

Case No. 2020-00717-FOIA-OS
American Oversight v. HHS, Civil No. 20-1169

December 7, 2023

Austin Evers
Executive Director
American Oversight
Sent via email: foia@americanoversight.org

Dear Mr. Evers:

This letter is the thirty first interim response to your March 18, 2020, Freedom of Information Act (FOIA) request.

American Oversight requests that HHS produce the following records as soon as practicable, and at least within twenty business days:

All email communications (including email messages, complete email chains, email attachments, calendar invitations) sent by the government officials specified below containing any of the following key terms:

1. Coronavirus
2. Corona
3. Virus
4. Disease
5. Pandemic
6. Epidemic
7. Outbreak
8. containment
9. "public health emergency"
10. "COVID-19"
11. "COVID 19"
12. COVID19
13. SARS
14. "2019-nCoV"
15. POTUS
16. Test
17. Tests
18. Testing
19. EUA
20. Emergency
21. Wuhan
22. Hoax
23. Hubei
24. Princess
25. Cruise
26. Kirkland
27. Seattle
28. "New Rochelle"
29. "BioGen Conference"
30. CPAC
31. AIPAC
32. RNA

33. "Extraction kits"
34. Roche
35. Vaccine
36. Antiviral
37. Antiretroviral
38. Quarantine
39. Distancing
40. Isolation
41. N95
42. Mask
43. Respirator

Government Officials

1. Alex Azar, Secretary
2. Brian Harrison, Chief of Staff
3. Eric Hargan, Deputy Secretary
4. Jerome Adams, Surgeon General
5. Robert Kadlec, Assistant Secretary for Preparedness and Response
6. John Brooks, Senior Advisor to the Secretary for Drug Pricing Reform

On February 10, 2021, you narrowed your request per the following:

Eliminate attachments, documents regarding "Red Dawn" and obvious marketing and news bulletins

- a. Limit the date range of the following key terms as stand-alone search terms from January 15, 2020 through February 29, 2020. ~~[[Limit responsive records to those that also include: (Test OR Tests OR Vaccine OR EUA OR "Emergency Use" OR Shortage OR Shortages OR Supplies OR "the WHO" OR States OR Governor OR Governors OR PPE OR Ventilators OR Respirators OR Swabs OR DPA OR "Defense Production Act" OR Trump OR Pence OR Jared OR Kushner OR "White House" OR "the WH")]]~~

- i. Coronavirus
- ii. Corona
- iii. "COVID-19"
- iv. "COVID 19"
- v. COVID19
- vi. "2019-nCoV"

~~vii. SARS~~

~~viii. Epidemic~~

~~ix. Pandemic~~

~~x. Outbreak~~

~~xi. "Public Health Emergency"~~

-

- b. After March 1, 2020, for the key terms listed in Column A below (the same search terms as identified above), limit responsive records to those that also include one or more of the terms from Column B:

Column A	Column B
• Coronavirus • Corona • “COVID-19” • “COVID 19” • COVID19 • “2019-nCOV” • SARS • Epidemic • Pandemic • Outbreak • “Public Health Emergency”	• Test • Tests • Vaccine • Antiviral • Antiretroviral • EUA • “Emergency Use” • Shortage • Shortages • Supplies • “Emergency Use” • EUA • “the WHO” • “W.H.O.” • “World Health Organization” • States • Governor • Governors • PPE • Ventilators • Respirators • Swabs • DPA • “Defense Production Act”

- c. For the key terms that are in Column A below, limit responsive records to those that also include one or more of the terms from Column B, for the full time period of the search.

Column A	Column B
• Test • Tests • “Extraction Kits”	• CV19 • “CV-19” • C19 • “C-19” • Roche • RNA • Shortage • Shortages • Supplies • “Emergency Use” • “EUA” • “the WHO” • “W.H.O.” • “World Health Organization” • States • Governor • Governors • Kit • Kits • DPA • “Defense Production Act”

- d. ~~[~500 records] For the key terms that are in Column A below, limit responsive records to those that also include one or more of the terms from Column B, for the full time period of the search.~~

Column A	Column B
---------------------	---------------------

• Vaccine • Antiviral • Antiretroviral	• CV19 • “CV-19” • C19 • “C-19” • “EUA” • “Emergency Use” • “DPA” • “Defense Production Act” • “the WHO” • “W.H.O.” • “World Health Organization”
--	---

e. ~~[<50 records] For the key term “Emergency” limit responsive records to those that also include “DPA” or “Defense Production Act,” for the full time period of the search.~~

f. For the following key terms, please limit the time period as indicated:

i. Princess - February 1, 2020, through March 1, 2020 ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

~~ii. [~~150 records~~] Kirkland February 24, 2020, through March 24, 2020~~

~~iii. [~~750 records~~] Seattle February 24, 2020, through March 24, 2020~~

~~iv. [~~200 records~~] “New Rochelle” March 1, 2020, through March 31, 2020~~

~~v. [~~<50 records~~] “BioGen Conference” March 1, 2020, through March 31, 2020~~

~~vi. [~~50 records~~] CPAC February 21, 2020, through March 21, 2020~~

~~vii. [~~<50 records~~] AIPAC February 21, 2020, through March 21, 2020~~

g. For the following key terms, please run the search without any modifiers and using the full date range (i.e., no changes from original search)

i. Wuhan ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

ii. Hoax ~~[[no changes]]~~

iii. Hubei ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

iv. POTUS ~~[[no changes]]~~

v. Cruise ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

vi. Quarantine ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

vii. Distancing ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

~~viii. Isolation~~

ix. N95 ~~[[Limit responsive records to those that also include: (CV19 OR “CV-19” OR C19 OR “C-19” OR Shortage OR Shortages OR Supplies OR “Emergency Use” OR “EUA” OR “the WHO” OR States OR Governor OR Governors OR DPA OR “Defense Production Act” OR Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

x. Mask ~~[[Limit responsive records to those that also include: (CV19 OR “CV-19” OR C19 OR “C-19” OR Shortage OR Shortages OR Supplies OR “Emergency Use” OR “EUA” OR “the WHO” OR States OR Governor OR Governors OR DPA OR “Defense Production Act” OR Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

xi. Respirator ~~[[Limit responsive records to those that also include: (CV19 OR “CV-19” OR C19 OR “C-19” OR Shortage OR Shortages OR Supplies OR “Emergency Use” OR “EUA” OR “the WHO” OR States OR Governor OR Governors OR DPA OR “Defense Production Act” OR Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

xii. Testing ~~[[Limit responsive records to those that also include: (CV19 OR “CV-19” OR C19 OR “C-19” OR Shortage OR Shortages OR Supplies OR “Emergency Use” OR “EUA” OR “the WHO” OR States OR Governor OR Governors OR DPA OR “Defense Production Act” OR Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

~~xiii. Containment~~

h. Cut the following key terms completely: [[no changes]]

- i. Disease
- ii. Virus

The Department processed **401 pages** of potentially responsive records captured in the agency's search for FOIA request 2020-00717-FOIA-OS. After a careful review of these pages, I have determined to release **152 pages** to you in their entirety and I am further releasing in part **31 pages**, with portions redacted, pursuant to Exemptions (b)(5) and (b)(6) of the FOIA (5 U.S.C. §552 (b)(5) and (b)(6)). Furthermore, I have determined that **218 pages** should be sent for consultation to others and returned to this Department for final disposition.

FOIA exemption (b)(5) protects inter-agency or intra-agency memoranda or letters which would not be available by law to a party other than an agency in litigation with the agency. This exemption protects documents that would be covered by any privilege an agency could assert in a civil proceeding. These privileges include, among others, the deliberative process privilege, the attorney-client privilege, the attorney work-product privilege and the presidential communications privilege. I have considered the foreseeable harm standard when reviewing these records and applying the (b)(5) exemption.

FOIA exemption (b)(6) permits a federal agency to withhold information and records about individuals in "personnel and medical files and similar files, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." The definition of "similar files" has historically been broadly interpreted to include a wide variety of files, and the United States Supreme Court has held that Congress intended the term "similar files" to be interpreted broadly, rather than narrowly. I have analyzed these records and find they meet the threshold requirement of this exemption. Additionally, I have reviewed and weighed the public interest in disclosure of this information against the privacy interest in nondisclosure and found that the privacy interest outweighs the public's interest in disclosure.

I have found that it is reasonably foreseeable that disclosure would harm an interest protected by one or more of the exemptions to the FOIA's general rule of disclosure and/or that disclosure is prohibited by law.

We will continue to review the remaining records as efficiently and expeditiously as possible, consistent with our available resources. Should you have questions or concerns regarding the Department's response and/or the processing of your request, any such issues should be communicated to your legal counsel and Department of Justice Attorney representing the Department in this matter.

Sincerely yours,

Alesia Y.

UNCLASSIFIED // FOR OFFICIAL USE ONLY

Good afternoon Dr. Kadlec,

Open source media is reporting:

- CDC has confirmed a case of Novel Coronavirus in Maricopa county Arizona.
- The case is a traveler from Wuhan, China.
- CDC confirmed this case via CDC media advisory call that convened today at 1500ET.
- This is the fifth confirmed case within the United States (CA-2, WA, IL, AZ).

The SOC will continue to monitor this situation and provide updates as needed. This message was sent to the ASPR SLT, ASPR R9, SOC Leadership, and appropriate SMEs.

UNCLASSIFIED // FOR OFFICIAL USE ONLY

Very Respectfully,

Secretary's Operation Center

CDC: 5 cases of Wuhan virus confirmed in U.S., with more expected

By Sarah Oweremohle

01/26/2020 04:17 PM EST

Five people in the U.S. are infected with the Wuhan coronavirus, CDC said today.

Those include two newly confirmed cases in California and one in Arizona. CDC last week said a person in Illinois and a person in Washington state were infected. All five had recently traveled from Wuhan, China, the epicenter of the virus.

Another 100 people in the U.S. are being monitored for possible infection, though many will be ruled out, CDC's Nancy Messonnier, who leads the National Center for Immunization and Respiratory Diseases, said on a call with reporters.

Still, she warned that officials expect more U.S. cases, including person-to-person transmission.

Health officials are continuing to prepare for the Wuhan virus to be a pandemic but hope it is

not, she said.

Messonnier called the situation in China “alarming” but applauded officials there for working to contain the virus. At least 56 people have died and nearly 2,000 are infected. Chinese authorities early last week shut down travel in and out of Wuhan and neighboring cities; this weekend, they announced tour groups out of China would also be banned until the contagion was under control.

Messonnier said the CDC is working rapidly with the FDA to prepare a diagnostic test that can be distributed throughout the U.S., but it still could be a matter of weeks before it’s ready.

Priority:	Normal
Type:	Note

Sent to White House (Night Note):

INTERNAL, CONFIDENTIAL, MARKET SENSITIVE, NOT FOR PUBLIC DISTRIBUTION

- National Coverage Determination Next Generation Sequencing (NGS) for Germline Cancers**
 Tomorrow, CMS will announce the decision to cover FDA approved or cleared laboratory diagnostic tests using Next Generation Sequencing (NGS) for patients with germline (inherited) ovarian or breast cancer. This NCD determination does not negate coverage of somatic (acquired) testing using NGS for beneficiaries with recurrent, relapsed, refractory, metastatic, and/or advanced stage III or IV cancer.
- Outlier Prescriber Letters When Concurrently Prescribing Benzodiazepines and Opioid Medications**
 Tomorrow, CMS will send a letter to notify certain prescribers that they are in the highest 10th percentile of prescribers concurrently prescribing benzodiazepines and opioid medications, which causes patients to be at higher risk for adverse events and overdose. Sharing this data, along with current guidelines, will help prescribers provide the best possible care to prevent and relieve pain, maximize function for patients with pain and hopefully reduce opioid addiction.
- CDC to participate in a webinar with U.S. Chamber of Commerce Foundation on understanding the coronavirus**
 Monday, CDC is expected to participate in a [webinar](#) hosted by the U.S. Chamber of Commerce Foundation on understanding the coronavirus. CDC will present on the impact of this outbreak on the private sector and how companies should consider their response.

Other Newsworthy Items:

- Dr. Fauci will participate in an interview and give a tour of the NIH lab to CBS Evening News re: coronavirus therapeutic

Subject: Re: Next 72 hrs

Hi Joe

Checking IRT next 72h and some items

China Monday am update: to be released to SID Committee at 9am local. Ro calculations will be revised down to 1.4 from the higher estimates of ">4" suggested by Imperial

College (Furgueson et al). This is based on monitoring of 1107 confirmed-exposed Chinese patients who are being closely monitored by CDC. A MGH colleague, Dexing Lee is sharing this data. CFR will also continue to drop, and is on the way to .1 -and not 2-4% as briefed this week to Senate. All of this buys us breathing room for non-pharmacologic interventions.

Can you let me know if we will be speaking **tonight** so I can have someone cover the pager (for IDSA cross cover of coronavirus).

onward!

Joe

MITRE has me covered.

We wanted to get Bob's immediate priorities for the next 3 days. There are multiple work streams underway at WHO, and at State and Federal levels (Esp CDC ATL and BKK) that impact ASPR decisions so we need to run them by you.

We have identified priorities defined my DMCC mass Infection, and prior outbreaks, that fall under ASPR. We'd like to have Bob provide his own.

Do you have time for a 10 minute agenda supported call to address priorities over the next 3 days? People are off aircraft between 1600-1800 and after 2000h ET today.

There is some great progress on case definitions and the dropping CFR that have important implications to ASPR

Be well!

Hello Selected **US Senate** Staff Members and CDC and BARDA and AHRQ and NIH and VHA,

-

Sen. Schumer: CDC needs to access funding to fight coronavirus ... Jan., 26, 2020 at 1:40pm ET

<https://protect2.fireeye.com/url?k=c5ca65ee-999e7c92-c5ca54d1-0cc47adc5fa2-dae65b95712b7b05&u=https://www.silive.com/news/2020/01/schumer-cdc-needs-to-access-funding-to-fight-coronavirus.html>

-
STATEN ISLAND, N.Y. -- Senator Charles Schumer (D-New York) wants the Centers for Disease Control (CDC) to use funding he allocated to fight the spread of the deadly coronavirus, for which there are three confirmed cases in the United States.
-

Schumer recently negotiated a budget deal that put **\$85 million** in the CDC Infectious Disease Rapid Response Reserve Fund to ward off serious public health threats. He wants the CDC to be able to access these funds now. But for that to happen, a “public health emergency” must be declared by the U.S.

Department of Health and Human Services (HHS).

- Our Team of Experts will need **\$2 million** of this **\$85 million** - All of the vaccine-protection money will go directly to these Authors.
-

My name is Clark Tibbs in Ohio. I hope to hear from you and your Team with any questions and how you and/or any PhDs, MDs, DOs or MBBSs can participate in this **Vaccine Development and Clinical Trial**.

=====

Hello Whistleblower.Coordinator@oig.hhs.gov and ALL US Senators ... I think this is an Emergency.

..... please call these people and ask them **if and when** they plan to fund this **nVoC Vaccine Offer**?

-
Special Assistant to AFauci@NIAID.NIH.GOV ... Patty Conrad at **(301) 496-6416**
conradpa@niaid.nih.gov
-

I hope that NIH is funding several **nCoV vaccine candidates** that include a few vaccine candidates that use this T-4 Phage Head Vaccine Platform ... ??? Please see this Attachment.
-

Question: Can ... **BARDA** and/or **AHRQ** assist with some of the Emergency Funding?

This posting is communicated by Edward C. Holmes, University of Sydney on behalf of the consortium led by Professor Yong-Zhen Zhang, Fudan University, Shanghai

The Shanghai Public Health Clinical Center & School of Public Health, in collaboration with the Central Hospital of Wuhan, Huazhong University of Science and Technology, the Wuhan Center for Disease Control and Prevention, the National Institute for Communicable Disease Control and Prevention, Chinese Center for Disease Control, and the University of Sydney, Sydney, Australia is releasing a coronavirus genome from a case of a respiratory disease from the Wuhan outbreak. The sequence has also been deposited on [GenBank](#) (accession [MN908947](#)) and will be released as soon as possible.

The sequence can be downloaded here:

[WH-Human_1.fasta.gz](#) (8.9 KB – this is a fasta file compressed using gzip. Uncompress using gzip -d WH-Human_1.fasta.gz)

Disclaimer:

Please feel free to download, share, use, and analyze this data. We ask that you communicate with us if you wish to publish results that use these data in a journal. If you have any other questions –then please also contact us directly.

=====
Look at this ... '**dreadful**' ... and globally-important Report:

Report 2: Estimating the *potential total number* of novel Coronavirus cases in Wuhan City, China
<https://www.imperial.ac.uk/mrc-global-infectious-disease-analysis/news--wuhan-coronavirus>

-
-
Imperial College London today in a new estimate of 2019-nCoV activity in Wuhan said the city probably now has 4,000 symptomatic cases. **The report's 95% confidence interval ranges from 1,000 to 9,700.**

-
From: <https://www.imperial.ac.uk/news/194815/coronavirus-outbreak-china-have-infected-thousands>

-
Calculations:

The report estimates that a total of 1,723 cases of 2019-nCoV in Wuhan City had onset of symptoms by 12th January 2020 (the last reported onset date of any case before the report's publication).

This estimate is based on the following assumptions:

- Wuhan International Airport has a catchment population of 19 million individuals.
- There is a mean 10-day delay between infection and detection, comprising a 5-6 day incubation period and a 4-5 day delay from symptom onset to detection/hospitalisation of a case (the cases detected in Thailand and Japan were hospitalised 3 and 7 days after onset, respectively).
- Total volume of international travel from Wuhan over the last two months has been 3,301 passengers per day. This estimate is derived from the 3,418 foreign passengers per day in the top 20 country destinations based on 2018 IATA data, and uses 2016 IATA data held by Imperial College to correct for the travel surge at Chinese New Year present in the latter data (which has not happened yet this year) and for travel to countries outside the top 20 destination list.

The report concludes it is likely that the **Wuhan outbreak** of a novel coronavirus has caused substantially more cases of moderate or severe respiratory illness than currently reported.

Worth a read before tomorrow morning!

Top NIH doctor wants China to invite US disease detectives to inspect Wuhan coronavirus data

From CNN Health's Elizabeth Cohen

Tom

Williams/CQ-Roll Call/Getty Images Tom Williams/CQ-Roll Call/Getty Images

The United States' top infectious disease doctor wants a team of disease detectives from the US Centers for Disease Control and Prevention to go to China and check on crucial questions about how the Wuhan coronavirus is spreading.

But there's one problem: China first has to invite the CDC.

"Up to now, to my knowledge, we have not been invited," said Dr. Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases at the US National Institutes of Health.

A CDC spokesperson was not immediately available to comment on Sunday. NIH and CDC are separate divisions of the US Department of Health and Human Services.

On Sunday, Ma Xiaowei, China's health minister, told reporters that the virus could spread before someone develops symptoms. If so, that means the virus will spread much more quickly than expected. Ma did not explain how Chinese authorities arrived at this conclusion.

"The implications for this are so important that in my mind it's absolutely critical that we ourselves see the data, because what goes on over there has implications for what happens here," Fauci said.

Fauci said that CDC disease detectives would need to see precisely how Chinese health authorities have gathered their data.

"To my knowledge, we have not seen the precise minute, granular data and how they collected it," he said. "We need to get to the real bottom line of how they collected their data and see if it's valid."

"The Chinese have good people. I don't want to impugn their capabilities," Fauci added. "But when it's something as important as this, our people who are trained epidemiologists need to go over their data and the best way to do that is go there and see how they're collecting it."

He added that to his knowledge, the Chinese did not tell US health authorities that the virus could spread before someone is symptomatic, a crucial aspect of any disease investigation. He said he learned about it after reading a CNN reporter's email.

HHS International SPOTREP: Novel Coronavirus, Wuhan, China (Update #16)

What: There are 2,023 cases of confirmed 2019-nCoV in 15 locations as of 26Jan20, with five of these cases confirmed in the United States (California, Washington and Illinois).

- A 2,379 persons on 312 flights have been screened as of 25Jan20 and 2 people were referred for medical evaluation.
- CDC has deployed multidisciplinary teams to Washington and Illinois to assist health departments with clinical management, contact tracing, and communications.
- CDC teams will be leaving for California and Arizona on 1/27 to support those investigations.
- Coordinating with interagency partners on planning for US DoS and American citizen repatriation flight.

Laboratory and Epidemiology:

- The protocol for this assay has been posted to the CDC 2019-nCoV website. The sequence of the 2019-nCoV from the first identified US case has been made available on GenBank (Accession ID: MN985325).

For more details, please see attached CDC SITREP for Novel Coronavirus.

When: 26Jan20 2120ET

Where: International

Why: CIR: Disease - International

Actions/Follow-Up: The SOC will continue to monitor this incident and report as needed. This message was distributed to the SOC SPOTREP-SITREP Distribution List.

QUICK FIX

— The Trump administration will announce its Medicaid block grant guidance on Thursday,

POLITICO scooped.

— **House Speaker Nancy Pelosi appears open to new drug-price talks with President Donald Trump** if the president's impeachment trial ends with his acquittal, POLITICO scooped.

— **An Iowa health clinic has become a destination** for uninsured Pacific Islanders whose homeland was used as a nuclear-bomb testing site.

A message from PhRMA:

There's a long line of middlemen collecting a significant portion of what you pay for medicine. New analysis finds nearly 50% of brand medicine spending went to hospitals, health insurers, pharmacy benefit managers, the government and others in 2018, up from 33% five years prior. [More](#).

WELCOME BACK TO MONDAY PULSE — Where it's eight days until the State of the Union address. Seven days to the Iowa caucuses. Six days to the Super Bowl. And five days to Washington's "health prom."

If you're attending at least one, this is the newsletter for you. (If you're attending all four, we advise you to pack a change of clothes.) Tips to ddiamond@politico.com.

DRIVING THE DAY

COMING THURSDAY: BLOCK GRANT ANNOUNCEMENT — The White House signed off on a long-developing plan to overhaul Medicaid by letting states shift some program funding to block grants, POLITICO's Dan Diamond scooped on Saturday.

"The status quo is unacceptable," said a senior administration official. "We have to give states some more flexibility."

The controversial plan — which CMS Administrator Seema Verma has developed for more than a year — targets Obamacare's Medicaid expansion, [POLITICO scooped](#) last week. HHS and CMS

declined to comment on pending announcements.

— **CMS is billing Thursday's event as "Transforming Medicaid: A New Opportunity for Better Health."** POLITICO obtained a copy of the invitation sent to outside groups.

— **The yet-to-be-announced plan is already being panned by advocates and researchers,** worried about patients and providers seeing significant cuts. "A modest suggestion for a more accurate event title: Capped Federal Medicaid Funding: A Fiscal Straitjacket for States Leading to Fewer People Covered, Less Access to Needed Care & Poorer Health," [tweeted](#) Georgetown's Edwin Park.

The plan also has faced skepticism inside the administration, given that it could arm Trump's critics with more ammunition that he's attempting to cut health services in an election year. Meanwhile, officials acknowledge that it's guaranteed to be enmeshed in litigation.

— **But it's also a win for Verma**, who just six weeks ago was fighting with HHS Secretary Alex Azar in a feud that put both of their jobs at risk. Barring some last-minute reversal, she'll oversee a significant step toward a long-held conservative goal: Capping Medicaid spending.

"Putting forth the plan like this in an election year is risky," the Minnesota StarTribune writes in an [editorial](#). "But there's an admirable, if brutal honesty about Verma's willingness to outline what entitlement reforms would look like."

PELOSI COULD SEEK TO REOPEN DRUG-PRICE TALKS WITH TRUMP — Wendell Primus, the speaker's top health aide, has floated the idea of reopening the discussions after Trump's impeachment trial ends with his expected acquittal, POLITICO's Adam Cancryn and Sarah Karlin-Smith scooped on Friday.

Primus, in conversations with lobbyists and Democratic advisers, has suggested negotiating broad bipartisan legislation that could be included in a May health care package. Both parties see drug-price reform — a top priority for voters — as a key issue heading into the 2020 election.

— **But the fight over direct negotiations could derail any talks.** Democratic leaders want to empower the government to directly negotiate drug prices; Trump health officials and Republican lawmakers are calling the idea a nonstarter in any deal.

And while Primus has privately expressed optimism about restarting talks with the White House, Pelosi's office was adamant that Democrats wouldn't agree to a proposal that fails to empower the government to negotiate, Adam and Sarah report.

— **What Pelosi's spox says:** "Drug price negotiation is essential to meaningfully lowering prescription drug costs, and Democrats will hold Senate Republicans and President Trump accountable to his broken promise to 'negotiate like crazy' on prescription drug prices," Henry Connelly said. "Our position is that if President Trump actually wants to lower drug prices, he should pick up the phone and tell Senator McConnell to send him the House-passed Lower Drug Costs Now Act which provides the negotiations he promised the American people."

THE IOWA HEALTH CLINIC THAT'S DRAWING PATIENTS FROM 6,000 MILES AWAY —

Dubuque's Crescent Community Health Center offers free or subsidized care to residents from the Marshall Islands, whose homeland was irradiated by the U.S. military decades ago, Dan Diamond reported from Iowa.

About 800 Marshallese now live in the small Midwest city, with more islanders relocating to Dubuque for a chance to see the doctor.

— **The U.S. dropped dozens of nuclear bombs on the Marshall Islands** across the 1940s and 1950s, spreading radiation that was linked to a surge of cancers and, in some places, remains at a higher level than Chernobyl. The islanders also face a slew of other health problems, like widespread diabetes and heart problems, with the average man on the islands dying before he turns 63.

— **The U.S. government eventually promised that the islanders would get Medicaid, but Congress later took it away** in a 1996 welfare reform bill. That lack of a safety-net health program is one reason why so many Marshallese are uninsured — and why the promise of free care in Dubuque is so alluring.

— **Meanwhile in Congress:** A small group of Democrats, currently led by Hawaii Sen. Mazie Hirono, has fought for more than a decade to restore Medicaid coverage for the Marshallese and residents of two other nations, Palau and Micronesia. Meanwhile, Rep. Tony Cárdenas (D-Calif.) led a companion bill in the House last year that picked up Rep. Steve Womack (R-Ark.), and later won over progressive leader Rep. Pramila Jayapal (D-Wash.).

But the provision — estimated at \$350 million over a decade — fell out of the budget package in December, after the lawmakers failed to win over more members of both parties. They're trying again for the budget extenders deal that's due in May.

POLITICO's 10th Annual State Solutions Conference, happening on the sidelines of the National Governors Association's Winter Meeting in Washington, D.C., will take place on **Friday, February 7**. POLITICO will host a series of conversations with governors from across the country, focusing on the innovative approaches that their states have taken to address complex challenges. [RSVP](#).

PUBLIC HEALTH

CDC: FIVE CONFIRMED U.S. CASES OF CORONAVIRUS, WITH MORE EXPECTED — CDC on Sunday announced the three new cases, adding that another 100 people in the U.S. are being monitored for possible infection, though many will be ruled out, POLITICO's Sarah Oweremohle reports.

A CDC official also called the situation in China "alarming" but applauded officials there for working to contain the virus. Eighty deaths have been reported and about 2,750 people are infected, Chinese officials warned Sunday, as the nation has put more than a dozen cities under quarantine and shut down other travel.

— **It will get worse: The spread of the virus is "accelerating,"** Chinese leader Xi Jinping warned over the weekend. The demand for medical supplies is outpacing China's ability to produce them.

— **Meanwhile: Chinese scientists race to develop a vaccine.** The Chinese Centre for Disease Control and Prevention announced on Sunday that researchers had isolated viruses and were selecting a strain, [the South China Morning Post reports](#).

AROUND THE NATION

HOUSE CANDIDATE PETITIONS FEC TO SPEND CAMPAIGN FUNDS ON HEALTH CARE —

A Democratic House candidate running this year for an open seat in the Atlanta suburbs is petitioning the Federal Election Commission for permission to use campaign funds to cover her health insurance premiums. Although federal law bars candidates from using funds they raise for "personal use," the agency has never determined whether health coverage qualifies as such, POLITICO's Alice Miranda Ollstein reports.

Thirty-year-old Nabilah Islam, who is hoping to flip Georgia's 7th district from red to blue, says quitting her job to campaign full-time for the seat meant foregoing health insurance due to the high cost of a plan on the individual market in a state that has not expanded Medicaid. A ruling in her favor, she argues in her letter to the FEC, would help address some of the financial barriers to running for office and increase diversity in Congress.

— **Other progressive candidates and past candidates have voiced support** for the petition, Alice writes. Tiffany Caban, who narrowly lost her bid for Queens District Attorney, said giving up her health insurance while campaigning nearly deterred her from running.

"We need to make it more feasible for working folx to run," she tweeted about Islam's petition.

THE HEALTH CARE MAZE - Navigating the health care system can be a time-consuming nightmare. Doing so when dealing with chronic condition and/or lacking insurance is even more daunting. Join POLITICO on Wednesday, Jan. 29, for an important conversation on how to make navigating the health care system more effective and less costly. [**RSVP**](#).

NAMES IN THE NEWS

PETE STARK, 1931-2020 — The fiery California congressman helped write COBRA, the 1986 law that lets people stay on their old employer's health plan after they leave work; EMTALA, a

major provision of COBRA that guaranteed emergency patients the right to be seen, regardless of ability to pay; and so-called "Stark laws" that sought to limit physician self-referrals and discourage perverse incentives.

Stark later wrote parts of the Affordable Care Act and repeatedly pushed for universal health care. But he also memorably sparred with other lawmakers and officials, including [controversially criticizing](#) then-HHS Secretary Louis Sullivan in 1990. [The Washington Post's obituary](#) | [The San Francisco Chronicle's obituary](#) | [The National Academy of Social Insurance's obituary](#)

JOANNE CHIEDI joins DLA Piper. Chiedi, who was acting HHS inspector general before stepping down this month, is now chief administrative officer at global law firm DLA Piper. Chiedi had been at HHS since 2005, serving as a top official in the inspector general's office and holding other management roles, and was previously at the Justice Department.

A message from PhRMA:

New data show the amount hospitals, pharmacies and other health care providers retained on the sale of brand medicines nearly doubled between 2013 and 2018, increasing from \$24.7 billion to \$48.6 billion. This trend was primarily driven by unprecedented expansion in the 340B drug pricing program. Policymakers can't help patients afford their medicine if they ignore where almost half the money is going. [More.](#)

WHAT WE'RE READING

A doctor who got famous for diagnosing NFL brain disease now [trades on his fame](#) as an expensive expert witness, Will Hobson writes for the Washington Post.

The health care industry launched a [lobbying blitz](#) ahead of Congress' year-end spending deal, Rachel Cohrs writes for Modern Healthcare.

[More than 60,000 people](#) in Idaho have already signed up for the state's new Medicaid expansion, the AP reports.

Washing your hands is more important to protect against the spread of a coronavirus than wearing a mask, Roni Caryn Rabin writes for the New York Times.

Worth a read before tomorrow morning!

Top NIH doctor wants China to invite US disease detectives to inspect Wuhan coronavirus data

From CNN Health's Elizabeth Cohen

Tom

Williams/CQ-Roll Call/Getty Images Tom Williams/CQ-Roll Call/Getty Images

The United States' top infectious disease doctor wants a team of disease detectives from the US Centers for Disease Control and Prevention to go to China and check on crucial questions about how the Wuhan coronavirus is spreading.

But there's one problem: China first has to invite the CDC.

"Up to now, to my knowledge, we have not been invited," said Dr. Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases at the US National Institutes of Health.

A CDC spokesperson was not immediately available to comment on Sunday. NIH and CDC are separate divisions of the US Department of Health and Human Services.

On Sunday, Ma Xiaowei, China's health minister, told reporters that the virus could spread before someone develops symptoms. If so, that means the virus will spread much more quickly than expected. Ma did not explain how Chinese authorities arrived at this conclusion.

"The implications for this are so important that in my mind it's absolutely critical that we ourselves see the data, because what goes on over there has implications for what happens here," Fauci said.

Fauci said that CDC disease detectives would need to see precisely how Chinese health authorities have gathered their data.

"To my knowledge, we have not seen the precise minute, granular data and how they collected it," he said. "We need to get to the real bottom line of how they collected their data and see if it's valid."

"The Chinese have good people. I don't want to impugn their capabilities," Fauci added. "But when it's something as important as this, our people who are trained epidemiologists need to go over their data and the best way to do that is go there and see how they're collecting it."

He added that to his knowledge, the Chinese did not tell US health authorities that the virus could spread before someone is symptomatic, a crucial aspect of any disease investigation. He said he learned about it after reading a CNN reporter's email.

1. HHS

Today's Noteworthy Topics:

2020 SOC Activation, NCR

The SOC will transition to a Level II activation due to the increased Operational Tempo and the need for continued support to CDC during 2020 Novel Coronavirus response; and for coordination of overall ESF 8 activities and information sharing.

Novel Coronavirus (2019-nCoV)

There are 2,023 cases of confirmed 2019-nCoV in 15 locations as of 26Jan20, with five of these cases confirmed in the United States (California, Washington and Illinois). A 2,379 persons on 312 flights have been screened as of 25Jan20 and 2 people were referred for medical evaluation. CDC has deployed multidisciplinary teams to Washington and Illinois to assist health departments with clinical management, contact tracing, and communications. CDC teams will be leaving for California and Arizona on 27Jan20 to support those investigations. Coordinating with interagency partners on planning for US DoS and American citizen repatriation flight.

Daily Operational Schedule:

0830 – FEMA Daily OPS Briefing

0830 – DHS & CDC Daily 2019-2020 Novel Coronavirus Sync Call

1230 – Public Health and Medical Services Concall

Public Health Emergency of National Significance:

Puerto Rico (Earthquake): 08Jan20

Opioid Crisis, Nationwide: 24Jan20

HHS Response Status Summary:

HHS SOC: Level II (On-Site)

CDC EOC: Level III (Polio/Ebola)

CDC EOC: 2019 Novel Coronavirus (Agency-Wide Response)

FDA EOC: Level II (Vape Product Response)

Emergency Support Function (ESF) Activation:

ESF – 8: Not Activated

ESF – 6: Not Activated

Recovery Support Function (RSF) Activation:

H&SS RSF: Activated Region II (2017 Irma/Maria, Puerto Rico projected end date of 05Mar20). Activated Region IX (2018 California Wildfires projected end date of 31Mar20)

HHS Deployments: (Total = 184)

ASPR: 14 – (5) Irma/Maria, (1) 2018 California Wildfires, (5) 2020 Earthquake Puerto Rico, State of the Union (3)

CDC: 170 – (31) Polio, (48) Ebola, (8) Puerto Rico, (83) Coronavirus

FMS Status:

- • 32 (250 Bed) FMS sets are deployable
- • 10 (50 Bed) FMS sets are deployable

New Mission Assignments (MA): NSTR**Active Situations (7):**

- • Influenza Season
- • Irma/Maria, Puerto Rico, &USVI (Recovery)
- • Ebola in Eastern Democratic Republic of the Congo
- • California Wildfires (Recovery)
- Novel Coronavirus
- Bravo Response
- Earthquake, Puerto Rico

U.S. International Health Regulation National Focal Point Status: The potential PHEIC on the confirmation of the 2nd case of Novel Coronavirus (nCoV) – Chicago, IL, U.S. was approved by the ASPR; submitted to the WHO and PAHO; and to USG Stakeholders.

2. FEMA:**Interagency Response Status Summary:**

NWC: Monitoring

NRCC: Blue

National IMATs: Red – Fully Mission Capable; Blue – Deployed – PR; Gold – Fully Mission Capable

Regional IMATs: Region II, PR

Significant National Weather:

Areas of freezing rain possible for the Central and Northern Plains. Heavy snow and freezing rain possible for the Northwest.

3. OPDIV/STAFFDIV Overnight Reports:

Worth a read before tomorrow morning!

Top NIH doctor wants China to invite US disease detectives to inspect Wuhan coronavirus data

From CNN Health's Elizabeth Cohen

<image002.jpg>

Tom Williams/CQ-Roll Call/Getty Images

The United States' top infectious disease doctor wants a team of disease detectives from the US Centers for Disease Control and Prevention to go to China and check on crucial questions about how the Wuhan coronavirus is spreading.

But there's one problem: China first has to invite the CDC.

"Up to now, to my knowledge, we have not been invited," said Dr. Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases at the US National Institutes of Health.

A CDC spokesperson was not immediately available to comment on Sunday. NIH and CDC are separate divisions of the US Department of Health and Human Services.

On Sunday, Ma Xiaowei, China's health minister, told reporters that the virus could spread before someone develops symptoms. If so, that means the virus will spread much more quickly than expected. Ma did not explain how Chinese authorities arrived at this conclusion.

"The implications for this are so important that in my mind it's absolutely critical that we ourselves see the data, because what goes on over there has implications for what happens here," Fauci said.

Fauci said that CDC disease detectives would need to see precisely how Chinese health authorities have gathered their data.

"To my knowledge, we have not seen the precise minute, granular data and how they collected it," he said. "We need to get to the real bottom line of how they collected their data and see if it's valid."

"The Chinese have good people. I don't want to impugn their capabilities," Fauci added. "But when it's something as important as this, our people who are trained epidemiologists need to go over their data and the best way to do that is go there and see how they're collecting it."

He added that to his knowledge, the Chinese did not tell US health authorities that the virus could spread before someone is symptomatic, a crucial aspect of any disease investigation. He said he learned about it after reading a CNN reporter's email.

Jack,

As you may know, US patient #2 in Chicago is at one of our Ascension hospitals. We've had CDC on site since Friday, and we have some questions that I am hoping we can discuss with ASPR leadership such as:

- We were ready to discharge the patient, but are holding them at the request of CDC. We also are encountering overtime to accommodate CDC requests, as well as caring for additional PUIs with mild symptoms that we would have sent home on home quarantine. Will the government be declaring a disaster or setting up funds for reimbursement of these extra costs?
- While there is no evidence that this is transmitted via airborne (vs droplet), the insistence of negative pressure rooms and N95 respirators is putting a strain on our hospital. We do have adequate supplies of N95s due to our pandemic stockpile, but long term, with 80% of the respirators manufactured in China, it would be helpful for CDC to downgrade their PPE recommendations to droplet as soon as possible. I know this is a new virus, but we made a huge mistake during the 2009 H1N1 pandemic with this process, and would like to see CDC keeping this on their radar.
- We need better guidance on patients with mild symptoms that are PUI that officially allow us to send to home quarantine.
- CDC has asked us to furlough 40 employees that were in contact with the patient and did not wear PPE, but are asymptomatic. Again, a logistics nightmare as well as a complicated financial problem (not worker's comp since they are asymptomatic), that we are hoping the government can provide financial assistance, or have better guidance.
- I know we're still early in this, so many unknowns, but we should ensure we are cognizant of findings and guidance timing.

I am in DC today for a meeting at RAND, ten head back tonight, if you are willing to have a call or in-person meeting today, we would accommodate.

Thank you.

Important Instructions

Due to anticipated high volume, please plan to dial in to the telebriefing 15 minutes before the start time.

If you would like to ask a question during the call, press *1 on your touchtone phone. Press *2 to withdraw your question. You may queue up at any time. You will hear a tone to indicate your question is pending.

TRANSCRIPT

A transcript will be available following the briefing at CDC's web site: www.cdc.gov/media.

###

U.S. Department of Health and Human Services

CDC works 24/7 protecting America's health, safety and security. Whether diseases start at home or abroad, are curable or preventable, chronic or acute, or from human activity or deliberate attack, CDC responds to America's most pressing health threats. CDC is headquartered in Atlanta and has experts located throughout the United States and the world.

2019 Novel Coronavirus (2019-nCoV) Media Key Points January 26, 2020

MAIN KEY MESSAGES

- This is a rapidly changing situation and we are still learning about the new coronavirus (2019-nCoV) discovered in China. We are monitoring the situation closely and anticipate updating our recommendations and guidance as needed.
- Outbreaks like this – when a new virus is emerging to infect people – are always concerning. Some people might be worried about this virus and how it may impact Americans.
 - While this situation poses a very serious public health threat, CDC believes the immediate risk to the U.S. public is low at this time.
 - Risk also depends on exposure. People exposed to ill person are at greater risk of infection. At this time in the U.S., 2019-nCoV is not spreading in the community.
 - However, the situation is evolving, and the risk will depend on how well the virus spreads and how sick it makes people.
- CDC has activated its Emergency Operations Center and begun using public health measures, including enhanced entry screening, as part of our aggressive public health response strategy.
- We fully expect that in the coming days and weeks, we will see more cases of this new coronavirus here in the United States and globally, including some person-to-person spread in the United States.

SITUATION UPDATE

- Although Chinese officials have closed transport within and out of Wuhan, CDC will continue to conduct enhanced entry screening at five designated airports – New York JFK, San Francisco, Los Angeles LAX, Chicago O’Hare, and Atlanta Hartsfield-Jackson. We are currently evaluating the extent and duration of this enhanced screening.
 - CDC continues to screen a small number of travelers from Wuhan at the 5 airports doing entry screening. This is due to connecting flights or travelers that originated in Wuhan but have a longer itinerary (stops in other places before reaching the United States).
- Department of State has the lead for the safe and expedient ordered departure of all U.S. citizens from Wuhan, China. However, CDC is aware and coordinating in the planning.
- This week CDC will begin regular reporting on PUIs (persons under investigation) on our website.
- Last week CDC reported the first and second infections with 2019-nCoV in the United States.
- Today CDC is reporting 3 additional infection of 2019-nCoV.

- This brings the total number of infections with 2019-nCoV in the U.S. to date to 5 patients in three states, AZ, CA, IL and WA.
- It's likely that we will continue to see more cases in the United States in the coming days and weeks, including some person-to-person spread.
- CDC will continue to lean in on public health response efforts to protect Americans. We are working closely with state and local health departments and have teams on standby to deploy if needed. Our public health continues to be to protect the health of Americans by containing this outbreak.

WHAT YOU CAN DO

- While the immediate risk of this new virus to the American public is believed to be low at this time, everyone can do their part to help us respond to this emerging public health threat:
 - It's currently flu and respiratory disease season and CDC recommends getting vaccinated, taking everyday preventive actions to stop the spread of germs, and taking flu antivirals if prescribed.
 - If you are a healthcare provider, be on the look-out for people with travel history to Wuhan China and fever and respiratory symptoms.
 - If you are a healthcare provider caring for a 2019-nCoV patient, please take care of yourself and follow recommended infection control procedures.
 - For people who may have 2019-nCoV infection, please follow CDC guidance on how to reduce the risk of spreading your illness to others. This guidance is on the CDC website.
- Right now, CDC recommends travelers avoid all nonessential travel to Wuhan, China. We also recommend people traveling to China practice certain health precautions like avoiding contact with people who are sick and practicing good hand hygiene.

The Honorable Alex M. Azar
Secretary
U.S. Department of Health and Human Services
200 Independence Avenue, SW
Washington, DC 20201

Dear Secretary Azar,

In light of the heightening concern over the Wuhan coronavirus, I wanted to make you aware of Kentucky Bioprocessing's (KBP), an RAI Group Company, capabilities and abilities to respond to these types of public health situations. KBP has capabilities to produce experimental vaccine candidates and treatments in a very rapid manner as we demonstrated during the 2014-15 Ebola crisis when the facility dedicated its entire production capacity to making the complex and difficult ZMapp treatment for Ebola.

We started looking at the Wuhan coronavirus as soon as the sequence was released and we have a strategy to build constructs and test expression, purification and conjugation of a vaccine candidate(s) in our system. However, our program does lack certain insights and resources that might be available if we were proactively working with public health authorities, like NIH or CDC, in response to the Wuhan virus. Obviously, I cannot promise success in such an endeavor and have not touched on the numerous details required but wanted to raise your awareness of our capabilities should you feel the need to seek our participation in any efforts to thwart the Wuhan virus.

We are currently in development for our planned IND submission in June 2020 and Phase 1 study for a seasonal flu vaccine built on our platform. We believe we could accommodate early, small scale efforts on a Wuhan virus vaccine without interrupting our planned and important seasonal flu efforts, but larger scale efforts would disrupt or significantly delay our plans for seasonal flu. Nevertheless, we stand at the ready to discuss should you require our participation.

Sincerely,

James N. Figlar, Ph.D.
Executive Vice President, Scientific and Regulatory Affairs, RAIS

FOR IMMEDIATE RELEASE

January 27, 2020

Secretary Azar Remarks at ONC 2020 Annual Meeting

As Prepared for Delivery

Good morning, and thank you for having me here today.

Thank you, Dr. Rucker and everyone at ONC, for putting together this annual gathering. It has become one of HHS's largest events for engaging with external stakeholders. So I want to thank everyone here for joining this important meeting.

I also want to thank you for changing your schedule today, as I needed to speak with China's Minister of Health this morning, as well as the Director-General of the World Health Organization.

Before I begin our discussion of health IT, I thought it might be timely to provide a brief update on the ongoing outbreak of coronavirus that began in Wuhan, China.

The U.S. government has been proactively preparing for the arrival of the novel

coronavirus on our shores and executing on an aggressive approach to protect Americans.

The United States has one of the best public health systems in the world. It is on this strength, as well as our superb team of public health leaders at HHS, that we will rely. The President and I have been speaking regularly, including just moments ago, on the topic of the coronavirus.

My Department, as well as relevant parts of the White House and other agencies, are in constant communication as we work under President Trump's leadership to protect Americans.

Protecting the public health and preparing for events like this is a key part of what we do at HHS, and we take that work very seriously. We are working closely with China, the World Health Organization, and our state and local health departments across the U.S.

Yesterday, the Centers for Disease Control and Prevention announced that there have now been five confirmed cases here in the U.S., and we can expect to see more.

This is a rapidly changing situation, and we are still learning about the virus.

While the virus poses a serious public health threat, the immediate risk to Americans is low at this time.

As the situation evolves, we will continue to prepare to keep Americans safe.

The Trump Administration takes the health of Americans very seriously, and I know that all of you are here for the same reason: you care about improving the health and well-being of the American people.

I know many of you are here at this gathering year after year. Sometimes, you probably feel like major progress has been made since the year before, while at other times, it probably feels like you're facing the same intractable problems.

So I want to begin by underscoring this point: Health IT and digital health are absolutely key to this administration's healthcare agenda.

We are determined that this administration will be looked back on not just as a turning point for health IT, but also for the much broader mission of putting patients at the center of American healthcare. We cannot accomplish that goal without you.

President Trump has an exciting vision for healthcare: a system with affordable, personalized care, a system that puts you in control, provides peace of mind, and treats you like a human being, not a number.

Such a system will provide you with the affordability you need, the options and control you want, and the quality you deserve.

Delivering on this vision requires having a healthy respect for what works about our

system—and a vigorous dedication to fixing what’s broken.

That’s what the President has promised Americans, no matter how they finance or obtain their healthcare: Protect what works, and fix what’s broken.

So, what does that mean when it comes to health IT?

What has worked, in fits and starts, is the digitization of health records.

It has created the potential for a whole ecosystem of applications and innovations that can put the patient at the center, empowering providers with the right decision-making information and providing the patient with the data he or she needs.

This potential has always been apparent to those of us who worked closely on it.

I was serving in the Bush administration, as HHS’s general counsel, when ONC was created. In the years since we started talking about this issue around Secretary Leavitt’s conference room table, we’ve seen massive advances in the technology we have at our disposal.

Tremendous progress has undoubtedly been made on the adoption front. But technology has continued to advance at exponential rates.

The ubiquity of smartphones, apps, cloud-based storage and computing power, and near-universal access to high speed internet has completely changed so many aspects of American life, and whole industries, but not, unfortunately, so much of healthcare.

But these technological advances have made the promise of digital health even more tantalizing: putting patients and providers truly in control, enabling personalized treatment of every patient.

In order for this to happen, however, we need not just digitized records, but records that are transportable and interoperable—that can be easily accessed and used in different forms.

Such records will be more than just records—they will be highly valuable tools in delivering Americans better, more affordable healthcare.

The inadequacies of our current system aren’t just a theoretical challenge.

They can also be a source of tremendous frustration for patients themselves—no matter how well-versed these patients may be in the inner workings of the health system.

It’s even been a source of frustration for me, as a patient—within the past month, in fact.

Earlier this month, I spent hours trying unsuccessfully to get access into my health records and, to this date, still haven’t had my call returned to help me get into them. And I’m the Secretary of Health and Human Services!

That was the one reassuring thing about the experience: There was no preferential treatment, just equal opportunity frustration.

And that isn't even the only time I've encountered issues around my health records.

Last year, I had to visit three different providers that were all part of the same large system: a primary care practice, an imaging provider, and an inpatient hospital.

Yet each of them had a separate system—within this one business, they didn't even have interoperability!

And this isn't just frustrating. Each of these issues is an opportunity for medical error.

I saw, at one point, that the hospital planned to switch me from one statin to a much more powerful one, and I told them I didn't want to do that—but sure enough, somehow that information wasn't incorporated into my record and, that night, I got a cup of pills with the drug I'd said I didn't consent to taking.

Health records today are stored in a segmented, balkanized system, and it's not just affecting the patient and provider experience—it's affecting care.

This has to change, which is why, last year, we proposed ONC's bold interoperability rule, as well as accompanying rules from CMS.

I want to briefly lay out the context of the interoperability rule, which is the result of years of thinking about what's needed to deliver on the potential of health IT.

The rule was authorized and required by the 21st Century Cures Act, a piece of legislation that passed on a nearly unanimous, bipartisan basis, and a law that I know many of you in this room either worked on or advocated.

The details of the rule may be complex, but the goal is very simple: It's about access and choice. Patients should be able to access their electronic medical record at no cost, period.

Providers should be able to use the IT tools that allow them to provide the best care for patients, without excessive costs or technical barriers.

This sounds like a pretty intuitive, appealing standard.

Unfortunately, some are defending the balkanized, outdated status quo and fighting our proposals fiercely.

I want to be quite clear: Patients need and deserve control over their records; interoperability is the single biggest step we can take toward that goal.

In determining how to implement it, we will take very seriously all input from our stakeholders, including all of you in this room.

We extended the comment period for the interoperability rule, and have done extensive in-

person outreach as well.

We will pursue the goal of patient empowerment while providing robust enforcement of and protection for these same patients' privacy.

This is not about one software system design or the other.

This is about ensuring that patients have access to information about their own health, and that providers have a choice in tools and solutions to provide the best possible care.

Our work toward that end will in no way limit patients' privacy protections.

Look at the status quo: Patients cannot easily access their medical records, providers on different systems cannot effectively communicate, and those holding patient data have prevented new market entrants from participating in this space.

Defending a system like this, defending that status quo, is a pretty unpopular place to be.

Far too many Americans have had experiences just as frustrating as I've had. In fact, I've heard stories just like it not only from Dr. Rucker, but also from Administrator Verma at CMS.

At this point, we could practically turn HHS senior staff meetings into a roundtable about frustrating health IT experiences.

I would suggest that means we have a serious problem—and that scare tactics are not going to stop the reforms we need.

I want to conclude by emphasizing that our efforts around interoperability and health IT issues are also going to go beyond control of clinical records.

Putting patients in charge of their health records is a key piece of patient control in healthcare, and patient control is at the center of our work toward a value-based healthcare system.

But there are even more direct ways that health IT can help us build a value-based, competitive healthcare system.

Seamless health IT systems, and patient use of smartphone apps, also hold huge potential for delivering affordability and quality through price transparency and competition.

Starting in January 2021, thanks to President Trump's executive order on price transparency, hospitals will be required to make available their actual prices and the prices they're willing to accept from patients paying cash.

We've also proposed that insurers have to make public the prices that they negotiate with providers, and what patients' cost-sharing will be on a given plan.

Now, imagine having that information seamlessly integrated with patients' clinical

information—so you can be aware of what services you’re receiving and how much you’re paying for them, in the same place.

That is quite possible with the right work on harmonization of data standards, which is why ONC has been focusing on these kinds of issues, too.

This could not only transform the experience of shopping for care, but also the experience of receiving care.

Patients and providers are often frustrated by the process of prior authorization, which could be greatly accelerated if clinical and financial data streams were integrated.

Working toward these kinds of goals is a redefinition of the role of government in healthcare: government not as a heavy-handed intervener, but as an enabler of private sector innovation and competition.

And it can deliver a completely different kind of healthcare system: where you, as the patient, are at the center and in control, with seamless access to the data you need to make decisions with your healthcare provider.

That is the kind of personalized system that President Trump has promised the American people—and it will be a more affordable, higher quality system, too. Such a system isn’t the stuff of science fiction; we have the technology to make it happen.

We’re working to make it a reality every day at HHS, and I know many of you are hard at work on the same goal.

So thank you again for joining us here today, and I look forward to working with all of you in the years to come.

Health records today are stored in a segmented, balkanized system, and it's not just affecting the patient and provider experience—it's affecting care.

This has to change, which is why, last year, we proposed ONC's bold interoperability rule, as well as accompanying rules from CMS.

I want to briefly lay out the context of the interoperability rule, which is the result of years of thinking about what's needed to deliver on the potential of health IT.

The rule was authorized and required by the 21st Century Cures Act, a piece of legislation that passed on a nearly unanimous, bipartisan basis, and a law that I know many of you in this room either worked on or advocated.

The details of the rule may be complex, but the goal is very simple: It's about access and choice. Patients should be able to access their electronic medical record at no cost, period.

Providers should be able to use the IT tools that allow them to provide the best care for patients, without excessive costs or technical barriers.

This sounds like a pretty intuitive, appealing standard.

Unfortunately, some are defending the balkanized, outdated status quo and fighting our proposals fiercely.

I want to be quite clear: Patients need and deserve control over their records; interoperability is the single biggest step we can take toward that goal.

In determining how to implement it, we will take very seriously all input from our stakeholders, including all of you in this room.

We extended the comment period for the interoperability rule, and have done extensive in-

person outreach as well.

We will pursue the goal of patient empowerment while providing robust enforcement of and protection for these same patients' privacy.

This is not about one software system design or the other.

This is about ensuring that patients have access to information about their own health, and that providers have a choice in tools and solutions to provide the best possible care.

Our work toward that end will in no way limit patients' privacy protections.

Look at the status quo: Patients cannot easily access their medical records, providers on different systems cannot effectively communicate, and those holding patient data have prevented new market entrants from participating in this space.

Defending a system like this, defending that status quo, is a pretty unpopular place to be.

Far too many Americans have had experiences just as frustrating as I've had. In fact, I've heard stories just like it not only from Dr. Rucker, but also from Administrator Verma at CMS.

At this point, we could practically turn HHS senior staff meetings into a roundtable about frustrating health IT experiences.

I would suggest that means we have a serious problem—and that scare tactics are not going to stop the reforms we need.

I want to conclude by emphasizing that our efforts around interoperability and health IT issues are also going to go beyond control of clinical records.

Putting patients in charge of their health records is a key piece of patient control in healthcare, and patient control is at the center of our work toward a value-based healthcare system.

But there are even more direct ways that health IT can help us build a value-based, competitive healthcare system.

Seamless health IT systems, and patient use of smartphone apps, also hold huge potential for delivering affordability and quality through price transparency and competition.

Starting in January 2021, thanks to President Trump's executive order on price transparency, hospitals will be required to make available their actual prices and the prices they're willing to accept from patients paying cash.

We've also proposed that insurers have to make public the prices that they negotiate with providers, and what patients' cost-sharing will be on a given plan.

Now, imagine having that information seamlessly integrated with patients' clinical

information—so you can be aware of what services you’re receiving and how much you’re paying for them, in the same place.

That is quite possible with the right work on harmonization of data standards, which is why ONC has been focusing on these kinds of issues, too.

This could not only transform the experience of shopping for care, but also the experience of receiving care.

Patients and providers are often frustrated by the process of prior authorization, which could be greatly accelerated if clinical and financial data streams were integrated.

Working toward these kinds of goals is a redefinition of the role of government in healthcare: government not as a heavy-handed intervener, but as an enabler of private sector innovation and competition.

And it can deliver a completely different kind of healthcare system: where you, as the patient, are at the center and in control, with seamless access to the data you need to make decisions with your healthcare provider.

That is the kind of personalized system that President Trump has promised the American people—and it will be a more affordable, higher quality system, too. Such a system isn’t the stuff of science fiction; we have the technology to make it happen.

We’re working to make it a reality every day at HHS, and I know many of you are hard at work on the same goal.

So thank you again for joining us here today, and I look forward to working with all of you in the years to come.

FOR IMMEDIATE RELEASE

January 27, 2020

Secretary Azar Remarks at ONC 2020 Annual Meeting

As Prepared for Delivery

Good morning, and thank you for having me here today.

Thank you, Dr. Rucker and everyone at ONC, for putting together this annual gathering. It has become one of HHS's largest events for engaging with external stakeholders. So I want to thank everyone here for joining this important meeting.

I also want to thank you for changing your schedule today, as I needed to speak with China's Minister of Health this morning, as well as the Director-General of the World Health Organization.

Before I begin our discussion of health IT, I thought it might be timely to provide a brief update on the ongoing outbreak of coronavirus that began in Wuhan, China.

The U.S. government has been proactively preparing for the arrival of the novel

coronavirus on our shores and executing on an aggressive approach to protect Americans.

The United States has one of the best public health systems in the world. It is on this strength, as well as our superb team of public health leaders at HHS, that we will rely. The President and I have been speaking regularly, including just moments ago, on the topic of the coronavirus.

My Department, as well as relevant parts of the White House and other agencies, are in constant communication as we work under President Trump's leadership to protect Americans.

Protecting the public health and preparing for events like this is a key part of what we do at HHS, and we take that work very seriously. We are working closely with China, the World Health Organization, and our state and local health departments across the U.S.

Yesterday, the Centers for Disease Control and Prevention announced that there have now been five confirmed cases here in the U.S., and we can expect to see more.

This is a rapidly changing situation, and we are still learning about the virus.

While the virus poses a serious public health threat, the immediate risk to Americans is low at this time.

As the situation evolves, we will continue to prepare to keep Americans safe.

The Trump Administration takes the health of Americans very seriously, and I know that all of you are here for the same reason: you care about improving the health and well-being of the American people.

I know many of you are here at this gathering year after year. Sometimes, you probably feel like major progress has been made since the year before, while at other times, it probably feels like you're facing the same intractable problems.

So I want to begin by underscoring this point: Health IT and digital health are absolutely key to this administration's healthcare agenda.

We are determined that this administration will be looked back on not just as a turning point for health IT, but also for the much broader mission of putting patients at the center of American healthcare. We cannot accomplish that goal without you.

President Trump has an exciting vision for healthcare: a system with affordable, personalized care, a system that puts you in control, provides peace of mind, and treats you like a human being, not a number.

Such a system will provide you with the affordability you need, the options and control you want, and the quality you deserve.

Delivering on this vision requires having a healthy respect for what works about our

system—and a vigorous dedication to fixing what’s broken.

That’s what the President has promised Americans, no matter how they finance or obtain their healthcare: Protect what works, and fix what’s broken.

So, what does that mean when it comes to health IT?

What has worked, in fits and starts, is the digitization of health records.

It has created the potential for a whole ecosystem of applications and innovations that can put the patient at the center, empowering providers with the right decision-making information and providing the patient with the data he or she needs.

This potential has always been apparent to those of us who worked closely on it.

I was serving in the Bush administration, as HHS’s general counsel, when ONC was created. In the years since we started talking about this issue around Secretary Leavitt’s conference room table, we’ve seen massive advances in the technology we have at our disposal.

Tremendous progress has undoubtedly been made on the adoption front. But technology has continued to advance at exponential rates.

The ubiquity of smartphones, apps, cloud-based storage and computing power, and near-universal access to high speed internet has completely changed so many aspects of American life, and whole industries, but not, unfortunately, so much of healthcare.

But these technological advances have made the promise of digital health even more tantalizing: putting patients and providers truly in control, enabling personalized treatment of every patient.

In order for this to happen, however, we need not just digitized records, but records that are transportable and interoperable—that can be easily accessed and used in different forms.

Such records will be more than just records—they will be highly valuable tools in delivering Americans better, more affordable healthcare.

The inadequacies of our current system aren’t just a theoretical challenge.

They can also be a source of tremendous frustration for patients themselves—no matter how well-versed these patients may be in the inner workings of the health system.

It’s even been a source of frustration for me, as a patient—within the past month, in fact.

Earlier this month, I spent hours trying unsuccessfully to get access into my health records and, to this date, still haven’t had my call returned to help me get into them. And I’m the Secretary of Health and Human Services!

That was the one reassuring thing about the experience: There was no preferential treatment, just equal opportunity frustration.

And that isn't even the only time I've encountered issues around my health records.

Last year, I had to visit three different providers that were all part of the same large system: a primary care practice, an imaging provider, and an inpatient hospital.

Yet each of them had a separate system—within this one business, they didn't even have interoperability!

And this isn't just frustrating. Each of these issues is an opportunity for medical error.

I saw, at one point, that the hospital planned to switch me from one statin to a much more powerful one, and I told them I didn't want to do that—but sure enough, somehow that information wasn't incorporated into my record and, that night, I got a cup of pills with the drug I'd said I didn't consent to taking.

Health records today are stored in a segmented, balkanized system, and it's not just affecting the patient and provider experience—it's affecting care.

This has to change, which is why, last year, we proposed ONC's bold interoperability rule, as well as accompanying rules from CMS.

I want to briefly lay out the context of the interoperability rule, which is the result of years of thinking about what's needed to deliver on the potential of health IT.

The rule was authorized and required by the 21st Century Cures Act, a piece of legislation that passed on a nearly unanimous, bipartisan basis, and a law that I know many of you in this room either worked on or advocated.

The details of the rule may be complex, but the goal is very simple: It's about access and choice. Patients should be able to access their electronic medical record at no cost, period.

Providers should be able to use the IT tools that allow them to provide the best care for patients, without excessive costs or technical barriers.

This sounds like a pretty intuitive, appealing standard.

Unfortunately, some are defending the balkanized, outdated status quo and fighting our proposals fiercely.

I want to be quite clear: Patients need and deserve control over their records; interoperability is the single biggest step we can take toward that goal.

In determining how to implement it, we will take very seriously all input from our stakeholders, including all of you in this room.

We extended the comment period for the interoperability rule, and have done extensive in-

person outreach as well.

We will pursue the goal of patient empowerment while providing robust enforcement of and protection for these same patients' privacy.

This is not about one software system design or the other.

This is about ensuring that patients have access to information about their own health, and that providers have a choice in tools and solutions to provide the best possible care.

Our work toward that end will in no way limit patients' privacy protections.

Look at the status quo: Patients cannot easily access their medical records, providers on different systems cannot effectively communicate, and those holding patient data have prevented new market entrants from participating in this space.

Defending a system like this, defending that status quo, is a pretty unpopular place to be.

Far too many Americans have had experiences just as frustrating as I've had. In fact, I've heard stories just like it not only from Dr. Rucker, but also from Administrator Verma at CMS.

CDC: 110 people in U.S. under investigation for Wuhan coronavirus

By Brianna Ehley

01/27/2020 12:28 PM EST

Roughly 110 people across 26 states are under investigation because they may have the Wuhan coronavirus, and officials are “imminently” considering updating federal travel recommendations, the CDC said today.

Nancy Messonnier, director of CDC’s National Center for Immunization and Respiratory Diseases, told reporters on a call that officials are expected to soon announce travel recommendations amid the growing outbreak. As of Sunday, there are more than 2,000 confirmed cases worldwide — the majority in China — and 56 have been confirmed deaths. The CDC is advising against nonessential travel to Wuhan, and it recommends people traveling more broadly throughout China take enhanced precautions.

There are five confirmed U.S. cases so far — all in patients who had recently traveled from China. Messonnier said as of now, officials believe “the immediate risk to the general American public is low.”

She said they have not seen human-to-human transmission of the virus in the U.S. and officials are focused on screening people experiencing potential symptoms who traveled recently from the Hubei province of China.

“We expect an announcement within the next day, but we want to make sure we’re being

expedient and sensible about what kind of decisions we're making," she said.

The Wuhan coronavirus is starting to infect President Donald Trump's beloved market rally.

The president weighed in on the coronavirus Monday just as markets tumbled worldwide, including a drop in U.S. stocks that erased this month's gains. Meanwhile, China's financial regulators said they will suspend trading on the Shanghai and Shenzhen stock exchanges for a longer period of time after a long holiday as fear over the extent of the outbreak spread.

The Dow Jones Industrial Average opened 500 points lower as news of the virus spreading to the U.S. and other countries grew and world officials scrambled to contain the outbreak, which

began in Wuhan, China. The coronavirus has affected over 2,700 people.

Five cases have been identified in the U.S., and China has shut down travel out of Wuhan.

Stocks on Wall Street gyrated early on Monday as investors feared whether health officials will be able to contain the virus and expressed concern over its impact on travel and tourism as well as general investor confidence about global health.

An out-of-control virus — now thought to spread through human to human contact — has long been among the most terrifying prospects both for the general population and for investors worried that some external event could bring to an end one of the most powerful market bull runs and American economic expansions on record.

“I don’t see falling estimate changes for economic activity or earnings. It is as if markets say, a few people have a cold so what’s the big deal? It’s a puzzle,” Cumberland Advisors chief investment officer David Kotok said before the sell-off gripped markets over the weekend.

“I feel there is more correction ahead,” he said Monday morning. “This is not a simple scenario.”

A rising stock market has been one of Trump’s biggest political selling points, and the drop in equity markets appeared to stir him into further action.

Other analysts suggested it was too soon to assess how big an impact the virus will have on economic activity around the world or on global financial markets. The Dow was down around 400 points, or 1.45 percent in late morning trading, off the low of the day. Shares in airlines and other tourism-related stocks were among the worst hit. Stocks in Europe and Tokyo were down around 2 percent.

“The economic impact of the novel coronavirus will depend on how quickly it is contained and the confidence of the public in the authorities’ ability to take effective measures,” Imogen Page-Jarrett, analyst at The Economist Intelligence Unit, said in a note to clients on Monday. “While the initial outbreak seems to have been covered up to some extent by the local government, the authorities are now responding forcefully and in a more transparent manner than they did during the SARS outbreak. SARS persisted for around six months from its outbreak in December 2002 to its dissipation, with March 2003 representing a nadir in terms of its economic impact. This latest outbreak could follow a similar trajectory, suggesting that the impact is likely to be most concentrated in the first and second quarters of 2020.”

Chinese consumer spending — which can have a direct impact on a U.S. and global economy that sells heavily into the Chinese market — is likely to take a hit, according to analysts.

“There should be no doubt that this will seriously impact the Chinese (and global) economy significantly,” Richard Bernstein of RB Global Advisors said in an email Monday morning. “However, one should expect that the government will respond with even more monetary and fiscal stimulus. One should always extend one’s time horizon when investing in China, and this will clearly be the case. The important question is what China’s economy will look like in a year, and not in a quarter. Everyone should realize right now that the next quarter or even two will

look miserable.”

Kotok said the global path of the virus will be a top concern for investors in the days ahead.

“If we see an outbreak, or a cluster of cases in a mature economy like the U.S. or France or you name it and fear is no longer attached to China but spreads, then I think this really tanks markets,” he said. “Then you see a global fear and global slowdown and rightfully so. I’m walking around conferences and I’m the only one wearing a mask. Complacency is a very grave danger in this type of risk environment.”

Subject:	Message from the ASH: 2019 Novel Coronavirus (2019-nCoV) Deployments and Uniform of the Day
Date:	2020/01/27 13:58:34
Priority:	Normal
Type:	Note

Dear Commissioned Corps Officers,

As we position ourselves to assist with controlling the spread of the 2019 Novel Coronavirus (2019-nCoV), this is official notification that officers assigned to HHS agencies are being deployed without supervisor approval.

Commissioned Corps Directive (CCD) 121.02, Deployment and Readiness, states that the Assistant Secretary for Health can deploy officers assigned to an HHS OPDIV/STAFFDIV without supervisor approval. Officers assigned to non-HHS Agencies will continue to be deployed in accordance with the Memorandum of Agreement/Understanding between the Commissioned Corps and the non-HHS Agency.

As Commissioned Corps officers and America's Health Responders, we stand ready to preserve public health and national security during national or global health emergencies. Answering this call is no different. Our mission is to be out the door as soon as requested; and this is an "all hands on deck" situation.

In addition, to demonstrate our readiness and to send the message that Commissioned Corps officers are equipped to help whenever called; effective Monday, February 3, 2020, the National Uniform Authority has requested that all officers wear their Operational Dress Uniform (ODUs)* until further notice.

Please know that I am sincerely grateful to each of you who answers our Nation's call to deploy.

Sincerely,

Brett P. Giroir, MD
ADM, USPHS
Assistant Secretary for Health

*Your Local Uniform Authority can prescribe a different uniform if the situations warrants (e.g., you are scheduled to attend or present at a conference).

Please do not reply to this email. This mailbox is not monitored. This is an official communication to Commissioned Corps officers of the U.S. Public Health Service from Commissioned Corps Headquarters (CCHQ). All active duty officers are automatically subscribed to this listserv based on their official email addresses as registered in the RedDOG application. For security reasons, CCHQ will not accept requests to be added to the Listserv.

From Pool report:

He then made remarks on the Coronavirus: he said there have been 60 deaths, more than 3,000 cases reported globally, and 5 known cases in the US.

"And we stand ready to help the people of China..." he said, applause drowning out the second half of his sentence.

He said the US, and CDC in particular, is taking "strong action" to deal with this virus.

Pence said US is already conducting screenings at 20 airports that make up the bulk of travel from China. State has also issued a level 4 advisory for the region.

He reiterated that the United States stands ready to assist the people of China and the world with combatting the virus.

"We will stand with them, and we will take the actions necessary to protect the American people," he added.

(Scroll down for VP on Coronavirus)

Sec. Chao delivered remarks first.

She explained that the commission's goal is to identify and remove barriers to the advancement of Asian American and Pacific Islanders, primarily focusing on education, which said said is important to AAPI families.

"This is truly a historic day," she said, saying she doesn't believe a swearing in for the commission has ever taken place in the presence of the VP and three Cabinet members.

Pence entered at 2:23 PM EDT, while Chao was wrapping up her remarks, to a round of applause.

Chao says VP and his wife Karen are "people of faith" and she has witnessed it while traveling with them to disaster areas.

VP is speaking now. He began by reintroducing Cabinet members. He referred to Scalia as the "new kid on the block," and then added he's the "new kid on the Cabinet."

He then made remarks on the Coronavirus: he said there have been 60 deaths, more than 3,000 cases reported globally, and 5 known cases in the US.

"And we stand ready to help the people of China..." he said, applause drowning out the second half of his sentence.

He said the US, and CDC in particular, is taking "strong action" to deal with this virus.

Pence said US is already conducting screenings at 20 airports that make up the bulk of travel from China. State has also issued a level 4 advisory for the region.

He reiterated that the United States stands ready to assist the people of China and the world with combatting the virus.

"We will stand with them, and we will take the actions necessary to protect the American people," he added.

He then made a few minutes of remarks about the event and the stamp.

VP wrapped up his remarks at 2:33 PM and invited those being initiated to the commission to the stage. He shook hands with them as they fanned out to his left.

"No introduction needed," he said to one person who he greeted warmly.

He then gave them the oath.

"These are great Americans. One more round of applause," he said at the end.

Speaking to everyone who wanted to individually and posing for photos before leaving at 2:38 pm EDT, he said as he left, "Thanks everybody."

Ross is speaking now.

"That swearing in was the most fun since my own," he said to laughter.

Ross asked for a moment of pause (silence) to recognize those affected by the Coronavirus.

He then stated that George Washington was born in a prior year of the rat. "I must confess, he was not Asian American," he added to laughter.

If no other pressing color to share, that we be all from me, now that the VP has departed.

The White House

Office of the Vice President

FOR IMMEDIATE RELEASE

January 27, 2020

REMARKS BY VICE PRESIDENT PENCE
AT THE WHITE HOUSE INITIATIVE ON
ASIAN AMERICANS AND PACIFIC ISLANDERS LUNAR NEW YEAR CELEBRATION

South Court Auditorium
Eisenhower Executive Office Building

2:24 P.M. EST

THE VICE PRESIDENT: Well, thank you all very much for that very warm welcome. And on behalf of the President of the United States and the First Family: Welcome to the White House. (Applause.)

And join me in thanking an extraordinary leader. I just -- as soon as I heard her voice, I had to jump out from behind the curtain. (Laughter.) She is not only the 18th Secretary of Transportation, but frankly, she is one of the most distinguished public servants in the United States of America, with an inspiring personal story. And she makes the American people and this administration proud every day. Join me in thanking Secretary Elaine Chao, will you? (Applause.) Thank you. Thank you so much, Elaine.

I'm also joined today -- I know they've already been introduced, but I just -- I have to call them out. We're talking a lot about the economy and a lot about all the great things happening. And you all are such a big part of that in so many ways, so many places around the country. But President Trump and I are so grateful for the tremendous leadership of Secretary of Commerce Wilbur Ross. Wilbur, thank you so much and thank you for being here. (Applause.)

And he's a new kid on the block -- or the new kid on the Cabinet -- but he's already hit the ground running, and he's making an incredible difference to make sure that the American people are prepared for this growing economy, we're able to have safe and productive workplaces, and to do it all in an atmosphere of freedom. Secretary of Labor Eugene Scalia, thank you so much for being here. (Applause.)

And I want to thank Chairman Mike Duncan, of the Postal Service, for the big announcement today; the Postal Service Board of Governors; and, of course, this initiative's executive director. Give Tina Smith a round of applause, as well as Michael. (Applause.) Thank you. Great job.

It is a real privilege be here with all of you to just share for a few minutes during the Lunar New Year celebration, and to take this opportunity to swear in 13 extraordinary Americans as Commissioners of the White House Initiative on Asian Americans and Pacific

Islanders.

I was looking through the list of men and women that will take the oath today, and they represent some of the most accomplished Asian Americans in this country, and they will continue to guide the development of policies that will expand opportunities.

And so we'll have them all up here in a minute, but give them a big round of applause right now, will you, please? Congratulations and thank you. (Applause.)

And while we gather here and we celebrate the immense contributions of Asian Americans, I know the hearts of many who are gathered here and those that you represent across the United States are with -- are with our -- are with the Chinese families that are being impacted. Twenty-six different provinces enduring now the impact of the coronavirus. And at present, there have been over 60 deaths. At this hour, more than 3,000 have contracted the disease globally, including five confirmed cases in the United States of America.

President Trump made it clear today that we are in close communication with China. And he has offered to President Xi the assistance of the United States of America. And we stand ready to help the people of China confront the coronavirus. (Applause.)

And to my fellow Americans, I want to assure you that our administration has taken strong action to deal with this virus. The CDC is following an aggressive plan that will enable us to identify potential cases. So I mentioned there's five confirmed cases in the United States so far. We've -- we're already conducting screening at 20 American airports, and they're the airports that receive 90 percent of all passengers from China. Any passengers who are ill will receive additional screening.

The State Department has issued a level 4 travel advisory for Wuhan, which makes it clear that no American should travel to Wuhan while this virus continues to have impact.

And so let me say once again, here in our country we're taking strong steps to see to the health and the wellbeing of the American people. But as President Trump made clear

today, the United States of America stands ready -- stands ready to assist the people of China and around the world as they deal with this virus.

And you might make a note for anyone in your sphere of influence who would have questions: You can go to [CDC.gov/Coronavirus](https://www.cdc.gov/coronavirus) for the latest information on the action of the United States.

But the people of China are in the prayers of the American people. And we will stand with them, and we will take the actions necessary to protect the American people. (Applause.)

So thank you for allowing me to address that.

We gather here this afternoon and with -- frankly, with people about the world in the midst of the Lunar New Year celebration. And it includes millions of Americans who will celebrate the Lunar New Year, and that's a great privilege for me to be able to join you in this particular moment.

And this year we've got a lot to celebrate. For one thing, how about the 2020 Lunar New Year stamp? (Applause.) I thanked him already, but Mike Duncan and Luke Grossmann of the Postal Service, thank you. I guess this is a tradition of issuing a Lunar New Year stamp. It's a small tribute to the indispensable contributions that Asian Americans have played throughout the history of this country. And this year's stamp is one more emblematic example of us celebrating that tradition.

And this year, I'm proud to report, under the leadership of President Donald Trump, as the Secretaries have no doubt already reflected, Asian Americans are prospering like never before, and the American economy is booming. (Applause.)

In fact, Americans of Asian and Pacific Island descent are the fastest-growing group in America -- growing by nearly three-quarters in just 15 years, and expected to double over the next 40 years.

And, in fact, according to the Census Bureau, household income for Asian Americans is now 40 percent higher than the national average, and rising fast. (Applause.)

The American economy is soaring, and Asian Americans are driving capital investment and growth and job creation in cities and towns, large and small, all across the land.

Over the summer, I'm told that Asian American unemployment hit the lowest level ever recorded, and it's been under 3 percent for the better part of a year. It's an incredible record of success of the American Dream. And with the help of the commissioners that we will swear in today, I know the best is yet to come for Asian Americans and those of Pacific Island descent.

You know, it's a remarkable group. I could literally go through the bios of all of the people that we'll swear in today, but they -- you really come from literally every walk of life: small businesses owners -- owners like Jan-le Low of Nevada; entrepreneurs like Grace Lee of Michigan; and public servants like Governor Eddie Calvo of Guam and Michelle Steel of California, just to name a few.

You all represent extraordinary accomplishment in your own lives and your willingness to come together to participate in this important effort. And it's only going to make it more possible for more Asian Americans and those with Pacific Island backgrounds to be able to prosper and enjoy the American Dream.

And so, with that, I want to say thank you and congratulations. Congratulations to all of those that -- who will become commissioners today. And I want to thank you for serving your country. I want to thank you for giving back. Each one of you, in your own stories, has lived the American Dream, and you're living it now.

And by your participation in the White House Initiative on Asian Americans and Pacific Islanders, you demonstrate that you want to see more; you want to see more Asian Americans and Pacific Islanders live that very same dream for their betterment and the betterment of the United States of America. And so I thank you for your service. And God

bless you. (Applause.)

With that -- with that, I'll ask all of the commissioners to join me on stage, and the secretaries will also stand. And they've got lots of tape up here, in case you don't know where you're supposed to stand. (Laughter.)

(The oath is administered.) (Applause.)

Just a heads up that the White House is coordinating a bipartisan all House Members briefing on coronavirus for tomorrow (time, location TBD).

HHS will plan send CDC, NIAID and ASPR (same briefers we sent to the Senate briefing on Friday). They will be joined on the panel by DHS and State.

The briefing will be unclassified. No press in the room.

Subject:	Novel Coronavirus Open Media Report- 27Jan2020
Date:	2020/01/27 16:25:34
Priority:	Normal
Type:	Note

UNCLASSIFIED // FOR OFFICIAL USE ONLY

Good Afternoon All,

Attached is the 27Jan20 2019 Novel Coronavirus Social Media Report.

BLUF: The number of confirmed cases and deaths are steadily increasing. Three additional US cases (for a total of 5) are confirmed, with many potential cases under investigation. Possible shortage of masks in China, with manufacturers unable to keep up with demand. Repatriation efforts underway for US citizens in Wuhan.

Epidemiology:

Traditional news media reports death toll of 80, with almost 2,800 cases confirmed across China.

Cases by location:

- o CDC reporting nCoV investigation for 100 samples in 26 states, with most expected to be negative.
- o Three new confirmed US cases (five total): Orange County, CA, Los Angeles County, CA, Maricopa County, AZ. All were travelers from Wuhan, China.
- o First cases reported in Toronto, Canada and Australia and Malaysia.

Public Health Response:

- US CDC seeking emergency approval for states' use of diagnostic test.

- Puerto Rico Health Secretary announces activation of coronavirus surveillance protocols, despite no known risk to the Puerto Rican population.
- US Senate Minority Leader Chuck Schumer to request DHHS Secretary to declare public health emergency to direct funding for CDC for nCoV.

Supply Chain:

- Price stability measure instituted by China market regulator to ensure price stability of health products related to coronavirus epidemic, to include masks, disinfection and antiseptic products, antiviral drugs and related medical devices.
- Possible shortage of protective masks and suits in China, according to China's vice minister of industry and information technology. Hubei needs 100,000 protective suits a day to outfit citizens, but manufacturers could supply only 30,000 suits a day. Concerns of mask shortages in China were reported on social media.

Evacuation/Repatriation

- Traditional media (CNN) notes evacuation of 3 dozen American diplomats and families from the US consulate in Wuhan, China. Flight will have medical personnel to treat and contain infection. CNN notes seats might be available to non-US citizens. CNN did not report the US embarkation location.
- General Administration of Customs requests that entry-exit personnel (e.g., immigration personnel) report nCoV symptoms to customs.
- CNN reports US State Department ordered travel advisory of "Level 4: Do Not Travel" for Hubei province, China. Of note, CDC's travel health notice is "Warning Level 3, Avoid Nonessential Travel" for Hubei Province. US Department of State issues "Level 3: Reconsider Travel" for China overall.

False Information and Public Sentiment

- CDC tweeted that risks of nCoV infection to the US public is low; however, based on tweet replies, public sentiment is largely skeptical given, among other things, the virus infectivity characteristics (e.g., long incubation time, spread in absence of symptoms).
- Mayor of Wuhan, China offers to resign over coronavirus outbreak.
- Anti-HIV medications (notably lopinavir/ritonavir) rumored to be effective in treating coronavirus, according to statement from Beijing Municipal Health Commission. Three Beijing hospitals begun using anti-HIV medications as part of treatment. No treatment has yet been proven. Suggested therapeutic benefit based on SARS-CoV epidemiological study.

Please see the attached Open Media Report for additional information. This message was distributed to ASPR SLT, SOC Section Chiefs, SOC Leadership, and appropriate SMEs.

Schumer: CDC needs to access funding to fight coronavirus ... Posted Jan 26, 1:40 PM

<https://www.silive.com/news/2020/01/schumer-cdc-needs-to-access-funding-to-fight-coronavirus.html>

-

I have received ZERO cooperation on this request (below): **Let's talk? 740-366-9013 Clark Tibbs**

-
Just for the USA alone, we will need **700 MILLION DOSES**. We claim, Quality, Speed and Volume compared to other Vaccine claims.
-

Hello Whistleblower.Coordinator@oig.hhs.gov and **ALL US Senators**

... I think this is an Emergency

..... **please call these people and ask them if and when they plan to fund this nVoC Vaccine Offer?**

Subject: To US SENATE & CDC & BARDA & AHRQ & NIH & VHA :: 56+ DEAD+2,000+ CASES :: Re-send VACCINE OFFER :: T-4 Lambda Phage Head Vaccine Platform vs. the 2019-nCoV Virus ... Jan 26

Hello Selected **US Senate** Staff Members and CDC and BARDA and AHRQ and NIH and VHA,

-
Sen. Schumer: CDC needs to access funding to fight coronavirus ... Jan., 26, 2020 at 1:40pm ET
<https://www.silive.com/news/2020/01/schumer-cdc-needs-to-access-funding-to-fight-coronavirus.html>
-

-
STATEN ISLAND, N.Y. -- Senator Charles Schumer (D-New York) wants the Centers for Disease Control (CDC) to use funding he allocated to fight the spread of the deadly coronavirus, for which there are three confirmed cases in the United States.
-

Schumer recently negotiated a budget deal that put **\$85 million** in the CDC Infectious Disease Rapid Response Reserve Fund to ward off serious public health threats. He wants the CDC to be able to access these funds now. But for that to happen, a “public health emergency” must be declared by the U.S.

Department of Health and Human Services (HHS).

- Our Team of Experts will need **\$2 million** of this **\$85 million** - All of the vaccine-protection money will go directly to these Authors.
-

My name is Clark Tibbs in Ohio. I hope to hear from you and your Team with any questions and how you and/or any PhDs, MDs, DOs or MBBSs can participate in this **Vaccine Development** and **Clinical Trial**.

=====

Hello Whistleblower.Coordinator@oig.hhs.gov and **ALL US Senators**

... I think this is an Emergency

..... please call these people and ask them **if and when** they plan to fund this **nVoC Vaccine Offer?**

-
Special Assistant to AFauci@NIAID.NIH.GOV ... Patty Conrad at (301) 496-6416 conradpa@niaid.nih.gov

-
I hope that NIH is funding several **nCoV vaccine candidates** that include a few vaccine candidates that use this T-4 Phage Head Vaccine Platform ... ??? Please see this Attachment.

-
Question: Can ... **BARDA** and/or **AHRQ** assist with some of the Emergency Funding?

10th January 2020

This posting is communicated by Edward C. Holmes, University of Sydney on behalf of the consortium led by Professor Yong-Zhen Zhang, Fudan University, Shanghai

The Shanghai Public Health Clinical Center & School of Public Health, in collaboration with the Central Hospital of Wuhan, Huazhong University of Science and Technology, the Wuhan Center for Disease Control and Prevention, the National Institute for Communicable Disease Control and Prevention, Chinese Center for Disease Control, and the University of Sydney, Sydney, Australia is releasing a coronavirus genome from a case of a respiratory disease from the Wuhan

outbreak. The sequence has also been deposited on [GenBank](#) (accession MN908947) and will be released as soon as possible.

The sequence can be downloaded here:

[WH-Human_1.fasta.gz](#) (8.9 KB – this is a fasta file compressed using gzip. Uncompress using `gzip -d WH-Human_1.fasta.gz`)

Disclaimer:

Please feel free to download, share, use, and analyze this data. We ask that you communicate with us if you wish to publish results that use these data in a journal. If you have any other questions –then please also contact us directly.

Professor Yong-Zhen Zhang,
Shanghai Public Health Clinical Center & School of Public Health,
Fudan University, Shanghai, China.

=====

Look at this ... '**dreadful**' ... and globally-important Report:

Report 2: Estimating the *potential total number* of novel Coronavirus cases in Wuhan City, China
<https://www.imperial.ac.uk/mrc-global-infectious-disease-analysis/news--wuhan-coronavirus>

-
-

Imperial College London today in a new estimate of 2019-nCoV activity in Wuhan said the city probably now has **4,000 symptomatic cases**. **The report's 95% confidence interval ranges from 1,000 to 9,700.**

-

From: <https://www.imperial.ac.uk/news/194815/coronavirus-outbreak-china-have-infected-thousands>

-

Calculations:

The report estimates that a total of **1,723 cases** of 2019-nCoV in Wuhan City had onset of symptoms by 12th January 2020 (the last reported onset date of any case before the report's publication).

This estimate is based on the following assumptions:

- Wuhan International Airport has a catchment population of **19 million individuals**.
- There is a mean 10-day delay between infection and detection, comprising a 5-6 day incubation period and a 4-5 day delay from symptom onset to detection/hospitalisation of a case (the cases detected in Thailand and Japan were hospitalised 3 and 7 days after onset, respectively).
- Total volume of international travel from Wuhan over the last two months has been **3,301 passengers per day**. This estimate is derived from the 3,418 foreign passengers per day in the top 20 country destinations based on 2018 IATA data, and uses 2016 IATA data held by Imperial College to correct for the travel surge at Chinese New Year present in the latter data (which has not happened yet this year) and for travel to countries **outside the top 20 destination list**.

The report concludes it is likely that the **Wuhan outbreak** of a novel coronavirus has caused substantially more cases of moderate or severe respiratory illness than currently reported.
