

Case No. 2020-00717-FOIA-OS
American Oversight v. HHS, Civil No. 20-1169

February 7, 2024

Austin Evers
Executive Director
American Oversight
Sent via email: foia@americanoversight.org

Dear Mr. Evers:

This letter is the thirty third interim response to your March 18, 2020, Freedom of Information Act (FOIA) request.

American Oversight requests that HHS produce the following records as soon as practicable, and at least within twenty business days:

All email communications (including email messages, complete email chains, email attachments, calendar invitations) sent by the government officials specified below containing any of the following key terms:

1. Coronavirus
2. Corona
3. Virus
4. Disease
5. Pandemic
6. Epidemic
7. Outbreak
8. containment
9. "public health emergency"
10. "COVID-19"
11. "COVID 19"
12. COVID19
13. SARS
14. "2019-nCoV"
15. POTUS
16. Test
17. Tests
18. Testing
19. EUA
20. Emergency
21. Wuhan
22. Hoax
23. Hubei
24. Princess
25. Cruise
26. Kirkland
27. Seattle
28. "New Rochelle"
29. "BioGen Conference"
30. CPAC
31. AIPAC
32. RNA

33. "Extraction kits"
34. Roche
35. Vaccine
36. Antiviral
37. Antiretroviral
38. Quarantine
39. Distancing
40. Isolation
41. N95
42. Mask
43. Respirator

Government Officials

1. Alex Azar, Secretary
2. Brian Harrison, Chief of Staff
3. Eric Hargan, Deputy Secretary
4. Jerome Adams, Surgeon General
5. Robert Kadlec, Assistant Secretary for Preparedness and Response
6. John Brooks, Senior Advisor to the Secretary for Drug Pricing Reform

On February 10, 2021, you narrowed your request per the following:

Eliminate attachments, documents regarding "Red Dawn" and obvious marketing and news bulletins

- a. Limit the date range of the following key terms as stand-alone search terms from January 15, 2020 through February 29, 2020. ~~[[Limit responsive records to those that also include: (Test OR Tests OR Vaccine OR EUA OR "Emergency Use" OR Shortage OR Shortages OR Supplies OR "the WHO" OR States OR Governor OR Governors OR PPE OR Ventilators OR Respirators OR Swabs OR DPA OR "Defense Production Act" OR Trump OR Pence OR Jared OR Kushner OR "White House" OR "the WH")]]]~~

- i. Coronavirus
- ii. Corona
- iii. "COVID-19"
- iv. "COVID 19"
- v. COVID19
- vi. "2019-nCoV"

~~vii. SARS~~

~~viii. Epidemie~~

~~ix. Pandemie~~

~~x. Outbreak~~

~~xi. "Public Health Emergency"~~

-

- b. After March 1, 2020, for the key terms listed in Column A below (the same search terms as identified above), limit responsive records to those that also include one or more of the terms from Column B:

Column A	Column B
• Coronavirus • Corona • “COVID-19” • “COVID 19” • COVID19 • “2019-nCoV” • SARS • Epidemic • Pandemic • Outbreak • “Public Health Emergency”	• Test • Tests • Vaccine • Antiviral • Antiretroviral • EUA • “Emergency Use” • Shortage • Shortages • Supplies • “Emergency Use” • EUA • “the WHO” • “W.H.O.” • “World Health Organization” • States • Governor • Governors • PPE • Ventilators • Respirators • Swabs • DPA • “Defense Production Act”

- c. For the key terms that are in Column A below, limit responsive records to those that also include one or more of the terms from Column B, for the full time period of the search.

Column A	Column B
• Test • Tests • “Extraction Kits”	• CV19 • “CV-19” • C19 • “C-19” • Roche • RNA • Shortage • Shortages • Supplies • “Emergency Use” • “EUA” • “the WHO” • “W.H.O.” • “World Health Organization” • States • Governor • Governors • Kit • Kits • DPA • “Defense Production Act”

- d. ~~[~500 records] For the key terms that are in Column A below, limit responsive records to those that also include one or more of the terms from Column B, for the full time period of the search.~~

Column A	Column B
---------------------	---------------------

• Vaccine • Antiviral • Antiretroviral	• CV19 • “CV-19” • C19 • “C-19” • “EUA” • “Emergency Use” • “DPA” • “Defense Production Act” • “the WHO” • “W.H.O.” • “World Health Organization”
--	---

e. ~~[<50 records] For the key term “Emergency” limit responsive records to those that also include “DPA” or “Defense Production Act,” for the full time period of the search.~~

f. For the following key terms, please limit the time period as indicated:

i. Princess - February 1, 2020, through March 1, 2020 ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]]~~

~~ii. [~~150 records~~] Kirkland February 24, 2020, through March 24, 2020~~

~~iii. [~~750 records~~] Seattle February 24, 2020, through March 24, 2020~~

~~iv. [~~200 records~~] “New Rochelle” March 1, 2020, through March 31, 2020~~

~~v. [~~<50 records~~] “BioGen Conference” March 1, 2020, through March 31, 2020~~

~~vi. [~~50 records~~] CPAC February 21, 2020, through March 21, 2020~~

~~vii. [~~<50 records~~] AIPAC February 21, 2020, through March 21, 2020~~

g. For the following key terms, please run the search without any modifiers and using the full date range (i.e., no changes from original search)

i. Wuhan ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]]~~

ii. Hoax ~~[[no changes]]~~

iii. Hubei ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]]~~

iv. POTUS ~~[[no changes]]~~

v. Cruise ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]]~~

vi. Quarantine ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]]~~

vii. Distancing ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]]~~

~~viii. Isolation~~

ix. N95 ~~[[Limit responsive records to those that also include: (CV19 OR “CV-19” OR C19 OR “C-19” OR Shortage OR Shortages OR Supplies OR “Emergency Use” OR “EUA” OR “the WHO” OR States OR Governor OR Governors OR DPA OR “Defense Production Act” OR Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]]~~

x. Mask ~~[[Limit responsive records to those that also include: (CV19 OR “CV-19” OR C19 OR “C-19” OR Shortage OR Shortages OR Supplies OR “Emergency Use” OR “EUA” OR “the WHO” OR States OR Governor OR Governors OR DPA OR “Defense Production Act” OR Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]]~~

xi. Respirator ~~[[Limit responsive records to those that also include: (CV19 OR “CV-19” OR C19 OR “C-19” OR Shortage OR Shortages OR Supplies OR “Emergency Use” OR “EUA” OR “the WHO” OR States OR Governor OR Governors OR DPA OR “Defense Production Act” OR Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]]~~

xii. ~~xiii. Containment~~

h. Cut the following key terms completely: [[no changes]]

- i. Disease
- ii. Virus

The Department processed **403 pages** of potentially responsive records captured in the agency's search for FOIA request 2020-00717-FOIA-OS. After a careful review of these pages, I have determined to release **180 pages** to you in their entirety and I am further releasing in part **76 pages**, with portions redacted, pursuant to Exemptions (b)(5) and (b)(6) of the FOIA (5 U.S.C. §552 (b)(4), (b)(5), and (b)(6)). Furthermore, I have determined that **147 pages** should be sent for consultation to others and returned to this Department for final disposition.

FOIA exemption (b)(5) protects inter-agency or intra-agency memoranda or letters which would not be available by law to a party other than an agency in litigation with the agency. This exemption protects documents that would be covered by any privilege an agency could assert in a civil proceeding. These privileges include, among others, the deliberative process privilege, the attorney-client privilege, the attorney work-product privilege and the presidential communications privilege. I have considered the foreseeable harm standard when reviewing these records and applying the (b)(5) exemption.

FOIA exemption (b)(6) permits a federal agency to withhold information and records about individuals in "personnel and medical files and similar files, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." The definition of "similar files" has historically been broadly interpreted to include a wide variety of files, and the United States Supreme Court has held that Congress intended the term "similar files" to be interpreted broadly, rather than narrowly. I have analyzed these records and find they meet the threshold requirement of this exemption. Additionally, I have reviewed and weighed the public interest in disclosure of this information against the privacy interest in nondisclosure and found that the privacy interest outweighs the public's interest in disclosure.

I have found that it is reasonably foreseeable that disclosure would harm an interest protected by one or more of the exemptions to the FOIA's general rule of disclosure and/or that disclosure is prohibited by law.

We will continue to review the remaining records as efficiently and expeditiously as possible, consistent with our available resources. Should you have questions or concerns regarding the Department's response and/or the processing of your request, any such issues should be communicated to your legal counsel and Department of Justice Attorney representing the Department in this matter.

Sincerely yours,

Alesia Y.

Subject: ONS Update 01/29/2020 - Wuhan Conoravirus

ALCON –

Wuhan coronavirus has now reached 6,000 cases worldwide – 29 January 2020

- The latest numbers: At least 132 people are dead and more than 6,000 cases have been confirmed in mainland China, as the Wuhan coronavirus spreads across Asia and the rest of the world.
- China on lockdown: Nearly 60 million people are under partial or full lockdowns in Chinese cities.
- Global spread: There are 91 confirmed cases outside of China, including at least five in the US.
- The number of confirmed cases of the Wuhan coronavirus in China has now officially exceeded that of the severe acute respiratory syndrome (SARS) outbreak in 2002 and 2003. While the current coronavirus outbreak does not appear to be as deadly as SARS, it may be spreading more rapidly. That could be due to being more contagious, or the increased interconnectedness of both China and the world than in 2003.

Americans Evacuated From Wuhan Pass Coronavirus Health Screening Test Upon Return to U.S. – 29 January 2020

- Evaluation Only. Created with Aspose.HTML. Copyright 2013-2020 Aspose Pty Ltd. f a virus outbreak continued Wednesday on to Southern California after everyone aboard passed a health screening test in Anchorage, where the aircraft had stopped to refuel.
- All 201 passengers had already been through two screenings in China and were screened twice more in Anchorage by the Centers for Disease Control and Prevention. One passenger received medical attention for a minor injury that happened before boarding the airplane in China, according to a news release from Alaska's Department of Health and Social Services.
- The plane is now scheduled to land at March Air Reserve Base in California's Riverside County, instead of the original plan to go to Ontario International Airport in neighboring San Bernardino County.
- Curt Hagman, an Ontario airport commissioner, said the Centers for Disease Control announced the diversion. "We were prepared but the State Department decided to switch the flight" to the airbase, Hagman said.
- Officials at the Ontario airport 35 miles (56 kilometers) east of Los Angeles had been readying facilities to receive and screen the repatriates and temporarily house them for up to two weeks — if the CDC determined that is necessary, said David Wert, spokesman for the county of San Bernardino.
- Ontario International Airport was designated about a decade ago by the U.S. government to receive repatriated Americans in case of an emergency overseas, but it would have been the first time the facility was used for the purpose, Wert said.

China Testing HIV Drug as Treatment for New Coronavirus, AbbVie Says – 26 January 2020

- China is testing an HIV drug as a treatment for symptoms of the new coronavirus that is rapidly spreading, said drugmaker AbbVie Inc on Sunday.

- China health authorities requested the drug to help with the government's efforts to address the crisis, according to Adelle Infante, a spokeswoman for North Chicago, Illinois-based AbbVie.
- Aluvia, which is also known as Kaletra, is a combination of lopinavir and ritonavir.
- In guidance published on Thursday (1/23), the Chinese government said there is no effective anti-virus medicine but suggested taking two lopinavir/ritonavir pills and inhaling a dose of nebulized alpha-interferon twice a day.
- Guangfa Wang, a Beijing-based pulmonary expert who contracted the virus after visiting Wuhan for an investigation, told China's Time-Weekly that he took Aluvia as part of his treatment and it appeared to be effective in his case. Shanghai officials said they have adopted this type of HIV drugs since their first patient.
- "So far it seems to have certain effects, but we need more clinical observation," said Hongzhou Lu of the Shanghai Public Health Clinical Center.
- The theory, yet to be proven, is that Aluvia works by blocking a protease that the coronavirus needs for reproduction in the human body. Though it's not the same protease that the drug was originally designed to block, it might be similar enough to delay disease progression. Because of that, Aluvia had previously also been tested in patients with SARS and MERS. During the SARS outbreak in 2003, it appeared in clinical trials. At that time, 41 patients with SARS in Hong Kong were treated for three weeks. The treatment plan was "lopinavir / ritonavir tablets" + ribavirin. The trial found that after treatment, the mortality rate was only 2.4%. In the Hong Kong hospital where the researcher is located, 111 SARS patients have been routinely treated, and the mortality rate is 28.8%. If the conventional treatment (taking ribavirin) is used, about 12 of the 41 patients will die, but using "Luo "Pinavir / ritonavir tablets" + ribavirin, only one died.
- An anonymous Wuhan doctor interviewed by Time-Weekly said that Aluvia is useful against the novel coronavirus, but it's "hard to come by."
- AbbVie said on WeChat that it will donate RMB\$10 million (around \$1.44 million) worth of pills in response to the guidance, though it didn't specify how it would distribute across the country.

Coronavirus grown in Australian laboratory hailed 'breakthrough' in race to develop vaccine – 29 January 2020

- Australian scientists have replicated the deadly coronavirus in laboratory conditions in a medical breakthrough that could give health experts crucial information to combat the virus.
- Researchers at Melbourne's Peter Doherty Institute for Infection and Immunity have become the first to recreate the virus outside of China.
- The lab-grown virus - which was developed from an infected patient - will be shared with the World Health Organisation before being given to labs across the globe.
- The Royal Melbourne Hospital's Dr Julian Druce, Virus Identification Laboratory Head at the Doherty Institute, said this was a significant breakthrough.

Airlines around the world are suspending flights to China as the coronavirus spreads – 29 January 2020

- Airlines based in North America, Europe and Asia are canceling flights to China as authorities there seek to contain the spread of the Wuhan coronavirus.
- British Airways, United Airlines, Air Asia, Cathay Pacific, Air India and Finnair have announced plans to slash the number of flights they are operating to China or stop flying to the country entirely. Other airlines are offering customers refunds on flights to China.
- Airlines are taking action as the deadly coronavirus continues to spread. The virus has killed 132 people and infected over 6,000 people in China so far, with dozens more cases confirmed in places such as the United States, Japan, Germany and France.
- British Airways, which is owned by International Airlines Group (IAGG), said Wednesday that it has suspended all direct flights between Britain and China with immediate effect after the UK Foreign Office warned against all but essential travel to China.

WHO says governments can decide whether to evacuate citizens – 29 January 2020

- The World Health Organization said Wednesday it was up to individual governments to decide whether to evacuate their citizens from China amid the outbreak, Reuters reported. The statement came after WHO director general Tedros Adhanom Ghebreyesus expressed his confidence in China's preventive measures and advised against countries evacuating their citizens.
- Xinhua news agency quoted Tedros as saying that WHO "does not recommend the evacuation of nationals, and called on the international community to remain calm and not overreact." But on Wednesday, spokesman Tarik Jasarevic told Reuters that "If countries want to evacuate their nationals from Wuhan, WHO's position is that this is a matter for their governments to decide."
- Japan and the United States have both evacuated 200 of their citizens from Wuhan in chartered flights. Several other countries have announced plans to move their nationals out as well.

Coronavirus: Britons on Wuhan flights to be quarantined – 29 January 2020

- The UK government plans to fly 200 British citizens out from Wuhan, the centre of the new coronavirus outbreak, on Thursday.
- BBC health editor Hugh Pym said that Health Secretary Matt Hancock has instructed officials to put them in quarantine for two weeks - possibly at a UK military facility.
- Those returning from other parts of China will not be affected, but have been advised to "self-isolate" for 14 days.

- Australia plans to quarantine its 600 returning citizens for two weeks on Christmas Island - some 2,000km (1,200 miles) from the mainland.

Australia plans island quarantine as foreigners leave Wuhan – 29 January 2020

- Australia plans to quarantine its evacuees on Christmas island 2,000km (1,200 miles) from the mainland. Australia's 600 evacuees will be held on Christmas Island for two weeks, Prime Minister Scott Morrison said.
- The announcement sparked controversy as the island is best known for a recently reopened immigration detention centre, which was criticised for its conditions.
- Currently only housing one Sri Lankan family of four, the facility was built to accommodate more than 1,000 people.
- New Zealand will co-operate with Canberra to bring its 53 citizens home alongside the Australian evacuees.

With nearly 5,000 students in Wuhan, African governments are bracing for China's coronavirus – 29 January 2020

- African officials are scrambling to prepare the Wuhan coronavirus potential spread among Africans living in China.
- There are an estimated 4,600 students from African countries studying in Hubei province where the capital city of Wuhan has become the ground zero for the deadly virus' spread, according to Development Reimagined, an international development consultancy in Beijing. But there are also other African nationals in Hubei province outside the academic community.
- Some African students have traveled back to their country of origin during the holiday vacation. Two days ago, a 34- year old student arriving on a flight from Beijing to the Ivory Coast was hospitalized after displaying flu-like symptoms. She is currently still in the hospital for testing.
- No cases of African nationals contracting the virus within China have been reported. But, that could change quickly. Though Africans students are receiving support from their universities, African nationals living and working in China independent of the university system remain vulnerable. The major issue is that the true burden of ensuring the safety of African nationals falls on the shoulders of African governments themselves, a task that is proving difficult.
- At present, there is no African government with an embassy or consulate in Wuhan, leaving officials to rely on support from the consulates including France, Korea, US, UK on the ground in the city.

UAE confirms four cases of Wuhan coronavirus – 29 January 2020

- The United Arab Emirates has confirmed four cases of the coronavirus, the UAE's Ministry of Health and Prevention said in a statement Wednesday. The four reported cases are all within a single Chinese family from Wuhan, the ministry said. "The general health situation is not a cause of concern," the ministry said.

Singapore confirms 3 more Wuhan virus cases, bringing total to 10; all are from Wuhan – 29 January 2020

- There are three new cases of Wuhan coronavirus infection in Singapore, said the Health Ministry (MOH) on Wednesday (Jan 29), bringing the total number in the country to 10. Like the previous cases, all three are Chinese nationals from Wuhan, and there has been no evidence of the virus spreading in the community yet.
- The eighth and ninth cases are husband and wife, both 56 years old. They arrived in Singapore on Jan 19, and are currently warded in isolation rooms at the National Centre for Infectious Diseases (NCID). Both reported that they had no symptoms during the flight to Singapore. They developed symptoms on Friday and took a taxi to Tan Tock Seng Hospital on Monday. The couple were classified as suspect cases and immediately isolated at NCID, said MOH.

Wuhan's new hospitals rising fast to meet deadly virus's threat – 29 January 2020

- The first hospital, containing 1,000 beds, is due to be ready to take in its first patients next Tuesday, just 11 days after work began. Around 2,000 medical workers are expected to treat patients, the Xinhua News Agency said.
- It will be built with prefabricated buildings around a holiday complex originally intended for local workers.
- China, which has a reputation for throwing huge resources at problems, has said it will build four hospitals in total.

J&J begins development of coronavirus vaccine – 29 January 2020

- Johnson & Johnson JNJ, -0.08% announced Wednesday that it has initiated development of a vaccine against the new coronavirus, 2019-nCoV, as part of its "multi-pronged" response to the outbreak of the deadly virus. The consumer products and drug giant said it will leverage the AdVac and PER.c6 technologies of its Janssen Pharmaceuticals Companies, which were used to develop and manufacture Janssen's Ebola vaccine currently in use, and to develop its Zika and HIV vaccine candidates. J&J said it will also review known pathways in coronavirus pathophysiology to determine whether previously tested medicines can be used to reduce the severity of 2019-nCoV. "We are collaborating with regulators, healthcare organizations, institutions and communities worldwide to help ensure our research platforms, existing science and outbreak expertise can be maximized to stem this public health threat," said J&J's Chief Scientific Officer Paul Stoffels.

Jack Ma donates \$14 million to develop coronavirus vaccine – 29 January 2020

- Jack Ma, Alibaba (BABA) founder and China's richest man, has donated 100 million yuan (\$14.4 million) through his foundation to help find a vaccine for the Wuhan coronavirus. The billionaire has earmarked 40 million yuan (\$5.8 million) for two Chinese government research organizations, according to a social media post from the Jack Ma Foundation.
- The remainder of the funds will be used to support "prevention and treatment" measures, the foundation said. The donation follows an announcement on Saturday by Alibaba that it is setting up a 1 billion yuan (\$144 million) fund to buy medical supplies for Wuhan and Hubei province, the epicenter of the virus outbreak.
- The company is also offering free AI computing power to scientific research organizations to support the search for a vaccine or treatments. Alibaba is one of a host of Chinese technology companies donating funds to coronavirus treatment efforts, according to state-owned newspaper China Daily.

In coronavirus response, AI is becoming a useful tool in a global outbreak, data experts say – 29 January 2020

- Artificial intelligence is not going to stop the new coronavirus or replace the role of expert epidemiologists. But for the first time in a global outbreak, it is becoming a useful tool in efforts to monitor and respond to the crisis, according to health data specialists.
- In prior outbreaks, AI offered limited value, because of a shortage of data needed to provide updates quickly. But in recent days, millions of posts about coronavirus on social media and news sites are allowing algorithms to generate near-real-time information for public health officials tracking its spread.
- "The field has evolved dramatically," said John Brownstein, a computational epidemiologist at Boston Children's Hospital who operates a public health surveillance site called healthmap.org that uses AI to analyze data from government reports, social media, news sites, and other sources.
- "During SARS, there was not a huge amount of information coming out of China," he said, referring to a 2003 outbreak of an earlier coronavirus that emerged from China, infecting more than 8,000 people and killing nearly 800. "Now, we're constantly mining news and social media." Brownstein stressed that his AI is not meant to replace the information-gathering work of public health leaders, but to supplement their efforts by compiling and filtering information to help them make decisions in rapidly changing situations.

Subject:	RE: Joint statement on nCoV data sharing
Date:	2020/01/29 10:18:09
Priority:	Normal
Type:	Note

Let me start some internal work here to find out. Definitely interested to know if ASPR/BARDA wants to sign onto this?

One question I have is that this doesn't address the quality of the research – the vast majority of what we are seeing is not peer-reviewed from China and some of it is #*\$&. Would we want to insert a word or phrase that promotes "quality" or "peer-reviewed" (which I know causes a delay in publication). Just a thought on first read.

Will circle back on process. Thx for sharing.

Subject: Fwd: Joint statement on nCoV data sharing

Bob and Larry,

See note below from Jeremy Farrar (Wellcome Trust). NIH, usaid, and CDC are already on the list. Is this something that hhs in general or aspr or barda or ??? Would be able to sign?

Please note the short timeline for response. Please advise. What is the process for consideration and clearance?

Thank you. Rick.

Begin forwarded message:

Subject: Joint statement on nCoV data sharing

Dear Rick,

Wellcome is coordinating a joint statement to commit to rapid and open sharing of research findings and data relevant to the coronavirus outbreak – this updates a 2016 statement on data sharing in public health emergencies. Further details follow below. We are asking organisations who signed the original statement to recommit to these principles and were wondering if your organisation would be willing to join as a signatory? We are launching the statement before the end of tomorrow, so please let us know by 14:00 GMT on Thursday 30 January if you would like to sign.

Heard back from most of the list below now and all agreed to join. Not a “Wellcome” statement, one from all of us...

With best wishes

Jeremy

PROPOSED JOINT STATEMENT

Sharing research data and findings relevant to the novel coronavirus (nCoV) outbreak

The outbreak of the novel coronavirus in China (2019-nCoV) represents a significant and urgent threat to global health.

We call on researchers, journals and funders to ensure that research findings and data relevant to this outbreak are shared rapidly and openly to inform the public health response and help save lives.

We affirm our commitment to the principles set out in the 2016 [Statement on data sharing in public health emergencies](#), and pledge to ensure that the World Health Organization has rapid access to emerging findings that could aid the global response.

Specifically, we commit to work together to ensure:

- all peer-reviewed research publications relevant to the outbreak are made immediately open access

- • research findings relevant to the outbreak are shared immediately with the WHO upon journal submission, with author approval
- • research findings are made available via preprint servers at or before journal submission, or via platforms that make papers openly accessible before peer review – with clear statements regarding the availability of underlying data
- • interim and final research data relating to the outbreak are shared as rapidly and widely as possible, including with public health and research communities and the WHO
- • journals are clear that data or preprints shared ahead of submission will not pre-empt its publication in these journals

We will apply the principles of this statement to similar outbreaks in the future where there is a significant public health benefit to ensuring data is shared widely and rapidly. We urge others to make the same commitments. If your organisation is committed to supporting these principles, please contact us (d.carr@wellcome.ac.uk) and we will add your organisation to the list of signatories

Subject:	Public Health and Medical Services Conference Call (2020 Novel Coronavirus)
Date:	2020/01/29 10:42:49
Priority:	Normal
Type:	Note

Good Morning,

This email is intended to inform everyone that the Public Health and Medical Services Conference Calls will be weekly. These will occur on Monday with a tentative time of 1100ET.

An invite will be sent to all to inform of the exact time once confirmed by ASPR Leadership.

Very Respectfully,

Richard C. Shull, Jr.

Chief (acting) – Watch Section

Secretary's Operations Center (SOC)

U.S. Department of Health and Human Services (HHS)

Assistant Secretary for Preparedness and Response (ASPR)

200 Independence Ave S.W.

Washington D.C. 20201

Office: (202) 619 - 7800

Cell:

Fax: 1-800-514-4256

Email:

cid:image001.png@01D5D0FC.C9CF7510

'Block grants' no more: Trump's Medicaid overhaul has new name, same goals

By Dan Diamond, Rachel Rouben

01/29/2020 10:55 AM EST

The Trump administration's Medicaid block grant plan will rebrand the controversial policy and prescribe new oversight measures meant to guard against expected lawsuits from patient advocates, according to two officials with knowledge of the plan set for release Thursday.

The block grant program comes with a new name — “Healthy Adult Opportunity” — but retains the original mission long sought by conservatives: allowing states to cap a portion of their spending on Medicaid, a radical change in how the safety net health program is financed.

The block grant plan, which invites states to request capped funding for poor adults covered by Obamacare's Medicaid expansion, also would let states limit health benefits and drugs available to some patients.

Medicaid advocates already have vowed to make the block grant an issue in this year's election, particularly after President Donald Trump repeatedly pledged to protect Medicaid during his 2016 campaign. Democrats have also long warned the Trump administration that they would vigorously oppose any effort to cap Medicaid spending after Congress rejected the idea during the failed effort to replace Obamacare.

"The administration should not issue any guidance encouraging block grant waivers, should reject these waivers and the concept of block grants, and urge any state that is considering this misguided policy to commit its energy to implementing Medicaid as Congress intends," three

dozen House Democrats warned the administration in a letter shared with POLITICO on Wednesday morning.

But the plan, which Medicaid chief Seema Verma developed for over a year, is seen as a significant step for conservatives who have sought to constrain the safety net program as it has grown to cover about 1 in 5 Americans. Verma has also framed the plan to colleagues as a signature initiative of her tenure — a priority that took on more urgency after her feud with HHS Secretary Alex Azar spilled into public view last month, putting both of their jobs at risk.

Azar will be alongside Verma at Thursday's announcement, said three people with knowledge of the event, in a display of support for her proposal. HHS and CMS declined to comment.

Aware of criticism that any cap on Medicaid funding would target vulnerable patients, Verma will stress during Thursday's announcement that her plan, by focusing just on the Obamacare expansion, will not affect the poorest or disabled patients. Verma has long argued Medicaid expansion is siphoning away resources from the most vulnerable patients covered by the program. CMS will frame the block grant as a way for states to reinvest any savings into care improvements for Medicaid beneficiaries.

States will be required to report their performance in real time, such as whether Medicaid patients see declines in access to providers or health outcomes, which one official said would allow the administration to gauge whether the block grant was truly working to make adults healthier. One official said this could help CMS guard the program against promised legal challenges from advocates who say the administration doesn't have the authority to cap Medicaid spending.

A previous overhaul authored by Verma — a sweeping effort to impose work requirements on Medicaid beneficiaries — has largely been stalled after a federal judge said the health department failed to consider whether the work rules would meet a statutory program goal of improving patient health.

However, officials are still bracing for the new block-grant plan to be tied up in litigation, perhaps for the remainder of the president's current term. Some officials also have raised questions about the need to hold the announcement amid the Wuhan coronavirus virus outbreak and closely ahead of Trump's State of the Union address next week.

Verma has argued that the program is necessary because it would deliver flexibility sought by GOP-led states, allowing them to rapidly overhaul their Medicaid programs through expedited versions of the program's current 1115 waiver process. For instance, states could set new limits on benefits available to Medicaid beneficiaries, although would still need to meet minimum requirements set by the federal government.

The Trump administration also will allow participating states to limit the drugs offered by their Medicaid programs, a sticking point for states frustrated by requirements that the safety net program include an expansive list of medications. Patients with behavioral health needs or HIV would be protected under the Trump administration plan, said one official.

Verma's new plan has been sought by Republican leaders like Oklahoma Gov. Kevin Stitt, who

is attending Thursday's rollout and is finalizing a plan to reshape his state's Medicaid program. Stitt has criticized an ongoing effort to expand Medicaid through a ballot initiative, arguing instead that a block grant would be a better way to maximize the program's benefits while controlling costs.

At Thursday's event, "the Governor will share how [the] Trump administration's announcement will help shape the finalization of his Oklahoma plan," a spokesperson for Stitt wrote in an email.

Hi Arwenithia,

First, Sarah Arbes, the Acting Assistant Secretary for Legislation has requested a ride with Dr. Kadlec tomorrow morning if that is okay. I mentioned she should be in the (b)(6) suite by 8:30. Second, updated talking points are attached (Dr. Kadlec requested these this afternoon).

I do not have CIA participants at this time (if I get after regular business hours, I will forward). I also left a blank for the classified component...

Julie

Just spoke with SSCI, who noted tomorrow's briefing will be in round table format. Room for 4 briefers at the table. So CIA's plan is to have three officers at the table to address the topics Bryan and I discussed.

We'll also bring a few back benchers to support if needed.

Subject:	Message from the ASH: Corps Deployments/2019-nCoV
Date:	2020/01/29 11:49:57
Priority:	Normal
Type:	Note

Good morning,

On behalf of ADM Brett Giroir, below and attached is a message with an important update on the deployment responsibilities of the USPHS Commissioned Corps in response to the 2019 Novel Coronavirus.

Please do not hesitate to reach out with any questions.

Thank you,

Steven

*Steven Valentine
Deputy Assistant Secretary for Health, Policy
Office of the Assistant Secretary for Health (OASH)
U.S. Department of Health and Human Services (HHS)*

Confidential pre-decisional deliberative process

January 29, 2020

TO: Heads of Operating Divisions
Heads of Staff Divisions

SUBJECT: Commissioned Corps Deployments – 2019 Novel Coronavirus

As we position ourselves to assist with controlling the spread of the 2019 Novel Coronavirus (2019-nCoV), I want to provide you with an important reminder on the deployment responsibilities of United States Public Health Service Commissioned Corps officers.

As members of a uniformed service, Commissioned Corps officers have a continuing duty and responsibility to maintain deployment readiness and to deploy, as directed by the Secretary. On March 27, 2019, Secretary Alex Azar approved Commissioned Corps Directive (CCD) 121.02, "Deployment and Readiness," updating deployment and readiness requirements for all Commissioned Corps officers.

Under CCD 121.02, the Secretary can order the deployment of Commissioned Corps officers without supervisor approval for any emergency that, in the judgement of the Secretary, is appropriate for the deployment of members of the Corps. The Secretary has determined that 2019-nCoV missions meet that standard. Accordingly, officers assigned to an HHS OPDIV/STAFFDIV will be deployed without supervisor approval.

Officers assigned to non-HHS Agencies will continue to be deployed in accordance with the Memorandum of Agreement/Understanding between the Commissioned Corps and the non-HHS Agency.

As Commissioned Corps officers and America's Health Responders, we stand ready to preserve public health and national security during national or global health emergencies. Answering this call is no different. Our mission is to be out the door as soon as requested, as this is an "all hands on deck" situation.

In addition, to demonstrate our readiness and to send the message that Commissioned Corps officers are equipped to help whenever called; effective Monday, February 3, 2020, the National Uniform Authority (NUA), the Surgeon General, has requested that all officers wear their Operational Dress Uniform (ODU)* until further notice.

I want to personally thank you for your continued support of the Commissioned Corps and our uniquely vital mission. If you have any questions, please contact me directly or RADM Susan Orsega, Director of Commissioned Corps Headquarters, at Susan.Orsega@hhs.gov.

Sincerely,

Brett P. Giroir, MD
ADM, USPHS
Assistant Secretary for Health

*According to the Commissioned Corps Information (CCI) 412.01, "Uniforms and Appearance," the NUA may delegate this uniform authority to a Local Uniform Authority. The LUA is the official who has the authority to prescribe the uniforms which may be worn within a given area.

The LUA can prescribe a different uniform if the situations warrants (e.g., the officer is scheduled to attend or present at a conference).

See below. I do like your suggested wording and we can suggest that Jeremy consider it for the statement.

If easiest, we can indicate that the basic research from HHS would likely come from NIH and CDC and since they have both agreed, then there may not be value added in listing more HHS entities??? Just suggestions as I know you are already on it.

I will await your replies before I respond back to Jeremy. Thanks, Rick

Subject: Re: Joint statement on nCoV data sharing

Don't mind — and if not possible fully understand . Francis has replied - maybe that is enough?

On 29 Jan 2020, at 15:14, Bright, Rick (OS/ASPR/BARDA) <Rick.Bright@hhs.gov>wrote:

Jeremy, are you requesting specifically for BARDA or for HHS overall (seeing that you already have NIH and CDC on the list separately)? Thanks. Rick.

On Jan 29, 2020, at 10:01 AM, Jeremy Farrar <J.Farrar@wellcome.ac.uk>wrote:

Dear Rick,

Wellcome is coordinating a joint statement to commit to rapid and open sharing of research findings and data relevant to the coronavirus outbreak – this updates a 2016 statement on data sharing in public health emergencies. Further details follow below. We are asking organisations who signed the original statement to recommit to these principles and were wondering if your organisation would be willing to join as a signatory? We are launching the statement before the end of tomorrow, so please let us know by 14:00 GMT on Thursday 30 January if you would like to sign.

Heard back from most of the list below now and all agreed to join. Not a “Wellcome” statement, one from all of us...

With best wishes

Jeremy

PROPOSED JOINT STATEMENT

Sharing research data and findings relevant to the novel coronavirus (nCoV) outbreak

The outbreak of the novel coronavirus in China (2019-nCoV) represents a significant and urgent threat to global health.

We call on researchers, journals and funders to ensure that research findings and data relevant to this outbreak are shared rapidly and openly to inform the public health response and help save lives.

We affirm our commitment to the principles set out in the 2016 [Statement on data sharing in public health emergencies](#), and pledge to ensure that the World Health Organization has rapid access to emerging findings that could aid the global response.

Specifically, we commit to work together to ensure:

- all peer-reviewed research publications relevant to the outbreak are made immediately open access

- • research findings relevant to the outbreak are shared immediately with the WHO upon journal submission, with author approval
- • research findings are made available via preprint servers at or before journal submission, or via platforms that make papers openly accessible before peer review – with clear statements regarding the availability of underlying data
- • interim and final research data relating to the outbreak are shared as rapidly and widely as possible, including with public health and research communities and the WHO
- • journals are clear that data or preprints shared ahead of submission will not pre-empt its publication in these journals

We will apply the principles of this statement to similar outbreaks in the future where there is a significant public health benefit to ensuring data is shared widely and rapidly. We urge others to make the same commitments. If your organisation is committed to supporting these principles, please contact us (d.carr@wellcome.ac.uk) and we will add your organisation to the list of signatories

Sir,

As requested, attached is ASPR's initial estimate of funding needs for response to nCoV. Also attached is draft appropriations language and analysis on potential internal offsets.

Please let me know if you have any questions.

Jay

Hi ASFR Team,

Sorry for the weekend email. I have been asked whether this information has been transmitted to OMB? And, if not, when we anticipate transmittal (or not)? Apparently at the PCC, OMB indicated they had received some HHS needs, but not all and expected it from us as well. We had explained we utilized the process through ASFR. Appreciate your assistance toward answering these questions. Thanks, Bryan

Subject: Fwd: Joint statement on nCoV data sharing

Bob and Larry,

See note below from Jeremy Farrar (Wellcome Trust). NIH, usaid, and CDC are already on the list. Is this something that hhs in general or aspr or barda or ??? Would be able to sign?

Please note the short timeline for response. Please advise. What is the process for consideration and clearance?

Thank you. Rick.

Subject: Joint statement on nCoV data sharing

Dear Rick,

Wellcome is coordinating a joint statement to commit to rapid and open sharing of research findings and data relevant to the coronavirus outbreak – this updates a 2016 statement on data sharing in public health emergencies. Further details follow below. We are asking organisations who signed the original statement to recommit to these principles and were wondering if your organisation would be willing to join as a signatory? We are launching the statement before the end of tomorrow, so please let us know by 14:00 GMT on Thursday 30 January if you would like to sign.

Heard back from most of the list below now and all agreed to join. Not a "Wellcome" statement, one from all of us...

With best wishes

Jeremy

PROPOSED JOINT STATEMENT

Sharing research data and findings relevant to the novel coronavirus (nCoV) outbreak

The outbreak of the novel coronavirus in China (2019-nCoV) represents a significant and urgent threat to global health.

We call on researchers, journals and funders to ensure that research findings and data relevant to this outbreak are shared rapidly and openly to inform the public health response and help save lives.

We affirm our commitment to the principles set out in the 2016 [Statement on data sharing in public health emergencies](#), and pledge to ensure that the World Health Organization has rapid access to emerging findings that could aid the global response.

Specifically, we commit to work together to ensure:

- all peer-reviewed research publications relevant to the outbreak are made immediately open access
- research findings relevant to the outbreak are shared immediately with the WHO upon journal submission, with author approval
- research findings are made available via preprint servers at or before journal submission, or via platforms that make papers openly accessible before peer review – with clear statements regarding the availability of underlying data
- interim and final research data relating to the outbreak are shared as rapidly and widely as possible, including with public health and research communities and the WHO
- journals are clear that data or preprints shared ahead of submission will not pre-empt its publication in these journals

We will apply the principles of this statement to similar outbreaks in the future where there is a significant public health benefit to ensuring data is shared widely and rapidly. We urge others to make the same commitments. If your organisation is committed to supporting these principles, please contact us (d.carr@wellcome.ac.uk) and we will add your organisation to the list of signatories

Subject:	Novel Coronavirus Open Media Report- 29Jan2020
Date:	2020/01/29 16:10:42
Priority:	Normal
Type:	Note

UNCLASSIFIED // FOR OFFICIAL USE ONLY

Good Afternoon All,

Attached is the 29Jan20, 2019 Novel Coronavirus Social Media Report.

BLUF: The number of confirmed cases and deaths are dramatically increased since yesterday, but there are no new confirmed US cases. Repatriation efforts underway for US citizens in Wuhan, and social media posts about the repatriation efforts raise concerns of the 3-day quarantine, often recommending 14 days. False information is shared widely online while scientific articles are also made publicly available.

Epidemiology:

Traditional news media reports death toll of 106, with almost 4,585 cases confirmed across China.

- □ Since yesterday's open media report, first cases reported in UAE and Finland.
- □ The Lancet provides access to published scientific studies. Highlights of the published studies include 11 (11%) of 99 patients with 2019-nCoV pneumonia died of multiple organ failure and 2019-nCoV being genetically similar to bat-derived SARS-like coronaviruses.
- □ Fresno, CA residents misinterpret John Hopkins 2019-nCoV dashboard, noting that a confirmed case appears to be listed in their city.

Public Health Response:

- □US Secretary of State Pompeo says he spoke with Chinese Politburo Director Yang Jiechi, US will work to protect nationals in China and help China contain outbreak of coronavirus.
- □China and Russia may work together on vaccine, with China providing Russia with viral genome.
- □Novartis notes that a vaccine will take up to a year to develop.

Supply Chain:

- □Dow CEO notes increased demand for cleaning products (e.g., disinfectants, wipes). Article does not mention whether Dow will increase production to meet demand.
- Japanese companies and people provide free supplies to Wuhan.
- □Boeing and UNICEF also plans to donate supplies (e.g., medical-grade respiratory masks) to China.

Evacuation/Repatriation

- □US DOD releases statement on military evacuation flights from Wuhan, China to March Air Reserve Base in California.
- □US Center for Disease Control and Prevention says approximately 210 US nationals transported from Wuhan, China to California.
- □Flight from Wuhan, China carrying over 200 US citizens lands at March Air Reserve Base in California with passengers to be quarantined for 72 hours and screened for symptoms of coronavirus. Some tweet replies raise concern of 72 quarantine being potentially insufficient, with most of those concerns recommending 14 day quarantine.

False Information and Public Sentiment

- Conspiracy theories spread online; example: QAnon conspiracy theorists propagate a claim that Bill and Melinda Gates Foundation is profiting from the outbreak. Other conspiracy theories spread around coronavirus being a bioweapon, false information about FEMA proposing martial law, and misinformation about the total number infected or dead are online.
- Twitter adjusts search prompts to feature authoritative health sources related to 2019-nCoV.
- □Google Trends for "beer virus" and "corona beer virus" indicate confusion between the virus and the alcoholic beverage *Corona*.

Please see the attached Open Media Report for additional information. This message was distributed to ASPR SLT, SOC Section Chiefs, SOC Leadership, and appropriate SMEs.

Can we do a story board one page slide to hc as sector and separate one to SNS supply chains/cip? I know it will be a condensing effort extraordinary, but think it will help

Copy and paste from an email-- POC Ralph Baric univ if north Carolina. Maybe we should loop him in on this string? He's been invited to the call tonight.

James—the call is tonight.

From a meeting today which had a major research SME Briefing on this and other COV strains. Bottom line is that the USA SME warns of significant pandemic based on strain characteristics and China's response and human to human transmission. Still uncertainty about asymptomatic human to human transmission.

- Fomite transmission is possible. If front line workers are not yet wearing gloves, the occ health folks should seriously consider that. Also N95s at some point—shortages are likely for both. Consider stockpiling
- Good news is that common disinfectants work but we need urgent data on soft surfaces (aircraft) transmission possibilities. S&T did some of the studies of aircraft, suitcase surface transmission risks during Ebola outbreak. No good data exists for sars corona virus strains. Can we fund that and ask S&T to support.

- • Recombination highly likely—lots of binding receptors on cell surfaces. Immune repression determinant of survival (estimated by day3-5) in humans. If body doesn't fight it off by then, likely death based on extrapolating from estimates in mouse models.
- • ventilators/ICUs required. SNS does not have sufficient for likely scale of this pandemic. Portable Ventilators won't work. Thus to lean forward, hhs will need to quickly surge associated trained ICU-capable staff. This is a predictable point of failure.
- • Source of virus is Bats. Thus consider extra guidance for CBP encounters with bats live or dead and/or Chinese herbal medicine that might include bat parts. N95s for destruction seems prudent

Here is a copy of the metachecklist we used for departments to check their pandemic plans. Much of this could be of value for this outbreak—we can pick out the critical ones.

Lisa or anyone else, are you aware of any message maps being created for this outbreak? Has anyone connected with Covello (CDC or HHS)?

Is any guidance going to come out on the potential need for the implementation of TLC? Sooner would be better than later. I sent something to VA leadership raising concerns and questions about preparedness for implementing/supporting these measures. It feels like we are going to wait for confirmed H2H transmission in the US before we do. I'm just a little worried that things could move much more quickly than we think. Look at how far things have come in a matter of 3 weeks. Go back to January 8th and tell me where this outbreak was on everybody's radar? Where will we be in 3 more week?

Am also hearing a lot of sensitivity to calling this a pandemic. We have an outbreak of a novel virus with efficient H2H transmission that had spread to 21 countries and we have evidence of H2H transmission in 2 countries outside of China. I'm assuming the human population has little to no immunity to this virus. What do you call something like that? People are saying to be careful and refer to this as the coronavirus outbreak—that we don't want to get out ahead of CDC and HHS who are being very careful not to call this a pandemic. I'm not a public health guy, what is the definition of a pandemic?

No nCoV IC50 data for boosted lopinivir among our Nanjing and Beijing colleagues. Guan Lee in HK is certain to also be testing it. Lop/r does show In vitro activity for MERS but has SAEs of intractable N/V and DHR. It was Suspended as a MERS treatment. **Maybe mCoV has a more sensitive protease than MERS. Not my area but we can ask PUMC lab head in Beijing or Lee in HK. The virus will be in 100 labs including US labs in 2 weeks, which will help.

China Testing HIV Drug as Treatment for New Coronavirus, AbbVie Says – 26 January 2020

- China is testing an HIV drug as a treatment for symptoms of the new coronavirus that is rapidly spreading, said drugmaker AbbVie Inc on Sunday.
- China health authorities requested the drug to help with the government's efforts to address the crisis, according to Adelle Infante, a spokeswoman for North Chicago, Illinois-based AbbVie.
- Aluvia, which is also known as Kaletra, is a combination of lopinavir and ritonavir.
- In guidance published on Thursday (1/23), the Chinese government said there is no effective anti-virus medicine but suggested taking two lopinavir/ritonavir pills and inhaling a dose of nebulized alpha-interferon twice a day.
- Guangfa Wang, a Beijing-based pulmonary expert who contracted the virus after visiting Wuhan for an investigation, told China's Time-Weekly that he took

Aluvia as part of his treatment and it appeared to be effective in his case. Shanghai officials said they have adopted this type of HIV drugs since their first patient.

- “So far it seems to have certain effects, but we need more clinical observation,” said Hongzhou Lu of the Shanghai Public Health Clinical Center.
- The theory, yet to be proven, is that Aluvia works by blocking a protease that the coronavirus needs for reproduction in the human body. Though it’s not the same protease that the drug was originally designed to block, it might be similar enough to delay disease progression. Because of that, Aluvia had previously also been tested in patients with SARS and MERS. During the SARS outbreak in 2003, it appeared in clinical trials. At that time, 41 patients with SARS in Hong Kong were treated for three weeks. The treatment plan was “lopinavir / ritonavir tablets” + ribavirin. The trial found that after treatment, the mortality rate was only 2.4%. In the Hong Kong hospital where the researcher is located, 111 SARS patients have been routinely treated, and the mortality rate is 28.8%. If the conventional treatment (taking ribavirin) is used, about 12 of the 41 patients will die, but using “Luo” Pinavir / ritonavir tablets” + ribavirin, only one died.
- An anonymous Wuhan doctor interviewed by Time-Weekly said that Aluvia is useful against the novel coronavirus, but it’s “hard to come by.”
- AbbVie said on WeChat that it will donate RMB\$10 million (around \$1.44 million) worth of pills in response to the guidance, though it didn’t specify how it would distribute across the country.

....Just for us mustelids....

Case is impressive

In Nanjing and sister hospital in Fuzon close household contacts are swabbed daily for 12 days. In the 3 secondary contacts that got ill, NPS PCR became positive 24-48h prior to LGF (a typical first sx in the 606 cases in our system). * But* the new qPCR which admittedly is improvised, shows extreme low viral titer (e^3) which is the limit for the assay.

The Bavaria case points out how little we know with our current Chinese cases and how heterogeneous each patient is.

I note her incubation was past the average yet she must have had wicked titers or was licking the finger food.

Sent this story out earlier when the case was first confirmed.

The first person in Germany to have tested positive for the new coronavirus was infected by a Chinese colleague who attended a company training event in the state of Bavaria a week ago, health officials said on Tuesday.

The colleague, a woman from Shanghai, "started to feel sick on the flight home on January 23," Andreas Zapf, head of the Bavarian State Office for Health and Food Safety, said at a press conference.

There is your answer Richard.

China passed a milestone today. The total reported cases as of today (5,496 cases) just passed the total SARS cases China reported in 2002-3 outbreak (5,327).

1/28/20

Total cases reported: 5,578

Total deaths: 132

Interesting cluster in Germany (4 cases apparently linked to an asymptomatic individual who only became sick on her flight back to China. https://www.spiegel.de/wissenschaft/medizin/coronavirus-drei-weitere-faelle-in-bayern-bestaetigt-a-99fbe5d4-0e47-464e-a75e-362481fad33a?sara_ecid=soci_upd_wbMbjhOSvViISjc8RPU89NcCvtlFcJ [spiegel.de]

Ministry of Health confirms three more coronavirus cases in Bavaria

Four people have contracted the corona virus in Bavaria, all of them work for the same company. 40

additional colleagues are to be tested - their employer has temporarily closed their headquarters.

January 28, 2020, 9:19 pm

In Bavaria, three other people have been infected with the novel corona virus. They were related to the first confirmed case of the new lung disease in Germany, said a spokesman for the Ministry of Health in Munich. The three newly infected patients are also employees of the Webasto company from the district of Starnberg, where the first person affected is employed.

"It was decided that the three new patients should also be admitted to the Munich Klinik Schwabing and medically monitored and isolated there," the ministry said. "A few other contact persons are currently testing whether they are also infected with the corona virus."

The Bavarian Ministry of Health and the State Office for Health and Food Safety want to report on details in a press release on Wednesday. A spokesman initially did not provide any further information in the evening.

Webasto closes headquarters until Sunday

Automotive supplier Webasto has announced that it will close its headquarters in Gauting, Upper Bavaria, due to the Corona virus cases by Sunday. Until then, employees of the company headquarters should not travel to national and international locations. China even had a two-week ban.

"Among the employees of the automotive supplier Webasto, there are other people infected with the corona virus," said the company. "The measures to protect the workforce have been expanded due to the recent developments." All four of those affected therefore work at the company's headquarters, where a total of around a thousand people work. The company is in close contact with the authorities and is based on the recommendations of the Robert Koch Institute.

The man, who was first infected in Germany, had been infected on January 21 during a training event with a Chinese colleague. The woman reportedly flew back to China on January 23. On January 27, the company informed the health department of the Chinese woman's illness.

Bavaria's Minister of Health Melanie Huml (CSU) said: "A total of around 40 employees of the company were identified who could be considered as close contacts. Those affected should be tested on Wednesday as a precaution."

The novel coronavirus 2019-nCoV can trigger a lung disease from which more than 100 people have already died in the main distribution country China - most of which were elderly patients with serious previous illnesses. The total number of diseases known worldwide has now risen to more than 4,500; in China at least 106 people died of the lung disease.

The first coronavirus patient had tested positive for the virus on Monday - by then he had gone back to work. "He is doing very well, yesterday morning he was still working," said LGL President Andreas Zapf. "He is fever-free and currently has no respiratory symptoms," added the treating chief physician Clemens Wendtner from the Schwabing Clinic. The man is in an isolation room, there is no danger for other patients.

Nurseries are also under surveillance

According to LGL, the people who had contact with the Chinese and the first sick German Webasto employee are under surveillance and are called upon not to leave their homes. The 33-year-old patient is a family man, and according to the Ministry of Health, his child goes to a crèche in the Landsberg am Lech district. This is now also under observation, said LGL President Zapf. At first nothing was known about the marital status of the three other patients. The head of the Infectiology Task Force, Martin Hoch, emphasized: "The number can still increase."

I think we are missing a couple of factors – initial cases may have been earlier than 1 Dec, initial point source and repeated point sources may have been involved – not convinced that we can be that confident in genomics analysis and virus in flux to rule that out.

I think these uncertainties will iron themselves out over the next few of weeks, but we probably need to think about how we best obtain detailed data quickly. This info will be critical in gauging how big of a \$h!+ storm this will be and when and how to pull TLC/NPI triggers. Best approach is probably by selection of specific pilot communities to do investigations with widespread use of surveillance and diagnostics. Think about communities now on the bleeding edge in Asia with US lab presence and host nation buy-in (Singapore, Cambodia). Patrick Blair's NAMRU2/NMRC-Asia would be a good starting point. Michael's Prophecy sites also a good platform. Both cc'd here.

But as we know, CDC would likely not fund this. And we need the A-team of foreign epi folks to help – this we could arrange. Could we make this happen?

In terms of understanding severity, the greatest uncertainty is with the denominator (true case count), not the numerator (true number of deaths). We may have missed some deaths, but in every outbreak you are more aware of the very ill and dead and less aware of the mildly ill or even infected/asymptomatic cases. How big can this outbreak be already? What do you think is the upper bound? The true number of deaths can only be greater than what is being reported.

What I'm about to say depends on how confident we are when the first known case appeared. I was looking at our H1N1 experience. The first H1N1 case in the US developed symptoms on March 23, 2009. On Day #58 of the US spring wave (May 25, 2009), CDC reported 6,764 cases and 10 deaths.

The first known 2019-nCoV case (at least the first one that we are aware of) developed symptoms on December 1, 2019. 57 days later China reported 4,470 cases and 107 deaths. I would predict that by the end of today we will be over 6,000 reported cases (so very close to where we were in terms of reported H1N1 cases on Day#58 during the spring wave). Do we think that case ascertainment for this outbreak is worse than H1N1? If that is true, this disease outbreak is moving faster than pandemic flu. Could that even be possible? 2019-nCoV might have a higher Ro, but it does have a longer incubation period. What would it mean in terms of Ro and or incubation period if it is moving faster than H1N1? I suppose it is possible that things have been going on longer than we think—back to early November. Do we have any evidence anywhere that things started before December 1st? It would be hard to believe that nobody did any contact tracing backwards of the original 41 patients to identify recent febrile resp illness or

deaths in contacts (even family/household members or co-workers at a minimum). So how confident are we of the start on December 1st? If we are, how likely is it that we are encountering an coronavirus outbreak that is moving faster than flu? Because if it isn't, this can't be a scenario 2. The only way it can be a scenario 2 is if it more transmissible than pandemic flu or it has been going on for a much longer time and there are large numbers of cases prior to December that we are unaware of and China is hiding or also just unaware. So where do we place our bets?

When it rains, it pours.

Jan 28 (Reuters) - A powerful magnitude 7.7 earthquake struck in the sea south of Cuba on Tuesday, triggering a tsunami warning for Cuba, Jamaica and the Cayman Islands, the U.S. Geological Survey (USGS) and the International Tsunami Information Center said.

The epicenter of the quake, initially reported as magnitude 7.3 before being upgraded, was between Jamaica, the Cayman Islands and Cuba, at a shallow depth of 6.2 miles (10 km).

If you guys remember, the Haiti earthquake was a 7.0 (also shallow at 10 KM)

So I'd reframe a little differently. What common actions will you wish you would have done under either scenario (or across a range of lethality/transmissibility) during this period of time when the severity of the outbreak is uncertain? Identify those actions if you can and move forward. I guess we would call those low regret decisions (or universal response decisions). Next question is when do you think you will have enough information to know which scenario we are in? What will that look like? So how much time do you have to choose a definitive course of action and then assess the wisdom of your decision? (And then what could you do during that time—either what harm could you cause by moving forward very aggressively or harm you could cause by holding back because you feared the crying wolf scenario?) You are going to have to hedge your bets. Would you be more embarrassed by positioning yourself for scenario 1 and scenario 2 happening? Or would you be more embarrassed by positioning yourself for

scenario 2 and scenario 1 happening? And either way you could define some tripwires to refine some of your actions to have off ramps (either to take you off the 1918-like severity superhighway and put you on the frontage road of the 2009 H1N1 scenario or take you off the 2009 H1N1 interstate and take you onto the 1918-like severity superhighway).

I still like Teddy Roosevelt's quote. In any moment of decision, the best thing you can do is the right thing., the next best thing you can do is the wrong thing, and the worst thing you can do is nothing.

Carter,

Am going through an interesting exercise now of the "what will you wish you would have done if . . ." with two scenarios:

- 1) The virus lands in the range of 0.1-1.0% CFR, which seems the most likely severe scenario
- 2) The virus turns out, like H1N1, to be much more widespread than initially appreciated and thus be associated with a much lower mortality than initially thought (the crying wolf scenario)

In my case this boils down to three areas of concern:

- Status of vaccine development: how much, how fast?
- Organizational reputation/accusations of mismanagement of funds
- Potential political embarrassment for current and future donors

Grappling with both horns of the dilemma here - would welcome you wrapping your brain around how to proceed in the most prudent way . . .

Richard

The chatter on the blogs is that WHO and CDC are behind the curve. I'm seeing comments from people asking why WHO and CDC seem to be downplaying this. I'm certainly no public health expert (just a dufus from the VA), but no matter how I look at this, it looks be bad. If we assume the same case ascertainment rate as the spring wave of 2009 H1N1, this looks nearly as transmissible as flu (but with a longer incubation period and greater Ro). The projected size of the outbreak already seems hard to believe, but when I think of the actions being taken across China that are reminiscent of 1918

Philadelphia, perhaps those numbers are correct. And if we accept that level of transmissibility, the CFR is approaching the range of a severe flu pandemic. But if we assume the case ascertainment rate is better than H1N1 and transmissibility is less than flu (it is still much more transmissible than SARS), and the CFR goes accordingly (1918 pandemic range). And if we assume the case ascertainment rate is even worse than 2009 H1N1, this is really unbelievable (higher transmissibility than flu). Any way you cut it, this is going to be bad. You guys made fun of me screaming to close the schools. Now I'm screaming, close the colleges and universities.

Is CDC monitoring the blogs? One thing I'm checking each day is availability of respirators on amazon and ebay (just curious since this is an indirect way of taking the temperature of the country).

Two weeks from now, are there things that we wished we would have done to reshape the challenge we will likely face? What steps could we take to shrink the problem (like dealing with seasonal flu and outbreaks of 2019-nCoV? I would also ramp up flu vaccination because although B wasn't a good match, there is a good chance A is. And even though B is waning, I suspect that A is just getting started. So still time to "shape the battlefield." Might also be a good time to check on pneumococcal vaccine coverage among people my age since most of the deaths being reported are in seniors. It would require nuanced communication though since this doesn't affect 2019-nCoV, but it does reduce the burden of the usual resp disease we see this time of year and that can only help. But we have a very narrow window to act.

Subject: RE: 2019-nCoV

I tried to dig thru the blogs and ProMEDmail to pull out all the cases being reported by day as well as pull the data on the 17 deaths (date of illness onset and date of death). I put that data into Excel (the number of cases reported over the past 2 days has been a little confusing) and inserted a couple of graphs and compared the current preliminary data on cumulative numbers of cases with the experience we had with SARS and MERS. I can refine over time, but it is probably good enough to give a sense of speed. All of this brings back memories of the Mann Gulch Fire—not going to be able to outrun it. The concern I have in the response is thinking like SARS (really a non-layered strategy of isolating the ill). They ought to think of the full implementation of TLC (and assume that like flu, we might be missing disease transmission in asymptomatic infected individuals)—at least until we learn more.

Been following FluTrackers.

Caution-Caution-<https://protect2.fireeye.com/url?k=4256d47b-1e02cd07-4256e544-0cc47adc5fa2-ee47e762fb2d149f&u=https://virologydownunder.com/> <Caution-Caution-

<https://protect2.fireeye.com/url?k=da3837cb-866c2eb7-da3806f4-0cc47adc5fa2-aaa10d7972c1b1ca&u=https://virologydownunder.com/> > is also a good one. Less frequently updated, so often behind, but sometimes gives much more depth and expertise on specific issues in an outbreak.

Any other sources folks would like to share?

Non-UNMC email

One last thing. During H1N1 and other disasters (Deepwater Horizon, Fukushima, Haiti Earthquake), we leveraged blogs as a way to crowdsource all open source information. You have an army of passionate people who are constantly sifting thru the information from across the globe. A number of the blogs that we followed for H1N1 no longer exist. One that is still active is flutrackers. Subject: {EXTERNAL} RE: 2019-nCoV

+ Brian "Bat" Masterson (UHC)

+ Mike Wargo (HCA)

+ Melissa Harvey and Herb Wolfe (DHS)

+ Dave Wade in his last few days at NSC (the last doctor to leave)...

Colleagues,

Adding some additional folks to the discussion for better crowd-sourcing.

Mike is now Chair of the Medical and Public Health Sector Coordinating Council, so whistle “Hail to the Chief” with any engagement. Bat is at UHC. Melissa is with us at DHS CWMD/ OCMO, formerly with the ASPR HPP.

Reattaching Carter’s PPT.

If we had a NHRC, this would be so much easier...

Best,

Duane

Subject: Re: 2019-nCoV

I am going to push VA to leverage their daily nursing data for monitoring what is happening in our hospital in near real time in terms of unscheduled leave. Will also reach out to HCA.

I pulled together a quick historical comparison of SARS, MERS and 2019-nCoV. Will share in a few minutes. This is taking off faster than SARS. It was interesting to compare the timelines. Any lessons from SARS like superspreaders?

ASPR Coordination Call - Coronavirus

Agenda:

1. Key Senior Leader Roll Call
2. Current Situation
 - a. CDC Update
 - b. Repatriation Update (Natalie Grant)
3. Task Force Updates
 - a. MCM (Dr. Johnson)
 - b. Hospital Resilience (Johnathan Greene)
 - c. Supply Chain (Kevin Cooper)
 - d. Communications (Cicely Waters and Gretchen Michael)
 - e. Repatriation
 - f. Incident Management (CAPT Lee)
 - g. COOP (Matt Smith)
4. Regional Updates by Exception
5. Interagency Update by exception
 - a. DHS (Dr. Caneva)
 - b. DoD (OSD, NORTHCOM and others by exception)
 - c. VHA (Dr. Kim)
5. Any other ASPR Offices or Interagencies with updates or comments by exception
7. Future calls
9. Senior Leader Closing Comments

Hi HHS SOC,

HHS SOC is inviting you to this WebEx meeting:

ASPR Coordination Call 2020 Coronavirus

Host: HHS SOC

When it's time, join the meeting from here:

[Join the meeting](#)

When: Every Tuesday, Thursday, from Thursday, January 30, 2020 to no end date, 11:00 am (30 mins), Eastern Standard Time (New York, GMT-05:00).

Access Information

Meeting Number:

(b)(6)

Password:

(This meeting does not require a password.)

Audio Connection

Subject:	Canceled: ASPR Coordination Call Coronavirus
Type:	OLE.CLASS.{00061055-0000-0000-C000-000000000046}

ASPR Coordination Call - Coronavirus

Agenda:

1. Key Senior Leader Roll Call
2. Current Situation
 - a. CDC Update
 - b. Repatriation Update (Natalie Grant)
3. Task Force Updates
 - a. MCM (Dr. Johnson)
 - b. Hospital Resilience (Johnathan Greene)
 - c. Supply Chain (Kevin Cooper)
 - d. Communications (Cicely Waters and Gretchen Michael)
 - e. Repatriation
 - f. Incident Management (CAPT Lee)
 - g. COOP (Matt Smith)
4. Regional Updates by Exception
5. Interagency Update by exception
 - a. DHS (Dr. Caneva)
 - b. DoD (OSD, NORTHCOM and others by exception)
 - c. VHA (Dr. Kim)
5. Any other ASPR Offices or Interagencies with updates or comments by exception
7. Future calls
9. Senior Leader Closing Comments

Hi HHS SOC,

HHS SOC is inviting you to this WebEx meeting:

ASPR Coordination Call 2020 Coronavirus

Host: HHS SOC

When it's time, join the meeting from here:

[Join the meeting](#)

When: Every Tuesday, Thursday, from Thursday, January 30, 2020 to no end date, 11:00 am (30 mins), Eastern Standard Time (New York, GMT-05:00).

Access Information

Meeting Number:

(b)(6)

Password:

(This meeting does not require a password.)

Audio Connection

(b)(6)

(Meeting Server Main Number)

Access Code:

(b)(6)

Delivering the power of collaboration

ASPR Coordination Call 2020 Coronavirus

Host: HHS SOC

When it's time, start your meeting from here:

Start the meeting

When: Friday, January 31, 2020, 4:00 pm (30 mins), Eastern Standard Time (New York, GMT-05:00).

Access Information

Meeting Number:

(b)(6)

Password:

(This meeting does not require a password.)

Host Key:

(b)(6) Use this key during the meeting if you ever need to reclaim the host role.)

Audio Connection

(b)(6) (Meeting Server Main Number)

Access Code:

(b)(6)

Recipient:

Subject:	Canceled: ASPR Coordination Call Coronavirus
Type:	OLE.CLASS.{00061055-0000-0000-C000-000000000046}

ASPR Coordination Call - Coronavirus

Agenda:

1. Key Senior Leader Roll Call
2. Current Situation
 - a. CDC Update
 - b. Repatriation Update (Natalie Grant)
3. Task Force Updates
 - a. MCM (Dr. Johnson)
 - b. Hospital Resilience (Johnathan Greene)
 - c. Supply Chain (Kevin Cooper)
 - d. Communications (Cicely Waters and Gretchen Michael)
 - e. Repatriation
 - f. Incident Management (CAPT Lee)
 - g. COOP (Matt Smith)
4. Regional Updates by Exception
5. Interagency Update by exception
 - a. DHS (Dr. Caneva)
 - b. DoD (OSD, NORTHCOM and others by exception)
 - c. VHA (Dr. Kim)
5. Any other ASPR Offices or Interagencies with updates or comments by exception
7. Future calls
9. Senior Leader Closing Comments

Hi HHS SOC,

HHS SOC is inviting you to this WebEx meeting:

ASPR Coordination Call 2020 Coronavirus

Host: HHS SOC

When it's time, join the meeting from here:

Join the meeting

When: Every Tuesday, Thursday, from Thursday, January 30, 2020 to no end date, 11:00 am (30 mins), Eastern Standard Time (New York, GMT-05:00).

Access Information

Meeting Number:

(b)(6)

Password:

(This meeting does not require a password.)

Audio Connection

(b)(6) (Meeting Server Main Number)

Access Code:

Subject:	HHS International SPOTREP: Novel Coronavirus, Wuhan, China (Update #20)
Date:	2020/01/29 18:07:07
Priority:	Normal
Type:	Note

UNCLASSIFIED // FOR OFFICIAL USE ONLY

HHS International SPOTREP: Novel Coronavirus, Wuhan, China (Update #20)

What: There are 6,065 cases of confirmed 2019-nCoV in 19 locations as of 29Jan20, with five of these cases confirmed in the United States (Arizona, California, Washington and Illinois).

- Coordinated the entry screening of repatriation flight arriving from Wuhan, China during refueling stop in Anchorage, Alaska. 195 persons were screened, and no hospital medical evaluations were required. Passengers will be rescreened and medically evaluated on arrival at the March Reserve AFB.
- 2,615 persons on 392 flights have been screened as of January 28, 2020. To-date, four persons have been referred for medical evaluation following screening and station illness response activities; one tested positive for 2019-nCoV.
- Travel health notice elevated to level 3 (avoid non-essential travel) for Wuhan was expanded to include all of China.

International Coordination:

- Continued monitoring international situation through CDC country offices and Ministry of Health contacts in affected countries, in-country teams, and WHO.
- CDC detailed several staff to WHO in Geneva to assist with response.

Laboratory:

- Developed a real-time RT-PCR assay to detect the 2019-nCoV for global and domestic use.
 - Assay added to CDC's Clinical Laboratory Improvement Amendments (CLIA) certificate.
 - Assay protocol posted to CDC 2019-nCoV website.
- CDC laboratory has the capacity to detect 2019-nCoV by sequencing virus isolates and comparing the sequences against the genetic sequence released by China.
 - Sequence of 2019-nCoV from the first four identified U.S. cases in WA, IL and CA (2) have been made available on GenBank (Accession ID: MN985325, MN988713, MN994467, MN994468).

- Coordinating to provide assays and reagents and initiating manufacturing of reagents for 2019-nCoV real-time RT-PCR assay for domestic and international distribution.
- Conducting regular discussions with FDA to complete Emergency Use Authorization (EUA) for 2019-nCoV real-time RT-PCR assay.
 - Collecting laboratory data to support the EUA.

Epidemiology:

- Working with clinicians and state health departments to evaluate and test PUIs for 2019-nCoV.
- Developing and continually refining investigation and guidance materials for evaluating cases and contacts, along with specimen collection.
- Supporting field teams deployed in support of states with cases and contact investigations, as well as infection control and communications.
- Coordinating with external partners regarding modeling of infectious disease dynamics related to 2019-nCoV to help inform strategies for containment and mitigation.

UNCLASSIFIED // FOR OFFICIAL USE ONLY

HHS International SPOTREP: Novel Coronavirus, Wuhan, China (Update #20)

What: There are 6,065 cases of confirmed 2019-nCoV in 19 locations as of 29Jan20, with five of these cases confirmed in the United States (Arizona, California, Washington and Illinois).

- Coordinated the entry screening of repatriation flight arriving from Wuhan, China during refueling stop in Anchorage, Alaska. 195 persons were screened, and no hospital medical evaluations were required. Passengers will be rescreened and medically evaluated on arrival at the March Reserve AFB.
- 2,615 persons on 392 flights have been screened as of January 28, 2020. To-date, four persons have been referred for medical evaluation following screening and station illness response activities; one tested positive for 2019-nCoV.
- Travel health notice elevated to level 3 (avoid non-essential travel) for Wuhan was expanded to include all of China.

International Coordination:

- Continued monitoring international situation through CDC country offices and Ministry of Health contacts in affected countries, in-country teams, and WHO.
- CDC detailed several staff to WHO in Geneva to assist with response.

Laboratory:

- Developed a real-time RT-PCR assay to detect the 2019-nCoV for global and domestic use.
 - Assay added to CDC's Clinical Laboratory Improvement Amendments (CLIA) certificate.
 - Assay protocol posted to CDC 2019-nCoV website.
- CDC laboratory has the capacity to detect 2019-nCoV by sequencing virus isolates and comparing the sequences against the genetic sequence released by China.
 - Sequence of 2019-nCoV from the first four identified U.S. cases in WA, IL and CA (2) have been made available on GenBank (Accession ID: MN985325, MN988713, MN994467, MN994468).

- Coordinating to provide assays and reagents and initiating manufacturing of reagents for 2019-nCoV real-time RT-PCR assay for domestic and international distribution.
- Conducting regular discussions with FDA to complete Emergency Use Authorization (EUA) for 2019-nCoV real-time RT-PCR assay.
 - Collecting laboratory data to support the EUA.

HHS International SPOTREP: Novel Coronavirus, Wuhan, China (Update #21)

Source: HHS

What: The US Department of State has chartered flight has repatriated **195** American Citizens back to the US from Wuhan, China to the continental United States.

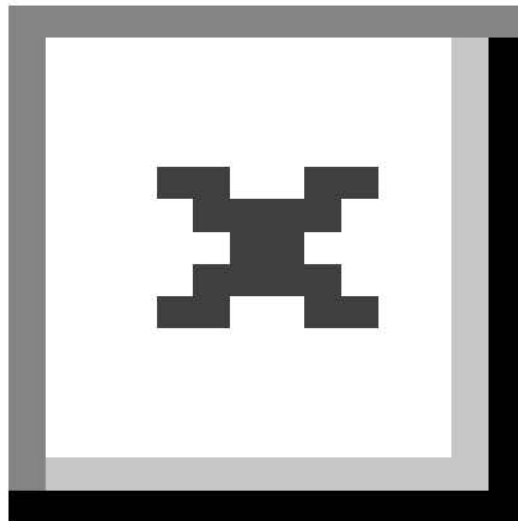

- **Flight arrived at March Reserve AFB, California (Riverside County) at 0811 PT 29Jan20/ 1111 EST 29Jan20.**
- **Passengers are lodged on base to wait out the incubation period (2 weeks).**
- **Passenger morale reported as high.**

Activation & Personnel

- **66** HHS personnel will deploy in support of the repatriation mission.
 - Includes staff from ASPR Region IX, OHSEPR, USPHS, and ASPR HQ IT Specialists
 - 3 personnel to Anchorage, Alaska.
 - **63** personnel will deploy to Ontario, California.
- 9 US Marshals will be on-site at March ARB to support HHS operations

Medical Screening

- **Third screening took place Point of Debarkation (POD) March Reserve AFB, California by CDC**
 - **195** passengers screened
 - **2** passengers were sent to tertiary screening
 - **Both** passengers were negative on tertiary screening
 - **As a result there were no PUIs (Patient Under Investigation)**
- **Passengers are lodged on base in a USAF Bachelor Enlisted Quarters building.**

For more details, please see attached SLB for Repatriation Wuhan (nCoV).

Trump has so far dodged becoming face of coronavirus crisis

By Sarah Oweremohle, Brianna Ehley

01/29/2020 06:33 PM EST

President Donald Trump is trying something new with a global crisis: keeping quiet.

The president, for now, is letting his public health experts take the spotlight on the Wuhan coronavirus — and hardly even tweeting about it — as the outbreak sends stocks tumbling, disrupts travel and stokes fears about a global pandemic.

Trump's public appearances this week focused on the Middle East and his trade deal with Canada and Mexico while the most high-profile briefing on the fast-spreading virus was held on Tuesday at his health department, not the White House. His few tweets on the outbreak have urged the public to stay calm and applauded Chinese efforts to contain the outbreak.

For a president who frequently opines on whatever is grabbing headlines — from natural disasters to sports championships and celebrity news — Trump has so far been restrained in his comments on the coronavirus, not making himself the face of the battle against an international health crisis beyond his control.

By comparison, Trump has been very outspoken on the opioid crisis, and had the power to focus attention and move more resources, while the coronavirus is far more unpredictable, and there are scientific factors impossible to predict as the epidemic evolves. The outbreak has killed more than 130 and sickened thousands, mostly in China.

“We learned a lesson from the swine flu in ‘76: The president made the announcement and ended up owning the problem,” said Tom Frieden, who headed the CDC during the Obama administration, referring to an outbreak during former President Gerald Ford's tenure. “It wasn't his fault. ... I'd rather not see it politicized.”

So far, the administration has rolled out a show of its public health expertise, including HHS Secretary Alex Azar — a veteran of the SARS, MERS and pandemic flu outbreaks while he served in the George W. Bush administration — and Anthony Fauci, the NIH official who's helped steer federal responses to health crises since the Reagan years.

“The president and I have been speaking regularly about this outbreak, and I have been speaking with the senior officials at HHS and the White House multiple times each day since the outbreak began to represent an international threat,” Azar said. “The president is highly engaged in this response, and closely monitoring the work we’re doing to keep Americans safe.”

It’s a marked difference from the 2014 Ebola outbreak in West Africa, when Trump blasted former President Barack Obama for not imposing strict travel restrictions.

The lower-profile approach he’s shown to date could keep paying dividends if confirmed cases continue to climb, as authorities expect.

The outbreak already is providing an early test of a plan Trump unveiled in 2018 to respond to man-made and naturally occurring biological threats that designated HHS the lead federal department on viral pandemics, effectively wrangling up to a dozen agencies’ response.

There’s been skepticism in the public health community about how the plan would work. “As a practical matter, HHS is not going to coordinate the Pentagon,” said Jeremy Konyndyk, who worked at USAID on the Obama administration’s response during the Ebola outbreak that killed thousands. “There are a lot of different parts of the government that need to all start pulling in the same direction if we need a complex, coherent response to something like this.”

The military and HHS collaborated on evacuating 195 American citizens from China and housing them at an Air Force base in California on Wednesday. But CDC officials declined to call three days of monitoring the group a quarantine. “They can leave; however, they are sitting in the middle of a military base. Any discussion around departure would be just that — a discussion,” said Rear Adm. Nancy Knight, director of CDC’s Global Health Protection Division.

Administration critics also have been quick to criticize a 2018 White House decision to gut a National Security Council team focused on responding to pandemics as part of a streamlining, though the NSC continues to play a major role in coordinating the federal response to global crises. Sen. Ed Markey (D-Mass.) on Monday called on the president to immediately correct that action, and 30 Democratic senators chided Trump in a letter that “outbreaks like this serve as a solemn reminder of the need for an unwavering commitment to global health security and the need for strong public health programs worldwide.”

Meanwhile, some administration allies in Congress are breaking with the conciliatory tone toward China and sounding the way Trump did during the Ebola crisis on matters like travel bans.

Sen. Tom Cotton (R-Ark.) on Tuesday urged the United States to ban commercial travel from China, evacuate Americans and explore restricting trade, adding that the outbreak was attributable to “the deadly combination of Chinese duplicity and incompetence.” Sen. Josh Hawley (R-Mo.) has also written to Trump questioning whether the United States should institute travel bans to ward off potential new cases.

Rep. Susan Brooks (R-Ind.), who sponsored a bill that reauthorized HHS’ pandemic response last year, said she’s taking a more wait-and-see approach, and will decide after a Thursday

briefing for House Energy and Commerce members from CDC Director Robert Redfield and Fauci before backing what she called a “severe” step like travel restrictions.

"You've got to believe in your health professionals, and you've got to keep your calm," said Rep. John Shimkus (R-Ill.), an occasional Trump critic.

Public health experts say the administration's response to date has been largely seamless. The CDC has been leading the efforts, holding routine briefings with state officials and the media to discuss the latest developments, as well as unknowns like how contagious the virus is. “We feel confident we're getting the intelligence we need,” said Mike Fraser, executive director of the Association of State and Territorial Health Officials.

The CDC is tapping its Infectious Diseases Rapid Response Reserve Fund for technical assistance, planning at ports of entry and other needs, said an HHS spokesperson, and it will submit a spending plan to Congress.

But states concerned about responding to coronavirus cases amid an already busy flu season are pressing Azar to declare a public health emergency, which would allow them to tap into extra funds and allow CDC to send epidemiologists into the field. Azar on Tuesday said the five confirmed cases of Wuhan virus in the United States didn't warrant such a declaration — and reiterated that expertise would inform future decisions.

“This is a public health matter, not a political matter in any way,” Azar said.

Trump has so far dodged becoming face of coronavirus crisis

By Sarah Oweremohle, Brianna Ehley

01/29/2020 06:33 PM EST

President Donald Trump is trying something new with a global crisis: keeping quiet.

The president, for now, is letting his public health experts take the spotlight on the Wuhan coronavirus — and hardly even tweeting about it — as the outbreak sends stocks tumbling, disrupts travel and stokes fears about a global pandemic.

Trump's public appearances this week focused on the Middle East and his trade deal with Canada and Mexico while the most high-profile briefing on the fast-spreading virus was held on Tuesday at his health department, not the White House. His few tweets on the outbreak have urged the public to stay calm and applauded Chinese efforts to contain the outbreak.

For a president who frequently opines on whatever is grabbing headlines — from natural disasters to sports championships and celebrity news — Trump has so far been restrained in his comments on the coronavirus, not making himself the face of the battle against an international health crisis beyond his control.

By comparison, Trump has been very outspoken on the opioid crisis, and had the power to focus attention and move more resources, while the coronavirus is far more unpredictable, and there are scientific factors impossible to predict as the epidemic evolves. The outbreak has killed more than 130 and sickened thousands, mostly in China.

“We learned a lesson from the swine flu in ‘76: The president made the announcement and ended up owning the problem,” said Tom Frieden, who headed the CDC during the Obama administration, referring to an outbreak during former President Gerald Ford’s tenure. “It wasn’t his fault. ... I’d rather not see it politicized.”

So far, the administration has rolled out a show of its public health expertise, including HHS Secretary Alex Azar — a veteran of the SARS, MERS and pandemic flu outbreaks while he served in the George W. Bush administration — and Anthony Fauci, the NIH official who’s helped steer federal responses to health crises since the Reagan years.

“The president and I have been speaking regularly about this outbreak, and I have been speaking with the senior officials at HHS and the White House multiple times each day since the outbreak began to represent an international threat,” Azar said. “The president is highly engaged in this response, and closely monitoring the work we’re doing to keep Americans safe.”

It’s a marked difference from the 2014 Ebola outbreak in West Africa, when Trump blasted former President Barack Obama for not imposing strict travel restrictions.

The lower-profile approach he’s shown to date could keep paying dividends if confirmed cases continue to climb, as authorities expect.

The outbreak already is providing an early test of a plan Trump unveiled in 2018 to respond to man-made and naturally occurring biological threats that designated HHS the lead federal department on viral pandemics, effectively wrangling up to a dozen agencies’ response.

There’s been skepticism in the public health community about how the plan would work. “As a practical matter, HHS is not going to coordinate the Pentagon,” said Jeremy Konyndyk, who worked at USAID on the Obama administration’s response during the Ebola outbreak that killed thousands. “There are a lot of different parts of the government that need to all start pulling in the same direction if we need a complex, coherent response to something like this.”

The military and HHS collaborated on evacuating 195 American citizens from China and housing them at an Air Force base in California on Wednesday. But CDC officials declined to call three days of monitoring the group a quarantine. “They can leave; however, they are sitting in the middle of a military base. Any discussion around departure would be just that — a discussion,” said Rear Adm. Nancy Knight, director of CDC’s Global Health Protection Division.

Administration critics also have been quick to criticize a 2018 White House decision to gut a National Security Council team focused on responding to pandemics as part of a streamlining, though the NSC continues to play a major role in coordinating the federal response to global crises. Sen. Ed Markey (D-Mass.) on Monday called on the president to immediately correct that action, and 30 Democratic senators chided Trump in a letter that “outbreaks like this serve as a

solemn reminder of the need for an unwavering commitment to global health security and the need for strong public health programs worldwide.”

Meanwhile, some administration allies in Congress are breaking with the conciliatory tone toward China and sounding the way Trump did during the Ebola crisis on matters like travel bans.

Sen. Tom Cotton (R-Ark.) on Tuesday urged the United States to ban commercial travel from China, evacuate Americans and explore restricting trade, adding that the outbreak was attributable to “the deadly combination of Chinese duplicity and incompetence.” Sen. Josh Hawley (R-Mo.) has also written to Trump questioning whether the United States should institute travel bans to ward off potential new cases.

Rep. Susan Brooks (R-Ind.), who sponsored a bill that reauthorized HHS’ pandemic response last year, said she’s taking a more wait-and-see approach, and will decide after a Thursday briefing for House Energy and Commerce members from CDC Director Robert Redfield and Fauci before backing what she called a “severe” step like travel restrictions.

“You’ve got to believe in your health professionals, and you’ve got to keep your calm,” said Rep. John Shimkus (R-Ill.), an occasional Trump critic.

Public health experts say the administration’s response to date has been largely seamless. The CDC has been leading the efforts, holding routine briefings with state officials and the media to discuss the latest developments, as well as unknowns like how contagious the virus is. “We feel confident we’re getting the intelligence we need,” said Mike Fraser, executive director of the Association of State and Territorial Health Officials.

The CDC is tapping its Infectious Diseases Rapid Response Reserve Fund for technical assistance, planning at ports of entry and other needs, said an HHS spokesperson, and it will submit a spending plan to Congress.

But states concerned about responding to coronavirus cases amid an already busy flu season are pressing Azar to declare a public health emergency, which would allow them to tap into extra funds and allow CDC to send epidemiologists into the field. Azar on Tuesday said the five confirmed cases of Wuhan virus in the United States didn’t warrant such a declaration — and reiterated that expertise would inform future decisions.

“This is a public health matter, not a political matter in any way,” Azar said.

INTERNAL, CONFIDENTIAL, MARKET SENSITIVE, NOT FOR PUBLIC DISTRIBUTION

- **Healthy Adult Opportunity (HAO)**

Tomorrow, CMS will release a State Medicaid Director Letter (SMDL) and supporting application template announcing the Healthy Adult Opportunity (HAO). This is an optional demonstration that is designed to give states unprecedented tools to design innovative health coverage programs tailored to the unique needs of adult beneficiaries, while holding states accountable for results and maintaining strong protections for our most at-risk populations.

- **FDA to issue guidance on reducing possible risk of transmission of Creutzfeldt-Jakob Disease and variant Creutzfeldt-Jakob Disease**

Tomorrow, FDA is expecting to issue a draft guidance with recommendations to industry for reducing the possible risk of transmission of Creutzfeldt-Jakob Disease and Variant Creutzfeldt-Jakob Disease by blood and blood components. It proposes to allow certain veterans who were stationed in Europe and individuals who lived in Europe over five years (outside of France and the UK) to potentially donate.

INTERNAL, CONFIDENTIAL, MARKET SENSITIVE, NOT FOR PUBLIC DISTRIBUTION

(b)(5)

- **CDC to tentatively release *Morbidity and Mortality Weekly Report* on HIV testing outcomes**

Tomorrow, CDC is expected to tentatively release online (media pre-release **embargoed until 1:00 pm**) a report entitled “HIV Testing Outcomes Among Blacks or African Americans — 50 Local U.S. Jurisdictions Accounting for the Majority of New HIV Diagnoses and Seven States with Disproportionate Occurrences of HIV in Rural Areas, 2017.”

- **CDC to tentatively release *Morbidity and Mortality Weekly Report* on suicidal ideation and emergency department (ED) visits**

Tomorrow, CDC is expected to tentatively release online (media pre-release **embargoed until 1:00 pm**) a report entitled “Syndromic Surveillance of Suicidal Ideation and Self-Directed Violence — United States, January 2017–December 2018.” During the 24-month period, the proportion of ED visits for suicidal ideation or self-directed violence increased.

- **CDC to tentatively release *Morbidity and Mortality Weekly Report* on Lyme disease**

Tomorrow, CDC is expected to tentatively release online (media pre-release **embargoed until 1:00 pm**) a report entitled “*Notes from the Field*: Four Cases of Lyme Disease at an Outdoor Wilderness Camp — North Carolina, 2017 and 2019.” An investigation determined that all three children with Lyme disease were homeschooled and had attended a local, year-round outdoor wilderness day camp, and each child had attended the camp at least 1 day a week over the course of the previous fall and spring.

- **CDC to tentatively release *Morbidity and Mortality Weekly Report Surveillance Summary* on prescription opioid use and misuse**

Tomorrow, CDC is expected to tentatively release online (media pre-release **embargoed until 1:00 pm**) a report entitled “Opioid Prescribing Behaviors — Prescription Behavior Surveillance System, 11 States, 2010–2016.” Opioid prescribing rates declined in all 11 states (California, Delaware, Florida, Idaho, Kentucky, Louisiana, Maine, Ohio, Texas, Virginia, and West Virginia) during 2010–2016 (range: 14.9% to 33.0%).

- **CDC to publish health statistics report on mortality**

Tomorrow, CDC’s National Center for Health Statistics is expected to release a report entitled “Mortality in the United States, 2018.” This report presents final 2018 U.S. mortality data on deaths and death rates by demographic and medical characteristics, providing information on mortality patterns among U.S. residents by variables such as sex, age, race and Hispanic origin, and cause of death. Heavy media interest is anticipated.

- **CDC to publish health statistics report on drug overdose deaths**

Tomorrow, CDC’s National Center for Health Statistics is expected to release a report entitled “Drug Overdose Deaths in the United States, 1999-2018.” This report uses the most recent data from the National Vital Statistics System (NVSS) to update trends in drug overdose deaths for all drugs and for specific drugs and drug types, and to identify changes in rates by state from 2017 to 2018. Heavy media interest is anticipated.

- **CDC to publish health statistics report on maternal mortality**

Tomorrow, CDC’s National Center for Health Statistics is expected to release a report entitled “Maternal Mortality in the United States: Changes in Coding, Publication, and Data Release, 2018.”

- **CDC to publish health statistics report on life expectancy**

Tomorrow, CDC’s National Center for Health Statistics is expected to release a report entitled “Changes in Life Expectancy at Birth, 2010–2018.”

- **CDC to publish article on disparities in smoking cessation**

Tomorrow, CDC is expected to publish “Disparities in Cessation Behaviors Among Hispanic Adult Cigarette Smokers—United States, 2000–2015” in *Preventing Chronic Disease*. The study found that past-year quit attempts increased during 2000–2015 among both white and Hispanic smokers, with

no significant differences between these groups, and Hispanic adult smokers are less likely to receive advice to quit and to use proven cessation treatments than white smokers.

Other Newsworthy Items:

- There may be a story in the Wall Street Journal in the coming days regarding an OIG report on IHS
- OIG will post the following report:
 - More Than One-Third of New Jersey's Federal Medicaid Reimbursement for Providing Community-Based Treatment Services Was Unallowable (A-02-17-01020)
- CMS will release a State Medicaid Director Letter (SMDL) and supporting application template announcing the Healthy Adult Opportunity (HAO)
- Washington Post is expected to publish a piece on FDA Commissioner Hahn.
- CDC will publish the MMWR:
 - HIV Testing Outcomes Among Blacks or African Americans — 50 Local U.S. Jurisdictions Accounting for the Majority of New HIV Diagnoses and Seven States with Disproportionate Occurrences of HIV in Rural Areas, 2017

Subject:	Secretary's Nightly Update
Date:	2020/01/29 19:03:53
Priority:	Normal
Type:	Note

Sent to White House (Night Note):

(b)(5)

- **CDC to tentatively release *Morbidity and Mortality Weekly Report* on HIV testing outcomes**
Tomorrow, CDC is expected to tentatively release online (media pre-release **embargoed until 1:00 pm**) a report entitled "HIV Testing Outcomes Among Blacks or African Americans — 50 Local U.S. Jurisdictions Accounting for the Majority of New HIV Diagnoses and Seven States with Disproportionate Occurrences of HIV in Rural Areas, 2017."
- **CDC to tentatively release *Morbidity and Mortality Weekly Report* on suicidal ideation and emergency department (ED) visits**

Tomorrow, CDC is expected to tentatively release online (media pre-release **embargoed until 1:00 pm**) a report entitled “Syndromic Surveillance of Suicidal Ideation and Self-Directed Violence — United States, January 2017–December 2018.” During the 24-month period, the proportion of ED visits for suicidal ideation or self-directed violence increased.

- **CDC to tentatively release *Morbidity and Mortality Weekly Report* on Lyme disease**

Tomorrow, CDC is expected to tentatively release online (media pre-release **embargoed until 1:00 pm**) a report entitled “*Notes from the Field: Four Cases of Lyme Disease at an Outdoor Wilderness Camp — North Carolina, 2017 and 2019.*” An investigation determined that all three children with Lyme disease were homeschooled and had attended a local, year-round outdoor wilderness day camp, and each child had attended the camp at least 1 day a week over the course of the previous fall and spring.

- **CDC to tentatively release *Morbidity and Mortality Weekly Report Surveillance Summary* on prescription opioid use and misuse**

Tomorrow, CDC is expected to tentatively release online (media pre-release **embargoed until 1:00 pm**) a report entitled “Opioid Prescribing Behaviors — Prescription Behavior Surveillance System, 11 States, 2010–2016.” Opioid prescribing rates declined in all 11 states (California, Delaware, Florida, Idaho, Kentucky, Louisiana, Maine, Ohio, Texas, Virginia, and West Virginia) during 2010–2016 (range: 14.9% to 33.0%).

- **CDC to publish health statistics report on mortality**

Tomorrow, CDC’s National Center for Health Statistics is expected to release a report entitled “Mortality in the United States, 2018.” This report presents final 2018 U.S. mortality data on deaths and death rates by demographic and medical characteristics, providing information on mortality patterns among U.S. residents by variables such as sex, age, race and Hispanic origin, and cause of death. Heavy media interest is anticipated.

- **CDC to publish health statistics report on drug overdose deaths**

Tomorrow, CDC’s National Center for Health Statistics is expected to release a report entitled “Drug Overdose Deaths in the United States, 1999–2018.” This report uses the most recent data from the National Vital Statistics System (NVSS) to update trends in drug overdose deaths for all drugs and for specific drugs and drug types, and to identify changes in rates by state from 2017 to 2018. Heavy media interest is anticipated.

- **CDC to publish health statistics report on maternal mortality**

Tomorrow, CDC’s National Center for Health Statistics is expected to release a report entitled “Maternal Mortality in the United States: Changes in Coding, Publication, and Data Release, 2018.”

- **CDC to publish health statistics report on life expectancy**

Tomorrow, CDC’s National Center for Health Statistics is expected to release a report entitled “Changes in Life Expectancy at Birth, 2010–2018.”

- **CDC to publish article on disparities in smoking cessation**

Tomorrow, CDC is expected to publish “Disparities in Cessation Behaviors Among Hispanic Adult Cigarette Smokers—United States, 2000–2015” in *Preventing Chronic Disease*. The study found that past-year quit attempts increased during 2000–2015 among both white and Hispanic smokers, with

no significant differences between these groups, and Hispanic adult smokers are less likely to receive advice to quit and to use proven cessation treatments than white smokers.

Other Newsworthy Items:

- • There may be a story in the Wall Street Journal in the coming days regarding an OIG report on IHS
- • OIG will post the following report:
 - • More Than One-Third of New Jersey's Federal Medicaid Reimbursement for Providing Community-Based Treatment Services Was Unallowable (A-02-17-01020)
- • CMS will release a State Medicaid Director Letter (SMDL) and supporting application template announcing the Healthy Adult Opportunity (HAO)
- • Washington Post is expected to publish a piece on FDA Commissioner Hahn.
- • CDC will publish the MMWR:
 - • HIV Testing Outcomes Among Blacks or African Americans — 50 Local U.S. Jurisdictions Accounting for the Majority of New HIV Diagnoses and Seven States with Disproportionate Occurrences of HIV in Rural Areas, 2017

CDC Diverts Flight of American Evacuees to Military Base in California as Coronavirus Pandemic Spreads

Wednesday, January 29, 2020 by: Mike Adams

Image result for CDC Diverts Flight of American

Evacuees to Military Base in California as Coronavirus Pandemic Spreads

(Natural News) The CDC ordered a flight of up to 240 American evacuees from the Wuhan coronavirus pandemic region to be diverted to a military base in the United States, reports The Epoch Times.

Upon orders from the CDC, the flight was diverted to March Air Reserve Base in Riverside County, California, yesterday evening (Jan. 28th). Before the flight was diverted by the CDC, it made a stop at a private terminal in Alaska. As TET reports:

The Boeing 747 stopped at a private terminal at Ted Stevens Anchorage International Airport in Alaska before taking off to its final destination. The plane was slated to land at Ontario International Airport, about 35 miles east of Los Angeles, but was diverted by the Centers for Disease Control (CDC). Curt Hagman, chairman of the San Bernardino County Board of Supervisors and a commissioner at Ontario airport, said that CDC officials alerted him to the diversion.

After the flight was diverted to the military base, the CDC refused to comment on why the sudden change of plans. However, a statement from the U.S. Department of Defense, via press secretary Alyssa Farah, stated:

March Air Reserve Base and the Department of Defense stand ready to provide housing support to [the Department of Health and Human Services] as they work to handle the arrival of nearly 200 people, including Department of State

employees, dependents and US citizens evacuated from Wuhan, China.

Before being diverted, the flight was originally headed for Ontario International Airport in California, which is designated by the federal government as the “official repatriation center” for California, according to news channel KESQ. But the CDC intervened and diverted the flight to the military base instead.

“Shortly after the plane landed personnel in biological hazard suits helped passengers load into buses and emergency vehicles on the tarmac,” reports CNBC.com.

The original plan had been to quarantine incoming passengers at the Ontario facility for up to two weeks. “Before the plane’s arrival itinerary was changed to a March ARB, a CDC official had told CNN the passengers may be forced to

stay in isolation between three days and two weeks,” reports KESQ. “It was unclear whether the same procedure would be followed at the base.”

In other words, it now seems possible or even likely that up to 240 Americans who have just returned from the coronavirus pandemic quarantine region of Wuhan will be released into the public population.

Here’s a current map of the outbreak happening in China:

**Confirmed: Pentagon's Defense Threat
Reduction Agency now activated as a "force
multiplier" to provide "additional surveillance"
alongside the CDC**

**We now have confirmation that the U.S. military's Defense
Threat Reduction Agency (DTRA) has now been activated,
serving as a "force multiplier" to provide "additional
surveillance" alongside the CDC, according to a DoD
official who spoke with CNBC. Additionally, Dr. Kayvon
Modjarrad, director of the emerging infectious diseases
branch at Walter Reed Army Institute of Research, told CNBC:**

***While typically the CDC is the lead on these things, the military
has reference laboratories pretty much on every continent
and specifically, we have labs in all of Southeast
Asia, so we act as a force multiplier in providing
additional surveillance to the CDC's efforts...***

**Strangely, the Department of Defense is going out of its way to
state that military personnel will not be in contact with
evacuees. From DoD press secretary Alyssa Farah:**

***Health and Human Services (HHS) is responsible for all care of
the evacuees, and DoD personnel will not be directly in
contact with the evacuees and evacuees will not have
access to any base location other than their assigned
housing...***

Not clear how the CDC can screen incoming Americans if some people show no symptoms during incubation

The CDC says they are screening all returning passengers at multiple stages of the flight. The stop in Alaska was conducted so that the CDC could conduct initial screening of people for possible symptoms, for example.

However, given that the coronavirus exhibits an incubation period of up to 14 days, during which infected patients are contagious even if they show no obvious symptoms, it remains unanswered how the CDC could possibly screen people if they are showing no symptoms.

It was revealed yesterday that the coronavirus can spread through casual contact. It is also documented that around 2% of infected patients show no symptoms such as fever or coughing.

According to TET, the CDC says the incoming Americans will be “monitored for up to two weeks.” Does that mean they will be released into the population? Because there’s nothing from the CDC that describes any sort of ongoing quarantine for those individuals who were diverted to the March Air Reserve Base.

I have received ZERO cooperation on this request (below):

Let's talk? 740-366-9013 Clark Tibbs

-

Just for the USA alone, we will need **700 MILLION DOSES**. We claim, Quality, Speed and Volume compared to other Vaccine claims.

-

Hello Selected **US HOUSE and Senate** Staff Members and CDC and BARDA and AHRQ and NIH and VHA,

-

Sen. Schumer: CDC needs to access funding to fight coronavirus ... Jan., 26, 2020 at 1:40pm ET
<https://www.silive.com/news/2020/01/schumer-cdc-needs-to-access-funding-to-fight-coronavirus.html>

-

STATEN ISLAND, N.Y. -- Senator Charles Schumer (D-New York) wants the Centers for Disease Control (CDC) to use funding he allocated to fight the spread of the deadly coronavirus, for which there are three confirmed cases in the United States.

-

Schumer recently negotiated a budget deal that put **\$85 million** in the CDC Infectious Disease Rapid Response Reserve Fund to ward off serious public health threats. He wants the CDC to be able to access these funds now. But for that to happen, a “public health emergency” must be declared by the U.S. Department of Health and Human Services (HHS).

NOTE: Our Team of Experts will need **\$2 million** of this **\$85 million** - All of the vaccine-protection money will go directly to these Authors.

My name is Clark Tibbs in Ohio. I hope to hear from you and your Team with any questions and how you and/or any PhDs, MDs, DOs or MBBSs can participate in this **Vaccine Development and Clinical Trial**.

Hello Whistleblower.Coordinator@oig.hhs.gov and **ALL US Senators & House Members**

... I think this is an Emergency

..... please call these people and ask them **if and when** they plan to fund this **nVoC Vaccine Offer?**

Special Assistant to AFauci@NIAID.NIH.GOV ... Patty Conrad at **(301) 496-6416** conradpa@niaid.nih.gov

I hope that NIH is funding several **nCoV vaccine candidates** that include a few vaccine candidates that use this T-4 Phage Head Vaccine Platform ... ??? Please see this Attachment.

Question: Can ... **BARDA** and/or **AHRQ** assist with some of the Emergency Funding?

10th January 2020

This posting is communicated by Edward C. Holmes, University of Sydney on behalf of the consortium led by Professor Yong-Zhen Zhang, Fudan University, Shanghai

The Shanghai Public Health Clinical Center & School of Public Health, in collaboration with the Central Hospital of Wuhan, Huazhong University of Science and Technology, the Wuhan Center for Disease Control and Prevention, the National Institute for Communicable Disease Control and Prevention, Chinese Center for Disease Control, and the University of Sydney, Sydney, Australia is releasing a coronavirus genome from a case of a respiratory disease from the Wuhan outbreak. The sequence has also been deposited on [GenBank](#) (accession MN908947) and will be released as soon as possible.

The sequence can be downloaded here:

[WH-Human_1.fasta.gz](#) (8.9 KB – this is a fasta file compressed using gzip. Uncompress using gzip -d WH-Human_1.fasta.gz)

Disclaimer:

Please feel free to download, share, use, and analyze this data. We ask that you communicate with us if you wish to publish results that use these data in a journal. If you have any other questions –then please also contact us directly.

Professor Yong-Zhen Zhang,
Shanghai Public Health Clinical Center & School of Public Health,
Fudan University, Shanghai, China.

Look at this ... '**dreadful**' ... and globally-important Report:

Report 2: Estimating the *potential total number* of novel Coronavirus cases in Wuhan City, China
<https://www.imperial.ac.uk/mrc-global-infectious-disease-analysis/news--wuhan-coronavirus>

-
-
Imperial College London today in a new estimate of 2019-nCoV activity in Wuhan said the city probably now has 4,000 symptomatic cases. **The report's 95% confidence interval ranges from 1,000 to 9,700.**

Pending request memo from IEA

Today, the U.S. Department of Health and Human Services' Office of Intergovernmental and External Affairs would like to invite you to a call on the outbreak of 2019-nCoV with Secretary Azar, HHS public health officials, and subject matter experts from the U.S. Departments of Transportation and Homeland Security. This call will update Governors on the Administration's response to this outbreak and provide a forum for Governors to ask questions of senior Administration officials.

This invitation is for the Governor only, and it not transferable.

Topic: Call with Governors on 2019-nCoV

Objective: Provide the Governors with a status update of the current Administration response to the 2019-nCoV

AMA's Role: Present the Administration's action plan on responding to the ongoing 2019-nCoV outbreak

Project Lead (IOS Senior Staff): Laura Trueman, Director, IEA

Working Project Lead (Name, Cell and email): Darcie Johnston, 202-853-0582, Darcie.Johnston@hhs.gov

Is Conference Call Line needed? Yes

Who will initiate the conference call? HHS

Who will provide Briefing materials? IEA

HHS Staff Attendees: Laura Trueman, Darcie Johnston, Dr. Robert Redfield, Dr. Nancy Messonnier

External Attendees: Senior U.S. Department of Transportation official; Senior Department of Homeland Security official

Schedule Request Justification: The purpose of this call is to communicate the Administration's action plan for responding to the ongoing 2019-nCoV outbreak and answer questions that the Governors may have on HHS and Administration actions.

Today, the U.S. Department of Health and Human Services' Office of Intergovernmental and External Affairs would like to invite you to a call on the outbreak of 2019-nCoV with Secretary Azar, HHS public health officials, and subject matter experts from the U.S. Departments of Transportation and Homeland Security. This call will update Governors on the Administration's response to this outbreak and provide a forum for Governors to ask questions of senior Administration officials.

This invitation is for the Governor only, and it not transferable.

D.O.D. Secretly Buying Up American Food Supply

In this interview segment from the Wednesday, January 29, 2020 edition of *Infowars*, host Alex Jones talked to Keith Bansemer of *My Patriot Supply* about how important it is for patriots to have access to storable food and clean water in case of global pandemics such as the coronavirus.

And as the DOD is buying up prepper supplies en masse, they are obviously planning for a worst case scenario in the near future, probably involving a societal meltdown.
