Re: NIH FOIA Case No.: 53694,54171 & 54245; American Oversight v. NIH, 20-cv-01063

Dear Mr. Evers:

This is an amended response to several Freedom of Information Act (FOIA) requests that are the subject of the Complaint filed in American Oversight v. NIH, 20-cv-01063, now pending in the U.S. District Court for the District of Columbia. Your FOIA request 53694, dated March 5, 2020, was received by the National Institutes of Health (NIH) on the same day. Your FOIA request 54245, dated March 2, 2020, was received by the National Institutes of Health (NIH) on the same day. Your FOIA request 54171, dated March 3, 2020, was received by NIH on the same day.

In case 53694, you requested all email communications between Dr. Fauci or anyone serving as White House Liaison or agency point of contact for the coronavirus task force, and the following Executive Office of the President officials: Mike Pence, Robert O'Brien, Matthew Pottinger, Robert Blair, Joseph Grogan, Christopher Liddell, Larry Kudlow, Deborah Birx, Katie Miller and Kelvin Droegmeier. Upon further review, I have determined to release additional portions of the enclosed pages. I have determined to withhold portions of the enclosed pages under FOIA exemptions (b)(4), (b)(5) and (b)(6). The information being withheld is protected from release pursuant to Exemptions 4, 5 and 6 of the FOIA, 5 U.S.C. § 552 (b)(4), (b)(5) and (b)(6); and sections 5.31(d), (e) and (f) of the HHS FOIA Regulations, 45 CFR Part 5. Exemption 4 protects from disclosure trade secrets and commercial or financial information that is privileged and confidential. Exemption 5 permits the withholding of internal government records which are pre-decisional and contain staff advice, opinion, and recommendations, as well as documents solicited and received by the President or his immediate White House advisers who have broad and significant responsibility for investigating and formulating the advice to be given to the President. Exemption 6 permits the withholding of privacy information, the release of which would constitute a clearly unwarranted invasion of personal privacy.

In case 54171, you requested all final directives, orders, decision memoranda, or guidance provided by HHS leadership – both by the Office of the Secretary and the head offices of HHS components, including the Centers for Disease Control and Prevention (CDC), the National

Institute of Health (NIH), the National Institute of Allergy and Infectious Diseases (NIAID), or the Food and Drug Administration (FDA) – regarding public statements, public appearances, website changes or updates, or communications or press strategy on the coronavirus, COVID-19. This request includes but is not limited to any final directives, orders, decision memoranda, or guidance originating within HHS or components that were sent to other agencies on this topic. Upon further review, I have determined to release additional portions of the enclosed pages. I have determined to withhold portions of the enclosed pages under FOIA exemptions (b)(5) and (b)(6). The information being withheld is protected from release pursuant to Exemptions 5 and 6 of the FOIA, 5 U.S.C. § 552 (b)(5) and (b)(6); and sections 5.31(e) and (f) of the HHS FOIA Regulations, 45 CFR Part 5. Exemption 5 permits the withholding of internal government records which are pre-decisional and contain staff advice, opinion, and recommendations, as well as documents solicited and received by the President or his immediate White House advisers who have broad and significant responsibility for investigating and formulating the advice to be given to the President. Exemption 6 permits the withholding of privacy information, the release of which would constitute a clearly unwarranted invasion of personal privacy.

In case 54245 you requested all final directives, orders, decision memoranda, or guidance from President Trump, Vice President Pence, or any staff of the Executive Office of the President (including anyone on White House Staff, in the Office of the Vice President, or on the staff of the National Security Council) regarding public statements, public appearances, website updates or changes, or communications or press strategy on the coronavirus, COVID-19. Upon further review, I have determined to release additional portions of the enclosed pages. I have determined to withhold portions of the enclosed pages under FOIA exemptions (b)(5) and (b)(6). The information being withheld is protected from release pursuant to Exemptions 5 and 6 of the FOIA, 5 U.S.C. § 552 (b)(5) and (b)(6); and sections 5.31(e) and (f) of the HHS FOIA Regulations, 45 CFR Part 5. Exemption 5 permits the withholding of internal government records which are pre-decisional and contain staff advice, opinion, and recommendations, as well as documents solicited and received by the President or his immediate White House advisers who have broad and significant responsibility for investigating and formulating the advice to be given to the President. Exemption 6 permits the withholding of privacy information, the release of which would constitute a clearly unwarranted invasion of personal privacy.

Please direct any questions regarding this response to Amy Powell of the Department of Justice, at Amy.Powell@usdoj.gov.

Sincerely,

for
Gorka Garcia-Malene
Freedom of Information Officer, NIH

There are two additional sources of information we wanted to share to complement what you reviewed from the 24 country assessment early in epidemic of clean exposures vs. symptom onset (the Lauer paper of 181 case-contact pairs). They are:

1. Diamond princess cabin mates (n=27) – while not absolutely certain that a cabin mate's exposure was their cabin mate, we attach a figure that shows a spread of secondary cases up to 14 days. (see attachment)
2. Health care workers from two different long term care facilities in Seattle-King County – again it is not certain that those who had a single day of working in one of these affected facilities acquired their infection from patient/facility personnel contact (since there likely was some unrecognized transmission in the community during this time). At one facility, six patients developed symptoms between 2 and 4 days after working at the facility. At the second facility, where 11 patients had a likely first exposure, symptoms developed between 3 and 10 days after working at the affected facility.

Happy to discuss if you need more details.

Sent from my iPhone

On May 6, 2020, at 7:02 PM, O'Malley, Devin M. EOP/OVP (b) (6)

Hi all-

Marc Short has asked that I handle the remdesivir rollout once we get a distribution plan set. Can you please include me on any call/meeting invites to discuss the distribution plan on the remaining doses?

Dr. Kadlec- Can you please connect me with someone who can walk me through what has been done already?

Thanks!

Devin
