"The public will no doubt be surprised at the economic importance of this industry as we release prototype statistics measuring the impact of activities like boating, fishing, RVing, hunting, camping, hiking, and more," said U.S. Commerce Secretary Wilbur Ross in a news release.

Unlike other reports analyzing the outdoor recreation industry's economic footprint, this is the first one not conducted by a private industry association such as the Outdoor Industry Association.

AMERICAN OVERSIGHT

According to the Department of Commerce report, motorized vehicles accounted for $59.4 billion of gross output. Of that, recreational vehicles accounted for $30 billion.

Boating and fishing activities were second at $38.2 billion followed by hunting, shooting and trapping at $15.4 billion. Of that, hunting accounted for 60 percent of the output, according to the analysis. The equestrian industry accounted for roughly $12 billion.

Finally, backpacking, climbing and other outdoor activities accounted for $10 billion.

While the BEA study is unique nationally, the Washington State Recreation and Conservation Office commissioned and published its own economic study in 2016.

That analysis found that outdoor recreation resulted in $21.6 billion dollars in annual expenditures in Washington and created roughly 200,000 jobs. The Washington study was the first of its kind in the state.

“Now we know it’s a huge driver to our economy as well,” said Kaleen Cottingham, the director of the Recreation and Conservation Office. “We have known that intuitively. But we didn’t have the data to back that up.”

That information can be useful when advocating for conservation or trying to change policy, Cottingham said.

Although the Department of Commerce analysis was more narrowly focused, Cottingham said the federal findings aligned with the state report.

The Recreation and Conservation Office is in charge of distributing and making grants. Having economic data “helps to justify our investments as part of the bigger economic engine,” Cottingham said.

AMERICAN OVERSIGHT

Similarly, Sam Mace, the Inland Northwest Director for Save Our Wild Salmon, said the potential economic benefit of conservation has long been a key plank in Save Our Wild Salmon's platform and something they've considered and highlighted on the Lower Snake River.

"Often that is the bottom line way you can protect these resources, by showing the economic driver that they are," she said.

The federal report will be a useful advocacy tool, said Katherine Hollis the conservation and advocacy director for the Mountaineers.

"It's definitely inline with how we approach conservation work," she said. "There is intrinsic value in these places. But also the outdoor recreation industry is growing. Period. Across the board."

The Mountaineers are based in Seattle and have 13,000 members, most of whom are in Washington. The yearly basic alpine course has a wait list of more than 200 people, she said.

"They put the recreation economy at 2 percent of the GDP," she said. "That's a lot. That says something about the importance of these landscapes and how we engage these landscapes."

The Idaho Department of Parks and Recreation found that Idaho's state parks contributed $184 million to the state's economy in 2016, according to a study published earlier this month.

The Department of Commerce study didn't look at outdoor recreation retail manufacturing revenue occurring outside of the U.S. Additionally, the BEA report didn't include money spent on recreation trips less than 50 miles from a person's home.

Editor's note: This story was updated on Friday, Feb. 23 to specify that a comparison made between the outdoor recreation industries and mining industries refers to their relative

AMERICAN OVERSIGHT

Outdoor Recreation Satellite Account

BEA has developed its first statistics showing how outdoor pursuits like snowboarding, biking and boating ripple through the U.S. economy.

These prototype statistics published Feb. 14, 2018, mark a milestone in BEA's work to measure the size and growth of the outdoor recreation economy. Feedback about these experimental data will help us finalize the definitions, data sources, methodology and presentation for the new Outdoor Recreation Satellite Account.

The resulting outdoor recreation report is planned for fall 2018.

Outdoor recreation and the economic activities that support it – for example, a factory making fishing lures, a family traveling to hike in a national park, or a ski instructor giving lessons – are already woven invisibly into BEA's broad national statistics, such as GDP. The new account pulls these threads of data together in one place, with expanded detail, creating a picture of the outdoor recreation economy that would otherwise remain hidden within BEA's existing statistics.

What's New...

Survey of Current Business: Introducing the Outdoor Recreation Satellite Account (/scb/2018/03-march/0318-protytype-statistics-for-the-outdoor-recreation-satellite-account.htm)

News Release: Outdoor Recreation Satellite Account: Prototype Statistics for 2012-2016 (/newsreleases/industry/orsa/orsanewsrelease.htm)

Blog: Prototype Statistics: Outdoor Recreation Accounted for 2 Percent of GDP in 2016 (//blog.bea.gov/2018/02/14/prototype-statistics-outdoor-recreation-accounted-for-2-percent-of-gdp-in-2016/)

What's Ahead

BEA requests feedback on prototype estimates by April 27, 2018.

Sign up for Email Notifications (/_subscribe/)

The new data will add to public understanding and inform decision-making by policymakers, businesspeople and the managers of public lands and waters.

The outdoor recreation account, established by a 2016 federal law, joins other supplemental statistics that spotlight arts and cultural production, travel and tourism, and health care.

Where We Are Now

For our prototype, BEA produced experimental statistics that allow you to view the outdoor recreation economy through two different lenses: first, a conventional definition of outdoor recreation including activities that typically require a degree of physical exertion and occur in a nature-based outdoor environment; and second, a broader definition including all recreational activities that occur in the outdoors.

These experimental statistics were published on Feb. 14. BEA seeks more feedback as we continue to refine our approach to measuring and presenting statistics on outdoor recreation, to be released this fall.

Timeline

Finalize methodology and statistics

Fall 2018: Release the first official Outdoor Recreation Satellite Account statistics

Feb-Apr 2018: Gather feedback on prototype statistics and finalize the definition, data sources and methodology to be used for the national-level statistics

Prepare prototype estimates

Feb 2018: Release prototype statistics

Dec 2017-Jan 2018: Prepare prototype statistics based on the potential definitions being evaluated

Aug-Nov 2017: Identify data sources and methodologies to estimate goods and services that are partially-in-scope of outdoor recreation

Define outdoor recreation

Apr-Jul 2017: Reconciliation of independent reviews, incorporation of public comments, and consolidation into two to three potential definitions

Jan-Mar 2017: Independent development of a range of definitions, and review of goods and services by experts in field of outdoor recreation

How outdoor recreation can bring an economic boom back to coal country

The good news for struggling communities across Appalachia is that there is already a road map to renewed economic prosperity. Old mining communities across the Southwest have successfully diversified their regional and local economies, centered around the outdoor recreation industry.

Healthy lands and waters are necessary to support a thriving outdoor recreation economy.

When we think of Moab, UT, gateway to Canyonlands and Arches National Park immediately come to mind. We also think of the world class mountain bike trails along Porcupine Rim and rafting sections of

AMERICAN OVERSIGHT

the mighty Colorado River. The area boasts epic 4-wheel driving across the most unique scenery in the American Southwest, too. It is no wonder people refer to Moab as the outdoor adventure capital of the U.S.

But it was not always this way. Moab came of age as a mining town when Vanadium was first discovered in 1912 and, by 1920, the area had produced $2.4 million in uranium. During the early years of the Cold War, demand for uranium skyrocketed and the Town of Moab enjoyed an economic boom until demand for uranium began to subside in the early 1960s. In 1964 the largest mine closed and the mill laid off hundreds of workers. For the next two decades mines continued to close and the unemployment rate hovered around 15 percent. During the same period, the population of Moab decreased by 23 percent. Decades of mining activities also left behind an environmental legacy of superfund sites and contaminated soils along the banks of the Colorado River.

Community leaders began viewing tourism as an economic safety net in the 1970s but it took another ten years before tourism was embraced as the future of Moab. Community development officials invested heavily to support a tourism-based economy and today mining and oil and gas account for three percent of the local labor force. Government agencies charged with land management and the service industry are the region's primary employers. The service industry supports more than 1 million visitors annually.

There are many parallels between Moab, UT, and communities across Appalachia coal country. For generations, coal mining and related industries employed and supported entire towns. But like all mining industries, there were boom and bust cycles, and today coal employs just 70,000 (compared with 260,000 in the solar industry). Communities are now grappling with high unemployment and shrinking populations. Fortunately, many of these communities are adjacent to public lands or abandoned mine sites with outdoor recreation potential. With a bold vision and proper investments, these communities can embrace conservation and outdoor recreation as a catalyst for economic development similar to Moab in the 1980s. Coal Township, Pennsylvania, has already embraced the outdoor recreation economy by supporting the remediation and conversion of a 6,500 acre mine site into hundreds of miles of trails for hiking, mountain biking,

AMERICAN OVERSIGHT

and all-terrain vehicles. The Anthracite Outdoor Adventure Area opened in 2013 and hosts 10,000 visitors annually.

Nationally, $1 out of every $20 in consumer spending goes towards outdoor recreation. A new report published by the Outdoor Industry Association (OIA) estimates the outdoor recreation economy generates $887 billion in consumer spending annually and employs 7.6 million Americans returning $59.2 billion to state and local coffers. The OIA report calculates $10 billion was returned to state and local coffers across Appalachia.

To take full advantage of the outdoor recreation economy, environmental restoration and remediation is an important first step for Appalachian communities. A healthy outdoor recreation industry is dependent on healthy lands and waters. Decades of mining activities across Appalachia left thousands of miles of streams filled in with mine waste, contaminated soil and water supplies with heavy metals, and reshaped the landscape through surface mining. Many communities that stand to benefit from investments in the outdoor recreation economy are also suffering from contaminated drinking water supplies. Environmental remediation will require major investment and can help support communities in the interim. Environmental remediation is a $15 billion industry employing 86,000 across the country. These are good-paying and long-term jobs. Superfund site remediation takes several years to decades to completely remove industrial and chemical contaminants from soils or groundwater. The Moab UMTRA Project began removing and disposing of contaminated soil along the banks of the Colorado River in 2009 and the project is expected to continue until 2032.

Investments in environmental cleanup projects bring multiple benefits including near and long-term economic opportunity, improved water quality and drinking water supplies, and healthy ecosystems to support a thriving outdoor recreation and tourism economy. Fortunately, Appalachia can look to communities in the Southwest for a road map to bring economic and environmental prosperity back to the region.

Executive Committee and Center for Best Practices Board Meeting
Friday, July 20
12:50 to 1:50 p.m.
Convention Center: Tesuque (2nd Floor)
Invitation Extended to Executive Committee Plus One Staff Member

Executive Committee and Center for Best Practices Board Meeting

Overview

The National Governors Association Executive Committee will convene to discuss a wide range of matters related to the direction and administration of the association. NGA Chair Governor Brian Sandoval and NGA Executive Director and CEO Scott D. Pattison will lead the meeting of the nine-governor committee.

In addition, the NGA Center for Best Practices Board governors will jointly meet to discuss the NGA Center for Best Practices priorities and Activities.

**You are chairing the Executive Committee meeting and CEO review.

Format

The meeting agenda and supporting documents are forthcoming and will be sent directly to member governors.

Media

This session is closed to press.

Takeaway(s)

Member governors will have the opportunity to discuss the direction of the National Governors Association and NGA Center for Best Practices.

Contact: Steve Wood, (202) 624-7872 or swood@nga.org

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

Public Project List: as of June 27, 2018						
#	Division	Project	End Date	Description	Funder	Grant Amount
1	Education	ECE Capacity Building	8/30/18	The Governors' Response Team will have at least 25 engagements with governors and their staff through site visits, conference calls, technical assistance memos, connections and referrals to partners and other assistance as needed. Support new governors and their staff (as well as existing Governors' Educaiton Policy Advisors) with an Education Division notebook, Policy Institute and mentoring program. In collaboration with the ASPEN Institute co-host a convening on Social and Emotional learning for state policymakers. Integrating and Advancing State Prenatal to Age Three Policies	Alliance for Early Success	$300,000
2	Education	Reinvestment with NGA	6/30/18	Bring together Governors' Education Policy Advisors (GEPAs) to deepen their understanding on the latest education topics and policies, to hear from national experts, to learn about best-practices from other states, and to network with other GEPA;s from around the country. Emphasize ongoing Every Student Succeeds Act (ESSA) implementation opportunities for governors and facilitate discussions on early childhood education, transitions from high school to post secondary and education human capital systems. Provide a framework for state level human capital policies development and implementation, as well as serve as a hub of human capital resources and tools for governors and their staff.	Bill & Melinda Gates Foundation	$300,000
3	Education	Building Early Learning Policy Capacity	8/31/20	Select up to six states and provide states with up to $25,000 and technical assistance on developing and strengthening a comprehensive Pre-kindergarten to 3rd grade system. Organize a learning lab for key stakeholders to build momentum for a comprehensive PreK-3 rd grade system. Host two cross state meetings on developing and implementing a plan for building a PreK to 3rd grade System. Host a summit that will bring together state policymakers who are interested in increasing and aligning investments in the prenatal to age three space. Bring together Governors' Education Policy Advisors (GEPAs) to deepen their understanding on the latest education topics and policies, to hear from national experts, to learn about best-practices from other states, and to network with other GEPA;s from around the country.	Bill & Melinda Gates Foundation	$750,000
4	Education	Early Care and Education Workforce Policies and Practices	5/1/19	Support additional state teams attending Cross-State Convening I and allow NGA staff to travel to Cross State Convening II, Conduct site visits to additional four states to refine state visions for the grant	Foundation for Child Development through Council of Chief State School Officers	$68,431
5	Education	Supporting Governors and States on Improving Early Care and Education Policies	8/31/19	By June 2018 the Governors' Response Team will nave at least 25 engagements with governors and their staff through site visits, conference calls, technical assistance memos, connections and referrals to partners and other assistance as needed. Strengthen the capacity of governors and their staff to lead on best practices in early care and educaton. Through a partnership with Economic Opportunity and Health division, host a one day expert roundtable on state policy strategies to support successful models of alignment and coordination in the prenatal to age three policy space. Host a two-day learning lab for state leaders to understand how they can convene key stakeholders to align and coordinate their prenatal to age three systems. Competitively select up to six states to participate in an eighteen month intensive technical assistance opportunity	Heising Simons Foundation	$250,000
6	Education	Birth to Age 8 Workforce Investment	5/1/19	Provide support to work wit four states to tralign, strengte, or transform early care and education workforce policies and practices in collaboration	Foundation for Child Development in collaboration with Council of Chief State School Officers	$68,431
7	Education	Prenatal to Age Three Project	5/30/20	This project will provide resources and technical assistance to educate governors and their senior staff on how to develop and strengten te continum of Prenatal to 3 programs and policies in teir states.	Pritzker Children's Initiative	$700,000
8	Education	Prenatal to Age Three Project	11/1/18	Serve as a core partner in bringing national attention to what babies and families ned to thrive	Zero to Three	$50,000
9	Education	Birth to Age 8 Workforce Investment (Workforce 2.0)	5/31/19	Provide technical assistance to help up to nine governors and states develop and implement a policy agenda that prepares, supports, and strengthens their early care and eduation workforce. Conduct site visits to each state and refine state visions for the grant. Convene all states in the project for a deeper dive into Early Care and Education Workforce policy issues wit national experts.	W.K. Kellogg Foundation	$500,000
10	Education	Every Student Succeeds Act (ESSA)	12/31/18	Host two cross state learning labs for governors education policy advisors. Provide technical assistance and site visits to provide strategic and planning support as well as meeting facilitation and other project management support and on-going assistance from NGA Center experts. Host webinars for Governors' Education Policy Advisors that elevate opportunities for governors to boost and strengthen school leadership	Wallace Foundation	$545,000
11	Education	Communications	6/30/19	Host two Governors' Education Policy Institutes with sessions on school leadership and state human capital systems. Host up to 4 podcast on state Case study and host a live broadcast with the Chief Council of State School Officers. Memos, Briefs and Case Study on School Leadership	Wallace Foundation	$400,000
12	Education	Tracking 2018 Gubernatorial Races	5/31/19	This grant is to track the 36 governor races in 2018, create profiles for each candidate, and provide policy support for new Governors and their staff in the transition	Chan Zuckerberg Initiative DAF	$200,000
13	EET	Water Learning Network	12/31/19	Help governors' advisors learn about latest technology and policy solutions on range of water issues.	American Water Foundation	$150,000
14	EET	Energy Analysis	5/1/18	Support for workshops and technical assistance for Energy Learning Network with focus on data and analysis.	Department of Energy / Energy and Policy Analysis	$121,350
15	EET	Energy Learning Network	9/30/18	Help governors' advisors learn about technology and policy issues for a range of energy efficiency and renewable energy issues.	Department of Energy / Energy Efficiency & Renewable Energy	$450,000
16	EET	Federal Facitilies Task Force (FFTF)	2/28/18	Technical and Policy Support for governor-appointed members of the NGA Federal Facitlities Task Force -- 13 states involved in nuclear weaons waste clean up.	Department of Energy / Environmental Management	$1,700,000

Public Project List: as of June 27, 2018						
17	EET	Nuclear Energy	9/30/18	Help governors' advisors learn about latest technology and policy solutions for existing and new nuclear energy issues.	Department of Energy / Nuclear Energy	$50,000
18	EET	Energy Learning Network	9/30/18	Help governors learn about technology and policy issues related to electricity grid.	Department of Energy / Office of Electricity	$1,085,000
19	EET	Energy Learning Network	3/31/18	Support for four states n Power Sector Modernization Policy Academy (KY, OR, RI, WA).	Energy Foundation	$115,000
20	EET	Chair's Initiative - AOTC	12/30/17	Support for summits, storymaps, podcasts, roadmaps and other activities under Ahead of the Curve: Innovation Governors.	Energy Foundation	$22,000
21	EET	Energy Learning Network	4/30/18	Support for four states in Power Sector Modernization Policy Academy (KY, OR, RI, WA).	Heising Simons Foundation	$250,000
22	EET	Chair's Initiative - AOTC	7/30/18	Support for summits, storymaps, podcasts, roadmaps and other activities under Ahead of the Curve: Innovation Governors.	Various Corp (also dollars in DOE and Energy Foundtaion)	$900,000
23	EET	Water Learning Network	4/30/20	Support for four states in Delaware River Basin (DE, NJ, NY, PA) on water policy development as part of Water Learning Network.	William Penn Foundation	$350,000
24	EO	Human Services Policy Advisors / General Human Services	12/31/18	Supports general technical assistance to governors and state human services system leaders.	Annie E Casey Foundation	$420,000
25	EO	Parents And Children Thriving Together: Two-Generation State Policy Network (PACTT Network) policy academy	8/31/17	Policy academy to help states develop and implement two-generation statewide strategies for systems change.	Annie E Casey Foundation	$1,248,870.00
26	EO	Three Branch Institute (policy academy) on Improving Child Safety and Preventing Child Fatalities	12/31/18	Developing a toolkit based on lessons learned from policy academy supporting states in developing a three branch approach to child safety including fatality and near fatality prevention.	Casey Family Programs	$350,000
27	EO	State Exchange on Employment and Disability	7/31/18	Learning lab to help states identify strategies to increase employment opportunities for people with disabilities.	Concepts Communications	$175,500
28	EO	Parents And Children Thriving Together: Two-Generation State Policy Network (PACTT Network) policy academy	12/31/18	Policy academy to help states develop and implement two-generation statewide strategies for systems change.	Doris Duke Charitable Foundation	$600,000.00
29	EO	European Apprenticeship Study Trip	6/30/18	Study trip to visit and learn about two leading apprenticeship models in Europe and identify lessons learned states can incorporate in their own jurisdictions.	JPMorgan Chase	$125,000
30	EO	Educational Initiatives on Entrepreneurship	7/2/18	This project provides support for educational initiatives to teach economic policy advisors about entrepreneurship and how to support it in their states.	Kauffman Foundation	$220,000
31	EO	Occupational Licensing	12/31/19	Policy academy to help states reduce barriers to entry into licensed occupations and increase portability and reciprocity of licenses.	National Conference of State Legislatures (funding is from U.S. Department of Labor, NCSL is primary and EO is a subcontractor along with CSG)	$1,771,304
32	EO	Engaging the Arts for Rural Economic Development	7/31/18	Partnership with NEA and the National Assembly of State Arts Agencies to highlight how the arts and creative industries can help address rural communities and economic development.	National Endowment for the Arts (NEA)	$194,444
33	EO	Reducing Child Hunger	4/30/18	Assist states to identify and implement strategies to reduce childhood, specifically focused on increasing participation in federal child nutrition programs.	Share Our Strength	$300,443
34	EO	Work-Based Learning (Phase Two)	6/30/19	Policy academy to help states expand work-based learning for young people ages 16-29. Second phase: Engagement with more states in three tiers of technical assistance.	Siemens Foundation	$2,453,216
35	EO	Apprenticeship	12/31/18	Expanding registered apprenticeship to new occupations and increasing diversity among apprentices. Technical assistance to 46 state and local recipients of US Dept of Labor grants.	Siemens Foundation	$675,000.00
36	EO	Workforce Development TA Program	6/30/18	Ongoing technical assistance program that supports state workforce system leaders.	State fee-for-service	$500,000
37	EO	Apprenticeship	9/30/18	Expanding registered apprenticeship to new occupations and increasing diversity among apprentices. Technical assistance to 46 state and local recipients of US Dept of Labor grants.	US Dept of Labor	$2,800,000.00
38	EO	Parents And Children Thriving Together: Two-Generation State Policy Network (PACTT Network) policy academy	12/31/18	Policy academy to help states develop and implement two-generation statewide strategies for systems change.	WK Kellogg Foundation	$1,248,870.00
39	EO / Education	Talent Pipeline Policy Academy	12/31/17	Assist states to align their education and workforce systems with the needs of state economies. Multi-state activities complete. Narrative grant report complete. Publication will be released spring 2018.	JPMorgan Chase	$250,000
40	EO / HSPS	Alternatives to Juvenile Incarceration	12/31/17	Help states identify and implement best practice alternatives to juvenile incarceration.	Annie E Casey Foundation	$90,000
41	Health	Addressing Public Health Crises: Strategies for States to Effectively Purchase and Safeguard Access to Evidence-Based Pharmaceutical Interventions	4/30/18	Assist state leaders in surfacing promising, state-focused solutions to balance providing access to pharmaceuticals used to address public health crises while maintain the fiscal integrity and sustainability in their programs. In addition, the project seeks to assist state leaders in data collection/analysis of cost trends in Medicaid and corrections related to pharmaceuticals used to address public health crises. The project will include roundtable convenings with payors and providers, pharmaceutical manufacturers, and states.	Arnold Foundation	$200,000
42	Health	Suicide Prevention in Belt States	6/30/18	Convene states in midwest region to address the high rates of suicide in their states. State teams will leave the convening with concrete action steps. NGA Center will support them in moving those action steps forward and share lessons learned with all states in a report and webinar.	Centers for Disease Control	$150,000
43	Health	State Strategies for Adressing Infectious Disease Related to Substance Abuse	10/30/18	Assist up to seven states focused on reducing the incidence of infectious diseases, such as Hepatitis C and HIV, as well as comorbidities like opioid addiction.	Centers for Disease Control	$250,000

NV-DA-20-0615-A-004379

AMERICAN OVERSIGHT

Public Project List: as of June 27, 2018						
44	Health	Governors' Bipartisan Health Reform Learning Network (Part 1)	12/30/17	Assist state leaders in understanding the potential impact of proposed changes to Medicaid and private health insurance at the federal level, identify state-based ideas and provide technical assistance to help states progress on reform efforts	Commonwealth Fund	$200,000
45	Health	Building Capacity to Improve Outcomes and Reduce Cost of Care for High Need, High Cost Populations with Behavioral Health and Social Support Needs: Behavioral Health Integration Learning Lab	1/31/19	Provide technical assistance to states interested in advancing policy, practice and payment strategies that improve outcomes for high need, high cost populations with mental illness and/or substance use disorders and social support needs.	Commonwealth Fund	$250,737
46	Health	Managing Change in Medicaid and Private Health Insurance: Technical Assistance for Governors' Leadership Teams	11/30/18	With Commonwealth's support for the Next Steps for Medicaid and Private Health Insurance: Technical Assistance Program for States, the NGA Center would expand upon previous and ongoing work by engaging states through intensive, in-state technical assistance, including in-state visits, making connections to national experts, and workplan development/strategic planning support. Through this work, the NGA Center will identify the steps needed for states to take in pursuing or refining their goals for their programs. Priority areas will be defined by the state but may include implementing policies to incentivize issuers to participate in the private health insurance market;developing a nuanced understanding of the interrelation between Medicaid and the private market with new FPL requirements and likely enrollment/cost impact; assisting states to define new opportunities for flexibility in Medicaid while building a strategy to improve outcomes and reduce costs; developing new waivers; and identifying strategies to improve evaluation of policy changes	Commonwealth Fund	$200,000
47	Health	Various Health Division Projects	6/30/18	Funds various health division projects	FY17 Grantmakers	$331,746
48	Health	Various Health Division Projects	6/30/18	Funds various health division projects	FY18 Grantmakers	$525,000
49	Health	Rural Health Learning Collaborative	3/31/18	Help states meet their state policy goals related to rural health. Focus areas include: access to behavioral health services and the use of telehealth models; the hub and spoke model to address opioid treatment; data driven policy development; and workforce maldistribution and shortages. Support BLN staffing.	HRSA	$640,000 (includes combination of carryover funds and year three funding for cooperative agreement)
50	Health	Improving Health in Rural America: Addressing the Leading Causes of Death	10/31/2018	Provide technical assistance to up to five states to address factors that contribute to the five leading causes of death in rural areas. NGA will assist states in developing strategic action plans to address one leading cause of death (chosen by the state). Techincal assitance includes connecting state teams with subject matter experts at the CDC.	HRSA	$300,000
51	Health	Maternal and Child Health Learning Collaborative/ MCH and Public Health Working Group - Year 3 Carryover	9/30/18	Assist states in improving quality and access to care in maternal and child health populations. Focus areas include: improving continuity of coverage and care for pregnant women and children; strengthening systems of care for children and youth with special health care needs; and implementing of Bright Futures guidelines for care for all children.	HRSA/MCHB (AIM Cooperative Agreement)	$353,909/year for 3 years
52	Health	Health Policy Advisors Institute 2018	6/30/18	The Health Divisions annual gathering of governor's Health Policy Advisors. The Institute consists of focused health care topics of interest to HPAs and highlights the Division's work.	Kaiser/ Merck	$350,000
53	Health	Governors' Bipartisan Health Reform Learning Network (Part 2)	6/30/18	Assist state leaders in understanding the potential impact of proposed changes to Medicaid and private health insurance at the federal level, identify state-based ideas and provide technical assistance to help states progress on reform efforts	Robert Wood Johnson Foundation	$600,000
54	Health	Building Capacity to Improve Outcomes and Reduce Cost of Care for High Need, High Cost Populations with Behavioral Health and Social Support Needs: Behavioral Health Integration Learning Lab	1/31/19	Provide technical assistance to states interested in advancing policy, practice and payment strategies that improve outcomes for high need, high cost populations with mental illness and/or substance use disorders and social support needs.	Robert Wood Johnson Foundation	$250,737
55	Health	General operations support for the Health Division	12/15/18	Funds various health division projects	Robert Wood Johnson Foundation	$500,000
56	Health	Harnessing the Power of Data to Achieve State Policy Goals	10/1/19	The Health Division will support 5-7 states through multi-state convenings, in-state visits and intensive technical assistance to develop strategies on how to improve cross-sector data sharing and analytic capabilities	Robert Wood Johnson Foundation	$700,000
57	Health	Addressing the Whole Child: Building Cross-Sector Collaborations to Support Child Health and Being	10/1/19	The Health Division will support 3-5 states through multi-state convenings, in-state visits and intensive technical assistance to coordinate policies for children through sustainable governing body	Robert Wood Johnson Foundation	$400,000
58	Health / HSPS	Prescription Opioid, Heroin and Fentanyl Addiction Learning Labs - Year 3 + Year 2 Carryover	6/30/19	Highlight effective strategies for states in addressing various aspects of the opioid epidemic, including: treatment for justice-involved populations; deaths related to heroin and illicit fentanyl; teleconsultation programs; and information sharing between public health and law enforcement.	CDC (OSTLTS Cooperative Agreement)	Estimated $500,000/year for 5 years
59	HSPS	Annie E. Casey National Partners Portfolio	12/31/18	This cross-divisional effort between EO and HSPS focuses on elevating juvenile justice issues with governor's offices, and highlighting strategies to increase alternatives to incarceration and ocmmunity-based alternatives at the state level.	Annie E Casey Foundation	$150,000

NV-DA-20-0615-A-004380

AMERICAN OVERSIGHT

Public Project List: as of June 27, 2018						
60	HSPS	National Criminal Justice Reform Project	2/28/18	In partnership with an outside organization, this intensive technical assistance project is the first national-level, executive branch;led effort to reform pretrial, reentry, prison and jail populations, substance abuse and mental health, and information sharing through the Governor's Criminal Justice Policy Advisor and State Administering Agency Director for Criminal Justice.	Arnold Foundation	$1,200,000,000
61	HSPS	State Strategies to Strengthen Traffic Safety and Reduce Fatalities	6/30/18	Led by a cross-divisional effort (between EET and HSPS), the Center has been charged with highlighting a significant increase in traffic fatalities at the state level, and to underscore strategies for governor's offices and related state agencies to consider in addressing traffic safety.	CDC	$825,000
62	HSPS	Public Health Preparedness	6/30/18	This project helps states break down silos between homeland security, public health and emergency management. This is the final year of the five year grant. To date, we have hosted in-state workshops for Maryland and Pennsylvania and produced an issue brief. Next year, we plan to develop a short guide to governors on executive authority related to public health emergencies.	CDC	$30,000
63	HSPS	Workshop for Gubernatorial and Legislative Leaders on Public Health Emergencies	9/30/18	NGA plans to host a workshop for up to seven states to identify administrative, legal, and regulatory barriers to public health emergency response. The state teams, selected through a competitive process, will develop plans to address these barriers and provide a report out on their efforts to the governor and CDC.	CDC	$200,000
64	HSPS	DHS Office of Emergency Communications	9/30/18	This project builds off of our Policy Academy on Enhancing Emergency Communications and will involve hosting four regional workshops, bringing together state teams to improve governance around the emergency communicatiosn ecosystem in preparation for the rapid technological advances in mobile and communications technology.	Department of Homeland Security	$511,000
65	HSPS	Countering Violent Extremism	7/31/19	The State Approaches to Countering Violent Extremism grant seeks to develop a roadmap for state officials to help prevent future violent extremist attacks. The project will not focus on any specific violent extremist ideology but instead include the full spectrum. NGA will select five states to participate in a policy academy and test the roadmap.	Department of Homeland Security	$500,000
66	HSPS	National Training and Technical Assistance Project for States	12/31/17	In partnership with an outside organization, NGA will engage governor's offices on criminal justice issues, highlight best practices, provide technical assistance, and host on-site and Institute engagements for senior state officials.	Department of Justice	$500,000
67	HSPS	Learning Collaborative on Paroling Practices	9/30/17	In partnership with an outside organization, HSPS has sought to engage governor's offices and, through the learning collaborative, facilitate partnerships wtih their respective parole and pardon boards and deliver a set of policy recommendations to their governors at the conclusion of the project.	Department of Justice	$0
68	HSPS	Governors Homeland Security Advisors Council	9/14/18	The Governors Homeland Securiy Advisors Council represents the collective interest of the nation's homeland security advisors. This project funds most of the Council's activities.	FEMA	$275,000
69	HSPS	Pew Charitable Trust National Partners	6/30/18	As part of their national partners portfolio, Pew has asked that NGA lead a new pilot project to engage governor's offices on crisis communications and criminal justice. Such work requires the production of an electronic toolkit and a series of on-site workshops, in partnership with both Pew and Kivvit, a public relations firm.	Pew Charitable Trusts	$236,000
70	HSPS	Long Term Recovery Experts Roundtable	5/1/19	Through this effort, NGA will host an experts roundtable on long-term recovery issues to examine ways for NGA to help governors think more strategically about long-term recovery planning in the wake of disasters.	State Farm	$25,000
71	HSPS	Opportunity for Statewide Training and Technical Assistance for Criminal Justice Strategic Planning		This opportunity is designed to help states meet the 2019 Byrne Justice Assistance Grant requirement of a comprehensive statewide strategic plan. The Justice for All Reauthorization Act, passed in December 2016, requires all applicants for FY 2019 Byrne JAG state formula grant awards to include a statewide strategic plan that addresses resource allocation, use of data, and implementation of evidence-based practices.	Bureau of Justice Assistance

Plenary Session V: An Evolving Crisis: Combatting the Next Wave of Addiction
Friday, July 20
2 to 3:30 p.m.
Convention Center: Sweeney Ballroom C-F

Plenary V: An Evolving Crisis: Combatting the Next Wave of Addiction

Overview

The National Governors Association Homeland Security and Public Safety Committee and Health and Human Services Committee will host this session focusing on the intersection between public safety and public health in addressing the opioid crisis.

The opioid crisis continues to evolve beyond prescription drugs – presenting new state challenges with the increase of overdoses from fentanyl mixed with illicit stimulants like cocaine and methamphetamine. This session will offer insights into how officials at all levels of governments can combat the flow of opioids and other illicit drugs into the country and ensure appropriate treatment and recovery services in a rapidly changing environment.

Format

- 2 p.m. — Opening Remarks
  - Governor Mark Dayton, Minnesota
  - Governor Kate Brown, Oregon
- 2:10 p.m. — Panel Discussion
  - Deputy Director James Carroll, Office of National Drug Control Policy
  - Deputy Postmaster General Ronald A. Stroman, United States Postal Service
  - Fire Chief Jan Rader, City of Huntington, West Virginia
- 3 p.m. — First Lady Kathryn Helgaas Burgum Remarks
- 3:10 p.m. — Q&A Session
- 3:30 p.m. — Adjourn

Media

This session is open to press.

Takeaway(s)

The forum will help governors discuss ways to improve state-federal coordination in both combatting the flow of opioids and synthetic drugs coming into the United States and in building sustainable treatment models to care for those suffering from addiction.

AMERICAN OVERSIGHT

Presenter Bios

James Carroll

Jim Carroll is the deputy director of National Drug Control Policy in the Executive Office of the President. On April 24, 2018, the president sent to the Senate the nomination of Deputy Director Carroll to be the director of National Drug Control Policy.

Prior to joining the Office of National Drug Control Policy, he served as assistant to the President and Deputy Chief of Staff at the White House. Previously in the Administration, Carroll served as general counsel of the Office of Management and Budget and as deputy assistant and senior counsel to the president. Before joining the Trump Administration, Carroll served as Washington Counsel at the Ford Motor Company and as General Counsel of the Ford Motor Company Fund, the company's philanthropic arm that supports non-profit organizations and initiatives. During the George W. Bush administration, Carroll held several positions, including special assistant and associate counsel to the president at the White House, deputy general counsel and acting general counsel at the U.S. Department of the Treasury and as an attorney at the U.S. Department of Justice. Carroll began his career as a state prosecutor in Virginia after earning his bachelor's degree from the University of Virginia and his J.D. from the George Mason University School of Law.

Ronald A. Stroman

Ronald A. Stroman was named the 20th deputy postmaster general (DPMG) in March 2011. As the second-highest ranking postal executive, he serves on the Postal Service Board of Governors and on Postmaster General Megan Brennan's Executive Leadership Team. Reporting to Stroman are the functions of government relations and public policy, international postal affairs, sustainability and the Judicial Officer Department.

Stroman facilitates relationships with the Congress, and with federal, state and local agencies as the Postal Service pursues its core business strategies. He also has the lead role in working with the Universal Postal Union and the Department of State on international postal policy.

Stroman has more than 30 years of professional experience in government, legislative affairs and leadership before becoming DPMG. From 1978 to 1984, he was an attorney with the Department of Housing and Urban Development. He then moved into a position as counsel on the Judiciary Committee of the U.S. House of Representatives. He also worked for the Committee on Government Operations and became a minority staff director and counsel for the House Committee on Oversight and Government Reform.

In 1997, Stroman took a director's position with the U.S. Department of Transportation. In 2001, he joined the General Accounting Office as managing director for the Office of Opportunity and Inclusiveness. He returned to the House in 2009, where he served as staff director, Committee on Oversight and Government Reform, before joining the Postal Service.

AMERICAN OVERSIGHT

Stroman earned his Juris Doctorate from Rutgers University Law Center.

Jan Rader

Jan Rader joined the Huntington Fire Department in August of 1994. Rader is the first woman to reach the rank of Chief for a career department in the State of West Virginia. She holds an associate's degree in Occupational Development from Marshall University and an Associate's Degree of Science in Nursing from Ohio University. Jan holds many fire service certifications and is also a Fire and EMS Instructor in the State of West Virginia. Since November of 2014 Chief Rader has been serving as a member of the Mayor's Office of Drug Control Policy. The purpose of this task force is to address drug addiction in Huntington and the surrounding communities and create a holistic approach involving prevention, treatment and law enforcement. Jan recently came to national prominence after the release of the short documentary "Heroin(e)" by Netflix in September of 2017. Then in April of 2018, she was chosen as one of Time Magazine's list of the 100 most influential people in the world.

Governors Only: Council of Governors and Opportunity Zones
Friday, July 20
3:45 to 5 p.m.
Eldorado: Grand Ballroom B
Invitation Extended to Governors Plus One Staff Member

Governors Only: Council of Governors and Opportunity Zones

Overview

The co-chairs of the Council of Governors will provide a read-out of discussion items from the Thursday's Council of Governors Plenary Session, which will focus on actions and recommendations agreed to/discussed as it relates to the Council's State-Federal Catastrophic Disaster Working Group.

Following the discussion, the remainder of the session will examine how governors can work in tandem with investors and fund managers, entrepreneurs and business owners, anchor institutions, property developers, philanthropies and community stakeholder to help a new Opportunity Zone investment ecosystem emerge.

The Tax Cuts and Jobs Act authorized a new program to provide incentives for investors to re-invest unrealized capital gains into Opportunity Funds for designated low-income communities. Earlier this year governors had the opportunity to designate which low-income communities will be qualified opportunity zones and the U.S. Department of Treasury finalized all the selected zones in June. Governors now have the unique ability to develop comprehensive strategies for nurturing a new market around a new asset class— their Opportunity Zones—to take shape.

****You are opening the discussion on opportunity zones.**

Format

- 3:45 p.m. — Opening Remarks and Introductions – Council of Governors
  - Governor Mary Fallin, Oklahoma
  - Governor Dannel Malloy, Connecticut
- 3:55 p.m. — Discussion – Council of Governors
- 4:15 p.m. — Opening Remarks – Opportunity Zones
  - Governor Brian Sandoval, Nevada
- 4:20 p.m. — Speaker Presentations – Opportunity Zones
  - Sarah Bianchi, Senior Advisor, The Governance Project
  - John Lettieri, President, The Economic Innovation Group
- 4:40 p.m. — Discussion – Opportunity Zones

Media

This session is closed to press.

Takeaway(s)

This session will provide governors a read out of the actions taken by the Council of Governors, as well as a platform to explore successful strategies for engaging the marketplace and recruiting investment into qualified Opportunity Zones.

Contacts: Caroline Sevier, (202) 624-5376 or csevier@nga.org

AMERICAN OVERSIGHT

Presenter Bios

Sarah Bianchi

Sarah Bianchi began her career in the Clinton White House on the Domestic Policy Council and has served in a variety of White House and campaign policy roles, including deputy policy director for Vice President Gore and national policy director for the Kerry presidential campaign. During the Obama administration, she served as deputy assistant to the president for economic policy and director of policy for Vice President Biden.

Bianchi has also served in a number of private sector roles, including eight years on Wall Street where she was a managing director at BlackRock and an investment advisor at Eton Park Capital Management. She also served as global head of policy development at Airbnb, where she led a company-wide policy development process that implemented over 20 global policies around taxes, home-sharing regulations, trust and safety, data and transparency and Airbnb's 90-day racial discrimination task force.

Bianchi currently serves as a senior advisor at The Governance Project, focused on implementing the new Opportunity Zone law. Sarah is also serves as chair of the Policy Advisory Group at the Biden Institute. She graduated magna cum laude from Harvard University and is on the board at Harvard's Institute of Politics. She lives in Arlington, Va.

John Lettieri

John Lettieri is co-founder and president of the Economic Innovation Group (EIG). He leads EIG's policy development, economic research and legislative affairs efforts to study and address regional inequality and the decline of economic dynamism in the United States.

Lettieri's career in public policy has included time in both the public and private sectors working with a diverse set of policymakers, entrepreneurs, investors and global business leaders.

Prior to EIG, Lettieri was the vice president of Public Policy and Government Affairs for a leading business association, the Organization for International Investment (OFII), where he led the organization's state and federal policy work on such issues as tax reform, trade, investment promotion and manufacturing. Before joining OFII, Lettieri was director of Public and Government Affairs for a global aerospace manufacturer. He previously served as a foreign policy aide to former U.S. Senator Chuck Hagel, who was then a senior member of the United States Senate Foreign Relations Committee.

Lettieri is a graduate of Wake Forest University where he studied political science and global commerce. He serves on the Board of Regents at The Fund for American Studies, the Board of Directors for Lincoln Network and the Board of Directors for Friends of the National Zoo. He lives with his wife and children in Washington, D.C.

AMERICAN OVERSIGHT

Governors Only—Opportunity Zones

Friday, July 20, 3:45-5 p.m.

Governor Sandoval

[SANDOVAL OPENS AND CALLS MEETING TO ORDER]

[COG READ OUT—TBD BY NGA]

FOR OUR NEXT ORDER OF BUSINESS, WE WILL TURN TO A DISCUSSION ON THE NEWLY ESTABLISHED OPPORTUNITY ZONES PROGRAM, WHICH CAME OUT OF THE TAX REFORM BILL LATE LAST YEAR.

OUR STATES HAVE ALL MADE SELECTIONS FOR WHICH AREAS WOULD BE BEST SERVED BY RECEIVING AN OPPORTUNITY ZONES DESIGNATION, AND NOW WE MUST TURN OUR ATTENTION TO HOW TO BEST LEVERAGE AVAILABLE POLICY TOOLS TO GUARANTEE ECONOMIC DEVELOPMENT AND JOB GROWTH IN THESE LESSER SERVED COMMUNITIES.

AMERICAN OVERSIGHT

JOINING US TODAY TO PROVIDE POLICY AND MESSAGING CONSIDERATIONS AS YOU DEVELOP YOUR STATE OPPORTUNITY ZONES' STRATEGIC PLAN ARE TWO EXPERTS IN THE ECONOMIC DEVELOPMENT FIELD.

FIRST, WE HAVE JOHN LETTIERI, THE PRESIDENT AND CO-FOUNDER OF THE ECONOMIC INNOVATION GROUP. AT EIG, JOHN LEADS THE ORGANIZATION'S POLICY DEVELOPMENT, ECONOMIC RESEARCH AND LEGISLATIVE AFFAIRS EFFORTS.

PRIOR TO CO-FOUNDING EIG, JOHN WAS THE VICE-PRESIDENT OF PUBLIC POLICY AT THE ORGANIZATION FOR INTERNATIONAL INVESTMENT AND SERVED AS A FOREIGN POLICY AIDE FOR FORMER U.S. SENATOR CHUCK HAGEL.

NEXT, WE HAVE SARAH BIANCHI, SENIOR ADVISOR AT THE GOVERNANCE PROJECT, WHERE SHE HAS BEEN FOCUSED ON THE IMPLEMENTATION OF THE OPPORTUNITY ZONES PROGRAM.

AMERICAN OVERSIGHT

PRIOR TO JOINING THE GOVERNANCE PROJECT, SARAH SERVED IN THE CLINTON WHITE HOUSE ON THE DOMESTIC POLICY COUNCIL AND IN THE OBAMA ADMINISTRATION AS THE DEPUTY ASSISTANT TO THE PRESIDENT FOR ECONOMIC POLICY AND THE DIRECTOR OF POLICY FOR VICE PRESIDENT BIDEN.

OUTSIDE OF HER PUBLIC SERVICE WORK, SARAH HAS WORKED AS A MANAGING DIRECTOR AT BLACKROCK, AN INVESTMENT ADVISOR AT ETON PARK CAPITAL AND MOST RECENTLY AS THE GLOBAL HEAD OF POLICY DEVELOPMENT AT AIRBNB.

I WILL NOW TURN IT OVER TO JOHN TO BEGIN FOR HIS OPENING REMARKS.

[TRANSITION TO JOHN LETTIERI FOR HIS REMARKS]

[TRANSITIONS BACK TO SANDOVAL]

AMERICAN OVERSIGHT

THANK YOU, JOHN. WE WILL NOW TURN TO SARAH FOR SOME INSIGHTS ABOUT WHAT SPECIFIC STRATEGIES AND POLICIES GOVERNORS CAN CONSIDER AS THEY DEVELOP THEIR OPPORTUNITY ZONES PLAN.

[TRANSITIONS TO SARAH BIANCHI FOR HER REMARKS]

[TRANSITIONS BACK TO SANDOVAL]

THANK YOU, SARAH. I WOULD NOW LIKE TO OPEN UP THE FLOOR TO ALL GOVERNORS FOR ANY QUESTIONS THAT YOU MIGHT HAVE FOR OUR PANELISTS, OR TO HEAR ABOUT ANY SPECIFIC STRATEGIES THAT YOUR STATE MIGHT ALREADY BE EMPLOYING.

[SANDOVAL CONCLUSION]

THANK YOU TO EVERYONE WHO PARTICIPATED IN TODAY'S CONVERSATIONS. I LOOK FORWARD TO SEEING YOU ALL AT THE SOCIAL EVENTS TONIGHT, AND FOR ANOTHER GREAT DAY OF DIALOGUE TOMORROW.

AMERICAN OVERSIGHT

Nevada Opportunity Zones Highlights

State highlights for designation process

- Created a website with an interactive map to solicit public comment on nominated tracts
- Worked with local governments to develop a priority list
- Worked with national partners, including The Economic Innovation Group, the Governance Project and the Urban Institute to come up with a model to rank census tracts with need and likelihood of investment scores.
- Held informational sessions and a town hall in low-income areas to promote awareness

How Nevada plans to shape policies and encourage investment in Opportunity Zones?

Be Strategic

Evaluating and align workforce programs, zoning and permitting and treat the designations as the first step in the process

Convene and collaborate

Successful Ozones will require long-term efforts that include participation between the public, private and philanthropic sectors

Assign a point person for Opportunity Zones and encourage working groups between the state and local governments. In Nevada, the Governor's Office of Economic Development is going to coordinate working groups to share best practices and promote new ideas.

Continue to work with national groups such as the Economic Innovation Group as the Opportunity Zone regulations are drafted and the program is implemented

Think broadly

Potential applications for investors is very broad with very few exceptions. From affordable housing to tech startups, if an investor can realize a gain, Ozones might be a possibility.

What is Nevada currently working on

- Forming working groups consisting of Economic Development, Business and Industry, Local Governments to develop best practices
- Developing an agenda to host an Opportunity Zone Conference similar to the conference Colorado hosted in June

On-going concerns regarding Opportunity Zones

- Still waiting on final guidance from the Treasury to provide guidance on many issues including:
    - Self-Certification requirements of Opportunity Funds

AMERICAN OVERSIGHT

    - Grace periods for Opportunity Fund and Opportunity Zone Business to make investments
    - Some definitions including meaning of “substantially all”, “substantial portion”, and “active”
- Displacement concerns in low-income neighborhoods. There is a fear that too much growth too fact will only act to displace low-income residents without creating opportunities for them.

AMERICAN OVERSIGHT

Helping Nevada get a Piece of a Trillion Dollar Pie through Housing Incentives.

On June 14th, sixty one of Nevada's low-income census tracts received official designation as Qualified Opportunity Zones (QOZ) by the U.S. Department of Treasury and the IRS; but what does this mean for the state? The Opportunity Zone (O-Zone) Program was created by the Tax Cuts and Jobs Act signed by the president at the end of 2017. This new incentive encourages long-term private investment of capital gains into projects, businesses, and property development in low-income areas that continue to be left behind even in our strong economy. While as a whole our state and country are experiencing one of the lowest unemployment rates of all time, nearly 35 million Americans live in distressed QOZ communities. According to the 2011-2015 American Community Survey, almost one third of the population in the O-Zone tracts live in poverty, plus these tracts have a unemployment rate of 1.6 times higher and have an average income of 37% lower than the typical U.S. census tract.

The goal of the O-Zone program is to change the course of these low-income tracts through new private investment. Currently it is estimated that over 3 trillion dollars of unrealized capital gains are pent up in investment in order to postpone tax burden. The O-Zone program allows significant tax incentives for capital gains that are quickly reinvested into these designated census tracts; tax incentive include:

> (1) The deferral of the payment of taxes on capital gains until the sooner of December 31, 2026 or the date the investment is removed from the O-Zone.
>
> (2) A reduction in the total taxes paid on the capital gains through an increase in basis of 10% for investments lasting 5 years, and 15% (an additional 5%) for investments of 7 years or longer.
>
> (3) The exclusion of capital gain tax on appreciation of the investment as long as it remains in the designated low-income zones for 10 years.

With all 50 states, the District of Columbia, and 5 territories having designated O-Zone tracts there are many zones for investors to choose from. The race is on across the country to draw millions, if not billions, of dollars of investment into local zones. States, municipalities, and local economic development organizations alike are striving to devise the most attractive complementary programs to couple with O-Zone investments and bring the funds to their states and cities. In addition, being a very new and quick to market program, these same organizations are tasked with getting the word out and appealing to investors.

With this in mind, the Nevada Housing Division may be among the first in the country to launch a new twist to their current low-income housing program to help attract O-Zone investment into the state. Specifically, the division administers the federal allocation of the Low Income Housing Tax Credit (LIHTC) Program for Nevada; LIHTC incentivizes development of affordable housing for low income individuals. In Nevada's distressed neighborhoods housing is possibly one of the most critical resources needed to turn these communities around. To address this head on, the housing division is launching an extra round of LIHTC allocation that encourages developers to utilize O-Zone Investment. In this additional round, launching in mid-July with applications due in early October, developers who propose housing projects that meet all traditionally required criteria and have secured O-Zone financing will be rated higher and are more likely to receive the LIHTC incentive. Over the past 6 months tax, legal and investment consultants alike have been touting that those who are nimble and quickly launch into O-

AMERICAN OVERSIGHT

Zone investments will be the biggest winners. The coupling of housing and O-zone incentives is a great first step for Nevada to lead the O-Zone race.

To find out more on these programs go to:

- Federal Opportunity Zone Resources https://www.cdfifund.gov/Pages/Opportunity-Zones.aspx
- State of Nevada Opportunity Zones http://www.diversifynevada.com/programs-resources/opportunity-zones
- State of Nevada Housing Division Low Income Housing, LIHTC: https://housing.nv.gov/programs/LIH/Qualified_Allocation_Plans/

Potential highlight: "The creation of Opportunity Zones is one of the most significant provisions of the Tax Cut and Jobs Act. Incentivizing private investment into these low-income communities can be transformational, stimulating economic growth and job creation across the country," said Secretary Steven T. Mnuchin. "This Administration will work diligently with states and the private sector to encourage investment and development in Opportunity Zones and other distressed communities so that they may enjoy the benefits of robust economic growth."

AMERICAN OVERSIGHT

Social Event: La Noche de Fuego (The Night of Fire)
Friday, July 20
6 to 9 p.m.
Fort Marcy Park

La Noche de Fuego (The Night of Fire)

Overview

La Noche de Fuego is a very special evening, celebrating a unique tradition that features the sights, sounds, flavors and culture of New Mexico.

****You are giving opening remarks.**

Format

- 6 p.m. — Balloons and Bubbles Reception
  - Paying homage to Albuquerque's designation as "Hot Air Balloon Capital of the World," local pilots will take the field during cocktail hour and share with guests the fascinating experience of watching these gentle giants of billowing nylon inflate.
- 7 p.m. — Dinner
  - Guests will be seated at "harvest tables" while they enjoy an array of New Mexican favorites.
- 8:15 p.m. — Show
  - The burning of the effigy of Tío Coco, aka Old Man Gloom: Since 1924, this unique cultural event, staged yearly on the Friday before Labor Day, has become a tradition for Santa Feans. Some deem the cathartic burn as the beginning of a new year, a brand-new start that is free from the concerns of the past year. As darkness falls, the music begins, and fire dancers taunt an enormous 50-foot-tall effigy until at last the flames catch and fireworks light up the sky, burning away your worries, hardships and disappointments.
  - All meeting participants will have the opportunity to write down their woes and deposit them into "Gloom Deposit Boxes" placed throughout the Convention Center. They will all be transported to the event and placed into Tío Coco before the spectacle begins.

Transportation

Governors may arrive by private vehicle; secured parking will be available. All other attendees should utilize the shuttle service provided from all host hotels between the hours of 5:45 and 9:15 p.m.

Dress

Dress for this event is "Southwest casual." Please note that this event will take place outdoors. Closed-toe shoes and a light sweater or jacket are recommended.

Media

This event is open to invited press.

Saturday Sessions

AMERICAN OVERSIGHT

NV-DA-20-0615-A-004398

Governors Only (Part 1): NGA's Cross Divisional Response on School Safety
Saturday, July 21
8:30 to 8:45 a.m. (at beginning of second governors-only session)
Eldorado: Grand Ballroom B
Invitation Extended to Governors Plus One Staff Member

Governors Only (Part 1): NGA's Cross Divisional Response on School Safety

Overview

In order to align efforts to support governors and their staff as they seek to tackle this difficult and contentious issue, the NGA Center has developed a cross-divisional project that pulls on the resources and expertise of the Education, Health and Homeland Security and Public Safety divisions.

The divisions are working together to support provide tailored technical assistance to governors' offices and state officials to identify and assess gaps and challenges and strengthen state partnerships, planning, policies and practices across agencies. Comprehensive partnership and policy frameworks begin with prevention-based activities that foster greater collaboration across sectors at the family-school-community level. Similarly, preparation requires cross-team incident management structures, implementation of school safety protocols and procedures and training. Finally, cross-sector coordination and collaboration is essential in responding to a crisis and in the aftermath.

The NGA Center's three-pronged partnership approach will also allow states to explore different school safety and prevention models and best practices and identify ways to leverage existing federal and state resources. This project will further allow states to develop working relationships and learn from each other's unique challenges and approaches to school safety and prevention. With the NGA Center's assistance, governors' offices, state education, health, public safety and homeland security departments and stakeholders will be better positioned to ensure that school environments are safe and secure.

Governors Only (Part 2): How the Supreme Court Term Will Impact the States: Wayfair, Murphy and Beyond
Saturday, July 21
8:45 to 10 a.m.
Eldorado: Grand Ballroom B
Invitation Extended to Governors Plus One Staff Member

Governors Only (Part 2): How the Supreme Court Term Will Impact the States: *Wayfair, Murphy* and Beyond

Overview

The Supreme Court just finished its term, issuing more decisions impacting states and federalism than in recent memory. This session will provide a forum for governors to discuss implications from the term generally, but with special focus on those major opinions that affect states such as *South Dakota* (remote sellers/sales tax), *Janus* (union dues), *Husted* (voting roles), *Gill* (gerrymandering) and *Murphy* (sports betting). Eric Citron will summarize the court's decisions, and will be joined by another participant, A.G. Burnett, who will speak about the opportunities and regulatory obligations for states going forward post-*Murphy*.

**You are giving welcoming remarks and introductions.

Format

- 8:45 a.m. — Opening remarks and introductions
  - Governor Brian Sandoval, Nevada, Moderator
- 8:55 a.m. — Presentations
  - Eric Citron, Partner, Goldstein & Russell
  - A.G. Burnett, Partner, McDonald Carano
- 9:15 a.m. — Open Discussion
- 9:55 a.m. — Adjourn

AMERICAN OVERSIGHT

Presenter Bios

Eric Citron

Eric Citron clerked on the Supreme Court of the United States for Associate Justices Sandra Day O'Connor and Elena Kagan. Before his time at the Supreme Court, Eric was a senior associate in the Litigation/Controversy Department and a member of the Appellate and Supreme Court Litigation and Government and Regulatory Litigation Practice Groups at WilmerHale. He has also served as counsel to the assistant attorney general in the Antitrust Division of the United States Department of Justice, where he drafted position papers, policy memoranda and speeches, and advised on issues related to policy, appeals, inter-agency coordination, international relations and litigation. Immediately following law school, Citron clerked for the Honorable James Robertson of the U.S. District Court for the District of Columbia, and the Honorable David S. Tatel of the U.S. Court of Appeals for the District of Columbia Circuit.

A.G. Burnett

A.G. Burnett is a partner at McDonald Carano. From 2012 to 2017, he was the chair of the Nevada Gaming Control Board (NGCB). The NGCB, along with the Nevada Gaming Commission, oversees all forms of gaming in the state. Prior to his appointment to the NGCB, Burnett served as senior deputy attorney general in the Gaming Division of the Nevada Attorney General's Office. In that post he represented the NGCB, the Nevada Gaming Commission and the Nevada Commission on Sports.

AMERICAN OVERSIGHT

Governors Only—NGA's Response to School Safety & SCOTUS: Implications for the States

Saturday, 8:30am – 10:00am

Governor Sandoval

[GOV SANDOVAL]

GOOD MORNING, GOVERNORS.

THANK YOU FOR JOINING US ON THIS EARLY MORNING. WE HAVE AN EXCITING DAY AHEAD.

BEFORE WE HAVE A CONVERSATION ABOUT THIS YEAR'S SUPREME COURT RULINGS AND HOW STATES CAN RESPOND, I WANT TO TURN IT OVER TO NGA'S CEO SCOTT PATTISON TO DISCUSS HOW NGA IS ADDRESSING THE SCHOOL VIOLENCE EPIDEMIC THROUGH BIPARTISAN ASSISTANCE TO STATES.

AMERICAN OVERSIGHT

THIS EFFORT INCLUDES THREE DIVISIONS FROM THE CENTER FOR BEST PRACTICES: HOMELAND SECURITY AND PUBLIC SAFETY, EDUCATION AND HEALTH.

SCOTT, WHAT CAN YOU TELL US ABOUT THIS ISSUE THAT WEIGHS ON THE MINDS OF EVERYONE IN THIS ROOM?

[SCOTT PATTISON REMARKS]

THANK YOU, SCOTT. SPEAKING ON BEHALF OF MY COLLEAGUES, WE APPRECIATE KNOWING THAT NGA CAN QUICKLY MOBILIZE ITS RESOURCES TO PROVIDE SUPPORT TO GOVERNORS WHEN FACED WITH AN UNANTICIPATED CHALLENGE.

I KNOW HOW MUCH WORK HAS BEEN PUT INTO THE SCHOOL SAFETY RESPONSE, AND I WANT TO THANK YOU FOR THESE EFFORTS.

AMERICAN OVERSIGHT

NOW, WE WILL TURN TO A DISCUSSION ABOUT THE SUPREME COURT TERM THAT JUST CONCLUDED AT THE END OF JUNE.

NO TERM IN RECENT MEMORY HAS RESULTED IN THIS MANY DECISIONS HAVING SUCH SIGNIFICANT IMPLICATIONS FOR GOVERNORS AND OUR STATES.

JOINING US TODAY TO SHARE THEIR INSIGHTS ARE TWO EXPERTS WHO ARE PREPARED TO DISCUSS WHAT GOVERNORS SHOULD BE THINKING ABOUT AS A STATE-SPECIFIC RESPONSE TO SEVERAL KEY DECISIONS OF THE COURT.

NOTE: GOVERNOR DAUGAARD MAY WANT TO INTRODUCE ERIC CITRON IN WHICH CASE, JUST RECOGNIZE GOVERNOR DAUGAARD AND THEN INTRODUCE A.G. BURNETT.

AMERICAN OVERSIGHT

FIRST, IT IS MY PLEASURE TO INTRODUCE ERIC CITRON. ERIC IS A PARTNER AT THE FIRM OF GOLDSTEIN & RUSSELL, IN THEIR SUPREME COURT PRACTICE.

PREVIOUSLY, ERIC CLERKED FOR TWO JUSTICES OF THE SUPREME COURT: SANDRA DAY O'CONNOR AND ELENA KAGEN, FOLLOWING EARLIER CLERKSHIPS IN THE FEDERAL DISTRICT AND APPEALS COURTS.

I THINK IT'S FAIR TO SAY THAT ERIC KNOWS HIS WAY AROUND A FEDERAL COURTROOM.

MOST RELEVANT TO OUR SESSION TODAY, ERIC WAS A COUNSEL FOR THE PETITIONER IN THE RECENTLY ANNOUNCED *SOUTH DAKOTA V. WAYFAIR* OVERTURNING *QUILL* AND *BELLA HESS,* WHICH NOW ALLOWS STATES TO COLLECT TAXES ON SALES FROM COMPANIES WITHOUT A PHYSICAL PRESENCE IN A STATE.

AMERICAN OVERSIGHT

NEXT, IT IS MY PLEASURE TO INTRODUCE MY FRIEND A.G. BURNETT.

A.G. IS A PARTNER AT THE FIRM OF MCDONALD CARANO, AND FROM 2012 UNTIL LAST DECEMBER, A.G. WAS CHAIR OF THE NEVADA GAMING CONTROL BOARD.

I INVITED HIM TO COME TODAY TO SHARE HIS PERSPECTIVES ON THE SUPREME COURT'S DECISION IN THE *MURPHY* DECISION, ALLOWING STATES TO DECIDE WHETHER TO ALLOW SPORTS GAMING.

I WILL NOW TURN IT OVER TO ERIC TO BEGIN FOR HIS OPENING REMARKS.

[ERIC CITRON REMARKS]

AMERICAN OVERSIGHT

[GOV SANDOVAL]

THANK YOU, ERIC.

NOW, I WILL TURN IT OVER TO A.G. FOR SOME INSIGHTS ABOUT WHAT SPECIFIC STRATEGIES AND POLICIES GOVERNORS CAN CONSIDER AS A RESPONSE TO THE *MURPHY* DECISION.

[A.G. BURNETT REMARKS]

THANK YOU, A.G.

I WOULD NOW LIKE TO OPEN UP THE FLOOR TO ALL GOVERNORS FOR QUESTIONS FROM OUR SPEAKERS, OR TO SHARE ANY SPECIFIC STRATEGIES THAT YOUR STATE HAS ALREADY EMPLOYED.

[OPEN DISCUSSION]

AMERICAN OVERSIGHT

[GOV SANDOVAL]

THANK YOU, EVERYONE, AND ESPECIALLY THANKS TO ERIC AND A.G.

WE GAINED MANY VALUABLE INSIGHTS INTO HOW TO RESPOND TO THE RECENT DECISIONS FROM THE SUPREME COURT.

WE ARE NOW ADJOURNED.

Bloomberg BNA Daily Report for Executives™

Electronic Commerce

States Urged to Proceed With Caution After 'Wayfair'

By Brenna Goth

Snapshot

- Next year could be big for tax overhauls
- Consumers, retailers need clarity

A week after the U.S. Supreme Court lifted a major barrier to the collection of sales taxes from remote sellers, the question remains: How will states respond?

The majority opinion in *South Dakota v. Wayfair*, written by Justice Anthony Kennedy, raises legal and logistical questions. At its heart, the decision says a state can require a business to collect sales taxes even if it doesn't have a physical presence there.

That change could help make 2019 the biggest year for state tax overhauls in "many many years," said Max Behlke, director of budget and tax for the National Conference of State Legislatures. Behlke spoke June 28 at the organization's Task Force on State and Local Taxation meeting in Lake Tahoe, Nev., among the first gatherings of lawmakers on the decision.

Legislators and other panelists urged states to proceed with caution and to look carefully at their laws. The high court's opinion provides clues to how states can design their remote sales tax collection, but much is still unknown, they said.

The 5-4 majority in *Wayfair* suggested strongly that South Dakota's law would pass constitutional muster; the state's model imposes the tax collection threshold at 200 separate transactions or $100,000 in in-state sales. But the court stopped short of formally declaring that South Dakota's law, which dozens of states have mimicked already, was valid in the absence of *Quill Corp. v. North Dakota*. The court just made clear that *Quill* was no longer part of any commerce clause test for when states may impose taxes.

Accordingly, the South Dakota Supreme Court still has to bless the state's economic nexus model before it can become effective. Still, many project that states will flock to copy South Dakota's model.

Model After South Dakota

States have varying levels of preparedness to move on remote seller tax collection, Scott Drenkard, director of state projects at the Tax Foundation, said during a panel. He said state reactions have already ranged the spectrum.

Some lawmakers in Louisiana, for example, pushed for quick changes to help with revenue issues, while Arkansas is taking a more deliberative approach, Drenkard said. He cautioned against states rushing choices that could place an undue burden on businesses.

"If there was ever a state that was not prepared for the *Wayfair* decision to come down, Louisiana was certainly that state," Drenkard said.

Having sensible rules means more companies will follow them voluntarily, Drenkard said. It's in a state's best interest to follow the criteria Kennedy laid out in his opinion, he said.

Generally, states that model their remote seller statutes after South Dakota's should be in the clear, Brian Galle, a professor at Georgetown University Law Center, told attendees. That law includes a collection obligation only above a certain threshold, no retroactive liability, and compliance with the Streamlined Sales and Use Tax Agreement.

AMERICAN OVERSIGHT NV-DA-20-0615-A-004409

That doesn't mean South Dakota's model is the only option, Galle said. But the opinion only gives hints about what states can do.

Imposing retroactive taxes, for example, could raise issues unless the statute is very narrow, Galle said. Retroactive collection could result in double taxation, he said, because retailers don't know if customers have already reported use taxes to their states.

Steve Kranz, a partner at McDermott Will & Emery LLP in Washington, said states should consider protecting against retroactivity and should emphasize that the rules also apply to foreign sellers. He also recommended implementing voluntary agreements with businesses to start collecting taxes.

Implementation Takes Time

Even states prepared to collect taxes from remote sellers could face delays. In Wyoming, implementation "is not going to happen overnight," said Dan Noble, director of the Wyoming Department of Revenue. The state has two pending lawsuits regarding the legislation, including one with Wayfair.

"We've got to get past this issue of litigation first," Noble told Bloomberg Tax.

The main concern—physical presence—was decided by the Supreme Court. But the question is whether companies will raise the burden issue as a secondary claim, Noble said.

There are other logistical issues that take time. Current staffing would be overwhelmed with registrations from businesses, he said.

For now, the state will work with companies to voluntarily collect the taxes.

The Streamlined Sales Tax Governing Board Inc. is working with its 24 member states on messaging and implementation, Executive Director Craig Johnson said. The group is also reaching out to non-members to offer services.

Johnson said he expects a number of states to start down the path of joining by the end of the year. Specifics, though, depend on individual legislatures.

"It's going to take time for states to join," Johnson told Bloomberg Tax.

One highlight of the organization is a common application for sellers to register with states. That's the first thing businesses have to do, which means it's convenient to fill out one application for two dozen states, Johnson said.

'No One Will Understand'

States should try to provide clarity for both buyers and sellers, panelists said. Galle raised the issue of states that have minimum transaction thresholds to collect taxes.

That could be confusing in marketplaces with individual vendors. Customers may not understand if transactions are aggregated by platform or by seller to determine if they owe taxes.

"I suspect that no one will understand that," Galle said.

Galle also suggested that customers be alerted to the taxes owed while they're browsing and not just at checkout.

Retailers are also raising questions about implementation and compliance since the court decision, said Rachelle Bernstein, vice president and tax counsel at the National Retail Federation. Retailers are looking for centralized information on which states are starting to collect taxes and when, she said, as well as how to register.

Businesses are also are looking for simplicity in compliance, Bernstein said. They need to know when to collect taxes during sales to avoid paying later.

"It's coming out of your bottom line," she said.

Plenary VI (Part 1): Best Practices: Infrastructure Funding
Saturday, July 21
10:15 to 10:45 a.m.
Convention Center: Sweeney Ballroom C-F

Plenary VI (Part 1): Best Practices: Infrastructure Funding

Overview

When it comes to infrastructure investment, the relationship between governors and company executives and the roles that both actors play should not be ignored. In order to achieve their goals, governors constantly work with one another as well as leaders in the infrastructure industry, both in the U.S. and across the globe, to create the best plan for their citizens. Therefore, the infrastructure projects undertaken in individual states are interconnected with the situations both at home and abroad. Moreover, funding opportunities from international investors and state leadership for these projects benefit the entire nation.

NGA Global welcomes Shemara Wikramanayake, chair of Macquarie Foundation Group and head of Macquarie Asset Management, to speak about the interconnectedness of infrastructure projects regionally and internationally.

****You are moderating an armchair discussion. Remarks and scripts are forthcoming.**

Format

- 10:15 a.m. Armchair Discussion
  - Governor Brian Sandoval, Nevada
  - Shemara Wikramanayake, Chair, Macquarie Foundation Group; and Head, Macquarie Asset Management
- 10:30 a.m. Q&A Session

Takeaway(s)

This session will be a follow-up from the discussion on Thursday. International companies and other infrastructure stakeholders recognize governors as the leaders of our nation's future infrastructure buildout. This session aims to highlight opportunities for collaboration and creative approaches to infrastructure development at the state level.

Media

This session is open to the press.

Contact: Abigail Hunter, (202) 624-5301 or ahunter@nga.org

AMERICAN OVERSIGHT

Presenter Bio

Shemara Wikramanayake

Shemara Wikramanayake joined Macquarie in 1987 and worked in Macquarie Capital for 20 years before being appointed head of Macquarie Asset Management in 2008.

As head of the Macquarie Infrastructure and Real Assets business in New York for four years, Wikramanayake led the establishment of Macquarie's infrastructure and private equity funds in the U.S. and Canada.

Before that, Wikramanayake led Macquarie Capital's prudential team for four years, reviewing all transactions in which the business took a principal position. She also established and led Macquarie's corporate advisory offices in New Zealand, Hong Kong and Malaysia.

AMERICAN OVERSIGHT

Plenary VI (Part 2): Subnational Leaders Idea Exchange
Saturday, July 21
11 a.m. to 12:15 p.m.
Convention Center: Sweeney Ballroom C-F

Plenary VI (Part 2): Subnational Leaders Idea Exchange

Overview

NGA Global continues to stress the importance of the relationship between subnational governments to the federal government. In order to sustain economic growth, leaders must collaborate both domestically and internationally. By joining together, leaders can solve common issues through cross-border collaboration. Challenges, such as an aging population, rural connectivity and the future of work, are not unique to the United States. As we overcome these similar hurdles in different countries, collaboration becomes necessary.

General Secretary Annegret Kramp-Karrenbauer, will deliver the opening remarks in this session. As a former minister-president, a position which is equivalent to a governor, she will discuss the German-U.S. relationship. German ties to states such as California, Texas, Pennsylvania, Illinois and New York, have created approximately 228,000 jobs and helped foster innovation across the Atlantic. Building on the synergies created this past year in Providence, Rhode Island and Washington, D.C., at NGA's last subnational exchanges and the dialogue on North American relations, the panel following her remarks will feature subnational leaders from Japan, Canada, Mexico and Australia.

Format

- 11:15 a.m. — Introductory Remarks
  - Governor Brian Sandoval, Nevada
- 11:20 a.m. — Thank You from Kenyan Delegation
  - H.E. Josphat Nanok, Governor of Turkana and Chairman of Council of Governors in Kenya
- 11:30 a.m. — Keynote
  - Annegret Kramp-Karrenbauer, General Secretary, Christian Democratic Party, Germany
- 11:45 a.m. — Q&A Session with General Secretary Kramp-Karrenbauer

Contact: Abigail Hunter, (202) 624-5301 or ahunter@nga.org

AMERICAN OVERSIGHT

Presenter Bio

Annegret Kramp-Karrenbauer

Annegret Kramp-Karrenbauer serves as general secretary of the Christian Democratic Union (CDU). She was nominated by Angela Merkel and elected at the CDU party conference in February 2018, where she received 98.87 percent of the delegate votes.

General Secretary Kramp-Karrenbauer was the minister-president of Saarland from 2011 to 2018, making her the first woman to lead the government of Saarland and only the fourth woman to govern a German state.

On the national level, General Secretary Kramp-Karrenbauer also served as Commissioner of the Federal Republic of Germany for Cultural Affairs under the Treaty on Franco-German Cooperation between 2011 and 2014. She continues to be a member of the German-French Friendship Group set up by the German Bundesrat and the French Senate.

General Secretary Kramp-Karrenbauer was a CDU delegate to the Federal Convention for the purpose of electing the President of Germany in 2012 and 2017. Under her leadership, the CDU won 40.7 percent of the vote in the 2017 state elections, up from 35.2 percent in 2012.

General Secretary Kramp-Karrenbauer studied law and political science at the Universities of Trier and Saarbrücken from 1982 to 1990, and she earned a Master of Arts in Political Science and Public Law in 1990.

Governors and Chiefs of Staff Lunch and Business Session: Transition
Saturday, July 21
12:15 to 1:30 p.m.
Convention Center: Sweeney Ballroom B
Invitation Extended to Governors Plus One Senior Staff Member

Governors and Chiefs of Staff Lunch and Business Session

Overview

A special joint lunch for governors and chiefs of staff. The program will feature a moderated panel of former governors who will give remarks focused on governing during the final year in office and on life after being governor. There will be ample time for question and answer and open discussion.
Moderated by NGA CEO and Executive Director Scott D. Pattison. Panel to include former Governors George Allen (Va.), Jim Edgar (Ill.), John Engler (Mich.) and Jane Swift (Mass.).

**You are giving opening remarks.

Format

- 12:15 p.m. — Networking Lunch and Introductions
- 12:40 p.m. — Opening Remarks and Introductions
  - Governor Brian Sandoval, Nevada
  - Scott Pattison, CEO, NGA
- 12:50 p.m. — Moderator Questions/Panelist Answers/Discussion
  - Governor George Allen, Virginia
  - Governor Jim Edgar, Illinois
  - Governor John Engler, Michigan
  - Governor Jane Swift Massachusetts
- 1:15 p.m. — Audience Questions

Takeaway(s)

Governors and chiefs of staff will receive guidance on how to address the special challenges and opportunities during the final six months of an administration, as well as how to approach opportunities after leaving the office of governor.

Media

This session closed to the press.

AMERICAN OVERSIGHT

Presenter Bios

George Allen (Virginia, 1994-1998)

George Allen was born in Whittier, Calif. He attended the University of Virginia, where he graduated with distinction in 1974 with a bachelor's degree in history and earned his law degree in 1977. Allen later established his own law practice in Charlottesville. He was first elected to public office as a state representative in 1983 and held the seat in the Virginia House of Delegates for nine years. He was elected to the U.S. House of Representatives in a special election on Nov. 5, 1991, and elected governor two years later. Allen was elected to the U.S. Senate in 2000. Since leaving the U.S. Senate, Allen has continued to advocate for the issues and ideas he has always fought for. He launched the American Energy Freedom Center, whose mission is to advocate positive ideas for American jobs, economic prosperity and promote increased freedom, opportunity and competition in the development and use of our vast energy resources. Allen also serves as the Reagan Ranch Presidential Scholar for the Young America's Foundation.

Jim Edgar (Illinois, 1991-1999)

Jim Edgar was born in Vinita, Okla., and was raised in Charleston, Ill. He earned a bachelor's degree in history from Eastern Illinois University, where he served as student body president. Edgar was elected to the Illinois House of Representatives in 1976 and reelected in 1978. In 1981 he was appointed secretary of state. He was elected to that position in 1982 and was reelected in 1986 by the largest plurality of any candidate in the state's history. Edgar was elected governor in 1990 and was reelected in 1994, carrying 101 of the state's 102 counties, including Cook County. After retiring from elective office, Governor Edgar was a resident fellow at the John F. Kennedy School of Government at Harvard. He has continued his commitment to responsible and responsive government as a distinguished fellow at the University of Illinois' Institute of Government and Public Affairs. He spearheads the Edgar Fellow program, which brings together emerging leaders from all parts of Illinois to foster the statesmanship that will address major challenges across regional, partisan and ethnic lines. Governor Edgar also lectures to students at the U of I and in colleges and universities throughout the state and serves on several corporate and non-profit boards. He is president emeritus of the Abraham Lincoln Presidential Library Foundation.

John Engler (Michigan, 1991-2003)

John Engler became interim president of Michigan State University on Feb. 5, 2018, following his appointment by the MSU Board of Trustees. He was the 46th governor of the state of Michigan, serving three terms from 1991 to 2003. Before that Engler served 20 years in the Michigan Legislature, including seven years as state Senate majority leader. He was the youngest person ever elected to the Michigan House of Representatives.

Immediately prior to his MSU appointment, he led two of the most influential business associations in the country: the National Association of Manufacturers and Business Roundtable. Engler was president of Business Roundtable, an association of CEOs of the largest United States companies, from 2011 to 2017. From 2004 to 2010, Engler was president and CEO of the National Association of Manufacturers, the largest manufacturing association in the United States. Engler joined Electronic Data Systems Corporation as an executive immediately after leaving state government. He has served on the boards

AMERICAN OVERSIGHT

of several corporations and organizations, currently including Universal Forest Products Inc. and K12 Inc. He chaired the National Governors Association and the State Science & Technology Institute, and was named among *Governing* magazine's 2001 Public Officials of the Year. He is a graduate of MSU with a Bachelor of Science degree in agricultural economics and earned a law degree from the Thomas M. Cooley Law School. He and his wife, Michelle, are parents of triplet daughters Margaret, Hannah and Madeleine. He was born in Mt. Pleasant, Mich., in 1948.

Jane Swift (Massachusetts, 2001-2003)

Former Massachusetts Governor Jane Swift is an accomplished leader in both the public and private sectors and a recognized national voice on education policy and women's leadership. She was born in North Adams, Mass. Swift received a bachelor's degree in American studies from Trinity College in 1987 and holds several honorary degrees for her work. Her career as an elected official began in 1991 at age 25 when she was the youngest woman ever elected to the Massachusetts State Senate. She quickly became the youngest woman in Senate history to hold a leadership position, rising to assistant minority leader. Governor Paul Cellucci appointed Swift as director of the Office of Consumer Affairs and Business Regulation in 1997. Swift was elected lieutenant governor in 1998 and became governor on April 10, 2001, when Cellucci resigned to become the U.S. ambassador to Canada. After her public service career, Swift was a general partner at Arcadia Partners, the leading venture capital firm focused exclusively on the education industry, Swift provided expert advice and guidance to early stage education companies as the founder of WNP Consulting, LLC. From 2003-2006. She was CEO of Middlebury Interactive Languages from 2011 to 2017. Swift currently serves as the executive chair of the board of Ultimate Medical Academy, a nationally accredited nonprofit health care educational institution headquartered in Tampa, Fla. She is a member of the boards of Suburban Propane, a publicly traded propane marketing company, and API, a privately held international study abroad company. Additionally, she serves on the advisory board for the School of Leadership Afghanistan (SOLA), the first girls boarding school in Afghanistan, and is a member of Oxfam's Sisters on the Planet Ambassadors. Swift served for a decade as a distinguished visiting lecturer in leadership studies at Williams College. She continues to speak professionally on women's leadership, education improvement and work-family integration. She and her husband Chuck are the proud parents of three daughters, Elizabeth, Lauren and Sarah.

Plenary VII: The Intersection Between the Arts and Commerce in the States
Saturday, July 21
1:30 to 2:15 p.m.
Convention Center: Sweeney Ballroom C-F

Plenary VII: The Intersection Between the Arts and Commerce in the States

Overview

According to data released in March by the U.S. Bureau of Economic Analysis, the arts collectively contribute $763.6 billion to the U.S. economy and employ 4.9 million workers across the country. Meanwhile, recent research forecasting future employment and skills demands commissioned by Pearson found knowledge areas such as English language, history and philosophy; cognitive skills such as fluency of ideas, originality and oral expression; and creative, digital and design occupations are all expected to experience increased demand as technology continues to transform the global economy.

These recent findings underscore the importance of arts, history and music education not only as necessary elements to provide students a well-rounded and rewarding educational experience, but also to ensure states are well positioned to leverage the economic impact of the rise in creative professions, both now and in the future. Students educated as creative thinkers who can bring artistic perspectives to problem solving and connect in compelling ways to express ideas are becoming essential to state economies now and will be indispensable as agile and adaptable future members of the workforce as the global economy evolves in expected and unexpected ways.

Format

- 1:30 p.m. — Opening Remarks
  - Governor Jay Inslee, Washington, *Chair, Education and Workforce Committee*
  - Governor Dennis Daugaard, South Dakota, *Vice Chair, Education and Workforce Committee*
- 1:35 p.m. — The Impact of Arts on the Economy: New Mexico's Story
  - Governor Susana Martinez, New Mexico
- 1:40 p.m. — Speaker Presentations
  - Sarah Trahern, CEO, Country Music Association
  - Dr. Edward L. Ayers, Tucker-Boatwright Professor of the Humanities and President Emeritus, University of Richmond
- 1:50 p.m. — Governors' Roundtable Discussion
- 2:15 p.m. — Adjourn

Media

This session is open to press.

Takeaway(s)

In this session, governors will hear from prominent artists, historians and their own colleagues to explore the importance of arts and history education to developing vibrant creative economies in their states.

AMERICAN OVERSIGHT

Presenter Bios

Sarah Trahern

Trahern has more than 30 years of experience in the television business, including 21 years producing or overseeing Country Music programming. Today she is the CEO of the esteemed Country Music Association, which was formed in 1958 as the first trade group to promote a single genre of music. She has served in this position for 3 years.

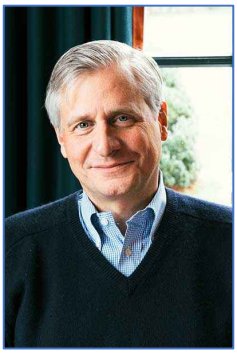
Her role at CMA is to collaborate with the CMA Board of Directors to expand the mission and strategic objectives of CMA while being mindful of the unique legacy and spirit of the music industry organization. Trahern also serves as President of the CMA Foundation Board, which supports music education programs for deserving children across the U.S.

She began her cable career at C-SPAN in Washington, D.C., covering politics and public affairs and producing the popular series "Booknotes." She moved to Nashville in 1995 to oversee specials and entertainment series for TNN. She joined Great American Country in 2005 with Scripps' ownership of the network. She was promoted to SVP of Programming and in 2010, general manager of the network, where her myriad duties included the strategic direction of the network and oversight of GAC's programming, marketing, creative and digital initiatives.

Trahern is an alum of both Leadership Music and Leadership Nashville.

She is also a graduate of Georgetown University and has an MBA from the Owen Graduate School of Management at Vanderbilt.

Edward L. Ayers



Edward Ayers is Tucker-Boatwright Professor of the Humanities and president emeritus at the University of Richmond. Dr. Ayers has been named National Professor of the Year, received the National Humanities Medal from President Obama at the White House, was a finalist for the National Book Award and the Pulitzer Prize, and won the Bancroft Prize for distinguished writing in American history.

Ayers is one of the cohosts for BackStory, a popular podcast about American history. His newest book, The Thin Light of Freedom: The Civil War and Emancipation in the Heart of America, has received the Lincoln Prize from the Gilder Lehrman Institute and Gettysburg College.

AMERICAN OVERSIGHT

Jon Meacham

Meacham is the author of *New York Times* bestsellers, *Destiny and Power: The American Odyssey of George Herbert Walker Bush, American Lion: Andrew Jackson in the White House,* and *American Gospel: God, the Founding Fathers, and the Making of a Nation*

A member of the Council on Foreign Relations and of the Society of American Historians, Meacham is a distinguished visiting professor at Vanderbilt University. He is a contributing writer to *The New York Times* Book Review, a contributing editor of *Time*, and has written for *The New York Times* op-ed page, *The Washington Post*, *Vanity Fair*, and *Garden & Gun*. Meacham is also a regular guest on "Morning Joe" and other broadcasts.

Meacham's biography of President Bush was named one of the 10 best books of the year by *The Washington Post* and one of the best books of the year by *The New York Times Book Review, Time*, *National Public Radio* and the *St. Louis Post-Dispatch*. *Destiny and Power* was also honored for excellence in "Politics and Leadership" in 2015 by the Plutarch Committee of BIO, the Biographers International Organization.

Thomas Jefferson: The Art of Power received the 2013 Fraunces Tavern Museum Book Award from the Fraunces Tavern Museum and the Sons of the American Revolution in the State of New York, a prize that "recognizes books of exceptional merit written on the Revolutionary War era." Franklin and Winston was honored with the Colby Award of the William E. Colby Military Writers' Symposium at Norwich University. Meacham was also honored with the 2015 Nashville Public Library Literary Award; other winners include John Lewis, Robert K. Massie, Margaret Atwood, John McPhee, Billy Collins, Doris Kearns Goodwin, John Irving, Ann Patchett, John Updike, David McCullough and David Halberstam.

A former executive editor at Random House, he published the letters of Arthur Schlesinger Jr., and books by, among others, Al Gore, John Danforth, Clara Bingham, Mary Soames and Charles Peters. After serving as managing editor of *Newsweek* for eight years, Meacham was the editor of the magazine from 2006 to 2010. He is a former editor of *The Washington Monthly* and began his career *at The Chattanooga Times*.

Born in Chattanooga in 1969, Meacham was educated at St. Nicholas School, The McCallie School, and graduated from The University of the South in Sewanee, Tennessee, with a degree summa cum laude in English Literature; he was salutatorian and elected to Phi Beta Kappa.

A trustee of the Thomas Jefferson Foundation, the Smithsonian's National Museum of American History, The McCallie School and The Harpeth Hall School, Meacham chairs the National Advisory Council of the John C. Danforth Center on Religion and Politics at Washington University. He has served on the vestries of St. Thomas Church Fifth Avenue and of Trinity Church Wall Street as well as the Board of Regents of The University of the South. The Anti-Defamation League awarded Meacham its Hubert H. Humphrey First Amendment Prize. In 2013 the Historical Society of Pennsylvania presented him with its Founder's Award; in 2016 he was honored with the Sandra Day O'Connor Institute's Spirit of Democracy Award. Meacham also received an honorary Doctor of Humane Letters degree from the Berkeley Divinity School at Yale University in 2005 and holds honorary doctorates from Middlebury College, Wake Forest University, the University of Tennessee, Dickinson College, Sewanee and several other institutions.

Plenary VIII: Robots, Education and Workforce: Transformers and Transformation
Saturday, July 21
2:25 to 2:55 p.m.
Convention Center: Sweeney Ballroom C-F

Plenary VIII: Robots, Education and Workforce: Transformers and Transformation

Overview

Innovations like automation and the rise of the gig economy have transformed both the workplace and the workforce in ways that were unprecedented even five to ten years ago. As the economy of the future continues to evolve, governors must anticipate changes and trends on a global, national, regional and local level to ensure their state's workforce and state economy are prepared to meet coming transitions. Navigating those transitions will require both transformation and coordination of state education and workforce development systems to ensure the success of workers and sustainable economic growth amid a background of constant change.

To assist governors in anticipating economic trends and exploring creative solutions to capitalize on them, economic development experts will join governors for a conversation on regional economic trends, future innovations to anticipate, and how state education and workforce systems can be retooled to align with the in-demand skills of the future.

Format

- 2:25 p.m. — Opening Remarks
  - Governor Jay Inslee, Washington, *Chair, Education and Workforce Committee*
  - Governor Dennis Daugaard, South Dakota, *Vice Chair, Education and Workforce Committee*
- 2:35 p.m. — Speaker Presentations
  - Rich Davey, Associate Director, Boston Consulting Group
  - Alan B. Krueger, Bendheim Professor of Economics and Public Affairs, Princeton University
- 2:45 p.m. — Governors' Roundtable Discussion
- 2:55 p.m. — Adjourn

Media

This session is open to press.

Takeaway(s)

This session will explore regional economic trends, innovations and how governors can equip state education and workforce systems to respond.

Contacts: Stephen Parker, (202) 624-5369 or sparker@nga.org
Morgan Wilson, (202) 719-2876 or mwilson@nga.org

AMERICAN OVERSIGHT

Presenter Bios

Alan B. Krueger

Alan Krueger has published widely on the economics of education, unemployment, labor demand, income distribution, social insurance, labor market regulation, terrorism, and environmental economics. Since 1987 he has held a joint appointment in the Economics Department and Woodrow Wilson School at Princeton University. He is the founding Director of the Princeton University Survey Research Center. He is the author of What Makes A Terrorist: Economics and the Roots of Terrorism and Education Matters: A Selection of Essays on Education, co-author of Myth and Measurement: The New Economics of the Minimum Wage, and co-author of Inequality in America: What Role for Human Capital Policies?

Professor Krueger served as chairman of President Barack Obama's Council of Economic Advisers and a member of the Cabinet from 2011 to 2013. He also served as assistant secretary for Economic Policy and chief economist of the U.S. Department of the Treasury in 2009 to 2010 and as chief economist at the U.S. Department of Labor in 1994 to 1995.

He was vice president of the American Economic Association in 2017, and has been a member of the Executive Committee of the American Economic Association (2005-2007) and International Economic Association. Since February 2017, he has been a member of the board of directors of BNP Paribas USA. He has been a member of the board of directors of the Russell Sage Foundation, MacArthur Foundation and the American Institutes for Research, as well as a member of the editorial board of Science (2001-2009), editor of the Journal of Economic Perspectives (1996-2002) and co-editor of the Journal of the European Economic Association (2003-2005).

He was named a Sloan Fellow in Economics in 1992 and an NBER Olin Fellow in 1989 to 1990. He was elected a Fellow of the Econometric Society in 1996, and a fellow of the Society of Labor Economists in 2005. He was awarded the Kershaw Prize by the Association for Public Policy and Management in 1997 (for distinguished contributions to public policy analysis by someone under the age of 40) and the Mahalanobis Memorial Medal by the Indian Econometric Society in 2001. In 2002, Professor Krueger was elected a Fellow of the American Academy of Arts & Sciences, and in 2003 he was elected a Fellow of the American Academy of Political and Social Science. He was awarded the IZA Prize in Labor Economics with David Card in 2006. He was awarded the Moynihan Prize by the American Academy of Political and Social Science in 2017.

From 2000 to 2009 he was a regular contributor to the "Economic Scene" column and Economix blog in the New York Times.

He received a B.S. degree (with honors) from Cornell University's School of Industrial & Labor Relations in 1983, an A.M. in economics from Harvard University in 1985 and a Ph.D. in economics from Harvard University in 1987.

AMERICAN OVERSIGHT

Richard Davey

Richard Davey joined The Boston Consulting Group's Washington, D.C., office in March 2017 working with the Public Sector and Industrial Goods practice areas. Prior to joining BCG, Davey had an over 15 years of C-suite transportation experience in high profile, publicly accountable organizations in state government and the private sector.

Davey served as the secretary and CEO of the Massachusetts Department of Transportation ("MassDOT") from 2011 until 2014. He had direct operational responsibility for and oversight of the state's highways, bridges and tunnels (including the "Big Dig"), the freight and passenger rail program, 15 regional transit agencies including the MBTA and the state's Registry of Motor Vehicles. During his tenure as secretary, Rich also served as chairman of the Massachusetts Port Authority ("Massport") Board of Directors, responsible for the Logan Airport and the Port of Boston, among other holdings.

Prior to serving as secretary, Davey served as the general manager of the Massachusetts Bay Transportation Authority ("MBTA") the fifth-largest public transit system in the United States. Davey was able to effectively manage the MBTA during time of fiscal challenges by achieving a balanced budget and the highest ridership since 1946.

Prior to serving in state government, Davey worked for seven years in various capacities at the Massachusetts Bay Commuter Railroad ("MBCR"), the private contractor that operated and maintained the MBTA's commuter rail system, ultimately served as MBCR's general manager and chief executive from 2008 until 2010.

Rich holds a JD, summa cum laude, from Gonzaga University School of Law and a B.A. in political science from the College of the Holy Cross.

PRESS RELEASE

FOR IMMEDIATE RELEASE

Wed., May 30, 2018 Contact: Laurie Mann, 702-563-7813

Lumina Foundation Designates Las Vegas as Talent Hub

Las Vegas granted $275,000 to support local efforts to increase education beyond high school

LAS VEGAS–Lumina Foundation, in partnership with the Kresge Foundation, has announced the designation of Las Vegas and six other communities across the country as Talent Hubs. These cities, along with 17 others selected in 2017, earned this designation by meeting rigorous standards for creating environments that attract, retain, and cultivate talent. Talent Hub cities are focused on raising the nation's overall post-high school attainment level to 60 percent of working-age adults by 2025 and committed to eliminating deep disparities in educational outcomes among African-Americans, Hispanics, and American Indians, who fare poorly in contrast with white and Asian students.

"Together, we have an opportunity to solve part of a very complex problem in our community - a skilled workforce needed to meet employer demands and help families move out of poverty into sustainability. With the Las Vegas area's demand for a properly educated and skilled workforce, which is among the highest in the nation, and the incredibly low supply available in our community to meet that need, it's critical that we work with our community partners to solve this complex issue," said Scott Emerson, United Way of Southern Nevada President and CEO. "Those in our neighborhoods deserve a fighting chance to make a better life. By combining our efforts, we will close the achievement gap among underrepresented student populations, collaborate to address the challenges of the workforce education needs of Nevada, and co-develop new and innovative solutions to the critical issues facing the Las Vegas area."

Nevada ranks third in the U.S. for job growth, while ranking 49th in educational attainment and last in college readiness. Focusing on the growing disparities in enrollment and completion rates, the Las Vegas area Talent Hub, comprised of partners College of Southern Nevada (CSN); Nevada System of Higher Education (NSHE), Workforce Development; Governor's Office of Workforce Innovation for a New Nevada (OWINN) and United Way of Southern Nevada, will collaborate to increase the credentials of African American, Hispanic and low income learners.

AMERICAN OVERSIGHT

“We are thrilled to have this new opportunity to increase college credential attainment in Nevada,” said College of Southern Nevada Acting President Margo Martin. “CSN’s faculty and staff look forward to partnering with the United Way of Southern Nevada, OWINN and the Nevada System of Higher Education’s leadership through the new Talent Hub designation. Together, we will use proven strategies to increase student success, helping even more students cross the graduation finish line and ultimately land jobs that support Nevada’s diversifying workforce.”

"Nevada’s economic success is dependent on increased participation in post-secondary education and closing the achievement gap among underserved populations. This grant will help CSN achieve its student success goals and increase Nevada’s highly-skilled workforce,” said Nevada System of Higher Education Chancellor Thom Reilly.

“We are proud to be engaged in this collaborative effort with committed partners to showcase and to keep building a dynamic workforce. This opportunity as a Talent Hub aligns with Governor Sandoval’s vision of a new Nevada in which all Nevadans are on a career pathway with the postsecondary credentials needed to engage and succeed in today’s thriving labor-market,” said Manny Lamarre, Executive Director, OWINN.

“We have added to the growing roster of top-flight cities committed to meeting the demands for an educated workforce,” said Jamie Merisotis, president and CEO of Lumina Foundation. “The Talent Hub designation serves both as an aspirational target for other cities and a foundation from which cities designated as Talent Hubs can build.”

Each community designated as a Talent Hub receives $275,000 in grant funding over 31 months. Grant funding will support local efforts to educate more people, allowing community and education leaders to better meet the specific needs of residents. Lumina will provide these funds in partnership with Kresge.

Integrating proven educational strategies of intensive student onboarding, academic maps, proactive academic and career advising, and instructional support and co-curricular activities, the partnership will also scale up practices of work-based learning, including the growing Registered Apprenticeship Program and industry/work-based credentials programs. Both strategies root success in intensive, proactive, and integrated student support/case management, which is particularly important for equity populations.

To date, Talent Hub investments by Lumina and Kresge total just over $10 million.

Kresge’s support of Talent Hubs comes from its national education program, which includes a focus on aligning and strengthening urban higher education ecosystems to help more low-income, underrepresented, and students of color gain access to—and succeed in—higher education.

AMERICAN OVERSIGHT

Talent Hubs are one outgrowth of Lumina's Community Partnerships for Attainment, which represented more than $10 million of grants to 75 cities across the country. This partnership, which began in 2013, continues to work directly with communities to expand educational opportunities beyond high school.

"With our partners at Kresge, Lumina's Talent Hubs designation aims to deepen the impact of cross-sector, place-based efforts to increase higher education attainment in communities and cities across the country," said Danette Howard, Lumina's senior vice president and chief strategy officer. "Talent Hubs work closely with Lumina and national thought leaders to develop a customized action plan tailored to the needs of their specific communities, with a focus on increasing the percentage of post-high school credentials residents have earned. This effort is directly connected to Lumina's mission of helping the nation ensure that 60 percent of working-age Americans have quality credentials by 2025."

The seven new communities designated as Talent Hubs are: Corpus Christi, Texas; Detroit; Elkhart County, Ind.; Las Vegas; Mobile, Ala.; Rio Grande Valley, Texas; and St. Louis.

They join 17 other Talent Hubs: Albuquerque, N.M.; Austin, Texas; Boston; Cincinnati; Columbus, Ind.; Dayton, Ohio; Denver; Fresno, Calif..; Los Angeles; Louisville, Ky.; Nashville, Tenn.; New York; Philadelphia; Racine, Wis.; Richmond, Va.; Shasta County, Calif.; and Tulsa, Okla.

About Lumina Foundation Lumina Foundation is an independent, private foundation in Indianapolis that is committed to making opportunities for learning beyond high school available to all. Lumina envisions a system that is easy to navigate, delivers fair results, and meets the nation's need for talent through a broad range of credentials. The Foundation's goal is to prepare people for informed citizenship and for success in a global economy.

The **Kresge Foundation** was founded in 1924 to promote human progress. Today, Kresge fulfills that mission by building and strengthening pathways to opportunity for low-income people in American cities, seeking to dismantle structural and systemic barriers to equality and justice. Using a full array of grant, loan, and other investment tools, Kresge invests more than $160 million annually to foster economic and social change. For more information visit Kresge.org.

About United Way of Southern Nevada
United Way of Southern Nevada unites our community to improve people's lives. We bring donors, volunteers, nonprofits, and businesses together to help children enter school ready to learn, help high school students reach graduation day, and support individuals working to earn a degree or certification, all while creating stability for their

AMERICAN OVERSIGHT

families. Together, we step into the ring and invite others to stand with us as a united front against social injustices and forces keeping our community's most vulnerable residents from a good life. We are bold and innovative to solve our toughest problems. Together, we fight for the future of our community – and we will win. Join us at uwsn.org.

About CSN
Founded in 1971, the College of Southern Nevada is the state's largest and most ethnically diverse higher education institution. CSN is accredited through the Northwest Commission on Colleges and Universities and specializes in two-year degrees and workforce development that lead directly to high-demand careers or transfer to a university. It also offers five bachelor's degrees in specialized fields and is the state's largest provider of adult basic education and literacy training. CSN is a Minority Serving Institution and Nevada's first Hispanic Serving Institution. CSN's students create flexible schedules with day, evening and weekend classes taught on three main campuses and multiple locations throughout Southern Nevada or online. CSN — your future starts here. CSN is an Equal Employment Opportunity/Affirmative Action institution. For more, visit www.csn.edu.

About Nevada System of Higher Education
The Nevada System of Higher Education, comprised of two doctoral-granting universities, a state college, four comprehensive community colleges and one environmental research institute, serves the educational and job training needs of Nevada. NSHE provides educational opportunities to more than 100,000 students and is governed by the Nevada Board of Regents.

About OWINN
The Governor's Office of Workforce Innovation (OWINN) helps drive a skilled, diverse, and aligned workforce in the state of Nevada by promoting collaboration and cooperation among key public and private entities focused on workforce development. OWINN works to address Nevada's workforce needs by leveraging labor-market data, scaling career pathways that leads to industry-recognized credentials, expanding apprenticeships and work-based learning, and designing responsive workforce policies.

As the news focuses on stalled trade negotiations in North America, Canada, Mexico and the United States have shocking skills gaps that are already hampering economic performance and competitiveness.

North America's labor markets face massive technological disruptions, which should point all three countries toward preparing the jobs that will serve the continent well in the future.

In the U.S., for example, up to 1.4 million workers may lose their jobs by 2026 because of new technologies. Sadly, none of the three economies are ready for the challenges of further automation.

Manpower's most recent skills survey found employers struggling to fill vacancies: 46 percent in the U.S., 40 percent in Mexico and 34 percent in Canada. Inadequate experience and lack of hard and soft skills are the most-cited reasons for not finding the right candidates.

Even low-skilled, entry-level positions are now requiring digital skills, and the United States is experiencing a severe worker shortage.

The three governments should create a trilateral task force on workforce development, with public-private, federal-sub-federal working groups, to develop proposals and strategies to meet emerging skills and jobs needs.

VIEW ALL

View Latest Opinions >>

Leaders recognize the need to invest better in training workers, but they are still searching for effective approaches.

In January, at the Davos World Economic Forum, President Trump signaled the need to invest when he said, "... to be successful, it is not enough to invest in our economy. We must invest in our people." In June 2017, he launched an initiative to support apprenticeships via public-private partnerships.

The Canadian government appropriated significant new funds in its 2018 budget for workforce development, prioritizing multi-stakeholder collaboration.

The government of Mexico is working with private companies to implement the Modelo Mexicano de Formación Dual (Mexican Dual System of Vocational Education), which combines academic training with work-based learning.

At the state, provincial and local levels, there are many successful, innovative workforce development initiatives in all three countries.

North America, however, lacks an overarching means to share best practices, to scale up programs that work, to adopt common definitions and to share data that can help businesses, workers, schools and students choose good paths to the future economy. A trilateral task force on workforce development would help fill that gap.

A new North America Workforce Agenda should focus on four clusters of issues:

1. Apprenticeships and other work-based learning. Many jobs do not require a four-year college degree. Work-based learning for those coming into the workforce and for workers adapting to new skill needs is vital, but much work remains to define and implement good models.

Shared agreement on what an apprenticeship program entails and on quality standards would be very useful. The working groups can suggest mechanisms to identify and promote best practices and public-private partnerships.

The groups can devise strategies to increase public awareness of the benefits of work-based learning, to eliminate stigmas of vocational education and to encourage more businesses, students and workers to participate.

2. Certifications. Professional credentials can reduce hiring costs and encourage higher wages. When employers do not recognize credentials, workers, job seekers and businesses suffer. The working groups can promote agreed criteria for recognizing credentials and for making them more portable to help alleviate skills shortages and facilitate worker placements.

They can promote common terminology about credentials and a shared understanding of competencies needed. They can develop guidelines to assess informal learning and professional experience in order to help job seekers and businesses.

3. Data collection and transparency. At all educational levels, students struggle to make career decisions and educators struggle to provide advice due to poor information on labor market trends. Businesses are looking for good data to better recruit.

Press: Democrats must hang tough on high...

Pavlich: The left's tiring hysteria on Kavanaugh

Never Trumpers don't represent the...

AMERICAN OVERSIGHT

Collecting the right data on skills and workforce trends and making it available in real time is vital. The working groups can promote norms for collection and sharing labor market data transparently.

They can support building platforms and data tools openly available to all, allowing space for public and private sector initiatives (such as LinkedIn is pursuing).

4. Best practices for "the Fourth Industrial Revolution." All three North American countries are rapidly incorporating technology into daily routines. The pace of transformation will only increase.

Public authorities, businesses and educators need to develop agile approaches that provide students, workers and managers with skills to use new technology effectively.

The North American working groups could propose ways to incentivize companies to invest in re-skilling and "up-skilling" workers, to provide mid-career learning and to develop short-term training programs.

They could recommend strategies to encourage collaboration between companies, educational institutions, unions and others to better align curricula with labor market needs and evolving technologies.

The pace and scope of change means that workforce development will require continued adaptation across North America. For success, this effort must bring together governments, educational institutions, the private sector, unions, NGOs, intermediaries and others.

North America's workers and businesses will benefit greatly if we can build a forward-looking workforce dialogue to promote the competitiveness of all three economies.

Earl Anthony Wayne is a public policy fellow at the Wilson Center and a former U.S. Ambassador to Mexico and assistant secretary of state for economic and business affairs, among other positions.

NEXT ECONOMY

The Parts of America Most Susceptible to Automation

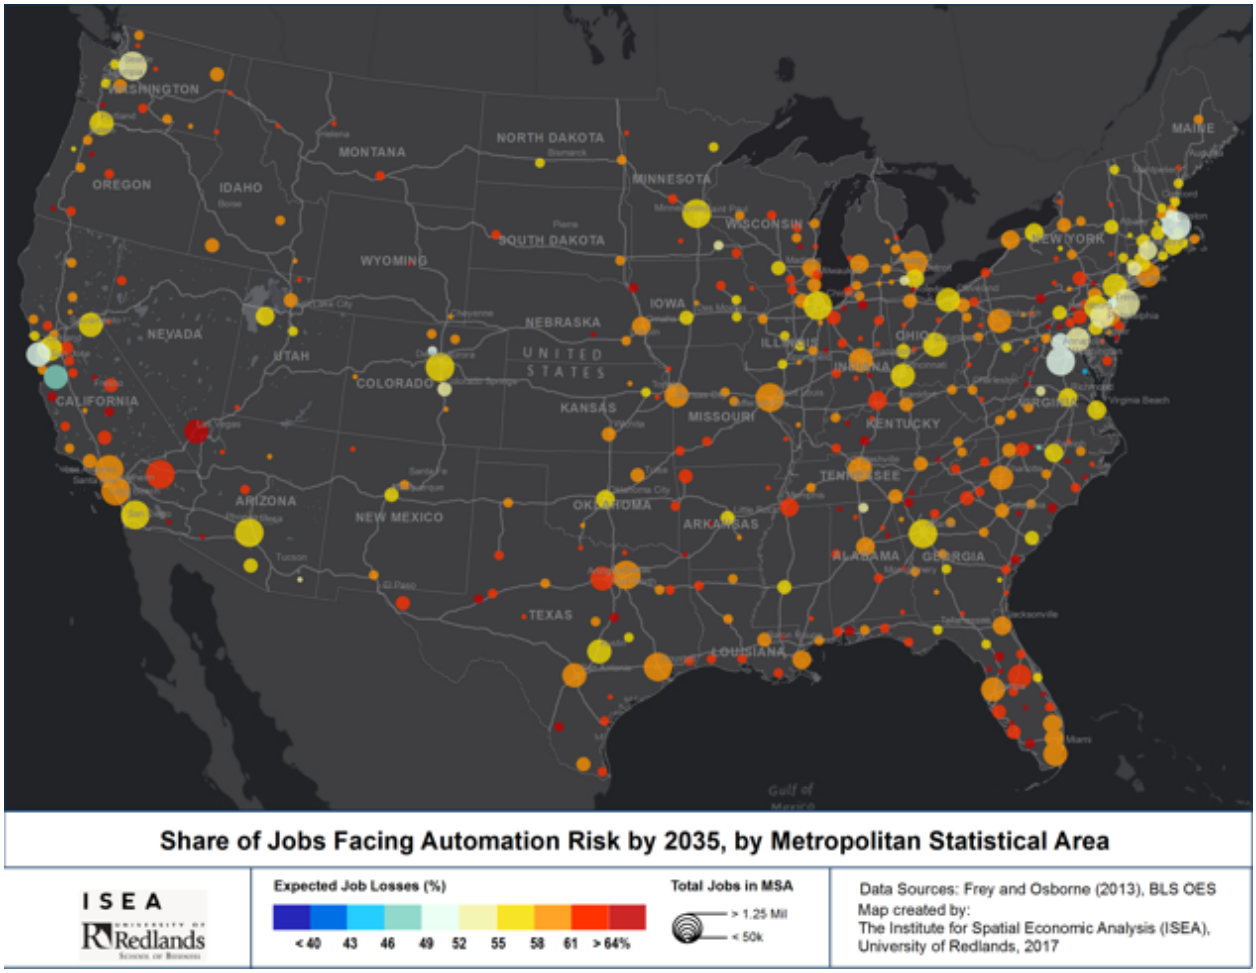
No, they're not in the Rust Belt.

ALANA SEMUELS MAY 3, 2017

ISAAC BREKKEN / AP

Economists expect that millions of American jobs are going to be replaced by automation in the coming decades. But where will those job losses take place? Which areas will be hardest hit?

Much of the focus regarding automation has been on the Rust Belt. There, many workers have been replaced by machines, and the number of factory jobs has slipped as more production is offshored. While a lot of the rhetoric about job loss in the Rust Belt has centered on such outsourcing, one study from Ball State University found that only 13 percent of manufacturing job losses are attributable to trade, and the rest to automation.



A new analysis suggests that the places that are going to be hardest-hit by automation in the coming decades are in fact outside of the Rust Belt. It predicts that areas with high concentrations of jobs in food preparation, office or

AMERICAN OVERSIGHT

administrative support, and/or sales will be most affected—places such as Las Vegas and the Riverside-San Bernardino area may be the most vulnerable to automation in upcoming years, with 65 percent of jobs in Las Vegas and 63 percent of jobs in Riverside predicted to be automatable by 2025. Other areas especially vulnerable to automation are El Paso, Orlando, and Louisville.

Still, the authors estimate that almost all large American metropolitan areas may lose more than 55 percent of their current jobs because of automation in the next two decades. "We felt it was really stunning, since we are underestimating the probability of automation," said Johannes Moenius, the director of the Institute for Spatial Economic Analysis at the University of Redlands, which prepared the report.

Which Regional Economies Are Most Susceptible to Automation?

AMERICAN OVERSIGHT

Moenius and colleagues used a widely cited 2013 study from Oxford University predicting which of roughly 700 common jobs are most susceptible to automation, and then mapped out which metropolitan areas have a high share of those jobs. That study, by the economists Carl Benedikt Frey and Michael A. Osborne, suggested that 47 percent of total U.S. employment is at risk of automation over the next decade or two; they found that telemarketers, insurance underwriters and appraisers, tax preparers, and cashiers were some of the most likely to see their jobs threatened by automation, while the livelihoods of mental-health and substance-abuse social workers, oral surgeons, choreographers, and physicians were more protected.

Frey and Osborne's estimates cover about 138 million Americans' jobs. Moenius and his colleagues found that Las Vegas, Riverside, and El Paso all had high numbers of office and administrative-support jobs, food-preparation and -serving jobs, and sales jobs**,** and thus had the most vulnerability to automation. Moenius estimates that 65.2 percent of jobs in Las Vegas, 63.9 percent in El Paso, and 62.6 percent of jobs in Riverside are susceptible to automation in the next two decades. The automation of transportation and material-moving jobs also contributed to the potential job loss in these places, as well as in Greensboro, North Carolina, where 62.5 percent of jobs are susceptible to automation.

The jobs that the Redlands analysis places new focus on are slightly different from the types of jobs academics once thought would be easily automatable. That's because before the Frey and Osborne study, scholars had predicted that routine jobs were the most likely to be automated, but Frey and Osborne suggested that advances in computerization have made it likely that non-routine jobs will be automated, too. The power of machine learning means that programmers with large data sets can use them to make machines smarter, allowing them to do non-routine tasks; for example, oncologists are using data from medical journals and patient records to automatically create treatment plans for cancer patients. "It is largely already technologically possible to automate almost any task, provided that sufficient amounts of data are gathered for pattern recognition," the authors write.

Of course, the Rust Belt will not be immune to automation in coming decades. Metropolitan areas like Detroit, Indianapolis, Cleveland, and Pittsburgh could still see more than half of their jobs computerized, the study suggests. But because so many manufacturing jobs centered in the Midwest have already been automated,

AMERICAN OVERSIGHT

those regions are not at the top of the list of the places that currently stand to lose the highest share of jobs. Instead, the brunt of the next automation wave will come in cities with a different type of low-skill job.

What's particularly striking about the new Redlands report is that the regions that are susceptible to automation are those that already have a high share of low-wage jobs. Previously, automation had hurt middle-class jobs such as those in manufacturing. Now, it's coming for the lower-income jobs. When those jobs disappear, an entire group of less-educated workers who already weren't making very much money will be out of work. Moenius worries about the possibility of entire regions in which low earners are competing for increasingly scarce jobs. "I wasn't in L.A. when the riots happened, but are we worried about this from a social perspective?" he said. "Not for tomorrow, but for 10 years from now? It's quite frankly frightening."

There were, however, a few regions of the country where jobs were not as likely to be automated. They included Silicon Valley, North Carolina's Research Triangle and the Boston area, where a high share of the jobs require more creative and social intelligence, and are thus more difficult to automate.

These areas are currently relatively prosperous, and the Redlands analysis also suggests that America's growing regional divergence will only continue to worsen. As the Berkeley economist Enrico Moretti wrote in his 2012 book *The New Geography of Jobs*, high-tech job centers like Silicon Valley are attracting more and more educated and talented people, and are pulling away from the rest of the country. This has implications not only for employment, he wrote, but also for socioeconomic outcomes such as health, family stability, and crime. He put it this way:

"A handful of cities with the 'right' industries and a solid base of human capital keep attracting good employers and offering high wages, while at the other extreme, cities with the 'wrong' industries and a limited human capital base, are stuck with dead-end jobs and average wages."

The work by Moenius and his colleagues suggests that this divergence will only continue. While a handful of cities with good jobs and highly educated workers will continue to thrive, other areas are going to see more and more jobs disappear as automated technologies become ever better. This may have much wider

AMERICAN OVERSIGHT

implications, politically and socially. People in America's struggling regions feel left behind economically, as the 2016 election indicated. But the anger that motivated many voters in November may pale in comparison to what comes next, if some regions see two-thirds of their jobs disappear while other areas continue to thrive.

MANAGEMENT

4 Tips to Prep Students for Careers That Won't Be Automated

To be future-ready, students will need the right certifications, soft skills and real-world work experiences.

by Meghan Bogardus Cortez

Meghan is an associate editor with *EdTech*. She enjoys coffee, cats and science fiction TV.

Today's educators can ensure that students will be ready for a tech-filled college experience and eventual career, but how do they **avoid preparing students for a job that will be taken over by a robot** in the future?

automated in the coming years. The research reveals that nearly half of U.S. jobs are at risk of automation, with low-income jobs like cashier, waiter and personal care aide at the highest risk.

As schools look to get students future-ready, here are four tips to help them **navigate increasingly automated career fields**.

1. Leverage Data to Prep Students for College Success

Bloomberg's research indicates that earning a college degree is a big step to securing a job less likely to be at risk for automation. To help students succeed on the way to college, K–12 schools are establishing a data infrastructure to predict risks and intervene before students fail.

After learning that its graduates were struggling to finish college, New York City public high schools began using data on past students to **identify and remediate the mismatch between their curriculum and college work**.

2. Consider Tech Credentialing Alternatives to College

However, a college degree can't always insulate workers from automation. In its analysis of the research, *Education Week* reports that accountants, auditors, loan officers and paralegals — all jobs that require a degree — are also at high-risk for automation.

Research has even found that the **payoff for a college graduate from a low-income background is less than a student from an upper-middle-class background**.

Some schools are working to give students alternatives to choosing a career path that requires a college degree and one that doesn't. Warren County High School in Tennessee introduced a technical education field called mechatronics, which combines electronics and engineering and is used in the automation of many manufacturing systems.

"With only a high school diploma and an entry-level mechatronics certification, teenagers can earn more than $45,000 a year here in rural Tennessee," reports *Education Week*.

Across the state, **school districts are revamping their technical education programs to reflect industry needs** and help students be

AMERICAN OVERSIGHT

NV-DA-20-0615-A-004442

While technological experience is an important part of teaching students to be future-ready, tech industry employees indicate that certain "soft skills" are very important to career success.

"I think the one thing to keep in mind is that it's impossible to say what technical skills people are going to need in 10 or 20 years," says Twitter software engineer Ryan Greenberg in an EdSurge podcast. "I think that necessary job skills actually have to be a little bit higher level than specific technology."

Greenberg and other tech industry employees say that **clear written and spoken communication skills, as well as problem-solving abilities and critical thinking are integral to success**.

These kinds of skills are also less likely to be automated and mimicked by computers.

4. Foster Real-World Partnerships

Like the technical education programs in Tennessee, other schools have embraced the technology used by industries in their communities and created partnerships with local businesses and employers.

For example, a Detroit-area school has rolled out virtual reality tools so that students can study automotive prototypes and learn to engineer them.

In Massachusetts, Atlantis Charter School has forged a partnership with local businesses and the Massachusetts Institute of Technology to **introduce its students to the engineering design process they'll need in college and future career paths**.

"If we can produce kids that are going to great colleges to do great work and are prepared to enter high-tech jobs or the jobs of the future that are in this area, there's sort of this idea that we're contributing to a rising tide that lifts all boats," says Atlantis' executive director, Robert Beatty, in an *EdTech* article.

LEAP into Career Success

Washoe County School District Published 12:41 p.m. PT Oct. 23, 2017 | **Updated 4:58 p.m. PT Oct. 23, 2017**

(Photo: From WCSD)

For several years, there have been predictions that “thousands of jobs are coming to our region.” Today, those predictions seem to have come true as advertisements for hiring fairs and job openings for “qualified employees” appear on social media, billboards and local airwaves.

But for those who want to enter the job market of this New Nevada economy, what does “qualified” mean?

Nevada employers, like the rest of the nation, are looking for workers with more advanced skills. Graduating from high school often isn’t enough to be competitive in today’s job market. To maintain a competitive edge in the global economy, companies and businesses are looking for employees with “middle skills,” defined as more than a high school diploma and less than a university degree that includes technical knowledge and skill, as well as certification.

Some job seekers will find that even though they may possess the knowledge and skill necessary for today’s in-demand jobs, it’s difficult to prove to potential employers without having some sort of standardized credentials, two- or four-year degree.

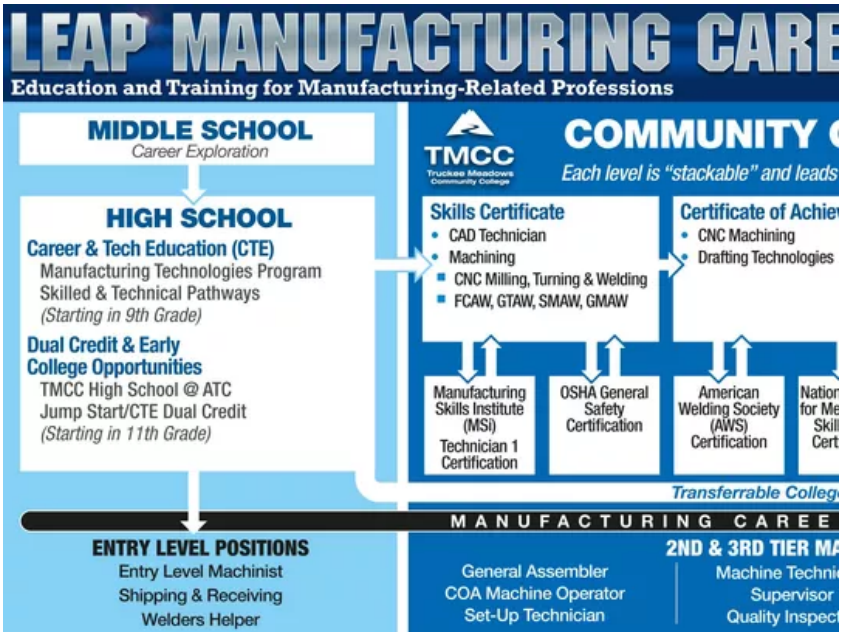

Photo from WCSD (Photo: From WCSD)

A LEAP Toward Becoming ‘Qualified’

LEAP, or Learn and Earn Advanced Career Pathway, is a framework that helps students and job seekers align education and training opportunities in high school, community college and universities with actual jobs available in our region and state.

“Career pathways provide young people and those re-training or re-entering the workforce with a vision of what is possible so that they can remain motivated in their day-to-day education and quest to improve their competitiveness,” says Manny Lamarre, Executive Director of the Governor’s Office of Workforce Innovation (OWINN).

“Robust career pathways will allow all Nevadans to excel in a diverse 21st Century economy.”

The LEAP framework, spearheaded by the Nevada Governor’s Office of Economic Development (GOED) in 2014, created roadmaps (known as career pathways). They consist of multiple, integrated and highly flexible pathways which allow a person to continue gaining additional skills, certifications and degrees as they progress through their career. Each educational component, from high school through university, is built on a foundation that allows for

AMERICAN OVERSIGHT

hands-on learning of industry practices and prepares students for professional certifications and quality performance.

LEAP pathways are being developed for Nevada's in-demand industries such as healthcare, information technology/cybersecurity and education. Advanced Manufacturing, the first LEAP pathway completed in late 2015, is fully developed and has been launched in Washoe County School District, as well as Truckee Meadows Community College and UNR's College of Engineering.

Photo from WCSD (Photo: From WCSD)

Multiple On Ramps to a Successful Career

LEAP career pathways provide tangible milestones in an educational sequence that includes certification, training opportunities and degrees. This allows people to build their workplace value incrementally rather than only at the completion of a degree. It also allows employers to hire skilled workers earlier in the process.

LEAP is a win for everyone, says Ryan Costella, director of strategic initiatives at Click Bond, Inc., and chair of the Manufacturing Sector Council of the Governor's Workforce Development Board.

"Manufacturing across the United States is struggling with finding skilled workers. LEAP helps us all connect the dots."

LEAP pathways are designed to accommodate the flexibility between education and full-time employment. With LEAP, Northern Nevada industries can be confident they're hiring qualified workers and find these workers in less time. And students can start earning while they continue to build and adapt their skillsets.

Early career "on ramps" begin in high school. For example, in the LEAP Advanced Manufacturing pathway, students who are in an aligned high school Career & Technical Education (CTE) programs like Manufacturing Technology, Metalworking or Welding can receive industry-recognized certifications by the time they graduate. They can also earn an average of 14 college-level credits, an equivalent of one semester, giving them a head start on earning an Associate degree in Applied Science that leads into a Bachelor degree in Mechanical Engineering.

An additional benefit for students in all LEAP pathways is exposure to the myriad of opportunities available to them in Nevada's emerging new economy.

"Often students are only interested in what they are exposed to," Lamarre says. "We don't want our students to limit their future. When students have a robust knowledge of career path options they can take advantage of the many great possibilities."

For students, parents and job seekers, the LEAP framework provides a solid infrastructure that clearly outlines the education and valued certifications, skills and degrees needed by employers. For potential employees, the career pathways are roadmaps to successful employment, job retention and continuing wage gains.

Both Lamarre and Costella agree: Offering career pathways will help build the highly skilled, diverse workforce that Nevada needs.

OUTCOMES:

1. Prepare all K-12 Students for College & Career Success
2. Increase Nevadans with postsecondary degrees & credentials
3. Increase Employment Outcomes in Training and Credentialing programs

MISSION

State of Nevada

Executive Department

Executive Order 2016-08

ORDER REGARDING WORKFORCE DEVELOPMENT

WHEREAS, this administration has led a five-year effort to diversify Nevada's economy and c
ew, high-quality jobs throughout the State;

WHEREAS, job creation in innovative sectors of the economy, together with an economic rec
he traditional industries of Nevada, is leading to the emergence of new economic and employ
rtunities in the Silver State;

WHEREAS, a highly-skilled, diverse workforce is critical to the success of new companies se
loyees in the technology, advanced manufacturing, education, and health care sectors;

WHEREAS, our continued success in growing and sustaining a more diversified economy de
nnovative workforce development programs that will support the labor market needs of Nevada;

WHEREAS, the component pieces of Nevada's workforce development system exist in
different departments and agencies of State government, which must in turn coordinate and assi
activities of many different local government entities and nonprofit organizations;

WHEREAS, there exists a need for enhanced cooperation and collaboration among all e
engaged in workforce development;

WHEREAS, I, as Governor of the State of Nevada, issued Executive Order 2015-08 on Jun
2015, revising the Governor's Workforce Development Board in accordance with the Workforce Inno
and Opportunity Act of 2014 (WIOA); and

WHEREAS, Article 5, Section 1 of the Nevada Constitution provides: "The supreme exe
power of this State, shall be vested in a Chief Magistrate who shall be Governor of the State of Neva

NOW, THEREFORE, by the authority vested in me as the Governor by the Constitution and
of the State of Nevada, it is hereby ordered as follows:

1. The Office of Workforce Innovation is hereby created within the Office of the Governor.
   a. The Office of Workforce Innovation shall:
      i. Provide support to the Governor's Workforce Development Board ('State Bo
      industry sector councils, and the Office of the Governor in developing a strate
      the cooperation and collaboration among all stakeholders focused on wor
      development;
      ii. Develop a career pathways strategy for Nevada in the fields of techno
      ing, education, and health care;
      iii. Recommend improvements to the allocation of federal and state
      incorporating evidence-based and outcome-based strategies to align wor
      training programs in Nevada with current and projected job opportunities and
      pathways, based on the Nevada's economic development plan and infor
      received from the industry sector councils;

VISION

A vibrant and sustainable economy

OWINN helps drive a skilled, diverse, and aligned workforce in the state of Nevada by promoting collaboration & cooperation among all entities focused on workforce development

AMERICAN OVERSIGHT

OWINN's Core Strategies

1. Assess workforce policies at the state level and provide strategic support and direction for the implementation of the federal Workforce Innovation and Opportunity Act (WIOA)
   - ❑ Provided technical and research support for SB66, SB19, SB516, SB69, & SB458
2. Design career pathways
   - ❑ Partnering with GOED to scale LEAP in southern NV and design technology career pathway
3. Scale registered apprenticeships in existing and emerging industries
   - ❑ Managing the State's Apprenticeship Council (SAC); OWINN serves as the State's Apprenticeship Agency (SAA)
4. Leverage labor-market and workforce data
   - ❑ Manage the statewide longitudinal data system to make informed policy decisions
5. Validate industry-recognized credentials
   - ❑ OWINN has identified entry-level certifications in the eight targeted industries for secondary students & the publicly funded workforce system

AMERICAN OVERSIGHT

GOWINN's Priorities 2018-2019

- Aligning workforce training with labor market data through policies & practices
- Scaling work-based learning and Registered Apprenticeships
- Outreach and awareness – workforce opportunities & partnerships

Closing Plenary: Good Jobs for all Americans
Saturday, July 21
3 to 4 p.m.
Convention Center: Sweeney Ballroom C-F

Closing Plenary: Good Jobs for All Americans

Overview

In this session, Governor Bullock will formally unveil his NGA chair's initiative, *Good Jobs for All Americans*. Governor Sandoval will formally pass the gavel to Governor Bullock after the governors vote for the 2018-2019 NGA Chair. Governor Bullock's initiative will focus on preparing governors for new changes in the labor market resulting from technological advancement and demographic changes. After he unveils his initiative, he will sit down with Dr. Lawrence Katz to discuss the role of governors in providing good jobs to all Americans.

****You are giving opening remarks and passing the gavel.**

Format

- 3 p.m. — Call to Order and Opening Remarks
  - Governor Brian Sandoval, Nevada
- 3:05 p.m. — Nomination of NGA Chair and Vice Chair
  - Governor Kate Brown, Oregon
- 3:10 p.m. — Passing of the Gavel and New Chair's Initiative
  - Governor Brian Sandoval, Nevada
  - Governor Steve Bullock, Montana
- 3:15 p.m. — Fireside Chat
  - Governor Steve Bullock, Montana
  - Dr. Lawrence Katz, Elisabeth Allison Professor of Economics, Harvard University Faculty of Arts and Sciences
- 4 p.m. — Adjourn

AMERICAN OVERSIGHT

Passing of the Gavel & Closing Plenary

Saturday, July 21, 3-4 p.m.

Governor Sandoval

[GOVERNOR SANDOVAL OPENS]

PLEASE TAKE YOUR SEATS SO WE CAN BEGIN.

WELCOME TO THE CLOSING SESSION OF THE 2018 NATIONAL GOVERNORS ASSOCIATION SUMMER MEETING.

[CLOSING CHAIRMANSHIP REMARKS]

IT'S BEEN SUCH AN HONOR TO LEAD THIS ORGANIZATION OVER THE LAST YEAR. WHEN I THINK BACK TO OUR LAST SUMMER MEETING IN RHODE ISLAND, I'M PROUD HOW FAR WE'VE COME AND ALL THAT WE HAVE ACCOMPLISHED TOGETHER.

AMERICAN OVERSIGHT

I DIDN'T LEAD THE NGA ALONE. THE ORGANIZATION'S ENTIRE STAFF WAS WITH ME EVERY STEP OF THE WAY.

THEIR BIPARTISAN COUNSEL WAS CRUCIAL NOT ONLY TO MY SUCCESS AS CHAIR, BUT ALSO TO OUR COLLECTIVE SUCCESS AS GOVERNORS.

I WOULD LIKE TO TAKE A MOMENT TO EXPRESS OUR GRATITUDE TO NGA CEO AND EXECUTIVE DIRECTOR SCOTT D. PATTISON AND THE ENTIRE STAFF FOR ALL THEIR ASSISTANCE OVER THE LAST YEAR.

[HOLD FOR APPLAUSE]

I WOULD ALSO LIKE TO THANK MY COLLEAGUES FOR SUPPORTING ME THROUGHOUT THIS JOURNEY.

WHEN WE LEFT PROVIDENCE LAST YEAR, I KNEW THAT WE HAD THE COLLECTIVE POTENTIAL TO POSITIVELY IMPACT THE LIVES OF AMERICANS IN EVERY CORNER OF THIS COUNTRY.

AMERICAN OVERSIGHT

I'M PROUD TO REPORT A YEAR LATER THAT WE DID JUST THAT AND I AM GRATEFUL TO EACH OF YOU FOR PLAYING A PART IN THAT EFFORT.

NGA BRINGS TOGETHER BOTH SIDES OF THE AISLE IN A TIME WHEN POLITICAL COOPERATION SEEMS TO BE INCREASINGLY RARE.

THE PAST FEW DAYS REAFFIRMED THAT GOVERNORS ARE PREPARED TO ROLL UP THEIR SLEEVES AND SHARE THE SOLUTIONS THAT HAVE WORKED IN THEIR STATES.

OVER THE PAST FEW DAYS WE'VE EATEN TOGETHER, LAUGHED TOGETHER, AND MOST IMPORTANTLY, WE LEARNED TOGETHER. NOW IS THE TIME TO PASS THE BATON.

I'M CONFIDENT THAT THE INCOMING CHAIR, GOVERNOR STEVE BULLOCK OF MONTANA, WILL CARRY ON THIS LEGACY OF BIPARTISAN POLICY EXCELLENCE.

AMERICAN OVERSIGHT

I AM GRATEFUL FOR THE SUPPORT HE OFFERED ME AS VICE CHAIR AND I AM EXCITED TO SEE ALL THE GREAT WORK THAT HE AND GOVERNOR HOGAN WILL DO FOR THE ORGANIZATION. I NOW RECOGNIZE GOVERNOR KATE BROWN FOR THE PURPOSE OF EXECUTIVE NOMINATIONS.

[TRANSITION TO OFFICIAL NOMINATIONS]

[GOVERNOR KATE BROWN WILL NOMINATE BULLOCK AND HOGAN]

[TRANSITION TO GOVERNOR SANDOVAL]

THANK YOU, GOVERNOR BROWN AND THE MEMBERS OF THIS YEAR'S NOMINATIONS COMMITTEE.

IS THERE A SECOND?

[NOTE: ANY OTHER GOVERNOR PRESENT MAY SECOND FROM THE FLOOR]

[GOVERNOR SANDOVAL]

IS THERE ANY DEBATE?

AMERICAN OVERSIGHT

[GOVERNOR SANDOVAL]

HEARING NONE, ALL GOVERNORS IN FAVOR OF ACCEPTING THE REPORT OF THE NOMINATIONS COMMITTEE PLEASE SAY AYE. ALL OPPOSED, NAY. THE AYES HAVE IT.

CONGRATULATIONS TO NGA'S NEW CHAIR, GOVERNOR STEVE BULLOCK, VICE CHAIR GOVERNOR LARRY HOGAN AND THE OTHER MEMBERS OF THE 2018-2019 NGA EXECUTIVE COMMITTEE.

[GAVEL PASSING (TBD)]

- **TBD**
- **IT IS NOW MY HONOR TO INTRODUCE MY COLLEAGUE, MY FRIEND AND THE NEW CHAIR OF NGA, GOVERNOR STEVE BULLOCK OF MONTANA.**

By Invitation Only

VIP Reception for Governors, Spouses, Sponsors and Special Guests at the Governor's Residence

Overview

Governors, spouses, summer meeting sponsors and other invited guests are invited to join Governor Susana Martinez and First Gentleman Chuck Franco at the governor's residence for a VIP cocktail reception.

**You are giving opening remarks.

Format

This reception will feature light hors d'oeuvres along with New Mexican beers, wines and specialty drinks. In addition to welcoming remarks, there will be a brief tribute to all governors transitioning out of office.

Transportation

Governors may arrive by private vehicle; secured parking will be available. The address of the residence is 1 Mansion Drive, Santa Fe, N.M. All other attendees should utilize the shuttle service provided from all host hotels beginning at 5 p.m. Buses will depart the residence at 6:30 p.m. for the all-attendee event at Bonanza Creek.

Dress

Dress for this event is "Southwest casual" (western wear is welcomed). Please note that this event will take place both indoors and outdoors. A light sweater or jacket is recommended.

VIP Reception—Governor's Residence

Saturday, July 21, 5:30-6:30 p.m.

Governor Sandoval

[SANDOVAL OPENS]

THANK YOU ALL FOR JOINING US FOR THE FINAL VIP RECEPTION OF THE 2018 NGA SUMMER MEETING.

I HOPE YOU ALL HAD A WONDERFUL TIME AND CONTINUE TO DO SO THIS EVENING. SPECIAL THANKS TO GOVERNOR MARTINEZ FOR HOSTING US THIS EVENING.

I KNOW WE ARE ALL LEAVING SANTA FE ARMED WITH NEW IDEAS AND STRATEGIES TO ADVANCE OUR STATES AND IMPROVE OUR CONSTITUENTS' LIVES.

AT OUR FIRST RECEPTION, I SPOKE ABOUT THE SPIRIT OF THE WILD WEST, GUIDING US FORWARD INTO AN UNKNOWN FUTURE.

AMERICAN OVERSIGHT

I LEAVE MORE CONFIDENT THAN EVER THAT WE ARE BETTER PREPARED FOR WHATEVER MIGHT COME OUR WAY AS GOVERNORS.

THANK YOU ALL FOR GIVING ME THE IMMENSE PRIVILEGE OF LEADING THE NGA. EVEN THOUGH MY TIME AS CHAIR HAS ENDED, I LEAVE MORE CONFIDENT THAN EVER IN THE FUTURE OF THE ORGANIZATION AND THE NATION.

WE HAVE TWO FEARLESS CHAMPIONS OF GOVERNORS LEADING US. HAILING FROM THE GREAT STATE OF MONTANA, PLEASE JOIN ME IN WELCOMING MY DEAR FRIEND AND THE NEW CHAIR OF THE NATIONAL GOVERNORS ASSOCIATION, STEVE BULLOCK.

AMERICAN OVERSIGHT

Social Event: Showdown at Bonanza Creek Ranch
Saturday, July 21
6 to 9 p.m.
Bonanza Creek

Showdown at Bonanza Creek Ranch

Overview

All meeting attendees will be transported to the old west, courtesy of a working film set. As you mosey down Main Street you will be immersed 360° into a western town where modern civilization is nowhere to be seen. Explore the saloon, hotel, bank, jail and chapel on the hill, or revel in the wide-open vistas and dramatic skies that draw the movie industry to this unique location. The first movie to be shot at Bonanza Creek Ranch was *The Man from Laramie*, starring a young James Steward in 1955. Since then Bonanza Creek Ranch has boasted over 50 years of filmmaking movie and television credits which include *Cowboy*, *Butch Cassidy and the Sundance Kid*, *Easy Rider*, *Longmire*, *3:10 to Yuma*, *The Lonesome Dove*, *Walker, Texas Ranger*, *Gunsmoke*, *Wild Hogs* and *Cowboys & Aliens*.

**You are giving opening remarks.

Format

This closing event will feature an authentic old western experience including a "Chuckwagon" buffet, saloon entertainment, a stunt show (showdown on Main Street) and country western artists.

Transportation

Governors may arrive by private vehicle; secured parking will be available. The address of the venue is 15 Bonanza Creek Lane, Santa Fe, N.M. All other attendees should utilize the shuttle service provided from all host hotels beginning at 6 p.m. with the last shuttle returning at 9:15 p.m.

Dress

Dress for this event is "Southwest casual" and western wear is welcomed. Please note that this event will take place both indoors and outdoors. Closed-toe shoes and a light sweater or jacket are recommended.

Media

This event is closed to press.

Contact: Bob Masciarelli, (202) 624-5355 or bmasciarelli@nga.org

AMERICAN OVERSIGHT

Showdown at Bonanza Creek

Saturday, July 21, 6:30-9 p.m.

Governor Sandoval

[SANDOVAL OPENS]

WELCOME THE FINAL EVENT OF THE 2018 SUMMER MEETING. THE HARD WORK IS NOW COMPLETE, AND WE CAN REFLECT UPON OUR EXPERIENCE OVER THE PAST FEW DAYS.

SINCE THURSDAY, WE'VE HAD 14 CONFERENCE SESSIONS. WE'VE HEARD FROM ESTEEMED INTERNATIONAL DELEGATES AND INFLUENTIAL BUSINESS LEADERS.

WE PUT ASIDE PARTISANSHIP AND ATTEMPTED TO ANSWER ONE SIMPLE QUESTION: AS GOVERNORS, HOW CAN WE DO OUR JOBS BETTER?

AMERICAN OVERSIGHT

WHILE NONE OF US CAN BE PERFECT LEADERS, WE CAN ALL STRIVE TO IMPROVE. THE LAST FEW DAYS OFFERED US THE OPPORTUNITY TO GROW AS GOVERNORS TO BETTER SERVE OUR CONSTITUENTS BACK HOME.

WE DISCUSSED VEXING ISSUES SUCH AS ECONOMIC TRANSFORMATION AND THE OPIOID EPIDEMIC, WHICH CLAIMS THOUSANDS OF LIVES EVERY YEAR FROM ALL STATES.

IN ADDITION TO ADDRESSING THE ISSUES OF THE PRESENT, WE SECURED A BETTER GRASP ON WHAT THE FUTURE LOOKS LIKE.

WE ARE BETTER PREPARED TO MANAGE BOTH THE UPSIDES AND THE CHALLENGES OF ADVANCED TECHNOLOGY AND ALL OF US ARE BETTER PREPARED TO INNOVATE BACK IN OUR STATES.

AMERICAN OVERSIGHT

WE ALSO HAD SOME FUN ALONG THE WAY, SHARING LAUGHS AND FORGING RELATIONSHIPS THAT WILL PAY DIVIDENDS FOR YEARS TO COME. I SPEAK FOR ALL OF US WHEN I SAY OUR FEW DAYS IN SANTA FE WERE WELL SPENT.

IN ADDITION TO ACQUIRING NEW KNOWLEDGE, NGA ALSO GAINED A NEW CHAIR. GOVERNOR STEVE BULLOCK IS WELL-PREPARED TO LEAD THIS ORGANIZATION INTO THE FUTURE, AND I AM EXCITED ABOUT HIS NEW INITIATIVE FOCUSING ON CREATING GOOD JOBS FOR ALL AMERICANS.

I WOULD AGAIN LIKE TO THANK HIM FOR ALL HE DID AS NGA'S VICE CHAIR AND WISH HIM HIS FAMILY ALL THE BEST AS HE BEGINS HIS NEW ROLE.

ONE YEAR AGO, I STOOD BEFORE YOU AND VOWED TO RAISE AWARENESS ABOUT INNOVATIONS IN TECHNOLOGY, ENERGY AND TRANSPORTATION.

AMERICAN OVERSIGHT

THROUGHOUT THE LAST YEAR, I BELIEVE WE'VE MET OUR GOAL AND I LEAVE MY CHAIRMANSHIP MORE CONFIDENT IN THE FUTURE OF THE NGA THAN EVER BEFORE.

THANK YOU TO ALL THE GOVERNORS, GUESTS, INTERNATIONAL VISITORS AND PARTNERS ASSEMBLED HERE.

A HUGE THANK YOU TO THE NGA STAFF FOR ALL THE WORK THAT WENT INTO THIS MEETING AS WELL AS FOR ALL THE SUPPORT THEY'VE OFFERED TO US THROUGHOUT THE YEARS.

NGA BROUGHT TOGETHER DEMOCRATS AND REPUBLICANS TO DISCUSS POLICIES IMPROVING AMERICAN LIVES. WE CHECK THE POLITICS AT THE DOOR AND WORK TOGETHER TO SOLVE THE ISSUES PLAGUING OUR STATES.

THE BURDEN IS UPON US AS GOVERNORS, AS LEADERS AND AS AMERICANS, TO BRING THE GOODWILL AND COMRADERY EXPERIENCED HERE IN SANTA FE BACK TO OUR HOME STATES.

WE ALL FACE SERIOUS CHALLENGES WHILE GOVERNING.

AMERICAN OVERSIGHT

I HOPE THAT YOU WILL RETURN TO THOSE CHALLENGES WITH NEW IDEAS, NEW PERSPECTIVES AND NEW FRIENDS TO SUPPORT YOU AND THE PEOPLE YOU SERVE.

THANK YOU FOR THE OPPORTUNITY TO LEAD THE NGA. IT IS NOW MY HONOR TO INTRODUCE MY GOOD FRIEND AND THE NEWEST CHAIR OF THE NATIONAL GOVERNORS ASSOCIATION, STEVE BULLOCK.

Governor Bullock

Hi Pam!

Hope you had a great 4th! Ryan said you're coming to the NGA Summer Meeting and I'm happy to get your registration, accommodations and flights set up. Hotel bookings are due by 12pm ET today. Do you know what days you're planning on checking in and checking out? Gov is coming in the evening of July 17 and is checking out on July 22. Tyler and I are also checking in on the 17th and departing on the 22nd.

Feel free to give me a call anytime if you'd like to discuss logistics. Also, I've attached a draft copy of Gov's schedule if you need it to figure out when you'd like to come in. Looking forward to seeing you later this month!

Thanks,
Jessica

Sent: Thursday, August 02, 2018 9:10 AM
To: Christina Davis
Subject: NGA Thank You's FOR APPROVAL
Attachments: NGA Thank You's.docx

CD,

Attached are draft thank you letters for the Governor's approval. The list (included below) includes all presenters and foreign dignitaries who participated in the NGA Summer Meeting.

As you can see, these letters are to be signed by both Governor Sandoval and Bullock. Once the Governor approves, NGA will print them out here and mail to you with pre-metered postage. Are you ok with then sending the entire package on to Montana once he signs?

Also, there are three chair's initiative draft thank yous included. These will ONLY be signed by Governor Sandoval and I will send in a separate package to keep everything clear.

Here are the following thank you notes as requested:

- Liz Schrayer, USGLC
- Mr. Kentaro Sonoura
- Gov. Hirai
- John Krafcik, CEO Waymo (Sandoval only)
- Matt Delaney, CEO Marble (Sandoval only)
- Colin Tooze, Director Uber (Sandoval only)
- Graeme Conway, Macquarie
- Josphat Nanok, Head of Kenyan Governors Association
- Annagret Kramp-Karrenbauer, General Secretary of the CDU
- Govs. Only presenters (Opportunity Zones and SCOTUS)
- Thursday infrastructure roundtable participants
- Former Governors at the transition lunch
- Other international participants

Please let me know if you have any questions. Thanks!

Tyler Klimas | Deputy Director
State of Nevada, Washington Office

AMERICAN OVERSIGHT

August 3, 2018

Ambassador Zhang Ping
Consulate-General of the People's Republic of China in Los Angeles
443 Shatto Place
Los Angeles, CA 90020

Dear Ambassador Zhang:

On behalf of the National Governors Association (NGA), we wanted to thank you for your participation in our 2018 Summer Meeting. We were honored to have such a distinguished Chinese diplomat attend. We have been focusing on building relationships with international partners, and these efforts would not be possible without your cooperation and engagement. We certainly hope this meeting was as productive for you as it was for all of us.

In this critical time, the world is becoming increasingly globalized, with states' economies becoming more interdependent with our international partners. Therefore, we see much value in engaging with you at events such as this year's Summer Meeting. Serving as Chair and Vice Chair has made us prioritize connecting to the international community. NGA Global launched during our tenure, and, looking ahead, we see it as an important program for NGA leadership and the other governors.

Thank you again for your commitment to our global program. We look forward to working with you in the future.

If you have any questions about the summit or NGA's international engagements, please feel free to reach out to Abigail Hunter at ahunter@nga.org or (202) 719-2870.

Sincerely,

Brian Sandoval
Governor of Nevada
National Governors Association

Steve Bullock

Mr. Yoshiharu Ueki
Keidanren USA
1200 17th Street, NW, Suite 201
Washington DC 20036 U.S.A.

Dear Mr. Ueki:

On behalf of the National Governors Association (NGA), we wanted to thank you for your participation in our 2018 Summer Meeting. We have been focusing on building relationships with international partners, and these efforts would not be possible without your cooperation and engagement. We certainly hope this meeting was as productive for you as it was for all of us.

In this critical time, the world is becoming increasingly globalized, with states' economies becoming more interdependent with our international partners. Therefore, we see much value in engaging with you at events such as this year's Summer Meeting. Serving as Chair and Vice Chair has made us prioritize connecting to the international community. NGA Global launched during our tenure, and, looking ahead, we see it as an important program for NGA leadership and the other governors.

Thank you again for your commitment to our global program. We look forward to working with you in the future.

If you have any questions about the summit or NGA's international engagements, please feel free to reach out to Abigail Hunter at ahunter@nga.org or (202) 719-2870.

Dear Mr. Krafcik:

On behalf of the National Governors Association (NGA), thank you for joining me at the 2018 NGA Summer Meeting in Santa Fe, N.M. This annual meeting is a unique platform for governors to discuss important issues facing the country and an opportunity to share the innovative solutions happening every day at the state level. The session you spoke at was an important component of my 2017-2018 NGA Chair's Initiative, *Ahead of the Curve*: *Innovation Governors*, which highlights how governors can prepare their states for the rapidly advancing technologies that affect our residents and businesses.

Your comments were very well received and helped spark a thoughtful and important dialogue. The discussion provided governors, staff and participants with insight into how self-driving vehicles are reshaping the future and how each state can support innovation, modernize policy and regulatory processes and prepare the future workforce.

Again, thank you for joining me and for your generous contributions of time and expertise.

Sincere regards,

Brian Sandoval

Dear Sponsor:

On behalf of the National Governors Association (NGA), thank you for being such a wonderful partner over the past year. Your support of my 2017-2018 NGA Chair's Initiative, *Ahead of the Curve*: *Innovation Governors*, which highlights how governors can stay one step ahead of the rapidly advancing technologies that affect the daily lives of residents and businesses in our states, has helped make this initiative a success!

As states move to embrace innovation, it is critical that we have both the public and private sector willing to bring cutting edge ideas to market, embrace technological transformation, and integrate new technologies to transform our current infrastructure. We appreciate **SPONSOR ORGANIZATION** playing a major role in such efforts for the continued support of the NGA Chair's Initiative.

To prepare governors, states and other stakeholders for innovations in the energy and transportation sectors, NGA has crafted two roadmaps. These roadmaps address topics such as electrification of transportation, drones, autonomous vehicles, rural broadband and cybersecurity. You will find them included with this letter, and they are also available online: http://www.ngaahead.org/

Again, thank you for your generous support and for **SPONSOR ORGANIZATION** continued engagement with governors as we all strive to embrace technological change and become "Innovation Governors."

Sincere regards,

Subject: NGA Thank You's FOR APPROVAL
Attachments: NGA Thank You's.docx

CD,

Attached are draft thank you letters for the Governor's approval. The list (included below) includes all presenters and foreign dignitaries who participated in the NGA Summer Meeting.

As you can see, these letters are to be signed by both Governor Sandoval and Bullock. Once the Governor approves, NGA will print them out here and mail to you with pre-metered postage. Are you ok with then sending the entire package on to Montana once he signs?

Also, there are three chair's initiative draft thank yous included. These will ONLY be signed by Governor Sandoval and I will send in a separate package to keep everything clear.

Here are the following thank you notes as requested:

- Liz Schrayer, USGLC
- Mr. Kentaro Sonoura
- Gov. Hirai
- John Krafcik, CEO Waymo (Sandoval only)
- Matt Delaney, CEO Marble (Sandoval only)
- Colin Tooze, Director Uber (Sandoval only)
- Graeme Conway, Macquarie
- Josphat Nanok, Head of Kenyan Governors Association
- Annagret Kramp-Karrenbauer, General Secretary of the CDU
- Govs. Only presenters (Opportunity Zones and SCOTUS)
- Thursday infrastructure roundtable participants
- Former Governors at the transition lunch
- Other international participants

Please let me know if you have any questions. Thanks!

We certainly hope this meeting was as productive for you as it was for all of us.

In this critical time, the world is becoming increasingly globalized, with states' economies becoming more interdependent with our international partners. Therefore, we see much value in engaging with you at events such as this year's Summer Meeting. Serving as Chair and Vice Chair has made us prioritize connecting to the international community. NGA Global launched during our tenure, and, looking ahead, we see it as an important program for NGA leadership and the other governors.

Thank you again for your commitment to our global program. We look forward to working with you in the future.

If you have any questions about the summit or NGA's international engagements, please feel free to reach out to Abigail Hunter at ahunter@nga.org or (202) 719-2870.

Sincerely,

Brian Sandoval

Dear Mr. Krafcik:

On behalf of the National Governors Association (NGA), thank you for joining me at the 2018 NGA Summer Meeting in Santa Fe, N.M. This annual meeting is a unique platform for governors to discuss important issues facing the country and an opportunity to share the innovative solutions happening every day at the state level. The session you spoke at was an important component of my 2017-2018 NGA Chair's Initiative, *Ahead of the Curve*: *Innovation Governors*, which highlights how governors can prepare their states for the rapidly advancing technologies that affect our residents and businesses.

Your comments were very well received and helped spark a thoughtful and important dialogue. The discussion provided governors, staff and participants with insight into how self-driving vehicles are reshaping the future and how each state can support innovation, modernize policy and regulatory processes and prepare the future workforce.

Again, thank you for joining me and for your generous contributions of time and expertise.

Dear Sponsor:

On behalf of the National Governors Association (NGA), thank you for being such a wonderful partner over the past year. Your support of my 2017-2018 NGA Chair's Initiative, *Ahead of the Curve*: *Innovation Governors*, which highlights how governors can stay one step ahead of the rapidly advancing technologies that affect the daily lives of residents and businesses in our states, has helped make this initiative a success!

As states move to embrace innovation, it is critical that we have both the public and private sector willing to bring cutting edge ideas to market, embrace technological transformation, and integrate new technologies to transform our current infrastructure. We appreciate **SPONSOR ORGANIZATION** playing a major role in such efforts for the continued support of the NGA Chair's Initiative.

To prepare governors, states and other stakeholders for innovations in the energy and transportation sectors, NGA has crafted two roadmaps. These roadmaps address topics such as electrification of transportation, drones, autonomous vehicles, rural broadband and cybersecurity. You will find them included with this letter, and they are also available online: http://www.ngaahead.org/

Again, thank you for your generous support and for **SPONSOR ORGANIZATION** continued engagement with governors as we all strive to embrace technological change and become "Innovation Governors."

WATER RIGHTS MANAGEMENT AGREEMENT

THIS Water Rights Management Agreement ("Agreement") is made and entered into as of the date of the last signature below ("Effective Date") by and between the Department of Transportation of the State of Nevada ("NDOT"), the Truckee Meadows Water Authority ("TMWA"), and the TRI General Improvement District ("TRIGID") (each NDOT, TMWA, and TRIGID is a "Party" and collectively are referred to as the "Parties").

RECITALS

WHEREAS, the City of Reno, Nevada ("Reno") and City of Sparks, Nevada ("Sparks") own and operate a wastewater treatment plant facility in Washoe County known as the Truckee Meadows Water Reclamation Facility ("TMWRF"), which provides reclaimed water service to certain customers from effluent produced by TMWRF.

WHEREAS, TRIGID is a general improvement district created by Storey County pursuant to NRS Chapter 318 and 308 and provides community water and sewer service to customers within the Tahoe-Reno Industrial Center ("TRI Center") in Storey County, and whose customers require treated effluent for industrial and other purposes and would use potable water for these requirements unless the demand were satisfied with treated effluent.

WHEREAS, TMWA is a municipal water purveyor and joint powers authority which manages various groundwater and surface water resources in connection with its operations, and subject to the provisions of the Truckee River Operating Agreement ("TROA") and the Orr Ditch Decree has exclusive authority over the execution and implementation of its obligations thereunder, including management of TMWA water resources recognized therein.

WHEREAS, Reno, Sparks, and TRIGID have entered into that certain Agreement for Treated Effluent dated September 13, 2017 ("Effluent Agreement") attached hereto as Exhibit "A," pursuant to which, *inter alia*, Reno and Sparks have agreed to reserve and deliver to TRIGID up to 4,000 acre-feet annually of reclaimed water for resale to TRIGID customers in the TRI Center, and TRIGID has agreed to design, construct and operate a pipeline on the terms and conditions set forth in the Effluent Agreement.

WHEREAS, in some circumstances, where effluent generated at TMWRF is put to use as reclaimed water and is not returned to the Truckee River, secondary permits require an amount of water equal to the reclaimed water not returned to the Truckee River must be made up from other water sources, typically approved to be available for use in the same manner and to the same extent as the reclaimed water could have been used had it been returned to the Truckee River, under applicable regulatory provisions.

WHEREAS, Reno, Sparks, TRIGID, and TMWA have entered into that certain Return Flow Management Agreement dated _____, 2018 ("Return Flow Management Agreement"), pursuant to which, *inter alia*, Reno, Sparks, TRIGID, and TMWA have agreed that TMWA will manage, direct, schedule and allocate, on a day-to-day basis, certain water resources to satisfy return flow requirements arising from the delivery of reclaimed water to TRIGID under the Effluent Agreement in order to ensure that return flow to the Truckee River is no less than

would have been required by the State Engineer had reclaimed water been discharged as treated effluent to the Truckee River at TMWRF.

WHEREAS, TRIGID has pledged or will pledge 1,500 acre-feet of Truckee River water rights for TMWA's management under the Return Flow Management Agreement to satisfy a portion of the return flow requirements.

WHEREAS, NDOT's mission is to "[p]rovide, operate, and preserve a transportation system that enhances safety, quality of life and economic development through innovation, environmental stewardship and a dedicated workforce," and NDOT owns substantial Truckee River water rights in the Truckee Meadows that can be used for Return Flow Purposes (as such term is defined in the Return Flow Management Agreement) that would contribute to the safety, quality of life, economic development, innovation, and environmental stewardship elements of NDOT's mission and provide TWMA with additional water resources to support TMWA's Truckee River management responsibilities in connection with the Return Flow Management Agreement, provided that NDOT's Truckee River water rights are approved for such use by the Nevada Division of Water Resources ("NDWR").

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

ARTICLE I
AUTHORITY FOR AGREEMENT

1.1 Interlocal Cooperation Act. Chapter 277 of the Nevada Revised Statutes provide general and specific authority for the actions contemplated herein. Under the Interlocal Cooperation Act, an Interlocal Agreement is defined as including an agreement by public agencies to "obtain a service" from another public agency. NRS 277.110 expressly provides that "[a]ny two or more public agencies may enter into agreements with one another for joint or cooperative action" under the Interlocal Cooperation Act. The Parties agree that the nature of the water-rights management duties assumed by TMWA under this Agreement constitute a service for NDOT's benefit as well as TRIGID's benefit for purposes of NRS 277.110.

ARTICLE II
NDOT'S TRUCKEE MEADOWS WATER RIGHTS

2.1 NDOT's Water Rights in the Truckee Meadows. NDOT owns a significant amount of land within the Truckee Meadows, primarily acquired for roads and highways. Some of this land includes appurtenant Truckee River water rights adjudicated under the *Orr Ditch Decree*. However, for many of these water rights, NDOT has not prepared and filed reports of conveyance with NDWR to confirm its ownership and as a result are not yet titled properly to reflect NDOT as the legal owner within NDWR records. These water rights include the water rights described and discussed in that certain *Inventory and Documentation for Validation of Truckee River Water Rights Summary Report* dated June 5, 2007 and prepared for NDOT by HDR, Inc. (the "HDR Report"). There may be additional Truckee River water rights owned by NDOT that are not included in the HDR Report. For purposes of this Agreement, all water rights adjudicated in the *Orr Ditch Decree* in which NDOT has an ownership interest are the "NDOT Water Rights" (and

AMERICAN OVERSIGHT

DocuSign Envelope ID: 6988D8D5-ABD0-4533-BE93-D1B4890A5039

individually an "NDOT Water Right"), even if such a water right was omitted from the HDR Report.

2.2 NDOT's Future Water Right Needs. Part of the HDR Report included an assessment of NDOT's future water-right needs. The assessment concluded that an estimated 224 acre-feet ("Reserved Rights") would be needed by NDOT and other State Agencies for future needs.

2.3 NDOT's Desire to Dedicate the NDOT Water Rights for In-Stream Flows. NDOT desires to use a portion of the NDOT Water Rights up to, but not to exceed, 2,200 acre-feet (such amount referred to as the "State Return Flow Resources"), to satisfy part of the return flow requirement arising from the use of reclaimed water delivered to TRIGID that is not returned to the Truckee River according to applicable permits, including without limitation water resources that may legally be used for such purposes, and desires that TMWA manage the NDOT Water Rights as contemplated in the Return Flow Management Agreement and as set forth in this Agreement.

2.4 NDOT's Desire for NDOT Water Rights to be Properly titled within NDWR Records. NDOT may have more or less Truckee River water rights than what was identified in the HDR Report. If more NDOT Water Rights are identified during the efforts carried out in Article III of this Agreement, TRIGID shall prepare reports of conveyance, chains of title, and provide supporting documents for any additionally identified NDOT Water Rights, including any in excess of the State Return Flow Resources, at no expense to NDOT.

2.5 NDOT's Authorization for TMWA to Manage NDOT Water Rights. As the NDOT Water Rights become properly titled within NDWR records (and thereafter become available for use as State Return Flow Resources), and after the Reserved Rights have been reserved to meet the requirements in Section 2.2 of this Agreement, NDOT authorizes TMWA and TRIGID to identify, select, file, and prosecute change applications with NDWR for the State Return Flow Resources and authorizes TMWA to manage such titled State Return Flow Resources and change applications to satisfy return flow requirements as contemplated under the terms of the Return Flow Management Agreement.

ARTICLE III
PROVING-UP NDOT'S TRUCKEE MEADOWS WATER RIGHTS AND PROSECUTION OF CHANGE APPLICATIONS

3.1 Proving Title to NDOT Water Rights. The Parties agree the report of conveyance process through which NDWR records will be updated to show NDOT's ownership will take time to complete. The Parties also agree that reports of conveyance with the appropriate supporting documents may be submitted to NDWR on a rolling basis as the title to individual water rights is researched and confirmed. The Parties also acknowledge it is NDOT's intent that TRIGID, at no cost to TMWA or NDOT, will complete the research and, for those NDOT Water Rights with clear title, prepare ownership summary updates to NDOT for all of the NDOT Water Rights, including preparation of reports of conveyance, chains of title, and supporting documents for any NDOT Water Rights, including any in excess of the State Return Flow Resources.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-004575

DocuSign Envelope ID: 6988D8D5-ABD0-4533-BE93-D1B4890A5039

3.2 Change Applications. In addition to reports of conveyance, the Parties agree that applications to change the manner of use to authorize use of the NDOT Water Rights for Return Flow Purposes may be submitted to NDWR and prosecuted to successful conclusion for State Return Flow Resources for which reports of conveyance have been submitted or concurrently with such reports of conveyance.

3.3 No Cost to NDOT. The Parties agree that the title research and processing work necessary to bring NDWR's records current with respect to ownership of the NDOT Water Rights (including State Return Flow Resources) and change applications of State Return Flow Resources for Return Flow Purposes shall be completed at no cost to NDOT or TMWA, it being the Parties' intention that TRIGID be responsible for such costs. Part of the consideration to NDOT for entering into this Agreement and authorizing the use of NDOT Water Rights to be managed by TMWA for Return Flow Purposes is the benefit of having the title research and processing work performed by others at their cost and expense, including all fees and charges to prove NDOT's ownership of the NDOT Water Rights and change their manner of use for Return Flow Purposes.

3.4 NDOT's Right to Approve NDWR Submissions. Before any proposed report of conveyance or change application pertaining to any NDOT Water Right is submitted to NDWR, NDOT must receive such proposed submission for its review. No proposed report of conveyance or change application pertaining to any NDOT Water Right shall be submitted to NDWR without NDOT's written approval, which approval may be provided by email from the Director of NDOT or his/her delegate.

3.5 Notices of Pledge. To ensure that State Return Flow Resources are used for Return Flow Purposes in a manner consistent with this Agreement and the agreements referenced above, the Parties agree to execute a Notice of Pledge, in substantially the same form as Exhibit B attached hereto, identifying the State Return Flow Resources approved for Return Flow Purposes by NDWR and file copies of same with Washoe County Recorder and NDWR.

ARTICLE IV
RETURN FLOW MANAGEMENT

4.1 TMWA Management of Return Flows. NDOT acknowledges that the TMWA is responsible for managing, directing, and scheduling the allocation and use of the Managed Resources (as defined in the Return Flow Management Agreement) to support delivery of reclaimed water supply to TRIGID pursuant to the Return Flow Management Agreement, and, accordingly, TMWA will administer the day-to-day management of return flow accounting and has the sole discretion as to which water is used to satisfy return flow requirements under the terms of the Return Flow Management Agreement.

4.2 NDOT Authorization for TMWA Management. NDOT acknowledges and agrees that any State Return Flow Resources authorized for use for Return Flow Purposes by NDWR will be managed and utilized by TMWA for Return Flow Purposes during the Term of this Agreement.

ARTICLE V
TERM AND TERMINATION

5.1 Term. Except as otherwise provided herein, this Agreement shall commence upon the Effective Date and shall have a term that runs concurrently with the term(s) of the Effluent Agreement.

5.2 Termination. This Agreement may be terminated:

(a) by written consent of NDOT, TMWA, and TRIGID; or

(b) if the Return Flow Management Agreement is terminated for any reason, in which event this Agreement shall automatically terminate on the termination date of the Return Flow Management Agreement.

In the event this Agreement is terminated, no Party shall have any further obligations or liabilities hereunder.

ARTICLE VI
NOTICES

All notices or other communications required or permitted to be given under this Agreement shall be in writing and shall be deemed to have been duly given if delivered personally in hand, or by certified mail, return receipt requested, postage prepaid on the date posted, and addressed to the other party at the address set forth below:

ARTICLE VII
MISCELLANEOUS

7.1 Breach and Remedies. Failure of any Party to perform any obligation of this Agreement shall be deemed a breach. Except as otherwise provided for by law or this Agreement, the rights and remedies of the Parties set forth in this Agreement shall not be exclusive and are in addition to any other rights and remedies provided by law or equity, including but not limited to the recovery of actual damages, and the prevailing party's reasonable attorney's fees and costs.

7.2 No Waiver of Defenses. The Parties do not waive and intend to assert available NRS Chapter 41 liability limitations in all cases. Contract liability of any Party shall not be subject to special damages, consequential damages or punitive damages.

7.3 Force Majeure. No Party shall be deemed to be in violation of this Agreement if it is prevented from performing any of its obligations hereunder due to strikes, failure of public transportation, civil or military authority, act of public enemy, accidents, fires, explosions, or acts of God, including without limitations, earthquakes, floods, winds, or storms. In such an event the intervening cause must not be through the fault of the party asserting such an excuse, and the excused Party is obligated to promptly perform in accordance with the terms of the Agreement after the intervening cause ceases.

AMERICAN OVERSIGHT

DocuSign Envelope ID: 6988D8D5-ABD0-4533-BE93-D1B4890A5039

7.4 Indemnity. To the fullest extent of NRS Chapter 41 liability limitations, each party shall indemnify, hold harmless, and defend, not excluding others' right to participate, the other Parties from and against all liability, claims, actions, damages, losses, and expenses, including but not limited to reasonable attorney's fees and costs, arising out of any alleged negligent or willful acts or omissions of the party, its officers, employees, and agents. Such obligation shall not be construed to negate, abridge, or otherwise reduce any other right or obligation of indemnity, which would otherwise exist as to any party or person, described herein. This indemnification obligation is conditioned upon service of written notice to the other Parties within thirty (30) calendar days of the indemnified Party's notice of actual or pending claim or cause of action. The indemnifying Party (or Parties) shall not be liable for reimbursement of any attorney's fees and costs incurred by the indemnified Party due to said Party exercising its right to participate with legal counsel.

7.5 Party Independence. The Parties are associated with each other only for the purposes and to the extent set forth in this Agreement. Each Party is and shall be a public agency separate and distinct from the other Parties and shall have the right to supervise, manage, operate, control, and direct performance of the details incident to its duties under this Agreement. Nothing contained in this Agreement shall be deemed or construed to create a partnership or joint venture, to create relationships of an employer-employee or principal-agent, or to otherwise create any liability for one agency whatsoever with respect to the indebtedness, liabilities, and obligations of the other agency or any other Party.

7.6 No Waiver of Breach. Failure to declare a breach or the actual waiver of any particular breach of the Agreement or its material or nonmaterial terms by any Party shall not operate as a waiver by such Party of any of its rights or remedies as to any other breach, including another breach of the same provision.

7.7 Severability. The illegality or invalidity of any provision or portion of this Agreement shall not affect the validity of the remainder of the Agreement and this Agreement shall be construed as if such provision did not exist. The unenforceability of such provision or provisions shall not be held to render any other provision or provisions of this Agreement unenforceable.

7.8 Assignment. No Party shall assign, transfer, or delegate any rights, obligations, or duties under this Agreement without the prior written consent of the other Parties.

7.9 No Conveyance of Property. Except as otherwise provided by this Agreement, all or any property presently owned by either party shall remain in such ownership upon termination

AMERICAN OVERSIGHT

DocuSign Envelope ID: 6988D8D5-ABD0-4533-BE93-D1B4890A5039

of this Agreement, and there shall be no transfer of property between the parties pursuant to this Agreement.

7.10 Public Records. Pursuant to NRS Chapter 239, information or documents may be open to public inspection and copying. The Parties will have the duty to disclose unless a particular record is confidential by law or a common law balancing of interests.

7.11 Confidentiality. Each party shall keep confidential all information, in whatever form, produced, prepared, observed, or received by that Party to the extent that such information is confidential by law or otherwise required by this Agreement.

7.12 Authority to Bind. The parties hereto represent and warrant that the person executing this Agreement on behalf of each party has full power and authority to enter into this Agreement and that the Parties are authorized by law to perform the services set forth herein.

7.13 Choice of Law. This Agreement and the rights and obligations of the parties hereto shall be governed by, and construed according to, the laws of the State of Nevada. The parties consent to the exclusive jurisdiction of the Nevada state district courts for enforcement of this Agreement.

7.14 Entire Agreement. This Agreement constitutes the entire agreement of the Parties and such is intended as a complete and exclusive statement of the promises, representations, negotiations, discussions, and other agreements that may have been made in connection with the subject matter hereof. Unless an integrated attachment to this Agreement specifically displays a mutual intent to amend a particular part of this Agreement, general conflicts in language between any such attachment and this Agreement shall be construed consistent with the terms of this Agreement. Unless otherwise expressly authorized by the terms of this Agreement, no modification or amendment to this Agreement shall be binding upon the Parties unless the same is in writing and signed by the respective Parties hereto and approved by the Attorney General.

Hi Andrew-

Here's a paragraph for inclusion in the Governor's letter, as well as supporting information from the ACS.

Please let us know if you have any questions.

Thanks,
-Cory

# # #

Census Tract 32029970200 meets the qualifications established by H.R. 1 SEC. 1400Z(e) as a census tract contiguous with a low-income community. First, Census tract 32029970200 is contiguous with Census Tract 32019960201, a low-income community that is being submitted for designation as an Opportunity Zone. Second, the attached 2012-2016 American Community Survey demonstrates that the median family income of tract 32029970200 does not exceed 125 percent of the median family income of low-income community tract 32019960201. I nominate census tract 32029970200 as a qualified opportunity zone; my office stands ready to answer any questions or provide additional supporting information upon request. In the event that you do not designate this tract, I reserve my right to provide a substitute tract in its place.

MEDIAN FAMILY INCOME IN THE PAST 12 MONTHS (IN 2016 INFLATION-ADJUSTED DOLLARS)

Universe: Families

2012-2016 American Community Survey 5-Year Estimates

Note: This is a modified view of the original table.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

	Census Tract 9602.01, Lyon County, Nevada	Census Tract 9702, Storey County, Nevada
	Estimate	Estimate
Median family income in the past 12 months (in 2016 inflation-adjusted dollars)	53,581	66,738

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2012-2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2012-2016 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because

AMERICAN OVERSIGHT

the number of sample cases is too small.

8. An '(X)' means that the estimate is not applicable or not available.

Subject: NSHE Response to Follow Up Questions from Feb 27 Budget Hearing
Attachments: NSHE Response_Follow up Questions from Feb 27 Hearing_FINAL.pdf

Good afternoon Brody and Jennifer,

Attached, please find the response from the Nevada System of Higher Education pertaining to the follow up questions from the NSHE's budget hearing on February 27th.

Thank you,
Melissa

MEMORANDUM

DATE: March 14, 2019

TO: Brody Leiser, Senior Program Analyst
Jennifer Ouellette, Program Analyst
Fiscal Analysis Division

FROM: Thom
Dr. Thom Reilly, Chancellor
Nevada System of Higher Education

SUBJECT: **NSHE Response to Subcommittee on K-12/Higher Education/CIPs – Follow-up Questions from the February 27, 2019, NSHE Budget Hearing**

Below is the information you requested following the Subcommittee hearing on February 27, 2019. If you need additional information, please contact me or my staff.

University of Nevada, Reno – Rifle Team

1. **Public testimony indicated that a decision had been made to no longer continue funding for support of the UNR Rifle Team, and that the team would be replaced with Men's cross country. Please confirm how much funding was expended in FY 2018, and how much funding is budgeted in FY 2019 for the UNR rifle team. In the response please identify the source of revenue that supports the program, and identify whether or not the funding is budgeted in the UNR Intercollegiate Athletics state-supported operating budget, the self-supported operating budget, or a combination of both.**

   UNR Response:
   The table on the following page summarizes the budget for the UNR Rifle Team for FY 2018 and FY 2019.

AMERICAN OVERSIGHT

	FY 18 Actual	FY 19 Projected	FY 20 Beyond
Self-Supporting Subsidy from Athletics Funds	$302,251	$282,556	$312,718
Donor Funds	$21,391	$40,000	$40,000
Total Revenues	**$323,642**	**$323,556**	**$352,718**
Coaching Salaries	$10,222	$10,406	$10,718
Operations	$23,701	$30,150	$30,000
Facility Rental**	$0	$0	$30,000
Travel	$47,244	$40,000	$40,000
Financial Aid/Scholarships	$153,975	$153,000	$153,000
Overhead/Compliance	$88,500	$89,000	$89,000
Total Expenses	**$323,642**	**$322,556**	**$352,718**

** Rental space must be obtained to house the program going forward as the prior facility on Valley Road has recently been remodeled into academic laboratories for the College of Agriculture, Biotechnology, and Natural Resources.

UNR – Statewide Programs

2. **Regarding the NevadaTeach enhancement, please confirm that NSHE is requesting back language to be added to the 2019 Appropriations Act authorizing expenditure of the recommended $300,000 in General Fund appropriations in either year of the 2019-21 biennium.**

   NSHE Response:
   If the enhancement is approved by the Legislature, NSHE is requesting that language similar to what was included in SB 522 (2017 Session) Sec. 2 be included in the 2019 Appropriations Act, allowing the General Fund appropriations to be used in either year of the 2019-2021 biennium.

University of Nevada, Las Vegas – School of Medicine

3. **During the hearing, UNLV testified that work was being done to plan a 150,000 square foot Medical Education Building that would allow the class to expand to 120 students, and that renderings for the building would be complete in March. Previous communications indicated that all work on the UNLV Medical Education Building had been placed on hold. Please proved a detailed information on the testimony provided during the February 27, 2019, hearing, including:**

   a. **A summary of the factors that have led to UNLV determining that the 150,000 square foot building is the appropriate path to move forward with, and**

AMERICAN OVERSIGHT

whether that final plan has been approved by both the university and the Board of Regents.

UNLV Response:
UNLV has estimated that a 150,000 +/- square foot building would support core classroom, teaching, clinical skills, simulation, study, academic support and directly related functions for a UNLV School of Medicine (SOM) student class size of 120 students per year, resulting in total annual enrollment of 480 students. This facility would support the UNLV SOM in doubling its class size, to support Nevada's needs for physicians. UNLV SOM would also plan to continue to use some existing facilities in operation for faculty/staff, clinical practice and other needs that could not be accommodated in a 150,000 +/- square foot new building.

UNLV is currently developing a conceptual space program for this 150,000 square foot option to determine if it is feasible and worthy of further consideration and pursuit. As this plan is under development, it has neither been approved at this time by the university or the Board of Regents.

Previously, UNLV was proposing a comprehensive 220,000 square foot building that would have included classroom, clinical skills, simulation, student support and administration. It would also have included a learning resource center that could support all of the health sciences programs. This design could have potentially expanded to support a class size of 180 students per year, for total annual enrollment of 720 students.

The 150,000 square foot concept would require that most administrative functions be housed in a separate building, and that the learning center be scaled back to only support the school of medicine students.

b. Please provide a cost estimate through construction (inclusive of FF&E), based on the 150,000 square foot building.

UNLV Response:
As the study of this facility option is underway, a cost estimate through construction, inclusive of FF&E, has not yet been developed. At the conclusion of the conceptual study, UNLV will have a cost estimate. UNLV will work with the State of Nevada Public Works Division (SPWD) to further develop the cost estimate in accordance with SPWD standards.

c. Confirmation of whether the referenced efforts and plans for the building, are being coordinated with the State Public Works Division, and identification of the funding source to complete the referenced renderings (i.e., paid for with CIP funds from 17-C15, or another funding source).

AMERICAN OVERSIGHT

UNLV Response:
UNLV has been coordinating with SPWD on its efforts through direct discussions in December 2018 and January/February 2019, and through UNLV's input into the SPWD's January 23, 2019 SB 553 report to the Interim Finance Committee on Project 17-C15. UNLV advised SPWD that it is evaluating stakeholder needs and interests and assessing space programming and feasibility studies, space and program approaches for the School of Medicine to determine the most suitable and appropriate option going forward.

Direct discussions in January and February 2019 between UNLV and SPWD staff included an update that UNLV was looking at a facility space program option as described in the response to Question 3a of this document.

UNLV used institutional self-supporting resources to fund this conceptual study for this 150,000 +/- square foot building. These funds are not a part of State CIP funds, or funds specified or identified in SB 553.

d. An update on fundraising efforts for this project.

UNLV Response:
The initial lead donors for this project have paused their interest in this project. While other conversations are occurring to identify new lead donors of $25M +, none at this time have committed. It is not prudent for the University to pursue other gift commitments until the lead gifts are secured. Without a very substantial gift, it is not realistic to expect UNLV to raise $100M from private funds prior to commencing construction.

e. Please provide details regarding the alternative funding models that would combine private funds/financing that are being considered for the project, as referenced in the hearing presentation.

UNLV Response:
UNLV is still investigating options related to alternative funding models that would combine private funds and financing including the New Markets Tax Credits (NMTC); potential funding efficiency models such as Opportunity Zone financial participation; lease and lease-purchase project, and other models. While it is uncertain at this time whether any or all of these models would be feasible, UNLV believes these are worthy of consideration.

If any of these alternative funding models are considered further, UNLV would coordinate with SPWD on the requirements related to the state funding assigned to this project and other associated requirements.

AMERICAN OVERSIGHT

f. Given the delay in work on the approved 2017 CIP project, please provide an updated timeline for completion of planning and construction of the new building.

UNLV Response:
UNLV does not have an updated timeline for completion of planning and construction of the new building since an alternative space program, facility focus and funding options/models are still under consideration and determinations have not been made on these items. Once these items are better understood, UNLV will be able to make a more informed assessment, working with the SPWD and their standards and requirements for the project timeline.

UNLV expects to commence construction no later than July 2021 as required by the 9-acre parcel real property transfer agreement with Clark County. Once an updated conceptual space program is determined, UNLV will coordinate with SPWD to update the timeline in compliance with their schedule standards.

g. Does UNLV, or NSHE, anticipate requesting any additional state funding beyond the $25 million approved by the 2017 Legislature (S.B. 553) to support costs for the construction of a Medical Education Building?

UNLV Response:
Although the prior administration believed that the rest of the building construction could be raised privately, this expectation did not come to pass and the large gift that was expected did not materialize. This does raise the question of whether it is realistic to expect a university to raise this large an amount privately or whether this building should have been proposed in the manner of other CIPs wherein half of the funds are State funds and half are private. Although we have no plan to request another $50M, that kind of State support for a building of this importance to the university, the city, county and State would be in line with other CIPs. We understand the frustration with the unfulfilled promise of private funding but would appreciate support for UNLV's current efforts to move past that and get this important building off the ground.

Instructional Formula Budgets

4. Please provide detailed information relating to the Year 7 and Year 8 Performance Pool targets which are referenced on slide 33 of NSHE's presentation, including the specific targets by institution, and a detailed explanation as to how the targets were established.

NSHE Response:
A technical working group made up of institutional representatives was created by the Chancellor for the purpose of recommending point targets. Those point targets where then submitted to the Board for review and approval.

AMERICAN OVERSIGHT

Target Recommendations

The working group recommended extending the Year 6-point targets by applying 2.0 percent to the Year 6 target for Year 7 and applying 2.0 percent to the Year 7 target for Year 8 resulting in the following point targets:

	Year 6 Approved Point Targets	Recommended Point Target (+ 2%)	
		Year 7	Year 8
UNLV	2,414.1	2,462.4	2,511.6
UNR	1,683.1	1,716.8	1,751.1
NSC	309.7	315.9	322.2
CSN	3,639.2	3,712.0	3,786.2
GBC	397.9	405.9	414.0
TMCC	1,315.1	1,341.4	1,368.2
WNC	582.5	594.2	606.0

Rationale for Point Target Recommendations

For the purpose of background, in 2014 when point targets for Year 3 and Year 4 of the Performance Pool were established, the approved point targets were based on actual points in the 2012-13 baseline year. Points are based on weighted outcomes in defined metrics that are included in the attached tables. The Year 3 target was established by applying 2.0 percent increase to actual 2012-13 figure for the universities and community colleges and a 4.0 percent increase for the state college. The Year 4 target applied the 2.0 percent increase to the Year 3 target for the universities and community colleges and a 4.0 percent increase for the state college.

Year 5 and Year 6 targets were established in 2016 by applying a 2.0 percent increase to the Year 4 targets for Year 5 and a 2.0 percent increase to the Year 5 target for Year 6 across all institutions. Thus, the Year 5 and Year 6 targets are an extension of the prior year's targets based on the initial 2012-13 baseline year.

In recommending the point targets for Year 7 and Year 8, it is important to recognize the accumulated target increase since the 2012-13 baseline as depicted in the following table:

	Baseline	Approved Point Targets				% Increase (Yr 6 over Baseline)
	2012-13 Actual	Year 3	Year 4	Year 5	Year 6	
UNLV	2,230.3	2,274.9	2,320.4	2,366.8	2,414.1	8.2%
UNR	1,554.9	1,586.0	1,617.8	1,650.1	1,683.1	8.2%
NSC	275.2	286.2	297.7	303.6	309.7	12.5%
CSN	3,362.1	3,429.3	3,497.9	3,567.8	3,639.2	8.2%
GBC	367.6	375.0	382.5	390.1	397.9	8.2%
TMCC	1,215.0	1,239.3	1,264.0	1,289.3	1,315.1	8.2%
WNC	538.1	548.9	559.9	571.1	582.5	8.2%

Relative to the Year 6 approved point target, the working group recommended a 2 percent increase for Year 7 and Year 8 as noted in the following table:

AMERICAN OVERSIGHT

	Baseline	Approved Point Targets				Recommended		% Increase
	2012-13 Actual	Year 3	Year 4	Year 5	Year 6	Year 7	Year 8	(Yr 8 over Baseline)
UNLV	2,230.3	2,274.9	2,320.4	2,366.8	2,414.1	2,462.4	2,511.6	12.6%
UNR	1,554.9	1,586.0	1,617.8	1,650.1	1,683.1	1,716.8	1,751.1	12.6%
NSC	275.2	286.2	297.7	303.6	309.7	315.9	322.2	17.1%
CSN	3,362.1	3,429.3	3,497.9	3,567.8	3,639.2	3,712.0	3,786.2	12.6%
GBC	367.6	375.0	382.5	390.1	397.9	405.9	414.0	12.6%
TMCC	1,215.0	1,239.3	1,264.0	1,289.3	1,315.1	1,341.4	1,368.2	12.6%
WNC	538.1	548.9	559.9	571.1	582.5	594.2	606.0	12.6%

It should be noted that a 12.6 percent to 17.1 percent growth in outcome metrics is an impressive rate of growth over an 8-year period. Already during the first five years of the program NSHE experienced growth of 2,642 additional undergraduate degrees (Associate or Bachelor's) and 120 additional certificates per year. This growth has been accomplished through a number of institutional and systemwide efforts, including but not limited to the following:

- 15 to Finish enrollment intensity and student achievement campaign;
- Gateway course completion initiative;
- Block scheduling;
- Accelerated degree programs;
- Reverse transfer; and
- Alternative pathways to graduation.

These programs and initiatives are indicative of the type of behavior changing programs the performance pool is intended to incentivize. However, degrees are a lagging outcome, tied in large part to enrollment from earlier years.

The growth in degrees is linked to the consistent enrollment growth in the NSHE institutions from 2007 to 2010 (8,306 additional students). Every NSHE institution saw enrollment growth between 2007 and 2010. However, from 2010 to 2015 enrollment in NSHE institutions declined by 8,685 students. Only UNR and NSC have had steady enrollment growth since 2010. UNLV's enrollment declined, but then began to grow again in 2014 and 2015. Since 2012, CSN, GBC, TMCC, and WNC generally experienced declining enrollment with some fluctuations.

Additionally, both the National Center for Education Statistics and the Western Interstate Commission for Higher Education project total Nevada high school graduates to show little growth until 2022, leading to continued challenges in enrollment growth within the state. This drop in enrollment over the more recent years will make sustaining year over year growth in completions highly unlikely.

Resetting the baseline year of the model would exacerbate the problem as it would reset the institutions at the higher level that was achieved during the periods of greatest enrollment growth, and then require them to sustain continued growth above it. In practical terms resetting the baseline would require a 37 percent growth over 8 years for UNR and a 50 percent growth for NSC.

AMERICAN OVERSIGHT

For these reasons the working group recommended extending the 2 percent growth figures to Year 7 and Year 8 as an appropriately aggressive goal for the institutions to strive towards achieving for the purpose of earning back the 20 percent carveout of funds in each year.

5. **Regarding the Board of Regents' requested funding for Summer School to support STEM and Education programs (which was not included in <u>The Executive Budget</u>), please provide the estimated cost by institution that would be required to support Summer School for <u>all</u> degree programs.**

NSHE Response:
The estimated cost to support Summer School for all degree programs ranges from approximately $32.6 million to approximately $43.9 million, excluding pre-requisite courses for nursing and nursing courses, which are currently GF supported.

The Board of Regents recommendation for Summer school funding was based on WSCH data. The table below includes WSCH earned during the Summer 2017 semester, excluding F grades for non-attendance. The table also projects the cost using the WSCH dollar value for FY 2018 ($156.01), which is the same amount used to calculate the M203 decision unit, caseload growth, for the instruction accounts.

Summer 2017: WSCH earned by Institution		
Institution	Completed WSCH	Estimated GF Cost
UNLV	127,828	$19,94,392
UNR	53,108	$8,285,332
NSC	19,495	$3,041,415
CSN	58,410	$9,112,544
GBC	5,579	$714,370
TMCC	15,697	$2,448,811
WNC	2,139	$333,705
Total	281,255	$43,878,569

According to the Budget to Actual Comparison for Summer School, 2018, report, NSHE institutions earned revenue totaling $33.7 million and incurred expenses totaling $32.6 million. The table below provides this information by institution.

AMERICAN OVERSIGHT

2018 SUMMER SCHOOL *Actuals* SOURCE AND USE OF FUNDS BY APPROPRIATION AREA					
Appropriaiton Area	2018 Opening Account Balance $	2018 Acutal Revenue $	2018 Actual Expenditures $	2018 Ending Account Balance $	Net Increase (Decrease) In Funds $
UNR	398,037	7,985,517	7,653,637	729,917	331,880
UNLV	1,051,280	16,787,324	16,226,852	1,611,752	560,472
CSN	402,934	5,700,595	5,396,961	706,568	303,634
GBC	298,003	365,583	300,352	363,235	65,232
TMCC	115,000	1,435,045	1,550,045	0	-115,000
WNC	129,502	152,550	265,057	16,995	-112,507
NSC	464,916	1,248,492	1,184,831	528,577	63,661
NSHE TOTAL	2,859,672	33,675,106	32,577,735	3,957,044	1,097,372

6. **Regarding the recommendation to utilize FY 2018 as the base year, as compared to prior policy of utilizing the odd numbered year (i.e., FY 2019) for the NSHE budgets, please confirm that the recommendation would apply on a prospective basis, and that if approved, the requested and recommended budgets (including the application of the WSCH calculated value) would continue to be based on the even numbered year in future biennium (2021-23 biennium and beyond).**

   NSHE Response:
   The "base" budget year was shifted from the odd numbered fiscal year (FY 2019) to the even numbered fiscal year (2018) based on requests from NSHE institutions and in concurrence with the Governor's Finance Office. This shift allows NSHE to be aligned with the State Budget Instructions and Executive branch agencies. NSHE will continue to use the first year of each biennium (the even numbered fiscal year) as the base budget year, moving forward.

7. **In regards to the $1.7 million in research augmentation funding that has been included in UNLV's base budget, please address the following:**

   a. **Please provide a brief, but specific summary of what the annual $1.7 million research augmentation in UNLV's research O&M funding supported in the current biennium, and how those funds were used to support an expansion or growth in research activities at UNLV.**

      UNLV Response:
      The $1.7 million in research augmentation funding was crucial to UNLV's efforts to expand research activities and infrastructure. The funds were applied to ongoing research operations and maintenance support, including lab renovations and building infrastructure upgrades.

AMERICAN OVERSIGHT

These investments helped UNLV increase its ability to attract sponsored funding and attain R1 “very high research” activity status in the Carnegie Classification of Institutions of Higher Education. This is the gold standard for university research classifications; less than three percent of higher education institutions nationwide achieve this designation.

b. If the $1.7 million was used as match to obtain additional federal and non-federal research grant funding, please identify the number of additional grants and total grant funding obtained.

UNLV Response:
None of the $1.7 million was used as a match to obtain additional federal or non-federal research grant funding.

c. Please provide a detailed explanation as to how the university intends to expend this recommended funding in the 2019-21 biennium.

UNLV Response:
In the next biennium, UNLV will continue to use the research augmentation funding to expand research activities and infrastructure. The funds will support ongoing research operations and maintenance support, as well as including lab renovations and building infrastructure upgrades.

These ongoing investments are important to UNLV’s goal of maintaining R1 “very high research” activity status in the Carnegie Classification of Institutions of Higher Education.

d. Please provide a summary of how much dedicated research space existed at UNLV in FY 2013, and how that space compares to the identified research space for the upcoming 2019-21 biennium.

UNLV Response:
Table 1 below indicates the assignable square feet of research space at UNLV for FY13 and FY19. In FY13, UNLV had 213,145 assignable square feet (asf) dedicated to research space. This space included any space categorized as a research lab or research lab service, including the School of Dental Medicine and School of Medicine.

As of FY19, we have 228,105 assignable square feet dedicated to research space. However, it is important to note that many of our research labs are also serving as classroom laboratory space due to a high deficit (197,183 asf) of teaching laboratory space. For example, the Colleges of Engineering and Sciences estimate that 40% of their research labs are also being used to support academic courses.

AMERICAN OVERSIGHT

Table 1. Assignable Square Feet of Research Space at UNLV from 2013 - 2018

Fiscal Year	Research Labs / Service
FY13	213,145
FY19	228,105

8. **For both UNR and UNLV, please provide a detailed description of how the universities analyze workload requirements relating to the split of time for faculty in their instructional and research workload splits. If available, please provide what the workload split requirements are for each university, by individual department, and how the workload splits compare to national standards and/or the workload splits for the universities peer R1 institutions.**

   UNLV Response:
   UNLV follows NSHE's policy that the standard instructional load of faculty members involved in research and other creative activities is 9-credit hours per semester, compared to the 12-credit hour load for instructional faculty. The 3-credit hour reduction allows faculty to devote time to research and creative activities. In addition, faculty with large research agendas or who perform other functions seminal to the university's mission (curriculum enhancement, institutional and community service, administrative responsibilities) may have additional portions of their instructional load reassigned to these activities, in accordance with the UNLV Workload Assignment Policy and Guidelines. All workload reassignments are reviewed and approved by department Chairs/Directors and Deans. Each semester, approximately 18% of the total faculty workload is reassigned to research and creative activities.

   Additionally, pursuant to NSHE's policy, UNLV conducts annual evaluations of each faculty member's performance, which takes into consideration their workload in research and instruction, including any workload reassignments. This practice provides the academic unit the flexibility to adjust load as necessary, to meet departmental educational responsibilities, and to align faculty activity with UNLV's instructional and research missions.

   Workload policy at most research universities, including elite R1 institutions and UNLV's aspirational peers, does not typically define a specific credit hour load, but instead relies on annual reviews of faculty to allow the academic unit to adjust workload based upon departmental needs and the standard practices in various academic disciplines. However, the typical practice at R1 universities is that research active faculty teach two 3-credit courses per semester, with lower amounts of teaching for highly research active faculty and for faculty in disciplines with high expectations for grant activity.

AMERICAN OVERSIGHT

UNR Response:
UNR Response: For tenure-track faculty, typical appointments are 40% teaching, 40% research, and 20% service. The actual number and type of classes taught by faculty varies among disciplines and whether the department has a doctoral program. Teaching loads are generally consistent with or slightly higher than disciplines at R1 universities. Full-time lecturers have an expectation of teaching the equivalent of 4 course per semester. Both tenure-track faculty and lecturers are typically on “B” contracts (9 months) and may teach additional classes during the summer session, for which they receive overload compensation.

AMERICAN OVERSIGHT

The table below show comparison of Research-Active Tenure-Track Faculty with peer RI institutions:

College/School	R1 University (Course/Year)	UNR (Course/Year)
Education	5.0	5.0

AMERICAN OVERSIGHT

Note:
1.) R1 university comparison institutions on semester systems are Colorado State University, University of Arizona, University of Hawaii, University of New Mexico, University of Utah, Washington State University, and Montana State University
2.) ** Does not have PhD program
3.) Teaching loads for research-active tenure track faculty

9. For both UNR and UNLV, please provide detailed information on the documented outcomes that the universities have achieved as a direct result of the dedicated funding for the operation and maintenance of research space in the state-supported operating budgets.

UNLV Response:
UNLV's operations and maintenance budget for FY19 is approximately $36 million or 12% of the total formula budget. The dedicated funding for O&M of research space is currently $5.6M, which represents over 15% of the $36 million O&M budget.

The investments in operation and maintenance of research space helped UNLV increase its research expenditures from $39M in fiscal year 2013-14 to $89M in fiscal year 2017-18, which was key to attaining R1 "very high research" activity status in the Carnegie Classification of Institutions of Higher Education.

Research activities incur higher design, operating and maintenance costs, such as climate-controlled and particle-free environments, and specialized plumbing and ventilation systems.

The Center for Business & Economic Research (CBER) conservatively estimates that maintaining Top Tier status will result in more than 2,000 new jobs, more than $800M in additional economic output, and close to an additional $500M in personal income for the State of Nevada annually by 2025.

UNR Response:
As part of the funding formula, the University of Nevada, Reno receives funds as a carve-out for dedicated research space that, while not a direct generator of Weighted Student Credit Hours, nonetheless is crucial to the research mission of the institution. Below is a listing of the buildings that have dedicated research space supported by these funds. While grants are rarely tied to specific facilities, the appended Table 1 shows details of funding in the amount of $300,566,409 that was generated in FY16 - FY18 through research grants and contracts conducted in these buildings on the University of Nevada, Reno Campus:

1. Ansari Business Building
2. Center for Molecular Medicine
3. Chemistry Building
4. Davidson Math and Science Center
5. Edna S. Brigham Clinical Education Building

AMERICAN OVERSIGHT

6. Fleischmann Agriculture
7. Howard Medical Sciences
8. Leifson Physics
9. Mackay Science
10. Nell J. Redfield Building
11. Palmer Engineering
12. Paul Laxalt Mineral Research
13. Sarah H. Fleischmann Building
14. Savitt Medical Science
15. Schrugham Engineering and Mines

Average funding per year during the period FY16 - FY18 was $100,184,897.
Also shown is the total funding generated over a five-year period (FY14 – FY18) – a total of $668,259,258.

Due to the support provided through the research O&M carve-out, the buildings listed above were maintained at a level that allowed such a concentrated level of research activity in those spaces. The outcome of the having such well-maintained space and the research activity has been the achievement of Carnegie R-1 Doctoral University – Very high research activity classification. The R-1 classification reflects the very high levels of research expenditures, number of research personnel, and conferral of doctorate degrees.

RESEARCH AWARDS RECEIVED						
	FY2016	FY2017	FY2018	5-years (2014-2018)	Avg of 2016-201

10. During the hearing, Great Basin College indicated that its CTE enrollment in FY 2019 was at its largest levels experienced to date. In that regard, please provide detailed information regarding the number of students enrolled in CTE courses, the credit hours earned (fall semester actual and spring semester estimated),

AMERICAN OVERSIGHT

and the resulting WSCHs (fall semester actual and spring semester estimated) for FY 2019 as compared to FY 2018.

GBC Response:
The table below summarizes the number of actual and projected student credit hour for CTE courses for FY 2018 and FY 2019.

Student Credit Hours				
Trade/Tech Program	FY 2018	FY 2019		
		Fall 2018	Spring 2019 (est)	Total (est)
Diesel Technology (DT)	954.5	604.5	744.0	1,348.5
Electrical System (ELM)	1,735.0	1,102.0	1,626.0	2,728.0
Instrumentation Technology (IT)	955.5	320.0	796.0	1,116.0
Machine Tool Technology (MTT)	-	82.0	53.0	135.0
Technical Arts (TA)	80.0	88.0	-	88.0
Welding Technology (WELD)	965.5	555.0	697.0	1,252.0
Woodworking (WOOD)	-	-	-	-
Tech/Trades Cluster Totals	**4,690.5**	**2,751.5**	**3,916.0**	**6,667.5**
Weighted Student Credit Hours				
Tech/Trades Cluster Totals	**19,020.0**	**10,994.0**	**unknown**	**unknown**

Based on preliminary Spring 2019 figures, it is estimated that the Student Credit Hours for FY 2019 will be approximately 2,000 higher than FY 2018.

The Weighted Student Credit Hours (WSCH) for FY 2019 cannot be calculated until the end of the Spring semester, after grades have been posted. WSCH data is generally available in mid to late June.

11. **During the hearing, the Subcommittee expressed interest in understanding how overall state support for higher education impacts the instructional formula budgets. In particular, the Subcommittee is interested in how state scholarship programs support student registration fees, in which a portion of these fees are deposited in the state-supported operating instructional formula budgets. In that regard, please address the following:**

    a. **Is it possible for NSHE to identify how much registration fee revenue in the state-supported operating instructional formula budgets is attributable to state-supported scholarship programs (e.g., Millennium Scholarship, Silver State Opportunity Grant, Nevada Promise Scholarship)?**

    b. **If the information in 9.a. is available, please provide the amount of registration fee revenue that was booked in the state-supported operating**

AMERICAN OVERSIGHT

instructional formula budgets, by institution, and by scholarship program for FY 2018, and the amounts estimated for FY 2019, if available.

NSHE Response:
NSHE cannot identify how much registration fee revenue in the state-supported operating instructional formula budgets is attributable to state-supported scholarship programs. Many students receive multiple grants and scholarships that may be from a variety of sources including, but not limited to, federal funds (i.e. Pell grants), private funds (i.e. private scholarships), and institutional funds (fee generated). They may also receive funds in the form of student loans. Depending on the timing, a student may also make a payment to their account either before or after financial aid is applied. All such funds are processed through the student's account; therefore, it is not possible to determine which dollars are attributable to which sources when a student's fees are paid.

MEMORANDUM

DATE: March 14, 2019

TO: Brody Leiser, Senior Program Analyst
Jennifer Ouellette, Program Analyst
Fiscal Analysis Division

FROM: Thom
Dr. Thom Reilly, Chancellor
Nevada System of Higher Education

SUBJECT: **NSHE Response to Subcommittee on K-12/Higher Education/CIPs – Follow-up Questions from the February 27, 2019, NSHE Budget Hearing**

Below is the information you requested following the Subcommittee hearing on February 27, 2019. If you need additional information, please contact me or my staff.

University of Nevada, Reno – Rifle Team

1. **Public testimony indicated that a decision had been made to no longer continue funding for support of the UNR Rifle Team, and that the team would be replaced with Men's cross country. Please confirm how much funding was expended in FY 2018, and how much funding is budgeted in FY 2019 for the UNR rifle team. In the response please identify the source of revenue that supports the program, and identify whether or not the funding is budgeted in the UNR Intercollegiate Athletics state-supported operating budget, the self-supported operating budget, or a combination of both.**

   UNR Response:
   The table on the following page summarizes the budget for the UNR Rifle Team for FY 2018 and FY 2019.

AMERICAN OVERSIGHT

	FY 18 Actual	FY 19 Projected	FY 20 Beyond
Self-Supporting Subsidy from Athletics Funds	$302,251	$282,556	$312,718
Donor Funds	$21,391	$40,000	$40,000
Total Revenues	**$323,642**	**$323,556**	**$352,718**
Coaching Salaries	$10,222	$10,406	$10,718
Operations	$23,701	$30,150	$30,000
Facility Rental**	$0	$0	$30,000
Travel	$47,244	$40,000	$40,000
Financial Aid/Scholarships	$153,975	$153,000	$153,000
Overhead/Compliance	$88,500	$89,000	$89,000
Total Expenses	**$323,642**	**$322,556**	**$352,718**

** Rental space must be obtained to house the program going forward as the prior facility on Valley Road has recently been remodeled into academic laboratories for the College of Agriculture, Biotechnology, and Natural Resources.

UNR – Statewide Programs

2. **Regarding the NevadaTeach enhancement, please confirm that NSHE is requesting back language to be added to the 2019 Appropriations Act authorizing expenditure of the recommended $300,000 in General Fund appropriations in either year of the 2019-21 biennium.**

   NSHE Response:
   If the enhancement is approved by the Legislature, NSHE is requesting that language similar to what was included in SB 522 (2017 Session) Sec. 2 be included in the 2019 Appropriations Act, allowing the General Fund appropriations to be used in either year of the 2019-2021 biennium.

University of Nevada, Las Vegas – School of Medicine

3. **During the hearing, UNLV testified that work was being done to plan a 150,000 square foot Medical Education Building that would allow the class to expand to 120 students, and that renderings for the building would be complete in March. Previous communications indicated that all work on the UNLV Medical Education Building had been placed on hold. Please proved a detailed information on the testimony provided during the February 27, 2019, hearing, including:**

   a. **A summary of the factors that have led to UNLV determining that the 150,000 square foot building is the appropriate path to move forward with, and**

AMERICAN OVERSIGHT

whether that final plan has been approved by both the university and the Board of Regents.

UNLV Response:
UNLV has estimated that a 150,000 +/- square foot building would support core classroom, teaching, clinical skills, simulation, study, academic support and directly related functions for a UNLV School of Medicine (SOM) student class size of 120 students per year, resulting in total annual enrollment of 480 students. This facility would support the UNLV SOM in doubling its class size, to support Nevada's needs for physicians. UNLV SOM would also plan to continue to use some existing facilities in operation for faculty/staff, clinical practice and other needs that could not be accommodated in a 150,000 +/- square foot new building.

UNLV is currently developing a conceptual space program for this 150,000 square foot option to determine if it is feasible and worthy of further consideration and pursuit. As this plan is under development, it has neither been approved at this time by the university or the Board of Regents.

Previously, UNLV was proposing a comprehensive 220,000 square foot building that would have included classroom, clinical skills, simulation, student support and administration. It would also have included a learning resource center that could support all of the health sciences programs. This design could have potentially expanded to support a class size of 180 students per year, for total annual enrollment of 720 students.

The 150,000 square foot concept would require that most administrative functions be housed in a separate building, and that the learning center be scaled back to only support the school of medicine students.

b. Please provide a cost estimate through construction (inclusive of FF&E), based on the 150,000 square foot building.

UNLV Response:
As the study of this facility option is underway, a cost estimate through construction, inclusive of FF&E, has not yet been developed. At the conclusion of the conceptual study, UNLV will have a cost estimate. UNLV will work with the State of Nevada Public Works Division (SPWD) to further develop the cost estimate in accordance with SPWD standards.

c. Confirmation of whether the referenced efforts and plans for the building, are being coordinated with the State Public Works Division, and identification of the funding source to complete the referenced renderings (i.e., paid for with CIP funds from 17-C15, or another funding source).

AMERICAN OVERSIGHT

UNLV Response:
UNLV has been coordinating with SPWD on its efforts through direct discussions in December 2018 and January/February 2019, and through UNLV's input into the SPWD's January 23, 2019 SB 553 report to the Interim Finance Committee on Project 17-C15. UNLV advised SPWD that it is evaluating stakeholder needs and interests and assessing space programming and feasibility studies, space and program approaches for the School of Medicine to determine the most suitable and appropriate option going forward.

Direct discussions in January and February 2019 between UNLV and SPWD staff included an update that UNLV was looking at a facility space program option as described in the response to Question 3a of this document.

UNLV used institutional self-supporting resources to fund this conceptual study for this 150,000 +/- square foot building. These funds are not a part of State CIP funds, or funds specified or identified in SB 553.

d. An update on fundraising efforts for this project.

UNLV Response:
The initial lead donors for this project have paused their interest in this project. While other conversations are occurring to identify new lead donors of $25M +, none at this time have committed. It is not prudent for the University to pursue other gift commitments until the lead gifts are secured. Without a very substantial gift, it is not realistic to expect UNLV to raise $100M from private funds prior to commencing construction.

e. Please provide details regarding the alternative funding models that would combine private funds/financing that are being considered for the project, as referenced in the hearing presentation.

UNLV Response:
UNLV is still investigating options related to alternative funding models that would combine private funds and financing including the New Markets Tax Credits (NMTC); potential funding efficiency models such as Opportunity Zone financial participation; lease and lease-purchase project, and other models. While it is uncertain at this time whether any or all of these models would be feasible, UNLV believes these are worthy of consideration.

If any of these alternative funding models are considered further, UNLV would coordinate with SPWD on the requirements related to the state funding assigned to this project and other associated requirements.

AMERICAN OVERSIGHT

f. Given the delay in work on the approved 2017 CIP project, please provide an updated timeline for completion of planning and construction of the new building.

UNLV Response:
UNLV does not have an updated timeline for completion of planning and construction of the new building since an alternative space program, facility focus and funding options/models are still under consideration and determinations have not been made on these items. Once these items are better understood, UNLV will be able to make a more informed assessment, working with the SPWD and their standards and requirements for the project timeline.

UNLV expects to commence construction no later than July 2021 as required by the 9-acre parcel real property transfer agreement with Clark County. Once an updated conceptual space program is determined, UNLV will coordinate with SPWD to update the timeline in compliance with their schedule standards.

g. Does UNLV, or NSHE, anticipate requesting any additional state funding beyond the $25 million approved by the 2017 Legislature (S.B. 553) to support costs for the construction of a Medical Education Building?

UNLV Response:
Although the prior administration believed that the rest of the building construction could be raised privately, this expectation did not come to pass and the large gift that was expected did not materialize. This does raise the question of whether it is realistic to expect a university to raise this large an amount privately or whether this building should have been proposed in the manner of other CIPs wherein half of the funds are State funds and half are private. Although we have no plan to request another $50M, that kind of State support for a building of this importance to the university, the city, county and State would be in line with other CIPs. We understand the frustration with the unfulfilled promise of private funding but would appreciate support for UNLV's current efforts to move past that and get this important building off the ground.

Instructional Formula Budgets

4. Please provide detailed information relating to the Year 7 and Year 8 Performance Pool targets which are referenced on slide 33 of NSHE's presentation, including the specific targets by institution, and a detailed explanation as to how the targets were established.

NSHE Response:
A technical working group made up of institutional representatives was created by the Chancellor for the purpose of recommending point targets. Those point targets where then submitted to the Board for review and approval.

AMERICAN OVERSIGHT

Target Recommendations

The working group recommended extending the Year 6-point targets by applying 2.0 percent to the Year 6 target for Year 7 and applying 2.0 percent to the Year 7 target for Year 8 resulting in the following point targets:

	Year 6 Approved Point Targets	Recommended Point Target (+ 2%)	
		Year 7	Year 8
UNLV	2,414.1	2,462.4	2,511.6
UNR	1,683.1	1,716.8	1,751.1
NSC	309.7	315.9	322.2
CSN	3,639.2	3,712.0	3,786.2
GBC	397.9	405.9	414.0
TMCC	1,315.1	1,341.4	1,368.2
WNC	582.5	594.2	606.0

Rationale for Point Target Recommendations

For the purpose of background, in 2014 when point targets for Year 3 and Year 4 of the Performance Pool were established, the approved point targets were based on actual points in the 2012-13 baseline year. Points are based on weighted outcomes in defined metrics that are included in the attached tables. The Year 3 target was established by applying 2.0 percent increase to actual 2012-13 figure for the universities and community colleges and a 4.0 percent increase for the state college. The Year 4 target applied the 2.0 percent increase to the Year 3 target for the universities and community colleges and a 4.0 percent increase for the state college.

Year 5 and Year 6 targets were established in 2016 by applying a 2.0 percent increase to the Year 4 targets for Year 5 and a 2.0 percent increase to the Year 5 target for Year 6 across all institutions. Thus, the Year 5 and Year 6 targets are an extension of the prior year's targets based on the initial 2012-13 baseline year.

In recommending the point targets for Year 7 and Year 8, it is important to recognize the accumulated target increase since the 2012-13 baseline as depicted in the following table:

	Baseline	Approved Point Targets				% Increase (Yr 6 over Baseline)
	2012-13 Actual	Year 3	Year 4	Year 5	Year 6	
UNLV	2,230.3	2,274.9	2,320.4	2,366.8	2,414.1	8.2%
UNR	1,554.9	1,586.0	1,617.8	1,650.1	1,683.1	8.2%
NSC	275.2	286.2	297.7	303.6	309.7	12.5%
CSN	3,362.1	3,429.3	3,497.9	3,567.8	3,639.2	8.2%
GBC	367.6	375.0	382.5	390.1	397.9	8.2%
TMCC	1,215.0	1,239.3	1,264.0	1,289.3	1,315.1	8.2%
WNC	538.1	548.9	559.9	571.1	582.5	8.2%

Relative to the Year 6 approved point target, the working group recommended a 2 percent increase for Year 7 and Year 8 as noted in the following table:

AMERICAN OVERSIGHT

	Baseline	Approved Point Targets				Recommended		% Increase
	2012-13 Actual	Year 3	Year 4	Year 5	Year 6	Year 7	Year 8	(Yr 8 over Baseline)
UNLV	2,230.3	2,274.9	2,320.4	2,366.8	2,414.1	2,462.4	2,511.6	12.6%
UNR	1,554.9	1,586.0	1,617.8	1,650.1	1,683.1	1,716.8	1,751.1	12.6%
NSC	275.2	286.2	297.7	303.6	309.7	315.9	322.2	17.1%
CSN	3,362.1	3,429.3	3,497.9	3,567.8	3,639.2	3,712.0	3,786.2	12.6%
GBC	367.6	375.0	382.5	390.1	397.9	405.9	414.0	12.6%
TMCC	1,215.0	1,239.3	1,264.0	1,289.3	1,315.1	1,341.4	1,368.2	12.6%
WNC	538.1	548.9	559.9	571.1	582.5	594.2	606.0	12.6%

It should be noted that a 12.6 percent to 17.1 percent growth in outcome metrics is an impressive rate of growth over an 8-year period. Already during the first five years of the program NSHE experienced growth of 2,642 additional undergraduate degrees (Associate or Bachelor's) and 120 additional certificates per year. This growth has been accomplished through a number of institutional and systemwide efforts, including but not limited to the following:

- 15 to Finish enrollment intensity and student achievement campaign;
- Gateway course completion initiative;
- Block scheduling;
- Accelerated degree programs;
- Reverse transfer; and
- Alternative pathways to graduation.

These programs and initiatives are indicative of the type of behavior changing programs the performance pool is intended to incentivize. However, degrees are a lagging outcome, tied in large part to enrollment from earlier years.

The growth in degrees is linked to the consistent enrollment growth in the NSHE institutions from 2007 to 2010 (8,306 additional students). Every NSHE institution saw enrollment growth between 2007 and 2010. However, from 2010 to 2015 enrollment in NSHE institutions declined by 8,685 students. Only UNR and NSC have had steady enrollment growth since 2010. UNLV's enrollment declined, but then began to grow again in 2014 and 2015. Since 2012, CSN, GBC, TMCC, and WNC generally experienced declining enrollment with some fluctuations.

Additionally, both the National Center for Education Statistics and the Western Interstate Commission for Higher Education project total Nevada high school graduates to show little growth until 2022, leading to continued challenges in enrollment growth within the state. This drop in enrollment over the more recent years will make sustaining year over year growth in completions highly unlikely.

Resetting the baseline year of the model would exacerbate the problem as it would reset the institutions at the higher level that was achieved during the periods of greatest enrollment growth, and then require them to sustain continued growth above it. In practical terms resetting the baseline would require a 37 percent growth over 8 years for UNR and a 50 percent growth for NSC.

AMERICAN OVERSIGHT

For these reasons the working group recommended extending the 2 percent growth figures to Year 7 and Year 8 as an appropriately aggressive goal for the institutions to strive towards achieving for the purpose of earning back the 20 percent carveout of funds in each year.

5. **Regarding the Board of Regents' requested funding for Summer School to support STEM and Education programs (which was not included in <u>The Executive Budget</u>), please provide the estimated cost by institution that would be required to support Summer School for <u>all</u> degree programs.**

NSHE Response:
The estimated cost to support Summer School for all degree programs ranges from approximately $32.6 million to approximately $43.9 million, excluding pre-requisite courses for nursing and nursing courses, which are currently GF supported.

The Board of Regents recommendation for Summer school funding was based on WSCH data. The table below includes WSCH earned during the Summer 2017 semester, excluding F grades for non-attendance. The table also projects the cost using the WSCH dollar value for FY 2018 ($156.01), which is the same amount used to calculate the M203 decision unit, caseload growth, for the instruction accounts.

Summer 2017: WSCH earned by Institution		
Institution	Completed WSCH	Estimated GF Cost
UNLV	127,828	$19,94,392
UNR	53,108	$8,285,332
NSC	19,495	$3,041,415
CSN	58,410	$9,112,544
GBC	5,579	$714,370
TMCC	15,697	$2,448,811
WNC	2,139	$333,705
Total	281,255	$43,878,569

According to the Budget to Actual Comparison for Summer School, 2018, report, NSHE institutions earned revenue totaling $33.7 million and incurred expenses totaling $32.6 million. The table below provides this information by institution.

AMERICAN OVERSIGHT

2018 SUMMER SCHOOL
Actuals
SOURCE AND USE OF FUNDS BY APPROPRIATION AREA

Appropriaiton Area	2018 Opening Account Balance $	2018 Acutal Revenue $	2018 Actual Expenditures $	2018 Ending Account Balance $	Net Increase (Decrease) In Funds $
UNR	398,037	7,985,517	7,653,637	729,917	331,880
UNLV	1,051,280	16,787,324	16,226,852	1,611,752	560,472

NSHE TOTAL	2,859,672	33,675,106	32,577,735	3,957,044	1,097,372

6. **Regarding the recommendation to utilize FY 2018 as the base year, as compared to prior policy of utilizing the odd numbered year (i.e., FY 2019) for the NSHE budgets, please confirm that the recommendation would apply on a prospective basis, and that if approved, the requested and recommended budgets (including the application of the WSCH calculated value) would continue to be based on the even numbered year in future biennium (2021-23 biennium and beyond).**

   NSHE Response:
   The "base" budget year was shifted from the odd numbered fiscal year (FY 2019) to the even numbered fiscal year (2018) based on requests from NSHE institutions and in concurrence with the Governor's Finance Office. This shift allows NSHE to be aligned with the State Budget Instructions and Executive branch agencies. NSHE will continue to use the first year of each biennium (the even numbered fiscal year) as the base budget year, moving forward.

7. **In regards to the $1.7 million in research augmentation funding that has been included in UNLV's base budget, please address the following:**

   a. **Please provide a brief, but specific summary of what the annual $1.7 million research augmentation in UNLV's research O&M funding supported in the current biennium, and how those funds were used to support an expansion or growth in research activities at UNLV.**

      UNLV Response:
      The $1.7 million in research augmentation funding was crucial to UNLV's efforts to expand research activities and infrastructure. The funds were applied to ongoing research operations and maintenance support, including lab renovations and building infrastructure upgrades.

AMERICAN OVERSIGHT

These investments helped UNLV increase its ability to attract sponsored funding and attain R1 “very high research” activity status in the Carnegie Classification of Institutions of Higher Education. This is the gold standard for university research classifications; less than three percent of higher education institutions nationwide achieve this designation.

b. If the $1.7 million was used as match to obtain additional federal and non-federal research grant funding, please identify the number of additional grants and total grant funding obtained.

UNLV Response:
None of the $1.7 million was used as a match to obtain additional federal or non-federal research grant funding.

c. Please provide a detailed explanation as to how the university intends to expend this recommended funding in the 2019-21 biennium.

UNLV Response:
In the next biennium, UNLV will continue to use the research augmentation funding to expand research activities and infrastructure. The funds will support ongoing research operations and maintenance support, as well as including lab renovations and building infrastructure upgrades.

These ongoing investments are important to UNLV’s goal of maintaining R1 “very high research” activity status in the Carnegie Classification of Institutions of Higher Education.

d. Please provide a summary of how much dedicated research space existed at UNLV in FY 2013, and how that space compares to the identified research space for the upcoming 2019-21 biennium.

UNLV Response:
Table 1 below indicates the assignable square feet of research space at UNLV for FY13 and FY19. In FY13, UNLV had 213,145 assignable square feet (asf) dedicated to research space. This space included any space categorized as a research lab or research lab service, including the School of Dental Medicine and School of Medicine.

As of FY19, we have 228,105 assignable square feet dedicated to research space. However, it is important to note that many of our research labs are also serving as classroom laboratory space due to a high deficit (197,183 asf) of teaching laboratory space. For example, the Colleges of Engineering and Sciences estimate that 40% of their research labs are also being used to support academic courses.

AMERICAN OVERSIGHT

Table 1. Assignable Square Feet of Research Space at UNLV from 2013 - 2018

Fiscal Year	Research Labs / Service
FY13	213,145
FY19	228,105

8. **For both UNR and UNLV, please provide a detailed description of how the universities analyze workload requirements relating to the split of time for faculty in their instructional and research workload splits. If available, please provide what the workload split requirements are for each university, by individual department, and how the workload splits compare to national standards and/or the workload splits for the universities peer R1 institutions.**

   UNLV Response:
   UNLV follows NSHE's policy that the standard instructional load of faculty members involved in research and other creative activities is 9-credit hours per semester, compared to the 12-credit hour load for instructional faculty. The 3-credit hour reduction allows faculty to devote time to research and creative activities. In addition, faculty with large research agendas or who perform other functions seminal to the university's mission (curriculum enhancement, institutional and community service, administrative responsibilities) may have additional portions of their instructional load reassigned to these activities, in accordance with the UNLV Workload Assignment Policy and Guidelines. All workload reassignments are reviewed and approved by department Chairs/Directors and Deans. Each semester, approximately 18% of the total faculty workload is reassigned to research and creative activities.

   Additionally, pursuant to NSHE's policy, UNLV conducts annual evaluations of each faculty member's performance, which takes into consideration their workload in research and instruction, including any workload reassignments. This practice provides the academic unit the flexibility to adjust load as necessary, to meet departmental educational responsibilities, and to align faculty activity with UNLV's instructional and research missions.

   Workload policy at most research universities, including elite R1 institutions and UNLV's aspirational peers, does not typically define a specific credit hour load, but instead relies on annual reviews of faculty to allow the academic unit to adjust workload based upon departmental needs and the standard practices in various academic disciplines. However, the typical practice at R1 universities is that research active faculty teach two 3-credit courses per semester, with lower amounts of teaching for highly research active faculty and for faculty in disciplines with high expectations for grant activity.

AMERICAN OVERSIGHT

UNR Response:
UNR Response: For tenure-track faculty, typical appointments are 40% teaching, 40% research, and 20% service. The actual number and type of classes taught by faculty varies among disciplines and whether the department has a doctoral program. Teaching loads are generally consistent with or slightly higher than disciplines at R1 universities. Full-time lecturers have an expectation of teaching the equivalent of 4 course per semester. Both tenure-track faculty and lecturers are typically on “B” contracts (9 months) and may teach additional classes during the summer session, for which they receive overload compensation.

AMERICAN OVERSIGHT

The table below show comparison of Research-Active Tenure-Track Faculty with peer RI institutions:

College/School	R1 University (Course/Year)	UNR (Course/Year)
Education	5.0	5.0
Journalism**	4.0	4.0

AMERICAN OVERSIGHT

Note:
1.) R1 university comparison institutions on semester systems are Colorado State University, University of Arizona, University of Hawaii, University of New Mexico, University of Utah, Washington State University, and Montana State University
2.) ** Does not have PhD program
3.) Teaching loads for research-active tenure track faculty

9. For both UNR and UNLV, please provide detailed information on the documented outcomes that the universities have achieved as a direct result of the dedicated funding for the operation and maintenance of research space in the state-supported operating budgets.

UNLV Response:
UNLV's operations and maintenance budget for FY19 is approximately $36 million or 12% of the total formula budget. The dedicated funding for O&M of research space is currently $5.6M, which represents over 15% of the $36 million O&M budget.

The investments in operation and maintenance of research space helped UNLV increase its research expenditures from $39M in fiscal year 2013-14 to $89M in fiscal year 2017-18, which was key to attaining R1 "very high research" activity status in the Carnegie Classification of Institutions of Higher Education.

Research activities incur higher design, operating and maintenance costs, such as climate-controlled and particle-free environments, and specialized plumbing and ventilation systems.

The Center for Business & Economic Research (CBER) conservatively estimates that maintaining Top Tier status will result in more than 2,000 new jobs, more than $800M in additional economic output, and close to an additional $500M in personal income for the State of Nevada annually by 2025.

UNR Response:
As part of the funding formula, the University of Nevada, Reno receives funds as a carve-out for dedicated research space that, while not a direct generator of Weighted Student Credit Hours, nonetheless is crucial to the research mission of the institution. Below is a listing of the buildings that have dedicated research space supported by these funds. While grants are rarely tied to specific facilities, the appended Table 1 shows details of funding in the amount of $300,566,409 that was generated in FY16 - FY18 through research grants and contracts conducted in these buildings on the University of Nevada, Reno Campus:

1. Ansari Business Building
2. Center for Molecular Medicine
3. Chemistry Building
4. Davidson Math and Science Center
5. Edna S. Brigham Clinical Education Building

AMERICAN OVERSIGHT

6. Fleischmann Agriculture
7. Howard Medical Sciences
8. Leifson Physics
9. Mackay Science
10. Nell J. Redfield Building
11. Palmer Engineering
12. Paul Laxalt Mineral Research
13. Sarah H. Fleischmann Building
14. Savitt Medical Science
15. Schrugham Engineering and Mines

Average funding per year during the period FY16 - FY18 was $100,184,897.
Also shown is the total funding generated over a five-year period (FY14 – FY18) – a total of $668,259,258.

Due to the support provided through the research O&M carve-out, the buildings listed above were maintained at a level that allowed such a concentrated level of research activity in those spaces. The outcome of the having such well-maintained space and the research activity has been the achievement of Carnegie R-1 Doctoral University – Very high research activity classification. The R-1 classification reflects the very high levels of research expenditures, number of research personnel, and conferral of doctorate degrees.

10. During the hearing, Great Basin College indicated that its CTE enrollment in FY 2019 was at its largest levels experienced to date. In that regard, please provide detailed information regarding the number of students enrolled in CTE courses, the credit hours earned (fall semester actual and spring semester estimated),

AMERICAN OVERSIGHT

and the resulting WSCHs (fall semester actual and spring semester estimated) for FY 2019 as compared to FY 2018.

GBC Response:
The table below summarizes the number of actual and projected student credit hour for CTE courses for FY 2018 and FY 2019.

Student Credit Hours				
Trade/Tech Program	FY 2018	FY 2019		
		Fall 2018	Spring 2019 (est)	Total (est)
Diesel Technology (DT)	954.5	604.5	744.0	1,348.5
Electrical System (ELM)	1,735.0	1,102.0	1,626.0	2,728.0
Instrumentation Technology (IT)	955.5	320.0	796.0	1,116.0
Machine Tool Technology (MTT)	-	82.0	53.0	135.0
Technical Arts (TA)	80.0	88.0	-	88.0
Welding Technology (WELD)	965.5	555.0	697.0	1,252.0
Woodworking (WOOD)	-	-	-	-
Tech/Trades Cluster Totals	**4,690.5**	**2,751.5**	**3,916.0**	**6,667.5**
Weighted Student Credit Hours				
Tech/Trades Cluster Totals	**19,020.0**	**10,994.0**	**unknown**	**unknown**

Based on preliminary Spring 2019 figures, it is estimated that the Student Credit Hours for FY 2019 will be approximately 2,000 higher than FY 2018.

The Weighted Student Credit Hours (WSCH) for FY 2019 cannot be calculated until the end of the Spring semester, after grades have been posted. WSCH data is generally available in mid to late June.

11. **During the hearing, the Subcommittee expressed interest in understanding how overall state support for higher education impacts the instructional formula budgets. In particular, the Subcommittee is interested in how state scholarship programs support student registration fees, in which a portion of these fees are deposited in the state-supported operating instructional formula budgets. In that regard, please address the following:**

    a. **Is it possible for NSHE to identify how much registration fee revenue in the state-supported operating instructional formula budgets is attributable to state-supported scholarship programs (e.g., Millennium Scholarship, Silver State Opportunity Grant, Nevada Promise Scholarship)?**

    b. **If the information in 9.a. is available, please provide the amount of registration fee revenue that was booked in the state-supported operating**

AMERICAN OVERSIGHT

instructional formula budgets, by institution, and by scholarship program for FY 2018, and the amounts estimated for FY 2019, if available.

NSHE Response:
NSHE cannot identify how much registration fee revenue in the state-supported operating instructional formula budgets is attributable to state-supported scholarship programs. Many students receive multiple grants and scholarships that may be from a variety of sources including, but not limited to, federal funds (i.e. Pell grants), private funds (i.e. private scholarships), and institutional funds (fee generated). They may also receive funds in the form of student loans. Depending on the timing, a student may also make a payment to their account either before or after financial aid is applied. All such funds are processed through the student's account; therefore, it is not possible to determine which dollars are attributable to which sources when a student's fees are paid.

MEMORANDUM

DATE: March 14, 2019

TO: Brody Leiser, Senior Program Analyst
Jennifer Ouellette, Program Analyst
Fiscal Analysis Division

FROM: Thom
Dr. Thom Reilly, Chancellor
Nevada System of Higher Education

SUBJECT: **NSHE Response to Subcommittee on K-12/Higher Education/CIPs – Follow-up Questions from the February 27, 2019, NSHE Budget Hearing**

Below is the information you requested following the Subcommittee hearing on February 27, 2019. If you need additional information, please contact me or my staff.

University of Nevada, Reno – Rifle Team

1. **Public testimony indicated that a decision had been made to no longer continue funding for support of the UNR Rifle Team, and that the team would be replaced with Men's cross country. Please confirm how much funding was expended in FY 2018, and how much funding is budgeted in FY 2019 for the UNR rifle team. In the response please identify the source of revenue that supports the program, and identify whether or not the funding is budgeted in the UNR Intercollegiate Athletics state-supported operating budget, the self-supported operating budget, or a combination of both.**

   UNR Response:
   The table on the following page summarizes the budget for the UNR Rifle Team for FY 2018 and FY 2019.

AMERICAN OVERSIGHT

	FY 18 Actual	FY 19 Projected	FY 20 Beyond
Self-Supporting Subsidy from Athletics Funds	$302,251	$282,556	$312,718
Donor Funds	$21,391	$40,000	$40,000
Total Revenues	**$323,642**	**$323,556**	**$352,718**
Coaching Salaries	$10,222	$10,406	$10,718
Operations	$23,701	$30,150	$30,000
Facility Rental**	$0	$0	$30,000
Travel	$47,244	$40,000	$40,000
Financial Aid/Scholarships	$153,975	$153,000	$153,000
Overhead/Compliance	$88,500	$89,000	$89,000
Total Expenses	**$323,642**	**$322,556**	**$352,718**

** Rental space must be obtained to house the program going forward as the prior facility on Valley Road has recently been remodeled into academic laboratories for the College of Agriculture, Biotechnology, and Natural Resources.

UNR – Statewide Programs

2. **Regarding the NevadaTeach enhancement, please confirm that NSHE is requesting back language to be added to the 2019 Appropriations Act authorizing expenditure of the recommended $300,000 in General Fund appropriations in either year of the 2019-21 biennium.**

   NSHE Response:
   If the enhancement is approved by the Legislature, NSHE is requesting that language similar to what was included in SB 522 (2017 Session) Sec. 2 be included in the 2019 Appropriations Act, allowing the General Fund appropriations to be used in either year of the 2019-2021 biennium.

University of Nevada, Las Vegas – School of Medicine

3. **During the hearing, UNLV testified that work was being done to plan a 150,000 square foot Medical Education Building that would allow the class to expand to 120 students, and that renderings for the building would be complete in March. Previous communications indicated that all work on the UNLV Medical Education Building had been placed on hold. Please proved a detailed information on the testimony provided during the February 27, 2019, hearing, including:**

   a. **A summary of the factors that have led to UNLV determining that the 150,000 square foot building is the appropriate path to move forward with, and**

AMERICAN OVERSIGHT

whether that final plan has been approved by both the university and the Board of Regents.

UNLV Response:
UNLV has estimated that a 150,000 +/- square foot building would support core classroom, teaching, clinical skills, simulation, study, academic support and directly related functions for a UNLV School of Medicine (SOM) student class size of 120 students per year, resulting in total annual enrollment of 480 students. This facility would support the UNLV SOM in doubling its class size, to support Nevada's needs for physicians. UNLV SOM would also plan to continue to use some existing facilities in operation for faculty/staff, clinical practice and other needs that could not be accommodated in a 150,000 +/- square foot new building.

UNLV is currently developing a conceptual space program for this 150,000 square foot option to determine if it is feasible and worthy of further consideration and pursuit. As this plan is under development, it has neither been approved at this time by the university or the Board of Regents.

Previously, UNLV was proposing a comprehensive 220,000 square foot building that would have included classroom, clinical skills, simulation, student support and administration. It would also have included a learning resource center that could support all of the health sciences programs. This design could have potentially expanded to support a class size of 180 students per year, for total annual enrollment of 720 students.

The 150,000 square foot concept would require that most administrative functions be housed in a separate building, and that the learning center be scaled back to only support the school of medicine students.

b. Please provide a cost estimate through construction (inclusive of FF&E), based on the 150,000 square foot building.

UNLV Response:
As the study of this facility option is underway, a cost estimate through construction, inclusive of FF&E, has not yet been developed. At the conclusion of the conceptual study, UNLV will have a cost estimate. UNLV will work with the State of Nevada Public Works Division (SPWD) to further develop the cost estimate in accordance with SPWD standards.

c. Confirmation of whether the referenced efforts and plans for the building, are being coordinated with the State Public Works Division, and identification of the funding source to complete the referenced renderings (i.e., paid for with CIP funds from 17-C15, or another funding source).

AMERICAN OVERSIGHT

UNLV Response:
UNLV has been coordinating with SPWD on its efforts through direct discussions in December 2018 and January/February 2019, and through UNLV's input into the SPWD's January 23, 2019 SB 553 report to the Interim Finance Committee on Project 17-C15. UNLV advised SPWD that it is evaluating stakeholder needs and interests and assessing space programming and feasibility studies, space and program approaches for the School of Medicine to determine the most suitable and appropriate option going forward.

Direct discussions in January and February 2019 between UNLV and SPWD staff included an update that UNLV was looking at a facility space program option as described in the response to Question 3a of this document.

UNLV used institutional self-supporting resources to fund this conceptual study for this 150,000 +/- square foot building. These funds are not a part of State CIP funds, or funds specified or identified in SB 553.

d. An update on fundraising efforts for this project.

UNLV Response:
The initial lead donors for this project have paused their interest in this project. While other conversations are occurring to identify new lead donors of $25M +, none at this time have committed. It is not prudent for the University to pursue other gift commitments until the lead gifts are secured. Without a very substantial gift, it is not realistic to expect UNLV to raise $100M from private funds prior to commencing construction.

e. Please provide details regarding the alternative funding models that would combine private funds/financing that are being considered for the project, as referenced in the hearing presentation.

UNLV Response:
UNLV is still investigating options related to alternative funding models that would combine private funds and financing including the New Markets Tax Credits (NMTC); potential funding efficiency models such as Opportunity Zone financial participation; lease and lease-purchase project, and other models. While it is uncertain at this time whether any or all of these models would be feasible, UNLV believes these are worthy of consideration.

If any of these alternative funding models are considered further, UNLV would coordinate with SPWD on the requirements related to the state funding assigned to this project and other associated requirements.

AMERICAN OVERSIGHT

f. Given the delay in work on the approved 2017 CIP project, please provide an updated timeline for completion of planning and construction of the new building.

UNLV Response:
UNLV does not have an updated timeline for completion of planning and construction of the new building since an alternative space program, facility focus and funding options/models are still under consideration and determinations have not been made on these items. Once these items are better understood, UNLV will be able to make a more informed assessment, working with the SPWD and their standards and requirements for the project timeline.

UNLV expects to commence construction no later than July 2021 as required by the 9-acre parcel real property transfer agreement with Clark County. Once an updated conceptual space program is determined, UNLV will coordinate with SPWD to update the timeline in compliance with their schedule standards.

g. Does UNLV, or NSHE, anticipate requesting any additional state funding beyond the $25 million approved by the 2017 Legislature (S.B. 553) to support costs for the construction of a Medical Education Building?

UNLV Response:
Although the prior administration believed that the rest of the building construction could be raised privately, this expectation did not come to pass and the large gift that was expected did not materialize. This does raise the question of whether it is realistic to expect a university to raise this large an amount privately or whether this building should have been proposed in the manner of other CIPs wherein half of the funds are State funds and half are private. Although we have no plan to request another $50M, that kind of State support for a building of this importance to the university, the city, county and State would be in line with other CIPs. We understand the frustration with the unfulfilled promise of private funding but would appreciate support for UNLV's current efforts to move past that and get this important building off the ground.

Instructional Formula Budgets

4. Please provide detailed information relating to the Year 7 and Year 8 Performance Pool targets which are referenced on slide 33 of NSHE's presentation, including the specific targets by institution, and a detailed explanation as to how the targets were established.

NSHE Response:
A technical working group made up of institutional representatives was created by the Chancellor for the purpose of recommending point targets. Those point targets where then submitted to the Board for review and approval.

AMERICAN OVERSIGHT

Target Recommendations

The working group recommended extending the Year 6-point targets by applying 2.0 percent to the Year 6 target for Year 7 and applying 2.0 percent to the Year 7 target for Year 8 resulting in the following point targets:

	Year 6 Approved Point Targets	Recommended Point Target (+ 2%)	
		Year 7	Year 8
UNLV	2,414.1	2,462.4	2,511.6
UNR	1,683.1	1,716.8	1,751.1
NSC	309.7	315.9	322.2
CSN	3,639.2	3,712.0	3,786.2
GBC	397.9	405.9	414.0
TMCC	1,315.1	1,341.4	1,368.2
WNC	582.5	594.2	606.0

Rationale for Point Target Recommendations

For the purpose of background, in 2014 when point targets for Year 3 and Year 4 of the Performance Pool were established, the approved point targets were based on actual points in the 2012-13 baseline year. Points are based on weighted outcomes in defined metrics that are included in the attached tables. The Year 3 target was established by applying 2.0 percent increase to actual 2012-13 figure for the universities and community colleges and a 4.0 percent increase for the state college. The Year 4 target applied the 2.0 percent increase to the Year 3 target for the universities and community colleges and a 4.0 percent increase for the state college.

Year 5 and Year 6 targets were established in 2016 by applying a 2.0 percent increase to the Year 4 targets for Year 5 and a 2.0 percent increase to the Year 5 target for Year 6 across all institutions. Thus, the Year 5 and Year 6 targets are an extension of the prior year's targets based on the initial 2012-13 baseline year.

In recommending the point targets for Year 7 and Year 8, it is important to recognize the accumulated target increase since the 2012-13 baseline as depicted in the following table:

	Baseline	Approved Point Targets				% Increase (Yr 6 over Baseline)
	2012-13 Actual	Year 3	Year 4	Year 5	Year 6	
UNLV	2,230.3	2,274.9	2,320.4	2,366.8	2,414.1	8.2%
UNR	1,554.9	1,586.0	1,617.8	1,650.1	1,683.1	8.2%
NSC	275.2	286.2	297.7	303.6	309.7	12.5%
CSN	3,362.1	3,429.3	3,497.9	3,567.8	3,639.2	8.2%
GBC	367.6	375.0	382.5	390.1	397.9	8.2%
TMCC	1,215.0	1,239.3	1,264.0	1,289.3	1,315.1	8.2%
WNC	538.1	548.9	559.9	571.1	582.5	8.2%

Relative to the Year 6 approved point target, the working group recommended a 2 percent increase for Year 7 and Year 8 as noted in the following table:

AMERICAN OVERSIGHT

	Baseline	Approved Point Targets				Recommended		% Increase
	2012-13 Actual	Year 3	Year 4	Year 5	Year 6	Year 7	Year 8	(Yr 8 over Baseline)
UNLV	2,230.3	2,274.9	2,320.4	2,366.8	2,414.1	2,462.4	2,511.6	12.6%
UNR	1,554.9	1,586.0	1,617.8	1,650.1	1,683.1	1,716.8	1,751.1	12.6%
NSC	275.2	286.2	297.7	303.6	309.7	315.9	322.2	17.1%
CSN	3,362.1	3,429.3	3,497.9	3,567.8	3,639.2	3,712.0	3,786.2	12.6%
GBC	367.6	375.0	382.5	390.1	397.9	405.9	414.0	12.6%
TMCC	1,215.0	1,239.3	1,264.0	1,289.3	1,315.1	1,341.4	1,368.2	12.6%
WNC	538.1	548.9	559.9	571.1	582.5	594.2	606.0	12.6%

It should be noted that a 12.6 percent to 17.1 percent growth in outcome metrics is an impressive rate of growth over an 8-year period. Already during the first five years of the program NSHE experienced growth of 2,642 additional undergraduate degrees (Associate or Bachelor's) and 120 additional certificates per year. This growth has been accomplished through a number of institutional and systemwide efforts, including but not limited to the following:

- 15 to Finish enrollment intensity and student achievement campaign;
- Gateway course completion initiative;
- Block scheduling;
- Accelerated degree programs;
- Reverse transfer; and
- Alternative pathways to graduation.

These programs and initiatives are indicative of the type of behavior changing programs the performance pool is intended to incentivize. However, degrees are a lagging outcome, tied in large part to enrollment from earlier years.

The growth in degrees is linked to the consistent enrollment growth in the NSHE institutions from 2007 to 2010 (8,306 additional students). Every NSHE institution saw enrollment growth between 2007 and 2010. However, from 2010 to 2015 enrollment in NSHE institutions declined by 8,685 students. Only UNR and NSC have had steady enrollment growth since 2010. UNLV's enrollment declined, but then began to grow again in 2014 and 2015. Since 2012, CSN, GBC, TMCC, and WNC generally experienced declining enrollment with some fluctuations.

Additionally, both the National Center for Education Statistics and the Western Interstate Commission for Higher Education project total Nevada high school graduates to show little growth until 2022, leading to continued challenges in enrollment growth within the state. This drop in enrollment over the more recent years will make sustaining year over year growth in completions highly unlikely.

Resetting the baseline year of the model would exacerbate the problem as it would reset the institutions at the higher level that was achieved during the periods of greatest enrollment growth, and then require them to sustain continued growth above it. In practical terms resetting the baseline would require a 37 percent growth over 8 years for UNR and a 50 percent growth for NSC.

AMERICAN OVERSIGHT

For these reasons the working group recommended extending the 2 percent growth figures to Year 7 and Year 8 as an appropriately aggressive goal for the institutions to strive towards achieving for the purpose of earning back the 20 percent carveout of funds in each year.

5. **Regarding the Board of Regents' requested funding for Summer School to support STEM and Education programs (which was not included in <u>The Executive Budget</u>), please provide the estimated cost by institution that would be required to support Summer School for <u>all</u> degree programs.**

NSHE Response:
The estimated cost to support Summer School for all degree programs ranges from approximately $32.6 million to approximately $43.9 million, excluding pre-requisite courses for nursing and nursing courses, which are currently GF supported.

The Board of Regents recommendation for Summer school funding was based on WSCH data. The table below includes WSCH earned during the Summer 2017 semester, excluding F grades for non-attendance. The table also projects the cost using the WSCH dollar value for FY 2018 ($156.01), which is the same amount used to calculate the M203 decision unit, caseload growth, for the instruction accounts.

Summer 2017: WSCH earned by Institution		
Institution	Completed WSCH	Estimated GF Cost
UNLV	127,828	$19,94,392
UNR	53,108	$8,285,332
NSC	19,495	$3,041,415
CSN	58,410	$9,112,544
GBC	5,579	$714,370
TMCC	15,697	$2,448,811
WNC	2,139	$333,705
Total	281,255	$43,878,569

According to the Budget to Actual Comparison for Summer School, 2018, report, NSHE institutions earned revenue totaling $33.7 million and incurred expenses totaling $32.6 million. The table below provides this information by institution.

AMERICAN OVERSIGHT

2018 SUMMER SCHOOL *Actuals* SOURCE AND USE OF FUNDS BY APPROPRIATION AREA					
Appropriaiton Area	2018 Opening Account Balance $	2018 Acutal Revenue $	2018 Actual Expenditures $	2018 Ending Account Balance $	Net Increase (Decrease) In Funds $
UNR	398,037	7,985,517	7,653,637	729,917	331,880
UNLV	1,051,280	16,787,324	16,226,852	1,611,752	560,472

TMCC	115,000	1,435,045	1,550,045	0	-115,000
WNC	129,502	152,550	265,057	16,995	-112,507
NSC	464,916	1,248,492	1,184,831	528,577	63,661
NSHE TOTAL	2,859,672	33,675,106	32,577,735	3,957,044	1,097,372

6. **Regarding the recommendation to utilize FY 2018 as the base year, as compared to prior policy of utilizing the odd numbered year (i.e., FY 2019) for the NSHE budgets, please confirm that the recommendation would apply on a prospective basis, and that if approved, the requested and recommended budgets (including the application of the WSCH calculated value) would continue to be based on the even numbered year in future biennium (2021-23 biennium and beyond).**

   NSHE Response:
   The "base" budget year was shifted from the odd numbered fiscal year (FY 2019) to the even numbered fiscal year (2018) based on requests from NSHE institutions and in concurrence with the Governor's Finance Office. This shift allows NSHE to be aligned with the State Budget Instructions and Executive branch agencies. NSHE will continue to use the first year of each biennium (the even numbered fiscal year) as the base budget year, moving forward.

7. **In regards to the $1.7 million in research augmentation funding that has been included in UNLV's base budget, please address the following:**

   a. **Please provide a brief, but specific summary of what the annual $1.7 million research augmentation in UNLV's research O&M funding supported in the current biennium, and how those funds were used to support an expansion or growth in research activities at UNLV.**

      UNLV Response:
      The $1.7 million in research augmentation funding was crucial to UNLV's efforts to expand research activities and infrastructure. The funds were applied to ongoing research operations and maintenance support, including lab renovations and building infrastructure upgrades.

AMERICAN OVERSIGHT

These investments helped UNLV increase its ability to attract sponsored funding and attain R1 “very high research” activity status in the Carnegie Classification of Institutions of Higher Education. This is the gold standard for university research classifications; less than three percent of higher education institutions nationwide achieve this designation.

b. If the $1.7 million was used as match to obtain additional federal and non-federal research grant funding, please identify the number of additional grants and total grant funding obtained.

UNLV Response:
None of the $1.7 million was used as a match to obtain additional federal or non-federal research grant funding.

c. Please provide a detailed explanation as to how the university intends to expend this recommended funding in the 2019-21 biennium.

UNLV Response:
In the next biennium, UNLV will continue to use the research augmentation funding to expand research activities and infrastructure. The funds will support ongoing research operations and maintenance support, as well as including lab renovations and building infrastructure upgrades.

These ongoing investments are important to UNLV’s goal of maintaining R1 “very high research” activity status in the Carnegie Classification of Institutions of Higher Education.

d. Please provide a summary of how much dedicated research space existed at UNLV in FY 2013, and how that space compares to the identified research space for the upcoming 2019-21 biennium.

UNLV Response:
Table 1 below indicates the assignable square feet of research space at UNLV for FY13 and FY19. In FY13, UNLV had 213,145 assignable square feet (asf) dedicated to research space. This space included any space categorized as a research lab or research lab service, including the School of Dental Medicine and School of Medicine.

As of FY19, we have 228,105 assignable square feet dedicated to research space. However, it is important to note that many of our research labs are also serving as classroom laboratory space due to a high deficit (197,183 asf) of teaching laboratory space. For example, the Colleges of Engineering and Sciences estimate that 40% of their research labs are also being used to support academic courses.

AMERICAN OVERSIGHT

Table 1. Assignable Square Feet of Research Space at UNLV from 2013 - 2018

Fiscal Year	Research Labs / Service
FY13	213,145
FY19	228,105

8. **For both UNR and UNLV, please provide a detailed description of how the universities analyze workload requirements relating to the split of time for faculty in their instructional and research workload splits. If available, please provide what the workload split requirements are for each university, by individual department, and how the workload splits compare to national standards and/or the workload splits for the universities peer R1 institutions.**

   UNLV Response:
   UNLV follows NSHE's policy that the standard instructional load of faculty members involved in research and other creative activities is 9-credit hours per semester, compared to the 12-credit hour load for instructional faculty. The 3-credit hour reduction allows faculty to devote time to research and creative activities. In addition, faculty with large research agendas or who perform other functions seminal to the university's mission (curriculum enhancement, institutional and community service, administrative responsibilities) may have additional portions of their instructional load reassigned to these activities, in accordance with the UNLV Workload Assignment Policy and Guidelines. All workload reassignments are reviewed and approved by department Chairs/Directors and Deans. Each semester, approximately 18% of the total faculty workload is reassigned to research and creative activities.

   Additionally, pursuant to NSHE's policy, UNLV conducts annual evaluations of each faculty member's performance, which takes into consideration their workload in research and instruction, including any workload reassignments. This practice provides the academic unit the flexibility to adjust load as necessary, to meet departmental educational responsibilities, and to align faculty activity with UNLV's instructional and research missions.

   Workload policy at most research universities, including elite R1 institutions and UNLV's aspirational peers, does not typically define a specific credit hour load, but instead relies on annual reviews of faculty to allow the academic unit to adjust workload based upon departmental needs and the standard practices in various academic disciplines. However, the typical practice at R1 universities is that research active faculty teach two 3-credit courses per semester, with lower amounts of teaching for highly research active faculty and for faculty in disciplines with high expectations for grant activity.

AMERICAN OVERSIGHT

UNR Response:
UNR Response: For tenure-track faculty, typical appointments are 40% teaching, 40% research, and 20% service. The actual number and type of classes taught by faculty varies among disciplines and whether the department has a doctoral program. Teaching loads are generally consistent with or slightly higher than disciplines at R1 universities. Full-time lecturers have an expectation of teaching the equivalent of 4 course per semester. Both tenure-track faculty and lecturers are typically on “B” contracts (9 months) and may teach additional classes during the summer session, for which they receive overload compensation.

AMERICAN OVERSIGHT

The table below show comparison of Research-Active Tenure-Track Faculty with peer RI institutions:

College/School	R1 University (Course/Year)	UNR (Course/Year)
Education	5.0	5.0
Journalism**	4.0	4.0
Business	4.0	5.0

AMERICAN OVERSIGHT

Note:
1.) R1 university comparison institutions on semester systems are Colorado State University, University of Arizona, University of Hawaii, University of New Mexico, University of Utah, Washington State University, and Montana State University
2.) ** Does not have PhD program
3.) Teaching loads for research-active tenure track faculty

9. For both UNR and UNLV, please provide detailed information on the documented outcomes that the universities have achieved as a direct result of the dedicated funding for the operation and maintenance of research space in the state-supported operating budgets.

UNLV Response:
UNLV's operations and maintenance budget for FY19 is approximately $36 million or 12% of the total formula budget. The dedicated funding for O&M of research space is currently $5.6M, which represents over 15% of the $36 million O&M budget.

The investments in operation and maintenance of research space helped UNLV increase its research expenditures from $39M in fiscal year 2013-14 to $89M in fiscal year 2017-18, which was key to attaining R1 "very high research" activity status in the Carnegie Classification of Institutions of Higher Education.

Research activities incur higher design, operating and maintenance costs, such as climate-controlled and particle-free environments, and specialized plumbing and ventilation systems.

The Center for Business & Economic Research (CBER) conservatively estimates that maintaining Top Tier status will result in more than 2,000 new jobs, more than $800M in additional economic output, and close to an additional $500M in personal income for the State of Nevada annually by 2025.

UNR Response:
As part of the funding formula, the University of Nevada, Reno receives funds as a carve-out for dedicated research space that, while not a direct generator of Weighted Student Credit Hours, nonetheless is crucial to the research mission of the institution. Below is a listing of the buildings that have dedicated research space supported by these funds. While grants are rarely tied to specific facilities, the appended Table 1 shows details of funding in the amount of $300,566,409 that was generated in FY16 - FY18 through research grants and contracts conducted in these buildings on the University of Nevada, Reno Campus:

1. Ansari Business Building
2. Center for Molecular Medicine
3. Chemistry Building
4. Davidson Math and Science Center
5. Edna S. Brigham Clinical Education Building

AMERICAN OVERSIGHT

6. Fleischmann Agriculture
7. Howard Medical Sciences
8. Leifson Physics
9. Mackay Science
10. Nell J. Redfield Building
11. Palmer Engineering
12. Paul Laxalt Mineral Research
13. Sarah H. Fleischmann Building
14. Savitt Medical Science
15. Schrugham Engineering and Mines

Average funding per year during the period FY16 - FY18 was $100,184,897.
Also shown is the total funding generated over a five-year period (FY14 – FY18) – a total of $668,259,258.

Due to the support provided through the research O&M carve-out, the buildings listed above were maintained at a level that allowed such a concentrated level of research activity in those spaces. The outcome of the having such well-maintained space and the research activity has been the achievement of Carnegie R-1 Doctoral University – Very high research activity classification. The R-1 classification reflects the very high levels of research expenditures, number of research personnel, and conferral of doctorate degrees.

10. During the hearing, Great Basin College indicated that its CTE enrollment in FY 2019 was at its largest levels experienced to date. In that regard, please provide detailed information regarding the number of students enrolled in CTE courses, the credit hours earned (fall semester actual and spring semester estimated),

AMERICAN OVERSIGHT

and the resulting WSCHs (fall semester actual and spring semester estimated) for FY 2019 as compared to FY 2018.

GBC Response:
The table below summarizes the number of actual and projected student credit hour for CTE courses for FY 2018 and FY 2019.

Student Credit Hours				
Trade/Tech Program	FY 2018	FY 2019		
		Fall 2018	Spring 2019 (est)	Total (est)
Diesel Technology (DT)	954.5	604.5	744.0	1,348.5
Electrical System (ELM)	1,735.0	1,102.0	1,626.0	2,728.0
Instrumentation Technology (IT)	955.5	320.0	796.0	1,116.0
Machine Tool Technology (MTT)	-	82.0	53.0	135.0
Technical Arts (TA)	80.0	88.0	-	88.0
Welding Technology (WELD)	965.5	555.0	697.0	1,252.0
Woodworking (WOOD)	-	-	-	-
Tech/Trades Cluster Totals	**4,690.5**	**2,751.5**	**3,916.0**	**6,667.5**
Weighted Student Credit Hours				
Tech/Trades Cluster Totals	**19,020.0**	**10,994.0**	**unknown**	**unknown**

Based on preliminary Spring 2019 figures, it is estimated that the Student Credit Hours for FY 2019 will be approximately 2,000 higher than FY 2018.

The Weighted Student Credit Hours (WSCH) for FY 2019 cannot be calculated until the end of the Spring semester, after grades have been posted. WSCH data is generally available in mid to late June.

11. **During the hearing, the Subcommittee expressed interest in understanding how overall state support for higher education impacts the instructional formula budgets. In particular, the Subcommittee is interested in how state scholarship programs support student registration fees, in which a portion of these fees are deposited in the state-supported operating instructional formula budgets. In that regard, please address the following:**

    a. **Is it possible for NSHE to identify how much registration fee revenue in the state-supported operating instructional formula budgets is attributable to state-supported scholarship programs (e.g., Millennium Scholarship, Silver State Opportunity Grant, Nevada Promise Scholarship)?**

    b. **If the information in 9.a. is available, please provide the amount of registration fee revenue that was booked in the state-supported operating**

AMERICAN OVERSIGHT

instructional formula budgets, by institution, and by scholarship program for FY 2018, and the amounts estimated for FY 2019, if available.

NSHE Response:
NSHE cannot identify how much registration fee revenue in the state-supported operating instructional formula budgets is attributable to state-supported scholarship programs. Many students receive multiple grants and scholarships that may be from a variety of sources including, but not limited to, federal funds (i.e. Pell grants), private funds (i.e. private scholarships), and institutional funds (fee generated). They may also receive funds in the form of student loans. Depending on the timing, a student may also make a payment to their account either before or after financial aid is applied. All such funds are processed through the student's account; therefore, it is not possible to determine which dollars are attributable to which sources when a student's fees are paid.

Subject: NV Energy Pilot Program on Charging Stations

Hi Michael,

I just wanted to follow up on the call you had with Bob today to see if we could get the information on the NV Energy pilot program for charging stations that you mentioned, as Bob is very excited to learn more about that. If there is some documentation, or a good person to reach out to at NV Energy, it would be fantastic if you could pass that along.

Thank you,

Elizabeth Tafeen

Subject: One week until the Party!

It's one week until the big party! The original invite is below. Reminder to please email Michon with what kind of "side dish" you are bringing. So far we have three people bringing salads, one dessert and one Gazpacho. We have 38 RSVP's so far. Please email Michon the Side you are bringing to Michonmg@yahoo.com. Some of you didn't get the first invite because it went into your spam as a group blind email so I'm copying all of you on this one. The original invite is below:

Michon Geary and Bruce Breslow invite you to join us in a celebration of summer on Saturday, August 18th from 5 to 9pm. It's our First Annual ***Bruce and Michon's Excellent Back Yard Party!*** Guaranteed to be 100% casual and 100% fun. We will be grilling and pouring, playing lawn games and swaying to the music. Adults only but your "inner child" is more than welcome!

Please bring your favorite side dish, salad or dessert. We'll have beer, wine, soda and water to go with chicken and Butcher Boy tri-tip. We expect about 40+ people to attend so your RSVP is very important to us so that we can get the right number of tables & chairs. Please respond to Michon's email address: Michonmg@yahoo.com and let her know what type of dish you're planning on bringing. Or call **M** at 843-6844 or **B** at 813-3000.

Bruce's backyard is nice but Michon's is better! 1850 Shadow Creek Ct., Reno. Come meet old friends and make some new friends too.

Pam and Andrew,

A rep from HUD called and let us know that Secretary Carson will be in Nevada tomorrow and that they are looking for some information on our designated opportunity zones. Specifically, they are trying to find any crossover between the designations and state housing needs.

I reached out to Cory to get a better understanding of the lay of the land and he mentioned that HUD is exploring ways to replace CDBG funds with new OZ designations. I think it's best we figure out how to decline to share as to not give away any talking points.

Let me know what your thoughts on this. Thanks.

Subject: Opportunity Zone Conference

Olivia,

The call was exceptional today, thank you.

I believe we were asked to relay any additional comments or suggestions for the conference through you. So I have a few thoughts I would like to add:

- I would be exceptional after the conference to receive an email of the summary of the key recommendation or findings from the conference.
- It would be even more fabulous to have one of those suggestions be each the state set a designated O-Zone employee or office to facilitate the maximum success of this new program. I know several states have that designated employee or even office and I believe it is considered best practice. Still, smaller states may not have the resources or knowledge to do this. It may help each state to have that clarity.

Thank you!

Hi Pam,

First, let me thank you for your help in getting a new Welcome to Nevada sign here on Interstate 80 at the Utah/Nevada border. The new sign which went up roughly 6 months or so ago, was overdue and, looks great. Thank you!

Second, have attached a copy for Governor Sandoval a letter that has been sent to GOED concerning the process of selecting Opportunity Zone areas. West Wendover would like due consideration of that designation believing that it could definitely help us in attracting business and other investments.

I appreciate if you could pass the letter on to Governor Sandoval.

And yes... Amtrak is still on our dream board. With the loss of Greyhound service recently, we now have no public transportation access to the national transportation system. Solutions are never easy, especially in our case... :)

Hope all is well with you, please make sure to stop in and say hello if you are in the area, would be nice to see you again.

Chris

Subject: Opportunity Zone Eligibility - West Wendover, Nevada Census Tract 9515.00

Dear GOED Administration/Staff:

The City of West Wendover would like to respond to Governor Sandoval's request for Opportunity Zone eligibility comments by submitting the City of West Wendover, located with Census Tract 9515.00, for your consideration.

Though a vibrant community in its own right, the City of West Wendover does rely heavily on Nevada Tourism and the Nevada Gaming industry for its existence given other larger diversification businesses that are common to Elko County, including agriculture and mining, are largely located well outside the community. As a result of this unique reliance on tourism, West Wendover's development in the past has been subject to boom/bust cycles often associated with a reliance on such a single large industry.

Additionally, with Nevada Gaming comes a reliance on a population demographic that includes a significantly large low-moderate income population given its service basis in the economy. This results in overall lower wages and lower wage growth over time especially when such a demographic is as large as West Wendover's being well over 60% of the population. This exacerbates the ability of West Wendover to effectively promote and create business investments at various levels given this type of demographic results in lower household and median incomes adversely affecting the decisions of those considering making investments in the community; whether that is industrial development, general commercial enterprises and/or housing developments. In all the consequence is generally a negative one.

Though this condition is a certain challenge, West Wendover has been earnest in its efforts through the past several decades to progress above that challenge. With our current business and community partners including NNRDA we have the following projects in the works will would have an expected multi-million dollar investment impact on the community:

- Bomarc Development Residential Projects
  - Apartment Complex Construction, 8 Acres, 40 units, $15-20 million; 1-2 year completion.
  - Residential Housing, 3 in progress, 6-10 planned, $270,000/ unit; 1-2 year completion.

AMERICAN OVERSIGHT

- Bomarc Development Commercial Projects
  - Retail multi-business complex, $7 million total, partially complete $2 million to finish; final completion by end of 2018.
  - Potential purchase and remodel of 4,000 to 5,000 square feet. Facility for commercial retail complex; 1-2 years.

- The Cannon Group and Richard Burella Group Residential Project
  - Single Family homes
  - Town-home projects

- Rusty Palm Renovation and Convenience Store / Truck Stop at Exit 410; $5-6 million; 5 year completion.

- Peppermill Resort & Casino: Interior & exterior renovation, $7.5 million recently completed, $2 million projected within next year, $15 million in further renovations over next 5 years.

- Rainbow Casino and Hotel: Lighting and resurfacing of lot, $1.5 million to be completed by the end of 2018, exterior renovation includes $6.5 million to be completed by the end of 2018. Further interior and exterior renovation, $10-13 million to be completed within next 5 years.

- Montego Bay: Lighting and resurfacing of lot, $1 million to be completed by the end of 2018, further interior and exterior renovation, $1-3 million to be completed within next 5 years.

Finally, though the City has been pro-active with its own public investments in infrastructure in a long term effort to create a solid foundation from which private investments can build upon, the possibility of our community being given an Opportunity Zone designation would potentially enhance the ability to attract desirable business investments for the community. In all honesty, the City of West Wendover could greatly use any assistance that GOED at any level can help provide.

If you have any questions, please feel free to contact me.

Sincerely,

Chris J. Melville, C.P.O.
City Manager

Re: Opportunity Zone Designation

Dear Mr. Armstrong:

I am writing on behalf of the Greenspun, Fine and Gale families and American Nevada Company, as owners of the property at 5 W. Bonneville Avenue, at the southwest corner of Main Street and Bonneville Avenue in downtown Las Vegas (APN 139-34-302-007).

American Nevada Company (ANC) has been developing properties in southern Nevada for more than 40 years, including approx. 12,000 acres of master-planned communities (Green Valley, Green Valley Ranch, Seven Hills in partnership with Forest City, and Aliante in partnership with Pulte Homes). In addition, ANC has developed approximately 3 million square feet of office, retail, residential, mixed use, recreational/fitness, and hotel/gaming properties. I have attached a copy of our firm bio for your reference.

We have a strong interest in the potential for the City of Las Vegas to secure the benefits of the Opportunity Zone designations. As indicated in the attached City of Las Vegas Opportunity Zone Request map dated March 5, 2018, our property is located in Census Tract #9, currently ineligible, but designated as a Safe Harbor tract that can gain the opportunity zone designation based on its prior eligibility. We want to voice our support for the designation of Tract #9 as an opportunity zone.

We are working in conjunction with the Fine Group that owns the Ice House parcel at 650 S. Main Street to create a joint development on our two sites. We are in discussions with the RTC to acquire the land between our two sites to form a larger, contiguous parcel. We believe our site can accommodate a dense development that may include mixed use commercial spaces, residential units, and structured parking. Most recently, with the Fine Group, we submitted a joint proposal to develop the City's Municipal Courthouse on our two sites. This project was approx. 100,000 square feet.

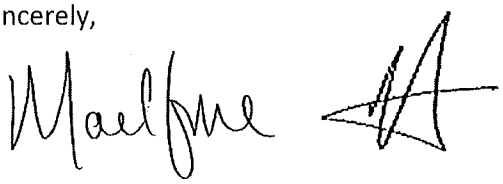
Re: Support for the designation of Census Tract #9 in downtown Las Vegas as an Opportunity Zone

Dear Governor Sandoval:

We write to express our support for the inclusion of Census Tract 9 located in downtown Las Vegas in the list of census tracts Nevada submits to the federal government for designation as Qualified Opportunity Zones. We are property owners and business residents of Census Tract 9 and are in the process of acquiring more property in the area. We believe this area has tremendous potential for development in the urban core of Las Vegas and that designation as an Opportunity Zone would provide a significant catalyst for further development.



We have been working closely with American Nevada Company on possible joint development projects within census tract #9 that would bring high-density mixed-use development to the area. A project of the scale being contemplated would, with the appropriate governmental approvals, allow for high density mixed use development supporting a project investment of as much as $120mm. The

AMERICAN OVERSIGHT

significant tax advantages of building a project within a designated Opportunity Zone could mean the difference between being able to finance a project of this size in what has traditionally been an economically challenged area.

Attached please find some additional background on us and our companies.

Sincerely,

Mark L. Fine Jeffrey A. Fine

AMERICAN OVERSIGHT

Background of Mark L. Fine & Associates / Fine Properties

Mark L. Fine & Associates serves as one of Southern Nevada's preeminent real estate development companies with a diverse portfolio including residential, commercial and government developments. The company's mastermind helped to envision three of Las Vegas' most successful custom home communities - Quail Ridge Estates, The Fountains, and Grand Legacy - as well as nearly 2 million square feet of office, industrial and retail space and amenities, including Legacy golf course and the former Green Valley Athletic Club.

More recently, Mark L. Fine & Associates developed the Las Vegas Metropolitan Police Headquarters and Mark served as a strategic advisor to Focus Property Group in their development of two master-planned communities: Mountain's Edge, a 3,500-acre master-planned community in the southwest region of the Las Vegas Valley; and Providence, a 1,200-acre community in northwest Las Vegas.

Fine Properties was established in 2005 by Jeffrey Fine. Jeffrey comes from an extraordinary legacy of influential Nevadans. His grandfather, Hank Greenspun, helped shape Las Vegas' real estate and communications industry; Jeffrey's father Mark L. Fine, is one of Southern Nevada's preeminent real estate developers; and his mother Susan, an eternal philanthropist, is an active member of the Anti-Defamation League and sits on the Greenspun Family Foundation Board. Fine Properties was created with a focus on office and retail development. Since its founding Fine Properties has developed several unique, high-end retail projects in Summerlin as well as the Metropolitan Police Department Headquarters located in downtown Las Vegas.

Mark L. Fine & Associates in partnership with Fine Properties developed the Las Vegas Metropolitan Police Department's new headquarters in 2011. The complex consists of three buildings totaling 373,327 square feet on a 13.76 acre site. The new facility, located at Martin Luther King Boulevard and Alta Drive, has provided consolidated operations. Officials first planned the project as a way to centralize much of the department, including detective bureaus, records and fingerprinting. The headquarters has a main building with the sheriff's office and other administrative offices with the remaining two buildings housing other services and bureaus. Before the new complex opened, Las Vegas police operated out of the old Las Vegas City Hall, which the city vacated when the new City Hall opened in 2012. Gillespie said the new location has worked out well in putting different areas of the department in the same complex. The project features a five level secured parking garage with 1,680 spaces as well as 513 surface parking spaces.

Designation of Qualified Opportunity Zones

The Community Development Financial Institutions Fund (CDFI Fund) sent us your nomination of eligible census tracts (tracts) to be designated as Qualified Opportunity Zones.

We certified your nomination and designated such tracts as Qualified Opportunity Zones under Internal Revenue Code (IRC) Section 1400Z-1(b)(1)(B). Attached is a listing of the designated tracts.

The CDFI Fund will notify the public that these tracts have been designated as Qualified Opportunity Zones. You can find this on www.cdfifund.gov by searching for "Opportunity Zones Information Resources."

If you need assistance or you believe you received this letter in error, please call the telephone number listed at the top of this letter.

Keep this letter for your records.

Sincerely,
Mary Beth Murphy

Subject: Opportunity Zones - Churchill County

Hello Christina,

A few months ago I read an article about a provision tucked into the new Tax Bill to help communities struggling with economic development. The article said that Governors of each state were being asked to designate "Opportunity Zones" from a pool of low-income, high-poverty census tracts for nomination. One of our Commissioners inquired this morning and asked if I could reach out to the Governor's Office to see if Nevada is participating; if "Opportunity Zones" have already been designated, and who the appropriate contacts are. Any help you are able to provide to point me in the right direction would be much appreciated.

Thank you,

Subject: Opportunity Zones - Creating Investment in America's Distressed Communities

THE WHITE HOUSE
Office of Communications

This afternoon, **President Trump will host an event the White House where he will sign an executive order and tout the power of Opportunity Zones to spur investment in distressed communities**.

Opportunity Zones were created by last year's Tax Cuts and Jobs Act, which included legislation from Senator Tim Scott to offer capital gains tax relief to investors who put money into designated economically distressed areas. **By incentivizing an estimated $100 billion into these areas in all 50 states, opportunity zones are a powerful tool for bringing economic growth and job creation to the American communities that need them the most.**

As part of today's event, **the President will sign an executive order creating the White House Opportunity and Revitalization Council.** Led by HUD Secretary Ben Carson, the Council will improve revitalization efforts by streamlining, coordinating, and targeting existing Federal programs to economically distressed areas, including Opportunity Zones.

More information on Opportunity Zones and the executive order below.

Top Talkers:

- Opportunity Zones are designed to spur economic development and job creation by encouraging long-term investments in distressed communities across America.
    - Opportunity Zones are designated by the Governors of every U.S. state and territory.
    - The incentive offers capital gains tax relief to investors for new investment in designated Opportunity Zones.
- 8,761 communities in all 50 states, Washington, D.C., and five U.S. territories have been designated as Opportunity Zones.
    - Nearly 35 million Americans live in communities designated as Opportunity Zones.
- Opportunity Zones are a powerful vehicle for bringing economic growth to the American communities that need it most.
    - Opportunity Zones will lead to new jobs and economic growth that will move these communities forward and create a brighter future.
    - An estimated $100 billion in private capital will be invested in Opportunity Zones.

AMERICAN OVERSIGHT

- By executive order, President Trump is establishing the White House Opportunity and Revitalization Council to improve revitalization efforts.
    - The Council will help streamline, coordinate, and target existing Federal programs to economically distressed areas, including Opportunity Zones.
    - Lack of coordination and targeting has previously led to cumbersome applications, program waste, and ineffective benefits.

President Trump Is Lifting Up American Communities That Have Been Left Behind

"[O]ur tax bill also creates new opportunity zones rewarding those who invest in distressed communities and create more jobs for those who have, too often, simply been left behind."

– President Donald J. Trump

CREATING OPPORTUNITY FOR ALL: President Donald J. Trump is encouraging investment to create opportunity in distressed communities.

- President Trump is signing an Executive Order establishing the White House Opportunity and Revitalization Council.

AMERICAN OVERSIGHT

    - The Council will be chaired by the Secretary of Housing and Urban Development, Ben Carson, and comprised of 13 Federal agencies.
- The Council will engage with all levels of government on ways to better use tax payer dollars to revitalize low-income communities.
- The Council will improve revitalization efforts by streamlining, coordinating, and targeting existing Federal programs to economically distressed areas, including Opportunity Zones.
    - Lack of coordination and targeting has led to cumbersome applications, program waste, and ineffective benefits.
- The Council will consider legislative proposals and undertake regulatory reform to remove barriers to revitalization efforts.
- The Council will present the President with a number of reports identifying and recommending ways to encourage investment in economically distressed communities.

ENCOURAGING INVESTMENT: Opportunity Zones will spur private investment to revitalize hurting communities and unleash their economic potential.

- In 2017, President Trump signed the Tax Cuts and Jobs Act, which established Opportunity Zones to incentivize long-term investments in low-income communities across the country.
- These incentives offer capital gains tax relief to investors for new investment in designated Opportunity Zones.
- Opportunity Zones are anticipated to spur $100 billion in private capital investment.
- Incentivizing investment in low-income communities fosters economic revitalization and job creation and promotes sustainable economic growth across the Nation.

LIFTING UP COMMUNITIES: Opportunity Zones help drive economic growth and lift up communities that have been left behind.

- Opportunity Zones are a powerful vehicle for bringing economic growth and job creation to the American communities that need them the most.
    - On average, the median family income in an Opportunity Zone is 37 percent below the state median.
    - The average poverty rate in an Opportunity Zone is 32 percent, compared to the national rate of 17 percent.
- 8,761 communities in all 50 States, the District of Columbia, and 5 Territories have been designated as Opportunity Zones.
    - Nearly 35 million Americans live in communities designated as Opportunity Zones.

Re: Opportunity Zone Designation

Dear Mr. Armstrong:

I am writing on behalf of the Greenspun, Fine and Gale families and American Nevada Company, as owners of the property at 5 W. Bonneville Avenue, at the southwest corner of Main Street and Bonneville Avenue in downtown Las Vegas (APN 139-34-302-007).

American Nevada Company (ANC) has been developing properties in southern Nevada for more than 40 years, including approx. 12,000 acres of master-planned communities (Green Valley, Green Valley Ranch, Seven Hills in partnership with Forest City, and Aliante in partnership with Pulte Homes). In addition, ANC has developed approximately 3 million square feet of office, retail, residential, mixed use, recreational/fitness, and hotel/gaming properties. I have attached a copy of our firm bio for your reference.

We have a strong interest in the potential for the City of Las Vegas to secure the benefits of the Opportunity Zone designations. As indicated in the attached City of Las Vegas Opportunity Zone Request map dated March 5, 2018, our property is located in Census Tract #9, currently ineligible, but designated as a Safe Harbor tract that can gain the opportunity zone designation based on its prior eligibility. We want to voice our support for the designation of Tract #9 as an opportunity zone.

We are working in conjunction with the Fine Group that owns the Ice House parcel at 650 S. Main Street to create a joint development on our two sites. We are in discussions with the RTC to acquire the land between our two sites to form a larger, contiguous parcel. We believe our site can accommodate a dense development that may include mixed use commercial spaces, residential units, and structured parking. Most recently, with the Fine Group, we submitted a joint proposal to develop the City's Municipal Courthouse on our two sites. This project was approx. 100,000 square feet.

AMERICAN OVERSIGHT

Background of Mark L. Fine & Associates / Fine Properties

Mark L. Fine & Associates serves as one of Southern Nevada's preeminent real estate development companies with a diverse portfolio including residential, commercial and government developments. The company's mastermind helped to envision three of Las Vegas' most successful custom home communities - Quail Ridge Estates, The Fountains, and Grand Legacy - as well as nearly 2 million square feet of office, industrial and retail space and amenities, including Legacy golf course and the former Green Valley Athletic Club.

More recently, Mark L. Fine & Associates developed the Las Vegas Metropolitan Police Headquarters and Mark served as a strategic advisor to Focus Property Group in their development of two master-planned communities: Mountain's Edge, a 3,500-acre master-planned community in the southwest region of the Las Vegas Valley; and Providence, a 1,200-acre community in northwest Las Vegas.

Fine Properties was established in 2005 by Jeffrey Fine. Jeffrey comes from an extraordinary legacy of influential Nevadans. His grandfather, Hank Greenspun, helped shape Las Vegas' real estate and communications industry; Jeffrey's father Mark L. Fine, is one of Southern Nevada's preeminent real estate developers; and his mother Susan, an eternal philanthropist, is an active member of the Anti-Defamation League and sits on the Greenspun Family Foundation Board. Fine Properties was created with a focus on office and retail development. Since its founding Fine Properties has developed several unique, high-end retail projects in Summerlin as well as the Metropolitan Police Department Headquarters located in downtown Las Vegas.

Mark L. Fine & Associates in partnership with Fine Properties developed the Las Vegas Metropolitan Police Department's new headquarters in 2011. The complex consists of three buildings totaling 373,327 square feet on a 13.76 acre site. The new facility, located at Martin Luther King Boulevard and Alta Drive, has provided consolidated operations. Officials first planned the project as a way to centralize much of the department, including detective bureaus, records and fingerprinting. The headquarters has a main building with the sheriff's office and other administrative offices with the remaining two buildings housing other services and bureaus. Before the new complex opened, Las Vegas police operated out of the old Las Vegas City Hall, which the city vacated when the new City Hall opened in 2012. Gillespie said the new location has worked out well in putting different areas of the department in the same complex. The project features a five level secured parking garage with 1,680 spaces as well as 513 surface parking spaces.

The Honorable Brian Sandoval
Governor, State of Nevada
Capitol Building
101 North Carson Street
Carson City, NV 89701

Designation of Qualified Opportunity Zones

The Community Development Financial Institutions Fund (CDFI Fund) sent us your nomination of eligible census tracts (tracts) to be designated as Qualified Opportunity Zones.

We certified your nomination and designated such tracts as Qualified Opportunity Zones under Internal Revenue Code (IRC) Section 1400Z-1(b)(1)(B). Attached is a listing of the designated tracts.

The CDFI Fund will notify the public that these tracts have been designated as Qualified Opportunity Zones. You can find this on www.cdfifund.gov by searching for "Opportunity Zones Information Resources."

If you need assistance or you believe you received this letter in error, please call the telephone number listed at the top of this letter.

Keep this letter for your records.

Sincerely,
Mary Beth Murphy
Mary Beth Murphy
Commissioner
Small Business/Self-Employed Division

Subject: Opportunity Zones Conference - April 17

The White House Office of Intergovernmental Affairs invites you to attend

An Opportunity Zone Conference with State, Local, Tribal, and Community Leaders

April 17, 2019

1:00 p.m. - 5:00 p.m.

Please submit your information in the secure link provided below by **Friday, April 12.** Note that this invitation is non-transferrable.

Event Registration Link: Click Here

A list of frequently asked questions is below. More information, including arrival instructions (i.e., address and times) and the itinerary, will be forthcoming. Pertinent event updates will be sent to the email address that you register with.

Frequently Asked Questions:

What information do I need to submit in order to attend? Clicking on the registration link provided above will outline the information you are required to submit in order to register to attend. Secret Service requires all visitors to submit this information prior to arrival. Please do not fill out this information if you cannot attend. It is essential that all information is submitted accurately. The information you submit must exactly match what is listed on your government issued photo identification that you will be required to present to Secret Service before entry onto White House grounds. The information you submit must exactly match that of your government issued identification (can be a passport, driver's license, etc.) that you will be required to present to Secret Service before entering White House grounds.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-004692

How do I know if I successfully registered? Once you click on the registration link, fill out all required information, and submit it, you will receive a confirmation message to the email address you provided. Please make sure to check your spam/junk email folder if you do not receive this confirmation.

What time should I plan to arrive? While the conference begins at 1:00 p.m., you'll want to plan on arriving by 12:30 p.m. in order to get through security. You'll be allowed to enter the White House grounds in the time window between 12:00 p.m. and 2:00 p.m.

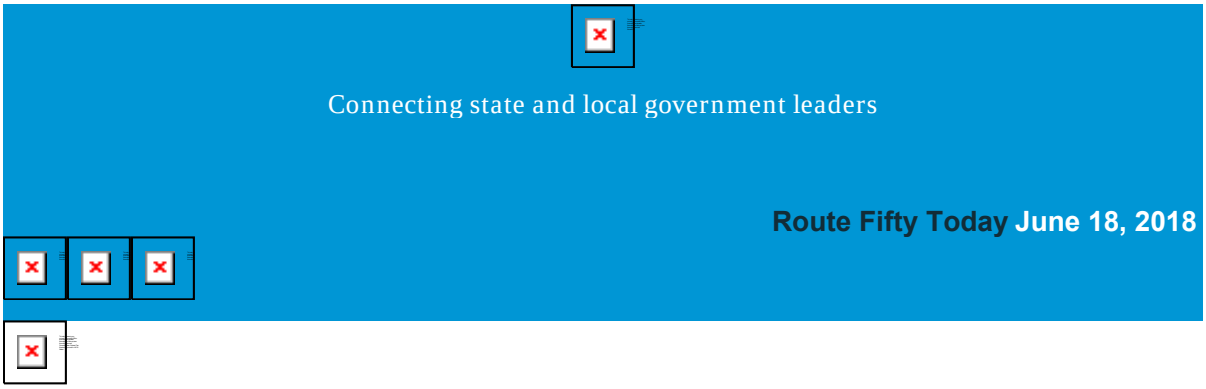
What if the link does not work? If the registration link provided does not work or will not properly load, try using a different browser. If you are still unable to register, please contact White House Office of Intergovernmental Affairs staff or reply to this email.

Is this invitation transferable / can I bring a friend or relative? No, this invitation is non-transferable unless discussed with the White House Office of Intergovernmental Affairs. Any information submitted from an uninvited guest will not be processed.

Who is speaking and what's on the agenda? An agenda will be sent out prior to the conference; you can expect senior Administration officials to speak and participate in this conference.

Where do I go? All events will take place on the White House complex (1600 Pennsylvania Avenue, NW, Washington DC). We will provide further information ahead of the event date.

How do I get around Washington, D.C.? For travel and transportation in Washington, D.C., taxies and ride sharing services are readily available. The metro is also a convenient way to travel. The closest metro stops are Federal Triangle and Farragut West. More information on the metro, including travel times and maps, can be found by clicking here.



AMERICAN OVERSIGHT

We have engaged Karen with Red Carpet to help plan this. We are getting a contract today from the Row and Randi is still going to get us a quote from GSR because she knows someone over there.

Can you all meet in person this week to work on this?

Thursday at 3pm? If that doesn't work give me some times that will.

Thanks!

Kaya Bromley

>
> > Good morning! The Row staff has sent over some preliminary numbers for the event, which I think are conducive to a good response for the event- a $50 room rate at both the Eldorado and Silver Legacy, for a single king room, plus the resort fee of $25 and a city fee of $3 for a total of $78 + tax per night. I blocked a total of 250 rooms for 2/25 and 2/26 and 50 rooms for 2/27. Double queen rooms would be subject to an additional $10 fee.
> >
> > Food and beverage minimums would apply, or a venue room fee for the catering space. Once we begin to finalize the arrangements, that information can be decided upon. General session at the Reno Ballroom and the cocktail reception at the Eldorado Ballroom on the evening of 2/26- guests would then be on their own for dinner that night, unless you would like that to be a catered event as well.

AMERICAN OVERSIGHT

They'll be sending over a contract today- I'll send that over to you when I get it.

Let me know if you have any questions about the planning agreement, if at all possible, I'd like to get that finalized today or tomorrow if you would like to move forward with our services.

Warmly,

Karen Nichols

AMERICAN OVERSIGHT

OPPORTUNITY ZONE SUMMIT
NORTHERN NEVADA

In Partnership with:
RenOzone Advisors, LLC
The Reno-Sparks Opportunity Zone Task Force
The Economic Development Authority of Western Nevada (EDAWN)

The Northern Nevada OZ Summit

EIG estimates that approximately $6 trillion in capital gains could be available for Opportuinty Zone Investment in the US. We are already seeing billions of dollars being invested into areas like New York, Los Angeles, and Puerto Rico. The goal of the Reno-Sparks OZ Task Force and this Summit is to make sure as much of that money as possible comes to Northern Nevada to further our community's goals and improve the lives of our people.

Because of all the growth in Northern Nevada, commercial, retail, and residential development are inevitable. The addition of Opportunity Zones, makes investment into Northern Nevada real estate and business even more attractive.

The purpose of this Summit is to provide OZ education for community memebers, investors, stakeholders, and public officials. We have brought together OZ experts to talk about legal and tax considerations as well as people who are already doing OZ deals and can share best practices from other cities around the country.

"It is the largest community investment program in a generation, creating a new industry of domestic emerging market funds from the $6 trillion in available capital gains."
Steve Glickman, former Obama Economic Advisor, co-founder of the Economic Innovation Group and architect of Opportunity Zones

Background

Opportunity Zones: The Opportunity Zone Program (OZ) is a tax incentive established by Congress in the Tax Cuts and Jobs Act of 2017. Its purpose is to foster investment into low-income and rural communities by allowing those who invest to defer and reduce their capital gains

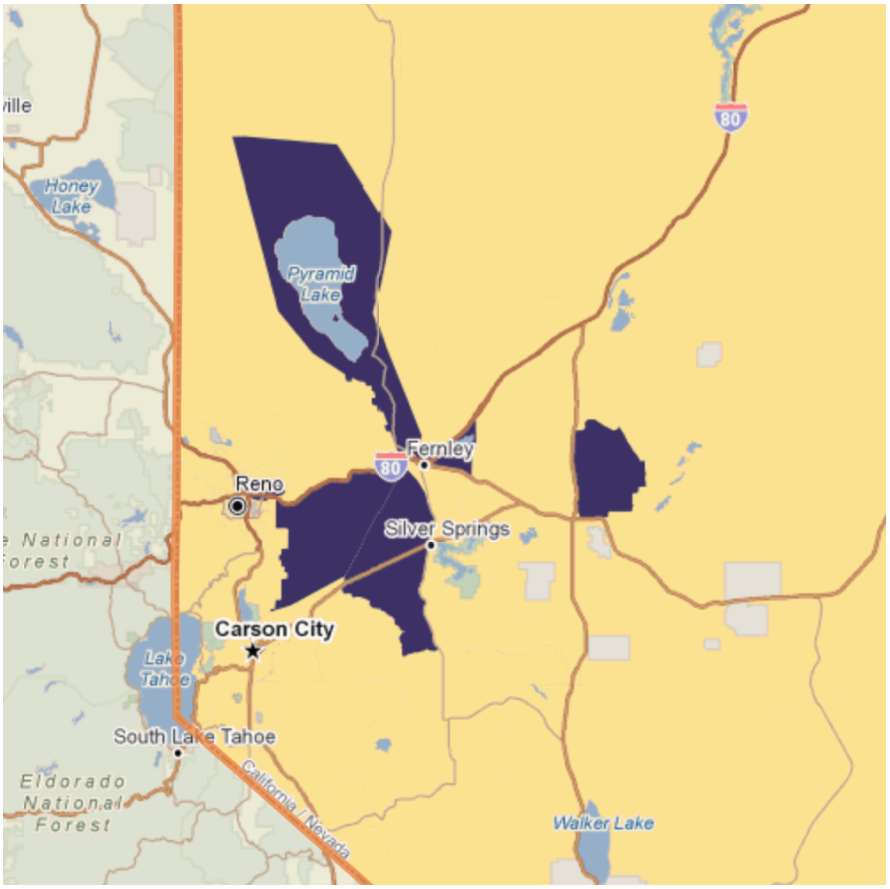
AMERICAN OVERSIGHT
NV-DA-20-0615-A-004703

liability, and potentially pay **ZERO** tax on earnings from the investment. There are 8,700 designated opportunity zones nationwide, and analysts predict that billions (and potentially trillions) of capital gains dollars will be invested into Opportunity Zones.

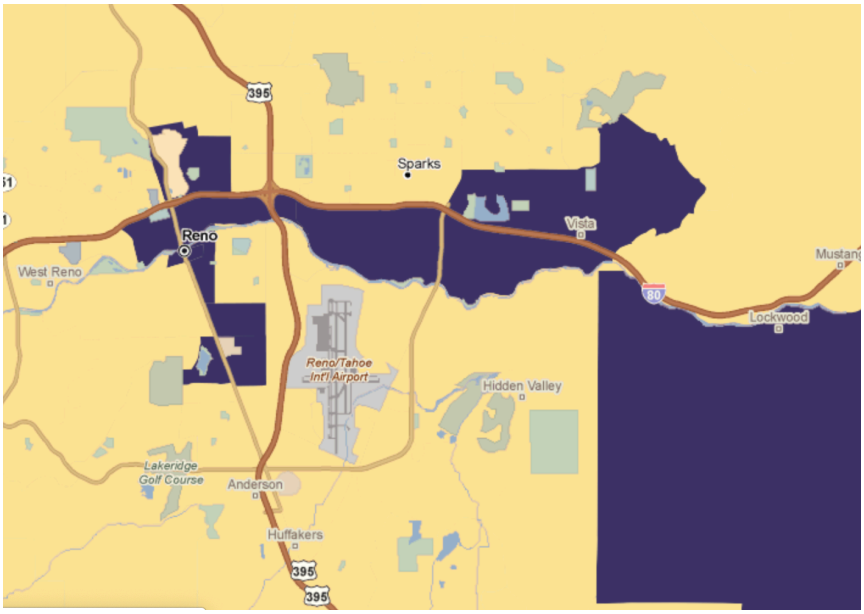
Business Friendly Climate: In addition to having desirable Opportunity Zones locations, Northern Nevada is one of the fastest growing areas in the country. People and companies are flocking here because of Northern Nevada's friendly business climate:

- Ideal for shipping and transportation: Northern Nevada is at the center of the western region, with 11 states, 53 million people, and 5 major US ports only one day's drive away.
- Friendly tax environment: No corporate income tax. No personal income tax. No franchise tax on income. No inventory tax. No inheritance or gift tax. No unitary tax. No estate tax.
- Low start-up, regulatory, licensing, and annual fees.
- An abundance of available commerical real estate.
- Able and willing workforce in right-to-work state.
- Close proximity to Lake Tahoe, wine country, and the San Francisco Bay Area.
- Becoming a major technology hub largely due to the Tahoe Reno Industrial Center.
- State incentives to help qualifying busineses do business in the state. For more information: http://www.diversifynevada.com/
- Because of all the growth, there is currently a need for housing, industrial/flex space, office, and commercial development.

Tahoe Reno Industrial Center (TRIC): The Tahoe Reno Industrial Center (TRIC) is a massive 107,000 acre park in Storey County that encompasses a developable 30,000 acre industrial complex. It is located approximately 9 miles east of the Reno-Sparks area on the I-80 freeway. Residents of TRIC include:



- Tesla
- Switch
- Google
- Blockchains
- Wal-Mart
- PetSmart
- Jet.com
- Zulily
- Thrive Market



As part of an economic incentive package granted to Tesla to locate its Gigafactory in Nevada, Tesla committed to invest $5.95 billion and create 6,000 new jobs. To date, Tesla has created over 7,060 jobs and has generated significant regional economic growth in Northern Nevada which has attracted more tech companies and development. Additionally, Tesla committed to use vendors located in Nevada which has prompted additional companies to relocate and many more are coming.

"The need for more infrastructure and housing is constraining Tesla Motors' desire to grow its footprint in Northern Nevada."
Former Tesla CEO Elon Musk.

All of TRIC is an Opportunity Zone!

AMERICAN OVERSIGHT

http://www.diversifynevada.com/programs/opportunity-zones/

AMERICAN OVERSIGHT

Northern Nevada Growth: In 2018, twenty-nine companies moved or expanded in Northern Nevada creating over 2,000 new jobs mostly in the areas of technology, manufacturing, and distribution. As a result, there is a massive affordable and workforce housing shortage and a need for workforce development.

The goals of this Summit are to:

1. Ensure that every attendee walks away with a clear understanding of OZ.
2. Share ideas for addressing the needs of Northern Nevada with the help of OZ.
3. Create networking opportunities for stakeholders and investors.
4. End the Summit with clear and actionable next steps for public-private collaboration around OZ.

"The next phase is creating incubators, accelerators, who buy real estate and rehab it into a WeWork-like space, and then [investing] in the businesses that come out of that, like a Y Combinator model. There's already tons of funds thinking about it. Unless of course they make it much harder than it was supposed to be to invest in the businesses. It's all pretty holistic -- these pieces all have to work together."

Steve Glickman, former Obama Economic Advisor, co-founder of the Economic Innovation Group and architect of Opportunity Zones

OPPORTUNITY ZONE SUMMIT
NORTHERN NEVADA

Northern Nevada OZ Summit

March 19-20th, 2019
Reno Ballroom at Silver Legacy Casino

WEDNESDAY MARCH 19TH:

7-9am **Registration and continental breakfast**

9-9:30am **Introduction and OZ 101** – (Kaya Bromley and Mike Bosma)
- Introduce Reno-Sparks OZ Task Force
- Explain how the day will flow
- Brief high level primer on OZ

9:30-9:40am **Video and Introduction of panelists** (Kaya and Mike).
- ➢ Video: Raw Land OZ Deal

9:40-10:40am **Session 1: Ask the Lawyers and CPAs .. A Deeper Dive into OZ**
- How to structure an OZ deal.
- Understanding the timing requirements.
- IRS Rules and Regs.
- What are the risks?

10:40-10:50am **Networking Break**

10:50-11am **Video and introduction of panelists** (Kaya and Mike).
- ➢ Video: Improving an existing building

11-noon **Session 2: Real Estate Deals v Business Deals**
- Investment requirements for a real estate deal vs. a business deal.
- Understanding the 50% requirement.
- What does "Substantially All" really mean?
- Measuring periods and penalties.
- Restructuring existing deals

Noon – 1pm **Lunch** – Keynote Speaker TBD

1:15-1:25pm **Video and introduction of panelists** (Kaya and Mike).
- ➢ Video: A deal owned prior to 2017 – how to restructure

1:25-2:25pm **Session 3: Using OZ to solve Housing Issues**
- Affordable Housing and OZ
- Making OZ deals pencil

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004709

- Mixed use OZ deals
- How can technology help make deals pencil
- Restructuring Existing Deals

(Panel – someone who has successfully done an affordable housing OZ deal, someone doing affordable or multifamily housing with 3D printing or other technologies that change the pricing issues, Housing experts from state or federal)

2:25-2:35pm **Networking Break**

2:35-2:45pm **Video and introduction of panelists** (Kaya and Mike).

- Video: Purchase of a going business

2:45-3:45pm **Session 4: Sharing State and Local Best Practices**

In this Session, we will hear from city and public officials who are setting the bar high for OZ implementation.

- Cities, counties, and states that are taking advantage of the increased OZ investment dollars to further their community goals.
- How some cities and states are layering incentive programs to support infrastructure projects.
- How municipalities are creating OZ friendly entitlement processes (automated permitting).
- Examples of public-private collaborations.

(Panel – We are inviting people from different cities and public offices who are doing this successfully)

3:45-3:55pm **Networking Break**

3:55-4:05pm **Video and introduction of panelists** (Kaya and Mike).

- Video: Starting a new business in an OZ

4:05-5:05pm **Session 5: What's Happening in Northern Nevada**

- TRIC – Blockchain's Innovation Park, Google, Switch, Tesla, Educational Park
- New and Expanding companies relocating to Northern Nevada (EDAWN)
- Business Improvement District – What is planned for Reno?
- City and County Projects going out for bid
- Why is Nevada one of the fastest growing states in the country and what opportunities are available here?

(Panelists: Blockchains GC, EDAWN, Applied Analysis, Chip Bowlby from Reno Land)

5:15-7pm **Networking Cocktail Party - Cocktails and (heavy) Hors d'oeuvres**

AMERICAN OVERSIGHT

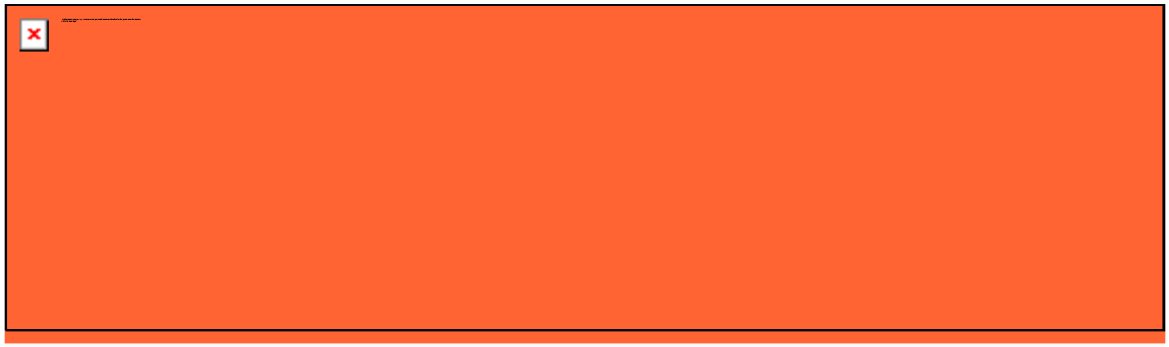
Subject: O-Zone / Affordable Housing

CJ,

Good to see you the other day. I want to somehow get connected and continue our talks on how we can develop more work force / affordable housing in the O-Zone census tracts.

I don't know what Senator Masto can do but she has always wanted to do something to help from a Federal level. Don't know if that can happen but affordable housing as you know is the HOTTTT button and everyone wants to help but we are just stuck at many levels.



Let's put our heads together and figure this out.

AMERICAN OVERSIGHT

THE SECRETARY OF THE INTERIOR

WASHINGTON

JUN 26 2018

The Honorable Brian Sandoval
Governor of Nevada
Carson City, Nevada 89701

Dear Governor Sandoval:

I am pleased to notify you that on June 26, 2018, the Department of the Interior (Department) issued payments under the Payments in Lieu of Taxes (PILT) program. The PILT program compensates eligible local jurisdictions for Federal lands administered by Agencies within the Department and on behalf of the U.S. Forest Service and the U.S. Army Corps of Engineers. Local governments may use the PILT payments for any governmental purpose, including emergency response, public schools, and roads. Since local governments cannot tax Federal lands, annual PILT payments help to defray costs associated with maintaining important community services.

The Payments in Lieu of Taxes Act, 31 U.S.C. 6901-6907, as amended, authorized the program. The PILT Act prescribes the formula used to compute the annual payments based on annually adjusted per-acre and population variables. Prior year Federal payments under certain revenue sharing programs, as reported annually by states, are deducted in formulating the payment amounts. A provision in the PILT Act provides temporary compensation for recent additions to the National Park System and National Forest Wilderness Areas.

The President signed the Consolidated Appropriations Act, 2018 (P.L.115-141) on March 23, 2018, providing full funding for the 2018 PILT program. Approximately 1,900 local jurisdictions received a total of $552.8 million in PILT payments this year.

The Department notified local governments within your State directly as to the payments they received. The Department also notified Members of Congress of State PILT payments. The enclosed materials show the PILT payment summary by State and the payment each eligible unit of local government in your State received.

AMERICAN OVERSIGHT

Additional information is available at www.doi.gov/pilt. If you have any questions, please contact the PILT Program Manager, Ms. Dionna Kiernan, at (202) 513-7783.

Sincerely,

Ryan K. Zinke
Secretary of the Interior

To: Deere, Judd P. EOP/WHO
Subject: POTUS in FL and Tax Day
Attachments: Tax Reform - Florida Event Factsheet.pdf

Hello everyone!

Hope you're having a great start to your week! As you're aware Tax Day is tomorrow and right now the President is conducting a Small Business Roundtable where he is highlighting the incredible benefits the American people are seeing as a result of the historic tax reform legislation he signed into law late last year.

You can watch this here. I wanted to make sure you had the attached fact-sheet that we'll release around this event today – and also the below TP's and schedule from the Administration re: Tax Day.

This Tax Day is especially historic – and we would greatly appreciate any assistance in sharing our shared accomplishments in this space and "flooding the zone" with positive statements, tweets, etc. Please don't hesitate to reach out with any questions.

Thanks!

CABINET ACTIVITY

- On Monday, the President will hold a round table with businesses owners in the Miami area, joined by Sec. Mnuchin, Sec. Acosta, and Administrator McMahon.
- On Tuesday, Secretary Mnuchin and Advisor to the President Ivanka Trump will travel to Derry, New Hampshire for a town hall discussion on tax reform, moderated by former Governor John Sununu, focusing on the benefits of the new tax plan for hardworking individuals and families.
- Secretary Perdue will be in Knoxville, Tennessee to meet with Ag retailers and members of Tennessee farm bureau for a tax reform town hall.

TAX DAY MESSAGES

- You can expect to hear everyone in the Administration talk about 5 specific ways the new tax code will be better than the old one.

    - **Lower Tax Rates for Americans**
      Individuals and families across America will be able to keep more of their hard-earned paychecks. A typical family of four earning $75,000 will see a tax cut of more than $2,000.
    - **Nearly Doubling the Standard Deduction**
      The first $12,000 of an individual's income and the first $24,000 of a married couple's is tax free, thanks to the Tax Cuts and Jobs Act
    - **Doubling the Child Tax Credit**
      You can particularly expect Ivanka to deliver this message at her events.
    - **A Simpler Process**
      The new law is designed to enable Americans to file their taxes in a simple and straightforward way.
    - **Relief from Obamacare**
      Families will now have the freedom to buy the health care plan that's right for them.

AMERICAN OVERSIGHT

PRESIDENT DONALD J. TRUMP'S TAX CUTS WILL GENERATE GREATER ECONOMIC OPPORTUNITY FOR ALL

"We're fighting to give every American – all over the country, every single American – a future of dignity and purpose and of pride." – President Donald J. Trump

ENCOURAGING ENTREPRENEURSHIP: Small business owners will be able to grow and thrive under the Tax Cuts and Jobs Act.

- The Tax Cuts and Jobs Act will help more American entrepreneurs gain the financial footing they need to expand and invest in their futures.
    - Small businesses which organize as sole proprietorships, S corporations, and partnerships will be able to deduct 20 percent of their qualified business income.
    - Businesses will be able to fully write off the cost of capital investments for the next 5 years.
- Optimism among small business owners continues to soar following the President's signing of the Tax Cuts and Jobs Act into law.
    - Small business confidence surged to a record high following the passage of tax reform, according to a CNBC/Survey Monkey survey.
    - Optimism among small business owners remains at a historically high level, according to a National Federation of Independent Businesses (NFIB) survey from March 2018.
    - Small business optimism reached an eleven-year high in the first quarter of 2018, according to the Wells Fargo/Gallup Small Business Index.
- President Trump's tax cuts will benefit small businesses, including minority-owned businesses, which are a critical driver of our Nation's economic success.
    - Minority-owned businesses generate more than $1 trillion in economic output annually.
    - The number of minority-owned businesses is growing at a faster rate than non-minority owned businesses.
    - Nearly 8 million Americans are employed by minority-owned businesses.
- A recent survey by the Chamber of Commerce and MetLife shows that minority-owned businesses are looking forward to even more success in 2018.
    - 93 percent of minority-owned businesses expect to have a good year in 2018 according to the MetLife and Chamber of Commerce Small Business Index.
    - 71 percent of minority-owned businesses are expecting an increase in revenue in 2018.

GREATER OPPORTUNITY FOR WORKERS: The Tax Cuts and Jobs Act will help spur more business growth and job creation, benefiting American workers.

- Businesses are ready to expand as a result of the tax cuts and reforms signed into law by President Trump, creating more employment opportunities for those seeking work.
    - Expected employment growth for 2018 has reached an all-time high among American manufacturers, according to a National Association of Manufacturers (NAM) survey.
    - Job creation plans among small businesses remain at a historically high level according to a March 2018 survey by the National Federation of Independent Businesses.

AMERICAN OVERSIGHT

-
- The Tax Cuts and Jobs Act will build upon Administration efforts to revitalize the American economy and increase economic opportunity for all.
    - More than 2.5 million jobs have been created since President Trump took office.
    - The unemployment rate has remained at a 17-year low of 4.1 percent since October of last year.
    - In 2017, Hispanic and African American unemployment rates reached their lowest levels on record.

REVITALIZING COMMUNITIES: The Tax Cuts and Jobs Act signed into law by President Donald J. Trump will expand economic opportunity in underserved communities.

- The Tax Cuts and Jobs Act includes the bipartisan Opportunity Zones Program, which will incentivize investment in economically distressed communities designated as Opportunity Zones.
    - More than 52 million low-income Americans live in communities that may benefit from the Opportunity Zones Program.
- Investments are pooled into Opportunity Funds and deployed into communities where they will help fund new and small businesses, develop blighted properties, finance construction and refurbishment, and more.
- On April 9, 2018, the Treasury Department and the Internal Revenue Service (IRS) announced the first round of Opportunity Zone designations for communities in 18 States.

Subject: Pre-Conference Listening Session Call - April 17 White House Opportunity Zones Conference

White House Office of Intergovernmental Affairs

Thank you for registering for the upcoming **Opportunity Zones Conference on Wednesday, April 17 at the White House**. We look forward to hosting you for this important discussion. As we get closer to the conference, we will provide you a complete agenda.

In preparation for the conference, the White House Office of Intergovernmental Affairs and Public Liaison invite you to a **pre-conference listening session this Thursday, April 11, at 1:00 p.m. Eastern Time** via conference call. The purpose of the pre-conference listening session is to hear from conference participants what specific obstacles, best practices, and other ideas they have related to Opportunity Zones to ensure the conference meets your needs. Below are some key questions we want you to consider providing feedback on Thursday's pre-conference listening session. If you are unable to joining the pre-conference listening session, feel free to provide feedback via email.

- What is the biggest obstacle to revitalization in your state or locality?
  - Lack of understanding the basics of the Opportunity Zone tax incentive?
  - Lack of educated or skilled workforce?
  - Lack of public infrastructure?
  - Unsafe or unhealthy neighborhoods?
  - Trouble attracting entrepreneurs?
  - Trouble attracting investors?
  - Something else?

Details – Opportunity Zones Pre-Conference Listening Session Call

- **Date:** Thursday, April 11
- **Time:** 1:00 p.m. Eastern Time
- **Call-In Information:** RSVP Here (Participants will receive instructions on accessing the conference after RSVP'ing)

Sincerely,

The White House Office of Intergovernmental Affairs

Olivia Imhoff
White House Office of Intergovernmental Affairs

Good Afternoon,

First, I would like to thank all of the cooperators and government entities that called into or attended in person the cooperating agency meeting we held in Reno on Tuesday afternoon regarding the BLM's sage grouse planning effort. For those of you who were not able attend, I am hopeful this email will bring you up to speed as to where we are in the planning process and what changes we are highlighting in the document to reflect changes between draft and final.

Attached for your review are the preliminary draft documents for the *Nevada and Northeastern California Proposed Plan Amendment and Final EIS*. As mentioned at Tuesday's meeting, all changes from the version you reviewed over the summer have been highlighted in gray text. If possible, please focus your review on the additions in gray text.

There are three components that are not currently incorporated into this document: 1) how BLM is addressing the mitigation issue (in light of the agency's new compensatory mitigation IM 2018-093); 2) the comment analysis report, which is still being developed by a third party contractor for all sage grouse planning efforts; and 3) the quantitative WAFWA Management Zone range-wide cumulative effects analysis. In order to provide you all with ample time to review these documents, we decided to push ahead with this review, as it is still unknown as to when these components will be completed.

In addition to the preliminary draft chapters and appendices and figures (I included only those figures that changed), there is also an attached comment form. If you have comments, please place them on the comment form and email your comments to me no later than September 10, 2018. If you can send them in earlier, that would be very helpful.

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

Appendix E

Fluid Mineral Stipulations, Waivers, Modifications, and Exceptions

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

NV-DA-20-0615-A-004737

APPENDIX E
FLUID MINERAL STIPULATIONS, WAIVERS, MODIFICATIONS, AND EXCEPTIONS

This appendix lists by alternative surface use stipulations for new fluid mineral (oil and gas and geothermal) leases referred to throughout the 2015 FEIS that would be updated under the Management Alignment Alternative of the 2018 Proposed Plan Amendment. In addition to fluid mineral leases, these surface use stipulations would also apply, where appropriate and practical, to other surface-disturbing activities (and occupancy) associated with land use authorizations, permits, and leases issued on BLM-administered lands. Subject to valid existing rights and applicable law and policy, the stipulations would apply to uses and activities other than fluid mineral leasing. The intent is to manage other activities and uses in the same manner as fluid mineral leasing.

Surface-disturbing activities are those that normally result in more than negligible disturbance to public lands. These activities normally involve disturbance to soils and vegetation to the extent that reclamation is required. They include the following:

- The use of mechanized earth-moving and truck-mounted drilling equipment;
- Certain geophysical exploration activities;
- Off-road vehicle travel in areas designated as limited or closed to OHV use;
- Placement of surface facilities, such as utilities, pipelines, structures, and geothermal and oil and gas wells;
- New road construction; and
- Use of pyrotechnics, explosives, and hazardous chemicals.

Surface-disturbing activities do not include livestock grazing, cross-country hiking, driving on designated routes, and minimum-impact filming.

DESCRIPTION OF SURFACE STIPULATIONS

Table G-1 shows the stipulations that would be carried forward or amended under the Management Alignment Alternative of the 2018 Proposed Plan, including exceptions, modifications, and waivers. All stipulations for other resources, besides GRSG, included in the existing land use plans would still be applicable.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004738

Areas identified as No Surface Occupancy (NSO) would not allow surface-disturbing activities.

Areas identified as Controlled Surface Use (CSU) would require proposed actions to be authorized in accordance with the controls or constraints specified. The controls would be applicable to all surface-disturbing activities.

Areas identified as Timing Limitation (TL) would not allow surface-disturbing activities during identified timeframes. Timing Limitation (TL) areas would remain open to operations and maintenance, including associated vehicle travel, during the restricted period, unless otherwise specified in the stipulation.

RELIEF FROM STIPULATIONS

With regards to fluid minerals, surface use stipulations could have exceptions, modifications, or waivers applied with approval by the authorized officer (State Director). **Table G-1** specifies the types of habitat where these stipulations would/not apply:

Exception

An exception to this stipulation may be granted by the authorized officer (State Director), in coordination with the appropriate state agency (NDOW and/or CDFW), if one the following conditions are met:

- The location of the proposed authorization is determined to be unsuitable as Greater Sage-Grouse habitat (by a qualified biologist with Greater Sage-Grouse experience using BLM approved methods based on Stiver et al 2015 and compliant with current BLM policy) and would not result in direct, indirect, or cumulative impacts on GRSG and its habitat.
- Impacts from the proposed action could be offset through use of the mitigation hierarchy (avoid, minimize, mitigate) to achieve a net conservation gain and demonstrate that the individual and cumulative impacts of the project would not result in habitat fragmentation or other impacts that would cause Greater Sage-Grouse populations to decline.

Modification

The boundaries of the stipulated area may be modified by the authorized officer (State Director), in coordination with the appropriate state agency (NDOW, and/or CDFW) if the criteria described above apply. The dates for seasonal timing limitations (restrictions) may be modified or waived in coordination with NDOW and/or CDFW based on site-specific information that indicates:

- A project proposal's NEPA analysis and/or project record, and correspondence from NDOW and/or CDFW, demonstrates that any modification (shortening/extending seasonal timeframes or waiving the seasonal timing restrictions all together) is justified on the basis that it serves to better protect or enhance GRSG and its habitat than if the strict application of seasonal timing restrictions are implemented. Under this scenario modifications can occur if:
    - A proposed authorization would have beneficial or negligible impacts to GRSG.
    - There are documented local variations (e.g., higher/lower elevations) and/or annual climatic fluctuations (e.g., early/late spring, long/heavy winter) that indicate

AMERICAN OVERSIGHT

the seasonal life cycle periods are different than presented, or that GRSG are not using the area during a given seasonal life cycle period.

- Modifications are needed to address an immediate public health and safety concern in a timely manner (e.g. maintaining a road impacted by flooding).

Waiver

The stipulation may be waived if the Authorized Officer, in consultation with the appropriate state agency (NDOW, and/or CDFW), determines that the entire leasehold is within unsuitable habitat (see exceptions above) and would not result in direct, indirect, or cumulative impacts to GRSG and/or its habitat.

Inclusion in Environmental Analysis

The environmental analysis document prepared for site-specific proposals such as for fluid minerals (oil and gas and geothermal) development (i.e., operations plans for geothermal drilling permit or master development plans for applications for permit to drill or sundry notices) would need to address proposals to exempt, modify, or waive a surface use stipulation.

In order to exempt, modify, or waive a stipulation on BLM-administered lands, the environmental analysis would have to demonstrate that criteria from above apply; such that: (1) the circumstances or relative resource values in the area had changed following issuance of the lease, (2) less restrictive requirements could be developed to protect the resource of concern, and (3) operations could be conducted without causing direct, indirect, or cumulative impacts.

With respect to granting relief from stipulations on other types of authorizations, such as solid mineral leases and land use authorizations, any changes to the contractual nature of these instruments would require environmental review and coordination with the lessee, permittee, or authorization holder. This would be the case when specific surface-disturbing activities are proposed via an operation plan, permitting action, or similar instrument.

STANDARD TERMS AND CONDITIONS

All surface-disturbing activities are subject to standard terms and conditions. These include the stipulations that are required for proposed actions in order to comply with the Endangered Species Act. Standard terms and conditions for fluid mineral leasing provide for relocating proposed operations up to 200 meters and for prohibiting surface-disturbing operations for a period not to exceed 60 days. The stipulations addressed in **Table G-1** that are within the parameters of 200 meters and 60 days are considered open to fluid mineral leasing, subject to standard terms and conditions.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004740

Table G-1
Fluid Mineral Stipulations for Greater Sage-Grouse Habitat

Language from land use plan amendment	**Stipulation SG-01-NV-OG-NSO:** This stipulation is herein rescinded because Sagebrush Focal Areas are not included in the Management Alignment Alternative. Sagebrush focal areas (SFA)—Managed as no surface occupancy (NSO), without waiver, exception, or modification, for fluid mineral leasing (oil, gas, and geothermal).
Objective	To protect GRSG habitat within the SFA
Stipulation type	Major constraint
Stipulation	No Surface Occupancy (NSO)
Exception	
Modification	
Waiver	
Language from land use plan amendment	**Stipulation SG-02-NV-OG-NSO:** Priority habitat management areas (PHMA)—Manage oil and gas resources in Nevada as No Surface Occupancy (NSO), with the following exceptions.
Objective	To protect GRSG in PHMA
Stipulation Type	Major constraint
Stipulation	No Surface Occupancy (NSO)
Exception	The Authorized Officer (State Director) may grant an exception to an oil and gas lease NSO stipulation only where one of the following apply: i. The location of the proposed authorization is determined to be unsuitable as Greater Sage-Grouse habitat (by a qualified biologist with Greater Sage-Grouse experience using BLM approved methods based on Stiver et al 2015 and compliant with current BLM policy) and would not result in direct, indirect, or cumulative impacts on GRSG and its habitat. Management direction would not apply to those areas determined to be unsuitable; ii. Impacts from the proposed action could be offset through use of the mitigation hierarchy (avoid, minimize, mitigate) to achieve a net conservation gain and demonstrate that the individual and cumulative impacts of the project would not result in habitat fragmentation or other impacts that would cause Greater Sage-Grouse populations to decline. [Note to cooperators: this exception is currently being evaluated and may change dependent upon Department of the Interior mitigation direction.]
Modification	The dates for seasonal timing limitations (restrictions) may be modified or waived in coordination with NDOW and/or CDFW based on site specific information that indicates:

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004741

	• A project proposal's NEPA analysis and/or project record, and correspondence from NDOW and/or CDFW, demonstrates that any modification (shortening/extending seasonal timeframes or waiving the seasonal timing restrictions all together) is justified on the basis that it serves to better protect or enhance GRSG and its habitat than if the strict application of seasonal timing restrictions are implemented. Under this scenario modifications can occur if: o A proposed authorization would have beneficial or negligible impacts to GRSG. o There are documented local variations (e.g., higher/lower elevations) and/or annual climatic fluctuations (e.g., early/late spring, long/heavy winter) that indicate the seasonal life cycle periods are different than presented, or that GRSG are not using the area during a given seasonal life cycle period. • Modifications are needed to address an immediate public health and safety concern in a timely manner (e.g. maintaining a road impacted by flooding).
Waiver	The stipulation may be waived if the Authorized Officer, in consultation with the appropriate state agency (NDOW, and/or CDFW), determines that the entire leasehold is within unsuitable habitat (see exceptions above) and would not result in direct, indirect, or cumulative impacts to GRSG and/or its habitat.
Language from land use plan amendment	**Stipulation SG-02-CA-NSO:** PHMA—Manage fluid mineral resources (oil, gas, and geothermal) in California as No Surface Occupancy (NSO), with the following exceptions.
Objective	To protect GRSG in PHMA
Stipulation Type	Major constraint
Stipulation	No Surface Occupancy (NSO)
Exception	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Modification	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Waiver	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Language from land use plan amendment	**Stipulation SG-02-NV-GEOT-NSO:** PHMA—Manage Nevada geothermal resources as No Surface Occupancy (NSO), with the following exceptions.
Objective	To protect GRSG habitat in PHMA
Stipulation type	Major constraint
Stipulation	No Surface Occupancy (NSO)
Exception	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Modification	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Waiver	Same as described above in **Stipulation SG-02-NV-OG-NSO**

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004742

Language from land use plan amendment	In PHMA in California only, limit the density of energy and mining facilities during project authorization to an average of one type of energy per mineral facility per 640 acres.
Objective	To protect PHMA and the life history needs of GRSG from habitat loss and GRSG populations from disturbance and limit fragmentation in PHMA. This would be implemented as a lease notice associated with new leases, in addition to the No Surface Occupancy stipulations. This would be applicable only to new oil and gas leases if the exception criteria identified for the NSO stipulation above were granted.
Stipulation type	Lease notice
Stipulation	Lease notice
Exception	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Modification	Same as described above in **Stipulation SG-02-NV-OG-NSO**

Language from land use plan amendment	**Stipulation SG-03-TL:** Seasonal protection within 4.0 miles of active or pending GRSG leks in General Management Habitat Areas (GHMA)—Manage fluid mineral resources with timing limitations.
Objective	To protect GRSG lekking habitat
Stipulation Type	Timing limitation
Stipulation	No Surface Occupancy (NSO) would be allowed within 4.0 miles of active or pending GRSG leks from March 1 through May 15.
Exception	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Modification	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Waiver	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Language from land use plan amendment	**Stipulation SG-04-TL:** Seasonal protection of GRSG winter habitat from November 1 through February 28 in GHMA.
Objective	To protect GRSG winter habitat
Stipulation Type	Timing limitation
Stipulation	No Surface Occupancy (NSO) would be allowed in GRSG winter habitat from November 1 through February 28.
Exception	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Modification	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Waiver	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Language from land use plan amendment	**Stipulation SG-05-TL:** Seasonal protection of GRSG early brood-rearing habitat from May 15 through June 15 in GHMA.
Objective	To protect GRSG early brood rearing habitat
Stipulation type	Timing Limitation
Stipulation	No Surface Occupancy (NSO) would be allowed in GRSG early brood-rearing habitat from May 15 through June15.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004743

Exception	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Modification	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Waiver	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Language from land use plan amendment	**Stipulation SG-06-TL:** Seasonal protection of GRSG late brood-rearing habitat from June 15 through September 15 in GHMA.
Objective	To protect GRSG late brood-rearing habitat
Stipulation type	Timing Limitation
Stipulation	No Surface Occupancy (NSO) would be allowed in GRSG late brood rearing habitat from June 15 through September 15.
Exception	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Modification	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Waiver	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Language from land use plan amendment	**Stipulation SG-08-CSU:** Authorizations/permits would limit noise from discretionary activities (during construction, operation, or maintenance) to not exceed 10 decibels above ambient sound levels at least 0.25 mile from active and pending leks from 2 hours before to 2 hours after sunrise and sunset during the breeding season from March 1 through May 15.
Objective	To protect GRSG lek sites
Stipulation type	Controlled Surface Use (CSU)
Stipulation	Authorizations/permits would limit noise from discretionary activities (during construction, operation, or maintenance) to not exceed 10 decibels above ambient sound levels at least 0.25 mile from active and pending leks from 2 hours before to 2 hours after sunrise and sunset during the breeding season from March 1 through May 15.
Exception	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Modification	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Waiver	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Language from Land Use Plan Amendment	**Stipulation SG-9-CSU:** In all GRSG habitat, the BLM will apply lek buffer distances, as recommended in the United States Geological Service Report Conservation Buffer Distance estimates for Greater Sage Grouse—A Review Open File- Report 2014-1239 (Manier et al. 2014; see Appendix B).
Objective	To protect GRSG leks
Stipulation type	Controlled Surface Use (CSU)
Stipulation	The BLM, through project specific NEPA analysis, will assess and address impacts from the following activities using the lek buffer-distances as identified in the USGS Report Conservation Buffer Distance Estimates for Greater Sage-Grouse – A Review (Open File Report 2014-1239). Project specific analysis should use the lower end of the interpreted range in the report as the basis for effects

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004744

	determination unless justifiable departures are determined to be appropriate (see below). The lower end of the interpreted range of the lek buffer-distances is as follows: • Linear features (roads) within 3.1 miles of leks • Infrastructure related to energy development within 3.1 miles of leks • Tall structures (e.g., communication or transmission towers and transmission lines) within 2 miles of leks • Low structures (e.g., fences and rangeland structures) within1.2 miles of leks • Surface disturbance (continuing human activities that alter or remove the natural vegetation) within 3.1 miles of leks • Noise and related disruptive activities, including those that do not result in habitat loss (e.g., motorized recreational events) at least 0.25 mile from leks
Exception	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Modification	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Waiver	Same as described above in **Stipulation SG-02-NV-OG-NSO**
Language from land use plan amendment	**Stipulation SG-NV-10-CSU:** Nevada 3% Disturbance Cap Protocol—New development/activity would not exceed the 3% disturbance cap protocol at either the biologically significant unit (BSU) or project scale in PHMA, unless a technical team (described under the exception) determines that new or site-specific information indicates the project could be modified to result in a net conservation gain at the BSU level.
Objective	To create a net conservation gain at the project and BSU level
Stipulation type	Controlled Surface Use (CSU)
Stipulation	New development/activity would not exceed the 3% disturbance cap protocol at either the BSU or project scale, unless a technical team (described under the exception) determines that new or site-specific information indicates the project could be modified to result in a net conservation gain at the BSU level.
Exception	Nevada lands only—Any exceptions to the disturbance cap would be approved by the Authorized Officer only with the concurrence of the State Director. The Authorized Officer may not grant an exception unless the NDOW, the USFWS, and the BLM unanimously find that the proposed action satisfies the conditions stated in the stipulation. Initially, the technical team would make such finding; the team consists of a field biologist or other GRSG expert from each respective agency. In the event the initial finding were not unanimous, the finding may be elevated to the BLM State Director, USFWS State Ecological Services Director, and NDOW Director for final resolution. In the event their recommendation were not unanimous to grant the exception, the exception would not be granted.
Modification	None

AMERICAN OVERSIGHT

Appendix D

Adaptive Management Plan

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

APPENDIX D
ADAPTIVE MANAGEMENT PLAN

INTRODUCTION

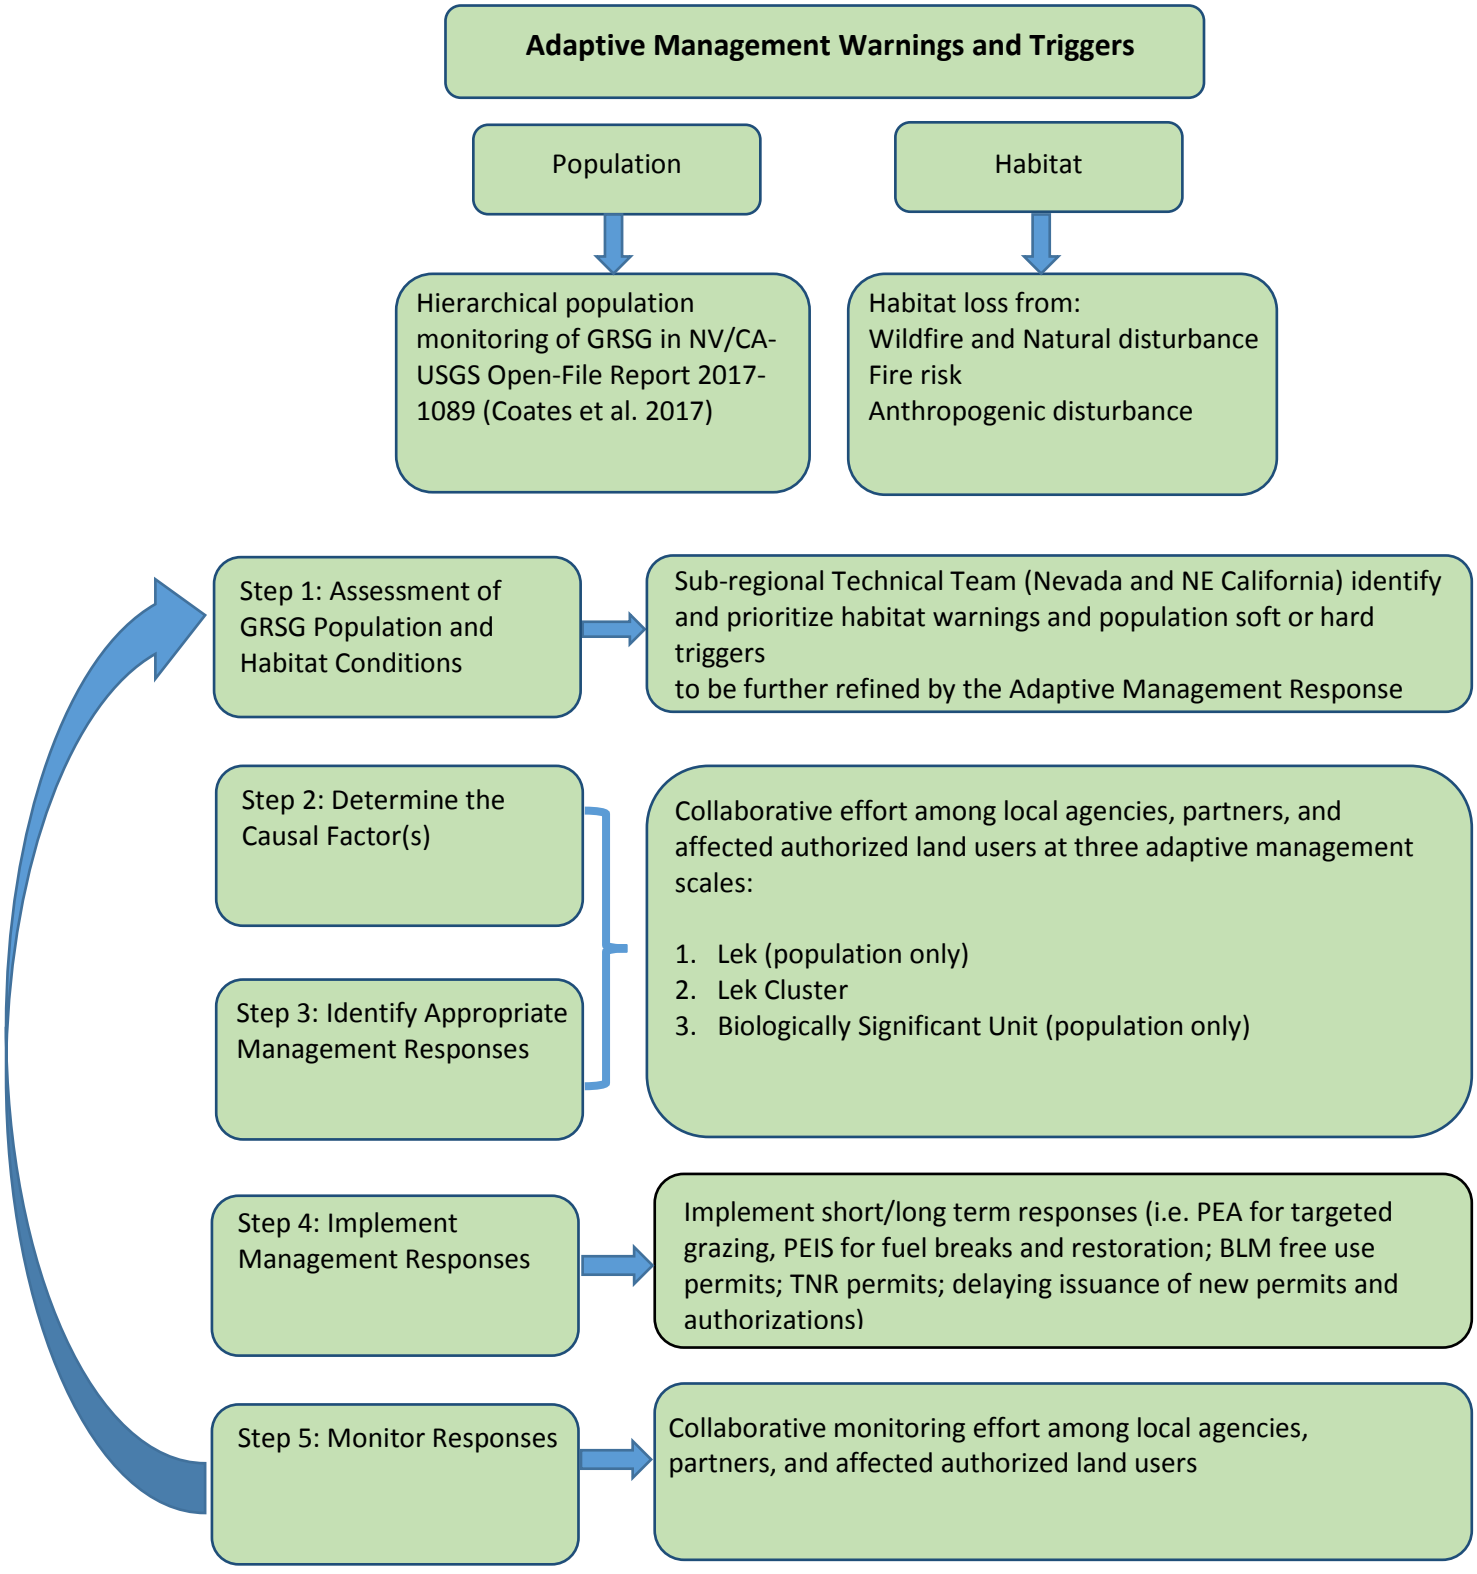
Adaptive management is a decision process that promotes flexible resource management decision-making. These decisions can be adjusted in the face of uncertainties as outcomes from management actions and other events become better understood. Carefully monitoring these outcomes both advances scientific understanding and helps with adjusting resource management directions as part of an iterative learning process.

On February 1, 2008, the Department of the Interior published its Adaptive Management Implementation Policy (522 DM 1). The adaptive management strategy presented in this RMPA EIS complies with this policy and direction, as well as the Department of the Interior's Adaptive Management Technical Guide (DOI, 2009).

Adaptive management would help identify if greater sage-grouse (GRSG) conservation measures presented in this RMPA/EIS contain the needed level of certainty for effectiveness. Principles of adaptive management are incorporated into the conservation measures in the RMPA/EIS to lessen threats to GRSG and its habitat, thereby increasing the likelihood that the conservation measures and plan would be effective in reducing threats to them.

The following provides the BLM's adaptive management strategy for the Nevada and Northeastern California Greater Sage-Grouse Sub-region RMPA/EIS.

This adaptive management strategy includes warnings, soft and hard triggers and responses. Triggers are not specific to any particular project, but identify GRSG population and habitat thresholds outside of natural fluctuations or variations (with the exception of wildfires). Triggers are based on the two key metrics that are being monitored; population status and habitat loss. Adaptive management, with specific triggers, provides additional certainty that the management actions included in the RMPA/EIS are robust and able to respond to a variety of conditions and circumstances quickly and effectively to conserve the GRSG and its habitat. Reaching a trigger would initiate a local-state-federal interagency dialogue in collaboration with affected authorized land users to evaluate causal factor(s) and recommend adjustments to



AMERICAN OVERSIGHT
NV-DA-20-0615-A-004750

implementation-level activities to reverse the trend. BLM would strive to use a collaborative process with stakeholders, appropriate state and local agencies, and affected authorized land users when developing and implementing management responses when a trigger has been identified.

A sub-regional (Nevada and northeastern California) technical team, consisting of BLM, Forest Service, USFWS, NDOW, CDFW, SETT, USGS, University of Nevada-Reno, and other appropriate federal, state, and local agencies would coordinate, prioritize, and implement specific habitat restoration efforts targeted at multiple spatial scales. This adaptive management strategy calls for a collaborative effort that would result in individual plans for the recovery of declining GRSG populations. These plans would be focused based on discussion of how threats impact GRSG and its habitat, and the relative importance of various conservation measures. The outcomes would be used to assist local efforts in identifying and prioritizing areas to enable efficiencies and pool resources. This would increase the likelihood that GRSG population and habitat declines can be addressed effectively through collaboration, stewardship, and conservation. The principles of adaptive management would be incorporated into the conservation measures that lessen threats to GRSG and its habitat.

ADAPTIVE MANAGEMENT ANALYSIS SCALES

The scales used to analyze population triggers and apply management responses are at the individual lek, lek cluster, and biologically significant units (BSU) as defined below (Map J-1). Adaptive management responses would only apply to habitat management areas (HMAs), which includes Priority, General and Other HMAs within these scales. Habitat adaptive management warnings and triggers would be analyzed only at the lek cluster scale. The boundaries of the BSU and lek clusters may be adjusted over time, based on the understanding of local GRSG population interactions, genetic sampling and climate variation. Population and habitat analysis used to identify warnings and triggers may be updated based on new science and advances in technology (e.g., integrated population models).

The hierarchy of GRSG population and habitat scales is as follows:

- Lek—Individual breeding display sites where male and female GRSG congregate, with males performing courtship displays to gain mating opportunities with females.
- Lek cluster—A group of leks in the same vicinity, among which GRSG may interchange over time and representing a group of closely related individuals.
- BSU— represents nested lek clusters with similar climate and vegetation conditions.

DEFINITIONS OF ADAPTIVE MANAGEMENT WARNINGS, SOFT TRIGGERS, AND HARD TRIGGERS

Population

Warnings

Adaptive management population warnings are identified within the GRSG state-space model (Coates et al., 2017) (described below) that could lead to reaching a population soft or hard trigger. Warnings are the result of cumulative factors that negatively affect population growth rate. A warning could be seen when population rate of change (lambda) within any of the three analyzed spatial scales is below an established threshold as defined in Coates et al. (2017).

Soft Triggers

Soft triggers represent a threshold that indicates management actions should be considered at the project or implementation level to address GRSG population declines.

Hard Triggers

Hard triggers represent a threshold that indicates that immediate action needs be considered to address significant deviation from GRSG population declines.

Habitat

Warnings

Adaptive management habitat warnings include fire risk (e.g. annual and perennial fine or woody fuel loads, fire risk models, etc.), the occurrence of wildfire or natural disturbance (e.g., sagebrush die-off) larger than 1,000 acres, or new anthropogenic disturbance that results in direct and indirect effects as determined using the Habitat Quantification Tool (HQT; DCNR 2017) within a lek cluster.

Fire risk would be analyzed using various applicable data sources and support tools including but not limited to current vegetation composition and biomass, precipitation, fire regime condition class, fire risk or predictive models, and other applicable resources to identify areas that have the potential for high fine or woody fuel loads or have a high probability for burning again. The Great Basin Coordination Center and appropriate fuels management specialists would also be consulted to refine areas of high fire potential.

Disturbances of any size could have significant impacts to GRSG habitat. Due to the complexity of identifying the extent and severity of habitat disturbances in a consistent process, this effort would focus on disturbances to sage-grouse habitat as reported by State and Federal agencies (e.g., wildfires > 1,000 acres) that would be considered warnings in order to assess the magnitude of each disturbance (as identified below in Triggers).

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004755

Triggers

Habitat triggers are warnings evaluated by a statewide technical team of specialists (as defined in the Adaptive Management Analysis section) that are determined to warrant significant management responses to address GRSG habitat declines. Generally, a management response would be warranted if an action could be taken that could effectively improve conditions for GRSG.

Management Responses

If a trigger is reached, the appropriate land management agency(s) would evaluate the appropriate management responses to address the known or probable causes of the decline in GRSG habitats or populations, with consideration of local knowledge and conditions in coordination with appropriate federal, state, and local agencies, and affected authorized land users. See Step 3 below for examples of potential management responses.

ADAPTIVE MANAGEMENT POPULATION ANALYSIS

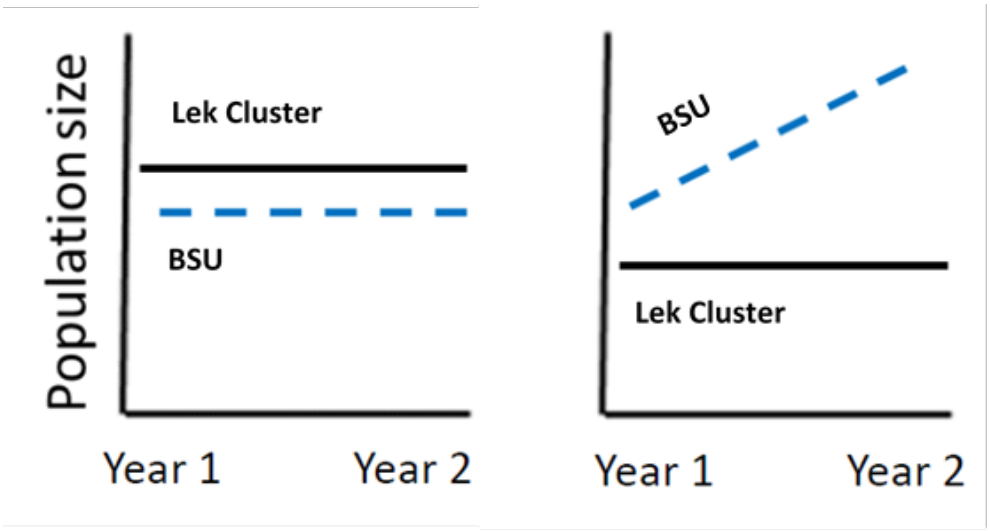
Population Rate of Change Calculation for Triggers

The most current version of the Hierarchical Population Monitoring of Greater Sage-Grouse in Nevada and Northeastern California (USGS Open-File Report 2017-1089; Coates et al., 2017) state-space model would be used to estimate the rate of GRSG population change (lambda) and the number of males at three hierarchically nested spatial scales: individual lek, lek cluster, and BSU. Lek count data provided by NDOW and CDFW would inform the state-space model and be used to determine thresholds for population stability and decoupling from higher-order scales. Some lek clusters may need additional monitoring of leks to gain adequate sampling data in order to be modeled (Coates et al., 2017).

In addition to analyzing annual trend data, the benefit of using the USGS state-space model is that it differentiates whether a population decline is likely due to localized disturbances that may be more manageable, or connected to a larger scale, regional environmental or climactic conditions that are typically less manageable. A trigger is less likely to be reached at smaller spatial scales (e.g., lek, lek cluster) if regional environmental (e.g., BSU) conditions are influencing population decline (Figure 2). The framework also accounts for natural variations in populations, which would allow managers to target populations that can be most affected by adaptive management responses.

Population Soft and Hard Triggers

On an annual basis as lek data are finalized by the state wildlife management agencies, the USGS state-space model would be used to establish population rates of change at the lek, lek cluster, and BSU levels. The rate at which a population trend destabilizes (population decline) and decouples from the trend at the associated higher-order scale would dictate whether or not a soft or hard trigger is reached. Thresholds for stability and decoupling for soft and hard triggers were initially determined from simulation analyses that used 17 years of lek data (2000-



AMERICAN OVERSIGHT
NV-DA-20-0615-A-004756

2016). These simulations estimated the range of values where management actions would have an effect on stabilizing population change or synchronizing decoupled scales. The threshold value for each criteria represents the most likely threshold value (from a range of values), that if crossed, would associate most strongly with continued decline or decoupling if management action is not taken (Coates et al. 2017).

Information on the methods used to determine if a soft or hard trigger for GRSG populations has been reached at the lek, lek cluster or BSU can be found in Coates et al. 2017, *Hierarchical population monitoring of greater sage-grouse (Centrocercus urophasianus) in Nevada and California—Identifying populations for management at the appropriate spatial scale*: U.S. Geological Survey Open-File Report 2017-1089 (as updated by USGS), in the Evaluation Process Section.

ADAPTIVE MANAGEMENT HABITAT ANALYSIS

Habitat Trends for Warnings and Triggers

Warnings for habitat would be evaluated at the lek cluster scale based on annual habitat loss within HMAs. Habitat warnings and triggers would be evaluated using the process described below and would not apply to the BSU scale.

Habitat Warnings and Triggers

1. At the lek cluster scale:
   a. Habitat warnings would be evaluated annually by a statewide technical team of specialists (similar to a science work group) from the BLM, Forest Service, NDOW, SETT, USGS, FWS, UNR, and other appropriate local, state or federal partners to determine the ecological impact and magnitude of the habitat warnings. The statewide technical team would determine which habitat warnings warrant a management response or not. Within a lek cluster, habitat warnings that warrant a significant GRSG focused management response can be considered triggers and prioritized based on available science, site-specific conditions (context), and ecological criteria (e.g., ecological site description, current state, resistance and resilience, state and transition models, disturbance response group, cheatgrass dominance, etc.). The statewide technical team would make a recommendation to the appropriate agency's authorizing official responsible for addressing the trigger(s). More information on prioritization is included under Step 2.
   b. Habitat warnings that had insufficient funds and resources available to implement significant GRSG focused projects would remain on the habitat warning list and could be re-prioritized as a trigger if warranted in the next annual evaluation by the sub-regional technical team. The sub-regional technical team would also review the trigger list annually and determine whether a habitat trigger remains on the list or should be removed.
   c. If a population soft trigger is reached within a lek cluster that has a habitat trigger present, this may result in a population hard trigger response for that lek cluster, as determined by the sub-regional technical team.

CAUSAL FACTOR ANALYSIS AND MANAGEMENT RESPONSE PROCESS

Step 1-Assessment of GRSG Population and Habitat Conditions: The sub-regional technical team and other appropriate state and local agency partners would use the processes outlined above to evaluate population and habitat data to identify population and habitat warnings and triggers that have been reached. The sub-regional technical team would meet semi-annually during the spring and late summer or fall of each year to evaluate population data using the results of the USGS GRSG state-space model (Coates et al. 2017), habitat data from the land and resource management agencies (BLM, Forest Service, and other state and local agencies) and data sources to identify the potential for high fine or woody fuel loads that indicate a high probability for burning. The data sources may be adapted as new information becomes

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004759

available from appropriate partners. Some applicable data sources are outlined in the habitat warnings definitions section.

Habitat warnings that warrant a management response would be elevated to the level of a trigger. Following the identification of habitat triggers, a list of criteria and a ranking system that considers available science, site-specific conditions (context), ecological criteria (e.g., ecological site descriptions, current ecological state, resistance and resilience, cheat grass dominance), and available resources would be used to consistently prioritize and rank habitat triggers among lek clusters. This prioritization is only an initial evaluation, as the adaptive management process progresses, local information and expertise would be used to further refine the priority list for habitat triggers. Once the annual population and habitat information has been assessed and hard or soft triggers have been identified, the appropriate land management agency would notify the appropriate local (districts and field) offices.

Step 2-Determine the Causal Factor(s): Within four weeks (or sooner if possible) after Step 1 is completed and population and habitat triggers have been identified, the appropriate land management agency, in coordination with the sub-regional technical team would organize and invite federal, state and local agencies and partners (including but not limited to local area conservation groups, grazing permittees, and other affected authorized land users,) to participate, comment, and provide input during the causal factor analysis. This group would henceforth be referred to as the 'Adaptive Management Response Team' (AMRT). The causal factor analysis should be completed as soon as practicably possible given available resources. The casual factor analyses area at each scale are as follows:

a. Lek (population only): GRSG seasonal habitats associated with the lek. An individual lek boundary is defined as a minimum of a four-mile buffer around a lek;
b. Lek cluster: GRSG seasonal habitats associated with the lek cluster. A lek cluster boundary is defined by minimal GRSG movement between clusters so demographic rates are influenced by birth/death rates rather than immigration/emigration;
c. BSU (population only): GRSG seasonal habitats associated with the BSU. A BSU boundary is defined by similar environmental conditions where GRSG population dynamics are likely more driven by larger scale variations (e.g., climate).

The causal factor(s) for habitat triggers could be wildfire, fir risk, natural causes or anthropogenic disturbances based on the analysis conducted in Step 1. To identify the causal factor(s) of a population trigger, the AMRT would consider all available information and examine potential causal factor(s). Questions to be answered may include, but are not limited to the following:

- Did factors and events outside the triggered scale contribute to population or habitat decline (e.g., previously burned areas within the lek cluster or BSU that have

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004760

recovered)?

- Did the event or outcome arise from the interaction of more than one potential causal factor(s)?
- What natural and human-caused events have occurred within the causal factor analysis area?
- What is the magnitude of the impact to GRSG population or habitat (e.g., what is the current anthropogenic disturbance in the area and how would these changes impact GRSG populations or habitat)?
- Can GRSG populations and/or habitat recover on its own without intervention?
- What is the expected length of the recovery period?
- Can the management actions already included in the plan accelerate recovery or are different actions necessary?

Findings from the causal factor analysis process would be documented in a report, which would be prepared by the AMRT. The AMRT report may also include recommendations for additional analyses or data collection. If the causal factor(s) can't be determined, the AMRT should address threats that were identified and continue to explore opportunities for conservation in areas where impacts have occurred, when warranted.

Step 3-Identify Appropriate Trigger Responses: The AMRT would identify appropriate trigger responses to be applied to the individual lek (population only), lek cluster, and/or BSU (population only) that reached a trigger. Appropriate management responses should be included in the AMRT report.

Management responses would only be applied within HMAs. Both reactive and pro-active management responses may be applied to address existing or anticipated threats in areas where warnings or triggers have been reached. In either case they should be strategically targeted to address the causal factor(s) of the existing disturbance or to address similar threats that led to a warning or trigger within a lek, lek cluster, or BSU. This plan identifies two main response groups to address fine and woody fuel loads that may require different management responses with varying spatial and temporal scales associated with the response:

1) Short term management – Identify areas of high fine fuel loads that would benefit from targeted grazing (e.g. season specific fall grazing, fuel break maintenance, etc.) of annual grasses and other fuels management.
2) Long term management – Identify areas of high woody fuel loads to strategically target areas for appropriate fuel breaks, vegetation and vegetation treatments, to better manage wildfires when they do occur.

Types of short and long term management or implementation actions that the appropriate land management agency(ies) could evaluate or consider applying within an individual lek (population only), lek cluster, or BSU (population only) to address triggers may include, but not be limited to the following:

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004761

- Delaying issuance of new permits and authorizations (e.g., geothermal, solar, wind, oil and gas, etc.);
- Delaying issuance of new or pending ROWs outside of existing designated corridors;
- Use of tools and techniques that are included within the Programmatic Environmental Assessments for targeted grazing;
- Proactively apply targeted grazing to reduce fine fuels (e.g., use of free use permits, TNR permits, etc.)
- Use of, full force and effect decisions when appropriate to address fire risk from fine or woody fuels;
- Requiring new permits and authorizations to include an adaptive management process if additional impacts to GRSG populations or habitats are identified;
- Strategically place fuel breaks depending on landscape/habitat continuity, vegetation composition, fuel loads, accessibility, and use of Programmatic EISs for Fuel Breaks and Restoration Management;
- Use existing or develop new predictive tools to forecast and plan for anticipated plant growth based upon annual and seasonal precipitation in unison with existing (from previous growing season(s)) fine and woody fuels presence;
- Halting or delaying planned prescribed fire;
- Increasing fire prevention patrols;
- Increasing fire prevention inspections of motorized equipment;
- Prohibiting open campfires outside of established fire pits and outside of stoves in designated recreation areas during high fire seasons;
- Increasing inspections to ensure Required Design Features for limiting the spread of invasive plants are being followed;
- Increasing surveys to detect and treat new infestations of invasive plants, especially invasive annual grasses;
- Delaying certain planned vegetation treatments until after the breeding and brood-rearing season;
- Halting, delaying, accelerating, or stimulating planned fuels treatments in GRSG winter habitat, depending on conditions and needs;
- Installing anti-perching devices on tall structures;
- Installing bird flight diverters on guy wires and fences;
- Delaying planned construction of new recreation facilities (e.g., kiosks, toilets, and signs);
- Increasing litter patrols in and around heavily used recreation areas;
- Increasing educational contacts with visitors concerning the role of litter and garbage in attracting GRSG predators;
- Increasing enforcement efforts on travel restrictions;
- Limiting noise and/or light pollution;
- Voluntary written agreements for items outside of BLM jurisdiction (such as activities on adjacent non-BLM land);
- Habitat improvement projects including pinyon and/or juniper removal;
- Developing Allotment Management Plans;

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004762

- Conducting emergency wild horse and burro gathers;
- Targeted and/or strategic grazing;
- Off-site water development by the water rights holder; and/or
- Voluntary establishment of livestock herding/stockmanship.

Some of the actions listed may require further analysis (e.g. NEPA) that would delay immediate implementation and response.

The appropriate land management agency local (district or field) offices would consider whether approval of pending authorizations within the affected adaptive management response area (lek, lek cluster or BSU) would exacerbate the population or habitat decline or would otherwise be inconsistent with the trigger responses. The land management agency would coordinate with appropriate federal, state and local agencies, and affected authorized land users for any action completed under this step.

In addition, the AMRT report would also identify an emergency/contingency plan that would outline immediate management actions that would take place, in the event the trigger is exacerbated. Such a plan should include goals, objectives, management actions and monitoring requirements developed specifically for the appropriate geographic area and/or population being affected (e.g., lek, lek cluster, and/or BSU). j

If a hard trigger is reached, district and/or field offices would implement the site specific actions outlined in the emergency/contingency response plan developed as part of the soft trigger response. If the hard trigger was reached, but not preceded by a soft trigger or the emergency/contingency response was not developed, the BLM (in coordination with Federal, State, and local partners) may implement temporary closures (in accordance with 43 CFR Part 8364.1, and as directed under BLM Instruction Memorandum No. 2013-035) to respond to a causal factor(s) that have resulted in a catastrophic event (i.e., wildfire). In addition, BLM would no longer permit exceptions to allocation decisions in areas (e.g., lek, lek cluster, and/or BSU that have reached a hard trigger and may delay issuance of new permits and authorizations until population and/or habitat levels fall below the trigger threshold and the trigger has been determined to be reversed by the process outlined below (Longevity of Trigger Responses).

Management objectives in response to triggers should be SMART (Specific, Measurable, Achievable/Attainable, Relevant/Realistic, and Trackable/Timely or time specified).

Step 4-Implement Trigger Responses: The AMRT with the appropriate land management agency's local (district and/or field) offices would implement specific management responses at the scale in which the trigger was reached (e.g., lek, lek cluster, and/or BSU), as contained in the report referenced in Steps 2 and 3.

Step 5-Monitor Responses: The AMRT with the appropriate land management agency's local (district and/or field) offices would continue to monitor (e.g., monitoring guidance within the Nevada Rangeland Monitoring Handbook) the lek(s), lek cluster(s) and/or BSU(s) in which a

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004763

trigger response is being applied to determine if the responses are adequately addressing the reason for the population and/or habitat decline. This information would be used in Step 1 above, "Assessment of GRSG Population and Habitat Conditions" the following year.

LONGEVITY OF TRIGGER RESPONSES (REMOVING THE TRIGGER RESPONSE)

The appropriate land management agency would work with the sub-regional technical team to develop criteria that would be used to evaluate whether a lek, lek cluster, and/or BSU that reached a trigger has recovered sufficiently or is trending in a positive direction. Longevity of a trigger response should be appropriate and apply to the type of management action being implemented.

Population and/or habitat triggers that resulted in management responses would be evaluated annually to determine their effectiveness. If implementation activities are successful or are improving population or habitat conditions, these actions should be continued or re-prioritized the AMRT using information from annual evaluation and monitoring.

For population and/or habitat trigger management responses that resulted in an allocation restriction, the federal land management agency would work with the AMRT to determine when a population or habitat trigger has been adequately addressed to remove the trigger response.

The process for evaluating population and habitat trigger responses may include, but are not limited to the following:

- Identification of upward population trends, based on an annual analysis of the GRSG state-spaced model.
- Response of vegetation community and habitat following fire or other disturbance;
- Changes in GRSG Habitat Management Areas based on periodic mapping updates;
- Evaluation of habitat or population responses based on an adaptive management process to determine what management actions are successful, what actions are unlikely to be successful and should be discontinued, what objectives should be modified to better reflect an achievable goal, and what actions should be changed to achieve the desired outcome;
- Evaluation of assessments completed following *the Sage-Grouse Habitat Assessment Framework: A Multiscale Assessment Tool*. Technical Reference 6710-1(Stiver et al., 2015).
- In cases where efforts to improve habitat become infeasible (i.e., the area has passed an ecological threshold), the AMRT may decide to recommend removal of triggers.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004764

Appendix C

Required Design Features Worksheet

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

The worksheet below includes a list of design features that would be implemented for all authorized/permitted activities, consistent with applicable law (and consistent with the 2015 BLM Nevada and Northeastern California's Approved Resource Management Plan Amendment, MD SSS 2(C), SSS 3(B), and SSS 4. At the site-specific scale, BLM will document when an RDF is or is not applied to a particular project. If an RDF is not applied, this worksheet provides the BLM an opportunity to consistently document its rationale as to why that RDF if not applicable. This document will be placed in the project record and/or referenced in the project's NEPA analysis.

Project Name: **NEPA #:**

General RDFs		Applied	If RDF not applied, select reason:
RDF Gen 1:	Locate new roads outside of GRSG habitat to the extent practical.	☐ Yes ☐ No	☐ A specific RDF is documented to not be applicable to the site-specific conditions of the project/activity (e.g. due to site limitations or engineering considerations). Economic considerations, such as increased costs, do not necessarily require that an RDF be varied or rendered inapplicable. ☐ An alternative RDF is determined to provide equal or better protection for GRSG or its habitat. Alternative RDF # _____ ☐ A specific RDF will provide no additional protection to GRSG or its habitat.
			Rationale if RDF is not applied:
RDF Gen 2:	Avoid constructing roads within riparian areas and ephemeral drainages. Construct low water crossings at right angles to ephemeral drainages and stream crossings (note that such construction may require permitting under Sections 401 and 404 of the Clean Water Act).	☐ Yes ☐ No	☐ A specific RDF is documented to not be applicable to the site-specific conditions of the project/activity (e.g. due to site limitations or engineering considerations). Economic considerations, such as increased costs, do not necessarily require that an RDF be varied or rendered inapplicable. ☐ An alternative RDF is determined to provide equal or better protection for GRSG or its habitat. Alternative RDF # _____ ☐ A specific RDF will provide no additional protection to GRSG or its habitat.
			Rationale if RDF is not applied:
RDF Gen 3:	Limit construction of new roads where roads are already in existence and could be used or upgraded to meet the needs of the project or operation. Design roads to an appropriate standard, no higher than necessary, to accommodate intended purpose and level of use.	☐ Yes ☐ No	☐ A specific RDF is documented to not be applicable to the site-specific conditions of the project/activity (e.g. due to site limitations or engineering considerations). Economic considerations, such as increased costs, do not necessarily require that an RDF be varied or rendered inapplicable. ☐ An alternative RDF is determined to provide equal or better protection for GRSG or its habitat. Alternative RDF # _____ ☐ A specific RDF will provide no additional protection to GRSG or its habitat.
			Rationale if RDF is not applied:
RDF Gen 4:	Coordinate road construction and use with ROW holders to minimize disturbance to the extent possible.	☐ Yes ☐ No	☐ A specific RDF is documented to not be applicable to the site-specific conditions of the project/activity (e.g. due to site limitations or engineering considerations). Economic considerations, such as increased costs, do not necessarily require that an RDF be varied or rendered inapplicable. ☐ An alternative RDF is determined to provide equal or better protection for GRSG or its habitat. Alternative RDF # _____ ☐ A specific RDF will provide no additional protection to GRSG or its habitat.
			Rationale if RDF is not applied:
RDF Gen 5:	During project construction and operation, establish and post speed limits in GRSG habitat to reduce vehicle/wildlife collisions or design roads to be driven at slower speeds.	☐ Yes ☐ No	☐ A specific RDF is documented to not be applicable to the site-specific conditions of the project/activity (e.g. due to site limitations or engineering considerations). Economic considerations, such as increased costs, do not necessarily require that an RDF be varied or rendered inapplicable. ☐ An alternative RDF is determined to provide equal or better protection for GRSG or its habitat. Economic considerations, such as increased costs, do not necessarily require that an RDF be varied or rendered inapplicable. ☐ An alternative RDF is determined to provide equal or better protection for GRSG or its habitat. Alternative RDF # _____ ☐ A specific RDF will provide no additional protection to GRSG or its habitat.
	Rationale if RDF is not applied:	
RDF Gen 14: Locate project related temporary housing sites outside of GRSG habitat.	☐ Yes ☐ No	☐ A specific RDF is documented to not be applicable to the site-specific conditions of the project/activity (e.g. due to site limitations or engineering considerations). Economic considerations, such as increased costs, do not necessarily require that an RDF be varied or rendered inapplicable. ☐ An alternative RDF is determined to provide equal or better protection for GRSG or its habitat. Alternative RDF # _____ ☐ A specific RDF will provide no additional protection to GRSG or its habitat.
	Rationale if RDF is not applied:	
RDF Gen 15: When interim reclamation is required, irrigate site, in accordance with state laws, to establish seedlings more quickly if the site requires it.	☐ Yes ☐ No	☐ A specific RDF is documented to not be applicable to the site-specific conditions of the project/activity (e.g. due to site limitations or engineering considerations). Economic considerations, such as increased costs, do not necessarily require that an RDF be varied or rendered inapplicable. ☐ An alternative RDF is determined to provide equal or better protection for GRSG or its habitat. Alternative RDF # _____ ☐ A specific RDF will provide no additional protection to GRSG or its habitat.
	Rationale if RDF is not applied:	
RDF Gen 16: Utilize mulching or other soil amendment techniques to expedite reclamation and to protect soils if the site requires it.	☐ Yes ☐ No	☐ A specific RDF is documented to not be applicable to the site-specific conditions of the project/activity (e.g. due to site limitations or engineering considerations). Economic considerations, such as increased costs, do not necessarily require that an RDF be varied or rendered inapplicable. ☐ An alternative RDF is determined to provide equal or better protection for GRSG or its habitat. Alternative RDF # _____ ☐ A specific RDF will provide no additional protection to GRSG or its habitat.

AMERICAN OVERSIGHT

NEPA #:

	Rationale if RDF is not applied:

Project Name:

RDF Gen 17:	Restore disturbed areas at final reclamation to the pre-disturbance landforms and desired plant community.	☐ Yes	☐ A specific RDF is documented to not be applicable to the site-specific conditions of the project/activity (e.g. due to site limitations or engineering considerations). Economic considerations, such as increased costs, do not necessarily require that an RDF be varied or rendered inapplicable.
		☐ No	☐ An alternative RDF is determined to provide equal or better protection for GRSG or its habitat. Alternative RDF # _____
			☐ A specific RDF will provide no additional protection to GRSG or its habitat.
		Rationale if RDF is not applied:	
RDF Gen 18:	When authorizing ground-disturbing activities, require the use of vegetation and soil reclamation standards suitable for the site type prior to construction.	☐ Yes	☐ A specific RDF is documented to not be applicable to the site-specific conditions of the project/activity (e.g. due to site limitations or engineering considerations). Economic considerations, such as increased costs, do not necessarily require that an RDF be varied or rendered inapplicable.
		☐ No	☐ An alternative RDF is determined to provide equal or better protection for GRSG or its habitat. Alternative RDF # _____
			☐ A specific RDF will provide no additional protection to GRSG or its habitat.
		Rationale if RDF is not applied:	
RDF Gen 19:	Instruct all construction employees to avoid harassment and disturbance of wildlife, especially during the GRSG breeding (e.g., courtship and nesting) season. In addition, pets shall not be permitted on site during construction (BLM 2005b).	☐ Yes	☐ A specific RDF is documented to not be applicable to the site-specific conditions of the project/activity (e.g. due to site limitations or engineering considerations). Economic considerations, such as increased costs, do not necessarily require that an RDF be varied or rendered inapplicable.
		☐ No	☐ An alternative RDF is determined to provide equal or better protection for GRSG or its habitat. Alternative RDF # _____
			☑ A specific RDF will provide no additional protection to GRSG or its habitat.
		Rationale if RDF is not applied:	
RDF Gen 20:	To reduce predator perching in GRSG habitat, limit the construction of vertical facilities and fences to the minimum number and amount needed and install anti-perch devices where applicable.	☐ Yes	☐ A specific RDF is documented to not be applicable to the site-specific conditions of the project/activity (e.g. due to site limitations or engineering considerations). Economic considerations, such as increased costs, do not necessarily require that an RDF be varied or rendered inapplicable.
		☐ No	☐ An alternative RDF is determined to provide equal or better protection for GRSG or its habitat. Alternative RDF # _____
			☑ A specific RDF will provide no additional protection to GRSG or its habitat.
		Rationale if RDF is not applied:	
RDF Gen 21:	Outfit all reservoirs, pits, tanks, troughs or similar features with appropriate type and number of wildlife escape ramps (BLM 1990; Taylor and Tuttle 2007).	☐ Yes	☐ A specific RDF is documented to not be applicable to the site-specific conditions of the project/activity (e.g. due to site limitations or engineering considerations). Economic considerations, such as increased costs, do not necessarily require that an RDF be varied or rendered inapplicable.
		☐ No	☐ An alternative RDF is determined to provide equal or better protection for GRSG or its habitat. Alternative RDF # _____
			☑ A specific RDF will provide no additional protection to GRSG or its habitat.

Appendix B

Lek Buffer-Distances (Evaluating Impacts to Leks)

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

APPENDIX B
LEK BUFFER-DISTANCES (EVALUATING IMPACTS TO LEKS)

In addition to any other relevant information determined to be appropriate (e.g. state wildlife agency plans, local agency plans, and local information), the BLM, through project specific NEPA analysis, will assess and address impacts from the following activities using the lower end of the interpreted range of lek buffer-distances and guidance identified in the *USGS Report Conservation Buffer Distance Estimates for Greater Sage-Grouse – A Review* (Open File Report 2014-1239). Project specific analysis should use the lower end of the interpreted range in the report as a guideline for effects determination unless justifiable departures are determined to be appropriate (see below). The lower end of the interpreted range of the lek buffer-distances is as follows:

- linear features (roads) within 3.1 miles of leks;
- infrastructure related to energy development within 3.1 miles of leks;
- tall structures (e.g., communication or transmission towers, transmission lines) within 2 miles of leks;
- low structures (e.g., fences, rangeland structures) within 1.2 miles of leks in flat or rolling terrain;
- surface disturbance (continuing human activities that alter or remove the natural vegetation, excluding livestock grazing) within 3.1 miles of leks; and
- noise and related disruptive activities including those that do not result in habitat loss (e.g., motorized recreational events) at least 0.25 miles from leks.

Justifiable departures to decrease or increase from these distances from the lek where impacts are anticipated, based on local information and data, best available science, landscape features (i.e., topography), and other existing protections (e.g., land use allocations, state regulations), or factors reducing visibility and audibility may be appropriate. The USGS report recognized "that because of variation in populations, habitats, development patterns, social context, and other factors, for a particular disturbance type, there is no single distance that is an appropriate buffer for all populations and habitats across the sage-grouse range." The USGS report also states, "various protection measures have been developed and implemented… [which have] the ability (alone or in concert with others) to protect important habitats, sustain populations, and

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004783

support multiple-use demands for public lands." All departures from the lek buffer-distances identified above for impact assessments will require appropriate analysis and disclosure as part of NEPA.

The BLM will use the most recent active or occupied lek data available from the state wildlife agency to assess project specific impacts.

For Actions in GHMA

The BLM, through NEPA analysis, should avoid or minimize actions in GHMA that are within the applicable lek buffer distance identified above. If it is not possible to avoid or minimize impacts by relocating the project outside of the identified lek buffer-distance(s), the BLM may approve the project if:

- Based on best available science, landscape features, and other existing protections, (e.g., land use allocations, state regulations), the BLM determines that a lek buffer-distance other than the applicable distance identified above offers the same or a greater level of protection to GRSG and its habitat, including conservation of seasonal habitat outside of the analyzed buffer area;
- The BLM determines that impacts to GRSG and its habitat are minimized such that the project will cause minor or no new disturbance (e.g. co-location with existing authorizations);
- If range improvements do not impact GRSG, or, range improvements which provide a conservation benefit to GRSG such as fences for protecting important seasonal habitats;
- Mitigation has been developed and implemented which have the ability (alone or in concert with others) to protect the important habitats within the buffer area and any residual impacts within the lek buffer-distances have been addressed.

For Actions in PHMA

The BLM, through NEPA analysis, should avoid actions in PHMA that are within the applicable lek buffer distance identified above. If it is not possible to avoid impacts by relocating the project outside of the identified lek buffer-distance(s), the BLM may approve the project, if in accordance with actions identified above for GHMA, and with input from the state fish and wildlife agency and appropriate local agencies.

The BLM will explain its justification for the analysis of buffer distances in its project decision record.

Glossary

Adaptive Management. A type of natural resource management in which decisions are made as part of an ongoing science-based process. Adaptive management involves testing, monitoring, and evaluating applied strategies, and incorporating new knowledge into management approaches that are based on scientific findings and the needs of society. Results are used to modify management policy, strategies, and practices.

Amendment. The process for considering or making changes in the terms, conditions, and decisions of approved Resource Management Plans or management framework plans. Usually only one or two issues are considered that involve only a portion of the planning area.

Anthropogenic Disturbance. The direct loss or fragmentation of habitat due to human development and increased human activity causing the displacement of individuals through avoidance behavior (Holloran 2005).

Avoidance/Avoidance Area. These terms usually address mitigation of some activity (i.e., resource use). Paraphrasing the CEQ Regulations (40 CFR 1508.20), avoidance means to circumvent, or bypass, an impact altogether by not taking a certain action, or parts of an action. Therefore, the term "avoidance" does not necessarily prohibit a proposed activity, but it may require the relocation of an action, or the total redesign of an action to eliminate any potential impacts resulting from it. Also see *"right-of-way avoidance area"* definition.

Best Management Practices (BMPs). A suite of techniques that guide or may be applied to management actions to aide in achieving desired outcomes. BMPs are often developed in conjunction with land use plans, but they are not considered a planning decision unless the plans specify that they are mandatory.

Biologically Significant Unit (BSU). A geographical/spatial area within GRSG habitat that contains relevant and important habitats that is used as the basis for comparative calculations to support evaluation of changes to habitat.

Breeding Habitat. Includes habitats utilized by GRSG for leks, pre-laying, nesting and early brood-rearing.

Compensatory Mitigation. Compensating for the residual impact by replacing or providing substitute resources or environments (40 CFR 1508.20).

Connectivity. The degree to which habitats for a species are continuous or interrupted across a spatial extent. Habitats defined as continuous are within a prescribed distance over which a species can successfully conduct key activities (e.g., effective dispersal distances of seeds or juveniles; mean distances moved for foraging, nesting, and brood-rearing). Habitats defined as interrupted are outside the prescribed distance (Wisdom et al. 2003).

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004786

Controlled Surface Used (CSU). CSU areas are open to fluid mineral leasing, but the stipulation allows the BLM to require special operational constraints, or the activity can be shifted more than 200 meters (656 feet) to protect the specified resource or value.

Cooperating Agency. Assists the lead federal agency in developing an environmental assessment or environmental impact statement. These can be any agency with jurisdiction by law or special expertise for proposals covered by NEPA (40 CFR 1501.6). Any tribe or Federal, State, or local government jurisdiction with such qualifications may become a cooperating agency by agreement with the lead agency.

Council on Environmental Quality (CEQ). An advisory council to the President of the US established by the National Environmental Policy Act of 1969. It reviews federal programs to analyze and interpret environmental trends and information.

Cumulative Effects. The direct and indirect effects of a proposed project alternative's incremental impacts when they are added to other past, present, and reasonably foreseeable actions, regardless of who carries out the action.

Decision Area. Public lands and mineral estate managed by the US Department of Interior, Bureau of Land Management that are within the planning area and are encompassed by all designated habitat.

Direct Impacts. Direct impacts are caused by an action or implementation of an alternative and occur at the same time and place.

Disturbance. Any relatively discrete event in time that disrupts ecosystem, community, or population structure, and changes resources, substrate availability, or the physical environment (White and Pickett 1985). *See also Anthropogenic Disturbance.*

Early Brood-Rearing Habitat. Upland sagebrush sites relatively close to nest sites, typically characterized by high species richness with an abundance of forbs and insects, where sage-grouse hens raise young chicks (<21 days old) (Connelly et al. 2000). Optimum early brood-rearing habitat consists of sagebrush stands and an herbaceous understory of grasses and forbs.

Ecological Site (ES). An Ecological Site is a conceptual division of the landscape that is defined as a distinctive kind of land based on recurring soil, landform, geological, and climate characteristics that differs from other kinds of land in its ability to produce distinctive kinds and amounts of vegetation and its ability to respond similarly to management actions and natural disturbances (Caudle et al., 2013)

Ecological Site Descriptions (ESD). The documentation of the characteristics of an ecological site. The documentation includes the data used to define the distinctive properties and characteristics of the ecological site; the biotic and abiotic characteristics that differentiate the site (i.e., climate, physiographic, soil characteristics, plant communities); and the ecological dynamics of the site that describes how changes in disturbance processes and management can affect the site. An ESD also provides interpretations about the land uses and ecosystem services that a particular ecological site can support and management alternatives for achieving land management.

Ecological Site Potential. The plant community that can be supported in an area given its edaphic and climatic potential (Habich 2001).

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004787

Environmental Impact Statement (EIS). A detailed statement prepared by the responsible official in which a major federal action that significantly affects the quality of the human environment is described, alternatives to the proposed action are provided, and effects are analyzed.

Fluid Minerals. Oil, gas, coal bed natural gas, and geothermal resources.

General Habitat Management Area (GHMA). Areas that have been determined to be suitable habitat for GRSG and have moderate use by GRSG compared with PHMA.

Geographic Information System (GIS). A system of computer hardware, software, data, people, and applications that capture, store, edit, analyze, and display a potentially wide array of geospatial information.

Habitat. An area with a combination of resources (such as space, food, cover, and water) and environmental conditions (such as temperature, precipitation, presence or absence of predators and competitors) that promotes occupancy by individuals of a given species and allows those individuals to survive and reproduce (Morrison et al. 1998).

Habitat Management Area (HMA). The spatial extent of GRSG habitat management areas in Nevada and Northeastern California (specific to BLM administered lands) within this RMPA.

Habitat Suitability. The relative appropriateness of a certain ecological area for meeting the life requirements of an organism (i.e., space, food, cover, and water). Categories of habitat suitability include suitable, marginal, potential, unsuitable and Non-habitat. Definitions of categories are included in this glossary.

Impact. The effect, influence, alteration, or imprint caused by an action.

Indirect Impacts. Indirect impacts result from implementing an action or alternative but usually occur later in time or are removed in distance and are reasonably certain to occur.

Landscape: A mosaic of landforms, vegetation, and land uses; a heterogeneous land area that is often hierarchically structured and varies in extent with the organism(s) being studied and the purpose for defining a landscape (Urban et al. 1987; Liu and Taylor 2002).

Late Brood-Rearing Habitat. Habitats characterized with succulent forbs adjacent to or intermixed with sagebrush. Hens typically move their chicks to more mesic conditions, such as higher elevation sagebrush communities, wet meadow complexes or agricultural fields. In general, a sagebrush ecosystem with a good understory of grasses and forbs, and associated wet meadow areas, where succulent grasses and insects are available.

Leasable Minerals. Those minerals or materials designated as leasable under the Mineral Leasing Act of 1920. These include energy-related mineral resources such as oil, natural gas, coal and geothermal, and some non-energy minerals, such as phosphate, sodium, potassium, and sulfur. Geothermal resources are also leasable under the Geothermal Steam Act of 1970.

Lease Stipulation. A modification of the terms and conditions on a standard lease form at the time of the lease sale.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004788

Lek. A traditional display area where two or more male sage-grouse have attended in two or more of the previous five years. The area is typically located in an open site in or adjacent to sagebrush-dominated habitats (Connelly et al. (2003), Generally, lek sites are traditional, with the same lek sites used year after year (Scott 1942, Batterson and Morse 1948, Wiley 1978, Autenrieth 1981). Taller sagebrush on the outskirts of the leks is necessary as a food source, escape cover, nesting cover for females, and loafing cover during the day (Patterson 1952, Gill 1965, Klebenow 1985). Lek status as defined by NDOW and CDFW are as follows:

Active Lek- 2 or more male observed at least twice in the last 5 years;
Pending Lek- 2 or more males observed only once in the last 5 years;
Inactive- 0-1 males observed during every visit (minimum 2 visits) in the last 5 years;
Historic- 0 or 1 males observed during every visit (minimum 5 visits) in the last 30 years.

Long-term Effect. The effect could occur for an extended period after implementation of the alternative. The effect could last several years or more.

Management Decision. A decision made by the BLM to manage public lands. Management decisions include both land use plan decisions and implementation decisions.

Marginal Habitat. An area that supports the species but has generally lower survival rates and reproductive success by comparison and may or may not have the potential to become suitable in the future (Cooperrider et al. 1986).

Minimization Mitigation. Minimizing impacts by limiting the degree or magnitude of the action and its implementation (40 CFR 1508.20 (b)).

Mitigation. Includes specific means, measures or practices that could reduce, avoid, or eliminate adverse impacts. Mitigation can include avoiding the impact altogether by not taking a certain action or parts of an action, minimizing the impact by limiting the degree of magnitude of the action and its implementation, rectifying the impact by repairing, rehabilitation, or restoring the affected environment, reducing or eliminating the impact over time by preservation and maintenance operations during the life of the action, and compensating for the impact by replacing or providing substitute resources or environments.

Modification. A change to the provisions of a lease stipulation, either temporarily or for the term of the lease. Depending on the specific modification, the stipulation may or may not apply to all sites within the leasehold to which the restrictive criteria are applied.

No Surface Occupancy (NSO). A major constraint where use or occupancy of the land surface for fluid mineral exploration or development and all activities associated with fluid mineral leasing (e.g., truck-mounted drilling and geophysical exploration equipment off designated routes, construction of wells and/or pads) are prohibited to protect identified resource values. Areas identified as NSO are open to fluid mineral leasing, but surface occupancy or surface-disturbing activities associated with fluid mineral leasing cannot be conducted on the surface of the land. Access to fluid mineral deposits would require horizontal drilling from outside the boundaries of the NSO area.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004789

Non-habitat. An area within the historical distribution of sage-grouse that is unoccupied, does not currently provide habitat, and does not have the potential to provide habitat in the foreseeable future (<100 years).

Other Habitat Management Area (OHMA). Areas that have been determined to contain low habitat suitability for GRSG. This habitat management area represents areas which may have appropriate environmental conditions for GRSG and may serve as corridors, but are less frequented.

Planning Area. The geographical area for which resource management plans are developed and maintained regardless of jurisdiction.

Planning Criteria. The standards, rules, and other factors developed by managers and interdisciplinary teams for their use in forming judgments about decision making, analysis, and data collection during planning. Planning criteria streamlines and simplifies the resource management planning actions.

Planning Issues. Concerns, conflicts, and problems with the existing management of public lands. Frequently, issues are based on how land uses affect resources. Some issues are concerned with how land uses can affect other land uses, or how the protection of resources affects land uses.

Policy. This is a statement of guiding principles, or procedures, designed and intended to influence planning decisions, operating actions, or other affairs of the BLM. Policies are established interpretations of legislation, executive orders, regulations, or other presidential, secretarial, or management directives.

Potential Habitat. An area that is currently unoccupied but has the potential for occupancy in the foreseeable future (<100 years) through succession or restoration.

Priority Habitat Management Areas (PHMA). Areas of high suitable GRSG habitat. This habitat management area includes all suitable habitats that have high certainty of GRSG occupancy.

Resilience. Ability of a species and/or its habitat to recover from stresses and disturbances. Resilient ecosystems regain their fundamental structure, processes, and functioning when altered by stresses like increased CO2 , nitrogen deposition, and drought and to disturbances like land development and fire (Allen et al. 2005; Holling 1973).

Resistance. Capacity of an ecosystem to retain its fundamental structure, processes and functioning (or remain largely unchanged) despite stresses, disturbances, or invasive species (Folke et al. 2004).

Required Design Features (RDFs). Means, measures, or practices intended to reduce or avoid adverse environmental impacts. A suite of features that would establish the minimum specifications for certain activities (i.e., water developments, mineral development, and fire and fuels management) and mitigate adverse impacts. These design features would be required to provide a greater level of regulatory certainty than through implementation of Best Management Practices. In general, the design features are accepted practices that are known to be effective when implemented properly at the project level.

Resource Management Plan (RMP). A land use plan as prescribed by the Federal Land Policy and Management Act that establishes, for a given area of land, land-use allocations, coordination guidelines for multiple-use, objectives, and actions to be achieved.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004790

Short-term effect. The effect occurs only during or immediately after implementation of the alternative.

State-and-Transition Model. A method to organize and communicate complex information about the relationships between vegetation, soil, animals, hydrology, disturbances (fire, lack of fire, grazing and browsing, drought, unusually wet periods, insects and disease), and management actions on an ecological site (Caudle et al. 2013).

Stipulation (general). A term or condition in an agreement or contract.

Stipulation (oil and gas). A provision that modifies standard oil and gas lease terms and conditions in order to protect other resource values or land uses and is attached to and made a part of the lease. Typical lease stipulations include No Surface Occupancy, Timing Limitations, and Controlled Surface Use. Lease stipulations are developed through the land use planning process.

Suitable Habitat. An area that provides environmental conditions necessary for successful survival and reproduction to sustain stable populations (Cooperrider et al. 1986; Morrison et al. 1998).

Timing Limitation (TL). Areas identified for timing limitations, a moderate constraint, are closed to fluid mineral exploration and development, surface-disturbing activities, and intensive human activity during identified timeframes. This stipulation does not apply to operation and basic maintenance activities, including associated vehicle travel, unless otherwise specified. Construction, drilling, completions, and other operations considered to be intensive are not allowed. Intensive maintenance, such as workover wells, is not permitted. TLs can overlap spatially with no surface occupancy and controlled surface use, as well as with areas that have no other restrictions.

Unsuitable Habitat. An area that does not currently provide one or more of the life requisites and therefore does not provide habitat, but it may provide habitat sometime in the foreseeable future (<100 years) through succession or restoration.

Winter Habitat. Characterized by highly variable sagebrush canopy cover. In general, winter movements are related to severity of winter weather, topography, and vegetative cover. Consists of sagebrush that is at least 10 to 12 inches above snow level in order to provide both food and cover for wintering GRSG.

Chapter 5. Consultation and Coordination

This chapter describes the efforts undertaken by the BLM throughout the process of developing the RMPA/EIS to ensure the process remained open and inclusive to the extent possible. This chapter also describes efforts taken to comply with legal requirements to consult and coordinate with various government agencies. These efforts include public scoping; identifying and designating cooperating agencies; consulting with applicable federal, state, and tribal governments; and identifying "any known inconsistencies with State or local plans, policies or programs" (43 CFR 1610.3-2(e)).

5.1 Public Involvement

5.1.1 Public Scoping

The scoping period began with the publication of the NOI in the *Federal Register* on October 11, 2017. The NOI was titled Notice of Intent to Amend Land Use Plans Regarding Greater Sage-Grouse Conservation and Prepare Associated Environmental Impact Statements or Environmental Assessments. During the scoping period, the BLM sought public comments on whether all, some, or none of the 2015 Greater Sage-Grouse plans should be amended, what issues should be considered, and whether the BLM should pursue a state-by-state amendment process or structure its planning effort differently, for example by completing a national programmatic process. Representatives of the BLM engaged with the Western Governors' Association Sage Grouse Task Force in October of 2017 and January of 2018 to discuss the progress of scoping efforts. In addition, the DOI Deputy Secretary has emphasized that input from state governors would weigh heavily when considering what changes should be made and ensuring consistency with the BLM's multiple use mission.

Information about scoping meetings, comments received, comment analysis, and issue development can be found in the scoping report available online here: https://goo.gl/FopNgW.

5.1.2 Public Comment on the Draft RMPA/EIS

Public Meetings

A Notice of Availability (NOA) for the Draft RMPA/EIS was published in the Federal Register on May 4, 2018. The NOA initiated a 90-day public comment period, which ended on August 2, 2018. The BLM notified the public of open house meetings via the project website and a news releases to media sites, including newspapers, radio, and television.

The BLM held four public comment open houses for the Draft RMPA/EIS from June 26–June 29, 2018:

- Reno, Nevada – June 26, 2018
- Ely, Nevada – June 27, 2018
- Elko, Nevada – June 28, 2018
- Alturas, California – June 29, 2018

All meetings were held from 5:00 to 7:00 pm. The goal of the open houses was to inform the public about the Draft RMPA/EIS and to obtain further public input on the alternatives that were developed and analyzed. At the open houses, displays introduced the various planning issues and presented the alternatives for addressing these issues. Other displays explained the NEPA process and the methods for submitting comments. Public comments were solicited at the open houses.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004800

Public Comments

A total of 34,650 unique comment letters, forms, and emails were received during the 90-day public comment period. These documents resulted in 595 substantive comment submissions. For a detailed description of the comment analysis methodology and the response to comments, refer to Appendix G.

5.1.3 Future Public Involvement

Public participation efforts will be ongoing throughout the remainder of the RMPA/EIS process. An NOA will be published in the Federal Register to notify the public of the availability of the Proposed Plan Amendment/Final EIS. The NOA will also outline protest procedures during the 30-calendar-day protest period. Concurrent with the first 30 days of the protest period, a 60-day joint governor's consistency review (one for California and one for Nevada) will be implemented. The Proposed Plan Amendment/Final EIS will be available for downloading from the project website at: https://goo.gl/kcsF4w. The Proposed Plan Amendment/Final EIS will also be available for review at the BLM Nevada and California State Offices. Press releases will be issued to notify the public of the Proposed Plan Amendment/Final EIS availability.

5.2 Cooperating Agencies

Federal regulation directs the BLM to invite eligible federal agencies, state and local governments, and federally recognized Indian tribes to participate as cooperating agencies when amending RMPs Notice of Intent to Amend Land Use Plans Regarding Greater Sage-Grouse Conservation and Prepare Associated Environmental Impact Statements or Environmental Assessments (43 CFR 1610.3-1(b)). A cooperating agency is any such agency or tribe that enters into a formal agreement with the lead federal agency to help develop an environmental analysis. More specifically, cooperating agencies "work with the BLM, sharing knowledge and resources, to achieve desired outcomes for public lands and communities within statutory and regulatory frameworks" (BLM Land Use Planning Handbook H-1601-1). These agencies are invited to participate because they have jurisdiction by law or can offer special expertise. Cooperating agency status provides a formal framework for these government units to engage in active collaboration with a lead federal agency in the planning process.

In November 2017, BLM Nevada and California mailed invitations to the 64 agencies and tribes identified in **Table 5-1**, inviting them to participate as a cooperating agency in this RMPA/EIS effort. Of these 64 agencies and tribes, 29 accepted the BLM's invitation to become a cooperating agency.

The BLM worked closely with the State of Nevada and CDFW to develop an alternative that would address the states' issues while keeping the pieces of the existing 2015 Plan that were not problematic for the states. The BLM and the states met with all cooperators as a group on March 21, 2018, and also four times with portions of the cooperators to discuss issues within their areas of expertise.

5.3 American Indian Tribal Consultation

Various federal laws require the BLM to consult with American Indian tribes during the planning/NEPA decision-making process. This section documents the specific consultation and coordination efforts undertaken throughout the process of developing the RMPA/EIS.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004803

In the fall of 2017, the BLM mailed letters to the tribes identified in **Table 5-1**, inviting them to participate as a cooperating agency for this RMPA/EIS effort. The Duckwater Shoshone Tribe of the Duckwater Reservation, Walker River Paiute Tribe of the Walker River Reservation, and the Washoe Tribe of Nevada and California formally accepted the BLM's invitation to be cooperating agencies. The Washoe Tribe of Nevada and California also attended and participated in the cooperating agency meeting held on March 21, 2018. On March 28, 2018, BLM Nevada and California followed up (via email) with those tribes that did not respond to the fall invitation to become cooperators.

5.4 List of Preparers

This Proposed Plan Amendment/Final EIS was prepared by an interdisciplinary team of staff from the BLM, in collaboration with Environmental Management and Planning Solutions, Inc. (**Table 5-2**).

Table 5-2

Chapter 4. Environmental Consequences

4.1 Introduction

This chapter presents the anticipated direct and indirect impacts on the human and natural environment from implementing the alternatives in **Chapter 2**. The purpose of this chapter is to describe to the decision-maker and the public how the environment could change if the alternatives, including the Proposed Plan Amendment were implemented. It is meant to aid in the decision between continuing current management (No-Action Alternative), as directed in the 2015 Final EIS, or adopting the Management Alignment Alternative or Proposed Plan Amendment to incorporate the best available science, better balance multiple use, and improve compatibility between federal management plans and state conservation plans and strategies.

This chapter is organized by topic, based on the affected resources identified in **Chapters 1** and **3**. Only those issues listed in **Table 1-2** were carried forward for analysis.

Impact analysis is a cause-and-effect process. The detailed impact analyses and conclusions are based on the following:

- The BLM planning team's knowledge of resources and the project area
- Literature reviews
- Information provided by experts in the BLM, other agencies, cooperating agencies, interest groups, and concerned citizens

The baseline used for the impact analysis is the current condition or situation, as described in **Chapter 3**. Impacts on resources and resource uses are analyzed and discussed, commensurate with resource issues and concerns identified through the NEPA process. At times, impacts are described in qualitative terms or using ranges of potential impacts.

4.2 Analytical Assumptions

Several overarching assumptions have been made in order to facilitate the analysis of the potential impacts. These assumptions set guidelines and provide reasonably foreseeable projected levels of development that would occur in the planning area during the planning period. These assumptions should not be interpreted as constraining or redefining the management objectives and actions proposed for each alternative, as described in **Chapter 2**.

The following general assumptions apply to all resource categories; any specific resource assumptions are provided in the methods of analysis section for that resource:

- Sufficient funding and personnel would be available for implementing the final decision.
- Implementation-level actions necessary to execute the RMP-level decisions in this RMPA/EIS would be subject to further environmental review, including that under NEPA.
- Direct impacts of implementing the RMPA would primarily occur on public lands administered by the BLM in the planning area. Indirect impacts of implementing the RMPA could occur on either BLM-administered lands, or adjacent lands, regardless of ownership/administration. The discussion

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004807

of impacts is based on best available data. Knowledge of the planning area, decision area, and professional judgment, based on observation and analysis of conditions and responses in similar areas, are used for environmental impacts where data are limited.

- Restrictions (such as siting, design, and mitigation measures) would apply, where appropriate, to surface-disturbing activities associated with land use authorizations and permits issued on BLM-administered lands and federal mineral estate.
- GIS data have been used in developing acreage calculations and to generate the figures in **Appendix A**. Calculations depend on the quality and availability of data. Acreage figures and other numbers are approximate projections for comparison and analysis only; readers should not infer that they reflect exact measurements or precise calculations. In the absence of quantitative data, best professional judgment was used. Impacts were sometimes described using ranges of potential impacts, or they were described qualitatively, when appropriate.

4.3 General Method for Analyzing Impacts

Potential impacts are described in terms of type, context, duration, and intensity, which are generally defined below.

Type of impact—Impacts are characterized using the indicators described in the 2015 Final EIS (where applicable). The presentation of impacts for key planning issues is intended to provide the BLM decision-maker and reader with an understanding of the multiple use trade-offs associated with each alternative.

Context—This describes the area or site-specific, local, planning area-wide, or regional location where the impact would occur. Site-specific impacts would occur at the location of the action; local impacts would occur in the general vicinity of the action area; planning area-wide impacts would affect a greater portion of decision area lands in Nevada and northeast California; and regional impacts would extend beyond the planning area boundaries.

Duration—This describes the associated time period of an impact, either short term or long term. Unless otherwise noted, short term is defined as anticipated to begin and end within the first 5 years after the action is implemented; long term is defined as lasting beyond 5 years to the end of or beyond the life of this RMPA/EIS.

Intensity—Rather than categorize impacts with qualitative statements (e.g., major, moderate, or minor), this analysis discusses impacts using quantitative data wherever possible.

Direct and indirect impacts—Direct impacts are caused by an action or implementation of an alternative and occur at the same time and place; indirect impacts result from implementing an action or alternative but usually occur later in time or are removed in distance and are reasonably certain to occur.

For ease of reading, the impacts of the management actions for a particular alternative on a specific resource are generally compared with the status quo or baseline for that resource; however, in order to properly and meaningfully evaluate the impacts under each alternative, its expected impacts should be measured against those projected to occur under the No-Action Alternative. This alternative is the baseline for comparing the alternatives to one another. This is because it represents what is anticipated to occur should the RMPA not take place.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004808

Irreversible and irretrievable commitment of resources is discussed in **Section 4.12**, below. Irreversible commitments of resources result from actions in which resources are considered permanently changed; irretrievable commitments of resources result from actions in which resources are considered permanently lost.

4.3.1 Impacts from No-Action Alternative

The impacts of the No-Action Alternative, or current management, of this RMPA/EIS were analyzed as the Proposed Plan in the 2015 Final EIS, and within the various alternatives analyzed in the Sagebrush Focal Areas Withdrawal Draft EIS (BLM 2016). The BLM has reviewed new information to verify that the analysis in the 2015 Final EIS remains sound; therefore, impacts from implementing the No-Action Alternative are substantially the same as those analyzed in the 2015 Final EIS.

Table 4-1, below, shows where information on the impacts of the No-Action Alternative can be found.

Table 4-1
Environmental Consequences for the No-Action Alternative Incorporated by Reference

Issue	Resource / Resource Use	Location of Impact Analysis from the 2015 Final EIS
Habitat Management Area Boundaries	Greater Sage-Grouse	The impacts on Greater Sage-Grouse and its habitat through the management of established habitat management areas are discussed in Section 4.4.10 of the 2015 Final EIS beginning on page 4-51.
	Vegetation	The impacts on Vegetation through the management of the established habitat management areas are discussed in Section 4.5.10 of the 2015 Final EIS beginning on page 4-91.
	Land Use and Realty	The impacts on Land Use and Realty through the management of the established habitat management areas are discussed in Section 4.13.10 of the 2015 Final EIS beginning on page 4-269.
	Renewable Energy	The impacts on Renewable Energy through the management of the established habitat management areas are discussed in Section 4.14.10 of the 2015 Final EIS beginning on page 4-284.
	Minerals and Energy	The impacts on Minerals and Energy through the management of the established habitat management areas are discussed in Section 4.15 of the 2015 Final EIS beginning on page 4-286.
	Socioeconomics	The impacts on Socioeconomics through the management of the established habitat management areas are discussed in Section 4.21 of the 2015 Final EIS beginning on page 4-402.
	Livestock Grazing	The impacts on Livestock Grazing through the management of the established habitat management areas are discussed in Section 4.10.10 of the 2015 Final EIS beginning on page 4-232.
	Comprehensive Travel Management	The impacts on Comprehensive Travel Management through the management of the established habitat management areas are discussed in Section 4.12.10 of the 2015 Final EIS beginning on page 4-252.
Sagebrush Focal Areas (SFA)	Greater Sage-Grouse	The impacts on Greater Sage-Grouse from withdrawing sagebrush focal areas from the Mining Law of 1872 are discussed in the 2016 SFA Withdrawal EIS, Section 4.5 of the 2015 Final EIS beginning on page 4-82.
	Vegetation	The impacts on Vegetation from withdrawing sagebrush focal areas from the Mining Law of 1872 are discussed in Section 4.5.10 of the 2015 Final EIS beginning on page 4-91 and the 2016 SFA Withdrawal EIS, Section 4.4 Vegetation, including Special Status Plants, beginning on page 4-68.

		Exception Process, under the No-Action Alternative. The impacts on Socioeconomics through the management of the established Allocation Exception Process are discussed in Section 4.21 of the 2015 Final EIS beginning on page 4-402.
	Livestock Grazing	A number of exceptions were outlined in the 2015 Final EIS according to specific resource uses or conditions. These are summarized in Section 2.5 of this document under the heading Issue: Allocation Exception Process, under the No-Action Alternative. The impacts on Livestock Grazing through the management of the established Allocation Exception Process are discussed in Section 4.10.10 of the 2015 Final EIS beginning on page 4-232.
	Comprehensive Travel Management	A number of exceptions were outlined in the 2015 Final EIS according to specific resource uses or conditions. These are summarized in Section 2.5 of this document under the heading Issue: Allocation Exception Process, under the No-Action Alternative. The impacts on Comprehensive Travel Management through the management of the established Allocation Exception Process are discussed in Section 4.12.10 of the 2015 Final EIS beginning on page 4-252.
Mitigation	Greater Sage-Grouse	The mitigation strategy that constitutes the action under this alternative is described in Section 2.7.3 of the 2015 Final EIS beginning on page 2-88. The impacts on Greater Sage-Grouse through the management of the established mitigation are discussed in Section 4.4.10 of the 2015 Final EIS beginning on page 4-51. The Regional Mitigation Strategy is explained in Appendix I of the 2015 Final EIS.
	Vegetation	The mitigation strategy that constitutes the action under this alternative is described in Section 2.7.3 of the 2015 Final EIS beginning on page 2-88. The impacts on Vegetation through the management of the established mitigation are discussed in Section 4.5.10 of the 2015 Final EIS beginning on page 4-91.
	Land Use and Realty	The mitigation strategy that constitutes the action under this alternative is described in Section 2.7.3 of the 2015 Final EIS beginning on page 2-88. The impacts on Land Use and Realty through the management of the established mitigation are discussed in Section 4.13.10 of the 2015 Final EIS beginning on page 4-269.
	Renewable Energy	The mitigation strategy that constitutes the action under this alternative is described in Section 2.7.3 of the 2015 Final EIS beginning on page 2-88. The impacts on Renewable Energy through the management of the established mitigation are discussed in Section 4.14.10 of the 2015 Final EIS beginning on page 4-284.
	Minerals and Energy	The mitigation strategy that constitutes the action under this alternative is described in Section 2.7.3 of the 2015 Final EIS beginning on page 2-88. The impacts on Minerals and Energy through the management of the established mitigation are discussed in Section 4.15 of the 2015 Final EIS beginning on page 4-286.
	Socioeconomics	The mitigation strategy that constitutes the action under this alternative is described in Section 2.7.3 of the 2015 Final EIS beginning on page 2-88. The impacts on Socioeconomics through the management of the established mitigation are discussed in Section 4.21 of the 2015 Final EIS beginning on page 4-402.

4.3.2 Impacts from Management Alignment Alternative

Table 4-2, below, summarizes if and how decisions in the Management Alignment Alternative were considered in the 2015 Final EIS. Issues needing further analysis are analyzed under the resource/resource use headings in this chapter.

Table 4-2
Impacts from Management Alignment Alternative

Plan Alignment Issue	Considered in 2015 Final EIS
Modifying Habitat Management Area Boundaries	As part of the proposed action for Alternative E in the 2015 Final EIS, as defined in Action E-SSS-AM 9 found on page 2-197: "Greater Sage-Grouse management categories must be evaluated every 3-5 years, based on new or improved spatial data through a scientifically based, peer-reviewed process. Adjustments of the mapped management categories within the population management zone would be made without further analysis." The impacts on resources associated with Alternative E are contained in Chapter 4 of the 2015 Final EIS. Note: If the most current Greater Sage-Grouse habitat management area boundaries are adopted, the following changes would occur: PHMA 44,000-acre decrease GHMA 27,300-acre increase OHMA 1,007,600-acre decrease
Removing Sagebrush Focal Areas	Alternatives B through F in the 2015 Final EIS did not include SFAs as a management area. The impacts on resources associated with Alternatives B through F are contained in Chapter 4 of the 2015 Final EIS.
Adaptive Management	Adaptive Management was analyzed as part of the 2015 Final EIS; see Section 2.7.1 on page 2-75.
Allocation Exception Process	Exceptions were outlined in the 2015 Final EIS according to specific resource uses or conditions. These are summarized in Section 2.5 of this document (No-Action Alternative) under the heading Issue: Allocation Exception Process.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004815

Table 4-2
Impacts from Management Alignment Alternative

Plan Alignment Issue	Considered in 2015 Final EIS
	Although specific exceptions, modifications, and waivers were only analyzed for certain land uses, the 2015 Final EIS analyzed a range of alternatives that took into account the various impacts from different types of management actions associated with these land use allocations. Note: The No-Action Alternative of the 2015 Final EIS allowed for the disposal of lands within Greater Sage-Grouse habitat management areas.
Mitigation	The mitigation standard (net conservation gain) was analyzed in Alternative E of the 2015 Final EIS, including the use of the Nevada Conservation Credit System. See Sections 4.4.8, page 4-42; Section 4.5.8, page 4-85; Section 4.6.8, page 4-126; Section 4.9.7, page 4-186; Section 4.13.8, page 4-265; and Section 4.15, page 4-286.
Seasonal Timing Restrictions	Applying limited seasonal timing restrictions was analyzed in Alternative C of the 2015 Final EIS. See Sections 4.4.6; 4.5.6; 4.6.6; 4.9.5; 4.10.6; 4.13.6; 4.14.6; and 4.18.6.
Modifying Habitat Objectives	The Habitat Objectives for Greater Sage-Grouse were analyzed in the 2015 Final EIS. See Section 2.6.2, page 2-17 for additional information and Sections 4.4.7; 4.4.8; 4.4.10; and 4.5.9 for the analysis of Habitat Objectives under the Proposed Plan and Alternatives A, B, D, E, and F of the 2015 Final EIS.

4.3.3 Impacts from the Proposed Plan Amendment

Table 4-2, above, summarizes if and how decisions in the Management Alignment Alternative were considered in the 2015 Final EIS. While there have been minor changes between the Proposed Plan Amendment and draft Management Alignment Alternative, the analysis completed in 2015, and hence, table 4-2 remain applicable to both the Draft Management Alignment Alternative and the Proposed Plan Amendment.

4.4 Incomplete or Unavailable Information

CEQ established implementing regulations for NEPA, requiring that a federal agency identify relevant information that may be incomplete or unavailable for evaluating reasonably foreseeable significant adverse impacts in an EIS (40 CFR 1502.22). If the information is essential to a reasoned choice among alternatives, it must be included or addressed in an EIS, unless the cost of obtaining such information is exorbitant. Knowledge and information is, and would always be, incomplete, particularly with infinitely complex ecosystems considered at various scales.

The best available information pertinent to the decisions to be made was used in developing the 2015 Final EIS as well as this RMPA/EIS. The BLM made a considerable effort to acquire and convert resource data into digital format from the BLM and outside sources (e.g., NDOW, USGS, etc.).

Under the FLPMA, the inventory of public land resources is ongoing and continuously updated; however, certain information was unavailable for use in developing the RMPA. This was because inventories either had not been conducted or were incomplete.

Some of the major types of data that are incomplete or unavailable are the following:

- Comprehensive planning area-wide inventory of wildlife and special status species occurrence and condition

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004816

- GIS data used for disturbance calculations on private lands
- Site-specific surveys of cultural and paleontological resources
- Lack of quantifiable social or economic effects specific to counties, from the Statewide Socioeconomic Baseline Data collection for Nevada that is currently being developed by the University of Nevada, Reno.

For these resources, estimates were made concerning their number, type, and significance, based on previous surveys and existing knowledge.

In addition, some impacts could not be quantified, given the proposed management actions. Where there was this gap, impacts were projected in qualitative terms or, in some instances, were described as unknown. Subsequent site-specific, project-level analyses would provide the opportunity to collect and examine site-specific inventory data to determine appropriate application of RMP-level guidance. In addition, the BLM and other agencies in the planning area continue to update and refine information used to implement this plan.

4.5 Impacts on Greater Sage-Grouse and Greater Sage-Grouse Habitat

4.5.1 Impacts of the No-Action Alternative with the Inclusion of SFAs (No-Action Alternative)

Under this alternative, 2,767,552 acres of Greater Sage-Grouse habitat management areas would be designated as SFAs and would be recommended for withdrawal from the Mining Law of 1872 for 20 years, subject to valid existing rights. The potential for future mining operations that would affect Greater Sage-Grouse and its habitat would be reduced because additional protections from habitat disturbance and fragmentation associated with mining would be placed on some of the most important landscapes for Greater Sage-Grouse conservation (as identified by the USFWS; BLM 2016).

Based on the reasonably foreseeable development (RFD) scenario, estimates for the number and size of future mines and exploration projects in the planning area over the proposed 20-year withdrawal would not be substantially different (see **Table 4-3** below). The difference, therefore, between the nature and type of effects on Greater Sage-Grouse described in Section 4.4.10 of the Final EIS (BLM 2015) would be negligible. A mineral withdrawal within the SFA could have beneficial impacts on Greater Sage-Grouse by potentially reducing mining activities that may cause disturbance to Greater Sage-Grouse and its habitat within and adjacent to the withdrawal areas.

Table 4-3
Estimated Number of Mines and Exploration Projects

State	Inclusion of SFAs		No SFAs	
	Mines	Exploration	Mines	Exploration
Nevada	1	32	3	78
California	N/A	N/A	N/A	N/A

Source: BLM 2016

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004817

4.5.2 Impacts of Management Alignment Alternative

Adopting the changes proposed in the Management Alignment Alternative would be consistent with both Nevada and California's overall objective to provide for the long-term conservation of Greater Sage-Grouse by protecting the habitat upon which the species depends. Despite minor differences between the actions described in this alternative and those analyzed in the 2015 Final EIS, the difference between the nature and type of impacts described would be negligible. These impacts are discussed in Section 4.4 of the 2015 Final EIS (BLM 2015). Alignment with the states' conservation and management strategies will improve coordination and opportunities for enhanced management.

The Management Alignment Alternative proposes to update the habitat management area boundaries for PHMA, GHMA, and OHMA to reflect the best available science, and outlines a process for periodically revising these boundaries in the future, as new data becomes available. This would ensure that current and future renditions of habitat management area boundaries accurately reflect Greater Sage-Grouse habitat on the ground and guide management actions appropriately. As the boundaries are updated, the land use plan allocations associated with each habitat management area (see **Table 2-1**) would be adjusted to match the newest habitat management area boundaries (Coates et al. 2016). This would help to conserve the species by ensuring allocations and any of their associated restrictions are applied in the appropriate areas, while allowing infrastructure and economic development to occur in areas that would not affect the species.

The allocation exception process would be updated and standardized, to allow for the consideration of projects within priority and general habitat management areas, provided they meet the prescribed criteria, as described in **Table 2-2**. Because these criteria ensure that projects are either in unsuitable Greater Sage-Grouse habitat; do not result in direct, indirect, or cumulative impacts on Greater Sage-Grouse; or can be offset, with the exception of those needed for public health and safety, no new impacts on Greater Sage-Grouse and its habitat are anticipated above those analyzed in the 2015 Final EIS.

Adaptive management hard and soft triggers would be updated as summarized and described in **Table 2-2** and **Appendix D**. This update would ensure that the BLM is utilizing the best available data and decision support tools to guide management at the appropriate spatial scale. Impacts on Greater Sage-Grouse and its habitat would be beneficial as a result of this update to adaptive management triggers, providing the ability to detect declining populations and/or habitat and change management on the ground.

The State of Nevada adopted a mitigation standard of net benefit (net conservation gain). Consistent with the State approach, this standard would be retained in the Management Alignment Alternative (and the No-Action Alternative), with additional clarification regarding implementation provided in **Appendix F**. While this update would not change the mitigation standard, the improved coordination among state and federal partners, along with using consistent metrics for tracking changes in habitat quality and quantity over time, is anticipated to benefit the species through enhanced knowledge of baseline conditions and restoration/reclamation/mitigation effectiveness.

Beneficial impacts were identified for addressing seasonal timing restrictions and modifying indicators and their values in the Habitat Objectives table in the 2015 Final EIS, in coordination with the USGS, NDOW, CDFW, USFWS, and others as described in **Table 2-2**. The criteria established for modifying or removing seasonal timing restrictions ensure that these protections are still applied where applicable and allow for beneficial Greater Sage-Grouse projects (i.e., juniper and/or pinyon removal, riparian restoration projects,

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004818

reseeding, etc.) to be implemented in an expedited manner. Modifying the Habitat Objectives would improve the efficiency of Greater Sage-Grouse habitat management by using the most current best available science to inform Greater Sage-Grouse habitat requirements.

SFAs would not be designated under this alternative and therefore not recommended for withdrawal from the Mining Law of 1872; however, they would still be managed according to their underlying Greater Sage-Grouse habitat management area and associated allocations and management decisions (e.g., PHMA). Impacts on Greater Sage-Grouse would be consistent with those described in 2015 because SFAs presented no additional conservation and management restrictions above PHMA with the exception of the mineral withdrawal recommendation discussed above. Given the subsequent information obtained through the 2016 Sagebrush Focal Area Withdrawal EIS's associated Mineral Potential Report and Socioeconomic Impacts Analysis (BLM 2016), the October 4, 2017, *Notice of Cancellation of Withdrawal Application and Withdrawal Proposal* explained that "the BLM determined the proposal to withdraw 10 million acres was unreasonable in light of the data that showed that mining affected less than 0.1 percent of Greater Sage-Grouse-occupied range."

4.5.3 Impacts of the Proposed Plan Amendment

Adopting the changes in the Proposed Plan Amendment would result in similar impacts and outcomes as described in section 4.5.2 for the Management Alignment Alternative. The Proposed Plan Amendment would remain consistent with both Nevada and California's overall objective to provide for the long-term conservation of Greater Sage-Grouse by protecting the habitat upon which the species depends. Despite minor differences between the actions described in the Proposed Plan Amendment and those analyzed in the 2015 Final EIS, the difference between the nature and type of impacts described would be negligible. These impacts are discussed in Section 4.4 of the 2015 Final EIS (BLM 2015). Alignment with the states' conservation and management strategies will improve coordination and opportunities for enhanced management.

Under the Proposed Plan Amendment, the adaptive management strategy would be slightly revised as summarized and described in **Table 2-2** and **Appendix D**. The adaptive management strategy presented in the Proposed Plan Amendment would be modified to align with the strategy approved by the State of Nevada's Sagebrush Ecosystem Council on July 17, 2018 and August 30, 2018. Habitat triggers have been replaced with a system of adaptive management warnings related to wildland fire, fire risk, anthropogenic and natural disturbances. If these warnings justify a response, this would be considered an adaptive management habitat trigger. Impacts on Greater Sage-Grouse and its habitat from this change to the adaptive management strategy would be beneficial, providing the ability to detect declining populations and/or habitat and change management on the ground with other Federal, state, and local partners. These new warnings will also allow BLM to assess the threats that are present and widespread across the Nevada and Northeastern California Sub-region, which are fire and the rapid spread of invasives.

[Mitigation analysis pending Department of the Interior direction]

The criteria established for modifying or removing seasonal timing restrictions has been slightly revised in the Proposed Plan Amendment through the addition of an exception to modify or waive seasonal timing restrictions to allow for priority routine administrative functions (consistent with the exceptions proposed for allocations). Prior to permitting this exception, BLM would still be required to coordinate with

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004819

NDOW and CDFW to ensure the seasonal lifecycle periods that are necessary for the GRSG are protected, while still allowing these types of functions to occur in a timely manner. Due to the fact that it would be speculative to anticipate at the land use planning level how often and when this exception would be pursued on a project-by-project basis, impacts would be more appropriate at the project scale.

4.6 Impacts on Vegetation and Soils

4.6.1 Impacts of the No-Action Alternative with the Inclusion of SFAs (No-Action Alternative)

Under this alternative, 2,767,552 acres of Greater Sage-Grouse habitat management areas would be designated as SFAs, and would be recommended for withdrawal from the Mining Law of 1872 for 20 years, subject to valid existing rights. Under this alternative, less mining activity would be authorized (see **Table 4-3**, above), thus reducing the overall potential for disturbance associated with mining activities.

The reduction in overall disturbance would provide a positive benefit to vegetation and soils; however, because localized disturbance from mining activities requires reclamation and is only one factor affecting the extent and condition of vegetation and soils, the designation of SFAs is unlikely to result in a substantially different outcome for vegetation and soils as those described in Section 4.5.10 of the 2015 Final EIS.

4.6.2 Impacts of Management Alignment Alternative

Adopting the changes proposed in the Management Alignment Alternative would not substantially alter vegetation and soil resources because they would continue to be managed according to their underlying habitat management area and associated allocations and management decisions (e.g., PHMA). Despite minor differences between the actions described in this alternative and those analyzed in the 2015 Final EIS, the difference between the nature and type of impacts described would be negligible. These impacts are discussed in Section 4.5 of the 2015 Final EIS (BLM 2015).

The Management Alignment Alternative proposes to update the habitat management area boundaries for PHMA, GHMA, and OHMA to reflect the best available science, and outlines a process for periodically revising these boundaries in the future, as new data becomes available. The allocations associated with each habitat management area (**Table 2-2**) would be adjusted to match the newest habitat management area boundaries (Coates et al. 2016). The allocation exception process would be updated and standardized, as described in **Table 2-2**, to allow for the consideration of projects within habitat management areas, provided they meet prescribed criteria.

Adaptive management hard and soft triggers would be updated as summarized and described in **Table 2-2** and **Appendix D**. The mitigation standard (net conservation gain) would be retained in the Management Alignment Alternative (and the No-Action Alternative), with additional clarification regarding implementation provided in **Appendix F**. Seasonal timing restrictions and modifying habitat objectives would be addressed in coordination with the USGS, NDOW, CDFW, USFWS, and others as described in **Table 2-2**. SFAs would not be designated under this alternative and therefore not recommended for withdrawal from the Mining Law of 1872; however, they would still be managed according to their underlying habitat management area and associated allocations and management decisions (e.g., PHMA).

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004820

4.6.3 Impacts of the Proposed Plan Amendment

Adopting the changes in the Proposed Plan Amendment would result in similar impacts to vegetation and soil resources as described in section 4.6.2 for the Management Alignment Alternative, except that under the Proposed Plan Amendment, the adaptive management strategy would be slightly revised as summarized and described in **Table 2-2** and **Appendix D**. Impacts on vegetation and soil resources from the slight modifications identified in **Appendix D** would be beneficial, providing the ability to address fire risk in a collaborative and expeditious manner, which will beneficially impact vegetation and soil resources. The proposed adaptive management warning system would allow BLM to assess the threats that are present and widespread across the Nevada and Northeastern California Sub-region, which are fire and the rapid spread of invasives.

[Mitigation analysis pending Department of the Interior direction]

The criteria established for modifying or removing seasonal timing restrictions has been slightly revised in the Proposed Plan Amendment through the addition of an exception to modify or waive seasonal timing restrictions to allow for priority routine administrative functions (consistent with the exceptions proposed for allocations). Due to the fact that it would be speculative to anticipate at the land use planning level how often and when this exception would be pursued on a project-by-project basis, impacts would be more appropriate at the project scale.

4.7 Impacts on Land Use and Realty

4.7.1 Impacts of the No-Action Alternative with the Inclusion of SFAs (No-Action Alternative)

The designation of SFAs would be specific to recommending lands for withdrawal from the Mining Law of 1872. Because this would not alter the underlying allocations for land use and realty associated with Greater Sage-Grouse habitat management areas, the nature and type of effects on land use and realty described in Section 4.13.10 of the Final EIS (BLM 2015) would be the same as under this alternative.

4.7.2 Impacts of Management Alignment Alternative

Adopting the changes proposed in the Management Alignment Alternative would result in slight boundary adjustments for where land use and realty allocations are applied. Given the relatively minor shift in PHMA (-0.5 percent) and GHMA (+0.5 percent), these changes would not result in discernible differences from the No-Action Alternative. The decrease in OHMA (-17 percent) would have negligible impacts on land use and realty, as no allocation decisions are tied to OHMA; therefore, the difference between the nature and type of impacts described would be negligible. These impacts are discussed in Section 4.13 of the 2015 Final EIS (BLM 2015).

The Management Alignment Alternative proposes to update the habitat management area boundaries for PHMA, GHMA, and OHMA to reflect the best available science, and outlines a process for periodically revising these boundaries in the future, as new data becomes available. The land use plan allocations associated with each habitat management area (**Table 2-2**) would be adjusted to match the newest habitat management area boundaries (Coates et al. 2016). The allocation exception process would be updated and standardized, as described in **Table 2-2**, to allow for the consideration of projects within habitat management areas, provided they meet the prescribed criteria.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004821

Adaptive management hard and soft triggers would be updated as summarized and described in **Table 2-2** and **Appendix D**. The mitigation standard (net conservation gain) would be retained in the Management Alignment Alternative (and the No-Action Alternative), with additional clarification regarding implementation provided in **Appendix F**. Seasonal timing restrictions and modifying habitat objectives would be addressed in coordination with the USGS, NDOW, CDFW, USFWS, and others as described in **Table 2-2**. SFAs would not be designated under this alternative and therefore not recommended for withdrawal from the Mining Law of 1872; however, they would still be managed according to their underlying habitat management area designation and associated allocations and management decisions (e.g., PHMA).

4.7.3 Impacts of the Proposed Plan Amendment

Adopting the changes in the Proposed Plan Amendment would result in similar impacts to land use and realty resources as described in section 4.7.2 for the Management Alignment Alternative. The slight adjustments made between the Management Alignment Alternative and the Proposed Plan Amendment regarding adaptive management and seasonal timing restrictions would have no measurable effects to the land use and realty program.

[Mitigation analysis pending Department of the Interior direction]

4.8 Impacts on Renewable Energy Resources

4.8.1 Impacts of the No-Action Alternative with the Inclusion of SFAs (No-Action Alternative)

The designation of SFAs would be specific to recommending lands for withdrawal from the Mining Law of 1872. Because this would not alter the underlying allocations for renewable energy resources associated with Greater Sage-Grouse habitat management areas, the nature and type of effects on renewable energy resources described in Section 4.14.10 of the Final EIS (BLM 2015) would be the same as under this alternative.

4.8.2 Impacts of Management Alignment Alternative

Adopting the changes proposed in the Management Alignment Alternative would result in slight boundary adjustments for where renewable energy allocations are applied. Given the relatively minor shift in PHMA (-0.5 percent) and GHMA (+0.5 percent), these changes would not result in discernible differences from the No-Action Alternative. The decrease in OHMA (-17 percent) would make additional areas available for solar development, but this is not expected to result in increased development proposals based on the reasonably foreseeable development scenarios discussed in the 2015 Final EIS.

Therefore, the difference between the nature and type of impacts described would not be discernable without specific, new applications or project proposals, regarding development in those areas. These impacts are discussed in Section 4.14 of the 2015 Final EIS (BLM 2015).

The Management Alignment Alternative proposes to update the habitat management area boundaries for PHMA, GHMA, and OHMA to reflect the best available science, and outlines a process for periodically revising these boundaries in the future, as new data becomes available. The land use plan allocations associated with each habitat management area (**Table 2-2**) would be adjusted to match the newest habitat management area boundaries (Coates et al. 2016). The allocation exception process would be updated

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004822

and standardized, as described in **Table 2-2**, to allow for the consideration of projects within designated habitat management areas, provided they meet prescribed criteria.

Adaptive management hard and soft triggers would be updated as summarized and described in **Table 2-2** and **Appendix D**. The mitigation standard (net conservation gain) would be retained in the Management Alignment Alternative (and the No-Action Alternative), with additional clarification regarding implementation provided in **Appendix F**. Seasonal timing restrictions and modifying habitat objectives would be addressed in coordination with the USGS, NDOW, CDFW, USFWS, and others as described in **Table 2-2**. SFAs would not be designated under this alternative and therefore not recommended for withdrawal from the Mining Law of 1872; however, they would still be managed according to their underlying habitat management area designation and associated allocations and management decisions (e.g., PHMA).

4.8.3 Impacts of the Proposed Plan Amendment

Adopting the changes in the Proposed Plan Amendment would result in similar impacts to renewable energy resources as described in section 4.8.2 for the Management Alignment Alternative. The slight adjustments made between the Management Alignment Alternative and the Proposed Plan Amendment regarding adaptive management and seasonal timing restrictions would have no measurable effects to renewable energy resources.

[Mitigation analysis pending Department of the Interior direction]

4.9 Impacts on Minerals and Energy

4.9.1 Impacts of the No-Action Alternative with the Inclusion of SFAs (No-Action Alternative)

The nature and type of effects on leasable minerals (geothermal and oil and gas), salable minerals, and solid (nonenergy) leasable minerals as described in Section 4.15.10 of the Final EIS (BLM 2015) would be the same. The inclusion of SFAs would be specific to recommending lands for withdrawal from the Mining Law of 1872, which would not affect the land use allocations associated with leasable minerals.

The withdrawal of 2,767,552 acres of BLM-administered lands in Nevada from the Mining Law of 1872 for a period of 20 years would reduce the estimated number of future mines and exploration projects in the state (BLM 2016). Because this withdrawal would not apply to valid existing rights, the designation of SFAs is only expected to reduce the number of new mines from three down to one during the initial 20-year withdrawal. As identified in Table 4-7 of the Sagebrush Focal Areas Withdrawal Draft Environmental Impact Statement (BLM 2016), exploration projects would see a sharper decline with the inclusion of SFAs, dropping from an estimated 78 new projects down to 32 during the initial 20-year withdrawal.

When compared with the Management Alignment Alternative, which does not include SFAs, the withdrawal of 2,767, 552 acres to locatable minerals would reduce access and availability of geology and mineral resources in Nevada because the number of new mines would be reduced by 33 percent and the number of exploration projects would be reduced by 41 percent (BLM 2016). The reduction in mining activity would also result in socioeconomic impacts, which are discussed below in **Section 4.10.1**.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004823

4.9.2 Impacts of Management Alignment Alternative

Adopting the changes proposed in the Management Alignment Alternative would result in slight boundary adjustments for where minerals and energy allocations are applied. Given the relatively minor shift in PHMA (-0.5 percent) and GHMA (+0.5 percent), these changes would not result in discernible differences from the No-Action Alternative. The decrease in OHMA (-17 percent) would be negligible, as no allocation decisions are tied to OHMA; therefore, the difference between the nature and type of impacts described would be negligible. These impacts are discussed in Section 4.15 of the 2015 Final EIS (BLM 2015).

The Management Alignment Alternative proposes to update the Greater Sage-Grouse habitat management area boundaries for PHMA, GHMA, and OHMA to reflect the best available science, and outlines a process for periodically revising these boundaries in the future, as new data becomes available. The land use plan allocations associated with each habitat management area (**Table 2-2**) would be adjusted to match the newest habitat management area boundaries (Coates et al. 2016). The allocation exception process would be updated and standardized, as described in **Table 2-2**, to allow for the consideration of projects within Greater Sage-Grouse habitat management areas, provided they meet prescribed criteria.

Adaptive management hard and soft triggers would be updated as summarized and described in **Table 2-2** and **Appendix D**. The mitigation standard (net conservation gain) would be retained in the Management Alignment Alternative (and the No-Action Alternative), with additional clarification regarding implementation provided in **Appendix F**.

Seasonal timing restrictions and modifying habitat objectives would be addressed in coordination with the USGS, NDOW, CDFW, USFWS, and others as described in **Table 2-2**. SFAs would not be designated under this alternative and therefore not recommended for withdrawal from the Mining Law of 1872; however, they would still be managed according to their underlying habitat management area designation and associated allocations and management decisions (e.g., PHMA).

4.9.3 Impacts of the Proposed Plan Amendment

Adopting the changes in the Proposed Plan Amendment would result in similar impacts to minerals and energy resources as described in section 4.9.2 for the Management Alignment Alternative. The slight adjustments made between the Management Alignment Alternative and the Proposed Plan Amendment regarding adaptive management and seasonal timing restrictions would have no measurable effects to the minerals and energy program.

[Mitigation analysis pending Department of the Interior direction]

4.10 Impacts on Socioeconomics

4.10.1 Impacts of the No-Action Alternative with the Inclusion of SFAs (No-Action Alternative)

The withdrawal of 2,767,552 acres of BLM-administered lands in Nevada from the Mining Law of 1872 for a period of 20 years would have additional socioeconomic impacts beyond those described in Section 4.21 and 4.22 of the Final EIS (BLM 2015). Based on the RFD scenario presented in the 2016 Sagebrush Focal Area DEIS, withdrawal would lead to broad economic impacts on the national and international mining

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004824

industry (BLM 2016). While extensive areas of BLM-administered lands in Nevada would remain open to mining, the mining industry could be adversely affected from having less potential locations to explore and develop.

The economic impacts in Nevada would differ considerably depending on whether the one new mine that was developed was a large gold/silver mine or a smaller barite mine. The best estimate is that future mines would support $133 million in annual output, 267 to 388 jobs, and between $20.5 and $35.7 million in annual labor income. Relative to the Management Alignment Alternative, which does not include SFAs, withdrawal would support between 414 to 739 fewer jobs in Nevada (primarily Elko, Humboldt, and Washoe Counties), and between $25.8 and $56.5 million less in annual labor income (BLM 2016).

SFA designation would also reduce the number of exploration projects from 78 to 32 based on RFD scenarios for Nevada. As a result, exploration expenditures would be expected to fall by approximately 41 percent (approximately $3.8 million, as opposed to $9.1 million; BLM 2016). The reduction in future mining operations could have tangible social impacts in Elko and Humboldt Counties. In particular, the potential reduction in future employment opportunities in the mining sector could lead to an increase in future unemployment and/or potential future out migration of some of the workers in that sector. Intangible social impacts from the SFA designation could be larger than the tangible social impacts, particularly outside of Elko and Humboldt Counties.

4.10.2 Impacts of Management Alignment Alternative

Adopting the changes proposed in the Management Alignment Alternative, and not recommending SFAs for withdrawal, could lead to a corresponding increase in populations and employment for the counties that would see new mine development. Within the analysis area, the projected economic impacts from operation of future mines would result in 801 jobs, a labor income of $62 million, and approximately $12 million in state/local tax revenue. With the exception of not including SFAs, the difference between the nature and type of impacts described would be negligible given the similarity of the proposed management actions. These impacts are discussed in Section 4.21 of the 2015 Final EIS (BLM 2015) and 4.3.6 of the 2016 SFA DEIS (BLM 2016).

The Management Alignment Alternative proposes to update the habitat management area boundaries for PHMA, GHMA, and OHMA to reflect the best available science, and outlines a process for periodically revising these boundaries in the future, as new data becomes available. The land use plan allocations associated with each habitat management area (**Table 2-2**) would be adjusted to match the newest habitat management area boundaries (Coates et al. 2016). The allocation exception process would be updated and standardized, as described in **Table 2-2**, to allow for the consideration of projects within Greater Sage-Grouse habitat management areas, provided they meet prescribed criteria.

Adaptive management hard and soft triggers would be updated as summarized and described in **Table 2-2** and **Appendix D**. The mitigation standard (net conservation gain) would be retained in the Management Alignment Alternative (and the No-Action Alternative), with additional clarification regarding implementation provided in **Appendix D** (Adaptive Management).

Seasonal timing restrictions and modifying habitat objectives would be addressed in coordination with the USGS, NDOW, CDFW, USFWS, and others as described in **Table 2-2**. SFAs would not be designated under this alternative and therefore not recommended for withdrawal from the Mining Law of 1872;

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004825

however, they would still be managed according to their underlying habitat management area designation and associated allocations and management decisions (e.g., PHMA).

4.10.3 Impacts of the Proposed Plan Amendment

Adopting the changes in the Proposed Plan Amendment would result in similar impacts to socioeconomics across the sub-region as described in section 4.10.2 for the Management Alignment Alternative. The slight adjustments made between the Management Alignment Alternative and the Proposed Plan Amendment regarding adaptive management and seasonal timing restrictions would be beneficial to state and local economies, as state and local administrative functions (in consultation with NDOW and/or CDFW) may be permitted to move forward with shortened and/or waived seasonal timing restrictions, thus allowing these projects to occur in a more expeditious manner. In addition, threats to sage grouse habitat would be addressed in a more collaborative and expeditious manner based on the refinements outlined in the adaptive management strategy (Appendix D), which would benefit local economies that are impacted by threats such as fire and invasives.

[Mitigation analysis pending Department of the Interior direction]

4.11 Impacts on Livestock Grazing

4.11.1 Impacts of the No-Action Alternative with the Inclusion of SFAs (No-Action Alternative)

The designation of SFAs would be specific to recommending lands for withdrawal from the Mining Law of 1872. Because this would not alter the underlying allocations for livestock grazing associated with Greater Sage-Grouse habitat management areas, the nature and type of effects on livestock grazing described in Section 4.10.10 of the Final EIS (BLM 2015) would be the same as under this alternative.

4.11.2 Impacts of Management Alignment Alternative

Despite minor differences between the actions described in the Management Alignment Alternative and those analyzed in the 2015 Final EIS, the difference between the nature and type of impacts described would be negligible. These impacts are discussed in Section 4.10 of the 2015 Final EIS (BLM 2015).

The Management Alignment Alternative proposes to update the habitat management area boundaries for PHMA, GHMA, and OHMA to reflect the best available science, and outlines a process for periodically revising these boundaries in the future, as new data becomes available. The land use plan allocations associated with each habitat management area (**Table 2-2**) would be adjusted to match the newest habitat management area boundaries (Coates et al. 2016). The allocation exception process would be updated and standardized, as described in **Table 2-2**, to allow for the consideration of projects within designated habitat management areas, provided they meet prescribed criteria.

Adaptive management hard and soft triggers would be updated as summarized and described in **Table 2-2** and **Appendix D**. The mitigation standard (net conservation gain) would be retained in the Management Alignment Alternative (and the No-Action Alternative), with additional clarification regarding implementation provided in **Appendix F**.

Seasonal timing restrictions and modifying habitat objectives would be addressed in coordination with the USGS, NDOW, CDFW, USFWS, and others as described in **Table 2-2**. SFAs would not be designated

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004826

under this alternative and therefore not recommended for withdrawal from the Mining Law of 1872; however, they would still be managed according to their underlying habitat management area designation and associated allocations and management decisions (e.g., PHMA).

4.11.3 Impacts of the Proposed Plan Amendment

Adopting the changes in the Proposed Plan Amendment would result in similar impacts to livestock grazing as described in section 4.11.2 for the Management Alignment Alternative. The slight adjustments made between the Management Alignment Alternative and the Proposed Plan Amendment regarding adaptive management and seasonal timing restrictions would have no measurable effects to the livestock grazing program.

[Mitigation analysis pending Department of the Interior direction]

4.12 Impacts on Comprehensive Travel Management

4.12.1 Impacts of the No-Action Alternative with the Inclusion of SFAs (No-Action Alternative)

The designation of SFAs would be specific to recommending lands for withdrawal from the Mining Law of 1872. Because this would not alter the underlying allocations for travel and transportation management associated with Greater Sage-Grouse habitat management areas, the nature and type of effects on travel and transportation management described in Section 4.12.10 of the Final EIS (BLM 2015) would be the same as under this alternative.

4.12.2 Impacts of Management Alignment Alternative

Adopting the changes proposed in the Management Alignment Alternative would result in slight boundary adjustments for where travel and transportation allocations are applied. Given the relatively minor shift in PHMA (-0.5 percent) and GHMA (+0.5 percent), these changes would not result in discernible differences from the No-Action Alternative. The decrease in OHMA (-17 percent) would have negligible impacts on Comprehensive Travel Management, as no allocation decisions are tied to OHMA; therefore, the difference between the nature and type of impacts described would be negligible. These impacts are discussed in Section 4.12 of the 2015 Final EIS (BLM 2015).

The Management Alignment Alternative proposes to update the habitat management area boundaries for PHMA, GHMA, and OHMA to reflect the best available science, and outlines a process for periodically revising these boundaries in the future, as new data becomes available. The land use plan allocations associated with each habitat management area (**Table 2-2**) would be adjusted to match the newest habitat management area boundaries (Coates et al. 2016). The allocation exception process would be updated and standardized, as described in **Table 2-2**, to allow for the consideration of projects within habitat management areas, provided they meet the prescribed criteria.

Adaptive management hard and soft triggers would be updated as summarized and described in **Table 2-2** and **Appendix D**. The mitigation standard (net conservation gain) would be retained in the Management Alignment Alternative (and the No-Action Alternative), with additional clarification regarding implementation provided in **Appendix F**. Seasonal timing restrictions and modifying habitat objectives would be addressed in coordination with the USGS, NDOW, CDFW, USFWS, and others as described in **Table 2-2**. SFAs would not be designated under this alternative and therefore not recommended for

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004827

withdrawal from the Mining Law of 1872; however, they would still be managed according to their underlying habitat management area designation and associated allocations and management decisions (e.g., PHMA).

4.12.3 Impacts of the Proposed Plan Amendment

Adopting the changes in the Proposed Plan Amendment would result in similar impacts to comprehensive travel management as described in section 4.12.2 for the Management Alignment Alternative. The slight adjustments made between the Management Alignment Alternative and the Proposed Plan Amendment regarding adaptive management and seasonal timing restrictions would have no measurable effects to the comprehensive travel management program.

[Mitigation analysis pending Department of the Interior direction]

4.13 Cumulative Effects Analysis

This section presents the anticipated cumulative impacts on the environment that could occur from implementing the alternatives presented in **Chapter 2**. A cumulative impact is the impact on the environment that results from the incremental impact of the action, when added to other past, present, and reasonably foreseeable future actions, regardless of what agency (federal or nonfederal) or person undertakes such actions.

Cumulative impacts can result from individually minor, but collectively significant actions taking place over time. The cumulative impacts resulting from the implementation of the alternatives in this RMPA/EIS may be influenced by other actions, as well as activities and conditions on other public and private lands, including those beyond the planning area boundary. These include the concurrent Forest Service planning effort to amend land management plans for National Forests in Idaho, Montana, Nevada, Utah, Colorado, and Wyoming, which were previously amended in September 2015 to incorporate conservation measures to support the continued existence of the Greater Sage-Grouse. As a result, the sum of the effects of these incremental impacts involves determinations that often are complex, limited by the availability of information, and, to some degree, subjective.

This RMPA/EIS incorporates by reference the analysis in the 2015 Final EIS and the 2016 SFA Withdrawal Draft EIS, which comprehensively analyzed the cumulative impacts associated with these planning decisions under consideration in that process. The 2015 and 2016 EISs evaluated the cumulative impacts associated with the No-Action Alternative in this RMPA/EIS. The Management Alignment Alternative's effects are within the range of effects analyzed by the 2015 and 2016 EISs. The 2015 Final EIS is quite recent, and conditions in the Nevada and California Sub-region have not changed significantly based on, in part, the USGS science review (see **Chapter 3**), as well the BLM's review of additional past, present, and reasonably foreseeable actions in 2018. Conditions on public land have changed little since the 2015 Final EIS, and the projections that were made regarding reasonably foreseeable future actions remain reasonable. Additionally, changes that have occurred on a smaller level, like local wildfires, received prompt responses. Since the nature and context of the cumulative effects scenario has not appreciably changed since 2015, and the 2015 analysis covered the entire range of the Greater Sage-Grouse, the cumulative effects analysis in the 2015 Final EIS applies to this planning effort and provides a foundation for the BLM to identify any additional cumulative impacts.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004828

582 **Table 4-4** shows the resource and location of applicable cumulative effects analysis from 2015 Final EIS.
583 Unless otherwise addressed in this chapter, the cumulative effects of the alternatives analyzed in this Draft
584 RMPA/EIS are covered by the 2015 Final EIS and the 2016 SFA Withdrawal Draft EIS. This includes the
585 incremental impacts across the range of BLM- and Forest Service-administered lands being amended in
586 concurrent plan amendment efforts. See the 2015 Final EIS for additional information.

Table 4-4
Cumulative Effects Analysis Incorporated by Reference

Resource Topic	Location of Cumulative Effects Analysis and Updated Impacts Analysis
Greater Sage-Grouse	Chapter 5, Section 5.1 of the 2015 Final EIS and Chapter 4 of the 2016 SFA Withdrawal DEIS, Section 4.5.9. Additional information regarding Greater Sage-Grouse is included in Chapter 4, Section 4.5 of this RMPA/EIS.
Vegetation and Soils	Chapter 5, Section 5.4 of the 2015 Final EIS and Chapter 4 of the 2016 SFA Withdrawal DEIS, Section 4.4.9. Additional information regarding Vegetation and Soils is included in Chapter 4, Section 4.6 of this RMPA/EIS.
Land Use and Realty	Chapter 5, Section 5.12 of the 2015 Final EIS. Additional information regarding Land Use and Realty is included in Chapter 4, Section 4.7 of this RMPA/EIS.
Renewable Energy	Chapter 5, Section 5.13 of the 2015 Final EIS. Additional information regarding Renewable Energy is included in Chapter 4, Section 4.8 of this RMPA/EIS.
Minerals and Energy	Chapter 5, Section 5.14 of the 2015 Final EIS and Chapter 4 of the 2016 SFA Withdrawal DEIS, Section 4.2.9. Additional information regarding Minerals and Energy is included in Chapter 4, Section 4.9 of this RMPA/EIS.
Socioeconomics	Chapter 5, Section 5.19 of the 2015 Final EIS and Chapter 4 of the 2016 SFA Withdrawal DEIS, Section 4.3.13. Additional information regarding Socioeconomics is included in Chapter 4, Section 4.10 of this RMPA/EIS.
Livestock Grazing	Chapter 5, Section 5.9 of the 2015 Final EIS. Additional information regarding Livestock Grazing is included in Chapter 4, Section 4.11 of this RMPA/EIS.
Comprehensive Travel Management	Chapter 5, Section 5.11 of the 2015 Final EIS. Additional information regarding Comprehensive Travel Management is included in Chapter 4, Section 4.12 of this RMPA/EIS.

587

588 At the regional scale, WAFWA Greater Sage-Grouse management zones and responsible BLM offices
589 include I (Great Plains: BLM Montana and Wyoming), II (Wyoming Basins: BLM Wyoming, Colorado, and
590 Utah), III (Southern Great Basin: BLM Nevada, Northeastern California, and Utah), IV (Snake River Plain:
591 BLM Idaho, Oregon, Nevada, Colorado, Utah, and Montana), V (Northern Great Basin: BLM Oregon,
592 Northeastern California, and Nevada), VI (Columbia Basin: BLM Oregon), and VII (Colorado Plateau:
593 BLM Northwest Colorado and Utah). These zones are an important resource for Greater Sage-Grouse
594 management; and at a regional scale, the following projects are past, present, and reasonably foreseeable
595 that cumulatively effect one or more of the WAWFA management zones. For Nevada and northeastern
596 California, those actions in WAFWA Zones III, IV, and V, which overlap Utah, Idaho, Oregon, and
597 Colorado, would have the greatest potential to contribute to cumulative effects. Note that not all of the
598 projects listed for Utah, Idaho, Oregon, and Colorado are in WAFWA Zones III, IV, and V, and so may
599 not contribute to cumulative effects.

600 Further, the entire sum of past, present, and reasonably foreseeable actions listed below represent
601 cumulative effects across the range of Greater Sage-Grouse habitat and management areas. These
602 effects are important to consider for future management of the species as a whole and are not solely

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004829

being analyzed at the local or state level. That is why all ongoing BLM RMPAs/EISs refer to every past, present, and reasonably foreseeable action across all states undergoing a plan amendment.

Wildland fire and invasive species remain the greatest threat to Greater Sage-Grouse in the Great Basin. Between 2008 and 2017, wildfires burned an average of 900,000 acres per year in Greater Sage-Grouse habitat management areas range-wide[1]; this is within the range of projected wildland fire analyzed in the 2015 Final EIS. The BLM has committed resources to habitat restoration and has treated 1.4 million acres of Greater Sage-Grouse habitat range-wide over the past 5 years.

The increased flexibility in these proposed amendments can allow for responsible development of other uses in Greater Sage-Grouse habitat and may reduce costs to proponents but is not expected to result in a large increase in development proposals on public land. Similarly, the increased protections from the 2015 Final EIS have not resulted in a large decrease in ROW applications or an increase in rejected applications; therefore, the changes proposed under the Management Alignment Alternative and Proposed Plan Amendment are not expected to result in large changes to the rate of development in Nevada and northeastern California or in its economy.

Some 350 species of plants and wildlife rely on sagebrush steppe ecosystems and coexist with Greater Sage-Grouse and may be similarly affected by development or disturbance; however, nothing in the considered alternatives would lessen the BLM's authority or responsibility to provide for the needs of special status species, as described in BLM Land Use Plans, Policies, and Laws, including Manual 6840, the Endangered Species Act, and FLPMA. Increased flexibility for other uses within Greater Sage-Grouse habitat does not necessarily increase potential impacts on other wildlife or plant species. Site-specific NEPA analysis including an evaluation of impacts on special status species is required for on-the-ground projects within the planning area.

In addition to the analysis in the 2015 Final EIS in **Table 4-5**, other anticipated incremental impacts are discussed below in association with planning issues being analyzed in this RMPA/EIS.

Under the Management Alignment Alternative and Proposed Plan Amendment, habitat management area boundaries would be adopted or revised to incorporate the best available science (Coates et al. 2016). Because the underlying HMA allocations put in place to conserve Greater Sage-Grouse would not change, and these updates reflect the most recent knowledge concerning Greater Sage-Grouse habitat use and distribution, there would be no appreciable additive impact from the implementation of this aspect on Greater Sage-Grouse or the resources/uses analyzed herein.

Similarly, no appreciable additive impacts are anticipated from updating the adaptive management process as described in the Management Alignment Alternative and Proposed Plan Amendment. This update would ensure that the BLM is utilizing the best available science and decision support tools to guide management at the appropriate spatial scale, thus improving the BLM's assessment and response to ever-changing conditions that could affect Greater Sage-Grouse populations and/or habitat. Because any specific response to tripping a hard or soft trigger would be based on the causal factors responsible,

[1]Removing 2012 and 2017, which were above-average wildland fire years, the 8-year average is approximately 500,000 acres burned per year.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004830

presuming a specific response to unknown future conditions would be speculative at best and not reasonably foreseeable.

Under the Management Alignment Alternative and Proposed Plan Amendment, the allocation exception process would be updated to simplify the various exemptions contained in the 2015 Final EIS. While the availability of exceptions to land use plan allocations attached to PHMA and GHMA could increase the possibility of leasing, permitting, or ground-disturbing activities within a given HMA, the established criteria would ensure that projects are either in unsuitable Greater Sage-Grouse habitat; do not result in direct, indirect, or cumulative impacts on Greater Sage-Grouse; or can be offset, with the exception of those needed for public health and safety. Therefore, there would be no appreciable additive impact from the implementation of this action on Greater Sage-Grouse or the resources/uses analyzed herein, as compared with the No-Action Alternative.

Under the Management Alignment Alternative and Proposed Plan Amendment, the recommendation to withdraw SFAs from location and entry under the Mining Law of 1872 would be removed, as the EIS process considering the withdrawal was cancelled on October 11, 2017. In its 2016 SFA Withdrawal EIS, the BLM quantified the possible adverse effects from locatable mineral exploration and mining on the approximately 10 million acres of SFAs proposed for withdrawal, finding that they would be limited to approximately 9,000 acres of surface disturbance over 20 years, with approximately 0.58 percent of Greater Sage-Grouse male birds affected per year. The other action alternatives evaluated in the 2016 SFA Withdrawal EIS similarly demonstrated minimal benefit of the proposed withdrawal to Greater Sage-Grouse and its habitat.[2] The cumulative effects of implementing the Management Alignment Alternative are as described in the 2016 SFA Withdrawal EIS, under the No-Action Alternative, in which SFAs are not carried forward.

Under the Management Alignment Alternative and Proposed Plan Amendment, language would be added to clarify how implementation-level decisions would be guided regarding mitigation, seasonal timing restrictions, and modifying habitat objectives to better align with state conservation plans and management strategies. As these updates did not result in any new identifiable direct or indirect impacts, there would be no appreciable additive impact from the implementation of this aspect on Greater Sage-Grouse or the resources/uses analyzed herein, as compared with the No-Action Alternative.

[Note to cooperators: Table 4-5 *Range-Wide Impacts from Past, Present, and Reasonably Foreseeable Actions* did not include any proposed changes between draft and final and will be placed into an appendix in the FEIS. Also, once the Range-Wide WAFWA Management Zone Cumulative Effects Analysis is completed it will be inserted here with referenced appendices for more information.]

[2]Importantly, mining operations that do occur are subject to regulation under the BLM's surface management regulations at 43 CFR Part 3809. These regulations ensure that operators comply with environmental standards in conducting exploration, mining, and reclamation. For example, the BLM must approve a plan of operations for locatable mining operations on public lands, which includes compliance with the National Environmental Policy Act, National Historic Preservation Act, and Endangered Species Act. Plans of operation must also include those measures to meet specific performance standards and to prevent unnecessary or undue degradation of the lands (43 CFR 3809.411).

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004831

4.14 Irreversible and Irretrievable Commitment of Resources

Section 102(2)(C) of NEPA requires a discussion of any irreversible or irretrievable commitments of resources from an alternative, should it be implemented. An irreversible commitment of a resource is one that cannot be reversed, such as the extinction of a species or loss of a cultural resource site without proper documentation. An irretrievable commitment of a resource is one in which the resource or its use is lost for a period of time, such as extraction of oil and gas.

Should oil and gas deposits underlying Greater Sage-Grouse habitat be extracted, that oil and gas resource would be lost.

4.15 Unavoidable Adverse Impacts

Section 102(C) of the NEPA requires disclosure of any adverse environmental impacts that could not be avoided should the proposal be implemented. Unavoidable adverse impacts are those that remain following the implementation of mitigation measures, or impacts for which there are no mitigation measures. Some unavoidable adverse impacts happen from implementing the RMPA/EIS; others are a result of public use of BLM-administered lands in the planning area.

This section summarizes major unavoidable impacts discussions of the impacts of each management action (in the discussion of alternatives) and provides greater information on specific unavoidable impacts.

Surface-disturbing activities would result in unavoidable adverse impacts. Although these impacts would be mitigated to the extent possible, unavoidable damage would be inevitable under both the No-Action Alternative and the Management Alignment Alternative.

Impacts from permanent conversion of areas to other uses, such as transportation and mineral and energy development or OHV use, would be greater under the Management Alignment Alternative, but overall minimal for both alternatives. Both the No-Action Alternative and the Management Alignment Alternative would place restrictions on many types of development, which would most likely result in fewer visual intrusions and fewer instances of unavoidable wildlife habitat loss.

Wildlife, livestock, wild horses and burros, and other herbivores consume vegetation and affect soils through hoof action and possible compaction. When these impacts are kept at appropriate levels, natural processes such as plant growth and recovery, freeze-thaw periods, and microbial activity in the soil surface result in recovery from these impacts and maintain site stability and health. Vegetation treatments promoting recovery of Greater Sage-Grouse habitats would result in the destruction of the target species, be it annual grass, noxious weed, or encroachment of juniper. Some level of competition for forage between wildlife, livestock, and wild horses would occur. Instances of displacement, harassment, and injury to these species could also occur. Both the No-Action Alternative and the Management Alignment Alternative would place restrictions on development and surface-disturbing activities, which would minimize the likelihood of displacement, harassment, and/or injury.

Development of mineral resources and general use of the decision area would introduce additional ignition sources into the planning area, which would increase the probability of wildland fire and the need for its suppression. These activities, combined with continued fire suppression, would also affect the overall composition and structure of vegetation communities; this could increase the potential for high-intensity wildland fires. Restrictions on development under both alternatives would be expected to decrease the

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004832

potential for ignitions in the decision area; however, impacts would be greater under the No-Action Alternative.

Numerous land use restrictions imposed throughout the decision area to protect Greater Sage-Grouse habitat and other important values, by their nature, affect the ability of operators, individuals, and groups who use the public lands to do so without limitations. Although attempts would be made to minimize these impacts, unavoidable adverse impacts could occur under the No-Action Alternative or the Management Alignment Alternative.

4.16 Relationship Between Local Short-Term Uses and Long-Term Productivity

Section 102(C) of NEPA requires a discussion of the relationship between local, short-term uses of human environment and the maintenance and enhancement of long-term productivity of resources. As described in the introduction to this chapter, short term is defined as anticipated to occur within the first 5 years of implementation of the activity and long term as lasting beyond 5 years to the end of or beyond the life of this RMPA/EIS.

Surface-disturbing activities, including transportation and utility corridor construction, and mineral resource development would result in the greatest potential for impacts on long-term productivity. Management prescriptions and required design features (RDFs) are intended to minimize the effect of short-term commitments and to reverse change over the long term. These prescriptions and the associated reduction of impacts would be greater under the No-Action Alternative for resources such as vegetation and wildlife habitat; however, some impacts on long-term productivity might occur, despite the prescriptions intended to reduce impacts on Greater Sage-Grouse and its habitat.

Rights of ways (ROWs) and short-term use of an area to foster energy and mineral development would result in long-term loss of soil productivity and vegetation diversity. Impacts would persist as long as surface disturbance and vegetation loss continue. In general, the loss of soil productivity would be directly at the point of disturbance; even so, long-term vegetation diversity and habitat value could be reduced due to fragmentation and the increased potential for invasive species to spread from the developments or disturbances. Both the No-Action Alternative and the Management Alignment Alternative would provide for long-term productivity through restrictive allocations that limit development in many areas and through the application of other restrictions on development, such as disturbance caps, RDFs, and other management prescriptions.

ROWs and the short-term use of Greater Sage-Grouse habitat for energy and mineral development could impair the long-term productivity of Greater Sage-Grouse and its habitat and that of other species. This would occur by displacing species from primary habitats and removing components of these habitats that might not be restored for 20 years or longer. These short-term uses could also affect the long-term sustainability of some special status species. The potential for these impacts, however, would be minimal under both the No-Action Alternative and the Management Alignment Alternative. The short-term resource uses associated with mineral development (oil and gas seismic exploration, natural gas test well drilling, and the noise associated with these activities) would have adverse impacts on the long-term productivity of Greater Sage-Grouse and its habitat. This would be the case if these resource uses were to infringe on Greater Sage-Grouse seasonal habitats such as nesting, brood-rearing, and winter habitats.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004833

751 These activities, though short-term individually, could have collective long-term impacts on Greater Sage-
752 Grouse and its habitat if they were to increase in the long term.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004834

Chapter 3. Affected Environment

3.1 Introduction

The purpose of this chapter is to describe the existing biological, physical, and socioeconomic characteristics of the planning area, including human uses that could be affected by implementing the alternatives described in **Chapter 2**. The affected environment provides the context for assessing potential impacts described in **Chapter 4**. The resource topics included in this chapter reflect those in **Table 1-2** as corresponding to an issue carried forward for detailed analysis in the 2015 Final EIS.

The geographic extent of this environmental analysis is the same as that in the 2015 Final EIS. The BLM acknowledges that there have been changes to the landscape since 2015; however, due to the scale of this analysis covering 45,359,000 acres of BLM-administered lands, data collected consistently across the range indicate that the extent of these changes to the landscape are relatively minimal. For example, BLM monitoring data collected and analyzed annually at the biologically significant unit (BSU) scale, as outlined in the Greater Sage-Grouse Monitoring Framework (Appendix D of the 2015 ROD/ARMPA), indicates that there has been a minimal overall increase in estimated disturbance of less than one percent from 2015 through 2017 of PHMA within BSUs. It is also important to note that consistent with the 2015 ARMPA, any discretionary actions contributing to anthropogenic disturbance were required to comply with the mitigation hierarchy of avoid, minimize, and compensate to achieve a net conservation gain.

Estimates of habitat management areas burned for 2016 and 2017 indicate a sharp increase in potential habitat availability loss during 2017, compared with previous fire seasons (**Sections 3.1.1** and **3.4**, below).

Actions since the 2015 Final EIS were authorized consistent with that document. The BLM would continue to implement the decisions in the 2015 Final EIS, unless those decisions are amended.

Acreage figures and other numbers were approximated using geographic information systems (GIS) technology; they do not reflect exact measurements or precise calculations.

3.1.1 Greater Sage-Grouse Literature, 2015–2018

As part of the consideration of whether to amend some, all, or none of the 2015 Greater Sage-Grouse land use plans, the BLM requested the USGS to inform the effort through the development of an annotated bibliography of Greater Sage-Grouse science published since January 2015 (Carter et al. 2018)[1] and a report that synthesized and outlined the potential management implications of this new science (Hanser et al. 2018).[2]

Following the 2015 plans, the scientific community has continued to improve the knowledge available to inform implementation of management actions and an overall understanding of Greater Sage-Grouse populations, their habitat requirements, and their response to human activity. The report discussed the science related to six major topics identified by USGS and BLM (summarized below), as follows:

- Multiscale habitat suitability (habitat objectives) and mapping tools

[1] Available online: https://doi.org/10.3133/ofr20181008
[2] Available online: https://doi.org/10.3133/ofr20181017

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004835

- Discrete human activities
- Diffuse activities
- Fire and invasive species
- Restoration effectiveness
- Population estimation and genetics

Multiscale Habitat Suitability (Habitat Objectives) and Mapping Tools

Since the 1950s, biologists have worked to develop a set of site-scale vegetation indicators to inform habitat management, including the collection and analysis of Greater Sage-Grouse habitat use, nest success, and population trends relative to vegetation condition (Patterson 1952; Sveum et al. 1998a, 1998b; Connelly et al. 2000b; Holloran et al. 2005; Hagen et al. 2007; Kolada et al. 2009; Kaczor et al. 2011).

The existing state of knowledge for Greater Sage-Grouse habitat use at the site scale has been described and synthesized (Connelly et al. 2000, 2011; Hagen et al. 2007; Stiver et al. 2015). This information was included in the Habitat Objectives table in the 2015 Final EIS (BLM 2015). The science developed since 2015 largely corroborates the knowledge prior to 2015 regarding Greater Sage-Grouse habitat selection.

Improvements at the site scale facilitate a better understanding that indicates the potential need for a reevaluation of the existing habitat objective indicators and associated values (Hanser et al. 2018, p. 2). The BLM has completed a plan maintenance action whereby the agency has clarified its ability to modify the habitat objective indicator values based upon the best available local science.

Some of the science that was developed since 2015 that may require reevaluation and incorporation in the Habitat Objectives for Greater Sage-Grouse is the following:

The importance of mesic habitats for Greater Sage-Grouse brood-rearing identified in western Nevada, eastern California, and southeastern Oregon (Donnelly et al. 2016).

- Big and other sagebrush were important for Greater Sage-Grouse, but the species of sagebrush shrub usually varied across life stages within Nevada and northeastern California (Coates et al. 2016c). Additionally, this study found selection for upland mesic sites during the brood-rearing season and general avoidance of landscapes dominated by nonnative annual grass across all seasons (Coates et al. 2016c).
- Nesting and late brood-rearing microhabitat selection and linkages to survival were quantified in xeric and mesic regions of the Great Basin (primarily Nevada; Coates et al. 2017a). All vegetation measurements were phenologically corrected (Gibson et al. 2016a), and the authors found strong selection and positive survival for high horizontal cover and total shrub cover during nesting and late brood-rearing across all sites. Indicator values for grass height need to be examined to ensure they have not been derived from studies using vegetation data collected at different times for successful and unsuccessful nests without applying correction factors and are geographically appropriate. Results from this study also provide more targeted guidelines for Greater Sage-Grouse microhabitat in Nevada and California, compared with broader range-wide guidelines published previously (Connelly et al. 2000).

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004836

- Adult females in areas impacted by wildfire 10 years prior tended to use other shrubs for nesting cover, suggesting that other shrub species might need to be considered in evaluations of fire-affected environments (Lockyer et al, 2015; Coates et al. 2017a).
- Hens and broods avoided pinyon-juniper by at least 68 meters in Nevada and California (Coates et al. 2016a).
- A model concluded hens and broods avoided edges with trees (conifers or willows) in late brood-rearing habitats (Westover et al. 2016).

The BLM has completed a plan maintenance action, whereby the agency has clarified its ability to modify the habitat objective indicator values based upon local, site-specific information.

Mapping Tools

Advances in modeling and mapping techniques at the range-wide scale can help inform broad-scale habitat assessment, allocations, and targeting of land management resources to benefit Greater Sage-Grouse conservation. The 2015 Final EIS included the 2014 version of the "Spatially explicit modeling of Greater Sage-Grouse (*Centrocercus urophasianus*) habitat in Nevada and northeastern California—A decision-support tool for management" (USGS Open-File Report 2014-1163) to delineate Greater Sage-Grouse habitat management areas within the planning area.

In 2016, the USGS updated the 2014 decision support tool, as follows:

- Adding radio and GPS telemetry locations from Greater Sage-Grouse monitored at multiple sites during 2014 to the original location dataset beginning in 1998;
- Integrating high resolution maps of sagebrush and pinyon and/or juniper cover;
- Modifying the spatial extent of the analyses to match newly available vegetation layers;
- Accounting for differences in habitat availability between mesic sagebrush steppe communities in the northern part of the study area and drier Great Basin sagebrush in southerly regions;
- Deriving updated land management categories and an updated index of Greater Sage-Grouse abundance and space-use;
- Masking urban footprints and major roadways out of the final map products.

Based on continued efforts to refine and improve Greater Sage-Grouse habitat mapping and incorporate the best available science, the BLM is considering adopting the updated 2016 spatially explicit model (USGS Open-File Report 2016-1080), which was adopted by the State of Nevada and recommended for adoption by the State of California. This was done to update delineations for Greater Sage-Grouse habitat management areas: PHMA, GHMA, and OHMA.

Discrete Anthropogenic Activities

The science developed since 2015 corroborates the knowledge prior to 2015 regarding the impact of discrete human activities on Greater Sage-Grouse. New science suggests that strategies to limit surface disturbance may be successful at limiting range-wide population declines, but they are not expected to reverse the declines, particularly where active oil and gas operations are present (Hanser et al. 2018, p. 2). This information may have relevance when considering the impact of changes to management actions designed to limit discrete disturbances.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004837

Diffuse Activities

The science developed since 2015 does not appreciably change the knowledge prior to 2015 regarding diffuse activities (e.g., livestock grazing, predation, hunting, wild horses and burros, fences, recreation); however, some study authors questioned current assumptions, provided refinements, or corroborated existing understanding. This information was considered when determining the scoping issues addressed in **Chapter 1**, **Section 1.5**.

Studies have shown that the effects of livestock grazing will vary with grazing intensity and season. Predation can be limiting to Greater Sage-Grouse populations in areas with overabundant predator numbers or degraded habitats. Application of predator control has potential short-term benefits in small, declining populations; however, reducing human subsidies may be necessary to generate long-term changes in raven numbers. This is because raven control has produced only short-term declines in local raven populations.

Refinements to the current hunting seasons used by state wildlife agencies may minimize potential effects on Greater Sage-Grouse populations, but none of the studies implicated current application of hunting seasons and timings as a plausible cause for Greater Sage-Grouse declines. Finally, no new insights into the effects of wild horses and burros, fence collision, or recreational activity on Greater Sage-Grouse have been developed (Hanser et al. 2018, p. 2).

Fire and Invasive Species

Science since 2015 indicates that wildfire will continue to threaten Greater Sage-Grouse through loss of available habitat, reductions in multiple vital rates, and declining population trends, especially in the western part of its range. The concepts of resilience after wildfire and resistance to invasion by nonnative annual grasses have been mapped across the sagebrush ecosystem using links to soil temperature and moisture regimes. These concepts inform restoration and management strategies and help prioritize application of Greater Sage-Grouse management resources (Hanser et al. 2018, p. 2).

Restoration Effectiveness

Since 2015, tools have been developed to help managers strategically place and design restoration treatments where they will have the greatest benefit for Greater Sage-Grouse. Conifer removal benefited Greater Sage-Grouse through increased female survival and nest and brood success.

Treatment methods and site potential can affect post-treatment vegetation characteristics. Sagebrush manipulation treatments seem to benefit Greater Sage-Grouse populations and brood-rearing habitat availability, but benefits may be limited to areas with high sagebrush cover at higher elevations and in mountain big sagebrush (*Artemisia tridentata vaseyana*) communities. Studies indicate that Greater Sage-Grouse populations did not benefit from, or were negatively affected by, prescribed fire and mechanical sagebrush removal treatments (Hanser et. al. 2018, p. 3). Restoration activities occur mainly at the implementation level, and the BLM maintains the flexibility to incorporate new tools in the agency's project planning for restoration actions.

Population Estimation and Genetics

The accuracy of estimating Greater Sage-Grouse populations has increased because of improved sampling procedures used to complete count surveys at leks and the development of correction factors for potential bias in lek count data. In addition, techniques to map Greater Sage-Grouse genetic structure at

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004838

multiple spatial scales has also improved. This genetic data is used in statistical models to increase understanding of how landscape features and configuration affect gene flow. This understanding emphasizes the importance of maintaining connectivity between populations to ensure genetic diversity and distribution (Hanser et al. 2018, p. 3). New information continues to affirm the BLM's understanding that Greater Sage-Grouse is a species that selects for large, intact landscapes and habitat patches.

3.2 Resources Affected

Per **Chapter 1** (see **Section 1.5**), the following resources may have potentially significant effects based on the actions considered in **Chapter 2**. **Table 3-1**, below, provides the location of baseline information in the 2015 Final EIS, and, where applicable, additional information contained in the Sagebrush Focal Area Withdrawal EIS (BLM 2016).

Table 3-1
Affected Environment Incorporated by Reference

Resource Topic	Location of Baseline Information
Greater Sage-Grouse and its Habitat	Chapter 3, Section 3.2 (Greater Sage-Grouse and Greater Sage-Grouse Habitat), pages 3-3 to 3-41 (BLM 2015) Chapter 3, Section 3.7 (Wildlife and Special Status Animals, including Greater Sage-Grouse), pages 3-139 to 3-180 (BLM 2016)
Vegetation (Including Invasive and Exotic Species and Noxious Weeds)	Chapter 3, Section 3.3 (Vegetation (Including Invasive and Exotic Species and Noxious Weeds)), page 3-41 to 3-57 (BLM 2015) Chapter 3, Section 3.6 (Vegetation, Including Special Status Plants), page 3-128 to 3-138 (BLM 2016)
Livestock Grazing	Chapter 3, Section 3.8, page 3-93 to 3-101 Livestock Grazing (BLM 2015)
Land Use and Realty	Chapter 3, Section 3.11 (Land Use and Realty), page 3-110 to 3-121 (BLM 2015)

Mineral Resources	Chapter 3, Section 3.13 (Mineral Resources), page 3-124 to 3-143 (BLM 2015) Chapter 3, Section 3.4 (Geology and Mineral Resources), page 3-2 to 3-8 (BLM 2016)
Socioeconomics	Chapter 3, Section 3.23 (Socioeconomics and Environmental Justice), page 3-193 to 3-231 (BLM 2015) Chapter 3, Section 3.5 (Social and Economic Conditions), page 3-9 to 3-127 (BLM 2016)
Comprehensive Travel Management	Chapter 3, section 3.10 (Comprehensive Travel and Transportation Management), page 3-104 to 3-110 (BLM 2015)

3.2.1 Resources Not Carried Forward for Analysis

The following resources and resource uses analyzed in the 2015 Final EIS were reviewed to determine if they could have potentially significant effects based on the actions considered in **Chapter 2**. Aligning BLM management with the State of Nevada's Conservation Plan and with the State of California's conservation strategies and incorporating new best available science and better balancing of multiple uses in regard to habitat management area mapping, adaptive management, mitigation, and seasonal timing restrictions would not substantially alter management direction or result in different outcomes. Because of this, no additional analysis was completed for the resources shown in **Table 3-2**, below; therefore, no new information on affected environment is provided.

3.3 GREATER SAGE-GROUSE AND ITS HABITAT

The existing condition of Greater Sage-Grouse in the planning area is described in the 2015 Final EIS in Section 3.2; therefore, except as otherwise expressly indicated by new or updated information contained in this section, the affected environment for Greater Sage-Grouse described in the 2015 Final EIS is hereby incorporated by reference.

Since 2015, the BLM and Forest Service have been implementing the Greater Sage-Grouse conservation measures outlined in the 2015 Final EIS. In addition to working with partners, such as NDOW, CDFW, and USGS, to monitor the status of Greater Sage-Grouse populations in the planning area, the BLM has also been tracking human disturbance, wildland fire, and reclamation/restoration efforts in Greater Sage-Grouse habitat management areas.

3.3.1 Greater Sage-Grouse Population Status

Management Zones

The Nevada and Northeastern California sub-regional planning area includes Greater Sage-Grouse habitat and populations in three management zones (MZs), as delineated by Western Association of Fish and Wildlife Agencies (WAFWA). The boundaries of these MZs were delineated based on their ecological and biological attributes, rather than on arbitrary political boundaries (Stiver et al. 2006). Vegetation found in each management zone is similar, and Greater Sage-Grouse and its habitat in these areas are likely to respond similarly to environmental factors and management actions.

MZs in the Nevada and Northeastern California sub-region are as follows:

- MZ III—Southern Great Basin (includes Utah, Nevada, and California)
- MZ IV—Snake River Plain (includes Idaho, Utah, Nevada, and Oregon)
- MZ V—Northern Great Basin (includes Oregon, California, and Nevada)

These MZs and their aggregate populations and subpopulations in the Nevada and Northeastern California sub-region are described in Table 3-5 and Figure 3-3 of the 2015 Nevada and Northeastern California Land Use Plan Amendments and Final EIS (BLM 2015).

As of 2017, there were 717 leks classified as active and 341 leks classified as inactive, as shown in **Table 3-3**, below.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004840

Table 3-3

South-central Oregon/North-central Nevada	39	22	61
Warm Springs Valley Nevada	6	0	6

Sources: NDOW, CDFW and WAFWA 2017

In a recent publication by USGS (Coates et al. 2017), data from monitored GSRG lek sites across Nevada and Northeastern California from 2000 to 2016 were used to estimate annual rates of change in Greater Sage-Grouse populations. As of 2016, populations across Nevada and Northeastern California have declined at an average rate of 3.86 percent annually over the last 17 years. This estimated rate of population decline corresponds to other estimates documented for Greater Sage-Grouse in the Great Basin (Garton et al. 2011; Coates et al. 2016).

Overall results indicate that localized fluctuations in lek attendance have occurred, but overall numbers of active and inactive leks have been relatively stable. Of all the MZs within the sub-region, MZ III had the most number of leks in decline.

3.4 Wildland Fire and Habitat Treatment

The wildland fire threat was discussed in the 2015 Final EIS (Section 3.2.3). From 2015 to 2017 there have been additional large-scale wildfires within the decision area (**Table 3-4**, below). These wildfires burned over 1.3 million acres HMAs. Approximately 358,000 acres in PHMA, 400,500 in GHMA and 373,000 in OHMA (. During that same time, approximately 175,546 acres in Greater Sage-Grouse habitat management areas have been treated to improve habitat for the species (see **Table 3-5** and **Table 3-6**).

Since the 2015 plan, more habitat in Greater Sage-Grouse habitat management areas has been lost to wildfire than has been gained through treatment; however, the BLM intends to implement more habitat improvements, per decisions in the 2015 Final EIS. Projects such as the Great Basin Ecosystem Strategy will further enhance the tools and priorities for implementing these activities. Under these projects, two programmatic EISs are being prepared for fuel breaks, fuels reduction, and rangeland restoration. See Wildland Fires, Section 3.7, from 2015 Final EIS for acres burned by decade.

224 ## 3.5 HUMAN DISTURBANCE

225 Human disturbance was discussed in the 2015 Final EIS (Section 3.2.4, Regional Context [Infrastructure]).
226 The BLM tracked human disturbance in PHMA from 2015 to 2017, in accordance with the Nevada and
227 Northeastern California Greater Sage-Grouse Approved Resource Management Plan Amendment Record
228 of Decision, Management Decision, Special Status Species 2 (BLM 2015, pgs. 2-6 to 2-8).

229 Human disturbance has incrementally increased over the Nevada and Northeastern California sub-region,
230 with the greatest percentage increase of 0.12 and an average across all of the BSUs of 0.01 percent. The
231 level of human disturbance in the Butte/Buck/White Pine BSU decreased by 62 acres (0.01 percent) during
232 this time. It is also important to note that consistent with the 2015 ARMPA, any discretionary actions
233 contributing to anthropogenic disturbance were required to comply with the mitigation hierarchy of avoid,
234 minimize, and compensate to achieve a net conservation gain.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004842

3.6 SOCIOECONOMICS

Since 2015, socioeconomic conditions in Nevada have changed to some degree. Income from non-service industries has fallen slightly, while service industry jobs and income have increased at a steady rate.

Many industry sectors remained mostly steady from 2014 to 2016, the most recent year for which verified data are available. For example, earnings from the mining industry, including fossil fuels, grew by slightly more than 1 percent during that period. In contrast, earnings from government (which includes federal, military, state, and local government employment, as well as government enterprise) grew by 6.1 percent; earnings from the medical and social assistance industries grew by 11.5 percent, and earnings from the construction industry increased by more than 26 percent from 2014 to 2016. Construction has been in recovery, after falling by more than 63 percent from 2006 to 2013.

Chapter 2. Proposed Plan Amendment and Alternatives

2.1 Introduction

This chapter describes the alternatives evaluated as a part of this RMPA/EIS. This RMPA/EIS analyzes in detail the No-Action Alternative, the Management Alignment Alternative (which was identified as the preferred alternative in the Draft RMPA/EIS), and the Proposed Plan Amendment**,** which represents the agencies' proposed management approach and reflects the best combination of decisions to achieve BLM goals and policies, meets the purpose and need, and addresses the key planning issues.

Components of Alternatives

Goals are broad statements of desired outcomes and are not quantifiable or measurable. Objectives are specific measurable desired conditions or outcomes intended to meet goals. Goals and objectives can vary across alternatives, resulting in different allowable uses and management actions for some resources and resource uses.

Management actions and allowable uses are designed to achieve goals and objectives. Management actions are measures that guide day-to-day and future activities. Allowable uses delineate uses that are permitted, restricted, or prohibited, and may include stipulations or restrictions. Allowable uses also identify lands where specific uses are excluded to protect resource values, or where certain lands are open or closed in response to legislative, regulatory, or policy requirements. Implementation decisions are site-specific actions and are typically not addressed in RMPs.

2.2 Alternatives Considered but Not Analyzed in Detail

2.2.1 Varying Constraints on Land Uses and Development Activities

During scoping, some commenters asked the BLM to consider additional constraints on land uses and ground-disturbing development activities to protect Greater Sage-Grouse habitat. These constraints are beyond those in the current management plan.[1] Other commenters, in contrast, asked the BLM to consider eliminating or reducing constraints on land uses, or incorporating other flexibilities into the BLM's implementation of RMPs, in addition to those issues that are already evaluated in the Management Alignment Alternative. The BLM considered every scoping comment and, where appropriate, incorporated these issues into the Management Alignment Alternative, following coordination with the States. Because the purpose and need for the BLM's action, building off of the 2015 ROD/ARMPA, is to enhance cooperation with the States by seeking to better align the BLM's RMPs with individual state plans and/or conservation measures, the BLM gave great weight to the States' identification of issues that warrant consideration in this planning effort.

[1]For example, this 2018 planning process, built upon the 2015 planning process, will continue to ensure that the BLM complies with its special status species policy, including the commitment to "implement measures to conserve [special status] species and their habitats…and promote their conservation and reduce the likelihood and need for such species to be listed pursuant to the ESA." (BLM Manual 6840, Special Status Species Management)

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004845

This planning process does not revisit every issue that the BLM evaluated in 2015. Instead, the BLM now addresses refinements to the 2015 ROD/ARMPA decisions, consistent with the BLM's purpose and need for action. Accordingly, this RMPA/EIS has its foundation in the comprehensive 2015 Final EIS and ROD/ARMPA and incorporates those documents by reference—including the entire range of alternatives evaluated through the 2015 planning process:

- Alternative A would have retained the management goals, objectives, and direction specified in the BLM RMPs and the Forest Service land and resource management plans effective prior to the 2015 ROD/ARMPA.
- Alternative B was based on the conservation measures developed by the National Technical Team planning effort in Washington Office Instruction Memorandum (IM) 2012-044. As directed in the IM, the conservation measures developed by the National Technical Team must be considered and analyzed, as appropriate, through the land use planning process and NEPA by all BLM state and field offices that contain occupied Greater Sage-Grouse habitat. Most management actions included in Alternative B would have been applied to PHMA.
- Alternative C was based on a citizen groups' recommended alternative. This alternative emphasized improvement and protection of habitat for Greater Sage-Grouse and was applied to all occupied Greater Sage-Grouse habitat. Alternative C would have limited commodity development in areas of occupied GRSG habitat and would have closed or designated portions of the planning area to some land uses.
- Alternative D, which was identified as the Preferred Alternative, balanced opportunities to use and develop the planning area and protects Greater Sage-Grouse habitat based on scoping comments and input from cooperating agencies involved in the alternatives development process. Protective measures would have been applied to Greater Sage-Grouse habitat.
- Alternative E was the alternative provided by the State or Governor's offices for inclusion and analysis in the EISs. It incorporated guidance from specific state conservation strategies and emphasized management of Greater Sage-Grouse seasonal habitats and maintaining habitat connectivity to support population objectives.
- Alternative F was also based on a citizen group-recommended alternative. This alternative emphasized improvement and protection of habitat for Greater Sage-Grouse and defined different restrictions for PHMA and GHMA. Alternative F would have limited commodity development in areas of occupied Greater Sage-Grouse habitat and would have closed or designated portions of the planning area to some land uses.
- The Proposed LUPA incorporated guidance from specific State Conservation strategies, as well as additional management based on the National Technical Team recommendations. This alternative emphasized management of Greater Sage-Grouse seasonal habitats and maintaining habitat connectivity to support population objectives.

The BLM considered the entire range of alternatives from the 2015 Final EIS to identify issues meriting reconsideration, given the BLM's goal of enhancing alignment with state plans. In this manner, the BLM will continue to appropriately manage Greater Sage-Grouse and its habitat through this planning effort in tandem with the 2015 ROD/ARMPA.

Further, additional constraints on land uses or development without a documented need would not meet the purpose of SO 3353. The BLM did not discover new information that would indicate that it

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004846

should increase the level of conservation, management, and protection to achieve its land use plan objective. As part of the consideration of whether to amend the 2015 Greater Sage-Grouse RMPs, the BLM requested the USGS to develop an annotated bibliography of Greater Sage-Grouse science published since January 2015 (Carter et al. 2018; see **Section 3.1**). In addition, SO 3353 directs the BLM to promote habitat conservation, while contributing to economic growth and energy independence. As analyzed in the 2015 Nevada and Northeastern California Proposed Land Use Plan Amendment and Final EIS, all of the previously analyzed alternatives, including one proposing constraints stricter than the current management plan, were predicted to result in a loss of development opportunities on public lands.

2.3 Description of Draft RMPA/EIS Alternatives

2.3.1 No-Action Alternative

Under the No-Action Alternative, the BLM would not amend the current RMPs amended by the Nevada and Northeastern California Greater Sage-Grouse Approved Resource Management Plan Amendment. Greater Sage-Grouse habitat would continue to be managed under current management direction. Goals and objectives for BLM-administered lands and federal mineral estate would not change. Allowable uses and restrictions would also remain the same, as they pertain to such activities as mineral leasing and development, recreation, lands and realty, and livestock grazing. This alternative also includes the designation of SFAs, which is analyzed in **Chapter 4**.

2.3.2 Management Alignment Alternative

This alternative was identified as the Preferred Alternative in the Draft RMPA/EIS and makes modifications to the No-Action Alternative to better align BLM management direction with the State of Nevada's Conservation Plan[2] and conservation strategies with the CDFW to reach a "combination of balanced and diverse resource uses," as required by FLPMA. This alternative was also developed in a collaborative process with cooperating agencies to support conservation outcomes for Greater Sage-Grouse.

The BLM continues to build upon the 2015 planning effort as envisioned in SO 3353 by collaborating with states and stakeholders to improve compatibility between federal management plans and other plans and programs at the state level, while ensuring consistency with the BLM's multiple use mission and protection of Greater Sage-Grouse habitat. This enhanced cooperation between the BLM and the States would lead to improved management and coordination with states across the range of Greater Sage-Grouse. These modifications include updating and making adjustments to habitat management area boundaries and including language that would allow the BLM to update, through plan maintenance, when appropriate, based on the most updated best available science and habitat data; removing SFA designations; incorporating new science into the adaptive management strategy and replacing predetermined hard trigger responses with a clear causal factor analysis process to determine the appropriate management responses and to address the decline in Greater Sage-Grouse populations and/or habitat; revising and simplifying an allocation exception process to allow for the consideration of projects within designated habitat management areas (see Table 2-1 Allocation Exceptions for more

[2] The process involved in developing the State of Nevada's Greater Sage-grouse Conservation Plan (as amended) is described in pages 5 through 7 of the State plan. The State Plan is part of the State of Nevada's Sagebrush Ecosystem Program and has been approved and amended through the State of Nevada's Sagebrush Ecosystem Council, which includes ex-officio members from the BLM, U.S. Forest Service, NRCS, and the USFWS.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004847

detail); solidifying the BLM's commitment to use the most current version of the State of Nevada's Habitat Quantification Tool to quantify impacts to GRSG and their habitat; and identifying that seasonal timing restrictions and modifying habitat objectives would be addressed in coordination with the Nevada Division of Wildlife (NDOW) and CDFW.

[Cooperators: discussion regarding mitigation will be placed here after direction from the Department of the Interior is provided to BLM Nevada regarding alignment with IM 2018-093: Compensatory Mitigation.]

Consistent with the Notice of Cancellation of the BLM's application to withdraw SFAs from locatable mineral entry (82 *Federal Register* 195, October 11, 2017, p. 47248), this alternative would also remove the recommendation for withdrawal. The effects of such action are included in **Chapter 4**.

2.4 Comparative Summary of Alternatives

Table 2-1 below provides a comparison between acres designated as PHMA, GHMA, and OHMA (managed by the BLM) between the No-Action Alternative and Management Alignment Alternative. The change in acres between these two alternatives is based on the BLM's consideration in the Management Alignment Alternative of new PHMA, GHMA, and OHMA boundaries, from the composite management categories contained within the USGS's Spatially Explicit Modeling of Annual and Seasonal Habitat for Greater Sage-Grouse (*Centrocercus urophasianus*) in Nevada and Northeastern California—an updated decision-support tool for management (Coates et al. 2016) and as adopted and modified by the State of Nevada on December 11, 2015.

Between the two alternatives, no allocation decisions, with the exception of the recommendation for withdrawal in SFAs, would change. Acres of PHMA, GHMA, and OHMA vary between alternatives.

2.5 COMPARISON OF ALTERNATIVES

Table 2-2
Comparison of Alternatives

Topic	2015 ARMPA Decision Number	No-Action Alternative	Management Alignment Alternative	Proposed Plan Amendment
Issue: Modifying Habitat Management Area Designations • Need for adjusting habitat management areas so that they reflect the best available science based on continually evolving updates to habitat and use modeling (Coates et al. 2016) and are consistent with habitat management areas identified by the State of Nevada and recommended by CDFW. This would provide consistency in management across jurisdictions and to third parties operating on public and state or private lands in Nevada and Northeastern California. • Integration of flexibility into the plans to be able to adjust habitat management area designations (and their associated allocations) without the need for a plan amendment, based on the best available science. • Maintaining all habitat areas as identified in the ARMPA, including SFAs, which should be provided with the most protections.				
Update Management Areas to Incorporate Best Available Science which are the Management Categories Identified by the States	Appendix A (Maps)	PHMA, GHMA, and OHMA boundaries are based on the 2015 Approved Resource Management Plan Amendment HMA maps (See Appendix A: Maps). These boundaries were derived from USGS' *Spatially Explicit Modeling of Greater Sage-Grouse Habitat in Nevada and Northeastern California* (Coates et al. 2014) • Manage 9,309,800 acres as PHMA o Including 2,797,400 acres of PHMA as SFA • Manage 5,720,700 acres as GHMA • Manage 5,876,500 acres as OHMA	PHMA, GHMA, and OHMA boundaries are based on composite management categories contained within USGS's *Spatially Explicit Modeling of Annual and Seasonal Habitat for Greater Sage-Grouse (Centrocercus urophasianus)* in Nevada and Northeastern California—an updated decision-support tool for management (Coates et al. 2016), as adopted and modified by the State of Nevada on December 11, 2015 (see Appendix A: Maps). • Manage 9,265,800 acres as PHMA • Manage 5,748,000 acres as GHMA • Manage 4,868,900 acres as OHMA BLM recognizes that landscape level mapping may not accurately reflect on-the-ground conditions. Therefore, the habitat management area designations (**Figure 2-1b**) do not constitute a land use plan decision but rather a landscape	PHMA, GHMA, and OHMA boundaries are based on composite management categories contained within USGS's *Spatially Explicit Modeling of Annual and Seasonal Habitat for Greater Sage-Grouse (Centrocercus urophasianus)* in Nevada and Northeastern California—an updated decision-support tool for management (Coates et al. 2016), as adopted and modified by the State of Nevada on December 11, 2015 (see Appendix A: Maps). • Manage 9,265,800 acres as PHMA • Manage 5,748,000 acres as GHMA • Manage 4,868,900 acres as OHMA BLM recognizes that landscape level mapping may not accurately reflect on-the-ground conditions. Therefore, the habitat management area designations (**Figure 2-1b**) do not constitute a land use plan decision but rather a landscape

		Grouse Habitat in Nevada and Northeastern California" (Coates et al. 2014) to reflect the most up-to-date spatial representation of Greater Sage-Grouse habitat categories. Through plan maintenance or plan amendment/revision, as appropriate, and in consultation with the Nevada Department of Wildlife and USFWS, based on the best scientific information, the updated modeling efforts may be adopted and appropriate allocation decisions and management actions will be applied to PHMA, GHMA, and OHMA. Future modeling efforts to incorporate site-specific Greater Sage-Grouse data will utilize the same modeling methods (as described under Methods and Results in Coates et al. 2014) used to develop the current Nevada and Northeastern California Subregions' Greater Sage-Grouse habitat management categories. The addition of site-specific Greater Sage-Grouse data will allow for the refinement of the spatial representation	to 5 years, or when new data are incorporated in the model. New or improved spatial data (e.g., additional Greater Sage-Grouse telemetry data, updated or improved vegetation community data) would be incorporated during the refinement process. The review and refinement process would be scientifically based and would include review and input from the Sagebrush Ecosystem Technical Team (SETT), NDOW, BLM, USFS, and USFWS. For refinements in California, this process would also include CDFW. Other stakeholders would be encouraged to participate in the process by submitting relevant information to the listed agencies. The USGS habitat suitability modeling processes (Coates et al. 2016) would be the basis for future refinements. As these habitat management categories are adjusted and approved by the States of Nevada and California, adjustments to PHMA, GHMA, and/or OHMA boundaries (along with the existing allocation decisions and management actions tied to these areas) would be	to 5 years, or when new data are incorporated in the model. New or improved spatial data (e.g., additional Greater Sage-Grouse telemetry data, updated or improved vegetation community data) would be incorporated during the refinement process. The review and refinement process would be scientifically based and would include review and input from the Sagebrush Ecosystem Technical Team (SETT), NDOW, BLM, USFS, USFWS, and local agencies as appropriate. For refinements in California, this process would also include CDFW. Other stakeholders would be encouraged to participate in the process by submitting relevant information to the listed agencies. The USGS habitat suitability modeling processes (Coates et al. 2016) would be the basis for future refinements, which may include results of BLM habitat suitability determinations shared with USGS for their consideration. As these habitat management categories are adjusted and approved by the States of Nevada[3] and California, adjustments to

[3] The State of Nevada's Greater Sage-Grouse Conservation Plan (2014, as amended) refers to Sage-grouse Management Areas (SGMA) as the spatial extent of sage grouse management in Nevada. For the State of Nevada, the purpose of the SGMA is to only trigger consultation with the SETT in regards to the use of the State's Conservation Credit System. BLM Nevada's Habitat Management Areas are not equivalent to the SGMAs, but rather, are equivalent to the State of Nevada's "Management Categories," which are displayed on Figure 4 of the State Plan. For the State of Nevada, the approval of new iterations of their

Topic	2015 ARMPA Decision Number	No-Action Alternative	Management Alignment Alternative	Proposed Plan Amendment
		actions at the plan level may require initiating a plan amendment process. The hard and soft trigger data will be analyzed as soon as it becomes available after the signing of the ROD and then at a minimum, analyzed annually thereafter.		
Issue: Mitigation • Alignment with the State of Nevada's mitigation strategy to the greatest extent possible. • Provide consistency in application of mitigation, quantification and tracking of mitigation actions.				
Mitigation	MD MIT 1 MD MIT 2 Appendix F Appendix N	In PHMA, in undertaking BLM management actions, and consistent with valid existing rights and applicable law, in authorizing third-party actions that result in habitat loss and degradation, the BLM will require and ensure mitigation that provides a net conservation gain to the species, including accounting for any uncertainty associated with the effectiveness of such mitigation. The project/activity with associated mitigation (such as the use of the State of Nevada Conservation Credit System) will result in an overall net conservation gain to Greater Sage-Grouse (see **Appendix F**). In GHMAs, in undertaking BLM management actions, and consistent with valid existing rights and applicable law, in authorizing third-party actions	Same as the No-Action Alternative, except Appendix F, Mitigation Strategy, would be updated to include the following clarifying language and concepts: When authorizing third-party actions, the BLM would apply the mitigation hierarchy as described in the CEQ regulations at 40 CFR 1508.20 and in the State of Nevada's Greater Sage-Grouse Conservation Plan, Section 3.1.2 (2014), which is to "avoid, minimize, and compensate," for impacts on Greater Sage-Grouse and its habitat. BLM would consult with the SETT and other state agencies when implementing the avoid, minimize, and mitigate process. The State of Nevada adopted a mitigation standard of net benefit (net conservation gain). Consistent with the State approach, this standard would be	[Cooperators: proposed management action regarding mitigation will be placed here after direction from the Department of the Interior is provided to BLM Nevada regarding alignment with IM 2018-093: Compensatory Mitigation.]

AMERICAN OVERSIGHT

Table 2-2
Comparison of Alternatives

Topic	2015 ARMPA Decision Number	No-Action Alternative	Management Alignment Alternative	Proposed Plan Amendment
		that result in habitat loss and degradation, the BLM will require and ensure mitigation that provides a net conservation gain to the species, including accounting for any uncertainty associated with the effectiveness of such mitigation. The project/activity with associated mitigation (such as the use of the State of Nevada Conservation Credit System) in GHMAs will result in an overall net conservation gain to Greater Sage-Grouse (see Appendix F, Regional Mitigation Strategy). In Nevada only, the BLM will consult with the SETT for application of the "avoid, minimize, and compensate" mitigation strategy and the Conservation Credit System developed by the Nevada Department of Conservation and Natural Resources (2014a, 2014b) or other applicable mitigation system such as outlined in Appendix I. This will be to ensure that a net conservation gain of Greater Sage-Grouse habitat is achieved in mitigating human disturbances in PHMAs and GHMAs (see Appendix F) on all agency-authorized activities. The specifics of the coordination will be identified in an Memorandum of Understanding between the agencies.	retained in the Management Alignment Alternative. In Nevada only, when authorizing third-party actions that would result in direct, indirect, or cumulative impacts on Greater Sage-Grouse or their habitat, the BLM would require those impacts to be quantified using the State of Nevada's Habitat Quantification Tool (HQT) to ensure consistency in tracking/reporting changes to habitat quality and quantity. When adverse impacts on Greater Sage-Grouse and its habitat remain after avoidance and minimization, mitigation would be considered subject to the federal regulations governing the authorization and valid existing rights. When it is determined that an activity requires compensatory mitigation, or a proponent voluntarily offers to conduct compensatory mitigation, the BLM would coordinate with the SETT regarding use of the Conservation Credit System and/or evaluation of other proponent-developed mitigation options. Evaluation of mitigation options would be assessed using the HQT to ensure net benefit (net conservation gain) and that impacts calculated using the HQT would be mitigated with the equivalent number of functional acres regardless of mitigation method.	

AMERICAN OVERSIGHT

Table 2-2
Comparison of Alternatives

Topic	2015 ARMPA Decision Number	No-Action Alternative	Management Alignment Alternative	Proposed Plan Amendment
		Subject to valid existing rights and applicable law, authorize locatable mineral development activity, by approving plans of operation and apply mitigation and best management practices that minimize the loss of PHMAs and GHMAs or that enhance Greater Sage-Grouse habitat by applying the "avoid, minimize and compensatory mitigation" process through an applicable mitigation system, such as the Nevada Conservation Credit System and the Barrick Nevada Sage-Grouse Bank Enabling Agreement (March 2015). In Nevada, coordinate with the SETT on the application of a compensatory mitigation program, such as the Nevada Conservation Credit System (Appendix N) for mitigating activities that result in habitat loss and degradation of Greater Sage-Grouse habitat in Nevada, where the application of compensatory mitigation will occur on or the credit will be applied to disturbance on BLM-administered lands. Identify compensatory mitigation areas in PHMAs and GHMAs with the potential to achieve Greater Sage-Grouse habitat objectives (Habitat Objectives table in the 2015 Final EIS), in accordance with FIAT, the SFA

• Consideration of site potential based on Ecological Site Descriptions and their associated State and Transition Models • Consistency with State of Nevada's Desired Habitat Conditions • Incorporation of recent science supporting modifications. • Clarify that Habitat Objectives are actually desired outcomes expressed as goals consistent with BLM Planning Handbook (H-1601-1).				
Modifying Habitat Objectives	No similar action.	No similar action.	The Habitat Objectives table in the 2015 Final EIS would be revised to incorporate best available science in coordination with representatives from the SETT, USFWS, NDOW, CDFW, USFS, USGS, and BLM. The team would review and incorporate the best available science and would recommend adjustments based on regionally and locally derived data. As these habitat objectives are updated, adjustments would be made by the BLM through plan maintenance. The Habitat Objectives table in the 2015 Final EIS would be implemented following this guidance: The Habitat Objectives table in the 2015 Final EIS are desired habitat conditions that are broad goals based on habitat selection that may not be achievable in all areas. Objectives should be based on sources such as ecological site descriptions, associated state-and-transition models.	The Habitat Objectives table in the 2015 Final EIS would be revised to incorporate best available science in coordination with representatives from the SETT, USFWS, NDOW, CDFW, USFS, USGS, University of Nevada, Reno (UNR), University of California, and appropriate local agencies, and BLM. The team would review and incorporate the best available science and would recommend adjustments based on regionally and locally derived data. As these habitat objectives are updated, adjustments would be made by the BLM through plan maintenance or amendment, as appropriate. The Habitat Objectives table in the 2015 Final EIS would be implemented following this guidance: The Habitat Objectives table in the 2015 Final EIS are desired habitat conditions that are broad goals based on habitat selection that may not be achievable in all areas. Objectives should be based on sources such as ecological site descriptions, associated state-and-transition models.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-004865

2.6 Development of the Proposed Plan Amendment

The Proposed Plan Amendment represents the BLM's proposed approach for meeting the purpose and need consistent with the agencies' legal and policy mandates. The Draft RMPA/EIS was issued for a 90-day public review and comment in May 2018. The BLM assessed and considered public comments, received both individually and collectively, during the public review period of the Draft RMPA/EIS. The BLM has crafted the Proposed Plan Amendment, largely based on the Preferred Alternative (Management Alignment Alternative), which was identified in the May 2018 Draft RMPA/EIS, with modifications based on review of public comments received on the Draft RMPA/EIS. In addition, special expertise input and comments received from cooperating agencies helped shape the Proposed Plan Amendment. Changes in BLM regulations, policy, and guidance were another factor taken into consideration in its development. Key policy and guidance changes center on compensatory mitigation and adaptive management. BLM responded to all substantive comments received on the DRMPA/DEIS (Appendix G). In preparing responses to comments, the BLM referenced responses based on similar comments. The BLM also included a "Comment Noted" applicable to some comments. This response is intended to inform the commenter that the comment was taken into consideration in the development of the Proposed Plan Amendment.

2.7 Plan Evaluation, Monitoring, and Adaptive Management

Plan evaluation is the process by which the plan and monitoring data are reviewed to determine if management objectives are being met and progress is being made toward meeting management goals and if management direction is sound. RMP evaluations determine if decisions are being implemented, if mitigation measures are satisfactory, if there are significant changes in the related plans of other entities, if there are new data of significance to the plan, and if decisions should be amended or revised.

Monitoring data gathered over time are examined and used to draw conclusions on whether management actions are meeting stated objectives, and if not, why not. Conclusions are then used to make recommendations on whether to continue current management or to identify what changes need to be made in management practices to meet objectives. The BLM would use RMP evaluations to determine if the decisions in the RMPA, supported by the accompanying NEPA analysis, are still valid in light of new information and monitoring data.

Evaluations would follow the protocols established by the BLM Land Use Planning Handbook (H-1601-1), DOI Adaptive Management Guidance (including Williams et. al 2009, Adaptive Management: The U.S. Department of the Interior Guide and Adamcik et al. 2004, Writing Refuge Management Goals and Objectives: A Handbook. US Fish and Wildlife Service) and, other appropriate guidance in effect at the time the evaluation is initiated.

This RMPA/EIS also includes an adaptive management strategy that can be found in Appendix D.

Chapter 1. Purpose and Need for Action

1.1 Introduction

Greater Sage-Grouse (*Centrocercus urophasianus*) is a state-managed species dependent on sagebrush steppe ecosystems that are managed in partnership across its range by federal, state, local, and private authorities. State agencies responsible for fish and wildlife management possess broad powers for the protection and management of fish, wildlife, and plants within their borders, except where preempted by federal law. Similarly, DOI has broad responsibilities to manage federal lands and resources for the public's benefit. The BLM and US Forest Service (Forest Service) manage approximately half of the Greater Sage-Grouse habitat range-wide across 11 states; approximately 20.5 million acres of this is within the Nevada and Northeastern California Sub-regional planning area.

State and local agencies are at the forefront of efforts to maintain healthy fish and wildlife populations and to conserve at-risk species. State-led efforts to conserve Greater Sage-Grouse and its habitat date back to the 1950s. For the past two decades, state wildlife agencies, local agencies, federal agencies, and many others in the range of the species have been collaborating to conserve Greater Sage-Grouse and its habitats.

In response to a 2010 determination by the USFWS that the listing of the Greater Sage-Grouse under the Endangered Species Act was "warranted, but precluded by higher priority listing actions," the BLM in coordination with the DOI and the US Department of Agriculture developed a management strategy that included targeted Greater Sage-Grouse management actions. In 2015, the agencies adopted amendments and revisions to 98 BLM and Forest Service land use plans across 10 western states. These LUPs addressed, in part, threats to the Greater Sage-Grouse and its habitat. The amended LUPs govern the management of 67 million acres of Greater Sage-Grouse habitat on federal lands.

In September 2015, the USFWS determined that the Greater Sage-Grouse did not warrant listing under the Endangered Species Act of 1973. The USFWS attributed its 2010 "warranted, but precluded" determination primarily to "inadequate regulatory mechanisms." In concluding "not warranted" in 2015, the USFWS based its decision in part on regulatory certainty from the conservation commitments and management actions in the federal land use plan amendments (LUPAs) and revisions, as well as on other private, state, and federal conservation efforts.

The BLM is currently implementing the 2015 Greater Sage-Grouse plans. The plans recommended that SFAs be proposed for withdrawal; however, this proposed withdrawal was cancelled on October 11, 2017. The BLM determined the proposal to withdraw 10 million acres was unreasonable in light of the data that showed that mining affected less than 0.1 percent of Greater Sage-Grouse-occupied range.

On March 29, 2017, the Secretary of the Interior (Secretary) issued SO 3349 ordering agencies to reexamine practices "to better balance conservation strategies and policies with the equally legitimate need of creating jobs for hard-working American families." On June 7, 2017, the Secretary issued SO 3353 with a purpose of enhancing cooperation among 11 western states and the BLM in managing and conserving Greater Sage-Grouse. Secretarial Order 3353 directed an Interior Review Team, consisting of the BLM, USFWS, and US Geological Survey (USGS), to coordinate with the Sage-Grouse Task Force

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004868

and review the 2015 Greater Sage-Grouse plans and associated policies to identify provisions that may require modification to make the plans more consistent with the individual state plans and better balance the BLM's multiple-use mission as directed by SO 3349 "American Energy Independence." On August 4, 2017, the Interior Review Team submitted its "Report in Response to Secretarial Order 3353." This report made recommendations for modifying the Sage-Grouse plans and associated policies to better align with the individual state plans. On August 4, 2017, the Secretary issued a memo to the Deputy Secretary directing the BLM to implement the recommendations found in the report.

Consistent with the report, the BLM published a Notice of Intent titled "Notice of Intent to Amend Land Use Plans Regarding Greater Sage-Grouse Conservation and Prepare Associated Environment Impact Statements or Environmental Assessments" in the *Federal Register* on October 11, 2017. During this public scoping period, the BLM sought public comments on a list of specific issues on whether all, some, or none of the 2015 Greater Sage-Grouse plans should be amended, what additional issues should be considered, and if plans should be completed at the state level rather than at the national level. In addition, the BLM recognizes that Greater Sage-Grouse is a state-managed species dependent on sagebrush steppe habitats managed in partnership between federal, state, and local authorities and that input from state governors would be given significant weight when considering what management changes should be made and in ensuring consistency with the BLM's multiple-use mission during a land-use plan amendment process.

On March 31, 2017, the United States District Court for the District of Nevada held that the BLM violated the National Environmental Policy Act (NEPA) by failing to prepare a supplemental EIS for the designation of SFA in the Nevada and Northeastern California Greater Sage-Grouse Resource Management Plan Amendment in Nevada. This RMPA/EIS responds to the Court's order by evaluating the SFA designation and providing the public with an opportunity to review and comment on that evaluation. The BLM will also provide the public with an opportunity to review and comment on the designation of habitat management areas (i.e., priority, general, and other), which provide a landscape-level reference of relative Greater Sage-Grouse habitat as determined by landscape characteristics and the likelihood of Greater Sage-Grouse occurrence (Coates et al. 2016).

This RMPA/EIS is tiered to the 2015 Nevada and Northeastern California Greater Sage-Grouse Proposed RMP Amendment and Final EIS in accordance with the Council on Environmental Quality (CEQ) regulations, 40 CFR 1502.2, and incorporates by reference all the descriptions of the affected environment and impacts analyzed in the 2015 Proposed RMPA and Final EIS and subsequent Approved Nevada and Northeastern California Greater Sage-Grouse Land Use Plan Amendment and Record of Decision. This RMPA/EIS also incorporates by reference the 2016 Draft Sagebrush Focal Area Withdrawal EIS. This RMPA/EIS has been prepared to analyze the impacts associated with aligning the 2015 Nevada and Northeastern California Greater Sage-Grouse RMP/EIS with the State of Nevada and State of California's Greater Sage-Grouse management strategies.

Incorporation by reference and tiering provide opportunities to reduce paperwork and redundant analysis in the NEPA process. When incorporating by reference, the author refers to other available documents that cover similar issues, effects, and/or resources considered in the NEPA analysis that is being prepared. Incorporation by reference allows brief summarizations of relevant portions of other documents rather than repeating them.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004869

1.2 Purpose of and Need for Action

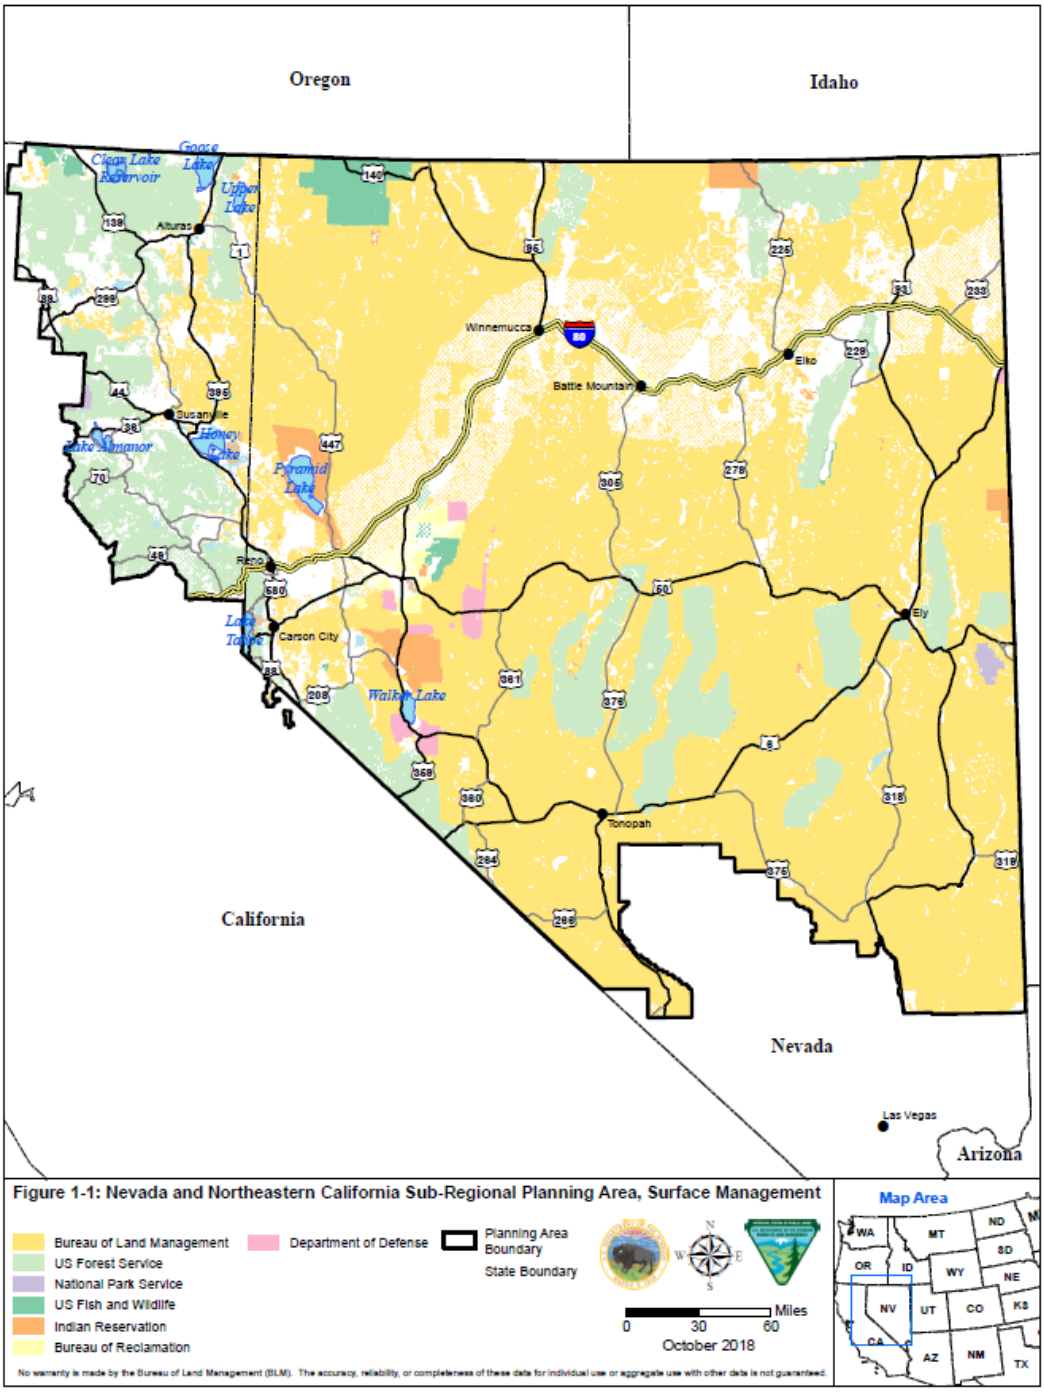
In FLPMA, Congress provided the BLM with discretion and authority to manage public lands for multiple use and sustained yield, and declared it the policy of the United States to coordinate the land use planning process with other federal and state plans. Further, FLPMA specifically provides that it neither enlarges nor diminishes the authority of the states in managing fish and wildlife. As the sovereign entity with the lead role in managing game species, including Greater Sage-Grouse, states play a critical role in conserving and managing the Greater Sage-Grouse and its habitat.

The purpose of this RMPA/EIS is to enhance cooperation with the states by modifying the approach to Greater Sage-Grouse management in existing land use plans to better align with individual state plans and conservation measures and with DOI and BLM policy.

1.3 Planning Area and Current Management

The planning area boundary includes all lands regardless of jurisdiction in Nevada and northeastern California (see **Figure 1-1**). **Table 1-1**, Land Management in the Planning Area, outlines the number of surface acres that are administered by specific federal agencies, states, and local governments and lands that are privately owned in the planning area. It includes other BLM-administered lands that are not allocated as habitat management areas and do not contain habitat for Greater Sage-Grouse. The planning area includes the BLM Nevada District Offices of Battle Mountain, Carson City, Elko, Ely, and Winnemucca and the BLM California Field Offices of Applegate (Alturas and Surprise) and Eagle Lake. The 2015 ARMPA did not establish any additional management for lands that are not identified as Greater Sage-Grouse habitat, which will continue to be managed according to the existing, underlying land use plan for the areas. BLM-administered lands in habitat management areas (priority, general, and other) within the planning area are where management direction described in this document will be applied (the decision areas; see **Figures 2-1a** and **2-1b** [**Appendix A**]). **Figures 1-2a** and **1-2b** (**Appendix A**) display where habitat management areas reside across the planning area for all lands regardless of jurisdiction.

Table 1-1
Land Management in the Planning Area



Surface Land Management	Total Surface Land Management Acres

106

Figure 1-1
Planning Area

107

AMERICAN OVERSIGHT

PHMA are areas that meet some stage of the Greater Sage-Grouse life-cycle requirements, based on best available science. These broad habitat maps are necessary at the resource management plan-scale of planning in order to include a variety of important seasonal habitats and movement corridors that are spread across geographically diverse and naturally fragmented landscapes. Greater Sage-Grouse use multiple areas to meet seasonal habitat needs throughout the year and the resulting mosaic of habitats (e.g., winter, breeding, nesting, early brood-rearing, late brood-rearing, transitional, and movement corridor habitats) can encompass large areas. Broad habitat maps increase the likelihood that all seasonal habitats (including transition and movement corridors) are included. While areas of non-habitat, in and of themselves, may not provide direct habitat value for Greater Sage-Grouse (e.g., canyons, water bodies, and human disturbances), these areas may be crossed by birds when moving between seasonal habitats. Therefore, these habitat management areas are not strictly about managing habitat but are about providing those large landscapes that are necessary to meet the life-stage requirements for Greater Sage-Grouse. These areas will include areas that do not meet the habitat requirements described in the Seasonal Habitat Objectives table in the 2015 Final EIS. These areas meet Greater Sage-Grouse habitat needs by maintaining large, contiguous expanses of relatively intact sagebrush vegetation community.

1.4 Planning Criteria

Planning criteria establish constraints, guidelines, and standards for the planning process and help the BLM define the scope of the planning effort and estimate the extent of data collection and analysis. The following criteria are based on standards prescribed by applicable laws and regulations; agency guidance; results of consultation and coordination with the public and other federal, state, and local agencies; analysis pertinent to the planning area; and professional judgment.

The BLM has identified these planning criteria:

- The BLM will comply with all laws, regulations, policies, and guidance related to public lands management and implementing FLPMA and NEPA on BLM-administered lands.
- Greater Sage-Grouse is a state-managed species dependent on sagebrush steppe habitats managed in partnership by federal, state, and local authorities, including private landowners. Appropriate state agencies' Greater Sage-Grouse data and expertise will be used to the fullest extent practicable by the BLM in making management determinations on BLM-administered lands.
- Lands addressed in the RMPA/EIS will be BLM-administered land in Greater Sage-Grouse habitats, including surface and split-estate lands with federal subsurface mineral rights. Any decisions in the RMPA/EIS will apply only to BLM-administered lands.
- This RMPA/EIS will comply with Secretarial Orders, including 3353 (Greater Sage-Grouse Conservation and Cooperation with Western States), which strives for compatibility with state conservation plans.
- This RMPA/EIS will incorporate, as appropriate, information in a USGS report that identified and annotated Greater Sage-Grouse science published since January 2015 (Carter et al. 2018) and a report that synthesized and outlined the potential management implications of this new science (Hanser et al. 2018), and other science not referenced in Hanser et al. 2018.
- This RMPA/EIS's adaptive management actions will be consistent with the Department of the Interior's Adaptive Management Technical Guide (DOI 2009).

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004872

- This RMPA/EIS will comply with BLM Manual 6840, Special Status Species Management.
- This RMPA/EIS will recognize valid existing rights.
- All activities and uses within Greater Sage-Grouse habitats will be managed to achieve Greater Sage-Grouse objectives (set forth in the 2015 ARMPA FEIS) and land health standards (43 CFR 4180).
- Where more restrictive land use allocations or decisions are in effect for other resources (e.g., wilderness study areas, areas of critical environmental concern, cultural resources, and riparian areas) under existing RMPs, those more restrictive land use allocations or decisions will not be amended by this RMPA/EIS.
- This RMPA/EIS will respond to the March 31, 2017, United States District Court for the District of Nevada court order.

1.5 Issues and Related Resource Topics Identified Through Scoping

When deciding which issues to address related to the purpose and need, BLM considers points of disagreement, debate, or dispute regarding an anticipated outcome from a proposed action. Issues are based on anticipated environmental effects; as such, issues can help shape the proposal and alternatives.

The BLM used internal, agency, and public scoping to identify issues to consider in the environmental analysis. A summary of the scoping process is presented in a report titled "Potential Amendments to Land Use Plans Regarding Greater Sage-Grouse Conservation Scoping Report" (https://goo.gl/FopNgW).

When determining whether to retain an issue for more detailed analysis in this RMPA/EIS, the interdisciplinary team considered, among other things, the following:

- The environmental impacts associated with the issue, and the threats to species and habitat associated with the issue, are central to or of critical importance to development of a Greater Sage-Grouse management plan.
- A detailed analysis of environmental impacts related to the issue is necessary to make a reasoned choice between alternatives.
- The environmental impacts associated with the issue are a significant point of contention among the public or other agencies.
- There are potentially significant impacts on resources associated with the issue.

Ultimately, it is important for decision-makers and the public to understand the impacts that each of the alternatives would have on specific resources; therefore, the BLM uses resource topics as a heading to indicate which resources would be affected by a potential management change. Importantly, resource topics will help organize the discussions of the affected environment (**Chapter 3**) and environmental consequences (**Chapter 4**).

The sections below lay out how issues raised during scoping, as well as related resource topics, are considered in this RMPA/EIS. Generally, they fall into the following categories:

- Issues and related resource topics retained for further consideration in this RMPA/EIS. These were issues raised during scoping that are retained in this RMPA/EIS and for which alternatives were developed to address the issues. In some cases, the resolution in the alternatives were

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004873

previously analyzed in the 2015 Final EIS. In other cases, additional analysis is needed in this RMPA/EIS. Because the issues are analyzed under resource topics in 2015, the resource topics corresponding with those retained for further analysis are also considered in this RMPA/EIS. Just like issues, resource topics may have been analyzed in the 2015 Final EIS for those decisions being included in this RMPA/EIS.

- Clarification of decisions in the 2015 ARMPA. These are decisions or frameworks in the 2015 ARMPA that require clarification as to their application or implementation. No new analysis is required, as the intentions behind the decisions were analyzed in the 2015 Final EIS.
- Issues and resource topics not carried forward for additional consideration or analysis. These are issues brought up during scoping that are not carried forward in this RMPA/EIS. While some of these issues are considered in this RMPA/EIS, they do not require additional analysis because they were analyzed in the 2015 Final EIS. Others are not carried forward in this RMPA/EIS because they do not further the purpose of aligning with the state's conservation plan or management strategies. Similar to issues, there are resource topics that are not retained for further analysis in this RMPA/EIS. This is because either they are not affected by the changes proposed in **Chapter 2** or because the effect was analyzed in the 2015 Final EIS.

1.5.1 Issues and Related Resource Topics Retained for Further Consideration in this RMPA/EIS

Table 1-2 summarizes those issues identified through scoping and that have been retained for consideration and additional discussion in **Chapters 3** and **4**.

Based on the issues identified in **Table 1-2** that have not been previously analyzed, the resource topics that have the potential to be impacted are: Greater Sage-Grouse, vegetation (including weeds and special status vegetation), land use and realty, renewable energy, minerals and energy, socioeconomics, livestock grazing, and comprehensive travel management. These resource topics, therefore, are carried forward for detailed analysis.

Table 1-2 identifies the corresponding resource topics to which the issues relate. The level of detail in the description of each resource topic and the effects from implementing any of the alternatives also are described in **Chapters 3** and **4**.

Table 1-2
Issues and Related Resource Topics

Issues	Resource Topics Related to the Issues
Modifying Habitat Management Area Designations • Need for adjusting HMAs so that they reflect the best available science based on continually evolving updates to habitat and use modeling (Coates et al. 2016) and are consistent with habitat management areas identified by the State of Nevada and recommended by CDFW. This would provide consistency in management across jurisdictions and to third parties operating on public and state or private lands in Nevada and Northeastern California. • Integration of flexibility into the plans to be able to adjust habitat management area designations (and their associated land use plan allocations) without the need for a plan amendment, based on the best available science.	• Greater Sage-Grouse • Vegetation • Land Use and Realty • Renewable Energy • Minerals and Energy • Socioeconomics • Livestock Grazing • Comprehensive Travel Management

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004874

Table 1-2
Issues and Related Resource Topics

Issues	Resource Topics Related to the Issues
• Maintaining all habitat areas as identified in the ARMPA, including SFAs, which should be provided with the most protections.	
Removing Sagebrush Focal Area Designations • Ensure it is clear the SFA mineral withdrawal has been cancelled and the justified reasoning for this cancellation. Is SFA designation relevant in absence of a mineral withdrawal? o Analyze the inclusion and removal of SFAs, in response to the March 31, 2017, United States District Court for the District of Nevada court order. • Is this habitat designation needed to adequately maintain conservation of Greater Sage-Grouse habitat?	• Greater Sage-Grouse • Vegetation • Land Use and Realty • Renewable Energy • Minerals and Energy • Socioeconomics • Livestock Grazing • Comprehensive Travel Management
Adaptive Management • Ensure federal, state, and local partners are part of the causal factor analysis process • Lack of flexibility with implementing and removing hard trigger adaptive management responses • Better alignment with DOI guidance on implementation of the adaptive management process • Incorporate best available science including local data and information into the adaptive management strategy • Utilize collaborative processes with stakeholders, appropriate state and local agencies, and authorized land uses when developing and implementing management responses to any trigger met or surpassed.	• Greater Sage-Grouse • Vegetation • Land Use and Realty • Renewable Energy • Minerals and Energy • Socioeconomics • Livestock Grazing • Comprehensive Travel Management
Allocation Exception Process • Clarify and make consistent the various exception allocation processes • Verify through ground-truthing (suitability analysis) use of landscape-scale mapping of priority habitat area (PHMA), general habitat management area (GHMA), and other habitat management areas (OHMA) in regards to the application of land use plan allocations and stipulations • Address restrictions on actions related to public health and safety, existing infrastructure, and administrative functions that serve a public purpose • Address inconsistencies with existing federal legislation and the 2015 ROD/ARMPA that include land tenure adjustments, including, but not limited to, disposals, exchanges, transfers, and Recreation and Public Purpose actions	• Greater Sage-Grouse • Vegetation • Land Use and Realty • Renewable Energy • Minerals and Energy • Socioeconomics • Livestock Grazing • Comprehensive Travel Management
Mitigation • Alignment with the State of Nevada's mitigation strategy to the greatest extent possible • Provide consistency in application of mitigation, quantification and tracking of mitigation actions. • [Cooperators: issue statement regarding mitigation will be placed here after direction from the Department of the Interior is provided to BLM Nevada regarding alignment with IM 2018-093: Compensatory Mitigation.]	• Greater Sage-Grouse • Vegetation • Land Use and Realty • Renewable Energy • Minerals and Energy • Socioeconomics • Livestock Grazing • Comprehensive Travel Management
Seasonal Timing Restrictions • Alignment with State of Nevada's conservation plan and management strategies with the State of California, to the greatest extent possible • Consider exceptions and/or modifications to seasonal timing restrictions to allow for beneficial or neutral projects to occur in a timely manner	• Greater Sage-Grouse • Vegetation • Land Use and Realty • Renewable Energy • Minerals and Energy

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004875

Table 1-2
Issues and Related Resource Topics

Issues	Resource Topics Related to the Issues
• Seasonal timing restrictions need to be adjusted to allow for public health and safety concerns and time sensitive administrative functions that serve a public purpose to be addressed without delay.	• Socioeconomics • Livestock Grazing • Comprehensive Travel Management
Modifying Habitat Objectives • Consideration of site potential based on ecological site descriptions and their associated state and transition models • Consistency with State of Nevada's desired habitat conditions • Incorporation of recent science supporting modifications • Clarify that Habitat Objectives are actually desired outcomes expressed as goals consistent with BLM Planning Handbook (H-1601-1).	• Greater Sage-Grouse • Vegetation • Land Use and Realty • Renewable Energy • Minerals and Energy • Socioeconomics • Livestock Grazing • Comprehensive Travel Management

1.5.2 Clarification of Planning Decisions in the 2015 ARMPA

The following issues identified in existing planning decisions in **Table 1-3** were raised during scoping. These issues require clarification to language in the ARMPA but do not require new analysis. The clarifying language for these planning decisions is displayed in this planning document to communicate how these issues are being addressed through plan maintenance, policy, or implementation.

Table 1-3
Clarification Issues

Clarification Issue	Clarifications Addressed through Plan Maintenance, Policy, or Implementation
Modifying Lek Buffers • Clarification regarding the application of lek buffer-distances.	*Plan Maintenance* - Management Decisions SSS 2(D) and SSS 3(C) from the ARMPA have been clarified to resolve conflicting statements regarding how the BLM will "apply" lek buffers contained in the USGS Report *Conservation Buffer Distance Estimates for Greater Sage-Grouse – A Review* (Open File Report 2014-1239). Management Decisions SSS 2(D) and SSS 3(C) have been revised to read as follows: *In undertaking BLM management actions [in PHMA and GHMA], and consistent with valid and existing rights and applicable law in authorizing third-party actions, the BLM will utilize the lower end of the interpreted range of lek buffer-distances and guidance identified in the USGS' Open File Report 2014-1239 to establish the evaluation area around leks that will be used to analyze impacts during project-specific NEPA, including scientifically justifiable departures based on local data, topography, and other factors, in accordance with Appendix B.* Appendix B has also been revised to reflect this clarified decision language.
Changing Requirements for Required Design Features	*Plan Maintenance* - Appendix C includes a required design features (RDFs) worksheet that BLM Nevada and Northeastern California will complete for all

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004876

Table 1-3
Clarification Issues

Clarification Issue	Clarifications Addressed through Plan Maintenance, Policy, or Implementation
• Clarify the application of required design features and opportunities to deviate from them.	proposed activities authorized in PHMA, GHMA, and OHMA. This worksheet clearly defines the rationale for dismissing certain RDFs when they are not appropriate for specific proposed activities.
Fire and Invasives • Provide the necessary prioritization of all three aspects of fire management: pre-suppression, suppression, and rehabilitation and find ways to expedite on-the-ground treatments to address this present and widespread threat in the Nevada and Northeastern California Sub-region.	*Policy* - If the Great-Basin-Wide Programmatic Environmental Impact Statements (PEISs) to Reduce the Threat of Wildfire and Support Rangeland Productivity are completed, BLM Nevada and California will issue statewide policies that will instruct BLM field and district offices to incorporate by reference the analysis contained in the PEISs for on-the-ground environmental analysis, in an effort to expedite on-the-ground activities that will address the present and widespread threat of fire and invasives in the Nevada and Northeastern California sub-region. The Draft PEISs are tentatively scheduled for publication in December 2018, with Final PEISs tentatively scheduled for publication in June/July 2019. The PEISs will not modify any proposed land use plan decisions (including HMA designations) specified in this RMPA.
Increase Opportunities for Outcome-Based Grazing • Identify and complete a number of authorizations to support the development of rigorous and defensible outcome-based grazing.	*Implementation* - BLM Nevada and California will continue to pursue outcome-based grazing initiatives that will exhibit a new management paradigm that BLM managers and livestock operators can use to establish management practices that can achieve specific management objectives that respond to changing, on-the-ground conditions such as wildfires, high moisture years, or drought. This will better ensure healthy rangelands, high-quality wildlife habitat, and economically sustainable ranching operations.
Land Health Assessments and Habitat Objectives • Management Decisions LG 5 (and references of these decisions in Management Decisions LG 6 and LG 10) within the existing ARMPA are inconsistent with 43 CFR 4160.1.	*Plan Maintenance* - Management Decision LG 5 (page 2-25 through 2-26, ARMPA), as written, is not consistent with existing BLM grazing regulations (43 CFR 4160.1) or recent policies (WO Instruction Memorandum 2018-023), as it provides direction to implement interim management strategies until appropriate modifications are incorporated through the permit renewal process (if results from a land health assessment indicate that Greater Sage-Grouse habitat objectives are not met and grazing is a causal factor). This management decision, however, does not identify that these interim management strategies need to be within the existing terms and conditions of a grazing permit in order to implement them immediately. Under 43 CFR 4160.1 (existing BLM grazing regulations), the BLM must issue a proposed/final decision on any affected applicant, permittee or lessee, and interested public when modifying a grazing permit. If the interim management strategies are within the existing terms and conditions of a grazing permit, they can be

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004877

Table 1-3
Clarification Issues

Clarification Issue	Clarifications Addressed through Plan Maintenance, Policy, or Implementation
	implemented immediately; however, if the selected interim management strategies are outside of the existing terms and conditions, the BLM will need to comply with NEPA and the decision processes provided in 43 CFR 4160. For this reason, Management Decision LG 5 will be removed, as well as references to Management Decision LG 5 in Management Decisions LG 6 and LG 10.

1.5.3 Issues and Resource Topics Not Carried Forward for Additional Analysis (Scoping Issues Outside the Scope and Scoping Issues Previously Analyzed)

Issues and Related Resource Topics Not Carried Forward for Additional Analysis

The following issues were raised during scoping and are not carried forward for a variety of reasons. For example, population-based management is not carried forward for detailed analysis because the BLM does not manage species populations; that authority falls under the jurisdiction of the States of Nevada and California.

Because the following issues were raised during scoping and were already analyzed in the 2015 Final EIS, and no significant new information has emerged, they do not require additional analysis in this RMPA/EIS. These issues were analyzed under most resource topics in the 2015 Final EIS, and these types of impacts on these resources are described in the range of alternatives in the 2015 Final EIS. The impacts of implementing the alternatives in this RMPA/EIS are within the range of alternatives previously analyzed.

- Effects of NSO stipulations on Greater Sage-Grouse habitat on non-BLM-administered
- Mitigation for oil and gas development
- Prioritization of fluid mineral leases outside of PHMA and GHMA
- Numerical noise limitations within PHMA
- Contribution of disturbance caps toward Greater Sage-Grouse conservation objectives
- Wildfire response to vegetation treatments
- Habitat assessment framework
- Mitigation standard

Other issues were evaluated as part of the 2015 Final EIS. For the same reasons they were dismissed in the 2015 Final EIS, they are not carried forward for detailed analysis in this RMPA/EIS:

- Hunting Greater Sage-Grouse
- Predator control

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004878

- Aircraft overflights in PHMA/GHMA[1]

Resource Topics Not Carried Forward for Additional Analysis

The resource topics below are dismissed from detailed analysis. While these resource topics may have impacts related to Greater Sage-Grouse conservation that were analyzed in the 2015 Final EIS, they are dismissed from detailed analysis because they have no potentially significant impacts from actions proposed in this RMPA/EIS:

- Geology
- Indian trust resources
- Noise
- Air quality and visibility
- Special designations (e.g., areas of critical environmental concern, research natural areas, wilderness, wilderness study areas, wild and scenic rivers, and national scenic and historic trails)
- Environmental justice
- Wildland fire and fire management
- Wild horses and burros
- Recreation
- Visual resources
- Water resources
- Cultural and heritage resources
- Lands with wilderness characteristics

1.6 Relationship to Other Policies, Plans, and Programs

The BLM recognizes the importance of state and local plans. The BLM will work to be consistent with or complementary to the management actions in these plans when possible to the extent consistent with the laws governing the administration of the public lands.

1.6.1 State Plans

State plans considered during this planning effort are the following:

- Nevada's 2016-2021 Statewide Comprehensive Outdoor Recreation Plan (SCORP)—Assessment and Policy Plan (Nevada Division of State Parks and Department of Conservation and Natural Resources 2016-2020)
- Nevada Comprehensive Preservation Plan (Nevada State Historic Preservation Office 2012–2020)
- Sustainable Preservation: California's Statewide Historic Preservation Plan, 2013–2017 (California State Parks 2013)
- Nevada Department of Wildlife-Wildlife Action Plan (2013)

[1] Military aircraft operations are outside the scope of the Proposed RMPA/Final EIS. This proposed plan amendment does not apply to aircraft activities that are under the jurisdiction of the Federal Aviation Administration or the Department of Defense.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004879

- Greater Sage-Grouse Conservation Plan for Nevada and Eastern California (NDOW 2004)
- Nevada Sage-Grouse Conservation Strategy (State of Nevada 2001, 2004, 2012)
- Nevada Sage-Grouse Conservation Plan (State of Nevada 2014, as amended)
- Nevada's Coordinated Invasive Weed Strategy (Nevada Weed Action Committee 2000)
- Nevada Division of State Lands, Lands Identified for Public Acquisition (Nevada Department of Conservation & Natural Resources 1999)
- State of Nevada Drought Plan (Nevada Department of Conservation and Natural Resources 2012)
- Nevada Division of State Lands, Nevada Statewide Policy Plan for Public Lands (Nevada Department of Conservation & Natural Resources 1985)

1.6.2 Local Plans

Local land use plans considered during this planning effort are the following:

- Carson City Comprehensive Master Plan, Nevada (Carson City 2006)
- Churchill County Master Plan, Nevada (Churchill County 2015)
- Churchill County Water Resource Plan, Nevada (Churchill County 2007)
- City of Caliente Master Plan, Nevada (City of Caliente 2011)
- Douglas County Comprehensive Master Plan, Nevada (Douglas County 2012)
- Douglas County Open Space Plan, Nevada (Douglas County 2007)
- Elko County, Nevada Greater Sage-Grouse Management and Conservation Strategy Plan (September 2012)
- Elko County General Open Space Plan, Nevada (Elko County 2003)
- Elko County Public Lands Policy Plan, Nevada (Elko County 2008)
- Elko County Water Resource Management Plan, Nevada (Elko County 2007)
- Esmeralda County Master Plan, Nevada (Esmeralda County 2011)
- Esmeralda County Public Lands Policy Plan, Nevada (Esmeralda County 2013)
- Eureka County Master Plan, Nevada (Eureka County 2010)
- Humboldt County Master Plan, Nevada (Humboldt County 2002)
- Humboldt County Master Plan Open Space Element Amendment, Nevada (Humboldt County 2003)
- Lander County Master Plan, Nevada (Lander County 2010)
- Lander County Policy Plan for Federally Administered Lands, Nevada (Lander County 2005)
- Lander County Water Resources Plan, Nevada (Lander County 2011)
- Lassen County Fire Safe Plan, California (Lassen County 2012)
- Lassen County General Plan, California (Lassen County 1999)
- Lincoln County Master Plan, Nevada (Lincoln County 2007)
- Lincoln County Open Space and Community Lands Plan, Nevada (Lincoln County 2011)
- Lincoln County Public Lands Policy Plan, Nevada (Lincoln County 2015)
- Lyon County Comprehensive Master Plan, Nevada (Lyon County 2010)

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004880

- Modoc County General Plan, California (Modoc County 1988)
- Nye County Comprehensive Master Plan, Nevada (Nye County 2011)
- Pershing County Master Plan, Nevada (Pershing County 2002)
- Pershing County Natural Resources Management Plan: Natural Resources and Federal or State Land Use, Nevada (Pershing County 2010)
- Shasta County General Plan, California (Shasta County 2004)
- Siskiyou County General Plan, California (Siskiyou County 2010)
- Storey County Master Plan, Nevada (Storey County 1994)
- Title 7 of the Nye County Code (Comprehensive Land Use and Management Plan for Federal and State Lands within Nye County), Nevada (Nye County 2009)
- Tri-Party Framework for Interactions to Address Public Lands Issues in Nye County, Nevada (includes Nye County, the BLM, and Forest Service), Nevada (Nye County1996)
- Truckee Meadows Regional Plan (Washoe County Only), Nevada (TMRPA 2007)
- Washoe County Comprehensive Plan, Nevada (Washoe County 2005a)
- Washoe County Open Space & Natural Resource Management Plan, Nevada (Washoe County 2008)
- Washoe County Water Resources Management Plan, Nevada (Washoe County 2005b)
- Washoe County Master Plan with Elements and Area Plans, Nevada (Washoe County, 2010, as amended)
- Washoe County Regional Open Space & Natural Resource Management Plan, Nevada (Washoe County, 2008)
- White Pine County Public Lands Policy Plan, Nevada (White Pine County 2007)
- White Pine County Water Resources Plan, Nevada (White Pine County 2006)

1.8 Changes between Draft RMPA/EIS and Proposed Plan Amendment/Final EIS

As a result of public comment, cooperating agency feedback, and internal BLM review, the BLM's Preferred Alternative, identified as the Management Alignment Alternative as presented in the May 2018 Draft RMPA/EIS has been modified and is now considered the Proposed Plan Amendment for managing BLM-administered public lands within the RMPA's decision area. The Proposed Plan Amendment is a refinement of the Management Alignment Alternative from the Draft RMPA/EIS, with consideration given to public comments, corrections, and rewording for clarification of purpose and intent. The Draft RMPA/EIS was available for a 90-day comment period, ending on August 2, 2018. Please note that all changes between the Draft RMPA/EIS and Proposed Plan Amendment/Final EIS are highlighted in gray throughout the document for reference.

Summary of Changes in this Proposed Plan Amendment/Final EIS from the Draft RMPA/EIS generally include the following:

- Revisions or adjustments to the Management Alignment Alternative to develop the Proposed Plan Amendment, which include:

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004881

- [Cooperators: discussion regarding mitigation will be placed here after direction from the Department of the Interior is provided to BLM Nevada regarding alignment with IM 2018-093: Compensatory Mitigation.]
- Modifications to the Adaptive Management Strategy (Appendix D) to align with the newly adopted Adaptive Management Strategy adopted by the State of Nevada's Sagebrush Ecosystem Council;

- Clarifications to better explain the purpose and intent of management proposed in the Draft RMPA/EIS and the planning issues being addressed;
- Additions, corrections, and clarifications to Chapter 3 Affected Environment;
- Revisions to Chapter 4, Environmental Consequences, to make corrections and reflect changes in management direction (Proposed Plan Amendment) and subsequent impact analysis;
- Additions to Chapter 5, Consultation and Coordination, to describe the public comment process on the Draft RMPA/EIS;
- Inclusion of a Comment Analysis Report (Appendix G) to reflect BLM's responses to comments received during the 90-day public comment period on the Draft RMPA/EIS; [Cooperators: BLM's third party contractor is still formulating this document.]
- Additions to Chapter 6, References, to include additional references cited in the document;
- Additions to glossary terms that were erroneously omitted in the Draft RMPA/EIS;
- Minor corrections, such as typographical errors; and
- Incorporation of quantitative cumulative effects analysis to Greater Sage-Grouse at the WAFWA Management Zone level.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004882

Executive Summary

Note to readers: For ease of reading, additions, changes, and modifications made between the Draft RMPA/EIS and the Proposed Plan Amendment/Final EIS have been highlighted in gray.

ES.1 Introduction

Greater Sage-Grouse is a state-managed species that is dependent on sagebrush steppe ecosystems. These ecosystems are managed in partnership across the range of the Greater Sage-Grouse by federal, state, and local authorities. Efforts to conserve the species and its habitat date back to the 1950s. Over the past two decades, state wildlife agencies, federal agencies, local partners (county governments, local area work groups, conservation districts, NGOs, etc.), and many others in the range of the species have been collaborating to conserve Greater Sage-Grouse and its habitats. The United States Department of the Interior (DOI) and the Bureau of Land Management (BLM) have broad responsibilities to manage federal lands and resources for the public benefit. Nearly half of Greater Sage-Grouse habitat is managed by the BLM.

In September 2015, the US Fish and Wildlife Service (USFWS) determined that the Greater Sage-Grouse did not warrant listing under the Endangered Species Act of 1973. In its "not warranted" determination, the USFWS based its decision in part on regulatory certainty from the conservation commitments and management actions in the BLM and US Forest Service (Forest Service) Greater Sage-Grouse land use plan amendments (LUPAs) and revisions, as well as on other private, state, and federal conservation efforts. Since 2015 the BLM, in discussion with partners, recognized that several refinements and policy updates would help strengthen conservation efforts, while providing increased economic opportunity to local communities. BLM's multiple use mandate is essential to the success of local customs and culture throughout the Great Basin.

The BLM continues to build upon its commitment to on-the-ground management to promote conservation through close collaboration with State governments, local communities, private landowners, and other stakeholders. **Table ES-1** shows the acres of on-the-ground treatment activity between 2015 and 2017 and planned for 2018, based upon annual budgets allocated by Congress. BLM's accomplishments reflect contributions from programs other than Greater Sage-Grouse, including fuels, riparian, and range management.

Table ES-1
Acres of On-The-Ground Treatment Activity for Fiscal Years 2015 to 2017 and Planned for 2018

Fiscal Year	Conifer Removal	Fuelbreaks	Invasive Species Removal	Habitat Protection	Habitat Restoration	Total
2015	98,876	15,000	63,612	41,003	75,952	294,443
2016	165,963	14,614	66,621	42,305	95,748	385,251
2017	185,032	65,455	124,582	10,428	93,474	479,000
2018[1]	118,384	65,442	68,512	9,240	54,509	316,087

AMERICAN OVERSIGHT

Fiscal Year	Conifer Removal	Fuelbreaks	Invasive Species Removal	Habitat Protection	Habitat Restoration	Total

[1]Planned. These acres do not include treatment activities completed or planned on other federally administered lands, state lands, or private lands.

The BLM is now engaged in a planning effort to further enhance its continued cooperation with western states by ensuring greater consistency between individual state plans and the BLM's multiple-use mission. This executive summary highlights the major components of this planning document and outlines the potential impacts from the proposed management changes. The BLM's efforts seek to improve management alignment in ways that will increase management flexibility, maintain access to public resources, and secure and promote positive Greater Sage-Grouse conservation outcomes and incorporate additional and new information that is considered best available current science.

ES.2 Purpose of and Need for Action

The BLM's purpose and need for this planning action helps define the scope of proposed alternative actions and issues the agency must analyze. In the Federal Land Policy and Management Act (FLPMA), Congress provided the BLM with discretion and authority to manage public lands for multiple use and sustained yield, and declared it the policy of the United States to coordinate the land use planning process with other federal and state plans. Further, FLPMA specifically provides that it neither enlarges nor diminishes the authority of the states in managing fish and wildlife. As the sovereign with the lead role in managing game species, including Greater Sage-Grouse, states play a critical role in conserving and restoring the Greater Sage-Grouse and its habitat. The purpose of this resource management plan amendment/environmental impact statement (RMPA/EIS) is to enhance cooperation with the states by modifying the approach to Greater Sage-Grouse management in existing RMPs to better align with individual state plans and conservation measures and with DOI and BLM policy.

ES.3 Issues and Related Resource Topics Identified Through Scoping

When deciding which issues to address related to the purpose and need, BLM considers points of disagreement, debate, or dispute regarding an anticipated outcome from a proposed action. Issues are based on anticipated environmental impacts; as such, they can help shape the proposal and alternatives.

The BLM used internal, agency, and public scoping to identify issues to consider in the environmental analysis. A summary of the scoping process is presented in Potential Amendments to Land Use Plans Regarding Greater Sage-Grouse Conservation Scoping Report (https://goo.gl/FopNgW).

The sections below lay out how issues raised during scoping, as well as related resource topics, are considered in this RMPA/EIS. Generally, they fall into the following categories:

- Issues and related resource topics retained for further consideration in this RMPA/EIS—These were issues raised during scoping for which alternatives were developed to address the issues.

AMERICAN OVERSIGHT

- Clarification of decisions in the 2015 ARMPA—These are decisions or frameworks in the 2015 ARMPA that require clarification as to their application or implementation. No new analysis is required, as the intentions behind the decisions were analyzed in the 2015 Final EIS.
- Issues and resource topics not carried forward for additional consideration or analysis—These are issues brought up during scoping that are not carried forward in this RMPA/EIS. While some of these issues are considered in this RMPA/EIS, they do not require additional analysis because they were analyzed in the 2015 Final EIS. Others are not carried forward in this RMPA/EIS because they do not further the purpose of aligning with the state's conservation plan or management strategies. Similar to issues, there are resource topics that are not retained for further analysis in this RMPA/EIS. This is because either they are not affected by the changes proposed in **Chapter 2** or because the effect was analyzed in the 2015 Final EIS.

ES.3.1 Issues and Related Resource Topics Retained for Further Consideration in this RMPA/EIS

The issues identified in **Table ES-2**, below, were previously analyzed in the 2015 Final EIS; however, based on the proposed changes, the resource topics and potential impacts that may require additional analysis are as follows: Greater Sage-Grouse, vegetation (including weeds and special status vegetation), land use and realty, renewable energy, minerals and energy, socioeconomics, livestock grazing, and comprehensive travel management; therefore, these resource topics are carried forward for analysis.

Table ES-2 identifies the corresponding resource topics to which the issues relate. The level of detail in the description of each resource topic and the impacts from implementing any of the alternatives also are described in **Chapters 3** and **4**.

Table ES-2
Issues and Related Resource Topics

Issues	Resource Topics Related to the Issues
Modifying Habitat Management Area Designations • Need for adjusting habitat management areas (HMAs) so that they reflect the best available science based on continually evolving updates to habitat and use modeling (Coates et al. 2016) and are consistent with habitat management areas identified by the State of Nevada and recommended by California Department of Fish and Wildlife (CDFW). This would provide consistency in management across jurisdictions and to third parties operating on public and state or private lands in Nevada and Northeastern California. • Integration of flexibility into the plans to be able to adjust habitat management area designations (and their associated allocations) without the need for a plan amendment, based on the best available science. • Maintaining all habitat areas as identified in the ARMPA, including sagebrush focal areas (SFAs), which should be provided with the most protections.	• Greater Sage-Grouse • Vegetation • Land Use and Realty • Renewable Energy • Minerals and Energy • Socioeconomics • Livestock Grazing • Comprehensive Travel Management
Removing Sagebrush Focal Area Designations • Ensure it is clear the SFA mineral withdrawal has been cancelled and the justified reasoning for this cancellation. Is SFA designation relevant in absence of a mineral withdrawal? o Analyze the inclusion and removal of SFAs, in response to the March 31, 2017, United States District Court for the District of Nevada court order.	• Greater Sage-Grouse • Vegetation • Land Use and Realty • Renewable Energy • Minerals and Energy • Socioeconomics

Issues and Related Resource Topics

Issues	Resource Topics Related to the Issues
• Is this habitat designation needed to adequately maintain conservation of Greater Sage-Grouse habitat?	• Livestock Grazing • Comprehensive Travel Management
Adaptive Management • Ensure federal, state, and local partners are part of the causal factor analysis process • Lack of flexibility with implementing and removing hard trigger adaptive management responses • Better alignment with DOI guidance on implementation of the adaptive management process • Incorporate best available science, including local data and information, into the adaptive management strategy • Utilize collaborative processes with stakeholders, appropriate state and local agencies, and authorized land users when developing and implementing management responses to any trigger met or surpassed.	• Greater Sage-Grouse • Vegetation • Land Use and Realty • Renewable Energy • Minerals and Energy • Socioeconomics • Livestock Grazing • Comprehensive Travel Management
Allocation Exception Process • Clarify and make consistent the various exception allocation processes • Verify use of landscape-scale mapping of priority habitat area (PHMA), general habitat management area (GHMA), and other habitat management areas (OHMA) in regards to the application of allocations and stipulations • Address restrictions on actions related to public health and safety, existing infrastructure, and administrative functions that serve a public purpose • Address inconsistencies with existing federal legislation and the 2015 Record of Decision (ROD)/ARMPA that include land tenure adjustments, including, but not limited to, disposals, exchanges, transfers, and Recreation and Public Purpose actions	• Greater Sage-Grouse • Vegetation • Land Use and Realty • Renewable Energy • Minerals and Energy • Socioeconomics • Livestock Grazing • Comprehensive Travel Management
Mitigation • Alignment with the State of Nevada's mitigation strategy to the greatest extent possible • Provide consistency in application of mitigation, quantification and tracking of mitigation actions. • [Cooperators: issue statement regarding mitigation will be placed here after direction from the Department of the Interior is provided to BLM Nevada regarding alignment with IM 2018-093: Compensatory Mitigation.]	• Greater Sage-Grouse • Vegetation • Land Use and Realty • Renewable Energy • Minerals and Energy • Socioeconomics • Livestock Grazing • Comprehensive Travel Management
Seasonal Timing Restrictions • Alignment with State of Nevada's conservation plan and management strategies with the State of California, to the greatest extent possible • Consider exceptions and/or modifications to seasonal timing restrictions to allow for beneficial or neutral projects to occur in a timely manner • Seasonal timing restrictions need to be adjusted to allow for public health and safety concerns and time sensitive administrative functions that serve a public purpose to be addressed without delay	• Greater Sage-Grouse • Vegetation • Land Use and Realty • Renewable Energy • Minerals and Energy • Socioeconomics • Livestock Grazing • Comprehensive Travel Management
Modifying Habitat Objectives • Consideration of site potential based on ecological site descriptions and their associated state and transition models • Consistency with State of Nevada's desired habitat conditions	• Greater Sage-Grouse • Vegetation • Land Use and Realty • Renewable Energy

Table ES-2
Issues and Related Resource Topics

Issues	Resource Topics Related to the Issues
• Incorporation of recent science supporting modifications • Clarify that Habitat Objectives are actually desired outcomes expressed as goals consistent with BLM Planning Handbook (H-1601-1).	• Minerals and Energy • Socioeconomics • Livestock Grazing • Comprehensive Travel Management

ES.3.2 Clarification of Planning Decisions in the 2015 ARMPA

The following issues identified in existing planning decisions in **Table ES-3** were raised during scoping. These issues require clarification to language in the 2015 ROD/ARMPA but do not require new analysis. The clarifying language for these planning decisions is displayed in this planning document to communicate how these issues are being addressed through plan maintenance, policy, or implementation.

Table ES-3
Clarification Issues

Clarification Issue	Clarifications Addressed through Plan Maintenance, Policy, or Implementation
Modifying Lek Buffers • Clarification regarding the application of lek buffer-distances	*Plan Maintenance* - Management Decisions SSS 2(D) and SSS 3(C) from the ARMPA have been clarified to resolve conflicting statements regarding how the BLM will "apply" lek buffers contained in the USGS Report *Conservation Buffer Distance Estimates for Greater Sage-Grouse – A Review* (Open File Report 2014-1239). Management Decisions SSS 2(D) and SSS 3(C) have been revised to read as follows: *In undertaking BLM management actions [in PHMA and GHMA], and consistent with valid and existing rights and applicable law in authorizing third-party actions, the BLM will utilize the lower end of the interpreted range of lek buffer-distances and guidance identified in the USGS' Open File Report 2014-1239 to establish the evaluation area around leks that will be used to analyze impacts during project-specific NEPA, including scientifically justifiable departures based on local data, topography, and other factors, in accordance with Appendix B.* Appendix B has also been revised to reflect this clarified decision language.
Changing Requirements for Required Design Features • Clarify the application of required design features and opportunities to deviate from them	*Plan Maintenance* - Appendix C includes a required design features (RDFs) worksheet that BLM Nevada and Northeastern California will complete for all proposed activities authorized in PHMA, GHMA, and OHMA. This worksheet clearly defines the rationale for dismissing certain RDFs when they are not appropriate for specific proposed activities.
Fire and Invasives • Provide the necessary prioritization of all three aspects of fire management: pre-suppression,	*Policy* - If the Great-Basin-Wide Programmatic Environmental Impact Statements (PEISs) to Reduce the Threat of Wildfire and Support Rangeland Productivity

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004887

Table ES-3
Clarification Issues

Clarification Issue	Clarifications Addressed through Plan Maintenance, Policy, or Implementation
suppression, and rehabilitation and find ways to expedite on-the-ground treatments to address this present and widespread threat in the Nevada and Northeastern California Sub-region	are completed, BLM Nevada and California will issue statewide policies that will instruct BLM field and district offices to incorporate by reference the analysis contained in the PEISs for on-the-ground environmental analysis, in an effort to expedite on-the-ground activities that will address the present and widespread threat of fire and invasives in the Nevada and Northeastern California sub-region. The Draft PEISs are tentatively scheduled for publication in December 2018, with Final PEISs tentatively scheduled for publication in June/July 2019. The PEISs will not modify any proposed land use plan decisions (including HMA designations) specified in this RMPA.
Increase Opportunities for Outcome-Based Grazing • Identify and complete a number of authorizations to support the development of rigorous and defensible outcome-based grazing	*Implementation* - BLM Nevada and California will continue to pursue outcome-based grazing initiatives that will exhibit a new management paradigm that BLM managers and livestock operators can use to establish management practices that can achieve specific management objectives that respond to changing, on-the-ground conditions such as wildfires, high moisture years, or drought. This will better ensure healthy rangelands, high-quality wildlife habitat, and economically sustainable ranching operations.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004888

Table ES-3
Clarification Issues

Clarification Issue	Clarifications Addressed through Plan Maintenance, Policy, or Implementation
Land Health Assessments and Habitat Objectives • Management Decisions LG 5 (and references of these decisions in Management Decisions LG 6 and LG 10) within the existing ARMPA are inconsistent with 43 CFR 4160.1	*Plan Maintenance* - Management Decision LG 5 (page 2-25 through 2-26, ARMPA), as written, is not consistent with existing BLM grazing regulations (43 CFR 4160.1) or recent policies (WO Instruction Memorandum 2018-023), as it provides direction to implement interim management strategies until appropriate modifications are incorporated through the permit renewal process (if results from a land health assessment indicate that Greater Sage-Grouse habitat objectives are not met and grazing is a causal factor). This management decision, however, does not identify that these interim management strategies need to be within the existing terms and conditions of a grazing permit in order to implement them immediately. Under 43 CFR 4160.1 (existing BLM grazing regulations), the BLM must issue a proposed/final decision on any affected applicant, permittee or lessee, and interested public when modifying a grazing permit. If the interim management strategies are within the existing terms and conditions of a grazing permit, they can be implemented immediately; however, if the selected interim management strategies are outside of the existing terms and conditions, the BLM will need to comply with NEPA and the decision processes provided in 43 CFR 4160. For this reason, Management Decision LG 5 will be removed, as well as references to Management Decision LG 5 in Management Decisions LG 6 and LG 10.

ES.3.3 Issues and Resource Topics Not Carried Forward for Additional Analysis (Scoping Issues Outside the Scope and Scoping Issues Previously Analyzed)

The following issues were raised during scoping and are not carried forward for a variety of reasons. For example, population-based management is not carried forward for detailed analysis because the BLM does not manage species populations; that authority falls under the jurisdiction of the States of Nevada and California.

Other issues were analyzed in the 2015 Final EIS, and no significant new information related to these issues has emerged since that time. Therefore, the following issues do not require additional analysis in this RMPA/EIS:

- Effects of NSO stipulations on Greater Sage-Grouse habitat on non-BLM-administered
- Mitigation for oil and gas development
- Prioritization of fluid mineral leases outside of PHMA and GHMA
- Numerical noise limitations within PHMA
- Contribution of disturbance caps toward Greater Sage-Grouse conservation objectives
- Wildfire response to vegetation treatments

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004889

- Habitat assessment framework
- Mitigation standard

Other issues were evaluated as part of the 2015 Final EIS. For the same reasons they were dismissed in the 2015 Final EIS, they are not carried forward for detailed analysis in this RMPA/EIS:

- Hunting Greater Sage-Grouse
- Predator control[1]
- Aircraft overflights in PHMA/GHMA[2]

The resource topics below are dismissed from detailed analysis because they have no potentially significant impacts from actions proposed in this RMPA/EIS:

- Geology
- Indian trust resources
- Noise
- Air quality and visibility
- Special designations (e.g., areas of critical environmental concern, research natural areas, wilderness, wilderness study areas, wild and scenic rivers, and national scenic and historic trails)
- Environmental justice
- Wildland fire and fire management
- Wild horses and burros
- Recreation
- Visual resources
- Water resources
- Cultural and heritage resources
- Lands with wilderness characteristics

ES.4 Alternatives Considered

Alternatives development and analysis is the heart of an EIS. The alternatives considered in this document address all the issues brought forward by the public and considered by BLM. The comparative analysis between alternatives establishes a framework for decision makers to understand important trade-offs and identify the most effective way to meet the purpose and need and BLM's multiple use mission. The alternatives analysis can support the BLM in adapting its management when information and circumstances change.

[1] While BLM does not have the authority to carry out certain predator control actions (such as permitting take permits), BLM is committed to working with partners who do, particularly in degraded habitat (recovering burned areas, areas of pinyon and juniper encroachment, etc.) where predators are having a disproportionate impact on local populations.

[2] Military aircraft operations are outside the scope of the Proposed RMPA/Final EIS. This proposed plan amendment does not apply to aircraft activities that are under the jurisdiction of the Federal Aviation Administration or the Department of Defense.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-004890

ES.4.1 No-Action Alternative

Under the No-Action Alternative, the BLM would not amend the current RMPs amended by the Nevada and Northeastern California Greater Sage-Grouse Approved Resource Management Plan Amendment. Greater Sage-Grouse habitat would continue to be managed under current management direction. Goals and objectives for BLM-administered lands and federal mineral estate would not change. Allowable uses and restrictions would also remain the same, as they pertain to such activities as mineral leasing and development, recreation, lands and realty, and livestock grazing. This alternative also includes the designation of SFAs, which is analyzed in **Chapter 4**.

ES.4.2 Management Alignment Alternative

This alternative was identified as the Preferred Alternatives in the Draft RMPA/EIS. This alternative makes modifications to the No-Action Alternative to better align BLM management direction with the State of Nevada's Conservation Plan and conservation strategies with the CDFW to reach a "combination of balanced and diverse resource uses," as required by FLPMA. This alternative was also developed in a collaborative process with cooperating agencies to support conservation outcomes for Greater Sage-Grouse.

The BLM continues to build upon the 2015 planning effort as envisioned in SO 3353 by collaborating with states and stakeholders to improve compatibility between federal management plans and other plans and programs at the state level, while ensuring consistency with the BLM's multiple use mission and protection of Greater Sage-Grouse habitat. This enhanced cooperation between the BLM and the states would lead to improved management and coordination with states across the range of Greater Sage-Grouse. These modifications include updating and making adjustments to habitat management areas and including language that would allow the BLM to update them through plan maintenance, when appropriate, based on the most updated best available science and habitat data; removing SFA designations; incorporating new science into the adaptive management strategy and replacing predetermined hard trigger responses with a clear causal factor analysis process to determine the appropriate management responses and to address the decline in Greater Sage-Grouse populations and/or habitat; revising and simplifying an allocation exception process to allow for the consideration of projects within designated habitat management areas (provided they meet prescribed criteria); solidifying the BLM's commitment to use the most current version of the State of Nevada's Habitat Quantification Tool to quantify impacts to GRSG and their habitat; and identifying that seasonal timing restrictions and modifying habitat objectives would be addressed in coordination with the Nevada Division of Wildlife (NDOW) and CDFW.

[Cooperators: discussion regarding mitigation will be placed here after direction from the Department of the Interior is provided to BLM Nevada regarding alignment with IM 2018-093: Compensatory Mitigation.]

Consistent with the Notice of Cancellation of the BLM's application to withdraw SFAs from locatable mineral entry (82 *Federal Register* 195, October 11, 2017, p. 47248), this alternative would also remove the recommendation for withdrawal. The effects of such action are included in **Chapter 4**.

ES.5 Development of the Proposed Plan Amendment

The Proposed Plan Amendment represents the BLM's proposed approach for meeting the purpose and need consistent with the agencies' legal and policy mandates. The Draft RMPA/EIS was issued for a 90-

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004891

day public review and comment in May 2018. The BLM assessed and considered public comments, received both individually and collectively, during the public review period of the Draft RMPA/EIS. The BLM has crafted the Proposed Plan Amendment, largely based on the Preferred Alternative (Management Alignment Alternative), which was identified in the May 2018 Draft RMPA/EIS, with modifications based on review of public comments received on the Draft RMPA/EIS. In addition, special expertise input and comments received from cooperating agencies helped shape the Proposed Plan Amendment. Changes in BLM regulations, policy, and guidance were another factor taken into consideration in its development. Key policy and guidance changes center on compensatory mitigation and adaptive management. BLM responded to all substantive comments received on the DRMPA/DEIS (Appendix G). In preparing responses to comments, the BLM referenced responses based on similar comments. The BLM also included a "Comment Noted" applicable to some comments. This response is intended to inform the commenter that the comment was taken into consideration in the development of the Proposed Plan Amendment.

ES.6 Summary of Environmental Consequences

This section includes a summary comparison of environmental consequences from implementing the No-Action Alternative, the Management Alignment Alternative, and the Proposed Plan Amendment. A detailed description of environmental consequences is included in **Chapter 4**.

Table ES-4
Comparison of Environmental Consequences

No-Action Alternative	Management Alignment Alternative	Proposed Plan Amendment
Greater Sage-Grouse		
Under the No-Action Alternative, the designation of 2,767,552 acres as SFAs and recommendation for withdrawal would have beneficial impacts on Greater Sage-Grouse by reducing mining activities that may cause disturbance to Greater Sage-Grouse and its habitat. The nature and type of effects on Greater Sage-Grouse and its habitat is described in Section 4.4.10 of the Final EIS (BLM 2015) and the 2016 SFA Withdrawal EIS, Section 4.5.	The Management Alignment Alternative would ensure that current and future renditions of habitat management area boundaries reflect Greater Sage-Grouse habitat on the ground and guide management actions appropriately. As habitat use and modeling is updated (such as updates contained in the latest iteration from Coates et al. 2016), the states will consider adopting these results to depict HMA and BSUs boundaries within the states' plans and strategies, and then BLM will consider adopting the HMA and BSU boundaries, along with the allocations associated with each Habitat Management Area (**Table 2-1** in Chapter 2). This would help to conserve the species by ensuring allocations and any of their associated restrictions are applied in the appropriate areas, while allowing infrastructure and economic development to occur in areas that would not impact the species. Updating the allocation exception process would not have impacts on Greater Sage-Grouse and its habitat. Adaptive management hard and soft triggers updates would ensure that the BLM is utilizing the best available science (such Coates et al. 2017 for	Same as Management Alignment Alternative.

AMERICAN OVERSIGHT

Table ES-4
Comparison of Environmental Consequences

No-Action Alternative	Management Alignment Alternative	Proposed Plan Amendment
	population triggers) to adjust management. Impacts on Greater Sage-Grouse and its habitat would be beneficial. The mitigation standard (net conservation gain) would be retained in the Management Alignment Alternative. Improving coordination among state and federal partners, along with using consistent metrics for tracking changes in habitat quality and quantity over time, is anticipated to benefit the species through enhanced knowledge of baseline conditions and restoration/reclamation/mitigation effectiveness. Beneficial impacts were identified for addressing seasonal timing restrictions and modifying indicators and their values in the Habitat Objectives table in the 2015 Final EIS). Modifying or removing seasonal timing restrictions allows beneficial Greater Sage-Grouse projects (i.e., juniper and/or pinyon removal) to be implemented in an expedited manner and modifying the habitat objectives would improve the efficiency of Greater Sage-Grouse habitat management by using the best available science to inform Greater Sage-Grouse habitat requirements. SFAs would not be designated under this alternative and therefore would not be recommended for withdrawal from the Mining Law of 1872; however, they would still be managed according to their underlying Greater Sage-Grouse Habitat Management Area designation (e.g., PHMA). Impacts on Greater Sage-Grouse would be consistent with those described in the 2015 Final EIS (BLM 2015).	
Vegetation and Soils		
Under the No-Action Alternative, 2,767,552 acres of Greater Sage-Grouse HMA would be designated as SFAs and recommended for withdrawal. This alternative would reduce disturbance to Greater Sage-Grouse and its habitat from associated mining activities and would have beneficial impacts on vegetation and soils; of the effects of SFAs on vegetation and soils are described in Section 4.5.10 of the 2015 Final EIS.	The Management Alignment Alternative would not substantially alter vegetation and soil resources because they would continue to be managed as underlying Greater Sage-Grouse HMAs (i.e., PHMA, GHMA, and OHMA). The difference between the nature and type of impacts described would be negligible. These impacts are discussed in Section 4.5 of the 2015 Final EIS (BLM 2015).	Same as Management Alignment Alternative.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004893

Table ES-4
Comparison of Environmental Consequences

No-Action Alternative	Management Alignment Alternative	Proposed Plan Amendment
Land Use and Realty		
Under the No-Action Alternative, the designation of SFAs would be specific to recommending lands for withdrawal from the Mining Law of 1872. Because this would not alter the underlying allocations for land use and realty associated with Greater Sage-Grouse HMA, the nature and type of effects on land use and realty described in Section 4.13.10 of the Final EIS (BLM 2015) would be the same as under this alternative.	Adopting the changes proposed in the Management Alignment Alternative would result in slight boundary adjustments for where land use and realty allocations are applied. Given the relatively minor shift in PHMA (-0.5%) and GHMA (+0.5%), these changes would not result in discernible differences from the No-Action Alternative. The decrease in OHMA (-17%) would have negligible impacts on land use and realty because no allocation decisions are tied to OHMA; therefore, the difference between the nature and type of impacts described would be negligible. These impacts are discussed in Section 4.13 of the 2015 Final EIS (BLM 2015).	Same as Management Alignment Alternative.
Renewable Energy Resources		
Under the No-Action Alternative, 2,767,552 acres of Greater Sage-Grouse HMA would be designated as SFAs and recommended for withdrawal. Because this would not alter the underlying allocations for renewable energy resources associated with Greater Sage-Grouse HMA, the nature and type of effects on renewable energy resources described in Section 4.14.10 of the Final EIS (BLM 2015) would be the same as under this alternative.	Adopting the changes proposed in the Management Alignment Alternative would result in slight boundary adjustments for where renewable energy allocations are applied. Given the relatively minor shift in PHMA (-0.5%) and GHMA (+0.5%), these changes would not result in discernible differences from the No-Action Alternative. The decrease in OHMA (-17%) would make additional areas available for solar development, but this is not expected to result in increased development proposals, based on the reasonably foreseeable development scenarios discussed in the 2015 Final EIS.	Same as Management Alignment Alternative.
Minerals and Energy		
Under the No Action Alternative, 2,767,552 acres of Greater Sage-Grouse HMA would be designated as SFAs and recommended for withdrawal. The withdrawal would reduce the availability of geology and mineral resources in Nevada only. New mines would be reduced by 33 percent and the number of exploration projects would be reduced by 41 percent (BLM 2016). The reduction in mining activity would also result in socioeconomic impacts, which are discussed in Section 4.10.1. The nature and type	Adopting the changes proposed in the Management Alignment Alternative would result in slight boundary adjustments for where minerals and energy allocations are applied. Given the relatively minor shift in PHMA (-0.5%) and GHMA (+0.5%), these changes would not result in discernible differences from the No-Action Alternative. The decrease in OHMA (-17%) would be negligible because no allocation decisions are tied to OHMA; therefore, the difference between the nature and type of impacts described would be negligible. These impacts are discussed in Section 4.15 of the 2015 Final EIS (BLM 2015).	Same as Management Alignment Alternative.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-004894

Table ES-4
Comparison of Environmental Consequences

No-Action Alternative	Management Alignment Alternative	Proposed Plan Amendment
of effects on minerals and energy as described in Section 4.15.10 of the Final EIS (BLM 2015) would be the same.		
Socioeconomics		
Under the No-Action Alternative the mining industry could be adversely affected from having fewer potential locations to develop and explore. The economic impacts in Nevada would differ considerably, depending on whether the one new mine that was developed was a large gold/silver mine or a smaller barite mine. Withdrawal would support approximately 414 to 739 fewer jobs in Nevada, and between $25.8 and $56.5 million less in annual labor income (BLM 2016). SFA designation would also reduce the number of exploration projects from 78 to 32 in Nevada. Exploration would be expected to fall by approximately 41 percent (approximately $3.8 million) (BLM 2016).	Adopting the changes proposed in the Management Alignment Alternative and not recommending SFAs for withdrawal could lead to a corresponding increase in populations and employment for the counties that would see new mine development. Within the analysis area, the projected economic impacts from operation of future mines would result in 801 jobs, a labor income of $62 million, and approximately $12 million in state/local tax revenue. With the exception of not including SFAs, the difference between the nature and type of impacts described would be negligible, given the similarity of the proposed management actions. These impacts are discussed in Section 4.21 of the 2015 Final EIS (BLM 2015) and Section 4.3.6 of the 2016 SFA DEIS (BLM 2016).	Same as Management Alignment Alternative.
Livestock Grazing		
Under the No-Action Alternative, the designation of SFAs would be specific to recommending lands for withdrawal from the Mining Law of 1872. Because this would not alter the underlying allocations for livestock grazing associated with Greater Sage-Grouse HMA, the nature and type of effects on livestock grazing described in Section 4.10.10 of the Final EIS (BLM 2015) would be the same as under this alternative.	Despite minor differences between the actions described in the Management Alignment Alternative and those analyzed in the 2015 Final EIS, the difference between the nature and type of impacts described would be negligible. These impacts are discussed in Section 4.10 of the 2015 Final EIS (BLM 2015).	Same as Management Alignment Alternative.
Comprehensive Travel Management		
Under the No-Action Alternative, the designation of SFAs would be specific to recommending lands for withdrawal from the Mining Law of 1872. Because this would not alter the underlying allocations for travel and transportation management	Adopting the changes proposed in the Management Alignment Alternative would result in slight boundary adjustments for where travel and transportation allocations are applied. Given the relatively minor shift in PHMA (-0.5%) and GHMA (+0.5%), these changes would not result in discernible	Same as Management Alignment Alternative.

Subject: President Trump Continues to Support the American Worker
Attachments: Private Sector Workforce Pledges.pdf; Press Call on Our Pledge to America's Workers.pdf; Remarks by President Trump at Our Pledge to America's WorkersEvent.pdf

State Leaders and Staff,

Today, President Donald J. Trump reiterated his commitment to workforce development and highlighted how the Administration's Pledge to America's Workers is generating new training opportunities for millions of Americans. Businesses, trade associations, and other private organizations are responding to President Trump's call and have now pledged to educate and train more than six million workers. Additionally, a bipartisan group of 41 governors have signed the pledge (complete list can be found below).

Attached is a readout from this morning's press briefing call, transcript of today's meeting at the White House, and a list of the pledges from the private sector.

Governor's Pledge to America's Workers:

AMERICAN OVERSIGHT

NV-DA-20-0615-A-004899

AMERICAN OVERSIGHT

PRESIDENT DONALD J. TRUMP'S COMMITMENT TO WORKFORCE DEVELOPMENT GENERATES TRAINING OPPORTUNITIES FOR MILLIONS OF AMERICANS

"We're asking businesses and organizations across the country to sign our new pledge to America's workers." – President Donald J. Trump

ANSWERING THE PLEDGE: Companies and associations are responding to President Donald J. Trump's call and pledging to educate and train more than 6 million workers.

- Companies and associations continue to sign the Pledge to America's Workers and have now committed to provide more than 6 million educational and training opportunities.
    - With these new opportunities, millions of American workers will have the skills and training to advance their careers and earn bigger paychecks.
    - These opportunities were secured through private sector pledges, not taxpayer dollars.
    - Further, a bipartisan group of 41 governors have signed a pledge to America's workers.
- President Trump launched the pledge in late July, prompting more than 20 companies and associations to pledge more than 3.8 million training opportunities over the next five years.
    - Walmart pledged 1,000,000 new opportunities.
    - IBM pledged 100,000 new opportunities.
    - FedEx pledged more than 500,000 new opportunities.
    - Other companies included Apple, Boeing, and Lockheed Martin, and more.
- Since then, more than 100 new companies and associations have joined these efforts to bring the total to more than 6 million new opportunities.
    - IPC, the Association Connecting Electronics Industries, is pledging 1 million new opportunities.
    - AT&T is pledging 200,000 new opportunities.
    - The National Association of Landscape Professionals is pledging 150,000 opportunities.

DEVELOPING OUR WORKFORCE: President Trump has prioritized workforce development to better train and equip American workers.

- Reflecting his commitment to preparing our Nation's workforce, President Trump signed an Executive Order creating the National Council for the American Worker in July 2018.
- The Council, comprised of senior Federal officials, is creating a national strategy to ensure our students and workers have the education and training needed to compete in today's economy.
- The President also established an Advisory Board comprised of business, non-profit, and education leaders to provide recommendations to the Council.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-004901

MEETING JOB MARKET DEMANDS: The American economy is roaring back to life and offering workers more and more opportunities that require new skills and training.

- As a result of President Donald Trump's policies, the economy is booming and providing workers with an unpreceded number of job opportunities.
    - The unemployment rate has reached a 49 year low.
    - There are a record 7.1 million job openings in the United States.
    - The record number of job openings is bringing workers back off the sidelines who had been pushed out of the workforce.
- Workers are in high demand as employers report challenges in locating individuals with the skills and training to fill open positions.
    - The rapidly changing modern economy will require new skill sets for our future workforce as new technology and automation grows.

Click above for video from today's event.

Please let us know if you have any questions.

Sincerely,
The White House Office of Intergovernmental Affairs

Dan Horning

Office of the Press Secretary
FOR IMMEDIATE RELEASE
October 31, 2018

REMARKS BY PRESIDENT TRUMP ADVISOR TO THE PRESIDENT IVANKA TRUMP AND DIRECTOR OF THE NATIONAL ECONOMIC COUNCIL LARRY KUDLOW AT OUR PLEDGE TO AMERICA'S WORKERS EVENT

State Room

2:35 P.M. EDT

MR. KUDLOW: Welcome, everybody. I'm Larry Kudlow. I hope I'm hooked up with the mic. I believe I am. We are -- we're here to celebrate, actually. That's what we're going to call this. To celebrate the new American workforce, is what I'm calling it. The new American workforce in the middle of an economic boom.

And one person has gone around the country championing, crusading, so that every worker can be -- listen to this word, it's one of my favorite words -- "reskilling." Reskilling. We've all got -- later on, I'm going to ask her about reskilling old broadcasters and NEC directors. (Laughter.) And maybe more.

Anyway, the headline here is you have a new announcement now. This is private sector, okay? Private companies. No government. No government money. But dealing with the American workforce so it can fit in the missing links between job openings and folks who want to work.

Ivanka Trump, tell us about it.

MS. TRUMP: Thank you, Larry. And thank you for -- for this opportunity. So we're sitting in a room today surrounded by companies who have committed to investing in their workforces and workers who have benefitted, and students, from those programs.

The reality is that we have an incredible economy, a robust economy. And that's because of deregulation, because of tax reform. And for the first time in history, we have more vacant jobs than we have unemployed workers to fill them.

And so this represents an enormous opportunity for us to think about making sure that every American worker is equipped with the skills they need, whether they're in high school and

AMERICAN OVERSIGHT

they're looking to graduate and have a job ready for them upon graduation, or whether they're a mid- to late-career worker who's looking for an opportunity to learn a new skill or learn a new trade.

So we've been doing that. The President, back in July, announced a call to action where he wanted the private sector to step up and start to take responsibility and take a commitment for investing in their own workforce. They did that.

Back at the end of July, we announced over 3.5 million jobs created by companies such as Apple and FedEx, Microsoft and Walmart, and so many others.

Since that period of time, more than 120 additional companies have signed our Pledge to America's Workers. And as Larry noted, no federal funds are involved in this at all. And they're committing to retraining, creating new jobs, creating enhanced careers opportunities, apprenticeship, learn-while-you-earn opportunities. So several of those employers are here with us today.

We've got the CEO from Textron, who is -- has committed to 22,000 opportunities to train workers in the aviation sector. So thank you very much for that commitment. Ford Motor Company is committed to providing 55,000 new jobs and opportunities in the automotive sector. AT&T has committed to [offer] 200,000 ~~new jobs~~ [employees] ~~and~~ [reskilling] opportunities. And IPC -- John, the CEO, thank you so much -- this association that represents electronic assembly industry whose members have committed a total of 1 million new jobs and training opportunities. So just incredible.

THE PRESIDENT: Stand up, please.

MS. TRUMP: Please, yes. (Applause.)

MR. KUDLOW: And so the headline is, you're up to --

MS. TRUMP: We're up to 6.3 million new jobs.

MR. KUDLOW: Which is incredible. (Applause.) Incredible.

MS. TRUMP: And if you think about that in context, that represents 5 percent of the current workforce. So it's really -- it's really remarkable. And really, this is that call to action to the private sector to invest in the current and the future workforce. And we're going to continue to have the private sector sign our pledge and agree to making this type of investment.

With that, while the last event and the last time we were here announcing the launch of the pledge, today we really wanted to focus on the workers that benefit from it. So in my travels -- and I've been to job training programs in now 14 states across the country, and really seen the best-in-class things that are happening on a state level -- thank you, Governor Bevin, for all that

AMERICAN OVERSIGHT

you're doing -- and on a private sector level.

But I've met some remarkable people, many of whom are in this room. I'd like to briefly introduce Eric, who I was just in eastern Kentucky with, who went from a job in the coalmining industry to now a CNC machining instructor. He was so good that they wanted to keep him to train their other workers. So maybe, Eric, if you wouldn't mind standing and telling us a little bit about your story.

MR. OWENS: Like he said, I was a laid-off coalminer. I worked in the coalmines for 30 years. I worked my way through it all. I was an electrician when I was laid off. I found myself without anything to, you know, support my family with. What am I going to do? Unemployment is not going to do it. I'm not old enough to be retired yet. So I got to work every day of my life. Yep. So I got the opportunity through Paintsville CAP office to give me the knowledge of the CNC machine school that had just opened up there in Paintsville. I was in the first class. Went through the 16-week course. Took to it; understood it, become a part of it. They decided to keep me there and I help with other students. We're on our third class now. We have people working in Louisville, Winchester, all around the surrounding area.

But those guys, you know, they want to come home too and then work right there in their areas. So we're hoping that with the school and the jobs that we're creating, we'll bring industry in and we'll all flourish. Just bring it on. (Laughter and applause.) Thank you.

MS. TRUMP: I saw firsthand -- I saw firsthand just how amazing Eric is and the work that he does and the instruction he's given to so many in that facility. So, really amazing.

And, Stacia, I met you in Houston. And Stacia is currently training to be an apprentice and is valedictorian of her class, graduating I believe just in a couple months. And is looking forward to a career as a pipefitter.

I should also mention that you're a Marine Corps veteran. So would you share your story with us, Stacia?

MS. BRIGHTMON: As she said, my name is Stacia Brightmon. I'm from Houston, Texas. I'm the proud mother of two boys and I'm a Marine Corps veteran. I currently -- my oldest son is also a Marine as well, stationed at MCA Cherry Point.

Following my career in the Marine Corps, I found myself unemployed working a bunch of dead-end jobs. And I was looking for something more than just a job; I wanted a career. So I was approached by S&B for their women's apprentice program, which is an earn-while-you-learn program.

At that time, I was kind of discouraged because the oil and gas industry is not an industry that has a lot of respect for women and has a lot of respect for females. So I went and I spoke with my pastor, and my pastor gave me some words of advice. She told me that, "Be the change that I

AMERICAN OVERSIGHT

want to see. Be the woman that can go out there and make that difference, that can earn the women respect." So I agreed to the women's apprenticeship program from S&B. It's an 11 -- it's a 16-week course and we're on our 11th week. And as Ms. Ivanka said, yes, I am the valedictorian of our class.

I appreciate S&B for the opportunity that it has given me. Not only do I have a job, now I have a career. And I have a career that I can lean on and that I can look forward to and that will take me further. (Applause.)

MS. IVANKA: Amazing. Amazing. Congratulations.

And lastly, I'd like to introduce, Anna. Anna, I met in Pittsburgh, in August, in Robotics Row. And Anna -- and I see serval of her classmates are part of the FIRST Robotics Team. And, hi, ladies. They are doing just incredible things in the field of STEM, and they're competing both in Pennsylvania and internationally, and are really our next generation of entrepreneurs, engineers, innovators, and really inspiring.

So, Anna, will you share with us some of your goals and your story?

MS. NESBITT: Yeah, my name is Anna Nesbitt. I'm a sophomore in high school. I am -- as Ms. Trump said, I am a part of a FIRST Robotics Team called "Girls of Steel Robotics." You can see three of the other girls on our team right over there.

Every year, our robotics team of around 50 girls from the greater Pittsburgh area meets at Carnegie Mellon University, and we build a 120-pound robot in six weeks. Once we build the robot, then we go to international competitions and we compete with it through a game that FIRST designs.

But these teams are so much more than just about robotics. We -- each girl on our team is part of a business sub -team and a technical sub-team which allows girls to be able to spend one day a week writing a business plan and the next day of a week welding.

And it's really teaching girls on our team, and on all FIRST programs similar to ours, real-world skills that you could not get from sitting behind a desk in a classroom. So the things that I've learned through Girls of Steel, and been empowered to try through Girls of Steel, I know are going to shape my future.

And yeah, I'm really thankful for the opportunities that we've had through these after-school programs in STEM. (Applause.)

MS. TRUMP: Well, thank you. Thank you for sharing your story. And I thought that would set a nice tone for a broader discussion about the economic opportunity that's been -- being created by President Trump and this administration.

AMERICAN OVERSIGHT

So, Larry, I'll kick it over it over to you now.

MR. KUDLOW: Thank you. Thank you, Ivanka.

By the way, young lady, robot building -- a lot of people are worried about the future with robots. But somebody has got -- somebody has to build them. Somebody has got to service them. Somebody has to keep them going. There's a lot of jobs there. You've got one. I think you illustrate an important point.

MS. NESBITT: Yeah, definitely. (Laughter.) Yeah -- well, yes. Girls of Steel really, and all FIRST Robotics programs, there's tons of scholarships through them. And you come out of the meetings feeling like you know more than you went into. And so that really does empower you to join that STEM workforce.

I know Tina, who's sitting over there, she's interested in going into robotics. And whenever she started Girls of Steel, she wanted to go into history. So it really -- it does empower you to try new things, go out of your comfort zone, which is things that girls need.

MR. KUDLOW: Thank you. Terrific stuff. So, Mr. President, nobody wants to talk about the economy anymore. So let's talk about the economy. (Laughter.) All right?

THE PRESIDENT: I like that.

MR. KUDLOW: You beat your critics. You beat your naysayers. We're growing at 3 percent-plus. We just had a record -- let's see, 18-year high in consumer confidence, I think yesterday or the day before. How did you do it? What's the message here?

THE PRESIDENT: Well, we did it with a lot of good thought, and we did it with a lot of great people, like we have here today. And some are going into different fields. By the way, the coalmining field is doing very well right now, but some people will go out of that and some people will go into that, because frankly, it is really, as you know -- you see what's happening -- it's doing great.

We have the Governor of Kentucky with us and he has been -- Matt, please -- stand up, Matt Bevin, please. (Applause.) What a job he's done. And he's a -- he can tell you how well it's doing, but we have a lot of other industries that are doing well. You really have your choice. You didn't have a choice just a few years ago, and now you have a choice because our markets are so strong.

The job market at 3.7 percent is the lowest in 50 years. It's the best unemployment numbers we have in 50 years. And that's wonderful, but we actually need workers now. That's a good thing to be saying because that hasn't been said for many, many decades.

And we want people to come in. You've all been reading about the immigration situation

AMERICAN OVERSIGHT

with the caravans and all, but the fact is, we want people coming into the country. We want them to come in legally. They want to come through a system that we have set up and that we're really setting up well.

And they want to come in, and we want them to come in through merit so that they can help these companies. Because we have -- just in Japan alone, we have six major car companies going to open up new plants and coming in -- they're coming into Michigan and they're coming to Ohio, they're coming to a lot of different places. We have a lot of car companies coming. We have a lot of companies, period. Foxconn, in Wisconsin, as an example.

And all of this has just led to optimism. I mean, we're cheerleaders. That's a big part of it. And we're cheerleaders for our country, for our system. We're getting rid of a lot of the bureaucratic blocks and a lot of the regulations, Larry, which you know are very important.

In fact, before we did the tax cuts -- and the tax cuts are a big factor -- but before we did these really massive tax cuts, the biggest that we've ever done, we did regulation cuts -- and quite a bit before. And the economy was really going very well. And then you added to that the tax cuts and other things that we have within the reform bill.

And the end result is we have an economy that's the hottest economy right now in the world. And I guess the stock market is up to -- getting close to 50 percent, if you think about it -- that's incredible -- since the election.

And it's -- in fact, I hear today it's doing very well, Larry. It's up another 400 points. It was up 450-or-so points yesterday. And it's just doing well.

I will say this: They're waiting for the results of the midterms. And if the midterms for some reason don't do so well for Republicans, I think you're all going to lose a lot of money. I hate to say that. I think you're going to lose a lot of money. People are waiting on your 401(k)s and everything else. They're waiting to see what happens with the midterms.

And if it comes out good, like we think it probably will, because there's a good feeling in the air. There are a lot of people voting. Go out and vote. But if it comes out good, I think the market is going to continue to go through a period like we've never seen before.

MR. KUDLOW: Yes, sir. It's a healthy economy.

You know, the gentleman over there said "bring it on." I love that. I say the American men and women in business and the workforce are crushing it. We're the hottest economy in the world right now. Trillions of dollars are coming our way.

Let me ask you this -- very unusual: When you look at the statistics, God forbid we should use a factoid, we are experiencing record blue-collar employment increases, the likes of which we haven't seen since the middle eighties, okay? When I was a Cub Scout for Reagan.

AMERICAN OVERSIGHT

We are looking at blue-collar wage increases are rising faster than white collars. Now, I'm not against white collars, but I'm just saying, this is the blue-collar, middle-class Trump economy. How do you account for that?

THE PRESIDENT: Well, if you remember, the previous administration said there won't be any more manufacturing jobs; you're going to need a magic wand and all of that. Well, we had the magic wand, because we have almost 600,000 manufacturing jobs since the election, and it's going to go much, much higher than that. And these are among our best jobs. I mean, if you look at jobs, those are great jobs. They're high-paying jobs. They're skilled jobs. People are being trained for those jobs.

And I think -- look, I think that companies coming in, you have some of the great companies. And I really appreciate your top people coming from these great companies. And I just feel that they can train people far better than the government can train people. And they go specifically to that company. But I don't think there's ever been a way that we can go, as a government, and train people like you can train them for your great companies.

And I also know that what happens oftentimes is people that didn't know too much, and they go in, they get trained, they get a job -- they do phenomenally well within the company. They go up in rank. They go up right like a rocket ship. And they go up in salary and pay, and even ownership, in many cases, where they have stock ownerships and options, and everything else.

So I just want to appreciate. These are great companies that are with us today, and you have done a fantastic job.

So thank you all. Thank you all very much. Appreciate it. (Applause.)

MR. KUDLOW: During the campaign, you made it very clear --

THE PRESIDENT: Which one? Which campaign? (Laughter.) There have been a lot of campaigns.

MR. KUDLOW: 2016. During that campaign, I thought you made it very clear -- you were speaking to people all across the country: the workforce, the entrepreneurs, the business owners. I thought you made it clear that the war against business is over; the war against energy is over; the war against success is over; if you succeed, you can keep more of what you earn.

Almost from the day after you won, a falling consumer confidence index started to rise and rise and rise. The day before yesterday, I think, 18-year high. The thing hasn't stopped rising. The same is true for small businesses. Have you changed the attitudes? Have you changed the psychology, how you said to folks, "Go out there and take a rip at the ball?"

THE PRESIDENT: Well, look, I'm a believer in this country. I'm a believer in the

AMERICAN OVERSIGHT

system. This is the greatest system on Earth. But -- and I also -- I said it before, we are cheerleaders. If you look at what's going on in certain states, and if you look at what's going on in certain areas of the world, for the most part, the ones that are doing well are the ones that are really in favor. Nobody is hot like we are, though. There's no other country on this planet that's hot like the United States. And a lot of people said this can't happen because we're big -- we're a big country.

If you look at comparing us to, as an example, China, we're going way up, and China has been hurt over the last number of months. And they're having a hard time, and they'll be fine. And let's see what happens. But we have a chance to make a fair deal, because China has been hurting us and trade deals have been hurting us. And we're changing them. We changed with Mexico. We changed it with Canada, South Korea. We have a new deal.

We're now negotiating with the European Union, which has been -- I mean, just absolutely hurting the United States. They don't take our product. They don't take your product. They don't take our product. They don't do a lot of things. They charge tremendous tariffs, and we don't. And it's been very difficult dealing with the European Union. But we are now negotiating with them from a position of total strength. Because if they don't treat us fairly, we're not going to treat them fairly. And the same goes for many other countries around the world, including China.

But people come in, prime ministers come in, and presidents come in, and kings and queens, and everybody comes in, and the first thing they always say is, "Congratulations on what you've done with the economy." We are literally the hottest country in the world, economically, and it's a great thing to see. And I think we have a long way to go. I really believe that. I think, Larry, we have a tremendously long way to go.

MR. KUDLOW: So, Ivanka, you've got, if I understand it, roughly 7 million job openings in the hottest economy in the world.

MS. TRUMP: Yeah.

MR. KUDLOW: So your reskilling comes at exactly the right moment.

MS. TRUMP: It's critical that we make sure there's alignment between the jobs in demand in the modern economy and the skills being taught in our classrooms, our technical schools. And that's what this administration is completely committed to. But it's also really important that we work with industry and also with governors.

So as part of this pledge, we had governors sign a pledge saying that they would prioritize this in their states, because they do reskilling, they know the needs of their local marketplaces far better than the federal government does.

So this President, after this legislation languishing for almost a decade, signed Perkins Career

AMERICAN OVERSIGHT

and Technical Education into law, modernized it. This is money that goes to the states that enables the governors to invest and fuel the growth of jobs and training programs that are actually working.

Governor Bevin, who is here with us today, is working very hard to attract businesses because they're -- the skilled workforce is there.

So you really do need this whole pairing of the industry, the skilled labor, and -- and, of course, the government's commitment to --

MR. KUDLOW: Some initiatives.

MS. TRUMP: -- to champion it.

MR. KUDLOW: Some initiative. Some hard work.

MS. TRUMP: A lot of -- well, we do that well in this country.

MR. KUDLOW: You bet you do.

MS. TRUMP: So this room is absolutely a testament to the fact that our greatest resource is the American workforce and --

THE PRESIDENT: So -- but, Larry, you do need what Ivanka said last. You need some help from the government to get it started in the right direction.

And one of the things I'm very proud of is the steel industry. The steel industry was dead. It was as dead as a doornail. We weren't going to have a steel industry in two years. You look at what happened. It used to be our great industry. United States Steel was our biggest company many years ago, and there was nothing even like it. It was a juggernaut. It was a powerful, powerful company. And you look at what's happened to our industry, and it's gone down -- really gone down the tubes.

We literally -- and you need steel. You know, there are certain industries we can actually do without, and we can buy, but you have to have steel and aluminum. And I put a very substantial penalty on what was happening because other countries were destroying our steel industry.

And in addition to collecting a lot of money, which we're collecting on the tariffs where we put tariffs on the dumping of steel and aluminum -- 25 percent on steel, 10 percent on aluminum -- we are -- I mean, these industries, it's incredible what's going on. U.S. Steel is building many plants and expanding many plants.

Nucor is building -- and these are new plants, in many cases. These are big, beautiful plants. We're going to be using the iron ore from Minnesota and other places. And Minnesota is

AMERICAN OVERSIGHT

booming because of it, whereas the previous administration shut it down for environmental reasons, they said. But nobody quite got it. And they just shut it down. And it was just collapsing. But we were not going to have a steel industry.

Now, if you just look at it from the standpoint of defense, if you don't have steel, you don't have defense. You're not going to be buying your steel from a foreign country in case you have a problem, which hopefully we won't, ever. But you have to have a steel industry, you have to have a very strong aluminum industry.

And you take a look at what's happened to those industries. But steel is the talk of the world because they're saying the steel industry is -- Wilbur knows, because he used to be in that business -- the steel industries are coming back. Industry like almost -- I can say this: It will be at a level that people won't believe in a very short period of time. And this happened over the last seven or eight months.

You look at what the plans are for U.S. Steel and for Nucor and so many others, where they're building plants, and eventually those prices are going to end up being low because everything is going to be made here. We're taking the iron ore from here, we're taking everything right from our mines. And that's great for our miners, by the way. But we're all doing it here. We don't need outside for that. Nor should we.

The other thing is the quality of the steel is much better, because we were having garbage dumped on our shores. It was sand, it was -- it was all sorts of rock in it. It was bad steel. It wasn't structurally good. And we are now having -- we're creating a fine quality steel, which to me is a very important thing.

So what we've done with the steel industry in a very short period of time -- I would really say over the last year -- is being talked about all over the world. We have a steel industry again, and it's really roaring.

MS. TRUMP: Plus, tax cuts have enabled this to really transpire as well. So all of the companies here -- the cutting of the corporate rate; the cutting of the individual rates; repatriation of money back from overseas, back to our shores; 100 percent capital expensing -- has been just a tremendous boon for the economy.

But one of the elements that we've talked about a lot in this room that's very exciting and that Treasury -- Secretary Mnuchin just put out guidance on -- in tax reform, there was also opportunity zones, and that was passed. And that's going to uplift. And the governors have designated over 3,900 opportunity zones to stressed, urban, and rural communities. And it incentivizes private sector investment into those communities, which is exactly what we want. So the private sector to go and be incentivized, to invest where otherwise they would have avoided.

So in addition to tax cuts, that's another element that will really help uplift the American

AMERICAN OVERSIGHT

economy and fuel the boom we've been experiencing.

MR. KUDLOW: I was just going to say, sir, well-done trade reform can be very pro-growth. That's what you're saying.

THE PRESIDENT: So we were losing a tremendous amount of money, and unfortunately, it's a number that nobody can even believe -- close to $800 billion a year. When you hear that number, folks, you can't be too proud of our representatives from the past. But we're redoing our trade deals; we're making them fair and equitable. And for the other countries, too.

But they've taken advantage of us on trade. They've taken our money. They've taken our jobs. And we're stopping that. And we have to take care -- I have the expression, "America first." And the fact is, we have to start taking care of our own country, because we were taking care of other countries and we were letting our country go to hell in trade and in so many other ways. We can't do that. We can't do it. With immigration, with the borders, with trade -- so many different ways. And we're changing that, and we're making great trade deals from horrible trade deals. And if they don't want to do business with us, that's okay.

But they can't come in and take the wealth from our country. It's a great transfer of wealth. They can't -- we had had -- we have had one of the greatest transfers of wealth in the history of the world. It's been taken from our country and it's been brought to other countries. And it was only because we had people that were not watching or they didn't know, or they didn't care.

And it's incredible. When I see some of these deals that were made, I say, "How could anybody have agreed to it?" It's basic. It's like -- I mean, it's literally first-grade business. It's so simple.

And the end result is it's tougher to get out because they've been so used to making so much money off our country, and we can't let them do that anymore. We're going to start paying down debt. We have a lot of debt. We going to start paying down debt. We have such potential in this country. When I tell you about deals that were made that were so grossly incompetent, they should have never been allowed to be made. And they never changed them. And everybody knew they were bad, and they never changed them. So we're changing them, and we're changing them very rapidly. Our countries, whether they're allies or not, have to treat us fairly, and they haven't been.

MR. KUDLOW: Last one, sir. Appreciate it. More of a personal question. Ivanka was talking about initiative and leadership and hard work, along with reskilling. So you've had an unbelievable career. You were in construction. You were in real estate. You were a very famous television host. And now you happen to be President. Did you go through -- did you go through reskilling along the way? (Laughter.)

THE PRESIDENT: I never thought of it that way, but I guess I did. Right? (Laughter.) I

AMERICAN OVERSIGHT

suspect I did. Look, I've been in a lot of different jobs. I love building. I love the real estate industry. It's been very good to me. I think I've been good for it. I always pride myself on building on time, on budget -- ideally, ahead of time and ahead of budget.

And we really -- we really have -- I've learned a lot. You know, when you build a building, it's almost like every trade: You're involved with the unions, in many cases. You're involved with labor. You're involved with finance. You're involved with design. You're involved with so many different things. In many cases, you're involved with international concepts and deals. So you learn a lot.

And then, I did "The Apprentice," which became a great show -- a very, very successful show. Tremendously successful. I did it for 14 seasons, 12 years. It was so successful they put it on twice sometimes. And as soon as I left, that show went down the tubes. So, you know, just one of those things. Right? I don't know if I feel happy about that or sad; I've never figured that out. (Laughter.)

But I don't know if I'd want to leave, Betsy. And they -- the show became even more successful. Almost couldn't have been more successful. It was a tremendous success. And I learned a lot from that, too.

And I've certainly learned a lot. We're here almost two years, and we've learned a lot from doing this. And I think we've put a lot of talent to work. We have great people that we work with. And when they're not so good, we make changes. And we have to do them maybe faster than other people would. But I sort of can figure it out pretty well.

And we're doing fantastically well as a country, and a lot of great things are ahead. Our best years are ahead of us. I really believe that. Our best years are truly ahead of us.

MR. KUDLOW: Yes. Yes. I love that. I want to end on that. You're the quintessential optimist. The best years of America have yet to come.

President Trump, thank you so much. (Applause.)

AMERICAN OVERSIGHT

Office of the Press Secretary
FOR IMMEDIATE RELEASE
October 31, 2018

PRESS CALL
ON OUR PLEDGE TO AMERICA'S WORKERS EVENT

Via Telephone

9:05 A.M. EDT

MS. WALTERS: Good morning. Thank you, everyone, for joining us today on a call about our Pledge to the American Workers, the event the President will be hosting here at the White House this afternoon.

I'm joined today by Ivanka Trump and Kevin Hassett. The ground rules for this call are that it is embargoed until the completion of this conference call. The opening remarks will be on the record, attributable to the individual speaker. I will have both Ivanka and Kevin state their names before starting. But question and answer will be on background. Question and answer will be attributable to a senior White House official.

And with that, I will turn the call over to Ivanka.

MS. TRUMP: Thank you so much, Lindsay.

Today marks the achievement of a major milestone reached with our Pledge to America's Workers campaign. Thanks to the Trump administration's pro-growth policies, the U.S. economy is booming. Unprecedented deregulation and tax cuts, which brought historic tax relief to American families and businesses are major factors for the success.

The growth in GDP last year surpassed expectations. The unemployment rate currently sits at 3.7 percent. And 4.2 million jobs have been added since the election in November of 2016.

We are in the midst of the longest positive job-growth streak on record. Real median household income rose by 1.8 percent in 2017 to $61,372, reaching a new post-recession high. America's economic future is bright. Hispanic and African American unemployment are at record lows. Women's unemployment is at a 65-year low. Last month alone, 150,000 additional Americans entered or reentered the workforce.

AMERICAN OVERSIGHT

People who have been discouraged and sitting on the sidelines are now reengaging and starting to once again look for a job. Unemployment claims recently achieved their lowest level in nearly half a century. Of those unemployed, almost 32 percent were individuals who had previously left the workforce and stopped looking for jobs. (Inaudible) now have returned to the job market. That's the highest rate since before the Great Recession.

Our strong economy has brought a longstanding critical issue to the forefront: Employers are having trouble finding enough workers with the right skills. When asked about their single-most important problem, 22 percent of small-business owners now list a lack of qualified workers -- the highest level since 2000.

Job openings are currently exceeding the number of unemployed people in our country for the first time ever recorded, indicating a robust labor market. American workers requires new skills to obtain and retain these in-demand jobs.

Current public investment in education and skills have frontloaded before the age of 25, not reflecting an evolving economy in which workers must continually update their skills in response to the changing employer needs and an increasingly digital economy.

While employers invest substantially in training college-educated workers, they invest only half of that in workers with a high school degree. This brings us back to today. This administration is laser-focused on ensuring all Americans have pathways to good-paying careers.

In July, the President signed an executive order establishing the National Council for the American Worker, and the American Workforce Policy Advisory Board. Recognizing that the American workforce is our country's greatest national asset, President Trump called upon the private and industry leaders to sign our Pledge to American Workers to do their part and invest in the advancement of our current and future workforce.

At the launch in late July, more than 20 leaders joined the President and signed our Pledge to American Workers, including Walmart, Home Depot, Apple, FedEx.

Today we are announcing that, since that launch, over 100 companies large and small have committed to creating over 6 million new jobs and enhanced career opportunities, apprenticeships, on-the-job training, and providing Americans, from high school to those nearing retirement, with skills that will enable them to contribute to our economy and provide for themselves and our families.

That's 6 million pledges representing close to 5 percent of America's workforce.

Companies such as Textron are providing more than 22,000 new opportunities to train workers in the aviation space. Ford Motor Company, who is providing 55,000 opportunities

AMERICAN OVERSIGHT

for those in the automotive sector. AT&T, who is committed to providing 200,000 new opportunities in the telecommunications sector. And IPC, the association representing electronic assembly industries, whose member companies combined are providing 1 million opportunities to American students and workers. These are new pledges, new opportunities.

We also called on governors to sign a similar pledge. And since late July, a bipartisan group of over 40 governors have signed, committing to expanding programs that educate, train, and reskill their workers, ensuring that Americans are well prepared for the jobs of today and tomorrow.

This summer, POTUS signed into law a new Perkins Career and Technical Education Act, which has been flailing in Congress for over 10 years. Perkins will now drive more decision-making power and innovation to vocational education to the states, and in so doing, benefit over 11 million students and workers nationwide.

State and local governments are critical partners in scaling workforce development programs. Over the past month, I have visited programs in 14 states across the country that are taking innovative approaches to train and reskill Americans of all ages.

I visited a P-Tech school in Connecticut where IBM is investing in five-year degree programs for high school students, ensuring they're ready to enter the workforce upon completion.

I traveled to Robotics Row in Pennsylvania where I met the "Girls of Steel," an amazing team of high school girls who are passionate about STEM education, and through the FIRST Program, builds robotics and robots, and compete globally.

Just last week, I was in eastern Kentucky with Governor Bevin and we met with mid- to late-career workers, as well as students who are completing skills-training programs in advanced manufacturing and coding, and taking on new opportunities in these high-demand fields.

Later today, the President, Larry Kudlow, Director of the National Economic Council, and I will join more than students and workers who have benefitted from these skills-training programs, as well as over 20 companies who have signed our Pledge to America's Workers and committed to putting America's workers first.

In closing, we thank you all for being here to cover this important issue. There is no better time to be seeking a fulfilling career and job security in America. Together we can make a difference in millions of lives and remain the most competitive workforce in the world.

Kevin, over to you.

CHAIRMAN HASSETT: Yes, thanks a lot, Ivanka. Thanks to your leadership on this issue and thanks to all of you for calling in.

AMERICAN OVERSIGHT

You know, I think that Ivanka emphasized exactly the right thing: that we, precisely at this moment, have a historic opportunity to make a huge difference in so many lives around the country, because the labor market is so tight, that it's a time when people can reconnect to society in a way that maybe a lot of economists thought was going to be impossible.

I would point to some people on the call to 2012, an article that I wrote with my friend Dean Baker in the New York Times, where we talked about the long-term unemployment that the economy was experiencing at that point, and just emphasized the horrible impact on family lives of not having a job.

We looked at, you know, death rates -- that they were about 50 percent higher for people without a job. Suicide rates were higher. Illness, you had a 25 percent higher chance if you had lost your job or dying of cancer. Divorce rates are about 18 percent higher.

And so if you think about the Great Recession -- and this is not a political point -- (inaudible) when we think about the Great Recession and how many people, especially people over 50, who lost their job and then got separated from society and then started to just live in a life of almost of despair, that, you know, in 2012, looking at the literature, Dean and I were very skeptical about what could happen after the big policy changes.

But what's happened is that the economy has gradually gotten better and now it's really accelerated, and we're drawing people back into the economy in droves.

And so we think that there's really a couple of administration policy challenges ahead for us. One is -- and this is something that you could all help us with -- is that we got to get the message out that, sure, you might be discouraged that you tried to get a job two years ago and you worked all year, and you did a million interviews and people kept telling you to take a hike. But you should -- I know it's hard to apply for a job and not get it, but you should get up and you should get off the mat, and you should give it another shot because people are getting jobs now, really, in unprecedented numbers coming from the labor force.

But the second thing is that we have to look at government policy carefully. And this is, as Ivanka said, the highest priority for us. And we have to help people who want to get back in, or people who maybe lose their job because the economy is tanking -- help them get the skills they need so that they can come back in or move to another job because their job is obsolete.

And so, at CEA -- and this is a follow-up to the meetings that we had, I guess it was about a month ago, Ivanka -- you know, we've begun a study of all the training programs that the government has. And our job is to try to identify which ones work, which ones don't work, and which ones can't even be evaluated because they don't collect the data you need to do so.

And so, I think that the first part about getting the message out is something that we can do

AMERICAN OVERSIGHT

right now. But the next step is getting the private sector involved. And Ivanka mentioned that we're up to 6 million people that the private sector has promised to retrain or to train. And we now actually think that the next step after that is to reform our policies, which is right at the top of our agenda for next year, so that when people look for training so that they can get a new job, that they can find the government training program that they need if there is not a private alternative.

And with that, I'll hand it back for questions.

MS. WALTERS: Thank you, Kevin and Ivanka. For those of you who joined late, just a reminder, the opening remarks were on the record, attributable to the individual speakers. The question-and-answer portion, which we are about to go into, will be on background, attributable to a senior White House official.

Again, this call is on the President's event today, the Pledge to the American Workers. We ask that questions remain on topic and that all other questions will be directed to the Press Office. Again, we ask that questions remain on topic and any other questions we will direct to the Press Office.

With that, we will take your questions.

Q Hi, thanks for doing this call. I just wanted to clarify. So for the Pledge to American Workers and the 100 companies that have committed, have they committed to creating 6 million jobs, or is it 6 million opportunities, i.e. they've committed to creating, like, apprenticeships or other opportunities? Or are you actually talking about, like, paid employment?

And then also, do you have any evidence that what these companies are committing to is beyond what they would have done just, kind of, naturally? Like, are they going above and beyond what they were just planning to do anyway?

SENIOR ADMINISTRATION OFFICIAL: So thank you -- thank you for the question. These are all new opportunities, and that was important to us. They are not all new "jobs," because a job is defined in a very narrow way.

So, for example, we wanted to account for, and we wanted to create a rallying cry, for example, for a company to look at their workforce and say, "We're investing in this technology which is going to render this portion of our workforce as obsolete. And we're going to start the process now of reskilling those people into vacant jobs."

Now, that is a reskilling opportunity, but it's not in economist terms defined as a "new job." But we think those are some of the most vulnerable workers.

So part of this is they're all new -- they're all paying opportunities. But we wanted to

AMERICAN OVERSIGHT

encourage companies, whether it's bringing on younger workers in learn-while-you-earn apprenticeship-type roles so they can learn a skill and go right from high school or right from technical school into the workforce. Or create new job opportunities, or create new opportunities within a company by acquiring a skill that enables them career longevity.

So it's broader than just a new job for that reason, because we think those are some of the most vulnerable. And the reality is that it's really industry who has to help us, in advance, plan for and reskill those workers.

We will not be able to do it alone. They know what changes they're making in their businesses, so we can't possibly predict in the same way they can.

In terms of whether they're new pledges or they would have done it already, many of these companies -- for example, AT&T, has done a lot in this space. So these are all pledges over and above already aggressive milestones that they've set for themselves.

But we also have companies who have signed the pledge that have two and four workers who are committed to reskilling three more small businesses across the country. And we want to encourage that as well. Sometimes those investments are more challenging for a business to make than Walmart, who has signed our pledge to reskill or provide enhanced career opportunities for a million workers.

So these are all new pledges, but the definition is broad enough to account for those workers who are mid-to-late career or those workers still in school. But they're all paid opportunities.

SENIOR ADMINISTRATION OFFICIAL: Yeah, I just wanted to add that the response to this has surprised us at CEA quite a bit that we're all the way up to 6 million and maybe on a path even to get up to (inaudible) 10 million or something, if they keep rolling in, which would be a massive share of the workforce.

And it was -- it goes back to -- the economics of it is kind of intriguing in the sense that employers kind of have a problem that if they train somebody, then they eat the cost of training them, but then their competitors can try to steal that worker and not have to pay the training costs.

And so we think that there's then kind of a sorting of what economists call the "Nash equilibrium." We've moved the equilibrium to a point where the employers are all training because they know the other guys are training too, and they don't have to worry about losing the people that they invest in.

And so I think we've seen that the effect is so big that we've seen some kind of new equilibrium where this sort of weight to the other guy that trains people, that that equilibrium is now (inaudible).

AMERICAN OVERSIGHT

SENIOR ADMINISTRATION OFFICIAL: And our hope -- we've talked about this a lot internally -- but most company CEOs can tell you how much they spend on healthcare benefits per employee. Very few companies can tell you how much they spend on education and skilling, despite the fact that consistently it's now being cited as the number-one challenge that they have: hiring skilled workforce.

So a part of this campaign is to raise awareness within the private sector that this is in their interest to do, but something that they need to be considering as part of their obligation to their workers, current and future.

Q Yeah, thank you for holding this call. So you're talking about these record number of job openings. Can you give us your expectations as to how these openings will affect wages, and how they will affect wages relative to the cost of living?

SENIOR ADMINISTRATION OFFICIAL: You know, we have to -- I apologize, but I would be happy to circle back with you in a little bit, but we're actually in lockdown discussing any specific things about wages because there's wage data that came up at 8:30, which we can't comment on until 9:30. And so right now, we're just unable to discuss the specific questions like that about wages because we're at a lockdown period until 9:30.

But if the call goes that long, then I can return to the wage question at that point.

MS. WALTERS: Deborah, this is Lindsay. I can connect you with my colleague on [senior administration official]'s team following the call so that you can have that conversation after the time gap is up.

Q Hi all. Thanks for having this call. I just wanted to, first of all, clarify -- there was a pledge for, I believe it was, 3.8 million new training opportunities in July. Is this 6 million an expansion to 6 million of that 3.8 million? Or are these 6 million new opportunities?

And on top of that, I'm wondering if you can comment on the process for implementing some of those pledges since July and where those companies are.

SENIOR ADMINISTRATION OFFICIAL: This is 6 million total. So we've grown the number of pledges since the launch in late July. And we are -- obviously, you know, it's only been -- it's only been several months. So some of the companies have started right away; others haven't.

You know, this is for -- the private sector ultimately will be holding themselves accountable. The public will be holding them accountable because these are all public pledges.

And we have actually posted -- I believe it hasn't -- it was going to be updated after the

AMERICAN OVERSIGHT

event. But I think since we're having this call now, we can probably go ahead and update it. We have on the WhiteHouse.gov/workforce website -- that lists all of the companies that have signed the pledge -- the number that they have committed to.

So these are very public commitments by the private sector. And as they implement, they'll continue to share our stories.

And I will say, one of the things that makes this event very exciting is today we're going to hear from workers from across the country who have benefitted from these programs. I've met with many of them. I've been in over 14 states and counting, visiting some of these best-in-class programs.

I was with Governor Bevin in eastern Kentucky. I visited three different programs this past Friday. And Eric Owens, one of the gentlemen I met whose story was so impactful, will be joining us today. He went from having lost his job as a coalminer -- multigenerational coalmining family -- to taking a course in CNC machinery. Now he's an instructor with that same advanced manufacturing institute from which he graduated, and he's training other people in eastern Kentucky with the skills.

And this is one of these great examples where the private sector gets involved. In this case, it was Hoff Industries said they needed these specific skills, and connected with a technical school that started training workers with the skills that they needed to hire them on the other end.

So, very inspiring stories just like that. So whether it's a 56-year-old former coalminer to a 17-year-old high school student who wants to learn the technical skills to go straight into the workforce, there are a lot of incredible stories that we'll make available to you if you're -- I believe the team has them collected.

But really, just so impactful, and hopefully inspiring to so many -- certainly to us here at the White House.

Q Hey. Thanks for doing this. I want to return to the question that the first reporter asked, which is about how you prove and show and convince us that this 6 million number represents something real. Did you ask these companies to make sure -- did you ask them, each one that made these commitments, that they would not be otherwise doing this? And if not, again, like what's the proof? Like how can we be sure that this number is not just a company trying to get some good PR?

SENIOR ADMINISTRATION OFFICIAL: So each company, when they've committed to do this, we've put really strict standards from what would count, what would not count. We do vetting calls with each company when they agree to do a pledge.

So they go through an entire process. They get a piece of paper -- I mean, since we started

AMERICAN OVERSIGHT

this in July, they have to fill out all the information that, and we then sit and do a call with them and talk through what they are proposing to count, and what they are -- a lot of times, I'm going to be honest, we told the companies, "I'm sorry, that's not going to count because this is about X, Y, and Z."

We put dates around when it's going to start. So it has to be starting on the day that they sign the pledge, moving forward. So we've held them to accountability standards. And then we've actually done a lot of follow-up calls with companies that have already signed to see where they are in the process, what they're doing.

You've seen Ivanka traveling to visit some of the programs that have committed and signed the pledge. And she's going to be traveling in the coming weeks and months to companies that have already signed the pledge and want to actually highlight what they've done.

So we have been putting accountability measures around this, and we've reviewed very closely with each company what they are saying they're counting. And we walked through that, depending on what it is.

MS. WALTERS: Well, thank you everyone for joining. That seems to be the last question we have. Again, the embargo is lifted. The opening remarks were on the record, attributable to the individual speaker, and the question-and-answer is on background, attributable to a senior White House official.

Thank you and have a happy Halloween.

Subject: President Trump Signs Order Creating the White House Opportunity and Revitalization Council

White House Office of Intergovernmental Affairs

State Leaders and Staff,

Today, President Donald Trump hosted local elected leaders and other stakeholders at the White House for an event where he signed an executive order creating the **White House Opportunity and Revitalization Council**. Led by HUD Secretary Ben Carson, the Council will improve revitalization efforts by streamlining, coordinating, and targeting existing Federal programs to economically distressed areas, including Opportunity Zones. More information is below (President Donald J. Trump Is Lifting Up American Communities That Have Been Left Behind). As always, we value your comments and feedback so please do not hesitate to reach out. In addition, we welcome any public statements of support.

Executive Order Information

- **Executive Order:** Executive Order on Establishing the White House Opportunity and Revitalization Council (click here)
- **Event Video**: President Donald Trump Participates in Signing Event for an Executive Order (click here)
- **Event Remarks**: Remarks by President Trump at Signing of an Executive Order Establishing the White House Opportunity and Revitalization Council (click here)
- **News Article**: NYT: Trump To Steer More Money To Opportunity Zones (click here)

Opportunity Zones Background

Opportunity Zones, created by the 2017 Tax Cuts and Jobs Act, were designed to spur investment in distressed communities throughout the country through tax benefits. Under a nomination process completed in June, 8,761 communities in all 50 states, the District of Columbia and five U.S. territories were designated as qualified Opportunity Zones. Opportunity Zones retain their designation for 10 years. Investors may defer tax on almost any capital gain up to Dec. 31, 2026 by making an appropriate investment in a zone, making an election after December 21, 2017, and meeting other requirements. In October, the U.S. Department of the Treasury and the IRS released proposed regulations on Opportunity Zones designed to incentivize investment in American communities. The Treasury Department plans on issuing additional guidance before the end of the year after notice and comment.

- **Frequently Asked Questions** (click here)

AMERICAN OVERSIGHT

NV-DA-20-0615-A-004930

PRESIDENT DONALD J. TRUMP IS LIFTING UP AMERICAN COMMUNITIES THAT HAVE BEEN LEFT BEHIND

"[O]ur tax bill also creates new opportunity zones rewarding those who invest in distressed communities and create more jobs for those who have, too often, simply been left behind." – President Donald J. Trump

CREATING OPPORTUNITY FOR ALL: President Donald J. Trump is encouraging investment to create opportunity in distressed communities.

- President Trump is signing an Executive Order establishing the White House Opportunity and Revitalization Council. The Council will be chaired by the Secretary of Housing and Urban Development, Ben Carson, and comprised of 13 Federal agencies.
- The Council will engage with all levels of government on ways to better use taxpayer dollars to revitalize low-income communities.
- The Council will improve revitalization efforts by streamlining, coordinating, and targeting existing Federal programs to economically distressed areas, including Opportunity Zones.
    - Lack of coordination and targeting has led to cumbersome applications, program waste, and ineffective benefits.
- The Council will consider legislative proposals and undertake regulatory reform to remove barriers to revitalization efforts.
- The Council will present the President with a number of reports identifying and recommending ways to encourage investment in economically distressed communities.

ENCOURAGING INVESTMENT: Opportunity Zones will spur private investment to revitalize hurting communities and unleash their economic potential

- In 2017, President Trump signed the Tax Cuts and Jobs Act, which established Opportunity Zones to incentivize long-term investments in low-income communities across the country.
- These incentives offer capital gains tax relief to investors for new investment in designated Opportunity Zones.
- Opportunity Zones are anticipated to spur $100 billion in private capital investment.
    - *See* Treasury Released Proposed Regulations on Opportunity Zones Designed to Incentivize Investment in American Communities
- Incentivizing investment in low-income communities fosters economic revitalization and job creation, and promotes sustainable economic growth across the Nation.

LIFTING UP COMMUNITIES: Opportunity Zones help drive economic growth and lift up communities that have been left behind.

- Opportunity Zones are a powerful vehicle for bringing economic growth and job creation to the American communities that need them the most.
    - On average, the median family income in an Opportunity Zone is 37 percent below the state median.
    - The average poverty rate in an Opportunity Zone is 32 percent, compared with the national rate of 17 percent.
- 8,761 communities in all 50 States, the District of Columbia, and 5 Territories have been designated as Opportunity Zones.
    - Nearly 35 million Americans live in communities designated as Opportunity Zones.

Thanks,
Nic

Subject: Pro-Growth Infrastructure Needs Concrete Pay-Fors

Pro-Growth Infrastructure Needs Concrete Pay-Fors

March 27, 2018

Read the paper.

Policymakers in Washington have turned their attention to infrastructure, with members of both parties putting forward thei proposals to boost federal funding for roads, bridges, waterways, and other public works by $200 billion to over $1 trillion o

Several analysts have raised concerns over the state of the nation's infrastructure, and efforts to repair and modernize def and communication assets could have a meaningful impact on economic growth.

However, infrastructure should not be the latest addition to the growing list of unpaid-for legislation. Ramping up infrastruc paying for it would not only worsen our already grim budget outlook, it would also undermine the pro-growth effects these

Failure to insist on offsets will also likely reduce the quality of any infrastructure package because lower priority spending i when it appears costless and tradeoffs need not be considered.

Fortunately, there are numerous options for lawmakers to pay for new infrastructure funding, including several that have re support and that could help ensure that public infrastructure assets are used in an efficient manner.

In this explainer, we describe:

- The competing infrastructure plans proposed by President Trump and Senate Democrats,
- Why any new infrastructure funding must be fully paid for if it is to have a meaningful positive impact on economic
- Potential options for financing new infrastructure initiatives.

Ultimately, increased public infrastructure can be an important element of an overall economic growth strategy. But if the o is to increase the country's already massive levels of debt, it will likely do more harm than good. That is why any infrastruc for in a responsible manner.

The President's Infrastructure Plan

President Trump has outlined a proposal to increase federal infrastructure funding by $200 billion over ten years, which th will leverage another $1.3 trillion in additional investment from state and local governments and the private sector. The init

AMERICAN OVERSIGHT

largely of grants and tax incentives to support projects that are likely to eventually generate revenue, such as toll roads or improvements.

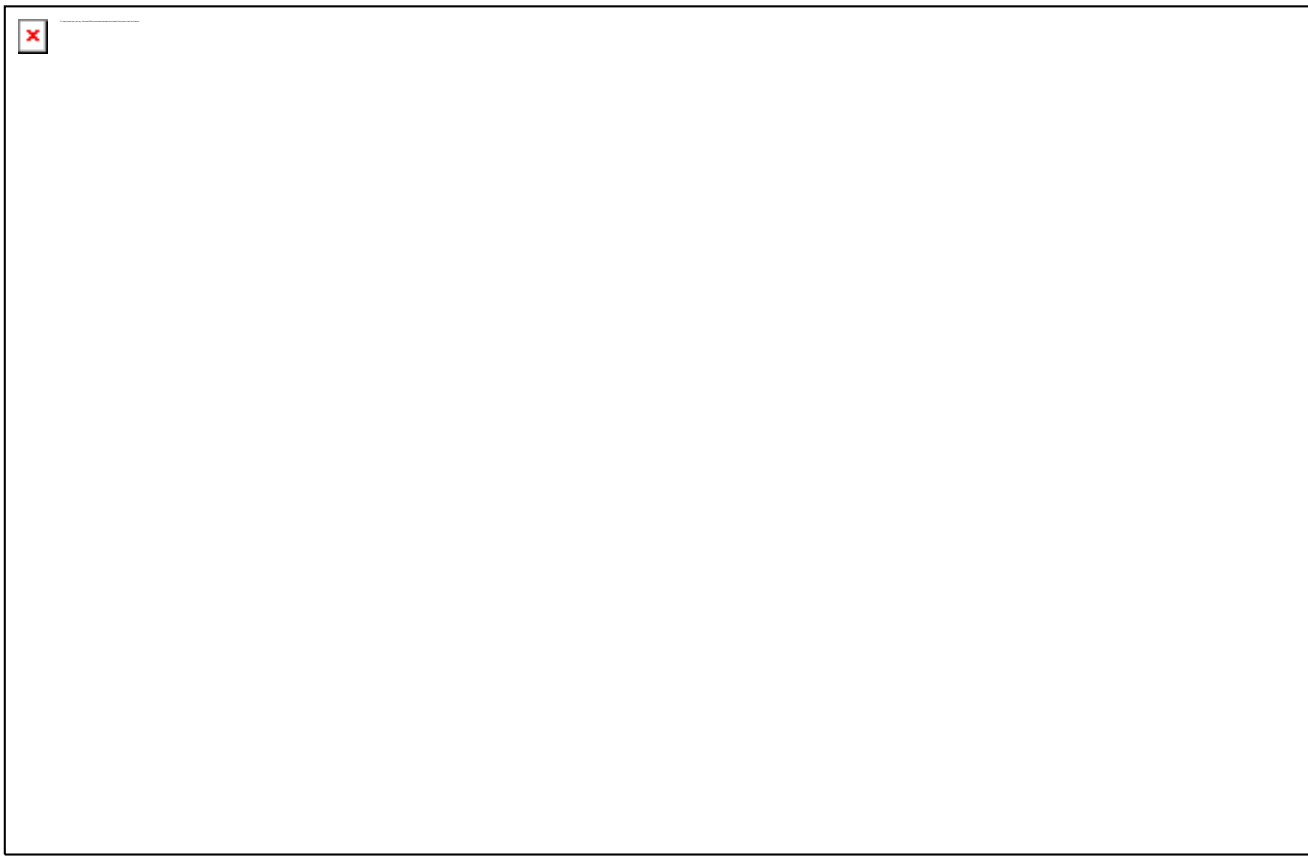
Specifically, the proposal would include:

- **$100 billion** in competitive grants awarded to states and localities with promising infrastructure projects that are lik revenue. Grants could not exceed 20 percent of the cost of the project, and no single state could receive more tha grant funds.
- **$50 billion** in rural infrastructure grants for states to address various infrastructure needs in rural areas, including infrastructure such as broadband internet service. Of the total amount, $40 billion would be provided to states via b by a formula. The remaining $10 billion would be used for additional performance grants for states that met particu benchmarks in using their formula funds.
- **$20 billion** in competitive grants to help cover the demonstration, planning, and construction costs of transformati be commercially viable but are too risky for private sector investors.
- **$14 billion** for expanding federal credit programs that help state and local governments finance large-scale infrast
- **$10 billion** to establish a federal capital revolving fund to finance the purchase, construction, or renovation of fede property for federal agencies. Agencies would gradually repay the fund over time out of their appropriated budgets large one-time increase in their appropriations or resorting to leasing the property.
- **$6 billion** to expand private activity bonds and broaden their eligibility to include a wider range of infrastructure pro

The initiative also includes some smaller changes, such as creating a new fund to support public lands infrastructure, as w expedite the sale of certain federal property and streamline permitting decisions.

The Administration has not identified a specific funding source for the plan, but the President's budget includes a number could potentially offset the cost of the proposal (including several reductions to existing infrastructure programs).

Senate Democrats' Infrastructure Plan



Democrats in the Senate have released their own plan calling for over $1 trillion in federal infrastructure funding over the n President's plan, the Democrats' proposal would largely increase infrastructure spending by expanding existing federal pro incentives, though it would create several new programs.

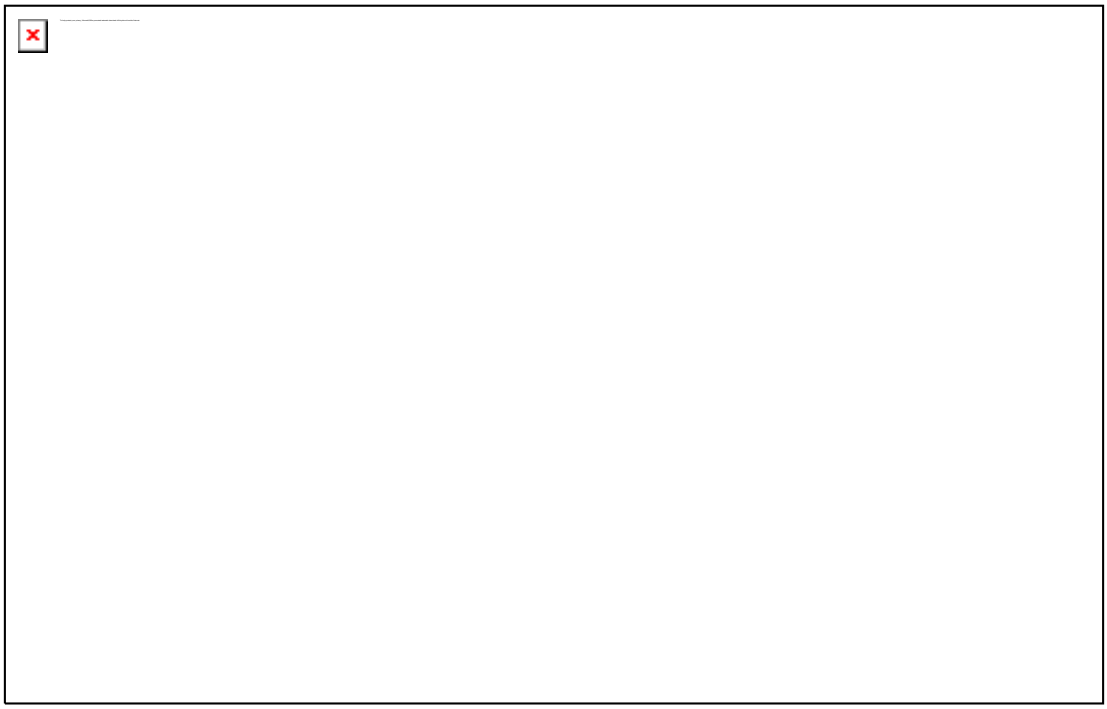
The proposal includes:

- **$315 billion** to repair and improve ground transportation infrastructure, including $140 billion of grants and direct s and bridges, $115 billion for public transit system maintenance, $50 billion to improve Amtrak and other rail infrastr for the Transportation Investment Generating Economic Recovery (TIGER) program.
- **$140 billion** for the Highway Trust Fund to ensure its solvency through at least 2027.
- **$115 billion** to modernize water and sewer systems through Environmental Protection Agency and Department of programs.
- **$80 billion** to support energy grid improvements and research. The plan would also consolidate most existing ren incentives into three new credits.

- **$70 billion** in spending on air and water transportation infrastructure, with $40 billion allocated for additional Feder Administration funding and competitive airport improvement grants and $30 billion going towards water, harbor, ar
- **$70 billion** to support large-scale transformative projects ($40 billion) and performance incentives as well as vario projects such as bicycle facilities, pedestrian routes, and fueling stations for alternative fuel vehicles ($30 billion).
- **$62 billion** in additional federal support for affordable housing and lead remediation initiatives through a combinat and enhanced tax incentives, such as expanding the Low-Income Housing Tax Credit.
- **$50 billion** to assist states, school districts, and community colleges in school construction and modernization pro
- **$40 billion** to provide universal high-speed internet through a Universal Internet Grant Program and other efforts.
- **$25 billion** to help communities better prepare for disasters through new grants and loan programs.
- **$20 billion** for expanding federal infrastructure financing programs and creating a new infrastructure bank to prom infrastructure.
- **$35 billion** in additional infrastructure spending, including $15 billion to address public land infrastructure backlogs construction and improvements, and $10 billion to improve tribal infrastructure.

The Senate Democrats' infrastructure plan also identifies specific offsets that it states would fully pay for its costs, largely b provisions of the Tax Cuts and Jobs Act (TCJA). Specifically, it proposes raising the top income tax rate to 39.6 percent ($ the Alternative Minimum Tax ($429 billion) and estate tax ($83 billion) to their 2017 parameters, raising the corporate inco ($359 billion), and closing the carried interest loophole ($12 billion).

Any New Infrastructure Spending Must Be Paid For



While it is unclear the United States needs an additional $1 trillion or $1.5 trillion of new infrastructure spending, a well-des infrastructure spending can improve public welfare, increase the nation's capital stock, and thus enhance economic output

If financed with additional federal borrowing, however, the positive economic effects of infrastructure will shrink or disappe growth-impeding effects of higher debt. The benefits of increased public investment will be offset over the long run by redu

In June 2016, the Congressional Budget Office (CBO) analyzed the impact of a $500 billion increase in federal investment unpaid for. We wrote about that analysis here and here.

Applying CBO's finding to a generic $1 trillion infrastructure package, we find such a package might increase Gross Dome 0.12 percent after two decades, if offset with growth-neutral pay-fors (some offsets themselves may be pro- or anti-growth same trillion-dollar infrastructure package were debt financed, it would *shrink* GDP by 0.08 percent. Similarly, a $200 billio might increase GDP by more than 0.02 percent while an unoffset plan would shrink it by nearly 0.02 percent.

A deficit-financed infrastructure plan would also ultimately add more to the debt than its direct cost, as it would produce hig lower GDP, thus increasing federal spending and reducing tax revenues. Based on CBO's estimates, a $1 trillion increase outlays over a decade would ultimately add roughly $1.2 trillion to the debt when interest and economic feedback are inclu

Importantly, these numbers are based on a generic package of investments – in reality, some infrastructure investments a and some may even produce more in investment than they cost the federal government. However, the Penn Wharton Bud reached a similar conclusion in its analysis of the White House's infrastructure plan (PWBM has not yet analyzed the Sena

PWBM finds that if fully financed with efficient user fees, the President's infrastructure plan could increase GDP by 0.0 to 0 was paid for with higher debt, however, PWBM finds the impact on GDP would range from virtually nothing to a 0.1 percen years.

PWBM explains that part of the reason for these low or negative returns is that federal infrastructure grants actually tend to state and local infrastructure spending; the more the federal government spends or offers states to spend on infrastructure spend of their own money. In its central estimate, PWBM projects that the President's proposed $200 billion increase in fe spending would increase total public infrastructure spending by $125 billion (their estimates range from $20 billion to $230

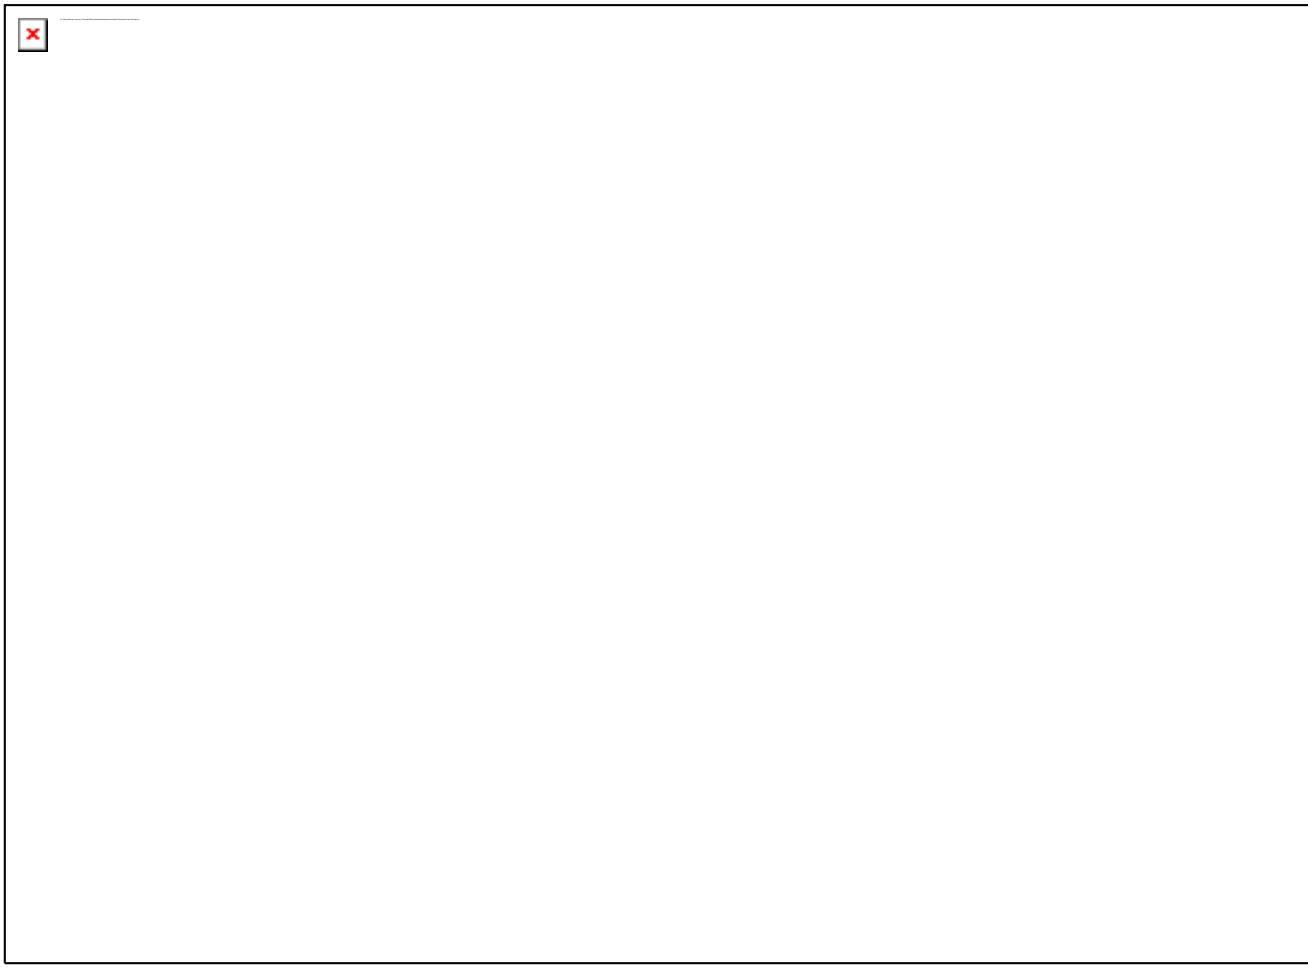
AMERICAN OVERSIGHT

Importantly, the White House has disputed these findings and argued their plan would actually produce more in investmen PWBM has responded to this critique. Neither the White House nor the PWBM analysis look at the *specific* infrastructure i be made under the President's proposal and what return they might produce.

Still, PWBM's finding that increased federal infrastructure spending reduces state and local spending is consistent with CB third of federal investment will be offset by reductions at the state and local level and is backed up by a considerable body

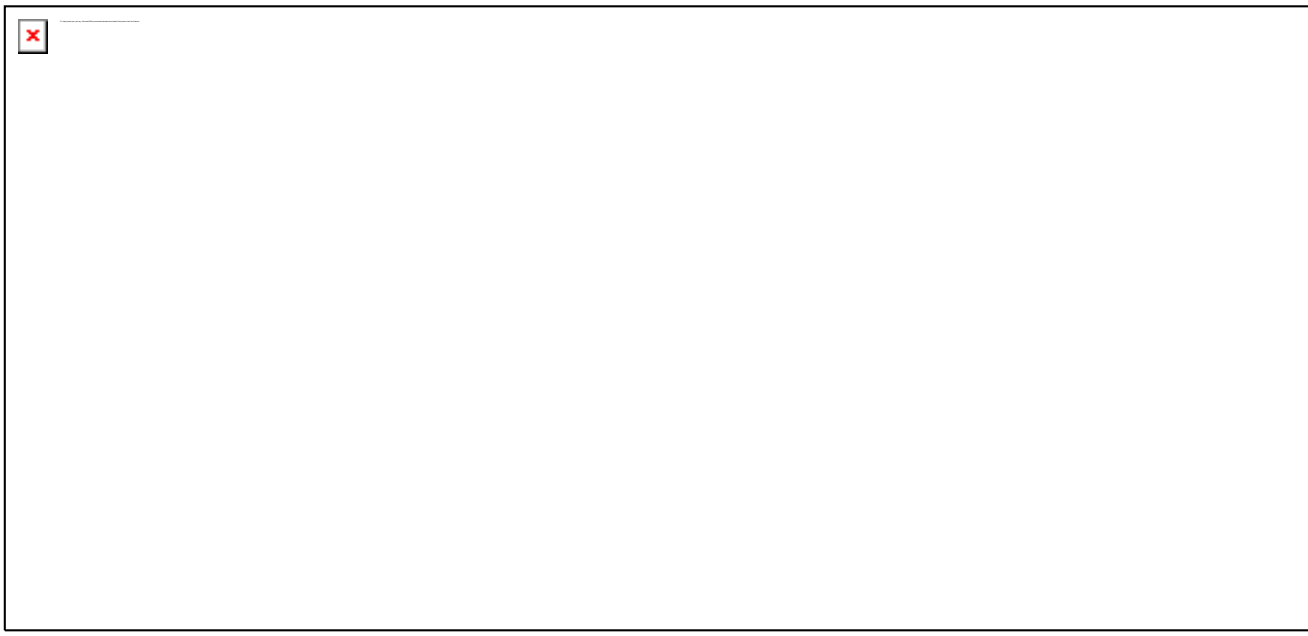
Options for Paying for Infrastructure

If greater federal infrastructure spending is to have any chance of meaningfully increasing output, then it needs to be paid different options for doing so.



As noted earlier, the Senate Democrats' plan proposes reversing many of the TCJA's tax cuts and closing the carried inte scaling back the TCJA is a legitimate option for offsetting the infrastructure plan's costs under pay-as-you-go (PAYGO) rul reallocate rather than reverse the law's fiscal damage and still ensure the return of trillion-dollar deficits next year. It would to use these savings to reverse the tax law's increase in the deficit.

Alternatively, policymakers could raise or levy new infrastructure-specific taxes. For example, the President has floated the federal gas tax by 25 cents, which could raise around $250 billion. That would be enough to fund his $200 billion infrastruc about one-third of the Highway Trust Fund shortfall. A higher gas tax is one of many options that abides by the "user pays those who receive the greatest benefits from new infrastructure investment to pay for it – even if indirectly.



New infrastructure initiatives could also be paid for by reducing spending, including existing infrastructure programs judge lower priority (though some of these options would conflict with elements of either the President's or Senate Democrats' p

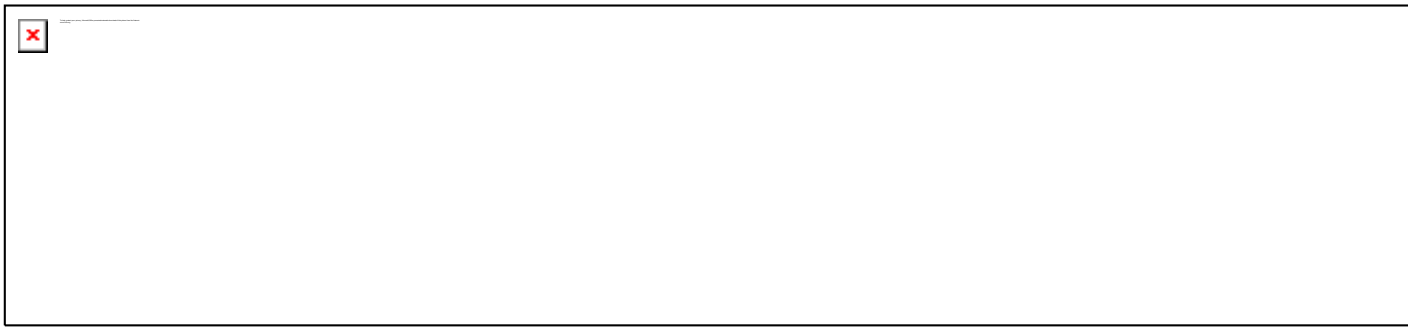
The table below includes a select set of infrastructure offsets. Most are scaleable – for example, if a $1-per-barrel oil tax ra per-barrel oil tax would likely raise almost $300 billion. All estimates are rough. Additional transportation related savings o our website.

AMERICAN OVERSIGHT

Finally, lawmakers could offset infrastructure spending with savings elsewhere in the budget. The President's latest budge
proposals to reduce non-infrastructure spending that could potentially be used as offsets.

AMERICAN OVERSIGHT

Conclusion



Both parties have come forward with distinct proposals to significantly increase infrastructure funding, but neither would ha
impact on sustained economic growth unless appropriately offset with savings elsewhere in the budget.

Importantly, even if new infrastructure spending were fully paid for, the federal budget would still be on an unsustainable fi
trillion-dollar deficits set to return permanently next year. The best strategy for growth would be to pair any increase in pub
comprehensive plan to boost labor force participation, encourage innovation, promote investment, and – perhaps most im
unsustainable growth of our national debt under control.

Subject: Property tax cap question
Attachments: TaxPayerAssn.pdf; AB9_EN.pdf

Hi Pam,
Hope all is well! It was good seeing you on Friday. Guess you like trains too! I know you had a question on whether the Conservation Bond Bill passed back in 2001 (Assembly Bill 9, 17th Legislative Special Session) exempted any property tax increase outside of the property tax cap of $3.64. After doing some research and talking to Lori Chatwood at the Treasurer's office, we believe that the bill did exempt any property tax increase outside of the cap. I've attached a couple documents for your review to show you how we came to that conclusion.

- The first document is from the Nevada Taxpayer Association. Please see the highlighted text on Page 1 of the document.
- The second document is Assembly Bill 9. Please see highlighted text on Page 5, stating the bill is exempt from subsection 1 of NRS 361.453 which caps property tax at $3.64.
  Link to NRS 361.453 https://www.leg.state.nv.us/NRS/NRS-361.html#NRS361Sec453

Let me know if you have any questions or need more information. Thanks!

TAXTOPICS

A Publication of the Nevada Taxpayers Association serving the citizens of Nevada since 1922

ISSUE 3-02 **OCTOBER 2002**

THE BALLOT QUESTIONS - STATE AND LOCAL

In addition to electing candidates for federal, state and local offices, voters will be asked to vote on state and local ballot questions. The statewide questions begin below and the local questions, which are identified by county, begin on Page 5. Sample ballots will be sent to all Nevada voters prior to the start of early voting on October 19th and will provide the questions as they appear on the ballot as well as an explanation, the arguments for and against a question, and any pertinent fiscal information.

Any "Recommendation" which follows a statewide ballot question is based on a survey conducted of NTA's Board of Directors. (Note . . . a response of at least 60% is required from the Board and then predicated on the rate of return, a minimum of 55% of the replies must agree for a position to be taken on a question). If there is no recommendation, the ballot question is not within NTA's purview.

QUESTION NO. 1

Shall the State of Nevada be authorized to issue general obligation bonds in an amount not to exceed $200 million in order to preserve water quality; protect open space, lakes, rivers, wetlands, and wildlife habitat; and restore and improve parks, recreational areas, and historic and cultural resources?

REFERENCE: Assembly Bill No. 9 of the 17th Special Session

FISCAL IMPACT: This legislation is written so that any property tax levied would be outside of the property tax cap of $3.64 per $100 of assessed valuation. For the counties and local governments at the cap, their property tax would be $3.6666 per $100 of assessed valuation. Based on the 2003 valuation, the amount required to retire the bonds would be approximately 2.6 cents per $100 of assessed valuation. A 2.6-cent tax rate on a $200,000 home is $18.20 annually. This tax rate would decline over time as total state assessed value increases. If the bonds are not all sold immediately, but on an "as needed" basis, the required tax rate would be less than 2.6 cents per $100 of assessed value.

RECOMMENDATION: No consensus.

AT A GLANCE

QUESTION NO. 1- No consensus. (The 55% requirement to establish a position was not reached.)

QUESTION NO. 2- Not within the purview of NTA.

QUESTION NO. 3- **OPPOSE**

QUESTION NO. 4- **OPPOSE**

QUESTION NO. 5- Not within the purview of NTA.

QUESTION NO. 6- Not within the purview of NTA.

QUESTION NO. 7- **SUPPORT**

QUESTION NO. 8- **SUPPORT**

QUESTION NO. 9- Not within the purview of NTA.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-004944

QUESTION NO. 2

Shall the Nevada Constitution be amended to provide that: "Only a marriage between a male and female person shall be recognized and given effect in this state?"

REFERENCE: Initiative to amend the Constitution.

ADDITIONAL INFORMATION: This appeared as Question No. 2 on the 2000 General Election ballot and was approved by the voters. As required by Nevada's Constitution, an initiative must be approved by the voters twice for the amendment to be made part of the Constitution.

FISCAL IMPACT: None

QUESTION NO. 3

Shall the Sales and Use Tax Act of 1955 be amended to provide an exemption from the taxes imposed by that act on the gross receipts from the sale and the storage, use or other consumption of farm machinery and equipment employed for the agricultural use of real property?

REFERENCE: Assembly Bill No.243 of the 71st Session

ADDITIONAL INFORMATION: The legislature has already provided this exemption for the other components of the sales tax.

FISCAL IMPACT: The financial impact cannot be determined.

RECOMMENDATION: **OPPOSE.** At a time when the State is experiencing a shortfall in revenue, any further erosion of the sales tax base just adds to the potential shortfall.

QUESTION NO. 4

Shall the Sales and Use Tax Act of 1955 be amended to provide an exemption from the taxes imposed by that act on engines and chassis, including replacement parts and components for the engines and chassis, of professional racing vehicles and for certain motor vehicles used by professional racing teams or sanctioning bodies to transport certain items and facilities?

REFERENCE: Assembly Bill No. 657 of the 71st Session

ADDITIONAL INFORMATION: The legislature has already provided this exemption for the other components of the sales tax.

FISCAL IMPACT: The financial impact cannot be determined.

RECOMMENDATION: **OPPOSE.** At a time when the State is experiencing a shortfall in revenue, any further erosion of the sales tax base just adds to the potential shortfall.

QUESTION NO. 5

Shall the Nevada Constitution be amended to repeal the constitutional rule against perpetuities?

REFERENCE: AJR No. 4 of the 70th Session

FISCAL IMPACT: None

QUESTION NO. 6

Shall the Nevada Constitution be amended to revise the term of office of a Supreme Court justice or district court judge who is appointed to fill a vacancy?

REFERENCE: AJR No. 13 of the 70th Session

FISCAL IMPACT: None

QUESTION NO. 7

Shall the Nevada Constitution be amended to allow an exemption from the state debt limit for state contracts necessary for the improvement, acquisition or construction of public elementary and secondary schools?

REFERENCE: AJR No. 26 of the 70th Session

ADDITIONAL INFORMATION: If this question is approved by the voters, enabling legislation is required to establish the conditions under which this provision would be used. Testimony provided during the hearing on this legislation identified the primary purpose of the proposed change was to provide school districts with poor credit ratings the ability to take advantage of the State's AA credit

AMERICAN OVERSIGHT

rating. It was further indicated that the enabling legislation would not circumvent voter approval of school district facilities when bonds were proposed to be sold.

FISCAL IMPACT: The financial impact cannot be determined until the enabling legislation is passed.

RECOMMENDATION: **SUPPORT.** Those school districts which are not frequent issuers of debt and have low credit ratings would be afforded the ability to utilize the State's credit rating, thereby saving taxpayers' dollars because of lower interest rates.

QUESTION NO. 8

Shall the Nevada Constitution be amended to authorize the Legislature to provide by law for a reduction in the property taxes on a single-family residence occupied by the owner to avoid a severe economic hardship to that owner?

REFERENCE: SJR No. 11 of the 70th Session

ADDITIONAL INFORMATION: If this question is approved by the voters, enabling legislation is required to establish the conditions under which this provision would be used.

FISCAL IMPACT: The financial impact cannot be determined until the enabling legislation is passed.

RECOMMENDATION: **SUPPORT.** If increases in property tax rates or assessed values impacted a homeowner to the point of making life sustaining choices because of increases in his property tax bill, this provision would allow the Legislature to provide a relief mechanism for the homeowner.

QUESTION NO. 9

Shall the Nevada Constitution be amended to allow the use and possession of three ounces or less of marijuana by persons aged 21 years or older, to require the Legislature to provide or maintain penalties for using, distributing, selling or possessing marijuana under certain circumstances, and to provide a system of regulation for cultivation, taxation, sale and distribution of marijuana?

REFERENCE: Initiative to amend the Nevada Constitution.

ADDITIONAL INFORMATION: The Nevada Constitution requires initiatives to be approved twice by the voters. If Question No. 9 is approved by the voters this year, it will appear again on the November 2004 general election ballot.

FISCAL IMPACT: None

Your Vote DOES Count!

In 1645 –	ONE VOTE gave Oliver Cromwell control of England.
In 1649 –	ONE VOTE caused Charles I of England to be executed.
In 1776 –	ONE VOTE gave America the English language instead of German.
In 1839 –	ONE VOTE elected Marcus Morton Governor of Massachusetts.
In 1845 –	ONE VOTE brought Texas into the Union.
In 1868 –	ONE VOTE saved President Andrew Johnson from impeachment.
In 1876 –	ONE VOTE gave Rutherford Hayes the Presidency of the United States.
In 1876 –	ONE VOTE changed France from a Monarchy to a Republic.
In 1923 –	ONE VOTE gave Adolph Hitler leadership of the Nazi Party.

AMERICAN OVERSIGHT

LOCAL BALLOT QUESTIONS

In addition to the statewide questions, voters in 9 of the 17 counties will be asked to vote on various local ballot questions. These questions which begin on Page 5 appear in *italics*. They have been taken from the resolutions provided to NTA by the various County Clerks and Registrars of Voters. The wording of the questions taken from resolutions may have minor changes which will be reflected in the sample ballots sent to the voters. Financial information, where provided, has been taken from the information received and is not based on calculations done by NTA. The counties that have no ballot questions are: Churchill, Esmeralda, Eureka, Humboldt, Lander, Mineral, Pershing and Storey.

Positions have been taken on three of the local ballot questions. In addition, a "caution" appears in the comment section of those advisory questions which have a fiscal impact but do not have the same fiscal disclosures that would be required if they were regular ballot questions. A curious happening in this election is the appearance of 15 advisory questions. That is one more than has been on a November general election ballot for the prior three general election cycles. The content of many of the questions appears to be more appropriate for polling purposes than a ballot question.

Questions with fiscal implications that are usually left unanswered in advisory questions but that should be asked include: How long will the tax be levied? Is the levy for operating or facilities? Will facilities be built or remodeled? Will it be done with bonds and what is the duration of the bonds? How much of the revenue received from the tax rate will be spent on maintenance? How will the expenditures be accounted for?

Types of Local Ballot Questions

ADVISORY - No legal requirement is placed on the elected officials or any other official to enact the provisions of an advisory ballot question, including the imposition of a tax, if the question is approved. Additionally, advisory questions do not require the full disclosure of fiscal information. How much fiscal information is provided is left to local discretion.

APPROVAL OF DEBT - These questions ask for the approval to finance debt by issuing general obligation bonds in which case a property tax rate will be identified. The debt may also be financed through the issuance of revenue bonds which will be repaid from a revenue source other than property tax – generally sales tax.

For any question seeking approval to issue general obligation bonds, the sample ballot will contain the purpose of the issue, a disclosure of the property tax rate anticipated and the dollar amount of interest, and an explanation of how the operating and maintenance costs of the facility will be paid.

The actual tax rate necessary to pay the bonds may be higher or lower than the estimate depending on: the interest rates at the time the bonds are sold; maturity schedule and term of bonds as actually issued; and actual assessed value of property in the district at the time bonds are sold.

TAX OVERRIDE - Allows a property tax rate to be set for operational expenses, such as additional public safety personnel. Tax overrides may not be levied for longer than 30 years and may be discontinued sooner by the governing body that has imposed the override.

PAY AS YOU GO - Used generally by school districts to provide for a property tax rate to fund the building refurbishing of school facilities as funds are accrued. The rate cannot be imposed for longer than 20 years.

TAX ROLLOVER - A mechanism to allow school districts to ask voters to approve a continuation of the existing debt rate to build facilities. Until 2008, which is when the current provision expires, a school district which has received voter approval for the "rollover" may issue debt against any property tax rate which becomes available because of prior debt being retired.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-004947

CARSON CITY

QUESTION NO. CC 1 - ADVISORY - RETAINING FUJI PARK

Should Carson City make available for commercial development city property known as the Carson Fairgrounds while retaining and improving the area known as Fuji Park?

ADDITIONAL INFORMATION: If approved, there is an expectation of revenue being received from property tax by allowing commercial development as well as additional expenditures to improve Fuji Park.

NTA COMMENT: **CAUTION.** Voters should acquaint themselves with the fiscal implications of this advisory question.

QUESTION NO. CC 2 - PROPERTY TAX FOR SCHOOLS

Shall the Carson City School District be authorized to issue up to $3,750,000 of general obligation bonds for the purposes of mitigating the impact of toxic mold and creating safer and more efficient schools by replacing, improving, acquiring, constructing and equipping school facilities? The Bonds are expected to require a property tax levy for 20 years. Due to the retirement of outstanding bonds and projected assessed value growth, passage of this question is not expected to result in an increase in the existing property tax rate levied to pay the School District's bonds.

ADDITIONAL INFORMATION: The current school district debt rate is 47 cents. The anticipated interest rate is 5.50% with a total anticipated cost of $6,274,646.

CLARK COUNTY

QUESTION NO. 10 - ADVISORY - 2002 FAIR SHARE TRANSPORTATION FUNDING PROGRAM

Shall the Nevada State Legislature authorize the Board of Clark County Commissioners to implement the Regional Transportation Commission of Southern Nevada 2002 Fair Share Funding Program, which will generate approximately $2.7 billion over 25 years from taxes on developers, aviation fuel, and retail sales to fund improvements in local transportation, including additional street and highway projects, new and expanded transit, added transit services for senior citizens, and air quality improvements and make southern Nevada eligible to receive up to an additional $3 billion in state and federal funding for transportation and air quality?

ADDITIONAL INFORMATION: Developer fees of $500 per new residential unit would be increased by $150 the first year with incremental increases each five years thereafter. Fees on commercial development would increase by 15 cents per square foot with incremental increases each five years thereafter. One-cent per gallon tax on jet aviation fuel would be added and the sales tax would be increased by an additional 1/4 of 1%. Half of the 1/4 of 1% would terminate once $1.7 billion was raised or June 30,2028, whichever occurs first, unless extended by a vote of the people.

NTA COMMENT: **Qualified SUPPORT.** A "caution" has been indicated on a number of advisory questions. However, this advisory question provides adequate fiscal information for the voters to make an informed decision. Additionally, both the expenditures and funding associated with this question were subjected to deliberations by a citizens' committee at meetings open to the public over the last year. Detailed information about the question is available from the Clark County RTC.

QUESTION NO. 11 - ADVISORY - HOMELESS SERVICES AND AFFORDABLE HOUSING TRUST FUND

Shall the Board of County Commissioners urge the 2003 Nevada Legislature to enact legislation establishing a Homeless Services and Affordable Housing Trust Fund and authorize the Board of County Commissioners to impose an annual property tax of $0.01 per $100 of assessed valuation to provide monies into that Trust Fund for operating services and housing for the homeless and low income individuals and households?

ADDITIONAL INFORMATION: The tax is estimated to generate $4 million per year.

NTA COMMENT: **CAUTION.** Voters should acquaint themselves with the fiscal implications of this advisory question. If this question had been posed as a regular property tax override, the wording of the question would have had to identify the cost to the homeowner. Additionally, as a tax override question, the length of time the property tax levy would be imposed would have been identified. *Clark County continued on Page 6*

AMERICAN OVERSIGHT

Clark County continued from Page 5

QUESTION NO. 12 - ADVISORY - LOCAL CONTROL OF TOBACCO USE

Should the Clark County Board of Health be able to adopt regulations that are stronger than state law in order to protect people from secondhand smoke? (This does not include businesses that exclude persons under the age of 21.)

QUESTION NO. 13 - ADVISORY - PROHIBITING TOBACCO USE IN CERTAIN PUBLIC PLACES

Should secondhand smoke be completely prohibited by state law in places frequented by children such as schools, grocery stores, restaurants, and government buildings?

QUESTION NO. 14 - ADVISORY - AUTHORITY FOR A LOCALLY CONTROLLED NOT FOR PROFIT PUBLIC ELECTRICAL UTILITY

Should the Nevada Legislature take appropriate action to enable the electrical energy provider for Southern Nevada to be a locally controlled, not for profit public utility?

ADDITIONAL INFORMATION: While not identified in the question or explanation, this question does not address how $75 million in tax revenue which would be lost to other governments would be made up; how incurring over $3 billion in debt in addition to other debt to provide ongoing infrastructure requirements will allow electric rates to be reduced for any prolonged length of time; or how ratepayer funds from electric service would be segregated from other funds.

NTA POSITION: **OPPOSE.** This question is a perfect example of an advisory question with serious fiscal implications providing insufficient information for voters to make an informed decision.

CITY OF HENDERSON

LIBRARY SPECIAL ELECTIVE TAX QUESTION NO. 1

Shall the Board of Trustees of the Henderson District Public Libraries be authorized to levy an additional property tax rate for library purposes (including, without limitation, acquiring, constructing, equipping and improving library facilities, the repayment of debt issued therefor, and operating and maintaining library facilities) of 4 cents per $100 assessed valuation for a period of 30 years commencing July 1, 2003? The cost for the owner of a new $100,000 home is estimated to be $14 per year.

BOULDER CITY

BOULDER CITY ADVISORY QUESTION NO. 1

Should the City of Boulder City enter a recreational land lease in the Eldorado Valley recreation area with Club MX for purpose of developing 50 acres as a Motocross Park?

NTA COMMENT: **CAUTION.** Voters should acquaint themselves with the fiscal implications of this advisory question.

CITY OF MESQUITE

CITY OF MESQUITE QUESTION NO. 1 - SALE OF PUBLIC LANDS AMENDMENT

Shall the Mesquite Municipal Code be amended to read: "All public land sales by the City of Mesquite must be conducted through a properly noticed public auction or open to the public sealed bid process. The City must set a minimum acceptable bid in the notice for the sale."?

CITY OF MESQUITE QUESTION NO. 2 - AN ORDINANCE AMENDING THE MESQUITE MUNICIPAL CODE 1-6-1

Shall the Mesquite Municipal Code 1-6-1 be amended to require City Council members to be elected by district?

CITY OF MESQUITE QUESTION NO. 3 - AN ORDINANCE AMENDING MESQUITE MUNICIPAL CODE 1-6-2

Shall an ordinance be passed to set additional candidacy filing regulations for any City Officer or City employee receiving compensation?

TOWN OF MOAPA

MOAPA E-911 ADVISORY QUESTION NO. 1

Shall the annual property tax rate by increased by $0.005 per $100 of assessed valuation to fund the capital and operation and maintenance costs of an E-911 Emergency Telephone Number System to provide a single number and call identification system for police, fire, and paramedic services?

NTA COMMENT: **CAUTION.** Voters should acquaint themselves with the fiscal implications of this advisory question.

AMERICAN OVERSIGHT

DOUGLAS COUNTY

DOUGLAS COUNTY QUESTION ONE

Should the county increase the excise tax on motor vehicle fuel by five cents (5¢) per gallon and use these tax revenues to construct, maintain and repair roads as well as issue bonds for these road projects?

DOUGLAS COUNTY QUESTION TWO

Should the county impose a tax on the privilege of constructing new non-residential buildings with the proceeds of the tax to be used for road projects, road bonds or both projects and bonds? This privilege tax cannot exceed fifty cents (50¢) per square foot of new non-residential construction.

DOUGLAS COUNTY QUESTION THREE

Should the county increase the sales tax rate by one-quarter of one percent (.0025) with the revenue from the tax to be used for the construction and repair of roads as well as issue bonds for these road projects?

DOUGLAS COUNTY QUESTION NO. 4

NOTE TO VOTERS: Douglas County Question No. 4 is the subject of litigation currently pending before the Nevada Supreme Court.

Shall Douglas County adopt an ordinance amending its development code to provide that no more than 280 new dwelling units shall be built annually in Douglas County, exclusive of the area regulated by the Tahoe Regional Planning Agency (TRPA), except in a disaster emergency declared by the Board of County Commissioners?

ADDITIONAL INFORMATION: This question was placed on the ballot by initiative petition. It was challenged in District Court and the judge ruled that the question should be taken off the ballot. Proponents took the case to the Supreme Court which issued a "stay" until the Supreme Court can hear arguments. Therefore the question is on the ballot, but, if the Supreme Court rules on or before November 5, the Douglas County Clerk is prepared to either count the votes on the question or ignore them.

NTA POSITION: **Qualified OPPOSITION.** Just like advisory questions, this initiative petition question has serious fiscal ramifications which are not explained. "Restricting growth" may be an appealing sound bite but voters should have more information concerning the potential impacts to the availability of affordable housing and how their property tax rates and property tax assessments may be impacted in the future.

ELKO COUNTY

QUESTION NO. 1 - PROCEEDS FROM SALE OF ELKO GENERAL HOSPITAL (ADVISORY)

Should the Board of Elko County Commissioners maintain the $20 million dollars received from the sale of Elko General Hospital and use the investment income only for operating costs, capital projects and economic development?

NTA COMMENT: **CAUTION.** Voters should acquaint themselves with the fiscal implications of this advisory question.

QUESTION NO. 2 - GAS TAX INCREASE (ADVISORY)

Should the Board of Elko County Commissioners act to increase the County optional gas tax levied pursuant to NRS 373.030(1)(b) from the current 4 cents per gallon to the statutory maximum of 9 cents per gallon at the rate of 1 cent per year for five (5) years?

NTA COMMENT: **CAUTION.** Voters should acquaint themselves with the fiscal implications of this advisory question.

CITY OF WEST WENDOVER

ADVISORY QUESTION NO. 1

Should the Cities of West Wendover, Nevada and Wendover, Utah proceed with the necessary process to combine the City of West Wendover, Nevada and the City of Wendover, Utah into a single incorporated city within the State of Nevada?

NTA COMMENT: **CAUTION:** Voters should acquaint themselves with the fiscal implications of this advisory question.

Elko County continued on Page 8

AMERICAN OVERSIGHT

Elko County continued from Page 7

QUESTION NO. I - ESTABLISHMENT OF METROPOLIS IRRIGATION DISTRICT

Should an irrigation district be established pursuant to Chapter 539 of the Nevada Revised Statutes which district shall include the following described land:
Portions of Townships 39N R61E and 39N R62E (described in detail in the ballot question). *In addition, should the district be divided into 3 divisions containing the following described lands with the first directors being as shown: Division One: All lands within Sec 28, 29, 32, T39N, R62E - James Bradish Dalton: Division Two: All lands within Sec 13, 24, 25, T39N, R61E and Sec 18, 19, 30, 31, T39N, R62E - Carl Uhlig: Division Three: All lands within Sec 14, 15, 22, 23, T39N, R61E - Carl O. Peavey? Any elector may cast their vote for all three divisions.*

ADDITIONAL INFORMATION: Future costs cannot be determined until available grant funds are used to determine the extent of required repairs associated with the repair/reconstruction of the Bishop Creek Dam.

LINCOLN COUNTY

LINCOLN COUNTY SCHOOL DISTRICT BOND QUESTION

Shall Lincoln County School District be authorized to issue up to $3,000,000 of general obligation bonds for the purpose of acquiring, constructing, improving and equipping school facilities? The Bonds are expected to require a property tax levy for 30 years. ***Due to the retirement of outstanding bonds and projected assessed value growth, passage of this question is not expected to result in an increase in the existing property tax rate levied to pay the District's bonds.***

LYON COUNTY

LYON COUNTY QUESTION NO. 10

Should the county increase the sales tax rate by one-half of one percent (.005) with the revenue from the tax to be used for the construction, maintenance and repair of public roads?

MASON VALLEY FIRE PROTECTION DISTRICT QUESTION

Shall the Mason Valley Fire Protection District be allowed to impose but not to exceed a 10 cent tax levy on the per one hundred dollars of assessed valuation in ad valorem tax not to exceed thirty (30) years? The increase is due to the very low growth in assessed value in the Mason Valley Fire Protection District and increased cost of capital acquisition and operation.

NTA COMMENT: As required by statute, this ballot question should have the cost to the owner of a $100,000 home contained in the question.

NYE COUNTY

BALLOT QUESTION - ELECTION OF THE BOARD OF COMMISSIONERS

1. Shall the five commissioner districts in the County of Nye be abolished?
2. If the commissioner districts are NOT abolished, then shall the five commissioners be elected: At large____ or By District_____.

WASHOE COUNTY

WC-1 - FLUORIDATION (ADVISORY QUESTION)

Shall the public water systems in the geographic area of Washoe County be allowed to adjust the naturally-occurring fluoride concentration in the drinking water to an optimum level recommended by public health authorities in order to reduce the occurrence of tooth decay?

NTA COMMENT: **CAUTION.** Voters should acquaint themselves with the fiscal implications of this advisory questions.

WC-2 - TRANSPORTATION FUNDING (ADVISORY QUESTION)

Shall the Washoe County Board of Commissioners seek state legislation for the Regional Transportation Commission (RTC) to obtain necessary additional funding for transportation projects that will reduce traffic congestion, improve air quality, repair and maintain roads, and increase public transportation in the Truckee Meadows?

AMERICAN OVERSIGHT

ADDITIONAL INFORMATION: The explanation of the advisory question contains the funding mechanisms which the RTC will propose to the legislature. These mechanisms are: (1) indexing the Regional Road Impact Fee on developers for inflation; (2) indexing the fuel tax for inflation; and (3) increasing the sales tax by 1/8%.

NTA COMMENT: **Qualified SUPPORT.** While this is an advisory question, a citizens' committee studied the need and funding options for the last year at public meetings. The question is the result of the findings of the committee. Detailed information on this question is available from the Washoe County RTC. Please note: If this question is approved by the voters, NTA will request that the indexing provisions contained in the question be capped.

WC-3 - ANIMAL SHELTER

Shall Washoe County be authorized to issue up the $10,750,000 of general obligation bonds to provide an animal shelter project and to levy an additional property tax rate for the purpose of operating and maintaining the animal shelter project and performing related animal control functions of up to 3 cents per $100 of assessed valuation for a period of up to 30 years? The bonds are expected to require a property tax levy for 30 years. The bonds are estimated to result in an increase in the property taxes that the owner of a new $100,000 home will pay which will average $1.98 per year. In addition, the cost of the 3 cents animal shelter operating property tax levy for the owner of a new $100,000 home is estimated to be $10.50 per year. However, an Interlocal Agreement between Reno, Sparks, and Washoe County, requires the 3 cents operating property tax rate increase to be fully offset by property tax reductions in the Cities of Reno and Sparks of 3 cents and partially offset by a property tax reduction of 1 cent in the unincorporated areas of the County.

WC-4 - SOI AND MUNICIPAL SERVICES TAX (ADVISORY QUESTION) UNINCORPORATED COUNTY VOTERS SPHERE OF INFLUENCE AND UNINCORPORATED MUNICIPAL SERVICES TAX QUESTION

Would you support moving the Spheres of Influence of Reno and Sparks back to their pre-May 9, 2002 locations, if a property tax were imposed in the unincorporated area of Washoe County to cover the cost of the provision of municipal services in the unincorporated area?

NTA COMMENT: **CAUTION.** Voters should acquaint themselves with the fiscal implications of this advisory question.

WC-5 - UNINCORPORATED TOWN

Shall Washoe County be authorized to form an unincorporated town within the boundaries of the unincorporated area of Washoe County for the purpose of providing funding support for the following governmental services: Sheriff patrol and detectives, land use planning and zoning, business licensing, community parks and recreational services, engineering and road maintenance, misdemeanant prosecution, animal control, and fire suppression? A "yes" vote carries with it the assent to be taxed for such services. Imposition of any such tax would require the approvals of the Board of County Commissioners and the Nevada Department of Taxation.

ADDITIONAL INFORMATION: The estimated first-year property tax rate is 3.88 cents per $100 of assessed value or $13.58 per year for the owner of a new $100,000 home.

WC-6 - SOI AND MUNICIPAL SERVICES TAX (ADVISORY QUESTION) CITY VOTERS SPHERE OF INFLUENCE AND UNINCORPORATED MUNICIPAL SERVICES TAX QUESTION

Would you support moving the Spheres of Influence of Reno and Sparks back to their pre-May 9, 2002 locations, if a property tax were imposed in the unincorporated area of Washoe County to cover the cost of the provision of municipal services in the unincorporated area?

NTA COMMENT: **CAUTION.** Voters should acquaint themselves with the fiscal implications of this advisory question.

WC-7 - TRAIN TRENCH (ADVISORY QUESTION)

Shall the Board of Commissioners of Washoe County adopt a resolution urging the City Council of the City of Reno to continue implementation of the railroad (RETRAC) trench project?

NTA COMMENT: **CAUTION.** Voters should acquaint themselves with the fiscal implications of this advisory question.

Washoe County continued on Page 10

AMERICAN OVERSIGHT

NV-DA-20-0615-A-004952

Washoe County continued from Page 9

WC-8 - TOBACCO USE (ADVISORY QUESTION)

Shall the Washoe County District Board of Health be able to adopt regulations that are stronger than state law in order to protect people from secondhand smoke? This does not include businesses that exclude persons under the age of 21.

WC-9 - SECONDHAND SMOKE (ADVISORY QUESTION)

Shall secondhand smoke be completely prohibited by state law in places frequented by children such as schools, grocery stores, restaurants and government buildings?

SCHOOL DISTRICT BOND QUESTION (ADVISORY QUESTION)

Shall the Washoe County School District be authorized to issue general obligation school bonds to finance the acquisition, construction, improvement and equipping of school facilities? ***District projections at the time the bonds are issued must indicate that issuance of the bonds will not result in an increase of the existing school bond property tax rate of 38.85 cents ($0.3885) per $100 of assessed value****. If approved, this authorization will expire November 5, 2012.*

NTA COMMENT: **CAUTION.** Voters should acquaint themselves with the fiscal implications of the advisory question. It should also be noted that it is very unusual to see a school facilities question as an advisory question, particularly one that is considered a "rollover" and does not require an increase in the property tax rate.

CITY OF RENO

R-1 - ARTS, AQUATICS AND RECREATION PROJECTS BOND QUESTION

Shall the City of Reno be authorized to issue up to $40,000,000 of general obligation bonds for the purpose of acquiring, constructing, equipping and improving arts, aquatics and recreation projects including real property, structures, fixtures, furnishings and equipment therefor? The Bonds are expected to require a property tax levy for 30 years. The Bonds are estimated to result in an increase in the property taxes that the owner of a new $100,000 home will pay which will average $17.50 per year.

R-2 - WASHOE COUNTY/RENO CONSOLIDATION

Shall the separate governments of Washoe County and the City of Reno be consolidated provided consolidation reduces taxes and/or improves services as an alternative to the current system of separate governments for Washoe County and the City of Reno with the current fiscal inequity?

R-3 - REMOVE RENO FROM WASHOE COUNTY

Shall the City of Reno be removed from Washoe County and a County of Reno be created provided it reduces taxes and/or improves services as an alternative to the current system of separate governments for Washoe County and the City of Reno with the current fiscal inequity

WHITE PINE COUNTY

QUESTION NO. 1 (ADVISORY)

Shall White Pine County request the Legislature authorize the County to fund the operation and maintenance of a County swimming pool facility through an increase in the sales tax rate of one-quarter of one percent (.0025)?

ADDITIONAL INFORMATION: The County Commissioners would propose an increase in the room tax to fund the building of the swimming pool if the question is passed.

NTA COMMENT: **CAUTION.** Voters should acquaint themselves with the fiscal implications of this advisory question.

REMEMBER TO VOTE

TUESDAY

NOVEMBER 5, 2002

AMERICAN OVERSIGHT

AN OPEN LETTER TO NTA MEMBERS

Nominations for the sixth annual *Cashman Good Government Award* are now being accepted. The Award was established in 1997 to acknowledge those employees at all levels of Nevada's governments who make positive contributions to the citizens of Nevada by providing effective and timely service in a cost effective manner.

Many of you are well acquainted with various government entities and their practices whether through business or personal interests. You, therefore, perhaps know of a government employee, a department, or an agency at the state, city, or county level whose work efforts are worthy of recognition. Maybe the person you communicate with is promoting a user-friendly government or you believe a particular department is making substantial contributions through fiscally sound operations. No matter whether it's an individual or a "team" who is working to provide efficient and cost-effective service to the taxpayers – we want to know.

Nomination forms and rules for this year's award are available at both NTA's Carson City and Las Vegas offices. Please call 775/882-2697 (Carson City) or 702/457-8442 (Las Vegas) or e-mail us at info@nevadataxpayers.org.

Why not take the opportunity now to let us know who you feel is worth of recognition and consideration for the *Cashman Good Government Award.* Please keep in mind that the deadline for nominations is **5:00 p.m., November 15, 2002.**

SELECTION PROCESS

A Selection Committee comprised of members of the Nevada Taxpayers Association will review all nomination forms submitted. The entries are numerically scored. Based on the scores, at least one finalist will be selected from: counties, cities and towns with a population of over 100,000; counties, cities and towns with a population of under 100,000; a school district; and state government.

AWARD ANNOUNCEMENT

Entrants will be notified of the chosen finalists prior to the Association's annual dinner in Carson City in early 2003. The finalists are invited to attend the dinner and be recognized for their achievements.

The winner will be announced from among the finalists and presented with the Cashman Good Government Award trophy.

AMERICAN OVERSIGHT

Assembly Bill No. 9–Joint Rules Committee

CHAPTER.....

AN ACT relating to natural resources; directing the submission to a vote of the people of a proposal to issue state general obligation bonds to protect, preserve and obtain the benefits of the property and natural resources of this state; providing for the use of the proceeds if the issue is approved; creating the fund to protect natural resources; and providing other matters properly relating thereto.

THE PEOPLE OF THE STATE OF NEVADA, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

Section 1. At the general election to be held on November 5, 2002, there must be submitted to the voters of this state, in the manner prescribed by chapter 349 of NRS, a proposal to issue general obligation bonds of the state to protect, preserve and obtain the benefits of the property and natural resources of this state in an amount not to exceed $200,000,000. If the proposal is carried, the bonds may be issued at one time or from time to time, and the Legislature shall levy such tax as may be necessary to pay the principal of and interest on the bonds. The proceeds of such tax together with any other amounts appropriated to pay the principal of and interest on the bonds when due must be deposited in the consolidated bond interest and redemption fund.

Sec. 2. Except as otherwise provided in subsection 9 of section 3 of this act, of the total bond issue, if approved pursuant to section 1 of this act:

1. An amount of $27,000,000 must be allocated to the Division of State Parks of the State Department of Conservation and Natural Resources to protect and preserve the property or natural resources of this state or to obtain the benefits thereof for the following purposes:

(a) For the acquisition of real or personal property or interests in real or personal property for purposes related to parks and recreation; or

(b) To support extraordinary capital improvements and renovations of facilities in state parks.

2. An amount of $27,500,000 must be allocated to the Division of Wildlife of the State Department of Conservation and Natural Resources for the following purposes:

(a) For the acquisition of real or personal property or interests in real or personal property to enhance, protect, and manage wildlife and wildlife habitat or enhance recreational opportunities related to wildlife, or both; or

(b) For the development and renovation of facilities or the improvement of existing habitats for fish and other wildlife.

3. An amount of $25,000,000 must be allocated to the Las Vegas Springs Preserve in Clark County for the following purposes:

(a) Planning, development and design of the preserve;

(b) Providing wildlife habitat;

(c) Constructing buildings and other facilities for the preserve; or

(d) Providing other infrastructure for the preserve.

The Las Vegas Springs Preserve shall match the allocation made pursuant to this subsection with an amount of money or value of services, material or equipment that is equal to 50 percent of the cost of each project that is completed pursuant to this subsection.

AMERICAN OVERSIGHT

4. An amount of $10,000,000 must be allocated to Clark County to develop a county regional wetlands park at the Las Vegas Wash. The money allocated pursuant to this paragraph must be used to:

(a) Divert water, control erosion and make improvements to restore the existing wetlands, and to create new wetlands;

(b) Acquire and develop land and water rights;

(c) Provide recreational facilities; and

(d) Provide parking for and access to the park.

Clark County shall match the allocation made pursuant to this subsection with an amount of money or value of services, material or equipment that is equal to 50 percent of the cost of each project that is completed pursuant to this subsection.

5. An amount of $35,000,000 must be allocated to the Department of Cultural Affairs to establish at the Las Vegas Springs Preserve a museum to provide exhibits and education regarding the natural resources, history and cultural heritage of this state. The money allocated pursuant to this subsection must be used for:

(a) The planning and design of the museum;

(b) Construction of the museum;

(c) Moving exhibits from other locations to the museum; or

(d) Creating new exhibits.

6. An amount of $10,000,000 must be allocated to Washoe County to enhance and restore the Truckee River corridor. The money allocated pursuant to this subsection must be used to:

(a) Acquire and develop land and water rights;

(b) Provide recreational facilities;

(c) Provide parking for and access to and along the river; or

(d) Restore the Truckee River corridor.

Washoe County shall match the allocation made pursuant to this subsection with an amount of money or value of services, material or equipment that is equal to 50 percent of the cost of each project that is completed pursuant to this subsection.

7. An amount of $65,500,000 must be allocated to the State Department of Conservation and Natural Resources to be administered by the Division of State Lands to carry out the purposes set forth in this subsection. The money allocated pursuant to this subsection must be used for the following purposes:

(a) To make grants in the following amounts:

(1) An amount of $7,250,000 to state agencies, counties, municipalities or private nonprofit organizations that qualify for grants pursuant to the regulations adopted by the Administrator of the Division of State Lands pursuant to this subsection, as appropriate, for the construction of recreational trails, including, without limitation, hiking, equestrian and bicycle trails. The award of grants pursuant to this subparagraph must be coordinated with the Division of State Parks.

(2) An amount of $5,000,000 to state agencies, counties, municipalities or private nonprofit organizations that qualify for grants pursuant to the regulations adopted by the Administrator of the Division of State Lands pursuant to this subsection, as appropriate, for the acquisition of land and water or interests in land and water for urban parks and

AMERICAN OVERSIGHT

greenbelts. Programs and projects paid for by grants made pursuant to this subparagraph must be for the protection and preservation of the property and natural resources of this state, or for the purposes of obtaining the benefits thereof. The award of grants pursuant to this subparagraph must be coordinated with the Division of State Parks.

(3) An amount of $3,000,000 to state agencies, counties whose population is less than 100,000 or municipalities located within those counties, as appropriate, for the development of habitat conservation plans. The making of grants pursuant to this subparagraph must be coordinated with the Division of Wildlife and the Nevada Natural Heritage Program.

(4) An amount of $250,000 to counties whose population is less than 100,000 and municipalities located within those counties for the development and adoption of plans for open spaces.

(5) An amount of $20,000,000 to counties and municipalities for the acquisition of land and water or interests in land and water to protect and enhance wildlife habitat, sensitive or unique vegetation, historic or cultural resources, riparian corridors, wetlands and other environmental resources pursuant to an adopted plan for open spaces. Grants made pursuant to this subparagraph must require:

(I) In a county whose population is 100,000 or more, that the county or municipality which receives the grant matches the grant with an amount of money or value of services, material or equipment that is equal to 50 percent of the cost of the acquisition.

(II) In a county whose population is less than 100,000, that the county or municipality which receives the grant matches the grant with an amount of money or value of services, material or equipment that is equal to 25 percent of the amount of the grant.

(6) An amount of $10,000,000 for grants to Churchill County, Douglas County, Lyon County or Carson City and municipalities located within those counties to enhance and restore the Carson River corridor. Grants made pursuant to this subparagraph must require that the county or municipality which receives the grant match the grant with an amount of money or value of services, material or equipment that is equal to 50 percent of the cost of the project for which the grant is awarded. Money awarded for grants pursuant to this subparagraph must be used to:

(I) Acquire and develop land and water rights;

(II) Provide recreational facilities;

(III) Provide parking for and access to and along the river; or

(IV) Restore the Carson River corridor.

(7) An amount of $5,000,000 for grants to Douglas County, Washoe County or Carson City and municipalities located within those counties to enhance and develop the Lake Tahoe Path System. Grants made pursuant to this subparagraph must require that the county or municipality which receives the grant match the grant with an amount of money or value of services, material or equipment that is equal to 50 percent of the cost of the project for which the grant is awarded. Money awarded for grants pursuant to this subparagraph must be used to:

(I) Acquire land for the path system; or

(II) Develop the path system.

AMERICAN OVERSIGHT

(b) An amount of $15,000,000 to carry out contracts or agreements under which nonprofit conservation organizations may acquire land and water or interests in land and water for the public benefit, to protect and enhance wildlife habitat, sensitive or unique vegetation, historic or cultural resources, riparian corridors, floodplains and wetlands and other environmental resources. Any money provided by the Division of State Lands pursuant to this paragraph must be matched by an amount of money or value of services, material or equipment that is equal to 50 percent of the cost of the acquisition. The investment of this state in any property acquired pursuant to this paragraph must be secured by an interest in the property.

The Administrator of the Division of State Lands may adopt such regulations as the Administrator determines are necessary to carry out the programs and projects and make the grants described in this subsection. The regulations adopted by the Administrator must state whether and to what degree applicants for grants must match any money awarded.

Sec. 3. 1. The fund to protect natural resources is hereby created in the state general fund. The Director of the Department of Conservation and Natural Resources shall administer the fund and prescribe the method pursuant to which the governmental entities which administer the programs and projects described in section 2 of this act may request money from the fund in accordance with the allocations made pursuant to that section.

2. The proceeds of any bonds issued pursuant to section 1 of this act, after deducting any applicable charges, must be deposited in the fund.

3. Any interest or income earned on the money in the fund must be credited to the fund. Any money remaining in the fund at the end of the fiscal year does not revert to the general fund but remains in the fund for authorized expenditure.

4. All claims against the fund must be paid as other claims against the state are paid.

5. The State Department of Conservation and Natural Resources may use the proceeds from the bonds issued pursuant to section 1 of this act and the interest income thereon to defray the costs of administering the provisions of this act and may request an appropriation to defray the costs of administering this act if the money in the fund is not sufficient. The money in the fund must be used only for the purposes set forth in this act and must not be used to replace or supplant funding available from other sources.

6. Any interests in land or water acquired by the state pursuant to this act:

(a) Must be acquired and held by the Division of State Lands pursuant to chapter 321 of NRS.

(b) Must not be acquired by condemnation or the power of eminent domain.

The acquisition of any water rights pursuant to this act must not have a negative impact on the distribution of water to other persons who hold valid water rights.

7. Any property acquired pursuant to the provisions of this act may include easements and other interests in land. Before acquiring any interest in land pursuant to this act, recipients of money pursuant to this act must

AMERICAN OVERSIGHT

consider such alternatives to the acquisition of fee simple title as may be available, including, without limitation, the acquisition of easements and remainders after life estates.

8. If any interests in land or water acquired by the state pursuant to this act, or portions thereof, are later determined not to be necessary to carry out the purposes of the act, those interests may be sold or leased by the Division of State Lands pursuant to chapter 321 of NRS and the proceeds deposited in the fund to protect natural resources. The proceeds received from such transactions must be expended to carry out the purposes of this act.

9. Money may be reallocated among the purposes set forth in each subsection of section 2 of this act with the advance approval of the Interim Finance Committee.

10. The Interim Finance Committee must approve the issuance of any bonds issued pursuant to this act if the proceeds of which will be used for the purposes set forth in paragraph (a) of subsection 7 of section 2 of this act.

Sec. 4. The Legislature finds and declares that the issuance of bonds pursuant to this act, except the use of the proceeds of those bonds pursuant to subsections 3 and 5 of section 2 of this act and subparagraph (5) of paragraph (a) of subsection 7 of section 2 of this act and paragraph (b) of subsection 7 of section 2 of this act:

1. Is necessary for the protection and preservation of the property and natural resources of this state and for the purpose of obtaining the benefits thereof; and

2. Constitutes an exercise of the authority conferred by the second paragraph of section 3 of article 9 of the Constitution of the State of Nevada.

Sec. 5. To the extent not inconsistent with the provisions of this act, the provisions of the State Securities Law, contained in chapter 349 of NRS, apply to the bonds issued pursuant to this act.

Sec. 6. Notwithstanding the provisions of NRS 361.453 to the contrary, any levy imposed by the legislature for the repayment of bonded indebtedness issued pursuant to the provisions of this act must not be included in calculating the limitation set forth in subsection 1 of NRS 361.453 on the total ad valorem tax levied for all public purposes.

Sec. 7. If any provision of this act, or application thereof to any person, thing or circumstance, is held invalid, the invalidity shall not affect the provisions or application of this act which can be given effect without the invalid provision or application, and to this end the provisions of this act are declared to be severable.

Treasury Press Release: Treasury Releases Proposed Regulations on Opportunity Zones Designed to Incentivize Investment in American Communities

Washington – The Treasury Department today issued proposed guidance related to the new Opportunity Zone tax incentive. The tax benefit, created by the 2017 Tax Cuts and Jobs Act, is designed to spur economic development and job creation by encouraging long-term investments in economically distressed communities nationwide.

"We want all Americans to experience the dynamic opportunities being generated by President Trump's economic policies. We anticipate that $100 billion in private capital will be dedicated towards creating jobs and economic development in Opportunity Zones," said Secretary Steven T. Mnuchin. "This incentive will foster economic revitalization and promote sustainable economic growth, which was a major goal of the Tax Cuts and Jobs Act."

The proposed regulations released today clarify what gains qualify for deferral, which taxpayers and investments are eligible, the parameters for Opportunity Funds, and other guidance. The proposed regulations should provide investors and fund sponsors the information they need to confidently enter into new business

AMERICAN OVERSIGHT

NV-DA-20-0615-A-004960

arrangements in designated Opportunity Zones. The Treasury Department plans on issuing additional guidance before the end of the year.

The Opportunity Zone incentive offers capital gains tax relief to investors for new investment in designated areas. Investment benefits include deferral of tax on prior gains as late as 2026 if the amount of the gain is invested in an Opportunity Fund. The benefits also include tax forgiveness on gains on that investment if the investor holds the investment for at least 10 years. Opportunity Zones retain their designation for 10 years, but under the proposed regulations, investors can hold onto their investments in Qualified Opportunity Funds through 2047 without losing tax benefits.

Working with our partners in State and local governments, earlier this year, Treasury certified 8,761 communities in all 50 states, the District of Columbia and five U.S. territories. Nearly 35 million Americans live in areas designated as Opportunity Zones. These communities present both the need for investment and significant investment opportunities.

Based on data from the 2011-2015 American Community Survey, the designated regions had an average poverty rate of over 32 percent, compared with the 17 percent national average.

Additionally, the median family income of the designated tracts were on average 37 percent below the area or state median, and had an unemployment rate of nearly 1.6 times higher than the national average.

IRS Press Release: **Treasury, IRS issue proposed regulations on new Opportunity Zone tax incentive**

IR-2018-206, October 19, 2018

WASHINGTON —The Treasury Department and the Internal Revenue Service today issued proposed regulations and other published guidance for the new Opportunity Zone tax incentive.

Opportunity Zones, created by the 2017 Tax Cuts and Jobs Act, were designed to spur investment in distressed communities throughout the country through tax benefits. Under a nomination process completed in June, 8,761 communities in all 50 states, the District of Columbia and five U.S. territories were designated as qualified Opportunity Zones. Opportunity Zones retain their designation for 10 years. Investors may defer tax on almost any capital gain up to Dec. 31, 2026 by making an appropriate investment in a zone, making an election after December 21, 2017, and meeting other requirements.

The proposed regulations clarify that almost all capital gains qualify for deferral. In the case of a capital gain experienced by a partnership, the rules allow either a partnership or its partners to elect deferral. Similar rules apply to other pass-through entities, such as S corporations and their shareholders, and estates and trusts and their beneficiaries.

Generally, to qualify for deferral, the amount of a capital gain to be deferred must be invested in a Qualified Opportunity Fund (QOF), which must be an entity treated as a partnership or corporation for Federal tax purposes and organized in any of the 50 states, D.C. or five U.S. territories for the purpose of investing in qualified opportunity zone property.

The QOF must hold at least 90 percent of its assets in qualified Opportunity Zone property (investment standard). Investors who hold their QOF investment for at least 10 years may qualify to increase their basis to the fair market value of the investment on the date it is sold.

The proposed regulations also provide that if at least 70 percent of the tangible business property owned or

AMERICAN OVERSIGHT

leased by a trade or business is qualified opportunity zone business property, the requirement that "substantially all" of such tangible business property is qualified opportunity zone business property can be satisfied if other requirements are met. If the tangible property is a building, the proposed regulations provide that "substantial improvement" is measured based only on the basis of the building (not of the underlying land).

In addition to the proposed regulations, Treasury and the IRS issued an additional piece of guidance to aid taxpayers in participating in the qualified Opportunity Zone incentive. Rev. Rul. 2018-29 provides guidance for taxpayers on the "original use" requirement for land purchased after 2017 in qualified opportunity zones. They also released Form 8996, which investment vehicles will use to self-certify as QOFs.

More information on Opportunity Zones, including answers to frequently-asked questions, is on the Tax Reform page of IRS.gov. The Tax Reform page will also feature updates on the implementation of this and other TCJA provisions.

Click here for complete list of Opportunity Zones.

Subject: RE: April 17, 2019 INVITE - An Opportunity Zone Conference with State, Local, Tribal, and Community Leaders

Good afternoon,
The White House Office of Intergovernmental Affairs in coordination with other Executive Office of the President components will be hosting **An Opportunity Zone Conference with State, Local, Tribal, and Community Leaders** on April 17, 2019 at the White House.

We extend an invitation to your association to have one representative from your team at this conference. This could be the association's policy staff member or another position that you deem appropriate for the event. Due to space limitations, we only have space for one (1) representative from the association's team.

Please communicate the one individual from your state association to Olivia Imhoff (Olivia.P.Imhoff2@who.eop.gov) no later than Friday, April 5, 2019. Include their name, email address, and phone number. The White House will then extend an official invite to that individual.

Thanks,
Olivia

THE WHITE HOUSE

The White House Office of Intergovernmental Affairs invites you to attend

An Opportunity Zone Conference with State, Local, Tribal, and Community Leaders

April 17, 2019
1:00 p.m. - 4:00 p.m.

Please communicate the **one (1) individual from your state government attending this conference to Olivia Imhoff (Olivia.P.Imhoff2@who.eop.gov) no later than Friday, April 5, 2019**. Include their name, email address, and phone number. The White House will then extend an official invite to that individual along with a registration link.

AMERICAN OVERSIGHT

A list of frequently asked questions is below. More information, including arrival instructions (i.e., address and times) and the itinerary, will be forthcoming. Pertinent event updates will be sent to the email address that you register with.

Sincerely,

White House Office of Intergovernmental Affairs

Frequently Asked Questions:

What information do I need to submit in order to attend? Clicking on the registration link provided above will outline the information you are required to submit in order to register to attend. Secret Service requires all visitors to submit this information prior to arrival. Please do not fill out this information if you cannot attend. It is essential that all information is submitted accurately. The information you submit must exactly match what is listed on your government issued photo identification that you will be required to present to Secret Service before entry onto White House grounds. The information you submit must exactly match that of your government issued identification (can be a passport, driver's license, etc.) that you will be required to present to Secret Service before entering White House grounds.

How do I know if I successfully registered? Once you click on the registration link, fill out all required information, and submit it, you will receive a confirmation message to the email address you provided. Please make sure to check your spam/junk email folder if you do not receive this confirmation.

What time should I plan to arrive? While the conference begins at 1:00 p.m., you'll want to plan on arriving by 12:30 p.m. in order to get through security. You'll be allowed to enter the White House grounds in the time window between 12:00 p.m. and 2:00 p.m.

What if the link does not work? If the registration link provided does not work or will not properly load, try using a different browser. If you are still unable to register, please contact White House Office of Intergovernmental Affairs staff or reply to this email.

Is this invitation transferable / can I bring a friend or relative? No, this invitation is non-transferable unless discussed with the White House Office of Intergovernmental Affairs. Any information submitted from an uninvited guest will not be processed.

Who is speaking and what's on the agenda? An agenda will be sent out prior to the conference; you can expect senior Administration officials to speak and participate in this conference.

Where do I go? All events will take place on the White House complex (1600 Pennsylvania Avenue, NW, Washington DC). We will provide further information ahead of the event date.

How do I get around Washington, D.C.? For travel and transportation in Washington, D.C., taxies and ride sharing services are readily available. The metro is also a convenient way to travel. The closest metro stops are Metro Center and Farragut West. More information on the metro, including travel times and maps, can be found by clicking here.

For all other questions: Please reach out to Olivia Imhoff at (202) 881-7466 or Olivia.P.Imhoff2@who.eop.gov.

The Honorable Brian Sandoval
Governor of Nevada
555 E. Washington Ave #5100
Downtown, NV 89101

Attn: Mr. Mike Willden, Chief of Staff
governor@govmail.state.nv.us

Re: Opportunity Zones Program

Dear Governor Sandoval:

As you know, the recently-passed federal tax reform legislation created the Opportunity Zones Program that allows the governor of each state to designate up to 25% of low-income census tracts in their state as Opportunity Zones.

The purpose of this letter is to request the designation of Census Tract #32003000301 as an Opportunity Zone. We own approximately 3.28 acres of property in this area. The designation of this Census Tract as an Opportunity Zone would create enormous potential for economic development in Clark County and attract much-needed investment in key local infrastructure projects to this area.

Please designate Census Tract 32003000301 as an Opportunity Zone.

Sincerely,

S.P. Capital Investors, LLC
a California limited liability company

AMERICAN OVERSIGHT

I respectfully request that you designate the following census tracts as Opportunity Zones in order to facilitate investment and development in these low-income areas:

Census Tract: 32003000700
Census Tract: 32003000401

As you know, the federal legislation referred to as the Tax Cuts and Jobs Act of 2017 created the Opportunity Zones Program that allows the governor of each state to designate a certain number of low-income and eligible contiguous census tracts as Opportunity Zones. This would allow investors in these areas to defer taxes on gains made on investments in Qualified Opportunity Funds that directly benefit these zones for many years or even permanently, depending on how long investments are held.

Please designate the qualified tracts listed above as Opportunity Zones in order to drive long-term capital to these areas.

Very truly yours, Tilman J. Fertitta
Chairman, President & CEO

Subject: RE: Economic Opportunity Zones/QUESTION??

Mr. Gemme,

Andrew is out of the office this week, so I'm going to answer your questions.

1. There is not an enrollment process. From my understanding you have to create an entity, partnership or corporation, and self-certify with the IRS. However, the IRS expects to put out that form sometime during the summer. Here is a link to the IRS's FAQs. https://www.irs.gov/newsroom/opportunity-zones-frequently-asked-questions
2. The purpose of the program is to spur new investment in low-income census tracts, so you would need the help of a CPA or Tax Attorney to figure out if there is a way to qualify your current property.
3. The benefit after ten years is any appreciation on the investment becomes tax free. So whatever you ultimately sell for minus your adjusted basis.
4. I don't think this applies.
5. 550 S. Wells, Reno, NV 89502 is not located in an Opportunity Zone

AMERICAN OVERSIGHT

6. Law may change but you're right that investments can be made until 2026, and you're right about the second piece that the appreciation benefit occurs at time of sale sometime after ten years.

Please let me know if you have any additional questions. Also, here is a link to the treasury's resource page. It may help answer questions as well. https://www.cdfifund.gov/pages/opportunity-zones.aspx

Subject: Economic Opportunity Zones/QUESTION??

Dear Andrew;

I have come buy your office and left several messages. I have spoken with quite a few people in the City, County, Economic Development Dept/NV,

Monica Cochran and Derrick Armstrong....oh yes, and your assistant Michelle. Guess all I'm trying to say is, "Your my Final Frontier".... I'm just trying

desperately to get some information on the functioning application for the program known as**: Economic Opportunity Zones.**

My questions are as follows:

1) Do you have to apply to be enrolled in the program? How , where, and when do we apply?
2) If we have owned the property for some years already, when does the 10 year clock start - when we purchased in 2013 or when we enroll in the near future?

AMERICAN OVERSIGHT

3) How is the capital gain that is tax free after 10 years calculated? - is starting value that which we purchased for at $700k in 2013 even if we have to hold for another 10 years starting upon enrollment or is starting value at some appraised amount upon enrollment?
4) If it is an appraisal situation, who would do that official appraisal?
5) Is **550 south Wells** in the zone or not, definitively answered so that we can be certain since Wells is on the border allegedly.
6) If the program ends in 2026, then I assume that one can apply up til 2026 and then the last people in the program would receive full benefits all the way out to 2036 and beyond until they sold - thus the 10 years of no cap gain benefit sticks with you until you sell, regardless of when that sale happens?

It would be so helpful to know the answers to these questions. Please get back to me... or please, have someone contact me with the answers to the above questions.

Lyft and Aptiv launch autonomous ride share in Las Vegas

This May, a global technology leader in mobility, incentivized by GOED, launched a fleet of 30 autonomous vehicles in Las Vegas on the Lyft network. Aptiv PLC operates the vehicles on its fully-integrated autonomous driving platform, which are made available to the public in partnership with Lyft. On an opt-in basis, passengers have the ability to hail self-driving vehicles equipped with Aptiv technology to and from high-demand locations.

> *"With Aptiv's autonomous driving technology deployed throughout Las Vegas and broadly accessible through the Lyft app, a wide range of consumers will be able to share the experience of autonomous vehicles in a complex urban environment," said Kevin Clark, Aptiv president and chief executive officer. "More importantly, the resulting knowledge and data will allow us to* **further refine our autonomous driving capabilities and strengthen our portfolio of industry-leading active safety solutions.**"

The combination of Aptiv's autonomous driving technology and Lyft's ride-hailing app is the expansion of a successful partnership that launched in Las Vegas during CES 2018. That initial pilot provided more than 400 self-driving rides to the public and earned an average customer rating of 4.99 out of five stars. Like the CES program, vehicles will be operated by highly-trained safety drivers.

In March, the GOED board voted to approve Aptiv's application for tax abatements and two months later the company has already surpassed its projected number of jobs created and currently lists openings in Las Vegas for IT, engineering, and office administration positions.

GOED Executive Director Paul Anderson said Aptiv is exactly the sort of operation Nevada hoped to attract when the state legislature passed and Governor Brian Sandoval signed into law some of the most forward-looking autonomous vehicle regulations in the country.

"The holy grail for economic development is research and development," said Anderson. "And because of what it does — **attract some of the smartest people in the world and bring in talent** *— it becomes a catalyst to entrepreneurial economic development."*

LifeWorks initiative aims to prepare Nevada students for in-demand jobs

Taking an innovative approach to workforce development, state agencies from across Nevada, private industries, and higher education are gathering together to strengthen career pathways for in-demand jobs in the New Nevada.

The Nevada Department of Education received the New Skills for Youth Grant funded by JP Morgan Chase in fall of 2017 and since then has aligned workforce development with economic diversification efforts, developed the public-facing brand LifeWorks, created legislative change in the state to support workforce development, and established ongoing systems for communication.

LifeWorks aims to achieve success through six key objectives:

- Employer engagement
- Quality and rigor in career pathways
- Career-focused accountability systems
- Scaled pathways that culminate in credentials of value
- Integrated funding streams/joint resource planning
- Ensuring cross-institutional alignment.

To achieve this, partners of LifeWorks, including GOED, Nevada Department of Education, the Governor's Office of Workforce Innovation (OWINN), and others will focus on expanding pathways to lucrative long-term careers for graduating high school students by empowering them with the skills, education and meaningful connections to local business necessary to thrive in Nevada's growing economy.

Specific programs include the expansion of Career & Technical Education programs, offering a new Career & College Ready Diploma, adopting the ACT National Career Readiness Certificate, expanding dual credit opportunities with institutions of higher education, strengthening and expanding apprenticeship and pre-apprenticeship programs, developing new work-based learning programs, and establishing the Learn & Earn Advanced-career Pathways (LEAP) framework.

GOED listening tour covers 1,000 miles

In April, GOED's Executive Director Paul Anderson, Director of Rural Economic and Community Development Matthew Moore, and Communications Director Brian Baluta undertook a three-day, 1,000-mile listening tour to connect with the Regional Development Authority partners and stakeholders across the vast Silver State.

All told, the trip featured stops in Pahrump, Fallon, Carson City, Eureka, Ely, Panaca and Caliente, for sessions with Nye County Regional Economic Development Authority (NCREDA), HWY 95 Rural Development Authority (HWY95), Northern Nevada Development Authority (NNDA), Northeastern Nevada Regional Development Authority (NNRDA), and Lincoln County Regional Development Authority (LCRDA).

The tour underscored:

1. **Nevada's rural communities share many assets and challenges, including issues with federal land management, affordable housing, workforce development, and infrastructure.**
2. **There are many engaged and motivated individuals on the ground working diligently to face these challenges and build on opportunities.**
3. **GOED and the rural RDAs will continue to work closely to help ensure all of Nevada shares in growth and prosperity.**

Governor Sandoval nominates 61 Opportunity Zones

In April, Governor Brian Sandoval nominated 61 opportunity zones, pursuant to the Tax Cuts and Jobs Act of 2017, which established an Opportunity Zone tax incentive, designed to encourage long-term private investment in low-income communities.

> *"During my time as Governor, we have invested significant resources in Nevada," Governor Sandoval said. "While we have seen substantial returns, there are still parts of our state that need additional assistance.* **It is my hope that by nominating these 61 low-income opportunity zones, private investors will choose to fund projects in these areas that benefit the Nevadans who need it most.** *What's more, we believe that communities surrounding the 61 opportunity zones will also benefit from investment in the zones."*

PolicyMap's Jeremy Nowak praised Nevada's approach to the nominations.

> *"The Governor's office did a great job of taking a data driven approach...***Hats off to Nevada.***"*

61 opportunity zone nominations directly impact more than **230,000** Nevadans in some of Nevada's most disadvantaged communities.

Average family income is approximately **$37,000** — just **60%** of median statewide family income of approximately **$62,500**.

Average unemployment rate from **2011-2015** was **16%** — nearly **2x** greater than the national unemployment rate.

Nevada is number one again!

For the first quarter of 2018, State Policy Reports' Index of State Economic Momentum – which ranks states based on personal income growth, employment growth, and population growth – **ranked Nevada No. 1** .

Between the fourth quarter of 2016 and the same period in 2017, Nevada had the **strongest year-over-year growth in personal income**, and held the distinction of being the only state to record growth greater than 6%.

Federal data released in May showed Nevada's **gross domestic product (GDP) grew 3.5% in 2017** after increasing 2.1% in 2016, **good for No. 3 in the nation.**

The Bureau of Economic Analysis data depict expansion across the state's economy, with real GDP increasing for nearly every major industry. Real estate served as the largest contributor to overall GDP, followed by durable goods manufacturing.

Nevada's GDP numbers also reflect steady in-migration to the state. According to Census estimates, its **population climbed 2 percent last year**, the largest national increase behind only Idaho.

According to the Nevada Department of Employment, Training & Rehabilitation (DETR) March 2018 economic report, Nevada added 3,500 jobs bringing employment in the state of Nevada to a **record high of 1,373,700 jobs**. Unemployment in March remained constant at 4.9%.

DETR's report also notes that in the fourth quarter of 2017, **personal income in Nevada reached $136 billion**, up 6.4% from a year ago. This increase has been ongoing in 30 of the past 31 quarters.

Additionally, Nevada's average personal income growth has exceeded that of the U.S. 14 of the past 16 quarters, with income gains in the state averaging 5.1%, compared to 3.5% in the U.S.

NV-DA-20-0615-A-004987

"Although we are seeing some slight changes in employment and unemployment measures in March, state employment remains strong," said David Schmidt, Chief Economist for DETR. "Estimates show Nevada's labor force has averaged 1.49 million in the first quarter of 2018, up from 1.45 million during the same period in 2017. **This translates into an increase of 40,160 more Nevadans in the labor force, either working or actively seeking employment."**

No. 1	**in economic momentum, Q1 2018.**
No. 1	**in personal income growth, 2017.**
No. 3	**in GDP growth, 2017.**
No. 2	**in population growth, 2017.**

Record high 1,373,700 Nevadans employed, March 2018.

[Title]
[State CEO]
[Address]

The Honorable Steven T. Mnuchin
Secretary
U.S. Department of the Treasury
1500 Pennsylvania Avenue, NW
Washington, DC 20220

Dear Mr. Secretary:

This letter serves as a notification that the [State/Commonwealth/District/Territory] of [Name of State/Commonwealth/District/Territory] intends to modify the nomination of census tracts for designation as Qualified Opportunity Zones under section 1400Z-1(b)(1) of the Internal Revenue Code, which was submitted on [date original nomination submitted]. The [State/Commonwealth/District/Territory] of [Name of State/Commonwealth/District/Territory] formally nominates the tracts identified in the accompanying revised Opportunity Zone Nomination Tool for designation as Qualified Opportunity Zones under section 1400Z-1(b)(1) of the Internal Revenue Code.

In addition, the [State/Commonwealth/District/Territory] of [Name of State/Commonwealth/District/Territory] formally requests under section 1400Z-1(b)(2) of the Internal Revenue Code that the Secretary extend the consideration period for the Secretary to certify the nomination and designate the nominated census tract as Qualified Opportunity Zones by up to 30 days as needed to facilitate the [State/Commonwealth/District/Territory]â€™s request to modify its original nomination.

GOVERNOR SANDOVAL NOMINATES 61 OPPORTUNITY ZONES

CARSON CITY, NV – Governor Brian Sandoval today nominated 61 opportunity zones, pursuant to the Tax Cuts and Jobs Act of 2017, which established an Opportunity Zone tax incentive, designed to encourage long-term private investment in low-income communities.

"During my time as Governor, we have invested significant resources in Nevada," Governor Brian Sandoval said. "While we have seen substantial returns, there are still parts of our state that need additional assistance. It is my hope that by nominating these 61 low-income opportunity zones, private investors will choose to fund projects in these areas that benefit the Nevadans who need it most. What's more, we believe that communities surrounding the 61 opportunity zones will also benefit from investment in the zones."

The 61 opportunity zone nominations directly impact more than 230,000 Nevadans in some of Nevada's most disadvantaged communities.

In the 61 tracts:
- Average family income is approximately $37,000
  - (Just 60% of median statewide family income of approximately $62,500)
- Average unemployment rate from 2011-2015 is16%
  - Nearly 2x greater than the national unemployment rate

The Opportunity Zone program runs on essentially two tracks – first, Governors in each state nominate opportunity zones, which are low-income community census tracts that could benefit from significant private investment. Second, once the zones are certified by the U.S. Treasury Department, interested private investors must invest in opportunity funds, specialized vehicles that can then be utilized to invest in the certified opportunity zones.

Hi, Andrew – as you are probably aware (or may have guessed), the State's nomination of the non-LIC contiguous tract based on 2012-2016 ACS data has created some challenges on this end. With the extension of the consideration period, we have until June 18 to act. I will give you a heads up before any action. Hope this helps.

Hi, Andrew – we did receive the modified nomination. As you know, the newly nominated tract is not one that meets the criteria laid out in our Nomination Instructions, but we are reviewing it and discussing with IRS Counsel on how they want us to proceed.

In the meantime, I note that the governor's letter did not include the required request for an extension of the consideration period. Please add to the new service request such a letter, on official letterhead and signed by the governor, using the template language provided below:

The Honorable Steven T. Mnuchin
Secretary
U.S. Department of the Treasury
1500 Pennsylvania Avenue, NW
Washington, DC 20220

Dear Mr. Secretary:

AMERICAN OVERSIGHT

The [State/Commonwealth/District/Territory] of [State] formally requests under section 1400Z-1(b)(2) of the Internal Revenue Code that the Secretary extend for an additional 30 days the consideration period to nominate a population census tract for designation as a qualified opportunity zone.

Thanks.

State Leaders and Staff,

Several people have asked about the draft IRS tax form referenced on Friday's call. The draft form is now posted at the link below.

Instructions for Form 8996, Qualified Opportunity Fund: https://www.irs.gov/pub/irs-dft/i8996--dft.pdf.

Thanks,
Nic

From: Pottebaum, Nic D. EOP/WHO
Subject: Follow-Up - Proposed Regulations on Opportunity Zones Designed to Incentivize Investment in American Communities

State Leaders and Staff,

Thank you for joining today's briefing call with state and local leaders on Opportunity Zone regulations. Today, Treasury and IRS released proposed regulations on Opportunity Zones designed to incentivize investment in American communities. Below you will find additional information.

Treasury Press Release: Treasury Releases Proposed Regulations on Opportunity Zones Designed to Incentivize Investment in American Communities

Washington – The Treasury Department today issued proposed guidance related to the new Opportunity Zone tax incentive. The tax benefit, created by the 2017 Tax Cuts and Jobs Act, is designed to spur economic development and job creation by encouraging long-term investments in economically distressed communities nationwide.

"We want all Americans to experience the dynamic opportunities being generated by President Trump's economic policies. We anticipate that $100 billion in private capital will be dedicated towards creating jobs and economic development in Opportunity Zones," said Secretary Steven T. Mnuchin. "This incentive will foster economic revitalization and promote sustainable economic growth, which was a major goal of the Tax Cuts and Jobs Act."

The proposed regulations released today clarify what gains qualify for deferral, which taxpayers and investments are eligible, the parameters for Opportunity Funds, and other guidance. The proposed regulations should provide investors and fund sponsors the information they need to confidently enter into new business arrangements in designated Opportunity Zones. The Treasury Department plans on issuing additional guidance before the end of the year.

The Opportunity Zone incentive offers capital gains tax relief to investors for new investment in designated areas. Investment benefits include deferral of tax on prior gains as late as 2026 if the amount of the gain is invested in an Opportunity Fund. The benefits also include tax forgiveness on gains on that investment if the investor holds the

AMERICAN OVERSIGHT

investment for at least 10 years. Opportunity Zones retain their designation for 10 years, but under the proposed regulations, investors can hold onto their investments in Qualified Opportunity Funds through 2047 without losing tax benefits.

Working with our partners in State and local governments, earlier this year, Treasury certified 8,761 communities in all 50 states, the District of Columbia and five U.S. territories. Nearly 35 million Americans live in areas designated as Opportunity Zones. These communities present both the need for investment and significant investment opportunities.

Based on data from the 2011-2015 American Community Survey, the designated regions had an average poverty rate of over 32 percent, compared with the 17 percent national average.

Additionally, the median family income of the designated tracts were on average 37 percent below the area or state median, and had an unemployment rate of nearly 1.6 times higher than the national average.

View the guidance.

IRS Press Release: Treasury, IRS issue proposed regulations on new Opportunity Zone tax incentive

IR-2018-206, October 19, 2018

WASHINGTON —The Treasury Department and the Internal Revenue Service today issued proposed regulations and other published guidance for the new Opportunity Zone tax incentive.

Opportunity Zones, created by the 2017 Tax Cuts and Jobs Act, were designed to spur investment in distressed communities throughout the country through tax benefits. Under a nomination process completed in June, 8,761 communities in all 50 states, the District of Columbia and five U.S. territories were designated as qualified Opportunity Zones. Opportunity Zones retain their designation for 10 years. Investors may defer tax on almost any capital gain up to Dec. 31, 2026 by making an appropriate investment in a zone, making an election after December 21, 2017, and meeting other requirements.

The proposed regulations clarify that almost all capital gains qualify for deferral. In the case of a capital gain experienced by a partnership, the rules allow either a partnership or its partners to elect deferral. Similar rules apply to other pass-through entities, such as S corporations and their shareholders, and estates and trusts and their beneficiaries.

Generally, to qualify for deferral, the amount of a capital gain to be deferred must be invested in a Qualified Opportunity Fund (QOF), which must be an entity treated as a partnership or corporation for Federal tax purposes and organized in any of the 50 states, D.C. or five U.S. territories for the purpose of investing in qualified opportunity zone property.

The QOF must hold at least 90 percent of its assets in qualified Opportunity Zone property (investment standard). Investors who hold their QOF investment for at least 10 years may qualify to increase their basis to the fair market value of the investment on the date it is sold.

The proposed regulations also provide that if at least 70 percent of the tangible business property owned or leased by a trade or business is qualified opportunity zone business property, the requirement that “substantially all” of such tangible business property is qualified opportunity zone business property can be satisfied if other requirements are met. If the tangible property is a building, the proposed regulations provide that “substantial improvement” is measured based only on the basis of the building (not of the underlying land).

In addition to the proposed regulations, Treasury and the IRS issued an additional piece of guidance to aid taxpayers in participating in the qualified Opportunity Zone incentive. Rev. Rul. 2018-29 provides guidance for taxpayers on the

AMERICAN OVERSIGHT

“original use” requirement for land purchased after 2017 in qualified opportunity zones. They also released Form 8996, which investment vehicles will use to self-certify as QOFs.

More information on Opportunity Zones, including answers to frequently-asked questions, is on the Tax Reform page of IRS.gov. The Tax Reform page will also feature updates on the implementation of this and other TCJA provisions.

Click here for complete list of Opportunity Zones.

Please let us know if you have any questions.

Thanks,
Nic

Hi Michelle,

AMERICAN OVERSIGHT

Thanks for your email. First, I'm looping in Doug Little with the U.S. Department of Energy team into this email. My understanding is that nobody from your team asked for a meeting with Secretary Perry this weekend and a request on the Saturday morning of the trip will likely be hard to meet. Nonetheless, Doug L. can work with you to figure out appropriate next steps.

I understand from my team that many of our communications to your team have gone unanswered over the last few months – for example, my team asked for a quick introductory call with you and me that we never got a response on. Hopefully we can work together to improve communications. Per our standing policy, can you please send me a separate email documenting that you have contracted with an outside lobbyist (Tyler Klimas) to serve as your Washington DC director? That will then allow us to communicate with him on matters important to you since he is not a state employee.

It is unfortunate that the Governor will once again miss opportunities to discuss infrastructure, workforce development, reducing drug pricing, prison reform, opportunity zones, combatting opioids, etc. this weekend. I used to work for Governor Branstad of Iowa who always utilized the NGA weekend to seek bipartisan opportunities to advance shared priorities and we found ways to work together with the Obama Administration on some things, but I recognize some governors take a more partisan approach. I also know that former Governor Sandoval found ways to work in a bipartisan way with the Obama Administration – I'm sure the people of Nevada expected and appreciated that.

Sincerely,
Doug

Subject: Following Up: NV Gov Steve Sisolak

Good morning,

Yesterday, we saw that the White House Dep. Press Secretary responded to Governor Sisolak's statement that he wouldn't be attending the NGA events at the White House this weekend due to his disappointment over the shipment of weapons-grade plutonium waste to the state of Nevada.

After not receiving a response to the letter sent on February 6th to the DOE, the Governor is hopeful that last night's statement means that the Trump Administration is open to meeting one-on-one to discuss this critical issue. He is open and available to meet one-on-one anytime this weekend while he is in Washington D.C., or will make himself himself available anytime in the near future at a later agreed-upon date.

My number is 702-701-6554 if you'd like to reach out and schedule. Thank you.

AMERICAN OVERSIGHT

Taking an innovative approach to workforce development, state agencies from across Nevada, private industries, and higher education are gathering together to strengthen career pathways for in-demand jobs in the New Nevada.

The Nevada Department of Education received the New Skills for Youth Grant funded by JP Morgan Chase in fall of 2017 and since then has aligned workforce development with economic diversification efforts, developed the public-facing brand: LifeWorks, created legislative change in the state to support workforce development, and established ongoing systems for communication.

LifeWorks aims to achieve success through six key objectives; employer engagement, quality and rigor in career pathways, career-focused accountability systems, scaled pathways that culminate in credentials of value, integrated funding streams/joint resource planning, and ensuring cross-institutional alignment.

To achieve this, partners of LifeWorks, including GOED, Nevada Department of Education, the Governor's Office of Workforce Innovation (OWINN), and others will focus on expanding pathways to lucrative long-term careers for graduating high school students by empowering them with the skills, education and meaningful connections to local business necessary to thrive in Nevada's growing economy.

Specific programs include the expansion of Career & Technical Education programs, offering a new Career & College Ready Diploma, adopting the ACT National Career Readiness Certificate, expanding dual credit opportunities with institutions of higher education, strengthening and expanding apprenticeship and pre-apprenticeship programs, developing new work-based learning programs, establishing the Learn & Earn Advanced-career Pathways (LEAP) framework, among other measures.

Driverless ride share launches in Las Vegas

This May, a global technology leader in mobility, incentivized by GOED, launched a fleet of 30 autonomous vehicles in Las Vegas on the Lyft network. Aptiv PLC operates the vehicles on its fully-integrated autonomous driving platform, which are made available to the public in partnership with Lyft. On an opt-in basis, passengers have the ability to hail self-driving vehicles equipped with Aptiv technology to and from high-demand locations.

> *"With Aptiv's autonomous driving technology deployed throughout Las Vegas and broadly accessible through the Lyft app, a wide range of consumers will be able to share the experience of autonomous vehicles in a complex urban environment," said Kevin Clark, Aptiv president and chief executive officer. "More importantly, the resulting knowledge and data will allow us to* **further refine our autonomous driving capabilities and strengthen our portfolio of industry-leading active safety solutions.**"

Story continued on next page »

AMERICAN OVERSIGHT

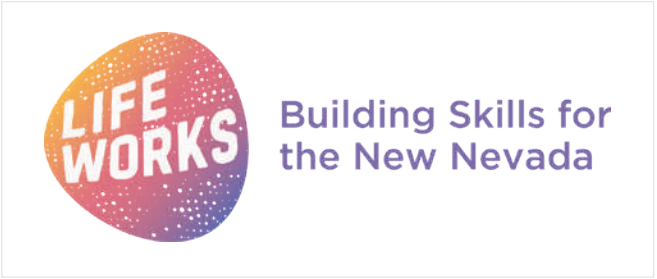
The combination of Aptiv's autonomous driving technology and Lyft's ride-hailing app is the expansion of a successful partnership that launched in Las Vegas during CES 2018. That initial pilot provided more than 400 self-driving rides to the public and earned an average customer rating of 4.99 out of five stars. Like the CES program, vehicles will be operated by highly-trained safety drivers.

In March, the GOED board voted to approve Aptiv's application for tax abatements and two months later the company has already surpassed its projected number of jobs created and currently lists openings in Las Vegas for IT, engineering, and office administration positions.

GOED Executive Director Paul Anderson said Aptiv is exactly the sort of operation Nevada hoped to attract when the state legislature passed and Governor Brian Sandoval signed into law some of the most forward-looking autonomous vehicle regulations in the country.

"The holy grail for economic development is research and development," said Anderson. "And because of what it does — **attract some of the smartest people in the world and bring in talent** *— it becomes an entrepreneurial model to economic development."*



LifeWorks initiative aims to prepare Nevada students for in-demand jobs

Taking an innovative approach to workforce development, state agencies from across Nevada, private industries, and higher education are gathering together to strengthen career pathways for in-demand jobs in the New Nevada.

The Nevada Department of Education received the New Skills for Youth Grant funded by JP Morgan Chase in fall of 2017 and since then has aligned workforce development with economic diversification efforts, developed the public-facing brand LifeWorks, created legislative change in the state to support workforce development, and established ongoing systems for communication.

LifeWorks aims to achieve success through six key objectives: employer engagement, quality and rigor in career pathways, career-focused accountability systems, scaled pathways that culminate in credentials of value, integrated funding streams/ joint resource planning, and ensuring cross-institutional alignment.

To achieve this, partners of LifeWorks, including GOED, Nevada Department of Education, the Governor's Office of Workforce Innovation (OWINN), and others will focus on expanding pathways to lucrative long-term careers for graduating high school students by empowering them with the skills, education and meaningful connections to local business necessary to thrive in Nevada's growing economy.

Specific programs include the expansion of Career & Technical Education programs, offering a new Career & College Ready Diploma, adopting the ACT National Career Readiness Certificate, expanding dual credit opportunities with institutions of higher education, strengthening and expanding apprenticeship and pre-apprenticeship programs, developing new work-based learning programs, and establishing the Learn & Earn Advanced-career Pathways (LEAP) framework.

GOED listening tour covers 1,000 miles

In April, GOED's Executive Director Paul Anderson, Director of Rural Economic and Community Development Matthew Moore, and Communications Director Brian Baluta undertook a three-day, 1,000-mile listening tour to connect with the Regional Development Authority partners and stakeholders across the vast Silver State.

All told, the trip featured stops in Pahrump, Fallon, Carson City, Eureka, Ely, Panaca and Caliente, for sessions with Nye County Regional Economic Development Authority (NCREDA), HWY 95 Rural Development Authority (HWY95), Northern Nevada Development Authority (NNDA), Northeastern Nevada Regional Development Authority (NNRDA), and Lincoln County Regional Development Authority (LCRDA).

The tour underscored:

1. **Nevada's rural communities share many assets and challenges, including issues with federal land management, affordable housing, workforce development, and infrastructure.**
2. **There are many engaged and motivated individuals on the ground working diligently to face these challenges and build on opportunities.**
3. **GOED and the rural RDAs will continue to work closely to help ensure all of Nevada shares in growth and prosperity.**

Governor Sandoval nominates 61 Opportunity Zones

In April, Governor Brian Sandoval nominated 61 opportunity zones, pursuant to the Tax Cuts and Jobs Act of 2017, which established an Opportunity Zone tax incentive, designed to encourage long-term private investment in low-income communities.

> *"During my time as Governor, we have invested significant resources in Nevada," Governor Sandoval said. "While we have seen substantial returns, there are still parts of our state that need additional assistance.* **It is my hope that by nominating these 61 low-income opportunity zones, private investors will choose to fund projects in these areas that benefit the Nevadans who need it most.** *What's more, we believe that communities surrounding the 61 opportunity zones will also benefit from investment in the zones."*

61 opportunity zone nominations directly impact more than **230,000** Nevadans in some of Nevada's most disadvantaged communities.

Average family income is approximately **$37,000** — just **60%** of median statewide family income of approximately **$62,500**.

Average unemployment rate from **2011-2015** was **16%** — nearly **2x** greater than the national unemployment rate.

PolicyMap's Jeremy Nowak praised Nevada's approach to the nominations.

> *"The Governor's office did a great job of taking a data driven approach...***Hats off to Nevada.***"*

Good Nevada news, by the numbers

For the first quarter of 2018, State Policy Reports' Index of State Economic Momentum – which ranks states based on personal income growth, employment growth, and population growth – **ranked Nevada No. 1** .

Between the fourth quarter of 2016 and the same period in 2017, Nevada had the **strongest year-over-year growth in personal income**, and held the distinction of being the only state to record growth greater than 6%.

Federal data released in May showed Nevada's **gross domestic product (GDP) grew 3.5% in 2017** after increasing 2.1% in 2016, **good for No. 3 in the nation.**

The Bureau of Economic Analysis data depict expansion across the state's economy, with real GDP increasing for nearly every major industry. Real estate served as the largest contributor to overall GDP, followed by durable goods manufacturing.

Nevada's GDP numbers also reflect steady in-migration to the state. According to Census estimates, its **population climbed 2 percent last year**, the largest national increase behind only Idaho.

According to the Nevada Department of Employment, Training & Rehabilitation (DETR) March 2018 economic report, Nevada added 3,500 jobs bringing employment in the state of Nevada to a **record high of 1,373,700 jobs**. Unemployment in March remained constant at 4.9%.

DETR's report also notes that in the fourth quarter of 2017, **personal income in Nevada reached $136 billion**, up 6.4% from a year ago. This increase has been ongoing in 30 of the past 31 quarters.

Additionally, Nevada's average personal income growth has exceeded that of the U.S. 14 of the past 16 quarters, with income gains in the state averaging 5.1%, compared to 3.5% in the U.S.

NV-DA-20-0615-A-005030

"Although we are seeing some slight changes in employment and unemployment measures in March, state employment remains strong," said David Schmidt, Chief Economist for DETR. "Estimates show Nevada's labor force has averaged 1.49 million in the first quarter of 2018, up from 1.45 million during the same period in 2017. **This translates into an increase of 40,160 more Nevadans in the labor force, either working or actively seeking employment."**

No. 1	**in economic momentum, Q1 2018.**
No. 1	**in personal income growth, 2017.**
No. 3	**in GDP growth, 2017.**
No. 2	**in population growth, 2017.**

Record high 1,373,700 Nevadans employed, March 2018.

STATE OF NEVADA

GOVERNERS OFFICE OF ECONOMIC DEVELOPMENT

BOARD MEETING

Wednesday, July 11, 2018

SANDOVAL: All right, good afternoon, ladies and gentlemen. I will call the Governor's Office of Economic Development Board Meeting to order. I believe we have a quorum present. I understand that Mr. Klaich is participating telephonically. Mr. Klaich, can you hear us loud and clear?

KLAICH: I can hear you, Governor.

SANDOVAL: All right, is there anyone else who's participating telephonically?

BENNETT: Governor, this is Dana Bennett, and I'm on the phone until I arrive in Carson City.

SANDOVAL: Love technology. All right. Okay. Thank you, Dr. Bennett. We'll move to Agenda Item No. 2, Public Comment. Is there any member of the public present in Carson City that would like to provide public comment to the Board? I hear and see no one. Is there anyone present in Las Vegas that would like to provide public comment to the Board?

SPEAKER: Good morning -- or good afternoon, Governor. There is nobody that's come forward, but we do have a full room.

AMERICAN OVERSIGHT

SANDOVAL: Yes, I like seeing that. All right, we'll move to Agenda Item No. 3, which are my comments, and I'll be very brief. I'm very excited about the Agenda today. We have some great diversity, and I'm particularly excited about -- you know, I guess we'll wait to hear from the presentations, but I think it's another sample of things that are going on in this state unlike anything else that's going on in the country also, and perhaps the Director was going to talk a little bit about this, but we just completed a trade mission to the Basque Country in Spain. It was incredibly productive. There were a lot of highlights, one of which for me was to visit the actual company that is manufacturing the pumps for the third straw for the Southern Nevada Water Authority, and they were biblical, I mean, to think about what has to happen with those. We also visited another company that manufactures door locks that are controlled by your cell phone, and other issues that we're dealing with, I've appointed a School Safety Committee, and I saw direct application with regard to school safety and the ability for staff and teachers, in the event of a -- you know, some type of an emergency, to really have a different way to, hopefully, control the situation in a safe way. But we also had some great educational visits where we're going to have some opportunities for exchanges between some of the universities there. We also signed some memorandums of understandings, which are going to

AMERICAN OVERSIGHT

create some opportunities for both Nevada companies as well as Basque companies.

We had a forum where we had 30 to 40 Basque companies that attended. We have -- and perhaps the Director will talk a little bit about this in his report, but the new global program, Nevada Global program, which I just visited -- boy, how this week flies by. I believe it was yesterday, Monday, with the marshal from Lubelskie in Poland, and he had brought an inbound trade mission here with several companies that are going to be landing in northern -- Polish companies that are going to be landing in northern and southern Nevada as well. So, there are a lot of exciting things that are happening, I guess the point being that now that we have this template with Poland, this Basque Country is going to follow close behind, and I was incredibly pleased to see how many opportunities there were for both the Nevada companies as well as the Basque companies. So, that's all I have for comments. We'll move on to Agenda Item No. 4, which is the Approval of the May 17, 2018 Board Meeting Minutes. Have the Members had an opportunity to review the minutes, and are there any changes? If there are none, the Chair will accept a motion for approval.

CEGAVSKE: Move for approval.

SANDOVAL: Secretary has moved for approval. Is there a second?

SPEAKER: Second.

AMERICAN OVERSIGHT

SPEAKER: Second.

SANDOVAL: Dr. Havins, was that you?

HAVINS: I think it was Mr. Barrett.

SANDOVAL: Oh, Mr. Barrett, okay. Excuse me.

BARRETT: I'll use my microphone next time.

SANDOVAL: Now I recognize your voice. Mr. Barrett has the second. Any questions on the motion? Hearing none, all those in favor please say aye [ayes around]. Any opposed? That motion passes unanimously. Let's move on to the main event, which are the abatement applications for Board approval. The first item is 5A, Bently Heritage, LLC, and good afternoon, gentlemen.

HASKIN: Good afternoon, Governor Sandoval, and Board Members. For the record, I'm Andrew Haskin, Director of Business Development for Northern Nevada Development Authority. I'm here today to present Bently Heritage for the purpose of seeking state expansion incentives. The company is applying for the sales and use tax abatement, the personal property tax abatement, and the modified business tax abatement. Bently Heritage will produce high-quality distilled spirits from locally sourced grains and other raw materials. The distillery will operate in several historic buildings in the heart of downtown Minden. A significant part of the development budget has been allocated towards restoring and repurposing buildings that have been vacant for many years. The recent public interest and craft

AMERICAN OVERSIGHT

distilling and historical tourism is anticipated to create a hub of activity in downtown Minden. This hub is expected to draw visitors from the Tahoe Basin and beyond, which will bring additional revenues to local retailers, lodging, and dining establishments. Bently Heritage will hire an additional six employees at an average wage of $21.95 per hour with benefits. The company also plans to invest an additional $4.2 million in new equipment. NNDA fully supports Bently Heritage's incentive application and respectfully requests approval of this application. I'm joined today by Carlo Luri and Brian Davis with Bently Heritage.

SANDOVAL: Good afternoon, gentlemen. Did you have a presentation you'd like to make?

LURI: Good afternoon. I'll just make some brief comments. My name is Carlo Luri. I'm the Director of Government Affairs, and thank you, Governor Sandoval and Board, for the privilege of appearing before you today. I think some of you probably recognize the Bently name. The Bently family has been in Nevada for over 50 years and has started several successful companies. Today, we're focused on two things, the Bently Ranch with their grass-fed Nevada-grown beef program, and Bently Heritage Estate Distillery. When we started the project in 2014, I don't think any of us realized the scope and size and magnitude of the project. It was the idea of our owner, Chris Bently, to repurpose two beautiful historic buildings in downtown Minden

AMERICAN OVERSIGHT

that are the legacy of the Danberg family in the Carson Valley, the Bently -- sorry, the Minden Mill, the flour milling company, and the Minden Butter Company. Those are two historic buildings that were owned by the Bently family, and as Andrew said, had been left vacant for many years, and Chris Bently had the idea of turning those into the focus of downtown Minden, which would be our new estate distillery. So, using grains grown right in the Carson Valley, we can take those agricultural products and turn them into high value distilled spirits, which we hope to sell not just in Nevada, but outside of the state and all over the world eventually.

So, we're very excited about the project. We'll be -- we're actually going to be in production later this summer and hoping for a public opening in the fall. With the craft distilling law on the books in the state, we can now invite people to our tasting room and have some limited retail sales on-site, so we're excited about that, too. We're actually here for an expansion application. The first time we were here two years ago, we brought forth an ambitious program, and we've completed that program and are looking forward -- of course you always realize that you're missing things in the beginning, and we realize that we're going to be putting in two new buildings called rickhouses where the whiskey is stored, and the whiskey needs to age for several years before we can put that on the market. And we're also putting in a bottling line and hiring

AMERICAN OVERSIGHT

several people in sales and marketing to staff the tasting room and the facility once it opens. So, we have some additional hires and some additional capital investment, and so we're here, again, to ask for an expansion and additional credit on the taxes. So, thank you.

SANDOVAL: Thank you, Mr. Luri, and exciting project, and for somebody who's been driving by that building since he was a little boy, it's exciting to see it be developed and turned into really a showcase project. And I know that there's been a substantial amount of investment that has gone into that, and if you would remind me, being someone who loves Nevada history, when those buildings were first constructed. Do you recall?

LURI: I believe the flour mill was built in 1906, and the butter companies in the -- a little bit later, yeah, a few years later.

SANDOVAL: And then you mentioned that you're going to be in production this summer. So, we're in July now. Does that mean within the next few weeks?

LURI: Essentially, the interior construction is finished. All of the process equipment has been installed, and we're waiting on a few permits to actually flip the switch and start fermenting and distilling product.

SANDOVAL: And, you know, this isn't my expertise, but how long will it take to go from -- you know, from scratch to your first product that you'll be able to sell?

AMERICAN OVERSIGHT

LURI: Yeah, the whole process, I don't think, takes more than a few days for fermenting and distilling, and of course, we'll start with unaged spirits, things like gin. We have some exciting Nevada gin products made with some local botanicals, probably one of the first products we offer, and maybe Brian can add some --

DAVIS: The vodka is about eight days from beginning of harvest to getting in the malting facility and getting that grain over that's on the ranch and then having that delivered over and then between the fermenting and then finally getting into the bottle. And then we'll have a sherry resid which will actually sit in some sherry barrels that we're receiving from Spain. Those will come over, and those will rest in those barrels for about eight days before we turn those into -- moving those into the bottles. The gins will be about seven to eight days as well.

SANDOVAL: I learned something today. I didn't know it was that fast, and then what's particularly great about this is you're sourcing all of your materials locally. So, is that exclusively from the Carson Valley or do you have to get some of those from outside, but within Nevada?

DAVIS: I believe it's really just some of the botanicals for the gins are going to be the ones that we bring in, but we are currently under construction of building some greenhouses on the ranch property so we can start growing some of

AMERICAN OVERSIGHT

those ourselves. So, that takes a little bit of extra time to make sure they are the right botanicals that we want and that they work in the product themselves to still produce the spirit that we're looking for. So, it will be a little bit of trial and error from the beginning, but we will start growing the botanicals that we can on the ranch.

SANDOVAL: And then you said some type of a ribbon cutting this fall? Is that -- what are you looking at? Selfishly, I've only got five-and-a-half months here.

DAVIS: Ironic you bring that up, because I was in touch yesterday checking on your schedule.

SANDOVAL: Okay.

DAVIS: So, we're looking at about the second week of November, trying to coordinate a couple things with Christopher as well with his travel schedule. So, with a -- crossing our fingers for a soft opening of the tasting room and the facility in October and then with a formalized grand opening about the second week of November.

SANDOVAL: Great, thank you. And I just remembered that Mr. Klaich has limited time. Mr. Klaich, did you have any questions you'd like to ask?

KLAICH: Sorry, Governor, I was on mute. I do not. You have asked all the questions that I had in my mind, very exciting, and very exciting for downtown Minden.

AMERICAN OVERSIGHT

SANDOVAL: All right. Thank you, Mr. Klaich. Dr. Bennett, do you have any questions?

BENNETT: Thank you, Governor. It is an exciting project, and I agree with Mr. Klaich. I think you've covered everything, and I'm looking forward to see it come to fruition. Thank you.

SANDOVAL: All right. Questions from Northern Nevada. Questions from Southern Nevada.

CEGAVSKE: Governor, if I could just make a statement. There isn't anybody else that wanted to say anything, but I wanted to thank you for your questions, but I had the pleasure of going to the Bently Bank in downtown Minden that you redid, and it was beautiful. It was a great, very exciting time for Minden. You did a beautiful job, and when I heard you were going to do the flour mill and the butter mill, I was really excited, and I had been watching as everything has been developing. So, I can't wait for this tour and for the open house to see everything. I'm really excited with everything that you've done. I am absolutely going to support this. I was thrilled to see that you are paying 96% of the health insurance coverage. Everything that I looked at on here, you're just a stellar group, and I want to thank you for not only what you do for the employees in Nevada, but the fact that you're using your farm and the farmland to use the ingredients for what you're making, so rock on. I did not know, and I learned as the Governor did, vodka in eight days. That's

AMERICAN OVERSIGHT

pretty amazing. Is that how they did it in the days in the backwoods, that it didn't take very long? I thought theirs was just a day. So, I'm just asking, but anyway, thank you so much for everything that you're doing. Andrew, thank you for bringing this forward to us, and I am just really excited of what you're doing for Minden, Nevada. And if people haven't been up there and you haven't seen it, you've got to go. It's an amazing little town in itself, but what the Bentlys have done and are doing, thank you very much.

SANDOVAL: Thank you, Madam Secretary. Mr. Luri, any concluding remarks you'd like to make?

LURI: No, just thank you all again for the opportunity to come in front of you today.

SANDOVAL: And just as another side, it's an exciting day for the state. This morning, I had the privilege of being a part of a blessing ceremony at the Stewart Indian School, which was constructed in 1890 and was closed in 1980, and the state, and with the support of the legislature, has committed several million dollars to restart the restoration and complete the restoration of a cultural center and museum. And so it's really important that we -- the point being that that's happening there. Your project is happening in Minden, and it just assures that the generations to come are going to be able to see, appreciate, and enjoy these historical buildings. So, thank you for your commitment to history.

AMERICAN OVERSIGHT

LURI: Thank you.

SANDOVAL: All right, Board Members, if there are no further questions or comments, the Chair will accept a motion to approve the abatement application of Bently Heritage, LLC for a sales tax abatement, modified tax abatement, and personal property tax abatement as presented in Agenda Item 5A.

CEGAVSKE: I would be very happy to make the motion, Governor, for 5A to be approved.

KLAICH: I'll second.

SANDOVAL: Okay. I'll give that --

SPEAKER: We're all excited about the distillery.

SANDOVAL: Yes, it's a race for the motion or to get to the distillery. I don't know which, but the Secretary of State has moved for approval. Mr. Klaich has seconded the motion. Any questions or discussion on the motion? I hear none. All those in favor say aye [ayes around]. Those opposed say no. Okay, that motion passes unanimously. Congratulations, good luck. We look forward to seeing you in a few months. Thank you. Next Agenda item is 5B, Bigelow Aerospace.

ROWE: Good afternoon, Governor Sandoval, Secretary of State Cegavske, Director Anderson, and Members of the Board. Hi, I'm Kylie Rowe [phonetic] for the record, Vice President of Economic Development at the Las Vegas Global Economic Alliance here today in support for the application submitted by Bigelow Aerospace. Bigelow Aerospace was founded in

AMERICAN OVERSIGHT

1999, and their global headquarters is in North Las Vegas. They're a space technology company that manufactures and develops expandable space station modules. The approval of this application helps our state efforts to attract other like-minded aerospace companies, including supply chain companies that would support our growing aerospace industry. Bigelow Aerospace plans to develop the only autonomous spacecraft of its kind in the world.

In this first year, the expansion will create five new jobs and at least one hundred jobs in the next ten years. These new positions start at an average hourly wage of $25, and the capital investment will be approximately $51 million over the next 20 years. Based on the job creation and capital investments, Bigelow Aerospace qualifies to pursue the aviation tax abatement. As this application meets requirements set forth by the Governor's Office of Economic Development, it has the full support of the Las Vegas Global Economic Alliance. With me today from Bigelow Aerospace is Ms. Blair Bigelow, Vice President of Cooperate Strategy, who will provide further insight to the Bigelow Aerospace planned expansion efforts. Ms. Bigelow.

BIGELOW: Thank you, and good afternoon, Governor Sandoval and Board Members. I'm going to keep this very short. Bigelow Aerospace has been headquartered in north Las Vegas, Nevada, for just over 18 years. We have been entirely privately funded by Robert Bigelow, who has invested hundreds of millions

AMERICAN OVERSIGHT

of dollars in developing expandable habitat technology and expandable space stations, and we have a lot of interesting things in the pipeline right now, so we are anticipating growth over the next few years to say the least. And if we are successful in the incredible endeavors that we are trying to take on, we hope that we can be a symbol to Nevada for entrepreneurship, innovation, and technology advancement, and I have to say that we are an incredibly small outfit that is trying to accomplish pretty extraordinary things. So, we hope we have your support today. Thank you.

SANDOVAL: Thank you, Ms. Bigelow, and I had the privilege to tour the Bigelow Aerospace facility not long ago, and for anyone who hasn't been there, you should go. I mean, it really is something that -- you know, I have profound respect for Mr. Bigelow and what he has done and the amount of investment that he has made to make a dream a reality and to really take not only the state, but the country and the world to this next frontier, and he's really going to be playing an important role in just some really big things that could be happening in the history of mankind. So, it's -- and it's right here in our backyard, so I appreciate that. Just a couple things to call out on the application, because this doesn't happen very often, but with the magnitude of what's happening there at Bigelow Aerospace with regard to this application, and Ms. Rowe, you mentioned that the equipment -- the estimated equipment investment is going to

AMERICAN OVERSIGHT

be $51,261,000. The next piece is the aviation part investment, which added another three digits, but it's $6,515,000,000 of investment in the aviation parts. There's an economic impact estimate of $2,098,834,589 and a new tax revenue estimate of almost $100 million over the next 20 years. So, that is fabulous, fabulous outcome, and again, to have something -- you know, a resource and a company like this in north Las Vegas is really, you know, great for the state and part of what I talk about when I mention the New Nevada. So, I'm very excited about this application, and it will be given my -- it will be given my full support. I guess I'm just making a lot of comments. I really don't have any further questions. So, I'll start with Southern Nevada. Any questions from Southern Nevada?

CEGAVSKE: No, Governor. I would just like to state that Bigelow's name -- I've been here 44 years, and we know the Bigelow name in southern Nevada as well, and I want to thank you for everything that you and your family have done. I just want to thank you for being here today to bring this to us, and congratulations. I'm going to support this. As the Governor has said, just very impressive, and thank you for everything that you're doing.

BIGELOW: Thank you very much. I really appreciate that.

SANDOVAL: And then I'll go to Dr. Bennett or Mr. Klaich. Do you have any questions or comments?

AMERICAN OVERSIGHT

KLAICH: I do not have any questions and echo the comments of you and the secretary, Governor.

SANDOVAL: Questions from Northern Nevada? Actually, I did think of a question, first a comment, that another great benefit of the company is the scientists that it brings to our state. I mean, you're the most cutting edge aeronautical engineers that we could know and mechanical engineers, et cetera, are employed there at Bigelow, but I guess for Ms. Rowe or Ms. Bigelow, do you have a relationship with UNLV and the engineering programs there?

BIGELOW: We sure do, and we communicate with them somewhat often. I think where we struggle with is -- where we need help the most is in the mid to senior level engineering groups. So, we -- but we sure do -- we love UNLV. We know the folks they have in their engineering departments, and we hope to partner with them to the extent that we can.

SANDOVAL: And then with regard to the jobs, what would be the skillset that you would be seeking for those jobs?

BIGELOW: Sure. So, we have needs in specialized avionics, structural, electrical, mechanical engineering. We could pretty much fill positions in, in all of those areas, so the very specialized skillsets that are required for space activities. If you can think of one, we probably have a need for it.

AMERICAN OVERSIGHT

SANDOVAL: I guess I'm out, but no, and I think, you know, it's -- the Chancellor is on the phone, but certainly, if the Chancellor were present at this meeting, you know, I would encourage you to sit down with the dean of the engineering school at UNLV as well as UNR. I had a meeting Monday -- or Tuesday. The Board of Examiners were in -- we just approved $80 million for the construction of the new engineering school at UNR, and so they're going to be incredibly aggressive, and this would be an opportunity perhaps for you to have a conversation with them to get on the ground floor for the development of some curriculums that could help fill your needs.

ROWE: Governor, Kylie Rowe. I will just add our organization does have an excellent relationship with UNLV. We meet with them regularly, and we connect with their office of economic development, and then furthermore, just the expansion of this company really does attract like-minded aerospace companies, and they're interested in coming here and have transferrable skillsets. So, we're excited to support this expansion.

SANDOVAL: All right, thank you very much. If there are no further questions or comments, the Chair will accept a motion to approve the abatement application of Bigelow Aerospace for an aviation sales and use tax abatement, aviation personal property tax abatement as presented in Agenda Item 5B.

CEGAVSKE: Move for approval.

AMERICAN OVERSIGHT

SANDOVAL: Secretary has moved for approval. Is there a second?

KRAMER: Second.

SANDOVAL: Seconded by Mr. Kramer. Any questions or discussion on the motion?

CEGAVSKE: Just I want to make a comment that I'm batting a thousand. The first two have business licenses in Nevada, so I'm really excited.

SANDOVAL: I think they've all learned their lesson, Madam Secretary.

CEGAVSKE: Yes.

SANDOVAL: All right, if there are no further questions or comments, all those in favor please say aye [ayes around]. Those opposed say no. That motion passes unanimously. Congratulations, best of luck.

BIGELOW: Thank you very much.

SANDOVAL: Thank you. All right, our next Agenda items, we'll take C and D together, and I want to make sure I pronounce this -- is it Cyanco? All right, Cyanco Company, LLC.

MUDD: Thank you, Governor Sandoval, Madam Secretary Cegavske, Director Anderson, and Members of the Board. For the record, I'm Sheldon Mudd, Executive Director of the Northeastern Nevada Regional Development Authority, and from what I understand, this is our first time before this Board, and we're excited to be here. I'm here today to show support for the

AMERICAN OVERSIGHT

application submitted by Cyanco Company, LLC. For nearly 30 years, Cyanco has been manufacturing liquid sodium cyanide at their facility in Winnemucca. This product is essential to the Nevada mining industry, as it allows for effective extraction of microscopic gold particles found at nearly every gold deposit within the state. Aside from their crucial role in the industry, they have within that 30 years provided steady employment with competitive wages. Further, Cyanco has always taken a proactive approach to safety in order to ensure safe handling and use of their product by providing safety training to not only their staff, but to their clients and to local law enforcement and first responders. As a result, we love cyanide in northeastern Nevada.

Cyanco is proposing a brand-new manufacturing facility near their existing operation that will produce sodium cyanide in a briquette form to allow for easier transport. The capital investment of this project is expected to reach $42.5 million and yield 20 new high-paying, full-time permanent jobs, which is a notable number for rural Nevada. One aspect of this project that'll be very unique to our region is that Cyanco expects to export a hundred percent of this product outside of the continental US. We are optimistic that this project will be a catalyst for other manufacturers considering expansion into our region, allowing us to meet some of our overall economic

AMERICAN OVERSIGHT

objectives as they pertain to diversification and participation in global markets.

Overall, the city of Winnemucca, Humboldt County, who's represented by Dave Mendiola here today, and NNRDA are excited that Cyanco is considering our region for this project, and we look forward to the state of Nevada joining us in welcoming this branch of Cyanco to our region. With that, I would like to introduce you to the -- introduce the Board to Cyanco's President and General Manager International all the way from Houston, Texas, Mr. Paul Rostek, who will describe the project in a little bit more detail.

ROSTEK: Thank you, Sheldon. He's stolen most of my thunder quite honestly, done such a good introduction, but as Sheldon says, we've been a proud part of the Winnemucca and Humboldt County communities for more than 25 years, and it is an excellent working relationship we have with the city and the county that drives our ownership and our management to want to continue to invest in our facility at Winnemucca. Sodium cyanide is a critical part of the mining industry. It's really the only chemical that can liberate gold and silver from the [inaudible], economically and [inaudible]. When we first started production in 1990, the plot was 28 million pounds capacity. We've made significant investments over the years. It's now over 200 million pounds of capacity, but globally, the product is used in a solid briquette form.

AMERICAN OVERSIGHT

Here in Nevada, the mines would prefer to take the product in liquid form. It's easier to handle, it's safer, and it just is a much better product in liquid form if you can economically deliver it, and we can out of our Winnemucca facility to the high concentration Nevada mines. What we're looking to do is put in a solids capacity so that we can expand our ability to market the product out of the Winnemucca beyond Nevada and the US and overseas, Mexico, Canada, and beyond. The evidence that we are a safe company and we take sustainable operations very seriously, it's been more than four years since we've had our last OSHA recordable, six years since we've had our last lost time injury, and over the history of our company in Nevada, we've delivered more than two billion pounds of product safely without incident.

We put on annual training exercises for mines, for the first responders, and as I say, having a safe operation is license to operate in our opinion. The $42.5 million capital investment we spend over the next two years, look to start up operations in early 2020, and as I say, generate 20 full-time jobs, 16 of them qualified operators. The others will be engineers and professionals, and then during the construction phase, it will also provide a significant amount of temporary employment, and beyond that, local employment in the supply chain side of our operations. So, with that, I'd just like to say on behalf of Cyanco, its current and its future Winnemucca personnel, your thanks in continuing to support our company in

AMERICAN OVERSIGHT

Nevada, and we look forward to continuing our reinvestment in Winnemucca in Nevada.

SANDOVAL: Thank you, Mr. Rostek, and they said -- Mr. Mudd said you're from Texas? That Texas accent that you've got there.

ROSTEK: I think I should get extra credit, because England's playing the World Cup [laughter].

SANDOVAL: Yes. What's the score? Do you know?

ROSTEK: It was one-all when I left.

SANDOVAL: Oh, boy. You must be dying. I'll make this go fast [laughter]. In any event -- no, this is -- and I'll echo Mr. Mudd's comments, that this is an exciting opportunity for Winnemucca and for Humboldt County. This is a really big deal, and to have 20 high-quality jobs at $44 an hour that are sustainable, it will be long-term and something that they can build on. You know, it's not often that we get the letters that we have here in the file for local support, so I know there's a lot of momentum and support locally to get this done. So, I'm not going to ask questions with regard to any of the numbers that are in the application because they're so strong. I mean, the job creation is 233% over the statutory requirement. The average wage 103% over, equipment cap X, 306% over, but I guess the question is this, and you perhaps anticipated, is I know that Nevada and Winnemucca is competing with Texas with regard to this. So, assuming favorable consideration of this application

AMERICAN OVERSIGHT

by the Board, when would you make that decision as to whether to locate in Texas or in Winnemucca?

ROSTEK: We anticipate making the decision very quickly. We are seeking some additional incentives here in Nevada, which would be very helpful to us, and we're still waiting the outcome of those discussions. But as I say, we have been in Nevada for 25 years. We own that facility and the property. Our Texas facility, we are a manufacturing facility on someone else's site, and we've been in that property for about seven years. So, our hearts are here, and we would like to make this happen.

SANDOVAL: All right, thank you very much. Mr. Klaich, are you still on the phone? I think I heard a disconnect.

KLAICH: I am on the phone, Governor, and I appreciate the opportunity. I wish I was there personally to say hello to my good friend, Mr. Mendiola, but it will have to do over the phone. I know that our Board has been -- I'm going to say admonished from time to time to not forget rural Nevada. So, when two of our first three opportunities here deal with communities of Minden and Winnemucca, it's very exciting to be able to participate in these votes, and I fully intend to support this extremely strong application, Governor.

SANDOVAL: Thank you, Mr. Klaich. Questions from Southern Nevada.

AMERICAN OVERSIGHT

CEGAVSKE: There is no one down here that has any comments. Thank you, Governor, and just want to thank you for bringing this forward to us, and I agree, Winnemucca is a great little town, and I know they'll really appreciate your business being there additional and having more job opportunities. And I saw the information from the school district also. They sent glowing comments. So, I see the communities all supportive of this. Thank you, Governor.

SANDOVAL: Thank you. Questions or comments from Northern Nevada. Mr. Kramer.

KRAMER: I want to thank you for this application, and my question is just see how we can build upon such success and to -- you know, you're exporting 100% of what's being produced there, which I think is phenomenal. To be able to be an exporter is a great thing for the state. You could have chosen anywhere. Why continue to choose to grow in Winnemucca and to grow in the community?

ROSTEK: Yes, we've enjoyed 25 years of very successful business within the Nevada mining industry, and our existing capacity is, in a sense, landlocked unless we build this solids plant. By having this solids production, it will mean that we can always run the plant at full capacity and ship out whatever isn't needed in Nevada to global markets. It also provides the underbidding of a possible further expansion down the road. Currently, we have two solution trains. By putting in

AMERICAN OVERSIGHT

this solids plant, if the Nevada mining requirements increase, we can put in a third train and convert any excess into solids and ship it globally. So, it has a much broader strategic importance company than just the initial solids plant. It can be the launching pad for further expansions in Winnemucca.

KRAMER: And one more question that's a bit technical. So, how does the solids work when it ships? It's solids that ships out to a site, and then they put it into a solution to convert back to a liquid? Is that simply --

ROSTEK: That's exactly right. The solution product is 70% water, and so you're shipping to places like Siberia, to Africa. Shipping that amount of water is very expensive, and so we make the briquettes. They look a lot like charcoal briquettes, just whiter. So, we can put them in all sorts of packaging and move it overseas much more economically without shipping the water. When it gets there, they just dissolve it, use it in the liquid form.

KRAMER: Thank you.

SANDOVAL: Thank you, and you prompt another question by me again. It's just more of a technical question, but you said that the Nevada mines use the liquid form. Is that manufactured in Winnemucca or is that manufactured somewhere else?

ROSTEK: 100% of the Winnemucca mines are using solution out of Winnemucca, and as I say, the reason we can do

AMERICAN OVERSIGHT

that is because we can put it into tankers, and it's a relatively short and economic transportation cost. So, we were the first company that really located its manufacturing close to the mines rather than what most people do, and we did in Texas is we put our solids plant in Texas close to the raw materials, and then we ship it out to the mines, but that means you have to do it in solid form. But it's much easier for the mines if they just have a truck turn up when they need it, offload it into their tanks, and they don't have to handle it or deal with it. They just apply it to the ore.

SANDOVAL: Thank you, and we happen to have somebody that knows a little bit about mines on this Board, so I was going to refer to Dr. Bennett.

BENNETT: Thank you, Governor, and thank you, too, for your patience as I was driving over here. You're right, technology is amazing that I can vote going 75 miles an hour -- 70 miles an hour on my way to the meeting. That was wonderful. Cyanco has been a tremendous community partner in northern Nevada in the town of Winnemucca and certainly engaged here in Nevada and a vital partner in the Nevada mining industry. I'm very excited about this application, but I am going to be abstaining on the vote. Cyanco is a member of my governing board of directors, and so because of that, I think it's best that I abstain, but it's a tremendous project and a great application. Thank you.

AMERICAN OVERSIGHT

SANDOVAL: Thank you, Dr. Bennett. Any further questions or comments on this application? If there are none, the Chair -- well, why don't we talk about the -- so, we've done C. The D, the Catalyst Fund, Director Anderson, did you have any comments with regard to that?

ANDERSON: Nothing specific other than it's certainly part of the package, and I will acknowledge that we're trying to work with the county on some other options as far as what the county can offer versus what our bandwidth is. This is an application from the county for Catalyst Funds, and so I'm certainly happy to weigh in with my approval, although I'm a non-voting member at this juncture. But I think it's entirely appropriate given the wages for the jobs and the quality of jobs, and again, the longevity and history that Cyanco has here in Nevada. So, we welcome you back I guess. I'm not sure if back is the right word, but we welcome the expansion for sure. Thank you.

SANDOVAL: Thank you. So, I will take two separate motions. The first motion would be a motion to approve the abatement application of Cyanco Company, LLC for a sales tax abatement, modified business tax abatement, and personal property tax abatement as presented in Agenda Item 5C.

CEGAVSKE: Move for approval on 5C, Governor.

SANDOVAL: Madam Secretary has moved for approval. Is there a second?

AMERICAN OVERSIGHT

SPEAKER: Second.

KLAICH: I would second that motion, Governor.

SANDOVAL: All right. Second by Mr. Klaich. Any questions or discussion on the motion. I hear none. All in favor say aye [ayes around]. Those opposed say no. That motion passes unanimously, and if the record would reflect that Dr. Bennett has abstained. We'll move on to Agenda Item 5D, which is a Catalyst Fund application in the amount of $100,000 for Cyanco Company, LLC. Is there a motion for approval?

CEGAVSKE: Move for 5D.

SANDOVAL: Secretary of State has moved for approval of a Catalyst Fund application of Cyanco Company, LLC as presented in Agenda Item 5D. Is there a second?

KLAICH: I would second that as well, Governor.

SANDOVAL: All right, Mr. Klaich has seconded the motion. Any questions or discussion? I hear none. All in favor say aye [ayes around]. Those opposed say no. That motion passes unanimously, and again, if the record would reflect that Dr. Bennett has abstained on the vote. Gentlemen, congratulations, good luck, and we look forward to hearing some good news in the very near future. Thank you. Go England, right? Yeah. Oh, they lost? Oops. Hopefully, that doesn't affect our application. All right, thank you. We'll move on to Agenda Item 5E, G4 Works, LLC.

AMERICAN OVERSIGHT

WALSH: Good afternoon, Governor Sandoval, Secretary of State Cegavske, Executive Director Anderson, and Board. For the record, Michael Walsh with the Las Vegas Global Economic Alliance. I'm here today to introduce you to G4 Works, LLC. Present with me today is Scott Sheldon, EVP and CFO, Jonathan Jackson, Government Affairs Specialist, and also have Eric Fletcher, Director of Government Affairs, as well as Heidi Grey [phonetic], Director of Corporate Communications. G4 works is requesting the aviation sales and use tax abatement and the aviation personal property tax abatement. They will hire seven new employees within the first 12 months of operation with an average wage of $20.52.

Their 20-year estimated capital equipment investment expenditure on equipment and aviation parts will exceed $99,500,000. This application has the full support of the Las Vegas Global Economic Alliance. G4 Works, LLC operates as a subsidiary of Allegiant Airlines founded in 1998 and now is one of America's premiere ultra-low-cost carriers. Today, the company employs over 1,400 full-time employees within Nevada and supports over 3,800 jobs across the state. Allegiant is proud of its commitment to support local communities and has been part of the Make a Wish family nationally for more than five years, having provided more than 1,000 flights to wish destinations, raising funds through on-flight sales and supporting Walk for Wishes events across the country. Through the expansion effort

AMERICAN OVERSIGHT

and new facility, G4 Works, LLC will help to continue growth of Allegiant's business and community footprint in southern Nevada. I'd now like to turn it over to Mr. Scott Sheldon and Jonathan Jackson to answer any questions that you may have and to explain the project in further detail. Thank you.

SPEAKER: Thank you, and good afternoon, Governor Sandoval, Madam Secretary Cegavske, and Mr. Anderson. As Michael mentioned, we're the premiere low-cost carrier in the United States. We've had the privilege of calling southern Nevada, and specifically, Las Vegas home since late 2003. Our headquarters are out in Summerland. We occupy roughly 230,000 square feet. It's really an exciting time for our business. For those of you that are familiar with the brand, historically, we've been an all MD-80 operator. We're nearing the tail end of a complete fleet transition from an MD-80 operator to an all airbus operator, and with that comes a lot of network configuration changes. What that is going to entail is we're going to use Las Vegas a launching ground and support base for basically all of our western destinations, and so it's a good time to look at how structured the business -- historically, we've used Arizona as both the teardown facility for our own MD-80 fleet in addition to our parts support. It's an opportunity for us to really look at, you know, continuing to partner with and enhancing what we do here in southern Nevada.

AMERICAN OVERSIGHT

As you can imagine, we are very much involved with the community. We partner with local colleges, UNLV in particular, offer internships. Eric, who's one of my colleagues, is a former UNLV alumni. We very much support the strategic initiatives such as the Silver State Works and the workforce connections that allow us to tap into a highly qualified talent pool here in southern Nevada. You know, and with that, if you have any other questions specifically for me, I'd be happy to answer them.

SANDOVAL: Thank you very much, and the first question would be what's the skillset of those new jobs that'll be created as a result of this application?

SPEAKER: It's going to be a combination from anything from parts clerks, but also to technical purchasing skillsets. So, some of these are previously engineers. If you look at the components on an aircraft, anything from power plant engineers, avionics engineers, structural design engineers, we're currently in negotiations with our mechanics that are represented by the teamsters and their application, and technically, they're employees of a legionnaire. So, that's more or less a discussion about scope, but a lot of the technical expertise that you would expect and how you procure parts and determine work scopes could be exploited through G4 Works.

SANDOVAL: And I'm pretty sure I understood what you said, but in essence, if this were approved, you would be doing the maintenance on your new western fleet in Las Vegas?

AMERICAN OVERSIGHT

SPEAKER: All the parts and tooling support would be through Las Vegas, all of our spare aircraft that we've used to support recovery efforts throughout the western hemisphere. We currently serve 21 destinations. Basically, half of our flying is on the western part of the United States. So, the parts and tooling support would be housed out of Las Vegas.

SANDOVAL: All right, thank you. I have no further questions. Questions from Southern Nevada.

CEGAVSKE: There's no questions from anybody here.

SANDOVAL: Mr. Klaich, any questions? Are you still with us, Dan? I think we lost him. Questions from Northern Nevada. Mr. Kramer.

KRAMER: I do just want to take a moment and commend you, Governor, and Director Anderson, when he was the legislator for actually passing the legislation for the aviation. This is, I think, exactly what the intent was, is to have a company like Allegiant bringing more of their operations and more of their jobs back here to Nevada and continuing to grow, and I am very proud and looking forward to supporting this application. I did want to call that out as an important piece.

SANDOVAL: Mr. Kramer, thank you, because that was going to be my concluding remark, which is fine, but that was exactly the essence of the legislation that we signed, is we were missing on a big part of business, and respectfully, to Arizona. And with this legislation, not only G4, but we've had the

AMERICAN OVERSIGHT

opportunity to bring and expand several other companies in our state, and so it really has driven economic development exactly as what was intended. We're very proud and pleased that Allegiant has chosen Las Vegas and Nevada for its headquarters. It is a big source of pride for our state, and this is an important project that continues that legacy. So, again, that was a very, very important bill, and Nevada was missing out on a big piece of business in terms of not being competitive with our neighboring states. So, thank you. If there are any -- if there aren't any further questions or comments, the Chair will accept a motion for approval of the abatement application of G4 Works, LLC for an aviation sales tax abatement and aviation personal property tax abatement as presented in Agenda Item 5E.

BENNETT: So moved.

HAVINS: So moved, Governor.

SANDOVAL: Dr. Bennett has moved for approval.

HAVINS: Okay, I'll second, Havins.

SANDOVAL: That was Dr. Havins on the second. Any questions or discussion on the motion? I hear none. All those in favor please say aye [ayes around]. Those opposed say no. And I just want to confirm, Mr. Klaich, you're no longer -- are you on the phone? And just for the purpose of the record, there was no response. So, it's a unanimous motion, but not including Mr. Klaich. Yeah, okay. All right, then, congratulations, and best of luck.

AMERICAN OVERSIGHT

WALSH: Thank you.

SANDOVAL: Thank you. Move on to Agenda Item No. 6, which are Abatement Applications for Director Approval. Our first is 6A, Figure Technologies, Inc.

SPEAKER: Good afternoon, Governor and our Madam Secretary and Director Anderson and fellow Board Members. Again, another quality company that we're bringing before you today. EDAWN supports this application. The company is Figure Technologies. They're applying for the sales and tax use abatements, modified business tax abatement, personal property tax abatements. We'll later come back for the Catalyst and the WINN training dollars. Figure Technologies is a financial technology company that leverages block chain artificial intelligence and advanced analytics for consumer products, consumer credit products. They're bringing in about a quarter of a million dollars in capital equipment. They'll start with 65 employees with an average wage over $30. At the end of five years, there will be 240 plus employees. EDAWN fully supports this application, and we -- I'd like to introduce their COO, June Oh, who is going to tell a little about Figure Technologies.

OH: Thank you very much, Governor, Madam Secretary of State, for listening to us. Figure Technologies is a new company. We started an incorporated in January. We are a financial technology company. We are a block chain company, not to be confused with the speculative Bitcoin, Ethereum, Ripple.

AMERICAN OVERSIGHT

Block chain is a phenomenal technology if you have the right use case. So, we are building -- and what block chain really is, is a technology that will cut out third party economic grant seekers and makes processes more efficient. So, our application of this is for loan securitization, whole loan sales, and loan warehousing, and to that end, there's many companies that you'll hear about who are working on block chain technologies.

What we found is that everyone will want a prototype for five to ten years, and so what we decided is that we would build a lending company to originate loans to put on the block chain, kind of prove the concept, and then we would push it out. So, what we are building is this block chain, and then on the other side, we're building a lending company, and we've done this in the past, and were relatively successful. And what we look for is gainful opportunity, which we see in the equity release products out there. So, our first product is the modified HELOC, and then we'll work on a sell-and-stay type product for retired people who are underfunded for retirement, but they have a ton of equity in their home. And so the company itself is really a company that we like to think of as innovative and cutting edge.

We push the envelope in terms of what we want to do, and we push people to think that way. We are a company that treats our employees well. We have 100% health insurance for them and their families, and we continue to add benefits for employees. Right now, we have 80, and we haven't -- we've had many conversations

AMERICAN OVERSIGHT

about the fact that we haven't yet quite launched and we don't have revenues. We got to kind of slow that down a little bit, but we are planning to launch at the end of July, which is very quick. I mean, we really built it in about four months from a technology perspective. So, we had to make sure it works.

So, the need to move into another state are a few things. California is very expensive, and we are looking to streamline the process for our customers. So, one of those things in the mortgage world that's very difficult are the notaries, right? A lot of times you have to sit in front of somebody and sign a document in front of somebody and they take a thumb print. So, what's happened is the electronic notary has come about, and Nevada as a state has -- on the cutting edge, which we love -- has passed a statute that allows for remote notary for all states, and you're one of three states that allows this, Virginia, Texas, and you guys. And we like Nevada for its proximity, and when we came to visit Reno, EDAWN was phenomenal in their sales pitch of Reno.

I was very impressed with what Reno has done, and in general, I'm very impressed with the local and state government in terms of their commitment to the residents of this state. I think that's refreshing. I think that's awesome. I don't hear much of that in California. They just like to keep taxing us. So, I think that, you know, the transformation of where Reno has come and the commitment to their residents is a place that we'd

AMERICAN OVERSIGHT

like to be, and incentives are excellent and really important to us, because we are a new company, and while we're well-funded, we're pushing the envelope on many different fronts. We also were talking to Washoe County on our property title project which we want to put on block chain. So, I think that's all the points that I need to make.

SANDOVAL: No, thank you, and excellent, and you've been sitting in the room with the other applications, but what are the skillsets that you will be seeking for your job applicants, and how many of those positions will be relocations?

OH: Yeah, I apologize, because I did hear you ask that question, and I meant to address that. So, we are open -- as we make all these explorations and as we apply for the incentives that you guys have available is we are open to moving our headquarters here. You are an incredibly friendly state in a lot of ways. It's beautiful. So, before we make that big decision, because there's a lot of executives in San Francisco, we would have customer service reps who I would -- there's a variety of people who go into customer service, and there's a lot of UNR grads, for example, who are looking for opportunity and love what we're doing, and they're in as customer service. And so what I've told them -- and I actually had a conversation with a number of them this morning -- is we would love to provide lots of different paths for you, and we are building wealth management. We're going to have an asset management arm. So,

AMERICAN OVERSIGHT

there's a lot of opportunity for a lot of different ways they can go. What I see in front of them is potentially certified financial planning certifications or registered investment advisors so they can actually give advice in our wealth platform because they want to be on the phone with customers.

We are looking to hire marketing people here. We are looking to hire -- I did -- Stan did a great job in introducing us to the UNR engineering people who I'm talking to about the growth that they can have for engineers because of the new building, because there's always a shortage of engineers. So, we are open to hiring all parts of our company here and grow it and be completely committed.

SANDOVAL: Thank you, and, you know, that's an exciting development, and it's good to hear that you've already had that outreach with the university. I'd encourage you to reach out to UNLV as well just like I had encouraged the other company to reach out -- Bigelow to reach out to UNR, because they're really -- it's interesting, because there are a lot of Reno students that are at UNLV and a lot of Las Vegas students that are in Reno. So, there's a real opportunity there, and they're actually constructing -- in the beginnings of constructing a new engineering school -- building I should say, not school, but building at UNLV as well. So, it really creates a lot of opportunities for young men and women across the state.

AMERICAN OVERSIGHT

You are up and running or when would you be up and running assuming favorable consideration of this application?

OH: Right. So, we actually have jumped the gun, because that's what we do, and we have about 13 people that we have hired in Reno. There is one little thing that is right at the finish line and right about -- after this hearing is we just need a little bit of a tweak to the notary statute, because what we are all about is we are about customer, employee, and investor, and so we like to make our process as simple as possible for our customers and employees. You know, we never say the customer is always right. If a customer calls in and starts screaming at our employee, that's not okay. So, what we're asking for is really just something that will help make the process really simple and not aggravating for the customer. So, that's a point that we are working on.

SANDOVAL: And then just finally, not a question, but just a compliment for the benefits that you provide your employees. That's extraordinary and really helps with the quality of life, and I appreciate your kind comments about the state as well as the region, because that's something that we've really endeavored to foster through the years. And to have a company of your caliber, and frankly, breakthrough company to see Reno and see Nevada as a place where you think you can grow and thrive is a great outcome, so thank you.

AMERICAN OVERSIGHT

OH: And we'd also -- I mean, wherever we are, except for maybe San Francisco, we like to get involved in the community, and I do have engineers in Montana, and they go back to the university, and they teach a class. And so we do get involved in the community, especially in the smaller population states, because there's a lot of opportunity for us to help. So, we are very interested in that as well.

SANDOVAL: All right, I'll start in Northern Nevada. Any questions or comments from Northern Nevada? Mr. Kramer.

KRAMER: This is a fantastic application, and thrilled to see growing in Reno. A couple, I guess, comment, question, one of the things I'd say is that northern Nevada, I think, is quickly developing, and the state as a whole, a reputation on innovation with block chain technology, and I hope that you have a chance to connect with a company called Filament. It's one of the startups that's doing some incredible hardware work on block chain technology that's about as innovative as anything you'll see in the world happening right downtown at the post office in Reno, and make sure you can connect with them. Just a question on the underlying technology. Is this more like creating smart contracts utilizing the block chain or is it securitization of assets with block chain technology? I'm trying to kind of get a little more clarity on what exactly you're doing, just curiosity.

AMERICAN OVERSIGHT

OH: Okay, so, we could talk for a long time about this, and Stan said he would kick me at some point when I take too much time. So, the thing about block chain is it's about encryption, right, and it's about immutability. So, what you want to put on the block chain itself is something that's not going to change, and you need chain of custody, right? So, that's why property title is a great use case for this, because they already do chain of title -- I mean, chain of -- yeah, chain of custody. So, in our case, the loans going onto the block chain, you have, like, a genesis loan packet that you put on there of everything that happened in the application, and then from that point on, you add on -- it's always an append. You never update. So, you append the funding. The funding actually happened, and there's proof that it happened. So, you don't listen to a lender that says they funded the loan when maybe they didn't. So, it sort of cuts out the malfeasance and the fraud, and then every time the borrower pays, that gets appended to this record. And so if you wanted to, as a borrower, you could see the entire record of what happened to this loan, and that gives the buyers and the rating agencies a lot of transparency that they don't have today.

Like, today, if they wanted to see performance of loans, they'd have to go and ask the servicer, and it might take a week to get them that report, and so this gives them a way to -- for loans that they own, they can -- they can go in and check the

AMERICAN OVERSIGHT

report or they can check the loans anytime they want. So, securitization really is a process where you have an underwriter, an auditor, a custodian, a trustee, a lawyer. So, you have all these people that take economic rent, and this technology takes it away, because you don't have to re-underwrite the loan, because you can see the loan that was underwritten in whatever credit box that we were told by the originator, and you can see that that happened.

A lot of times the originator makes mistakes. Everybody makes mistakes, and so we might re-underwrite the loan before it comes onto the block chain and see that it was underwritten outside of that credit box. So, we're not going to stop it from going on the block chain, but what will happen is the buyer will see that it's not under the credit box, but it's still a performing loan, so they'll bid a lower price for it, right? And they'll still buy it because it's performing, but they can get it cheap because it was a mistake. Does that make sense?

KRAMER: A hundred percent, actually. This is a lot of my life. So, no, it was just fascinating to hear and look forward to welcoming you here in northern Nevada.

OH: Thank you.

SANDOVAL: Questions from Southern Nevada.

BARRETT: Yes, Governor, thank you.

SANDOVAL: Yeah, Mr. Barrett.

AMERICAN OVERSIGHT

BARRETT: First of all, I appreciate the compliments about Nevada, wonderful, and do we have a de facto endorsement from you that we could use in an advertisement? I appreciate that. It's really resounding to hear that over and over, and I think with the recent tax law changes, it's even more in demand for us to come here. So, thank you for that. In regards to the company, is the company involved in lending? Is it a bank, is it a lender, or is it a servicing company, technology serving company?

OH: We are a lender, so we will be originating loans. Right now, we are doing near-term servicing, which means that we are taking payments, and we will ultimately build out an entire servicing system and bring servicing in-house, because servicing has also had a really bad reputation in terms of treating the customers poorly, so we want to do a better job with that. So, we would like to take over the entire chain of it. So, that's one part of the business. That's Figure Lending, and then you have Figure Technologies as the holding and then the block chain pieces, and then you have asset management and wealth, and we don't really do small.

BARRETT: Small meaning dollar amount?

OH: Small company. We don't do small.

BARRETT: Small company, and so in the future, lending is another company, and that's your capital lending source, Figure Lending?

AMERICAN OVERSIGHT

OH: Figure Lending is our lending arm, and we will -- there will be a lot of revenue generated from the lending arm. Asset management and wealth are other parts of the business that will be under Figure Technologies holding company, but will be a different part of the company, different entity.

BARRETT: So, I hope that we'll see you back in front of us with Figure Lending.

OH: Well, I don't know if I need to be in front of you for Figure Lending. What I do know, since you brought it up, is that we --

BARRETT: No, my comment is for you to be moving your people here.

OH: Yeah, so, we are not a -- we are not a bank charter. We do not have a bank charter. We are state-by-state lending, a non-bank lender, if you will. So, what we do is we apply to all the states that we need to for lending licenses. So, with Nevada, not to put anybody on the spot, we did put our application in. We haven't received the license yet. So, when we launch --

BARRETT: So, my final comment is that I think it's a great compliment to us, again, as a state that you see the resource of people here to work with you, and only one last question. In your application, you indicated that you're looking at other locations. You mentioned that you jumpstarted in Reno. So, you have your foot in operations, but you also showed that a

AMERICAN OVERSIGHT

competing location with Las Vegas, and I just would like to make a plug for don't forget to come down here. We'd love to see you. Thank you, Governor.

OH: I think that it would be very interesting.

SANDOVAL: We are one state [laughter].

BARRETT: Thank you.

SANDOVAL: No, thank you, and so I would -- how long has your application been in just out of curiosity? You said you're waiting for a decision on that.

OH: I think we put all the applications in -- not sure, probably May or June.

SANDOVAL: Yeah, Ms. Manthy [phonetic] is not in the room. Director Manthy was in here before. She's actually the Director of Business and Industry, and she was in the room a few minutes ago. So, in any event, we'll follow up with that. I'm sure they'll handle it in the most expeditious manner they can, but I'll check.

OH: Thank you.

SANDOVAL: All right, any -- no, actually, I did have one more question. So, with regard to marketing, to whom would you be more marketing to in terms of future customers?

OH: Oh, this is our consumer marketing arm. So, we have a business development that will bring on the members of the block chain meeting. We'll have other originators on and buyers and sellers and rating agencies on the other side. So,

AMERICAN OVERSIGHT

when I say marketing right now, that's consumer marketing. So, we need brand people. We need digital marketers. We need people who understand how to market. It's not my thing.

SANDOVAL: Understood. All right, if there are no -- are there any further questions or comments? I'll turn it over to the Director.

ANDERSON: Thank you, Governor. I will put on the record as well that we are working on the -- the County is working on the Catalyst Fund application. We expect that to circle back for the September meeting. I think just logistics-wise, we didn't get that application -- they hadn't presented that to us in time for this meeting and as well as the WINN program and looking to help pipeline some qualified employees to the marketplace in general, but specifically to the block chain industry. This one, too, because it is a financial institution as determined by you and the Department of Taxation, modified business tax is not abatable in this application, which is partially why we're doing the Catalyst Fund, but also because of great jobs that you're creating. So, we're certainly excited to see that application move forward. As the Governor has mentioned several times as we look at the New Nevada, creating a very diverse workplace, diverse workforce, and diverse employment center is key, right? It's one of those things that we look at, you know, what is going to be a catalyst for sustainable growth, an innovative, disruptive company likes yours, and a good

AMERICAN OVERSIGHT

disruption, not a bad one, based on really cutting edge technology that feels a lot like -- you know, when I started my first business back in '96, it was just as the internet was coming around. It feels very similar. There is a technology that is a platform for so many different use cases, and I think the use case that you've identified seems very applicable and becomes a consumer-driven or a cost-saving measure as well as a protection measure for the consumers as well. So, I'm excited to see the outcome there, but it's also very, you know, knowledge-based and entrepreneurial. While it may be one use case if we look at the general marketplace, we look at a very great opportunity to see entrepreneurs spin off with other use cases and opportunities that every innovative company tends to produce, right, smart people that come up with more ideas and keep generating that, and so we're excited to see that I think. In Nevada as a whole, we certainly see that driving in both Las Vegas and Reno. So, we're excited you're here, and I am certainly excited to see the outcome and the growth of what you have to build and the excitement of what that means to our economy and certainly happy also to approve the application and look forward to many successes down the road.

OH: Thank you.

SPEAKER: Thank you.

SANDOVAL: Congratulations, and we'll see you soon. Thank you. Our next Agenda item is 6B, Polaris Industries, Inc.

AMERICAN OVERSIGHT

HASKIN: Good afternoon again. For the record, Andrew Haskin, Director of Business Development at Northern Nevada Development Authority. I'm here today to present Polaris Industries for the purpose of seeking state Catalyst Funds as part of the company's expansion into the state of Nevada. For more than 60 years, Polaris Industries has been making high-quality, breakthrough products. The company has grown into one of the world's largest powersports companies. Today, Polaris offers a diverse portfolio, best in class brands, and has grown to become a global powersports leader, providing some of the bestselling brands in the industry, including the RANGER utility vehicles, RZR recreational side-by-sides, and Indian motorcycles.

Polaris Industries will be establishing a new western United States distribution center in Fernley, Nevada. The company currently has existing distribution centers in Ohio and South Dakota, but is looking for western United States presence to maximize efficiency and deliver speed to the company's customers. The company intends to invest $34 million to construct a new 475,000-square-foot facility, invest $13.6 million in capital equipment, and add 64 new jobs with an average wage of $21.95 per hour. NNDA fully supports Polaris' incentive application and respectfully requests approval of this application, and with that, I will turn it over to Mr. Paul Eickhoff.

AMERICAN OVERSIGHT

EICKHOFF: Thank you, Andrew. Good afternoon. I would like to thank Governor Sandoval, the distinguished Board Members, and the Office of GOED, the Governor's Office of Economic Development, for once again including us on the Agenda. My name is Paul Eickhoff. I'm the Senior Director of Distribution for Polaris Industries and the lead for this project. At this point, I'd like to give you a brief refresher overview of our dynamic project. Polaris Industries is an industry leader in powersports equipment. We were founded in 1954 in Minnesota with a focus on snowmobiles. Over the last 60 years, the company still manufactures snowmobiles, but we now offer products such as ATVs, motorcycles, and after-market parts, and as of last month, a boat company also. Our product offerings include premium brand names such as Indian motorcycles, Rubicon, Smittybilt, Transamerican Auto Parts, Slingshot, along with Polaris brand vehicles.

Polaris is committed to being a highly customer-centric, efficient growth company. We relentlessly pursue product superiority, safety, and value improvement. Our success would not be possible without the 11,000 employees worldwide. We offer employees competitive wages with benefits. In addition, we offer bonuses and stock options. Now that you've heard an overview of the company, I'd like to discuss this exciting new project in western United States. This project will consist of brand-new 475,000-square-foot distribution center in Fernley, Nevada. We

AMERICAN OVERSIGHT

anticipate hiring approximately 64 employees over the next 24 months as a part of the project with the potential of reaching 100. The estimated average wage for these employees will be $21.95 per hour with benefits which include medical, dental, 401K, merit increases, and the opportunity for bonuses and stock options. The investment is an estimated $47 million in real and personal property, and we anticipate the facility being operational in Q2 of 2019. We truly appreciate being considered for the Catalyst Fund, and we look forward to a continued partnership with the state of Nevada, Lyon County, city of Fernley. I'd be happy to answer any questions. I also brought a picture for you.

SANDOVAL: No, go ahead and show that again if you can get the camera on that. That's a good-looking building. So, welcome back. I mean, it's only been a month I think or maybe less, but welcome back, and, you know, first of all, thank you for making that decision to come to Fernley and come to Lyon County. I don't have any questions because you were very thorough last month. In my mind, nothing has changed since then, and in fact, it's gotten better because of the significant investment. So, this is for Director approval, but this is something that I fully support, but thank you.

EICKHOFF: Thank you.

AMERICAN OVERSIGHT

SANDOVAL: Questions or comments from other Board Members on Polaris Industries' application for a Catalyst Fund grant. Dr. Bennett.

BENNETT: Thank you, Governor, and it is delightful to see you back here again. I was out over the 4th of July, and many of my friends had their Polaris RZRs, and they were zipping around, and they were very happy with those products. And it's nice to be able to call that a Nevada company now and really appreciate that. Governor, I don't really have a question for Polaris, but I was doing a little bit of math here. I'm a product of the Washoe County School District, so I think my math skills are pretty good. I believe that there are more primary jobs being created in the rural counties with our Agenda today than in the urban counties, and I think that's very exciting, and it's because of companies like Polaris who have seen the potential in Nevada and are willing to make that investment, and I'm very excited about that, so thank you.

SANDOVAL: Thank you. Other questions -- any questions or comments from Southern Nevada?

CEGAVSKE: Nothing, Governor. Thank you.

SANDOVAL: Then I'll turn it over to the Director.

ANDERSON: Thank you, Governor. It would be a little awkward if I changed direction, because the Governor has already given you a glowing endorsement. So, this one a pretty easy one. Plus, he was quoted in your press release as well. I think this

AMERICAN OVERSIGHT

a great win for Fernley. I would also compliment Polaris for making that decision. I think it's a wonderful community, and they're going to -- you know, it's a feather in their cap as well, and I think you'll see that pride of community reinforced as you guys continue to grow and develop there. I have to give a thank you and a shout out to Lyon County as well for working with us and our office to make sure we got this Catalyst grant done, and it was -- we had planned it to be done for last meeting, and again, just logistics and paperwork didn't get done in time. So, we're happy to have you back, and thank you for coming back for this. Again, it's a pleasure to have you in the state of Nevada and happy to approve the Catalyst Fund application.

SANDOVAL: Congratulations, good luck. We look forward to that ribbon cutting.

EICKHOFF: Thank you. We're planning that for early August. I have a meeting on Friday. So, we'll see if we can [inaudible].

SANDOVAL: Fabulous.

ANDERSON: Governor, could I -- sorry, after the fact, but I had just one more comment.

SANDOVAL: Of course.

ANDERSON: But Polaris was one that came in with certainly initial application, and I also need to give you guys some great thanks for working with us on that wage scale. It was something that -- in a distribution center, certainly that's a

AMERICAN OVERSIGHT

big driving decision factor when it comes to the cost of wages and personnel, and you guys are producing some great jobs there, and we look forward to seeing continued growth. Thanks again.

EICKHOFF: Thank you very much.

HASKIN: Thank you.

SANDOVAL: Thank you. Before we move to Agenda Item No. 7, I want to move just quickly back to Agenda Item No. 3, which are comments, and I wanted to build off Dr. Bennett's remarks. I mean, I think today is another example of just a very impressive Agenda. We've gone from distilled spirits to aerospace to cyanide in mining to aviation to block chain to an international distributor all in one meeting. We covered the communities of Las -- or city of Las Vegas, Minden, Fernley, Winnemucca, north Las Vegas, and Reno. This is exactly what we contemplated when we built the Governor's Office of Economic Development. I truly want to compliment Director Anderson, his team, everybody at the Governor's Office of Economic Development, as well as the local development authorities for all of their hard work, because it really has come together. And Dr. Bennett made a really good comment, because I hear it all the time in a positive way. You know, what are we -- what are we doing for rural Nevada? And here we are with three very significant projects that are going to help Douglas County, Lyon County, and Humboldt County. So, I'm really excited about the Agenda today, and thank you for making that comment, Dr. Bennett. So, let's

AMERICAN OVERSIGHT

move to Agenda Item No. 7, Workforce Innovation for the New Nevada (WINN) Fund Program for Board Approval, the Ratification of the SNAP Pilot Program. Director Anderson.

ANDERSON: Governor, this was one that was on the last Agenda. It was a bit of an oversight on our part that the dollar amount exceeded Director approval. This is really sort of a ratification of the program that we did discuss. Stacy is down -- from our office is down in Las Vegas if you'd like her to come up and give an update. Stacy, if you'd come up to the mic and give us a quick update of any -- well, of any updates we might have.

VOSWICK: Good afternoon. Stacy Voswick [phonetic] for the record, Workforce Development Program Coordinator. This is phase two of a project that's already been approved as well, so in addition to the ratification. Western Nevada College was the primary education provider in phase two with an initial plan to serve 20 individuals on SNAP, or food stamps commonly referred to. This phase two came to us as an expansion to add 100 spots based on the success. So, that first phase for Western Nevada College, they over-enrolled. So, there is obviously a need and an interest and demand in that area. This second phase is looking at 100 individuals. Both Truckee Meadows and Western Nevada College are in the process either ramping up or getting those programs going here in July. So, we'll see more robust data on how that program is going come next quarter. So, around

AMERICAN OVERSIGHT

October, we'll have more data on that as well, but I think one of the things that I really wanted to stress and highlight is looking at these pilots and looking at how our investments with state funds can basically expand these opportunities.

So, one of the reasons that this project came to us and through WINN funding is that when you utilize state funding or local funding in investments and providing training to recipients of SNAP, that opens up, unlocks federal investments back into those educational institutions to expand opportunities for program development and meeting the demands for local employers. So, not only is that done here within the pilot, but it's also creating a platform for us to do that for every WINN project. Those are my updates.

SANDOVAL: No, thank you, and I don't know if you know the answer to this question, but do we anticipate that we'll be moving into southern Nevada as well with CSN?

VOSWICK: Yeah, so, that's part of what I wanted to stress, is that with the projects that we funded both in manufacturing skills and also with our technology and health projects that have recently come before this Board is using that platform and integrating it into those projects, and so that process is already undergoing.

SANDOVAL: And I may have said this last meeting, but this is really a great program, and we knew that there were a lot of individuals that could really change their lives, frankly,

AMERICAN OVERSIGHT

that are on this program, but have -- I think we called it upscaling before, but have an opportunity to get into this workforce that we've talked about today. So, these are candidates that otherwise may not have had an opportunity to get training like that's going to be offered here. So, I think this is money that is very, very well spent. All right, any other -- any questions or comments from other Board Members on Agenda Item No. 7? If there are none, the Chair will accept a motion for approval of the ratification of the SNAP Pilot Program as presented in Agenda Item No. 7.

BARRETT: So move, Governor.

HAVINS: Second, Havins.

SANDOVAL: Mr. Barrett has moved for approval. Dr. Havins has seconded the motion. Any questions or discussion on the motion? If there are none, all those in favor say aye [ayes around]. Those opposed say no. That motion passes unanimously. Congratulations, let's keep up the good work. We'll move to Agenda Item No. 8, Workforce Innovation for the New Nevada Fund Program for Director Approval, Growing the Nursing Workforce to Improve Population Health Outcomes and Create Jobs in the State of Nevada. Director Anderson.

ANDERSON: Governor, I believe this is one that we may have withdrawn from the Agenda. If Stacy is still at the table, I'd ask for clarification from her.

CEGAVSKE: She's coming.

AMERICAN OVERSIGHT

ANDERSON: Okay.

VOSWICK: And I thought I was done. This project is actually going to come back in a revised form for our September meeting, because we're bringing more employer partners into this project. So, it'll be an expanded application you'll see next Board Meeting.

SANDOVAL: Thank you. It was worth the wait. All right, then we will continue Agenda Item No. 8 until our next regularly scheduled meeting, which will be in September. We'll move on to Agenda Item No. 9, Performance Measures Report. Mr. Potts.

POTTS: Thank you, Governor, Madam Secretary, Members of the Board. For the record, Bob Potts, Research Director at the Governor's Office of Economic Development. So, I'm going to walk you through this performance report, what our agency has been up to, economic development agencies across the state through the second quarter of 2018, of this year. This report is a little bit different than those that I have presented in the past. It gets kind of wonky, if that's the right word. We have Board meetings every other month, and I do metrics on a quarterly basis. So, generally, I present the first quarter metrics at the May meeting, but because we had such a full Agenda at the May meeting, I decided to put it off until July. But because we had so many companies at the May meeting, I thought, you know, I need to include all that information in as well. So,

AMERICAN OVERSIGHT

I've tried to highlight throughout the report the dates so everything is consistent there, but also as I walk and talk you through this report, the different timing, okay?

So, on the cover page, this dashboard that I have here, everything on there is as of the first quarter of 2018, okay? So, that's so we can do apples to apples comparison between what happened in the previous quarter, the fourth quarter of '17, as well as against the first quarter of 2017 last year, okay? If we go to the next page, this is where we get into the business development side of things. So, this includes everything that's happened through June except for the non-incentivized assisted companies, because the RDAs have until the middle of the month following the end of the quarter. I don't have all that information yet. So, everything I talk about here is going to be conservative. The good news is, is everything is really good without those being added in there, so it can only get better.

If we look at the job side of things, so if we look at the first six months of this year ending in June, year to date, 2,294 jobs. That's a two-year estimate. That's an 18.5% increase over what it was the same period last year, 35 companies, 9.4% increase over what it was last year. If we look at the 12 months ending in June, current job counts, the two-year out and the initial jobs, 6,372. That represents a 19.5% improvement over last year the same time, 77 companies, 13%. If we look at the buildout job numbers of those jobs through the first six months,

AMERICAN OVERSIGHT

they add up to 11,325. That's a 32% increase over the 12 months ending last year in June. Okay, if we go down and look at the companies over the last six months that we've assisted, those 35 companies, most of them are manufacturers, almost evenly split between manufacturers and logistics companies. Eleven percent of them were technology companies, and then it was split across -- the 20% balance was split between our other target sectors. Okay. The graph up there kind of outlines why I don't have complete information for the last -- or for the second quarter of 2018.

If we look at the wages paid, big bump up. Average wage is $28.59 for the first six months of the companies that have been brought in. That's a 37% increase over what it was the six months -- in the first six months of 2017. The table at the bottom, I'm only going to talk about the bottom row on the lower left where we talk about the annual assisted companies. If you look through June, we've just about -- we're almost double of everything in 2017. Initial jobs is a little bit behind, but where the big bump up is on capital investment. We're already $133 million above on cap X compared to what we were last year over the first six months. So, that's a big bump there.

Going up to the right there, the contract and actual jobs, I put this in here. This is new incentivized companies so I can track over time what the abated companies, what they have on their contract amount and what they're actually doing, going back

AMERICAN OVERSIGHT

and look at DETR's records, okay? And I put in there all years actual above contracted is 6,142. That's 44% -- the actual job counts are 44% above what they were contracted to do. So, they're outperforming all the abated companies. I wish there were a way that I could track expanded companies, you know, local companies that are expanding. I can't do that because DETR doesn't delineate when jobs come online, but this is a solid indicator of what -- the companies that are getting abated, how they actually perform.

Go to the next page, talk about capital investment. As I've mentioned before, the stock chart here, that's the capital investment of large-scale projects. So, it doesn't include like Tesla. It doesn't include like Apple or Boulder Solar Power, also doesn't include aviation and data center abated companies because they're structured so differently. So, for comparison, so through June, we've had $329.8 million in capital investment. Roughly half of that $175 million, was in the first quarter, $155 million in the second quarter. So, it's kind of split there on the capital investment, but big capital investment, even if you pull out the aviation and data centers. Okay. If we go over to the aviation and data centers on the righthand side of the page, in the first quarter, two companies applied for the aviation abatements with a total capital investment of $186 million. On the data center side, we had one company that applied for a data center abatement in the first quarter with capital investment of

AMERICAN OVERSIGHT

$18.6 million, and then I'll have more after this meeting to add to this chart.

So, going down to the pipeline at the bottom, because I rely on the RDA information for this pipeline report, I only have information for the first quarter. You can see that there's a big bump up in new leads, prospects, and our WINNs are also up. I mentioned earlier that for the first half of the year, we assisted 35 companies, which will go up once I get the RDA reports back, but just looking at the first quarter, there were 23 WINNs, okay, in the first quarter. We move from 108 to 165 leads from the fourth quarter to the first quarter. Leads are up 92% over what they were a year ago. Prospects are up 38.5% of what they were a year ago, and WINNs are up over 53% of what they were a year ago.

We go to the next page, it's the International Trade Division, and I know -- so, I talked to Director Vinwagnin [phonetic] yesterday, and I said, you got anything new for me? And he says, I got a lot of new. I just don't have time to give it to you. I said, so, what's the high level? And you had already mentioned it, Nevada Global is a big deal and the collaboration, that they're putting that together to help provide a landing spot for foreign companies and workers, and then of course the trade mission to Spain in the Basque region. So, getting back to the first quarter, though, when I talk about the global recruiting pipeline, I'm talking about active leads

AMERICAN OVERSIGHT

because of the amount of time it takes to convert an international opportunity to a real WINN, and what I do is I pull out those that have become inactive. So, currently, we have 46 active leads after removing the inactive ones with an additional ten that we're throwing in. We have 12 prospects right now with two new ones after removing those that have been inactive.

The International Trade Division had a lot of activity going on in the first quarter that's all spelled out in these bullets down here at a very high level, spent quite a bit of time in consumer electronics show that led to relationships with Netherlands, Mexico, Quebec, and it also built into an inbound site visit with Turkey, looked at some sites. They also hosted some delegates from South Africa to talk about trade opportunities and to prepare for the upcoming trade mission. They also facilitated an inbound trade delegation from Canada talking about advanced industries and innovation and a number of things in that space. They also had a visit from the Embassy in Spain talking about the Smart Cities Program and some of the current projects and challenges that are faced on the infrastructure side of things. And lastly, seven STEP grants were awarded to help small eligible businesses with their exporting.

Going to the Procurement Technical Assistance Center, it's having a very successful year. In fact, two quarters into their fiscal year, they were already ahead of all the performance

AMERICAN OVERSIGHT

metrics for the previous full year, but through the third quarter, their number of contracts are up by 43.5%. The contracts amounts are up by over 125% over what they were last year's total. So, nine months against 12 months, and they still have that kind of improved performance. The number of clients slipped slightly in the fourth quarter -- or in the third quarter of their fiscal year down to 1,454. So, when I talk about they're still -- have this growth or annual growth, it slipped slightly in the fourth quarter, but they're -- or third quarter, but they're still well above their long-term trend.

I asked Joan Ruben, the Director in our office that runs PTAC, and she says it's because of the coordinated effort with, like, business and industry, the Small Business Administration, with Small Business Development Center. And then she also believes that a lot of the free training seminars and things that they put on make a big difference.

Looking at the Emerging Small Business Program, they report on a semi-annual basis. So, we have all the 2017 stats now for the Emerging Small Business Program. Currently, there's 1,139 total businesses certified in the state to do business with state and the urban local governments. That's up about 31% over 2016. If you look at the number of businesses that have been solicited to submit a quote, bid, or a proposal on a contract, that now stands at 1,431. That was a huge jump, 335% over what it was last year, and that's largely because of the Clark County School

AMERICAN OVERSIGHT

District had a huge marketing campaign. So, a lot of contracts solicit out there.

The contracts awarded were up by 4.3% over 2016. There were 1,015 contracts awarded in 2017. The amount was up by 7.9%, bringing the average up to 3.4% on the contract amounts on the ESB. So, they've grown every year since their inception from the 2013 legislative session.

Next page, going over to the Film Office, talking about the Film Office, in the fourth quarter, the Film Office in fiscal year '18, so they finished. I got all this latest data through June from the Film Office. They reported an additional 103 productions, bringing the fiscal year total to 333 with total local production spin in the state of over $50 million. In the table on the left there, I had 2018 YTD. You can get rid of the year to date, because it's a complete year's worth of data that they have there. The projects down below at the bottom table, those are the significant projects where there was more than a million dollars spend in the state as well as what those project types were.

I also have the last two quarters of responses from their customer satisfaction survey, their client satisfaction survey. Every response was very good. So, they hit the ceiling all across the board. Sometimes I think I need to pull that chart out because they're always either really good or very good. So, anyways, a lot of satisfaction with the Film Office.

AMERICAN OVERSIGHT

The Community Development Block Grant Program, so that underwent some big changes in 2017 when Carson City reverted back to the state CDBG program, and so I kind of changed the layout here. So, in 2018, there were 14 grants. The total grant amount was a little over $3.5 million. The rural CDBG program, they got a little over $3 million, and the urban had five grants with a total allocation of $462,000. Okay. Since 2016 and going forward, we've really tried to change the focus of the CDBG program to fund smaller grants that had an economic development focus. If you look at the table there, the lower righthand corner, it says 87% were economic development focused, right? If you take and you compare that to what it was like prior to 2015 and earlier, it's over three times as high for economic development focus for the rural CDBG grants. Rural grant progress is all there in those bullets, and I won't go into a lot of detail on that one. You can read that.

Then we go to the next page. This is where we move over to the job and sector overview. This is all the most current I could get through the second quarter of 2018. The new job numbers come out next week. These numbers are based on -- at least on the statewide jobs and Unemployment rate is based on the May numbers. Nevada now stands as the fastest -- now has the fastest job growth in the nation, record employment levels of 1.37 million workers, year over year job gains of over 37,000 workers, 89 months of year over year gains, 70th month of

AMERICAN OVERSIGHT

outpacing the nation. And it's not just job growth, but we're number five in GDP growth in the country, so running on all cylinders.

SANDOVAL: Mr. Potts, I didn't hear you. What were we ranked for job growth?

POTTS: Number one.

SANDOVAL: That's what I thought I heard you say.

POTTS: Number one. Let's just keep it sustainable, right? But I think what really matters, and I'll talk about this next, is the structural change that we're seeing going on within that growth. The growth matters, right? The growth matters. It's the structural change within that growth that makes it really resilient. So, I think that's a big -- I mean, right now, we're looking at manufacturing being the fastest growth sector in the state both in jobs and GDP. Last year, manufacturing GDP growth was 17.3%, so that makes a big difference. Right now, highest weekly wage ranges on record. Before benefits, it's 955 a week, which is roughly $50,000 a year. And if we go down and we look at all the sectors, all of them showed positive growth in both jobs and earnings when compared to the second quarter of last year. Okay. If we look aerospace and defense right now, there's 14,300 workers, average earnings of $85,500. These earnings figures I'm giving you here now, they include benefits. Okay.

AMERICAN OVERSIGHT

When I looked under the hood, what was going on as far as the job growth, the job and wages growth, we're seeing bumps up in flight training as well as parts manufacturing. So, manufacturing showed up there again. If we look at business information technology, ecosystem, 63,700 workers making average earnings of almost $48,000 a year. Wages in IT, they jumped up on the manufacturing side of things. So, if you think of IT manufacturing, it was like switches and controls and relays and that sort of thing. Okay. The jobs were fairly flat with -- there's about 80 industries within this target sector, and there was a little change within all the detail.

We go to the next page, look at the health and medical sector, currently, 111,800 workers, average earnings, over $56,000 a year. The job bump was general hospitals, doctor's offices, also elderly services. Okay. And wages were spread kind of across the board as well. The national resource technology sector to the right there, 54,000 workers, $66,400 a year in average annual earnings. Most of the job growth was on manufacturing on the energy side. So, natural resources is where we combine the clean energy sector, agriculture, as well as water technologies, and where I'm seeing the jump is in the manufacturing on the energy side. Okay, if we look at manufacturing and logistics, lower left there, 125,000 workers, $59,000 a year, a little over $59,000 a year. Jobs were in really two places, warehousing and storage, 800 workers. So,

AMERICAN OVERSIGHT

there was 2,700 workers growth in the second quarter, 800 in warehousing and storage, but the big one was storage battery manufacturing, 900, and I think those numbers are slow coming. We're going to see more of that. That's what I'm getting at. Wages are spread. There's 467 industries within this combined industry of logistics and manufacturing.

I pull manufacturing out because it's something that we really like to stay focused on and where we've seen so much change going on, and again, that's where those storage battery manufacturing jobs have bumped up that growth, the 11,340 workers, currently, 46,200 jobs, average earnings of $56,000 a year. And then on to mining on the next page, there was little change in the jobs and wages, and where there was change, it was within gold ore mining, but it also -- I seen a little bit in silver, copper, and zinc. But it's not a big change there. It's pretty flat right now, high wages, $95,200 a year, a little over 14,000 jobs. And in tourism, gaming, and entertainment, currently, there's about 418,000 workers in that sector making on average $34,000 a year.

There was little movement in the second quarter, but if I look at what happened over the previous year, second quarter of this year over second quarter last year, there were over 11,000 workers added to the sector, and earnings bumped up about $800 a year. With that, I'll close my comments.

AMERICAN OVERSIGHT

SANDOVAL: Thank you, Mr. Potts, and I don't know how you articulate this, and not for today, but that's something that's really important to me, and I think I do speak for everyone else in terms of sustainability. And there likely is another recession on the horizon. I guess I would ask you what I hear from others is 2020, summer of that, and certainly, I want to make sure that we're set up to be resilient so that we don't have a 10% increase in unemployment and lose 175,000 jobs like we did last time. So, I don't know if you have any thoughts or comments on that.

POTTS: I think the great news in all these numbers that comes out is, again, the growth is great, but it's the structural change that makes a difference. It's diversification. That's what makes it sustainable. But when you look at the underlying industries where we're starting to see the largest growth, especially when you start talking about manufacturing, those are the jobs that don't go away easy. Okay, that's what helps really create that sustainability. I did some work earlier on looking at the change within the change and how the work that economic development -- it's not just our agency. It's RDAs. It's everybody in the state that's doing this sort of thing, you know, that's in this, where you're actually starting to see the work that we're doing starting to play out in the aggregate numbers. You know, I'll bring up manufacturing again. That's roughly 42% of the jobs that have been assisted in the last six

AMERICAN OVERSIGHT

or seven years have been tied to manufacturing at some level. There's food manufacturing or IT manufacturing or advanced manufacturing or whatever it might be. Okay, and then you're seeing how that's starting to influence where you're starting to see where that sector has been -- it was the fastest growing sector in the aggregate where you could see that influence. That's what, at the end of the day, is going to help us be sustainable. You know, business cycles happen, right? But I think you've got that -- we've got that going for us, plus an awareness of what we need to do to stay in front of it makes a difference.

SANDOVAL: Thank you very much. That's exactly the information I was seeking. Any other questions or comments for Mr. Potts from Board Members.

CEGAVSKE: None in the South, Governor.

SANDOVAL: Great work as always. Thank you.

POTTS: Thank you.

SANDOVAL: We'll move to Agenda Item No. 10, the Director's Report. Director Anderson.

ANDERSON: Thank you, Governor. I'll start out by saying this Director's Report tends to get -- there's a lot of bullet points, and they're not in order of priority. All the juicy stuff is in the middle, at the end just to make sure you read all the way through it, but I'll highlight just a couple key pieces that I think are important for the Board to hear. The

AMERICAN OVERSIGHT

trade delegation, obviously, to Spain was, I think, a resounding success. We had the opportunity to meet with a large group of companies as well as higher education, culinary institutes, a whole host of folks, and I think from the very first meeting we had with 30 to 40 companies that had interest in Nevada, and the Governor had mentioned a couple, and one in particular was building the pumps, the water pumps for the third straw in Lake Mead and how critical and important that connection was.

Currently just with the launch of Nevada Global, we did kind of a soft launch just a month before, and that Nevada Global is essentially a soft landing place, an ecosystem, if you would, for companies that have interest in opening their business to the US market and using Nevada as a launching pad for that. We have got a tremendous amount of interest in this, and I think it surprised us how quickly, as a small brush fire kind of took hold, that we -- maybe that's not the right analogy with the season, so I apologize for that up front, but we're seeing a lot of interest here. And it's exciting because I think it's pushed us to quickly grow that ecosystem faster than we had initially intended. So, with that, we will -- in the next here, we'll have a website. We'll have an onboarding process, a vetting process solidified.

We already have gone through and used Poland as a pilot project, so to speak, where we've had [inaudible] from our office there hosting companies, running them through a boot camp,

AMERICAN OVERSIGHT

helping them understand what it would take to set up shop in the US, again, using Nevada as that platform. We have several of those companies, five companies that have already committed to coming to Nevada and hopefully setting up shop and going through the Nevada version of that boot camp as well.

The Spain delegation, we already -- in November, they're bringing a trade mission of about 15 to 17 companies that have already committed, and we'll, again, run them through kind of a Nevada Global style boot camp while they're here so they understand what it takes to get into the US market. Some of them are large and mature and have some of those specialties in-house, but a lot of them -- just sometimes the basic of a business license and setting up an entity here in the state is very different from the European Union and Spain and some of these other international locations.

GOED also entered an MOU with the World Trade Center, which is owned and operated by the Las Vegas Convention and Visitors Authority. That gives us access to the entire WTO network, and so we will be advertising. They are going to advertise for us, actually, the Nevada Global platform to allow both from their member organizations, which right now, they have MOUs with 33 other WTOs, that they have access to share that information across the Board. That gives us an immense reach when it comes to looking for international companies that potentially want to be here. I have high expectations for Nevada Global, excited to

AMERICAN OVERSIGHT

see it grow so quickly. And I think between Poland and then the subsequent trade mission to Spain, and certainly in Africa as well, as we introduce that program, we'll see it continue to pick up steam.

During the months of May and June, GOED, our international division, issued nine companies a total of $43,000 through the STEP program. Those are federal dollars that we apply for, and we're able to grant those to companies that are looking to export out of Nevada, and that could be anything from going to conventions or setting up booths or actually having meetings with international -- other international companies. And we're starting to track that a little bit differently. We've applied for a little bit extra money coming into this next biennium. So, we're looking to expand that program and think in conjunction with Nevada Global. Being able to do that exchange between multiple countries I think will be a great success for us as well, or at least a multiplier effect.

NIAS, our drone entity, Nevada Institute for Autonomous Systems, is developing out a public safety program. Nevada Center of Excellence is where it's going to be housed, and the idea is to -- obviously, NIAS' role and mission is to grow that industry, and we feel like education and training, when it comes to drone usage, the rules of the road, so to speak, rules of the air, is an important piece. Recently, in the last month or so, we did a survey of industry, and this is one of the things that

AMERICAN OVERSIGHT

industry came back to us and said this is lacking. There's a gap here, and we feel like an entity like NIAS could fill that gap. That has already produced some exciting opportunities and discussions with other states looking to Utah and Alberta, Canada. We've got an MOU with them in conjunction with that, but being able to use Nevada both as a testing platform for the drones, but also for other states to send their folks here for education purpose as well. So, we think that will expand that industry.

GOED and the Bank of Nevada approved -- excuse me -- two more Nevada opportunity loans totaling $150,000. This, if you remember, was Senate Bill 126 sponsored by Senator Ford. I actually ran into him at the airport on the way up here today and gave him this update before anybody else got it, but the loan department has now approved four out of five applicants for a total of $225,000. Just for reference, this was a million-dollar fund of general funds that was put together through the office for the Governor's Office of Economic Development, and we've contracted with Bank of Nevada to look for folks that may not have the collateral or may not have -- they've got a business up and running, but don't quite meet the criteria for traditional lending, and this, I think, is going to be a great success for reaching out to those folks again to make sure that nobody's left behind in that New Nevada. And one of the case -- not case studies, but profiles of the very first application was a

AMERICAN OVERSIGHT

gentleman who owns a printing company. He couldn't get a loan, traditional lending, to buy a new printer. It allowed him to expand the products and services that he did. I believe he's located in North Las Vegas, but he was able to get a loan, buy some equipment, supplies, and has opened a whole new division for his company and intends to hire about three to four people to run that. So, very exciting in that realm.

CDBG, which is our grant program, thanks to Matt Moore in our office and his team, seen some great success in getting funds allocated. I believe the total amount was $3.1 million, but we had some revisionary funds. I think total with Carson City included was how much? $3.5 million total with Carson City included, and those are listed in the Director's Report as to where those monies were allocated. This is a great investment in the rural communities, and it certainly is more kind of community development versus pure economic development. That's an important piece of the puzzle when we look at rural communities and the history they have and the opportunity they have to develop out not only with CDBG grants, but also our mainstream program, which is up and running and moving forward as well to really showcase some of the great value we have in our rural communities.

As most of us probably already know that the IRS certified our 61 opportunity zone tracks. Something I neglected to put in the update here is we're looking to build a task force around

AMERICAN OVERSIGHT

that inclusive of industry, BNI, ourselves, and maybe some other agencies to make sure that we, one, highlight the opportunity for investment to as many people as possible, but also to make sure that as much of that opportunity fund dollars that are local stay local and are invested in some of these designated tracks, and I'll continue to provide the Board updates as we move forward on that.

The Film Office has been busy. While we've not seen a whole lot of tax credits issued quite yet, we've got a lot on the books and a lot of film production going on. That chart as well is in the Director's Report if you'd like to look at that. They also have created a new online directory. So, if you'd like to have a film filmed in your backyard, you can put your backyard into this directory. I'm not sure if that's exactly what it's used for, but this allows basically industry to update their locations and what the advantages are to filming in those locations. Before, the Film Office had a hard time getting updates and having to reach out. This is a much more consumer-driven site versus top down picking which sites are good or bad.

Together with the Nevada Department of Transportation, PTAC went on an outreach trip. This, too, I think is a great example of rural outreach from our office, and honestly, previously to coming into this position, I didn't know what PTAC did, but it is a tremendous resource for small business, medium-sized businesses to get access to contracts and navigate -- I don't know what the

AMERICAN OVERSIGHT

analogy would be appropriate there, but certainly a very difficult process. And it's nice that we have an entity that goes through and helps folks get certified in the areas they need to, whether that be small business or disadvantaged business, and then how do they gain access to the contracts both from a state and federal level. Winnemucca, Lovelock, Elko, Battle Born, Ely, and Eureka were part of this latest outreach. In our next report, we have an update on the most recent here in northern Nevada. They had several hundred people show up to an event, business owners that were looking to utilize PTAC services. So, we're excited to see that grow.

Number 35 is -- Gillian in our office, along with Stacy, are developing a WINN program, and we saw that in our Agenda today, and it's expanding and growing. We have some really key problems as far as getting a pipeline of nursing and health professionals. We believe we found -- or they have found two great solutions to that. One is to build a pipeline of trainers and then drill that down into the Clark County School District as well as -- well, K-12 education. So, at a high school level, you'll be able to train through CNEs and CNAs and get onto a nursing track right through high school, and we think there's going to be a great opportunity for that. And so we'll see that in the next -- in the September meeting.

I was going to list all the boards that Bob Potts sits on for workforce development. I ran out of ink. He has -- and you

AMERICAN OVERSIGHT

look at 38 and 40 as well as -- well, there's a whole host of them, and probably not all of them included, but Mr. Potts has been a tremendous resource for the state, and frankly, the nation when it comes to understanding what workforce development is, how that affects our ability to grow in that sustainable way, and to build the infrastructure and pipeline for what our employers are looking for, and not just the ones for today, but certainly looking into the future. So, kudos to Mr. Potts on all that he does, and even just putting these numbers together in a way that's coherent and understandable is a tremendous asset to us that the state over-utilizes. So, thank you for that. And Stacy Voswick is our WINN coordinator, and I neglected to do it while she was at the table, but she has been a tremendous resource for us, an asset to the Governor's Office of Economic Development. From the short time she's been here, she's really kickstarted some really great WINN programs. Some of these might have been in the hopper, but needed a whole lot of massaging to get them to Board ready, and she has jumped in with both feet and done a tremendous job in an area that is not that easy to work with when you have to have private industry and the education and our office and everybody on the same page. That's a fairly heavy lift, so kudos to her and everyone that's worked with her to get that done.

Governor -- oh, lastly, number 43, and not last on the list, but GOED filled our mining industry specialist. As you

AMERICAN OVERSIGHT

know, Sheldon Mudd, who was here today, moved on to greener pastures, and we've hired Mr. Joel Lentz [phonetic], who is our new mining specialist. He's got 35 years of Nevada mining and leadership experiencing culminating -- he was the general manager of the Newmont Phoenix Mine, and he'll be based in our Elko office and certainly a tremendous asset, I think, to the mining industry as a whole as well as to our office and finding ways we can better service that industry and that sector. With that, Governor, that concludes the Director's Report.

SANDOVAL: Thank you, Director Anderson, very thorough, and you've got a lot going on, but it's all to the benefit of so many people. So, I really appreciate, as I said before, you and your team's efforts. I really think we've established and created a national model for economic development. It's due to all of your hard work. Thank you. Any questions or comments for Director Anderson for his report? You cleared the decks. Thank you. We'll move to Agenda Item No. 11, which is State of Nevada Unemployment Rate Update. I think it is self-explanatory. It's great. If you looked at this sheet six years ago, it looked very different, and I'm very excited about the way that the numbers are moving. Any questions or comments on Agenda Item No. 11? There are none. We'll move to Agenda Item No. 12, Public Comment. Is there any member of the public present in Carson City that would like to make comment to the

AMERICAN OVERSIGHT

Board? I hear and see no one. Is there anyone present in Las Vegas that would like to make public comment to the Board?

CEGAVSKE: No takers, Governor.

SANDOVAL: All right, thank you. We'll move to Agenda Item No. 13. Is there a motion to adjourn? Is everyone too tired to even move to adjourn?

CEGAVSKE: No, no, no, we couldn't reach the button fast enough. We move to adjourn.

SANDOVAL: All right, Secretary of State has moved to adjourn. Is there a second?

BENNETT: Second.

SANDOVAL: Second by Dr. Bennett. All in favor say aye [ayes around]. That motion passes unanimously. This meeting is adjourned. Thank you, ladies and gentlemen.

[end of meeting]

AMERICAN OVERSIGHT

STATE OF NEVADA

GOVERNOR'S OFFICE OF ECONOMIC DEVELOPMENT
BOARD MEETING
July 11, 2018

The meeting of the Board of Economic Development was called to order by Governor Brian Sandoval at the Capitol Building, 101 N. Carson Street, Carson City, Nevada, 89701; and via video conference at the Grant Sawyer Building, Governor's Conference Room, 555 E. Washington Avenue, Room 5100, Las Vegas, Nevada, 89101.

1. CALL TO ORDER, ROLL CALL AND ESTABLISH QUORUM

VOTING BOARD MEMBERS PRESENT
Governor Brian Sandoval, State of Nevada
Lieutenant Governor Mark Hutchison, State of Nevada
Secretary of State, Barbara Cegavske
Dr. Weldon Havins, Director, Medical Jurisprudence and Ophthalmology, Touro University, Nevada
Mr. James Barrett, Jr., President and Founder, The JABarrett Company
Mr. Sam Routson, Chief Administrative Officer, Winnemucca Farms
Mr. Rob Roy, CEO/Founder, Switch

NON-VOTING BOARD MEMBERS PRESENT
Mr. Don Soderberg, Director, Department of Employment Rehabilitation and Training
Mr. John White, Chancellor and CEO, Nevada System of Higher Education

STAFF MEMBERS PRESENT
Bob Potts, Research Director, GOED
Michelle Sibley, Executive Assistant / HR Coordinator, GOED
Nathan Moore, GOED
Mr. Steve Hill, Executive Director, GOED, Secretary of Board
Michael Dang, Director of Business Operations, GOED
Jenn Cooper, Communications Director, GOED
Steve Woodbury, Administrative Services Officer, GOED
Melanie Sheldon, Executive Assistant / Business Development Specialist, GOED
Nichole Anderson, Administrative Assistant, Business Development Division, GOED

GUESTS PRESENT
Michael Walsh, Las Vegas Global Economic Alliance
Stacy Voswick, Workforce Development Program Coordinator
Paul Eickhoff, Senior Director of Distribution for Polaris Industries
Andrew Haskin, Northern Nevada Development Authority

AMERICAN OVERSIGHT

Paul Rostek, President, Cyanco
Scott Sheldon, EVP & CFO, G4 Works, LLC
Jonathan Jackson, Government Affairs Specialist, G4 Works, LLC
Eric Fletcher, Director of Government Affairs, G4 Works, LLC
Heidi Grey, Director of Corporate Communications, G4 Works, LLC
Sheldon Mudd, Northeastern Nevada Regional Development Authority
Blair Bigelow, Vice President of Cooperate Strategy, Bigelow Aerospace
Kylie Rowe, Vice President of Economic Development, LVGEA
Carlo Luri, Bently Heritage
Bryan Davis, Bently Heritage
Andrew Haskin, Northern Nevada Development Authority
Adam Kramer, Switch
Stan Thomas, EDAWN
Alana Anderson
June Oh
Tony Hunt
Andrew Haskin, NNDA
Shelly Long, Taxation
Leslie Hegget, Taxation
Nate MacKinnon, NSHE
Jon Morrison, NNRDA
Dane Mendial, Humboldt County
CJ Manthe, B&I
Terry Reynolds, B&I
Henna Rasul, AGO
Scott Anderson, SOS
Mr. Kramer
Mr. Klaich
Dana Bennett

2. PUBLIC COMMENT

Governor Sandoval asked if there were any members of the public present or on the telephone who wanted to provide public comment to the Board. There were none.

AMERICAN OVERSIGHT

3. GOVERNOR SANDOVAL'S COMMENTS

Governor Sandoval shared some details about a recently completed trade mission to the Basque Country in Spain. The Governor thought this mission was "incredibly productive" and included many highlights. The first of these was a visit to the company that is manufacturing the pumps for the third straw for the Southern Nevada Water Authority. There was another visit to a company that manufactures door locks that are controlled by your cell phone. The Governor saw a direct application with regard to school safety and the ability for staff and teachers, in the event of an emergency, to really have a different way to control the situation in a safe way. The Governor said he appointed a School Safety Committee, and he was excited about sharing information about these door locks.

The Governor added this mission included some great educational visits and he was looking forward to opportunities for exchanges between some of the universities there. His team also signed some memorandums of understandings, which are going to create some opportunities for both Nevada companies as well as Basque companies.

The Governor went on to describe the forum they attended that included 30 to 40 Basque companies. He told the Members about Nevada's new global program, the Nevada Global Program. The Governor said the marshal from Lubelskie in Poland brought an inbound trade mission to Nevada with several companies that are going to be coming to both northern and southern Nevada. Now that Nevada has this template with Poland, and with the Basque Country in the near future, the Governor stated he was "incredibly pleased" to see how many opportunities there were for both the Nevada companies as well as the Basque companies.

4. APPROVAL OF THE MAY 17, 2018 BOARD MEETING MINUTES

Governor Sandoval inquired whether there were any changes to be made to the May 17, 2018 Board Meeting Minutes. There were none.

A MOTION WAS MADE BY SECRETARY OF STATE, BARBARA CEGAVSKE TO APPROVE THE MAY 17, 2018 MEETING MINUTES. THIS MOTION WAS SECONDED BY MR. JAMES BARRETT. THE MOTION PASSED UNANIMOUSLY.

5. ABATEMENT APPLICATIONS FOR BOARD APPROVAL

A. BENTLY HERITAGE, LLC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

AMERICAN OVERSIGHT

Mr. Andrew Haskin, Director of Business Development for Northern Nevada Development Authority, introduced himself and provided a brief overview of Bently Heritage, LLC and abatements sought. The company is applying for the sales tax abatement, the personal property tax abatement, and the modified business tax abatement. Bently Heritage plans on producing high-quality distilled spirits from locally sourced grains and other raw materials. The distillery will operate in several historic buildings in the heart of downtown Minden. A significant part of the development budget has been allocated towards restoring and repurposing buildings that have been vacant for many years. The recent public interest and craft distilling and historical tourism is anticipated to create a hub of activity in downtown Minden. This hub is expected to draw visitors from the Tahoe Basin and beyond, which will bring additional revenues to local retailers, lodging, and dining establishments. Bently Heritage will hire an additional six employees at an average wage of $21.95 per hour with benefits. The company also plans to invest an additional $4.2 million in new equipment. NNDA fully supports Bently Heritage's incentive application and respectfully requests approval of this application. Mr. Haskin then introduced two Bently Heritage employees, Carlo Luri and Brian Davis.

Mr. Luri, the Director of Government Affairs, gave a synopsis of Bently Heritage history. The Bently family has been in Nevada for over 50 years and has started several successful companies. Today, they are focused on two things, the Bently Ranch with their grass-fed Nevada-grown beef program, and Bently Heritage Estate Distillery. When the owner, Chris Bently, started the project in 2014, his idea was to repurpose two beautiful historic buildings in downtown Minden that are the legacy of the Danberg family in the Carson Valley, the Minden Mill, the flour milling company, and the Minden Butter Company. Those two historic buildings were owned by the Bently family and had been left vacant for many years. Chris Bently had the idea of turning those into the focus of downtown Minden, which would be the new estate distillery. So, using grains grown right in the Carson Valley, Bently can turn them into high value distilled spirits, which they hope to sell not just in Nevada, but outside of the state and all over the world eventually. Mr. Luri went on to say they will be going into production later this summer and they are hoping for a public opening in the fall. With the craft distilling law on the books in the state, Bently can now invite people to their tasting room and have some limited retail sales on-site.

Bently is going to be putting in two new buildings called rickhouses where the whiskey is stored. They are also putting in a bottling line and hiring several people in sales and marketing to staff the tasting room and the facility once it opens. So, with the additional hires and some additional capital investment, Bently is asking for an expansion and additional credit on the taxes. Mr. Luri concluded his remarks by thanking everyone for the opportunity to speak before the Board.

Governor Sandoval thanked Mr. Luri and said he’s been driving by the Bently building since he was a little boy, and it's exciting to see it be developed and turned into a showcase project. He then asked Mr. Luri if they plan on production this summer, what is the exact timeline? Mr. Luri stated the interior

AMERICAN OVERSIGHT

construction is finished. All of the process equipment has been installed, and they're just waiting on a few permits to actually flip the switch and start fermenting and distilling product. Governor Sandoval asked how long it will take to go from scratch to the first product? Mr. Luri replied that it just takes a few days for fermenting and distilling. They will start with unaged spirits, things like gin. He said there are some exciting Nevada gin products made with some local botanicals, which will probably be one of the first products they offer.

Mr. Bryan Davis, also from Bently Heritage, clarified that vodka takes about eight days from beginning of harvest to getting it in the malting facility. They have to get the grain over from their ranch, carefully ferment, and finally bottle. They will have a sherry residue which will actually sit in some sherry barrels that Bently is receiving from Spain. The barrels will come over, and the residue will rest in those barrels for about eight days. Governor Sandoval expressed his surprise at how speedy the process was. He asked if the botanicals used were from Nevada, and Mr. Davis affirmed they were. Mr. Davis said Bently is constructing some greenhouses on the ranch property, so they can start growing some of those themselves. He said they are crossing their fingers for a soft opening of the tasting room and the facility in October and then have a formalized grand opening about the second week of November. Governor Sandoval again expressed his excitement about this project and asked if there were any questions or comments.

Secretary Cegavske had some comments. She said, " I had the pleasure of going to the Bently Bank in downtown Minden that you redid, and it was beautiful. It was a great, very exciting time for Minden. You did a beautiful job, and when I heard you were going to do the flour mill and the butter mill, I was really excited, and I had been watching as everything has been developing. So, I can't wait for this tour and for the open house to see everything. I'm really excited with everything that you've done. I am absolutely going to support this. I was thrilled to see that you are paying 96% of the health insurance coverage. Everything that I looked at on here, you're just a stellar group, and I want to thank you for not only what you do for the employees in Nevada, but the fact that you're using your farm and the farmland to use the ingredients for what you're making, so rock on. Thank you so much for everything that you're doing. Andrew, thank you for bringing this forward to us, and I am just really excited of what you're doing for Minden, Nevada. And if people haven't been up there and you haven't seen it, you've got to go. It's an amazing little town in itself, especially with what the Bentlys have done and are doing, thank you very much."

Governor Sandoval said, "It's an exciting day for the state. This morning, I had the privilege of being a part of a blessing ceremony at the Stewart Indian School, which was constructed in 1890 and was closed in 1980, and the state, and with the support of the legislature, has committed several million dollars to restart the restoration and complete the restoration of a cultural center and museum. Your project is happening in Minden, and it just assures that the generations to come are going to be able to see, appreciate, and enjoy these historical buildings. So, thank you for your commitment to history."

AMERICAN OVERSIGHT

Governor Sandoval asked if there were any questions or comments, and there were none. He said he would accept a motion to approve the abatement application of Bently Heritage, LLC for a sales tax abatement, modified tax abatement, and personal property tax abatement as presented in Agenda Item 5A.

A MOTION WAS MADE BY SECRETARY OF STATE, BARBARA CEGAVSKE TO APPROVE THE ABATEMENT APPLICATION OF BENTLY HERITAGE, LLC, FOR A SALES TAX ABATEMENT, MODIFIED TAX ABATEMENT, AND PERSONAL TAX ABATEMENT AS PRESENTED IN AGENDA ITEM 5A. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

B. BIGELOW AEROSPACE

- **AVIATION SALES & USE TAX ABATEMENT**
- **AVIATION PERSONAL PROPERTY TAX ABATEMENT**

Ms. Kylie Rowe, Vice President of Economic Development at the Las Vegas Global Economic Alliance introduced herself and said she was at the meeting in support of the application submitted by Bigelow Aerospace. She gave the following overview: Bigelow Aerospace was founded in 1999, and their global headquarters is in North Las Vegas. They're a space technology company that manufactures and develops expandable space station modules. The approval of this application helps our state efforts to attract other like-minded aerospace companies, including supply chain companies that would support our growing aerospace industry. Bigelow Aerospace plans to develop the only autonomous spacecraft of its kind in the world.

In this first year, the expansion will create five new jobs and at least one hundred jobs in the next ten years. These new positions start at an average hourly wage of $25, and the capital investment will be approximately $51 million over the next 20 years. Based on the job creation and capital investments, Bigelow Aerospace qualifies to pursue the aviation tax abatement. As this application meets requirements set forth by the Governor's Office of Economic Development, it has the full support of the Las Vegas Global Economic Alliance. Ms. Rowe then introduced Ms. Blair Bigelow, Vice President of Cooperate Strategy.

Ms. Bigelow supplied more details about Bigelow Aerospace:
Bigelow Aerospace has been headquartered in north Las Vegas, Nevada, for just over 18 years. We have been entirely privately funded by Robert Bigelow, who has invested hundreds of millions of dollars in developing expandable habitat technology and expandable space stations, and we have a lot of interesting things in the pipeline right now, so we are anticipating growth over the next few years to say the least. And if we are successful in the incredible endeavors that we are trying to take on, we hope that we can be a symbol to Nevada for entrepreneurship, innovation, and technology advancement, and I have to say that we are an incredibly small outfit that is trying to accomplish pretty extraordinary things.

AMERICAN OVERSIGHT

Governor Sandoval thanked Ms. Bigelow and said he had the “privilege” to tour the Bigelow Aerospace facility not long ago, and it was a really impressive operation. The Governor went on to say, “I have profound respect for Mr. Bigelow and what he has done and the amount of investment that he has made to make a dream a reality and to really take not only the state, but the country and the world to this next frontier, and he's really going to be playing an important role in just some really big things that could be happening in the history of mankind. It’s right here in our backyard, so I appreciate that.

Just a couple things to call out on the application, because this doesn't happen very often, but with the magnitude of what's happening there at Bigelow Aerospace with regard to this application, and Ms. Rowe, you mentioned that the equipment -- the estimated equipment investment is going to be $51,261,000. The next piece is the aviation part investment, which added another three digits, but it's $6,515,000,000 of investment in the aviation parts. There's an economic impact estimate of $2,098,834,589 and a new tax revenue estimate of almost $100 million over the next 20 years.

So, that is fabulous, fabulous outcome, and again, to have a resource and a company like this in North Las Vegas is really great for the state and part of what I talk about when I mention the New Nevada. So, I'm very excited about this application, and it will be given my full support.” The Governor then asked if there were any questions or comments. There were some.

Secretary Cegavske stated that the Bigelow name is well known in Southern Nevada and thanked their representatives for their impressive presentation and vision. She offered congratulations and said she would be joining the Governor in supporting Agenda Item 5

Governor Sandoval commented that another great benefit of the company is the scientists that it brings to the state. Bigelow employs the most cutting edge aeronautical and mechanical engineers there are. He asked if Bigelow had a relationship with UNLV and the engineering programs there? Ms. Bigelow affirmed a relationship with both schools and stated the company hoped to partner with both of them in the future.

Governor Sandoval asked with regard to the jobs, what would be the skillset that Bigelow would be seeking for those jobs? Ms. Bigelow responded, saying Bigelow has needs in specialized avionics, structural, electrical, and mechanical engineering. Bigelow needs the very specialized skillsets that are required for space activities.

Governor Sandoval shared that The Board of Examiners just approved $80 million for the construction of the new engineering school at UNR, and so they're going to be incredibly aggressive, and this would be an opportunity for Bigelow to have a conversation with them to get on the ground floor for the development of some curriculums that could help fill their needs.

AMERICAN OVERSIGHT

Ms. Rowe stated the Las Vegas Global Economic Alliance has an excellent relationship with UNLV. They meet with them regularly, and connect with their office of economic development. She said the expansion of this company attracts like-minded aerospace companies, and they're interested in coming here and have transferrable skillsets.

Governor Sandoval asked if there were further questions or comments, and there were none. He said he would accept a motion to approve the abatement application of Bigelow Aerospace for an Aviation Sales and Use Tax Abatement and an Aviation Personal Property Tax Abatement as presented in Agenda Item 5B.

A MOTION WAS MADE BY SECRETARY OF STATE, BARBARA CEGAVSKE TO APPROVE THE ABATEMENT APPLICATION OF BIGELOW AEROSPACE FOR AN AVIATION SALES AND USE TAX ABATEMENT AND AVIATION PERSONAL TAX ABATEMENT AS PRESENTED IN AGENDA ITEM 5B. THIS MOTION WAS SECONDED BY MR. KRAMER. THE MOTION PASSED UNANIMOUSLY.

C. CYANCO COMPANY, LLC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

D. CYANCO COMPANY, LLC – CATALYST FUND

Mr. Sheldon Mudd, Executive Director of the Northeastern Nevada Regional Development Authority, introduced himself and said he was speaking to show support for the application submitted by Cyanco Company, LLC. He gave the following synopsis: For nearly 30 years, Cyanco has been manufacturing liquid sodium cyanide at their facility in Winnemucca. This product is essential to the Nevada mining industry, as it allows for effective extraction of microscopic gold particles found at nearly every gold deposit within the state. Aside from their crucial role in the industry, they have within that 30 years provided steady employment with competitive wages. Further, Cyanco has always taken a proactive approach to safety in order to ensure safe handling and use of their product by providing safety training to not only their staff, but to their clients and to local law enforcement and first responders.

Cyanco is proposing a brand-new manufacturing facility near their existing operation that will produce sodium cyanide in a briquette form to allow for easier transport. The capital investment of this project is expected to reach $42.5 million and yield 20 new high-paying, full-time permanent jobs, which is a notable number for rural Nevada. One aspect of this project that'll be very unique to the region is that Cyanco expects to export a hundred percent of this product outside of the continental US. We are optimistic that this project will be a catalyst for other manufacturers considering expansion into our region, allowing us to

AMERICAN OVERSIGHT

meet some of our overall economic objectives as they pertain to diversification and participation in global markets.

Overall, the city of Winnemucca, Humboldt County, and NNRDA are excited that Cyanco is considering our region for this project, and we look forward to the state of Nevada joining us in welcoming this branch of Cyanco to our region.

Mr. Paul Rostek, Cyanco's President and General Manager International, described the project in a little bit more detail: Cyanco has been a proud part of the Winnemucca and Humboldt County communities for more than 25 years, and it is an excellent working relationship we have with the city and the county that drives our ownership and our management to want to continue to invest in our facility at Winnemucca. Sodium cyanide is a critical part of the mining industry. It's really the only chemical that can liberate gold and silver. When we first started production in 1990, the plot was 28 million pounds capacity. We've made significant investments over the years. It's now over 200 million pounds of capacity, but globally, the product is used in a solid briquette form.

Here in Nevada, the mines would prefer to take the product in liquid form. It's easier to handle, it's safer, and it just is a much better product in liquid form if you can economically deliver it, and we can out of our Winnemucca facility to the high concentration Nevada mines. What we're looking to do is put in a solids capacity so that we can expand our ability to market the product out of the Winnemucca beyond Nevada and the US and overseas, Mexico, Canada, and beyond. The evidence that we are a safe company and we take sustainable operations very seriously, it's been more than four years since we've had our last OSHA recordable, six years since we've had our last lost time injury, and over the history of our company in Nevada, we've delivered more than two billion pounds of product safely without incident. We put on annual training exercises for mines, for the first responders, and having a safe operation is license to operate in our opinion.

The $42.5 million capital investment we spend over the next two years, look to start up operations in early 2020, and generate 20 full-time jobs, 16 of them qualified operators. The others will be engineers and professionals, and then during the construction phase, it will also provide a significant amount of temporary employment, and beyond that, local employment in the supply chain side of our operations. Mr. Rostek concluded by saying Cyanco looks forward to continuing their reinvestment in Winnemucca in Nevada.

Governor Sandoval thanked Mr. Rostek and Mr. Mudd and had the following to say, "This is an exciting opportunity for Winnemucca and for Humboldt County. This is a really big deal, and to have 20 high-quality jobs at $44 an hour that are sustainable, it will be long-term and something that they can build on. You know, it's not often that we get the letters that we have here in the file for local support, so I know there's a lot of momentum and support locally to get this done. I'm not going to ask questions with regard to any of the numbers that are in the application because they're so strong. I mean, the job creation is 233% over the statutory requirement. The average wage 103% over, equipment cap X,

AMERICAN OVERSIGHT

306% over." The Governor then asked when would Cyanco make their decision as to whether to locate in Texas or in Winnemucca?

Mr. Rostik answered, "We anticipate making the decision very quickly. We are seeking some additional incentives here in Nevada, which would be very helpful to us, and we're still waiting the outcome of those discussions. But as I say, we have been in Nevada for 25 years. We own that facility and the property. Our Texas facility, we are a manufacturing facility on someone else's site, and we've been in that property for about seven years. So, our hearts are here, and we would like to make this happen."

Mr. Klaich said the Board has often been admonished not to forget rural Nevada. So, when two of the first three opportunities on the Agenda deal with communities of Minden and Winnemucca, it's very exciting to be able to participate in these votes. Mr. Klaich lent his full support.

Secretary Cegavske thanked the Cyanco representatives for bringing this forward to the Board. She agreed that Winnemucca is a great little town, and she knows they'll really appreciate Cyanco's presence in their communities.

Mr. Kramer queried why Cyanco would choose to grow in Winnemucca rather than anywhere else in the world. Mr. Rostek responded, "We've enjoyed 25 years of very successful business within the Nevada mining industry, and our existing capacity is, in a sense, landlocked unless we build this solids plant. By having this solids production, it will mean that we can always run the plant at full capacity and ship out whatever isn't needed in Nevada to global markets. It also provides the underbidding of a possible further expansion down the road. Currently, we have two solution trains. By putting in this solids plant, if the Nevada mining requirements increase, we can put in a third train and convert any excess into solids and ship it globally. So, it has a much broader strategic importance company than just the initial solids plant. It can be the launching pad for further expansions in Winnemucca."

Mr. Kramer asked how do the solids work when it ships? Mr. Rostek explained the solution product is 70% water, and so shipping to places like Siberia or Africa is costly. Shipping that amount of water is very expensive, and so we make the briquettes. They look a lot like charcoal briquettes, just whiter. So, we can put them in all sorts of packaging and move it overseas much more economically without shipping the water. When it gets there, they just dissolve it, use it in the liquid form.

Governor Sandoval asked if the liquid form used in Nevada mines was manufactured in Winnemucca or is that manufactured somewhere else? Mr. Rostek supplied these details: 100% of the Winnemucca mines are using solution out of Winnemucca, and the reason they can do that is because they can put it into tankers, and it's a relatively short and economic transportation cost. Mr. Rostek went on to say, "We were the first company that really located its manufacturing close to the mines rather than what most people do, and we did in Texas is we put our solids plant in Texas close to the raw materials, and then we ship it out

AMERICAN OVERSIGHT

to the mines, but that means you have to do it in solid form. But it's much easier for the mines if they just have a truck turn up when they need it, offload it into their tanks, and they don't have to handle it or deal with it. They just apply it to the ore."

Dr. Bennett said, "Cyanco has been a tremendous community partner in northern Nevada in the town of Winnemucca and certainly engaged here in Nevada and a vital partner in the Nevada mining industry. I'm very excited about this application, but I am going to be abstaining on the vote. Cyanco is a member of my governing board of directors, and so because of that, I think it's best that I abstain, but it's a tremendous project and a great application."

Governor Sandoval asked if there were any questions or comments, and seeing none, he moved to Agenda Item 5D, Cyanco Company, LLC – Catalyst Fund.

Dr. Anderson reported that they were trying to work with the county on some other options as far as what the county can offer versus what the bandwidth is. This application from the county is for Catalyst Funds, and so he's certainly happy to weigh in with his approval, although he's a non-voting member at this juncture. But Dr. Anderson said he thought it was entirely appropriate given the wages for the jobs and the quality of jobs, and again, the longevity and history that Cyanco has here in Nevada.

Governor Sandoval asked if there were any questions or comments and there were none. He said he would take two separate motions. The first motion would be a motion to approve the abatement application of Cyanco Company, LLC for a sales tax abatement, modified business tax abatement, and personal property tax abatement as presented in Agenda Item 5C.

A MOTION WAS MADE BY SECRETARY OF STATE, BARBARA CEGAVSKE TO APPROVE THE ABATEMENT APPLICATION OF CYANCO COMPANY, LLC FOR A SALES TAX ABATEMENT, MODIFIED BUSINESS TAX ABATEMENT, AND PERSONAL PROPERTY TAX ABATEMENT AS PRESENTED IN AGENDA ITEM 5C. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

Governor Sandoval noted that Dr. Bennett abstained from the vote on 5C. He asked for a motion on Agenda Item 5D, a Catalyst Fund application in the amount of $100,000 for Cyanco Company, LLC.

A MOTION WAS MADE BY SECRETARY OF STATE, BARBARA CEGAVSKE TO APPROVE THE CATALYST FUND APPLICATION IN THE AMOUNT OF $100,000 FOR CYANCO COMPANY, LLC AS PRESENTED IN AGENDA ITEM 5D. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

Governor Sandoval reminded Members that Dr. Bennett abstained from the vote on Agenda Item Number 5D.

E. G4 WORKS, LLC

- **AVIATION SALES TAX ABATEMENT**
- **AVIATION PERSONAL PROPERTY TAX ABATEMENT**

Mr. Michael Walsh with the Las Vegas Global Economic Alliance introduced himself and gave the following overview: G4 Works is requesting the aviation sales and use tax abatement and the aviation personal property tax abatement. They will hire seven new employees within the first 12 months of operation with an average wage of $20.52. Their 20-year estimated capital equipment investment expenditure on equipment and aviation parts will exceed $99,500,000. This application has the full support of the Las Vegas Global Economic Alliance. G4 Works, LLC operates as a subsidiary of Allegiant Airlines founded in 1998 and now is one of America's premiere ultra-low-cost carriers. Today, the company employs over 1,400 full-time employees within Nevada and supports over 3,800 jobs across the state. Allegiant is proud of its commitment to support local communities and has been part of the Make a Wish family nationally for more than five years, having provided more than 1,000 flights to wish destinations, raising funds through on-flight sales and supporting Walk for Wishes events across the country. Through the expansion effort and new facility, G4 Works, LLC will help to continue growth of Allegiant's business and community footprint in southern Nevada. I'd now like to turn it over to Mr. Scott Sheldon and Jonathan Jackson to answer any questions that you may have and to explain the project in further detail. Thank you.

An unidentified speaker from G4Works continued: G4Works is the premier low-cost carrier in the United States. We've had the privilege of calling southern Nevada, and specifically, Las Vegas home since late 2003. Our headquarters are out in Summerland. We occupy roughly 230,000 square feet. It's really an exciting time for our business. For those of you that are familiar with the brand, historically, we've been an all MD-80 operator. We're nearing the tail end of a complete fleet transition from an MD-80 operator to an all airbus operator, and with that comes a lot of network configuration changes. What that is going to entail is we're going to use Las Vegas a launching ground and support base for basically all of our western destinations, and so it's a good time to look at how structured the business -- historically, we've used Arizona as both the teardown facility for our own MD-80 fleet in addition to our parts support. It's an opportunity for us to really look at, you know, continuing to partner with and enhancing what we do here in southern Nevada.

As you can imagine, we are very much involved with the community. We partner with local colleges, UNLV in particular, offer internships. Eric, who's one of my colleagues, is a former UNLV alumni. We very much support the strategic initiatives such as the Silver State Works and the workforce connections that allow us to tap into a highly qualified talent pool here in southern Nevada.

AMERICAN OVERSIGHT

Governor Sandoval asked what's the skillset of those new jobs that'll be created as a result of this application? The speaker responded: It's going to be a combination from anything from parts clerks, but also to technical purchasing skillsets. So, some of these are previously engineers. If you look at the components on an aircraft, anything from power plant engineers, avionics engineers, structural design engineers, we're currently in negotiations with our mechanics that are represented by the teamsters and their application, and technically, they're employees of a legionnaire. So, that's more or less a discussion about scope, but a lot of the technical expertise that you would expect and how you procure parts and determine work scopes could be exploited through G4 Works.

Governor Sandoval asked if this were approved, would the company be doing the maintenance on their new western fleet in Las Vegas? The speaker responded, "All the parts and tooling support would be through Las Vegas, all of our spare aircraft that we've used to support recovery efforts throughout the western hemisphere. We currently serve 21 destinations. Basically, half of our flying is on the western part of the United States. So, the parts and tooling support would be housed out of Las Vegas."

Mr. Kramer said he commended the Governor, and Director Anderson, when he was the legislator, for actually passing the legislation for the aviation. Mr. Kramer said he thought this was exactly what the intent was, to have a company like Allegiant bringing more of their operations and more of their jobs back here to Nevada and continuing to grow.

Governor Sandoval concurred saying, "That was exactly the essence of the legislation that we signed, is we were missing on a big part of business, and respectfully, to Arizona. And with this legislation we've had the opportunity to bring and expand several other companies in our state, and so it really has driven economic development exactly as what was intended. We're very proud and pleased that Allegiant has chosen Las Vegas and Nevada for its headquarters. It is a big source of pride for our state, and this is an important project that continues that legacy. So, again, that was a very, very important bill, and Nevada was missing out on a big piece of business in terms of not being competitive with our neighboring states. So, thank you."

The Governor asked if there were further questions or comments, and there were none. He said he would accept a motion for approval of the abatement application of G4 Works, LLC for an aviation sales tax abatement and aviation personal property tax abatement as presented in Agenda Item 5E.

A MOTION WAS MADE BY DR. BENNETT TO APPROVE THE ABATEMENT APPLICATION OF G4 WORKS, LLC, FOR AN AVIATION SALES TAX ABATEMENT AND AN AVIATION PERSONAL PROPERTY TAX ABATEMENT AS PRESENTED IN AGENDA ITEM 5E. THIS MOTION WAS SECONDED BY DR. HAVINS. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

6. ABATEMENT APPLICATIONS FOR DIRECTOR APPROVAL

A. FIGURE TECHNOLOGIES, INC.

- **SALES TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

A representative from EDAWN spoke in support of the application for Figure Technologies, Inc. and provided these details: Figure Technologies is a financial technology company that leverages block chain artificial intelligence and advanced analytics for consumer products, consumer credit products. They're bringing in about a quarter of a million dollars in capital equipment. They'll start with 65 employees with an average wage over $30. At the end of five years, there will be 240 plus employees. The representative then introduced June Oh, the COO of Figure Technologies.

Ms. Oh gave this overview: Figure Technologies is a new company. We incorporated in January. We are a financial technology company. We are a block chain company, not to be confused with the speculative Bitcoin, Ethereum, Ripple. Block chain is a phenomenal technology if you have the right use case. So, we are building -- and what block chain really is, is a technology that will cut out third party economic grant seekers and makes processes more efficient. So, our application of this is for loan securitization, whole loan sales, and loan warehousing, and to that end, there's many companies that you'll hear about who are working on block chain technologies.

What we found is that everyone will want a prototype for five to ten years, and so what we decided is that we would build a lending company to originate loans to put on the block chain, kind of prove the concept, and then we would push it out. So, what we are building is this block chain, and then on the other side, we're building a lending company, and we've done this in the past, and were relatively successful. And what we look for is gainful opportunity, which we see in the equity release products out there. So, our first product is the modified HELOC, and then we'll work on a sell-and-stay type product for retired people who are underfunded for retirement, but they have a ton of equity in their home. And so the company itself is really a company that we like to think of as innovative and cutting edge. We push the envelope in terms of what we want to do, and we push people to think that way. We are a company that treats our employees well. We have 100% health insurance for them and their families, and we continue to add benefits for employees. Right now, we have 80, and we haven't -- we've had many conversations about the fact that we haven't yet quite launched and we don't have revenues. We got to kind of slow that down a little bit, but we are planning to launch at the end of July, which is very quick. I mean, we really built it in about four months from a technology perspective. So, we had to make sure it works.

We need to move into another state. California is very expensive, and we are looking to streamline the process for our customers. So, one of those things in the mortgage world that's very difficult are the notaries, right? A lot of times you have to sit in front of somebody and sign a document in front of somebody and they take a thumb print. So, what's happened is the electronic notary has come about, and Nevada as a state has -- on the

AMERICAN OVERSIGHT

cutting edge, which we love -- has passed a statute that allows for remote notary for all states, and you're one of three states that allows this, Virginia, Texas, and you guys. And we like Nevada for its proximity, and when we came to visit Reno, EDAWN was phenomenal in their sales pitch of Reno.

Our company was very impressed with what Reno has done, and in general, we're very impressed with the local and state government in terms of their commitment to the residents of this state. I think that's refreshing. I think that's awesome. I don't hear much of that in California. They just like to keep taxing us. So, I think that, you know, the transformation of where Reno has come and the commitment to their residents is a place that we'd like to be, and incentives are excellent and really important to us, because we are a new company, and while we're well-funded, we're pushing the envelope on many different fronts. We also were talking to Washoe County on our property title project which we want to put on block chain.

Governor Sandoval asked what skillsets they would be seeking for job applicants, and how many of those positions will be relocations? Ms. Oh had this to say: We are open to moving our headquarters here. You are an incredibly friendly state in a lot of ways. It's beautiful. So, before we make that big decision, we would have a variety of people who go into customer service, and there's a lot of UNR grads, for example, who are looking for opportunity and love what we're doing, and they're in as customer service. And so what I've told them is we would love to provide lots of different paths for you, and we are building wealth management. We're going to have an asset management arm.

So, there's a lot of opportunity for a lot of different ways they can go. What I see in front of them is potentially certified financial planning certifications or registered investment advisors so they can actually give advice in our wealth platform because they want to be on the phone with customers. We are looking to hire marketing people here. We are looking to hire engineers because of the new building, because there's always a shortage of engineers. So, we are open to hiring all parts of our company here and grow it and be completely committed.

Governor Sandoval was pleased that Figure Technologies already had that outreach with the university. He encouraged the company to reach out to UNLV as well. Ms. Oh said the company has already hired 13 people in Reno. She went on to say: There is one little thing that is right at the finish line and right about -- after this hearing is we just need a little bit of a tweak to the notary statute, because what we are all about is we are about customer, employee, and investor, and so we like to make our process as simple as possible for our customers and employees. You know, we never say the customer is always right. If a customer calls in and starts screaming at our employee, that's not okay. So, what we're asking for is really just something that will help make the process really simple and not aggravating for the customer. So, that's a point that we are working on.

AMERICAN OVERSIGHT

Governor Sandoval complimented Figure Technologies for the benefits they provide their employees. He said, “It’s extraordinary and really helps with the quality of life, and I appreciate your kind comments about the state as well as the region, because that's something that we've really endeavored to foster through the years. And to have a company of your caliber, and frankly, breakthrough company to see Reno and see Nevada as a place where you think you can grow and thrive is a great outcome.”

Ms. Oh said Figure Technologies likes to get involved in the community, and gave an example of their engineers in Montana who volunteer to teach classes at the University. She said they get involved in the community, especially in the smaller population states, because there's a lot of opportunity for them to help.

Mr. Kramer commented that this was a fantastic application, and he is thrilled to see growing in Reno. He said northern Nevada has a reputation on innovation with block chain technology. He also gave this suggestion, “I hope that you have a chance to connect with a company called Filament. It's one of the startups that's doing some incredible hardware work on block chain technology that's about as innovative as anything you'll see in the world happening right downtown at the post office in Reno, and make sure you can connect with them.” He then asked, is this more like creating smart contracts utilizing the block chain or is it securitization of assets with block chain technology?

Ms. Oh had the following response: So, the thing about block chain is it's about encryption, right, and it's about immutability. So, what you want to put on the block chain itself is something that's not going to change, and you need chain of custody, right? So, that's why property title is a great use case for this, because they already do chain of custody. So, in our case, the loans going onto the block chain, you have, like, a genesis loan packet that you put on there of everything that happened in the application, and then from that point on, you add on -- it's always an append. You never update. So, you append the funding. The funding actually happened, and there's proof that it happened. So, you don't listen to a lender that says they funded the loan when maybe they didn't. So, it sort of cuts out the malfeasance and the fraud, and then every time the borrower pays, that gets appended to this record. And so if you wanted to, as a borrower, you could see the entire record of what happened to this loan, and that gives the buyers and the rating agencies a lot of transparency that they don't have today.

Like, today, if they wanted to see performance of loans, they'd have to go and ask the servicer, and it might take a week to get them that report, and so this gives them a way to -- for loans that they own, they can -- they can go in and check the report or they can check the loans anytime they want. So, securitization really is a process where you have an underwriter, an auditor, a custodian, a trustee, a lawyer. So, you have all these people that take economic rent, and this technology takes it away, because you don't have to re-underwrite the loan, because you can see the loan that was underwritten in whatever credit box that we were told by the originator, and you can see that that happened.

AMERICAN OVERSIGHT

A lot of times the originator makes mistakes. Everybody makes mistakes, and so we might re-underwrite the loan before it comes onto the block chain and see that it was underwritten outside of that credit box. So, we're not going to stop it from going on the block chain, but what will happen is the buyer will see that it's not under the credit box, but it's still a performing loan, so they'll bid a lower price for it, right? And they'll still buy it because it's performing, but they can get it cheap because it was a mistake.

Mr. Barrett said, "First of all, I appreciate the compliments about Nevada, wonderful, and do we have a de facto endorsement from you that we could use in an advertisement? I appreciate that. It's really resounding to hear that over and over, and I think with the recent tax law changes, it's even more in demand for us to come here. So, thank you for that. In regards to the company, is the company involved in lending? Is it a bank, is it a lender, or is it a servicing company, technology serving company?"

Ms. Oh responded, "We are a lender, so we will be originating loans. Right now, we are doing near-term servicing, which means that we are taking payments, and we will ultimately build out an entire servicing system and bring servicing in-house, because servicing has also had a really bad reputation in terms of treating the customers poorly, so we want to do a better job with that. So, we would like to take over the entire chain of it. So, that's one part of the business. That's Figure Lending, and then you have Figure Technologies as the holding and then the block chain pieces, and then you have asset management and wealth, and we don't really do small companies. Figure Lending is our lending arm, and we will -- there will be a lot of revenue generated from the lending arm. Asset management and wealth are other parts of the business that will be under Figure Technologies holding company, but will be a different part of the company, different entity."

She went on to say, "We are not a bank charter. We do not have a bank charter. We are state-by-state lending, a non-bank lender, if you will. So, what we do is we apply to all the states that we need to for lending licenses. We did put our application in for a Nevada license, but we haven't received the license yet."

Governor Sandoval queried Ms. Oh about their application for the license and asked how long had they been waiting? When Ms. Oh told him that they had been waiting since May, the Governor said his office would check into it.

Governor Sandoval asked Ms. Oh with regard to marketing, to whom would they be marketing to in terms of future customers? Ms. Oh responded, "This is our consumer marketing arm. We have a business development that will bring on the members of the block chain meeting. We'll have other originators on and buyers and sellers and rating agencies on the other side. So, when I say marketing right now, that's consumer marketing. So, we need brand people. We need digital marketers. We need people who understand how to market."

Director Anderson said he would put on the record as well that the County is working on the Catalyst Fund application. He said, "We expect that to circle back for the September

AMERICAN OVERSIGHT

meeting. I think just logistics-wise, we didn't get that application -- they hadn't presented that to us in time for this meeting and as well as the WINN program and looking to help pipeline some qualified employees to the marketplace in general, but specifically to the block chain industry. This one, too, because it is a financial institution as determined by you and the Department of Taxation, modified business tax is not abatable in this application, which is partially why we're doing the Catalyst Fund, but also because of great jobs that you're creating. So, we're certainly excited to see that application move forward. As the Governor has mentioned several times as we look at the New Nevada, creating a very diverse workplace, diverse workforce, and diverse employment center is key. It's one of those things that we look at, what is going to be a catalyst for sustainable growth, an innovative, disruptive company likes yours, and a good disruption, not a bad one, based on really cutting-edge technology.

There is a technology that is a platform for so many different use cases, and I think the use case that you've identified seems very applicable and becomes a consumer-driven or a cost-saving measure as well as a protection measure for the consumers as well. So, I'm excited to see the outcome there, but it's also very knowledge-based and entrepreneurial. While it may be one use case if we look at the general marketplace, we look at a very great opportunity to see entrepreneurs spin off with other use cases and opportunities that every innovative company tends to produce, right, smart people that come up with more ideas and keep generating that, and so we're excited to see that I think. In Nevada as a whole, we certainly see that driving in both Las Vegas and Reno. So, we're excited you're here, and excited to see the outcome and the growth of what you have to build and the excitement of what that means to our economy."

Governor Sandoval offered his congratulations, and said that up next was Agenda Item is 6B, Polaris Industries, Inc.

B. POLARIS INDUSTRIES, INC. – Catalyst Fund

Mr. Andrew Haskin, Director of Business Development at Northern Nevada Development Authority stated he was at the meeting to present Polaris Industries for the purpose of seeking state Catalyst Funds as part of the company's expansion into the state of Nevada. He presented this overview: For more than 60 years, Polaris Industries has been making high-quality, breakthrough products. The company has grown into one of the world's largest powersports companies. Today, Polaris offers a diverse portfolio, best in class brands, and has grown to become a global powersports leader, providing some of the bestselling brands in the industry, including the RANGER utility vehicles, RZR recreational side-by-sides, and Indian motorcycles.

Polaris Industries will be establishing a new western United States distribution center in Fernley, Nevada. The company currently has existing distribution centers in Ohio and South Dakota, but is looking for western United States presence to maximize efficiency and deliver speed to the company's customers. The company intends to invest $34 million to

AMERICAN OVERSIGHT

construct a new 475,000-square-foot facility, invest $13.6 million in capital equipment, and add 64 new jobs with an average wage of $21.95 per hour.

Paul Eickhoff, Senior Director of Distribution for Polaris Industries gave a brief refresher overview of their dynamic project: Polaris Industries is an industry leader in powersports equipment. We were founded in 1954 in Minnesota with a focus on snowmobiles. Over the last 60 years, the company still manufactures snowmobiles, but we now offer products such as ATVs, motorcycles, and after-market parts, and as of last month, a boat company also. Our product offerings include premium brand names such as Indian motorcycles, Rubicon, Smittybilt, Transamerican Auto Parts, Slingshot, along with Polaris brand vehicles.

Polaris is committed to being a highly customer-centric, efficient growth company. We relentlessly pursue product superiority, safety, and value improvement. Our success would not be possible without the 11,000 employees worldwide. We offer employees competitive wages with benefits. In addition, we offer bonuses and stock options. Now that you've heard an overview of the company, I'd like to discuss this exciting new project in western United States. This project will consist of brand-new 475,000-square-foot distribution center in Fernley, Nevada. We anticipate hiring approximately 64 employees over the next 24 months as a part of the project with the potential of reaching 100. The estimated average wage for these employees will be $21.95 per hour with benefits which include medical, dental, 401K, merit increases, and the opportunity for bonuses and stock options. The investment is an estimated $47 million in real and personal property, and we anticipate the facility being operational in Q2 of 2019. We truly appreciate being considered for the Catalyst Fund, and we look forward to a continued partnership with the state of Nevada, Lyon County, city of Fernley.

Dr. Bennett stated many of his friends have Polaris RZRs, and they've been zipping around, and all are very happy with those products. He added it's nice to be able to call that a Nevada company now. Dr. Bennett believes that there are more primary jobs being created in the rural counties with the Agenda today than in the urban counties, and he thinks that's very exciting. It's because of companies like Polaris who have seen the potential in Nevada and are willing to make that investment.

Director Anderson concurred and said this was a "great win" for Fernley. He complimented Polaris for making that decision, and added, " I think it's a wonderful community, and it's a feather in their cap as well, and I think you'll see that pride of community reinforced as you guys continue to grow and develop there. I have to give a thank you and a shout out to Lyon County as well for working with us and our office to make sure we got this Catalyst grant done. Again, it's a pleasure to have you in the state of Nevada and I'm happy to approve the Catalyst Fund application."

Dr. Anderson added, "Polaris was one that came in with the initial application, and I also need to give you guys some great thanks for working with us on that wage scale. In a distribution center, that's a big driving decision factor when it comes to the cost of wages

AMERICAN OVERSIGHT

and personnel, and you guys are producing some great jobs there, and we look forward to seeing continued growth."

Governor Sandoval noted that the Agenda for today's meeting was "very impressive." It went from distilled spirits, to aerospace, to cyanide in mining, to aviation, to block chain, to an international distributor all in one meeting. The communities covered were Las Vegas, Minden, Fernley, Winnemucca, North Las Vegas, and Reno. He confirmed that this was exactly what they contemplated when they built the Governor's Office of Economic Development. When asked what is the state doing for rural Nevada, they can report three very significant projects that are going to help communities in Douglas County, Lyon County, and Humboldt County.

Governor Sandoval said they would move to Agenda Item Number 7, Workforce Innovation for the New Nevada (WINN) Fund Program for Board Approval, the Ratification of the SNAP Pilot Program.

7. WORKFORCE INNOVATION FOR THE NEW NEVADA (WINN) FUND PROGRAM FOR BOARD APPROVAL

A. RATIFICATION OF SNAP PILOT PROGRAM – Requesting funding for pilot program, not to exceed $210,000 – approved by Director at March 15 Board meeting, now to be approved by Board.

Director Anderson said this item was on the last Agenda, but the dollar amount exceeded Director approval. Today would be sort of a ratification of the program that was already discussed. The Director introduced Stacy Voswick, Workforce Development Program Coordinator.

Ms. Voswick gave the following report: This is phase two of a project that's already been approved as well. Western Nevada College was the primary education provider in phase two with an initial plan to serve 20 individuals on SNAP, or food stamps commonly referred to. This phase two came to us as an expansion to add 100 spots based on the success. So, that first phase for Western Nevada College, they over-enrolled. So, there is obviously a need and an interest and demand in that area. This second phase is looking at 100 individuals. Both Truckee Meadows and Western Nevada College are in the process either ramping up or getting those programs going here in July. So, we'll see more robust data on how that program is going come next quarter. So, around October, we'll have more data on that as well, but I think one of the things that I really wanted to stress and highlight is looking at these pilots and looking at how our investments with state funds can basically expand these opportunities.

One of the reasons that this project came to us and through WINN funding is that when you utilize state funding or local funding in investments and providing training to recipients of SNAP, that opens up, unlocks federal investments back into those educational institutions to expand opportunities for program development and meeting the demands for local

AMERICAN OVERSIGHT

employers. So, not only is that done here within the pilot, but it's also creating a platform for us to do that for every WINN project.

Governor Sandoval asked if they anticipate running the program into southern Nevada as well with CSN? Ms. Voswick responded, “That’s part of what I wanted to stress, is that with the projects that we funded both in manufacturing skills and also with our technology and health projects that have recently come before this Board is using that platform and integrating it into those projects, and so that process is already undergoing.”

Governor Sandoval closed out his remarks by saying this was a great program that gives individuals an opportunity to get into the workforce. These are candidates that otherwise may not have had an opportunity to get training like what will be offered through this program. He asked if there were any more questions or comments, and there were none. He then said he would accept a motion for approval of the ratification of the SNAP Pilot Program as presented in Agenda Item Number 7.

A MOTION WAS MADE BY MR. BARRETT TO APPROVE THE RATIFICATION OF THE SNAP PILOT PROGRAM AS PRESENTED IN AGENDA ITEM NUMBER 7. THIS MOTION WAS SECONDED BY DR. HAVINS. THE MOTION PASSED UNANIMOUSLY.

Governor Sandoval moved on to Agenda Item Number 8, Workforce Innovation for the New Nevada Fund Program for Director Approval, Growing the Nursing Workforce to Improve Population Health Outcomes and Create Jobs in the State of Nevada.

8. WORKFORCE INNOVATION FOR NEW NEVADA (WINN) FUND PROGRAM FOR DIRECTOR APPROVAL.

A. GROWING THE NURSING WORKFORCE TO IMPROVE POPULATION HEALTH OUTCOMES AND CREATE JOBS IN THE STATE OF NEVADA
Request for approval to enter into a WINN Grant agreement not to exceed $90,000.

Ms. Voswick said this item would be coming back in a revised form for the September meeting, because there were more employer partners being added into the project. Members will see the expanded application at the next Board Meeting. Governor Sandoval said that being the case, they would continue Agenda Item Number 8 until the next regularly scheduled meeting in September.

9. PERFORMANCE MEASURES REPORT Bob Potts

Bob Potts, Research Director at the Governor's Office of Economic Development walked Members though the performance report, what the agency has been up to, and economic development agencies across the state through the second quarter of 2018, of this year. He provided he following details: This report is a little bit different than those that I have presented in the past. We have Board meetings every other month, and I do metrics on a

AMERICAN OVERSIGHT

quarterly basis. So, generally, I present the first quarter metrics at the May meeting, but because we had such a full Agenda at the May meeting, I decided to put it off until July. But because we had so many companies at the May meeting, I thought, you know, I need to include all that information in as well. So, I've tried to highlight throughout the report the dates so everything is consistent there, but also as I walk and talk you through this report, the different timing, okay?

On the first page, the dashboard, everything on there is as of the first quarter of 2018. That's so we can do apples to apples comparison between what happened in the previous quarter, the fourth quarter of '17, as well as against the first quarter of 2017 last year. If we go to the next page, this is where we get into the business development side of things. So, this includes everything that's happened through June except for the non-incentivized assisted companies, because the RDAs have until the middle of the month following the end of the quarter. I don't have all that information yet. So, everything I talk about here is going to be conservative. The good news is, is everything is really good without those being added in there, so it can only get better.

If we look at the job side of things, so if we look at the first six months of this year ending in June, year to date, 2,294 jobs. That's a two-year estimate. That's an 18.5% increase over what it was the same period last year, 35 companies, 9.4% increase over what it was last year. If we look at the 12 months ending in June, current job counts, the two-year out and the initial jobs, 6,372. That represents a 19.5% improvement over last year the same time, 77 companies, 13%. If we look at the buildout job numbers of those jobs through the first six months, they add up to 11,325. That's a 32% increase over the 12 months ending last year in June. Okay, if we go down and look at the companies over the last six months that we've assisted, those 35 companies, most of them are manufacturers, almost evenly split between manufacturers and logistics companies. Eleven percent of them were technology companies, and then it was split across -- the 20% balance was split between our other target sectors.

If we look at the wages paid, big bump up. Average wage is $28.59 for the first six months of the companies that have been brought in. That's a 37% increase over what it was the six months -- in the first six months of 2017. The table at the bottom, I'm only going to talk about the bottom row on the lower left where we talk about the annual assisted companies. If you look through June, we've just about -- we're almost double of everything in 2017. Initial jobs is a little bit behind, but where the big bump up is on capital investment. We're already $133 million above on cap X compared to what we were last year over the first six months. So, that's a big bump there.

For the contract and actual jobs, there's some added information. This is new incentivized companies so I can track over time what the abated companies, what they have on their contract amount and what they're actually doing, going back and look at DETR's records. And I put in there all years actual above contracted is 6,142. That's 44% -- the actual job counts are 44% above what they were contracted to do. So, they're outperforming all the abated companies. I wish there were a way that I could track local companies that are

AMERICAN OVERSIGHT

expanding. I can't do that because DETR doesn't delineate when jobs come online, but this is a solid indicator of what -- the companies that are getting abated, how they actually perform.

For capital investment, the stock chart shows that's the capital investment of large-scale projects. So, it doesn't include like Tesla. It doesn't include like Apple or Boulder Solar Power, also doesn't include aviation and data center abated companies because they're structured so differently. So, for comparison, so through June, we've had $329.8 million in capital investment. Roughly half of that $175 million, was in the first quarter, $155 million in the second quarter. So, it's kind of split there on the capital investment, but big capital investment, even if you pull out the aviation and data centers. If we go over to the aviation and data centers in the first quarter, two companies applied for the aviation abatements with a total capital investment of $186 million. On the data center side, we had one company that applied for a data center abatement in the first quarter with capital investment of $18.6 million, and then I'll have more after this meeting to add to this chart.

I relied on the RDA information for the pipeline report. You can see that there's a big bump up in new leads, prospects, and our WINNs are also up. I mentioned earlier that for the first half of the year, we assisted 35 companies, which will go up once I get the RDA reports back, but just looking at the first quarter, there were 23 WINNs, okay, in the first quarter. We move from 108 to 165 leads from the fourth quarter to the first quarter. Leads are up 92% over what they were a year ago. Prospects are up 38.5% of what they were a year ago, and WINNs are up over 53% of what they were a year ago.

International Trade Division report highlights Nevada Global and the collaboration that they're putting together to help provide a landing spot for foreign companies and workers. And then the trade mission to Spain in the Basque region was phenomenal. When I talk about the global recruiting pipeline, I'm talking about active leads because of the amount of time it takes to convert an international opportunity to a real WINN, and what I do is I pull out those that have become inactive. So, currently, we have 46 active leads after removing the inactive ones with an additional ten that we're throwing in. We have 12 prospects right now with two new ones after removing those that have been inactive.

The International Trade Division had a lot of activity going on in the first quarter at a very high level, spent quite a bit of time in consumer electronics show that led to relationships with Netherlands, Mexico, Quebec, and it also built into an inbound site visit with Turkey, looked at some sites. They also hosted some delegates from South Africa to talk about trade opportunities and to prepare for the upcoming trade mission. They also facilitated an inbound trade delegation from Canada talking about advanced industries and innovation and a number of things in that space. They also had a visit from the Embassy in Spain talking about the Smart Cities Program and some of the current projects and challenges that are faced on the infrastructure side of things. And lastly, seven STEP grants were awarded to help small eligible businesses with their exporting.

AMERICAN OVERSIGHT

Going to the Procurement Technical Assistance Center, it's having a very successful year. In fact, two quarters into their fiscal year, they were already ahead of all the performance metrics for the previous full year, but through the third quarter, their number of contracts are up by 43.5%. The contracts amounts are up by over 125% over what they were last year's total. So, nine months against 12 months, and they still have that kind of improved performance. The number of clients slipped slightly in the fourth quarter -- or in the third quarter of their fiscal year down to 1,454. So, annual growth slipped slightly in the third quarter, but they're still well above their long-term trend. I asked Joan Ruben, the Director in our office that runs PTAC, and she says it's because of the coordinated effort with, like, business and industry, the Small Business Administration, with Small Business Development Center. And then she also believes that a lot of the free training seminars and things that they put on make a big difference.

Looking at the Emerging Small Business Program, they report on a semi-annual basis. So, we have all the 2017 stats now for the Emerging Small Business Program. Currently, there's 1,139 total businesses certified in the state to do business with state and the urban local governments. That's up about 31% over 2016. If you look at the number of businesses that have been solicited to submit a quote, bid, or a proposal on a contract, that now stands at 1,431. That was a huge jump, 335% over what it was last year, and that's largely because of the Clark County School District had a huge marketing campaign. So, a lot of contracts solicit out there.

The contracts awarded were up by 4.3% over 2016. There were 1,015 contracts awarded in 2017. The amount was up by 7.9%, bringing the average up to 3.4% on the contract amounts on the ESB. So, they've grown every year since their inception from the 2013 legislative session.

Going over to the Film Office, I got all this latest data through June from the Film Office. They reported an additional 103 productions, bringing the fiscal year total to 333 with total local production spin in the state of over $50 million. In the table on the left there, I had 2018 YTD. You can get rid of the year to date, because it's a complete year's worth of data that they have there. The projects down below at the bottom table, those are the significant projects where there was more than a million dollars spend in the state as well as what those project types were. I also have the last two quarters of responses from their customer satisfaction survey and every response was very good. So, they hit the ceiling all across the board; a lot of satisfaction with the Film Office.

The Community Development Block Grant Program underwent some big changes in 2017 when Carson City reverted back to the state CDBG program. So, in 2018, there were 14 grants. The total grant amount was a little over $3.5 million. The rural CDBG program, they got a little over $3 million, and the urban had five grants with a total allocation of $462,000. Since 2016 and going forward, we've really tried to change the focus of the CDBG program to fund smaller grants that had an economic development focus. If you take and you compare that to what it was like prior to 2015 and earlier, it's over three times as high for economic development focus for the rural CDBG grants.

AMERICAN OVERSIGHT

As for the job and sector overview, the new job numbers come out next week. These numbers are based on the statewide jobs and the unemployment rate is based on the May numbers. Nevada now has the fastest job growth in the nation, record employment levels of 1.37 million workers, year over year job gains of over 37,000 workers, 89 months of year over year gains, 70th month of outpacing the nation. And it's not just job growth, but we're number five in GDP growth in the country, so running on all cylinders.

What really matters is the structural change that we're seeing going on within that growth. The growth matters. It's the structural change within that growth that makes it really resilient. Right now, we're looking at manufacturing being the fastest growth sector in the state both in jobs and GDP. Last year, manufacturing GDP growth was 17.3%, so that makes a big difference. Right now, highest weekly wage ranges on record. Before benefits, it's 955 a week, which is roughly $50,000 a year. And if we go down and we look at all the sectors, all of them showed positive growth in both jobs and earnings when compared to the second quarter of last year. If we look at aerospace and defense right now, there's 14,300 workers, average earnings of $85,500, benefits included.

As far as the job and wages growth, we're seeing bumps up in flight training as well as parts manufacturing. If we look at business information technology, ecosystem, 63,700 workers making average earnings of almost $48,000 a year. Wages in IT, they jumped up on the manufacturing side of things. So, if you think of IT manufacturing, it was like switches and controls and relays and that sort of thing. There's about 80 industries within this target sector, and there was a little change within all the detail.

Taking a look at the health and medical sector, currently, 111,800 workers, average earnings, over $56,000 a year. The job bump was general hospitals, doctor's offices, also elderly services. And wages were spread kind of across the board as well. The national resource technology sector to the right there, 54,000 workers, $66,400 a year in average annual earnings. Most of the job growth was on manufacturing on the energy side. So, natural resources is where we combine the clean energy sector, agriculture, as well as water technologies, and where I'm seeing the jump is in the manufacturing on the energy side. Looking at manufacturing and logistics, 125,000 workers, $59,000 a year, a little over $59,000 a year. Jobs were in really two places, warehousing and storage, 800 workers. So, there was 2,700 workers growth in the second quarter, 800 in warehousing and storage, but the big one was storage battery manufacturing, 900, and I think those numbers are slow coming. We're going to see more of that. Wages are spread. There's 467 industries within this combined industry of logistics and manufacturing.

I pull manufacturing out because it's something that we really like to stay focused on and where we've seen so much change going on, and again, that's where those storage battery manufacturing jobs have bumped up that growth, the 11,340 workers, currently, 46,200 jobs, average earnings of $56,000 a year. And then on to mining on the next page, there was little change in the jobs and wages, and where there was change, it was within gold ore mining, but it also -- I seen a little bit in silver, copper, and zinc. But it's not a big change there. It's

AMERICAN OVERSIGHT

pretty flat right now, high wages, $95,200 a year, a little over 14,000 jobs. And in tourism, gaming, and entertainment, currently, there's about 418,000 workers in that sector making on average $34,000 a year. There was little movement in the second quarter, but if I look at what happened over the previous year, second quarter of this year over second quarter last year, there were over 11,000 workers added to the sector, and earnings bumped up about $800 a year.

Governor Sandoval thanked Mr. Potts and said one of the most important points was in terms of sustainability. The Governor stated he wanted to make sure Nevada is set up to be resilient in case of a recession so that they don't have a 10% increase in unemployment and lose 175,000 jobs like they did during the last recession.

Mr. Potts concurred and said: I think the great news in all these numbers that comes out is, again, the growth is great, but it's the structural change that makes a difference. It's diversification. That's what makes it sustainable. But when you look at the underlying industries where we're starting to see the largest growth, especially when you start talking about manufacturing, those are the jobs that don't go away easy. That's what helps really create that sustainability. I did some work earlier on looking at the change within the change and how the work that economic development -- it's not just our agency. It's RDAs. It's everybody in the state that's doing this sort of thing, you know, that's in this, where you're actually starting to see the work that we're doing starting to play out in the aggregate numbers. You know, I'll bring up manufacturing again. That's roughly 42% of the jobs that have been assisted in the last six or seven years have been tied to manufacturing at some level. There's food manufacturing or IT manufacturing or advanced manufacturing or whatever it might be. And then you're seeing how that's starting to influence where you're starting to see where that sector has been the fastest growing sector in the aggregate where you could see that influence. That's what, at the end of the day, is going to help us be sustainable. You know, business cycles happen, right? But I think we've got that going for us, plus an awareness of what we need to do to stay in front of it makes a difference.

Governor Sandoval thanked Mr. Potts once more and asked if there were any other questions or comments for Mr. Potts from Board Members. There were none.

10. DIRECTOR'S REPORT – Review and Discussion

Director Anderson highlighted a couple of important items for the Board:
The trade delegation to Spain was a resounding success. We had the opportunity to meet with a large group of companies as well as higher education, culinary institutes, a whole host of folks, and I think from the very first meeting we had with 30 to 40 companies that had interest in Nevada, and the Governor had mentioned a couple, and one in particular was building the pumps, the water pumps for the third straw in Lake Mead and how critical and important that connection was.

Currently just with the launch of Nevada Global, we did kind of a soft launch just a month before, and that Nevada Global is essentially a soft landing place, an ecosystem, if you

AMERICAN OVERSIGHT

would, for companies that have interest in opening their business to the US market and using Nevada as a launching pad for that. We have got a tremendous amount of interest in this, and I think it surprised us how quickly, as a small brush fire kind of took hold. And it's exciting because I think it's pushed us to quickly grow that ecosystem faster than we had initially intended. So, with that, we will have a website, we'll have an onboarding process, and a vetting process solidified.

We already have gone through and used Poland as a pilot project, so to speak. Our office there hosted companies, running them through a boot camp, helping them understand what it would take to set up shop in the US, and again, using Nevada as that platform. We have several of those companies, five companies that have already committed to coming to Nevada and hopefully setting up shop and going through the Nevada version of that boot camp as well.

The Spain delegation is bringing a trade mission of about 15 to 17 companies that have already committed, and we'll, again, run them through kind of a Nevada Global style boot camp while they're here so they understand what it takes to get into the US market. Some of them are large and mature and have some of those specialties in-house, but a lot of them -- just sometimes the basic of a business license and setting up an entity here in the state is very different from the European Union and Spain and some of these other international locations.

GOED also entered an MOU with the World Trade Center, which is owned and operated by the Las Vegas Convention and Visitors Authority. That gives us access to the entire WTO network, and so we will be advertising. They are going to advertise for us, actually, the Nevada Global platform to allow both from their member organizations, which right now, they have MOUs with 33 other WTOs, that they have access to share that information across the Board. That gives us an immense reach when it comes to looking for international companies that potentially want to be here. I have high expectations for Nevada Global, excited to see it grow so quickly. And I think between Poland and then the subsequent trade mission to Spain, and certainly in Africa as well, as we introduce that program, we'll see it continue to pick up steam.

During the months of May and June, GOED, our international division, issued nine companies a total of $43,000 through the STEP program. Those are federal dollars that we apply for, and we're able to grant those to companies that are looking to export out of Nevada, and that could be anything from going to conventions or setting up booths or actually having meetings with international -- other international companies. And we're starting to track that a little bit differently. We've applied for a little bit extra money coming into this next biennium. So, we're looking to expand that program and think in conjunction with Nevada Global. Being able to do that exchange between multiple countries I think will be a great success for us as well, or at least a multiplier effect.

NIAS, our drone entity, Nevada Institute for Autonomous Systems, is developing out a public safety program. Nevada Center of Excellence is where it's going to be housed, and

AMERICAN OVERSIGHT

the idea is to grow that industry, and we feel like education and training, when it comes to drone usage, the rules of the road, so to speak, rules of the air, is an important piece. Recently, in the last month or so, we did a survey of industry, and this is one of the things that industry came back to us and said this is lacking. There's a gap here, and we feel like an entity like NIAS could fill that gap. That has already produced some exciting opportunities and discussions with other states looking to Utah and Alberta, Canada. We've got an MOU with them in conjunction with that, but being able to use Nevada both as a testing platform for the drones, but also for other states to send their folks here for education purpose as well. So, we think that will expand that industry.

GOED and the Bank of Nevada approved -- excuse me -- two more Nevada opportunity loans totaling $150,000. The loan department has now approved four out of five applicants for a total of $225,000. Just for reference, this was a million-dollar fund of general funds that was put together through the office for the Governor's Office of Economic Development, and we've contracted with Bank of Nevada to look for folks that may not have the collateral or may not have -- they've got a business up and running, but don't quite meet the criteria for traditional lending, and this, I think, is going to be a great success for reaching out to those folks again to make sure that nobody's left behind in that New Nevada. And one of the case -- not case studies, but profiles of the very first application was a gentleman who owns a printing company. He couldn't get a loan, traditional lending, to buy a new printer. It allowed him to expand the products and services that he did. I believe he's located in North Las Vegas, but he was able to get a loan, buy some equipment, supplies, and has opened a whole new division for his company and intends to hire about three to four people to run that.

CDBG, which is our grant program, has seen some great success in getting funds allocated. I believe the total amount was $3.1 million, but we had some revisionary funds. I think total with Carson City included was $3.5 million total, and those are listed in the Director's Report as to where those monies were allocated. This is a great investment in the rural communities, and it certainly is more kind of community development versus pure economic development. That's an important piece of the puzzle when we look at rural communities and the history they have and the opportunity they have to develop out not only with CDBG grants, but also our mainstream program, which is up and running and moving forward as well to really showcase some of the great value we have in our rural communities.

The IRS certified our 61 opportunity zone tracks. Something I neglected to put in the update here is we're looking to build a task force around that inclusive of industry, BNI, ourselves, and maybe some other agencies to make sure that we, one, highlight the opportunity for investment to as many people as possible, but also to make sure that as much of that opportunity fund dollars that are local stay local and are invested in some of these designated tracks, and I'll continue to provide the Board updates as we move forward on that.

The Film Office has been busy. While we've not seen a whole lot of tax credits issued quite yet, we've got a lot on the books and a lot of film production going on. They also have

AMERICAN OVERSIGHT

created a new online directory. So, if you'd like to have a film filmed in your backyard, you can put your backyard into this directory. I'm not sure if that's exactly what it's used for, but this allows basically industry to update their locations and what the advantages are to filming in those locations. Before, the Film Office had a hard time getting updates and having to reach out. This is a much more consumer-driven site versus top down picking which sites are good or bad.

Together with the Nevada Department of Transportation, PTAC went on an outreach trip. This, too, is a great example of rural outreach from our office. It is a tremendous resource for small business, medium-sized businesses to get access to contracts and navigate a very difficult process. And it's nice that we have an entity that goes through and helps folks get certified in the areas they need to, whether that be small business or disadvantaged business, and then how do they gain access to the contracts both from a state and federal level. Winnemucca, Lovelock, Elko, Battle Born, Ely, and Eureka were part of this latest outreach. In our next report, we have an update on the most recent here in northern Nevada. They had several hundred people show up to an event, business owners that were looking to utilize PTAC services. So, we're excited to see that grow.

The WINN program is expanding and growing. We have some really key problems as far as getting a pipeline of nursing and health professionals. We believe we found two great solutions to that. One is to build a pipeline of trainers and then drill that down into the Clark County School District as well as -- well, K-12 education. So, at a high school level, you'll be able to train through CNEs and CNAs and get onto a nursing track right through high school, and we think there's going to be a great opportunity for that. And so we'll see that in the next -- in the September meeting.

Director Anderson then said: Kudos go to Mr. Potts, who has been a tremendous resource for the state and the nation when it comes to understanding what workforce development is, how that affects our ability to grow in that sustainable way, and how to build the infrastructure and pipeline for what our employers are looking for, and not just the ones for today, but certainly looking into the future. More kudos go to Stacy Voswick, our WINN coordinator. She has been a tremendous resource for us, an asset to the Governor's Office of Economic Development. From the short time she's been here, she's really kickstarted some really great WINN programs. Some of these might have been in the hopper, but needed a whole lot of massaging to get them to Board ready, and she has jumped in with both feet and done a tremendous job in an area that is not that easy to work with when you have to have private industry and the education and our office and everybody on the same page. That's a fairly heavy lift, so kudos to her and everyone that's worked with her to get that done.

The GOED filled our mining industry specialist. As you know, Sheldon Mudd moved on to greener pastures, and we've hired Mr. Joel Lentz as our new mining specialist. He's got 35 years of Nevada mining and leadership experiencing culminating in being the general manager of the Newmont Phoenix Mine. He'll be based in our Elko office and is certainly a tremendous asset to the mining industry as a whole as well as to our office. He will help us

AMERICAN OVERSIGHT

find ways we can better service that industry and that sector. That concludes the Director's Report.

Governor Sandoval thanked Director Anderson for his thorough report and hard work. He said the state has really established and created a national model for economic development. He asked if there were any more questions or comments, and there were none.

11. STATE OF NEVADA UNEMPLOYMENT RATE UPDATE ABATEMENT APPLICATIONS FOR BOARD APPROVAL as established by the Research and Analysis Division of the Nevada Department of Employment, Training and Rehabilitation.

Governor Sandoval stated the unemployment rate update was self-explanatory – it's great. He is very excited about the way that the numbers are moving. He asked for any questions or comments on Agenda Item No. 11 and there were none.

12. PUBLIC COMMENT

There were no public comments, so the meeting moved on to Agenda Item No. 13, Adjournment.

13. ADJOURNMENT

Governor Sandoval asked if there was a motion to adjourn.

A MOTION WAS MADE BY SECRETARY CEGAVSKE TO ADJOURN THE MEETING. THIS MOTION WAS SECONDED BY DR. BENNETT. THE MOTION PASSED UNANIMOUSLY.

Andrew,

Good morning. I'm trying to locate a "State Unique Opportunity Zone Code" that was on a letter from March 5th from the CDFI to the Governor. Do you have a copy of that letter? If not, I'll try to reach out to the Treasury to get that code. I need it as part of the submission for the Nomination tool. See below per the instructions.

4.1.1 Information on the State and Authorized Representative
In the worksheet labeled "Information," enter the information requested for the State and the Authorized Representative who prepared the Nomination Tool. In addition to the name of the State and the State CEO, **the Authorized Representative must enter the "State Unique Opportunity Zone Code."** This code can be found in the March 5, 2018, letter from CDFI Fund Director Annie Donovan to the State CEO transmitting information on the Nomination Tool and is intended to ensure that the information submitted is authorized by the State CEO.

Hi Derek,

I hope all has gone well working out the final adjustments on the OZ nominations. I am looking forward to the final designation list. I know you are busy today finalizing this through the governor and then getting them into the treasury system so let me know if I can help.

Also, I just want to mention to you that I was talking to Marc Shultz about NMTC a week ago and he mentioned that he knows you. Marc is with Snell &Wilmer Law and he is based in Phoenix. We started talking about the Opportunity Zones and shared some enthusiasm for this new program. Marc is working with a few investors that are already taking steps to start their Opportunity Funds. Phoenix is ahead of the game and will likely attract significant OZ investment like they have for NMTC by thinking ahead of the curve. Marc has a presentation on the OZ program and he would be happy to come to Vegas to conduct a presentation and meet with economic development professionals and parties interested in creating funds. I think this could be a great opportunity to help us get ahead as well. I have enjoyed presenting with Marc before and he is good and unintimidating for these complicated programs. So our thought is maybe GOED would like to pull together a presentation on the OZs. We were thinking that maybe you would like to present from the GOED perspective, Marc from the detail program perspective, one of his fund operators from the investment perspective, and possibly one more group that could add value. I really think this could be a great idea, but my bosses said we should pass that ball to you so you can run with it… meaning we don't want to step on any toes and it is really a GOED program. So I am offering my support and help for this idea of inviting Marc and an investor to town for a day setting up a presentation/panel (we can likely host this here at the NSBC if you like). I would also suggest and facilitate specific meetings between certain local district economic development professionals and potential fund development entities to get things moving as well. Marc was even suggesting early May.

I apologize for tossing this at you on such a busy day, but I thought if you wanted to give a thumbs up I could look at getting the ball rolling while you finish up the nomination process.

Hopefully you have time to let me know your thoughts.

Good evening,

Please see the information below in preparation for the **Opportunity Zone Conference & Breakout Sessions with State, Local, Tribal, & Community Leaders,** on Wednesday, April 17, 2019. Attached you will find an agenda for the conference and breakout sessions.

DATE: Wednesday, April 17, 2019 from 1:00 p.m. to 5:05 p.m. Eastern Time

LOCATION: Eisenhower Executive Office Building (EEOB) on the White House Complex.

ARRIVE AT: 17th Street NW and State Place NW, Washington D.C., 20502.

ARRIVAL TIME AND SECURITY PROCESS: Attendees can begin arriving on the White House Complex at 12:00 p.m. Please arrive at 17th and State Place **no later than 12:45 p.m.** to allow time to get through security.

Upon your arrival, Secret Service will check your driver's license, passport, or other government issued photo ID. This must be a current, valid form of identification. Paper copies and expired IDs will not be accepted. Keep in mind that if there are any discrepancies (including minor "typos") between the personal information that you submit and what is listed on your identification, this will delay your entrance into the EEOB. We strongly advise that all guests confirm that their personal information is correct before passing it along.

After your identification has been checked, you will go through security similar to what you are used to seeing at the airport. You will then be issued a temporary badge that will give you access to the Eisenhower Executive Office Building. Please plan to spend at least 15 minutes passing through security.

CONFERENCE END TIME: 5:05 p.m., followed by an optional reception ending at 6:15 p.m.

ITEMS ALLOWED: Most items are allowed into the Eisenhower Executive Office Building. You'll be able to bring purses, backpacks, phones, etc. Luggage is allowed. Prohibited items include guns, ammunition, fireworks, electric stun guns,

AMERICAN OVERSIGHT

NV-DA-20-0615-A-005152

mace, martial arts weapons/devices, or knives of any size. If you are unsure about a certain item, please feel free to reach out to our office for clarification.

ATTIRE: Business professional.

AGENDA: See attachment.

CONTACT: If you need help or have a specific question that was not addressed in this email, please contact Olivia Imhoff at Olivia.P.Imhoff2@who.eop.gov.

Sincerely,

Olivia Imhoff

Andrew,

Here is the info from the ACS website. I attached the data downloaded from the ACS site. I'm not sure if this link works https://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?src=bkmk but will take you to the table to need to view.

	2015	2016
9602.01 (Lyon)	46,616	53,581
9702 (Storey)	68,203	66,738
%	146%	124%

Storey doesn't qualify as a contiguous tract using the 2011-2015 data set.

Good morning all,

The grant office has been engaged to look at federal funding for the Marlette system. We have encouraged Ward and his shop to have the Marlette Water System added to the State's Mitigation Plan (housed within Division of Emergency Management) which will open another stream of federal money (pre-disaster funding). Additionally, we do expect a large Infrastructure appropriation from the Omnibus bill which could potentially be used to fund the project (or phases of the project).

Lastly, just about every funding opportunity asks how the project will be sustained after federal money is no longer available – as a result I encourage solutions for future maintenance as it will provide for a more competitive application – once we find one to apply for.

Please let me know if you have any additional questions or concerns

Best,
Connie

AMERICAN OVERSIGHT

STATE OF NEVADA

GOVERNERS OFFICE OF ECONOMIC DEVELOPMENT

BOARD MEETING

Thursday, May 17, 2018

SANDOVAL: Call the Governor's Board of Economic Development Meeting to order. We'll commence with the roll call. I believe all members are present. Mr. Specht here? I don't see Mr. Specht. All right, but we do have a quorum. So, we'll commence with Agenda Item No. 2, which is Public Comment. Is there any member of the public present in Carson City that would like to provide public comment to the Board? Yes, sir.

WILCOX: Good morning. For the record, my name is Brian Wilcox. So, good afternoon, GOED Commission Members. I want to thank you for the opportunity to provide this Commission with information and updates relevant to the cyber defense for the State of Nevada. For those of you who do not know me, I was the former Chief Information Security Officer for the State of Nevada and the Governor, and subsequently, I have moved back to the private sector after a four-year stint with the State. I currently hold a position of CISO for Black Ridge Technology International.

So, Black Ridge is a military grade cyber defense security company with its corporate headquarters in Reno, Nevada. We're a publicly traded company with affiliate offices in New York,

AMERICAN OVERSIGHT

Virginia, and California. So, I come to you today as an extension of my public trust obligation fostered while I was in official capacity with the state. I may have left public service; however, I still feel strongly obligated to protect the great state for which I chose to move 17 years ago. While serving with the state, I had a unique vantage point understanding the strengths, weaknesses, threats, and opportunities of our state's cyber defenses. I've also noted during my cyber security career the continued failures of the current cyber security defense mechanisms.

The defense strategy needs rethinking, and that is why I chose to join Black Ridge. While serving at Black Ridge, I've had the privilege -- sorry -- of working with public and private sector organizations, evangelizing identity-based security solutions. In the noisy cyber security marketplace, we are unique in providing a solution that forever changes the way we communicate safely over the internet. Transport Access Control, the primary of seven patents that we hold, acts as the liaison between the chaos of the internet and organizational networks. TAC prevents all unapproved traffic even from being initiated. Our revolutionary solution authenticates every connection on our first packet of data. The result is an immediate tangible reduction in malicious, unwanted traffic and traffic that poses the bulks of cyber threats today.

AMERICAN OVERSIGHT

Only preauthorized authenticated connections are allowed, all of which are managed via a highly scalable and secure provisioning system. Here today, I continue my quest to inform this key committee and all other state entities of our existence and that the next generation of cyber defenses has arrived. As a member of the Nevada business community, we are coordinating our efforts through the Nevada Office of Cyber Defense Coordination and meeting the State's cyber strategic plans for years to come. So, I have information available for anyone after the meeting, and I just want to thank again for the Committee to provide me some time to make these comments.

SANDOVAL: Thank you, Mr. Wilcox. Is there any other member of the public present in Carson City that would like to provide public comment to the Board? I hear and see no one. Is there anyone present in Las Vegas that would like to provide public comment?

HUTCHISON: Yes, there is, Governor.

SPEAKER: Thank you, Governor, Lieutenant Governor, Board. Jared Smith, Chief Operating Officer of the Las Vegas Global Economic Alliance. Just wanted to take a minute today to hopefully set the stage a little bit for this meeting to say how proud I am of all these companies that we're going to discuss today, and specifically, to call your attention to how proud we should all be of the economic development infrastructure staff, incentives, programs, Governor, that exist under you and just

AMERICAN OVERSIGHT

want to say how proud we are of our partners, of these companies, of our team and of you and the leadership. This is a big day. This is the most projects that LVGEA has ever brought in one meeting, and so we are very thankful for everybody involved in all these. It really does take a very large team to make this happen and also to tell you how proud we are of our friends in the northern part of the state who have -- we have been partnering with to help spread the news of Nevada as a great place to do business. So, just wanted to say thank you all very much.

SANDOVAL: Thank you very much. Is anyone else present in Las Vegas that would like to provide public comment?

HUTCHISON: No, Governor.

SANDOVAL: All right, thank you, Mr. Lieutenant Governor. We'll move to Agenda Item No. 3, which are my comments. We have a pretty -- Mr. Smith said we have a pretty aggressive schedule today, so I'm going to limit my comments only to this, is that we have a new member of our Board of whom I -- which I was very proud to appoint Mr. Adam Kramer, who is the Executive Vice President of Strategy for Switch Communications. I'm really pleased that you agreed to serve the State, and Adam, I'm really glad you're here and had the opportunity to work with you through the years. I think you're going to be a valuable addition to this Board, but I wanted to give you an opportunity to introduce yourself.

AMERICAN OVERSIGHT

KRAMER: Thank you so much, Governor, and thank you for the opportunity. It really is an honor to serve on the GOED Board. I've got to see the fruits of the labor from all of the local economic development organizations through GOED around the state under your leadership here and what that's done, and being here working for Switch and seeing that, it's truly an honor to be part of this Board.

SANDOVAL: Thank you, Adam, and maybe I do have some comments, because Mr. Smith really got my mind working, but perhaps I don't say it enough with regard to the regional development authorities and the relationship with GOED and Director Anderson and everyone that's on his team north and south. I really do believe that the State is in an economic renaissance. You know, when I talk about the new Nevada, it's not just words. We're really pleased and excited about the quality of the types of businesses that are coming to our state, and this Agenda today really speaks to that. I will tell you, you know, I still shop at Costco and the grocery store and all those things, and not a day goes by where members of the public don't approach me and let me know how pleased they are with regard to what's happening in the state, how pleased they are what's happening with our higher education system, our K through 12 system.

You will see today with regard to our job training and what we're doing and the relationships and partnerships that we have

AMERICAN OVERSIGHT

throughout our education system and the economic development authority. I suppose that when you're in the middle of it, you don't realize how great it is, and when you juxtapose that to what's happening in other states and when other -- when I get approached by other Governors, and frankly, representatives from other nations about what we're doing here and that they want to replicate this because it is unlike anything else that they have seen. So, everyone that has been responsible for participating in all of this should be very proud with what we've accomplished. Certainly, the work is not done. It never will be done, but, you know, we're really building something very special here, and we do have an item on the Agenda with an entity that I had the opportunity to attend the groundbreaking yesterday. And there were representatives from, frankly, a lot of different places, and they really opened their eyes as to what's happening in the state, and I said that this state, the state of Nevada, is the epicenter of the new economy.

I mean, there is a fourth industrial revolution that is occurring right before our eyes, or industry 4.0, and Nevada, I believe, humbly, that we're well-positioned for that. And I think this Agenda, again, reflects what we know and what other entities are finding out, that this is a really special place to do business. It's a really special place to live. We have a great quality of life. We're investing in our people, and we're investing in our education system, and the future is extremely

AMERICAN OVERSIGHT

bright, and I think we have positioned ourselves in a way that we have resilience as we move forward and that the way we've diversified our economy -- if you looked at our pie chart as to where -- you know, where we were seven or eight years ago and where we are now, it's very different, and we have words in our vocabulary that didn't exist before at least with regard to the state, and it's really special. So, I guess I am on my soapbox a little bit, but I will tell you having the privilege to serve in this capacity in this position I've had and having a limited number of days left in my tenure, I've seen this come a very, very long way, and it hasn't come without a lot of hard work and sacrifice and commitment on behalf of a lot of different people, but particularly, collaboration and working together. That is the key. It is the absolute key, and I think that's the secret sauce that doesn't happen in a lot of other states. So, with that -- and this sounds like the speech I'll give in December, you know, but any event, I don't think you can say it enough, and these are things that I think about, but perhaps I should take the opportunity like I'm doing today to articulate.

So, from the bottom of my heart, I want to thank everybody that is on this Board and serves on the -- at GOED as well as the regional development authorities, our universities, our community colleges, our local governments, everybody that has come together in a way that is, as I said, unlike anywhere else in the country. So, with that, we'll move on to Agenda Item No. 4. That's the

AMERICAN OVERSIGHT

great part of this Agenda item. No one gets to talk back at me. I get it all to myself, but we'll move to Agenda Item No. 4, which is Approval of the March 15, 2018 Board Meeting Minutes. Have the Members had an opportunity to review the minutes, and do you have any changes? If there are none, the Chair will accept a motion for approval.

KLAICH: So moved, Governor.

SANDOVAL: Mr. Klaich has moved to approve the March 15, 2000 Board Meeting Minutes. Is there a second?

KRAMER: Second.

SANDOVAL: Mr. Kramer has seconded the motion. Any questions or discussion on the motion? Hear none. All in favor say aye. [ayes around] There was a mumble ayes from down south, but I'll take those as a unanimous vote and approval of the minutes. We'll move to the main event, which is Agenda Item No. 5, which are the Abatement Applications for Board Approval. Agenda Item No. 5A is Advanced Technologies, Inc. dba Pictographics. Good afternoon, please proceed.

URSEM: Good afternoon. Thank you, Governor Sandoval, Lieutenant Governor Hutchison, Madam Secretary Cegavske, Director Anderson, and Members of the Board. For the record, Perry Ursem, Vice President of Business Retention and Expansion with the Las Vegas Global Economic Alliance. I'm here today in show of support for the application submitted by

AMERICAN OVERSIGHT

Advanced Technologies Management, Incorporated doing business as Pictographics.

Now, based in the greater Las Vegas area of southern Nevada, Pictographics is a 24-year-old printing company providing unique digital printing services for a number of industries. This company has been working on its current initiative for some time to begin producing three-dimensional printing. As the CEO will share today, this evolution in printing opens the market for Pictographics on a global scale. This expansion would add 27 new jobs, producing an average hourly wage of $27.35, and capital investment projections total $17.6 million. Now, this application meets the requirements set forth by the Governor's Office of Economic Development and has the full support of the Las Vegas Global Economic Alliance, and with me today from Pictographics is Mr. Craig Miller, President and Chief Executive Officer, who will provide further insight into his company. Mr. Miller.

MILLER: Thank you, Perry. I want to say that the -- we couldn't have done this without the tremendous support of the GOED staff, and you should be very proud of the people who were the tip of the spear going out and meeting with business people and helping provide the additional incentive to have us expand in the state of Nevada. And I want to thank you, Governor, for making this opportunity possible. One of the things I want to mention is that I sit on the Board of the

AMERICAN OVERSIGHT

District Export Council, part of the Department of Commerce, and as such, I've been able to witness over the past number of years your leadership in the effort to increase export from the state of Nevada with the various trade missions from Poland to China, and, you know, some of my colleagues on the Board have benefited from building skyscrapers in China that was the direct result of your effort to promote business -- Las Vegas business, Nevada business around the world. And so I just want to say that as someone who's kind of watched that from the sidelines for a number of years, that you and your team has done an extraordinary job.

So, getting back to our company, we're basically a mom-and-pop company, and I can say that because my wife is the CFO at work and at home. At work, she's the Chief Financial Officer, and at home, she's the Chief Female Officer, and that we are a credit-card-financed home business that started in the bedroom of our house in February of 1994. When we moved out of our house, and the reason we moved out of our house is because we were doing -- we were pretty competitive in the marketplace, and one of our competitors turned us in to the county for violations of zoning ordinances. That was the worst possible thing they could have done.

We were so happy in our house, we didn't want to grow, because we were doing very well. We were being very careful not to violate any rules or regulations. What we did was -- is that

AMERICAN OVERSIGHT

we made an effort to get a variance, which we ultimately got a three-year variance from the county, but it opened our eyes to the fact that we needed to move on and move out, and the company that turned us in to the county is no longer in business, and they turned us into a tiger, but that's another story.

So, the thing that's one of the hallmarks of our company is that we've always been at the forefront of technology. So, for example, we were one of the first four companies in the US in 1996 to develop the technology for digitally dying textiles. That led us to become the number one producer of digitally printed gaming table felts in the US and the largest producer of high-end race team uniforms in the US. Of course, that all went offshore, but that's another story. But the fact is that if you see an opportunity with an evolving technology and you're not afraid and you go for it, that you can give yourself a competitive advantage that can last 12, 18 months, in some cases, a decade. It has for us.

So, there's been a number of things over the years in the 2D printing area that we've pioneered. Those of you who have been to the form shops at Caesars Palace where they have the circular escalators and there's 38,000 square feet of hand-painted frescos on the -- in the growing vaults, we printed those. So, it's with -- that was -- we were able to do that because of advanced scanning technology to be able to reproduce the frescos. So, in that light, one of the things that's

AMERICAN OVERSIGHT

happened that's interesting -- and by the way, one of the great advantages of being in Las Vegas is the trade show industry, the exhibit industry, and that's basically sustained our company. And the fact that we were one of the first people to do dye sublimated fabric, now you go to any of the events, and all the exhibits have thousands and thousands of yards of dye sublimated fabric.

We did six Fiesta Bowls where we wrapped the inside of the stadium with 80,000 square foot of digitally dyed fabric. We wrapped the inside and the outside of Thomas & Mack with fabric, included 150-diameter decal on the top of Thomas & Mack for AE Sports. Out of this mom-and-pop operation, out of our house, which now we have a 20,000-square-foot high-tech building that we designed and built ourselves for which we can do miracles in because we have all the power in the world and fiber optic internet and that sort of thing. But what's happened is, is in the exhibit industry, there's been a lot of out-of-state competition, which is good for you guys, because they've come in, and they've set up companies in Las Vegas.

So, we looked at a lot of our core business in the 2D printing area, and we realized that it was becoming commoditized. So, the fact that we invented some of these processes no longer protects us from commoditization. So, we had to say, what's the next big thing? When you look at 3D printing, 3D printing has been going on for 25 years, and for about the last five or six

AMERICAN OVERSIGHT

years, people were saying that desktop 3D printing was going to be on every home and you were be making your own parts at home. It was overhyped, but in the last 12 to 18 months, revolutionary technology has come onto the scene that opens up a trillion-dollar market.

What is that trillion-dollar market? Manufacturing. So, in the beginning, you were making cutesy little things and making prototypes. So, you were doing one or two things. What if you could do thousands of things. What if you can produce parts for the same price that they're molded? What if you can do ten million colors in a print? What if you can do anything? And so what we've decided to do, and this is kind of a megalomaniacal plan and for which I apologize, but we want to become the premiere 3D print company in the world, and how we're doing that is that we're taking seven of the most revolutionary 3D print technologies -- for example, we now have the largest and fastest 3D printer in the world. I could print any of you in five hours in our shop if we scanned you. We now have the only photorealistic 3D printer in the world that prints with ten million colors, an 18 micron slicing, 270 DPI and the Z axis.

We're bringing in -- we have sitting on our floor, it's not assembled yet, a continuous strand carbon fiber printer that will print a chain link that will lift 22,000 pounds, yet is 40% the weight of aluminum and twice as strong. We will be printing in titanium, aluminum, stainless steel, and steel, including steels

AMERICAN OVERSIGHT

like Inconel to be used in the space industry by July. We have a stereolithographic printer that's used in dentistry and jewelry and that sort of thing, but prints 55.1 inches wide. So, we have -- and it's not public information yet, but it will be as of next Thursday.

SANDOVAL: It is now.

MILLER: But we're forming an alliance with Hewlett-Packard to become a manufacturing center for 3D printing and teaming with Hewlett-Packard in Las Vegas. We've been named the beta site for their new 580 color printer. We were the beta site from Memake's [phonetic] color printer. So, we have -- so, not only are we out front, but we have the first machines in the world to be able to go out and capture a market share. But the thing that's important to understand about having all these multiple technologies is that, you know, you could have one technology where you're cachunk, cachunk, cachunk, doing the same thing. Imagine you have three technologies so that you can use the color thing to make the dazzle and you can use the big thing to make the big thing and you can use the carbon fiber to make the strong thing.

So, we just did a front of a helicopter for Honeywell. It's for a trade show exhibit so they can demonstrate their avionics, and because -- right now, even though we're just starting out, we are the only company in the world with the technology that we currently have, and we just are beginning.

AMERICAN OVERSIGHT

I'm sorry, I get -- can you tell I'm excited? So, if you have any questions about anything about -- and here's the other thing that's kind of cool -- oh, and by the way, a young Las Vegas gal who's finishing her junior year in engineering at San Diego State will be our first paid intern this summer, and we work with people like Rama Venkat, the Dean of Engineering at UNLV, and we think that the UNLV engineering program is absolutely astounding and have had extraordinary good luck working with them in the past, and we hope to bring in undergraduate and graduate students into the program. And because we'll have things that they can't do anyplace else on the planet for a while, it's going to provide a really great opportunity for people that, you know, have world-class experience at the university level.

SANDOVAL: Thank you, Mr. Miller. That's impressive and interesting. I was looking at some of your exhibits, and I don't know if the audience has the benefit, but when you said you could print somebody, he really means it. And if you look at one of your graphics, that there might be some politicians during the campaign year who get themselves printed so that they can put themselves in more than one place at the same time, but it's very --

MILLER: And we can print that life-size, Governor. We can print that life-size.

SANDOVAL: No, and I was looking at, as well, at the statue that you have there. So, this statue is printed.

AMERICAN OVERSIGHT

MILLER: Yes, that's 14-foot-tall. It's printed in -- I think that's three or four pieces.

SANDOVAL: So, any event, you know, I don't have any specific questions, because obviously, you're an established business and, you know, frankly, the American dream story, literally operating out of your house and then becoming what you are now, which is a leader globally in terms of what you do. That's incredibly impressive, but also, you know, with regard to the application itself is you do exceed all of the eligibility requirements. Frankly, I'm excited that you're based here in Nevada, in southern Nevada, and doing this right here at home and leading the way. And as you said, the possibilities are endless, and, you know, at the beginning of this meeting, I talked about some of these things that we're doing statewide with regard to advanced manufacturing, but this may change the entire dynamic associated with that.

MILLER: Yes.

SANDOVAL: So, that will be fascinating to be able to watch that. So, again, I don't have any specific questions, just comment that congratulations and really pleased that you're a Nevada-based business that has chosen to stay here and expand here.

MILLER: Thank you, sir.

AMERICAN OVERSIGHT

SANDOVAL: So, do -- I'll start in Southern Nevada. Do any of the Members of the Board in Southern Nevada have any questions or comments you'd like to make?

CEGAVSKE: Governor, this is Barbara Cegavske. I just wanted to, again, thank you and echo the Governor's comments. Thank you for staying here and expanding here, but this is amazing what you do. I'd love to come and have a tour to see exactly what it is, because I think once you see it, it's bigger than life. Just seeing it on here is a little different, but thank you, sir, very much for being here today.

MILLER: Well, thank you, and I just want to extend an invitation for any of Governor Sandoval's associates or staff or people in the Nevada government. We have an open door policy. We have a lovely facility. We're proud of it. We have an incredible staff, a lot of homegrown talent, and we're always open to having visitors. We'd love to have you come by.

HUTCHISON: Governor?

SANDOVAL: Any other questions? Mr. Lieutenant Governor.

HUTCHISON: Thank you. Mr. Miller, thank you for being here. Thank you for a very interesting and entertaining presentation, and again, for those of us who have worked hard and have followed the Governor's lead on economic development. He talked about vocabulary that didn't exist, you know, six or seven years ago. He was talking about your kind of company, and my

AMERICAN OVERSIGHT

question for you is that the application says that this expansion is going to create about 27 jobs.

MILLER: Yes, sir.

HUTCHISON: And you say with this expansion and the technology you have -- and I assume you've got -- it's protected, IP protected technology that your company has.

MILLER: We have a number of patents.

HUTCHISON: Right.

MILLER: There are some things that will -- some of the thing -- some of our IP will benefit from our manufacturing capability, but generally speaking, right now, our protection is being first, that the fact that -- for example, with our Memake -- we were -- Memake is a worldwide company based in Tokyo and that we were their -- they chose us to be their beta site for machines. So, we had six months before anybody could even buy a machine where we're out selling product, and so now we're known as the company that does photorealistic, ten-million-color 3D printing. Now, that's not to say other people aren't going to be able to buy it, and we're not protected by IP in that regard. But here's one of the things I want to say that I like about this. It's very, very hard.

When we started our business in 1994, it was incredibly hard, because the large and grand format digital printing was in its infancy, and so being able to make print-ready files and working with the local advertising agencies and that sort of

AMERICAN OVERSIGHT

thing was extremely difficult. And so we -- and first of all, we didn't know what we were doing when we started, and so we had to get really, really smart, really, really fast. And that's the thing right now that I love about this, is that if someone wants to go out and buy the capital equipment, good on you, because the 3D aspect, the software aspect with the files, is rocket science, and so the fact that we're teaming up with high schools in the university system and that sort of thing to develop the talent that's going to be required to move into additive manufacturing in the future, that's -- I mean, almost anybody can buy equipment, but getting the human capital that's able to take advantage of that equipment, that's the secret sauce, and we're all over that.

HUTCHISON: Well, again, thank you, Mr. Miller, and we look forward to, I hope, in the future you coming in for more opportunities for expansion and more job creation. So, thank you very much. I'll be pleased to support the application. Thank you.

SANDOVAL: Thank you, Mr. Lieutenant Governor. Other questions or comments from Southern Nevada. Any comments or questions from Northern Nevada? I will say, Mr. Miller, you're the first to use megalomaniacal in our -- in a presentation before this Board. So, again, quite -- you know, in all seriousness, a very, very impressive application, and again, one that we're very proud that you're a Nevada-based business. So,

AMERICAN OVERSIGHT

if there are no further questions or comments, the Chair will accept a motion to approve the abatement application of Advanced Technologies Management, Inc. dba Pictographics for a sales tax abatement, modified business tax abatement, and personal property tax abatement as presented in Agenda Item 5A.

KLAICH: So moved, Governor.

SANDOVAL: Mr. Klaich has moved for approval. Is there a second?

CEGAVSKE: I'll second it. This is Barbara from Vegas.

SANDOVAL: Second by the Secretary of State. Any questions or discussion on the motion? I hear none. All those in favor say aye. [ayes around] Those opposed say no. That motion passes unanimously. Congratulations, Mr. Miller, and I will take you up on your -- I'm not going to send my staff. I'm going to come myself. I've got to see this for myself. So, congratulations, best of luck.

MILLER: Thank you, sir.

SANDOVAL: You're very welcome. We'll move to Agenda Item No. 5B, Axion Corporation.

SPEAKER: Good afternoon, Governor, Lieutenant Governor, Madam Secretary, and fellow Board Members. It's my pleasure to bring forth this application that we've been working on for a couple years now I guess, and finally, it's coming to pass. Axion is a company that's a provider of satellite-based

AMERICAN OVERSIGHT

entertainment services and a lot more, and we're going to let the CEO speak to that matter in just a minute. The company is investing over $27 million in capital equipment with 205 employees with an average wage over $40 an hour, and so EDAWN supports this application as this company meets all three requirements, and at this time, I'd like to introduce to you their CEO, Thomas Wendt, and he could tell you a little more about the company.

WENDT: Good afternoon, and thank you for your time, and Mr. Kramer, I hope you find your new position very rewarding. I think you'll enjoy what you're going to be doing. For the record, my name is Thomas Wendt, and I represent Axion Corporation as its Chief Executive Officer. Axion provides advanced satellite technologies and services that enable consumer and residential access to new generation of [inaudible] high throughput satellites. Axion's new technology combined with this new type of satellite recently put into orbit allows Axion to deliver products and services that will deliver speeds up to 100 megabits per second for residential and commercial broadband services in a bidirectional service. Unlike satellites in the past which were one way, this is a bidirectional services.

Axion will deliver products initially into the United States, but the satellite coverage in this first satellite also covers all of North America, Mexico, Latin America, the Caribbean, and the Atlantic shipping and air routes. Axion has

AMERICAN OVERSIGHT

partnered with Google and Nvidia to deliver satellite products for consumers and businesses that are more advanced than what the terrestrial broadband providers can provide. This includes entertainment services, console games like you would play on an Xbox or Playstation, home automation, advanced services for the Internet of Everything. Our initial target market is the 14 million households in the United States which today have no residential broadband services or completely underserved, but as more satellites are launched, this opportunity will eventually reach 59% of the homes and buildings that globally have no connection to the internet or no broadband services of any type.

As each satellite is launched, the area to which services will be delivered will expand, and by 2020, high throughput satellites will begin to provide global coverage. The economic incentives provided by Nevada are important reason that Axion chose to locate here, but I would add that equally as important was the dynamic business climate that we have seen evolved over the past two years as we worked on this project in the state of Nevada. And for this first satellite, Axion will be making an investment of $20.6 million in capital infrastructure, fiber optics, headends, uplinks, downlinks for the satellites, and engineering and test facilities here in Nevada. We expect to employ a team of 205 employees at a rate of approximately $40.60 per hour. With medical, dental, and vision benefits, we believe that we will have an outstanding package for our employees, and

AMERICAN OVERSIGHT

we will be great -- a great contribution to your community. Another critical component in our thinking was being able to work with local educational institutions introduced to us by EDAWN to train prospective employees, provide advanced educational opportunities for our team members to advance their careers in design and manufacture of advanced satellite technology and to incubate new businesses that can advance the mission of creating products that will complement high throughput satellites.

We have a vision for the company to be invested in our employees, our family, and the community. This is driven from the top down, starting with our Chairman, Edward Horowitz, an industry veteran, one of the founders of HBO and former CEO of SCS, which was the largest satellite operator in the world, and our board of directors and senior executives, several of whom are here with me today, some of whom will soon be former Texans and new citizens of the great state of Nevada. Thank you for your time, your consideration, and thank you to EDAWN for their patience as we carefully evaluated our options in helping us come to the realization that Axion would thrive in northern Nevada. Thank you.

SANDOVAL: Thank you, and I have nothing against Texas, but Nevada is the best. But in any event, Mr. Wendt, so help me understand. What does it look like? So, two years from now, you're up and running. How do -- how am I as a consumer access this service that you're talking about?

AMERICAN OVERSIGHT

WENDT: It's fairly simple. Whether it's on a website or resellers and installers throughout the United States, some of them brick-and-mortar installers, you, in an area that does not have normally broadband services, order up. We bring out a satellite and a modem, and we connect you up at the type of service level you want to have.

SANDOVAL: And will that be a service that is accessible or available in rural Nevada? If I live in --

WENDT: Absolutely.

SANDOVAL: -- Tonopah, Nevada, I will have the same service that I would get in Reno or Las Vegas?

WENDT: Our first three spot beams that we're going to launch or turn up are northern Nevada. So, any citizen in the state of Nevada would be able to have, for the first time, broadband capabilities that normally they'd have to live in an urban center to have.

SANDOVAL: And you -- I mean, this is an incredibly attractive wage, average wage, of $40.60 an hour. What is -- of those 205 employees, what's the standard skillset that you'll be looking for?

WENDT: Well, roughly half of them will be engineering skillsets, but we'll also have people responsible for business development. We're putting our corporate headquarters here, but also, we will start to manufacture the devices here, which we refer to as an ATEC, which stands for Android Terminal

AMERICAN OVERSIGHT

for Entertainment Communications. We're satellite people, so we don't say set top box, but that's what it is. In this box, and your kids would probably call it a game console, would be made here in Nevada. Average wage for that type of manufacturing is $35 an hour with experienced operators of SMT lines, which are robotic consumer electronic assembly lines, is $45.

SANDOVAL: Now, I am -- one of the hats that I -- I have to wear several hats, but one of which is -- I wore earlier this week is Chairman of the Board of Prison Commissions on which I sit with the Secretary of State. But we were having a conversation with the Director of Prisons regarding trying to build a telemedicine infrastructure. So, is this a type of service that would related to that as well?

WENDT: Yes. We can provide up to one -- well, this might make sense to Mr. Kramer -- 1.4 terapixels of video throughput in any given satellite beam, which means we can put a lot of high-definition cameras into a surgical suite.

SANDOVAL: And it's no accident Mr. Kramer is on here, because he speaks your language. I mean, I understand a little bit, but I'm sure he'll have several questions for you. But, you know, for me, it's very important, because Nevada is I think the second most urbanized state in the country. So, in other words, most people live in Reno and this area, Carson City, or Las Vegas, but we have a lot of very small communities that don't have the same quality of life because of the bandwidth out there

AMERICAN OVERSIGHT

and access to the internet, et cetera. So, this is something that is truly a breakthrough technology that for them could be a life-changer. I was in a small community called Beatty, Nevada, and they, through a partnership with a local provider, they finally have access, and it really has been something. But, you know, we talk about this Economic Development Board and being able to -- we're having great success here in Northern Nevada and Southern Nevada, but it's difficult to recruit out to some of these rural areas because of this issue. So, that's why I'm particularly interested in being able to provide that and give Stan a little competition out there perhaps in rural Nevada. So, you said engineers. So, are these engineers that you need to hire immediately from the universities? Is that the -- with a degree?

WENDT: We expect to have a good university hiring program working with UNR and UNLV. We'll have to recruit from other parts of the country with some people that we're already in the process of recruiting from, Texas and other states.

SANDOVAL: And then finally for me, and I'll turn it over to somebody else, but when do you anticipate breaking ground or leasing a building or beginning operations?

WENDT: Sometime during the course of the summer. We're in a series of test phases. The satellite reached its geostationary orbit on December 4th, and it's through all of its tests and evaluations. So, we'll be doing some test services on

AMERICAN OVERSIGHT

it, and then we'll be able to start building brick-and-mortar facilities, because we will be confident everything will work fine. There are also three more satellites, the next three generation of satellites currently under construction in Phoenix today, and those will start launching in 2019, and as each satellite is launched, we will be expanding our business.

SANDOVAL: That's all I have. Questions from Northern Nevada? Mr. Klaich.

KLAICH: Governor, not a question, but a comment. We often talk about the requirements for abatements and whether those requirements are met or not. In this case, they're crushed. The number of jobs you're creating, the investments you're making, the wages that you're paying are exactly the kinds of jobs that we want to attract to Nevada, and I would just say thank you, and Stan, to your group for putting through this. If I asked any other question, I think you'd see my lack of knowledge on geo-synchronize, something or other, but this is the kind of company that we love to see here and that we've created the environment to attract here, Governor.

WENDT: Thank you.

SANDOVAL: Thank you, Mr. Klaich. Mr. Kramer.

KRAMER: Thank you, Governor. I just want to point out that, you know, one of the projects that Switch has worked on is helping work with the State on connectivity to rural schools and to rural medicine, and obviously, one of the biggest

AMERICAN OVERSIGHT

challenges is the last mile, and this -- the areas of Nevada that aren't located off of major highways where there's not a fiber currently running and having this technology deployed here and using this as a test site, not only is this phenomenal from an economic development standpoint and what it'll do here for Northern Nevada, but the impact that it has on those rural communities and providing those kids and the schools the same educational resources that the kids here in Reno and Washoe and Carson and Clark have is game-changing, and it's so much more impactful than just even the dollars and sense of the economic development. So, I thank you, and I really am proud to support this application.

WENDT: Thank you very much, appreciate that.

SANDOVAL: Thank you, Mr. Kramer. Questions or comments from Southern Nevada?

CEGAVSKE: Thank you, Governor.

SANDOVAL: Madam Secretary.

CEGAVSKE: And thank you, sir, for -- thank you. I'm really excited, the same reasons that the Governor is, because I sit on the Board of Prisons with him as well, but I wondered if you have reached out to the community colleges. I know you said UNLV and UNR, but the community colleges are really, really important to us because of the skillset that they help with our communities. Have you reached out to them or talked to anybody in those localities, because they're probably closest to the

AMERICAN OVERSIGHT

community and being able to help. So, what you have going, I echo the sentiments of all my colleagues, and I thank you very much for bringing this here. This really does help with so many ways, but just interested in the community college segment of my question. Thank you.

WENDT: Yeah, that's a very good point, and it was actually key in what our decision-making process was to come here, because we were concerned about an educated labor force, and EDAWN introduced us to the local community college, which got us thinking very clearly about a 12-week training process that we could take people through jointly with the community college. Setting someone up behind a robot that's creating consumer electronics is not a trivial task. There's a lot of training that goes into that, and so our hope is to build a program with the community colleges here to deliver a stream of employees.

CEGAVSKE: Thank you, and thank you, Governor.

SANDOVAL: Thank you, Madam Secretary. Any other questions or comments from Southern Nevada?

HUTCHISON: Governor, just a quick comment, please.

SANDOVAL: Of course, Mr. Lieutenant Governor.

HUTCHISON: Thank you, and Mr. Wendt, thank you for a fantastic application, and I'm not going to repeat what [inaudible] has already said in terms of the application. I am just going to point out, because I enjoy doing this when we have these kind of applications, because although everyone on this

AMERICAN OVERSIGHT

Board and I think everybody in this room are believers in these tax incentives and opportunities that we provide to businesses. Some people aren't. So, I just would like to point out the benefits of your application. We're going to be asked, and if in fact the motion carries, to provide about $2.9 million in incentives, and in exchange for that, the tax benefit -- the direct tax benefit will be over $6 million, and the direct and indirect tax benefits to the state and local governments will exceed $43 -- almost $44 million. So, this is what you envision when you incentivize companies to be in Nevada and to either relocate here or to expand here. So, thank you for this application, and it's an affirmation of what many of us believe, and that is that under the Governor's leadership, under the legislator's leadership as well, Nevada is headed in a right direction, because we are providing these kind of sound policy opportunities for Nevadans. So, thank you, and congratulations.

WENDT: Thank you.

SANDOVAL: Any other questions or comments from Southern Nevada? Hear none, and anything else from Northern Nevada? Again, Mr. Wendt, perhaps when I was giving my introductory comments, this is exactly what I had in mind, you know, when I say that Nevada is at the epicenter of this new economy and technology. I mean, it make -- this is obviously first of its kind and something that's being developed right here in our -- not our backyard, but our front yard, and so I'm very

AMERICAN OVERSIGHT

excited about the prospect of this application. I'm going to be -- I'm watching with interest and very closely with what you're doing here, and as I said, I know that you have a lot of opportunities to do site selection. And as I said, we've competed with Texas, and Texas is a great state. I never -- I've always said that I'm never going to say anything derogatory about any other state. We're all proud of our states, and we're all proud of what we have to offer, and at the end of the day, you're the one who has to make the decision as to where you're going to locate. And as I said, it goes back to our regional development authorities, EDAWN, and the others across the state, Economic Development -- or the Global Economic Development Alliance that we have in Southern Nevada. I mean, these are all partnerships we work together to bring companies of your stature and potential to our state. So, I'm going to be very pleased to be able to support this application. All right, if there are no further questions or comments, the Chair will accept a motion to approve the abatement application of Axion Corporation for a sales tax abatement, modified business tax abatement, and personal property tax abatement as presented in Agenda Item 5B. I'll take a motion from Southern Nevada.

HUTCHISON: Move to approve, Governor.

SANDOVAL: Lieutenant Governor has moved for approval. Is there a second?

HAVINS: Havins, second.

AMERICAN OVERSIGHT

SANDOVAL: Dr. Havins has seconded the motion. Any questions or discussion on the motion? I hear none. All in favor say aye. [ayes around] Those opposed say no. That motion passes unanimously. Mr. Wendt, congratulations, and best of luck.

WENDT: Thank you very much. We appreciate that, Governor.

SANDOVAL: Agenda Item 5C, Caremark, LLC.

WALSH: Good afternoon, Governor, Lieutenant Governor, Madam Secretary, Executive Director, and Board Members. For the record, Michael Walsh with the Las Vegas Global Economic Alliance. I am here today to introduce you to Caremark, LLC. Present with me today is Mr. Dan Klein, Director of Engineering. Caremark, LLC is requesting sales and use tax abatement, modified business tax abatement, personal property tax abatement, and Catalyst Fund. They will have a capital equipment investment of $5 million. They will hire 102 employees within the first 24 months of operations at an average wage of $25.73. Caremark also offers a comprehensive benefits package to their employees. Caremark, LLC meets the statutory requirements and has the full support of the LVGEA. Caremark, LLC operates as a subsidiary of the American retail and health care company CVS Health and is headquartered in Woonsocket, Rhode Island.

CVS Health, it's important to note, is number seven on the Fortune 500. It's an honor to have them with us today, and I'd

AMERICAN OVERSIGHT

like to thank Gustavo Perez from Ernst & Young from San Diego for bringing this opportunity to our attention. They are presently the largest pharmacy chain in the United States in terms of number of locations and total prescription revenues. It has approximately 9,800 retail locations, 1,100 walk-in health care clinics, and a pharmacy benefits manager with more than 94 million plan members. CVS sells prescription drugs, a wide assortment of general merchandise and also provides health care services through its more than 1,100 minute clinics, medical clinics, and diabetes care centers.

Caremark offers prescription benefits management services in the United States. The company designs and fulfills prescription drug benefit plans. I'll get it right. The company offers prescription benefit services, including local retail pharmacy and home delivery options, specialty pharmacy services such as pharmaceuticals and other therapeutic services for participants with chronic or genetic disorders and care patterns disease management programs which provide participant care for complex conditions. It maintains mental service pharmacies and operates pharmacy networks in the United States. It's my pleasure to introduce you to Mr. Dan Klein to answer any questions that you may have and explain the project in further detail.

AMERICAN OVERSIGHT

KLEIN: Good afternoon. First and foremost, I'd like to take a quick moment to thank the Governor, the Governor's Office of Economic Development --

SANDOVAL: Mr. Klein, if I could ask you to turn on your microphone.

KLEIN: Sorry. We'll start over. Good afternoon. First and foremost, I would like to take a quick moment to thank the Governor, Governor's Office of Economic Development, and its Board Members for placing CVS Health on today's Agenda and for your leadership in economic development. My name is Dan Klein. I'm the Director of Engineering, as was introduced. I was gratified that Las Vegas was selected as one of our finalists for this project. I manage Caremark facility projects throughout the US. I'm a 30-year resident of Las Vegas, however, and my wife has been here for 70 years. So, that tells you how old she is, not how old I am.

SANDOVAL: I hope she's not there, Mr. Klein.

[laughter]

KLEIN: So, having this in our home state as one of the finalists was really personally gratifying. I lobbied along the way quite a bit for this. CVS Health, Caremark has recently been focused on the creation of a prescription management service center that will provide innovative tools and strategies to help improve clinical outcomes for client plan members while assisting them in managing pharmacy overall health care costs. As we

AMERICAN OVERSIGHT

considered location for this facility, we narrowed it down to Las Vegas and Charlotte, North Carolina. We were introduced to and have been working with the Las Vegas Global Economic Alliance to review our growth strategy. As part of these discussions, we were encouraged to apply for the incentives available to those companies considering growing their operations in the state of Nevada. We have a number of projects in addition to this one that are scheduled for the west. Depending on our outcome of this project, I am hopeful that Las Vegas will be a location for further expansion.

CVS is seeking the most operationally efficient and cost effective location to accommodate its business needs as the company plans for large capital and hiring commitments. There are three main contributors to our interest in growing in Nevada as opposed to competing states. First, the local labor pool, and I'm very confident about our local labor pool, because in another life in this industry, we hired over a thousand people successfully in Las Vegas. Second is the operational cost differences. They were very attractive. And third, most importantly, is the overall pro-business climate and the value of tax incentives offered by the State of Nevada. Many of you are familiar with our retail business because there's a store on virtually every corner. I'd like to take a few moments and reiterate what was just said. We have 9,800 retail stores and 1,100 walk-in minute clinics, and we are the leading benefits --

AMERICAN OVERSIGHT

pharmacy benefits manager in the country with 94 million plan members.

CVS Corporation, along with its subsidiaries, are a great innovation company in helping people get a pattern -- a path to better health. It's a Fortune 10 company and industry leader. CVS provides drug store physical locations, mail order pharmacies, and a robust pharmaceutical distribution system. In addition, CVS has developed SilverScript, which is an ongoing Medicare alternative. CVS has an unmatched suite of capabilities and expertise to continue to drive innovation in this business and shape the future of health care. Assuming the incentives we are requesting are granted, we anticipate Las Vegas would call -- would hire 102 new people, and it will be 500 potential over the next five years, and we plan to spend $8 million in capital expenditures.

This investment will build out equipment of a new facility and operate as a state-of-the-art specialty pharmacy patient and client service center. If the project is located, as I said before, in Nevada, in Las Vegas, we will be prioritized -- Nevada will be prioritized in the continued growth of our west coast operations. As it relates to CVS being a valued member of the business community, we strive to provide community support through event sponsorship, volunteerism, and disaster relief. CVS Health is also committed to leveraging the local universities

AMERICAN OVERSIGHT

to increase high-paying positions in the pharmaceutical sector, which will in turn drive growth in an industry.

I am familiar with UNLV with two grandsons recently graduating and two currently enrolled. We realized that there's an opportunity to leverage UNLV, the community college of southern Nevada, and other southern Nevada institutions to help provide our resources for greater roles and responsibilities within the company. Our experience here in Nevada has been very positive, and with your help, we look forward to a long, mutually beneficial relationship. In conclusion, I would personally like to thank the Las Vegas Global Economic Alliance for endorsing our endeavors and your consideration. I'll answer any questions.

SANDOVAL: Thank you, Mr. Klein, and just so I'm sure on this, so the company has not made -- assuming favorable consideration of your application, has the company made a final decision as to whether it's going to locate in Las Vegas?

KLEIN: It's still up in the air between Charlotte and Las Vegas. This is the part of the decision-making process.

SANDOVAL: And again, assuming favorable consideration, do you know when that decision would be made?

KLEIN: Within a week.

SANDOVAL: Okay. And I understand --

KLEIN: We're ready to go.

AMERICAN OVERSIGHT

SANDOVAL: Okay. Well, you're pretty -- sound like you're a pretty good lobbyist for that given what you've had to say. So, will you put in a good word for us?

KLEIN: I sure did.

SANDOVAL: No, thank you, and will you help me -- and I used this word in a prior application as a potential consumer. So, what exactly does a prescription management service center do?

KLEIN: Well, in the specialty pharmacy business, we have a lot of high-touch patients, patients that require nursing, patients who require pharmacist intervention, and this service center will be staffed with people that are able to handle high-touch patient counseling and coaching. Their therapies have to be managed very, very closely.

SANDOVAL: So, would they be doing that --

KLEIN: Does that answer your question?

SANDOVAL: I think it does. Would they be doing that telephonically?

KLEIN: Yes.

SANDOVAL: Okay, so, for example, if I had a family member who is on multiple medications and maybe had a question regarding that, that person could call in and get some information.

KLEIN: They would not only be able to call in. If it was one of the high-touch specialty therapies, our staff would

AMERICAN OVERSIGHT

be in contact with them to make sure they're following the recommended regimen almost weekly.

SANDOVAL: Right, and then again, it's a good wage. The average wage is $25.73. What would be the typical skillset of the individuals that you would be recruiting?

KLEIN: Well, it would be high-end pharmacy technicians. We would have pharmacists. We would have nurses involved in the therapeutic center.

SANDOVAL: Thank you very much, Mr. Klein. Any questions from Southern Nevada?

SPECHT: As you can tell by this accent, I didn't grow up here in Nevada, which I did years ago, but I grew up on the east coast, started my career there, and I saw the exceptional growth of CVS, great company back east, growing across the country, glad to see you came out here. Haven't lived here for a number of years now. It's a no-brainer. We want to locate. This is a great, great state to be in, would love to see us become the choice. One thing I would just like to add is a lot of times we here what the companies do, and sometimes I think it's good to hear potential partners here in our state on how they do it. And I found it amazing, about a year-and-a-half ago, I was going into a hospital to have a procedure done, and as I was checking in an outpatient, there was a sign there, and it was none of your competitors, but it was only CVS that offered the service that when you're checking out of the hospital, they'll

AMERICAN OVERSIGHT

bring the prescription right to your bedside before you leave. And I can't think of many people that would like to run out and get a prescription filled after being in a hospital for a while. So, I think that sometimes it's good to hear not just what companies do, but how they do it, and what a great addition you all would be to our state, and we would love to have you here.

KLEIN: Thank you.

SANDOVAL: Thank you, Mr. Specht. Any other questions or comments from Southern Nevada? Dr. Bennett.

BENNETT: Mr. Chairman, Governor, if I might tag onto that a little bit. One of the things that really spoke to me in this application is in Mr. Klein's letter where he talks about the involvement of the company in the community, and to have a company present its corporate social responsibility efforts I think says a lot about that particular company. You're doing this not because we told you, you should do it, but because you are part of the community, and you are invested in your employees and in their neighbors and in their families, and I think that's commendable.

KLEIN: Thank you.

SANDOVAL: Thank you, Dr. Bennett. Other questions or comments from Southern Nevada? Okay, questions or Comments from Northern Nevada? And I will say there are two applications here for Caremark, one of which is for Catalyst Fund grant in the sum of -- or up to $350,000, which is $3,500 per new job created up

AMERICAN OVERSIGHT

to 100 new primary jobs at an average wage of $25 an hour. And Mr. Klein, I know you mentioned that as well, but is that an important point in terms of CVS' decision to locate in Nevada?

KLEIN: The incentive package is important in our decision-making. We found that Nevada is very, very -- a good place to be, and the incentives only help.

SANDOVAL: Thank you. If there are no further questions or comments, I'm going to take Agenda Item C and D, a motion for each -- or a motion for them together, but the Chair will accept a motion for approval of the abatement application of Caremark, LLC for a sales tax abatement, modified tax abatement, and personal property tax abatement as presented in Agenda Item 5C as well as a Catalyst Fund grant as presented in Agenda Item 5D.

SPECHT: So moved, Ray Specht.

SANDOVAL: Mr. Specht has moved for approval. Is there a second? Mr. Kramer has seconded the motion. Any questions or discussion on the motion? And again, just for purposes of the record, this is a motion for approval for Agenda Items 5C and D. If there are no further questions or comments, all those in favor, please vote aye. [ayes around] Those opposed vote no. That motion passes unanimously. Thank you. Congratulations, Mr. Klein. Good luck. Hope you're very persuasive, sir.

HUTCHISON: Governor?

AMERICAN OVERSIGHT

KLAICH: I think I will be.

SANDOVAL: Just a moment. Mr. Klaich.

KLAICH: I'm just wondering if we could ask staff to let us know when that decision is made, so don't have to wait on the newspaper or any other announcement. We're all very interested, obviously, in a company of this quality coming to the state.

SANDOVAL: So, Mr. Klein, if favorable or unfavorable, but regardless of the decision that's made, would you please inform the Director so that he could inform the members?

KLEIN: Yes.

SANDOVAL: All right, thank you very much. Have a great day.

KLEIN: Okay, thank you.

SANDOVAL: We'll move to Agenda Item 5D, which is Fortress Innovations, Inc.

URSEM: Thank you, Governor Sandoval, and again, Members of the Board. Again, Perry Ursem, Vice President of Business Retention Expansion with the LVGEA here today in show of support of the applications submitted to you by Fortress Innovations. Fortress Innovations is a manufacturer providing patented technologies for producing predesigned in-factory homes with an emphasis of hiring veterans as its primary workforce. Fortress is exploring operations in Mesquite, Nevada, to establish a 275,000-square-foot manufacturing facility that would

AMERICAN OVERSIGHT

create 30 jobs in the first 24 months, producing an average hourly wage of $25.18. Capital investment projections total $13.7 million.

I do want to point out a small typo, and I take responsibility here with respect to the owner's letter. As we were going through the application process, if you notice, Mr. Pardee's letter cites 40 full-time jobs at $24.39, and after careful evaluations, we were going through this, we decided to scale that back a bit. So, I take full responsibility for that. The letter of our support as well as the application itself as well as the calculations done by the Governor's Office reflect 30 jobs at $25.18. With that said, this application meets the requirements set forth by the Governor's Office of Economic Development and has our support, and with me today is Mr. Dean Pardee, Chief Executive Officer, who will provide further insight into his company. Mr. Pardee.

PARDEE: Good afternoon. I'd like to thank Governor Sandoval, the Board, and the Governor's Office of Economic Development for putting Fortress Innovations on the Agenda today. My name, again, is Dean Pardee, and I'm the founder and CEO of Fortress Innovations. One of my responsibilities is to oversee the operations and development of our pending Nevada headquarters. We have presented our plans to the Las Vegas Economic Alliance, and we are encouraged to apply for the incentives available to grow our business. Fortress Innovations

AMERICAN OVERSIGHT

manufactures a major disruptive technology in the building industry that is better in every building matrix.

This technology allows companies to build 26 times stronger, 40% faster, 20% to 40% less expensive, and with the highest energy efficiency ratings in the market compared to traditional stick construction. Also, it is 100% recyclable, non-biodegradable, and non-toxic, and equally important, provides seamless installation, which should, but does not exist in the building industry as a standard. Bottom line, Fortress Innovations provides the highest quality structures for all economic segments usually only reserved for the wealthy. Our products and services consist of our patented one-wall system, thermal coatings, custom homes, real estate developments and projects, predesigned homes, and even mini-homes. We anticipate gross sales of $7 million in our first 18 months and $170 million annually by year five.

Fortress Innovations will impact 13 market segments, most notably, workforce housing, luxury homes, middle income homes, senior communities, and multi-family homes, structures. It's important to note that due to the energy efficiency envelope Fortress creates, these structures can be energy independent, revenue-producing structures using solar wind and geothermal if the utility companies and state laws allow it. Our company philosophy is based on the old adage credited to Ben Franklin, a penny saved is a penny earned. This aligns with our ethos of

AMERICAN OVERSIGHT

energy saved is energy and money earned. Currently, the world cuts down 216,000 miles of forests annually, mostly for construction. That is the size of Ireland.

Fortress reduces the need for wood by up to 98% with a far better product. Whatever side of the climate debate one sits, one should demand clean air, clean water, and clean food. This is a major step to help clean up an industry that is a major cause of direct and indirect pollution. Used wood is toxic, having been treated with fire retardants and bug-resistant chemicals. This wood fills our landfills and stays there for decades as the toxic chemicals finally break down, but then are absorbed into the soil. Wood is now a commodity where developers have to incur risk by producing wood -- purchasing wood features to meet their needs years in advance. That puts risk and a delicate economy in peril.

Furthermore, we have all seen the results of aging wood homes and the fires that devastated Napa, southern California last year, and Eureka, California years ago. These fires were all fueled by aging wood-framed homes. Fortress is committed to serving veterans. We are -- excuse me, sorry. We empower our veterans and provide them with long-term jobs, well-paying jobs in manufacturing, steel framing, sales, admin, marketing, construction, and the building trades. Fortress is currently working with -- well, about a dozen workforce organizations to develop a statewide curriculum for the construction and

AMERICAN OVERSIGHT

manufacturing industries. We also plan to offer a home ownership program for our employees who reach certain milestones and tenure as a merit-based loyalty incentive.

Fortress Innovations' objective is to also develop real estate and work with municipalities statewide and to provide high-quality, affordable workforce housing. Our focus is to, excuse me, initially look into the Reno, Sparks, and Mesquite areas. Fortress Innovations will integrate philanthropic causes such as veteran support, pet therapy, responsible animal adoption from kill shelters, homelessness, and environmental initiatives into our ecosystem. Assuming the incentives being requested are granted, we are prepared to begin development efforts within three months as soon as we meet with the City of Mesquite in the last phase of our application process. We anticipate hiring 25 to 75 people over the next 24 months while investing over $5 million in equipment and another $6.4 million to build a 275,000-square-foot manufacturing facility.

The direct impact of Fortress Innovations Technology will provide jobs for ten times our projected -- or for indirect jobs statewide. Fortress Innovations' history to date in Nevada has been a challenging one. With your help, we look forward to a long-term and mutual beneficial stay. I'd like to thank the LVGEA for endorsing our endeavors, especially Perry, Brian Smith, and Kevin Bisset [phonetic] and each of you for your time and consideration today. I'm sorry. It was a long trip in today. I

AMERICAN OVERSIGHT

apologize. Thank you. I came in from Los Angeles, so a long 24 hours. Thank you. Appreciate your time.

SANDOVAL: Thank you, Mr. Pardee, appreciate your presentation, and do you -- on your application it talks about this permanent manufacturing facility and then six to ten demo homes. Do you have a demo home that is up that you've already built?

PARDEE: We've built about 150 homes in Texas, Arizona, Florida, and South America, but we do not have any of the demo homes built, but we do have the architectural plans and all the engineering behind them, and we are ready to go as soon as we have some ground to put them on.

SANDOVAL: So, would you be doing your own development or would you be selling the project to developers?

PARDEE: We'd be doing both. I'm actually speaking to several large builders and large companies that are involved directly with both the residential and commercial construction industry here in Nevada, and so we look for them to be customers of ours, joint venture, as well as we will be doing our own developments as well.

SANDOVAL: And just so I can have it a little bit better in my mind, so you have -- is it the big -- you have the floors and the walls, and they all come together, and you put it on a pad? Is that how it works?

AMERICAN OVERSIGHT

PARDEE: Well, it's not a modular home. That's a great question, because we get that a lot, but really, it's where the building industry is going towards, what they call the panelization, where we're taking custom homes, or as I mentioned, predesigned homes, and we are building the sections of those in our large factory. And that's important because we can retain the quality, maintain any of those unknown factors that occur out in the field, and retain the high quality that the project expects. And so we are not building a modular home like a trailer where we put them on a flatbed or whatever and take them out to the site and plop them down on a foundation. They're actually, again, panelized and then taken to the foundation, to the site, and then constructed in a customization -- or customized manner, but that reduces cost, saves time, and eliminates a lot of the human error, especially when you have a labor market that is in short supply, like here in Nevada. So, they tend to get, you know, lower quality -- or less skilled people that don't have that experience, and then that's when human error comes into play. And so we eliminate that.

SANDOVAL: Thank you. That was very helpful to me, and then finally for me, assuming favorable consideration of your application, when would you look to be starting construction of your building?

PARDEE: The factory, as soon as we have a set location, we're looking to do the -- finalize the engineering and

AMERICAN OVERSIGHT

do all the engineering work that we -- we're already -- we already have things in motion, but as you know, we can't do a lot of it until we actually know what the ground is and do our soil reports. But if Mesquite is where we do set up our location, we do -- we have been working with them and with engineers in the area. So, we anticipate, hopefully, within the next three to four months of actually getting a roof over our head, but in the meantime, we intend to work out of a temporary facility, possibly -- I'm talking to a couple opportunities here in Las Vegas.

SANDOVAL: Mr. Pardee, thank you. I have no further questions. Questions from Southern Nevada?

BARRETT: Yes, Governor.

SANDOVAL: Yes, Mr. Barrett.

BARRETT: This is great that you're coming here, and are you moving from California?

PARDEE: Yes, yes. That's why it's been a long 24 hours. I drove in late last night because I had a long day yesterday, but thank you, yes.

BARRETT: Could you us with the cost of the house? What range would the house be in or square footage basis? Is it an affordable house, a luxury house? What's the range?

PARDEE: Well, that is, again, a question we get all the time, and to be able to compare apples to apples, excuse me, it is best to know, you know, what the elements are that go into the house. I mean, we all know that most homes are built with

AMERICAN OVERSIGHT

the same materials, but it's the fixtures and the accouchements [phonetic] that make it substantially more per square foot, but from a framing standpoint, we're looking at about $18 to $25 a square foot, but that includes all the framing, the insulation, what they call the skin on the walls, and other elements, the electrical, the plumbing, that really aren't included in wood framing, because as you know, wood framing really just comes with the skeleton, and then you put the fiberglass insulation, which is highly ineffective, because it tends to sag very quickly after it's been put into walls. So, our composite material is actually the only known material to increase its R-value, or its thermal performance, as it ages, and it does not break down, but again, as I mentioned in my write-up here, that it is 100% recyclable, so it is non-biodegradable. But from a cost standpoint, we are, again, about 20% to 40% less when you take in the time of cost, the risk factors, the cost of money, the labor, and the materials and then what you decide to -- whether you want marble floors or, you know, other elements, that's when it gets into the breakdown.

BARRETT: That's reasonable. And in the application, the building of it in the field, is there any specialized skill beyond a trade carpenter that's needed?

PARDEE: From a framing standpoint, no. We can train anyone in -- or any team in about 48 hours. So, we had to take elements of traditional construction and using materials that were in the building industry; otherwise, we'd spend the

AMERICAN OVERSIGHT

next five or ten years of testing. So, we can train people very quickly, and especially companies that are steel framed -- or come from the steel framing industry can learn this very quickly, and we really are simplifying the building process. And if I may say, we took this to LA Building and Safety because they really set the bar for building standards around the country for the codes, and they said it's the best technology they've seen in 30 years come through their office. And we thought that was a good start, because they understood the way it goes together and the structural strength, and not only its structural, but also the fire performance, and most importantly, for the thermal.

BARRETT: That's wonderful to hear. Just one more question on the building side of it. What's the availability for the multi-story heights? How big can you -- tall can you build these?

PARDEE: We can do commercial projects up to 15 stories if it's in a non-seismic, high-wind area. If it gets into those considerations, we really don't want to go more than six stories, and it's not because there are any limitations to the technology. It's just that we have to put more -- and we will. We intend to put more engineering and testing in place to be able to go higher.

BARRETT: Well, this is another example of the great innovation that we need here, and there's a unique area of

AMERICAN OVERSIGHT

affordable housing that we all need in Nevada. So, I'm looking forward to supporting this.

PARDEE: Thank you.

SANDOVAL: Thank you, Mr. Barrett. Other questions or comments from Southern Nevada? Any questions or comments from Northern --

SPECHT: Just one question, please.

SANDOVAL: Oh, Mr. Specht, please proceed.

SPECHT: Thank you, sir. This does look like a great innovative product for the building industry and also great for the environment, so looking forward to seeing more about this. The ratio between tax revenue and the incentives is really, really good. One question, is the job creation -- it looks like it's at 30. Five-year projection is 180. I know you're trying to get up off the ground, but what is the probability we'll hit that 180?

PARDEE: Well, when we calculated that number, it was considering not only our in-factory jobs, our whole -- all our processes and procedures, but also our field construction, because as I mentioned, we intend to be a real estate developer as much as a material supplier to other developers and individual homeowners. So, when you aggregate those all together, we find that to be very reasonable, if not probably understating what we could, because this should be able -- and should replace wood. So, anywhere where stick framing is used, this is a much better

AMERICAN OVERSIGHT

product, and so we anticipate trying to take market share away from traditional stick framing. And as you know, the building industry is very active, especially in Nevada. So, we're hoping to -- and with the help of these relationships that we're developing, we're hoping to propagate this out very quickly into the economy, locally and statewide.

HUTCHISON: Governor?

SANDOVAL: Yes, Mr. Lieutenant Governor.

HUTCHISON: Thank you. Mr. Pardee, welcome, and thank you for making the effort to be here, and we really appreciate the presentation of the application, and thanks for your commitment to the veterans and to the opportunities. It's a priority for our state, and the Governor's Office in particular has a real emphasis and effort with the veterans, so thank you very much. My question for you is the application and then your letter says that you're focusing on the city of Mesquite. I also heard, though, Sparks and Reno. Is your focus still the city of Mesquite? If you can make it happen in Mesquite, you're going to -- you're going to do these things?

PARDEE: Yes, yes. What I meant when I mentioned Reno, Sparks, and Mesquite was that was for the workforce housing.

HUTCHISON: Oh, I see.

PARDEE: And so we do anticipate continuing to work with the City of Mesquite, and if all goes well, then that is --

AMERICAN OVERSIGHT

we actually -- we do have some land. I don't know if I made that clear, but we do have some land that we've been talking to the City about, but we are -- of course, you always need to find backup plans, but we fully intend to be in southern Nevada for our manufacturing headquarters. And then everything we build and then as we take this out state -- or excuse me, nationwide and even internationally, everything will be aggregated and built out of our headquarters.

HUTCHISON: Well, I'm just very pleased to see that you're headed to the city of Mesquite, a lot of great people there. I assume that you're going to pull your workforce out of Mesquite if you're there?

PARDEE: Well, that's -- there's -- we're probably going to have to bring a lot of people into Mesquite. There's not a large workforce there. So, again, as I mentioned in this, the workforce organizations that we're talking to, Nellis Air Force Base, Alpha Roster up in northern Nevada, all these organizations, we're going to be pulling those, putting together a training program that is hopefully statewide with CSN and other organizations, and then hopefully enticing these people, these workers, to move to Mesquite and enjoy the fruits of that area.

HUTCHISON: Yeah, it's beautiful out there and just very pleased to see that you're out in the city of Mesquite and take advantage of all those wonderful people out there, and it's a good place to start. I think there's a lot of good people who

AMERICAN OVERSIGHT

are looking for opportunities like this, so congratulations. Thank you again. I look forward to supporting the application. Thank you.

PARDEE: Thank you very much.

HUTCHISON: Thank you, Governor.

SANDOVAL: Thank you, Mr. Lieutenant Governor. Any further questions or comments from Members of the Board? I hear none. The Chair will accept a motion for approval of the abatement application of Fortress Innovations, Inc. for a sales tax abatement, modified business tax abatement, and personal property tax abatement as presented in Agenda 5E.

BARRETT: So moved.

SANDOVAL: Was that Mr. Barrett? Mr. Barrett has moved for approval.

BARRETT: Yes.

SANDOVAL: Is there a second?

KLAICH: I would second that, Governor.

SANDOVAL: Mr. Klaich has seconded the motion. Any questions or discussion on the motion? I hear none. All those in favor please say aye. [ayes around] Opposed, no. That motion passes unanimously. Mr. Pardee, congratulations, best of luck, and we look forward to what you have in store for the future.

PARDEE: Thank you, everyone, for your time, appreciate it.

AMERICAN OVERSIGHT

SANDOVAL: Thank you. Agenda Item 5F, Fulcrum Sierra Biofuels, LLC.

MCCORMICK: Good afternoon, Governor, Lieutenant Governor, Secretary of State, Director Anderson, and Board Members. For the record, I'm Nancy McCormick, Senior Vice President of Retention and Expansion for EDAWN. I'm presenting an application today for Fulcrum Sierra Biofuels, which is preparing to expand its existing feedstock processing facility in Storey County. Headquartered in Pleasanton, California, their northern Nevada location processes municipal solid waste, known as MSW, which will be transported to its biorefinery for conversion into renewable transportation fuels. The biorefinery groundbreaking took place yesterday, and multiple key strategic relationships are already in place to support their growth and business plan. They're requesting a sales and use tax abatement, modified business tax abatement, personal property tax abatement, and real property tax abatement for recycling and qualify on three out of the three abatement criteria. They plan to invest an additional $13.2 million in new equipment to be housed in an additional 29,000-square-foot building, which will enable them to further process the MSW for transport to the biorefinery. They plan to add 13 full-time positions at an hourly wage of $22.04 to their current base of ten.

In addition to generating nearly 50 jobs at the peak of construction, Fulcrum offers full medical, vision, and dental

AMERICAN OVERSIGHT

benefits to its employees beginning with the first day of the month following date of hire and pays 100% of the premiums in addition to providing other programs such as 401K, life insurance, short and long-term disability, bonuses, and other benefits. EDAWN supports this application which helps position Northern Nevada as a leader in renewable energy technology. Now I would like to introduce Jeanne Benedetti, Senior Director Project Development, to say a few words and answer any questions that you may have.

BENEDETTI: Thank you, Nancy, for that introduction. Good afternoon, Governor, Lieutenant Governor, Secretary of State, Director Anderson, and Members of the Board. I'm Jeanne Benedetti, and I also serve as Vice President of Fulcrum Sierra Biofuels, LLC, and yes, we did have a groundbreaking yesterday for our biorefinery that's going to be located in the Tahoe-Reno Industrial Center in Storey County, and we do have a separate abatement agreement that GOED approved, and that's a separate matter. We also have had an abatement agreement for the stage one of our feedstock processing facility. I would just like to say that that has been implemented very nicely. We're in compliance, and it's been a delight to work with not only GOED, but the Department of Taxation as they came out and did their audit at the end of that.

It's been -- it was very -- an easy, painless process as we gave our abatement letter to our vendors as they went out and

AMERICAN OVERSIGHT

bought the equipment both on an international basis and domestically as equipment arrived in the state of Nevada. Our plant is located, as you know, near the Lockwood landfill. We're diverting MSW directly from the landfill to be processed in that facility. As we have had the opportunity to work and operate that facility since June of 2016, it has afforded us the opportunity in advance of our groundbreaking of our biorefinery to really work out the bugs of this first-of-a-kind facility not only in the nation, but in the world, and we've been able to actually experiment and optimize and say, what can we do to -- how do we integrate the components that are very, very common in the waste sector where you take -- you know, we take your recyclable stream, and we separate your recyclables. A plant might take that equipment and sort your recyclables into a type of plastic or a type of paper. But what we're doing is we're taking your waste stream and creating a feedstock that's going to be turned into a fuel.

So, what we need to do now is we need to buy some more equipment and put it into our feedstock processing facility so that we can optimize and improve the quality -- that kind of sounds weird. We're improving the quality of your garbage so that we can make a better fuel at the back end of our biorefinery. You know, we're trying to optimize the amount of biogenic component, reduce the amount of large pieces of metal that go into our shredders. Nancy has had the opportunity to

AMERICAN OVERSIGHT

come out to our feedstock facility, and the first thing that happens in the process is all the garbage currently goes onto a conveyer. Everything that comes out of that garbage truck goes on a conveyer and gets shredded in this massive shredder, and everything out the back end of that shredder is eight inches or smaller.

Well, what we're going to do -- one of the pieces of equipment we're going to buy is called a trommel, and that trommel rotates, and anything that's eight inches or smaller will get dropped out. So, we're going to -- we're going to reduce the burden on that shredder, so now it's only really shredding the things that are eight inches and larger. And so what we -- the things that are eight inches and smaller, they don't need to be shredded. So, those will be now reinjected in the process further on, and so we can now improve the quality of the material that is then further separated down the feedstock processing system in the air separation. I know this is getting geeky, but -- and actually, this time of the last year-and-a-half or two years has really afforded us that opportunity to really look at how we can improve the process, get this additional equipment installed with some additional building space that we have to build and have it online at about the time that the biorefinery is up and operating and actually needs this feedstock as the fuel that goes into the gasification system.

AMERICAN OVERSIGHT

I know there's a few Members on GOED that weren't around when we've been before you before, and so just as a real short -- I know you have a full Agenda, but what we do, do is that we take this feedstock; we gasify it into a synthetic fuel, and then we clean it. We run it through some catalysts. We reformulate those molecules into long-chain hydrocarbons, and then we hydrocrack it like any refinery does into a product, and what that product is going to be is jet fuel. And so we then -- that jet fuel will then be blended with fossil jet, and so when you fly on a plane, as our technology is then multiplied throughout the country, the planes that you fly on, you know, in the future will be a part biojet made out of garbage and fossil jet. So, thank you very much, and I appreciate your consideration of our application for expansion. I'll answer any questions if you have any.

SANDOVAL: Thank you, Ms. Benedetti, and thank you for the opportunity to attend the groundbreaking yesterday.

BENEDETTI: Oh, thank you for being there.

SANDOVAL: As I said, it was well-attended. It's exciting prospect, and to have representatives from the airline industry as well as the Department of Defense was very impressive. So, I -- and I was thinking about this yesterday, and just out of curiosity, so you -- do you take -- do those waste streams come straight to you or do they go through waste

AMERICAN OVERSIGHT

management, through Mustang dump, and then you take it from there?

BENEDETTI: The waste is actually -- currently, what's happening is the trash is going through the waste management transfer station there along the river, and so the route trucks that are picking up garbage curbside by generators is going into the transfer station, get loaded on those long-haul transfer trailers. And as they go through the Lockwood gate at the bottom of the hill by the Truckee headed to the scale house, there's actually a light that when we need garbage, our person in our facility hits the button. The light turns green, and the truck then knows that he's past the light. He turns right into our facility rather than continuing a quarter mile to the scale house.

SANDOVAL: Wow. So, do you have any idea of what percentage of the trash that you are taking that's coming in?

BENEDETTI: Do you think -- of course, about 55%.

SANDOVAL: You're taking --

BENEDETTI: Well, no, 55% of what we take goes to feedstock. So, it's about half of what Lockwood takes in every day.

SANDOVAL: But that's the thing. You're taking in half of the trash that's coming in to Lockwood.

BENEDETTI: Yeah, and that will be -- Governor, that will be when the biorefinery is up and operating. We'll be

AMERICAN OVERSIGHT

taking half of what goes into Lockwood, we'll take and touch, yes.

SANDOVAL: So, that's probably 100% of the trash that's coming out of Reno.

BENEDETTI: Yeah, and that's why we have to reach other places.

SANDOVAL: So, you're taking from Sacramento. That's my understanding, correct, their waste stream, and then that's to start, correct?

BENEDETTI: Right.

SANDOVAL: It's likely that you'll need to take even more, and then if I remember right, you're taking all that trash, and only 10% is coming back.

BENEDETTI: It's 10% of it gets recycled, and what 10% of that is, it's the ferrous and non-ferrous. So, even though you and I put our metals --

SANDOVAL: Let me stop you. It's what and not what?

BENEDETTI: Oh, metals, like this microphone --

SANDOVAL: Ferrous you said?

BENEDETTI: -- would be ferrous.

SANDOVAL: Okay.

BENEDETTI: Aluminum cans is non-ferrous. You know, we try to recycle that stuff, but there's a lot that still remains that goes to the landfill phase, and so we pull that stuff out and we sell it off. So, we're able to still get in there and

AMERICAN OVERSIGHT

pick stuff out like scavengers and, you know, not landfill that stuff. We might as well, and we turn it -- then can sell it to the scrap metal sellers, who then can clean it and turn it in to another after-market product. High-value plastics, like your water bottle, we'll pull those that we can pull out, and then about -- you know, what we're not looking really for is, like, the wet material, the food waste, because it takes a lot of energy to drive off the water before you can gasify something. So, if you think about a tomato, you have to drive off all that water in that tomato before you can actually gasify the solid piece of the tomato. So, we're not interested in that. There's other types of technology that can take that tomato and gasify it and turn it into a methane, like anaerobic digestion, that's more suited for that part of our waste stream.

SANDOVAL: No, and these questions I know aren't really that germane to the application.

BENEDETTI: It's fascinating.

SANDOVAL: But it's truly fascinating to me, but it almost, to me, may make obsolete the reason to separate the recycling. I mean, right now, we have these two big containers that I have, and I put all my plastic and my aluminum -- I dutifully do that all the time, but if you're separating it anyway, is there a reason to do that, because you're, in essence, recycling it into jet fuel and some of those other things that you just described.

AMERICAN OVERSIGHT

BENEDETTI: That's a very good observation, and you think about the reduction of trucks that need to go through the neighborhoods every day, because if you don't have the same garbage truck picking up the same container, you can almost eliminate one truck going through the neighborhood, picking up -- because we are an alternate form of recycling, yeah.

SANDOVAL: Like the old days. I mean, that's how they used to, obviously, do it in the old days, and then you pay Waste Management for that trash.

BENEDETTI: No.

SANDOVAL: You do not? Oh. I'm probably getting something proprietary there, so I apologize for that. But no, I mean, I guess at the end of the day, it's going to make the landfill almost obsolete.

BENEDETTI: Well, you're still going to need the landfill to take -- there's still waste that we don't want and can't take, like the tires and the mattresses, and there's still bulky stuff that we just can't gasify. It's not good for the gasification system. So, I still think you're going to need the gasification -- the landfill, but the amount that goes in the landfill can be very highly reduced, absolutely.

SANDOVAL: Okay. Well, thank you. I probably should have asked these questions yesterday, but I think it's fascinating. So, questions from Northern Nevada, Mr. Klaich.

AMERICAN OVERSIGHT

KLAICH: This is, again, along the lines of some of the Governor's questions, but can you give me an idea of the economics of this process if that's not proprietary? First is fossil?

BENEDETTI: Yeah, I watched the news this morning and saw the news clip, and my CEO said on the news, so I guess I can repeat this, it costs us about a dollar a gallon to produce the staff. So, if you compare that to fossil, we can always produce this cheaper than fossil, because the feedstock is free.

KLAICH: Awesome, thank you.

SANDOVAL: I hate to butt in, because I know there -- but why wouldn't you do it for vehicles?

BENEDETTI: Well, we can. We can make diesel. So, out the back end, when you're hydrocracking that long-chain hydrocarbon, you could make -- you could make diesel. Our strategic partners happen to be airlines. The Department of Defense, they would like military diesel as well. So, it all depends at the time who's putting equity into the project.

SANDOVAL: I guess part of that answer is the oil companies, but any event, it's fascinating to me, and I didn't mean that pejoratively if there's any representative of the [laughter] of the oil industry. Yeah, just curiosity. All right, Mr. Kramer.

KRAMER: Just more comment. As your neighbor out there at the Tahoe-Reno Industrial Center, I think it's a

AMERICAN OVERSIGHT

phenomenal statement for Northern Nevada and for the state as a whole, but looking at all of the companies that are leaders on renewable energy and to have you as a neighbor and doing what you're doing -- I know there's another biodiesel refinery plant that's also being built there using feedstock at the park as well. It's so amazing to see all this innovation happening in an area, and I was actually sitting in the audience the first time you applied for your first abatement and happy to be on this side as well and look forward to supporting the application, thankful that you are continuing to grow here in Nevada with us.

BENEDETTI: Thank you. Thank you.

SANDOVAL: Thank you, Mr. Kramer. Questions from Southern Nevada?

HUTCHISON: No questions here, Governor.

SANDOVAL: And thank you, Mr. Lieutenant Governor, and just another comment on top of what Mr. Kramer said is there happens to be a battery recycling facility right next to that store as well, all of this within -- less than a mile of one another, and that battery entity -- or recycling entity had appeared before this Board in the not-too-distant past as well. So, to have that type of a concentration of companies is truly, again, a compliment, back to the comments I made in Agenda Item No. 3. All right, if there are no further questions or comments, the Chair will accept a motion to approve the abatement application of Fulcrum Sierra Biofuels, LLC for a sales tax

AMERICAN OVERSIGHT

abatement, modified business tax abatement, personal property tax abatement, and real property tax abatement as presented in Agenda 5F.

KRAMER: So moved.

SANDOVAL: Mr. Kramer has moved for approval. Is there a second?

KLAICH: I would second the motion, Governor.

SANDOVAL: Mr. Klaich has seconded the motion. Any questions or discussion? I hear none. All in favor say aye. [ayes around] Those opposed say no. That motion passes unanimously, congratulations.

BENEDETTI: Thank you for your support.

SANDOVAL: Thank you. I'm going to take Agenda Items 5G and H, KRS Global Biotechnology, Inc.

WALSH: Good afternoon, Governor, Lieutenant Governor, Madam Secretary, Executive Director, and Board. For the record, Michael Walsh with the Las Vegas Global Economic Alliance. I'd like to introduce you to KRS Global Biotechnology, Incorporated. Present with me today is their president and CEO, Riccardo Roscetti. KRS Global is requesting the sales and use tax abatement, modified business tax abatement, personal property tax abatement, and KRS Global will have a capital equipment investment of $34,500,000. They will hire 50 employees within the first 24 months of operation with an average wage of $25.

AMERICAN OVERSIGHT

KRS Global Biotechnology meets the statutory requirement for tax abatements.

A little bit about KRS Global, they are an FDA registered medical device manufacturer. They make custom pharmaceuticals, sterile products such as syringes and IV bags, purified water for drug manufacturing, and a kit used by hospitals and other compounding pharmacies to test their technicians. The company provides its services to patients, surgery centers, ophthalmology clinics, hospitals, university, and veterinarians nationwide and is committed to being the top provider of these compounding services. I'd like to turn it over to Mr. Riccardo Roscetti to answer any questions that you may have and explain the project in further detail, Riccardo, thank you.

ROSCETTI: First of all, thank you, Governor, Lieutenant Governor, Madam Secretary, Members of the Board for the opportunity to present my company to you. KRS Global --

SANDOVAL: Mr. Roscetti, if I may interrupt you. Will you turn on your microphone, please, sir? There we go.

ROSCETTI: Excellent, thank you. KRS is 20 years old. I'm one of the founders. We started, myself and another person. We're in the first stage. I made all the drugs, and he sold them. Today, we sit at about 114 employees out of Boca Raton, Florida. We are actually looking for a second site that will be considerably bigger as far as manufacturing capabilities. We're looking at Arizona, Texas, and of course, Nevada. We're actually

AMERICAN OVERSIGHT

very excited about Nevada. Usually, in the past, I fly in for a convention, fly out, and I've already been here several times, you know, to explore outside the strip, and you have a beautiful city, and you should be very proud of that.

One thing that attracted us to Nevada, first of all, obviously, we look at the workforce. It's well-trained. You have a solid workforce, but you were all able to create an economic environment that is extremely attractive to us. Also, if you go further down and you look at an ecosystem that you're actually building in the biotechnology pharmaceutical space, with the investment of your medical school, that's extremely attractive to us as well. So, when you look at all these factors, Las Vegas, Nevada, looks very good to us.

Again, we specialize in drugs, all injectable drugs. So, it's a highly skilled labor force. Everything has to be sterile. We're regulated by the FDA and the DEA on some of the control drugs that we produce for hospitals, doctor's offices, and veterinary clinics. In a nutshell, we're looking to build a 75 to 80,000-square-foot facility and hopefully have it operational within eight months.

SANDOVAL: Thank you, Mr. Roscetti, and welcome, and I appreciate your presentation. You answered most of the questions that I have, but I think it's notable -- perhaps if you didn't toot your horn, maybe I will, but it says that you're considered one of the top 50 Florida companies to watch by Grow Florida, so

AMERICAN OVERSIGHT

that's certainly a compliment to you. Now, you've mentioned that one of the factors that has really attracted you to Las Vegas is the workforce. So, what does the individual look like or what is the skillset that you're seeking to attract for your company?

ROSCETTI: Well, there's several -- I mean, obviously, we're looking at technicians, where in the past in Florida, we actually set up a technician training school where after two years, they would actually get certified as a pharmacy tech, but I was made aware of opportunities here working with local colleges and universities that we can work together with them to train our workforce, and that's extremely attractive to us. And also good for the entire industry. I mean, I personally, you know, see other pharmaceuticals looking at your state as being very attractive from other CEOs I've spoken to.

SANDOVAL: Thank you, Mr. Roscetti, and if you're patient, if you wait further on in our Agenda, Agenda Item No. 7, you can see exactly how that process works in the state in terms of the collaboration between the private enterprise and business and our universities and the training programs that we have. It's exactly what you described at that moment. Now, as one of the main representatives of your company, assuming favorable consideration of your applications, is it likely that you will choose Las Vegas?

ROSCETTI: Yes.

AMERICAN OVERSIGHT

SANDOVAL: Great. [laughter] We like definitive answers like that. All right, I have no further questions. Questions or comments from Southern Nevada?

HUTCHISON: Governor?

SANDOVAL: Yes, Mr. Lieutenant Governor.

HUTCHISON: Thank you. Mr. Roscetti, thank you very much for coming in and presenting us with another wonderful application and a very fine company. Congratulations on building that company and the progress that you've made and the success that you've had. I was intrigued by your reference to the medical school. Let me ask you this question. If Las Vegas didn't have a medical school, would you be considering Las Vegas for a location for your company? Did it play that important of a factor in your decision?

ROSCETTI: It did. It did, because I believe UNLV in particular is very forward-looking. To have an agenda and professors to set up a medical school is, one, a very difficult task.

HUTCHISON: Right.

ROSCETTI: We are also always looking for transfers between university and biotech or pharmaceutical, and generally, universities and schools that have a strong medical school have the right talent and right production capabilities or products that we would be interested in.

AMERICAN OVERSIGHT

HUTCHISON: Okay, wonderful, and have you had a chance to connect yet with UNLV Medical School and begin to collaborate with them already?

ROSCETTI: No, we have not.

HUTCHISON: Okay.

ROSCETTI: We are looking forward to doing that.

HUTCHISON: Good. Well, we look forward to having you here. I'm a lawyer. I pretty much accepted your response to the Governor's question as an admission that if we do approve this, in a contractual commitment --

SANDOVAL: Hey, we're not deposing anyone here, Mr. Lieutenant Governor.

HUTCHISON: I'm just --

ROSCETTI: I can tell you this. If you approve it, I already have an engineer in my COO booked on the plane on Monday.

HUTCHISON: That's good enough for me. That's good enough for me, Governor.

SANDOVAL: All right.

HUTCHISON: All right, thank you again, and welcome to the great state of Nevada.

ROSCETTI: Thank you very much.

SANDOVAL: Thank you, Mr. Lieutenant Governor. Questions or comments from other Southern Nevada Members. Looked like a mic drop there, huh, Mr. Lieutenant Governor? [laughter]

HUTCHISON: He's got what he wants, Governor.

AMERICAN OVERSIGHT

SANDOVAL: All right. Any other questions or comments? I mean, just again, this is a proven company from the great state of Florida, top 50 Florida company to watch, 2016 named South Florida Manufacturer of the Year by the South Florida Manufacturer Association, in an area that we want to focus on and be successful. And as Mr. Roscetti said, that perhaps there are other prominent companies that may follow along seeing the experience that KRS would have here as well. So, I'm really excited about this application. And then just for purposes of the record, I mean, we do have Agenda Item 5G, which is associated with the tax abatements, but we do have Agenda Item 5H, which is the Catalyst Fund request, which would be $4,000 per new job created up to 80 new primary jobs at an average wage of at least $25 an hour. The period would start from the approval of the award and end no later than July 1, 2019, and then there's a similar period to award to end no later than July 1, 2020, and the maximum payment per year would be $320,000, just for the benefit of the members so that we have a record when I take a motion. Do any of the members have a question with regard to Agenda Item 5H? Okay, if there are none, the Chair will accept a motion for approval of the abatement application of KRS Global Biotechnology, Inc. for a sales tax abatement, modified business tax abatement, and personal property tax abatement as presented in Agenda Item 5G as well as a Catalyst Fund application as presented in Agenda Item 5H.

AMERICAN OVERSIGHT

BARRETT: So moved, Barrett.

SANDOVAL: Mr. Barrett has moved for approval. Is there a second?

KLAICH: I'll second it, Governor.

SANDOVAL: Mr. Klaich has seconded the motion. Any questions or discussion on the motion? There are none. All in favor say aye. [ayes around] Those opposed say no. That motion passes unanimously. Congratulations, Mr. Roscetti, and best of luck.

ROSCETTI: Thank you.

SANDOVAL: Our next Agenda item is 5I, Polaris Industries, Inc.

HASKIN: Good afternoon, Mr. Governor, Mr. Lieutenant Governor, Madam Secretary, and Board Members. For the record, my name is Andrew Haskin, Director of Business Development for Northern Nevada Development Authority. I'm here today to present Polaris Industries for incentives. They're applying for the sales and use tax abatement, modified business tax abatement, and the personal property tax abatement. Polaris Industries is an industry leader in powersports worldwide. Should Nevada be selected for their new facility, it would serve as their west coast distribution facility, and it would be a new 500,000-square-foot building.

The project would create 64 new jobs at an average hourly wage of $21.95 an hour with excellent -- excuse me -- benefits.

AMERICAN OVERSIGHT

The investment would be roughly $47.6 million, total, $13.65 million in capital equipment, and NNDA fully supports this application, respectfully requests approval. One thing I do want to note is that we appreciate the partnership with EDAWN, with Chris and with Stan. You know, I'm sure you're aware, but a lot of projects, we end up working with the same companies, and so when it came down to it, NNDA took the lead on this, but we worked really close with Chris on this one. So, I'd like to point that out, and with that, I will introduce Paul Eickhoff. He is the Director of Distribution and Supply and Management for Polaris.

SANDOVAL: Good afternoon, sir, and welcome.

EICKHOFF: Good afternoon. I'd like to thank you, Governor, the distinguished Board Members, and the Governor's Economic Development Board for putting us on the Agenda and listening to our business case today. Like he said, my name is Paul Eickhoff. I'm the Senior Director of distribution. I'm the lead for this project, and I will be leading the decision-making on this project. We reviewed the plans with Andrew Haskin and encouraged to apply for the incentives we are presenting.

Like to give you a brief overview of Polaris. Polaris is an industry leader in powersports. We started in 1954. We grew up in Minnesota as a snowmobile company. Over the last 64 years, we've become a highly diversified international company. We design, engineer, manufacture snow, ATV, UTV, motorcycle, and

AMERICAN OVERSIGHT

electric vehicles, and we have a large aftersales business in parts and accessories and apparel.

You will likely recognize a number of our premium brands, Indian Motorcycles, Ranger, RZR, Rubicon, Smittybilt, TAP, Transamerican Auto Parts, four-wheel-drive parts, Slingshot, Climb, 509 just to name a few. Our successes would not be possible with the 11,000 passionate employees we have. We pay competitive wages and benefits. We do profit sharing, ESOP, and stock options.

Next, I would like to describe the siting project we'd like to talk about today. The State of Nevada is in consideration for our western distribution center. We are looking for our site to build a new 500,000-square-foot distribution center to distribute parts and accessories. The city of Fernley is our first runner in Nevada. We're also considering Utah and Arizona. We anticipate to hire about 64 employees over the next two years, estimated wage is at $21.95, including medical, dental, 401K, merit raise, and stock and profit sharing.

Training is really important. We do a lot of on-the-job training. We'd love to understand what we can do as far as training to create skilled workers, and our estimated investment is about $47 million of rural property and personal property. If Nevada is selected, we'd be operational in Q2 of 2019. When Polaris decides to locate in a city, we're part of the community. We're not just a building with a name, and I can attest to that

AMERICAN OVERSIGHT

over my 16 years in the distribution centers. We are volunteers. We're board members. We're coaches. We're a part of that community.

The incentives would help close the gap of Nevada versus Utah and Arizona. We see a lot of benefit from locating in Nevada, but we also see a lot of benefits to the community that they would receive from Polaris being there. I'd be happy to answer any questions you have.

SANDOVAL: Mr. Eickhoff, thank you. So, are you the guy? Is it your decision?

EICKHOFF: It is my decision.

SANDOVAL: Wow, we better be nice to you. No, in all seriousness, Polaris is an amazing company, and this is a great opportunity. So, you would be building your facility from the ground up? You wouldn't be taking an existing facility?

EICKHOFF: That is correct. We looked for existing facilities, but didn't see a facility that fit our needs as far as size. So, we would do a green field, ground-up build.

SANDOVAL: And so you would need to have that completed in basically nine months, because if you said Q2 of 2019 --

EICKHOFF: Yes. So, if we purchased the land and started in the ground about August, we could --

SANDOVAL: You could do it?

EICKHOFF: Yes.

AMERICAN OVERSIGHT

SANDOVAL: Now, you've heard me ask -- you've been in the audience. I saw you out there, and so I -- you know, I'll ask the same question, and, you know, again, I'm not trying to put you on the spot, but given favorable consideration of your application today, you said that that would close the gap between Nevada and Utah and Arizona. So, is that the main consideration, is a fiscal one?

EICKHOFF: Yes. Obviously, at a large company like we are, we have a public company, finances are really tight, and that's what I spent every day of the last two years trying to figure out how we could pull this project off.

SANDOVAL: And where is home for you?

EICKHOFF: I'm in Minneapolis. That's our corporate office.

SANDOVAL: So, you wouldn't move to wherever this is being built, would you?

EICKHOFF: I actually moved to Minneapolis. I was in South Dakota and ran that facility, which is our hub DC, about 600,000 square feet, and moved to Minneapolis to be in a corporate role for the last two years. And not until my daughter gets out of high school will I move again.

SANDOVAL: Well, I'm trying to be a little more subtle than the Lieutenant Governor is, but -- so, when is that -- when would that decision be made? When would you make that decision?

AMERICAN OVERSIGHT

EICKHOFF: I'd like to make that in the next week or two.

SANDOVAL: Okay, and so -- and again, does that -- where does that put Nevada in the pecking order if you were to receive personal -- not personal, but favorable consideration of your application?

EICKHOFF: I like your chances.

SANDOVAL: I like your answer. [laughter] All right. That's all the questions that I have. Mr. Klaich.

KLAICH: Governor, I have more comment than a question. A number of these meetings we've had public comment and others regarding making sure this Board and our staff and the NNDAs look at rural Nevada as well as Reno, Sparks, and Las Vegas, and I'd just like to mention that there have been a couple of great applications here today in rural Nevada, this being one, would be a remarkable addition to the city given the comments that we've heard this morning. So, I'll leave the -- I'll leave the pressure where the Governor did, but look to favorable decision.

SANDOVAL: Mr. Kramer.

KRAMER: So, just to help with the sales job here a little bit, so this morning at our EDAWN Board Meeting, the Mayor of Fernley didn't mention this project by name, but mentioned that they were very much doing whatever they could to help make sure, and so that's the other important partner in our economic

AMERICAN OVERSIGHT

development of local government and to have a mayor, especially in a rural community, who's committed to making this kind of project work. I think you won't find a better partner than you will with local partners like the mayor of Fernley and having those people in your corner. So, just when you're making a decision, just to put that out there.

EICKHOFF: Thank you.

SANDOVAL: Thank you, Mr. Kramer. Questions or comments from Southern Nevada.

CEGAVSKE: Governor?

SANDOVAL: Madam Secretary.

CEGAVSKE: Thank you. I just want to know where we can help facilitate anything. Being a Minnesotan, I know all about Polaris, and I have a sister who lives in Minneapolis, so I know all about the snow mobiles, had a mini through my life in Minnesota, but I have to tell you I was really pumped up with your explanation and talking about the snow. We've got a lot of snow in Lake Tahoe. They get it in Reno. They get it in Carson. So, one day in the -- Governor, I think you were going to assign a day that nobody had to come to work because of the snow, and I told my employees that day, because it was the last day to sign up for something, that they had to go get snowmobiles to go to work in Carson City just to make sure the doors were open and we didn't have any issues. So, I am a huge fan of snowmobiles, just saying, but I think Fernley would do really well by having you

AMERICAN OVERSIGHT

there. There's a -- I've been there several times. I know there's a lot of area there to build, and that's what you're considering, but I just can't say enough for having you come to Nevada and be a part of where we are, because it's a great fit. Thank you, Governor.

SANDOVAL: Thank you, Madam Secretary. Other questions or comments from Southern Nevada.

HUTCHISON: Governor?

SANDOVAL: Yes, Mr. Lieutenant Governor.

HUTCHISON: Mr. Eickhoff, thank you again for being here. Just a couple of quick questions for you. The other states that we're competing with, did you say that it was Utah and Arizona?

EICKHOFF: That is correct.

HUTCHISON: All right, just one follow-up question for you, then. You had said in response to the Governor's question that you like our chances. Do you like our chances better than Arizona and Utah? [laughter]

EICKHOFF: I'll get back to you on that answer after you vote.

HUTCHISON: Well, I would normally follow-up and say that's nonresponsive and it's just not an answer, but Governor, we're done with questions down here in the South.

SANDOVAL: And if I was still a judge, I would say stop badgering the witness. [laughter] All right, other

AMERICAN OVERSIGHT

questions or comments from Southern Nevada. All right. Again, Mr. Eickhoff, I think it speaks volumes that you personally are here. So, that, to me, really shows how meaningful and how serious you are about this. I mean, I guess piggybacking on the Secretary of State, I don't know how much time you spent in Fernley, but it's a fabulous community, and the mayor -- and all the local government and the residents there are -- it's really important to them for the quality of like that they have, but particularly, the magnitude of the company. And certainly, your company is one that is very well-respected with an international reputation. So, again, I hope we've done everything that we can do in terms of what your calculous is to make your final decision. I'm in full support of this application. I think it's a great opportunity for us, for us being the State of Nevada and the local area. And, you know, you've heard us talk a lot about technology and this new Nevada, but we also pride ourselves on distribution and logistics, and I think we're very good at that as well, and there's quite a skilled workforce out there that has experience there as well. So, I think you'll find all the ingredients that you're looking for in terms of quality of life and skilled workforce and affordability right here. So, if there are no further questions or comments, the Chair will accept a motion for approval of the abatement application of Polaris Industries, Inc. for a sales tax abatement, modified business tax

AMERICAN OVERSIGHT

abatement, and personal property tax abatement as presented in Agenda Item 5I.

KLAICH: So moved.

CEGAVSKE: Move for approval.

KLAICH: I'll second the Secretary's motion.

SANDOVAL: Okay, Madam Secretary has moved for approval. Mr. Klaich has seconded the motion. Any questions or discussion? I hear none. All in favor say aye. [ayes around] Those opposed say no. That motion passes unanimously. Mr. Eickhoff, again, thank you.

EICKHOFF: Thank you.

SANDOVAL: And kind of similar -- if you would -- once you've made your decision for better or for worse, if you could let us know, we'd really appreciate it, and Mr. Anderson, if you could let the members know.

EICKHOFF: Be my pleasure.

SANDOVAL: Thank you, sir. Next is Agenda Item 5J, Ritchie Bros. Auctioneers (America), Inc.

URSEM: Thank you, Governor Sandoval, Lieutenant Governor, Madam Secretary, Director Anderson, and Members of the Board. Again, Perry Ursem with the Las Vegas Global Economic Alliance. I'm here today in show of support for the application submitted by Ritchie Bros. With operations in North Las Vegas, Ritchie Bros. provides auctioneering and logistic services for transportation and heavy equipment that serve several key

AMERICAN OVERSIGHT

industries across the globe. Ritchie Bros. is exploring their operations to expand current operations, adding 25 new jobs to their existing staff of 14, producing an average hourly wage of $22.94.

An exceptional detail I'd like to point out in this application is the company's commitment to covering over 97% of the employee's premium for health benefits. Capital investment projections total approximately $3 million with this opportunity. This application meets the requirements set forth by the Governor's Office of Economic Development and has the full support of the Las Vegas Global Economic Alliance. I would also like to thank Ms. Gina Gavin, who's with us today in the audience, Director of Economic Development with the City of North Las Vegas, and her team for their letter of support with this application through Mayor John Lee. With me today is Mr. Randy Berry, Senior Vice President of Digital Operations, and Mr. Connor Humphrey, Vice President of Gov Planet, which is a subsidiary of Ritchie Bros., and Mr. Berry has further information to provide insight to this application. Mr. Berry?

BERRY: Thank you, Perry. First of all, I want to -- on behalf of Ritchie Bros.' executive team, our employees, our investors, and our other stakeholders, we really want to thank the Governor and the other Members of the Board for having this opportunity for us to be considered for this program. A little bit more history on Ritchie Bros., so Ritchie Bros. has been

AMERICAN OVERSIGHT

around for 60 years. We're the largest industrial auctioneer in the world. We're a publicly traded company on the New York Stock Exchange. We've got 40 auction locations around the world, including the one that Perry referenced here north of Las Vegas. We've been here since 1997. We've enjoyed tremendous success in Las Vegas. It's been a great strategic location for us to serve our customers in the mountain west, the west, and the southwest, and it's also been a very favorable business climate for us, which has, you know, contributed toward our consideration of the Las Vegas -- or the Nevada area for expansion of our business.

So, about a year ago, Ritchie Bros. acquired a company called Iron Planet. Iron Planet is the largest online marketplace for heavy equipment, transportation, and so forth, similar to Ritchie Bros. It just operates totally online, and one of the sectors served by Iron Planet is the government sector, and Connor actually runs Gov Planet. One of our anchor clients with Gov Planet is the defense logistics agency, which is the logistics arm of the Department of Defense. So, four years ago, Iron Planet was awarded the contract to serve as the exclusive disposition agent for the DLA, for surplus rolling stock asset, so non-militarized rolling stock assets like trucks, trailers. If you want to buy a Humvee, you've got to go to Gov Planet to buy a Humvee from the Department of Defense.

So, we've had that contract for four years, and we've enjoyed a very successful relationship with the DLA, and because

AMERICAN OVERSIGHT

of that and because of an opportunity for a similar contract for non-rolling stock surplus equipment, you know, apparel, literally anything that the Department of Defense uses that becomes surplus, Iron Planet was awarded the contract for that business as well in December. And so that contract requires us to operate distribution facilities in the east coast and in the west coast. And so in our research for where to locate that western distribution facility, you know, Las Vegas and Nevada popped up as a -- you know, as a prime target that we wanted to consider for the reasons we talk about our current business environment, our current business success in the state, and also just, you know, the Governor mentioned the strategic nature of your distribution, the logistics capabilities, and all that. So, it's front and center in terms of the locations that we are looking at, and the other thing I think we learned just in the last couple of hours, we actually have a bank of servers that are co-located with Switch here in Nevada, which I believe is Mr. Kramer's company, the new Board Member.

So, anyway, that's a little bit of -- a little bit more background on Ritchie Bros. and what we're going to be doing here. We're going to be opening up a warehouse, about 170,000 square feet. We anticipate having 25 employees and probably more over time, but that's our estimate for the first 24 months, and we're excited, again, to be considered.

AMERICAN OVERSIGHT

SANDOVAL: Thank you, Mr. Berry. Did you have any other further -- Mr. Humphrey, I don't know if Humphrey had any presentation he wanted to make.

HUMPHREY: No, I think Mr. Berry covered --

BERRY: He's here to answer the detailed questions.

SANDOVAL: All right, and I guess similar to what I've asked the others, so you -- you know, at least according to the application is that you are considering other potential locations. Assuming favorable consideration of this application, would Nevada be the place?

BERRY: Yes.

SANDOVAL: We love that.

BERRY: Yes.

SANDOVAL: Okay. No, and you're a company that's well-known to me and I think to others on this Board, and as I was chatting with the Director that, you know, as you drive up the I-15, we see -- I see you -- I've seen you there before. So, you're a known commodity. You're a successful commodity of a business and somebody that we appreciate and respect, and the fact that you want Nevada to be the place I think is obviously very good news for all of us. And essentially, you would just be expanding the identical workforce that you have now, correct?

BERRY: A very similar workforce.

SANDOVAL: Okay.

AMERICAN OVERSIGHT

BERRY: Although, yeah, they'd be working in the distribution facility, and it's a separate location, or it will be, but yes.

SANDOVAL: Where would they --

BERRY: Similar skillsets, right.

SANDOVAL: Where would that new location be, or are you able to answer that?

BERRY: In northern Las -- in northern Las Vegas.

SANDOVAL: But not near your current location?

BERRY: It's not contiguous. You want to answer?

HUMPHREY: It's a few miles away from the current auction site, but close enough that we can still leverage the auction site for certain asset types that don't require as much indoor storage and handling.

SANDOVAL: Thank you. Other questions or comments from Southern Nevada Members.

HUTCHISON: Governor?

SANDOVAL: Yes, Mr. Lieutenant Governor.

HUTCHISON: Thank you. Mr. Berry, Mr. Humphrey, thank you very much for being here today, and just had a couple questions in terms just of the business. I pass your facilities all the time on the way -- on the way out of town north, and my question is, is Ritchie Bros. sort of a -- kind of a hedge against the economy when it is not doing so well? In other words, I noticed during the recession it seemed like you had an

AMERICAN OVERSIGHT

awful lot of inventory during the recession, and now as I head out of town, not quite as much of inventory. So, is your business model and is your business kind of a hedge against a poor economy, and that can be a very attractive side particularly from an investment standpoint, but is that accurate in terms of just your inventory, your business itself? Is it inversely related to strength of the economy?

BERRY: Not 100%, but we obviously -- we do really well when the economy is not doing well, right? We also do well when the economy is fairly flat. When the economy is really strong, you know, most of the equipment is utilized. You know, contractors have work. You know, OEMs don't have any lease returns. You know, so, there is an element of that. It's not 100% proportional, but there's definitely an element of it. Now, from our perspective, when you have -- you know, you have tight supply -- prices are really high when you have, you know, excess supply of prices dropped. So, you know, our performance -- you know, there's a lot of ways to look at our performance from a company standpoint. We benefit from higher prices in tight supply. We benefit from greater unit inventory, you know, when there's excess supply.

HUTCHISON: Thank you, and then my just other -- my other question was just the online aspect of the business, and you say you just recently acquired Iron Planet?

BERRY: Right.

AMERICAN OVERSIGHT

HUTCHISON: And now, you converted that into Government Planet or Gov Planet? What did you say?

BERRY: No, no, no. So, we actually have multiple websites. So, we have Iron Planet is the core heavy equipment, construction, trucks, and so forth, and Gov Planet is focused on government assets.

HUTCHISON: Can you acquire government assets -- surplus assets any way other than online now or is it pretty -- is it online only --

BERRY: We occasionally --

HUTCHISON: -- just under contract of the government?

BERRY: We occasionally have assets that we sell at the live sites that are government, you know, consigned assets, but 95% is online.

HUTCHISON: Thank you. Just my final note, Governor, is to comment again just to the proportion and the ratio of the incentives to the expected tax revenue estimates is very strong and very happy with your application, and congratulations on a very successful business and really an iconic business in southern Nevada, and we hope that you'll expand here and continue to grow with us. Thank you. Thanks, Governor.

BERRY: Thank you.

SANDOVAL: Thank you, Mr. Lieutenant Governor. Other questions or comments from Southern Nevada. Any questions or comments from Northern Nevada? And just one other compliment as

AMERICAN OVERSIGHT

I look at it, is percentage of health insurance covered by the company, 97%, pays overtime, PTO, sick, vacation [inaudible] increases, merit increases, tuition assistance, retirement plan, profit sharing, 401K. So, I really appreciate the benefit package and how well-treated your employees are. If there are no further questions or comments, the Chair will accept a motion to approve the abatement application of Ritchie Bros. Auctioneers, Inc. for a sales tax abatement, modified business tax abatement, and personal property tax abatement as presented in Agenda Item 5J.

KRAMER: Governor, before you --

HAVINS: So moved, Havins.

SPECHT: I'll second, Specht.

SANDOVAL: Before I take the motion -- before I take the motion, Mr. Kramer has a statement.

KRAMER: I will be abstaining from this vote.

SANDOVAL: And just for purposes of the record, Mr. Kramer.

KRAMER: Yes, for purpose of the record, I'll be abstaining from the vote because of potential conflicts.

SANDOVAL: Okay. No, and I know it wasn't anything intentional, Mr. Berry, but since you said you were --

BERRY: No, no, no, not at all.

SANDOVAL: Since you're a customer of Switch --

BERRY: Understood.

AMERICAN OVERSIGHT

SANDOVAL: -- and Mr. Kramer is an employee of Switch, probably better discretions, better part of valor in terms of an abstention from the vote by Mr. Kramer on this application. All right, if there -- I think it was Dr. Havins made the motion, and Mr. Specht seconded the motion? All right, are there any questions or discussion on the motion? And that was a motion for approval, correct?

HAVINS: Yes.

SANDOVAL: Again, I -- sorry, it's the old judge in me, and I just want to make sure the record is clear. So, we have a motion and a second for approval of Agenda Item 5J. Any questions or discussion on the motion? I hear none. All those in favor please say aye. [ayes around] Those opposed say no. That motion passes unanimously, and if the record would just reflect that Mr. Kramer has abstained from the vote. All right, congratulations, best of luck.

BERRY: Thank you very much.

SANDOVAL: Thank you.

BERRY: Thank you.

SANDOVAL: Agenda Item 5K, Sephora USA, Inc.

WALSH: Good afternoon, Governor, Lieutenant Governor, Madam Secretary, Executive Director, and Board. For the record, Michael Walsh with the Las Vegas Global Economic Alliance. I'd like to introduce you to Sephora USA, Incorporated. Present with me today is Jeff Ritacco, VP of

AMERICAN OVERSIGHT

Logistics, and John Lidio, [phonetic] Executive Vice President with CBRE. Sephora USA is requesting the sales and use tax abatement, modified business tax abatement, and personal property tax abatement. Sephora will hire 60 employees within the first 24 months of operation with an average wage of $24.05. Their capital investment will be $36 million within the same time period. Sephora offers a comprehensive benefits package to their employees.

Sephora is a privately held global luxury consumer products company, and they're looking to establish a 715,000-square-foot facility, distribution facility in north Las Vegas. The company has approximately 39,000 employees worldwide with 2,300 locations in 33 countries. Sephora meets the requirements and has the full support of the Las Vegas Global Alliance. You also have the full support of my wife as well. [laughter] I would like to now turn it over to Jeff and to John to explain the project in further detail and to answer any questions that you may have.

RITACCO: Thank you. On behalf of Sephora, thank you, Governor, Lieutenant Governor, Madam Secretary, and the rest of the Board for this opportunity to speak with you. Sephora USA, as Michael said, Sephora USA is a privately held global consumer product company. We primarily focus on cosmetics and perfumes. The company has 39,000 worldwide employees, 2,300 locations, 33 countries. We do have seven stores in Nevada. Sephora is continuing to see rapid growth, especially in the

AMERICAN OVERSIGHT

western US. We are seeking to establish a new regional distribution center to deliver products to 12 western states, to stores, as well as our e-com customers.

At full operations, this new distribution center will process about $100 million in goods a year. In fact, about 97% of those shipments will go to customers located outside of Nevada. Transportation and logistics are a key driver to making the location decision. After extensive study of our store and e-com customer network, greater Las Vegas and Fresno are on the short list of the market for this proposed 715,000-square-foot facility. Should we choose greater Las Vegas, we plan to hire 400 total new jobs, 60 that meet the state salary target. Our intention is to fill nearly all positions from Nevada residents. Sephora is also focused on hiring qualified employees who are disabled or are veterans. Fact in point, our facility in Mississippi, we presently have 15% of our workforce there are disabled with a goal of hitting 30%. We expect to partner with our regional workforce centers to find qualified candidates. We appreciate the Board's consideration, and your approval of tax incentives will go a long way in making this decision for Las Vegas as our site.

LIDIO: And Governor and Members of the Board, just want to add on from CBRE's point of view is we've gone through site selection. Nevada, and especially north Las Vegas, has shown very well from a tax and business climate point of view,

AMERICAN OVERSIGHT

especially with respect to California. We do want to point out that this would be Sephora's first distribution center in Nevada. So, there are no transfers of jobs from one distribution center to another. So, this is really all new, and as Jeff had mentioned, although we have 60 jobs in the application, our goal is to hit total head count of 405 years. Majority of those positions are typical material handling jobs, starting around $12 to $13 per hour and going up based on experience.

SANDOVAL: Thank you, gentleman, and again, similar to the other applications, as you said, it's down to two, and thank you for having us in the two. Do you know when that decision will be made, assuming favorable consideration of this application?

RITACCO: Within the next day or two.

SANDOVAL: Is that a good sign?

RITACCO: I think it is a very good sign.

SANDOVAL: All right, and -- no, Sephora is a company that is known to all of us and a company that I know and respect, and I guess this -- I was talking to my daughters about this, and the question was would there be a factory store attached to the distribution center were you to locate here.

RITACCO: At this time, we're not planning that.

SANDOVAL: Okay, well, I said I would ask, and I kept my word, but any event, so you said you would hire -- or perhaps it was John who said that all the employees would be hired

AMERICAN OVERSIGHT

locally, and assuming favorable decision for you to locate here, when would you be -- when would you hope to be up and running?

RITACCO: We would be opening our doors for our e-com side of the building in July of next year.

SANDOVAL: All right, thank you very much. All right, questions or comments from Southern Nevada. Mr. Specht.

SPECHT: Yes, you are very well known, and I don't think I'd be allowed home unless I vote to approve this tonight, but what I'd like to hear a little bit more about is the disability program that you have and also to ask questions. We have an exceptional nonprofit here you may want to consider called Opportunity Village that would be a very, very good partner to work with you on this program. So, if you could just talk about that program a little bit more, it would be great.

RITACCO: Sure. So, the program that our -- what we've done is we've mirrored several other programs that are out there, and what it does is basically works with the county or the state and helps us train individuals to participate in the workforce. It's not -- and they are expected to participate at the same levels of someone that does not have a disability, and it's a great -- it's a great program, because it really gives context to the individual's disability. Having a job is really important, and they bring a fantastic culture to the building. So, it's a very exciting situation to see the excitement that comes from individuals. What we have found, the people that are

AMERICAN OVERSIGHT

working for us now with disabilities, they have the least amount of absenteeism. They have literally no safety issues. Basically, the work attitude is fantastic. They hit or exceed our productivity expectations and our quality expectations. So, it's really an untapped source of a pool of employees that we are super excited to continue to expand that opportunity with.

SPECHT: That's great. Thank you very much.

SANDOVAL: And Mr. Specht, thank you for bringing up Opportunity Village, because it truly is a nonprofit that we're really proud of, and we think it really could be an opportunity there for Sephora should you choose to come. All right, other questions or comments from Southern Nevada.

HUTCHISON: Governor?

SANDOVAL: Yes, Mr. Lieutenant Governor.

HUTCHISON: Just a question in terms of what you're seeing with your business in relation to brick-and-mortar stores and e-commerce. Are you seeing, as most retailers are, an increase in your e-commerce and a decrease in your brick-and-mortar? Have you -- or you continue to grow in brick-and-mortar? Can you kind of talk about that and just what kind of impact that has on your distribution center needs now and in the future.

RITACCO: Sure. So, like other retailers, you've seen brick-and-mortar drop because of the drive towards the e-commerce side of the business. Our e-commerce has been growing significantly. I can't share those numbers specifically with

AMERICAN OVERSIGHT

you. We have seen some flattening of our retail, but our retail environment is very unique compared to most retailers, because this is where she comes into our stores and gets to experiment and gets to learn about beauty and the cosmetics and what works for them. And that is a major driver of our business, and so we are actually continuing to add stores where most companies are basically shutting stores down. So, from a distribution perspective, this facility will handle both retail distribution as well as e-commerce distribution basically 50-50.

HUTCHISON: Thank you very much.

SANDOVAL: Thank you, Mr. Lieutenant Governor. Other questions or comments from Southern Nevada. Comments or questions from Northern Nevada. If there are no further questions, the Chair will accept a motion for approval of the abatement application of Sephora USA, Inc. for a sales tax abatement, modified business tax abatement, and personal property tax abatement as presented in Agenda Item 5K.

CEGAVSKE: So moved.

SANDOVAL: Secretary of State has moved for approval. Is there a second?

HUTCHISON: Second.

SANDOVAL: Second by Lieutenant Governor. Any questions or comments on the motion? I hear none. All those in favor please say aye. [ayes around] Those opposed say no. All right, motion passes unanimously. Congratulations, good luck,

AMERICAN OVERSIGHT

and again, same thing, once you've made your decision, we'd appreciate hearing from you.

RITACCO: Thank you. We certainly will.

SANDOVAL: Okay, thank you very much. We'll move to Agenda Item No. 6, which are abatement applications for Director approval. The first is 3PEA International, Inc.

URSEM: Thank you, Governor Sandoval, Lieutenant Governor, Madam Secretary, Director Anderson, and Members of the Board. Again, for the record, Perry Ursem with the Las Vegas Global Economic Alliance here today in show of support for the application submitted by 3PEA International. Based in Henderson, Nevada, 3PEA provides innovative prepaid debit card programs and services for corporate, consumer, and government applications. 3PEA is exploring their options to expand current operations in southern Nevada, which would add 35 new jobs to their existing staff of 50, producing an average hourly wage of $40.20. Capital investment projections total $1 million. This application meets the requirements set forth by the Governor's Office of Economic Development and has the full support of the Las Vegas Global Economic Alliance. I would also like to thank Mr. Ken Chappa, [phonetic] Economic Development Officer with the City of Henderson, and the team at the City for their letter of support through Mayor Debra March. And with me today from the company is the Controller, Mr. Christian Mueller, and the cofounder and CEO,

AMERICAN OVERSIGHT

Mr. Mark Newcomer, who will provide further insight into 3PEA's planned expansion efforts. Mr. Newcomer?

NEWCOMER: Thank you. First of all, I'd like to thank the Lieutenant Governor, Governor, Madam Secretary, and all the members. 3PEA International, we relocated to Nevada back in 2004 with a total of three employees. You know, obviously, Nevada has afforded us a great climate to grow in. You know, we appreciate that very much. We also find most of the employees that we're looking for are easily found right in our own backyard. We're generally bringing in -- we have a 24/7, 365 call center that we support our programs with. We bring in customer service relationship management people. We bring in a lot of technology people fresh out of school, front-end developers, back end developers, all of that, and then as well we have, obviously, relationship management people that we need as well. So, that's a little bit about our company, and I want to thank you for the opportunity.

SANDOVAL: Thank you, Mr. Newcomer, and you know, for me, obviously, this is a great application, and you're a well-established company for whom, you know, I have great respect, and that, for me, is the greatest compliment of all, is a company that is here, and, you know, congratulations on your growth to go from where you are -- where you were to where you are, but then to make this expansion decision I think is -- as I said, is a compliment to the community, compliment to your employees, and a

AMERICAN OVERSIGHT

compliment to you. So, I don't have any questions, but I just wanted to make sure that I let you know that. And the average wage here, $40 an hour, is significant and really allows people to have a great quality of life. Questions or comments from Southern Nevada.

HUTCHISON: Governor?

SANDOVAL: Mr. Lieutenant Governor.

HUTCHISON: Mr. Newcomer, thank you very much for your presentation and for a wonderful application. Again, I just got a quick question for you. As I was looking at the employment schedules that you provided with your application, I see the highest wage earners are in sales and just wondered what it is that they do on the sales side that is so valuable to the company. You don't always see that. You know, at $50 -- I mean, average hourly wage for a sales is $50 an hour.

NEWCOMER: Yeah, it's fairly specialized, the markets that we go after, generally biopharmaceutical, and, you know, really it's hard to find biopharmaceutical salespeople that aren't demanding top premium dollar. So, that's primarily the reason why they are making the higher dollars.

HUTCHISON: Thank you. So, it's supply and demand, right?

NEWCOMER: Absolutely.

HUTCHISON: And again, Governor, just point out the great ratio, again, looking for incentives, tax incentives of a

AMERICAN OVERSIGHT

little over $157,000, and we expect the total revenue on the tax side to be over $8.8 million. So, great application, and congratulations. Thanks for your growth here in southern Nevada and look forward to supporting. Actually, I guess this is a Director approval. Look forward to -- and I hope and pass along a hint to our Director that this is an awfully good-looking application. Thank you.

SANDOVAL: Thank you, Mr. Lieutenant Governor. Other questions or comments from Southern Nevada. I hear none. Any questions or comments from Northern Nevada? I'll turn it to Director Anderson.

ANDERSON: Thank you, Governor and Lieutenant Governor, appreciate the endorsement there for the company, and Mr. Newcomer, thank you for the application. I would echo the Governor's comments. It's exciting to see the expansion of a local company. There's often chatter that this Board focuses a lot on new companies only, and I think today's -- several applications today, we've seen local entities both north and south growing in a healthy economy. So, we're excited for that. I'm certainly excited to support the application. I'm just going to put one contingency in there, as we've been in communication with your company, that the Department of Tax is still trying to determine whether or not that [inaudible] identifies you as a financial institution or not.

AMERICAN OVERSIGHT

Pending the outcome of that, let me shift what we qualify for here, but certainly, the sales tax abatement, the personal property tax abatement we can approve through this -- at this time, the modified tax abatement as well. I would certainly want to approve contingent upon the Department of Tax identifying you as a non-financial institution. That's just per our statute, and hopefully, we'll get to a good resolution there for you as well. But Governor, happy to approve this application and looking forward to even further expansion from 3PEA. Thank you, guys, for coming.

NEWCOMER: You're very welcome. Thank you. By the way, Mr. Anderson, I just want to let you know that we did receive a letter from the Department today, actually, and we've reviewed the position, and we will be responding to their position.

ANDERSON: Great. Let us know if we can be of any assistance.

NEWCOMER: Yep, will do. Thank you.

SANDOVAL: Thank you, Mr. Newcomer. Congratulations.

NEWCOMER: Thank you.

SANDOVAL: Next Agenda Item is 6B, Alpha Guardian.

WALSH: Good afternoon, Governor, Lieutenant Governor, Madam Secretary, Executive Director, and Board Members. For the record, Michael Walsh with the Las Vegas Global Economic Alliance. I'd like to introduce you to Alpha Garden -- or

AMERICAN OVERSIGHT

Guardian. Present with me today is their Chief Operating Officer, Jesse Bugarin. Alpha Guardian is requesting the sales and use tax abatement, modified business tax abatement, and the personal property tax abatement to encourage their expansion in southern Nevada. Alpha Guardian will have a capital equipment investment of $189,300. They will hire 35 new employees within the first 24 months of operation at an average wage of $26.92. Alpha Guardian also offers a comprehensive benefits package for their employees. Alpha Guardian meets the statutory requirements and has the full support of the Las Vegas Global Economic Alliance. Alpha Guardian is a leader in the residential safe, security, and storage industry. Established in August 2017, Alpha Guardian has positioned itself to be the category champion and a complete solution in the safe, vault, and secure storage industry.

With industry-leading brands dating back to 1965, they all come together day in and day out to help the company reach its goal of a safe in every home. Alpha Guardian champions the ability to offer a robust portfolio of products, including home safes, quick-access gun vaults, security cabinets, and garage storage and organization. I'd like to now turn it over to Jesse Bugarin to introduce other members of his team, to answer any questions you may have, and to explain the project in further detail. Thank you.

AMERICAN OVERSIGHT

BUGARIN: First I'd like to thank Governor Sandoval, Members of the Board, Michael Walsh and his team. I'd like to introduce Roger Jenkins. Roger Jenkins is our VP of finance, and I'm Jesse Bugarin, and I've been with the organization for 29 years, September 8th, 1989 to be exact, so been there quite a while. And we're really a story of three different areas, people, society, and growth. And when you think of people, we exist because of our employees, and it's true that without the customer, we have no company, but if we don't have great people and people who are trained and are constantly learning and growing, then that customer will not come back and support our products. And so just to give you a little feedback on kind of who we are, what we're trying to do, what a safe in every home means, that's a very passionate kind of rally cry for us. When someone is robbed, when you have a fire in your house, some child gets a hold of a weapon that's not secured, we feel personally responsible for that. We feel like we could have done more. We could have had maybe a price point safe that was more affordable. Maybe our advertising didn't reach that consumer. There's obviously lots of opportunity in those types of failures and losses due to fires, thefts, and other issues.

When someone searches for a passport or keys or something of value for 30 minutes, an hour, in today's society, that's not okay with us. Okay, your time is precious. Time is the only resource you can never get back, and so our job is to save you

AMERICAN OVERSIGHT

time, organize your valuables into one place, and help improve piece of mind. Roughly 340 million people in America, 141 million homes. We have a lot of work to do. And when we talk about our people, we're a story of an owner who started on the dock lines, started loading trucks, and I know because I used to raise the product onto the truck, and he'd pallet-jack them all the way in, and became the owner of our company, right? So, that kind of thinking is alive today.

We invest heavily in our people. We utilize interns from UNLV. Those interns eventually go into professional accounting firms, and in a minute, I'll ask Roger to speak a little more to that. We're very proud of our involvement with UNLV and the intern community. We believe that if we can build leaders within our doors and they enter society, then we've done our job. Okay. We're a growth company. When I started with Cannon Safe back in 1989, our revenues were about $5 million. We're reaching $300 million now and on our way to a billion. Okay, we will get to a billion through acquisition. We will buy additional companies. We will grow our people. If we don't grow our people, we can't grow our company, and so we're very passionate about what we do. Roger, if you would please talk a little bit about the intern program.

JENKINS: We've had great success working with UNLV, and their accounting department first -- oh, I'm sorry. I said we've had great success working with UNLV, first with their

AMERICAN OVERSIGHT

accounting department for over four years, bringing interns in for a six-month period at a time. As they move forward to graduation, almost all of them are placed with top-level professional accounting firms. Many here in Nevada, a few do go back to where they originated from after they finish their education at UNLV.

We've since expanded into our marketing program, and those -- one of those interns, in fact, has been hired full-time after graduation with us. So, internship has been a very big part of our company. They've been a great spirit with us, and we try to give them a very wide experience in the business so that they really take skills out with them into the real world that they can use to personally market, but also to grow them professionally. So, it's been a great program for us, some lifetime friends with the firm.

BUGARIN: And then just one last comment, we also have a program that we have called Alpha Guardian University. Alpha Guardian University began because we had an issue with an employee who was given a book. We have a reading club within our company. We believe that reading books kind of aligns how we think, how we act, and then how we kind of march the business. And this employee, in a very embarrassed way, said, I'm sorry, I can't read. Okay, so, we realized that we had a problem there, and we had a -- we had a responsibility to that employee to help him learn, help him grow. So, we established Alpha Guardian

AMERICAN OVERSIGHT

University, one of our facilities. We have executed 1,300 hours of training between middle of 2016 into 2018, and we are bringing Alpha Guardian University into Las Vegas, and I say we're bringing it to Las Vegas. We're very close to making our final decision, okay, very close to it, and I also want to compliment the State of Las Vegas and everything you do, because I got to tell you, we're leaving Illinois currently, okay? Illinois is not a friendly state to business people, and previously, we've done business in California. California has great weather, but it's hard to stomach the taxes for great weather. So, we've been considering Texas, Arizona, and Nevada. We're very close to making our final decision. Thank you very much.

SANDOVAL: Mr. Bugarin, thank you, and first, I want to thank you for your relationship with UNLV and your commitment to literacy. I mean, those are, I think, two really great compliments to your company, and, you know, really proud to see UNLV students and graduates moving on and doing great things, but because of your willingness to partner with them. And you mention that about Illinois, because I saw this as part of your application. It said the company is also considering relocating its Chicago Stack-On brand operations to Las Vegas. Is that part of what this application is?

BUGARIN: Yes, it is, yes. We operate roughly 180,000 square feet of warehouse there now, and we're looking to

AMERICAN OVERSIGHT

relocate that portion of the business. We'll start with 100,000 square feet and then expand as we grow.

SANDOVAL: And then as part of that, would the Illinois employees be given the opportunity or the option to relocate to Nevada as well?

BUGARIN: Yes, they will.

SANDOVAL: All right, that's all the questions I have. Members from Southern Nevada, any questions or comments?

HUTCHISON: Governor?

SANDOVAL: Mr. Lieutenant Governor.

HUTCHISON: Mr. Bugarin, again, thank you for being here, and this is, again, a wonderful application. Thank you for your commitment to UNLV, the internships, and the opportunities at those entry-level jobs, Mr. Jenkins, very important, and it's wonderful that you've committed that way not only on the accounting side, but now it sounds like the marketing side as well. My question for you is what type of business activity is going to go on in this expanded facility? You've got 24,000 square feet now. You've got 100,000 square feet you're looking for. That's a major expansion. What's going to go on within those facilities?

BUGARIN: So, the primary is going to be distribution, and we will also hold our corporate office in Nevada, and so the majority of it will be distribution, yes.

AMERICAN OVERSIGHT

HUTCHISON: And again, great opportunity for us to highlight just not only an opportunity to provide incentives for your company and an opportunity to bring you into Las Vegas, but also the contributions you're going to make to our state and to our -- and to our local government tax base. We appreciate that, and we often highlight that as well, but thank you for the opportunity. We really hope that you make the decision to move here and become even more ingrained in the community and the state of Nevada, and I can tell you it's a business-friendly state that will continue to be business-friendly for years and years to come. So, congratulations on the application that we fully embrace. Thank you.

SANDOVAL: Thank you, Mr. Lieutenant Governor. Any other questions or comments from any of the members? And before I turn it over to the Director again, Mr. Bugarin, thank you for your presentation, and we would appreciate your favorable consideration in your decision.

BUGARIN: Thank you very much.

SANDOVAL: Thank you. Mr. Director.

ANDERSON: Thank you, Governor, appreciate it. I think a lot of the questions have been asked, and I would probably echo the components of being committed to your employees and the community at large. I think that shows a lot, especially when you look at -- well, even just your description of kind of your mission state in many respects where you're focused on the

AMERICAN OVERSIGHT

usage of the product versus -- and how that may enhance someone's life of being able to secure important documents or keep people safe. I think that's an interesting perspective versus just selling the product. So, kudos to you for that. I think -- also a couple things that stand out to me, certainly, good paying jobs and appreciate the opportunity to see a local company expand, but as was pointed out in some of the other applications, the fact that you have 85% of your health insurance covered for your employees as well, certainly, that's an -- probably somebody pulling the plug. I'm a recovering politician, so I speak way too much here. With that, however, I'm happy to approve the sales tax abatement, modified tax abatement, and personal property tax abatement and wish you the best of luck.

BUGARIN: Thank you very much.

SANDOVAL: Thank you, Director Anderson, and just for clarity for staff, even though we made light of it, are there any issues with open meeting law if we've got some kind of a disconnect telephonically?

SPEAKER: We still have quorum, so not in that case. I'm going to reach out to Vegas staff to find out who was calling in. I didn't know we had anyone calling in.

SANDOVAL: I didn't know we had a call-in, either, but I just want to make sure if we're noticed, to be able to -- for the public to be able to participate telephonically. I don't want to get a [inaudible] with the open meeting law.

AMERICAN OVERSIGHT

SPEAKER: Yes, Mr. Governor. As I reviewed the Agenda, I didn't identify any public call-in number, so unclear as to who was on the telephone, but that shouldn't have caused any issues with NRS 241.

SANDOVAL: Okay, thank you for the clarity. All right, then we can move on. Next item on the Agenda is Agenda Item 6C, Cannae Holdings, Inc.

WALSH: Governor, Lieutenant Governor, Madam Secretary, Executive Director, and Board. For the record, Michael Walsh with the Las Vegas Global Economic Alliance. I'd like to introduce you to Cannae Holdings. Present with me today is their Chief Financial Officer, Rick Cox, and also Gary Ameko. [phonetic] Cannae Holdings, Incorporated is requesting the sales and use tax abatement, modified business tax abatement, and personal property tax abatement. Cannae Holdings will have a capital equipment investment of $1,082,500. They will hire 50 employees within the first 24 months and have an average wage of $36.90. Cannae Holdings also offers a comprehensive benefits package to their employees. Cannae Holdings meets the statutory requirements and has the full support of the Las Vegas Global Economic Alliance.

Cannae Holdings, Incorporated is a diversified investment company headquartered in Summerlin, Nevada. The firm primarily invests in restaurants, technology, enabled health care services, financial services, and more. Cannae's strategic acquisitions

AMERICAN OVERSIGHT

contain a mix of majority and minority-owned businesses with significant underlying value. In 2015, Cannae, then known as Fidelity National Financial Ventures, LLC, relocated its headquarters to Las Vegas from Florida. The company has subsequently added or relocated nearly 20 high-level executives and employees to the Las Vegas region, and now major company decisions are made from the Las Vegas location.

The executive group of Cannae Holdings, Incorporated includes Bill Foley, the lead person of the ownership group responsible for bringing -- go Knights, go, the National Hockey League to Las Vegas and Nevada. It's my pleasure to introduce you to Mr. Rick Cox to explain the project in further detail and to answer any questions you may have.

COX: And just for the record, we've brought just a little bit more than 20 people here to Las Vegas. So, generally speaking, in 2015, we did relocate Fidelity National Financial Ventures from Florida here to Las Vegas, and as a part of that transition, we've done pretty well. Of course, as you get migrated into a particular place, you wonder whether or not you should migrate more people and expand your headquarter office, which is kind of where we're at today in terms of looking at the crossroads as to whether we expand or not. We've got an extra piece of property sitting next to our building. So, we're kind of just thinking about whether we should do this or not, and I thought we would come over here and see if we could get some

AMERICAN OVERSIGHT

incentives if we decided to go ahead and expand it out and to hire the extra people. And, you know, this could be an ongoing thing where you see us from time to time coming in as we continue to do our stuff and get more people here around us and depending upon the types of acquisitions that we do.

SANDOVAL: Thank you, Mr. Cox.

COX: Yeah, no problem.

SANDOVAL: I'm sorry, I didn't mean to interrupt you. Did you have further presentation?

COX: No, no, I was just going to -- I gave you guys, I think, a little bit of the history of Fidelity the last time I was here, and I don't know if anybody wanted a little bit more history than what I just gave. I didn't want to -- I know you've been here for a bit today already listening to everybody's story, so I didn't want to --

SANDOVAL: Oh, no, this is your chance, but there are several members that are new that weren't here last time you presented. So, feel free if you'd like.

COX: Well, let me just ask the Board. Does anybody want to have a little more insight? It is about go Knights, go.

SANDOVAL: So, no further presentation, Mr. Cox?

COX: I think that's all I have to say for now unless anybody has any questions.

AMERICAN OVERSIGHT

SANDOVAL: Okay, thank you, Mr. Cox, and, you know, I'll say this, and, you know, obviously, it's an exciting time for the Knights, and I've been following and cheering and supporting, but for me, it's more than just a puck. The impact that you've had on this community and on the state and the way that the organization and the players have done outreach in the community, and particularly, associated with the events of October 1, I will tell you I'm blessed to have the opportunity to be in a lot of different places and meet a lot of different people. And the compliments and the comments that I receive with regard to the Knights organization and how you handled that whole situation and really bound a community together is unlike anything that I've ever seen and unlike what a lot of other people have seen. And that first game where you raised that jersey is something that I think is going to reverberate through time with regard to professional sports, the way that you handled that. So, I personally want to thank you and everybody in the organization for what you've done in terms of your contributions and commitment to the community. The success that the team has on the ice is just gravy, but for me, what -- you know, the -- everyone loves a winner, but you're a winner no matter what your record is going to be in the future because of what you've done for the community and for what you've done for the state.

COX: Well, thank you, Governor. You know, when we -- when I stood here in 2015 talking with you guys about some

AMERICAN OVERSIGHT

of our goals, you know, I don't think that any of us recognized at that point in time the success of where we would be at today, you know, including the situation that you just talked about. It was just really amazing. The players and the team really got behind the community, and it didn't really even take much to get anybody to do it. They really wanted to go out and get into the community and support them, and that's something that the team will continue to do. And in terms of the -- you know, this is not about the team, but, you know, you've really touched a soft spot for me at least just recognizing at how far this community has come with the team being here. It's just absolutely amazing, and, you know, part of our -- part of the things that we talked about a couple of years ago was, you know, our charitable foundation via the Fold the Flag Foundation that we were bringing here to town to expand as well, too.

You know, we're really making a really tremendous impact with that, and for those of you that don't know what the Fold the Flag Foundation is, the Fold the Flag Foundation is designed to help out the spouse of a fallen warrior, you know, if they're -- and the intent is, is to get them to the next level in their life. A lot of the times the federal government gives you a small stipend to help out with the cost of the funeral, et cetera, and then leaves the spouse at home with no education and no way to get to the next level. So, what we are trying to do is raise money, give scholarships out to those individuals, and it's

AMERICAN OVERSIGHT

not just to the individual. It's to the children, grandchildren, or even the parents, and, you know, we really wanted to use Las Vegas as a centerpiece to really expand it nationwide.

We had started in Jacksonville, Florida, and, you know, we're expanding it here, and we're kind of tying it into the Vegas Goal of the Knights a little bit along with the Vegas Goal of the Knights Foundation, of course. And so, you know, you'll continue to hear a lot about the Fold the Flag Foundation, and just to let you know, 100% of the foundation is seeded so that every dollar that goes in, goes back out, and I really take a lot of joy in telling people about that as well. So, hopefully, we'll be here for a long time and we'll continue to get the puck in the net.

SANDOVAL: Just one last comment, Mr. Cox. The other thing I'll say is you've changed the national anthem in Las Vegas forever. No, I had the privilege of speaking at the commencement ceremony at the UNLV law school, and a student, a young woman, had the opportunity to present the national anthem, and when they got the appropriate part, the entire audience at the auditorium screamed Knights. So, that's something else, just a great, special tradition, and one last thing I will tell you --

COX: Yeah, it's a lot of fun.

SANDOVAL: I do appreciate, from the bottom of my heart, that you play Home Means Nevada at the home ice -- at the

AMERICAN OVERSIGHT

game. So, I appreciate that as well. All right, questions or comment -- oh, go ahead.

COX: No, I'm good.

SANDOVAL: Okay, questions or comments from Southern Nevada.

BARRETT: This is a really tough one, really tough one.

COX: All right.

BARRETT: Where did you get the name Cannae?

COX: Cannae Holdings?

BARRETT: Cannae, what's Cannae?

COX: Well, historically, it is a -- it is the battle of Cannae with the Romans and the Carthaginians.

BARRETT: Okay, there we go.

COX: Yeah.

BARRETT: No further questions.

COX: That would be -- that would come from Bill Foley. Bill Foley has got a West Point background, and typically, you know, he's very insightful and likes to look to history to sometimes name things with.

HUTCHISON: Governor?

SANDOVAL: Yes, Mr. Lieutenant Governor.

HUTCHISON: Thank you. Mr. Cox, thank you for being here, and again, I was here when you were here initially, and I think you still -- I think that application still holds the

AMERICAN OVERSIGHT

record for average wages, because you're bringing in all your executive team, and it was -- I remember that was very high average wages, and we were excited at the time and approved that and knew that there were good things to come. And as the Governor said, I know that we really understood really fully what was going to happen when Fidelity and the Foleys all got together and came into town and decided that we were going to put together a national hockey team. And I was at the game last night, which was incredibly exciting and wonderful, and I agree with the Governor. I was born and raised in -- I am born and raised in southern Nevada and went to school here, and we don't have as much of an emphasis in southern Nevada on Home Means Nevada as I've noticed in northern Nevada, but ever since that has been played in the hockey games, all of us down here in the south have really gotten to understand and appreciate that song and our state song. So, thank you, and I echo the Governor's comments as well.

I'll tell you, you've had a -- you know, people can tell you stories I'm sure all day long, but you even have an impact on the most adversarial relationships. We'll be court arguing over motions or arguing the most disputed matters and, you know, just ready to go at each other's throats, and the Governor can appreciate this as a former judge. You know, it can get very contentious in courtrooms and stuff, and at the end, my partner was telling me that just this week, that at the end of a very

AMERICAN OVERSIGHT

contentious motion, the judge asked him if he had anything more to say, and he said, yeah, go Knights, go. And that was one thing that unified the most hardened opponents in litigation. So, the reach of what you all have done for this community has just been tremendous, and as a native Las Vegan, I want to thank you and the Foley family and the Fidelity team for all that you've done for Las Vegas and the state of Nevada. Thank you. Thank you, Governor.

COX: I do have one request before you guys approve this. This is, again, totally unrelated to this application. I would just look for your guys' support over the next upcoming months to us as we continue to expand our youth hockey throughout Clark County and Las Vegas. It's really very impactful to elementary schools, middle schools, high schools, as well as just travel teams in general, you know, and I'm introducing hockey to folks and having people either come here to Las Vegas from other towns and just really exploding the sport.

CEGAVSKE: Thank you. Governor?

SANDOVAL: Madam Secretary.

CEGAVSKE: Well, since we talked about Minnesota, we'll talk about Minnesota again. Being from Minnesota, I never saw an indoor hockey game until I came to Nevada. We always saw them outside. I didn't realize you could do it inside. So, I am so thrilled, you have no idea, as a former -- someone who sat outside and froze just to watch hockey. It was great, and then

AMERICAN OVERSIGHT

coming here, my oldest son -- our oldest son became a hockey player, and at 2:30 in the morning, we'd go out to the Santa Fe because it was the only time that kids could play.

COX: Yeah.

CEGAVSKE: And I'd sleep in the car while he was practicing hockey, but it is so incredible to me to see how Las Vegas has come together for this team. I've got now two -- a set of twins, four years old, that are playing hockey. They have the whole hockey gear. So, I am so thrilled with what you're doing with the youth, but what the Governor and Lieutenant Governor have said about what you've done for the community, you can feel it. You can see it. My son never misses a game, and it's just what you've done to this whole state. We've even got a couple employees up the -- he's probably up there right now, Scott, he's a Kings fan. Sorry, Scott, I just have to tell him. So, we got him paraphernalia from, you know, the Knights, the Golden Knights, and we told him he has to wear it. So, when we have jersey days, he asks if he can wear Kings and the Golden Knights, and we tell him, no, you can only wear Golden Knights. We're a state, and we all support the Golden Knights, but I am so thrilled when you said that you're doing the youth and high school. Thank you so much. I think it's brought a really great education to the state, but what you've done for this community is just overwhelming. We're really, really thrilled, so thank you very much.

AMERICAN OVERSIGHT

COX: I'll pass that word along to Bill Foley. He's really the champion behind all of this.

CEGAVSKE: The other thing, I just want to tell you I did not know until my four-year-old granddaughters told me, how to say go Knights, go, and you have to do it with enthusiasm, and you have to use hand gestures. So, I just want you to know --

COX: That's right, with exclamation marks behind it.

CEGAVSKE: Is that what it is?

SANDOVAL: Other questions or comments from Southern Nevada. Anything for Northern Nevada? And again, Mr. Cox, thank you for your presentation, and best of luck and win one more. We'll get to the Cup finals.

COX: That's right. Thank you, guys.

SANDOVAL: All right.

COX: Appreciate it.

SANDOVAL: I'll turn it over to the Director for Cannae Holdings, Inc.

ANDERSON: Thank you, Governor. Mr. Cox, I just had one question. Of the 50 that are on the application, and maybe it's too soon to tell, do we know how many of those will be relocating to Nevada versus hired locally?

COX: Well, you know, it's hard to say. You know, we try to initially look for people in the local category to fill the jobs, and so far, we've had a lot -- well, with

AMERICAN OVERSIGHT

exception of the team, we've got a whole blend of people there just because of the areas of expertise. But with regard to what we've done so far, most of the talent pool that we've been pulling from has fortunately been coming from Las Vegas, and we would continue to do that to the extent we can get the talent as needed.

ANDERSON: Great, thank you. I appreciate that, and I didn't know also if -- obviously, these are probably not entry level at any respect at the $36.90 an average wage. Do you work with any of the universities in your recruiting or is this a level that requires a lot of expertise before they get to this level?

COX: Depending on the level of the individual, $36.90 is an average. So, we do pick up entry level types, and we are looking to UNLV or the local universities when needed. And since you brought up local universities, I will tell you what we are doing. We actually have resorts up in Montana and out in Idaho, and we have been looking to UNLV to try to, you know, just set up internships for the hospitality to get up there. So, that's one of the things we've -- we haven't really had that much success this year at it, because we got started sort of a little bit on the late side, but we're trying to get a little more engaged with it. It's competitive, though, because as you know, there's already a lot of hospitality in Las Vegas. But yes, we do look to UNLV as much as possible.

AMERICAN OVERSIGHT

ANDERSON: I appreciate that, and I think that's -- well, I mean, you guys are already committed to the community, and that's just one more step along that path, so I appreciate that. This one obviously is an easy one for me, happy to approve the abatements for sales tax abatement, modified business tax, and the personal property tax, and we appreciate your efforts and continue to expand the company here in Las -- or in Las Vegas, not necessarily here -- or here, too. That would be all right.

SANDOVAL: Thank you, Mr. Cox.

COX: All right. You guys have a good day. Thank you.

SANDOVAL: You do the same. We'll move to Agenda Item No. 7, which is Workforce Innovation for the New Nevada, the WINN Fund Program for Board approval. 7A is Reno area Data Analytics. Good afternoon.

WALDEN: Good afternoon. I'd like to start by thanking the Governor, Lieutenant Governor, and the Board for your time and consideration today for our data analytics proposal. For the record, my name is Barb Walden. I'm the Director of Applied Technologies for Truckee Meadows Community College. Today, I hear about all this economic development, and I know that ties directly to workforce development that's been mentioned several times. So, as Nevada's economy begins to become more diverse, it brings with it the challenge of upscaling our workforce. The WINN project between TMCC and GOED that

AMERICAN OVERSIGHT

helped the staff at Gigafactory and is helping to increase our pipeline of manufacturing workers, it really is just one example of how we are meeting those challenges. And we used innovative programs and innovative delivery modules, methods, to do that. One of the next challenges we've identified is building the pipeline of Nevada's technology sector. So, coding, cyber security, and data analytics are just a few of the examples of the in-demand skillsets needed in our region. These skills that I just mentioned, those are not unique to technology. Those cross every industry sector. You find them in marketing, health care, business, even state government.

So, like the P3 program TMCC created, we have designed the fundamental data analytics and data visualization courses to be modular and flexible for accessibility. The online self-directed format will be practical and applicable, as we will be developing it together with industry. The model is easily scalable, and when developed, it can be expanded all across the state. It aligns with elite model and the concept of in and out ramps. So, in today's global economy, online economy, pretty everywhere you look, data is being collected, and it's important that we know how to manage and use that data. This project will be applicable to large companies, small companies, entrepreneurs, public sectors, state workers, and I believe this program is going to help Nevada build the workforce to continue diversifying and growing. So, with that, I'm going to let you know that TMCC is

AMERICAN OVERSIGHT

partnering with NCLab on that, and I'm going to introduce Voss, and I'm going to let Voss tell you his own last name.

KAMYSHANOV: Hello. Thank you for this opportunity, Governor, the Board. My name is Voss. The last name is Kamyshanov.

SANDOVAL: Will you spell that just for the -- whoever has to do the minutes?

KAMYSHANOV: Okay, so, K-A-M-Y-S-H-A-N-O-V. I was born in Germany, raised in Russia. Now I'm Nevadan, so long journey. I'm CEO of NCLab, and we appreciate the opportunity to partner with TMCC, and our company, it's a local company. We develop online courses for STEM disciplines, and we are currently part of a Nevada Ready 21 Program for middle schools. We are pushing -- we are working with Clark County, Washoe County, and rural areas of Nevada. We are pushing for high school education, and now this initiative would allow us to go and actually take a further step to pull the students from school towards real jobs, and that's our goal as a company and the mission. So, we position ourselves, like, within STEM industries and disciplines, and we provide the best online education, which is especially great for rural communities. So, I would like to introduce Russ Riggs. [phonetic] He's the Chief Operating Officer of Elite 361 company. It's one of Lift361 company. It's one of the companies which supports this initiative, and I would like him to say a few words. Thank you.

AMERICAN OVERSIGHT

RIGGS: Thank you. Thank you for having me today. Like he said, Russ Riggs. I'm COO of Lift361. My wife and I live here in northern Nevada in Reno. We do have a couple of companies that we've opened recently without tax abatement, but this particular company that I'm with is an Atlanta company, and we have moved here, and we're looking to hire in the area. When I met Voss, I taught some of their other online courses, and the way they do them, really great. And he said that he was working with Truckee Meadows to look at the data analytics. Our company, that's all we do. We used to have a marketing company, and then we paired it down to just marketing analytics. So, we bring in all the data, organize it, analyze it, leverage it. Our employees are data developers. They are analytics and data science people, and when it comes to education, we were talking about, you know, what are your needs and would you help develop a course. And as all of you know, it's difficult to find these technical people. Most of the companies that I heard that came through here could tell you the exact same, they need them.

What we do is predominantly work with retailers, financial services, and we are kind of the marketing arm, the data analytics arm. So, we are always looking for people, companies in the Atlanta area, but we're beginning to have to hire out in other places. I do not know why all of my partners and coworkers in Atlanta wouldn't just pick up and move to this wonderful place, but so far, no, and I'm here to answer any questions that

AMERICAN OVERSIGHT

you might have from the business side. It is nice. The more and more schools bring data analytics in, the more that the kids are trained in the tools. So, when they come out, we can just work them through the business side. It really helps a lot.

SANDOVAL: No, thank you, and I don't have any questions regarding your business, but I guess the way the model works is the candidates would come to TMCC. You would tell TMC the skillsets that you need, and the training would occur there? Is that how the process would work?

WALDEN: Kind of. What we're going to do is we're going to work with -- we have a number of companies that have offered letters of support and have committed their time to helping developing the modules. We expect the development to take about three months, and it is completely self-paced, but it's always monitored, and there is resources there. We have people that will monitor the progress of people. If they see you get stuck, they're going to reach out and contact them. So, again, that flexible delivery, it's going to allow people who, you know, may work days, they can do this at night. They may work jobs at a casino or restaurant or retail that your schedule changes every week. You can't go to school. So, that is the basis of that.

SANDOVAL: And the reason I ask the question is I was looking through your materials, and it says, "As a public institution, TMCC is required to have open enrollment," which is

AMERICAN OVERSIGHT

pretty much what you just discussed, "however, selection criteria can be used to qualify for funding priority, including an employer offer letter, existing employees, US military veteran." So, what do the candidates look like? Is it basically open enrollment in --

WALDEN: So, what we've -- the funding -- this funding, the paid participation in the modules is intended for those people who need the skillset to get a job, and we have three companies identified that partners with us. We're going to start with them. They're going to be seeing UNR graduates that come out with business degrees or marketing degrees, but don't have this data analytics. So, we can add on that piece of training that they need to get the jobs with these companies, and so the intent of the funding is to pay for those positions. The cost that we've put on the class, because it is -- once the development is done, it's going to be very expensive to administer. We are hoping to get employers to pay for their incumbent workers to come, individuals that might want to learn a new skillset, and it's not even off the table, and we might come back and ask for more money for more tuition.

SANDOVAL: We'll see how it goes, right? Yeah. No, but in all seriousness, as I said, I try to understand what this looks like. So, as you said, if I'm working at the El Dorado in Reno and I've decided, you know what, I want to be a part of this new economy and I want to get a job in data analytics, do I come

AMERICAN OVERSIGHT

walk through the doors at TMCC and say, I heard about this. I'd like to sign up for it?

WALDEN: For the purposes of the WINN Fund, we're going to have an intake process that includes an application for the funding, how do you intend to use it. Are you getting to get a better job? Is this going to help you get a job? We have to track all that demographics for reporting. So, it will be an intake process, and we'll figure out a waiting system. We'll work with Stacy to figure out who qualifies and who doesn't to use up the funding. For the public, the open enrollment piece of it, we may have somebody who comes to us and wants to sign up, and we will allow them to sign up, not using the WINN funding. While that is the development, you're building infrastructure for the state, and again, as part of the application, NCLab has agreed to share a number of seats with other community colleges or the state to GOED to distribute as needed. And we look to the future, and those -- it's not off the table to expand those numbers of free seats as needed or to enter into a low cost agreement for the ongoing delivery of this across the state. And we did consider reaching out to other community colleges and ask them to be a part of this, but this application came together so quickly, we really didn't have time to do that. But I think that this is going to benefit Elko. It will benefit Vegas and Carson City. So, we're hoping it's successful and we can share it.

SANDOVAL: Thank you. Questions from Southern Nevada.

AMERICAN OVERSIGHT

HUTCHISON: No questions, Governor.

SANDOVAL: Any questions -- Mr. Klaich.

KLAICH: A comment here. I believe Grand Rounds was the company we reviewed a couple of meetings ago, and it's good to see them circle back around, and one of the comments you always make is the connection between our colleges and our university, and the discussion at that particular meeting with Grand Rounds was particularly robust, and it's great to see this kind of follow through on the program. So, I wanted to make that point for the record and appreciate their participation.

SANDOVAL: Mr. Anderson.

ANDERSON: Thank you, Governor. I did have a question on the 137 that we're looking at for the initial program development, wondering what the life cycle of that is. Are there maintenance costs or ongoing costs as we get through there, and if so, how long does that take us through?

KAMYSHANOV: So, the beauty of online education is that [inaudible] has a solid propriety platform to deliver complex knowledge to people, and this particular course would be developed together with participating companies to really match the job demand, yeah, not just hypothetical knowledge. So, once the set is developed, it takes very lost cost to support it. So, that's the beauty. So, we don't need to keep, like, a teacher hired forever, right? So, we can easily scale to virtually unlimited number of students, and once it's developed, it is

AMERICAN OVERSIGHT

there. And to maintain, we already have some maintenance cost already embedded so we don't come back and say we need more. No, everything is covered, and we are 100% sure that this could be delivered and be beneficial for community.

ANDERSON: Great, thank you for that, and do we have a timeframe of how long that would be covered? Is it the first installment of students, so 70 students, or are we looking at a three-year cycle or what is our maintenance schedule.

WALDEN: So, piece of our project design is thinking about that ongoing. So, when Microsoft does an operational upgrade to Windows -- and this might require some tweaks. Python does upgrades, and that's going to require some tweaks. Part of the reason we partnered with an organization rather than doing it ourselves is as a community college, we can't support that ongoing -- the constant upgrade cost. So, our model is built on a portion of that tuition. That does not all stay with the college. We have expenses out of that, and a piece of that is going to go back to the company. Instead of asking the State to pay that maintenance cost, we're paying it back to them to keep the product alive. So, as long as people are enrolling the classes and revenues are being generated, the program will always be kept up to date.

ANDERSON: Thank you. Thank you.

SANDOVAL: Thank you, Director Anderson. Any other questions or comments? If there are none, the Chair will accept

AMERICAN OVERSIGHT

a motion to approve the request of Reno area data analytics to enter into a WINN grant agreement not to exceed $300,000 as presented in Agenda Item 7A.

KLAICH: So moved.

SANDOVAL: Mr. Klaich has moved for --

BENNETT: Governor, I'm pleased to make that motion.

SANDOVAL: Oh. I'll give it to Dr. Bennett has moved for approval. Mr. Klaich has seconded the motion. Any questions or discussion on the motion? I hear none. All in favor say aye. [ayes around] Those opposed say no. That motion passes unanimously. Congratulations, good luck. We look forward to hearing your success.

WALDEN: Thank you.

SANDOVAL: Thank you. We'll move on to Agenda Item 7B, which is Clark County Health and Technology.

WASRICK: Good afternoon, Governor, Lieutenant Governor. My name is Stacy Wasrick, [phonetic] and I am probably the newest person here at GOED. So, sorry, I feel like a guinea pig today, but I was brought on to administer the WINN Fund. So, a lot of these folks we've been working in partnership with, and so we're really excited to bring some of these applications to you. The application that's in front of you today comes to us from CSN, who's requesting approval to enter into -- and we are requesting approval to enter into an agreement not to exceed $700,000. This partnership brings together several employers,

AMERICAN OVERSIGHT

BrightStar Home Health, Hallmark Home Care, Homewatch Caregivers, Home Care Assistance, in addition to a key partner being the Nevada State Board of Nursing. This group's come together to develop a plan of action to address increasing access to nursing pathways in a really key infusion of technology certifications and adding flexibilities to the modes and matriculation within that industry. The approach is going to mitigate the current economic burden that we have with chronic diseases and hospital readmissions by creating a workforce that will become effective bridges between the clinical and community settings. So, with me at the table, we have the College of Southern Nevada representative, and then she'll have her employer speak as well.

SPEAKER: Good afternoon, thank you. My name is Luz Castro, Health Care Specialist from the College of Southern Nevada. Our program at the College of Southern Nevada Division of Workforce and Economic Development strives to deliver a high-standard curriculum that teaches and promotes all the competencies and principles required for a qualified home health aide, NCNAs. Our programs are highly recognized by industry leaders and who are constantly requesting our students to be hired or to hire them as home health aides is among the fastest growing jobs in the industry. It is a great need that these companies -- as they continue to grow.

Although our -- also, we have such a great program. We continue having these several barriers, which is tuition.

AMERICAN OVERSIGHT

Students who are interested in our program aren't able to afford the tuition, so this has come to a problematic. We also need to innovate our programs with technology competencies that will better their skills and deliver a high-quality service to employers and of course to the community. Having our program converted to online version will allow our program to be more accessible for all adult and working students. We have gathered with several employers who are interested in partnering and hiring our students upon completion of this program. Here with me today, I would like to introduce Cynthia Knight, Director of Client and Caregiver Services, from Homewatch Caregivers.

KNIGHT: Good afternoon. I'm representing the employers of Las Vegas in this industry, and unfortunately, there's a severe shortage of qualified candidates, and we're not able to -- it's limiting the growth of our business, actually, at this point, so it's very unfortunate. We help people stay in their homes right up until the very end if that's what they desire. We also have a contract with the Veterans Administration to provide care for veterans in their own home. So, we're looking to College of Southern Nevada to help us get some qualified candidates as quickly as possible.

SANDOVAL: All right, thank you. Any further presentation?

PREDALUFKOWITZ: Good afternoon, Governor, Lieutenant Governor, Secretary of State, Director Anderson, and Members of

AMERICAN OVERSIGHT

the Board. My name is Dr. Katherine Predalufkowitz. [phonetic] I'm Director of Nursing Education for the State Board of Nursing. So, thank you for allowing me to be here to speak about CNAs and nurses in Nevada. I'm very passionate about it. When one gains a certified nursing assistant certification, that's a great entry point into any health care occupation or profession. A lot of our CNA students, especially in the high schools, they have goals of becoming nurses or physicians or dentists. So, it's a great pathway for entry.

So, increasing the technological literacy for our CNAs and nurses would be great to increase their competency in this area of technology. Technology is growing and expanding, and we have to be in the forefront of that and understand what our needs are going to be not just tomorrow, but, you know, ten or 15 years down the road. So, we need to increase our skillsets of our CNAs and nurses who come out of the programs so that we can meet these demands of technology and also the demands of our population. So, technology is a commonplace in health care, but it's not so commonplace in the training that CNAs and nurses receive. So, we're hoping with this funding, that we can increase the technology, competency, and training within the CNA and nursing and advanced nursing practice programs. I am the Director of Nursing Education for the State Board of Nursing, so I speak to other educators around the country. Nobody else is really looking at this, so this will be a transformative idea for

AMERICAN OVERSIGHT

nursing and CNAs. The impact would be huge statewide. This will truly improve the quality of care and access to care, especially in our rural communities. Our patients are moving more from the inpatient acute care setting back into their communities, so we need to be able to make sure that they have access to their health care providers wherever they are, not just when they're sitting in a hospital. It can increase our communication with the providers and the nurses and the CNAs, increase the ability for data to be shared and decreasing errors in communication and documentation. We are currently working on building these courses, and I have talked to the university and colleges and the private CNA programs and the public CNA programs, and everybody is pretty much onboard and excited for this program -- this project to go forward. I have a great commitment to educating high-quality, safe nurses and CNAs in Nevada, and I think that this is a great step for us as a state to take to really educate them.

My goal is increase CNA education in more high schools. Right now, we have about seven or eight high schools in Nevada that actually offer CNA training programs for our younger generation. Like I said, I really enjoy seeing those students, because they really want to be something, be someone. My goal is to expand the CNA programs in a lot more high schools in Nevada so that we can offer, you know, access and opportunities to students who might not know that those opportunities exist. And

AMERICAN OVERSIGHT

so I want to thank you for your time and your consideration on this matter. Thank you.

SANDOVAL: Thank you for your presentation. I don't have any questions. I'm really enthusiastic about this application, because we do have a tremendous need in this area, and it's going to obviously improve health care in our state, but typically, we lag when it comes to medical professionals and medical providers, and this, to me, is the exact anecdote to that. So, for everybody that's been associated with preparing this application, I truly appreciate it. Questions or comments from any of the Board Members?

HAVINS: Yes, Governor, Havins.

SANDOVAL: Yes, Dr. Havins. Thank you.

HAVINS: Yes. Can you tell me what the tuition would be for a CNA program and how much would be covered under this WINN program.

WASRICK: Sure. The way that this budget is structured is it covers 100%. So, the idea is to get folks through the program to increase, right, the volume that's coming through. The tuition at CSN is approximately $2,400 for a CNA.

HAVINS: For a CNA. Okay, and the high school programs, do you have to be 18 to get a CNA? Is there an exam I assume?

AMERICAN OVERSIGHT

WASRICK: There is a licensing requirement, and she's going to check me if I'm wrong, but I believe 16 is the threshold.

HAVINS: Sixteen?

WASRICK: Yes.

HAVINS: Okay. And as far as the high school expansion goes, you have seven or eight. You could expand to what if this grant occurred?

PREDALUFKOWITZ: My goal would be six.

HAVINS: Six more?

PREDALUFKOWITZ: Yes.

HAVINS: Okay, very good. I concur with the Governor entirely. I think this is a great program and excellent way for individuals to get started in the medical field, and the high school route I had not heard before. That's a wonderful idea.

HUTCHISON: Governor?

SANDOVAL: Thank you, Dr. Havins. Mr. Lieutenant Governor.

HUTCHISON: How many tuitions would be covered in the total with this?

WASRICK: This particular application is covering 250 individuals, but our goal is always to look at opportunities for integration. Workforce Innovations for a New Nevada is one source. There is quite a few sources of Workforce [inaudible]

AMERICAN OVERSIGHT

funding. So, what we want to be able to parlay is infusing technology into as many individuals as possible. So, if we can leverage other funds and other opportunities for the tuition for a CNA or home health, that would give us the ability to increase the technology infusion and certification as well.

HUTCHISON: Thank you, and then as far as the high school expansion, are we looking at schools then beyond career and technical academies?

PREDALUFKOWITZ: Correct, because currently, we only have them in the career and technical academies. So, my goal is to get out, get the word out, start collaborating with those schools.

HUTCHISON: Do those high schools have the resources necessary for this kind of a program, because those career and technical academies tend to be, you know, a little more geared towards that type of a program.

PREDALUFKOWITZ: Correct. I would work with them to ensure that they do. I have a lot of other community partners that could work with them and help them where they're lacking.

HUTCHISON: Thank you so much. Thank you, Governor.

SANDOVAL: Thank you, Mr. Lieutenant Governor. Any other questions or comments from any other Board Members? If there are none, the Chair will accept a motion to approve the request by the Clark County Health and Technology to enter into a

AMERICAN OVERSIGHT

WINN grant agreement not to exceed $700,000 as presented in Agenda Item 7B.

BARRETT: So moved by Barrett.

HAVINS: I'll second.

SANDOVAL: Mr. Barrett has moved for approval. Dr. Havins has seconded the motion. Any questions or discussion on the motion? I hear none. All those in favor say aye. [ayes around] Those opposed say no. That motion passes unanimously. Congratulations, good luck, and again, I look forward to seeing the returns. That takes us to Agenda Item No. 8.

SPEAKER: Come back for more later. Come back for more.

SANDOVAL: Agenda Item No. 8, Workforce Innovation for the New Nevada Fund Program for Director Approval [inaudible] Logistics and Manufacturing and Re-Entry Initiative.

VEGA: Good afternoon, Governor.

WASRICK: Governor, this is -- oh.

VEGA: Sorry.

WASRICK: It's okay. Hi, Camille.

VEGA: Hi.

WASRICK: This is Stacy Wasrick. I just wanted to give a quick preface to their program. We're doing this in two difference phases, but this is a really exciting application that comes to us from Truckee Meadows Community College, and they are requesting Director Approval not to exceed $75,000 for a

AMERICAN OVERSIGHT

wonderful partnership with several employers. Several are there, Quality Plastic Products, Sierra Meat, High Mountain Door and Trim, Reno Custom Creating, and Iron Skillet. It's also an e-partnership that includes the Reno Justice Court, Washington County Department of Alternative Sentencing, the State of Nevada Department of Corrections, and the Nevada Department of Public Safety Parole and Probation. They really designed a robust and comprehensive program that's looking to train a professional pool of 30 individuals to meet the growing needs of area manufacturing and logistics employers. Camille, take it away.

VEGA: Governor, Lieutenant Governor, Secretary, Director, and the Board, thank you so much for hearing this proposal today. My name is Camille Vega. I am the Re-Entry Coordinator at Truckee Meadows Community College. I'm also a Little Flower alumni. I would like to present this proposal. I'm sure many of you know the data and statistics of those that are incarcerated, but current data shows that one in three Americans have some sort of a criminal record, whether that be a juvenile record, misdemeanor, or felony. These are also individuals that have the least supports in getting out of incarceration and joining society, and the numbers are fairly grim. One-half of those that are released are incarcerated within their first year. Two-thirds are reincarcerated within three years, and over five years, three-quarters of them are re-incarcerated.

AMERICAN OVERSIGHT

One of the greatest factors in reducing recidivism is employment, and employment not at minimum wage, but at a higher wage, a supporting wage, sustaining wage. This program is focused on helping those that are leaving incarceration in northern Nevada to enter into an education program with a direct pathway into employment. The employers that I have pulled together today are just a few of those in northern Nevada that are willing to hire this type of population, but in discussing this program with each of them, they've expressed interest in not only giving them those technical skills, but also the soft skills in order for them to succeed in education and in employment. So, today, I have with me -- this is Lieutenant Jonathan Wilson. He is the facility manager at Northern Nevada Transitional Housing. On my right here is Billy Owensby with Quality Plastics, and seated right back here is Janice Gonzalez with Sierra Meat and Seafood, and I would like to pass this over to Lieutenant Wilson to talk a little bit more about the program.

WILSON: Afternoon, everybody. Sorry, again, to lose some of the polish here with me. I'm a little bit out of my element. I joined Northern Nevada Transitional Housing last August. I've been with the Department of Corrections for almost 15 years now and have spent a lot of that time watching us send guys out to the street with little more than 60 bucks and a bag of their clothes and a good luck. When I stepped up and took over at transitional housing, I meant to do exactly that, make it

AMERICAN OVERSIGHT

transitional. Every one of these guys who gets off the van gets a speech from me that you are in the middle of Reno. If anybody knows where we are, we're at the corner of Kesky [phonetic] and 2nd, busy corner in downtown -- well, near downtown Reno. And, you know, I let them know right away that you are here to transition back into society. You've got one foot in the public and one foot here. You're going to be a good neighbor. You're going to be a productive citizen, and you're going to go on about your life. You're not going to come back to me.

Part of that -- a large part of that is fostering positive relationships with employers in town. We've got 30 or 40 employers. I don't have an exact number, but we have 112 beds. Every one of my guys is employed right now, and that is -- actually, right now, the problem is I have employers who are fighting over the opportunity to interview our guys. One of the toughest things for my population is a lot of them come to me at this point in their lives, and some of these guys have spent a fair bit of time down. Some of them have been in and out of trouble and are still pretty young, but they have no job skills, no job record, not a resume. I had one guy tell me he doesn't have a signature, and that's just basic stuff that most adults learn as they're going through life and getting their education.

So, I made it a priority for me to really push the education and push the idea that you're a part of this community and you are a part of what's going on in this city. As part of

AMERICAN OVERSIGHT

that, I started pushing guys towards TMCC, and through a fair bit of serendipity, Camille ended up with one of my residents, and we got to talking, and I -- my hope was, hey, you know, can you come back it easier for my guys to enroll in classes? And we got to talking about the potential for certificate programs and that kind of thing. And she brought on some of the judges from the specialty courts. We got together with Washoe Alternative Sentence, Parole, and Probation, and we were able to arrange some classroom space, and now we're here asking for your support to make some classes happen.

I have reached out to a number of our employers that I know are reliable and interested and have taken the opportunity to hire, you know, my residents and appreciate the -- you know, the attitude that they bring, and every one of them has been supportive and interested in getting some training, some specific training that will help their businesses. This first cohort, we're looking at manufacturing, logistics, and some food prep, food safety, and those are the ones that the employers identified as being most important. The other thing that they mentioned was the soft skills, and that would be the first part of this program, is getting some soft skills, some re-entry skills, financial literacy, financial planning, some basic academic skills so they're able to succeed when they start classes, and get them back on their feet. So, I'm going to stop rambling and pass it on to Mr. Owensby here.

AMERICAN OVERSIGHT

OWENSBY: Hello, my name is Billy Owensby, and I'm here as a representative of Quality Plastics here in Nevada. We are a plastics manufacturer that's been in business for about 35 years. We're advocates of inmate reentry, and 40% of our staff is actually made up of ex-felons. We hire directly from a restitution center, or the Northern Nevada Transitional Housing. We've been hiring there for about ten years now. Our typical new hire from one of these re-entry programs like this is reliable, consistent, and I'm sure that's hugely due to you, and we work to keep these employees upon separation from incarceration. We are advocates of training and soft skills in other areas that would benefit an individual when looking for work in manufacturing. The confidence boost alone and elevated self-worth that results, we believe, helps to lower the risk of reoffending.

I am uniquely positioned to endorse this belief, as I am an ex-felon. I was hired out of the restitution center two years ago at Quality Plastics, and I am now the IT Director of Quality Plastics, and the soft skills alone -- I give everybody a test. We give a psychological profile for everybody that comes into Quality Plastics, and some of the testing that we do is on light industrial math and safety, reliability, and spatial reasoning. And consistently across the board, these are low scores. They're great people, but low scores. When we bring them on, it takes about 90 days to get somebody up to speed in working in that environment, and when it comes time to separate from

AMERICAN OVERSIGHT

incarceration, we've even put together an inmate-run -- an inmate-run group at work to try and teach people how to write a check and all these other things, but it's something that's definitely necessary to get people in the position to not reoffend.

VEGA: I believe that's all that we have today. If you have any questions -- I know that it was a long meeting and we want to keep it short and sweet.

SANDOVAL: No, no. I don't want to punish you because you're at the end of the Agenda, but no, I -- but this is important, and I may have mentioned earlier in this meeting, but -- I think I did, that on one of my other hats, I serve as Chairman of the Board of Prison Commissioners, and that was the exact discussion that we had this week, is that there are several inmates that are parole eligible that don't parole because they don't have a place to go or they don't have a job. So, this is critically important, and as you said, you know, the recidivism associated with those that have been released is high in this job, and you can speak to this, is having a good paying job isn't just about the money. It's about, you know, learning, you know, to be at work and be prepared and getting those job skills, programs, and life skills as well. So, I'm really pleased to see this, and I know this is an outgrowth of a bill that Senator Ford, I believe, had sponsored.

VEGA: Yes, sir.

AMERICAN OVERSIGHT

SANDOVAL: And so it was a bill that I signed. So, you know, for me, it's really rewarding to see it come to this, and I want to thank the employers, I mean, for further willingness to do this, because historically and traditionally, there aren't many employers that are willing to hire the ex-felons and give them a chance, and so I really appreciate that. There's a lot of effort and a lot of investment that's going on at the Department of Corrections associated with this, and at the end of the day, you know, the purpose is to provide that second chance and to give a new lease on life and allow individuals that perhaps had had problems in the past to have a second chance at a productive life, and you're living proof of that. And so, again, I am -- another one of these programs -- or the WINN Fund opportunities that I'm going to really be looking at with interest, because I think it's going to be a big game changer for people, so thank you.

VEGA: Thank you.

SANDOVAL: Any other questions or comments from any of the Members? Mr. Klaich?

KLAICH: Governor, if there ever was an example of doing well by doing good, I don't know how it could be anything more than this program. When you first spoke to us almost eight years ago, you talked about providing jobs to Nevadans, and this particular program, WINN program, and particularly, re-entry, it would be easy to forget. It might not -- it might not grab the

AMERICAN OVERSIGHT

headlines that some of the other businesses that move to the state provide, but I think it highlights a couple of things. The dignity of a job and providing -- and the self-respect that that gives to folks is a reason for this program if nothing else. The wisdom that came out of your economic development program in establishing WINN and these three applications that we're seeing today, really exciting, because they're just the exact kind of partnership between our community colleges, businesses, and helping Nevadans get good jobs that I think was originally envisioned three or four years ago, but now we're seeing it come to fruition.

I know we've had similar programs move through CSN in southern Nevada to assist re-entry, but I don't care if this is the end of the meeting or not. This is really exciting stuff, and I think it's a real credit to your staff, Mr. Director, that you're bringing forward these, and my thanks to our community colleges who are bringing forward these programs. Great stuff, Governor.

SANDOVAL: Well said, Mr. Klaich, and thank you. Questions or comments from Southern Nevada?

HUTCHISON: Yes, Governor.

SANDOVAL: Yes, Mr. --

SODERBERG: Governor, this is Don Soderberg. Well, we were excited about all three of these WINN applications, because they hit areas that are very important, but this particular

AMERICAN OVERSIGHT

application is one that we were very excited about. You charged our agency to make re-entry a point of emphasis three years ago, and as you said, sometimes it's a hard sell. So, when I hear the gentleman from Quality Plastics and see some of these other companies that are not only willing to take a look at someone who's got a criminal record, but actually are enthusiastic about it. I really wish we could bang the drum louder. We're looking at an empty room here today, and my only regret is that this application should have been first so the 14 companies that we gave abatements to would have heard what we heard today. As I said, this is a hard sell, including companies that come to us for abatements are often not open-minded to when we assist -- attempt to assist them in recruiting to taking an open-minded look at individuals who may have a record.

So, what has been said here today I think is very important and needs to be said loudly to other employees. There are very, very good employees out there that have something on their record. They may be currently living at Warden Wilson's facility or the Casa Grande facility here in Las Vegas, but the feedback we get continually when we do convince an employer to take this step is they're astonished about how dependable and how enthusiastic they are. And I can say at DETR, we have done that, and I can tell you some of our best employees are people that we outreached to some of the re-entry programs and wound up with some who are just phenomenal. And I'd charge anybody to walk

AMERICAN OVERSIGHT

through our offices and tell me who they are, because you never would notice. So, that's my two cents, Governor. I'll go back to being quiet in the corner here.

SANDOVAL: Director Soderberg, thank you, and I didn't know you were around the end of the table. I can't see you on the television here, so I appreciate your comments. Actually, I did think of one more question, and it's for Lieutenant Wilson. You said my guys. Is this program available to women as well?

WILSON: Actually, at the moment in northern Nevada, it's only open to men. That's partly -- it was originally slated to have some women. I think that that was somewhat shelved because, A, of the space, and B, the staffing involved to bring in a female staff in to house 16 women. So, we currently only house women in the north. Casa Grande transitional housing down south also does house women. They also work with Parole/Probation to provide sort of another level of transition for guys that -- well, men and women who have received parole, but don't have a place to go yet.

SANDOVAL: Well, just hopefully in the future, there will be an opportunity for that.

VEGA: In regard to this program, sir, we -- this first cohort will only include 30 individuals, and they will all be males. In meeting with the two judges and Parole/Probation, we decided that keeping women separate, at least for the first 16 weeks, would be ideal. In the future, you may see me here in a

AMERICAN OVERSIGHT

few months, because I would like to -- based on how well this goes, I truly believe that we will be able to serve each of those populations separately. So, Judge Pearson, Judge Sullivan, and myself thought that it would be best to have a cohort of those that have felonies, another cohort of misdemeanors, another cohort of women, and a fourth cohort of young adult offenders. So, if -- depending, again, how this goes, which I believe will be very successful, we will look at that, and then in the future, I know that there are a lot of funding opportunities from the federal side. Department of Justice has the Second Chance Act, but one of the hurdles that we have of writing for such a grant, and they're large dollar amount grants, is we don't have a program established. So, by providing the spending and perhaps the second group, it really would position the State of Nevada to perhaps looking at those type of grants to further this type of program throughout our state. And again, the employers that have signed these papers are just a few. There are employers that I know of in this state that are willing to hire those that have criminal records, that they do need just a little bit more than the average employee that's going to go and apply for that job. And I think once we go through, perhaps these employers and the judges, lieutenant, and other folks in the system will also support those in getting employment. So, thank you.

SANDOVAL: No, thank you, and I do know that our Department of Corrections is the beneficiary of the Second Chance

AMERICAN OVERSIGHT

Grant. I don't know how that relates to all this, and I guess my only other comment is that, I think I can speak for Lieutenant Governor, is encourage you to get here in the next seven months so we could be -- you know, have the opportunity to participate in another round.

VEGA: We're aiming for four months.

SANDOVAL: Okay. [laughter]

VEGA: We're starting July 11th is the start date we hope. So, we're ready to go.

SANDOVAL: Well, thank you. All right, any other questions or comments? This is an application for Director approval. I'll turn it over to Director Anderson.

ANDERSON: Thank you, Governor, and success begets success. So, once we see some outcomes here, I'm sure we'll be very excited to approve of the expansion of it. Just had a couple quick questions. On -- from the southern Nevada program, have we learned anything that we're implementing here in the north from good, bad, indifferent, things that they have implemented down there?

VEGA: I would love the opportunity to go down to southern Nevada and actually ask questions, tour, but we haven't had that opportunity. This opportunity to request funding from you has been -- I think we had about two weeks to put everything together. So, it was just information that we could gather locally. I think one of the big differences is the southern

AMERICAN OVERSIGHT

Nevada program starts the training while the folks are still incarcerated. The program up here will only deal with individuals that have been released, except for those that are with Northern Nevada Transitional Housing. I believe for the state in the future, it would be ideal if they could get those soft skills training while still incarcerated and maybe have an agreement with community colleges that upon successful completion and release, that they would be able to move into a certificate program. Some of the challenges they have of teaching logistics and manufacturing and food service is the equipment. I mean, it's very difficult to bring the tools. Like Ms. Walden had stated, over at the Edison campus, they have robotics and machinery, and that's quite difficult to bring into a prison.

We're not looking at educating ex-felons in just any job. We're looking at educating them in manufacturing and logistics and food service. These are three of the most high-demand careers here in northern Nevada and some of the best paying ones. So, it's sometimes a little bit of a challenge to model it the way that southern Nevada has done it.

ANDERSON: Sure. No, and I can appreciate that, and that sort of was my question. I didn't know how different they were as you compared them, whether or not there was something we can learn and not have to recreate parts of the wheel. It does seem like a very unique program. Mr. Wilson, for the folks that

AMERICAN OVERSIGHT

are working currently, you said what, 112? Is that the number you have that were currently employed?

WILSON: Yes, sir. I'd have to double check.

ANDERSON: I'm not going to hold you to that number. I just --

WILSON: I think our -- I think our actual count today was 110, but every one of them is working.

ANDERSON: Okay. So, when you compare what they may be making today in their current employment versus going through the certificate program, how much of a difference do you maybe forecast that would be?

WILSON: So, that's probably something the employers could answer better than I could.

ANDERSON: Sure.

WILSON: But as I recall from looking at the support letters that range anywhere from 50 cents to -- what was it, a couple of dollars an hour? So, that's substantial, and those are the guys -- you know, my population who are already working for them, they're willing to give them that pay bump. The other piece of this is, again, the alternative sentencing and parole and probation, who may not be employed or maybe completely underemployed right now and maybe looking to step up from $8.50 an hour to $12.50 an hour based on getting that certificate.

ANDERSON: Good. So, it sounds like we've got commitments from the employer side of things, that these are

AMERICAN OVERSIGHT

skillsets that are -- that have some value on a paycheck level, not just improved efficiency of the company.

WILSON: Yes, sir. Those are the ones that they identified. You know, I contacted -- you know, I think I approached seven or eight employers that are very committed to the program and have done well by us, and hopefully, we've done well by them and asked them what it was they were interested in and what it was that could help them the most. I think going forward, you know, we would look at opening that up to other skillsets depending on the success of this pilot.

ANDERSON: Great. I appreciate that answer. I would echo the comments of the Governor and others, that, you know, kudos to the companies that are willing to participate. It's the absolute key to the success of the program. We can run through -- folks through, you know, skillset training and what not, but if there's no light at the end, if there's no career path, it makes it, one, hard to motivate folks to go through programs, regardless of where they're coming from. But, you know, having that opportunity to either excel or get a job at the end I think is going to be the core success of this program. I think also as we look at -- you know, last GOED Board Meeting, we had a WINN program that wrapped around SNAP and some other folks that needed upscaling and some other opportunities to earn a better living. It really goes right to the heart of Governor Sandoval's, you know, New Nevada and that no one is left behind in the New

AMERICAN OVERSIGHT

Nevada. I think this is, you know, further evidence of a program that came out of a special session that has been expanded and continues to see a lot of success and opens doors for everyone that participates, and so very excited to be a part of it. Kudos to the whole group and Stacy as well for bringing this to us in such a short timeframe. I know we've still got some fine-tuning to do after the fact, but I'm very happy to approve this WINN program on behalf of Truckee Meadows for the amount of -- not to exceed $75,000. Thank you for bringing it forward.

VEGA: Thank you.

SANDOVAL: Thank you for your presentation. Good luck.

WILSON: Thank you.

SANDOVAL: Thank you. We'll move to Agenda Item No. 9, which is the Director's Report. Director Anderson.

ANDERSON: Thank you, Governor. I probably want to point out that after Secretary Cegavske called out Mr. Scott Anderson for being a Kings fan, she promptly left the building there. I've just got a couple things that I want to point out on the Director's Report. There are -- there's a lot of activity in our office going on. Just there's several pages of a report of each of our areas, but our international team just wrapped up an advanced planning mission for the trade mission to Ghana and South Africa. We've got some exciting partners there both from the research institutions, UNLV, UNR, and DRI, as well as quite a

AMERICAN OVERSIGHT

few business partners that will accompany that mission, the Urban Chamber along with other metro chamber members that will participate there. I see a lot of neat opportunities. Ghana in particular is one that we see -- a partner that's strong in Nevada already. Mining is a -- well, actually, Ghana's largest taxpayer. So, very exciting to see partnerships that come from Nevada all the way to Africa in general.

We also signed -- Governor Sandoval, you signed an MOU with Alberta, Canada, just recently. That is developing out even further as we participate in drone technology and partnering with both testing and the technology shifts across international borders. It's very exciting to see that develop out. We have a -- in fact, we have a contingency from Poland here now. We have started kind of a -- not kind of a -- a business recruiting platform that came out of the Poland trade mission, and that group is here now going through kind of a boot camp of how to set up in Nevada and in an intention to expand out into the US market, so using Nevada as their platform to gain access to that US market.

Some of it is as basic as how to start a business in Nevada, how to get access to capital, and how to approach potential clients for their technology or products. So, very exciting to see that expand out, and we have many more companies I think that are being bedded now and matching funds both from

AMERICAN OVERSIGHT

the European union as well as some state funds as well that are matching that program.

Randy Walden, who is -- actually, his last day is tomorrow, is leaving GOED, but one of the key things I think was a very exciting announcement is that we had over 600 apprenticeship openings announced at the Panasonic factory, and over 425 employees have Panasonic, are now participating in that. It's a paid intern -- or a paid apprenticeship program, which is very exciting to see that continue to ramp up and develop those skillsets to get those workers the skillsets they need to continue to move up the ladder there. That continues to be certainly a wonderful partnership we have with Tesla and Panasonic across the board.

We have nominated the opportunity zones, which they're sitting at the Department of Treasury waiting for certification. We've had a lot of input from folks that are anticipating a positive outcome there, and it's been exciting to hear about some of the projects that are going on there. Certainly -- really, across the state, there's billions of dollars in pent up capital gains that are ready to be deployed, and we're excited to see that get deployed. A lot of folks have been through our office, and with the help of Corey Hunt and Derek Armstrong in our office that sat down and discussed what those opportunities are and how they might be able to deploy that capital, I think it's going to

AMERICAN OVERSIGHT

really accelerate even more so what we're already seeing in the market.

The Nevada Film Office is working through a program directory. Each year, they put together, essentially, a vendor directory of, you know, where do I go to find somebody that can put up lighting, stage hands, grips, camera operators, et cetera. That has been a great success. They've digitized that and made that a web-based directory as well as a print directory. They're also doing it for folks that want to -- may have sites that would be good for films or for people that want to come and film on those sites. So, whether that's your backyard or a studio lot or whatever, they've got a database that turns into a print product right now and often becomes outdated by the time they get to print. So, then the process of digitizing that and making that a database so that the end users -- or the consumers at those locations can actually keep up to date.

We've got kind of a fun program going on with Truro University. It is developing a series of certificates and technology for emergency preparedness and disaster response. There's a lot of -- obviously a lot of turmoil in the world today, and some of these certificate programs of how to respond and what technology gets integrated to those responses and are current level of education, this would work as either students are going through the program or continuing education programs for folks that are already deployed out into the field. So, very

AMERICAN OVERSIGHT

exciting that GOED gets to be a part of that, and then of course, Stacy, who presented several of our WINN projects, today, she is the newest member of the GOED team, has hit the ground running, really a great opportunity to work with her.

I think that's evident in, one, how quickly these three applications came to us, but as well as how thorough they were. And while everything needs a little bit of fine-tuning after we go through this process, she is on it, and it's been really a pleasure to have her in the office. And with that, Governor, that concludes my Director's Report.

SANDOVAL: Thank you, Director Anderson. Do any of the Board Members have any questions for the Director? Thank you. We'll move to Agenda Item No. 10, which is a State of Nevada Unemployment Rate Update. I believe it speaks for itself. We're on a good track. Any questions from Board Members with regard to Agenda Item No. 10? We'll move to Agenda Item No. 11, Public Comment. Is there any member of the public present in Carson City that would like to provide public comment to the Board?

COREY: Governor, Lieutenant Governor, Members of the Board, some of you may know tomorrow is actually my last day with GOED. It's a bittersweet, actually, for me to say that. Going back to the private sector for an incredible opportunity for me and my family. We've got another baby on the way, which is great, but has accelerated my timeline quite a bit, but

AMERICAN OVERSIGHT

Governor, I can't say enough. Thanks to you, seven years, four years in your office, and another three here at GOED. It's been incredible since our faithful flight on Southwest Airlines when I was in management consulting, and it's just been the greatest honor of my professional life to work for you and to serve this great state. I can't thank you enough for the opportunity. And to the folks at GOED, Steve Hill, Paul, all of our incredible staff here in Carson City, the staff who do all the work that no one ever sees, the folks in our admin division, our receptionists and assistants, Bob Potts, all of the fantastic folks in the office. It's an incredible privilege to work with them, and then also can't thank enough the Members of the Board for your support, the work that we've been able to do over the years. The WINN Fund, it's incredible to -- it's a cherry on top just to see these great applications coming together. To think that we got to establish that during the special session and the work we've done on autonomous vehicles, seeing that finishing up, and just all of that, it's -- I can't thank you enough. It's been truly the honor of a lifetime and something that I'll certainly miss. I'm excited for this new opportunity and think it'll allow me to help see some more projects through and help our region grow and help our state continue to grow well, but again, thank you so much for the opportunity. It's been a privilege.

SANDOVAL: Corey, thank you, and, you know, I'll say this, and what Corey was eluding to is you never know who you're

AMERICAN OVERSIGHT

going to sit next to on a Southwest Airlines flight, who had a late night flight one night, and Corey and I just serendipitously happened to be sitting next to one another, and we struck up a conversation. And soon thereafter, he became part of the staff, and Corey, as he mentioned, has worked on everything from sage-grouse to driverless cars, to workforce, to so many other things. And you've put your fingerprint on a lot of things in this state and, and a lot of success is due to your efforts and due to your intellect and your commitment, Corey. So, I personally want to thank you for your service, congratulate you on your family, and congratulate you and wish you the best with regard to your next endeavors. Wherever you go, you're going to do well, and we appreciate that, and the final thing is Corey -- many people may not know this, but Corey is a professional performer, and his -- but his group performed the Battle Hymn of the Republic at some of my State of the States, and that's something that I'll always cherish, and it was just truly remarkable. So, you're a very talented individual, and again, I wish you the best, and thank you for your service, yeah. All right, any other public comment from Northern Nevada? Any public comment from Southern Nevada?

BUSTAMANTE-ADAMS: Good evening, Governor. For the record -- and Members of the Board, Irene Bustamante-Adams representing Workforce Connections as their new Chief Strategy Officer. I just want to say thank you, especially for supporting the Clark County Health and Technology WINN Fund application. We

AMERICAN OVERSIGHT

have been included in the conversations by GOED, and I appreciate their efforts to do that, and in addition, this also aligns with your vision, Governor, about removing barriers and occupational licensing, and so I think it's a very nice compliment. And then just lastly wanted to publicly thank Dr. Jilian Barclay [phonetic] for just her vision and bringing a global vision to Nevada and putting us in the competitive atmosphere in order to serve the employer. So, just thank you.

SANDOVAL: Thank you, Ms. Bustamante-Adams, and congratulations in your new role. Any further public comment from Southern Nevada? I think we cleared the room.

HUTCHISON: Nothing further, Governor.

SANDOVAL: All right. We'll move to Agenda Item No. 12, Adjournment. Is there a motion to adjourn?

SPEAKER: So moved.

HAVINS: So moved, Governor, Havins.

KLAICH: Second.

SANDOVAL: Dr. Havins has moved to adjourn. Mr. Klaich has seconded the motion. All in favor please say aye. [ayes around] That motion passes unanimously I know. Thank you, ladies and gentlemen, really great meeting. We've done some good things today and really excited about what's happening. All right. Best to all of you. Thank you.

[end of meeting]

AMERICAN OVERSIGHT

STATE OF NEVADA
GOVERNOR'S OFFICE OF ECONOMIC DEVELOPMENT
BOARD MEETING
May 17, 2018

The meeting of the Board of Economic Development was called to order by Governor Brian Sandoval at the Capitol Building, 101 N. Carson Street, Carson City, Nevada, 89701; and via video conference at the Grant Sawyer Building, Governor's Conference Room, 555 E. Washington Avenue, Room 5100, Las Vegas, Nevada, 89101.

1. CALL TO ORDER, ROLL CALL AND ESTABLISH QUORUM

VOTING BOARD MEMBERS PRESENT

Governor Brian Sandoval, State of Nevada
Lieutenant Governor Mark Hutchison, State of Nevada
Secretary of State, Barbara Cegavske
Dr. Weldon Havins, Director, Medical Jurisprudence and Ophthalmology, Touro University Nevada
Mr. James Barrett, Jr., President and Founder, The JABarrett Company
Mr. Sam Routson, Chief Administrative Officer, Winnemucca Farms
Mr. Rob Roy, CEO/Founder, Switch

NON-VOTING BOARD MEMBERS PRESENT

Mr. Don Soderberg, Director, Department of Employment Rehabilitation and Training
Mr. John White, Chancellor and CEO, Nevada System of Higher Education

STAFF MEMBERS PRESENT

Mr. Steve Hill, Executive Director, GOED, Secretary of Board
Michael Dang, Director of Business Operations, GOED
Jenn Cooper, Communications Director, GOED
Bob Potts, Research Director, GOED
Steve Woodbury, Administrative Services Officer, GOED
Michelle Sibley, Executive Assistant / HR Coordinator, GOED
Melanie Sheldon, Executive Assistant / Business Development Specialist, GOED
Nichole Anderson, Administrative Assistant, Business Development Division, GOED

GUESTS PRESENT

Assemblywoman Irene Bustamante-Adams
Henna Rasul, Attorney General's Office
Barbara Coffee, City of Henderson
Michael Walsh, LVGEA
Nancy McCormick, EDAWN
Chris Ault, EDAWN

AMERICAN OVERSIGHT

Perry Ursem, LVGEA
Michael Walsh, LVGEA
Anthony Ruiz, LVGEA
Colin Brett McNeil, Aptiv
Todd Ohendt, Aptiv
Manu Namboodiri, Aptiv
Spencer Schmerling, Cascade
Todd Clark, Scientific Games
Phil Klevorick, Clark County Economic Development
Frank Woodbeck
Dan Hunt, C4Mining
Patti Hunt, C4Mining
Derek Armstrong, GOED
Stuart Edenfield, WMI
April Ruelas, EWS
Rolayn Ruelas, EWS
Bill Legere, CNLV

2. PUBLIC COMMENT

Mr. Brian Wilcox introduced himself and advised that he is the former Chief Information Security Officer for the State of Nevada and the Governor, and subsequently, has moved back to the private sector after a four-year stint with the State. Currently, Mr. Wilcox holds the position of CISO for Black Ridge Technology International.

Mr. Wilcox stated that Black Ridge is a military grade cyber defense security company with its corporate headquarters in Reno, Nevada, with affiliate offices in New York, Virginia, and California. While serving with the state, Mr. Wilcox had a unique vantage point understanding the strengths, weaknesses, threats, and opportunities of our state's cyber defenses. He also noted during his cyber security career the continued failures of the current cyber security defense mechanisms.

The defense strategy needs rethinking, and that is why Mr. Wilcox chose to join Black Ridge. While serving at Black Ridge, he had the privilege of working with public and private sector organizations, evangelizing identity-based security solutions. In the noisy cyber security marketplace, Black Ridge is unique in providing a solution that forever changes the way we communicate safely over the internet. Transport Access Control, the primary of seven patents that Black Risges holds, acts as the liaison between the chaos of the internet and organizational networks. TAC prevents all unapproved traffic even from being initiated. This revolutionary solution authenticates every connection on the first packet of data. The result is an immediate tangible reduction in malicious, unwanted traffic and traffic that poses the bulks of cyber threats today.

AMERICAN OVERSIGHT

Only preauthorized authenticated connections are allowed, all of which are managed via a highly scalable and secure provisioning system. Mr. Wilcox stated his continued quest to inform the GOED and all other state entities of their existence and that the next generation of cyber defenses has arrived. As a member of the Nevada business community, Black Ridge is coordinating efforts through the Nevada Office of Cyber Defense Coordination and meeting the State's cyber strategic plans for years to come. More information is available on request. Mr. Wilcox thanked the Board for the opportunity to speak to them today.

Governor Sandoval thanked Mr. Wilcox for his comments and asked if there was any other public comment.

Mr. Jared Smith, Chief Operating Officer of the Las Vegas Global Economic Alliance, stated that he wanted to take a moment to say how proud he is of all these companies , and how proud we should all be of the economic development infrastructure staff, incentives, and programs. Mr. Smith thanked the Governor and noted this was the most projects that LVGEA has ever brought in one meeting.

3. GOVERNOR SANDOVAL'S COMMENTS

Governor Sandoval noted the aggressive schedule for the meeting and advised he would limit his comments. Governor Sandoval advised that Mr. Adam Kramer, Executive Vice President of Strategy for Switch Communications, had been appointed as a new member of the Board.

Mr. Adam Kramer thanked Governor Sandoval for the opportunity to serve on the Board.

Governor Sandoval thanked Mr. Kramer and advised the Board is pleased and excited about the quality of the types of businesses that are coming to the state, and also with regard to the job training, relationships, and partnerships that are now in place throughout the education system and economic development authority. Governor Sandoval advised that the Board and everyone responsible for participating should be proud, and the agenda for the meeting reflects that Nevada is well-positioned for an extremely bright future. Governor Sandoval thanked the GOED Board, Regional Development Authorities, universities, community colleges and local governments for all of their effort.

4. APPROVAL OF THE MARCH 15, 2018 BOARD MEETING MINUTES

Governor Sandoval inquired whether there were any changes to be made to the March 15, 2018 Board Meeting Minutes. There were none.

A MOTION WAS MADE BY MR. DAN KLAICH TO APPROVE THE MARCH 15, 2018 MEETING MINUTES; THIS MOTION WAS SECONDED BY MR. ADAM KRAMER. THE MOTION PASSED UNANIMOUSLY.

5. ABATEMENT APPLICATIONS FOR BOARD APPROVAL:

AMERICAN OVERSIGHT

A. ADVANCED TECHNOLOGIES MANAGEMENT, INC. dba PICTOGRAPHICS

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Perry Ursem, with the Las Vegas Global Economic Alliance, presented Advanced Technologies Management, INC. dba Pictographics, and provided a brief overview of the company and abatements sought. Pictographics is a 24-year-old printing company providing unique digital printing services for a number of industries. This company has been working on its current initiative to begin producing three-dimensional printing. Mr. Ursem was joined by Mr. Craig Miller, President and Chief Executive Officer.

Mr. Miller thanked GOED for the tremendous amount of support received and congratulated Governor Sandoval on his many accomplishments. Mr. Miller advised the company is basically a mom-and-pop type of company that started in their home, and that his wife is the CFO. The company has always been at the forefront of technology, and was one of the first four companies in the US in 1996 to develop the technology for digitally dying textiles. That led the company to become the number one producer of digitally printed gaming table felts in the US and the largest producer of high-end race team uniforms in the US. There's been a number of things over the years in the 2D printing area that the company pioneered, including the hand-painted frescos located in Caesars Palace, and dye sublimated fabric.

The company decided to expand into manufacturing within 3D printing and now has the largest and fastest 3D printer in the world. The company has the only photorealistic 3D printer in the world that prints with ten million colors, an 18 micron slicing, 270 DPI and the Z axis. Future plans include assembling a new piece of equipment, a continuous strand carbon fiber printer, that will print a chain link that will lift 22,000 pounds, yet is 40% the weight of aluminum and twice as strong. This will allow printing in titanium, aluminum, stainless steel, and steel, including steels like Inconel to be used in the space industry by July. The company also has a stereolithographic printer that's used in dentistry and jewelry, and prints 55.1 inches wide. Mr. Miller advised that the company is forming an alliance with Hewlett-Packard to become a manufacturing center for 3D printing and teaming with Hewlett-Packard in Las Vegas.

Governor Sandoval thanked Mr. Miller for his presentation and noted the application was impressive and meets all of the eligibility requirements.

Secretary of State Cegavske echoed Governor Sandoval's comments and thanked Mr. Miller for his presentation. Mr. Miller thanked Secretary of State Cegavske and extended an invitation for any of Governor Sandoval's associates or staff for a tour of the company.

Lieutenant Governor Hutchison thanked Mr. Miller for his presentation and inquired whether the company's expansion would create 27 jobs. Mr. Miller confirmed this is accurate.

AMERICAN OVERSIGHT

Lieutenant Governor Hutchison asked whether the company has IP protected technology. Mr. Miller confirmed the company has a number of patents. Memake, a company based in Tokyo, chose Advanced Technologies Management, INC. dba Pictographics to be their beta site for machines six months before the machines were available for purchase. Mr. Miller explained that the company utilized this time to sell product and be the frontrunner for photorealistic, ten-million-color 3D printing. Advanced Technologies Management, INC. dba Pictographics has created relationships with high school and university systems to take advantage of the equipment and develop the talent that will be required to move into additive manufacturing in the future.

A MOTION WAS MADE BY MR. DAN KLAICH TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, MODIFIED BUSINESS TAX ABATEMENT, AND PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5A. THIS MOTION WAS SECONDED BY SECRETARY OF STATE CEGAVSKE. THE MOTION PASSED UNANIMOUSLY.

B. AXION CORPORATION

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Axion Corporation was presented, and a brief overview of the company and the abatements being sought was provided. Axion is a company that's a provider of satellite-based entertainment services and a lot more.

Mr. Thomas Wendt, CEO of Axion Corporation introduced himself and explained that Axion provides advanced satellite technologies and services that enable consumer and residential access to a new generation of high throughput satellites. Axion's new technology combined with this new type of satellite recently put into orbit allows Axion to deliver products and services that will deliver speeds up to 100 megabits per second for residential and commercial broadband services in a bidirectional service. Unlike satellites in the past which were one way, this is a bidirectional service.

Axion will deliver products initially into the United States, but the satellite coverage in this first satellite also covers all of North America, Mexico, Latin America, the Caribbean, and the Atlantic shipping and air routes. Axion has partnered with Google and NVidia to deliver satellite products for consumers and businesses that are more advanced than what the terrestrial broadband providers can provide. This includes entertainment services, console games like you would play on an Xbox or PlayStation, home automation, advanced services for the Internet of Everything. The initial target market is the 14 million households in the United States which today have no residential broadband services or completely underserved. As more satellites are launched, this opportunity will eventually reach 59% of the homes and buildings that globally have no connection to the internet or no broadband services of any type.

As each satellite is launched, the area to which services will be delivered will expand, and by 2020, high throughput satellites will begin to provide global coverage. The economic incentives

AMERICAN OVERSIGHT

provided by Nevada are an important reason that Axion chose to locate in the state, as well as the dynamic business climate that has evolved over the past two years while working on this project in the state of Nevada.

Governor Sandoval thanked Mr. Wendt for his presentation and inquired how a consumer will access the service described. Mr. Wendt answered that it is fairly simple. Whether it's on a website or resellers and installers throughout the United States, in an area that does not have normally broadband services, the company brings out a satellite and a modem, which is then connected at the type of service level the consumer wants to have.

Governor Sandoval inquired whether the service will be accessible or available in rural Nevada. Mr. Wendt confirmed this is accurate. The first three spot beams that will be launched will be in northern Nevada, providing broadband capabilities to any citizen in the State of Nevada.

Governor Sandoval inquired about the standard skillset being sought. Mr. Wendt answered that roughly half of the employees will have engineering skillsets, but the company will also have people responsible for business development. The corporate headquarters and manufacturing will be located in Nevada. The average wage for manufacturing the devices, Android Terminal for Entertainment Communications (AETC), is $35 an hour with experienced operators of SMT lines, which are robotic consumer electronic assembly lines, is $45.

Governor Sandoval noted he is Chairman of the Board of Prison Commissions and there have been conversations regarding trying to build a telemedicine infrastructure. Is this a type of service that would relate? Mr. Wendt confirmed and noted the company can provide up to 1.4 Tera pixels of video throughput in any given satellite beam.

Governor Sandoval noted that there are many residents in the State of Nevada that live in rural areas who don't have the same quality of life because of the limited bandwidth and access to the internet. Governor Sandoval inquired whether the engineers that need to be hired immediately will be sought from the universities. Mr. Wendt acknowledged that the company expects to have a good university hiring program working with UNR and UNLV, and will also have to recruit from other parts of the country with some people that we're already in the process of recruiting from, Texas and other states.

Governor Sandoval inquired when the ground breaking, or leasing a building, or beginning operations is anticipated to take place. Mr. Wend answered sometime during the summer. The satellite reached its geostationary orbit on December 4th, and it's finished all of its tests and evaluations. There will be some test services on it, and then the start of building brick-and-mortar facilities. There are also three more satellites, the next three generations of satellites currently under construction in Phoenix. Those will start launching in 2019, and as each satellite is launched, the business will expand.

Mr. Dan Klaich commented that the company has far exceeded the requirements for abatements.

Mr. Adam Kramer noted that the impact the company will have on rural communities, schools, and educational resources will be game-changing.

AMERICAN OVERSIGHT

Secretary of State Cegavske echoed Governor Sandoval's comments and inquired whether the company has reached out to community colleges. Mr. Wendt answered that EDAWN has connected the company with local community colleges, and it is a possibility that there might be a 12-week training process that would be held jointly with the community college.

Lieutenant Governor Hutchison thanked Mr. Wendt for his presentation and provided an overview of the benefits of the application.

Governor Sandoval noted his excitement of the application and thanked Mr. Wendt.

A MOTION WAS MADE BY LIEUTENANT GOVERNOR HUTCHISON TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5B. THIS MOTION WAS SECONDED BY DR. HAVINS. THE MOTION PASSED UNANIMOUSLY.

C. CAREMARK, LLC
- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Items C and D were presented together.

Mr. Michael Walsh, with the Las Vegas Global Economic Alliance, presented Caremark, LLC, and provided a brief overview of the company and abatements sought. Caremark, LLC operates as a subsidiary of the American retail and health care company CVS Health and is headquartered in Woonsocket, Rhode Island. Mr. Walsh was joined by Mr. Dan Klein, Director of Engineering.

CVS Health is number seven on the Fortune 500. They are presently the largest pharmacy chain in the United States in terms of number of locations and total prescription revenues. It has approximately 9,800 retail locations, 1,100 walk-in health care clinics, and a pharmacy benefits manager with more than 94 million plan members. CVS sells prescription drugs, a wide assortment of general merchandise and also provides health care services through its more than 1,100 minute clinics, medical clinics, and diabetes care centers.

Caremark offers prescription benefits management services in the United States. The company offers prescription benefit services, including local retail pharmacy and home delivery options, specialty pharmacy services such as pharmaceuticals and other therapeutic services for participants with chronic or genetic disorders and care patterns disease management programs which provide participant care for complex conditions. It maintains mental service pharmacies and operates pharmacy networks in the United States.

Mr. Dan Klein explained that CVS Health, Caremark has recently been focused on the creation of a prescription management service center that will provide innovative tools and strategies to

AMERICAN OVERSIGHT

help improve clinical outcomes for client plan members while assisting them in managing pharmacy overall health care costs. CVS is seeking the most operationally efficient and cost effective location to accommodate its business needs as the company plans for large capital and hiring commitments.

When choosing a location, there were three main contributors to the interest in growing in Nevada as opposed to competing states. The labor pool, the operational cost differences, and the overall pro-business climate and the value of tax incentives offered by the State of Nevada. CVS Corporation, along with its subsidiaries, is a great innovation company in helping people obtain a path to better health. CVS provides drug store physical locations, mail order pharmacies, and a robust pharmaceutical distribution system. In addition, CVS has developed SilverScript, which is an ongoing Medicare alternative. CVS has an unmatched suite of capabilities and expertise to continue to drive innovation in this business and shape the future of health care.

Governor Sandoval thanked Mr. Klein for his presentation and inquired, assuming favorable consideration, when a decision would be made. Mr. Klein replied within a week.

Governor Sandoval inquired as to the role of prescription management service. Mr. Klein replied that the service center with be staffed with people that are able to handle high-touch patient counseling and coaching.

Governor Sandoval inquired whether this would be completed telephonically. Mr. Klein confirmed this is accurate. If it was one of the high-touch specialty therapies, and that staff would be in contact with consumers to make sure they're following the recommended regimen almost weekly.

Governor Sandoval inquired about the skillset of the individuals being recruited. Mr. Klein replied high-end pharmacy technicians, pharmacists, and nurses involved in the therapeutic center.

Mr. Raymond Specht commented that CVS would be a great addition to the State of Nevada.

Dr. Dana Bennett noted that it is commendable that the company is invested in their employees, neighbors and families.

Governor Sandoval inquired whether the incentive packages were important in terms of CVS's decision to locate in Nevada. Mr. Klein confirmed this is accurate.

A MOTION WAS MADE BY MR. RAYMOND SPECHT TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5C. THIS MOTION WAS SECONDED BY MR. ADAM KRAMER. THE MOTION PASSED UNANIMOUSLY.

D. CAREMARK, LLC

AMERICAN OVERSIGHT

- **CATALYST FUND**

Agenda Item C and D were taken together.

Lieutenant Governor Hutchison asked that the company please keep the Board informed when a decision is made.

A MOTION WAS MADE BY MR. RAYMOND SPECHT TO APPROVE THE APPLICATION FOR A CATALYST FUND AS DESCRIBED IN AGENDA ITEM 5D. THIS MOTION WAS SECONDED BY MR. ADAM KRAMER. THE MOTION PASSED UNANIMOUSLY.

E. FORTRESS INNOVATIONS, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Perry Ursem, Vice President of Business Retention Expansion with the LVGEA, presented Fortress Innovations, Inc. and provided a brief overview of the company and the abatements being sought. Mr. Ursem noted a typo in the owner's letter. Mr. Pardee's letter cites 40 full-time jobs at $24.39, and after careful evaluations, the decision was made to scale that number back. The letter of support, as well as the application itself, as well as the calculations done by the Governor's Office reflect 30 jobs at $25.18. Fortress Innovations is a manufacturer providing patented technologies for producing predesigned in-factory homes with an emphasis of hiring veterans as its primary workforce. Mr. Ursem was joined by Mr. Dean Pardee, Chief Executive Officer.

Mr. Pardee explained that Fortress Innovations manufactures a major disruptive technology in the building industry that is better in every building matrix. This technology allows companies to build 26 times stronger, 40% faster, 20% to 40% less expensive, and with the highest energy efficiency ratings in the market compared to traditional stick construction. Also, it is 100% recyclable, non-biodegradable, and non-toxic, and equally important, provides seamless installation that does not exist in the building industry as a standard. Fortress Innovations provides the highest quality structures for all economic segments usually only reserved for the wealthy. The company's products and services consist of a patented one-wall system, thermal coatings, custom homes, real estate developments and projects, predesigned homes, and even mini-homes.

Fortress Innovations will impact 13 market segments, most notably, workforce housing, luxury homes, middle income homes, senior communities, and multi-family homes, structures. Due to the energy efficiency envelope Fortress creates, these structures can be energy independent, revenue-producing structures using solar wind and geothermal if the utility companies and state laws allow it. Currently, the world cuts down 216,000 miles of forests annually, mostly for construction. That is the size of Ireland.

AMERICAN OVERSIGHT

Fortress reduces the need for wood by up to 98% with a far better product. This is a major step to help clean up an industry that is a major cause of direct and indirect pollution. Used wood is toxic, having been treated with fire retardants and bug-resistant chemicals. This wood fills landfills and stays there for decades as the toxic chemicals finally break down, but then are absorbed into the soil. Wood is now a commodity where developers have to incur risk by purchasing wood features to meet their needs years in advance. That puts risk and a delicate economy in peril.

Fortress is committed to serving veterans. The company empowers veterans and provides them with long-term jobs, well-paying jobs in manufacturing, steel framing, sales, admin, marketing, construction, and the building trades. Fortress is currently working with about a dozen workforce organizations to develop a statewide curriculum for the construction and manufacturing industries. Future plans include offering a home ownership program for employees who reach certain milestones and tenure as a merit-based loyalty incentive.

Governor Sandoval thanked Mr. Pardee for his presentation and inquired whether Fortress Innovations has a demo home that is up that already built. Mr. Pardee responded that around 150 homes have been built in Texas, Arizona, Florida, and South America. There are no demo homes built, but the company has the architectural plans and all the engineering behind them.

Governor Sandoval asked whether the company would be doing their own development, or be selling the projects to developers. Mr. Pardee responded, both.

Governor Sandoval asked for clarification on how the process works. Mr. Pardee answered that this is not a modular home. It's called panelization, where sections of custom or pre-designed homes are built in the company's factory. The sections are then taken to a site and put on foundation and constructed in a customized manner. This process reduces cost, saves time, and eliminates a lot of human error.

Governor Sandoval inquired, assuming favorable consideration, when the company would start construction of their building. Mr. Pardee answered, as soon as a set location has been decided on.

Mr. James Barrett asked if the company is relocating from California. Mr. Pardee confirmed this is accurate.

Mr. Barrett inquired of the range of the type of house and square footage. Mr. Pardee explained that most homes are built with the same materials, but it's the fixtures and the accessories that make it substantially more per square foot. From a framing standpoint, it is around $18 to $25 a square foot, which includes all the framing, the insulation, what they call the skin on the walls, the electrical and the plumbing. The composite material used is the only known material to increase its R-value, or its thermal performance, as it ages. It does not break down. It is 100% recyclable, so it is non-biodegradable. From a cost standpoint, this process is around 20% to 40% less.

AMERICAN OVERSIGHT

Mr. Barrett inquired whether there is any specialized skill beyond a trade carpenter that's needed? Mr. Pardee answered, from a framing standpoint, no. A team can be trained within 48 hours. The LA Building and Safety has claimed this is the best technology they have seen come through their office in 30 years.

Mr. Barret asked about the availability for the multi-story heights. Mr. Pardee answered commercial projects can be up to 15 stories if it's in a non-seismic, high-wind area.

Mr. Raymond Specht noted this is a great innovative product for the building industry and environment, and asked what the probability that the company will reach a projection of 180 new jobs created in five-years. Mr. Pardee answered that it is very reasonable between the jobs created between the factory, real estate developers, material suppliers, other developers and individual homeowners.

Lieutenant Governor Hutchison thanked Mr. Pardee and asked whether the company's focus is still on the city of Mesquite. Mr. Pardee answered the company still anticipates continuing to work with the City of Mesquite.

Lieutenant Governor Hutchison inquired whether the workforce would come from Mesquite. Mr. Pardee noted that a lot of people will have to be brought into Mesquite. The company will put together a training program and will utilize workforce organizations such as Nellis Air Force Base and Alpha Roster.

A MOTION WAS MADE BY MR. JAMES BARRETT TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5E. THIS MOTION WAS SECONDED BY MR. DAN KLAICH. THE MOTION PASSED UNANIMOUSLY.

F. FULCRUM SIERRA BIOFUELS, LLC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**
- **REAL PROPERTY TAX ABATEMENT**

Ms. Nancy McCormick, Senior Vice President of Retention and Expansion for EDAWN, presented Fulcrum Sierra Biofuels and provided a brief overview of the company and abatements being sought. Fulcrum Sierra Biofuels is preparing to expand its existing feedstock processing facility in Storey County. Headquartered in Pleasanton, California, their northern Nevada location processes municipal solid waste, known as MSW, which will be transported to its biorefinery for conversion into renewable transportation fuels. Ms. McCormick was joined by Ms. Jeanne Benedetti, Senior Director Project Development.

Ms. Benedetti explained that the company's plant is located near the Lockwood Landfill, where the MSW is being diverted directly from the landfill to be processed in the facility. The company

AMERICAN OVERSIGHT

takes waste stream and creates a feedstock that will be turned into fuel. It is the goal of the company to optimize the amount of biogenic component and reduce the amount of large pieces of metal that go into shredders. Future plans include to buy a trommel, a piece of equipment that reduces the burden on a shredder by dropping off anything eight inches or smaller.

Governor Sandoval thanked Ms. Benedetti for her presentation and inquired whether the waste streams come straight to the company directly, or through waste management. Ms. Benedetti responded that the trash is going through the waste management transfer station along the river. The route trucks that are picking up garbage curbside by generators is going into the transfer station, get loaded on long-haul transfer trailers. As they go through the Lockwood gate at the bottom of the hill by the Truckee, if the green light is on indicating the company needs trash, the driver will turn into the facility rather than continuing a quarter mile to the scale house.

Governor Sandoval inquired what percentage of trash the company is taking. Ms. Benedetti responded about 55%.

Governor Sandoval asked whether the company will need to take even more. Ms. Benedetti responded that it depends on ferrous and non-ferrous trash. Aluminum cans are non-ferrous. Although it is attempted to recycle non-ferrous trash, a lot still ends up in the landfill. The company is able to pick this out and sell it to scrap metal sellers. High-value plastics like a water bottle can also be pulled. Food waste is not of interest to the company.

Governor Sandoval inquired whether there is a reason to recycle between aluminum and plastic if it will all be converted into jet fuel. Ms. Benedetti noted the company is an alternate form of recycling and could reduce the amount of garbage trucks.

Governor Sandoval inquired whether the company pays Waste Management for the trash. Ms. Benedetti advised the company does not pay for the trash.

Governor Sandoval commented this process could make landfills almost obsolete. Ms. Benedetti noted there is still trash the company can't take such as tires and mattresses, but the amount that goes in the landfill can be very highly reduced.

Mr. Klaich asked for clarification regarding the economics of this process. Ms. Benedetti replied that it costs around a dollar a gallon to produce. If that was compared to a fossil, this will always be produced cheaper than a fossil because the feedstock is free.

Governor Sandoval inquired why this process isn't being done for vehicles. Ms. Benedetti replied that this can be done to produce diesel.

Mr. Adam Kramer commented how impressive it is to all the innovation happening in Nevada.

A MOTION WAS MADE BY MR. ADAM KRAMER TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED

AMERICAN OVERSIGHT

IN AGENDA ITEM 5F. THIS MOTION WAS SECONDED BY MR. DAN KLAICH. THE MOTION PASSED UNANIMOUSLY.

G. KRS GLOBAL BIOTECHNOLOGY, INC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Items 5G and 5H were presented together.

Mr. Michael Walsh, with the Las Vegas Global Economic Alliance, presented KRS Global Biotechnology, Incorporated, and provided a brief overview of the company and abatements being sought. KRS is an FDA registered medical device manufacturer. The company makes custom pharmaceuticals, and sterile products such as syringes and IV bags, purified water for drug manufacturing, and a kit used by hospitals and other compounding pharmacies to test their technicians. KRS Global Biotechnology provides its services to patients, surgery centers, ophthalmology clinics, hospitals, university, and veterinarians nationwide and is committed to being the top provider of these compounding services. Mr. Walsh was joined by Mr. Riccardo Roscetti, President and CEO.

Mr. Roscetti explained that KRS is 20 years old and currently has 114 employees out of Boca Raton, Florida. KRS specializes in all injectable drugs. It's a highly skilled labor force. Everything has to be sterile. The company is regulated by the FDA and the DEA on some of the controlled drugs that are produced for hospitals, doctor's offices, and veterinary clinics.

Governor Sandoval thanked Mr. Roscetti and inquired of the skillset the company is seeking in future employees. Mr. Roscetti responded, technicians.

Governor Sandoval asked, assuming favorable consideration, would it be likely for KRS to choose Nevada. Mr. Roscetti confirmed this is accurate.

Lieutenant Governor Hutchison congratulated Mr. Roscetti on a wonderful application and asked if Las Vegas did not have a medical school, would the company still consider this location? Was this an important factor in the decision? Mr. Roscetti confirmed this was an important factor in the decision.

Lieutenant Governor Hutchison inquired whether the company has been in touch with UNLV Medical School to collaborate. Mr. Roscetti replied they had not yet, but are looking forward to doing so.

Governor Sandoval noted his excitement for KRS' application.

AMERICAN OVERSIGHT

A MOTION WAS MADE BY MR. JAMES BARRETT TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5G. THIS MOTION WAS SECONDED BY MR. DAN KLAICH. THE MOTION PASSED UNANIMOUSLY.

H. KRS GLOBAL BIOTECHNOLOGY, INC.

- **CATALYST FUND**

Items 5H and 5H were presented together.

A MOTION WAS MADE BY MR. JAMES BARRETT TO APPROVE THE APPLICATION FOR A CATALYST FUND AS DESCRIBED IN AGENDA ITEM 5H. THIS MOTION WAS SECONDED BY LIEUTENANT GOVERNOR HUTCHISON. THE MOTION PASSED UNANIMOUSLY.

I. POLARIS INDUSTIRES, INC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Andrew Haskin, Director of Business Development for Northern Nevada Development Authority, presented Polaris Industries, Inc., and provided a brief overview of the company and abatements being sought. Polaris Industries is an industry leader in powersports worldwide. Mr. Haskin was joined by Mr. Paul Eickhoff, Director of Distribution and Supply and Management for Polaris.

Mr. Eickhoff explained that Polaris is an industry leader in powersports that started in 1954. The company initially started as a snowmobile company in Minnesota and has grown to become a highly diversified international company. Polaris designs and engineers ATVs, UTVs, motorcycles, and electric vehicles. There is also a large aftersales business in parts, accessories and apparel.

Governor Sandoval inquired whether this would be Mr. Eickhoff's decision. Mr. Eickhoff confirmed it is his decision.

Governor Sandoval asked whether the facility would be built from the ground up, or would be located in an existing facility. Mr. Eickhoff confirmed this would be a ground-up build.

Governor Sandoval inquired whether the company could have that completed in nine months. Mr. Eickhoff confirmed, so long as the land is purchased and the ground is started around August.

AMERICAN OVERSIGHT

Governor Sandoval asked where Mr. Eickhoff is based. Mr. Eickhoff responded that the corporate office is in Minneapolis.

Governor Sandoval inquired whether Mr. Eickhoff would move to where the location is being built. Mr. Eickhoff stated not relocate until his daughter is out of high school.

Governor Sandoval asked when a decision will be made. Mr. Eickoff responded within the next week or two.

Mr. Dan Klaich commented this application will be beneficial to rural Nevada.

Mr. Kramer commented that the Mayor of Fernley would be an excellent person to have in their corner, should the company decide to locate in Nevada.

Secretary of State Cegavske noted that she is a Minnesotan herself, and Nevada would be a great fit for this company.

Lieutenant Governor Hutchison asked whether the two other states that are possible locations are Utah and Arizona. Mr. Eickhoff confirmed this was accurate.

Governor Sandoval noted the company is well-respected and hopes Nevada will be chosen as its future location.

A MOTION WAS MADE BY MR. DAN KLAICH TO APPROVE THE APPLICATION FOR AN AVIATION SALES AND USE TAX ABATEMENT AND AN AVIATION PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5I. THIS MOTION WAS SECONDED BY SECRETARY OF STATE CEGAVSKE. THE MOTION PASSED UNANIMOUSLY.

J. RICHIE BROS. AUCTIONEERS (AMERICA), INC
- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Perry Ursem presented Richie Bros. Auctioneers (America) Inc., and provided a brief overview of the company and abatements being sought. With operations in North Las Vegas, Ritchie Bros. provides auctioneering and logistic services for transportation and heavy equipment that serve several key industries across the globe. Mr. Ursem was joined by Mr. Randy Berry, Senior Vice President of Digital Operations, and Mr. Connor Humphrey, Vice President of Gov Planet, which is a subsidiary of Ritchie Bros.

Mr. Berry explained that Ritchie Bros. has been around for 60 years, and is the largest industrial auctioneer in the world. Ritchie Bros. is a publicly traded company on the New York Stock

AMERICAN OVERSIGHT

Exchange, and has 40 auction locations around the world. The company has been located in Nevada since 1997, and has enjoyed tremendous success in Las Vegas. It has been a great strategic location for the company to serve customers in the mountain west, the west, and the southwest, and it's also been a very favorable business climate.

About a year ago, Ritchie Bros. acquired a company called Iron Planet. Iron Planet is the largest online marketplace for heavy equipment, transportation, similar to Ritchie Bros. It operates online, and one of the sectors served by Iron Planet is the government sector. One of the anchor clients with Gov Planet is the defense logistics agency, which is the logistics arm of the Department of Defense. Four years ago, Iron Planet was awarded the contract to serve as the exclusive disposition agent for the DLA, for surplus rolling stock asset, such as non-militarized rolling stock assets like trucks and trailers. After much success, Iron Planet was recently awarded a contract for non-rolling stock surplus equipment. That contract requires the company to operate distribution facilities in the east coast and in the west coast.

Governor Sandoval thanked Mr. Berry and asked, assuming favorable consideration, would Nevada be the company's future location site. Mr. Berry confirmed this is accurate.

Governor Sandoval asked whether the company would be expanding the identical workforce it currently has. Mr. Berry replied it would be a very similar workplace.

Governor Sandoval inquired to where the new location would be located. Mr. Berry answered in northern Las Vegas. Mr. Humphrey added it would be located a few miles from the current auction site, but close enough that the company can still leverage the auction site for certain asset types that don't require as much indoor storage and handling.

Lieutenant Governor Hutchison thanked Mr. Berry and Mr. Humphrey and inquired whether the company's inventory supply is a direct correlation to the how well the state's economy is doing. Mr. Berry answered, not 100%. The company does well regardless of the economy. When the economy is really strong, most of the equipment is utilized. It is not 100% proportional, but there's definitely an element of it. The company benefits from higher prices in tight supply.

Lieutenant Governor Hutchison inquired about the online aspect of the business. Mr. Berry noted the company has multiple websites. Iron Planet is the core heavy equipment, construction, trucks, and so forth, and Gov Planet is focused on government assets.

Lieutenant Governor Hutchison inquired whether surplus assets can be obtained any other way than online. Mr. Berry noted that there are occasionally assets sold at live sites, but 95% is online.

Mr. Kramer noted for the record that he would be abstaining from the vote due to potential conflicts.

A MOTION WAS MADE BY DR. HAVINS TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5J.

AMERICAN OVERSIGHT

THIS MOTION WAS SECONDED BY MR. RAYMOND SPECHT. THE MOTION PASSED UNANIMOUSLY.

K. SEPHORA USA, INC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Michael Walsh, with the Las Vegas Global Economic Alliance, presented Sephora and gave a brief overview of the company and abatements being sought. Sephora is a privately held global luxury consumer products company that is looking to establish a 715,000-square-foot facility, distribution facility in North Las Vegas. Mr. Walsh was joined by Jeff Ritacco, VP of Logistics, and John Lenio, Executive Vice President with CBRE.

Mr. Ritacco thanked the GOED Board and explained that Sephora USA is a privately held global consumer product company that primarily focuses on cosmetics and perfumes. The company has 39,000 worldwide employees and 2,300 locations in 33 countries. There are currently seven stores in Nevada. Sephora is continuing to see rapid growth, especially in the western US. The company is seeking to establish a new regional distribution center to deliver products to 12 western states, to stores, as well as to e-com customers.

At full operations, this new distribution center will process about $100 million in goods a year. About 97% of those shipments will go to customers located outside of Nevada. Transportation and logistics are a key driver to making the location decision. Should Nevada be chosen, the company plans to hire 400 total for new jobs, 60 that meet the state salary target. It is the intention to fill nearly all positions from Nevada residents. Sephora is also focused on hiring qualified employees who are disabled or are veterans. The company's facility in Mississippi presently has 15% of the workforce there are disabled with a goal of hitting 30%.

Mr. Lenio noted the advantages that Nevada offers from a tax and business climate point of view. This would be Sephora's first distribution center in Nevada, and there are no transfer of jobs from one distribution center to another. The majority of these positions are typical material handling jobs, starting around $12 to $13 per hour and going up based on experience.

Governor Sandoval inquired, assuming favorable consideration, when a decision would be made. Mr. Ritacco responded within the next day or two.

Governor Sandoval asked whether there be a factory store attached to the distribution center. Mr. Ritacco advised the company is not planning that at this time.

Governor Sandoval asked, assuming favorable consideration, when operations would be up and running. Mr. Ritacco advised the e-com side of the building would be operational by July of 2019.

AMERICAN OVERSIGHT

Mr. Specht asked for more information regarding the disability program. Mr. Ritacco responded that the company works with the county or the state to train individuals to participate in the workforce. The individuals are expected to participate at the same levels of someone that does not have a disability. It's a great program because it really gives context to the individual's disability. Having a job is really important, and they bring a fantastic culture to the building. The people that are working for the company now with disabilities have the least amount of absenteeism, they have literally no safety issues, and their work attitude is fantastic. They hit or exceed productivity expectations and quality expectations.

Governor Sandoval advised Mr. Ritacco about Opportunity Village, and stated that there could be an opportunity for partnership should Sephora choose Nevada.

Lieutenant Governor Hutchison inquired whether the company has experienced an increase in e-commerce and a decrease in brick-and-mortar, and what kind of impact that has on the distribution center needs now and in the future. Mr. Ritacco answered that the company's e-commerce has been growing significantly. There has been some flattening on the retail aspect, but the retail aspect is unique because of the in-store experience the consumer has. From a distribution perspective, this facility will handle both retail distribution as well as e-commerce distribution basically 50-50.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5K. THIS MOTION WAS SECONDED BY LIEUTENANT GOVERNOR HUTCHISON. THE MOTION PASSED UNANIMOUSLY.

6. ABATEMENT APPLICATIONS FOR DIRECTOR APPROVAL:

A. 3PEA INTERNATIONAL, INC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Perry Ursem, with the Las Vegas Global Economic Alliance, presented 3PEA International, Inc., and provided a brief overview of the company and abatements being sought. Mr. Ursem was joined by Mr. Christian Mueller, Controller, and Mr. Mark Newcomer, CEO.

Mr. Newcomer thanked the Board and explained that 3PEA International relocated back to Nevada in 2004 with a total of three employees. Since that time, Nevada has afforded the company a great climate to grow in. 3PEA has a 24/7, 365 call center that supports the company's programs. The company brings in customer service relationship management employees, technology employees, and front-end and back-end developers.

AMERICAN OVERSIGHT

Governor Sandoval thanked Mr. Newcomer and noted this is a great application. The average wage, $40 an hour, is significant and really allows Nevada residents to have a great quality of life.

Lieutenant Governor Hutchison noted that the highest wage earners are in sales and inquired what these individuals perform that is so valuable to the company. Mr. Newcomer explained that it's a fairly specialized market, generally biopharmaceutical, and biopharmaceutical sales people demand top premium dollar.

Lieutenant Governor Hutchison asked whether this is a supply and demand situation. Mr. Newcomer confirmed this is accurate.

Director Anderson thanked Mr. Newcomer for the application and expressed excitement with this opportunity. Director Anderson noted that there will be one contingency upon approval. The Department of Tax is still trying to determine whether or not that [inaudible] identifies the company as a financial institution or not. Pending the outcome of that, it might shift the qualifications, but the abatements sought can be approved at this time.

Mr. Newcomer advised Director Anderson that a letter was received from the Department of Tax and that the company will be responding to their position.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6A.

B. ALPHA GUARDIAN

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Michael Walsh, with the Las Vegas Global Economic Alliance, presented Alpha Guardian and provided a brief overview of the company and abatements sought. Alpha Guardian is a leader in the residential safe, security, and storage industry. Established in August 2017, Alpha Guardian has positioned itself to be the category champion and a complete solution in the safe, vault, and secure storage industry. Alpha Guardian champions the ability to offer a robust portfolio of products, including home safes, quick-access gun vaults, security cabinets, and garage storage and organization. Mr. Walsh was joined by Mr. Jesse Bugarin, and Mr. Roger Jenkins, VP of finance.

Mr. Bugarin thanked the Board and explained that the company strives to provide peace of mind to consumers during desperate times by putting a safe in every home. The company invests heavily in its employees and utilizes interns from UNLV. The company is reaching $300 million in revenue and on its way to a billon. When the billon-dollar mark is reached, it is the intention to buy additional companies.

AMERICAN OVERSIGHT

Mr. Roger Jenkins added that the company has had great success working with the Accounting Department at UNLV. Internship has been a very big part of the company. Most interns graduate and are placed with top-level professional accounting firms.

Mr. Bugarin also noted a program called Alpha Guardian University. The company has a reading book club, and Alpha Guardian University began when a previous employee disclosed he was unable to read. Alpha felt a commitment to help employees learn and grow. Alpha Guardian University has executed 1,300 hours of training between middle of 2016 into 2018.

Governor Sandoval thanked Mr. Bugarin for Alpha's relationship with UNLV, and their commitment to literacy. Governor Sandoval inquired whether the company is considering relocating its Chicago Stack-On brand operations to Las Vegas. Mr. Bugarin confirmed this is accurate and noted the company operates roughly 180,000 square feet of warehouse there now, and the company is looking to relocate that portion of the business.

Governor Sandoval asked whether the Illinois employees will be given the opportunity or option to relocate to Nevada as well. Mr. Bugarin confirmed this is accurate.

Lieutenant Governor Hutchison thanked Mr. Bugarin and Mr. Jenkins and asked what type of business activity will be happening at the expanded facility. Mr. Bugarin responded it will be primarily distribution. The corporate offices will also be located in Nevada.

Director Anderson echoed the previous comments regarding the commitment to employees and the community at large. Director Anderson noted several components of the application that stood out including well-paying jobs, and that the company covers 85% of health insurance. Governor Sandoval asked whether there was any issue with open meeting law if there is a disconnect telephonically. A speaker responded the Board still had a quorum. It was unclear who was calling in as the Agenda did not identify a public call-in number, but that shouldn't have caused any issues with NRS 241.

DIRECTOR HILL APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6B.

C. CANNAE HOLDINGS, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Michael Walsh, with the Las Vegas Global Economic Alliance, presented Cannae Holdings, Inc., and provided a brief overview of the company and abatements being sought. Cannae Holdings, Incorporated is a diversified investment company headquartered in Summerlin, Nevada. The firm primarily invests in restaurants, technology, enabled health care services, financial services, and more. Cannae's strategic acquisitions contain a mix of majority and

AMERICAN OVERSIGHT

minority-owned businesses with significant underlying value. In 2015, Cannae, then known as Fidelity National Financial Ventures, LLC, relocated its headquarters to Las Vegas from Florida. The company has subsequently added or relocated nearly 20 high-level executives and employees to the Las Vegas region, and now major company decisions are made from the Las Vegas location. Mr. Walsh was joined by Chief Financial Officer, Rick Cox, and also Gary Ameko.

Mr. Rick Cox explained that in 2015, the company relocated Fidelity National Financial Ventures from Florida to Las Vegas. The company is at a crossroads of deciding whether to expand or not. The company is researching what types of incentives could possibly be available to help make the decision of whether to go ahead and expand and hire extra people.

Mr. Cox asked whether he should provide more history of the company. Governor Sandoval advised this is the chance to do so and that there are several members who are new that were not present at the last presentation. Mr. Cox asked the Board if the members had any specific questions. There were none.

Governor Sandoval thanked Mr. Cox and noted that this is an exciting time for the Knights. The impact that Cannae has had on the community and on the state has been profound. Governor Sandoval thanked Mr. Cox and everybody in the organization for their contributions and commitment to the community. Mr. Cox thanked Governor Sandoval and expressed that the past two years have been amazing and that the community support has been tremendous.

Mr. Cox explained that the Fold the Flag Foundation is designed to help out the spouse of a fallen warrior. The intent is to get them to the next level in their life. A lot of the times the federal government gives you a small stipend to help out with the cost of the funeral, et cetera, and then leaves the spouse at home with no education and no way to get to the next level. The Fold the Flag Foundation is raising money to give scholarships out to those individuals, and children, grandchildren, or even parents. Every dollar that comes in goes back out. The foundation is 100% seeded. The foundation started in Jacksonville, Florida and is now expanding in Nevada through the Vegas Goal of the Knights and Vegas Goal of the Knights Foundation.

Mr. Barrett asked where the name Cannae came from. Mr. Cox answered that it is the battle of Cannae with the Romans and the Carthaginians.

Lieutenant Governor Hutchison thanked Mr. Cox and noted that the application still holds the record for average wages due to the executive team being brought in. Lieutenant Governor Hutchison noted that since the hockey games have been playing the state song, the residents have gotten to understand and appreciate it. Cannae has been incredible for the community.

Mr. Cox asked for continued support from the Board over the next few months as the youth hockey is expanded though Clark County and Las Vegas.

Secretary of State Cegavske explained to the Board that coming from Minnesota where hockey games are held outside, she didn't realize it could be held indoors until coming to Nevada.

AMERICAN OVERSIGHT

Secretary of State Cegavske thanked Mr. Cox for everything the company has done for the community.

Director Anderson thanked Mr. Cox and inquired how many of the 50 employees would be hired locally. Mr. Cox advised that is hard to say. Most of the talent pool that have been pulled have fortunately come from Las Vegas.

Director Anderson acknowledged these are probably not entry level positions, and inquired whether the company works with any of the universities in recruiting. Mr. Cox advised that depending on the level of the individual, $36.90 is an average. The company does pick up entry level types and is looking to UNLV or the local universities when needed. Also, there is a possibility of collaborating with UNLV to set up internships.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6C.

7. WORKFORCE INNOVATION FOR THE NEW NEVADA FUND PROGRAM – (WINN) – FOR BOARD APPROVAL

A. RENO AREA DATA ANALYTICS-Request for approval to enter into a WINN Grant age not to exceed $300,000.

Ms. Barb Walden, Director of Applied Technologies for Truckee Meadows Community College, introduced herself and presented the Reno area data analytics. As Nevada's economy begins to become more diverse, it brings with it the challenge of upscaling the workforce. The WINN project between TMCC and GOED that helped the staff at Gigafactory and is helping to increase the school's pipeline of manufacturing workers is just one example of how they are meeting those challenges using innovative programs and delivery modules and methods to do so. One of the next identified challenges is building the pipeline of Nevada's technology sector. Coding, cyber security, and data analytics are just a few of the examples of the in-demand skillsets needed in our region. These skills are not unique to technology, but cross every industry sector including marketing, health care, business, even state government.

Like the P3 program TMCC created, they have designed the fundamental data analytics and data visualization courses to be modular and flexible for accessibility. The online self-directed format will be practical and applicable, as we will be developing it together with industry. The model is easily scalable, and when developed, it can be expanded all across the state. It aligns with elite model and the concept of in and out ramps. So, in today's global economy, online economy, pretty everywhere you look, data is being collected, and it's important that we know how to manage and use that data. This project will be applicable to large companies, small companies, entrepreneurs, public sectors, state workers, and I believe this program is going to help Nevada

AMERICAN OVERSIGHT

build the workforce to continue diversifying and growing. TMCC is partnering with NCLab on that. Ms. Walden introduced Voss Kamyshanov.

Mr. Kamyshanov introduced himself as the CEO of NCLab and stated he was born in Germany and raised in Russia. NCLab has developed online courses for STEM disciplines and are currently part of a Nevada Ready 21 Program for middle schools. NCLab is working with Clark County, Washoe County, and rural areas of Nevada. They are pushing for high school education, and now this initiative would allow them to go and actually take a further step to pull the students from school towards real jobs. That's the goal as a company and also the mission. NCLab positions themselves within STEM industries and disciplines, and provide the best online education, which is especially great for rural communities. Mr. Kamyshanov introduced Mr. Russ Riggs, the Chief Operating Officer of Elite 361 company.

Mr. Riggs introduced himself and thanked the Board for the opportunity to speak at this meeting. Mr. Riggs stated he and his wife live Reno, Nevada.. His new Atlanta-based company has moved to Reno and they are looking to hire in the area. His company specializes in data analytics. They bring in all the data, organize it, analyze it, and leverage it. Their employees are data developers. They work with retailers, financial services, and are kind of the marketing arm, the data analytics arm. Finding employees in Atlanta was difficult and that's why they moved to Reno. Mr. Riggs stated the more and more schools bring data analytics in, the more that the kids are trained in the tools.

Governor Sandoval inquired whether the company would advise TMCC of the skillsets needed and the candidates would then come to TMCC. Ms. Walden replied that was partly accurate. There are a number of companies that have offered letters of support and have committed their time to helping develop the modules. The development is expected to take around three months, and it is completely self-paced. There are people in place to monitor individuals' progress.

Governor Sandoval inquired what the candidates will look like. Ms. Walden stated that the funding, the paid participation in the modules is intended for those people who need the skillset to get a job, and there are three companies identified as partners. They are going to be seeing UNR graduates that come out with business degrees or marketing degrees, but don't have these data analytics. That can be added on that piece of training that they need to get the jobs with these companies, and so the intent of the funding is to pay for those positions. Once the development is done, it's going to be very expensive to administer. There are hopes to get employers to pay for their incumbent workers to come, individuals that might want to learn a new skillset. Ms. Walden added that they might come back and ask for more money for more tuition.

Governor Sandoval inquired about the process of signing up for the program. Ms. Walden stated for the purposes of the WINN Fund, there will be an intake process that includes an application for the funding, how do you intend to use it. Are you getting to get a better job? Is this going to help you get a job? This needs to be tracked for reporting purposes. It will be an intake process, and a waiting system will be constructed. For the public, the open enrollment piece of it, if somebody wants to sign up, they will be allowed to do so without using WINN funding. While that is the development, the state is building infrastructure, and again, as part of the application,

AMERICAN OVERSIGHT

NCLab has agreed to share a number of seats with other community colleges or the state to GOED to distribute as needed. The possibility of reaching out to other community colleges was considered, but the application came together so quickly that there was not enough time.

Mr. Klaich commented that Grand Rounds was a company reviewed a couple of meetings ago, and it is nice to see them circle back around.

Director Anderson inquired about the initial program development and whether there will be maintenance costs. Mr. Kamyshanov answered that online education has a solid propriety platform to deliver complex knowledge to people, and this particular course would be developed together with participating companies to really match the job demand. Once the set is developed, it takes very lost cost to support it. It can easily scale to virtually unlimited number of students, and once it's developed, it is there.

Director Anderson asked do we have a timeframe of how long that would be covered? Is it the first installment of students, 70 students, or are we looking at a three-year cycle or what is our maintenance schedule. Ms. Walden answered, when Microsoft does an operational upgrade to Windows, this might require some tweaks. Python does upgrades, and that's going to require some tweaks. Part of the reason they partnered with an organization rather than doing it themselves is as a community college, they can't support the constant upgrade cost. The model is built on a portion of that tuition. That does not all stay with the college. There are expenses out of that, and a piece of that is going to go back to the company. Instead of asking the State to pay that maintenance cost, TMCC will pay it back to them to keep the product alive.

A MOTION WAS MADE BY DR. DANA BENNETT TO APPROVE THE REQUEST OF RENO AREA DATA ANALYTICS TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $300,000 AS DESCRIBED IN AGENDA ITEM 7A. THIS MOTION WAS SECONDED BY MR. DAN KLAICHTHE MOTION PASSED UNANIMOUSLY.

B. CLARK COUNTY HEALTH AND TECHNOLOGY- Request for Approval to enter into a WINN Grant agreement not to exceed $700,000

Ms. Stacy Wasrick introduced herself and stated the application comes from CSN. They are requesting approval to enter into an agreement not to exceed $700,000. This partnership brings together several employers, BrightStar Home Health, Hallmark Home Care, Homewatch Caregivers, Home Care Assistance, in addition to a key partner being the Nevada State Board of Nursing. These groups come together to develop a plan of action to address increasing access to nursing pathways in a really key infusion of technology certifications and adding flexibilities to the modes and matriculation within that industry. The approach is going to mitigate the current economic burden that we have with chronic diseases and hospital readmissions by creating a workforce that will become effective bridges between the clinical and community settings. Ms. Wasrick introduced Mr. Luz Castro, Health Care Specialist from the College of Southern Nevada.

AMERICAN OVERSIGHT

Mr. Castro explained the College of Southern Nevada Division of Workforce and Economic Development program strives to deliver a high-standard curriculum that teaches and promotes all the competencies and principles required for a qualified home health aide, NCNAs. CSN's programs are highly recognized by industry leaders who are constantly requesting our students to be hired or to hire them as home health aides. Home health aides are among the fastest growing jobs in the industry.

.

We continue having several barriers, the primary being tuition. Students who are interested in the program aren't able to afford the tuition, so this has come to a problematic. CSN also needs to innovate their programs with technology competencies that will better their skills and deliver a high-quality service to employers and of course to the community. Having the program converted to an online version will allow the program to be more accessible for all adult and working students. There are several employers who are interested in partnering and hiring our students upon completion of this program. Mr. Castro was joined by Cynthia Knight, Director of Client and Caregiver Services, from Homewatch Caregivers.

Ms. Knight introduced herself and stated that she is representing the employers of Las Vegas in this industry. Unfortunately, there's a severe shortage of qualified candidates, and it's limiting the growth of the business. Home health aides help people stay in their homes right up until the very end if that's what they desire. Homewatch Caregivers has a contract with the Veterans Administration to provide care for veterans in their own home. They are looking to College of Southern Nevada to help them get some qualified candidates as quickly as possible.

Governor Sandoval asked whether there was more presentation.

Ms. Katherine Predalufkowitz, Director of Nursing Education for the State Board of Nursing, introduced herself and stated that when one gains a Certified Nursing Assistant certification, that's a great entry point into any health care occupation or profession. A lot of CNA students, especially in the high schools, have goals of becoming nurses or physicians or dentists. It's a great pathway for entry.

Increasing the technological literacy for CNAs and nurses would be great to increase their competency in this area of technology. Technology is growing and expanding, and we have to be in the forefront of that and understand what our needs are going to be not just tomorrow, but ten or 15 years down the road. We need to increase our skillsets of our CNAs and nurses who come out of the programs so that we can meet these demands of technology and also the demands of our population. Technology is a commonplace in health care, but it's not so commonplace in the training that CNAs and nurses receive. Ms. Predalufkowitz hopes thtat with this funding, there can be an increase in the technology, competency, and training within the CNA and nursing and advanced nursing practice programs.

As the Director of Nursing Education for the State Board of Nursing, Ms. Predalufkowitz believes this will be a transformative idea for nursing and CNAs. The impact would be huge statewide. This will truly improve the quality of care and access to care, especially in our rural communities. Patients are moving more from the inpatient acute care setting back into their communities, so we need to be able to make sure that they have access to their health care

AMERICAN OVERSIGHT

providers wherever they are, not just when they're sitting in a hospital. It can increase our communication with the providers and the nurses and the CNAs, increase the ability for data to be shared and decreasing errors in communication and documentation. We are currently working on building these courses, and I have talked to the university and colleges and the private CNA programs and the public CNA programs, and everybody is pretty much onboard and excited for this project to go forward. This is a great step for us as a state to take to really educate high quality nurses and CNAs.

The State Board of Nursing's goal is increase CNA education in more high schools. Right now, only seven or eight high schools in Nevada that actually offer CNA training programs for our younger generation. If we expand the CNA programs in a lot more high schools in Nevada, we can offer access and opportunities to students who might not know that those opportunities exist.

Governor Sandoval thanked Ms. Predalufkowitz for her presentation and stated he is enthusiastic for this application because of the tremendous need in the area,

Dr. Havins inquired what the tuition would be for a CNA program and how much would be covered under this WINN program. Ms. Wasrick responded that the way this budget is structured, it covers 100%. The tuition at CSN is approximately $2,400 for a CNA.

Dr. Havins asked what age do you have to be to get a CNA, and is there an exam. Ms. Wasrick replied there is a licensing requirement and the age is 16.

Dr. Havins inquired as far as the high school expansion goes, you have seven or eight. You could expand to what if this grant occurred? Ms. Predalufkowitz noted the goal is six or more.

Lieutenant Governor Hutchison asked how many tuitions would be covered in the total. Ms. Wasrick replied that this particular application is covering 250 individuals, but the goal is always to look at opportunities for integration. Workforce Innovations for a New Nevada is one source. If funds can be leveraged and there are other opportunities for the tuition for a CNA or home health, that would give the state the ability to increase the technology infusion and certification as well.

Lieutenant Governor Hutchison asked as far as the high school expansion, are we looking at schools then beyond career and technical academies. Ms. Predalufkowitz confirmed this is accurate. They are only in the career and technical academies.

Lieutenant Governor Hutchison asked whether high schools have the resources necessary for this kind of a program. Ms. Predalufkowitz confirmed this is accurate and added that she would work with the schools to ensure that they do.

A MOTION WAS MADE BY MR. JAMES BARRETT TO APPROVE THE REQUEST BY THE CLARK COUNTY HEALTH AND TECHNOLOGY TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $700,000 AS DESCRIBED IN AGENDA ITEM 7B. THIS MOTION WAS SECONDED BY DR, HAVINS. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

8. WORKFORCE INNOVATION FOR THE NEW NEVADA (WINN) FUND PROGRAM FOR DIRECTOR APPROVAL

A. RENO AREA LOGISTICS AND MANUFACTURING RE-ENTRY INITIATIVE- Request for Approval to enter into a WINN Grant agreement not to exceed $75,000

Ms. Stacy Wasrick introduced herself and gave a brief overview of their program. It will be done in two difference phases. This application comes from Truckee Meadows Community College, and they are requesting Director Approval not to exceed $75,000 for a wonderful partnership with several employers. Several are there: Quality Plastic Products, Sierra Meat, High Mountain Door and Trim, Reno Custom Creating, and Iron Skillet. It's also an e-partnership that includes the Reno Justice Court, Washington County Department of Alternative Sentencing, the State of Nevada Department of Corrections, and the Nevada Department of Public Safety Parole and Probation. They really designed a robust and comprehensive program that's looking to train a professional pool of 30 individuals to meet the growing needs of area manufacturing and logistics employers.

Ms. Camille Vega, Re-Entry Coordinator at Truckee Meadows Community College, introduced herself stated that current data shows that one in three Americans have some sort of a criminal record, whether that be a juvenile record, misdemeanor, or felony. These are also individuals that have the least support in getting out of incarceration and joining society, and the numbers are fairly grim. One-half of those that are released are incarcerated within their first year. Two-thirds are re-incarcerated within three years, and over five years, three-quarters of them are re-incarcerated.

One of the greatest factors in reducing recidivism is employment, and employment not at minimum wage, but at a higher wage, a supporting wage, sustaining wage. This program is focused on helping those that are leaving incarceration in northern Nevada to enter into an education program with a direct pathway into employment. There are employers that are willing to hire this type of population, but in discussing this program with each of them, they've expressed interest in not only giving them those technical skills, but also the soft skills in order for them to succeed in education and in employment. Ms. Vega was joined by Mr. Jonathan Wilson, facility manager at Northern Nevada Transitional Housing, and Billy Owensby with Quality Plastics, as well as, Janice Gonzalez with Sierra Meat and Seafood.

Mr. Wilson stated that he joined Northern Nevada Transitional Housing last August. He’s been with the Department of Corrections for almost 15 years now and has spent a lot of that time watching the system send guys out to the street with little more than 60 bucks and a bag of their clothes and a good luck. When he took over transitional housing he made sure everyone understood that they were there to transition back into society. You've got one foot in the public and one foot here. You're going to be a good neighbor.

AMERICAN OVERSIGHT

You're going to be a productive citizen, and you're going to go on about your life. You're not going to come back to me.

Mr. Wilson went on to say a large part of that is fostering positive relationships with employers in town. He said they've got 30 or 40 employers and have 112 beds. Right now, the problem is there are employers who are fighting over the opportunity to interview these men. One of the toughest things for this population is a lot of them have no job skills, no job record, not a resume. Some are illiterate. Some are missing the basics that most adults learn as they're going through life and getting their education.

Mr. Wilson then said he contacted Camille at TMCC. They talked about the potential for certificate programs and that kind of thing. Camille brought on some of the judges from the specialty courts. They got together with Washoe Alternative Sentence, Parole, and Probation, and we were able to arrange some classroom space, and now they need the Board's support to make some classes happen.

I have reached out to a number of our employers that I know are reliable and interested and have taken the opportunity to hire my residents and appreciate the attitude that they bring, and every one of them has been supportive and interested in getting some training, some specific training that will help their businesses. According to employers, the most important skills are for manufacturing, logistics, some food prep, and food safety. The first part of this program will be getting some soft skills, some re-entry skills, financial literacy, financial planning, some basic academic skills so they're able to succeed when they start classes, and get them back on their feet.

Mr. Billy Owensby introduced himself and provided his experience dealing with ex-felons in his plastics manufacturing business. His company advocates for inmate reentry, and 40% of their staff is made up of ex-felons. For the last ten years or so, they've hired directly from a restitution center, or the Northern Nevada Transitional Housing. The typical new hire from one of these re-entry programs like this is reliable and consistant and the company works to keep these employees upon separation from incarceration. They are advocates of training and soft skills in other areas that would benefit an individual when looking for work in manufacturing. The confidence boost alone and elevated self-worth that results, helps to lower the risk of reoffending.

Mr. Owensby went on to say he is "uniquely positioned" to endorse this belief, as he is an ex-felon. He was hired out of the restitution center two years ago at Quality Plastics, and is now the IT Director of Quality Plastics. Quality Plastics conducts a psychological profile for everybody that comes into Quality Plastics, and some of the testing is on light industrial math and safety, reliability, and spatial reasoning. And consistently across the board, these are low scores. They're great people, but low scores. When the company brings them on, it takes about 90 days to get somebody up to speed in working in that environment, and when it comes time to separate from incarceration, they've even put together an inmate-run group at work to try and teach people how to write a check and all these other things necessary to succeed outside of prison.

AMERICAN OVERSIGHT

Governor Sandoval reiterated that he serves as Chairman of the Board of Prison Commissioners, and that this exact discussion took place this week. There are several inmates that are parole eligible that don't parole because they don't have a place to go or they don't have a job. This is critically important. The recidivism associated with those that have been released is high in this job, is having a good paying job isn't just about the money. It's about learning to be at work and be prepared and getting those job skills, programs, and life skills as well. This is an outgrowth of a bill that Senator Ford had sponsored. Governor Sandoval thanked the employers involved and noted that there has been a lot of effort and investment going on at the Department of Corrections associated with this. The purpose is to provide that second chance and to give a new lease on life and allow individuals that perhaps had had problems in the past to have a second chance at a productive life.

Mr. Klaich stated if there ever was an example of doing well by doing good, he didn't know how it could be anything more than this program. The WINN program highlights a couple of things. The dignity of a job and the self-respect that that gives to folks is a reason for this program if nothing else. The wisdom that came out of the economic development program in establishing WINN and these three applications that we're seeing today are really exciting, because they're just the exact kind of partnership between our community colleges, businesses, and helping Nevadans get good jobs.

Mr. Don Soderberg stated the Board was excited about all three of these WINN applications, because they hit areas that are very important, but the last application is one that the Board was especially excited about. Mr. Soderberg said, "You charged our agency to make re-entry a point of emphasis three years ago, and as you said, sometimes it's a hard sell. When I hear the gentleman from Quality Plastics and see some of these other companies that are not only willing to take a look at someone who's got a criminal record, but actually are enthusiastic about it. I really wish we could bang the drum louder. We're looking at an empty room here today, and my only regret is that this application should have been first so the 14 companies that we gave abatements to would have heard what we heard today. As I said, this is a hard sell, including companies that come to us for abatements are often not open-minded to when we attempt to assist them in recruiting to taking an open-minded look at individuals who may have a record."

Mr. Soderberg continued, "With what has been said here today I think is very important and needs to be said loudly to other employees. There are very, very good employees out there that have something on their record. They may be currently living at Warden Wilson's facility or the Casa Grande facility here in Las Vegas, but the feedback we get continually when we do convince an employer to take this step is they're astonished about how dependable and how enthusiastic they are. And I can say at DETR, we have done that, and I can tell you some of our best employees are people that we outreached to some of the re-entry programs and wound up with some who are just phenomenal. And I'd charge anybody to walk through our offices and tell me who they are, because you never would notice."

AMERICAN OVERSIGHT

Governor Sandoval asked Mr. Wilson if the program is available to women as well. Mr. Wilson stated that it's currently only open to men in northern Nevada. That was somewhat shelved because, A, of the space, and B, the staffing involved to bring in a female staff in to house 16 women. Currently, women are only housed in the north. Casa Grande transitional housing down south also houses women.

Ms. Vega stated that this first cohort will only include 30 individuals, and they will all be males. In meeting with the two judges and Parole/Probation, they decided that keeping women separate, at least for the first 16 weeks, would be ideal. There are hopes that in the future, they will be able to serve each of those populations separately. Judge Pearson, Judge Sullivan, and Ms. Vega thought that it would be best to have a cohort of those that have felonies, another cohort of misdemeanors, another cohort of women, and a fourth cohort of young adult offenders. She added that there are a lot of funding opportunities from the federal side.

Ms. Vega went on to say the Department of Justice has the Second Chance Act, but one of the hurdles that they have of writing for such a grant, and they're large dollar amount grants, is they don't have a program established. By providing the spending and perhaps the second group, it really would position the State of Nevada to perhaps look at those type of grants to further this type of program throughout our state. There are employers in this state that are willing to hire those that have criminal records, that they do need just a little bit more than the average employee that's going to go and apply for that job. Once employed, perhaps these employers and the judges, lieutenant, and other folks in the system will also support those in getting employment.

Governor Sandoval thanked Ms. Vega and encouraged the group to come back to participate in another round. Ms. Vega noted the goal is four months.

Director Anderson inquired whether from the southern Nevada program, have we learned anything that we're implementing here in the north from good, bad, indifferent, things that they have implemented down there? Ms. Vega responded she would love the opportunity to go down to southern Nevada and actually ask questions, tour, but she hasn’t yet had that opportunity. One of the big differences is the southern Nevada program starts the training while the folks are still incarcerated. The program up north will only deal with individuals that have been released, except for those that are with Northern Nevada Transitional Housing. Director Anderson said it would be ideal if they could get soft skills training while still incarcerated and maybe have an agreement with community colleges that upon successful completion and release, that they would be able to move into a certificate program. Some of the challenges they have of teaching logistics and manufacturing and food service is the equipment. It's very difficult to bring the tools. Like Ms. Walden had stated, over at the Edison campus, they have robotics and machinery, and that's quite difficult to bring into a prison. We're not looking at educating ex-felons in just any job. We're looking at educating them in manufacturing and logistics and food service. These are three of the most high-demand careers here in northern Nevada and some of the best paying ones. So, it's sometimes a little bit of a challenge to model it the way that southern Nevada has done it.

AMERICAN OVERSIGHT

Director Anderson asked Mr. Wilson, for the folks that are working currently, you said was, 112? Is that the number you have that were currently employed? Mr. Wilson replied he would have to double check, but believes there are 110.

Director Anderson asked when you compare what they may be making today in their current employment versus going through the certificate program, how much of a difference is there. Mr. Wilson responded that the employers would better be able to answer that, but other piece of this is, again, the alternative sentencing and parole and probation, who may not be employed or may be completely underemployed right now and maybe looking to step up from $8.50 an hour to $12.50 an hour based on getting that certificate.

Director Anderson inquired whether these skillsets have some value on a paycheck level, not just improved efficiency of the company. Mr. Wilson confirmed this is accurate and added those are the ones that they identified. Director Anderson thinks going forward they would look at opening that up to other skillsets depending on the success of this pilot.

Director Anderson thanked the companies that are willing to participate and stated having that opportunity to either excel or get a job at the end is going to be the core success of this program. At the last GOED Board Meeting, there was a WINN program that wrapped around SNAP and some other folks that needed upscaling and some other opportunities to earn a better living. He said, "It really goes right to the heart of Governor Sandoval's New Nevada, and that no one is left behind in the New Nevada. This is further evidence of a program that came out of a special session that has been expanded and continues to see a lot of success and opens doors for everyone that participates, and so very excited to be a part of it. Kudos to the whole group and Stacy as well for bringing this to us in such a short timeframe. I know we've still got some fine-tuning to do after the fact, but I'm very happy to approve this WINN program on behalf of Truckee Meadows for the amount of -- not to exceed $75,000. Thank you for bringing it forward."

DIRECTOR ANDERSON APPROVED THE REQUST FOR RENO AREA LOGISTICS AND MANUFACTURING RE-ENTRY INITIATIVE TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $75,000.

9. DIRECTOR'S REPORT - REVIEW AND DISCUSSION

Director Anderson provided the Director's Report and stated, "I probably want to point out that after Secretary Cegavske called out Mr. Scott Anderson for being a Kings fan, she promptly left the building there. I've just got a couple things that I want to point out on the Director's Report. There is a lot of activity in our office going on. There's several pages of a report of each of our areas, but our international team just wrapped up an

AMERICAN OVERSIGHT

advanced planning mission for the trade mission to Ghana and South Africa. We've got some exciting partners there both from the research institutions, UNLV, UNR, and DRI, as well as quite a few business partners that will accompany that mission, the Urban Chamber along with other metro chamber members that will participate there. I see a lot of neat opportunities. Ghana in particular is a partner that's strong in Nevada already. Mining is actually Ghana's largest taxpayer. Very exciting to see partnerships that come from Nevada all the way to Africa in general.

Governor Sandoval, you signed an MOU with Alberta, Canada, just recently. That is developing out even further as we participate in drone technology and partnering with both testing and the technology shifts across international borders. It's very exciting to see that develop out. In fact, we have a contingency from Poland here now. We have started kind of a business recruiting platform that came out of the Poland trade mission, and that group is here now going through kind of a boot camp of how to set up in Nevada and in an intention to expand out into the US market, so using Nevada as their platform to gain access to that US market.

Some of it is as basic as how to start a business in Nevada, how to get access to capital, and how to approach potential clients for their technology or products. Very exciting to see that expand out, and we have many more companies I think that are being bedded now and matching funds both from the European union as well as some state funds as well that are matching that program.

Randy Walden, his last day is tomorrow, is leaving GOED, but one of the key things I think was a very exciting announcement is that we had over 600 apprenticeship openings announced at the Panasonic factory, and over 425 employees have Panasonic, are now participating in that. It's a paid apprenticeship program, which is very exciting to see that continue to ramp up and develop those skillsets to get those workers the skillsets they need to continue to move up the ladder there. That continues to be certainly a wonderful partnership we have with Tesla and Panasonic across the board.

We have nominated the opportunity zones, which they're sitting at the Department of Treasury waiting for certification. We've had a lot of input from folks that are anticipating a positive outcome there, and it's been exciting to hear about some of the projects that are going on there. Really, across the state, there's billions of dollars in pent up capital gains that are ready to be deployed, and we're excited to see that get deployed. A lot of folks have been through our office, and with the help of Corey Hunt and Derek Armstrong in our office that sat down and discussed what those opportunities are and how they might be able to deploy that capital, I think it's going to really accelerate even more so what we're already seeing in the market.

The Nevada Film Office is working through a program directory. Each year, they put together, essentially, a vendor directory of, you know, where do I go to find somebody that can put up lighting, stage hands, grips, camera operators, et cetera. That has been a great success. They've digitized that and made that a web-based directory as well as a print directory. They're also doing it for folks that may have sites that would be good for

AMERICAN OVERSIGHT

films or for people that want to come and film on those sites. Whether that's your backyard or a studio lot or whatever, they've got a database that turns into a print product right now and often becomes outdated by the time they get to print. Then the process of digitizing that and making that a database so that the consumers at those locations can actually keep up to date.

We've got kind of a fun program going on with Truro University. It is developing a series of certificates and technology for emergency preparedness and disaster response. There's a lot of turmoil in the world today, and some of these certificate programs of how to respond and what technology gets integrated to those responses and are current level of education, this would work as either students are going through the program or continuing education programs for folks that are already deployed out into the field. Very exciting that GOED gets to be a part of that, and then of course, Stacy, who presented several of our WINN projects, today, she is the newest member of the GOED team, has hit the ground running, really a great opportunity to work with her.

I think that's evident in, one, how quickly these three applications came to us, but as well as how thorough they were. And while everything needs a little bit of fine-tuning after we go through this process, she is on it, and it's been really a pleasure to have her in the office. And with that, Governor, that concludes my Director's Report."

10. **STATE OF NEVADA UNEMPLOYMENT RATE UPDATE** - as established by the Research and Analysis Division of the Nevada Department of Employment, Training and Rehabilitation.

Governor Sandoval asked if there were any questions from Board Members in regard to the State of Nevada Unemployment Rate Update. There were no questions.

11. **PUBLIC COMMENTS**

Governor Sandoval asked if there was any public comment.

Mr. Cory Hunt stated the following public comment, "Governor, Lieutenant Governor, Members of the Board, some of you may know tomorrow is actually my last day with GOED. It's a bittersweet, actually, for me to say that. Going back to the private sector for an incredible opportunity for me and my family. We've got another baby on the way, which is great, but has accelerated my timeline quite a bit. Governor, I can't say enough. Thanks to you, seven years, four years in your office, and another three here at GOED. It's been incredible since our faithful flight on Southwest Airlines when I was in management consulting, and it's just been the greatest honor of my professional life to work for you and to serve this great state. I can't thank you enough for the opportunity. And to the folks at GOED, Steve Hill, Paul, all of our incredible staff here in Carson City, the staff who do all the work that no one ever sees, the folks in our admin division, our receptionists and assistants, Bob Potts, all of the fantastic folks in the office. It's an incredible privilege to work with them, and then also can't thank enough the Members of

AMERICAN OVERSIGHT

the Board for your support, the work that we've been able to do over the years. The WINN Fund, it's a cherry on top just to see these great applications coming together. To think that we got to establish that during the special session and the work we've done on autonomous vehicles, seeing that finishing up, and just all of that. I can't thank you enough. It's been truly the honor of a lifetime and something that I'll certainly miss. I'm excited for this new opportunity and think it'll allow me to help see some more projects through and help our region grow and help our state continue to grow well, but again, thank you so much for the opportunity. It's been a privilege."

Governor Sandoval thanked Cory his dedication on the multiple projects that he has been involved in over the years. Governor Sandoval congratulated Cory and his family and wished him the best on his future endeavors.

Ms. Irene Bustamante-Adams thanked the Board for supporting the Clark County Health and Technology WINN Fund application.

12. ADJOURNMENT

Governor Sandoval adjourned the meeting.

Lyft and Aptiv launch autonomous ride share in Las Vegas

This May, a global technology leader in mobility, incentivized by GOED, launched a fleet of 30 autonomous vehicles in Las Vegas on the Lyft network. Aptiv PLC operates the vehicles on its fully-integrated autonomous driving platform, which are made available to the public in partnership with Lyft. On an opt-in basis, passengers have the ability to hail self-driving vehicles equipped with Aptiv technology to and from high-demand locations.

> *"With Aptiv's autonomous driving technology deployed throughout Las Vegas and broadly accessible through the Lyft app, a wide range of consumers will be able to share the experience of autonomous vehicles in a complex urban environment," said Kevin Clark, Aptiv president and chief executive officer. "More importantly, the resulting knowledge and data will allow us to* **further refine our autonomous driving capabilities and strengthen our portfolio of industry-leading active safety solutions.**"

AMERICAN OVERSIGHT

Story continued on next page »

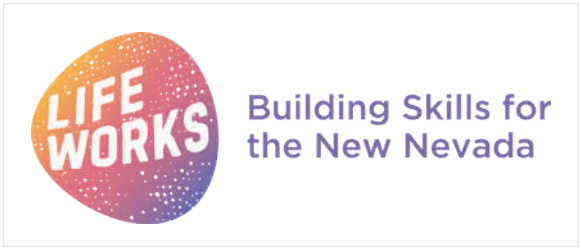
NV-DA-20-0615-A-005362

The combination of Aptiv's autonomous driving technology and Lyft's ride-hailing app is the expansion of a successful partnership that launched in Las Vegas during CES 2018. That initial pilot provided more than 400 self-driving rides to the public and earned an average customer rating of 4.99 out of five stars. Like the CES program, vehicles will be operated by highly-trained safety drivers.

In March, the GOED board voted to approve Aptiv's application for tax abatements and two months later the company has already surpassed its projected number of jobs created and currently lists openings in Las Vegas for IT, engineering, and office administration positions.

GOED Executive Director Paul Anderson said Aptiv is exactly the sort of operation Nevada hoped to attract when the state legislature passed and Governor Brian Sandoval signed into law some of the most forward-looking autonomous vehicle regulations in the country.

"The holy grail for economic development is research and development," said Anderson. "And because of what it does — **attract some of the smartest people in the world and bring in talent** *— it becomes a catalyst to entrepreneurial economic development."*



LifeWorks initiative aims to prepare Nevada students for in-demand jobs

Taking an innovative approach to workforce development, state agencies from across Nevada, private industries, and higher education are gathering together to strengthen career pathways for in-demand jobs in the New Nevada.

The Nevada Department of Education received the New Skills for Youth Grant funded by JP Morgan Chase in fall of 2017 and since then has aligned workforce development with economic diversification efforts, developed the public-facing brand LifeWorks, created legislative change in the state to support workforce development, and established ongoing systems for communication.

LifeWorks' six key objectives:

- **Employer engagement**
- **Quality and rigor in career pathways**
- **Career-focused accountability systems**
- **Scaled pathways that culminate in credentials of value**
- **Integrated funding streams/joint resource planning**
- **Ensuring cross-institutional alignment.**

To achieve this, partners of LifeWorks, including GOED, Nevada Department of Education, the Governor's Office of Workforce Innovation (OWINN), and others will focus on expanding pathways to lucrative long-term careers for graduating high school students by empowering them with the skills, education and meaningful connections to local business necessary to thrive in Nevada's growing economy.

Specific programs include the expansion of Career & Technical Education programs, offering a new Career & College Ready Diploma, adopting the ACT National Career Readiness Certificate, expanding dual credit opportunities with institutions of higher education, strengthening and expanding apprenticeship and pre-apprenticeship programs, developing new work-based learning programs, and establishing the Learn & Earn Advanced-career Pathways (LEAP) framework.

AMERICAN OVERSIGHT

GOED listening tour covers 1,000 miles

In April, GOED's Executive Director Paul Anderson, Director of Rural Economic and Community Development Matthew Moore, and Communications Director Brian Baluta undertook a three-day, 1,000-mile listening tour to connect with the Regional Development Authority partners and stakeholders across the vast Silver State.

All told, the trip featured stops in Pahrump, Fallon, Carson City, Eureka, Ely, Panaca and Caliente, for sessions with Nye County Regional Economic Development Authority (NCREDA), HWY 95 Rural Development Authority (HWY95), Northern Nevada Development Authority (NNDA), Northeastern Nevada Regional Development Authority (NNRDA), and Lincoln County Regional Development Authority (LCRDA).

The tour underscored:

1. **Nevada's rural communities share many assets and challenges, including issues with federal land management, affordable housing, workforce development, and infrastructure.**
2. **There are many engaged and motivated individuals on the ground working diligently to face these challenges and build on opportunities.**
3. **GOED and the rural RDAs will continue to work closely to help ensure all of Nevada shares in growth and prosperity.**

NV-DA-20-0615-A-005365

Governor Sandoval nominates 61 Opportunity Zones

In April, Governor Brian Sandoval nominated 61 opportunity zones, pursuant to the Tax Cuts and Jobs Act of 2017, which established an Opportunity Zone tax incentive, designed to encourage long-term private investment in low-income communities.

> *"During my time as Governor, we have invested significant resources in Nevada," Governor Sandoval said. "While we have seen substantial returns, there are still parts of our state that need additional assistance.* **It is my hope that by nominating these 61 low-income opportunity zones, private investors will choose to fund projects in these areas that benefit the Nevadans who need it most.** *What's more, we believe that communities surrounding the 61 opportunity zones will also benefit from investment in the zones."*

PolicyMap's Jeremy Nowak praised Nevada's approach to the nominations.

> *"The Governor's office did a great job of taking a data driven approach...***Hats off to Nevada.***"*

61 opportunity zone nominations directly impact more than **230,000** Nevadans in some of Nevada's most disadvantaged communities.

Average family income is approximately **$37,000** — just **60%** of median statewide family income of approximately **$62,500**.

Average unemployment rate from **2011-2015** was **16%** — nearly **2x** greater than the national unemployment rate.

Nevada is number one again!

For the first quarter of 2018, State Policy Reports' Index of State Economic Momentum – which ranks states based on personal income growth, employment growth, and population growth – **ranked Nevada No. 1** .

Between the fourth quarter of 2016 and the same period in 2017, Nevada had the **strongest year-over-year growth in personal income**, and held the distinction of being the only state to record growth greater than 6%.

Federal data released in May showed Nevada's **gross domestic product (GDP) grew 3.5% in 2017** after increasing 2.1% in 2016, **good for No. 3 in the nation.**

The Bureau of Economic Analysis data depict expansion across the state's economy, with real GDP increasing for nearly every major industry. Real estate served as the largest contributor to overall GDP, followed by durable goods manufacturing.

Nevada's GDP numbers also reflect steady in-migration to the state. According to Census estimates, its **population climbed 2 percent last year**, the largest national increase behind only Idaho.

According to the Nevada Department of Employment, Training & Rehabilitation (DETR) March 2018 economic report, Nevada added 3,500 jobs bringing employment in the state of Nevada to a **record high of 1,373,700 jobs**. Unemployment in March remained constant at 4.9%.

DETR's report also notes that in the fourth quarter of 2017, **personal income in Nevada reached $136 billion**, up 6.4% from a year ago. This increase has been ongoing in 30 of the past 31 quarters.

Additionally, Nevada's average personal income growth has exceeded that of the U.S. 14 of the past 16 quarters, with income gains in the state averaging 5.1%, compared to 3.5% in the U.S.

NV-DA-20-0615-A-005367

"Although we are seeing some slight changes in employment and unemployment measures in March, state employment remains strong," said David Schmidt, Chief Economist for DETR. "Estimates show Nevada's labor force has averaged 1.49 million in the first quarter of 2018, up from 1.45 million during the same period in 2017. **This translates into an increase of 40,160 more Nevadans in the labor force, either working or actively seeking employment."**

No. 1	**in economic momentum, Q1 2018.**
No. 1	**in personal income growth, 2017.**
No. 3	**in GDP growth, 2017.**
No. 2	**in population growth, 2017.**

Record high 1,373,700 Nevadans employed, March 2018.

Subject: NGA Thank You's FOR APPROVAL

CD,

Attached are draft thank you letters for the Governor's approval. The list (included below) includes all presenters and foreign dignitaries who participated in the NGA Summer Meeting.

As you can see, these letters are to be signed by both Governor Sandoval and Bullock. Once the Governor approves, NGA will print them out here and mail to you with pre-metered postage. Are you ok with then sending the entire package on to Montana once he signs?

Also, there are three chair's initiative draft thank yous included. These will ONLY be signed by Governor Sandoval and I will send in a separate package to keep everything clear.

Here are the following thank you notes as requested:

- Liz Schrayer, USGLC
- Mr. Kentaro Sonoura
- Gov. Hirai
- John Krafcik, CEO Waymo (Sandoval only)
- Matt Delaney, CEO Marble (Sandoval only)
- Colin Tooze, Director Uber (Sandoval only)
- Graeme Conway, Macquarie
- Josphat Nanok, Head of Kenyan Governors Association
- Annagret Kramp-Karrenbauer, General Secretary of the CDU

AMERICAN OVERSIGHT

Pam and Andrew,

A rep from HUD called and let us know that Secretary Carson will be in Nevada tomorrow and that they are looking for some information on our designated opportunity zones. Specifically, they are trying to find any crossover between the designations and state housing needs.

I reached out to Cory to get a better understanding of the lay of the land and he mentioned that HUD is exploring ways to replace CDBG funds with new OZ designations. I think it's best we figure out how to decline to share as to not give away any talking points.

Subject: Re: Opportunity Zone - Moulin Rouge Site

Derek:

Now that you have nominated the sites, is there another comment period?

The state appears to have purposely left off one of the most important tracts for the historic African-American community, the Moulin Rouge site. The short but vibrant life of the Moulin Rouge helped the Civil Rights Movement in Las Vegas. The hotel was also the spark needed to bring an end to segregation on the Strip.

In all my discussions, the Moulin Rouge site was a high priority for inclusion by the City of Las Vegas. They are even surprised by the selection.

Why would the governor not include this site which is historic and in much need of redevelopment?

The property just fell out of escrow again on April 1. This is the most recent of many failed redevelopment tries on this property. That would be a disaster. This current owner of the property have been trying to sell it for ten years. They have had many deposits returned and or lost in that time period. Seems to me that site is a perfect candidate for redevelopment and inclusion in an opportunity zone to finally make something happen.

Consider that Bonanza Village was included and there is no need for that, it is all single family housing on large lots. Bonanza Village is the most expensive/valuable single family housing in the West-Las Vegas area. That would be very difficult for redevelopment.

Or why is the NLV Airport included? The airport is owned by the County so why give the airport this tax benefit, which pays no taxes.

It doesn't make sense. I think some folks may soon raise a stink if this isn't corrected soon.

I believe the Governor would like to include this site if he knew more of the historic background and its meaning to the African-American community. Hopefully you and he agree.

Best regards,

Mike

Attachments: City of Las Vegas.pdf

Mike,

I do believe there is a strong case to make for designating the Moulin Rouge census tract as an Opportunity Zone. However, Nevada was only able to nominate 61 of over 240 low-income census tracts across the state.

I've attached what the City of Las Vegas sent to us as their priority list. The Bonanza Corridor/ Moulin Rouge was their #10th priority area. We used a combination of local priorities, known investment, and national social need and investment indexes to formulate a model for choosing 61 tracts. Unfortunately, using that model that census tract did not make the top 61. There was absolutely no intention to purposefully leave the census tract from our list.

If there is a chance to re-examine the Opportunity Zone designations in the future I will make sure to incorporate your input.

Respectfully,

Derek Armstrong

I've attached what the City of Las Vegas sent to us as their priority list. The Bonanza Corridor/ Moulin Rouge was their #10th priority area. We used a combination of local priorities, known investment, and national social need and investment indexes to formulate a model for choosing 61 tracts. Unfortunately, using that model that census tract did not make the top 61. There was absolutely no intention to purposefully leave the census tract from our list.

If there is a chance to re-examine the Opportunity Zone designations in the future I will make sure to incorporate your input.

Subject: Re: Opportunity Zone - Moulin Rouge Site

Derek:

Now that you have nominated the sites, is there another comment period?

The state appears to have purposely left off one of the most important tracts for the historic African-American community, the Moulin Rouge site. The short but vibrant life of the Moulin Rouge helped the Civil Rights Movement in Las Vegas. The hotel was also the spark needed to bring an end to segregation on the Strip.

In all my discussions, the Moulin Rouge site was a high priority for inclusion by the City of Las Vegas. They are even surprised by the selection.

Why would the governor not include this site which is historic and in much need of redevelopment?

The property just fell out of escrow again on April 1. This is the most recent of many failed redevelopment tries on this property. That would be a disaster. This current owner of the property have been trying to sell it for ten years. They have had many deposits returned and or lost in that time period. Seems to me that site is a perfect candidate for redevelopment and inclusion in an opportunity zone to finally make something happen.

Consider that Bonanza Village was included and there is no need for that, it is all single family housing on large lots. Bonanza Village is the most expensive/valuable single family housing in the West-Las Vegas area. That would be very difficult for redevelopment.

Or why is the NLV Airport included? The airport is owned by the County so why give the airport this tax benefit, which pays no taxes.

It doesn't make sense. I think some folks may soon raise a stink if this isn't corrected soon.

I believe the Governor would like to include this site if he knew more of the historic background and its meaning to the African-American community. Hopefully you and he agree.

Best regards,

Mike

Mike Ballard, *Managing Director, Sixty West Funds*

Mike Ballard has been involved in the construction and real estate industries for more than three decades, as a developer, financial consultant, or an advisor. He is known for his excellent contacts with business, government, and real estate executives throughout the West. Mike has served or advised many major real estate companies including CBRE, Forest City Development, Lennar, Sundance Bay, MJW Investments, Greenspun Corporation, Thomas & Mack Company, the Molasky Group of Companies, RISE Residential, Union Pacific Realty, Realty Management, Inc. (RMI), Carefree Senior Living, and several municipalities.

Mike started his career working for two international CPA firms, Laventhol & Horwath, CPAs, and McGladrey & Pullen, serving primarily construction and real estate firms. Most recently, he has been involved in finance and development of apartment communities or state-of-the-art data centers. Mike is also a partner in the firm of Ascent Multifamily, which provides outsourced accounting services to multifamily firms representing more than 24,000 units throughout the U.S. Mike oversees the Tax Credit, Consulting, and Business Development segments of the firm. Prior to Ascent, Mike was a consultant to Enhanced Capital and Stonehenge Capital related to their New Markets Tax Credit and/or SBIC funds.

Mike was a founding member of the board of the Lied Institute for Real Estate Studies at UNLV and also helped with the formation of the local NAIOP and Construction Financial Management Association chapters. In 2010, Mike was named one of the “Top 20 Visionaries” in Nevada by Nevada Business magazine. He has served on the boards of many for-profit companies and a bank.

Mike is the founder and has served twice as chairman of a Shark-Tank like group called the Vegas Valley Angels. He is also a former board member of the Marriott School of Management at Brigham Young University and the Tony Award-winning Utah Shakespearean Festival.

Mike is a graduate of Brigham Young University with a B.S. in Business Administration. Mike is married and the father of four adult children. His interests include sports, travel, genealogy and family history, movies, and reading biographies.

Karen:

A few weeks ago right after Derek sent this information, we completed all the forms. I have attached it for your reference. We are excited to participate.

We have a pretty good list for Nevada and are comfortable we could draw numerous attendees to the event. However, we are reluctant to do an emailing until you can get our name on the site. We noticed that we aren't on the agenda yet. How long until you have that updated?

Best Regards,

Mike

AMERICAN OVERSIGHT

SPONSORHIP COMMITTEMNT for the
State of Nevada Opportunity Zone Conference
Understanding Opportunity Zones in Nevada
November 27th, 2018, *8:00 AM – 4:00 PM*
City of Las Vegas Council Chambers
495 S. Main Street, Las Vegas, Nevada

We invite you to join in sponsoring the Nevada Opportunity Zone Conference hosted by the Federal Reserve Bank of San Francisco, The Nevada Governor's Office of Economic Development and the State of Nevada Department of Business & Industry. For this non-profit event we are asking sponsors to commit an "up to" amount (please complete commitment form below). The Federal Reserve Bank of San Francisco is serving as the fiscal agent and will invoice sponsors immediately following the event to defray the direct costs. There are no specified sponsor levels and all sponsors will be recognized equally during the program. Suggested sponsorship starts at $1,000. Event speakers and panelists will be selected based on area of expertise, topics to be covered, and as the event schedule allows.

Sponsorship Benefits:

- Recognition in the event program with logo and contact information
- Recognition during the event
- Opportunity Funds and organizations offering professional support for Opportunity Zone development will be asked to briefly introduce themselves during the event & participate during networking lunch and reception.

We welcome your participation and support of the conference. If you would like to sponsor the event please complete the following form and return to the contact provided below.

Nevada Opportunity Zone Conference Sponsorship Commitment

Organization Name: Sixty West Funds

Organization's area of expertise: Opportunity Zones, New Markets Tax Credits, etc.

Agrees to sponsor the Nevada Opportunity Zone Conference for the amount not to exceed $1,000, to be invoiced by the Federal Reserve Bank of San Francisco after the event at the following:

Subject: RE: Opportunity Zone Conference

Derek,
Absolutely if he has a fund established. A couple questions:

1. Do you think there should be a specific limit on the number of funds we have up front on the panel (8 to 10)? (this is for the "Tank" part of the program where panels introduce themselves for a few min and then some screened projects present their ideas and get feedback from funds).
2. If so do you have a thoughts on how to choose these funds if we have more than 10 who want to participate? For example:
    a. Some measure of their equitable development and socially conscious development (at least for some of the funds represented)
    b. What type of projects they fund (housing, retail, operating businesses, …)
    c. Size of funds
    d. Location of fund or investment focus (regional, local, national – do we want to get some national here)?
    e. Should they have to have a minimum sponsorship amount? To participate? (I was originally saying no on this but want to get feedback because were talking $500 to $1000).

Let me know your thoughts or we can have a quick phone conversation.

I do believe there is a strong case to make for designating the Moulin Rouge census tract as an Opportunity Zone. However, Nevada was only able to nominate 61 of over 240 low-income census tracts across the state.

I've attached what the City of Las Vegas sent to us as their priority list. The Bonanza Corridor/ Moulin Rouge was their #10th priority area. We used a combination of local priorities, known investment, and national social need and investment indexes to formulate a model for choosing 61 tracts. Unfortunately, using that model that census tract did not make the top 61. There was absolutely no intention to purposefully leave the census tract from our list.

If there is a chance to re-examine the Opportunity Zone designations in the future I will make sure to incorporate your input.

Respectfully,

Derek Armstrong

Subject: Re: Opportunity Zone - Moulin Rouge Site

AMERICAN OVERSIGHT

Derek:

Now that you have nominated the sites, is there another comment period?

The state appears to have purposely left off one of the most important tracts for the historic African-American community, the Moulin Rouge site. The short but vibrant life of the Moulin Rouge helped the Civil Rights Movement in Las Vegas. The hotel was also the spark needed to bring an end to segregation on the Strip.

In all my discussions, the Moulin Rouge site was a high priority for inclusion by the City of Las Vegas. They are even surprised by the selection.

Why would the governor not include this site which is historic and in much need of redevelopment?

The property just fell out of escrow again on April 1. This is the most recent of many failed redevelopment tries on this property. That would be a disaster. This current owner of the property have been trying to sell it for ten years. They have had many deposits returned and or lost in that time period. Seems to me that site is a perfect candidate for redevelopment and inclusion in an opportunity zone to finally make something happen.

Consider that Bonanza Village was included and there is no need for that, it is all single family housing on large lots. Bonanza Village is the most expensive/valuable single family housing in the West-Las Vegas area. That would be very difficult for redevelopment.

Or why is the NLV Airport included? The airport is owned by the County so why give the airport this tax benefit, which pays no taxes.

It doesn't make sense. I think some folks may soon raise a stink if this isn't corrected soon.

I believe the Governor would like to include this site if he knew more of the historic background and its meaning to the African-American community. Hopefully you and he agree.

Best regards,

Mike

We will have a panel in which projects can pitch funds. We're working on a screening mechanism now to make sure the pitches will be legitimate.

Additionally, they'll be a session for each of the local jurisdictions to discuss projects in their areas.

Hi Mike,

I am happy to answer any questions you have about the NV OZ Conference, and would welcome your sponsorship and participation.

As Derek mentioned, we will have a specific session for O-Funds to briefly present their investment philosophy and then vetted projects will also be part of this session called "The Tank".

We are actively seeking sponsors which will include recognition at the conference and logo in the program. To sponsor please complete the attached form (it is a bit unusual given our non-profit format).

If you have further questions feel free to contact me at the number below.

Best,

Karen Schnog, Management Analyst

AMERICAN OVERSIGHT

SPONSORHIP COMMITTEMNT for the
State of Nevada Opportunity Zone Conference
Understanding Opportunity Zones in Nevada

November 27th, 2018, *8:00 AM – 4:00 PM*

City of Las Vegas Council Chambers
495 S. Main Street, Las Vegas, Nevada

We invite you to join in sponsoring the Nevada Opportunity Zone Conference hosted by the Federal Reserve Bank of San Francisco, The Nevada Governor's Office of Economic Development and the State of Nevada Department of Business & Industry. For this non-profit event we are asking sponsors to commit an "up to" amount (please complete commitment form below). The Federal Reserve Bank of San Francisco is serving as the fiscal agent and will invoice sponsors immediately following the event to defray the direct costs. There are no specified sponsor levels and all sponsors will be recognized equally during the program. Suggested sponsorship starts at $1,000. Event speakers and panelists will be selected based on area of expertise, topics to be covered, and as the event schedule allows.

Sponsorship Benefits:

- Recognition in the event program with logo and contact information
- Recognition during the event
- Opportunity Funds and organizations offering professional support for Opportunity Zone development will be asked to briefly introduce themselves during the event and participate during networking lunch and reception.

We welcome your participation and support of the conference. If you would like to sponsor the event please complete the following form and return to the contact provided below.

Nevada Opportunity Zone Conference Sponsorship Commitment

Organization Name: _____

Organization's area of expertise: _____

Agrees to sponsor the Nevada Opportunity Zone Conference for the amount not to exceed $_____, to be invoiced by the Federal Reserve Bank of San Francisco after the event at the following:

Contact Name: _____ Contact Phone: _____

Contact email: _____

Address: _____

_____

Signature: _____ Title: _____

Please send completed forms to Karen Schnog at Kschnog@business.nv.gov Inquires: (702) 486-3755

Hello Mike,

Great to hear from you! We are happy to include you and Sixty-West Funds in the program! Will you be the presenter we should put on the agenda? I will email our team member who is coordinating the agenda right away to add your fund and name. This may take a day or two. I do appologize for the delay, I don't recall receiving your confirmation regarding your participation in the program as an O-fund before today, but I may have missed it.

We are also thankful for your sponsorship of the program! Please send your logo so we can include it in the event program.

Please let me know if you have additional questions. I am in Dallas this week for an O-Zone and community development conference, so if you would like to talk further please call me on my cell at (702) 327-0610 (and forgive my limited email access and typos).

We also would greately appreciate your sharing the event invite with anyone you think would be interested in attending the conference.

Finally, when you get a chance please forward your bio and photo that we should include in the program.

Thank you again Mike for participating in and sponsoring the conference!

Sincerely,

Karen Schnog

We will have a panel in which projects can pitch funds. We're working on a screening mechanism now to make sure the pitches will be legitimate.

Additionally, they'll be a session for each of the local jurisdictions to discuss projects in their areas.

I just heard you are hosting an Opportunity Zone Conference in November. I have put together a $200 million fund and think that a Vegas based Opportunity Zone fund should be involved.

How do I get involved or get on the program? Could you send me more info?

<darmstrong@diversifynevada.com<mailto:darmstrong@diversifynevada.com>> wrote:

Mike,

I do believe there is a strong case to make for designating the Moulin Rouge census tract as an Opportunity Zone. However, Nevada was only able to nominate 61 of over 240 low-income census tracts across the state.

I've attached what the City of Las Vegas sent to us as their priority list. The Bonanza Corridor/ Moulin Rouge was their #10th priority area. We used a combination of local priorities, known investment, and national social need and investment indexes to formulate a model for choosing 61 tracts. Unfortunately, using that model that census tract did not make the top 61. There was absolutely no intention to purposefully leave the census tract from our list.

AMERICAN OVERSIGHT

If there is a chance to re-examine the Opportunity Zone designations in the future I will make sure to incorporate your input.

Subject: Re: Opportunity Zone - Moulin Rouge Site

Derek:

Now that you have nominated the sites, is there another comment period?

The state appears to have purposely left off one of the most important tracts for the historic African-American community, the Moulin Rouge site. The short but vibrant life of the Moulin Rouge helped the Civil Rights Movement in Las Vegas. The hotel was also the spark needed to bring an end to segregation on the Strip.

In all my discussions, the Moulin Rouge site was a high priority for inclusion by the City of Las Vegas. They are even surprised by the selection.

Why would the governor not include this site which is historic and in much need of redevelopment?

The property just fell out of escrow again on April 1. This is the most recent of many failed redevelopment tries on this property. That would be a disaster. This current owner of the property have been trying to sell it for ten years. They have had many deposits returned and or lost in that time period. Seems to me that site is a perfect candidate for redevelopment and inclusion in an opportunity zone to finally make something happen.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-005422

Consider that Bonanza Village was included and there is no need for that, it is all single family housing on large lots. Bonanza Village is the most expensive/valuable single family housing in the West-Las Vegas area. That would be very difficult for redevelopment.

Or why is the NLV Airport included? The airport is owned by the County so why give the airport this tax benefit, which pays no taxes.

It doesn't make sense. I think some folks may soon raise a stink if this isn't corrected soon.

I believe the Governor would like to include this site if he knew more of the historic background and its meaning to the African-American community. Hopefully you and he agree.

Best regards,

Mike

AMERICAN OVERSIGHT

Second, have attached a copy for Governor Sandoval a letter that has been sent to GOED concerning the process of selecting Opportunity Zone areas. West Wendover would like due consideration of that designation believing that it could definitely help us in attracting business and other investments.

I appreciate if you could pass the letter on to Governor Sandoval.

And yes... Amtrak is still on our dream board. With the loss of Greyhound service recently, we now have no public transportation access to the national transportation system. Solutions are never easy, especially in our case... :)

Hope all is well with you, please make sure to stop in and say hello if you are in the area, would be nice to see you again.

Chris

Carson City, NV 89701

Re: Opportunity Zone Program Application

Honorable Governor Sandoval,

On behalf of Storey County, Nevada, I write to you today to request that Census Tract 32029970200 be nominated by you as a non-LIC Opportunity Zone tract.

Census Tract 32029970200 meets the qualifications laid out in the IRS guidance on February 8th, 2018 to be a non-LIC tract by; 1) being contiguous with a LIC that is designated as a Qualified Opportunity Zone (tract 32019960201 is a QOZ), and 2) the median family income of tract 32029970200 not exceeding 125 percent of the median family income of tract 32019960201. Because the median family income information used for this criterion is based on the 2012-2016 American Community Survey, we have also included an attachment which shows this data. Additionally, Storey County commissioned an independent income survey conducted by the Nevada Rural Water Association in 2012 which reflects that CT 32029970200 fully qualified within the program guidelines. Copies of this survey have been provided to the Governor's Office of Economic Development.

If tract 32019970200 is designated as a non-LIC contiguous Opportunity Zone, we expect that a number of projects could be undertaken within a very reasonable amount of time, including:

- Construction of a High Tech/High Security Mega Campus housing Blockchains, Graphene Nano Tech, 3d Printing, AI and quantum computing with national and international tenants
- e-sport interactive Gaming Stadium targeting the millennial generation
- Smart Town providing housing for in excess of 10,000 residents, schools and retail
- Additional manufacturing, data and high tech related facilities

Estimated investment within this tract over the course of the next 10 years or less could exceed $15 billion and will provide somewhere between 8-10 thousand jobs. These estimates are very conservative and do not include many of the other major land owners who would undoubtedly accelerate and expand their plans exponentially should this program be available to them. Simply put, this designation could have a transformative effect on not only Storey County but the entire northwestern Nevada region.

Thank you for your consideration in this matter and we are happy to provide any additional information that you might need in order to nominate Census Tract 32029970200 to be a non-LIC contiguous Opportunity Zone.

AMERICAN OVERSIGHT

Sincerely,

Pat Whitten

MEDIAN FAMILY INCOME IN THE PAST 12 MONTHS (IN 2016 INFLATION-ADJUSTED DOLLARS)
Universe: Families
2012-2016 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

	Census Tract 9602.01, Lyon County, Nevada		Census Tract 9702, Storey County, Nevada	
	Estimate	Margin of Error	Estimate	Margin of Error
Median family income in the past 12 months (in 2016 inflation-adjusted dollars)	53,581	+/-9,376	66,738	+/-8,677

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2012-2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2012-2016 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Subject: Opportunity Zones - Churchill County

Hello Christina,

A few months ago I read an article about a provision tucked into the new Tax Bill to help communities struggling with economic development. The article said that Governors of each state were being asked to designate "Opportunity Zones" from a pool of low-income, high-poverty census tracts for nomination. One of our Commissioners inquired this morning and asked if I could reach out to the Governor's Office to see if Nevada is participating; if "Opportunity Zones" have already been designated, and who the appropriate contacts are. Any help you are able to provide to point me in the right direction would be much appreciated.

Thank you,

Subject: Re: Opportunity Zones

Here are some high-level stats.

By the Numbers

Opportunity Zone Nominations DIRECTLY impact more than 234,000 Nevadans in some of our most disadvantaged communities. Communities surrounding these tracts are also expected to benefit significantly from investment in designated opportunity zones.

In the 61 tracts:

- ~$37,000 - Average family income
    - (Just 60% of median statewide family income of ~$62,500)
- 16% - Average unemployment rate from 2011-2015
    - Nearly 2x greater than the national unemployment rate

> Mary-Sarah, As per the request, here is some verbiage on the methodology for nominating opportunity zones. We're also looking to DETR to run some numbers on the 61 tracts for the release. — BB

AMERICAN OVERSIGHT

To identify the state's 61 priority tracts for Opportunity Zone designations, the Nevada Governor's Office of Economic Development (GOED) and the Nevada Department of Business and Industry solicited input from local governments, regional development authorities, the general public and other interested parties. GOED then utilized indices to measure market traction, social need, and investment opportunity. The methodology incorporates information including:

- % population below poverty
- % households with rent or mortgages greater than 30% of income
- % population not in the labor force
- % of population with less than a high school degree
- Concentrated income (Gini Index)
- Commercial lending
- Multifamily lending
- Small business lending
- Socioeconomic change
- Concentration of jobs

Summary:

The Tax Cuts and Jobs Act of 2017 established an Opportunity Zone tax incentive, which allows taxpayers to defer paying federal tax on capital gains from the sale of property if those gains are invested in Qualified Opportunity Funds that invest 90% of their assets in businesses located or property used in a designated low-income community. Investors receive modest reductions in their eventual tax bill if they maintain their Opportunity Fund investments for at least five and then seven years. Investors that hold capital in those funds for a full ten years also do not have to pay capital gains tax on the appreciation of their Opportunity Zone investments.

Subject: Re: Opportunity Zones

Mike, I didn't get your email below. CJ, thanks for the forward. That said, a couple updates.

- The policy map with the overlays of all the qualifying tracks along with which tracks have been submitted for potential designation by the municipalities and other interested parties should be up by Monday/Tuesday. This will allows for a couple weeks of direct public review and comment. I will make sure everyone has the link once its completed.

- Derek has reached out to the Nevada State director for Indian affairs (I'm sure I messed up that position title) however as of yesterday had not received any response.

- Andrew has forwarded any direct requests that went to the Governor's office directly and we have included those in the lists.

- The confidential inquiry is updated and its potential identified.

- We have also reached out to all the municipalities and have a call with the City of Las Vegas shortly. They have all submitted their desired tracks.

Since there are a low volume of direct inquiries I think directing them to the website for comment will likely be the best path outside of just forwarding via email in the interim.

Best regards,

Paul Anderson

Good morning Paul,

Please let me know if you would like B & I to weigh in on Mike's question. I believe it is best answered by GOED. I heard from Bob this morning the map will be up by the end of the week. This is great news.

Best,
CJ

Subject: Opportunity Zones

Attached please find a letter of request from the Nevada Department of Health and Human Services that Northern Nevada Adult Mental Health Services campus be considered for inclusion in an Opportunity Zone.

I believe that GOED and B&I are working on the process to determine what areas the Governor will designate as OZs, and this is supposed to be done by April 20th.

I have now heard from a few entities that want to advocate for specific OZs:

...Pyramid Lake Indian Tribe

...City of Henderson

...City of North Las Vegas

...Confidential inquiry (Paul is aware) to have the area near the Las Vegas Convention Center included

...DHHS/NNAMHS campus

AMERICAN OVERSIGHT

I just keep referring inquiries to you (Andrew/Paul/CJ). It doesn't feel to me like there is a process in place for entities to provide input or requests to be included. But, maybe I just do not know what efforts are being made to get input.

What is the process? Do we just keep forwarding an connecting people?

Subject: Re: Opportunity Zones

Here are some high-level stats.

By the Numbers

Opportunity Zone Nominations DIRECTLY impact more than 234,000 Nevadans in some of our most disadvantaged communities. Communities surrounding these tracts are also expected to benefit significantly from investment in designated opportunity zones.

In the 61 tracts:

- ~$37,000 - Average family income
    - (Just 60% of median statewide family income of ~$62,500)
- 16% - Average unemployment rate from 2011-2015
    - Nearly 2x greater than the national unemployment rate

> Mary-Sarah, As per the request, here is some verbiage on the methodology for nominating opportunity zones. We're also looking to DETR to run some numbers on the 61 tracts for the release. — BB

AMERICAN OVERSIGHT

To identify the state's 61 priority tracts for Opportunity Zone designations, the Nevada Governor's Office of Economic Development (GOED) and the Nevada Department of Business and Industry solicited input from local governments, regional development authorities, the general public and other interested parties. GOED then utilized indices to measure market traction, social need, and investment opportunity. The methodology incorporates information including:

- % population below poverty
- % households with rent or mortgages greater than 30% of income
- % population not in the labor force
- % of population with less than a high school degree
- Concentrated income (Gini Index)
- Commercial lending
- Multifamily lending
- Small business lending
- Socioeconomic change
- Concentration of jobs

Summary:

The Tax Cuts and Jobs Act of 2017 established an Opportunity Zone tax incentive, which allows taxpayers to defer paying federal tax on capital gains from the sale of property if those gains are invested in Qualified Opportunity Funds that invest 90% of their assets in businesses located or property used in a designated low-income community. Investors receive modest reductions in their eventual tax bill if they maintain their Opportunity Fund investments for at least five and then seven years. Investors that hold capital in those funds for a full ten years also do not have to pay capital gains tax on the appreciation of their Opportunity Zone investments.

Here are some high-level stats.

By the Numbers

Opportunity Zone Nominations DIRECTLY impact more than 234,000 Nevadans in some of our most disadvantaged communities. Communities surrounding these tracts are also expected to benefit significantly from investment in designated opportunity zones.

In the 61 tracts:

- ~$37,000 - Average family income
  - (Just 60% of median statewide family income of ~$62,500)
- 16% - Average unemployment rate from 2011-2015
  - Nearly 2x greater than the national unemployment rate

AMERICAN OVERSIGHT

On Apr 20, 2018, at 8:34 AM, Brian Baluta <bbaluta@diversifynevada.com> wrote:

Mary-Sarah, As per the request, here is some verbiage on the methodology for nominating opportunity zones. We're also looking to DETR to run some numbers on the 61 tracts for the release. — BB

To identify the state's 61 priority tracts for Opportunity Zone designations, the Nevada Governor's Office of Economic Development (GOED) and the Nevada Department of Business and Industry solicited input from local governments, regional development authorities, the general public and other interested parties. GOED then utilized indices to measure market traction, social need, and investment opportunity. The methodology incorporates information including:

- % population below poverty
- % households with rent or mortgages greater than 30% of income
- % population not in the labor force
- % of population with less than a high school degree
- Concentrated income (Gini Index)
- Commercial lending
- Multifamily lending
- Small business lending
- Socioeconomic change
- Concentration of jobs

Summary:

The Tax Cuts and Jobs Act of 2017 established an Opportunity Zone tax incentive, which allows taxpayers to defer paying federal tax on capital gains from the sale of property if those gains are invested in Qualified Opportunity Funds that invest 90% of their assets in businesses located or property used in a designated low-income community. Investors receive modest reductions in their eventual tax bill if they maintain their Opportunity Fund investments for at least five and then seven years. Investors that hold capital in those funds for a full ten years also do not have to pay capital gains tax on the appreciation of their Opportunity Zone investments.

Here are some high-level stats.

By the Numbers

Opportunity Zone Nominations DIRECTLY impact more than 234,000 Nevadans in some of our most disadvantaged communities. Communities surrounding these tracts are also expected to benefit significantly from investment in designated opportunity zones.

In the 61 tracts:

- ~$37,000 - Average family income
    - (Just 60% of median statewide family income of ~$62,500)
- 16% - Average unemployment rate from 2011-2015
    - Nearly 2x greater than the national unemployment rate

- Concentration of jobs

Summary:

The Tax Cuts and Jobs Act of 2017 established an Opportunity Zone tax incentive, which allows taxpayers to defer paying federal tax on capital gains from the sale of property if those gains are invested in Qualified Opportunity Funds that invest 90% of their assets in businesses located or property used in a designated low-income community. Investors receive modest reductions in their eventual tax bill if they maintain their Opportunity Fund investments for at least five and then seven years. Investors that hold capital in those funds for a full ten years also do not have to pay capital gains tax on the appreciation of their Opportunity Zone investments.

Here are some high-level stats.

By the Numbers

Opportunity Zone Nominations DIRECTLY impact more than 234,000 Nevadans in some of our most disadvantaged communities. Communities surrounding these tracts are also expected to benefit significantly from investment in designated opportunity zones.

In the 61 tracts:

- ~$37,000 - Average family income
  - (Just 60% of median statewide family income of ~$62,500)
- 16% - Average unemployment rate from 2011-2015
  - Nearly 2x greater than the national unemployment rate

Mary-Sarah, As per the request, here is some verbiage on the methodology for nominating opportunity zones. We're also looking to DETR to run some numbers on the 61 tracts for the release. — BB

To identify the state's 61 priority tracts for Opportunity Zone designations, the Nevada Governor's Office of Economic Development (GOED) and the Nevada Department of Business and Industry solicited input from local governments, regional development authorities, the general public and other interested parties. GOED then utilized indices to measure market traction, social need, and investment opportunity. The methodology incorporates information including:

- % population below poverty
- % households with rent or mortgages greater than 30% of income
- % population not in the labor force
- % of population with less than a high school degree
- Concentrated income (Gini Index)
- Commercial lending
- Multifamily lending
- Small business lending
- Socioeconomic change
- Concentration of jobs

Summary:

The Tax Cuts and Jobs Act of 2017 established an Opportunity Zone tax incentive, which allows taxpayers to defer paying federal tax on capital gains from the sale of property if those gains are invested in Qualified Opportunity Funds that invest 90% of their assets in businesses located or property used in a designated low-income community. American Community Survey and DETR - it's all in our spreadsheet. The only reason for the change is Derek double checked all my numbers and we felt 234k was too specific; 230k gives us flexibility depending on if TRI is in or out.
