fiscal Year 2016-17 to Fiscal Year 2020-21 Preliminary Budget are solely due to differences between actual-audited expenditures and planned budgets. The Fiscal Year 2020-21 Preliminary Budget decreased primarily to fund Expanded Monitoring efforts.

Budget Variances

This activity has a 0.7 percent ($217,275) decrease between the Fiscal Year 2019-20 Adopted Budget and the Fiscal Year 2020-21 Preliminary budget. The decrease in Contracted Services ($620,727) resulted from model development for Coastal Resilience ($950,000) was moved from Contracted Services in this program to Operations & Maintenance of Lands and Works Program. The decrease in Operating Expenses ($57,000) is due primarily to the completion of one-time maintenance and repair of monitoring related equipment. The decrease in Operating Capital Outlay ($26,000) is a result of a one-time streamguaging field equipment purchase completed in the current fiscal year. These decreases are offset by increases in Salaries and Benefits ($374,152) due to turnover in positions and the hiring process, forecasted increase in FRS contributions and a job study. In addition to Interagency Expenditures ($112,300) increasing for USGS groundwater and surface water monitoring network.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006365

Major Budget Items for this activity include the following:

- Salaries and Benefits ($18.8 million).
- Other Personal Services:
  - On-going C&SF Monitoring and Assessment ($96,064).
  - LTP STA O&M – Monitoring and Assessment ($27,966).
  - Lake Okeechobee Water Quality Assessment & Reporting ($12,550).
- Contracted Services:
  - C&SF Monitoring and Assessment ($671,160).
  - Everglades Research & Evaluation ($469,000).
  - Everglades Construction Project – Analysis & Interpretation ($279,500).
  - Hydrogeologic Data Gathering ($846,365).
  - Lake Okeechobee In-Lake Assessment ($460,331).
  - Regional Modeling Process Improvement and Maintenance ($448,841).
  - Regional Water Quality Monitoring: Analytical Services, Assessment & Reporting, Field Operations, and SFER ($470,182).
- Operating Expenses:
  - Everglades Program Support ($1.9 million), which includes:
    - Property Appraiser and Tax Collector fees ($1.2 million). Expenses for the Everglades Forever Act property appraiser and tax collector fees are captured here to properly tie the cost of collecting the tax to the associated fund and activities.
  - Everglades Construction Project - Operations Monitoring ($128,611).
  - Everglades Research & Evaluation - ($91,786)
  - Florida Bay and Florida Keys Applied Research and Model Development ($133,283).
  - Regional Water Quality Monitoring ($729,127).

AMERICAN OVERSIGHT

- Operating Capital Outlay:
  - Regional Water Quality Monitoring ($96,500), which includes:
    - Lab Analysis and Compliance for Organics, Sediment, and Water ($40,500).
    - Field Operations ($56,000).
  - Lake Okeechobee In-Lake Assessment ($373,365)
- Interagency Expenditures:
  - C&SF Monitoring and Assessment ($987,635).
  - Florida Bay and Florida Keys Applied Research and Model Development ($505,500).
  - Hydrogeologic Data Gathering ($326,476).
  - Regional Water Quality Monitoring ($446,526).

Items funded with Reserves without restrictions are Tax Collector & Property Appraiser Fees ($472,728); Kissimmee River Restoration Evaluation Lower Basin, Gardner Cobb & Lake Okeechobee Aerial Imagery (59,250); NEEPP & EFA Source Controls ($25,000); Water Quality - IT Nutrient Support (301,600); Water Supply designated amount for USGS monitor well network activities and a cost estimation study ($600,000) and Modeling (Water Quality, Emergency Modeling) ($350,000).

Items funded with Reserves with restrictions are Mitigation – Lake Belt/Wetland designated amount for Water Conservation Area Active Marsh Improvement project ($350,000) and Florida Bay Seagrass Monitoring ($115,000).

AMERICAN OVERSIGHT

1.3 Technical Assistance *- Activities that provide local, state, tribal, and federal planning support, including local government comprehensive plan reviews, DRI siting, and Coastal Zone Management efforts.*

District Description

Activities that provide local, state, tribal, and federal planning support, including local government comprehensive plan reviews, DRI siting, and Coastal Zone Management efforts. The District provides technical assistance to local governments on their local comprehensive plans, ten-year water supply facilities work plans, and related documents. This technical assistance is provided through several means:

- Provide technical support to local government planners and officials when comprehensive plans are evaluated and updated.
- Review and comment on significant water resource issues for proposed amendments to local government comprehensive plans.
- Provide expertise on District programs for local government community planning efforts, as well as coordination with the Regional Planning Councils, Florida Department of Economic Opportunity (FDEO), Florida Department of Transportation (FDOT) and DEP.
- Provide comments on projects reviewed through the State Clearinghouse and developments of regional impact.
- Work with local governments to ensure consistency between local government ten-year water supply facilities work plans and the District's regional water supply plans.
- Conduct technical assistance workshops with local governments throughout the District as needed and provided assistance to local governments regarding ten-year water supply facility work plans.
- Consistent with the Community Planning Act adopted during the 2011 session of the Florida Legislature and the Community Development Act adopted during the 2015 session of the Florida Legislature, emphasis is being placed on providing technical assistance to local governments. Reviews of proposed amendments to local government comprehensive plans focus on addressing impacts to significant state water resources.
- Working proactively on the "front end" of the planning and evaluation processes, collaboratively addressing water resource issues, and building successful alliances continues to be important. Since the adoption of the Community Planning Act the number of requests for technical assistance has increased. In addition, local governments are in the process of evaluating and updating their comprehensive plans. This includes evaluations of existing adopted Water Supply Work Plans and identifying needed comprehensive plan amendments.

1.5 Technology and Information Services *- This activity includes computer hardware and software, data lines, computer support and maintenance, IT consulting services, data centers, network operations, web support and updates, desktop support, and application development associated with this Program and related activities.*

District Description

This activity includes computer hardware and software, data lines, computer support and maintenance, IT consulting services, data centers, network operations, web support and updates, desktop support, and application development that support the Water Resources Planning and Monitoring program and related activities.

Information technology items (salaries, contractors, hardware / software maintenance, and other operating costs) are directly charged to operational activities of District core functions where there is a clear linkage between the operational activity and the information technology system, application or staff that is used to support the operational activities.

Changes and Trends

Over the past five years, Salaries and Benefits have fluctuated, but is higher in the Adopted and Preliminary Budget than it was five years ago because staff was centralized into IT for geospatial and SCADA operations in Fiscal Year 2017-18. This sub-activity represents a continued level of service over the past five years.

AMERICAN OVERSIGHT

Budget Variances

This activity has a 0.5 percent ($14,192) increase from the Fiscal Year 2019-20 Adopted Budget of $3 million due to an increase of 0.8 percent ($14,192) in Salaries and Benefits for projected FRS employer contributions.

Major Budget Items for this activity include the following:

- Salaries and Benefits ($1.9 million).
- Contracted Services:
  - Modeling and Scientific Support - IT Support ($136,805), which includes:
    - Computer consulting services ($96,185), enterprise resource support and IT security.
    - Copier/printer leases ($40,620).
- Operating Expenses:
  - Modeling and Scientific Support - IT Support ($977,584) which includes:
    - Software maintenance ($800,233).
    - Hardware maintenance ($53,775).
    - Communication service ($87,586).

There are no items funded with Reserves.

IV. PROGRAM ALLOCATIONS

2.0 Land Acquisition, Restoration and Public Works

This program includes the development and construction of all restoration capital projects, including water resource development projects / water supply development assistance, water control projects, and support and administrative facilities construction; cooperative projects; land acquisition; and the restoration of lands and water bodies.

District Description

The District oversees the development and construction of all restoration capital projects including surface water projects pertaining to Restoration Strategies, the CERP, and the NEEPP, as well as water supply development assistance through cooperative funding for Alternative Water Supply (AWS).

South Florida Water Management District
REDUCTIONS - NEW ISSUES
2.0 Land Acquisition, Restoration and Public Works
Fiscal Year 2020-21
Preliminary Budget - January 15, 2020

	FY 2019-20 Budget (Adopted)		**158**	**564,625,144**	
	Reductions				
Issue	Description	Issue Amount	Workforce	Category Subtotal	Issue Narrative
Salaries and Benefits			-	-	
Other Personal Services				-	
Contracted Services				(15,127,637)	
1	Decrease in Biscayne Bay Coastal Wetlands	(2,570,854)			Decrease resulting from one-time prior-year state appropriations and one-time fund-balance funding in FY2019-20.
2	Decrease in Brady Ranch	(700,000)			Decrease due to one-time fund balance funding to initiate feasibility study, planning, and design for Brady Ranch FEB/ASR.
3	Decrease in C-111/Modified Water Deliveries/Combined System Operating Pl	(151,000)			Decrease due to completion of grant agreement with Department of Interior for a field test at S-356.
4	Decrease in Caloosahatchee River & Estuary Projects	(16,000)			Decrease due to completion of Boma Bioassays Mesocosms Project Phase 1.
5	Decrease in Central Everglades Planning Project	(102,893)			Decrease due to shift in prior-year and new state appropriated funding requirements across expense categories for the EAA Storage Reservoir Conveyance Improvements and STA.
6	Decrease in CERP Planning	(1,000,000)			Decrease due to reduced allocation of new state appropriations for CERP Planning.
7	Decrease in Indian River Lagoon - South	(25,000)			Decrease due to C-44 Reservoir & STA transfer to operations and maintenance.
8	Decrease in Lake Okeechobee Regional Phosphorus Control Project	(5,100)			Decrease due to Lakeside Ranch STA transfer to operations and maintenance.
9	Decrease in Lake Okeechobee Watershed	(10,000,000)			Decrease due to anticipated reduction in new state appropriated funding for this project.
10	Decrease in LTP STA O&M - STA Capital Construction	(300,000)			Decrease due to one-time fund balance funding to initiate planning and design for C-43 Bioassays & Mesocosms Project Phase 2 and STA 5/6 Connection to Lake Okeechobee.
11	Decrease in WCA3 Decomp & Sheetflow Evaluation	(256,790)			Decrease due to one-time fund balance funding for USGS Decomp Physical Model Hydrologic and Biogeochemistry monitoring.
Operating Expenses				(4,251,027)	
12	Decrease in C-111/Modified Water Deliveries/Combined System Operating Pl	(10,800)			Decrease due to completion of grant agreement with Department of Interior for a field test at S-356.
13	Decrease in C-43 Basin Storage Reservoir	(53,550)			Decrease due to C-43 Reservoir small pump station transfer to operations and maintenance.
14	Decrease in Caloosahatchee River & Estuary Projects	(3,500)			Decrease due to completion of Boma Bioassays Mesocosms Project Phase 1.
15	Decrease in Central Everglades Planning Project	(3,295,000)			Decrease resulting from Old Tamiami Trail project being fully funded in FY2019-20.
16	Decrease in Indian River Lagoon - South	(888,177)			Decrease due to C-44 Reservoir & STA transfer to operations and maintenance.
Operating Capital Outlay				(19,638,546)	
17	Decrease in Biscayne Bay Coastal Wetlands	(1,300,000)			Decrease due to reduction of one-time funding from Miami-Dade County for Biscayne Bay Coastal Wetlands Cutler Design.
18	Decrease in C-111/Modified Water Deliveries/Combined System Operating Pl	(2,800)			Decrease due to completion of grant agreement with Department of Interior for a field test at S-356.
19	Decrease in Central Everglades Planning Project	(7,810,000)			Decrease due to shift in prior-year and new state appropriated funding requirements across expense categories for the EAA Storage Reservoir Conveyance Improvements and STA.
20	Decrease in CERP Planning	(7,522,159)			Decrease due to shift in funding requirements across expense categories for CERP/CEPP Projects.
21	Decrease in Kissimmee River Restoration - Integrated Ecosystem Studies	(3,587)			Reduction in capital equipment requirement in support of the Kissimmee River Restoration monitoring.
22	Decrease in LTP STA O&M - STA Capital Construction	(3,000,000)			Decrease due to reduced one-time fund balance funding for STA Capital Construction ($3 million) offset by new appropriated funding in this category for Brady Ranch STA/FEB ($2.5 million)

REDUCTIONS - NEW ISSUES
2.0 Land Acquisition, Restoration and Public Works
Fiscal Year 2020-21
Preliminary Budget - January 15, 2020

New Issues					
Issue	Description	Issue Amount	Workforce	Category Subtotal	
Salaries and Benefits			-	239,516	Salaries and Benefits increased in the FY2020-21 Preliminary budget for various reasons. Turnover in positions and the hiring process, forecasted increase in FRS contributions and a job study. The job study was conducted comparing the District to other governmental agencies across the State of Florida, resulting in select job categories increasing to more competitive levels while FTEs at or above the job study levels were not increased.
1	Increase in Total Fringe Benefits	111,365			
2	Increase in Total Salaries and Wages	128,151			
Other Personal Services				-	
Contracted Services				12,029,181	
3	Increase in Dispersed Water Management	10,945,546			Increased allocation of NEEPP state appropriations for DWM Public Private Partnerships.
4	Increase in Kissimmee River Restoration - Integrated Ecosystem Studies	609,595			Increase resulting from New Works monitoring activities post-Kissimmee River Restoration.
5	Increase in USACE Monitoring	467,840			Increase is primarily due New Works activities for Groundwater Exchange Monitoring and Modeling (GEMM) of Coastal Florida Bay ($435,000), as well increased monitoring resulting from the transfer to operations and maintenance of CERP components in Biscayne Bay Coastal Wetlands - Cutler ($15,000), C-44 STA ($5,000), and Picayune Strand ($12,840)
6	Increase in EFA Reg Source Control Program	6,200			Increase in one-time cash flow requirement for EFA source control activities.
Operating Expenses				42,600	
7	Increase in Kissimmee River Restoration - Integrated Ecosystem Studies	6,000			Increase resulting from New Works for waste removal services post-Kissimmee River Restoration.
8	Increase in USACE Monitoring	36,600			Increase results from new Coastal Florida Bay GEMM activities ($30,000) and Biscayne Bay Coastal Wetlands L31E components transfer to operations and maintenance ($6,600).
Operating Capital Outlay				12,274,000	
9	Increase in Brady Ranch	2,500,000			Increase due to new state appropriated funding for Brady Ranch STA/FEB ($2.5 million)
10	Increase in Caloosahatchee River & Estuary Projects	9,700,000			Increase due to new state appropriated funding for C-43 Bioassays & Mesocosm Phase II/Boma FEB ($10.0 million) offset by a decrease of one-time fund balance funding ($2.8 million), as well new state appropriated funding for Lake Hicpochee Hydrologic Enhancement project ($2.5 million).
11	Increase in Kissimmee River Restoration - Hydrologic Monitoring	61,000			Increase resulting from New Works for monitoring equipment post-Kissimmee River Restoration.
12	Increase in Lakeside Ranch Stormwater Treatment Area	1,000			Increase in capital equipment requirement for Lakeside Ranch Phase 2.
13	Increase in USACE Monitoring	12,000			Increase in capital equipment requirement for Biscayne Bay Coastal Wetlands Cutler.
Fixed Capital Outlay				78,588,894	
14	Increase in Biscayne Bay Coastal Wetlands	11,000,000			Increase due to allocation of new state appropriated funding for Biscayne Bay Coastal Wetlands Cutler.
15	Increase in Central Everglades Planning Project	44,805,869			Increase due new state appropriation ($64.0 million) offset by a reduction of prior-year state appropriations ($19.2 million) for EAA Storage Reservoir Conveyance Improvements and STA.
16	Increase in CERP Planning	3,311,766			Increase due new state appropriation ($11.9 million) offset by a reduction of one-time fund balance funding ($8.6 million) for CERP land acquisition.
17	Increase in Restoration Strategies Projects	19,471,259			Increase resulting from prior-year and new state appropriations for Restoration Strategies projects under construction, including STA-1W Expansion #2, G-341 Conveyance Improvements, STA-1E Modifications, and C-139 FEB.
Interagency Expenditures (Cooperative Funding)				318,460	
18	Increase in CERP Adaptive Assessment & Monitoring	75,000			Increase due to one-time fund balance funding for a Lake Okeechobee Benthic Macroinvertebrate Study.
19	Increase in USACE Monitoring	243,460			Increase is primarily due new activities for Groundwater Exchange Monitoring and Modeling (GEMM).

Changes and Trends

The Florida Legislature continues its commitment to Everglades Restoration through continued appropriations for Restoration Strategies, CERP, NEEPP, and Alternative Water Supply. In 2016, House Bill 989 (Chapter 2016-201), the Legislature stated its commitment to long-term funding for Everglades restoration, primarily those that reduce harmful discharges to the St. Lucie River and Caloosahatchee River estuaries, providing up to $200 million annually for the implementation of CERP, Long Term Plan, and NEEPP. From this funding, $32 million would be appropriated annually for Restoration Strategies through Fiscal Year 2023-24, up to $100 million for CERP, including the Comprehensive Everglades Planning Project (CEPP), and the remainder for NEEPP. In 2017, through Senate Bill 10 (Chapter 2017-10), the Legislature reinstated the commitment made in the 2016 House Bill 989 and provided an additional $33 million for the District to work with the USACE for a Post-Authorization Change Report and to acquire land or negotiate leases to implement the Everglades Agricultural Area (EAA) storage reservoir project, and authorized an additional $64 million in recurring appropriations starting in Fiscal Year 2018-19 to implement the EAA storage reservoir and other restoration projects as identified above.. In 2019, Governor DeSantis and the Florida Legislature emphasized the State's commitment to restoration and appropriated an unprecedented $373.2 million for restoration, including $2.5 million for Nubbin Slough STA (reported in Program 3.0), and continues in Fiscal Year 2020-21 with the Governor's Recommended Budget, which includes $318.6 million for restoration.

Expenditure increases between Fiscal Year 2016-17 and Fiscal Year 2018-19 in Salaries and Benefits reflect the recategorization of 14 FTE positions from Program 4.0 to this program due to the reduction of regulatory activities associated with the source control function, which supports restoration and protection efforts under the EFA and Restoration Strategies, and reallocation of eight FTE positions from Program 3.0 to implement restoration projects, as well as increases in healthcare benefit costs and FRS contributions.

Expenditure increases and decreases between Fiscal Year 2016-17 and Fiscal Year 2018-19 in Contracted Services, Operating Expenses, Operating Capital Outlay, and Fixed Capital Outlay primarily reflect shifts in project phases as they move through planning, design, and construction.

Increases in Interagency Expenditures between Fiscal Year 2016-17 and Fiscal Year 2018-19 reflect the completion of projects in the District's Cooperative Funding Program.

Decreases between Fiscal Year 2016-17 and Fiscal Year 2018-19 in Debt resulted from refinancing Certificates of Participation.

A detailed description of variances, changes and trends, and major budget items for District Everglades and CERP is contained in the District Specific Programs on pages 220-228.

AMERICAN OVERSIGHT

Budget Variances

The Fiscal Year 2020-21 Preliminary Budget has a 4.5 percent ($25.3 million) increase from the Fiscal Year 2019-20 Adopted Budget of $564.6 million. The increase is primarily within the Surface Water Projects (Activity 2.3).

Contracted Services decreased 3.9 percent ($3.4 million) primarily due to decreases in prior year and new state appropriated funding for CERP Lake Okeechobee Watershed Restoration Project ($10 million), CERP Biscayne Bay Coastal Wetlands ($1.5 million), and CERP Planning ($1 million), decreases in one-time fund balance funding for CERP Biscayne Bay Coastal Wetlands ($1.1 million), C-43 Bioassays & Mesocosms Project Phase 2 ($700,000), STA 5/6 Connection to Lake Okeechobee ($300,000), C-51W Upstream Monitoring ($302,350), and WCA3 Decomp & Sheetflow Evaluation ($256,790), as well as decreases in federal funding due to completion of grant agreement with the US Department of the Interior for S-356 Field Test ($151,000). The decreases are offset by increased new state appropriations for NEEPP-Dispersed Water Management Projects ($10.9 million) and increased cash flow requirements for New Works monitoring activities post-Kissimmee River Restoration ($609,595) and CERP project components ($467,840).

Operating Expenses decreased 49.2 percent ($4.2 million) primarily due to reduced cash flow requirements in this expense category for CEPP South – Old Tamiami Trail Relocation Project ($3.3 million) and the transfer of the C-44 Reservoir/STA Project to operations and maintenance ($888,177).

Operating Capital Outlay decreased 30.0 percent ($7.4 million) primarily due to reduced cash flow requirements in this category for CERP/CEPP Everglades Agricultural Area Reservoir Conveyance Improvements and Stormwater Treatment Area ($7.8 million) and CERP Planning ($7.5 million), as well as a decreases in one-time local funding for CERP Biscayne Bay Coastal Wetlands Cutler Design ($1.3 million) and one-time fund balance funding for STA capital construction ($500,000); offset by increased new state appropriated funding for NEEPP Caloosahatchee River & Estuary Projects ($9.7 million).

Fixed Capital Outlay increased 16.4 percent ($61.2 million) due to increased new and prior year state appropriated funding in this expense category for CERP/CEPP, including the EAA Storage Reservoir Conveyance Improvements and STA ($44.8 million), Biscayne Bay Coastal Wetlands ($11 million), and CERP Planning ($3.3 million); and Restoration Strategies ($19.5 million). Increases are offset by a reduction in cash flow requirements in this category for the Lakeside Ranch STA ($14.5 million), Lake Hicpochee Hydrologic Restoration ($1.2 million), C-44/C-23 Interconnect ($1.2 million), and Caloosahatchee (C-43) Basin Storage Reservoir ($500,000).

Interagency expenditures decreased 91.1 percent ($21 million) primarily due to reduced state appropriations for Alternative Water Supply ($17.8 million) and District match ($300,000), in addition to Northern Everglades – Caloosahatchee River Restoration Project ($3 million). Other decreases are due to reduced cash flow requirements in this expense category for monitoring associated with CERP WCA3 Decomp & Sheetflow Evaluation ($158,210) and RECOVER ($27,000), as well as decreases due to the transfer of project components to operations and maintenance for the C-44 Reservoir & STA ($13,500) and Lakeside Ranch STA ($63,500). Decreases are offset by new monitoring activities for CERP Adaptive Assessment ($75,000) and New Works Groundwater Exchange Monitoring and Modeling ($243,460).

IV. PROGRAM ALLOCATIONS

Major Budget Items for this program include the following:

- Salaries and Benefits ($17.6 million) (158 FTEs).
- Projects in The Major Project Table of this program are listed in sub-activity 2.3 Surface Water Projects ($499.3 million).
- Contracted Services:
    - Projects in The Major Project Table ($44.7 million)
    - Dispersed Water Management (DWM), including payments to service providers, monitoring, and DWM on public lands ($33.5 million).
    - Restoration Strategies Science Plan and Source Control Activities ($2.5 million).
    - Kissimmee River Restoration – Integrated Ecosystem Studies in support of the Restoration Evaluation Program ($814,345).
    - CERP monitoring post-construction (USACE Monitoring) for Biscayne Bay Coastal Wetlands Deering, C-111 Spreader Canal, and Picayune Strand Faka Union and Miller Pump Stations ($638,450).
    - CERP WCA-3 Decompartmentalization and Sheetflow Enhancement Part 1 Project for sampling and laboratory analysis in support of Decompartmentalization Physical Model testing ($210,715).
    - CERP Monitoring and Assessment Plan, including C-111 Spreader Canal Downstream Impacts ($150,000).
    - Kissimmee River Restoration Hydrologic Monitoring ($140,000).
    - Indian River Lagoon – South for C-44 Reservoir and STA Transitional Monitoring ($114,733).
    - Computer consulting services for enterprise resource support and IT security ($114,003).
- Operating Expenses:
    - CERP Indirect Support ($3.3 million).
    - Software and hardware maintenance, communications service, and IT support ($611,566).
    - CERP WCA-3 Decompartmentalization and Sheetflow Enhancement Part 1 Project for sampling and laboratory analysis in support of Decompartmentalization Physical Model testing ($113,371).

AMERICAN OVERSIGHT

- Operating Capital Outlay:
    - Projects in The Major Project Table ($17 million).
- Fixed Capital Outlay:
    - Projects in The Major Project Table ($435.2 million).
- Interagency Expenditures:
    - CERP Adaptive Assessment and Monitoring ($725,902)
    - USACE Monitoring post-construction for Biscayne Bay Coastal Wetlands Deering, C-111 Spreader Canal, and Picayune Strand Faka Union and Miller Pump Stations ($619,550).
    - CERP RECOVER - Loxahatchee Impoundment Landscape Assessment (LILA) ($213,000).
    - CERP WCA-3 Decompartmentalization and Sheetflow Enhancement Part 1 Project for monitoring activities in support of Decompartmentalization Physical Model ($116,790).
    - Kissimmee River Restoration – Integrated Ecosystem Studies Riverwoods Field Lab ($261,760).
- Existing Debt Payment: ($30.4 million).

Changes and Trends

The District has historically provided funding to local governments, special districts, utilities, homeowners associations, water users, agriculture and other public and private organizations for stormwater, alternative water supply and water conservation projects that are consistent with the agency's core mission. In Fiscal Year 2019-20 the Florida Department of Environmental Protection through the Alternative Water Supplies grant allocated $11,556,600 for construction or implementation of eight alternative water supply and twelve water conservation projects with cooperating entities. The projects are anticipated to be completed between December 2019 and June 2025. Additionally, in Fiscal Year 2019-20, Water Protection and Sustainability Program funding of $300,000, which requires a 50/50 cost match of $300,000 by the District, was allocated for construction or implementation of three alternative water supply and two water conservation projects with cooperating entities.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006382

Budget Variances

The Fiscal Year 2020-21 Preliminary Budget represents a decrease of 98.7 percent ($18.1 million) from the Fiscal Year 2019-20 Adopted Budget primarily in Interagency Expenditures due to removal of state appropriations for water supply and water resources development projects planned to be implemented in the current year.

Major Budget Items for this activity include the following:

- Salaries and Benefits ($238,544).

There are no items funded with Reserves.

AMERICAN OVERSIGHT

2.2.1 Water Resource Development Projects - Regional projects designed to create, from traditional or alternative sources, an identifiable, quantifiable supply of water for existing and/or future reasonable-beneficial uses. These projects do not include the construction of facilities for water supply development, as defined in Subsection 373.019(21), Florida Statutes. Such projects may include the construction, operation, and maintenance of major public works facilities that provide for the augmentation of available surface and ground water supply or that create alternative sources of supply. Water resource development projects are to be identified in water management district regional water supply plans or district water management plans, as applicable.

District Description

Regional water supply plans and updates thereto have been prepared and approved by the Governing Board for five planning regions that collectively cover the entire District: Lower East Coast, Lower West Coast, Upper East Coast, Upper Kissimmee Basin and Lower Kissimmee Basin. The Upper Kissimmee Basin is included in the Central Florida Water Initiative (CFWI) planning area and water supply plan. The water supply plans project water demands over at least a 20-year planning horizon and identify strategies to meet existing and future needs, including Water Resource Development projects. The water supply plans are updated every five years.

Changes and Trends

In Fiscal Year 2019-20, the District completed final calibration and scenario application of the West Coast Floridan Model and final calibration, peer review, and scenario application of the LWC Surficial Aquifer System/Intermediate Aquifer System Model, including conducting modeling public workshops; initiated the 5-Year update to the UEC Water Supply Plan including holding a public workshop and completing several draft chapters; completed the Public Draft of the 2020 CFWI RWSP update and public review comment period and completed final calibration, model documentation, scenario application, and model application documentation of the East Central Florida Transient Expanded (ECFTX) Model; completed construction of one Upper Floridan aquifer well, two Lower Floridan aquifer wells, and two Avon Park Permeable Zone wells as part of CFWI Data Monitoring and Investigation Team (DMIT) efforts; completed the 2019 Update to the saltwater interface maps in SFWMD's coastal aquifers; and continued monitoring of groundwater levels, including the United States Geological Survey groundwater monitoring network, to support water management activities and calibration of groundwater models. In addition, the District completed the 2019 update to the Lower Kissimmee Basin Water Supply Plan.

In Fiscal Year 2020-21, the District will complete the 2020 update to the CFWI Regional Water Supply Plan and the 2021 update of the Upper East Coast Water Supply Plan; compile data sets for simulations of the transient, density-dependent East Coast Floridan Model to support five-year updates to the Upper and Lower East Coast water supply plans; continue well drilling and monitoring as part of the CFWI DMIT efforts; and, continue monitoring of groundwater levels, including the United States Geological Survey groundwater monitoring network, to support water management activities and calibration of groundwater models.

Salaries and Benefits amounts change from year to year as staff redirect time between various activities and programs. Contracted Services decreased from Fiscal Year 2016-17 to Fiscal Year 2018-19 due to completion of a water supply plan implementation study.

Budget Variances

The Fiscal Year 2020-21 Preliminary Budget represents an increase of 2.3 percent ($5,096) from the Fiscal Year 2019-20 Adopted Budget in Salaries and Benefits due to increases in FRS contributions.

Major Budget Items for this sub-activity include the following:

- Salaries and Benefits ($217,093).

There are no items funded with Reserves.

AMERICAN OVERSIGHT

2.2.2 Water Supply Development Assistance - Financial assistance for regional or local water supply development projects. Such projects may include the construction of facilities included in the term "water supply development" as defined in Subsection 373.019(21), Florida Statutes.

District Description

Coordination of financial assistance requests for regional or local water supply development projects. Such projects may include the construction of facilities included in the term "water supply development" as defined in Section 373.019(21), Florida Statutes.

Local governments, water users, and water utilities are primarily responsible for implementing water supply development. The Water Protection and Sustainability Program, created during the 2005 legislative session, strengthened the link between water supply plans and local government comprehensive plans and a cost-sharing program for alternative water supply projects when funding is budgeted by the state. In addition, the legislation included requirements for the water supply development component of the regional water supply plans by making the plans more specific. The intent is to make the plans more useful to local water suppliers in developing alternative water supplies, and then provide permitting and funding incentives to local water suppliers to build projects included in the plan.

Changes and Trends

Over the last few years where funding has been allocated for Interagency Expenditures (Cooperative Funding), the District has provided funding to local governments, special districts, utilities, homeowners associations, water users and other public and private organizations for stormwater, alternative water supply and water conservation projects that are consistent with the agency's core mission. In Fiscal Year 2019-20, the Florida Department of Environmental Protection through the Alternative Water Supplies grant allocated $11,556,600 for construction or implementation of eight alternative water supply and twelve water conservation projects with cooperating entities. The projects are anticipated to be completed between December 2019 and June 2025. In Fiscal Year 2019-20, Water Protection and Sustainability Program funding of $300,000, which requires a 50/50 cost match of $300,000 by the District, was allocated for construction or implementation of three alternative water supply and two water conservation projects with cooperating entities. Interagency Expenditures decreased for Fiscal Year 2020-21 because it is not yet known what amounts will be available from state appropriations for water supply. (See Appendix VIII for more detail).

Budget Variances

The Fiscal Year 2020-21 Preliminary Budget represents a decrease of 99.9 percent ($18.1 million) in Interagency Expenditures from the Fiscal Year 2019-20 Adopted Budget due to removal of prior-year state appropriation for water supply and water resource development grant.

Major Budget Items for this sub-activity include the following:

- Salaries and Benefits ($21,451).

There are no items funded with Reserves.

2.3 Surface Water Projects *- Projects that restore or protect surface water quality, flood protection, or surface water-related resources through the acquisition and improvement of land, construction of public works, and other activities.*

District Description

Those projects that restore or protect surface water quality, flood protection, or surface water-related resources through the acquisition and improvement of land, construction of public works, and other activities. Surface Water Projects include the Kissimmee River Restoration Project, design and implementation of the NEEPP, Everglades Forever Act (EFA) projects, Critical Restoration Projects, and the CERP, including the Central Everglades Planning Project.

The Kissimmee Basin encompasses more than two dozen lakes in the Kissimmee Chain of Lakes, their tributary streams and associated marshes and the Kissimmee River and floodplain. The basin forms the headwaters of Lake Okeechobee and the Everglades. The Kissimmee River Restoration Project includes restoration of the Kissimmee River and floodplain by backfilling the C-38 flood control canal and restoring the natural river channel and flood plain. Continued activities include remaining real estate requirements, construction of project features including canal backfilling and protection of water for the natural system.

Activities associated with the NEEPP include continued implementation of the Lake Okeechobee, St. Lucie River, and Caloosahatchee River Watershed Protection Plans. Specific activities include: implementation of Dispersed Water Management Projects to retain water and nutrients; evaluation of regulatory source control programs in support of NEEPP; continuation of partnerships with agriculture and urban communities to implement Best Management Practices; and implementation of a variety of source control, restoration, and water quality and storage projects.

The Dispersed Water Management program continues to provide opportunities to partner with other entities on water retention/storage projects. Existing projects include interim water retention projects on District lands, cooperative partnerships with private landowners, Northern Everglades Payment for Environmental Services (NE-PES) on ranch lands, and water farming pilots on fallow citrus lands, primarily in the Northern Everglades region. Through these projects, 126,470 acre-feet of storage is currently available to help offset any necessary regulatory releases from Lake Okeechobee; a potential 222,310 acre-feet of storage is in various stages of planning, design, or construction.

The District Everglades Program is focused on the District's responsibilities outlined in the Everglades Forever Act (EFA) as well as the settlement agreement. The EFA directed the District to acquire land and to design, permit, construct and operate STAs to reduce phosphorus levels in stormwater runoff and other sources before it enters the Everglades Protection Area. The goal of the District Everglades Program is to contribute to Everglades restoration by improving water quality, hydrology and ecology.

The Comprehensive Everglades Restoration Plan (CERP) contains more than 60 major components that involve the creation of approximately 217,000 acres of reservoirs and wetland-based water treatment areas. These components will vastly improve the quantity, quality, timing, and distribution of water for the South Florida environment. In addition, implementation of CERP will improve or sustain water supplies for urban and agricultural needs, while maintaining current C&SF Flood Control Project purposes. CERP includes pilot projects to test technologies, such as Aquifer Storage and Recovery wells (ASR) and seepage management

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006389

methods, which are essential to the implementation of CERP. CERP also includes seven Critical Restoration Projects, for which Project Cooperative Agreements were executed by the USACE and the District.

The EFA and CERP surface water projects are unique to the South Florida Water Management District. As such, separate narratives and programmatic spreadsheets for each of these projects are provided in the section titled "District Specific Programs and Activities" on pages 220-228.

Changes and Trends

The Florida Legislature continues its commitment to Everglades Restoration through continued appropriations for Restoration Strategies, CERP, and NEEPP. In 2016, House Bill 989 (Chapter 2016-201), the Legislature reaffirmed its commitment to long-term funding for Everglades restoration, primarily those that reduce harmful discharges to the St. Lucie River and Caloosahatchee River estuaries, providing up to $200 million annually for the implementation of CERP, Long Term Plan, and NEEPP. From this funding, $32 million would be appropriated annually for Restoration Strategies through Fiscal Year 2023-24, up to $100 million for CERP, including the Comprehensive Everglades Planning Project (CEPP), and the remainder for NEEPP. In 2017, through Senate Bill 10 (Chapter 2017-10), the Legislature reinstated the commitment made in the 2016 House Bill 989 and provided an additional $33 million for the District to work with the USACE for a Post-Authorization Change Report and to acquire land or negotiate leases to implement the Everglades Agricultural Area (EAA) storage reservoir project, and authorized an additional $64 million in recurring appropriations starting in Fiscal Year 2018-19 to implement the EAA storage reservoir and other restoration projects as identified above.. In 2019, Governor DeSantis and the Florida Legislature emphasized the State's commitment to restoration and appropriated an unprecedented $373.2 million for restoration, including $2.5

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006390

million for Nubbin Slough STA (reported in Program 3.0), and continues in Fiscal Year 2020-21 with the Governor's Recommended Budget, which includes $318.6 million for restoration.

Expenditure increases between Fiscal Year 2016-17 and Fiscal Year 2018-19 in Salaries and Benefits reflect the recategorization of 14 FTE positions from Program 4.0 to this program due to the reduction of regulatory activities associated with the source control function, which supports restoration and protection efforts under the EFA and Restoration Strategies, and reallocation of eight FTE positions from Program 3.0 to implement restoration projects, as well as increases in healthcare benefit costs and FRS contributions.

Expenditure increases and decreases between Fiscal Year 2016-17 and Fiscal Year 2018-19 in Contracted Services, Operating Expenses, Operating Capital Outlay, and Fixed Capital Outlay primarily reflect shifts in project phases as they move through planning, design, and construction.

Increases in Interagency Expenditures between Fiscal Year 2016-17 and Fiscal Year 2018-19 reflect the completion of projects in the District's Cooperative Funding Program.

Decreases between Fiscal Year 2016-17 and Fiscal Year 2018-19 in Debt resulted from refinancing Certificates of Participation.

Budget Variances

The Fiscal Year 2020-21 Preliminary Budget represents a net increase of 8.0 percent ($43.4 million) from the Fiscal Year 2019-20 Adopted Budget primarily due to:

Contracted Services decreased 3.9 percent ($3.4 million) primarily due to decreases in prior year and new state appropriated funding for CERP Lake Okeechobee Watershed Restoration Project ($10 million), CERP Biscayne Bay Coastal Wetlands ($1.5 million), and CERP Planning ($1 million), decreases in one-time fund balance funding for CERP Biscayne Bay Coastal Wetlands ($1.1 million), C-43 Bioassays & Mesocosms Project Phase 2 ($700,000), STA 5/6 Connection to Lake Okeechobee ($300,000), C-51W Upstream Monitoring ($302,350), and WCA3 Decomp & Sheetflow Evaluation ($256,790), as well as decreases in federal funding due to completion of grant agreement with the US Department of the Interior for S-356 Field Test ($151,000). The decreases are offset by increased new state appropriations for NEEPP-Dispersed Water Management Projects ($10.9 million) and increased cash flow requirements for New Works monitoring activities post-Kissimmee River Restoration ($609,595) and CERP project components ($467,840).

Operating Expenses decreased 53.0 percent ($4.2 million) primarily due to reduced cash flow requirements in this expense category for CEPP South – Old Tamiami Trail Relocation Project ($3.3 million) and the transfer of the C-44 Reservoir/STA Project to operations and maintenance ($888,177).

Operating Capital Outlay decreased 30.0 percent ($7.4 million) primarily due to reduced cash flow requirements in this category for CERP/CEPP Everglades Agricultural Area Reservoir Conveyance Improvements and Stormwater Treatment Area ($7.8 million) and CERP Planning ($7.5 million), as well as a decreases in one-time local funding for CERP Biscayne Bay Coastal Wetlands Cutler Design ($1.3 million) and one-time fund balance funding for STA capital construction ($500,000); offset by increased new state appropriated funding for NEEPP Caloosahatchee River & Estuary Projects ($9.7 million).

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006391

Fixed Capital Outlay increased 16.4 percent ($61.2 million) due to increased new and prior year state appropriated funding in this expense category for CERP/CEPP, including the EAA Storage Reservoir Conveyance Improvements and STA ($44.8 million), Biscayne Bay Coastal Wetlands ($11 million), and CERP Planning ($3.3 million); and Restoration Strategies ($19.5 million). Increases are offset by a reduction in cash flow requirements in this category for the Lakeside Ranch STA ($14.5 million), Lake Hicpochee Hydrologic Restoration ($1.2 million), C-44/C-23 Interconnect ($1.2 million), and Caloosahatchee (C-43) Basin Storage Reservoir ($500,000).

Interagency expenditures decreased 59.7 percent ($2.9 million) primarily due to reduced state appropriations for Northern Everglades – Caloosahatchee River Restoration Project ($3 million). Other decreases are due to reduced cash flow requirements in this expense category for monitoring associated with CERP WCA3 Decomp & Sheetflow Evaluation ($158,210) and RECOVER ($27,000), as well as decreases due to the transfer of project components to operations and maintenance for the C-44 Reservoir & STA ($13,500) and Lakeside Ranch STA ($63,500). Decreases are offset by new monitoring activities for CERP Adaptive Assessment ($75,000) and New Works Groundwater Exchange Monitoring and Modeling ($243,460).

- Operating Expenses:
    - CERP Indirect Support ($3.3 million).
    - CERP WCA-3 Decompartmentalization and Sheetflow Enhancement Part 1 Project for sampling and laboratory analysis in support of Decompartmentalization Physical Model testing ($113,371).
- Operating Capital Outlay:
    - Projects in the table above ($17 million).
- Fixed Capital Outlay:
    - Projects in the table above ($435.2 million).
- Interagency Expenditures:
    - CERP Adaptive Assessment and Monitoring ($725,902).
    - USACE Monitoring post-construction for Biscayne Bay Coastal Wetlands Deering, C-111 Spreader Canal, and Picayune Strand Faka Union and Miller Pump Stations ($619,550).
    - CERP RECOVER - Loxahatchee Impoundment Landscape Assessment (LILA) ($213,000).
    - CERP WCA-3 Decompartmentalization and Sheetflow Enhancement Part 1 Project for monitoring activities in support of Decompartmentalization Physical Model ($116,790).
    - Kissimmee River Restoration – Integrated Ecosystem Studies Riverwoods Field Lab ($261,760).
    - Existing Debt Payment: ($30.4 million)

Items funded with Reserves without restrictions include: Restoration Strategies ($16 million), NEEPP & EFA Source Control ($30,600), Kissimmee River Restoration Evaluation Program (KRREP) Fish Telemetry Study ($69,000), A portion of Kissimmee River Restoration Evaluation Lower Basin, Gardner Cobb & Lake Okeechobee Aerial Imagery ($37,500), Budget Stabilization & Future Expenditures to be Determined by the Board for CERP Planning ($700,000), Scientific Support for CERP Adaptive Assessment ($75,000), and O&M New Works for Biscayne Bay Coastal Wetlands Deering, C-111 Spreader Canal, and Picayune Strand Faka Union and Miller Pump Stations ($1.6 million).

Items funded with Reserves with restrictions include: Senate Bill 10 Projects pursuant to Subsection 373.041(3)(b)4, Florida Statutes for Everglades Agricultural Area Storage Reservoir Conveyance Improvements and Stormwater Treatment Area ($94 million), and Mitigation – Lake Belt/Wetland for personnel services in support of Restoration Strategies ($13,093).

AMERICAN OVERSIGHT

2.4 Other Cooperative Projects *- Any non-water source development cooperative effort under this program area between a water management district and another organization. This does not include projects resulting in capital facilities that are owned or operated by the water management district.*

District Description

Any non-water source development cooperative effort under this program area between a water management district and another organization.

This activity includes non-water source development cooperative water conservation efforts between the District and other organizations. The District's water conservation program components are organized into regulatory, voluntary and incentive-based, and education and marketing initiatives, and are designed to build on and complement successful water conservation initiatives at the local, state, and national levels. The program is dynamic and adaptable, with an on-going commitment to explore and consider additional water-saving opportunities, technologies, research, and partnerships.

AMERICAN OVERSIGHT

Changes and Trends

The District has historically provided funding to local governments, special districts, utilities, homeowners associations, water users, agriculture and other public and private organizations for stormwater, alternative water supply and water conservation projects that are consistent with the agency's core mission. In Fiscal Year 2019-20, the Florida Department of Environmental Protection through the Alternative Water Supplies grant allocated $11,556,600 for construction or implementation of eight alternative water supply and twelve water conservation projects with cooperating entities. The budget for these projects is shown in section 2.2.2. The Interagency Expenditures decreased in Fiscal Year 2019-20 for the Water Savings Incentive Program and the remaining funding is for the Florida Automated Weather Network (FAWN).

Budget Variances

The Fiscal Year 2020-21 Preliminary Budget represents an increase of 0.3 percent ($823) from the Fiscal Year 2018-19 Adopted Budget in Salaries and Benefits due to increases in FRS contributions.

Major Budget Items for this activity include the following:

- Salaries and Benefits ($192,043).
- Interagency Expenditures (Cooperative Funding):
    - Florida Automated Weather Network (FAWN) ($75,000).

There are no items funded with Reserves.

2.7 Technology and Information Services *- This activity includes computer hardware and software, data lines, computer support and maintenance, IT consulting services, data centers, network operations, web support and updates, desktop support, and application development associated with this Program and related activities.*

District Description

This activity includes computer hardware and software, data lines, computer support and maintenance, IT consulting services, data centers, network operations, web support and updates, desktop support, and application development associated with this Program and related activities.

Information technology items (salaries, contractors, hardware / software maintenance, and other operating costs) are directly charged to operational activities of district core functions where there is a clear linkage between the operational activity and the information technology system, application or staff that is used to support the operational activities.

Changes and Trends

This sub-activity represents a continued level of service consistent with the past five years.

Budget Variances

The Fiscal Year 2020-21 Preliminary Budget represents an increase of 1.0 percent ($16,273) from the Fiscal Year 2019-20 Adopted Budget which is for Salaries and Benefits due to increases in FICA and FRS retirement contributions.

AMERICAN OVERSIGHT

IV. PROGRAM ALLOCATIONS

Major Budget Items for this activity include the following:

- Salaries and Benefits ($987,886).
- Contracted Services:
    - Lake Okeechobee IT Support for computer consulting services for enterprise resource support and IT security ($114,003).
- Operating Expenses:
    - Lake Okeechobee IT Support for software and hardware maintenance, communications service, and IT support ($611,566).

There are no items funded with Reserves.

IV. PROGRAM ALLOCATIONS

3.0 Operation and Maintenance of Lands and Works

This program includes all operation and maintenance of facilities, flood control and water supply structures, lands, and other works authorized by Chapter 373, F.S.

District Description

This program contains field operations, right-of-way, engineering and construction, land management, recreation and public use, upland and wetland species invasive management. Additional activities include canal/levy and aquatic plant management, stormwater treatment area operations, infrastructure management, facilities and hydrology/hydraulics and includes all operation and maintenance of facilities, flood control and water supply structures, lands, and other works authorized by Chapter 373, F.S.

IV. PROGRAM ALLOCATIONS

South Florida Water Management District
REDUCTIONS - NEW ISSUES
3.0 Operation and Maintenance of Lands and Works
Fiscal Year 2020-21
Preliminary Budget - January 15, 2020

	FY 2019-20 Budget (Adopted)		**749**	**310,215,112**	
	Reductions				
Issue	Description	Issue Amount	Workforce	Category Subtotal	Issue Narrative
Salaries and Benefits			-	-	
Other Personal Services				-	
Contracted Services				(5,018,011)	
1	Decrease in Biocontrol Exotic Plant	(661,536)			The reduction is due to funding being re-aligned to correct CI State Group (Operating Expense).
2	Decrease in Canal/Levee Maintenance	(2,125,000)			The reduction is due to one-time funding of Coastal Resiliency and the C-100A project.
3	Decrease in Capital Works Projects	(825,000)			The reduction is due to the decreased need for the Operations Decision Support System project.
4	Decrease in Contamination Assessments	(5,307)			The reduction is due to funding being re-aligned to correct CI State Group (Operating Expense).
5	Decrease in Land Stewardship Restoration & Monitoring	(703,500)			The reduction is due to the decreased need for funding for Dade/Broward Levee and Lake Belt Monitoring.
6	Decrease in LTP STA O&M - Structure Inspections	(50,000)			The reduction is due to a reduced need in the STA Structure Inspection Program needs.
7	Decrease in Public Use and Security	(47,000)			The reduction is due to the completion of renovation projects for public use.
8	Decrease in Telemetry Maintenance	(668)			The reduction is due to a decreased need for funding Merritt Pump Station monitoring stations.
9	Decrease in Water Management System & NAVD88	(600,000)			The reduction is due to the completion of the NAVD88 project.
Operating Expenses				(5,353,858)	
10	Decrease in C&C Data Log RTU New Installations	(650)			The reduction is due to the re-alignment of funding within O&M for current needs.
11	Decrease in Canal Maintenance	(7,914)			The reduction is due to the re-alignment of funding within O&M for current needs.
12	Decrease in Emergency Management	(5,083)			The reduction is due to funding being re-aligned to correct activity.
13	Decrease in Land Stewardship Mechanical Vegetation Control	(60,000)			The reduction is due to the re-alignment of funding within O&M for current needs.
14	Decrease in Land Stewardship Restoration & Monitoring	(652,685)			The reduction is due to the decreased need for the C-139 Annex Restoration project while under construction.
15	Decrease in Levee Maintenance	(19,774)			The reduction is due to the re-alignment of funding within O&M for current needs.
16	Decrease in Long Tern Plan Stormwater Treatment Areas (LTP STA) O&M	(924,000)			The reduction was due to the completion of the G-310, G-335, G-370 and G-372 Grounding Modification project's.
17	Decrease in LTP STA O&M - Contamination	(73,100)			The reduction is due to the cyclical needs for the STA air permits and fuel tank storage and inspections.
18	Decrease in Prescribed Burn	(500)			The reduction is due to the re-alignment of funding within O&M for current needs.
19	Decrease in Pump Station Modification	(1,125,000)			The reduction is due to the G-420, G-20S and G-422 modification project construction needs.
20	Decrease in Structure Maintenance	(22,617)			The reduction is due to the re-alignment of funding within O&M for current needs.
21	Decrease in Structure Overhaul	(204,138)			The reduction is due to the decreased need in the Gate Overhaul Program for the C&SF structures.
22	Decrease in Structure/Bridge Modification/Repairs	(2,114,748)			The reduction was due the one time funding for S-29 Coastal Resilience project planning & design.
23	Decrease in Telemetry Maintenance	(117,649)			The reduction is due to the re-alignment of funding within O&M for current needs.
24	Decrease in Tree Management	(26,000)			The reduction is due to the re-alignment of funding within O&M for current needs.
Operating Capital Outlay				(818,500)	
25	Decrease in Pump Station Modification	(50,000)			The reduction is due to the S-2, S-3, S-4 Pump Refurbishment project design being moved out.
26	Decrease in Structure Maintenance	(90,500)			The reduction is due to one-time funding of BCB Field Station equipment needs.
27	Decrease in Structure/Bridge Modification/Repairs	(678,000)			The reduction is due to one-time funding of Coastal Resilience Storm Surge Protection and S-169 Relocation project finishing design phase.
Fixed Capital Outlay				(9,611,999)	
28	Decrease in Capital Works Projects	(2,500,000)			The reduction is due to the one-time funding for the Nubbin-Slough STA repairs project.
29	Decrease in Communication and Control	(255,000)			The reduction is due to the next phase of design and construction on the IT South Shelters project, S-331 Communication Center and BCB Communications System Improvements projects.
30	Decrease in Project Culvert Replacement/Repairs/Modification	(675,837)			The reduction is due to the completion of the L-8 Dupuis Area Culverts project.
31	Decrease in Structure/Bridge Modification/Repairs	(6,069,351)			The reduction is from completion of construction of S-151 Replacement, BCB Electrification & Remote Operations & S-72/S-75 Spillway Refurbishments.
32	Decrease in Water Management System & NAVD88	(111,811)			The reduction is for completion of NAVD88 project.

IV. PROGRAM ALLOCATIONS

South Florida Water Management District
REDUCTIONS - NEW ISSUES
3.0 Operation and Maintenance of Lands and Works
Fiscal Year 2020-21
Preliminary Budget - January 15, 2020

New Issues					
Issue	Description	Issue Amount	Workforce	Category Subtotal	
Salaries and Benefits			1	1,103,084	Salaries and Benefits increased in the FY2020-21 Preliminary budget for various reasons. Turnover in positions and the hiring process, forecasted increase in FRS contributions and a job study. The job study was conducted comparing the District to other governmental agencies across the State of Florida, resulting in select job categories increasing to more competitive levels while FTEs at or above the job study levels were not increased.
1	Increase in Total Fringe Benefits	571,304			
2	Increase in Total Salaries and Wages	531,780			
Other Personal Services				-	
Contracted Services				1,367,182	
3	Increase in Flood Protection LOS and Sea Level Rise Resiliency	1,075,000			The increase is due to funding for Coastal Resilience and Flood Protection Level of Service.
4	Increase in Levee Maintenance	10,900			The increase is for the Lakeside Ranch STA and Ten Mile Creek Levee maintenance.
5	Increase in O&M Program Support	5,307			The increase is due to additional funding needed for the Remote Operations Vehicle (ROV) supporting the underwater inspection program.
6	Increase in Pumping Operations	115,000			The increase is for additional funding supporting the L63N and Kissimmee ASR Well monitoring.
7	Increase in Security Management	10,975			The increase is due to additional funding for the Districts security systems.
8	Increase in Structure Inspections	50,000			The increase is due to additional funding in support of the cyclical C&SF Structure Inspection Program.
9	Increase in Survey Support	100,000			The increase is due to the additional surveying needs for District lands.
Operating Expenses				15,032,705	
10	Increase in Aquatic Plant Control	210,521			The increase is due to new works coming online for the C-44 STA.
11	Increase in Biocontrol Exotic Plant	661,536			The increase is due to funding being re-aligned to correct CI State Group (Operating Expense).
12	Increase in Canal/Levee Maintenance	940,000			The increase is due to additional funding needed for the next phase of the BCB Canal Improvements project.
13	Increase in Communication and Control	2,450,000			The increase is due to additional funding needed for the next phase of the Manatee Gate Control Panel Replacements project.
14	Increase in Construction	900			The increase is due to funding that was re-directed from other O&M STA activities.
15	Increase in Contamination Assessments	172,450			The increase is due to additional funding needed in support of District air and environmental permits and fees.
16	Increase in Exotic Plant Control	4,126,081			The increase is due to additional new works coming online for Picayune Strand vegetation management.
17	Increase in Field Station Maintenance	9,610			The increase is due to additional funding needed for new works coming online.
18	Increase in Land Stewardship Equipment & Infrastructure Maintenance	77,000			The increase is due to additional funding needs for Lake Belt L-30 Structure Maintenance and road and culvert maintenance for Southern CREW.
19	Increase in Land Stewardship Interim Lands - Administration	3,200			The increase is due to additional funding needs for interim lands support and administration.
20	Increase in LTP STA O&M - Compliance	267			The increase is due to funding that was re-directed from other O&M STA activities.
21	Increase in LTP STA O&M - Pump Station Maintenance	29,412			The increase is due to funding that was re-directed from other O&M STA activities.
22	Increase in LTP STA O&M - Pump Station Modification/Repairs	3,760,580			The increase is due to construction needs for the STA G-310/G-335 Trash Rake Replacement.
23	Increase in Movement of Water	950			The increase is due to funding that was re-directed from other O&M STA activities.
24	Increase in Mowing	142,164			The increase is due to funding that was re-directed from other O&M activities.
25	Increase in Legacy	50			The increase is due to funding that was re-directed from other O&M activities.
26	Increase in O&M Fleet Overhead	610			The increase is due to funding that was re-directed from other O&M activities.
27	Increase in O&M IT Support	8,178			The increase is due to funding that was re-directed from other O&M activities.
28	Increase in O&M Program Support	333,500			The increase is due to O&M new investments for the field stations.
29	Increase in Preventative Maintenance & Operational Plan	1,208,250			The increase is due to the additional funding in support of maintenance and replacement needs for the Headquarters and EOC building.
30	Increase in Public Use and Security	2,500			The increase is due to funding that was re-directed from other O&M activities.
31	Increase in Pump Station Maintenance	30,738			The increase is due to additional funding needed for new works coming online.
32	Increase in Pump Station Maintenance - Fleet	39,960			The increase is due to the re-alignment to the correct functional are for work being done on the Fleet supporting the Pump Stations.
33	Increase in Pumping Operations	667,255			The increase is due to additional funding needed for new works coming online for the C-44 STA and Pump Station, Kissimmee and L63N ASR wells.
34	Increase in Safety Management	5,083			The increase is due to funding being re-aligned to correct activity.
35	Increase in Security Management	79,764			The increase is due to the repairs needed for the District's security system and software upgrades.
36	Increase in Terrestrial Plant Control	72,146			The increase is due to additional funding needed for new works coming online.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006404

Changes and Trends

Salaries and Benefits decreased between Fiscal Year 2016-17 and Fiscal Year 2018-19 due to staff reallocation in support of new project initiatives within the agency. Some of the major decreases in Contracted Services between Fiscal Year 2016-17 to Fiscal Year 2018-19 are due to the pass-through funding for the CEMEX land acquisition funded with Lake Belt Mitigation. Fixed Capital Outlay has had an upward trend over the last three years as projects have moved from design to construction, as well as the pass-through funding for the CEMEX land acquisition completion. Increases and decreases within Contracted Services, Operating Expenses, Operating Capital Outlay and Fixed Capital Outlay between Fiscal Year 2016-17 and Fiscal Year 2018-19 are primarily due to the phases of projects within the Operations and Maintenance Refurbishment program as they move from planning, design and construction. The Operations and Maintenance Refurbishment program has also shown a steady increase over the last five years due to funding being redirected to support the aging system infrastructure along with the ongoing commitment to implement refurbishment plans for operational and capital projects such as critical water control structures and pump stations. The program continues with over $60 million allocated in the Fiscal Year 2020-21 Preliminary Budget for priority projects and activities critical to the strength and condition of the C&SF, STAs and BCB which continue to be a Governing Board core mission priority.

For the Fiscal Year 2020-21 Preliminary Budget, one of the major increases in funding in this activity is tied the C-139 Annex Restoration Project. Funding for the C-139 Annex Restoration Project has varied from year to year as the project goes through its different phases of planning, design, and construction. Land management activities continue to be funded using ad valorem, mitigation, state revenues from the Land Acquisition Trust Fund, and lease revenues. Land Acquisition Trust Fund revenues have allowed the District to maintain the level of service by funding maintenance and land management needs. Lease revenue that is generated from lands acquired through the Save Our Everglades Trust Fund and generated using Federal grant funds is being used to support land management activities and reduce ad valorem expenditures.

Land management activities continue to be funded through a variety of sources including ad valorem, mitigation funds, state revenues from the Land Acquisition Trust Fund and lease revenues. The Legislature has provided Land Acquisition Trust Fund for land management and vegetation management activities. This funding is located within Operating Expenses ($2.2 million) and Contracted Services ($190,272).

The Hurricane/Emergency Reserve is $61.3 million and is re-budgeted each year.

Additional new infrastructure coming online, due to CERP, NEEPP and Restoration Strategies projects completing construction, continues to affect the Operations and Maintenance of Lands and Works budget. Funding is required for the overall operations and maintenance of the new sites along with staffing to support the new infrastructure. Over the next few years, major projects being completed are the C-44 STA and Pump Station, Caloosahatchee River (C-43) West Basin Storage Reservoir, Everglades Agricultural Area Storage Reservoir Conveyance Improvements and Stormwater Treatment Area, Lakeside Ranch Phase 2, Lake Hicpochee, Picayune Strand Restoration along with several Restoration Strategies project completions. This new infrastructure will continue to have financial affects through all activities within 3.0.

AMERICAN OVERSIGHT

Budget Variances

This program has a 2.8 percent ($8.8 million) increase from the Fiscal Year 2019-20 Adopted Budget of $310.2 million. The largest increase is in Operating Capital Outlay 18.9 percent ($6 million) and is primarily due to the additional Lake Belt Mitigation funds for the on-going design and construction on the C-139 Annex Restoration project. Increases in Operating Expenses 10.2 percent ($9.7 million) are primarily due to new works of the District coming online as well as ongoing repairs and maintenance of the C&SF System and Operations and Maintenance Refurbishment Program. Contracted Services decreased 26.0 percent ($3.7 million) primarily in support of multi-year needs for the Operations Decision Support System, initial planning and field investigations for coastal resiliency projects, and completion of the Vertical Datum (NAVD88) project. In the Fiscal Year 2020-21 Preliminary Budget, there is an overall decrease in Fixed Capital Outlay of 11.8 percent ($4.4 million) which reflects the Operations and Maintenance Refurbishment Programs multi-year project cash flow requirements for design, construction and completion. Salaries and Benefits has a 1.6 percent ($1.1 million) increase due to additional staff being allocated to support the program and turnover in positions and the hiring process, forecasted increase in FRS contributions and a job study. The job study was conducted comparing the District to other governmental agencies across the State of Florida, resulting in select job categories increasing to more competitive levels while FTEs at or above the job study levels were not increased. Also, the budgeted salaries for vacant positions in the FY2020-21 Preliminary budget were increased based on the job study.

AMERICAN OVERSIGHT

IV. PROGRAM ALLOCATIONS

Major Budget Items for this program include the following:

- Salaries and Benefits ($71.3 million) (749 FTEs).
- Projects budgeted in this program are in tables in 3.1 & 3.2 sub-activity of this program ($77 million).
- Reserves – Hurricane/Emergency Reserve ($61.3 million).
- Contracted Services:
  - Projects listed in 3.2 sub activity table ($2.1 million).
  - Telemetry and Electronics Maintenance ($1.7 million), which includes:
    - SCADA Stillingwell & Platform Program ($1 million).
  - Structure Inspections ($1.6 million).
  - Structure and Pump Station Maintenance ($868,843).
  - Operations & Maintenance Program Support ($822,222).
  - Computer consulting services ($556,010), enterprise resource support and IT security.
  - Public Use and Security ($200,272).
  - Capital Projects Works - Operations Decision Support System (ODSS) Upgrades ($200,000).
  - Land Stewardship Restoration and Monitoring ($173,500).
  - Permitting support - Right of Way ($172,752).
  - Aquatic Plant Control ($140,000).
- Operating Expenses:
  - Exotic Plant Control ($18.3 million), which includes:
    - The District anticipates $2 million from the U.S. Fish and Wildlife Service in federal funding for lygodium and melaleuca treatments within the Loxahatchee Refuge.
  - Self-Insurance Programs (comprised of health insurance, workers compensation, property insurance, general liability) ($14.0 million).
  - Projects listed in 3.1 & 3.2 sub activity tables ($15.1 million).
  - Movement of Water/Pumping Operations ($9.5 million).

AMERICAN OVERSIGHT

- Structure & Pump Station Maintenance/Modification ($8.6 million), which includes:
    - Pump & Engine Overhaul Program ($1.7 million).
    - C-1 Connector Canal Control Gate ($1 million).
    - G-420, G-420S, G-422 Modifications ($625,000).
    - Gate & Cylinder Overhaul Program ($358,014).
    - Project Culvert In-Kind Replacement Program ($200,000).
    - Fall Protection and Generator Replacement Programs ($150,000).
- Aquatic Plant Control/ LTP STA O&M ($6.2 million).
- Fleet vehicle fuel, oil, lubricants, repairs, parts and supplies ($5.3 million).
- Maintenance of Canals/Levees ($5.8 million).
- Software maintenance ($2.5 million).
- Terrestrial Plant Control/ LTP STA O&M ($2.5 million).
- Maintenance of the C&SF and STA Structure Operations ($2.3 million).
- Telemetry and Electronics Maintenance ($1.7 million), which includes:
    - Microwave Tower Repair Program ($250,000).
- Exotic Animal Management ($1.1 million).
    - Python Elimination Program in support of Governor DeSantis priority initiative ($1.1 million).
- Utilities ($942,005).
- Public Use and Security/ LTP STA O&M ($762,050).
    - The District plans to continue partnerships with state agencies such as Florida Fish and Wildlife Conservation Commission (FWC) for enhanced patrols on District and project lands.
- Land Stewardship Equipment and Infrastructure Maintenance ($749,598).
- Electrical and general maintenance contractual services ($684,146).
- Land Stewardship Interim Lands – Administration/PILT ($540,862).
- Security Management ($465,979).
- Land Stewardship Mechanical Vegetation Control ($243,000).

AMERICAN OVERSIGHT

- Operating Capital Outlay:
  - Projects listed in 3.1 & 3.2 sub activity tables ($28 million).
  - Structure & Pump Station Maintenance/Modification ($5.9 million), which includes:
    - S-332 B & C Pump Station Replacement-Planning ($4.1 million).
  - O&M Program Support/Replacement Field Station Equipment ($3 million).
  - Telemetry Maintenance for SCADA Upgrades ($1 million).
  - Replacement of laboratory equipment ($103,600).
- Fixed Capital Outlay:
  - Projects listed in 3.2 sub activity table ($30.2 million).
  - Clewiston Field Station Rehabilitation ($1.6 million).
  - STA Automation Upgrades ($869,000).
  - Lake Belt Land Acquisition Mitigation; Future land acquisition as approved by Lake Belt Mitigation Plan, Pennsuco Willing Sellers ($335,890).
- Interagency Expenditures:
  - Exotic / Aquatic / Terrestrial plant control activities ($422,500).
  - Structure & Pump Station Maintenance ($173,952).
  - Fish collection and laboratory services ($30,500).

AMERICAN OVERSIGHT

3.1 Land Management *- Maintenance, custodial, and restoration efforts for lands acquired through federal, state and locally sponsored land acquisition programs.*

District Description

Maintenance, custodial, public use improvements, and restoration efforts for lands acquired through Save Our Rivers, Preservation 2000, Florida Forever, or other land acquisition programs. The District manages lands in accordance with the objectives of these programs and in accordance with Section 373.1391, F.S. There are two major land management initiatives:

- Conservation Lands - The Conservation lands management objectives require that these lands be restored to and maintained in a native state and condition and be available for resource-based recreation such as hiking, camping, horseback riding, boating, hunting and fishing. The maintenance and restoration needs for these properties usually involve the control of invasive exotic vegetation, removal of ditches and levees needed to restore the natural flow of water, utilization of prescribed fire, and the control of woody vegetation through mechanical means as necessary to restore and manage native plant communities. In areas of severe degradation, habitats may be restored through the direct planting of native plant species.

- Water Resource Project Lands - Interim land management responsibilities for water resource project lands is to provide basic land management services for properties acquired by the District for future water resource projects, including CERP and other projects until the land is needed for construction. These lands will ultimately be used as stormwater treatment areas, surface water reservoirs, ground water recharge areas, and / or buffer lands between constructed projects and lands under private ownership. These lands are not specifically acquired or designated for environmental enhancement, restoration or preservation purposes, and generally have limited recreational value due to previous and sometimes on-going agricultural use.

Reserves - Emergency Response	$ -	$ -	$ -
TOTAL	$ 8,479,936	$ 20,822,352	$ 29,302,288

Changes and Trends

The decreases in Contracted Services and Fixed Capital Outlay between Fiscal Year 2016-17 to Fiscal Year 2018-19 are due to the budgeting and expending of the pass-through funding for the CEMEX land acquisition funded with Lake Belt Mitigation.

For the Fiscal Year 2020-21 Preliminary Budget, one of the major increases in Operating Capital Outlay is tied to the C-139 Annex Restoration Project. Funding for the C-139 Annex Restoration Project has increased over the last two years as the project goes through its different phases of planning, design, and construction. Land management activities continue to be funded using ad valorem, mitigation, state revenues from the Land Acquisition Trust Fund, and lease revenues. Land Acquisition Trust Fund revenues have enabled the District to maintain the level of service by funding maintenance and land management needs. Lease revenue generated from lands acquired through the Save Our Everglades Trust Fund and Federal grant funds is being used to support land management activities so that existing ad valorem funds can be used in support of other District priorities.

Budget Variances

This activity has a 5.9 percent ($1.6 million) increase from the Fiscal Year 2019-20 Adopted Budget of $27.7 million. This is primarily due to a net increase of 17.6 percent ($3 million) in Operating Capital Outlay for the continued construction work on the C-139 Annex Restoration ($20 million). The increases were offset by a 49.4 percent ($750,500) decrease in Contracted Services and a 15 percent ($630,435) decrease in Operating Expenses primarily due to the shift in spending categories of the C-139 Annex Restoration project.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006411

Major Budget Items for this activity include the following:

- Salaries and Benefits ($4.6 million).

Major projects that are funded with Salaries and Benefits (included in the salaries and benefits number above), Operating Expenses and Operating Capital Outlay.

Project Name	Salaries and Benefits	Other Personal	Contracted Services	Operating Expenses	Operating Capital	Fixed Capital Outlay	Interagency Expenditures	Debt	Reserves	Grand Total
C-139 Annex Restoration	$ 515,024	$ -	$ -	$ 905,000	$ 20,000,000	$ -	$ -	$ -	$ -	$ 21,420,024
Grand Total	**$ 515,024**	**$ -**	**$ -**	**$ 905,000**	**$ 20,000,000**	**$ -**	**$ -**	**$ -**	**$ -**	**$ 21,420,024**

- Contracted Services:
  - Land Stewardship Restoration and Monitoring ($173,500).
  - Public Use and Security ($200,272).
  - Land Stewardship Interim Lands – Administration ($195,694).
  - Land Stewardship Equipment and Infrastructure Maintenance ($128,000).
  - Land Stewardship Program Support ($46,500).
  - Land Stewardship Mechanical Vegetation Control ($25,000).
- Operating Expenses:
  - C-139 Annex Restoration Project in table above ($905,000).
  - Public Use and Security/ LTP STA O&M ($762,050).
    - The District plans to continue partnerships with state agencies such as Florida Fish and Wildlife Conservation Commission (FWC) for enhanced patrols on District and project lands.
  - Land Stewardship Equipment and Infrastructure Maintenance ($749,598).
  - Land Stewardship Interim Lands – Administration/PILT ($540,862).
  - Land Stewardship Mechanical Vegetation Control ($243,000).
  - Land Stewardship Restoration and Monitoring ($138,682).
  - Prescribed Burn ($174,230).
  - Land Stewardship Program Support ($56,041).

AMERICAN OVERSIGHT

- Operating Capital Outlay:
  - C-139 Annex Restoration Project in table above ($20 million).

- Fixed Capital Outlay:
  - Lake Belt Land Acquisition Mitigation; Future land acquisition as approved by Lake Belt Mitigation Plan, Pennsuco Willing Sellers ($335,890).

Items funded with Reserves with restrictions are Mitigation – Lake Belt /Wetland for ongoing work for C-139 Annex Restoration project, pass-through funding to the Miami-Dade Limestone Products Association for Dade-Broward Levee L-30 structure maintenance and monitoring, as well as prior year Wetlands Mitigation for Pennsuco Willing Sellers and associated costs ($21.2 million). Land Management (Lease Revenue) for public use and security, restoration, monitoring and vegetation management, land acquisition and appraisal for leases ($152,519).

Item funded with Reserves without restrictions is O&M New Works for FWC law enforcement support in C-44 STA ($12,500).

AMERICAN OVERSIGHT

3.2 Works *- The maintenance of flood control and water supply system infrastructure, such as canals, levees, and water control structures. This includes electronic communication and control activities.*

District Description

The expanded works of the District are an integral part of the operations and maintenance of the C&SF Project, STA, BCB and the operations of new facilities and structures from completed CERP and Restoration Strategies projects. The District's operations and maintenance consists of activities to effectively manage the primary canals and associated structures in South Florida. Operation and maintenance program activities include the C&SF Project, as well as the Big Cypress Basin, as authorized by Chapter 373 F.S. and the USACE. Activities include the operation and maintenance of a multi-purpose water management system comprising of approximately 2,179 miles of canals and 2,131 miles of levees/berms, 87 pumping stations, 781 water control structures and weirs, and 621 project culverts, which send water south and through waterways eastward and westward to both coasts.

Most portions of the system were constructed 30-50 years ago and are reaching the end of their design life. Consequently, major refurbishment of various components of the Flood Control Project will be required to sustain the viability of the system.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006414

Changes and Trends

Salaries and Benefits decreased between Fiscal Year 2016-17 and Fiscal Year 2018-19 due to staff reallocation in support of new project initiatives within the agency. Increases and decreases within Contracted Services, Operating Expenses, Operating Capital Outlay and Fixed Capital Outlay between Fiscal Year 2016-17 and Fiscal Year 2018-19 are primarily due to the phases of projects within the Operations and Maintenance Refurbishment program as they move from planning, design and construction. The Operations and Maintenance Refurbishment program has also shown a steady increase over the last five years due to the aging systems infrastructure along with the ongoing commitment to implement refurbishment plans for operational and capital projects such as critical water control structures and pump stations. The program continues with over $60 million allocated in the Fiscal Year 2020-21 Preliminary Budget for priority projects and activities critical to the strength and condition of the C&SF, STAs and BCB and continues to be a Governing Board core mission priority.

New projects that have completed construction and the operations and maintenance of that new infrastructure (new works) have been steadily increasing our recurring expenditures over the past five years. The Reserves for Emergency Response is re-budgeted each year.

Budget Variances

This activity has a 0.5 percent ($1.1 million) increase from the Fiscal Year 2019-20 Adopted Budget of $225.8 million.

The largest increase is in Operating Capital Outlay 20.2 percent ($3 million) which is primarily due to the cash flow requirements of projects within the Operations and Maintenance Refurbishment program including the Microwave Backbone Radio upgrades, FAES Tower Replacement and SCADA upgrades. Operating Expenses increased 7.3 percent ($3.9 million) primarily due to the additional funding needed for the operations and maintenance of the new works projects coming online and additional funding for the maintenance and repair of the C&SF system and Operations and Maintenance Refurbishment program. Salaries and Benefits increased 1.8 percent ($873,418) due to staff allocation in support of new works coming online and the Operations and Maintenance Refurbishment program.

The decreases in Contracted Services 21.3 percent ($2.3 million) are primarily due to the decrease in one-time funding for the Vertical Datum upgrade (NAVD88) and funding in support of Coastal Resiliency. Additionally, decreases in Fixed Capital Outlay 11.9 percent ($4.4 million) are primarily due to the shift in spending categories tied to the projects that are part of the Operations and Maintenance Refurbishment program. As the projects move from design and construction to completion, spending categories change.

AMERICAN OVERSIGHT

IV. PROGRAM ALLOCATIONS

Major Budget Items for this activity include the following:

- Salaries and Benefits ($49.1 million).

Major Projects that are funded with Salaries and Benefits (included in the salaries and benefits number above), Contracted Services, Operating Expenses, Operating Capital Outlay and Fixed Capital Outlay.

Project Name	Salaries and Benefits	Other Personal	Contracted Services	Operating Expenses	Operating Capital	Fixed Capital Outlay	Interagency Expenditures	Debt	Reserves	Grand Total
BCB Cypress Canal Control Structure 1	$ 75,403	$ -	$ -	$ -	$ -	$ 250,000	$ -	$ -	$ -	$ 325,403

- Contracted Services:
  - Projects listed in table above ($2.1 million)
  - Telemetry & Electronics Maintenance ($1.7 million).
    - SCADA Stillingwell & Platform Program ($1 million).
  - Structure Inspections ($1.6 million).
  - Structure & Pump Station Maintenance ($868,843).
  - Operations & Maintenance Program Support ($822,222).
  - Maintenance of Canals/Levees ($816,488)
  - Canal Conveyance Studies Program ($540,000)
  - Capital Projects Works – Operations Decision Support System (ODSS) ($200,000).
  - Movement of Water/Pumping Operations ($159,240).

AMERICAN OVERSIGHT

- Operating Expenses:
  - Projects listed in table above ($14.2 million).
  - Self-Insurance Programs (comprised of health insurance, workers compensation, property insurance, general liability) ($14 million).
  - Movement of Water/Pumping Operations ($9.5 million).
  - Structure & Pump Station Maintenance/Modification ($8.6 million), which includes:
    - Pump & Engine Overhaul Program ($1.7 million).
    - C-1 Connector Canal Control Gate ($1 million).
    - G-420, G-420S, G-422 Modifications ($625,000).
    - Fall Protection Improvements ($150,000).
    - Gate & Cylinder Overhaul Program ($358,014).
    - Project Culvert In-Kind Replacement Program ($200,000).
  - Maintenance of Canals/Levees ($5.8 million).
  - Maintenance of the C&SF and STA Structure Operations ($2.3 million).
  - Telemetry & Electronics Maintenance ($1.7 million), which includes:
    - Microwave Tower Repair Program ($250,000).
  - Operations & Maintenance C&SF New Initiatives ($620,000).
- Operating Capital Outlay:
  - Projects listed in table above ($8 million).
  - Structure & Pump Station Maintenance/Modification ($5.9 million), which includes:
    - S-332 B & C Pump Station Replacement-Planning ($4.1 million).
  - O&M Program Support ($3 million) for Replacement of Field Station Equipment and Fleet Replacements.
  - Telemetry Maintenance for SCADA Upgrades ($1 million).
- Fixed Capital Outlay:
  - Projects listed in table above ($30.2 million).
  - Clewiston Field Station Rehabilitation ($1.6 million).
  - STA Automation Upgrades ($869,000).

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006417

- Interagency Expenditures:
    - Structure & Pump Station Maintenance ($173,952).
        - Multi Water Management Districts Gate Overhaul Program
- Reserves – Emergency Response:
    - Hurricane/Emergency Reserve ($61.3 million): With our core mission of flood control and the importance of being able to provide for emergency response, the District is exposed to risks that could potentially limit and/or divert resources from other core missions, thereby reducing the level of service provided to its constituents. The purpose of these Reserves is to set aside funding to address unforeseen and unexpected events and emergencies and to meet unforeseen demand in service delivery costs or unexpected expenditures related to flood control and emergency response. These funds are included in the District budget each year in the Reserves category.

The utilization of the Hurricane/Emergency Reserve is limited to the following circumstances:

- When a state of emergency is declared by the Governor of Florida or the President of the United States,
- The Governing Board determines through a resolution that an emergency or other circumstance has arisen,
- The emergency or unanticipated need directly impacts the citizens and / or environment within District boundaries, or
- Structural emergencies for which remedial action cannot wait until the next fiscal year. The Hurricane/Emergency Reserve shall not be appropriated for recurring expenditures or other expenditures that can be addressed through the normal budgeting process.

Items funded with Reserves with restrictions include: The Hurricane/Emergency Reserve ($61.3 million), the S-332 B, C, D Replacement Payment from USACE for Pump Station Design ($4.1 million), Big Cypress Basin Canal Improvements ($828,448), O&M New Works for Picayune Strand-Faka Union Pump Station, C-44 Reservoir Pump Station ($336,022), and Bank Stabilization after Tree Removal ($100,000).

Items funded with Reserves without restrictions include: O&M Canal Conveyance Program ($300,000), O&M Flood Protection Level of Service ($800,000) , O&M Okeechobee Field Station Replacement ($5 million), Clewiston Field Station Rehabilitation ($1.6 million), O&M Operations Decision Support System ($200,000), Modeling - Water Quality, Emergency Modeling ($100,000), O&M New Works for BBCW L-31E, C-44 STA, C-111 South Dade ($734,925), and Maintenance - Facilities & Equipment ($800,000).

AMERICAN OVERSIGHT

IV. PROGRAM ALLOCATIONS

3.3 Facilities - The operation and maintenance of District support and administrative facilities.

District Description

The operation and maintenance of District support and administrative facilities. This activity includes management and maintenance of both owned and leased administrative buildings for the purposes of operating and maintaining District lands and works. Included in these services is maintenance of the work environment and space management. The mission is to provide expertly managed facilities and the delivery of timely, cost effective services, supplies and solutions that enhance accountability and support the accomplishment of the agency's mission.

Changes and Trends

This activity reflects a continued level of service over the five-year period.

Budget Variances

This activity has a 30.2 percent ($1.2 million) increase from the Fiscal Year 2019-20 Adopted Budget of $4 million. Increase is due to a 37.2 percent ($1.2 million) increase in Operating Expenses for maintenance projects, and a 1.2 percent ($8,146) increase in Salaries and Benefits for FRS retirement contributions.

AMERICAN OVERSIGHT

IV. PROGRAM ALLOCATIONS

Major Budget Items for this activity include the following:

- Salaries and Benefits ($707,717).
- Contracted Services:
  - Preventative Maintenance & Operational Plan ($73,200) which includes:
    - Reconfiguration and installation services ($73,200).
- Operating Expenses:
  - Preventative Maintenance & Operational Plan ($4.5 million) which includes:
    - Utilities ($942,005).
    - Electrical and general maintenance contractual services ($684,146).
    - Janitorial services and waste disposal services ($527,952).
    - Recurring facility maintenance, inspection, and utility expenses such as air conditioning maintenance, elevator maintenance and exterior grounds maintenance ($441,824).
    - Building lease payments for the service centers and warehouse storage ($177,850).

Item funded with Reserves without restrictions in this activity includes Maintenance – Facilities and Equipment ($1.2 million).

3.4 Invasive Plant Control - The treatment of invasive upland and aquatic plants in District waterways or district-owned property, to improve water abatement, maintain navigability, improve water quality, or aid in the preservation, restoration, or protection of environmentally sensitive lands.

District Description

The treatment of invasive upland and aquatic plants in District waterways or District-owned property, to improve water abatement, maintain navigability, improve water quality, or aid in the preservation, restoration, or protection of environmentally sensitive lands. This activity includes management of invasive exotic and aquatic vegetation within Florida sovereign submerged lands (including lakes, rivers, and wetlands) and District properties including canals, lakes, and right-of-ways, of the Central and Southern Florida Flood Control Project, STAs and conservation and project lands. This maintenance is accomplished through in-house and contracted herbicidal, mechanical, and biological control methods. This activity works primarily to ensure conveyance capacity within canals and water bodies and provides for the continued surveillance of water bodies and lands for early detection and control of invasive plants.

Changes and Trends

Vegetation management operations have historically been outsourced for all conservation land management activities and conducted in-house by field station staff for all C&SF project works. Over time, as Everglades Construction Project components have come online, field station staff that support the C&SF works invasive plant control have been increasingly re-directed to assist with the operations of the ECP Stormwater Treatment Areas, resulting in more outsourcing of invasive plant control activities. As more new works come online, there should be corresponding net increases in required vegetation management operations. The District has continued support in state funding from Florida Fish and Wildlife Conservation Commission (FWC) Bureau of Invasive Plant Management for aquatic plant management activities in sovereign waters and for upland exotic management on conservation lands managed by the District's Vegetation Management Section.

Between Fiscal Year 2016-17 and Fiscal Year 2018-19 Operating Expenses actual expenditures increased due to the Loxahatchee Refuge increased Intergovernmental Funding.

Budget Variances

This activity has a 15.5 percent ($4.5 million) increase from the Fiscal Year 2019-20 Adopted Budget of $29.2 million. This is primarily due to a net increase of 21 percent ($5.1 million) in Operating Expenses, as well as, a net increase of 1,400 percent ($35,000) in Operating Capital Outlay and an increase of 2.1 percent ($80,981) in Salaries and Benefits. The increases were offset by a 77.7 percent ($661,536) decrease in Contracted Services due to better aligning the budget expenditures to the appropriate expenditure category. The District continues to use wetlands mitigation and lease revenues to support exotic plant control.

Major Budget Items for this activity include the following:

- Salaries and Benefits ($3.9 million).
- Contracted Services:
  - Exotic Plant Control ($50,000).
  - Aquatic Plant Control ($140,000).

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006422

- Operating Expenses:
  - Exotic Plant Control ($18.3 million), which includes:
    - The District anticipates $2 million from the U.S. Fish and Wildlife Service in federal funding for lygodium and melaleuca treatments within the Loxahatchee Refuge.
  - Biocontrol Exotic Plant ($661,536).
  - Aquatic Plant Control/ LTP STA O&M ($6.2 million).
  - Terrestrial Plant Control/ LTP STA O&M ($2.5 million).
  - Contracted Land Management Services ($389,000).
  - Exotic Animal Management ($1.1 million).
    - Python Elimination Program in support of Governor DeSantis priority initiative ($1.1 million).
- Operating Capital Outlay:
  - Aquatic Plant Control ($37,500)
- Interagency Expenditures:
  - Biocontrol Exotic Plant ($300,000).
  - Aquatic Plant Control ($62,500).
  - Terrestrial Plant Control ($60,000).

Items funded with Reserves with restriction include Land Management (Lease Revenue) for Exotic plant control ($1 million), Mitigation – Lake Belt/Wetland ($1.1 million), O&M New Works for Picayune Strand – Merritt, Miller and Faka Union pump stations ($3.8 million).

Reserves without restrictions are used to fund O&M New Works for the C-44 Reservoir and STA and BBCW L-31E ($321,663).

AMERICAN OVERSIGHT

3.5 Other Operation and Maintenance Activities *- Operations and maintenance activities not categorized above, such as right-of-way management and other general maintenance activities.*

District Description

Operations and maintenance activities not categorized above, such as right-of-way management and other general maintenance activities. The activities include emergency management, security, field station support, and compliance with permits issued by the federal and state regulatory agencies for District restoration projects (including wetland mitigation monitoring, water quality monitoring and reporting, planning and administrative support of release of reservations, right-of-way's permitting and enforcement for both STAs and C&SF projects). Use of District lands is authorized through a leasing process or through issuance of a right-of-way occupancy permit. This protects the District's proprietary interest on canal and levee rights-of-way.

The role of the District Right of Way function is to protect the District's ability to utilize the "Works of the District" for the purposes for which they were acquired, while providing for other appropriate compatible public and private uses. Generally, the "Works of the District" include: the canal and levee rights-of-way of the Central and Southern Florida Flood Control Project, the canals and other works of the Big Cypress Basin, and other canals and right-of-way in which the District has acquired a property interest such as the Everglades Construction Project, Stormwater Treatment Areas and Comprehensive Everglades Restoration Plan.

The mission of the District's Emergency Management Program is to prevent or minimize, prepare for, respond to, and recover from emergencies or disasters that threaten life or property within the boundaries of the South Florida Water Management District. These activities ensure that the District can accomplish its mission during adverse conditions.

TOTAL	$ 5,478,626	$ 172,768	$ 5,651,394

Changes and Trends

Over the past few years, this activity has increased due to new infrastructure coming online. Overall in the Fiscal Year 2020-21 Preliminary Budget, this activity represents a continued level of service over the five-year period.

Budget Variances

This activity has an overall 2.7 percent ($148,448) increase from the Fiscal Year 2019-20 Adopted Budget of $5.5 million. This activity has a 15.1 percent ($4,000) increase in Interagency Expenditures for contractual laboratory activities, a 0.8 percent ($38,644) increase in Salaries and Benefits due to an estimated increase in FRS retirement contributions. There is also a 5.7 percent ($6,400) increase in Operating Capital Outlay for security hardware, a 14.8 percent ($80,031) increase in Operating Expenses for security maintenance and parts, and a 4.3 percent ($10,975) increase in Contractual Services for security services.

AMERICAN OVERSIGHT

IV. PROGRAM ALLOCATIONS

Major Budget Items for this activity include the following:

- Salaries and Benefits ($4.6 million).
- Contracted Services:
  - Permitting ($172,252) which includes:
    - Right of way permitting support ($153,752).
- Operating Expenses:
  - Security Management ($465,979) which includes
    - Security Services and Equipment ($465,979).
  - Long Term Plan Stormwater Treatment Area Operations & Maintenance – Compliance ($133,107) which includes:
    - Laboratory tools and activities ($133,107).
- Operating Capital Outlay:
  - Long Term Plan Stormwater Treatment Area Operations & Maintenance – Compliance ($103,600) which includes:
    - Replacement of laboratory equipment ($103,600).
  - Security Management ($15,900) which includes:
    - Security Equipment ($15,900)
- Interagency Expenditures:
  - Long Term Plan Stormwater Treatment Area Operations & Maintenance – Compliance ($30,500) which includes:
    - Fish collection and laboratory services ($30,500).

Items funded with Reserves without Restrictions in this activity are for O&M New Works for Restoration Strategies STA1-W Exp #1 ($8,000).

3.6 Fleet Services - *This activity includes fleet services support to all District programs and projects.*

District Description

This activity includes fleet services support to all District programs and projects. Management and maintenance of the District's fleet of motor vehicles and watercraft are included in this activity. The District's fleet includes automobiles, light trucks, medium and heavy trucks, construction equipment (i.e., cranes, excavators, bulldozers, etc.), marine equipment (e.g., boats, airboats, boat engines, etc.), trailers, tractors, mowers and small utility and all-terrain vehicles.

TOTAL	$ 8,276,048	$ -	$ 8,276,048

Changes and Trends

The Fiscal Year 2020-21 Preliminary Budget represents a continued level of service budget with a net increase of 0.7 percent ($57,982) from the Fiscal Year 2019-20 Adopted Budget. From Fiscal Year 2016-17 to Fiscal Year 2018-19, the District has worked to more accurately capture our expenditures in Fleet Services thus showing the increase in expenditures over that timeframe. The past five years reflects the consolidation of a previously decentralized spending pattern providing a better financial trend for evaluation.

Budget Variances

This activity has a 0.7 percent ($57,982) increase from the Fiscal Year 2019-20 Adopted Budget of $8.2 million. This increase is primarily due to a 0.8 percent ($40,570) increase in Operating Expenses for fleet parts and supplies and a 0.6 percent increase ($17,412) in Salaries & Benefits for an estimated increase in FRS retirement contributions.

AMERICAN OVERSIGHT

IV. PROGRAM ALLOCATIONS

Major Budget Items for this activity include the following:

- Salaries and Benefits ($2.9 million).
- Operating Expenses:
  - Aquatic Plan Control – Fleet ($428,232) which includes:
    - Fleet vehicle fuel ($221,454)
  - Automotive - Departments Outside O&M ($971,665) which includes:
    - Fleet vehicle fuel ($388,721)
    - Fleet parts and supplies ($366,000)
  - Land Stewardship Equipment & Infrastructure Maintenance – Fleet ($341,764) which includes:
    - Fleet vehicle fuel ($127,731)
    - Fleet parts and supplies ($135,096)
  - Levee Management Fleet – ($1,158,767) which includes:
    - Fleet vehicle fuel ($700,036)
    - Fleet parts and supplies ($298,172)
  - Pumping Operations Fleet – ($418,200) which includes:
    - Fleet vehicle fuel ($120,027)
    - Fleet parts and supplies ($66,254)
  - Structure Maintenance Fleet – ($652,436) which includes:
    - Fleet vehicle fuel ($340,649)
    - Fleet parts and supplies ($196,934)
    - Telemetry Maintenance ($251,258)
    - Fleet vehicle fuel ($178,464)
    - Fleet parts and supplies ($47,755)

Items funded with Reserves with and without Restrictions in this activity are equipment maintenance for O&M New Works for the C-44 Pump Station ($3,750).

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006429

Budget Variances

This activity has a 0.8 percent ($75,704) increase from the Fiscal Year 2019-20 Adopted Budget of $9.9 million due to a 1.3 percent ($67,526) increase in Salaries and Benefits, primarily as a result of FRS contributions. There is also a 0.2 percent ($8,178) increase in Operating Expenses due to an increase in software maintenance.

Major Budget Items for this activity include the following:

- Salaries and Benefits ($5.4 million).
- Contracted Services:
  - O&M IT Support ($746,990) which includes:
    - Computer consulting services for enterprise resource support and IT security. ($556,010)
    - Copier/printer lease ($162,480).
- Operating Expenses:
  - O&M IT Support ($3.7 million) which includes:
    - Software maintenance ($2.5 million).
    - Desktop computer / monitor replacements ($544,000).
    - Communication service ($350,344).
    - Hardware maintenance ($215,099).

There are no items funded with Reserves in this activity.

AMERICAN OVERSIGHT

4.0 Regulation

This program includes water use permitting, water well construction permitting, water well contractor licensing, environmental resource and surface water management permitting, permit administration and enforcement, and any delegated regulatory program.

District Description

This program includes all permitting functions of the District, including water use permitting, water well construction permitting and well contractor licensing, and environmental resource permitting. These activities are designed to ensure that water and related natural resources in the District are protected and conserved. Also included are permit compliance and enforcement activities, administration of water shortage rules and other activities necessary to support the District's regulatory responsibilities.

Water Use staff are actively participating on the CFWI Regulatory Team and the ongoing rule development process led by DEP. Staff reviews draft rules, provides input and attends the publicly noticed workshops, sub team and steering committee meetings.

Water Use Bureau staff established a Public Water Supply Task Force where client relationship managers have been assigned to utilities in various geographic areas. These employees continue building relationships by working very closely with the utility to get them fully in compliance in a positive and collaborative manner. The level of Public Water Supply utility compliance continues to increase since implementation of this effort.

The on-going Environmental Resource and Surface Water Permitting activity produces technical evaluation of proposed stormwater water management systems at a continued level of service to ensure water quantity, water quality, and environmental criteria are met. All permit applications must be processed within statutorily established time frames. Compliance reviews of issued permits and enforcement actions for unauthorized works, including the activities listed above, are all ongoing efforts.

Changes and Trends

The Fiscal Year 2020-21 Preliminary Budget represents a continued level of service with a net increase of 0.5 percent ($109,061) from the Fiscal Year 2019-20 Adopted Budget of $21.8 million. The decrease in Salaries and Benefits between Fiscal Year 2015-16 to Fiscal Year 2018-19 is due to the reduction of the number of FTEs in Southern and Northern Everglades Nutrient Source Control Program. In the Fiscal Year 2019-20 Adopted Budget, this program reflected an increase in Operating Expenses due to the way our actual insurance expenditures post through payroll. Postings are based on where staff charges versus where staff is budgeted, coupled with budgeting the Districts full insurance exposure.

Also starting in Fiscal Year 2018-19 the decision was made to move the Southern and Northern Everglades Nutrient Source Control Program that was previously included in Activity 4.4 (Other Regulatory Enforcement Activities) to Activity 1.2 (Research, Data Collection, Analysis and Monitoring) and Activity 2.3 (Surface Water Projects), based on a reevaluation of the activities, their purpose, and changes in applicable statutory requirements.

The activities that were moved to Activity 2.3 are SFWMD-specific programs rather than the state-wide delegated programs. They are associated with restoration and protection efforts under the Everglades Forever Act and Restoration Strategies mandated to meet water quality standards in the Southern Everglades.

The activities that were moved to Activity 2.1 were moved as a result of changes in Florida Statutes, the Northern Everglades and Estuaries Protection Program (NEEPP), that relinquished specific regulatory responsibilities to FDACS, leaving SFWMD with activities that support water management planning, restoration and preservation efforts, including monitoring and data evaluation.

The proposed funding level supports the review of an average of 475 water use permit applications and numerous compliance investigations per quarter.

The proposed funding level supports the review of an average of 625 environmental and surface water permit applications and numerous compliance investigations per quarter and staying current with construction certifications.

Budget Variances

The increase is primarily attributed to ($326,761) in Salaries and Benefits due to turnover in positions and the hiring process, forecasted increase in FRS contributions and a job study. The job study was conducted comparing the District to other governmental agencies across the State of Florida, resulting in select job categories increasing to more competitive levels while FTEs at or above the job study levels were not increased. Also, the budgeted salaries for vacant positions in the FY2020-21 Preliminary budget were increased based on the job study., There was also an increase in Operating Expenses ($59,500) tied to flight operation service costs. There is a reduction in Contracted Services ($277,200) due to the Regulation software upgrade to the e-Permitting system eliminating the need for IT consulting services and has offset a large majority of other increased costs.

AMERICAN OVERSIGHT

IV. PROGRAM ALLOCATIONS

Major Budget Items for this program include the following:

- Salaries and Benefits ($16.3 million) (163 FTEs)
- Other Personal Services:
    - Water Use Permitting contractor support for permit administration ($24,000)
    - Environmental Resource Permitting contract support for permit application processing ($39,125)
- Contracted Services
    - Water Use Permitting for publishing legal notices of receipt of application for individual consumptive use permits ($29,850)
    - Environmental Resource Permitting ($70,900), which includes:
        - Contract Pilot Services ($43,000)
        - Contract support for ePermitting scanning ($19,750)
    - Regulation IT Support ($148,205), which includes:
        - Computer consulting services ($104,200)
        - Copier/printer leases ($44,005)
- Operating Expenses:
    - Environmental Resource Permitting ($327,795), which includes:
        - Aircraft fuel and annual maintenance costs for routine compliance flights for staff to do aerial inspections to determine the start of construction to permitted sites, monitor the construction of surface water management systems, and locate any sites that are doing work without the appropriate permits in place. Wetland and natural preserve areas are also inspected to detect if any changes or impacts have occurred ($293,795).
        - Credit Card Processing and County Recording Fees for permit application payment ($34,000)
    - Regulation Program Support for self-insurance programs (comprised of health insurance, workers compensation, property insurance, general liability) ($3.9 million)
    - Regulation IT Support ($957,022), which includes:
        - Software maintenance ($764,881)
        - Hardware maintenance ($58,257)
        - Communication Services ($94,884)

IV. PROGRAM ALLOCATIONS

4.1 Consumptive Use Permitting - The review, issuance, renewal, and enforcement of water use permits.

District Description

The review, issuance, renewal, and enforcement of water use permits. Consumptive use permitting is a state-mandated activity assigned to the water management districts. The objective of this activity is to ensure safe, efficient, equitable, and reliable development and utilization of the state's water resources. This includes the review, issuance, renewal, and enforcement of water use permits. The major components are to review and to prepare recommendations for permit applications for all consumptive uses of water within the District boundaries; and complete post-permit compliance reviews of priority projects based on staffing resources.

This activity also includes pre-permit planning, permit issuance, dispute resolution, litigation support, criteria and rule development, Coastal Zone Management support, automation and administrative support, and rulemaking to update consumptive use permit rules to implement the regulatory recommendations of the District's regional water supply plans.

Changes and Trends

The Fiscal Year 2020-21 Preliminary Budget represents a continued and consistent level of service with a net increase of 1.8 percent ($95,226). The proposed funding level supports the review of an average of 475 permit applications and numerous compliance investigations per quarter. The Water Use Bureau initiated and continues to implement the Public Water Supply (PWS) Task Force comprised of water use compliance analysts with the objective of

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006437

collaborating with PWS permittees by encouraging involvement and open dialogue on PWS compliance issues. The level of compliance has increased because of this on-going effort.

Water Use staff are actively participating on the CFWI Regulatory Team and the ongoing rule development process led by DEP. Staff reviews draft rules, provides input and attends the publicly noticed workshops, sub team and steering committee meetings.

Budget Variances

This activity has a 1.8 percent ($95,226) increase from the Fiscal Year 2019-20 Adopted Budget of $5.3 million due to a 1.7 percent ($87,726) increase in Salaries and Benefits. Additionally, Operating expenses increased by 189.4% ($7,500) for Groundwater Modeling and Pump Calibration and Inspection training.

Major Budget Items for this activity include the following:

- Salaries and Benefits ($5.3 million)
- Other Personal Services:
    - Water Use Permitting contractor support for the permit administration effort ($24,000)
- Contracted Services:
    - Water Use Permitting for publishing legal notice of receipt of application for individual consumptive use permits ($29,850)
- Operating Expenses
    - Water Use Compliance for Pump Calibration and Inspection training ($1,500)
    - Water Use Permitting for Groundwater Modeling training ($6,000)

The items with Reserves without restrictions are for Water Use permitting and compliance training related to Pump Calibration and Inspection and Groundwater Modeling ($7,500).

AMERICAN OVERSIGHT

4.2 Water Well Construction Permitting and Contractor License - *The review, issuance, renewal, and enforcement of water well construction permits and regulation of contractor licensing.*

District Description

There is no funding for this activity, although there is regulatory authority in consumptive use permitting for these activities not delegated to other agencies. Well Construction Permits ensure that wells are built by licensed water well contractors and conform to water well construction permit standards. Unless exempt, a well construction permit must be obtained from the District or an agency delegated by the District prior to the construction, repair, modification or abandonment of any water well, test well or monitor well within the District's jurisdiction. A consumptive use permit may be required before the well construction permit can be issued. The District regulates the location, construction, repair, and abandonment of water wells in Monroe and Charlotte Counties, and for wells larger than 12 inches in diameter in Broward County. The District has delegated the location construction, repair, and abandonment of water wells in its remaining counties to their respective health departments or other delegated agencies. The dates when these agreements were signed between the District and the Health Departments are listed in Chapter 40E-3 and provided below.

- Hendry and Osceola – April 18, 2005
- Collier, Glades, Orange, Palm Beach, Polk – May 11, 2005

IV. PROGRAM ALLOCATIONS

4.3 Environmental Resource and Surface Water Permitting - The review, issuance, and enforcement of environmental resource and surface water permits.

District Description

This state-mandated activity involves the review, issuance, compliance, and enforcement of Environmental Resource Permits (ERP). The objective is to ensure that land development projects and wetland dredge and fill activities do not cause adverse environmental, water quality, or water quantity impacts, and to take necessary compliance action when permit requirements are not met. This activity includes technical review and evaluation of construction plans for proposed development activities, field inspection of project sites requesting permits or wetland determinations, compliance review of project sites, preparation of technical staff reports, and review of Sovereign Submerged Lands authorizations associated with Environmental Resource Permits. This activity also includes pre-permit planning, permit issuance, dispute resolution, litigation support, criteria and rule development, site certifications, coastal zone consistency reviews, and automation support. This on-going activity produces technical evaluations of proposed stormwater water management systems at a continued level of service to ensure compliance with water quantity, water quality, and environmental criteria. All permit applications must be processed within established time frames. Compliance reviews of issued permits and enforcement actions for unauthorized works, including the activities listed above, are all ongoing efforts.

Changes and Trends

The Fiscal Year 2020-21 Preliminary Budget represents a continued and consistent level of service with a net increase of 2.6 percent ($228,242). The proposed funding level supports the review of an average of 625 permit applications and numerous compliance investigations per quarter and staying current with construction certification.

Budget Variances

This activity has a 2.6 percent ($228,242) increase from the Fiscal Year 2019-20 Adopted Budget of $8.8 million and is primarily due to a 2.2 percent ($181,242) increase in Salaries and Benefits due to an estimated increase in FRS contributions. There is also a 18.9% percent ($52,000) increase in Operating Expenses which is associated with flight operation service costs. These figures were offset by a 6.6 percent ($5,000) decrease in Contracted Services for Environmental Resource Permitting.

Major Budget Items for this activity include the following:

- Salaries and Benefits ($8.6 million)
- Operating Expenses:
    - Environmental Resource Permitting ($327,795), which includes:
        - Aircraft fuel and annual maintenance costs for routine compliance flights for staff to do aerial inspections to determine the start of construction to permitted sites, monitor the construction of surface water management systems, and locate any sites that are doing work without the appropriate permits in place. Wetland and natural preserve areas are also inspected to detect if any changes or impacts have occurred ($293,795)
        - Credit Card Processing and County Recording Fees for permit application payment ($34,000)
- Other Personal Services
    - Environmental Resource Permitting contract support for application processing ($39,125)
- Contracted Services
    - Environmental Resource Permitting ($70,900), which includes:
        - Contract Pilot Services ($43,000)
        - Contract support for ePermitting scanning ($19,750)

There are no items funded with Reserves.

Changes and Trends

In the Fiscal Year 2019-20 Adopted Budget, this program reflected an increase in Operating Expenses due to the way our actual insurance expenditures post through payroll. Postings are based on where staff charges versus where staff is budgeted, coupled with budgeting the Districts' full insurance exposure. The decrease in Salaries and Benefits between Fiscal Year 2016-17 to Fiscal Year 2018-19 is due to the reduction of the number of FTEs by 83.8 percent. Starting in Fiscal Year 2018-19 the decision was made to move the Southern and Northern Everglades Nutrient Source Control Program that was previously included in this activity to Activity1.2 (Research, Data Collection, Analysis and Monitoring) and Activity 2.3 (Surface Water Projects), based on a reevaluation of the activities, their purpose, and revisions to statutory requirements resulting in a reduction of Salaries and Benefits and Contracted Services.

The activities that were moved to Activity 2.3 are SFWMD-specific programs rather than the state-wide delegated programs. They are associated with restoration and protection efforts under the Everglades Forever Act and Restoration Strategies mandated to meet water quality standards in the Southern Everglades.

AMERICAN OVERSIGHT

The activities that were moved to Activity 2.1 were moved as a result of changes in Florida Statutes, the Northern Everglades and Estuaries Protection Program (NEEPP), that relinquished specific regulatory responsibilities to FDACS, leaving SFWMD with activities that support water management planning, restoration and preservation efforts, including monitoring and data evaluation.

This activity is primarily the overall management and administrative support for all regulation activities described under category 4.0.

Budget Variances

This activity has a 0.2 percent ($10,255) increase from the Fiscal Year 2019-20 Adopted Budget of $4.6 million and is due to a 1.7 percent ($10,255) increase in Salaries and Benefits.

Major Budget Items for this activity are included in the following:

- Salaries and Benefits ($618,708)
- Operating Expenses:
    - Regulation Program Support for self-insurance programs (comprised of health insurance, workers compensation, property insurance, general liability) ($3.9 million)

There are no items funded with Reserves.

AMERICAN OVERSIGHT

4.5 Technology and Information Services *- This activity includes computer hardware and software, data lines, computer support and maintenance, IT consulting services, data centers, network operations, web support and updates, desktop support, and application development associated with this Program and related activities.*

District Description

Information technology items (salaries, contractors, hardware / software maintenance, and other operating costs) are directly charged to operational activities of District core functions where there is a clear linkage between the operational activity and the information technology system, application or staff that is used to support the operational activities.

Changes and Trends

This sub-activity represents a continued level of service over the past five years.

Budget Variances

This activity has a 7.1 percent ($224,662) decrease from the Fiscal Year 2019-20 Adopted Budget of $3.2 million primarily due to a 64.7 percent decrease ($272,200) in Contracted Services for funding of the Regulation software upgrade to the ePermitting System. This is offset by a slight increase of 2.7% ($47,538) associated with Salaries and Benefits due to an estimated increase in FRS contributions.

5.0 Outreach

This program includes all environmental education activities, such as water conservation campaigns and water resource education; public information activities; activities relating to local, regional, state, and federal governmental affairs; and all public relations activities, including public service announcements and advertising in any media.

District Description

This program provides clear concise and consistent information regarding District missions, functions, programs, project and other operational aspects. Environmental activities are designed to reach broad audiences in an effort to provide increased awareness of flood control and water management resources issues and other roles / responsibilities of the District among the more than 8 million residents in South Florida. The District works to leverage opportunities for earned (free) media and outreach through the creation and distribution of e-newsletters and via the District's website, which contains updated information about priority programs and water resource related issues.

Changes and Trends

The decrease in Contracted Services between Fiscal Year 2016-17 to Fiscal Year 2018-19 is due to a contractual agreement for federal legislative services administered through the DEP not being executed in either Fiscal Year 2017-18 or Fiscal Year 2018-19. However, the position is currently funded in Fiscal Year 2019-20 and Fiscal Year 2020-21. Over the past few years, with a streamlined District organization it remains important to assess the potential impact of state and federal legislative activity and keep Executive staff and the Governing Board informed. This activity represents a continuation level of service consistent with prior Fiscal Years.

Budget Variances

The variance is due primarily to a ($125,000) decrease in Contracted Services for a one-time outreach activity. Increases in Salaries and Benefits ($33,697) are due to turnover in positions and the hiring process, forecasted increase in FRS contributions and a job study. The job study was conducted comparing the District to other governmental agencies across the State of Florida, resulting in select job categories increasing to more competitive levels while FTEs at or above the job study levels were not increased. Also, the budgeted salaries for vacant positions in the FY2020-21 Preliminary budget were increased based on the job study.

Major Budget Items for this program include the following:

- Salaries and Benefits ($1 million) (9 FTEs).
- Contracted Services:
    - Lobby/Legislative Affairs for the District's share of a contractual agreement for federal legislative services administered through the Florida Department of Environmental Protection ($27,000).
    - Public Information for media related services ($6,880).
- Operating Expenses:
    - Public Information ($48,340), which includes:
        - Media related equipment and Outreach services ($41,170).

IV. PROGRAM ALLOCATIONS

5.2 Public Information *- All public notices regarding water management district decision-making and Governing Board, basin board, and advisory committee meetings, public workshops, public hearings, and other District meetings; and factual information provided to the public and others by a water management district regarding District structure, functions, programs, budget, and other operational aspects of the District.*

District Description

This outreach component is designed to reach broad audiences in an effort to provide increased awareness of flood control and water management resource issues and the roles/ responsibilities of the District among the 8.7 million residents in South Florida. This includes the development and distribution of publications, public service programming, public meetings, presentations, water resource education, media relations, social media, and content management of the agency website to provide clear, concise, and consistent information regarding District mission, structure, functions, programs, projects and other operational aspects. The District works to leverage opportunities for earned (free) media and outreach through the creation and distribution of e-newsletters and via the District's website, which contains updated information about priority programs and water resource related issues.

IV. PROGRAM ALLOCATIONS

5.4 Cabinet and Legislative Affairs *- Influencing or attempting to influence legislative action or non-action through oral or written communication or an attempt to obtain the goodwill of a member or employee of the Legislature. (See s. 11.045, Florida Statutes) For purposes of the standard budget reporting format, this definition includes Federal legislative action or non-action.*

District Description

This outreach component provides information and support to state and federal elected and appointed officials and staff regarding water management initiatives and priorities. It includes the District's federal legislative program, which works with congressional members and staff, as well as the District's state legislative program, which works with the Florida Legislature, its committees, and off-session coordination with legislatively appointed committees and delegations.

TOTAL	$ 31,500	$ -	$ 31,500

Changes and Trends

The decrease in Contracted Services between Fiscal Year 2016-17 to Fiscal Year 2018-19 is due to a contractual agreement for federal legislative services administered through the DEP not being executed in either Fiscal Year 2017-18 or Fiscal Year 2018-19. However, the position is currently funded in Fiscal Year 2019-20 and Fiscal Year 2020-21. Over the past few years, with a streamlined District organization it remains important to assess the potential impact of state and federal legislative activity and keep Executive staff and the Governing Board informed. The decrease in staff in the 5.4 Cabinet and Legislative Affairs Program is due to the redirection of staff to other public information areas. This activity represents a continuation level of service consistent with prior Fiscal Years.

Changes and Trends

The increase in Salaries and Benefits between Fiscal Year 2016-17 and Fiscal Year 2018-19 is due primarily to vacancies being filled increasing actual expenditures. The increase in Salaries and Benefits between Fiscal Year 2018-19 and Fiscal Year 2019-20 is due to budgeting the full authority of the FTEs. Furthermore, the increase in Salaries and Benefits between Fiscal Year 2019-20 and Fiscal Year 2020-21 is due to an increase in FRS contribution. The decrease in Contracted Services between Fiscal Year 2016-17 and Fiscal Year 2018-19 is due primarily to external legal services not being required as in prior years. The increase in Operating Expenses between Fiscal Year 2016-17 and Fiscal Year 2018-19 is due primarily to the way our actual insurance expenditures post through payroll. Postings are based on where staff charges versus where staff is budgeted. In the Fiscal Year 2018-19 Adopted budget this program illustrated an increase in Operating Expenses due to the way our actual insurance expenditures post through payroll, an accounting practice which is continued in the Fiscal Year 2020-21 Preliminary Budget.

Budget Variances

Program 6.0 has a 3.8 percent increase ($1.4 million) due to a 31.2 percent ($687,500) increase in Operating Capital Outlay due primarily to telemetry equipment. There also is a 19.2 percent ($563,480) increase in Contracted Services for IT consulting services for enterprise software computer software maintenance and a 0.1 percent ($15,326) increase in Operating Expenses for computer software maintenance and a 0.9 percent ($167,434) increase in Salaries and Benefits due to turnover in positions and the hiring process, forecasted increase in FRS contributions and a job study. The job study was conducted comparing the District to other governmental agencies across the State of Florida, resulting in select job categories increasing to more competitive levels while FTEs at or above the job study levels were not increased. Also, the budgeted salaries for vacant positions in the FY2020-21 Preliminary budget were increased based on the job study.

AMERICAN OVERSIGHT

IV. PROGRAM ALLOCATIONS

Major Budget Items for this program are included in the following:

- Salaries and Benefits: ($18.2 million) (161 FTEs).
- Contracted Services:
  - Application Development ($708,333) for IT Consulting Services.
  - Administration – Records Management ($180,000), Budget Development/Report ($65,000), Employment Staffing ($76,500) & Purchasing Services ($50,750), which includes:

IV. PROGRAM ALLOCATIONS

6.1 Administrative and Operations Support *- Executive management, executive support, Governing Board support, basin board support, ombudsman, inspector general, general counsel, human resources, insurance, risk management, finance, accounting, procurement, budget, and vehicle pool.*

District Description

This activity supports and plays a key role in accomplishing District goals and objectives by providing executive direction, financial and human resources expertise, legal advice, counsel and representation, procurement, risk management, and general support functions. The mission of the administrative bureaus is to provide the highest quality and cost-effective human, business, and technical services, with a commitment to maximize transparency and demonstrate accountability to the public. These activities are vital for effective management, informed decision-making and mandatory/statutory compliance and to help ensure the organization can accomplish its mission in a timely, planned, cost effective and organized fashion.

6.1.2 General Counsel/Legal - The Office of the General Counsel provides professional legal advice, representation, rulemaking services, research, preventative law, and counsel to the District's Governing Board, Executive Team and its component units. The office's responsibilities include matters relating to contracts, land management and personnel matters.

District Description

The General Counsel program represents the District in all legal matters including, environmental, regulatory, water supply and real estate. Legal services are delivered by providing advice to the Governing Board and District staff and by representing the District before the Florida Division of Administrative Hearings and in both state and federal courts.

Changes and Trends

This activity has represented a consistent level of service over the last five years with a slight shift in funding from Salaries and Benefits to Contracted Services for specialized outside counsel, however with a decrease in contractual legal services in Fiscal Year 2018-19.

Budget Variances

This sub-activity has a 1.8 percent ($53,379) increase from the Fiscal Year 2019-20 Adopted Budget of $2.9 million due to an increase in Salaries and Benefits primarily due to estimated increases in FRS contributions.

TOTAL	$ 8,260,988	$ 3,353,613	$ 11,614,601

Changes and Trends

The increase in Operating Expenses between Fiscal Year 2016-17 and Fiscal Year 2018-19 is due primarily to the way our actual insurance expenditures post through payroll. Postings are based on where staff charges versus where staff is budgeted, coupled with budgeting the Districts' full insurance exposure. Additionally, the Operating Expenses reflect accounting for the CERP Indirect Staff Support credits, which are offset between this sub-activity and the CERP activity resulting in negative expenditures in this sub-activity for Fiscal Year 2016-17 through Fiscal Year 2018-19.

Budget Variances

This sub-activity has a 1.3 percent ($152,888) increase from the Fiscal Year 2019-20 Adopted Budget of $11.5 million. The increases included a 35.9 percent ($125,000) increase in Contractual Services for Records Management consulting, and a 0.4 percent ($27,888) increase in Salaries and Benefits due to FRS employer contributions.

AMERICAN OVERSIGHT

IV. PROGRAM ALLOCATIONS

Major Budget Items for this sub-activity include the following:

- Salaries and Benefits ($6.7 million).
- Contracted Services:
    - Administration - Records Management ($180,000), Budget Development ($65,000), and Comprehensive Annual Financial Report ($11,900) and Maintenance, Monitor, Evaluate/Report Insurance Plans ($176,910) which includes:
        - Contracted Services for Actuarial, Advertising and Professional Services ($178,500).
- Operating Expenses:
        - Maintenance, Monitor, Evaluate/Report Insurance Plans ($6.4 million) for Self-Insurance programs.
    - Administrative Support (-$2,280,991), which includes:
        - CERP Indirect Staff Support credits (-$3.3 million); the CERP indirect Staff Support credits is an offset to the expenditure in the CERP activity, resulting in a negative expenditure in this sub-activity.

Items funded with Reserves with restrictions are Self Insurance Programs ($569,795), which included a portion of property insurance and a portion of workers compensation.

TOTAL	$ 1,987,056	$ -	$ 1,987,056

Changes and Trends

This sub-activity represents a nominal decrease from Fiscal Year 2018-19 and represents a continued level of service consistent over the past five years. The increase in Contracted Services over the five-year period is due to advertising services which was moved in Fiscal Year 2016-17 from Operating Expenses to Contracted Services and varies in expenditures based on the amount and type of solicitation advertising requested each year.

Budget Variances

This sub-activity has a 1.0 percent ($19,221) increase from the Fiscal Year 2019-20 Adopted Budget of $2 million due to a 1.0 percent ($19,221) increase in Salaries and Benefits due to projected FRS retirement contribution increases.

Changes and Trends

This sub-activity represents a nominal decrease from Fiscal Year 2018-19 and represents a continued level of service consistent over the past five years. The variance in Contracted Services over the five-year period is due to advertising services which varies in expenditures based on the amount and type of recruitment advertising requested each year. The variance in operating expenses over the five-year period is due to relocation which varies in expenditures based on where new employees are recruited from. Additionally, in Fiscal Year 2016-17 and Fiscal Year 2017-18 a computer software expense for a recruiting module was moved from this activity to the Technology and Information Services activity. In Fiscal Year 2018-19 the budget for consulting services was increased.

Budget Variances

This sub-activity has a 2.1 percent ($34,401) increase from the Fiscal Year 2019-20 Adopted Budget of $1.6 million due to a 2.4 percent ($34,401) increase in Salaries and Benefits due to an estimated increase in FRS contributions.

Changes and Trends

This sub-activity represents a continued level of service over the past five years with a steady increase in Operating Expenses over the past two years resulting from an increase in communication utility services.

Budget Variances

This sub-activity has no change from the Fiscal Year 2019-20 Adopted Budget.

Major Budget Items for this sub-activity include the following:

- Operating Expenses:
    - Telecommunications ($428,740) for phones, data lines, local and long-distance services.

There are no items funded with Reserves.

AMERICAN OVERSIGHT

6.1.9 Technology and Information Services - This sub-activity includes computer hardware and software, data lines, computer support and maintenance, IT consulting services, data centers, network operations, web support and updates, desktop support, and application development associated with this Program and related activities.

District Description

This sub-activity includes oversight and direction of computer services, computer hardware and software, data lines, computer support and maintenance, IT consulting services, data centers, network operations, web support and updates, desk top support, and application development.

A large portion of this activity's budget is related to maintenance and support of the District's hardware and software; systems engineering; as well as managing, maintaining, and enhancing the District's computer infrastructure. This infrastructure includes a substantial microwave network that ties together all remote sites throughout the District's 16-county jurisdiction.

Changes and Trends

Over the past few years, this sub-activity has increased due to the consolidation of technical positions within the District, to the IT Bureau. Operating Capital Outlay has increased over time due to increases in computer hardware for technology infrastructure upgrades and end of life network component replacements. Contracted Services also increased over the five-year period due to specialized information technology needs. The District has purchased new computer equipment instead of leasing which is more cost effective. There is no change to the level of service of this sub-activity from the Fiscal Year 2019-20 Adopted Budget.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006481

Budget Variances

This sub-activity has a 10.8 percent ($1.2 million) increase from the Fiscal Year 2019-20 Adopted Budget of $10.8 million due to a 0.6 percent ($15,236) increase in Operating Expenses primarily from computer software and hardware maintenance, a 31.2 percent ($687,500) increase in Operating Capital Outlay for telemetry equipment, a 24.4 percent ($438,480) increase in Contracted Services primarily for IT consulting services for enterprise software development and software licenses and a 0.7 percent ($28,046) increase in Salaries and Benefits due to an estimated increase in FRS employer contributions.

Major Budget Items for this sub-activity include the following:

- Salaries and Benefits ($4.2 million).
- Contracted Services:
    - Applications Development ($708,333), Desktop Technology ($29,000), Geospatial Services ($16,180), IT Business support ($95,795), IT Executive Direction ($417,720) and SAP Solutions Center ($878,292), which includes:
        - Computer consulting services (enterprise resource support, and IT security) ($1.7 million).
        - Software licenses ($150,000).
- Operating Expenses:
    - IT Business Support ($2.4 million), which includes:
        - Software maintenance ($1.8 million).
        - Hardware maintenance ($621,458).
- Operating Capital Outlay:
    - IT Executive Direction ($97,000), Network Support ($1.3 million), and Systems Administration ($1.5 million), which includes:
        - Computer Hardware Equipment ($1.6 million).

Items funded with Reserves without restrictions are Information Technology (Security, Financial System Upgrade ($1,837,500), which the designated amounts are for IT Consulting Services for Enterprise System updates, equipment and software licenses.

6.4 Other – (Tax Collector / Property Appraiser Fees)

District Description

This activity is comprised of county tax collector and property appraiser fees. Tax collector fees are calculated as a percent of taxes collected by the tax collector on behalf of the District. Property appraiser fees are based on the District's share of responsibility for the respective property appraisers operating budgets. These fees are calculated by each respective county office in accordance with Florida Statutes.

The District pays fees and commissions to the offices of the Property Appraisers and Tax Collectors of each county within the District for services provided annually for tax roll preparation, tax collections, and distributions. The Property Appraiser fees are calculated by applying the ratio of District ad valorem taxes as a proportion of the total taxes levied by each county for the preceding fiscal year against each county Property Appraiser's budget. The Tax Collector commissions are calculated as three percent of the amount of ad valorem property taxes collected and remitted on assessed valuation up to $50 million, and two percent on the balance above that first threshold. Fees and commissions are set by Florida Statutes and are non-negotiable.

Changes and Trends

The increase in Operating Expenses between Fiscal Year 2016-17 and Fiscal Year 2018-19 is due primarily due to the increase in Property Appraiser fees and Tax Collector commissions for processing, collecting and distributing ad valorem taxes for the District. The fees and commissions are increasing because the District's proportion of each county is going up based on the total taxable value and the amount of ad valorem levy being processed.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006485

Budget Variances

This activity has no change from the Fiscal Year 2019-20 Adopted Budget of $6.8 million. Tax collector and property appraiser fees are budgeted on an annual basis using the methods described above.

Major Budget Items for this activity include the following:

The following are Major Budget Items not included in The Major Project Table:

- Operating Expenses:
    - Tax Collector/Property Appraiser ($6.8 million) for commissions and property appraiser fees associated with collection of District-wide ad valorem taxes are shown in this activity ($6.8 million). Expenses for the Everglades Forever Act remain in Activity 1.2 (Research, Data Collection, Analysis and Monitoring) to properly tie the cost of collecting the tax to the associated fund and activities.

Items funded with Reserves without restrictions include Tax Collector & Property Appraiser Fees ($2.2 million).

IV. PROGRAM ALLOCATIONS

B. District Specific Programs

2. District Everglades Program

District Description

The District Everglades Program is focused on the District's responsibilities outlined in the Everglades Forever Act (EFA) as well as the settlement agreement. The EFA directs the District to design, permit, construct and operate Stormwater Treatment Areas (STAs) to reduce phosphorus levels in stormwater runoff and other sources before it enters the Everglades Protection Area. The goal of the District Everglades Program is to contribute to Everglades restoration by improving water quality, hydrology and ecology.

Changes and Trends

The Everglades Forever Act (EFA), passed by the Florida Legislature in 1994, directed the District to implement regulatory source control programs in all areas tributary to the Everglades Protection Area (EPA) to reduce phosphorus in stormwater runoff. The District was also required to acquire land, then design, permit, construct and operate a series of treatment wetlands, referred to as Everglades Stormwater Treatment Areas (STAs), to reduce phosphorus levels from stormwater runoff and other sources before it enters the EPA.

AMERICAN OVERSIGHT

IV. PROGRAM ALLOCATIONS

In 2012, the State of Florida and the U.S. Environmental Protection Agency reached consensus on new Restoration Strategies for further improving water quality in the Everglades, which build upon the existing projects and further improve the quality of stormwater entering the Everglades. On September 10, 2012, DEP issued the District consent orders associated with EFA and National Pollutant Discharge Elimination System (NPDES) permits, which outlined a suite of projects with deadlines for completion. The ultimate goal of the new water quality improvement features is to further reduce phosphorus concentrations and assist in achieving compliance with State water quality standards. The identified projects primarily consist of reservoirs referred to as flow equalization basins (FEBs), STA expansions, and associated infrastructure and conveyance improvements. The EFA was amended in 2013 by the Florida Legislature to include the 2012 Restoration Strategies Regional Water Quality Plan. These projects will be designed and constructed through December 31, 2024 at a total cost of approximately $880 million.

The Florida Legislature continues its commitment to Everglades Restoration as evidenced through the passage of House Bill 989 in 2016 (Chapter 2016-201) and Senate Bill 10 in 2017 (Chapter 2017-10), providing a recurring $32 million appropriation for the implementation of the projects required by the Everglades Forever Act through Fiscal Year 2023-24.

Expenditure increases between Fiscal Year 2016-17 and Fiscal Year 2018-19 in Salaries and Benefits reflect the recategorization of 14 FTE positions from Program 4.0 to this program due to the reduction of regulatory activities associated with the source control function, which supports restoration and protection efforts under the EFA and Restoration Strategies, as well as increases in healthcare benefit costs and FRS contributions.

Increases and decreases between Fiscal Year 2016-17 and Fiscal Year 2018-19 in Contractual Services, Operating Expenses, Operating Capital Outlay, Fixed Capital Outlay, and Interagency Expenditures represent the shift in cash flow requirements across the various expense categories for the implementation of Restoration Strategies Projects as they move from Planning, Design, Construction, and Operations and Maintenance.

Decreases between Fiscal Year 2016-17 and Fiscal Year 2018-19 in Debt resulted from refinancing Certificates of Participation.

Budget Variances

The Fiscal Year 2020-21 Preliminary Budget has a 18.2 percent ($19.9 million) increase from the Fiscal Year 2019-20 Adopted Budget of $109.8 million.

The major variances in expense categories are:

Operating Expenses increased 19.1 percent ($2.7 million) primarily due to increased cash flow requirements for structure modifications, repairs, and replacements ($3.7 million), offset by a reduction in STA operations and maintenance ($1 million).

Operating Capital Outlay decreased 95.8 percent ($3 million) primarily due to reduced one-time fund balance funding for STA capital construction.

Fixed Capital Outlay increased 41.1 percent ($20.1 million) due to increased new and prior year state appropriated funding in this expense category for Restoration Strategies, including STA1-W Expansion #2.

Grand Total	**$ 724,643**	**$ -**	**$ -**	**$ 4,317,580**	**$ -**	**$ 68,168,382**	**$ -**	**$ -**	**$ -**	**$ 73,210,605**

Other Major Budget Items:

- Contracted Services:
  - Restoration Strategies Science Plan and Source Control activities ($2.5 million)
  - STA Operations and Maintenance, including vegetation management, structure inspection program, site management and STA permit-required monitoring ($1.5 million).
  - STA science and evaluation, including optimization and performance, source controls and BMP studies, and monitoring and recovery of impacted areas in the Everglades ($808,064).
  - Expanded Monitoring for C-51W Upstream ($308,550)
- Operating Expenses:
  - Projects in the table above ($4.3 million).
  - STA Operations and Maintenance, including vegetation management, structure inspection program, site management and STA permit-required monitoring ($10.4 million).
  - STA science and evaluation, including optimization and performance, source controls and BMP studies, and monitoring and recovery of impacted areas in the Everglades ($2.2 million).
- Operating Capital Outlay:
  - STA Operations and Maintenance, including vegetation management, structure inspection program, site management and STA permit-required monitoring ($132,830).

AMERICAN OVERSIGHT

- Fixed Capital Outlay:
    - Projects in the table above ($68.2 million).
    - STA Operations and Maintenance, including STA modifications, repair, and replacement ($869,000).
- Debt:
    - Debt service payments ($16.8 million).
- Reserves:
    - Hurricane/Emergency Reserves for the Stormwater Treatment Areas. ($3 million).

AMERICAN OVERSIGHT

B. District Specific Programs

3. Comprehensive Everglades Restoration Plan (CERP)

District Description

The CERP contains 68 major components that involve the creation of reservoirs, wetland-based water quality treatment areas and other features. These components will vastly improve the quantity, quality, timing, and distribution of water for the South Florida environment. Benefits will be widespread and include improvements in:

- Lake Okeechobee.
- The Caloosahatchee River and Estuary.
- The St. Lucie River and Estuary.
- The Indian River Lagoon.
- Loxahatchee Watershed, River and Estuary.
- Lake Worth Lagoon.
- Biscayne Bay and Biscayne National Park.
- Florida Bay.
- Picayune Strand.
- Big Cypress National Preserve.
- The Everglades Protection Area, including:
    - The Loxahatchee National Wildlife Refuge (WCA-1).
    - Water Conservations Areas 2 and 3.
    - Everglades National Park.

In addition, implementation of the CERP will improve and sustain water supplies for urban and agricultural needs, while maintaining current C&SF Flood Control Project purposes.

The CERP includes pilot projects to test technologies, such as aquifer storage and recovery and seepage management methods, which are essential to the implementation of CERP. The CERP also includes seven critical restoration projects, for which Project Cooperation Agreements were executed and the projects constructed by the USACE and the District.

AMERICAN OVERSIGHT

IV. PROGRAM ALLOCATIONS

The CERP program encompasses:

- Planning and Evaluation.
- Pre-construction Engineering and Design.
- Real Estate Acquisition.
- Environmental Remediation and Mitigation.
- Permitting.
- Capital Construction.
- Operations and Maintenance, Repair, Rehabilitation and Replacement of Constructed Facilities.
- A Science-Based Adaptive Assessment and Monitoring Effort.
- Program Management Activities.

Changes and Trends

Implementation of the CERP began with Water Resources Development Act of 2000 and the execution of the Design Agreement between the USACE and the District in May 2000. The Design Agreement covers the terms and conditions for 50-50 cost-share on the costs for planning, design, development of construction plans and specifications, engineering during construction, adaptive assessment and monitoring and several CERP programmatic activities. In August of 2009, the District and the USACE executed the "Master Agreement for Cooperation in Constructing and Operating, Maintaining, Repairing, Replacing and Rehabilitating Projects Authorized to be undertaken pursuant to the Comprehensive Everglades Restoration Plan" (CERP Master Agreement). The CERP Master Agreement covers the terms and conditions for 50-50 cost-share on the costs for real estate acquisition and construction of CERP projects, as well as costs for long-term operation, maintenance, repair, replacement and rehabilitation (OMRR&R) of those projects. In 2007, Congress passed the Water Resources Development Act (WRDA) that authorized the Indian River Lagoon, Picayune Strand Restoration, Melaleuca Eradication and Other Exotic Plants and Site 1 Impoundment projects. In 2014, Congress passed the Water Resources Reform and Development Act (WRRDA) that authorized four additional CERP projects: Caloosahatchee (C-43) West Basin Storage Reservoir, Biscayne Bay Coastal Wetlands - Phase I, C-111 Spreader Canal Western and Broward County Water Preserve Areas. In the Water Resources Development Act of 2016 (WRDA 2016), Congress authorized the Central Everglades Planning Project. In the Water Resources Development Act of 2018 (WRDA 2018), Congress authorized the EAA Reservoir and Stormwater Treatment Area.

From 2000 through 2019, the District and the USACE maintained the 50-50 cost-share balance under the Design Agreement with no requirement for cash payments to the USACE. The balance was maintained by development and management of annual work plans that allocated the necessary planning and design work and expenditures between the District and the USACE. The District and USACE continue to work closely in managing the Design Agreement and CERP Master Agreement work and expenditures to maintain the 50-50 cost-share balance without the District being required to make cash contributions to the USACE. In 2004, the District initiated design and construction of several CERP projects. In recent years, the District focused available resources on six major construction projects: C-111 Spreader Canal Western, C-44 Reservoir Pump Station and Stormwater Treatment Area, Biscayne Bay Coastal Wetlands - Phase 1, Picayune Strand Restoration, the Caloosahatchee (C-43) West Basin Storage Reservoir, and the Central Everglades Project. The preliminary Fiscal Year 2020-21 Budget includes new and prior years State Appropriations funding of $376 million for planning, design, construction and land acquisition for the Everglades Agricultural Area Storage Reservoir Conveyance Improvements and Stormwater Treatment Area, the Caloosahatchee (C-43) West Basin Storage Reservoir, the C-44 / C-23 interconnect, Biscayne Bay Coastal Wetlands Cutler Wetlands and project planning. The completed project features of the Biscayne Bay Coastal Wetlands - Phase I (Deering Estate Flow-way and portions of the L-31E Flow-way), C-111 Spreader Canal Western Project and Picayune Strand Restoration (Merritt Pump Station and Faka Union Pump Station and Miller Pump Station) projects, Site 1 Phase 1 Project and the Melaleuca Eradication and Other Exotic Plants Project are now in the post-construction Operation and Maintenance phase.

AMERICAN OVERSIGHT

Increases and decreases between Fiscal Year 2016-17 and Fiscal Year 2018-19 in Contractual Services, Operating Expenses, Operating Capital Outlay, Fixed Capital Outlay, and Interagency Expenditures represent the shift in cash flow requirements across the various expense categories for the implementation of CERP Projects as they move from Planning, Design, Construction, and Operations and Maintenance.

Budget Variances

The Fiscal Year 2020-21 Preliminary Budget of $438.2 million is a 5.4 percent ($22.4 million) increase from the Fiscal Year 2019-20 Adopted Budget of $415.8 million.

The major variances in expense categories are:

Contracted Services decreased 23.8 percent ($14.1 million) primarily due to a decrease in the Lake Okeechobee Watershed Protection Program ($10 million).

Operating Expenses decreased 54.8 percent ($4.2 million) primarily due to a decrease in cash flow requirements for the Old Tamiami Trail Road Removal and new works for the C-44 Reservoir Pump Station and Stormwater Treatment Area operational, testing, and monitoring phase.

Operating Capital Outlay increased 99.6 percent ($16.6 million) primarily due to reduced cash flow requirements the Everglades Agricultural Area Storage Reservoir Conveyance Improvements and Stormwater Treatment Area and reduced requirements for CERP planning design and engineering.

Fixed Capital Outlay increased 18.5 percent ($57.4 million) due to increased primarily due to increased cash flow requirements the Everglades Agricultural Area Storage Reservoir Conveyance Improvements and Stormwater Treatment Area.

AMERICAN OVERSIGHT

IV. PROGRAM ALLOCATIONS

Major Budget Items for this Specific Program include the following:

- Salaries and Benefits ($7.1 million).

The table below includes projects that are funded with Contracted Services, Operating Expenses and Fixed Capital Outlay. The projects listed below are also addressed in their respective state programs.

Project Name	Salaries and Benefits	Other Personal	Contracted Services	Operating Expenses	Operating Capital	Fixed Capital Outlay	Interagency Expenditures	Debt	Reserves	Grand Total
CERP Everglades Restoration Land Acquisition	$ -	$ -	$ -	$ -	$ -	$ 11,900,000	$ -	$ -	$ -	$ 11,900,000
CERP Planning	$ -	$ -	$ 4,700,000	$ -	$ -	$ -	$ -	$ -	$ -	$ 4,700,000
CERP-Lake Okeechobee Watershed Restoration Project	$ 158,879	$ -	$ 40,000,000	$ -	$ -	$ -	$ -	$ -	$ -	$ 40,158,879
Caloosahatchee River (C-43) West Basin Storage Reservoir	$ 661,609	$ -	$ -	$ -	$ -	$ 140,000,000	$ -	$ -	$ -	$ 140,661,609
CERP - C-44/C-23 Interconnect		$ -	$ -	$ -	$ -	$ 3,000,000	$ -	$ -	$ -	$ 3,000,000
CERP Biscayne Bay Coastal Wetlands Phase 1	$ 134,070	$ -	$ -	$ -	$ -	$ 11,000,000	$ -	$ -	$ -	$ 11,134,070
Everglades Agricultural Area (EAA) Storage Reservoir Conveyance Improvements and Stormwater Treatment Area (STA)	$ 613,394	$ -	$ -	$ -	$ -	$ 201,830,958	$ -	$ -	$ -	$ 202,444,352
Grand Total	**$ 1,567,952**	**$ -**	**$ 44,700,000**	**$ -**	**$ -**	**$ 367,730,958**	**$ -**	**$ -**	**$ -**	**$ 413,998,910**

Additional major budget items to implement the CERP in Fiscal Year 2020-21 include continued design, construction, and other activities for projects.

- Contracted Services:
  - RECOVER and adaptive assessment and monitoring ($156,000).
  - WCA-3 Decompartmentalization and Sheetflow Enhancement Part 1 Project ($210,715) for sampling and laboratory analysis in support of Decompartmentalization Physical Model testing.
  - CERP Planning – $4.7 million.
- Operating Expenses:
  - Program indirect support ($3.3 million).
- Fixed Capital Outlay:
  - CERP future land acquisition ($11.9 million).
- Interagency Expenditures:
  - RECOVER and adaptive assessment and monitoring ($938,902).
  - WCA-3 Decompartmentalization and Sheetflow Enhancement Part 1 Project ($116,790) for sampling and laboratory analysis in support of Decompartmentalization Physical Model testing.
- Debt:
  - Debt service payments ($13.6 million).

AMERICAN OVERSIGHT

IV. PROGRAM ALLOCATIONS

C. Program Allocations by Area of Responsibility

Subsection 373.535(1)(a)2., Florida Statutes, requires the District to report the total estimated amount in the District budget for each area of responsibility (AOR). All programs and activities at water management districts are categorized by four AORs: water supply, water quality, flood protection and floodplain management, and natural systems.

Expenditures in the four AORs are provided only at the program level. These AOR (water supply, water quality, flood protection and floodplain management, and natural systems) expenditures are estimates only and have been allocated among the programs, since a project may serve more than one purpose.

Therefore, the AOR expenditures should be viewed only as one indication of whether the District is adequately addressing each AOR.

The following tables provide the AOR expenditures for Fiscal Years 2018-19 (Actual – Unaudited), 2019-20 (Adopted Budget) and 2020-21 (Preliminary Budget).

AMERICAN OVERSIGHT

VI. PERFORMANCE MEASURES

This section presents a selection of process performance measurements that were developed through a joint effort with the Department of Environmental Protection and all five water management districts. These measures reflect three of the core mission areas of the District – natural systems, water quality, and water supply – as well as mission support activities. The information is reported as of the end of Fiscal Year 2018-19 and is in a standard format developed for this report.

Overall Goal: The District budget ensures core missions and prioritized programs are administered both effectively and efficiently.

AMERICAN OVERSIGHT

VI. PERFORMANCE MEASURES

A. Natural Systems

Primary Goal: To restore the hydrology of natural systems and improve water quality of natural systems.

- Natural System Objective 1: Maintain the integrity and functions of water resources and related natural systems.
    - Number of Minimum Flows and Minimum Water Levels (MFLs) and Reservations, by water body type, established annually (fiscal year) and cumulatively.
    - Number and percentage of water bodies meeting their adopted MFLs.

South Florida Water Management District
PERFORMANCE MEASURES - NATURAL SYSTEMS
Fiscal Year 2018-19 End of Year Performance Data
Preliminary Budget - January 15, 2020

Natural System Primary Goal: To restore the hydrology of natural systems and improve water quality of natural systems.

NS Objective 1: Maintain the integrity and functions of water resources and related natural systems		
Annual Measures	**Fiscal Year 18-19**	
Number of MFLs and Reservations, by water body type, established annually (fiscal year) and cumulatively	**Annual**	**Cumulative**
Aquifer	0	14
Estuary	0	6
Lake	0	2
River	0	2
Spring	0	0
Wetland	0	21
Number and percentage of water bodies meeting their adopted MFLs	**Annual**	**Percent**
Number of water bodies meeting MFLs	17	42.50%
Number of water bodies with adopted MFLs	40	

- Natural System Objective 2: Restore or improve degraded water resources and related natural systems to a naturally functioning condition.
    - For water bodies not meeting their adopted MFLs, the number and percentage of those water bodies within an adopted or approved recovery prevention strategy.

South Florida Water Management District
PERFORMANCE MEASURES - NATURAL SYSTEMS
Fiscal Year 2018-19 End of Year Performance Data
Preliminary Budget - January 15, 2020

Natural System Primary Goal: To restore the hydrology of natural systems and improve water quality of natural systems.

NS Objective 2: Restore or improve degraded water resources and related natural systems to a naturally functioning condition.		
Annual Measures	**Fiscal Year 18-19**	
For water bodies not meeting their adopted MFLs, the number and percentage of those water bodies with an adopted recovery or prevention strategy.	**Annual**	**Percent**
Number of water bodies with an adopted recovery or prevention strategy	23	100.00%
Number of water bodies supposed to have an adopted recovery or prevention strategy	23

VI. PERFORMANCE MEASURES

B. Water Quality

Primary Goal: To achieve and maintain surface water quality standards.

- Water Quality Objective 1: Identify the efficiency of permit review, issuance and relative cost of permit processing.
    - For closed applications, median time to process Environmental Resource Permits (ERPs) by permit type and total.
    - For ERPs, cost to issue permit for all permit types.
    - For ERPs, in-house application to staff ratio for all permit types.

South Florida Water Management District
PERFORMANCE MEASURES - WATER QUALITY
Fiscal Year 2018-19 End of Year Performance Data
Preliminary Budget - January 15, 2020

Water Quality Primary Goal: To achieve and maintain surface water quality standards

WQ Objective 1: Identify the efficiency of permit review, issuance and relative cost of permit processing.

Quarterly Measures	Quarter 1		Quarter 2		Quarter 3		Quarter 4		FY 2018-19 Annualized Performance	
For closed applications, the median time to process ERP by permit type and total.	Median		Median		Median		Median		Median	
Exemptions and noticed general permits	16.00		14.00		14.00		18.00		16.00	
Individually processed permits	21.00		22.00		22.00		23.00		23.00	
All authorizations combined	20.00		19.00		20.00		22.00		21.00	
For ERPs, cost to issue permit for all permit types	**Number**	**Cost/Permit**	**Number**	**Cost/Permit**	**Number**	**Cost/Permit**	**Number**	**Cost**	**Number**	**Cost/Permit**
Total cost	$415,922.22	$577.67	$265,311.17	$360.48	$271,061.17	$342.68	$288,036.95	$334.93	$1,240,331.51	$399.21
Number of permits	720		736		791		860		3,107	
For ERP, In-House Application to Staff Ratio for All Permit Types	**Number**	**Ratio**	**Number**	**Ratio**	**Number**	**Ratio**	**Number**	**Ratio**	**Number**	**Ratio**
Total number of open applications	720	28.02	736	43.29	791	46.53	860	48.64	3,107	40.15
Number of staff for the permit area	25.70		17.00		17.00		17.68		77.38	

AMERICAN OVERSIGHT

VI. PERFORMANCE MEASURES

C. Water Supply

Primary Goal: To ensure a safe and adequate source of water for all users.

- Water Supply Objective 1: Increase available water supplies and maximize overall water use efficiency to meet identified existing and future needs.
    - Districtwide, estimated amount of water (million gallons per day_ made available through projects that the District has constructed or contributed funding to, excluding conservation projects.
    - Uniform residential per capita water use (Public Supply) by District (gallons per capita per day).

South Florida Water Management District
PERFORMANCE MEASURES - WATER SUPPLY
Fiscal Year 2018-19 End of Year Performance Data
Preliminary Budget - January 15, 2020

Water Supply Primary Goal: To ensure a safe and adequate source of water for all users

WS Objective 1: Increase available water supplies and maximize overall water use efficiency to meet identified existing and future needs.	
Annual Measure	Fiscal Year 2017-18*
District-wide, the quantity (mgd) of the 2010-2030 Public Supply increase in demand that has been met, excluding water conservation projects	MGD
	263.64
Uniform residential per capita water use (Public Supply) by District (gallons per capita per day).	79
	79.00

* FY18 latest data available FY19 collected Jan 2020

- Water Supply Objective 2: To identify the efficiency of permit review and issuance and relative cost of permit processing.
    - For closed applications, median time to process Consumptive Use Permits (CUPs) by permit type and total.
    - For CUPs, cost to issue permit for all permit types.
    - For CUPs, in-house application to staff ratio for all permit types.

AMERICAN OVERSIGHT

VI. PERFORMANCE MEASURES

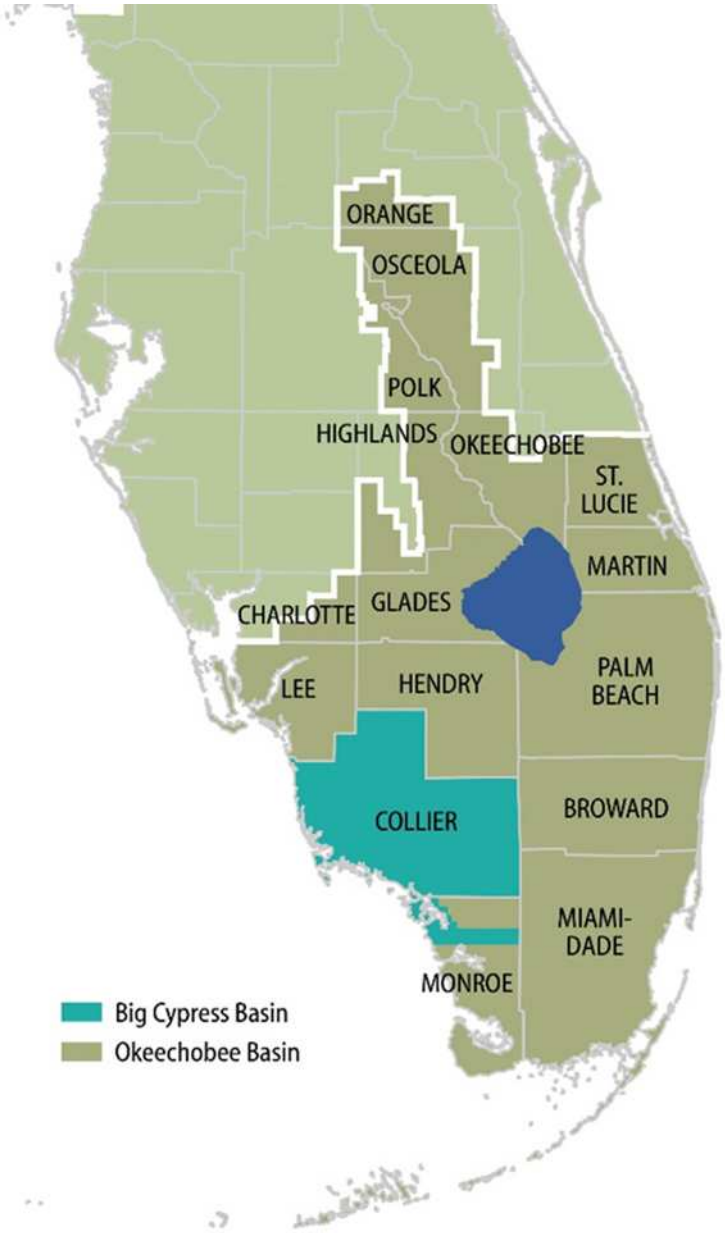
D. Mission Support

Primary Goal: Support District core programs both effectively and efficiently.

- Mission Support Objective 1: To assess the ongoing costs of administrative and support operations in order to achieve optimal efficiency to minimize costs.
    - Administrative costs as a percentage of total expenditures (cumulative totals reported for each quarter during a fiscal year).

South Florida Water Management District
PERFORMANCE MEASURES - MISSION SUPPORT
Fiscal Year 2018-19 End of Year Performance Data
Preliminary Budget - January 15, 2020



Mission Support Primary Goal: Support District core programs both effectively and efficiently.

MS Objective 1: To assess the ongoing costs of administrative and support operations in order to achieve optimal efficiency to minimize costs.		
Annual Measure	Fiscal Year 2018-19	
Administrative Costs (State 5-6) as a Percentage of Total Expenditures (report cumulative totals for each quarter during a fiscal year)	Number	Percentage
Administrative Costs (State 5-6)	$37,881,824	7.60%
Total expenditures (State 1-6)	$498,392,954	

AMERICAN OVERSIGHT

VII. BASIN BUDGETS

The Florida State Legislature enacted the Water Resources Act in 1972 which divided the state into five regional Water Management Districts defined along natural hydrologic boundaries. This Act (Chapter 373) also greatly expanded the responsibilities of the Districts. Further definition of water management roles was established as a result of a legislative amendment resulting in the establishment of two basin boards within the South Florida Water Management District. The basins were named Okeechobee Basin and Big Cypress Basin.

VII. BASIN BUDGETS

A. Big Cypress Basin

The Big Cypress Basin encompasses all of Collier and a small portion of mainland Monroe counties. The basin also includes the natural lands of the Corkscrew Swamp and Sanctuary, the Big Cypress National Preserve, the Florida Panther National Wildlife Refuge, the Fakahatchee Strand, the Corkscrew Regional Ecosystem Watershed, Picayune Strand State Forest, and the 10,000 Islands. Programs include the Big Cypress Basin Watershed Management Plan, stormwater projects, and other capital improvements projects to store additional water, recharge groundwater, and improve water quality in Naples Bay.

Property owners within the Big Cypress Basin were most recently assessed through the Fiscal Year 2019-20 Adopted Budget the aggregate rolled-back millage rate of 0.2344 mills which is comprised of the District-at-large rolled-back millage rate of 0.1152 mills and the Big Cypress Basin rolled-back millage rate of 0.1192 mills.

The Fiscal Year 2020-21 proposed rolled-back millage rate for the property owners within the Big Cypress Basin is 0.2283 mills which is comprised of the District-at-large rolled-back millage rate of 0.1118 mills and the Big Cypress Basin rolled-back millage rate of 0.1165 mills. The impact of the proposed rolled-back millage rate is a savings of $0.61 per $100,000 taxable value for property owners within the Big Cypress Basin. Final millage rates and budget for the proposed Fiscal Year 2020-21 Big Cypress Basin Budget will be presented for discussion and approval by the Basin Board in August and will be presented for discussion and adoption by the District Board in September 2020.

VII. BASIN BUDGETS

B. Okeechobee Basin

The Okeechobee Basin is based on the sprawling Kissimmee-Okeechobee-Everglades ecosystem, which stretches from Central Florida's Chain of Lakes to Lake Okeechobee and south to the Florida Keys. It includes the 700,000 acres within the Everglades Agricultural Area, the heavily developed southeast coast and Everglades National Park. The Okeechobee Basin encompasses whole or parts of 15 of the 16 counties (excludes Collier County) within the District's boundaries of central and southern Florida.

Property owners within the Okeechobee Basin were most recently assessed through the Fiscal Year 2019-20 Adopted Budget at the aggregate rolled-back millage rate of 0.2795 mills which is comprised of the District-at-large rolled-back millage rate of 0.1152 mills, the Okeechobee Basin rolled-back millage rate of 0.1246 mills and the Everglades Construction Project rolled-back millage rate of 0.0397 mills.

The Fiscal Year 2020-21 proposed rolled-back millage rate for the property owners within the Okeechobee Basin is 0.2712 mills which is comprised of the District-at-large rolled-back millage rate of 0.1118 mills, the Okeechobee Basin rolled-back millage rate of 0.1209 mills, and the Everglades Construction Project rolled-back millage rate of 0.0385 mills. The impact of the proposed rolled-back millage rate is a savings of $0.83 per $100,000 taxable value for property owners within the Okeechobee Basin. Final millage rates and budget for the proposed Fiscal Year 2020-21 Budget will be presented for discussion and adoption by the District Board in September 2020.

VIII. APPENDICES

A. Related Reports

The following table includes a list of reports provided to the state that support the District's annual Service Budget. Also included are due dates and contact information.

The mandated Consolidated Annual Report (CAR) is satisfied by the South Florida Water Management District utilizing the South Florida Environmental Report (SFER) – Volume II. This is a major consolidation effort authorized by the Florida Legislature in 2005-36, Laws of Florida, and Subsection 373.036(7), Florida Statutes. The SFERs for current and historical years are posted on the District's website at *www.sfwmd.gov/sfer*.

The following table is supplemented with the list of reports consolidated into the three-volume SFER (due annually on March 1) that are provided to the state and linked to the Tentative Budget submission (due annually on August 1).

PLAN / REPORT / ACTIVITY [1]	DUE DATE	CONTACT	E-MAIL ADDRESS TELEPHONE
Preliminary Budget Submission	Annually January 15	Candida Heater	cheater@sfwmd.gov 561-682-6486
Tentative Budget Submission	Annually August 1st	Candida Heater	cheater@sfwmd.gov 561-682-6486
VOLUME I – THE SOUTH FLORIDA ENVIRONMENT			
South Florida Hydrology and Water Management - Volume I, Chapter 2 A water year review of the South Florida regional water management system along with the impacts from hydrologic variation. This chapter fulfills requirements in the Everglades Forever Act (EFA; Section 373.4592(13), F.S.) and Northern Everglades and Estuaries Protection Program (NEEPP) legislation (Section 373.4595(6), F.S.).	Annually March 1	Chelsea Qiu Violeta Ciuca	cqiu@sfwmd.gov 561-682-6196 vciuca@sfwmd.gov 561-682-2611
Water Quality in the Everglades Protection Area - Volume I, Chapter 3A Provides (1) an assessment of water quality within the Everglades Protection Area (EPA) for the water year, (2) numerous reporting requirements under the EFA, (3) a preliminary assessment of total phosphorus (TP) criterion achievement, and (4) an annual update of the comprehensive overview of nitrogen and phosphorus concentrations and loads throughout the EPA. This chapter fulfills	Annually March 1	Paul Julian II (DEP)	Paul.Julian@dep.state.fl.us 239-344-5605

PLAN / REPORT / ACTIVITY [1]	DUE DATE	CONTACT	E-MAIL ADDRESS TELEPHONE
In accordance with Section 403.0675, F.S. and NEEPP legislation (Section 373.4595(6), F.S.), this report (in conjunction with Chapters 8B and 8C) comprises the NEEPP Annual Progress Report for the Lake Okeechobee, St. Lucie River, and Caloosahatchee River watersheds. The report also documents the status of DEP's Lake Okeechobee, Caloosahatchee Estuary, and St. Lucie River and Estuary basin management action plans (BMAPs), and Florida Department of Agriculture and Consumer Services' (FDACS') implementation of the agricultural nonpoint source best management practices (BMPs) in the Northern Everglades watersheds. It also contains an annual accounting of expenditure of Save Our Everglades Trust Fund (SOEFT) funds and includes the NEEPP Fiscal Year 2018-19 Annual Work Plan. This chapter also fulfills requirements set forth in the EFA (Section 373.4592(13), F.S. and Section 403.0675, F.S.). This chapter has an associated appendix for the 2020 SFER that contains the Lake Okeechobee Watershed Protection Plan Update.			561-682-6354 xpernett@sfwmd.gov 561-682-2928
Lake Okeechobee Watershed Annual Report - Volume I, Chapter 8B In accordance with NEEPP legislation (Section 373.4595(6), F.S.), this report (in conjunction with Chapter 8A) comprises the NEEPP Annual Progress Report for the Lake Okeechobee Watershed. The report covers the water year status update on the Lake Okeechobee Watershed Research and Water Quality Monitoring Program. B. Alternative Water Supply Funding

Pursuant to Subsection 373.707(6)(a)., F.S., the District has reviewed its funding for alternative water supply (AWS) projects, as summarized below. For Fiscal Year 2020-21 Preliminary Budget, there is $0 of funding from the Water Protection and Sustainability Trust Fund included in the below table.

A summary of the alternative water supply projects by funding type has not yet been determined. In his Fiscal Year 2020-21 Budget, the Governor proposed $40 million in Specific Appropriation 1622 be provided to continue a water supply and water resource development grant program to help communities plan for and implement conservation, reuse and other water supply and water resource development projects. Priority funding will be given to the areas with greatest need and for projects that provide the greatest benefit. All viable alternative water supply resources shall be identified and researched to provide an assessment of funding needs critical to supporting Florida's growing economy.

Alternative Water Supply Funding in
Fiscal Year 2020-21 Preliminary Budget

Funding Source	Amount of Funding	Percent of Total
District Funding for AWS	$0	0%
State Funding for AWS	$0	0%
Total Funding for AWS	**$0**	**0%**

C. Outstanding Debt

In November 2006, the District issued $546,120,000 in Certificates of Participation (COPs) to fund the construction of Everglades Restoration projects. COPs are statutorily authorized tax-exempt certificates. In February 2016, the District advanced refunded $442,025,000 of the outstanding balance of the Series 2006 COPs. This refunding was financed through the issuance of the Series 2015 Refunding COPs with a par value of $385,425,000. The economic gain on the refunding is a net present value savings of $72.2 million. The remaining outstanding principle balance at the end of Fiscal Year 2018-19 was $361,360,000.

The status of the District's Series 2015 COPs is summarized below as of September 30, 2019.

Current Debt Service Requirements on Existing Debt planned for Fiscal Year 2019-20:

Series	Original Issue Amount	Maturity	Principal	Interest	Total Requirements
COPs 2015	$385,425,000	2037	$ 12,935,000	$ 17,437,125	$ 30,372,125

Future Debt Service Requirements on Existing Debt:

Series	Fiscal Year	Principal	Interest	Total Requirements
COPs 2015	2020-21	13,580,000	16,774,250	30,354,250
	2021-22 thru 2025-26	78,760,000	72,709,750	151,469,750
	2026-27 thru 2030-31	100,420,000	50,418,750	150,838,750
	2031-32 thru 2035-36	126,500,000	23,548,500	150,048,500
	2036-37	29,165,000	729,125	29,894,125
		$348,425,000	**$164,180,375**	**$512,605,375**

VIII. APPENDICES

D. Consistency Issues for Fiscal Year 2020-21

1. Prior Fiscal Years' Summary

In Fiscal Year 2011-12, the five water management districts agreed to and implemented a tiered management classification and performance metrics.

In Fiscal Year 2012-13 the management tiers were re-evaluated based on District size, scope, and programs of each District. The tiers are set at SFWMD Tier 1, SWFWMD and SJRWMD at Tier 2, and NWFWMD and SRWMD at Tier 3. The Tier 2 and Tier 3 districts have all adopted common pay grades, which facilitates the development of more consistent nomenclature for positions. Initially, the Tier 2 districts achieved pay grade consistency for approximately 50 jobs, particularly jobs in information technology, engineering and science.

Additionally, the performance metrics were evaluated annually and in Fiscal Year 2014-15 were finalized to include 7 CUP, 9 ERP, 1 Mission Support, 3 Natural Systems, and 3 Water Supply metrics for a total of 25 combined quarterly and annual metrics.

In addition to the structure, nomenclature, and performance metrics standards, the districts also adopted the Department of Management Services (DMS) Minimum Equipment Replacement Criteria. For cars and pickup trucks, a Replacement Eligibility Factor (REF) is determined by considering the age of the vehicle, mileage, condition, lifetime maintenance costs, downtime, most recent annual maintenance cost, and cost per mile. For trucks, tractors, mowers, trailers, and other equipment, a mileage (hours) / age threshold is established. If an asset exceeds the REF or replacement threshold, it is eligible for replacement.

The water management districts evaluated their fleet and equipment replacement policies, compared them to the state's criteria, and adopted the state's minimum equipment replacement criteria (floor) or established criteria more stringent than the state.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006532

E. Consistency Issues for Fiscal Year 2020-21

2. Current Fiscal Years' Summary

a) Staff Levels/Reorganization

Each water management district continues to evaluate its organizational structure and staffing levels as it focuses on its core mission.

The Preliminary Budget for SFWMD maintains a steady staffing level of 1,475 FTEs.

The SFWMD executive management hold regular meetings to review vacant positions and the justification for their need. Selections for all positions approved for hire are typically hired at or below the budgeted salary amount. Routine oversight and reporting to ensure staffing resources support the agency's operational needs in the most efficient manner.

b) Health Insurance

The water management districts continue to explore options individually, as well as collectively, to standardize benefits and control health insurance costs for both the employee and employer. The District continues to explore plan design options and cost saving measures that have a greater impact on health plan costs through implementing tighter pharmacy management and establishing incentives for the employees to utilize lower costs benefits, while offering alternative options that are low cost for both the employer and employee. Staff will continue to work with Cigna staff for potential plan design changes to provide to the Governing Board for future options in controlling health insurance costs for the District as well as not impact the employee's premiums. Prior plan design changes remain in effect and are being evaluated for positive fiscal impact:

- Managers contribute towards dental premiums,
- Implement the final phase of retiree's paying for their full premiums that the Governing Board approved last year,
- Mandatory use of CVS Pharmacy Network for all maintenance medications,
- Tele/Virtual Medicine included at $0 Copay,
- Emergency Room Copay increased to $200 per visit,
- Transition Life & Disability Coverage to CIGNA, and
- Expansion of existing Disease Management Program.

AMERICAN OVERSIGHT

c) Contract and Lease Renewals

District report on progress of price of concessions from vendors.

Water Management Districts continue to examine their existing contracts and seek price concessions from their vendors. Each water management district is encouraged, regarding contracts or lease agreements, to seek these same price concessions from their vendors for existing contracts. When considering lease agreements, office space should be utilized in the most efficient manner possible with a focus on saving taxpayer dollars.

Every year, as applicable, the Districts requests every firm under a continuing contract hold their labor rates for any renewal period remaining in the contract term. For example, twenty of the twenty-seven firms to date have agreed to maintain their rates for a two-year renewal period for Professional Engineering Services for Operation, Maintenance, Repair, Replacement and Rehabilitation (OMRR&R) and Restoration Services.

Negotiated cost savings and cost avoidance are also realized through various competitive procurements of both commodities and services. Savings attributed to specific contracts include the elimination of an annual escalator or negotiation of labor rates and other direct costs. The District also realizes saving through piggy-backing the same rates and conditions from intergovernmental cooperative purchases.

Regarding office space leases, the District currently leases office space to DEP at its headquarters in West Palm Beach. The current leased space is nearly 18,000 square feet and is updated annually based on the actual square footage needed and offset by the District's occupancy at DEP's facility located at the Benton Building in Ft. Pierce, FL which is currently less than 1,000 square feet. For Fiscal Year 2020-21, the District anticipates receiving $366,348 in revenue from this lease and an additional $359,590 of lease revenue from PBSO.

For the remaining lease agreements, the SFWMD at the beginning negotiated price concessions on the earliest years of the lease terms. The price concessions were realized, and the remaining years terms call for negotiated inflationary increases. The leased spaces are for Service Centers located in Orange and Lee Counties where the District does not own suitable facilities.

The District is utilizing its owned office space in the most efficient manner possible by leasing out available space. Below are additional locations with leased space and the annual income generated.

- Available space in Fort Myers Service Center is being leased to the Edison & Ford Winter Estates resulting in $108,899 in revenue,

- The Daycare facility on Head Quarters Campus is leased resulting in $113,758 in revenue.

24-00720-20

A bill to be entitled

An act relating to; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Chapter 547, Florida Statutes, consisting of sections XXXXXX, is created to read:

CHAPTER 547

SPORTS WAGERING

547.001 Definitions.—

(1) "Collegiate sport or athletic event" means a sport or athletic event offered or sponsored by or played in connection with a public or private institution that offers educational services beyond the secondary level.

(2) "Division" means the Division of Pari-mutuel Wagering of the Department of Business and Professional Regulation.

(3) "Facility" means a facility at which a pari-mutuel permitholder is authorized under its valid pari-mutuel wagering permit to conduct pari-mutuel wagering activities.

(4) "Licensee" means a pari-mutuel permitholder that holds a sports wagering license issued by the division under this chapter.

(5) "Online sports pool" means a sports betting operation in which wagers on sports events are made through computers or mobile or interactive devices and accepted through an online gaming system.

(6) "Operator" means:

1. A licensee operating a sports pool or online sports pool; or

Commented [PJ1]: waiting until this is more or less finalized before drafting the title provisions

Commented [PJ2]: waiting until this is more or less finalized before completing the directory clause

Commented [PJ3]: will this include greyhound tracks after 2021 or do we need to add language specifically including them?

This potential issue would need to be addressed elsewhere in the bill as well.

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006539

2. A permittee operating an online sports pool on behalf of a licensee.

(7) "Permittee" means an entity that holds a permit issued by the division to operate an online sports pool.

(8) "Professional sport or athletic event" means an event at which two or more persons participate in sports or athletic events and receive compensation in excess of actual expenses for their participation in such event.

(9) "Sports event" means any professional sport or athletic event, any Olympic or international sports competition event, and any collegiate sports or athletic event, or any portion thereof, including but not limited to the individual performance statistics of athletes in a sports event or combination of sports events. The term does not include:

(a) Any college sports or athletic event that takes place in this state;

(b) Any event in which any college team from this state participates; or

(c) Any games in a collegiate tournament in which some of the games in the tournament take place in this state.

(10) "Sports pool" means the business of accepting wagers on any sports event by any system or method of wagering other than pari-mutuel, as defined in s. 550.02, including, but not limited to, single-game bets, teaser bets, parlays, over-under, moneyline, pools, proposition bets, exchange wagering, in-game wagering, in-play bets, and straight bets.

(11) "Sports wagering lounge" means a designated area wherein a sports pool is operated by a licensee at the licensee's facility.

Commented [AM4]: These three stipulations not needed.

Commented [PJ5]: Most states don't have this specific restriction, but NJ does. Not sure if you want to include it or not.

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006540

547.002 Sports wagering authorized.—Notwithstanding any other law, a person who is 21 years of age or older may wager money or any other thing of value on a sports event if the wager is placed with an operator and the person is physically present in this state.

547.003 Authority of division.—The division shall administer this chapter and regulate the operation of sports pools and online sports pools under this chapter and the rules adopted pursuant thereto, and shall:

(1) Adopt rules to implement this chapter, including, but not limited to, rules:

(a) Requiring a licensee to maintain a specified amount of cash reserves;

(b) Relating to the acceptance of wagers on a series of sports events;

(c) Setting a limit on the maximum wager that an operator may accept from any single person on a single sports event;

(d) Regulating the types of wagering tickets that may be used and the method of issuing such tickets;

(e) Regulating the method of accounting operators must use and what records must be kept;

(f) Regulating the use of credit and checks by persons placing wagers;

(g) Requiring certain protections for persons placing wagers; and

(h) Requiring the display of signage relating to gambling addiction that must be present in sports wagering lounges.

(2) Conduct investigations and monitor the operation of sports pools and online sports pools.

Commented [AM6]: Strike this

Commented [AM7]: Take this out of here and put in the list of agency needs to make a rule about. Requirements for operators to provide warnings about gambling addiction and info on where to get help.

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006541

(3) Review the books, accounts, and records of any current or former operator.

(4) Suspend or revoke any license or permit issued under this chapter, after hearing, for any violation of this chapter or the administrative rules adopted pursuant thereto. In lieu of suspending or revoking a license or permit, the division may impose a civil penalty against the licensee or permittee for a violation of this chapter or any rule adopted by the division. Unless otherwise indicated, a civil penalty imposed under this section may be up to $1,000 per violation for each count or separate offense.

(a) The division may require operators to remit fines and assessments by electronic funds transfer.

(b) All penalties collected by the division under this paragraph must be deposited in the General Revenue Fund.

(5) Take testimony, issue summons and subpoenas for any witness, and issue subpoenas duces tecum in connection with any matter within its jurisdiction.

547.004 Sports wagering licenses; online sports pool operator permits.—

(1) A pari-mutuel permitholder may apply to the division for a sports wagering license. A sports wagering license may be issued only to a licensed pari-mutuel permitholder and, except for wagers placed through an online sports pool, the licensee may accept wagers only at the same facility at which the permitholder is authorized under its valid pari-mutuel wagering permit to conduct pari-mutuel wagering activities.

(2) A person may apply to the division for an online sports pool operator permit. Unless the permittee is also a licensee, a

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006542

permittee may only operate an online sports pool on behalf of a licensee.

(3) All applications submitted pursuant to this section must be on a form prescribed by the division and adopted by rule.

(4) An operator must annually renew a license or permit issued under this section.

(5) The application fee and renewal fee for a license or permit issued or renewed under this section is $100,000.

547.005 Occupational licenses.—A person employed or otherwise working in a sports wagering lounge while the lounge is conducting wagering must hold a valid sports wagering employee occupational license issued by the division. Food service, maintenance, and security employees with a current pari-mutuel occupational license and a current background check will not be required to have a sports wagering employee occupational license.

(1) A licensee may not employ or allow to work in a sports wagering lounge any person unless such person holds a valid occupational license.

(2) The division shall establish, by rule, a schedule for the renewal of sports wagering occupational licenses. Sports wagering occupational licenses are not transferable.

(3) Persons seeking sports wagering occupational licenses, or renewal thereof, shall make application on forms prescribed by the division. Applications for sports wagering occupational licenses must contain all of the information the division, by rule, may determine is required to ensure eligibility.

(4) The division shall adopt rules regarding sports

Commented [PJ8]: Amendment 5 fee.

I couldn't find the specific fee for an online sports pool permit but it seemed like they were both $100k

Commented [PJ9]: New Jersey requires occupational licenses, but I lifted the requirements, etc for this section from the cardroom statute

Commented [AM10]: Strike this occupational license section. Require operators to do background checks and provide iD and have all ready for inspection by regulators.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006543

wagering occupational licenses.

(5) The division may deny, declare ineligible, or revoke any sports wagering occupational license if the applicant or holder thereof has been found guilty or had adjudication withheld in this state or any other state, or under the laws of the United States of a felony or misdemeanor involving forgery, larceny, extortion, conspiracy to defraud, or filing false reports to a government agency, racing or gaming commission or authority.

(6) Fingerprints for all sports wagering occupational license applications shall be taken in a manner approved by the division and then shall be submitted to the Florida Department of Law Enforcement and the Federal Bureau of Investigation for a criminal records check upon initial application and at least every 5 years thereafter. The division may by rule require an annual record check of all renewal applications for a sports wagering occupational license. The cost of processing fingerprints and conducting a record check shall be borne by the applicant.

(7) The sports wagering employee occupational license fee may not exceed $50 for any 12-month period.

547.006 Sports pools; online sports pools.—

(1) A sports pool or online sports pool may not be offered by any person other than a licensee or a permittee operating an online sports pool on behalf of a licensee. Any person who violates this subsection is subject to a civil penalty of up to $10,000, in addition to any other penalty provided by law.

(2)(a) A licensee may not operate a sports pool or online sports pool, and a permittee may not operate an online sports

Commented [PJ11]: potential fee issue

Commented [PJ12]: amendment 5 fee issue

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

FL-SEN-20-0201-B, 20-0202-A-006544

pool on behalf of a licensee, unless a sports wagering lounge is established and has commenced operation at the licensee's facility. However, an applicant for a sports wagering license may petition the division to commence operation of a sports pool at a temporary location at the facility, and accept wagers via an online sports pool, during the pendency of construction of a sports wagering lounge at the applicant's facility.

(b) A licensee may only accept wagers from persons who are 21 years of age or older and:

1. Are physically present in the sports wagering lounge;

2. Are submitting a wager using an online sports pool; or

3. Are submitting a wager through one or more self-service kiosks located within the licensee's facility.

(3)(a) A licensee may apply to the division for a permit to operate an online sports pool in addition to operating a sports pool at the licensee's facility.

(b) A licensee or permittee offering an online sports pool may have up to three individually branded websites for the purposes of offering an online sports pool, each which may have an accompanying mobile application bearing the same brand as the website.

(c) Until a permit is received from the division, an applicant may not make a website or application available to the public, and may not accept wagers unless the wagers are strictly for testing purposes and nothing of value is wagered or exchanged.

(d) A licensee permitted to operate an online sports pool may enter into an agreement with another permittee so that the permittee may operate the online sports pool on the licensee's

Commented [AM13]: Put "or" after this semicolon

Commented [AM14]: Remove limit on number of websites.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006545

behalf. The terms of such agreement must be approved by the division before the agreement is valid. A permittee may not operate an online sports pool on behalf of more than one licensee.

(e) The server or other equipment used by an operator to accept wagers at a sports pool or online sports pool must be located at the licensee's facility.

(4) Operators may provide promotional credits, incentives, bonuses, complimentaries, or similar benefits designed to induce a person to wager.

547.007 Prohibitions.—

(1)(a) The following persons are prohibited from having any ownership interest in or control of a licensee or a facility in which a sports wagering lounge is located, and may not place a wager on a sports event that is overseen by the person's sports governing body based on publicly available information:

1. An athlete, a coach, a referee, or a director of a sport's governing body or any of such body's member teams.

2. A person who is a direct or indirect legal or beneficial owner of 10 percent or greater of a sports governing body or any of such body's member teams.

3. A sports governing body or any of such body's member teams.

4. A person who holds a position of authority or influence sufficient to exert influence over the participants in a sports event, including, but not limited to, a coach, manager, handler, or trainer.

5. A person with access to certain types of exclusive information on any sports event overseen by his or her sports

Commented [AM15]: This will be over ridden by Lotto merge. But can't require operators to have own servers and IT people!

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006546

governing body.

6. A person identified by any lists of prohibited persons provided to the division by a sports governing body.

(b) This subsection does not apply to any person who is a direct or indirect owner of a sports governing body member team and:

1. Has less than 10 percent direct or indirect ownership interest in a licensee; or

2. The shares of such person are registered pursuant to s. 12 of the Securities Exchange Act of 1934 and the value of the ownership of such team represents less than one percent of the person's total enterprise value.

(c) A person who violates this subsection is subject to a civil penalty of up to $1,000.

(2) An operator shall adopt procedures to prevent persons who are prohibited from wagering on sports events under subsection (1) from wagering on sports events. Additionally, an operator may not accept wagers from any person whose identity is known to the operator and:

(a) Who is the director, officer, owner, or employee of the operator or any relative of such person living in the same household as the operator;

(b) Who has access to nonpublic confidential information held by the operator; or

(c) Who is an agent or proxy for another person.

(3) An operator must obtain personally identifiable information from any person who places any single wager for $10,000 or greater on a sports event while physically present at the facility.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006547

(4) An operator must promptly notify the division of any of the following:

(a) A criminal or disciplinary proceeding commenced against the operator or any of its employees in connection with the operations of a sports pool or online sports pool.

(b) Abnormal betting activity or patterns that may indicate a concern about the integrity of a sports event.

(c) Conduct that has the potential to corrupt a betting outcome of a sports event for purposes of financial gain, including, but not limited to, match fixing.

(d) Suspicious or illegal wagering activities, including, but not limited to, the use of funds derived from illegal activity, wagers to conceal or launder funds derived from illegal activity, agents to place wagers, or false identification.

547.008 Unclaimed winnings.—If a person does not claim a winning wager within 1 year after the wager is graded, the obligation of the operator to pay the winnings expires and the funds shall be distributed as follows:

(1) For wagers placed in a sports pool or an online sports pool operated by a licensee, the licensee shall retain 50 percent and remit the remaining 50 percent to the General Revenue Fund.

(2) For wagers placed in an online sports pool operated on behalf of a licensee by a permittee, the licensee and the permittee shall retain a total of 50 percent, apportioned between them pursuant to the terms of the operating agreement, and the remaining 50 percent to the General Revenue Fund.

547.009 Tax rates.—

Commented [PJ16]: amendment 5 issues.

The tax rates here are the same as NJ. The requirements relating to payments I lifted from slot machines.

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

(1) The tax rate on the sums received by a licensee from a sports pool, less only the total of all sums actually paid out as winnings to patrons, is 8.5 percent.

(2) The tax rate on the sums received by a licensee or permittee from an online sports pool, less only the total of all sums actually paid out as winnings to patrons of an online sports pool, is 13 percent.

(3) Payment for the tax on sports wagering revenues imposed by this section shall be paid to the division. The division shall deposit these sums with the Chief Financial Officer, to the credit of the General Revenue Fund. The licensee or permittee shall remit to the division payment for the tax on sports wagering revenues. Such payments shall be remitted by 3 p.m. on the 5th day of each calendar month for taxes imposed and collected for the preceding calendar month. If the 5th day of the calendar month falls on a weekend, payments shall be remitted by 3 p.m. the first Monday following the weekend. The licensee or permittee shall file a report under oath by the 5th day of each calendar month for all taxes remitted during the preceding calendar month. Such payments shall be accompanied by a report under oath showing all sports wagering activities for the preceding calendar month and such other information as may be prescribed by the division.

(4) A licensee or permittee who fails to make tax payments as required under this section is subject to an administrative penalty of up to $10,000 for each day the tax payment is not remitted. All administrative penalties imposed and collected shall be deposited into the Pari-mutuel Wagering Trust Fund of the Department of Business and Professional Regulation. If any

Commented [AM17]: Tax rates too high. Same as sales tax.

Commented [PJ18]: NJ has taxes placed in the state revenue fund. The slot machine taxes under Florida law go to the Educational Enhancement Trust Fund/Pari-mutuel Wagering Trust Fund.

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

AMERICAN OVERSIGHT

FL-SEN-20-0201-B, 20-0202-A-006549

licensee or permittee fails to pay penalties imposed by order of the division under this subsection, the division may suspend, revoke, or refuse to renew the license of permit of the licensee or permittee.

Section 2. This act shall take effect October 1, 2020.

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

SUBJECT: **Proposed Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards**

One year ago today, Governor DeSantis issued Executive Order 19-32 to eliminate Common Core, develop a roadmap to have the #1 standards in the nation, increase curricular quality, streamline testing, raise the bar for civic literacy and become the most literate state in the nation.

On January 24, 2020, Governor DeSantis announced that he approved the roadmap to adopt the B.E.S.T. Standards in English language arts (ELA) and mathematics for grades K-12, which are posted along with summary documents at www.fldoe.org/standardsreview. The State Board of Education will take action to adopt the proposed standards on February 12, 2020, at their meeting in Tallahassee.

Over the past year, the department collaborated with colleagues and the public across Florida to develop these standards. Florida teacher experts participated in 154 virtual and 11 face-to-face meetings. National content experts and more than 80 Florida-based education stakeholder groups provided input. Nine Florida Standards Listening Tour stops were held around the state last October to collect public comments, and over 100,000 reviews were made online by the public on drafts of new standards.

Through these immense and important efforts, you will find that the B.E.S.T. Standards:

- Were created by Florida experts and eliminate Common Core;
- Are content-rich and developmentally appropriate;
- Go back-to-basics, building a foundation in the early grades;
- Are understandable, concise and set clear expectations for students, teachers and parents;
- Imbed Civics throughout K-12 and include the only Civics reading list for ELA in the nation;
- Include the only comprehensive K-12 reading list in the nation;
- Offer flexibility for teachers with a focus on great content; and
- Include clear expectations for progression year-to-year through great course alignment.

Once adopted, teacher professional development will begin, a new instructional materials adoption process will be conducted and new test development activities will commence. By 2022-2023, all new standards will be taught, classroom materials will be aligned and new statewide assessments will measure a baseline of their impact.

We appreciate all of the contributions of school district staff and teachers to bring you the B.E.S.T. Standards, and we look forward to working with you on successful implementation.

Subject: Sunburn — The morning read of what's hot ☀☀ in Florida politics — 1.29.20 — Burnin' today: Bloomberg, Biden, DeSantis, Cate, Fried, Scott

AMERICAN OVERSIGHT

New Florida shock poll puts Mike Bloomberg at No. 2 behind Joe Biden in Dem. primary— A St. Pete Polls survey conducted Sunday and Monday among 2,590 Democratic voters showed **Biden** with a commanding 41% lead and **Bloomberg** — not **Elizabeth Warren** or **Bernie Sanders** — lands in second with 17% support.

Michael Bloomberg is now second behind Joe Biden in a surprising new poll of Florida Democrats.

The results show a sharp contrast to another national **Quinnipiac University poll** showing Bloomberg in fourth place with 8% support.

Though the results only represent Florida voters, they are still significant. Not only is Florida a major swing state and a big pick up in the primary, St. Pete Polls was the first to predict Trump winning Florida in 2015 and to predict Gov. **Ron DeSantis** beating former Agriculture Commissioner **Adam Putnam** in 2018.

The poll suggests Bloomberg's surge in attention to Florida in recent weeks might be paying off.

The St. Pete Polls survey put Sanders in third place with 9%, followed by Warren with 7%. Former South Bend Indiana Mayor **Pete Buttigieg** trailed with 6%, followed by Sen. **Amy Klobuchar** with 5%. **Andrew Yang** and **Tom Steyer** bottomed out the survey with 2% support. Undecided voters accounted for 10% of the survey.

Biden performed best among black voters, with 57% saying they would vote for him. He performed the worst among white, non-Hispanic voters with only 33% support.

Bloomberg performed the best among Hispanic voters with 21% support and worst among black voters with just 13%.

A new "He Said, She Said" ... Horse show adventures! — Michelle and I begin the latest episode by recapping **Ella**'s first show with her horse, Biscuit. It was the final wish of Michelle's father **Benjamin Todd,** to purchase his granddaughter a horse.

We talk #TheVillagesAfterDark, our hotel, and some misconceptions about "America's Friendliest Hometown."

Our first guest, **Jimmy Miller,** talks about the tragic death of basketball legend **Kobe Bryant**, his legacy, and factors that may have handicapped Bryant's career.

Next, Democratic communications pro **Kevin Cate** joins the podcast from the campaign trail in California, to give us a preview of the Iowa Caucus. Cate serves as **Tom Steyer**'s campaign consultant.

When asked, "What is on the minds of the Democratic Party one week out from the Iowa Caucus?" Cate says impeachment is not No. 1. Pocketbook issues like health care are top of mind, as well as defeating **Donald Trump**.

Cate reflects about life in the campaign trail, making TV ads, and why he is confident Steyer is the right man for the job.

As for the best Democrat in the race, we give hot takes on Iowa, and who is Michelle's favorite in the Florida Democratic primary. Spoiler alert: It's not Sanders.

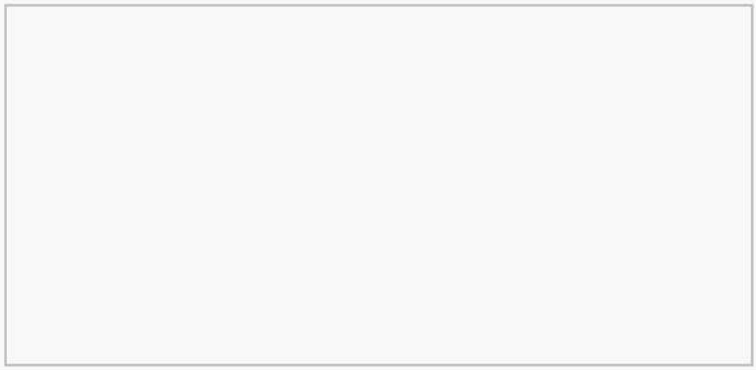
Please, listen and subscribe to He Said, She Said at **Apple Podcasts**, **Google Play** and **Stitcher**.

AMERICAN OVERSIGHT

Today's Sunrise

The Senate is taking up a controversial bill forcing minors to get permission from their parents to get an abortion. The House is also considering a bill that says your genetic information is off-limits to insurance companies.

Also, on Sunrise:



— Agriculture Commissioner **Nikki Fried** is fuming over a bill that would move the state energy office from her agency to one controlled by the Governor. Fried calls it a partisan power grab

— In the aftermath of Hurricane Michael, Chief Financial Officer **Jimmy Patronis** says it's time to change the culture in Tallahassee and put consumers over the insurance industry.

— A House subcommittee approves two new gun bills: One making it easier to bring concealed weapons to church; the other allows local elected officials to be armed during official meetings (where guns are prohibited for everyone else).

— Our daily tribute to Florida Man (and Woman): A guy who stole to pay for his ankle monitor and a woman who used her minivan to drive her teenage son to a robbery.

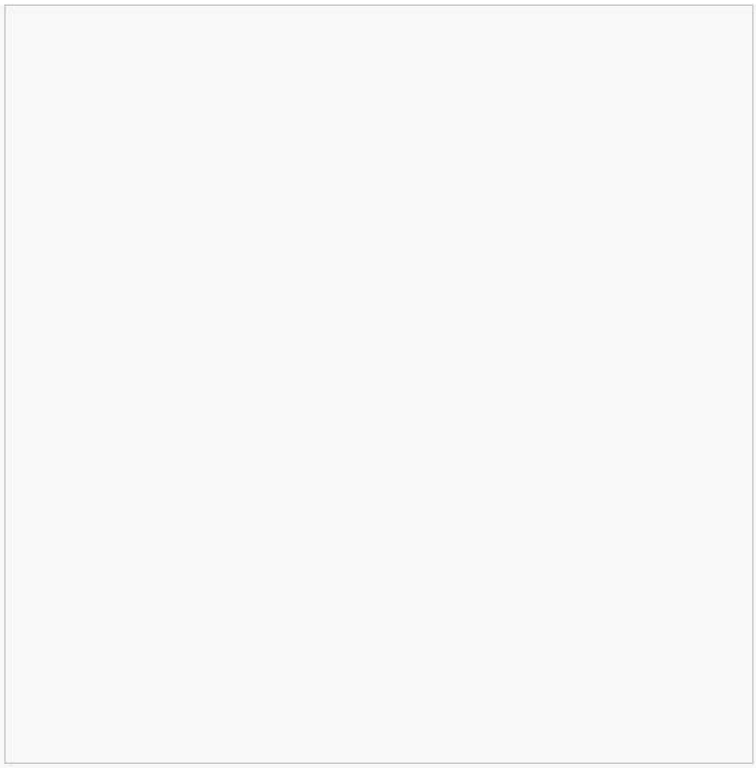
To listen, **click on the image below**:

Situational awareness

—**@RealDonaldTrump**: Really pathetic how @FoxNews is trying to be so politically correct by loading the airwaves with Democrats like **Chris Van Hollen**, the no-name Senator from Maryland. He has been on forever playing up the Impeachment Hoax. Dems wouldn't even give Fox their low ratings debates. ... So, what the hell has happened to @FoxNews. Only I know! **Chris Wallace** and others should be on Fake News CNN or MSDNC. How's **Shep Smith** doing? Watch, this will be the beginning of the end for Fox, just like the other two which are dying in the ratings. Social Media is great!

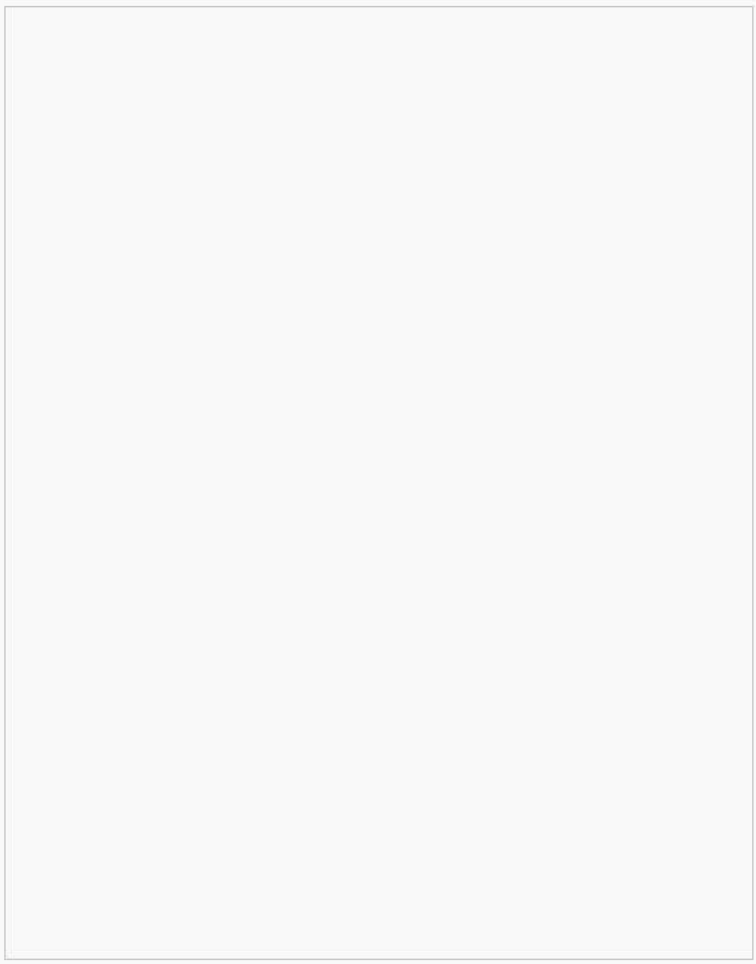
—**@DavidJollyFL**: GOP Senators are beginning to act as though they are genuinely concerned this could spin out of control for them, and for Trump.

—**@JustinAmash**: **Hunter Biden** is like a lot of unimpressive people in public life, including the Trumps — trading on his name for power. But if Trump believed an illegality occurred, then why didn't the administration open a proper DOJ investigation instead of pushing Ukraine for an announcement?



—**@JohnAnzo**: So let me get my head around this.**Rick Scott**, who as a health care executive, was fined a billion dollars for Medicare Fraud — the largest fine in history — is the attack dog on corruption? Priceless.

—**@DWStweets**: We can't get 75% of Americans to agree on much of anything, but 3 out of 4 voters agree: the Senate trial needs witnesses. Nobody will get a fair trial unless the jury hears from witnesses firsthand.



—**@nikkifried**: "We know that for a decade Republicans have had no problem with the office being where it is, as long as it was run by a Republican. But now that a Democrat sits in this office, the first woman ever elected to this office, it suddenly needs to be moved."

AMERICAN OVERSIGHT

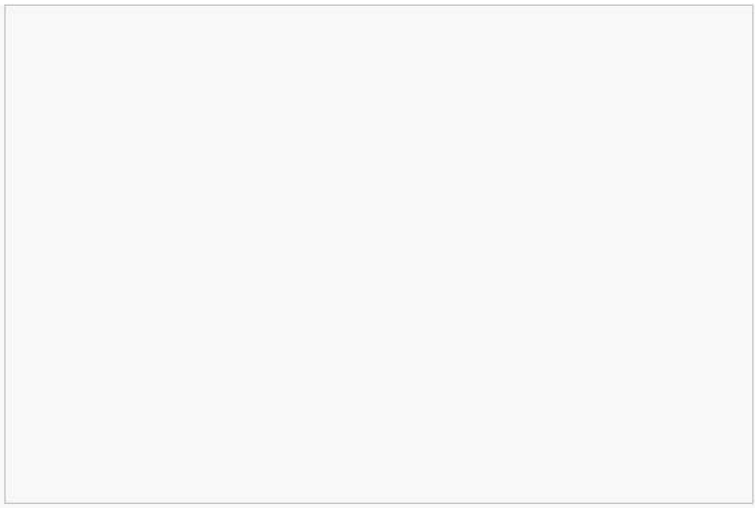
Top story

"**The starting gun for 2024': Rick Scott drops Iowa bomb on Biden**" via Mark Caputo of POLITICO Florida — Scott inserted himself into the Democratic presidential primary by launching an Iowa ad campaign trashing both the impeachment of Trump and former Vice President Biden ahead of the state's caucuses. But the ad campaign really wasn't just about the 2020 presidential race or the caucuses — it's the starting gun for 2024, when Scott has let it be known he's interested in running for the White House. "If you put $19,000 in Des Moines on TV, it's definitely Scott putting a toe in 2024," said **David "DJ" Johnson**, a GOP consultant. "And there's one thing we know about Scott: After he puts a toe in, then comes the foot. Then comes the whole leg."

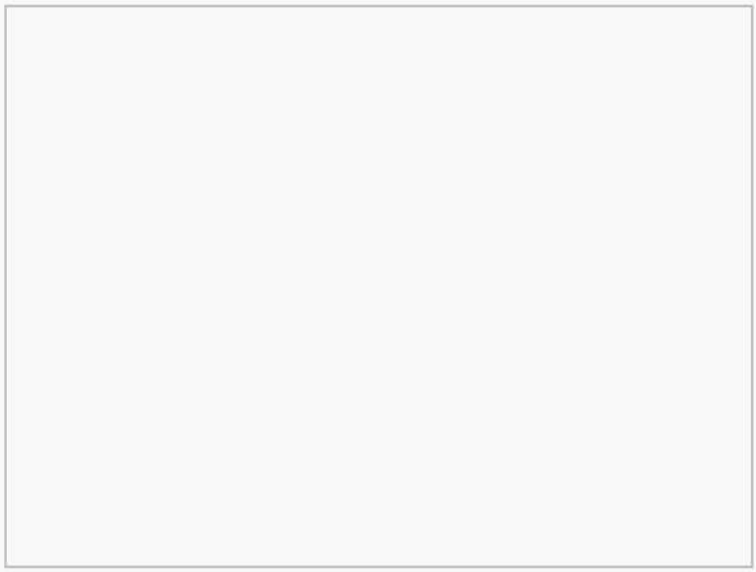
To watch the ad, **click on the image below**:



Dateline: Tally

Assignment editors — Gov. **Ron DeSantis** and Florida Department of Law Enforcement Commissioner **Rick Swearingen** will make a major announcement, 8:20 a.m. at Walt Disney World Swan and Dolphin Resort, Dolphin Meeting Space — American Seminar Room, 1500 Epcot Resorts Boulevard, Lake Buena Vista.

"**Nikki Fried to Ron DeSantis: Lay off Energy office**" via Samantha Gross of the Tampa Bay Times — She was reacting to an effort to move the state's Office of Energy from under her purview to the Department of Environmental Protection. The effort, in the form of a proposed committee bill, passed out of the Agriculture & Natural Resources Appropriations Subcommittee by a 10-1 vote. Three of the four Democrats on the committee voted yes on the bill, but despite their votes, Fried maintained that the bill is "partisan punishment." "This bill puts party before state, and puts the governor before Floridians," she said, noting that the Office of Energy went untouched while Republican Agriculture Commissioner **Adam Putnam** was in office. "Now that a Democrat sits in this office, it suddenly needs to be moved."



AMERICAN OVERSIGHT

Nikki Fried is blasting Ron DeSantis for attempting to move the Office of Energy away from her agency.

"**Bill Galvano pledges 'meaningful' pay raise for state workers**" via James Call of the Tallahassee Democrat — **Galvano** told the Tallahassee Democrat the Senate would include a "meaningful" pay increase for state workers when it begins budget negotiations with the House. "The Senate budget, scheduled to be released by the end of the week, will include a meaningful investment in across-the-board salary increases for our hardworking state employees," Galvano said. Last month, the Bradenton Republican would only commit to having his budget chairs look at the issue. While an impasse exists in negotiations for a new three-year contract between the state and, for instance, social workers, wildlife officers, clerical and other staff, neither House Speaker **José Oliva** nor DeSantis has backed a pay raise for all state employees.

"**Florida Sheriffs sound alarm about 'Truth in Sentencing'**" via AG Gancarski of Florida Politics — With several bills in play that would reduce or mitigate current sentencing policy, Florida Sheriffs had their say defending mandatory minimum sentences. The Florida Sheriffs Association announced the launch of a Truth in Sentencing report and its likewise-new Florida Sheriffs Research Institute. With live proposals for everything from changing mandatory minimums on drug policy to early release for old and infirm inmates, and a crisis in the prison system guiding the reform push, the Sheriffs' message is that what they are doing works despite these systemic stressors. FSA President and Pinellas County Sheriff **Bob Gualtieri** lauded the research institute, saying it "makes certain the full impact of our current laws is properly assessed."

Florida sheriffs gather to formally release their Truth in Sentencing report, the first product of the newly launched Florida Sheriffs Research Institute. Image via Florida Sheriffs/Facebook.

Students visit The Capitol to fight for higher-education vouchers— A handful of students appeared at the House Appropriations Subcommittee on Higher Education to fight for EASE, a voucher program for full-time Florida students who attend SACS-accredited, independent, nonprofit universities and colleges. During the committee's budget exercise, there was a discussion on severe cuts to these student grants. The budget released in committee this week keeps funding at the current year's levels. Students expressed sincere thanks to the lawmakers for supporting EASE. "I'm 26 years old. I have two young daughters, and I am a full-time student. Your support for EASE is really important to all of us," said **Ashley Hawks**, a Keiser University student. " It's allowed me to provide a better life for my kids."

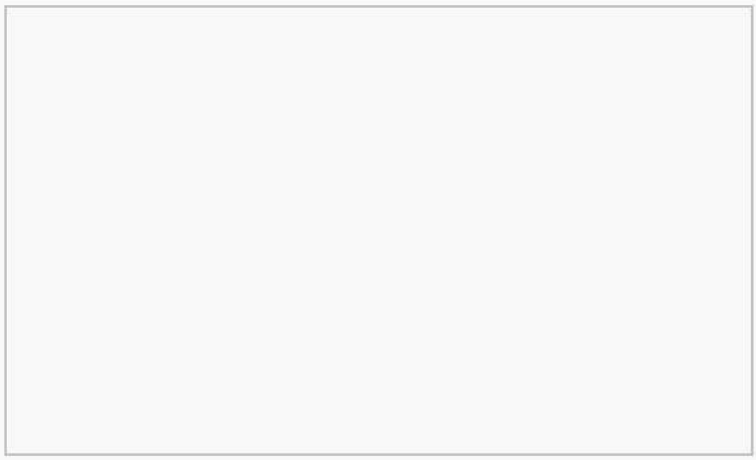
"**Industry calls on lawmakers to reform lawsuit abuse**" via Amy O'Connor of the Insurance Journal — At the top of the list for advocates are reforms to curb what they say are abuses of the state's legal system that

AMERICAN OVERSIGHT

are hurting insurers' bottom line. **Paul Handerhan**, president of the Federal Association for Insurance Reform (FAIR), said two bills had been introduced, both sponsored by Sen. **Jeff Brandes**, that would target first-party litigation abuses. Senate Bill 914 would provide that for certain attorney fees awarded for claims arising under property insurance policies, the maximum fee a court may award is a lodestar fee and prohibit the court from considering contingency risk or using a contingency risk multiplier. SB 1634 would revise requirements for the civil remedy notice provided to insurers and the Department of Financial Services.

"**Communications tax cut would help more low-income Floridians get connected**" via Florida Politics — Currently, cities and counties can set their own communications services tax rate. This has led to more than 400 different jurisdictions, each with their own tax rate. While those rates can vary wildly, they are rarely inexpensive. In most cases, the communications services tax costs customers two-and-a-half times as much as sales tax. The high rates disproportionally impact low-income Floridians, many of whom are hit multiple times a month, as the charge shows up on bills for cellphones, broadband internet and cable television. Bills from Sen. Travis Hutson (SB 1174) and Rep. **Jason Fischer** (HB 701) aim to bring some stability — and relief — to Floridians by replacing the current patchwork structure and setting a statewide cap on the tax.

"**Appeals court weighs Florida law on felon voting rights**" via Bobby Caina Calvan and Kate Brumback of The Associated Press — Lawyers for the state of Florida are asking a federal appeals court to set aside a ruling that allowed some felons to regain access to the ballot box despite owing fines and other legal debts. Florida Republicans, led by DeSantis, argue that only felons who have completed all conditions of their sentences should be allowed to vote. He and GOP lawmakers say that to regain the right to vote, former felons must not only serve their time but also pay all fines and other legal financial obligations. The case before the Atlanta-based 11th U.S. Circuit Court of Appeals could be consequential because of the razor-thin margins that sometimes decide election contests in Florida — a perennial battleground state.



Assignment editors — LeadingAge and Greenberg Traurig will hold a reception to honor the Florida Legislature, 5:30 p.m., The DoubleTree by Hilton, 101 South Adams Street, Oasis Pool Deck — 4th Floor, Tallahassee.

Assignment editors — The Florida Assisted Living Association will hold its annual cocktail reception for legislators, 5:30 p.m., TCC Capitol Center, 300 West Pensacola Street, Tallahassee.

Assignment editors — Catholic Bishops of Florida host the 45th Annual Red Mass, 6 p.m., Co-Cathedral of St. Thomas More, 900 W. Tennessee Street, Tallahassee.

Legislation

Legislation aligns with Governor's water spending plans, for now— The House Agriculture and Natural Resources Appropriations Subcommittee's plan for water quality and Everglades spending closely mirrors Gov. **Ron DeSantis**' budget request. However, committee Chair **Holly Raschein** says the lawmakers aren't keen on funding the Governor's priority with recurring dollars, Bruce Ritchie of POLITICO Florida reports. "We have a policy that we stick pretty wholeheartedly to of not tying the hands of future Legislatures," Raschein said. DeSantis outlined his request for $625 million in water funding last year and said he hoped lawmakers would include recurring funds in the budget so his office wouldn't have to fight for the money every year. The House plan comes in at $646.8 million and includes $29.2 million in local water projects that DeSantis didn't include in his budget.

The Florida Legislature aligns with Ron DeSantis' water requests, for the time being.

House health care plan measures in at $38.8 billion— The House Health Care Appropriations Subcommittee has put forward a $38.8 billion health care spending plan for the 2020-21 fiscal year, **Alexandra Glorioso** of POLITICO Florida reports. The proposal is $60.5 million more than DeSantis requested in his budget. Included in the House plan is a provision that would cut Medicaid retroactive

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006566

eligibility permanent. Chair **MaryLynn Magar** said the cut, which will free up $104 million, is needed to pay for other priorities such as a bump in nursing home reimbursements.

"**House, Senate seek to curb prison guard turnover**" via Ana Ceballos of the News Service of Florida — The pilot program would move one-third of Florida's prisons from 12-hour shifts to 8.5-hour workdays to address worker fatigue, Corrections Secretary **Mark Inch** has told lawmakers. Making the change would require the state to hire 292 full-time officers, which would cost taxpayers $29 million, according to a budget request from the Department of Corrections. The Senate proposal would fully fund the program, while the House's budget proposal would provide $13.6 million for the change. That would allow hiring 174 employees and moving one-fifth of prisons to the 8.5-hour shifts, according to the House proposal.

House plan would boost nursing home money" via the News Service of Florida — Introduced by House Health Care Appropriations Chairwoman Magar, the proposed budget would keep Medicaid funding for hospitals at current-year spending levels. The proposal for the 2020-2021 fiscal year would pump an additional $44.8 million to increase rates the state pays nursing homes to care for Medicaid patients. "The nursing center funding increase in the House budget is critical for our members as the cost of delivering high-quality care continues to rise," Florida Health Care Association spokeswoman **Kristen Knapp** said in a prepared statement.

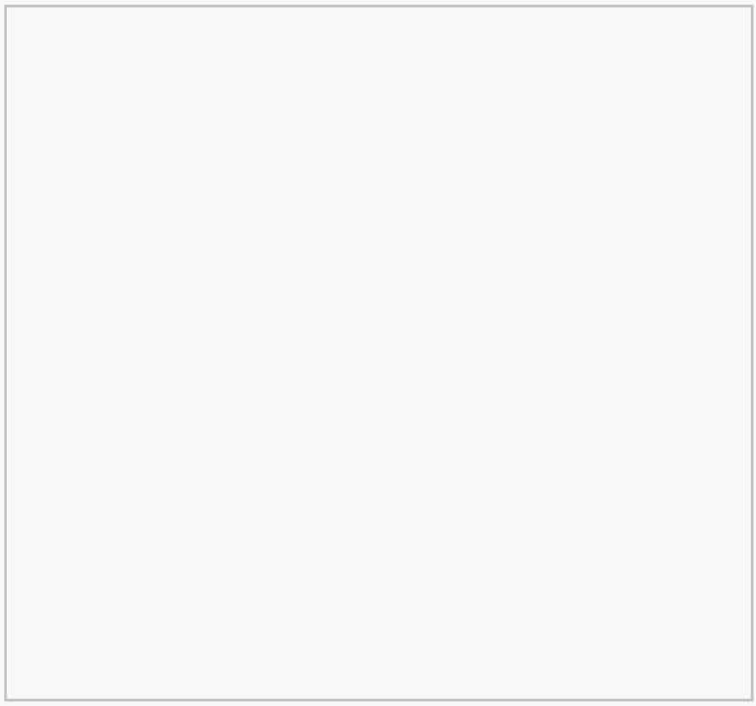
"**Senate bill to compensate wrongfully convicted man clears Judiciary Committee**" via Sarah Mueller of Florida Politics — Jacksonville resident **Clifford Williams** was exonerated in March 2019 after spending 43 years in prison for a crime he didn't commit. He's not eligible for compensation under current law despite the decades behind bars because of two prior felony convictions. A bill sponsored by Senate Minority Leader **Audrey Gibson** (SB 28) would give Williams about $2.15 million in restitution for the time he served in prison. Williams and his nephew **Hubert Nathan Myers** were arrested in 1976 for the murder of **Jeanette Williams**, no relation, and the attempted murder of her domestic partner. Williams was initially sentenced to death, but his sentence was commuted to life in prison after four years on death row.

"**Senate panel OK's Lauren Book ban on declawing cats**" via Ryan Nicol of Florida Politics — The Senate Agriculture Committee approved a measure from Sen. **Lauren Book** (SB 48) that would ban declawing cats with a 4-1 vote Tuesday. The approval comes after the bill was temporarily postponed in mid-January. Republican Sen. **George Gainer**, the committee's Vice Chair, was the sole no vote. Book and others who spoke in support argue the procedure causes problems for the cats' long-term health. "It's a common misconception that declawing causes no harm, and that's it's as simple as cutting off a cat's fingernails," Book said. "It would be like if we took our own hands and cut off the first joint in our fingers."

"**Senate advances Ben Albritton's bill to revitalize broadband expansion**" via Renzo Downey of Florida Politics — The bill (SB 1166) would create the Florida Office of Broadband within the Department of Economic Opportunity (DEO) and make it the lead agency on high-speed internet installation. Broadband coverage blankets many urban areas, providing homeowners and businesses with high-speed internet. "In other parts of the state, especially in rural areas, the ability for somebody to access high quality, or quite frankly sometimes low-quality broadband, is not available," the Wauchula Republican said. The Senate Commerce and Tourism Committee gave full approval to the proposal and an amendment defining "underserved" as 10 megabits per second download speeds and at least one megabit per second upload speeds.

"**Senate panel OKs bill to create scholarship fund for students at Florida's HBCUs**" via Byron Dobson of the Tallahassee Democrat — The Senate Education Committee unanimously cleared the bill (SB 876), sponsored by Democratic Leader **Audrey Gibson**, which would establish the Historically Black Colleges and Universities Matching Endowment Scholarship Program. Her bill is identical to one (HB 383) introduced by Rep. **Delores Hogan Johnson**, which was OK'd by the House Higher Education and Career Readiness Subcommittee. Both bills must clear two more committees in their respective chambers before they can go to the floors for final votes. Under the proposed legislation, the Legislature would appropriate $2 million to be deposited into the Student Financial Assistance Trust Fund, administered by the Florida Department of Education.

Bill Montford hemp program bill gets TP'd — The Senate Agriculture Committee temporarily postponed Montford's measure, which would have altered the state hemp program set up during the 2019 Session. That program was established under the Department of Agriculture to authorize the cultivation of hemp. Montford's legislation would have made clear that hemp extract sold in violation of the law's existing requirements "shall be considered adulterated or misbranded." The term "hemp extract" would also not include seeds "recognized as safe by the United States Food and Drug Administration." And the bill bars the sale of products made from hemp extract to those under 18 years of age. The measure was on the committee's schedule for Tuesday afternoon, but that meeting ended without lawmakers taking up the bill.



"**Lawmakers tackle heat strokes among student-athletes**" via Bobby Cania Calvan of The Associated Press — As it stands, high schools aren't required to have lifesaving devices and equipment available at the sidelines. That includes the absence of tubs that can be used to help quickly cool student-athletes showing signs of heat stress. Many coaches and other team personnel lack training on how to recognize "exertional heat stroke," or EHS, and how to administer emergency care. A bill endorsed unanimously by the Senate Education Committee would set standards for monitoring conditions that might put students at higher risk. At

AMERICAN OVERSIGHT

a minimum, it would require schools to have containers large enough to accommodate students' bodies — tubs or even inflatable kiddie pools — filled with cold water that can be used to cool down an overheating student rapidly.

"**House eyes environmental money, chops VISIT FLORIDA**" via Jim Turner of the News Service of Florida — DeSantis would get more than the $625 million he requested for environmental projects, Florida Forever would see a funding cut and VISIT FLORIDA would be shuttered, under parts of a House budget proposal. The House is proposing $4.1 billion in the agriculture and natural resources part of the budget, up 3.7% from the current fiscal year, which ends June 30. The proposal includes $646.8 million for DeSantis' requested environmental projects. The House proposal includes $318.3 million for Everglades restoration, nearly $4 million less than what DeSantis requested. The House also wants $122 million for wastewater and stormwater grants, which includes efforts to get property owners off septic tanks, $28 million below the governor's proposal.

"**Craft distilleries bill advances in House**" via Jacob Ogles of Florida Politics — A change in law letting distilleries to bottle drinks in more sizes cleared its first hurdle in the Florida House. Rep. **Holly Raschein**, a Key West Republican, stressed the legislation aims to free more Florida-based distilleries up to take advantage of market needs. The bill (HB 1165) does this by repealing statutes related to wine and cider container size limitations, and by specifying restaurant patrons may take home a partially consumed bottle of wine with the purchase of a meal. The legislation passed in the House Business and Professions Subcommittee, where it was one of the multiple pieces of legislation aimed at lifting restrictions on alcohol businesses.

Cheers: Holly Raschein's craft brewery bill advances.

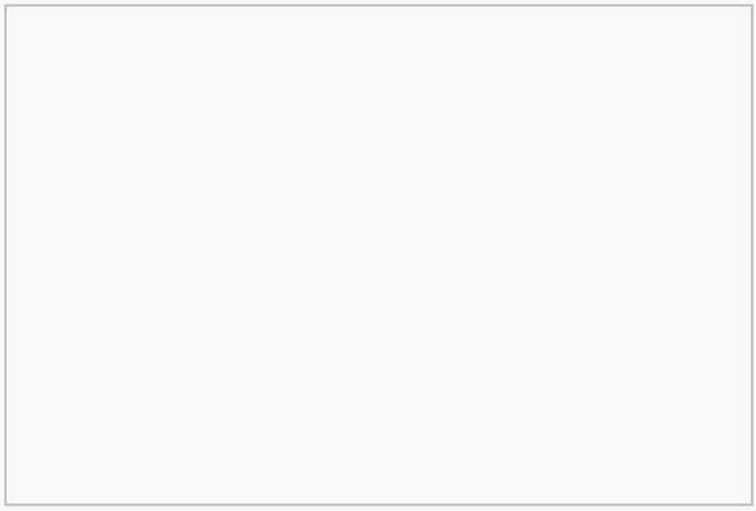
"**Occupational license deregulation bill continues to move in House**" via AG Gancarski of Florida Politics — HB 1193, from Rep. **Blaise Ingoglia**, is billed as the Occupational Freedom and Opportunity Act. The legislation attempts to push through reforms long sought by free marketeers, including DeSantis. "This is almost the exact same bill you heard last Session," Ingoglia said of the deregulation package. Mold remediation is out of the bill, and barbers now are required 400 hours of training, which is a condition the sponsor said would not compromise student aid. The bill allows for reciprocal licensing from different states. A wide swath of professions, ranging from cosmetology to interior design, would be affected in the legislation. Auctioneers, barbers, and geologists would have fewer education requirements, with nutritionists and boxing announcers seeing some licensing requirements eliminated completely.

"**Fire chiefs seeking help in drone bills**" via Scott Powers of Florida Politics — The House Agriculture and Natural Resources Appropriations Subcommittee swiftly approved HB 659, which would allow the use of drones by wildlife and forestry officials to monitor invasive species encroachment on public lands and to help manage and fight wildfires. The second provision is identical to one added to the Senate counterpart of the bill in a committee hearing. At both stops, the Florida Fire Chiefs' Association spoke up with an "us too" request, citing the same rationales for drones' use in structure fires that had been cited for the wildfires amendment: that the aerial camera devices could help firefighters understand what is going on with the fires, and that the drones could help improve safety for firefighters at the scene.

"**Second House panel approves specialty license plate bill**" via Ryan Nicol of Florida Politics — The House Transportation and Tourism Appropriations Subcommittee unanimously approved a measure that would create specialty tags for a trio of out-of-state universities. The House Transportation and

AMERICAN OVERSIGHT

Infrastructure Subcommittee already signed off on the bill, leaving just one more stop until it clears the committee process. Sponsoring the legislation (HB 1135) is Rep. **James Grant**, an Auburn University alumnus. In addition to Auburn, specialty license plates would be approved for two other out-of-state schools — the University of Alabama and the University of Georgia.



"**Church, local official gun bills backed**" via Jim Saunders of the News Service of Florida — A House panel approved a measure that would allow people to carry concealed weapons at religious institutions that share properties with schools. The House Criminal Justice Subcommittee also approved a separate bill that would allow county commissioners, school board members, and elected city officials to be armed at their public meetings. State law generally allows people to carry concealed weapons at religious institutions, but it bars being armed on school properties. That has effectively meant that people cannot carry guns to churches or synagogues that meet at places with schools. The measure (HB 1437) would allow religious institutions to authorize people with concealed-weapons licenses to carry guns at such locations.

"**College athlete compensation a hit in House**" via Jim Turner of the News Service of Florida — With few questions and little comment, the House Workforce Development & Tourism Subcommittee approved a bill (PCB WTS 20-01) that would establish a "bill of rights" as college athletes would be able to earn compensation for their "name, image, likeness or persona." The proposal, being watched by the National Collegiate Athletic Association, maintains that pay for on-field performance would remain prohibited. State colleges and universities have not taken a public stand on the House proposal.

Pigman seeks to modernize health care

State Rep. **Cary Pigman** joined nearly 200 Certified Registered Nurse Anesthetists (CRNA) at a news conference at The Capitol to emphasize the role of Advanced Practice Registered Nurses (APRN) within the state's health care system — increasing access to health care, lowering costs and maintaining the quality of care.

The Okeechobee Republican recently filed **HB 607**, which seeks to allow APRNs, CRNAs and nurse practitioners to practice to the full extent of their training without physician supervision and protocols.

Rep. Cary Pigman touts his bill to give nurses more independence to provide health care.

HB 607 has the support of House Speaker **José Oliva,** who has made this issue a priority, as the country faces a rising population of seniors and a shortage of up to 55,000 physicians nationwide.

"I have called out the health care industrial complex because I believe it can do better for patients — consumers of health care services," Oliva said. "I made clear my support for independent practice for APRNs because it will improve access and affordability for patients. With the endless sea of white coats flooding the Capitol and the support from statewide businesses and organizations, I am assured that the House is on the right path by prioritizing HB 607."

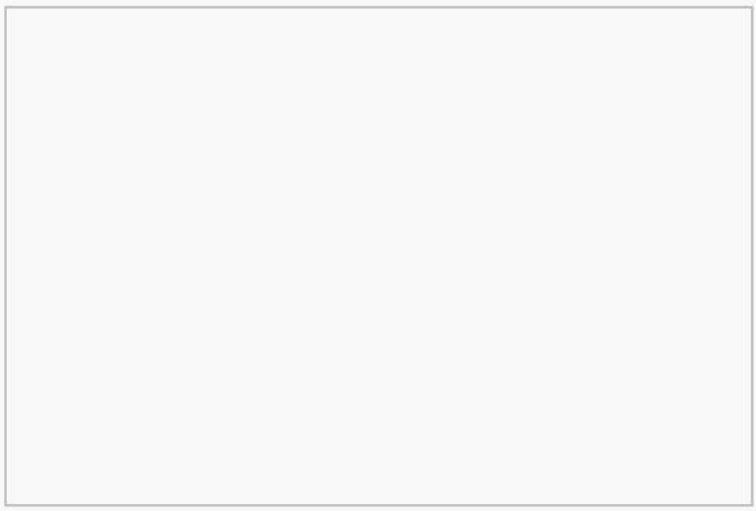
Cuban black bean soup (rice and onions-side); mixed garden salad with dressings; Cuban avocado salad; tropical fruit salad; deli board with lettuce, tomatoes, cheeses and breads; picadillo; cumin lime chicken; Cuban fried pork chops; yucca with mojo; island zucchini; cilantro lime rice; tres leches cake for dessert.

AMERICAN OVERSIGHT

Statewide



"Fifth Third Bank to halt donations to school voucher program over LGBTQ discrimination" via Scott Powers of Florida Politics — Reps. **Carlos Guillermo Smith** and **Anna Eskamani**, Orlando Democrats on the front lines of fighting for LGBTQ rights and against discrimination, announced the Cincinnati-based bank announced on Twitter they will no longer be donating to Florida's Step Up for Students scholarship programs until "more inclusive policies have been adopted by all participating schools to protect the sexual orientation of all our students."

Shaw's prolific year

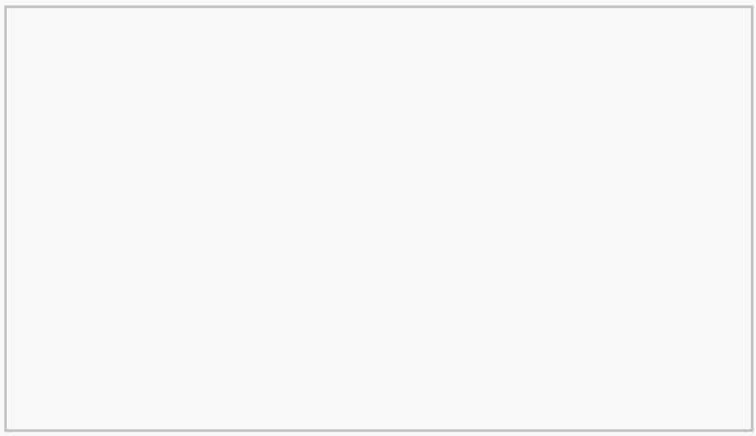
Former state Rep. **Sean Shaw** has had an extremely productive year. Despite losing the Attorney General's race — even though he received over 3.7 million votes, more than any other Democratic AG candidate in history — Shaw is continuing his public service for Floridians. He has stayed involved in both state and national politics as well as turning his focus on several progressive issues as founder of "People Over Profits," an organization with the mission of putting "working people first."

Recently, I had an opportunity to speak with Shaw, catching up on what has been, for him, a very prolific year.

"Since the campaign, I've made it a priority to spend more time on the water. I bought a saltwater boat and try to take it out as much as I can. My first love will always be fishing and it's therapeutic for me. It's funny because I've realized that politics was both my work and a hobby — and I needed some life balance. I think they call it self-care now."

Sean Shaw is having a very busy year.

Shaw is currently working with Vanguard Attorneys, a personal injury firm based in Ybor City. His Vanguard office was the old call time room from Shaw's AG race.



He's also been remarkably busy with projects across the state: The new firm, People Over Profits, and hosting a weekly radio show (Vanguards of Democracy).

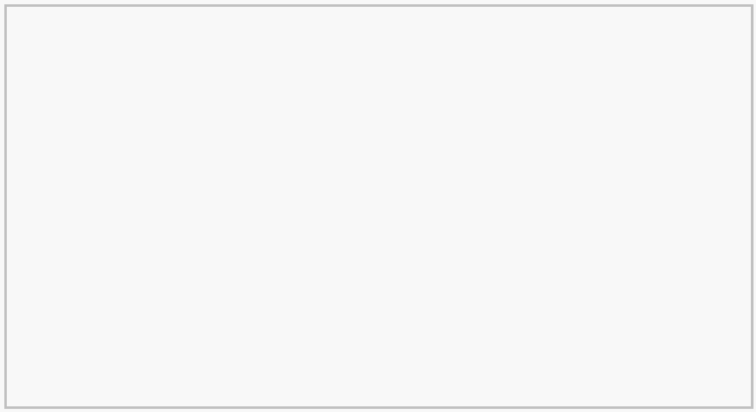
Shaw was also an early supporter of Mayor Buttigieg: "I knew he was different. I've come to understand he is the kind of leader this country needs. I reached out to endorse him because I believe he has the right ideas to address important issues like criminal justice reform through his Douglass Plan, affordable health care, and the student loan crisis."

AMERICAN OVERSIGHT

Mother Nature

"**Harmful algal blooms pose serious long-term health risks for Floridians**" via Walter Bradley and Howard Simon of the South Florida Sun-Sentinel — The causes of HABs are no mystery: expanding residential and commercial development and agribusiness — particularly cattle, poultry and the dairy industry — contribute to the increasing flow of nitrogen and phosphorus that spawn HABs in Lake Okeechobee and on the east and west coasts. And as our state's population continues to swell there are increased burdens on water treatment plants and septic systems. Media reports of fouled beaches, fish kills, and the stench of HABs are not good for tourism — about 10% of Florida's economy. But even more concerning, our health is at risk. DeSantis' Blue-Green Algae Task Force made several sensible recommendations, though some of the Task Force's proposals could have gone further.

Algal blooms are posing significant long-term risks to human health.



"**Powerful Caribbean earthquake shakes buildings in Jamaica, Cuba — even downtown Miami**" via Jacqueline Charles, Bianca Padró Ocasio and Joey Flechas of the Miami Herald — At 2:10 p.m., a strong earthquake struck about 6 miles beneath the surface in the open water between Jamaica and Cuba with more force than the 2010 earthquake that devastated Haiti, a quake that occurred only 15 miles away from Port-au Prince. The quake struck along the border between the Caribbean and North American tectonic plates, a crack that stretches from Hispañola to Guatemala. Brief tsunami warnings were issued for multiple northern Caribbean islands. Several aftershocks occurred fewer than 50 miles from the Cayman Islands, whose residents felt the impact from at least four tremors through the afternoon. The most powerful of them registered a 6.1 magnitude about 35 miles southeast of Grand Cayman just before 5 p.m.

2020

AMERICAN OVERSIGHT

"**A primary from the right? Not in Donald Trump's GOP**" via Elaina Plott of The New York Times — Such is the nature of the Republican primary season in the Trump era: self-proclaimed outsiders marketing themselves as loyalists to a man who is now the ultimate insider. Challenges to incumbents from the right are nothing new. But whereas conservative primary candidates once fashioned their campaigns as referendums on reckless federal spending or the elitist sensibilities of leadership, their pitches are much simpler now, carte blanche offerings of complete and total fealty to the President. And with Trump's stranglehold on his party, their targets are much fewer, too.

"**Why Biden scaled back in New Hampshire**" via Mark Caputo and Trent Spiner of POLITICO — Biden's New Hampshire media buys, events and overall footprint indicate it's the early state that's getting relatively short shrift so he can more effectively contest the other three states with nominating contests before Super Tuesday. The former vice president's campaign stresses he's not writing off New Hampshire, that he has more major endorsements here than any other candidate, and visited Friday and Saturday. But in recent weeks, Biden has intensified his focus on the two states whose caucuses bookend the Granite State's Feb. 11 primary — Iowa and Nevada — according to those familiar with the campaign's strategy.

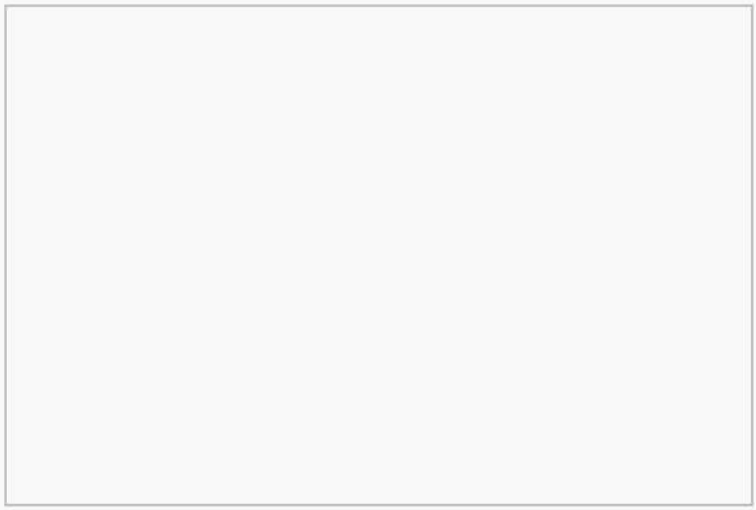
Joe Biden is scaling back some in New Hampshire.

"**Celebrity star-power fuels Bernie Sander's final Iowa sprint**" via Holly Otterbein of POLITICO — The luminaries cut across the culture, from politics to music to movies and more. Congresswoman **Alexandria Ocasio-Cortez**, filmmaker and liberal stalwart **Michael Moore**, actor **Kendrick Sampson**, and recording artists **Bon Iver** and Vampire Weekend are among those who have or will be stumping for him. The roster of celebrity surrogates is designed to bring out young and unlikely voters to events: A Friday rally featuring Ocasio-Cortez and Moore, which Sanders couldn't attend because he was in Washington for the impeachment trial, drew an estimated 800-plus people. Overall, nearly 6,000 attended events in Iowa held by Sanders, Ocasio-Cortez and Moore over the last few days, according to the campaign.

"**Elizabeth Warren announces endorsements from Florida educators**" via Scott Powers of Florida Politics — Warren has the endorsements of 63 teachers and educators around Florida, including **Johanna López**, an Orange County School Board Member. López had been a Colonial High School teacher in Orange County before being elected to the school board. Another endorsement is **Susan Smith**, President Emeritus of the Democratic Progressive Caucus of Florida and a former teacher. The announcement denotes activity by Warren's Florida campaign, one of the largest and busiest among Democrats in the Sunshine State, though she and other Democrats continue to personally largely ignore Florida while pursuing voters in Iowa, New Hampshire and other early primary and caucus states.

"**Pete Buttigieg campaign faces personnel issues as Iowa caucuses approach**" via Tarini Parti and Dustin Volz of The Wall Street Journal — **Nadia Singer**, the talent director for the campaign responsible for identifying potential new hires, parted ways with the former South Bend, Indiana, Mayor's team earlier this month. Singer, who previously worked at question-and-answer website Quora Inc. and Facebook Inc., was seen as part of a cadre of Silicon Valley hires by Buttigieg. Her contract employment ended abruptly after she relocated to South Bend from San Francisco. Two cybersecurity aides also left the campaign around the same time. The campaign described the staffers as midlevel. A spokesman for the campaign said Singer's contract ended because the campaign is fully staffed and not hiring during the primaries.

AMERICAN OVERSIGHT



Is good-enough enough for Biden?

As much as any campaign in recent history, notes **Mark Leibovitz in The New York Times Magazine**, Biden's candidacy has been "defined by the alternative."

The former vice president is not a socialist, and he's not Trump.

However, the longtime Senator and two-term VP is well known, "for better and worse."

Biden keeps hammering the point that he is best equipped to keep Trump to a one-term presidency — an "aberration" — and avoid a "downward transformation" if Trump wins reelection.

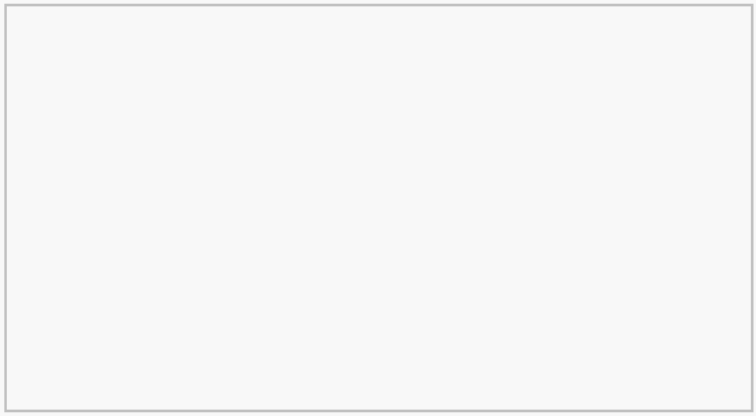
Joe Biden refuses to change his brand for the campaign.

"You know, I've been around a long time, that's the bad news," Biden told Leibovitz in one of his favored bad news/good news constructions. "But the good news is, I've also been around a long time. The bad news is that everybody knows me. The good news is everybody knows me."

There is one foundational element in Biden's candidacy: survival. Despite everything — including himself — he remains the front-runner in the race, weathering "any number of doomsday predictions and things that felt fateful in the moment."

That is the point Biden tries to make, he is still here, and will endure. Despite all the naysayers and "smart-as-hell people" who were wrong about the race.

"The Biden hierarchy comprises a fairly conventional mix of established Democratic operatives, White House veterans and Biden loyalists," Leibowitz writes. "They tend to be older, male and more than a bit swampy (consultants, the stray lobbyist, and people you've seen talking if you watch cable news)."



It was clear from the start that Biden would be attacked as the "rickety embodiment of a bygone Democratic establishment." But any attempt at a makeover to pacify the more progressive wing of the Party would fall flat. Biden's campaign knew that, rejected any ad hoc repackaging, and embraces who Biden is.

Nevertheless, any Democratic candidate will face merciless attacks: "He has already, and he is still here."

AMERICAN OVERSIGHT

Peachy

"New Quinnipiac poll: 75% of American voters want impeachment witnesses" via Scott Powers of Florida Politics — Broken down by party, even Republican respondents favored witnesses, with a plurality of 49% saying yes, and 42% saying no. Ninety-five percent of Democrats said yes. Seventy-five percent of independent voters said yes. At least 60% of every demographic group broken out in the poll — men or women; white, black or Hispanic voters; voters of each age bracket — said yes, there should be witnesses. The poll was released minutes after the White House defense team concluded its defense of Trump, sending the trial to the next step, question-and-answer sessions set for Wednesday and Thursday. The question of whether the Senate will call witnesses would not be taken up before Friday.

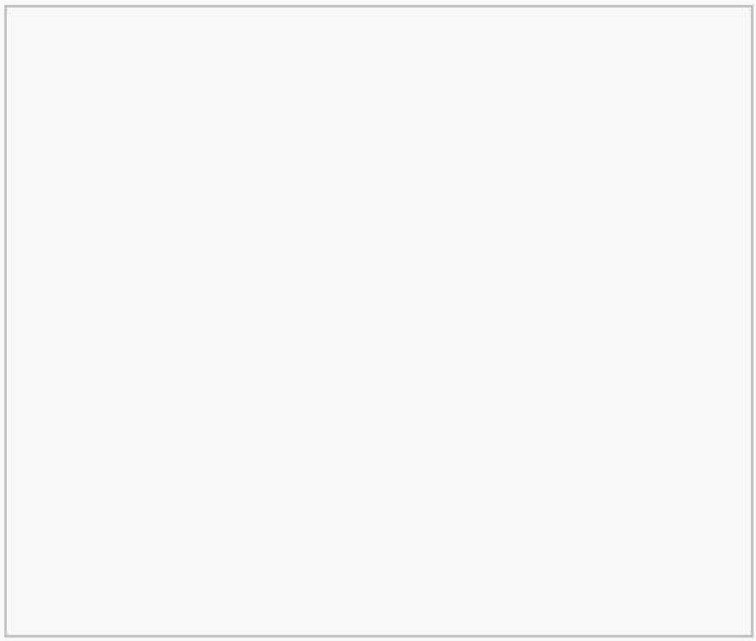
A large majority of Americans want witnesses in the Senate impeachment trial.

"Donald Trump and Lev Parnas discussed Scott in secret recording" via Steve Contorno of the Tampa Bay Times — The conversation was captured in an 83-minute video obtained by Reuters from **Parnas**' attorney **Joseph Bondy**. About halfway through the recording, Parnas mentioned he lived in Florida, prompting Trump to ask how Scott, then Florida's Governor, was faring in his U.S. Senate campaign. "Rick Scott's good," said Parnas, who was indicted in October on charges that he and his business partner, **Igor Fruman**, steered hundreds of thousands of dollars in illegal campaign contributions from foreign donors. Both are now key figures in Trump's impeachment proceedings. "Is he going to win?" Trump asks. Parnas responded: "It's going to be close, but I think we're going to pull it out."

"Marco Rubio and Rick Scott both use impeachment trial for political gain" via Alex Daugherty of the Miami Herald — As the President's defense team ended its opening arguments, **Rubio**'s campaign sent an email to supporters with the subject line "Take notes like Marco!" The email promises to send supporters who donate at least $35 a quill pen with the Senator's name on it. In contrast, Scott, who is also sending fundraising pitches related to the impeachment trial, has publicly defended the President and complained about arguments made by Democrats. He's even going on offense on Trump's behalf in Iowa, running a TV ad from Jan. 31 to Feb. 3 titled "Biden Got Away With It."

Former Donald Trump Chief of Staff John Kelly tells Sarasota crowd 'I believe John Bolton'" via Zac Anderson of the Sarasota Herald-Tribune — "If **John Bolton** says that in the book, I believe John Bolton," said retired Gen. **Kelly**, who served as Trump's chief of staff for 18 months. Kelly spoke at the Van Wezel Performing Arts Hall as part of the Ringling College Library Association Town Hall lecture series. The general worked with Bolton during his time as chief of staff, which ended in early 2019. Kelly said Bolton is an honest person. "Every single time I was with him ... he always gave the President the unvarnished truth," Kelly said of Bolton, who has become a figure of intense interest in the impeachment inquiry.

AMERICAN OVERSIGHT



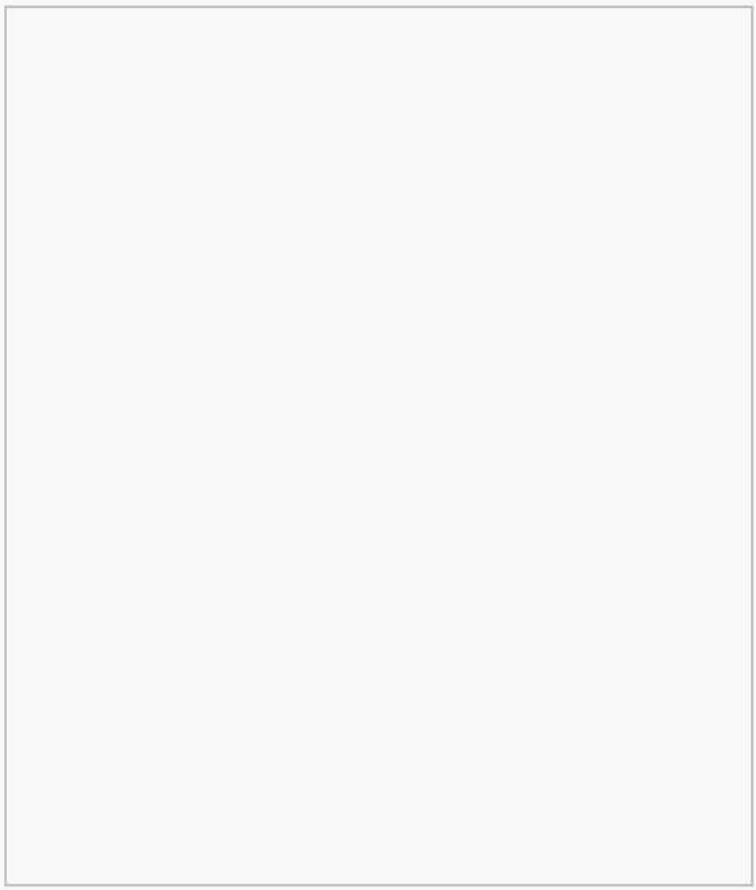
D.C. matters

"**Attorney Chris Kise to help Nicolás Maduro administration fight U.S. sanctions**" via Ryan Nicol of Florida Politics — **Kise**, the attorney who turned over key documents in the ethics case against former Tallahassee **Andrew Gillum**, is now representing a member of the Maduro government. Kise is listed on a Foreign Agents Registration Act (FARA) form to work on behalf of Venezuelan Attorney General **Reinaldo Muñoz Pedroza**, who was appointed Attorney General by Maduro. However, the United States no longer recognizes Maduro's government as legitimate. FARA requires individuals or firms doing work on behalf of a foreign principal to register with the U.S. government. Foley & Lardner, the law firm Kise works for, is listed as the registrant on the form received by the U.S. Department of Justice.

"**House Democrats unveil $4.7B Puerto Rico aid bill**" via Jennifer Scholtes of POLITICO Florida — While the House plans to pass the measure next week, the legislation is expected to wither thereafter, since the White House has already said Trump will not sign the aid package, **H.R. 5687 (116)**. A senior administration official has accused Democrats of proposing the bill "for completely political purposes." Text of the measure comes exactly one month from the start of the seismic sequence that cast thousands of Puerto Ricans into shelters. House Appropriations Chairwoman **Nita Lowey** said more support for Puerto Rico "is clearly needed," beyond the broader disaster aid bill the president signed last summer; new legislation provides "targeted assistance" to specifically help recover from the havoc wrought by the recent earthquakes.

"**Rick Wilson hits back at 'phony outrage' from 'MAGA herd'**" via Spectator USA — The fuss is about a widely shared clip from CNN's **Don Lemon** show, which pro-Trump Twitter has been having conniptions over. In the video, **Wilson**, Lemon, and **Wajahat Ali** laugh themselves silly while mocking the stupidity of Trump and the 'credulous boomer rubes' who support him. The backlash has been fierce. Wilson was unapologetic: "Once again, the MAGA tough guy 'fuck your feelings' crowd demonstrates that what really drives them is a grinding social anxiety fueled by a weaponized and monetized outrage machine." Wilson suggested what set the White House off was "Trump hates being called out for his utter ignorance of the world; all the phony outrage at me is just Trump fundraising grifters milking the MAGA herd."

Tweet, tweet:



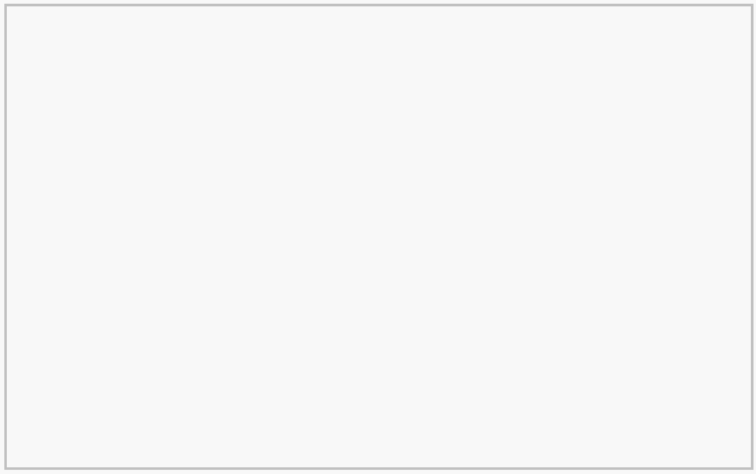
Assignment editors — Responding to Congressman **Ross Spano** voting against bipartisan legislation to bring down the costs of prescription drugs, a group of Floridians will deliver a giant bill to his office for the $26,547,383,200, which Florida residents pay for prescription drugs every year, 11 a.m., Spano's Brandon Office, 10101 Bloomingdale Ave., Suite 202, Riverview.

AMERICAN OVERSIGHT

The trail

"**'Keep Our Constitution Clean' edges closer to signature threshold**" via Drew Wilson of Florida Politics — A proposed ballot amendment that would make it harder for future constitutional amendments to pass has added nearly 70,000 petition signatures over the past week. Keep Our Constitution Clean, the political committee sponsoring the amendment, had 753,542 valid petition signatures as of Tuesday evening, according to the Florida Division of elections website. The current total is an increase of 67,513 signatures since Thursday and puts the proposal within striking distance of making the 2020 ballot. It takes 766,200 signatures to make the ballot, a number pegged to 8% of votes cast in the most recent presidential election. The committee must produce the remaining 12,658 signatures by Feb. 1 to go before voters in the November general election.

"**Ashley Moody hosting Florida GOP fundraiser at Universal Studios**" via Drew Wilson of Florida Politics — The invite lists Moody as the host for a "Universal Orlando Family Weekend" Feb. 21-23. It also lists RPOF as the beneficiary of the fundraiser. The invitation was merely a "save the date" and didn't offer further details on the weekend getaway, though it does provide contact information for potential attendees to get updates. Moody's fundraiser is one of the few scheduled for February, as lawmakers face a fundraising blackout during the Legislative Session. The prohibition doesn't apply to political parties. The fundraiser announcement also comes after RPOF posted healthy fundraising numbers for the fourth quarter of last year.



"**Putnam Schools Superintendent endorses Judson Sapp for CD 3**" via Drew Wilson of Florida Politics — Clay County Republican **Sapp** landed another endorsement for his bid to succeed retiring U.S. Rep.**Ted Yoho** in Florida's 3rd Congressional District. His latest backer is Putnam County Superintendent of Schools **Rick Surrency**, who weighed in on the crowded CD 3 Republican primary. "Judson Sapp is the common sense, conservative leader we need in Congress. He has deep roots in Putnam County and understands our needs. Judson Sapp will work with our local leaders to keep moving Putnam County in the right direction," Surrency said. Sapp, who primaried Yoho in 2018, was an early entrant in CD 3. However, the Republican field has ballooned in the weeks since Yoho announced he would forego a fifth term representing the North Central Florida district.

Local

"Nate Monroe: The JEA storm" via the Florida Times-Union — The JEA board of directors, in one of its final acts, fired former chief executive officer **Aaron Zahn** for cause, agreeing with two dozen findings by city lawyers that he engaged in "willful misconduct," "gross negligence" and breached his fiduciary obligations to the city-owned utility, while adding there may be additional evidence and testimony of more troubling conduct attorneys didn't have time to investigate. It will take JEA years to repair the damage done. And it will take longer because too many executives who served under Zahn remain. They lent their credibility to Zahn's phony financial projections, and they served as mouthpieces for Zahn's public lies. There is more cleaning to be done.

Former JEA CEO Aaron Zahn made a mess that will take a long time to clean up.

"Full JEA board to leave by end of February" via the Florida Times-Union — The news from Mayor**Lenny Curry**'s office comes after months of discussion of possibly privatizing JEA. The board ended those talks and canceled the invitation to negotiate process with potential bidders in December after criticism mounted from the public and the City Council. Curry's statement read: "I've talked to **Fred Newbill**, **Camille Lee-Johnson**, **Dane Grey** and **Henry Brown** and each informed me it is their desire to end their service with the JEA Board of Directors. I have asked all board members, including **April Green,** who resigned earlier today, to continue to serve until the end of February, and all agreed. **Kelly Flanagan** will also continue her service until her term expires on February 28th.

"Hillsborough transit meeting goes off the rails during quarrel over contracts" via Caitlin Johnson of the Tampa Bay Times — Tempers flared between two board members as one of them — city of Tampa appointee **Kathleen Shanahan** — stood up and walked out after accusing county commissioner**Pat Kemp** of pushing her own agenda. The group was left unable to do business for lack of a quorum. "That's her whole point, was to not have the vote," Shanahan said. The dispute arose over a $405,000 contract during a board committee meeting, but it revealed deeper divisions over the agency's process for hiring outside vendors. The staff recommended awarding Connetics Transportation Group a two-year contract to evaluate bus routes and schedules and help the agency plan a long-term vision.

"Florida seeks to reinstate death penalty for Joseph Smith, Carlie Brucia's killer" via Carlos Munoz of the Sarasota Herald-Tribune — Prosecutors are seeking death again for **Smith**, one of Southwest Florida's most notorious convicted murderers, after the Florida Supreme Court ordered the trial court to reinstate another death row inmate's non-unanimous death-penalty verdict. **Carlie Brucia**'s father, **Joseph Brucia**, said he welcomed the motion to reinstate the death verdict of a "monster." "I don't think it should have been challenged in the first place," he said. "I am glad we are back on the road again so we can get some closure for this thing and let this monster get what he deserves." Brucia said he is aggravated that the latest court matters haven't been resolved promptly and wrote to former Florida Attorney General **Pam Bondi** and others.

"Scooter rental dispute goes to Supreme Court" via the News Service of Florida — A dispute about a Panama City Beach decision to ban the rental of motorized scooters has gone to the Florida Supreme Court. Classy Cycles, Inc. filed a notice that is a first step in asking the Supreme Court to take up the issue after a November ruling by the 1st District Court of Appeal upheld the ban. The appeals-court decision rejected arguments that Panama City Beach did not have the power to ban a business unless it is a legal nuisance and that such restrictions are "preempted" by state laws. The case stems from two ordinances passed in 2017 to prohibit the overnight rental of scooters and to completely prohibit scooter rentals effective Sept. 8, 2020.

AMERICAN OVERSIGHT

Opinions

"**The John Bolton report**" via The Wall Street Journal editorial board —Bolton's book draft implicates Trump more closely to ordering a delay in military aid to Ukraine is hardly a surprise and won't — and shouldn't — change the impeachment result. It does, however, complicate the trial task for Republican Senators, and our advice is for Trump's former national security adviser to tell the public now what he says in his book. Whoever leaked the book's contents wants to use Bolton to turn the Senate impeachment trial into a larger political drama. But we've known Bolton long enough to doubt that he'd want to sandbag Republican Senators or the President. He's a straight-shooter, even if he sometimes aims right between the eyes. The book's contents put GOP Senators in a tight political spot.

"**Joe Henderson: Pam Bondi's impeachment defense overlooked some facts**" via Florida Politics — There are a couple of overriding points here. A): Hunter Biden is a private citizen, not the President of the United States. Try as they might to show otherwise, Biden is not on trial. The Senate is deciding whether to remove Trump from office (spoiler alert: it won't happen). Whatever happens on that front has nothing to do with Biden. B): Threatening to withhold nearly $400 million in congressionally approved military aid to Ukraine until Trump got a public announcement of a corruption investigation against Biden sounds like an abuse of power to me. And former National Security Adviser Bolton and former Trump Chief of Staff Kelly appear to feel the same way. Those facts aren't going away.

"**Legislative raiding of affordable housing fund**" via the Citrus County Chronicle editorial board — Citrus County has a service economy, heavy on tourism, and service jobs are notoriously low-paying. Workers wanting a good life need a dependable job, affordable housing, and a convenient way to get to work. Lack of affordable housing affects economic development as well. Florida has had a great program since 1992 called the Sadowski Affordable Housing Trust Fund. The problem? Twelve times, legislators have raided Sadowski funds for various uses including to balance the state budget. And though we shouldn't have to make laws to ensure that legislators do the right thing, in the current session, SB 306 and HB 381 would essentially prohibit them from sweeping monies from the trust to the general fund.

"**Supreme Court becomes an outlier on the death penalty**" via the Tampa Bay Times editorial board — The Florida Supreme Court has taken another step backward with a ruling that could restore the state's status as a national outlier on the death penalty. In a stunning move, the court reversed a previous decision that required unanimous jury recommendations in death penalty sentences. The ruling defies legal precedent and common sense, and legislators should be wary of taking this bait and making a similar mistake. Looking to apply the U.S. Supreme Court decision, the Florida Supreme Court ruled in October 2016 that juries must establish each "aggravating factor" in a capital case, and that trial courts could impose a death sentence only on the unanimous recommendation of a jury.

"**John Johnson, Skip Braziel: Professional licensing is rigorous for a reason**" via Florida Politics — DeSantis said that changing the Sunshine State's occupational licensing laws will be at the top of his legislative agenda. These are laws that set the requirements to become and remain a member of various professions in our society. We ask Florida leaders to be mindful of potential unintended consequences for professions — and the professionals in them — that oversee systems vital to Floridians' safety, health, and financial interests. To that end, any conversation around licensing reform would be well-served to acknowledge that for some professions, rigorous licensing is not only desirable, but appropriate and necessary. Surely, the need to maintain rigorous licensing standards for certain professions is a common-sense idea on which all sides can agree in this important debate.

"**Extend and expand Gulf Reef Fish Survey to keep Florida fishing**" via Kellie Ralston for the Pensacola News Journal — The Survey's current funding is slated to end in 2020. Yet, the fishing community desperately needs this important data collection tool to not only continue but expand throughout Florida to ensure generations of fishing enthusiasts may continue to enjoy our state's natural resources for years to come. Without this funding, the recent, significant gains for Florida fisheries management risk a devastating step backward for our more than four million anglers. FWC is considering a 45-day 2020 Gulf Red Snapper season. A 45-day season that would have been unheard of just a few short years ago is now possible due to the thousands of Florida anglers participating in the Gulf Reef Fish Survey.

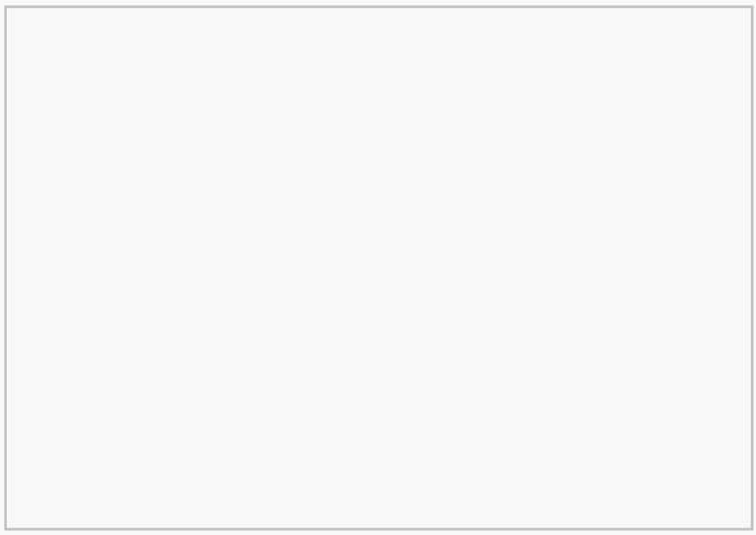
Movements

Carlos Curbelo joins political team for Miami's NBC affiliate — Curbelo signed on as an NBC contributor following his defeat in the 2018 contest for Florida's 26th Congressional District. Now, NBC 6 in Miami will showcase the former lawmaker in the lead-up to the 2020 election. "More than ever, our local news viewers want to know how the decisions made in Washington will impact their lives and communities," said **Jorge Carballo**, the station's president and General Manager. "Carlos' extensive knowledge in policymaking and deep familiarity with South Florida issues, makes him an ideal contributor to our political team." Curbelo added a statement of his own, saying, "It's an honor to bring my experience and knowledge as an analyst to the community I've lived in my entire life."



Carlos Curbelo has a new gig with NBC 6 Miami.

Ileana Ros-Lehtinen registers to represent UAE — Former U.S. Rep. **Ros-Lehtinen** registered as a foreign agent lobbying on behalf of the United Arab Emirates. Ros-Lehtinen served in Congress for decades before announcing she would not run for reelection in 2018. Since giving up her seat, the South Florida Republican has worked for Akin Gump Strauss Hauer & Feld. She became eligible to work as a lobbyist this month, which marks a year since she exited Congress. The disclosure says she will "provide outreach to U.S. government officials and counsel on policy issues related to a number of issues including, among others: export controls and sanctions, trade policies, human rights, U.S. foreign and defense policies, foreign media registration, and strengthening trilateral relations and regional security."

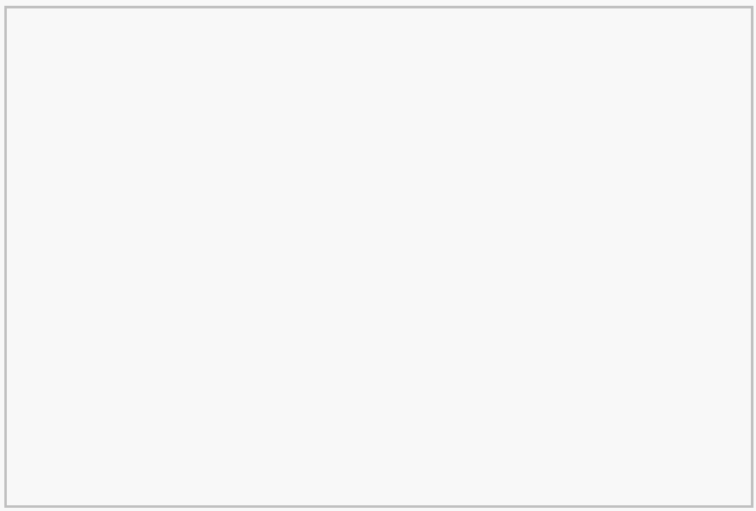
Aloe

"**Oreo is releasing a red, white, and blue 'Team USA' cookie**" via Tess Koman of Delish — Per the Instagram account @JunkFoodLeaks, "Olympics-themed Oreo sporting" cookies are on their way. The cookies — which will be stuffed with red, white, and blue crème, because of course they will — are going to taste just about the same as a regular Oreo, but they'll be oh so patriotic when you crack them open! The account goes on to describe the amount of crème we're talking about here. After all, these Oreos will *technically* be triple-stuffed: "The Olympic Oreos are standard and have as much crème/calories as a Mega Stuf Oreo, so nothing too groundbreaking." Another element of note, though? "Your tongue might change colors with this one." There you have it, folks: Cookies with fifty stars stamped into the crème will soon be on shelves wherever Oreos are sold ... probably.



Oreos get patriotic. Image via @JunkFoodLeaks.

AMERICAN OVERSIGHT

Super Bowl'ing

"Rashad Fenton once worked concessions at Dolphins Stadium; Now he's in the Super Bowl via Manuel Madrid of the Miami New Times — The remarkable nature of his journey isn't lost on **Fenton**. He went from being a Carol City Chief to a Kansas City Chief, from selling concessions at Hard Rock Stadium (then Sun Life Stadium) to preparing to face the San Francisco 49ers this Sunday in Super Bowl LIV. "It's too surreal. I don't think I would've ever imagined it happening like this," Fenton tells New Times. "It's crazy because I'm still trying to get my head around it. I'm still trying to normalize everything."

Rashad Fenton took a winding road, from selling concessions at Dolphins Stadium to playing there in Super Bowl LIV.

"The most VIP Super Bowl weekend costs $1.5M, includes butler" via Kelli Kennedy of The Associated Press — No place caters to the rich and famous quite like glitzy Miami. The city's most luxurious hotels, clubs and restaurants are offering over-the-top packages to entice big spenders looking for action. One package includes a four-day cruise around the Caribbean on a private yacht after the game for $720,000. On Location Experiences' **Sam Soni** says their top Super Bowl package last year in Atlanta went for $17,500. This year's top-tier packages in Miami are $20,000 to $35,000 and include game tickets, a pregame party and show by **Darius Rucker** and a chance to mingle with football legends like **Dan Marino** and **Marcus Allen**. "We've seen just unprecedented sales for that product," Soni said.

"Locking up sex workers during Super Bowl week won't end sex trafficking" via Scott Greenberg of the South Florida Sun-Sentinel — Here's the problem: the empirical evidence shows no causal or correlative link between sex trafficking and the Super Bowl. It never has. As George Washington University criminology professor **Ron Weitzer** put it, "It's become a circle of stories that get rehashed; it really is a myth." The truth is that sex trafficking happens in the U.S. every day. The Super Bowl myth is a distraction. Raised annually by politicians and media, it does more harm than good, misleading the public, misallocating resources, and imposing unreasonable expectations on police. The harm is borne in large measure by sex workers. Sex traffickers go unpunished.

Happy birthday

Best wishes to **Umar Sattar.**

AMERICAN OVERSIGHT

New Florida shock poll puts Mike Bloomberg at No. 2 behind Joe Biden in Dem. primary— A St. Pete Polls survey conducted Sunday and Monday among 2,590 Democratic voters showed **Biden** with a commanding 41% lead and **Bloomberg** — not **Elizabeth Warren** or **Bernie Sanders** — lands in second with 17% support.

Michael Bloomberg is now second behind Joe Biden in a surprising new poll of Florida Democrats.

The results show a sharp contrast to another national **Quinnipiac University poll** showing Bloomberg in fourth place with 8% support.

Though the results only represent Florida voters, they are still significant. Not only is Florida a major swing state and a big pick up in the primary, St. Pete Polls was the first to predict Trump winning Florida in 2015 and to predict Gov. **Ron DeSantis** beating former Agriculture Commissioner **Adam Putnam** in 2018.

The poll suggests Bloomberg's surge in attention to Florida in recent weeks might be paying off.

The St. Pete Polls survey put Sanders in third place with 9%, followed by Warren with 7%. Former South Bend Indiana Mayor **Pete Buttigieg** trailed with 6%, followed by Sen. **Amy Klobuchar** with 5%. **Andrew Yang** and **Tom Steyer** bottomed out the survey with 2% support. Undecided voters accounted for 10% of the survey.

Biden performed best among black voters, with 57% saying they would vote for him. He performed the worst among white, non-Hispanic voters with only 33% support.

Bloomberg performed the best among Hispanic voters with 21% support and worst among black voters with just 13%.

A new "He Said, She Said" ... Horse show adventures! — Michelle and I begin the latest episode by recapping **Ella**'s first show with her horse, Biscuit. It was the final wish of Michelle's father **Benjamin Todd,** to purchase his granddaughter a horse.

We talk #TheVillagesAfterDark, our hotel, and some misconceptions about "America's Friendliest Hometown."

Our first guest, **Jimmy Miller,** talks about the tragic death of basketball legend **Kobe Bryant**, his legacy, and factors that may have handicapped Bryant's career.

Next, Democratic communications pro **Kevin Cate** joins the podcast from the campaign trail in California, to give us a preview of the Iowa Caucus. Cate serves as **Tom Steyer**'s campaign consultant.

When asked, "What is on the minds of the Democratic Party one week out from the Iowa Caucus?" Cate says impeachment is not No. 1. Pocketbook issues like health care are top of mind, as well as defeating **Donald Trump**.

Cate reflects about life in the campaign trail, making TV ads, and why he is confident Steyer is the right man for the job.

As for the best Democrat in the race, we give hot takes on Iowa, and who is Michelle's favorite in the Florida Democratic primary. Spoiler alert: It's not Sanders.

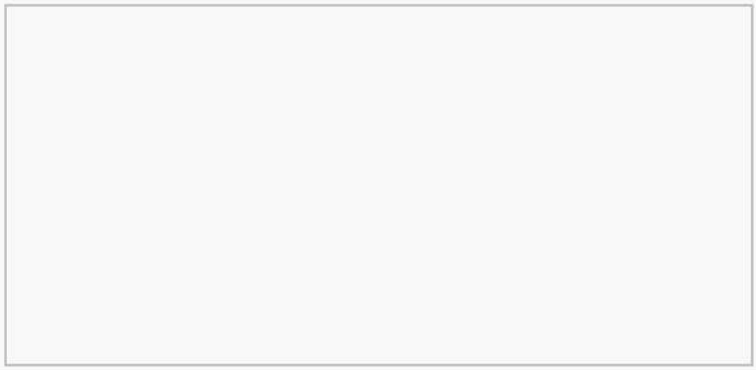
Today's Sunrise

The Senate is taking up a controversial bill forcing minors to get permission from their parents to get an abortion. The House is also considering a bill that says your genetic information is off-limits to insurance companies.

Also, on Sunrise:



— Agriculture Commissioner **Nikki Fried** is fuming over a bill that would move the state energy office from her agency to one controlled by the Governor. Fried calls it a partisan power grab

— In the aftermath of Hurricane Michael, Chief Financial Officer **Jimmy Patronis** says it's time to change the culture in Tallahassee and put consumers over the insurance industry.

— A House subcommittee approves two new gun bills: One making it easier to bring concealed weapons to church; the other allows local elected officials to be armed during official meetings (where guns are prohibited for everyone else).

— Our daily tribute to Florida Man (and Woman): A guy who stole to pay for his ankle monitor and a woman who used her minivan to drive her teenage son to a robbery.

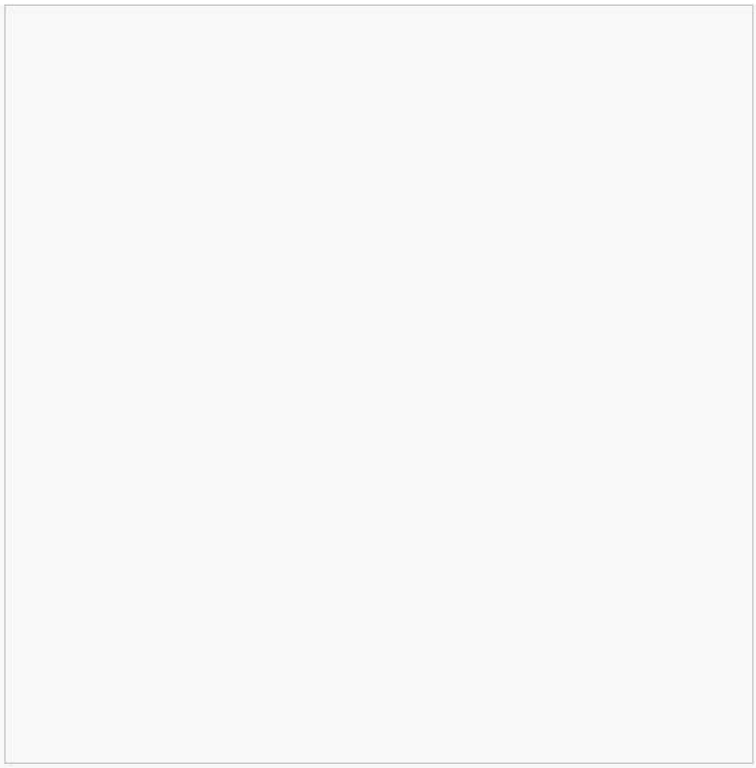
To listen, **click on the image below**:

Situational awareness

—**@RealDonaldTrump**: Really pathetic how @FoxNews is trying to be so politically correct by loading the airwaves with Democrats like **Chris Van Hollen**, the no-name Senator from Maryland. He has been on forever playing up the Impeachment Hoax. Dems wouldn't even give Fox their low ratings debates. ... So, what the hell has happened to @FoxNews. Only I know! **Chris Wallace** and others should be on Fake News CNN or MSDNC. How's **Shep Smith** doing? Watch, this will be the beginning of the end for Fox, just like the other two which are dying in the ratings. Social Media is great!

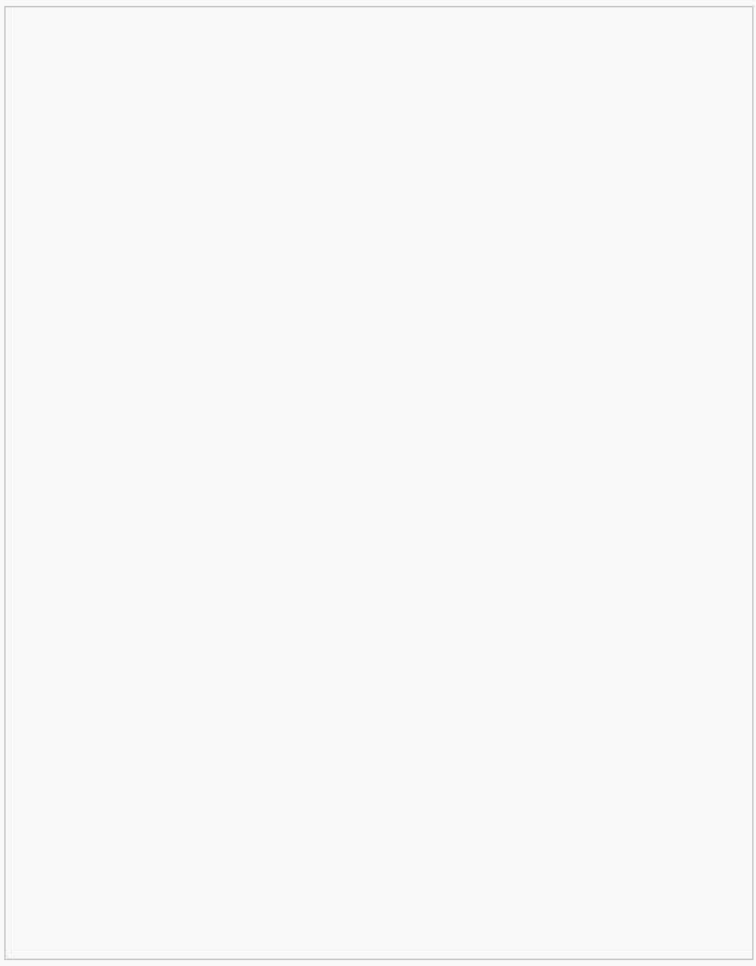
—**@DavidJollyFL**: GOP Senators are beginning to act as though they are genuinely concerned this could spin out of control for them, and for Trump.

—**@JustinAmash**: **Hunter Biden** is like a lot of unimpressive people in public life, including the Trumps — trading on his name for power. But if Trump believed an illegality occurred, then why didn't the administration open a proper DOJ investigation instead of pushing Ukraine for an announcement?



—**@JohnAnzo**: So let me get my head around this.**Rick Scott**, who as a health care executive, was fined a billion dollars for Medicare Fraud — the largest fine in history — is the attack dog on corruption? Priceless.

—**@DWStweets**: We can't get 75% of Americans to agree on much of anything, but 3 out of 4 voters agree: the Senate trial needs witnesses. Nobody will get a fair trial unless the jury hears from witnesses firsthand.



—**@nikkifried**: "We know that for a decade Republicans have had no problem with the office being where it is, as long as it was run by a Republican. But now that a Democrat sits in this office, the first woman ever elected to this office, it suddenly needs to be moved."

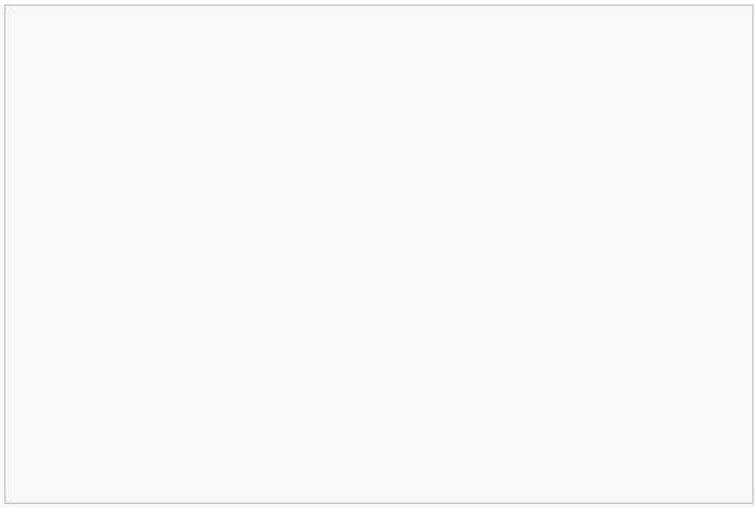
Top story

"**The starting gun for 2024': Rick Scott drops Iowa bomb on Biden**" via Mark Caputo of POLITICO Florida — Scott inserted himself into the Democratic presidential primary by launching an Iowa ad campaign trashing both the impeachment of Trump and former Vice President Biden ahead of the state's caucuses. But the ad campaign really wasn't just about the 2020 presidential race or the caucuses — it's the starting gun for 2024, when Scott has let it be known he's interested in running for the White House. "If you put $19,000 in Des Moines on TV, it's definitely Scott putting a toe in 2024," said **David "DJ" Johnson**, a GOP consultant. "And there's one thing we know about Scott: After he puts a toe in, then comes the foot. Then comes the whole leg."

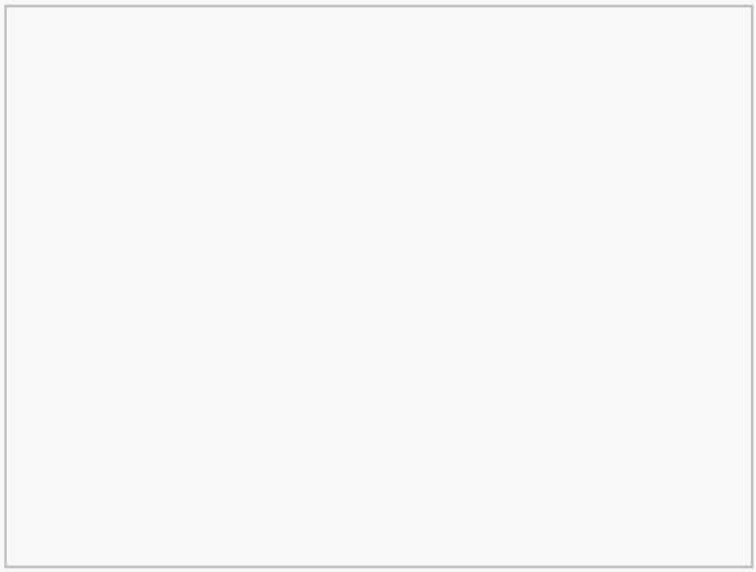
To watch the ad, **click on the image below**:



Dateline: Tally

Assignment editors — Gov. **Ron DeSantis** and Florida Department of Law Enforcement Commissioner **Rick Swearingen** will make a major announcement, 8:20 a.m. at Walt Disney World Swan and Dolphin Resort, Dolphin Meeting Space — American Seminar Room, 1500 Epcot Resorts Boulevard, Lake Buena Vista.

"**Nikki Fried to Ron DeSantis: Lay off Energy office**" via Samantha Gross of the Tampa Bay Times — She was reacting to an effort to move the state's Office of Energy from under her purview to the Department of Environmental Protection. The effort, in the form of a proposed committee bill, passed out of the Agriculture & Natural Resources Appropriations Subcommittee by a 10-1 vote. Three of the four Democrats on the committee voted yes on the bill, but despite their votes, Fried maintained that the bill is "partisan punishment." "This bill puts party before state, and puts the governor before Floridians," she said, noting that the Office of Energy went untouched while Republican Agriculture Commissioner **Adam Putnam** was in office. "Now that a Democrat sits in this office, it suddenly needs to be moved."



AMERICAN OVERSIGHT

Nikki Fried is blasting Ron DeSantis for attempting to move the Office of Energy away from her agency.

"**Bill Galvano pledges 'meaningful' pay raise for state workers**" via James Call of the Tallahassee Democrat — **Galvano** told the Tallahassee Democrat the Senate would include a "meaningful" pay increase for state workers when it begins budget negotiations with the House. "The Senate budget, scheduled to be released by the end of the week, will include a meaningful investment in across-the-board salary increases for our hardworking state employees," Galvano said. Last month, the Bradenton Republican would only commit to having his budget chairs look at the issue. While an impasse exists in negotiations for a new three-year contract between the state and, for instance, social workers, wildlife officers, clerical and other staff, neither House Speaker **José Oliva** nor DeSantis has backed a pay raise for all state employees.

"**Florida Sheriffs sound alarm about 'Truth in Sentencing'**" via AG Gancarski of Florida Politics — With several bills in play that would reduce or mitigate current sentencing policy, Florida Sheriffs had their say defending mandatory minimum sentences. The Florida Sheriffs Association announced the launch of a Truth in Sentencing report and its likewise-new Florida Sheriffs Research Institute. With live proposals for everything from changing mandatory minimums on drug policy to early release for old and infirm inmates, and a crisis in the prison system guiding the reform push, the Sheriffs' message is that what they are doing works despite these systemic stressors. FSA President and Pinellas County Sheriff **Bob Gualtieri** lauded the research institute, saying it "makes certain the full impact of our current laws is properly assessed."

Florida sheriffs gather to formally release their Truth in Sentencing report, the first product of the newly launched Florida Sheriffs Research Institute. Image via Florida Sheriffs/Facebook.

Students visit The Capitol to fight for higher-education vouchers— A handful of students appeared at the House Appropriations Subcommittee on Higher Education to fight for EASE, a voucher program for full-time Florida students who attend SACS-accredited, independent, nonprofit universities and colleges. During the committee's budget exercise, there was a discussion on severe cuts to these student grants. The budget released in committee this week keeps funding at the current year's levels. Students expressed sincere thanks to the lawmakers for supporting EASE. "I'm 26 years old. I have two young daughters, and I am a full-time student. Your support for EASE is really important to all of us," said **Ashley Hawks**, a Keiser University student. " It's allowed me to provide a better life for my kids."

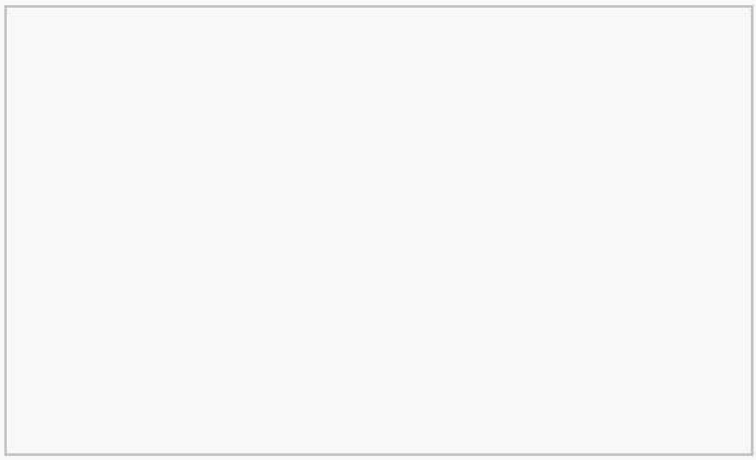
"**Industry calls on lawmakers to reform lawsuit abuse**" via Amy O'Connor of the Insurance Journal — At the top of the list for advocates are reforms to curb what they say are abuses of the state's legal system that

AMERICAN OVERSIGHT

are hurting insurers' bottom line. **Paul Handerhan**, president of the Federal Association for Insurance Reform (FAIR), said two bills had been introduced, both sponsored by Sen. **Jeff Brandes**, that would target first-party litigation abuses. Senate Bill 914 would provide that for certain attorney fees awarded for claims arising under property insurance policies, the maximum fee a court may award is a lodestar fee and prohibit the court from considering contingency risk or using a contingency risk multiplier. SB 1634 would revise requirements for the civil remedy notice provided to insurers and the Department of Financial Services.

"**Communications tax cut would help more low-income Floridians get connected**" via Florida Politics — Currently, cities and counties can set their own communications services tax rate. This has led to more than 400 different jurisdictions, each with their own tax rate. While those rates can vary wildly, they are rarely inexpensive. In most cases, the communications services tax costs customers two-and-a-half times as much as sales tax. The high rates disproportionally impact low-income Floridians, many of whom are hit multiple times a month, as the charge shows up on bills for cellphones, broadband internet and cable television. Bills from Sen. Travis Hutson (SB 1174) and Rep. **Jason Fischer** (HB 701) aim to bring some stability — and relief — to Floridians by replacing the current patchwork structure and setting a statewide cap on the tax.

"**Appeals court weighs Florida law on felon voting rights**" via Bobby Caina Calvan and Kate Brumback of The Associated Press — Lawyers for the state of Florida are asking a federal appeals court to set aside a ruling that allowed some felons to regain access to the ballot box despite owing fines and other legal debts. Florida Republicans, led by DeSantis, argue that only felons who have completed all conditions of their sentences should be allowed to vote. He and GOP lawmakers say that to regain the right to vote, former felons must not only serve their time but also pay all fines and other legal financial obligations. The case before the Atlanta-based 11th U.S. Circuit Court of Appeals could be consequential because of the razor-thin margins that sometimes decide election contests in Florida — a perennial battleground state.



Assignment editors — LeadingAge and Greenberg Traurig will hold a reception to honor the Florida Legislature, 5:30 p.m., The DoubleTree by Hilton, 101 South Adams Street, Oasis Pool Deck — 4th Floor, Tallahassee.

Assignment editors — The Florida Assisted Living Association will hold its annual cocktail reception for legislators, 5:30 p.m., TCC Capitol Center, 300 West Pensacola Street, Tallahassee.

Assignment editors — Catholic Bishops of Florida host the 45th Annual Red Mass, 6 p.m., Co-Cathedral of St. Thomas More, 900 W. Tennessee Street, Tallahassee.

Legislation

Legislation aligns with Governor's water spending plans, for now— The House Agriculture and Natural Resources Appropriations Subcommittee's plan for water quality and Everglades spending closely mirrors Gov. **Ron DeSantis**' budget request. However, committee Chair **Holly Raschein** says the lawmakers aren't keen on funding the Governor's priority with recurring dollars, Bruce Ritchie of POLITICO Florida reports. "We have a policy that we stick pretty wholeheartedly to of not tying the hands of future Legislatures," Raschein said. DeSantis outlined his request for $625 million in water funding last year and said he hoped lawmakers would include recurring funds in the budget so his office wouldn't have to fight for the money every year. The House plan comes in at $646.8 million and includes $29.2 million in local water projects that DeSantis didn't include in his budget.

The Florida Legislature aligns with Ron DeSantis' water requests, for the time being.

House health care plan measures in at $38.8 billion— The House Health Care Appropriations Subcommittee has put forward a $38.8 billion health care spending plan for the 2020-21 fiscal year, **Alexandra Glorioso** of POLITICO Florida reports. The proposal is $60.5 million more than DeSantis requested in his budget. Included in the House plan is a provision that would cut Medicaid retroactive

AMERICAN OVERSIGHT

eligibility permanent. Chair **MaryLynn Magar** said the cut, which will free up $104 million, is needed to pay for other priorities such as a bump in nursing home reimbursements.

"**House, Senate seek to curb prison guard turnover**" via Ana Ceballos of the News Service of Florida — The pilot program would move one-third of Florida's prisons from 12-hour shifts to 8.5-hour workdays to address worker fatigue, Corrections Secretary **Mark Inch** has told lawmakers. Making the change would require the state to hire 292 full-time officers, which would cost taxpayers $29 million, according to a budget request from the Department of Corrections. The Senate proposal would fully fund the program, while the House's budget proposal would provide $13.6 million for the change. That would allow hiring 174 employees and moving one-fifth of prisons to the 8.5-hour shifts, according to the House proposal.

House plan would boost nursing home money" via the News Service of Florida — Introduced by House Health Care Appropriations Chairwoman Magar, the proposed budget would keep Medicaid funding for hospitals at current-year spending levels. The proposal for the 2020-2021 fiscal year would pump an additional $44.8 million to increase rates the state pays nursing homes to care for Medicaid patients. "The nursing center funding increase in the House budget is critical for our members as the cost of delivering high-quality care continues to rise," Florida Health Care Association spokeswoman **Kristen Knapp** said in a prepared statement.

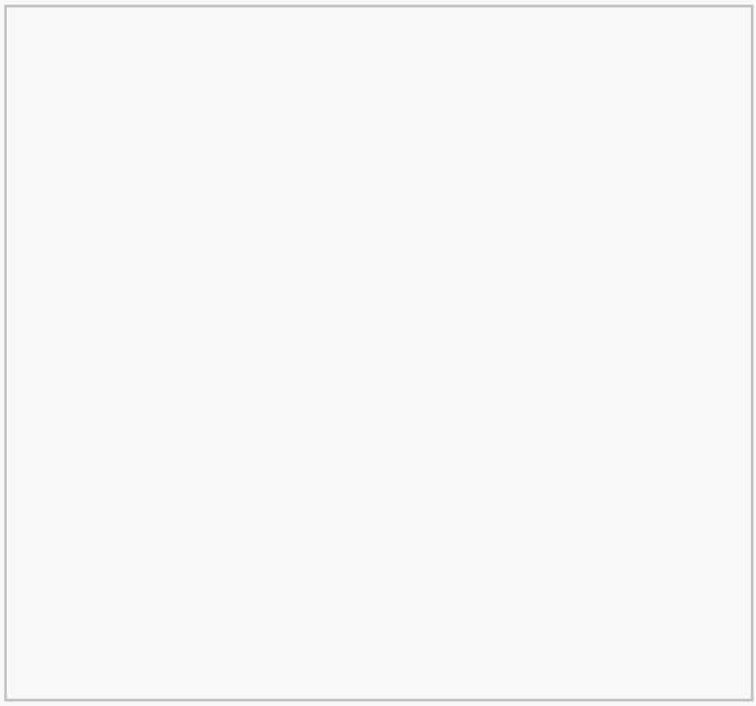
"**Senate bill to compensate wrongfully convicted man clears Judiciary Committee**" via Sarah Mueller of Florida Politics — Jacksonville resident **Clifford Williams** was exonerated in March 2019 after spending 43 years in prison for a crime he didn't commit. He's not eligible for compensation under current law despite the decades behind bars because of two prior felony convictions. A bill sponsored by Senate Minority Leader **Audrey Gibson** (SB 28) would give Williams about $2.15 million in restitution for the time he served in prison. Williams and his nephew **Hubert Nathan Myers** were arrested in 1976 for the murder of **Jeanette Williams**, no relation, and the attempted murder of her domestic partner. Williams was initially sentenced to death, but his sentence was commuted to life in prison after four years on death row.

"**Senate panel OK's Lauren Book ban on declawing cats**" via Ryan Nicol of Florida Politics — The Senate Agriculture Committee approved a measure from Sen. **Lauren Book** (SB 48) that would ban declawing cats with a 4-1 vote Tuesday. The approval comes after the bill was temporarily postponed in mid-January. Republican Sen. **George Gainer**, the committee's Vice Chair, was the sole no vote. Book and others who spoke in support argue the procedure causes problems for the cats' long-term health. "It's a common misconception that declawing causes no harm, and that's it's as simple as cutting off a cat's fingernails," Book said. "It would be like if we took our own hands and cut off the first joint in our fingers."

"**Senate advances Ben Albritton's bill to revitalize broadband expansion**" via Renzo Downey of Florida Politics — The bill (SB 1166) would create the Florida Office of Broadband within the Department of Economic Opportunity (DEO) and make it the lead agency on high-speed internet installation. Broadband coverage blankets many urban areas, providing homeowners and businesses with high-speed internet. "In other parts of the state, especially in rural areas, the ability for somebody to access high quality, or quite frankly sometimes low-quality broadband, is not available," the Wauchula Republican said. The Senate Commerce and Tourism Committee gave full approval to the proposal and an amendment defining "underserved" as 10 megabits per second download speeds and at least one megabit per second upload speeds.

"**Senate panel OKs bill to create scholarship fund for students at Florida's HBCUs**" via Byron Dobson of the Tallahassee Democrat — The Senate Education Committee unanimously cleared the bill (SB 876), sponsored by Democratic Leader **Audrey Gibson**, which would establish the Historically Black Colleges and Universities Matching Endowment Scholarship Program. Her bill is identical to one (HB 383) introduced by Rep. **Delores Hogan Johnson**, which was OK'd by the House Higher Education and Career Readiness Subcommittee. Both bills must clear two more committees in their respective chambers before they can go to the floors for final votes. Under the proposed legislation, the Legislature would appropriate $2 million to be deposited into the Student Financial Assistance Trust Fund, administered by the Florida Department of Education.

Bill Montford hemp program bill gets TP'd — The Senate Agriculture Committee temporarily postponed Montford's measure, which would have altered the state hemp program set up during the 2019 Session. That program was established under the Department of Agriculture to authorize the cultivation of hemp. Montford's legislation would have made clear that hemp extract sold in violation of the law's existing requirements "shall be considered adulterated or misbranded." The term "hemp extract" would also not include seeds "recognized as safe by the United States Food and Drug Administration." And the bill bars the sale of products made from hemp extract to those under 18 years of age. The measure was on the committee's schedule for Tuesday afternoon, but that meeting ended without lawmakers taking up the bill.



"**Lawmakers tackle heat strokes among student-athletes**" via Bobby Cania Calvan of The Associated Press — As it stands, high schools aren't required to have lifesaving devices and equipment available at the sidelines. That includes the absence of tubs that can be used to help quickly cool student-athletes showing signs of heat stress. Many coaches and other team personnel lack training on how to recognize "exertional heat stroke," or EHS, and how to administer emergency care. A bill endorsed unanimously by the Senate Education Committee would set standards for monitoring conditions that might put students at higher risk. At

AMERICAN OVERSIGHT

a minimum, it would require schools to have containers large enough to accommodate students' bodies — tubs or even inflatable kiddie pools — filled with cold water that can be used to cool down an overheating student rapidly.

"**House eyes environmental money, chops VISIT FLORIDA**" via Jim Turner of the News Service of Florida — DeSantis would get more than the $625 million he requested for environmental projects, Florida Forever would see a funding cut and VISIT FLORIDA would be shuttered, under parts of a House budget proposal. The House is proposing $4.1 billion in the agriculture and natural resources part of the budget, up 3.7% from the current fiscal year, which ends June 30. The proposal includes $646.8 million for DeSantis' requested environmental projects. The House proposal includes $318.3 million for Everglades restoration, nearly $4 million less than what DeSantis requested. The House also wants $122 million for wastewater and stormwater grants, which includes efforts to get property owners off septic tanks, $28 million below the governor's proposal.

"**Craft distilleries bill advances in House**" via Jacob Ogles of Florida Politics — A change in law letting distilleries to bottle drinks in more sizes cleared its first hurdle in the Florida House. Rep. **Holly Raschein**, a Key West Republican, stressed the legislation aims to free more Florida-based distilleries up to take advantage of market needs. The bill (HB 1165) does this by repealing statutes related to wine and cider container size limitations, and by specifying restaurant patrons may take home a partially consumed bottle of wine with the purchase of a meal. The legislation passed in the House Business and Professions Subcommittee, where it was one of the multiple pieces of legislation aimed at lifting restrictions on alcohol businesses.

Cheers: Holly Raschein's craft brewery bill advances.

"**Occupational license deregulation bill continues to move in House**" via AG Gancarski of Florida Politics — HB 1193, from Rep. **Blaise Ingoglia**, is billed as the Occupational Freedom and Opportunity Act. The legislation attempts to push through reforms long sought by free marketeers, including DeSantis. "This is almost the exact same bill you heard last Session," Ingoglia said of the deregulation package. Mold remediation is out of the bill, and barbers now are required 400 hours of training, which is a condition the sponsor said would not compromise student aid. The bill allows for reciprocal licensing from different states. A wide swath of professions, ranging from cosmetology to interior design, would be affected in the legislation. Auctioneers, barbers, and geologists would have fewer education requirements, with nutritionists and boxing announcers seeing some licensing requirements eliminated completely.

"**Fire chiefs seeking help in drone bills**" via Scott Powers of Florida Politics — The House Agriculture and Natural Resources Appropriations Subcommittee swiftly approved HB 659, which would allow the use of drones by wildlife and forestry officials to monitor invasive species encroachment on public lands and to help manage and fight wildfires. The second provision is identical to one added to the Senate counterpart of the bill in a committee hearing. At both stops, the Florida Fire Chiefs' Association spoke up with an "us too" request, citing the same rationales for drones' use in structure fires that had been cited for the wildfires amendment: that the aerial camera devices could help firefighters understand what is going on with the fires, and that the drones could help improve safety for firefighters at the scene.

"**Second House panel approves specialty license plate bill**" via Ryan Nicol of Florida Politics — The House Transportation and Tourism Appropriations Subcommittee unanimously approved a measure that would create specialty tags for a trio of out-of-state universities. The House Transportation and

AMERICAN OVERSIGHT

Infrastructure Subcommittee already signed off on the bill, leaving just one more stop until it clears the committee process. Sponsoring the legislation (HB 1135) is Rep. **James Grant**, an Auburn University alumnus. In addition to Auburn, specialty license plates would be approved for two other out-of-state schools — the University of Alabama and the University of Georgia.

"**Church, local official gun bills backed**" via Jim Saunders of the News Service of Florida — A House panel approved a measure that would allow people to carry concealed weapons at religious institutions that share properties with schools. The House Criminal Justice Subcommittee also approved a separate bill that would allow county commissioners, school board members, and elected city officials to be armed at their public meetings. State law generally allows people to carry concealed weapons at religious institutions, but it bars being armed on school properties. That has effectively meant that people cannot carry guns to churches or synagogues that meet at places with schools. The measure (HB 1437) would allow religious institutions to authorize people with concealed-weapons licenses to carry guns at such locations.

"**College athlete compensation a hit in House**" via Jim Turner of the News Service of Florida — With few questions and little comment, the House Workforce Development & Tourism Subcommittee approved a bill (PCB WTS 20-01) that would establish a "bill of rights" as college athletes would be able to earn compensation for their "name, image, likeness or persona." The proposal, being watched by the National Collegiate Athletic Association, maintains that pay for on-field performance would remain prohibited. State colleges and universities have not taken a public stand on the House proposal.

Pigman seeks to modernize health care

State Rep. **Cary Pigman** joined nearly 200 Certified Registered Nurse Anesthetists (CRNA) at a news conference at The Capitol to emphasize the role of Advanced Practice Registered Nurses (APRN) within the state's health care system — increasing access to health care, lowering costs and maintaining the quality of care.

The Okeechobee Republican recently filed **HB 607**, which seeks to allow APRNs, CRNAs and nurse practitioners to practice to the full extent of their training without physician supervision and protocols.

Rep. Cary Pigman touts his bill to give nurses more independence to provide health care.

HB 607 has the support of House Speaker **José Oliva,** who has made this issue a priority, as the country faces a rising population of seniors and a shortage of up to 55,000 physicians nationwide.

"I have called out the health care industrial complex because I believe it can do better for patients — consumers of health care services," Oliva said. "I made clear my support for independent practice for APRNs because it will improve access and affordability for patients. With the endless sea of white coats flooding the Capitol and the support from statewide businesses and organizations, I am assured that the House is on the right path by prioritizing HB 607."

Today in Capitol

The House Children, Families & Seniors Subcommittee meets, 8 a.m., Room 12, House Office Building.

The House Civil Justice Subcommittee meets, 8 a.m., Room 404, House Office Building.

The House Oversight, Transparency & Public Management Subcommittee meets, 8 a.m., Morris Hall, House Office Building.

The House PreK-12 Appropriations Subcommittee meets, 8 a.m., Reed Hall, House Office Building.

The House Local Administration Subcommittee meets, 8 a.m., Room 212, Knott Building.

The Senate Agriculture, Environment and General Government Appropriations Subcommittee meets, 9 a.m., Room 110, Senate Office Building.

The Senate Criminal and Civil Justice Appropriations Subcommittee meets to consider a bill by committee Chair Brandes that would allow older inmates to be released from state prisons, 9 a.m., Room 37, Senate Office Building.

The Senate Education Appropriations Subcommittee meets to discuss the 2020-2021 budgets for the Department of Education, the Office of Early Learning, and the state university system Board of Governors, 9 a.m., Room 412, Knott Building.

The Senate Transportation, Tourism and Economic Development Appropriations Subcommittee meets to extend VISIT FLORIDA's authorization through 2028, 11 a.m., Room 110, Senate Office Building.

The Senate Health and Human Services Appropriations Subcommittee meets at 11 a.m., Room 412, Knott Building.

The House Appropriations Committee meets, 12:30 p.m., Room 212, Knott Building.

The Senate Rules Committee meets to consider a measure that would repeal the Constitution Revision Commission, 1:30 p.m., Room 110, Senate Office Building.

The House will hold a floor session, 3:30 p.m.

The Senate will hold a floor session, 4 p.m.

Assignment editors — DeSantis will deliver remarks for Emergency Management Day, joined by First Lady DeSantis and Division of Emergency Management Director **Jared Moskowitz**, 11 a.m., 4th-Floor Rotunda.

Assignment editors — Girls from the PACE Center for Girls will head to Tallahassee to meet with local representatives and talk about the impact Pace has had on their lives in the annual "PACE Day at The Capitol," 8 a.m., 22nd floor.

Assignment editors — First Lady **Casey DeSantis** will deliver remarks during "PACE Day at the Florida Capitol," 8:30 a.m., 22nd Floor.

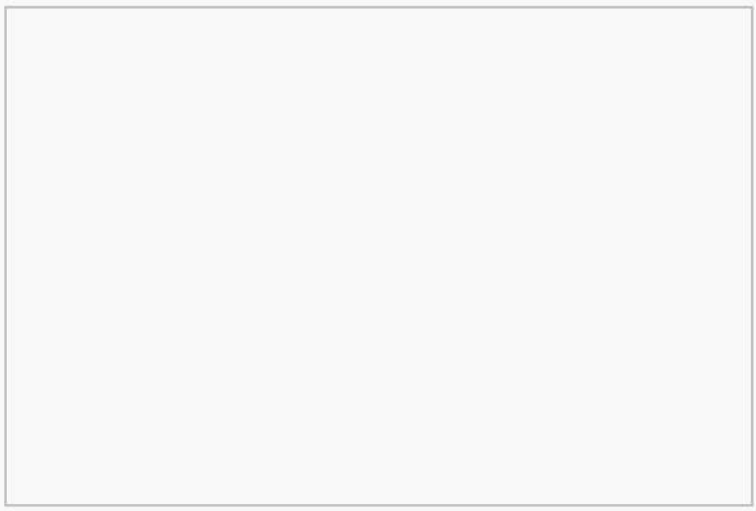
Assignment editors — Attorney General **Ashley Moody** and Department of Juvenile Justice Secretary **Simone Marstiller** will join the PACE Center for Girls for a news conference as part of "Pace Day at the Capitol," 11:45 a.m., 22nd Floor.

Gov. Club buffet

Cuban black bean soup (rice and onions-side); mixed garden salad with dressings; Cuban avocado salad; tropical fruit salad; deli board with lettuce, tomatoes, cheeses and breads; picadillo; cumin lime chicken; Cuban fried pork chops; yucca with mojo; island zucchini; cilantro lime rice; tres leches cake for dessert.

AMERICAN OVERSIGHT

Statewide



"Fifth Third Bank to halt donations to school voucher program over LGBTQ discrimination" via Scott Powers of Florida Politics — Reps. **Carlos Guillermo Smith** and **Anna Eskamani**, Orlando Democrats on the front lines of fighting for LGBTQ rights and against discrimination, announced the Cincinnati-based bank announced on Twitter they will no longer be donating to Florida's Step Up for Students scholarship programs until "more inclusive policies have been adopted by all participating schools to protect the sexual orientation of all our students."

Shaw's prolific year

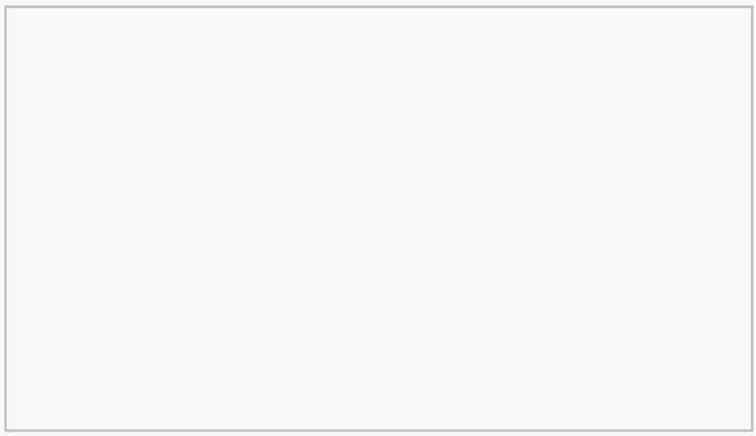
Former state Rep. **Sean Shaw** has had an extremely productive year. Despite losing the Attorney General's race — even though he received over 3.7 million votes, more than any other Democratic AG candidate in history — Shaw is continuing his public service for Floridians. He has stayed involved in both state and national politics as well as turning his focus on several progressive issues as founder of "People Over Profits," an organization with the mission of putting "working people first."

Recently, I had an opportunity to speak with Shaw, catching up on what has been, for him, a very prolific year.

"Since the campaign, I've made it a priority to spend more time on the water. I bought a saltwater boat and try to take it out as much as I can. My first love will always be fishing and it's therapeutic for me. It's funny because I've realized that politics was both my work and a hobby — and I needed some life balance. I think they call it self-care now."

Sean Shaw is having a very busy year.

Shaw is currently working with Vanguard Attorneys, a personal injury firm based in Ybor City. His Vanguard office was the old call time room from Shaw's AG race.



He's also been remarkably busy with projects across the state: The new firm, People Over Profits, and hosting a weekly radio show (Vanguards of Democracy).

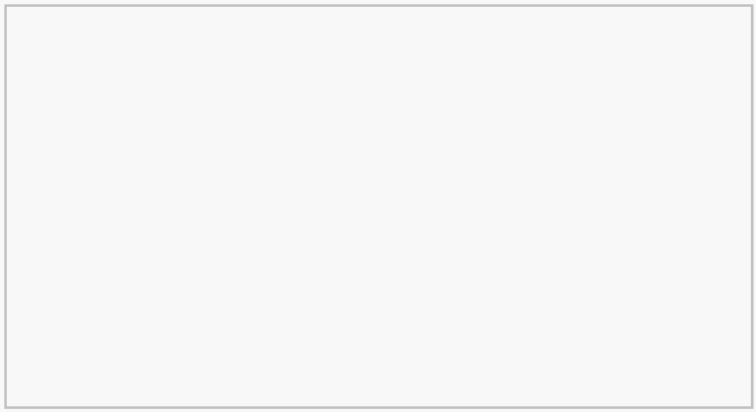
Shaw was also an early supporter of Mayor Buttigieg: "I knew he was different. I've come to understand he is the kind of leader this country needs. I reached out to endorse him because I believe he has the right ideas to address important issues like criminal justice reform through his Douglass Plan, affordable health care, and the student loan crisis."

AMERICAN OVERSIGHT

Mother Nature

"**Harmful algal blooms pose serious long-term health risks for Floridians**" via Walter Bradley and Howard Simon of the South Florida Sun-Sentinel — The causes of HABs are no mystery: expanding residential and commercial development and agribusiness — particularly cattle, poultry and the dairy industry — contribute to the increasing flow of nitrogen and phosphorus that spawn HABs in Lake Okeechobee and on the east and west coasts. And as our state's population continues to swell there are increased burdens on water treatment plants and septic systems. Media reports of fouled beaches, fish kills, and the stench of HABs are not good for tourism — about 10% of Florida's economy. But even more concerning, our health is at risk. DeSantis' Blue-Green Algae Task Force made several sensible recommendations, though some of the Task Force's proposals could have gone further.

Algal blooms are posing significant long-term risks to human health.



"**Powerful Caribbean earthquake shakes buildings in Jamaica, Cuba — even downtown Miami**" via Jacqueline Charles, Bianca Padró Ocasio and Joey Flechas of the Miami Herald — At 2:10 p.m., a strong earthquake struck about 6 miles beneath the surface in the open water between Jamaica and Cuba with more force than the 2010 earthquake that devastated Haiti, a quake that occurred only 15 miles away from Port-au Prince. The quake struck along the border between the Caribbean and North American tectonic plates, a crack that stretches from Hispañola to Guatemala. Brief tsunami warnings were issued for multiple northern Caribbean islands. Several aftershocks occurred fewer than 50 miles from the Cayman Islands, whose residents felt the impact from at least four tremors through the afternoon. The most powerful of them registered a 6.1 magnitude about 35 miles southeast of Grand Cayman just before 5 p.m.

2020

AMERICAN OVERSIGHT

"**A primary from the right? Not in Donald Trump's GOP**" via Elaina Plott of The New York Times — Such is the nature of the Republican primary season in the Trump era: self-proclaimed outsiders marketing themselves as loyalists to a man who is now the ultimate insider. Challenges to incumbents from the right are nothing new. But whereas conservative primary candidates once fashioned their campaigns as referendums on reckless federal spending or the elitist sensibilities of leadership, their pitches are much simpler now, carte blanche offerings of complete and total fealty to the President. And with Trump's stranglehold on his party, their targets are much fewer, too.

"**Why Biden scaled back in New Hampshire**" via Mark Caputo and Trent Spiner of POLITICO — Biden's New Hampshire media buys, events and overall footprint indicate it's the early state that's getting relatively short shrift so he can more effectively contest the other three states with nominating contests before Super Tuesday. The former vice president's campaign stresses he's not writing off New Hampshire, that he has more major endorsements here than any other candidate, and visited Friday and Saturday. But in recent weeks, Biden has intensified his focus on the two states whose caucuses bookend the Granite State's Feb. 11 primary — Iowa and Nevada — according to those familiar with the campaign's strategy.

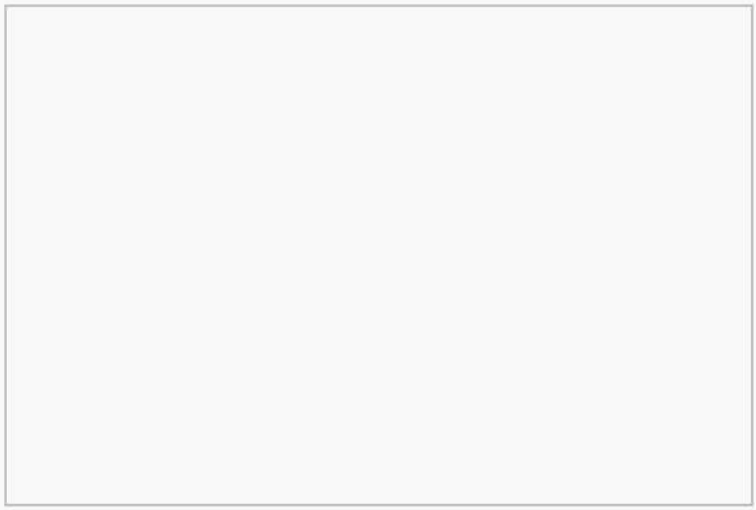
Joe Biden is scaling back some in New Hampshire.

"**Celebrity star-power fuels Bernie Sander's final Iowa sprint**" via Holly Otterbein of POLITICO — The luminaries cut across the culture, from politics to music to movies and more. Congresswoman **Alexandria Ocasio-Cortez**, filmmaker and liberal stalwart **Michael Moore**, actor **Kendrick Sampson**, and recording artists **Bon Iver** and Vampire Weekend are among those who have or will be stumping for him. The roster of celebrity surrogates is designed to bring out young and unlikely voters to events: A Friday rally featuring Ocasio-Cortez and Moore, which Sanders couldn't attend because he was in Washington for the impeachment trial, drew an estimated 800-plus people. Overall, nearly 6,000 attended events in Iowa held by Sanders, Ocasio-Cortez and Moore over the last few days, according to the campaign.

"**Elizabeth Warren announces endorsements from Florida educators**" via Scott Powers of Florida Politics — Warren has the endorsements of 63 teachers and educators around Florida, including **Johanna López**, an Orange County School Board Member. López had been a Colonial High School teacher in Orange County before being elected to the school board. Another endorsement is **Susan Smith**, President Emeritus of the Democratic Progressive Caucus of Florida and a former teacher. The announcement denotes activity by Warren's Florida campaign, one of the largest and busiest among Democrats in the Sunshine State, though she and other Democrats continue to personally largely ignore Florida while pursuing voters in Iowa, New Hampshire and other early primary and caucus states.

"**Pete Buttigieg campaign faces personnel issues as Iowa caucuses approach**" via Tarini Parti and Dustin Volz of The Wall Street Journal — **Nadia Singer**, the talent director for the campaign responsible for identifying potential new hires, parted ways with the former South Bend, Indiana, Mayor's team earlier this month. Singer, who previously worked at question-and-answer website Quora Inc. and Facebook Inc., was seen as part of a cadre of Silicon Valley hires by Buttigieg. Her contract employment ended abruptly after she relocated to South Bend from San Francisco. Two cybersecurity aides also left the campaign around the same time. The campaign described the staffers as midlevel. A spokesman for the campaign said Singer's contract ended because the campaign is fully staffed and not hiring during the primaries.

AMERICAN OVERSIGHT



Is good-enough enough for Biden?

As much as any campaign in recent history, notes **Mark Leibovitz in The New York Times Magazine**, Biden's candidacy has been "defined by the alternative."

The former vice president is not a socialist, and he's not Trump.

However, the longtime Senator and two-term VP is well known, "for better and worse."

Biden keeps hammering the point that he is best equipped to keep Trump to a one-term presidency — an "aberration" — and avoid a "downward transformation" if Trump wins reelection.

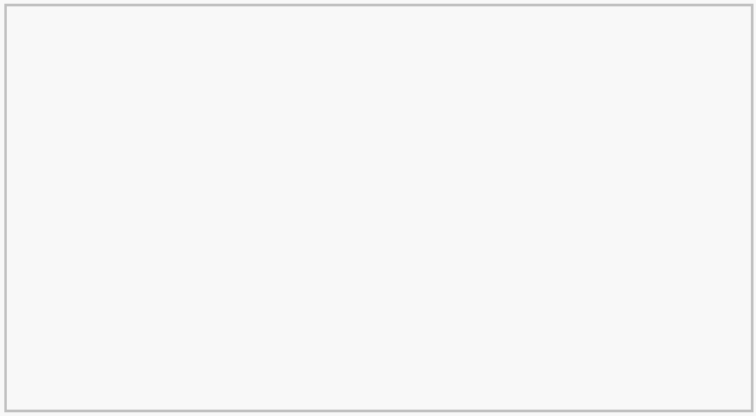
Joe Biden refuses to change his brand for the campaign.

"You know, I've been around a long time, that's the bad news," Biden told Leibovitz in one of his favored bad news/good news constructions. "But the good news is, I've also been around a long time. The bad news is that everybody knows me. The good news is everybody knows me."

There is one foundational element in Biden's candidacy: survival. Despite everything — including himself — he remains the front-runner in the race, weathering "any number of doomsday predictions and things that felt fateful in the moment."

That is the point Biden tries to make, he is still here, and will endure. Despite all the naysayers and "smart-as-hell people" who were wrong about the race.

"The Biden hierarchy comprises a fairly conventional mix of established Democratic operatives, White House veterans and Biden loyalists," Leibowitz writes. "They tend to be older, male and more than a bit swampy (consultants, the stray lobbyist, and people you've seen talking if you watch cable news)."



It was clear from the start that Biden would be attacked as the "rickety embodiment of a bygone Democratic establishment." But any attempt at a makeover to pacify the more progressive wing of the Party would fall flat. Biden's campaign knew that, rejected any ad hoc repackaging, and embraces who Biden is.

Nevertheless, any Democratic candidate will face merciless attacks: "He has already, and he is still here."

AMERICAN OVERSIGHT

Peachy

"New Quinnipiac poll: 75% of American voters want impeachment witnesses" via Scott Powers of Florida Politics — Broken down by party, even Republican respondents favored witnesses, with a plurality of 49% saying yes, and 42% saying no. Ninety-five percent of Democrats said yes. Seventy-five percent of independent voters said yes. At least 60% of every demographic group broken out in the poll — men or women; white, black or Hispanic voters; voters of each age bracket — said yes, there should be witnesses. The poll was released minutes after the White House defense team concluded its defense of Trump, sending the trial to the next step, question-and-answer sessions set for Wednesday and Thursday. The question of whether the Senate will call witnesses would not be taken up before Friday.

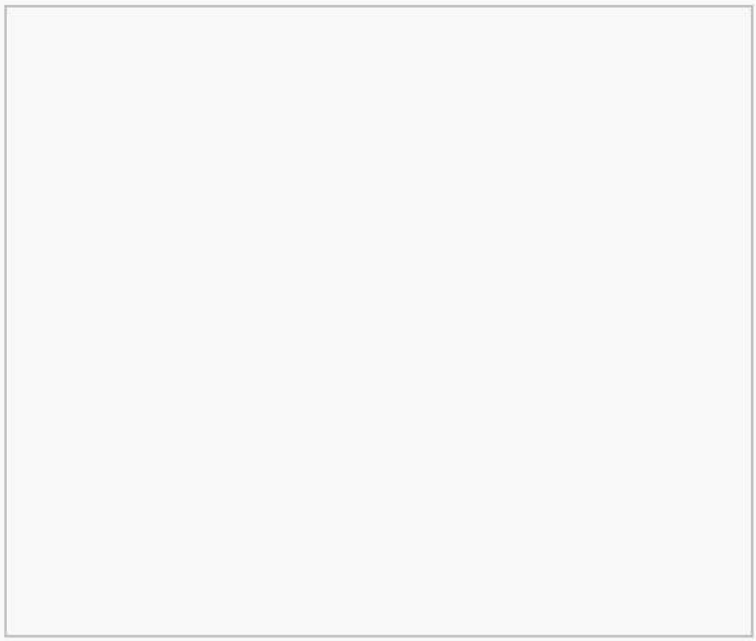
A large majority of Americans want witnesses in the Senate impeachment trial.

"Donald Trump and Lev Parnas discussed Scott in secret recording" via Steve Contorno of the Tampa Bay Times — The conversation was captured in an 83-minute video obtained by Reuters from **Parnas**' attorney **Joseph Bondy**. About halfway through the recording, Parnas mentioned he lived in Florida, prompting Trump to ask how Scott, then Florida's Governor, was faring in his U.S. Senate campaign. "Rick Scott's good," said Parnas, who was indicted in October on charges that he and his business partner, **Igor Fruman**, steered hundreds of thousands of dollars in illegal campaign contributions from foreign donors. Both are now key figures in Trump's impeachment proceedings. "Is he going to win?" Trump asks. Parnas responded: "It's going to be close, but I think we're going to pull it out."

"Marco Rubio and Rick Scott both use impeachment trial for political gain" via Alex Daugherty of the Miami Herald — As the President's defense team ended its opening arguments, **Rubio**'s campaign sent an email to supporters with the subject line "Take notes like Marco!" The email promises to send supporters who donate at least $35 a quill pen with the Senator's name on it. In contrast, Scott, who is also sending fundraising pitches related to the impeachment trial, has publicly defended the President and complained about arguments made by Democrats. He's even going on offense on Trump's behalf in Iowa, running a TV ad from Jan. 31 to Feb. 3 titled "Biden Got Away With It."

Former Donald Trump Chief of Staff John Kelly tells Sarasota crowd 'I believe John Bolton'" via Zac Anderson of the Sarasota Herald-Tribune — "If **John Bolton** says that in the book, I believe John Bolton," said retired Gen. **Kelly**, who served as Trump's chief of staff for 18 months. Kelly spoke at the Van Wezel Performing Arts Hall as part of the Ringling College Library Association Town Hall lecture series. The general worked with Bolton during his time as chief of staff, which ended in early 2019. Kelly said Bolton is an honest person. "Every single time I was with him ... he always gave the President the unvarnished truth," Kelly said of Bolton, who has become a figure of intense interest in the impeachment inquiry.

AMERICAN OVERSIGHT



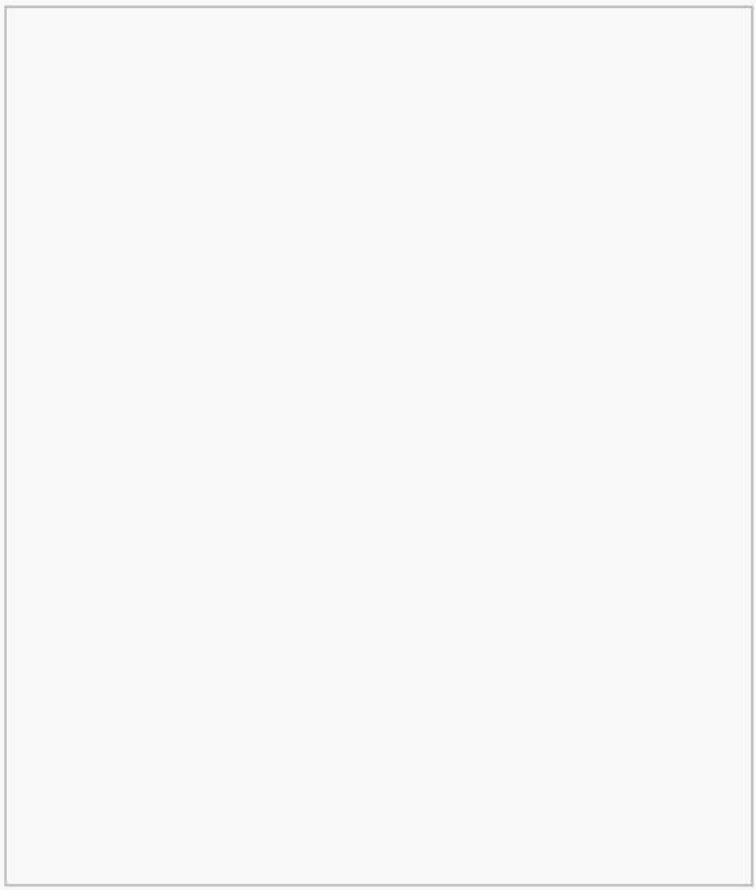
D.C. matters

"**Attorney Chris Kise to help Nicolás Maduro administration fight U.S. sanctions**" via Ryan Nicol of Florida Politics — **Kise**, the attorney who turned over key documents in the ethics case against former Tallahassee **Andrew Gillum**, is now representing a member of the Maduro government. Kise is listed on a Foreign Agents Registration Act (FARA) form to work on behalf of Venezuelan Attorney General **Reinaldo Muñoz Pedroza**, who was appointed Attorney General by Maduro. However, the United States no longer recognizes Maduro's government as legitimate. FARA requires individuals or firms doing work on behalf of a foreign principal to register with the U.S. government. Foley & Lardner, the law firm Kise works for, is listed as the registrant on the form received by the U.S. Department of Justice.

"**House Democrats unveil $4.7B Puerto Rico aid bill**" via Jennifer Scholtes of POLITICO Florida — While the House plans to pass the measure next week, the legislation is expected to wither thereafter, since the White House has already said Trump will not sign the aid package, **H.R. 5687 (116)**. A senior administration official has accused Democrats of proposing the bill "for completely political purposes." Text of the measure comes exactly one month from the start of the seismic sequence that cast thousands of Puerto Ricans into shelters. House Appropriations Chairwoman **Nita Lowey** said more support for Puerto Rico "is clearly needed," beyond the broader disaster aid bill the president signed last summer; new legislation provides "targeted assistance" to specifically help recover from the havoc wrought by the recent earthquakes.

"**Rick Wilson hits back at 'phony outrage' from 'MAGA herd'**" via Spectator USA — The fuss is about a widely shared clip from CNN's **Don Lemon** show, which pro-Trump Twitter has been having conniptions over. In the video, **Wilson**, Lemon, and **Wajahat Ali** laugh themselves silly while mocking the stupidity of Trump and the 'credulous boomer rubes' who support him. The backlash has been fierce. Wilson was unapologetic: "Once again, the MAGA tough guy 'fuck your feelings' crowd demonstrates that what really drives them is a grinding social anxiety fueled by a weaponized and monetized outrage machine." Wilson suggested what set the White House off was "Trump hates being called out for his utter ignorance of the world; all the phony outrage at me is just Trump fundraising grifters milking the MAGA herd."

Tweet, tweet:



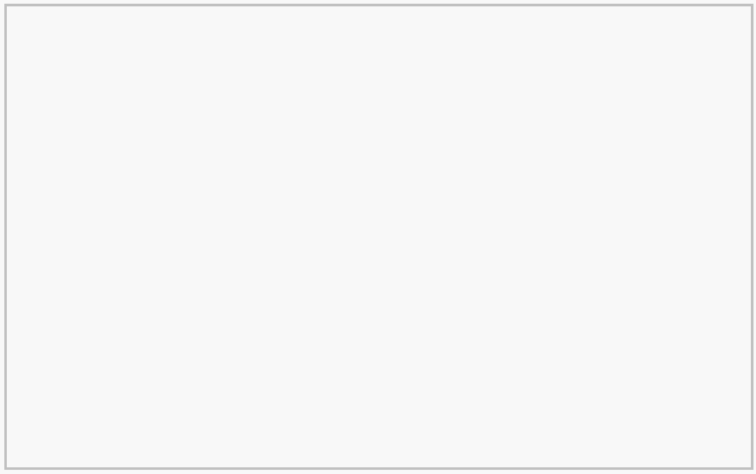
Assignment editors — Responding to Congressman **Ross Spano** voting against bipartisan legislation to bring down the costs of prescription drugs, a group of Floridians will deliver a giant bill to his office for the $26,547,383,200, which Florida residents pay for prescription drugs every year, 11 a.m., Spano's Brandon Office, 10101 Bloomingdale Ave., Suite 202, Riverview.

AMERICAN OVERSIGHT

The trail

"**'Keep Our Constitution Clean' edges closer to signature threshold**" via Drew Wilson of Florida Politics — A proposed ballot amendment that would make it harder for future constitutional amendments to pass has added nearly 70,000 petition signatures over the past week. Keep Our Constitution Clean, the political committee sponsoring the amendment, had 753,542 valid petition signatures as of Tuesday evening, according to the Florida Division of elections website. The current total is an increase of 67,513 signatures since Thursday and puts the proposal within striking distance of making the 2020 ballot. It takes 766,200 signatures to make the ballot, a number pegged to 8% of votes cast in the most recent presidential election. The committee must produce the remaining 12,658 signatures by Feb. 1 to go before voters in the November general election.

"**Ashley Moody hosting Florida GOP fundraiser at Universal Studios**" via Drew Wilson of Florida Politics — The invite lists Moody as the host for a "Universal Orlando Family Weekend" Feb. 21-23. It also lists RPOF as the beneficiary of the fundraiser. The invitation was merely a "save the date" and didn't offer further details on the weekend getaway, though it does provide contact information for potential attendees to get updates. Moody's fundraiser is one of the few scheduled for February, as lawmakers face a fundraising blackout during the Legislative Session. The prohibition doesn't apply to political parties. The fundraiser announcement also comes after RPOF posted healthy fundraising numbers for the fourth quarter of last year.



"**Putnam Schools Superintendent endorses Judson Sapp for CD 3**" via Drew Wilson of Florida Politics — Clay County Republican **Sapp** landed another endorsement for his bid to succeed retiring U.S. Rep.**Ted Yoho** in Florida's 3rd Congressional District. His latest backer is Putnam County Superintendent of Schools **Rick Surrency**, who weighed in on the crowded CD 3 Republican primary. "Judson Sapp is the common sense, conservative leader we need in Congress. He has deep roots in Putnam County and understands our needs. Judson Sapp will work with our local leaders to keep moving Putnam County in the right direction," Surrency said. Sapp, who primaried Yoho in 2018, was an early entrant in CD 3. However, the Republican field has ballooned in the weeks since Yoho announced he would forego a fifth term representing the North Central Florida district.

AMERICAN OVERSIGHT

Local

"Nate Monroe: The JEA storm" via the Florida Times-Union — The JEA board of directors, in one of its final acts, fired former chief executive officer **Aaron Zahn** for cause, agreeing with two dozen findings by city lawyers that he engaged in "willful misconduct," "gross negligence" and breached his fiduciary obligations to the city-owned utility, while adding there may be additional evidence and testimony of more troubling conduct attorneys didn't have time to investigate. It will take JEA years to repair the damage done. And it will take longer because too many executives who served under Zahn remain. They lent their credibility to Zahn's phony financial projections, and they served as mouthpieces for Zahn's public lies. There is more cleaning to be done.

Former JEA CEO Aaron Zahn made a mess that will take a long time to clean up.

"Full JEA board to leave by end of February" via the Florida Times-Union — The news from Mayor **Lenny Curry**'s office comes after months of discussion of possibly privatizing JEA. The board ended those talks and canceled the invitation to negotiate process with potential bidders in December after criticism mounted from the public and the City Council. Curry's statement read: "I've talked to **Fred Newbill**, **Camille Lee-Johnson**, **Dane Grey** and **Henry Brown** and each informed me it is their desire to end their service with the JEA Board of Directors. I have asked all board members, including **April Green,** who resigned earlier today, to continue to serve until the end of February, and all agreed. **Kelly Flanagan** will also continue her service until her term expires on February 28th.

"Hillsborough transit meeting goes off the rails during quarrel over contracts" via Caitlin Johnson of the Tampa Bay Times — Tempers flared between two board members as one of them — city of Tampa appointee **Kathleen Shanahan** — stood up and walked out after accusing county commissioner **Pat Kemp** of pushing her own agenda. The group was left unable to do business for lack of a quorum. "That's her whole point, was to not have the vote," Shanahan said. The dispute arose over a $405,000 contract during a board committee meeting, but it revealed deeper divisions over the agency's process for hiring outside vendors. The staff recommended awarding Connetics Transportation Group a two-year contract to evaluate bus routes and schedules and help the agency plan a long-term vision.

"Florida seeks to reinstate death penalty for Joseph Smith, Carlie Brucia's killer" via Carlos Munoz of the Sarasota Herald-Tribune — Prosecutors are seeking death again for **Smith**, one of Southwest Florida's most notorious convicted murderers, after the Florida Supreme Court ordered the trial court to reinstate another death row inmate's non-unanimous death-penalty verdict. **Carlie Brucia**'s father, **Joseph Brucia**, said he welcomed the motion to reinstate the death verdict of a "monster." "I don't think it should have been challenged in the first place," he said. "I am glad we are back on the road again so we can get some closure for this thing and let this monster get what he deserves." Brucia said he is aggravated that the latest court matters haven't been resolved promptly and wrote to former Florida Attorney General **Pam Bondi** and others.

"Scooter rental dispute goes to Supreme Court" via the News Service of Florida — A dispute about a Panama City Beach decision to ban the rental of motorized scooters has gone to the Florida Supreme Court. Classy Cycles, Inc. filed a notice that is a first step in asking the Supreme Court to take up the issue after a November ruling by the 1st District Court of Appeal upheld the ban. The appeals-court decision rejected arguments that Panama City Beach did not have the power to ban a business unless it is a legal nuisance and that such restrictions are "preempted" by state laws. The case stems from two ordinances passed in 2017 to prohibit the overnight rental of scooters and to completely prohibit scooter rentals effective Sept. 8, 2020.

AMERICAN OVERSIGHT

Opinions

"**The John Bolton report**" via The Wall Street Journal editorial board —Bolton's book draft implicates Trump more closely to ordering a delay in military aid to Ukraine is hardly a surprise and won't — and shouldn't — change the impeachment result. It does, however, complicate the trial task for Republican Senators, and our advice is for Trump's former national security adviser to tell the public now what he says in his book. Whoever leaked the book's contents wants to use Bolton to turn the Senate impeachment trial into a larger political drama. But we've known Bolton long enough to doubt that he'd want to sandbag Republican Senators or the President. He's a straight-shooter, even if he sometimes aims right between the eyes. The book's contents put GOP Senators in a tight political spot.

"**Joe Henderson: Pam Bondi's impeachment defense overlooked some facts**" via Florida Politics — There are a couple of overriding points here. A): Hunter Biden is a private citizen, not the President of the United States. Try as they might to show otherwise, Biden is not on trial. The Senate is deciding whether to remove Trump from office (spoiler alert: it won't happen). Whatever happens on that front has nothing to do with Biden. B): Threatening to withhold nearly $400 million in congressionally approved military aid to Ukraine until Trump got a public announcement of a corruption investigation against Biden sounds like an abuse of power to me. And former National Security Adviser Bolton and former Trump Chief of Staff Kelly appear to feel the same way. Those facts aren't going away.

"**Legislative raiding of affordable housing fund**" via the Citrus County Chronicle editorial board — Citrus County has a service economy, heavy on tourism, and service jobs are notoriously low-paying. Workers wanting a good life need a dependable job, affordable housing, and a convenient way to get to work. Lack of affordable housing affects economic development as well. Florida has had a great program since 1992 called the Sadowski Affordable Housing Trust Fund. The problem? Twelve times, legislators have raided Sadowski funds for various uses including to balance the state budget. And though we shouldn't have to make laws to ensure that legislators do the right thing, in the current session, SB 306 and HB 381 would essentially prohibit them from sweeping monies from the trust to the general fund.

"**Supreme Court becomes an outlier on the death penalty**" via the Tampa Bay Times editorial board — The Florida Supreme Court has taken another step backward with a ruling that could restore the state's status as a national outlier on the death penalty. In a stunning move, the court reversed a previous decision that required unanimous jury recommendations in death penalty sentences. The ruling defies legal precedent and common sense, and legislators should be wary of taking this bait and making a similar mistake. Looking to apply the U.S. Supreme Court decision, the Florida Supreme Court ruled in October 2016 that juries must establish each "aggravating factor" in a capital case, and that trial courts could impose a death sentence only on the unanimous recommendation of a jury.

"**John Johnson, Skip Braziel: Professional licensing is rigorous for a reason**" via Florida Politics — DeSantis said that changing the Sunshine State's occupational licensing laws will be at the top of his legislative agenda. These are laws that set the requirements to become and remain a member of various professions in our society. We ask Florida leaders to be mindful of potential unintended consequences for professions — and the professionals in them — that oversee systems vital to Floridians' safety, health, and financial interests. To that end, any conversation around licensing reform would be well-served to acknowledge that for some professions, rigorous licensing is not only desirable, but appropriate and necessary. Surely, the need to maintain rigorous licensing standards for certain professions is a common-sense idea on which all sides can agree in this important debate.

"**Extend and expand Gulf Reef Fish Survey to keep Florida fishing**" via Kellie Ralston for the Pensacola News Journal — The Survey's current funding is slated to end in 2020. Yet, the fishing community desperately needs this important data collection tool to not only continue but expand throughout Florida to ensure generations of fishing enthusiasts may continue to enjoy our state's natural resources for years to come. Without this funding, the recent, significant gains for Florida fisheries management risk a devastating step backward for our more than four million anglers. FWC is considering a 45-day 2020 Gulf Red Snapper season. A 45-day season that would have been unheard of just a few short years ago is now possible due to the thousands of Florida anglers participating in the Gulf Reef Fish Survey.

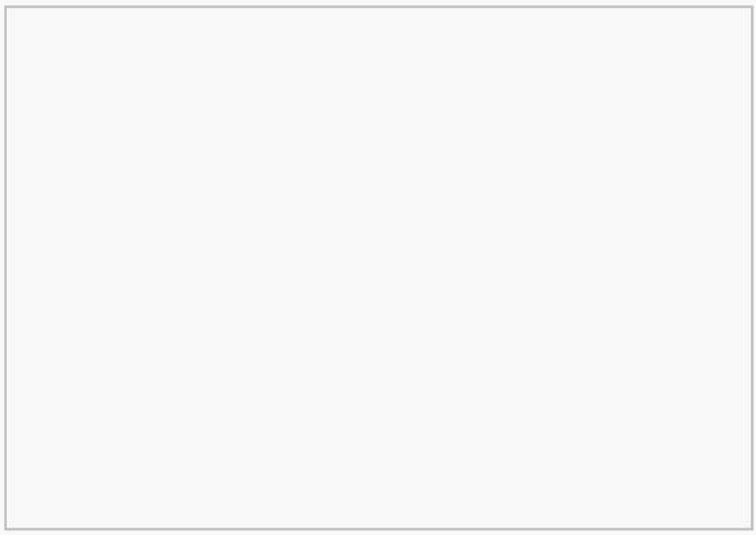
Movements

Carlos Curbelo joins political team for Miami's NBC affiliate — Curbelo signed on as an NBC contributor following his defeat in the 2018 contest for Florida's 26th Congressional District. Now, NBC 6 in Miami will showcase the former lawmaker in the lead-up to the 2020 election. "More than ever, our local news viewers want to know how the decisions made in Washington will impact their lives and communities," said **Jorge Carballo**, the station's president and General Manager. "Carlos' extensive knowledge in policymaking and deep familiarity with South Florida issues, makes him an ideal contributor to our political team." Curbelo added a statement of his own, saying, "It's an honor to bring my experience and knowledge as an analyst to the community I've lived in my entire life."



Carlos Curbelo has a new gig with NBC 6 Miami.

Ileana Ros-Lehtinen registers to represent UAE — Former U.S. Rep. **Ros-Lehtinen** registered as a foreign agent lobbying on behalf of the United Arab Emirates. Ros-Lehtinen served in Congress for decades before announcing she would not run for reelection in 2018. Since giving up her seat, the South Florida Republican has worked for Akin Gump Strauss Hauer & Feld. She became eligible to work as a lobbyist this month, which marks a year since she exited Congress. The disclosure says she will "provide outreach to U.S. government officials and counsel on policy issues related to a number of issues including, among others: export controls and sanctions, trade policies, human rights, U.S. foreign and defense policies, foreign media registration, and strengthening trilateral relations and regional security."

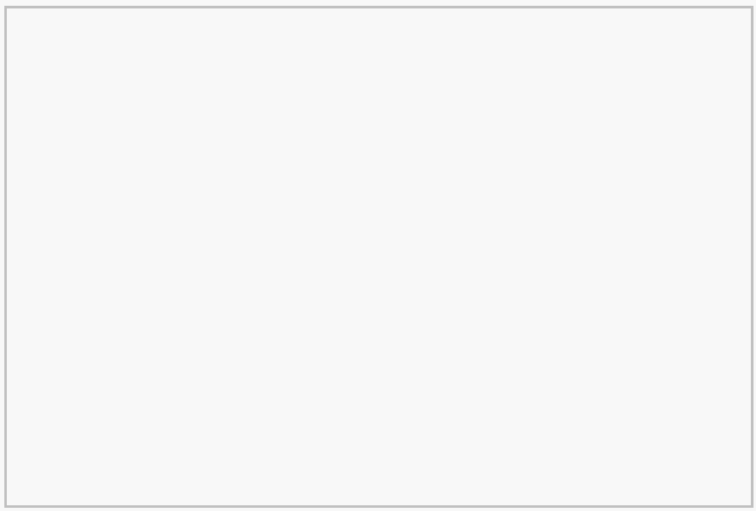
Aloe

"**Oreo is releasing a red, white, and blue 'Team USA' cookie**" via Tess Koman of Delish — Per the Instagram account @JunkFoodLeaks, "Olympics-themed Oreo sporting" cookies are on their way. The cookies — which will be stuffed with red, white, and blue crème, because of course they will — are going to taste just about the same as a regular Oreo, but they'll be oh so patriotic when you crack them open! The account goes on to describe the amount of crème we're talking about here. After all, these Oreos will *technically* be triple-stuffed: "The Olympic Oreos are standard and have as much crème/calories as a Mega Stuf Oreo, so nothing too groundbreaking." Another element of note, though? "Your tongue might change colors with this one." There you have it, folks: Cookies with fifty stars stamped into the crème will soon be on shelves wherever Oreos are sold ... probably.



Oreos get patriotic. Image via @JunkFoodLeaks.

Super Bowl'ing

"Rashad Fenton once worked concessions at Dolphins Stadium; Now he's in the Super Bowl via Manuel Madrid of the Miami New Times — The remarkable nature of his journey isn't lost on **Fenton**. He went from being a Carol City Chief to a Kansas City Chief, from selling concessions at Hard Rock Stadium (then Sun Life Stadium) to preparing to face the San Francisco 49ers this Sunday in Super Bowl LIV. "It's too surreal. I don't think I would've ever imagined it happening like this," Fenton tells New Times. "It's crazy because I'm still trying to get my head around it. I'm still trying to normalize everything."

Rashad Fenton took a winding road, from selling concessions at Dolphins Stadium to playing there in Super Bowl LIV.

"The most VIP Super Bowl weekend costs $1.5M, includes butler" via Kelli Kennedy of The Associated Press — No place caters to the rich and famous quite like glitzy Miami. The city's most luxurious hotels, clubs and restaurants are offering over-the-top packages to entice big spenders looking for action. One package includes a four-day cruise around the Caribbean on a private yacht after the game for $720,000. On Location Experiences' **Sam Soni** says their top Super Bowl package last year in Atlanta went for $17,500. This year's top-tier packages in Miami are $20,000 to $35,000 and include game tickets, a pregame party and show by **Darius Rucker** and a chance to mingle with football legends like **Dan Marino** and **Marcus Allen**. "We've seen just unprecedented sales for that product," Soni said.

"Locking up sex workers during Super Bowl week won't end sex trafficking" via Scott Greenberg of the South Florida Sun-Sentinel — Here's the problem: the empirical evidence shows no causal or correlative link between sex trafficking and the Super Bowl. It never has. As George Washington University criminology professor **Ron Weitzer** put it, "It's become a circle of stories that get rehashed; it really is a myth." The truth is that sex trafficking happens in the U.S. every day. The Super Bowl myth is a distraction. Raised annually by politicians and media, it does more harm than good, misleading the public, misallocating resources, and imposing unreasonable expectations on police. The harm is borne in large measure by sex workers. Sex traffickers go unpunished.

Happy birthday

Best wishes to **Umar Sattar.**

AMERICAN OVERSIGHT

Lawmakers are lacing up their walking shoes as Sen. **Lauren Book** and her Lauren's Kids Foundation prepare a multiday walk at the Capitol for child sexual abuse awareness.

That event intends to honor the 42 million survivors of child sexual abuse living in the U.S. Treadmills will be placed inside The Capitol where lawmakers, abuse survivors and others will take turns walking from noon Tuesday until noon Thursday.

Lauren's Kids, led by Sen. Lauren Book, will have treadmills set up in The Capitol. It's an extension of her annual Walk in My Shoes event. Image via Tallahassee Democrat.

Among the elected officials joining Book for the walk is Agriculture Commissioner **Nikki Fried**, Attorney General **Ashley Moody**, Sens. **Aaron Bean**, **Wilton Simpson**, **Annette Taddeo** and **Tom Wright**, and Rep. **Melony Bell**.

The Capitol walk is an extension of Lauren's Kids' annual "Walk in My Shoes" event, a multiday trek between Key West and Tallahassee.

During the 2019 Session, Book's foundation switched things up and used the Capitol to host the walk. Book says she chose Tallahassee for the walk due to its pivotal role in improving the lives of those affected by abuse.

"I've always found that this is a place where true change takes place," Book said.

"It's just become such a special piece for me in watching these survivors grow into becoming thriving individuals that does not allow this to define them."

During Regular Session, as in 2019, the event would be held in April for Sexual Assault Awareness Month. But with lawmakers meeting early due to the election year, Book's event got bumped up as well.

Several other groups also plan to walk on behalf of survivors. That includes police officers who have responded to abuse allegations, as well as trauma therapists walking one minute for each client they've seen over the year.

Book says she can still vividly remember the day she first disclosed her own abuse as a child.

"It was a bad time. It was a really difficult time."

Book started Lauren's Kids to help other abuse survivors get help and support. When the group launched its first Walk in My Shoes event, Book said she used it to "shed the bad" stemming from the trauma she experienced.

With more attention and support rallied for the issue, Book says attendees see it as something fully empowering.

"You can heal, you can survive, and you will thrive if you do the work," Book said.

"I wish that I had a model for that when I was growing up. It's remarkable when you see these kids. And I think there's this perception that 'we're broken, we're always going to be broken.' And that's not what they have. When I look at the kids today who come out and walk with us, they're proud. They're proud that they're creating a different identity, a different family, a different world for themselves."

The multiday event will stream at LaurensKids.org.

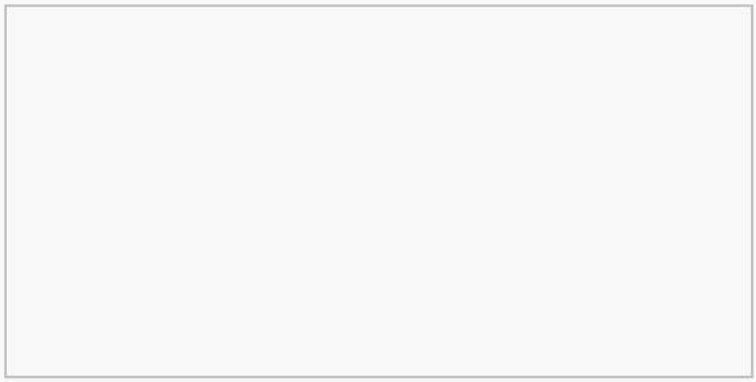
Today's Sunrise

On today's Sunrise:

— A Senate committee approves raising the legal age for vaping and smoking from 18 to 21, but as things became a bit complicated, the issue gets split into two separate bills.



— A House committee votes to shine a light on impact fees charged by local governments

— A proposal to punish doctors who perform gender selection surgery on minors is workshopped but does not get a vote. And that's about all it will get this Session.

— While Hurricane Dorian didn't do any real damage to Florida, customers of Duke Energy will be paying anyway. The PSC votes on a Dorian surcharge that will cost consumers about $170 million over the next year.

— And the story of Florida Man, who was charged with attempted murder after police identified him by DNA in his own sock.

To listen, **click on the image below**:

Situational awareness

—**@MarcoRubio**: If House votes to impeach, the Senate decides not just guilt or innocence, but also whether removal is in the nations best interest EVEN IF (not EVEN THOUGH) Article I could be proven, removal would not serve the nations best interest; Article II is a joke.

—**@DeFede**: I'm about an hour into the Cable network Caucus coverage, and I'm more convinced than ever this is the dumbest system imaginable. How can I say this nicely: F&@# Iowa.

—**@Cameron_Kasky**: I am at my first caucus ever, and the fact that this is how we do our politics is genuinely laughable. I had no idea how childish it was. Our democracy is an elementary school dodgeball game.

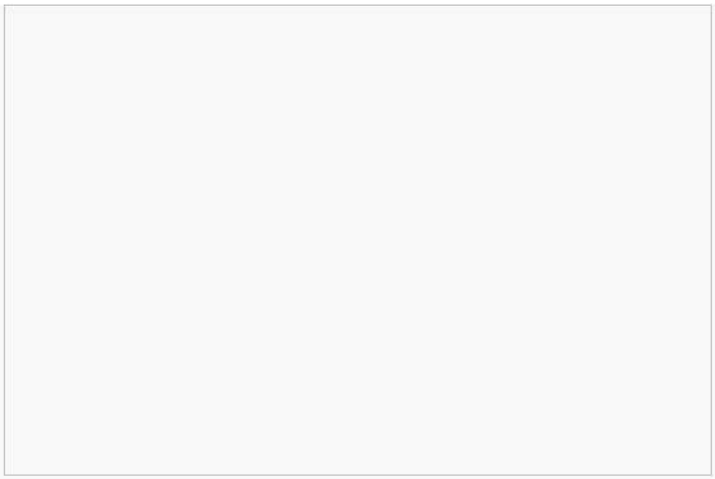
Top story



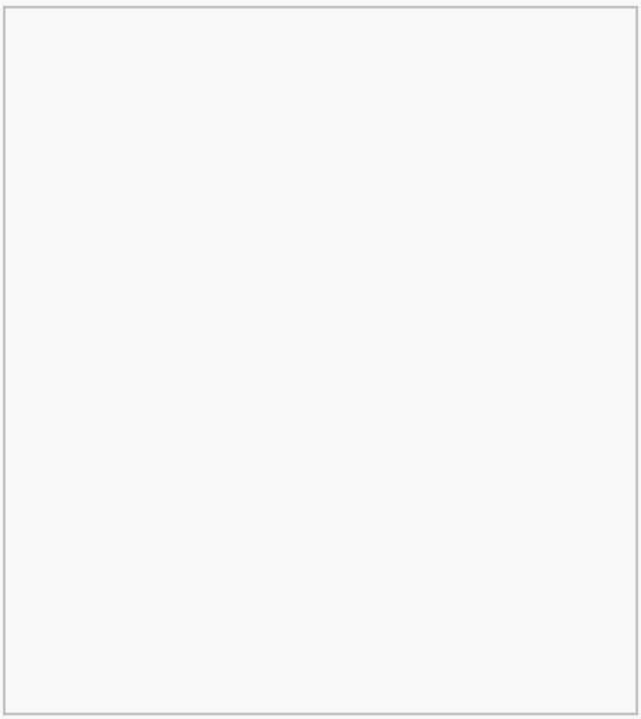
"**Democrats lay big caucus egg: No results from Iowa election**" via Steve Peoples and Thomas Beaumont of the Associated Press — Democratic party officials in Iowa worked furiously Tuesday to deliver the delayed results of their first-in-the-nation caucus, as frustrated presidential candidates claimed momentum and plowed ahead in their quest for the White House. Technology problems and reporting "inconsistencies" kept Iowa Democratic Party officials from releasing results from Monday's caucus, the much-hyped kickoff to the 2020 primary. It was an embarrassing twist after months of promoting the contest as a chance for Democrats to find some clarity in **a jumbled field with no clear front-runner**.

Instead, caucus day ended with no winner, no official results and many fresh questions about whether Iowa can retain its coveted "first" status.

State party officials said final results would be released later Tuesday and offered assurances that the problem was not a result of "a hack or an intrusion." Officials were conducting quality checks and verifying results, prioritizing the integrity of the results, the party said in a statement. The statement came after tens of thousands of **voters spent hours Monday night** sorting through a field of nearly a dozen candidates who had spent much of the previous year fighting to win the opening contest of the 2020 campaign and, ultimately, the opportunity to take on President Donald Trump this fall.

>>>Trump campaign reaction: "Democrats are stewing in a caucus mess of their own creation with the sloppiest train wreck in history. It would be natural for people to doubt the fairness of the process. And these are the people who want to run our entire health care system? Tonight President Trump posted a record performance in the well-run GOP Iowa caucuses with record turnout for an incumbent." — **Brad Parscale**, Trump 2020 campaign manager

AMERICAN OVERSIGHT



Local residents check-in after arriving at an Iowa Democratic caucus at a high school.

"**The 1,600 volunteers who were supposed to make the Iowa Caucuses run smoothly**" via Sydney Ember of the New York Times — As part of a set of reforms following the 2016 election, the Iowa Democratic Party introduced an app intended to make reporting numbers on caucus night easier. But there was a problem with the much ballyhooed innovation: Most people didn't use it. According to more than a dozen Iowa Democratic Party officials, county chairmen and volunteers involved in running precincts, many precinct leaders ignored the party's request that they download the app before caucus night or found the process of installing it too cumbersome. Instead, as they had always done, they planned to call their precinct results in. But some found it took hours for any of the dozens of people at party headquarters in Des Moines to pick up the phone to receive the results. What followed was an epic collapse of the rickety system Iowa has relied on for decades to tabulate the results of a largely analog electoral contest.

"**'It kind of failed us': With eyes of the world on Iowa, another hiccup in American democracy**" via Isaac-Stanley Becker of The Washington Post — Sean Bagniewski, chair of the Polk County Democratic Party, said that local officials were aware of problems with the app since last Thursday and that they had requested state officials resolve the problems — to no avail. "We knew the app was a problem last Thursday,' Bagniewski said. When local party officials asked the state party about issues they had with the app, they were referred to a 'dedicated staffer' who was not able to solve the problems, he said. "We had had so many complaints about the app that we started telling our chairs that if they were having problems with the app then you should call in the results,' Bagniewski said. The state party did not provide any training on how to use the app, he said, adding that while the caucus trainings are done at the county level, the app itself came from the state level."

Dateline: Tally

Happening today — Gov. **Ron DeSantis** and the Florida Cabinet will take up several matters, including proposals to purchase more than 5,700 acres in Sarasota County and 17 acres in Columbia County through the Florida Forever land conservation program, 9 a.m., Cabinet Meeting Room.

"**Liberal women's groups plan Capitol protest against parental consent for abortions**" via Ryan Nicol of Florida Politics — The National Women's Liberation group is helping to promote the protest. The group describes itself as "a multiracial feminist group for women who want to fight male supremacy and gain more freedom for women." The group lists abortion and birth control access among its top priorities. Planned Parenthood, Women's March Florida, Indivisible and other liberal group supporters are organizing the protest. The gathering is scheduled for 3 p.m. "The Florida Senate is voting on SB 404, the forced parental consent bill, and we need to act," National Women's Liberation wrote in a release. "We're doing everything we can to get supporters like you to help stop this bad bill and protect our access to abortion."

"**Tom Leek on stopping trial lawyer scare tactics**" via the Florida Chamber — On the latest edition of the Chamber's "Bottom Line," state Rep. **Leek** explains why it's important to put consumers ahead of billboard lawyers — particularly those that are deploying scare tactics aimed at seniors. Rep. Leek's legal advertising bill, CJS2, will be heard today in the Civil Justice Subcommittee. The Chamber is joining DeSantis and legislative leaders like Leek to take on billboard trial lawyers, which can cost the average family $4,442 each year in lawsuit abuse "taxes."

To view Leek on "Bottom Line," **click on the image below**:

Legislation

"**Bill that would restrict medical treatments for transgender youth lies dormant**" via Samantha Gross of the Miami Herald — After lively and emotional debate on both sides of the issue, a bill that would make it a felony for doctors to provide minors with hormone therapy or to perform sex reassignment surgery will likely not see its first hearing. The bill would have carried a maximum penalty of a $10,000 fine or 15 years in prison. The House Health Quality Subcommittee held a workshop filled with hours of testimony both for and against the bill. Chair **Colleen Burton**, announced at the end that it would be the last time the committee meets.

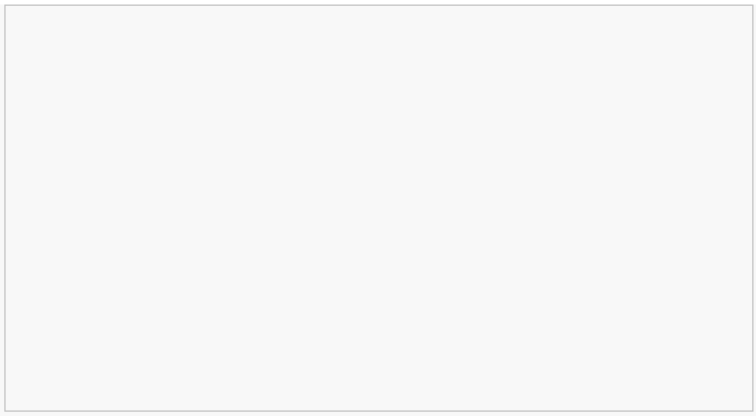
"**Is eight enough? Senate joins House in school board term limit debate**" via Jeffrey Solochek of the Tampa Bay Times — A push for school board term limits overcame a significant hurdle as a Florida Senate committee advanced legislation that would ask voters to force board members from office after eight consecutive years. What makes the Ethics and Elections Committee's party-line vote on SJR 1216 notable is sponsor Sen. **Joe Gruters**' agreement to scale back his proposed limit to eight years from the original 12 he sought. In the past two Legislative Sessions, the limits concept ran aground in the Senate, where members were more insistent on longer terms. "Eight years aligns with the current term limits in place," Gruters told the panel. "It would provide consistency among elected officials."

AMERICAN OVERSIGHT

Joe Gruters is looking to scale back his school board term limit bill to eight years from the original 12.

Affordable housing bill clears Senate committee— The Senate Community Affairs Committee voted 4-0 in favor of a bill that would allow large cities to remove impact fees for new affordable housing developments, POLITICO Florida reports. "My original draft was a little bit more aggressive and dealt with truly affordable and low income," bill sponsor Sen. **Jason Pizzo** said. "Unfortunately, the appetite over in the other House is not there right now — I'm told — for the lower-income folks." SB 856 initially aimed to slash property taxes for developers of low-income and workforce housing developments in larger counties.

"**St. Pete tried to abolish super PACs. Jeff Brandes wants to end that**," via Mary Ellen Klas of the Miami Herald — **Brandes** introduced the amendment to SB 1372, a bill he filed to update elections law sought by the Florida Association of Supervisors of Elections. But instead of limiting his bill to the supervisors' fixes, he used it to take aim at a 2017 ordinance passed by the St. Petersburg City Council that abolishes super PACs and prohibits spending by foreign-influenced corporations in city elections. The Brandes amendment, which received bipartisan support on a voice vote of the Senate Ethics and Elections Committee, would ban cities and counties from "adopting any limitation or restriction" on contributions to political committees or expenditures from political committees in city elections.



"**Legislature has plans to end tourist tax subsidies for professional sports team**" via James Call of the Tallahassee Democrat — Legislation filed this year (HB 1369) would repeal the Professional Sports Franchise Program created with the birth of the Miami Marlins — and which now has local governments on the hook for about another quarter-billion dollars in subsidies through 2038. Rep. **Cary Pigman** told the House Ways and Means Committee that it's time to have a robust discussion about these taxpayer-funded projects. They often don't deliver the return in economic development promised by the teams and leave the municipalities scrambling to pay for other government services, he said.

CST cut a heavy lift— A bill that would cap the communications services tax statewide is facing strong opposition, **Matt Dixon** of POLITICO Florida reports. SB 1174 would override local tax rates and set the maximum CST at 4%, down from the current cap of 5.1% by 2022. Local governments say the change would slash local government revenues by as much as $200 million. Though the measure was approved by its first committee Monday, bill sponsor Sen. **Travis Hutson** said its future is uncertain. Hutson said the cut might be included in a broader tax-cut package the House and Senate are negotiating.

"**Tighter restrictions on impact fees are one step closer to House passage**" via Janelle Irwin Taylor of Florida Politics — Impact fees are charged to developers and builders meant to cover costs associated with upgrading or increasing public facilities and infrastructure to accommodate population growth associated with the new development. The House Ways and Means Committee cleared the bill (HB 637). Under existing impact fee guidelines, counties, municipalities, or special districts can impose impact fees on new development using a calculation that assumes the need for additional facilities or infrastructure. The bill, sponsored by Pinellas County Republican Rep. **Nick DiCeglie**, would require local governments to calculate the fees using the most recent and localized data available within the previous 36 months, a requirement that does not currently exist.

"**Senators back stamping out smoking in parks**" via the News Service of Florida — A Senate committee approved a proposal that seeks to let local governments decide if they want to ban smoking at their public parks. The Innovation, Industry and Technology Committee backed the measure (SB 630), which would allow cities and counties to restrict smoking within the boundaries of parks further. Bill sponsor **Debbie Mayfield** said the proposal is intended to keep local parks "a healthy environment" for residents and children. "Additionally, cigarette butts are one of the most littered items in our parks, which becomes a hazard to our wildlife," Mayfield said.

AMERICAN OVERSIGHT

Debbie Mayfield wants to stamp out smoking from public parks.

"**Vaping pulled out of Tobacco 21 bill and put in new bill; both pass Senate panel** via Scott Powers of Florida Politics — The result is that the age increase for vaping now is included in SB 1394, new legislation filed to incorporate the vaping component, and is on a separate track from SB 810, which now only deals with increasing the age for smoking. But, along the way, SB 810's sponsor, Sen. **David Simmons**, found himself battling two challenges. First, bringing vaping under state regulation with any teeth would require a regulatory fee of $50, meaning the issue would have to be dealt with in a separate bill, one that eventually will require a two-thirds majority approval in both chambers of the Legislature. Simmons addressed that by stripping vaping out of SB 810 and putting it into SB 1394.

"**How size violence in black, Hispanic communities**" via the News Service of Florida — A House panel approved a proposal that would create a task force to investigate the root causes of violence in black and Hispanic communities in Florida. Bill sponsor **Shevrin Jones** said the 10-member task force would be similar to the Marjory Stoneman Douglas High School Public Safety Commission, which was created after the 2018 mass shooting in Parkland to improve school safety. But under Jones' proposal (HB 201), the task force would be charged with investigating systemic failures and causes of "high crime rates and gun violence incidents in urban core neighborhoods and communities."

"**Bills cracking down on shark finning, bear poaching advance in Senate**" via Scott Powers of Florida Politics — Despite some audience consternation about what the bill might do to the legal shark fishing trade in Florida, SB 680, banning the export and import and restricting the sales of shark fins won committee approval. At the same time, sponsor Sen. **Travis Hutson** promised to work with fishermen to find ways to protect legal shark fishing. He amended the bill to exempt licensed commercial fishers in Florida but made clear there still was more work to do to ease the legal fishing community's concerns. "Everybody has made it clear: it's not as simple as catch-and-release. There's a lot more going on here," Hutson said. SB 688, Sen. **Tom Wright**'s bill to tough penalties against bear poaching, faced no such resistance.

Today in Capitol

Realtor days — Nearly a thousand Florida Realtors are gathering in Tallahassee through Wednesday for the Great American Realtor Days (GARD) event, advocating for issues impacting homeowners, Realtors, and the real estate industry.

Happening today — Florida Home Builders Association Day on the Hill continues, 8 a.m., Hotel Duval, Autograph Collection, 415 N Monroe Street, Tallahassee.

Happening today — Walmart Day At the Capitol — Health and Wellness Fair, 8:30 a.m., 2nd floor Rotunda.

Assignment editors — Floridians, including first-generation refugees and their families, will hold a news conference celebrating the contribution of refugees and share their stories with state lawmakers as part of Florida Celebrates Refugee Day, 11 a.m., 4th-floor Rotunda.

Assignment editors — Last month, the House unanimously passed CS/HB 7011, which establishes a set of criteria implemented "to better protect student-athletes participating in athletics during hot weather and avoid preventable injury or death … " A group of outdoor construction and agriculture workers will hold a news conference with Sens. **Geraldine Thompson** and **José Javier Rodriguez** to ask lawmakers for similar protections, 11:30 a.m., Room 304C, Senate Press Room.

Happening today — The League of Women Voters of Florida will host a news conference on the 2020 U.S. Census and its consequences for the state, 11:30 a.m., steps of the Old Capitol.

Happening today — Sen. **Ben Albritton**, Rep. **Tina Polsky,** and a bipartisan group of lawmakers representing the area around Lake Okeechobee will join Mayors and local advocates for an announcement on water quality issues impacting Southwest and South Florida, noon, 4th-floor Rotunda.

AMERICAN OVERSIGHT

Happening today — Florida Keys Day, a reception highlighting the Florida Keys, 1 p.m., Capitol Courtyard.

Happening today — The Florida African American Ministers Alliance (FAAMA) is hosting a news conference to denounce attacks on the Florida Tax Credit Scholarship , 1:30 p.m. 4th-floor Rotunda.

The House Health Market Reform Subcommittee meets to consider HB 1163 from Rep.**Colleen Burton**, which seeks exemptions to the Certificate of Need regulatory process for specified intermediate care facilities for people with developmental disabilities, 8 a.m., Room 306, House Office Building.

The House Insurance & Banking Subcommittee meets to consider HB 771 from Rep.**Erin Grall**, which seeks to repeal the state's long-standing no-fault auto insurance system, 8 a.m., Room 404, House Office Building.

The House PreK-12 Innovation Subcommittee meets to consider HB 737 from Rep.**Kimberly Daniels**, which requires public schools to hold a daily moment of silence, 8 a.m., Reed Hall, House Office Building.

The House Justice Appropriations Subcommittee meets to consider HB 199 from Reps.**Tracie Davis** and **Scott Plakon**, which seeks to end the statute of limitations for child sex-abuse victims to bring about criminal cases against their abusers, 9 a.m., Morris Hall, House Office Building.

The House Workforce Development & Tourism Subcommittee meets to consider HB 1297 from Rep.**Will Robinson**, which seeks to make several changes to drug-free workplace programs, 9 a.m., Room 12, House Office Building.

The Senate Agriculture Committee and the House Agriculture & Natural Resources Subcommittee meet to consider SB 1876 and HB 1063 from Sen. **Bill Montford**, Reps. **Brad Drake** and **Ralph Massullo**, which seek to make changes in the state hemp program, Senate meeting at 9 a.m., Room 301, Senate Office Building. House meeting at noon, Room 12, House Office Building.

The Senate Commerce and Tourism Committee meets to consider SB 474 from Sen.**Ben Albritton**, which seeks to cut or eliminate regulations on a series of professions such as hair braiders, hair wrappers and interior designers, 9 a.m., Room 110, Senate Office Building.

The Senate Criminal Justice Committee meets to consider several bills, including SB 1018 from Sen.**Linda Stewart**, which seeks to boost criminal penalties for indecent exposure, 9 a.m., Room 37, Senate Office Building.

The Senate Health Policy Committee meets to consider the confirmation of the Department of Health Secretary **Scott Rivkees**, who is also serving as state surgeon general, 9 a.m., Room 412, Knott Building.

The House Higher Education Appropriations Subcommittee meets to consider PCB HEA 20-01, which seeks to restrict sponsorship of athletic facilities at state colleges and universities, 10 a.m., Room 212, Knott Building.

The House Business & Professions Subcommittee meets to consider HB 363 from Rep.**Sam Killebrew**, which seeks to end "rent-to-own" pet leasing arrangements for dogs and cats, noon, Room 212, Knott Building.

The House Government Operations & Technology Appropriations Subcommittee meets to consider HB 1011 from Reps. **Jason Fischer** and **Mike La Rosa**, which seeks to preempt cities and counties from regulating vacation rental properties, noon, Morris Hall, House Office Building.

The House Health Care Appropriations Subcommittee meets to consider HB 6031 from Rep.**Cary Pigman**, which seeks to remove the $1 million lifetime coverage limit for children enrolled in the Florida Healthy Kids program, noon, Room 404 House Office Building.

The House Transportation & Infrastructure Subcommittee meets to consider HB 6083 from Reps.**Ana Maria Rodriguez** and **Blaise Ingoglia**, which seeks to revoke state authorization of red-light cameras, noon, Reed Hall, House Office Building.

The Senate Banking and Insurance Committee meets to consider SB 924 from Sen.Brandes, which seeks to make it harder to file "bad faith" claims against insurance companies, 12:30 p.m., Room 412, Knott Building.

The Senate Children, Families and Elder Affairs Committee meets to consider SB 152, also from Brandes, which seeks to add "dental therapists" as an additional type of health care provider, 12:30 p.m., Room 301 Senate Building.

The Senate Judiciary Committee meets to consider SB 1354 from Brandes, which seeks to make changes to the statewide voter registration application process as well as address the eligibility of felons to vote, 12:30 p.m., Room 110, Senate Office Building.

The Senate is scheduled for a floor session to consider SB 404 from Sen.**Kelli Stargel**, which seeks to

AMERICAN OVERSIGHT

require parental consent before minors can have abortions, 3 p.m. Senate Chamber.

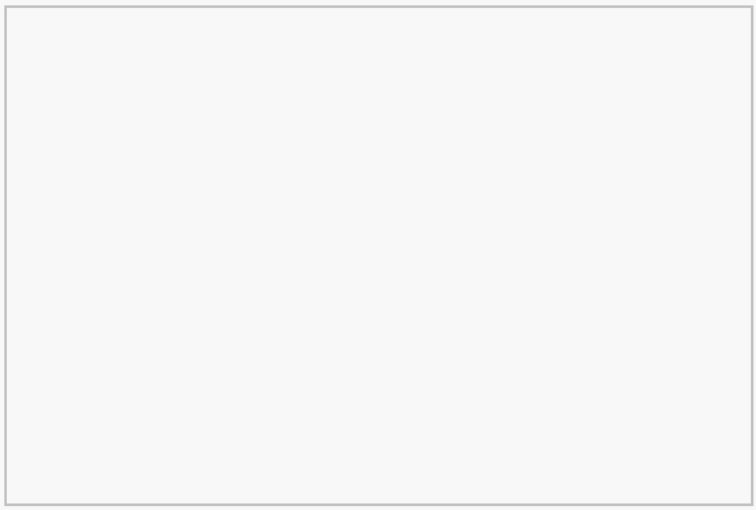
The House Children, Families & Seniors Subcommittee meets to consider HB 835 from Reps.**Matt Willhite** and Plakon, which seeks to increase the state's efforts to address Alzheimer's disease and dementia-related disorders, as well as create the post of dementia director in the Department of Elder Affairs, 3:30 p.m., Room 12, House Office Building.

The House Civil Justice Subcommittee meets to consider HB 319 from Rep.**Clay Yarborough**, which seeks to develop a "Florida Guide to a Healthy Marriage," to be posted on court clerks' websites and possibly as printed copies distributed to marriage-license applicants, 3:30 p.m., Room 404, House Office Building.

The House Oversight, Transparency & Public Management Subcommittee meets to consider HJR 1325, a constitutional amendment from Rep. **Vance Aloupis**, which seeks to end the public campaign-financing system available to statewide political candidates, 3:30 p.m., Morris Hall, House Office Building.

The House PreK-12 Appropriations Subcommittee meets to consider HB 23 from Reps.**Dan Daley** and **Mike Gottlieb**, which seeks to mandate public schools to have panic alarms for emergencies, 3:30 p.m., Reed Hall, House Office Building.

Happening today — The 2020 Senate Reunion celebrates the legacy of former lawmakers and their collective service to the state of Florida, 3:45 p.m., Senate Chamber.



Gov. Club buffet

New England clam chowder; mixed garden salad with dressings; Caesar salad with grilled chicken; tomato, cucumber, red onion, and feta salad; deli board, lettuce, tomatoes, cheeses, and breads; Ronnie's fried chicken; Nana's meatloaf with mushroom sauce; grilled salmon with lemon piccata sauce; buttermilk mashed potatoes; braised collard greens; corn and okra; peach cobbler for dessert.

AMERICAN OVERSIGHT

"**Florida's new judges 'all think the same,' Ron DeSantis' top lawyer says**" via Lawrence Mower of the Tampa Bay Times — DeSantis appointed 56 judges during his first year in office, more than half of them women and nearly 40% of them minorities. But they're identical in one respect: They all share the same strict judicial philosophy, said DeSantis' general counsel, **Joe Jacquot**. This commonality was revealed when the judges recently attended the Florida Judicial College program, a course required of all new judges, Jacquot said during a Federalist Society convention in Orlando. "I heard back from several of them who talked about the diversity in the room," Jacquot recounted. "But they said, 'We all think the same.' So that's great." Jacquot's comments provided a rare behind-the-scenes glimpse at how the governor chooses his jurists.

Joe Jacquot, Gov. Ron DeSantis' general counsel, gives a glimpse into the judicial nominating process.

"**Marco Rubio criticizes banks for halting voucher contributions, says they're seeking 'wokeness points'**" via Annie Martin of the Orlando Sentinel — U.S. Sen.**Rubio** criticized Fifth Third and Wells Fargo banks in a statement on Monday, saying the companies were seeking "'wokeness' points from the radical left" after they halted contributions to Florida's most extensive voucher program unless the state prohibits private schools that receive the money from discriminating against LGBTQ students. The banks' decision came after the Orlando Sentinel reported Jan. 23 that more than $105 million from the Florida Tax Credit Scholarship Program, which pays for low-income children to attend private schools, went to campuses with anti-LGBTQ policies last year. The program is funded by companies that receive dollar-for-dollar tax write-offs for their contributions.

"**A change in Florida's rules of court just made work life easier for women**" via Michael Molina Florida Phoenix — The new rule creates a presumption that attorneys arguing lawsuits are entitled to continuances — that is, procedural delays — to accommodate parental leave when they give birth or adopt. "This rule will remove an obstacle to anyone who wants to be both an engaged parent and a successful litigator," **Kimberly Hosley** of The Orlando Law Group, president-elect of the nonpartisan Florida Association of Women Lawyers, told the Florida Phoenix. "As studies show, women are not given the opportunity to be lead trial counsel at the same rate as men. Some think that is because of the fear that their lead counsel could potentially be unavailable at the time of trial due to childbirth or maternity leave," Hosley said.

"**Florida to debut high school civics test**" via Jeffrey Solochek of the Tampa Bay Times — In a memo to school district superintendents, K-12 Chancellor **Jacob Oliva** announced that the test would be available in the spring for schools to pilot on a voluntary basis. "Pilot exam results will not affect graduation requirements or school accountability," Oliva wrote. "The department will report on which districts and schools participate in the pilot, and on student participation and pass rates." Although not required at this point, the department is encouraging students taking U.S. government or economics courses to take the test. The department would provide the exam to the districts and allow them to offer it either via computer or paper. The test would take 100 minutes and could be spread over two sessions.

AMERICAN OVERSIGHT

Water fight

A group of scientists, academics, local businesses, green industry professionals, and local leaders concerned about protecting the state's water quality have joined together to launch Floridians for Water Quality Protection, a coalition set up to fight and advocate for water and waterways.

Floridians for Water Quality Protection will focus on the current assortment of local fertilizer ordinances — several of them conflicting — which they say is among the main reasons Florida is still struggling with water quality problems.

A new coalition is trying to make sense out of fertilizer regulations to protect Florida waterways.

As evidence of the continuing failure of local ordinances to impact these issues, the group points out the 2018 increase in algae blooms and red tides.

"The State of Florida essentially has 410 cities with their own rules and regulations or nothing at all when it comes to local fertilizer ordinances," said director of agronomy of Massey Services **Eric Brown**, Ph.D. in a statement. "This has essentially created a conflicting — and sometimes very confusing — patchwork of local fertilizer ordinances that are not based on science and are doing more harm than good when it comes to our water quality."

Others argue that local ordinances often go against proven science and independent, third-party data, as well as Florida statute.

"In many places, the county may have completely different rules than what's in the city or vice versa, revealing the abject failure of local control to meaningfully address this issue, however well-intended," said **Mac Carraway**, executive director of the Environmental Research and Education Foundation, Inc. "These ordinances simply ignore the established peer-reviewed findings that healthy lawns and landscapes contribute little if anything to runoff."

For more information on Floridians for Water Quality Protection, visit **ProtectFlaWater.com**, follow **@ProtectFlaWater** and like **FB.com/ProtectFlaWater**.

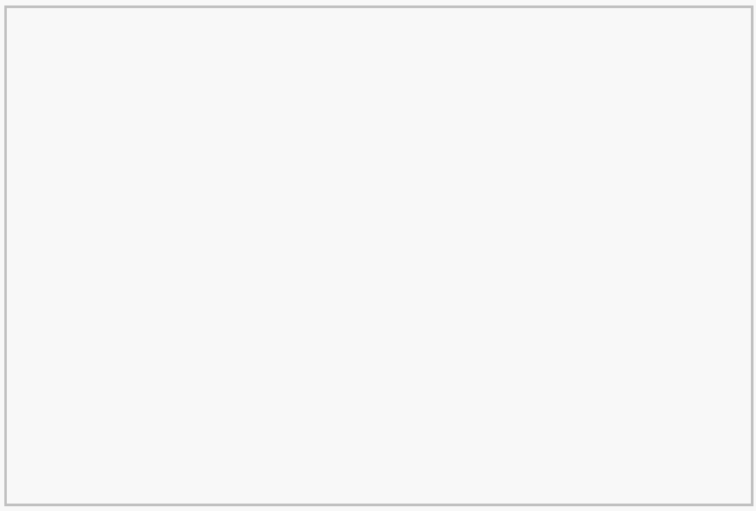
AMERICAN OVERSIGHT

Happening today — The Florida Public Service Commission meets to consider a proposal allowing Duke Energy Florida to collect $171.3 million from customers to cover costs related to Hurricane Dorian, 9:30 a.m., Betty Easley Conference Center, 4075 Esplanade Way, Tallahassee.

"**Agriculture Commissioner fires, takes consultants tied to sugar farmers off Lake O panel**" via Tyler Treadway of TC Palm — The department had a $35,000 contract calling for firm President Thomas K. MacVicar and two employees, William Baker and Lennart "Len" Lindahl, to help with "monitoring, understanding and influencing the water-related issues important to agriculture in South Florida." ... Fried terminated the contract "because it's at her discretion to do so," spokesman Franco Ripple told TCPalm in an email. "It's great news that Commissioner Fried has listened to Floridians who are sick and tired of business as usual and finally decided to do the right thing," U.S. Rep. Brian Mast, who has called for both lower lake levels and firing MacVicar, said in an email.

"**Water management district backs Everglades deal**" via the News Service of Florida — The South Florida Water Management District has approved a plan to buy about 20,000 acres in the Everglades, a deal that would block exploratory oil drilling on part of the property. The district's Board of Governors on Saturday approved purchasing the land from Kanter Real Estate LLC. DeSantis last month announced the proposed acquisition, after years of litigation about potential oil drilling on part of the Kanter property in Broward County. The state Department of Environmental Protection obtained an option to buy the 20,000 and wanted to assign the option to the water management district, according to an agenda for Saturday's meeting.

At the time, Bartlett said he needed to discuss an unrelated project — the Everglades Agricultural Area Reservoir — before he could send the request to the Corps. Rodrigues isn't buying it. "What is disappointing is that on November 14, 2019, the South Florida Water Management District (SFWMD) discussed the LOWRP. At the meeting's end, you were asked by SFWMD Board Chairman Chauncey Goss if you understood their direction to write the letter. In response, you responded 'absolutely," the Estero Republican wrote in a letter dated Jan. 29.



Drew Bartlett is coming under fire for his perceived lack of effectiveness as SFWMD Executive Director.

"**Current Florida panther roadkill pace would double state record**" via Chad Gillis of the Fort Myers News-Press — Drivers are on pace to kill 72 Florida panthers this year after six road kills were recorded in January. That would more than double the current record of 34 vehicle deaths set in 2016. But scientists and panther advocates say that's unlikely to happen. Road kills often occur in bursts, and weeks can pass between road kills when the pace is slower. "The data shows we don't keep this pace per month," said Florida Fish and Wildlife Conservation Commission panther biologist **Dave Onorato**. "We kind of go through these spurts, and then we go through some dry spells."

"**1,400 pounds of shark fins found by wildlife inspectors in Miami**" via NBC 6 South Florida — Wildlife inspectors found dried shark fins in Miami worth upward of $1 million. The 18 boxes of fins were found at a port in Miami on a shipment believed to have originated in South America and that was likely headed to Asia, U.S. Fish and Wildlife Service officials said. The commercial value of the seized shipment is believed to be between $700,000 and $1 million, officials said.

AMERICAN OVERSIGHT

"**Bernie Sanders won the race for Democratic donors in 2019**" via Kevin Schaul, Anu Narayanswamy, Reuben Fischer-Baum and Michelle Ye Hee Lee of The Washington Post — **Sanders** had 1.4 million donors from across the country. Sanders, who is surging in the polls as Iowa's caucuses open, entered 2020 with at least $18 million — more than any of his Democratic rivals who are not self-funded billionaires. Democratic candidates tended to draw the most donor support from their home states, but the U.S. Senator built a sprawling donor base from coast to coast. Sanders's donor base spiked in the final quarter of 2019, when he garnered hundreds of thousands of new donors — a remarkable political revival for the candidate, who had a slow summer and whose heart attack in October raised doubts about how long he would remain in the race.

Bernie Sanders is the big money winner for 2019.

"**Sanders once likened poor whites to Blacks under apartheid**" via Marc Caputo and Laura Barrón-López of POLITICO — At a 1986 public forum, Sanders said poor Vermonters "are the equivalent of blacks in South Africa. They don't vote; they aren't involved, they don't care about the issues," according to the Bennington Banner in Vermont. Sanders amended his statement after one observer on stage commented about his "pretty fiery oratory." "Obviously, the analogy is not true," Sanders then responded, "because in South Africa, the blacks are not invisible — they are beginning to stand up." At the time of his remarks, Vermont's population was about 99 percent white and about 0.2 percent black.

"**Michael Bloomberg campaign launches anti-gun violence bus tour in Orlando, opens first Florida field office**" via Steven Lemongello of the Orlando Sentinel — On a night when other presidential campaigns were out in force across a cold and wintry Iowa, volunteers and organizers for the **Bloomberg** presidential campaign put the finishing touches on its first field office in Florida, complete with a bus ready to roll out on a multistate tour centered on ending gun violence. Field organizer **Dan Larson** drilled the last screws into the "Mike Bloomberg" sign at the entrance to the former City Arts building on S. Orange Ave. Bloomberg, the financial billionaire and former New York City Mayor, had skipped the contentious Iowa Democratic caucuses and early primary states for a risky but potentially delegate-rich strategy of focusing on the larger states voting in March, including Florida.

First in Sunburn — Former state Rep. Robert Asencio switches endorsement from Joe Biden to Bloomberg — Following the Iowa Caucuses and the release of Democratic candidateBloomberg's plan to support Puerto Rico, **Asencio** is changing his endorsement from **Biden** to support Bloomberg. "While many leaders offer empty words and meaningless rhetoric, Mike Bloomberg is offering a substantive plan that would ensure long term security for Puerto Rico," Asencio said. "As a Puerto Rican, I knew after seeing his plan that he was the best choice to be the next President. Given his record on Puerto Rico, I trust he will take the action we need to improve life for my friends and family on the Island." Last week, Bloomberg laid out a plan to invest in infrastructure and revitalization of Puerto Rico, while also endorsing statehood.

AMERICAN OVERSIGHT

SOTU

Several members of Florida's congressional delegation have announced the guests they are bringing to the State of the Union tonight. Many of them are bringing people connected to the causes they support or issues they care about. Here's a round of those who have announced who they're bringing.

Republican U.S. Sen. **Marco Rubio** is bringing prominent Uyghur human rights activist **Rushan Abbas** and Lt. Gov. **Jeanette Núñez** as his guests.

Democratic U.S. Rep. **Stephanie Murphy** is bringing high school student **Mimi (Xiaoyi) Chen** of Longwood. Chen won a State of the Union essay contest earlier this month.

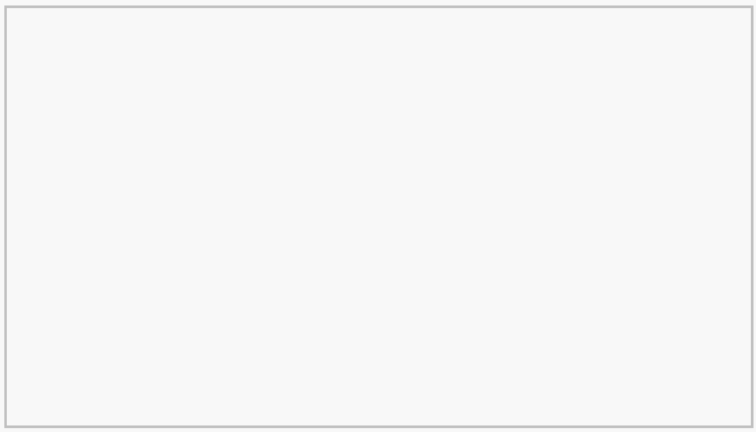
Democratic U.S. Rep. **Val Demings** is Orlando Commissioner **Bakari Burns** as her guest. He is the CEO of a community health center.

Democratic U.S. Rep. **Darren Soto** is bringing Puerto Rican native **Jessica Carrillo**. She and her mother relocated to Florida in the aftermath of Hurricane Maria.

Democratic U.S. Rep. **Charlie Crist** of St. Petersburg is bringing 18-year-old **Taylor McKenny**, a Type 1 diabetic and activist.

Democratic U.S. Rep. **Ted Deutch** is bringing **Alan T. Brown**. Brown has quadriplegia and has dedicated his life to improving the lives of people living with paralysis.

Democratic U.S. Rep. **Lois Frankel** is bringing **Annette Mayer**, a South Floridian who works at a local independent pharmacy.



Democratic Rep. **Debbie Wasserman Schultz** is bringing Cooper City high school student **Emily Kaufman.** Kaufman has Type 1 diabetes.

Democratic U.S. Rep. **Debbie Mucarsel-Powell** is bringing 16-year-old student researcher and scientific diver in-training from Key West, **Marsella Munoz**.

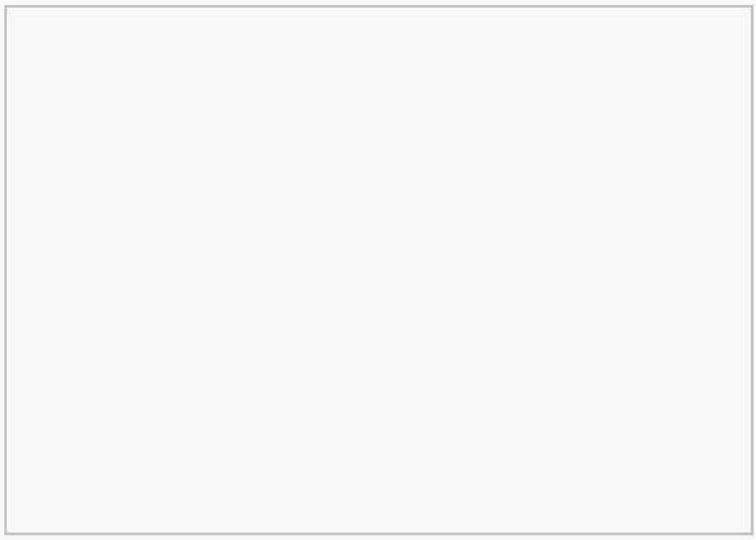
Peachy

"Donald Trump trial closing arguments aim at voters, history" via Lisa Mascaro and Eric Tucker of The Associated Press — Closing arguments Monday in **Trump**'s impeachment trial were directed more toward history than to sway the outcome, one final chance to influence public opinion and set the record ahead of his expected acquittal in the Republican-led Senate. The House Democratic prosecutors drew on the Founding Fathers and common sense to urge senators — and Americans — to see that Trump's actions are not isolated. Still, a pattern of behavior that, left unchecked, will allow him to "cheat"' in the 2020 election. The President's defense countered the Democrats have been out to impeach Trump since the start of his presidency, nothing short of an effort to undo the 2016 election and to try to shape the next one, as early primary voting begins Monday in Iowa.



Adam Schiff closes the Donald Trump impeachment trial by attempting to put it in a historical context.

D.C. matters

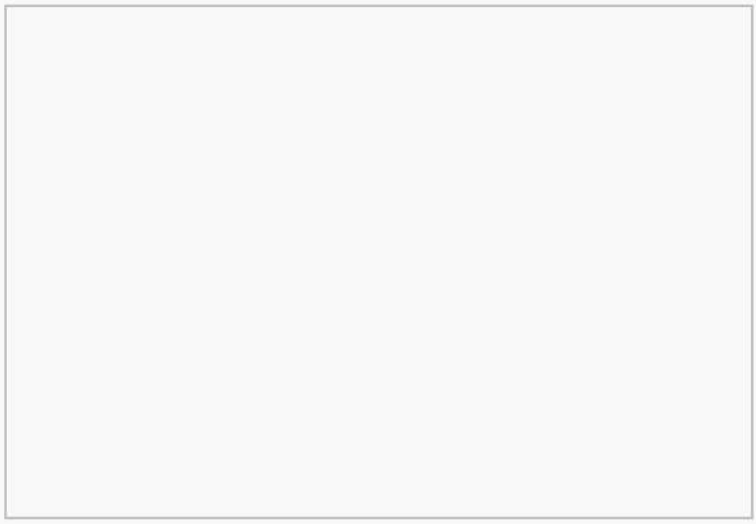
"**Trump and Nancy Pelosi haven't spoken in months**" via Manu Raju of CNN — According to a**Pelosi** spokesman, the two had not spoken since the October 16 meeting in which Trump insulted Pelosi, including calling her a "third-grade politician," before she and other top Democrats walked out and later accused Trump of having a "meltdown." That meeting was supposed to be about Syria. The lack of communication comes amid Trump's impeachment proceedings but is all the more remarkable given the number of high-profile events that have impacted the U.S. during that time, including the killing of top Iranian commander **Qasem Soleimani** and ISIS leader **Abu Bakr al-Baghdadi**. Trump said he would likely have a difficult time working with Democrats after his expected acquittal vote.

Donald Trump and Nancy Pelosi haven't spoken in months.

"**Ex-U. S. Rep. Corrine Brown continues appeal of fraud conviction, prison time**" via Steve Patterson of the Florida Times-Union — Former U.S. Rep. **Brown** is taking the appeal of her fraud conviction a step beyond the panel that upheld her conviction last month. A lawyer for the 12-term Democratic congresswoman, now serving a five-year prison sentence, asked last week to challenge her conviction in front of the entire 21-judge 11th U.S. Circuit Court of Appeals. A three-judge panel rejected the appeal last month, but attorney **William Mallory Kent** argued that decision conflicted with precedents and that "consideration by the full court is necessary to secure and maintain uniformity of decisions." Kent had argued Brown deserved a new trial because U.S. District Judge **Timothy Corrigan** removed a juror who said the "Holy Spirit" had told him Brown was innocent.

The trail

Happening today — The Florida Supreme Court will hear arguments on two proposed constitutional amendments, seeking to allow recreational marijuana and prevent possession of assault-style weapons, 9 a.m., Florida Supreme Court, 500 South Duval St., Tallahassee.



First in Sunburn — Navy veteran Todd Chase enters CD 3 race— Chase, a Navy veteran and conservative business leader, is now the latest Republican to enter the race for Florida's 3rd Congressional District, currently held by **Ted Yoho**. To announce his candidacy, Chase released a 90-second campaign launch video, "The Pilot." "As a local leader, I fought, oftentimes alone, to remind other leaders who they work for," said Chase, who holds a Harvard MBA. "I'm running for Congress to bring conservative values, backed by real-world experience, to Washington where politicians spend too much time attacking each other instead of attacking the challenges that stand between us and our future." A Jacksonville University graduate, Chase had previously served as the "lone conservative" on the Gainesville City Commission.

To view Chase's campaign launch video, **click on the image below**:

AMERICAN OVERSIGHT

"Darren Soto enters 2020 with $290K in campaign coffer" via Scott Powers of Florida Politics — Democratic Rep. Soto's campaign picked up $155,500 during the fourth quarter of 2019 and entered the election year with $290,848 in cash to support his reelection bid in Florida's 9th Congressional District. Soto is seeking a third term in the district representing southern Osceola County, south Orange County, and eastern Polk County. He posted modest campaign fundraising for an incumbent but remained comfortably well-endowed compared to any of his challengers. In the fourth quarter, his campaign cashed political action committee checks totaling $105,500 and checks from individual supporters for another $50,030. That put him at $498,203 raised with $290,808 left in the bank.

"Turning Point USA founder Charlie Kirk endorses Anna Paulina Luna in CD 13 contest" via Janelle Irwin Taylor of Florida Politics — **Kirk**, founder and president of the pro-Trump Turning Point USA and chair of Students for Trump, is endorsing **Luna** for Congress. Luna is running in the Republican primary in hopes of taking out Democratic incumbent Crist. "Anna is a true fighter for our country! We need more like her! Check out her run for Congress, critical to help patriots like her," Kirk wrote in an announcement. Turning Point USA is a far-right conservative nonprofit that seeks to increase conservative engagement among high school and college students and actively rallies against what the group sees as an influx of liberalism in academic settings and an erosion of freethinking principles.

Charlie Kirk makes an endorsement in CD 13.

"Greg Steube closes 2019 with $187K on hand for reelection campaign" via Jacob Ogles of Florida Politics — Throughout the year, he raised $332,268 in new contributions. But that wasn't the only fundraising tied to **Steube** that took place last year. Political committee activity showed he might be interested in extending his influence beyond Florida's 17th Congressional District. The Greg Steube Victory Fund, a committee separate from the Congressman's campaign, also raised $22,700 in 2019. By year's end, all that money went either to Steube's campaign ($12,400), to 9Seven Consulting ($500), or to the Getting Republicans Elected for Generations PAC ($9,800). GREG PAC spent money on 9Seven and services from **Alex Blair**, Steube's campaign manager. Consider it a sign the Sarasota pol wants groundwork laid to help elect other Republicans to the House.

"Perry Thurston endorses Shevrin Jones in SD 35 contest" via Ryan Nicol of Florida Politics —**Jones** is one of five Democrats competing in the left-leaning district. Serial candidate **Josue Larose** has also filed as a Republican. **Thurston**'s support is another signal that state Democrats are getting behind Jones' candidacy. Term-limited Sen. **Oscar Braynon**, who currently holds the SD 35 seat, already backed Jones to serve as his successor. Last month, Jones also courted an endorsement from U.S. Rep. **Debbie Wasserman Schultz** of Florida's 23rd Congressional District.**Andrew Gillum**'s political committee, Forward Florida, is supporting Jones as well. "As both a colleague representing Broward County and a

AMERICAN OVERSIGHT

friend, I've known Shevrin for many years and have seen his fierce commitment to the people of South Florida firsthand," Thurston said.

"**Attorney: Mar-a-Lago checkpoint crasher is mentally ill**" via Terry Spencer of The Associated Press — The Connecticut opera singer who drew gunfire when she smashed an SUV through security checkpoints outside Trump's Florida home is mentally ill and wasn't taking her medication before leading a trooper on a wild chase, her attorney told a judge Monday. Attorney **David Roth** did not elaborate on **Hannah Roemhild**'s illness, but Palm Beach County Judge **Ted Booras** agreed to have her seen by a psychologist before holding another hearing. Roemhild, 30, will remain jailed without bail on charges that include aggravated assault on a law enforcement officer from last Friday's chase through Palm Beach and past security outside Trump's Mar-a-Lago resort and home. Roemhild refused to appear in court.

Lawyers for Hannah Roemhild, who is accused of driving through checkpoints outside Donald Trump's Florida home Mar-a-Lago, say she is mentally ill.

"**al-Qaida in Yemen claims responsibility for NAS Pensacola shooting**" via Samy Magdy of The Associated Press — al-Qaida's branch in Yemen claimed responsibility Sunday for last year's deadly shooting at the Naval Air Station Pensacola by an aviation student from Saudi Arabia. The shooter, 2nd Lt. Mohammed **Saeed Alshamrani**, was a member of the Saudi Air Force in training at the base. He opened fire inside a classroom at the base on Dec. 6, killing three people and wounding two sheriff's deputies before one of the deputies killed him. Eight others were also hurt. al-Qaida in the Arabian Peninsula, or AQAP, released a video claiming the attack. SITE Intelligence Group, which tracks messaging by militant groups, reported the claim.

"**Osceola sheriff's letter said Aramis Ayala hindered Nicole Montalvo case. 'Blatant lies,' she says**" via Monivette Cordeiro and Cristóbal Reyes of the Orlando Sentinel — Sheriff **Russ Gibson** accused Orange-Osceola State Attorney **Ayala** of hindering the investigation into **Montalvo**'s killing by directing her staff not to assist detectives in obtaining evidence from the suspects' phones or testimony from a key witness — a claim Ayala called "complete blatant lies." In a letter to DeSantis, the Osceola sheriff alleged "inaction" by Ayala's office was due to Ayala's "desire to advance her position against the death penalty" and asked for her removal from the case. Two days after Gibson's letter, DeSantis reassigned the case to Ocala-based State Attorney **Brad King**. Ayala vehemently denied Gibson's accusations. "Unfortunately, the attorney general and the governor based their perspective and decision on whatever action needed to be taken on lies."

"**From $1 to $1,500: Cost of alleged nepotism just went up for former Midway Mayor Wanda Range**" via Jeff Schweers of the Tallahassee Democrat — The Florida Commission on Ethics took a rare step in changing an administrative law judge's recommended $1 fine in favor of $1,500 against a former Midway Mayor who voted to appoint her first cousin to step into her role whenever she couldn't perform her duties. If the purpose of a fine is "to deter future disobedience of the law," the commission ruled in its final decision, made public last week, then "the issuance of a merely nominal penalty … is not reasonable." The decision wraps up an ethics case that began with complaints filed by residents of Midway against their former Mayor, Range, in 2017 and 2018.

"**Six big Tampa Bay projects racing to be ready for Super Bowl 55**" via Richard Danielson of the Tampa Bay Times — St. Petersburg Pier, the new $92 million Pier and its 26-acre redeveloped site are projected to make their debut in the spring; JW Marriott, 510 Water St., Tampa; Midtown Tampa, the $550 million project about two miles south of Raymond James Stadium has been 20 years in the making; Haya Hotel, the $52 million Hotel Haya in Ybor City is projected to open this spring; Museum of the American Arts and Crafts Movement, the opening date for the ambitious five-story, 137,000-square-foot Museum it is currently projected to be early this spring; Hyatt House/Hyatt Place hotels, southeast corner of N Florida Avenue and E Kennedy Boulevard, Tampa, is projected for the first quarter of 2021.

AMERICAN OVERSIGHT

Top Opinion

"**The moment is now for LGBTQ equality in Florida schools and everyday life**" via the Orlando Sentinel editorial board — House Bill 45 revises the eligibility requirements for a private school to get state voucher money. If only Florida's other problems were this simple to remedy. Like, say, convincing Florida's legislative leaders that it's finally time to end state-sanctioned discrimination. State Rep. **Jennifer Sullivan**, who heads the House Education Committee, is quite fine with discrimination against gay kids, saying if parents don't like it, they can find another school. "Not every school is going to be the best fit for every student. That's one of the great things about a choice program: that a parent has that opportunity to go to multiple schools and see what culture is going to best benefit that student." Got that? Discrimination = culture.

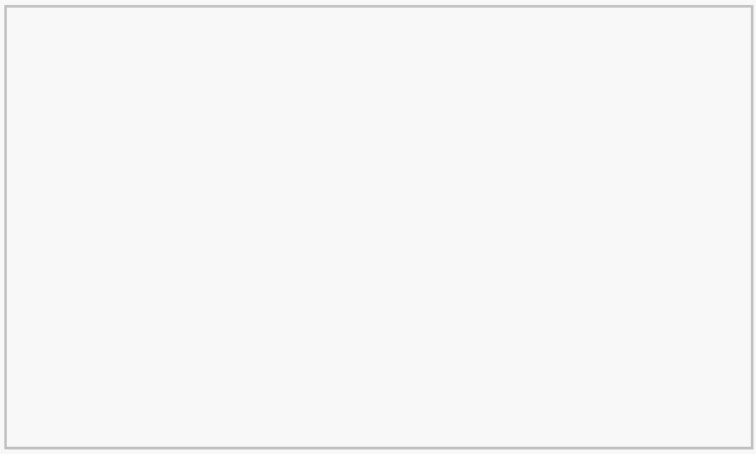
Opinions

"**After witness vote, a Senate only Caligula could love**" via John Micek of Florida Phoenix — The next time someone tells you that the U.S. Senate is the world's greatest deliberative body, your answer should be no longer than two words: Marco Rubio. "Just because actions meet a standard of impeachment does not mean it is in the best interest of the country to remove a President from office," Rubio wrote in a post before the Senate voted along party lines to reject calling witnesses. Or you can answer "**Lamar Alexander**." Alexander agreed Trump "did something inappropriate, but I don't agree he did anything akin to treason, bribery, high crimes and misdemeanors. I think there's a big gap there." The world's greatest deliberative body? Hardly. It's a Senate that only a Roman emperor could love.

"**Lamar Alexander's finest hour**" via The Wall Street Journal editorial board — The Tennessee Republican listened to the evidence and arguments from both sides, and then he offered his sensible judgment: Even if Trump did what House managers charge, it still isn't enough to remove a President from office. This isn't an abdication. It's a wise judgment based on what Trump did and the rushed, partisan nature of the House impeachment. Alexander's statement made two other crucial points. The first concerns the damage that partisan removal of Trump would do to the country. "Our founding documents provide for duly elected presidents who serve with 'the consent of the governed,' not at the pleasure of the United States Congress. Let the people decide."

"**The death of growth management in Florida — a sequel**" via the Orlando Sentinel editorial board — This year's proposal, backed by state House Rep. **James Grant**, is ostensibly related to guarding private property rights, which are protected by the U.S. Constitution's Fifth Amendment. It says the government can take someone's property for a public purpose, but the property owner must receive "just compensation." Florida law goes further. Even if the government doesn't actually take possession of someone's property, the owner might be entitled to some compensation if a government regulation or ordinance unfairly restricts the property's use. Under Grant's bill, if there's a settlement, or if the property owner wins, "similarly situated" property owners would be able to get in on the action. No one is quite sure what "similarly situated" means.

"**Permanent alimony needs to come to an end**" via Alex Andrade for the Pensacola News Journal — I'm proud to sponsor legislation in the 2020 Session seeking to reform Florida's outdated alimony system. This reform is designed to accomplish several goals. First, lifetime alimony must be eliminated. Lifetime alimony has created a culture of dependency; one ex-spouse can rely on another for monthly support until death. In 2020, our laws should focus on encouraging long-term self-sufficiency. Second, our legislation creates clearer guidelines for alimony rulings, allowing for parties to anticipate their outcomes without the need to undergo drawn-out alimony battles in court. Third, we establish an absolute right to retire for alimony payors. These reforms, among others, aim to let ex-spouses move on and no longer remain connected to a failed marriage.



Movements

"**Senate panel approves Eric Silagy, others for State University System Board of Governors**" via Ryan Nicol of Florida Politics — The Senate Education Committee signed off on a series of executive appointments, including a move to place Florida Power & Light (FPL) President and CEO **Eric Silagy** on the State University System (SUS) Board of Governors. The Committee reviewed four DeSantis appointments to that board at a Monday afternoon hearing. The panel also approved the appointments for **Brian Lamb**, **Steven M. Scott** and **Kent Stermon**. Those approvals were unanimous. The members' respective terms will end on Jan. 6, 2026. Monday's stop was their first. The Senate Ethics and Elections Committee is also slated to review the appointments before they go up for a vote by the full Senate.

"FSU alum, Chiefs player celebrates Super Bowl win by paying off dog adoption fees" via Curt Weller of the Tallahassee Democrat — **Derrick Nnadi** is a former Florida State defensive tackle who started for Kansas City as the Chiefs rallied to beat the San Francisco 49ers 31-20 in Super Bowl LIV in Miami Gardens. Along with former FSU offensive lineman **Cameron Erving**, they are the 38th and 39th FSU alumni in program history to win a Super Bowl. Within hours of winning it all, Nnadi made the most of the moment. In the wake of the win, he announced that he's paying the adoption fees for all the dogs currently living at KC Pet Project. Nnadi had been helping KCPP find homes for homeless animals all season through his Derrick Nnadi Foundation, but this commitment takes his pledge to another level.

FSU alum, Chiefs player Derrick Nnadi, celebrates his Super Bowl win by paying adoption fees for shelter dogs.

"Super Bowl MVP Patrick Mahomes joined by Make-A-Wish recipient at Disney World Parade" via Benjamin VanHoose of People — **Mahomes** is feeling the Disney magic. On Monday — just hours after he led the Kansas City Chiefs to a win over the San Fransisco 49ers at the Super Bowl — the quarterback, 24, made the trip to Walt Disney World to take part in an extravagant parade. According to a Disney Parks Blog news release, 10-year-old **Nathaniel** of Austin, Texas, got to take part in the parade with the NFL star, as 17 other Make-A-Wish children were also along to visit the Magic Kingdom. Disney Parks donated $1 million to Make-A-Wish as part of the celebration. The Disney Parks Blog announced the victory trip on Instagram, showing highlights from the big game with "When You Wish Upon a Star" from the 1940 Disney film Pinocchio playing over it.

"The Kaiseki Chef's Table experience at Epcot's Takumi-Tei is Disney's hottest new foodie splurge" via Amy Drew Thompson of the Orlando Sentinel — Purple flowers, red tomato, golden bee pollen studded with black sesame, all piled atop a lush, green nest of frisée dressed with leek. Alongside, a petite carapace — tamagogani — nestles as if hiding in seaweed washed up on the sandy beach beneath. The hefty treasure of snow crab leg, its naked meat an alluring stalk few could finesse from the shell sat at the center. A tiny claw crowned the dish; in its pincer, a radiant pink scroll of housemade tsukemono — watermelon radish — its color entirely natural. It was apt that my opportunity to sample the delicately beautiful dishes and drinks at Disney's Takumi-Tei fell amid the Epcot International Festival of the Arts, as this serene, sophisticated space is nothing if not artful.

Happy birthday

How could we forget to wish the incredible**Katie Webb** of Colodny Fass a happy birthday? She's a Golden Rotunda winner and one of the top lobbyists in the industry. Our sincere apologies. Celebrating today are **Dan Barrow** of Veterans Florida, **Dan Berger**, former Sen. **Dwight Bullard**, and **Joel Greenberg**.

AMERICAN OVERSIGHT

Lawmakers are lacing up their walking shoes as Sen. **Lauren Book** and her Lauren's Kids Foundation prepare a multiday walk at the Capitol for child sexual abuse awareness.

That event intends to honor the 42 million survivors of child sexual abuse living in the U.S. Treadmills will be placed inside The Capitol where lawmakers, abuse survivors and others will take turns walking from noon Tuesday until noon Thursday.

Lauren's Kids, led by Sen. Lauren Book, will have treadmills set up in The Capitol. It's an extension of her annual Walk in My Shoes event. Image via Tallahassee Democrat.

Among the elected officials joining Book for the walk is Agriculture Commissioner **Nikki Fried**, Attorney General **Ashley Moody**, Sens. **Aaron Bean**, **Wilton Simpson**, **Annette Taddeo** and **Tom Wright**, and Rep. **Melony Bell**.

The Capitol walk is an extension of Lauren's Kids' annual "Walk in My Shoes" event, a multiday trek between Key West and Tallahassee.

During the 2019 Session, Book's foundation switched things up and used the Capitol to host the walk. Book says she chose Tallahassee for the walk due to its pivotal role in improving the lives of those affected by abuse.

"I've always found that this is a place where true change takes place," Book said.

"It's just become such a special piece for me in watching these survivors grow into becoming thriving individuals that does not allow this to define them."

During Regular Session, as in 2019, the event would be held in April for Sexual Assault Awareness Month. But with lawmakers meeting early due to the election year, Book's event got bumped up as well.

Several other groups also plan to walk on behalf of survivors. That includes police officers who have responded to abuse allegations, as well as trauma therapists walking one minute for each client they've seen over the year.

Book says she can still vividly remember the day she first disclosed her own abuse as a child.

"It was a bad time. It was a really difficult time."

Book started Lauren's Kids to help other abuse survivors get help and support. When the group launched its first Walk in My Shoes event, Book said she used it to "shed the bad" stemming from the trauma she experienced.

With more attention and support rallied for the issue, Book says attendees see it as something fully empowering.

"You can heal, you can survive, and you will thrive if you do the work," Book said.

"I wish that I had a model for that when I was growing up. It's remarkable when you see these kids. And I think there's this perception that 'we're broken, we're always going to be broken.' And that's not what they have. When I look at the kids today who come out and walk with us, they're proud. They're proud that they're creating a different identity, a different family, a different world for themselves."

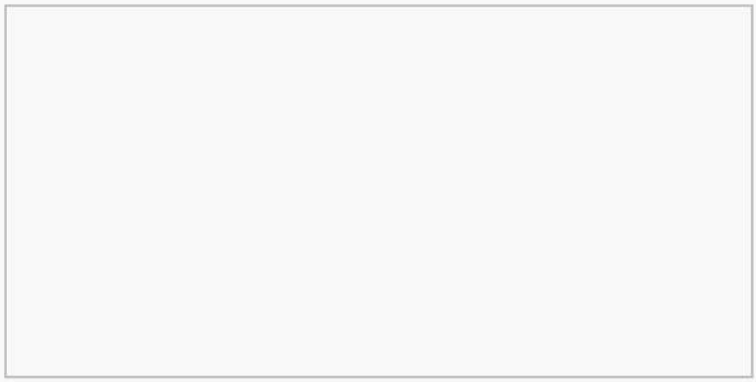
The multiday event will stream at LaurensKids.org.

AMERICAN OVERSIGHT

Today's Sunrise

On today's Sunrise:

— A Senate committee approves raising the legal age for vaping and smoking from 18 to 21, but as things became a bit complicated, the issue gets split into two separate bills.



— A House committee votes to shine a light on impact fees charged by local governments

— A proposal to punish doctors who perform gender selection surgery on minors is workshopped but does not get a vote. And that's about all it will get this Session.

— While Hurricane Dorian didn't do any real damage to Florida, customers of Duke Energy will be paying anyway. The PSC votes on a Dorian surcharge that will cost consumers about $170 million over the next year.

— And the story of Florida Man, who was charged with attempted murder after police identified him by DNA in his own sock.

To listen, **click on the image below**:

Situational awareness

—**@MarcoRubio**: If House votes to impeach, the Senate decides not just guilt or innocence, but also whether removal is in the nations best interest EVEN IF (not EVEN THOUGH) Article I could be proven, removal would not serve the nations best interest; Article II is a joke.

—**@DeFede**: I'm about an hour into the Cable network Caucus coverage, and I'm more convinced than ever this is the dumbest system imaginable. How can I say this nicely: F&@# Iowa.

—**@Cameron_Kasky**: I am at my first caucus ever, and the fact that this is how we do our politics is genuinely laughable. I had no idea how childish it was. Our democracy is an elementary school dodgeball game.

Tweet, tweet:

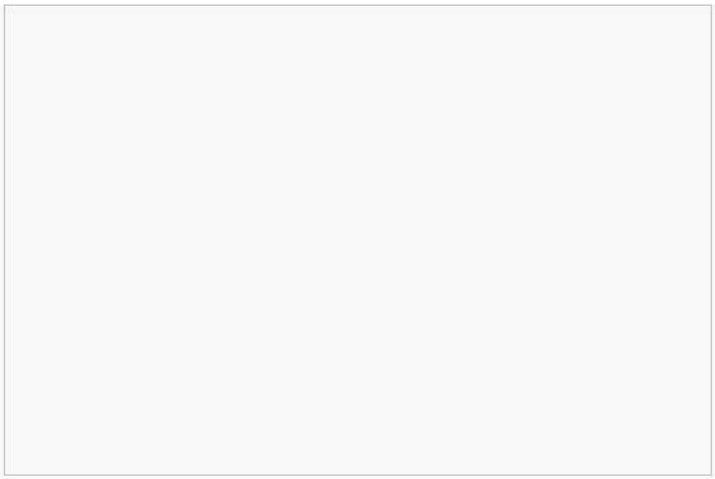
Top story



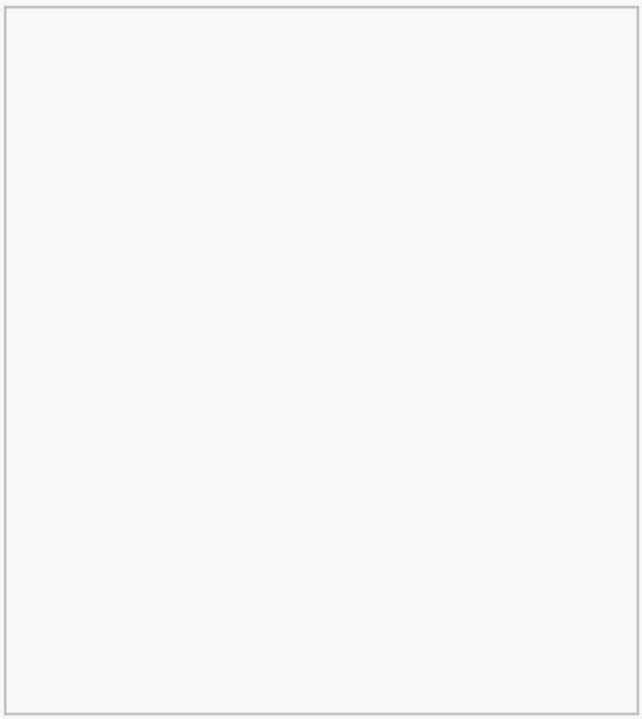
"**Democrats lay big caucus egg: No results from Iowa election**" via Steve Peoples and Thomas Beaumont of the Associated Press — Democratic party officials in Iowa worked furiously Tuesday to deliver the delayed results of their first-in-the-nation caucus, as frustrated presidential candidates claimed momentum and plowed ahead in their quest for the White House. Technology problems and reporting "inconsistencies" kept Iowa Democratic Party officials from releasing results from Monday's caucus, the much-hyped kickoff to the 2020 primary. It was an embarrassing twist after months of promoting the contest as a chance for Democrats to find some clarity in **a jumbled field with no clear front-runner**.

Instead, caucus day ended with no winner, no official results and many fresh questions about whether Iowa can retain its coveted "first" status.

State party officials said final results would be released later Tuesday and offered assurances that the problem was not a result of "a hack or an intrusion." Officials were conducting quality checks and verifying results, prioritizing the integrity of the results, the party said in a statement. The statement came after tens of thousands of **voters spent hours Monday night** sorting through a field of nearly a dozen candidates who had spent much of the previous year fighting to win the opening contest of the 2020 campaign and, ultimately, the opportunity to take on President Donald Trump this fall.

>>>Trump campaign reaction: "Democrats are stewing in a caucus mess of their own creation with the sloppiest train wreck in history. It would be natural for people to doubt the fairness of the process. And these are the people who want to run our entire health care system? Tonight President Trump posted a record performance in the well-run GOP Iowa caucuses with record turnout for an incumbent." — **Brad Parscale**, Trump 2020 campaign manager

AMERICAN OVERSIGHT



Local residents check-in after arriving at an Iowa Democratic caucus at a high school.

"**The 1,600 volunteers who were supposed to make the Iowa Caucuses run smoothly**" via Sydney Ember of the New York Times — As part of a set of reforms following the 2016 election, the Iowa Democratic Party introduced an app intended to make reporting numbers on caucus night easier. But there was a problem with the much ballyhooed innovation: Most people didn't use it. According to more than a dozen Iowa Democratic Party officials, county chairmen and volunteers involved in running precincts, many precinct leaders ignored the party's request that they download the app before caucus night or found the process of installing it too cumbersome. Instead, as they had always done, they planned to call their precinct results in. But some found it took hours for any of the dozens of people at party headquarters in Des Moines to pick up the phone to receive the results. What followed was an epic collapse of the rickety system Iowa has relied on for decades to tabulate the results of a largely analog electoral contest.

"**'It kind of failed us': With eyes of the world on Iowa, another hiccup in American democracy**" via Isaac-Stanley Becker of The Washington Post — Sean Bagniewski, chair of the Polk County Democratic Party, said that local officials were aware of problems with the app since last Thursday and that they had requested state officials resolve the problems — to no avail. "We knew the app was a problem last Thursday,' Bagniewski said. When local party officials asked the state party about issues they had with the app, they were referred to a 'dedicated staffer' who was not able to solve the problems, he said. "We had had so many complaints about the app that we started telling our chairs that if they were having problems with the app then you should call in the results,' Bagniewski said. The state party did not provide any training on how to use the app, he said, adding that while the caucus trainings are done at the county level, the app itself came from the state level."

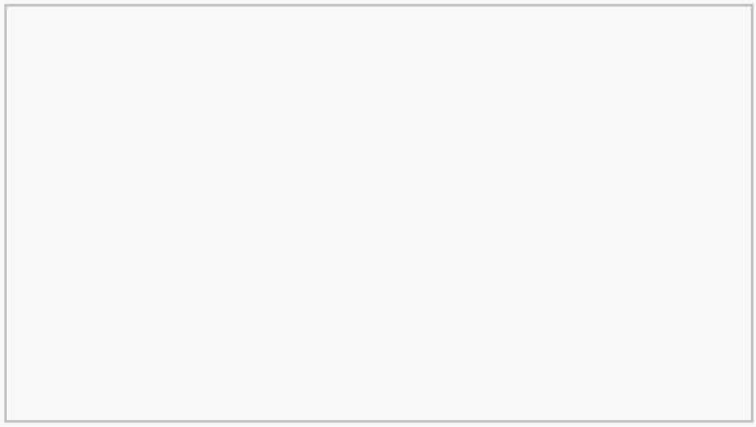
AMERICAN OVERSIGHT



Dateline: Tally

Happening today — Gov. **Ron DeSantis** and the Florida Cabinet will take up several matters, including proposals to purchase more than 5,700 acres in Sarasota County and 17 acres in Columbia County through the Florida Forever land conservation program, 9 a.m., Cabinet Meeting Room.

"**Liberal women's groups plan Capitol protest against parental consent for abortions**" via Ryan Nicol of Florida Politics — The National Women's Liberation group is helping to promote the protest. The group describes itself as "a multiracial feminist group for women who want to fight male supremacy and gain more freedom for women." The group lists abortion and birth control access among its top priorities. Planned Parenthood, Women's March Florida, Indivisible and other liberal group supporters are organizing the protest. The gathering is scheduled for 3 p.m. "The Florida Senate is voting on SB 404, the forced parental consent bill, and we need to act," National Women's Liberation wrote in a release. "We're doing everything we can to get supporters like you to help stop this bad bill and protect our access to abortion."

"**Tom Leek on stopping trial lawyer scare tactics**" via the Florida Chamber — On the latest edition of the Chamber's "Bottom Line," state Rep. **Leek** explains why it's important to put consumers ahead of billboard lawyers — particularly those that are deploying scare tactics aimed at seniors. Rep. Leek's legal advertising bill, CJS2, will be heard today in the Civil Justice Subcommittee. The Chamber is joining DeSantis and legislative leaders like Leek to take on billboard trial lawyers, which can cost the average family $4,442 each year in lawsuit abuse "taxes."

To view Leek on "Bottom Line," **click on the image below**:

Legislation

"**Bill that would restrict medical treatments for transgender youth lies dormant**" via Samantha Gross of the Miami Herald — After lively and emotional debate on both sides of the issue, a bill that would make it a felony for doctors to provide minors with hormone therapy or to perform sex reassignment surgery will likely not see its first hearing. The bill would have carried a maximum penalty of a $10,000 fine or 15 years in prison. The House Health Quality Subcommittee held a workshop filled with hours of testimony both for and against the bill. Chair **Colleen Burton**, announced at the end that it would be the last time the committee meets.

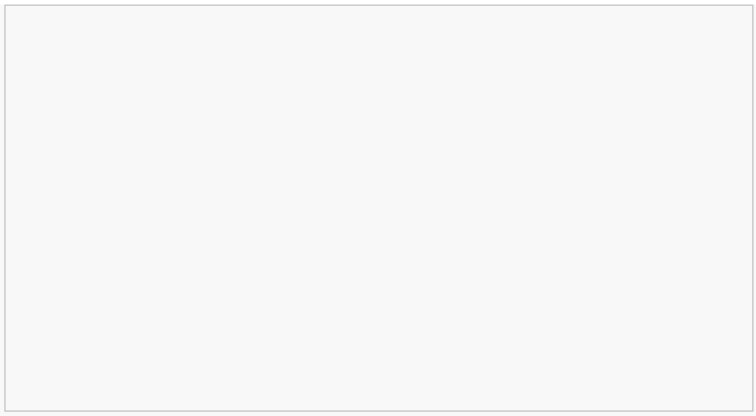
"**Is eight enough? Senate joins House in school board term limit debate**" via Jeffrey Solochek of the Tampa Bay Times — A push for school board term limits overcame a significant hurdle as a Florida Senate committee advanced legislation that would ask voters to force board members from office after eight consecutive years. What makes the Ethics and Elections Committee's party-line vote on SJR 1216 notable is sponsor Sen. **Joe Gruters**' agreement to scale back his proposed limit to eight years from the original 12 he sought. In the past two Legislative Sessions, the limits concept ran aground in the Senate, where members were more insistent on longer terms. "Eight years aligns with the current term limits in place," Gruters told the panel. "It would provide consistency among elected officials."

AMERICAN OVERSIGHT

Joe Gruters is looking to scale back his school board term limit bill to eight years from the original 12.

Affordable housing bill clears Senate committee— The Senate Community Affairs Committee voted 4-0 in favor of a bill that would allow large cities to remove impact fees for new affordable housing developments, POLITICO Florida reports. "My original draft was a little bit more aggressive and dealt with truly affordable and low income," bill sponsor Sen. **Jason Pizzo** said. "Unfortunately, the appetite over in the other House is not there right now — I'm told — for the lower-income folks." SB 856 initially aimed to slash property taxes for developers of low-income and workforce housing developments in larger counties.

"**St. Pete tried to abolish super PACs. Jeff Brandes wants to end that**," via Mary Ellen Klas of the Miami Herald — **Brandes** introduced the amendment to SB 1372, a bill he filed to update elections law sought by the Florida Association of Supervisors of Elections. But instead of limiting his bill to the supervisors' fixes, he used it to take aim at a 2017 ordinance passed by the St. Petersburg City Council that abolishes super PACs and prohibits spending by foreign-influenced corporations in city elections. The Brandes amendment, which received bipartisan support on a voice vote of the Senate Ethics and Elections Committee, would ban cities and counties from "adopting any limitation or restriction" on contributions to political committees or expenditures from political committees in city elections.



"**Legislature has plans to end tourist tax subsidies for professional sports team**" via James Call of the Tallahassee Democrat — Legislation filed this year (HB 1369) would repeal the Professional Sports Franchise Program created with the birth of the Miami Marlins — and which now has local governments on the hook for about another quarter-billion dollars in subsidies through 2038. Rep. **Cary Pigman** told the House Ways and Means Committee that it's time to have a robust discussion about these taxpayer-funded projects. They often don't deliver the return in economic development promised by the teams and leave the municipalities scrambling to pay for other government services, he said.

CST cut a heavy lift— A bill that would cap the communications services tax statewide is facing strong opposition, **Matt Dixon** of POLITICO Florida reports. SB 1174 would override local tax rates and set the maximum CST at 4%, down from the current cap of 5.1% by 2022. Local governments say the change would slash local government revenues by as much as $200 million. Though the measure was approved by its first committee Monday, bill sponsor Sen. **Travis Hutson** said its future is uncertain. Hutson said the cut might be included in a broader tax-cut package the House and Senate are negotiating.

"**Tighter restrictions on impact fees are one step closer to House passage**" via Janelle Irwin Taylor of Florida Politics — Impact fees are charged to developers and builders meant to cover costs associated with upgrading or increasing public facilities and infrastructure to accommodate population growth associated with the new development. The House Ways and Means Committee cleared the bill (HB 637). Under existing impact fee guidelines, counties, municipalities, or special districts can impose impact fees on new development using a calculation that assumes the need for additional facilities or infrastructure. The bill, sponsored by Pinellas County Republican Rep. **Nick DiCeglie**, would require local governments to calculate the fees using the most recent and localized data available within the previous 36 months, a requirement that does not currently exist.

"**Senators back stamping out smoking in parks**" via the News Service of Florida — A Senate committee approved a proposal that seeks to let local governments decide if they want to ban smoking at their public parks. The Innovation, Industry and Technology Committee backed the measure (SB 630), which would allow cities and counties to restrict smoking within the boundaries of parks further. Bill sponsor **Debbie Mayfield** said the proposal is intended to keep local parks "a healthy environment" for residents and children. "Additionally, cigarette butts are one of the most littered items in our parks, which becomes a hazard to our wildlife," Mayfield said.

AMERICAN OVERSIGHT

Debbie Mayfield wants to stamp out smoking from public parks.

"**Vaping pulled out of Tobacco 21 bill and put in new bill; both pass Senate panel** via Scott Powers of Florida Politics — The result is that the age increase for vaping now is included in SB 1394, new legislation filed to incorporate the vaping component, and is on a separate track from SB 810, which now only deals with increasing the age for smoking. But, along the way, SB 810's sponsor, Sen. **David Simmons**, found himself battling two challenges. First, bringing vaping under state regulation with any teeth would require a regulatory fee of $50, meaning the issue would have to be dealt with in a separate bill, one that eventually will require a two-thirds majority approval in both chambers of the Legislature. Simmons addressed that by stripping vaping out of SB 810 and putting it into SB 1394.

"**How size violence in black, Hispanic communities**" via the News Service of Florida — A House panel approved a proposal that would create a task force to investigate the root causes of violence in black and Hispanic communities in Florida. Bill sponsor **Shevrin Jones** said the 10-member task force would be similar to the Marjory Stoneman Douglas High School Public Safety Commission, which was created after the 2018 mass shooting in Parkland to improve school safety. But under Jones' proposal (HB 201), the task force would be charged with investigating systemic failures and causes of "high crime rates and gun violence incidents in urban core neighborhoods and communities."

"**Bills cracking down on shark finning, bear poaching advance in Senate**" via Scott Powers of Florida Politics — Despite some audience consternation about what the bill might do to the legal shark fishing trade in Florida, SB 680, banning the export and import and restricting the sales of shark fins won committee approval. At the same time, sponsor Sen. **Travis Hutson** promised to work with fishermen to find ways to protect legal shark fishing. He amended the bill to exempt licensed commercial fishers in Florida but made clear there still was more work to do to ease the legal fishing community's concerns. "Everybody has made it clear: it's not as simple as catch-and-release. There's a lot more going on here," Hutson said. SB 688, Sen. **Tom Wright**'s bill to tough penalties against bear poaching, faced no such resistance.

Today in Capitol

Realtor days — Nearly a thousand Florida Realtors are gathering in Tallahassee through Wednesday for the Great American Realtor Days (GARD) event, advocating for issues impacting homeowners, Realtors, and the real estate industry.

Happening today — Florida Home Builders Association Day on the Hill continues, 8 a.m., Hotel Duval, Autograph Collection, 415 N Monroe Street, Tallahassee.

Happening today — Walmart Day At the Capitol — Health and Wellness Fair, 8:30 a.m., 2nd floor Rotunda.

Assignment editors — Floridians, including first-generation refugees and their families, will hold a news conference celebrating the contribution of refugees and share their stories with state lawmakers as part of Florida Celebrates Refugee Day, 11 a.m., 4th-floor Rotunda.

Assignment editors — Last month, the House unanimously passed CS/HB 7011, which establishes a set of criteria implemented "to better protect student-athletes participating in athletics during hot weather and avoid preventable injury or death … " A group of outdoor construction and agriculture workers will hold a news conference with Sens. **Geraldine Thompson** and **José Javier Rodriguez** to ask lawmakers for similar protections, 11:30 a.m., Room 304C, Senate Press Room.

Happening today — The League of Women Voters of Florida will host a news conference on the 2020 U.S. Census and its consequences for the state, 11:30 a.m., steps of the Old Capitol.

Happening today — Sen. **Ben Albritton**, Rep. **Tina Polsky,** and a bipartisan group of lawmakers representing the area around Lake Okeechobee will join Mayors and local advocates for an announcement on water quality issues impacting Southwest and South Florida, noon, 4th-floor Rotunda.

AMERICAN OVERSIGHT

Happening today — Florida Keys Day, a reception highlighting the Florida Keys, 1 p.m., Capitol Courtyard.

Happening today — The Florida African American Ministers Alliance (FAAMA) is hosting a news conference to denounce attacks on the Florida Tax Credit Scholarship , 1:30 p.m. 4th-floor Rotunda.

The House Health Market Reform Subcommittee meets to consider HB 1163 from Rep.**Colleen Burton**, which seeks exemptions to the Certificate of Need regulatory process for specified intermediate care facilities for people with developmental disabilities, 8 a.m., Room 306, House Office Building.

The House Insurance & Banking Subcommittee meets to consider HB 771 from Rep.**Erin Grall**, which seeks to repeal the state's long-standing no-fault auto insurance system, 8 a.m., Room 404, House Office Building.

The House PreK-12 Innovation Subcommittee meets to consider HB 737 from Rep.**Kimberly Daniels**, which requires public schools to hold a daily moment of silence, 8 a.m., Reed Hall, House Office Building.

The House Justice Appropriations Subcommittee meets to consider HB 199 from Reps.**Tracie Davis** and **Scott Plakon**, which seeks to end the statute of limitations for child sex-abuse victims to bring about criminal cases against their abusers, 9 a.m., Morris Hall, House Office Building.

The House Workforce Development & Tourism Subcommittee meets to consider HB 1297 from Rep.**Will Robinson**, which seeks to make several changes to drug-free workplace programs, 9 a.m., Room 12, House Office Building.

The Senate Agriculture Committee and the House Agriculture & Natural Resources Subcommittee meet to consider SB 1876 and HB 1063 from Sen. **Bill Montford**, Reps. **Brad Drake** and **Ralph Massullo**, which seek to make changes in the state hemp program, Senate meeting at 9 a.m., Room 301, Senate Office Building. House meeting at noon, Room 12, House Office Building.

The Senate Commerce and Tourism Committee meets to consider SB 474 from Sen.**Ben Albritton**, which seeks to cut or eliminate regulations on a series of professions such as hair braiders, hair wrappers and interior designers, 9 a.m., Room 110, Senate Office Building.

The Senate Criminal Justice Committee meets to consider several bills, including SB 1018 from Sen.**Linda Stewart**, which seeks to boost criminal penalties for indecent exposure, 9 a.m., Room 37, Senate Office Building.

The Senate Health Policy Committee meets to consider the confirmation of the Department of Health Secretary **Scott Rivkees**, who is also serving as state surgeon general, 9 a.m., Room 412, Knott Building.

The House Higher Education Appropriations Subcommittee meets to consider PCB HEA 20-01, which seeks to restrict sponsorship of athletic facilities at state colleges and universities, 10 a.m., Room 212, Knott Building.

The House Business & Professions Subcommittee meets to consider HB 363 from Rep.**Sam Killebrew**, which seeks to end "rent-to-own" pet leasing arrangements for dogs and cats, noon, Room 212, Knott Building.

The House Government Operations & Technology Appropriations Subcommittee meets to consider HB 1011 from Reps. **Jason Fischer** and **Mike La Rosa**, which seeks to preempt cities and counties from regulating vacation rental properties, noon, Morris Hall, House Office Building.

The House Health Care Appropriations Subcommittee meets to consider HB 6031 from Rep.**Cary Pigman**, which seeks to remove the $1 million lifetime coverage limit for children enrolled in the Florida Healthy Kids program, noon, Room 404 House Office Building.

The House Transportation & Infrastructure Subcommittee meets to consider HB 6083 from Reps.**Ana Maria Rodriguez** and **Blaise Ingoglia**, which seeks to revoke state authorization of red-light cameras, noon, Reed Hall, House Office Building.

The Senate Banking and Insurance Committee meets to consider SB 924 from Sen.Brandes, which seeks to make it harder to file "bad faith" claims against insurance companies, 12:30 p.m., Room 412, Knott Building.

The Senate Children, Families and Elder Affairs Committee meets to consider SB 152, also from Brandes, which seeks to add "dental therapists" as an additional type of health care provider, 12:30 p.m., Room 301 Senate Building.

The Senate Judiciary Committee meets to consider SB 1354 from Brandes, which seeks to make changes to the statewide voter registration application process as well as address the eligibility of felons to vote, 12:30 p.m., Room 110, Senate Office Building.

The Senate is scheduled for a floor session to consider SB 404 from Sen.**Kelli Stargel**, which seeks to

AMERICAN OVERSIGHT

require parental consent before minors can have abortions, 3 p.m. Senate Chamber.

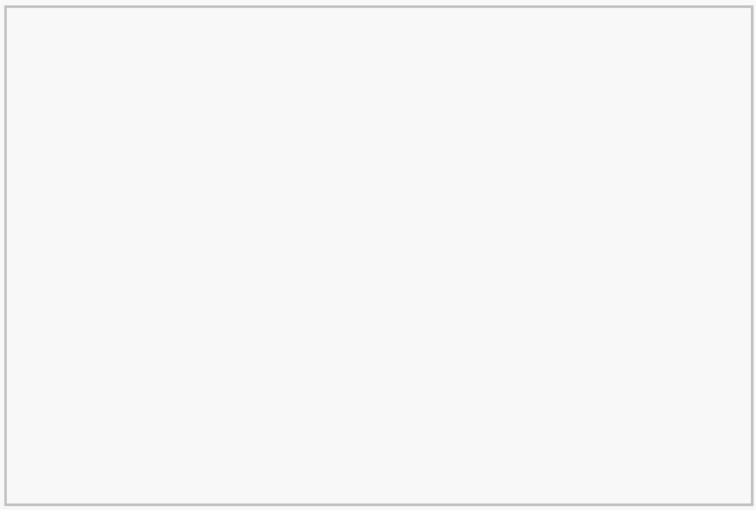
The House Children, Families & Seniors Subcommittee meets to consider HB 835 from Reps.**Matt Willhite** and Plakon, which seeks to increase the state's efforts to address Alzheimer's disease and dementia-related disorders, as well as create the post of dementia director in the Department of Elder Affairs, 3:30 p.m., Room 12, House Office Building.

The House Civil Justice Subcommittee meets to consider HB 319 from Rep.**Clay Yarborough**, which seeks to develop a "Florida Guide to a Healthy Marriage," to be posted on court clerks' websites and possibly as printed copies distributed to marriage-license applicants, 3:30 p.m., Room 404, House Office Building.

The House Oversight, Transparency & Public Management Subcommittee meets to consider HJR 1325, a constitutional amendment from Rep. **Vance Aloupis**, which seeks to end the public campaign-financing system available to statewide political candidates, 3:30 p.m., Morris Hall, House Office Building.

The House PreK-12 Appropriations Subcommittee meets to consider HB 23 from Reps.**Dan Daley** and **Mike Gottlieb**, which seeks to mandate public schools to have panic alarms for emergencies, 3:30 p.m., Reed Hall, House Office Building.

Happening today — The 2020 Senate Reunion celebrates the legacy of former lawmakers and their collective service to the state of Florida, 3:45 p.m., Senate Chamber.



Gov. Club buffet

New England clam chowder; mixed garden salad with dressings; Caesar salad with grilled chicken; tomato, cucumber, red onion, and feta salad; deli board, lettuce, tomatoes, cheeses, and breads; Ronnie's fried chicken; Nana's meatloaf with mushroom sauce; grilled salmon with lemon piccata sauce; buttermilk mashed potatoes; braised collard greens; corn and okra; peach cobbler for dessert.

Statewide

AMERICAN OVERSIGHT

"**Florida's new judges 'all think the same,' Ron DeSantis' top lawyer says**" via Lawrence Mower of the Tampa Bay Times — DeSantis appointed 56 judges during his first year in office, more than half of them women and nearly 40% of them minorities. But they're identical in one respect: They all share the same strict judicial philosophy, said DeSantis' general counsel, **Joe Jacquot**. This commonality was revealed when the judges recently attended the Florida Judicial College program, a course required of all new judges, Jacquot said during a Federalist Society convention in Orlando. "I heard back from several of them who talked about the diversity in the room," Jacquot recounted. "But they said, 'We all think the same.' So that's great." Jacquot's comments provided a rare behind-the-scenes glimpse at how the governor chooses his jurists.

Joe Jacquot, Gov. Ron DeSantis' general counsel, gives a glimpse into the judicial nominating process.

"**Marco Rubio criticizes banks for halting voucher contributions, says they're seeking 'wokeness points'**" via Annie Martin of the Orlando Sentinel — U.S. Sen.**Rubio** criticized Fifth Third and Wells Fargo banks in a statement on Monday, saying the companies were seeking "'wokeness' points from the radical left" after they halted contributions to Florida's most extensive voucher program unless the state prohibits private schools that receive the money from discriminating against LGBTQ students. The banks' decision came after the Orlando Sentinel reported Jan. 23 that more than $105 million from the Florida Tax Credit Scholarship Program, which pays for low-income children to attend private schools, went to campuses with anti-LGBTQ policies last year. The program is funded by companies that receive dollar-for-dollar tax write-offs for their contributions.

"**A change in Florida's rules of court just made work life easier for women**" via Michael Molina Florida Phoenix — The new rule creates a presumption that attorneys arguing lawsuits are entitled to continuances — that is, procedural delays — to accommodate parental leave when they give birth or adopt. "This rule will remove an obstacle to anyone who wants to be both an engaged parent and a successful litigator," **Kimberly Hosley** of The Orlando Law Group, president-elect of the nonpartisan Florida Association of Women Lawyers, told the Florida Phoenix. "As studies show, women are not given the opportunity to be lead trial counsel at the same rate as men. Some think that is because of the fear that their lead counsel could potentially be unavailable at the time of trial due to childbirth or maternity leave," Hosley said.

"**Florida to debut high school civics test**" via Jeffrey Solochek of the Tampa Bay Times — In a memo to school district superintendents, K-12 Chancellor **Jacob Oliva** announced that the test would be available in the spring for schools to pilot on a voluntary basis. "Pilot exam results will not affect graduation requirements or school accountability," Oliva wrote. "The department will report on which districts and schools participate in the pilot, and on student participation and pass rates." Although not required at this point, the department is encouraging students taking U.S. government or economics courses to take the test. The department would provide the exam to the districts and allow them to offer it either via computer or paper. The test would take 100 minutes and could be spread over two sessions.

AMERICAN OVERSIGHT

Water fight

A group of scientists, academics, local businesses, green industry professionals, and local leaders concerned about protecting the state's water quality have joined together to launch Floridians for Water Quality Protection, a coalition set up to fight and advocate for water and waterways.

Floridians for Water Quality Protection will focus on the current assortment of local fertilizer ordinances — several of them conflicting — which they say is among the main reasons Florida is still struggling with water quality problems.

A new coalition is trying to make sense out of fertilizer regulations to protect Florida waterways.

As evidence of the continuing failure of local ordinances to impact these issues, the group points out the 2018 increase in algae blooms and red tides.

"The State of Florida essentially has 410 cities with their own rules and regulations or nothing at all when it comes to local fertilizer ordinances," said director of agronomy of Massey Services **Eric Brown**, Ph.D. in a statement. "This has essentially created a conflicting — and sometimes very confusing — patchwork of local fertilizer ordinances that are not based on science and are doing more harm than good when it comes to our water quality."

Others argue that local ordinances often go against proven science and independent, third-party data, as well as Florida statute.

"In many places, the county may have completely different rules than what's in the city or vice versa, revealing the abject failure of local control to meaningfully address this issue, however well-intended," said **Mac Carraway**, executive director of the Environmental Research and Education Foundation, Inc. "These ordinances simply ignore the established peer-reviewed findings that healthy lawns and landscapes contribute little if anything to runoff."

For more information on Floridians for Water Quality Protection, visit **ProtectFlaWater.com**, follow **@ProtectFlaWater** and like **FB.com/ProtectFlaWater**.

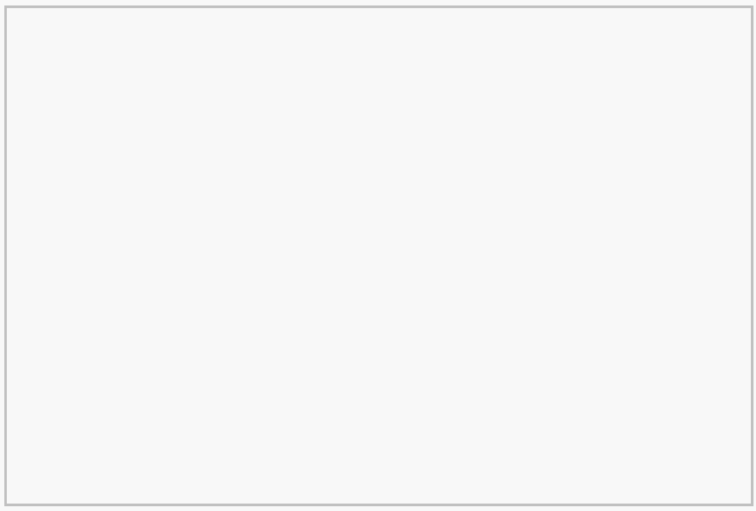
Happening today — The Florida Public Service Commission meets to consider a proposal allowing Duke Energy Florida to collect $171.3 million from customers to cover costs related to Hurricane Dorian, 9:30 a.m., Betty Easley Conference Center, 4075 Esplanade Way, Tallahassee.

"**Agriculture Commissioner fires, takes consultants tied to sugar farmers off Lake O panel**" via Tyler Treadway of TC Palm — The department had a $35,000 contract calling for firm President Thomas K. MacVicar and two employees, William Baker and Lennart "Len" Lindahl, to help with "monitoring, understanding and influencing the water-related issues important to agriculture in South Florida." ... Fried terminated the contract "because it's at her discretion to do so," spokesman Franco Ripple told TCPalm in an email. "It's great news that Commissioner Fried has listened to Floridians who are sick and tired of business as usual and finally decided to do the right thing," U.S. Rep. Brian Mast, who has called for both lower lake levels and firing MacVicar, said in an email.

"**Water management district backs Everglades deal**" via the News Service of Florida — The South Florida Water Management District has approved a plan to buy about 20,000 acres in the Everglades, a deal that would block exploratory oil drilling on part of the property. The district's Board of Governors on Saturday approved purchasing the land from Kanter Real Estate LLC. DeSantis last month announced the proposed acquisition, after years of litigation about potential oil drilling on part of the Kanter property in Broward County. The state Department of Environmental Protection obtained an option to buy the 20,000 and wanted to assign the option to the water management district, according to an agenda for Saturday's meeting.

"**Ray Rodrigues questions Drew Bartlett's effectiveness as SFWMD Executive Director**" via Florida Politics — When Bartlett came before the House Agriculture and Natural Resources Subcommittee, Rodrigues questioned why Bartlett failed to request authorization for the Lake Okeechobee Watershed Restoration Project (LOWRP) from the U.S. Army Corps of Engineers. At the time, Bartlett said he needed to discuss an unrelated project — the Everglades Agricultural Area Reservoir — before he could send the request to the Corps. Rodrigues isn't buying it. "What is disappointing is that on November 14, 2019, the South Florida Water Management District (SFWMD) discussed the LOWRP. At the meeting's end, you were asked by SFWMD Board Chairman Chauncey Goss if you understood their direction to write the letter. In response, you responded 'absolutely," the Estero Republican wrote in a letter dated Jan. 29.



Drew Bartlett is coming under fire for his perceived lack of effectiveness as SFWMD Executive Director.

"**Current Florida panther roadkill pace would double state record**" via Chad Gillis of the Fort Myers News-Press — Drivers are on pace to kill 72 Florida panthers this year after six road kills were recorded in January. That would more than double the current record of 34 vehicle deaths set in 2016. But scientists and panther advocates say that's unlikely to happen. Road kills often occur in bursts, and weeks can pass between road kills when the pace is slower. "The data shows we don't keep this pace per month," said Florida Fish and Wildlife Conservation Commission panther biologist **Dave Onorato**. "We kind of go through these spurts, and then we go through some dry spells."

"**1,400 pounds of shark fins found by wildlife inspectors in Miami**" via NBC 6 South Florida — Wildlife inspectors found dried shark fins in Miami worth upward of $1 million. The 18 boxes of fins were found at a port in Miami on a shipment believed to have originated in South America and that was likely headed to Asia, U.S. Fish and Wildlife Service officials said. The commercial value of the seized shipment is believed to be between $700,000 and $1 million, officials said.

AMERICAN OVERSIGHT

"**Bernie Sanders won the race for Democratic donors in 2019**" via Kevin Schaul, Anu Narayanswamy, Reuben Fischer-Baum and Michelle Ye Hee Lee of The Washington Post — **Sanders** had 1.4 million donors from across the country. Sanders, who is surging in the polls as Iowa's caucuses open, entered 2020 with at least $18 million — more than any of his Democratic rivals who are not self-funded billionaires. Democratic candidates tended to draw the most donor support from their home states, but the U.S. Senator built a sprawling donor base from coast to coast. Sanders's donor base spiked in the final quarter of 2019, when he garnered hundreds of thousands of new donors — a remarkable political revival for the candidate, who had a slow summer and whose heart attack in October raised doubts about how long he would remain in the race.

Bernie Sanders is the big money winner for 2019.

"**Sanders once likened poor whites to Blacks under apartheid**" via Marc Caputo and Laura Barrón-López of POLITICO — At a 1986 public forum, Sanders said poor Vermonters "are the equivalent of blacks in South Africa. They don't vote; they aren't involved, they don't care about the issues," according to the Bennington Banner in Vermont. Sanders amended his statement after one observer on stage commented about his "pretty fiery oratory." "Obviously, the analogy is not true," Sanders then responded, "because in South Africa, the blacks are not invisible — they are beginning to stand up." At the time of his remarks, Vermont's population was about 99 percent white and about 0.2 percent black.

"**Michael Bloomberg campaign launches anti-gun violence bus tour in Orlando, opens first Florida field office**" via Steven Lemongello of the Orlando Sentinel — On a night when other presidential campaigns were out in force across a cold and wintry Iowa, volunteers and organizers for the **Bloomberg** presidential campaign put the finishing touches on its first field office in Florida, complete with a bus ready to roll out on a multistate tour centered on ending gun violence. Field organizer **Dan Larson** drilled the last screws into the "Mike Bloomberg" sign at the entrance to the former City Arts building on S. Orange Ave. Bloomberg, the financial billionaire and former New York City Mayor, had skipped the contentious Iowa Democratic caucuses and early primary states for a risky but potentially delegate-rich strategy of focusing on the larger states voting in March, including Florida.

First in Sunburn — Former state Rep. Robert Asencio switches endorsement from Joe Biden to Bloomberg — Following the Iowa Caucuses and the release of Democratic candidateBloomberg's plan to support Puerto Rico, **Asencio** is changing his endorsement from **Biden** to support Bloomberg. "While many leaders offer empty words and meaningless rhetoric, Mike Bloomberg is offering a substantive plan that would ensure long term security for Puerto Rico," Asencio said. "As a Puerto Rican, I knew after seeing his plan that he was the best choice to be the next President. Given his record on Puerto Rico, I trust he will take the action we need to improve life for my friends and family on the Island." Last week, Bloomberg laid out a plan to invest in infrastructure and revitalization of Puerto Rico, while also endorsing statehood.

AMERICAN OVERSIGHT

SOTU

Several members of Florida's congressional delegation have announced the guests they are bringing to the State of the Union tonight. Many of them are bringing people connected to the causes they support or issues they care about. Here's a round of those who have announced who they're bringing.

Republican U.S. Sen. **Marco Rubio** is bringing prominent Uyghur human rights activist **Rushan Abbas** and Lt. Gov. **Jeanette Núñez** as his guests.

Democratic U.S. Rep. **Stephanie Murphy** is bringing high school student **Mimi (Xiaoyi) Chen** of Longwood. Chen won a State of the Union essay contest earlier this month.

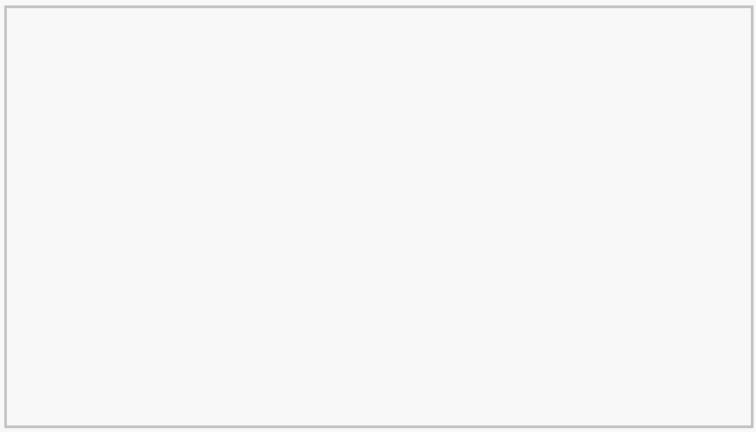
Democratic U.S. Rep. **Val Demings** is Orlando Commissioner **Bakari Burns** as her guest. He is the CEO of a community health center.

Democratic U.S. Rep. **Darren Soto** is bringing Puerto Rican native **Jessica Carrillo**. She and her mother relocated to Florida in the aftermath of Hurricane Maria.

Democratic U.S. Rep. **Charlie Crist** of St. Petersburg is bringing 18-year-old **Taylor McKenny**, a Type 1 diabetic and activist.

Democratic U.S. Rep. **Ted Deutch** is bringing **Alan T. Brown**. Brown has quadriplegia and has dedicated his life to improving the lives of people living with paralysis.

Democratic U.S. Rep. **Lois Frankel** is bringing **Annette Mayer**, a South Floridian who works at a local independent pharmacy.



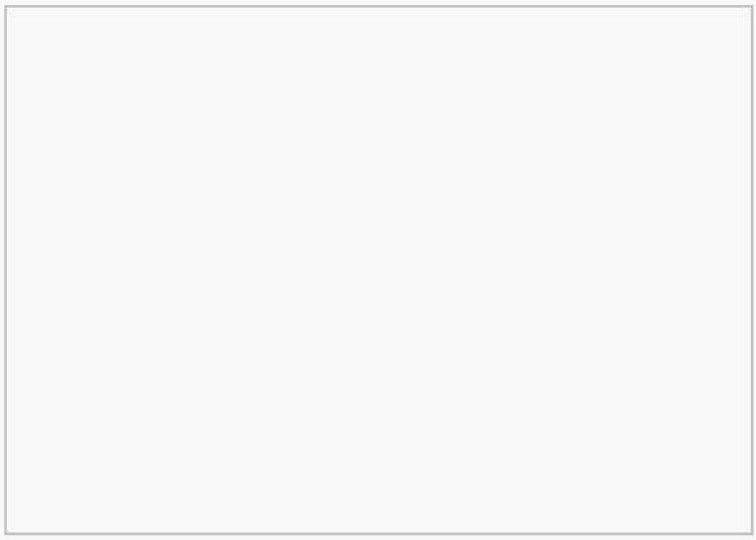
Democratic Rep. **Debbie Wasserman Schultz** is bringing Cooper City high school student **Emily Kaufman.** Kaufman has Type 1 diabetes.

Democratic U.S. Rep. **Debbie Mucarsel-Powell** is bringing 16-year-old student researcher and scientific diver in-training from Key West, **Marsella Munoz**.

AMERICAN OVERSIGHT

Peachy

"Donald Trump trial closing arguments aim at voters, history" via Lisa Mascaro and Eric Tucker of The Associated Press — Closing arguments Monday in **Trump**'s impeachment trial were directed more toward history than to sway the outcome, one final chance to influence public opinion and set the record ahead of his expected acquittal in the Republican-led Senate. The House Democratic prosecutors drew on the Founding Fathers and common sense to urge senators — and Americans — to see that Trump's actions are not isolated. Still, a pattern of behavior that, left unchecked, will allow him to "cheat"' in the 2020 election. The President's defense countered the Democrats have been out to impeach Trump since the start of his presidency, nothing short of an effort to undo the 2016 election and to try to shape the next one, as early primary voting begins Monday in Iowa.



Adam Schiff closes the Donald Trump impeachment trial by attempting to put it in a historical context.

AMERICAN OVERSIGHT

D.C. matters

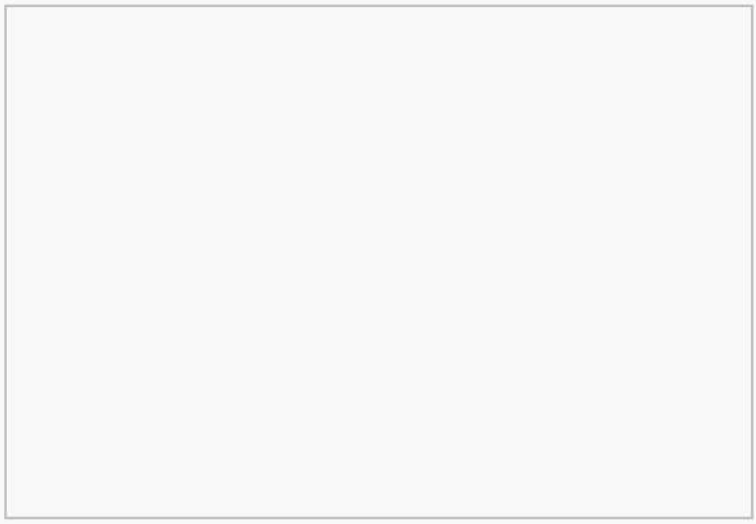
"**Trump and Nancy Pelosi haven't spoken in months**" via Manu Raju of CNN — According to a**Pelosi** spokesman, the two had not spoken since the October 16 meeting in which Trump insulted Pelosi, including calling her a "third-grade politician," before she and other top Democrats walked out and later accused Trump of having a "meltdown." That meeting was supposed to be about Syria. The lack of communication comes amid Trump's impeachment proceedings but is all the more remarkable given the number of high-profile events that have impacted the U.S. during that time, including the killing of top Iranian commander **Qasem Soleimani** and ISIS leader **Abu Bakr al-Baghdadi**. Trump said he would likely have a difficult time working with Democrats after his expected acquittal vote.

Donald Trump and Nancy Pelosi haven't spoken in months.

"**Ex-U. S. Rep. Corrine Brown continues appeal of fraud conviction, prison time**" via Steve Patterson of the Florida Times-Union — Former U.S. Rep. **Brown** is taking the appeal of her fraud conviction a step beyond the panel that upheld her conviction last month. A lawyer for the 12-term Democratic congresswoman, now serving a five-year prison sentence, asked last week to challenge her conviction in front of the entire 21-judge 11th U.S. Circuit Court of Appeals. A three-judge panel rejected the appeal last month, but attorney **William Mallory Kent** argued that decision conflicted with precedents and that "consideration by the full court is necessary to secure and maintain uniformity of decisions." Kent had argued Brown deserved a new trial because U.S. District Judge **Timothy Corrigan** removed a juror who said the "Holy Spirit" had told him Brown was innocent.

The trail

Happening today — The Florida Supreme Court will hear arguments on two proposed constitutional amendments, seeking to allow recreational marijuana and prevent possession of assault-style weapons, 9 a.m., Florida Supreme Court, 500 South Duval St., Tallahassee.



First in Sunburn — Navy veteran Todd Chase enters CD 3 race— Chase, a Navy veteran and conservative business leader, is now the latest Republican to enter the race for Florida's 3rd Congressional District, currently held by **Ted Yoho**. To announce his candidacy, Chase released a 90-second campaign launch video, "The Pilot." "As a local leader, I fought, oftentimes alone, to remind other leaders who they work for," said Chase, who holds a Harvard MBA. "I'm running for Congress to bring conservative values, backed by real-world experience, to Washington where politicians spend too much time attacking each other instead of attacking the challenges that stand between us and our future." A Jacksonville University graduate, Chase had previously served as the "lone conservative" on the Gainesville City Commission.

AMERICAN OVERSIGHT

"Darren Soto enters 2020 with $290K in campaign coffer" via Scott Powers of Florida Politics — Democratic Rep. Soto's campaign picked up $155,500 during the fourth quarter of 2019 and entered the election year with $290,848 in cash to support his reelection bid in Florida's 9th Congressional District. Soto is seeking a third term in the district representing southern Osceola County, south Orange County, and eastern Polk County. He posted modest campaign fundraising for an incumbent but remained comfortably well-endowed compared to any of his challengers. In the fourth quarter, his campaign cashed political action committee checks totaling $105,500 and checks from individual supporters for another $50,030. That put him at $498,203 raised with $290,808 left in the bank.

"Turning Point USA founder Charlie Kirk endorses Anna Paulina Luna in CD 13 contest" via Janelle Irwin Taylor of Florida Politics — **Kirk**, founder and president of the pro-Trump Turning Point USA and chair of Students for Trump, is endorsing **Luna** for Congress. Luna is running in the Republican primary in hopes of taking out Democratic incumbent Crist. "Anna is a true fighter for our country! We need more like her! Check out her run for Congress, critical to help patriots like her," Kirk wrote in an announcement. Turning Point USA is a far-right conservative nonprofit that seeks to increase conservative engagement among high school and college students and actively rallies against what the group sees as an influx of liberalism in academic settings and an erosion of freethinking principles.

Charlie Kirk makes an endorsement in CD 13.

"Greg Steube closes 2019 with $187K on hand for reelection campaign" via Jacob Ogles of Florida Politics — Throughout the year, he raised $332,268 in new contributions. But that wasn't the only fundraising tied to **Steube** that took place last year. Political committee activity showed he might be interested in extending his influence beyond Florida's 17th Congressional District. The Greg Steube Victory Fund, a committee separate from the Congressman's campaign, also raised $22,700 in 2019. By year's end, all that money went either to Steube's campaign ($12,400), to 9Seven Consulting ($500), or to the Getting Republicans Elected for Generations PAC ($9,800). GREG PAC spent money on 9Seven and services from **Alex Blair**, Steube's campaign manager. Consider it a sign the Sarasota pol wants groundwork laid to help elect other Republicans to the House.

"Perry Thurston endorses Shevrin Jones in SD 35 contest" via Ryan Nicol of Florida Politics —**Jones** is one of five Democrats competing in the left-leaning district. Serial candidate **Josue Larose** has also filed as a Republican. **Thurston**'s support is another signal that state Democrats are getting behind Jones' candidacy. Term-limited Sen. **Oscar Braynon**, who currently holds the SD 35 seat, already backed Jones to serve as his successor. Last month, Jones also courted an endorsement from U.S. Rep. **Debbie Wasserman Schultz** of Florida's 23rd Congressional District.**Andrew Gillum**'s political committee, Forward Florida, is supporting Jones as well. "As both a colleague representing Broward County and a

AMERICAN OVERSIGHT

friend, I've known Shevrin for many years and have seen his fierce commitment to the people of South Florida firsthand," Thurston said.

"Matt Caldwell, running for Lee Property Appraiser, trashes Florida GOP efforts in 2018" via Jacob Ogles of Florida Politics — **Caldwell** said that despite victories at the ballot box in 2018, results overall disappointed. "What is indisputable is that the party has never recovered from Crist and **Jim Greer**, and I think that fact had a lot to do with how weak our showing was in our statewide elections overall." Caldwell will also run for Lee County State Committeeman. That would put him in position to run for a statewide position with the party, and rumors in Lee County have swirled he wants to be state chair. "For now, I will say, I'm just looking to make myself available," he said.

Local

AMERICAN OVERSIGHT

"**Attorney: Mar-a-Lago checkpoint crasher is mentally ill**" via Terry Spencer of The Associated Press — The Connecticut opera singer who drew gunfire when she smashed an SUV through security checkpoints outside Trump's Florida home is mentally ill and wasn't taking her medication before leading a trooper on a wild chase, her attorney told a judge Monday. Attorney **David Roth** did not elaborate on **Hannah Roemhild**'s illness, but Palm Beach County Judge **Ted Booras** agreed to have her seen by a psychologist before holding another hearing. Roemhild, 30, will remain jailed without bail on charges that include aggravated assault on a law enforcement officer from last Friday's chase through Palm Beach and past security outside Trump's Mar-a-Lago resort and home. Roemhild refused to appear in court.

Lawyers for Hannah Roemhild, who is accused of driving through checkpoints outside Donald Trump's Florida home Mar-a-Lago, say she is mentally ill.

"**al-Qaida in Yemen claims responsibility for NAS Pensacola shooting**" via Samy Magdy of The Associated Press — al-Qaida's branch in Yemen claimed responsibility Sunday for last year's deadly shooting at the Naval Air Station Pensacola by an aviation student from Saudi Arabia. The shooter, 2nd Lt. Mohammed **Saeed Alshamrani**, was a member of the Saudi Air Force in training at the base. He opened fire inside a classroom at the base on Dec. 6, killing three people and wounding two sheriff's deputies before one of the deputies killed him. Eight others were also hurt. al-Qaida in the Arabian Peninsula, or AQAP, released a video claiming the attack. SITE Intelligence Group, which tracks messaging by militant groups, reported the claim.

"**Osceola sheriff's letter said Aramis Ayala hindered Nicole Montalvo case. 'Blatant lies,' she says**" via Monivette Cordeiro and Cristóbal Reyes of the Orlando Sentinel — Sheriff **Russ Gibson** accused Orange-Osceola State Attorney **Ayala** of hindering the investigation into **Montalvo**'s killing by directing her staff not to assist detectives in obtaining evidence from the suspects' phones or testimony from a key witness — a claim Ayala called "complete blatant lies." In a letter to DeSantis, the Osceola sheriff alleged "inaction" by Ayala's office was due to Ayala's "desire to advance her position against the death penalty" and asked for her removal from the case. Two days after Gibson's letter, DeSantis reassigned the case to Ocala-based State Attorney **Brad King**. Ayala vehemently denied Gibson's accusations. "Unfortunately, the attorney general and the governor based their perspective and decision on whatever action needed to be taken on lies."

"**From $1 to $1,500: Cost of alleged nepotism just went up for former Midway Mayor Wanda Range**" via Jeff Schweers of the Tallahassee Democrat — The Florida Commission on Ethics took a rare step in changing an administrative law judge's recommended $1 fine in favor of $1,500 against a former Midway Mayor who voted to appoint her first cousin to step into her role whenever she couldn't perform her duties. If the purpose of a fine is "to deter future disobedience of the law," the commission ruled in its final decision, made public last week, then "the issuance of a merely nominal penalty … is not reasonable." The decision wraps up an ethics case that began with complaints filed by residents of Midway against their former Mayor, Range, in 2017 and 2018.

"**Six big Tampa Bay projects racing to be ready for Super Bowl 55**" via Richard Danielson of the Tampa Bay Times — St. Petersburg Pier, the new $92 million Pier and its 26-acre redeveloped site are projected to make their debut in the spring; JW Marriott, 510 Water St., Tampa; Midtown Tampa, the $550 million project about two miles south of Raymond James Stadium has been 20 years in the making; Haya Hotel, the $52 million Hotel Haya in Ybor City is projected to open this spring; Museum of the American Arts and Crafts Movement, the opening date for the ambitious five-story, 137,000-square-foot Museum it is currently projected to be early this spring; Hyatt House/Hyatt Place hotels, southeast corner of N Florida Avenue and E Kennedy Boulevard, Tampa, is projected for the first quarter of 2021.

AMERICAN OVERSIGHT

Top Opinion

"**The moment is now for LGBTQ equality in Florida schools and everyday life**" via the Orlando Sentinel editorial board — House Bill 45 revises the eligibility requirements for a private school to get state voucher money. If only Florida's other problems were this simple to remedy. Like, say, convincing Florida's legislative leaders that it's finally time to end state-sanctioned discrimination. State Rep. **Jennifer Sullivan**, who heads the House Education Committee, is quite fine with discrimination against gay kids, saying if parents don't like it, they can find another school. "Not every school is going to be the best fit for every student. That's one of the great things about a choice program: that a parent has that opportunity to go to multiple schools and see what culture is going to best benefit that student." Got that? Discrimination = culture.

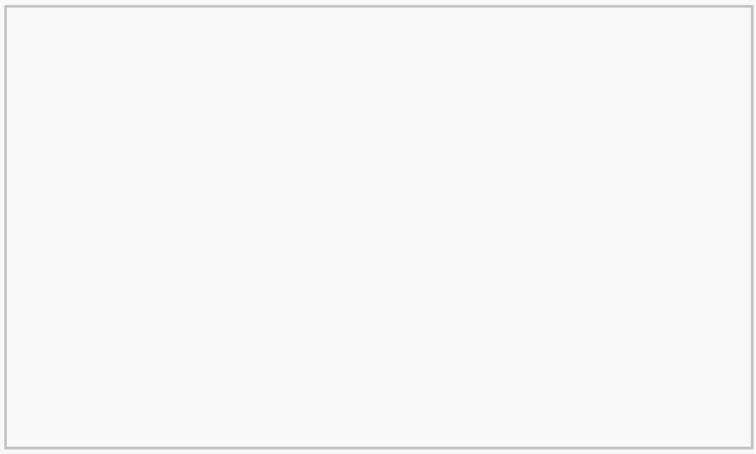
Opinions

"**After witness vote, a Senate only Caligula could love**" via John Micek of Florida Phoenix — The next time someone tells you that the U.S. Senate is the world's greatest deliberative body, your answer should be no longer than two words: Marco Rubio. "Just because actions meet a standard of impeachment does not mean it is in the best interest of the country to remove a President from office," Rubio wrote in a post before the Senate voted along party lines to reject calling witnesses. Or you can answer "**Lamar Alexander**." Alexander agreed Trump "did something inappropriate, but I don't agree he did anything akin to treason, bribery, high crimes and misdemeanors. I think there's a big gap there." The world's greatest deliberative body? Hardly. It's a Senate that only a Roman emperor could love.

"**Lamar Alexander's finest hour**" via The Wall Street Journal editorial board — The Tennessee Republican listened to the evidence and arguments from both sides, and then he offered his sensible judgment: Even if Trump did what House managers charge, it still isn't enough to remove a President from office. This isn't an abdication. It's a wise judgment based on what Trump did and the rushed, partisan nature of the House impeachment. Alexander's statement made two other crucial points. The first concerns the damage that partisan removal of Trump would do to the country. "Our founding documents provide for duly elected presidents who serve with 'the consent of the governed,' not at the pleasure of the United States Congress. Let the people decide."

"**The death of growth management in Florida — a sequel**" via the Orlando Sentinel editorial board — This year's proposal, backed by state House Rep. **James Grant**, is ostensibly related to guarding private property rights, which are protected by the U.S. Constitution's Fifth Amendment. It says the government can take someone's property for a public purpose, but the property owner must receive "just compensation." Florida law goes further. Even if the government doesn't actually take possession of someone's property, the owner might be entitled to some compensation if a government regulation or ordinance unfairly restricts the property's use. Under Grant's bill, if there's a settlement, or if the property owner wins, "similarly situated" property owners would be able to get in on the action. No one is quite sure what "similarly situated" means.

"**Permanent alimony needs to come to an end**" via Alex Andrade for the Pensacola News Journal — I'm proud to sponsor legislation in the 2020 Session seeking to reform Florida's outdated alimony system. This reform is designed to accomplish several goals. First, lifetime alimony must be eliminated. Lifetime alimony has created a culture of dependency; one ex-spouse can rely on another for monthly support until death. In 2020, our laws should focus on encouraging long-term self-sufficiency. Second, our legislation creates clearer guidelines for alimony rulings, allowing for parties to anticipate their outcomes without the need to undergo drawn-out alimony battles in court. Third, we establish an absolute right to retire for alimony payors. These reforms, among others, aim to let ex-spouses move on and no longer remain connected to a failed marriage.



Movements

"**Senate panel approves Eric Silagy, others for State University System Board of Governors**" via Ryan Nicol of Florida Politics — The Senate Education Committee signed off on a series of executive appointments, including a move to place Florida Power & Light (FPL) President and CEO **Eric Silagy** on the State University System (SUS) Board of Governors. The Committee reviewed four DeSantis appointments to that board at a Monday afternoon hearing. The panel also approved the appointments for **Brian Lamb**, **Steven M. Scott** and **Kent Stermon**. Those approvals were unanimous. The members' respective terms will end on Jan. 6, 2026. Monday's stop was their first. The Senate Ethics and Elections Committee is also slated to review the appointments before they go up for a vote by the full Senate.

"**FSU alum, Chiefs player celebrates Super Bowl win by paying off dog adoption fees**" via Curt Weller of the Tallahassee Democrat — **Derrick Nnadi** is a former Florida State defensive tackle who started for Kansas City as the Chiefs rallied to beat the San Francisco 49ers 31-20 in Super Bowl LIV in Miami Gardens. Along with former FSU offensive lineman **Cameron Erving**, they are the 38th and 39th FSU alumni in program history to win a Super Bowl. Within hours of winning it all, Nnadi made the most of the moment. In the wake of the win, he announced that he's paying the adoption fees for all the dogs currently living at KC Pet Project. Nnadi had been helping KCPP find homes for homeless animals all season through his Derrick Nnadi Foundation, but this commitment takes his pledge to another level.

FSU alum, Chiefs player Derrick Nnadi, celebrates his Super Bowl win by paying adoption fees for shelter dogs.

"**Super Bowl MVP Patrick Mahomes joined by Make-A-Wish recipient at Disney World Parade**" via Benjamin VanHoose of People — **Mahomes** is feeling the Disney magic. On Monday — just hours after he led the Kansas City Chiefs to a win over the San Fransisco 49ers at the Super Bowl — the quarterback, 24, made the trip to Walt Disney World to take part in an extravagant parade. According to a Disney Parks Blog news release, 10-year-old **Nathaniel** of Austin, Texas, got to take part in the parade with the NFL star, as 17 other Make-A-Wish children were also along to visit the Magic Kingdom. Disney Parks donated $1 million to Make-A-Wish as part of the celebration. The Disney Parks Blog announced the victory trip on Instagram, showing highlights from the big game with "When You Wish Upon a Star" from the 1940 Disney film Pinocchio playing over it.

"**The Kaiseki Chef's Table experience at Epcot's Takumi-Tei is Disney's hottest new foodie splurge**" via Amy Drew Thompson of the Orlando Sentinel — Purple flowers, red tomato, golden bee pollen studded with black sesame, all piled atop a lush, green nest of frisée dressed with leek. Alongside, a petite carapace — tamagogani — nestles as if hiding in seaweed washed up on the sandy beach beneath. The hefty treasure of snow crab leg, its naked meat an alluring stalk few could finesse from the shell sat at the center. A tiny claw crowned the dish; in its pincer, a radiant pink scroll of housemade tsukemono — watermelon radish — its color entirely natural. It was apt that my opportunity to sample the delicately beautiful dishes and drinks at Disney's Takumi-Tei fell amid the Epcot International Festival of the Arts, as this serene, sophisticated space is nothing if not artful.

Happy birthday

How could we forget to wish the incredible**Katie Webb** of Colodny Fass a happy birthday? She's a Golden Rotunda winner and one of the top lobbyists in the industry. Our sincere apologies. Celebrating today are **Dan Barrow** of Veterans Florida, **Dan Berger**, former Sen. **Dwight Bullard**, and **Joel Greenberg**.

Subject: Sunburn — The morning read of what's hot ☕ ☕ in Florida politics — 10.28.19 — Burnin' today: Florida Chamber, DeSantis, Faraj-Johnson, O'Rourke, Meade

The Florida Chamber of Commerce's **Future of Florida Forum** starts today in Orlando.

From infrastructure and workforce education, to tourism and criminal justice, the annual event promises a comprehensive look at all the challenges Florida will face in the coming years.

Over two days, elected officials, business leaders and state agency heads will update attendees on the state of the state.

For the next two days, the Florida Chamber will examine the state's future.

Monday's lineup includes Chief Financial Officer **Jimmy Patronis**, who will speak about cyber fraud; Agriculture Commissioner **Nikki Fried**, who will focus on the emerging hemp industry; and Attorney General **Ashley Moody**, who will outline state constitutional issues.

The 2019 edition of the forum will also provide insight into the progress the state has made — and the challenges it still faces — since the release of the Chamber's Florida 2030 research project annual event since the release of the Florida Chamber's Florida 2030 project.

The massive research project measured numerous metrics affecting the quality of life in the Sunshine State, including high school graduation rates, employment trends, poverty, housing sales and tourism.

While there are many positive trends in the economy and in educational attainment, there is still adversity to overcome. This week, the Florida Chamber will go beyond the raw numbers to look at what the state and private business can do to make sure Florida is on track for a bright future.

Future of Florida Forum to feature educational trailer on drug abuse — The Florida Chamber of Commerce will welcome the Rx Abuse Leadership Initiative (RALI) of Florida and the RALI CARES educational trailer to the Future of Florida Forum. RALI Florida is an alliance of local, state, and national organizations committed to addressing the epidemic of substance misuse in the state. The RALI CARES trailer provides A3 an interactive experience within the setting of a teenager's bedroom. Attendees will learn from retired law enforcement about the possible warning signs of substance misuse, with a particular emphasis on issues in the business setting. The Forum begins today from 11 a.m. to 5:30 p.m. and continues on Tuesday from 7:30 a.m. to 2 p.m. at the Hyatt Regency Grand Cypress, One Grand Cypress Boulevard, Orlando.

AMERICAN OVERSIGHT

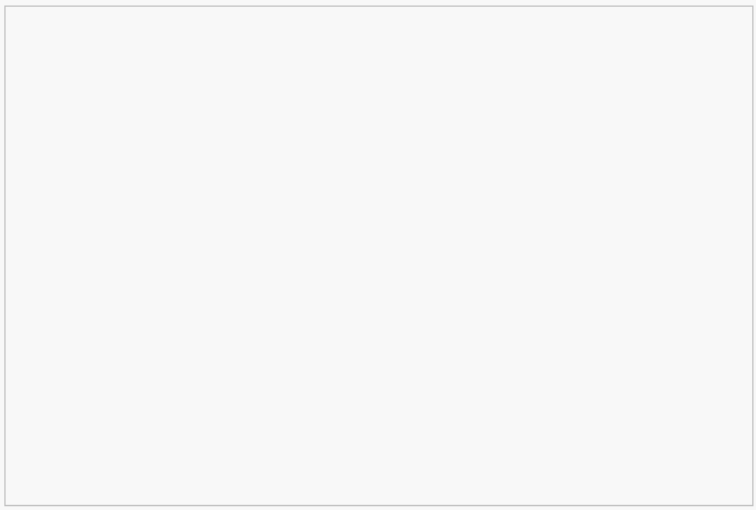
ICYMI — "Arrested Rudy Giuliani associates were VIPs at Ron DeSantis' inauguration" via Steve Contorno of the Tampa Bay Times — Pictures taken at the Jan. 8 inauguration show **Lev Parnas** and **Igor Fruman** mingling in an area cordoned off for an exclusive crowd of dignitaries, elected officials, lobbyists and family. They are wearing suits and sunglasses as they rub elbows with some of Florida's most influential people. Their proximity to the festivities wasn't a coincidence. In last-minute preparations before DeSantis was sworn in, the head of his inauguration team told event organizers to reserve seats near the front for a select group of people. Parnas and Fruman were on the list.

Happening today — Lt. Gov. **Jeanette Núñez** will take part in a panel discussion on domestic violence, 10 a.m., Florida International University, Graham Center, 11200 S.W. Eighth St., Miami.

"Peter O'Rourke investigation blindsides Florida GOP" via Matt Dixon of POLITICO Florida — A blistering federal report accusing **O'Rourke** of wrongdoing had rocked the Republican Party of Florida and raised questions about whether officials knew about the investigation when they chose O'Rourke to lead the Party. DeSantis put him in charge of the state Party in August at the urging ofTrump. The 100-page O'Rourke report landed on a Republican Party already gripped with infighting and coping with an underwhelming response to its Statesman's Dinner, a big annual fundraiser that has yet to attract a keynote speaker and is drawing fewer sponsors than expected. "People are mostly shocked," said a campaign consultant who has long worked with the state Party.



Byron Donald honors Donald Trump at South Carolina forum — State Rep. **Donalds** presented the 2019 Bipartisan Justice Award to **Trump**, who was the keynote speaker at the Second Step Presidential Justice Forum in Columbia, South Carolina. Donalds is the Director of Political Outreach and Strategy of the 2020 Bipartisan Justice Center, the forum's host. "President Trump's leadership on the issue of criminal justice reform has been tremendous," Donalds said. "He has clearly seen how important it is for us to take a good, hard look at the ways our justice system is failing both victims and offenders and make bold changes to balance the scales of justice."

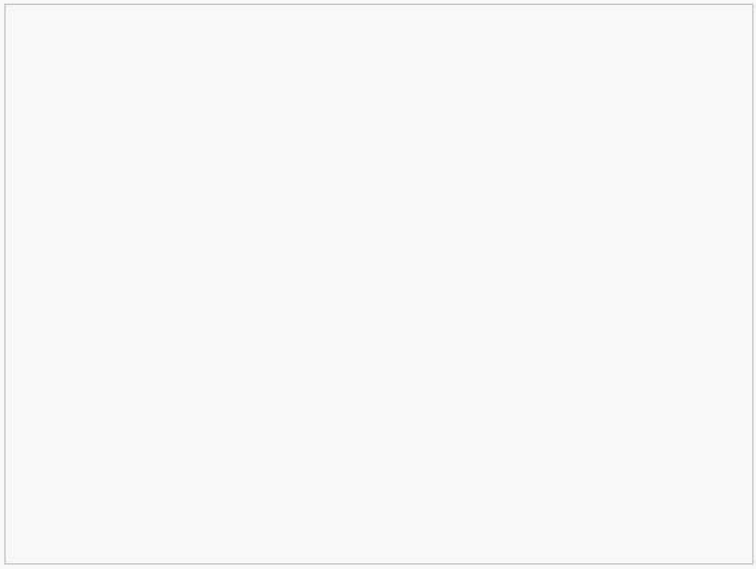
"Florida pre-K issues leave lawmakers with long to-do list" via Emily Mahoney of the Tampa Bay Times — According to a 2018 analysis of states' preschool programs done by Rutgers University's National Institute for Early Education Research, Florida only meets two out ten national "quality standards" for its program. Florida does not require its preschool teachers to have bachelor's degrees, for example. Despite its importance, preschool has not historically received much of the education policy spotlight in the state Legislature compared to K-12 or higher education — and it definitely receives less funding. But early education advocates are hopeful that the 2020 Legislative Session will change that. The first hurdle lawmakers will likely have to address is the disagreement on how to measure students' success.

"Joe Gruters tilts at 'dark money' windmill" via Lauren Ritchie of the Orlando Sentinel — So-called "dark money" donations that don't have to be reported to campaign finance authorities is a two-edged sword — it can be used to help a candidate or to smear one anonymously. **Gruters** wants to stop this practice. "Right now, legislators can't take a cup of coffee from a lobbyist without breaking the law, but here, someone can run $50,000 through the process and use it against you or on your behalf, and no one will know," the

AMERICAN OVERSIGHT

Republican Senator. Gruters for the fourth year in a row has filed a bill that would stop allowing campaign donations to flow through one political committee after another, getting progressively "cleaner" and unidentifiable even after the first rinse.

'It's a mockery of the system': Joe Gruters is taking another stab at eliminating dark money in campaigns. Image via Colin Hackley.



"**Jennifer Webb files three Gulf Beaches infrastructure spending bills**" via Janelle Irwin Taylor of Florida Politics — The first (HB 2421) is an appropriations request for $1 million. If approved, it would pay for sewer Inspection after the construction of a new sanitary sewer force main under and adjacent to Gulf Blvd. The project would also reduce or eliminate the potential for sanitary sewer overflows. The second bill (HB 2423) is the most significant request, $2.5 million for road construction that would also take place after the city's new sewer force main is complete. The last (HB 2425) is an appropriations request for $1.3 million that would pay for "citywide curb and roadway improvements to include 115th Ave. Roadway Improvement and for the Dolphin Drive Curbing and Roadway Improvement, which are "shovel ready."

Delegation meeting — The Leon County legislative delegation meets for a public hearing ahead of the 2020 Legislative Session, 5 p.m., Leon County Courthouse Commission Chamber, 301 South Monroe St., Tallahassee.

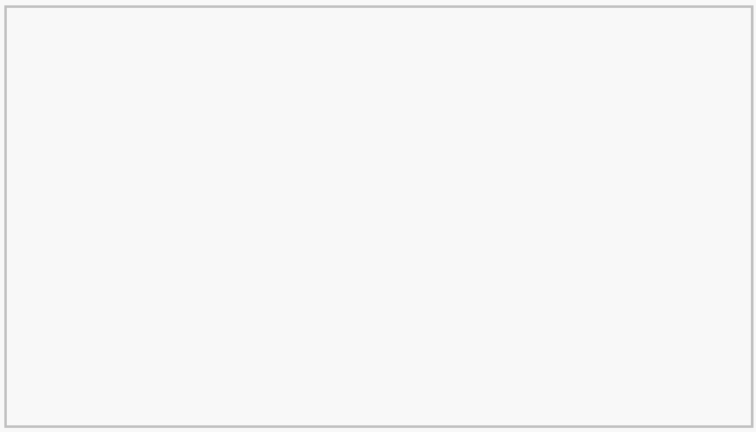
Happening today

The Florida Education Association "Fund Our Future" bus tour enters its second week with events in Leon County and a full schedule of stops, ending the week in Hernando County. Today, the tour will take part in a Little Free Library dedication, 10:15 a.m. Eastern time, Pineview Elementary School, 2230 Lake Bradford Road, Tallahassee.



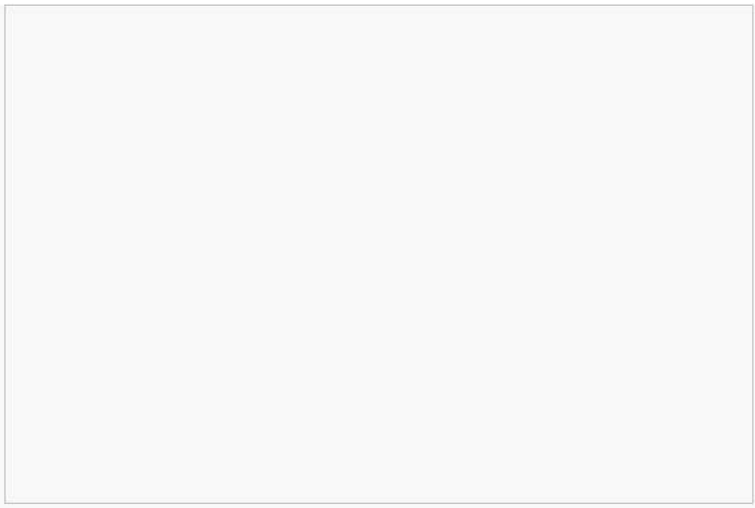
The next stop on the FEA bus tour — Tallahassee.

Also — The Associated Industries of Florida holds its annual conference; scheduled speakers include DeSantis; Attorney General Moody; Agriculture Commissioner Fried; Sen. **Bill Montford**; Reps. Jason Shoaf and Randy Maggard; Enterprise Florida President and CEO **Jamal Sowell**; and state Chief Resilience Officer **Julia Nesheiwat**, 9 a.m., Augustus B. Turnbull III Florida State Conference Center, 555 West Pensacola St., Tallahassee.

AMERICAN OVERSIGHT

"Amendment 4 confusion remains as leader of campaign plans to cast his first vote in Orlando" via Steven Lemongello of the Orlando Sentinel — As **Desmond Meade** prepares to vote next month for the first time, thousands of former felons like him can't go to the polls, and many only think they can't. "We get calls throughout the state from people who are unsure about whether they can vote because of fines and fees," said Meade, who spearheaded the Amendment 4 push last year to restore voting rights to ex-felons. "And we analyze their files, and we come to find out … they don't have any fees or fines." The election calendar presses on anyway. And early voting in for the city elections in Orlando begins whether the state is ready or not.

Desmond Meade — the leader of the campaign that successfully passed Amendment 4 — is preparing to cast his first vote. Image via Getty.



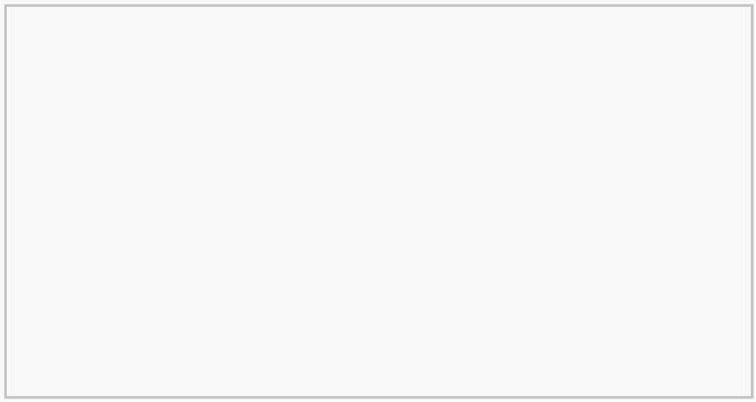
"Judge: Florida Corrections Department incorrect in censorship of magazine, must pay $1.2 million" via James Call of the Tallahassee Democrat — Prison Legal News, a criminal-justice magazine for inmates, was awarded $1.2 million in attorney fees by a federal-district court in Tallahassee. The nine-year-old lawsuit centered on the Florida Department of Corrections rejection of all issues of the 72-page publications based on the content of its advertisements. Florida is the only state which censors the 30-year old publication because of ads for phone services, pen-pals and postage stamps. Four years ago, the district court held that DOC's censorship guidelines did not violate First Amendment rights but that they did violate Prison Legal News' due process rights when officials failed to provide adequate notice the magazine was rejected.

"Divvying up Medicaid patients could spark debate" via Christine Sexton of the News Service of Florida — An algorithm that dictates assignment of many Medicaid patients to health plans could cause another high-stakes tussle among plans that have received an estimated $90 billion worth of contracts to manage care in Florida's Medicaid program. The state Agency for Health Care Administration submitted a report this month outlining options the Legislature could consider to make the process more "equitable" for health plans. If approved by lawmakers, the proposals could help managed-care plans that entered Florida's market as a result of a process that led to awarding Medicaid contracts last year.

"In vacuum of state anti-discrimination laws, some employers act to protect LGBTQ workers" via Bailey Gallion of FLORIDA TODAY — For lesbian, gay, bisexual and transgender employees in Florida, finding workplace acceptance is a tricky thing — without state laws to protect them from discrimination, they must rely on employers to protect them and create an accepting environment. Some local employers accomplish that. Others don't. Under state law, employers can still fire LGBT (lesbian, gay, bisexual or transgender) employees due to their sexual orientation or gender identity. But employers are improving, activists say; many have adopted anti-discrimination policies stating they won't discriminate against LGBT employees. Brevard School District, for example, passed a nondiscrimination policy for LGBT teachers, students and staff in July. But many private schools don't have any such policy.

Spotted — Marc Dunbar in "Legalized sports betting is expanding nationally and Vegas supports the effort" via Republic Online (Kansas) —Dunbar, a Florida-based attorney in the gaming industry, said … high tax rates hurt operators, and therefore consumers. He pointed out that sophisticated computer technology allows operators to detect trends and balance risk — as well as protect consumers … Dunbar said "regulatory or tax handcuffs" will aid exploitation. "You need only look around the world to see ways that it can happen — if not sports betting, then lottery or horse racing," he said. "If you don't allow tech companies to invest in more product, they will not be able to be as sophisticated as the people who want to cheat the game."

AMERICAN OVERSIGHT



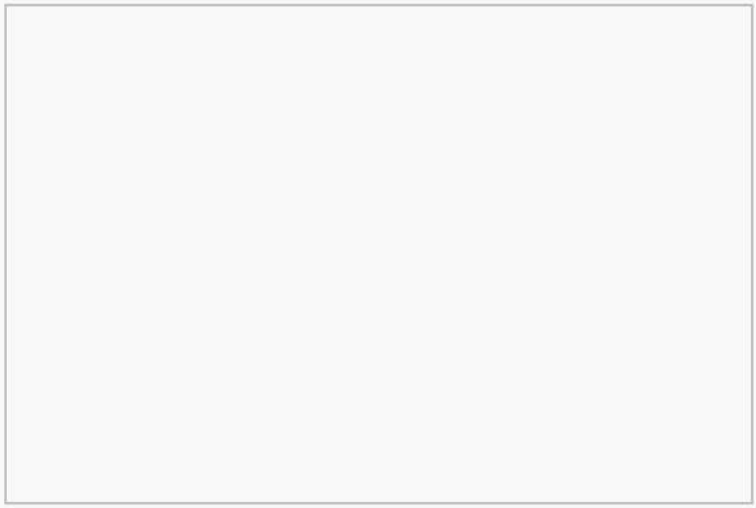
Gaming industry attorney Mark Dunbar says high tax rates hurt operators, and the costs are passed on to consumers.

"**For 40 years TaxWatch has promoted fiscal prudence**" via Steve Bornhoft of 850 Business Magazine — Florida TaxWatch each year presents Principal Leadership Awards to nine educators — three each at the elementary, middle and high school level — who have brought about transformational change in once-struggling schools. And, for 30 years, it has celebrated, with TaxWatch Productivity Awards, state employees who find ways to improve services, increase efficiencies and save tax dollars. Public education is a chief focus; in every county in Florida, the school district is the largest or second-biggest employer. "It's big business, but most of the time, the people running our schools have no business acumen," said TaxWatch President and CEO **Dominic Calabro**. Other priorities for TaxWatch include Everglades restoration; economic development; maintenance of Florida's environmental quality and infrastructure expansion and upkeep.

Mother nature

"**Insurance policyholders being left behind following major storms**" via Craig Drillich for the South Florida Sun-Sentinel — The Florida Association of Public Insurance Adjusters (FAPIA) is concerned about a recent statement by the state's top state insurance regulator that he struggled to "think of a single instance" where an insurance company had failed to timely pay a claim within 90 days, as required by law. This statement is deeply disturbing, particularly since data provided by the insurers confirm that to this day over 100,000 Floridians are still waiting for their Hurricane Michael (2018), Irma (2017) and even Matthew (2016) claims to be paid and resolved. The truth is that there is only one entity controlling the purse strings and deciding what will be paid and when it will be paid and that is the insurance company.

Insurance companies hold all the cards when it comes to the payout of hurricane claims, leaving policyholders on the hook.



"**'Words can't really describe it': Port St. Joe still bears physical, mental scars from Michael**" via CD Davidson-Hiers of the Tallahassee Democrat — Michael hit during high school principal **Josh Dailey**'s first year leading the same school he graduated from. "We're still dealing with the effects every single day," Dailey said. He sat in his office in Port St. Joe High School and recalled the days just after the Category 5 hurricane. "Words can't really describe it." A year later, the school, which was built in 1968, still has a roof missing and issues with mold. The district estimates more than $15 million in damages. Throughout the community, from a church on the water to a historically black neighborhood in the north, the struggle continues.

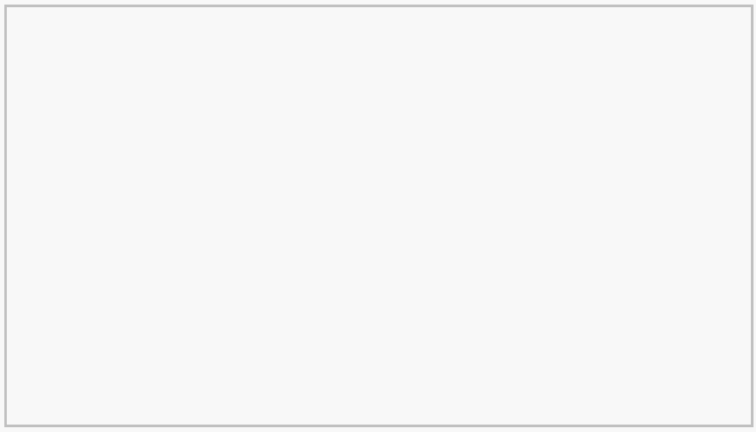
AMERICAN OVERSIGHT

Peachy

"**Judge says impeachment inquiry is legal and justifies disclosing grand jury material**" via Tammy Kupperman, Joan Biskupic, Ariane de Vogue and Manu Raju of CNN — A federal judge gave a legal endorsement to the House Democrats' impeachment probe into Trump and ordered the Justice Department to release grand jury information redacted from special counsel **Robert Mueller**'s investigation. The ruling is a blow to the Trump administration's claims that the House is not conducting a valid impeachment inquiry since there's been no formal vote to authorize the probe. In a lengthy opinion, Chief Judge **Beryl Howell** of the U.S. District Court in Washington, D.C., said the House clearly is conducting an impeachment inquiry. " (A)n impeachment trial is an exercise of judicial power," Howell wrote.

"**Gordon Sondland told House panels Trump's Ukraine pressure was quid pro quo**" via Rebecca Ballhaus of The Wall Street Journal — **Sondland**, the U.S. ambassador to the European Union, told House committees that he believed Ukraine agreeing to open investigations into Burisma Group — a gas company where Democrat **Joe Biden**'s son once served on the board — and into alleged 2016 election interference was a condition for a White House meeting between Trump and Ukrainian President **Volodymyr Zelenskiy**. Asked by a lawmaker whether that arrangement was a quid pro quo, Sondland cautioned that he wasn't a lawyer but said he believed the answer was yes. Trump has repeatedly denied the existence of a quid pro quo related to his push for Ukraine to open investigations.

Gordon Sondland tells the House that Donald Trump's Ukraine pressure was indeed a quid pro quo.



"**In impeachment inquiry, Republican lawmakers ask questions about whistleblower, loyalty to Trump and conspiracy theories**" via Greg Miller and Rachel Bade of The Washington Post — Republican lawmakers have used the congressional impeachment inquiry to gather information on a CIA employee who filed a whistleblower complaint, press witnesses on their loyalty to Trump and advance conspiratorial claims that Ukraine was involved in the 2016 election. The Republicans have refrained during hearings from explicitly accusing the individual of filing the explosive complaint with the U.S. intelligence community's inspector general two months ago. But the questions have been interpreted as an attempt "to unmask the whistleblower," whose identity is shielded under federal law. Republicans appear to be seeking ways to discredit the whistleblower as well as other witnesses "by trying to dredge up any information they can," one official said.

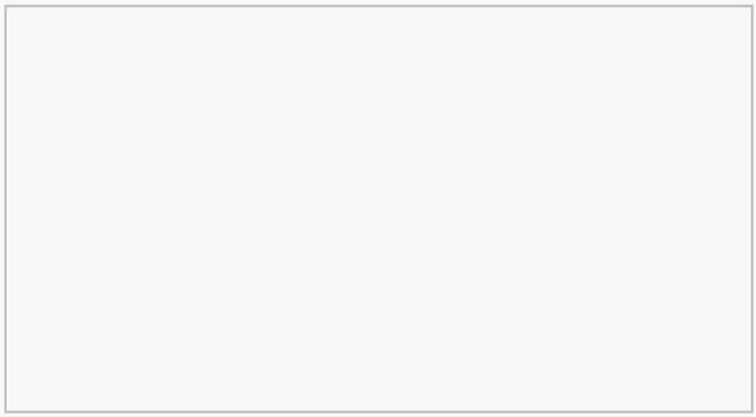
"**Vern Buchanan's impeachment balancing act**" via Zach Anderson of the Sarasota Herald-Tribune — "Do you think the process that the President's going through in Washington is fair?" **Buchanan** asked the crowd at the Sarasota Republican Club's monthly meeting. "No!" audience members yelled out. "It's the most disastrous thing I've ever seen," Buchanan said. "There's no due process, everything's held secretively. It's unbelievable. They get witnesses in there, then they leak out whatever information they want to put out to the process." Buchanan's comments reflect a common GOP complaint about the closed-door meetings that are being used to gather witness testimony in advance of public hearings. The reality is that while Buchanan is a critic of the impeachment process, he also is not out front trying to disrupt the process.

AMERICAN OVERSIGHT

D.C. matters

"**With Trump expected at Game 5, the Nationals and MLB prepare for a presidential visit**" via Chelsea Janes and Adam Kilgore of The Washington Post — Presidential visits are part of D.C. baseball tradition. Trump will attend his first Nationals game as President, but he will not throw out the first pitch. Trump does not plan to arrive in time to see that first pitch; he is planning to arrive after the game begins. Trump made that decision to alleviate the crush of fans entering the ballpark with higher security constraints. The past few days have included coordination among the Nationals, league officials and the White House advance staff to plan for the President's visit.

Donald Trump attends Game 5 of the World Series but breaks with tradition by not throwing the first pitch.



"**Who will take up Francis Rooney's environmental mantle? Advocates hope climate, water quality remain priorities**" via Amy Bennett Williams of the Fort Myers News-Press — Environmentally,**Rooney** was a rare bird. A former oil company executive who sponsored an offshore drilling ban, a one-time climate change denier who became a carbon tax champion, Rooney was a dyed-in-the-wool Republican politician who ecological advocates describe with profound affection — and growing wistfulness. Professor **Mike Savarese**, the program coordinator of FGCU's Marine and Earth Science department, has worked with Rooney on climate change issues. He describes the congressman as a rebel with the courage of his convictions, "incredibly committed, with idealism and a lot of integrity to stand up for climate," Savarese said — "the only one in the House that's really stepped up to do this." Even the environmental advocates who don't rave about Rooney acknowledge that he ran against the current Republican grain.

AMERICAN OVERSIGHT

2020

Two of Trump's lawyers representing him amid his impeachment saga, **Jane** and **Martin Raskin**, hail from Coral Gables. Mar-a-Lago, is not far from the Boca Raton offices of the National Enquirer — which went so far as to spearhead a "catch and kill" propaganda scheme in 2016 to hush women who allegedly had affairs with Trump — and the influential conservative publication Newsmax, whose CEO, **Christopher Ruddy**, has known Trump for years.

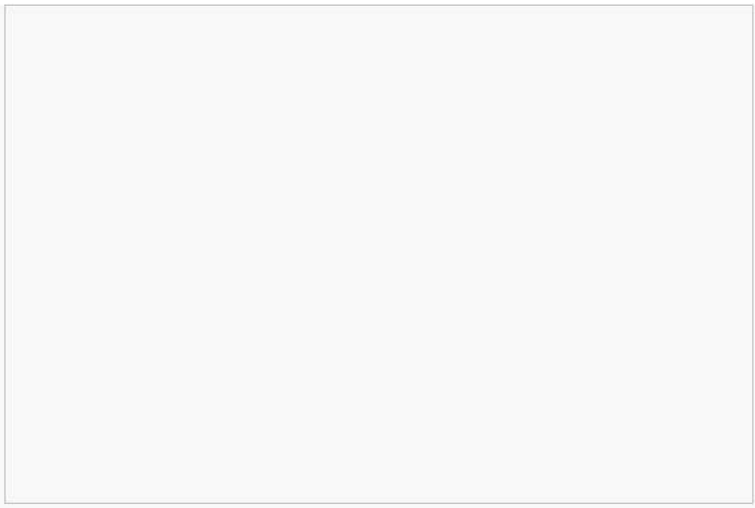
"**How Trump's campaign manager — South Florida's Brad Parscale — learned to navigate and thrive in the inner circle**" via Michelle Ye Hee Lee, Michael Scherer, Josh Dawsey and Anu Narayanswamy of The Washington Post — When Parscale was looking for advice about how to navigate Washington, D.C., after running the digital strategy for Trump's upstart presidential campaign in 2016, the brash political newcomer turned to a Beltway power couple. **Katie Walsh** and **Mike Shields**, both former chiefs of staff at the RNC, advised him on how to make the most of his new perch, he said. Since then, the three have helped each other flourish inside the Republican Party ecosystem, recommending each other's services to top GOP officials and candidates. Together, the trio have broad influence across the party — drawing millions of dollars from 23 party committees and organizations since the beginning of 2017, according to campaign finance filings and people familiar with their work.

Brad Parscale is among the cast of characters from South Florida that are fueling Donald Trump's reelection bid.

"**'We are asking you to dig deep': Joe Biden seeks to steady finances as allies fret**" via Shane Goldmacher of The New York Times — In a memo to top bundlers this week, Biden's campaign manager, **Greg Schultz**, sought to allay growing concerns that Biden is facing a cash crunch and won't be able to stay competitive with his rivals. "We will have the resources we need to execute our plan," Schultz wrote. "We're asking you to dig deep." The Biden campaign is racing to contain the fallout from revelations that his campaign is spending more money than it is taking in. Biden's cash on hand — $9 million — is a fraction of what **Bernie Sanders** ($33.7 million) and **Elizabeth Warren** ($25.7 million) have banked. He even has less on hand than Mayor **Pete Buttigieg** and Senator **Kamala Harris**, who are well behind him in the polls.

The trail

Happening tonight:



AMERICAN OVERSIGHT

"**Pro-Trump Republican leader considers election challenge to Parkland Senator who voted to reinstate Scott Israel as sheriff**" via Anthony Man of the South Florida Sun-Sentinel —**Joe Budd**, an early and continuing supporter of Trump, said he's considering a 2020 election challenge to state Sen.**Kevin Rader** after the Senator voted this week against removing**Scott Israel** as Broward County sheriff. "The people deserve a choice," Budd said in an interview. He said he hasn't thought about running until all the attention started being paid to the Israel case. "I really expected Kevin would have broken with the party, being that's in his district," Budd said.

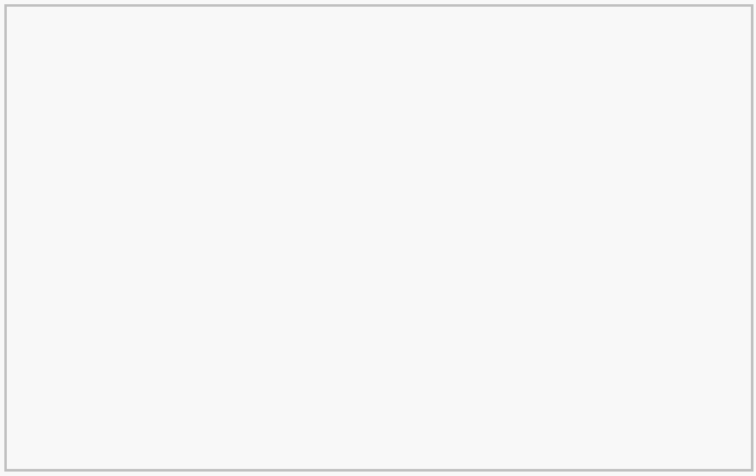
"**David Fairey takes on Tommy Gregory, Florida's 'broken system' in state House campaign**" via Ryan Callihan of the Bradenton Herald — "We tell our kids all the time that they need to get involved if they want to change the system," said **Fairey**, who is running as a Democrat against first-term Rep.**Gregory** in House District 73, which includes parts of eastern Manatee and Sarasota counties. And Fairey, who works as a CFO at a Sarasota-based internet marketing company, says he has firsthand knowledge of just how broken the system is. A lack of affordable housing and the weight of student loan debt are issues that Fairey is familiar. Solving issues surrounding gun safety, health care and economic reform are Fairey's top priorities. Democrat, Republican or independent, Fairey says, these are issues that everyone wants to figure out.

"**Tensions over Broward sheriff's ouster preview brutal election campaign ahead**" via Steve Bousquet of the South Florida Sun-Sentinel — **Scott Israel** was removed after 22 Senate Republicans and three Democrats decided he was guilty of incompetence and neglect of duty for his agency's handling of two mass shootings. The evidence showed that eight deputies refused to charge the school and confront the gunman. But the Senate's own expert concluded that those were individual failures that did not justify removing Israel from office. Parkland families disagree. Broward's chief law enforcement officer is chosen in partisan elections, and today's Broward is a majority-minority community where 39 percent of Democratic voters self-identify as black. Scott's core argument of "don't take my vote" is sure to resonate across Broward.

AMERICAN OVERSIGHT

The contentious removal of former Broward County Sheriff Scott Israel may just be a foreshadowing for an equally contentious 2020 race. Image via Colin Hackley.

"**This Miami commissioner gave a candidate in another district a six-figure check**" via Joey Flechas of the Miami Herald — Having a strong political alliance could be priceless to some elected officials, but Miami Commissioner **Ken Russell** has put his number on it — $150,000. In September, Russell pumped the six-figure sum into the political committee for **Eleazar Meléndez**, the commissioner's former chief of staff and a candidate in the District 1 race. Russell moved the money from his committee, Turn the Page, to Meléndez's committee, Vision with Action. Russell has raised $584,000 for his committee since it opened in 2018, with $100,000 of that coming from his abandoned congressional run in 2018. The donation to Meléndez is the committee's single largest expenditure, and it's this municipal election's most public case of a sitting commissioner involving himself in another district race.



"**With experience and baggage, Alex Diaz la Portilla runs for Miami's District 1 seat**" via Joey Flechas of the Miami Herald — Vying for the most local level of public office, **Diaz de la Portilla** said he's on the path toward victory. "Experience matters," Diaz de la Portilla said. "This is not an entry-level job." Diaz de la Portilla might have the most experience and money, but he also carries the most baggage. He was arrested in Boston seven years ago after police said he acted "belligerently" when he and a guest were told to leave after they ignored orders to stop smoking in a hotel room. His ex-wife accused him of stalking after they separated. Public records show that in January, a home he owned with his ex-wife was foreclosed — a "personal matter" stemming from a bad divorce, he says. A mortgage foreclosure sale has been delayed due to a court battle over attorneys' fees.

Local

AMERICAN OVERSIGHT

"**No real help' available for thousands struggling in Central Florida's opioid crisis, research finds**" via Kate Santich of the Orlando Sentinel — Prescriptions for opioids have plummeted in Central Florida in the past 18 months, but the number of overdose deaths is down only modestly because of a "flood" of powerful illicit fentanyl into the region. Those are the key findings of a sweeping report by UCF researchers for Project Opioid, an initiative launched in January. "All of the complications involved with this boil down to a simple math problem," said **Kendall Cortelyou-Ward**, director of the health care informatics master's program at the University of Central Florida. There are too many people that have opioid-use disorder — some 69,000 in our region — and there's not enough medication-assisted treatment for them.

"**JEA executives' retention bonuses seen by some as incentive to sell utility**" via Christopher Hong of the Florida Times-Union — Thirteen senior administrators at JEA, including CEO **Aaron Zahn**, who has led the charge to explore privatization, are all in line to receive six-figure bonuses if JEA is sold. The bonuses are equal to each member's salary, putting Zahn's at $524,000. JEA describes the payouts as "retention bonuses" that could help prevent a brain-drain of employees from leaving as the utility faces an unknown future. However, some council members are concerned that people deeply involved in the decision-making process have so much to gain from a certain outcome. "It's concerning because it's evidence there's an incentive to sell the JEA," said City Councilwoman **Randy DeFoor**.

A retention bonus for executives like JEA CEO Aaron Zahn may be coming in the utility's privatization.

"**The gut check Jacksonville's consolidated government needs**" via Nate Monroe of the Florida Times-Union — "Mayor **John Peyton** leveraged the power of consolidation to implement a high-fiber governing diet," **Chris Hand** writes in the 50th-anniversary update to "A Quiet Revolution," a detailed accounting of Jacksonville's transformation into a consolidated government in the late 1960s. Hand believes in consolidation, but his contributions to this new edition add a much-needed and grounded assessment of Jacksonville's modern history — including giving voice to skeptics and noting consolidation's failures, particularly for black residents. This should help keep the book relevant as more people vocally question the much-touted reform that made Jacksonville one of the most populous cities in America. A straightforward reckoning of consolidation's promises and its reality has long been overdue.

"I-4 Ultimate: Delays, overruns and deaths plague project" via Kevin Spear of the Orlando Sentinel — Today, the 21-mile and $2.3 billion rebuilding of Interstate 4 through metro Orlando is slogging through rising costs to an uncertain finish date, with crews working day and night under the pall of repeated worker fatalities. "The construction process is now more than an inconvenience, it is endangering the lives of commuters, workers and visitors," said U.S. Rep. **Stephanie Murphy**, a Democrat whose district covers the interstate from Sanford to Orlando. "We cannot tolerate any more delays. FDOT should be working with the contractor to ensure the project is completed promptly and safely." Countless drivers can't wait until the work is done, having had enough already of white-knuckle driving.

"Warning Icon warns of abuse and neglect in nursing homes, including two in Pensacola" via Melanie Payne of the Fort Myers News-Press — Floridians trying to the right nursing home will no longer have to wonder if there's been a recent incident of abuse, neglect or exploitation. When they look up the nursing home on the Medicare website, they'll see an icon with a red circle surrounding a hand, palm forward and fingers up, in the "stop" position. The icon is the brainchild of the Centers for Medicare and Medicaid Services (CMS), the government agency that maintains the Nursing Home Compare website. The icon will appear for one year on the information page of nursing homes where a patient was harmed because of neglect or was physically, mentally or sexually abused.

"Rush Limbaugh, Gay Hart Gaines to be honored at Palm Beach event" via Ryan Nicol of Florida Politics — The National Review Institute is set to honor conservative radio host **Limbaugh** and Republican fundraiser and activist **Gaines** at its annual Buckley Prize Dinner. That dinner is named after conservative thought leader **William F. Buckley**, who launched the institute as well as the National Review magazine. This year, the group will hold the dinner at The Breakers in Palm Beach. The Buckley Prize Dinner will kick off Wednesday evening with a 6 p.m. reception, followed by the dinner and award presentations. According to the group's organizers, about 450 people are expected to attend the dinner.

The National Review Institute will honor conservative firebrand Rush Limbaugh at its annual Buckley Prize Dinner.

"Black Republicans form new group, ready to be 'hated' to win Trump reelection" via Abraham Mahshie for the Palm Beach Post — The idea came to her while watching African American pundits on MSNBC and CNN. "They speak as though they're representing or speaking for the whole beehive community of African Americans," said **Cheryle Davis-Darrell**, president of the newly formed Black African American Republicans Club of the Palm Beaches, or BAARC. That's when she came to a realization: "I don't think that way. A lot of people that I know don't feel that way." The longtime courthouse volunteer, guardian ad litem, and volunteer dispatcher at the Palm Beach County Sheriff's Office felt she could do more for the party than just attend Trump rallies.

AMERICAN OVERSIGHT

Opinions

"**The zombie campaign**" via Olivia Nuzzi of New York magazine — To anyone paying attention — the army of political professionals more wired to observe shortcomings than are those likely to actually vote for Biden or anyone else — it looks, unmistakably, like it's happening again. His vulnerabilities are close to the surface. It's not just his age itself. It's his tendency to misspeak, his inartful debating style, and — most of all — his status as a creature from another time in the Democratic Party. It's not just that the Biden of yesteryear sometimes peeks out from behind the No. 1 **Obama** Stan costume. It's that the Biden of today is expected to hold his former self accountable to the new standards set by a culture that's prepared to reject him.

"Progressives, Hispanics are not 'Latinx'" via Giancarlo Sopo for USA Today — Gender-nonconforming Americans should be treated with compassion and respect. If someone wants to be called Latinx, that is fine, but the label should not be forced upon all Latinos. Hispanic Americans face plenty of challenges. The last thing we need are progressives "wokesplaining" how to speak Spanish.

"**Joe Henderson: Despite opposition, open primary concept has some good points**" via Florida Politics — The question of whether to open primaries to all registered voters has done the impossible. Republicans and Democrats are actually united around something besides mom and apple pie. They oppose open primaries. Republicans filed a legal brief against the "All Voters Vote" proposal. While there certainly are flaws in any open primary plan, I don't agree that it would decimate voter choice. It would reduce party control over these elections, though. It also might give candidates a way out of conforming to the ideological checklist we have now. Deep blue progressive Democrats or NRA-regimented Republicans might not have oversized influence. There should be a way to maintain primary integrity without freezing out about a quarter of the registered voters.

"**'Joker' becomes the highest-grossing R-rated film ever**" via Frank Pallotta of CNN Business — The film, which stars **Joaquin Phoenix** as a troubled man who turns into a killer clown, has made roughly $788 million at the worldwide box office, Warner Bros. confirmed on Friday. That is enough to eclipse the record set by "Deadpool," which made $783 million globally when it came out in 2016. The film may be the highest-grossing R-rated film globally, but it still has a long way to before beating the highest-grossing R-rated film domestically. That record still belongs to **Mel Gibson**'s biblical drama "The Passion of the Christ," which made $370 million in North America in 2004. "Joker" has so far made $259 million in the U.S.

"**Florida's favorite Halloween candy and other ways people spend money on the holiday**" via Dian Zhang of GateHouse Media — Americans' Halloween spending is projected to drop slightly, according to the National Retail Federation's annual survey conducted by Prosper Insights & Analytics. With an estimated $8.8 billion spent on candy, costumes, decorations and greeting cards, it's still expected to be the third-highest figure in the survey's 15-year history, just off the peak of $9.1 billion in 2017 and last year's $9 billion. The average shopper plans to spend $86.27 this year, down 52 cents from last year. Every region seems to have a favorite sweet, so CandyStore.com released a map showing each state's top pick. In Florida, Skittles was the most popular candy, having sold 563,882 pounds. Ranking second and third are Snickers and Reese's Cups.

"**You won't want to leave to giant guitar hotel once you see its most amazing feature**" via Connie Ogle of the Miami Herald — We told you the pool was going to be ridiculous. And we were so right. But it's even better than we imagined, and not just because apparently mermaids are floating around there waiting for you to throw them a fish or something. The pool is part of the Bora Bora experience, and we are obsessed with the Bora Bora experience, where you rent a "cabana" for day use. These are "cabanas" in the sense that the guitar is a "hotel" — which is to say not at all because both are SO MUCH MORE than we ever could have hoped for. The Bora Bora experience comes with a private bathroom, a private plunge pool and butler service.

The most amazing feature of the guitar-shaped Seminole Hard Rock Hollywood just might be the Bora Bora pool.

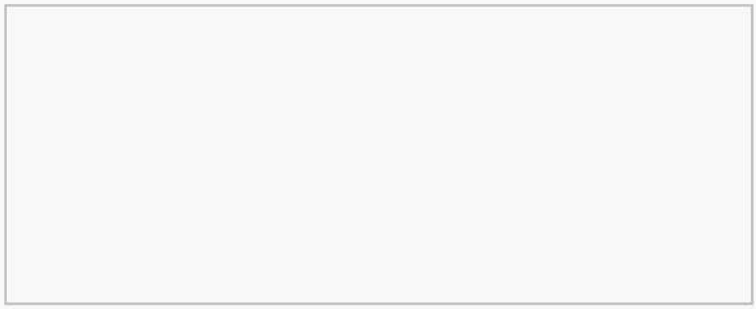
Today's Sunrise

Sunrise gives an update on election security in Florida. The Russians hacked into two county databases during the 2016 election, and the Secretary of State's office is spending millions of dollars to try to prevent a recurrence in 2020. However, details of what exactly is being done are not forthcoming.

Also, on today's Sunrise:



— Gov. **Ron DeSantis** says the upcoming Legislative Session could be better known as the Year of the Teacher. Teachers Hope it's true — but after the way they've been treated in Tallahassee in the past couple of decades, they remain cautiously doubtful.

— Mega-attorney **John Morgan**'s $15 minimum wage constitutional amendment had cleared a significant hurdle. They have enough signatures to make the ballot. But there's still a way to go.

— It's Halloween! While kids fill bags with candy, the real treat goes to retailers. The holiday for ghosts and ghouls is a major economic driver in the Sunshine State.

— More Florida Men madness: A Vero Beach man in a MAGA cap says the hat was slapped off his head by another man who proceeded to spit on him, saying: "You should go back to Russia, you f**ing communist."

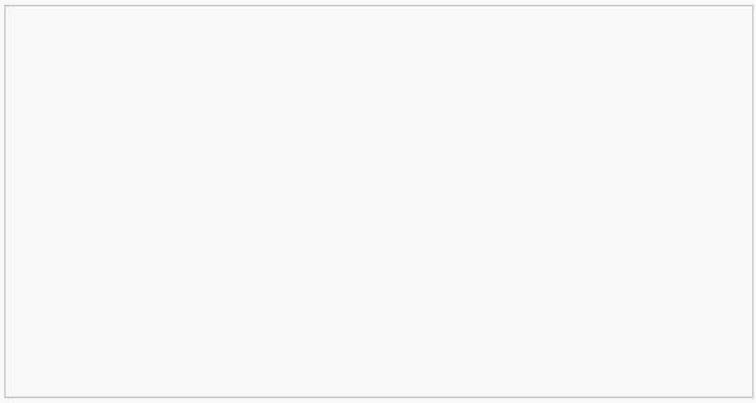
Top story

The Florida Retail Federation is expecting record-high spending this year for Halloween.



— **Survey says …**: The National Research Federation conducted a survey of shoppers this year who indicated average planned spending of more than $86 each on things like candy, decorations and costumes.

— **Big bucks**: The 2019 spending forecast is the third-highest record for the Halloween season, with 2017 being the peak.

— **Sweet tooth**: Nearly all Halloween shoppers will purchase candy this month, with 95 percent indicating they'd be ready to hand out sweets to trick-or-treaters in their neighborhoods. Nearly three-quarters of Halloween shoppers said they would purchase decorations, and more than two-thirds plan to buy costumes.

— **Quote**: "Whether you're passing out candy to trick-or-treaters, hosting a party or searching for the perfect costume this season, Florida families can find their Halloween needs at Florida's retail businesses," said **Scott Shalley**, President and CEO of the Florida Retail Federation.

"**Florida's favorite stores** — from the big box brands to the family-owned businesses on Main Street — are ready to deliver this Halloween," he added.

Florida retailers expect Halloween spending to scare up a record.

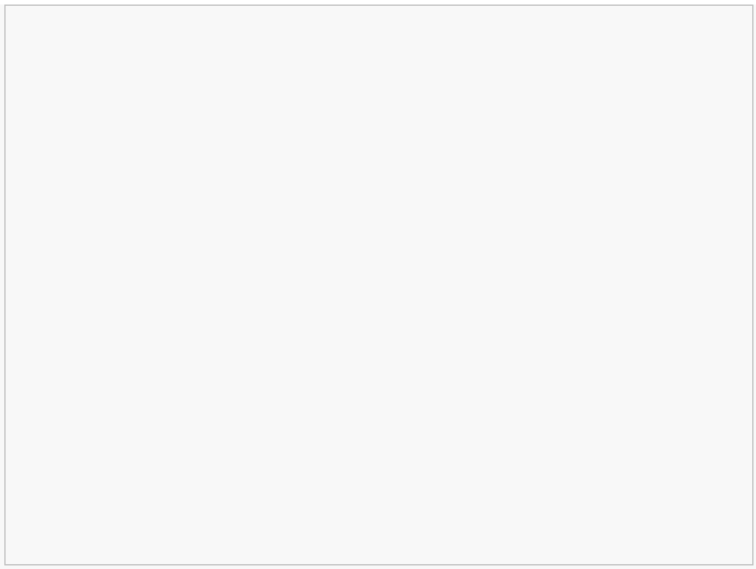
Dateline: Tally

"**Florida GOP leaders begin calling for Peter O'Rourke's ousting**" via Jacob Ogles of Florida Politics— Top GOP officials within the Republican Party of Florida expressed anger at reports of internal friction. Now, at least eight state board members have called for the termination of Executive Director **Peter O'Rourke**. As negative publicity continues to pile, more are openly speaking of taking corrective action. Text messages shared with Florida Politics show more than eight state board members have called on the removal of the executive director. At least one state board member suggested the party call **George Riley**, who served as executive director in 2016 when Republicans carried Florida for President **Donald Trump,** to replace O'Rourke.

"**Jimmy Patronis looks to Ron DeSantis on financial regulator**" via Jim Turner of the News Service of Florida — Chief Financial Officer **Patronis** is deferring to DeSantis about how to proceed with hiring a new top financial regulator. Patronis rejected any insinuation he was in a compromised position in the pending hire, after earlier this year championing the hiring and firing of former Office of Financial Regulation Commissioner **Ronald Rubin**. The series of events drew heavy attention, in part because Rubin was accused of sexual harassment. DeSantis, Patronis, Attorney General **Ashley Moody** and Agriculture Commissioner **Nikki Fried** will choose a successor to Rubin. But Patronis said he is awaiting the lead of DeSantis on the issue.

AMERICAN OVERSIGHT

On hiring a new state financial regulator, Jimmy Patronis is going to take his cue from Ron DeSantis.



"**Alex Andrade's bill would end mandatory sentences for nonviolent drug offenses**" via Jim Lytle of the Pensacola News Journal — Currently, Florida law requires mandatory sentences for drug crimes no matter any mitigating circumstances in the case. **Andrade**'s bill is a companion bill to a proposal by Sen.**Rob Bradley**. It aims at removing mandatory minimums for drug possession if the person convicted was not engaged in violence when they were arrested, and they're not already convicted felons. The bill also increases the amount of drugs a person must be found with for that person to be charged with drug trafficking rather than just possession. Andrade's bill also allows for a person with a mandatory sentence to ask the court to reconsider their original sentence under the new law.

"**After cop handcuffed 6-year-olds at Orlando school, lawmaker seeks ban on arresting kids under 12**" via Monivette Cordeiro of the Orlando Sentinel — Six-year-old**Kaia Rolle** still has nightmares more than a month after she was arrested at her school. Her grandmother **Meralyn Kirkland** said the first-grader has reverted to wetting the bed in the weeks since Orlando police Officer **Dennis Turner** handcuffed her and another 6-year-old at Lucious & Emma Nixon Academy Sept. 19. Kaia was taken to a juvenile jail on a battery charge for kicking and punching school employees during a tantrum, police said. During a Wednesday press conference at the Orange-Osceola State Attorney's Office, Kirkland said she was supporting SB 578, a bill filed by state Sen. **Randolph Bracy** Jr. that would prohibit children younger than 12 from being arrested, except for under extreme circumstances.

"**'Safeguards' eyed for college athlete proposals**" via the News Service of Florida — After scoring a victory when the NCAA governing board moved toward letting college athletes make endorsement money, Florida lawmakers are looking to add "safeguards" to legislative proposals filed for the 2020 session. Before the NCAA's announcement, four Florida lawmakers had filed bills aimed at allowing college athletes to cash in on their names, images and likenesses. One of the bill sponsors, Rep. **Chip LaMarca**, said he would look to add a financial-literacy education requirement, along with prohibitions on endorsements for recruiting and transfer advantages. "I am cautiously optimistic about this news from the NCAA," LaMarca said in a statement.

"**Jackie Toledo asks fellow lawmakers for $1.5M for TBARTA**" via Janelle Irwin Taylor of Florida Politics — **Toledo** filed HB 2483 this week along with an appropriations request for the funding. It would pay for a nearly $300,000 salary and benefits package for TBARTA Executive Director **David Green**. It also includes more than $987,000 for additional staff salaries and benefits, including technical support, financial administration and oversight, grants management and administration, marketing and public relations, project management and human resources administration. Another $213,214 would go to expenses for rent and utilities, phone and internet, travel and parking, training, printing and copying, office supplies, postage, office furniture and equipment and various other fees and expenses. The requested appropriation is for nonrecurring funds.

AMERICAN OVERSIGHT

Jackie Toledo is asking for $1.5 million for Tampa Bay's transit agency.

What Tim Stapleton is reading —Nurse practitioners renewing push for independence— The Florida Association of Nurse Practitioners will redouble its efforts to gain independence from physicians in the wake of Hurricane Michael, **Alexandra Glorioso** of POLITICO Florida reports. During a discussion at a state Medical Advisory Committee meeting, FANP Chair **Stan Whittaker** said the region had far fewer doctors today than when the Category 5 storm hit last year, leaving many patients without adequate access to health care. "It's an overwhelming obstacle," he said. "We're just not getting any options." However, he said allowing nurse practitioners to open solo practices could alleviate at least some of the burden.

Statewide

"**Consumer index reveals Florida residents feel concerned about U.S. economy**" via WJCB — As the holiday shopping season approaches, some Florida residents are feeling more pessimistic about the economy. The University of Florida released its monthly consumer sentiment index is at 96.1, which is down half a point from a month ago. The index ranges from 2 to 150, and four out of the five categories that were gauged have lost ground. The study found that residents were concerned about the long-term health of the U.S. economy.

"**Florida among worst states to survive a recession in 2020**" via Brendan Ward of the Tampa Bay Business Journal — A recent report from FitSmallBusiness.com found Florida to be one of the worst states to survive a recession in 2020. The study used a variety of factors to create an overall score that was then used to create the rankings. Florida ranked as the eighth-worst state to survive a recession in 2020, coming in at No. 42. The Sunshine State managed a score of 26.025, compared to the top state, which scored 35.375. FitSmallBusiness.com ran a similar report in 2017, the last time the U.S. feared a looming recession. In that report, Florida ranked as the 14th best state to survive a recession. Now two years later, it dropped 28 spots.

"**Florida students see drops in reading scores**" via Jessica Bateman of WLRN — Across the country and throughout Florida, students performed worse on the 2019 National Assessment of Educational Progress (NAEP) than the same tests two years ago. The exams are given every other year to a representative sample of fourth and eighth-graders by the National Center for Education Statistics (NCES), a division of the U.S. Department of Education. Florida public schools saw significant drops in reading performance from 2017, a shift that was reflected nationwide. Students across the board saw decreases in reading performance, except for the very strongest readers, NCES reported.

Happening today — Florida Education Association President **Fedrick Ingram** will deliver a speech on student success at Hawthorne Middle-High School, 21403 SE 69th Ave., Hawthorne. The FEA visit to the school — part of its continuing statewide bus tour — will be 1:15 p.m.

"**School on the day after Halloween? Boooooo, petitions say**" via Austen Erblat of the South Florida Sun-Sentinel — More than 200,000 people from school districts across Florida — and more than a million people nationwide — have signed online petitions calling for no school on the day after Halloween. It's not clear how many of those who signed petitions are students, but "a lot" would be a good guess. "There's nothing scary about the fact that over 2,000 kids and teens have come to Change.org to say that they want the school day after Halloween off," said **Michael Jones**, managing director of campaigns at Change.org. "This is a major trend, and we hope schools listen and give students a treat. We encourage students to start their own petitions to make their voices heard in their own school districts."

AMERICAN OVERSIGHT

Over one million people have signed a Change.org petition calling for a day off from school on the day after Halloween. Image via Quoron Walker of the Courant Community.

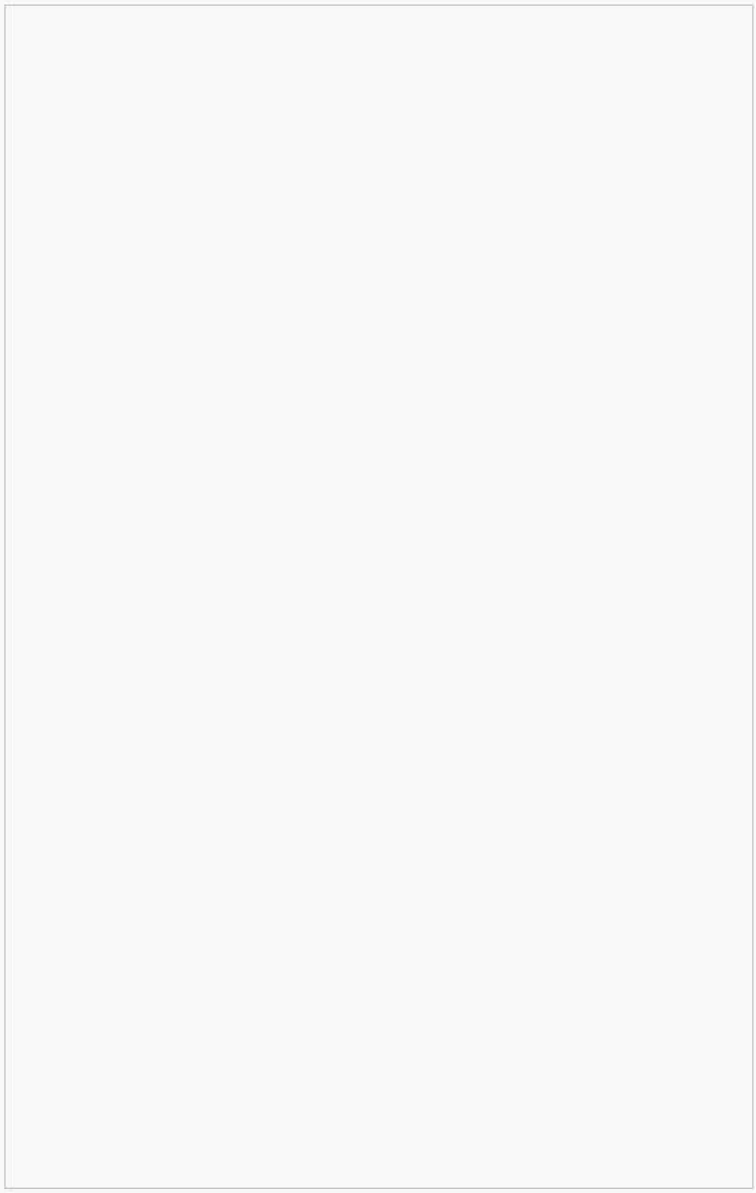
Nikki Fried announces $500,000 'Food Recovery Grant' legislation — The Agriculture Commissioner this week toured Pero Family Farms, a fifth-generation family farm, then announced new legislation creating a $500,000 grant program to "support and promote food recovery efforts between local farms and food banks,' a news release said. "By helping move leftover produce from fields to food banks, we can reduce food waste (and) break the cycle of food insecurity," she said. Farmworkers and local nonprofit volunteers often collect leftover produce from farm fields for distribution through food banks. Fried's legislation, to be filed in the 2020 Legislative Session, will help promote the food recovery program to more nonprofit organizations.

Trick or treating? FDLE has a few safety tips — The Florida Department of Law Enforcement wants kids to have a fun and safe Halloween, and it has a few tips for parents that could prevent something truly scary from happening while they're out collecting candy. FDLE says parents should have the names and contact info for all trick-or-treaters in their child's group. If a child gets lost, getting them home is a lot easier if they know to call 911 in an emergency and can recite their full name, address and telephone number — just make sure they know not to hand that information out to strangers. Kids should also be encouraged to use crosswalks and sidewalks. Finally, parents can download the FDLE app for up-to-date public safety information.

Taxes are tricky

AMERICAN OVERSIGHT

Is Halloween candy a trick or a treat? Both, if you're buying it in Florida! Groceries are generally exempt from the Florida sales tax, but candy can get confusing. Most of the candy that trick-or-treaters collect, and adults hand out (and eat), is subject to the 6 percent state sales tax and any applicable local option sales tax, so long as it costs at least ten cents. Other food items that are "similar to candy" are also taxable, including candy apples, chewing gum and breath mints (except those containing aspirin, laxative, or antacids), cotton candy, fruit-flavored sticks, jelly beans, licorice, and lollipops.

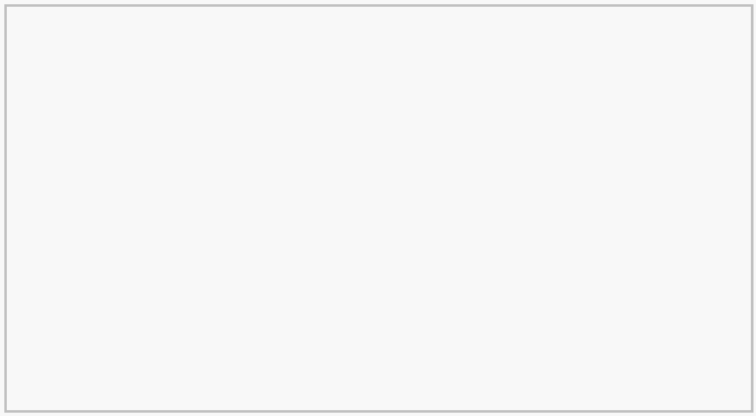


Then it gets tricky. Chocolate and glazed or sugarcoated fruit are taxable, but chocolate chips and glazed fruit are exempt when "advertised or normally sold for use in cooking or baking." Frosting, powdered sugar, and items used to decorate baked goods are also exempt.

One of these treats is a trick: marshmallow candy is taxable; marshmallows are exempt.

Ice cream and frozen yogurt are exempt if sold in containers larger than one pint, but it is taxable if sold in pints (sorry, Ben & Jerry) or smaller sizes. Popsicles, fudgsicles, frozen fruit bars, and other frozen novelties are taxable.

These goodies for trick-or-treaters are a real treat, as they are tax-free: cookies (even if chocolate-coated), nutrition bars, cracker jacks, fruit rollups, chips, cheese puffs, granola and cereal bars, nuts, and pretzels. All these treats can be covered in chocolate, candy, honey, or yogurt and remain tax-free.



If you want to celebrate Halloween with something truly scary, read the Florida Administrative Code concerning the taxation of groceries.

AMERICAN OVERSIGHT

Mother nature

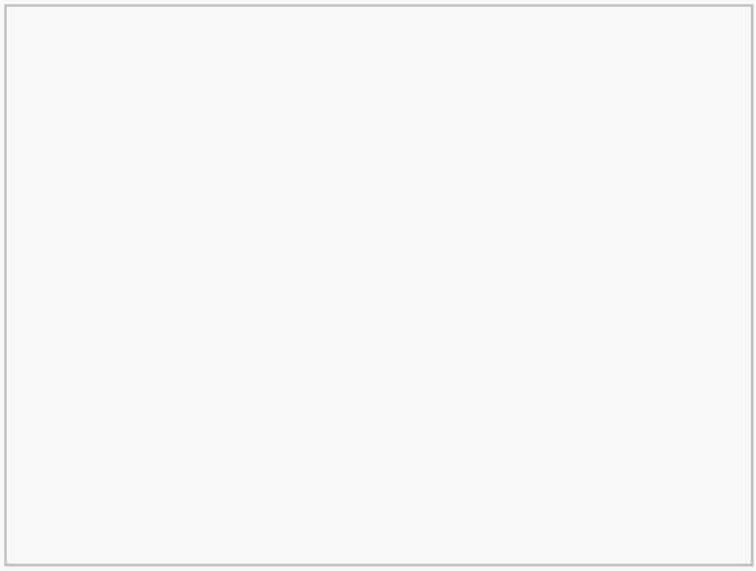
"Judge ready to wade into water war" via Jim Saunders of the News Service of Florida — Senior U.S. Circuit Court of Appeals Judge **Paul J. Kelly**, appointed as a special master by the U.S. Supreme Court, will weigh whether Georgia uses too much water from a river system that flows into Apalachicola Bay. Kelly's ultimate recommendation to the Supreme Court could help determine whether Florida will be successful in its attempt to get a cap on Georgia's water usage from the Apalachicola-Chattahoochee-Flint system. "As Georgia has drastically increased its consumption of upstream waters, especially along the Flint River for agricultural purposes, the amount of water flowing into the Apalachicola has shrunk dramatically. This has had the predictable effect: The Apalachicola has suffered, and its oyster fisheries, in particular, have collapsed," Florida's attorneys wrote.

The Florida-Georgia water war is heating up, with Apalachicola Bay's oyster fields on the line.

"Florida DEP issues notice of intent to allow exploratory drilling in Apalachicola River basin" via Jeff Schweers of the Tallahassee Democrat — Cholla Petroleum of Dallas applied for permission two months before Hurricane Michael to sink six exploratory wells between 13,600 feet and 14,200 feet between Dead Lakes and the Apalachicola River in Calhoun County. The exploratory drilling would punch into the Floridan aquifer, which environmentalists said could put the water supply for the Panhandle at risk of contamination. **Alvaro Linero**, the DEP's program administrator for Oil and Gas, sent an email to**William Lawson**, the oil company's vice president for land that it intends to publish a notice of intent to issue the permits.

"FWC is trying to keep 'zombie deer' out of Florida with new regulations" via Emma Green of WBBH — Chronic wasting disease affects the nervous system of deer, elk, moose, caribou and all other members of the deer family. The deadly disease is thought to spread through direct contact with bodily fluids or by drinking contaminated water, according to the CDC. There's a low risk of transmission to humans, but the CDC said the barrier between species might not fully protect hunters from contracting CWD. Because the disease has spread to 26 states, the FWC is trying to reduce the risk of it coming here. Under Executive Order 19-41, deer-family carcasses may not be imported into the state except for legally hunted white-tailed deer from Georgia or Alabama, unless CWD spreads to those states.

"Creepy and crawly creatures from under the sea: Researchers share Halloween favorites" via Charles Duncan of the Miami Herald — Researchers who have been diving down into the ocean's depths with the Office of Ocean Exploration at the National Oceanic and Atmospheric Administration shared some of their favorite Halloween photos. "Can't very well have a countdown to a Halloween start to an Okeanos mission without at least one creepy-crawly critter ... like a sea spider! Despite their name, sea spiders (or pycnogonids) are not actually true spiders," the researchers said on Facebook, sharing a photo of a seemingly faceless creature that could star in a horror movie. Another post shows a deep-sea squid lurking above one of the team's remotely operated vehicles as it traverses the ocean floor.



—"Need a little Halloween scare? Here are 10 Florida creatures to send chills down your spine" via Amy Bennett Williams of the Fort Myers News-Press

Meanwhile ... "Subtropical storm Rebekah forms in north Atlantic" via The Associated Press — Rebekah has formed in the north Atlantic but currently poses no threats to land. The U.S. National Hurricane Center says the storm was centered about 745 miles west of the Azores, a Portuguese island chain. Rebekah has maximum sustained winds of 45 mph and is moving east at 13 mph. Forecasters expect the storm to weaken to a post-tropical cyclone as it approaches the Azores on Thursday or Friday. There are no coastal watches or warnings in effect.

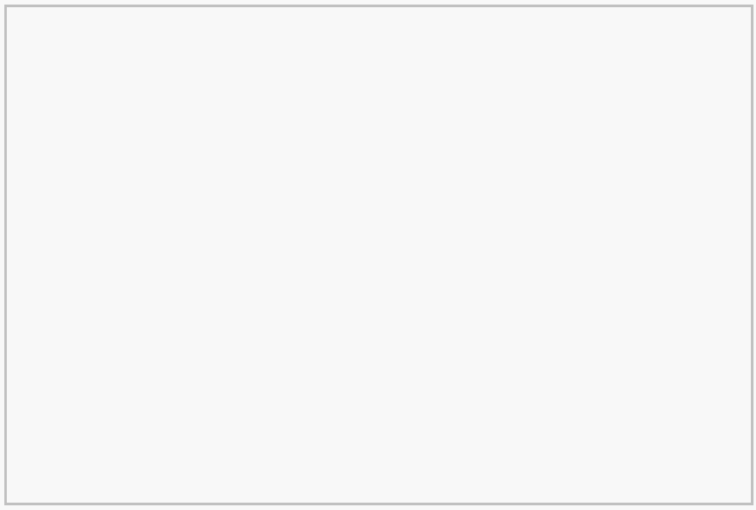
"**Florida voters oppose impeaching and removing Donald Trump, but favor congressional impeachment investigation, poll shows**" via Anthony Man of the South Florida Sun-Sentinel — The poll shows 53 percent of Florida voters oppose impeaching and removing Trump, with 42 percent supporting. The New York Times Upshot/Siena College poll also found 49 percent of Florida voters support the impeachment inquiry being conducted by the House, with 44 percent opposing the inquiry. Women are more supportive of impeachment and removal than men. Among men, it's 38 percent in support, and 57 percent opposed. Among women, 46 percent to 48 percent. Majorities of black and Hispanic voters support impeachment and removal. White voters are opposed. Among whites, 32 percent in support and 63 percent opposed. Among black voters, 67 percent are in favor, and 15 percent opposed. Among Hispanics, the split is 53 to 42 percent.



Florida voters oppose impeaching Donald Trump, but favor the continuing investigation to get to the truth.

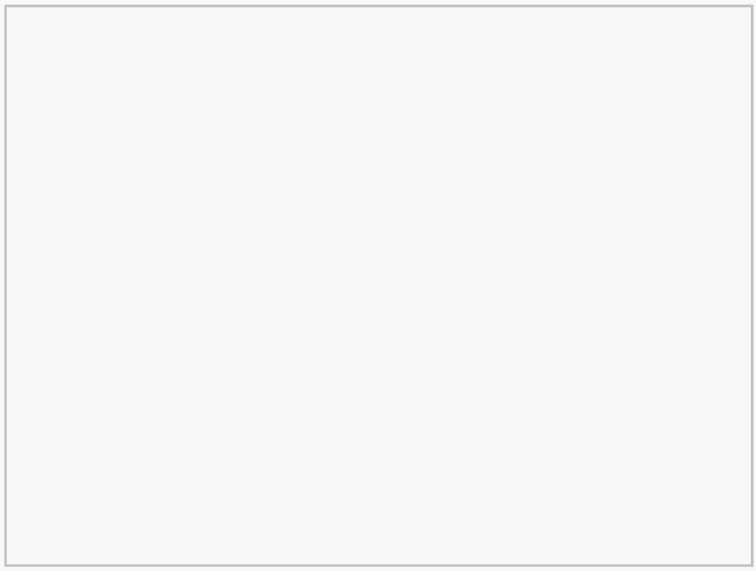
"**House impeachment inquiry summons John Bolton, central figure in Ukraine drama**" via Nicholas Fandos and Adam Goldman of the New York Times — **Bolton**'s lawyer responded by saying that Bolton was "not willing to appear voluntarily," declining to specify what his client would do should he be subpoenaed. The possibility of Bolton's appearance set up what could be a marquee interview of the House's month-old impeachment inquiry, featuring a fiery foreign policy veteran who is said to have been deeply alarmed by what he saw unfolding around him concerning Ukraine. His deputies have testified that Bolton, who left the White House in September amid disagreements with the president, resisted Trump's attempts to pressure Ukraine into opening investigations of Democrats, and warned that **Rudolph W. Giuliani**, the president's personal lawyer, was a "hand grenade who's going to blow everybody up."

"**Democrats, once wary of partisan impeachment inquiry vote, unite as politics shift**" via Sheryl Gay Stolberg and Catie Edmondson of The New York Times — The striking turnabout reflects Democrats' growing confidence that the public is behind their fact-finding mission into Trump's dealings with Ukraine. It comes after weeks of bombshell revelations confirmed an anonymous whistle-blower's assertion that Trump withheld military aid from Ukraine as part of a pressure campaign to enlist the country to smear his political rivals. The shift also reflects **Nancy Pelosi**'s close hold on and keen instincts about her fractious caucus, and the rapidly evolving politics of impeachment. The result is that Democrats appear ready to call the bluff of the White House and Republicans, who have clamored for a vote to authorize the impeachment process but now staunchly opposed to the Democrats' resolution laying out rules to govern it.

AMERICAN OVERSIGHT

"Trump trolls the press corps aboard Air Force One with 'gross' Halloween lunch" via Elizabeth Vaughn of Red State — Journalists were stunned after being served their lunch and photos of the mystery meal went viral. ENM News reported that "No one has any idea what this "gross," Halloween-themed Air Force One press lunch is supposed to be." CNN correspondent **Michelle Kosinski** described the meal as "a stuffed orange bell pepper carved like a spooky jack o' lantern, with salad, tomatoes, and an unknown dish sitting in the corner of the tray." The Gateway Pundit's **Jim Hoft** wrote that "Air Force One serves them the garbage Halloween lunch they deserve!

Donald Trump trolls the press corps with this Air Force One Halloween lunch, which many called 'gross.'



"Are Trump's policies causing kids in Miami to lose their health insurance?" via Ben Conarck of the Miami Herald — A national spike in children going without health insurance is especially bad in Florida and Miami-Dade County, partly because of a "chilling effect" for immigrant families who hesitate to enroll their children in public assistance programs because they worry about deportation, a new report found. That's one of three factors likely driving the rise in children without insurance in Miami-Dade, where 7 percent of children were uninsured in 2018, according to the report by the Georgetown University Center for Children and Families. About 41,500 kids are uninsured in Miami-Dade, which ranks ninth in the country for the total number of uninsured children by county, according to the report.

"Florida voted to end daylight saving time, but we're still falling back this weekend via Kimberly Miller of the Palm Beach Post — Floridians will join most of the nation when they turn their clocks back an hour Sunday, despite legislative momentum to end the practice. While state lawmakers in Tallahassee approved a bill in 2018 that would allow Florida to remain on daylight saving time year-round, it only works if Congress amends U.S. code to enable it. Sens. **Marco Rubio** and **Rick Scott** reintroduced the so-called Sunshine Protection Act in March to end the twice-annual time changes and have picked up notable co-sponsors, including Tennessee Republican **Lamar Alexander** and Sen. **Patty Murray** of Washington. For now, the only power individual states have is to opt-out of daylight saving time, putting them on standard time permanently.

"Michael Waltz wants special U.S. visas for Kurdish fighters" via Scott Powers of Florida Politics — **Waltz** and Democratic U.S. Rep. **Jason Crow** of Colorado jointly sponsored a bill seeking to extend the Special Immigrant Visa program to Syrian Kurdish fighters who assisted in counter-ISIS operations in Syria, and who now are on the run after Trump pulled American forces and gave Turkey the green light to invade Kurdish areas in Syria. House Resolution 4873, the Syrian Partner Protection Act, would extend the Special Immigrant Visa program to Syrian Kurdish fighters who assisted in counter-ISIS operations. The bill is co-sponsored by Republican U.S. Rep. **Don Bacon** of Maine and Democratic U.S. Reps. **Earl Blumenauer** of Oregon, **Jim Langevin** of Rhode Island, and **Seth Moulton** of Massachusetts.

AMERICAN OVERSIGHT

"Twitter to stop accepting all political ads on the platform globally" via Sara Fisher of Axios — Twitter CEO **Jack Dorsey** said the tech giant would no longer accept political advertising of any kind on its platform. Tech companies have come under fire as of late for policies around how they police political ads. According to Dorsey, more specifics about the policy will be published by Twitter on Nov. 15. The policy will go into effect on Nov. 22. In his tweets, Dorsey said that the reasoning for the policy change is in part because Twitter acknowledges that a tech platform's unique ability to distribute ads in a highly targeted manner, and with easily tested and customizable messaging, is different from the advertising opportunity on broadcast TV.

After Facebook comes under fire, Twitter CEO Jack Dorsey announces a ban on political ads.

>>>**Trump campaign reacts**: "Twitter just walked away from hundreds of millions of dollars of potential revenue, a very dumb decision for their stockholders. Will Twitter also be stopping ads from biased liberal media outlets who will now run unchecked as they buy obvious political content meant to attack Republicans? This is yet another attempt to silence conservatives since Twitter knows President Trump has the most sophisticated online program ever known." — **Brad Parscale**, Trump 2020 campaign manager

"Ex-Joe Biden aide forms Unite the Country super PAC" via Theodoric Meyer and Maggie Severns of POLITICO — A former Biden aide has filed paperwork to form a super PAC, called Unite the Country, that is set to boost the former vice president with millions of dollars in spending in the 2020 Democratic presidential primary. **Larry Rasky**, who worked on two of Biden's previous presidential bids, is listed as the treasurer for the new pro-Biden group. Several other high-profile Biden supporters — including Florida operative **Steve Schale**, a **Barack Obama** campaign alumnus who was involved in efforts to draft Biden into the 2016 presidential race; **Mark Riddle**, a Democratic operative; and **Julianna Smoot**, Obama's former national finance director — have also been in talks to lead the super PAC.

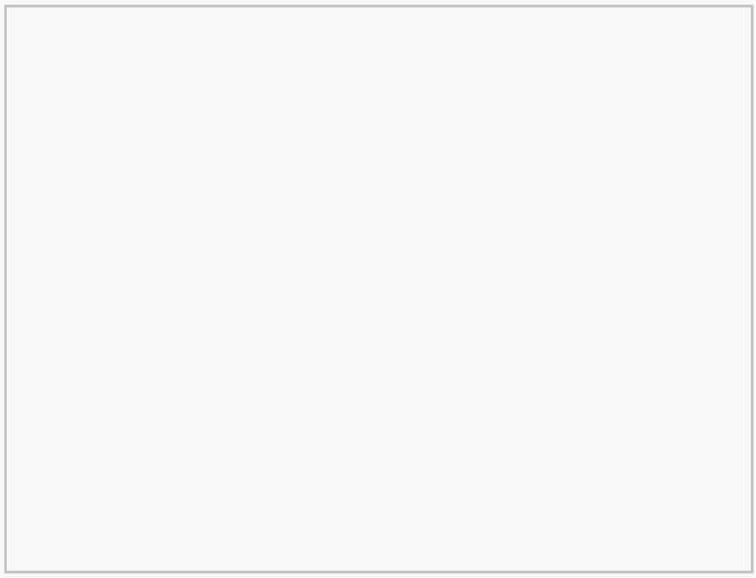
"Kamala Harris to slash staff, restructure campaign as she hemorrhages cash" via Christopher Cadelago and Scott Bland of POLITICO — **Harris** is dramatically restructuring her campaign by redeploying staffers to Iowa and laying off dozens of aides at her Baltimore headquarters as she struggles to resuscitate her beleaguered presidential bid. The moves come as Harris is hemorrhaging cash and in danger of lacking the resources to mount a competitive bid against better-funded rivals in Iowa. The overhaul will touch nearly every facet of Harris' operation, with layoffs or redeployments coming at headquarters, as well as in New Hampshire, Nevada, and her home state of California, a Super Tuesday prize that her advisers once viewed as a big asset.

"The surprise voting bloc Bernie Sanders is banking on to win the nomination" via Laura Barrón-López and Holly Otterbein of POLITICO — The fact that Biden is counting on strong support from African Americans is widely known. Less understood is the similar bet that **Sanders** is making on Latino voters: His campaign believes that by driving up turnout among Latinos, as well as young and working-class voters of all ethnicities, he can build out the electorate, bring new voters into the fold, and expand the 15 to 20 percent of Democratic voters who zealously support the democratic socialist. There's also the reality that Sanders probably can't win the Democratic nomination without Latinos, since his campaign is relying on a strong finish in states such as Nevada and California.

"Elizabeth Warren's note top-dollar fundraiser pledge includes big caveat" via Brian Slosysko and Will Weissert of The Associated Press — The Massachusetts Senator has become a leading Democratic presidential candidate in part because she has pledged to forgo events with high-dollar donors, which has resonated with progressives who believe wealthy donors have outsized political influence. But **Warren** has a notable exception for fundraisers that take in big money for her party, a practice she plans to continue if she becomes the Democratic nominee to take on Trump. Democratic leaders say Warren isn't honest about her fundraising plans if she were to become the nominee. They say she can't tell voters she is personally

AMERICAN OVERSIGHT

shunning big-dollar fundraisers while simultaneously headlining state and national party events at which she would raise millions of dollars from major donors supporting her bid.



"**Democratic group targets local races in bid to beat Donald Trump**" via Chad Day and Ken Thomas of the Wall Street Journal — The city council race in the beachfront town of Rockledge isn't typically on the target board for a major Democratic super PAC. But this fall, voters are seeing a raft of Facebook, YouTube and Hulu ads funded by the deep-pocketed Priorities USA. The ads are part of a $4 million strategy that Priorities USA hopes will help a Democratic challenger defeat Trump next year. They don't advocate for any candidate or political party or hot-button issue. They simply encourage eligible voters to check their registration and show up to the polls next week in local elections. The digital ads are targeting Democratic strongholds, where Trump won narrowly, like Pinellas County.

FDP staffs up

AMERICAN OVERSIGHT

The Florida Democratic Party is continuing to make staffing moves of the 2020 election with the hopes of avoiding the struggles the party faced back in 2018. The party earned just one statewide win last cycle to go with several other near misses in state legislative races.

"We know that in the past, we haven't invested in voter registration and field efforts early enough, and we are learning from that mistake by continuing to expand our field staff," FDP Chair **Terrie Rizzo** said in announcing the moves. The staff changes include a trio of promotions as well as new hires.

Terrie Rizzo and the Florida Democratic Party staffs up.

— **Clifton Addison** is leaving his post as FDP Deputy Political Director to move into a new role as the party's Coalitions Director. Addison is a former Chief Legislative Aide to state Sen. **Geraldine Thompson**.

— **Ella Coffee** will become the new Deputy Statewide Engagement Director for FDP. Coffee currently serves as one of eight Community Engagement Directors for the group. She formerly worked for the Hillsborough County Supervisor of Elections.

— **Keith Hardy** will be making an identical move, transitioning from a Community Engagement Director into sharing Deputy Statewide Engagement Director duties with Coffee. Hardy was hired by the party to work in Northwest Florida back in 2018.

— **Onto the new hires, Jocelyn Mund Kelly** is coming on as a Campus Organizing Director. She did fieldwork for the 2012 **Barack Obama** presidential campaign before taking on organizing efforts for the Democratic Congressional Campaign Committee, two Florida's governor's races, and other campaigns.

— **Wendy Williams** is being hired as the Deputy Director for Party Affairs. Williams has a background in business administration and marketing. She's also served as Chair of both the Florida Democratic Party's Small County Coalition and the Citrus County Democratic Executive

— **Brendan Bargmann** will take on the role of Deputy Finance Director for North and Central Florida. He previously served as Finance Director in the 2018 contest in New Jersey's 2nd Congressional District. That race saw Democratic candidate **Jeff Van Drew** flip a previously red seat by more than six percentage points.

— **The party is also adding** a trio of Regional Field Directors in **Luis Zaldivar**, **Adrian Koster** and **Alejandro Levy**. Zaldivar has worked on pushing public health programs in Latin America and Northeast Florida. Koster has served as a Field Director for U.S. Rep. **Debbie Mucarsel-Powell** of Florida's 26th Congressional District. Levy most recently worked as the Miami coach for Organizing Corps 2020.

The new hires add to dozens of field organizers already added throughout the year. FDP leadership is hoping these hires can propel Democrats in 2020. Reported dysfunction over at the Republican Party of Florida may give them hope. But with the 2018 results still fresh, Florida Democrats will need to prove it on the field.

Levy firefighters endorse Joe Harding— The Levy County Firefighters endorsed **Harding** in the race to replace term-limited Rep. **Charlie Stone**. "Joe Harding cares deeply about the safety of our citizens in House District 22," said **Katy Yanok**, Union President for Levy Fire Rescue. "Joe will be fully engaged and do everything in his power to keep our streets safe and secure." Harding is running against **Russ Randall** in the Republican primary. Heading into October, Harding held the fundraising lead with $97,000 in the bank while Randall had about $80,000 on hand.

"**Democratic candidate Ricky Junquera celebrates campaign kickoff in HD 118 race**" via Ryan Nicol of Florida Politics — **Junquera** is celebrating the official launch of his House District 118 campaign after holding a campaign kickoff fundraiser in Miami. Junquera announced his desire to take on incumbent GOP state Rep. **Anthony Rodriguez** in early October. Rodriguez is a freshman in the House who flipped the seat from former Democratic state Rep. **Robert Asencio**. "In the Florida State House, we have an opportunity to show up for the working class, and I'll do just that," Junquera said. "From traffic to toll roads, and health care to wages, I will find ways to bring both sides together to fight for all of us." The event, which was held at Grubhouse Gastrobar & Grill in Miami, will aim to help Junquera make a splash in his first month of fundraising as a candidate.

"**With latest endorsement, Robert Blackmon confronts pain of drug addicts**" via Janelle Irwin Taylor of Florida Politics — St. Pete City Council candidate **Blackmon** is touting new endorsements from two former Tampa Bay Buccaneer players. In a video shared to Facebook, former defensemen **Keith McCants** and **Stylez G. White** offered their support for who they described as "one of the greatest guys" they know. McCants has led a troubled life since leaving the NFL after a six-season career. He has been arrested more than a dozen times, in the Tampa Bay area and in his home state of Alabama, for possession of crack cocaine. It seemed odd at first that Blackmon would publicly push an endorsement from a man with a criminal record, but McCants symbolizes the plight of many residents.

"TV firebrand Jeanine Pirro to appear at Seminole GOP fundraiser" via the Orlando Sentinel —**Pirro**, a Fox News personality known for her fierce defense of Trump, is scheduled to appear next month at a fundraiser named for the president and held by the Seminole County Republican Party. She will join Republicans at the event on Nov. 12 at 6 p.m. at the Friendly Confines restaurant in the Altamonte Mall.

Local

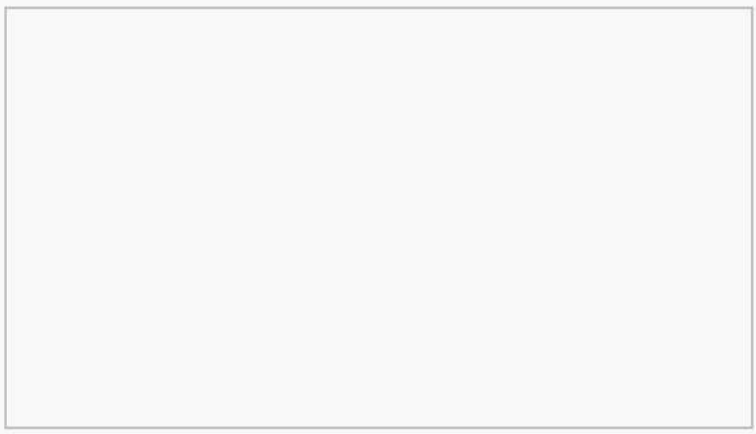
"Jeffrey Epstein's injuries look more like murder than suicide, noted pathologist says" via Julie Brown of the Miami Herald — A private forensic pathologist hired by **Mark Epstein** to oversee his brother's autopsy bolsters what conspiracy theorists have suggested for months: that the evidence does not support the finding that **Jeffrey Epstein** killed himself. Dr. **Michael Baden**, one of the world's leading forensic pathologists, viewed Jeffrey Epstein's body and was present at the autopsy, held Aug. 11 — the day after Epstein was found dead. Baden described Epstein's jail cell, the ligature he allegedly used to hang himself, and his own suspicions that federal authorities have not conducted a thorough probe into Epstein's cause and manner of death. "They rushed the body out of the jail, which they shouldn't do because that destroys the evidence," Baden told the Herald.

Jeffrey Epstein's death looked more like murder than suicide, says a prominent forensics expert.

"Miami cops' overtime security jobs lead to rampant misconduct, city report" warns via Jerry Iannelli of the Miami New Times — For years, critics have warned that Miami-area cops continue to get into trouble while working security in bars and clubs in the Magic City's already chaotic night life scene. But the public has not quite known how frequently off-duty officers find themselves in trouble. In a scathing report, the City of Miami Civilian Investigative Panel (CIP), a board of Miami residents that investigates police issues, says it found at least 40 alleged misconduct incidents that occurred during off-duty assignments between 2017 and 2018. Among the incidents, the CIP found allegations of everything from poor record-keeping to cops arresting people who had pissed off bar owners — all the way to claims of excessive force and violence.

"Broward sheriff fires deputy accused of punching suspect handcuffed to a hospital bed" via David Neal and Devoun Cetoute of the Miami Herald — Broward Sheriff **Gregory Tony** said a 30-day suspension for Deputy **Jorge Sobrino** originally was recommended to him after an internal affairs investigation by the Professional Standard Commission, which is comprised of civilians, BSO union members and sheriff's office command staff. But after seeing the evidence, Tony decided that wouldn't do. The union that represents Broward deputies doesn't agree. "We are going to vigorously fight this," said **Jeff Bell**, president of the Broward Sheriff's Office Deputies Association. Bell says two captains, two lieutenants, and one sergeant gave sworn statements saying Sobrino was within the use-of-force guidelines. Sobrino, 24, also has been charged in Broward County criminal court with misdemeanor battery.

AMERICAN OVERSIGHT



"**John Thrasher addresses recent rash of crimes on FSU campus; says police patrols have been increased**" via Byron Dobson of the Tallahassee Democrat — Florida State University police have beefed up patrols near residence halls following a rash of personal crimes on campus, FSU President **Thrasher** said in a campuswide email. Thrasher worked to reassure the campus community and parents student safety is a top priority. The email comes on the heels of an incident at 6:45 a.m. Monday, when a student was robbed near Gilchrist Hall, a residence hall on campus. FSUPD investigators charged **Rodney Jermaine Joyner,** 36, with robbery with a weapon, aggravated battery using a deadly weapon and attempted kidnapping in the commission of a felony. Joyner is not affiliated with the university, police said in a release.

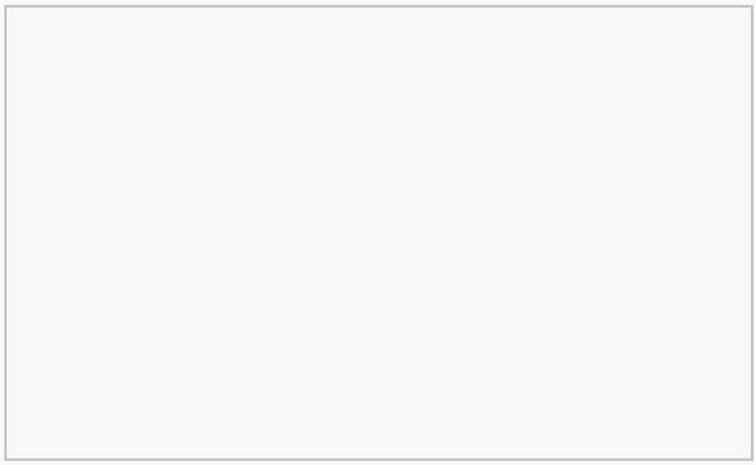
"**Florida fast train to connect Miami cruise port with Orlando**" via The Associated Press — Brightline will build a station at PortMiami by 2020. The Virgin Trains will ultimately connect a crucial 170-mile stretch from West Palm Beach to Orlando and its theme parks. It's scheduled to open in 2022. Another station in Aventura has been approved, and the company is working with Boca Raton to add a station there. PortMiami is home to 22 cruise lines and served more than 5.5 million travelers last year.

"**Bill Carlson wanted to go on international trade missions with agency he now wants to defund** via Charlie Frago of the Tampa Bay Times — Over a July lunch at the downtown University Club, **Carlson** told the Tampa Economic Development Council's chief executive he wanted to go on future international trade missions organized by the agency. According to **Craig J. Richard**, the agency's CEO, Carlson started by telling him there was a new City Council with new ideas. The council's new role included international travel, Richard said Carlson told him, and left the impression there would be negative consequences for the council's $538,000 annual contract with the city if those ideas weren't adopted. Carlson made it "crystal clear," Richard said. "Look there's going to be some changes. These are my ideas. Get with the program." Carlson said Richard is lying.

"**Jacksonville Housing Authority board votes to fire CEO Fred McKinnies**" via David Bauerlein of the Florida Times-Union — The Jacksonville Housing Authority board voted Wednesday afternoon to terminate **McKinnies** as the agency's president and CEO. The vote followed an Inspector General's report that found McKinnies had sexual relationships with two employees over a yearslong period while he had responsibility "directly or indirectly" for those employees' evaluations, salary increases and a promotion. The investigation determined that one of the sex acts between McKinnies and an employee occurred at the authority's main office during work hours.

"**Pulse memorial and museum design announced**" via Kate Santich of the Orlando Sentinel — Vowing to create a "sanctuary of hope and healing," the onePULSE Foundation announced Wednesday a design for the Pulse memorial that includes a tranquil reflecting pool and 49 trees encircling the remains of the club and a towering museum a half-mile away that "rises like a budding flower." "Together, we have an opportunity to reclaim a place from terror and darkness and create a new reality, one that brings people together in celebration of joy and love," said **Thomas Coldefy**, principal of Coldefy & Associates, the French urban architectural firm that teamed with Orlando-based HHCP Architects and a group of planners, designers and artists for the winning concept.

A rendering of the winning design for the National Pulse Memorial. Image via OnePULSE Foundation/Coldefy & Associés/RDAI.



"**Seminole Tax Collector Joel Greenberg launches tirade against County Chairman Brenda Carey, county attorney**" via Martin Comas of the Orlando Sentinel —**Greenberg** unleashed an early-morning attack against **Carey** on Facebook, accusing her of spending more time living in North Carolina than in Seminole. He thereby accused Carey of not only violating the state's homestead exemption law but also making her ineligible to serve on the County Commission, alleging her home in Seminole is not her permanent legal home for most months of the year. Carey and her husband, **Fairley**, also have a home in Caswell County, N.C., according to state records. Seminole Property Appraiser **David Johnson** said he checked out Carey's homestead exemption and determined she can legally claim her Seminole home as her primary residence.

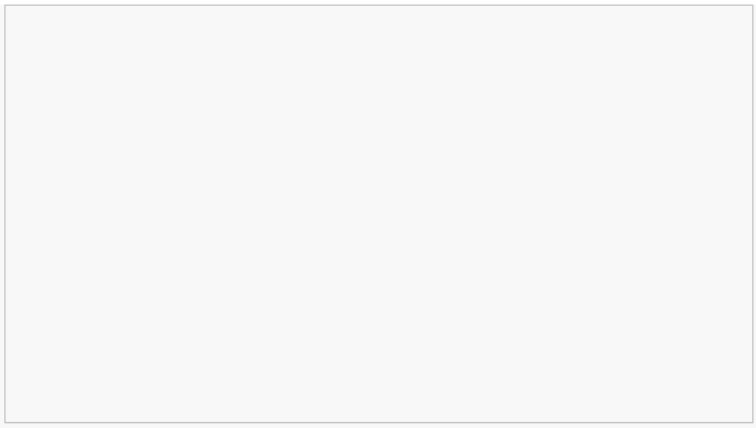
AMERICAN OVERSIGHT

"Spanish River High principal whose Holocaust remarks ignited furor fired" via Andrew Marra of the Palm Beach Post — Palm Beach County public schools fired former Spanish River High School Principal **William Latson**, four months after comments he made about the Holocaust prompted a national outcry. By a 5-2 vote, county school board members approved the veteran principal's termination Wednesday on the grounds that he violated the school district's code of ethics and the state's code of professional conduct for school principals. But the official justification for Latson's termination was not the explosive comments that drew international attention but his failure to return messages from district officials in the days after his comments became public

More local

"Here's why Halloween is the deadliest day of the year for child pedestrians" via Christopher Ingraham of the Washington Post — The real threat to kids on Oct. 31 is much more mundane: traffic. Children are three times more likely to be struck and killed by a car on the holiday than any other day of the year. A Washington Post analysis found that 54 pedestrians younger than 18 were struck and killed by an automobile on Halloween from 2004 through 2018. That compares with 16 on a typical day. In absolute terms, the likelihood of a child being killed by a car on Halloween is still extremely low, given the hundreds of millions of trick-or-treaters who went out during the period analyzed. But the holiday nonetheless stands out sharply when charted against every other day.

Halloween is one of the most dangerous nights for child pedestrians.



"Haunted Florida: These 5 cemeteries are worth the trip" via Laura Jazmin Tolliver of GateHouse Florida — The Devil's Chair at the Lake Helen-Cassadaga Cemetery, located in a town known for psychics and spiritualists, is said to belong to the devil. Tolomato Cemetery, a haunted burial ground built on an ancient Native Indian village in St. Augustine, may give you a glimpse of the Ghost Bride — buried in her wedding gown. Orlando is known for theme park goers, but if you're looking for a free scare, pull up to the Greenwood Cemetery. The Key West Cemetery, in a 19-acre area, was built in its current location in 1847 after an 1846 hurricane washed dead bodies from the former beachside burial ground out of the coastal dunes on Whitehead Point near the West Martello Towers.

Someone after my own heart — "This Scenic Hills house has 1,200 pumpkin decorations on display in the front yard" via Annie Blanks of the Pensacola News Journal — It's a rainy, windy day before Halloween at **Teresa Nelson**'s house in Scenic Hills, but the full-time massage therapist, wife and mother of three is outside in her front yard placing pumpkin plates on a wooden shelf. Cars drive by slowly, one after the other, stopping momentarily to reach out the window and take pictures. Donning an orange pumpkin costume (complete with a stem and leaf hat), Nelson doesn't mind. "We realized a long time ago we don't need a speed bump on this road, 'cause everyone slows down to look at our house and take pictures," Nelson said, waving at passersby.

"Hillsborough Sheriff issues Halloween warning to sex offenders" via Daniel Figueroa of the Tampa Bay Times — Sheriff **Chad Chronister** and deputies are going door-to-door, visiting the homes of registered sex offenders to make sure they understand the rules and comply. Registered sex offenders are not allowed to hand out candy or decorate for Halloween and must turn porch lights off. "If a porch light is not on," Chronister said in a video posted to YouTube, "don't go knocking at that door." Chronister offered additional trick-or-treat tips in his PSA video. Chronister said parents should stay with younger children or have older children travel in groups and know the route. He also said children should wear bright and reflective items with comfortable shoes. Masks should not block their eyesight.

Opinions

"Cuban democratic socialists: AOC-backed group is actually a communist 'impostor" via Giancarlo Sopo for The Blaze — A group of Cuban democratic socialists have a message for their American counterparts: You are either secret communists, or you are profoundly ignorant. In an open letter, nine democratic socialists on the island blasted the Democratic Socialists of America, the U.S. group that counts Reps. Alexandria Ocasio-Cortez (D-N.Y.) and Rashida Tlaib (D-Mich.) among its members, for supporting the island's Communist government.

"**A $15 minimum wage for Florida? You're darn right you deserve a vote**" via Scott Maxwell of the Orlando Sentinel — Next year, Floridians will likely vote on whether to raise the minimum wage to $15. I'm not here to tell you how to vote. Support higher wages if you want. Or blast the proposal to smithereens. All I want to say is that assuming enough citizens sign valid petitions to get this on the ballot, you absolutely deserve the chance to vote on it. And don't you dare let any politician tell you otherwise.

"**Lawmakers should spend money to protect land as voters intended**' via Aliki Moncrief for the Tampa Bay Times — On Nov. 4, as we celebrate the five-year anniversary of the Water and Land Conservation Amendment, we also reiterate the same message voters sent to lawmakers five years ago: seize this opportunity to fully fund Florida Forever. The Water and Land Conservation Amendment was intended to create a baseline for funding for programs like Florida Forever — a floor, not a ceiling. Our state budget should reflect voters' values and priorities, and by approving Amendment 1, we hoped that we would clear a path for our lawmakers to shoot for the stars. Unfortunately, five years later, we are still waiting on a Florida Forever budget that simply meets the historical baseline.

Influence

Gunster named top corporate law firm by Forbes — The firm, one of Florida's oldest and largest full-service business law firms, was named to the Forbes list of "America's Top Corporate Law Firms 2019." This year, Forbes and Statista selected firms based on an independent survey from a large sample of lawyers and legal professionals. Out of the thousands of corporate law firms in the United States, Gunster was one of only 243 recognized. Gunster's Real Estate practice was the most recommended.

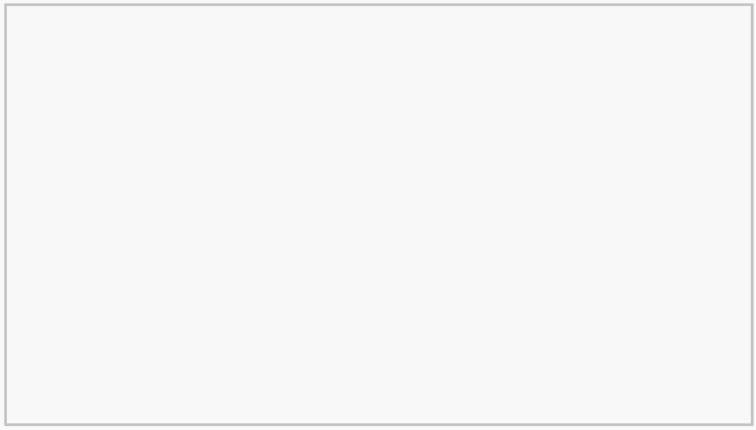
"**A Samsung flip phone-style foldable device is looking more and more likely**" via Patrick Holland of CNET — At the 2019 Samsung Developer Conference in San Jose, there was nary a word about the Fold — until the keynote turned to One UI 2, a software overlay for the company's phones, tablets and smartwatches. When showing off One UI 2, Samsung showed a mock-up of a phone that folded in half horizontally, kind of like a flip phone. This wasn't a formal announcement of a new Galaxy Fold 2 or a Galaxy Fold Square. But it does validate a story claiming that Samsung's next foldable phone would fold inward to become a compact square. The graphic on the screen showed what for all intents and purposes is a 2019 take on what a flip phone would look like.



Back to the future: Samsung is hinting at a foldable flip phone.

"**HBO announces new 'Game of Thrones' prequel, 'House of the Dragon'**" via Sophie Lewis of CBS News — "House of the Dragon," will be set 300 years before the events of the original show and tell the story of House Targaryen. It features the tagline "Fire will Reign," and will be based on **George R.R. Martin**'s book "Fire & Blood." The show, which has been ordered straight to series, will be written by**Ryan Condal**. Martin, who wrote the books on which "Game of Thrones" is based, is set to co-executive produce. Ten episodes have been ordered for the series so far. **Miguel Sapochnik**, who won an Emmy for directing the "Battle of the Bastards" episode, will be a co-showrunner, and will also direct the pilot and other episodes. **Vince Gerardis** will join Spochnik, Condal, and Martin as an executive producer.

AMERICAN OVERSIGHT

Trick or treat

"A brief Halloween history of pets in costumes" via Jen Miller of Vox — Of the $9 billion Americans are expected to spend on Halloween this year, $480 million of that is on our pets, according to the National Retail Foundation. That's up from $5.8 billion total and $220 million on pets in 2010 … The greyhound of Louis XI, king of France from 1423 to 1483, wore a red velvet collar with 20 pearls and 11 rubies, and Louis's successor, Charles VIII, had robes made for his dog and marmot, according to Medieval Pets. Queen Victoria dressed her dog in a "scarlet jacket and blue trousers" … In the 1910s, **Harry Whittier Frees** took pictures of cats getting married, cats at a picnic, a dog watering flowers, and a dog sewing pants that were used in postcards, kids' books, and magazines. From 1929 to 1931, MGM made "All Barkie" Dogville Comedies that featured dogs doing very human things like dancing and going to war. The National Retail Federation predicts that the most popular costumes this year for cats and dogs will be pumpkin, hot dog, bumblebee, devil, cat, dog, lion, Star Wars characters, superhero, and ghost.

Of the $9 billion Americans expect to spend on Halloween, nearly $480 million of that will be on pets.

"Google predicts the most popular Halloween costumes. And Florida may surprise you" via Howard Cohen of the Miami Herald — For Halloween, half the fun in picking a costume is going out as something you are not. Maybe this is why the angel costume is going to be Florida's most popular costume choice, according to Google Trends data curated by AT&T. The survey looked at 2018's top Halloween costumes — the "Baywatch" lifeguard look was deemed Florida's pick last year, perhaps owing to the proximity of the made in Miami Beach movie version of the TV series — and the 2019 Google data on trending costumes. But Florida Man's going to be an angel this year? That's, uh, inspired. That's how it goes with these surveys, though.

"How much candy would it take to kill you? About 262 Halloween treats, scientists say" via Donovan Harrell of McClatchy — Scientists developed a test called the LD50 to determine the strength of potentially deadly substances … "It stands for lethal dose 50 percent," toxicologist **Hans Plugge** told The Wall Street Journal. "You take 10 rats, feed them a dose, and if five of them die, you've determined the LD50. It's pretty straightforward." When it comes to candy, a typical "fun-sized" treat contains about 9.3 grams of sugar … The average adult would have to eat around 5.4 pounds of sugar — at one time — for it to be potentially deadly, according to the ACS. That would translate to about 262 pieces of "fun size" candy, according to the video. As for the kids celebrating Halloween, it's unlikely that the average American child around the age of 10 could eat a lethal amount of candy, Plugge told The Wall Street Journal. "More than likely, they'd throw up before reaching the lethal dose," Plugge said.

"Teal pumpkins make Halloween less tricky for kids with food allergies" via Tove Danovich of NPR — Having a teal pumpkin on the doorstep (teal being the color of food allergy awareness) is a way to signal to people with food allergies that this is a safe home for trick-or-treating, says **Jennifer Norris**, president of the Food Allergy Community of East Tennessee (FACET), which started the project. In addition to handing out candy, houses that display teal pumpkins also have bowls of nonfood items such as glow sticks, stickers or Dracula teeth. "We don't want to be the Grinch of Halloween at all," says Norris. "We don't want to take candy away from the people who can have it."

Hi Melissa,

It was nice to speak to you this morning. I have attached a one-pager for the Walt Disney Swan and Dolphin as a potential site for the 2020 Florida Automated Vehicles Summit. I have also attached a copy of their proposal for your review. Remember Experient may be able to accommodate an overnight stay if the Senator has not yet reserved his accommodations for his time in Orlando next week.

I look forward to hearing from you tomorrow. If you have any questions in the meantime, don't hesitate to call.

Respectfully,

Emily

AMERICAN OVERSIGHT

2020 Florida Automated Vehicle Summit – Orlando: Walt Disney World Swan and Dolphin

CFX is host agency for the 2020 Florida Automated Vehicle Summit. The last time Orlando served as host-city for the FAV Summit was 2014 when it was held at Disney's Coronado Springs Resort.

In accordance with the terms outlined in the MOU, CFX worked with Experient to send out an RFP to hotel properties in Central Florida. The responses were carefully reviewed, and three sites were toured by representatives from CFX, THEA and CUTR to evaluate which property best met the needs for the Summit. The properties included the Rosen Shingle Creek, Walk Disney World Swan and Dolphin and the Renaissance Orlando at SeaWorld.

Following the site visits, the properties were ranked as follows:

1) Rosen Shingle Creek
2) Walt Disney World Swan and Dolphin
3) Renaissance Orlando at Sea World

Walt Disney World Swan and Dolphin

The Walt Disney Swan and Dolphin is a Marriott Bonvoy property located between Epcot and Disney's Hollywood Studios at Walt Disney World. The property features multiple on-site recreation amenities with additional amenities connected by Disney's transportation system.

There is ample meeting space to accommodate the general sessions, breakouts and exhibit space. The conference space was easily accessible from the hotel rooms.

Parking is limited at this property; the event team would identify overflow parking solutions. On-site demo space is also limited; however, Wide World of Sports is available to use as a demonstration area for an additional cost. Attendees would be shuttled from the conference hotel to Wide World of Sports using Disney's approved transportation partners. Any other road closures would for demos would require permitted through Reedy Creek.

The Walt Disney Swan and Dolphin can accommodate our event on **November 4-6, 2020**. Details regarding room rates, F&B minimums and concessions are outlined below. The event proposal for Walt Disney World Swan and Dolphin is attached for your reference.

Supplier	Nov 4-6, 2020 ELECTION WEEK	Resort Fee	F&B Minimum	Rental and Other Costs	Concessions
Walt Disney World Swan and Dolphin	$239	$30/day	$55,000	WAIVED	* The Lake Terrace IS AVAILABLE for your Reception * They are telling me that it should not be a problem for you guys to use a section of the parking lot for a demo area * Regarding partnering with Wide World of Sports to have a testing area – You can use that. Rebecca from Disney would need more specifics i.e. dates/times etc, set ups and just what the general idea of the demo – KEEP IN MIND – there would be a charge AND you would need transportation – you would HAVE to use Disney transportation partners * You can use their Built in Reg Desk * They have no problem adding one breakout room – they are working on a diagram – but they can add a breakout * They can increase the per diem number of rooms to 30.

RECENT RENOVATIONS

The Walt Disney World Dolphin lobby has undergone a $12 million re-design as the final stage of the largest makeover in the resort's history. The new lobby has been completely transformed into a sleek contemporary space and feature new dining and beverage options.

This was the completion of a $140 million project which also included the transformation of all guest rooms, along with upgrades to the hotel's meeting space. The new food and beverage options include Phins, an upscale bar and fuel, a quick service café and market offering coffee, sandwiches and more.

MEMORANDUM

TO: Lawrence E. Sellers, Chair
The Florida Bar Legislation Committee

FROM: Jim Daughton
Aimee Diaz Lyon

DATE: February 7, 2020

SUBJECT: Legislative Update – Week Four

Despite national politics serving as the focus this week, the Legislature quietly and swiftly completed week four of the nine-week legislative session. The House subcommittee process wound down, the respective Appropriations Committees passed budgets, scores of interest groups held their "Days at the Capitol" and the legislature completed its work for the week just ahead of bad weather moving through Tallahassee.

Following is a summary of key information and issues of interest to The Florida Bar.

State Courts System Budget

This week the House and Senate Appropriations Committees passed their respective budget proposals in anticipation of final action by each Chamber next week. Following this action, legislative leaders and staff must decide on how to reconcile the overall budget allocation disparities before the budget conference can begin.

Below is a chart depicting the current status of appropriations issues important to the judicial branch.

AMERICAN OVERSIGHT

Issues	Senate Criminal & Civil Justice Appropriations Subcommittee	House Justice Appropriations Subcommittee	State Courts System LBR Request
Timely Resolution of Cases Initiatives	$5,050,069 (64 FTEs)	-0-	$13,512,798 (157 FTEs)

Circuit & County Court Judges – *Differing House & Senate Budget Conforming Bills Emerge*

On February 5th, the House Appropriations Committee passed **HB 5301** which aligns with the Supreme Court's certification opinion for new judges. The House bill creates 10 new circuit and county judge positions – 4 new circuit judges in the First (1), Ninth (2), and Fourteenth (1) Circuits and 6 new county court judges for Hillsborough County (4), Lee County (1), and Orange County (1).

Also on February 5th, the Senate Appropriations Committee heard a proposed bill, **SPB 7050**. As filed, the Senate's conforming bill creates five new circuit judge positions – two new judges in the 9th Judicial Circuit, one judge in the 1st Judicial Circuit, one judge in the 14th Judicial Circuit, and one judge in the 4th Judicial Circuit.

The Senate Appropriations Act, **SB 2500**, also contains proviso language which recommends the five additional circuit court judgeships are contingent upon the passage of SPB 7050. Senator David Simmons (R-Altamonte Springs) offered an amendment SPB 7050 which creates the aforementioned 5 new circuit judge positions and creates one new county court judge in Orange County. The amendment also specifies that all of the new judgeships will be appointed, rather than elected.

Both bills are now ready for consideration by the full Senate and House. HB 5301 and SB 2500 are scheduled for Chamber floor discussion in the House and Senate, respectively, on February 12th. SB 7050 has yet to be scheduled for the Senate floor.

Legislation of Interest to The Florida Bar

Judicial Nominating Commissions – *No Action*

SB 86 by Senator Perry Thurston (D-Fort Lauderdale) and **HB 379** by Rep. Al Jacquet (D-Lantana) reinstate the composition of the judicial nominating commissions as it existed in § 20(5), Fla. Const. and § 43.29, Fla. Stat. (2000). Currently, the governor appoints nine members to each of the 26 JNCs. Three of those members are from a list recommended from The Florida Bar. Under the legislation, the governor would only appoint three members to each nine-member nominating commission. Three other members would be appointed by The Florida Bar, and then the six members of each JNC panel would select the remaining three members.

Link to SB 86: http://www.flsenate.gov/Session/Bill/2020/86
Link to HB 379: http://www.flsenate.gov/Session/Bill/2020/379

Public Records Exemption for County Attorneys & Assistant County Attorneys – *No Movement This Week*

HB 63 by Rep. Randy Maggard (R-Dade City) and **SB 248** by Senator Ed Hooper (R-Clearwater) provide an exemption from the public records requirements for personal identifying and location information of current and former county attorneys and assistant county attorneys and their spouses & children.

SB 248 has cleared all of its committees of reference and is on the calendar of bills ready to be scheduled for floor consideration. HB 63 has not been heard by any committees.

Link to HB 63: http://www.flsenate.gov/Session/Bill/2020/63
Link to SB 248: http://www.flsenate.gov/Session/Bill/2020/248

Public Records Exemption for Judicial Assistants – *No Movement This Week*

AMERICAN OVERSIGHT

SB 128 by Senator Tom Wright (R-New Smyrna Beach) and **HB 479** by Rep. Elizabeth Fetterhoff (R-DeLand) provide an exemption from the public records requirements for certain identifying and location information of current and former judicial assistants and their spouses and children. The legislation provides for the retroactive application of the exemption.

SB 128 has cleared all of its committees of reference and is on the calendar of bills ready to be scheduled for floor consideration. HB 479 has two committee hearings remaining.

Link to SB 128: http://www.flsenate.gov/Session/Bill/2020/128
Link to HB 479: http://www.flsenate.gov/Session/Bill/2020/479

Constitution Revision Commission Proposals – *Senate Bill Scheduled for Floor Debate*

SJR 142 by Senator Jeff Brandes (R-St. Petersburg) and **HJR 301** by Rep. Brad Drake (R-Eucheeanna) would abolish the CRC entirely and remove any statutory references to the Commission. The proposals would require a change to the Florida Constitution approved by the voters. After passing the full House, HJR 301 resides in the Senate awaiting action. SJR 142 is on the Senate Special Order Calendar for consideration by the full Senate on February 12th.

HB 303 filed separately by Rep. Drake would repeal all statutory references to the Constitution Revision Commission once any constitutional amendment abolishing the CRC is passed by voters. After passing the full House, HB 303 resides in the Senate awaiting action.

SJR 176 by Senator Jose Javier Rodriguez (D-Miami) limits any amendment to the Constitution proposed by the Constitution Revision Commission to "one subject and matter connected therewith." Under current law, each proposal of the Commission may embrace multiple subjects, and the Commission may even propose a singular revision of the entire Constitution. The Senate joint resolution would be voted on by the voters in 2020 and, if approved, would apply to the next CRC which is slated to meet in 2037, in advance of placing measures on the 2038 ballot. SJR 176 has one committee hearing remaining in the Rules Committee.

A parallel constitutional ballot initiative is seeking to make it harder to amend Florida's Constitution by having voters approve constitutional amendments twice in two elections, instead of one election, in order for them to officially take effect. On January 30th, the state Division of Elections announced that the Keep Our Constitution Clean political committee had met

AMERICAN OVERSIGHT

the legal requirement for submitting the necessary amount of petition signatures. The political committee submitted 769,769 valid petition signatures, over and above the 766,200 signature requirement. The committee submitted the requisite number of signatures prior to the deadline of Saturday, February 1st. The political committee will now also need Florida Supreme Court approval of the proposed ballot wording. If the Florida Supreme Court approves the proposal's wording, the initiative will go on the November 2020 ballot.

Court Jurisdiction – *House Committee Bill Officially Receives Bill Number*

SB 1510 by Senator Jeff Brandes (R-St. Petersburg) revises the jurisdiction of circuit courts and the authority of county court judges temporarily designated to preside over circuit court cases. As originally filed, the bill also transferred jurisdiction for appeals of final administrative orders of local government code enforcement boards from the circuit court to the district court of appeal.

SB 1510 has two committee hearings remaining – Appropriations Subcommittee on Criminal and Civil Justice and Appropriations Committee.

SB 1510 was amended to limit the scope of the original bill. Originally, the bill provided district courts of appeal jurisdiction to hear appeals of decisions of county courts in criminal and civil cases and to hear appeals relating to a variety of administrative decisions and noncriminal infractions. The amended bill does not transfer to the district courts of appeal the appellate jurisdiction of circuit courts to hear administrative decisions and appeals relating to noncriminal infractions.

The House Judiciary Committee proposal relating to appellate court jurisdiction has been officially introduced as **HB 7059** and is identical to the Senate proposal.

HB 7059 has been introduced and referred to the Appropriations Committee.

AMERICAN OVERSIGHT

Link to HB 7059: http://www.flsenate.gov/Session/Bill/2020/7059

Statewide Council on Prosecutorial Misconduct – *No Action*

SB 262 by Senator Randolph Bracy (D-Orlando) creates the Statewide Council on Prosecutorial Misconduct within the Department of Legal Affairs. The council will provide recommendations and findings relating to prosecutorial misconduct to the Department of Lawyer Regulation within The Florida Bar and to the Supreme Court's Chief Justice. The council's membership includes four prosecutors, four public defenders or assistant public defenders, a district court of appeal judge, and two county or circuit court judges. By January 14th of each year, the council is required to submit an annual report to the Governor, Legislature, and Chief Justice summarizing the council's recommendations and findings during the previous calendar year.

There has been no action this session on SB 262 and a House companion bill has not been filed to-date.

Link to SB 262: http://www.flsenate.gov/Session/Bill/2020/262

Legal Notices – *House Bill Passes Last Committee/Senate Bill Gets First Hearing Next Week*

HB 7 by Rep. Randy Fine (R-Palm Bay) and **SB 1340** by Senator Joe Gruters (R-Sarasota) provide for the website publication of legal notices, provide criteria for such publication, authorize fiscally constrained counties to use publicly accessible websites to publish the legally required advertisements and public notices, and require governmental agencies to provide specified notice to residents concerning the alternative methods of receiving legal notices. The House adopted technical amendments to the bill which clarify that the publication requirement only applies to a governmental entity who uses a website to publish notices, and that the notice of proposals for any public-private partnership still has to be published in the Florida Administrative Register and in the local county in which the project would be located. The House also amended the language dealing with notices for property tax increases.

On February 6th, HB 7 passed the State Affairs Committee by a vote of 14 to 9 and the bill is now on the calendar of bills ready for Chamber consideration. SB 1340 is scheduled to be heard in the Judiciary Committee on February 11th.

Link to HB 7: http://www.flsenate.gov/Session/Bill/2020/7

AMERICAN OVERSIGHT

Link to SB 1340: http://www.flsenate.gov/Session/Bill/2020/1340

Legal Advertising – *House Committee Bill Introduced*

The legislature is also considering certain restrictions of legal advertising. While generally in the purview of the Florida Supreme Court, some state legislatures across the country have passed specific restrictions on legal advertising, typically under unfair and deceptive practices statutes. Senator Tom Wright (R-New Smyrna Beach) filed **SB 1288** pertaining to the solicitation of legal services. Specifically, the bill focuses on advertisements featuring "medical alerts" or "consumer alerts" using the names or logos of a regulatory agency.

There was no movement on the Senate legislation. On February 4th, the House Civil Justice Subcommittee heard PCB CJS 20-02 on legal advertising and voted to introduce the bill officially as HB 7083.

HB 7083 prohibits legal advertisements from containing information on the use, sale, or transfer of protected health information for purposes of soliciting legal services. Specifically, the proposed bill:

- Prohibits a person who submits a legal advertisement for publication, broadcast, or dissemination, or who pays for or otherwise sponsors a legal advertisement from:
  - Failing to clearly and conspicuously disclose the sponsor of the advertisement;
  - Displaying federal or state government agency logos in a manner implying affiliation with a that agency;
  - Including terminology implying that the product has been recalled when it has not been;
- Requires a legal advertisement to clearly disclose the warning, "Do not stop taking a prescribed medication without first consulting your doctor," if the advertisement solicits clients who may allege injury from a prescription drug; and
- Prohibits a person from using, obtaining, selling, transferring, or disclosing to another person without written authorization protected health information to solicit legal services.

The proposed bill also creates a cause of action for a person who suffers a physical injury as a result of a legal advertisement's violation of these provisions and authorizes compensatory damages, attorney fees, and court costs. Additionally, the Department of Legal Affairs or a state attorney may bring an action to enjoin any person who has violated these provisions, or

AMERICAN OVERSIGHT

may bring an action on behalf of one or more consumers or governmental entities for actual damages caused by a violation of these provisions.

Link to SB 1288: http://www.flsenate.gov/Session/Bill/2020/1288
Link to HB 7083: http://www.flsenate.gov/Session/Bill/2020/7083

Trial Court Security – *House Bill Passes Committee*

HB 131 by Rep. Stan McClain (R-Ocala) and **SB 118** by Senator Joe Gruters (R-Sarasota) require each county sheriff to coordinate with the board of county commissioners and the chief judge of the judicial circuit to develop a comprehensive court security plan for trial court facilities. The sheriff retains authority over the implementation of security, and the chief judge retains decision-making authority to protect due process rights. The legislation also clarifies that sheriffs and their deputies, employees, and contractors are officers of the court when providing security for court facilities.

On February 6th, HB 131 passed the Judiciary Committee by a vote of 15 to 0. The committee adopted an amendment which clarified that the chief judge retains broad decision-making authority to ensure the protection of due process rights. The Senate bill is now in its final committee, the Appropriations Committee.

Link to SB 118: http://www.flsenate.gov/Session/Bill/2020/118
Link to HB 131: http://www.flsenate.gov/Session/Bill/2020/131

Jury Service – *House Bill Passes Another Committee*

SB 738 by Senator Gayle Harrell (R-Stuart) and **HB 393** by Rep. Charlie Stone (R-Ocala) require students between 18 and 21 years of age who are actively enrolled as a full-time student in high school or at any state university, private postsecondary educational institution, Florida College System institution, or career center to be excused from jury service upon request.

SB 738 is now in the Rules Committee, its final committee reference. On February 6th, HB 393 passed the Education Committee by a vote of 15 to 0 and has one final hearing in the Judiciary Committee.

Link to SB 738: http://www.flsenate.gov/Session/Bill/2020/738
Link to HB 393: http://www.flsenate.gov/Session/Bill/2020/393

Early Childhood Courts – *HB 1105 Advances This Week*

AMERICAN OVERSIGHT

SB 236 by Senator Lauren Book and **HB 449** by Rep. Amber Mariano (R-Port Richey) create a new problem-solving court to support an Early Childhood Court (ECC) program for cases involving children under the age of three and uses specialized dockets, multidisciplinary teams, evidence-based treatment and a non-adversarial approach. Currently, there are 22 ECC sites throughout Florida serving 350 children aged 0-3. The legislation expands ECC access while standardizing procedures for the court throughout the state.

SB 236 has two remaining committee references – the Appropriations Subcommittee on Criminal and Civil Justice and the Appropriations Committee. HB 449 has not been heard in committees.

SB 1324 by Senator Wilton Simpson (R-Trilby) makes a number of changes to the child welfare laws. Among the provisions, the bill:

- Requires circuit and county court dependency judges to receive education relating to the value of secure attachments, stable placements and the impact of trauma on children in out-of-home care.
- Codifies the creation and establishment of Early Childhood Court (ECC) programs in the circuit courts that serve cases involving children typically under the age of three by using specialized dockets, multidisciplinary teams, evidence-based treatment and a non-adversarial approach.
- Requires DCF to notify the court of any report to the central abuse hotline that involves a child under court jurisdiction.
- Provides circumstances under which a court may remove a child and place he or she in out-of-home care if a child was placed in the child's own home with an in-home safety plan or was reunited with a parent with an in home safety plan.

A comparable bill, **HB 1105** by Rep. Josie Tomkow (R-Polk City), also encourages placement stability of children by requiring training to be offered to dependency court judges that informs them of the benefits of stable placements and related issues. The House bill also requires judges to consider certain factors related to placement stability when determining whether to change a child's placement. Further, the bill required judges to be notified of all central abuse hotline reports that are accepted for an investigation and when the report involves a child over whom the court has jurisdiction.

SB 1324 is now in the full Appropriations Committee. On February 5th, HB 1105 passed the Appropriations Committee by a vote of 26 to 0 and has one hearing remaining in the Health and Human Services Committee.

Judicial Travel Reimbursement – *House Bill Introduced*

SB 1392 by Senator David Simmons (R-Altamonte Springs) revises the provisions governing the payment of subsistence and travel reimbursement for Supreme Court justices who designate an official headquarters other than the headquarters of the Supreme Court. Most importantly, the bill authorizes district court of appeal judges who reside within 50 miles of his or her DCA headquarters and meet certain other criteria to have an appropriate facility in their county of residence designated as their official headquarters. The Senate bill was amended to authorize the Chief Justice to set policies and parameters for the use of alternative headquarters and travel reimbursement by eligible justices. Additionally, the Senate bill specifies that its provisions control over any conflicting provision in the travel-reimbursement statute that applies to all state employees and officers.

SB 1392 has two remaining committees of reference – the Appropriations Subcommittee on Criminal and Civil Justice and Appropriations Committee.

The House Judiciary Committee bill relating to appellate court headquarters and travel has been officially introduced as **HB 7057**. The House bill is identical to the Senate proposal and has been referred to the Appropriations Committee.

Subject: Thank you for an incredible 2020 Campaign Kickoff!

AMERICAN OVERSIGHT

Dear Jeff,

On Thursday night we officially kicked off our 2020 Re-Election Campaign!

The event saw nearly 200 people from all walks of life come together to help propel our movement forward. **We raised more than $32,000 from hundreds of individual donations, and sent a strong message to any and all opponents that *we are just getting started*.**

Click on the links below to see photos from our 2020 Kickoff, and feel free to share photos with your social media networks too!

Event Photos from Emily Wray

Photo Booth by Macbeth Studio

Black & White Photos by Juliano Rodriguez

Click Here To Watch Our Recorded Program via Facebook Live

We know that the stakes for 2020 could not be higher. **Major elections are on the line and people are struggling.** Right here in House District 47 there are families losing their Medicaid coverage, a veteran looking for affordable housing options, and kids too scared to go to school because of gun violence. Folks in our state are still discriminated against for being LGBTQ, women's rights are under attack, healthcare access is not well-funded or affordable, and climate change is very, very real.

But we are actually doing something about it, and we will *not stop* until every working Floridian has a wage they can live on. Until every business, no matter its size, has a fair chance to succeed. Until every Floridian can access health care without the risk of going into debt. Until we can walk our precious beaches and waterways, confident they will be there for our grandchildren to enjoy.

We will not stop until the promise of equality is shared by everyone, regardless of what bathroom they use or whom they choose to love.

We will not stop, and I am grateful to be in this fight with you by my side.

Onward,

Subject: This letter is regarding Alimony Reform in 2020 and HB 843.

To: Governor DeSantis and ALL Republican Members of the Florida Senate:

Please, as Republican Members of our Florida Senate, do not sponsor a 2020 bill that corresponds to HB 843.

We need alimony reform, but not via a bill such as HB 843.

Representative Andrade should have first sponsored a neutral task force to research positive outcomes so that we can reach due process for all Floridians. He has turned his back on more than half his constituency: women and children.

If you consider alimony reform without proper mediation for all cases, you will plunge tens of thousands of women and children into poverty.

Legislatures who help pass a bill such as this will lose their female voters. Please protect the women who voted for you and, indirectly, your under-aged and future Republican constituency. The Republican Party does not need to lose voters over a reckless alimony bill, especially since we are a major swing state that determines national level elections.

It is reckless to apply one generic formula to all cases. It is reckless on the part of Rep. Andrade to conclude his single equation for alimony duration addresses the number of child rearing years that still exist for the alimony recipient or the many other needs unique to each family. It is simply irresponsible on the part of our legislatures to even consider HB 843. Alimony Reform is really a form of Economic Public Policy and should be treated as such. The thoughtless alimony reform Rep. Andrade is seeking to put into practice does not take into consideration current needs of the alimony recipient nor does it take into consideration the burden it would place on the economic stability of Floridians or the State of Florida. Nor does it address the female Republican voter and the future of the Republican Party.

Please do not let this happen. We need an independent and unbiased research group to facilitate the necessary changes going forward.

Respectfully, Kristina Gabriel

December 9 – 13, 2019

Legislation to Create Permanent Staging Areas for Emergencies Passes First Senate Committee

Senate Proposed Bill (SPB) 7020: *Emergency Staging Areas* passed the Senate Committee on Infrastructure and Security, chaired by Senator Tom Lee. The legislation provides for the plan, design and construction of permanent Staging Areas for Emergencies (SAFE) as part of Florida's Turnpike System. SPB 7020 aims to create a reliable and consistent approach to emergency staging and ensure that nothing stands in the way of critical supplies and assistance reaching communities struck by a natural disaster or an emergency situation. The staging areas created through this legislation would be large enough to accommodate the staging of a significant amount of emergency-related supplies and equipment; provide space in support of emergency preparedness and evacuation activities, such as fuel reserve capacity; and could be used during non-emergency periods for commercial motor vehicle parking.

Bill to Combat Animal Abuse Passes Committee

The Senate Committee on Criminal Justice, chaired by Senator Keith Perry, unanimously approved Senate Bill 522: *Cruelty to Dogs,* by Senator Joe Gruters. SB 522 prohibits a person from restraining a dog outside and unattended during a natural disaster, such as a hurricane, and defines this offense as a first degree misdemeanor. It is reported that a startling number of dog deaths occurred during Hurricanes Irma and Michael. This legislation intends to ensure dogs are not neglected in times of a natural disaster.

Pro-First Responder Bills Advance

Two bills aimed at benefiting first responders were unanimously approved in Senate committees. Senate Bill 476: *Law Enforcement Vehicles,* by Senator Ed Hooper, passed the Senate Committee on Innovation, Industry, and Technology, chaired by Senator Wilton Simpson. This legislation ensures law enforcement officers have the ability to park their patrol cars at their homes without fear of penalties or fines from homeowners or condominium associations. SB 476 targets a problem that arose after a Clearwater police officer was threatened with daily fines by her homeowners association for parking her squad car outside of her home.

In the Senate Committee on Community Affairs, chaired by Senator Anitere Flores, Senators voted to approve Senate Bill 484: *First Responder Property Tax Exemption,* by Senator David Simmons. This legislation expands the First Responder Property Tax Exemption to include a law enforcement officer or firefighter who, prior to residing in Florida, was employed in another state and sustained a permanent disability while serving in the line of duty. Currently, the First Responder Property Tax Exemption is only afforded to first responders who sustain a disability in the line of duty while in Florida. The Florida Senate stands with our first responders and will fight for legislation that ensures they feel welcome in our communities and neighborhoods throughout the Sunshine State.

Measure to Require Parental Consent for Abortions Advances

Senate Bill 404: *Parental Consent for Abortion,* by Senator Kelli Stargel, passed the Senate Committee on Health Policy, chaired by Senator Gayle Harrell. The legislation requires a parent or guardian give consent before a physician can perform an abortion on a minor, with the exception of medical emergencies. SB 404 also allows for a minor to petition any circuit court in the area where she resides for a waiver of consent in order to obtain an abortion. The legislation aims to strengthen family units and ensure parental or guardian involvement and guidance in major decisions of their minor daughter during unplanned pregnancies. SB 406, accompanying legislation which exempts the name of minors using the court waiver process from being disclosed in public records, also passed the Committee on Health Policy.

Committee Approves Legislation to Save Florida ABLE, Inc. Program from Repeal

The Senate Committee on Children, Families, and Elder Affairs unanimously voted to approve Senate Bill 828: *Florida ABLE Program*, by Senator Lizbeth Benacquisto. The bill saves Florida ABLE, Inc., the direct-support organization that administers the Florida ABLE Program, from repeal. The Florida ABLE Program was created in 2015 to encourage and assist individuals and families with tax-free savings and investment to support individuals with unique abilities in maintaining health, independence, and quality of life. The program serves over 4,000 Florida Families and helps families with children with unique abilities to better prepare for the future.

Committee Approves Bill to "Keep Our Graduates Working"

As student loan debt continues to climb, Senate Bill 356: *Keep Our Graduates Working Act,* by Senator Travis Hutson, prevents a healthcare practitioner or other individual from losing their professional license, certificate, registration, or permit solely on the basis of defaulting on a student loan payment. The bill does not forgive any student debt or remove the ability to suspend or revoke a health care practitioner's license for other violations specified in law. The *Keep Our Graduates Working Act* passed unanimously in the Senate Committee on Innovation, Industry, and Technology, chaired by Senator Wilton Simpson.

Senate Subcommittees Review Governor DeSantis' Budget Recommendations

Senate appropriations subcommittees reviewed Governor Ron DeSantis' $91.4 billion budget proposal for the 2020-2021 fiscal year. The Governor's recommended budget includes significant funding for priorities areas of: education, hurricane recovery, tax relief for Floridians, Everglades restoration and water quality protection, health and human services, transportation and economic development, public safety and elections security.

Over the course of the upcoming Legislative Session, the Senate will take these recommendations into consideration and work with the House of Representatives and Governor DeSantis to pass a balanced budget while funding our state's critical needs and continuing to keep taxes low.

Welcome to the Florida Senate

This week the Florida Senate welcomed the following groups to the Capitol:

Senate Approves Measure to Secure Parental Consent for Abortions, Protect Infants Born Alive

The Florida Senate approved Senate Bill 404: *Abortion* by Senator Kelli Stargel. This legislation requires a parent or guardian give consent before a physician can perform an abortion on a minor, with the exception of medical emergencies. SB 404 allows a minor to petition any circuit court in the area where she resides for a waiver of consent in order to obtain an abortion. This legislation also increases the penalty from a first-degree misdemeanor to a third-degree felony if a health care practitioner fails to provide an infant born alive after an attempted abortion with the same quality and level or care as any other newborn.

SB 404 aims to strengthen family units and ensure parental or guardian involvement and guidance in major decisions of their minor daughter during unplanned pregnancies. SB 406, accompanying legislation that exempts the name of minors using the court waiver process from being disclosed in public records, also passed in the Senate.

Appropriations Committee Approves 2020-2021 Balanced Budget, Maintains $3.5 Billion in Reserves

The Senate Committee on Appropriations, chaired by Senator Rob Bradley, passed Senate Proposed Bill 2500: *Appropriations*, a proposed state budget for the 2020-2021 fiscal year. The proposed Senate budget invests in Florida's teachers, state employees, and environment while maintaining $3.5 billion in total reserves. The state budget includes $500 million for a new Teacher Salary Increase Allocation, along with $325 million in increased flexible funding through the Base Student Allocation, which districts can invest in teachers and school district personnel. $643.6 million is appropriated to address water quality and protection in order to restore and preserve Florida's unique environment. The Senate budget also invests in hardworking state employees with $403 million to fund across-the-board salary increases for state employees, as well as health insurance and retirement benefits. Additionally, the Florida Senate's budget continues to prioritize critical areas such as hurricane recovery, tax relief for Floridians, protection for Florida's vulnerable populations, health and human services, transportation and elections security.

Legislation Working to Divert Girls from Juvenile Justice System Passes Senate

Senate Bill 1056: *PACE Center for Girls* by Senator Wilton Simpson unanimously passed the Florida Senate. This legislation creates Florida statute authorizing the Department of Juvenile Justice to contract with PACE Center for Girls to provide services including education, counseling, training, and advocacy to girls and young women as an alternative to commitment and institutionalization. This legislation would also allow for future recurring funding for these services, provided funds are appropriated.

The PACE Center for Girls (PACE) is a non-profit organization whose mission is to provide girls and young women an opportunity for a better future and is recognized as a national model for reducing recidivism and improving school success, employment, and self-sufficiency. PACE has 21 centers in Florida, which serve over 3,000 girls and young women per year.

Legislation to Strengthen School Safety Advances

The Senate Committee on Infrastructure and Security, chaired by Senator Tom Lee, approved Senate Bill 7040: *Implementation of the Recommendations of the Marjory Stoneman Douglas High School Public Safety Commission,* presented by Education Committee Chair Manny Diaz, Jr. The legislation builds on school safety and security by addressing the recommendations of the Marjory Stoneman Douglas High School Public Safety Commission and strengthening mental health coordination, accountability, and compliance oversight authority. The bill seeks to add additional safeguards and clarifications related to the Coach Aaron Feis guardian program training; safe school officer authority and training; school safety reporting and planning; school safety oversight and accountability; and school-based juvenile diversions programs. Improving the safety and security of Florida's schools remains a priority to the Florida Senate.

Pro-Law Enforcement Legislation Passes Senate

The Florida Senate unanimously voted to approve Senate Bill 476: *Law Enforcement Vehicles,* by Senator Ed Hooper. This legislation ensures law enforcement officers have the ability to park their patrol cars at their homes without fear of penalties or fines from homeowners or condominium associations. SB 476 targets an issue that arose after a Clearwater police officer was threatened with daily fines by her homeowners association for parking her squad car outside of her home. Florida Senate Passes Measure Urging Congress to Improve Veteran Health Care Access

The Florida Senate unanimously voted to send Senate Memorial 420: *VA MISSION Act of 2018,* by Senator Manny Diaz, Jr., to the United States Congress. This memorial urges Congress and the United States Department of Veterans Affairs to ensure the implementation of the VA MISSION Act of 2018. The purpose of the VA MISSION Act of 2018 is to overhaul existing law on veteran health care to improve access to care for veterans, consolidate many community care programs, and expand eligibility for comprehensive assistance for family caregivers of veterans. This memorial sends a message to Congress that Florida is committed to supporting and protecting the more than 1.5 million veterans living in Florida.

Senate Appropriations Committee Reviews Governor's Budget Recommendations

The Senate Committee on Appropriations, chaired by Senator Rob Bradley, received a presentation on Governor Ron DeSantis' Budget Recommendations for Fiscal Year 2020-2021. The Governor's $91.4 billion budget proposal includes significant funding for priority areas of: education, hurricane recovery, tax relief for Floridians, Everglades restoration, protection for valuable water resources, health and human services, transportation and elections security. The Florida Senate is currently putting together budget recommendations and will consider the recommendations presented during this committee by the Governor's budget chief. The Senate will work with the House of Representatives and Governor DeSantis to pass a balanced budget that best serves the citizens of Florida.

Bill to Provide Insurance Coverage for Children in Need of Hearing Aids Advances

Senate Bill 1006: *Coverage for Hearing Aids for Children* by Senator Dennis Baxley unanimously passed the Senate Committee on Banking and Insurance, chaired by Senator Doug Broxson. This legislation requires individual health insurance plans to provide coverage for hearing aids for children and young adults ages 21 and younger. SB 1006 requires policies to provide a minimum coverage limit of $3,500 per ear within a 24-month period. It is estimated that approximately 1,700 children who have been diagnosed with hearing loss will benefit from this legislation.

Measure to Require Parental Consent for Abortions Advances to Senate Floor

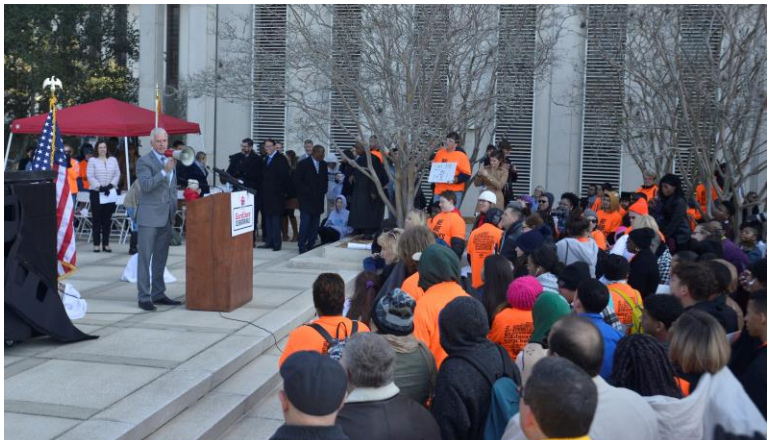
Senate Bill 404: *Parental Consent for Abortion*, by Senator Kelli Stargel, passed the Senate Committee on Rules, chaired by Senator Lizbeth Benacquisto. This legislation requires a parent or guardian give consent before a physician can perform an abortion on a minor, with the exception of medical emergencies. SB 404 allows a minor to petition any circuit court in the area where she resides for a waiver of consent in order to obtain an abortion. This legislation also increases the penalty from a first-degree misdemeanor to a third-degree felony if a health care practitioner fails to provide an infant born alive after an attempted abortion with the same quality and level or care as any other newborn.

SB 404 aims to strengthen family units and ensure parental or guardian involvement and guidance in major decisions of their minor daughter during unplanned pregnancies. SB 406, accompanying legislation that exempts the name of minors using the court waiver process from being disclosed in public records, also passed the Committee on Rules.

Committee Approves Bill to Help Save Lives of Police Canines

The Senate Committee on Health Policy, chaired by Senator Gayle Harrell, unanimously approved Senate Bill 842: *Injured Police Canines* by Senator Tom Wright. This bill allows for a canine injured in the line of duty to be transported in an emergency vehicle to a veterinary clinic or hospital if no person requires medical attention or transport when the canine needs it. SB 842 also authorizes Emergency Medical Technicians and paramedics to provide emergency medical care to the injured police canine at the scene of the emergency or while being transported.

AMERICAN OVERSIGHT



Legislation Increasing Penalties for Crimes Against Firefighters Passes Committee

Senate Bill 1142: *Offenses Against Firefighters* by Senator Ed Hooper unanimously passed the Senate Committee on Criminal Justice, chaired by Senator Keith Perry. This legislation increases the penalty for an individual, who commits first, second, or third degree murder or attempted murder against a firefighter, to life imprisonment without eligibility for release. Similar penalties are currently in place for murder or attempted murder of a law enforcement officer and other specified officers. Florida's firefighters put their lives on the line each day to protect our communities, and the Florida Senate is proud to support legislation in order to protect them.

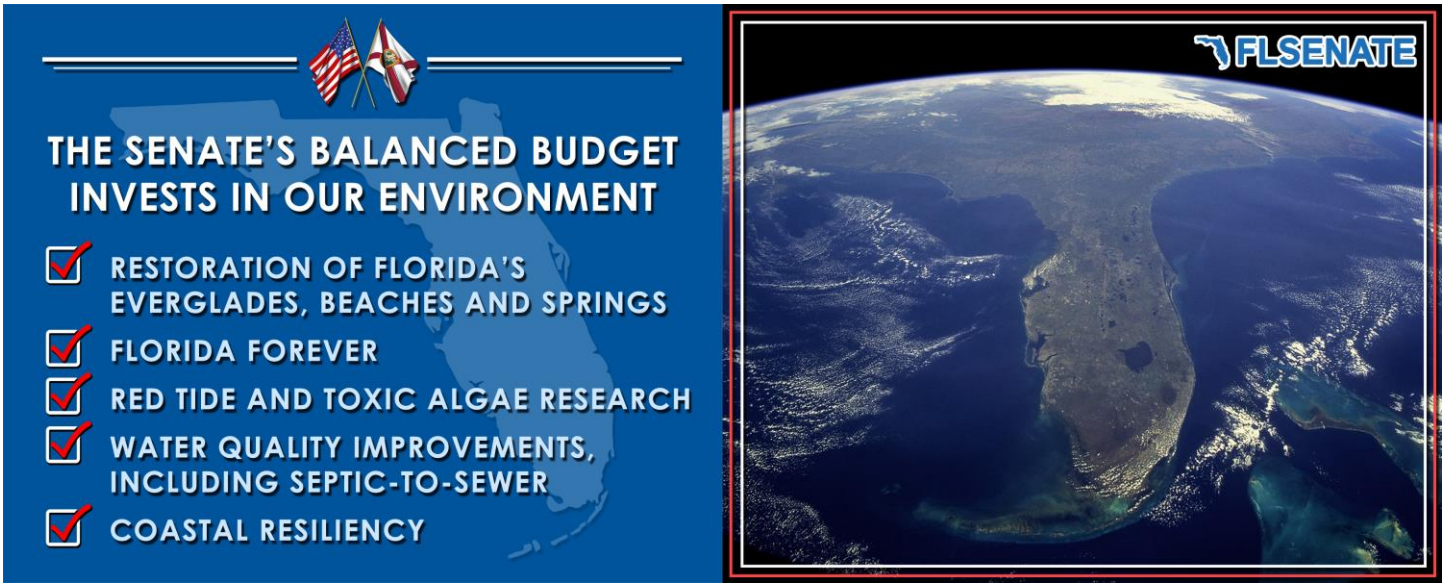
Senate Releases Proposed State Budget for 2020-2021, Invests in Florida's Teachers, Environment



The Florida Senate Committee on Appropriations, chaired by Senator Rob Bradley, released Senate Proposed Bill 2500, *General Appropriations Act*, a proposed state budget for the 2020-2021 fiscal year. The proposed Senate budget builds on a continued investment in elevating neighborhood public schools and ensuring our teachers are taken care of by dedicating $500 million in a new Teacher Salary Increase Allocation, along with $325 million in increased flexible funding through the Base Student Allocation, which districts can invest in teachers and school district personnel.

BILL GALVANO
President of the Senate

DAVID SIMMONS
President Pro Tempore

AMERICAN OVERSIGHT

Florida's environment and water quality remains a priority to the Florida Senate. With $643.6 million in funding for water quality and protection, the Florida Senate is working to restore and preserve Florida's unique environment through storage and treatment projects North of Lake Okeechobee, Red Tide and toxic algae research, septic-to-sewer conversions, and the development of coastal resiliency planning.

SPB 2500 also prioritizes critical areas such as hurricane recovery, tax relief for Floridians, protection for Florida's vulnerable populations, health and human services, transportation, and elections security, while still maintaining $3.5 billion total in reserves. The Senate will work with the House of Representatives and Governor DeSantis to pass a balanced budget that best serves the citizens of Florida.

Committee Advances Legislation to Deliver Broadband Internet Access to Rural Florida

Senate Bill 1166: *Broadband Internet Service*, by Senator Ben Albritton, unanimously passed out of the Commerce and Tourism Committee. This legislation aims to bring reliable broadband internet connectivity to rural areas throughout Florida. Specifically, SB 1166 creates the Florida Office of Broadband within the Department of Economic Opportunity to lead efforts for high-speed internet installation within or adjacent to Multi-use Corridors of Regional Economic Significance. Delivering high-speed internet to Florida's Heartland will help to revitalize rural communities, improve regional connectivity, boost business and educational opportunities, and enhance the quality of life for Floridians throughout the state.

AMERICAN OVERSIGHT

Bill to Protect Vulnerable Senior Citizens Passes Committee

The Senate Committee on Judiciary, chaired by Senator David Simmons, approved Senate Bill 994: *Guardianship*, by Senator Kathleen Passidomo. This legislation seeks to reform the state's guardianship program to better protect elderly individuals no longer able to care for themselves. SB 994 adds additional factors for a court to consider when appointing a guardian, revises the requirements for a petition for the appointment of a guardian, and prohibits a guardian from consenting to or signing a Do Not Resuscitate order or taking other serious actions on behalf of a ward without court approval.

These additional safeguards are in response to a case in Orlando where a guardian signed Do Not Resuscitate orders against the wishes of the wards and without approval or knowledge of the wards' families. The Florida Senate is committed to protecting our most vulnerable populations and putting an end to elderly abuse.

Measure to Create Permanent Emergency Staging Areas Advances

Senate Bill 7020: *Emergency Staging Areas*, by the Senate Committee on Infrastructure and Security and presented by Senator Tom Lee, unanimously passed the Appropriations Subcommittee on Transportation, Tourism, and Economic Development, chaired by Senator Travis Hutson. The legislation provides for the plan, design and construction of permanent Staging Areas for Emergencies (SAFE) as part of Florida's Turnpike System.

SB 7020 aims to create a reliable and consistent approach to emergency staging and ensure that nothing stands in the way of critical supplies and assistance reaching communities struck by a natural disaster or an emergency situation. The staging areas created through this legislation would be designed to accommodate the staging of a significant amount of emergency-related supplies and equipment; provide space in support of emergency preparedness and evacuation activities, such as fuel reserve capacity; and could be used during non-emergency periods for commercial motor vehicle parking.

3:00 p.m. – 4:00 p.m.	House Chamber Tour
3:30 p.m. – 5:00 p.m.	Senate Chamber Tour

AMERICAN OVERSIGHT

Brevard Briefings:

John Truitt
Deputy Secretary for Regulatory Programs, Florida Department of Environmental Protection

John Truitt is the Deputy Secretary for Regulatory Programs. Previously, Truitt served as DEP's Chief Advisor for Environmental and Regulatory Policy. He also served Floridians as a Chief Prosecuting Attorney and section manager at the Department of Health, a Chief Advisor to a Commissioner at the Public Service Commission and a Chief Attorney at the Office of Public Counsel.

Prior to his legal career serving the state of Florida, Truitt served in the U.S. Army on two occasions, including an extended combat tour in Iraq.

Truitt earned his law degree with a focus on environmental and land use law from Florida State University's College of Law.

Frank DiBello
President/CEO, Space Florida

Frank DiBello, Space Florida President and CEO, was selected in May 2009 to lead Space Florida, which is the principal state agency for aerospace-related economic development, and the Space Authority for the State of Florida. In his position, he develops and executes programs designed to attract, retain and grow aerospace business across the state. Additionally, Mr. DiBello focuses on Florida aerospace workforce development and retention as well as international partnership development.

Mr. DiBello holds more than 50 years of direct aerospace, defense and emerging space industry-related experience. Frank spent more than 20 years at KPMG, in various management positions where he was responsible for guiding the firm's aerospace industry consulting practice, heavily focused on support of major aerospace merger, acquisitions and consolidations. He founded KPMG's Space Industry Practice—focused on new space businesses, taking major satellite programs to Wall Street for financing and led the effort to develop commercial uses of the International Space station (ISS).

Mr. DiBello served on President Reagan's Private Sector Survey on Cost Control, also known as the Grace Commission, and was responsible for management of the teams reviewing the Departments of the Army, Navy, Air Force, Office of the Secretary of Defense, and NASA.

AMERICAN OVERSIGHT

The Commission produced recommendations on ways to save $424 billion of waste in the Federal Government over three years. For his service to the Nation in this Commission, he was presented with a Presidential Citation.

Mr. DiBello formed SpaceVest, a Venture Capital Firm focused on investments in companies taking defense and space technologies to commercial applications and markets. He later served as President and CEO of Constellation Communications, International (CCI), which held an Iridium-class license from the FCC, where he planned and raised the financing for a global satellite network for mobile broadband communication services.

Prior to Space Florida, Mr. DiBello was President and CEO of Florida's Aerospace Finance Corporation (FAFC), established by the Florida Legislature to assist financing the infrastructure needs of new and established companies for the aerospace space, and aviation markets.

Mr. DiBello has been involved in multiple civic, social and industry volunteer organizations. He founded the Washington Space Business Roundtable and was appointed to serve on a number of critical defense and space commissions and committees. For his work as President of the Board of the USO Metropolitan Washington, he received the Medal for Distinguished Public Service, the Department of Defense's highest civilian honor.

Mr. DiBello has taught at the Defense Systems Management College and International Space University. He received his Bachelor of Science in Mathematics from Villanova University, and did graduate work at American and George Washington Universities.

Dana Young
President/CEO, VISIT FLORIDA

As VISIT FLORIDA's President and Chief Executive Officer, Dana Young leads Florida's official destination marketing organization in partnership with its Board of Directors and the statewide tourism industry.

Throughout her career, Dana has served in leadership positions working to cultivate and protect Florida's exceptional business climate and a world-class quality of life. As an attorney at Fowler, White, Boggs, P.A. in Tampa, she represented a broad spectrum of businesses, landowners, and individuals in areas of regulatory compliance, permitting, zoning, and administrative law proceedings. Dana served in the Florida House from 2010 through 2016, rising to Majority Leader for the 2015 and 2016 legislative sessions. In 2016, she was elected to the Florida Senate, where she represented parts of western Hillsborough County for two years. Dana was recommended for the VISIT FLORIDA position by Governor Ron DeSantis and was unanimously approved by the VISIT FLORIDA Board of Directors on January 7, 2019. In addition to her duties as President and CEO, she is a member of the U.S. Travel Association's Chairman's Circle.

AMERICAN OVERSIGHT

Dana is a sixth-generation Floridian and was born and raised in Tallahassee. She received her undergraduate degree in Political Science from Florida State University and, in pursuit of her interest in law and public policy, graduated from the University of Virginia School of Law in 1993. In her free time, Dana enjoys spending time in natural Florida and tarpon fishing with her husband, Matt, and two daughters, Alexandra and Carson.

AMERICAN OVERSIGHT

Dear Jeff,

This Saturday we are co-hosting a **Day of Action in House District 47** along with Moms Demand Action, March For Our Lives Florida, and Equality Florida Action PAC focused on gun violence prevention and the November 2020 elections. You can learn more and RSVP here.

We must honor those who are no longer with us through action, and elect candidates who support common sense gun safety legislation -- *versus those that bend to the influence of the gun lobby.*

RSVP FOR OUR DAY OF ACTION HERE

I am proud to be a leading voice in the Florida House on gun safety issues and to file legislation that would keep guns out of the hands of domestic abusers. We must be bold and fearless in our efforts to reduce gun violence, and ensure that **constituents are engaged and ready to vote this November**.

Volunteer with us this Saturday from 10:00am - 2:00pm to knock on doors in House District 47. You can share the Facebook event here, and RSVP to attend at this link. Our canvass starting location will be shared with you as the date gets closer.

I hope to see you there, and please consider inviting your family and friends too!

Subject: We are proud of our members!

AMERICAN OVERSIGHT

Zachary,

This past weekend, I saw one of the most beautiful moments since I've been at the New Florida Majority.

Over 200 of our members got together to talk about what's at stake next year. Member delegates from 6 counties participated in our endorsement process by voting for the candidate they thought was best for our communities. It was an empowering sight to witness our people standing in line for the chance to cast a ballot and have a voice, especially when many of them are not allowed to vote in national elections. It was democracy in action.

We want to share what that process was like. Click on the video to watch this historic moment.

We believe in building independent political power rooted in Black and Brown communities. Together we will advance towards a Florida where we all can thrive, and a nation where we all belong. Exercising collective governance to back a candidate we believe will fight for our communities is part of that process — even when we know at the end of the day it's not about the candidate — it's about the power we are building together.

If you want to get involved text WARRENFL to 90975.

Join the movement to reclaim democracy in 2020.

Forward in Victory,
Andrea Mercado
Executive Director

READ: SOME OFFICIALS WANTS A STATE OF EMERGENCY FOR HOMELESSNESS

Regional_Homelessness.jpg

Last week Councilmember Buscaino introduced a resolution calling on Governor Newsom to declare a state of emergency for homelessness. If an earthquake displaced 130,000 people in California, how long would it take to house displaced residents? Why are we treating homelessness differently?

By Gale Holland, *Los Angeles Times*

Facing a deepening quagmire over homeless encampments, Los Angeles elected officials are increasingly looking to sweeping statewide initiatives to shake loose solutions. The latest proposal from Los Angeles County Supervisor Mark Ridley-Thomas and City Councilman Joe Buscaino would have the governor declare a state of emergency on homelessness in California.

Supporters view such a declaration as a novel strategy to free up state and federal funding typically reserved for natural disasters, such as earthquakes or wildfires, and to suspend or streamline the regulatory hurdles that often slow down shelter and housing development. It also could block NIMBY opponents from using environmental reviews to sue and delay or block homeless facilities

APPLY TODAY: SAFE SIDEWALKS LA REBATE PROGRAM OPEN

Safe_Sidewalks.PNG

The City's Sidewalk Rebate Program re-opened on October 1, 2019. The program will accept new applications for a limited time, based on available funding. Property owners must apply with the City to participate in the program, then pay for their own repairs. Once certified by the City that the repairs are ADA-compliant, the property owner then receives the City's valuation offer amount, up to $10,000. For more information on the Rebate Program, please go to sidewalks.lacity.org/rebates to review the program's Frequently Asked Questions. APPLY...

OCTOBER IS DOMESTIC VIOLENCE AWARENESS MONTH

DV_Awareness.PNG

October is Domestic Violence Awareness Month. Councilmember Buscaino toured Rainbow Services with Rainbow Services Executive Director Elizabeth Eastlund this week. Rainbow Services provides shelter and support to anyone impacted by domestic violence including emergency and crisis assistance, transitional and community housing, supportive services, and education. They also lead in advocacy and innovative practices.

What Is Domestic Violence?
Does your partner ever….

- Insult, demean or embarrass you with put-downs?
- Control what you do, who you talk to or where you go?
- Look at you or act in ways that scare you?
- Push you, slap you, choke you or hit you?
- Stop you from seeing your friends or family members?

AMERICAN OVERSIGHT

- Control the money in the relationship? Take your money or Social Security check, make you ask for money or refuse to give you money?
- Make all of the decisions without your input or consideration of your needs?
- Tell you that you're a bad parent or threaten to take away your children?
- Prevent you from working or attending school?
- Act like the abuse is no big deal, deny the abuse or tell you it's your own fault?
- Destroy your property or threaten to kill your pets?
- Intimidate you with guns, knives or other weapons?
- Attempt to force you to drop criminal charges?
- Threaten to commit suicide, or threaten to kill you?

If you answered 'yes' to even one of these questions, you may be in an unhealthy or abusive relationship. Don't hesitate to chat or call us (1-800-799-7233) if anything you read raises a red flag about your own relationship or that of someone you know.

Break the Cycle also provides more information about patterns of abuse and behaviors commonly experienced by youth in dating relationships.

If you are in danger call 911. Or reach the National Domestic Violence Hotline at 1-800-799-7233 or TTY 1-800-787-3224.

THIS WEEK IN THE COMMUNITY

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

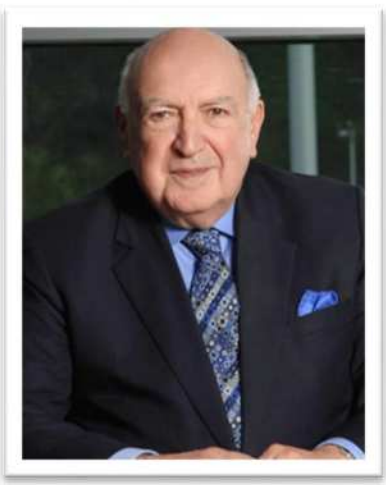
Brevard Briefings:



Noah Valenstein
Secretary, Florida Department of Environmental Protection

Noah Valenstein was appointed Secretary of the Florida Department of Environmental Protection by Governor Rick Scott on May 23, 2017 and reappointed by Governor Ron DeSantis on February 15, 2019. He returned to DEP with nearly 15 years of public service experience with governmental agencies and a passion for natural resource protection.

Noah most recently served as executive director for the Suwannee River Water Management District, where he oversaw the protection and conservation of water and land resources across 15 counties. His previous experience includes working on environmental, agricultural and energy issues in the Executive Office of the Governor and Florida House of Representatives, as well as with several of Florida's leading environmental nonprofit groups.

With a strong belief in the power of partnerships, Noah is focused on building relationships between diverse groups of stakeholders, including environmental and agricultural groups as well as local communities and businesses. He's built a reputation of bringing groups together to overcome obstacles and work toward a shared goal of environmental protection, and is committed to continuing in this spirit of partnership and service as DEP Secretary.

Noah was born in Gainesville, Florida, and graduated with honors from the University of Florida's School of Natural Resources and Environment. He also holds a law degree from Florida State University. Noah resides in Tallahassee with his wife, Jennifer, and daughter, Ava.

Frank DiBello
President/CEO, Space Florida

Frank DiBello, Space Florida President and CEO, was selected in May 2009 to lead Space Florida, which is the principal state agency for aerospace-related economic development, and the Space Authority for the State of Florida. In his position, he develops and executes programs designed to attract, retain and grow aerospace business across the state. Additionally, Mr. DiBello focuses on Florida aerospace workforce development and retention as well as international partnership development.

Mr. DiBello holds more than 50 years of direct aerospace, defense and emerging space industry-related experience. Frank spent more than 20 years at KPMG, in various management positions

AMERICAN OVERSIGHT

where he was responsible for guiding the firm's aerospace industry consulting practice, heavily focused on support of major aerospace merger, acquisitions and consolidations. He founded KPMG's Space Industry Practice—focused on new space businesses, taking major satellite programs to Wall Street for financing and led the effort to develop commercial uses of the International Space station (ISS).

Mr. DiBello served on President Reagan's Private Sector Survey on Cost Control, also known as the Grace Commission, and was responsible for management of the teams reviewing the Departments of the Army, Navy, Air Force, Office of the Secretary of Defense, and NASA. The Commission produced recommendations on ways to save $424 billion of waste in the Federal Government over three years. For his service to the Nation in this Commission, he was presented with a Presidential Citation.

Mr. DiBello formed SpaceVest, a Venture Capital Firm focused on investments in companies taking defense and space technologies to commercial applications and markets. He later served as President and CEO of Constellation Communications, International (CCI), which held an Iridium-class license from the FCC, where he planned and raised the financing for a global satellite network for mobile broadband communication services.

Prior to Space Florida, Mr. DiBello was President and CEO of Florida's Aerospace Finance Corporation (FAFC), established by the Florida Legislature to assist financing the infrastructure needs of new and established companies for the aerospace space, and aviation markets.

Mr. DiBello has been involved in multiple civic, social and industry volunteer organizations. He founded the Washington Space Business Roundtable and was appointed to serve on a number of critical defense and space commissions and committees. For his work as President of the Board of the USO Metropolitan Washington, he received the Medal for Distinguished Public Service, the Department of Defense's highest civilian honor.

Mr. DiBello has taught at the Defense Systems Management College and International Space University. He received his Bachelor of Science in Mathematics from Villanova University, and did graduate work at American and George Washington Universities.

Dana Young
President/CEO, VISIT FLORIDA

As VISIT FLORIDA's President and Chief Executive Officer, Dana Young leads Florida's official destination marketing organization in partnership with its Board of Directors and the statewide tourism industry.

Throughout her career, Dana has served in leadership positions working to cultivate and protect Florida's exceptional business climate and a world-class quality of life. As an attorney at Fowler,

AMERICAN OVERSIGHT

White, Boggs, P.A. in Tampa, she represented a broad spectrum of businesses, landowners, and individuals in areas of regulatory compliance, permitting, zoning, and administrative law proceedings. Dana served in the Florida House from 2010 through 2016, rising to Majority Leader for the 2015 and 2016 legislative sessions. In 2016, she was elected to the Florida Senate, where she represented parts of western Hillsborough County for two years. Dana was recommended for the VISIT FLORIDA position by Governor Ron DeSantis and was unanimously approved by the VISIT FLORIDA Board of Directors on January 7, 2019. In addition to her duties as President and CEO, she is a member of the U.S. Travel Association's Chairman's Circle.

Dana is a sixth-generation Floridian and was born and raised in Tallahassee. She received her undergraduate degree in Political Science from Florida State University and, in pursuit of her interest in law and public policy, graduated from the University of Virginia School of Law in 1993. In her free time, Dana enjoys spending time in natural Florida and tarpon fishing with her husband, Matt, and two daughters, Alexandra and Carson.

Gay-friendly companies financially support anti-LGBTQ Florida private schools

STANDING WITH OUR AIRPORT WORKERS

Before leaving for Tallahassee last week we stopped by Hannibal Square in Winter Park to celebrate MLK Day. We then attended a press conference at the Orlando International Airport in support of our airport workers who are advocating for increased wages and benefits. According to the union SEIU, 78% of the contract workers are making less than $20,000 a year, with some making a little as $5.25 an hour plus tips. If there's any airport that can improve working conditions, I know it's ours.

UPDATE ON ELECTIONS SECURITY

We've received a few emails from constituents about elections security. Last week the FBI announced a new policy that mandates the "notification of a chief state election official and local election officials of cyber threats to local election infrastructure." Increasing election security is a priority for local, state and federal officials in Florida and millions of tax dollars are being spent to shore up election security and to reassure voters that your votes will count.

Last week Orange County Supervisor of Elections Bill Cowles hosted his own press conference, stating that: "We've heeded the warning from 2016, Florida was the first state to have all of the counties use the Albert server, to monitor traffic coming in and out of our system, from that standpoint, we also have done penetration studies, we've built firewalls and changes, things we would not want to share." Election officials also highlight that Florida uses paper rather than digital ballots, which provides more protection from interference.

For those who do not know, Albert sensors function as a low-cost intrusion detection system and are being provided to state and local government agencies by the nonprofit Center for Internet Security (CIS).

Florida's Presidential Primary is March 17. The deadline to register to vote in that election is February 18.

PUSHING FOR EQUITABLE TAX POLICY

Our first Ways & Means meeting for the 2020 Legislative Session will take place later today, but we are *always* talking about taxes.

Last week the Orlando Sentinel wrote about the latest efforts by corporations to avoid paying taxes -- which you can read about here. We continue to advocate for a rollback of the $500 million tax refund the state's largest corporations are benefiting from, especially since those funds can be used for teacher pay, reducing the waitlist for disabilities, and many other public needs.

ADVOCATING FOR LOCAL CONTROL OF SUNSCREEN CHEMICALS

The Florida Legislature continues to preempt local governments from establishing their own ordinances, with the target this time focused on a bill that would block local governments from regulating over-the-counter drugs and cosmetics. The focus of the bill are two chemicals commonly found in sunscreen: oxybenzone and octinoxate. These chemicals have been found to damage the Florida Reef, with some

AMERICAN OVERSIGHT

concerns of its impact on human skin too. Key West banned the chemicals, leading to corporations wanting to preempt their ban.

We oppose this bill, asked the sponsor questions, sponsored an amendment to allow exemptions for local governments that border the Florida Reef, and ultimately voted the bill down. It still passed the Committee and is set to pass the Florida Senate.

One highlight from the committee was when my Republican colleague mentioned climate change-- you can watch that moment and my reaction by clicking on the video below.

SUPPORTING YOUTH SPORTS

This past week we presented and passed a funding request crafted by local constituents to help support youth sports in Central Florida. The first draft of Florida's state budget should be released soon-- we'll keep you posted when that budget comes out.

We also continue to advocate for affordable housing trust dollars to not be raided, and to support both arts and culture funding along with an increase of mental health funding.

FLORIDA COALITION AGAINST DOMESTIC VIOLENCE UPDATE

The Florida Coalition Against Domestic Violence (FCADV) plays a critical role in our state. Unfortunately there have been deep concerns around the organizations salary structure, as their longtime president and CEO Tiffany Carr was paid $761,000 in one year, raising eyebrows and questions on the organization's financial decision making. The Florida Department of Children and Families (DCF) started a review of the coalition's finances last summer, but have not been able to "move forward" with an audit for more than a year because FCADV will not hand over documents the department is requesting.

We sent a letter to House leadership last year asking for the legislature to investigate the misuse of funds. Shortly thereafter Tiffany Carr announced her retirement and then last week their interim CEO announced that she was stepping down. Now a bill is moving through the Florida House that would dissolve FCADV, which you can learn more about here.

We also wanted to lift up a new bill moving through the Senate focused on improving accountability with DCF, which you can learn more about here.

MEETING WITH CONSTITUENTS & ADVOCACY GROUPS

Last week we had over 40 meetings with constituents and advocacy groups at our Tallahassee Office! This included arts and culture organizations, Junior League, Earth Justice, space industry leaders, tourism advocates, librarians, AAUW, formerly incarcerated women, K9s for Warriors, and many more. We also welcomed both the Winter Park Chamber of Commerce and the Florida Babe Ruth Baseball League 12U All-Star Team to the Florida House from the House Floor!

Thank you for visiting us, and for inspiring us to be the best advocate for Florida!

PROTECTING OUR PUBLIC WORKERS

The Florida Legislature is fast-tracking House Bill 1, a bill that targets public workers and their ability to unionize by requiring employees to submit signed membership authorizations to employers to verify their intent to join a union before any membership dues can be collected. Employees would also be required to reauthorize union membership annually and unions must terminate membership upon written request from employees without asking any questions.

This bill would impact police, fire fighters, teachers, and other public employees. As a daughter of working class immigrants I know how important unions have been to our nation's history and to Florida's economy. We questioned the bill, filed an amendment, and debated it too. The bill ultimately passed along a mostly party line vote, with one Republican voting against it. You can watch my debate against the bill by clicking on the video below.

ARTS & CULTURE DAY IN THE FLORIDA CAPITOL

It was mentioned earlier that we welcomed more than 40 organizations to the Florida Capitol last week, and one of those groups was the Florida Cultural Alliance and our local arts and culture leaders! It was absolutely fantastic to speak to our state's arts leaders and to continue the push for arts and culture funding in Florida with advocates by our side.

MARKING THE ANNIVERSARY OF ROE V. WADE

The fight to protect access to a safe and legal abortion in Florida continues. Not only did we mark the 47th anniversary of Roe v. Wade with a major rally last week, but we also saw Senate Bill 404 -- forced parental consent legislation -- move through its final committee in the Florida Senate. The bill is set to be heard in the Florida Senate this week.

AMERICAN OVERSIGHT

On Friday I did a live interview with NPR's *Florida Roundup* about this bill and the hidden agenda by those who oppose abortion to use SB404 as a vehicle towards banning abortion in the state. You can listen to that interview here.

DEFENDING HOME RULE

Last week outside the House chamber doors myself, Rep. Ben Diamond, Rep. Joy Goff-Marcell, Rep. Carlos Guillermo Smith, Rep. Gerladine Thompson, Rep. Richard Stark, and Rep. Javier Fernandez joined forces to roll out a package of repealer bills designed to restore home rule in Florida. Coining the package as a "Repeal-A-Thon," we were joined by local officials, advocates, and directly impacted members of the community, addressing the legislature's aggressive preemption agenda and the corporate special interests behind the proposal. You can watch the launch at this link.

FIGHTING FOR LGBTQ EQUALITY

We continue to advocate for LGBTQ equality in Florida, and want to lift up the latest investigative piece by the Orlando Sentinel focused on Florida funding anti-LGBTQ voucher schools with public dollars. You can learn more here and here. Our legislation -- House Bill 45 -- would ban this type of discriminatory behavior from happening, but the bill hasn't been placed on the agenda of its first committee of reference yet. Here are two easy steps you can take to help this bill get a hearing:

1. If you do not live in HD47, call your State House Representative and ask that they co-sponsor HB45. Click here to identify your State House Representative.
2. Contact the Chairman of the bill's first committee stop and ask that that HB45 be given a hearing. Click here for contact information.

MOMS DEMAND ACTION IN TALLAHASSEE

It was fantastic to welcome Moms Demand Action to Tallahassee and to meet with hundreds of gun safety advocates from across the state. Thank you for your incredible work and advocacy.

DEATH PENALTY DECISION AND CRIMINAL JUSTICE REFORM

The Florida Supreme Court said Thursday it erred in 2016 when it ruled a jury must be unanimous in deciding a convicted murderer should be sentenced to death, announcing a dramatic legal reversal that could affect dozens of death row cases. It remains unclear if lawmakers will again change the death penalty law but the opinion caused an immediate outcry among criminal justice reform advocates. They called the decision a retreat on a critical element for ensuring justice in cases in which the death penalty is being sought. You can read more here.

SPEAKING AT FLORIDA STATE UNIVERSITY

Before heading back home last week, I served on a Democratic Women's Panel with the College Democrats at FSU. We had a fantastic conversation, and it is always such a treat to spend time with our local college students.

HOUSE DISTRICT 47 PAGE & DOCTOR OF THE DAY

We were thrilled this past week to welcome a House District 47 family to the Florida Capitol!

Many thanks to Sabrin who served in the Legislature's Page & Messenger program and to her dad Dr. Mo Azam who served as our Doctor of the Day! Grateful to have such incredibly engaged constituents, and we hope the whole family had a fantastic time in the Florida Capitol!

EVENTS IN HOUSE DISTRICT 47

This weekend was a busy one back in House District 47. We attended three events on Saturday including kicking off Rollins College's Day of Service, saying hello to the League of Women Voters of Orange County, and attending the 12th Annual Human Trafficking Awareness Day event. Remember: Floridians and visitors should visit YouCanStopHT.com for additional resources on how to spot traffickers and trafficking victims.

AMERICAN OVERSIGHT

UPCOMING EVENTS IN HOUSE DISTRICT 47

We have quite a few events coming up and encourage you to consider joining us at Orlando's Dragon Parade! You can learn more by clicking on the graphic below and can see all of our upcoming events at this link .

Onward,

PS: 16 years ago on Friday we lost our Mom after a long fight with cancer. I think about her every second-- her resilience, her joy, her deep generosity and sacrifice. Everything I am or hope to be I owe to her. Her death is a constant reminder to honor those who are no longer with us through action, today and everyday. You can read more about her story here. Love you Mom.

Subject: Your Official 2020 Legislative Update: Week 3

Dear Jeff,

We are back in Tallahassee for Week 4 of the 2020 Legislative Session! Below you will find your update from Week 3, along with a few upcoming events we invite you to join us for!

Keep in mind that that our Weekly Updates our thorough but will never be all encompassing to what happens during the 2020 Legislative Session. Please consider keeping up to date with us in real time through our social media accounts including Facebook, Twitter, and Instagram. You can also watch Committee Meetings and Floor Sessions live on the Florida Channel.

We wanted to take a moment to honor Terry DeCarlo who passed away last week after a courageous fight with cancer. Terry was on the frontlines following the Pulse nightclub shooting, and will be forever remembered for his love, compassion, and commitment to equality.

UPCOMING EVENTS

Team Anna will be volunteering at three upcoming community events. We encourage you to learn more by clicking on their respective graphics below.

Now onto to your Weekly Legislative Session Update--

FIGHTING AGAINST DISCRIMINATION IN FLORIDA'S VOUCHER SCHOOL PROGRAM

We continue to advocate for LGBTQ inclusivity in Florida's private voucher school program.

Two weeks ago the Orlando Sentinel reported that at least 14 percent of Florida's nearly 147,000 scholarship students attended private schools last year where homosexuality was condemned or, at a minimum, unwelcome. As stated in the Orlando Sentinel, "The Sentinel found 83 schools that refuse to admit LGBTQ students or could expel them if their sexual orientation or gender identity were discovered. Some also refuse to educate students whose parents are gay or to hire staff who are gay. Another 73 schools call being gay or transgender a biblical sin but do not explain how those views play out in admissions or student discipline decisions."

We filed legislation back in August 2019 to help address this problem and eliminate LGBTQ discrimination as a predetermination of admission into a tax-credit funded private school. The bill has yet to be given a hearing, and since then more companies have decided to end their contributions into this program, signaling frustration with the voucher system's inaction on addressing LGBTQ inclusivity for children and their families.

The decision by companies to end their contributions into the tax-credit program has forced leaders in the Department of Education (DOE) to address discrimination concerns. We are continuing dialogue with DOE and Republican colleagues to find a solution that ensures the safety of all students. This week already, we have seen Step Up For Students release a statement that mentions LGBTQ students and are hearing from parents that schools are being contacted to change their policies. Unfortunately it's been reported that Step Up For Students has removed their annual report from their website, hiding their donor list. As you may already know, the voucher system lacks transparency and this past week my colleagues passed a bill that would lead to even less oversight.

Our efforts to find common ground have not stopped some from attempting to polarize the situation, leading to politicians like Senator Marco Rubio sending a tweet designed to distract everyone from the main goal: ***protecting all of our kids***.

STATE BUDGET BEGINS TO BE RELEASED

The only constitutional duty of the legislature is to pass a budget, and that process has officially begun. The Florida Senate and House released budget proposals last Thursday that are about $1.4 billion apart, leaving our two chambers with less than six weeks to work out the differences. Click here to learn more about the proposed budgets.

In regard to teacher pay: The Senate's bill that lays out the framework for statewide teacher raises, Senate Bill 62, is up for a hearing on Wednesday in the Appropriations committee. There are some key differences between the House and Senate on how teacher raises should work. The Florida Senate on Thursday also released a proposed $92.8 billion spending plan for 2020-21 that includes a 3% pay raise for state employees and additional money for public school teachers and corrections officers.

SECOND CHANCES FOR CLEMENTE AGUIRRE

AMERICAN OVERSIGHT

Clemente Aguirre was found guilty of murder in the 2004 stabbing deaths of former neighbors Cheryl Williams and Carole Bareis. Aguirre has always professed his innocence, and originally told police he knew nothing about the murders because he was an immigrant from Honduras and feared being deported. But then later in the day he confessed to discovering the bodies and was soon thereafter convicted and sentenced to death in 2006. In 2016 — thanks to a legal team, the Innocence Project, and new evidence — the Florida Supreme Court unanimously overturned the conviction based on new evidence, including DNA testing of several pieces of evidence that implicated another suspect. This session we have filed a claims bill for Aguirre so that he can have a second chance at life.

Keep in mind that several important and bipartisan criminal justice reform related bills will be heard this week. This includes The Tammy Jackson Act (HB 1259) and Urban Core Gun Violence Task Force (HB 201) both by Rep. Jones, as well as Detention of Children (HB 421) by Rep. Alexander, which would prohibit children behind held in adult jails while waiting for their day in court.

Drivers license suspension reform will also be addressed with Fines & Fees (HB 903) by Rep. Donalds. Meanwhile, the Florida Sheriffs Association is actively working to undermine these bipartisan efforts.

WELCOMING EQUALITY FLORIDA TO TALLAHASSEE

We joined LGBTQ advocates last Monday to rally for equality legislation and against a proposed ban on medical treatments for transgender children, calling the push misguided and harmful. You can read more here.

This has been a tough session for LGBTQ equality. Last Tuesday a Florida House committee passed a bill that would partially repeal 20 years of local LGBTQ rights laws. Today another committee heard a bill to jail doctors for providing life-saving care to vulnerable transgender teens (which by the way, is seen to be linked to suicide rates among trans-youth) but after compelling Q&A by lawmakers and powerful personal testimony the bill is dead. **Deep gratitude to House District 47 constituents Sally and Asher who came to Tallahassee to testify today, too**.

PROGRESS ON THE U-VISA SYSTEM

The Miami Police Department has enacted changes to how it treats immigrant victims of crime in response to an investigation by Reveal from The Center for Investigative Reporting. The story found that dozens of law enforcement agencies across the country routinely undermine visa protections for immigrants. Last session we brought up these concerns while debating SB168, and are pleased to see Miami Police Department making changes. We encourage all law enforcement agencies to do the same.

MEETING WITH ADVOCACY GROUPS

Last week we had over 40 meetings with different advocacy organizations and constituents. This included AARP, constructions groups, engineers, youth organizations, FFA, Central Florida Association of Women Lawyers, YMCA Youth in Government, foster care advocacy groups, AMI, and so much more! We also met with anti-abortion activists, and though we might not agree on everything we were able to find common ground on the importance of supporting pre-natal and post-natal care. I even had the chance to connect with my alma mater, University High School! ***Go Cougars!***

SUPPORTING FLORIDA'S NATIONAL GUARD

Last week we met with Maj. Gen. James O. Eifert and his team to talk about funding needs for the Florida National Guard. We are lucky to have an armory for the National Guard in HD47, and are committed to making sure our soldiers are well supported by the state when they are home.

DEFENDING HOME RULE

We continue to stand as proud advocates for local control and home rule, this time questioning and debating HB305-- legislation that would preempt local governments from providing their own protections for employment. You can watch my full debate against this bill here .

EARNED INCOME TAX CREDIT FOR WORKING FAMILIES

Last week stood in solidarity with our Democratic colleagues and advocates in support of two bills: one focused on an Earned Income Tax Credit and the second on Paid Family Leave. It's critically important that Florida focus on legislation that will make life easier for working families, and we will always do our part to lift up these policy ideas.

INTERFAITH COALITION FOR REPRODUCTIVE HEALTH & JUSTICE BREAKFAST

AMERICAN OVERSIGHT

Last week a legislative prayer breakfast was hosted by the Interfaith Coalition for Reproductive Health and Justice focused on lifting up faith voices who support reproductive rights and abortion access. The breakfast featured a handful of lawmakers and a room full of advocates.

Unfortunately abortion rights in Florida are at risk and tomorrow the Florida Senate will vote on SB 404, the forced parental consent bill. Click here to listen to my live interview with NPR's Florida Roundup to learn more about this bill and the hilden agenda by those who oppose abortion to use SB404 as a vehicle towards banning abortion in the state.

SUPPORTING & MEETING WITH OUR BREWERIES

It was wonderful to meet with breweries from House District 47 in Tallahassee and to connect with our Mainstreet Orlando leaders too! We love our small businesses, and are committed to building an economy that supports you and your growth!

CHILDREN'S DAY AT THE CAPITOL

This week was Children's Day at the Capitol and many youth-focused groups traveled to the Capitol. That included foster-youth advocacy organizations, early-ed experts, and Pace Center for Girls!

AFFORDABLE HOUSING RALLY

We continue to maintain our fierce advocacy for affordable housing and are focused on protecting the affordable housing trust funds, lifting up the needs of renters, and supporting are local governments in their efforts to diversify the supply of affordable housing options. We also joined advocates for a press conference lifting up all of these issues and more.

Unfortunately the Florida House's first draft budget raids $240 million from the affordable housing trust funds, though the Senate's draft budget does keep the trust fund fully in tact.

PROTECTING OUR WATER

Florida's Chief Economist Amy Baker warned state leaders that water shortages are coming unless action is taken to excel the state's water quality restoration goals. Meanwhile, the South Florida Water Management District has approved a plan to buy about 20,000 acres in the Everglades, a deal that would block exploratory oil drilling on part of the property. We continue to monitor Nestle requesting to increase their water pumping permit in Ginnie Springs, knowing that a bill to set a pumping fee for water was temporarily postponed in the Senate.

UPDATE ON THE FLORIDA COALITION AGAINST DOMESTIC VIOLENCE (FCADV)

Last week we were pleased to see GOP leadership of the Florida House take our concerns of funding at FCADV seriously, leading to an investigative hearing at the Public, Integrity, & Ethics Committee. Bipartisanship is possible, and we're proud to be a facilitator of it.

NATIONAL GUN VIOLENCE SURVIVORS WEEK

This week we honor the second National Gun Violence Survivors Week, a week focused on sharing and amplifying the stories of gun violence survivors who live with the impact of gun violence every day of the year. Early February marks the approximate time that gun deaths in the United States surpass the number of gun deaths experienced by our peer countries in an entire calendar year. Tragically, America's gun death rate is 11 times greater than that of our peer countries. We continue to support common sense gun safety legislation and wanted to make sure you saw that the Ban Assault Weapons Now (BAWN) citizen-led ballot amendment campaign will be now focused on collecting enough petitions by 2022 versus 2020.

Meanwhile, the legislator continues to make citizen-led ballot amendments much more difficult. They did the same last legislative session too, and you can read more here.

EVENTS BACK IN HOUSE DISTRICT 47

We had a busy weekend back in HD47! While I was in Tallahassee Lauren from our team attended Rollins College's inaugural State of the College address. Once I was back home, I met with a local foster youth advocate in our district, stopped by the Central Florida Muslim Business Expo, and spent time with volunteers in Downtown Orlando feeding and clothing the homeless. I also attended and spoke at Eatonville's annual Zora! festival, and spent time with Limbitless at UCF!

That's your weekly update for now! Thank you for trusting me to serve you in the Florida House!

Subject: Your Official 2020 Legislative Update: Week 4

Dear Jeff,

We are now back in Tallahassee for Week 5 of the 2020 Legislative Session! Below you will find your update from Week 4, along with a few upcoming events we invite you to join us for.

Missed a weekly update? Click on these respective links to catch up: Week 1, Week 2, Week 3.

Keep in mind that our Weekly Updates our thorough but will never be all encompassing to what happens during the 2020 Legislative Session. Please consider keeping up to date with us in real time through our social media accounts including Facebook, Twitter, and Instagram. You can also watch Committee Meetings and Floor Sessions live on the Florida Channel.

Special thanks to those who joined us for Orlando's Annual Dragon Day Parade earlier today, too!

UPCOMING EVENTS

Team Anna will be attending two upcoming community events. We encourage you to learn more by clicking on their respective graphics below.

WATERMARK WAVE AWARD

Thank you Watermark Online readers for nominating us to be Favorite Local Politician AND Favorite Local Ally for Equality! It's an honor to be your advocate, both in Central Florida and Tallahassee! Online voting is open now until Friday and you can vote for the final winners via this link. Cast your ballot soon — it's good practice for November!

Now onto to your Weekly Legislative Session Update--

AID TO PUERTO RICO

On Friday the Democratic-controlled U.S. House passed a $20 billion-plus aid package for Puerto Rico, where a swarm of earthquakes last month set back the island territory's slow, troubled recovery from the hurricane devastation of 2017. Unfortunately, the White House has promised to veto the legislation, charging the island's government of mismanagement and weak financial controls. As we continue to wait for action by the federal government, here's a quick way you can give towards Puerto Rican relief efforts .

ENSURING LGBTQ PROTECTION FOR ALL FLORIDIANS

This has been a whirlwind week for LGBTQ equality in Florida.

The ongoing work to advocate for LGBTQ inclusivity in Florida's private voucher school program has continued for us. Three weeks ago the Orlando Sentinel reported that at least 14 percent of Florida's nearly 147,000 scholarship students attended private schools last year where homosexuality was condemned or, at a minimum, unwelcome. As stated in the Orlando Sentinel, "The Sentinel found 83 schools that refuse to admit LGBTQ students or could expel them if their sexual orientation or gender identity were discovered. Some also refuse to educate students whose parents are gay or to hire staff who are gay. Another 73 schools call being gay or transgender a biblical sin but do not explain how those views play out in admissions or student discipline decisions."

We filed legislation back in August 2019 to help address this problem and eliminate LGBTQ discrimination as a predetermination of admission into a tax-credit funded private school. The bill has yet to be given a hearing, and since then more companies have decided to end their contributions into this program, signaling frustration with the voucher system's inaction on addressing LGTBQ inclusivity for children and their families. Recently Fifth-Third Bank returned to the voucher system, signaling an internal agreement was made between their company and AAA (the voucher processing organization). It should be noted that the agreement did not include any commitment on LGBTQ inclusivity.

Last week we joined others in meeting with Step Up For Students, the state's larger voucher processing organization. It was a good meeting, and I am hopeful that a solution will be found soon that ensures no child in who participates in Florida's voucher system will face discrimination. Here's a Twitter thread from the Orlando Sentinel that outlines some of these recent events too.

In addition to advocating for LGBTQ inclusivity within Florida's voucher system, another committee heard a bill to jail doctors for providing life-saving care to vulnerable transgender teens (which by the way, is seen to be linked to suicide rates among trans-youth). After compelling Q&A by lawmakers and powerful personal testimony the bill is dead. Deep gratitude to House District 47 constituents Sally and Asher who came to Tallahassee to testify. Representative Amy Mercado-- who is the mom of a transgender daughter-- also shared

AMERICAN OVERSIGHT

powerful personal testimony that you can watch here.

Later in the week, House Speaker Jose Oliva was asked questions from the media about the Competitive Workforce Act, popular bipartisan bill that would ban LGBTQ discrimination in the state. The Speaker said it wasn't a major problem-- leading to more pressing questions from reporters. You can watch the full interaction here.

STATE BUDGET TO BE DEBATED

The only constitutional duty of the legislature is to pass a balanced budget. Last week lawmakers in their respective appropriation committee presented and debated both the House and Senate budget proposals. This week we will debate the different budget silos on the House Floor.

Some of our state funding priorities include increased pay for all teachers and support staff, state raises, affordable housing, arts and culture funding, mental health funding, reducing the APD waitlists, securing additional judges for Circuit 9, fully funding the needs of our National Guard, supporting our caregivers, and so much more. You can click here to learn more about the proposed budgets.

LIFTING UP MENTAL HEALTH

Since 2008, more than 60,000 U.S. veterans have taken their own lives, with more than half of those deaths via firearms. This is a heart wrenching statistic, and reinforces why investment into mental health programs for Floridians of all ages and backgrounds matters. It also once more elevates the all-too-common connection between suicide and gun access.

PROTECTING OUR WATER

The South Florida Water Management District has officially approved a plan to buy about 20,000 acres in the Everglades, a deal that would block exploratory oil drilling on part of the property. This is great news, but we still have a lot of work to do in protecting Florida's natural resources. We spoke to WFSU about this last week, and you can listen to our radio interview at this link. The legislature is also moving forward a bill that would increase sewage spills fines, creating more harsh penalities.

Last week the Florida House also passed a modest but important bill that would increase the penalties for anyone who killed black bears out of season. The bill (HB 327) would make it a first-degree misdemeanor to kill a bear or possess a freshly killed bear during a closed season, up from a second-degree misdemeanor. (Of course, we would prefer bears not be hunted at all).

WELCOMING LEAGUE OF WOMEN VOTERS TO FLORIDA

It was wonderful to welcome the League of Women Voters of Florida (LWVF) to Tallahassee last week! As a longtime League member myself, it's always a joy to discuss hot topics and dive deep into policy with our LWVF members!

TRANSPORTATION UPDATE

In Orange County there continues to be dialogue over the consideration of a new penny sales tax to go towards transportation. But in Tallahassee that option for local governments is being tested in the Florida Supreme Court. Four Florida Supreme Court justices heard oral arguments on Wednesday over whether or not the tax intended to improve Hillsborough County's infrastructure is constitutional. Since Jan. 1, more than $207 million in collected sales tax has been sitting dormant. You can learn more here. Meanwhile, we met with the Florida Department of Transportation (FDOT) to touch base on state transportation projects taking place in House District 47, including the I4 Ultimate Project. You can see a breakdown of these projects in the photo below. Right now FDOT is spending a little over $72 million in transportation projects in our district.

BREWERIES AND DOGS

As you might already know, dogs are not allowed inside of breweries in Florida, though legislation moving in our chamber could change that. You can read the Orlando Sentinel's review of this issue here, and know that we fully support allowing dogs to be in our breweries, giving small businesses decision making power on if, when, and where dogs would be welcome.

REDUCING PLASTIC WASTE

We are proud to sponsor legislation to restore home rule on the regulation of plastics, allowing local cities and counties to control plastic usage in their communities. This is our second session in a row sponsoring this bill, and we joined advocates from Surfrider and other organizations for Rise Above Plastic and to push for proactive environmental protection policies. The event not only focused on our bill but advocates were also supporting efforts to limit smoking on beaches and public parks, along with other environmentally focused bills.

AMERICAN OVERSIGHT
FL-SEN-20-0201-B, 20-0202-A-006847

MAKING ORLANDO AN AUTISM FRIENDLY CITY

It was amazing to meet with the Center for Autism and Related Disabilities in our Tallahaasee office this past week, to learn more about their impact, budgetary needs, and plans to push Orlando towards becoming an Autism Friendly City! CARD has our full support to help make this a reality.

TAXES & WORKERS PROTECTIONS

This past week we saw the Orlando Sentinel publish a series of articles focused on different tax breaks corporations are lobbying for. This includes a $2 million tax break for rental car companies and a window manufacturer. The Orlando Sentinel also dived deep into a major preemption bill that is being pushed by Florida's tourism and restaurant industry. You can read that article here, and watch our debate against that bill here.

In related news, Florida's tourism industry created a PAC to fight John Morgan's $15 minimum wage amendment on the 2020 ballot. The new political action committee, called Save Florida Jobs, has raised $50,000 from the National Restaurant Association and $5,000 from Red Lobster. Read more here.

REFUGEE RESETTLEMENT

Last week we met with refugees who came to the Florida Capitol to advocate in support of refugee resettle programs. These programs are fully funded by the federal government, but it is important that state leaders support resettlement programs and to welcome refugees.

ADVOCACY VISITS

Last week we met with more than 30 advocacy groups at our Tallahassee office! This included our local realtors, dentists, nurses, environmental advocates, cultural organizations, faith-based organizations, and so much more! Thank you for coming to see us in the Florida Capitol!

DIAPER ACCESS FOR ALL

We are proud to be advocates for diaper access, to support eliminating sales tax on diapers, and to organize diaper banks in House District 47. Last week we had the chance to meet with leaders from the National Diaper Bank Network, and will be visiting a local Diaper Bank back in Central Florida soon, too!

State of the Latina & Florida Muslim Day at the Capitol

It was an honor to stand shoulder-to-shoulder with our latinas/latinx community members for Florida's 3rd Annual State of the Latina, and to host a press conference to mark Florida Muslim Day at the Capitol! Our state's diversity is its strength.

WELCOMING MAYOR BUDDY DYER

It was wonderful to get a surprise visit from Orlando Mayor Buddy Dyer, and to have Mayor Jerry Demings in Tallahassee. We are proud to work hand-in-hand with local governments in an effort to solve some of our region's most challenging problems.

ALZHEIMER'S AWARENESS

This past week also marked Alzheimer's Awareness Day at the Capitol. Florida has the second-highest prevalence of people with Alzheimer's, with 540,000 residents diagnosed. It is critically important that we support those directly impacted and their families through both policy and funding. Thank you for coming to see us, for sharing your stories, and for being such incredible advocates.

FIGHTING FOR HOME RULE

This past week the Orlando Weekly published an in-depth report on the fight for home rule in Florida, and how corporations have used preemption as a means to eliminate local ordinances they don't like for their bottom line. We firmly believe that the best government is a

AMERICAN OVERSIGHT

government that's closer to people and it's important for voters to understand how much of your local rights, how much local control has already been lost.

CRIMINAL JUSTICE REFORM

This week saw a major day of action with formerly incarcerated people and families of the incarcerated coming to the Florida Capitol to share their story and support criminal justice reform. It was an honor to meet families and hear their stories-- we are proud to support improvements to our state prisons and policies that focus on rehabilitation versus only incarceration.

FLORIDA WOMEN'S LEGISLATIVE CAUCUS MEETING

I love finding opportunities to work across the aisle with our Republican colleagues and am proud to serve in the Florida Women's Legislative Caucus! During last week's meeting we focused on upcoming women's suffrage events and discussed potential legislation to endorse as a Caucus.

ABORTION ACCESS UPDATE

Senate Bill 404 has passed the Florida Senate and will be heard in the Florida House soon. Click here to listen to my live interview with NPR's Florida Roundup to learn more about this bill and the hilden agenda by those who oppose abortion to use SB404 as a vehicle towards banning abortion in the state.

In related news, a so-called "parents' bill of rights" (HB 1059) is one step closer to the House floor after being approved by a committee Thursday. You can read more about this bill here, but know that it could limit sexual education in schools in cases where a parent objects to the subject matter and could make it easier for parents to opt-out of vaccinating their children. It also potentially endangers LGBTQ youth.

MATERNAL MORTALITY RATES

Florida ranks 32nd out of the 50 U.S. states in terms of the highest maternal mortality rates. The state had a maternal death rate of 28.1 per 100,000 live births from 2013 to 2017, according to federal data released by America's Health Rankings. According to the Orlando Sentinel, Orange County lags behind in reducing maternal mortality rates too. You can read more here but know that we are never not talking about prenatal and postnatal care, and are committed to increasing access to health care for all expecting parents.

TESTING IN MULTIPLE LANGUAGES & EDUCATIONAL STANDARDS

We are co-sponsors on bipartisan legislation to allow Florida's students to take state tests in their native language and though the bill is incredibly popular among lawmakers and stakeholders, it has not received one hearing in the Florida House. Meanwhile, the Department of Education is ending Common Core and are in the process of putting into place "B.E.S.T. Standards." DeSantis is calling his plan a "return to the basics of reading, writing, and arithmetic"-- you can read more about these new standards here and here.

On Thursday, the LeRoy Collins Institute released a study on Florida's charter schools. According to the institute, the report, labeled "Florida Charter Schools: Not as Good, Or as Bad, as Advertised," offered mixed marks on charter schools delivering "both good and not good news to critics and supporters of charter schools alike." You can read that report here.

BACK HOME IN HOUSE DISTRICT 47

It was a busy week back in House District 47! Our team attended a panel discussion at the Central Florida International Trade Office, we attended an event hosted at Rollins College by March For Our Lives, joined United Against Poverty for a strategic planning session, and supported Harbor House by marching in Walk a Mile In Her Shoes .

I got back to the district late on Thursday and spent my day meeting with constituents and speaking at Monarch Learning Academy in College Park! On Saturday we stopped by Paws in the Park and Elevation Scholars' preliminary interviews. We also joined Florida USAR Task Force 4 to learn more about our local emergency responders and how they need our support via the Florida Legislature.

SERVING OUR CONSTITUENTS

We are proud to support our constituents no matter the issue or challenge. Please be sure to always reach out if we can be of service, and never be afraid to ask for help.

AMERICAN OVERSIGHT

Before we close your Weekly Legislative Session Update we wanted to honor the fact that this Friday will be the two year mark of the shooting at Marjory Stoneman Douglas High School. We honor those who are no longer with us through action.
