**Re: Third Supplemental Response to Freedom of Information Act (FOIA) Requests
2020-DA-02836-F, 2020-REE-03063-F, 2020-DA-02838-F, and 2020-DA-02842-F**

Dear Mr. Evers and Mr. Salvador:

This is the Office of Information Affairs (OIA), FOIA Division's **third supplemental response** to the above referenced FOIA requests. This correspondence also responds to the matter of *American Oversight, et al. v. U.S. Department of Agriculture, et al.*, Civil Action No. 20-1259-EGS, currently pending in the U.S. District Court for the District of Columbia.

The pending Complaint in the above-referenced matter is based on USDA's alleged failure to comply with the applicable time-limit provisions of the FOIA in response to American Oversight (AO) and the Union of Concerned Scientist's (UCS) above-referenced requests.

To provide AO and UCS with the Civil Rights Impact Assessment documents requested, the Civil Rights offices for both the Economic Research Service (ERS) and the National Institute of Food and Agriculture (NIFA) conducted a manual search for responsive records. The searches resulted in forty-seven (47) pages of documents.

The OIA has determined that certain information should be withheld pursuant to 5 U.S.C. § 552 (b)(6). Below is an explanation of the information that has been withheld.

Application of 5 U.S.C. §552(b)(6) "FOIA Exemption 6"

FOIA Exemption 6 permits the government to withhold information regarding individuals in "personnel, medical and similar files" when the disclosure of such information would constitute a clearly unwarranted invasion of personal privacy and where such privacy interests outweigh any public interest that would be advanced by disclosure. For purposes of the FOIA, the public interest is advanced when disclosure of the requested information educates the public about the activities of the government.

Austin R. Evers / Ricardo J. Salvador

FOIA Requests 2020-DA-02836-F, 2020-REE-03063-F, 2020-DA-02838-F, and 2020-DA-02842-F

Page 2

The information withheld under Exemption 6 consists of ERS and NIFA employees' personal identifiable information. This information qualifies as "similar files" because it is information in which individuals have a substantial privacy interest. Since there is a viable, substantial privacy interest that would be threatened by disclosure, Exemption 6 authorizes the OIA to withhold this information. Accordingly, the OIA has determined that the public interest in the information's release does not outweigh the overriding privacy interests in keeping it confidential.

In light of the matter *American Oversight, et al. v. U.S. Department of Agriculture, et al.*, Civil Action No. 20-1259-EGS, currently pending in the U.S. District Court for the District of Columbia, administrative appeal rights are not being provided in this supplemental response letter.

If you have any questions or concerns about this supplemental response or the pending civil action, please contact John Truong, Assistant United States Attorney, U.S. Department of Justice at John.Truong@usdoj.gov.

Sincerely,

Alexis R. Graves
Director
Office of Information Affairs

Deputy Secretary

FROM: Naomi C. Earp, Esq. 
Deputy Assistant Secretary for Civil Rights

JUN 12 2019

SUBJECT: Proposed Selection of ERS Positions to Relocate Outside the National
Capital Region

In accordance with Departmental Regulation (DR) 4300-4, Civil Rights Impact Analysis, the Research, Education and Economics (REE) Mission Area has analyzed whether the relocation of certain positions will have a disproportionate or adverse impact on affected Economic Research Service (ERS) employees who are members of a protected class.

Background

The REE believes more flexibility to can be offered to current and future workforce, while also delivering maximum value to direct stakeholders and more broadly to U.S. taxpayers. ERS believes it can improve its ability to attract key talent to certain agricultural and economic research positions in ERS by decreasing the cost of living and commute lengths, which are exceptionally high in the National Capital Region. Additionally, ERS has a higher attrition rate than USDA department wide.

Summary of Changes

USDA believes the decision to compete the ERS lease in a broad geographic area will serve three primary objectives: One, place these important USDA resources closer to stakeholders who live and work outside the D.C. area. Second, benefit the American taxpayers through savings on employment and facility costs in the face of tightening budgets. Third, improve USDA's ability to attract and retain highly qualified staff with training and interests in agriculture, many of whom come from land-grant universities.

Effective Date:

The proposed ERS Staff Relocation is targeted to commence after the selection of the final location and announcement by the Secretary in late Summer or Early Fall of Fiscal Year (FY) 2019.

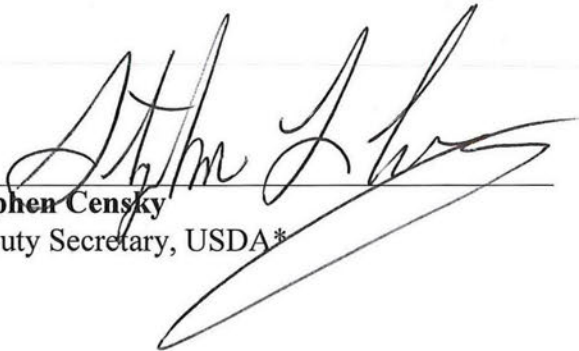

Civil Rights Impact Analysis for Proposed Realignment

As the ERS CRIA shows, the demographic characteristics of the incumbents in the positions selected for moving out of the national capital region is consistent with the demographic characteristics of the ERS workforce. For example, persons 40 years or older represent 74% of ERS's workforce and 72% of positions selected for relocation; women represent 48% of ERS's workforce and 50% of positions selected for relocation. As REE noted, the proportion of persons with disabilities impacted by this move (6%) is equivalent to the representation of persons with disabilities in the ERS workforce (6%). From a quantitative perspective, I consider the proportion of impacted positions to be consistent with the representation of protected groups in ERS's workforce. I agree with REE's assessment that these trends suggest the absence of disparate treatment based on a protected class. Consequently, these findings do not suggest the need for further quantitative analyses.

Conclusion

I agree with REE Management's determination that the potential impact to protected groups is proportionate to the representation of those groups in the ERS workforce. That is, the data suggest ERS has not intentionally targeted specific protected groups for relocation. Therefore, I see no quantitative evidence of disparate treatment or adverse impact. In light of the potential impacts associated with relocating employees, I agree the proactive measures proposed by management are appropriate and responsive mitigation strategies. I encourage the ERS Civil Rights Director to monitor any trend changes reflected in complaint or compliance review data to determine whether any unforeseen impacts exist, and to work with management to proactively mitigate those impacts should any arise.

**ERS Civil Rights Program
Civil Rights Impact Analysis
Clearance Sheet
ERS RELOCATION**

Stephen Censky
Deputy Secretary, USDA*

6-12-2019
Date

* In accordance with Departmental Regulation 4300-004, Civil Impact Analysis (CRIA), Section 13b, the certification must be signed by the Agency's current Civil Rights Director. However, this CRIA would directly impact all ERS employees, inclusive of the Civil Rights Director. Accordingly, this CRIA will be signed by USDA Deputy Secretary Stephen Censky.

**ERS Civil Rights Program
Civil Rights Impact Analysis:
ERS AGENCY RELOCATION**

Certification Sheet

Proposed Action: USDA is proposing to relocate most Economic Research Service (ERS) agency operations outside of the National Capital Region to help gain efficiencies and increase customer and stakeholder partnerships. This will help ensure USDA is the most efficient, most effective, most customer-focused Department in the Federal government. Secretary Perdue has evaluated current operations across the Department and believes we can offer more flexibility to our current and future workforce, while also delivering maximum value to our direct stakeholders and more broadly to U.S. taxpayers, in identifying a new location outside of the National Capital Region. We believe we can improve our ability to attract key talent to certain agricultural and economic research positions in ERS by decreasing the cost of living and commute lengths, which are exceptionally high in the National Capital Region. Additionally, ERS has a higher historical attrition rate than USDA department wide. Specifically, we believe that this decision will serve three primary objectives: One, place these important USDA resources closer to stakeholders who live and work outside the D.C. area. Second, benefit the American taxpayers through savings on employment and facility costs in the face of tightening budgets. Third, improve our ability to attract and retain highly qualified staff with training and interests in agriculture, many of whom come from our land-grant universities.

I certify I have received and analyzed the appropriate documentation and determined that:

- ☒ **No major civil rights impact is likely to result** if the proposed action is implemented. The action will not adversely affect any minorities, women, individuals over the age of 40, or persons with disabilities. See the attached supporting CRIA documentation.
- ☐ **Major civil rights impact, as described below, is likely to result** if the proposed action is implemented. See the attached CRIA documentation.

Stephen Censky
Deputy Secretary, USDA

6-12-2019

**United States Department of Agriculture
Economic Research Service
AGENCY RELOCATION**

Civil Rights Impact Analysis

BACKGROUND

USDA is proposing to relocate most Economic Research Service (ERS) agency operations outside of the National Capital Region to help gain efficiencies and increase customer and stakeholder partnerships. This will help ensure USDA is the most efficient, most effective, most customer-focused Department in the Federal government. Secretary Perdue has evaluated current operations across the Department and believes we can offer more flexibility to our current and future workforce, while also delivering maximum value to our direct stakeholders and more broadly to U.S. taxpayers, in identifying a new location outside of the National Capital Region. We believe we can improve our ability to attract key talent to certain agricultural and economic research positions in ERS by decreasing the cost of living and commute lengths, which are exceptionally high in the National Capital Region. Additionally, ERS has a higher historical attrition rate than USDA department wide. Specifically, we believe that this decision will serve three primary objectives: One, place these important USDA resources closer to stakeholders who live and work outside the D.C. area. Second, benefit the American taxpayers through savings on employment and facility costs in the face of tightening budgets. Third, improve our ability to attract and retain highly qualified staff with training and interests in agriculture, many of whom come from our land-grant universities.

Program Activity:

On August 9, 2018, the Secretary approved a relocation of ERS. A Federal Register announcement to initiate the process of identifying a new location for ERS was posted on August 14, 2018, and further extended through October 15, 2018. In our efforts to ensure USDA is the most efficient, most effective, and most customer-focused Department in the Federal government, the Secretary evaluated current operations across the Department and determined that efficiencies could be found outside of the NCR.

By exploring options for locating most of ERS outside of the NCR, we believe we can offer more flexibility to our current and future workforce, while also delivering maximum value to our direct stakeholders and more broadly to U.S. taxpayers. We believe we may not be attracting key talent to certain economic and agricultural research positions in ERS because of the high cost of living and long commute lengths in the NCR. Additionally, both agencies have a higher historical attrition rate than USDA department wide. Specifically, we believe that this decision will:

- Place these important USDA resources closer to stakeholders who live and work outside the D.C. area;
- Benefit the American taxpayers by identifying savings on employment and facility costs, especially in the face of tightening budgets; and
- Improve our ability to attract and retain highly qualified staff with training and interests in economics and agriculture, mainly of whom come from our land-grant universities.

Reason for Proposed Activity:

By exploring options for locating most of ERS outside of Washington, DC, we believe we can offer more flexibility to our current and future workforce, while also delivering maximum value to our direct stakeholders and more broadly to U.S. taxpayers. We believe we can improve our ability to attract key talent to certain agricultural and economic research positions in ERS by decreasing the cost of living and commute lengths, which are exceptionally high in the NCR. Additionally, ERS has a higher historical attrition rate than USDA department wide. Specifically, we believe that this decision will serve three primary objectives: One, place these important USDA resources closer to stakeholders who live and work outside the D.C. area. Second, benefit the American taxpayers through savings on employment and facility costs in the face of tightening budgets. Third, improve our ability to attract and retain highly qualified staff with training and interests in agriculture, many of whom come from our land-grant universities.

Effective Date:

The proposed ERS Staff Relocation is targeted to commence after the selection of the final location and announcement by the Secretary in late Summer or Early Fall of Fiscal Year (FY) 2019.

Current and Proposed Organizational Structure:

The current organizational structure is attached as Attachment A. There is no change in the organizational structure because of the relocation.

The proposed organizational structure is attached as Attachment B. There is no change in the organizational structure; only a new physical location.

DATA and ANALYSIS

Current and Proposed Data Chart:

The Current and Proposed Data Chart is provided below, and in Attachment C. Note, the relocation does not propose a reduction in grade(s) for any individual(s) or position(s). Rather, the only change is in the duty station.

As of the date of this Civil Rights Impact Analysis (CRIA), this proposed relocation will result in 212 (77%) of 274 ERS employees moving from Washington, DC to a new location determined through the competitive procurement process. The Civil Rights Impact Analysis (CRIA) presented herein evaluates potential impacts resulting from the geographic location of these positions. Position titles, series, grade levels, and reporting structures will not change with this relocation.

ERS demographic workforce data as of 3/30/2019 were included in this analysis. As Figure 1 shows, the ERS had a workforce generally representative of the Civilian Labor Force (CLF). The representation of Men in the ERS workforce (52%) was equivalent to the CLF (52%), and the representation of Women (48%) was also equivalent to the CLF (48%). The representation of Black Men (5%) was equivalent to the CLF (5%), and the representation of Black Women (16%) exceeded the CLF (7%). The representation of White Men (40%) was slightly higher than the CLF (38%). The representation of Asian American Men (5%) exceeded the CLF (2%), and the representation of Asian American Women (6%) also exceeded the CLF (2%). The representation of Men with 2 or more races (0.4%) exceeded the CLF (0.3%), and the representation of Women with 2 or more races (0.4%) also exceeded the CLF (0.3%). The representation of Hispanic Men (1%) was lower than the CLF (5%); and the representation of Hispanic Women (3%) was also lower than the CLF (5%). The representation of White Women (23%) was lower than the CLF (34%).

Figure 1: Demographic Characteristics of the ERS Workforce as of 3/30/2019.

	Total ERS Workforce	Positions Moving Out of Washington, D.C.	Civilian Labor Force (CLF)
TOTAL	274	212	
Men	52%	50%	52%
Women	48%	50%	48%
Hispanic Men	1%	1%	5%
Hispanic Women	3%	3%	5%
White Men	40%	38%	38%
White Women	23%	21%	34%
Black Men	5%	6%	5%
Black Women	16%	20%	7%
Asian American/PI Men	5%	5%	2%
Asian American/PI Women	6%	5%	2%
American Indian Men	0%	0%	0.6%
American Indian Women	0%	0%	0.5%
2+ Races Men	0.4%	0.5%	0.3%
2+ Races Women	0.4%	0.5%	0.3%

Disabled	6%	6%	
Age 40 and Over	74%	72%	

Data Source: NFC download on 04/12/2019

The demographic characteristics of the incumbents in the positions selected for moving out of the NCR is consistent with the demographic characteristics of the ERS total workforce. From a quantitative perspective, we consider these trends to suggest the absence of *disparate treatment* based on a protected class. Consequently, these findings do not suggest the need for further quantitative analyses.

We should note the proportion of persons with disabilities impacted by this move (6%) is equivalent to the representation of persons with disabilities in the ERS workforce (6%). While we see no evidence of disparate treatment, it is prudent to consider mitigating strategies to ensure any *reasonable accommodations*, both formal and informal, in effect at the time of the move continue in the new location.

ERS proposes the following change to its organizational structure:

1. Move the Washington, DC National Office to outside the NCR;
2. Place these important USDA resources closer to stakeholders who live and work outside the D.C. area;
3. Benefit the American taxpayers by identifying savings on employment and facility costs, especially in the face of tightening budgets; and
4. Improve our ability to attract and retain highly qualified staff with training and interests in economics and agriculture, mainly of whom come from our land-grant universities.

Impacted Employee Data:

As highlighted above, the purpose of the relocation is to: one, place these important USDA resources closer to stakeholders who live and work outside the D.C. area. Second, benefit the American taxpayers through savings on employment and facility costs in the face of tightening budgets. Third, improve our ability to attract and retain highly qualified staff with training and interests in agriculture, many of whom come from our land-grant universities.

ERS has made every effort to reduce and lessen any impact to employees.

The 212 employees will retain their position titles, series, grade levels, and reporting structures with this relocation. The relocation will only impact the current City/State, office, and work station. However, there will be a potential impact to locality pay because the relocation will be beyond 50 miles. All the same services currently provided to employees will be available in the new location.

We have consistently communicated to employees through monthly all-hands meetings, email communications from OSEC, REE, and the agency heads. Agency leadership also provides regular communication. A representative from OSEC/REE regularly meets with the employee focus groups to discuss issues and concerns.

Data Analysis Narrative:

Impacted: Provided below is the data analysis narrative for the proposed relocation, and the impacts to employees and vacancies.

CHART 1 (Attachment C), *ERS CRIA Current Status All Employees*: This chart contains information on the race, sex, national origin, age and disability of all ERS employees (as of 3/30/2019). The total ERS workforce is 274. Of the 274, 212 will be impacted, and 62 positions will remain in the NCR. Leadership determined that a cadre of support staff and senior scientists (total of 62 employees) would remain in the NCR to maintain mission critical functions of ERS. As part of the Department-wide IT consolidation, ERS employees in the 2210 series will likely be transferred to OCIO. The date of the transfer of ERS' eighteen (18) non-CIPSEA 2210's has yet to be determined; however, it is likely to be completed soon. The seventeen (17) 2210's performing CIPSEA-related functions will be retained by ERS and will not be relocated.

CHART 2 (Attachment D), *ERS CRIA To Be Status/Impacted Employees*: This chart contains information on the race, sex, national origin, age and disability of the 212 ERS employees (as of 3/30/2019) being relocated outside of the National Capital Region/Washington, DC. The total workforce of ERS is 274 but only 212 ERS employees will be impacted by the relocation.

Decisions Resulting in Impact(s):

The proposed ERS relocation will do the following: One, place these important USDA resources closer to stakeholders who live and work outside the D.C. area. Second, benefit the American taxpayers through savings on employment and facility costs in the face of tightening budgets. Third, improve our ability to attract and retain highly qualified staff with training and interests in agriculture, many of whom come from our land-grant universities.

ERS plans to make every effort to reduce or lessen impacts to current ERS employees.

Impact to Customer's Access to Services:

The changes to the ERS geographic location are internal and have no bearing on how we communicate with our customer base. Notifications were made to the public on: August 9, 2018,

September 7, 2018, October 22, 2018, December 21, 2018, and March 12, 2019. All press releases can be found on the USDA press page: <https://www.usda.gov/media/press-releases>.

Congressional notification is required since there will be changes in numbers of FTEs in Washington, DC. There will be a change in location for 212 current employees. Congressional notification is ongoing but was initially completed on August 7, 2018. As of May 2, ERS does not have a union.

Double or Multiple Impacts:

No double or multiple impacts have been identified. As stated above, the ERS Washington, D.C. office is being moved to outside of Washington, D.C.; however, the 212 employees will retain their position titles, series, grade levels, and reporting structures. Due to the relocation, the only change that these employees will experience is to their current City/State, office, and work station in late Summer or Early Fall of FY 2019.

MITIGATION

We are prioritizing new hires to build in redundancy to ensure that critical programs and products continue to be administered without interruption. New employees will be hired into the new location, unless otherwise indicated. We plan for a voluntary rolling transition of staff to the new location along with focused hiring at the new location to fill any vacated essential positions to ensure as little disruption as possible. Currently, agencies are filling some positions based on their strategic hiring plans. Until we know our current employee decisions and the new location(s), some decisions are pending. We are consistently evaluating hiring practices to provide the best customer service to our stakeholders. Relocation expenses will be provided to employees. This has been communicated through FAQs, all hands meetings, and smaller discussions with employees (i.e., brown bag lunch sessions).

ERS will consider reviewing its reasonable accommodation agreements to ensure a seamless transition to the new work location. There is a commitment by ERS to ensure that all current reasonable accommodation agreements will be maintained as they were in Washington, D.C. If necessary, will provide supplemental needs to the impacted employees.

It is good practice to periodically remind supervisors that employees are entitled to engage in protected activity, such as filing a complaint or requesting accommodation, without fear of *reprisal*. Providing EEO training and unconscious bias training may also help reduce incidents of alleged retaliation.

USDA leadership will continue to implement the telework policy, which allows for additional flexibility in certain scenarios.

USDA will offer relocation expenses in accordance with regulations established by the Office of Personnel Management. It has been determined that a house hunting trip will be permitted.

The current data show that of the 212 impacted employees 72% are over 40 and 6% have a disability. These impacted employees' concerns will be met and maintained as they were in Washington, DC, through the open communication and transparency utilized thus far.

We have consistently communicated to employees through monthly all-hands meetings and email communications from OSEC, REE, and the agency heads. All Hands meetings have been held approximately monthly starting on August 18, 2018, at ERS headquarters in Washington, DC. Agency leadership also provides regular communication formally and informally with employees. A representative from OSEC/REE regularly meets with the employee focus groups to discuss issues and concerns. All hands meetings are held monthly, sometimes more frequently to ensure open and transparent communication with the workforce.

Mitigation Measures for Customer Base:

The ERS relocation will be transparent to stakeholders who utilize ERS services. Notifications were made to the public on: August 9, 2018, September 7, 2018, October 22, 2018, December 21, 2018, and March 12, 2019. All press releases can be found on the USDA press page: <https://www.usda.gov/media/press-releases>. In addition, leadership has met with stakeholder groups often, as requested.

CONCLUSION

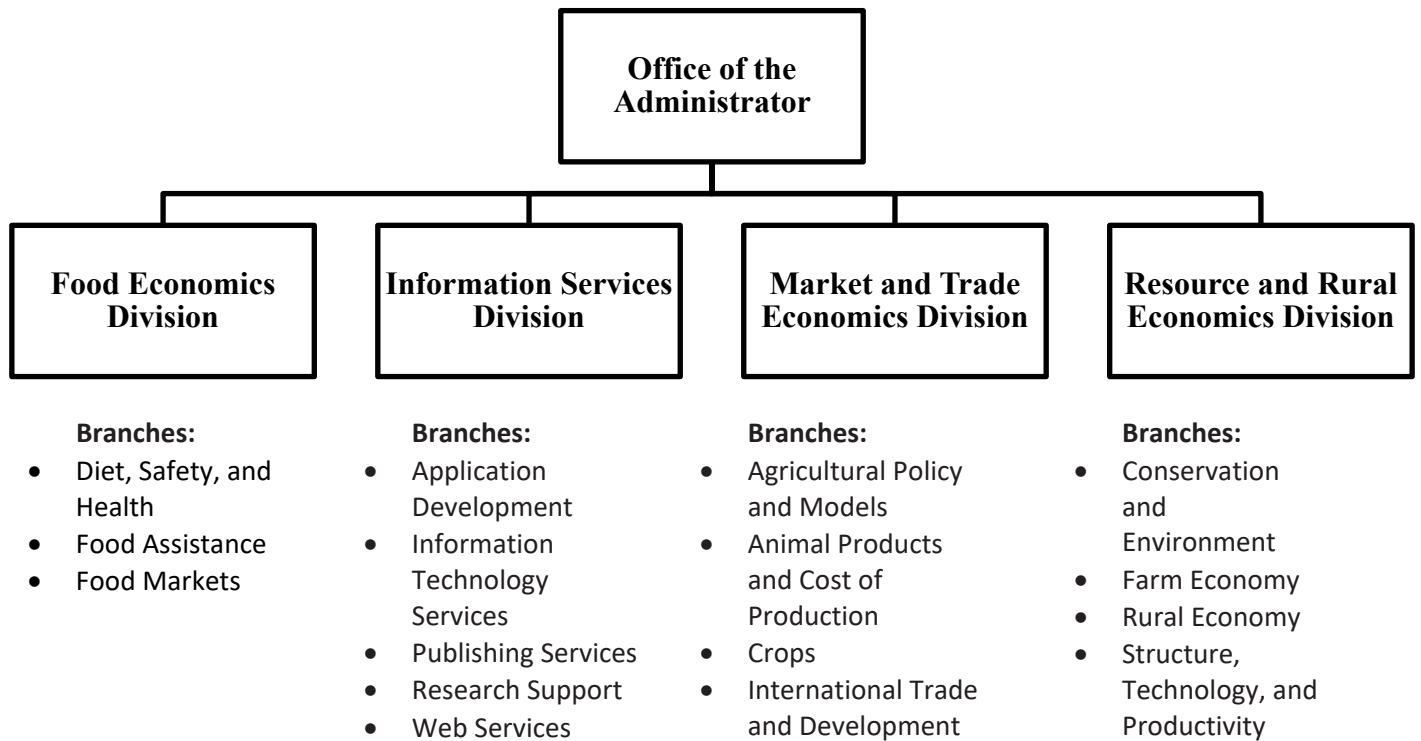

The proposed ERS Staff relocation will commence once the location has been selected by the Secretary of Agriculture. The relocation ultimately will improve efficiency and effectiveness to be the best, customer-focused Department. The relocation will address current operations while offering flexibility to our current and future workforce. Also, the relocation will deliver maximum value to our stakeholders and more broadly to U.S. taxpayers. The primary benefit of the relocation will be to the employees of ERS and stakeholders. The relocation provides three primary objectives: One, place these important USDA resources closer to stakeholders who live and work outside the D.C. area. Second, benefit the American taxpayers through savings on employment and facility costs in the face of tightening budgets. Third, improve our ability to attract and retain highly qualified staff with training and interests in agriculture, many of whom come from our land-grant universities.

The ERS Staff relocation will impact 212 current employees. Specifically, of the 212, 72% are over the age of 40; 6% have disabilities. However, we are implementing mitigation referenced above to address the impact with each employee and direct stakeholders. All questions and concerns regarding the proposed Staff relocation have been and will continue to be responsive.

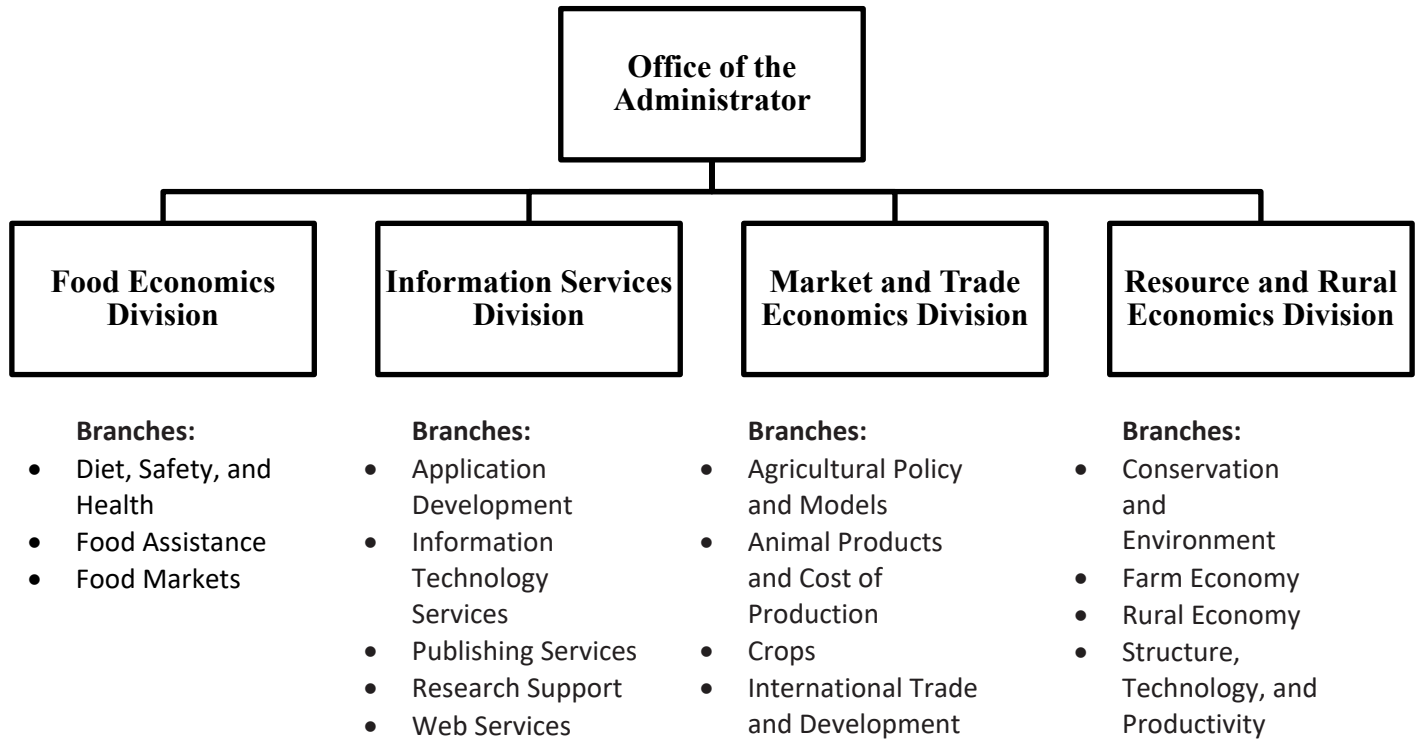

The proposed staff relocation will result in a move beyond 50 miles of the current ERS employee's duty station resulting in a change to locality pay. Of the 212 impacted employees, 72% are over 40 or older and 6% have a disability. Efforts are being made to address and lessen impacts to the employees through smaller discussions by representatives from OSEC/REE; monthly meetings; and FAQs, etc.

ERS Management has determined that the impacts to protected groups is proportionate to the representation of those groups in the ERS workforce. Therefore, we see no evidence of disparate treatment or adverse impact. However, mitigation steps taken by management have been effective and presumably will be responsive to the needs of each employee and direct stakeholder. The impact is acknowledged, the objective is to lessen or eliminate the impact(s). ERS management is confident that the mitigation steps taken have been responsive to the needs of each impacted employee or direct stakeholders.

FROM: Naomi C. Earp, Esq. *Naomi C. Earp*
Deputy Assistant Secretary for Civil Rights

JUN 12 2019

SUBJECT: Proposed Selection of NIFA Positions for Relocation

In accordance with Departmental Regulation (DR) 4300-4, Civil Rights Impact Analysis, the Research, Education and Economics (REE) Mission Area has analyzed whether the relocation of certain positions resulting from a lease expiration will have a disproportionate or adverse impact on affected National Institute of Food and Agriculture (NIFA) employees who are members of a protected class.

Background

The NIFA is initiating the procurement process to secure a new lease, as its current lease in Washington, D.C. is expiring. The USDA is proposing a broad geographic area of consideration, resulting in the likely relocation of most of the agency's operations outside of the National Capital Region to help gain efficiencies and increase customer and stakeholder partnerships. This will help ensure USDA is the most efficient, most effective, most customer-focused Department in the Federal government.

Summary of Changes

USDA believes the decision to compete the lease in a broad geographic area will serve three primary objectives: One, place these important USDA resources closer to stakeholders who live and work outside the D.C. area. Second, benefit the American taxpayers through savings on employment and facility costs in the face of tightening budgets. Third, improve USDA's ability to attract and retain highly qualified staff with training and interests in agriculture, many of whom come from land-grant universities.

The proposed NIFA relocation is targeted to commence after the selection of the final location and announcement by the Secretary in late Summer or Early Fall of Fiscal Year (FY) 2019. Other than a change in duty station, there is no change in the organizational structure associated with this likely relocation.

Civil Rights Impact Analysis for Proposed Realignment

As the NIFA CRIA shows, the demographic characteristics of the incumbents in the positions selected for moving out of the national capital region is consistent with the

demographic characteristics of the NIFA workforce. For example, persons 40 years or older represent 73% of NIFA's workforce and 74% of positions selected for relocation; women represent 63% of NIFA's workforce and 63% of positions selected for relocation. As REE noted, the proportion of persons with disabilities impacted by this move (12%) is comparable to the representation of persons with disabilities in the NIFA workforce (11%). From a quantitative perspective, I consider the proportion of impacted positions to be consistent with the representation of protected groups in NIFA's workforce. I agree with REE's assessment that these trends suggest the absence of disparate treatment based on a protected class. Consequently, these findings do not suggest the need for further quantitative analyses.

Conclusion

I agree with REE Management's determination that the potential impact to protected groups is proportionate to the representation of those groups in the NIFA workforce. That is, the data suggest NIFA has not intentionally targeted specific protected groups for relocation. Therefore, I see no quantitative evidence of disparate treatment or adverse impact. In light of the potential impacts associated with relocating employees, I agree the proactive measures proposed by management are appropriate and responsive mitigation strategies. I encourage the NIFA Civil Rights Director to monitor any trend changes reflected in complaint or compliance review data to determine whether any unforeseen impacts exist, and to work with management to proactively mitigate those impacts should any arise.

NIFA RELOCATION**

Stephen Censky
Deputy Secretary, USDA*

6-12-2019
Date

* In accordance with Departmental Regulation 4300-004, Civil Impact Analysis (CIA), Section 13b, the certification must be signed by the Agency's current Civil Rights Director. However, this CIA would directly impact all NIFA employees, inclusive of the Civil Rights Director. Accordingly, this CIA will be signed by USDA Deputy Secretary Stephen Censky.

**NIFA Civil Rights Program
Civil Rights Impact Analysis:
NIFA AGENCY RELOCATION**

Certification Sheet

Proposed Action: USDA is proposing to relocate most National Institute of Food and Agriculture (NIFA) agency operations outside of the National Capital Region (NCR) to help gain efficiencies and increase customer and stakeholder partnerships. This will help ensure USDA is the most efficient, most effective, most customer-focused Department in the Federal government. Secretary Perdue has evaluated current operations across the Department and believes we can offer more flexibility to our current and future workforce, while also delivering maximum value to our direct stakeholders and more broadly to U.S. taxpayers, in identifying a new location outside of the NCR. We believe we can improve our ability to attract key talent to certain agricultural and economic research positions in NIFA by decreasing the cost of living and commute lengths, which are exceptionally high in the National Capital Region. Additionally, NIFA has a higher historical attrition rate than USDA department wide. Specifically, we believe that this decision will serve three primary objectives: One, place these important USDA resources closer to stakeholders who live and work outside the D.C. area. Second, benefit the American taxpayers through savings on employment and facility costs in the face of tightening budgets. Third, improve our ability to attract and retain highly qualified staff with training and interests in agriculture, many of whom come from our land-grant universities.

I certify I have received and analyzed the appropriate documentation and determined that:

- ☒ **No major civil rights impact is likely to result** if the proposed action is implemented. The action will not adversely affect any minorities, women, individuals over the age of 40, or persons with disabilities. See the attached supporting CRIA documentation.
- ☐ **Major civil rights impact, as described below**, is likely to result if the proposed action is implemented. See the attached CRIA documentation.

Stephen Censky
Deputy Secretary, USDA

AGENCY RELOCATION**

Civil Rights Impact Analysis

BACKGROUND

USDA is proposing to relocate most National Institute of Food and Agriculture (NIFA) agency operations outside of the National Capital Region to help gain efficiencies and increase customer and stakeholder partnerships. This will help ensure USDA is the most efficient, most effective, most customer-focused Department in the Federal government. Secretary Perdue has evaluated current operations across the Department and believes we can offer more flexibility to our current and future workforce, while also delivering maximum value to our direct stakeholders and more broadly to U.S. taxpayers, in identifying a new location outside of the National Capital Region (NCR). We believe we can improve our ability to attract key talent to certain agricultural and economic research positions in NIFA by decreasing the cost of living and commute lengths, which are exceptionally high in the NCR. Additionally, NIFA has a higher historical attrition rate than USDA department wide. Specifically, we believe that this decision will serve three primary objectives: One, place these important USDA resources closer to stakeholders who live and work outside the D.C. area. Second, benefit the American taxpayers through savings on employment and facility costs in the face of tightening budgets. Third, improve our ability to attract and retain highly qualified staff with training and interests in agriculture, many of whom come from our land-grant universities.

Program Activity:

On August 9, 2018, the Secretary approved a relocation of NIFA. A Federal Register announcement to initiate the process of identifying a new location for NIFA was posted on August 14, 2018, and further extended through October 15, 2018. In our efforts to ensure USDA is the most efficient, most effective, and most customer-focused Department in the Federal government, the Secretary evaluated current operations across the Department and determined that efficiencies could be found outside of the NCR. Concurrently, it was identified that NIFA must relocate, as its current lease is expiring.

By exploring options for locating most of NIFA outside of the NCR, we believe we can offer more flexibility to our current and future workforce, while also delivering maximum value to our direct stakeholders and more broadly to U.S. taxpayers. We believe we may not be attracting key talent to certain agricultural research positions in NIFA because of the high cost of living and

long commute lengths in the NCR. Additionally, both agencies have a higher historical attrition rate than USDA department wide. Specifically, we believe that this decision will:

- Place these important USDA resources closer to stakeholders who live and work outside the D.C. area;
- Benefit the American taxpayers by identifying savings on employment and facility costs, especially in the face of tightening budgets; and
- Improve our ability to attract and retain highly qualified staff with training and interests in economics and agriculture, mainly of whom come from our land-grant universities.

Reason for Proposed Activity:

By exploring options for locating most of NIFA outside of Washington, DC, we believe we can offer more flexibility to our current and future workforce, while also delivering maximum value to our direct stakeholders and more broadly to U.S. taxpayers. We believe we can improve our ability to attract key talent to certain agricultural and economic research positions in NIFA by decreasing the cost of living and commute lengths, which are exceptionally high in the NCR. Additionally, NIFA has a higher historical attrition rate than USDA department wide.

Specifically, we believe that this decision will serve three primary objectives: One, place these important USDA resources closer to stakeholders who live and work outside the D.C. area.

Second, benefit the American taxpayers through savings on employment and facility costs in the face of tightening budgets. Third, improve our ability to attract and retain highly qualified staff with training and interests in agriculture, many of whom come from our land-grant universities.

Effective Date:

The proposed NIFA Staff Relocation is targeted to commence after the selection of the final location and announcement by the Secretary in late Summer or Early Fall of Fiscal Year (FY) 2019.

Current and Proposed Organizational Structure:

The current organizational structure is attached as Attachment A. There is no change in the organizational structure because of the relocation.

The proposed organizational structure is attached as Attachment B. There is no change in the organizational structure; only a new physical location.

DATA and ANALYSIS

Current and Proposed Data Chart:

The Current and Proposed Data Chart is provided below, and in Attachment C. Note, the relocation does not propose a reduction in grade(s) for any individual(s) or position(s). Rather, the only change is in the duty station.

As of the date of this Civil Rights Impact Analysis (CRIA), NIFA had a total workforce of 353. Of these, 75 are intermittent employees. These positions were not included in this analysis, which is consistent with NIFA workforce demographic profile practices. This proposed relocation will result in 266 (96%) of 278 NIFA employees moving from the NCR to a location determined through the competitive procurement process. The CRIA presented herein evaluates potential impacts resulting from the geographic location of these positions. Position titles, series, grade levels, and reporting structures will not change with this relocation.

NIFA demographic workforce data (excluding the 75 intermittent employees) as of 03/30/2019 were included in this analysis. The duty stations of these employees are their homes and they will not be impacted by the relocation.

As Figure 1 shows, the proportion of Women in the NIFA workforce (63%) exceeded the Civilian Labor Force or CLF (48%). In addition, the overall proportion of minorities (61%) exceeded the CLF (28%). The representation of Black Men (12%) exceeded the CLF (5%), and the representation of Black Women (35%) exceeded the CLF (7%). The representation of Asian American Men (5%) exceeded the CLF (2%), and the representation of Asian American Women (3%) also exceeded the CLF (2%). The representation of American Indian Men (1%) exceeded the CLF (0.6%). The representation of Women with 2 or more races (1%) exceeded the CLF (0.3%).

The representation of Men in the NIFA workforce (37%) was lower than the CLF (52%). The representation of Hispanic Men (3%) was lower than the CLF (5%); and the representation of Hispanic Women (3%) was also lower than the CLF (5%). The representation of White Men (18%) was lower than the CLF (38%), and the representation of White Women (21%) was also lower than the CLF (34%). The representation of American Indian Women (0.4%) was slightly below the CLF (0.3%).

Figure 1: Demographic Characteristics of the NIFA Workforce as of 03/30/2019

	NIFA Workforce	Positions Moving Out of Washington, D.C.	Civilian Labor Force (CLF)
TOTAL	278	266	
Men	37%	37%	52%
Women	63%	63%	48%
Hispanic Men	3%	3%	5%
Hispanic Women	3%	3%	5%
White Men	18%	16%	38%
White Women	21%	20%	34%
Black Men	12%	12%	5%

Black Women	35%	36%	7%
Asian American/PI Men	5%	5%	2%
Asian American/PI Women	3%	3%	2%
American Indian Men	1%	1%	0.6%
American Indian Women	0.4%	0.4%	0.5%
2+ Races Men	0%	0%	0.3%
2+ Races Women	1%	1%	0.3%
Disabled	11%	12%	
Age 40 and Over	73%	74%	

Data Source: NFC download on 04/12/2019

The demographic characteristics of the incumbents in the positions selected for moving out of the NCR is consistent with the demographic characteristics of the NIFA workforce. From a quantitative perspective, we consider these trends to suggest the absence of *disparate treatment* based on a protected class. Consequently, these findings do not suggest the need for further quantitative analyses.

We should note the proportion of persons with disabilities impacted by this move (12%) is comparable to the representation of persons with disabilities in the NIFA workforce (11%). While we see no evidence of disparate treatment, it is prudent to consider mitigating strategies to ensure any *reasonable accommodations*, both formal and informal, in effect at the time of the move continue in the new location.

NIFA proposes the following change to its organizational structure:

1. Move the Washington, DC National Office to outside the NCR;
2. Place these important USDA resources closer to stakeholders who live and work outside the D.C. area;
3. Benefit the American taxpayers by identifying savings on employment and facility costs, especially in the face of tightening budgets; and
4. Improve our ability to attract and retain highly qualified staff with training and interests in economics and agriculture, mainly of whom come from our land-grant universities.

Impacted Employee Data:

As highlighted above, the purpose of the relocation is to: one, place these important USDA resources closer to stakeholders who live and work outside the D.C. area. Second, benefit the American taxpayers through savings on employment and facility costs in the face of tightening budgets. Third, improve our ability to attract and retain highly qualified staff with training and interests in agriculture, many of whom come from our land-grant universities.

NIFA has made every effort to reduce and lessen any impact to employees.

The 266 employees will retain their position titles, series, grade levels, and reporting structures with this relocation. The relocation will only impact the current City/State, office, and work station. However, there will be a potential impact to locality pay because the relocation will be beyond 50 miles. All the same services currently provided to employees will be available in the new location.

We have consistently communicated to employees through monthly all-hands meetings, email communications from OSEC, REE, and the agency heads. Agency leadership also provides regular communication. A representative from OSEC/REE regularly meets with the employee focus groups to discuss issues and concerns.

Data Analysis Narrative:

Impacted: Provided below is the data analysis narrative for the proposed relocation, and the impacts to employees and vacancies.

CHART 1 (Attachment C): *NIFA CRIA Current Status All Employees WASHINGTON, DC:*

This chart contains information on the race, sex, national origin, age and disability of all NIFA employees (as of 3/30/2019). The total workforce of NIFA is 353. Of the 353, 266 will be impacted, 75 are intermittent employees (which are excluded), and 12 employees will remain in the NCR. Leadership determined that a cadre of support staff and senior scientists (total of 12 employees) would remain in the NCR to maintain mission critical functions of NIFA.

CHART 2 (Attachment D): *NIFA CRIA To Be Status OUTSIDE WASHINGTON,*

DC/Impacted Employees: This chart contains information on the race, sex, national origin, age and disability of the 266 NIFA employees being relocated outside of the National Capital Region/Washington, DC. The total workforce of NIFA is 353 but only 266 NIFA employees will be impacted by the relocation.

Decisions Resulting in Impact(s):

The proposed NIFA relocation will do the following: One, place these important USDA resources closer to stakeholders who live and work outside the D.C. area. Second, benefit the American taxpayers through savings on employment and facility costs in the face of tightening budgets. Third, improve our ability to attract and retain highly qualified staff with training and interests in agriculture, many of whom come from our land-grant universities.

NIFA made every effort to reduce or lessen impacts to current NIFA employees. Because of these efforts, there were impacts to 266 of 353 FTEs, all of which have been adequately mitigated.

Impact to Customer's Access to Services:

The changes to the NIFA structure are internal and have no bearing on how we communicate with our customer base. Notifications were made to the public on: August 9, 2018, September 7, 2018, October 22, 2018, December 21, 2018, and March 12, 2019. All press releases can be found on the USDA press page: <https://www.usda.gov/media/press-releases>.

Congressional notification is required since there will be changes in numbers of FTEs in Washington, DC. There will be a change in location for 266 current employees. Congressional notification is ongoing but was initially completed on August 7, 2018. As of May 1, 2019, NIFA does not have a union.

Double or Multiple Impacts

No double or multiple impacts have been identified. As stated above, the NIFA Washington, D.C. office is being moved outside of the NCR; however, the 266 employees will retain their position titles, series, grade levels, and reporting structures. Due to the relocation the only change that these employees will experience is to their current City/State, office, and work station in late Summer or Early Fall of FY 2019.

MITIGATION

We are prioritizing new hires to build in redundancy to ensure that critical programs and products continue to be administered without interruption. New employees will be hired into the new location, unless otherwise indicated. We plan for a voluntary rolling transition of staff to the new location along with focused hiring at the new location to fill any vacated essential positions to ensure as little disruption as possible. Currently, agencies are filling some positions based on their strategic hiring plans. Until we know our current employee decisions and the new location(s), some decisions are pending. We are consistently evaluating hiring practices to provide the best customer service to our stakeholders.

Relocation expenses will be provided to employees. This has been communicated through FAQs, all hands meetings, and smaller discussions with employees (i.e., brown bag lunch sessions).

NIFA will consider reviewing its reasonable accommodation agreements to ensure a seamless transition to the new work location. There is a commitment by NIFA to ensure that all current

reasonable accommodation agreements will be maintained as they were in Washington, D.C. If necessary, will provide supplemental needs to the impacted employees.

It is good practice to periodically remind supervisors that employees are entitled to engage in protected activity, such as filing a complaint or requesting accommodation, without fear of *reprisal*. Providing EEO training and unconscious bias training may also help reduce incidents of alleged retaliation.

USDA leadership will continue to implement the telework policy, which allows for additional flexibility in certain scenarios.

USDA will offer relocation expenses in accordance with regulations established by the Office of Personnel Management. It has been determined that a house hunting trip will be permitted.

The current data shows of the 266 impacted employees, 74% are 40 or older and 12% have a disability. These impacted employees' concerns will be met and maintained as they were in Washington, D.C., through the open communication and transparency utilized thus far.

We have consistently communicated to employees through monthly all-hands meetings and email communications from OSEC, REE, and the agency heads. All Hands meetings have been held approximately monthly starting on August 18, 2018, at NIFA headquarters in Washington, DC. Agency leadership also provides regular communication formally and informally with employees. A representative from OSEC/REE regularly meets with the employee focus groups to discuss issues and concerns. All hands meetings are held monthly, sometimes more frequently to ensure open and transparent communication with the workforce.

Mitigation Measures for Customer Base:

The NIFA Relocation will be transparent to stakeholders who utilize NIFA services. Notifications were made to the public on: August 9, 2018, September 7, 2018, October 22, 2018, December 21, 2018, and March 12, 2019. All press releases can be found on the USDA press page: <https://www.usda.gov/media/press-releases>. In addition, leadership has met with stakeholder groups often, as requested.

CONCLUSION

The proposed NIFA Staff relocation will commence once the location has been selected by the Secretary of Agriculture. The relocation ultimately will improve efficiency and effectiveness to be the best, customer-focused Department. The relocation will address current operations while offering flexibility to our current and future workforce. Also, the relocation will deliver maximum value to our stakeholders and more broadly to U.S. taxpayers. The primary benefit of the relocation will be to the employees of NIFA and stakeholders. The relocation provides three

primary objectives: One, place these important USDA resources closer to stakeholders who live and work outside the D.C. area. Second, benefit the American taxpayers through savings on employment and facility costs in the face of tightening budgets. Third, improve our ability to attract and retain highly qualified staff with training and interests in agriculture, many of whom come from our land-grant universities.

The NIFA Staff relocation will impact 266 current employees. Specifically, of the 266, 77 % are over the age of 40; and 12% have disabilities. However, we are implementing the mitigation strategies referenced above to address the impact with each employee and direct stakeholders. All questions and concerns regarding the proposed staff relocation have been, and will continue to be, responsive.

The proposed staff relocation will result in a move beyond 50 miles of the current NIFA employee's duty station resulting in a change to locality pay. Efforts are being made to address and lessen impacts to the employees through smaller discussions by representatives from OSEC/REE; monthly meetings; and FAQs, etc.

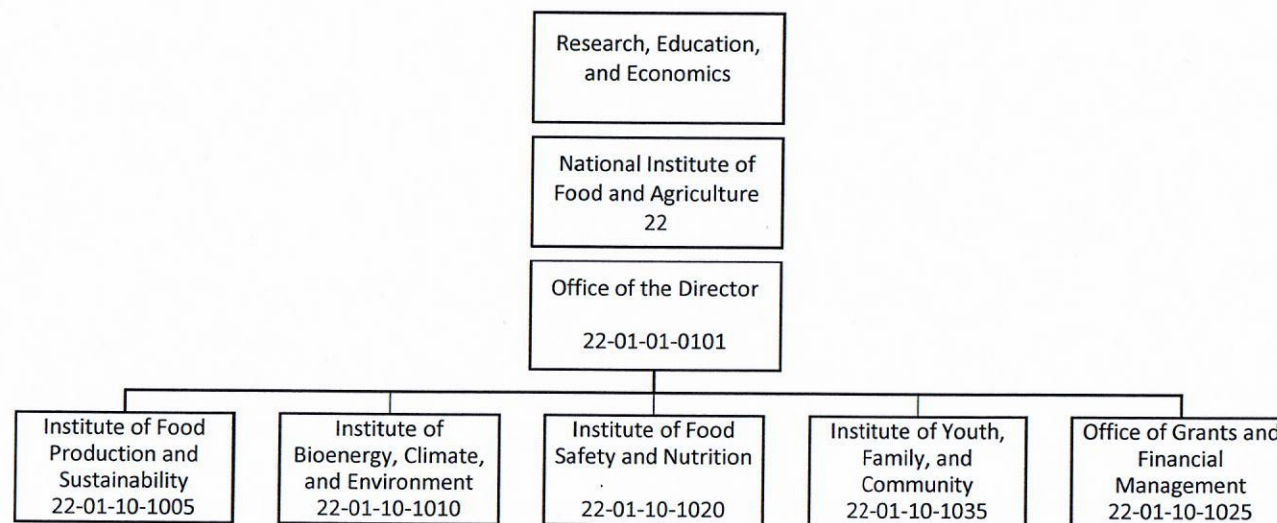

NIFA Management has determined that the impacts to protected groups is proportionate to the representation of those groups in the NIFA workforce. Therefore, we see no evidence of disparate treatment or adverse impact. However, mitigation steps taken by management have been effective and presumably will be responsive to the needs of each employee and direct stakeholders. The impact is acknowledged, and the objective is to lessen or eliminate the impact(s). NIFA management is confident that the mitigation steps taken have been responsive to the needs of each impacted employee or direct stakeholders.
