Via email: foia@americanoversight.org

Dear Mr. Evers:

This is the third interim release in response to your Centers for Disease Control and Prevention and Agency for Toxic Substances and Disease Registry (CDC/ATSDR) Freedom of Information Act (FOIA) request of March 16, 2020, assigned 20-00949-FOIA, subsequently assigned #20-00003-LT, for litigation purposes.

Enclosed are 716 pages of responsive records. Some information was withheld from release pursuant to 5 U.S.C. §552 Exemptions, (b)(5) and (b)(6).

EXEMPTION 5

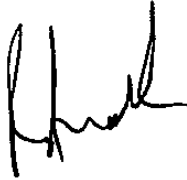

Exemption 5 protects inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency. Exemption 5 therefore incorporates the privileges that protect materials from discovery in litigation, including the deliberative process, attorney work-product, and attorney-client privileges. Information withheld under this exemption was protected under the deliberative process and presidential communications privileges. The deliberative process privilege protects the decision-making process of government agencies. The deliberative process privilege protects materials that are both predecisional and deliberative. The information that have been withheld under the deliberative process privilege of Exemption 5 are both predecisional and deliberative, and do not represent formal or informal agency policies or decisions. Examples of information withheld include recommendations, comments, opinions. The presidential communications privilege protects documents solicited and received by the President or his immediate White House advisers who have broad and significant responsibility for investigating and formulating the advice to be given to the President.

EXEMPTION 6

Exemption 6 protects information in personnel and medical files and similar files when disclosure would constitute a clearly unwarranted invasion of personal privacy. The information that has been withheld under Exemption 6 consists of personal information, such as names, email addresses, cell phone numbers, and conference and passcode numbers, and we have determined that the individuals to whom this information pertains have a substantial privacy interest in withholding it.

If you have any questions regarding your request, please contact U.S. Department of Justice attorney, Carol Federighi at carol.federighi@usdoj.gov or (202) 514-1903.

Sincerely,

A handwritten signature in black ink, appearing to read 'Roger Andoh', with a stylized, cursive script.

Hi Kyle-

The CEO of Dow would like to connect with R3.
The connection is through the advance lead who was on location during the Ft Lauderdale V-POTUS meeting.
Do we schedule a call?

Director Redfield,

We met in Fort Lauderdale during the Vice President's trip and meeting with the cruise industry. I just got word through the National Association of Manufacturers that the CEO of Dow wanted to connect. I know you are extremely busy but it sounded urgent so I wanted to pass this to you. I have added Hannah Salem who is assisting NAM during the COVID crisis and is the former Deputy Director of Advance for POTUS.

Again it was truly an honor to meet you. Thank you for all that you are doing.

Best Regards,

Edward Miyagishima

Assistance Response to COVID-19

[The United States is Leading the Humanitarian and Health Assistance Response to COVID-19](#)

03/27/2020 02:17 PM EDT

Office of the Spokesperson

The U.S. government is leading the world's humanitarian and health assistance response to the COVID-19 pandemic. We are mobilizing all necessary resources to respond rapidly, both at home and abroad. As part of this comprehensive and generous U.S. response, the State Department and USAID are providing an initial investment of nearly \$274 million in emergency health and humanitarian assistance to help countries in need, on top of the funding we already provide to multilateral organizations such as the World Health Organization and UNICEF.

This total to date includes nearly \$100 million in emergency health assistance from USAID's Global Health Emergency Reserve Fund and \$110 million in humanitarian assistance from USAID's International Disaster Assistance account, to be provided for up to 64 of the most at-risk countries facing the threat of this global pandemic. Through the State Department's Bureau

of Population, Refugees, and Migration, the UN Refugee Agency (UNHCR) will receive \$64 million in humanitarian assistance to help address the threats posed by COVID-19 in existing humanitarian crisis situations for some of the world's most vulnerable people.

U.S. government agencies are working together to prioritize foreign assistance based on coordination and the potential for impact. With today's new funds, the United States is providing the following specific assistance:

Africa:

- **Angola:** \$570,000 in health assistance will help provide risk communication, water and sanitation, and infection prevention and control in key health facilities in Angola. This assistance comes on top of long-term U.S. investments in Angola including \$613 million in health assistance and \$1.48 billion total country investment over the past 20 years.
- **Burkina Faso:** Nearly \$2.1 million in health and humanitarian funding will go toward risk communication, water and sanitation activities, infection prevention and control, public health messaging, and more. Over the past 20 years, the United States has invested more than \$222 million in health alone and more than \$2.4 billion total in Burkina Faso.
- **Cameroon:** \$1.4 million in health assistance will help provide infection control in key health facilities, strengthen laboratories and surveillance, prepare communities, and bolster local messaging. This assistance builds upon more than \$390 million in U.S. health assistance and more than \$960 million total country investment over the past 20 years.
- **Cote d'Ivoire:** \$1.6 million in health assistance to help the government prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. Over the past 20 years, the United States has invested nearly \$1.2 billion in Cote d'Ivoire's health, and more than \$2.1 billion in long term development and other assistance.
- **Ethiopia:** \$1.85 million to counter COVID-19 will go toward risk communication, water and sanitation activities, infection prevention, and coordination. This assistance joins the long-term U.S. investment in Ethiopia, including nearly \$4 billion in health alone and more than \$13 billion in total assistance over the past 20 years.
- **Kenya:** \$1 million in health assistance will bolster risk communication, prepare health-communication networks and media for a possible case, and help provide public health messaging for media, health workers, and communities. This COVID-19 specific assistance comes on top of long-term U.S. investment in Kenya, including \$6.7 billion in health assistance alone, and more than \$11.7 billion in development and other assistance over the last 20 years.
- **Mozambique:** \$2.8 million in emergency health funding will help provide risk communication, water and sanitation, and infection prevention and control in key health facilities in Mozambique. The United States has invested more than \$3.8 billion in health assistance and nearly \$6 billion total investment, including development and other assistance, over the past 20 years.
- **Nigeria:** More than \$7 million in health and humanitarian funding will go toward risk communication, water and sanitation activities, infection prevention, and coordination. This assistance joins more than \$5.2 billion in U.S. health assistance and more than \$8.1 billion in total assistance for Nigeria over the past 20 years.
- **Rwanda:** \$1 million in health assistance will help with surveillance and case management efforts in response to COVID-19. This comes on top of long-term U.S. investment in Rwanda including

more than \$1.5 billion in health and more than \$2.6 billion in total assistance over the past 20 years.

- **Senegal:**\$1.9 million in health funding will go toward risk communication, water and sanitation, infection prevention and control, public health messaging, and more. In Senegal, the U.S. has invested nearly \$880 million in health alone, and nearly \$2.8 billion in total assistance over the past 20 years.
- **South Africa:**\$2.77 million in health assistance to counter COVID-19 will support risk communication, water and sanitation, infection prevention and control, public health messaging, and more. This assistance joins nearly \$6 billion invested in health, and more than \$8 billion in total assistance, by the United States for South Africa in the past 20 years.
- **Tanzania:**\$1 million in health assistance will help provide risk communication, water and sanitation, infection prevention and control, public health messaging, and more. The United States has invested nearly \$4.9 billion in health alone and more than \$7.5 billion total for Tanzania over the past 20 years.
- **Zambia:**\$1.87 million in health assistance will go toward risk communication, water and sanitation, infection prevention and control, public health messaging, and more. This new assistance joins nearly \$3.9 billion in U.S. health assistance and nearly \$4.9 billion total U.S. assistance for Zambia over the past 20 years.
- **Zimbabwe:**\$470,000 in health assistance will help the government to prepare laboratories for large-scale testing, support case-finding activities for influenza-like illnesses, and implement a public-health emergency plan for points of entry. This builds on a history of U.S. investments in Zimbabwe – nearly \$1.2 billion in health alone, and nearly \$3 billion total over the past 20 years.
- In addition to health assistance, humanitarian funding is being provided for **Central African Republic** (\$3 million), **Democratic Republic of the Congo** (\$6 million), **Somalia** (\$7 million), **South Sudan** (\$8 million), and **Sudan** (\$8 million). This assistance will primarily provide health-related support and supplies to bolster water and sanitation activities. The United States has a long, generous history of investing in the health and welfare of these countries' citizens, and this humanitarian assistance comes on top of U.S. assistance over the past 20 years: \$4.5 million in health and \$822.6 million total for the Central African Republic; nearly \$1.6 billion in health and nearly \$6.5 billion total for the Democratic Republic of the Congo; nearly \$30 million in health and \$5.3 billion total for Somalia; more than \$405 million in health and more than nearly \$6.4 billion total for South Sudan; and more than \$3 million in health and more than \$1.6 billion total for Sudan.

Europe and Eurasia:

- **Albania:** \$700,000 in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. Over the last 20 years, the United States has invested more than \$51.8 million in health assistance for Albania, and more than \$693 million in total assistance.
- **Armenia:** \$1.1 million in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. The United States has invested nearly \$106 million in health assistance and \$1.57 billion total for Armenia over the past 20 years.
- **Azerbaijan:**\$1.7 million in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness,

bolster risk communication, and more. Over the past 20 years, the United States has invested nearly \$41 million in health alone in Azerbaijan, and more than \$890 million in total assistance.

- **Belarus:** \$1.3 million in health funding will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. This new assistance comes on top of decades of U.S. investment in Belarus, including nearly \$1.5 million in health alone and more than \$301 million in total U.S. assistance over the past 20 years.
- **Bosnia and Herzegovina:** \$1.2 million in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. The United States has invested \$200,000 in health assistance and more than \$1.1 billion in total assistance for Bosnia and Herzegovina over the past 20 years.
- **Georgia:** \$1.1 million in health funding will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. The United States has provided nearly \$139 million in health assistance and more than \$3.6 billion in total U.S. assistance over the past 20 years.
- **Kosovo:** \$1.1 million in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. This assistance to combat COVID-19 is in addition to long-term U.S. investments in Kosovo including more than \$10 million in health assistance and nearly \$773 million in total assistance over the past 20 years.
- **Moldova:** \$1.2 million in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. This COVID-19 assistance builds upon U.S. investments of nearly \$42 million in health assistance and more than \$1 billion in total assistance over the past 20 years.
- **North Macedonia:** \$1.1 million will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. Over the past 20 years, the United States has invested nearly \$11.5 million in health alone and more than \$738 million in total assistance for North Macedonia.
- **Serbia:** \$1.2 million in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. The United States has invested nearly \$5.4 million in health assistance and more than \$1 billion in total assistance over the past 20 years.
- **Ukraine:** More than \$1.2 million in health and humanitarian assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. The United States has provided long-term health investments in Ukraine over the past 20 years totaling nearly \$362 million, and total U.S. assistance of nearly \$5 billion over the same time period.
- **Uzbekistan:** Approximately \$848,000 in health funding will go to help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. This new assistance builds upon long-term U.S. investment of more than \$122 million in health and more than \$962 million total assistance over the past 20 years.

Asia:

- **Afghanistan:** Approximately \$5 million in health and humanitarian assistance will go to support detection and treatment of COVID-19 for internally displaced persons (IDPs). In addition, the United States has also redirected \$10 million in existing resources to support of the United Nations (WHO) Emergency Response Plan for COVID-19. This support will include surveillance, lab improvements, case management, infection prevention and control, community engagement, and technical assistance to Government of Afghanistan.
- **Bangladesh:** \$3.4 million in health assistance will help with case management and surveillance activities. This builds upon more than \$1 billion in health assistance alone out of nearly \$4 billion in total U.S. assistance over the past 20 years.
- **Burma:** Approximately \$3.8 million in health and humanitarian funding will go toward water and sanitation supplies, COVID-19 case management, event-based surveillance, coordination, and more. This assistance comes on top of long-term U.S. investment in Burma including more than \$176 million in health and more than \$1.3 billion in total U.S. assistance over the past 20 years.
- **Cambodia:** Approximately \$2 million in health assistance will help the government prepare laboratory systems, activate case-finding and event-based surveillance, and support technical experts for response and preparedness, and more. The United States has invested long-term in Cambodia, providing more than \$730 million in health and more than \$1.6 billion in total assistance over the past 20 years.
- **India:** \$2.9 million to help the government prepare laboratory systems, activate case-finding and event-based surveillance, and support technical experts for response and preparedness, and more. This builds upon the foundation of more than \$1.4 billion in health assistance out of the more than \$2.8 billion in U.S. assistance for India over the last 20 years.
- **Indonesia:** \$2.3 million in health assistance will help the government prepare laboratory systems, activate case-finding and event-based surveillance, and support technical experts for response and preparedness, and more. The United States has invested more than \$1 billion in health and more than \$5 billion in total assistance over the past 20 years.
- **Kazakhstan:** More than \$800,000 in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. This new assistance builds upon U.S. investments of more than \$86 million in health and more than \$2 billion in total assistance over the last 20 years.
- **Kyrgyzstan:** Approximately \$883,000 in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. The United States has invested more than \$120 million in health assistance and nearly \$1.2 billion in total assistance for Kyrgyzstan over the past 20 years.
- **Laos:** Nearly \$2 million in health assistance will help the government prepare laboratory systems, activate case-finding and event-based surveillance, and support technical experts for response and preparedness, and more. This assistance builds upon U.S. investment in Laos over time, including nearly \$92 million in health and more than \$348 million total over the past 20 years.
- **Mongolia:** Nearly \$1.2 million in health assistance will help the government prepare laboratory systems, activate case-finding and event-based surveillance, and support technical experts for response and preparedness, and more. The United States has invested nearly \$106 million in health and more than \$1 billion in total assistance for Mongolia over the past 20 years.
- **Nepal:** \$1.8 million in health assistance will help the government prepare laboratory systems, activate case-finding and event-based surveillance, and support technical experts for response

and preparedness, and more. Over the past 20 years, U.S. investment in Nepal includes more than \$603 million in health alone out of more than \$2 billion in total assistance.

- **Papua New Guinea:** \$1.2 million for Papua New Guinea to help the government prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. The United States has invested more than \$52 million in Papua New Guinea's health alone, and nearly \$90 million total, over the past 20 years.
- **Pacific Islands:** \$2.3 million to help governments prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. Over the last decade, the United States has invested more than \$620 million in health assistance for the Pacific Islands. Over the last 20 years, the United States has invested over \$5.21 billion in assistance to the Pacific Islands.
- **Pakistan:** \$1 million in health funding will help Pakistan strengthen monitoring and better prepare communities to identify potential outbreaks. To bolster its national COVID-19 action plan, the United States has also redirected more than \$1 million in existing funding for training of healthcare providers and other urgent needs. S. long-term investment in Pakistan includes more than \$1.1 billion in health alone and more than \$18.4 billion in total assistance over the past 20 years.
- **Philippines:** Nearly \$4 million in health assistance will help the government prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. The United States has invested more than \$582 million in the Philippines' health alone and nearly \$4.5 billion in total assistance over the past 20 years.
- **Sri Lanka:** \$1.3 million will help the government prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. Over the past 20 years, U.S. investment in Sri Lanka has included more than \$26 million in health alone out of more than \$1 billion in total assistance.
- **Tajikistan:** Approximately \$866,000 in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. This assistance builds on U.S. investments of nearly \$125 million in health and more than \$1 billion in total assistance over the past 20 years.
- **Thailand:** Approximately \$1.2 million in health assistance will help the government prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. This new assistance builds upon long-term U.S. assistance in Thailand including more than \$213 million in health and more than \$1 billion in total assistance over the past 20 years.
- **Turkmenistan:** Approximately \$920,000 in health assistance has been made available to help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. The United States has invested more than \$21.5 million in health and more than \$207 million in total assistance over the past 20 years.
- **Timor Leste:** \$1.1 million will help the government prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. The United States has invested

nearly \$70 million in health assistance and more than \$542 million in total assistance for Timor-Leste over the past 20 years.

- **Vietnam:** Nearly \$3 million in health assistance will help the government prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. Over the past 20 years, the United States has invested more than \$706 million in health assistance and more than \$1.8 billion in total assistance for Vietnam.
- **Regional Efforts in Asia:** \$1.6 million in health assistance will help governments across the region prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. The United States has provided more than \$226 million in health assistance regionally and in addition to health assistance to individual countries in the region, and in total more than \$3 billion in development and other assistance over the last 20 years.

Latin America and the Caribbean:

- **Jamaica:** \$700,000 in health funding will support risk communication efforts, water and sanitation, prevent and control infections, manage COVID-19 cases, strengthen laboratories, and surveil the spread of the virus. This assistance builds upon U.S. investments of nearly \$87 million in health and nearly \$619 million total over the past 20 years for Jamaica.
- **Paraguay:** \$1.3 million in health assistance will support risk communication efforts, prevent and control infections, manage COVID-19 cases, strengthen laboratories, and surveil the spread of the virus. U.S. investment in Paraguay is long-term and includes more than \$42 million in health and more than \$456 million total over the past 20 years.
- **Haiti:** \$2.2 million in health assistance will help the Haitian government scale up its risk communication efforts, water and sanitation, prevent and control infections, manage COVID-19 cases, strengthen laboratories, and more. The United States has invested \$1.8 billion in health in Haiti and nearly \$6.7 billion in total assistance over the past 20 years.
- **The Caribbean:** \$1.7 million will help governments in the Eastern Caribbean scale up their risk communication efforts, water and sanitation, prevent and control infections, manage COVID-19 cases, strengthen laboratories, and surveil the spread of the virus. This builds upon decades of strategic U.S. investment in the region, including more than \$236 million in health and more than \$840 million total over the past 20 years.
- Additionally, humanitarian assistance is being provided to **Colombia** (\$8.5 million) and **Venezuela** (\$9 million) to surveil the spread of the virus, provide water and sanitation supplies, manage COVID-19 cases, and more. In Colombia, the United States has invested approximately \$32.5 million in health over the past 20 years, and nearly \$12 billion in total assistance in that same time frame. In Venezuela, the U.S. has invested more than \$1.3 million in direct health assistance and more than \$278 million in total long-term assistance over the past 20 years.

Middle East and North Africa:

- **Morocco:** \$670,000 in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. This assistance builds upon long-term U.S. investments in Morocco, including \$64.5 million in health and more than \$2.6 billion in total assistance over the last 20 years.
- **Tunisia:** \$700,000 in health assistance will help prepare laboratory systems, activate case-finding

and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. The United States has invested more than \$7 million directly in health assistance and more than \$1.3 billion in total U.S. assistance for Tunisia over the past 20 years.

- **Iraq:** More than \$15.5 million in health and humanitarian assistance will help prepare laboratories, implement a public-health emergency plan for points of entry, activate case-finding and event-based surveillance for influenza-like illnesses, and more. This new assistance builds upon long-term investment in Iraq, including nearly \$4 billion in health alone, and more than \$70 billion in total U.S. assistance over the past 20 years.
- Humanitarian assistance is also being provided for **Libya** (\$6 million) and **Syria** (\$16.8 million). This assistance joins decades of U.S. investments in both countries' health and overall development. The U.S. has invested more than \$715 million in total assistance for Libya over the past 20 years, and more than \$6.1 billion in total assistance for Syria in the same time frame.

UN Organizations and Agencies:

- \$24.3 million in global and regional programming through international organizations like the WHO and UNICEF.
- \$64 million for UNHCR's portion of the UN's COVID-19 Global Humanitarian Response Plan to address the challenges posed by the COVID-19 pandemic in refugee, IDP, and hosting communities in countries already facing complex humanitarian crises across Africa, Asia, the Middle East, and South America.

U.S. investments under the Global Health Security Agenda, including those we have contributed to this global crisis response, are designed to protect the American public by helping to minimize the spread of disease in affected countries and improve local and global responses to outbreaks of infectious pathogens.

This new assistance builds on the United States' record of leadership in global health and humanitarian assistance. This assistance is part of a larger USG global response package across multiple departments and agencies, including the Centers for Disease Control and Prevention (CDC). Since 2009, American taxpayers have generously funded more than \$100 billion in health assistance and nearly \$70 billion in humanitarian assistance globally. Our country continues to be the single largest health and humanitarian donor for both long-term development and capacity building efforts with partners, and emergency response efforts in the face of recurrent crises. This money has saved lives, protected people who are most vulnerable to disease, built health institutions, and promoted the stability of communities and nations.

For more information on the U.S. government's holistic funding in response to this crisis, please contact F-Press@state.gov.

For details on specific in-country response activities, please contact USAID at press@usaid.gov.

For details on the humanitarian assistance contribution to UNHCR, please contact the State Department's Bureau for Population, Refugees, and Migration at PRM-Press@state.gov.

[The United States is Leading the Humanitarian and Health Assistance Response to COVID-19](#)

03/27/2020 02:17 PM EDT

Office of the Spokesperson

The U.S. government is leading the world's humanitarian and health assistance response to the COVID-19 pandemic. We are mobilizing all necessary resources to respond rapidly, both at home and abroad. As part of this comprehensive and generous U.S. response, the State Department and USAID are providing an initial investment of nearly \$274 million in emergency health and humanitarian assistance to help countries in need, on top of the funding we already provide to multilateral organizations such as the World Health Organization and UNICEF.

This total to date includes nearly \$100 million in emergency health assistance from USAID's Global Health Emergency Reserve Fund and \$110 million in humanitarian assistance from USAID's International Disaster Assistance account, to be provided for up to 64 of the most at-risk countries facing the threat of this global pandemic. Through the State Department's Bureau of Population, Refugees, and Migration, the UN Refugee Agency (UNHCR) will receive \$64 million in humanitarian assistance to help address the threats posed by COVID-19 in existing humanitarian crisis situations for some of the world's most vulnerable people.

U.S. government agencies are working together to prioritize foreign assistance based on coordination and the potential for impact. With today's new funds, the United States is providing the following specific assistance:

Africa:

- **Angola:** \$570,000 in health assistance will help provide risk communication, water and sanitation, and infection prevention and control in key health facilities in Angola. This assistance comes on top of long-term U.S. investments in Angola including \$613 million in health assistance and \$1.48 billion total country investment over the past 20 years.
- **Burkina Faso:** Nearly \$2.1 million in health and humanitarian funding will go toward risk communication, water and sanitation activities, infection prevention and control, public health messaging, and more. Over the past 20 years, the United States has invested more than \$222 million in health alone and more than \$2.4 billion total in Burkina Faso.
- **Cameroon:** \$1.4 million in health assistance will help provide infection control in key health facilities, strengthen laboratories and surveillance, prepare communities, and bolster local messaging. This assistance builds upon more than \$390 million in U.S. health assistance and more than \$960 million total country investment over the past 20 years.
- **Cote d'Ivoire:** \$1.6 million in health assistance to help the government prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. Over the past 20 years, the United States has invested nearly \$1.2 billion in Cote d'Ivoire's health, and more than \$2.1 billion in long term development and other assistance.
- **Ethiopia:** \$1.85 million to counter COVID-19 will go toward risk communication, water and sanitation activities, infection prevention, and coordination. This assistance joins the long-term U.S. investment in Ethiopia, including nearly \$4 billion in health alone and more than \$13 billion in total assistance over the past 20 years.
- **Kenya:** \$1 million in health assistance will bolster risk communication, prepare health-communication networks and media for a possible case, and help provide public health messaging for media, health workers, and communities. This COVID-19 specific assistance comes on top of long-term U.S. investment in Kenya, including \$6.7 billion in health assistance alone, and more than \$11.7 billion in development and other assistance over the last 20 years.
- **Mozambique:** \$2.8 million in emergency health funding will help provide risk communication, water and sanitation, and infection prevention and control in key health facilities in Mozambique. The United States has invested more than \$3.8 billion in health assistance and nearly \$6 billion total investment, including development and other assistance, over the past 20 years.
- **Nigeria:** More than \$7 million in health and humanitarian funding will go toward risk communication, water and sanitation activities, infection prevention, and coordination. This assistance joins more than \$5.2 billion in U.S. health assistance and more than \$8.1 billion in total assistance for Nigeria over the past 20 years.
- **Rwanda:** \$1 million in health assistance will help with surveillance and case management efforts in response to COVID-19. This comes on top of long-term U.S. investment in Rwanda including more than \$1.5 billion in health and more than \$2.6 billion in total assistance over the past 20 years.
- **Senegal:** \$1.9 million in health funding will go toward risk communication, water and sanitation, infection prevention and control, public health messaging, and more. In Senegal, the U.S. has invested nearly \$880 million in health alone, and nearly \$2.8 billion

in total assistance over the past 20 years.

- **South Africa:** \$2.77 million in health assistance to counter COVID-19 will support risk communication, water and sanitation, infection prevention and control, public health messaging, and more. This assistance joins nearly \$6 billion invested in health, and more than \$8 billion in total assistance, by the United States for South Africa in the past 20 years.
- **Tanzania:** \$1 million in health assistance will help provide risk communication, water and sanitation, infection prevention and control, public health messaging, and more. The United States has invested nearly \$4.9 billion in health alone and more than \$7.5 billion total for Tanzania over the past 20 years.
- **Zambia:** \$1.87 million in health assistance will go toward risk communication, water and sanitation, infection prevention and control, public health messaging, and more. This new assistance joins nearly \$3.9 billion in U.S. health assistance and nearly \$4.9 billion total U.S. assistance for Zambia over the past 20 years.
- **Zimbabwe:** \$470,000 in health assistance will help the government to prepare laboratories for large-scale testing, support case-finding activities for influenza-like illnesses, and implement a public-health emergency plan for points of entry. This builds on a history of U.S. investments in Zimbabwe – nearly \$1.2 billion in health alone, and nearly \$3 billion total over the past 20 years.
- In addition to health assistance, humanitarian funding is being provided for **Central African Republic** (\$3 million), **Democratic Republic of the Congo** (\$6 million), **Somalia** (\$7 million), **South Sudan** (\$8 million), and **Sudan** (\$8 million). This assistance will primarily provide health-related support and supplies to bolster water and sanitation activities. The United States has a long, generous history of investing in the health and welfare of these countries' citizens, and this humanitarian assistance comes on top of U.S. assistance over the past 20 years: \$4.5 million in health and \$822.6 million total for the Central African Republic; nearly \$1.6 billion in health and nearly \$6.5 billion total for the Democratic Republic of the Congo; nearly \$30 million in health and \$5.3 billion total for Somalia; more than \$405 million in health and more than nearly \$6.4 billion total for South Sudan; and more than \$3 million in health and more than \$1.6 billion total for Sudan.

Europe and Eurasia:

- **Albania:** \$700,000 in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. Over the last 20 years, the United States has invested more than \$51.8 million in health assistance for Albania, and more than \$693 million in total assistance.
- **Armenia:** \$1.1 million in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. The United States has invested nearly \$106 million in health assistance and \$1.57 billion total for Armenia over the past 20 years.
- **Azerbaijan:** \$1.7 million in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. Over the past 20 years, the United States has invested nearly \$41 million in health alone in Azerbaijan,

and more than \$890 million in total assistance.

- **Belarus:** \$1.3 million in health funding will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. This new assistance comes on top of decades of U.S. investment in Belarus, including nearly \$1.5 million in health alone and more than \$301 million in total U.S. assistance over the past 20 years.
- **Bosnia and Herzegovina:** \$1.2 million in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. The United States has invested \$200,000 in health assistance and more than \$1.1 billion in total assistance for Bosnia and Herzegovina over the past 20 years.
- **Georgia:** \$1.1 million in health funding will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. The United States has provided nearly \$139 million in health assistance and more than \$3.6 billion in total U.S. assistance over the past 20 years.
- **Kosovo:** \$1.1 million in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. This assistance to combat COVID-19 is in addition to long-term U.S. investments in Kosovo including more than \$10 million in health assistance and nearly \$773 million in total assistance over the past 20 years.
- **Moldova:** \$1.2 million in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. This COVID-19 assistance builds upon U.S. investments of nearly \$42 million in health assistance and more than \$1 billion in total assistance over the past 20 years.
- **North Macedonia:** \$1.1 million will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. Over the past 20 years, the United States has invested nearly \$11.5 million in health alone and more than \$738 million in total assistance for North Macedonia.
- **Serbia:** \$1.2 million in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. The United States has invested nearly \$5.4 million in health assistance and more than \$1 billion in total assistance over the past 20 years.
- **Ukraine:** More than \$1.2 million in health and humanitarian assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. The United States has provided long-term health investments in Ukraine over the past 20 years totaling nearly \$362 million, and total U.S. assistance of nearly \$5 billion over the same time period.
- **Uzbekistan:** Approximately \$848,000 in health funding will go to help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. This new assistance builds upon long-term U.S. investment of more than \$122 million in health

and more than \$962 million total assistance over the past 20 years.

Asia:

- **Afghanistan:** Approximately \$5 million in health and humanitarian assistance will go to support detection and treatment of COVID-19 for internally displaced persons (IDPs). In addition, the United States has also redirected \$10 million in existing resources to support of the United Nations (WHO) Emergency Response Plan for COVID-19. This support will include surveillance, lab improvements, case management, infection prevention and control, community engagement, and technical assistance to Government of Afghanistan.
- **Bangladesh:** \$3.4 million in health assistance will help with case management and surveillance activities. This builds upon more than \$1 billion in health assistance alone out of nearly \$4 billion in total U.S. assistance over the past 20 years.
- **Burma:** Approximately \$3.8 million in health and humanitarian funding will go toward water and sanitation supplies, COVID-19 case management, event-based surveillance, coordination, and more. This assistance comes on top of long-term U.S. investment in Burma including more than \$176 million in health and more than \$1.3 billion in total U.S. assistance over the past 20 years.
- **Cambodia:** Approximately \$2 million in health assistance will help the government prepare laboratory systems, activate case-finding and event-based surveillance, and support technical experts for response and preparedness, and more. The United States has invested long-term in Cambodia, providing more than \$730 million in health and more than \$1.6 billion in total assistance over the past 20 years.
- **India:** \$2.9 million to help the government prepare laboratory systems, activate case-finding and event-based surveillance, and support technical experts for response and preparedness, and more. This builds upon the foundation of more than \$1.4 billion in health assistance out of the more than \$2.8 billion in U.S. assistance for India over the last 20 years.
- **Indonesia:** \$2.3 million in health assistance will help the government prepare laboratory systems, activate case-finding and event-based surveillance, and support technical experts for response and preparedness, and more. The United States has invested more than \$1 billion in health and more than \$5 billion in total assistance over the past 20 years.
- **Kazakhstan:** More than \$800,000 in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. This new assistance builds upon U.S. investments of more than \$86 million in health and more than \$2 billion in total assistance over the last 20 years.
- **Kyrgyzstan:** Approximately \$883,000 in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. The United States has invested more than \$120 million in health assistance and nearly \$1.2 billion in total assistance for Kyrgyzstan over the past 20 years.
- **Laos:** Nearly \$2 million in health assistance will help the government prepare laboratory systems, activate case-finding and event-based surveillance, and support technical experts for response and preparedness, and more. This assistance builds upon U.S.

investment in Laos over time, including nearly \$92 million in health and more than \$348 million total over the past 20 years.

- **Mongolia:** Nearly \$1.2 million in health assistance will help the government prepare laboratory systems, activate case-finding and event-based surveillance, and support technical experts for response and preparedness, and more. The United States has invested nearly \$106 million in health and more than \$1 billion in total assistance for Mongolia over the past 20 years.
- **Nepal:** \$1.8 million in health assistance will help the government prepare laboratory systems, activate case-finding and event-based surveillance, and support technical experts for response and preparedness, and more. Over the past 20 years, U.S. investment in Nepal includes more than \$603 million in health alone out of more than \$2 billion in total assistance.
- **Papua New Guinea:** \$1.2 million for Papua New Guinea to help the government prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. The United States has invested more than \$52 million in Papua New Guinea's health alone, and nearly \$90 million total, over the past 20 years.
- **Pacific Islands:** \$2.3 million to help governments prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. Over the last decade, the United States has invested more than \$620 million in health assistance for the Pacific Islands. Over the last 20 years, the United States has invested over \$5.21 billion in assistance to the Pacific Islands.
- **Pakistan:** \$1 million in health funding will help Pakistan strengthen monitoring and better prepare communities to identify potential outbreaks. To bolster its national COVID-19 action plan, the United States has also redirected more than \$1 million in existing funding for training of healthcare providers and other urgent needs. S. long-term investment in Pakistan includes more than \$1.1 billion in health alone and more than \$18.4 billion in total assistance over the past 20 years.
- **Philippines:** Nearly \$4 million in health assistance will help the government prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. The United States has invested more than \$582 million in the Philippines' health alone and nearly \$4.5 billion in total assistance over the past 20 years.
- **Sri Lanka:** \$1.3 million will help the government prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. Over the past 20 years, U.S. investment in Sri Lanka has included more than \$26 million in health alone out of more than \$1 billion in total assistance.
- **Tajikistan:** Approximately \$866,000 in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. This assistance builds on U.S. investments of nearly \$125 million in health and more than \$1 billion in total assistance over the past 20 years.
- **Thailand:** Approximately \$1.2 million in health assistance will help the government

prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. This new assistance builds upon long-term U.S. assistance in Thailand including more than \$213 million in health and more than \$1 billion in total assistance over the past 20 years.

- **Turkmenistan:** Approximately \$920,000 in health assistance has been made available to help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. The United States has invested more than \$21.5 million in health and more than \$207 million in total assistance over the past 20 years.
- **Timor Leste:** \$1.1 million will help the government prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. The United States has invested nearly \$70 million in health assistance and more than \$542 million in total assistance for Timor-Leste over the past 20 years.
- **Vietnam:** Nearly \$3 million in health assistance will help the government prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. Over the past 20 years, the United States has invested more than \$706 million in health assistance and more than \$1.8 billion in total assistance for Vietnam.
- **Regional Efforts in Asia:** \$1.6 million in health assistance will help governments across the region prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, risk communication, infection prevention and control, and more. The United States has provided more than \$226 million in health assistance regionally and in addition to health assistance to individual countries in the region, and in total more than \$3 billion in development and other assistance over the last 20 years.

Latin America and the Caribbean:

- **Jamaica:** \$700,000 in health funding will support risk communication efforts, water and sanitation, prevent and control infections, manage COVID-19 cases, strengthen laboratories, and surveil the spread of the virus. This assistance builds upon U.S. investments of nearly \$87 million in health and nearly \$619 million total over the past 20 years for Jamaica.
- **Paraguay:** \$1.3 million in health assistance will support risk communication efforts, prevent and control infections, manage COVID-19 cases, strengthen laboratories, and surveil the spread of the virus. U.S. investment in Paraguay is long-term and includes more than \$42 million in health and more than \$456 million total over the past 20 years.
- **Haiti:** \$2.2 million in health assistance will help the Haitian government scale up its risk communication efforts, water and sanitation, prevent and control infections, manage COVID-19 cases, strengthen laboratories, and more. The United States has invested \$1.8 billion in health in Haiti and nearly \$6.7 billion in total assistance over the past 20 years.
- **The Caribbean:** \$1.7 million will help governments in the Eastern Caribbean scale up their risk communication efforts, water and sanitation, prevent and control infections, manage COVID-19 cases, strengthen laboratories, and surveil the spread of the virus. This builds upon decades of strategic U.S. investment in the region, including more than

\$236 million in health and more than \$840 million total over the past 20 years.

- Additionally, humanitarian assistance is being provided to **Colombia** (\$8.5 million) and **Venezuela** (\$9 million) to surveil the spread of the virus, provide water and sanitation supplies, manage COVID-19 cases, and more. In Colombia, the United States has invested approximately \$32.5 million in health over the past 20 years, and nearly \$12 billion in total assistance in that same time frame. In Venezuela, the U.S. has invested more than \$1.3 million in direct health assistance and more than \$278 million in total long-term assistance over the past 20 years.

Middle East and North Africa:

- **Morocco:** \$670,000 in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. This assistance builds upon long-term U.S. investments in Morocco, including \$64.5 million in health and more than \$2.6 billion in total assistance over the last 20 years.
- **Tunisia:** \$700,000 in health assistance will help prepare laboratory systems, activate case-finding and event-based surveillance, support technical experts for response and preparedness, bolster risk communication, and more. The United States has invested more than \$7 million directly in health assistance and more than \$1.3 billion in total U.S. assistance for Tunisia over the past 20 years.
- **Iraq:** More than \$15.5 million in health and humanitarian assistance will help prepare laboratories, implement a public-health emergency plan for points of entry, activate case-finding and event-based surveillance for influenza-like illnesses, and more. This new assistance builds upon long-term investment in Iraq, including nearly \$4 billion in health alone, and more than \$70 billion in total U.S. assistance over the past 20 years.
- Humanitarian assistance is also being provided for **Libya** (\$6 million) and **Syria** (\$16.8 million). This assistance joins decades of U.S. investments in both countries' health and overall development. The U.S. has invested more than \$715 million in total assistance for Libya over the past 20 years, and more than \$6.1 billion in total assistance for Syria in the same time frame.

UN Organizations and Agencies:

- \$24.3 million in global and regional programming through international organizations like the WHO and UNICEF.
- \$64 million for UNHCR's portion of the UN's COVID-19 Global Humanitarian Response Plan to address the challenges posed by the COVID-19 pandemic in refugee, IDP, and hosting communities in countries already facing complex humanitarian crises across Africa, Asia, the Middle East, and South America.

U.S. investments under the Global Health Security Agenda, including those we have contributed to this global crisis response, are designed to protect the American public by helping to minimize the spread of disease in affected countries and improve local and global responses to outbreaks of infectious pathogens.

This new assistance builds on the United States' record of leadership in global health and humanitarian assistance. This assistance is part of a larger USG global response package

across multiple departments and agencies, including the Centers for Disease Control and Prevention (CDC). Since 2009, American taxpayers have generously funded more than \$100 billion in health assistance and nearly \$70 billion in humanitarian assistance globally. Our country continues to be the single largest health and humanitarian donor for both long-term development and capacity building efforts with partners, and emergency response efforts in the face of recurrent crises. This money has saved lives, protected people who are most vulnerable to disease, built health institutions, and promoted the stability of communities and nations.

For more information on the U.S. government's holistic funding in response to this crisis, please contact F-Press@state.gov.

For details on specific in-country response activities, please contact USAID at atpress@usaid.gov.

For details on the humanitarian assistance contribution to UNHCR, please contact the State Department's Bureau for Population, Refugees, and Migration at PRM-Press@state.gov.

wrote:

All,

As we understand from ground staff, key developments:

- There are 15 pax, 7 on flight 1 and 8 on flight 2, who were asymptomatic when they boarded the buses to the airport. They were deemed medically fit to fly.
- During boarding, the med staff received positive lab results of COVID-19 for these 15 pax. Per authority from Dr. Kadlac of HHS/APSER, patients were boarded on the planes and isolated from other passengers using the previously established biocontainment protocols.
- Upon arrival at Lackland and Travis, those passengers will remain on the aircraft for an onward flight to Omaha, NE, where they will be hospitalized at the University of Nebraska medical facilities.

Thanks,
Tim

All,

As we understand from ground staff, key developments:

- There are 15 pax, 7 on flight 1 and 8 on flight 2, who were asymptomatic when they boarded the buses to the airport. They were deemed medically fit to fly.
- During boarding, the med staff received positive lab results of COVID-19 for these 15 pax. Per authority from Dr. Kadlac of HHS/APSER, patients were boarded on the planes and isolated from other passengers using the previously established biocontainment protocols.
- Upon arrival at Lackland and Travis, those passengers will remain on the aircraft for an onward flight to Omaha, NE, where they will be hospitalized at the University of Nebraska medical facilities.

Thanks,
Tim

Hi John Mark,

Flagging from the State side that the letter to passengers from yesterday, which is also posted on the Emb. Tokyo website, stated (highlight mine):

Health authorities will screen all passengers prior to allowing them to board the chartered flights. No symptomatic or infected passengers will be allowed to board.

All,

As we understand from ground staff, key developments:

- There are 15 pax, 7 on flight 1 and 8 on flight 2, who were asymptomatic when they boarded the buses to the airport. They were deemed medically fit to fly.
- During boarding, the med staff received positive lab results of COVID-19 for these 15 pax. Per authority from Dr. Kadlac of HHS/APSER, patients were boarded on the planes and isolated from other passengers using the previously established biocontainment protocols.
- Upon arrival at Lackland and Travis, those passengers will remain on the aircraft for an onward flight to Omaha, NE, where they will be hospitalized at the University of Nebraska medical facilities.

Thanks,
Tim

Hi Kyle,

Please note the email below.

R3 must be tested by the White House Medical Unit at 1 p.m. tomorrow before the 2 p.m. POTUS Governor's Video Teleconference on COVID-19 Response & Economic Revival.

We move the CBP briefing to 12-1 p.m. so R3 could participate in-person.

I will ask CBP if 11 a.m.-12 pm is an option, if not, we will need to reschedule for another day.

Please advise.

Thanks,
Teresa

Hi everyone,

We have just received confirmation from the White House Medical Unit (WHMU) that each of the participants must be tested before the 2:00 call. Please have your principal report to WHMU in EEOB 97 no later than 1:00 PM, or earlier if their schedule allows. This will give all the tests time to be processed.

Please don't hesitate to reach out with any questions. Thanks!

Subject: RE: Governors Call with POTUS & VPOTUS

CBP is asking if R3 could attend in person anytime on tomorrow.

The Director's Leadership meeting is scheduled from 12-1 p.m.

Could we reschedule DL meeting to 9-10 a.m. or another day to accommodate the CBP briefing?

Thanks,
Teresa

Hi Kyle,

There is a call-in number provided for the CBP meeting.

I've informed CBP R3 will need to participate by phone and may only be available for 45 minutes instead of 1 hour.

Thanks,
Teresa

Subject: FW: Governors Call with POTUS & VPOTUS

Hi Kyle,

I just received the email below with the request for R3 to join the Governors Call w/POTUS and VPOTUS tomorrow at 2pm in the WHSR. He has the CBP/CDC Executive Briefing from 1-2 in the Ronald Reagan Building so there is no time in between to get him to the WHSR in time for the start if he stays for the entire CBP meeting. Please advise.

Kindest Regards,

Lynn

Subject: RE: Testing Guidance -- follow up

Tim has not been working on any guidance on testing. This is something different from what he was working on. Can you reach out to Stacy to try to get a little more information about what they need? This is the first we are hearing on this.

Hi Kyle,

Please advise. If they can SVTC, should I see if Marty can cover?

Kindest Regards,

Lynn

Subject: FW: Mailer to all US Households and Businesses

Kyle and Sherri,

I wanted to loop you into this issue. USPS reached out (b)(5) to propose sending out a postcard mailer to all U.S. residences and businesses (b)(5) about COVID-19 and using CDC content. (b)(5) connected them to Steve Redd, he connected them to the policy and comms units, and we've been talking with USPS today to sort it out.

(b)(5)

Given the cost and visibility of this, we wanted to reach out about how to proceed.

Thanks,

Noah Aleshire

Noah and Namita,

We are looking forward to assisting you in getting the message out, particularly to those parts of the population that are higher risk and less likely to be reached through on-line media.

I have attached postcard mock-ups that we prepared last week. Obviously, we want CDC approved messaging on the postcard, so we will put whatever you want on there – we just wanted you to have an idea from which to start.

Bob and Anne,
This is from a gentleman who is on the HHS/ Presidential task force on sports fitness and nutrition. (b)(6)

I'm assuming CDC is the right agency to route this to for review, but I don't know the right person/ group. Can one of you help?
Jerome

□

Dear Jerome:

Thank you so much for your generous offer to help

review our industry document on guidance for the health club industry on cleaning protocols as we look forward to reopening. This document (attached) has been reviewed by IHRSA (International Health Racquet and Sportsclub Association) public health consultants as well as incorporating input from other industry leaders.

I look forward to your response and again, am very grateful.

All the best,
Jim

Origination: 04/2020

Effective: 05/2020

Cleaning and Disinfecting of Health Club Facilities

SCOPE:

All health club and gym operators.

PURPOSE:

The purpose of this policy is to define and establish standards for cleaning, sanitation and disinfection, and re-opening best practices based on the information we know from the CDC, WHO and state health departments.

POLICY:

The health club industry is dedicated to minimizing the risk of health club associated infections related to improperly cleaned and disinfected equipment, spaces, and surfaces. Soiled equipment, spaces and environmental surfaces can be a source of contamination to hand or other objects which may be transmitted to members and associates of the club. Additionally, we are committed to reducing the risk of human to human infection. Therefore, we must follow the following procedures to prevent contamination.

PROCEDURE:

I. Access Control

- A. Employees and members will be screened and evaluated before entering the facility.
 - 1. Individuals who exhibit signs of illness, such as a fever over 100.4 degrees Fahrenheit, cough, or shortness of breath will be asked not to enter the facility and to seek medical attention.
 - a) *Touchless thermometers will be available to screen individuals. Individuals who have a temperature of 100.4 degrees Fahrenheit will be asked to sit for five minutes before being re-evaluated. If the temperature remains, the individual will be not be permitted in the facility and given a recommendation to seek medical attention.*
 - 2. All members and employees will follow local, state, and federal regulations pertaining to personal protective equipment (PPE) requirements to access the facility.
 - 3. Touchless access available via personal scan card or cell phone/app check-in process.

II. Employee Protective Measures

- A. Reusable or one time use masks, disposable gloves and hand sanitizer will be provided to all employees, to be worn if desired or required.
 - 1. Employees may have to provide their own personal protective equipment if there is a shortage in bulk ordering.

- B. Add plexiglass protective shields to service desks as needed
- C. Stagger shifts to eliminate employees congregating.
 - 1. Implement multiple time clock stations throughout the facility.
- D. Require hand washing before start of shift and as needed throughout shift.
- E. Permit and encourage employees to take breaks outside, in an office/personal workspace, or in such an area where proper social distancing is attainable.
- F. Employees will be prohibited from gathering during working hours.
- G. Teleworking and virtual meetings whenever possible.
- H. Prohibiting handshaking and other person-to-person contact.
- I. Signage reminding all to wash hands and practice proper hand hygiene throughout the workplace.
- J. Provide disinfectant and sanitation products for employees to clean their workspace, equipment, and tools.

III. Facility Capacity

- A. Capacity shall follow the limitations provided by the state and local government
- B. Spatial distancing a minimum of 6 ft apart throughout the facility, if required:
 - 1. A minimum of six feet of separation in between each piece of cardio equipment.
 - 2. Group Fitness studios will have limited attendance based on studio size; minimum of 9 ft allocated per person
 - a) Each group activity will utilize a reservation system for the max capacity.*
 - b) Social distancing may be guided using decals on the floor to denote where members should stand to ensure appropriate distancing.*
- C. Employees will be staffed all hours of operation to enforce guidelines in each space.
 - 1. Members who do not comply after one warning will be asked to leave the facility. Members who have repeat offenses will be told they will not be able to access the club until all operations have reverted to previous guidance.

IV. Storage of Equipment and Self Care Items

- A. Only clean equipment should be placed back in a storage rack or container to be ready for next use.
- B. Mats will be provided by member. Club owned mats will be cleaned after each use and available for limited use, as needed.
- C. Only soiled towels will be stored in the laundry room.
- D. All clean towels will be stored in clean storage locations.
- E. All hairdryers and locker room toiletries besides, shampoo, conditioner and body wash will be eliminated.

V. Cleaning and Disinfecting of Equipment, Member Use Items, and Surfaces

- A. Equipment will be required to be cleaned and sanitized with anti-bacterial cleaner after each use by each member.
 - 1. Employees will be staffed all hours of operation to enforce guidelines in each space.
 - a) Members who do not comply after one warning will be asked to leave the facility. Members who have repeat offenses will be told they will not be able to access the club until all operations have reverted to previous guidance.*
- B. Equipment, surfaces, locker rooms and other member accessed space are cleaned and disinfected at regular intervals, based upon club usage with hospital-approved disinfectant by club staff, at minimum of every 4 hours during open hours.
- C. All agents used for cleaning and/or disinfection should be approved by management and recommended by the CDC, WHO, or state health department and registered with the EPA.

- D. Disposable, pre-moistened disinfectant wipes can be used. Lids should be kept closed to prevent drying. Follow the individual disinfectant's instructions for use for appropriate wet time to ensure proper disinfection. Check that the product is not expired.
- E. Follow manufacturer's instructions for proper dilution and wet times for cleaning or disinfectant solutions. Only clean cloths and mops should be used with cleaning solutions. Do not access cleaning solution after contact with soiled equipment or surfaces.
- F. If it is unclear whether equipment has been disinfected, it should be re-cleaned and disinfected before member use.
- G. Cleaning Procedure:
 - 1. Remove and discard all disposable material.
 - 2. Manually remove visible foreign material or bio-burden (e.g., body fluids, gels) with a damp cloth or disinfecting wipe.
 - 3. Discard the cleaning cloth into the laundry or disinfecting wipe into the garbage after use.
- H. Disinfecting Procedure:
 - 1. Wipe down all exterior surfaces with a hospital-approved disinfectant.
 - 2. Ensure surfaces stay wet for the appropriate time, according to the disinfectant's instructions, to ensure proper disinfection.
 - 3. Allow surfaces to air dry or wipe with a clean cloth once wet time has been met.
- I. In the absence of a manufacturer's cleaning instructions:
 - 1. Clean equipment surfaces with a hospital-approved disinfectant
 - 2. If there is a concern for surface incompatibility, the surface can be wiped with a clean, moist cloth after disinfectant contact time has been achieved.

VI. Specialized Equipment and Space Cleaning Requirements

A. Group Fitness Studios and Equipment

- 1. Floors will be cleaned with hospital-grade disinfectant, door handles and music displays will be cleaned and sanitized by sanitation wipes by the instructor at the end of each class.
- 2. Microphones will not be provided by the club. Instructors will need to use their own microphone or not use a microphone in class.
- 3. Doors will remain open to increase air flow until class begins. Instructor will close doors and open doors at the end of class.
- 4. Class schedules will be created with a recommended 30-minute break in between each class to allow for exit, cleaning protocols and a safe entry for the next class to eliminate congregation before and after classes.
- 5. Members are required to clean all equipment and weights used in class with sanitation wipes provided. Members should bring their own mat for each visit.
 - a. Instructors will direct members to gather equipment and return equipment one by one to avoid grouping near the equipment storage space.
 - b. Instructors will enforce guidelines in each space to ensure proper cleaning.
 - i. Members who do not comply after one warning will be asked to leave the facility.*
 - Members who have repeat offenses will be told they will not be able to access the club until all operations have reverted to previous guidance.*
- 6. The housekeeping team will disinfect equipment twice per day with an electrostatic sprayer or comparable cleaning system.
- 7. Hand sanitizer will be available outside of studio.

B. Café/Eatery

- 1. Seating arrangements will be reconfigured to allow families to sit together, but six feet apart from other tables.
- 2. Individual packaged condiments will be available.

3. On account charging or credit cards are the preferred method of payment, to minimize cash collection.
4. Employees will be required to wear masks and gloves.
5. Members will be required to wipe down tables after use with sanitation wipes provided. Employees will monitor and clean any tables that were missed and discuss the responsibility with the member.
6. Café employees will disinfect tables and chairs on a planned interval, not below every two hours during café operating hours, using hospital-approved disinfectant.

C. Personal Training Appointments

1. Personal Trainers and members will be required to wash their hands before and after each session.
2. Gloves and masks will be available to use if desired or required.
3. Sessions will be scheduled in one location in the club to lessen the amount of equipment and reduce contact with other members.
4. Clean and disinfect space after each client session, including floor and equipment used, with hospital-approved disinfectant.
5. Group sessions will be held with a minimum of six feet of space in between each participant and instructor.

D. Locker Rooms

1. Locker room attendant will be staffed full time to monitor and clean all hours of club operations.
2. Members will be encouraged to bring their own bath towel.
 - a. Bath towels will be handed to members who need a towel.
3. Gloves and masks will be available to use if desired or required.
4. Steam room and sauna will be available for two members at a time, unless otherwise noted by CDC.
5. Hand sanitizer stations will be available outside of entrances.
6. Sanitizing wipes will be available to clean lockers and keypads.

E. Communal Areas

1. Move furniture around to allow for six feet of space between tables and chairs.
2. Remove all fliers and tabletop décor.
3. Clean and sanitize communal areas every two hours with hospital-approved disinfectant.
4. Remove water fountain capability and offer water bottle refill stations.
5. Require members to sanitize the space after each use with sanitation wipes provided.
6. Supply hand sanitation at entrances and exits throughout the club and the main entrance of the facility.
7. Ensure proper air flow and exchange through HVAC system, with a minimum of 6 exchanges per hour.
8. Install Ultraviolet fans or air filtration systems to sanitize the air is recommended.
9. Implement or keep as many touchless actions as possible (touchless doors, water fountains, soap dispensers, etc.).

VII. Staff Training

- A. All employees will be re-trained on proper cleaning, sanitizing, and disinfecting procedures for each area of the facility.
- B. All employees will receive new training to address handling conflict, difficult conversations, and creating a “best work environment” to reinforce new employee and member expectations.
- C. All employees will receive training on proper hand hygiene as well as proper mask and glove application and removal.

VIII. Member Communication

- A. All membership accounts will receive email notification of new protocols and expectations for club use.
- B. All new capacity, cleaning, and PPE requirements will be updated on the club's website if applicable.

Subject: Strategy

Needing lots of specifics but overall concept paper

(b)(5)

We will be putting a specific plan together this week.
We know the constraints on testing as well as the possibilities.

Need full CDC engagement and single national effort

LIMITED DISTRIBUTION PLEASE at this point

Subject: RE: Strategy

Thanks. I realize I misunderstood your 'ask' and thought you were asking about surveillance inputs into the ability to open up parts of the community, not the return to work type strategy – but in any case Dan will be excellent and we will get some others to assist.

Subject: For FLASH Review NOW: Press Statement on WH Partnership with Apple

Hi Everyone –

Attached for your flash review is a draft press statement on the WH partnership with Apple during the coronavirus pandemic. **If you have any critical feedback, please send immediately.**

Apple plans to go live with its statement at NOON. Thank you.

Best,
Natalie

travel

Thanks Mel!

Dan- just chatted with Mel,
and I think it's a better use
of resources that we find
someone else (other than
OGC) to fill in the
template for this memo.
Can you send us a good
template to use, and I can
go from there. I'll then
have you review it before
we go for signatures.

Thanks all!

Dan,

Looks like we
will be traveling
on AF1 and/or
AF2 as follows:

FRIDAY, MARCH
6

Atlanta, GA for
a visit to CDC –
questionable
right now as to
which plane
we'd go down
to ATL on...AF1
or AF2, as both
POTUS and
VPOTUS are
going to ATL as
well. Most
likely, though,
we'd return on
AF2.

MONDAY,
MARCH 9

Orlando, FL for
POTUS speech
to HIMSS
conference –
POTUS coming
from Mar-a-
lago, but we
would most
likely return
aboard AF1

Have no
information
regarding
additional HHS
staff traveling.

That's what I
know for
now...more as it
develops.

Subject: RE: AF1 and 2 travel

Thanks Ashton,

It needs to be signed by the three authorizing individuals before the travel

begins. Ideally, the day before the trip I can circulate it to them.

Thanks Mel!

Dan- just chatted with Mel, and I think it's a better use of resources that we find someone else (other than OGC) to fill in the template for this memo. Can you send us a good template to use, and I can go from there. I'll then have you review it before we go for signatures.

Thanks all!

☐

Dan,

Looks like we will be traveling on AF1 and/or AF2 as follows:

FRIDAY, MARCH 6

Atlanta, GA for a visit to CDC
– questionable right now as
to which plane we'd go down
to ATL on...AF1 or AF2, as
both POTUS and VPOTUS are
going to ATL as well. Most
likely, though, we'd return
on AF2.

MONDAY, MARCH 9

Orlando, FL for POTUS
speech to HIMSS conference
– POTUS coming from Mar-a-
lago, but we would most
likely return aboard AF1

Have no information
regarding additional HHS
staff traveling.

That's what I know for
now....more as it develops.

Mel Lukens

Director of Advance

Office of the Secretary

U.S. Department of Health
and Human Services

Direct: [202.690.5412](tel:202.690.5412)

Mobile: (b)(6)

Gentlemen – attached is the latest version of the Placemat. The reason there are four slides is to give you the option of how the backside is laid out. Slide one and three are identical, the information on slides two and four are also identical just laid out differently. Standing by for corrections as necessary.

Sorry Folks a bit of an allnighter by my team please review. Dr Bob I expect that you will brief the slides covering shift from containment to mitigation. We are putting it on HHS format. In addition have put together a placemate that uses FEMA PANCAP Tsable with your triggers inserted. Would be prepared to present at 11 am PCC given our Hill commitments. Please direct any suggested edits to Shuy and McCreary copied here

Subject: Record of Outreach to HA

Folks - This is what “no communication” with HA looks like.
(And this does not include any calls that CDC has made – and they have daily calls with state and local health leaders.)

Communication with the state of Hawaii, from most recent to last week
Wednesday 2/5

- Darcie
 - Last night: One-on-One - Darcie talked with the LT Governor Josh Green with updates on testing kit arrival and housing.
 - Afternoon – One-on-One - Darcie talked with the governors COS, Linda, about whether the governor would like a call with the Dep Sec.
 - They declined because “he feels very well briefed”. She had 1 question: When will the testing kits arrive? Darcie said Friday, based on info received from CDC.
- Ed Heidig
 - Called the Honolulu Mayor to ask about any unmet needs. Was connected to Georgette Deemer, Deputy Managing Director. She stated they were “in the loop thru their State health officer and the State OES team” and everything is fine.
- Tuesday 2/4 – One-on-one call – Darcie with HA State AG
- Monday 2/3 – HA was on call with state and local health leaders
- Monday 2/3– HA was invited to a call with Mayors – no record of their joining the call.
- Sunday 2/2
 - 5:30 pm – HA was on the 11 communities/airports call
 3 from HA on call:
 - Gov office Dir of Comm
 - Lt Gov
 - Dir of state Dept of Transportation
 - State Dept of Defense Homeland Security Advisor
- One-on-One call - Darcie, Nic and Doug from WH talked with the Lt Gov regarding housing – we assured him that we were working to help find housing so they could avoid using hotel with tourism concerns.
- Saturday 2/1
 - One-on-One Call - Darcie talked to Lt Governor. She asked if CDC had been in touch with their state health office. He said yes.
- Friday 1/31
 - One-on-one call - Notified Gov’s office and LT governor of the Task Force press conference so they could watch.
 - 6pm All State & Locals Call – 9 from HA on a national call we had with state and locals with CDC and DHS.
 - Lt Gov
 - HA Dept of Health
 - State Dept of Defense Homeland Security
 - State of HA – Homeland Security Advisor
 - Office of Governor
 - Healthcare Association of HA
 - City and County of Honolulu
 - Honolulu Emergency Services
 - 10:15pm – One-on-One - Darcie called the Lt Gov again to make sure that there was no questions or needs. Darcie tried multiple channels to connect with the Governor’s office but ended up with the LT Governor.

White House IGA has also placed calls to:

- HA Gov – Spoke with COS
- Honolulu Mayor Caldwell – Left VM and sent email
- Honolulu County Clerk Office – left VM

Subject: RE: No SVTC in SCIF this afternoon for WH Task Force Meeting

For ASL - Senators Schatz and Hirono sent the Secretary a letter demanding better state-local coordination in Hawaii. We expect the letter to be publicly released.

Subject: No SVTC in SCIF this afternoon for WH Task Force Meeting

Importance: High

Good afternoon,

Brian Harrison, Dr. Redfield, Dr. Kadlec, Dr. Fauci, and Garrett are all heading over the WH to staff in-person the Secretary for this meeting. Contrary to what I said during the briefing at 1130 AM, we've received definitive word that there will be no SVTC in the SCIF for the Task Force meeting this afternoon. Only CDC Atlanta will be able to SVTC in.

The following StaffDivs should send Zack the latest updates you feel are relevant for the Secretary's 4 PM Task Force meeting. **Get this to Zack by 230 PM this afternoon.**

- ASFR
- ASPA
- ASL
- IEA

ASPR/CDC, please work together to give Zack the latest on the housing at the airports situation. **Also, please do so by 230 PM.**

Let me or Zack know if you have any questions.

Kyle Zebley
Chief of Staff
Office of Global Affairs (OGA)
Office of the Secretary
U.S. Department of Health and Human Services
Direct: 202-260-6494/Mobile (b)(6)

Confidential and pre-decisional communication
