

Case No. 2020-00717-FOIA-OS
American Oversight v. HHS, Civil No. 20-1169

April 7, 2022

Austin Evers
Executive Director
American Oversight
Sent via email: foia@americanoversight.org

Dear Mr. Evers:

This letter is the eleventh interim response to your March 18, 2020, Freedom of Information Act (FOIA) request.

American Oversight requests that HHS produce the following records as soon as practicable, and at least within twenty business days:

All email communications (including email messages, complete email chains, email attachments, calendar invitations) sent by the government officials specified below containing any of the following key terms:

1. Coronavirus
2. Corona
3. Virus
4. Disease
5. Pandemic
6. Epidemic
7. Outbreak
8. containment
9. "public health emergency"
10. "COVID-19"
11. "COVID 19"
12. COVID19
13. SARS
14. "2019-nCoV"
15. POTUS
16. Test
17. Tests
18. Testing
19. EUA
20. Emergency
21. Wuhan
22. Hoax
23. Hubei
24. Princess
25. Cruise
26. Kirkland
27. Seattle
28. "New Rochelle"
29. "BioGen Conference"
30. CPAC
31. AIPAC
32. RNA

33. "Extraction kits"
34. Roche
35. Vaccine
36. Antiviral
37. Antiretroviral
38. Quarantine
39. Distancing
40. Isolation
41. N95
42. Mask
43. Respirator

Government Officials

1. Alex Azar, Secretary
2. Brian Harrison, Chief of Staff
3. Eric Hargan, Deputy Secretary
4. Jerome Adams, Surgeon General
5. Robert Kadlec, Assistant Secretary for Preparedness and Response
6. John Brooks, Senior Advisor to the Secretary for Drug Pricing Reform

On February 10, 2021, you narrowed your request per the following:

Eliminate attachments, documents regarding "Red Dawn" and obvious marketing and news bulletins

- a. Limit the date range of the following key terms as stand-alone search terms from January 15, 2020 through February 29, 2020. ~~[[Limit responsive records to those that also include: (Test OR Tests OR Vaccine OR EUA OR "Emergency Use" OR Shortage OR Shortages OR Supplies OR "the WHO" OR States OR Governor OR Governors OR PPE OR Ventilators OR Respirators OR Swabs OR DPA OR "Defense Production Act" OR Trump OR Pence OR Jared OR Kushner OR "White House" OR "the WH")]]~~

- i. Coronavirus
- ii. Corona
- iii. "COVID-19"
- iv. "COVID 19"
- v. COVID19
- vi. "2019-nCoV"

~~vii. SARS~~

~~viii. Epidemic~~

~~ix. Pandemic~~

~~x. Outbreak~~

~~xi. "Public Health Emergency"~~

-

- b. After March 1, 2020, for the key terms listed in Column A below (the same search terms as identified above), limit responsive records to those that also include one or more of the terms from Column B:

Column A	Column B
• Coronavirus • Corona • “COVID-19” • “COVID 19” • COVID19 • “2019-nCOV” • SARS • Epidemic • Pandemic • Outbreak • “Public Health Emergency”	• Test • Tests • Vaccine • Antiviral • Antiretroviral • EUA • “Emergency Use” • Shortage • Shortages • Supplies • “Emergency Use” • EUA • “the WHO” • “W.H.O.” • “World Health Organization” • States • Governor • Governors • PPE • Ventilators • Respirators • Swabs • DPA • “Defense Production Act”

- c. For the key terms that are in Column A below, limit responsive records to those that also include one or more of the terms from Column B, for the full time period of the search.

Column A	Column B
• Test • Tests • “Extraction Kits”	• CV19 • “CV-19” • C19 • “C-19” • Roche • RNA • Shortage • Shortages • Supplies • “Emergency Use” • “EUA” • “the WHO” • “W.H.O.” • “World Health Organization” • States • Governor • Governors • Kit • Kits • DPA • “Defense Production Act”

- d. ~~[~500 records] For the key terms that are in Column A below, limit responsive records to those that also include one or more of the terms from Column B, for the full time period of the search.~~

Column A	Column B
---------------------	---------------------

• Vaccine • Antiviral • Antiretroviral	• CV19 • “CV-19” • C19 • “C-19” • “EUA” • “Emergency Use” • “DPA” • “Defense Production Act” • “the WHO” • “W.H.O.” • “World Health Organization”
--	---

e. ~~[~50 records] For the key term “Emergency” limit responsive records to those that also include “DPA” or “Defense Production Act,” for the full time period of the search.~~

f. For the following key terms, please limit the time period as indicated:

i. Princess - February 1, 2020, through March 1, 2020 ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

~~ii. [~150 records] Kirkland - February 24, 2020, through March 24, 2020~~

~~iii. [~750 records] Seattle - February 24, 2020, through March 24, 2020~~

~~iv. [~200 records] “New Rochelle” - March 1, 2020, through March 31, 2020~~

~~v. [~~<50 records~~] “BioGen Conference” - March 1, 2020, through March 31, 2020~~

~~vi. [~~<50 records~~] CPAC - February 21, 2020, through March 21, 2020~~

~~vii. [~~<50 records~~] AIPAC - February 21, 2020, through March 21, 2020~~

g. For the following key terms, please run the search without any modifiers and using the full date range (i.e., no changes from original search)

i. Wuhan ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

ii. Hoax ~~[[no changes]]~~

iii. Hubei ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

iv. POTUS ~~[[no changes]]~~

v. Cruise ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

vi. Quarantine ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

vii. Distancing ~~[[Limit responsive records to those that also include: Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

~~viii. Isolation~~

ix. N95 ~~[[Limit responsive records to those that also include: (CV19 OR “CV-19” OR C19 OR “C-19” OR Shortage OR Shortages OR Supplies OR “Emergency Use” OR “EUA” OR “the WHO” OR States OR Governor OR Governors OR DPA OR “Defense Production Act” OR Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

x. Mask ~~[[Limit responsive records to those that also include: (CV19 OR “CV-19” OR C19 OR “C-19” OR Shortage OR Shortages OR Supplies OR “Emergency Use” OR “EUA” OR “the WHO” OR States OR Governor OR Governors OR DPA OR “Defense Production Act” OR Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

xi. Respirator ~~[[Limit responsive records to those that also include: (CV19 OR “CV-19” OR C19 OR “C-19” OR Shortage OR Shortages OR Supplies OR “Emergency Use” OR “EUA” OR “the WHO” OR States OR Governor OR Governors OR DPA OR “Defense Production Act” OR Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

xii. Testing ~~[[Limit responsive records to those that also include: (CV19 OR “CV-19” OR C19 OR “C-19” OR Shortage OR Shortages OR Supplies OR “Emergency Use” OR “EUA” OR “the WHO” OR States OR Governor OR Governors OR DPA OR “Defense Production Act” OR Trump OR Pence OR Jared OR Kushner OR “White House” OR “the WH”]]~~

~~xiii. Containment~~

h. Cut the following key terms completely: [[no changes]]

- i. Disease
- ii. Virus

The Department processed **412 pages** of potentially responsive records captured in the agency's search for FOIA request 2020-00717-FOIA-OS. After a careful review of these pages, I have determined to release **254 pages** to you in their entirety and I am further releasing **55 pages** in part, with portions redacted, pursuant to Exemptions (b)(5), and (b)(6) of the FOIA (5 U.S.C. §552 (b)(5) and (b)(6)). Furthermore, I have determined that **103 pages** should be sent for consultation to others and returned to this Department for final disposition.

FOIA exemption (b)(5) protects inter-agency or intra-agency memoranda or letters which would not be available by law to a party other than an agency in litigation with the agency. This exemption protects documents that would be covered by any privilege an agency could assert in a civil proceeding. These privileges include, among others, the deliberative process privilege, the attorney-client privilege, the attorney work-product privilege and the presidential communications privilege.

FOIA exemption (b)(6) permits a Federal agency to withhold information and records about individuals in "personnel and medical files and similar files, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." The definition of "similar files" has historically been broadly interpreted to include a wide variety of files, and the United States Supreme Court has held that Congress intended the term "similar files" to be interpreted broadly, rather than narrowly. I have analyzed these records and find they meet the threshold requirement of this exemption. Additionally, I have reviewed and weighed the public interest in disclosure of this information against the privacy interest in nondisclosure, and found that the privacy interest outweighs the public's interest in disclosure.

We will continue to review the remaining records as efficiently and expeditiously as possible, consistent with our available resources. Should you have questions or concerns regarding the Department's response and/or the processing of your request, any such issues should be communicated to your legal counsel and Department of Justice Attorney representing the Department in this matter.

Sincerely yours,

Alesia Y. Williams
Director, FOIA Appeals and Litigations
FOI/Privacy Act Division

COVID-19 Response update Mar 8, 2020

INTERNAL - NOT FOR FURTHER DISTRIBUTION

Daily Report Summary

Where feasible, changes in numbers will be show in red. For the US case counts (below), all counts will be shown in black, since very few are changing daily.

- # of confirmed and presumptive US cases of COVID-19: **336** including:
 - 287 confirmed or presumptive (i.e., positive by CDC test performed in state lab, pending confirmation at CDC) US cases presenting in the US**, locations of detection include Arizona (5), California (64), Colorado (9), Florida (6), Georgia (6), Hawaii, Illinois (6), Indiana, Kentucky, Maryland (3), Massachusetts (9), Minnesota, Missouri, Nebraska (2), Nevada (2), New Hampshire (2), New Jersey (6), NYC (2), New York State (28), North Carolina (2), Oklahoma, Oregon (7), Pennsylvania (4), Rhode Island (3), South Carolina (2), Tennessee, Texas (8), Washington (102), Washington, DC, Wisconsin
 - 3 among evacuees from Hubei Province**
 - 46 among evacuees from Diamond Princess**, including:
 - 29 diagnosed in Japan
 - 17 diagnosed after arrival in US
 - 21 cases on Grand Princess** that occurred in international waters but are being reported in the media as U.S. cases. Not included in our U.S. case count of 336
- # of total confirmed cases in China: **80,813**
- # of total confirmed deaths in China: **3,073**

Domestic Updates

1. US COVID-19 Cases

- 30 jurisdictions (28 states) reporting 336 US confirmed or presumptive cases
- 3 cases among evacuees from Hubei repatriation cohort
- 46 cases among evacuees from Diamond Princess repatriation cohort (29 diagnosed in Japan, 17 diagnosed after arrival in US)
- 21 cases on Grand Princess that occurred in international waters but are being reported in the media as U.S. cases. Not included in our U.S. case count of 336

International Updates

Countries or territories with reported laboratory-confirmed COVID-19 cases and deaths.

International conveyance (Diamond Princess)	696	0	6	0	Clusters of cases	1
Grand total	21,114	3,633	413	78		

*Numbers include both domestic and repatriated cases

†The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

‡Case classifications are based on [WHO case definitions](#) for COVID-19.

§Transmission classification is based on WHO analysis of available official data and may be subject to reclassification as additional data become available. Countries/territories/areas experiencing multiple types of transmission are classified in the highest category for which there is evidence; they may be removed from a given category if interruption of transmission can be demonstrated. It should be noted that even within categories, different countries/territories/areas may have differing degrees of transmission as indicated by the differing numbers of cases and other factors. Not all locations within a given country/territory/area are equally affected.

Terms:

- **Community transmission** is evidenced by the inability to relate confirmed cases through chains of transmission for a large number of cases, or by increasing positive tests through sentinel samples (routine systematic testing of respiratory samples from established laboratories).
- **Local transmission** indicates locations where the source of infection is within the reporting location.
- **Imported cases only** indicates locations where all cases have been acquired outside the location of reporting.
- **Under investigation** indicates locations where type of transmission has not been determined for any cases.
- **Interrupted transmission** indicates locations where interruption of transmission has been demonstrated (details to be determined)

** "Territories" include territories, areas, overseas dependencies and other jurisdictions of similar status

§ NOTE: This report is from March 7, so the case count of 213 was current at the time of reporting to WHO for inclusion in this report. The current US figure is 336 including: 287 confirmed or presumptive cases in the US, 3 cases among Hubei repatriation cohort, and 46 cases among the Diamond Princess repatriation cohort.

Very Respectfully,

Secretary's Operations Center

Subject:	Re: [External] Re: Diagnostic testing summary statement
Date:	2020/03/08 11:19:44
Priority:	Normal
Type:	Note

Pardon the delay, busy day here in town yesterday

It really depends on the country. You can imagine Europe has a much smaller catchment and much more progressive country laboratory regulations.

I don't know enough about S. Korea and Chinese processes, but they were trying to diagnose and care for patients, which was tremendous and China has a lot of people they can mobilize.

The US has a lot of regulations regarding Laboratory developed tests (LDT), so much so that there is also movement to have even more restriction, which would really cripple us in a future pandemic (and favor companies). Our tests are 4 primers which also decrease the throughput. We also don't have a lot of transparency on the ones that are being developed at private laboratories, and the cost will also likely be high. The one here at Emory will be laboratory developed and pretty inexpensive.

Hope that helps.

Colleen

Subject: [External] Re: Diagnostic testing summary statement

This is fantastic! Do you have any perspectives on why other countries were able to stand up much more testing capacity in a shorter amount of time though?

VADM Jerome Adams
20th US Surgeon General

On Mar 6, 2020, at 9:36 PM, Kraft, Colleen S <(b)(6)@emory.edu>wrote:

Dear Jerome and Dennis,

It was a real privilege to meet you both today.

Draft on a short summary for diagnostic testing:

Diagnostic testing for SARS-CoV-2 has moved at a more rapid pace than any previous diagnostic test for a novel virus. The Centers for Disease Control and Prevention (CDC) have developed the molecular diagnostic test in the United States while working to make the capability available across the public health system at state public health departments. The current state of diagnostic testing for SARS-CoV-2 is expanding widely, which will support the ability for practitioners to diagnose COVID-19 as community transmission occurs at this phase of the epidemic. Testing for the disease will soon be widely available from state public health departments, academic medical centers, and the private sector. The FDA has streamlined the process for the use of these tests in patients by an Emergency Use Authorization. CMS has created coding that will be able to be reimbursed by Medicare and other health insurers. All of these aspects mean that the American public will soon have the ability to get this diagnosis. Remember, good face, hand and respiratory hygiene can protect against transmission of the COVID-19 disease.

Sincerely,

Colleen

“The secret of success is to find a need and fill it, to find a hurt and heal it, to find somebody with a problem and offer to help solve it.” ~ Robert H. Schuller

“We have a perfectly coordinated and fine tuned plan at the White House for our attack on CoronaVirus...” ~ President Trump
(March 8, 2020) <https://twitter.com/realDonaldTrump/status/1236634209516752896>

There is a sense of urgency to prevent the spread of Coronavirus because it directly affects the physical health of people.

Why the 1# Vulnerability for Cyber Attacks Will Be Apathy

(March 17, 2015) https://protect2.fireeye.com/url?k=4daf070c-11fb1e70-4daf3633-0cc47adc5fa2-f5a4079181f09020&u=http://www.circleid.com/posts/20150317_why_the_1_vulnerability_for_cyber_attacks_will_be_apathy/

When WNS (Web Network Shield) began in 2014, there was little sense of urgency to prevent the spread of URA (unauthorized remote access) because there was a public perception that URA was limited to cyber-space and IoT devices. The unsuspecting public believed it didn't directly affect the physical health of people.

For the past decade, evidence has been mounting to challenge the public misperception that URA doesn't affect the physical health of people.¹

In the spirit of the seven (7) possibly eight (8) national emergencies, the Sherman Act, two Presidential executive orders, a Supreme Court decision and the U.S. Constitution,² Web Network Shield looks forward to working with the federal government to protect the U.S. citizen's fourth amendment rights to security and prevent all forms of URA in the U.S.

“An ounce of prevention is worth a pound of cure.” ~ Benjamin Franklin

WNS provides the following protection benefits:

- There is no need to obfuscate your email address because WNS protects your email address from phishing scams by immediately detecting and preventing all forms of URA (unauthorized remote access);
- There is no need to repeatedly change your username, password, or email address because WNS protects your email address by immediately detecting and preventing all forms of URA;
- WNS eliminates the need to update your security software (i.e. download malware and spyware URLs on your hard drive) because WNS debugs all forms of URA. Downloading more than 350,000 malware strains daily will “crash” your device’s hard drive and render your device unusable;
- Protects your information against all forms of URA even if the attacker has your user name, password, and IP address.
- Provides a browser speed not throttled by spyware and/or extensions used to track user activity;
- Pass a penetration test from all forms of URA;
- Immediately detect and prevent data breaches against all forms of URA;
- Secure a data transmission up to 200 feet.

“The cyber-attacks will continue until cyber-security improves” ~ a Hacker

The WNS web browser is free to download.³ If preventing all forms of URA and the continuation of a seven (7) time national emergency is important to you, Web Network Shield kindly suggests you express your concerns by speaking words of encouragement, support, and appreciation to your Representative <https://www.house.gov/representatives/find-your-representative>, Senator https://www.senate.gov/general/contact_information/senators_cfm.cfm, U. S. Commercial Service <https://2016.export.gov/usoffices/index.asp> or Web Network Shield 480-318-8020.

Web Network Shield mission statement:

Web Network Shield (WNS) seeks to become customer-focused, focusing our strategies and budgets on the technologies, systems and processes that win, serve and retain customers by immediately detecting and preventing all forms of URA (unauthorized remote access).

The following is a sample of the mounting evidence that URA can affect the physical health of people.

U.S. probes cyber attack on water system

(November 19, 2011) <https://protect2.fireeye.com/url?k=73f44bd9-2fa052a5-73f47ae6-0cc47adc5fa2-a736c2bfd8843eff&u=https://www.reuters.com/article/us-cybersecurity-attack-idUSTRE7AH2C320111119>

US calls for cyber reform after massive hack

(June 6, 2015) <https://phys.org/news/2015-06-cyber-reform-massive-hack.html>

"The fact is, we need the United States Congress to come out of the dark ages and come into the 21st century to make sure we have the kinds of defenses that are necessary to protect a modern computer system..."

"It's impossible to overstate this threat..." she said.

"Trillions of dollars, the private data of every single American, even the security of critical infrastructure like our power grid, nuclear plants and drinking water are all at risk."

Hackers force water utilities to sink or swim

(March 28, 2019) <https://protect2.fireeye.com/url?k=93edf6bd-cfb9efc1-93edc782-0cc47adc5fa2-0610704a222eeb41&u=https://www.eenews.net/stories/1060131769>

In many emergency planning exercises, it isn't the lack of electricity that triggers chaos and widespread casualties. It's the lack of clean water that forces people from their homes.

'Scotch tape and bubble gum'

Even if supply interruptions or chemical releases don't become a full-blown crisis, a hack that causes people to lose faith in the quality of their water is "certainly within the realm of possibility" for nation-state hackers, he said.

At least 20 breaches have affected water organizations and over 81,200 records

(March 29, 2019)

§ 1. Trusts, etc., in restraint of trade illegal; penalty Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. Every person who shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding \$100,000,000 if a corporation, or, if any other person, \$1,000,000, or by imprisonment not exceeding 10 years, or by both said punishments, in the discretion of the court.

PROTECTING CYBER SECURITY

(2000?) <https://protect2.fireeye.com/url?k=2fa2e0fe-73f6f982-2fa2d1c1-0cc47adc5fa2-e8e226617f5138fc&u=https://clintonwhitehouse5.archives.gov/WH/EOP/NSC/html/nsc-22.html>

May 1998

President Clinton signs PDD-62, creating the position of National Coordinator for Security, Critical Infrastructure, and Counter Terrorism in the National Security Council, charging the National Coordinator with coordinating Federal and private sector efforts to counter emerging threats to the Nation.

July 1996

Establishment of President's Commission on Critical Infrastructure Protection.

President George W. Bush

NATIONAL SECURITY PRESIDENTIAL DIRECTIVE/NSPD-54

HOMELAND SECURITY PRESIDENTIAL DIRECTIVE/HSPD-23

(January 8, 2008) <https://protect2.fireeye.com/url?k=45af2520-19fb3c5c-45af141f-0cc47adc5fa2-8321a5d2b3f0cdf7&u=https://nsarchive2.gwu.edu//dc.html?doc=5026680-George-Bush-National-Security-Presidential>

Pg. 7 (24)

The Secretary of Homeland Security, supported by the Director of US-CERT, and the heads of Sector-Specific Agencies, as defined by and consistent with HSPD-7, shall conduct outreach to the private sector on cybersecurity threat and vulnerability information. (U)

Hillicon Valley: Justices rule states can force online retailers to collect sales

(June 21, 2018) <http://thehill.com/policy/technology/overnights/393559-hillicon-valley-sctus-rules-states-can-force-online-retailers>

LANDMARK SUPREME COURT RULING ON ONLINE SALES TAX: A new Supreme Court ruling today could upend a major advantage e-commerce companies like Amazon have had over brick-and-mortar retail stores.

In a 5-4 ruling, the court overturned a 1992 court precedent barring states from requiring businesses that have no physical presence in the state to collect their sales taxes.

"Between targeted advertising and instant access to most consumers via any internet-enabled device, 'a business may be present in a state in a meaningful way without' that presence 'being physical in the traditional sense of the term,' Kennedy said.

"A virtual showroom can show far more inventory, in far more detail, and with greater opportunities for consumer and seller interaction than might be possible for local stores."

The Constitution of the United States

(September 25, 1789) <https://protect2.fireeye.com/url?k=408e6cda-1cda75a6-408e5de5-0cc47adc5fa2-6359190bf34bc4eb&u=http://constitutionus.com/>

Section 9

2: *The Privilege of the Writ of Habeas Corpus shall not be suspended, unless when in Cases of Rebellion or Invasion the public Safety may require it.*

6: *No Preference shall be given by any Regulation of Commerce or Revenue to the Ports of one State over those of another: nor shall Vessels bound to, or from, one State, be obliged to enter, clear, or pay Duties in another.*

Amendment IV

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue, but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

(1791) <https://protect2.fireeye.com/url?k=4a65c8a6-1631d1da-4a65f999-0cc47adc5fa2-470e75488e390d19&u=https://billofrightsinstitute.org/founding-documents/bill-of-rights/>

³ The Federal government will subsidize the cost of WNS in a program similar to subsidized cell phones, HUD Section 8 rent, and medical insurance.

Secure by Design

"The secret of success is to find a need and fill it, to find a hurt and heal it, to find somebody with a problem and offer to help solve it." ~ Robert H. Schuller

"We have a perfectly coordinated and fine tuned plan at the White House for our attack on CoronaVirus..." ~ President Trump

(March 8, 2020) <https://twitter.com/realDonaldTrump/status/1236634209516752896>

There is a sense of urgency to prevent the spread of Coronavirus because it directly affects the physical health of people.

Why the 1# Vulnerability for Cyber Attacks Will Be Apathy

(March 17, 2015) https://protect2.fireeye.com/url?k=f79eaa47-abca836c-f79e9b78-0cc47a6d17cc-05c7312b189722aa&u=http://www.circleid.com/posts/20150317_why_the_1_vulnerability_for_cyber_attacks_will_be_apathy/

When WNS (Web Network Shield) began in 2014, there was little sense of urgency to prevent the spread of URA (unauthorized remote access) because there was a public perception that URA was limited to cyber-space and IoT devices. The unsuspecting public believed it didn't directly affect the physical health of people.

For the past decade, evidence has been mounting to challenge the public misperception that URA doesn't affect the physical health of people.¹

In the spirit of the seven (7) possibly eight (8) national emergencies, the Sherman Act, two Presidential executive orders, a Supreme Court decision and the U.S. Constitution,² Web Network Shield looks forward to working with the federal government to protect the U.S. citizen's fourth amendment rights to security and prevent all forms of URA in the U.S.

"An ounce of prevention is worth a pound of cure." ~ Benjamin Franklin

WNS provides the following protection benefits:

- There is no need to obfuscate your email address because WNS protects your email address from phishing scams by immediately detecting and preventing all forms of URA (unauthorized remote access);
- There is no need to repeatedly change your username, password, or email address because WNS protects your email address by immediately detecting and preventing all forms of URA;
- WNS eliminates the need to update your security software (i.e. download malware and spyware URLs on your hard drive) because WNS debugs all forms of URA. Downloading more than 350,000 malware strains daily will “crash” your device’s hard drive and render your device unusable;
- Protects your information against all forms of URA even if the attacker has your user name, password, and IP address.
- Provides a browser speed not throttled by spyware and/or extensions used to track user activity;
- Pass a penetration test from all forms of URA;
- Immediately detect and prevent data breaches against all forms of URA;
- Secure a data transmission up to 200 feet.

“The cyber-attacks will continue until cyber-security improves” ~ a Hacker

The WNS web browser is free to download.³ If preventing all forms of URA and the continuation of a seven (7) time national emergency is important to you, Web Network Shield kindly suggests you express your concerns by speaking words of encouragement, support, and appreciation to your Representative <https://www.house.gov/representatives/find-your-representative>, Senator https://www.senate.gov/general/contact_information/senators.cfm, U. S. Commercial Service <https://2016.export.gov/usoffices/index.asp> or Web Network Shield 480-318-8020.

Web Network Shield mission statement:

Web Network Shield (WNS) seeks to become customer-focused, focusing our strategies and budgets on the technologies, systems and processes that win, serve and retain customers by immediately detecting and preventing all forms of URA (unauthorized remote access).

The following is a sample of the mounting evidence that URA can affect the physical health of people.

¹ Anxiety, depression and PTSD: The hidden epidemic of data breaches and cyber crimes

U.S. probes cyber attack on water system

(November 19, 2011) <https://protect2.fireeye.com/url?k=790fc4d0-255bedfb-790ff5ef-0cc47a6d17cc-42c69f4d07e2b519&u=https://www.reuters.com/article/us-cybersecurity-attack-idUSTRE7AH2C320111119>

US calls for cyber reform after massive hack

(June 6, 2015) <https://phys.org/news/2015-06-cyber-reform-massive-hack.html>

"The fact is, we need the United States Congress to come out of the dark ages and come into the 21st century to make sure we have the kinds of defenses that are necessary to protect a modern computer system..."

"It's impossible to overstate this threat..." she said.

"Trillions of dollars, the private data of every single American, even the security of critical infrastructure like our power grid, nuclear plants and drinking water are all at risk."

Hackers force water utilities to sink or swim

(March 28, 2019) <https://protect2.fireeye.com/url?k=72ff56cf-2eab7fe4-72ff67f0-0cc47a6d17cc-60dea0681d449e78&u=https://www.eenews.net/stories/1060131769>

In many emergency planning exercises, it isn't the lack of electricity that triggers chaos and widespread casualties. It's the lack of clean water that forces people from their homes.

'Scotch tape and bubble gum'

Even if supply interruptions or chemical releases don't become a full-blown crisis, a hack that causes people to lose faith in the quality of their water is "certainly within the realm of possibility" for nation-state hackers, he said.

At least 20 breaches have affected water organizations and over 81,200 records

(March 29, 2019)

² Obama declares cyber attacks a 'national emergency'

(April 5, 2015) <http://thehill.com/policy/cybersecurity/237581-obama-declares-cyberattacks-a-national-emergency>

President Obama Extends National Emergency on Foreign Cyber Threat Actors

(April 1, 2016) <https://protect2.fireeye.com/url?k=5bd959ec-078d70c7-5bd968d3-0cc47a6d17cc-a671508459f11a9a&u=http://interactivegov.com/articles/president-obama-extends-national-emergency-on-foreign-cyber-threat-actors>

Notice Regarding the Continuation of the National Emergency with Respect to Significant Malicious Cyber-Enabled Activities

(March 29, 2017) <https://protect2.fireeye.com/url?k=6c611931-3035301a-6c61280e-0cc47a6d17cc-5038e1f3bde01001&u=https://www.whitehouse.gov/the-press-office/2017/03/29/notice-regarding-continuation-national-emergency-respect-significant>

These significant malicious cyber-enabled activities continue to pose an unusual and extraordinary threat to the national security, foreign policy, and economy of the United States. For this reason, the national emergency declared on April 1, 2015, must continue in effect beyond April 1, 2017.

Notice Regarding the Continuation of the National Emergency with Respect to Significant Malicious Cyber-Enabled Activities

(March 27, 2018) <https://protect2.fireeye.com/url?k=1942ba24-4516930f-19428b1b-0cc47a6d17cc-d7296d846e81fd21&u=https://www.whitehouse.gov/presidential-actions/notice-regarding-continuation-national-emergency-respect-significant-malicious-cyber-enabled-activities/>

These significant malicious cyber-enabled activities continue to pose an unusual and extraordinary threat to the national security, foreign policy, and economy of the United States.

Executive Order on Imposing Certain Sanctions in the Event of Foreign Interference in a United States Election

(September 12, 2018) <https://protect2.fireeye.com/url?k=cfa9a105-93fd882e-cfa9903a-0cc47a6d17cc-43844a8721a97e5b&u=https://www.whitehouse.gov/presidential-actions/executive-order-imposing-certain-sanctions-event-foreign-interference-united-states-election/>

Trump Extends National Cybersecurity Emergency

Says malicious attacks pose "extraordinary" threat

(March 27, 2019) <https://protect2.fireeye.com/url?k=0660dcc4-5a34f5ef-0660edfb-0cc47a6d17cc-9b3e11f5b3ea02d5&u=https://www.mullichannel.com/news/trump-extends-national-cybersecurity-emergency-418884>

In December 2017, President Trump issued an executive order with added steps to address that cybersecurity emergency.

Trump extends national emergency on foreign election interference

(September 11, 2019) <https://protect2.fireeye.com/url?k=75b1f76d-29e5de46-75b1c652-0cc47a6d17cc-17face7ec016f082&u=https://thehill.com/homenews/administration/460821-trump-extends-national-emergency-on-foreign-election-interference>

Trump is extending an emergency declaration that he first issued last September.

Sherman Antitrust Act, 15 U.S.C. §§ 1–7 (2013) (selected provisions)

https://protect2.fireeye.com/url?k=6df13355-31a51a7e-6df1026a-0cc47a6d17cc-2b7d8fd6d1b4ff31&u=http://unclaw.com/chin/teaching/antitrust/statutory_supplement.pdf

§ 1. Trusts, etc., in restraint of trade illegal; penalty Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. Every person who shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding \$100,000,000 if a corporation, or, if any other person, \$1,000,000, or by imprisonment not exceeding 10 years, or by both said punishments, in the discretion of the court.

PROTECTING CYBER SECURITY

(2000?) <https://protect2.fireeye.com/url?k=16c2db31-4a96f21a-16c2ea0e-0cc47a6d17cc-1c92796bb940628a&u=https://clintonwhitehouse5.archives.gov/WH/EOP/NSC/html/nsc-22.html>

May 1998

President Clinton signs PDD-62, creating the position of National Coordinator for Security, Critical Infrastructure, and Counter Terrorism in the National Security Council, charging the National Coordinator with coordinating Federal and private sector efforts to counter emerging threats to the Nation.

July 1996

Establishment of President's Commission on Critical Infrastructure Protection.

President George W. Bush

NATIONAL SECURITY PRESIDENTIAL DIRECTIVE/NSPD-54

HOMELAND SECURITY PRESIDENTIAL DIRECTIVE/HSPD-23

(January 8, 2008) <https://protect2.fireeye.com/url?k=cc324ec8-906667e3-cc327ff7-0cc47a6d17cc-8b2a096a2ae6ebc1&u=https://nsarchive2.gwu.edu/dc.html?doc=5026680-George-Bush-National-Security-Presidential>

Pg. 7 (24)

The Secretary of Homeland Security, supported by the Director of US-CERT, and the heads of Sector-Specific Agencies, as defined by and consistent with HSPD-7, shall conduct outreach to the private sector on cybersecurity threat and vulnerability information. (U)

Hillicon Valley: Justices rule states can force online retailers to collect sales

(June 21, 2018) <http://thehill.com/policy/technology/overnights/393559-hillicon-valley-scotus-rules-states-can-force-online-retailers>

LANDMARK SUPREME COURT RULING ON ONLINE SALES TAX: A new Supreme Court ruling today could upend a major advantage e-commerce companies like Amazon have had over brick-and-mortar retail stores.

In a 5-4 ruling, the court overturned a 1992 court precedent barring states from requiring businesses that have no physical presence in the state to collect their sales taxes.

"Between targeted advertising and instant access to most consumers via any internet-enabled device, 'a business may be present in a state in a meaningful way without' that presence 'being physical in the traditional sense of the term,' Kennedy said.

"A virtual showroom can show far more inventory, in far more detail, and with greater opportunities for consumer and seller interaction than might be possible for local stores."

The Constitution of the United States

(September 25, 1789) <https://protect2.fireeye.com/url?k=834b3685-df1f1fae-834b07ba-0cc47a6d17cc-c3dca639343804c9&u=http://constitutionus.com/>

Section 9

2: *The Privilege of the Writ of Habeas Corpus shall not be suspended, unless when in Cases of Rebellion or Invasion the public Safety may require it.*

6: *No Preference shall be given by any Regulation of Commerce or Revenue to the Ports of one State over those of another: nor shall Vessels bound to, or from, one State, be obliged to enter, clear, or pay Duties in another.*

Amendment IV

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue, but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

(1791) <https://protect2.fireeye.com/url?k=197f6f03-452b4628-197f5e3c-0cc47a6d17cc-b7b9cf712187e95a&u=https://billofrightsinstitute.org/founding-documents/bill-of-rights/>

³ The Federal government will subsidize the cost of WNS in a program similar to subsidized cell phones, HUD Section 8 rent, and medical insurance.

UPDATED: Health officials shift tone on coronavirus, say elderly and sick at risk

By Darius Tahir

03/08/2020 11:47 AM EDT

The government's top infectious disease expert on Sunday said that the coronavirus outbreak is getting worse and warned elderly and sick people to think twice before traveling or circulating in crowds.

The remarks from Anthony Fauci, the director of the National Institute of Allergy and Infectious Diseases, signaled a change in tone from health officials representing the Trump administration, making it clear that the outbreak is past the point where it can be prevented from spreading or easily tracked. That contrasted with the more measured language from some Trump officials including Vice President Mike Pence.

Health officials dominated the Sunday morning shows — a change from last week, when Pence and HHS Secretary Alex Azar made a series of appearances to discuss testing for the virus and other aspects of the administration's response.

"If you get infected, the risk of getting into trouble is considerable, so it's our responsibility to protect the vulnerable," Fauci said on NBC's "Meet the Press." "When I say protect, I mean right now, not wait until things get worse, say 'no large crowds, no long trips, and above all, don't get on a cruise ship.'"

Fauci noted many of the newly confirmed cases showed signs of "community spread," meaning they couldn't be traced back to a single source and suggesting the outbreak is intensifying.

Ben Carson, the neurosurgeon who leads the Department of Housing and Urban Development, said on ABC's "This Week with George Stephanopoulos" that healthy people should go about normal daily activities but noted, "If you are not healthy, think very seriously about attending places where there are crowds."

Fauci's emphatic warning about cruise ships came as public health officials prepared for the arrival of the Grand Princess, which has been held off the California coast due to a coronavirus outbreak and is due to dock at the Port of Oakland as soon as Monday, according to Princess

Cruises and the California Office of Emergency Services.

Of the more than 3,500 people aboard, 19 crew members and two passengers have tested positive for coronavirus. More than 2,400 passengers will undergo health screenings, and about 1,000 California residents will be transferred to a federal facility for testing.

Scott Gottlieb, Trump's former FDA commissioner, predicted the coming weeks will "change the complexion in this country," adding that lockdowns of certain states or cities "are going to need to happen" or health systems will get exhausted and fatalities will rise quickly.

"We have a narrow window of opportunity to implement tough measures to try to push down the scope of the epidemic," Gottlieb said on CBS' "Face the Nation," adding that Americans are probably looking at two months of "difficulty" as the virus rapidly spreads the way it did in Italy and South Korea.

The Associated Press reported late Saturday that the White House overruled a CDC warning that elderly and physically fragile Americans be advised not to fly on commercial airlines. Trump administration officials denied the report.

Current and former administration officials have said President Donald Trump's eagerness to downplay bad news has undercut his own administration's efforts to contain the outbreak. Meanwhile, there were more reports of the virus circulating in communities, with Washington, D.C., reporting its first known case.

Trump on Sunday took to Twitter to express confidence in his administration's response and praised Pence for leading the effort.

Maryland Republican Gov. Larry Hogan on Sunday criticized Trump's communication around the outbreak but also praised Pence and the rest of his team. "Has the president been perfect in his communication? I would say he hasn't communicated the way I would, and the way I might like him to," Hogan said on "Meet the Press." "But I think the rest of the team has been doing a pretty good job."

Surgeon General Jerome Adams said on CNN's "State of the Union" that local leaders have to consider whether to cancel large gatherings, and evaluate telework policies and school closings.

"We're shifting into a mitigation phase, which means that we're helping communities understand, you're going to see more cases. Unfortunately, you're going to see more deaths," Adams said.

Fauci said health officials still hope the coronavirus will burn itself out the way SARS outbreak did in 2003. But he said the coronavirus could reappear seasonally, necessitating a vaccine he said is at least a year away from being deployed.

Priority:	Normal
Type:	Note

I just got off a call from senior reps from KP and HCA requesting immediate consideration for modification of current guidance (CDC and corresponding CMS rules) requiring

1. aerosol level personal protective equipment versus respiratory droplet
2. Furlough policies requiring health care workers to self-quarantine and isolate and permit alignment of work force exposure guidelines with seasonal flu that permits asymptomatic HCW to continue to work while instituting appropriate PPE procedures and posture.
3. Related to 2, characterization to HCW exposures to COVID-19 patients as "High Risk" even when appropriate PPE posture and procedures followed for HCW and patients.
4. 1135 waivers for cross state licensed telehealth providers requiring prior relationship status with potential clients/patients
5. Acceleration of approval of Alternate Care Facility plans and permits
6. Decision to relax contact tracing requirements in light of community transmission in NoCal and WA

Planning to raise

Subject:	COVID-19 Open Media Report 08Mar2020
Date:	2020/03/08 15:05:33
Priority:	Normal
Type:	Note

UNCLASSIFIED // FOR OFFICIAL USE ONLY

Good evening all,

Attached is the 08Mar20 COVID-19 Open Media Report.

BLUF: New states are reporting their first COVID-19 cases, some reported with recent travel outside the respective states. The first domestic case of a U.S. service member is reported. A lockdown in Italy quarantines over 16M people. The COVID-19 outbreak is altering cruise ship schedules, and the cruise industry is responding with updates to their policies. Despite COVID-19 transmission concerns at political gatherings, presidential candidates will continue to hold political rallies and events.

Epidemiology: Official case counts are distributed via the COVID-19 Morning CDC Updates and COVID-19 SLBs.

- □ Traditional news media reports over 107,200 cases globally, and over 3,600 deaths worldwide.
- □ As reported by the China Global Television Network, Hubei province had no new domestic cases, the first time since the outbreak. The province had only three imported COVID-19 cases.
- The first COVID-19 cases are reported in Kansas (n = 1, traveled outside of state in "northeast part of the country"); Missouri (n = 1, recent travel in Italy); Vermont (n = 1, travel history under investigation); Virginia (n = 1, returned from overseas); and Washington, DC (n = 1, no international travel).

Public Health/Clinical Response:

- □ Italian Prime Minister Conte signs a decree for a lockdown of 15 provinces in central and northern Italy, quarantining over 16M people at least until April 3. Those who break quarantine could serve 3 months in jail. All schools and university are temporarily closed in the country.
- The Orange County Correction Facility (California) suspends visits to protect inmates and staff.

Evacuation/Repatriation:

- Representative Castro from Texas tweets that Grand Princess passengers are expected to quarantine at Lackland Air Force Base in San Antonio, TX.

Travel Considerations:

- The Army suspends travel to and from South Korea through May 6 or until further notice for soldiers and their families. There are 28,500 U.S. troops stationed in South Korea.

Please see the attached Open Media Report for additional information. *This message was distributed to the 2019 nCoV Distribution Lists.*

Subject:	Summary: Multiple States Report New Cases of COVID-19 and EOC Activation Changes
Date:	2020/03/08 16:24:01
Priority:	Normal
Type:	Note

UNCLASSIFIED // FOR OFFICIAL USE ONLY

Good Afternoon Dr. Kadlec,

BLUF: Multiple states report new cases of COVID-19 and EOC activation changes.

- The first confirmed case of COVID-19 in Connecticut was announced by the state's Department of Health
 - The patient is between the ages of 40 and 50
 - The Wilton, Connecticut resident is being treated at Danbury Hospital
 - Recent travel to California was reported.
- There are 16 new confirmed COVID-19 cases in the state of New York, the current total is 105
 - 12 cases in New York City
 - 82 cases in Westchester County
 - 5 cases in Nassau County
 - 1 case in Suffolk County
 - 2 cases in Rockland County
 - 2 cases in Upstate Saratoga County
 - 1 case in Upstate Ulster County
- Oregon declared a state of emergency on Sunday in response to seven new cases of COVID-19
 - There are 14 cases in the state
 - Seven of the new cases are the result of community spread or contact with another known case
 - None of the seven are the result of international travel
 - Three of the seven were hospitalized at the time they were diagnosed
 - At least one person is being treated at the Oregon Health & Science University
- The state of Iowa announced a "partial" activation of the state's Emergency Operations Center (EOC) to prepare for potential cases of COVID-19 in the state
 - Though no cases have been reported in the state, the EOC was activated to ensure state agencies were prepared

*This notification is limited distribution and is intended for HHS Senior Leadership only. **Do not forward.** This notification was sent to the COVID-19 Senior Leadership distribution list.*

Very Respectfully,

Secretary's Operations Center

External Email - Use Caution

Acknowledge the kids on board. They are our first priority off the ship and have identified next steps for that group and families. Have worked locally and with CA Sec of Health in visibility here.

Agree with John below as order of debarkation process.

Lastly and only for FYI.... Princess Cruises is moving several folks from their operations in Sacramento to embed with us in Oakland. This will allow for even better alignment and communications

Respectfully,

Jeanne

On Mar 8, 2020, at 11:55 AM, Redd, John (OS/ASPR/SPPR) <John.Redd@hhs.gov> wrote:

Wanted to confirm with all one difference for the tick-tock. We do not plan to offload (+) asymptomatic people in the first group. (+) symptomatic and (+) minimally symptomatic people

will actually be the last group to leave, so as not to contaminate the way out of the ship. This also buys us more time to find a good disposition for them.

We as of now do not know of anyone on board who is (+) and significantly sick from COVID-19. We do know of people with symptomatic non-COVID-19 illness, and we're letting them get off first.

Mick one additional issue that has come to my awareness 9 Make a Wish kids onboard with advanced cancer. VERY vulnerable population because of immune status they will be expedited at all stage to get them out. Working with local Peds hospital that is one of our regional centers to assist. BARDA mobilized to make REMDESIVIR available

Please keep me advised of timing of shipboard transfer.

Subject: Grand Princess Tick Tock Bullets

- • ASPR Medical Screening Team to board Grand Princess today after fit testing/PPE/PAPR training. Dr Redd to lead this mission with Dr Callahan and NDMS HMTF (number TBD). Time TBD.
- • Grand Princess tentatively scheduled to Dock in Oakland Inner Harbor (Berth 22-23) Monday afternoon March 9.
- • Screening and transfer of passengers:
 - • ASPR will offload ill and positive asymptomatic Monday afternoon.
 - • ASPR will screen and offload CA citizens Tuesday March 10. These passengers will be bused to Travis until it is filled. Remaining CA citizens will be bused to the Oakland airport and flown to Miramar (small cohort).
 - • ASPR will screen either a) foreign nationals or b) non-CA US citizens Tuesday morning March 10; flown to home country, Lackland or Dobbins as indicated
- • Grand Princess will restock, clean and reposition crew in sanitized/isolated quarters, and leave the Port of Oakland on or about March 11
- • ASPR has identified several states with a large number of passengers; IEA and ASPR will discuss the option to transfer quarantine to in-State home isolation
 - • Will reduce burden at Lackland and Dobbins
- • Still reviewing options to house positive, asymptomatic in instances where States do not accept home isolation vs Federal quarantine
 - • Backup is to establish a temporary alternate care facility in one or more locations

There are some equipment and personnel shortages at all sites, but workarounds have been identified and the remaining shortfalls should be in place and operational before the sites receive passengers.

Subject: FOR AWARENESS ONLY - Guidance on prioritizing use of respirators for COVID-19

Dear DLG members,

The DLG team was asked to provide the attached memo for your awareness. The memo – “Interim Transition to Use of Facemasks for Healthcare IPC to Preserve Respirators for Highest-risk Activities” – outlines changes to guidance on prioritizing use of respirators. This memo has been approved and CDC is working on a roll-out plan.

Neither this memo nor the information it contains is cleared for release. Please do not distribute further.

The Department is currently evaluating which existing processes are best used for rapid clearance of guidances, policies, and other documents for COVID-19. Document type and audience will determine which mechanism is used (e.g. ExecSec flash clearance for guidance documents). The DLG team will provide updates as we receive them from COVID-19 response leadership.

v/r,
Kristin

<< File: Healthcare IPC mask vs respirator Decision Memo 20200307-final.docx >>

Type:	Note

Dear Admiral Adams,

As Surgeon General, I'm told that your Mission is to advance the health of the American people. However, half a million people die unnecessarily of infections for which there is no orthodox treatment and millions more, who aren't killed, suffer needlessly. You are in a position to change that! You are at that stage in your career where you can rock the boat and confront the narrow mindedness of orthodox medicine!

The presumption that there is no cure for viral infections and Superbug infections is just plain wrong! Ultraviolet Blood Therapy (UBT) is a highly effective cure (100% or close) for any virus; it is completely safe (no report of a significant adverse side-effect in millions of treatments over nearly a century world-wide) and it acts quickly (often within a day or two). The attachment is the presentation I was invited to give to the Biomedical Advanced Research and Development Authority (BARDA) of the NIH charged with keeping the government up to date on new medical developments (even though UBT was discovered here nearly a century ago); the BARDA representatives showed interest but told me that I had no hope of getting UBT approved for use in US hospitals (and then in out-patient settings) because of the medical orthodoxy of the FDA. However, the FDA could approve UBT for very sick patients with "untreatable" infections, including COVID-19, under their policy of making individual "compassionate" exceptions for promising treatments.

- UBT was developed in America in the 1920s and has nearly a century of success. It was originally used to cure virtually every case of polio treated with it (see slide 13 in the attachment); it cured sepsis (see slide 15) and other nasty infections. By the early 1950s, UBT was "mainstream" medicine here until the AMA banned it (see below). In brief, it involves drawing 40-60cc of blood (not much more than a

doctor draws for an annual physical), diluting it 4-1 with saline, adding 1,000 units of heparin to prevent coagulation, shining ultraviolet light (UV) through it and re-infusing the treated, diluted blood at the withdrawal site. The UV-C strips the protective covering off some (not all) of the pathogens in that blood so that, after it's re-infused, the immune system can recognize the live pathogen and eradicate it; the UV-A is absorbed by the red blood cells and enhances the immune system. THE BODY CURES ITSELF. The whole procedure takes about 25 minutes.

To satisfy myself, I've had UBT done on me twice to cure 'flu (I'll be 80 this year) and another four times just to show that it is completely safe. I don't bother with an unreliable and potentially dangerous 'flu-shot!

There are two causes of many of the respiratory infection deaths: (i) because there are so many strains of 'flu, the annual guess of what strain(s) to include in the vaccine can be way off the mark; as a result, annual US deaths from the viral pneumonia caused by 'flu range from 20,000 to over 70,000 (see slide 23) and, (ii) there is no cure known to orthodox medicine for 'flu, coronavirus or any other viral infection; once there is an infection, patients may die.

All infections kill about half a million people a year in America, often in ICUs. Sepsis alone (30% mortality rate) kills about 200,000 people every year in the USA and hundreds of thousands more deaths result from viral and Superbug infections. Sepsis and virtually all of the infections are cured by UBT. It has never failed to cure shingles. Every few weeks we hear about another outbreak of "untreatable" infections that kill a few people in the USA - this year it's measles and fear of the latest coronavirus. Millions more suffer needlessly from a myriad of other "untreatable" viral and Superbug infections.

There are three types of pathogens that cause infections: (i) bacteria treatable by conventional antibiotics, some of which have nasty side-effects including the destruction of important digestive bacteria, (ii) "Superbugs" (such as MRSA and C-Diff) that do not respond to any antibiotic and are essentially untreatable by conventional means; more Superbug strains are showing up every year, and (iii) viruses for which there has never been an effective, conventional treatment. The best that conventional medicine can do for Viral and Superbug infections is to try to keep the patient alive until the body's immune system eradicates the pathogen and cures the patient. Sepsis is another matter.

I'm horrified by the hundreds of thousands of preventable deaths in the USA from "untreatable" (by orthodox protocols) infections and the unnecessary suffering of millions more people who aren't killed. More information on UBT clinical trials and cures abroad is under the "UBT cures" tab in my web-site InfectionsCured.com

I have written confirmation from the FDA and CDC that they have received similar e-mails to this one!

In the early 1950s, the American Medical Association (AMA), in the person of its then CEO, Morris Fishbein MD, drove Emmet Knott DSc, the discoverer of UBT, out of business and banned UBT which was picked up by the Soviet Union and then Europe. Interest in UBT had waned as Penicillin was just then being mass-produced in the USA to treat bacterial infections and the new Salk vaccine significantly reduced polio infections but there was still no cure for polio and other active viral infections! UBT returned to the USA in the 1990s as primary doctors became disillusioned with the inability of orthodox medicine to cure viral (and now Superbug) infections. There are about 400 active UBT practitioners in America doing about 60,000 UBT procedures a year mostly in the Western states. There are thousands of practitioners in Europe and a few other countries, who are doing millions of procedures.

The FDA has not approved UBT for hospital use but has not disapproved it for a doctor to use in one office. However, most orthodox doctors treating out-patients will only use FDA approved treatments. Moreover, most state medical boards, particularly in eastern and mid-western states, are still trying to stamp out UBT in America and threaten draconian action against doctors who use it. FDA trials cost millions of dollars but there would be no return (with monopolistic pricing) on the investment by any for-profit enterprise because UBT's long history puts it in the public domain, which prevents it from being patented, so no company will invest in a trial. European countries are more open-minded about UBT so there are thousands of doctors there using it. All the formal clinical trials in the last 25 years have been done outside America (see the "UBT cures" tab in InfectionsCured.com) but the US, of course, doesn't recognize the results and the few US doctors who defy medical orthodoxy and use UBT don't dare publish results widely for fear of the draconian action by their state medical boards.

Doctors who use UBT believe that it is quite possibly the most important breakthrough in medicine ever; other breakthroughs would be vaccines (which are unreliable for 'flu) and antibiotics but UBT works when they fail, as antibiotics always have for active viral infections and increasingly do for Superbug infections.

I have absolutely no direct or indirect financial interest in the resurgence of UBT.

Yours sincerely,

Richard J. Senior

Axios Sneak Peek

By Jonathan Swan · Mar 08, 2020

Welcome to Sneak Peek, our weekly lookahead from both ends of Pennsylvania Avenue, plus our best scoops.

□ **Tonight on "Axios on HBO":** Jim VandeHei returns to a bar of his youth to mix it up with Don Jr. before a hopped-up audience of Trump supporters in Oshkosh, Wisconsin — a swing town in 2020's marquee battleground.

Tonight's newsletter is 2,194 words, an 8-minute read.

1 big thing: Don Jr. says he'll debate Hunter Biden and release his taxes

Jim VandeHei and Don Jr. have a lively discussion in Oshkosh, Wisconsin.

Jim VandeHei and Don Jr. in Oshkosh, Wisconsin. Photo: "Axios on HBO"

In an interview for "Axios on HBO," Donald Trump Jr. told Jim VandeHei he wants to debate Hunter Biden over who has benefited more financially from their father's government service.

Driving the news: "We can go full transparency, we show everything, and we can talk about all of the places where I am supposedly grifting but Hunter Biden isn't," said the president's eldest son, who still runs the Trump Organization with his brother Eric.

- • After VandeHei pressed Don Jr. on his book deal and paid speeches during Trump's presidency, he replied, "If you looked at my tax returns, which maybe we could talk about in this debate."
- • So you'll release your tax returns, VandeHei asked.
- • "If we do it both, 100%," Don Junior said. "Let's talk about who profited off of whose public service. Happy to do it. Let's make it happen."

- **The other side:** TJ Ducklo, national press secretary for the Biden campaign, said in response: "It is hard to believe anything a Trump says on tax returns when Donald Sr. has lied for years about releasing his."

Why it matters: After spending much of the past year aggressively attacking Joe Biden over his son's business dealings with a corrupt energy company in Ukraine while he was vice president, Republicans mostly stopped talking about Hunter when it looked like his father wouldn't make it through the primaries.

- But now that Joe Biden has had a resurgence, Republicans are gearing up for investigations on Capitol Hill designed to undermine the vice president's chances in the fall.

What's next: Biden's allies have hit back, saying Democrats should fight fire with fire by subpoenaing Trump's children.

- Former Obama aide Tommy Vietor tweeted: "The House Oversight Committee should start investigating the business dealings of Don Jr, Eric Trump, Ivanka and Jared. We should welcome a conversation about the children of corrupt politicians."

The bottom line: Don Jr. has now publicly embraced that conversation.

- A source close to Don Jr. told Axios that his debate challenge was a direct response to "Biden allies, earlier in the week, threatening him and his siblings."
- "From our point of view," the source added, "Don is already one of the most scrutinized people on planet Earth and is more than prepared to respond to Democrat attacks. The same can't be said about Hunter Biden."

2. Exclusive — Ben Carson says minimum wage is too low

Photo illustration of Ben Carson with a hand behind him holding a tiny dollar bill.

Photo Illustration: Sarah Grillo/Axios. Photo: Shannon Finney/Getty Images

In an interview for "Axios on HBO," Housing and Urban Development Secretary Ben Carson told me that the \$7.25-an-hour federal minimum wage would be "very difficult" to live on and that in his view it should be higher.

Driving the news: "I don't have any problem with raising the minimum wage," Carson said. "My personal opinion is that it should be indexed."

- "You determine what the minimum wage should be, but when conditions change, it needs to change with it, needs to be indexed," he added. "Then you don't keep having these arguments every 10 or 15 years."

Why it matters: This is the first time, as HUD secretary, that Carson has publicly admitted that America has a problem with its minimum wage.

Details: Carson, one of the most important but undercovered figures in national politics, is the top federal government official charged with housing the poorest and most vulnerable people in America.

- • The Trump administration has proposed sweeping cuts to his department's budget at a time when homelessness is on the rise.
- • Carson wants the federal government to play a smaller role in housing the poor.
- • He says local governments need to stop expecting more money from the federal government and should instead cut regulations, build smaller, cheaper homes, and encourage churches and the private sector to help people experiencing homelessness.

Between the lines: In our interview, Carson conceded that the current minimum wage is too low after I cited a [study](#) by the National Low Income Housing Coalition that found that a worker earning \$7.25 must work "103 hours per week (more than 2.5 full-time jobs) to afford a one-bedroom rental home at the national average fair market rent."

The big picture: "Axios on HBO" joined Carson on his recent bus tour to California, where he met with local officials to discuss federal-state solutions for the state's homelessness and housing affordability crises.

- • During the tour, Carson said repeatedly that government programs have fostered "dependency" out of a misguided concept of compassion.

Key exchange: I asked Carson whether he could support a family and himself on the federal minimum wage.

- • "It would be very difficult," he replied.
- • "How would you do it," I asked.
- • "Probably the way my mother did it," Carson said. "Work three jobs at a time."

Yes, but: Carson made clear he still heavily favors market solutions.

3. Carson's solutions to California's homelessness crisis

Ben Carson talking to

Photo: "Axios on HBO"

In the same interview, Carson said police officers should be empowered to clear homeless people off the streets and put them in tent cities like the facilities the U.S. government has for migrants at the southern border.

Why it matters: Under current law, police aren't allowed to arrest homeless people simply for sleeping on the streets if they don't have alternative shelter arrangements. Carson wants to open up federal land and build tent cities quickly to facilitate police relocations of the homeless.

Between the lines: Some California cops have resisted calls to move homeless people against their will.

- "They can have some of their real needs taken care of in terms of the wraparound services and get them to a better place," Carson

said. "But there may be some people say, no, not going. Police have to be involved in that situation."

Carson also said "there are a lot of states" elsewhere that people who are homeless in California "could move to and immediately get a job and have a place to live. But they don't want to do that."

- • Carson named Iowa as an example of a state where Californians experiencing homelessness could move to in order to get a job.
- • "Recognize that there are homeless people who are living in their cars," he said. "People who actually have skills who simply were priced out of their apartments. Those individuals could easily move to another place."

A MESSAGE FROM KOCH INDUSTRIES

Working toward a future where no resource goes to waste

In one year, Koch manufacturing facilities **recycled, recovered for energy or treated 93%** of the waste created during the production of everyday products – while innovating new ways to save even more.

4. Carson talks budget cuts, "nasty" Trump tweets, trans access to shelters

Other highlights from the interview:

1. The HUD budget: Carson said he doesn't actually want to eliminate some of the programs that his agency's latest budget calls for eliminating.

- I asked Carson about a recent Twitter thread, #HumansofHUD, in which he shares inspiring stories of people lifted out of homelessness by programs his agency supports. He told the story of Jeanie, who grew up homeless but through HUD's HOME program received down payment assistance and first-time homeownership classes allowing her family to enjoy "their forever home."
- Why, then, would Carson propose eliminating the HOME program and community development block grants? He said his

real goal is modification. "The fact of the matter is, it's not going to be eliminated," Carson said. "It wasn't eliminated last year we proposed that; it wasn't eliminated the year before that."

- • So why propose it, I asked. "Because we need to get people recognizing that it cannot go on like it is," Carson replied. "It has to be fixed."
- • Carson declined to answer when I asked if he took any issue with the Trump administration's proposal to slash 15% from the HUD budget. He said he didn't want to give me an opportunity to say the Trump administration is divided over its budget.

2. Trump's tweets: When he was addressing local officials in California, Carson preached about the need to put politics aside and work together to solve the homelessness crisis.

- • I asked Carson how he squares that message with the fact that his boss, President Trump, uses the homelessness crisis as a political cudgel against Democrats — including his suggestion that Nancy Pelosi be thrown out of office for her "filthy" district.
- • Carson said he wouldn't mind if Trump stopped his "nasty" tweets, but that he thought Trump had toned it down recently. He also said he generally understands why Trump feels the need to hit back at his critics and get around the mainstream media.

3. Transgender homelessness: In a clip that didn't make it to air, I asked Carson why homelessness among the transgender population is growing at 43% — far higher than the rise in homelessness in the overall population.

- • Carson offered the theory that "a lot of them are youth and their families don't welcome them," while saying his personal view is that the Bible teaches "we should love everybody and leave the judging to God."
- • So what about a rule he has proposed allowing single-sex homeless shelters to turn away trans people? Where should transgender individuals experiencing homelessness go, I asked.
- • Carson said he'd encourage women's homeless shelters to build separate sections for transgender people, or "better still, have a rooming situation where everybody gets an individual room." He said he'd be OK with that so long as the women's shelters felt comfortable with that situation.

5. What's next: Washington preps coronavirus response

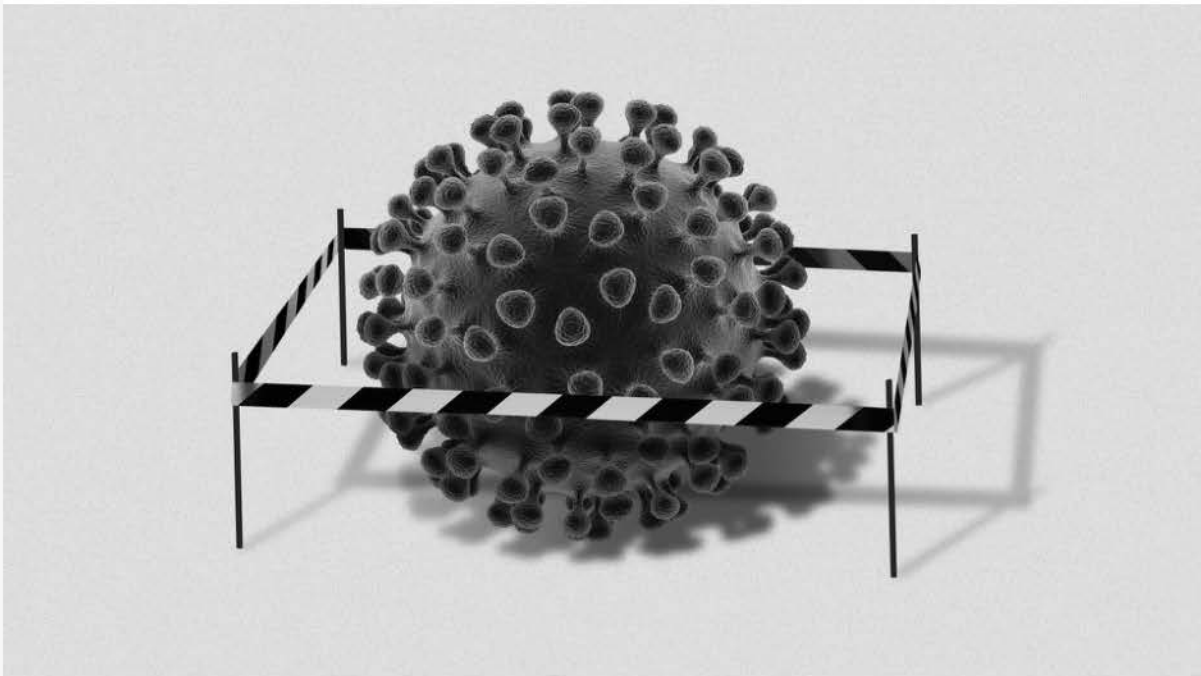

Illustration of a virus surrounded by caution tape

Illustration: Sarah Grillo/Axios

Leaders in Washington are bracing for the brunt of the coronavirus to sweep the U.S., with officials at the White House and on Capitol Hill floating a series of ideas to help mitigate the negative effects pounding small businesses and the travel industry, Axios' Alayna Treene reports.

- The bill President Trump signed into law on Friday dedicates \$8 billion in emergency funding to combat the virus — far more than the \$2.5 billion the White House initially proposed.

- But there's a general consensus that more steps will need to be taken as the virus continues to spread.

Driving the news: Not since the aftermath of 9/11 has there been such a fear of flying, and several airlines have cut thousands of flights over the next few months as a result.

- The Washington Post reported Friday that the Trump administration is considered waiving taxes for the cruise, travel and airline industries to cushion the blow.

The big picture: Dr. Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases, told NBC's Chuck Todd on "Meet the Press" this morning: "I think we're getting a better sense as the days go by. Unfortunately, that better sense is not encouraging because we're seeing community spread. And whenever you see community spread, you can do contact tracing."

- "We're not going to have a vaccine that's deployable for at least a year to a year and a half," said Fauci.

The latest: There are now more than 400 cases of the virus in 33 states and the District of Columbia, and 21 reported U.S. deaths, with the majority — 18 — located in Washington state.

6. Tuesday primaries lookahead

Sanders and Biden on the debate stage in Charleston, South Carolina

Sanders and Biden on the debate stage in Charleston, South Carolina, Feb. 25. Photo: Win McNamee/Getty Images

Joe Biden and Bernie Sanders will go head-to-head again this Tuesday in a series of primaries poised to hand the former Vice President another triumph, Alayna writes.

Why it matters: After Biden's stellar performance on Super Tuesday and a blitz of huge endorsements (the latest from Sen. Kamala Harris), he's barreling ahead toward clinching the Democratic nomination.

- The results in Tuesday's primaries in key states — Idaho, Michigan, Mississippi, Missouri, North Dakota and Washington — are do-or-die for Sanders, who very quickly has resumed his status as the underdog.

FiveThirtyEight's 2020 primary tracker has Biden winning in every state except Washington.

- Michigan in particular is a state that could break Bernie. As Politico's David Siders and Holly Otterbein write, "It was Michigan where Sanders engineered a primary day miracle four years ago, upsetting Hillary Clinton and imprinting his populist agenda on the industrial Midwest."
- Meanwhile, FiveThirtyEight's tracker forecasts Biden winning

the most votes (51%) and delegates (69) in Michigan on Tuesday.

- "Michigan, with its 125 delegates, is the most populous state to vote on Tuesday, and it is the first of the big Midwestern battlegrounds to cast ballots," the New York Times' Jonathan Martin and Astead Herndon write. "With Mr. Biden appearing strong in the South and Mr. Sanders winning in the West, the industrial Midwest could effectively determine the nomination."

The bottom line, via FiveThirtyEight's Nate Silver: "Sanders has to come back *quickly* when the momentum is currently against him in a bunch of states that are not very good for him."

7. Sneak Peek diary

Exterior view of the dome of the U.S. Capitol building

Photo: Aurora Samperio/NurPhoto via Getty Images

The House will vote on the “No Ban Act,” this week, which would repeal Trump’s travel ban and prevent the administration from imposing future travel bans, Alayna writes.

- • The House will also consider the Access to Counsel Act, which would mandate that those detained while attempting to enter the U.S. are guaranteed access to legal counsel.
- • The current FISA authorization expires March 15. Majority Leader Steny Hoyer says “conversations are ongoing” and that he hopes to bring legislation to the floor this week.
- • Hoyer added that, following Senate passage of Sen. Tim Kaine’s bipartisan war powers resolution, it’s possible the House could also consider the resolution as early as this week.
- • **On Wednesday**, the House Homeland Security committee will hold a hearing on the coronavirus.

The Senate will vote Monday on a substituted amendment to Sens. Lisa Murkowski and Joe Manchin’s energy innovation bill.

- • Murkowski said the substitute includes 18 new amendments from Republicans and Democrats.

President Trump’s schedule, per a White House official:

- • **Monday:** Trump will participate in a roundtable and speak at a fundraising lunch in Longwood, Florida.
- • **Tuesday:** Trump will present the Medal of Freedom to retired Gen. Jack Keane.
- • **Thursday:** Trump will meet with the prime minister of Ireland and participate in the Shamrock Bowl presentation. However, he’s expected to skip the annual St. Patrick’s Day lunch in the Capitol, “one of Washington’s oldest time-honored bipartisan traditions,” Politico scoops.
- • **Friday:** Trump will attend a fundraiser in the Denver area for Colorado Sen. Cory Gardner, per the AP.

Date:	2020/03/08 21:01:02
Importance:	High
Priority:	Urgent
Type:	Note

Dear Secretary Azar and Assistant Secretary Giroir,

Cellular Engineering Technologies (CET), an Iowa biotechnology company, would like to make you aware of our biotechnology capabilities and assets to develop a vaccine for COVID-19. In collaboration with our non-profit organization, the John Paul II Medical Research Institute (JP2MRI), and nearby industrial, academic and federal research facilities in Iowa and neighboring Nebraska, we are uniquely positioned to develop an effective vaccine for COVID-19. In the attached white paper, I highlight how our technology, coupled with nearby academic, federal and industrial facilities in Iowa and Nebraska, are well poised to develop a vaccine and other therapeutic products for this viral infection. We hope that we can assist the United States government in developing countermeasures to COVID-19 and future coronavirus infections.

Subject: Team 2 to the ship

We assembled the second team for ship ops tonight. They are 10 strong - we could not do 14 because there were not yet enough PAPRs here to send 16 (we send two extras as backup). In consultation with the Coast Guard, we had to make this call in order to get the team out.

They are en route to Yerba Buena. The CG has mobilized another cutter to get them out.

In other news (VERY preliminary at this time), there are two medical evacuations of crew members pending today (I heard the call to CAPT Byrd of the CG in her office). It was sketchy - only that one had a weak heart rate and the other had respiratory problems but had been COVID-19 negative.

John

Subject:	Summary: Multiple states report new cases of COVID-19 09Mar20
Date:	2020/03/09 00:59:46
Priority:	Normal
Type:	Note

UNCLASSIFIED // FOR OFFICIAL USE ONLY

Good morning Dr. Kadlec,

BLUF: Multiple states report new cases of COVID-19 09Mar20.

- Iowa State Department of Public Health identified three presumptive positive cases.
 - The three patients are all residents of Johnson County who were on a cruise in Egypt.
 - One of the patients is between the ages of 41 and 60, and the two others are between the ages of 61 and 80.
 - Two patients have underlying health conditions, but none of them required hospitalization.
- Hawaii Department of Health (HDOH) reported a second presumptive positive COVID-19 Case on 08Mar20.
 - • * The individual is believed to be an elderly male resident of Oahu, but additional demographic information is unavailable at this time.
 - • * HDOH is working with the CDC to confirm the case.
 - • * HDOH is performing contact tracings in Hawaii.
 - • * Open source media reports that the individual recently returned from travel in Washington state.
 - • * The CDC EOC is unable to confirm at this time.
- • * Maryland state officials have identified two additional positive cases of novel coronavirus in the State of Maryland.
 - • * The state now has five total confirmed cases, and 62 negative tests for COVID-19.
 - • * A Harford County female resident in her 80s, contracted the virus while traveling overseas and is currently hospitalized.
 - • * A Montgomery County male resident in his 60s, contracted the virus while traveling overseas, and was briefly hospitalized.
 - • * The Governor will hold a press conference to provide updates, and sign Emergency Legislation today, 09Mar20 at 1530ET.

The SOC will continue to monitor this incident and report as needed. *This notification is limited distribution and is intended for HHS Senior Leadership Only. **DO NOT FORWARD.** This notification was sent to the COVID-19 Senior Leadership distribution list.*

Subject:	Summary: Multiple states report new cases of COVID-19 09Mar20
Date:	2020/03/09 00:59:46
Priority:	Normal
Type:	Note

UNCLASSIFIED // FOR OFFICIAL USE ONLY

Good morning Dr. Kadlec,

BLUF: Multiple states report new cases of COVID-19 09Mar20.

- Iowa State Department of Public Health identified three presumptive positive cases.
 - The three patients are all residents of Johnson County who were on a cruise in Egypt.
 - One of the patients is between the ages of 41 and 60, and the two others are between the ages of 61 and 80.
 - Two patients have underlying health conditions, but none of them required hospitalization.
- Hawaii Department of Health (HDOH) reported a second presumptive positive COVID-19 Case on 08Mar20.
 - • * The individual is believed to be an elderly male resident of Oahu, but additional demographic information is unavailable at this time.
 - • * HDOH is working with the CDC to confirm the case.
 - • * HDOH is performing contact tracings in Hawaii.
 - • * Open source media reports that the individual recently returned from travel in Washington state.
 - • * The CDC EOC is unable to confirm at this time.
- • * Maryland state officials have identified two additional positive cases of novel coronavirus in the State of Maryland.
 - • * The state now has five total confirmed cases, and 62 negative tests for COVID-19.
 - • * A Harford County female resident in her 80s, contracted the virus while traveling overseas and is currently hospitalized.
 - • * A Montgomery County male resident in his 60s, contracted the virus while traveling overseas, and was briefly hospitalized.
 - • * The Governor will hold a press conference to provide updates, and sign Emergency Legislation today, 09Mar20 at 1530ET.

The SOC will continue to monitor this incident and report as needed. *This notification is limited distribution and is intended for HHS Senior Leadership Only. **DO NOT FORWARD.** This notification was sent to the COVID-19 Senior Leadership distribution list.*

COVID-19 Response update Mar 8, 2020

INTERNAL - NOT FOR FURTHER DISTRIBUTION

Daily Report Summary

Where feasible, changes in numbers will be show in red. For the US case counts (below), all counts will be shown in black, since very few are changing daily.

1. # of confirmed and presumptive US cases of COVID-19: 336 including:

- **287 confirmed or presumptive (i.e., positive by CDC test performed in state lab, pending confirmation at CDC) US cases presenting in the US**, locations of detection include Arizona (5), California (64), Colorado (9), Florida (6), Georgia (6), Hawaii, Illinois (6), Indiana, Kentucky, Maryland (3), Massachusetts (9), Minnesota, Missouri, Nebraska (2), Nevada (2), New Hampshire (2), New Jersey (6), NYC (2), New York State (28), North Carolina (2), Oklahoma, Oregon (7), Pennsylvania (4), Rhode Island (3), South Carolina (2), Tennessee, Texas (8), Washington (102), Washington, DC, Wisconsin
- **3 among evacuees from Hubei Province**
- **46 among evacuees from Diamond Princess**, including:
 - 29 diagnosed in Japan
 - 17 diagnosed after arrival in US

- • **21 cases on Grand Princess** that occurred in international waters but are being reported in the media as U.S. cases. Not included in our U.S. case count of 336

2. # of total confirmed cases in China: **80,813**

3. # of total confirmed deaths in China: **3,073**

Domestic Updates

1. US COVID-19 Cases

- • 30 jurisdictions (28 states) reporting 336 US confirmed or presumptive cases
- • 3 cases among evacuees from Hubei repatriation cohort
- • 46 cases among evacuees from Diamond Princess repatriation cohort (29 diagnosed in Japan, 17 diagnosed after arrival in US)
- • 21 cases on Grand Princess that occurred in international waters but are being reported in the media as U.S. cases. Not included in our U.S. case count of 336

International Updates

Countries or territories with reported laboratory-confirmed COVID-19 cases and deaths.

Source: WHO Sit Rep 42. Data as of 07 March 2020

Global Summary – Total and new cases in the last 24 hours.

Globally	China	Outside China
Confirmed Cases	Confirmed Cases	Confirmed Cases
101, 927 (3,735 new)	80,813 (102 new)	21,114 (3,633 new)
Deaths	Deaths	Deaths
3,073 (28 new)	3,073 (28 new)	3,073 (28 new)

*China totals include: Hong Kong 107 cases (3 new), 2 deaths; Macau 10 cases (0 new), 0 deaths; Taiwan 45 cases (0 new), and 1 death

†The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

‡Case classifications are based on [WHO case definitions](#) for COVID-19.

§Transmission classification is based on WHO analysis of available official data and may be subject to reclassification as additional data become available. Countries/territories/areas experiencing multiple types of transmission are classified in the highest category for which there is evidence; they may be removed from a given category if interruption of transmission can be demonstrated. It should be noted that even within categories, different countries/territories/areas may have differing degrees of transmission as indicated by the differing numbers of cases and other factors. Not all locations within a given country/territory/area are equally affected.

Terms:

- **Community transmission** is evidenced by the inability to relate confirmed cases through chains of transmission for a large number of cases, or by increasing positive tests through sentinel samples (routine systematic testing of respiratory samples from established laboratories).
- **Local transmission** indicates locations where the source of infection is within the reporting location.
- **Imported cases only** indicates locations where all cases have been acquired outside the location of reporting.
- **Under investigation** indicates locations where type of transmission has not been determined for any cases.
- **Interrupted transmission** indicates locations where interruption of transmission has been demonstrated (details to be determined)

** "Territories" include territories, areas, overseas dependencies and other jurisdictions of similar status

§§ NOTE: This report is from March 7, so the case count of 213 was current at the time of reporting to WHO for inclusion in this report. The current US figure is 336 including: 287 confirmed or presumptive cases in the US, 3 cases among Hubei repatriation cohort, and 46 cases among the Diamond Princess repatriation cohort.

Very Respectfully,

Secretary's Operations Center

Subject:	Mobile Lab Platforms for Field Screening
Date:	2020/03/09 05:08:05
Priority:	Normal
Type:	Note

Dear VADM Adams,

As a former Aide to a MC VADM at Bethesda, a public health professional, and a first responder in several natural disasters (Loma Prieta Earthquake and Katrina), I can appreciate the challenges you currently face. I want to help.

Our company, Envirolitics® (<https://protect2.fireeye.com/url?k=c22c25a8-9e780c83-c22c1497-0cc47a6d17cc-cd9c759fd131d450&u=http://www.envirolitics.us/>), makes mobile medical and scientific laboratories, as well as portable power plants, using wind and solar energy to power equipment (MS, qPCR, etc.) for extended periods of time, unattended, whenever conventional power supplies are limited or unavailable. I thought this might be of interest to you in your research to facilitate rapid sample collections for various pathogens, like (but not limited to) the Covid-19 epidemic.

The SciArk® is a field-deployable, alternate-fuel, EPA certified, zero emissions, solar and wind assisted mobile lab. The patent pending platforms (vans, trucks, trailers, and containers) are devices, systems, and methods for equipment manufacturers, companies, and researchers to run their instruments, electronics, and sensors for days at the job site or while in transit without the need for shore power. Our platforms take the lab to people at risk, reducing turnaround the time for definitive testing. There are currently three (3) mobile platforms available for immediate deployment.

A demonstration of the platforms can be arranged at your current or future convenience.

Best regards,

Alan W. Joseph, Jr., MPH

HHS Executive Summary: Monday, 09Mar20

1. HHS

Today's Noteworthy Topics:

COVID-19 (Novel Coronavirus)

Between 07Mar-08Mar20, the following states reported new or additional presumptive positive cases of COVID-19: Connecticut, Georgia, Hawaii, Iowa, Kansas, Maryland, Missouri, New York, Oregon, Tennessee, Vermont, and Virginia. Senator Ted Cruz of Texas and Representative Paul Gosar of Arizona are both self-quarantining after coming into contact with an attendee at the Conservative Political Action Conference (CPAC) 2020 who is a presumptive positive COVID-19 case. The U.S. Department of State recommends that U.S. citizens, particularly travelers with underlying health conditions, should not travel by cruise ship. CDC enacted a Level 3 "Avoid Nonessential Travel" warning for Italy and South Korea. The Grand Princess cruise ship is scheduled to dock at Oakland, CA on 09Mar20. Approximately 2040 U.S. citizens will be will be evacuated from the Grand Princess to several DOD installations throughout the U.S. for quarantine and testing.

Daily Operational Schedule:

0815 – COVID-19 Operational Update Brief
0830 – FEMA Daily Operations Briefing
0900 – COVID-19 White House Sub Task Force Call
1100 – COVID-19 PMO Call
1200 – DOD COVID-19 SVTC
1300 – IMD Sync Call for COVID-19 and Repatriations
1400 – Resource Coordination Call
1600 – COVID-19 White House Task Force Call

Public Health Emergency of National Significance:

Puerto Rico (Earthquake): 08Jan20
Opioid Crisis, Nationwide: 24Jan20
Novel Coronavirus (COVID-19): 31Jan20

HHS Response Status Summary:

HHS SOC: Level I (Full Activation)
CDC EOC: Level III (Polio/Ebola)
CDC EOC: COVID-19 (Agency-Wide Response)

FDA EOC: Level II (Vape Product Response, COVID-19)

Emergency Support Function (ESF) Activation:

ESF – 8: Not Activated

ESF – 6: Not Activated

Recovery Support Function (RSF) Activation:

H&SS RSF: Activated Region II (2017 Irma/Maria, Puerto Rico projected end date of 19Mar20). Activated Region IX (2018 California Wildfires projected end date of 31Mar20).

HHS Deployments: (Total = 819)

ASPR: 495 – (11) 2020 Earthquake Puerto Rico, (468) COVID-19, (4) Irma, (3) Irma/Maria Recovery, (2) FY Funded Training Q1, (3) FY Non-Funded Training Q1, (2) FY Non-Funded Training Q2, (1) California Wildfires, (1) California Wildfires Recovery,

CDC: 324 – (1) Puerto Rico, (254) COVID-19, (34) Polio, (35) Ebola

FMS Status:

- • * 32 (250 Bed) FMS sets are deployable
- • * 10 (50 Bed) FMS sets are deployable

New Mission Assignments (MA): NSTR

Active Situations (7):

- • * Influenza Season
- • * Irma/Maria, Puerto Rico, & USVI (Recovery)
- • * Ebola in Eastern Democratic Republic of the Congo
- • * California Wildfires (Recovery)
- • * Novel Coronavirus (COVID-19)
- • * Bravo Response
- • * Earthquake, Puerto Rico

HHS Executive Summary: Monday, 09Mar20

1. HHS

Today's Noteworthy Topics:

COVID-19 (Novel Coronavirus)

Between 07Mar-08Mar20, the following states reported new or additional presumptive positive cases of COVID-19: Connecticut, Georgia, Hawaii, Iowa, Kansas, Maryland, Missouri, New York, Oregon, Tennessee, Vermont, and Virginia. Senator Ted Cruz of Texas and Representative Paul Gosar of Arizona are both self-quarantining after coming into contact with an attendee at the Conservative Political Action Conference (CPAC) 2020 who is a presumptive positive COVID-19 case. The U.S. Department of State recommends that U.S. citizens, particularly travelers with underlying health conditions, should not travel by cruise ship. CDC enacted a Level 3 "Avoid Nonessential Travel" warning for Italy and South Korea. The Grand Princess cruise ship is scheduled to dock at Oakland, CA on 09Mar20. Approximately 2040 U.S. citizens will be will be evacuated from the Grand Princess to several DOD installations throughout the U.S. for quarantine and testing.

Daily Operational Schedule:

0815 – COVID-19 Operational Update Brief
0830 – FEMA Daily Operations Briefing
0900 – COVID-19 White House Sub Task Force Call
1100 – COVID-19 PMO Call
1200 – DOD COVID-19 SVTC
1300 – IMD Sync Call for COVID-19 and Repatriations
1400 – Resource Coordination Call
1600 – COVID-19 White House Task Force Call

Public Health Emergency of National Significance:

Puerto Rico (Earthquake): 08Jan20
Opioid Crisis, Nationwide: 24Jan20
Novel Coronavirus (COVID-19): 31Jan20

HHS Response Status Summary:

HHS SOC: Level I (Full Activation)
CDC EOC: Level III (Polio/Ebola)
CDC EOC: COVID-19 (Agency-Wide Response)

See email below:

Hello all-

I just got off the phone with my Italian anesthesiologist/ search and rescue friend, German Rocchi, of Ancona, Italy. Duane, we sat at the table with him at the SOF - medics conference 2 years ago. He gave me the name of the large hospital he is at and said 20% of pts presenting (or corona test +) need ICU care. They are completely overwhelmed and he said they are having to triage "what to do and who to let die", i.e. those with underlying medical issues don't make it to intubation. He said the ICU is under negative pressure and they did not anticipate the need to prepare adequately for this (are we?). He said this is hell..... it's a war zone. He said HE has enough PPE. I asked him if he had advice for us, he said, "why are you sending 30k soldiers to Europe for a NATO exercise?" Implying they're gonna get sick. (Who's looking into that?)

Are we feeling paralyzed or afraid to act, or am I just not seeing the efforts underway. Have we blown the whistle adequately? It should be from those with the data? Is it that we as scientists and physicians, feel this leadership role is only afforded to those who have been elected? Folks, please tell me what we're going to do next, and I mean soon so that I am confident next week I'm not living in a war zone?!? And so I don't have to do it all myself.

Brian Benson, M.D., Ph.D.

Subject:	Addressing Disability Rights in COVID-19 Planning and Response
Date:	2020/03/09 07:42:00
Priority:	Normal
Type:	Note

March 9, 2019

The Honorable Mike Pence
 Vice-President of the United States
 The White House
 1600 Pennsylvania Ave., N.W.
 Washington, DC 20500

Dear Mr. Vice-President:

The 64 organizations, identified in the attached statement are writing to you as the leader of the Administration's effort to control COVID-19. All of the undersigned organizations are leading advocates in the disability community across the country.

We make a very straightforward request: Please direct all the agencies involved in this effort to consider the specific COVID-19 issues faced by persons with disabilities and older adults, the community organizations supporting them, and expressly address these needs in their plans and statements. We are attaching our National Call to Action adopted by these organizations outlining some of the current, emerging, and anticipated issues.

We appreciate the work of the agencies participating in the efforts to contain COVID-19 and to deal with its effects. However, we have neither seen nor heard any discussion of strategies to

deal with anticipated and unexpected challenges encountered by persons with disabilities throughout this public health emergency.

In 2018, the Centers for Disease Control and Prevention published “Public Health Emergency Preparedness and Response Capabilities: National Standards for State, Local, Tribal, and Territorial Public Health.” This document specifically addresses continuity of operations and states, “Particular attention should be placed on accessibility of health and human services for at-risk individuals with access and functional needs who may be disproportionately impacted by a public health incident.” We have seen nothing in the Administration’s strategy indicating that continuity of services for Americans with disabilities is being addressed.

The National Call to Action calls upon emergency and health strategists to address: 1) continuity of services for persons with disabilities who require them for their health and daily functioning; 2) access to actionable information for persons who require accessible forms of communication, including persons with vision or hearing disabilities; intellectual and developmental, autism, cognitive, learning, reading and information processing disabilities; 3) ensuring the daily needs of persons with disabilities are met for food, housing, healthcare, and community support, which are provided by personal caregivers or community agencies; 4) how to operationalize the living arrangements throughout quarantines that potentially may be particularly burdensome for persons with disabilities and their families; 5) ensuring equal access to necessary diagnostic tests and protective equipment; and 6) the provision of training for agencies and their employees in their legal obligations with regard to persons with disabilities.

The nation has witnessed the tragedies that COVID-19 can cause in an institutional setting, such as the nursing facility in the State of Washington. While there are thousands of such facilities throughout the country, including facilities serving children and adults with intellectual and developmental disabilities, autism, psychiatric, or physical disabilities, there are hundreds of thousands of people with disabilities living independently or in small community homes. This reality presents an even greater task of ensuring they have the support needed, and access to information and resources to survive this crisis. We are particularly concerned for the health and safety of these citizens should their support staff and personal assistants become ill or unavailable to continue working. This sector is facing the greatest staffing shortage in our history, and we are deeply concerned that this public health emergency will dramatically exacerbate the workforce crisis.

We ask you and your team to provide us with how the Administration will address the following:

- 1) What are your plans to address providing services to persons with disabilities living in their own home with daily in-home services and supports, should personal assistance providers become infected or decide to not come to work? We cannot emphasize enough the seriousness of this concern.
- 2) What are your plans for ensuring that providers who travel from home to home throughout the day do not expose persons with disabilities to COVID-19 in their home?
- 3) What are your plans to address staffing shortages of social or health service agencies providing services to persons with disabilities should staff become infected or decide to not come to work? We cannot emphasize enough the seriousness of this concern.
- 4) What are your plans if an individual in a group facility for persons with disabilities is identified as having COVID-19? What guidance will be provided to minimize infection of others? What are your plans if the staff of the facility becomes ill and doesn't come to work?
- 5) What are your plans for training the employees of community living facilities regarding COVID-19?
- 6) What are your plans to communicate emergency information to people who are blind or deaf, or who otherwise need individualized types of communications?

We have not seen any statement by your office or the involved agencies to ensure these and related questions are being asked, much less answered. We stand ready to assist in identifying experts in planning for and responding to the public health emergency needs of persons with disabilities who can recommend possible solutions to you and the relevant agencies working on these issues. We appreciate your attention to this request and the National Call to Action.

Subject: Mobile Lab Platforms for Field Screening

Dear Mr. Harrison,

As a former LCDR in the Medical Service Corps of the Navy, a public health professional, and a first responder in several natural disasters (Loma Prieta Earthquake and Katrina), I can appreciate the challenges you and the Secretary currently face. I want to help.

Our company, Envirolitics® (<https://protect2.fireeye.com/url?k=8cf26196-d0a76885-8cf250a9-0cc47adb5650-9473eb833eca8c9f&u=http://www.envirolitics.us/>), makes mobile medical and scientific laboratories, as well as portable power plants, using wind and solar energy to power equipment (MS, qPCR, etc.) for extended periods of time, unattended, whenever conventional power supplies are limited or unavailable. I thought this might be of interest to you in your response to facilitate rapid sample collections for various pathogens, like (but not limited to) the Covid-19 epidemic.

The SciArk® is a field-deployable, alternate-fuel, EPA certified, zero emissions, solar and wind assisted mobile lab. The patent pending platforms (vans, trucks, trailers, and containers) are devices, systems, and methods for equipment manufacturers, companies, and researchers to run their instruments, electronics, and sensors for days at the job site or while in transit without the need for shore power. Our platforms take the lab to people at risk, reducing turnaround the time for definitive testing. There are currently three (3) mobile platforms available for immediate deployment.

A demonstration of the platforms can be arranged at your current or future convenience.

Best regards,

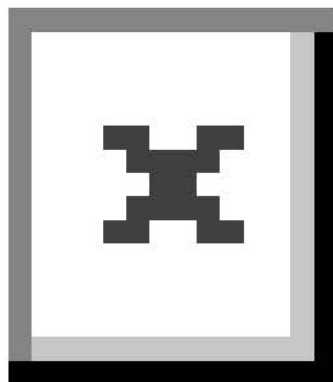

Alan W. Joseph, Jr., MPH

Subject:	Morning Consult Health, Presented by NACDS: Grand Princess Cruise Ship Passengers to Be Sent to Quarantine, Treatment Sites for Coronavirus Monitoring
Date:	2020/03/09 11:53:16
Priority:	Normal
Type:	Note

By Yusra Murad

Morning Consult Health is adding a section on the coronavirus to track the outbreak in the United States.

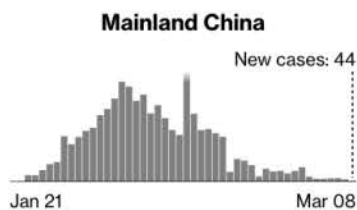

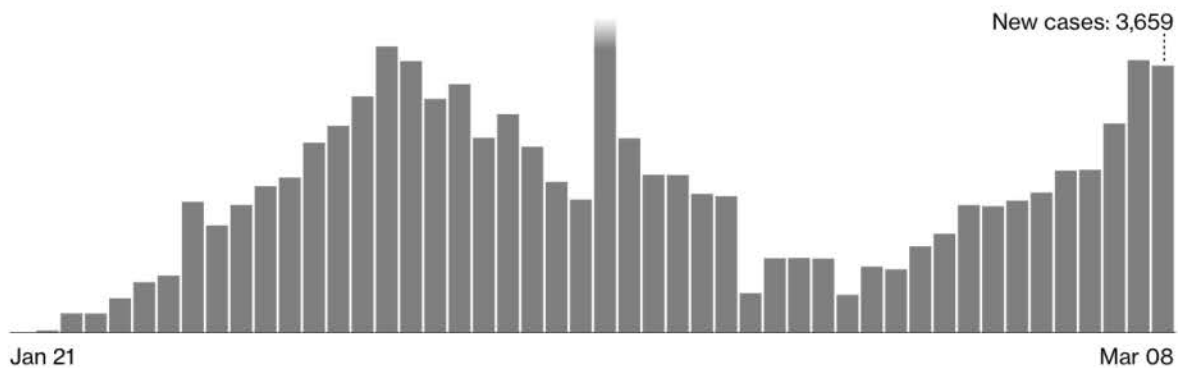

Top Stories

- • The 2,400 passengers disembarking the Grand Princess cruise ship will be received in California today and sent to quarantine and treatment sites in Oakland and military bases in California, Georgia and Texas, while 1,100 crew members continue toward a destination that has not yet been confirmed. So far, 19 crew members and two passengers are confirmed to have COVID-19, and people needing immediate treatment will be sent to health care facilities in California. ([Reuters](#))
- • The White House rejected the Centers for Disease Control and Prevention's recommendation to warn elderly and compromised Americans against flying amid the coronavirus outbreak, according to a federal official with direct knowledge of the plan. The CDC has updated its guidelines to recommend seniors and people with severe medical conditions stay home and avoid crowds, but does not mention air travel, and the White House rejected the claim that anyone pushed the CDC to remove that language. ([The Associated Press](#))
- • The Office of Management and Budget finished reviewing the Health and Human Services' new interoperability rules Friday, with many expecting the Trump administration to unveil the widely anticipated rules today, despite the cancellation of the Healthcare Information and Management Systems Society conference. Several lobbyists said they have been informed of a conference call with HHS Secretary Alex Azar, Centers for Medicare and Medicaid Services Administrator Seema Verma and other administration officials to discuss the proposals, which would allow patients to access and download their health records with third-party apps. ([Modern Healthcare](#))

A MESSAGE FROM THE NATIONAL ASSOCIATION OF CHAIN DRUG STORES

We're Here with a Solution for Patients and Pharmacies

NACDS members meet with Congress this week, urging a solution to "DIR fees." Relief from these truly dire fees will help reduce patients' out-of-pocket drug costs.

Relief also will help prevent further damage to pharmacies' viability and to patient access. DIR fee reforms currently included in bipartisan drug-pricing legislation by Senate Finance Committee Chairman Chuck Grassley (R-IA) and Ranking Member Ron Wyden (D-OR) would confront a dire problem, and should be enacted right away.

Coronavirus

Florida: 2 dead in the state who tested positive for virus

Kelli Kennedy, The Associated Press

Two people who tested positive for the new coronavirus have died in Florida, marking the first deaths on the East Coast attributed to the outbreak in the U.S., health officials said Friday.

Coronavirus hits Capitol Hill as 2 GOP lawmakers 'self-quarantine'

Rishika Dugyala and John Bresnahan, Politico

Texas Sen. Ted Cruz and Arizona Rep. Paul Gosar interacted with the same infected person at the recent CPAC conference.

FDA head says 2.1 million coronavirus tests will have been shipped to labs by Monday

Timothy Gardner and Diane Bartz, Reuters

The head of the U.S. Food and Drug Administration said on Saturday that materials for 2.1 million coronavirus tests will have been shipped to non-public U.S. labs by Monday, as the Trump administration aims to counter criticism that its response to

the disease has been sluggish.

Inside a coronavirus drug delay

Caitlin Owens and Jonathan Swan, Axios

Crossed lines and poor communication between the U.S. government and a leading pharmaceutical company appear to have complicated the breakneck search for a coronavirus treatment.

Federal Agencies Prepare for Coronavirus Disruptions

Kate Davidson, The Wall Street Journal

Air-traffic controllers, food inspectors, mail carriers ready emergency plans to maintain essential services as the virus spreads.

Exclusive: The Strongest Evidence Yet That America Is Botching Coronavirus Testing

Robinson Meyer and Alexis C. Madrigal, The Atlantic

"I don't know what went wrong," a former CDC chief told The Atlantic.

Where That \$8.3 Billion In U.S. Coronavirus Funding Will And Won't Go

Selena Simmons-Duffin, NPR News

The coronavirus funding bill signed into law by the president Friday puts much more money toward treating and preventing the spread of COVID-19 than his administration requested from Congress last week.

Inside Trump Administration, Debate Raged Over What to Tell Public

Michael D. Shear et al., The New York Times

The administration's response to the coronavirus has repeatedly matched public health experts against a hesitant White House, where worry of panic dominates.

Trump enlists Big Pharma to stem the coronavirus crisis - and the industry hopes to win him over for good

Lauren Hirsch, CNBC

As confirmed cases of the coronavirus continue to rise, President Donald Trump has quickly embraced the pharmaceutical industry he once vilified for its high prices. The industry has, in turn, jumped on the opportunity.

With Test Kits in Short Supply, Health Officials Sound Alarms

Katie Thomas, The New York Times

Despite efforts by President Trump and others to reassure the public that tests are getting disseminated quickly, several states, doctors and patients complained that access was limited.

Seattle Health Care System Offers Drive-Through Coronavirus Testing For Workers

Jon Hamilton, NPR News

Employees of the University of Washington's UW Medicine system, can now get tested for coronavirus without leaving their cars.

How Long Will It Take to Develop a Coronavirus Vaccine?

Carolyn Kormann, The New Yorker

A COVID-19 vaccine developed, licensed, and manufactured at a global scale in twelve months would be an unprecedented, even revolutionary achievement.

Payers

Vulnerable GOP senators move toward provider-friendly surprise billing proposal

Rachel Cohrs, Modern Healthcare

Republican senators in competitive re-election races have quietly moved toward supporting a provider-friendly surprise billing proposal that appeared to have

stalled.

Providers

MedPAC: There's room for specialists in ACOs, but no savings

Michael Brady, Modern Healthcare

While specialists have argued that they don't have enough opportunities to participate in value-based payment models, new federal research suggests that isn't the case.

The Coronavirus Outbreak Is About To Put Hospital Capacity To A Severe Test

Jonathan Cohn, HuffPost

Potential shortages of ICU beds, ventilators and staff are all big concerns.

Quality experts call for HHS to revive the National Quality Strategy 10 years after ACA

Maria Castellucci, Modern Healthcare

Stakeholders from across the industry have been working together over the last 10 months on a national strategy to improve quality of care over the next decade.

Pharma, Biotech and Devices

Heart Association admits teaming with Bayer on drug-store aspirin displays was a 'misstep'

Phil Galewitz, Kaiser Health News

The large red-and-white bins at Walmart pharmacies across the country read, in

bold all-caps type: "Approximately every 40 seconds an American will have a heart attack."

Bristol-Myers' multiple myeloma combo therapy fails late-stage study
Saumya Sibi Joseph, Reuters

Bristol Myers Squibb Co said on Monday its combination therapy for multiple myeloma did not meet the main goal of showing an improvement in progression-free survival in newly diagnosed patients.

Aspirin, the Original Wonder Drug
Jane E. Brody, The New York Times

In recent years, its reputation has been sullied by recognition of potentially serious side effects, especially dangerous bleeding in the gastrointestinal tract or the brain.

Could immuno-oncology treatments get a boost from a 64-year-old antipsychotic?
Arlene Weintraub, FierceBiotech

Prochlorperazine (PCZ) was first approved by the FDA back in 1956 to treat psychosis, and, even though it's been overtaken by newer antipsychotics, it's still prescribed today to relieve nausea and vomiting. Now, Australian researchers are suggesting a new use for the drug: to improve the effectiveness of checkpoint inhibitors and other antibodies in cancer.

Health IT

Surge of Virus Misinformation Stumps Facebook and Twitter
Sheera Frenkel et al., The New York Times

Secret labs. Magic cures. Government plots. Despite efforts by social media companies to stop it, false information about the coronavirus is proliferating

around the world.

A Message from the National Association of Chain Drug Stores:

A new analysis released in February revealed that the dire fees harming patients and pharmacies "have grown faster than most people realize." These "DIR fees" reached a record \$9.1 billion in 2019. [An opinion piece published by Morning Consult](#) describes the dire effects of this situation, as well as the bipartisan solution to "DIR fees" presented by Senate Finance Committee Chairman Chuck Grassley (R-IA) and Ranking Member Ron Wyden (D-OR). Read more at [AccessAgenda.NACDS.org](#).

Opinions, Editorials and Perspectives

Another Costly January Has Come and Gone for Medicare Part D Beneficiaries

Dan Klein and A. Mark Fendrick, Morning Consult

For Medicare beneficiaries living with life-threatening, chronic and rare diseases, January is the month when seniors and those who are disabled are asked to dig deep into their wallets.

Curing HIV and sickle cell falls short if the most vulnerable populations are left out

Francis S. Collins, Fortune

The year was 1984. I was finishing my medical genetics training at Yale, working on the molecular genetics of disorders of human hemoglobin.

Research Reports

Severe Lung Injury Associated With Use of e-Cigarette, or Vaping, Products-California, 2019

Amy Heinzerling et al., JAMA

Of 160 patients included in this case series, 74% were younger than 35 years, 46% required admission to intensive care units, and 29% required mechanical ventilation. Of 86 patients interviewed, 83% reported using tetrahydrocannabinol (THC)-containing products, most of which were acquired from informal sources; vitamin E or vitamin E acetate was present in 84% of THC-containing products tested from 24 patients.

General

The 'London Patient,' Cured Of H.I.V., Reveals His Identity

Apoorva Mandavilli, The New York Times

A year after the "London Patient" was introduced to the world as only the second person to be cured of H.I.V., he is stepping out of the shadows to reveal his identity: He is Adam Castillejo.

Juul Labs Sought to Court AGs as Teen Vaping Surged

Matthew Perrone and Richard Lardner, The Associated Press

It was a blunt warning about the dangers of youth vaping: Georgia Attorney General Chris Carr announced late last month that his state had joined 38 others to investigate whether Juul Labs, the nation's largest electronic cigarette company, promoted and sold its nicotine-heavy products to teens.

"I don't know what went wrong," a former CDC chief told The Atlantic.

Where That \$8.3 Billion In U.S. Coronavirus Funding Will And Won't Go

Selena Simmons-Duffin, NPR News

The coronavirus funding bill signed into law by the president Friday puts much more money toward treating and preventing the spread of COVID-19 than his administration requested from Congress last week.

Inside Trump Administration, Debate Raged Over What to Tell Public

Michael D. Shear et al., The New York Times

The administration's response to the coronavirus has repeatedly matched public health experts against a hesitant White House, where worry of panic dominates.

Trump enlists Big Pharma to stem the coronavirus crisis - and the industry hopes to win him over for good

Lauren Hirsch, CNBC

As confirmed cases of the coronavirus continue to rise, President Donald Trump has quickly embraced the pharmaceutical industry he once vilified for its high prices. The industry has, in turn, jumped on the opportunity.

With Test Kits in Short Supply, Health Officials Sound Alarms

Katie Thomas, The New York Times

Despite efforts by President Trump and others to reassure the public that tests are getting disseminated quickly, several states, doctors and patients complained that access was limited.

Seattle Health Care System Offers Drive-Through Coronavirus Testing For Workers

Jon Hamilton, NPR News

Employees of the University of Washington's UW Medicine system, can now get tested for coronavirus without leaving their cars.

How Long Will It Take to Develop a Coronavirus Vaccine?

Carolyn Kormann, The New Yorker

A COVID-19 vaccine developed, licensed, and manufactured at a global scale in twelve months would be an unprecedented, even revolutionary achievement.

Payers

Vulnerable GOP senators move toward provider-friendly surprise billing proposal

Rachel Cohrs, Modern Healthcare

Republican senators in competitive re-election races have quietly moved toward supporting a provider-friendly surprise billing proposal that appeared to have

stalled.

Providers

MedPAC: There's room for specialists in ACOs, but no savings

Michael Brady, Modern Healthcare

While specialists have argued that they don't have enough opportunities to participate in value-based payment models, new federal research suggests that isn't the case.

The Coronavirus Outbreak Is About To Put Hospital Capacity To A Severe Test

Jonathan Cohn, HuffPost

Potential shortages of ICU beds, ventilators and staff are all big concerns.

Quality experts call for HHS to revive the National Quality Strategy 10 years after ACA

Maria Castellucci, Modern Healthcare

Stakeholders from across the industry have been working together over the last 10 months on a national strategy to improve quality of care over the next decade.

Pharma, Biotech and Devices

Heart Association admits teaming with Bayer on drug-store aspirin displays was a 'misstep'

Phil Galewitz, Kaiser Health News

The large red-and-white bins at Walmart pharmacies across the country read, in

bold all-caps type: "Approximately every 40 seconds an American will have a heart attack."

Bristol-Myers' multiple myeloma combo therapy fails late-stage study
Saumya Sibi Joseph, Reuters

Bristol Myers Squibb Co said on Monday its combination therapy for multiple myeloma did not meet the main goal of showing an improvement in progression-free survival in newly diagnosed patients.

Aspirin, the Original Wonder Drug
Jane E. Brody, The New York Times

In recent years, its reputation has been sullied by recognition of potentially serious side effects, especially dangerous bleeding in the gastrointestinal tract or the brain.

Could immuno-oncology treatments get a boost from a 64-year-old antipsychotic?
Arlene Weintraub, FierceBiotech

Prochlorperazine (PCZ) was first approved by the FDA back in 1956 to treat psychosis, and, even though it's been overtaken by newer antipsychotics, it's still prescribed today to relieve nausea and vomiting. Now, Australian researchers are suggesting a new use for the drug: to improve the effectiveness of checkpoint inhibitors and other antibodies in cancer.

Health IT

Surge of Virus Misinformation Stumps Facebook and Twitter
Sheera Frenkel et al., The New York Times

Secret labs. Magic cures. Government plots. Despite efforts by social media companies to stop it, false information about the coronavirus is proliferating

around the world.

A Message from the National Association of Chain Drug Stores:

A new analysis released in February revealed that the dire fees harming patients and pharmacies "have grown faster than most people realize." These "DIR fees" reached a record \$9.1 billion in 2019. [An opinion piece published by Morning Consult](#) describes the dire effects of this situation, as well as the bipartisan solution to "DIR fees" presented by Senate Finance Committee Chairman Chuck Grassley (R-IA) and Ranking Member Ron Wyden (D-OR). Opinions, Editorials and Perspectives

Another Costly January Has Come and Gone for Medicare Part D Beneficiaries

Dan Klein and A. Mark Fendrick, Morning Consult

For Medicare beneficiaries living with life-threatening, chronic and rare diseases, January is the month when seniors and those who are disabled are asked to dig deep into their wallets.

Curing HIV and sickle cell falls short if the most vulnerable populations are left out

Francis S. Collins, Fortune

The year was 1984. I was finishing my medical genetics training at Yale, working on the molecular genetics of disorders of human hemoglobin.

Research Reports

Severe Lung Injury Associated With Use of e-Cigarette, or Vaping, Products-California, 2019

Amy Heinzerling et al., JAMA

Of 160 patients included in this case series, 74% were younger than 35 years, 46% required admission to intensive care units, and 29% required mechanical ventilation. Of 86 patients interviewed, 83% reported using tetrahydrocannabinol (THC)-containing products, most of which were acquired from informal sources; vitamin E or vitamin E acetate was present in 84% of THC-containing products tested from 24 patients.

General

The 'London Patient,' Cured Of H.I.V., Reveals His Identity

Apoorva Mandavilli, The New York Times

A year after the "London Patient" was introduced to the world as only the second person to be cured of H.I.V., he is stepping out of the shadows to reveal his identity: He is Adam Castillejo.

Juul Labs Sought to Court AGs as Teen Vaping Surged

Matthew Perrone and Richard Lardner, The Associated Press

It was a blunt warning about the dangers of youth vaping: Georgia Attorney General Chris Carr announced late last month that his state had joined 38 others to investigate whether Juul Labs, the nation's largest electronic cigarette company, promoted and sold its nicotine-heavy products to teens.

Subject: Mobile Lab Platforms for Field Screening

Dear Mr. Harrison,

As a former LCDR in the Medical Service Corps of the Navy, a public health professional, and a first responder in several natural disasters (Loma Prieta Earthquake and Katrina), I can appreciate the challenges you and the Secretary currently face. I want to help.

Our company, Envirolitics® (<https://protect2.fireeye.com/url?k=8cf26196-d0a76885-8cf250a9-0cc47adb5650-9473eb833eca8c9f&u=http://www.envirolitics.us/>), makes mobile medical and scientific laboratories, as well as portable power plants, using wind and solar energy to power equipment (MS, qPCR, etc.) for extended periods of time,

unattended, whenever conventional power supplies are limited or unavailable. I thought this might be of interest to you in your response to facilitate rapid sample collections for various pathogens, like (but not limited to) the Covid-19 epidemic.

The SciArk® is a field-deployable, alternate-fuel, EPA certified, zero emissions, solar and wind assisted mobile lab. The patent pending platforms (vans, trucks, trailers, and containers) are devices, systems, and methods for equipment manufacturers, companies, and researchers to run their instruments, electronics, and sensors for days at the job site or while in transit without the need for shore power. Our platforms take the lab to people at risk, reducing turnaround the time for definitive testing. There are currently three (3) mobile platforms available for immediate deployment.

A demonstration of the platforms can be arranged at your current or future convenience.

Best regards,

Alan W. Joseph, Jr., MPH

Can pro-NAFTA, pro-PNTR w/ China Joe Biden win in Michigan?

Four years ago, President Donald Trump shocked the world when he beat Hillary Clinton in the Rust Belt states of Michigan, Pennsylvania, Ohio and Wisconsin by uniting union households that had traditionally voted Democratic and conservatives on the strength of his America first message on trade and immigration. Trump's appeal to working class voters — opposing the NAFTA, China WTO membership and permanent normalized trade relations with China, as well as combatting illegal immigration to protect American jobs — is what put him over the top. Since 2016, the electoral map has not changed that much. Trump needs to once again carry these Rust Belt states to be reelected. That makes turning those states back blue the Democrats' number one task in 2020. But to win back those traditional Democratic households in the Rust Belt who voted for Trump in 2016, is former Vice President Joe Biden — who voted for NAFTA and permanent normal trade with China and proposed the Trans-Pacific Partnership — really Democrats' best choice?

Video: Coronavirus doesn't make jobs report ill, what's up with rates and new polls

U.S. unemployment remains at a 50-year low of 3.5 percent as interest rates collapse in the wake of global economic concern.

Newt Gingrich: The Biden-Sanders dilemma the Democratic Party now faces

"[I]f Biden over-emphasizes his differences with Sanders, he may make the convention in Milwaukee unmanageable. The left-wing activists might see the party establishment once again supposedly stealing the nomination from the left-wing challenger. Biden must be asking himself if his major goal should be, like Bill Clinton in 1992, to find a 'Sister Souljah' moment to take on the hard left and repudiate one of its more unpopular positions. Or, should Biden adopt the principle of 'no enemies to the left' and keep absorbing the ideas and proposals of Sanders and his supporters? This could lead to a more unified Democratic National Convention – but unity might come at the expense of independent voters and moderate Democrats who conclude that Biden is so close to the Sanders' positions that he is simply too big a risk to become president."

Can pro-NAFTA, pro-PNTR w/ China Joe Biden win in Michigan?

 6

By Robert Romano

Four years ago, President Donald Trump shocked the world when he beat Hillary Clinton in the Rust Belt states of Michigan, Pennsylvania, Ohio and Wisconsin by uniting union households that had traditionally voted Democratic with conservatives on the strength of his America first message on trade and immigration.

Trump's appeal to working class voters — opposing the North American Free Trade Agreement (NAFTA), China membership in the World Trade Organization (WTO) as well as permanent normalized trade relations, and combating illegal immigration to protect American jobs — is what put him over the top.

Trump's critics warned there would be no trade deals, and instead a trade war.

Now, four years later, President Trump is touting a 50-year low in unemployment, sustained growth and new reciprocal trade deals with Mexico, Canada and China. The wall is being built. Illegal immigration is way down with the Remain in Mexico policy in effect. Trump ended NAFTA, and got China to agree to a trade deal even though there's still a 25 percent tariff being levied, even as the trade in goods deficit with China collapsed by more than 17.6 percent in 2019, or \$73.9 billion.

Trump proved that with the effective use of U.S. economic power and leverage — emerging markets still want to sell goods to Americans — better agreements in U.S. interests could be had to bring production back here and enlist our neighbors to help control migration into the U.S.

And Trump can make the case that nobody else would have even tried to get those things done by threatening and levying tariffs, because no other president ever had in modern history. By that measure, Trump's policies were a success, because they brought trade partners to the table and ultimately hammered out agreements that received wide bipartisan support.

Since 2016, the electoral map has not changed that much. Trump still needs to carry these Rust Belt states to be reelected. That makes turning those states back blue the Democrats' number one task in 2020.

But to win back those traditional Democratic households in the Rust Belt who voted for Trump in 2016, is former Vice President Joe Biden — who voted for NAFTA and permanent normal trade with China and proposed the Trans-Pacific Partnership — really Democrats' best choice?

The answer may come in part on Tuesday, March 10 when the Michigan primary occurs. In 2016, Vermont Sen. Bernie Sanders, a self-described democratic socialist, beat Hillary Clinton narrowly in Michigan, exposing deep divisions in the Democratic Party around the

issue of trade, with union households favoring Sanders — all forecasting Trump’s eventual victory there.

Even with a comfortable lead for Biden in the polls, about a third of Democrats remain committed to Sanders, exposing Biden’s weakness on trade just like it did for Clinton in 2016 — and leaving an opening for Trump to once again exploit divisions among Democrats.

Biden may just have too much momentum to be slowed down now in the Democratic contest. But in the rush to stop Bernie, however, have Democrats’ paused to consider Biden’s baggage? Where do Bernie supporters in Michigan, particularly those union households, go? That is the crack in the Democratic coalition that Trump will try to take advantage of in November again, with history suggesting it will pay off.

Newt Gingrich: The Biden-Sanders dilemma the Democratic Party now faces

By Newt Gingrich

One week ago, no one expected the current race for the Democratic nomination.

Remember this the next time you see or hear one of us so-called experts on television or radio confidently predicting a future we don't understand.

With the backdrop of the emerging coronavirus threat, the wild swings in the stock market, the signing of an Afghanistan peace plan, the Chuck Schumer attack on Supreme Court justices, here is what happened in seven short days.

Former Vice President Joe Biden went from being almost out of the race to being the front runner and probable nominee.

Sen. Bernie Sanders, I-Vt., went from being the strong front runner and probable nominee – who was going to sweep Super Tuesday – to being a battered and isolated challenger underdog who may not have a path to the nomination.

Former South Bend Mayor Pete Buttigieg went from being a media darling, to having an incredibly weak showing in South Carolina, to withdrawing and endorsing Biden.

Sen. Amy Klobuchar, D-Minn., got remarkably few votes in South Carolina and faced a devastating series of defeats on Tuesday. So, she withdrew, endorsed Biden, and flew to Texas to join him on stage at a rally on the evening before the state's primary.

Former New York City Mayor Mike Bloomberg, after spending more than \$620 million, figured out his debate disasters had wiped out the positive effect of his advertising and withdrew, also throwing his support to Biden.

Former Rep. Beto O'Rourke, D-Texas, emerged from obscurity to endorse Biden before the Texas primary and locked Biden into an anti-gun (potentially gun confiscation) position.

Sen. Elizabeth Warren, D-Mass., stayed in a few extra days, but after coming in third in her home state to Biden and Sanders decided she, too, was withdrawing. As of now, she has not endorsed anyone (although remember in 2016 she endorsed former Secretary of State Hillary Clinton over Sanders).

Now, the race is down to Biden and Sanders, with the Democratic National Committee preparing to change its debate eligibility rules to keep Rep. Tulsi Gabbard, D-Hawaii, off the debate stage. Standing with two old white guys, she could maybe make an appealing contrast and represent a last stand for diversity – but not with the Democratic establishment that hates her firmly in control.

Biden and Sanders find themselves with real dilemmas, but the dilemmas are different for each candidate.

In Biden's case, he is already looking ahead to the general election against President Trump. A major selling point in the flood of endorsements is the belief among establishment Democrats that Sanders is simply too far to the left. So, one challenge for Biden will be to communicate that he is more reasonable. (His campaign and the media will use the word "moderate," but the fact is Biden is well to the left of Obama and without Sanders in the race it would be obvious how many of Biden's positions are opposed by most of the American people.)

However, if Biden over-emphasizes his differences with Sanders, he may make the convention in Milwaukee unmanageable. The left-wing activists might see the party establishment once again supposedly stealing the nomination from the left-wing challenger.

Biden must be asking himself if his major goal should be, like Bill Clinton in 1992, to find a "Sister Souljah" moment to take on the hard left and repudiate one of its more unpopular positions. Or, should Biden adopt the principle of "no enemies to the left" and keep absorbing the ideas and proposals of Sanders and his supporters? This could lead to a more unified Democratic National Convention – but unity might come at the expense of independent voters and moderate Democrats who conclude that Biden is so close to the Sanders' positions that he is simply too big a risk to become president.

Meanwhile, Sanders has his own dilemma.

If he wants to become the Democratic nominee, he has to take Biden down. This means speeches, advertising, and debate performances that are harshly critical of Biden and expose his many weaknesses. Biden is potentially susceptible to attacks on his family making money overseas, or his past positions to a whole series of issues which now run afoul of left-wing canon.

Still, a truly effective, harsh assault on Biden may alienate those Democrats whose primary focus is on how to beat President Trump. There may be a real penalty among party loyalists for either candidate if they are seen as weakening the Democratic Party's chance to beat the president.

All of this will begin to be obvious in the next few days.

Sanders cannot get back into the nomination race without forcing major differences with Biden and pushing the former vice president in the hope that Biden will make a major mistake.

Biden cannot become passive and look toward the general election until Sanders has been defeated. Bloomberg's passive debate performance was a vivid reminder that remaining passive while being attacked looks like a combination of weakness and guilt.

The race is very different than we thought it would be a week ago, but it remains incredibly interesting – and in many ways still capable of great surprises.

Can pro-NAFTA, pro-PNTR w/ China Joe Biden win in Michigan?

Four years ago, President Donald Trump shocked the world when he beat Hillary Clinton in the Rust Belt states of Michigan, Pennsylvania, Ohio and Wisconsin by uniting union households that had traditionally voted Democratic and conservatives on the strength of his America first message on trade and immigration. Trump's appeal to working class voters — opposing the NAFTA, China WTO membership and permanent normalized trade relations with China, as well as combatting illegal immigration to protect American jobs — is what put him over the top. Since 2016, the electoral map has not changed that much. Trump needs to once again carry these Rust Belt states to be reelected. That makes turning those states back blue the Democrats' number one task in 2020. But to win back those traditional Democratic households in the Rust Belt who voted for Trump in 2016, is former Vice President Joe Biden — who voted for NAFTA and permanent normal trade with China and proposed the Trans-Pacific Partnership — really Democrats' best choice?

By Robert Romano

Four years ago, President Donald Trump shocked the world when he beat Hillary Clinton in the Rust Belt states of Michigan, Pennsylvania, Ohio and Wisconsin by uniting union households that had traditionally voted Democratic with conservatives on the strength of his America first message on trade and immigration.

Trump's appeal to working class voters — opposing the North American Free Trade Agreement (NAFTA), China membership in the World Trade Organization (WTO) as well as permanent normalized trade relations, and combating illegal immigration to protect American jobs — is what put him over the top.

Trump's critics warned there would be no trade deals, and instead a trade war.

Now, four years later, President Trump is touting a 50-year low in unemployment, sustained growth and new reciprocal trade deals with Mexico, Canada and China. The wall is being built. Illegal immigration is way down with the Remain in Mexico policy in effect. Trump ended NAFTA, and got China to agree to a trade deal even though there's still a 25 percent tariff being levied, even as the trade in goods deficit with China collapsed by more than 17.6 percent in 2019, or \$73.9 billion.

Trump proved that with the effective use of U.S. economic power and leverage — emerging markets still want to sell goods to Americans — better agreements in U.S. interests could be had to bring production back here and enlist our neighbors to help control migration into the U.S.

And Trump can make the case that nobody else would have even tried to get those things done by threatening and levying tariffs, because no other president ever had in modern history. By that measure, Trump's policies were a success, because they brought trade partners to the table and ultimately hammered out agreements that received wide bipartisan support.

Since 2016, the electoral map has not changed that much. Trump still needs to carry these Rust Belt states to be reelected. That makes turning those states back blue the Democrats' number one task in 2020.

But to win back those traditional Democratic households in the Rust Belt who voted for Trump in 2016, is former Vice President Joe Biden — who voted for NAFTA and permanent normal trade with China and proposed the Trans-Pacific Partnership — really Democrats' best choice?

The answer may come in part on Tuesday, March 10 when the Michigan primary occurs. In 2016, Vermont Sen. Bernie Sanders, a self-described democratic socialist, beat Hillary Clinton narrowly in Michigan, exposing deep divisions in the Democratic Party around the

Subject: Topic for next PMO: Kaiser Permanente and HCA Discussion

All - please see below. This is from Dr. Kadlec and in reference to a call he had with Kaiser Permanente and HCA. Paul would like everyone to review and be prepared to discuss and make recommendations in Monday's PMO meeting.

--

I just got off a call from senior reps from KP and HCA requesting immediate consideration for modification of current guidance (CDC and corresponding CMS rules) requiring:

1. aerosol level personal protective equipment versus respiratory droplet

(b)(5)

2. Furlough policies requiring health care workers to self-quarantine and isolate and permit alignment of work force exposure guidelines with seasonal flu that permits asymptomatic HCW to continue to work while instituting appropriate PPE procedures and posture.

(b)(5)

3. Related to 2, characterization to HCW exposures to COVID-19 patients as "High Risk" even when appropriate PPE posture and procedures followed for HCW and patients.

(b)(5)

4. 1135 waivers for cross state licensed telehealth providers requiring prior relationship status with potential clients/patients

(b)(5)

5. Acceleration of approval of Alternate Care Facility plans and permits

(b)(5)

6. Decision to relax contact tracing requirements in light of community transmission in NoCal and WA

The other issue was related to CMS. Concerns about CMS messaging suggesting that Part B would cover cost of testing, however there are not sufficient testing kits yet to meet the demand.

—

V/r,

Sam Imbriale, MPH
Director, Information Management Division

Subject: Topic for next PMO: Kaiser Permanente and HCA Discussion

All - please see below. This is from Dr. Kadlec and in reference to a call he had with Kaiser Permanente and HCA. Paul would like everyone to review and be prepared to discuss and make recommendations in Monday's PMO meeting.

--

I just got off a call from senior reps from KP and HCA requesting immediate consideration for modification of current guidance (CDC and corresponding CMS rules) requiring:

1. aerosol level personal protective equipment versus respiratory droplet

(b)(5)

2. Furlough policies requiring health care workers to self-quarantine and isolate and permit alignment of work force exposure guidelines with seasonal flu that permits asymptomatic HCW to continue to work while instituting appropriate PPE procedures and posture.

(b)(5)

3. Related to 2, characterization to HCW exposures to COVID-19 patients as "High Risk" even when appropriate PPE posture and procedures followed for HCW and patients.

(b)(5)

4. 1135 waivers for cross state licensed telehealth providers requiring prior relationship status with potential clients/patients

(b)(5)

5. Acceleration of approval of Alternate Care Facility plans and permits

(b)(5)

6. Decision to relax contact tracing requirements in light of community transmission in NoCal and WA

The other issue was related to CMS. Concerns about CMS messaging suggesting that Part B would cover cost of testing, however there are not sufficient testing kits yet to meet the demand.

—

V/r,

Sam Imbriale, MPH
Director, Information Management Division
Director (Acting), Secretary's Operations Center

CDC Media Telebriefing: Update on COVID-19

What The Centers for Disease Control and Prevention (CDC) will provide an update to media on the COVID-19 response.

Who Nancy Messonnier, M.D., Director,
National Center for Immunization and Respiratory Diseases

When 12:15 p.m. ET Monday, March 9, 2020

Dial-In

Media: (b)(6)
International: (b)(6)

PASSCODE: CDC MEDIA

Non-Media: (b)(6)

International: (b)(6)

PASSCODE: (b)(6)

Important Instructions

Due to anticipated high volume, please plan to dial in to the telebriefing 15 minutes before the start time.

Media: If you would like to ask a question during the call, press *1 on your touchtone phone. Press *2 to withdraw your question. You may queue up at any time. You will hear a tone to indicate your question is pending.

TRANSCRIPT

A transcript will be available following the briefing at CDC's web site: www.cdc.gov/media.

###

U.S. Department of Health and Human Services

CDC works 24/7 protecting America's health, safety and security. Whether diseases start at home or abroad, are curable or preventable, chronic or acute, or from human activity or deliberate attack, CDC responds to America's most pressing health threats. CDC is headquartered in Atlanta and has experts located throughout the United States and the world.

If you would like to unsubscribe from this ListServ LIST, please send an email to LIST@cdc.gov, enter CDC in the email Subject, and include the following "one" line in the Body of the email: signoff MMWR-MEDIA
