Re: **20-cv-01367-RCL**
American Oversight v. Department of Homeland Security et al.
13th Interim Release for DHS FOIA Litigation No. 2020-HQLI-00030

Dear Ms. Lewis:

This is our 13th interim release of records related to your Freedom of Information Act (FOIA) request to the Department of Homeland Security (DHS), received on March 19, 2020.

For this production the DHS reviewed 504 pages of potentially responsive records. Of those 504 pages the DHS has determined that 502 pages are responsive to your request. The DHS has determined to withhold in part 308 pages, pursuant to FOIA Exemptions (b)(5), (b)(6) and (b)(7)(c). 43 pages are being sent to other Federal agencies for consultation. 107 pages were found to be duplicates. Further, 19 pages will be released to you in full. **Bates Numbers begins with DHS-PRIV – 4159 through DHS- PRIV – 4662.**

If you have any questions regarding this release, please contact Andrew Freidah, United States Department of Justice's Civil Division, Federal Programs Branch, at Andrew.f.freidah@usdoj.gov.

Sincerely,

A handwritten signature in black ink that reads "Eric A. Neuschaefer".

Eric A. Neuschaefer
Senior Director, FOIA Litigation, Appeals, Policy,
and Training (Acting)

Enclosed: 504 pages

No issues with the edits and I found a couple typos. OPLA would like to see whatever public facing messages we include on ice.gov, particularly as it relates to the mailing of stay applications. (b)(5)

(b)(5) Otherwise we are good to go.

As a follow-up, attached are the consolidated FMC report for the IGSA's and the report for IHSC-staffed facilities which recalculates as follows for all facilities:

Totals for IHSC-staffed and IGSA's

Positive = 941
 Negative = 1484
Pending = 330
 Total = **2755**

Broken out below:

IHSC-staffed facilities:

Positive = 472
 Negative = 968
Pending = 98

Total = **1538**

IGSAs top 37 numbers as provided by CMD:

Positive = 469

Negative = 516

Pending = 232

Total = **1219**

(b)(6); (b)(7)(C) - attached are the talking points where the above numbers are integrated.

GM -

Attached is a list of all the detainees that have a documented COVID lab in eCW for IHSC-staffed facilities. These are inclusive of LabCorp sent out tests and the Abbott ID NOW test. My team ran the report from January 1, 2020 – May 20, 2020. There are 4 tabs:

- Tab 1 Cumulative Report - this includes all detainees regardless of results = **1538**
 - Tab 2 Positive Tests – includes all detainees with a documented positive result = 472
 - Tab 3 Negative Tests – includes all detainees with a documented negative result = 968
 - Tab 4 Pending Results – includes all detainees that are waiting for test results = 98

I should have the numbers later today for the same time frame for all IGSAs. (b)(5)

In keeping with our new posture of reporting up when an office is closed, Baltimore and Salisbury both will be closed due to employee exposures. This plan was developed in conjunction with Workforce Management.

Sir

Be advised that the ERO Baltimore Salisbury sub-office is on a mandatory 14 day quarantine due to an employees mother having been confirmed with Covid-19. I spoke with (b)(6); (b)(7)(C) from HQ safety and they advised that this is the course I must take with the office.

(b)(7)(E) With this closure the entire Baltimore office is now closed for at least 14 days. For Salisbury the closure is effective today March 21.

There are a total of (b)(6); (b)(7)(C) employee's affected. The employee whose mother was confirmed has contacted the Wicomico Department of Health and advised that unless he develops symptoms that they will not perform a test on him so because they will not test him we will have to complete the full 14 day quarantine.

(b)(5)

I will add this to the daily report when I submit tomorrow morning.

If you require additional information please let me know.

Sent: Friday, March 20, 2020 2:32 PM

To: Meade, Michael W [REDACTED]@ice.dhs.gov>; [REDACTED]
 [REDACTED]@ice.dhs.gov>
Cc: [REDACTED]@ice.dhs.gov>
Subject: ERO BAL Possible COVID-19 exposure

Please see ERO BAL's response below:

The ERO Baltimore Field Office has a potential exposure to COVID-19, related to two Deportation Officers (married couple) whose two-year old child took ill on the night of March 19, 2020. In the morning of March 20, 2020, the family went to a local, Maryland hospital, where the attending doctors identified COVID-19 symptoms (absent presence of the flu) in the child, and performed a COVID-19 test. The couple related that the hospital staff informed them that the results of the test should take four days to come back, and they subsequently quarantined the family for 14 days, or until the results for COVID-19 test on the child come back negative. The couple has been advised to notify this office when the results return, and to refrain from coming to the office during their quarantine period.

[REDACTED]
 (b)(6);
 (b)(7)(C)

Both of the officers work on separate ERO occupied floors [REDACTED] within the [REDACTED] and have had exposure to the majority of the ERO and contractor staff (approximately [REDACTED] employees) working at, and within the Fallon building. Both officers have used public restrooms, shared office galley kitchens, etc. It is reasonable, under current COVID-19 guidance and the guidance provided by both [REDACTED] from HQ Occupational Health and Safety, that temporary quarantine of the ERO Baltimore Office for potential COVID-19 exposure is advised. However, if the test results come back negative we can cancel the self quarantine and have our staff return to work.

[REDACTED]
 (b)(7)(E)

The Baltimore Field Office does maintain a sub-office in Salisbury, Maryland, and none of the staff at the sub-office were exposed to the officers with the sick child. The sub-office will maintain critical operations and reporting for the field office until such time as the test results are known or the 14 day quarantine period has expired.

ERO Baltimore contacted and advised EOIR Baltimore, OCC Baltimore, HSI Baltimore, the Baltimore GSA, FEB and FPS, and our CRO who in turn will notify our outside stakeholders ie: AILA, CAIR, etc of the situation.

Further updates will be forthcoming as they are revealed.

 (b)(6); (b)(7)(C) @ice.dhs.gov>
Subject: Baltimore Possible COVID-19 exposure

Gentlemen,

After speaking to (b)(6); (b)(7)(C) from HQ safety and occupational health, I have been advised to notify my staff in the Baltimore AOR who work in the Fallon building that due to

a possible exposure to COVID-19 (two married Deportation Officers have a child who was tested after exhibiting symptoms today) to go home immediately and self quarantine for 14 days or at least until we get the test results back on Tuesday. The Salisbury sub office is approximately 2 hours from here and have not been exposed to these officers anytime recently according to AFOD (b)(6); (b)(7)(C). We will also notify our contract transportation services, OPLA, EOIR, GSA and FPS just to be on the safe side. DFOD (b)(6); (b)(7)(C) will notify JIOC.

Will a SIR be necessary or is this notification sufficient?

Please advise and thank you.

I agree with (b)(6). Things have changed and we have evolved in our response. Who knows what the next two weeks will look like. If we create this overarching policy tomorrow will we be held to it a week later when circumstances have changed enough that it is no longer useable? This seems like a legal strategy that is more useful in an emergency that is no longer evolving. Meaning, emergent situation arises and then stabilizes into a steady state, we then adapt and create a policy to address that is useful for the rest of the emergent situation. I'm not sure we are at that steady state yet.

Subject: Current CAC COVID-19 Status

All,

CAC COVID-19 update. As of this morning, there is one new positive case from (b)(7)(E) 4/17/20, (b)(7)(E) This mission has previously had 3 positive COVID-cases reported, so this is not a new mission.

2 new tests pending.

1 Presumed positive under quarantine (symptomatic, spouse tested positive)

1 new return to duty.

Subject: Current CAC COVID-19 Status

All,

Below is the current CAC COVID-19 Status with positive cases and tests pending.

Contractors cleared by health provider to return to duty highlighted green.

The new positive cases are highlighted red.

One of the new MIA positive cases was initially reported yesterday. There is now a second positive case from the same mission. (b)(7)(E) 4/9/20, (b)(7)(E)

New BRO case is a BRO Site manager. He did not not fly on an ICE flight. The last mission he was present in BRO was (b)(7)(E) on 4/17/20.

Two new tests pending.

Positic	HUE	Compa	C19 Status	Mission	Date	Result Da	Work Status	4/24/2020

(b)(6); (b)(7)(C) (b)(6); (b)(7)(C)

A SDDO at the Denver office has been sick, and boyfriend in the hospital. Both have been tested for COVID-19 with results anticipated by March 31. (b)(6); (b)(7)(C) consulted with workforce and based on their recommendations, he will be closing the field office location and sending the below message to his personnel (also reviewed by Workforce). It is a total of 92 employees at the field office. Office will be closed until April 1.

Mike

Subject: Another exposure at the office.

One of our SDDOs has become pretty sick the last few days. Her boyfriend is worse and is getting admitted to the hospital for breathing issues (he has underlying health issues as well). She was last in the office on Thursday and she was all over the building. The doctor performing her tests believe she and her boyfriend have COVID based on the outward signs. They administered a test and it is supposed to be back by March 31st. If she is truly symptomatic she may have exposed everyone in the building. I have employees that were around her complaining they are feeling ill.

Subject: Detainee Tests Positive for COVID-19 Puerto Rico

Good evening Ricardo,

As we do not have an over 72 hour facility to hold a low level detainee on the island of Puerto Rico and given we have been unable to secure sponsorship or housing due to testing positive for COVID-19, ERO Miami is requesting HQ assistance in finding a resource to transport him from Puerto Rico to Florida and eventual transfer to an over 72 hour detention facility in the Miami area. Here is the case synopsis:

On May 12, 2020, Border Patrol (BP) agents responded to a maritime smuggling event that took place at National Fish and Wildlife Refuge in Cabo Rojo, Puerto Rico. BP encountered (b)(6); (b)(7)(C) a 29 year old citizen of Colombia with a date of birth of (b)(6); (b)(7)(C) at the refuge and issued him a Notice and Order of Expedited Removal, Form I-860, charging removability pursuant to Sections 212(a)(6)(A)(i) of the Immigration and Nationality Act (INA) as an alien present without admission or parole.

On May 13 2020, BP turned (b)(6); (b)(7)(C) over to ERO Miami San Juan sub-office (SAJ) where he was housed at San Juan Staging (SJS) Facility (under 72 hour facility) in San Juan, Puerto Rico.

On May 17, 2020, ERO Miami (SAJ) attempted to transfer (b)(6); (b)(7)(C) to the Broward Transitional Center (BTC) in Pompano Beach, Florida. On the same date, the airline cancelled the flight and rescheduled it for May 21, 2020.

On May 21, 2020, ERO Miami (SAJ) attempted to transfer (b)(6); (b)(7)(C) to BTC. Upon arrival at the airport, government officials with the Puerto Rico Health Department questioned (b)(6); (b)(7)(C) as part of a boarding procedure for passengers departing PR. The health department conducted a rapid COVID 19 test and the results came back positive. As a result of the positive test, the airline refused to board (b)(6); (b)(7)(C)

ERO Miami (SAJ) staff attempted to return (b)(6); (b)(7)(C) to SJS but the facility had been closed down due to the air conditioning needing repair.

ERO Miami (SAJ) attempted to secure a hotel room and has also reached out to several known NGOs to find placement as (b)(6); (b)(7)(C) has no contacts on PR. Due to his testing positive for COVID-19, ERO Miami (SAJ) has been unsuccessful in securing a sponsor or locating a hotel for temporary housing. ERO Miami (SAJ) is currently housing (b)(6); (b)(7)(C) at San Patricio hold room in Guaynabo, Puerto Rico. (b)(6); (b)(7)(C) will be transferred to the Aguadilla sub-office which has a dormitory and shower facilities making it a better temporary option over the hold room in San Patricio.

Please let me know if you need any additional information.

Thanks,

(b)(6);
(b)(7)(C)

Good afternoon, (b)(6)

What is the status of DHS's response to our letter? Given the declaration of a national emergency and news that an employee at one of ICE's detention centers is being tested for COVID-19, it is imperative that we hear directly from DHS about how it intends to manage this crisis in its facilities.

Our letter requested a briefing and document production no later than this Wednesday. Does DHS intend to meet that deadline?

Thank you.

March 20, 2020

MEMORANDUM FOR: Detention Wardens and Superintendents

THROUGH: Field Office Directors

FROM: Enrique M. Lucero ENRIQUE M. LUCERO JR. Digitally signed by Enrique M. Lucero, Jr. DN: cn=Enrique M. Lucero, o=U.S. Department of Homeland Security, email=enrique.m.lucero@dhs.gov
Executive Associate Director
Enforcement and Removal Operations

SUBJECT: Memorandum on Novel Coronavirus (COVID-19) Action Plan

Background:

U.S. Immigration and Customs Enforcement (ICE) is monitoring the increase of the Novel (new) Coronavirus (COVID-19) and continues to work in conjunction with select Component leaders and the Acting Secretary to implement a mitigation strategy.

To ensure a unified preventative response, the ICE Enforcement and Removal Operations (ERO), ICE Health Service Corps (IHSC), Custody Management Division, and Field Operations are providing the following guidance. The combination of a dense and highly transient detained population places ICE facilities at a higher risk of infection and transmission. Consequently, these measures were developed to reduce exposure to COVID-19, protect the detained population, and ensure staff remain healthy and available for duty.

This memorandum only applies to ICE-dedicated facilities. For intergovernmental partners and non-dedicated facilities, ICE defers to local, state, tribal, territorial, and federal public health policies and authorities, including adherence with state laws on communicable disease reporting. Questions and concerns related to the following Action Plan can be addressed to:

(b)(7)(E) [redacted]@ice.dhs.gov.

Action Plan:

STAFF HIRING: Wardens and facility staff should continue to meet any personnel staffing plan and staffing criteria outlined in the Performance Work Statement (PWS) and terms and conditions of their negotiated contract or agreement for medical staff and guard services. Facilities are expected to be appropriately staffed to meet established work schedules, contact and work relief, rest periods, and starting and stopping work, to include ensuring the delivery of detainee medical and mental health care as it relates to the continually evolving impact of COVID-19.

Memorandum on ICE Coronavirus Response Plan and Directives

Page 2

LOGISTICS: Wardens and Facility Administrators should assess their inventories of food, medicines, cleaning supplies, personal protective equipment (PPE), and facility operational practices to have sufficient services and supplies at all times to assure the safety, security, health, and wellbeing of ICE detainees. Facilities should have updated pandemic plans and policies and have established quarantine and/or isolation areas within their facilities in case they are needed.

SOCIAL VISITATION: As of March 13, 2020, social visits to/with ICE detainees at all detention facilities are suspended until further notice in order to mitigate the potential transmission of COVID-19. ICE recognizes the considerable impact of suspending personal visitation, and requests service providers that currently offer teleconferencing, video visitation (e.g., Skype, Facetime), email and/or tablets to detainees, increase use of these communication services, with extended hours where possible.

Detention facilities should make a timely effort to identify indigence in the detainee population to ensure indigent detainees are afforded the same telephone access and telephone-related privileges as other detainees. A detainee is considered “indigent” if he/she has less than \$15.00 in his/her account for 10 days. Each facility must ensure all detainees are able to make calls to the ICE-provided list of free legal service providers and consulate at no charge to the detainee or the receiving party, and that indigent detainees may request a call to immediate family or others in personal or family emergencies or on an as-needed basis to maintain community ties.

LEGAL VISITS: Detainee access to legal counsel remains a paramount requirement and should be accommodated to the maximum extent practicable. Unless and until it is determined to pose a risk to the safety and security of the facility, legal visitation will continue.

Non-contact legal visitation (e.g., Skype or teleconference) should be offered first to limit exposure to ICE detainees, but if the attorney believes the legal visit requires contact, the facility should permit the visit. For in-person visits to occur, the attorney must undergo screening using the same procedures as staff. ICE will require all legal visitors to provide and wear PPE (e.g., gloves, N-95 masks, and eye protection) while visiting any facility. Visitors may also be required to go through similar testing as employees of the detention facility. The overall authority to approve legal visits lies with the Warden or Facility Administrator; however, the facility should notify its local Field Office Director as soon as possible of any denied legal visits.

LEGAL RIGHTS GROUP PRESENTATIONS: Government-sponsored Legal Orientation Programs (LOPs) carried out by the Department of Justice Executive Office of Immigration Review (EOIR) and authorized by congressional appropriations currently operate at a limited number of detention sites and may continue to make presentations to detainees. No more than four LOP presenters may be allowed in the facility at any time and they will need to undergo screening using the same procedures as staff. ICE will require all legal visitors to provide and wear PPE (e.g., gloves, N-95 masks, and eye protection) while visiting any facility. Non-LOP legal rights group presentations offered by volunteers are suspended until further notice.

STAFF-DETAINEE COMMUNICATION VISITS: Detainees should continue to have frequent opportunities for informal contact with facility managerial and supervisory staff and

Memorandum on ICE Coronavirus Response Plan and Directives

Page 3

with ERO field office staff. Regular communication is particularly important at a time when feelings of fear and confusion are experienced by many detainees.

Field Office Directors should monitor that both facility staff and ERO officers continue to interact with detainees. ICE staff-detainee communication may be conducted in-person (with appropriate PPE to protect ERO officers, detainees, and facility staff) or through non-contact visitation using videoconferencing, phone calls, e-mail, or other communication services.

ICE staff-detainee communication contact visits to remotely located detention facilities requiring ERO officers to fly or take public transportation as part of the route are suspended until further notice. Essential services include, for example, medical and mental health services, telephone access, cleaning, laundry, waste disposal, and critical infrastructure repairs.

CONTRACTORS: Contractors performing essential services or maintenance on essential systems in ICE detention facilities must continue to be provided facility access, and should be screened prior to entry by the same screening procedures used for staff. Examples of essential services include medical and mental health services, telephone access, cleaning, laundry, waste disposal, and critical infrastructure repairs.

Facility annual inspections by the ICE inspections contractor, The Nakamoto Group, are suspended for 30 days from the issuance date of this memorandum.

VOLUNTEERS: Volunteer visits to ICE detention facilities are suspended until further notice unless approved by the Assistant Directors for Field Operations and Custody Management. The exception to this suspension is the Chaplain who, if a volunteer, should continue to be available to provide pastoral care and counseling to detainees who request it, both through group programs and individual services. To conduct counseling or in-person services, the Chaplain must undergo screening using the same procedures as staff. Other volunteers, contractors, and community groups that augment and enhance the religious program are suspended until further notice to reduce the risk of possible transmission of COVID-19 to detainees.

TOURS: Facility tours are suspended until further notice, excluding Members of Congress, Congressional Member Delegations (CODELs), and Congressional Staff Delegations Delegations (STAFFDELS) who will not be prevented from accessing facilities for the purpose of conducting oversight. To safeguard visitors, detainees, ICE and facility staff, congressional visitors may be subject to special screening procedures, including undergoing testing similar to that administered to facility employees. Congressional visitors may also be required to wear protective equipment and should be advised of standard hygiene practices to help prevent the spread of disease (i.e., washing hands and avoiding close contact) and should be made aware of available washrooms within the facility.

STAFF TRAINING: All ERO in-person staff training related to the ICE detention standards or facility compliance is suspended until further notice, to include conferences, Contracting Officer Representative (COR) training, and Field Office Compliance Training.

Wardens and Facility Administrators will determine the training schedule for facility staff.

Memorandum on ICE Coronavirus Response Plan and Directives

Page 4

All staff licenses and certifications are required to be up to date.

SCREENING OF FACILITY STAFF: Enhanced health screening of both ICE and facility staff should be implemented by ICE detention facilities in areas with “sustained community transmission.” “Sustained community transmission” is determined by the Centers for Disease Control and Prevention (CDC) and information is available on [this resource page](https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html): <https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html>. Such screening includes self-reporting and temperature checks.

Wardens and Facility Administrators in those areas should work with their Health Services Administrator to designate a qualified health care professional to be available on all shifts to administer and record temperature checks. The health care professionals should take care to protect the privacy of each person being screened. Employees performing the screening must have appropriate PPE, to include the N-95 respirator, face shield/goggles, gloves, and a gown.

Given the public health emergency, staff who refuse the enhanced health screening should be denied entry to the facility. If staff register an oral temperature of greater than or equal to 100.4 degrees (Fahrenheit), they should be denied entry to the facility and placed on Weather and Safety leave.

DETAINEE SCREENING: IHSC developed guidance for IHSC-staffed facilities to help in the risk assessment and management of detained individuals with potential exposure to COVID-19, and this guidance was disseminated to ICE detention facilities for possible adoption at their sites. Version 6.0, issued March 6, 2020, addresses intake medical screenings, monitoring, encounters, laboratory testing, and public health actions. The CDC remains the authoritative source for information about how to protect individuals and reduce exposure to the virus. ICE continues to encourage facilities to follow CDC guidelines as well as those of their state and local health departments.

ICE requests that Wardens and Facility Administrators ensure ICE detainees are given guidance and educated in a language that they fully understand on basic hygiene measures to keep themselves healthy. Links for detainee/patient education resources in multiple languages are included in the IHSC guidance and information on the CDC website.

MODIFIED OPERATIONS: Wardens and Facility Administrators should implement modified operations to maximize social distancing in our facilities, as much as practicable. For example, Wardens and Facility Administrators should consider staggered mealtimes and staggered recreation times in order to limit congregate gatherings.

Any community service projects should also be suspended until further notice. Anyone entering the facility should be advised of standard hygiene practices to help prevent the spread of disease (i.e., washing hands and avoiding close contact) and should be made aware of available washrooms within the facility.

Anyone seeking to enter an ICE detention facility should be subject to additional, enhanced screening procedures.

Memorandum on ICE Coronavirus Response Plan and Directives

Page 5

If this guidance creates any contractual issues, please reach out to your respective Contracting Officer.

U.S. Immigration and Customs Enforcement

COVID-19 Best Practices for Detention Facilities

Detention facilities are complex, multi-employer settings that include government and private employers. Each is organizationally distinct and responsible for its own operational, personnel, and occupational health protocols and may be prohibited from issuing guidance or providing services to other employers or their staff within the same setting. In addition, detention facilities may house individuals from multiple law enforcement agencies or jurisdictions with differing policies and procedures.

There are many opportunities for COVID-19 to be introduced into a detention facility, including daily staff ingress and egress; transfer of detained persons between facilities and systems, to court appearances, and outside medical visits; and visits from family, legal counsel, and other community members. Some settings, particularly jails and detention centers, have high turnover, admitting new entrants daily who may have been exposed to COVID-19 in the surrounding community.

Symptoms of COVID-19 include fever, cough, and shortness of breath. Like other lower respiratory infections, COVID-19 can vary in severity from mild to severe. When severe, pneumonia, respiratory failure, and even death are possible. COVID-19 is a novel disease, therefore the full range of signs and symptoms, the clinical course of the disease, and the individuals and populations most at risk for disease and complications are not yet fully understood. Monitor the **CDC website** for updates on these topics.

The following serves as guidelines or best practices that all detention facilities should follow and focus on preparedness, prevention, and management.

Preparedness. This guidance is intended to help facilities prepare for COVID-19 transmission in the facility and focus on operational and communications planning, reinforcing hygiene practices, intensifying cleaning and disinfection of the facility, and monitoring for potential cases.

1) Develop information-sharing systems with partners.

- Identify points of contact in relevant state, local, tribal, and/or territorial public health department before cases develop.
- Communicate with other correctional and detention facilities in the same geographic area to share information including disease surveillance and absenteeism patterns among staff.

2) Review existing pandemic flu, all-hazards, and disaster plans, and revise for COVID-19.

- Ensure that physical locations (dedicated housing areas and bathrooms) have been identified to isolate confirmed COVID-19 cases and individuals displaying COVID-19 symptoms, and to quarantine known close contacts of confirmed cases.

U.S. Immigration and Customs Enforcement

COVID-19 Best Practices for Detention Facilities

(Isolation and quarantine locations should be separate.) The plan should include contingencies for multiple locations if numerous cases and/or contacts are identified and require isolation or quarantine simultaneously.

- Facilities without onsite healthcare capacity should plan for how they will ensure that suspected COVID-19 cases will be isolated, evaluated, tested (if indicated), and provided necessary medical care.

3) Offer the seasonal influenza vaccine to all detained persons (existing population and new intakes) and staff throughout the influenza season.

4) Staffing:

- Review sick leave policies to ensure that staff can stay home when sick and determine which officials will have the authority to send symptomatic staff home. Staff who report for work with symptoms of COVID-19 should be sent home and advised to follow [CDC-recommended steps for persons who are ill with COVID-19 symptoms](#).
- Staff who test positive for COVID-19 should inform their workplace and personal contacts immediately. If a staff member has a confirmed COVID-19 infection, the relevant employers should inform other staff of their possible exposure to COVID-19 in the workplace but maintain confidentiality as required by the Americans with Disabilities Act (ADA). Exposed employees should then self-monitor for [symptoms](#) (i.e., fever, cough, or shortness of breath).
- Identify staff whose duties would allow them to work from home. This is an effective social distancing strategy to reduce the risk of COVID-19 transmission.
- Determine minimum levels of staff in all categories required for the facility to function safely.

5) Supplies: Ensure that sufficient stocks of hygiene supplies (soap, hand sanitizer, tissues), personal protective equipment (PPE) (to include facemasks, N95 respirators, eye protection, disposable medical gloves, and disposable gowns/one-piece coveralls), and medical supplies (consistent with the healthcare capabilities of the facility) are on hand, and have a plan in place to restock as needed if COVID-19 transmission occurs within the facility.

- Note that shortages of N95 respirators are anticipated during the COVID-19 response. Based on local and regional situational analysis of PPE supplies, face masks should be used when the supply chain of respirators cannot meet the demand.

U.S. Immigration and Customs Enforcement

COVID-19 Best Practices for Detention Facilities

- Soiled PPE items should be disposed in leak-proof plastic bags that are tied at the top and not re-opened. Bags can be disposed of in the regular solid waste stream.

6) **Cleaning/Disinfecting Practices:** Adhere to CDC recommendations for cleaning and disinfection during the COVID-19 response.

- Several times a day using household cleaners and EPA-registered disinfectants, clean and disinfect surfaces and objects that are frequently touched, especially in common areas (e.g., doorknobs, light switches, sink handles, countertops, toilets, toilet handles, recreation equipment).
- Staff should clean shared equipment several times per day and on a conclusion of use basis (e.g., radios, service weapons, keys, handcuffs).
- Ensure that transport vehicles are thoroughly cleaned after carrying a confirmed or suspected COVID-19 case.

7) **Hygiene:** Reinforce healthy hygiene practices and provide and restock (as feasible) hygiene supplies throughout the facility, including in bathrooms, food preparation and dining areas, intake areas, visitor entries and exits, visitation rooms, common areas, medical, and staff-restricted areas (e.g., break rooms).

- Encourage all persons within the facility to cover their mouth and nose with their elbow (or ideally with a tissue) rather than with their hand when they cough or sneeze, and to throw all tissues in the trash immediately after use. Provide detained persons and staff no-cost access to tissues, and no-touch receptacles for disposal.
- Encourage all persons within the facility to maintain good hand hygiene by regularly washing their hands with soap and water for at least 20 seconds, especially after coughing, sneezing, or blowing their nose; after using the bathroom; before eating or preparing food; before taking medication; and after touching garbage.
- Provide detained persons and staff no-cost, unlimited access to supplies for hand cleansing, including liquid soap, running water, hand drying machines or disposable paper towels, and no-touch trash receptacles.
- Provide alcohol-based hand sanitizer with at least 60% alcohol where permissible based on security restrictions.
- Encourage all persons within the facility to avoid touching their eyes, nose, or mouth without cleaning their hands first.

U.S. Immigration and Customs Enforcement

COVID-19 Best Practices for Detention Facilities

- Post signage throughout the facility reminding detained persons and staff to practice good hand hygiene and cough etiquette (printable materials for community-based settings can be found on the [CDC website](#)).
- Discourage sharing of eating utensils, dishes, and cups.
- Discourage non-essential personal contact such as handshakes, hugs, and high-fives.

Prevention. This guidance is intended to help facilities prevent spread of COVID-19 from outside the facility to inside. Social distancing is critical by increasing the space between individuals and decrease the frequency of contact to reduce the risk of spreading a disease. Additional information about social distancing, including information on its use to reduce the spread of other viral illnesses, is available in this [CDC publication](#).

1) Perform pre-intake screening for all new entrants for symptoms of COVID-19.

Ideally, screening should take place before new intakes enter the facility or just inside the facility, before beginning the intake process, in order to identify and immediately isolate any individuals with symptoms. This includes temperature screening of all new entrants.

- **If an individual has symptoms of COVID-19** (fever, cough, shortness of breath):
 - Require the individual to wear a face mask.
 - Ensure that staff interacting with the symptomatic individual at a distance of <6 feet wear recommended PPE.
 - Isolate the individual and refer to healthcare staff for further evaluation.
 - Facilities without onsite healthcare staff should contact their state, local, tribal, and/or territorial health department to coordinate effective isolation and necessary medical care.
- **If an individual is a close contact of a known COVID-19 case or has traveled to an affected area (but has no COVID-19 symptoms):**
 - Quarantine the individual and monitor for symptoms two times per day for 14 days.

2) Visitations:

- Suspend or modify visitation programs, if legally permissible, and provide access to virtual visitation options where available. If suspension of visitations is not

U.S. Immigration and Customs Enforcement

COVID-19 Best Practices for Detention Facilities

possible, verbally screen all visitors and volunteers on entry for symptoms of COVID-19 and perform temperature checks.

- Communicate with the public about any changes to facility operations, including visitation programs. Most facilities should have restricted or prohibited visitation programs.

3) Restrict transfers of detained persons to and from other jurisdictions and facilities unless necessary for medical evaluation, isolation/quarantine, clinical care, or extenuating security concerns.

4) Implement virtual court appearances where permissible.

5) Consider social distancing options to increase the physical space between detained persons and to limit interactions in large group settings. Strategies will need to be tailored to the individual space in the facility and the needs of the population and staff. Not all strategies will be feasible in all facilities. Example strategies with varying levels of intensity include:

- Enforce increased space between individuals in holding cells, as well as in lines and waiting spaces
- Stagger time in recreation spaces
- Stagger meals, and rearrange seating in the dining hall so that there is more space between individuals
- Limit the size of group activities
- Increase space between individuals during group activities
- If space allows, reassign bunks to provide more space between individuals, ideally ≥ 6 feet in all directions. (Ensure that bunks are cleaned thoroughly if assigned to a new occupant.)
- Arrange bunks so that detained persons sleep head to foot to increase distance.
- Suspend group programs where participants are likely to be in close contact.
- Rearrange scheduled movements to minimize mixing of individuals from different housing areas.
- Provide meals inside housing units.
- Restrict recreation space usage to a single housing unit per space (where feasible).

U.S. Immigration and Customs Enforcement COVID-19 Best Practices for Detention Facilities

- If possible, designate a room near each housing unit to evaluate sick individuals rather than having them walk through the facility to be evaluated in the medical unit. If this is not feasible, consider staggering sick call.

6) Consider suspending work release programs.

7) When feasible and consistent with security priorities, encourage staff to maintain a distance of 6 feet from an individual with respiratory symptoms while interviewing, escorting, or interacting in other ways.

Management. This guidance is intended to help facilities clinically manage confirmed and suspected COVID-19 cases and their close contacts inside the facility and prevent further transmission.

1) Suspend all transfers of detained persons to and from other jurisdictions and facilities (including work release), unless necessary for medical evaluation, isolation/quarantine, care, or extenuating security concerns.

2) Consider quarantining all new entrants for 14 days before they enter the general population.

- **For suspected or confirmed COVID-19 cases:**

- Ensure that the individual is wearing a face mask at all times when outside of the isolation space, and whenever another individual enters the isolation room. Masks should be changed at least daily, and when visibly soiled or wet.
- Isolate the individual immediately in a separate environment from other individuals. Facilities should make every possible effort to isolate persons individually. Each isolated individual should be assigned their own housing space and bathroom where possible. Cohorting should only be practiced if there are no other available options. **Only individuals who are laboratory confirmed COVID-19 cases should be isolated as a cohort. Do not cohort confirmed cases with suspected cases or case contacts.**

3) If the number of confirmed cases exceeds the number of individual isolation spaces available in the facility, be especially mindful of cases who are at higher risk of severe illness from COVID-19. Ideally, they should not be cohorted with other infected individuals. If cohorting is unavoidable, make all possible accommodations to prevent transmission of other infectious diseases to the higher-risk individual. (For example, allocate more space for a higher-risk individual within a shared isolation room.)

4) Custody staff should be designated to monitor these individuals exclusively where possible. These staff should wear recommended PPE when interacting with infected individuals and should limit their movement between different parts of the facility to the extent possible.

U.S. Immigration and Customs Enforcement

COVID-19 Best Practices for Detention Facilities

5) Maintain isolation until all the following criteria have been met:

- The individual has been free from fever for 72 hours without the use of fever-reducing medications
- The individual's other symptoms have improved (e.g., cough, shortness of breath)
- The individual has tested negative in at least two consecutive respiratory specimens collected at least 24 hours apart
- At least 7 days have passed since the date of the individual's first positive COVID-19 test and has had no subsequent illness.

6) Thoroughly clean and disinfect all areas where the infected individual spent time. (e.g., cells, bathrooms, and common areas) used by the infected individual, focusing especially on frequently touched surfaces. A list of products that are EPA-approved for use against the virus that causes COVID-19 is available [here](#). Follow the manufacturer's instructions for all cleaning and disinfection products (e.g., concentration, application method and contact time, etc.).

7) Meals should be provided to COVID-19 cases in their isolation rooms. Isolated cases should throw disposable food service items in the trash in their isolation room. Non-disposable food service items should be handled with gloves and washed with hot water or in a dishwasher. Individuals handling used food service items should clean their hands after removing gloves.

8) Laundry from a COVID-19 case can be washed with other individuals' laundry.

- Individuals handling laundry from COVID-19 cases should wear disposable gloves, discard after each use, and clean their hands after.
- Do not shake dirty laundry. This will minimize the possibility of dispersing virus through the air.

Thanks,

John

Subject: RE: Drafting Title 8 Materials

Thank you, Kristin. This is a lot of helpful content. It's probably a bit more detailed than what we need for Tuesday, but very helpful for identifying the particular problems posed by a large detained population that is potentially infected with COVID-19. Once we've seen USBP's input, let's talk about how to combine and uplevel so that we are providing the right amount of justification without getting too mired in details. But for the call with HHS tomorrow, this is probably a good level of detail so that we can really focus on where the issues are.

I've taken the bullets below and tried to break them up into a slightly different organization. I've also added a bit of content based on my own understanding. Please take a look at this and let me know if I'm off base.

Subject: Re: Drafting Title 8 Materials

Ian has the right sense of urgency, though Monday morning seems a bit aggressive. Perhaps we could aim for midday Tuesday for a draft of the asylum IFR. It doesn't need to be long, but I think we want it's reach to be fully inclusive of the problem.

For the security finding, it would be helpful to see a rough outline of why we think processing folks at BP stations who potentially have COVID-19 would threaten the security of the US. I suspect we will have calls with HHS tomorrow or Sunday, so getting a rough outline soon would be helpful. I think I generally understand the concerns: (1) detaining sick aliens could infect entire BP facilities, and BP doesn't have the medical resources necessary to deal with large sick populations; and (2) it could get BP agents sick, which would take them off the line. This, in turn, would have a huge impact on national security of the US.

Subject: ERO NYC Detainee (b)(6); (b)(7)(C) Tested Positive for COVID-19

(b)(6);
(b)(7)(C)

ERO NYC reported their first COVID-19 positive detainee out of Bergen County Jail. They will completing a SIR tonight. This is for your visibility. Other detainees he was in contact with are being quarantined and monitored appropriately.

(b)(6);
(b)(7)(C)

(b)(6); (b)(7)(C) is a 31 year-old male citizen of Mexico is currently detained at Bergen County Jail, Hackensack, NJ since February 2020.

On an unknown date, place, and time, (b)(6); (b)(7)(C) entered the United States without being admitted or paroled.

(b)(6); (b)(7)(C) Subject had a previous arrest by the New York Police Department (NYPD) for public intoxication.

(b)(6); (b)(7)(C) On February 2020, ERO New York Fugitive Operations Unit arrested (b)(6); (b)(7)(C) and served him with an NTA charging inadmissibility pursuant to 212(a)(6)(A)(i) of the INA

Next hearing before EOIR April 2020

On March 23, 2020, (b)(6); (b)(7)(C) was taken to Hackensack University Medical Center (HUMC), Hackensack, NJ to rule out COVID-19. The test results came back positive. (b)(6); (b)(7)(C) will remain in HUMC for further treatment.

Thanks

Adding Tony for visibility.

Henry-

Attached please find comments and proposed edits to the draft ERO PRR document from OPLA and OGC HQ. Please note that OGC HQ shared the clean version to DOJ and HHS (noting that it had not been cleared by ICE leadership yet) and is expecting additional feedback from them. That said, we wanted to get you these comments and edits to avoid delaying your ability to review them.

Of course, let us know if you have any questions or need anything.

Thanks,

Adam V. Loiacono

Adding Tony for visibility.

Henry-

Attached please find comments and proposed edits to the draft ERO PRR document from OPLA and OGC HQ. Please note that OGC HQ shared the clean version to DOJ and HHS (noting that it had not been cleared by ICE leadership yet) and is expecting additional feedback from them. That said, we wanted to get you these comments and edits to avoid delaying your ability to review them.

Of course, let us know if you have any questions or need anything.

Thanks,

Subject: ERO Los Angeles - Positive COVID-19 case

Good afternoon Sir,

ERO Los Angeles is reporting a positive COVID-19 case at the Adelanto ICE Processing Center (APC) in Adelanto, CA.

(b)(6); (b)(7)(C) tested positive for COVID-19.

(b)(6); (b)(7)(C) is a transfer from the Lompoc Federal Correctional Institute in Lompoc, CA and was tested at Lompoc on 4/14/2020 positive, re-tested at Lompoc on 5/19/2020 negative. On 5/22/2020, (b)(6); (b)(7)(C) entered ERO custody at the APC and he was immediately placed in negative pressure room isolation and was tested on 5/25/2020. Test came back positive as of 5/28/2020.

SIR to follow.

Thank you,

Subject: ERO Miami Employee Tested Positive for COVID-19

Good morning Ricardo,

On April 6, 2020, an ERO Miami employee assigned to the Miramar Sub-Office notified ERO Miami management that he tested positive for COVID-19. The ERO Miami employee indicated he was tested for COVID-19 on March 29, 2020 and received a positive COVID-19 test result on April 6, 2020.

He last had contact with ERO Miami staff on March 20, 2020 and has been Teleworking and/or on leave since March 25, 2020. The ERO Miami employee indicated he began having flu like symptoms on March 27, 2020. The ERO Miami employee further indicated that he will be retested for COVID-19 on April 11, 2020 and should have the results on April 13, 2020. The ERO Miami employee has not been hospitalized and indicated to ERO Miami management that he will remain at home during the duration of the illness and await the test results. ERO Miami management reminded the employee of his Telework and leave options.

Thx

Subject: ERO Newark releases

(b)(6);
 (b)(7)(C)

The COVID related releases identified below all occurred following a thorough review of each case in light of the aliens' having one or more of the Risk Factors placing them at heightened risk of severe illness and/or death upon contracting the COVID-19 virus. We balanced this health risk with public safety concerns, mandatory detention, as well as case status. All releases were reviewed at least at the DFOD level after consultation with local facility medical professionals and IHSC. It should be noted that the virus was spreading quickly in the local facilities and in the community, and habeas lawsuits were being filed calling for the release of aliens-- 10 others of which were released by federal judges despite ICE denying release.

On April 2, 2020, at the request of ERO Newark a telephonic conversation with IHSC and local OPLA was conducted. IHSC reiterated the CDC Guidance in identifying higher risk detainees and the higher rate of mortality for those detainees based on COVID- 19 and that this was a very serious situation. (b)(5)

(b)(5)

(b)(5)

ERO Newark will continue to monitor these cases to ensure compliance with the conditions of release, pending litigation with US Court of Appeals and Board of Immigration Appeals as well as of foreign governments to secure a travel document and enforce the removal from the United States.

(b)(6); (b)(7)(C)

The IHSC FMC and the Essex County Correctional Facility Medical Authorities conducted an assessment of the subject's chronic diabetes medical condition and based on CDC guidelines determined that the subject was in the high risk vulnerability category for exposure to COVID-19. The subject was under a Final Order of Removal but had been granted a Stay of Removal from the United States Court of Appeals for the Third Circuit based on a Petition for Review. The subject had been arrested six times but had five of those convictions dismissed and the sole conviction was for Possession of a Handgun. He was released via OSUP with Electronic Monitoring. The Stay of Removal is still in effect at this time and he has not violated the conditions of his release.

(b)(6); (b)(7)(C)

The IHSC FMC and the Essex County Correctional Facility Medical Authorities conducted an assessment of the subject's chronic diabetes medical condition and based on CDC guidelines determined that the subject was in the high risk vulnerability category for exposure to COVID-19. Subject was in proceedings and awaiting a hearing before the Executive Office for Immigration Review. The subject had been arrested five times with the most serious conviction of Endangering the Welfare of a Child occurring in 1997 and resulting in three year probation. He was released ROR with Electronic Monitoring after establishing residence with his USC spouse. Subject has not violated the conditions of his release and is still in removal proceedings.

(b)(6); (b)(7)(C)

The IHSC FMC and the Essex County Correctional Facility Medical Authorities conducted an assessment of the subject's chronic diabetes medical condition and based on CDC guidelines determined that the subject was in the high risk vulnerability category for exposure to COVID-19. The subject was under a Final Order of Removal but had been granted a Stay of Removal from the United States Court of Appeals for the Third Circuit based on a Petition for Review. His arrest and conviction for Child Pornography and placement on probation was identified and he was released via OSUP with Electronic Monitoring upon establishing residence with his USC mother. The Stay of Removal is still in effect at this time and he has not violated the conditions of his release. (b)(5); (b)(7)(E)

(b)(5); (b)(7)(E)

(b)(6); (b)(7)(C)

The IHSC FMC and the Essex County Correctional Facility Medical Authorities conducted an assessment of the subject's chronic medical condition (hepatitis) and based on CDC guidelines determined that the subject was in the high risk vulnerability category for exposure to COVID-19. The subject was under a Final Order of Removal but had been granted a Stay of Removal from the United States Court of Appeals for the Third Circuit based on a Petition for Review. His arrest and conviction of Criminal Sexual

Contact was identified and he was released via OSUP with Electronic Monitoring upon establishing residence with his USC spouse. The Stay of Removal is still in effect at this time and he has not violated the conditions of his release. (b)(5); (b)(7)(E)

(b)(5); (b)(7)(E)

(b)(6); (b)(7)(C)

The IHSC FMC and the Hudson County Correctional Facility Medical Authorities conducted an assessment of the subject's chronic medical condition which include seizures and based on CDC guidelines determined that the subject was in the high risk vulnerability category for exposure to COVID-19. Subject was in removal proceedings and awaiting a hearing before the Executive Office for Immigration Review. The conviction for Causing Death while Driving with Suspended/Unlicensed was identified and she was released ROR with Electronic Monitoring after establishing residence with her USC spouse. Subject has not violated the conditions of her release and is still in removal proceedings. (b)(5); (b)(7)(E)

(b)(5); (b)(7)(E)

(b)(6); (b)(7)(C)

The IHSC FMC and the Essex County Correctional Facility Medical Authorities conducted an assessment of the subject's chronic asthma medical condition and based on CDC guidelines determined that the subject was in the high risk vulnerability category for exposure to COVID-19. The subject was under a Final Order of Removal but pending withholding only proceedings due to Reasonable Fear Determination. His arrest and conviction of Criminal Sexual Contact was identified. He was released based on POCCR review with OSUP with Electronic Monitoring upon establishing and confirming residence. Subject has not violated the conditions of his release and still pending withholding only proceedings. (b)(5); (b)(7)(E)

(b)(6); (b)(7)(C)

The IHSC FMC and the Essex County Correctional Facility Medical Authorities conducted an assessment of the subject's chronic medical conditions (hepatitis and hypertension), advanced age of 64, and based on CDC guidelines determined that the subject was in the high risk vulnerability category for exposure to COVID-19. The subject was under a Final Order of Removal but pending the travel document process with the Government of China. His arrest and conviction of Criminal Sexual Contact was identified and his release was under Post Order Custody Review via OSUP with Electronic Monitoring upon establishing residence and sponsorship. ERO Newark will continue to work with the Government of China to secure a travel document and enforce the removal from the United States. (b)(5); (b)(7)(E)

(b)(5); (b)(7)(E)

(b)(6); (b)(7)(C)

The IHSC FMC and the Essex County Correctional Facility Medical Authorities conducted an assessment of the subject's age of 55 and chronic medical condition, which included mental disorders, drug and alcohol dependence, hepatitis C, and based on CDC guidelines determined that the subject was in the high risk vulnerability category for exposure to COVID-19. The subject was under a Final Order of Removal but pending an MTR with the BIA. His arrest and convictions for loaded firearm, cocaine possession, use/possession of drugs, CDS on school grounds were identified and was released to OSUP with Electronic Monitoring upon establishing residence and sponsorship. ERO Newark will continue to monitor the pending MTR. (b)(5); (b)(7)(E)

Subject: ERO NOL COVID-19-Positive test-PPIPC

Hi Ricardo,

(b)(6);
(b)(7)(C)

Our second case for today is a COVID-19 positive detainee in Pine Prairie. This detainee arrived at Pine Prairie on April [REDACTED] as a transfer from the Alexandria Staging Facility. He and the other arriving detainees were immediately placed in cohort on April [REDACTED] and the staff followed all COVID-19 PPE protocols.

(b)(6);
(b)(7)(C)

On April 14, 2020 the detainee reported to the nurse during the morning pill pass that he felt feverish. The nurse checked the detainee's temperature and noted it to be 100.0. The detainee was brought to medical for evaluation, where he complained of fever, chills, headache, and shortness of breath. The facility M.D. tested the detainee for the flu, which was negative. A specimen was collected for COVID-19 and packaged for processing at LA OPH laboratory. COVID-19 test resulted positive on April 15, 2020 and the facility received the results from Louisiana Department of Health.

(b)(6); (b)(7)(C)

COC Guatemala

The remainder of the dorm will remain on cohort for another 14 days and the positive detainee has been isolated since April 14th. SIR is forthcoming.

[With apologies for the duplicate message, here is a reformatted version of the message I sent at 5:40 P.M. EDT. The substance is identical, but this may be easier for some viewers to read on iPhone.]

OPLA Team—

Following up on my message from earlier today and subsequent ICE leadership guidance and direction, and in light of further discussions with the PLA, I am providing specific guidance and direction related to OPLA's COVID-19 response. Before I do so, however, I want to acknowledge the complexity of the issues presented by this pandemic. From legal authorities, to implementation policies and mission needs, to stakeholder and intergovernmental coordination, OPLA is one part of a much larger enterprise that is facing COVID-19 and trying to do the right thing. The PLA, his senior leadership team, and AFGE Local 511 leadership have all been extremely engaged in working through these complexities in a way that balances the very real needs and concerns of our workforce with the critical mission that we remain responsible for executing. Countless hours have been spent assessing options and gathering input and information.

Based on these extensive efforts and deliberations, and in consideration of ICE leadership's guidance issued today allowing waiver of general telework program policies and requirements, we are temporarily authorizing telework for OPLA divisions and field locations from Monday, March 16 through Friday, March 20, 2020, as follows:

- OPLA Field Locations: Chief Counsel should permit attorneys in their offices to telework on days on which they are not scheduled to appear in immigration court (including when they appear via VTC or telephonically from their offices), provided adequate portable work is available. Otherwise, employees who need to be out of the office (e.g., to care for children whose schools are temporarily closed) may request leave. Guidance on appropriate use of leave during a pandemic is available [here](#). We are working to identify a number of OPLA-wide document review projects in which our field attorneys can participate to help ICE meet its production obligations in ongoing civil litigation, and Field Legal Operations will be working with the Chief Counsel to arrange for the assignment of that portable work. Each Chief Counsel should ensure that at least one member of his or her management team is present in the office every day that the office is open. While support staff members and contractors in the field will generally be needed in the office to perform their key administrative functions and do not generally have a large amount of portable work available, Chief Counsel may

permit situational telework for mission support employees if portable work assignments are or become available and any ongoing critical administrative support needs in their office are met. Otherwise, support staff members who need to be out of the office may request leave.

- OPLA Headquarters: Subject to the caveats below, Division Chiefs should permit the attorneys on their teams to telework, provided adequate portable work is available and there is not a business need to have them report to the office for duty (e.g., to attend a hearing or mission-critical meeting). Each division should have at least one manager present in the office every day that the office is open. In addition to on-site management presence, the National Security Law Division should also have at least one non-supervisory attorney present in the office every day that the office is open, so that we are prepared to address national security threats that may emerge and promptly review any classified information. The OPLA Executive Team, including the PLA and DPLAs, will be present in the office, but their direct legal advisors (Senior Advisor, Special Counsels) may be permitted to telework, provided adequate portable work is available and there is not a business need to have them report to the office. OPLA headquarters support staff professionals may be permitted by their Division Chiefs to telework if adequate portable work is available and there is not a business need to have them present in the office but, as in the case of our field locations, much of the critical support staff upon which OPLA relies requires a presence in the office.

In order to be prepared to telework, employees need to do a few things. First, they should ensure that their government-furnished computer equipment (GFE) has up-to-date software, which can be verified using the “Software Center” app in Windows. Second, they need to provide a completed telework agreement to their supervisor, if they haven’t already done so. The agreement template for AFGE Local 511 bargaining unit employee team members is available [here](#), and the agreement template for other OPLA team members is available [here](#). Third, employees who are permitted to telework during this temporary period due to COVID-19 need to be particularly diligent in communicating with their supervisors about the work they are performing and their duty time. Fourth, employees should consider activating Workplace as a Service (WPAAS) on their home computers, as an alternative means of accessing the ICE network remotely in the event that their GFE has difficulty connect via the Virtual Private Network (VPN). WPAAS can function effectively even when the VPN is sluggish and, depending on the computer model being used, can offer a better user experience. A PIV card reader is necessary to allow WPAAS to be used on a home computer, and further information is available [here](#) for Windows devices, and [here](#) for Mac OS devices.

While the PLA and I are committed to being as flexible as we can during this challenging time, we fully expect considerable “after-the-fact” oversight of how OPLA fulfilled its mission commitments during this temporary period of increased reliance on telework. PLANet entries, including time spent performing specific tasks, cases, and projects, must be timely and accurately tracked as provided in relevant SOPs. WebTA entries need to

be carefully reviewed. Employees should ensure that they notify their supervisors when they need to step away from their computers to address dependent care responsibilities. If such responsibilities prevent an employee who has been authorized to telework from completing his or her duty day, he or she should request leave for the balance of the time. The PLA himself will be auditing how teleworking impacted our productivity during this period (including how our clients viewed our responsiveness and quality of service), and we will all be held accountable for ensuring that we lived up to our professional obligations, so it is incumbent upon managers to ensure strong accountability protections are in place. In addition to close and frequent contact with teleworkers, this may include active use and monitoring of virtual presence using Skype or other instant messaging software.

Relatedly, I am directing that all OPLA employees who have been issued portable GFE to take their devices home each night, even if they are not presently teleworking. The information and guidance surrounding COVID-19 is rapidly evolving, and the PLA and I wish to ensure that OPLA maximizes its flexibility to respond to future developments, including building closures and changes to the federal government's operating status. As a reminder for employees based at ICE headquarters, you may use your PIV card to enter and park in level P1 of the garage on weekends (entry on the right of the D Street guardhouse), should you wish to pick up your GFE in order to be able to telework starting Monday, as appropriate.

I recognize that this message does not answer every question that our team members have. The PLA is committed to making decisions promptly as COVID-19-related issues arise, but we must do so in concert with our chain-of-command and the rest of the DHS and ICE family. This current threat is going to tax all of us in the days to come, but our agency was created to confront existential threats to our homeland and OPLA has matured in the intervening years into a team of the most dedicated, resilient, and talented professionals I could ever imagine working with. Please know that the OPLA family will get through this together and take care of yourselves and your own families so that we can all look back at this time as a challenge we overcame together.

All the best,

OPLA Team—

After robust discussion with the PLA, I wanted to send out a brief message to let you know that we are closely monitoring developments associated with the novel coronavirus 2019 (COVID-19) and actively planning for a variety of contingencies. OPLA has an extremely critical mission to perform, and we are working with DHS and ICE leadership, as well as interagency partners, to ensure that our response to COVID-19 balances those mission needs with the safety and welfare of our workforce. Moreover, the OPLA coronavirus leadership group that the PLA recently established has been actively identifying the emerging COVID-19-related issues in need of resolution, exploring possible approaches to address them, and ensuring that the most up-to-date information about COVID-19 is made widely available to our team. I expect to have further guidance shortly from our chain-of-command, but in the meantime would ask that we support one another and remain resilient and focused on our important mission.

Thank you for all that you do! Please stay tuned.

Melissa,

Greetings, hope you are getting a weekend!

Looks like I am now part of a new Weill Cornell project looking at potential attenuation of COVID in those with prior influenza vaccination. We are going to try to look at Long Term Care and prisoners/detainees. Would it be possible to get facility-specific rates of influenza vaccination for DHS-controlled or -contracted facilities?

Thanks so much,

Nathaniel

Referred to Another Agency/Component

to do it, I'd rather not spend time or funds on a process medical professionals do not believe adds value. Plus, I can't guarantee how easily we could hire such staff.

Please advise whether ICE will continue to require temperature checks.

Thanks,
Karin

I cannot say with 100% certainty but I believed that pre-boarding temp checks done in Korea and Italy on flights to the US failed to screen out ANY cases of COVID. The only passengers prevented from boarding were those who reported recent symptoms on a questionnaire or who reported recent visits to a doctor. And those were very few. The only recent CDC continues to recommend random checks as part of enhanced entry screening from 212f countries is because that was what was originally presented to the TF. They have also been unproductive to date.

On March 29, 2020 at 1:59:21 PM EDT, Cohen, Mark J
<CohenMJ@state.gov> wrote:

Karin,

Consular staff should not be performing temperature checks.

MED is not the “permission grantor or denier”. Consular staff are not medical.

Repatriation flights have existing tensions – paying heed to safety and maximizing the number of passengers that can be brought home. Temperature checks have generally been ineffective, as they are insensitive and miss individuals with COVID-19 and other infectious diseases, and are non-specific, identifying individuals with fever who have other causes of fever.

Does ICE require an assessment of risk, e.g. a questionnaire?
Are they relying solely on temperature checks to reduce the risk to its staff?

Your understanding of MED’s approach is accurate. Passengers who are ill should be advised not to travel.

Mark

Subject: Fwd: FW: MED Guidance for consular officers - charter flights

MED Colleagues-

I am trying to nail down whether we can proceed with ICE flights. I just spoke with ICE Assistant Director for Enforcement and Removal Operations, Marlen Pinero, who

advises that ICE requires temperature checks prior to boarding of returning Amcits for the protection of its staff.

I would like to confirm that MED will not permit consular officers or other non-Medicsl embassy staff to take temperatures. I also want to confirm that MED staff at Latin American and other posts will not be assigned to do this.

My understanding is the compromise MED proposes distributing a flyer to passengers placing the onus on them to opt out of travel should they have a fever or other symptoms.

I will relay MED's posture to ICE but need to make sure my understanding of that posture is clear.

Thanks,
Karin

Martin,

This is the CDC's "internal to USG" protocol.

MED has not weighed in yet. The problem that we see is who is going to take temperatures. It should be a medical person. However, if these missions were being done by commercial airlines, the passengers wouldn't be getting **any** screening.

An observant cabin crew member might note that "someone doesn't look well".

I don't want consular officers to do temperature checks. And as near as I understand, there is no vendor requirement to do temperature screenings.

I'm copying Dr. Cohen who developed the protocol. However, I should have emphasized it's still very notional. As I said, there's no expectation of CA officers doing any sort of medical screening. For the

State-run charters, OpMed personnel will be on-board to take care of all recommenced screening.

Mark- will there be any screening on commercial charters (contracted by State) or for direct-ticketed charter flights that the airlines set up?

Thanks,
Chuc

Parra, Yolanda A <ParraYA@state.gov>

Subject: Re: PCC call - Guidance on posts screening for Amcits getting on flights

Right. CA officers shouldn't be taking temps.

Per Dr. Cohen re: temp screening:

For the charters that are owned and operated (and cabin-crewed) by the private company, they may not do ***any*** screening. They are just scooping up the stranded.

For a 747 that OpMed is running, the cabin crew is OM, and they will do the screenings.

Subject: RE: PCC call - Guidance on posts screening for Amcits getting on flights

My understanding is that conoffs can't be taking temperatures. I have to check on self quarantine guidance.

Charter flights aren't "funneled" through one of the 15 airports?

Subject: PCC call - Guidance on posts screening for Amcits getting on flights

Martin - what are we telling posts to do? I understand that we are not doing medical screening before boarding but telling Amcits to self quarantine for 14 days upon arrival. Correct?

CDC just said they do not have the capacity to screen our charters flights coming in upon arrival.

Chuck - is this your understanding as well?

Thanks!

Sent: Thursday, April 02, 2020 12:50 PM

Subject: Documenting COVID-19 Exposure Releases in EARM [FOD]

Enforcement and Removal Operations Assistant Director for Field Operations

To: Field Office Directors and Deputy Field Office Directors

Effective April 3, 2020, all releases attributed to reviews of COVID-19 susceptibility shall be documented in the ENFORCE Alien Removal Module (EARM) under Special Class - COVID-19 Chronic Care Release. As previously communicated, these individuals should be placed on ATD if possible. The system guidance for implementing this procedure is attached.

This guidance does not supersede processes and procedures instituted by ICE leadership or the ICE Health Service Corps and its network of care providers. Field offices shall continue to follow established protocols for determining eligibility for release.

Subject: RE: COVID19 Detention Policy Discussion

Just a couple of ICE detention fun facts for those who care.

- ICE uses 208 facilities to house adult detainees
- About 40 facilities are either dedicated or largely dedicated to ICE and house about 30,000 individuals
- 55 facilities, including the 40 dedicated ones, house about 88% of our total population.
- 89 facilities have a population of 10 ICE detainees or less and of these, 45 facilities house one detainee or less on average each day.
- 51 of these 89 facilities house ICE detainees for less than 72 hours.

Subject: COVID-19 related guidance re ICE detention

Matt, Henry, Chris and Tae,

Attached is the most recent document with OGC's minor comments and suggestions. FYI, the other document which Chris forwarded on Sunday has also been sent over to DOJ.

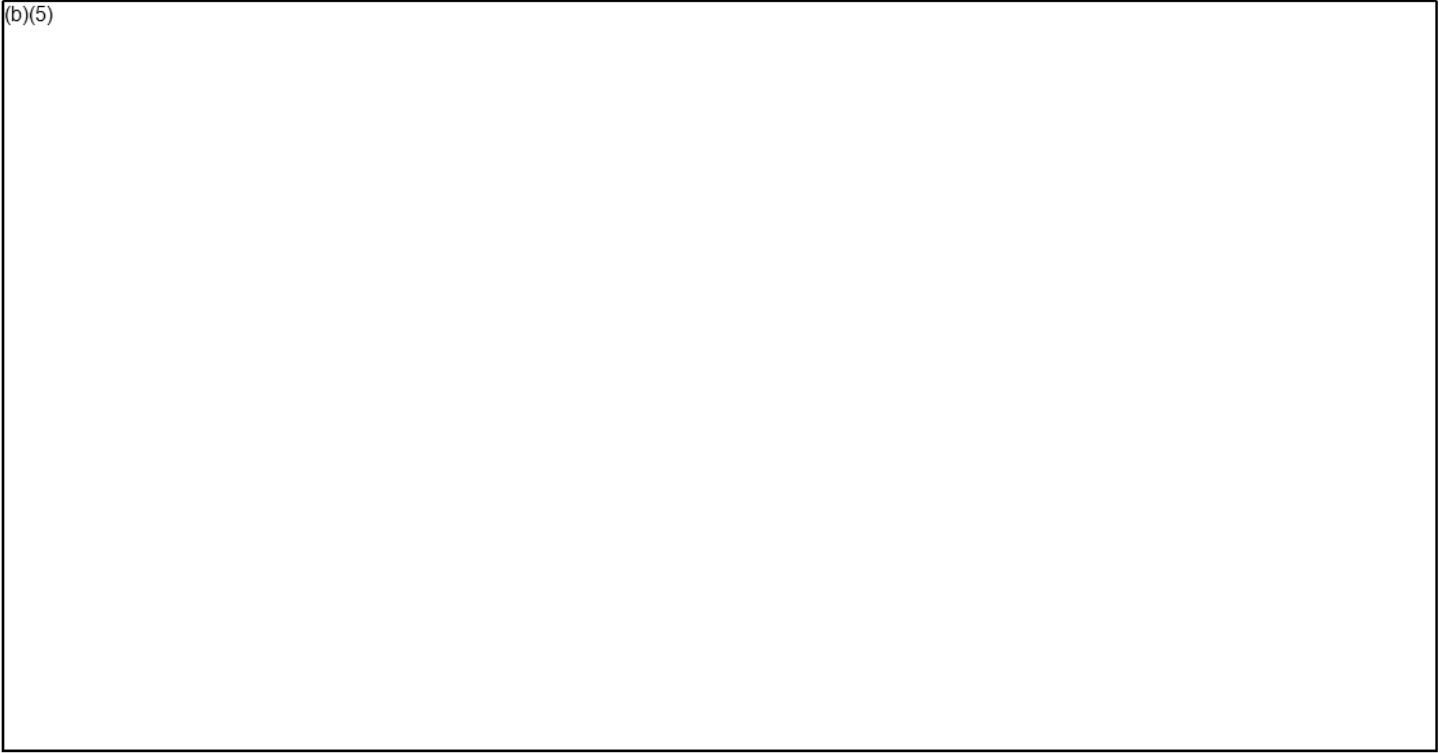

Please take a look and let us know if there are any glaring issues based upon the comments.

Thanks,

Tony

(b)(6)

Thank you all for sitting through the comments.

We look forward to the CDC comments.

Will touch base with Tae concerning any additional and recent guidance.

Best

From: ERO Assistant Directors (b)(7)(E)@ice.dhs.gov>

Sent: Saturday, March 21, 2020 4:25 PM

Subject: COVID-19 Response Plan and Best Practices [CMD]

Enforcement and Removal Operations Assistant Director for Custody Management

To: Field Office Directors and Deputy Field Office Directors

The combination of a dense and highly transient detained population places ICE facilities at a higher risk of infection and transmission. To ensure a unified preventative response to COVID-19, the ICE Office Enforcement and Removal Operations (ERO), ICE Health Service Corps (IHSC), Custody Management Division, and Field Operations are providing the attached guidance which includes both a Facility Response Plan and Best Practices for Detention Facilities in managing COVID-19. These measures were developed to reduce exposure, protect the detained population, and ensure staff remain healthy and available for duty. Please share with your stakeholders as appropriate.

(b)(6); (b)(7)(C)

Acting ERO Assistant Director, Custody Management

This message was sent in concurrence with AD Field Operations.

Subject: Documenting COVID-19 Exposure Releases in EARM [FOD]

Enforcement and Removal Operations Assistant Director for Field Operations

To: Field Office Directors and Deputy Field Office Directors

Effective April 3, 2020, all releases attributed to reviews of COVID-19 susceptibility shall be documented in the ENFORCE Alien Removal Module (EARM) under Special Class - COVID-19 Chronic Care Release. As previously communicated, these individuals should be placed on ATD if possible. The system guidance for implementing this procedure is attached.

This guidance does not supersede processes and procedures instituted by ICE leadership or the ICE Health Service Corps and its network of care providers. Field offices shall continue to follow established protocols for determining eligibility for release.

Local press google translation

A Guatemalan who came on a flight of deportees from the city of Miami, Florida, United States, reported to authorities in the country that he had symptoms related to the coronavirus.

Although the Ministry of Public Health and Social Assistance (MSPAS) does not yet consider it as a suspected case of covid-19, this person was transferred to the National Hospital of Villa Nueva, enabled a few days ago to treat patients infected by it virus.

The flight arrived at the Guatemalan Air Force (FAG) at 12 noon on Tuesday March 10 and came with 90 Guatemalans, including 84 men, 3 women and 3 girls.

The head of the Department of Epidemiology of the MSPAS, Manuel Sagastume, confirmed that it is a man of approximately 28 years who was treated in the Epidemiological Surveillance Unit.

"Thanks to the epidemiological surveillance protocol that is being carried out both at the airport and in the Air Force where these types of flights are received, this Guatemalan citizen who had some respiratory symptoms could be identified," said Sagastume.

Ninety Guatemalans arrived in the country on the flight of deportees from Miami, United States. (Free Press Photo: Newspaper library)

The Guatemalan who just arrived in the country had an initial evaluation within the FAG facilities, but the health authorities decided to follow up at the Hospital de Especialidades de Villa nueva to be able to perform the laboratory tests and thus rule out or confirm that This is a case of Covid-19.

In total, in the United States there have been about 761 patients with covid-19 in 13 states. So far, Guatemala has not reported any cases and has ruled out 10 suspicious cases.

On March 7, the Health authorities showed the facilities and equipment at the Villa Nueva Hospital to treat possible patients with coronavirus.

"We have 33 doctors from different specialists and efforts are being made to hire exclusive personnel from the isolation area. We have 17 fans available for people with breathing difficulties, 17 vital signs monitors, nurses, among others," said one of the doctors in charge of the area.

Thanks,
Heather Swift

Hi (b)(6);
(b)(7)(C)

HSA Cole has officially unfortunately passed away today. She was the contract HSA at Irwin County Detention Center. She was hospitalized for COVID19.

Thank you

Tom
