Re: **20-cv-01367-RCL**
American Oversight v. Department of Homeland Security et al.
12th Interim Release for DHS FOIA Litigation No. 2020-HQLI-00030

Dear Ms. Lewis:

This is our 12th interim release of records related to your Freedom of Information Act (FOIA) request to the Department of Homeland Security (DHS), received on March 19, 2020.

For this production the DHS reviewed 502 pages of potentially responsive records. Of those 502 pages the DHS has determined that 499 pages are responsive to your request. The DHS has determined to withhold in part 308 pages, pursuant to FOIA Exemptions (b)(4), (b)(5), (b)(6) and (b)(7)(c). 28 pages are being sent to other Federal agencies for consultation. 81 pages were found to be duplicates. Further, 38 pages will be released to you in full. **Bates Numbers begins with DHS-PRIV – 3657 through DHS- PRIV – 4158.**

If you have any questions regarding this release, please contact Andrew Freidah, United States Department of Justice's Civil Division, Federal Programs Branch, at Andrew.f.freidah@usdoj.gov.

Sincerely,

A handwritten signature in blue ink that reads "Eric A. Neuschaefter".

Eric A. Neuschaefter
Senior Director, FOIA Litigation, Appeals, Policy,
and Training (Acting)

You ok with us pulling the trigger on releasing this broadcast, and sharing with OHC to give courtesy notice to (b)(6); Staci had some suggested edits which are incorporated in this draft. The most significant edit is here:

(b)(5)

We also added clarifying language on the need for a signed telework agreement and safety checklist on file. That addition language is here.

(b)(6); (b)(7)(C) [REDACTED] I started drafting this before we spoke a few seconds ago, but I wanted to make sure Henry was looped into what I had discovered so far.

From the reports I've gotten thus far, very few folks have started to operationalize the guidance from the ODs office. OPR will take a closer look next week but is inclined to allow 3 days a week of TW; HSI has not considered issuing anything further but will take a closer look on Monday. M&A also has not issued anything, but Staci was out on Friday and may not have been tracking all that closely. OHC will get back to me soon, but thought at first glance, what I was suggesting was consistent with their plan forward was.

That being said, what Mike Davis sent out to OPLA staff in my view speaks volumes for a component that historically is not supportive of TW under any circumstances. I think we (b)(5)

[With apologies for the duplicate message, here is a reformatted version of the message I sent at 5:40 P.M. EDT. The substance is identical, but this may be easier for some viewers to read on iPhone.]

OPLA Team—

Following up on my message from earlier today and subsequent ICE leadership guidance and direction, and in light of further discussions with the PLA, I am providing specific guidance and direction related to OPLA's COVID-19 response. Before I do so, however, I want to acknowledge the complexity of the issues presented by this pandemic. From legal authorities, to implementation policies and mission needs, to stakeholder and intergovernmental coordination, OPLA is one part of a much larger enterprise that is facing COVID-19 and trying to do the right thing. The PLA, his senior leadership team, and AFGE Local 511 leadership have all been extremely engaged in working through these complexities in a way that balances the very real needs and concerns of our workforce with the critical mission that we remain responsible for executing. Countless hours have been spent assessing options and gathering input and information.

Based on these extensive efforts and deliberations, and in consideration of ICE leadership's guidance issued today allowing waiver of general telework program policies and requirements, we are temporarily authorizing telework for OPLA divisions and field locations from Monday, March 16 through Friday, March 20, 2020, as follows:

- **OPLA Field Locations:** Chief Counsel should permit attorneys in their offices to telework on days on which they are not scheduled to appear in immigration court (including when they appear via VTC or telephonically from their offices), provided adequate portable work is available. Otherwise, employees who need to be out of the office (e.g., to care for children whose schools are temporarily closed) may request leave. Guidance on appropriate use of leave during a pandemic is available [here](#). We are working to identify a number of OPLA-wide document review projects in which our field attorneys can participate to help ICE meet its production obligations in ongoing civil litigation, and Field Legal Operations will be working with the Chief Counsel to arrange for the assignment of that portable work. Each Chief Counsel should ensure that at least one member of his or her management team is present in the office every day that the

office is open. While support staff members and contractors in the field will generally be needed in the office to perform their key administrative functions and do not generally have a large amount of portable work available, Chief Counsel may permit situational telework for mission support employees if portable work assignments are or become available and any ongoing critical administrative support needs in their office are met. Otherwise, support staff members who need to be out of the office may request leave.

- OPLA Headquarters: Subject to the caveats below, Division Chiefs should permit the attorneys on their teams to telework, provided adequate portable work is available and there is not a business need to have them report to the office for duty (e.g., to attend a hearing or mission-critical meeting). Each division should have at least one manager present in the office every day that the office is open. In addition to on-site management presence, the National Security Law Division should also have at least one non-supervisory attorney present in the office every day that the office is open, so that we are prepared to address national security threats that may emerge and promptly review any classified information. The OPLA Executive Team, including the PLA and DPLAs, will be present in the office, but their direct legal advisors (Senior Advisor, Special Counsels) may be permitted to telework, provided adequate portable work is available and there is not a business need to have them report to the office. OPLA headquarters support staff professionals may be permitted by their Division Chiefs to telework if adequate portable work is available and there is not a business need to have them present in the office but, as in the case of our field locations, much of the critical support staff upon which OPLA relies requires a presence in the office.

In order to be prepared to telework, employees need to do a few things. First, they should ensure that their government-furnished computer equipment (GFE) has up-to-date software, which can be verified using the “Software Center” app in Windows. Second, they need to provide a completed telework agreement to their supervisor, if they haven’t already done so. The agreement template for AFGE Local 511 bargaining unit employee team members is available [here](#), and the agreement template for other OPLA team members is available [here](#). Third, employees who are permitted to telework during this temporary period due to COVID-19 need to be particularly diligent in communicating with their supervisors about the work they are performing and their duty time. Fourth, employees should consider activating Workplace as a Service (WPAAS) on their home computers, as an alternative means of accessing the ICE network remotely in the event that their GFE has difficulty connect via the Virtual Private Network (VPN). WPAAS can function effectively even when the VPN is sluggish and, depending on the computer model being used, can offer a better user experience. A PIV card reader is necessary to allow WPAAS to be used on a home computer, and further information is available [here](#) for Windows devices, and [here](#) for Mac OS devices.

While the PLA and I are committed to being as flexible as we can during this challenging time, we fully expect considerable “after-the-fact” oversight of how OPLA fulfilled its mission commitments during this temporary period of increased reliance on telework. PLANet entries, including time spent performing specific tasks, cases, and projects, must be timely and accurately tracked as provided in relevant SOPs. WebTA entries need to be carefully reviewed. Employees should ensure that they notify their supervisors when they need to step away from their

computers to address dependent care responsibilities. If such responsibilities prevent an employee who has been authorized to telework from completing his or her duty day, he or she should request leave for the balance of the time. The PLA himself will be auditing how teleworking impacted our productivity during this period (including how our clients viewed our responsiveness and quality of service), and we will all be held accountable for ensuring that we lived up to our professional obligations, so it is incumbent upon managers to ensure strong accountability protections are in place. In addition to close and frequent contact with teleworkers, this may include active use and monitoring of virtual presence using Skype or other instant messaging software.

Relatedly, I am directing that all OPLA employees who have been issued portable GFE to take their devices home each night, even if they are not presently teleworking. The information and guidance surrounding COVID-19 is rapidly evolving, and the PLA and I wish to ensure that OPLA maximizes its flexibility to respond to future developments, including building closures and changes to the federal government's operating status. As a reminder for employees based at ICE headquarters, you may use your PIV card to enter and park in level P1 of the garage on weekends (entry on the right of the D Street guardhouse), should you wish to pick up your GFE in order to be able to telework starting Monday, as appropriate.

I recognize that this message does not answer every question that our team members have. The PLA is committed to making decisions promptly as COVID-19-related issues arise, but we must do so in concert with our chain-of-command and the rest of the DHS and ICE family. This current threat is going to tax all of us in the days to come, but our agency was created to confront existential threats to our homeland and OPLA has matured in the intervening years into a team of the most dedicated, resilient, and talented professionals I could ever imagine working with. Please know that the OPLA family will get through this together and take care of yourselves and your own families so that we can all look back at this time as a challenge we overcame together.

All the best,

Subject: COVID-19 and OPLA

OPLA Team—

After robust discussion with the PLA, I wanted to send out a brief message to let you know that we are closely monitoring developments associated with the novel coronavirus 2019 (COVID-

19) and actively planning for a variety of contingencies. OPLA has an extremely critical mission to perform, and we are working with DHS and ICE leadership, as well as interagency partners, to ensure that our response to COVID-19 balances those mission needs with the safety and welfare of our workforce. Moreover, the OPLA coronavirus leadership group that the PLA recently established has been actively identifying the emerging COVID-19-related issues in need of resolution, exploring possible approaches to address them, and ensuring that the most up-to-date information about COVID-19 is made widely available to our team. I expect to have further guidance shortly from our chain-of-command, but in the meantime would ask that we support one another and remain resilient and focused on our important mission.

Thank you for all that you do! Please stay tuned.

(b)(6); [REDACTED]

Chicago is reporting that they have three detainees who tested positive for COVID-19 at the Pulaski County Detention Center. All precautions are being made to assess any further contamination or exposure. The three detainees are being cohorted.

Also, DO in the St. Louis office tested positive for COVID-19. They initiated quarantine procedures when the officer exhibited flu like symptoms and will now prolong their quarantine until April 20, 2020. They checked in with the Officer and he is reported to experiencing mild flu-like symptoms, and is beginning to feel better since his test on Tuesday.

Subject: 3 detainees tested positive for COVID-19 and 1 DO at STL.

Good afternoon,

Sorry, I left a voicemail for (b)(6); (b)(7)(C) regarding this report, but remember you were back. My apologies. We learned earlier today that 3 detainees tested positive for COVID-19 at the Pulaski County Detention Center. We are preparing the SEN and it will be forthcoming.

Additionally, we received confirmation that an ERO Deportation Officer tested positive at the St. Louis Sub-Office. They had initiated quarantine procedures when the officer exhibited flu like symptoms and will now prolong their quarantine until April 20, 2020. In checking in with the Officer, he is reported to experiencing mild flu-like symptoms, and it beginning to feel better since his test on Tuesday.

Henry/Tae (b)(6); (b)(7)(C)

OGC just looped us in on the possibility of a CDC order suspending entry of persons into the US to avoid introduction of a communicable disease under 42 USC 265. I don't think this is an issue we've confronted before but it looks like they'd like an ERO POC to engage in the planning. Is there someone in particular you'd like us to loop in from your shop?

Subject: RE: (b)(6); (b)(7)(C) Reports of BP case arriving twitch fever

And whether there was a 14 day physical exam done or just an intake screening given his short stay, and when the "all clear" for travel is typically done for these flights. Is it the day of, day before, 48 hours in advance of the removal? This would all be helpful information to have.

Subject: (b)(6); (b)(7)(C) Reports of BP case arriving twitch fever

(b)(6); (b)(7)(C)

A CBP case we removed this morning is being reported to have arrived in Guatemala with a fever and has been taken to the hospital. In addition the local media is now reporting it as possible corona case.

Attached is the manifest #33 and below is the link for the media report.

I recommend that you begin to track down any information you can as it's a matter of time before we asked.

(b)(6); (b)(7)(C)

Putting this preliminary information on your radar in case you have advise for our staff and/or incase questions start coming in. We are in contact with Guatemala and will provide real information (not media). As we receive it.

Good Evening Mr. (b)(6); (b)(7)(C)

Thank you for your quick reply and for sending the training material. Thank you also for offering the services of Ms. (b)(6); (b)(7)(C). We will most definitely reach out to her for assistance with training. We are excited about the opportunity to begin point-of-care testing for COVID-19 and appreciate ICE Health Services Corps providing the machines and testing kits. If we gain any meaningful insights during the testing, we'll be sure to share them.

Best regards,

Good Afternoon,

Thank you for your e-mail. Attached is the information we used. We did not have an Abbott Representative. We were lucky to have two Medical Technologists in our agency and they went to three of our sites to train staff on how to conduct the tests without error and did a competency check off. They tested 200 detainees the first two days. One of

our Medical Technologists is based out of our Eloy location, which is next door to La Palma, and I'm quite sure she wouldn't mind going over and training your staff. I've cc'd her in this e-mail and you can reach out to her if needed, or you are welcome to contact me.

Respectfully,

Good afternoon Mr. (b)(6); (b)(7)(C)

CoreCivic is working to get our La Palma, Stewart and Torrance medical department staffs trained on the Abbott point-of-care COVID-19 test. We would like to reach out to your contact at Abbott to request training material. We will also request a webinar so that our staff can interact with an Abbott technician to ensure the training material was interpreted correctly and so that our nurses can ask questions live.

We have also extended an invitation to the IHSC medical staff at Otay to participate in any training we put in place.

Could you connect us with an Abbott representative that can help us?

Thank you,

Matt, we will work the CLIA authorization tomorrow with HHS and as you say is by facility and not individual. Will also verify what type of personnel need to administer test but believe it is as

you stated. We'll see if we have other contracts that can provide the "testing techs." We have a reasonable amount of EMT's in DHS which could be another possibility.

Page 3 of the attachment lists what is in the Abbott ID NOW COVID-19 kit. Looks complete to me. Yes 2,000 kits and yes it is ID NOW testing device as kit is made for that device only.

(b)(6);
 (b)(7)(C)

(b)(5); (b)(4)

If ICE has the ability to source both, we can easily administer the test in our facilities using our existing staff. It's much like a Strep test or Urine Analysis that we currently do in all medical departments.

Dr. (b)(6); (b)(7)(C) who was a lab director in a prior life have been vetting the product. I will reach out to them to confirm that with the instrument/machine and the testing supplies, we could begin testing immediately.

Good evening,

ICE is requesting that GEO begin testing aliens identified by ICE that will be scheduled for repatriation utilizing new Abbott ID COVID-19 testing machines. I appreciate your willingness to utilize these new machines as we plan to ship at least one to Karnes and Joe Corley as early as tomorrow. ERO is reaching out to other partners to request the same testing begin with machines ICE has been able to acquire. I truly appreciate your partnership and quick response to this pandemic. Acting AD (b)(6); will be the ICE POC for coordination and is copied on this email.

Regards,

Good Day

We are deploying two MTs today to complete the training and begin testing at our sites tomorrow. The third MT has travel card issues and may travel on Monday.

I've been in close contact with the FMC and Regional FMC who oversee Karnes. They relayed that Karnes leadership feels they will not need the training from IHSC and they are capable of doing it. I confirmed with them twice.

Respectfully,

Subject: RE: Abbott Machines

Good Morning All,

This training began yesterday to get ahead of our plan to do the COVID testing and for members to feel comfortable in doing it. We are also working behind the scene to get the Medical Technologists (MT) to the sites to assist with the hands-on training and check people off as competent. RNs usually do not do these procedures, but with the emergency order in place, they can if properly trained. When this order expires, only MTs can do this testing. The MTs we have in the agency have this certification, but their primary role is COR, AHSA and Facility Healthcare Manager.

The training going on right now is Webex based with Abbott and they've had some problems with the videos. IHSC is working for a plan that makes the results we receive from testing to be as accurate as possible. In the news, it has shown that the Abbott

(b)(5)

(b)(5)

Most of the sites received their machines, Karnes is the only one I'm trying to confirm.

Our plan right now is to:

(b)(5)

Our goal is to meet the Tuesday flight, but if we run in to any problems we will keep you all informed.

This is certainly different then what you described earlier in that training would be done via Webex or any other video service for that matter. My issue is that it appears IHSC is

(b)(5)

Please make this your highest priority.

Links and information below and attached.

Benefits

The intuitively designed ID NOW™ instrument can have a positive impact in any healthcare setting.

- Easy to use with only minimal training requirements
- Large visual touchscreen displays results, eliminating transcription errors and the need for printing
- Small footprint saves you bench space and can be used in any healthcare setting
- QC lock-out
- Bi-directional connectivity
- Offers exceptional performance
- Eliminates interpretation and transcription errors
- Gives you the confidence to make clinical decisions sooner
- Facilitates effective patient management
- Enables prompt initiation of infection control measures
- Aids targeted antiviral therapy and Antimicrobial Stewardship
- Reliable near-patient testing reduces overall healthcare costs¹

ID NOW Rebrand and Labeling Update

Henry/Tae –

I just spoke with CDR Smith and relayed the issues discussed on this morning's call. Here are the salient points so far:

(b)(6); (b)(7)(C); (b)(5)

(b)(5)

I'm happy to take the arrows, but many people and processes are involved to make this successful. IHSC is doing its level best to meet timelines, but we need to consider all of the facts.

We need to make sure we don't have a false start on this process. Be assured, we're doing everything we can to do this "correctly" from the start.

More to come...

Subject: AIIRs

Just saw the below in one of our congressional responses (as part of today's pre-brief). Which 4 locations do not have AIIRs?

Detainees who are being monitored, will be kept in a single cell room, if available, or as a cohort for 14 days after initial DHS apprehension. Of the 20 IHSC-staffed detention facilities, 16 are equipped with AIIRs. IHSC plans to house detainees with epidemiologic risk for COVID-19 and who present with fever and/or symptoms in AIIRs.

Subject: Aleph Institute/ICE call?

Good evening Deputy Director Johnson,

I trust that this email finds you well. I'm emailing you now, in the hours immediately prior the final days of Passover, to see if we could possibly fit a short call in your schedule this coming Friday.

As you may recall the Aleph Institute is a National Jewish NGO that works to support Jewish people who are isolated from their communities, whether in BOP or State custody or ICE detention.

We have worked with many ICE field offices in the past and ICE HQ in DC. A few months ago we met with (b)(6); (b)(7)(C) about a BOP/ICE matter and I believe you were at the meeting too. You met with a number of my colleagues then, though I couldn't make the meeting in person and joined by phone.

The issue that we'd like to raise is related to the Coronavirus. The DOJ has been implementing updated policies for BOP facilities and has allowed many inmates to complete their sentences on home confinement. I know that ICE has adjusted their priorities too in many regards.

However, there are a segment of inmates who have become stuck in a sort of catch-22; they are theoretically eligible to be released from BOP due to their age or health conditions but have an ICE detainer and are therefore ineligible. This is concerning because continued confinement could be a death sentence for them.

Many of these individuals are looking to be returned to their home countries, some are looking to remain and plan to fight their deportation. I'm hoping to discuss some possible solutions that could help inmates currently in BOP custody who have an ICE detainer. We have been in contact with various field offices and all are reluctant to act without HQ guidance. While each case is different, perhaps there might be a way to provide local Field Offices with some guidance in these regards?

In observance of the final days of Passover (beginning on the West Coast, where I am located, in a few hours) I will be offline for the next two days. Please let me know what might fit in your schedule this Friday. I will make every effort to make it work but I will not be able to confirm until late Thursday night.

Looking forward to speaking soon!

(b)(6); (b)(7)(C)

[NY] ICE's "Mind-Blowing" Barriers To Posting Bond Keep Immigrants Locked Inside Coronavirus Hot Spots

Gothamist [4/24/2020 11:55 AM, Matt Katz, 171K] reports that coronavirus is tearing through local immigration detention centers, infecting dozens, but some detainees who are winning release on bond and hoping to isolate at home are having trouble getting out of jail. The reason: The only Immigration and Customs Enforcement office in New York City for their families to make bond payments is closed due to coronavirus. That means immigrants are stuck in ICE detention, often in county jails in New Jersey, while their families travel to Newark or Hartford, where ICE offices are only sporadically open, advocates say. Some relatives of detained immigrants had to make contact with advocates as far away as Minnesota and Texas to file bond payments on their behalf at open ICE offices. New York City Immigration Affairs Commissioner Bitta Mostofi wants ICE to allow families to post bond payments online or by phone. ICE already offers an online payment service, she said, but only for for-profit bail bondsmen. "Due to the virtually insurmountable challenges currently faced by those posting bond, I urge you to reconsider existing policies, grant broader access to the online eBonds portal, and institute alternate methods of payment that do not necessitate in-person transactions," Mostofi wrote in a letter to ICE officials on Wednesday. The fact that the pandemic is spreading through detention centers—more than 100 ICE detainees have been infected at the six New York and New Jersey facilities—makes her request urgent, Mostofi said in an interview. "It's really actually mind-blowing that this wouldn't be something that they would move swiftly to try and address," she said. Congresswoman Alexandria Ocasio-Cortez raised the issue in a letter to ICE earlier this

month, noting that bond payments are required to be made with a cashier's check issued by a bank, which is difficult to obtain given the lockdown. A spokesperson for ICE responded to questions with a link to contact information for a for-profit immigration bond services company.

Caleb,

I'll send this to LESA for an opinion, but to clarify, there's not really weekend staffing. There's just people who we pay overtime to when emergencies happen. If this can wait until Monday it would be better for them.

As far as it being easy, if the register number is in the system it would be easy, but trying to match by name will be difficult and require more manual review.

Removability in general is more of a question for Removals. They should be able to tell you how long on average it takes to remove someone to these countries post final order. That's assuming flights are available of course.

(b)(5)

(b)(5)

Those are just my off the cuff thoughts. If we have to do this, (b)(5)

(b)(5)

(b)(6);

Subject: FW: BOP Aliens

(b)(6);

The final order portion of this looks like a generally easy lift for LESA. I'm not sure what the weekend staffing looks like so defer to Tae if it can wait until Monday.

Ideally we'd need to know if they have a Final order, if it's executable, the nationality and the normal bio data.

The ease of removability is where it gets tricky. Fight availability, MTR eligibility, and a bunch of other factors will weigh into this however. Could DOJ provide them with a consent form of sorts. "Yes I agree to my immediate removal..."

We should (b)(5)

(b)(5)

Additional thoughts?

Thanks,

Caleb

Subject: RE: BOP COVID care at MCC San Diego

I had a great conversation with BOP Director (b)(6); (b)(7)(C) who will testify with me on June 2. I am plan to link up his Medical Director with ours (Dr. (b)(6); (b)(7)(C)). What I learned is that BOP initially received 20 Abbott machines and 250 test kits a week so 20 machines/1000 test kits a month. They complained that it was not enough and began receiving 1000 test kits a week so 20 machines/4000 test kits a month. They knew that still wasn't enough and after the AG called the HHS Secretary they were able to receive 70-80 total machines and 10,000 test kits a week. A total of 70/80 machines and 40,000 test kits a month.

They have also modified their labcorp and quests lab contracts so they can do more lab testing and we are working with OAQ to do the same.

It seems like HHS should be able to provide more to us given the large numbers that BOP is receiving, DHS notified us this morning that our 2000 monthly shipment was delayed and scheduled to arrive next Wednesday. We were expecting to receive it yesterday as we are down to about 500 test kits.

I have a call scheduled with the BOP Director tomorrow and will confirm that this information is accurate. Apparently, BOP received 40 Abbott ID machines and 10,000 test kits a week. If this information proves to be accurate, we should push even harder with HHS to provide more to ICE. I will advise when I know more...

 (b)(6); (b)(7)(C) @ice.dhs.gov>
Subject: BOP COVID care at MCC San Diego

All,

I spoke with Dr. (b)(6); at MCC San Diego to better understand their practices. Their practices are specific to their facility.

They are not screening all current inmates at MCC San Diego. Across the country, testing is being done at some of their hot spots. Dr. (b)(6); was involved in going to their Terminal Island facility to test everyone there.

All new arrivals at San Diego are screened with the Abbott ID NOW test. If positive, they are sent to Paradise Valley Hospital for isolation. PVH is doing a test-based strategy to clear the inmate for return to the facility (positive must convert to negative).

If the new arrival is ID NOW negative, the inmate is isolated for 14 days. After 14 days, the inmate is then swabbed for a send-out COVID test (they are using Quest). They are doing the repeat COVID testing with a lab-based test due to the false negatives seen with the ID NOW test. If the send out test is negative, the inmate is cleared for GP.

He said BOP got approximately 40 ID NOW machines from HHS. He said he has 220 test kits. HHS is providing BOP with approximately 10,000 ID NOW test kits per week. He said approximately 26 facilities received machines—hot spots, detention centers, and some other sites.

I will reach out to the BOP chief of health programs next to see what he can share with me. Dr. (b)(6); [REDACTED] did say that BOP opened a 20 bed alternate treatment facility at Lompoc to minimize hospital send-outs. No intubation care there—just oxygen support. He also mentioned BOP had some designated quarantine facilities. Will have to see if I can get more info.

Good morning,

There is a call tomorrow at 11am on the following. Please let me know who you prefer to join this call with the COS.

Thanks!

The National Security Council (NSC) Western Hemisphere Affairs and Border and Transportation Security Directorates will host a Policy Coordination Committee (PCC) meeting via conference call on **Thursday, April 9, 2020 from 11:00am to 12:00pm** to discuss Border Security and COVID-19. Specifically, we will discuss the policy questions and/or procedures outlined in the attached document. The classification of the PCC will be U//FOUO.

I'm inclined to have the contractor take a close look at these instructions and determine if any individuals fall into this category in terms of their contact with the subjects. Assuming no one was wearing PPE, it really boils down to whether the confirmed individuals were coughing and/or had other symptoms during their last contacts and if lots of folks came within 6 ft - as best as they can recall.

What say you? I plan to run by HL as well.

Subject: RE: CDC guidance

Good evening,

It depends on whether the other staff had prolonged close contact within 6 feet of the person with confirmed COVID-19 without using PPE. Factors to consider when defining close contact include proximity, the duration of exposure (e.g., longer exposure time likely increases exposure risk), whether the individual has symptoms (e.g., coughing likely increases exposure risk) and whether the individual was wearing a facemask (which can efficiently block respiratory secretions from contaminating others and the environment).

CDC's risk assessment criteria for non-health care workers are available here: <https://www.cdc.gov/coronavirus/2019-ncov/php/public-health-recommendations.html>.

There is a nice table to interpret the type and duration of exposure and recommended actions.

Hi Stew and (b)(6); - Just looking for your thoughts on whether the contractor's plan of action meets the minimum CDC requirements in your view. This is a situation where two flight crew members tested positive for CV19. Does self-observation of the other crew members who had contact with the confirmed case meet the minimum requirements of the CDC guidelines? I know this doesn't fall in your lane, but we could use the help interpreting this. Thanks

MP,

In response to your question on what the contractor is doing, COR (b)(6); provided the below. As he points out, the contractor is meeting the minimum CDC guidance. If you wish for IAO to impose more stringent requirements, we can get started on the contracting actions, as outlined below. We will just need to work through the potential reduction in available flight crews/guards/nurses, if that's the direction given.

Thank you,

Henry –

Do you want to hold on revision the existing memo or just have a short memo with the link that explains the link serves as guidance for IHSC-staffed and IGSA's?

Desk: 202-732-(b)(6) Cell: 202-893-(b)(6):
"IHSC: One Team, One Mission...Leading the Way in Immigration Health Care"

In light of the Deputy Director's broadcast message (attached) and in furtherance of the OPR broadcast below, I wanted to provide some additional guidance to help you and your subordinate managers balance the needs and concerns of our workforce with OPR's mission requirements.

As operationally feasible, I am temporarily authorizing the OPR Command Staff to allow telework at the Unit or field office level, from Monday, March 16 through Friday, March 27, 2020, with concurrence from the respective Special Agent in Charge, Division Chief, or the Deputy Associate Director for Mission Support and Chief of Staff units. Assistant Directors must approve for senior managers.

Consult with your subordinate managers to ensure that you are taking a fair and consistent approach to the implementation of the Deputy Director's broadcast, paying close attention to the sections regarding **Telework Policy Waivers, What You Need to Know, and Employees who are not telework eligible**. Telework policy waivers must be reviewed and granted by an OPR employee's supervisor (with the concurrence of the employee's second-line manager) on a case-by-case basis, predicated upon mission needs, and only for the shortest timeframe necessary. At present, such waivers are only authorized through April 30, 2020 or until this policy is withdrawn or extended.

To ensure this temporary transition is as seamless as possible, please ensure that OPR employees have completed Steps 1-4 in the OPR broadcast below as soon as possible (absent granting of a waiver).

While we are committed to being as flexible as possible during this challenging time, we should all expect oversight of how we fulfilled OPR's mission requirements during this temporary period of increased reliance on telework. Information system use and entries, including time spent performing specific tasks, cases, and projects, must be timely and accurately tracked as provided in relevant memoranda (handbooks, SOPs, applicable policies, etc.). WebTA entries need to be carefully reviewed. Employees should ensure that they notify their supervisors when they need to step away from their computers to address dependent care responsibilities. If such responsibilities prevent an employee who has been authorized to telework from completing his or her duty day, he or she should request leave for the balance of the time, absent special circumstances. We are all accountable for ensuring that we live up to our professional obligations, so it is incumbent upon managers to ensure strong accountability protections are in place. In addition to close and frequent contact with teleworkers, this may include active use and monitoring of virtual presence using Skype or other instant messaging software.

Relatedly, I am directing that all OPR employees who have been issued portable Government Furnished Equipment (GFE) to take their devices home each night, even if they are not presently teleworking. The information and guidance surrounding COVID-19 is rapidly evolving, and this will maximize our flexibility to respond to future developments, including building closures and changes to the federal government's operating status.

Employees based at ICE headquarters, may use their PIV card to enter and park in level P1 of the PCN garage on weekends (entry on the right of the D Street guardhouse), should they wish to pick up their GFE in order to be able to telework starting tomorrow, as appropriate.

I recognize that this message does not answer every question that our personnel may have and remain committed to making decisions promptly as COVID-19-related issues arise, but we must do so in concert with our chain-of-command and the rest of the DHS and ICE family. This current threat is going to tax all of us in the days to come, but I am confident that we have the talent and the capability to respond whenever and however we need to. I want to thank each of you for your patience and

perseverance as we continue to navigate these uncharted waters. Take care of yourselves and your families so that we can all look back at this time as a challenge we overcame together.

I intend to host a conference call tomorrow to hear your questions and concerns. In the meantime, I know you and your subordinate supervisors will continue to take care of the OPR workforce. As you take care of them, please remember to also take care of yourselves and your family by following all relevant official guidance.

Remember to reach out for help when needed. We're all part of a larger law enforcement family, and we're all here to support each other.

Thanks,

W

From: OPR-Broadcast (b)(6); (b)(7)(C) @ice.dhs.gov>

Date: Friday, Mar 13, 2020, 5:30 PM

Subject: Emergency Preparedness Requirements for Telework Operations

To All OPR Employees:

March 13, 2020

Emergency Preparedness Requirements for Telework Operations

All OPR employees are hereby instructed to perform the below listed requirements to prepare for circumstances where telework is approved:

1. Ensure information is current in the Global Address List (GAL) - *see below instructions*;
2. Ensure telework agreements are signed and on file with your office;
3. Verify remote function of ICE issued laptops and network access or ensure that Workplace as a Service (WPaaS) capabilities are available;
4. Verify that the appropriate virtual training courses are complete.

1. Self-verification of Information in the Global Address List and Mobile App

To ensure all OPR employees receive Emergency Notification System (ENS) alerts, all employees and contractors must update their information in the GAL. Updating user information ensures that contact data is current and accurate. The GAL can be accessed by clicking [here](#).

(b)(7)(E)

(b)(7)(E)

NOTE: OPR employees must ensure the following information is accurate:

- Program should be set to “Office of the Director”
- Division should be set to “OPR”
- And Branch and Section should be set to the appropriate values for your local office.

If you have any questions or are unable to update your information, please contact the ICE Service Desk at (888) 347-(b)(6);
(b)(7)(C)

2. Ensure Telework Agreements are Signed and Filed with your Office.

In order to be considered telework-ready, an employee must have taken the on-line telework training; must have a valid telework agreement on file with supervisory approval; must have completed the safety checklist; and, must have the requisite equipment available to them (i.e. laptop, phone, network access, etc.) to fully perform the duties of their job remotely. Telework Ready Employees include all employees within the Core, Situational or Episodic telework categories. Please contact your supervisor for additional information.

3. ICE Issued Laptops and Network Access

Ensure your ICE issued laptop is connected to the ICE network to ensure security updates and scanning activities are routinely performed. Ensure access to any web platforms and databases routinely used in the performance of your duties. This includes access to your personal storage drive and other shared drives you have been assigned. Please contact the ICE Service Desk at (888) 347-(b)(6);
(b)(7)(C) for additional assistance.

4. Work Place as a Service (WPaaS)

WPaaS is an alternative to using your government furnished laptop/tablet at home. You can use your personal computer (with Windows 7 or later) to access an ICE Desktop environment. You will need a PIV card reader and an internet connection. Check with your supervisor should you need an external PIV card reader. For instructions on how to setup WPaaS on your personal computer, click [here](#).

Judge rules ICE must allow detainees free, private calls with attorneys during pandemic

<https://www.latimes.com/california/story/2020-04-11/coronavirus-outbreak-judge-rules-ice-must-allow-private-attorney-calls>

The decision came after the ACLU and others argued that it was virtually impossible for detainees at ICE's Adelanto facility to confer in private with their attorneys amid the coronavirus outbreak.

This was issued yesterday, were you all aware? Some of the issues, free calls and the ability to leave a message...

Good afternoon Mike!

So (knock on wood) Mesa Verde currently has no cases and at intake has isolated anyone they are unsure of where they've been for last 14 days (in only 2 iso cells). Knowing that, we figured we'd have GEO test on intake, but we're told that this isn't that kind of test and they'd still have to be quarantined for up to 14 days. If we roll through dorms and get refusals (I'd expect many as few detainees even wear the provided masks) there is nowhere to cohort refusals for 14 days (even though they've already been here long enough to know they don't have it).

(b)(5)

We are happy to figure out ways to incorporate testing as scenarios evolve, just don't see the value at the moment in the scenario we are in.

(b)(6)

Good evening. For your consideration and discussion with senior leadership.

The plan we received for the voluntary testing of staff and detainees does not address all the potential issues that the testing may cause. The immediate implementation of a plan that was developed without input from Adelanto ICE Processing Center (AIPC) staff creates issues that the plan creators may have not been aware of.

Here is the response from SFR. Based on the layout of facility, with very limited space to separate the tested from non-tested and potential positives from negatives, it seems saturation testing would be virtually impossible.

Subject: RE: Adelanto Operations Plan for Saturation Testing

Mesa Verde Immigration Processing Center (MVIPC) is comprised of four 100 bed housing units, two medical isolation cells and three administrative segregation/suicide watch cells. All housing units are male, with three designated as High/Medium High and the remaining designated as Low/Medium Low.

As of today, all medical isolation and segregation cells are occupied. There is no space within the facility to cohort detainees that decline to be tested from any given housing unit.

Additionally, MVIPC's acting Health Services Administrator (b)(6); [REDACTED] providing the following information with respect to offering tests to detainees upon intake:

- Testing street arrests and releasing them to general population after a negative test result will not ensure COVID-19 does not make it into the facility. This is due to the incubation period (generally 14 days) needed to trigger a positive COVID-19 test result.
 - Patient may be COVID positive and test negative up to day 7 after exposure.
- Testing asymptomatic arrivals is not recommended by IHSC
- At this time IHSC is not recommending the oral-pharyngeal swab - which is what was provided with the GEO mass testing supplies.

Subject: RE: Adelanto Operations Plan for Saturation Testing

After a quick review and discussion with AIPC staff, we need some clarification: do you want us to incorporate the OPLA recommendations? At this time we are still waiting for GEO management to address the operational issues that are not addressed in the initial saturation plan. If OPLAs recommendations are to be included, we need to go back to start and address their issues/concerns, put together a plan, and resubmit to GEO management for their approval on the operational issues. Also, we are exempt from disclosure of detainee medical information as needed in the course of our duties, and of course detainees may decline any type of medical care or testing. We would recommend (b)(5)

Now that we have green-lighted ADE to begin testing upon intake, we need to make sure they have the form/spreadsheet to report the results. Can IHSC get the most up to date form to Ops (if you all don't have it already) so we can get to Marin.

As I mentioned in a prior communique, it would require a contract mod...not a speedy proposition plus they are likely running full steam with other throughout the U.S.

This said (b)(6); (b)(7)(C) please have RMU reach out to Lab Corp to see if they would be amenable to sending lab/med tech to two of our locations to run the tests on the *Abbot ID NOW machines*. Maybe we wouldn't have to do a mod; (I know wishful thinking), but if a mod is required, would they be willing to do it? See the attached that describes the process.

Subject: FW: CDC will provide update on findings and results

I believe we have a contract with LabCorp. What are the chances, given their many locations throughout the US that they could send someone to one of our facilities to run the machines on test day? I assume they are all CLIA certified and have the requisite training to run the machines. Might something like this be possible. Just trying to come up with options.

For discussion as well, are contractors limited to perform tests in states they are licensed and or other states that honor their license via licensure compact. We are looking at options where the testers and test readers are mobile and can move to multiple sites/states.

Subject: COVID-19 Test Kits

This is being sent at the direction of AS2 Cuccinelli...

All...During the 8:00 Sync call today, I mentioned a COVID-19 test kit that would soon be available. S&T identified the company on Monday, entered a CRADA on Tuesday, validated the technology for accuracy on Wednesday and are now working with the company to get the test kit FDA certified (hopefully in the next few days).

Because of our investment and relationship with the E25Bio, we, DHS, have an opportunity to identify how many kits we would need prior to certification. Once they are FDA certified, I suspect DHS, as a whole, will be towards the bottom of the priority list.

The kits will cost approximately \$15. One kit equals one test. Results are rendered on site in approx 15 minutes and it is "very" accurate. This is moving very quickly and the company is still securing a robust supply chain for other kit items (swabs, gloves, tubes) but we can seek other procurement means to get those items once we have the testing device.

Please think of the various use-cases in your AOR (detainees coming and going, repatriation activities, etc) and identify the number of kits you plan to procure. WE NEED TO HAVE A DEPARTMENT TOTAL BY MONDAY (prior to FDA certification). If we have the number, the company will put those aside for DHS.

I will mention this at the SLG tomorrow but the AS2 felt it was important to tee this up with all of prior.

Best Regards,

This document is for INTERNAL GOVERNMENT USE ONLY and may be exempt from disclosure under the Freedom of Information Act, 5 U.S.C. §§ 552(b)(5), (b)(7).

The certified class is defined as all people who:

- (1) Are currently detained in civil immigration detention at the Adelanto Immigration and Customs Enforcement Processing Center;
- (2) Were detained in civil immigration detention at the Adelanto Immigration and Customs Enforcement Processing Center at any time between March 23, 2020, and the final disposition of this case but have been transferred by BICE to another immigration detention facility, regardless of whether the other detention facility is within the Central District of California; or
- (3) Were detained in civil immigration detention at the Adelanto Immigration and Customs Enforcement Processing Center at any time between March 23, 2020, and the final disposition of this case but have been released pursuant to a temporary restraining order, a preliminary injunction, or other temporary release order issued by this Court.

In relevant part, the PI requires:

- Adelanto shall not accept any new detainees;
- The respondents shall reduce the detainee population in order to maintain a social distance of 6-feet throughout by May 4, 2020;
- By April 27, 2020, the detainee population shall be reduced by 100;
- By April 30, 2020, the detainee population shall be reduced by another 150;
- By May 4, 2020, the respondents shall meet the targeted reduced population level;
- The population reduction shall be achieved by: (1) releasing select detainees with or without conditions; (2) deporting select detainees with final orders; (3) transferring selected detainees to other facilities where they are able to maintain 6-feet of social distancing;
- If any detainee is transferred to a facility where they cannot maintain 6-feet of social distancing, he/she shall be immediately released;
- The respondents have discretion to determine which detainees are deported or transferred and provides criteria which ERO could consider: (1) detainees over 55 years with preexisting conditions; (2) other detainees over 55 years; (3) other detainees who have pre-existing conditions regardless of age; (4) other detainees

who do not have a history of criminal convictions; (5) other detainees who have a history of only minor criminal convictions;

- The respondents shall file 24-hours in advance a list of detainees they will release, deport or transfer;
- Effectively immediately, the respondents shall put into effect all mandates, best practices and recommendations and guidelines issued by the CDC, State of California, San Bernardino County Public Health Department regarding COVID-19;
- Effectively immediately, all staff in Adelanto shall keep 6-feet social distancing from detainees and from each other unless there is a medical or safety reason not to;
- Effectively immediately, professionally-trained staff shall clean and disinfect all common areas multiple times a day;
- Effectively immediately, for areas where detainees are responsible for cleaning, training must be provided on how to effectively clean;
- Effectively immediately, only a single occupant may be assigned to any sleeping room that contains a toilet without an integrated lid;
- Effective immediately, all Adelanto staff shall wear masks and gloves provided by the respondents;
- Effectively immediately, all detainees shall wear masks except when eating, drinking or showering and sufficient gloves must be available upon request for detainees;
- Effectively immediately, all detainees must be provided with soap and paper towels or in the alternative, be provided with hand sanitizer;

In addition, the PI requires burdensome reporting requirements and the submission of detailed information regarding the facility and a detainee reduction plan by April 27, 2020.

We sent it up just before 4 pm. Here's the info for those who weren't copied:

As of this morning's IHSC report we have 103 cases that have tested positive for COVID-19 (cumulative total).

Of those positive cases, fourteen (14) are Guatemalan

- 13 remain in ICE custody
- 1 was released on OSUP from Florence SPC

Please let me know if you need anything additional.

Thank You
 -Mike

Subject: RE: CDC review of Guatemala claims

Tae,

Here is some additional information we received that might help inform your decision:

"They are asking about mission, how they are picked up, separated, time in custody, medical docs, wants to know loops, medical processes regarding COV-19.

Want to speak to facility poc about outbreaks at locations and how many detainees/deportees tested positive. "

I know Caleb's team sent the detainees that tested positive but I haven't shared yet because now I'm waiting to see what else they are going to need and also I'm trying to get them to centralize their request.

Subject: FW: CDC review of Guatemala claims

Tae,

How do you want to handle? We in removal are not poised to know or able to track down this information. In a separate email they are also asking for POC to discuss the issue in general about our population and exposures. They also advised they wanted to approve each case medically before the removal occurs. I'm not sure if wires are getting crossed with so many chefs in the kitchen as we are getting peppered spray from below and above.

One recommendation might be to set up a call with CDC and IHSC, Ops, and Removal and hear them out and then figure out next steps.

Another recommendation could be for docs to speak to docs and give CDC an IHSC POC and let them link up and provide a recommendation to the group.

It sounds like from all the different email chains going on that we will need this "process" before they take back more flights.

Thoughts? Other ideas?

Thanks
MP

Subject: Combined Request for Info for Communication Purposes

Nat,

Below is the combined request for information depicted in both list and spreadsheet formats. For each of these data points, we need to know:

1. Which data points are available?
2. How often is each point updated and available?
3. Which data points can be added to the landing page?

- Total number of COVID-19 tests administered to detainees
 - Types of tests administered (e.g., antibody, swab, etc.)
- Number of detainees tested for COVID-19 by facility
 - Number of detainees who have tested positive
 - Number of detainees who have tested negative
- Number of ICE contractors tested for COVID-19 by facility
 - Number of contractors who have tested positive
 - Number of contractors who have tested negative
- Number of detainees who have recovered
- Number of detainee transfers (to include starting facility and ending facility)
- Number of detainees currently in medical isolation due to COVID-19
- Number of detainees released from detention due to:
 - Judicial order
 - Susceptibility to serve illness due to COVID-19
 - Other custody management determination
 - To hospitals or family for treatment/recovery

Facility	Number cohort ed	Number Tested	Number of cases review ed	Number of review ed cases releas ed	Number Testin g Positi ve	(+) Releas ed	(+) Remai n in Custody	(+) Currentl y in treatme nt at hospital /speciali zed facility	(+) Recove red	(+) Deat hs

Additionally, we are seeking regularly updated answers to the following questions:

What is the status of removal flights?

What is the breakdown of flights/individuals removed since March 1?

Are we changing operations in light of positive cases in Guatemala, Haiti, Mexico, etc. among those removed?

Will we make and further clarifications/reviews of the detained population with relation to CDC's guidance regarding those who are more vulnerable to the virus?

(b)(6); (b)(7)(C)

Date: Thursday, May 28, 2020, 11:33 PM
To: Johnson, Tae D (b)(6); (b)(7)(C) @ice.dhs.gov>
Subject: RE: Commercial Removal Report

This is written more as a direct email to all FODs and DFODs rather than an official taskings communication. I shied away from explicitly saying we could waive the escort policy as I didn't want people to take advantage. I also didn't want to highlight the fact that we have done zero commercial removals last month. However if you think that is ok to say, I can add it.

Is this on the right track? Or did you want something more forceful?

Subject: Clearance needed soonest - DHS call for Covid-19 cost estimate

Importance: High

DHS requested high-level cost estimates for COVID-19 response from each Component due today at 1000 to support AS1 in a potential Supplemental request. This cost estimate is limited by full operational and medical requirements at this time. We will continue to refine and define requirements w/ the programs.

ERO Custody Ops, IHSC, EMU, and the CFO team held teleconferences followed by a call with DHS Budget and Components.

The attached represents the cost estimate at this time. The following TPs and assumptions underpin the effort:

- 30 day costs of \$84M/month; \$584.6M for FY20; and \$1B as an annual high-level ROM for 12 months
- Leveraged the contingency beds that were contracted during the surge last summer
- Identifies Transportation costs related to additional detainee movements
- Potential increases in use of ATD
- Identifies additional PPE requirements
- Identifies additional requirements for screening, sanitation and treatment
- Identifies additional ICE TDY to respond as needed

We expect this process to be iterative.

We also recognize that we have a significant limitation in family facilities.

Tae (b)(6)

FYSA, Sorry to ruin your Saturday! We just received the below from the Embassy of India in DC advising of at least 22 positive from last flight and requesting that we change our testing before next flight.

Simultaneously we are now receiving reports of positive cases from Ecuador as well on this week's flight however we are still trying to run down that information how many and A#.

Meanwhile we will try and get the A#s of the Indian cases to begin contact tracing.

CAUTION: This email originated from outside of DHS. DO NOT click links or open attachments unless you recognize and/or trust the sender. Contact ICE SOC SPAM with questions or concerns.

Good Afternoon (b)(6)

In light of the number of cases which turned out Covid positive (22 out of 76 from Haryana) (<https://www.ndtv.com/india-news/coronavirus-haryana-minister-anil-vij-says-22-of-76-deported-from-us-test-positive-for-covid-19-2234035>), Delhi has requested a change in the testing regime from rapid antibody test to RtPCR test for the deportees. Otherwise, more of them will be exposed during travel and this creates issues on the ground for our authorities.

Appreciate a quick feedback on this in light of ongoing planning for the next charter flight.

Is there a way to show on the manifest who was tested and who was not. As we move forward I'm sure this will become necessary if 100% testing isn't possible.

These were all Guatemalans in preparation for Tuesday's flight. We can check and see if nationality can be added, but my guess is this will become increasingly more difficult to track as more testing is completed. The medical folks don't typically track nationalities. They just test whomever is being manifested. Will confirm and let you know either way.

Henry:

Are we able to add nationality to this? It would be helpful to know, especially as we go through the negotiations w/the various countries whose nationals we are trying to repatriate.

Thanks.

Matt

Latest testing results attached. Only one positive test in El Paso which is part of phase 2 testing and really just getting comfortable with the machine. We are in a good position to fill a flight but will likely have ability to have two flights this upcoming week depending on GoG.

Good Day,

See attached report and below.

- El Paso: Did testing on two detainees and one came back positive. They are Phase II.
- PIDC: Is still testing and will complete as many as they can tomorrow, but assured me they will make the Tuesday flight. They only have 2 machines and average 3 collections and processes each hour, per machine.
- Karnes: FMC pending verification on how many need to be tested for the flight.
- Houston: They will resume testing tomorrow.

Will update report in the morning.

Can you ask someone to check the math. Seems like the numbers aren't adding up, or perhaps I just don't understand what it means.

Should the number of Postives, negatives and pending = the number of tests administered?

Importance: High

Marlen,

One of the flight nurses on the Bogota charter last week has tested positive for COVID-19. This will be a delicate conversation to have with Post – is this something DHS or DOS should convey from a more political angle, or do you suggest we handle it internally and inform the DCM?

Subject: COVID-19 USC repat flight

Hi (b)(6);

On Tuesday, April 7, 2020, ICE Air Operations was notified that a USA Med Nurse on board the USC repatriation flight from Colombia tested positive for COVID-19. The manifest for the 16 USC passengers is attached. Not sure how we want to notify DoS. Perhaps through HSI attaché in Bogota? I really don't think its appropriate to make notification through the DoS Task Force group mailbox.

Thanks,

Subject: COVID-19 - PPE Information

Good Afternoon,

Hope you are well and safe.

I am the ICE OAFM PPE POC leading with a OAFM PPE Team (logistics task force) responsible for the resupply of Personal Protective Equipment (PPE) for 12,517 LEOs and 7,715 Non-LEOs, or a total population of 20,232 individuals.

I need to contact ICE Program Leads - Mission Support concerning COVID-19 Personal Protective Equipment (PPE). Attached is a list of your locations and I would like to know if I have all of your locations? If not, can you share an updated list?

It is important to understand what is going on behind the scenes, what reports are available, and who will now be processing the PPE resupply orders to DHS who then process the procurement actions.

Here is a link to the current live 'Activity, Demand, and Acquisition' tool we asking for your PPE POCs to report weekly on their PPE current inventories, burn-rates, and what they have on order:

(b)(7)(E) [redacted]

(b)(7)(E) [redacted]. In week 3 report we asking PPE POC's to identify if the street address is the same for delivery of PPE items.

If you have some time tomorrow (30-45 minutes), I can conduct a skype for business session to get you updated or I can call? Or email if you have questions.

Thank you,

(b)(6) [redacted]

Subject: COVID-19 Action Plan, Revision 1

Please see attached COVID-19 action plan revision 1, this will be going out to the field and has been cleared by OPLA. I recommend this be shared with CFO, OCR and OPA as well. Consideration should be given to post on ice.gov to show it is not business as usual in our detention facilities.

Please let me know if I need DHS clearance to send to the field.

Thanks,

Henry

Subject: FW: COVID-19 and prisoner releases

Tae,

Apparently this was not one of the three cases we discussed last night, it's a separate one.

We don't normally get involved in USMS releases to BP since the long-standing practice is that BP will pick up on their detainer, reinstate and remove Mexicans that are prosecuted. In this case the alien was cleared yesterday by USMS/IHSC and BP has delayed pick up and want their own medical staff to clear (see attached email).

Moving forward either BP needs to handle the reinstatement and remove - as is a longtime practice - or lift the detainer so USMS can release. We have no authority to maintain detention and our staff would be just as at risk as BP if we were ordered to handle. This will come up again and BP needs to be ready to take action. This is not an ICE issue.

Please see below message from OIC (b)(6); (b)(7)(C) as well. Let me know if you need anything further.

Greg

To: (b)(6); [REDACTED] Lucero, Enrique M
Subject: RE: Congressional calls

I have a call at 1130 with one of the committees. Here is where they are going.

1. Whether DHS is testing detainees for COVID-19, and, if so:
 - a. what testing protocol DHS is using;
 - b. when the testing began;
 - c. how many detainees have been tested and in which facilities; and
 - d. how many of the tested detainees in each facility tested positive for the virus how many tested negative, and how many had test results that were inconclusive;
2. How DHS will house or quarantine presumptive or confirmed cases of COVID-19 to protect both high risk and otherwise healthy detainees and staff from contracting the virus
3. What medical care DHS will provide to detainees with presumptive or confirmed cases of COVID-19
4. How DHS will collect data and keep records on detainees with presumptive or confirmed cases of diagnosed COVID-19;
5. What steps DHS will take to reduce overcrowding in DHS facilities and free up space for effective quarantines of sick detainees, including by reducing the number of migrants detained unnecessarily
6. How DHS will ensure that detainees will be able to receive meaningful access to their attorneys even if the detainee or the facility is subject to quarantine procedures or take other steps to ensure their cases are not prejudiced by limited access to their attorneys should this occur
7. Whether and how DHS is coordinating with state and local governments on COVID-19 matters in areas where detention facilities are located
8. How DHS will address the potential spread of coronavirus in its detention facilities;
9. What steps DHS will take to remove barriers to immigrants receiving testing or treatment for COVID-19, including whether DHS will suspend the public charge rule for immigrants using public benefits to seek testing or treatment for COVID-19.

Subject: Congressional calls

Gents,

The AORs are receiving constant calls from Members of Congress asking for briefings and information on those in custody. We have been cautioning the AORs on either not participating in these calls yet or at least asking OCR to participate. My concern is that the Field doesn't have any visibility on what AD1 said in his call with the Appropriators. Do you have a differing opinion? We are trying to engage OCR for some talking points but I suspect they don't have any handy.

Subject: Congressional Notification: Eleven additional ICE detainees test positive for COVID-19

Ladies and gentlemen –

As of April 15, 2020, eleven (11) additional individuals in U.S. Immigration and Customs Enforcement (ICE) custody tested positive for COVID-19.

- A 38-year-old Indian national at Pike County Correctional Facility in Hawley, Pennsylvania.
- A 25-year-old Turkish national and a 45-year-old Cuban national at Otay Mesa Detention Center in San Diego, California.
- A 44-year-old Cuban national at River Correctional Center in Ferriday, Louisiana.
- A 38-year-old Nigerian national at Buffalo Federal Detention Facility in Batavia, New York.
- A 36-year-old Indian national and a 29-year-old Ecuadorian national at Prairieland Detention Center in Alvarado, Texas.
- A 49-year-old Guatemalan national, a 42-year-old Armenian national, a 55-year-old Mexican national, and a 35-year-old Mexican national at La Palma Correctional Center in Eloy, Arizona.

All individuals have been medically isolated and are receiving care. Consistent with CDC guidelines, those who have come in contact with the individuals have been cohorted and are being monitored for symptoms.

Additional information regarding the ICE COVID-19 response can be found at <https://www.ice.gov/coronavirus>.

Subject: Congressional Notification: Vulnerable Population in Detention

Ladies and gentlemen –

Due to the unprecedented nature of novel coronavirus 2019 (COVID-19), U.S. Immigration and Customs Enforcement (ICE) is reviewing cases of individuals in detention who may be vulnerable to the virus.

Utilizing Centers for Disease Control and Prevention (CDC) guidance along with the advice of medical professionals, ICE may place individuals in a number of alternatives to detention options. Decisions to release individuals in ICE custody occur every day on a case-by-case basis.

ICE has a long history of handling communicable diseases in the course of everyday operations and maintains emergency and contingency pandemic plans. The agency has modified its enforcement posture, detention operations, and visitation practices to ensure that individuals in the agency's custody and its employees remain safe.

ICE makes custody determinations every day on a case-by-case basis, in accordance with U.S. law and Department of Homeland Security policy, considering the merits and factors of each case while adhering to current agency priorities, guidelines and legal mandates. When making such decisions, ICE officers

weigh a variety of factors, including the person's criminal record, immigration history, ties to the community, risk of flight, and whether he or she poses a potential threat to public safety.

The agency has instructed its field offices to further assess and consider for release certain individuals deemed to be at greater risk of exposure, consistent with CDC guidelines, reviewing cases of individuals 60 years old and older, as well as those who are pregnant. Additionally, efforts to identify other individuals who may be more vulnerable to COVID-19, based on risk factors identified by the CDC, other than age and pregnancy, are ongoing, based on the recommendations of CDC.

ICE continues to re-evaluate all individuals in custody who make up vulnerable populations. As of March 30, 2020, 600 detainees were identified as "vulnerable" and more than 160 have been released from ICE custody.

Additional information about ICE's response to COVID-19 can be found here, www.ICE.gov/COVID19.

If you have questions or need additional information, please let us know.

Subject: COVID 19 AURORA Colorado Contract Detention Facility (GEO)

Sir,

Per our earlier conversation, Non-Government, Immigration Attorney (b)(6); (b)(7)(C) of the Novo Legal Group LLC, filed a motion asking for a Continuance of his Friday case since he has been exposed to someone who has tested positive for COVID-19. He stated that in that motion, he has not been tested, but has only been exposed to someone who has tested positive and is experiencing "flu-like symptoms consistent with the Coronavirus".

We identified 10 detainees that were in court and met with that attorney. All have been moved to an empty pod where they will be observed for the next few days.

I have ordered all employees to make sure that they are bringing assigned Laptops and operational field gear home with them each day in case of a COOP situation.

Tri-County Health was notified by the GEO Warden of the situation.

OPLA Denver is in contact with the Chief EOIR Judge and the USAO to determine if there may be some criminal intent by the attorney in knowingly "exposing" the court.

At 1725 MST, Tri-County health notified GEO that they should thoroughly clean the judges courtroom tonight and resume normal business tomorrow, as we do not have a presumptive test.

I'll be following up with an email from OPLA once I receive it.

(b)(6); (b)(7)(C)

Tae-

As you can see below, the PRR is cleared. Will ERO have ICE Policy clean up any formatting, and make sure OD is good with it going out? If we could get this out today, that would be great and limit what needs to be included in the declaration we discussed last night.

Good Morning Adam,

Thank you for your patience. The ICE ERO PRR is cleared with one minor edit (as seen in the attached) to adjust an inadvertent font change.

Please be sure to keep us apprised of any difficulty in obtaining the affidavits requested by DOJ to support the government's position in the *NIPNLG* litigation so we can raise those issues early, and don't hesitate to let me know if I can be of assistance with anything else.

Kind regards,

(b)(6)
 Attorney Advisor, Litigation
 Legal Counsel Division
 Office of the General Counsel
 U.S. Department of Homeland Security

Subject: RE: ICE Detention Facilities COVID 19 Response Requirements

(b)(6)

Attached please find a revised version of the draft ICE ERO COVID-19 Pandemic Response Requirements (PRR) document. This version is redlined, reflecting ERO's changes consistent with the CDC comments provided earlier this evening. As you will see, ERO declined only one of the CDC's recommendations. That said, in that instance, the ICE ERO PRR is more restrictive than the CDC recommendation. You will also see: (1) we inserted language in the Purpose and Scope section reflecting that the ICE ERO PRR was developed in consultation with the CDC; and (2) inserted a table of attachments including all documents referenced in the PRR (those documents are attached here as well).

At this point, it appears from our perspective to be ready for issuance, but please confirm next steps. Of course, it would be great to have this issued in advance of Monday's filing deadline in the *NIPNLG* litigation.

Thanks,

Adam V. Loiacono

Gents,

Attached is what ISRU found in their library. It will need significant updating, but there is some useful information in these older plans. I can task ISRU to start updating on Monday. They would need some help from IHSC, CMD and the ERU to make one comprehensive plan if that's the route we want to take.

Pete

Sir,

Attached are some IHSC plans. The IHSC Pandemic Plan attachment and the ERO ID&P Contingency Plan attachment appear to be stuck in the creation phase and are incomplete.

The DRO Pandemic Influenza Contingency plan attachment is dated from 2009 but still offers a lot of viable information and procedures.

The organizational and operational checklists in the appendices are helpful implementation options to mitigate the threat of a pandemic virus entering the ERO detention system.

I hope this helps.

Thank you.

We had reduced to the GM a few weeks back due to lack of IHSC personnel and we're at 53% of capacity. Intake has been single digits due to low numbers from CBP. We'll use IRDF and work with LOS and the DOCC when necessary. We will be fine.

Subject: COVID Cohort Memo OMDC 04-03-2020

ALCON,

Please see the attached COVID COHORT Memo for OMDC based on recent positive COVID test result for a detainee.

Also attached is the IHSC Interim exposure risk assessment tool to determine risk of staff that are potentially exposed to the virus.

At this time all units in Otay Mesa Detention Center are on cohort.

IHSC medical staff will be taking care of sick call and pill lines in the dorms. Urgent medical needs will be handled on a case by case basis either at the unit or brought to clinic.

Security officers should notify medical immediately if any detainees present with fever or other symptoms.

Everyone in the facility must ensure proper social distancing and hand washing to help minimize the spread of the virus throughout.

PPE gear must be worn by anyone entering J pod or the MHU area.

Subject: COVID-19 Detention Population Review

I have consolidated all of the Over 60, Over 70 (in GREEN), and Pregnant (in PINK) detainee taskings into this master spreadsheet.

This sheet represents all of the detainees whose custody status was reviewed for appropriateness of detention given the COVID-19 pandemic. It is consolidated and cleaned up from the original spreadsheet that Mr (b)(6); provided in the tasking below (a detention inventory report dated 03/20/20), and the spreadsheet that Mr (b)(6); provided regarding the pregnant detainees (with additional information pulled from EARM on those cases).

This is a living document right now – the information in individual rows may still to be updated, but I wanted to get this out as it stands.

Subject: IHSC list of chronic care patients
Importance: High

Evening all,

I know we are sending a large number of taskings for action, all while you are all doing your best to accomplish the mission, safeguard employees and your AORs. I thank you for that, and I am sorry for the limited time frames on responses. Thank you in advance for your patience and your dedication.

That being said, attached is a new list of chronic care cases that are currently in ICE detention. This is an IHSC generated list vetted by LESA. Please note that this list could include some cases you are already reviewing. Regardless, please scrub this list and evaluate each case in your AOR for the appropriateness of detention. After you review the custody status of each case, please respond on each whether continued custody is appropriate or if you plan to release the detainee. Send this response to the

Domestic Operations acting Chief of Staff (b)(6); (b)(7)(C) by COB, March 24, 2020, copying DAD Michael Meade and DAD Ricardo Wong.

Please engage your local IHSC staff and local OPLA for any medical or legal questions that may arise in this exercise. As always, feel free to reach out with questions.

Thanks,

(b)(6); (b)(7)(C)

Subject: RE: COVID-19 Detention Population Review

We didn't go that far yet. What we did was keep the original spreadsheet as the one-off report of the original review and gave that to STU for storage. Then any further reviews would be classified by the Special Class.

We can either go back and add the special class code to the ones on the spreadsheet if you prefer that?

Subject: FW: COVID-19 Detention Population Review

Here is the current status of the detained case reviews... Bottom line- at least 296 detainees have been released that we know of- there might be more if they failed to put the special class into EARM.

Subject: RE: COVID-19 Detention Population Review

The Field has documented 118 new releases via the new *COVID-19 Special Class* in EARM (one of those was on the initial scrub, but they have reevaluated since removal is no longer imminent).

For reference, there two attachments to this e-mail:

1. ***The COVID Detainee Case Review (Master).xlsx***
 - a. This is the initial scrub of detainees 60 and older or pregnant.
 - b. The previous e-mail below is the summary of that initial scrub.
2. ***Final Releases with Covid-19_04072020 NDM Add on.xlsx***
 - a. This is a report run this morning for any COVID-19 Special Class entries by the Field.
 - i. The Field marked/released 117 cases not on the original scrub.
 1. Plus one (1) case that was on the original scrub, but has since been reevaluated for release.
 - ii. 15 cases that are on both spreadsheets, meaning they were part of the initial scrub AND the Field has entered a Special Class on their case.
 1. These 15 are not part of the new 117 cases counted above.

Between both spreadsheets, there are 296 detainees released due to COVID-19 considerations (and one still waiting on shelter space).

Subject: FW: COVID-19 Detention Population Review

The attached spreadsheet represents all of the detainees whose custody status was reviewed for appropriateness of detention given the COVID-19 pandemic.

- **Detainees 70 and older – 52 Total:**
 - Continue in Custody: 35
 - Recommend Release: 17
 - All have been released as of 03/25/20
 - 7 put on ATD
- **Detainees 60 and older (excluding the 52 above) – 515 Total:**
 - Continue in Custody: 369
 - Recommend Release: 146
 - 145 have been released
 - 66 put on ATD
 - 1 is waiting on shelter space in MIA
- **Pregnant Detainees – 16 Total:**
 - Continue in Custody: 1
 - Removed to HONDU on 03/25/20
 - Recommend Release: 15
 - All 15 have been released
- **Summary:**
 - 583 cases were reviewed for appropriateness of detention given the pandemic
 - 178 have been released at field recommendation as a result of this review
 - 1 is waiting for shelter space (hasn't been released yet)

Several of the 583 cases that were the Field determined continued custody was appropriate have been released through the natural progression of their cases. Those are not part of the 178 released.

Other than the one still waiting on shelter space – this scrub is done.

Subject: COVID-19 Detention Population Review

I have consolidated all of the Over 60, Over 70 (in GREEN), and Pregnant (in PINK) detainee taskings into this master spreadsheet.

This sheet represents all of the detainees whose custody status was reviewed for appropriateness of detention given the COVID-19 pandemic. It is consolidated and cleaned up from the original spreadsheet that Mr. Berg provided in the tasking below (a detention inventory report dated 03/20/20), and the spreadsheet that Mr. Laws provided regarding the pregnant detainees (with additional information pulled from EARM on those cases).

This is a living document right now – the information in individual rows may still to be updated, but I wanted to get this out as it stands.

Subject: IHSC list of chronic care patients

Importance: High

Evening all,

I know we are sending a large number of taskings for action, all while you are all doing your best to accomplish the mission, safeguard employees and your AORs. I thank you for that, and I am sorry for the limited time frames on responses. Thank you in advance for your patience and your dedication.

That being said, attached is a new list of chronic care cases that are currently in ICE detention. This is an IHSC generated list vetted by LESA. Please note that this list could include some cases you are already reviewing. Regardless, please scrub this list and evaluate each case in your AOR for the appropriateness of detention. After you review the custody status of each case, please respond on each whether continued custody is appropriate or if you plan to release the detainee. Send this response to the Domestic Operations acting Chief of Staff (b)(6); (b)(7)(C) [redacted] by COB, March 24, 2020, copying DAD Michael Meade and DAD Ricardo Wong.

Please engage your local IHSC staff and local OPLA for any medical or legal questions that may arise in this exercise. As always, feel free to reach out with questions.

Thanks,

(b)(6); (b)(7)(C) [redacted]

Tae, mostly light edits attached. Overall, the language is much more streamlined and does not change the intent/substance.

That said, I called out instances where substantive deletions were made from the previous version. In a couple of these places, I reinserted the deleted language because it seemed necessary. For other instances, I leave that judgment to you.

Let me know if/how I can further assist.

Thank you,

A Message from Executive Associate Director for Homeland Security Investigations and Senior Official Performing the Duties of the Deputy Director Derek N. Benner

To All ICE Employees
March 13, 2020

COVID-19 Operational Impacts

To echo Mr. Albence's message earlier today, ICE leadership is continuously monitoring the impacts of the Coronavirus Disease 2019 (COVID-19) to our workforce and taking necessary steps to ensure you are safe. As an ICE employee, your welfare is our highest priority. In light of this, we also recognize that, as a law enforcement agency, our functions must continue in order to ensure public safety and national security. Over the last 24 hours, ICE leadership met to assess the current threat and establish a unified posture within our agency. We were in touch with DHS to ensure we mirror guidance going out from the Department to all DHS employees.

Effective immediately, please adhere to the following operational changes until further notice:

1. Non-mission-critical training, travel, ceremonies, and operations scheduled over the next 30 days should be cancelled and/or rescheduled. Mission-critical operations will continue. Following this message, HQ components may send program-specific guidance regarding mission-critical activities to field leadership. *To determine what is mission critical, please consult with your local field leadership, but guidance should mirror what was determined to be mission critical during past sequestration periods.*
2. For telework-eligible employees, telework should be maximized when operationally feasible. Telework is authorized by your local office or your respective HQ component. On a case-by-case basis, some telework restrictions may be waived. *See below for further telework guidance.*
3. International travel is restricted for certain regions designated as Risk Level 3 or higher by the Centers for Disease Control and Prevention (CDC).
4. Special leave categories for employees who are not telework eligible may be instituted in certain situations and under certain conditions. *See below for further guidance.*

For telework-eligible employees, please reference the following guidance:

Due to the continued spread of COVID-19, ICE is encouraging the maximum use of telework as is operationally feasible for employees who occupy telework-eligible positions and who may be in high-risk groups for COVID-19; employees caring for a loved one who is in a high-risk group; or employees dealing with locality-base issues such as school closures and community spread of COVID-19. Populations that the CDC has identified as at higher risk include older adults and individuals with chronic health conditions, such as high blood pressure, heart disease, diabetes, lung disease or compromised immune systems ([see CDC High Risk Populations](#)). In addition, the CDC identified special populations at risk, which includes pregnant women ([see CDC Special Populations](#)). ICE supervisors are authorized to maximize telework flexibilities to eligible workers within these populations. Please note that supervisors do not need to require certification by a medical professional and may accept self-identification by employees that they are in one of these populations. In order to increase maximum access to telework for those employees who occupy telework-eligible positions, ICE is implementing the following procedures.

Telework Policy Waivers

To ensure the health, safety, and wellbeing of our workforce, and to ensure we are able to fulfill our mission essential functions at ICE, during this time of the COVID-19 pandemic, supervisors are authorized to waive certain requirements of individual ICE program office policies that might otherwise prevent employees who occupy telework-eligible positions from participating. In addition, supervisors should work with each employee on a case-by-case basis to understand the employee's situation and ensure maximum operational readiness. This may entail teleworking split shifts or non-standard hours, or mixing telework and leave within a shift.

What You Need to Know

Waiving the following requirements is permitted on a **case-by-case** basis and will be decided at the supervisor level based on each employee's situation and mission needs. This policy is in effect until April 30, 2020, and could be withdrawn or extended before that date.

The following list includes some examples of requirements that **may** be waived to approve *core or episodic* telework:

- To be a federal employee for one year before applying.
- To come to the office two days per pay period.
- That telework not be conducted where there are persons present that the employee needs to care for or supervise, including children.

However, the teleworking employee must account for work and non-work hours during their tour of duty and take appropriate leave (paid or unpaid).

The following are some examples of requirements that **may** be waived to approve *episodic telework only*:

- To complete required telework training.
- That the employee does not have any disciplinary action within the last year.
- That the employee's record of attendance shows no pattern of leave abuse or excessive absence and the employee is not on leave restriction.
- To have "Achieved Expectations" or higher on most recent performance appraisal.
- That telework not include tasks that involve the employee giving or receiving supervisory oversight, mentoring, or assistance on a continuous basis.

These waivers ensure supervisors have the flexibility to use telework as needed, based on local office circumstances. The waivers are only valid through April 30, 2020 or until this policy is withdrawn or extended.

Related Information

Please use these additional resources when considering your office's response to the COVID-19 pandemic.

- [ICE COVID-19 Website](#)
- [ICE Telework page \(includes the telework application links\)](#)
- [Manager and Supervisor Telework Toolkit](#)
- [Coronavirus Disease 2019 \(COVID-19\): Additional Guidance \(OPM\) \(PDF\)](#)
- Online trainings:
 - [Telework 101 for Managers \(PALMS\)](#)
 - [Telework 101 for Employees \(PALMS\)](#)
 - [Telework Fundamentals \(OPM\)](#)

For employees who are not telework eligible:

For those individual workers who are at high risk for contracting COVID-19 or complications from COVID-19, as delineated by the CDC, but perform location-dependent duties or work that is not appropriate for telework, or cannot travel to work safely without increased exposure (due to a "condition

that prevents the employee or group of employees from safely traveling to or performing work at an approved location"), these high-risk employees may be provided Weather and Safety Leave. Medical certification of high-risk conditions is not required. This leave is limited to high-risk employees in these circumstances only, this is not for parents dealing with school closures or community spread of COVID-19.

Following this message, ICE leadership at HQ may send additional program-specific guidance. As the current threat is fluid, anticipate additional guidance will be broadcast in the future. We will make every effort to ensure you are aware of any changes in the coming days.

Tae,

I would agree if the front office would support. Right now we are just authorizing telework on a case by case basis based on potential exposure (but not sick), school closings where it is possible for employee to still work remotely or underlying health condition that creates greater risk per the guidance that was recently issued.

A Message from Executive Associate Director for Homeland Security Investigations and Senior Official Performing the Duties of the Deputy Director Derek N. Benner

To All ICE Employees
March 13, 2020

COVID-19 Operational Impacts

To echo Mr. Albence's message earlier today, ICE leadership is continuously monitoring the impacts of the Coronavirus Disease 2019 (COVID-19) to our workforce and taking necessary steps to ensure you are safe. As an ICE employee, your welfare is our highest priority. In light of this, we also recognize that, as a law enforcement agency, our functions must continue in order to ensure public safety and national security. Over the last 24 hours, ICE leadership met to assess the current threat and establish a unified posture within our agency. We were in touch with DHS to ensure we mirror guidance going out from the Department to all DHS employees.

Effective immediately, please adhere to the following operational changes until further notice:

1. Non-mission-critical training, travel, ceremonies, and operations scheduled over the next 30 days should be cancelled and/or rescheduled. Mission-critical operations will continue. Following this message, HQ components may send program-specific guidance regarding mission-critical activities to field leadership. *To determine what is mission critical, please consult with your local field leadership, but guidance should mirror what was determined to be mission critical during past sequestration periods.*
2. For telework-eligible employees, telework should be maximized when operationally feasible. Telework is authorized by your local

office or your respective HQ component. On a case-by-case basis, some telework restrictions may be waived. *See below for further telework guidance.*

3. International travel is restricted for certain regions designated as Risk Level 3 or higher by the Centers for Disease Control and Prevention (CDC).
4. Special leave categories for employees who are not telework eligible may be instituted in certain situations and under certain conditions. *See below for further guidance.*

For telework-eligible employees, please reference the following guidance:

Due to the continued spread of COVID-19, ICE is encouraging the maximum use of telework as is operationally feasible for employees who occupy telework-eligible positions and who may be in high-risk groups for COVID-19; employees caring for a loved one who is in a high-risk group; or employees dealing with locality-base issues such as school closures and community spread of COVID-19. Populations that the CDC has identified as at higher risk include older adults and individuals with chronic health conditions, such as high blood pressure, heart disease, diabetes, lung disease or compromised immune systems (see CDC High Risk Populations). In addition, the CDC identified special populations at risk, which includes pregnant women (see CDC Special Populations). ICE supervisors are authorized to maximize telework flexibilities to eligible workers within these populations. Please note that supervisors do not need to require certification by a medical professional and may accept self-identification by employees that they are in one of these populations. In order to increase maximum access to telework for those employees who occupy telework-eligible positions, ICE is implementing the following procedures.

Telework Policy Waivers

To ensure the health, safety, and wellbeing of our workforce, and to ensure we are able to fulfill our mission essential functions at ICE, during this time of the COVID-19 pandemic, supervisors are authorized to waive certain requirements of individual ICE program office policies that might otherwise prevent employees who occupy telework-eligible positions from participating. In addition, supervisors should work with each employee on a case-by-case basis to understand the employee's situation and ensure maximum operational readiness. This may entail teleworking split shifts or non-standard hours, or mixing telework and leave within a shift.

What You Need to Know

Waiving the following requirements is permitted on a **case-by-case** basis and will be decided at the supervisor level based on each employee's situation and mission needs. This policy is in effect until April 30, 2020, and could be withdrawn or extended before that date.

The following list includes some examples of requirements that **may** be waived to approve *core or episodic* telework:

- To be a federal employee for one year before applying.
- To come to the office two days per pay period.
- That telework not be conducted where there are persons present that the employee needs to care for or supervise, including children. However, the teleworking employee must account for work and non-work hours during their tour of duty and take appropriate leave (paid or unpaid).

The following are some examples of requirements that **may** be waived to approve *episodic telework only*:

- To complete required telework training.
- That the employee does not have any disciplinary action within the last year.
- That the employee's record of attendance shows no pattern of leave abuse or excessive absence and the employee is not on leave restriction.
- To have "Achieved Expectations" or higher on most recent performance appraisal.
- That telework not include tasks that involve the employee giving or receiving supervisory oversight, mentoring, or assistance on a continuous basis.

These waivers ensure supervisors have the flexibility to use telework as needed, based on local office circumstances. The waivers are only valid through April 30, 2020 or until this policy is withdrawn or extended.

Related Information

Please use these additional resources when considering your office's response to the COVID-19 pandemic.

 - [Telework 101 for Managers \(PALMS\)](#)
 - [Telework 101 for Employees \(PALMS\)](#)
 - [Telework Fundamentals \(OPM\)](#)

For employees who are not telework eligible:

For those individual workers who are at high risk for contracting COVID-19 or complications from COVID-19, as delineated by the CDC, but perform location-dependent duties or work that is not appropriate for telework, or cannot travel to work safely without increased exposure (due to a "condition that prevents the employee or group of employees from safely traveling to or performing work at an approved location"), these high-risk employees may be provided Weather and Safety Leave. Medical certification of high-risk conditions is not required. This leave is limited to high-risk employees in these circumstances only, this is not for parents dealing with school closures or community spread of COVID-19.

Following this message, ICE leadership at HQ may send additional program-specific guidance. As the current threat is fluid, anticipate additional guidance will be broadcast in the future. We will make every effort to ensure you are aware of any changes in the coming days.

 - [Telework Fundamentals \(OPM\)](#)

For employees who are not telework eligible:

For those individual workers who are at high risk for contracting COVID-19 or complications from COVID-19, as delineated by the CDC, but perform location-dependent duties or work that is not appropriate for telework, or cannot travel to work safely without increased exposure (due to a "condition that prevents the employee or group of employees from safely traveling to or performing work at an approved location"), these high-risk employees may be provided Weather and Safety Leave. Medical certification of high-risk conditions is not required. This leave is limited to high-risk employees in these circumstances only, this is not for parents dealing with school closures or community spread of COVID-19.

Following this message, ICE leadership at HQ may send additional program-specific guidance. As the current threat is fluid, anticipate additional guidance will be broadcast in the future. We will make every effort to ensure you are aware of any changes in the coming days.

**A Message from Executive Associate Director for Homeland Security
Investigations and Senior Official Performing the Duties of the Deputy
Director Derek N. Benner**

To All ICE Employees
March 13, 2020

COVID-19 Operational Impacts

To echo Mr. Albence's message earlier today, ICE leadership is continuously monitoring the impacts of the Coronavirus Disease 2019 (COVID-19) to our workforce and taking necessary steps to ensure you are safe. As an ICE employee, your welfare is our highest priority. In light of this, we also recognize that, as a law enforcement agency, our functions must continue in order to ensure public safety and national security. Over the last 24 hours, ICE leadership met to assess the current threat and establish a unified

posture within our agency. We were in touch with DHS to ensure we mirror guidance going out from the Department to all DHS employees.

Effective immediately, please adhere to the following operational changes until further notice:

1. Non-mission-critical training, travel, ceremonies, and operations scheduled over the next 30 days should be cancelled and/or rescheduled. Mission-critical operations will continue. Following this message, HQ components may send program-specific guidance regarding mission-critical activities to field leadership. *To determine what is mission critical, please consult with your local field leadership, but guidance should mirror what was determined to be mission critical during past sequestration periods.*
2. For telework-eligible employees, telework should be maximized when operationally feasible. Telework is authorized by your local office or your respective HQ component. On a case-by-case basis, some telework restrictions may be waived. *See below for further telework guidance.*
3. International travel is restricted for certain regions designated as Risk Level 3 or higher by the [Centers for Disease Control and Prevention \(CDC\)](#).
4. Special leave categories for employees who are not telework eligible may be instituted in certain situations and under certain conditions. *See below for further guidance.*

For telework-eligible employees, please reference the following guidance:

Due to the continued spread of COVID-19, ICE is encouraging the maximum use of telework as is operationally feasible for employees who occupy telework-eligible positions and who may be in high-risk groups for COVID-19; employees caring for a loved one who is in a high-risk group; or employees dealing with locality-base issues such as school closures and community spread of COVID-19. Populations that the CDC has identified as at higher risk include older adults and individuals with chronic health conditions, such as high blood pressure, heart disease, diabetes, lung disease or compromised immune systems ([see CDC High Risk Populations](#)). In addition, the CDC identified special populations at risk, which includes pregnant women ([see CDC Special Populations](#)). ICE supervisors are authorized to maximize telework flexibilities to eligible workers within these populations. Please note that supervisors do not need to require certification by a medical professional and may accept self-identification by employees that they are in one of these populations. In order to increase maximum access to telework for those employees who occupy telework-eligible positions, ICE is implementing the following procedures.

Telework Policy Waivers

To ensure the health, safety, and wellbeing of our workforce, and to ensure we are able to fulfill our mission essential functions at ICE, during this time of the COVID-19 pandemic, supervisors are authorized to waive certain requirements of individual ICE program office policies that might otherwise prevent employees who occupy telework-eligible positions from participating. In addition, supervisors should work with each employee on a case-by-case basis to understand the employee's situation and ensure maximum operational readiness. This may entail teleworking split shifts or non-standard hours, or mixing telework and leave within a shift.

What You Need to Know

Waiving the following requirements is permitted on a **case-by-case** basis and will be decided at the supervisor level based on each employee's situation and mission needs. This policy is in effect until April 30, 2020, and could be withdrawn or extended before that date.

The following list includes some examples of requirements that **may** be waived to approve *core or episodic* telework:

- To be a federal employee for one year before applying.
- To come to the office two days per pay period.
- That telework not be conducted where there are persons present that the employee needs to care for or supervise, including children. However, the teleworking employee must account for work and non-work hours during their tour of duty and take appropriate leave (paid or unpaid).

The following are some examples of requirements that **may** be waived to approve *episodic telework only*:

- To complete required telework training.
- That the employee does not have any disciplinary action within the last year.
- That the employee's record of attendance shows no pattern of leave abuse or excessive absence and the employee is not on leave restriction.
- To have "Achieved Expectations" or higher on most recent performance appraisal.
- That telework not include tasks that involve the employee giving or receiving supervisory oversight, mentoring, or assistance on a continuous basis.

These waivers ensure supervisors have the flexibility to use telework as needed, based on local office circumstances. The waivers are only valid through April 30, 2020 or until this policy is withdrawn or extended.

Tae,

I would agree if the front office would support. Right now we are just authorizing telework on a case by case basis based on potential exposure (but not sick), school closings where it is possible for employee to still work remotely or underlying health condition that creates greater risk per the guidance that was recently issued.

A Message from Executive Associate Director for Homeland Security Investigations and Senior Official Performing the Duties of the Deputy Director Derek N. Benner

To All ICE Employees
March 13, 2020

COVID-19 Operational Impacts

To echo Mr. Albence's message earlier today, ICE leadership is continuously monitoring the impacts of the Coronavirus Disease 2019 (COVID-19) to our workforce and taking necessary steps to ensure you are safe. As an ICE employee, your welfare is our highest priority. In light of this, we also recognize that, as a law enforcement agency, our functions must continue in order to ensure public safety and national security. Over the last 24 hours, ICE leadership met to assess the current threat and establish a unified posture within our agency. We were in touch with DHS to ensure we mirror guidance going out from the Department to all DHS employees.

Effective immediately, please adhere to the following operational changes until further notice:

1. Non-mission-critical training, travel, ceremonies, and operations scheduled over the next 30 days should be cancelled and/or rescheduled. Mission-critical operations will continue. Following this message, HQ components may send program-specific guidance regarding mission-critical activities to field leadership. *To determine what is mission critical, please consult with your local field leadership, but guidance should mirror what was determined to be mission critical during past sequestration periods.*
2. For telework-eligible employees, telework should be maximized when operationally feasible. Telework is authorized by your local office or your respective HQ component. On a case-by-case basis, some telework restrictions may be waived. *See below for further telework guidance.*

3. International travel is restricted for certain regions designated as Risk Level 3 or higher by the [Centers for Disease Control and Prevention](#) (CDC).
4. Special leave categories for employees who are not telework eligible may be instituted in certain situations and under certain conditions. *See below for further guidance.*

For telework-eligible employees, please reference the following guidance:

Due to the continued spread of COVID-19, ICE is encouraging the maximum use of telework as is operationally feasible for employees who occupy telework-eligible positions and who may be in high-risk groups for COVID-19; employees caring for a loved one who is in a high-risk group; or employees dealing with locality-base issues such as school closures and community spread of COVID-19. Populations that the CDC has identified as at higher risk include older adults and individuals with chronic health conditions, such as high blood pressure, heart disease, diabetes, lung disease or compromised immune systems ([see CDC High Risk Populations](#)). In addition, the CDC identified special populations at risk, which includes pregnant women ([see CDC Special Populations](#)). ICE supervisors are authorized to maximize telework flexibilities to eligible workers within these populations. Please note that supervisors do not need to require certification by a medical professional and may accept self-identification by employees that they are in one of these populations. In order to increase maximum access to telework for those employees who occupy telework-eligible positions, ICE is implementing the following procedures.

Telework Policy Waivers

To ensure the health, safety, and wellbeing of our workforce, and to ensure we are able to fulfill our mission essential functions at ICE, during this time of the COVID-19 pandemic, supervisors are authorized to waive certain requirements of individual ICE program office policies that might otherwise prevent employees who occupy telework-eligible positions from participating. In addition, supervisors should work with each employee on a case-by-case basis to understand the employee's situation and ensure maximum operational readiness. This may entail teleworking split shifts or non-standard hours, or mixing telework and leave within a shift.

What You Need to Know

Waiving the following requirements is permitted on a **case-by-case** basis and will be decided at the supervisor level based on each employee's situation and mission needs. This policy is in effect until April 30, 2020, and could be withdrawn or extended before that date.

The following list includes some examples of requirements that **may** be waived to approve *core or episodic* telework:

- To be a federal employee for one year before applying.
- To come to the office two days per pay period.
- That telework not be conducted where there are persons present that the employee needs to care for or supervise, including children. However, the teleworking employee must account for work and non-work hours during their tour of duty and take appropriate leave (paid or unpaid).

The following are some examples of requirements that **may** be waived to approve *episodic telework only*:

- To complete required telework training.
- That the employee does not have any disciplinary action within the last year.
- That the employee's record of attendance shows no pattern of leave abuse or excessive absence and the employee is not on leave restriction.
- To have "Achieved Expectations" or higher on most recent performance appraisal.
- That telework not include tasks that involve the employee giving or receiving supervisory oversight, mentoring, or assistance on a continuous basis.

These waivers ensure supervisors have the flexibility to use telework as needed, based on local office circumstances. The waivers are only valid through April 30, 2020 or until this policy is withdrawn or extended.

Subject: FW: Covid-19 Positive Detainee

Hi there,

We have our first COVID-19 positive detainee. He was received from BOP in full PPE and our staff transported him while wearing PPE. He went directly into a negative pressure room at Pine Prairie and has been there ever since. The detainee is asymptomatic, so Pine Prairie medical ordered a COVID-19 test to rule it out and free up the negative pressure room. The test came back positive so the detainee will complete his isolation period in the negative pressure room. He's a final order reinstate.

(b)(6); (b)(7)(C)
 MX DOB: (b)(6); (Age: 52)

The detainee has not come into contact with other detainees at the facility and staff members wear PPE when interacting with him.

From: (b)(6); (b)(7)(C) @ice.dhs.gov>
Date: Wednesday, Apr 01, 2020, 9:21 PM
To: (b)(6); (b)(7)(C) @ice.dhs.gov>
Subject: FW: Covid-19 Positive Detainee

Overall, and given the circumstances, a pretty good job in detention management and containment.

BOP Oakdale turned him over to us in full PPE on 3/23/2020. He was asymptomatic and has remained as such. The DO who received him had his own PPE as well. He was transported in a detention van with ventilation/exhaust – while he remained in PPE. Alien was rolled directly into a negative pressure room at Pine Prairie where he has remained. We have no idea when he was exposed or infected, and he very well could be past the 14 day window, but given the unknown, he should simply run a full 14 days in the negative pressure room, and if he remains asymptomatic for five more days, we should be able to be remove him without issue or hazard to the public. He is a final order (re-instatement) Mexican.

Hi Mike,

We received notification last night that a detainee in Pine Prairie tested positive for COVID-19 after becoming symptomatic. The facility received the results from LA Department of Health last night. SIR is forthcoming; additional information is below. The dorm the detainee came from has been cohorted and the cohort will reset from the time the detainee left the dorm.

Subject: COVID-19 Positive- Detainee-PPIPC

On 4/16/20 while conducting temperature checks in Bravo Alpha it was noted that Detainee (b)(6); (b)(7)(C) had a temporal temperature reading of 102.9. The temperature was rechecked and temporal readings were obtained of 102.3 and oral readings of 100.0.

The detainee was brought to medical for an evaluation, tested for the flu and placed in medical isolation. A specimen was collected for COVID-19 and packaged for processing at OPH laboratory. On 4/17/20 a positive test result was received from the OPH lab. All COVID-19 protocols were followed to include the use of proper PPE. The detainee arrived at PPIPC on 4/8/20 and has been since his arrival from ASF. Bravo Alpha unit will remain on cohort status and will reset if a positive test result is received.

Looks like a positive case in Phoenix. The hospital is not very forthcoming with information.

This detainee was housed in the same pod as the Guatemalan detainee that apparently tested positive after removal. I don't know if they were housed together or if it was just the same pod.

(b)(6); (b)(7)(C)@ice.dhs.gov>
Subject: COVID-19 Positive

Mike,

As we discussed, here is the information for the detainee houses at the La Palma Correctional Center (LPCC) who tested positive for COVID-19:

Name: (b)(6); (b)(7)(C)
A#: (b)(6);
DOB: (b)(6); (b)(7)(C)
Country of Citizenship: Guatemala
Date of Arrival: 03/21/2020 (To LPCC)

The hospital did not give us a formal diagnosis and are not being very forthcoming with information, but the charge nurse said that since we operate a detention facility, they needed to inform us that we have a positive COVID-19 case.

Fortunately, the pod had been on cohort since the Guatemalan deportee tested positive earlier in the week. The detainees in the pod are being satellite fed and medical is doing daily health checks on every detainee in the pod. The pod is being cleaned. No specific information from hospital, but he was asymptomatic prior to being hospitalized for the brain bleed and fracture to the skull.

We will work the FMC and the facility to take every precaution possible to minimize the spread.

Any questions or concerns please let me know. Thanks.

Subject: COVID-19 Presumptive Positive Test for ERA at Stewart Detention Center

Good afternoon (b)(6); [REDACTED] –

Thanks for taking my call earlier. As discussed, I am reporting a presumptive positive test from a medical provider for one of my employees who works at the Stewart Detention Center (SDC). The employee, Enforcement and Removal Assistant (b)(6); (b)(7)(C) last worked at SDC on March 27th and around noon that day she went home on sick leave. Yesterday, she reported that her grandfather had tested positive and that she was symptomatic. She reported to the ER that evening, and was informed that due to mild symptoms the ER would not test for COVID-19. However, she reports that the nurse informed her that due to her contact with the grandfather she probably contracted the virus.

Today, after discussion with the Health and Safety staff at HQ, they informed us that despite the absence of a positive test, she should be treated as having a positive test for COVID-19. Approximately 14 staff, which includes one employee from the Office of Chief Counsel will be placed in self quarantine status either on telework if possible, or weather and safety leave to self-quarantine until April 10, 2020.

Please let me know if you need anything further.

Thanks again

Subject: RE: COVID-19 Question

Hi (b)(6); (b)(7)(C)

Well, this is a good question. In M&A, we have been asking people who have family members returning from affected areas (Italy, China, and Korea so far) to self-quarantine and telework for 14 days. This is because living with someone in close quarters/high risk, and because in M&A telework is much easier to assign.

(b)(5)

However, I can understand if ERO leadership thinks we can manage the hazard differently. I think we would just want to really clearly discuss and document what we decide.

In all of this I want to make sure we are making decisions that can be supported across the agency. Happy to discuss further if you'd like.

Subject: COVID-19 Question

Evening (b)(6);
(b)(7)(C)

We just received an email from our Boston Field Office concerning some guidance given to the wife (who works for USCIS) of one our Deportation Officers. Please take a look at the below information we received from Boston:

ERO Boston

One of our DOs, has a son that has been studying in Florence, Italy since January 2020. Due to the current COVID-19 situation in Italy, many of the students are being sent back to their home countries. The DO's son is scheduled to return from Italy on Sunday, March 8, 2020. The DO's wife is a USCIS employee and has been told by her management to self-quarantine for 14 days after her son's arrival. I believe we should also have the DO self-quarantine for the same time for the safety of our other officers and to avoid any possible disruption to ERO Boston operations.

We will keep in contact with the DO, monitor the situation and keep HQ updated with any changes.

I removed the names, but otherwise this is information we received. I am not sure if they actually told the DO to stay home yet, we are tracking that down, and this is a one-off situation, but can you offer us some guidance on how to proceed so we can be consistent?

Thanks in advance,

(b)(6);

Subject: RE: COVID-19 and prisoner releases

Thanks Greg, Just so I understand, how were the other three cases resolved, did BP pick up or did we (ICE) assist in resolving the issue somehow?

Subject: FW: COVID-19 and prisoner releases

Tae,

Apparently this was not one of the three cases we discussed last night, it's a separate one.

We don't normally get involved in USMS releases to BP since the long-standing practice is that BP will pick up on their detainer, reinstate and remove Mexicans that are prosecuted. In this case the alien was cleared yesterday by USMS/IHSC and BP has delayed pick up and want their own medical staff to clear (see attached email).

Moving forward either BP needs to handle the reinstatement and remove - as is a longtime practice - or lift the detainer so USMS can release. We have no authority to maintain detention and our staff would be just as at risk as BP if we were ordered to handle. This will come up again and BP needs to be ready to take action. This is not an ICE issue.

Please see below message from OIC (b)(6); (b)(7)(C) as well. Let me know if you need anything further.

Greg

(b)(6);

This is one of the USMS rollovers to BP that was cleared for release. I advised BP that he was clear but they wanted to get approval from their CBP medical advisor first. (see attached email) CoreCivic stated that he was cleared for release yesterday.

Let me know if you need additional information.

Thanks,

Importance: High

I need to send out a clarification or update and take out the part about cohort of over 60 unless you still want us to do it.

That part was in there just because we did say that originally.

Any objections to me taking that out and resending?

Subject: COVID-19 Detained Docket Review-- Effective Immediately

This message is sent from Peter B. Berg, (a)Assistant Director, Field Operations

To: Field Office Directors and Deputy Field Office Directors

Subject: COVID-19 Detained Docket Review

Background:

U.S. Immigration and Customs Enforcement (ICE) has taken a number of significant and proactive measures in response to the Coronavirus Disease 2019 (COVID-19) pandemic, in order to mitigate the spread of COVID-19 to aliens detained in its custody, its workforce, and stakeholders at its detention facilities. As more becomes known about the virus, ERO will continue to update its practices and guidance in this regard. General ICE COVID-19 guidance is available [here](#) and will be updated and supplemented on an ongoing basis.

On March 18, 2020, you were directed to review the cases of aliens detained in your area of responsibility who were over the age of 70 or pregnant to determine whether continued detention was appropriate, as well as cohort detainees over the age of 60, to the maximum extent possible. The Centers for Disease Control and Prevention (CDC) has developed a [list](#) of categories of individuals identified as potentially being at higher-risk for serious illness from COVID-19. Expanding on that list, ERO has identified the following categories of cases that should be reviewed to re-assess custody:

- Pregnant detainees or those having delivered in the last two weeks
- Detainees over 60 years old
- Detainees of any age having chronic illnesses which would make them immune-compromised, including but not limited to:
 - Blood Disorders
 - Chronic Kidney Disease
 - Compromised immune system (e.g., ongoing treatment such as chemotherapy or radiation, received an organ or bone marrow transplant, taking high doses of corticosteroids or other immunosuppressant medications)
 - Endocrine disorders
 - Metabolic disorders
 - Heart disease
 - Lung disease
 - Neurological and neurologic and neurodevelopment conditions

As part of your ongoing application of the CDC's Interim Guidance on Management of Coronavirus Disease 2019 (COVID-19) in Correctional and Detention Facilities (available [here](#)), please identify all cases within your AOR that meet any of the criteria above and validate that list with assistance from IHSC or your Field Medical Coordinator to ensure the conditions listed are still present and do result in the detainee potentially having a higher risk for serious illness from COVID-19. After identifying a case as meeting any of the above criteria, you should review the case to determine whether continued detention remains appropriate in light of the COVID-19 pandemic.

The presence of one of the factors listed above should be considered a significant discretionary factor weighing in favor of release. To be clear, however, it may

not always be determinative. Field offices must remain cognizant of the requirements of mandatory detention. Section 236(c) of the Immigration and Nationality Act (INA) mandates the detention of certain categories of criminal and terrorist aliens during the pendency of removal proceedings. Such aliens may not be released in the exercise of discretion during the pendency of removal proceedings even if potentially higher-risk for serious illness from COVID-19. INA § 236(c); 8 C.F.R. § 236.1(c)(1)(i). Such aliens may only be released following a final order issued by an immigration judge, the Board of Immigration Appeals, or a federal court granting the alien relief, dismissing proceedings, or terminating proceedings. Similarly, pursuant to section 241(a)(2), certain criminal and terrorist aliens subject to a final order of removal may not be released during the 90-day removal period even if potentially higher-risk for serious illness from COVID-19. INA § 241(a)(2). For alien's subject to discretionary detention under section 236(a), please remember that release is prohibited, even if the alien is potentially higher-risk for serious illness from COVID-19, if such release would pose a danger to property or persons. 8 C.F.R. § 236.1(c)(8).

When reviewing cases of alien's subject to discretionary detention under 236(a), the following must be completed:

- **Cases involving any arrests or convictions for any crimes that involve risk to the public regardless of the date of arrest or conviction must be reviewed and approved by a Deputy Field Office Director (DFOD) or higher before a determination is made to release.**
 - Examples of crimes that involve a risk to the public include any crime that: involves any form of violence, driving while intoxicated, threatening behaviors, terroristic threats, stalking, domestic violence, harm to a child, or any form of assault or battery. This list is not intended to be comprehensive. If there is any doubt whether a crime involves risk to the public, consult with your Office of the Principal Legal Advisor (OPLA) field location and your respective Deputy Assistant Director for Domestic Operations before a custody redetermination is completed.
- You may consider the age of an arrest or conviction as a mitigating or an aggravating factor, but the age of an arrest or a conviction does not automatically outweigh public safety concerns.

With regard to arriving aliens and certain other aliens eligible for consideration of parole from custody, under current circumstances and absent significant adverse factors, the fact that an alien is potentially higher-risk for serious illness from COVID-19, may form the basis for a determination that “continued detention is not in the public interest,” justify release under 8 C.F.R. § 212.5(b)(5).

For other aliens for whom there is discretion to release, field offices remain responsible for articulating individualized custody determinations, taking into consideration the totality of the circumstances presented in the case. The fact that

an alien is potentially higher-risk for serious illness from COVID-19 should be considered a factor weighing in favor of release. You may also consider alternatives to detention consistent with ICE ATD policies, if ATD is determined to sufficiently mitigate the risk of flight.

Any releases attributed to reviews of COVID-19 susceptibility shall be documented in the ENFORCE Alien Removal Module (EARM) under Special Class - COVID-19 Chronic Care Release. As previously communicated, these individuals should be placed on ATD if possible.

Please contact your local OPLA field location should you have any questions or concerns regarding your authority to release in any individual case.

For any questions on this guidance, please contact your respective Deputy Assistant Director for Domestic Operations.

Limitation on the Applicability of this Guidance. This message is intended to provide internal guidance to the operational components of U.S. Immigration and Customs Enforcement. It does not, is not intended to, shall not be construed to, and may not be relied upon to create any rights, substantive or procedural, enforceable at law by any person in any matter, civil or criminal.

Subject: COVID-19 Special Class in EARM to track releases

Good morning:

We continue to scrub cases and added a code in EARM to track these cases. LESA also went back and added that special code to the original group of over-60, over-70 and pregnant cases to compile one list.

As of April 10, 2020, 693 cases have been released with the largest amount coming from NYC AOR with approximately 140 releases. We are separately tracking cases that have been ordered release by a district court judge. Those numbers will be available Tuesday. We will ensure cases are not on both lists as we have already found a few during our review. The 693 number will be updated on your briefing paper for the CHS member briefing.

Happy Easter!

Henry
