Subject: Follow-Up - Proposed Regulations on Opportunity Zones Designed to Incentivize Investment in American Communities

State Leaders and Staff,

Thank you for joining today's briefing call with state and local leaders on Opportunity Zone regulations. Today, Treasury and IRS released proposed regulations on Opportunity Zones designed to incentivize investment in American communities. Below you will find additional information.

Treasury Press Release: Treasury Releases Proposed Regulations on Opportunity Zones Designed to Incentivize Investment in American Communities

Washington – The Treasury Department today issued proposed guidance related to the new Opportunity Zone tax incentive. The tax benefit, created by the 2017 Tax Cuts and Jobs Act, is designed to spur economic development and job creation by encouraging long-term investments in economically distressed communities nationwide.

"We want all Americans to experience the dynamic opportunities being generated by President Trump's economic policies. We anticipate that $100 billion in private capital will be dedicated towards creating jobs and economic development in Opportunity Zones," said Secretary Steven T. Mnuchin. "This incentive will foster economic revitalization and promote sustainable economic growth, which was a major goal of the Tax Cuts and Jobs Act."

The proposed regulations released today clarify what gains qualify for deferral, which taxpayers and investments are eligible, the parameters for Opportunity Funds, and other guidance. The proposed regulations should provide investors and fund sponsors the information they need to confidently enter into new business arrangements in designated Opportunity Zones. The Treasury Department plans on issuing additional guidance before the end of the year.

The Opportunity Zone incentive offers capital gains tax relief to investors for new investment in designated areas. Investment benefits include deferral of tax on prior gains as late as 2026 if the amount of the gain is invested in an Opportunity Fund. The benefits also include tax forgiveness on gains on that investment if the investor holds the investment for at least 10 years. Opportunity Zones retain their designation for 10 years, but under the proposed regulations, investors can hold onto their investments in Qualified Opportunity Funds through 2047 without losing tax benefits.

Working with our partners in State and local governments, earlier this year, Treasury certified 8,761 communities in all 50 states, the District of Columbia and five U.S. territories. Nearly 35 million Americans live in areas designated as Opportunity Zones. These communities present both the need for investment and significant investment opportunities.

Based on data from the 2011-2015 American Community Survey, the designated regions had an average poverty rate of over 32 percent, compared with the 17 percent national average.

Additionally, the median family income of the designated tracts were on average 37 percent below the area or state median, and had an unemployment rate of nearly 1.6 times higher than the national average.

View the guidance.

IRS Press Release: Treasury, IRS issue proposed regulations on new Opportunity Zone tax incentive

IR-2018-206, October 19, 2018

WASHINGTON —The Treasury Department and the Internal Revenue Service today issued proposed regulations and other published guidance for the new Opportunity Zone tax incentive.

Opportunity Zones, created by the 2017 Tax Cuts and Jobs Act, were designed to spur investment in distressed communities throughout the country through tax benefits. Under a nomination process completed in June, 8,761 communities in all 50 states, the District of Columbia and five U.S. territories were designated as qualified Opportunity Zones. Opportunity Zones retain their designation for 10 years. Investors may defer tax on almost any capital gain up to Dec. 31, 2026 by making an appropriate investment in a zone, making an election after December 21, 2017, and meeting other requirements.

The proposed regulations clarify that almost all capital gains qualify for deferral. In the case of a capital gain experienced by a partnership, the rules allow either a partnership or its partners to elect deferral. Similar rules apply to other pass-through entities, such as S corporations and their shareholders, and estates and trusts and their beneficiaries.

Generally, to qualify for deferral, the amount of a capital gain to be deferred must be invested in a Qualified Opportunity Fund (QOF), which must be an entity treated as a partnership or corporation for Federal tax purposes and organized in any of the 50 states, D.C. or five U.S. territories for the purpose of investing in qualified opportunity zone property.

The QOF must hold at least 90 percent of its assets in qualified Opportunity Zone property (investment standard). Investors who hold their QOF investment for at least 10 years may qualify to increase their basis to the fair market value of the investment on the date it is sold.

The proposed regulations also provide that if at least 70 percent of the tangible business property owned or leased by a trade or business is qualified opportunity zone business property, the requirement that "substantially all" of such tangible business property is qualified opportunity zone business property can be satisfied if other requirements are met. If the tangible property is a building, the proposed regulations provide that "substantial improvement" is measured based only on the basis of the building (not of the underlying land).

In addition to the proposed regulations, Treasury and the IRS issued an additional piece of guidance to aid taxpayers in participating in the qualified Opportunity Zone incentive. Rev. Rul. 2018-29 provides guidance for taxpayers on the "original use" requirement for land purchased after 2017 in qualified opportunity zones. They also released Form 8996, which investment vehicles will use to self-certify as QOFs.

More information on Opportunity Zones, including answers to frequently-asked questions, is on the Tax Reform page of IRS.gov. The Tax Reform page will also feature updates on the implementation of this and other TCJA provisions.

Click here for complete list of Opportunity Zones.

Please let us know if you have any questions.

Thanks,
Nic

Subject: FULCRUM
Attachments: Fulcrum _ Sierra Overview March 2017.doc; Sandoval to Perdue Talking Points.docx

Here's a timeline. I think there was probably a letter in March 2011, but I don't have it.

March 2011:

- Fulcrum reached out to seek support for their loan guarantee. I was involved in the conversations, and Frank Woodbeck was in the loop from his post at NCED (soon thereafter to become GOED). I looped in Stacey Crowley, then at the Energy Office.
- Heidi (as CoS) met with Fulcrum, along with Stacey. Stacey sent me a readout and indicated Heidi passed along Gov's support for whatever he can do to help. There was discussion of a letter of support, but I don't have record that it was sent.
- Heidi directed me to pass along Gov's support to the delegation.

August 2012

- Fulcrum receives loan guarantee from DOE.

May 2017

- At the beginning of the Trump Administration, Fulcrum reached out to ask Gov to help protect their loan guarantee. They asked for Gov to make a call to newly-minted Secretary Perdue. I don't have record whether that call happened, but suggested talkers were prepared. (Attached).

September 2017

- Fulcrum CEO met with me for a project update in DC.

December 2017

- During consideration of the Tax Reform bill, worked with CJ Manthe and B&I to protect Private Activity Bonds, which are being used in Nevada for multiple projects including Fulcrum. We reached out to the delegation to indicate our support. PABs were ultimately protected in the final Tax Reform bill.

February 2018

- Outreach from Fulcrum CEO for a meeting, ultimately we couldn't make it happen. Ryan Mulvenon, their local lobbyist, wrote:
    - We don't have anything imminent/urgent to discuss from the Nevada angle (other than say thank you again and to go over how they're progressing w/ the facility in TRIC) and the success of the bond offering—but now that we survived tax reform and private activity bonds are still intact—they are starting to get serious about how to start expanding both potentially in Nevada and nationally.

AMERICAN OVERSIGHT

Sandoval to Perdue Talking Points

Congratulations on your confirmation.

I'm hoping you can help me with an issue involving an advanced biofuels project with a company called Fulcrum BioEnergy.

They (Fulcrum) are looking to build a biorefinery outside of Reno. In 2014, USDA's Office of Rural Development made a loan guarantee ($105 million) commitment. The loan guarantee was made possible because of the biorefinery assistance program (Section 9003 of the Farm Bill).

They aren't going to make biofuels from corn, but instead will use municipal solid waste (garbage).

Here's the issue. Since the loan guarantee commitment was made, it has taken several years for everyone involved (the private lender, USDA, and the company) to be in a position to close on the deal.

I'm told that everyone is ready to close—but everyone has been waiting on your confirmation to finish up the remaining steps.

Would you mind taking a look at this project and making sure it is getting the necessary attention? I want to make sure it's a priority.

This project means a lot of Nevada construction jobs (500) and ongoing permanent jobs (120) and Nevada can't afford to lose out on these types of job-creating projects.

AMERICAN OVERSIGHT

Converting MSW into Fuels in Storey County, Nevada

Fulcrum BioEnergy, Inc. is building an innovative energy facility that will transform municipal solid waste (MSW) that would otherwise be landfilled into low-cost transportation fuels including syncrude, jet fuel and diesel. Over the past several years, Fulcrum has successfully operated an integrated garbage to fuel demonstration plant that has produced commercial and military-grade jet and diesel fuels. Fulcrum can produce these fuels at costs below petroleum-based jet and diesel. Northern Nevada will be home to Fulcrum's first commercial-scale deployment that converts garbage into advanced biofuels.

Sierra BioFuels Plant

The Sierra BioFuels Plant is located in Storey County, Nevada and will produce more than 10 million gallons per year of advanced biofuels from more than 200,000 tons of garbage diverted from the Lockwood Regional Landfill. Sierra BioFuels will create 500 construction jobs and over 75 permanent operations jobs.

The Sierra BioFuels Plant is a public-private partnership that represents approximately $250M of investment in domestic energy infrastructure in rural Nevada:

- Fulcrum has secured major investments from large strategic investors, including BP, United Airlines, Waste Management, and Cathay Pacific Airways.
- Sierra was awarded a DPA Title III grant from the Department of Defense
- Sierra is a recipient of a 9003 USDA loan guarantee that backs a senior loan from a leading U.S. commercial bank

Project Status:

- Fulcrum completed construction of the feedstock processing facility
- Construction on the biorefinery will begin in 2017, following closing of the USDA-backed loan
- Commercial operations will commence in 2019

The Sierra BioFuels Plant is Fulcrum's first of more than a dozen projects that it is planning to build across the U.S.

Bill

This is the worst possible projection I can imagine for the growth in Washoe County. We are growing faster than ever with no real constraints expected yet the demographer, despite repeated attempts to help Jeff understand that whatever model he is using is broke, continues to bind, by state law, the local governments and the state to insanely inaccurate growth projections.

First off, not sure why he is not using the census numbers for 2017? But using census numbers for Washoe County there has been a 121,101 person growth over 17 years or a 35.67% increase in population (339,486 in 2000 and 460,587 in 2017) This includes a period of negative growth during the great recession so using that same very conservative percentage estimate as we are unlikely to have another significant recession like last time due to our diversity in jobs, we would expect about a 35% increase in our population for the next 17 years. That puts us at just over 620,000 a mile from the demographers estimate of 505,497 ???? I get the changing demographics but we have added 10,000 jobs a year to this region and every indicator shows this continuing for 5-10 more years but we are projecting just 3,000 new people each year which includes natural growth (net births over deaths) – Wow.

Given our local governments are bound to this ridiculous estimate we will certainly be unprepared for this growth. Before I alert our local government to the serious negative impacts these projections will have on them in distribution of tax dollars and other matters, I wanted to strongly object and ask that you commission a group of experts to review and certify the numbers.

Too much is riding on these estimates. I have tried to talk to Jeff in the past but he is welded to an obsolete model that is not able to take into account reality. Many other states just use census data.

Thanks

Mike

AMERICAN OVERSIGHT

Introduction to the 2018 Population Projections

.

The full projections by year and county are at the end of this document. In keeping with the 2014 projections through this current edition, a baseline projection is presented as well as a projection that includes the Tesla Gigafactory project and the impact of relative housing prices for Clark and Washoe Counties. The projection with the Gigafactory will still be used as the control total for the age, sex, race, and Hispanic origin estimates and projections.

The 2018 Projections:

The Regional Economics Models, Inc. (REMI) model was used for these projections. The REMI model provides information for all 17 counties by 23 major economic sectors. The REMI model looks at the interaction between the economic and demographic characteristics of a county. It looks at the dynamic economic and demographic relationships between the 17 counties and the United States as a total. The 20 year projections are produced annually and will change as historic data becomes available or is revised and information about future developments becomes available. Because REMI looks at the relationship between changes in the economy and in population, it is a useful tool for looking at how changes in the structure of the population or the economy can impact each other.

The 2018 Projections were prepared using the REMI PI+ 2.2 model which has 2016 as the last year of historic data in it. The 2017 Projections were produced with the REMI PI+ 2.1 model with history through 2016. Two projections were prepared for this year's projections. One is the baseline forecast. The other included the Tesla project and its impacts. This project was first modeled in 2014 with information from the Governor's Office of Economic Development. There is still interest in understanding the direct and indirect impact of this project. Modeling it separately from the baseline forecast allows for understanding these impacts. It will become part of the baseline forecast as it progresses and the development becomes part of the economic history in the model.

Changes to the out of box model (the model as shipped with no additional information from the user) included the additional years of history for 2016 and any revisions to the data for the earlier years. Both the Census Bureau and the Bureau of Economic Analysis revise their data given new information as well as after reviewing data.

For the baseline forecast the following alterations were made to the out of the box 2018 (2.2) REMI model.

1.) Employment in the national forecast was updated to 2018 as an estimate of what the Bureau of Economic Analysis data could be using the changes seen the Bureau of Labor Statistics Quarterly Census of Employment and Wages for the first quarter of 2016 to 2018.
2.) The Quarterly Census of Employment and Wages data was used to update the counties as well using the first quarter of 2018 data with the exception of the following: Esmeralda, Eureka, Lincoln, Mineral and Pershing. This was because of data suppression in these counties to protect confidentiality.
3.) Hotel employment for Clark County was based on existing hotels and proposed projects as reported by the Las Vegas Convention and Visitors Authority.
4.) Mining employment again showed job losses overtime in the REMI model. This varied by county. It was assumed and the model adjusted so that employment would still not fall below historic averages.
5.) In the past, as growth has occurred in the Tahoe Regional Industrial Center in Storey County, it was assumed that those jobs would be filled by commuters from Lyon and Washoe County.

For the projection that includes Tesla the following assumptions were made:

1.) The recent history in the 2.2 model as well as the information from the employment update has increased the model's response to manufacturing employment for Northwestern Nevada. The Governor's Office of Economic Development reports that Tesla continues to meet overall objectives as set forth in 2014. Employment was annualized from 2018 to reach full capacity by 2024 of their original contracted amount of 6,500 employees.
4.) Housing prices were reviewed for Clark and Washoe County for how they compare to the US (Zillow.com Market Overviews). The baseline forecast has a 2017 relative housing price for Clark County of 0.82 and Washoe County of 1.06 of the national housing price. The estimate that was derived using Zillow indicates that the relative housing prices might be 1.07 for Clark County and 1.43

AMERICAN OVERSIGHT

for Washoe County. The housing and land price variable was adjusted for 2018 and 2019 to reflect these relative price levels as a onetime shock to the two counties. While there are a number of things that could be impacting migration, the 2017 One Year ACS from the Census Bureau reported 18,418 out of state immigrants to Washoe County and 19,178 persons migrating out of state for a net loss of state migrants of 760 persons.

Table 1 compares the projections for 2030 by the year that they were released. Since 2013 the projections have fluctuated between 3,200,000 and just over 3,380,000 statewide. Greater differences are seen across the county projections.

Table 1: Comparing Nevada's Annual Population Projections for 2030	
Year Projection Released	**Projection for 2030**
2011	3,363,704
2012	3,338,269
2013	3,222,107
2014	3,251,664
2015	3,204,979
2016	3,257,762
2017	3,240,017
2018 DRAFT	3,382,551

Table 2 compares the last year of the 2017 edition of the projections with the current *2018 DRAFT* projections for the same year by county. The last year of the 2017 projections was 2036 so that is used to compare the two projections for their long term differences. Both go out 20 years but this is the last year in common between the two. This provides a summary comparison of the two projections from the 2017 estimate and against each other.

Tables 5 A and B show the population age distribution for four major age cohorts for historic data, near term projections, and the projection for 2035. The population for Nevada in the 2017 DRAFT projection is smaller and slightly older. This is similar to the distribution of the labor force population for 2007 to 2016 discussed in a later section.

Table 7 compares manufacturing employment between the 2016 projections and the 2017 DRAFT projections. There is less of a loss in manufacturing nationally in the 2016 projections. This helps spread out manufacturing employment across the other counties in Nevada compared to the 2016 projections. Also it lessens the previously projected but still substantial growth for Storey County. With less of a National drop in manufacturing that sector may be more competitive in other parts of the country.

Table 7. Comparing Manufacturing Employment (in Thousands) from 2013 and 2035 for the United States and Nevada Counties from the 2017 and 2018 Projections

Balance of State	1.691	1.456	-13.90%	1.702	1.411	-17.10%

This concludes the Overview of National and Regional Data section. The following section discussed four main risks to the projections.

Risks to the Projections:

There are four areas of risk to the current projections that could slow Nevada's growth:

1.) Unsettled trends and policy in international migration could impact the projections. The Migration Policy Institute reports that while there was an increase in total migration from 2014 to 2015 the make of the migrant population has been made up of fewer migrants from Mexico and India and China are now the largest countries of origin. This could lead to new settlement patterns from the immigrant population. Also, with Nevada's sizable unauthorized population efforts at deportation may lead to a loss of population and lower employment both due to a loss of employees as well as consumer spending. Most recently the Reforming American Immigration for Strong Employment Act or the RAISE Act would limit legal immigration to half of current levels.

2.) Potential impacts from automation could pose a risk to employment over time. A study from the University of Redlands has estimated that up to 65% of the jobs in Clark County are at risk of being automated. This is based on work by Frey and Osborne that looked at the likelihood of occupation being automated in total or in part based on the skill set for the occupation. Arntz and Zierahn in a paper for the Organization for Economic Cooperation and Development found that up to 9% of jobs could be automated for most developed economies. There is no clear consensus on the timing or full impact of automation in the literature.

3.) Climate change could have mixed impacts on Nevada's growth. For instance, work by Matthew Hauer examines sea level rise and potential migration impacts given historic migration trends and found that population would increase for Nevada. In contrast works by David Albouy (Climate Amenities, Climate Change, and American Quality of Life) and Solomon Hsiang (Estimating economic damage from climate change in the United States) look not at migration impacts but on the economic impact. In the work by Hsiang the impacts vary by county and some parts of Nevada could benefit and some could be negatively impacted.

AMERICAN OVERSIGHT

AMENDMENT TO THE RULES COMMITTEE PRINT FOR H.R. 3053 OFFERED BY MR. AMODEI OF NEVADA

Page 37, line 13, insert ", and give additional priority to such institutions with experience in nuclear waste research and environmental monitoring" before the period.

Page 37, strike lines 14 through 17 and insert the following:

"(b) DEFINITION.—In this section, the term 'institution of higher education' means—

"(1) an institution of higher education, as defined in section 101 of the Higher Education Act of 1965 (20 U.S.C. 1001); and

"(2) an institution in the Nevada System of Higher Education, as defined by the State of Nevada.".

At the end of title IV, add the following:

SEC. 408. INTERMOUNTAIN WEST CORRIDOR.

(a) IDENTIFICATION.—Section 1105(c)(68)(B) of the Intermodal Surface Transportation Efficiency Act of 1991 is amended to read as follows:

AMERICAN OVERSIGHT

"(B) for the Intermountain West Corridor, from the vicinity of Las Vegas, Nevada, north along United States Route 95 to the vicinity of Hawthorne, Nevada, then generally along Nevada State Route 839 to United States Route 50, then westerly terminating at Interstate Route 80.".

(b) COORDINATION.—The head of each Federal department or agency with jurisdiction over land located near the Intermountain West Corridor (as described in section 1105(c)(68)(B) of the Intermodal Surface Transportation Efficiency Act of 1991) shall coordinate with the State of Nevada and the Secretary of Transportation to reserve, through the land use planning processes of the department or agency, a passage for the future Interstate Route 11 along such Corridor.

SEC. 409. CONSIDERATION IN SITING FACILITIES.

Section 174 of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10174) is amended—

(1) by striking "The Secretary, in siting" and inserting the following:

"(a) FEDERAL RESEARCH PROJECTS.—The Secretary, in siting";

AMERICAN OVERSIGHT
NV-DA-20-0615-A-001198

(2) by inserting ", or monitored retrievable storage facility authorized under subtitle C," after "repository"; and

(3) by adding at the end the following:

"(b) REPORT AND PLAN FOR FEDERAL PROJECTS.—Not later than September 30, 2019, and annually thereafter, the Secretary, in consultation with other Federal agencies, the State of Nevada, affected units of local government, and affected Indian tribes, shall prepare and submit to Congress and such State, affected units of local government, and affected Indian tribes, a report identifying potential Federal projects to be located, or proposed to be located, in such State, including a plan for such Federal projects.".

SEC. 410. DEPARTMENT OF ENERGY REMEDIATION FUNDING.

(a) AUTHORIZATION.—The Secretary of Energy is authorized to provide funding for remediation of any facility of the Nevada System of Higher Education, as defined by the State of Nevada, that is contaminated with radium.

(b) FUNDING.—There is authorized to be appropriated, to carry out subsection (a), $10,000,000.

(c) LIMITATION ON FUNDING FOR OTHER USES.—Unless and until the amount authorized under subsection (b) is appropriated to carry out subsection (a), no amount

AMERICAN OVERSIGHT

may be appropriated to make expenditures from the Nuclear Waste Fund established in section 302(c) of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10222(c)) for activities described in section 302(d)(1) of such Act.

SEC. 411. SENSE OF CONGRESS REGARDING A 911 COORDINATOR FOR NEVADA.

It is the Sense of Congress that the State of Nevada should designate a State 911 coordinator for emergency response.

SEC. 412. ZIP CODE FOR STOREY COUNTY, NEVADA.

Not later than 270 days after the date of enactment of this Act, the Postal Service shall designate a single, unique ZIP code for, as nearly as practicable, the community of Storey County, Nevada.

SEC. 413. NUCLEAR TECHNOLOGY REPORT.

(a) REPORT.—The Secretary of Energy shall submit to Congress and the State of Nevada a report on the potential of locating a reprocessing or recycling facility for spent nuclear fuel near the Yucca Mountain site.

(b) CONTENTS.—The Secretary shall include in the report required under subsection (a) a description of—

(1) the energy technology benefits associated with a reprocessing or recycling facility for spent nuclear fuel;

AMERICAN OVERSIGHT

(2) the potential economic benefits for the host community associated with such a facility, including employment, infrastructure development, and workforce development benefits;

(3) the energy and national security implications for the supply and availability of nuclear fuel associated with such a facility; and

(4) the potential for locating other nuclear fuel cycle facilities near the Yucca Mountain site, such as an enrichment facility for national defense purposes.

(c) CONSULTATION.—In preparing the report required under subsection (a), the Secretary shall consult with institutions in the Nevada System of Higher Education, as defined by the State of Nevada, with prior reprocessing research experience.

(d) YUCCA MOUNTAIN SITE DEFINED.—In this section, the term ''Yucca Mountain site'' has the meaning given that term in section 2(30) of the Nuclear Waste Policy Act of 1982.

Subject: Axion Information

Jojo,

Just wanted to ensure you were tracking a potential provider for rural service. Axion is a satellite entertainment provider that has moved relocated to Reno and was approved for incentives at the last GOED board meeting (draft minutes attached – item 5B)/ "Mr. Wendt advised Axion Corporation provided advanced satellite technologies and services that enabled consumer and residential access to a new generation of high throughput satellites." And " Governor Sandoval inquired whether the company's service would be accessible in rural Nevada. Mr. Wendt confirmed this was accurate and advised the first three spot beams to be launched would be in northern Nevada. Thus, providing broadband capabilities to any citizen in the State of Nevada."

I've also attached their board application packet.

I am not sure they are a fit to integrate into your programs but they might be. I can find a good POC if you'd like to connect with them. - Matt

Board Summary

Axion Corporation

505 E. Windmill Lane Suite 1C-117, Las Vegas, NV 89123
Thomas Wendt, Chief Executive Officer
Company Headquarters

Date: May 17, 2018
Main Location: Carson City

Business Type: New | County: Washoe County | Development Authority Representative: Stan Thomas - EDAWN

APPLICATION HIGHLIGHTS

- Axion Corporation is considering establishing a facility in Reno, NV. The northern Nevada facility would house the company's engineering, manufacturing, distribution, headquarters, and satellite support services.
- The target date for the expansion is fall 2018, with operations to commence in November 2018.

PROFILE

Axion Corporation is a provider of satellite-based entertainment services for the consumer and commercial markets. The company is a start-up currently based in Las Vegas, Nevada. After careful consideration of growth potential, the company has formulated plans to relocate to Reno, Nevada from its current location. The company plans to hire and train employees from the local Reno area, and begin engineering, manufacturing, distribution, headquarters, and satellite support services at a location in the Reno area for which we are currently searching. The target date for the physical move is fall 2018, with operations to commence in November 2018. *Source: Axion Corporation*

SIGNIFICANCE OF ABATEMENTS IN THE COMPANY'S DECISION TO RELOCATE/EXPAND

Axion Corporation is eyeing tremendous opportunity in its markets and, like any young company, needs to establish its operations in a cost-effective manner to support its projected growth. The incentive and abatement programs offered through GOED will make it possible to build the company's manufacturing, engineering, distribution, business and headquarters operations in a manner that is pleasing to investors and essential to Axion Corporation's bottom line. These incentives and abatements are of the highest importance to Axion Corporation and the company is grateful to be included as a candidate for these programs. *Source: Axion Corporation*

Re: Axion Corporation

Dear Paul;

EDAWN hereby supports the application of Axion Corporation for the Sales & Use Tax Abatement, Modified Business Tax Abatement, and Personal Property Tax Abatement.

Axion is a provider of satellite-based entertainment services for the consumer and commercial markets. The company is planning to relocate its corporate headquarters, manufacturing and engineering to Reno with plans to commence operations by November 2018.

The company will be investing approximately $27,000,000 in capital equipment and plans to hire 205 employees by the end of Year Two at an average wage of $40.60 per hour and 511 employees at the end of 5 years.

The company's compensation package includes medical, dental, and vision benefits. Additional compensation includes merit increases, overtime, PTO/sick/vacation, retirement plan/profit sharing/401K, tuition assistance, retirement plan/profit sharing/401K, and bonus. Employee health insurance is covered 70% by the company and commences upon employment.

EDAWN supports this application as the company meets all three program requirements. Your consideration and support of the incentive application for Axion is a significant factor in their pending decision to expand in northern Nevada and speaks favorably to the State's business-friendly environment.

Sincerely,

Stan Thomas
EDAWN, Executive Vice-President
Business Development

AXION CORPORATION

April 4, 2018

Governor's Office of Economic Development
808 West Nye Lane
Carson City, NV 89703

Dear Commission Members:

Axion Corporation is a provider of satellite-based entertainment services for the consumer and commercial markets. We are a start-up currently based in Las Vegas, Nevada. After careful consideration of our growth potential, our company has formulated plans to relocate to Reno, Nevada from our current location in Las Vegas, Nevada. We plan to hire and train employees from the local Reno area, and begin engineering, manufacturing, distribution, headquarters, and satellite support services at a location in the Reno area for which we are currently searching. The target date for the physical move is fall 2018, with operations to commence in November 2018.

The decision to relocate our operations from Las Vegas operation to Reno was due to several factors, including the business tax structure, cost of living, availability of technical talent, and logistic advantages offered by the region. In addition, Axion is aware of the benefits of the State Incentive Program, and this also was a critical factor in deciding to relocate our manufacturing and engineering operations to Reno.

The relocation plan to Reno involves setting up a manufacturing operation and engineering offices and investments in additional equipment. In order to staff and operate our operations, the plan is to hire up to 205 employees in the first two years, with increases over five years. The average hourly rate of the employees is projected to be $40.60.

We are excited about the market opportunities presented by this relocation and the advantages that locating this facility in Reno will offer our company. In conjunction with Nevada's business-friendly environment, we see this as a first step in what will be increased growth for Axion Corp.

Sincerely,

Peter Vrettas

RE: REQUEST FOR CONFIDENTIALITY OF RECORDS AND DOCUMENTS

Dear Director Anderson:

On April 5, 2018, Axion Corporation submitted an application to you as the Executive Director of the State of Nevada Governor's Office of Economic Development ("GOED") requesting approval of economic incentives for their new operation in Nevada. The purpose of this letter is to request confidentiality pursuant to Section 4 of Assembly Bill No. 17 (2015 Regular Session) as codified in NRS 231.069.

Please be advised Axion Corporation specifically deems the following information proprietary and confidential:

1) The detailed schedule of Employment List
2) The detailed schedule of Capital Equipment List

Thank you for your consideration. If you have any questions or require any further information, please do not hesitate to contact me.

Sincerely,

Peter T. Vrettas
President & CAO

Has your company ever applied and been approved for incentives available by the Governor's Office of Economic Development? [ ] Yes [x] No

If Yes, list the program awarded, date of approval, and status of the accounts (attach separate sheet if necessary):

Section 3 - Program Requirements

Please check two of the boxes below; the company must meet at least two of the three program requirements:

- [x] A capital investment of $1,000,000 in eligible equipment in urban areas or $250,000 in eligible equipment in rural areas are required. This criteria is businesses. In cases of expanding businesses, the capital investment must equal at least 20% of the value of the tangible property owned by the business.
- [x] New businesses locating in urban areas require fifty (50) or more permanent, full-time employees on its payroll by the eighth calendar quarter following quarter in which the abatement becomes effective. In rural areas, the requirement is ten (10) or more. For an expansion, the business must increase employees on its payroll by 10% more than its existing employees prior to expansion, or by 25 (urban) or 6 (rural) employees, whichever is greater.
- [x] In urban areas, the average hourly wage that will be paid by the business to its new employees is at least 100% of the average statewide hourly wage. in rural areas, the average hourly wage will equal or exceed the lesser of the county-wide average hourly wage or statewide average hourly wage.

Note: Criteria is different depending on whether the business is in a county whose population is 100,000 or more or a city whose population is 60,000 or more (i.e., "urban" area), or if the business is in a county whose population is less than 100,000 or a city whose population is less than 60,000 (i.e., "rural" area).

STATE OF NEVADA
GOVERNOR'S OFFICE OF ECONOMIC DEVELOPMENT
BOARD MEETING
May 17, 2018

The meeting of the Board of Economic Development was called to order by Governor Brian Sandoval at the Legislative Counsel Bureau, 401 South Carson St, Room 3137, Carson City, Nevada, 89701; and via video conference at the Grant Sawyer Building, Legislative Counsel Bureau, Room 4412, 555 E. Washington Avenue, Las Vegas, Nevada, 89101.

1. CALL TO ORDER, ROLL CALL AND ESTABLISH QUORUM

VOTING BOARD MEMBERS PRESENT

Governor Brian Sandoval, State of Nevada
Lieutenant Governor Mark Hutchison, State of Nevada
Secretary of State Barbara Cegavske, State of Nevada
Dr. Weldon Havins, Director, Medical Jurisprudence and Ophthalmology, Touro University Nevada
Mr. Adam Kramer, Executive Vice President of Strategy, Switch, Inc.
Mr. James Barrett, Jr., President and Founder, The JABarrett Company
Dr. Dana Bennett, President, Nevada Mining Association
Mr. Dan Klaich, Voting Member at Large
Mr. Raymond Specht, Founder and CEO, Specht Leadership Consulting

NON-VOTING BOARD MEMBERS PRESENT

Mr. Don Soderberg, Director, Department of Employment Rehabilitation and Training

NON-VOTING BOARD MEMBERS ABSENT AND EXCUSED

Dr. Thom Reilly, Chancellor and Chief Executive Officer, Nevada System of Higher Education

STAFF MEMBERS PRESENT

Paul Anderson, Executive Director, GOED, Secretary of Board
Derek Armstrong, Deputy Director, GOED
Karsten Heise, Director of Technology Commercialization, GOED
Ryan Smith, Director of Business Operations, GOED
Brian Baluta, Director of Communications, GOED
Bob Potts, Director of Research, GOED
Stacey Bostwick, Workforce Development Program Coordinator, GOED
Gillian Barclay, Healthcare Industry Specialist, GOED
Michelle Sibley, Executive Assistant / HR Coordinator, GOED

AMERICAN OVERSIGHT

Melanie Sheldon, Program Manager, GOED
Mariah Heriman, Executive Assistant / Program Management Specialist, GOED

GUESTS PRESENT

Assemblywoman Irene Bustamante-Adams
Scott Anderson, Secretary of State's Office
Peter Keegen, Attorney General's Office
Shelli Long, Department of Taxation
Lezlie Helget, Department of Taxation
Lieutenant J. Wilson, Nevada Department of Corrections
Jeannette Calderan, Nevada State Board of Nursing
Catherine Prato-Lefkowitz, Nevada State Board of Nursing
Phil Klevorick, Clark County Economic Development
Bill Arent, City of Las Vegas

2. PUBLIC COMMENT

Mr. Brian Wilcox, Chief Information Security Officer (CISO), BlackRidge Technology (BlackRidge), provided public comment in Carson City. Mr. Wilcox advised he was the former CISO for the State of Nevada prior to joining Blackridge, a military grade cyber defense security company headquartered in Reno, Nevada. Mr. Wilcox noted his previous role had awarded him a unique vantage point to understanding the strengths, weaknesses, threats, and opportunities of the state's cyber defenses. Mr. Wilcox advised he'd come in front of the Board as an extension of his public trust obligation fostered while in official capacity with the state. Mr. Wilcox noted BlackRidge was unique in providing a solution that forever changed safe internet communications. Transport Access Control (TAC), the primary of seven patents held by BlackRidge, acts as the liaison between the chaos of the internet and organizational networks, preventing unapproved traffic from being initiated. The solution authenticates every connection on the first packet of data, resulting in an immediate reduction in malicious, unwanted traffic that poses the bulk of cyber threats. Mr. Wilcox would continue informing Nevada's state entities that the next generation of cyber defenses had arrived and BlackRidge would be managing efforts through the Nevada Office of Cyber Defense Coordination.

AMERICAN OVERSIGHT

Mr. Jared Smith, Chief Operating Officer, Las Vegas Global Economic Alliance (LVGEA) provided public comment from Las Vegas. Mr. Smith noted the May 17 meeting agenda comprised the most projects LVGEA had ever represented at a GOED Board meeting. Mr. Smith commended the companies, Nevada's Economic Development infrastructure staff, and the state's incentive and abatement programs.

3. GOVERNOR SANDOVAL'S COMMENTS

Governor Brian Sandoval opened the meeting and welcomed new Nevada Governor's Office of Economic Development (GOED) Board member Mr. Adam Kramer, Executive Vice President of Strategy, Switch, Inc. Mr. Kramer thanked Governor Sandoval and noted he was greatly appreciative for the opportunity to serve on the Board.

Governor Sandoval noted the meeting's robust agenda and thanked the GOED Board, Regional Development Authorities, local governments, and Nevada's institutions of higher learning for their work with companies considering Nevada for relocation or expansion.

4. APPROVAL OF THE MARCH 15, 2018 BOARD MEETING MINUTES

A MOTION WAS MADE BY MR. DAN KLAICH TO APPROVE THE MARCH 15, 2018 MEETING MINUTES; THIS MOTION WAS SECONDED BY MR. KRAMER. THE MOTION PASSED UNANIMOUSLY.

5. ABATEMENT APPLICATIONS FOR BOARD APPROVAL:

A. ADVANCED TECHNOLOGIES MANAGEMENT, INC. DBA PICTOGRAPHICS

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Perry Ursem, Vice President of Business Retention and Expansion, LVGEA presented Advanced Technologies Management, Inc. dba Pictographics (Pictographics), and provided a brief overview of the company and abatements sought. Pictographics is an industry leader in print technology, utilizing the latest hardware to deliver the highest quality products. The company produced graphics for events, trade shows, interior design, and architectural installations and is was a manufacturer for strategic partners. The expansion would add 27 new jobs, producing an average hourly wage of $27.35, and capital investment projections of $17.6m. Mr. Ursem was joined by Mr. Craig Miller, President and Chief Executive Officer, Pictograhics.

Mr. Miller advised Pictographics planned to expand its existing southern Nevada manufacturing facility in conjunction with leasing or purchasing a second facility. The company started as a family-run, suburban home-based, credit-card-financed business and evolved into a 'world class' company. The company has been the principal graphics provider for the Fiesta Bowl, BCS

AMERICAN OVERSIGHT

National Championship, NBA All Star Games, and for key exhibitors at the Consumer Electronics Show (CES) including Intel, Nokia, and LG Electronics. Pictographics continued to expand its market by becoming a total solution provider and by partnering with other solutions companies. Mr. Miller noted the company was currently forming an alliance with Hewlett-Packard (HP) to become a manufacturing center for 3D printing. Pictographics had been named the beta site for HP's new 580 color printer and the beta site for Mimaki USA's 3DUJ-553 photorealistic 3D printer.

Lieutenant Governor Mark Hutchison asked whether the company's technology was intellectual property (IP) protected. Mr. Miller confirmed Pictographics had several patents and initial access to certain products and technologies. To support this the company had teamed up with high schools, and the university system, to develop the talent pipeline required for the progressive additive manufacturing sector. Additionally, the company planned to grow its intern program to offer internships to UNLV undergraduate and graduate students. Mr. Miller highlighted the University of Las Vegas' (UNLV) engineering program and noted the company had excellent experiences working with Mr. Rama Venkat, Dean, UNLV Howard R. Hughes College of Engineering.

A MOTION WAS MADE BY MR. KLAICH TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, MODIFIED BUSINESS TAX ABATEMENT, AND PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5A. THIS MOTION WAS SECONDED BY SECRETARY OF STATE BARBARA CEGAVSKE. THE MOTION PASSED UNANIMOUSLY.

B. AXION CORPORATION

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Stan Thomas, Executive Vice President, Economic Development Authority of Western Nevada (EDAWN), presented Axion Corporation and provided a brief overview of the company and abatements sought. Axion Corporation is a provider of satellite-based entertainment services for the consumer and commercial markets. Axion Corporation is considering establishing a facility in Reno, NV. The northern Nevada facility would house the company's engineering, manufacturing, distribution, headquarters, and satellite support services. The company planned to invest over $27m in capital equipment and anticipated hiring 205 employees with an average wage over $40.00 an hour. Mr. Thomas was joined by Mr. Thomas Wendt, Chief Executive Officer, Axion Corporation

Mr. Wendt advised Axion Corporation provided advanced satellite technologies and services that enabled consumer and residential access to a new generation of high throughput satellites. Axion Corporation would initially deliver products in the United States however the first satellite's coverage would include North America, Mexico, Latin America, the Caribbean. The company's initial target market was the 14 million households in the United States currently with little or no

AMERICAN OVERSIGHT

access to residential broadband services. The economic incentives and dynamic business climate were important reasons Axion Corporation had reviewed as a Nevada location.
Governor Sandoval inquired whether the company's service would be accessible in rural Nevada. Mr. Wendt confirmed this was accurate and advised the first three spot beams to be launched would be in northern Nevada. Thus, providing broadband capabilities to any citizen in the State of Nevada.

Governor Sandoval inquired about the specific skill sets sought in employees. Mr. Wendt advised approximately half of the company's employees would be required to have engineering skillsets. However, the company would also be seeking to fill roles in manufacturing, distribution, IT, business development, and corporate headquarter positions.

Governor Sandoval inquired whether the company planned to work with Nevada learning institutions for recruitment purposes. Mr. Wendt noted the company anticipated collaborating with the University of Reno (UNR) and UNLV for hiring and employment program purposes.

Secretary of State Cegavske inquired whether the company also planned to reach out to community colleges. Mr. Wendt advised EDAWN had connected the company with local community colleges and Axion Corporation was exploring the opportunity to develop a 12-week training process.

A MOTION WAS MADE BY LIEUTENANT GOVERNOR HUTCHISON TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5B. THIS MOTION WAS SECONDED BY DR. WELDON HAVINS. THE MOTION PASSED UNANIMOUSLY.

C. CAREMARK, LLC
- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

D. CAREMARK, LLC
- **CATALYST FUND**

Governor Sandoval advised Agenda Items 5C and 5D would be heard together.

Mr. Michael Walsh, Vice President of Economic Development, LVGEA, presented Caremark, LLC, and provided a brief overview of the company and abatements sought. Caremark, LLC, operates as a subsidiary of the American retail and health care company CVS Health (CVS). CVS is a Fortune 10 company and is presently the largest pharmacy chain in the United States in terms of number of locations and total prescription revenues. Caremark, LLC offers prescription benefits management services in the United States. The company designs and fulfills prescription drug benefit plans. The company offers prescription benefit services, including local retail pharmacy and home delivery options; specialty pharmacy services, such as pharmaceuticals and other therapeutic services for participants with chronic or genetic disorders; and care patterns

AMERICAN OVERSIGHT

disease management programs, which provide participant care for complex conditions. Caremark, LLC anticipates hiring 102 new employees in the first 24 months of operations, with an average hourly wage of $25.73. The company anticipated making a capital investment of $5m in equipment. Mr. Walsh thanked Mr. Gustavo Perez, Senior Manager - Indirect Tax, Ernst & Young for bringing this opportunity to the State of Nevada. Mr. Walsh was joined by Mr. Dan Klein, Director of Engineering, Caremark, LLC.

Mr. Klein advised CVS/Caremark, LLC had recently been focused on the creation of a prescription management service center that would provide innovative tools and strategies to help improve clinical outcomes for client plan members while assisting them in managing pharmacy overall health care costs. The company was seeking the most operationally efficient and cost-effective location to accommodate its business needs as the company was planning for large capital and hiring commitments. Mr. Klein highlighted the company's commitment to community engagement and corporate citizenship via event sponsorship, volunteerism, and disaster relief. The company is also committed to leveraging local universities to increase high-paying positions in the pharmaceutical sector, which in turn would drive industry growth. Mr. Klein noted the opportunity for partnerships and collaborations with UNLV, the College of Southern Nevada (CSN), and other southern Nevada institutions.

Governor Sandoval requested additional information on the role of a prescription management service. Mr. Klein advised the center would be staffed with employees versed in handling high-touch patient counseling, coaching, and therapy management. In the specialty pharmacy business there was a significant volume of high-touch patients requiring nursing, pharmacist intervention, and additional specialized medical services. The services provided by the new facility would be focused nationally and delivered telephonically.

Governor Sandoval inquired about the specific skill sets sought in employees. Mr. Klein advised the company would primarily be seeking pharmacy technicians, pharmacists, and nurses.

Governor Sandoval asked about the company's next steps should it be awarded the abatements sought. Mr. Klein advised the company would make it final decision, on the location for its prescription management service center, within a week.

Governor Sandoval inquired whether Nevada's incentive packages were important in terms of the company's decision to locate in Nevada. Mr. Klein confirmed this was a critical factor in the company's decision-making process.

A MOTION WAS MADE BY MR. RAYMOND SPECHT TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5C, AND A CATALYST FUND GRANT IN AN AMOUNT NOT TO EXCEED $350,000, AS DESCRIBED IN AGENDA ITEM 5D. THIS MOTION WAS SECONDED BY MR. KRAMER. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

E. FORTRESS INNOVATIONS, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Ursem, LVGEA, presented Fortress Innovations, Inc. and provided a brief overview of the company and abatements sought. Fortress Innovations, Inc. is a vertically integrated company that manufactures and sells a proprietary structural wall system named the "1WallSystem™ which allows construction to be done faster, stronger, less-expensive and with the highest energy-efficiency and fire ratings in the market. The company also manufactures steel framing components, steel trusses and distributes a suite of proprietary insulation paints/coatings for commercial, industrial and domestic/residential use that significantly increase energy performance by deflecting over 98% of the sun's heat and ultraviolet rays and significantly reduces acoustic levels while providing a protective "skin" over the structure to protect it against the elements over a 25-year life-cycle. The project would include 30 new hires at an average hourly wage of $25.18, and a capital investment of approximately $5.6m. Mr. Ursem was joined by Mr. Dean Pardee, Chief Executive Officer, Fortress Innovations, Inc.

Mr. Pardee advised the Fortress Innovations, Inc. planned to build a 275,000-square-foot permanent manufacturing facility in southern Nevada. In order to commence production while its manufacturing plant was built, the company would lease 10,000 to 20,000 square feet in a Nevada location. Mr. Pardee noted the company was a US military veteran 1st hiring company and would actively participate in military support, environmental, affordable housing, homelessness, and animal therapy support initiatives.

Governor Sandoval asked if the company planned to do its own development or sell its projects to developers. Mr. Pardee advised the company planned to do both. The company was currently speaking with several large builders and companies directly involved with the residential and commercial construction industry in Nevada. There may be opportunity build a client base, or form joint ventures in addition to the company's own projects.

Mr. James Barrett inquired about the specific skill sets sought in employees. Mr. Pardee advised, from a framing standpoint, a team could be trained within 48 hours. The company had significantly simplified the building process to enable this. The Los Angeles Department of Building and Safety had stated it was the best technology seen in 30 years.

Mr. Specht asked about the company's employment projection of 180 new jobs created in five-years. Mr. Pardee advised there would be employment across all areas of the company including factory workers, field construction, developers, and construction managers.

A MOTION WAS MADE BY MR. BARRETT TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5E. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

F. FULCRUM SIERRA BIOFUELS, LLC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**
- **REAL PROPERTY TAX ABATEMENT**

Ms. Nancy McCormick, Senior Vice President of Retention and Expansion, EDAWN, presented Fulcrum Sierra Biofuels, LLC and provided a brief overview of the company and abatements sought. Fulcrum Sierra BioFuels, LLC (Fulcrum) is a wholly-owned subsidiary of Fulcrum BioEnergy, Inc (FBE). FBE was formed to develop a reliable and efficient process for converting municipal solid waste (MSW) into renewable transportation fuels. Fulcrum Sierra BioFuels, LLC's existing Feedstock Processing Facility in Storey County processes MSW-derived feedstock to be shredded and compacted for transport to the company's Biorefinery, where it would be converted into renewable transportation fuels, including jet fuel and diesel. The Biorefinery, also in Storey County, would produce transportation fuel that competed directly with high-priced fossil fuels, and was expected to have a lower cost, lower carbon, and lower emissions than traditional fossil fuel alternatives. Collectively the Feedstock Processing Facility and Biorefinery would convert approximately 175,000 tons per year of MSW, or household garbage, into approximately 10.5 million gallons per year (800 barrels per day) of renewable Syncrude that would be upgraded and processed into low-carbon transportation fuel products. The project would include an equipment investment of approximately $13.25m, and building costs exceeding $12.9m. The company would add 13 positions at an average hourly rate of $22.04. Ms. McCormick was joined by Ms. Jeanne Benedetti, Senior Director Project Development, Fulcrum Sierra Biofuels, LLC.

Ms. Benedetti advised Fulcrum planned to commence the Stage 2 expansion of its Feedstock Processing Facility located in Storey County, Nevada. This will include an additional 29,000 square-feet of building to accommodate the installation of additional processing equipment.

Governor Sandoval inquired whether the waste streams came directly to the company, or through a waste management organization. Ms. Benedetti advised, the trash went through the local waste management transfer station. When Fulcrum was ready to receive a trash shipment it turned on a green light at the front of its facility. The route trucks going past would turn into Fulcrum's facility rather than continuing a quarter mile to the scale house.

Governor Sandoval asked whether the company's process could make landfills obsolete. Ms. Benedetti noted the company could not accept trash such as tires and mattresses, however the process contributed to a significant landfill reduction.

Mr. Klaich asked about the economics of this process. Ms. Benedetti advised Fulcrum's product costs approximately one dollar a gallon to produce. As the feedstock was free the production costs were significantly less than those of fossil fuel.

A MOTION WAS MADE BY MR. KRAMER TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, A PERSONAL PROPERTY TAX ABATEMENT, AND A REAL PROPERTY

AMERICAN OVERSIGHT

ABATEMENT AS DESCRIBED IN AGENDA ITEM 5F. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

G. KRS GLOBAL BIOTECHNOLOGY, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

H. KRS GLOBAL BIOTECHNOLOGY, INC.

- **CATALYST FUND**

Governor Sandoval advised Agenda Items 5G and 5H would be heard together.

Mr. Walsh, LVGEA, presented KRS Global Biotechnology, Inc., and provided a brief overview of the company and abatements sought. KRS Global Biotechnology, Inc. makes custom pharmaceuticals; sterile products such as syringes and IV bags; purified water for drug manufacturing; and a kit used by hospitals and other compounding pharmacies to test their technicians. The company provides its services to patients, surgery centers, ophthalmology clinics, hospitals, universities, and veterinarians nationwide and is committed to being the top provider of these compounding services while developing quality processes that facilitate the highest level of safety for patients of parenteral, enteral, oral, and topical preparations. KRS Global Biotechnology, Inc. is a FDA registered medical device manufacturer and registered 'outsourcer of human drugs' under The Drug Quality and Security Act, a law designed to help protect consumers from exposure to pharmaceutical drugs that may be counterfeit, stolen, contaminated, or otherwise harmful. The project would involve the hire of 50 new employees in at an average hourly wage of $25.00 and a capital investment of $34.5m. Mr. Walsh was joined by Mr. Riccardo Roscetti, President and Chief Operating Officer, KRS Global Biotechnology, Inc.

Mr. Roscetti advised, as a result of the increased demand for the company's products and services, KRS Global Biotechnology, Inc. would be expanding capacity to provide additional manufacturing, research and development, and warehousing operations. The company is currently evaluating the construction of a licensed pharmaceutical manufacturing facility. The new facility would be 150,000 square foot of newly constructed space housing clean rooms, production lines, and warehousing.

Governor Sandoval asked about the roles to be filled at the company’s new facility. Mr. Roscetti advised there were various skill sets sought, one of these being technicians. The company had previously set up a technician training school, in Florida, for pharmacy tech certifications. Mr. Roscetti noted the company would seek opportunities to work with local colleges and universities to train the workforce for its new facility.

Governor Sandoval asked, assuming favorable consideration of its application, would the company be likely to select Nevada. Mr. Roscetti confirmed the company was committed to a Nevada location and noted the company had been attracted to Nevada for its well-trained

AMERICAN OVERSIGHT

workforce, attractive economic environment, and commitment to the biotechnology pharmaceutical space via the UNLV Medical School.

Lieutenant Governor Hutchison asked if UNLV's Medical School has been an integral factor in the company's decision to consider Nevada. Mr. Roscetti confirmed and advised generally, strong medical schools had the talent, production capabilities, and products sought by the company.

Lieutenant Governor Hutchison asked if the company had been in contact with the UNLV Medical School thus far. Mr. Roscetti advised the company planned to make contact regarding collaboration opportunities

A MOTION WAS MADE BY MR. BARRETT TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5G, AND A CATALYST FUND GRANT IN AN AMOUNT NOT TO EXCEED $640,000, AS DESCRIBED IN AGENDA ITEM 5H. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

I. POLARIS INDUSTIRES, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Andrew Haskin, Director of Business Development, Northern Nevada Development Authority (NNDA), presented Polaris Industries, Inc., and provided a brief overview of the company and abatements sought. Polaris Industries, Inc. designs, engineers, manufactures, and markets power sports vehicles worldwide. The company offers ORVs, including all-terrain vehicles and side-by-side vehicles for recreational and utility use; snowmobiles; motorcycles; and low emission, light duty hauling, passenger, commercial, and industrial vehicles, as well as snow bike conversion kit systems. Polaris Industries, Inc. also produces or supplies various replacement parts and accessories and manufactures, distributes, retails, and installs aftermarket parts and accessories for light trucks, jeeps, sport-utility vehicles, and other four-wheel drive vehicles. In addition, the company sells recreational apparel through a network of dealers and distributors, as well as online. The project would create 64 new jobs at an average hourly wage of $21.95 an hour with an approximate investment of $13.6m in capital equipment. Mr. Haskin was joined by Mr. Paul Eickhoff, Senior Director of Distribution, Polaris Industries, Inc.

Mr. Eickhoff advised Polaris Industries, Inc. was considering building a 500,000 square-foot facility in the Lyon County. The proposed project would establish the company's first western United States distribution center.

Governor Sandoval asked whether the company would seek a new or existing facility. Mr. Eickhoff advised the company would be seeking a green field, ground up build.

AMERICAN OVERSIGHT

Governor Sandoval asked, assuming favorable consideration of its application, would the company be likely to select Nevada. Mr. Eickhoff advised a decision was anticipated within the forthcoming few weeks.

Mr. Kramer noted the company's application listed the City of Fernley, as a potential location, and highlighted that the Mayor of Fernley was a committed partner in economic development, and would be a great local partner for the company.

A MOTION WAS MADE BY MR. KLAICH TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5H. THIS MOTION WAS SECONDED BY SECRETARY OF STATE CEGAVSKE. THE MOTION PASSED UNANIMOUSLY.

J. RITCHIE BROS. AUCTIONEERS (AMERICA), INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Ursem, LVGEA presented Ritchie Bros. Auctioneers (America) Inc. (RBA), and provided a brief overview of the company and abatements sought. RBA is the world's largest industrial auctioneer. The company is headquartered in Burnaby, Vancouver, and has 110 locations in 25 countries and 44 auction sites worldwide. RBA has been operating in the State of Nevada since October 29, 1997. The company operates across multiple sectors including transportation, agricultural, material handling, mining, forestry, petroleum, and marine industries. RBA sells, through unreserved public auctions, a broad range of used and unused industrial assets such as equipment, trucks and other assets utilized in the construction. The expansion would include 25 new jobs at an average hourly wage of $22.94 and project capital investment of $3m. Mr. Ursem thanked Ms. Gina Gavin, Director of Economic Development, City of North Las Vegas (NLV), NLV's Economic Development team, and Mayor John Lee for their letter support of RBA's application. Mr. Ursem was joined by Mr. Randy Berry, Senior Vice President of Digital Operations, RBA, and Mr. Connor Humphrey, Vice President, GovPlanet.

Mr. Berry advised the company planned to expand its southern Nevada operations to establish a 169,080 square-foot warehouse facility that would be used to manage the storage and distribution of equipment. The warehouse will be the central processing center in the region handling storage, logistics, inventory management, auction management, and delivery orders.

Governor Sandoval asked, assuming favorable consideration of its application, would the company be likely to expand in Nevada. Mr. Berry confirmed this was the case.

Governor Sandoval where the company new facility would be located. Mr. Humphrey confirmed the new facility would be located in NLV, close enough to leverage the company's existing auction site for certain asset types not requiring significant indoor storage and handling.

AMERICAN OVERSIGHT

Governor Sandoval asked about the company's hiring and recruitment plans. Mr. Berry advised the company would initially seek to fill key warehouse operations positions and would continue to hire warehouse staff as the company built out its operation. This would include supervisors, inventory management coordinators, merchandising, coordinators, receiving clerks, shipping clerks, and other support personnel.

Lieutenant Governor Hutchison inquired about the online aspect of the business. Mr. Berry noted the company had multiple online selling platforms including IronPlanet selling core heavy equipment, construction, and trucks, and GovPlanet which is focused on government assets.

Mr. Kramer abstained from the vote due to potential conflicts.

A MOTION WAS MADE BY DR. HAVINS TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5J. THIS MOTION WAS SECONDED BY MR. SPECHT. THE MOTION PASSED UNANIMOUSLY.

K. SEPHORA USA, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Walsh, LVGEA, presented Sephora USA, Inc. and provided a brief overview of the company and abatements sought. Sephora USA, Inc. is a French chain of cosmetics stores founded in 1969. Featuring nearly 300 brands, along with its own private label, Sephora offers beauty products including makeup, skincare, body, fragrance, nail color, and haircare. Sephora is owned by luxury conglomerate Moet Hennessy Louis Vuitton as of 1997. Sephora USA, Inc. operates approximately 1,900 locations in 33 countries worldwide, with an expanding base of over 430 stores across the Americas. The company also had 590 Sephora locations in JCPenney stores across the US. In addition to the company's number of stores, Sephora offered its products for sale on its website. The project would comprise approximately $36m in capital investment and the hire of 60 employees at an average wage of $24.05. Mr. Walsh was joined by Mr. Jeff Ritacco, Vice President of Logistics, Sephora USA, Inc. and John Lenio, Executive Vice President, CBRE Group.

Mr. Ritacco advised Sephora USA, Inc. was considering opening a 715,000 square-foot distribution facility in NLV. The proposed project would include a new regional distribution center which would ship products to stores and customers located in 11 western states. At full operations, the new distribution center would process approximately $100m in goods a year. Additionally, all employees would be new and there would be no transfer of jobs from one distribution center to another.

AMERICAN OVERSIGHT

Governor Sandoval asked about the company's next steps should it be awarded the abatements sought. Mr. Ritacco advised the company was keen to decide swiftly and noted the Board's approval of tax incentives would greatly assist the company's decision to locate in Nevada.

Governor Sandoval asked when the company planned to be operational at its new site. Mr. Ritacco advised operations were anticipated to commence by July of 2019.

Mr. Specht highlighted the company's focus on hiring veterans or persons with a disability status. Mr. Lenio advised such hires currently made up 15% of the company's Mississippi facility's workforce and the company frequently worked with states and counties to develop and implement training programs. Mr. Specht noted the potential for partnerships with Opportunity Village.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5K. THIS MOTION WAS SECONDED BY LIEUTENANT GOVERNOR HUTCHISON. THE MOTION PASSED UNANIMOUSLY.

6. ABATEMENT APPLICATIONS FOR DIRECTOR APPROVAL:

A. 3PEA INTERNATIONAL, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Ursem, LVGEA, presented 3PEA International, Inc., and provided a brief overview of the company and abatements sought. 3PEA International, Inc. designs and develops payment solutions, prepaid card programs, and processing services under the PaySign® brand name for corporate, consumer, and government applications. The company offers various services, including transaction processing, cardholder enrollment, value loading, cardholder account management, reporting, and customer service through PaySign® platform, a proprietary card processing platform. It also develops prepaid card programs for healthcare reimbursement payments, pharmaceutical co-pay assistance, corporate expense and per diem payments, and donor payments for source plasma and automobile dealership incentives, as well as payroll cards, general purpose re-loadable cards, travel cards, and loyalty rewards cards for the hospitality industry. In addition, the company offers Buy and Bill programs for patients to purchase directly from physician's office or through an infusion center for physician administered therapies; and Survey Instant Rewards card programs for organizations to gather survey data. The company's principal target markets for processing services comprise prepaid card issuers, retail and private-label issuers, small third-party processors, and small and mid-size financial institutions in the United States and internationally. The project would hire 35 new employees at an average hourly wage of $40.20 with a projected $828,000 in capital investment. Mr. Ursem was joined by Mr. Christian Mueller, Controller, 3PEA International, Inc., and Mr. Mark Newcomer, President and Chief Operating Office, 3PEA International, Inc.

AMERICAN OVERSIGHT

Mr. Newcomer advised, in order to accommodate its southern Nevada expansion plans, 3PEA International, Inc. was seeking to relocate from its current 11,541 square-foot space to a 21,000 square-foot facility. The company relocated to Nevada in 2004 with a total of three employees. Since that time, Nevada had afforded the company a great climate to grow in.

Governor Sandoval asked about the company's recruitment and hiring plans. Mr. Newcomer advised, so far, the company had been able to successfully source its workforce locally. These roles had included customer service relationship management, and front and back-end development, and biopharmaceutical sales.

Director Anderson noted the company's approval for an MBT abatement was contingent upon the Department of Taxation's pending determination on the company's status as a financial institution.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6A. DIRECTOR ANDERSON APPROVED THE COMPANY'S APPLICATION FOR A MODIFIED BUSINESS TAX ABATEMENT, PENDING THE OUTCOME OF THE DEPARTMENT OF TAXATION'S DETERMINATION OF THE COMPANY'S STATUS, AS DESCRIBED IN AGENDA ITEM 6A.

B. ALPHA GUARDIAN

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Walsh, LVGEA, presented Alpha Guardian and provided a brief overview of the company and abatements sought. Alpha Guardian is a leader in the residential safe, security and storage industry. The company was established in August 2017 following the announcement that MidOcean Partners was partnering with Cannon Safe, Inc. and simultaneously combining it with Stack-On Products to create a market leader in the residential safe and secure storage sector. Cannon and Stack-On bring together two highly complementary operations. The project would hire 35 new employees at an average wage of $26.92. The company planned to make a capital investment of $181,530. Mr. Walsh was joined by Mr. Jesse Bugarin, Chief Project Office Alpha Guardian and Mr. Roger Jenkins, Vice President of Finance, Alpha Guardian.

Mr. Bugarin advised Alpha Guardian was planning to expand its current Nevada operations. The company was currently renting a 24,000 square-foot facility in southern Nevada. The planned expansion would require a facility of at least 100,000 square feet. The company was also considering relocating its Chicago Stack-On brand operations from Illinois to Las Vegas.

Lieutenant Governor Hutchison asked about the operations at the expanded facility. Mr. Bugarin advised the expansion would primarily accommodate distribution.

AMERICAN OVERSIGHT

Mr. Jenkins noted the company had experienced great success working with UNLV to offer internship programs. One participant in the internship program had been hired by the company upon graduating. Mr. Jenkins also noted the company had a commitment to supporting its employees' learning and growth and had implemented a program called Alpha Guardian University. The program focused on adult literacy. Alpha Guardian University has executed 1,300 hours of training between 2016 and 2018.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6B.

C. CANNAE HOLDINGS, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Walsh, LVGEA, presented Cannae Holdings, Inc., and provided a brief overview of the company and abatements sought. Cannae Holdings, Inc. is a diversified investment company headquartered in Las Vegas. The firm primarily invests in restaurants, technology enabled healthcare services, financial services and more. Cannae's strategic acquisitions contain a mix of majority and minority owned businesses with significant underlying value. These holdings include majority and minority equity investment stakes in a number of entities, including American Blue-Ribbon Holdings, LLC (ABRH), and Ceridian Holding, LLC (Ceridian). In October 2017, the company purchased the shares of T-System Holding, LLC. T-System is a provider of clinical documentation and coding solutions to hospital-based and free-standing emergency departments and urgent care facilities. The project would hire 50 new employees at $36.90. The company planned to make a capital investment of approximately $1.1m. Mr Walsh was joined by Mr. Richard Cox, Executive Vice President and Chief Financial Officer, Cannae Holdings, Inc. and Mr. Gary Amico, Amico and Associates, Inc.

Mr. Cox advised Cannae Holdings, Inc. was considering building headquarter operations adjacent to its existing Las Vegas facility. The project would involve hiring of financial, information technology, and accounting personnel.

Mr. Cox highlighted the company's commitment to Las Vegas and the local community and noted the company was involved in various corporate citizenship and community engagement activities. The executive group of Cannae included Mr. Bill Foley, the lead person of the ownership group responsible for bringing the National Hockey League to Las Vegas and Nevada. The Vegas Golden Knights were associated with the Golden Knights Foundation, an organization that serves as the primary charitable link between the Vegas Golden Knights and the Las Vegas community.

The Folded Flag Foundation was also an organization with an executive board that included Mr. Bill Foley and Mr. Richard Cox, the CFO of Cannae Holdings, Inc. The Folded Flag Foundation's mission was to provide educational scholarships and support grants to the spouses and children of the United States military and governmental personnel who died as a result of

AMERICAN OVERSIGHT

hostile action or in an accident related to U.S. combat operations. The Folded Flag Foundation recently held an event at The Cosmopolitan on March 29, 2018 where it raised more than $50k to help support the families of fallen heroes.

Director Anderson asked whether the company intended to hire locally. Mr. Cox advised the company initially sought to recruit locally. So far, most of the company's workforce had been sourced from Las Vegas, and the company anticipated this continuing to the extent the required talent was available.

Director Anderson inquired whether the company worked with any of the universities for recruiting purposes. Mr. Cox advised the company offered entry level roles and was currently looking at partnerships with UNLV and other local learning institutions. The company also planned to explore collaborations with UNLV to develop internship programs.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6C.

7. WORKFORCE INNOVATION FOR THE NEW NEVADA (WINN) FUND PROGRAM APPLICATIONS - FOR BOARD APPROVAL

A. RENO AREA DATA ANALYTICS - REQUEST FOR APPROVAL TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $300,000

Ms. Stacey Bostwick, Workforce Development Program Coordinator, GOED, introduced Agenda Item 7A and noted GOED has been working with its partners Truckee Meadows Community College (TMCC), NCLab, and Desert Research Institute's AIC to develop a first building block of the Machine Learning option within the Advanced Automation and Robotics track of LEAP Advanced ICT (Information Communications Technology). This building block would address the growing workforce requirements for skills in Data Analytics and would be a decisive contribution to add to and considerably strengthen the talent pool in this field benefitting effectively every industry in Nevada as well as attracting 21st century technology heavy companies to locate in the state. This project was now seeking funding to develop a completely online, hands-on and self-paced learning program (non-credit) and make it available to 500 workers and job seekers, in the Reno area, to provide the skills and knowledge necessary for employment and growth in analytical professions. Ms. Bostwick was joined by Ms. Barbara Walden, Director of Applied Technologies, TMCC, Mr. Vasily Kamyshanov, the Chief Operating Officer, NCLab, and Mr. Russ Riggs, the Chief Operating Officer, Lift 361.

Ms. Walden noted, as Nevada's economy became more diverse, it brought the challenge of upskilling the workforce. The Panasonic Preferred Pathway (P3) training program was an example of meeting those workforce challenges via innovative programs and delivery methods. This had enabled Panasonic to hire the trained employees it required at the Tesla Gigafactory and allowed for Nevadans with no advanced manufacturing experience to receive the training necessary to work in one of Nevada's most promising and emerging industries. Another

AMERICAN OVERSIGHT

identified challenge was building Nevada's technology sector pipeline. Coding, cyber security, and data analytics were greatly in-demand skill sets. Additionally, these skills were not unique to technology, and crossed every industry sector including marketing, health care, business, and government.

Mr. Kamyshanov advised NCLab had developed online courses for STEM disciplines and was currently part of a Nevada Ready 21 Program for middle schools. NCLab is also working with Clark County, Washoe County, and rural areas of Nevada. This project would enable NCLab to qualify students to become workforce ready for technology based careers.

Mr. Riggs advised his company focused exclusively on analytics. The company offered custom analytics based on client's specific needs. The company's services were highly specialized and attracting talent had been difficult in the past. Mr. Riggs stated the project would introduce more data analytics into schools and equip more students with skills in this area.

Governor Sandoval inquired about the process of signing up for the program. Ms. Walden advised, for the purposes of the WINN funds, there would be an intake process including an application for the funding and assessment of an applicant's overall objective in participating and completing the program.

Director Anderson inquired about the program development and maintenance costs. Mr. Kamyshanov advised online education has a solid propriety platform to deliver complex knowledge to people, and this course would be developed together with participating companies to really match the job demand. Once the set was developed the costs to support it would be low. Once developed, it could easily scale to an unlimited number of students.

Director Anderson about the program timeframes. Ms. Waldon noted promotion and intake would commence within two months with a targeted course commencing by October 2018. Each course would take 80-120 hours for completion and it was estimated funding will be fully utilized by June 30, 2019. Program outcomes would be reported and evaluated using self-reported data gathered from participants and employer partners to understand the placement and wage gains experienced as a result of program completion.

A MOTION WAS MADE BY DR. DANA BENNETT TO APPROVE THE REQUEST OF RENO AREA DATA ANALYTICS TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $300,000 AS DESCRIBED IN AGENDA ITEM 7A. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

B. CLARK COUNTY HEALTH AND TECHNOLOGY - REQUEST FOR APPROVAL TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $700,000

Ms. Bostwick introduced Agenda Item 7B. Ms. Bostwick advised this program proposed to develop both a workforce increase in nursing and home health and infuse new technology training and the necessary skills to become effective bridges between clinical and community

AMERICAN OVERSIGHT

settings. This would help improve transitions from clinical to community settings, with strong potential to improve population health outcomes, reduce health disparities, and to control health care costs. Partners of the program include BrightStar Home Health, Hallmark Home Care, Homewatch Caregivers, Home Care Assistance, and the Nevada State Board of Nursing. The proposed strategy established increased capacity to on-ramp into healthcare through Home Healthcare or Nursing Assistant programs with new infusions of technology certifications. Beyond the strong economic value of creating new health jobs in southern Nevada, this approach would support efforts to mitigate the current economic burden incurred by the state due to chronic diseases and hospital readmissions. Students completing the program would represent the future of health care with skills and competencies in the use of technology to improve patient and community health outcomes. Ms. Bostwick was joined by Ms. Luz Castro, Health Care Specialist, College of Southern Nevada (CSN), Ms. Catherine Prato-Lefkowitz, Director of Nursing Education, Nevada State Board of Nursing, and Ms. Cynthia Knight, Director of Client and Caregiver Services, Homewatch Caregivers.

Ms. Castro explained the CSN Division of Workforce and Economic Development program strived to deliver a high-standard curriculum that taught and promoted all competencies and principles required for qualified home health aides and Certified Nursing Assistants (CNA). CNA programs are highly recognized by industry leaders and home health aides were among the fastest growing jobs in the industry. There were several barriers to the required education, the the primary being tuition. CSN also needed to innovate its programs with technology competencies to upskill and deliver a high-quality service to employers and the community. As the program certificates would be offered both online and in-person, students would have flexibility regarding different modes of matriculation. Several employers had already expressed interest in partnering with CSN and hiring its students upon completion of this program.

Ms. Knight advised there was currently a severe shortage of qualified candidates and this had inhibited growth of the business. Homewatch Caregivers had a contract with the Veterans Administration to provide care for veterans in their own home and the company was looking to CSN to develop qualified candidates as quickly as possible.

Ms. Catherine Prato-Lefkowitz advised a CNA certification was a valuable entry point into any health care occupation or profession. Many CNA students, particularly in high schools, had goals of becoming nurses, physicians, or dentists. Increasing the technological literacy for CNAs and nurses would be an effective path to increase competencies. Technology is commonplace in health care. However, it is not as commonplace in the training that CNAs and nurses receive.

Dr. Havins inquired about the tuition costs for a CNA program and the portion of this to be covered under the WINN program. Ms. Bostwick advised tuition for the CNA program was approximately $2,400. The program was structured to cover 100% of this fee.

Lieutenant Governor Hutchison asked how many tuitions would be covered by the program application. Ms. Bostwick advised the current application would cover 250 individuals. However, the objective would be to consistently seek opportunities for integration. In conjunction with WINN there may be scope to leverage additional funding sources for tuitions and increases in technology infusion and certification.

AMERICAN OVERSIGHT

A MOTION WAS MADE BY MR. BARRETT TO APPROVE THE REQUEST BY THE CLARK COUNTY HEALTH AND TECHNOLOGY TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $700,000 AS DESCRIBED IN AGENDA ITEM 7B. THIS MOTION WAS SECONDED BY DR. HAVINS. THE MOTION PASSED UNANIMOUSLY.

8. WORKFORCE INNOVATION FOR THE NEW NEVADA (WINN) FUND PROGRAM APPLICATIONS - FOR DIRECTOR APPROVAL

A. RENO AREA LOGISTICS AND MANUFACTURING RE-ENTRY INITIATIVE-REQUEST FOR APPROVAL TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $75,000

Ms. Bostwick introduced Agenda Item 8A and advised the objective of this program was to provide career development opportunities to individuals involved in the justice system, in northern Nevada, with a direct pathway to higher wage employment. This proposal would create trained, professional individuals, who otherwise may not have the opportunity to work in these industries, and who would meet the needs of local employers to expand their businesses. Quality Plastics, High Mountain Door and Trim, Reno Custom Crating, Sierra Meat and Seafood and Iron had all expressed a need for trained and skilled employees to sustain and expand their Manufacturing and Logistics businesses. Phase One would be launched in May 2018 and include a cohort of 30 participants. Ms. Bostwick was joined by Ms. Camille Vega, Re-Entry Coordinator, TMCC, Mr. Jonathan Wilson, Facility Manager, Northern Nevada Transitional Housing, and Mr. Bill Owensby, IT Director, Quality Plastics.

Ms. Vega stated current data showed one in three Americans had some sort of criminal record. These individuals had minimal support in re-entering society post incarceration. One-half of those released were incarcerated within their first year. Two-thirds were re-incarcerated within three years, and over five years, three-quarters were re-incarcerated. One of the greatest factors in reducing re-incarceration was meaningful employment.

Mr. Wilson advised he joined northern Nevada Transitional Housing in August 2017. Prior to this he'd been with the Department of Corrections for almost 15 years and had noted the lack of transitional support for inmates. Mr. Wilson and Ms. Vega had discussed the potential for certificate programs. Additionally, Mr. Wilson noted he had identified employers interested in participating in the program. Sought after skills pertained to manufacturing, logistics, food preparation, and food safety.

Mr. Bill Owensby advised Quality Plastics advocated for inmate re-entry with 40% of its currently staff being previously incarcerated. The typical new hires from these re-entry programs were reliable and consistent. Additionally, being gainfully employed could contribute to elevated self-worth and lower risks of reoffending. Mr. Owensby advised the company hired him from a restitution center two-years earlier. He now held the position of IT Director.

AMERICAN OVERSIGHT

Governor Sandoval highlighted his position as Chairman of the Board of Prison Commissioners and noted at times parole eligible inmates would select not to parole as they had no job or place to go. Governor Sandoval thanked the employers involved in the application and noted the importance of providing resources, tools and skills for a productive life.

Mr. Don Soderberg commended the program and noted the Nevada Department of Employment, Training and Rehabilitation (DETR) had also been involved in re-entry initiatives. Feedback often highlight how dependable and enthusiastic these employees were with some of the best employees being participants of re-entry programs.

Governor Sandoval asked if the program would also be available to women. Ms. Vega stated the first cohort would solely include 30 males. Best practices in re-entry program development and implementation had identified that men and women were best supported in separate training programs. Ms. Vegas advised the intention was to have a cohort of women in the second semester, pending additional funding.

Governor Sandoval thanked Ms. Vega and encouraged the group to come back to present a second application. Ms. Vega noted the objective was to do so in four months.

DIRECTOR ANDERSON APPROVED THE REQUST FOR RENO AREA LOGISTICS AND MANUFACTURING RE-ENTRY INITIATIVE TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $75,000.

9. DIRECTOR'S REPORT - REVIEW AND DISCUSSION

Director Anderson advised GOED's International Trade Division recently completed an advanced planning trip to Ghana, Botswana, and South Africa to prepare for a Governor-led trade mission that would take place in summer 2018. The trip was a success as partnership opportunities were identified in several sectors including trade, water technology, higher education, smart city technology, technology transfer, and good governance.

At the National Governors Association North America Summit in May 2018, Governor Sandoval and Premier Rachel Notley of Alberta, Canada signed an MOU focused on collaboration in the development, testing, and commercialization of drone technology. This followed a successful trade mission to Nevada of over fifty Alberta businesses in February 2018.

Mr. Randy Walden, GOED's Advanced Manufacturing Industry Specialist and Chair of State Apprenticeship Council; oversaw the approval of over 600 apprenticeships which included a recently announced 425 Panasonic employees. The apprentices would be attending classes at TMCC utilizing the flexible delivery manufacturing courses developed for the P3 program last year. This would be the first group of apprentices and would followed in the upcoming months by participants from Tesla as well as other manufacturers in Northern Nevada. Apprenticeships played a vital role in providing a highly qualified workforce for new and existing companies in Nevada.

AMERICAN OVERSIGHT

On April 20, 2018 GOED submitted a list of recommended census tracts, Governor Sandoval, to be designated as Opportunity Zones. Nevada's identification process has been held up as a 'best practice' by Policy Map who was involved in the creation of opportunity zone policy.

The Nevada Film Office (NFO) was working on revamping its online locations directory. The new online locations directory had been designed to better connect potential film locations around Nevada with production companies, giving local businesses more control and more opportunity. The directory was in the final stages and should launch in late May 2018 with an associated marketing campaign commercial promoted on Facebook, Twitter, and potentially local television.

Dr. Barclay was working with the Touro Center for Disaster Life Support, UNLV, the College of Southern Nevada, health industry corporate employers and other stakeholders to develop a series of certificates in Technology for Emergency Preparedness and Disaster Response. These certificates will be offered from high school to graduate level and will contribute to building and strengthening a technology-ready workforce.

Director Anderson welcomed Ms. Bostwick, as GOED's new WINN Coordinator. Ms. Bostwick is based in GOED's Las Vegas office.

10. STATE OF NEVADA UNEMPLOYMENT RATE UPDATE - as established by the Research and Analysis Division of the Nevada Department of Employment, Training and Rehabilitation.

Agenda item 10. was for information only. GOED is committed to providing this information for each Board meeting. There were no questions or comments regarding this item.

11. PUBLIC COMMENT

Mr. Cory Hunt, Deputy Director, GOED provided public comment from Carson City. Mr. Hunt stated May 18, 2018 would be his last day at GOED. Mr. Hunt thanked Governor Sandoval for the great privilege of serving the State of Nevada during his roles with the Governor's Office and GOED. Mr. Hunt also thanked Mr. Steve Hill, Mr. Paul Anderson, Mr. Bob Potts, the GOED Board, Nevada's RDA's, and GOED's staff. Mr. Hunt noted he looked forward to continuing opportunities and projects that would support Nevada's growth.

Governor Sandoval wished Mr. Hunt the best in his future endeavors and commended his contribution to the State of Nevada and dedication to the multiple projects he'd been involved in.

Assemblywoman Irene Bustamante-Adams, Chief Strategy Officer, Workforce Connections, provided comment from Las Vegas and thanked the GOED Board for supporting the Clark County Health and Technology WINN Fund application. Assemblywoman Bustamante-Adams also thanked Dr. Gillian Barclay, Healthcare Industry Specialist, GOED for bringing a global vision to Nevada and competitively positioning the state in terms of serving the employer.

AMERICAN OVERSIGHT

12. ADJOURNMENT

A MOTION WAS MADE BY DR. HAVINS TO ADJOURN THE BOARD MEETING. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

Governor of Nevada
555 E. Washington Ave #5100
Downtown, NV 89101

AMERICAN OVERSIGHT

Attn: Mr. Mike Willden, Chief of Staff
governor@govmail.state.nv.us

Re: Opportunity Zones Program

Dear Governor Sandoval:

As you know, the recently-passed federal tax reform legislation created the Opportunity Zones Program that allows the governor of each state to designate up to 25% of low-income census tracts in their state as Opportunity Zones.

The purpose of this letter is to request the designation of Census Tract #32003000301 as an Opportunity Zone. We own approximately 3.28 acres of property in this area. The designation of this Census Tract as an Opportunity Zone would create enormous potential for economic development in Clark County and attract much-needed investment in key local infrastructure projects to this area.

Please designate Census Tract 32003000301 as an Opportunity Zone.

Sincerely,

S.P. Capital Investors, LLC
a California limited liability company

Opportunity Zones By FedEx as well
Message:
Dear Governor Sandoval:

I respectfully request that you designate the following census tracts as Opportunity Zones in order to facilitate investment and development in these low-income areas:

Census Tract: 32003000700
Census Tract: 32003000401

As you know, the federal legislation referred to as the Tax Cuts and Jobs Act of 2017 created the

AMERICAN OVERSIGHT

Opportunity Zones Program that allows the governor of each state to designate a certain number of low-income and eligible contiguous census tracts as Opportunity Zones. This would allow investors in these areas to defer taxes on gains made on investments in Qualified Opportunity Funds that directly benefit these zones for many years or even permanently, depending on how long investments are held.

Please designate the qualified tracts listed above as Opportunity Zones in order to drive long-term capital to these areas.

Very truly yours, Tilman J. Fertitta
Chairman, President & CEO

Attachments: OZone Nomination Instructions.3.5.18 (003).pdf

Andrew,

BnI just found the unique code, but wanted to make you aware of the nomination process. CDFI is using their Awards Management Information System (AMIS) for submission of the workbooks. Due to GOED's emails ending with a .com and not .gov we will not be recognized as an Authorized Rep. I'm not sure if your office is already registered with an AMIS, but if not you'll need to create an account.

I've attached the nomination instructions, there are step by step instructions starting on page 18 of the instructions. Doesn't look like an overly burdensome process but better to figure out today then scrambling tomorrow.

Subject: RE: [EXTERNAL]RE: State Unique Opportunity Zone Code

Hi, Derek – I have resent the letter to Governor Sandoval to Michael Willden and Ryan McGinness, whom we have listed as the governor's chief of staff and DC representative, respectively. That letter includes the Unique Code.

On a separate note, I don't know who will be submitting on behalf of the State but since I see that your email has a .com address, I wanted to point out that part of our verification that a nomination reflects that of the governor, as indicated in the Nomination Instructions, is a requirement that the AMIS account holder have a state government email address.

Please let me know if you have any questions.

AMERICAN OVERSIGHT

1. Introduction

On December 22, 2017, Congress amended the Internal Revenue Code (IRC) by adding Sections 1400Z–1 and 1400Z–2. These sections provide tax benefits to investors that reinvest certain specified gains into Qualified Opportunity Funds that in turn deploy these resources into population census tracts designated as Opportunity Zones.

The authority to implement IRC §§1400Z-1 and 1400Z-2 has been delegated to the Internal Revenue Service (IRS). The CDFI Fund is supporting the IRS with the Opportunity Zone nomination and designation process under IRC §1400Z-1.

This document provides the Chief Executive Officers (CEOs) of States (including the District of Columbia and U.S. possessions) with instructions for nominating low-income community (LIC) population census tracts and eligible non-LIC contiguous population census tracts in their States as Qualified Opportunity Zones (QOZs) for purposes of IRC §1400Z–1. In general, the CEO of a State must nominate census tracts to be QOZs not later than March 21, 2018 (the determination period). Furthermore, the Secretary of the Treasury has 30 days beginning on the date a nomination is received to certify the nomination and designate the nominated tracts as QOZs (the consideration period). See IRS Rev. Proc. 2018-16 Internal Revenue Bulletin 2018-9 for more information.

2. Extension Requests

A State CEO may request, and receive, an extension of the QOZ determination period for an additional 30 days to April 20, 2018. In addition, a State CEO also may request, and receive, a 30-day extension of the consideration period.

If the State wishes to extend either the determination or consideration period, or both, the State must submit a formal request signed by the State CEO on executive letterhead. This letter should be sent as an attachment by electronic mail to OpportunityZone@cdfi.treas.gov.

The letter from the State CEO should include the following language:

> [Title]
> [State CEO]
> [Address]
>
> The Honorable Steven T. Mnuchin
> Secretary
> U.S. Department of the Treasury
> 1500 Pennsylvania Avenue, NW
> Washington, DC 20220
>
> Dear Mr. Secretary:
>
> The [State/Commonwealth/District/Territory] of [State] formally requests under section 1400Z-1(b)(2) of the Internal Revenue Code that the Secretary extend for an additional 30 days the [determination and/or consideration] period to nominate a population census tract for designation as a qualified opportunity zone.

AMERICAN OVERSIGHT

3. Identity of Tracts Eligible for Designation as Qualified Opportunity Zones

Based on 2011-2015 American Community Survey (ACS) 5-Year data from the United States Census Bureau (Census Bureau), there are a total of 31,848 LIC population census tracts (LIC Tracts) and 10,312 eligible contiguous non-LIC population census tracts (Eligible Non-LIC Contiguous Tracts) that meet the statutory requirements for designation as QOZs.

In the fall of 2017, the Census Bureau released the 2012–2016 ACS 5-Year data. However, due to the March 21, 2018, deadline for State CEOs to nominate census tracts for designation as QOZs, and the complexities of incorporating the most recent data information into the eligibility process, the Opportunity Zone Nomination Tool utilizes the 2011-2015 ACS 5-Year data. In addition, the 25 percent limitation on the number of designations in a State will be determined using the 2011–2015 ACS 5-Year data.

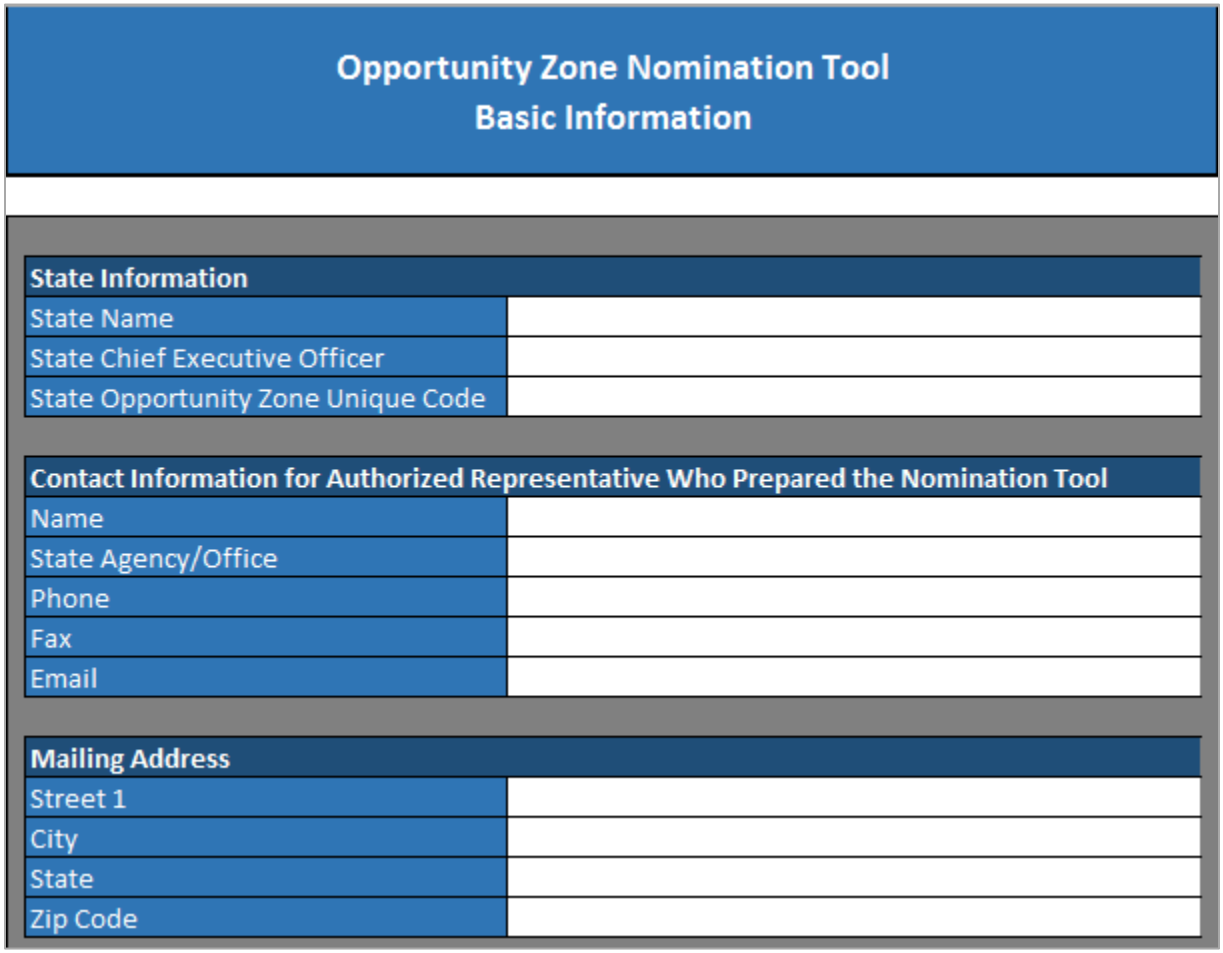
In the event that a census tract deemed eligible under the 2011-15 ACS 5-Year data is no longer eligible under the more recent 2012-16 ACS 5-Year data, States may rely upon the census tracts listed as eligible in the Opportunity Zone Nomination Tool provided to State CEOs as eligible tracts for the purposes of IRC §1400Z-1.

In addition, States may nominate census tracts eligible under the 2012-16 ACS 5-Year data that are not already identified in the Nomination Tool. See additional instructions below for nominating census tracts using 2012-2016 ACS 5-Year data.

4. Nominating Qualified Opportunity Zones

To nominate QOZs, a State CEO should use the Opportunity Zone Nomination Tool (the Nomination Tool), which can be found on the CDFI Fund website at https://www.cdfifund.gov/Pages/ozonestateresource.aspx. The Nomination Tool includes separate lists of all LIC Tracts and Eligible Non-LIC Contiguous Tracts, including Eligible Non-LIC Contiguous Tracts whose eligibility is based on contiguity with a LIC Tract located in a different State.

In addition to the Nomination Tool, the State will need to submit a letter from the State CEO, on executive letterhead, confirming that the census tracts identified in the Nomination Tool represent the official nomination of the State CEO. See additional instructions below.



4.1 Nomination Tool

4.1.1 Information on the State and Authorized Representative

In the worksheet labeled "Information," enter the information requested for the State and the Authorized Representative who prepared the Nomination Tool. In addition to the name of the State and the State CEO, **the Authorized Representative must enter the "State Unique Opportunity Zone Code."** This code can be found in the March 5, 2018, letter from CDFI Fund Director Annie Donovan to the State CEO transmitting information on the Nomination Tool and is intended to ensure that the information submitted is authorized by the State CEO.

4.1.2 State Level Summary

The worksheet in the Nomination Tool labeled "SUMMARY" shows the total number of LIC Tracts in each State, the maximum number of census tracts that can be nominated as QOZs, and the maximum number of Eligible Non-LIC Contiguous Tracts that can be included in that nomination. For example in the figure below, Alabama has a total of 629 LIC Tracts. The maximum number of total tracts that can be nominated as QOZs in Alabama is 158 (25 percent of the 629 LICs, rounded up to the next whole number) and the maximum number of Eligible Non-LIC Contiguous Tracts that can be included in the total nominated is 8 (5 percent of 158, rounded up to the next whole number).

6	Arizona	671	168	9	0	0	0	0	0		
7	Arkansas	340	85	5	0	0	0	0	0		
8	California	3516	879	44	0	0	0	0	0		
9	Colorado	501	126	7	0	0	0	0	0		
10	Connecticut	286	72	4	0	0	0	0	0		
11	Delaware	80	25	2	0	0	0	0	0		
12	District of Columbia	97	25	2	0	0	0	0	0		

This worksheet will also auto-populate based on the number and type of census tracts a State selects for nomination and can be used to test whether the nomination falls within the statutory limits on the number of nominations. (See additional instruction below.)

4.1.3 Nominating LIC Tracts

To nominate an LIC Tract, States should use the worksheet in the Nomination Tool labeled "1) LICs." This worksheet includes a list of all LIC Tracts and can be filtered by State. To nominate a specific LIC Tract, find the census tract and type or select the word "Yes" next to that census tract in Column C (labeled "Enter "YES" Below to Nominate LIC).

The example below shows that an Authorized Representative has selected the State "District of Columbia" (using the Filter in the red square below and typing the name of the State in the text box) and has nominated census tracts 11001000201 and 11001000202 by typing the word "YES" in the adjacent column.

Figure 3: 1) LICs

A	B	C
Click arrow to filter state		
State	Low Income Communities (LICs)	Enter "YES" Below to Nominate LIC
District of Columbia	11001000201	YES
District of Columbia	11001000202	YES

4.1.4 Nominating Eligible Non-LIC Contiguous Tracts

To nominate an Eligible Non-LIC Contiguous Tract, States should use the worksheet in the Nomination Tool, labeled "2) Contiguous." This worksheet includes a list that can be filtered by State, of all Eligible Non-LIC Contiguous Tracts. Next to the list of Eligible Non-LIC Contiguous Tracts is a list of all LIC Tracts whose status as a QOZ would make the contiguous tract eligible for nomination and designation. In cases where an Eligible Non-LIC Contiguous Tract is adjacent to more than one LIC Tract, at least one of the listed LIC Tracts must be nominated to make the non-LIC Tract eligible for nomination. Column D notes whether the Eligible Non-LIC Contiguous Tract may include eligibility based on contiguity with an LIC Tract in a different State.

AMERICAN OVERSIGHT

To nominate a specific Eligible Non-LIC Contiguous Tract within the same State, find the census tract and type or select the word “Yes” in Column E (labeled “Enter "YES" Below to Nominate Eligible Non-LIC Contiguous Tract). In addition, in Column F, enter the tract number of the corresponding contiguous LIC Tract that the State is nominating. The contiguous LIC Tract also must be nominated in the “1) LICs” worksheet, following the steps for nominating LIC Tracts described above.

The example below shows that a user has selected the State “District of Columbia” (using the filter feature and typing the name of the State in the text box) and has nominated census tracts 11001000100 and 11001000202 by typing the word “YES” in Column E. In addition, for the nomination of census tract 11001002102, the user identified census tract 11001009508 in Column F as the contiguous LIC Tract that is also being nominated and has been selected in the “1) LICs” worksheet.

Figure 4: 2) Contiguous

A	B	C	D	E	F
Click arrow to filter state State	Eligible Non-LIC Contiguous Tracts	Contiguous LICs (NOTE: An Eligible Non-LIC Contiguous Tract may be nominated only if one or more of its corresponding Contiguous LICs is also nominated)	Additional Cross-State LIC Tract?	Enter "YES" Below to Nominate Eligible Non-LIC Contiguous Tract	Enter the Tract Number of Corresponding Contiguous LIC Nominated
District of Columbia	11001000100	11001000202,11001005600	NO	YES	11001000202
District of Columbia	11001002102	11001009508,11001001901,11001002201	NO	YES	11001009508

States may also nominate Eligible Non-LIC Contiguous Tracts whose eligibility is based on a LIC Tract in another State by using the worksheet in the Nomination Tool, labeled “3) Cross-State.” This worksheet includes a list that can be filtered by State of all such tracts, next to a list of the LIC Tracts, and the State in which each tract is located, whose status as a QOZ would make the contiguous tract eligible for nomination and designation. Column E notes whether the Eligible Non-LIC Contiguous Tract may also be eligible based on contiguity with an LIC Tract in the same State.

IMPORTANT: Please note that an Eligible Non-LIC Contiguous Tract that qualifies based on contiguity with another State may be nominated only if the corresponding contiguous LIC Tract is nominated by the State in which the contiguous LIC Tract is located. Cross-state nominations will require coordination and confirmation that the contiguous State has nominated the contiguous LIC Tract.

To nominate a specific Eligible Non-LIC Contiguous Tract, find the census tract and type or select the word “Yes” in Column F (labeled “Enter "YES" Below to Nominate Eligible Cross-State Non-LIC Contiguous Tract). In addition, in Column G, enter the tract number of the corresponding contiguous cross-state LIC Tract that has been or will be nominated by the contiguous State.

The example below shows that a user selected the State “Alabama” (using the filter feature and typing the name of the State in the text box) and nominated census tract 01069041800 in Alabama by typing the word “YES” in Column F and 12063210100 in Column G. For this tract

AMERICAN OVERSIGHT

to be eligible for nomination, the State should confirm that Florida has also nominated the LIC Tract 12063210100.

Figure 5: 3) Cross-State

A	B	C	D	E	F	G
Click arrow to filter state		NOTE: An Eligible Non-LIC Contiguous Tract may be nominated only if one or more of its corresponding Contiguous LICs is also nominated. Cross-state nominations require confirmation that the contiguous state has nominated the Contiguous LIC.				
Eligible Non-LIC Contiguous Tract State	Eligible Non-LIC Contiguous Tract	Contiguous Cross-State LICs	LIC State	Contiguous In-State LIC Available?	Enter "YES" Below to Nominate Eligible Cross-State Non-LIC Contiguous Tract	Enter the Tract Number of Corresponding Contiguous Cross-State LIC Nominated
Alabama	01069041800	12063210100, 13099090500	Florida, Georgia	NO	YES	12063210100

4.1.5 Nominating LIC Tracts Based on 2012-2016 ACS Data

As noted above, the census tracts listed in the Nomination Tool are based on 2011-2015 ACS 5-Year data and are eligible tracts for the purposes of IRC §1400Z-1, meaning that if a State nominates one of the tracts identified in the Nomination Tool as being either an eligible LIC Tract or an Eligible Non-LIC Contiguous Tract, a State's nomination of that tract will not fail to be certified on the grounds that the tract is no longer eligible under the 2012-16 ACS 5-Year data.

If a State wishes to nominate an LIC Tract that is not identified in the Nomination Tool but that is eligible under the 2012-2016 ACS 5-Year data, the State may do so using the worksheet labeled "4) 2012-2016 ACS."

Please note that 2012-2016 ACS 5-Year data may be used to nominate only LIC Tracts that meet the definition of an LIC Tract based on poverty and/or the median family income of that tract. Nominations of Eligible Non-LIC Contiguous Tracts must be based on the 2011-2015 ACS 5-Year data as presented in the Nomination Tool.

To nominate a specific LIC Tract based on the 2012-2016 ACS 5-Year data, select the State and census tract in Columns A and B, and type or select the word "Yes" next to that census tract in Column C (labeled "Enter "YES" Below to Nominate LIC). In addition, to support the State's claim that the selected census tract meets the definition of an LIC, enter the following additional information on that tract (see Census Factfinder for ACS 2012-2016 data sources[1]):

- 2012-2016 Tract Poverty Rate (Column E)[2]
- 2012-2016 Tract Median Family Income (Column F)[3]
- 2012-2016 State Median Family Income (Column G)[4]
- 2012-2016 Core Based Statistical Area (CBSA) Median Family Income (Column H)[5]

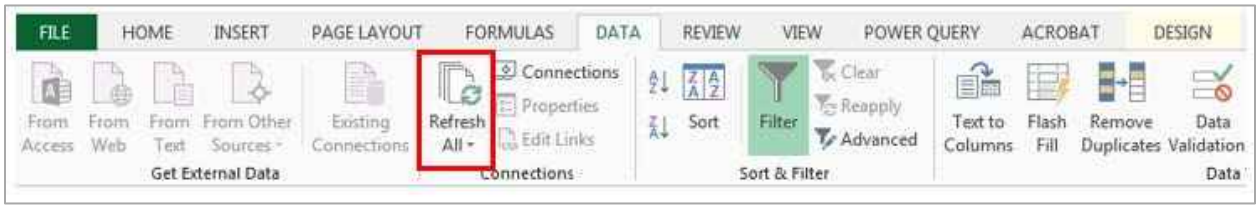
[2] U.S. Census Bureau ACS variable S1701.
[3] U.S. Census Bureau ACS variable B19113 for census tracts.
[4] U.S. Census Bureau ACS variable B19113 for states.
[5] U.S. Census Bureau ACS variable B19113 for Core Based Statistical Areas.

AMERICAN OVERSIGHT

- Metro/Non-Metro (Column I) [6]



4.1.6 Tract Number Changes

The worksheet labeled "Tract Number Changes" includes a list of selected census tracts whose numbering was changed by the US Census Bureau between the 2010 census tract definitions and the 2015 census tract definitions. States may use either set of numbers. These changes do not include tracts with post-2010 geographic boundary changes.

4.1.7 Testing Nominations in the Summary Worksheet

After the State selects its nominations by completing the worksheets in the Nomination Tool, the nomination can be tested by returning to the Summary worksheet and clicking the "Refresh All" button in the "Data" tab in the menu ribbon. The Summary table will then indicate the number of LIC Tracts and Eligible Non-LIC Contiguous Tracts nominated and whether the nomination falls within the statutory limits.

Figure 6: Data Menu Ribbon, "Refresh All"

If the total number of tracts nominated (as determined by adding the numbers in Columns E through H, and as indicated in Column I) do not exceed the statutory limit indicated in Column B, then Column J will show that the nomination passes the 25 percent test. Similarly, if the total number of Eligible Non-LIC Contiguous Tracts nominated (as determined by adding the numbers in Columns G and H) do not exceed the statutory limit indicated in Column D (or 5 percent of the total tracts nominated if the State does not maximize its nomination), Column K will indicate that the nomination passes the 5 percent test. In contrast, if in either case the number of tracts nominated exceed the statutory limits, the worksheet will indicate that the nomination fails one or both tests.

The example below shows that the District of Columbia nominated 16 LIC Tracts and two Eligible Non-LIC Contiguous Tracts. The worksheet indicates that this passes the 25 percent test because the 18 tracts nominated is less than the maximum of 25 tracts allowable for the State. In this case, the State still can nominate seven additional tracts. However, the worksheet also indicates that the nomination fails the 5 percent Contiguous Tracts test. The two Eligible Non-LIC Contiguous Tracts nominated exceeds the statutory limit of Eligible Non-LIC Contiguous Tracts, which can make up no more than 5 percent (rounded up to the next whole number) of the total nomination (or no more than two Eligible Non-LIC Contiguous Tract for the District of Columbia if the total nomination consists of at least 21 tracts).

[6] See OMB BULLETIN NO. 17-01: Revised Delineations of Metropolitan Statistical Areas, Micropolitan Statistical Areas, and Combined Statistical Areas, and Guidance on Uses of the Delineations of These Areas. https://www.whitehouse.gov/omb/bulletins/

AMERICAN OVERSIGHT

Figure 7: Refreshed Summary Tab

	A	B	C	D	E	F	G	H	I	J	K
1	Please note that the worksheet tests provided below are solely for the convenience of the State and to provide assistance with the nomination process, and are not determinative. The Internal Revenue Service will make the final determination and designation of each State's Opportunity Zones after reviewing the State's nomination.										
2	FORMULAS DATA Refresh All Connections Properties Edit Links

In this case, the State could return to the Contiguous worksheet of the Nomination Tool and deselect one of the nominated tracts, and nominate an additional LIC Tract in its place, or nominate at least two additional LIC Tracts. After doing so, returning to the Summary worksheet and refreshing the results the worksheet would indicate that the new nomination passes the test.

Please note that the worksheet test is provided solely for the convenience of the State and to provide assistance with the nomination process and is not determinative. The Internal Revenue Service will make the final determination and designation of each State's Opportunity Zones.

4.2 Letter from the State CEO

Once the Nomination Tool is complete, the State CEO must confirm that the census tracts identified in the Nomination Tool represent the official nomination of the State CEO. This may be done in the form of a letter, on executive letterhead, signed by the State CEO. The letter from the State CEO should include the following language:

[Title]
[State CEO]
[Address]

The Honorable Steven T. Mnuchin
Secretary
U.S. Department of the Treasury
1500 Pennsylvania Avenue, NW
Washington, DC 20220

Dear Mr. Secretary:

AMERICAN OVERSIGHT

Section 1400Z-1(b)(1) of the Internal Revenue Code provides that a State's chief executive officer may nominate a limited number of low-income community population census tracts and population census tracts that are contiguous to low-income communities for designation as qualified opportunity zones not later than the end of the determination period. The determination period ends March 21, 2018, unless there has been a request for an extension until April 20, 2018, by the chief executive officer of a State under section 1400Z-1(b)(2) of the Code. This letter serves as notification to the Secretary that the [State/Commonwealth/District/Territory] of [State] formally nominates the tracts identified in the accompanying Opportunity Zone Nomination Tool for designation as qualified opportunity zones based on Revenue Procedure 2018-16 published in the Internal Revenue Bulletin 2018-9 on February 26, 2018.

5. Visualizing Individual Census Tracts

As an added convenience and tool for selecting their nominations, States may use the CDFI Fund's Community Investment Mapping System (CIMS) to visualize LIC Tracts and Eligible Non-LIC Contiguous Tracts on a map. To use CIMS, click the link above or go to https://www.cims.cdfifund.gov/preparation/?config=config_nmtc.xml.

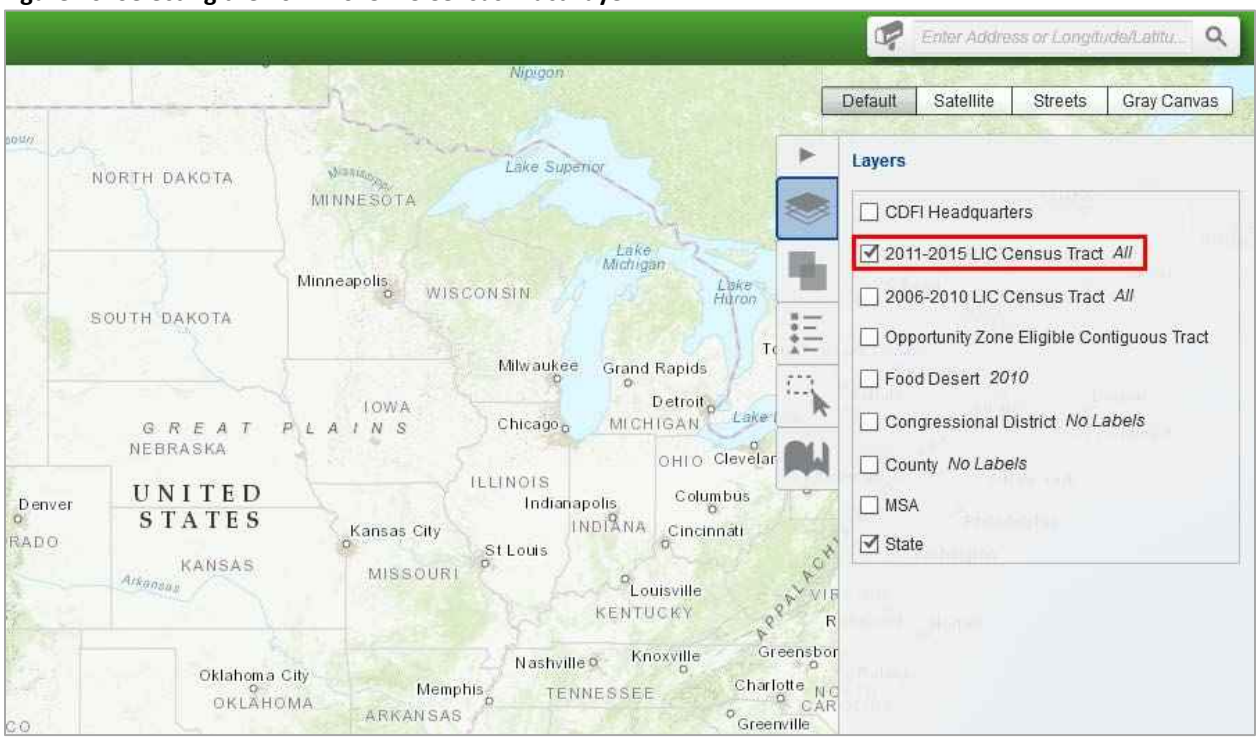

Figure 9: CIMS

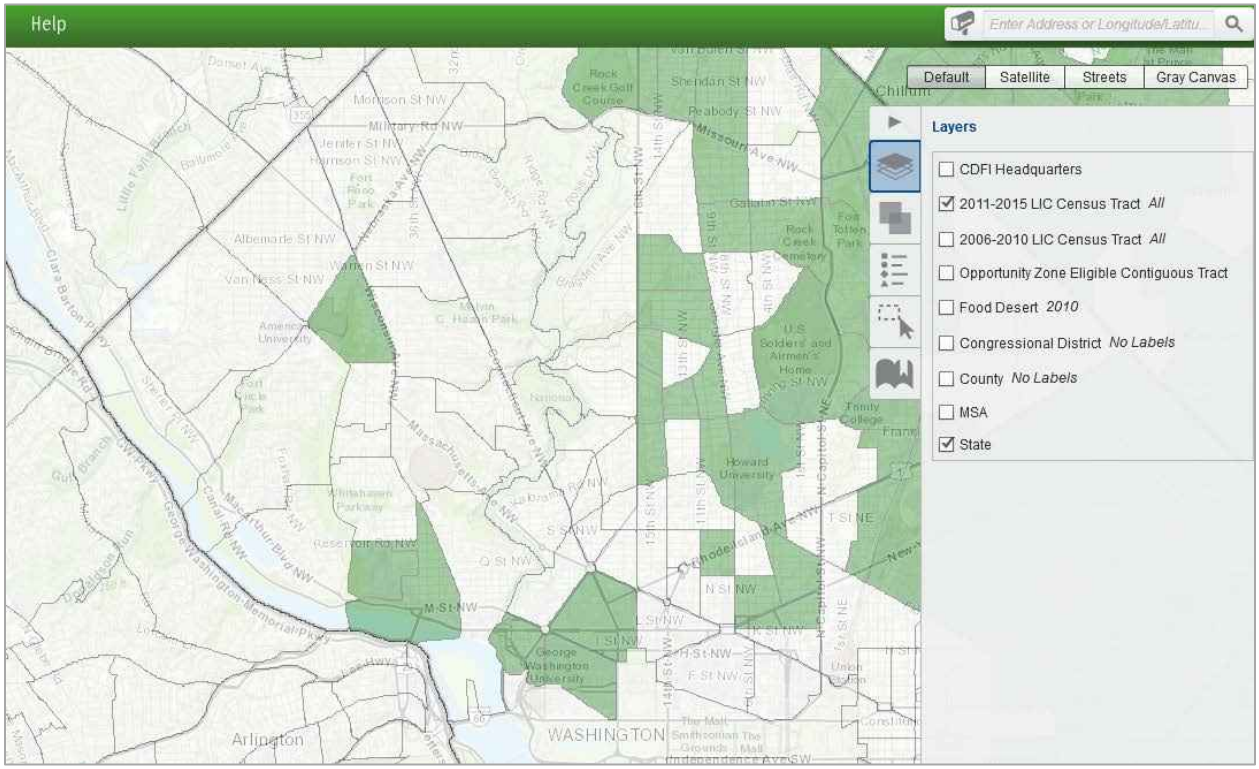
To view LIC Tracts, click on the "Layers" tab on the menu on the right hand side of the screen and select "2011-2015 LIC Census Tract."

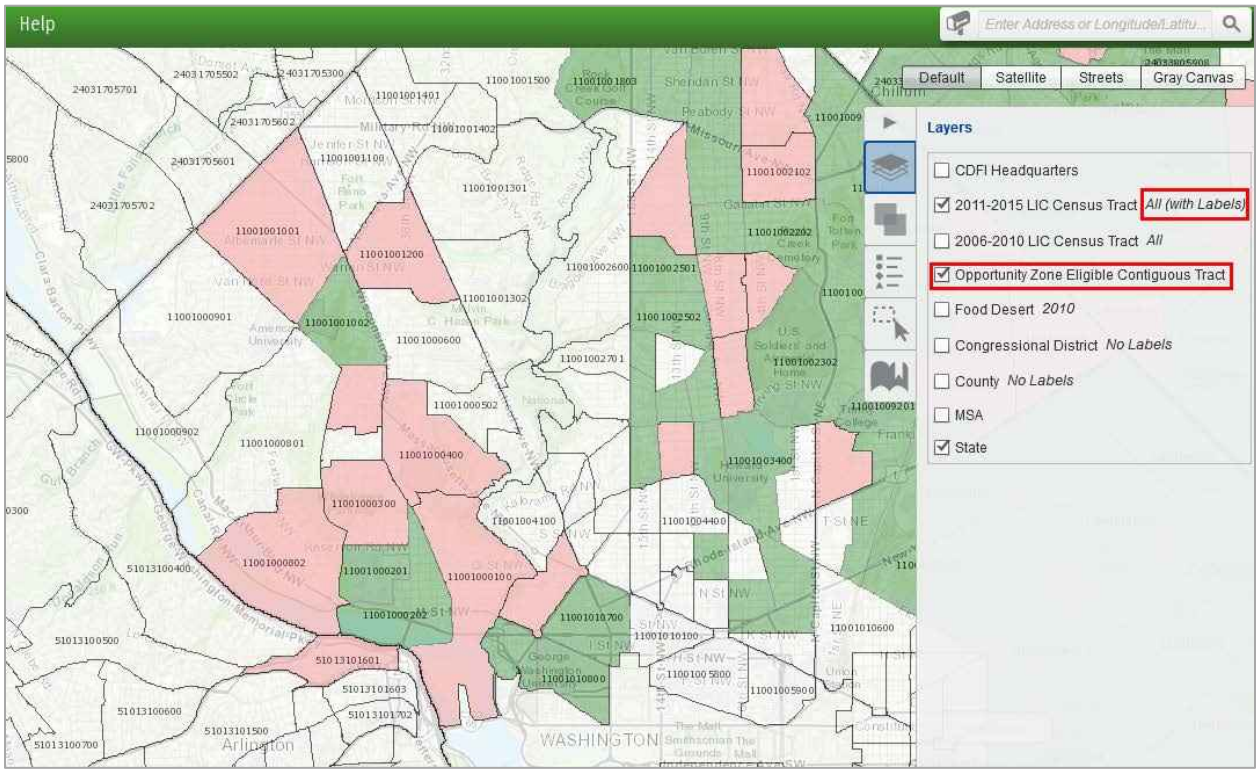


AMERICAN OVERSIGHT

Figure 10: Selecting the 2011-2015 LIC Census Tract Layer

After zooming in to a specific area on the map, LIC Tracts will appear in green.

Figure 11: 2011-2015 LIC Census Tract View



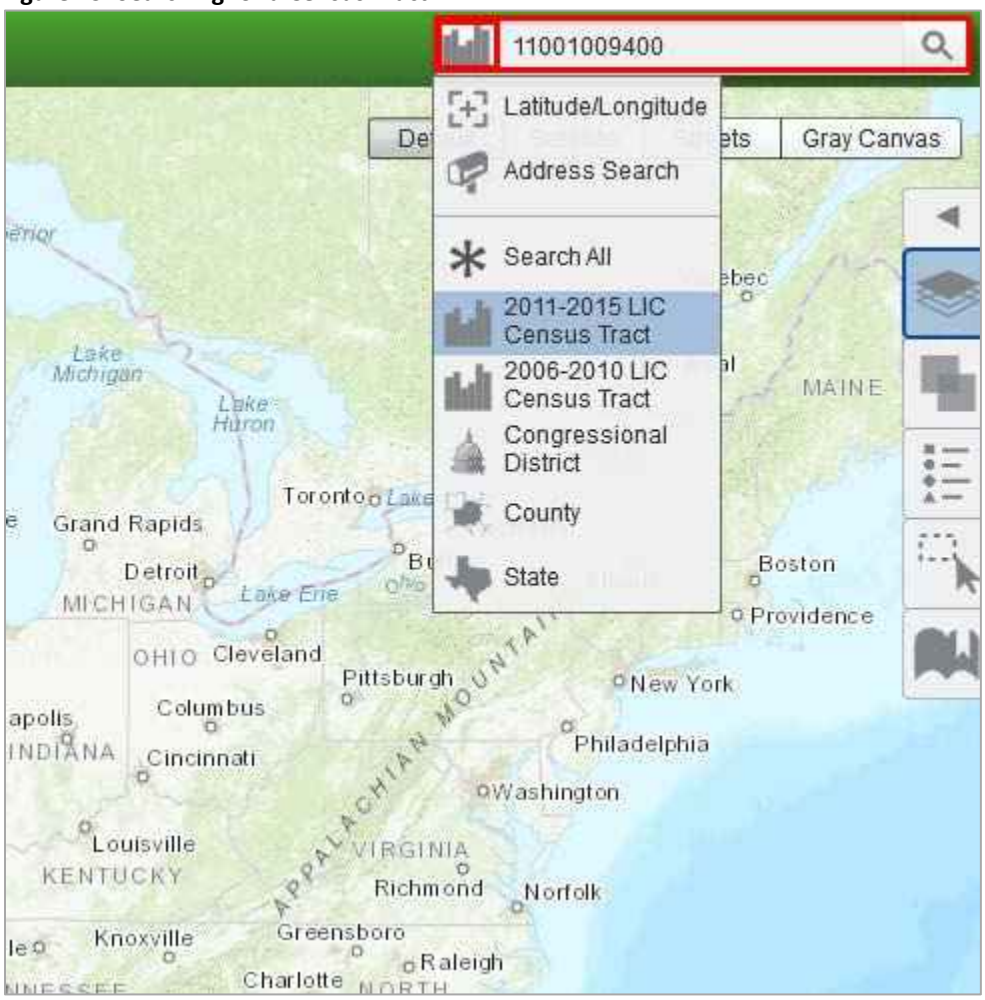
AMERICAN OVERSIGHT

Layers are the mechanism used to display geographic datasets in the CIMS mapping application. The Layers tab allows users to show the list of available map layers and toggle the visibility (on or off) of any of the available layers. Users should be aware that in CIMS numerous layers of geography (county, tract, and individual addresses, for instance) can be displayed on the screen at the same time.

To view Eligible Non-LIC Contiguous Tracts, click on the "Layers" tab and select "Opportunity Zone Eligible Contiguous Tract." Eligible Non-LIC Contiguous Tracts will appear in red.

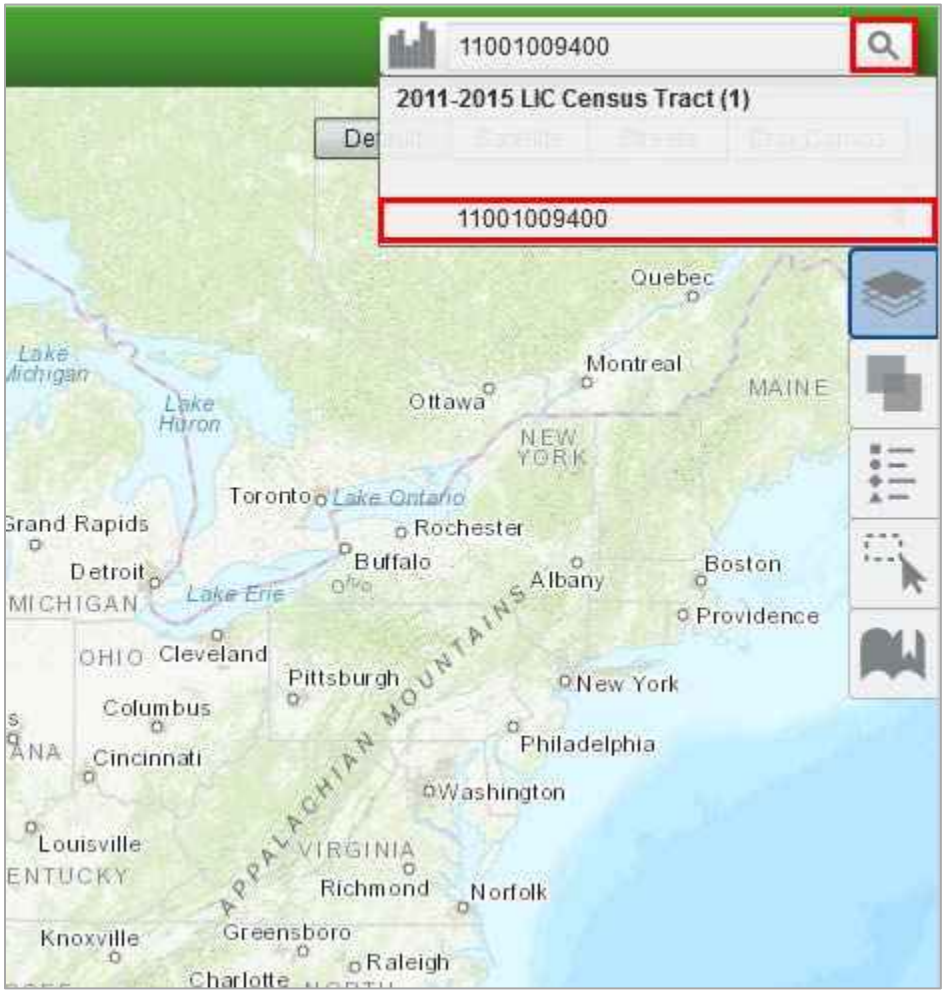
To view census tract numbers select "All (with labels)" next to the "2011-2015 LIC Census Tract" option within the Layers tab. The 11-digit census tract numbers will appear labeled in the CIMS map as shown in the figure below.

Figure 12: Opportunity Zone Eligible Contiguous Tracts with Labels



5.1 Selecting a Census Tract

To select and zoom in to a specific census tract, click on the mailbox on the left side of the search bar and select "2011-2015 LIC Census Tract." Enter one of the 11-digit census tract numbers for a LIC Tract or Eligible Non-LIC Contiguous Tract, found in the Nomination Tool. In the example below, census tract 11001009400 in the District of Columbia was entered in the search bar and 2011-2015 LIC Census Tract was selected. After clicking on the magnifying glass, one tract was found.

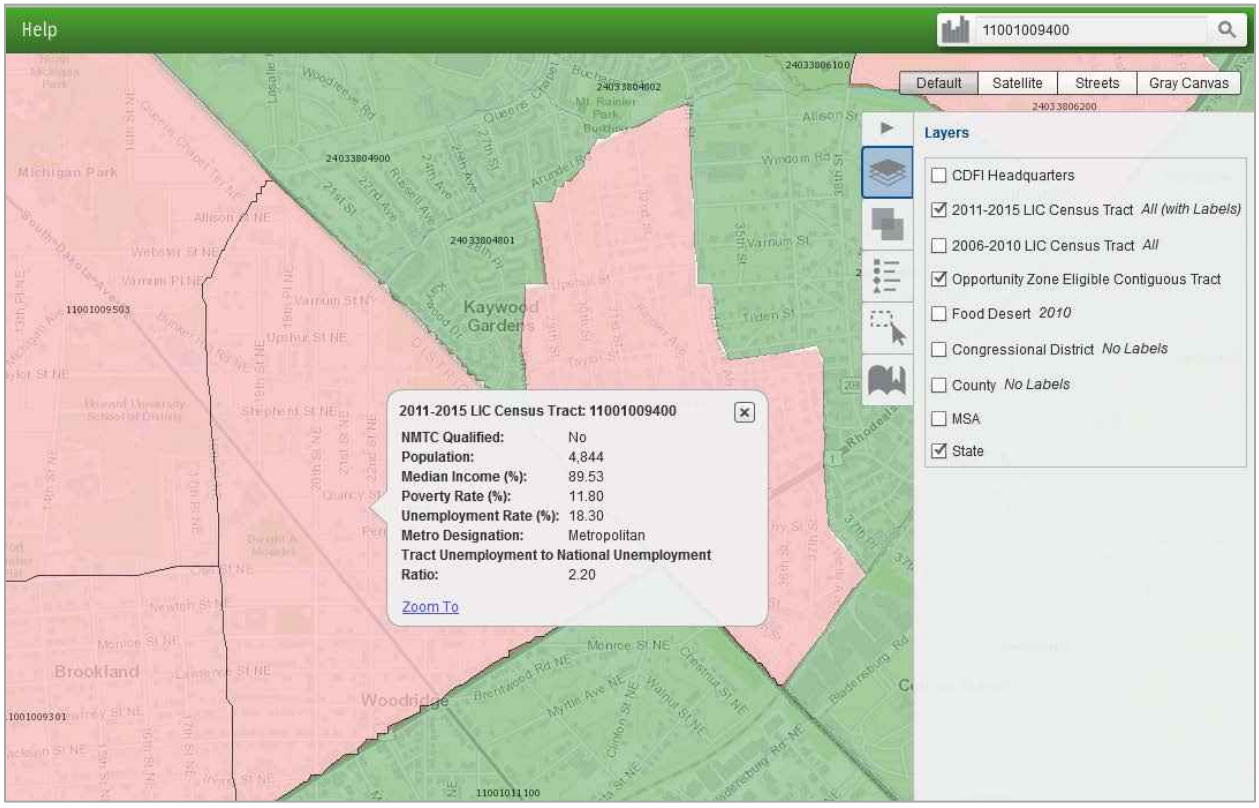


AMERICAN OVERSIGHT

Figure 13: Searching for a Census Tract

AMERICAN OVERSIGHT

Figure 14: Selecting a Census Tract



5.2 Map of a Census Tract

By clicking on the tract number under "2011-2015 LIC Census Tract (1)", the map will zoom in on the results of the 11-digit census tract ID entered in the search bar as shown in the figure below.

AMERICAN OVERSIGHT

Figure 15: Map of Census Tract

AMERICAN OVERSIGHT

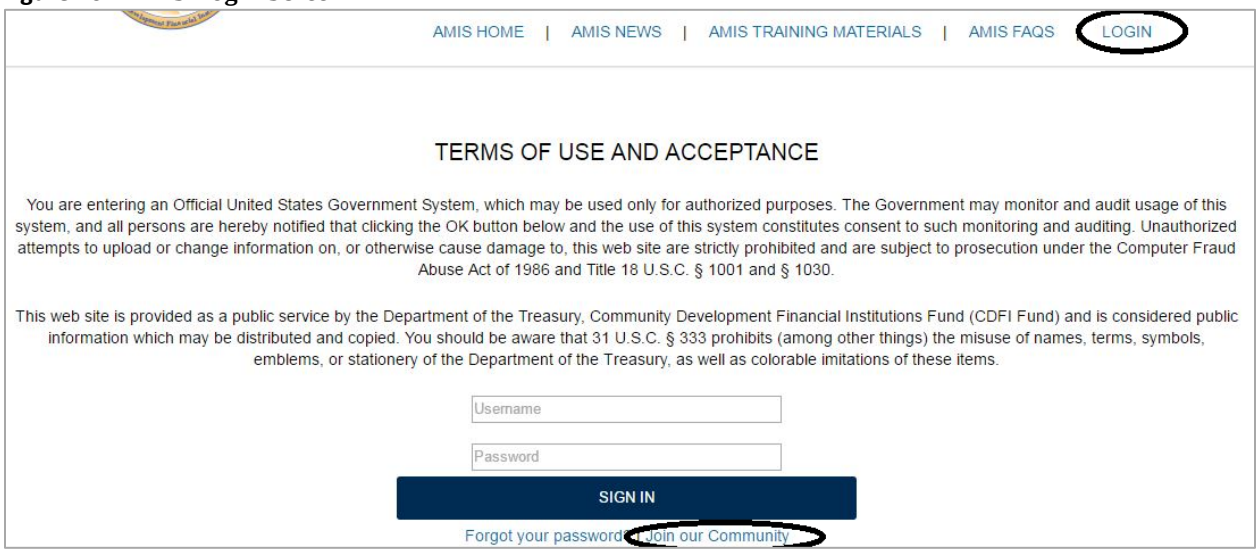
6. Submitting a Nomination

The CDFI Fund is using its Awards Management Information System (AMIS) for States to submit their QOZ nominations. States will use the AMIS Service Request feature to submit all required documentation, including the Opportunity Zone Nomination Tool.

In order to use the AMIS Service Request feature, a State must register an organization in AMIS. The organization may be the office of the State CEO or the office or agency of the Authorized Representative completing the Nomination Tool. Additionally, Authorized Representatives submitting the QOZ nominations must be registered as organization "Contacts" in AMIS. This document provides step-by-step instructions, along with screen shots, to explain and guide the registration and submission processes.



If you encounter any problems with the registration or submission processes, please contact the CDFI Fund AMIS Help Desk at AMIS@cdfi.treas.gov or 202-653-0422.

6.1 The AMIS Registration Process

6.1.1 Registering a New Organization and the First Contact

To register a new organization in AMIS, the registering user accesses the AMIS Landing Page and selects the login tab in the top right corner. This will display the AMIS "Terms of Use and Acceptance" and the text boxes for logging into AMIS.

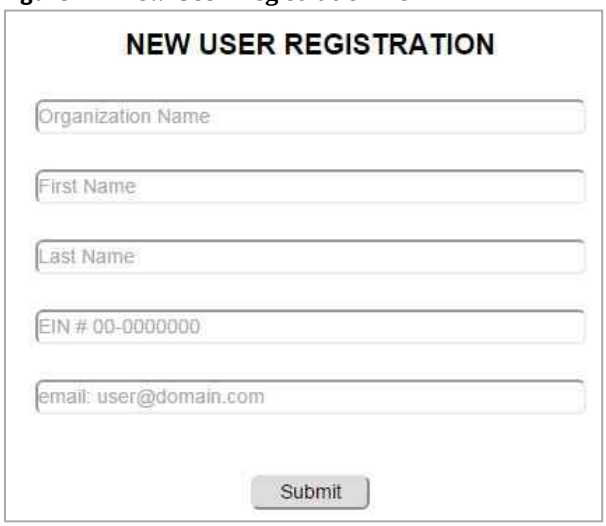


Figure 16: AMIS Login Screen

Underneath the "Sign In" button, the registering user selects the "Join our Community" link to begin the registration process. AMIS displays the New User Registration form.

AMERICAN OVERSIGHT

Figure 17: New User Registration Form

The registering user completes and submits the registration form, including Organization Name, First and Last Name of the Contact, the Organization's EIN, and **a State government email address** for the Authorized Representative. **(Note: Accounts created with a non-State government email address will not be recognized as that of an Authorized Representative for the purposes of submitting a QOZ nomination on behalf of a State CEO.)** Upon submission, AMIS displays a "Thank you for registering" message and sends the following "create password email message" to the email address provided on the registration form. Note that the email address must be unique within AMIS. The AMIS Username for the registering user is the user's email address with four digits appended to it. The Username is included in the email message.

Figure 18: Create Password Email Message

AMERICAN OVERSIGHT

Selecting the link in the email displays the AMIS "Change Your Password" page, where the registering user creates the password for the AMIS account. The password must be at least 8 characters, and contain letters, numbers, and at least one special character from the following:

! # $ % - _ = + < >

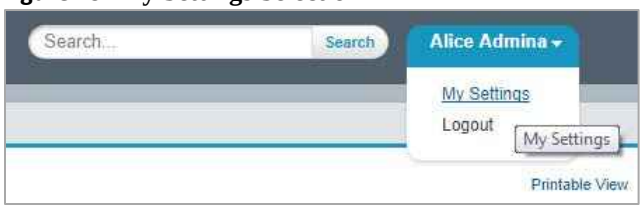
After entering the new password, the registering user is logged into AMIS. Note that there are three Contact types in AMIS: Admin User (full control); User (same as Admin User, but cannot create or change the permissions of other Contacts); and Viewer (read-only). The registering user is made an Admin User Contact for the newly created organization.

6.1.2 Changing the Organization's Time Zone

AMIS creates all users in the Eastern Standard Time Zone (i.e., GMT-05:00). The CDFI Fund recommends that States not on Eastern Standard Time correct their time zone. To change the organization's time zone, perform the following steps:

1. Select the My Settings option from the drop-down list that appears under your name in the top right corner of the screen.

Figure 19: My Settings Selection



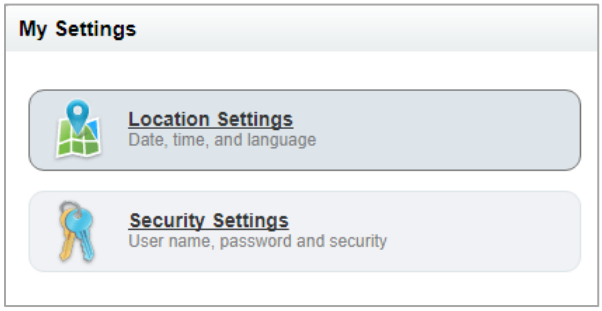


Figure 20.

2. This displays the AMIS Settings options. Select Location Settings.

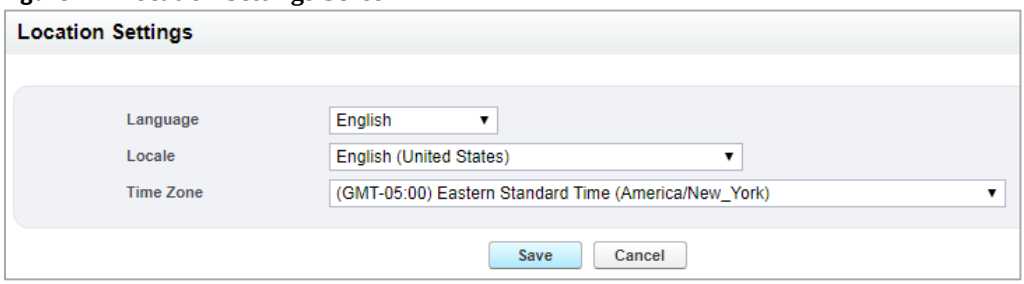

Figure 20: My Settings Screen

3. This displays the Location Settings option. Select the relevant time zone from the drop-down and click Save.

AMERICAN OVERSIGHT

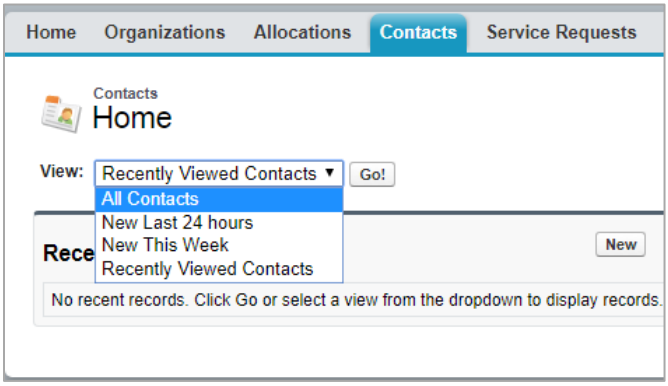
Figure 21: Location Settings Screen

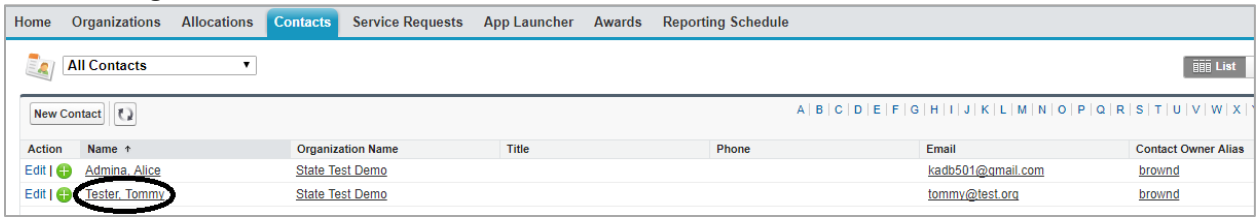
6.1.3 Registering Additional Contacts



Additional Contacts for an organization can be created in one of two ways. The preferred way is for the new user to go to the AMIS Login Page and click the "Join our Community" link. This will display the New User Registration page (see Figure 17: New User Registration Form).

The new user completes and submits the registration form. Upon submission, AMIS creates a Contact record (profile of Viewer) for that user for the organization requested. The new Contact has read-only permissions until an Admin User elevates the Profile to User or Admin User.

To elevate the Profile, the Admin User performs the following steps:



1. Go to the Contacts tab, select All Contacts from the drop-down, and click the Go! Button.

Figure 22: All Contacts View

2. Click on the name of the Contact.

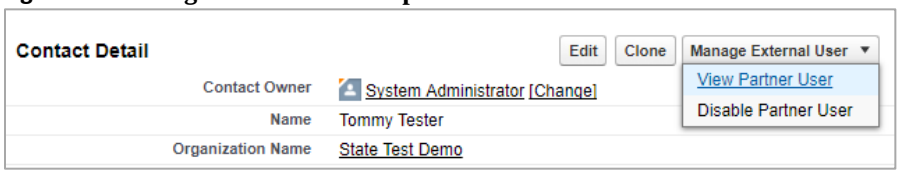


Figure 21: Organization List of Contacts

3. This displays the Contact Detail Page. Select View Partner User from the Manage External User drop-down.

AMERICAN OVERSIGHT

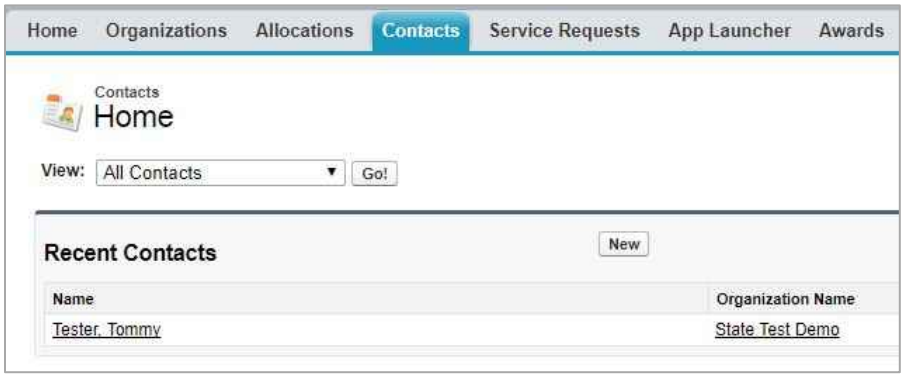
Figure 22: Manage External User Options – View Partner User

4. This displays the User Detail page. Click Edit, change the Profile setting, and click Save. For purposes of submitting designated Opportunity Zones, the CDFI Fund recommends that all Contacts be made Admin Users.

Figure 23: Manage External User Edit Screen



The new user will now have the appropriate type of access based on the Profile selected.

6.1.4 Creating a New Contact Manually

The second way to create a new Contact is for an Admin User to create the Contact manually. To create a new Contact, the Admin User performs the following steps:

1. Go to Contacts tab and click on the New button.

Figure 26: New Contact Button

2. This displays the Contact Edit page. Complete the information for the new Contact and click Save. In AMIS, the red bar indicates a required field.

AMERICAN OVERSIGHT

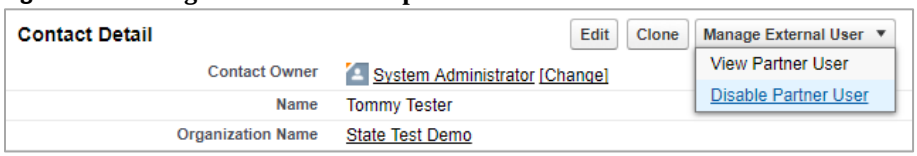
Figure 24: Contact Edit Page



3. This creates the new Contact, but does not assign a Profile to the new Contact. Follow the steps in section 6.1.3 to make the new Contact an Admin User, User, or Viewer.

6.1.5 Disabling Contacts

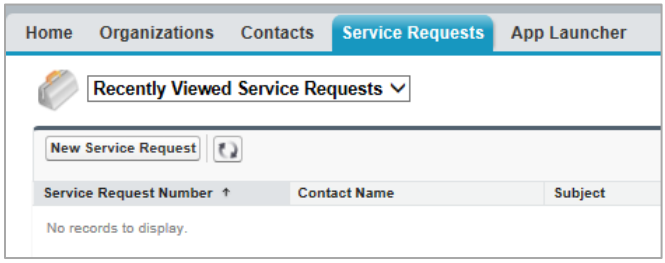
Within AMIS, Contacts cannot be deleted or removed, but they can be disabled by an Admin User. A disabled Contact cannot log into AMIS. To disable a Contact, the Admin User performs the following steps:

1. Follow steps 1 and 2 from Section 6.1.3 to select the Contact to be disabled.
2. This displays the Contact Detail Page. Select Disable Partner User from the Manage External User drop-down.

Figure 25: Manage External User Options – Disable Partner User

The Contact no longer has access to AMIS.

6.2 The Nomination Submission Process



Once a State has registered an organization in AMIS and the relevant Contacts have been created, a Service Request can be submitted with the State's nomination of Qualified Opportunity Zones.

Once logged into AMIS, a user performs the following steps to create and submit a Service Request.

1. Go to the Service Request tab and select the New Service Request button.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-001280

Figure 29: Creating a Service Request

2. The Select Service Request Record Type page is displayed. Leave the default Record Type of "General Inquiry" and click the Continue button.

Figure 30: Select Service Request Record Type Page

3. The Service Request Detail page is displayed. AMIS initializes some fields for you. AMIS sets the Contact Name and Organization Name to your name and organization. AMIS also sets the Status to *New*, the Service Request Origin to *Web*, and the Priority to *Medium*. You need only to complete three fields, plus attach documents. The first field is Type, and it is located in the Additional Information section. For the Type field, select the value "Opportunity Zones Designation" from the drop-down list. Leave the Status, Service Request Origin, and Priority fields to their default values.

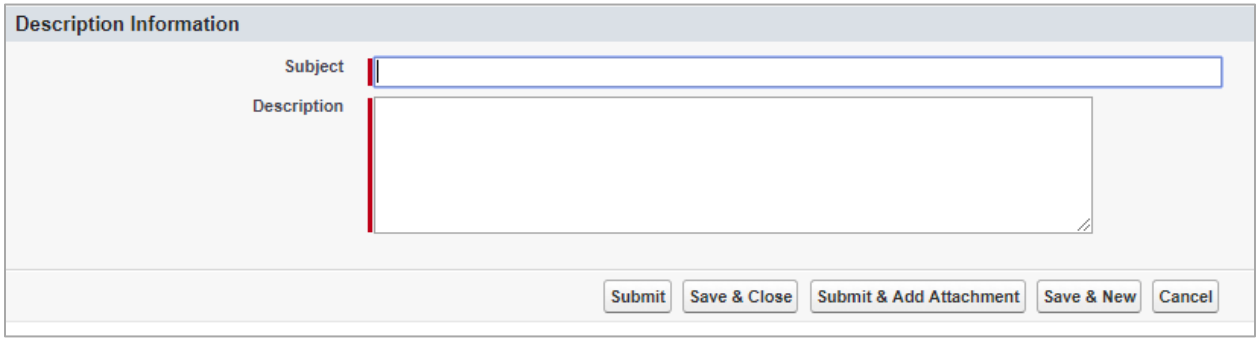

Figure 26: Service Request Additional Information

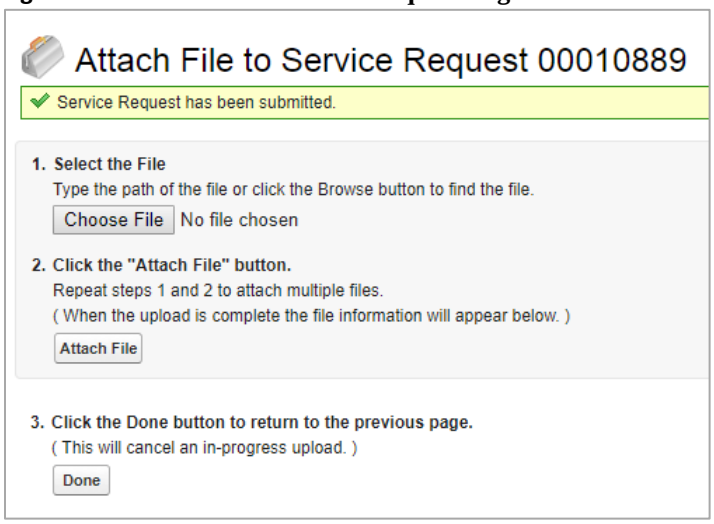
4. The last two required fields are the Subject and the Description. Enter "Qualified Opportunity Zone Nomination by <<State Name>>" for both the subject and the description.

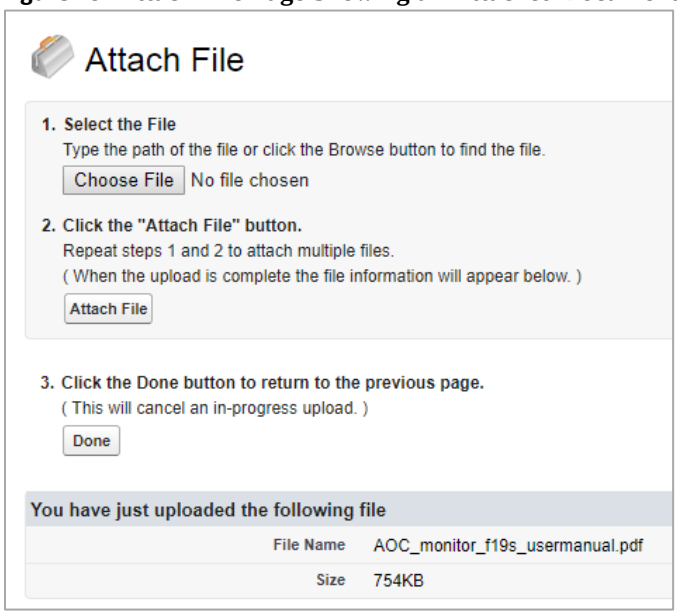


AMERICAN OVERSIGHT
NV-DA-20-0615-A-001281

Figure 27: Service Request Description Information

5. Click the "Submit & Add Attachment" button, which gives you the option to add attachments to the Service Request prior to submission. The Attach File to Service Request page is displayed. It provides the unique Service Request ID for your submission (i.e., 00010889 in the example below).

Figure 28: Attach File to Service Request Page



<u>DOCUMENTS TO ATTACH:</u> States should attach a completed Opportunity Zone Nomination Tool along with a letter from the State CEO, on executive letterhead, confirming the nomination.

6. To attach a document, click the Choose File button. This allows you to browse your computer for the document to attach. Once chosen, click the Attach File button. You will receive a message that the file is being attached, then you will see the name of the document displayed below the instructions, as shown in Figure 35. With a Service Request, you can attach only one document at a time; however, you can repeat the process (Figure 33, Steps 1 and 2) as many times as needed.

AMERICAN OVERSIGHT

Figure 29: Attach File Page Showing an Attached Document

7. Once all of the required documents have been attached, verify that the file name(s) is displayed below the instructions and then click the Done button. Please do not click the Done button until you see the file name displayed below the instructions. Clicking Done before the files are properly attached will cancel the attachment, but you will not receive any message that the attachment was canceled.

This completes the submission of your Opportunity Zones nomination. As stated above, if you encounter any problems with the registration or submission processes, please contact the CDFI Fund AMIS Help Desk at AMIS@cdfi.treas.gov or 202-653-0422.

Andrew,

Good morning. I'm trying to locate a "State Unique Opportunity Zone Code" that was on a letter from March 5th from the CDFI to the Governor. Do you have a copy of that letter? If not, I'll try to reach out to the Treasury to get that code. I need it as part of the submission for the Nomination tool. See below per the instructions.

4.1.1 Information on the State and Authorized Representative
In the worksheet labeled "Information," enter the information requested for the State and the Authorized Representative who prepared the Nomination Tool. In addition to the name of the State and the State CEO, **the Authorized Representative must enter the "State Unique Opportunity Zone Code."** This code can be found in the March 5, 2018, letter from CDFI Fund Director Annie Donovan to the State CEO transmitting information on the Nomination Tool and is intended to ensure that the information submitted is authorized by the State CEO.

Hi Derek,

I hope all has gone well working out the final adjustments on the OZ nominations. I am looking forward to the final designation list. I know you are busy today finalizing this through the governor and then getting them into the treasury system so let me know if I can help.

Also, I just want to mention to you that I was talking to Marc Shultz about NMTC a week ago and he mentioned that he knows you. Marc is with Snell &Wilmer Law and he is based in Phoenix. We started talking about the Opportunity Zones and shared some enthusiasm for this new program. Marc is working with a few investors that are already taking steps to start their Opportunity Funds. Phoenix is ahead of the game and will likely attract significant OZ investment like they

AMERICAN OVERSIGHT

have for NMTC by thinking ahead of the curve. Marc has a presentation on the OZ program and he would be happy to come to Vegas to conduct a presentation and meet with economic development professionals and parties interested in creating funds. I think this could be a great opportunity to help us get ahead as well. I have enjoyed presenting with Marc before and he is good and unintimidating for these complicated programs. So our thought is maybe GOED would like to pull together a presentation on the OZs. We were thinking that maybe you would like to present from the GOED perspective, Marc from the detail program perspective, one of his fund operators from the investment perspective, and possibly one more group that could add value. I really think this could be a great idea, but my bosses said we should pass that ball to you so you can run with it… meaning we don't want to step on any toes and it is really a GOED program. So I am offering my support and help for this idea of inviting Marc and an investor to town for a day setting up a presentation/panel (we can likely host this here at the NSBC if you like). I would also suggest and facilitate specific meetings between certain local district economic development professionals and potential fund development entities to get things moving as well. Marc was even suggesting early May.

I apologize for tossing this at you on such a busy day, but I thought if you wanted to give a thumbs up I could look at getting the ball rolling while you finish up the nomination process.

Hopefully you have time to let me know your thoughts.

I hope you're both having a great day. We had a change to the proposed proclamation this morning. I attached the updated version along with the other documents I sent yesterday.

Will you please share these with the Governor at your earliest convenience? I want to make sure we're able to address any of his or your questions in a timely manner. It's hard to believe, but the event is coming up next week already.

Please let me know if either of you have any questions.

Thank you for everything!

Andrew and Christina

I've attached some documents for the Governor's review for the upcoming Tech Summit. There may be some changes to the timeline of the event and the Chief Brand Officer of Switch may join the panel. I'll provide any updates on Friday. For the panel script, some of the questions may change.

As of today, Elon indicated that he is still planning to be at the Tech Summit. His team is working on the dialogue between the Governor and Elon. The topics are highlighted in the attached itinerary. I will send the script as soon as I receive it from Tesla.

Also, I've attached a draft proclamation for the Governor's review. The plan, if he's good with it, is to have him read it at the end of his opening remarks. The proclamation addresses the renaming of TRIC to "Innovation Park" and designating a portion of "Innovation Park" as "Blockchains City."

We are expecting 40 to 50 attendees at the event.

The following documents are attached:

1. Draft Governor's Itinerary for the Tech Summit
2. Draft Opening Remarks
3. Draft Panel Script
4. Draft Proclamation

AMERICAN OVERSIGHT

Please let me know if there are any questions or desired changes. I'm coordinating closely with the panelists, and especially Tesla since they are hosting the event.

Thank you for your help!
Jarad

AMERICAN OVERSIGHT

A PROCLAMATION DESIGNATING THE TAHOE-RENO INDUSTRIAL CENTER "INNOVATION PARK"

Whereas, the State of Nevada has always welcomed visionaries ready to apply hard work and creativity to solve the toughest challenges; and

Whereas, this administration has endeavored to make the State of Nevada the physical center and most conducive home for individuals and companies on the leading edge of their respective industries; and

Whereas, the Tahoe-Reno Industrial Center has quickly become an important center for some of the world's most inventive and creative companies such as Tesla, Google and Switch; and

Whereas, as Governor I am proud that Nevada has become home to this array of innovators and recognize the key place the Tahoe-Reno Industrial Center occupies in creating business success, and know that it will continue to power excellence as it grows and develops.

Now, Therefore, I, Brian Sandoval, Governor of the State of Nevada do hereby designate the Tahoe-Reno Industrial Center as "Innovation Park" to honor the talented and hard-working minds who are helping to power Nevada's economy of tomorrow.

GOVERNOR'S TECH SUMMIT - ITINERARY
TESLA'S GIGAFACTORY 1
OCTOBER 9TH, 2018

Time	Event/Description	Venue
2:00 – 3:45PM	Other Attendees Arrive **Expecting 40 to 50 attendees.* - Check in - Tours of Gigafactory and Panasonic manufacturing - Refreshments in Lobby	Tesla's Gigafactory 1 Electric Avenue Sparks NV 89434
3:45PM	Governor Arrive at Tesla's Gigfactory 1	Tesla's Gigafactory 1 Electric Avenue Sparks NV 89434
3:45PM	Governor enters Green Room - Meet and greet other panelists	Green Room
3:55PM	Governor transitions to just offstage in Tesla Lobby	Lobby Tesla's Gigafactory 1
4:00PM	Tech Summit Begins Welcome Remarks: Paul Anderson, GOED - Welcoming Remarks - Introduces Governor Sandoval	Lobby Tesla's Gigafactory 1
4:05-4:15PM	Opening Remarks: Governor Sandoval - Decision to run in the face of economic crisis - Status of Nevada's economy at the depths of the recession - Steps taken to make changes - Highlight wins - Current status of Nevada's economy at the end of two terms. - ***Proclamation – Rename TRIC to Innovation Park and announce the formation of Blockchains City.***	Lobby Tesla's Gigafactory 1
4:15 – 4:20PM	Transition to Discussion Between Governor Brian Sandoval and Elon Musk Paul Anderson: Brief Intro of Elon Musk and the impact of the Tesla Gigafactory on the Nevada economy Stage is switched out with two chairs in the middle	Lobby Tesla's Gigafactory 1

AMERICAN OVERSIGHT

GOVERNOR'S TECH SUMMIT - ITINERARY
TESLA'S GIGAFACTORY 1
OCTOBER 9TH, 2018

4:20 – 4:35PM	Discussion: Why Tesla chose Nevada for the Gigafactory? - Governor Brian Sandoval - Elon Musk, CEO, Tesla **Tesla is scripting a discussion around the story of how the decision was made to put the Gigafactory 1 in northern Nevada. Here are the likely topics:* -why did Tesla pick Nevada for Gigafactory -what does Gigafactory do for Tesla -how has Tesla contributed to the community -	Lobby Tesla's Gigafactory 1
4:35 – 4:40PM	Transition to Panel Discussion Paul Anderson: Brief intro of panel members and their companies Stage is switched to four, possibly five chairs with Governor Sandoval off to one side.	Lobby Tesla's Gigafactory 1
4:40 – 5:15PM	Tech Summit: Panel Discussion - Governor Brian Sandoval, Moderator - JB Straubel, CTO, Tesla - Jeff Berns, CEO, Blockchains, LLC - Shawn Watanabe, President, Panasonic Energy of North America - CBO, Switch – likely, not confirmed Questions & Answers Closing remarks by Governor Sandoval (2-3 minutes) **See separate document for panel script with questions. As of now the plan is to ask each panel member two to three questions.* **Jeff Berns will show a short 1-2 minute video as part of the answer to one of his questions. This will be to announce their upcoming event at DevCon4 in Prague later in October.* **Shawn Watanabe will have a translator to help with the Japanese/English. This will slow down questions and answers a bit.*	Lobby Tesla's Gigafactory 1

GOVERNOR'S TECH SUMMIT - ITINERARY
TESLA'S GIGAFACTORY 1
OCTOBER 9TH, 2018

5:15 – 5:30PM	Company Announcement - There may be an announcement by Tesla regarding a transportation/carpool initiative.	Lobby Tesla's Gigafactory 1
5:30PM	Tech Summit Ends	
5:30 – 5:45PM	Governor Sandoval available to press for questions	
5:45PM	Governor Sandoval departs Gigafactory	

AMERICAN OVERSIGHT

GOVERNOR SANDOVAL:
GENTLEMAN, THANK YOU FOR YOUR WILLINGNESS TO PARTICIPATE IN TODAY'S PANEL DISCUSSION. I KNOW EACH OF YOU ARE BUSY MAKING GREAT THINGS HAPPEN AT YOUR RESPECTIVE COMPANIES. I'D LIKE TO TAKE THIS OPPORTUNITY TO ASK EACH OF YOU TWO OR THREE QUESTIONS REGARDING YOUR SUCCESSES AND FUTURE PLANS, OPPORTUNITIES, AND CHALLENGES.

JB, WE'LL START WITH YOU. THANK YOU AGAIN FOR HOSTING US AT THIS AMAZING, GROWING FACILITY. EVERYWHERE I TRAVEL, I'M ASKED ABOUT HOW WE GOT THE TESLA FACTORY IN NEVADA. I LOVE TO SHARE THE STORY. I ALSO LIKE TO TALK ABOUT THE CLOSE PARTNERSHIP BETWEEN TESLA AND THE STATE OF NEVADA ON WORKFORCE DEVELOPMENT. ***WHAT HAS BEEN DONE TO MEET YOUR NEEDS WITH THE TRAINING AND EDUCATION OF YOUR WORKFORCE?***

JB STRAUBEL:
3-5 MINUTE ANSWER.

GOVERNOR SANDOVAL:
THANK YOU, JB.
JEFFREY, IT'S EXCITING TO HAVE YOU ON THE PANEL. WITH YOUR RECENT LARGE LAND PURCHASE – 60,000 ACRES! - NEVADA AND THE WORLD IS EXCITED TO LEARN MORE ABOUT WHAT YOU PLAN TO DO TO CHANGE THE WORLD. **SO, WHY NEVADA AND WHAT ARE YOU PLANNING?**

JEFFREY BERNS:
THANK YOU, GOVERNOR SANDOVAL….
****BLOCKCHAINS WILL PLAY A 2 MINUTE VIDEO. JEFFREY WILL ANNOUNCE THEIR EVENT AT DEVCON4 IN PRAGUE.***

AMERICAN OVERSIGHT

GOVERNOR SANDOVAL:

THAT'S EXCITING NEWS, JEFFREY. I LOOK FORWARD TO LEARNING MORE.

MR. WATANABE, IT IS WONDERFUL TO HAVE PANASONIC IN NEVADA PARTNERING WITH TESLA IN THE MANUFACTURING OF CYLINDRICAL LITHIUM-ION CELLS. **RELATED TO THE QUESTION THAT I ASKED JB, WHAT IS YOUR CHALLENGE IN FINDING TALENT IN NORTHERN NEVADA?**

MR. WATANABE:

ANSWER

GOVERNOR SANDOVAL:

THANK YOU, MR. WATANABE. ONE MORE QUESTION FOR YOU. **WHAT INFRASTRUCTURE IS NEEDED TO ALLOW PANASONIC TO CONTINUE TO EXCEL IN ITS OPERATIONS?**

MR. WATANABE:

ANSWER

GOVERNOR SANDOVAL:

JEFFREY AND JB, SAME QUESTION TO EACH OF YOU. ***WHAT DO YOU SEE AS THE MOST PRESSING INFRASTRUCTURE NEED FOR THE TENANTS AT TRIC?***

JEFFREY BERNS:

ANSWER

JB STRAUBEL:

ANSWER

GOVERNOR SANDOVAL:

THANK YOU. I LOOK FORWARD TO SEEING THE IMPROVEMENTS MADE AND THEIR IMPACT.

JEFFREY, THERE ARE A LOT OF QUESTIONS ABOUT BLOCKCHAIN TECHNOLOGY AND HOW IT

AMERICAN OVERSIGHT

CAN BE USED. WE KNOW IT'S MORE THAN JUST CRYPTOCURRENCY. THE GOVERNMENT OF ESTONIA USES BLOCKCHAIN TECHNOLOGY FOR OFFICIAL GOVERNMENT RECORDS AND TRANSACTIONS. ***WHEN YOU THINK ABOUT THE POTENTIAL USES OF BLOCKCHAIN TECHNOLOGY, WHAT CURRENT OR POTENTIAL USE EXCITES YOU THE MOST?***

JEFFREY BERNS:

ANSWER

GOVERNOR SANDOVAL:

I WILL BE WATCHING CLOSELY AS THE USE OF BLOCKCHAIN TECHNOLOGY CONTINUES TO DEVELOP AND SPREAD.

JB, AS PRODUCTION AND OPERATIONS GROW AT GIGAFACTORY ONE, YOU WILL REQUIRE MORE ENERGY AND MORE RESOURCES. I KNOW THAT SUSTAINABILITY IS IMPORTANT TO TESLA. ***HOW DOES TESLA PLAN TO CONTINUE TO MEET IT'S SUSTAINABILITY GOALS?***

JB STRAUBEL:

ANSWER

GOVERNOR SANDOVAL:

THANK YOU. ONE LAST QUESTION FOR EACH OF YOU. ***IN TWO OR THREE SENTENCES WHAT DO YOU THINK IS THE MOST EXCITING CHALLENGE OR OPPORTUNITY THAT WILL BE ADDRESSED BY NEW TECHNOLOGY THAT IS ALREADY BEING DEVELOPED?***

MR. WATANABE:

ANSWER

JEFFREYREY BERNS:

ANSWER

AMERICAN OVERSIGHT

JB STRAUBEL:

ANSWER

GOVERNOR SANDOVAL:

GENTLEMEN, THANK YOU FOR YOUR TIME TODAY AND YOUR WONDERFUL INSIGHTS. THANK YOU FOR YOU WILLINGNESS TO DO BUSINESS IN NEVADA AND FOR YOUR GLOBAL OUTLOOK IN THE WAY YOU APPROACH THE MARKET. YOU ARE THE NEW NEVADA!

LADIES AND GENTLEMEN, THANK YOU FOR BEING HERE TODAY. EACH OF YOU ARE DIRECT PARTICIPANTS IN THIS EFFORT TO CREATE THE NEW NEVADA, WHILE PRESERVING THE BEST OF WHAT CAME BEFORE. IT'S AN HONOR AND PLEASURE TO WORK WITH YOU.

THANK YOU! AND GOD BLESS!

AMERICAN OVERSIGHT

THANK YOU, PAUL FOR THE KIND INTRODUCTION.

LADIES AND GENTLEMEN, IT IS AN HONOR TO BE HERE AT TESLA'S GIGAFACTORY ONE. TO CELEBRATE THE ACHIEVEMENTS OF THE PAST EIGHT YEARS. IT IS EQUALLY EXCITING TO LOOK TO WHAT THE FUTURE WILL BRING. THIS TECH SUMMIT IS AN OPPORTUNITY FOR US TO DO JUST THAT – CELEBRATE WHAT WE HAVE ACCOMPLISHED WITH AN EYE FOCUSED ON THE FUTURE – THE FUTURE THAT WILL BE CREATED AND DRIVEN BY THE DEMAND FOR NEW TECHNOLOGIES THAT WILL DRIVE JOB GROWTH AND IMPROVE THE LIVES OF NEVADANS.

EIGHT YEARS AGO, AT THIS TIME, I WAS IN THE FINAL MONTH OF MY CAMPAIGN FOR THE OFFICE OF GOVERNOR. FRIENDS AND COLLEAGUES ASKED ME WHY I WOULD EVER CONSIDER LEAVING A LIFETIME APPOINTMENT ON THE FEDERAL BENCH TO RUN FOR OFFICE IN THE MIDDLE OF A DESTRUCTIVE RECESSION. NEVADA WAS THE HARDEST HIT STATE. IN 2011, THE UNEMPLOYMENT RATE IN NEVADA SPIKED AT OVER 14%. NEVADA LOST OVER 175,000 JOBS. WE LED THE NATION IN HOME FORECLOSURES. I DECIDED TO RUN BECAUSE I LOVE NEVADA AND KNEW WE COULD DO BETTER.

UPON TAKING OFFICE, HARD DECISIONS HAD BE MADE, BUT AT THE SAME TIME WE HAD TO LOOK TO THE FUTURE. WE HAD TO SET A NEW PATH; I KNEW WE NEEDED TO DIVERSIFY OUR ECONOMY. TRADITIONALLY, OUR ECONOMY WAS DRIVEN BY MINING AND GAMING AND HOSPITALITY. THOSE HAD TO REMAIN A VITAL PART OF THE ECONOMY GOING FORWARD, BUT WE HAD TO EXPAND BEYOND THAT.

AMERICAN OVERSIGHT

AS GOVERNOR, I CREATED THE GOVERNOR'S OFFICE OF ECONOMIC DEVELOPMENT. PREVIOUSLY, THE RESPONSIBILITY WAS WITH THE LIEUTENANT GOVERNOR. BUT WE HAD TO ELEVATE THE FOCUS ON ECONOMIC DEVELOPMENT – IT BECAME ONE OF MY TOP PRIORITIES. I BROUGHT IN GREAT TALENT TO RUN THE GOVERNOR'S OFFICE OF ECONOMIC DEVELOPMENT – STEVE HILL, WHO NOW HEADS THE LAS VEGAS CONVENTION AND VISITORS AUTHORITY, AND NOW PAUL ANDERSON. WE FOCUSED ON IDENTIFYING SECTORS THAT COULD GROW AND STRENGTHEN THE ECONOMY AND CREATE NEW JOBS. THESE SECTORS INCLUDED DRONE TECHNOLOGY, WATER TECHNOLOGY, AUTOMOUS VEHICLES, AND OTHERS. WE PASSED LEGISLATION TO GOVERN THE TESTING AND USE OF THESE TECHNOLOGIES IN NEVADA IN AN EFFORT TO ATTRACT BUSINESSES AND ENTREPRENEURS. WE CREATED WATERSTART, A WATER TECHNOLOGY CENTER OF EXCELLENCE. NEVADA WAS SELECTED AS ONE OF SIX NATIONAL TEST SITES FOR UNMANNED AERIAL PLATFORMS. WE CREATED THE NEVADA INSTITUTE OF AUTONOMOUS SYSTEMS TO DRIVE GROWTH IN THE DRONE SECTOR.

WORKING WITH THE STATE LEGISLATURE WE ESTABLISHED BUSINESS INCENTIVES TO ATTRACT NEW BUSINESSES. I TRAVELED GLOBALLY TO PROMOTE NEVADA. IN OUR EFFORT TO DIVERSIFY, WE PURSUED NEW OPTIONS THAT MIGHT HAVE SEEMED OUT OF OUR REACH PREVIOUSLY. THE DECISION BY TESLA TO BUILD THE GIGAFACTORY IN NORTHERN NEVADA WAS A MAJOR WIN THAT HAS HAD FAR REACHING RESULTS. IT HAS CAUSED OTHER BUSINESS LEADERS TO ASK: WHY NEVADA?

AMERICAN OVERSIGHT

IN OUR EFFORTS TO DIVERSIFY THE ECONOMY, TO PURSUE JOBS THAT REQUIRED GREATER TECHNICAL SKILLS, AND WITH THE COMING OF TESLA, WE KNEW WE HAD TO FOCUS ON IMPROVING OUR EDUCATION AT ALL LEVELS. IN 2015 WE PASSED SWEEPING CHANGES TO EDUCATION THAT INCLUDED AN INVESTMENT OF $343 MILLION TO PREPARE STUDENTS TO MEET THE NEEDS OF THE NEW NEVADA ECONOMY. I'VE PUSHED FOR ADDITIONAL INVESTMENTS IN HIGHER EDUCATION. HAND-IN-HAND WITH PRIMARY AND HIGHER EDUCATION, I HAVE FOCUSED ON THE NEED FOR COMPREHENSIVE WORKFORCE DEVELOPMENT TO PREPARE OUR NEVADANS FOR JOBS LIKE THOSE AT THE GIGAFACTORY. IN FACT, WE HAVE WORKED DIRECTLY WITH TESLA, PANASONIC, AND OTHER GREAT EMPLOYERS TO MAKE SURE THAT THE STATE IS FOCUSED ON PROVIDING EDUCATION AND TRAINING TO MEET THEIR NEEDS. I CREATED THE GOVERNOR'S OFFICE OF WORKFORCE INNOVATION TO WORK WITH OUR EMPLOYERS AND EDUCATORS TO PREPARE NEVADANS FOR THE NEW NEVADA.

ACROSS THE STATE, OUR EFFORTS ARE PAYING OFF. WE HAVE REPLACED ALL OF THE JOBS THAT WERE LOST AND ADDED MANY MORE. AS OF AUGUST 2018, THE UNEMPLOYMENT RATE FOR NEVADA IS 4.5%. WE ARE IN THE TOP 5 STATES FOR THE BEST BUSINESS CLIMATES. IN SOUTHERN NEVADA, WE HAVE SEEN MORE ADVANCED MANUFACTURERS MOVING IN AND EXPANDING, THE RAIDERS WILL CALL LAS VEGAS HOME IN A NEW STADIUM. HERE IN NORTHERN NEVADA, WE HAVE SEEN COMPANIES LIKE GOOGLE, APPLE, WAL-MART AND OTHERS MOVE IN. TODAY IT'S EXCITING TO WELCOME BLOCKCHAINS, LLC TO THIS COMMUNITY OF CUTTING-EDGE BUSINESSES, INDUSTRY AND WORLD LEADERS. BLOCKCHAINS MADE WAVES BY PURCHASING OVER 60,000 ACRES OF LAND HERE AT TRIC.

AMERICAN OVERSIGHT

TOGETHER THE COMPANIES HERE ARE DEVELOPING AND UTILIZING EXCITING NEW TECHNOLOGIES THAT WILL DRIVE GROWTH AND IMPROVE LIVES ACROSS THE GLOBE.

IT IS THE DEMAND, THE NEED AND THE DEVELOPMENT FOR NEW TECHNOLOGIES THAT HAS BROUGHT US TOGETHER TODAY FOR THIS TECH SUMMIT. I LOOK FORWARD TO OUR DISCUSSIONS TODAY, TO REVIEW HOW WE GOT HEAR, BUT EVEN MORE IMPORTANTLY TO LOOK AHEAD.

AMERICAN OVERSIGHT

CARSON CITY, Nev. — The annual Stewart Father's Day Powwow was held at the Stewart Indian School on Father's Day weekend.

The Native American Culture event included competition dancing and food, in which participants experienced American Indian heritage, history and pride.

Families and friends gathered to enjoy Indian tacos as well as arts and crafts from vendors.

AMERICAN OVERSIGHT

Nevada Governor Brian Sandoval was an an attendee of the event.

The Stewart Father's Day Powwow benefits the establishment of the Stewart Indian Cultural Center. It was named the 2015 Event of the Year by the Carson City Chamber of Commerce.

Opportunity Zones certified in Nevada
Nevada Appeal
https://www.nevadaappeal.com/news/business/opportunity-zones-certified-in-nevada/

Gov. Brian Sandoval says the U.S. Treasury has certified Nevada's Opportunity Zones.

He said the designation will encourage private investment in parts of Nevada in the most need and "kick start" construction of affordable housing projects.

"From Southern Nevada to Northern Nevada and areas in between, the certification of Nevada's designated Opportunity Zones will benefit communities big and small," he said.

Opportunity Zones are intended to generate investment in low-income communities by providing tax breaks to private investors.

Nevada voters can take the lead on renewable energy development
Las Vegas Sun editorial
https://lasvegassun.com/news/2018/jun/17/nevada-voters-can-take-the-lead-on-renewable-energ/

In 1997, Nevada became one of the first states in the U.S. to adopt a minimum requirement for green energy production.

Today, however, other states have zoomed past us in setting such standards. In fact, Nevada's requirement for 25 percent of our energy to come from renewable sources no longer ranks us in the top 10. We're trailing New Jersey, of all places. New Jersey!

So it's commendable that a group known as Nevadans for Clean Future Energy has been working on an initiative to boost Nevada's minimum to 50 percent by 2030.

The group is circulating a petition that would put the initiative on a statewide ballot. Tuesday is the last day the group can collect signatures.

Organizers say they're confident the petition drive will be successful, which is good to hear. The initiative deserves a spot on the ballot.

Nevadans have shown time and again they support development of renewable energy, so it's worthwhile to debate whether to bump up the requirement to 50 percent. It's also worth exploring considering the popularity of a similar bill in the 2017 Nevada Legislature, which would have raised the minimum to 40 percent.

Gov. Brian Sandoval vetoed that measure, saying its passage was "premature in the face of evolving energy policy in Nevada." Sandoval said the requirement — technically known as a Renewable Portfolio Standard —

AMERICAN OVERSIGHT

could create complications given the likely passage of the Nevada Energy Choice Initiative ballot issue, which would allow Nevadans to choose their energy provider in the same way they select a cable/internet provider. Specifically, Sandoval was concerned that the increased RPS would create added costs that would deter providers from entering the market or be passed along to customers in the form of higher electricity rates.

Sandoval also said the change could result in higher fees for resorts and large corporations to exit the NV Energy grid and obtain their power from third parties.

Those points will no doubt be discussed if the RPS initiative gets on the ballot, but there's one thing that's not up for debate: Setting a higher requirement is the only guarantee for Nevadans that renewable energy production will expand here.

And that's important, because there are clear benefits from growing the state's green energy industry.

Our abundance of sunlight and our above-average potential in geothermal production makes us one of the nation's best-suited places to develop renewables, yet only about 18 percent of our energy is generated by those sources. Meanwhile, we're spending roughly $700 million a year to import natural gas and other fossil fuels to power the state's grid.

Boosting production from renewable sources would not only reduce those costs, but would help free the state from volatility in the fossil fuel market.

It would also generate economic activity, of which the current 25 percent standard has already yielded $7 billion in solar and geothermal operations.

Other benefits would come from reducing carbon emissions, which would help improve air quality and reduce respiratory problems triggered by air pollution. Nevada produced 35 million metric tons of carbon dioxide in 2015, which would be reduced by 3 million tons a year under the initiative.

Whether this is the right time to increase the standard, and whether this is the right level for Nevada, are questions that should be debated.

Getting the question on the ballot is a starting point, though, which is why the petition deserves support.

More Nevada kids have health insurance, but state 9th worst
Jessie Bekker
Las Vegas Review Journal
https://www.reviewjournal.com/life/health/more-nevada-kids-have-health-insurance-but-state-9th-worst/

The number of children in Nevada without health insurance was cut by more than half between 2011 and 2016, but the state's rate of uninsured kids remains the ninth-highest in the U.S., according to a new report.

The gains in insurance coverage occurred after passage of the Affordable Care Act in 2010 and Nevada's subsequent expansion of the federal Medicaid program, said Elizabeth Lukanen, deputy director of the State Health Access Data Assistance Center. The policy research center based at the University of Minnesota released the report Friday.

AMERICAN OVERSIGHT

Denise Tanata, executive director for the Children's Advocacy Alliance, a nonprofit in Nevada, said the state's current rate of uninsured children of 6.3 percent is a big improvement from the beginning of the decade.

"We're absolutely still behind, and we've got a ways to go to catch up, but we're definitely moving in the right direction to do that," Tanata said. "The fact we're not last anymore is good."

The report analyzed U.S. Census Bureau survey data in all 50 states and Washington, D.C., tracking changes in public and private coverage and in the uninsured rate by race and ethnicity and household members' income and educational status.

From worst, to ninth

Lukanen said the drop in the state's uninsured rate quickened after 2013.

That may have been the result of the ACA's individual mandate requiring uninsured Americans to acquire health insurance or pay a penalty, which took effect the next year, Tanata said. Parents typically buy their children insurance when acquiring it for themselves, she said.

The Medicaid expansion, which doubled the number of Nevadans insured under the program to 600,000, also took effect the next year, lowering the uninsured rate for children and adults alike.

"Definitely, Nevada was sort of a standout state in terms of reductions in uninsurance," Lukanen said.

The 8.1 percentage point decline in the state's uninsured rate among children between 2013 and 2016 was the largest percentage point drop in the nation, she noted.

Even so, Nevada remains among the worst states in terms of its uninsured rate among children. That's because it started as worst in the nation in 2013, when 14.4 percent of children in the state lacked health insurance, ahead of No. 2 Texas, which had a rate of 13.2 percent.

"It's kind of an uphill battle," Lukanen said.

Disparities persist

Despite significant improvements across the board, disparities in insurance rates persist in the Silver State. About 10 percent of Hispanic children and children from households where family members achieved a high school education or less still lack health insurance, the report said.

One reason may be that parents whose children are eligible aren't signing them up.

For example, undocumented parents often fear sharing their personal information with the government could lead to deportation or cancellation of a residency application, Tanata said, meaning they are reluctant to apply for their citizen children.

That's despite the 2017 passage of state Senate Bill 325, which eliminated the five-year wait period to become eligible for Medicaid and Children's Health Insurance Plan previously required for children who were granted legal residence.

AMERICAN OVERSIGHT

Lukanen and Tanata fear that questions about the future of the Affordable Care Act and the demise of its individual mandate provision, as well as anti-immigrant rhetoric from some Republican lawmakers, could reverse the progress made in Nevada and across the nation.

“I think every time you infuse uncertainty and question into a policy area, people get confused and, most likely, lose out,” she said.

New Clark County schools superintendent faces trust-building challenge
Meghin Delaney
Las Vegas Review Journal
https://www.reviewjournal.com/news/education/new-clark-county-schools-superintendent-faces-trust-building-challenge/

ORLANDO, Fla. — Establishing trust.

That, in two words, is the biggest challenge facing Jesus Jara when he arrives this week to become the Clark County School District superintendent.

There are obvious similarities between Las Vegas and Orlando, but the climates of the two tourist meccas’ school systems are not among them.

In Orlando, where Jara, 48, just concluded a six-year run as deputy superintendent, district officials, the school board and parents all seem to pull in the same direction to move the academic needle upward.

That’s hardly the case in Clark County, where trust among district officials, legislators, parents and trustees often seems nonexistent and divisions threaten to undermine modest progress in academic achievement.

Jara — who doesn’t mind whether you pronounce his last name with a J or an H — is aware of the challenge awaiting him when he clocks in Tuesday.

During a recent visit with the Las Vegas Review-Journal in his last weeks on the job in Florida, he said earning the trust of the entire community is critical to propelling the district forward.

But he also said he views what others see as mistrust a little differently, calling it a “passion” for students and education.

“The passion I can work with,” he said. “What we need to do is just channel it together to … work as one and collaborate together so we can then have a real clear focus on being the No. 1 district for kids.”

Operating transparently and having open dialogues are two ways Jara thinks Clark County can begin to build a culture around education that resembles Orlando’s.

Rebecca Garcia, a 39-year-old with three children attending Clark County schools, said it’s going to take a lot of showing up for Jara to restore her trust. But she acknowledges being impressed by his skills, experience and temperament in his interview with trustees.

“I think CCSD is at a juncture where we need a fresh perspective who is willing to leave the status quo, who isn’t part of the status quo and who can set a new direction for the district,” Garcia said.

AMERICAN OVERSIGHT

Jara says Clark County parents can get a good sense of the approach he will bring by looking at changes that have occurred in Orange County, Florida, in recent years, including voters entrusting the school district with more tax money through ballot initiatives.

Overall, Jara said, Orange County schools have found a good balance between school autonomy and central oversight.

He wants to implement a similar structure in the Clark County district, which is still wrestling with the Legislature-mandated reorganization.

Budget flexibility

To demonstrate the flexibility of the Orange County system and illustrate how it can adjust to different challenges, Jara took a reporter on a tour of five schools.

At Colonial High School, he discussed principal autonomy, using the school's third-year principal, Jose Martinez, as an example.

The school, which serves up to 3,600 students, is similar to many Clark County high schools. It is 87 percent nonwhite. It's a Title I school, and 71 percent of students qualify for free or reduced lunch under federal standards, an indicator of poverty.

It's earns a consistent "C" on Florida's five-tier rating scale.
But unlike most Clark County schools, every student has their own tablet.

Also, the principal has near-complete control over the budget, as long as the school meets the district's criteria for academic achievement. That's similar to what's being done in Clark County, though at this point Orange County principals appear to have more spending flexibility. That required additional budgeting training for principals, Jara said.

At Colonial, for example, Martinez responded to parent and student feedback by cutting a couple coaching positions and using that money to cover fees for band and orchestra programs. There's money available for dry-cleaning uniforms, for example.

A better example came from Colonial's enrollment of roughly 200 Puerto Rican students who fled to Florida after Hurricanes Irma and Maria decimated their homeland.

"We knew right away we needed a system in place," Jara recalled, sipping from a cup of Dunkin Donuts coffee as he described how Martinez and his team jumped into action to prepare for the influx.

The solution included getting the school's Latinos in Action club involved.

A spinoff of student government clubs, Latinos in Action operates in a handful of Orange County schools and focuses heavily on mentorship.

Because the system was already in place, Martinez said, it was easier to absorb the newcomers with only minimal disruption to other students.

AMERICAN OVERSIGHT

School turnaround

While the district lets schools like Colonial make such calls, schools that aren't cutting it academically have less autonomy.

Washington Shores Elementary School was a dilapidated facility nestled into an old, historically impoverished neighborhood.

Four years ago, the school received an "F" rating and a promise of support from the district. That included a spot in the school transformation office that Jara helped create and replacement of the old building.

Nate Stephens, the principal brought in to lead the transformation, grew up in the neighborhood and serves as the ultimate role model for the children.

"This is the exit from the neighborhood. This is personal for me," he said.

Part of the transformation involved training teachers on how to talk to students using higher-level vocabulary to set an example, Stephens said. If you hold high expectations, he said, the students can and will meet them.

In the latest state ratings, the school climbed to a "C."

During the tour of the school, students impressed Jara with their vocabularies. He sat with a kindergarten student who used the word "bacteria" in an essay on ice cream. A third-grade student talked about how physical activity teaches "collaboration."

"It's the same kids, the same community, learning at a higher level," Jara said.

The transformation office is similar to Clark County's turnaround initiatives but more advanced in some ways. For instance, it has a system to ease schools back to the mainstream once they reach an achievement standard. Over two to three years, the school is weaned off transformation office support, and budgetary control is returned to the principal.

That prevents what some Clark County schools with high-needs students are seeing now when certain state funding measures, like the Zoom and Victory programs, provide extra support only to vanish once student achievement improves.

That's one reason Jara likes systems that focus on and reprioritize existing funds rather than relying on new money.

'Master' principals

Next on Jara's list is Millennia Elementary School, which shares Principal Anne Lynaugh with nearby Millennia Gardens Elementary School, similar to Clark County's "franchise principal" program.

The idea of both programs is to leverage experience and talent, but Jara said he worries about burnout. Both districts also have training programs aimed at nurturing up-and-coming administrative talent.

AMERICAN OVERSIGHT

In Lynaugh's schools, Jara shows a knack for connecting with students, easily slipping into and out of his native Spanish. Jara moved to Miami from Venezuela when he was 10.

"My parents had a vision of the American Dream, and I'm living it," Jara said over a chicken sandwich and Diet Coke, one of three cans consumed during the daylong visit.

Like their Clark County counterparts, Orange County students speak a multitude of languages, which can sometimes pose a problem, said Lynaugh. But with technology in every classroom and the rise of programs like Google Translate, students who aren't yet fluent in English are able to work independently.

Hands-on learning

Next up is Orange Technical College.

Don't let the name deceive you. Students do not earn bachelor's or associate degrees but can pursue a wide range of career certifications.

Funded by the state and run by districts, Florida's technical colleges are similar to vocational schools. They are open to adults and high school students. Adults pay tuition and any required fees, while students generally pay only for supplies or instructional materials.

Five campuses in Orange County offer more than 40 programs, including cosmetology, mechanics, animation and welding. Students spend half their days at their zoned high school and half in their career or technical program.

Jara's son, Alex — second-oldest of his three kids — is an alumnus, collecting a welding certificate two days before his high school graduation.

"This is hands-on learning," the elder Jara said.

The schools defy the notion that vocational schools are somehow lesser. Through partnerships with high-profile companies and up-to-date programs, including modeling simulation design and production, it's remarkable what they can accomplish, Jara said.

For example, combining a standard program like brick masonry with virtual reality technology keeps costs down by letting students practice in a simulation before actually laying bricks.

Closing achievement gaps

The last stop is Hunter's Creek Middle School, which is consistently rated at the highest level by the state. Principal Amy McHale is about to get even more autonomy and flexibility as she tries to narrow the achievement gap between the school's highest- and lowest-performing students.

But again, the district has a system for her to work within. She's allowed to try innovative approaches, mostly involving technology, but must narrow the gap — a goal the Clark County schools also have been pursuing under outgoing Superintendent Pat Skorkowsky — within three years.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-001309

Her plans include moving students to two days of block scheduling next year to devote more time to math and "really focus on the gaps," she said.

On to Clark County

Although Jara will be across the country by then, he promised to keep a close eye on Orlando and maintain a close relationship with Orange County Superintendent Barbara Jenkins, whom he called the greatest school superintendent in the country.

That comment came at his last School Board meeting in late May, where he was showered with praise from trustees. He also had the chance to lay out some of his hopes for Clark County.

"I hope to become sister school districts to replicate the work of the talented administrators and phenomenal teachers in Orange County," he said.

Time will tell if culture change can also be exported.

Federal lands law jeopardizes future of Nevada's Mint 400
Michael Scott Davidson
Las Vegas Review Journal
https://www.reviewjournal.com/news/politics-and-government/clark-county/federal-lands-law-jeopardizes-future-of-nevadas-mint-400/

Since its creation 50 years ago, the Mint 400 off-road race has become local legend.

The 120-mile-long desert loop that runs east of Interstate 15 between Las Vegas and Primm is known for its unforgiving difficulty. About half the trucks and dune buggies that start the race are unable to finish.

The event was immortalized in 1972 in journalist Hunter S. Thompson's novel "Fear and Loathing in Las Vegas."

This year's iteration of the event, held in March, drew an estimated 35,000 attendees from around the world and created $40 million in economic impact for the state, according to Josh Martelli, who co-owns the race with his brother, Matt.

"It is our Indy 500," Martelli said.

But the race's future in Southern Nevada is being threatened by federal legislation that would open nearly 39,000 acres of federal land for development, including land south of the Las Vegas Valley. Clark County commissioners are scheduled to vote Tuesday whether to sign a resolution supporting the legislation.

Martelli said the northern half of the Mint 400 course crosses that land. Moving the route would cause the race to lose some of its difficulty and accompanying prestige. And finding a new route would be difficult because of protections for animals such as the desert tortoise.

AMERICAN OVERSIGHT

“This proposal eliminates at least 40 to 50 miles of our racecourse, and we don’t really have a lot of good alternatives,” he said. “We’re essentially being sandwiched between new commercial development and preservation of natural resources.”

Martelli said county staffers have assured him they will support preservation of the racecourse through 2023 and help identify an alternative route. But the race organizer said the next best place to hold the race would be near Phoenix.

“That would be a huge economic loss for Clark County and Las Vegas,” Martelli said.

The land proposal has also drawn the ire of other off-road organizations.

“Not only will it affect competitive events, (but) it will also affect people that go out and ride on the weekend,” said Kenny Thatcher, president of Southern Nevada Off Road Enthusiasts. “There’s probably over 300,000 off-highway vehicles in Clark County.”

Thatcher said those vehicles are owned by people spending money on gas, car parts and auto repairs. They often stop in Primm for lunch when they go riding.

“Primm Valley stands to lose a lot from it,” Thatcher said. “We’re blue-collar people. We have disposable income, and this is how we use it. It’s a big industry.”

At their Tuesday meeting, commissioners also will discuss the formation of a committee focused on preserving local off-road recreation. Additionally, they will decide whether to sign an agreement with Nellis Air Force Base that would give the county ownership of almost one-tenth of the 10,000 acre Nellis Dunes off-road recreation area north of Las Vegas

Martelli said he views the committee idea as an olive branch from the County Commission to the off-road community, but both he and Thatcher remain wary of what effect such a committee could have.

Regardless, Thatcher said he hopes to bring at least 300 people to the commission meeting to oppose the lands bill.

“If they think they’re going to send everyone out to the Nellis Dunes, you can’t put 300,000 people in 10,000 acres. It’s not going to work,” Thatcher said. “We’ll have to go outside of Clark County to do anything.”

Resolution up for approval

Clark County Commission is slated to vote Tuesday on a resolution seeking federal legislation to open almost 39,000 acres of public land for development and set aside more than 370,000 acres of new wilderness and protected areas for the desert tortoise and other threatened species.

The four-page resolution outlines 15 separate transactions, including a 41,000-acre expansion of the Moapa River Indian Reservation, several new or expanded wilderness areas totaling almost 83,000 acres and nine areas of “critical environmental concern” totaling almost 293,000 acres.

AMERICAN OVERSIGHT

The document and related maps are available for review on the county's website at https://bit.ly/2JHlh1d.

County officials gave the general public its first look at the proposal during a June 5 open house, then accepted written input for a week.

Those wishing to provide further input will have to do so during public comment Tuesday.

The commission meeting is slated to start at 9 a.m. The resolution is item No. 97 on the agenda.

Many Nevada drivers to pay more for minimum liability coverage
Art Marroquin
Las Vegas Review Journal
https://www.reviewjournal.com/news/news-columns/road-warrior/many-nevada-drivers-to-pay-more-for-minimum-liability-coverage/

Nevada drivers might want to double-check their insurance, because changes are coming in about two weeks.

The threshold for minimum liability coverage goes up July 1 under a law approved during last year's legislative session.

New minimums require motorists to carry $25,000 per person for bodily injury, $50,000 per accident, plus $20,000 for property damage coverage per accident, officials with the Nevada Department of Motor Vehicles said.

That's a significant jump from the current requirement of $15,000, $30,000 and $10,000, respectively — currently ranked as the second-lowest in the United States, DMV officials said.

"The costs of medical care and automobile repairs have gone up significantly," Nevada DMV Director Terri Albertson said. "The cost of a crash can easily exceed these older minimums."

About 32 percent of Nevada's 2.3 million licensed drivers carried the minimum coverage as of last year, including the Road Warrior.

Most drivers were notified about the need for increased coverage during their most recent policy renewals. And like many of you, the Road Warrior made the required adjustments to his policy last month.

Depending on your driving record and insurance company, the change in rates could range from $10 to $50. Insurance companies will no longer be allowed to write the lower limits; those that do could be sanctioned, DMV spokesman Kevin Malone said.

Scofflaw drivers failing to purchase auto liability insurance at the new minimum limits could be cited and fined and have their vehicle registration canceled until the appropriate coverage is purchased, according to the Nevada Division of Insurance website.

Local leaders meet with Nevada politicians on development goals
Bailey Schulz
Las Vegas Review Journal
https://www.reviewjournal.com/business/local-leaders-meet-with-nevada-politicians-on-development-goals/

AMERICAN OVERSIGHT

A group of 25 business and community leaders from the Las Vegas Global Economic Alliance and local chambers met with congressional delegations and agencies this week in Washington, D.C., to discuss policy issues affecting Southern Nevada.

The Federal Forum, held Tuesday and Wednesday, discussed big-picture issues including the impact of Yucca Mountain on economic development and tourism, I-11's development and the future of the autonomous vehicle industry in Las Vegas.

The alliance is a private-public partnership that works with the Governor's Office of Economic Development and other state partners to recruit new businesses to the state and to expand existing businesses that export at least half of their goods or services outside of Nevada. It achieves its mission largely by preparing companies to be approved for state tax abatements.

Ray Specht, who chairs the LVGEA's policy committee, said the forum touched on how to keep expanding the local economy when it already is seeing growth in areas such as employment and population.

"One of the things we talked about is how now is not the time to take the foot off the gas pedal," Specht said. "What do we do to make LGVEA the most competitive regional development authority?"

Lisette Partelow, the director of K-12 strategic initiatives at the Center for American Progress, a think tank in Washington, spoke about education policy at one of the forum's sessions. She said the group had an insightful discussion on short- and long-term goals on how to improve teacher recruitment and retainment. Suggestions included improving salaries and requiring higher degrees for certain positions.

The forum was also meant to help strengthen relationships between the LVGEA and delegation.

"Our entire delegation has been very open and willing to work with us," alliance CEO and President Jonas Peterson said.

Peterson said the access to state politicians will help to accomplish the group's priorities.

"There's a clear sense of where we want to go and what we want these policy programs to look like."

Vaping industry credits economy, lower taxes for its migration to Las Vegas
Vegas INC
https://vegasinc.lasvegassun.com/business/2018/jun/18/vaping-industry-credits-economy-lower-taxes-for-it/

When they were first mass produced, e-cigarettes and vaping products formed an industry widely considered to be a dud in the United States. Popularized in China in the early 2000s, they launched with little fanfare in the U.S. past decade as a less harmful alternative to tobacco.

But in recent years, the battery-powered vaporizer industry has taken off. It was worth $10 billion in 2017, and market research estimates it will reach $34 billion by 2021, $46 billion by 2023 and $64 billion by 2025.

As neighboring states have thrown in massive taxes and regulations to combat large vaping corporations from growing too much, many companies are moving to Las Vegas.

AMERICAN OVERSIGHT

"This city gives people a well-rounded life, and from a traffic perspective, everybody's time is being used more efficiently," says Billy Wilson, CEO of online retail and wholesale supplier E-Cig Distributors. "It's great for business because it's easy to convince clients to come to Las Vegas for meetings and conventions. You don't have to twist too many arms."

Wilson's company, which distributes almost 10 million e-cig products around the world each year, is one of more than a dozen vaping mega-companies to move from California and Washington to the Las Vegas Valley as regulations and future proposed laws have hampered the industry in those states, starting in 2016. While each company's reasons for moving here vary, interviewed CEOs cited California's Prop 56—which increased consumer taxes on tobacco and vaping products by almost 230 percent starting in 2017—and Washington's House Bill 2165, which proposes to hike up such taxes by more than 60 percent, as contributing factors for their migration to the Valley.

After moving five times around Orange County from 2012 to 2017, Wilson convinced 28 of E-Cig Distributors' then-40 employees to join him in a full-scale move to Las Vegas last March. Operating here for more than a year, Wilson says his company is thriving more than ever in a state that's "much more open to business." He credited local and state economic departments for helping ECD make a "relatively seamless" move.

"We had 45 days to identify a building, pack everybody up and make the move actually happen," he says. "We finally shut down operations in Orange County on a Thursday, and we were open in Las Vegas the next Monday."

Facts and figures about e-cigarettes and vaping products
• Vaping products produce an aerosol by heating a flavored liquid that's inhaled by users into their lungs. The battery-powered products come in varying shapes and sizes and are known as "e-cigs," "mods" and "vape pens" among other nicknames.

• While vaping products save users from tar and other cancer-causing substances found in tobacco and marijuana cigarettes, vape juices can still include harmful chemicals like nicotine, diacetyl and — for weed vapes — THC.

• The vaping industry was worth $10 billion in 2017, and market research estimates it will reach $34 billion by 2021, $46 billion by 2023 and $64 billion by 2025.

• San Francisco-based Juul has 54 percent market share in the industry, and federal officials expect the brand to continue growing among both adults and underage users.

• (Sources: U.S. Centers for Disease Control and Prevention, U.S. Dept. of Health and Human Services, Nielsen)

Jimmy Chen, CEO of Uvaper Wholesale, moved 20 of his 50 employees this year from Kent, Washington, for the chance at a more centrally located distribution headquarters in Las Vegas. Chen, like Wilson, says the move made sense among other reasons because he's able to more easily attract clients to visit Las Vegas than the Pacific Northwest. Chen says he hopes to hire an additional 30 employees at Uvaper's Las Vegas headquarters by the end of the year to keep up with growing business.

Vape industry employees, like Corben Madden, ECD's chief technology officer, says their dollar also goes much further in the Valley, thanks to lower home and rental rates and no state income tax.

AMERICAN OVERSIGHT

“I save a ton of money on each paycheck and my taxes at the end of the year,” he says.

Wilson, Chen and Madden say diversification of the Valley’s economy also was an attractive draw. Traditionally known as a city for gambling and entertainment, the addition of professional sports teams and modern businesses such as Amazon, Postmates, Soothe and others give Las Vegas the feel of a “well-established West Coast city,” Madden says.

But while Nevada has taken a business-friendly approach to the vape industry, federal officials warn a growing number of young users may eventually lead the state to implement tax hikes similar to those in California and Washington. Of the estimated 10 to 12 million vape users in the United States, more than 2 million are underage, according to figures from the U.S. Center of Disease Control.

San Francisco-based brand Juul last month achieved 54 percent of the vape market share, according to statistics from Nielsen, thanks in part to viral videos of its users experimenting with the products on social media. Under heavy pressure, the vape giant declared its support to raise the minimum purchase age for vaping products from 18 to 21 years old and contributed $30 million to research and prevention of underage use of its products.

“Our company’s mission is to eliminate cigarettes and help the more than 1 billion smokers worldwide switch to a better alternative,” says Juul Labs CEO Kevin Burns. “At the same time, we are committed to deterring young people, as well as adults who do not currently smoke, from using our products.”

Brian King, who oversees the CDC’s Office on Smoking and Health, called the growing youth e-cigarette usage statistics “concerning,” adding that almost 60 percent of Americans who vape are also tobacco users. Despite industry marketing claims that e-cigarette products can help people stop smoking tobacco, King says evidence on vape products as healthy alternatives to traditional cigarettes is “not conclusive.” Vaping products have not been proven to help tobacco users quit, either.

“There are some people successfully quitting tobacco with e-cigarettes, but the majority of users are not,” King says. “We know e-cigarettes are safer than combustible cigarettes, but that doesn’t mean they’re safe. The science on the issue is still really mixed.”

Group focuses on bringing Super Bowl, Final Four to Las Vegas
Richard N. Velotta
Las Vegas Review Journal
https://www.reviewjournal.com/business/tourism/group-focuses-on-bringing-super-bowl-final-four-to-las-vegas/

In the end, a newly appointed committee charged with attracting major sporting events to Southern Nevada might need seed money most.

The 19-member Southern Nevada Sporting Event Committee gathered for the first time Friday to begin strategizing about the best ways to attract and finance bids for events like the Super Bowl, the NFL draft, and the NCAA’s Final Four and Frozen Four.

Rossi Ralenkotter, CEO of the Las Vegas Convention and Visitors Authority, noted that the goal of putting more “heads in beds” with high-profile sports events may be more challenging than it looks, because schedulers will

AMERICAN OVERSIGHT

have to avoid bringing in large crowds when big conventions are already in town. He also noted that preparing a competitive bid takes financial resources, so part of the solution could be determining a funding source.

Chaired by Paul Anderson, the committee includes six Nevada Resorts Association members and representatives of the Vegas Golden Knights and the Oakland Raiders.
Some members with venues already in place are already attracting events, including Boyd Gaming's Orleans Arena and MGM Resorts International's T-Mobile Arena, MGM Grand Garden and Mandalay Bay Events Center. By 2020, the new 65,000-seat Las Vegas stadium will be available.

This year the Las Vegas Motor Speedway joins the list of facilities hosting two annual NASCAR weekends.

The South Point has not only one of the best equestrian arenas in the region, but also one of the top bowling centers.

The committee is expected to meet four or five more times before delivering a report to Gov. Brian Sandoval and the Nevada Legislature by Dec. 31.

Members will likely discuss whether a separate sports commission should be formed and the best way for Southern Nevada's sports venues to coordinate efforts to draw high-profile events to the city.

One of the reasons the committee plans to deliver a report by the end of the year is so that it could approach the Legislature for seed money to get started.

Committee members agreed that they want to hear background reports from the LVCVA and Las Vegas Events about how they bring events to Southern Nevada.

A familiar organization will handle staffing responsibilities for the new committee. Brian Gordon, a principal with Las Vegas-based Applied Analysis, has been contracted to provide staffing support for the group. Gordon's associate, Jeremy Aguero, has a similar function with the Las Vegas Stadium Authority.

Gordon said Friday that he would soon set up a website for the committee to provide information for its public meetings.

The next committee meeting hasn't been scheduled, but it is expected to be sometime from July 9-16.

Committee members

-Chairman Paul Anderson, executive director, Governor's Office of Economic Development.

-Andy Abboud, senior vice president, Las Vegas Sands Corp.

-Marc Badain, president, Oakland Raiders.

-Michael Britt, vice president, Government Relations, Red Rock Resorts.

-Carolyn Goodman, mayor of Las Vegas.

-Dallas Haun, chairman, Nevada State Bank.

AMERICAN OVERSIGHT

-John Hill, public relations and advertising representative, Palm Mortuary.

-Steve Hill, chairman, Las Vegas Stadium Authority.

-John Maddox, vice president, Government Relations and Development, Caesars Entertainment Corp.

-John McManus, executive vice president, MGM Resorts International.

-Bill Noonan, senior vice president, Industry and Government Affairs, Boyd Gaming Corp.

-Rossi Ralenkotter, CEO, Las Vegas Convention and Visitors Authority.

-Thom Reilly, chancellor, Nevada System of Higher Education.

-Peter Sadowski, executive vice president, Vegas Golden Knights.

-Mary Beth Sewald, president and CEO, Las Vegas Metro Chamber of Commerce.

-Scott Sibella, chairman of the board, Las Vegas Events.

-Kim Sinatra, executive vice president, general counsel, Wynn Resorts Ltd.

-Steve Sisolak, chairman, Clark County Commission.

-Steve Stallworth, general manager, Arena & Equestrian Center, South Point.

Gov. Brian Sandoval also appointed four non-voting Technical Advisory Committee members: Scott Adams, City of Las Vegas city manager; Clark County Manager Yolanda King; Regional Transportation Commission of Southern Nevada General Manager Tina Quigley; and Clark County Department of Aviation Director Rosemary Vassiliadis.

Heller announces $12 million for Tahoe Restoration Act
Nevada Appeal
https://www.nevadaappeal.com/news/government/heller-announces-12-million-for-tahoe-restoration-act/

Sen. Dean Heller, R-Nev., on Friday announced there will be $12 million in federal funding for fire detection cameras and the battle against invasive species.

Heller said earlier this month he urged the Department of Agriculture and Forest Service to fund and support wildfire prevention and detection efforts. He said Friday there's $6 million in the budget to support innovative wildfire projects including modernizing aviation, radio and evacuation infrastructure. He said the act also contains $2 million specifically to support efforts such as AlertTahoe, a camera system to help detect widlfires in the basin much earlier than other methods.

It also calls on the forest service to work with UNR on wildfire risk mapping.

In addition, he said there's $6 million in the appropriations bill to combat invasive species at the lake.

AMERICAN OVERSIGHT

Nevada DMV makes it easier to change gender on licenses
Associated Press
https://elkodaily.com/news/state-and-regional/nevada-dmv-makes-it-easier-to-change-gender-on-licenses/article_234e65d4-cd43-58b1-9f75-3ea79a1f756d.html#tracking-source=home-top-story

LAS VEGAS (AP) — A doctor's approval is no longer required to change the listed gender on a driver's license or identification card at Nevada's Department of Motor Vehicles, which is working on adding a new option for those who don't identify as male or female.

The previous policy added further costs and stress for trans and gender-nonconforming people, said Jane Heenan, Gender Justice Nevada's clinical director. Heenan recalls one person who spent money on multiple doctor visits because they could not find a physician who would sign off on the form.

"Driver licenses no longer require any kind of external permission or affirmation from medical professionals of any kind," Heenan said. "It reduces the complexities of this process, which are already very complex for people seeking to make these changes. Lifting that burden is significant."

An updated driver's license costs $9.25 and a new ID card is $8.25, according to the DMV.

The change is similar to a move by the Nevada Department of Health and Human Services, which changed its rules in 2016 to allow people to update the gender on their birth certificate using a self-declaration process, The Las Vegas Sun reported Thursday.

"Requiring medical certification of gender identity is an outdated practice," said Kevin Malone, a DMV spokesman.

The DMV has not said when a third option for people who don't identify as male or female will be added.

"We are planning to add a nonbinary gender marker," Malone said. "However, this requires computer system programming and extensive testing with law enforcement and other stakeholders to ensure they receive the proper information."

Nevada prison officials struggle with doctors who refuse to treat inmates
Michelle Rindels
The Nevada Independent
https://thenevadaindependent.com/article/nevada-prison-officials-struggle-with-doctors-who-refuse-to-treat-inmates

Nevada prison officials say they sometimes have to take inmates through the back door or bring them before or after normal business hours for non-emergency medical care because off-site doctors are reluctant to treat them, if they treat them at all.

The hesitance to offer medical care to incarcerated people is one of the reasons cited by a new audit as to why prisons are sometimes resorting to more expensive out-of-network medical providers. Officials say there’s not much they can do to compel in-network providers to see an inmate.

“There is no statutory requirement that they would be forced to provide services to everyone that subscribes to their network,” said John Borrowman, the deputy director of support services at the Nevada Department of Corrections. “We have no leverage statutory or otherwise to force a provider to see an inmate.”

The audit, presented Thursday at the Executive Branch Audit Committee that includes all Nevada constitutional officers, noted that the prisons resorted to out-of-network providers in 16 cases, or about 8 percent of the sample. One example was that the prisons are favoring a single out-of-network urologist in Southern Nevada because that doctor is willing to serve inmates on-site at the remote Ely prison and in conservation camps, so officials also use that physician for off-site appointments.

Borrowman noted that the networks the state buys into for medical care are also used by the general public and other state health groups, such as the Public Employee Benefits Program, and aren’t exclusively designed for inmate populations. He said in a future request for proposals, there may be an effort to gauge how many providers in a network will take inmate patients.

Lt. Gov. Mark Hutchison said he hoped the state could use its leverage as a large payer of health services to negotiate

“We ought to have as a very basic requirement that these folks are willing to provide services for the inmates who need them so we don’t have to keep going outside the network,” he said.

The out-of-network services discussion is part of a larger conversation about how to manage the rising cost of health care in Nevada prisons. In 2017, the department spent $11.7 million on off-site medical expenses alone.

“This has been a concern of mine since I’ve gotten here,” said NDOC Director James Dzurenda. “We have noticed a trend over the years of increasing medical costs and overnight hospital stays.”

Auditors’ suggestions for keeping costs under control included:

Finding a third party administrator who can do “targeted case management” and ensure inmates staying at a hospital are getting only necessary treatments at the best rates. Oregon has implemented this system and reported saving 20 percent on hospital costs over two years.
Reviewing prison medical payouts to ensure they match with the treatment that was authorized by the department’s Utilization Review Committee, which reviews requests for off-site medical care and prioritizes them.

The Indy Explains: Everything you need to know about NV Energy's solar proposal
Riley Snyder and Daniel Rothberg
The Nevada Independent
https://thenevadaindependent.com/article/nv-indy-explains-everything-you-need-to-know-about-nv-energys-solar-proposal

What kind of event could bring together Nevada’s governor, lieutenant governor, a congressman, two gubernatorial candidates and dozens of Assembly and state Senate members?

Far down the list of anyone’s guess would likely be the unveiling of NV Energy’s 2018 Integrated Resource Plan (IRP), a lengthy, data-heavy planning document the utility is required to submit to state regulators every three years detailing how it plans to meet future electric supply and demand.

AMERICAN OVERSIGHT

But members of Nevada's political elite crowded the Springs Preserve last week to hear utility CEO Paul Caudill unveil details of the utility's 2018 IRP, including six proposed agreements to develop six new photovoltaic solar farms throughout the state and several major battery storage projects, doubling the state's renewable energy production by 2023.

The star-studded unveiling, which also includes a contract for potentially the cheapest solar production price in the country, was somewhat unusual for the IRP process, which typically resides in the realm of energy policy wonks and other denizens who follow the normally dry regulatory proceedings.

Unmentioned during the event but clearly present throughout the utility's IRP filing was the specter of Question 3, a proposed constitutional amendment that would end NV Energy's monopoly control of the state's electric market and require the state set up and switch to a competitive retail market by 2023.

NV Energy, which has donated millions of dollars to a PAC opposing the ballot question, states in the IRP application that the expansive planned move toward more renewable generation wouldn't go forward if the ballot measure passes, as the amendment would prohibit the utility from owning generating stations or entering into power purchase contracts with outside firms.

Here's what the IRP process entails, and what the future landscape of Nevada's energy policy could look like over the next three years.

What is an IRP?

Under state law, an electric utility is required to file a "plan to increase its supply of electricity or decrease the demands made on its system by its customers" to the state's Public Utilities Commission every three years, due on June 1.

That broad outline takes the form of a filing consisting of thousands of pages of applications, testimony and appendixes from the utility, a window into how it plans to manage electric demand and procurement of supply over a period stretching out over the next three decades.

From there, the PUC — which consists of three commissioners appointed by the governor — is required to hold hearings and take testimony from any interested parties on the application, and judge it based on several criteria including meeting reliability minimums, the state's renewable portfolio standard and acquiring fuel sources judged on flexibility, diversity and reliability.

After receiving the application, the PUC has 135 days to approve the utility's energy supply plan. This year, that's Oct. 14. The PUC then has 210 days to approve the rest of the plan, which for 2018 falls on Dec. 28, fewer than six weeks before the Legislature convenes.

State lawmakers in 2017 approved a number of changes to the IRP process, including requiring the utility for the first time to file it jointly for its entities serving both Northern and Southern Nevada service territories.

In its 2018 application, NV Energy laid out its broad goals for its future energy supply and demand goals thusly:

"The overarching goal of this 2018 Joint IRP is to meet growth and shrink our exposure to natural gas prices by delivering more low-cost renewable energy to our customers, accelerating our transition to a cleaner energy

AMERICAN OVERSIGHT

future with near-term investments by our (power purchase agreements) counterparties to support new Nevada-based renewable energy resources, shoring up our transmission infrastructure, and increasing or investment in energy efficiency programs."

Clean energy and Question 3

Clean energy advocates see this latest IRP as a shift for the utility, which had approached solar and energy storage projects more conservatively in the past. They also see it as the utility adjusting to the times, a reflection of the dramatic drop in solar and battery storage prices over the past few years, even with the recent tariffs on solar panels imposed by the Trump administration.

One of NV Energy's proposed solar projects, Copper Mountain 5, would provide the cheapest solar energy in the country, according to Greentech Media, which is part of a research firm that tracks solar contract prices. That price could increase after the first year, but the other proposals are similarly low priced contracts, said Colin Smith, an analyst at Greentech Media Research.

"These projects are on par with some of the lowest [contract] prices to date," he said.

The IRP could put more pressure on clean energy groups, many of which have stayed neutral on the Energy Choice Initiative, to decide whether they support the ballot measure or the utility's continued regulated monopoly over the state's energy portfolio. Robert Johnston, a senior attorney at Western Resource Advocates, said there is some concern that moving to an energy choice market might slow down progress on building out large-scale solar projects.

Johnston noted that there would likely be several transition years before Nevada has an open energy market. There is concern among some environmental groups, he said, that during the transition period, there will be a halt in the construction of new solar projects.

"We think it will be a long and complicated process," he said. "And the question is: Who is going to be building new renewable projects during this interval where you could really have a cloud of legal and regulatory uncertainty hovering over the state? … What we've seen in Nevada is that developers won't break ground on these projects until they have a long-term buyer under contract who is committed to buying energy out of that project for the next 20 to 25 years."

Under the proposed plan, the state's energy supply plan would rise from 14 percent renewable in 2017 to 32 percent renewable in 2023.

Jon Wellinghoff, a policy advisor for the ballot measure and former chairman of the Federal Energy Regulatory Commission dismissed these concerns. He argued that companies might invest in clean energy even during the transition period before a restructured market goes into effect.

He laid out a few hypotheticals in which that might be possible. A large company that owns several stores in the state, Wal-Mart for instance, could enter into a contract for a solar facility to serve its stores under energy choice. Or, Wellinghoff said, a casino giant such as MGM Resorts International could invest in solar to aggregate and then offer to its large employee base.

If the market is opened, Wellinghoff said, he expects solar and battery storage to be the predominant types of energy procured because of how competitive their pricing has become.

AMERICAN OVERSIGHT

“There’s no question those are the primary things they’re going to invest in,” he said.

The Question 3 factor

NV Energy says in the filing that it will only move forward with all of the proposed solar projects if Question 3 fails in November. If not, the company would be required to sell off all of their power purchase agreements and power plants as part of the dismantling of the monopoly structure.

If the ballot question passes, the utility proposed going forward with only one of the six proposed renewable energy projects — a 300 solar megawatt power purchase agreement with 8minuteenergy at the Eagle Shadow Mountain Solar Farm. Its IRP filing states that doing so will help the utility’s Northern Nevada operations meet the minimum Renewable Portfolio Standard goal.

The utility is also asking for the approval of four major transmission system upgrades to help interconnect the newly planned renewable energy projects, in total worth $22.9 million and that the utility could later recover through an adjustment in rates. If Question 3 is approved by the voters, the utility is asking the PUC to approve only a $550,000 transmission upgrade.

NV Energy executive Shawn Elicegui wrote in testimony filed with the IRP that because the utility would only need to meet the needs of customers through 2023 if the ballot measure passed, it wouldn’t make sense to enter into several long-term solar power contracts that it would then need to turn around and sell almost immediately.

“NV Energy’s focus will shift from long-term, centralizing planning that focuses on energy supply to short-term planning,” Elicegui wrote in the filing. “Adding six long-term obligations, as well as battery storage to a list of assets that needs to be transferred and which add to the obligations backed by the full faith and credit of the State is not necessary to meet customers’ needs through 2023.”

Does NV Energy really need the proposed solar?

The IRP requires the utility to prepare two analyses, one that addresses supply and another that addresses demand. But the two are interconnected. Growing energy demand has typically been used to justify the need for procuring more supply or building more transmission lines.

For utilities across the country, power sales have flattened or increased at smaller rates, even as economies have grown. Part of this has to do with improvements in energy efficiency.

The same trend is true for NV Energy. In its filing, it forecasts its peak load — the maximum amount of energy required by its customers — to grow at about 0.7 percent in Southern Nevada and dip slightly in Northern Nevada between 2019 and 2029. The forecast is low, the company said, because it factors in the expiration of contracts and an ambitious energy efficiency plan (the IRP proposes cutting sales by more than 1.1 percent through energy efficiency).

Wellinghoff said that even with Valmy plant — the utility’s lone remaining coal-fired plant — coming offline in the near future, the utilities commission might punt on NV Energy’s plan because the utility could satisfy its customers’ needs without new solar farms.

AMERICAN OVERSIGHT

“We’ll be well into the transition to energy choice by [the time they need that energy],” he said.

NV Energy argues that even though adding solar will bring more generation to the grid, it will lower costs over time because the utility will be less reliant on purchasing natural gas. Right now, the utility must choose whether to purchase power on the Western wholesale market or purchase natural gas as fuel for those power plants. The six solar energy projects would give the utility more flexibility to avoid those costs, which could fluctuate in the future.

In the filing, NV Energy said the plan would “shrink customers’ exposure to natural gas prices.”

The utility’s plan also called for extending out the planned lifespan for several of its existing power plants until around 2030 largely to provide capacity support during times of peak electric demand, as most of them are in good operating condition.

Valmy retirement

One of the highlights cited by Caudill and others in the presentation of the IRP is moving up the retirement date for one of the units of the Valmy coal-burning generation plants, the utility’s lone remaining coal-fired facility in the state.

Long a target for environmental groups, the utility initially planned on operating the rural Humboldt County-based plants through their expected retirement date of 2025, to help meet peak demand during hot summer months and because the utility considered coal to be a more reliable resource than large-scale solar.

The IRP filed by the utility calls for one of the two generating plants (which it co-owns with Idaho Power) to be retired by 2021, with the other staying operational through 2025.

But retirement of the Valmy plant is conditioned on several factors, including:

the PUC approving all three Northern Nevada renewable energy projects and coming into operation before June 2022
no unexpected increases in area electric demand that would create a larger energy load
stable conditions in western energy markets
avoiding increases in transmission area load
the commission approving regulatory asset accounts, which would allow the utility to recover the cost of closing the plant early through changes in rates.
NV Energy said the conditions, like the approval of three new solar projects, are necessary to maintain a reliable grid in an area that serves Reno and mining customers near Elko.

Uncertainty over the retirement date is due to various unsolved factors in the utility’s electric supply mix over the next three years, Elicegui wrote in a filing submitted as part of the IRP, requiring a series of tests to ensure that retiring the plant early wouldn’t disrupt the utility’s ability to deliver electricity during peak demand times.

“While our current long-term reliability assessment indicates that we should be able to retire North Valmy Unit 1 in 2021 without compromising our fundamental directive – to safely and reliably deliver low-cost energy to customers – we need to confirm those findings with additional analysis as 2021 approaches,” Elicegui wrote in the filing.

AMERICAN OVERSIGHT

‘Nobody likes’ family separation policy, Trump adviser says
Associated Press
https://www.reviewjournal.com/news/nation-and-world/nobody-likes-family-separation-policy-trump-adviser-says/

WASHINGTON — A top White House adviser on Sunday distanced the Trump administration from responsibility for separating migrant children from their parents at the U.S.-Mexico border, even though the administration put in place and could easily end a policy that has led to a spike in cases of split and distraught families.

President Donald Trump has tried to blame Democrats for a situation that has sparked a national debate over his hard-line approach to immigration enforcement.

“Nobody likes” breaking up families and “seeing babies ripped from their mothers’ arms,” said Kellyanne Conway, a counselor to the president.

Nearly 2,000 children were separated from their families over a six-week period in April and May after Attorney General Jeff Sessions announced a new “zero-tolerance” policy that refers all cases of illegal entry for criminal prosecution. U.S. protocol prohibits detaining children with their parents because the children are not charged with a crime and the parents are.

The administration wants to send a message, said a Republican critic of the policy, “that if you cross the border with children, your children are going to be ripped away from you. That’s traumatizing to the children who are innocent victims, and it is contrary to our values in this country.”

Maine Sen. Susan Collins added that “we know from years of experience that we need to fix our immigration laws and that using children is not the answer.”

Trump plans to meet with House Republicans on Tuesday to discuss pending immigration legislation amid an election-season debate over an issue that helped vault the New York real estate mogul into the Oval Office in 2016. The House is expected to vote this week on a bill pushed by conservatives that may not have enough support to pass, and a compromise measure that the White House has endorsed.

In other developments surrounding the immigration controversy:

— A Republican congressman from Texas who toured a tent-like shelter for hundreds of minors who entered the country illegally said Saturday the facility is a byproduct of a flawed immigration strategy. U.S. Rep. Will Hurd said the shelter near the Tornillo port of entry in far West Texas will house about 360 boys who are 16 and 17. The teens began arriving Friday, the same day Hurd toured the shelter, he said, noting that they’re being moved from other shelters to make way for younger immigrant children taken into custody at the border.

— The intensifying the divide among Republicans over immigration policy is fueling concerns that a voter backlash could cost the GOP control of the House in November. To many conservatives, the compromise immigration proposal released this past week by House Speaker Paul Ryan, R-Wis., is little more than “amnesty.” One tea party group described the Republican plan as “the final betrayal.” Fox Business host Lou

Dobbs, who is close to President Donald Trump, tweeted Friday that Ryan is "trying to open our borders even more and give illegal immigrants the biggest amnesty in American history."

— Scuttling immigration legislation could turn off independent voters, an especially important bloc for House Republicans competing in dozens of districts that Democrat Hillary Clinton won in the 2016 presidential election. "The GOP's in a tough spot," said Republican pollster Frank Luntz. "The hardcore Trump voter has a different point of view than the ever-important independent voter, and there doesn't seem to be a middle ground."

Conway rejected the idea that Trump was using the kids as leverage to force Democrats to negotiate on immigration and his long-promised border wall, even after Trump tweeted Saturday: "Democrats can fix their forced family breakup at the Border by working with Republicans on new legislation, for a change!"

To Rep. Adam Schiff, D-Calif., the administration is "using the grief, the tears, the pain of these kids as mortar to build our wall. And it's an effort to extort a bill to their liking in the Congress."

Schiff said the practice was "deeply unethical" and that Republicans' refusal to criticize Trump represented a "sad degeneration" of the GOP, which he said had become "the party of lies."

Conway, however, put the onus on Democrats, saying if there are serious about overhauling the system, "they'll come together again and try to close these loopholes and get real immigration reform."

Asked whether the president was willing to end the policy, she said: "The president is ready to get meaningful immigration reform across the board."

More directly, Rep. Ben Ray Lujon, D-N.M., said Trump "could pick up the phone and stop it today."

The House proposals face broad opposition from Democrats, and even if a bill does pass, the closely divided Senate seems unlikely to go along.

Rep. Michael McCaul, who helped write the conservative version with Rep. Bob Goodlatte, said he had spoken to Trump on Saturday and that the president "is fully committed to both of these bills. He's put the full weight of his office behind it."

McCaul, R-Texas, said both bills satisfy Trump's main objectives.

"Without him coming to Capitol Hill on Tuesday, I don't think we'd have that sort of maximum pressure, if you will, to get us across the goal line, and I anticipate on Tuesday that he's going to be the leader he is and we're going to get something passed out of the House," said McCaul, R-Texas.

Trump's former chief strategist said Republicans would face steep consequences for pushing the compromise bill because it provides a path to citizenship for young "Dreamer" immigrants brought to the country illegally as children. Steve Bannon argued that effort risked alienating Trump's political base and contributing to election losses in November, when Republicans hope to preserve their congressional majorities.

“I strongly recommend that we just wait until 2019, right, to address this,” he said, while defending the administration’s practice of separating parents from children as an example of Trump making good on a key campaign promise.

“We ran on a policy, very simply, stop mass illegal immigration and limit legal immigration, get our sovereignty back, and to help our workers, OK? And so he went to a zero tolerance policy,” Bannon said. “Zero tolerance, it’s a crime to come across illegally, and children get separated,.”

Rep. Beto O’Rourke, D-Texas, said he was working on legislation that would end the practice of family separation.

Speaking from Texas, where he was leading a march to a town where a new tent structure for children recently opened, O’Rourke said “we can do the right thing by this country and for those kids, and not do it at the price of a 2,000-mile, 30-foot-high, $30 billion wall, not doing it at the price of deporting people who are seeking asylum, deporting people in some cases back to certain death, not doing it at the cost of ending family migration, which is the story of this country.”

The situation now is “inhumane” and “un-American,” he said. The blame, he said, rests “on all of us, not just the Trump administration.”

Conway and Schiff appeared on NBC’s “Meet the Press,” Collins was on CBS’ “Face the Nation,” Lujan and Bannon spoke on ABC’s “This Week,” O’Rourke was interviewed on CNN’s “State of the Union” and McCaul was on Fox’s “Sunday Morning Futures.”

AMERICAN OVERSIGHT

CARSON CITY, Nev. — The annual Stewart Father's Day Powwow was held at the Stewart Indian School on Father's Day weekend.

The Native American Culture event included competition dancing and food, in which participants experienced American Indian heritage, history and pride.

Families and friends gathered to enjoy Indian tacos as well as arts and crafts from vendors.

Nevada Governor Brian Sandoval was an an attendee of the event.

The Stewart Father's Day Powwow benefits the establishment of the Stewart Indian Cultural Center. It was named the 2015 Event of the Year by the Carson City Chamber of Commerce.

Opportunity Zones certified in Nevada
Nevada Appeal
https://www.nevadaappeal.com/news/business/opportunity-zones-certified-in-nevada/

Gov. Brian Sandoval says the U.S. Treasury has certified Nevada's Opportunity Zones.

He said the designation will encourage private investment in parts of Nevada in the most need and "kick start" construction of affordable housing projects.

"From Southern Nevada to Northern Nevada and areas in between, the certification of Nevada's designated Opportunity Zones will benefit communities big and small," he said.

Opportunity Zones are intended to generate investment in low-income communities by providing tax breaks to private investors.

Nevada voters can take the lead on renewable energy development
Las Vegas Sun editorial
https://lasvegassun.com/news/2018/jun/17/nevada-voters-can-take-the-lead-on-renewable-energ/

In 1997, Nevada became one of the first states in the U.S. to adopt a minimum requirement for green energy production.

Today, however, other states have zoomed past us in setting such standards. In fact, Nevada's requirement for 25 percent of our energy to come from renewable sources no longer ranks us in the top 10. We're trailing New Jersey, of all places. New Jersey!

So it's commendable that a group known as Nevadans for Clean Future Energy has been working on an initiative to boost Nevada's minimum to 50 percent by 2030.

The group is circulating a petition that would put the initiative on a statewide ballot. Tuesday is the last day the group can collect signatures.

Organizers say they're confident the petition drive will be successful, which is good to hear. The initiative deserves a spot on the ballot.

Nevadans have shown time and again they support development of renewable energy, so it's worthwhile to debate whether to bump up the requirement to 50 percent. It's also worth exploring considering the popularity of a similar bill in the 2017 Nevada Legislature, which would have raised the minimum to 40 percent.

Gov. Brian Sandoval vetoed that measure, saying its passage was "premature in the face of evolving energy policy in Nevada." Sandoval said the requirement — technically known as a Renewable Portfolio Standard — could create complications given the likely passage of the Nevada Energy Choice Initiative ballot issue, which would allow Nevadans to choose their energy provider in the same way they select a cable/internet provider. Specifically, Sandoval was concerned that the increased RPS would create added costs that would deter providers from entering the market or be passed along to customers in the form of higher electricity rates.

Sandoval also said the change could result in higher fees for resorts and large corporations to exit the NV Energy grid and obtain their power from third parties.

Those points will no doubt be discussed if the RPS initiative gets on the ballot, but there's one thing that's not up for debate: Setting a higher requirement is the only guarantee for Nevadans that renewable energy production will expand here.

And that's important, because there are clear benefits from growing the state's green energy industry.

Our abundance of sunlight and our above-average potential in geothermal production makes us one of the nation's best-suited places to develop renewables, yet only about 18 percent of our energy is generated by those sources. Meanwhile, we're spending roughly $700 million a year to import natural gas and other fossil fuels to power the state's grid.

Boosting production from renewable sources would not only reduce those costs, but would help free the state from volatility in the fossil fuel market.

It would also generate economic activity, of which the current 25 percent standard has already yielded $7 billion in solar and geothermal operations.

Other benefits would come from reducing carbon emissions, which would help improve air quality and reduce respiratory problems triggered by air pollution. Nevada produced 35 million metric tons of carbon dioxide in 2015, which would be reduced by 3 million tons a year under the initiative.

Whether this is the right time to increase the standard, and whether this is the right level for Nevada, are questions that should be debated.

Getting the question on the ballot is a starting point, though, which is why the petition deserves support.

More Nevada kids have health insurance, but state 9th worst
Jessie Bekker
Las Vegas Review Journal
https://www.reviewjournal.com/life/health/more-nevada-kids-have-health-insurance-but-state-9th-worst/

The number of children in Nevada without health insurance was cut by more than half between 2011 and 2016, but the state's rate of uninsured kids remains the ninth-highest in the U.S., according to a new report.

The gains in insurance coverage occurred after passage of the Affordable Care Act in 2010 and Nevada's subsequent expansion of the federal Medicaid program, said Elizabeth Lukanen, deputy director of the State Health Access Data Assistance Center. The policy research center based at the University of Minnesota released the report Friday.

Denise Tanata, executive director for the Children's Advocacy Alliance, a nonprofit in Nevada, said the state's current rate of uninsured children of 6.3 percent is a big improvement from the beginning of the decade.

"We're absolutely still behind, and we've got a ways to go to catch up, but we're definitely moving in the right direction to do that," Tanata said. "The fact we're not last anymore is good."

The report analyzed U.S. Census Bureau survey data in all 50 states and Washington, D.C., tracking changes in public and private coverage and in the uninsured rate by race and ethnicity and household members' income and educational status.

From worst, to ninth

Lukanen said the drop in the state's uninsured rate quickened after 2013.

That may have been the result of the ACA's individual mandate requiring uninsured Americans to acquire health insurance or pay a penalty, which took effect the next year, Tanata said. Parents typically buy their children insurance when acquiring it for themselves, she said.

The Medicaid expansion, which doubled the number of Nevadans insured under the program to 600,000, also took effect the next year, lowering the uninsured rate for children and adults alike.

"Definitely, Nevada was sort of a standout state in terms of reductions in uninsurance," Lukanen said.

The 8.1 percentage point decline in the state's uninsured rate among children between 2013 and 2016 was the largest percentage point drop in the nation, she noted.

Even so, Nevada remains among the worst states in terms of its uninsured rate among children. That's because it started as worst in the nation in 2013, when 14.4 percent of children in the state lacked health insurance, ahead of No. 2 Texas, which had a rate of 13.2 percent.

"It's kind of an uphill battle," Lukanen said.

Disparities persist

Despite significant improvements across the board, disparities in insurance rates persist in the Silver State. About 10 percent of Hispanic children and children from households where family members achieved a high school education or less still lack health insurance, the report said.

One reason may be that parents whose children are eligible aren't signing them up.

AMERICAN OVERSIGHT

For example, undocumented parents often fear sharing their personal information with the government could lead to deportation or cancellation of a residency application, Tanata said, meaning they are reluctant to apply for their citizen children.

That's despite the 2017 passage of state Senate Bill 325, which eliminated the five-year wait period to become eligible for Medicaid and Children's Health Insurance Plan previously required for children who were granted legal residence.

Lukanen and Tanata fear that questions about the future of the Affordable Care Act and the demise of its individual mandate provision, as well as anti-immigrant rhetoric from some Republican lawmakers, could reverse the progress made in Nevada and across the nation.

"I think every time you infuse uncertainty and question into a policy area, people get confused and, most likely, lose out," she said.

New Clark County schools superintendent faces trust-building challenge
Meghin Delaney
Las Vegas Review Journal
https://www.reviewjournal.com/news/education/new-clark-county-schools-superintendent-faces-trust-building-challenge/

ORLANDO, Fla. — Establishing trust.

That, in two words, is the biggest challenge facing Jesus Jara when he arrives this week to become the Clark County School District superintendent.

There are obvious similarities between Las Vegas and Orlando, but the climates of the two tourist meccas' school systems are not among them.

In Orlando, where Jara, 48, just concluded a six-year run as deputy superintendent, district officials, the school board and parents all seem to pull in the same direction to move the academic needle upward.

That's hardly the case in Clark County, where trust among district officials, legislators, parents and trustees often seems nonexistent and divisions threaten to undermine modest progress in academic achievement.

Jara — who doesn't mind whether you pronounce his last name with a J or an H — is aware of the challenge awaiting him when he clocks in Tuesday.

During a recent visit with the Las Vegas Review-Journal in his last weeks on the job in Florida, he said earning the trust of the entire community is critical to propelling the district forward.

But he also said he views what others see as mistrust a little differently, calling it a "passion" for students and education.

"The passion I can work with," he said. "What we need to do is just channel it together to … work as one and collaborate together so we can then have a real clear focus on being the No. 1 district for kids."

Operating transparently and having open dialogues are two ways Jara thinks Clark County can begin to build a culture around education that resembles Orlando's.

Rebecca Garcia, a 39-year-old with three children attending Clark County schools, said it's going to take a lot of showing up for Jara to restore her trust. But she acknowledges being impressed by his skills, experience and temperament in his interview with trustees.

"I think CCSD is at a juncture where we need a fresh perspective who is willing to leave the status quo, who isn't part of the status quo and who can set a new direction for the district," Garcia said.

Jara says Clark County parents can get a good sense of the approach he will bring by looking at changes that have occurred in Orange County, Florida, in recent years, including voters entrusting the school district with more tax money through ballot initiatives.

Overall, Jara said, Orange County schools have found a good balance between school autonomy and central oversight.

He wants to implement a similar structure in the Clark County district, which is still wrestling with the Legislature-mandated reorganization.

Budget flexibility

To demonstrate the flexibility of the Orange County system and illustrate how it can adjust to different challenges, Jara took a reporter on a tour of five schools.

At Colonial High School, he discussed principal autonomy, using the school's third-year principal, Jose Martinez, as an example.

The school, which serves up to 3,600 students, is similar to many Clark County high schools. It is 87 percent nonwhite. It's a Title I school, and 71 percent of students qualify for free or reduced lunch under federal standards, an indicator of poverty.

It's earns a consistent "C" on Florida's five-tier rating scale.
But unlike most Clark County schools, every student has their own tablet.

Also, the principal has near-complete control over the budget, as long as the school meets the district's criteria for academic achievement. That's similar to what's being done in Clark County, though at this point Orange County principals appear to have more spending flexibility. That required additional budgeting training for principals, Jara said.

At Colonial, for example, Martinez responded to parent and student feedback by cutting a couple coaching positions and using that money to cover fees for band and orchestra programs. There's money available for dry-cleaning uniforms, for example.

A better example came from Colonial's enrollment of roughly 200 Puerto Rican students who fled to Florida after Hurricanes Irma and Maria decimated their homeland.

AMERICAN OVERSIGHT

“We knew right away we needed a system in place,” Jara recalled, sipping from a cup of Dunkin Donuts coffee as he described how Martinez and his team jumped into action to prepare for the influx.

The solution included getting the school’s Latinos in Action club involved.

A spinoff of student government clubs, Latinos in Action operates in a handful of Orange County schools and focuses heavily on mentorship.

Because the system was already in place, Martinez said, it was easier to absorb the newcomers with only minimal disruption to other students.

School turnaround

While the district lets schools like Colonial make such calls, schools that aren’t cutting it academically have less autonomy.

Washington Shores Elementary School was a dilapidated facility nestled into an old, historically impoverished neighborhood.

Four years ago, the school received an “F” rating and a promise of support from the district. That included a spot in the school transformation office that Jara helped create and replacement of the old building.

Nate Stephens, the principal brought in to lead the transformation, grew up in the neighborhood and serves as the ultimate role model for the children.

“This is the exit from the neighborhood. This is personal for me,” he said.

Part of the transformation involved training teachers on how to talk to students using higher-level vocabulary to set an example, Stephens said. If you hold high expectations, he said, the students can and will meet them.

In the latest state ratings, the school climbed to a “C.”

During the tour of the school, students impressed Jara with their vocabularies. He sat with a kindergarten student who used the word “bacteria” in an essay on ice cream. A third-grade student talked about how physical activity teaches “collaboration.”

“It’s the same kids, the same community, learning at a higher level,” Jara said.

The transformation office is similar to Clark County’s turnaround initiatives but more advanced in some ways. For instance, it has a system to ease schools back to the mainstream once they reach an achievement standard. Over two to three years, the school is weaned off transformation office support, and budgetary control is returned to the principal.

That prevents what some Clark County schools with high-needs students are seeing now when certain state funding measures, like the Zoom and Victory programs, provide extra support only to vanish once student achievement improves.

AMERICAN OVERSIGHT

That's one reason Jara likes systems that focus on and reprioritize existing funds rather than relying on new money.

'Master' principals

Next on Jara's list is Millennia Elementary School, which shares Principal Anne Lynaugh with nearby Millennia Gardens Elementary School, similar to Clark County's "franchise principal" program.

The idea of both programs is to leverage experience and talent, but Jara said he worries about burnout. Both districts also have training programs aimed at nurturing up-and-coming administrative talent.

In Lynaugh's schools, Jara shows a knack for connecting with students, easily slipping into and out of his native Spanish. Jara moved to Miami from Venezuela when he was 10.

"My parents had a vision of the American Dream, and I'm living it," Jara said over a chicken sandwich and Diet Coke, one of three cans consumed during the daylong visit.

Like their Clark County counterparts, Orange County students speak a multitude of languages, which can sometimes pose a problem, said Lynaugh. But with technology in every classroom and the rise of programs like Google Translate, students who aren't yet fluent in English are able to work independently.

Hands-on learning

Next up is Orange Technical College.

Don't let the name deceive you. Students do not earn bachelor's or associate degrees but can pursue a wide range of career certifications.

Funded by the state and run by districts, Florida's technical colleges are similar to vocational schools. They are open to adults and high school students. Adults pay tuition and any required fees, while students generally pay only for supplies or instructional materials.

Five campuses in Orange County offer more than 40 programs, including cosmetology, mechanics, animation and welding. Students spend half their days at their zoned high school and half in their career or technical program.

Jara's son, Alex — second-oldest of his three kids — is an alumnus, collecting a welding certificate two days before his high school graduation.

"This is hands-on learning," the elder Jara said.

The schools defy the notion that vocational schools are somehow lesser. Through partnerships with high-profile companies and up-to-date programs, including modeling simulation design and production, it's remarkable what they can accomplish, Jara said.

For example, combining a standard program like brick masonry with virtual reality technology keeps costs down by letting students practice in a simulation before actually laying bricks.

AMERICAN OVERSIGHT

Closing achievement gaps

The last stop is Hunter's Creek Middle School, which is consistently rated at the highest level by the state. Principal Amy McHale is about to get even more autonomy and flexibility as she tries to narrow the achievement gap between the school's highest- and lowest-performing students.

But again, the district has a system for her to work within. She's allowed to try innovative approaches, mostly involving technology, but must narrow the gap — a goal the Clark County schools also have been pursuing under outgoing Superintendent Pat Skorkowsky — within three years.

Her plans include moving students to two days of block scheduling next year to devote more time to math and "really focus on the gaps," she said.

On to Clark County

Although Jara will be across the country by then, he promised to keep a close eye on Orlando and maintain a close relationship with Orange County Superintendent Barbara Jenkins, whom he called the greatest school superintendent in the country.

That comment came at his last School Board meeting in late May, where he was showered with praise from trustees. He also had the chance to lay out some of his hopes for Clark County.

"I hope to become sister school districts to replicate the work of the talented administrators and phenomenal teachers in Orange County," he said.

Time will tell if culture change can also be exported.

Federal lands law jeopardizes future of Nevada's Mint 400
Michael Scott Davidson
Las Vegas Review Journal
https://www.reviewjournal.com/news/politics-and-government/clark-county/federal-lands-law-jeopardizes-future-of-nevadas-mint-400/

Since its creation 50 years ago, the Mint 400 off-road race has become local legend.

The 120-mile-long desert loop that runs east of Interstate 15 between Las Vegas and Primm is known for its unforgiving difficulty. About half the trucks and dune buggies that start the race are unable to finish.

The event was immortalized in 1972 in journalist Hunter S. Thompson's novel "Fear and Loathing in Las Vegas."

This year's iteration of the event, held in March, drew an estimated 35,000 attendees from around the world and created $40 million in economic impact for the state, according to Josh Martelli, who co-owns the race with his brother, Matt.

"It is our Indy 500," Martelli said.

AMERICAN OVERSIGHT

But the race's future in Southern Nevada is being threatened by federal legislation that would open nearly 39,000 acres of federal land for development, including land south of the Las Vegas Valley. Clark County commissioners are scheduled to vote Tuesday whether to sign a resolution supporting the legislation.

Martelli said the northern half of the Mint 400 course crosses that land. Moving the route would cause the race to lose some of its difficulty and accompanying prestige. And finding a new route would be difficult because of protections for animals such as the desert tortoise.

"This proposal eliminates at least 40 to 50 miles of our racecourse, and we don't really have a lot of good alternatives," he said. "We're essentially being sandwiched between new commercial development and preservation of natural resources."

Martelli said county staffers have assured him they will support preservation of the racecourse through 2023 and help identify an alternative route. But the race organizer said the next best place to hold the race would be near Phoenix.

"That would be a huge economic loss for Clark County and Las Vegas," Martelli said.

The land proposal has also drawn the ire of other off-road organizations.

"Not only will it affect competitive events, (but) it will also affect people that go out and ride on the weekend," said Kenny Thatcher, president of Southern Nevada Off Road Enthusiasts. "There's probably over 300,000 off-highway vehicles in Clark County."

Thatcher said those vehicles are owned by people spending money on gas, car parts and auto repairs. They often stop in Primm for lunch when they go riding.

"Primm Valley stands to lose a lot from it," Thatcher said. "We're blue-collar people. We have disposable income, and this is how we use it. It's a big industry."

At their Tuesday meeting, commissioners also will discuss the formation of a committee focused on preserving local off-road recreation. Additionally, they will decide whether to sign an agreement with Nellis Air Force Base that would give the county ownership of almost one-tenth of the 10,000 acre Nellis Dunes off-road recreation area north of Las Vegas

Martelli said he views the committee idea as an olive branch from the County Commission to the off-road community, but both he and Thatcher remain wary of what effect such a committee could have.

Regardless, Thatcher said he hopes to bring at least 300 people to the commission meeting to oppose the lands bill.

"If they think they're going to send everyone out to the Nellis Dunes, you can't put 300,000 people in 10,000 acres. It's not going to work," Thatcher said. "We'll have to go outside of Clark County to do anything."

Resolution up for approval

AMERICAN OVERSIGHT

Clark County Commission is slated to vote Tuesday on a resolution seeking federal legislation to open almost 39,000 acres of public land for development and set aside more than 370,000 acres of new wilderness and protected areas for the desert tortoise and other threatened species.

The four-page resolution outlines 15 separate transactions, including a 41,000-acre expansion of the Moapa River Indian Reservation, several new or expanded wilderness areas totaling almost 83,000 acres and nine areas of "critical environmental concern" totaling almost 293,000 acres.

The document and related maps are available for review on the county's website at https://bit.ly/2JHlh1d.

County officials gave the general public its first look at the proposal during a June 5 open house, then accepted written input for a week.

Those wishing to provide further input will have to do so during public comment Tuesday.

The commission meeting is slated to start at 9 a.m. The resolution is item No. 97 on the agenda.

Many Nevada drivers to pay more for minimum liability coverage
Art Marroquin
Las Vegas Review Journal
https://www.reviewjournal.com/news/news-columns/road-warrior/many-nevada-drivers-to-pay-more-for-minimum-liability-coverage/

Nevada drivers might want to double-check their insurance, because changes are coming in about two weeks.

The threshold for minimum liability coverage goes up July 1 under a law approved during last year's legislative session.

New minimums require motorists to carry $25,000 per person for bodily injury, $50,000 per accident, plus $20,000 for property damage coverage per accident, officials with the Nevada Department of Motor Vehicles said.

That's a significant jump from the current requirement of $15,000, $30,000 and $10,000, respectively — currently ranked as the second-lowest in the United States, DMV officials said.

"The costs of medical care and automobile repairs have gone up significantly," Nevada DMV Director Terri Albertson said. "The cost of a crash can easily exceed these older minimums."

About 32 percent of Nevada's 2.3 million licensed drivers carried the minimum coverage as of last year, including the Road Warrior.

Most drivers were notified about the need for increased coverage during their most recent policy renewals. And like many of you, the Road Warrior made the required adjustments to his policy last month.

Depending on your driving record and insurance company, the change in rates could range from $10 to $50. Insurance companies will no longer be allowed to write the lower limits; those that do could be sanctioned, DMV spokesman Kevin Malone said.

AMERICAN OVERSIGHT

Scofflaw drivers failing to purchase auto liability insurance at the new minimum limits could be cited and fined and have their vehicle registration canceled until the appropriate coverage is purchased, according to the Nevada Division of Insurance website.

Local leaders meet with Nevada politicians on development goals
Bailey Schulz
Las Vegas Review Journal
https://www.reviewjournal.com/business/local-leaders-meet-with-nevada-politicians-on-development-goals/

A group of 25 business and community leaders from the Las Vegas Global Economic Alliance and local chambers met with congressional delegations and agencies this week in Washington, D.C., to discuss policy issues affecting Southern Nevada.

The Federal Forum, held Tuesday and Wednesday, discussed big-picture issues including the impact of Yucca Mountain on economic development and tourism, I-11's development and the future of the autonomous vehicle industry in Las Vegas.

The alliance is a private-public partnership that works with the Governor's Office of Economic Development and other state partners to recruit new businesses to the state and to expand existing businesses that export at least half of their goods or services outside of Nevada. It achieves its mission largely by preparing companies to be approved for state tax abatements.

Ray Specht, who chairs the LVGEA's policy committee, said the forum touched on how to keep expanding the local economy when it already is seeing growth in areas such as employment and population.

"One of the things we talked about is how now is not the time to take the foot off the gas pedal," Specht said. "What do we do to make LGVEA the most competitive regional development authority?"

Lisette Partelow, the director of K-12 strategic initiatives at the Center for American Progress, a think tank in Washington, spoke about education policy at one of the forum's sessions. She said the group had an insightful discussion on short- and long-term goals on how to improve teacher recruitment and retainment. Suggestions included improving salaries and requiring higher degrees for certain positions.

The forum was also meant to help strengthen relationships between the LVGEA and delegation.

"Our entire delegation has been very open and willing to work with us," alliance CEO and President Jonas Peterson said.

Peterson said the access to state politicians will help to accomplish the group's priorities.

"There's a clear sense of where we want to go and what we want these policy programs to look like."

Vaping industry credits economy, lower taxes for its migration to Las Vegas
Vegas INC
https://vegasinc.lasvegassun.com/business/2018/jun/18/vaping-industry-credits-economy-lower-taxes-for-it/

AMERICAN OVERSIGHT

When they were first mass produced, e-cigarettes and vaping products formed an industry widely considered to be a dud in the United States. Popularized in China in the early 2000s, they launched with little fanfare in the U.S. past decade as a less harmful alternative to tobacco.

But in recent years, the battery-powered vaporizer industry has taken off. It was worth $10 billion in 2017, and market research estimates it will reach $34 billion by 2021, $46 billion by 2023 and $64 billion by 2025.

As neighboring states have thrown in massive taxes and regulations to combat large vaping corporations from growing too much, many companies are moving to Las Vegas.

"This city gives people a well-rounded life, and from a traffic perspective, everybody's time is being used more efficiently," says Billy Wilson, CEO of online retail and wholesale supplier E-Cig Distributors. "It's great for business because it's easy to convince clients to come to Las Vegas for meetings and conventions. You don't have to twist too many arms."

Wilson's company, which distributes almost 10 million e-cig products around the world each year, is one of more than a dozen vaping mega-companies to move from California and Washington to the Las Vegas Valley as regulations and future proposed laws have hampered the industry in those states, starting in 2016. While each company's reasons for moving here vary, interviewed CEOs cited California's Prop 56—which increased consumer taxes on tobacco and vaping products by almost 230 percent starting in 2017—and Washington's House Bill 2165, which proposes to hike up such taxes by more than 60 percent, as contributing factors for their migration to the Valley.

After moving five times around Orange County from 2012 to 2017, Wilson convinced 28 of E-Cig Distributors' then-40 employees to join him in a full-scale move to Las Vegas last March. Operating here for more than a year, Wilson says his company is thriving more than ever in a state that's "much more open to business." He credited local and state economic departments for helping ECD make a "relatively seamless" move.

"We had 45 days to identify a building, pack everybody up and make the move actually happen," he says. "We finally shut down operations in Orange County on a Thursday, and we were open in Las Vegas the next Monday."

Facts and figures about e-cigarettes and vaping products

• Vaping products produce an aerosol by heating a flavored liquid that's inhaled by users into their lungs. The battery-powered products come in varying shapes and sizes and are known as "e-cigs," "mods" and "vape pens" among other nicknames.

• While vaping products save users from tar and other cancer-causing substances found in tobacco and marijuana cigarettes, vape juices can still include harmful chemicals like nicotine, diacetyl and — for weed vapes — THC.

• The vaping industry was worth $10 billion in 2017, and market research estimates it will reach $34 billion by 2021, $46 billion by 2023 and $64 billion by 2025.

• San Francisco-based Juul has 54 percent market share in the industry, and federal officials expect the brand to continue growing among both adults and underage users.

• (Sources: U.S. Centers for Disease Control and Prevention, U.S. Dept. of Health and Human Services, Nielsen)

AMERICAN OVERSIGHT

Jimmy Chen, CEO of Uvaper Wholesale, moved 20 of his 50 employees this year from Kent, Washington, for the chance at a more centrally located distribution headquarters in Las Vegas. Chen, like Wilson, says the move made sense among other reasons because he's able to more easily attract clients to visit Las Vegas than the Pacific Northwest. Chen says he hopes to hire an additional 30 employees at Uvaper's Las Vegas headquarters by the end of the year to keep up with growing business.

Vape industry employees, like Corben Madden, ECD's chief technology officer, says their dollar also goes much further in the Valley, thanks to lower home and rental rates and no state income tax.

"I save a ton of money on each paycheck and my taxes at the end of the year," he says.

Wilson, Chen and Madden say diversification of the Valley's economy also was an attractive draw. Traditionally known as a city for gambling and entertainment, the addition of professional sports teams and modern businesses such as Amazon, Postmates, Soothe and others give Las Vegas the feel of a "well-established West Coast city," Madden says.

But while Nevada has taken a business-friendly approach to the vape industry, federal officials warn a growing number of young users may eventually lead the state to implement tax hikes similar to those in California and Washington. Of the estimated 10 to 12 million vape users in the United States, more than 2 million are underage, according to figures from the U.S. Center of Disease Control.

San Francisco-based brand Juul last month achieved 54 percent of the vape market share, according to statistics from Nielsen, thanks in part to viral videos of its users experimenting with the products on social media. Under heavy pressure, the vape giant declared its support to raise the minimum purchase age for vaping products from 18 to 21 years old and contributed $30 million to research and prevention of underage use of its products.

"Our company's mission is to eliminate cigarettes and help the more than 1 billion smokers worldwide switch to a better alternative," says Juul Labs CEO Kevin Burns. "At the same time, we are committed to deterring young people, as well as adults who do not currently smoke, from using our products."

Brian King, who oversees the CDC's Office on Smoking and Health, called the growing youth e-cigarette usage statistics "concerning," adding that almost 60 percent of Americans who vape are also tobacco users. Despite industry marketing claims that e-cigarette products can help people stop smoking tobacco, King says evidence on vape products as healthy alternatives to traditional cigarettes is "not conclusive." Vaping products have not been proven to help tobacco users quit, either.

"There are some people successfully quitting tobacco with e-cigarettes, but the majority of users are not," King says. "We know e-cigarettes are safer than combustible cigarettes, but that doesn't mean they're safe. The science on the issue is still really mixed."

Group focuses on bringing Super Bowl, Final Four to Las Vegas
Richard N. Velotta
Las Vegas Review Journal
https://www.reviewjournal.com/business/tourism/group-focuses-on-bringing-super-bowl-final-four-to-las-vegas/

In the end, a newly appointed committee charged with attracting major sporting events to Southern Nevada might need seed money most.

The 19-member Southern Nevada Sporting Event Committee gathered for the first time Friday to begin strategizing about the best ways to attract and finance bids for events like the Super Bowl, the NFL draft, and the NCAA's Final Four and Frozen Four.

Rossi Ralenkotter, CEO of the Las Vegas Convention and Visitors Authority, noted that the goal of putting more "heads in beds" with high-profile sports events may be more challenging than it looks, because schedulers will have to avoid bringing in large crowds when big conventions are already in town. He also noted that preparing a competitive bid takes financial resources, so part of the solution could be determining a funding source.

Chaired by Paul Anderson, the committee includes six Nevada Resorts Association members and representatives of the Vegas Golden Knights and the Oakland Raiders.
Some members with venues already in place are already attracting events, including Boyd Gaming's Orleans Arena and MGM Resorts International's T-Mobile Arena, MGM Grand Garden and Mandalay Bay Events Center. By 2020, the new 65,000-seat Las Vegas stadium will be available.

This year the Las Vegas Motor Speedway joins the list of facilities hosting two annual NASCAR weekends.

The South Point has not only one of the best equestrian arenas in the region, but also one of the top bowling centers.

The committee is expected to meet four or five more times before delivering a report to Gov. Brian Sandoval and the Nevada Legislature by Dec. 31.

Members will likely discuss whether a separate sports commission should be formed and the best way for Southern Nevada's sports venues to coordinate efforts to draw high-profile events to the city.

One of the reasons the committee plans to deliver a report by the end of the year is so that it could approach the Legislature for seed money to get started.

Committee members agreed that they want to hear background reports from the LVCVA and Las Vegas Events about how they bring events to Southern Nevada.

A familiar organization will handle staffing responsibilities for the new committee. Brian Gordon, a principal with Las Vegas-based Applied Analysis, has been contracted to provide staffing support for the group. Gordon's associate, Jeremy Aguero, has a similar function with the Las Vegas Stadium Authority.

Gordon said Friday that he would soon set up a website for the committee to provide information for its public meetings.

The next committee meeting hasn't been scheduled, but it is expected to be sometime from July 9-16.

Committee members

-Chairman Paul Anderson, executive director, Governor's Office of Economic Development.

AMERICAN OVERSIGHT

-Andy Abboud, senior vice president, Las Vegas Sands Corp.

-Marc Badain, president, Oakland Raiders.

-Michael Britt, vice president, Government Relations, Red Rock Resorts.

-Carolyn Goodman, mayor of Las Vegas.

-Dallas Haun, chairman, Nevada State Bank.

-John Hill, public relations and advertising representative, Palm Mortuary.

-Steve Hill, chairman, Las Vegas Stadium Authority.

-John Maddox, vice president, Government Relations and Development, Caesars Entertainment Corp.

-John McManus, executive vice president, MGM Resorts International.

-Bill Noonan, senior vice president, Industry and Government Affairs, Boyd Gaming Corp.

-Rossi Ralenkotter, CEO, Las Vegas Convention and Visitors Authority.

-Thom Reilly, chancellor, Nevada System of Higher Education.

-Peter Sadowski, executive vice president, Vegas Golden Knights.

-Mary Beth Sewald, president and CEO, Las Vegas Metro Chamber of Commerce.

-Scott Sibella, chairman of the board, Las Vegas Events.

-Kim Sinatra, executive vice president, general counsel, Wynn Resorts Ltd.

-Steve Sisolak, chairman, Clark County Commission.

-Steve Stallworth, general manager, Arena & Equestrian Center, South Point.

Gov. Brian Sandoval also appointed four non-voting Technical Advisory Committee members: Scott Adams, City of Las Vegas city manager; Clark County Manager Yolanda King; Regional Transportation Commission of Southern Nevada General Manager Tina Quigley; and Clark County Department of Aviation Director Rosemary Vassiliadis.

Heller announces $12 million for Tahoe Restoration Act
Nevada Appeal
https://www.nevadaappeal.com/news/government/heller-announces-12-million-for-tahoe-restoration-act/

Sen. Dean Heller, R-Nev., on Friday announced there will be $12 million in federal funding for fire detection cameras and the battle against invasive species.

AMERICAN OVERSIGHT

Heller said earlier this month he urged the Department of Agriculture and Forest Service to fund and support wildfire prevention and detection efforts. He said Friday there's $6 million in the budget to support innovative wildfire projects including modernizing aviation, radio and evacuation infrastructure. He said the act also contains $2 million specifically to support efforts such as AlertTahoe, a camera system to help detect widlfires in the basin much earlier than other methods.

It also calls on the forest service to work with UNR on wildfire risk mapping.

In addition, he said there's $6 million in the appropriations bill to combat invasive species at the lake.

Nevada DMV makes it easier to change gender on licenses
Associated Press
https://elkodaily.com/news/state-and-regional/nevada-dmv-makes-it-easier-to-change-gender-on-licenses/article_234e65d4-cd43-58b1-9f75-3ea79a1f756d.html#tracking-source=home-top-story

LAS VEGAS (AP) — A doctor's approval is no longer required to change the listed gender on a driver's license or identification card at Nevada's Department of Motor Vehicles, which is working on adding a new option for those who don't identify as male or female.

The previous policy added further costs and stress for trans and gender-nonconforming people, said Jane Heenan, Gender Justice Nevada's clinical director. Heenan recalls one person who spent money on multiple doctor visits because they could not find a physician who would sign off on the form.

"Driver licenses no longer require any kind of external permission or affirmation from medical professionals of any kind," Heenan said. "It reduces the complexities of this process, which are already very complex for people seeking to make these changes. Lifting that burden is significant."

An updated driver's license costs $9.25 and a new ID card is $8.25, according to the DMV.

The change is similar to a move by the Nevada Department of Health and Human Services, which changed its rules in 2016 to allow people to update the gender on their birth certificate using a self-declaration process, The Las Vegas Sun reported Thursday.

"Requiring medical certification of gender identity is an outdated practice," said Kevin Malone, a DMV spokesman.

The DMV has not said when a third option for people who don't identify as male or female will be added.

"We are planning to add a nonbinary gender marker," Malone said. "However, this requires computer system programming and extensive testing with law enforcement and other stakeholders to ensure they receive the proper information."

Nevada prison officials struggle with doctors who refuse to treat inmates
Michelle Rindels
The Nevada Independent
https://thenevadaindependent.com/article/nevada-prison-officials-struggle-with-doctors-who-refuse-to-treat-inmates

Nevada prison officials say they sometimes have to take inmates through the back door or bring them before or after normal business hours for non-emergency medical care because off-site doctors are reluctant to treat them, if they treat them at all.

The hesitance to offer medical care to incarcerated people is one of the reasons cited by a new audit as to why prisons are sometimes resorting to more expensive out-of-network medical providers. Officials say there's not much they can do to compel in-network providers to see an inmate.

"There is no statutory requirement that they would be forced to provide services to everyone that subscribes to their network," said John Borrowman, the deputy director of support services at the Nevada Department of Corrections. "We have no leverage statutory or otherwise to force a provider to see an inmate."

The audit, presented Thursday at the Executive Branch Audit Committee that includes all Nevada constitutional officers, noted that the prisons resorted to out-of-network providers in 16 cases, or about 8 percent of the sample. One example was that the prisons are favoring a single out-of-network urologist in Southern Nevada because that doctor is willing to serve inmates on-site at the remote Ely prison and in conservation camps, so officials also use that physician for off-site appointments.

Borrowman noted that the networks the state buys into for medical care are also used by the general public and other state health groups, such as the Public Employee Benefits Program, and aren't exclusively designed for inmate populations. He said in a future request for proposals, there may be an effort to gauge how many providers in a network will take inmate patients.

Lt. Gov. Mark Hutchison said he hoped the state could use its leverage as a large payer of health services to negotiate

"We ought to have as a very basic requirement that these folks are willing to provide services for the inmates who need them so we don't have to keep going outside the network," he said.

The out-of-network services discussion is part of a larger conversation about how to manage the rising cost of health care in Nevada prisons. In 2017, the department spent $11.7 million on off-site medical expenses alone.

"This has been a concern of mine since I've gotten here," said NDOC Director James Dzurenda. "We have noticed a trend over the years of increasing medical costs and overnight hospital stays."

Auditors' suggestions for keeping costs under control included:

Finding a third party administrator who can do "targeted case management" and ensure inmates staying at a hospital are getting only necessary treatments at the best rates. Oregon has implemented this system and reported saving 20 percent on hospital costs over two years.
Reviewing prison medical payouts to ensure they match with the treatment that was authorized by the department's Utilization Review Committee, which reviews requests for off-site medical care and prioritizes them.

The Indy Explains: Everything you need to know about NV Energy's solar proposal
Riley Snyder and Daniel Rothberg
The Nevada Independent

https://thenevadaindependent.com/article/nv-indy-explains-everything-you-need-to-know-about-nv-energys-solar-proposal

What kind of event could bring together Nevada's governor, lieutenant governor, a congressman, two gubernatorial candidates and dozens of Assembly and state Senate members?

Far down the list of anyone's guess would likely be the unveiling of NV Energy's 2018 Integrated Resource Plan (IRP), a lengthy, data-heavy planning document the utility is required to submit to state regulators every three years detailing how it plans to meet future electric supply and demand.

But members of Nevada's political elite crowded the Springs Preserve last week to hear utility CEO Paul Caudill unveil details of the utility's 2018 IRP, including six proposed agreements to develop six new photovoltaic solar farms throughout the state and several major battery storage projects, doubling the state's renewable energy production by 2023.

The star-studded unveiling, which also includes a contract for potentially the cheapest solar production price in the country, was somewhat unusual for the IRP process, which typically resides in the realm of energy policy wonks and other denizens who follow the normally dry regulatory proceedings.

Unmentioned during the event but clearly present throughout the utility's IRP filing was the specter of Question 3, a proposed constitutional amendment that would end NV Energy's monopoly control of the state's electric market and require the state set up and switch to a competitive retail market by 2023.

NV Energy, which has donated millions of dollars to a PAC opposing the ballot question, states in the IRP application that the expansive planned move toward more renewable generation wouldn't go forward if the ballot measure passes, as the amendment would prohibit the utility from owning generating stations or entering into power purchase contracts with outside firms.

Here's what the IRP process entails, and what the future landscape of Nevada's energy policy could look like over the next three years.

What is an IRP?

Under state law, an electric utility is required to file a "plan to increase its supply of electricity or decrease the demands made on its system by its customers" to the state's Public Utilities Commission every three years, due on June 1.

That broad outline takes the form of a filing consisting of thousands of pages of applications, testimony and appendixes from the utility, a window into how it plans to manage electric demand and procurement of supply over a period stretching out over the next three decades.

From there, the PUC — which consists of three commissioners appointed by the governor — is required to hold hearings and take testimony from any interested parties on the application, and judge it based on several criteria including meeting reliability minimums, the state's renewable portfolio standard and acquiring fuel sources judged on flexibility, diversity and reliability.

After receiving the application, the PUC has 135 days to approve the utility's energy supply plan. This year, that's Oct. 14. The PUC then has 210 days to approve the rest of the plan, which for 2018 falls on Dec. 28, fewer than six weeks before the Legislature convenes.

State lawmakers in 2017 approved a number of changes to the IRP process, including requiring the utility for the first time to file it jointly for its entities serving both Northern and Southern Nevada service territories.

In its 2018 application, NV Energy laid out its broad goals for its future energy supply and demand goals thusly:

"The overarching goal of this 2018 Joint IRP is to meet growth and shrink our exposure to natural gas prices by delivering more low-cost renewable energy to our customers, accelerating our transition to a cleaner energy future with near-term investments by our (power purchase agreements) counterparties to support new Nevada-based renewable energy resources, shoring up our transmission infrastructure, and increasing or investment in energy efficiency programs."

Clean energy and Question 3

Clean energy advocates see this latest IRP as a shift for the utility, which had approached solar and energy storage projects more conservatively in the past. They also see it as the utility adjusting to the times, a reflection of the dramatic drop in solar and battery storage prices over the past few years, even with the recent tariffs on solar panels imposed by the Trump administration.

One of NV Energy's proposed solar projects, Copper Mountain 5, would provide the cheapest solar energy in the country, according to Greentech Media, which is part of a research firm that tracks solar contract prices. That price could increase after the first year, but the other proposals are similarly low priced contracts, said Colin Smith, an analyst at Greentech Media Research.

"These projects are on par with some of the lowest [contract] prices to date," he said.

The IRP could put more pressure on clean energy groups, many of which have stayed neutral on the Energy Choice Initiative, to decide whether they support the ballot measure or the utility's continued regulated monopoly over the state's energy portfolio. Robert Johnston, a senior attorney at Western Resource Advocates, said there is some concern that moving to an energy choice market might slow down progress on building out large-scale solar projects.

Johnston noted that there would likely be several transition years before Nevada has an open energy market. There is concern among some environmental groups, he said, that during the transition period, there will be a halt in the construction of new solar projects.

"We think it will be a long and complicated process," he said. "And the question is: Who is going to be building new renewable projects during this interval where you could really have a cloud of legal and regulatory uncertainty hovering over the state? … What we've seen in Nevada is that developers won't break ground on these projects until they have a long-term buyer under contract who is committed to buying energy out of that project for the next 20 to 25 years."

Under the proposed plan, the state's energy supply plan would rise from 14 percent renewable in 2017 to 32 percent renewable in 2023.

AMERICAN OVERSIGHT

Jon Wellinghoff, a policy advisor for the ballot measure and former chairman of the Federal Energy Regulatory Commission dismissed these concerns. He argued that companies might invest in clean energy even during the transition period before a restructured market goes into effect.

He laid out a few hypotheticals in which that might be possible. A large company that owns several stores in the state, Wal-Mart for instance, could enter into a contract for a solar facility to serve its stores under energy choice. Or, Wellinghoff said, a casino giant such as MGM Resorts International could invest in solar to aggregate and then offer to its large employee base.

If the market is opened, Wellinghoff said, he expects solar and battery storage to be the predominant types of energy procured because of how competitive their pricing has become.

“There’s no question those are the primary things they’re going to invest in,” he said.

The Question 3 factor

NV Energy says in the filing that it will only move forward with all of the proposed solar projects if Question 3 fails in November. If not, the company would be required to sell off all of their power purchase agreements and power plants as part of the dismantling of the monopoly structure.

If the ballot question passes, the utility proposed going forward with only one of the six proposed renewable energy projects — a 300 solar megawatt power purchase agreement with 8minuteenergy at the Eagle Shadow Mountain Solar Farm. Its IRP filing states that doing so will help the utility’s Northern Nevada operations meet the minimum Renewable Portfolio Standard goal.

The utility is also asking for the approval of four major transmission system upgrades to help interconnect the newly planned renewable energy projects, in total worth $22.9 million and that the utility could later recover through an adjustment in rates. If Question 3 is approved by the voters, the utility is asking the PUC to approve only a $550,000 transmission upgrade.

NV Energy executive Shawn Elicegui wrote in testimony filed with the IRP that because the utility would only need to meet the needs of customers through 2023 if the ballot measure passed, it wouldn’t make sense to enter into several long-term solar power contracts that it would then need to turn around and sell almost immediately.

“NV Energy’s focus will shift from long-term, centralizing planning that focuses on energy supply to short-term planning,” Elicegui wrote in the filing. “Adding six long-term obligations, as well as battery storage to a list of assets that needs to be transferred and which add to the obligations backed by the full faith and credit of the State is not necessary to meet customers’ needs through 2023.”

Does NV Energy really need the proposed solar?

The IRP requires the utility to prepare two analyses, one that addresses supply and another that addresses demand. But the two are interconnected. Growing energy demand has typically been used to justify the need for procuring more supply or building more transmission lines.

For utilities across the country, power sales have flattened or increased at smaller rates, even as economies have grown. Part of this has to do with improvements in energy efficiency.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-001347

The same trend is true for NV Energy. In its filing, it forecasts its peak load — the maximum amount of energy required by its customers — to grow at about 0.7 percent in Southern Nevada and dip slightly in Northern Nevada between 2019 and 2029. The forecast is low, the company said, because it factors in the expiration of contracts and an ambitious energy efficiency plan (the IRP proposes cutting sales by more than 1.1 percent through energy efficiency).

Wellinghoff said that even with Valmy plant — the utility's lone remaining coal-fired plant — coming offline in the near future, the utilities commission might punt on NV Energy's plan because the utility could satisfy its customers' needs without new solar farms.

"We'll be well into the transition to energy choice by [the time they need that energy]," he said.

NV Energy argues that even though adding solar will bring more generation to the grid, it will lower costs over time because the utility will be less reliant on purchasing natural gas. Right now, the utility must choose whether to purchase power on the Western wholesale market or purchase natural gas as fuel for those power plants. The six solar energy projects would give the utility more flexibility to avoid those costs, which could fluctuate in the future.

In the filing, NV Energy said the plan would "shrink customers' exposure to natural gas prices."

The utility's plan also called for extending out the planned lifespan for several of its existing power plants until around 2030 largely to provide capacity support during times of peak electric demand, as most of them are in good operating condition.

Valmy retirement

One of the highlights cited by Caudill and others in the presentation of the IRP is moving up the retirement date for one of the units of the Valmy coal-burning generation plants, the utility's lone remaining coal-fired facility in the state.

Long a target for environmental groups, the utility initially planned on operating the rural Humboldt County-based plants through their expected retirement date of 2025, to help meet peak demand during hot summer months and because the utility considered coal to be a more reliable resource than large-scale solar.

The IRP filed by the utility calls for one of the two generating plants (which it co-owns with Idaho Power) to be retired by 2021, with the other staying operational through 2025.

But retirement of the Valmy plant is conditioned on several factors, including:

the PUC approving all three Northern Nevada renewable energy projects and coming into operation before June 2022
no unexpected increases in area electric demand that would create a larger energy load
stable conditions in western energy markets
avoiding increases in transmission area load
the commission approving regulatory asset accounts, which would allow the utility to recover the cost of closing the plant early through changes in rates.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-001348

NV Energy said the conditions, like the approval of three new solar projects, are necessary to maintain a reliable grid in an area that serves Reno and mining customers near Elko.

Uncertainty over the retirement date is due to various unsolved factors in the utility's electric supply mix over the next three years, Elicegui wrote in a filing submitted as part of the IRP, requiring a series of tests to ensure that retiring the plant early wouldn't disrupt the utility's ability to deliver electricity during peak demand times.

"While our current long-term reliability assessment indicates that we should be able to retire North Valmy Unit 1 in 2021 without compromising our fundamental directive – to safely and reliably deliver low-cost energy to customers – we need to confirm those findings with additional analysis as 2021 approaches," Elicegui wrote in the filing.

'Nobody likes' family separation policy, Trump adviser says
Associated Press
https://www.reviewjournal.com/news/nation-and-world/nobody-likes-family-separation-policy-trump-adviser-says/

WASHINGTON — A top White House adviser on Sunday distanced the Trump administration from responsibility for separating migrant children from their parents at the U.S.-Mexico border, even though the administration put in place and could easily end a policy that has led to a spike in cases of split and distraught families.

President Donald Trump has tried to blame Democrats for a situation that has sparked a national debate over his hard-line approach to immigration enforcement.

"Nobody likes" breaking up families and "seeing babies ripped from their mothers' arms," said Kellyanne Conway, a counselor to the president.

Nearly 2,000 children were separated from their families over a six-week period in April and May after Attorney General Jeff Sessions announced a new "zero-tolerance" policy that refers all cases of illegal entry for criminal prosecution. U.S. protocol prohibits detaining children with their parents because the children are not charged with a crime and the parents are.

The administration wants to send a message, said a Republican critic of the policy, "that if you cross the border with children, your children are going to be ripped away from you. That's traumatizing to the children who are innocent victims, and it is contrary to our values in this country."

Maine Sen. Susan Collins added that "we know from years of experience that we need to fix our immigration laws and that using children is not the answer."

Trump plans to meet with House Republicans on Tuesday to discuss pending immigration legislation amid an election-season debate over an issue that helped vault the New York real estate mogul into the Oval Office in 2016. The House is expected to vote this week on a bill pushed by conservatives that may not have enough support to pass, and a compromise measure that the White House has endorsed.

In other developments surrounding the immigration controversy:

— A Republican congressman from Texas who toured a tent-like shelter for hundreds of minors who entered the country illegally said Saturday the facility is a byproduct of a flawed immigration strategy. U.S. Rep. Will

AMERICAN OVERSIGHT

Hurd said the shelter near the Tornillo port of entry in far West Texas will house about 360 boys who are 16 and 17. The teens began arriving Friday, the same day Hurd toured the shelter, he said, noting that they're being moved from other shelters to make way for younger immigrant children taken into custody at the border.

— The intensifying the divide among Republicans over immigration policy is fueling concerns that a voter backlash could cost the GOP control of the House in November. To many conservatives, the compromise immigration proposal released this past week by House Speaker Paul Ryan, R-Wis., is little more than "amnesty." One tea party group described the Republican plan as "the final betrayal." Fox Business host Lou Dobbs, who is close to President Donald Trump, tweeted Friday that Ryan is "trying to open our borders even more and give illegal immigrants the biggest amnesty in American history."

— Scuttling immigration legislation could turn off independent voters, an especially important bloc for House Republicans competing in dozens of districts that Democrat Hillary Clinton won in the 2016 presidential election. "The GOP's in a tough spot," said Republican pollster Frank Luntz. "The hardcore Trump voter has a different point of view than the ever-important independent voter, and there doesn't seem to be a middle ground."

Conway rejected the idea that Trump was using the kids as leverage to force Democrats to negotiate on immigration and his long-promised border wall, even after Trump tweeted Saturday: "Democrats can fix their forced family breakup at the Border by working with Republicans on new legislation, for a change!"

To Rep. Adam Schiff, D-Calif., the administration is "using the grief, the tears, the pain of these kids as mortar to build our wall. And it's an effort to extort a bill to their liking in the Congress."

Schiff said the practice was "deeply unethical" and that Republicans' refusal to criticize Trump represented a "sad degeneration" of the GOP, which he said had become "the party of lies."

Conway, however, put the onus on Democrats, saying if there are serious about overhauling the system, "they'll come together again and try to close these loopholes and get real immigration reform."

Asked whether the president was willing to end the policy, she said: "The president is ready to get meaningful immigration reform across the board."

More directly, Rep. Ben Ray Lujon, D-N.M., said Trump "could pick up the phone and stop it today."

The House proposals face broad opposition from Democrats, and even if a bill does pass, the closely divided Senate seems unlikely to go along.

Rep. Michael McCaul, who helped write the conservative version with Rep. Bob Goodlatte, said he had spoken to Trump on Saturday and that the president "is fully committed to both of these bills. He's put the full weight of his office behind it."

McCaul, R-Texas, said both bills satisfy Trump's main objectives.

AMERICAN OVERSIGHT

“Without him coming to Capitol Hill on Tuesday, I don’t think we’d have that sort of maximum pressure, if you will, to get us across the goal line, and I anticipate on Tuesday that he’s going to be the leader he is and we’re going to get something passed out of the House,” said McCaul, R-Texas.

Trump’s former chief strategist said Republicans would face steep consequences for pushing the compromise bill because it provides a path to citizenship for young “Dreamer” immigrants brought to the country illegally as children. Steve Bannon argued that effort risked alienating Trump’s political base and contributing to election losses in November, when Republicans hope to preserve their congressional majorities.

“I strongly recommend that we just wait until 2019, right, to address this,” he said, while defending the administration’s practice of separating parents from children as an example of Trump making good on a key campaign promise.

“We ran on a policy, very simply, stop mass illegal immigration and limit legal immigration, get our sovereignty back, and to help our workers, OK? And so he went to a zero tolerance policy,” Bannon said. “Zero tolerance, it’s a crime to come across illegally, and children get separated,.”

Rep. Beto O’Rourke, D-Texas, said he was working on legislation that would end the practice of family separation.

Speaking from Texas, where he was leading a march to a town where a new tent structure for children recently opened, O’Rourke said “we can do the right thing by this country and for those kids, and not do it at the price of a 2,000-mile, 30-foot-high, $30 billion wall, not doing it at the price of deporting people who are seeking asylum, deporting people in some cases back to certain death, not doing it at the cost of ending family migration, which is the story of this country.”

The situation now is “inhumane” and “un-American,” he said. The blame, he said, rests “on all of us, not just the Trump administration.”

Conway and Schiff appeared on NBC’s “Meet the Press,” Collins was on CBS’ “Face the Nation,” Lujan and Bannon spoke on ABC’s “This Week,” O’Rourke was interviewed on CNN’s “State of the Union” and McCaul was on Fox’s “Sunday Morning Futures.”

Hi,

Please add Mike Ballard and his O-Fund, Sixty-West Funds under the Tank session he has a local fund. If possible please let me know when it is online because he is ... anxious to know.

Also I apologize because it will take me a little bit to get the bios and photos and logos to you. I am traveling and realize they are on my computer. But I can pull them together through the original emails hopefully I will get them to you no later than tomorrow.

Thanks!

Karen:

A few weeks ago right after Derek sent this information, we completed all the forms. I have attached it for your reference. We are excited to participate.

We have a pretty good list for Nevada and are comfortable we could draw numerous attendees to the event. However, we are reluctant to do an emailing until you can get our name on the site. We noticed that we aren't on the agenda<https://www.frbsf.org/community-development/files/understanding-opportunity-zones-in-nevada-agenda.pdf> yet. How long until you have that updated?

Best Regards,

Mike

We will have a panel in which projects can pitch funds. We're working on a screening mechanism now to make sure the pitches will be legitimate.

Additionally, they'll be a session for each of the local jurisdictions to discuss projects in their areas.

Mike,

I do believe there is a strong case to make for designating the Moulin Rouge census tract as an Opportunity Zone. However, Nevada was only able to nominate 61 of over 240 low-income census tracts across the state.

I've attached what the City of Las Vegas sent to us as their priority list. The Bonanza Corridor/ Moulin Rouge was their #10th priority area. We used a combination of local priorities, known investment, and national social need and investment indexes to formulate a model for choosing 61 tracts. Unfortunately, using that model that census tract did not make the top 61. There was absolutely no intention to purposefully leave the census tract from our list.

If there is a chance to re-examine the Opportunity Zone designations in the future I will make sure to incorporate your input.

Respectfully,

Derek Armstrong

Subject: Re: Opportunity Zone - Moulin Rouge Site

Derek:

Now that you have nominated the sites, is there another comment period?

The state appears to have purposely left off one of the most important tracts for the historic African-American community, the Moulin Rouge site. The short but vibrant life of the Moulin Rouge helped the Civil Rights Movement in Las Vegas. The hotel was also the spark needed to bring an end to segregation on the Strip.

In all my discussions, the Moulin Rouge site was a high priority for inclusion by the City of Las Vegas. They are even surprised by the selection.

Why would the governor not include this site which is historic and in much need of redevelopment?

The property just fell out of escrow again on April 1. This is the most recent of many failed redevelopment tries on this property. That would be a disaster. This current owner of the property have been trying to sell it for ten years. They have had many deposits returned and or lost in that time period. Seems to me that site is a perfect candidate for redevelopment and inclusion in an opportunity zone to finally make something happen.

Consider that Bonanza Village was included and there is no need for that, it is all single family housing on large lots. Bonanza Village is the most expensive/valuable single family housing in the West-Las Vegas area. That would be very difficult for redevelopment.

Or why is the NLV Airport included? The airport is owned by the County so why give the airport this tax benefit, which pays no taxes.

It doesn't make sense. I think some folks may soon raise a stink if this isn't corrected soon.

I believe the Governor would like to include this site if he knew more of the historic background and its meaning to the African-American community. Hopefully you and he agree.

Best regards,

AMERICAN OVERSIGHT

Subject: Opportunity Zone Designation - West Wendover

Hi Pam,

First, let me thank you for your help in getting a new Welcome to Nevada sign here on Interstate 80 at the Utah/Nevada border. The new sign which went up roughly 6 months or so ago, was overdue and, looks great. Thank you!

Second, have attached a copy for Governor Sandoval a letter that has been sent to GOED concerning the process of selecting Opportunity Zone areas. West Wendover would like due consideration of that designation believing that it could definitely help us in attracting business and other investments.

I appreciate if you could pass the letter on to Governor Sandoval.

And yes... Amtrak is still on our dream board. With the loss of Greyhound service recently, we now have no public transportation access to the national transportation system. Solutions are never easy, especially in our case... :)

AMERICAN OVERSIGHT

Hope all is well with you, please make sure to stop in and say hello if you are in the area, would be nice to see you again.

Chris

Subject: Opportunity Zone Eligibility - West Wendover, Nevada Census Tract 9515.00

Dear GOED Administration/Staff:

The City of West Wendover would like to respond to Governor Sandoval's request for Opportunity Zone eligibility comments by submitting the City of West Wendover, located with Census Tract 9515.00, for your consideration.

Though a vibrant community in its own right, the City of West Wendover does rely heavily on Nevada Tourism and the Nevada Gaming industry for its existence given other larger diversification businesses that are common to Elko County, including agriculture and mining, are largely located well outside the community. As a result of this unique reliance on tourism, West Wendover's development in the past has been subject to boom/bust cycles often associated with a reliance on such a single large industry.

Additionally, with Nevada Gaming comes a reliance on a population demographic that includes a significantly large low-moderate income population given its service basis in the economy. This results in overall lower wages and lower wage growth over time especially when such a demographic is as large as West Wendover's being well over 60% of the population. This exacerbates the ability of West Wendover to effectively promote and create business investments at various levels given this type of demographic results in lower household and median incomes adversely affecting the decisions of those considering making investments in the community; whether that is industrial development, general commercial enterprises and/or housing developments. In all the consequence is generally a negative one.

Though this condition is a certain challenge, West Wendover has been earnest in its efforts through the past several decades to progress above that challenge. With our current business and community partners including NNRDA we have the following projects in the works will would have an expected multi-million dollar investment impact on the community:

- Bomarc Development Residential Projects
  - Apartment Complex Construction, 8 Acres, 40 units, $15-20 million; 1-2 year completion.
  - Residential Housing, 3 in progress, 6-10 planned, $270,000/ unit; 1-2 year completion.

AMERICAN OVERSIGHT

- Bomarc Development Commercial Projects
  - Retail multi-business complex, $7 million total, partially complete $2 million to finish; final completion by end of 2018.
  - Potential purchase and remodel of 4,000 to 5,000 square feet. Facility for commercial retail complex; 1-2 years.

- The Cannon Group and Richard Burella Group Residential Project
  - Single Family homes
  - Town-home projects

- Rusty Palm Renovation and Convenience Store / Truck Stop at Exit 410; $5-6 million; 5 year completion.

- Peppermill Resort & Casino: Interior & exterior renovation, $7.5 million recently completed, $2 million projected within next year, $15 million in further renovations over next 5 years.

- Rainbow Casino and Hotel: Lighting and resurfacing of lot, $1.5 million to be completed by the end of 2018, exterior renovation includes $6.5 million to be completed by the end of 2018. Further interior and exterior renovation, $10-13 million to be completed within next 5 years.

- Montego Bay: Lighting and resurfacing of lot, $1 million to be completed by the end of 2018, further interior and exterior renovation, $1-3 million to be completed within next 5 years.

Finally, though the City has been pro-active with its own public investments in infrastructure in a long term effort to create a solid foundation from which private investments can build upon, the possibility of our community being given an Opportunity Zone designation would potentially enhance the ability to attract desirable business investments for the community. In all honesty, the City of West Wendover could greatly use any assistance that GOED at any level can help provide.

If you have any questions, please feel free to contact me.

Sincerely,

Chris J. Melville, C.P.O.
City Manager

Subject: Opportunity Zone Nomination Information

AMERICAN OVERSIGHT

Attached is a letter informing your governor or chief executive officer as to how they can nominate eligible census tracts for designation as Opportunity Zones. Titles II and V of the concurrent resolution on the budget for fiscal year 2018, signed into law on December 22, 2017, added Subchapter Z—Opportunity Zones to the Internal Revenue Code and provides certain tax benefits for private investment in distressed areas. The authority to implement these sections of the new tax law has been delegated to the Internal Revenue Service (IRS). The Community Development Financial Institutions Fund (CDFI Fund) is supporting the IRS with the Opportunity Zone nomination and designation process.

In order for investors to take advantage of the tax benefits, the law requires governors or chief executive officers of States and possessions to nominate census tracts in their jurisdictions as Opportunity Zones.

To assist in the nomination process, the CDFI Fund has developed a Nomination Tool, which can be used to identify and select eligible census tracts to nominate for designation as Opportunity Zones. The Nomination Tool as well as Nomination Instructions on completing and submitting a nomination, can be found at https://www.cdfifund.gov/Pages/ozonestateresource.aspx.

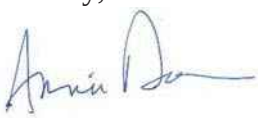
Dear Governor Sandoval:

I am writing to inform you as to how you can nominate eligible census tracts for designation as Opportunity Zones. As noted in a letter sent to you from Assistant Secretary for Tax Policy David J. Kautter dated February 8, 2018, P.L. 115-97, an Act to provide for reconciliation pursuant to titles II and V of the concurrent resolution on the budget for fiscal year 2018 (the "Act"), signed into law on December 22, 2017, added Subchapter Z—Opportunity Zones to the Internal Revenue Code ("Code") and provides certain tax benefits for private investment in distressed areas of Nevada. The authority to implement these sections of the new tax law has been delegated to the Internal Revenue Service (IRS). The Community Development Financial Institutions Fund (CDFI Fund) is supporting the IRS with the Opportunity Zone nomination and designation process.

In order for investors to take advantage of the tax benefits, the law requires governors or chief executive officers (CEOs) of States and possessions to nominate census tracts in their jurisdictions as Opportunity Zones.

To assist you with your nomination, the CDFI Fund has developed a Nomination Tool through which you can identify and select the eligible census tracts in Nevada you wish to nominate for designation as Opportunity Zones. The Nomination Tool as well as Nomination Instructions on completing and submitting your nomination, can be found at https://www.cdfifund.gov/Pages/ozonestateresource.aspx.

To ensure that the information submitted reflects the official nomination of Nevada as authorized by the governor or CEO of Nevada, the CDFI Fund is providing each State with a State Unique Opportunity Zone Code that must be entered in the Information section of the Nomination Tool, per the Nomination Instructions. The State Unique Opportunity Zone Code for Nevada is kffp10283f.



The statute imposes a deadline for the nominations of 90 days from its enactment. Thus governors and chief executive officers have until ***March 21, 2018,*** to submit nominations. A 30-day extension can be requested, as described in Revenue Procedure 2018–16, 2018-9 I.R.B. 383. Instructions on how to request an extension are included in the Nomination Instructions. The statute requires that ***failure to submit timely nominations results in loss of the ability to designate any Opportunity Zones*.**

AMERICAN OVERSIGHT

The census tracts eligible for designation as Opportunity Zones include some of the most distressed areas in the country. If such a community becomes an Opportunity Zone, the resulting tax benefits may attract new investment into the community to create jobs, stimulate growth, and provide hope to the individuals and families living there. I encourage you to consider this opportunity and to make timely nominations.

If you or your staff have any questions, please do not hesitate to contact Jeff Merkowitz at merkowitzj@cdfi.treas.gov or (202) 653-0300.

Sincerely,

Annie Donovan
Director

> - Multifamily lending
> - Small business lending
> - Socioeconomic change
> - Concentration of jobs
>
> Summary:

AMERICAN OVERSIGHT

The Tax Cuts and Jobs Act of 2017 established an Opportunity Zone tax incentive, which allows taxpayers to defer paying federal tax on capital gains from the sale of property if those gains are invested in Qualified Opportunity Funds that invest 90% of their assets in businesses located or property used in a designated low-income community. Investors receive modest reductions in their eventual tax bill if they maintain their Opportunity Fund investments for at least five and then seven years. Investors that hold capital in those funds for a full ten years also do not have to pay capital gains tax on the appreciation of their Opportunity Zone investments.

The Editors

FS may – or may not – exempt Tongass from roadless rule

The Department of Agriculture April 25 did not outright promise to act on a State of Alaska's request to write a new regulation exempting the Tongass National Forest from a 2001 roadless area rule.

But Secretary of Agriculture Sonny Perdue did agree to examine the petition. "We look forward to working with you in the future to explore and discuss the petition and the options to address application of the 2001 Roadless Rule on the Tongass National Forest," he wrote the state in a letter obtained by *PLN.*

Alaska Gov. Bill Walker (I-Alaska) on January 19 petitioned Perdue to exempt the state from the roadless rule to give Alaskans access to the Tongass for a host of reasons. "We see this as one of many significant opportunities to work with you to support a diverse and robust forest products sector in Southeast Alaska," Walker wrote in a 235-page petition.

The State of Alaska Congressional delegation has been campaigning for 15 years to exempt the Tongass from the roadless rule. The Clinton administration's Jan. 12,

2001, roadless regulation limits road building and other activities on 58.5 million acres of national forest.

Under President George W. Bush the Forest Service in 2003 posted a separate rule exempting the 17 million-acre Tongass National Forest (not all of it roadless) from the Clinton rule. But in 2005 the U.S. Supreme Court left in place an appeals court decision that denied the exemption for the Tongass.

Senate Energy Committee Chairman Lisa Murkowski (R-Alaska) this winter came within a whisker of persuading Congress to exempt the Tongass from the roadless area rule. She included in a draft fiscal year 2018 pubic lands appropriations bill on Nov. 20, 2017, a provision that would exempt the Tongass and the 5.4 million-acre Chugach National Forest from the Clinton rule. A House-Senate conference committee killed the provision in March.

Murkowski's amendment was one sentence long: "The Roadless Area Conservation Rule established under part 294 of title 36, Code of Federal Regulations (or successor regulations), shall not apply with respect to any National Forest System land in the State of Alaska."

At an April 24 Senate Energy Committee hearing on the Forest Service's fiscal year 2019 budget Murkowski again made her case for exempting the Tongass from the roadless rule.

She told Forest Service Acting Chief Vicki Christiansen, "As I have said many times before, the Roadless Rule has never made sense in the Tongass, a forest made up of 32 island communities. In my mind, more access starts with restoring the Roadless exemption in the Tongass, and you have a state petition that asks you to do just that. We hear a lot of talk about keeping public lands accessible to the public, but in Alaska, that's often very different from the public's experience."

Christiansen responded, "We are working very closely with the State of Alaska to look at all of the options to address the Roadless issues. A response is being submitted in the matter of a day from Secretary Perdue back to the State of Alaska. We want to look for success in how we can assure southeast Alaska citizens have the needs met as you identified, and we will support the state in numerous ways on those various options."

The response Christiansen mentioned is contained in Perdue's April 25 letter.

Although Christiansen and Perdue said they would cooperate with the state, neither said outright the Forest Service would attempt to provide a total exemption to the Tongass from the roadless rule.

In its petition to Perdue the State of Alaska argued that, for the purposes of a Tongass exemption rule, it is immaterial that the courts have rejected such an exemption in the past. The state said it is just good policy to approve the exemption.

"Rationales for exempting the Tongass from the Roadless Rule in a new USDA rulemaking are not entirely equivalent to Alaska's legal claims and arguments challenging the Roadless Rule in federal court," the state said. "The most important difference is that USDA can enact or change policy via a rulemaking whether such action is legally mandated or just good policy as determined by the agency."

Perdue in a brief four-paragraph letter told Alaska Department of Natural Resources Commissioner Andrew Mack, "We share your interest in exploring options to help create jobs and prosperity for rural communities in Southeast Alaska, and the forest-products sector has long been part of this economy."

Environmentalists who have contested the Tongass exemption from the beginning did not let the Alaska petition go uncontested. They wrote Perdue April 10 and argued that the Clinton rule does allow access to the Tongass, except for a couple of uses.

A letter signed by dozens of national and state environmental groups said, "The petition ignores the fact that USDA narrowly tailored the Roadless Rule to limit only two activities in roadless areas, road construction/reconstruction and logging, because those activities pose the greatest likelihood of irretrievably altering and fragmenting roadless landscapes. The petition also ignores the Rule's series of established exceptions that 'honor existing law or address social or economic concerns.'"

Tongass land management plan: At the April 24 Senate committee hearing Murkowski paired the roadless rule dispute with a complaint that an Obama administration Tongass land management plan deprives timber companies of wood.

On Dec. 9, 2016, the Forest Service approved a plan to transfer Tongass National Forest timber sales to younger trees. Murkowski argued then and argues now that the service should complete an ongoing inventory of young growth before implementing the plan.

Indeed in the fiscal 2018 appropriations law (PL 115-141 of March 23) Murkowski successfully persuaded Congress to stay implementation of the Obama plan until the inventory was completed. "Until the Service has determined, based on a completed stand-level inventory, the timing and supply of economic young growth needed for a successful final transition and whether the 2016 Forest Plan should be amended or revised, the Service is directed not to implement a final transition away from its Tongass old growth timber program to a program based primarily on young growth," the law says.

At the April 24 Senate committee hearing Murkowski also pressed Christiansen to revise the management plan. "So we are working now top to put together the most effective method to get those fixes in an amendment while we look at other options for potentially addressing the transition period when the inventory is completed at the end of the summer," she said.

Christiansen said the Forest Service was working on the fixes and hoped to complete the inventory of young growth by the end of the summer.

BLM begins ANWR scoping despite fierce green attacks

In the face of a barrage of criticism from Democrats and environmentalists, BLM April 20 officially took the first step toward an initial oil and gas lease sale in the Arctic National Wildlife Refuge (ANWR).

BLM announced it will accept public advice through June 20 on environmental documentation of the lease sale of at least 400,000 acres. Although the law authorizing leasing (PL 115-97 of Dec. 22, 2017) calls for an initial sale within four years, Democratic critics anticipate BLM will hold the sale next year.

Exactly what sort of leasing EIS BLM prepares is an open and important issue. That's because PL 115-97 sort of fudged the question. The law implies that the environmental review should follow standards put down by the National Petroleum Reserve Act.

It says, "Except as otherwise provided in this section, the Secretary shall manage the oil and gas program on the Coastal Plain *in a manner similar to* the administration of lease sales under the Naval Petroleum Reserves Production Act of 1976 (42 U.S.C. 6501 et seq.) (including regulations)." Our emphasis.

Thus, in its Federal Register scoping notice BLM says, "In accordance with Section 20001 of the Tax Cuts and Jobs Act of 2017 (PL 115-97), and the National Environmental Policy Act of 1969, as amended, and *in a manner similar to* the administration of lease sales under the Naval Petroleum Reserves Production Act of 1976, as amended, (BLM) intends to prepare a Leasing (EIS)." Again, our emphasis.

That appears to give BLM some leeway in what it puts into an EIS.

Environmentalists strongly hinted at a lawsuit. "The Trump Administration's frantic scramble to sell oil leases in the coastal plain of the Arctic National Wildlife Refuge is a direct threat to the traditional lifestyle of the Gwich'in people and an assault on the wildlife and habitat of America's greatest intact natural heritage," said Dr. David Raskin, president of the Friends of Alaska National Wildlife Refuges. "It is a violation of the laws and requirements for management of this iconic refuge that belongs to every American, not just the oil industry and their political supporters."

Eight House Democrats led by Raúl M. Grijalva (D-Ariz.), the ranking member

of the House Natural Resources Committee, objected to the speed with which BLM is preparing the sale.

"We remain staunchly opposed to oil and gas activities on the Coastal Plain, and believe that inclusion of the Arctic Refuge leasing provision in H.R. 1 behind closed doors was improper and contrary to the majority sentiment in Congress and among the American people regarding leasing and drilling in the Refuge," they wrote Secretary of Interior Ryan Zinke April 19. "Attempting to rush the leasing process, as DoI is doing, is unnecessary, inappropriate, and likely to result in serious harm to one of our nation's last remaining truly wild areas."

By "behind closed doors" the Democrats were referring to a House-Senate conference committee in December on the big tax law to which ANWR leasing was attached.

For all the complaints of the critics the Alaska Congressional delegation and Gov. Bill Walker (I-Alaska) are solidly behind the leasing plan.

The delegation – Senate Energy Committee Chairman Lisa Murkowski (R-Alaska), Sen. Dan Sullivan (R-Alaska) and Rep. Don Young (R-Alaska) - put out a joint statement endorsing BLM's action. "We welcome this scoping announcement and the Department's continued work to implement our legislation opening the Coastal Plain to responsible energy development," the delegation said.

Walker put out his own statement, saying the state was on board. "This is an important priority for my administration given the potential for significant new revenues from lease sales and production," he said. "The State of Alaska will work with the U.S. Department of Interior to support their efforts to prepare for these lease sales and ensure that local input is taken into consideration."

The law anticipates raising just over $900 million from two lease sales – one within four years of at least 400,000 acres from the 1.5 million-acre coastal plain and the other within seven years. An Interior Department Royalty Advisory Committee has recommended an accelerated schedule for the initial sale.

Advocates for leasing in the coastal plain - the State of Alaska, the Trump administration and the Alaska Congressional delegation – may have suffered a setback in January when the International Energy Agency ran up a caution flag. The agency told the Senate Energy Committee that Murkowski chairs that, given existing markets, production probably wouldn't be likely until the year 2030. Again, the legislation authorizes two lease sales, one within four years (by 2022) and one within seven years (by 2025).

In its analysis of the legislation authorizing leasing the Congressional Budget Office estimated receipts of $900 million over the 2018-2027 period, well short of the period when the International Energy Agency projects production will begin in earnest.

The liberal/progressive group Center for American Progress has done its own analysis, and anticipates minimal returns from a sale. The group said it estimates "that offering oil and gas leases in the Arctic Refuge is likely to yield no more than $37.5 million in revenue for the U.S. Treasury over the next 10 years — far short of the $1 billion to $1.8 billion that drilling proponents claim could be raised."

Pro-development forces received a boost on Dec. 23, 2017, when the U.S. Geological Survey (USGS) increased its estimate of onshore oil reserves on the North Slope of Alaska from 1.5 billion barrels in 2010 to 8.7 billion barrels. In the report USGS based the increase on new oil discoveries in and near the National Petroleum Reserve Alaska that is close to the coastal plain of ANWR. The USGS report is available here: https://pubs.er.usgs.gov/publication/fs20173088.

BLM said that it would hold environmental scoping hearings in Alaska in Anchorage, Arctic Village, Fairbanks, Kaktovik and Utqiagvik. Public comments may be submitted by e-mail to blm_ak_coastalplain_EIS@blm.gov, at the BLM website www.blm.gov/alaska/coastal-plain-eis or by mail to BLM, Alaska State Office, Attention—Coastal Plain EIS, 222 West 7th Avenue, #13, Anchorage, AK 99513–7599.

Office of the Secretary
Washington, D.C. 20250

APR 25 2018

The Honorable Andrew Mack
Commissioner
Department of Natural Resources
550 West 7th
Suite 1400
Anchorage, Alaska 99501

Dear Commissioner Mack:

Thank you for your letter of January 19, 2018, regarding the request from the State of Alaska to consider a petition for rulemaking on the applicability of the 2001 Roadless Rule to the Tongass National Forest. I apologize for the delayed response.

Thank you for including the petition and the exhibits illustrating the history of the exemption and ensuing legal challenges. We share your interest in exploring options to help create jobs and prosperity for rural communities in Southeast Alaska, and the forest-products sector has long been part of this economy. We want to ensure that we continue to contribute to the health of the rural economy in Alaska by investing in the sustainability, health, and productivity of our National Forest.

We look forward to working with you in the future to explore and discuss the petition and the options to address application of the 2001 Roadless Rule on the Tongass National Forest. Additionally, Interim Chief Victoria Christiansen is reviewing your concerns regarding the 2016 Tongass Forest Plan and is working to address them.

Again, thank you for writing. If you have any further questions, please have a member of your staff contact the Office of External and Intergovernmental Affairs at (202) 720–7095.

Sincerely,

Sonny Perdue

Andrew,

BnI just found the unique code, but wanted to make you aware of the nomination process. CDFI is using their Awards Management Information System (AMIS) for submission of the workbooks. Due to GOED's emails ending with a .com and not .gov we will not be recognized as an Authorized Rep. I'm not sure if your office is already registered with an AMIS, but if not you'll need to create an account.

I've attached the nomination instructions, there are step by step instructions starting on page 18 of the instructions. Doesn't look like an overly burdensome process but better to figure out today then scrambling tomorrow.

AMERICAN OVERSIGHT

1. Introduction

On December 22, 2017, Congress amended the Internal Revenue Code (IRC) by adding Sections 1400Z–1 and 1400Z–2. These sections provide tax benefits to investors that reinvest certain specified gains into Qualified Opportunity Funds that in turn deploy these resources into population census tracts designated as Opportunity Zones.

The authority to implement IRC §§1400Z-1 and 1400Z-2 has been delegated to the Internal Revenue Service (IRS). The CDFI Fund is supporting the IRS with the Opportunity Zone nomination and designation process under IRC §1400Z-1.

This document provides the Chief Executive Officers (CEOs) of States (including the District of Columbia and U.S. possessions) with instructions for nominating low-income community (LIC) population census tracts and eligible non-LIC contiguous population census tracts in their States as Qualified Opportunity Zones (QOZs) for purposes of IRC §1400Z–1. In general, the CEO of a State must nominate census tracts to be QOZs not later than March 21, 2018 (the determination period). Furthermore, the Secretary of the Treasury has 30 days beginning on the date a nomination is received to certify the nomination and designate the nominated tracts as QOZs (the consideration period). See IRS Rev. Proc. 2018-16 Internal Revenue Bulletin 2018-9 for more information.

2. Extension Requests

A State CEO may request, and receive, an extension of the QOZ determination period for an additional 30 days to April 20, 2018. In addition, a State CEO also may request, and receive, a 30-day extension of the consideration period.

If the State wishes to extend either the determination or consideration period, or both, the State must submit a formal request signed by the State CEO on executive letterhead. This letter should be sent as an attachment by electronic mail to OpportunityZone@cdfi.treas.gov.

The letter from the State CEO should include the following language:

> [Title]
> [State CEO]
> [Address]
>
> The Honorable Steven T. Mnuchin
> Secretary
> U.S. Department of the Treasury
> 1500 Pennsylvania Avenue, NW
> Washington, DC 20220
>
> Dear Mr. Secretary:
>
> The [State/Commonwealth/District/Territory] of [State] formally requests under section 1400Z-1(b)(2) of the Internal Revenue Code that the Secretary extend for an additional 30 days the [determination and/or consideration] period to nominate a population census tract for designation as a qualified opportunity zone.

AMERICAN OVERSIGHT

3. Identity of Tracts Eligible for Designation as Qualified Opportunity Zones

Based on 2011-2015 American Community Survey (ACS) 5-Year data from the United States Census Bureau (Census Bureau), there are a total of 31,848 LIC population census tracts (LIC Tracts) and 10,312 eligible contiguous non-LIC population census tracts (Eligible Non-LIC Contiguous Tracts) that meet the statutory requirements for designation as QOZs.

In the fall of 2017, the Census Bureau released the 2012–2016 ACS 5-Year data. However, due to the March 21, 2018, deadline for State CEOs to nominate census tracts for designation as QOZs, and the complexities of incorporating the most recent data information into the eligibility process, the Opportunity Zone Nomination Tool utilizes the 2011-2015 ACS 5-Year data. In addition, the 25 percent limitation on the number of designations in a State will be determined using the 2011–2015 ACS 5-Year data.

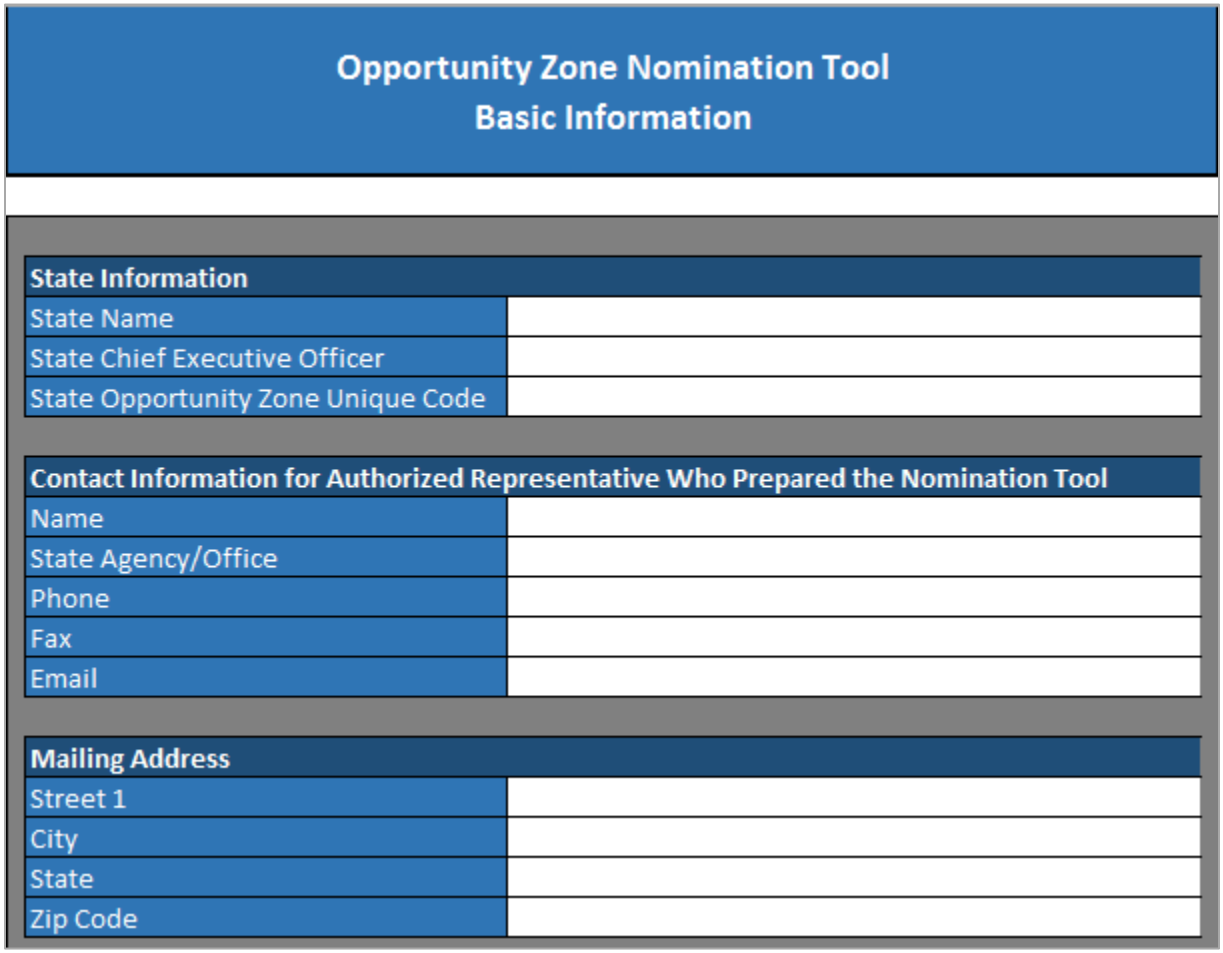
In the event that a census tract deemed eligible under the 2011-15 ACS 5-Year data is no longer eligible under the more recent 2012-16 ACS 5-Year data, States may rely upon the census tracts listed as eligible in the Opportunity Zone Nomination Tool provided to State CEOs as eligible tracts for the purposes of IRC §1400Z-1.

In addition, States may nominate census tracts eligible under the 2012-16 ACS 5-Year data that are not already identified in the Nomination Tool. See additional instructions below for nominating census tracts using 2012-2016 ACS 5-Year data.

4. Nominating Qualified Opportunity Zones

To nominate QOZs, a State CEO should use the Opportunity Zone Nomination Tool (the Nomination Tool), which can be found on the CDFI Fund website at https://www.cdfifund.gov/Pages/ozonestateresource.aspx. The Nomination Tool includes separate lists of all LIC Tracts and Eligible Non-LIC Contiguous Tracts, including Eligible Non-LIC Contiguous Tracts whose eligibility is based on contiguity with a LIC Tract located in a different State.

In addition to the Nomination Tool, the State will need to submit a letter from the State CEO, on executive letterhead, confirming that the census tracts identified in the Nomination Tool represent the official nomination of the State CEO. See additional instructions below.



4.1 Nomination Tool

4.1.1 Information on the State and Authorized Representative

In the worksheet labeled "Information," enter the information requested for the State and the Authorized Representative who prepared the Nomination Tool. In addition to the name of the State and the State CEO, **the Authorized Representative must enter the "State Unique Opportunity Zone Code."** This code can be found in the March 5, 2018, letter from CDFI Fund Director Annie Donovan to the State CEO transmitting information on the Nomination Tool and is intended to ensure that the information submitted is authorized by the State CEO.

4.1.2 State Level Summary

The worksheet in the Nomination Tool labeled "SUMMARY" shows the total number of LIC Tracts in each State, the maximum number of census tracts that can be nominated as QOZs, and the maximum number of Eligible Non-LIC Contiguous Tracts that can be included in that nomination. For example in the figure below, Alabama has a total of 629 LIC Tracts. The maximum number of total tracts that can be nominated as QOZs in Alabama is 158 (25 percent of the 629 LICs, rounded up to the next whole number) and the maximum number of Eligible Non-LIC Contiguous Tracts that can be included in the total nominated is 8 (5 percent of 158, rounded up to the next whole number).

AMERICAN OVERSIGHT

Figure 2: State Level Summary

	A	B	C	D	E	F	G	H	I	J	K
1	Please note that the worksheet tests provided below are solely for the convenience of the State and to provide assistance with the nomination process, and are not determinative. The Internal Revenue Service will make the final determination and designation of each State's Opportunity Zones after reviewing the State's nomination.										
2	CLICK "DATA" MENU "REFRESH ALL" State	A) Total Number of LIC Tracts in State	B) Maximum Number of Tracts That Can Be Nominated (the greater of 25% of All LICs or 25 if State has fewer than 100 LICs)	C) Maximum Number of Eligible Non-LIC Contiguous Tracts That Can Be Among the Nominated Tracts (5% of Column C) if the State Maximizes the Number of its Nominations	Number of LIC Tracts Nominated (2011-2015 ACS	Number of LIC Tracts Nominated (2012-2016 ACS	Number of In-State Eligible Non-LIC Contiguous Tracts Nominat	3) Number of Cross-State Eligible Non-LIC Contiguous Tracts Nominated	Total Tracts Nominated	DOES OPPORTUNITY ZONE PASS 25% TEST? (Number of tracts designated may not exceed 25% of number of LICs in the State)	DOES OPPORTUNITY ZONE PASS 5% TEST? (Not more than 5% of tracts designated may be Non-LIC Contiguous tracts
3	Alabama	629	158	8	0	0	0	0	0		
4	Alaska	55	25	2	0	0	0	0	0		
5	American Samoa	16	25	See Note	0	0	0	0	0		
6	Arizona	671	168	9	0	0	0	0	0		
7	Arkansas	340	85	5	0	0	0	0	0		
8	California	3516	879	44	0	0	0	0	0		
9	Colorado	501	126	7	0	0	0	0	0		
10	Connecticut	286	72	4	0	0	0	0	0		
11	Delaware	80	25	2	0	0	0	0	0		
12	District of Columbia	97	25	2	0	0	0	0	0		

This worksheet will also auto-populate based on the number and type of census tracts a State selects for nomination and can be used to test whether the nomination falls within the statutory limits on the number of nominations. (See additional instruction below.)

4.1.3 Nominating LIC Tracts

To nominate an LIC Tract, States should use the worksheet in the Nomination Tool labeled "1) LICs." This worksheet includes a list of all LIC Tracts and can be filtered by State. To nominate a specific LIC Tract, find the census tract and type or select the word "Yes" next to that census tract in Column C (labeled "Enter "YES" Below to Nominate LIC).

The example below shows that an Authorized Representative has selected the State "District of Columbia" (using the Filter in the red square below and typing the name of the State in the text box) and has nominated census tracts 11001000201 and 11001000202 by typing the word "YES" in the adjacent column.

Figure 3: 1) LICs

A	B	C
Click arrow to filter state		
State	Low Income Communities (LICs)	Enter "YES" Below to Nominate LIC
District of Columbia	11001000201	YES
District of Columbia	11001000202	YES

4.1.4 Nominating Eligible Non-LIC Contiguous Tracts

To nominate an Eligible Non-LIC Contiguous Tract, States should use the worksheet in the Nomination Tool, labeled "2) Contiguous." This worksheet includes a list that can be filtered by State, of all Eligible Non-LIC Contiguous Tracts. Next to the list of Eligible Non-LIC Contiguous Tracts is a list of all LIC Tracts whose status as a QOZ would make the contiguous tract eligible for nomination and designation. In cases where an Eligible Non-LIC Contiguous Tract is adjacent to more than one LIC Tract, at least one of the listed LIC Tracts must be nominated to make the non-LIC Tract eligible for nomination. Column D notes whether the Eligible Non-LIC Contiguous Tract may include eligibility based on contiguity with an LIC Tract in a different State.

AMERICAN OVERSIGHT

To nominate a specific Eligible Non-LIC Contiguous Tract within the same State, find the census tract and type or select the word “Yes” in Column E (labeled “Enter "YES" Below to Nominate Eligible Non-LIC Contiguous Tract). In addition, in Column F, enter the tract number of the corresponding contiguous LIC Tract that the State is nominating. The contiguous LIC Tract also must be nominated in the “1) LICs” worksheet, following the steps for nominating LIC Tracts described above.

The example below shows that a user has selected the State “District of Columbia” (using the filter feature and typing the name of the State in the text box) and has nominated census tracts 11001000100 and 11001000202 by typing the word “YES” in Column E. In addition, for the nomination of census tract 11001002102, the user identified census tract 11001009508 in Column F as the contiguous LIC Tract that is also being nominated and has been selected in the “1) LICs” worksheet.

Figure 4: 2) Contiguous

A	B	C	D	E	F
Click arrow to filter state State	Eligible Non-LIC Contiguous Tracts	Contiguous LICs (NOTE: An Eligible Non-LIC Contiguous Tract may be nominated only if one or more of its corresponding Contiguous LICs is also nominated)	Additional Cross-State LIC Tract?	Enter "YES" Below to Nominate Eligible Non-LIC Contiguous Tract	Enter the Tract Number of Corresponding Contiguous LIC Nominated
District of Columbia	11001000100	11001000202,11001005600	NO	YES	11001000202
District of Columbia	11001002102	11001009508,11001001901,11001002201	NO	YES	11001009508

States may also nominate Eligible Non-LIC Contiguous Tracts whose eligibility is based on a LIC Tract in another State by using the worksheet in the Nomination Tool, labeled “3) Cross-State.” This worksheet includes a list that can be filtered by State of all such tracts, next to a list of the LIC Tracts, and the State in which each tract is located, whose status as a QOZ would make the contiguous tract eligible for nomination and designation. Column E notes whether the Eligible Non-LIC Contiguous Tract may also be eligible based on contiguity with an LIC Tract in the same State.

IMPORTANT: Please note that an Eligible Non-LIC Contiguous Tract that qualifies based on contiguity with another State may be nominated only if the corresponding contiguous LIC Tract is nominated by the State in which the contiguous LIC Tract is located. Cross-state nominations will require coordination and confirmation that the contiguous State has nominated the contiguous LIC Tract.

To nominate a specific Eligible Non-LIC Contiguous Tract, find the census tract and type or select the word “Yes” in Column F (labeled “Enter "YES" Below to Nominate Eligible Cross-State Non-LIC Contiguous Tract). In addition, in Column G, enter the tract number of the corresponding contiguous cross-state LIC Tract that has been or will be nominated by the contiguous State.

The example below shows that a user selected the State “Alabama” (using the filter feature and typing the name of the State in the text box) and nominated census tract 01069041800 in Alabama by typing the word “YES” in Column F and 12063210100 in Column G. For this tract

AMERICAN OVERSIGHT

to be eligible for nomination, the State should confirm that Florida has also nominated the LIC Tract 12063210100.

Figure 5: 3) Cross-State

A	B	C	D	E	F	G
Click arrow to filter state		NOTE: An Eligible Non-LIC Contiguous Tract may be nominated only if one or more of its corresponding Contiguous LICs is also nominated. Cross-state nominations require confirmation that the contiguous state has nominated the Contiguous LIC.				
Eligible Non-LIC Contiguous Tract State	Eligible Non-LIC Contiguous Tract	Contiguous Cross-State LICs	LIC State	Contiguous In-State LIC Available?	Enter "YES" Below to Nominate Eligible Cross-State Non-LIC Contiguous Tract	Enter the Tract Number of Corresponding Contiguous Cross-State LIC Nominated
Alabama	01069041800	12063210100, 13099090500	Florida, Georgia	NO	YES	12063210100

4.1.5 Nominating LIC Tracts Based on 2012-2016 ACS Data

As noted above, the census tracts listed in the Nomination Tool are based on 2011-2015 ACS 5-Year data and are eligible tracts for the purposes of IRC §1400Z-1, meaning that if a State nominates one of the tracts identified in the Nomination Tool as being either an eligible LIC Tract or an Eligible Non-LIC Contiguous Tract, a State's nomination of that tract will not fail to be certified on the grounds that the tract is no longer eligible under the 2012-16 ACS 5-Year data.

If a State wishes to nominate an LIC Tract that is not identified in the Nomination Tool but that is eligible under the 2012-2016 ACS 5-Year data, the State may do so using the worksheet labeled "4) 2012-2016 ACS."

Please note that 2012-2016 ACS 5-Year data may be used to nominate only LIC Tracts that meet the definition of an LIC Tract based on poverty and/or the median family income of that tract. Nominations of Eligible Non-LIC Contiguous Tracts must be based on the 2011-2015 ACS 5-Year data as presented in the Nomination Tool.

To nominate a specific LIC Tract based on the 2012-2016 ACS 5-Year data, select the State and census tract in Columns A and B, and type or select the word "Yes" next to that census tract in Column C (labeled "Enter "YES" Below to Nominate LIC). In addition, to support the State's claim that the selected census tract meets the definition of an LIC, enter the following additional information on that tract (see Census Factfinder for ACS 2012-2016 data sources[1]):

- 2012-2016 Tract Poverty Rate (Column E)[2]
- 2012-2016 Tract Median Family Income (Column F)[3]
- 2012-2016 State Median Family Income (Column G)[4]
- 2012-2016 Core Based Statistical Area (CBSA) Median Family Income (Column H)[5]

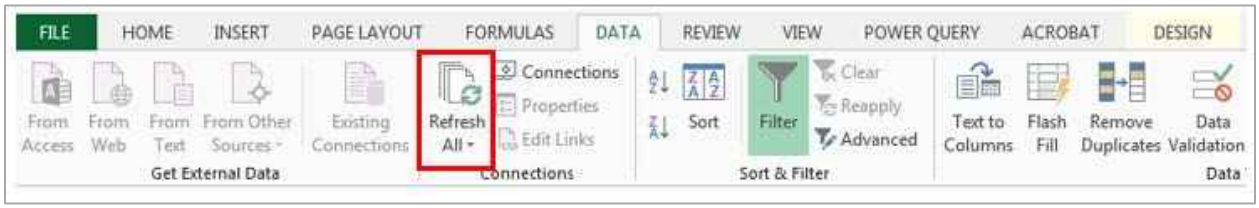
[5] U.S. Census Bureau ACS variable B19113 for Core Based Statistical Areas.

AMERICAN OVERSIGHT

- Metro/Non-Metro (Column I) [6]



4.1.6 Tract Number Changes

The worksheet labeled "Tract Number Changes" includes a list of selected census tracts whose numbering was changed by the US Census Bureau between the 2010 census tract definitions and the 2015 census tract definitions. States may use either set of numbers. These changes do not include tracts with post-2010 geographic boundary changes.

4.1.7 Testing Nominations in the Summary Worksheet

After the State selects its nominations by completing the worksheets in the Nomination Tool, the nomination can be tested by returning to the Summary worksheet and clicking the "Refresh All" button in the "Data" tab in the menu ribbon. The Summary table will then indicate the number of LIC Tracts and Eligible Non-LIC Contiguous Tracts nominated and whether the nomination falls within the statutory limits.

Figure 6: Data Menu Ribbon, "Refresh All"

If the total number of tracts nominated (as determined by adding the numbers in Columns E through H, and as indicated in Column I) do not exceed the statutory limit indicated in Column B, then Column J will show that the nomination passes the 25 percent test. Similarly, if the total number of Eligible Non-LIC Contiguous Tracts nominated (as determined by adding the numbers in Columns G and H) do not exceed the statutory limit indicated in Column D (or 5 percent of the total tracts nominated if the State does not maximize its nomination), Column K will indicate that the nomination passes the 5 percent test. In contrast, if in either case the number of tracts nominated exceed the statutory limits, the worksheet will indicate that the nomination fails one or both tests.

The example below shows that the District of Columbia nominated 16 LIC Tracts and two Eligible Non-LIC Contiguous Tracts. The worksheet indicates that this passes the 25 percent test because the 18 tracts nominated is less than the maximum of 25 tracts allowable for the State. In this case, the State still can nominate seven additional tracts. However, the worksheet also indicates that the nomination fails the 5 percent Contiguous Tracts test. The two Eligible Non-LIC Contiguous Tracts nominated exceeds the statutory limit of Eligible Non-LIC Contiguous Tracts, which can make up no more than 5 percent (rounded up to the next whole number) of the total nomination (or no more than two Eligible Non-LIC Contiguous Tract for the District of Columbia if the total nomination consists of at least 21 tracts).

[6] See OMB BULLETIN NO. 17-01: Revised Delineations of Metropolitan Statistical Areas, Micropolitan Statistical Areas, and Combined Statistical Areas, and Guidance on Uses of the Delineations of These Areas. https://www.whitehouse.gov/omb/bulletins/

AMERICAN OVERSIGHT

Figure 7: Refreshed Summary Tab

Please note that the worksheet tests provided below are solely for the convenience of the State and to provide assistance with the nomination process, and are not determinative. The Internal Revenue Service will make the final determination and designation of each State's Opportunity Zones after reviewing the State's nomination.										
CLICK "DATA" MENU "REFRESH ALL" State	A) Total Number of LIC Tracts in State	B) Maximum Number of Tracts That Can Be Nominated (the greater of 25% of All LICs or 25 if State has fewer than 100 LICs)	C) Maximum Number of Eligible Non-LIC Contiguous Tracts That Can Be Among the Nominated Tracts (5% of Column C) if the State Maximizes the Number of its Nominations	Number of LIC Tracts Nominated (2011-2015 ACS	Number of LIC Tracts Nominated (2012-2016 ACS	Number of In-State Eligible Non-LIC Contiguous Tracts Nominat	3) Number of Cross-State Eligible Non-LIC Contiguous Tracts Nominated	Total Tracts Nominated	DOES OPPORTUNITY ZONE PASS 25% TEST? (Number of tracts designated may not exceed 25% of number of LICs in the State)	DOES OPPORTUNITY ZONE PASS 5% TEST? (Not more than 5% of tracts designated may be Non-LIC Contiguous tracts
District of Columbia	97	25	2	16	0	2	0	18	PASS	FAIL

In this case, the State could return to the Contiguous worksheet of the Nomination Tool and deselect one of the nominated tracts, and nominate an additional LIC Tract in its place, or nominate at least two additional LIC Tracts. After doing so, returning to the Summary worksheet and refreshing the results the worksheet would indicate that the new nomination passes the test.

Figure 8: Revised Refreshed Summary Tab

Please note that the worksheet tests provided below are solely for the convenience of the State and to provide assistance with the nomination process, and are not determinative. The Internal Revenue Service will make the final determination and designation of each State's Opportunity Zones after reviewing the State's nomination.										
CLICK "DATA" MENU "REFRESH ALL" State	A) Total Number of LIC Tracts in State	B) Maximum Number of Tracts That Can Be Nominated (the greater of 25% of All LICs or 25 if State has fewer than 100 LICs)	C) Maximum Number of Eligible Non-LIC Contiguous Tracts That Can Be Among the Nominated Tracts (5% of Column C) if the State Maximizes the Number of its Nominations	Number of LIC Tracts Nominated (2011-2015 ACS	Number of LIC Tracts Nominated (2012-2016 ACS	Number of In-State Eligible Non-LIC Contiguous Tracts Nominat	3) Number of Cross-State Eligible Non-LIC Contiguous Tracts Nominated	Total Tracts Nominated	DOES OPPORTUNITY ZONE PASS 25% TEST? (Number of tracts designated may not exceed 25% of number of LICs in the State)	DOES OPPORTUNITY ZONE PASS 5% TEST? (Not more than 5% of tracts designated may be Non-LIC Contiguous tracts
District of Columbia	97	25	2	19	0	1	0	20	PASS	PASS

Please note that the worksheet test is provided solely for the convenience of the State and to provide assistance with the nomination process and is not determinative. The Internal Revenue Service will make the final determination and designation of each State's Opportunity Zones.

4.2 Letter from the State CEO

Once the Nomination Tool is complete, the State CEO must confirm that the census tracts identified in the Nomination Tool represent the official nomination of the State CEO. This may be done in the form of a letter, on executive letterhead, signed by the State CEO. The letter from the State CEO should include the following language:

[Title]
[State CEO]
[Address]

The Honorable Steven T. Mnuchin
Secretary
U.S. Department of the Treasury
1500 Pennsylvania Avenue, NW
Washington, DC 20220

Dear Mr. Secretary:

AMERICAN OVERSIGHT

Section 1400Z-1(b)(1) of the Internal Revenue Code provides that a State's chief executive officer may nominate a limited number of low-income community population census tracts and population census tracts that are contiguous to low-income communities for designation as qualified opportunity zones not later than the end of the determination period. The determination period ends March 21, 2018, unless there has been a request for an extension until April 20, 2018, by the chief executive officer of a State under section 1400Z-1(b)(2) of the Code. This letter serves as notification to the Secretary that the [State/Commonwealth/District/Territory] of [State] formally nominates the tracts identified in the accompanying Opportunity Zone Nomination Tool for designation as qualified opportunity zones based on Revenue Procedure 2018-16 published in the Internal Revenue Bulletin 2018-9 on February 26, 2018.

5. Visualizing Individual Census Tracts

As an added convenience and tool for selecting their nominations, States may use the CDFI Fund's Community Investment Mapping System (CIMS) to visualize LIC Tracts and Eligible Non-LIC Contiguous Tracts on a map. To use CIMS, click the link above or go to https://www.cims.cdfifund.gov/preparation/?config=config_nmtc.xml.

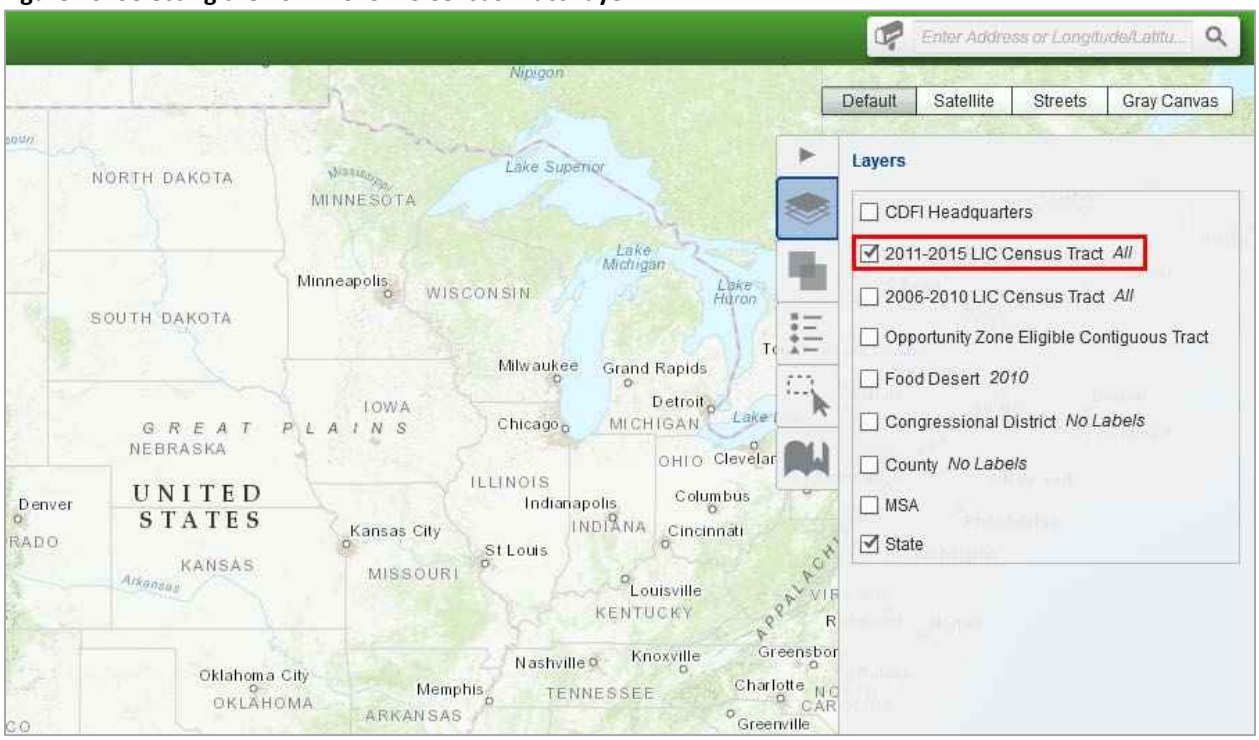

Figure 9: CIMS

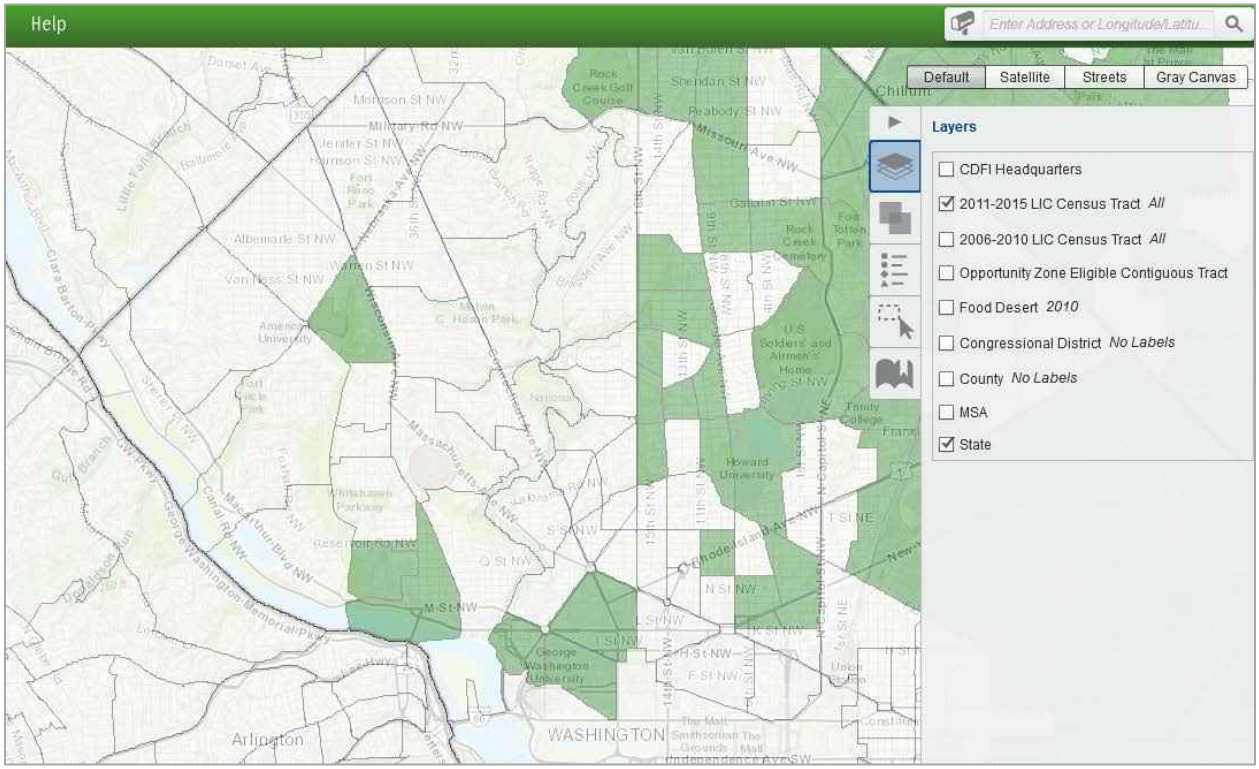
To view LIC Tracts, click on the "Layers" tab on the menu on the right hand side of the screen and select "2011-2015 LIC Census Tract."

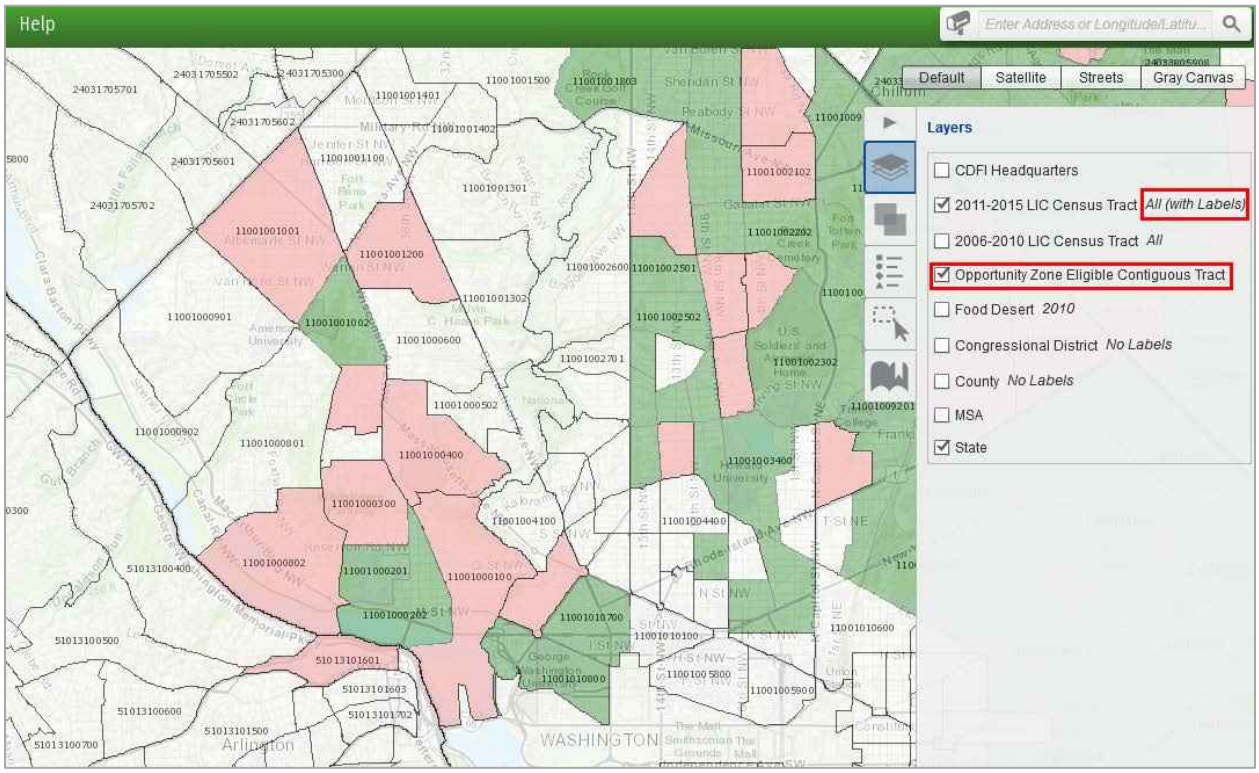


AMERICAN OVERSIGHT

Figure 10: Selecting the 2011-2015 LIC Census Tract Layer

After zooming in to a specific area on the map, LIC Tracts will appear in green.

Figure 11: 2011-2015 LIC Census Tract View



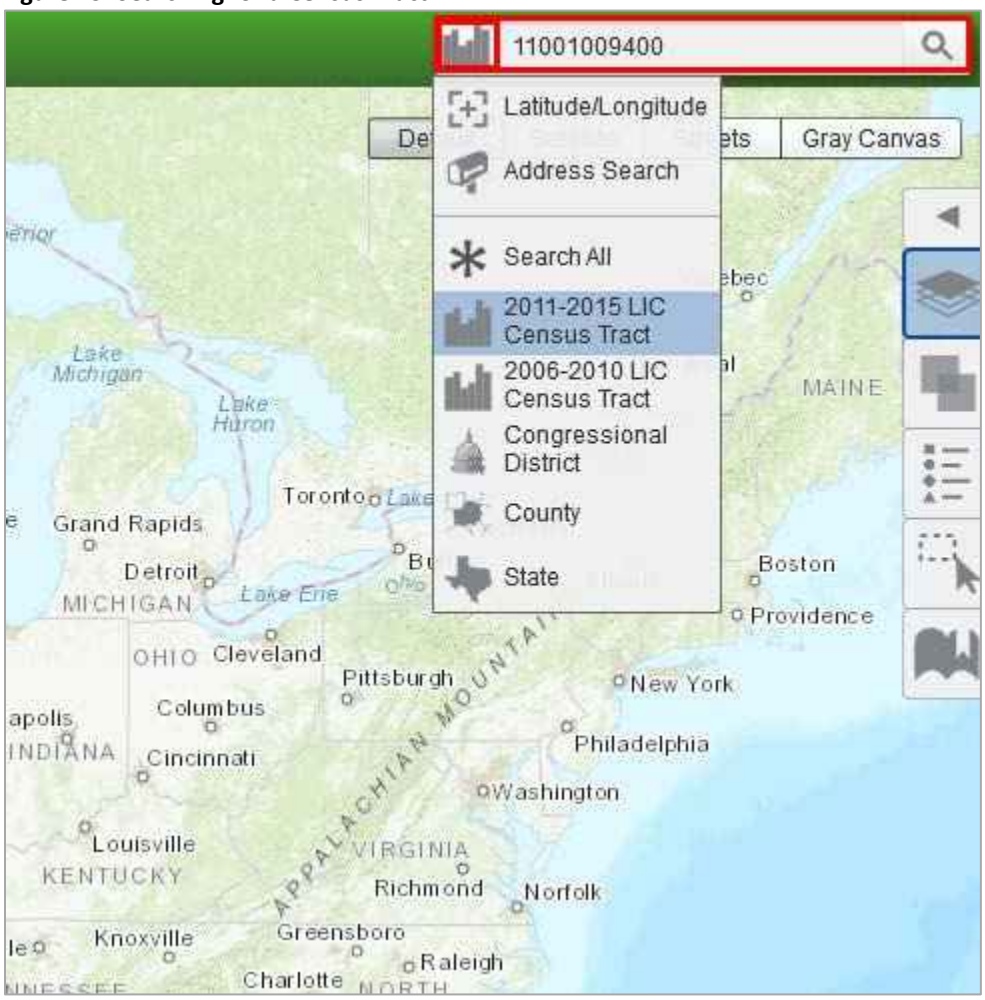
AMERICAN OVERSIGHT

Layers are the mechanism used to display geographic datasets in the CIMS mapping application. The Layers tab allows users to show the list of available map layers and toggle the visibility (on or off) of any of the available layers. Users should be aware that in CIMS numerous layers of geography (county, tract, and individual addresses, for instance) can be displayed on the screen at the same time.

To view Eligible Non-LIC Contiguous Tracts, click on the "Layers" tab and select "Opportunity Zone Eligible Contiguous Tract." Eligible Non-LIC Contiguous Tracts will appear in red.

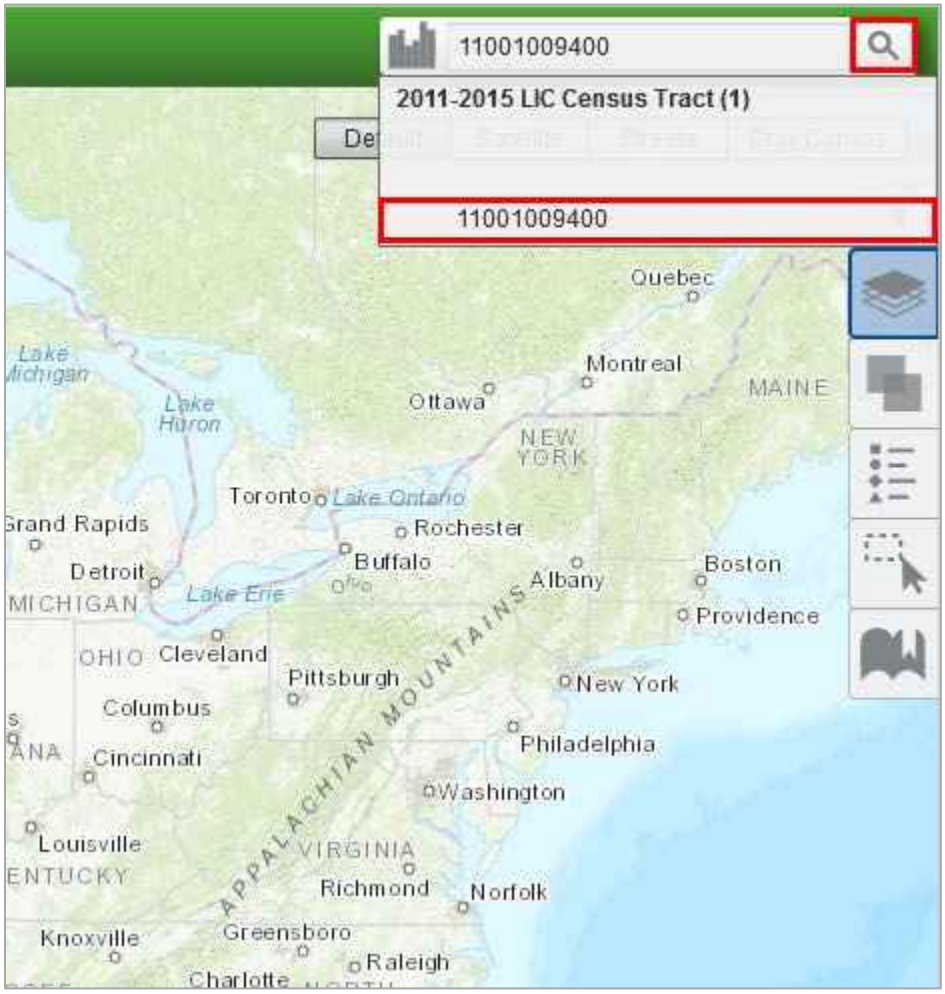
To view census tract numbers select "All (with labels)" next to the "2011-2015 LIC Census Tract" option within the Layers tab. The 11-digit census tract numbers will appear labeled in the CIMS map as shown in the figure below.

Figure 12: Opportunity Zone Eligible Contiguous Tracts with Labels



5.1 Selecting a Census Tract

To select and zoom in to a specific census tract, click on the mailbox on the left side of the search bar and select "2011-2015 LIC Census Tract." Enter one of the 11-digit census tract numbers for a LIC Tract or Eligible Non-LIC Contiguous Tract, found in the Nomination Tool. In the example below, census tract 11001009400 in the District of Columbia was entered in the search bar and 2011-2015 LIC Census Tract was selected. After clicking on the magnifying glass, one tract was found.



AMERICAN OVERSIGHT

Figure 13: Searching for a Census Tract

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

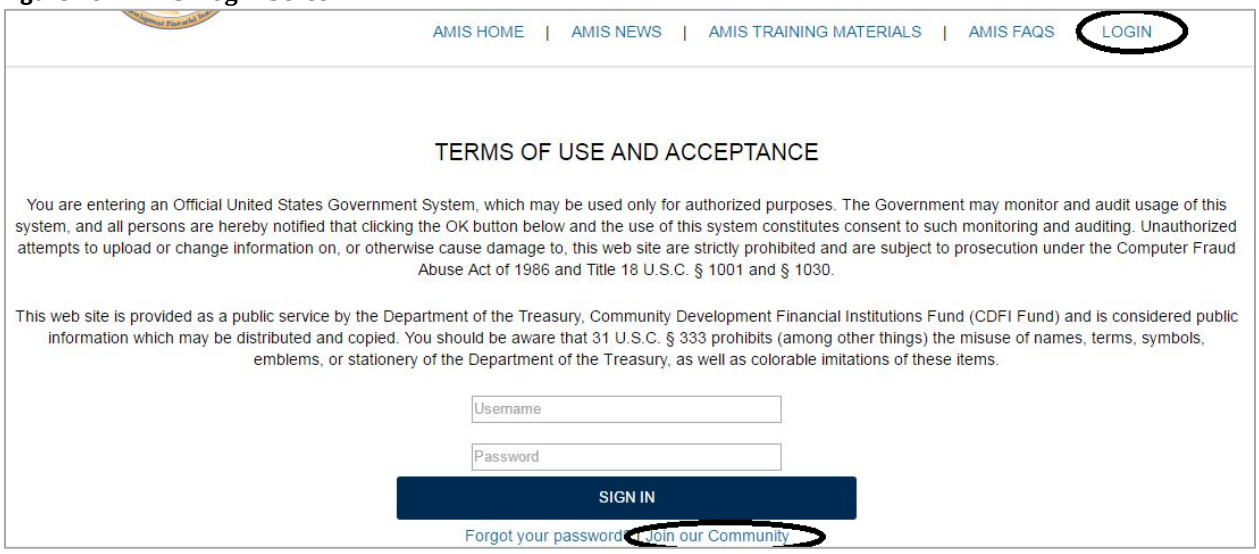
6. Submitting a Nomination

The CDFI Fund is using its Awards Management Information System (AMIS) for States to submit their QOZ nominations. States will use the AMIS Service Request feature to submit all required documentation, including the Opportunity Zone Nomination Tool.

In order to use the AMIS Service Request feature, a State must register an organization in AMIS. The organization may be the office of the State CEO or the office or agency of the Authorized Representative completing the Nomination Tool. Additionally, Authorized Representatives submitting the QOZ nominations must be registered as organization "Contacts" in AMIS. This document provides step-by-step instructions, along with screen shots, to explain and guide the registration and submission processes.



If you encounter any problems with the registration or submission processes, please contact the CDFI Fund AMIS Help Desk at AMIS@cdfi.treas.gov or 202-653-0422.

6.1 The AMIS Registration Process

6.1.1 Registering a New Organization and the First Contact

To register a new organization in AMIS, the registering user accesses the AMIS Landing Page and selects the login tab in the top right corner. This will display the AMIS "Terms of Use and Acceptance" and the text boxes for logging into AMIS.

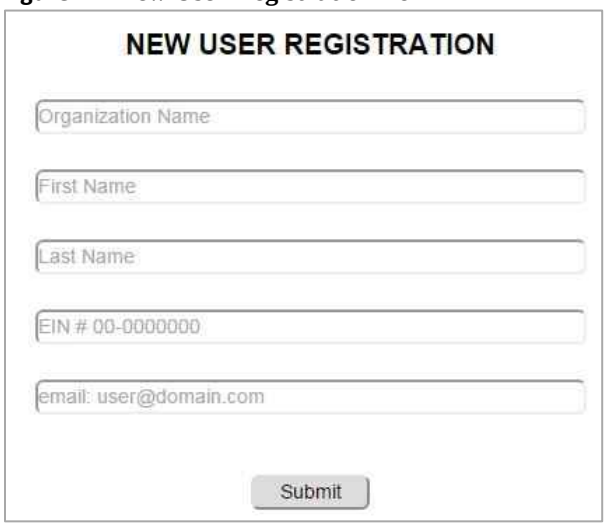


Figure 16: AMIS Login Screen

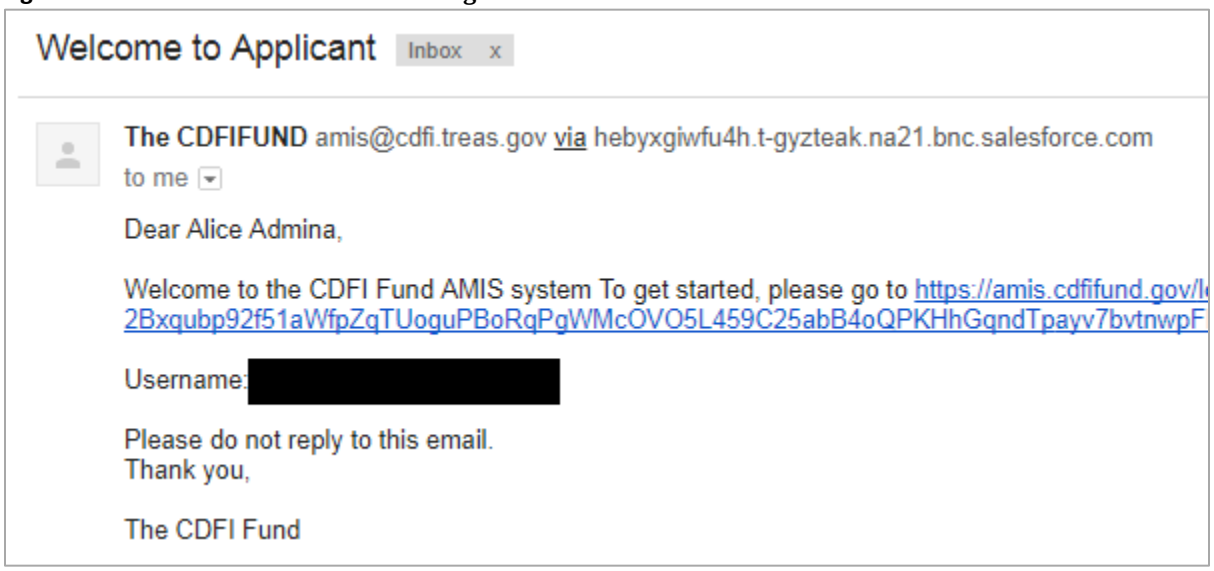
Underneath the "Sign In" button, the registering user selects the "Join our Community" link to begin the registration process. AMIS displays the New User Registration form.



AMERICAN OVERSIGHT

Figure 17: New User Registration Form

The registering user completes and submits the registration form, including Organization Name, First and Last Name of the Contact, the Organization's EIN, and **a State government email address** for the Authorized Representative. **(Note: Accounts created with a non-State government email address will not be recognized as that of an Authorized Representative for the purposes of submitting a QOZ nomination on behalf of a State CEO.)** Upon submission, AMIS displays a "Thank you for registering" message and sends the following "create password email message" to the email address provided on the registration form. Note that the email address must be unique within AMIS. The AMIS Username for the registering user is the user's email address with four digits appended to it. The Username is included in the email message.

Figure 18: Create Password Email Message

AMERICAN OVERSIGHT

Selecting the link in the email displays the AMIS "Change Your Password" page, where the registering user creates the password for the AMIS account. The password must be at least 8 characters, and contain letters, numbers, and at least one special character from the following:

! # $ % - _ = + < >

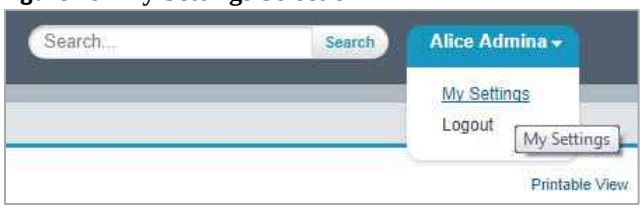
After entering the new password, the registering user is logged into AMIS. Note that there are three Contact types in AMIS: Admin User (full control); User (same as Admin User, but cannot create or change the permissions of other Contacts); and Viewer (read-only). The registering user is made an Admin User Contact for the newly created organization.

6.1.2 Changing the Organization's Time Zone

AMIS creates all users in the Eastern Standard Time Zone (i.e., GMT-05:00). The CDFI Fund recommends that States not on Eastern Standard Time correct their time zone. To change the organization's time zone, perform the following steps:

1. Select the My Settings option from the drop-down list that appears under your name in the top right corner of the screen.

Figure 19: My Settings Selection



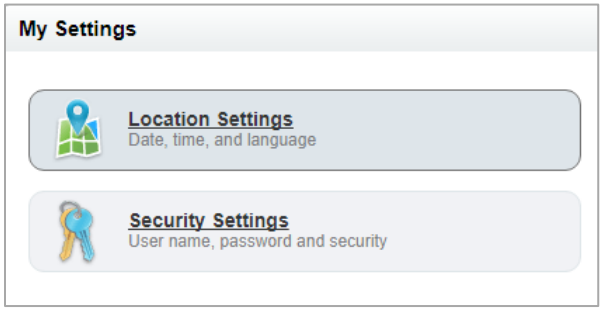


Figure 20.

2. This displays the AMIS Settings options. Select Location Settings.

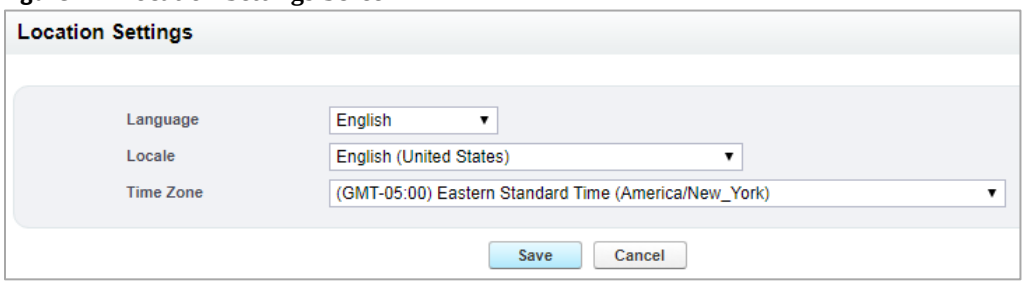

Figure 20: My Settings Screen

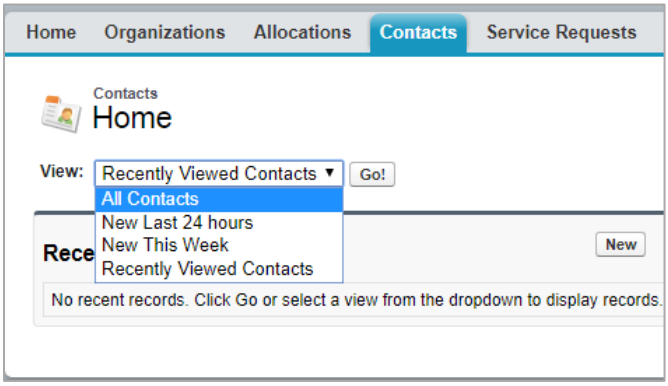
3. This displays the Location Settings option. Select the relevant time zone from the drop-down and click Save.

AMERICAN OVERSIGHT

Figure 21: Location Settings Screen

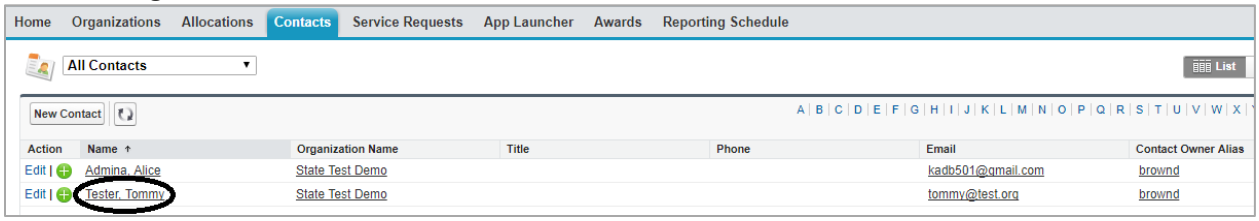
6.1.3 Registering Additional Contacts



Additional Contacts for an organization can be created in one of two ways. The preferred way is for the new user to go to the AMIS Login Page and click the "Join our Community" link. This will display the New User Registration page (see Figure 17: New User Registration Form).

The new user completes and submits the registration form. Upon submission, AMIS creates a Contact record (profile of Viewer) for that user for the organization requested. The new Contact has read-only permissions until an Admin User elevates the Profile to User or Admin User.

To elevate the Profile, the Admin User performs the following steps:



1. Go to the Contacts tab, select All Contacts from the drop-down, and click the Go! Button.

Figure 22: All Contacts View

2. Click on the name of the Contact.

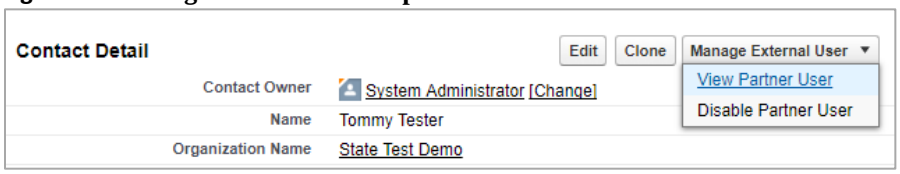


Figure 21: Organization List of Contacts

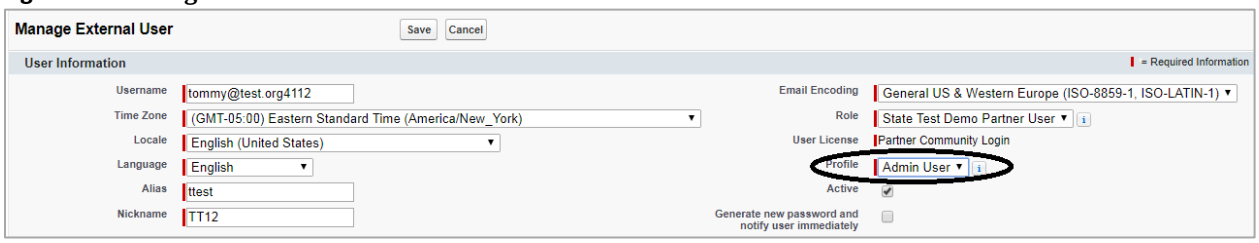
3. This displays the Contact Detail Page. Select View Partner User from the Manage External User drop-down.

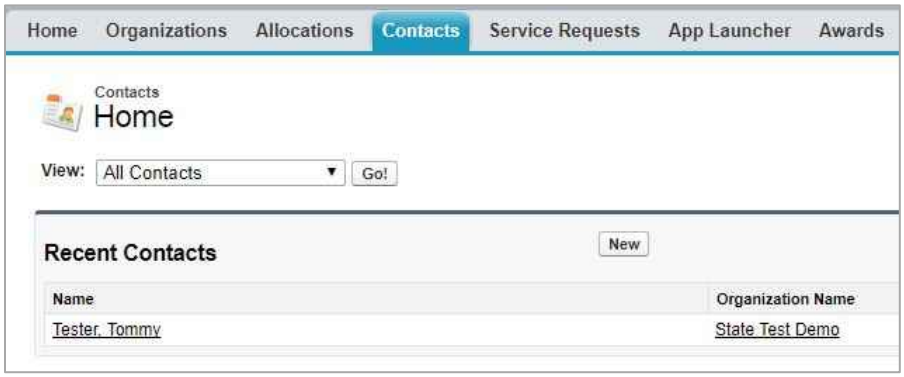


AMERICAN OVERSIGHT

Figure 22: Manage External User Options – View Partner User

4. This displays the User Detail page. Click Edit, change the Profile setting, and click Save. For purposes of submitting designated Opportunity Zones, the CDFI Fund recommends that all Contacts be made Admin Users.

Figure 23: Manage External User Edit Screen



The new user will now have the appropriate type of access based on the Profile selected.

6.1.4 Creating a New Contact Manually

The second way to create a new Contact is for an Admin User to create the Contact manually. To create a new Contact, the Admin User performs the following steps:

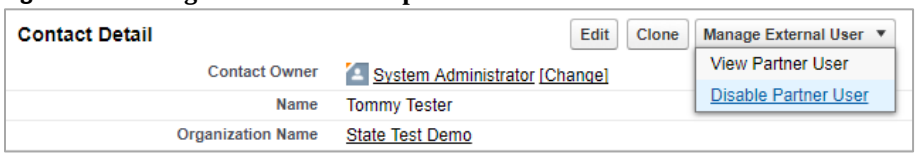
1. Go to Contacts tab and click on the New button.

Figure 26: New Contact Button

2. This displays the Contact Edit page. Complete the information for the new Contact and click Save. In AMIS, the red bar indicates a required field.

AMERICAN OVERSIGHT

Figure 24: Contact Edit Page



3. This creates the new Contact, but does not assign a Profile to the new Contact. Follow the steps in section 6.1.3 to make the new Contact an Admin User, User, or Viewer.

6.1.5 Disabling Contacts

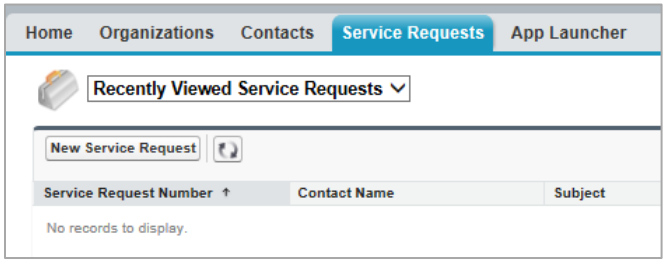
Within AMIS, Contacts cannot be deleted or removed, but they can be disabled by an Admin User. A disabled Contact cannot log into AMIS. To disable a Contact, the Admin User performs the following steps:

1. Follow steps 1 and 2 from Section 6.1.3 to select the Contact to be disabled.
2. This displays the Contact Detail Page. Select Disable Partner User from the Manage External User drop-down.

Figure 25: Manage External User Options – Disable Partner User

The Contact no longer has access to AMIS.

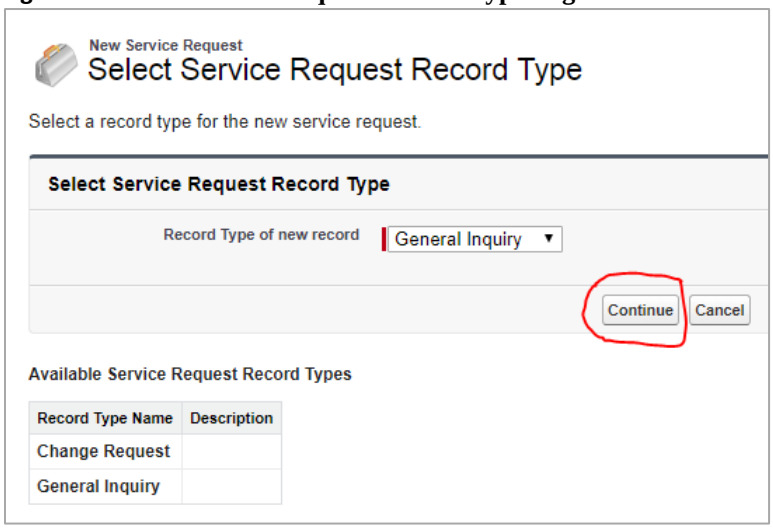
6.2 The Nomination Submission Process



Once a State has registered an organization in AMIS and the relevant Contacts have been created, a Service Request can be submitted with the State's nomination of Qualified Opportunity Zones.

Once logged into AMIS, a user performs the following steps to create and submit a Service Request.

1. Go to the Service Request tab and select the New Service Request button.



AMERICAN OVERSIGHT
NV-DA-20-0615-A-001402

Figure 29: Creating a Service Request

2. The Select Service Request Record Type page is displayed. Leave the default Record Type of "General Inquiry" and click the Continue button.

Figure 30: Select Service Request Record Type Page

3. The Service Request Detail page is displayed. AMIS initializes some fields for you. AMIS sets the Contact Name and Organization Name to your name and organization. AMIS also sets the Status to *New*, the Service Request Origin to *Web*, and the Priority to *Medium*. You need only to complete three fields, plus attach documents. The first field is Type, and it is located in the Additional Information section. For the Type field, select the value "Opportunity Zones Designation" from the drop-down list. Leave the Status, Service Request Origin, and Priority fields to their default values.

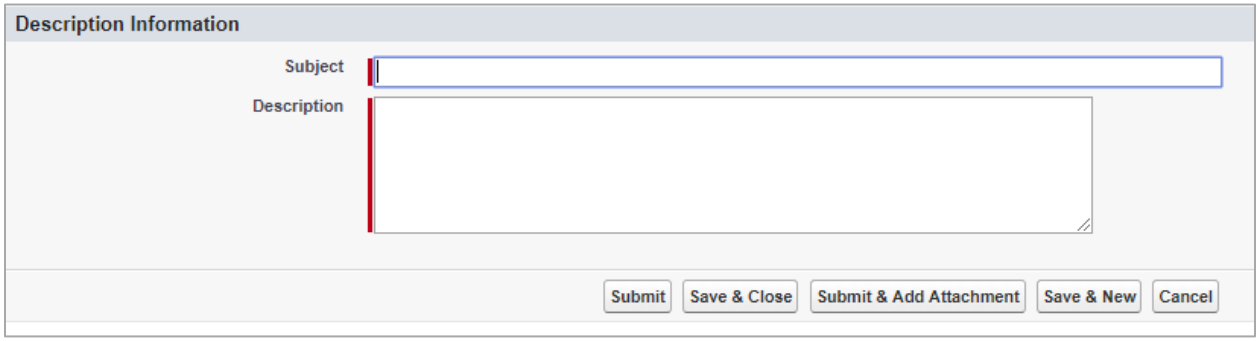


Figure 26: Service Request Additional Information

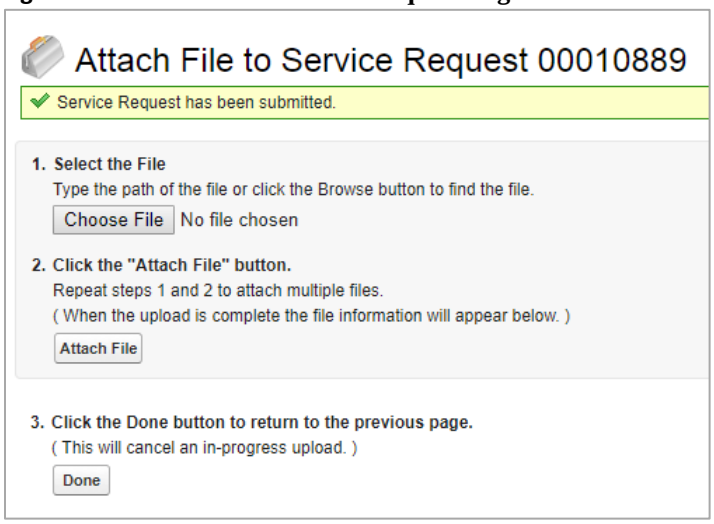
4. The last two required fields are the Subject and the Description. Enter "Qualified Opportunity Zone Nomination by <<State Name>>" for both the subject and the description.

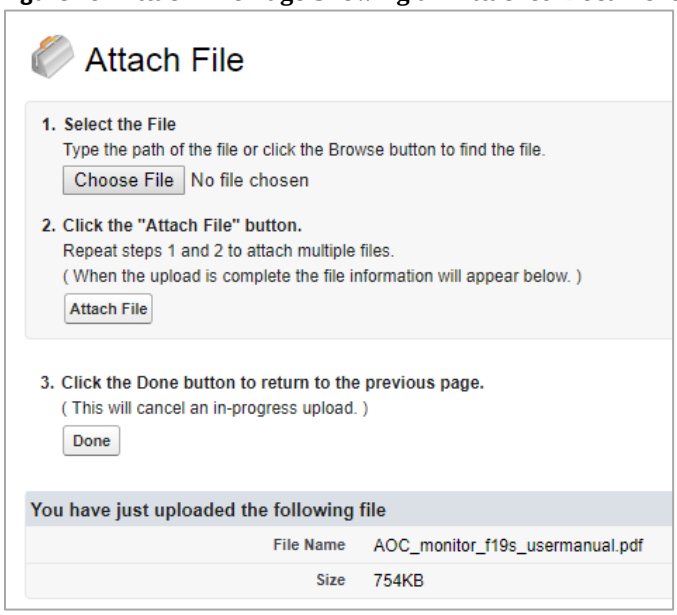


AMERICAN OVERSIGHT

Figure 27: Service Request Description Information

5. Click the "Submit & Add Attachment" button, which gives you the option to add attachments to the Service Request prior to submission. The Attach File to Service Request page is displayed. It provides the unique Service Request ID for your submission (i.e., 00010889 in the example below).

Figure 28: Attach File to Service Request Page



<u>DOCUMENTS TO ATTACH:</u> States should attach a completed Opportunity Zone Nomination Tool along with a letter from the State CEO, on executive letterhead, confirming the nomination.

6. To attach a document, click the Choose File button. This allows you to browse your computer for the document to attach. Once chosen, click the Attach File button. You will receive a message that the file is being attached, then you will see the name of the document displayed below the instructions, as shown in Figure 35. With a Service Request, you can attach only one document at a time; however, you can repeat the process (Figure 33, Steps 1 and 2) as many times as needed.

AMERICAN OVERSIGHT

Figure 29: Attach File Page Showing an Attached Document

7. Once all of the required documents have been attached, verify that the file name(s) is displayed below the instructions and then click the Done button. Please do not click the Done button until you see the file name displayed below the instructions. Clicking Done before the files are properly attached will cancel the attachment, but you will not receive any message that the attachment was canceled.

This completes the submission of your Opportunity Zones nomination. As stated above, if you encounter any problems with the registration or submission processes, please contact the CDFI Fund AMIS Help Desk at AMIS@cdfi.treas.gov or 202-653-0422.

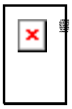
Good Afternoon Olivia,

The Nevada Governor's Office of Economic Development has requested that I represent the state at the Opportunity Zone Conference on April 17th. As you can see from the confirmation below, I have completed the registration. Still, due to the late completion I wanted to reach out directly to you to ensure there are no other details you may need from me in order to be able to attend the conference. I would like to confirm attendance before I expend state funds on travel plans.



Thank you sincerely,

2. PUBLIC COMMENT

Governor Brian Sandoval asked if anyone from the public sought to make public comment. No public comment was provided.

3. GOVERNOR SANDOVAL'S COMMENTS

Governor Sandoval advised he had led a State trade mission to the Basque region of Spain in June 2018 and had signed MOUs with the President of Bizkaia and the President of Navarra. The MOUs encourage closer ties, collaboration and trade in the areas of smart grid technology, renewable energy, blockchain technology, water technology, and agri-food industries.

In addition to many productive meetings, the trade delegation toured a facility where a key piece of the future of Southern Nevada's access to water is in the process of being built. Headquartered in the Basque Country of Spain, Indar, a world leader in rotating electrical machines, is manufacturing massive, cutting-edge submersible pumps to draw water from Lake Mead through the unprecedented infrastructure project known as the third straw.

The trade delegation also met with a manufacturer of cell phone-controlled door locks. The Governor noted a direct application to school safety and the ability for staff and teachers to have increased control in the event of an emergency. Governor Sandoval advised he had established a Statewide School Safety Task Force, charged with the safety of Nevada's schoolchildren and was excited about the potential application of this product.

The Governor's Office of Economic Development (GOED) International Trade division recently announced the creation of a new initiative aimed at attracting international, high-growth companies looking to establish U.S. footholds and expand. Nevada Global will partner with economic development agencies abroad to identify candidate businesses and connect them to Nevada's startup accelerator community.

4. APPROVAL OF THE MAY 17, 2018 BOARD MEETING MINUTES

A MOTION WAS MADE BY SECRETARY OF STATE BARBARA CEGAVSKE TO APPROVE THE MAY 17, 2018 MEETING MINUTES. THIS MOTION WAS SECONDED BY MR. JAMES BARRETT. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

5. ABATEMENT APPLICATIONS FOR BOARD APPROVAL

A. BENTLY HERITAGE, LLC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Andrew Haskin, Director of Business Development, Northern Nevada Development Authority (NNRDA), presented Bently Heritage and provided an overview of the company and abatements sought. Bently Heritage, LLC is a distilled spirits manufacturing business established in April 2016. The company had created a sustainable estate distillery in two historic properties located near downtown Minden. The company's products included premium spirits such as whiskey, gin, and vodka from local grains and botanicals. The company planned to hire an additional six employees at an average wage of $21.95 per hour and make a capital equipment investment of approximately $4.2 million. Mr. Haskin was joined by Mr. Carlos Luri, Director of Government Affairs and Mr. Bryan Davis, Marketing Director, Bentley Heritage, LLC.

Mr. Luri advised Bently Heritage, LLC would be expanding its current facility by building two new rickhouses, for whiskey storage and adding a bottling line. The distillery was also expected to open for public tours and tastings in the fall of 2018. Mr. Luri noted the recent public interest in craft distilling and historical tourism was anticipated to create a hub of activity in downtown Minden. This hub was expected to draw visitors from the Tahoe Basin and beyond which would bring additional revenues to local retailers, lodging and dining establishments.

Governor Sandoval asked if the botanicals and grains used in the company’s products were from Nevada. Mr. Davis confirmed and advised the company was constructing greenhouses on its ranch property to allow sustainable growth and harvesting of winter rye, wheat, and barley which would be malted in-house on the company’s own malting floor.

Governor Sandoval noted the company’s repurposing of two historic properties and asked the date these buildings were first constructed. Mr. Luri advised the Flour Mill had been built in 1906 and the Butter Factory was also over 100 years old.

Governor Sandoval commended the company for its commitment to Nevada’s history and noted that morning he’d had the privilege of being a part of a blessing ceremony at the Stewart Indian School, which was constructed in 1890 and was also undergoing a renovation and revitalization development.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE ABATEMENT APPLICATION OF BENTLY HERITAGE, LLC, FOR A SALES TAX ABATEMENT, MODIFIED BUSINESS TAX ABATEMENT, AND PERSONAL PROPERTY TAX ABATEMENT AS PRESENTED IN AGENDA ITEM 5A.

AMERICAN OVERSIGHT

THIS MOTION WAS SECONDED BY MR. DAN KLAICH. THE MOTION PASSED UNANIMOUSLY.

B. BIGELOW AEROSPACE

- **AVIATION SALES & USE TAX ABATEMENT**
- **AVIATION PERSONAL PROPERTY TAX ABATEMENT**

Ms. Kylie Rowe, Vice President of Economic Development, Las Vegas Global Economic Alliance (LVGEA) presented Bigelow Aerospace and provided an overview of the company and abatements sought. Bigelow Aerospace was founded in 1999, and their global headquarters is in North Las Vegas. The company is considering expanding its current operations. The expansion would accommodate the company's new project: the development and manufacture of Bigelow Aerospace's flagship spacecraft, the B330, an entirely autonomous platform outfitted with two dissimilar propulsion systems and entire suite of environmental life support systems. The B330 is the only spacecraft of its kind being developed in the world. Within the first year, the expansion would create five new jobs at an average hourly wage of $25 per hour and include capital investments of approximately $51 million in capital equipment and $6.5 billion investment in aviation parts over the forthcoming 20 years. Ms. Rowe was joined by Ms. Blair Bigelow, Vice President of Corporate Strategy, Bigelow Aerospace.

Ms. Bigelow advised Bigelow Aerospace was a relatively small outfit focused on accomplishing extraordinary things. The company hoped to be a symbol to Nevada for entrepreneurship, innovation, and technology advancement. To accommodate a new, groundbreaking project, the company was considering expanding its current North Las Vegas operations.

Governor Sandoval noted Bigelow Aerospace employed cutting edge aeronautical and mechanical engineers and asked if the company had a relationship with the University of Las Vegas (UNLV) and the University of Reno (UNR) engineering schools. Ms. Bigelow confirmed the company enjoyed a relationship with both schools and hoped to partner with them in the future.

Governor Sandoval inquired about the specific skill sets sought in employees. Ms. Bigelow advised the company sought skills in specialized avionics along with structural, electrical and mechanical engineering.

Governor Sandoval thanked the company for the innovation it bought to the state and noted Bigelow Aerospace was a Nevadan company set to play an important role in in the history of mankind.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE ABATEMENT APPLICATION OF BIGELOW AEROSPACE FOR AN AVIATION SALES AND USE TAX ABATEMENT AND AN AVIATION PERSONAL PROPERTY TAX ABATEMENT AS PRESENTED IN AGENDA ITEM

AMERICAN OVERSIGHT

5B. THIS MOTION WAS SECONDED BY MR. ADAM KRAMER. THE MOTION PASSED UNANIMOUSLY.

C. CYANCO COMPANY, LLC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

D. CYANCO COMPANY, LLC – CATALYST FUND

Mr. Sheldon Mudd, Executive Director, Northeastern Nevada Regional Development Authority (NNRDA), presented Cyanco Company, LLC and provided a brief overview of the company and abatements sought. Cyanco Company, LLC manufactures and markets chemicals products. The company produced solid to liquid systems, cyanide control systems, peroxide assisted leaches, analyzers and sodium cyanide for the gold mining industry. The company started producing liquid sodium cyanide in 1990 at a single plant in Winnemucca, Nevada. The original plant was designed to produce 28 million pounds of product annually. A second plant came online in 1997 and investments had been made in both plants over the years to debottleneck, implement improvements and enhancements and increase production. Today, the two plants had production capacity of over 240 million pounds annually. The company's expansion would generate 20 full-time jobs at an average of $44.53 per hour and an approximate capital equipment investment of $11 million. Mr. Mudd was joined by Paul Rostek, President and General Manager, Cyanco Company, LLC.

Mr. Paul Rostek advised Cyanco Company, LLC was considering expanding its Humboldt County facility. The project would involve the establishment of a new solid sodium cyanide manufacturing facility with an annual production capacity of 60 million pounds. The company would export 100% of product from its new solids facility to serve its customers in Canada, Mexico, Texas and other locations outside of Nevada. Over the company's history in Nevada, it has delivered more than two billion pounds of product safely without incident. Mr. Rostek advised the company also provided annual training exercises for employees, mines and first responders.

Governor Sandoval noted the company was considering both Texas and Nevada and asked about the company's next steps should it be awarded the abatements sought. Mr. Rostek advised the company anticipated making its decision very swiftly and advised the company was still in discussions regarding incentives at the local level.

Mr. Kramer asked what led the company to consider expanding in Winnemucca. Mr. Rostek advised Cyanco Company, LLC has been a proud member of the Winnemucca and Humboldt County communities for more than 25 years and enjoyed an excellent working relationship with the city and the county. Additionally, the company currently had two solution trains. If the Nevada mining requirements increased, the solids plant could accommodate a third train for converting excess into solids for global shipping. Therefore,

AMERICAN OVERSIGHT

the Winnemucca location represented a much broader strategic importance than just the initial solids plant. It could also be the launching pad for further expansions in Winnemucca.

Secretary of State Cegavske highlighted the company's letters of support for the application and noted the local communities were very supportive of the company's potential expansion.

Dr. Dana Bennett advised she would be abstaining from voting on Agenda items 5C and 5D as Cyanco Company, LLC was a member of Nevada Mining Association's governing board of directors.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE ABATEMENT APPLICATION OF CYANCO COMPANY, LLC FOR A SALES TAX ABATEMENT, MODIFIED BUSINESS TAX ABATEMENT AND PERSONAL PROPERTY TAX ABATEMENT AS PRESENTED IN AGENDA 5C AND CATALYST FUND GRANT IN AN AMOUNT NOT TO EXCEED $100,000, AS DESCRIBED IN AGENDA ITEM 5D. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

E. G4 WORKS, LLC

- **AVIATION SALES TAX ABATEMENT**
- **AVIATION PERSONAL PROPERTY TAX ABATEMENT**

Mr. Michael Walsh, Vice President of Economic Development, LVGEA, presented G4 Works, LLC and provided a brief overview of the company and abatements sought. G4 Works, LLC operated as a subsidiary of Allegiant Travel Company (Allegiant). Allegiant operated an airline founded in 1998 and was now as one of America's premier ultra-low-cost-carriers, offering non-stop air service to leisure travelers from under-served small and medium-sized communities to world-class destinations. Allegiant provides nonstop, scheduled service from 120 U.S. cities. In addition to its scheduled service, the airline also operated charter service throughout the U.S., Mexico and Canada Within the first year, the expansion would create seven new jobs at an average hourly wage of $20.52 per hour and include capital investments of approximately $6.2 million in capital equipment and $595,564 investment in aviation parts over the forthcoming 20 years. Mr. Walsh was joined by Mr. Scott Sheldon, Chief Financial Officer and Mr. Jonathan Jackson, Specialist, Government Affairs, Allegiant Travel Company.

Mr. Sheldon advised G4 Works, LLC was considering establishing an aircraft maintenance and distribution center in southern Nevada. The project would create a stock warehouse in Las Vegas. This warehouse would contain aircraft parts and tools capable of servicing Allegiant Travel Company's planes at the Las Vegas McCarran International Airport, as well as at other airports across the Allegiant network and strengthen the operational efficiency of Allegiant's aircraft maintenance in the region.

AMERICAN OVERSIGHT

Governor Sandoval inquired about the specific skill sets sought for the jobs in the company's application. Mr. Sheldon advised the company would be seeking to fill a variety of positions including parts clerks, technical purchasing skill sets and other technical expertise in the areas of parts procurement.

Governor Sandoval asked if the company planned to do the maintenance on its new western fleet in Las Vegas. Mr. Sheldon advised the parts and tooling support would be housed out of Las Vegas. Currently, Allegiant was at the tail end of a complete fleet transition from an MD-80 operator to an all airbus operator. This would involve significant network configuration changes. The company planned to use Las Vegas as a launching ground and support base for its western destinations. Historically, the company has used Arizona as a teardown facility for its MD-80 fleet in addition to its parts support. The fleet transition provided an opportunity and enhance its Southern Nevada activities and operations.

Mr. Kramer commended Governor Sandoval and Director Anderson, for their involvement in passing the aviation abatement legislation. G4 Works, LLC's application was in complete alignment with the intent of attracting, retaining, and growing aviation operations in Nevada.

Governor Sandoval concurred on the importance of the bill and noted it had greatly increased Nevada's competitiveness in this area.

A MOTION WAS MADE BY DR. BENNETT TO APPROVE THE ABATEMENT APPLICATION OF G4 WORKS, LLC, FOR AN AVIATION SALES TAX ABATEMENT AND AN AVIATION PERSONAL PROPERTY TAX ABATEMENT AS PRESENTED IN AGENDA ITEM 5E. THIS MOTION WAS SECONDED BY DR. WELDON HAVINS. THE MOTION PASSED UNANIMOUSLY.

6. ABATEMENT APPLICATIONS FOR DIRECTOR APPROVAL

A. FIGURE TECHNOLOGIES, INC.

- **SALES TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Stan Thomas, Executive Vice President, Economic Development Authority of Western Nevada (EDAWN) presented Figure Technologies, Inc. and provided an overview of the company and abatements sought. Figure Technologies, Inc. is a financial technology company with the mission of leveraging blockchain, AI, and advanced analytics to unlock new access points for consumer credit products that can transform the financial lives of its customers. The company provides home equity release solutions, including home equity lines of credit, home improvement loans and home buy-lease back offerings for retirement. Concurrently, Figure Technologies, Inc. is building a blockchain protocol for the origination, custody, trading and securitization of whole loans and other assets. The company had significantly de-risked capital for equity release takeout, with participation from multiple leading buy and sell side firms who will transact using the blockchain. The company also provided its members with financial literacy products via content and support

AMERICAN OVERSIGHT

on its site. The products were built on the three pillars of financial literacy, financial empowerment and action. Figure Technologies, Inc. currently had offices in San Francisco, CA and Bozeman, MT. The company planned to hire 65 employees at $30.01 per hour and make and approximate capital investment of $264,615. Mr. Thomas was joined by Ms. June Ou, Chief Operating Officer, Figure Technologies, Inc.

Ms. Ou advised Figure Technologies, Inc. was considering locating a facility in downtown Reno. The proposed facility would house the company's customer service, loan servicing, financial advisory and engineering operations. Ms. Ou noted the company had been pleased with Reno thus far and generally impressed with the local and state government in terms of their commitment to the residents of Nevada.

Governor Sandoval inquired about the company's workforce and recruitment requirements. Ms. Ou advised the company sought to fill a variety of positions. There would be customer service positions which may be of interest to graduates of UNR. These jobs could also provide pathways to certified financial planning certifications or registered investment advisors. The company would also be hiring positions in asset management, marketing and engineering.

Governor Sandoval noted the company has already made an initial connection with UNR and suggested the company also connect with UNLV. Ms. advised the company planned to be involved in the local community and engaged with the universities. Engineers at the company's Montana facility often volunteered to teach University classes.

Governor Sandoval asked about the company's next steps should it be awarded the abatements sought. Ms. Ou advised the company had already put recruitment plans in place for the Reno facility.

Mr. Kramer suggested the company might, at some point, be interested in connecting with an existing Reno based company called Filament, an innovative startup that develops blockchain solutions to leverage industrial internet of things data.

Director Anderson advised the company would be returning with a Catalyst Application for the September 20, 2018 Board Meeting. There would also be discussions around WINN funding to assist in building a pipeline of qualified employees.

Governor Sandoval noted it was tremendous to have a company of this caliber see Reno and Nevada as a place to locate, grow and thrive.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6A.

AMERICAN OVERSIGHT

B. POLARIS INDUSTRIES, INC. – Catalyst Fund

Mr. Haskin, NNDA, presented Polaris Industries, Inc.'s Catalyst Fund application. Polaris Industries, Inc. designs, engineers, manufactures and markets power sports vehicles worldwide. The company offers ORVs, including all-terrain vehicles and side-by-side vehicles for recreational and utility use; snowmobiles; motorcycles; and low emission, light duty hauling, passenger, commercial and industrial vehicles, as well as snow bike conversion kit systems. Polaris Industries, Inc. also produces or supplies various replacement parts and accessories and manufactures, distributes, retails, and installs aftermarket parts and accessories for light trucks, jeeps, sport-utility vehicles, and other four-wheel drive vehicles. The project would create 64 new jobs at an average hourly wage of $21.95 an hour with an approximate investment of $13.6m in capital equipment. The company's catalyst application was in addition to its application for standard abatements at the March 15, 2018 GOED Board Meeting where the company was approved for a Modified Business Tax abatement, Sales and Use Tax abatement, and a Personal Property tax abatement. Mr. Haskin was joined by Mr. Paul Eickhoff, Senior Director of Distribution, Polaris Industries, Inc.

Mr. Eickhoff advised Polaris Industries, Inc. would be establishing a new western United States distribution center in Fernley, Nevada. The company currently had existing distribution centers in Ohio and South Dakota and was looking for western United States presence to maximize efficiency and delivery speed to the company's customers. Mr. Eickhoff noted the company appreciated being considered for the Catalyst Fund grant and looked forward to a continued partnership with the state of Nevada, Lyon County, and city of Fernley.

Director Anderson noted Polaris Industries, Inc. was creating quality jobs with good wages and he looked forward to seeing the continued growth of the company in Nevada. Director Anderson also thanked Lyon County for its assistance in the Catalyst Fund grant process.

DIRECTOR ANDERSON APPROVED THE CATALYST FUND GRANT IN AN AMOUNT NOT TO EXCEED $100,000, AS DESCRIBED IN AGENDA ITEM 6B.

7. WORKFORCE INNOVATION FOR THE NEW NEVADA (WINN) FUND PROGRAM FOR BOARD APPROVAL

A. RATIFICATION OF SUPPLEMENTAL NUTRITION ASSISTANCE PROGRAM (SNAP) RECIPIENT PILOT PROGRAM – Requesting funding for pilot program, not to exceed $210,000 – approved by Director at March 15 Board meeting, now to be approved by Board.

Director Anderson advised this item had initially been approved at the March 15, 2018 Board Meeting. However, the dollar amount exceeded Director approval. Therefore, today's agenda item would comprise an update and a ratification of the item. Director Anderson introduced Ms. Stacey Bostwick, Workforce Development Program Coordinator, GOED

AMERICAN OVERSIGHT

Ms. Bostwick advised this application pertained to phase two of the project. The GOED Board had also approved an appropriation for phase one which was launched in January 2018. Western Nevada College was the primary education provider in phase one with an initial plan to serve 20 individuals on SNAP. Phase two is a program expansion to offer an additional 100 placements. Both Truckee Meadows Community College and Western Nevada College were gaining impetus with these programs. Therefore, there would be robust program data available next quarter. Ms. Bostwick advised that utilizing state funding, such as WINN, or local funding for investments in workforce training, produced potential to unlock federal funding for educational institutions and generate opportunities for program development and expansion to meet the demands of local employers.

Governor Sandoval asked if the program would also be made available in Southern Nevada. Ms. Bostwick advised all existing WINN funded projects in manufacturing, technology and health would be used as a platform to expand on a wider level.

Governor Sandoval commended the program and noted it provided individuals an opportunity to enter or re-enter the workforce and access quality employment, wages and benefits.

A MOTION WAS MADE BY MR. BARRETT TO APPROVE THE RATIFICATION OF THE SNAP PILOT PROGRAM AS PRESENTED IN AGENDA ITEM NUMBER 7. THIS MOTION WAS SECONDED BY DR. HAVINS. THE MOTION PASSED UNANIMOUSLY.

8. WORKFORCE INNOVATION FOR NEW NEVADA (WINN) FUND PROGRAM FOR DIRECTOR APPROVAL.

A. GROWING THE NURSING WORKFORCE TO IMPROVE POPULATION HEALTH OUTCOMES AND CREATE JOBS IN THE STATE OF NEVADA
Request for approval to enter into a WINN Grant agreement not to exceed $90,000.

Ms. Bostwick advised Agenda item 8. would be moved to the September 20, 2018 GOED Board Meeting. The project scope had recently changed due to additional employer partners wishing to participate.

9. PERFORMANCE MEASURES REPORT

Bob Potts, Research Director, GOED presented the GOED Performance Measures report covering economic development activity in Q2 of 2018.

There were 35 assisted companies reported in the first half of 2018. Of these, 21 are new to Nevada and 14 are existing companies expanding operations. These companies are expected to add 2,294 jobs to Nevada's economy in the next two years and to more than double that count once they are fully staffed.

AMERICAN OVERSIGHT

Of the 35 companies, 34 percent were manufacturers followed by logistics and operations (33 percent), and information technology (11 percent). The remaining 20 percent were essentially evenly split between the aerospace, tourism, healthcare and finance sectors.

The average hourly wage paid by companies assisted this year stands at $28.59. This reflects a $7.71 improvement over what it was for the same period last year when they stood at $20.88.

Capital investment by the 35 companies assisted this year currently stands at $329.8 million. This reflects a $153.2 million, or 86.7 percent improvement over what it was the same period last year.

Regarding recruitment activity, there were 23 wins in the first quarter of 2018. This represents a 53.3 percent increase from both the previous quarter and the first quarter of 2017. Activity in the earlier stages of the recruitment pipeline also showed marked improvement. When compared to last quarter, New Leads and Prospects were up by 52.8 and 8.4 percent, respectively; when compared to last year, they were up by 91.9 and 38.5 percent, respectively.

In the first quarter, there were an additional 10 leads and two prospects added to the Global Recruiting Pipeline. After removing those which have become inactive, the current inventory of all active global leads and prospects now stands at 46 and 12, respectively.

Performance activity for the Nevada Procurement Technical Assistance Center (PTAC) through the first nine months of this fiscal year had been exceptionally strong. Year to-date, the number of contracts was already 43.5 percent above last year's total and the contract amount even greater at 125.6 percent. The number of clients had slipped slightly in the most recent quarter, but the year-to-date average was still well above historic annual counts. The Nevada PTAC credits much of its recent success to resource partners like the U.S. Small Business Administration, the Nevada Department of Business and Industry, the Nevada Small Business Development Center and local chambers of commerce in promoting their free counseling services, training seminars and networking events.

In 2017, the number of Certified Emerging Small Businesses (ESB's) expanded by 34.2 percent and now stands at 1,139. For the year, the number of ESB's solicited to submit a quote, bid, or proposal on a contract improved by 335.0 percent when compared to 2016. This significant growth was largely the result of a broad outreach campaign by the Clark County School District. From 2016 to 2017, the number, amount, and average contract amount grew by 4.3, 7.9, and 3.4 percent, respectively.

Over the past two quarters, customers responded with perfect scores to the Nevada Film Office (NFO) Client Satisfaction Survey. Only once before in 2014 was customer satisfaction with the NFO this high. The Index is an aggregate measure on how customers

AMERICAN OVERSIGHT

rated their experience on availability, responsiveness, knowledge, willingness to help, and overall level of service. Since inception in 2014, client responses to the Nevada Film Office's Satisfaction Survey have consistently been very good.

The Community Development Block Grant Program (CDGB) underwent some big changes in 2017 when Carson City reverted to the state's CDBG program. As an Entitlement program, Carson City's focus is urban with different priorities than that of the GOED-CDBG rural programs. In 2018, there were 14 grants totaling $3,524,603. Rural Nevada received 9 grants with a total allocation of $3,061,919 and Urban Nevada received five grants with a total allocation of $462,684.

The number of workers in Nevada's economy continues to set record levels and currently stands at 1,374,200. This reflects a gain of 261,600 jobs since the recessionary low and 76,900 above the pre-recession high. Nevada currently has the fastest private sector job growth in the country. The unemployment rate currently stands at 4.8 percent; a 0.3 percentage point improvement from this time last year and 8.9 points below the recessionary high of 13.7 percent. The prerecession unemployment low was 3.9 percent.

With the addition of 210 jobs, there are currently 14,300 workers employed in Nevada's Aerospace and Defense sector. Average annual earnings also improved by $380 and now stand at $85,500. When compared to last year, there had been a 5.9 percent increase in jobs and a 1.8 percent increase in earnings.

The number of jobs in Nevada's Business Information Technology sector expanded in the second quarter with the addition of 220 positions. Average earnings were essentially unchanged with only a slight improvement of $80 per year. For the year, job counts had improved by 3.8 percent and earnings by 1.7 percent.

When compared to last quarter, an additional 1,200 jobs were added to Nevada's Health and Medical sector for a total of 111,800 workers employed. Growth in earnings, however, was flat and currently stands at $56,400. When compared to last year, job counts in Nevada's healthcare sector had expanded by 5.0 percent and earnings by 0.6 percent.

There are currently 54,200 workers in Nevada's Natural Resource Technologies sector with the addition of 1,760 jobs in the second quarter. Average annual earnings had been unchanged and currently stand at $66,400. When compared to last year, job counts had improved by 8.7 percent and earnings by 1.2 percent.

Although there was a slight annual earnings improvement of $110 in Nevada's Manufacturing and Logistics sector, job counts improved by more than 2,700 workers in the second quarter. Overall, the sector now employs 125,100 workers with average annual earnings of $59,400. For the year, jobs had grown by 6.29 percent and earnings by 3.2 percent.

Growth has been strong in Nevada's Manufacturing sector with the addition of 1,340 workers in the second quarter. Currently there are 46,200 workers employed in the sector

AMERICAN OVERSIGHT

making, on average, $55,900 per year. Since last year, job counts had grown by 7.2 percent and average annual earnings by 1.8 percent.

10. DIRECTOR'S REPORT – REVIEW AND DISCUSSION

Director Anderson advised the Governor led Basque Region Trade Mission had proved very productive. The delegation had the opportunity to meet with a large group of commercial entities in conjunction with higher education institutions.

A month prior to the launch of Nevada Global, GOED implemented a soft launch/pilot which generated a significant amount of interest. As part of the soft launch Nevada Global conducted its first recruiting trip to Poland led by GOED's Director of Special Projects, Pawel Pietrasienski. Mr. Pietrasienski conducted a one-week boot camp for thirty companies in Lublin, Poland in partnership with the Lubelskie Government and the Polish American Chamber of Commerce of Nevada. Five of the companies that participated in the boot camp would visit Nevada for one week in July for an orientation of Nevada Global.

In the forthcoming months, an inbound delegation will be visiting from Spain. This delegation would also participate in a Nevada Global boot camp as preparation to enter the U.S. market

In June 2018, GOED signed an MOU with the World Trade Center (WTC), which was owned and operated by the Las Vegas Convention and Visitors Authority. This would further enhance collaboration to build the Las Vegas brand as a global business destination and grow international visitation to both the destination and to tradeshows like CES. Additionally, the MOUs provided the opportunity to expand business opportunities across several industry sectors.

During the months of May and June 2018, GOED International Trade Division provided financial assistance awards through the State Trade Expansion Program Grant to 9 companies for a total amount of $43,000. The financial assistance awards are used to assist companies by offsetting the cost of engaging in export sales activities. GOED had applied for additional funding in order to expand the program in the next biennium.

Nevada Institute for Autonomous Systems (NIAS) has intensified human resource efforts to stand up the Nevada Drone Center of Excellence (NDCOE) for Public Safety and recently completed a Nevada Drone Industry State-wide survey that reflected strong support toward the State of Nevada and NIAS to open the NDCOE. NIAS is in the process of conducting sponsorship reach outs and standing up a fund-raising capability from ground zero. Safe and successful UAS operations rely on quality training, end user education and maximizing public safety processes.

GOED and Bank of Nevada approved two more Nevada Opportunity Fund Loans totaling $150,000. Senate Bill 126 created the Nevada Opportunity Fund. The Nevada Opportunity

AMERICAN OVERSIGHT

Fund was created during the last legislative session to help provide small business owners access to funding. One million dollars of state funds were set aside and available through the Governor's Office of Economic Development to assist businesses unable to meet conventional small business loan qualifications. The Opportunity Loan program had now approved 4 of 5 applicants for a total of $225K. GOED and Bank of Nevada were developing the program and marketing to expand into rural areas.

The Community Development Block Grant (CDBG) approved eight projects for full funding, one project approved for partial funding with conditions. An additional six entitlement projects for ~$500K for Carson City were also approved. This was a great investment in the rural communities, and certainly more community development focused versus pure economic development. This was an important piece of the puzzle when looking at rural communities and the opportunities for CDBG grants and the Main Street Program.

The IRS certified Nevada's 61 Opportunity Zone census tracts. GOED was currently looking to build a task force to ensure investment opportunities are highlighted to as many people as possible and to encourage local investment.

The Nevada Film Office's new online locations directory was completed and online. The Directory was designed to better connect potential film locations around Nevada with production companies, giving local businesses more control and more opportunity.

Together with the Nevada Department of Transportation (NDOT), Nevada Procurement Technical Assistance Center (PTAC) went on an outreach trip at the beginning of May to Winnemucca, Lovelock, Elko, Battle Mountain, Ely and Eureka. The purpose was to promote PTAC's free procurement technical assistance regarding public sector contracting and subcontracting, provide training on how to do business with the government, and deliver training on how to do business with NDOT. A total of 11 business representatives attended the workshops.

The Workforce Innovations for New Nevada (WINN) program is expanding and growing. A focus issue was establishing a pipeline of nursing and health professionals. The first stage of the solution strategy would be rolled out from July to December 2018 and would target faculty development for the Certified Nursing Assistant (CAN) programs offered at the high school level. Director Anderson highlighted Ms. Bostwick as a tremendous resource for the WINN program.

Director Anderson commended Mr. Potts, GOED's Research Director, for his contribution to the state and the nation regarding workforce development. Director Anderson noted Mr. Potts' comprehensive understanding of workforce development, how it affects the ability to grow in a sustainable way, and how to build the infrastructure and pipelines for employers immediate and future needs.

AMERICAN OVERSIGHT

In June 2018 GOED welcomed Mr. Joel Lenz as its new Mining Industry Specialist. Mr. Lenz had over 35 years of Nevada mining and leadership experience culminating as the General Manager of the Newmont Phoenix mine. Mr. Lenz was based in GOED's Elko office.

11. STATE OF NEVADA UNEMPLOYMENT RATE UPDATE ABATEMENT APPLICATIONS FOR BOARD APPROVAL as established by the Research and Analysis Division of the Nevada Department of Employment, Training and Rehabilitation.

Agenda item 11. was for information only. GOED is committed to providing this information for each Board meeting. There were no questions or comments regarding this item.

12. PUBLIC COMMENT

Governor Sandoval asked if anyone from the public sought to make public comment. No public comment was provided.

13. ADJOURNMENT

A MOTION WAS MADE BY SECRETARY CEGAVSKE TO ADJOURN THE MEETING. THIS MOTION WAS SECONDED BY DR. BENNETT. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

STATE OF NEVADA
GOVERNOR'S OFFICE OF ECONOMIC DEVELOPMENT
BOARD MEETING
August 14, 2018

The meeting of the Board of Economic Development was called to order by Governor Brian Sandoval at the Grant Sawyer Building, Governor's Conference Room, 555 E. Washington Avenue, Room 5100, Las Vegas, Nevada, 89101; and via video conference at the Capitol Building, 101 N. Carson Street, Carson City, Nevada 89701.

1. CALL TO ORDER, ROLL CALL AND ESTABLISH QUORUM

VOTING BOARD MEMBERS PRESENT
Governor Brian Sandoval, State of Nevada
Lieutenant Governor Mark Hutchison, State of Nevada
Dr. Weldon Havins, Touro University, Nevada
Mr. James Barrett, Jr., President and Founder, The JABarrett Company
Dr. Dana Bennett, President, Nevada Mining Association
Mr. Dan Klaich, voting member at large
Mr. Raymond Specht, Founder & CEO Specht Leadership Consulting

BOARD MEMBERS ABSENT AND EXCUSED
Secretary of State Barbara Cegavske, State of Nevada
Mr. Adam Kramer, Executive Vice President of Strategy, Switch, Inc.

NON-VOTING BOARD MEMBERS PRESENT
Mr. Don Soderberg, Director, Department of Employment Rehabilitation and Training

NON-VOTING BOARD MEMBERS ABSENT AND EXCUSED
Dr. Thom Reilly, Chancellor and Chief Executive Officer, Nevada System of Higher Education

STAFF MEMBERS PRESENT
Paul Anderson, Executive Director, GOED, Secretary of Board
Derek Armstrong, Deputy Director, GOED
Matt Moore, Deputy Director, GOED
Bob Potts, Director of Research, GOED
Jessica Sanders, Program Specialist – CDBG, GOED
Melanie Sheldon, Program Manager, GOED
Mariah Heriman, Executive Assistant / Program Management Specialist, GOED

GUESTS PRESENT
Assemblywoman Irene Bustamante-Adams
Sonia Mendez, Office of Assemblywoman Irene Bustamante-Adams

AMERICAN OVERSIGHT

Nicole Linan, Lieutenant Governor's Office
Scott Anderson, Secretary of State's Office
Lori Chatwood, State Treasurer's Office
Henna Rasul, Attorney General's Office
Michelle Briggs, Attorney General's Office
Russell Guindon, Legislative Council Bureau
Pat Whitten, Storey County
Hugh Gallagher, Storey County
Bob Sader, TRIC General Improvement District Management
Brian Gordon, Applied Analysis
Paul Taggert, Taggert & Taggert, Ltd.
Alise Porto, Switch, Inc.
Patricia Mulroy, Switch, Inc.
Gary Milliken, Switch, Inc
Chris Reilly, Tesla, Inc.
Brian Scelfo, Tesla, Inc.
Martin Johnson, JNA Consulting Group, LLC
Randall W. Aleman, Emerald Lake T.C.
Kendra Follett, Sherman & Howard, LLC
Matthew Digesti, Blockchains
Leo Drozdoff, Drozdoff Group, LLC
Alex Samuelson, The Griffin Company, LLC

2. PUBLIC COMMENT

Governor Sandoval asked if anyone from the public sought to make public comment. No public comment was provided.

3. GOVERNOR SANDOVAL'S COMMENTS

Governor Sandoval noted he had recently led a trade mission to Ghana and South Africa. The trip had been focused on collaboration and trade in the areas of water technology, education and mining. More details would be provided at the next full Governor's Office of Economic Development (GOED) Board meeting.

4. REVIEW AND APPROVAL OF ECONOMIC DEVELOPMENT FINANCING PROPOSAL (EDFP) TAHOE RENO INDUSTRIAL CENTER (TRIC) EFFLUENT WATER PIPELINE

Director Paul Anderson, Executive Director, GOED provided an overview of the TRIC Effluent Pipeline Project and the request for bonding authority of $35 million to facilitate construction of the pipeline.

AMERICAN OVERSIGHT

The authority from GOED came out of SB 1, often referred to as the Faraday Special Session, that referenced a development at Apex Industrial Park, North Las Vegas. One of the qualifiers to access bonding authority was the presence of a qualified project making a capital investment of over $1 billion. TRIC's qualifying project was the Tesla Gigafactory. Given the strategic positioning of TRIC relative to the Truckee Meadows Water Reclamation Facility (TMWRF) and the needs of TRIC's tenants, the objective of this financing proposal was to develop an approximate 13-mile effluent water pipeline from TMWRF to TRIC, as well as several storage, advanced treatment and transmission components at TRIC. The entire project will be known as the "Effluent Project'; the pipeline from TMWRF to TRIC as the 'off-site Effluent Project' and the on-site improvements as the 'onsite Effluent Project'. Only the off-site Effluent Project will be considered for financing as part of an Economic Development Financing Proposal (EDFP). Increased availability of Process Water at TRIC from the Effluent Project is expected to resolve short and long-term load and capacity issues for TMWRF, improve water quality in the Truckee River and facilitate continued major future economic development benefitting all of northern Nevada.

Director Anderson introduced Mr. Pat Whitten, Storey County Manager. Mr. Whitten advised Storey County appeared before the Board a year prior, asking the Board to consider the EDFP as a means to further stimulate economic growth and build out in TRIC. Subsequently, selected project and financing elements had been modified and Storey County was back with a revised approach to finance the off-site Effluent Project.

Instead of one developer involved, there would now be six, including corporate giants such as Google, Tesla and Switch. The new developers brought a desire and a willingness to provide up-front funding through a Special Assessment District (SAD) process. Having low cost water available to these companies, coupled with the recent inclusion of TRIC in the Federal Government Opportunity Zone Program provided the catalyst these companies needed to fully develop their TRIC properties. On August 7, 2018, The Storey County Board of Commissioners voted unanimously to forward the proposal for consideration.

Mr. Whitten was joined by Mr. Martin Johnson, President, JNA Consulting Group, LLC. Mr. Johnson advised JNA Consulting Group, LLC were the financial advisors to Storey County and had been asked to assist the county with this project. Mr. Johnson noted, selected landowners would agree to self-assess the cost of the off-site Effluent Project by way of a special assessment district (SAD) to support approximately $35 million in bonds for the development of the off-site Effluent Project. The SAD bonds would be sourced to infrastructure bonding capacity allocated to GOED for economic development purposes. The $35 million off-site Effluent Project bond financing was also expected to comply with Storey County's SAD guidelines. In addition to the financing of the off-site Effluent Project, Storey County would create a tax increment area pursuant to Senate Bill 442 (SB442) of the 2017 Session of the Nevada Legislature that would allow for a cumulative reimbursement up to an amount equivalent to the debt service, including principal and interest, of the off-site Effluent Project SAD financing.

AMERICAN OVERSIGHT

Mr. Brian Gordon, Principal, Applied Analysis was introduced and advised, in addition to the off-site Effluent Project, the SAD participants intended to privately finance (either directly or through a third-party) the on-site Effluent Project. The on-site Effluent Project is expected to be segmented into two individual phases. The first phase focuses on common infrastructure shared among the SAD participants, and it will include water transmission and storage infrastructure, including wells and a reservoir. This first phase of the on-site Effluent Project is estimated to cost approximately $30 million. In addition to this phase of the project, selected water users require more advanced water treatment to generate water suitable for use in their operations. This second phase of the onsite Effluent Project is estimated to cost between $35 million and $85 million, depending on the number of participants, the technology employed and the costs associated with a potential third-party operator of these facilities. The combined cost of the total Effluent Project is expected to range from $100 million to $150 million.

As far as environmental benefits, the Truckee Meadows water shed had been fragile and one of the most litigated water sources in the western United States. This included the Truckee River. This project would divert 4,000 acre-feet, of high nitrate water, that would typically go into the Truckee River. This water would be diverted to TRIC where it would then be utilized by the landowners. If the project didn't move forward, TMWRF at some point, would be required to invest in water treatment infrastructure and this would entail an estimated capital cost of $30-40 million, in conjunction with annual recurring maintenance costs of approximately $1.5 million.

Ms. Patricia Mulroy, Consultant, Switch, Inc. was introduced and advised the pipeline would remove nitrates causing TMWRF to be out of compliance with EPA Clean Water Standards. Additionally, it would allow TMWFF to discharge without causing nitrate issues that are problematic for the endangered cui-ui fish species in river. The Pyramid Lake Paiute Tribe were also reliant on the river as a water source.

Two agreements were negotiated. The first was the effluent agreement, with the cities of Sparks and Reno, who control the TMWRF facility. In terms of ownership, the water will stay within the Reno Sparks area. TRIC will simply lease the water supply for the term of 50-60 years. TRIC would reimburse the City of Sparks and the TMWRF facilities for all extraneous expenses, and any capital improvements required in order to facilitate this endeavor and make the Reno Sparks area whole. The second agreement was recently approved by Truckee Meadows Water Authority (TMWA) which is the return flow management agreement. The agreement requires the TRIC landowners to turn over their Truckee River Rights of 1,500 acre-feet, to manage the river for instream flows for use by TMWA during the course of this agreement. The landowners will also pay for an adjudication process on ground water rights that are available through State right-of-ways with the Department of Transportation. The cost of that adjudication will be borne by the landowners and the water as well will be turned over to TMWA for management purposes to make the river whole.

AMERICAN OVERSIGHT

Governor Sandoval inquired if TMWA rate payers would incur savings as they would not be required to pay for the water treatment in years to come. Ms. Mulroy advised the rate payers would benefit. The mitigated cost of $40 million would prevent the wastewater rates from increasing. The larger benefit for TMWA and the Reno Sparks area, is the provision of maximum flexibility to TMWA in terms of managing the flows in the river regardless what the hydrology looked like in the system.

Governor Sandoval asked if the Pyramid Lake Paiute Tribe would receive a higher quality of water. Ms. Mulroy advised the tribe would receive a greatly improved quality of water and noted all parties were committed to making sure the Tribe would not be negatively affected by this agreement.

Governor Sandoval asked is there was any type of return discharge from TRIC back to the river. Ms. Mulroy advised the Nevada Department of Environmental Protection (NDEP) had been clear there could be no discharge back into the river. The intent was to have a second pass-thru for reuse. Water not put to full consumptive use would once again enter the recycle process and be utilized. The water would stay contained in the TRIC area, thus saving water.

Lieutenant Governor Mark Hutchinson asked for clarification on the term of the lease. Ms. Mulroy stated the original term was 40 years with the option to extend.

Lieutenant Governor Hutchinson asked how the lease terms coincided with the infrastructure life expectation. Ms. Mulroy stated the bonds should be paid off before the lease expired and it would be a 20-25-year window for the bonding. The life of the infrastructure extends past the anticipated date timeframes for the bonds to be paid off. This could potentially be 80-90 years.

Lieutenant Governor Hutchinson asked Ms. Mulroy if she foresaw any additional challenges or objections from third parties. Ms. Mulroy advised there had been several public forums held and, to date, no issues had been raised.

Mr. James Barrett asked about the project's permitting process. Ms. Mulroy noted the permit process was still to occur. However, there was full commitment to being compliant with all the conditions around those permits.

Governor Sandoval asked if there were any environmental concerns associated with the construction portion of the project. Mr. Bob Sader, TRIC Improvement District, was introduced and advised he had been very involved in the right-of-way process for the path of the pipeline. There had been three or four different alignments and the alignment with the least environmental impacts had been selected. Additionally, there were no wetlands, the pipeline would not cross the Truckee River, nor would it enter Federal Lands. There were two state parcels, owned by the State of Nevada and there had been discussions with the Public Lands around the application for that. There had also been a high-degree of engineering on the right-of-way.

AMERICAN OVERSIGHT

Mr. Dan Klaich asked if the agreements with Reno and Sparks had been finalized. Ms. Mulroy confirmed this was the case. The agreements were approved by both the Sparks City Council and the Reno City Council, in terms of the lease agreement and the return flow management agreement.

Mr. Paul Taggert, Senior Partner, Taggart & Taggart, Ltd., was introduced and advised the return flow management agreement had been approved by Reno, Sparks and TMWA.

Mr. Klaich asked Mr. Taggert if he believed the agreements provided substantial economic benefits to the cities of Reno and Sparks. Mr. Taggert confirmed this was the case. There would be a cost mitigation in upgrading the TMWRF facility for treating effluent as capacity would be created in the facilities by taking this water out of the river. This changed the timeline for required facility improvements.

Mr. Klaich inquired if the easement or right-of-way been acquired. Mr. Taggart advised the easement had not yet been acquired and the right-of-way would be deferred until all agreements were completed and approved.

Mr. Klaich inquired if the off-site Effluent Project' project could be completed within the $35 million range. Mr. Taggart advised the $35 million was the best estimate at this point. Costs would be refined as the engineering was completed. If there was a surplus, the assessment payors would incur this.

Mr. Gordon provided an overview of the benefits related to TRIC. There were 12,700 developable acres in TRIC itself. The proposed projects would free up future development activity, as well as the intensity of development activity. These types of developments generally led to higher yields and higher levels of investment. These landowners were also creators of higher than average wage employment. In terms of financing, the underlying real estate value would be required to have a 3.5 times value, relative to the amount being considered for bonding. It would be 3.5 times $35 million under the SAD. Currently, the current appraisal is suggesting a 7 times value, when the project is completed. This provides significant security as it relates to the financing side of the equation. Additionally, the group is also requesting a Tax Increment Area (TIA) be developed. A portion of the incremental tax dollars would inure back to the landowners, as reimbursement up to the amount of the offsite improvements, or the $35 million. This is the maximum amount to be reimbursed under a potential TIA. This aligns with NRS 278C.150-Developer Reimbursements for Construction of Wastewater Infrastructure Projects. If there was no future development activity and no additional investments made, there would be no additional tax dollars going back to the private sector development.

The existence of the pipeline itself would add additional value in Storey County and open-up properties for future development and higher intense. All of this would increase economic opportunity within Storey County. The TIA would be a reimbursement of a portion of the pipeline and overall infrastructure costs. It would exclude any taxes that were

AMERICAN OVERSIGHT

scheduled to go to special districts such as the school districts as these were excluded from any increment or reimbursement back as part of this project. Fifty percent of the sales and use taxes were eligible for reimbursement. Fifty percent would stay with the original taxing entities as they were currently scheduled and only half of the modified business tax or payroll tax would be eligible for reimbursement back towards the infrastructure costs.

Once the $35 million reimbursement was made, as it relates to the off-site Effluent Project, one hundred percent of all incremental taxes would go back to the original taxing entities and no more would go to the private sector for reimbursement under the project. The pipeline would also provide a stable source of water and provide increased stability in terms of the overall economic activity for Storey County as a whole.

Governor Sandoval asked if property owners and homeowners of Storey County had any risk associated with this project and the bonding. Mr. Gordon advised all property owners would continue to pay the normal taxes and operate as usual. The exposure related to the SAD which required one hundred percent consent of all property owners within that district. An assessment was a lien on the property and co-equal to property taxes. If an assessment is not paid, foreclosure can occur on the property. Assessment districts and bonds can incur foreclosures for delinquencies. The assessments would be billed and collected semi-annually. The assessments, under statute, could go for a term of up to 30 years. Under the current proposal, the county would issue assessment district bonds and those bonds would then be purchased by the State through the Bond Bank Program. This allowed the interest rate on the state bonds to be passed through to the County bonds, which provided the lowest possible cost to capital for a Nevada local government. The bonds would be paid first from the assessment payments. Every six months there would be a bill for those assessments. Approximately two months later the bond payments would be made. To the extent the assessment payments are insufficient, there were other resources within the SAD. In addition to the other resources and cash available, there would be a reserve fund that is funded out of bond proceeds, the day of closing of the bond transaction, equal to one year's debt service. Theoretically, if all the property owners were delinquent, there would be enough money in the bank to make the payment for at least one year. If those three resources were insufficient, the county would be responsible for the amount of its uncommitted General Fund balance or the amount of the annual payment.

Governor Sandoval noted Storey County's approval was a significant factor and asked Mr. Whitten if there had been any opposition from the residents of the county. Mr. Whitten advised the vast majority were in favor of the pipeline although it had also been labelled 'corporate welfare.'

Lieutenant Governor Hutchison inquired about the geographic area of the SAD. Mr. Gordon advised there were two parcels located in TRIC within the SAD, but not within the TIA. One was owned by Switch and the other by Tesla.

AMERICAN OVERSIGHT

Lieutenant Governor Hutchison inquired if the TIA would entail developers fronting the money and receiving reimbursement, through various taxes that are going to be used to pay the $35 million. Mr. Gordon confirmed this was the case.

The Lieutenant Governor noted if the vacant land was never developed, the developers would assume all the risk. Mr. Gordon confirmed this was the case.

Mr. Klaich asked if the approval of the project would limit the state's ability to fund other projects. Lori Chatwood, Deputy Treasurer of Debt Management, Nevada State Treasurer's Office advised the maximum annual debt service was slightly more than $2 million a year. Therefore, this should not limit funding other projects.

Mr. Klaich asked Ms. Chatwood if she anticipated anything limiting the bonding capacity reported to the Governor as being available for additional CIP Projects. Ms. Chatwood advised that to the extent all of the revenues were sufficient, there would be no impact. Being that the project comprised a natural resource, it did not fall under the 2% constitutional debt limit. Therefore, the amount of capacity of bonding under the constitution was not affected.

Governor Sandoval asked Ms. Chatwood if she had reached any conclusions or opinions regarding the transaction. Ms. Chatwood noted, at first blush, the proposal looked solid. Ms. Chatwood advised, for the record, if the proposal were to be approved, the bond would be issued through the authority of SB 1 which had a blanket limit of $200 million. Therefore, the $35 million would go under that capacity, reducing that $200 million authority in the future.

Mr. Barrett inquired about matching between the SAD and the TIA. Mr. Johnson advised the SAD would be created by the County Commission at the September 18th meeting and bonds could be issued once a bond ordinance was adopted. This would take two readings from the Storey County Commission. Subsequently, the State Board of Finance would need to approve the issuance of the State bonds, which would be in November 2018. the County could not start forming the TIA prior to receiving Interim Finance Committee (IFC) approval. Assuming this was to happen in time for the September 18th meeting, the process to form a TIA could commence.

Dr. Havins inquired about the anticipated impacts, should the project not be approved. Mr. Johnson advised there would not be any additional revenue raised as, without the water, there could not be further development at TRIC.

Mr. Specht inquired about the pipeline's capacity. Ms. Mulroy advised it would be 4,000 acre-feet annually. Mr. Specht asked if that meant this the pipeline is 100% maximized at that point. Ms. Mulroy stated there was an oversizing component on the pipeline. If Reno, Sparks or Washoe County wished to lease additional effluent TRIC in the future, the pipeline would afford that opportunity. Mr. Sader advised it was initially estimated the pipe would need to be 18-inches. It was increased to 24 inches when it was determined the flows

AMERICAN OVERSIGHT

from TMWRF and the Reno Sparks Sewer Plant would be variable during the year. Currently, the decision was to go up to 30-inches in diameter, in order to be able to accommodate additional flows in the future

Mr. Klaich asked how the $35 million construction budget was calculated Mr. Sader advised the district engineers were from Farr West Engineering (Farr West). The firm had substantial experience building infrastructure and providing similar services to water and sewer systems all over northern Nevada. Farr West had made the $35 million estimate.

Mr. Klaich asked about additional funding, should the project cost more than $35 million. Mr. Sader advised the private parties involved would cover any overrun costs. It would not be borne by the county or by the state.

Mr. Klaich inquired about the ownership of the pipeline. Mr. Sader advised ownership of the pipeline would transfer to TRIGID upon completion.

Governor Sandoval asked if the private entity participants, in attendance, wished to make any comments. Mr. Chris Reilly, Workforce Development and Education Lead, Tesla, Inc. and Mr. Brian Scelfo, Senior Director, Corporate Development, Tesla, Inc. advised they were in in full support of the project and saw this as exciting for long-term growth at the Tesla Gigafactory.

Lieutenant Governor Hutchison inquired about future plans for the Tesla, Inc. parcels that were part of the TIA. Mr. Scelfo advised the Gigafactory is separated into different parcels. Currently, only the largest parcel had been developed. However, the company planned to expand onto the other parcels swiftly.

Lieutenant Governor Hutchison inquired about the impacts of the pipeline project on the Gigafactory expansion plans. Mr. Scelfo advised future expansion would not be possible without approval of the project.

Dr. Bennett asked when water would start flowing through that pipeline. Mr. Sader advised the current schedule would commence construction of the pipeline, and other facilities necessary, in the first quarter of 2019 with a completion date of late 2020.

Governor Sandoval noted he was comfortable with the financing proposal and felt there was extraordinary protection for the citizens of both Storey County and the State of Nevada Ultimately, the responsibility would fall upon the entities within the SAD. Regarding environmental issues, Governor Sandoval noted the people of Washoe County would benefit from the avoided costs of facilities necessary to clean the water that would otherwise be redirected to TRIC. The water coming into the river would also be beneficial to the Pyramid Lake Paiute Tribe. It was of great importance the Tribe be protected in conjunction with receiving higher quality water.

AMERICAN OVERSIGHT

Governor Sandoval noted the water would be recycled at TRIC which would actually save water. This would be another benefit to the residents of Washoe County, Storey County and the region. Regarding economic development, the project continued the New Nevada story of bringing some of the best jobs in the country to Nevada. Tesla, Inc. had exceeded its initial commitments to the state. At a recent Cimarron Memorial High School press conference, Tesla, Inc. made a $1.5 million contribution to support the development of robotics teams and STEM education throughout Nevada. Switch, Inc. had built the world's largest data center and planned to build another facility in northern Nevada. Google had already been providing training, free of cost, to citizens of Washoe County.

Governor Sandoval noted significantly trusted and experienced individuals had testified on behalf of the project. Ms. Mulroy had impeccable knowledge regarding the water situation and water quality. Mr. Taggert was a prominent water lawyer in the state and had worked on the project in consultation with Washoe County, Storey County, the City of Sparks and City of Reno. Mr. Sader, was a well-respected member of Nevada's Legislature, a former Chairman of the Judiciary Committee and had an extensive public service career. Governor Sandoval also noted Applied Analysis was an entity he knew and trusted and had provided expertise and guidance on some of the most complex issues associated with economic development in the state.

The proposed Effluent Pipeline project was a transformational project and would allow the State of Nevada to lead. Nevada had generated tremendous economic results. It was the most improved state in the country in terms of employment. The state was at a record level of employers. Clark County was the fastest growing metropolitan area in the United States of America. Nevada's average wage was the highest it's ever been, and 175,000 jobs lost, in the Great Recession, had been replaced with 260,000 jobs. Governor Sandoval noted he had full faith in the companies participating in the project.

Governor Sandoval said the form of the motion for Agenda Item 4 would be:

- To approve the TRIC EDFP submitted by Storey County.
- To approve the submission of the proposal to the IFC of the Nevada Legislature.
- To approve to enter into one or more agreements with Storey County or another local government to administer any districts and carry out the projects identified in the proposal as deemed necessary by the Executive Director.
- To approve the provision of notice of the approval of the proposal to the Board of County Commissioners of Storey County and the State Board of Finance and that the motion include to take all action necessary or appropriate to effectuate the approval of the proposal and provisions of NRS 360.981 to 360.992.

A MOTION WAS MADE BY MR. KLAICH TO APPROVE THE FIVE-PART MOTION FORMULATED BY GOVERNOR SANDOVAL. THIS MOTION WAS SECONDED BY LIEUTENANT GOVERNOR HUTCHISON. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

5. REVIEW AND APPROVAL OF STOREY COUNTY RESOLUTIONS 501 & 502

Ms. Kendra Follett, Bond Counsel to Storey County, provided the following information: Resolution 501 is a resolution approving the financing proposal. This is adopted by the Board of County Commissioners of Storey County and it directed notification to the Governor's Office of Economic Development and the IFC pursuant to the provisions of NRS 278C and NRS 360. Resolution 502, also concerns the same project and it directs notice to the IFC under a different provision of 278C which specifically relates to the tax increment area.

Mr. Whitten advised the Storey County Board of Commissioners unanimously approved both Resolutions 501 and 502 a week ago.

The Governor said he would accept a motion to approve Storey County Resolutions 501 and 502, as presented in Agenda Item Number 5.

A MOTION WAS MADE BY MR. SPECHT TO APPROVE STOREY COUNTY RESOLUTIONS 501 & 502 AS PRESENTED IN AGENDA ITEM NUMBER 5. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

6. PUBLIC COMMENT

Governor Sandoval asked if anyone from the public sought to make public comment. No public comment was provided.

7. ADJOURNMENT

A MOTION WAS MADE BY DR. HAVINS TO ADJOURN THE MEETING. THIS MOTION WAS SECONDED BY MR. BARRETT. THE MOTION PASSED UNANIMOUSLY

Subject: RE: IFC August Agenda

Paul,

Thanks for your e-mail.

To have any chance of being considered by the IFC at its August 16 meeting, an action item needs to be sent over on a parallel basis with the Economic Development Board and any other government bodies required to approve the item. Having said this, we are already two weeks past the deadline date set with the Governor's Finance Office. It is important for both Legal and Fiscal Staff to have time to review this item as staff to the Interim Finance Committee. Any effort you can undertake in this regard is appreciated.

Mark

Subject: IFC August Agenda

Mark, hope all is well. I have reached out to Assemblywoman Carlton and Chairwoman Woodhouse on the below request and understand you are under a tight timeline to post the agenda for the August 16th meeting. This issue has been boiling for a bit but only recently became a priority. Bond issuing and county commission approval processes have pushed us into an accelerated timeline. I am currently traveling abroad on a trade mission but can circle back with any details you need as long as I have cell coverage. I am back in country on the 8th and will continue to brief as needed.

We are requesting the Chair's approval for the late submission of an agenda item for action at the August 16 IFC meeting. This item will include review and potential approval of an Economic Development Financing Proposal (per SB1 of the Faraday special session), as well as review and potential approval of a related Tax Increment Area. This is a project of critical importance for Google, Tesla, Switch and several other companies including potential future expansion and growth of the TRIC park. GOED and its Board are scheduled to review and potentially approve this application on August 14th. If approved, GOED will then formally submit the EDFP application to IFC through the Governor's Finance Office. In the meantime, and recognizing that time is of the essence, with the Chair's approval, we will immediately begin working with the Governor's Finance Office and your team, including Cindy, to ensure that they are fully briefed on these items.

AMERICAN OVERSIGHT

Thank you for your consideration.

Sincerely,

Paul Anderson

Subject: RE: Invite to Tahoe and MLWS Oversight Committee

Good afternoon,

Just wanted to touch base with you on the Tahoe Oversight Committee meeting and tour scheduled for June 5. With the approval of Chair Sprinkle, we moving the meeting from the TRPA building in Stateline to Carson City to accommodate a tour of the Marlette System. As you recommended, we will be requesting a tour on the east side, going up Hobart Rd. We are also pushing back the meeting start time to 2:00 PM, so we can see as much as possible in about 4.5 to 5 hours.

Following the tour, there will be a meeting at the Legislative Building. The chair is hoping to get a brief presentation regarding the long term viability and needs of the system, including any financial estimates beyond the regular bonding capacity for maintenance. He may be interested in seeking a fiscal request in the next legislature.

Also, are you aware of any Storey County representatives that we could invite to talk about the importance of the system and the necessity for seeking upgrades? If not, we can call the county manager, Pat Whitten, to see if he has any recommendations.

We'll need to work out the final details, like where to meet and transportation up the hill. We should know the total numbers attendees over the next couple of weeks.

Thanks for all your help and talk to you soon,

Hello Jered,
We have had some changes from that December meeting. Tom Federici has step down, Ron Cothran has replaced him as Deputy Administrator for Buildings & Grounds. So with that said, we look forward to meeting with you and the oversight committee. I have a concern the time for the tour is short, if we want to see the complete system. Our complete Tours that we give are all day! This allows a complete overview and operation of this system. I know that the committees time is limited, but I would recommend Tour and presentation at the same time. The date you have set June 5th works, weather permitting.
Thanks for this opportunity,
Jerry

Subject: RE: Invite to Tahoe and MLWS Oversight Committee

Good morning,

Just wanted to say thanks again for making a presentation to the Tahoe Oversight committee back on December 19. I personally really enjoyed your presentation.

As Chair Sprinkle mentioned in the hearing, he would like to devote a whole day to the Marlette Lake Water System. Under his instructions, I'm writing to see if we can begin coordinating a tour of the system and request another presentation. We have the date of June 5 set aside to specifically focus on Marlette. We would like to tour the system in the morning and then hold a roughly 1.5 hour meeting to discuss the future and needs of the system in the afternoon.

Please let me know how best we can proceed. I'd be happy to come meet with you to discuss the tour and meeting.

Thank you,

Good morning Gus,

I hope you are doing well.

As I'm sure you are aware, the 2017-2018 Legislative Interim is getting under way. The Tahoe and MLWS Oversight Committee is holding its first meeting on November 28 in Carson City at the Legislative Building. On behalf of the

AMERICAN OVERSIGHT

Committee, I would like to invite you (or a designee) to make a roughly 15 to 20 minute presentation on the Marlette Lake Water System.

The Committee for this interim includes the following members:

Senator Parks
Senator Ratti
Senator Settelmeyer
Assemblywoman Jauregui
Assemblyman Kramer
Assemblyman Sprinkle

Since three of the members are new to the Committee, it may be appropriate to include an overview and some background information in your presentation, as well as an update on any recent improvements or changes in the system.

Please let me if you are available to make a presentation on November 28 or if you have any questions regarding this request.

Subject: Letter for Governor Sandoval from Australian Prime Minister [SEC=UNCLASSIFIED]

UNCLASSIFIED

Hi Tyler,

We haven't yet met, but in June I took up the Congressional Liaison Chief job at the Australian Embassy.

I was fortunate enough to connect with the Governor again briefly at the NGA Summer Meeting, with Lauralyn. It was lovely news to hear of their recent wedding!

The **attached letter has just come through to us from the Australian Prime Minister.** Would you be so kind as to pass this on to him?

Hope to connect soon – we look forward to continued Australia-Nevada connections!

I will be visiting Nevada in the next few weeks, with my colleague Lauren.

Best regards, Sarah

AMERICAN OVERSIGHT

PRIME MINISTER

Reference: MC18-101558

18 AUG 2018

The Honorable Brian Sandoval
Governor of Nevada
Suite 267, 444 North Capitol Street NW
WASHINGTON D.C. 20001-1512

Dear Governor Sandoval

It was a great pleasure and privilege to give the keynote speech at the National Governors Association Winter Meeting in February in Washington.

Australia and the United States are the closest of friends. As I said in my address to your members "this is a partnership, an alliance that is built on shared values. Values which are all too rare in the world today. But values which Australians and Americans understand more keenly than most".

My Government is firmly committed to building on that partnership by strengthening links, not just in Washington D.C. but also in State capitals. Australia's business leaders, as well as the Premiers and Chief Ministers who accompanied me to Washington, have made new friends and allies in the US Governors they met.

We look forward to continued engagement with the NGA and encourage you and all members to visit Australia. It would be an excellent opportunity to advance our shared interests and for you to enjoy our hospitality.

You can be assured you have a friend in Australia's Ambassador, H.E. the Hon Joe Hockey, and his team looks forward to working with the NGA to progress our shared values.

I have shared a copy of this letter with the current chair of the NGA, Governor Steve Bullock.

Yours sincerely

MALCOLM TURNBULL

Good morning all,

The grant office has been engaged to look at federal funding for the Marlette system. We have encouraged Ward and his shop to have the Marlette Water System added to the State's Mitigation Plan (housed within Division of Emergency Management) which will open another stream of federal money (pre-disaster funding). Additionally, we do expect a large Infrastructure appropriation from the Omnibus bill which could potentially be used to fund the project (or phases of the project).

Lastly, just about every funding opportunity asks how the project will be sustained after federal money is no longer available – as a result I encourage solutions for future maintenance as it will provide for a more competitive application – once we find one to apply for.

Please let me know if you have any additional questions or concerns

Best,
Connie

Christina: thanks for your patience on the formal invite. We are expecting to get that in your hands on/around April 9th.

For your information, we are looking to start the ceremony at 10:30 or 11:00 am on May 16th. We expect the speeches and groundbreaking to take about an hour followed by lunch. Expecting a crowd of about 150 to 175. We are also working with a PR firm to make sure everything goes off without a hitch on May 16.

In the meantime, do you need anything from us beyond the formal invite?

Subject: NDOT U.S. 50 Wild Horse Information- Photo of Wild Horse Crossing Attached

Hello Paul.
I hope this information will help:

ROADWAY FENCING

U.S. 50
In Lyon County, a majority of the U.S. 50 corridor between the Dayton area and Stagecoach is fenced.

Specifically, we have approximately ten miles of U.S. 50 fenced in two separate sections:
Six and and a half miles fenced between east Dayton and Stagecoach
Three miles fenced between USA Parkway and 95A in Silver Springs
That leaves a remaining area of U.S. 50 between Stagecoach and USA Parkway to be fenced, and we will fence that when we widen that section of highway this fall.

AMERICAN OVERSIGHT

Primarily, this fence is four-strand wire fencing which stands four feet high to help prevent wild horses and cattle from entering the highway.

USA PARKWAY
15+ miles of USA Parkway is fenced from the U.S. 50 junction in Lyon County to the Tahoe Reno Industrial Center.
Being fenced on both sides, that adds up to approximately 31 miles, of wildlife fencing installed on the USA Parkway.

FENCE MAINTENANCE
Our NDOT road maintenance crews put priority on quickly mending any roadside fence that might be, for example, cut by recreationists.

WILDLIFE UNDERPASSES
A wildlife underpass underneath U.S. 50 constructed in 2013 east of Dayton helps keep both motorists and horses safe by reducing potential collisions.
There are also two wildlife undercrossings on USA Parkway.

ROADWAY SIGNAGE
NDOT also has signs urging caution and alerting motorists to the possible presence of horses near the road: NDOT has ten wild horse crossing signs on the U.S. 50 corridor. Roughly half of those are flashing signs which read "major horse crossing" signs placed in areas of highly-concentrated horse crossings.

ANIMAL CROSSING SAFETY STUDIES
In conjunction with the Nevada Department of Wildlife, NDOT is conducting research to prioritize potential safety enhancements at the most concentrated and critical areas of vehicle-animal collisions statewide. In addition to this study, NDOT will also lead a pooled-fund research project on reducing wildlife-vehicle collisions with seven other state DOTs and the Ontario Ministry of Transportation.
We want to remind all motorists to remain attentive when driving near the Virginia Range or anywhere they might be in Nevada. That means focusing on the road, always looking out for other vehicles, pedestrians, and wildlife on the road.

Subject: Nevada State Library, Archives and Public Records Position Announcement
Importance: High

January 2, 2019

Patrick Cates, Director of the Department of Administration, is pleased to announce the appointment of Patrick 'Tod' Colegrove, PhD, MSLIS as the new Administrator for the Nevada State Library, Archives and Public Records.

Colegrove comes to the State from the University of Nevada, Reno, where he has served as Director of the DeLaMare Science & Engineering Library since 2010. Colegrove, a fourth generation Nevadan, is a tenured professor with extensive leadership, planning, and management experience. Nationally, he serves on multiple library professional boards and committees across several library association.

Colegrove earned his doctorate and master's degrees in physics working with researchers at the Hubble Space Telescope Sciences Institute. He worked for over fourteen years as executive-level management in high-tech private industry; coming back to the University, he taught physics, astronomy, and honors courses for over a decade. After earning his master's degree in Library and Information Science, he led the transformation of the DeLaMare Library into a vibrant hub of innovation and has become an internationally recognized leader in library transformation and impact. A product of rural Nevada himself, Colegrove credits libraries for the success he has enjoyed in his own career and is optimistic about their future. "Libraries change lives," Colegrove said. "I look forward to connecting with and supporting that work throughout the state."

AMERICAN OVERSIGHT

Tammy Westergard, interim administrator of the Nevada State Library, Archives and Public Records, said the respect Colegrove has earned from librarians across the state will be key to the continued transformation of the state library. “Tod understands why libraries matter,” Westergard said. “He is very authentic and a consummate professional.”

Subject: FW: New Opportunity Zone Tax Program

Hi Joel,

There has been a lot of buzz on Opportunity Zones which is a new program added to the recently passed tax bill.

I am sending this email to share information regarding the program. The goal of the Opportunity Zones is to encourage investment in low-income census tracts by decreasing tax on capital gains. Since the program is so new the details have not been fully clarified. Here is just one (of many) links if you are interested in finding out more.
http://eig.org/opportunityzones

In this act the state governor is charged with nominating census tracts to be designated as opportunity zones where these dollars can be invested and receive tax benefit. As the state agency that works with NMTC, B&I is working to assist in defining the list of nominated zones with an eye on low-income tracts that are already attracting investment to further leverage and catalyze progress. Still, we will not make the final decision as to which zones will be nominated and we are only charged with defining eligible zones. In addition, because only 25% of the low-income zones in the state can be nominated, and due to the fact that the governor has a very limited timeframe, the zone nominations are due March 22nd, 2018, time is critical in this process. Time for outreach is limited. Discussion of zone designation should be directed to GOED at this time. Further it should be understood by all interested parties that if the state fails to make nominations then the US Treasury will make the zone designation without our input. In my respectful and unsolicited opinion, although input should be encouraged, understanding of the limitations and cooperation should be the emphasis for all parties in this process so our state is able to nominate the tracts that will maximize the outcomes to low income communities for these investment. Furthermore, it is truly unknown how much investment this program will generate given that the details of how these investments are made and tracked are still unclear (hundreds of people much smarter than me with legal and accounting degrees are working diligently on this clarification).

Finally, “opportunity” seems to be the hot word this year. There are Opportunity Funds, Opportunity Zones, Opportunity Investments, and several many “opportunities” about there. I believe it will take an effort to not get one confused with the other.

It is my hope that this information is helpful to you as a collaborative partner to support economic growth and diversity in Nevada.

Sincerely,

Karen Schnog

Subject: October 11 & 25 Events Honoring Governor Sandoval

Dear Board Members, please RSVP for the October 11 and / or October 25 event honoring Governor Sandoval's vision for JAG Nevada, and the success-to-date Dr. Cantu and his team have accomplished. Also, please invite one or more individuals you believe would be interested in the JAG Nevada goals and accomplishments, with an eye toward our goal of additional private sector investors. We have attached the current list of guests who have been invited, many of whom have responded to our invitation. Please peruse the list to see if your intended invitee(s) have already been approached.

I appreciate your support, and look forward to extending the JAG Nevada family of support. See you soon.

Regards, Frank

Subject: Opportunity Zone Conference Call Follow-Up

Thank you all very much for taking the time to join us and take part in the Opportunity Zone call last week hosted by the White House Office of Intergovernmental Affairs. We have pulled together some notes from the call below as well as guidance from the bill sponsors. We are excited to continue partnering with your communities on this important issue and keep you up to date as new developments occur. Please see the below information and feel free to reach out to us in the future.

Opportunity Zones Program
The Opportunity Zones Program has been introduced as an innovative approach to unlocking long-term private investment to support low-income urban and rural communities in every U.S. state and territory. Investors are eligible to receive certain tax benefits on unrealized capital gains reinvested in Opportunity Zones through pooled Opportunity Funds. The program is designed to minimize cost and risk to the taxpayer. Investors bear the risk on all their originally deferred capital gains, minus a modest reduction for long-term holdings, regardless of whether subsequent investments have increased or decreased in value. Neither tax credits nor public-sector financing is involved.

The program uses low-income community census tracts as the basis for determining areas eligible for an Opportunity Zone designation. [Section 45D(e)].
• Low-income census tracts are places with an individual poverty rate of at least 20 percent and median family income no greater than 80 percent of the area median.
• A census tract that is not a low-income community may be designated as a qualified Opportunity Zone if the tract is contiguous with the low-income community designated as a qualified Opportunity Zone, and the median family income of the tract does not exceed 125 percent of the median family income of the low-income community contiguous with the tract. Up to 5 percent of the population census tracts designated as Opportunity Zones may qualify under this exemption.
• Per state/territory, up to 25 percent of the total number of census tracts that qualify as an Opportunity Zone can be designated as an Opportunity Zone. Governors will determine which low-income community census tracts qualify as an Opportunity Zone. This approach was intended to help ensure local needs and opportunities are being met as well as to encourage concentration of capital in targeted, geographically contiguous areas in each state or territory.
• Governors have 90 days (Determination Period) from the date of enactment to submit a list of designated census tracts for approval.
    o Treasury must approve or provide feedback within 30 days of the governor's submission (Consideration Period).

AMERICAN OVERSIGHT

o Both the Determination Period and Consideration Period can be extended for a period of 30 days. o Opportunity Zone designations last for a period of 10 years (Designation Period).

Opportunity Funds Opportunity Funds are a new class of investment vehicles (organized as a corporation or a partnership) that specialize in aggregating private investment and deploying that capital in Opportunity Zones to support Opportunity Zone Property.

• A minimum of 90 percent of Opportunity Fund assets must be invested in Opportunity Zones.
• Opportunity Funds are envisioned as a market solution for investors who lack the information and wherewithal to execute investments in rural and low-income urban communities.
• The statute does not limit the number of funds that can be created, nor does it provide instruction on the nature of investments (i.e., risk/return profile).
• Pooling capital through a fund structure provides an opportunity for a broad array of investors throughout the country to engage in the program.

Opportunity Zones Property Opportunity Funds invest in Opportunity Zone Property, which are defined as:

• Qualified opportunity zone stock – any stock in a domestic corporation.
• Qualified opportunity zone partnership interest – any capital or profits interest in a domestic partnership.
• Qualified opportunity zone business property – tangible property used in a trade or business of the qualified opportunity fund that substantially improves the property.

Incentives for Activating Passive Holdings
The Opportunity Zones Program provides an incentive for investors to reinvest unrealized capital gains into Opportunity Funds in exchange for a temporary tax deferral and other benefits tied to long-term holdings. With trillions of dollars in unrealized capital gains sitting on the sidelines in stocks and mutual funds, U.S. investors can now roll passive holdings of capital into investments in distressed communities. No upfront subsidy is provided to investors; all incentives are linked to the duration of the qualified investment. The provision has two main tax incentives to encourage investment:

• Allows for the temporary deferral of inclusion in gross income for capital gains that are reinvested. o The basis of an investment immediately after its acquisition is equal to zero.
o The basis is increased by 10 to 15 percent of the original gain (five- to seven-year holds, respectively).
o If the investment is held through December 31, 2026, the basis in the investment increases by the remaining 85 percent of the deferred gain.
• Excludes from gross income the post-acquisition capital gains on investments held for at least 10 years.

Required Impact Reporting
The provision requires Treasury to report annually to Congress on the Opportunity Zone incentives beginning five years after the date of enactment. The report is to include an assessment of investments held by the Opportunity Fund nationally and at the state level.

• To the extent the information is available, the report is to include:
o Number of Opportunity Funds o Amount of assets held in Opportunity Funds.
o Composition of Opportunity Fund investments by asset class o Percentage of Opportunity Zones that have received investments.
• The report also must provide an assessment of the impacts and outcomes of the investments in economic indicator areas, including job creation, poverty reduction and new business starts, and other metrics as determined by the secretary.

STEPS TOWARD IMPLEMENTATION

AMERICAN OVERSIGHT

NV-DA-20-0615-A-001485

As explained below, there are currently multiple efforts happening in tandem as the administration and states work to implement the Opportunity Zones Program, including:
1) Designating Opportunity Zones
2) Providing guidance on Opportunity Fund certification
3) Finalizing the law

Designating Opportunity Zones

Each governor is authorized to designate a certain number of Opportunity Zones into which private investment can flow through Opportunity Funds. Governors have 90 days from the date of enactment (December 22, 2017) to submit a list of designated census tracts for approval, although they can request a 30-day extension. Once approved, these designations will remain in place for 10 years. Currently, governors are awaiting guidance from Treasury regarding the process for submitting recommended designations. It is anticipated that this guidance will be delivered in the coming weeks (late January/early February 2018).

Providing Guidance on Opportunity Fund Certification

Once the zones are designated, Treasury will turn its focus to providing guidance on Opportunity Fund certification. The statute outlines two requirements regarding structure and intent of these funds:

1) must be organized as a corporation or a partnership
2) invest a minimum of 90 percent of assets in Opportunity Zones. Given the straightforward nature of statute requirements, it is unclear whether additional qualifications will be considered. It is anticipated that the process for certification will analogue that of a Community Development Entity (CDE). The timeline for the availability of the guidance is not yet known.

Finalizing the Law

In addition to providing guidance on the processes for submitting Opportunity Zone designations and certifying Opportunity Funds, the Treasury must follow formal administrative procedures to finalize the law, which will dictate ongoing administration of the Opportunity Zones Program. The process typically goes as follows:

• Treasury will propose a structure for implementing the new rule, after which it will issue a notice of proposed rulemaking and will request public comments on the proposal.
• The comment period typically lasts from 30 to 60 days. Upon reviewing the comments and making any necessary changes to the rule, Treasury will issue a final rule that formalizes the program.

Opportunity Zones

AMERICAN OVERSIGHT

The authority to implement IRC 1400Z-1 and 1400Z-2 has been delegated to the IRS. The CDFI Fund is supporting the IRS with the Opportunity Zone nomination and designation process under IRC 1400Z-1 only.

- **IRS Revenue Procedure**

- **List of designated Qualified Opportunity Zones** (QOZs): This list is current as of **April 18, 2018** and will be updated regularly as new designations are made.
  Please note that the list of designated tracts on this website is not the official list. The official list will be published in the Internal Revenue Bulletin at a later date.

- For a **map** of all designated QOZs, **click here**.
  - To view all designated QOZs, click on the "Layers" tab on the menu on the right hand side of the screen. Select "Opportunity Zone Tract" and unselect "2011-2015 LIC Census Tract," and zoom in to a specific area on the map. Designated QOZs will appear in **blue**.
  - To view census tract numbers select "All (with labels)" next to the "2011-2015 LIC Census Tract" option within the Layers tab.
  - The map may also be used to view all census tracts eligible for designation as a QOZ.
  - To view all census tracts eligible for designation as a QOZ, click on the "Layers" tab. Select "2011-2015 LIC Census Tract" and select the "All Eligible" option next to "Opportunity Zone Tract," and zoom in to a specific area on the map. LICs will appear in **brown** and Eligible Non-LIC Contiguous Tracts will appear in **red**.
  - To view a specific census tract, enter the tract number in the search bar, select "2011-2015 Census Tract" by clicking on the mailbox symbol on the left of the search bar, click search, and select the census tract number that appears in the results below.

- **Opportunity Zones Information Resource**, with sortable lists by State of all census tracts eligible for designation as a QOZ.

For questions on the Opportunity Zone nomination and designation process:

Phone: (202) 653-0406

E-mail: OpportunityZone@cdfi.treas.gov

Opportunity Funds

The IRS is currently working on guidance under IRC 1400Z-2 (including the certification of Qualified Opportunity Funds and eligible investments in Qualified Opportunity Zones) and welcomes comments. Please send any comments to:

Opportunity Zones Resources

Page Content
Opportunity Zones

The authority to implement IRC 1400Z-1 and 1400Z-2 has been delegated to the IRS. The CDFI Fund is supporting the IRS with the Opportunity Zone nomination and designation process under IRC 1400Z-1 only.

- **IRS Revenue Procedure**

- **List of designated Qualified Opportunity Zones** (QOZs): This list is current as of **April 18, 2018** and will be updated regularly as new designations are made.
  Please note that the list of designated tracts on this website is not the official list. The official list will be published in the Internal Revenue Bulletin at a later date.

- For a **map** of all designated QOZs, **click here**.
  - To view all designated QOZs, click on the "Layers" tab on the menu on the right hand side of the screen. Select "Opportunity Zone Tract" and unselect "2011-2015 LIC Census Tract," and zoom in to a specific area on the map. Designated QOZs will appear in **blue**.
  - To view census tract numbers select "All (with labels)" next to the "2011-2015 LIC Census Tract" option within the Layers tab.
  - The map may also be used to view all census tracts eligible for designation as a QOZ.
  - To view all census tracts eligible for designation as a QOZ, click on the "Layers" tab. Select "2011-2015 LIC Census Tract" and select the "All Eligible" option next to "Opportunity Zone Tract," and zoom in to a specific area on the map. LICs will appear in **brown** and Eligible Non-LIC Contiguous Tracts will appear in **red**.
  - To view a specific census tract, enter the tract number in the search bar, select "2011-2015 Census Tract" by clicking on the mailbox symbol on the left of the search bar, click search, and select the census tract number that appears in the results below.

- **Opportunity Zones Information Resource**, with sortable lists by State of all census tracts eligible for designation as a QOZ.

For questions on the Opportunity Zone nomination and designation process:

Subject: Opportunity Zone Designation - West Wendover

Hi Pam,

First, let me thank you for your help in getting a new Welcome to Nevada sign here on Interstate 80 at the Utah/Nevada border. The new sign which went up roughly 6 months or so ago, was overdue and, looks great. Thank you!

Second, have attached a copy for Governor Sandoval a letter that has been sent to GOED concerning the process of selecting Opportunity Zone areas. West Wendover would like due consideration of that designation believing that it could definitely help us in attracting business and other investments.

I appreciate if you could pass the letter on to Governor Sandoval.

And yes... Amtrak is still on our dream board. With the loss of Greyhound service recently, we now have no public transportation access to the national transportation system. Solutions are never easy, especially in our case... :)

AMERICAN OVERSIGHT

Hope all is well with you, please make sure to stop in and say hello if you are in the area, would be nice to see you again.

Chris

State-Federal Relations Directors,

As of Friday, March 16, the Department of Treasury had not received your state's Opportunity Zones designation nomination or 30-day extension request. The deadline to submit is Wednesday, March 21, 2018.

A designation nomination or extension request must come from you Governor. Your Governor has until Wednesday, March 21, 2018, to issue a designation nomination or request a 30-day extension (*Pursuant to § 1400Z–1(b)(1)(A) and (c)(2)(B) of the Code, the CEO of the State in which a tract is located may nominate the tract to be a QOZ, and any such nomination must be made no later than March 21, 2018. Under § 1400Z-1(b)(2), however, the State CEO may request, and receive, a 30- day extension of this deadline* - IRS).

You can find additional information here: https://home.treasury.gov/news/press-release/sm0283.

Please let us know if you have any questions.

Thanks,
Nic

Subject: Opportunity Zone Nomination Information

AMERICAN OVERSIGHT

Attached is a letter informing your governor or chief executive officer as to how they can nominate eligible census tracts for designation as Opportunity Zones. Titles II and V of the concurrent resolution on the budget for fiscal year 2018, signed into law on December 22, 2017, added Subchapter Z—Opportunity Zones to the Internal Revenue Code and provides certain tax benefits for private investment in distressed areas. The authority to implement these sections of the new tax law has been delegated to the Internal Revenue Service (IRS). The Community Development Financial Institutions Fund (CDFI Fund) is supporting the IRS with the Opportunity Zone nomination and designation process.

In order for investors to take advantage of the tax benefits, the law requires governors or chief executive officers of States and possessions to nominate census tracts in their jurisdictions as Opportunity Zones.

To assist in the nomination process, the CDFI Fund has developed a Nomination Tool, which can be used to identify and select eligible census tracts to nominate for designation as Opportunity Zones. The Nomination Tool as well as Nomination Instructions on completing and submitting a nomination, can be found at https://www.cdfifund.gov/Pages/ozonestateresource.aspx.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-001505

DEPARTMENT OF THE TREASURY
COMMUNITY DEVELOPMENT FINANCIAL INSTITUTIONS FUND
1500 PENNSYLVANIA AVENUE, NW
WASHINGTON, D.C. 20220

March 5, 2018

The Honorable Brian Sandoval
Governor
State of Nevada
Capitol Building
101 North Carson Street
Carson City, NV 89701

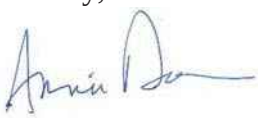
Dear Governor Sandoval:

I am writing to inform you as to how you can nominate eligible census tracts for designation as Opportunity Zones. As noted in a letter sent to you from Assistant Secretary for Tax Policy David J. Kautter dated February 8, 2018, P.L. 115-97, an Act to provide for reconciliation pursuant to titles II and V of the concurrent resolution on the budget for fiscal year 2018 (the "Act"), signed into law on December 22, 2017, added Subchapter Z—Opportunity Zones to the Internal Revenue Code ("Code") and provides certain tax benefits for private investment in distressed areas of Nevada. The authority to implement these sections of the new tax law has been delegated to the Internal Revenue Service (IRS). The Community Development Financial Institutions Fund (CDFI Fund) is supporting the IRS with the Opportunity Zone nomination and designation process.

In order for investors to take advantage of the tax benefits, the law requires governors or chief executive officers (CEOs) of States and possessions to nominate census tracts in their jurisdictions as Opportunity Zones.

To assist you with your nomination, the CDFI Fund has developed a Nomination Tool through which you can identify and select the eligible census tracts in Nevada you wish to nominate for designation as Opportunity Zones. The Nomination Tool as well as Nomination Instructions on completing and submitting your nomination, can be found at https://www.cdfifund.gov/Pages/ozonestateresource.aspx.

To ensure that the information submitted reflects the official nomination of Nevada as authorized by the governor or CEO of Nevada, the CDFI Fund is providing each State with a State Unique Opportunity Zone Code that must be entered in the Information section of the Nomination Tool, per the Nomination Instructions. The State Unique Opportunity Zone Code for Nevada is kffp10283f.



The statute imposes a deadline for the nominations of 90 days from its enactment. Thus governors and chief executive officers have until ***March 21, 2018,*** to submit nominations. A 30-day extension can be requested, as described in Revenue Procedure 2018–16, 2018-9 I.R.B. 383. Instructions on how to request an extension are included in the Nomination Instructions. The statute requires that ***failure to submit timely nominations results in loss of the ability to designate any Opportunity Zones*.**

AMERICAN OVERSIGHT

The census tracts eligible for designation as Opportunity Zones include some of the most distressed areas in the country. If such a community becomes an Opportunity Zone, the resulting tax benefits may attract new investment into the community to create jobs, stimulate growth, and provide hope to the individuals and families living there. I encourage you to consider this opportunity and to make timely nominations.

If you or your staff have any questions, please do not hesitate to contact Jeff Merkowitz at merkowitzj@cdfi.treas.gov or (202) 653-0300.

Sincerely,

Annie Donovan
Director

Subject: FW: Opportunity Zone Nomination Information

I'm sure you are aware, but just passing along FYI.

Tyler Klimas | Nevada Washington Office

From: Opportunity Zone <ZoneO@cdfi.treas.gov>
Date: Thursday, March 15, 2018 at 5:36 PM
To: Opportunity Zone <ZoneO@cdfi.treas.gov>
Subject: RE: Opportunity Zone Nomination Information

This email is a reminder that your State has until 11:59 p.m., March 21, 2018, to submit either a nomination of eligible census tracts for designation as Opportunity Zones, or to request a one-time, 30-day extension (to April 20, 2018). Per statute, failure to submit timely nominations results in loss of the ability to designate any Opportunity Zones.

For States planning to submit a nomination on March 21, 2018, requesting an extension does not limit the ability to submit the nomination on or prior to that date, but may give the State additional flexibility in the event of any last minute changes or technical difficulties

If you believe your State already has submitted its nomination or an extension request and that you are receiving this reminder in error, please let me know. Thank you, and please also do not hesitate to reach out to me with any questions.

To: Paul Anderson <paul.anderson@diversifynevada.com>
Cc: Cory Hunt <cory.hunt@diversifynevada.com>
Subject: Opportunity Zones

Paul,

Just a little primer from the info I found online to supplement what Cory send yesterday.

- Opportunity zones were included in the Tax Cuts and Jobs Act by Senator Tim Scott, a South Carolina Republican, and based on a bill he co-sponsored in 2017 with several Democrats. The effort to create the zones was pushed by an upstart Washington think tank, the Economic Innovation Group, and its patron, the tech mogul Sean Parker, of Napster and Facebook fame, who enlisted Mr. Scott and others to sponsor the legislation. https://www.nytimes.com/2018/01/29/business/tax-bill-economic-recovery-opportunity-zones.html

- The Opportunity Zones program offers three tax benefits for investing in low-income communities:

AMERICAN OVERSIGHT

NV-DA-20-0615-A-001511

- 1. A temporary deferral of inclusion in taxable income for capital gains reinvested in an Opportunity Fund. The deferred gain must be recognized on the earlier of the date on which the opportunity zone investment is disposed of or December 31, 2026.
- 2. A step-up in basis for capital gains reinvested in an Opportunity Fund. The basis is increased by 10% if the investment in the Opportunity Fund is held by the taxpayer for at least 5 years and by an additional 5% if held for at least 7 years, thereby excluding up to 15% of the original gain from taxation.
- 3. A permanent exclusion from taxable income of capital gains from the sale or exchange of an investment in an Opportunity Fund if the investment is held for at least 10 years. (summary attached)

- Requirements for Designation
  - "Qualified opportunity zone" means a population census tract this is a low-income community that is designated as a qualified opportunity zone if:
    - CEO of the state nominates the designation, and notifies the Secretary of treasury of nomination and
    - Secretary certifies nomination and designates tract as qualified opportunity zone
  - Low- Income Community means
    - IN GENERAL The term "low-income community" means any population census tract if—
      - The poverty rate for such tract is at least 20 percent, or
      - In the case of a tract not located within a metropolitan area, the median family income for such tract does not exceed 80 percent of statewide median family income, or
      - In the case of a tract located within a metropolitan area, the median family income for such tract does not exceed 80 percent of the greater of statewide median family income or the metropolitan area median family income.
  - Number of Designations
    - Up to 25% of the number of low-income communities in the state
    - Exceptions
      - A census tract that is not a low-income community may be designated as a qualified opportunity zone if the census tract is continuous with a low-income community that is designated as a qualified opportunity zone and the median family income of the tract does not exceed 125% of the median family income of the low-income community with which the tract is contiguous.
      - The period of the designation lasts 10 years from the designation date.
  - Determination period
    - The CEO of the State has 90 days beginning on the date of the enactment of the Tax Cuts and Jobs Act. The current deadline is March 22nd, but the CEO of the state can request a 30-day extension.
- Major differences between Opportunity Zones and NMTC (https://www.novoco.com/periodicals/articles/2017-tax-legislation-creates-new-tool-community-development)
  - NMTC is generally used to subsidize loans to qualified businesses in low-income communities, while Opportunity Funds are required to use funds from deferred gains to make equity investments or acquire property in Opportunity Zones.

- The NMTC program is also subject to an annual allocation limit, which in recent years has been $3.5 billion. Opportunity Zones have no such limit; volume will be set only by investor appetite. But the fact that 25 percent of each state's low-income communities will be in Opportunity Zones means that the number of areas eligible to benefit will be significantly less than the NMTC program.

- There is a significant question about who will make up the Opportunity Zone investor class. The NMTC program tends to draw major banks, but Opportunity Zones might see more high-net-worth individuals making investments, even though the investments will likely be in areas in which banks can get Community Reinvestment Act credit.

I'm attaching serval documents. One is an excel spreadsheet with the census tract information for every census tract in Nevada. Additionally, I'm attaching the summary of tax benefits done by the Economic Innovation Group.

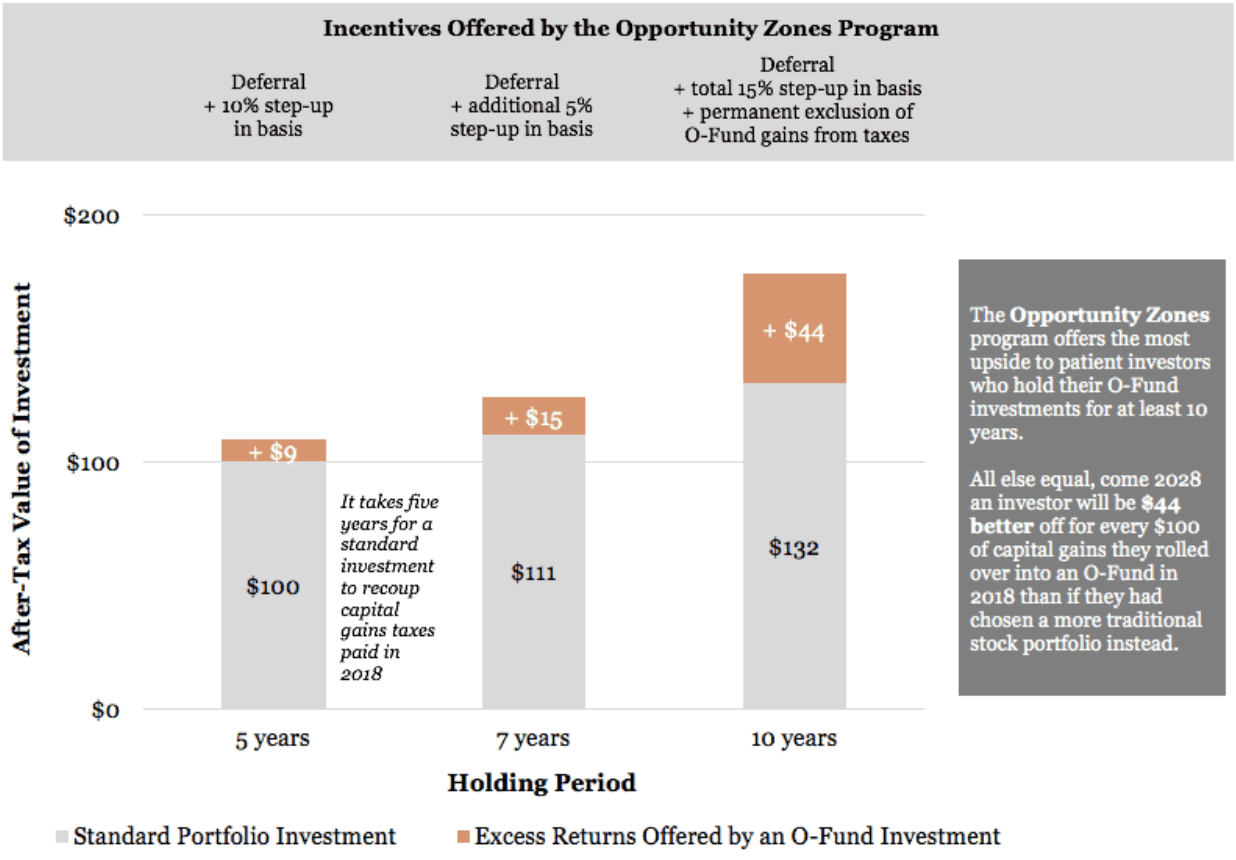
The Tax Benefits of Investing in Opportunity Zones

January 2018



The Opportunity Zones program offers three tax benefits for investing in low-income communities through a qualified Opportunity Fund[i]:

1. A **temporary deferral** of inclusion in taxable income for capital gains reinvested in an Opportunity Fund. The deferred gain must be recognized on the earlier of the date on which the opportunity zone investment is disposed of or December 31, 2026.

2. A **step-up in basis** for capital gains reinvested in an Opportunity Fund. The basis is increased by 10% if the investment in the Opportunity Fund is held by the taxpayer for at least 5 years and by an additional 5% if held for at least 7 years, thereby excluding up to 15% of the original gain from taxation.

3. A **permanent exclusion** from taxable income of capital gains from the sale or exchange of an investment in an Opportunity Fund if the investment is held for at least 10 years. This exclusion only applies to gains accrued *after* an investment in an Opportunity Fund.

Figure 1. Investing in an Opportunity Fund vs. a Standard Stock Portfolio
Scenario: A Capital Gain of $100 is Reinvested in 2018

** Note: Assumes long-term federal capital gains tax rate of 23.8%, no state income tax, and annual appreciation of 7% for both the O-Fund and alternative investment.*

AMERICAN OVERSIGHT

How does the incentive work in practice? Illustrative examples:

The figure above, along with the table and examples below, show how an investor's after-tax funds available compare under different scenarios, assuming various holding periods, annual investment appreciation of 7%, and a long-term capital gains tax rate of 23.8% percent (federal capital gains tax of 20% and net investment income tax of 3.8%). The table provides additional information on the tax liabilities and differences in the after-tax annual rates of return. As is clear, the incentives built into the Opportunity Zones program are designed to reward *long-term* investments in distressed communities the most.

Table 1. Investing in an Opportunity Fund (O-Fund) vs. a Standard Stock Portfolio
Scenario: A Capital Gain of $100 is Reinvested in 2018

Holding Period	Appreciation Rate	Investment in a Stock Portfolio		Investment in an Opportunity Fund		Difference in After-Tax Annual Rate of Return
		Total Tax Liability	After-Tax Funds Available	Total Tax Liability	After-tax Funds Available	
5 years	**7%**	$31	$100	$31	$109	**1.9%**
7 years	**7%**	$35	$111	$35	$126	**1.8%**
10 years	**7%**	$41	$132	$20	$176	**3.0%**

Example 1: Investor holds the O-Fund stake for 10 years

Susie has $100 of unrealized capital gains in her stock portfolio. She decides in 2018 to reinvest those gains into an O-Fund that invests in distressed areas of her home state, and she holds that investment for 10 years. Susie is able to defer the tax she owes on her original $100 of capital gains until 2026. Further, the basis is increased by 15% (effectively reducing her $100 of taxable capital gains to $85). Thus, she will owe $20 (23.8% of $85) of tax on her original capital gains when the bill finally comes due. In addition, since she holds her O-Fund investment for at least 10 years, she owes no capital gains tax on its appreciation. Assuming that her O-Fund investment grows 7% annually, the after-tax value of her original $100 investment in 2028 is $176. Susie has enjoyed a 5.8% effective annual return, compared to the 2.8% an equivalent non-O-Fund investment would have delivered.

Total tax bill in 2028: ***$20***
After-tax value of investment in 2028: ***$176***
Effective after-tax annual return on $100 capital gain in 2018: ***5.8%***

AMERICAN OVERSIGHT

Example 2: Investor holds the O-Fund stake for 7 years

As in Example 1, in 2018 Susie rolls over $100 of capital gains into an O-Fund. She holds the investment for 7 years, selling in 2025. As in Example 1, she temporarily defers the tax she owes on her original capital gains and steps-up her basis by 15%, so that in 2025 she will owe $20 (23.8% of $85) of tax on her original capital gains. Unlike Example 1, however, Susie will owe capital gains tax on the appreciation of her O-Fund investment, since she holds the investment for less than 10 years. Assuming that her O-Fund investment grows 7% annually, in 2025 Susie will owe $15 (23.8% of $61) of tax on the O-Fund investment's capital gain. Susie did not take full advantage of the Opportunity Zone program but nevertheless received a 3.3% effective annual return compared to the 1.5% an equivalent non-O-Fund investment would have delivered.

Total tax bill in 2025: ***$35***
After-tax value of investment in 2025: ***$126***
Effective after-tax annual return on $100 capital gain in 2018: ***3.3%***

Example 3: Investor holds the O-Fund stake for 5 years

As in Example 1, in 2018 Susie rolls over $100 of capital gains into an O-Fund. She holds the investment for 5 years, selling in 2023. As in Example 1, she can temporarily defer the tax she owes on her original capital gains, but her step-up in basis is only 10%, so that in 2023 she will owe $21 (23.8% of $90) of tax on her original capital gains. As in Example 2, Susie enjoys no exemption from capital gains tax on the appreciation of her O-Fund investment, since she holds the investment for less than 10 years. Assuming that her O-Fund investment grows 7% annually, in 2023 Susie will owe $10 (23.8% of $40) of tax on the O-Fund investment's capital gain. Susie did not take full advantage of the Opportunity Zone program but nevertheless received a 1.8% effective annual return on her initial capital gains compared to the -0.1% effective annual return an equivalent non-O-Fund investment would have delivered.

Total tax bill in 2023: ***$31***
After-tax value of investment in 2023: ***$109***
Effective after-tax annual return on $100 capital gain in 2018: ***1.8%***

For more information visit eig.org/opportunityzones or email john@eig.org

[i] A qualified Opportunity Fund is a privately managed investment vehicle organized as a corporation or a partnership for the purpose of investing in qualified opportunity zone property (the vehicle must hold at least 90 percent of its assets in such property). Governors (or the Mayor in the case of the District of Columbia) may designate 25 percent of their state's low-income census tracts as qualified opportunity zones, subject to certification by the U.S. Secretary of the Treasury. Low-income census tracts are defined in Internal Revenue Code Section 45D(d). If the number of low-income census tracts in a state is less than 100, then a Governor may designate a total of 25 tracts. Qualified opportunity zone property includes any qualified opportunity zone business stock, any qualified opportunity zone partnership interest, and any qualified opportunity zone business property. Only taxpayers who roll over capital gains of non-zone assets before Dec. 31, 2026, will be able to take advantage of the special treatment under the provision.

> Summary:

AMERICAN OVERSIGHT

The Tax Cuts and Jobs Act of 2017 established an Opportunity Zone tax incentive, which allows taxpayers to defer paying federal tax on capital gains from the sale of property if those gains are invested in Qualified Opportunity Funds that invest 90% of their assets in businesses located or property used in a designated low-income community. Investors receive modest reductions in their eventual tax bill if they maintain their Opportunity Fund investments for at least five and then seven years. Investors that hold capital in those funds for a full ten years also do not have to pay capital gains tax on the appreciation of their Opportunity Zone investments.

Sherry and Joel,

I hope you both had nice weekends. Thanks again for sending over the drawings so quickly. We've had a chance to review them and here is where we are now:

The Good News:

> You have a central boiler plant design (e.g. no individual units) and you're circulating hot water. The design makes integrating geothermal very straightforward. We would essentially bring our hot water pipe right into

AMERICAN OVERSIGHT

that boiler plant and you would distribute our hot water throughout the building rather than hot water you make yourself. This has implications for savings on multiple levels that I'll get to shortly.

The Bad News:

The current design calls for 180°F hot water. If push came to shove, we could get you 180° water, but it would be a stretch for us. We would much prefer a design point temperature of 165° or 170°. There are a few ways that the existing design can be altered to accommodate lower hot water temperatures. We could beef up the coil design a bit, increase the flow rate and velocity of the hot water through the pipes, increase the air flow rate over the coils, or some combination of the three. The fastest way to figure this out would be to set up a call with Ivan Dodov, your mechanical engineer**.** Luckily, I don't think any of these changes are major and my hope is that we can offset capex increases by some capex savings at the boiler plant.

Sources of Savings:

Capital Cost Savings: There is the potential for savings in the boiler plant. You could go from a two boiler design to a single boiler design where that boiler is just serving as a backup. Reducing boiler capacity could save on ancillary equipment. Since the gas fired plant would be for redundancy, some of the redundancies in the original plant design could be eliminated.

Operational Cost Savings:

17.5% savings on heat. The dollar amount will vary based on actual usage and rates. In 2018, the savings amount to about $0.076 per therm. The boiler plant in the current design can provide about 40 therms per hour of heat. If the average usage throughout the year was 25 therms per hour, the savings would be $16,615. This is just for Wrap 1A, as more buildings and swimming pools are integrated into the system, the savings will grow quite substantially from there. In addition to savings on the rates, Avalon could potentially lock in rates with a fixed price long term contract. Any such contract would have to be approved by the PUCN.

Electric savings – Avalon delivers its hot water at pressure. Therefore, you can expect savings on your pumping load. The exact savings here would depend on the final system design.

Capital Cost Increases: The two main sources of additional CapEx would be the underground water pipe connecting to Avalon's main and whatever coil design changes need to be integrated to accept lower hot water temperatures. There would also need to be either a manual or automated controls switch to toggle between the geothermal system and the natural gas backup.

Given the time sensitivity here, I'd like to try to set up a brief call this week with Ivan. Then I hope it's not long before you have all the information you need to make a decision. If that sounds good to you, I'll look out for a note regarding that call. If you have any questions or would like to hop on the phone to discuss this first, feel free to call me directly on my cell.

AMERICAN OVERSIGHT

Hi Joel,

It was a pleasure meeting you earlier today. Sounds like you have a lot of really exciting work going on and I hope we can find a way for Avalon to be involved. Following our meeting, I spoke with Chris and our engineer, Tim, in a bit more detail on what a construction schedule of our pipeline extension might look like. They both seemed to think it'd take us around 3-4 months to do the work and probably a similar amount of time for the permitting and approvals. I found that encouraging given the timeline you mentioned for the 1A building.

Per our discussion, I've attached a copy of the slides from today to this email. I realize I didn't include the current rates on there. Our current rates are pegged at 82.5% of Sierra Pacific's natural gas rate. If you were interested in some sort of fixed price deal, that could certainly be part of the conversation.

I'll keep a lookout for the Dropbox link with the drawings package. Once you send that over, I'll get to work with our engineer and Q&D on a high level assessment of what would be involved in hooking up to our system.

Thanks,

Matt Rosenfeld

This is impacting on the planning for the region and the state. Our demographer is out of touch and the position should just be eliminated (like many other states) as the census data is much more accurate and it would give the local governments better data to work with as they are required to use the inaccurate demographer's numbers.

Thanks

Washington, D.C. 20250

APR 25 2018

The Honorable Andrew Mack
Commissioner
Department of Natural Resources
550 West 7th
Suite 1400
Anchorage, Alaska 99501

Dear Commissioner Mack:

Thank you for your letter of January 19, 2018, regarding the request from the State of Alaska to consider a petition for rulemaking on the applicability of the 2001 Roadless Rule to the Tongass National Forest. I apologize for the delayed response.

Thank you for including the petition and the exhibits illustrating the history of the exemption and ensuing legal challenges. We share your interest in exploring options to help create jobs and prosperity for rural communities in Southeast Alaska, and the forest-products sector has long been part of this economy. We want to ensure that we continue to contribute to the health of the rural economy in Alaska by investing in the sustainability, health, and productivity of our National Forest.

We look forward to working with you in the future to explore and discuss the petition and the options to address application of the 2001 Roadless Rule on the Tongass National Forest. Additionally, Interim Chief Victoria Christiansen is reviewing your concerns regarding the 2016 Tongass Forest Plan and is working to address them.

Again, thank you for writing. If you have any further questions, please have a member of your staff contact the Office of External and Intergovernmental Affairs at (202) 720–7095.

Sincerely,

Sonny Perdue

The Editors

FS may – or may not – exempt Tongass from roadless rule

The Department of Agriculture April 25 did not outright promise to act on a State of Alaska's request to write a new regulation exempting the Tongass National Forest from a 2001 roadless area rule.

But Secretary of Agriculture Sonny Perdue did agree to examine the petition. "We look forward to working with you in the future to explore and discuss the petition and the options to address application of the 2001 Roadless Rule on the Tongass National Forest," he wrote the state in a letter obtained by *PLN.*

Alaska Gov. Bill Walker (I-Alaska) on January 19 petitioned Perdue to exempt the state from the roadless rule to give Alaskans access to the Tongass for a host of reasons. "We see this as one of many significant opportunities to work with you to support a diverse and robust forest products sector in Southeast Alaska," Walker wrote in a 235-page petition.

The State of Alaska Congressional delegation has been campaigning for 15 years to exempt the Tongass from the roadless rule. The Clinton administration's Jan. 12,

2001, roadless regulation limits road building and other activities on 58.5 million acres of national forest.

Under President George W. Bush the Forest Service in 2003 posted a separate rule exempting the 17 million-acre Tongass National Forest (not all of it roadless) from the Clinton rule. But in 2005 the U.S. Supreme Court left in place an appeals court decision that denied the exemption for the Tongass.

Senate Energy Committee Chairman Lisa Murkowski (R-Alaska) this winter came within a whisker of persuading Congress to exempt the Tongass from the roadless area rule. She included in a draft fiscal year 2018 pubic lands appropriations bill on Nov. 20, 2017, a provision that would exempt the Tongass and the 5.4 million-acre Chugach National Forest from the Clinton rule. A House-Senate conference committee killed the provision in March.

Murkowski's amendment was one sentence long: "The Roadless Area Conservation Rule established under part 294 of title 36, Code of Federal Regulations (or successor regulations), shall not apply with respect to any National Forest System land in the State of Alaska."

At an April 24 Senate Energy Committee hearing on the Forest Service's fiscal year 2019 budget Murkowski again made her case for exempting the Tongass from the roadless rule.

She told Forest Service Acting Chief Vicki Christiansen, "As I have said many times before, the Roadless Rule has never made sense in the Tongass, a forest made up of 32 island communities. In my mind, more access starts with restoring the Roadless exemption in the Tongass, and you have a state petition that asks you to do just that. We hear a lot of talk about keeping public lands accessible to the public, but in Alaska, that's often very different from the public's experience."

Christiansen responded, "We are working very closely with the State of Alaska to look at all of the options to address the Roadless issues. A response is being submitted in the matter of a day from Secretary Perdue back to the State of Alaska. We want to look for success in how we can assure southeast Alaska citizens have the needs met as you identified, and we will support the state in numerous ways on those various options."

The response Christiansen mentioned is contained in Perdue's April 25 letter.

Although Christiansen and Perdue said they would cooperate with the state, neither said outright the Forest Service would attempt to provide a total exemption to the Tongass from the roadless rule.

In its petition to Perdue the State of Alaska argued that, for the purposes of a Tongass exemption rule, it is immaterial that the courts have rejected such an exemption in the past. The state said it is just good policy to approve the exemption.

"Rationales for exempting the Tongass from the Roadless Rule in a new USDA rulemaking are not entirely equivalent to Alaska's legal claims and arguments challenging the Roadless Rule in federal court," the state said. "The most important difference is that USDA can enact or change policy via a rulemaking whether such action is legally mandated or just good policy as determined by the agency."

Perdue in a brief four-paragraph letter told Alaska Department of Natural Resources Commissioner Andrew Mack, "We share your interest in exploring options to help create jobs and prosperity for rural communities in Southeast Alaska, and the forest-products sector has long been part of this economy."

Environmentalists who have contested the Tongass exemption from the beginning did not let the Alaska petition go uncontested. They wrote Perdue April 10 and argued that the Clinton rule does allow access to the Tongass, except for a couple of uses.

A letter signed by dozens of national and state environmental groups said, "The petition ignores the fact that USDA narrowly tailored the Roadless Rule to limit only two activities in roadless areas, road construction/reconstruction and logging, because those activities pose the greatest likelihood of irretrievably altering and fragmenting roadless landscapes. The petition also ignores the Rule's series of established exceptions that 'honor existing law or address social or economic concerns.'"

Tongass land management plan: At the April 24 Senate committee hearing Murkowski paired the roadless rule dispute with a complaint that an Obama administration Tongass land management plan deprives timber companies of wood.

On Dec. 9, 2016, the Forest Service approved a plan to transfer Tongass National Forest timber sales to younger trees. Murkowski argued then and argues now that the service should complete an ongoing inventory of young growth before implementing the plan.

Indeed in the fiscal 2018 appropriations law (PL 115-141 of March 23) Murkowski successfully persuaded Congress to stay implementation of the Obama plan until the inventory was completed. "Until the Service has determined, based on a completed stand-level inventory, the timing and supply of economic young growth needed for a successful final transition and whether the 2016 Forest Plan should be amended or revised, the Service is directed not to implement a final transition away from its Tongass old growth timber program to a program based primarily on young growth," the law says.

At the April 24 Senate committee hearing Murkowski also pressed Christiansen to revise the management plan. "So we are working now top to put together the most effective method to get those fixes in an amendment while we look at other options for potentially addressing the transition period when the inventory is completed at the end of the summer," she said.

Christiansen said the Forest Service was working on the fixes and hoped to complete the inventory of young growth by the end of the summer.

BLM begins ANWR scoping despite fierce green attacks

In the face of a barrage of criticism from Democrats and environmentalists, BLM April 20 officially took the first step toward an initial oil and gas lease sale in the Arctic National Wildlife Refuge (ANWR).

BLM announced it will accept public advice through June 20 on environmental documentation of the lease sale of at least 400,000 acres. Although the law authorizing leasing (PL 115-97 of Dec. 22, 2017) calls for an initial sale within four years, Democratic critics anticipate BLM will hold the sale next year.

Exactly what sort of leasing EIS BLM prepares is an open and important issue. That's because PL 115-97 sort of fudged the question. The law implies that the environmental review should follow standards put down by the National Petroleum Reserve Act.

It says, "Except as otherwise provided in this section, the Secretary shall manage the oil and gas program on the Coastal Plain *in a manner similar to* the administration of lease sales under the Naval Petroleum Reserves Production Act of 1976 (42 U.S.C. 6501 et seq.) (including regulations)." Our emphasis.

Thus, in its Federal Register scoping notice BLM says, "In accordance with Section 20001 of the Tax Cuts and Jobs Act of 2017 (PL 115-97), and the National Environmental Policy Act of 1969, as amended, and *in a manner similar to* the administration of lease sales under the Naval Petroleum Reserves Production Act of 1976, as amended, (BLM) intends to prepare a Leasing (EIS)." Again, our emphasis.

That appears to give BLM some leeway in what it puts into an EIS.

Environmentalists strongly hinted at a lawsuit. "The Trump Administration's frantic scramble to sell oil leases in the coastal plain of the Arctic National Wildlife Refuge is a direct threat to the traditional lifestyle of the Gwich'in people and an assault on the wildlife and habitat of America's greatest intact natural heritage," said Dr. David Raskin, president of the Friends of Alaska National Wildlife Refuges. "It is a violation of the laws and requirements for management of this iconic refuge that belongs to every American, not just the oil industry and their political supporters."

Eight House Democrats led by Raúl M. Grijalva (D-Ariz.), the ranking member

of the House Natural Resources Committee, objected to the speed with which BLM is preparing the sale.

"We remain staunchly opposed to oil and gas activities on the Coastal Plain, and believe that inclusion of the Arctic Refuge leasing provision in H.R. 1 behind closed doors was improper and contrary to the majority sentiment in Congress and among the American people regarding leasing and drilling in the Refuge," they wrote Secretary of Interior Ryan Zinke April 19. "Attempting to rush the leasing process, as DoI is doing, is unnecessary, inappropriate, and likely to result in serious harm to one of our nation's last remaining truly wild areas."

By "behind closed doors" the Democrats were referring to a House-Senate conference committee in December on the big tax law to which ANWR leasing was attached.

For all the complaints of the critics the Alaska Congressional delegation and Gov. Bill Walker (I-Alaska) are solidly behind the leasing plan.

The delegation – Senate Energy Committee Chairman Lisa Murkowski (R-Alaska), Sen. Dan Sullivan (R-Alaska) and Rep. Don Young (R-Alaska) - put out a joint statement endorsing BLM's action. "We welcome this scoping announcement and the Department's continued work to implement our legislation opening the Coastal Plain to responsible energy development," the delegation said.

Walker put out his own statement, saying the state was on board. "This is an important priority for my administration given the potential for significant new revenues from lease sales and production," he said. "The State of Alaska will work with the U.S. Department of Interior to support their efforts to prepare for these lease sales and ensure that local input is taken into consideration."

The law anticipates raising just over $900 million from two lease sales – one within four years of at least 400,000 acres from the 1.5 million-acre coastal plain and the other within seven years. An Interior Department Royalty Advisory Committee has recommended an accelerated schedule for the initial sale.

Advocates for leasing in the coastal plain - the State of Alaska, the Trump administration and the Alaska Congressional delegation – may have suffered a setback in January when the International Energy Agency ran up a caution flag. The agency told the Senate Energy Committee that Murkowski chairs that, given existing markets, production probably wouldn't be likely until the year 2030. Again, the legislation authorizes two lease sales, one within four years (by 2022) and one within seven years (by 2025).

In its analysis of the legislation authorizing leasing the Congressional Budget Office estimated receipts of $900 million over the 2018-2027 period, well short of the period when the International Energy Agency projects production will begin in earnest.

The liberal/progressive group Center for American Progress has done its own analysis, and anticipates minimal returns from a sale. The group said it estimates "that offering oil and gas leases in the Arctic Refuge is likely to yield no more than $37.5 million in revenue for the U.S. Treasury over the next 10 years — far short of the $1 billion to $1.8 billion that drilling proponents claim could be raised."

Pro-development forces received a boost on Dec. 23, 2017, when the U.S. Geological Survey (USGS) increased its estimate of onshore oil reserves on the North Slope of Alaska from 1.5 billion barrels in 2010 to 8.7 billion barrels. In the report USGS based the increase on new oil discoveries in and near the National Petroleum Reserve Alaska that is close to the coastal plain of ANWR. The USGS report is available here: https://pubs.er.usgs.gov/publication/fs20173088.

BLM said that it would hold environmental scoping hearings in Alaska in Anchorage, Arctic Village, Fairbanks, Kaktovik and Utqiagvik. Public comments may be submitted by e-mail to blm_ak_coastalplain_EIS@blm.gov, at the BLM website www.blm.gov/alaska/coastal-plain-eis or by mail to BLM, Alaska State Office, Attention—Coastal Plain EIS, 222 West 7th Avenue, #13, Anchorage, AK 99513–7599.

Subject: RE: Sierra Summit - Revised Bond Documents -- NGO Comments

Ladies and Gentlemen,

Our comments on the Bond documents are attached. For the provision of the Reg Agreement which governs a proposed transfer of the Project, we'd suggest the following language. This language has been used in Regulatory Agreements on over the past 10 years or more on many financings in the western US and elsewhere. Please note that Cox Castle, as outside co counsel to the Borrower, will have further comments on this language and possibly other comments on the Bond Docs, but we wanted to get these basic comments around for the group's review. Thanks. Wade Norris

Transfer of the Project

. For the Compliance Period, the Owner shall not Transfer the Project, in whole or in part, without the prior written consent of the Issuer, which consent shall not be unreasonably withheld or delayed if the following conditions are satisfied: (A) the receipt by the Issuer of evidence acceptable to the Issuer that (1) the Owner shall not be in default hereunder or under the Loan Agreement, if in effect (which may be evidenced by a Certificate of Continuing Program Compliance), or the transferee undertakes to cure any defaults of the Owner to the reasonable satisfaction of the Issuer; (2) the continued operation of the Project shall comply with the provisions of this Regulatory Agreement; (3) either (a) the transferee or its Manager has at least three years' experience in the ownership, operation and management of similar size rental housing projects, and at least one year's experience in the ownership, operation and management of rental housing projects containing below-market-rate units, without any record of material violations of discrimination restrictions or other state or federal laws or regulations or local governmental requirements applicable to such projects, or (b) the transferee agrees to retain a Manager with the experience and record described in subclause (a) above, or (c) the transferring Owner or its management company will continue to manage the Project, or another management company reasonably acceptable to the Issuer will manage, for at least one year following such Transfer and, if applicable, during such period the transferring Owner or its management company will provide training to the transferee and its manager in the responsibilities relating to the Low Income Units; and (4) the person or entity that is to acquire the Project does not have pending against it, and does not have a history of significant and material building code violations or complaints concerning the maintenance, upkeep, operation, and regulatory agreement compliance of any of its projects as identified by any local, state or federal regulatory agencies; (B) the execution by the transferee of any document reasonably requested by the Issuer with respect to the assumption of the Owner's obligations under this Regulatory Agreement and the Loan Agreement (if then in effect), including without limitation an instrument of assumption hereof and thereof, and delivery to the Issuer of an opinion of such transferee's counsel to the effect that each such document and this Regulatory Agreement are valid, binding and enforceable obligations of such transferee, subject to bankruptcy and other standard limitations affecting creditor's rights; (C) receipt by the Issuer and the Trustee of an opinion of Bond Counsel to the effect that any such Transfer will not adversely affect the Tax-Exempt status of interest on the Bonds; and (D) receipt by the Issuer of all fees and/or expenses then currently due and payable to the Issuer by the Owner.

It is hereby expressly stipulated and agreed that any Transfer of the Project in violation of this Section 12 shall be null, void and without effect, shall cause a reversion of title to the Owner, and shall be ineffective to relieve the Owner of its obligations under this Regulatory Agreement. The written consent of the Issuer to any Transfer of the Project shall constitute conclusive evidence that the Transfer is not in violation of this Section 12. Nothing in this Section shall affect any provision of any other document or instrument between the Owner and any other party which requires the Owner to satisfy certain conditions or obtain the prior written consent of such other party in order to Transfer the Project. Upon any Transfer that complies with this Regulatory

AMERICAN OVERSIGHT

Agreement, the Owner shall be fully released from its obligations hereunder to the extent such obligations have been fully assumed in writing by the transferee of the Project.

The foregoing notwithstanding, the Project may be transferred pursuant to a foreclosure, exercise of power of sale or deed in lieu of foreclosure or comparable conversion under the Deed of Trust without the consent of the Issuer or compliance with the provisions of this Section 12. The Issuer hereby approves the transfer of limited partnership interests in the Owner to affiliates of the investor limited partner of the Owner, including, without limitation, the transfer of partnership interests in the Owner from the investor limited partner and non-managing [membership/partnership] interests in the limited partner of Owner.

For the Compliance Period, the Owner shall not: (1) encumber any of the Project or grant commercial leases of any part thereof, or permit the conveyance, transfer or encumbrance of any part of the Project, except for (A) Permitted Encumbrances, or (B) a Transfer in accordance with the terms of this Regulatory Agreement, in each case upon receipt by the Issuer and the Trustee of an opinion of Bond Counsel to the effect that such action will not adversely affect the Tax-Exempt status of interest on the Bonds (provided that such opinion will not be required with respect to any encumbrance, lease or transfer relating to a commercial operation or ancillary facility that will be available for tenant use and is customary to the operation of multifamily housing developments similar to the Project); (2) demolish any part of the Project or substantially subtract from any real or personal property of the Project, except to the extent that what is demolished or removed is replaced with comparable property or such demolition or removal is otherwise permitted by the Loan Agreement or the Deed of Trust; or (3) permit the use of the dwelling accommodations of the Project for any purpose except rental residences.

"*Investment Securities*" means any of the following obligations or securities:

(a) Government Obligations;

(b) bonds, notes or other obligations rated in one of the two highest investment grade ratings available from Moody's or S&P;

(c) commercial paper with a rating of P-1 from Moody's or A-1 from S&P;

(d) certificates of deposit or time deposits to the extent insured by the Federal Deposit Insurance Corporation;

(e) repurchase agreements with a term not greater than thirty (30) days which are fully secured by obligations of the type specified in (a) above with banks or financial institutions rated in one of the two highest investment grade ratings available from Moody's or S&P; and

(f) money market mutual funds, including those for which the Trustee or any Affiliate receives compensation with respect to such investment, which are either (i) rated in the highest rating category by a Nationally Recognized Rating Agency or (ii) comprised in their entirety of Government Obligations; and

(g) any investment approved by the Bondholder Representative~~;provided, that, in addition to the foregoing limitations, any investment of proceeds of the Bonds in mortgage obligations on single family dwellings purchased from a state or federally chartered bank or savings and loan association pursuant to a repurchase agreement under which the bank or savings and loan association will repurchase the mortgage obligation on or before a specified date and for a specified amount, shall be insured by a mortgage insurance company licensed to insure mortgages in the State of Nevada and qualified to provide insurance on mortgages purchased by the Federal Home Loan Mortgage Corporation or the Federal National Mortgage Association~~.

Does this trigger a federally guaranteed prohibition. ? Delete? I think we agreed it is not needed.

"*Investor Letter*" means an Investor Letter executed by any Approved Institutional Buyer substantially in the form attached to this Indenture as Exhibit C.

"*Issuer*" means Nevada Housing Division, a division of the Department of Business and Industry of the State.

"*Loan*" means the loan made by the Issuer to the Borrower pursuant to the Loan Agreement for the purpose of providing funds to the Borrower to finance the acquisition, construction and equipping of the Project.

"*Loan Agreement*" means the Loan Agreement, dated as of _____ 1, 2017, between the Issuer and the Borrower, providing for the funding of the Loan, as amended, restated and/or supplemented from time to time.

(i) The Master Lease or the grant of a leasehold interest in a part of the Project of three years or less (or such longer lease term as the Issuer may permit by prior written approval) not containing an option to purchase;

(ii) sales or transfers of fixtures or any personal property in connection with the weatherization, preservation or maintenance of the Project pursuant to: (A) paragraph (e) of Section 6 of this Regulatory Agreement, or (B) the preservation and maintenance provisions of the Loan Agreement or the Deed of Trust; or

(iii) transfers by devise or descent or by operation of law upon the death of a joint tenant or a partner of the Borrower; provided however, that the delivery of evidence and opinions pursuant to paragraph (a) of this Section 12 shall be required in connection with transfers under this sub-paragraph (iii) of this paragraph (c).

(d) [The Borrower hereby covenants and agrees that~~, except as provided below in paragraph (e) of this Section 12,~~ any sale or other transfer of the ~~partnership~~entities constituting the Borrower or any change in ~~a general partner or investor limited partner~~the ownership of such entities of the Borrower shall be subject to the prior written consent of the Issuer.]

~~(e) The Investor Limited Partner's interests of the Borrower shall also be transferable with the prior written consent of the Issuer (which consent shall not be unreasonably withheld) to any entity whose long-term debt obligations are rated "A-" or higher by Standard and Poor's or "A3" or higher by Moody's Investors Service (a "Corporate Investor"). Transfer of Investor Limited Partner's interests in the Borrower to any other person or entity shall be subject to the prior written consent of the Issuer in its reasonable discretion. Amendments to the Borrower's Limited Partnership Agreement may be executed in connection with any such transfers permitted under this paragraph (e) of this Section 12 without the approval of the Issuer, provided that such amendment does not materially change the Borrower Limited Partnership Agreement except to the extent necessary to effect such transfer.~~

~~Notwithstanding anything to the contrary contained hereby, the Borrower's Investor Limited Partner shall be permitted to remove a general partner thereof for cause in accordance with the Borrower Limited Partnership Agreement without the consent of the Issuer so long as, concurrently therewith, the replacement general partner is approved by the Issuer. If the Investor Limited Partner of the Borrower exercises its right to remove a general partner thereof, the Issuer shall not unreasonably withhold its consent if the substitute general partner is a Corporate Investor, and the Issuer's consent shall not be required if the Investor Limited Partner or an entity that controls, is controlled by or is under common control with the Investor Limited Partner, is the substitute general partner. The prior written consent of the Issuer in its reasonable discretion shall be required if any other person or entity is the substitute general partner. Any request for the Issuer's consent to a removal and substitution shall be promptly given to the Issuer and a copy of any amendment to the Borrower Limited Partnership Agreement shall be promptly submitted to the Issuer.~~

Upon written request of the Borrower to the Issuer, the Issuer may waive the foregoing restrictions in its sole and absolute discretion.

Subject: Sierra Summit Club (Inova)

Jacob,

This email is in response to a request for information on the administration of tax exemptions for low income housing projects in Washoe County. Our interpretation, and therefore application, is a three part test as follows:

1. The property must have been funded in part by federal money appropriated pursuant to 42 USC §§ 12701 et seq. for the year that the exemption is applied. (NRS 361.082[1])
2. Only the portion of the property that is rent & income restricted is eligible for the exemption. (NRS 361.082[2])
3. Of that portion, the units must meet either the 20-50 test or the 40-60 test as described in NAC 361.089(9)(a) and (b).

If all three tests are met, all rent & income restricted units on that property would qualify for the tax exemption.

Please let me know if I can be of further assistance.

Sincerely,

Subject: WH Invite: Opportunity Zones

Gov has been invited to a small event at the WH with POTUS on WEDNESDAY at 215p re: opportunity zones.

OZ was a program created by tax reform to allow govs to designate census tracts in their states for private investment in affordable housing and other similar projects. I know CJ has been working on it - copying Tyler who has been talking with her about it.

WH knows it's short notice and he'd need to be on a plane tomorrow eve at the latest to make it work. LMK.

AMERICAN OVERSIGHT

- Commercial lending
- Multifamily lending
- Small business lending
- Socioeconomic change
- Concentration of jobs

Summary:

The Tax Cuts and Jobs Act of 2017 established an Opportunity Zone tax incentive, which allows taxpayers to defer paying federal tax on capital gains from the sale of property if those gains are invested in Qualified Opportunity Funds that invest 90% of their assets in businesses located or property used in a designated low-income community. Investors receive modest reductions in their eventual tax bill if they maintain their Opportunity Fund investments for at least five and then seven years. Investors that hold capital in those funds for a full ten years also do not have to pay capital gains tax on the appreciation of their Opportunity Zone investments.

GOVERNOR SANDOVAL NOMINATES 61 OPPORTUNITY ZONES

CARSON CITY, NV – Governor Brian Sandoval today nominated 61 opportunity zones, pursuant to the Tax Cuts and Jobs Act of 2017, which established an Opportunity Zone tax incentive, designed to encourage long-term private investment in low-income communities.

"During my time as Governor, we have invested significant resources in Nevada," Governor Brian Sandoval said. "While we have seen substantial returns, there are still parts of our state that need additional assistance. It is my hope that by nominating these 61 low-income opportunity zones, private investors will choose to fund projects in these areas that benefit the Nevadans who need it most. What's more, we believe that communities surrounding the 61 opportunity zones will also benefit from investment in the zones."

The 61 opportunity zone nominations directly impact more than 230,000 Nevadans in some of Nevada's most disadvantaged communities.

In the 61 tracts:
Average family income is approximately $37,000

AMERICAN OVERSIGHT

(Just 60% of median statewide family income of approximately $62,500)
Average unemployment rate from 2011-2015 is16%
Nearly 2x greater than the national unemployment rate

The Opportunity Zone program runs on essentially two tracks – first, Governors in each state nominate opportunity zones, which are low-income community census tracts that could benefit from significant private investment. Second, once the zones are certified by the U.S. Treasury Department, interested private investors must invest in opportunity funds, specialized vehicles that can then be utilized to invest in the certified opportunity zones.

> Census Tract 32029970200 meets the qualifications established by H.R. 1 SEC. 1400Z(e) as a census tract contiguous with a low-income community. First, Census tract 32029970200 is contiguous with Census Tract 32019960201, a low-income community that is being submitted for designation as an Opportunity Zone. Second, the attached 2012-2016 American Community Survey demonstrates that the median family income of tract 32029970200 does not exceed 125 percent of the median family income of low-income community tract 32019960201. I nominate census tract 32029970200 as a qualified opportunity zone; my office stands ready to answer any questions or provide additional supporting information upon request. In the event that you do not designate this tract, I reserve my right to provide a substitute tract in its place.

2. PUBLIC COMMENT

Mr. Brian Wilcox, Chief Information Security Officer (CISO), BlackRidge Technology (BlackRidge), provided public comment in Carson City. Mr. Wilcox advised he was the former CISO for the State of Nevada prior to joining Blackridge, a military grade cyber defense security company headquartered in Reno, Nevada. Mr. Wilcox noted his previous role had awarded him a unique vantage point to understanding the strengths, weaknesses, threats, and opportunities of the state's cyber defenses. Mr. Wilcox advised he'd come in front of the Board as an extension of his public trust obligation fostered while in official capacity with the state. Mr. Wilcox noted BlackRidge was unique in providing a solution that forever changed safe internet communications. Transport Access Control (TAC), the primary of seven patents held by BlackRidge, acts as the liaison between the chaos of the internet and organizational networks, preventing unapproved traffic from being initiated. The solution authenticates every connection on the first packet of data, resulting in an immediate reduction in malicious, unwanted traffic that poses the bulk of cyber threats. Mr. Wilcox would continue informing Nevada's state entities that the next generation of cyber defenses had arrived and BlackRidge would be managing efforts through the Nevada Office of Cyber Defense Coordination.

AMERICAN OVERSIGHT

Mr. Jared Smith, Chief Operating Officer, Las Vegas Global Economic Alliance (LVGEA) provided public comment from Las Vegas. Mr. Smith noted the May 17 meeting agenda comprised the most projects LVGEA had ever represented at a GOED Board meeting. Mr. Smith commended the companies, Nevada's Economic Development infrastructure staff, and the state's incentive and abatement programs.

3. GOVERNOR SANDOVAL'S COMMENTS

Governor Brian Sandoval opened the meeting and welcomed new Nevada Governor's Office of Economic Development (GOED) Board member Mr. Adam Kramer, Executive Vice President of Strategy, Switch, Inc. Mr. Kramer thanked Governor Sandoval and noted he was greatly appreciative for the opportunity to serve on the Board.

Governor Sandoval noted the meeting's robust agenda and thanked the GOED Board, Regional Development Authorities, local governments, and Nevada's institutions of higher learning for their work with companies considering Nevada for relocation or expansion.

4. APPROVAL OF THE MARCH 15, 2018 BOARD MEETING MINUTES

A MOTION WAS MADE BY MR. DAN KLAICH TO APPROVE THE MARCH 15, 2018 MEETING MINUTES; THIS MOTION WAS SECONDED BY MR. KRAMER. THE MOTION PASSED UNANIMOUSLY.

5. ABATEMENT APPLICATIONS FOR BOARD APPROVAL:

A. ADVANCED TECHNOLOGIES MANAGEMENT, INC. DBA PICTOGRAPHICS

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Perry Ursem, Vice President of Business Retention and Expansion, LVGEA presented Advanced Technologies Management, Inc. dba Pictographics (Pictographics), and provided a brief overview of the company and abatements sought. Pictographics is an industry leader in print technology, utilizing the latest hardware to deliver the highest quality products. The company produced graphics for events, trade shows, interior design, and architectural installations and is was a manufacturer for strategic partners. The expansion would add 27 new jobs, producing an average hourly wage of $27.35, and capital investment projections of $17.6m. Mr. Ursem was joined by Mr. Craig Miller, President and Chief Executive Officer, Pictograhics.

Mr. Miller advised Pictographics planned to expand its existing southern Nevada manufacturing facility in conjunction with leasing or purchasing a second facility. The company started as a family-run, suburban home-based, credit-card-financed business and evolved into a 'world class' company. The company has been the principal graphics provider for the Fiesta Bowl, BCS

AMERICAN OVERSIGHT

National Championship, NBA All Star Games, and for key exhibitors at the Consumer Electronics Show (CES) including Intel, Nokia, and LG Electronics. Pictographics continued to expand its market by becoming a total solution provider and by partnering with other solutions companies. Mr. Miller noted the company was currently forming an alliance with Hewlett-Packard (HP) to become a manufacturing center for 3D printing. Pictographics had been named the beta site for HP's new 580 color printer and the beta site for Mimaki USA's 3DUJ-553 photorealistic 3D printer.

Lieutenant Governor Mark Hutchison asked whether the company's technology was intellectual property (IP) protected. Mr. Miller confirmed Pictographics had several patents and initial access to certain products and technologies. To support this the company had teamed up with high schools, and the university system, to develop the talent pipeline required for the progressive additive manufacturing sector. Additionally, the company planned to grow its intern program to offer internships to UNLV undergraduate and graduate students. Mr. Miller highlighted the University of Las Vegas' (UNLV) engineering program and noted the company had excellent experiences working with Mr. Rama Venkat, Dean, UNLV Howard R. Hughes College of Engineering.

A MOTION WAS MADE BY MR. KLAICH TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, MODIFIED BUSINESS TAX ABATEMENT, AND PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5A. THIS MOTION WAS SECONDED BY SECRETARY OF STATE BARBARA CEGAVSKE. THE MOTION PASSED UNANIMOUSLY.

B. AXION CORPORATION

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Stan Thomas, Executive Vice President, Economic Development Authority of Western Nevada (EDAWN), presented Axion Corporation and provided a brief overview of the company and abatements sought. Axion Corporation is a provider of satellite-based entertainment services for the consumer and commercial markets. Axion Corporation is considering establishing a facility in Reno, NV. The northern Nevada facility would house the company's engineering, manufacturing, distribution, headquarters, and satellite support services. The company planned to invest over $27m in capital equipment and anticipated hiring 205 employees with an average wage over $40.00 an hour. Mr. Thomas was joined by Mr. Thomas Wendt, Chief Executive Officer, Axion Corporation

Mr. Wendt advised Axion Corporation provided advanced satellite technologies and services that enabled consumer and residential access to a new generation of high throughput satellites. Axion Corporation would initially deliver products in the United States however the first satellite's coverage would include North America, Mexico, Latin America, the Caribbean. The company's initial target market was the 14 million households in the United States currently with little or no

AMERICAN OVERSIGHT

access to residential broadband services. The economic incentives and dynamic business climate were important reasons Axion Corporation had reviewed as a Nevada location.
Governor Sandoval inquired whether the company's service would be accessible in rural Nevada. Mr. Wendt confirmed this was accurate and advised the first three spot beams to be launched would be in northern Nevada. Thus, providing broadband capabilities to any citizen in the State of Nevada.

Governor Sandoval inquired about the specific skill sets sought in employees. Mr. Wendt advised approximately half of the company's employees would be required to have engineering skillsets. However, the company would also be seeking to fill roles in manufacturing, distribution, IT, business development, and corporate headquarter positions.

Governor Sandoval inquired whether the company planned to work with Nevada learning institutions for recruitment purposes. Mr. Wendt noted the company anticipated collaborating with the University of Reno (UNR) and UNLV for hiring and employment program purposes.

Secretary of State Cegavske inquired whether the company also planned to reach out to community colleges. Mr. Wendt advised EDAWN had connected the company with local community colleges and Axion Corporation was exploring the opportunity to develop a 12-week training process.

A MOTION WAS MADE BY LIEUTENANT GOVERNOR HUTCHISON TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5B. THIS MOTION WAS SECONDED BY DR. WELDON HAVINS. THE MOTION PASSED UNANIMOUSLY.

C. CAREMARK, LLC
- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

D. CAREMARK, LLC
- **CATALYST FUND**

Governor Sandoval advised Agenda Items 5C and 5D would be heard together.

Mr. Michael Walsh, Vice President of Economic Development, LVGEA, presented Caremark, LLC, and provided a brief overview of the company and abatements sought. Caremark, LLC, operates as a subsidiary of the American retail and health care company CVS Health (CVS). CVS is a Fortune 10 company and is presently the largest pharmacy chain in the United States in terms of number of locations and total prescription revenues. Caremark, LLC offers prescription benefits management services in the United States. The company designs and fulfills prescription drug benefit plans. The company offers prescription benefit services, including local retail pharmacy and home delivery options; specialty pharmacy services, such as pharmaceuticals and other therapeutic services for participants with chronic or genetic disorders; and care patterns

AMERICAN OVERSIGHT

disease management programs, which provide participant care for complex conditions. Caremark, LLC anticipates hiring 102 new employees in the first 24 months of operations, with an average hourly wage of $25.73. The company anticipated making a capital investment of $5m in equipment. Mr. Walsh thanked Mr. Gustavo Perez, Senior Manager - Indirect Tax, Ernst & Young for bringing this opportunity to the State of Nevada. Mr. Walsh was joined by Mr. Dan Klein, Director of Engineering, Caremark, LLC.

Mr. Klein advised CVS/Caremark, LLC had recently been focused on the creation of a prescription management service center that would provide innovative tools and strategies to help improve clinical outcomes for client plan members while assisting them in managing pharmacy overall health care costs. The company was seeking the most operationally efficient and cost-effective location to accommodate its business needs as the company was planning for large capital and hiring commitments. Mr. Klein highlighted the company's commitment to community engagement and corporate citizenship via event sponsorship, volunteerism, and disaster relief. The company is also committed to leveraging local universities to increase high-paying positions in the pharmaceutical sector, which in turn would drive industry growth. Mr. Klein noted the opportunity for partnerships and collaborations with UNLV, the College of Southern Nevada (CSN), and other southern Nevada institutions.

Governor Sandoval requested additional information on the role of a prescription management service. Mr. Klein advised the center would be staffed with employees versed in handling high-touch patient counseling, coaching, and therapy management. In the specialty pharmacy business there was a significant volume of high-touch patients requiring nursing, pharmacist intervention, and additional specialized medical services. The services provided by the new facility would be focused nationally and delivered telephonically.

Governor Sandoval inquired about the specific skill sets sought in employees. Mr. Klein advised the company would primarily be seeking pharmacy technicians, pharmacists, and nurses.

Governor Sandoval asked about the company's next steps should it be awarded the abatements sought. Mr. Klein advised the company would make it final decision, on the location for its prescription management service center, within a week.

Governor Sandoval inquired whether Nevada's incentive packages were important in terms of the company's decision to locate in Nevada. Mr. Klein confirmed this was a critical factor in the company's decision-making process.

A MOTION WAS MADE BY MR. RAYMOND SPECHT TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5C, AND A CATALYST FUND GRANT IN AN AMOUNT NOT TO EXCEED $350,000, AS DESCRIBED IN AGENDA ITEM 5D. THIS MOTION WAS SECONDED BY MR. KRAMER. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

E. FORTRESS INNOVATIONS, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Ursem, LVGEA, presented Fortress Innovations, Inc. and provided a brief overview of the company and abatements sought. Fortress Innovations, Inc. is a vertically integrated company that manufactures and sells a proprietary structural wall system named the "1WallSystem™ which allows construction to be done faster, stronger, less-expensive and with the highest energy-efficiency and fire ratings in the market. The company also manufactures steel framing components, steel trusses and distributes a suite of proprietary insulation paints/coatings for commercial, industrial and domestic/residential use that significantly increase energy performance by deflecting over 98% of the sun's heat and ultraviolet rays and significantly reduces acoustic levels while providing a protective "skin" over the structure to protect it against the elements over a 25-year life-cycle. The project would include 30 new hires at an average hourly wage of $25.18, and a capital investment of approximately $5.6m. Mr. Ursem was joined by Mr. Dean Pardee, Chief Executive Officer, Fortress Innovations, Inc.

Mr. Pardee advised the Fortress Innovations, Inc. planned to build a 275,000-square-foot permanent manufacturing facility in southern Nevada. In order to commence production while its manufacturing plant was built, the company would lease 10,000 to 20,000 square feet in a Nevada location. Mr. Pardee noted the company was a US military veteran 1st hiring company and would actively participate in military support, environmental, affordable housing, homelessness, and animal therapy support initiatives.

Governor Sandoval asked if the company planned to do its own development or sell its projects to developers. Mr. Pardee advised the company planned to do both. The company was currently speaking with several large builders and companies directly involved with the residential and commercial construction industry in Nevada. There may be opportunity build a client base, or form joint ventures in addition to the company's own projects.

Mr. James Barrett inquired about the specific skill sets sought in employees. Mr. Pardee advised, from a framing standpoint, a team could be trained within 48 hours. The company had significantly simplified the building process to enable this. The Los Angeles Department of Building and Safety had stated it was the best technology seen in 30 years.

Mr. Specht asked about the company's employment projection of 180 new jobs created in five-years. Mr. Pardee advised there would be employment across all areas of the company including factory workers, field construction, developers, and construction managers.

A MOTION WAS MADE BY MR. BARRETT TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5E. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

F. FULCRUM SIERRA BIOFUELS, LLC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**
- **REAL PROPERTY TAX ABATEMENT**

Ms. Nancy McCormick, Senior Vice President of Retention and Expansion, EDAWN, presented Fulcrum Sierra Biofuels, LLC and provided a brief overview of the company and abatements sought. Fulcrum Sierra BioFuels, LLC (Fulcrum) is a wholly-owned subsidiary of Fulcrum BioEnergy, Inc (FBE). FBE was formed to develop a reliable and efficient process for converting municipal solid waste (MSW) into renewable transportation fuels. Fulcrum Sierra BioFuels, LLC's existing Feedstock Processing Facility in Storey County processes MSW-derived feedstock to be shredded and compacted for transport to the company's Biorefinery, where it would be converted into renewable transportation fuels, including jet fuel and diesel. The Biorefinery, also in Storey County, would produce transportation fuel that competed directly with high-priced fossil fuels, and was expected to have a lower cost, lower carbon, and lower emissions than traditional fossil fuel alternatives. Collectively the Feedstock Processing Facility and Biorefinery would convert approximately 175,000 tons per year of MSW, or household garbage, into approximately 10.5 million gallons per year (800 barrels per day) of renewable Syncrude that would be upgraded and processed into low-carbon transportation fuel products. The project would include an equipment investment of approximately $13.25m, and building costs exceeding $12.9m. The company would add 13 positions at an average hourly rate of $22.04. Ms. McCormick was joined by Ms. Jeanne Benedetti, Senior Director Project Development, Fulcrum Sierra Biofuels, LLC.

Ms. Benedetti advised Fulcrum planned to commence the Stage 2 expansion of its Feedstock Processing Facility located in Storey County, Nevada. This will include an additional 29,000 square-feet of building to accommodate the installation of additional processing equipment.

Governor Sandoval inquired whether the waste streams came directly to the company, or through a waste management organization. Ms. Benedetti advised, the trash went through the local waste management transfer station. When Fulcrum was ready to receive a trash shipment it turned on a green light at the front of its facility. The route trucks going past would turn into Fulcrum’s facility rather than continuing a quarter mile to the scale house.

Governor Sandoval asked whether the company’s process could make landfills obsolete. Ms. Benedetti noted the company could not accept trash such as tires and mattresses, however the process contributed to a significant landfill reduction.

Mr. Klaich asked about the economics of this process. Ms. Benedetti advised Fulcrum’s product costs approximately one dollar a gallon to produce. As the feedstock was free the production costs were significantly less than those of fossil fuel.

A MOTION WAS MADE BY MR. KRAMER TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, A PERSONAL PROPERTY TAX ABATEMENT, AND A REAL PROPERTY

AMERICAN OVERSIGHT

ABATEMENT AS DESCRIBED IN AGENDA ITEM 5F. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

G. KRS GLOBAL BIOTECHNOLOGY, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

H. KRS GLOBAL BIOTECHNOLOGY, INC.

- **CATALYST FUND**

Governor Sandoval advised Agenda Items 5G and 5H would be heard together.

Mr. Walsh, LVGEA, presented KRS Global Biotechnology, Inc., and provided a brief overview of the company and abatements sought. KRS Global Biotechnology, Inc. makes custom pharmaceuticals; sterile products such as syringes and IV bags; purified water for drug manufacturing; and a kit used by hospitals and other compounding pharmacies to test their technicians. The company provides its services to patients, surgery centers, ophthalmology clinics, hospitals, universities, and veterinarians nationwide and is committed to being the top provider of these compounding services while developing quality processes that facilitate the highest level of safety for patients of parenteral, enteral, oral, and topical preparations. KRS Global Biotechnology, Inc. is a FDA registered medical device manufacturer and registered 'outsourcer of human drugs' under The Drug Quality and Security Act, a law designed to help protect consumers from exposure to pharmaceutical drugs that may be counterfeit, stolen, contaminated, or otherwise harmful. The project would involve the hire of 50 new employees in at an average hourly wage of $25.00 and a capital investment of $34.5m. Mr. Walsh was joined by Mr. Riccardo Roscetti, President and Chief Operating Officer, KRS Global Biotechnology, Inc.

Mr. Roscetti advised, as a result of the increased demand for the company's products and services, KRS Global Biotechnology, Inc. would be expanding capacity to provide additional manufacturing, research and development, and warehousing operations. The company is currently evaluating the construction of a licensed pharmaceutical manufacturing facility. The new facility would be 150,000 square foot of newly constructed space housing clean rooms, production lines, and warehousing.

Governor Sandoval asked about the roles to be filled at the company’s new facility. Mr. Roscetti advised there were various skill sets sought, one of these being technicians. The company had previously set up a technician training school, in Florida, for pharmacy tech certifications. Mr. Roscetti noted the company would seek opportunities to work with local colleges and universities to train the workforce for its new facility.

Governor Sandoval asked, assuming favorable consideration of its application, would the company be likely to select Nevada. Mr. Roscetti confirmed the company was committed to a Nevada location and noted the company had been attracted to Nevada for its well-trained

AMERICAN OVERSIGHT

workforce, attractive economic environment, and commitment to the biotechnology pharmaceutical space via the UNLV Medical School.

Lieutenant Governor Hutchison asked if UNLV's Medical School has been an integral factor in the company's decision to consider Nevada. Mr. Roscetti confirmed and advised generally, strong medical schools had the talent, production capabilities, and products sought by the company.

Lieutenant Governor Hutchison asked if the company had been in contact with the UNLV Medical School thus far. Mr. Roscetti advised the company planned to make contact regarding collaboration opportunities

A MOTION WAS MADE BY MR. BARRETT TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5G, AND A CATALYST FUND GRANT IN AN AMOUNT NOT TO EXCEED $640,000, AS DESCRIBED IN AGENDA ITEM 5H. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

I. POLARIS INDUSTIRES, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Andrew Haskin, Director of Business Development, Northern Nevada Development Authority (NNDA), presented Polaris Industries, Inc., and provided a brief overview of the company and abatements sought. Polaris Industries, Inc. designs, engineers, manufactures, and markets power sports vehicles worldwide. The company offers ORVs, including all-terrain vehicles and side-by-side vehicles for recreational and utility use; snowmobiles; motorcycles; and low emission, light duty hauling, passenger, commercial, and industrial vehicles, as well as snow bike conversion kit systems. Polaris Industries, Inc. also produces or supplies various replacement parts and accessories and manufactures, distributes, retails, and installs aftermarket parts and accessories for light trucks, jeeps, sport-utility vehicles, and other four-wheel drive vehicles. In addition, the company sells recreational apparel through a network of dealers and distributors, as well as online. The project would create 64 new jobs at an average hourly wage of $21.95 an hour with an approximate investment of $13.6m in capital equipment. Mr. Haskin was joined by Mr. Paul Eickhoff, Senior Director of Distribution, Polaris Industries, Inc.

Mr. Eickhoff advised Polaris Industries, Inc. was considering building a 500,000 square-foot facility in the Lyon County. The proposed project would establish the company's first western United States distribution center.

Governor Sandoval asked whether the company would seek a new or existing facility. Mr. Eickhoff advised the company would be seeking a green field, ground up build.

AMERICAN OVERSIGHT

Governor Sandoval asked, assuming favorable consideration of its application, would the company be likely to select Nevada. Mr. Eickhoff advised a decision was anticipated within the forthcoming few weeks.

Mr. Kramer noted the company's application listed the City of Fernley, as a potential location, and highlighted that the Mayor of Fernley was a committed partner in economic development, and would be a great local partner for the company.

A MOTION WAS MADE BY MR. KLAICH TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5H. THIS MOTION WAS SECONDED BY SECRETARY OF STATE CEGAVSKE. THE MOTION PASSED UNANIMOUSLY.

J. RITCHIE BROS. AUCTIONEERS (AMERICA), INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Ursem, LVGEA presented Ritchie Bros. Auctioneers (America) Inc. (RBA), and provided a brief overview of the company and abatements sought. RBA is the world's largest industrial auctioneer. The company is headquartered in Burnaby, Vancouver, and has 110 locations in 25 countries and 44 auction sites worldwide. RBA has been operating in the State of Nevada since October 29, 1997. The company operates across multiple sectors including transportation, agricultural, material handling, mining, forestry, petroleum, and marine industries. RBA sells, through unreserved public auctions, a broad range of used and unused industrial assets such as equipment, trucks and other assets utilized in the construction. The expansion would include 25 new jobs at an average hourly wage of $22.94 and project capital investment of $3m. Mr. Ursem thanked Ms. Gina Gavin, Director of Economic Development, City of North Las Vegas (NLV), NLV's Economic Development team, and Mayor John Lee for their letter support of RBA's application. Mr. Ursem was joined by Mr. Randy Berry, Senior Vice President of Digital Operations, RBA, and Mr. Connor Humphrey, Vice President, GovPlanet.

Mr. Berry advised the company planned to expand its southern Nevada operations to establish a 169,080 square-foot warehouse facility that would be used to manage the storage and distribution of equipment. The warehouse will be the central processing center in the region handling storage, logistics, inventory management, auction management, and delivery orders.

Governor Sandoval asked, assuming favorable consideration of its application, would the company be likely to expand in Nevada. Mr. Berry confirmed this was the case.

Governor Sandoval where the company new facility would be located. Mr. Humphrey confirmed the new facility would be located in NLV, close enough to leverage the company's existing auction site for certain asset types not requiring significant indoor storage and handling.

AMERICAN OVERSIGHT

Governor Sandoval asked about the company's hiring and recruitment plans. Mr. Berry advised the company would initially seek to fill key warehouse operations positions and would continue to hire warehouse staff as the company built out its operation. This would include supervisors, inventory management coordinators, merchandising, coordinators, receiving clerks, shipping clerks, and other support personnel.

Lieutenant Governor Hutchison inquired about the online aspect of the business. Mr. Berry noted the company had multiple online selling platforms including IronPlanet selling core heavy equipment, construction, and trucks, and GovPlanet which is focused on government assets.

Mr. Kramer abstained from the vote due to potential conflicts.

A MOTION WAS MADE BY DR. HAVINS TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5J. THIS MOTION WAS SECONDED BY MR. SPECHT. THE MOTION PASSED UNANIMOUSLY.

K. SEPHORA USA, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Walsh, LVGEA, presented Sephora USA, Inc. and provided a brief overview of the company and abatements sought. Sephora USA, Inc. is a French chain of cosmetics stores founded in 1969. Featuring nearly 300 brands, along with its own private label, Sephora offers beauty products including makeup, skincare, body, fragrance, nail color, and haircare. Sephora is owned by luxury conglomerate Moet Hennessy Louis Vuitton as of 1997. Sephora USA, Inc. operates approximately 1,900 locations in 33 countries worldwide, with an expanding base of over 430 stores across the Americas. The company also had 590 Sephora locations in JCPenney stores across the US. In addition to the company's number of stores, Sephora offered its products for sale on its website. The project would comprise approximately $36m in capital investment and the hire of 60 employees at an average wage of $24.05. Mr. Walsh was joined by Mr. Jeff Ritacco, Vice President of Logistics, Sephora USA, Inc. and John Lenio, Executive Vice President, CBRE Group.

Mr. Ritacco advised Sephora USA, Inc. was considering opening a 715,000 square-foot distribution facility in NLV. The proposed project would include a new regional distribution center which would ship products to stores and customers located in 11 western states. At full operations, the new distribution center would process approximately $100m in goods a year. Additionally, all employees would be new and there would be no transfer of jobs from one distribution center to another.

AMERICAN OVERSIGHT

Governor Sandoval asked about the company's next steps should it be awarded the abatements sought. Mr. Ritacco advised the company was keen to decide swiftly and noted the Board's approval of tax incentives would greatly assist the company's decision to locate in Nevada.

Governor Sandoval asked when the company planned to be operational at its new site. Mr. Ritacco advised operations were anticipated to commence by July of 2019.

Mr. Specht highlighted the company's focus on hiring veterans or persons with a disability status. Mr. Lenio advised such hires currently made up 15% of the company's Mississippi facility's workforce and the company frequently worked with states and counties to develop and implement training programs. Mr. Specht noted the potential for partnerships with Opportunity Village.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5K. THIS MOTION WAS SECONDED BY LIEUTENANT GOVERNOR HUTCHISON. THE MOTION PASSED UNANIMOUSLY.

6. ABATEMENT APPLICATIONS FOR DIRECTOR APPROVAL:

A. 3PEA INTERNATIONAL, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Ursem, LVGEA, presented 3PEA International, Inc., and provided a brief overview of the company and abatements sought. 3PEA International, Inc. designs and develops payment solutions, prepaid card programs, and processing services under the PaySign® brand name for corporate, consumer, and government applications. The company offers various services, including transaction processing, cardholder enrollment, value loading, cardholder account management, reporting, and customer service through PaySign® platform, a proprietary card processing platform. It also develops prepaid card programs for healthcare reimbursement payments, pharmaceutical co-pay assistance, corporate expense and per diem payments, and donor payments for source plasma and automobile dealership incentives, as well as payroll cards, general purpose re-loadable cards, travel cards, and loyalty rewards cards for the hospitality industry. In addition, the company offers Buy and Bill programs for patients to purchase directly from physician's office or through an infusion center for physician administered therapies; and Survey Instant Rewards card programs for organizations to gather survey data. The company's principal target markets for processing services comprise prepaid card issuers, retail and private-label issuers, small third-party processors, and small and mid-size financial institutions in the United States and internationally. The project would hire 35 new employees at an average hourly wage of $40.20 with a projected $828,000 in capital investment. Mr. Ursem was joined by Mr. Christian Mueller, Controller, 3PEA International, Inc., and Mr. Mark Newcomer, President and Chief Operating Office, 3PEA International, Inc.

AMERICAN OVERSIGHT

Mr. Newcomer advised, in order to accommodate its southern Nevada expansion plans, 3PEA International, Inc. was seeking to relocate from its current 11,541 square-foot space to a 21,000 square-foot facility. The company relocated to Nevada in 2004 with a total of three employees. Since that time, Nevada had afforded the company a great climate to grow in.

Governor Sandoval asked about the company's recruitment and hiring plans. Mr. Newcomer advised, so far, the company had been able to successfully source its workforce locally. These roles had included customer service relationship management, and front and back-end development, and biopharmaceutical sales.

Director Anderson noted the company's approval for an MBT abatement was contingent upon the Department of Taxation's pending determination on the company's status as a financial institution.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6A. DIRECTOR ANDERSON APPROVED THE COMPANY'S APPLICATION FOR A MODIFIED BUSINESS TAX ABATEMENT, PENDING THE OUTCOME OF THE DEPARTMENT OF TAXATION'S DETERMINATION OF THE COMPANY'S STATUS, AS DESCRIBED IN AGENDA ITEM 6A.

B. ALPHA GUARDIAN

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Walsh, LVGEA, presented Alpha Guardian and provided a brief overview of the company and abatements sought. Alpha Guardian is a leader in the residential safe, security and storage industry. The company was established in August 2017 following the announcement that MidOcean Partners was partnering with Cannon Safe, Inc. and simultaneously combining it with Stack-On Products to create a market leader in the residential safe and secure storage sector. Cannon and Stack-On bring together two highly complementary operations. The project would hire 35 new employees at an average wage of $26.92. The company planned to make a capital investment of $181,530. Mr. Walsh was joined by Mr. Jesse Bugarin, Chief Project Office Alpha Guardian and Mr. Roger Jenkins, Vice President of Finance, Alpha Guardian.

Mr. Bugarin advised Alpha Guardian was planning to expand its current Nevada operations. The company was currently renting a 24,000 square-foot facility in southern Nevada. The planned expansion would require a facility of at least 100,000 square feet. The company was also considering relocating its Chicago Stack-On brand operations from Illinois to Las Vegas.

Lieutenant Governor Hutchison asked about the operations at the expanded facility. Mr. Bugarin advised the expansion would primarily accommodate distribution.

AMERICAN OVERSIGHT

Mr. Jenkins noted the company had experienced great success working with UNLV to offer internship programs. One participant in the internship program had been hired by the company upon graduating. Mr. Jenkins also noted the company had a commitment to supporting its employees' learning and growth and had implemented a program called Alpha Guardian University. The program focused on adult literacy. Alpha Guardian University has executed 1,300 hours of training between 2016 and 2018.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6B.

C. CANNAE HOLDINGS, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Walsh, LVGEA, presented Cannae Holdings, Inc., and provided a brief overview of the company and abatements sought. Cannae Holdings, Inc. is a diversified investment company headquartered in Las Vegas. The firm primarily invests in restaurants, technology enabled healthcare services, financial services and more. Cannae's strategic acquisitions contain a mix of majority and minority owned businesses with significant underlying value. These holdings include majority and minority equity investment stakes in a number of entities, including American Blue-Ribbon Holdings, LLC (ABRH), and Ceridian Holding, LLC (Ceridian). In October 2017, the company purchased the shares of T-System Holding, LLC. T-System is a provider of clinical documentation and coding solutions to hospital-based and free-standing emergency departments and urgent care facilities. The project would hire 50 new employees at $36.90. The company planned to make a capital investment of approximately $1.1m. Mr Walsh was joined by Mr. Richard Cox, Executive Vice President and Chief Financial Officer, Cannae Holdings, Inc. and Mr. Gary Amico, Amico and Associates, Inc.

Mr. Cox advised Cannae Holdings, Inc. was considering building headquarter operations adjacent to its existing Las Vegas facility. The project would involve hiring of financial, information technology, and accounting personnel.

Mr. Cox highlighted the company's commitment to Las Vegas and the local community and noted the company was involved in various corporate citizenship and community engagement activities. The executive group of Cannae included Mr. Bill Foley, the lead person of the ownership group responsible for bringing the National Hockey League to Las Vegas and Nevada. The Vegas Golden Knights were associated with the Golden Knights Foundation, an organization that serves as the primary charitable link between the Vegas Golden Knights and the Las Vegas community.

The Folded Flag Foundation was also an organization with an executive board that included Mr. Bill Foley and Mr. Richard Cox, the CFO of Cannae Holdings, Inc. The Folded Flag Foundation's mission was to provide educational scholarships and support grants to the spouses and children of the United States military and governmental personnel who died as a result of

AMERICAN OVERSIGHT

hostile action or in an accident related to U.S. combat operations. The Folded Flag Foundation recently held an event at The Cosmopolitan on March 29, 2018 where it raised more than $50k to help support the families of fallen heroes.

Director Anderson asked whether the company intended to hire locally. Mr. Cox advised the company initially sought to recruit locally. So far, most of the company's workforce had been sourced from Las Vegas, and the company anticipated this continuing to the extent the required talent was available.

Director Anderson inquired whether the company worked with any of the universities for recruiting purposes. Mr. Cox advised the company offered entry level roles and was currently looking at partnerships with UNLV and other local learning institutions. The company also planned to explore collaborations with UNLV to develop internship programs.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6C.

7. WORKFORCE INNOVATION FOR THE NEW NEVADA (WINN) FUND PROGRAM APPLICATIONS - FOR BOARD APPROVAL

A. RENO AREA DATA ANALYTICS - REQUEST FOR APPROVAL TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $300,000

Ms. Stacey Bostwick, Workforce Development Program Coordinator, GOED, introduced Agenda Item 7A and noted GOED has been working with its partners Truckee Meadows Community College (TMCC), NCLab, and Desert Research Institute's AIC to develop a first building block of the Machine Learning option within the Advanced Automation and Robotics track of LEAP Advanced ICT (Information Communications Technology). This building block would address the growing workforce requirements for skills in Data Analytics and would be a decisive contribution to add to and considerably strengthen the talent pool in this field benefitting effectively every industry in Nevada as well as attracting 21st century technology heavy companies to locate in the state. This project was now seeking funding to develop a completely online, hands-on and self-paced learning program (non-credit) and make it available to 500 workers and job seekers, in the Reno area, to provide the skills and knowledge necessary for employment and growth in analytical professions. Ms. Bostwick was joined by Ms. Barbara Walden, Director of Applied Technologies, TMCC, Mr. Vasily Kamyshanov, the Chief Operating Officer, NCLab, and Mr. Russ Riggs, the Chief Operating Officer, Lift 361.

Ms. Walden noted, as Nevada's economy became more diverse, it brought the challenge of upskilling the workforce. The Panasonic Preferred Pathway (P3) training program was an example of meeting those workforce challenges via innovative programs and delivery methods. This had enabled Panasonic to hire the trained employees it required at the Tesla Gigafactory and allowed for Nevadans with no advanced manufacturing experience to receive the training necessary to work in one of Nevada's most promising and emerging industries. Another

AMERICAN OVERSIGHT

identified challenge was building Nevada's technology sector pipeline. Coding, cyber security, and data analytics were greatly in-demand skill sets. Additionally, these skills were not unique to technology, and crossed every industry sector including marketing, health care, business, and government.

Mr. Kamyshanov advised NCLab had developed online courses for STEM disciplines and was currently part of a Nevada Ready 21 Program for middle schools. NCLab is also working with Clark County, Washoe County, and rural areas of Nevada. This project would enable NCLab to qualify students to become workforce ready for technology based careers.

Mr. Riggs advised his company focused exclusively on analytics. The company offered custom analytics based on client's specific needs. The company's services were highly specialized and attracting talent had been difficult in the past. Mr. Riggs stated the project would introduce more data analytics into schools and equip more students with skills in this area.

Governor Sandoval inquired about the process of signing up for the program. Ms. Walden advised, for the purposes of the WINN funds, there would be an intake process including an application for the funding and assessment of an applicant's overall objective in participating and completing the program.

Director Anderson inquired about the program development and maintenance costs. Mr. Kamyshanov advised online education has a solid propriety platform to deliver complex knowledge to people, and this course would be developed together with participating companies to really match the job demand. Once the set was developed the costs to support it would be low. Once developed, it could easily scale to an unlimited number of students.

Director Anderson about the program timeframes. Ms. Waldon noted promotion and intake would commence within two months with a targeted course commencing by October 2018. Each course would take 80-120 hours for completion and it was estimated funding will be fully utilized by June 30, 2019. Program outcomes would be reported and evaluated using self-reported data gathered from participants and employer partners to understand the placement and wage gains experienced as a result of program completion.

A MOTION WAS MADE BY DR. DANA BENNETT TO APPROVE THE REQUEST OF RENO AREA DATA ANALYTICS TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $300,000 AS DESCRIBED IN AGENDA ITEM 7A. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

B. CLARK COUNTY HEALTH AND TECHNOLOGY - REQUEST FOR APPROVAL TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $700,000

Ms. Bostwick introduced Agenda Item 7B. Ms. Bostwick advised this program proposed to develop both a workforce increase in nursing and home health and infuse new technology training and the necessary skills to become effective bridges between clinical and community

AMERICAN OVERSIGHT

settings. This would help improve transitions from clinical to community settings, with strong potential to improve population health outcomes, reduce health disparities, and to control health care costs. Partners of the program include BrightStar Home Health, Hallmark Home Care, Homewatch Caregivers, Home Care Assistance, and the Nevada State Board of Nursing. The proposed strategy established increased capacity to on-ramp into healthcare through Home Healthcare or Nursing Assistant programs with new infusions of technology certifications. Beyond the strong economic value of creating new health jobs in southern Nevada, this approach would support efforts to mitigate the current economic burden incurred by the state due to chronic diseases and hospital readmissions. Students completing the program would represent the future of health care with skills and competencies in the use of technology to improve patient and community health outcomes. Ms. Bostwick was joined by Ms. Luz Castro, Health Care Specialist, College of Southern Nevada (CSN), Ms. Catherine Prato-Lefkowitz, Director of Nursing Education, Nevada State Board of Nursing, and Ms. Cynthia Knight, Director of Client and Caregiver Services, Homewatch Caregivers.

Ms. Castro explained the CSN Division of Workforce and Economic Development program strived to deliver a high-standard curriculum that taught and promoted all competencies and principles required for qualified home health aides and Certified Nursing Assistants (CNA). CNA programs are highly recognized by industry leaders and home health aides were among the fastest growing jobs in the industry. There were several barriers to the required education, the the primary being tuition. CSN also needed to innovate its programs with technology competencies to upskill and deliver a high-quality service to employers and the community. As the program certificates would be offered both online and in-person, students would have flexibility regarding different modes of matriculation. Several employers had already expressed interest in partnering with CSN and hiring its students upon completion of this program.

Ms. Knight advised there was currently a severe shortage of qualified candidates and this had inhibited growth of the business. Homewatch Caregivers had a contract with the Veterans Administration to provide care for veterans in their own home and the company was looking to CSN to develop qualified candidates as quickly as possible.

Ms. Catherine Prato-Lefkowitz advised a CNA certification was a valuable entry point into any health care occupation or profession. Many CNA students, particularly in high schools, had goals of becoming nurses, physicians, or dentists. Increasing the technological literacy for CNAs and nurses would be an effective path to increase competencies. Technology is commonplace in health care. However, it is not as commonplace in the training that CNAs and nurses receive.

Dr. Havins inquired about the tuition costs for a CNA program and the portion of this to be covered under the WINN program. Ms. Bostwick advised tuition for the CNA program was approximately $2,400. The program was structured to cover 100% of this fee.

Lieutenant Governor Hutchison asked how many tuitions would be covered by the program application. Ms. Bostwick advised the current application would cover 250 individuals. However, the objective would be to consistently seek opportunities for integration. In conjunction with WINN there may be scope to leverage additional funding sources for tuitions and increases in technology infusion and certification.

AMERICAN OVERSIGHT

A MOTION WAS MADE BY MR. BARRETT TO APPROVE THE REQUEST BY THE CLARK COUNTY HEALTH AND TECHNOLOGY TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $700,000 AS DESCRIBED IN AGENDA ITEM 7B. THIS MOTION WAS SECONDED BY DR. HAVINS. THE MOTION PASSED UNANIMOUSLY.

8. WORKFORCE INNOVATION FOR THE NEW NEVADA (WINN) FUND PROGRAM APPLICATIONS - FOR DIRECTOR APPROVAL

A. RENO AREA LOGISTICS AND MANUFACTURING RE-ENTRY INITIATIVE-REQUEST FOR APPROVAL TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $75,000

Ms. Bostwick introduced Agenda Item 8A and advised the objective of this program was to provide career development opportunities to individuals involved in the justice system, in northern Nevada, with a direct pathway to higher wage employment. This proposal would create trained, professional individuals, who otherwise may not have the opportunity to work in these industries, and who would meet the needs of local employers to expand their businesses. Quality Plastics, High Mountain Door and Trim, Reno Custom Crating, Sierra Meat and Seafood and Iron had all expressed a need for trained and skilled employees to sustain and expand their Manufacturing and Logistics businesses. Phase One would be launched in May 2018 and include a cohort of 30 participants. Ms. Bostwick was joined by Ms. Camille Vega, Re-Entry Coordinator, TMCC, Mr. Jonathan Wilson, Facility Manager, Northern Nevada Transitional Housing, and Mr. Bill Owensby, IT Director, Quality Plastics.

Ms. Vega stated current data showed one in three Americans had some sort of criminal record. These individuals had minimal support in re-entering society post incarceration. One-half of those released were incarcerated within their first year. Two-thirds were re-incarcerated within three years, and over five years, three-quarters were re-incarcerated. One of the greatest factors in reducing re-incarceration was meaningful employment.

Mr. Wilson advised he joined northern Nevada Transitional Housing in August 2017. Prior to this he'd been with the Department of Corrections for almost 15 years and had noted the lack of transitional support for inmates. Mr. Wilson and Ms. Vega had discussed the potential for certificate programs. Additionally, Mr. Wilson noted he had identified employers interested in participating in the program. Sought after skills pertained to manufacturing, logistics, food preparation, and food safety.

Mr. Bill Owensby advised Quality Plastics advocated for inmate re-entry with 40% of its currently staff being previously incarcerated. The typical new hires from these re-entry programs were reliable and consistent. Additionally, being gainfully employed could contribute to elevated self-worth and lower risks of reoffending. Mr. Owensby advised the company hired him from a restitution center two-years earlier. He now held the position of IT Director.

AMERICAN OVERSIGHT

Governor Sandoval highlighted his position as Chairman of the Board of Prison Commissioners and noted at times parole eligible inmates would select not to parole as they had no job or place to go. Governor Sandoval thanked the employers involved in the application and noted the importance of providing resources, tools and skills for a productive life.

Mr. Don Soderberg commended the program and noted the Nevada Department of Employment, Training and Rehabilitation (DETR) had also been involved in re-entry initiatives. Feedback often highlight how dependable and enthusiastic these employees were with some of the best employees being participants of re-entry programs.

Governor Sandoval asked if the program would also be available to women. Ms. Vega stated the first cohort would solely include 30 males. Best practices in re-entry program development and implementation had identified that men and women were best supported in separate training programs. Ms. Vegas advised the intention was to have a cohort of women in the second semester, pending additional funding.

Governor Sandoval thanked Ms. Vega and encouraged the group to come back to present a second application. Ms. Vega noted the objective was to do so in four months.

DIRECTOR ANDERSON APPROVED THE REQUST FOR RENO AREA LOGISTICS AND MANUFACTURING RE-ENTRY INITIATIVE TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $75,000.

9. DIRECTOR'S REPORT - REVIEW AND DISCUSSION

Director Anderson advised GOED's International Trade Division recently completed an advanced planning trip to Ghana, Botswana, and South Africa to prepare for a Governor-led trade mission that would take place in summer 2018. The trip was a success as partnership opportunities were identified in several sectors including trade, water technology, higher education, smart city technology, technology transfer, and good governance.

At the National Governors Association North America Summit in May 2018, Governor Sandoval and Premier Rachel Notley of Alberta, Canada signed an MOU focused on collaboration in the development, testing, and commercialization of drone technology. This followed a successful trade mission to Nevada of over fifty Alberta businesses in February 2018.

Mr. Randy Walden, GOED's Advanced Manufacturing Industry Specialist and Chair of State Apprenticeship Council; oversaw the approval of over 600 apprenticeships which included a recently announced 425 Panasonic employees. The apprentices would be attending classes at TMCC utilizing the flexible delivery manufacturing courses developed for the P3 program last year. This would be the first group of apprentices and would followed in the upcoming months by participants from Tesla as well as other manufacturers in Northern Nevada. Apprenticeships played a vital role in providing a highly qualified workforce for new and existing companies in Nevada.

AMERICAN OVERSIGHT

On April 20, 2018 GOED submitted a list of recommended census tracts, Governor Sandoval, to be designated as Opportunity Zones. Nevada's identification process has been held up as a 'best practice' by Policy Map who was involved in the creation of opportunity zone policy.

The Nevada Film Office (NFO) was working on revamping its online locations directory. The new online locations directory had been designed to better connect potential film locations around Nevada with production companies, giving local businesses more control and more opportunity. The directory was in the final stages and should launch in late May 2018 with an associated marketing campaign commercial promoted on Facebook, Twitter, and potentially local television.

Dr. Barclay was working with the Touro Center for Disaster Life Support, UNLV, the College of Southern Nevada, health industry corporate employers and other stakeholders to develop a series of certificates in Technology for Emergency Preparedness and Disaster Response. These certificates will be offered from high school to graduate level and will contribute to building and strengthening a technology-ready workforce.

Director Anderson welcomed Ms. Bostwick, as GOED's new WINN Coordinator. Ms. Bostwick is based in GOED's Las Vegas office.

10. STATE OF NEVADA UNEMPLOYMENT RATE UPDATE - as established by the Research and Analysis Division of the Nevada Department of Employment, Training and Rehabilitation.

Agenda item 10. was for information only. GOED is committed to providing this information for each Board meeting. There were no questions or comments regarding this item.

11. PUBLIC COMMENT

Mr. Cory Hunt, Deputy Director, GOED provided public comment from Carson City. Mr. Hunt stated May 18, 2018 would be his last day at GOED. Mr. Hunt thanked Governor Sandoval for the great privilege of serving the State of Nevada during his roles with the Governor's Office and GOED. Mr. Hunt also thanked Mr. Steve Hill, Mr. Paul Anderson, Mr. Bob Potts, the GOED Board, Nevada's RDA's, and GOED's staff. Mr. Hunt noted he looked forward to continuing opportunities and projects that would support Nevada's growth.

Governor Sandoval wished Mr. Hunt the best in his future endeavors and commended his contribution to the State of Nevada and dedication to the multiple projects he'd been involved in.

Assemblywoman Irene Bustamante-Adams, Chief Strategy Officer, Workforce Connections, provided comment from Las Vegas and thanked the GOED Board for supporting the Clark County Health and Technology WINN Fund application. Assemblywoman Bustamante-Adams also thanked Dr. Gillian Barclay, Healthcare Industry Specialist, GOED for bringing a global vision to Nevada and competitively positioning the state in terms of serving the employer.

AMERICAN OVERSIGHT

12. ADJOURNMENT

A MOTION WAS MADE BY DR. HAVINS TO ADJOURN THE BOARD MEETING. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

Sandoval's legacy: the 'New Nevada'
Op-Ed by Mark Hutchison
Reno Gazette Journal
https://www.rgj.com/story/opinion/voices/2018/11/01/sandovals-legacy-new-nevada-hutchison/1847337002/

Nevadans soon will cast their final ballots for a host of candidates and issues, but none will be more meaningful or important to the health and welfare of Nevada than our next governor. Tuesday, we look to the future with hope. Today, let’s recall how far we’ve come and appreciate who championed our cause along the way.

AMERICAN OVERSIGHT

Historian Jon Meacham once observed, "One of the mysteries of history is why is it that certain moments produce exactly the right human beings?" I believe that history will record that Brian Sandoval was exactly the right Nevadan to serve at exactly the right time as our state's 29th governor.

In September 2009, he left a lifetime appointment as a federal district court judge, the pinnacle of any legal career and a job he loved, and announced he would run for governor of Nevada. In 2010, he took on and defeated an incumbent Republican governor in the primary election and then prevailed in the general election against the most prominent and powerful Democratic family in the state.

When Brian Sandoval was inaugurated, Nevada's economy was dismal at best. Our unemployment rate was ranked the highest in the nation at 14 percent. One out of every 11 housing units fell into foreclosure. Our residents filed for bankruptcy at twice the rate of the national average. Governor Sandoval and his administration went to work over the next eight years to implement policies and champion legislation that created what he called the "New Nevada."

This New Nevada is stronger than ever. Nevada's unemployment rate currently stands at 4.5 percent, the lowest since 2007. We lead the country in private sector job growth, and as of last month, we've added more than 276,000 jobs since the Great Recession by producing opportunities in advanced manufacturing, logistics and operations, information technology, health and medical, and aerospace and defense. This kind of economic diversification is something we Nevadans only dreamed about before Governor Sandoval assumed the reins of government. And we did this while strengthening our traditional core industries of gaming, hospitality, conventions, mining, construction and agriculture.

Economic diversification and job growth have been an important part of the New Nevada, but no more so than education funding and reforms, environmental improvements, transportation innovations, social services transformations, health care accessibility and advancements, public safety enhancements, and so much more that the Sandoval administration has accomplished.

As someone with a front-row seat to the building of the New Nevada, I firmly believe that Governor Sandoval gets out of bed every morning with one objective in mind: What's in the best interest of the people of the state of Nevada? One of my first significant events with Governor Sandoval was in October 2013 when I served as the master of ceremonies for the Boy Scouts' annual luncheon where Governor Sandoval was being awarded the Good Scout of the Year award. I was honored to introduce the governor and recognize him as a more-than-worthy recipient of the award. Brian Sandoval truly embodies the Scout Law: trustworthy, loyal, helpful, friendly, courteous, kind, obedient, cheerful, thrifty, brave, clean and reverent.

We left the hotel ballroom together, and I accompanied the governor as he walked through the hotel and to the parking area. As we walked, the governor greeted with his trademark graciousness the many hotel employees who wanted to meet him. We talked about the events of the day, the most prominent being the shutdown of the federal government that morning. The governor said he hoped that Congress could reach an agreement to restore the government's operations. Then he revealed what I consider his governing philosophy. He said that as governor, his job was to ensure that government works for the benefit of all Nevadans.

It has been the privilege of a lifetime to serve my fellow Nevadans as lieutenant governor at the side of Governor Brian Sandoval. To me, he is and will always be exactly the right Nevadan who served at exactly the right time. As we cast our votes on Tuesday, may we all consider applying the Sandoval philosophy of

AMERICAN OVERSIGHT

government and vote for candidates who we believe will get up on Wednesday morning and subsequent mornings with one objective in mind: what's in the best interest of the people of the state of Nevada? If we do, the New Nevada will continue to thrive and will remain the place we are so proud to call home.

Mark Hutchison is Nevada's lieutenant governor.

Nevada jury: $250K per mental patient dumped to other states
Ken Ritter
Associated Press
http://www.startribune.com/nevada-jury-250k-per-mental-patient-dumped-to-other-states/499357681/

LAS VEGAS — A Nevada jury put the state and a former mental hospital administrator on the hook Thursday for class-action damages that could range from about $9 million to more than $22 million for putting patients on buses in Las Vegas for one-way trips to cities around the country.

An eight-woman jury deliberated less than three hours after a two-week trial before deciding unanimously that every Rawson-Neal Psychiatric Hospital patient who was given a Greyhound bus ticket to another city and no other arrangements for care after June 2011 should receive $250,000.

State law could cap damages at $100,000 per plaintiff, or $8.9 million.

State Department of Health and Human Services spokeswoman Martha Framsted said the jury decision will be appealed.

The judgment could top $22.5 million if the cap is waived, said attorney Mark Merin, a Sacramento, California, lawyer who represented plaintiff James Flavy Coy Brown.

Brown was the subject of an award-winning investigation in 2013 by the Sacramento Bee that brought to light what the lawsuit derides as "Greyhound therapy."

"There are at least 371 people in the class. We have been personally in touch with 89 of them," said Merin, who took the case to Clark County District Court after a federal judge dismissed an American Civil Liberties Union lawsuit in 2014.

Brown, then 48, and diagnosed with psychosis, told reporters in Las Vegas in 2013 that he arrived "homeless, confused and anxious" in Sacramento after a 15-hour bus ride from Las Vegas. After a day on the streets, hospital emergency room officials found him space at a psychiatric hospital. Brown was later reunited with his daughter in North Carolina.

Merin said he heard similar stories of indigent patients arriving in strange cities in every U.S. state and sleeping in bus stations, under benches and on the street if they were not arrested or hospitalized.

"Maybe now the state will talk about a settlement," the attorney said. "If they don't win on appeal, they're going to have to face this verdict."

AMERICAN OVERSIGHT

State Attorney General Adam Laxalt's office issued a statement noting the issue came to light before Laxalt took office in 2015, and that his "client" defendants included Southern Nevada Mental Health Services and the state Health and Human Services Department.

The jury found negligence on the part of officials including the now-retired mental health services administrator Chelsea Szklany.

Laxalt, a Republican, is running for governor to replace term-limited GOP Gov. Brian Sandoval, who reached a $400,000 settlement of a lawsuit that San Francisco officials filed in 2013 over similar patient dumping allegations involving 24 people.

Rawson-Neal opened in 2006 as the only state psychiatric facility in Las Vegas following years of complaints that mentally ill people were clogging emergency rooms at for-profit hospitals in southern Nevada.

The region now has 2.2 million of Nevada's nearly 3 million residents.

State officials reported in 2014 that Rawson-Neal treated an average of more than 6,000 people per year during a five-year span, and that nearly 1,500 patients had been provided bus transportation out of the state.

Clark County students who refuse searches face discipline
Amelia Pak-Harvey
Las Vegas Review Journal
https://www.reviewjournal.com/news/education/clark-county-students-who-refuse-searches-face-discipline-1516523/

Students who refuse to submit to a random search for weapons will face disciplinary action and may be removed from school property, the Clark County School District announced Thursday.

The announcement to randomly search middle- and high-school students with handheld metal detectors follows the fatal shooting of a student outside Canyon Springs High School in September and the confiscation of 11 guns found on students this year.

Searches, which will start in the coming weeks, will be conducted as students arrive to school and while in class. A computer program will decide which school, classroom and students to search, the district said.

When a school is randomly selected, the program will generate a random number, such as 3 or 5, according to the district. That will determine which students to search as they arrive at school — every third student, for example, or every fifth student.

Students entering school will be directed to a search area, advised of the purpose of the search and told to place their belongings on a table.

Students who don’t consent to the search will be disciplined “as they would for breaking any other school rule,” according to district spokeswoman Melinda Malone.

“We will ask them and their parents to come in to meet with the school administrator,” she said in an email.

Staff will search the belongings "only to the degree necessary to affirm that no weapons are concealed therein," according to procedures.

After removing metal objects from their pockets, students will be scanned with a metal detector.

"Staff conducting the search must use an identical scanning technique/pattern for each student," the procedures state. "The handheld device should not touch the student's body during the search."

If the detector activates, the student will be asked if they have any metal objects. They will either remove the object or the staff member will confirm the object is not a weapon either visually or by "lightly touching" the activated area.

If a search requires physical contact, it will be conducted by someone of the same gender as the student. Students who indicate that they identify with another gender will have a choice on who will search them at that point.

Students who have any prohibited items — not just weapons, but drugs or alcohol, for example — may face disciplinary action.

Students who are searched in randomly selected classrooms will be directed to stand, carry their belongings and form a line near the door. Students will wait to be directed to a search area in the hallway, and teachers will remain in the classroom to monitor behavior of students waiting in line.

The district will document every student searched, as well as the date, time, location and staff member who conducted the search.

"Our goal as educators is always to discover concerns before they become problems by developing strong relationships," Superintendent Jesus Jara wrote in a letter to parents on Thursday. "I encourage students to report any rumors of weapons, potential fights, and other safety concerns to school police or to the SafeVoice app."

Jury rules against Nevada in patient dumping case
David Ferrara
Las Vegas Review Journal
https://www.reviewjournal.com/crime/courts/jury-rules-against-nevada-in-patient-dumping-case-1516619/

A Las Vegas jury on Thursday handed down what could amount to a multimillion-dollar penalty against Nevada for busing mental patients out of state without support services awaiting them.

Rawson-Neal Psychiatric Hospital came under scrutiny in early 2013 after media reports about patients receiving one-way tickets to unfamiliar parts of the country.

A jury of eight women awarded $250,000 to James Flavy Coy Brown in a class-action lawsuit against Southern Nevada Adult Mental Health Services, the hospital, its administrator and others after a trial over the practice. That same dollar amount should be given to each of the patients, their lawyers said.

AMERICAN OVERSIGHT

A deputy attorney general, representing the defendants, declined to comment on the verdict, but a spokeswoman for the state Department of Health and Human Services said in an email to the Review-Journal that the department will ask the attorney general's office to appeal the decision.

"Rawson Neal hospital continues to be committed to providing safe and appropriate discharges," spokeswoman Martha Framsted also said in the email.

The plaintiffs' lawyers had contacted 89 people who were bused out of state, including 11 who testified during the trial, according to Sacramento attorney Mark Merin. At least 371 had been identified in the class, he said.

Upward of 1,500 people treated at the facility had been sent to states across the country and to Washington, D.C., Merin said after the verdict was reached.

State law caps lawsuits against government agencies at $100,000, but another lawyer for the patients, Allen Lichtenstein, said that cap may not be in play against the hospital's administrator, Chelsea Szklany, who was sued individually.

Through the trial that started last month, witnesses, including Brown, described their troubles after being dropped off in unfamiliar towns in testimony that Merin called "just mind-blowing."

Some of the patients immediately became homeless, sleeping under benches, in bus stations and on curbs, the lawyer said. Others told of arrests, hospitalization, "everything you can imagine."

The Sacramento Bee first reported that Brown spent 72 hours at Rawson-Neal before he was picked up by a taxi, driven to a bus station and placed on a bus traveling to Northern California without any form of identification or ability to obtain medication for his mental illness.

In their verdict, jurors found that Southern Nevada Adult Mental Health Services violated state law regarding indigent residents who had recovered from mental illnesses by failing to return them to their families, previous residences or to the counties where they had been involuntarily committed.

The jury decided that those patients were harmed because of the violation and that state agents, including Szklany, breached their duties to psychiatric patients who were discharged and sent by taxi to a Greyhound Bus station, before being carried out of state. The hospital staff also failed to arrange for follow-up care and housing, and provide medical documentation, the jury found.

"I think the jury listened very carefully," Merin said.

"Maybe now the state will actually talk about settling," he said. "They have to recognize that if they don't win on appeal, they're going to have to face this verdict."

Las Vegas stadium to have Caesars-branded entrance
Richard N. Velotta
Las Vegas Review Journal
https://www.reviewjournal.com/business/stadium/las-vegas-stadium-to-have-caesars-branded-entrance-1516255/

AMERICAN OVERSIGHT

Caesars Entertainment Corp., the operator of Caesars Palace and eight other Las Vegas casino properties, has signed a 15-year agreement to be a founding partner of the $1.8 billion Las Vegas stadium.

Financial terms of the deal announced Thursday weren't disclosed.

As a founding partner, Caesars will host a branded stadium entrance and drop-off zone, digital signage, media, radio and print assets in addition to alumni, player and cheerleader appearances.

"We are honored to align with a company that shares the Raiders' values of improving the local community and delivering exceptional customer service in creating this transformative project," Raiders President Marc Badain said.

The partnership is the first Raiders deal with a gaming and hospitality company and will give Caesars customers and members of their Total Rewards loyalty club access to exclusive experiences.

High-rollers will have access to the customized Caesars-branded owners suite at the 50-yard line of the Las Vegas stadium, VIP dinners on the field, training facility events, fantasy camp participation, stadium tours and tickets to home games and most stadium events.

The Las Vegas stadium will have five entrances that could potentially have branded sponsorships, similar to the design of U.S. Bank Stadium in Minneapolis.

At that stadium, the home of the Minnesota Vikings, entrances are referred to as "gates" and are sponsored by suburban Minneapolis corporations Ecolab, Pentair and Polaris as well as Verizon and Legacy.

The Caesars partnership deal is different from a stadium naming rights sponsorship the Raiders are pursuing. The team is quietly discussing naming rights to the stadium with a number of companies the team has not named. In September, team officials indicated talks are with the types of companies that have typically sponsored stadiums in the past — airlines, telecommunications companies, financial institutions and other large corporations. A team official had no comment on the status of those negotiations Thursday.

"With this deep partnership, Caesars will become an essential part of the game time ritual for Raiders fans everywhere," said Chris Holdren, chief marketing officer for Caesars. "From activations to exclusive experiences, fans of the silver and black will see Caesars as their home on game day."

Caesars may elaborate further later Thursday when the company has a conference call to announce its third-quarter earnings.

Casino and sports betting operators including MGM, Caesars and William Hill US, have been pursuing partnerships with leagues and teams since the U.S. Supreme Court overturned a law in May that banned wagering in most states.

Partnership announcements have been trickling since May, and it's just the beginning, said Irwin Raij, co-chair of the sports group at New York-based O'Melveny & Myers, whose clients include professional teams.

"We are going to see a lot more deals at the team level," Raij said in response to the recent MGM-Jets partnership.

AMERICAN OVERSIGHT

Becky Harris, chairwoman of the state Gaming Control Board, had not seen details of the Caesars deal, but said she was doubtful that regulators would have any concerns since the deal doesn't involve gambling.

Las Vegas substance-use treatment center to open this month
Jessie Bekker
Las Vegas Review Journal
https://www.reviewjournal.com/life/health/las-vegas-substance-use-treatment-center-to-open-this-month-1516554/

A substance-use treatment facility will open in mid-November with the promise of providing a continuum of care, from detoxification to transitional living.

CrossRoads of Southern Nevada founder Jeff Iverson, who's in recovery himself, made the announcement Thursday at a ribbon-cutting ceremony at the Las Vegas facility, 2121 W. Charleston Blvd.

"I'm really honored to be a part of a project that is so needed in the community," said Iverson, joined by the center's staff and board of directors, along with health care industry members and public officials.

The opening comes four months after Iverson planned to admit patients. At the time, he had staff members, but contracts with insurers weren't established, and he was waiting on a license from the state for a detoxification facility.

He was working on securing designation from the Southern Nevada Health District as a drop-off site for first responders, too.

He may have contracts with Medicaid-managed care organizations and private insurers, but the state hasn't granted the facility a license as a detox center. Iverson said he's hopeful that piece will come through next week.

Julie Kotchevar, administrator for the state Department of Health and Human Services Division of Public and Behavioral Health, said the department would issue the license after the facility has passed an inspection.

"We can provide all of the services here that are proposed, except for the medical detox," Iverson said. He said he was in talks with fire and police officials about the facility being designated as a drop-off location.

Iverson raised "several million dollars just to get to the point where I am now" in private donations, he told reporters Thursday. He said he would turn to city and county officials to address options for public and grant funding should the need arise.

'I love my community'

Public officials lauded Iverson and his staff Thursday for creating a 172-bed facility to detox substance users and treat them through their transition away from life on drugs. The facility's bed space will be split between patients needing detoxification and those seeking short-term housing.

The facility will also provide on-site medical care and an outpatient clinic.

Without the bed space, those needing mental health and substance use treatment end up in county jails and in hospital emergency rooms instead of in specialized care, said Clark County Commissioner Steve Sisolak, who's running for governor.

"What you're doing here is giving hope to individuals that otherwise didn't have hope," he said to a crowd of about 80 people Thursday. He was joined by Las Vegas Mayor Carolyn Goodman, Las Vegas Metropolitan Police Department Sheriff Joe Lombardo and First Assistant Attorney General J. Brin Gibson.

Iverson said he is in discussion with county officials to determine how to best serve uninsured clients but promised the center would not turn anyone away.

"I love my community, and I want to do things to help," he said. "Hundreds will be going through our continuum."

Open enrollment for Nevada Health Link begins Nov. 1
Nevada Appeal
https://www.nevadaappeal.com/news/local/open-enrollment-for-nevada-health-link-begins-nov-1/

Nevada Health Link, the state's online health insurance marketplace, began open enrollment for 2019 health insurance plans on Thursday. For the next 45 days, Nevada residents can shop for and enroll in a qualified health plan that best fits their budgetary and health circumstances. Nevada Health Link reminds consumers statewide they have access to free in-person assistance from a licensed enrollment professional who can help them navigate the insurance process and determine their eligibility for federal tax credits and cost sharing reduction subsidies. This year's open enrollment ends on Dec. 15.

Last year, Nevada Health Link enrolled a record 91,003 Nevadans. With approximately 9 percent of Nevadans currently uninsured, Nevada Health Link is working to reach all eligible residents throughout the state, especially underserved populations.

"We know how confusing and intimidating it can be to navigate the world of health insurance and find the right plan. That's why we want to remind consumers of the resources available to assist them," said Heather Korbulic, executive director for the Nevada Exchange. "With ongoing changes that continue to affect the healthcare industry, including new rules, federal requirements and various health insurance options saturating the marketplace, now more than ever, Nevadans need to understand what they are purchasing before they buy.

"Qualified health plans sold on the exchange provide comprehensive coverage and you won't be denied because of a pre-existing condition. Nevada Health Link is here to help you navigate the enrollment process. While we have achieved milestone enrollment numbers year-over-year, we remain focused on both uninsured and underinsured Nevadans, particularly those from underserved areas and populations, because no one, regardless of their income, can afford to be without health insurance."

More than 80 percent of Nevadans who enroll in a health plan purchased through Nevada Health Link are eligible for financial assistance from the federal government to help offset monthly health insurance payments.

AMERICAN OVERSIGHT

"This is yet another important example of why in-person assistance can be especially valuable to consumers. We want to ensure Nevadans are taking full advantage of all the assistance programs for which they qualify," Korbulic said.

To find an enrollment assister near you, use the in-person assistance search tool on NevadaHealthLink.com. Residents who are currently insured with exchange-based health plans are also encouraged to shop for new plans, as plans and premiums have changed. Consumers can call 1-855-768-5465 or email customerservicenvhl@exchange.nv.gov for more information.

Blockchains company makes big promises, including e-sports arena and master-planned community, at unveiling in Prague
Riley Snyder
The Nevada Independent
https://thenevadaindependent.com/article/blockchains-company-makes-big-promises-including-e-sports-arena-and-master-planned-community-at-unveiling-in-prague

Eleven months after purchasing a chunk of land nearly the size of Reno, Blockchains LLC is finally going public with its ambitious plans to build a public-focused blockchain-centered tech oasis in the Nevada desert.

At an event in Prague on Thursday, company CEO Jeffrey Berns made a long-awaited announcement about the plans of the enigmatic company, which purchased 67,000 acres of land at the Tahoe-Reno Industrial Park in January but has been mostly tight-lipped about its planned use in the subsequent 11 months.

Berns, who made the presentation alongside a hologram of the young girl who appears in the company's promotional videos, outlined additional details of the company's proposed "Innovation Park" at the conference, which he said would "highlight the power of the public blockchain" through various projects including a blockchain-based master-planned community, a promised e-sports arena and a blockchain-servicing bank.

Berns, a multimillionaire consumer protection attorney, acknowledged that little in his background is related to blockchain development, but said he was enough of a believer in the technology's potential to put up $250 million to get the company off the ground.

"I'm not a developer," he said. "I have no idea how to code. I'm older than most of you in the audience, and I come from a profession that many of you think causes more problems than solutions. But I will tell you this: In all my life, in all of my career as a lawyer, I never saw a technology that I believed in more or one that I thought really could change the balance of power back to us instead of corporations, instead of Wall Street."

In the abstract, blockchain technology is essentially a public digital ledger open to users and distributed across the internet. Bitcoin, the digital cryptocurrency, is probably the best known example of the technology, but Blockchains relies on another platform called Ethereum that allows users to develop and build applications for various purposes, from executing contracts to tracking a supply chain.

"No government, no bank, no corporation," Berns said Thursday. "Just trusting in math."

Berns said that one of his biggest fears would be seeing established financial and banking players decide to use their own private blockchain technology and requiring their customers use it as well, which he said went against the point of the technology. To that end, he said 90 percent of the company's ownership and 100

AMERICAN OVERSIGHT

percent of its voting rights would be shared between five or six "stakeholder groups," one of which would include developers, which will allow them to create their own governance structures and corporate models.

"It's not really even a company," he said. "I think, really, this is me trying to create a movement to use the public blockchain to empower the individual. To change the way we do things. And all I've done is wrapped a company inside it in order to monetize and perpetuate this movement that I hope we'll all share in."

Several details of the company's plans have trickled out over the past year, including an initiative to develop a high-speed fiber network in rural Storey County and to hire between 10,000 and 20,000 people within the next decade to build the "blockchain center of the universe."

Additional plans include creation of a residential living space on company land that would use blockchain technology to develop houses, apartments, banks, markets, stores and schools. The New York Times reported Thursday that the company is working with Storey County on a master-planned community with thousands of homes and a school, but that construction isn't scheduled to begin until late 2019.

Berns also announced a lightly-detailed plan to create an "immersive content creation studio" that he described as a cross between a movie studio, recording studio and game developer, highlighting his own experience as the publisher of a blockchain-based news website.

As part of the company's commitment to custody of digital records, Berns said it had put up the funds to purchase nuclear bomb-resistant storage bunkers in Georgia and Wyoming and planned to construct another one in Nevada. He said the company had also purchased space at similar high-security facilities in Switzerland and Sweden.

"What we will be able to do is provide security that is unmatched, that no bank, no single government will be able to offer to the people that want to put their digital assets in storage here," he said. Berns said that he had purchased an unnamed bank, and planned to make it the most "consumer-friendly, transparent" banking institution that would cater to blockchain users and companies.

He also highlighted a somewhat controversial designation of Storey County as an "Opportunity Zone," a creation of the tax overhaul legislation designed to spur development and investment in zip codes with low prosperity by providing capital gains tax breaks to investors who place their money in qualified funds in that area.

Berns also referenced the company's Wednesday announcement of a memorandum of understanding with NV Energy to develop blockchain-based energy products, and said to expect similar announcements coming out in the next six months.

On a more local level, the company appears to be contracting with prominent advertising firm R&R Partners, and two company executives — Pete Ernaut and Michon Martin — could be seen greeting Berns after the event.

Federal health care website up and running after slow start
Associated Press
https://www.reviewjournal.com/life/health/federal-health-care-website-up-and-running-after-slow-start-1516451/

AMERICAN OVERSIGHT

WASHINGTON — The federal website where consumers can get health insurance under the Affordable Care Act was up and running Thursday after a slow start as sign-up season for 2019 opened days before the midterm elections.

During early morning hours, people accessing the site were directed to a screen that said work was underway. A recording at the HealthCare.gov call center conveyed a similar message. Things seemed to be running normally by about 9 a.m. EDT.

With health care a major issue in Tuesday's elections, this sign-up season under the Trump administration is getting close scrutiny.

In earlier years, technical problems with the site created major headaches for the Obama administration. Some Democrats cited HealthCare.gov's meltdown after its 2013 debut as one of the reasons they lost control of the Senate the following year.

Since those initial problems were fixed, the website serving people in 39 states has worked fairly smoothly, first under President Barack Obama and now under Donald Trump. The rest of the states and the District of Columbia run their own sign-ups.

A spokesperson for the Centers for Medicare and Medicaid Services said Thursday morning that HealthCare.gov was open for business.

Before the site went live for sign-ups at the start of a new coverage year, technicians had to load up details on thousands of changes in plans and premiums.

"Prior to every open enrollment, final preparations must take place ahead of the start of the open enrollment period to ensure the website runs smoothly for consumers," said a statement from the agency. The statement said the agency's commitment had been that the site would be ready "in the morning."

The health law's sixth sign-up season began with stabilizing premiums and more choices for consumers.

Nationally, average premiums are going up only by low single-digit percentages for 2019. In some states, and for some types of plans, premiums will decline. Fewer areas will see increases. Insurers also are expanding their participation.

But Republicans have not backed off their pledge to fully repeal the health law, despite failing to do so in Trump's first year. Still, other changes by the GOP-run Congress and the administration for next year may result in fewer people signing up.

Congress did get rid of the unpopular requirement that most people carry health insurance or risk fines, starting Jan. 1. The administration has opened the way for insurers to offer alternatives to the law's comprehensive coverage, including plans that don't have to cover pre-existing conditions.

Democrats have made maintaining protections for pre-existing conditions a major issue in the elections, forcing Republicans on the defensive. They also accuse Trump of trying to "sabotage" the health law, and a core group of former Obama administration officials has kept close tabs on sign-up season.

Despite all the political drama, enrollment has remained remarkably stable.

About 10 million people have private policies through HealthCare.gov and state-run insurance markets, with roughly 9 in 10 getting taxpayer-financed help to pay their premiums. An estimated 12 million more are covered through the law's Medicaid expansion, aimed at low-income adults.

Income-based subsidies that protect consumers from high premiums remain available for next year, as has been the case since the overhaul went into effect. Open enrollment ends Dec. 15 for coverage starting Jan. 1.

AMERICAN OVERSIGHT

- Commercial lending
- Multifamily lending
- Small business lending
- Socioeconomic change
- Concentration of jobs

Summary:

The Tax Cuts and Jobs Act of 2017 established an Opportunity Zone tax incentive, which allows taxpayers to defer paying federal tax on capital gains from the sale of property if those gains are invested in Qualified Opportunity Funds that invest 90% of their assets in businesses located or property used in a designated low-income community. Investors receive modest reductions in their eventual tax bill if they maintain their Opportunity Fund investments for at least five and then seven years. Investors that hold capital in those funds for a full ten years also do not have to pay capital gains tax on the appreciation of their Opportunity Zone investments.

GOVERNOR SANDOVAL NOMINATES 61 OPPORTUNITY ZONES

CARSON CITY, NV – Governor Brian Sandoval today nominated 61 opportunity zones, pursuant to the Tax Cuts and Jobs Act of 2017, which established an Opportunity Zone tax incentive, designed to encourage long-term private investment in low-income communities.

"During my time as Governor, we have invested significant resources in Nevada," Governor Brian Sandoval said. "While we have seen substantial returns, there are still parts of our state that need additional assistance. It is my hope that by nominating these 61 low-income opportunity zones, private investors will choose to fund projects in these areas that benefit the Nevadans who need it most. What's more, we believe that communities surrounding the 61 opportunity zones will also benefit from investment in the zones."

The 61 opportunity zone nominations directly impact more than 230,000 Nevadans in some of Nevada's most disadvantaged communities.

In the 61 tracts:
Average family income is approximately $37,000

AMERICAN OVERSIGHT

(Just 60% of median statewide family income of approximately $62,500)
Average unemployment rate from 2011-2015 is16%
Nearly 2x greater than the national unemployment rate

The Opportunity Zone program runs on essentially two tracks – first, Governors in each state nominate opportunity zones, which are low-income community census tracts that could benefit from significant private investment. Second, once the zones are certified by the U.S. Treasury Department, interested private investors must invest in opportunity funds, specialized vehicles that can then be utilized to invest in the certified opportunity zones.

> Census Tract 32029970200 meets the qualifications established by H.R. 1 SEC. 1400Z(e) as a census tract contiguous with a low-income community. First, Census tract 32029970200 is contiguous with Census Tract 32019960201, a low-income community that is being submitted for designation as an Opportunity Zone. Second, the attached 2012-2016 American Community Survey demonstrates that the median family income of tract 32029970200 does not exceed 125 percent of the median family income of low-income community tract 32019960201. I nominate census tract 32029970200 as a qualified opportunity zone; my office stands ready to answer any questions or provide additional supporting information upon request. In the event that you do not designate this tract, I reserve my right to provide a substitute tract in its place.

Subject: Gift Protocol and Scheduling [SEC=UNCLASSIFIED]

UNCLASSIFIED

Hi All –

On this email I've included the folks I worked with from the respective Governors' offices on gift exchanges. I've also included two NGA representatives in Abigail Hunter and Arianna Cicchinelli, who've helped immensely with coordinating all things Winter Meeting. Finally, I've cc-ed the Embassy's gift officer/liaison Will Read.

Protocol for exchanging gifts is done at a staff level in Australia, so the purpose of this email is to find the best time that Will Read can exchange gifts with Governors' staff. He'll have the PM's gifts for Governors Sandoval, Bullock and Murphy in hand by Thursday afternoon.

We're hoping to have any gift exchanges completed on Friday as the PM is departing Washington directly from the NGA Winter Meeting at the JW Marriott on Saturday. Two options we discussed:

1) Will Read exchanging any gifts with a NGA representative and/or Governors' staff on Friday at the JW Marriott.
2) Will Read exchanging any gifts with a NGA representative and/or Governors' staff on Friday at the Embassy Reception.

Finally, the PM is required to declare gifts from foreign officials with Australian customs. He also must report the "cost in country" (cost with no sales tax) of the gift with Parliament. If your Governor is planning to provide the PM with a gift, please let Will know the cost of the gift, so we can alert the PM's team.

There are several parties involved here, so if we can find a time to do all of the swaps at once that would be preferable.

Please don't hesitate to let Will or myself know if y'all have any questions.

Best -
Alex

2. PUBLIC COMMENT

Governor Sandoval asked if there were any members of the public present or on the telephone who wanted to provide public comment to the Board. There were none.

3. GOVERNOR SANDOVAL'S COMMENTS

Governor Sandoval said they had a very fruitful trade mission to Ghana and South Africa, in no small part due to Director Anderson and his staff's hard work and preparation. It was a successful trip on the water front, the education front, and the business front. More details will be provided at the next full meeting.

4. REVIEW AND APPROVAL OF ECONOMIC DEVELOPMENT FINANCING PROPOSAL (EPFP) TAHOE RENO INDUSTRIAL CENTER EFFLUENT WATER PIPELINE

Director Anderson gave an overview of the Effluent Pipeline Project and the request for bonding authority of $35 million in order to facilitate the construction of this pipeline.

The authority from the Governor's Office of Economic Development came out of SB 1, what is often referred to as the Faraday Special Session that referenced a development out at Apex Industrial Park. At the time, there was not the infrastructure to support such a project so bonding authority was needed in order to facilitate the construction of that infrastructure. Authority was afforded to this office.

One of the qualifiers is having a qualified project; which means an entity that is willing to do a capital investment of over $1 billion. Currently, the area that we're

AMERICAN OVERSIGHT

talking about, the Tahoe Regional Industrial Complex, or TRIC, has a single qualifying entity, which is the Tesla Gigafactory. They qualify under those rules to be to, in conjunction with other partners, to access the bonding authority in this office.

The qualifiers that come into play have to do with what is the public good, what are the environmental impacts, and what are the economic development benefits. As we look at TRIC and the economic catalyst it's been, we see its continued development is important to our State and we recognize the benefits as well.

The benefits are such that we felt so inclined to utilize some of the bonding authority that this office has with the Governor's Counsel and discussion, in order to help facilitate the building of an effluent pipeline that will utilize water that's non-potable, that's been treated and sent via this 13-mile pipeline up to TRIC, to be used according to the needs of the development there. It's important that we understand the benefits both to the public and to the residents of northern Nevada, as well as Nevada as a whole, to keep that project running smoothly. There are opportunities that, pending approval and development, that can't take place without water. It's important to keep in mind both the short-term and long-term impact that this pipeline will have for the future development up there.

Director Anderson then turned the floor over to Pat Whitten, Storey County Manager.

Pat Whitten introduced himself and reminded Members that Storey County appeared before the Board a year ago, asking the Board to consider their Economic Development Financing Proposal, structured to bring 4,000 acre-feet of partially treated effluent water from the Truckee Meadows Water Reclamation Facility to the Tahoe Reno Industrial Center as a means to further stimulate economic growth and build out. Subsequent to their submittal, they found it necessary to withdraw and regroup in order to find the best way to structure financing in accordance with provisions of SB 1 of the 2015 Special Session. Today, Storey County was back with an "even better" approach to finance the offsite portion of the project, which entails building approximately 13-miles of pipeline from Sparks to the Industrial Park.

The structure has changed somewhat and the parties, except the State and Storey County, have changed substantially. Instead of one developer involved, there now are six, including corporate giants such as Google, Tesla and Switch. The new developers bring a desire and a willingness to pay upfront through the special assessment district process. Having low cost water available to these companies, coupled with the Governor's recent actions to include all of TRIC as eligible for the Federal Government Opportunity Zone Program should provide the catalyst these companies need to fully develop the properties they own in Nevada. The Storey

AMERICAN OVERSIGHT

County Board of Commissioners voted unanimously last Tuesday to forward this proposal to you for your consideration.

Mr. Whitten introduced Mr. Marty Johnson, who gave more details of the proposal.

Mr. Marty Johnson with J&A Consulting Group explained that J&A are the financial advisors to Storey County; they were asked to assist the county with this project. Mr. Johnson ran through a presentation that was given to the Storey County Commission last week that lays out the specific details of this proposal and the project.

Storey County has proposed to fund offsite improvements through an effluent pipeline with bonds issued by Storey County that are paid from a special assessment district on the property that these companies own. The onsite distribution and treatment of those additional facilities, treatment facilities, the distribution lines that will take it from the pipeline to the various parcels where the water is used, all of those would be financed and paid for by the private companies. They are not asking for the State or the County to help participate in those. In conjunction with this process but outside of what is used to repay the bonds, they are asking the County to form a tax increment area. Those revenues would be used solely to reimburse the parcel owners, the property owners, for the assessments that they pay. Unlike the proposal that happened a year ago where those were the revenues that secured the bonds, here it is solely a reimbursement mechanism that would be used.

Mr. Brian Gordon with Applied Analysis went into further detail and had the following to say. "We've been working with the private sector development team, as well as all of the folks up North in Storey County and the consultants for Storey County as part of this process. This offsite pipeline carries a development cost of about $35 million. That's what is being contemplated as part of a special assessment district. A fully 100% consent of those property owners that are committing to make those payments under that special assessment district. In addition to that, there's a portion of the project which we have been calling the onsite portion of the project which, the first phase of that would be another $30 million, which would bring that effluent water into—that would include storage as well as, transmission for that water. Then there's a second phase of that onsite portion of the project, which would be the advanced treatment facilities, to bring that water up to a standard that would be suitable for the users within the TRI Center itself, companies like, Tesla, Google, Switch.

What we're talking about is the financing of the $35 million through a special assessment district. The balance of the project, fairly significant, would be fully financed by private development, private financing through the developers and property owners within that district.

AMERICAN OVERSIGHT

Some of the benefits, really, we looked at three different areas as part of the benefits. The benefits, both to Washoe County as well as Storey County, as well as TRI Center itself. As far as environmental benefits, the Truckee Meadows water shed has been somewhat of a fragile and one of the most litigated water sources in the Western United States. That includes the Truckee River. This project would divert 4,000 acre-feet of water that would typically go into the Truckee River. That would tend to be high nitrate type of water. That requires additional environmental fixes, if you will, as it relates to the quality of that water. So, what this project would do is divert that water through this pipeline, up to Storey County, in the Tahoe Reno Industrial Center which would then be used for some of these other uses by some of those major companies that we've been talking about.

This would resolve one of those environmental issues, certainly, TMWRF, the Truckee Meadows Water Reclamation Facility would not be giving up this 4,000 acre-feet necessary. There would be reimbursements for the same amount of water. So, on a net/net basis, it would be a wash, if you will, for them. If the project didn't move forward, TMWRF at some point, would be required to invest in its infrastructure to treat the water there, that would entail an estimated capital cost of about $30-40 million down at TMWRF, as well as annual recurring maintenance costs of about $1.5 million."

Pat Mulroy from Switch gave further details about the project:
"Obviously, since this is one of the most litigated rivers in the west, this was not an easy jigsaw puzzle to put together from a water resource standpoint. Even though there are significant water quality improvements to the end of the system, if you will, for the Cui-Ui fish and for the Tribe. We sit at the end of this system because you are removing these nitrates that are on any number of occasions during the course of the year, causing the Truckee Meadows Water Reclamation Facility to be out of compliance with EPA Clean Water Standards. They knew they had to invest a significant amount in order to get up there. It removes those and allows this facility to discharge without causing those nitrate issues that are problematic for the fish at the other end. There was a need to replace that source of water because the Truckee is completely subscribed for. What leaves the Reno area, goes down to the Fallon area where the Fallon farmers are reliant on this water source. Then at the end of the system, you have the Indian Tribe and you have an endangered fish, also dependent on this water source.

Two agreements were negotiated. The first was the actual effluent agreement with the Cities of Sparks and Reno who control the TMWRF facility. And in it, their reimbursements are identified. It's a 50-year lease, a lease that can go up to 50-60 years. We do not own the water. We never own the water. No one—neither TRIC nor any of the companies will hold title to the water. The water stays, in terms of ownership, with the Reno Sparks area. The TRIC is simply leasing that water supply for the term of 50-60 years. Then, they will reimburse the City of Sparks and the TMWRF facilities for all extraneous expenses, any capital improvements that need

AMERICAN OVERSIGHT

to be made to that facility, in order to facilitate this endeavor and make essentially, the Reno Sparks area whole.

The second agreement was a little trickier, but it was just recently approved by TMWA, which is the return flow management agreement. In it, the companies, TRIC has committed that they will turn over for use by TMWA during the course of this agreement their Truckee River Rights of 1,500 acre-feet, to manage the river for instream flows. The companies will also pay for an adjudication process on ground water rights that are available through State right-of-ways with the Department of Transportation. Those will be adjudicated. The cost of that adjudication will be borne by the companies. And that water as well will be turned over to TMWA for management purposes to make the river whole.

The objective was that no one loses in this proposition. During the course of this, I know that I've participated in one meeting with the Tribe, but I know that Mr. Taggert has participated in a number of meetings with the Tribe. We stay committed to continue our conversation with the Tribe, as we go through the water rights process on the ground water portion of this.

So, from a water resource perspective in the west, this is one of the most creative and forward thinking projects anywhere in the Western United States today. For an industrial complex to take effluent water, be willing to pay for the infrastructure, $35 million offsite, $30 million plus, it could go quite high in terms of treatment costs for the onsite, so you could easily break the $100 million mark on the cost of this and be willing to make that kind of an investment in order to be environmentally sustainable and to be responsible in terms of their water use really has no equals in the west today. So, Nevada is standing proud in being able to deliver this kind of a project to the western water resource dialogue and development."

Governor Sandoval asked if the TMWA rate payers, likely will save money because they won't have to pay for the treatment of all that water in the years to come? Ms. Mulroy responded by saying that they would benefit in two ways.

"TMWA rate payers, also TMWRF rate payers in many ways. That avoided cost of $40 million is going to prevent the wastewater rates from having to go up. And, to the extent that the companies will be reimbursing TMWA for their management, water management, of the River, there will be a benefit to the TMWA rate payers as well. The bigger benefit for TMWA and for the larger Reno Sparks area is that it provides maximum flexibility to TMWA, to be able to manage the flows in that river, no matter what the hydrology looks like in the system. The companies have stepped forward as full and equal partners in that endeavor and are going to take their seat at the table."

Governor Sandoval asked if Pyramid Lake and the Tribe would receive the same amount of water, but a higher quality of water? Ms. Mulroy responded, "They will

AMERICAN OVERSIGHT

have a much improved quality of water, which will significantly help the fish, help the Cui-Ui fish, up there. And, we are committed to making sure that the Tribe is not negatively affected by this agreement."

Then Governor Sandoval asked is there was any type of discharge that comes from TRIC back to the river? Ms. Mulroy responded, "NDEP has been quite clear, there can be no discharge from TRIC, back into the river. What the intent is, is to have a second pass-thru for reuse. So, water that is not put to full consumptive use will once again enter the recycle process and be used once again. So, it will all stay contained in the TRIC area which saves that much more water."

Governor Sandoval asked if there were any other questions or comments, and Lieutenant Governor Hutchinson had some. First the Lieutenant Governor asked for clarification on the term of the lease. Ms. Mulroy stated the original term was 40 years and it can be extended. The Lieutenant Governor then asked how does the lease term coincide with the infrastructure life expectation and were they satisfied that those match up? Ms. Mulroy stated the bonds should be paid off before the lease expires, so it's a 20-25 year window for the bonding. And then as far as the life of the infrastructure, so it's even after the bonds are paid off. It's 80-90 years.

Ms. Mulroy assured the Members, "With proper maintenance and to the extent that TMWA is a full partner and the companies are committed to bringing in professional management for the system. I don't have a concern in the world that that system won't be managed appropriately."

Lieutenant Governor Hutchinson asked Ms. Mulroy, "Just based on your experience and having acknowledged that this is a highly litigious area and a place that is often challenged. You've met with lots of different interest groups. Do you foresee any challenge to this project, beyond the parties that you've spoken to, other interested parties that you anticipate? Any environmental groups, that sort of thing that could come in and try to challenge this?"

Ms. Mulroy responded, "There have been several public forums in which those would've emerged and to date, no one has raised their head and said anything. I think the proof is going to be in moving through the groundwater adjudication process and through the TMWA water resource management process, in managing the river. It will be iterative, it will be year to year. I think the big partner whose needs have to be addressed is the Tribe. I think they appreciate that we're being sincere. That they're not going to get rolled in this process. That we know what our obligations are to the river and that we have to keep them whole. So, they really stand to benefit."

Mr. Barrett posed a question about the permitting process for such a challenging undertaking; what was the status? Ms. Mulroy's answer was, "There is a permitting process that is still ahead of us. Brent Farr from Farr Engineering, who is overseeing

AMERICAN OVERSIGHT

the construction of this project is up north and can answer those questions in greater detail. Some of the land is owned by the City of Sparks, so obviously that permitting has to happen. Some of it's owned by the State of Nevada, so that permitting, it has to happen. There is a small section where we have to cross Core of Engineer Land, so you're going to have to get a 404 Permit. But that is standard. You can't do anything in the State of Nevada without getting those permits. And obviously, we're fully committed to being compliant with all the conditions around those permits."

Governor Sandoval asked a follow-up environmental question, "That 13 miles is going to be crisscrossing some of the most sensitive land in northern Nevada, given it's adjacent to the Truckee River. Are there any environmental concerns associated with the construction portion of the project?"

Mr. Bob Sader, an Officer in TRI general improvement district, which will be the entity that builds and operates this pipeline answered, "In that capacity, to address the question, I've been very involved in the right-of-way process for the path of the pipeline which generally speaking, goes down the east Truckee Canyon, until it goes over a mountain and into TRI Center.

We've been working on the right-of-way for a couple of years. We have gone through three or four different alignments and we have consciously chosen the alignment that has the least environmental impacts. We, so far, in the process of actually physically inspecting each of these parcels, each—all of the alignment, we do not believe that we have any significant environmental issues.

We have no wetlands. We do not cross the Truckee River. We do not enter into Federal Lands. There are two state parcels, owned by the State of Nevada. We've had discussions with the Public Lands about the application for that. We've had a lot of engineering, a high-degree of engineering on this right-of-way. We do not believe we have any significant environmental problems."

Mr. Klaich asked if the agreements with Reno and Sparks had been finalized? Ms. Mulroy affirmed they had been finalized. They were approved by both the Sparks City Council and the Reno City Council, in terms of the lease agreement and then for the agreement on the return flow management agreement. That has gone through TMWA and is awaiting final approval from Reno and Sparks.

Mr. Klaich went on to say that not having the agreements in hand gave him a little discomfort. Mr. Paul Taggert responded to Mr. Klaich by saying, "The return flow management agreement has been approved by both Reno Sparks and TMWA. We can provide you with a copy of that, but that was a very detailed agreement on how we'll manage the return flows to the river, to accommodate changes made by this treated effluent pipeline. So, we went through the effort of first getting the initial agreement approved by those entities, those two cities, and then also getting the

AMERICAN OVERSIGHT

subsequent agreement approved by them and the water manager in the Truckee Meadows."

Mr. Klaich asked if it was Mr. Taggert's representation that those agreements provide substantial economic benefits to the Cities of Reno and Sparks? Mr. Taggert responded, "Yes, that's—it's certainly true. And the main idea is that there is a voided cost in upgrading the TMWRF facility for treating effluent, because simply, capacity is being created in those facilities by taking this water out of the river. It changes the timeline for when they would otherwise need to do more improvements to their facilities."

Mr. Klaich asked, "Is it your belief that the easement can be acquired and the property or the project can be completed, this offsite project can be completed within the $35 million of the bond proceeds? Has that easement or right-of-way been acquired?" Mr. Sader confirmed the easement had not yet been acquired; they didn't want to go forward with the right-of-way until all the agreements were completed and approved. As to the $35 million figure, it is the best estimate at this point. It's an engineer's estimate. Costs will be refined as all of the engineering is completed. They believe it is in the $35 million range and if there is a surplus, the assessment payors are going to have to pay the surplus.

Governor Sandoval asked if there were other questions or comments, and there were none. The presentation continued.

Mr. Gordon gave an overview of the benefits related to the TRI Center:
The idea here is that there's 12,700 developable acres in the Center itself. This water would essentially free up future development activity, as well as the intensity of that development activity. We've talked about some of the companies,
Tesla, you're very familiar with. We have some representatives in the room here today, in the Gigafactory and all of the investment being made there. Switch, as it relates to their 1.5 million square feet that's in the ground today, in their Citadel Campus within the Center and potential plans for an excess of 7 million square feet of data center facilities up in the TRI Center. Google has acquired a significant amount of land, as you're aware, within the TRI Center. They are also evaluating their development plans for the future up in TRI Center. Then you have these other developers, unknown developers, Reno Land, as well as Emerald City, that intend to develop a Town Square, if you will, up in the TRI Center. So, a solid group in terms of the participants in this project.

Essentially, the water infrastructure at TRI will increase the intensity, as well as the timeline for future development activity. So, you're talking about data centers, advanced manufacturing and other future development activity there. These are the types of facilities that require more water than typical distribution or warehouse facilities, which is why there's a need for this particular type of water and this project overall.

AMERICAN OVERSIGHT

These types of developments generally lead to higher yields, higher levels of investment, these are capital intensive types of businesses. I think you've seen some of what's already taken place, in terms of the development activity by Tesla, as well as Switch and then you have other players looking to develop as well.

These projects also generate employment with higher wages than the average. That's also a benefit overall. Just greater overall economic activity is generated by these hi-tech advanced manufacturing types of companies, as opposed to more traditional real estate development.

In terms of the private investment. We talked about the $35 million of this particular project. The storage, transmission and treatment facilities could add another $65-$105 million. So, a total project cost of about $100-$150 million. The private sector is going to be funding the balance of that, in addition to the payments under the special assessment district that the private sector is committing to.

In terms of the financing, I think you may hear more about that as part of this presentation, but essentially, the underlying real estate value will be required to have a 3.5 times value, relative to the amount that's being considered for bonding. So, it would be 3.5 times $35 million we're talking about under the special assessment district.

At present, the current appraisal is suggesting a 7 times value, when this project is completed. So, nearly twice the requirement. That provides a lot of security as it relates to the financing side of the equation.

At the same time, the group is also requesting a tax increment area, through Storey County be developed. Essentially, the idea being that as future development is created and investments are made, there's incremental value that is created with these same property owners that we're talking about under the special assessment district.

So, as increment is generated, they make more investments. Those—a portion of those incremental tax dollars would inure back to those private sector developers, to reimburse them for up to the amount of the offsite improvements, or the $35 million that we're talking about. That would be the maximum amount that would ever be reimbursed under a potential tax increment area, would be the $35 million that's being financed under a special assessment district.

That aligns with State statutes, specifically, if helpful for the record, NRS 278C.150, Developer Reimbursements for Construction of Wastewater Infrastructure Projects. Storey County would create that. Again, these would be the same companies and portions of those incremental revenues, would inure back to the private sector developers.

AMERICAN OVERSIGHT

If there was no future development activity and no additional investments made, there would simply be no additional tax dollars going back to the private sector development. The more they invest, potentially the quicker they get reimbursed on that first $35 million. To the extent they don't, there is no reimbursement and they are fully committing to make the payments on that $35 million special assessment district, regardless if future tax revenues ultimately are generated.

The final leg in the stool, if you will, in terms of the benefits would be Storey County. We'll talk a little bit more here about what that means for the County itself. Obviously, the existence of the pipeline itself would add additional value in Storey County, open up properties for future development and higher intense uses that I've mentioned. All of that would provide increased economic opportunity within Storey County.

With respect to the tax increment area that I mentioned, that would be a reimbursement of a portion of the pipeline and overall infrastructure costs. It would exclude any taxes that are scheduled to go to special districts such as the school districts. Both their operations and capital portions of the property tax rate, those will continue to go there, as currently scheduled. Those are excluded from any increment or reimbursement back as part of this project.

Only 50% of the sales and use taxes are eligible for reimbursement back for this project. 50% would stay with the original taxing entities as they are currently scheduled and only half of the modified business tax or payroll tax would be eligible for reimbursement back towards these infrastructure costs.

Taxes, overall, over the next 20 years that are likely to be generated, assuming a relatively conservative schedule of development for the types of companies that we're talking about. It could be in excess of $1 billion. This $35 million would represent less than 5% of the total taxes being generated so that would mean more than 95% of the taxes being generated would still go back to all of the original taxing entities over the course of the next 20 years.

Once the $35 million reimbursement was made, as it relates to the offsite portion of the pipeline project, 100% of all incremental taxes would go back to the original taxing entities and no more would go to the private sector for reimbursement under the project.

The water will also provide a stable source of water and provide increased stability in terms of the overall economic activity for Storey County as a whole. Again, this infrastructure will be dedicated to the TRI/GID, once completed. So, pretty significant transfer to the GID or public entity.

AMERICAN OVERSIGHT

At the end of the day, overall, there are significant economic and fiscal benefits to the parties involved. We've talked through what it means within Storey County in the local jurisdictions there. Also, as well as what happens in TRI Center and the additional opportunities that are there; the fiscal and economic benefits to Storey County as a whole.

This aligns exactly with the legislation that was designed that Director Anderson mentioned at the outset, as it relates to economic development, bonding capacity and makes a lot of sense for the reasons I've outlined here.

Governor Sandoval asked if property owners, homeowners of Storey County have any risk at all associated with this project and this bonding, in a worse-case scenario?

Mr. Gordon gave this explanation: All property owners are going to continue to pay the normal taxes and operate as usual. The only sort of exposure relates to the special assessment district and that is 100% consent of all the property owners within that district. He went on with the overview.

Assessment Districts are allowed under NRS 271. An assessment is indeed a lien on the property. It is co-equal to property taxes. So, if you do not pay an assessment, we can foreclose on your property. Part of the whole deal with an assessment district and bonds is that, if they are delinquencies, there will be foreclosures. It's not a might be, it's a will be.

The assessments are billed and collected semi-annually. They are not done with the tax bill. So, there is a need to have someone, whether that's a company, the County, whoever it might be, actually manage the billing and collection of the assessments in this process. The assessments, under statute, can go for a term of up to 30 years

Under the current proposal, the County would issue assessment district bonds and those bonds would then be purchased by the State through the Bond Bank Program. That allows the interest rate on the state bonds to be passed through to the County bonds, which provides pretty much the lowest cost to capital we're able to get for a Nevada local government.

Here is the key to how this works. The bonds are paid first and foremost from the assessment payments. So, again, every six months there is a bill that needs to be paid for those assessments. Then typically, two months later and it can be a little bit longer than that depending on how things line up, the bond payments are made. So, the assessments' payments come in. We've got generally at least two months before we need to use those funds to make the bond payments.

To the extent the assessment payments are insufficient, we have other resources within the special assessment district. In addition to these other resources and cash

AMERICAN OVERSIGHT

available, we will have a reserve fund that is funded out of bond proceeds, the day of closing of the bond transaction, equal to one year's debt service. So, theoretically, if all of the property owners were delinquent, we have enough money in the bank to make the payment for at least a year

.

If those three resources are insufficient, then the County is on the hook to the amount of its uncommitted General Fund balance or the amount of the annual payment. So, there is risk, but what we have worked with, the project sponsors to develop, is a plan where that risk is mitigated.

If that uncommitted portion of the County's General Fund, which again our estimate for the end of this current fiscal year will be $2.8 million, if that money was gone, then the State's General Fund would be kicked in, in order to pay the state bonds.

The maximum term allowed for the bonds is 30 years, which is well within the terms of the lease that Ms. Mulroy was describing. The County's guidelines for these types of financing states 20 years but the developer has requested 25 and that is something that we are working with them on.

Foreclosures are an important component in the security for this transaction in trying to make sure that the county's and eventually the State's General Fund would never be hit. If there are delinquencies, we will foreclose.

Kendra Follett detailed foreclosure proceedings using a hypothetical example: Assume there is a June 1 payment date, just for discussion purposes. Sixty-days (60) days prior that June 1 date, a bill is sent to the property owner, notifying them that the payment is due on June 1st. If it continues on in delinquency, three consecutive notices are sent: one on the 5th day of the month, following the payment date and then the next 30 days later, the next 60 days later with the third delinquent bill being mailed. Thereafter, at the time the third delinquent bill is mailed, a lot book is prepared where all of the liens on the parcel are identified. By statute, assessment liens and property taxes have a co-equal lien in foreclosure. The Notice of Sale on the Foreclosure is sent the first of week of September and the foreclosure sale would occur sometime in September. So, all in, it's about a three-month process and this is particular to assessment districts under Chapter 271. The foreclosure procedure happens fairly quickly compared to regular property tax foreclosures.

Mr. Johnson added a few more points:
The foreclosure is initiated on the entire amount of the assessment. So, it's not just the amount that's delinquent. Once that property is sold and that money is received, a corresponding amount of bonds are paid off and so, that parcel is done. We don't care who owns it, if they're delinquent with their property taxes, at least as far as the assessment district is concerned because a portion of those bonds get paid off. But that is the mechanism under which that foreclosure happens.

AMERICAN OVERSIGHT

If you think about the timing between the assessment payment and then approximately two months later, the bond payment, having a one year reserve, having this foreclosure process take three to four months, we will be able to move very quickly to make sure that there are resources there to make payments before we would ever have to get to that uncommitted portion of the County's General Fund.

Governor Sandoval commented that the fact that the local government approved this is important to note. He asked Mr. Whitten how the residents from Storey County felt? Was there any opposition? Mr. Whitten responded that the vast majority were in favor of the pipeline, but some call it "corporate welfare."

Mr. Klaich had a question about the foreclosures. What are you foreclosing on? The property of the defaulting partner within the special assessment district? Kendra Follett explained that you're foreclosing on the property that has the assessment lien on it. When the assessment ordinance is adopted, it will levy assessments which are liens against each of the parcels in the amount of the assessment allocated to each parcel. If they're delinquent, then you process the foreclosure.

The County will hold the foreclosure sale. It will sell the parcel for at least the amount of the assessment and any unpaid property taxes. Then a certificate will be issued to the person who buys it at auction in the foreclosure sale.

Now, thereafter, the County is out of it because the County has been paid the full amount of the assessment and any unpaid property taxes. All the rest of the liens are wiped out, mortgages, second mortgages, you know, whatever other liens are on there that are below property taxes and assessments. And, then that certificate holder who buys it at auction has a certificate and the property owner has a statutory period of time to redeem that certificate from the certificate holder after paying them penalties and fees. But at that point, the County is out.

Mr. Klaich asked for more clarification. Mr. Johnson offered this explanation to help clear things up:
We talked about having a value to lien of at least 3.5:1. So, part of what we do is get an appraisal as to what these various parcels will be worth when the project is complete and compare that to what the amount that is going to be assessed is and we want that ratio to be at least 3.5:1.

With the idea being that in the event we hit an economic downturn and someone does not pay their assessments, that we're not trying to get the dollar that the property was worth when we did it, we're looking for some cents on the dollar, in order to make everything whole.

So, we're not doing this at a 1:1 ratio, we're looking at 3.5:1. So, the equivalent of a, you know, million dollar home would need to go for $350,000 in order to make

AMERICAN OVERSIGHT

this all work. So, that helps create some of the—the security that we'll be able to get the money out of it that we need.

Lieutenant Governor Hutchison wanted to make sure he understands the relationship between the special assessment district and the tax increment area. He asked if those are the same parcels or is the special assessment district larger and if so, what's the geographic area of the special assessment district?

Mr. Gordon responded: There are two parcels located within the TRIC that are within the special assessment district, but not within the tax increment area. They just happened to be two parcels that have improvements on them today. The idea being that, all of the properties in the tax increment area are sitting vacant today.

The participants in the special assessment district and the TIA, they're the same six companies. Two of the parcels, one happens to be owned by Switch, one happens to be owned by Tesla, are in the special assessment district, but not in the tax increment area. So it's the same companies within both.

Lieutenant Governor Hutchison had some questions about the tax increment area. "Within the tax increment area, really what's happening is the developers are fronting the money and then they're getting paid on the back-end, through various taxes that are going to be used to pay the $35 million, correct?" Mr. Gordon concurred.

The Lieutenant Governor then asked, "And then, once those taxes have satisfied that $35 million, it goes back to the government entities that would otherwise receive those taxes, right?" Again Mr. Gordon concurred.

The Lieutenant Governor went on, "And then, the only way that Storey County is on the hook is if the special assessment district does not provide sufficient funding for the repayment of the bonds. That's when Storey County's General Fund would kick in, right?" Mr. Gordon said his understanding was if the payment is under the special assessments district were not made for some reasons, then they would go through the procedures that he outlined.

Mr. Johnson said it's only if the assessments aren't sufficient. We can't foreclose on the property for whatever reason and sell it, the reserve fund is gone. Then the uncommitted portion of the County's General Fund and when that is no longer sufficient or at zero, then the State General Fund kicks in. our goal is to put as many layers in front of the County's General Fund, which by definition means, they're in front of the State's General Fund.

Lieutenant Governor Hutchison had one final question on the tax increment area. The taxes that are going to be coming into this tax increment area are based on future development. Currently, all the property is vacant, right? Mr. Johnson said

AMERICAN OVERSIGHT

the property taxes that are currently paid will continue to go to the local governments as they currently are. It is only the revenues generated by future increases in value for future business activities that are subject to being swept up in the tax increment area. The Lieutenant Governor surmised that if the vacant land is never developed, the developers assume all the risk. If they don't develop that land in the future, there's no tax revenue that could be generated to reimburse them the $35 million. Mr. Johnson said this was correct.
Mr. Klaich asked if this transaction was approved, is the State otherwise limited in its ability to fund other projects that it might wish to?

Lori Chatwood, Deputy Treasurer of Debt Management for the State Treasurer's Office stated that in the proposal that she saw, the maximum annual debt service was a little bit more than $2 million a year so this should not limit funding other projects.

Mr. Klaich asked if it was correct that they have to provide the Governor with estimates on a biennial basis of bonding capacity that he has available to recommend projects for funding to the legislature?

Ms. Chatwood said the affordability provided to the Governor's Office for the building of other bonding programs in the CIP is based upon the property tax, the $0.17 that we collect for those projects. To the extent that this would be General Fund dollars, prior to it being that $0.17 general obligation pledge, it wouldn't affect affordability. To the extent that the General Fund would not be able to make that $2 million payment, then it would share in that $0.17 and projects would be reduced because this debt service would have to go under the affordability.

Mr. Klaich asked Ms. Chatwood if she anticipated that anything would limit the bonding capacity reported to the Governor as being available for other CIP Projects? Ms. Chatwood answered that to the extent that all of the revenues are sufficient, there would be no impact. First of all, on capacity, being that this is a natural resource, it does not fall under the 2% constitutional debt limit. Therefore, the amount of capacity of bonding under the constitution is not affected.

The Governor asked Ms. Chatwood if she had reached any conclusions or opinions about this transaction. She said, "With the information before this Board now and in my position, I think this has belt and suspenders to date. I'm not saying we are through and wouldn't ask GOED for maybe some additional security, but at first blush, this looks very solid from my opinion."

Ms. Chatwood said that Counsel wanted her to state for the record that that they're issuing this bond if this were to be approved, through the authority of SB 1, which has a blanket limit of $200 million. So, this $35 million would go under that capacity, reducing that $200 million authority in the future.

AMERICAN OVERSIGHT

Mr. Specht had some other question about foreclosures: could they really be processed in a matter of weeks and is there ability to be able to assess the delinquent company fees? So, is the county or state made whole? Kendra Follett stated that Chapter 271 of NRS permits both daily penalty rates and daily interest rates during the delinquent process beginning on the day after the payment is due. There are those fees and they increase quite rapidly, the amount of daily interest and daily penalties that are due on delinquent payments.

There is a long history in the State of Nevada, of foreclosure under 271. Local governments in Nevada have pursued this. They typically hire a consultant to both bill and commence the foreclosure proceedings on their behalf and this is done quite expeditiously and has been for years. There are no bond defaults in the State of Nevada for assessment districts.

Mr. Barrett asked a question on the timing and the matching between the SAD and the tax increment fund. When does the TIF start and when do payments start coming in from the TIF that would go back to the property owners?

Mr. Johnson replied that the special assessment district will be created by the County Commission by the September 18th meeting. The assessment district will be in place shortly after that, the assessments can be levied and that would be effective and we'd be able to issue bonds once a bond ordinance is adopted. Now, that takes two readings from the Storey County Commission and then the State Board of Finance would have to approve the issuance of the State bonds, which would be somewhere in the November timeframe. So that's the assessment district part of this.

The tax increment area, the County cannot start forming that until after IFC approval. Assuming that were to happen in time for us to meet on September 18th as a County Commission and start that process, the tax increment area would be formed. At that point in time, it is effective. There will not be any money within that tax increment area until development is made. There are increases in property values that drive the revenues over what the baseline revenues are today.

So that will be up to the companies in when they start construction on those various parcels. It could be a year from now, it could be five years from now, it could be 25 years from now. But the tax increment area will start and the clock will start ticking. It's at least as long as the bond repayment term is. It would mirror the 25 years for the bond repayment. If there are no incremental revenues during that time, then the property owners would not be able to be reimbursed.

Dr. Havins asked what is the alternative to this project? What if this doesn't go forward? What is the effect on Storey County and what is the effect on this area where the businesses are located that are requiring additional water? Mr. Johnson answered that in terms of the impact on Storey County itself, its finances theoretically will go along the way they currently do because there won't be any

AMERICAN OVERSIGHT

additional revenue, because without the water, there really can't be a whole lot more development out at the Industrial Park.

Mr. Gordon said now there is about 6,000 acre-feet of water. The effluent water pipeline would supply another 4,000 acre-feet of water, bringing the total to 10,000 acre-feet. If the pipeline project does not move forward, then 4,000 acre-feet of water is not transferred and moved toward TRI Center. That would limit the amount of development activity that would be available or could potentially be done up in the center itself.

Governor Sandoval added that the avoided costs associated with Truckee Meadows and the added benefit of better water that goes into Pyramid Lake are priceless, and it's important to have that on the record.

Mr. Specht asked once the pipeline is built, what will be its capacity? Ms. Mulroy said it would be 4,000 acre-feet annually. Mr. Specht asked if that meant that the pipeline is 100% maximized at that point? Does that mean that there's future growth beyond what is planned today?

Ms. Mulroy stated she thought there was an oversizing component on this pipeline. If the Reno Sparks or Washoe County want to lease additional effluent TRIC in the future, the pipeline would afford that opportunity. As the water agreements currently stand, now the water will not come as a steady flow. Because of the variability of the river and the necessity to manage the overall water system, TMWA is making some pretty stiff requirements in terms of what the reservoir capacity, the carryover capacity needs to be on the TRIC site in order to give themselves maximum flexibility to meet all the demands on the river. So, it's going to be managed by TMWA. The objective is, it will be on a ramp up schedule, as the companies build up, there will be an up to 4,000 acre-feet a year of water available to TRIC.

Mr. Specht queried if the infrastructure was going to be at full capacity once completed under the current plan, or would there be an opportunity for additional growth down the road? Ms. Mulroy said it was her understanding that there is a slide oversizing component, so the pipeline will have additional capacity, beyond the 4,000 acre-feet.

Mr. Bob Sader, representing TRI General Improvement District, said that Ms. Mulroy was correct and went on to add these specifics: initially they estimated there pipe needs were going to be 18-inches. This is a force main, water will be under substantial pressure. They then went up to 24 when they found out that flows from TMWRF, the Reno Sparks Sewer Plant would be variable during the year. Now, they have recently made a decision to go up to 30-inches in diameter, in order to be able to accommodate additional flows in the future. They're hoping that that occurs. It is not part of the agreement now with the cities, but it seems a fair possibility that there will be additional flows that we can agree on to accept the TRI Center.

AMERICAN OVERSIGHT

An unidentified speaker asked how they arrived at a $35 million construction budget? Mr. Sader stated that the District Engineers are Farr West Engineering. They have substantial experience building infrastructure and providing similar services to water and sewer systems all over Northern Nevada. They made the engineering estimates that currently come to $35 million, and that's the level projected at this point.

The same unidentified speaker asked if the project costs more than $35 million where does that money come from? If the bonds are going to be sold for $35 million, that's all there is, so where's the rest of the money? Mr. Sader said if there is an overrun in costs that the private parties are going to have to pick that up. It's not borne by the County or by the State, that will be part of the financing agreement, or other agreements that will eventually be negotiated and signed before these bonds are used. The speaker asked who is going to be the owner of the pipeline? Mr. Sader said ownership of the pipeline would transfer to TRIGID upon completion.

Governor Sandoval asked if they were going to hear from some of the private entities that are going to be participating in the project?

Two representatives from Tesla, Chris Riley and Brian Scelfo, stated they were in attendance in full support of the project. They see this project as very exciting for long-term growth at Gigafactory, and Mr. Riley shared a quick snapshot of Gigafactory:

We're currently at 5.4 million square feet of operational space at Gigafactory. The current footprint today is about 1.9 million. That's 30%, approximately, of the full buildout that we're seeing.

In addition to cell production, we're up to 20 gigawatt hours of annual production which is an incredible feat for us and a big milestone. We're also producing all Model 3 Electric Motors, as well as our energy products there. And, continuing to build on that. We're seeing our capital spend and our employee head counts are continuing to grow. We have thousands of team members onsite across Tesla, Panasonic and our other partners there.

On the transportation side, we've also been seeing options for our employees continue to grow and we now have a dedicated shuttle network for around 1,600 plus employees who are utilizing daily shuttles to Gigafactory. We're continuing to work on that transportation infrastructure because we see the growth out here at this park. We see the growth in partnership with our other companies and being able to build this infrastructure is really key for that long-term growth to continue and those jobs and this partnership.

AMERICAN OVERSIGHT

Lieutenant Governor Hutchison asked what were the future plans for those parcels that are part of the TIA? Mr. Scelfo said the Gigafactory is separated into different parcels. Right now, they are only built on the largest parcel, but will be expanding into the other parcels ASAP. The Lieutenant Governor asked if the largest parcel upon which the Gigafactory is currently located, that's not subject to the TIA, it's future development on other parcels. And what is the plan for future development on the other parcels? Mr. Scelfo said they would be expanding into parcels as fast as possible. Legally, the Gigafactory is separated into about 15 legal parcels.

Lieutenant Governor Hutchison asked if they had enough water that they've subscribed to, to build out the Gigafactory or did they need this project in order to build it up fully? Mr. Scelfo said they definitely needed the project to go forward or the full Tesla Gigafactory could not be built.

Mr. Gordon asked if anyone needed to hear from Switch, and no one came forth. The other participant, Google, was unable to attend the meeting, but relayed they are in full support of this project and have indicated they are considering their development plans for the future. Without this water, their development plans would be significantly reduced or may not happen at all.

Mr. Gordon went on to say that Blockchains, Reno Land, and Emerald City Empire have also indicated that the water would be a necessary component of their ultimate development plans.

When Governor Sandoval asked if there were any comments, Mr. Klaich gave this address:
"I think anyone who lives in northern Nevada understands that the TRI Center has fundamentally changed the economy in northern Nevada and there may be those who don't think that change is for the better. I am not one of those.

I think that the development of the Center and the corporate citizens that have come to Nevada have benefited the region enormously and benefited the entire State. The Storey County Manager indicated some of the folks that had come before the County Commission meeting last week and used a phrase of 'corporate welfare'. I think if you try to oversimplify this project and look merely at the aspect of it, of the issuance of these bonds, it's possible that a person could come to that conclusion. Again, I'm not a person who would come to that conclusion. I think that Ms. Mulroy described early on in her testimony a very complicated jigsaw puzzle, which this certainly is. But ultimately, it seems to me that what we're asking, what we're being asked to do today is to facilitate the development of a very complex project that has very tangible benefits for the governmental entities involved and the economy of the region as a whole. I haven't heard anything in the presentation or the responses to the questions at this point that would lead me to believe that we should do anything other than support it."

AMERICAN OVERSIGHT

Director Anderson had nothing but praise for the hard work and effort by Mr. Gordon and Ms. Mulroy. He stated this project is important both from the environmental piece, as well as keeping Nevada on the forefront of really innovative ways to get things done.

Dr. Bennett asked when will water start flowing through that pipeline? Mr. Sader said the current schedule is to commence construction of the pipeline and other facilities necessary in the first quarter of 2019 and to be completed by the end of 2020.

Governor Sandoval closed out the discussion giving this speech:
With regard to the financing, I'm comfortable. I think there's been a significant record that has been made that provides comfort to me, that there is not just sufficient, but extraordinary protection for the people of Storey County, for the people of the State of Nevada associated with the General Fund. Given the layers of protection that are part of this record, again, I think that from every direction, that we have the protections that we need.

I think the record has been made to show that the tough questions have been asked. In terms of providing that record, that there is sufficient financial protection for everybody involved and that ultimately the responsibility is going to fall upon the entities that are within that special improvement district.

With regard to environmental issues. I also believe that there's been a substantial record that has been made that with regard to the avoided costs of the people of Washoe County. That they can avoid the construction of tens of millions of dollars for facilities that will be necessary to clean this water that would otherwise be redirected to the Tahoe Regional Industrial Center.

The water that actually is going to come into the river is going to be better for the benefit of the Tribe. The Tribe was something that was an important issue to me, to provide that record that the Tribe will be protected and the quality of water that ultimately makes its way to Pyramid Lake will be high-quality water.

The other component that was mentioned but I think needs to be repeated is the fact that the facilities will recycle water, there at the Tahoe Reno Industrial Center which will actually save water. Which will be another ultimate benefit to the people of Washoe County, of Storey County and that region.

I'm glad that Mr. Whitten was there with regard to Storey County. As I said, the best evidence is those that are going to be affected directly and this matter was presented to the Storey County Commission and was considered and allowed for public input and public comment. I appreciate Mr. Whitten being candid that yes, there were a few negative voices to that, but overall there was great support for that.

AMERICAN OVERSIGHT

Those Commissioners are elected for a reason, to represent their constituencies and they voted in support of this project.

With regard to economic development, this is the difference between a lot of quality jobs in the region and to continue this New Nevada story of bringing literally some of the best, if not the best jobs in the country to Nevada, to allow for the completion of the Gigafactory. Tesla has exceeded everything that it has promised. I'm someone who was here and listened to that testimony and representation. They're far ahead of where they said they were going to be.

I was just at a press conference yesterday at Cimarron Memorial High School where they—initially they said they were going to donate $37.5 million to education in Nevada. The first tranche of that contribution, $1.5 million came yesterday at this announcement at Cimarron Memorial, which is going to be the first of hopefully the development of robotics teams in every high school or every school in the State and the investment into STEM education throughout Nevada.

I know it was a sensitive situation given that Mr. Kramer is a member of this Board and he's an employee of Switch, but Switch is another significant company in this State that has built the world's largest data center here and will build—here in Las Vegas, but will build another one, and is building another one in northern Nevada. They're a significant and generous corporate citizen. They stand or it stands behind this. Google has already been providing training, free of cost, to the citizens of Washoe County. I'm not sure if they've done it in Clark County as well, but they're not even here and they're doing philanthropic things, with regards to certification and training of people who need it.

Finally, I'll close with this, that we have some of the most trusted and experienced individuals who testified on behalf of this project.

Ms. Mulroy, I believe your knowledge and experience is unimpeachable when it comes to your testimony with regard to the water situation there and the water quality which is very important to me.

Mr. Taggert is one of the most preeminent water lawyers in the State and he's involved in this and has worked with Washoe County and Storey County, City of Sparks, City of Reno.

Mr. Sader, who is a very well respected member of our Legislature and a former Chairman of the Judiciary Committee, and somebody who's had a long public service career, is involved with this project.

Applied Analysis is an entity that I personally know and trust and have taken advantage of associated with some of the most complex tax issues and other issues associated with economic development in this State and without exception, all of the

AMERICAN OVERSIGHT

testimony and the projections that they've provided have always been right on the money and honest and to the point.

So, as I look at this global presentation and yes, this has been a long meeting, but this is a transformational project. It is going to allow for the State of Nevada to lead. We've had nothing but good economic news. We're the most improved state in the country when it comes to employment. We're adding 3,000 jobs a month in this state. Clark County is the fastest growing metropolitan area in the United States of America. Our average wage and Mr. Potts, maybe he's there, correct me if I'm wrong, but our average wage is the highest that it has ever been. We've increased the number—we're at a record level with regard to the number of employers in this State. We've replaced 175,000 lost jobs with 260,000 jobs. I believe that we're at a place where we're resilient, with regard to another recession because we have diversified in the economy in a way that is unlike any other state in the country.

I will tell you, you know, this is just me talking, but the other states would be begging to be in the position that we are in now, to be able to build a $35 million project that will help enhance companies like Tesla, and Google, and Switch and Blockchains. They would trade places with us in a heartbeat.

This is incredibly important to the future of this State. Everyone on this Board has, you know, the right to vote any way that you like. I've put a lot of thought into this and I've lived this from 2011 until now and we never conceived that we would be in the position that we are in now, to be able to make a decision to continue unprecedented growth, so that the State of Nevada is at the foundation of the Fourth Industrial Revolution, when it comes to the type of companies that are coming here, that have come here and will come here and will expand here.

So, I've really appreciated the questions that have been asked during the course of this meeting because it is important that we provide a record as to what's happened. I have full faith and the companies that are going to be participating in this, that they're going to do what they say they're going to do and make those payments, so that we never even have to have the conversation that we've had, with regard to foreclosures and—and those types of things. I'm absolutely confident that we'll never have to go there, but again, the record needed to be made.

Lieutenant Governor Hutchison said "Heaven help the next Governor" having to follow in Governor Sandoval's leadership shadow. He thanked the Governor for his direction and dedication to the New Nevada and closed by saying this was a proud moment for the state and its citizens.

Governor Sandoval said the form of the motion for Agenda Item 4 would be:
The form of the motion would be first to approve the Tahoe Reno Industrial Effluent Water Pipeline Economic Development Financing Proposal, submitted by Storey County, Nevada. That we approve the submission of the proposal to the Interim

AMERICAN OVERSIGHT

Finance Committee of the Nevada Legislature. That we approve to enter into one or more agreements with Storey County or another local government to administer any districts and carry out the projects identified in the proposal as deemed necessary by the Executive Director. That we approve the provision of notice of the approval of the proposal to the Board of County Commissioners of Storey County and the State Board of Finance and that we—the motion include to take all action necessary or appropriate to effectuate the approval of the proposal and provisions of NRS 360.981 to 360.992.

A MOTION WAS MADE BY MR. KLAICH TO APPROVE THE FIVE-PART MOTION FORMULATED BY GOVERNOR SANDOVAL. THIS MOTION WAS SECONDED BY LIEUTENANT GOVERNOR HUTCHISON. THE MOTION PASSED UNANIMOUSLY.

5. REVIEW AND APPROVAL OF STOREY COUNTY RESOLUTIONS 501 & 502

Kendra Follett, Bond Counsel to Storey County, provided the following information: Resolution 501 is a resolution approving the financing proposal. This is adopted by the Board of County Commissioners of Storey County and it directed notification to the Governor's Office of Economic Development and the IFC pursuant to the provisions of NRS 278C and NRS 360. Resolution #502, also concerns the same project and it directs notice to the IFC under a different provision of 278C which specifically relates to the tax increment area.

Mr. Whitten informed everyone that the Storey County Board of Commissioners unanimously approved both Resolutions 501 and 502 a week ago.

Governor Sandoval said he thought all the necessary discussion on 501 and 502 had already taken place during the discussion for Agenda Item Number 4, and asked if anyone had any questions or comments. There were none. The Governor said he would accept a motion to approve Storey County Resolutions 501 and 502, as presented in Agenda Item Number 5.

A MOTION WAS MADE BY MR. SPECHT TO APPROVE STOREY COUNTY RESOLUTIONS 501 & 502 AS PRESENTED IN AGENDA ITEM NUMBER 5. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

6. PUBLIC COMMENT

There was no public comment.

AMERICAN OVERSIGHT

7. ADJOURNMENT

A MOTION WAS MADE BY DR. HAVINS TO ADJOURN THE MEETING. THIS MOTION WAS SECONDED BY MR. BARRETT. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

STATE OF NEVADA

GOVERNOR'S OFFICE OF ECONOMIC DEVELOPMENT

BOARD MEETING

Tuesday, August 14, 2018

SANDOVAL: All right, good afternoon, ladies and gentlemen. I will call the Nevada Governor's Office of Economic Development Board Meeting to order. Will Mariah please call the roll?

HERIMAN: Governor Brian Sandoval?

SANDOVAL: Here.

HERIMAN: Lieutenant Governor Hutchison?

HUTCHISON: I'm here.

HERIMAN: Secretary of State Cegavske? Dr. Havins?

HAVINS: Here.

HERIMAN: Mr. Adam Kramer? Mr. Barrett?

BARRETT: Here.

HERIMAN: Dr. Bennett?

BENNETT: Present.

HERIMAN: Thank you. Mr. Klaich?

KLAICH: Here.

HERIMAN: Mr. Specht?

SPECHT: Here.

HERIMAN: Dr. Thom Reilly? And, Mr. Soderberg?

SODERBERG: Here.

AMERICAN OVERSIGHT

HERIMAN: We do have a quorum.

SANDOVAL: All right, thank you very much. We'll proceed with Agenda Item Number 2, Public Comment. Is there any member of the public present in Las Vegas that would like to provide public comment to the Board? I hear and see no one. Is there anyone present in Carson City that would like to provide public comment to the Board? Dr. Bennett, anyone coming forward?

BENNETT: Governor, no one has come forward, thank you.

SANDOVAL: All right, thank you. Agenda Item Number 3, the Governor's Comments. I'm sure—we'll leave it for another day but we had a very successful trade mission to Africa, to Ghana and South Africa and I want to thank all the individuals that participated in the trip.

As I said, on the water front, education front, business front, it really was a successful mission. It was an honor and privilege to represent the State. I wanted to compliment Director Anderson and his staff for the hard work that they put in, in terms of making it such a successful trip. Thank you for that. I'm sure in a full meeting we'll talk about that in more detail.

We'll move to the Main Event which is Agenda Item Number 4 which is Review and Approval of Economic Development Financing Proposal for the Tahoe Reno Industrial Center Effluent Water Pipeline. Director Anderson, I turn it over to you.

AMERICAN OVERSIGHT

ANDERSON: Thank you Governor and Board Members, thank you for coming on a good important meeting, but also not our normal schedule. So, I appreciate you making yourselves available and Governor, and thank you for having this—or, making this available to us.

Today, we're here to talk about the Effluent Pipeline. That is a development that we're looking to—we're seeking bonding authority of $35 million in order to facilitate the construction of this pipeline. I'll just give you some brief background and introductory remarks and then we'll turn it over to some folks that can get as deep in the weeds as you'd like to get into.

The authority from the Governor's Office of Economic Development came out of SB 1 in the, what is often referred to as the Faraday Special Session that referenced a development out at Apex Industrial Park. At the time, there was not the infrastructure to support such a project of the magnitude that we were discussing. And so, bonding authority in order to facilitate the construction of that infrastructure was—was afforded to this office.

One of the qualifiers is having a qualified project; which means an entity that is willing to do a capital investment of over $1 billion. Currently, the area that we're talking about, the Tahoe Regional Industrial Complex, or TRIC, has a single qualifying entity as we speak, which is the Tesla Gigafactory. They qualify under those rules to be able to access the, or in

AMERICAN OVERSIGHT

conjunction with other partners, to access the bonding authority in this office. And, there's some qualifiers of course, and we'll go through those qualifiers as they're presented to you.

Most of them though are, what is the public good that we need to discuss, the environmental impacts, as well as, the economic development benefits. As we look at TRIC and the economic catalyst it's been, not just for Northern Nevada, but for the entire State of Nevada. We see its continued development is important to our State and we recognize the benefits and we'll talk more about those benefits as we move forward in today's meeting.

The benefits are such that we felt so inclined to utilize some of the bonding authority that this office has with the Governor's Counsel and discussion, in order to help facilitate the building of an effluent pipeline that will utilize water that's non-potable, that's been treated and sent via this 13-mile pipeline up to TRIC, to be used according to the needs of the development there.

I think as we go through this and it's been through a lot of hurdles already and we still have a few more to go. I think as—if I could add some advice is to, let's vet this project as appropriately as needed. It's important that we understand the benefits both to the public and to the residents of northern Nevada, as well as, Nevada as a whole, to keep that project running smoothly.

AMERICAN OVERSIGHT

But I think also, keep in mind the future of that project. There is opportunities that, pending approval and development that can't take place without water. We know that's important for advanced manufacturing, for data centers. Not just for logistics and everything else that may take place up there.

So, we need to keep in mind both the short-term and long-term impact that this pipeline will have for the development— future development up there. With that, Governor, if it's okay, I'll turn it over to Pat Whitten, who I'm not sure if he's up North, is he up North? Pat will do an introductory statement about Storey County's submittal, which was an important piece of the process. They applied to us for this bonding authority and then, from there, we'll turn it over to Marty Johnson from there.

WHITTEN: Good afternoon, Governor Sandoval, distinguished GOED Board Members, Mr. Anderson. For the record, Pat Whitten, Storey County Manager. A little over a year ago, Storey County appeared before this esteemed Board and asked you to consider our Economic Development Financing Proposal, structured to bring 4,000 acre-feet of partially treated effluent water from the Truckee Meadows Water Reclamation Facility to the Tahoe Reno Industrial Center, as a means to further stimulate economic growth and build out.

Both then and now, we saw this as a win-win-win situation for the cities of Sparks and Reno, Storey County and the corporate citizens now owning land in TRIC.

AMERICAN OVERSIGHT

Subsequent to our submittal, we found it necessary to withdraw and regroup in order to find the best way to structure financing in accordance with provisions of SB 1 of the 2015 Special Session.

I'm pleased to say we're back and back with what we think is an even better approach to finance the offsite portion of the project, which entails building approximately 13-miles of pipeline from Sparks to the Industrial Park.

The structure has changed somewhat and the parties, excepting the State and Storey County, have changed substantially, instead of one developer involved, we now have six. Including corporate giants such as Google, Tesla and Switch. The new developers bring a desire and a willingness to pay upfront through the special assessment district process. Having low cost water available to these companies, coupled with the Governor's recent actions to include all of TRIC as eligible for the Federal Government Opportunity Zone Program should provide the catalyst these companies need to fully develop the properties they own in Nevada.

In summary, the Storey County Board of Commissioners voted unanimously last Tuesday to forward this proposal to you for your consideration. We appreciate your time and ideally your support. I'd like to now pass this over to our financial advisor, Marty Johnson, who along with I believe, Brian Gordon and Kendra

AMERICAN OVERSIGHT

Follett here with me, we'll brief you on the details of our proposal. And again, I think you all very much.

JOHNSON: Good afternoon. For the record, Marty Johnson with J&A Consulting Group. We're the financial advisors to Storey County and have been asked to assist them with this project. If it is okay with you, what we would like to do is run through a presentation that was given to the Storey County Commission last week that lays out the specific details of this proposal and the project. As part of that, Brian Gordon, who I'm hoping is there in Las Vegas, will run through some of the project details that Mr. Anderson referred to in the environmental/economic aspects of it. Then, Kendra Follett will discuss some of the legal aspects. So, if that is okay with you folks, I would like to start going through that presentation.

So, hopefully all of you have a copy of it. The first page has got the Storey County seal on it. Going to the first slide, is the proposed project. In this presentation, we will use the term "developer", and that term is generically meant to apply to the companies that Pat identified: Google, Tesla, Switch, Block Chains, Empire and Reno Land.

They have proposed to fund offsite improvements through an effluent pipeline with bonds issued by Storey County that are paid from a special assessment district on the property that these companies own. The onsite distribution and treatment of those additional facilities, treatment facilities, the

AMERICAN OVERSIGHT

distribution lines that will take it from the pipeline to the various parcels where the water is used, all of those would be financed and paid for by the private companies. They are not asking for the State or the County to help participate in those.

In conjunction with this process but outside of what is used to repay the bonds, they are asking the County to form a tax increment area. Those revenues would be used solely to reimburse the parcel owners, the property owners, for the assessments that they pay. Again, unlike the proposal that happened a year ago where those were the revenues that secured the bonds, here it is solely a reimbursement mechanism that would be used.

At this point, I'd like to have Brian talk a little bit more in detail about what the project entails and what some of the benefits are to it. Both to Reno, Sparks, Storey County, as well as some of the environmental aspects.

GORDON: Thank you, Mr. Johnson. For the record, Brian Gordon with Applied Analysis. We've been working with the private sector development team, as well as all of the folks up North in Storey County and the consultants for Storey County as part of this process. You've been provided a general overview of how this project is intended to work.

The idea being, this offsite pipeline carries a development cost of about $35 million. That's what is being contemplated as part of a special assessment district. A fully 100% consent of

AMERICAN OVERSIGHT

those property owners that are committing to make those payments under that special assessment district.

In addition to that, there's a portion of the project which we have been calling the onsite portion of the project which, the first phase of that would be another $30 million, which would bring that effluent water into—that would include storage as well as, transmission for that water.

Then there's a second phase of that onsite portion of the project, which would be the advanced treatment facilities, to bring that water up to a standard that would be suitable for the users within the TRI Center itself, companies like, Tesla, Google, Switch.

What we're talking about is the financing of the $35 million through a special assessment district. The balance of the project, fairly significant, would be fully financed by private development, private financing through the developers and property owners within that district.

Some of the benefits, really, we looked at three different areas as part of the benefits. The benefits, both to Washoe County as well as Storey County, as well as TRI Center itself. I'll just hit some of the highlights with respect to some of those benefits overall.

I'll talk a minute about environmental benefits. I feel a little silly doing that when I have somebody sitting here to my left that knows more about this topic than I could ever learn,

AMERICAN OVERSIGHT

but I'll hit the high points and then Ms. Mulroy will fill in the holes if we need to or provide additional clarity if there are questions.

Generally speaking, the Truckee Meadows water shed has been somewhat of a fragile and one of the most litigated water sources in the Western United States. That includes the Truckee River. This project would divert 4,000 acre-feet of water that would typically go into the Truckee River. That would tend to be high nitrate type of water. That requires additional environmental fixes, if you will, as it relates to the quality of that water.

So, what this project would do is divert that water through this pipeline, up to Storey County, in the Tahoe Reno Industrial Center which would then be used for some of these other uses by some of those major companies that we've been talking about.

This would be—resolve one of those environmental issues, certainly, TMWRF, the Truckee Meadows Water Reclamation Facility would not be giving up this 4,000 acre-feet necessary. There would be reimbursements for the same amount of water. So, on a net/net basis, it would be a wash, if you will, for them.

In addition, I talked through the cost of the project, if the project didn't move forward, TMWRF at some point, would be required to invest in its infrastructure to treat the water there, that would entail an estimated capital cost of about $30-40 million down at TMWRF, as well as annual recurring maintenance costs of about $1.5 million.

AMERICAN OVERSIGHT

Certainly, if there are questions for Ms. Mulroy, we can talk about those now. Otherwise, I'll move forward and talk about some of the other benefits of the project, at this time.

SANDOVAL: Thank you. Why don't we break it up, so that if you're going to move on to a different issue, then perhaps, Pat, if you could answer, you've spoken with TMWRF, you've spoken with Washoe County, Sparks and I would assume the Tribe as well.

MULROY: Yes.

SANDOVAL: So, could you provide some detail in that regard?

MULROY: Thank you, Governor. And, Paul Taggert is up in the audience, up in Carson City. He and I have been working on this project together.

Obviously, since this is one of the most litigated rivers in the west, this was not an easy jigsaw puzzle to put together from a water resource standpoint. Even though there are significant water quality improvements to the end of the system, if you will, for the Cui-Ui fish and for the Tribe. We sit at the end of this system because you are removing these nitrates that are on any number of occasions during the course of the year, causing the Reno Sparks—or, the Truckee Meadows Water Reclamation Facility to be out of compliance with EPA Clean Water Standards. They knew they had to invest a significant amount in order to get up there. It removes those and allows this facility

AMERICAN OVERSIGHT

to discharge without causing those nitrate issues that are problematic for the fish at the other end.

There was a need to replace that source of water because the Truckee is completely subscribed for. What leaves the Reno area, goes down to the Fallon area where the Fallon farmers are reliant on this water source. Then at the end of the system, you have the Indian Tribe and you have an endangered fish, also dependent on this water source.

So what Paul and I have negotiated were two agreements. One was the actual effluent agreement with the Cities of Sparks and Reno who control the TMWRF facility. And in it, their reimbursements are identified. It's a 50-year lease, a lease that can go up to 50-60 years.

We do not own the water. We never own the water. No one—neither TRIC nor any of the companies will hold title to the water. The water stays, in terms of ownership, with the Reno Sparks area. The TRIC is simply leasing that water supply for the term of 50-60 years.

Then, they will reimburse the City of Sparks and the TMWRF facilities for all extraneous expenses, any capital improvements that need to be made to that facility, in order to facilitate this endeavor and make essentially, the Reno Sparks area whole.

The trickier agreement was the one that was just recently approved by TMWA, which is the return flow management agreement. In it, the companies, TRIC has committed that they will turn over

AMERICAN OVERSIGHT

for use by TMWA during the course of this agreement their Truckee River Rights of 1,500 acre-feet, to manage the river for instream flows. The companies will also pay for an adjudication process on ground water rights that are available through State right-of-ways with the Department of Transportation. Those will be adjudicated. The cost of that adjudication will be borne by the companies. And that water as well will be turned over to TMWA for management purposes to make the river whole.

The objective was that no one loses in this proposition. During the course of this, I know that I've participated in one meeting with the Tribe, but I know that Mr. Taggert has participated in a number of meetings with the Tribe. We stay committed to continue our conversation with the Tribe, as we go through the water rights process on the ground water portion of this.

So, from a water resource perspective in the west, this is one of the most creative and forward thinking projects anywhere in the Western United States today. For an industrial complex to take effluent water, be willing to pay for the infrastructure, $35 million offsite, $30 million plus, it could go quite high in terms of treatment costs for the onsite, so you could easily break the $100 million mark on the cost of this and be willing to make that kind of an investment in order to be environmentally sustainable and to be responsible in terms of their water use really has no equals in the west today.

AMERICAN OVERSIGHT

So, Nevada is standing proud in being able to deliver this kind of a project to the western water resource dialogue and development.

SANDOVAL: Ms. Mulroy, thank you and congratulations because that is quite the knot and tie in terms of balancing all those interests. Could it be said that the TMWA, rate payers, likely will save money because they won't have to pay for the treatment of all that water in the years to come?

MULROY: The TMWA rate payers, they benefit in two ways. TMWA rate payers, also TMWRF rate payers in many ways. That avoided cost of $40 million is going to prevent the wastewater rates from having to go up. And, to the extent that the companies will be reimbursing TMWA for their management, water management, of the River, there will be a benefit to the TMWA rate payers as well.

The bigger benefit for TMWA and for the larger Reno Sparks area is that it provides maximum flexibility to TMWA, to be able to manage the flows in that river, no matter what the hydrology looks like in the system. The companies have stepped forward as full and equal partners in that endeavor and are going to take their seat at the table.

SANDOVAL: And, for the Tribe, it will receive, and Pyramid Lake will receive, the same amount of water, but higher quality of water.

AMERICAN OVERSIGHT

MULROY: Much improved quality of water, which will significantly help the fish, help the Cui-Ui fish, up there. And, we are committed to making sure that the Tribe is not negatively affected by this agreement.

SANDOVAL: And, is there any discharge—so, that water goes to TRIC. TRIC, the companies there use it. Is there any type of discharge that comes from that back to the river?

MULROY: NDEP has been quite clear, there can be no discharge from TRIC, back into the river. What the intent is, is to have a second pass-thru for reuse. So, water that is not put to full consumptive use will once again enter the recycle process and be used once again. So, it will all stay contained in the TRIC area.

SANDOVAL: Which saves that much more water.

MULROY: Yes, it does.

SANDOVAL: So, that's all I have, questions I have on the environmental side. Board Members, any other questions on the environmental issues?

HUTCHISON: Governor.

SANDOVAL: Mr. Lieutenant Governor.

HUTCHISON: Thank you. Ms. Mulroy, thank you very much for your presentation. All of us have great respect for you and appreciate what you've done for so many years in Southern Nevada and throughout the State. Thank you.

MULROY: Thank you.

AMERICAN OVERSIGHT

HUTCHISON: Just a question on the lease. You said we've got a lease now for, what did you say, 50 or 60 years, can you explain that a little bit?

MULROY: Yeah, it has—I think an original term of 40 years and then it can be extended.

HUTCHISON: Gotcha.

MULROY: Yes, there are extension options to it.

HUTCHISON: Okay. And, how does the—are you—50 or 60 years is a long time, but you're also making a major investment. How does that—how does the lease term coincide with the infrastructure life expectation and are you satisfied that those match up?

MULROY: Actually, the bonds should be paid off before the lease expires. We've got what, a 20 to 25 year—

GORDON: Twenty to 25 year window, we're looking at for the bonding.

MULROY: Yes, for the repayment of the bonds.

HUTCHISON: And then as far as the life of the infrastructure, so it's even after the bonds are paid off. It's—

MULROY: It's 80-90 years.

HUTCHISON: Okay. Okay.

MULROY: With proper maintenance and to the extent that TMWA is a full partner and the companies are committed to bringing in professional management for the system. I don't have

AMERICAN OVERSIGHT

a concern in the world that that system won't be managed appropriately.

HUTCHISON: Just based on your experience and having acknowledged that this is a highly litigious area and a place that is often challenged. You've met with lots of different interest groups. Do you foresee any challenge to this project, beyond the parties that you've spoken to, other interested parties that you anticipate? Any environmental groups, that sort of thing that could come in and try to challenge this?

MULROY: There have been several public forums in which those would've emerged and to date, no one has raised their head and said anything. I think the proof is going to be in moving through the groundwater adjudication process and through the TMWA water resource management process, in managing the river. It will be iterative, it will be year to year. I think the big partner that has—whose needs have to be addressed is the Tribe.

HUTCHISON: And, to the extent that you've worked with the Tribe, do you expect any further issues or challenges from the Tribe?

MULROY: Well, I'm never going to say never. [laughter] I think they are—I think they appreciate that we're being sincere. That they're not going to get rolled in this process. That we know what our obligations are to the river and

AMERICAN OVERSIGHT

that we have to keep them whole. So, they really stand to benefit.

HUTCHISON: Well, again, thank you for all your hard work. [inaudible] comments in the governance of major accomplishments, so thank you for your work, for all your work.

MULROY: Thank you.

HUTCHISON: Thank you. Mr. Barrett, please.

BARRETT: Thank you very much, both of you. I don't know if this is at your desk in this regard, but environmentally building the project, 13-miles is quite a way and there's terrain. Are you aware, is the permitting process yet to be obtained and what—did you have a view on that?

MULROY: There is a permitting process that is still ahead of us. Brent Farr from Farr Engineering, who is overseeing the construction of this project is up north and can answer those questions in greater detail. Some of the land is owned by the City of Sparks, so obviously that permitting has to happen. Some of it's owned by the State of Nevada, so that permitting, it has to happen. There is a small section where we have to cross Core of Engineer Land, so you're going to have to get a 404 Permit.

So, those pieces—but that is standard. You can't do anything in the State of Nevada without getting those permits. And obviously, we're fully committed to being compliant with all the conditions around those permits.

AMERICAN OVERSIGHT

BARRETT: And I appreciate, we can't say "never", but you've seen a lot of large scale projects.

MULROY: Yes.

BARRETT: Do you view this as being doable?

MULROY: Oh, absolutely. I view this as being doable.

BARRETT: Okay, thank you.

MULROY: Yes.

BARRETT: Thank you.

SANDOVAL: If I may follow-up on Mr. Barrett's question that 13 miles is going to be crisscrossing some of the most sensitive land in Northern Nevada, given it's—being adjacent to the Truckee River. Are there any environmental concerns associated with the construction portion of the project?

MULROY: I'm going to—I think Mr. Farr is up in Carson City, is he not? Is he up there?

SPEAKER: Brent is not here today.

MULROY: Okay.

SPEAKER: Bob Sader is here and can address those.

MULROY: Great. Is Mr. Sader up there?

SADER: For the record, Bob Sader. I'm an Officer in TRI general improvement district, which will be the entity that builds and operates this pipeline. In that capacity, to address the question, I've been very involved in the right-of-way process for the path of the pipeline which generally speaking,

AMERICAN OVERSIGHT

goes down the east Truckee Canyon, until it goes over a mountain and into TRI Center.

We've been working on the right-of-way for a couple of years. We have gone through three or four different alignments and we have consciously chosen the alignment that has the least environmental impacts. We, so far, in the process of actually physically inspecting each of these parcels, each—all of the alignment, we do not believe that we have any significant environmental issues.

We have no wetlands. We do not cross the Truckee River. We do not enter into Federal Lands. There are two state parcels, owned by the State of Nevada. We've had discussions with the Public Lands about the application for that. We've had a lot of engineering, a high-degree of engineering on this right-of-way. We do not believe we have any significant environmental problems.

SANDOVAL: That's what I needed to know. Thank you, Mr. Sader. Good to see you.

SADER: Nice to see you, Governor.

SANDOVAL: All right, do we have any questions from Dr. Bennett or Mr. Klaich?

KLAICH: I have a couple of questions, Governor.

SANDOVAL: Please proceed.

KLAICH: When I look at this project in the big picture and Pat, your presentation helped a whole lot, thank you very much. One of the key aspects that we looked at the last

AMERICAN OVERSIGHT

time it was here, admittedly in a different form, was the participation of the Cities of Reno and Sparks and the benefits they and TMWA or the treatment center would get out of it. Did I hear that those agreements with Reno and Sparks have been finalized?

MULROY: Yes, they have been finalized. They were approved by both the Sparks City Council and the Reno City Council, in terms of the lease agreement and then for the agreement on the return flow management agreement. That has gone through TMWA and is awaiting final approval from Reno and Sparks.

KLAICH: Okay. One of the—excuse me, there's a little echo in there. Well, I'm just going to go ahead unless you tell me you can't hear. One of the things that was important to me was to be able to understand the entire project and the benefits to Reno Sparks were very important in that regard. Not having those agreements in front of us, I have to rely on the representations that you're making in this hearing.

That gives me a little bit of discomfort. That's more of a comment than a question. So, I'll just leave that there, unless you'd like to make any comment on that.

MULROY: Taggert is, should be sitting right there in the audience and can speak to those agreements in more detail. They are public records, if you would like a copy of them, we'll be happy to provide them to you.

KLAICH: I appreciate that.

AMERICAN OVERSIGHT

TAGGERT: Thank you. For the record, my name is Paul Taggert. Good afternoon, Mr. Governor and Board Members. The return flow management agreement has been approved by both Reno Sparks and TMWA. We can provide you with a copy of that, but that was a very detailed agreement on how we'll manage the return flows to the river, to accommodate changes made by this treated effluent pipeline.

So, we went through the effort of first getting the initial agreement approved by those entities, those two cities, and then also getting the subsequent agreement approved by them and the water manager in the Truckee Meadows.

KLAICH: And, are you familiar with the general content of those agreements?

TAGGERT: Yes.

KLAICH: And, is it your representation to us that those agreements provide substantial economic benefits to the Cities of Reno and Sparks?

TAGGERT: Yes, that's—it's certainly true. And the main idea is that there is a voided cost in upgrading the TMWRF facility for treating effluent, because simply, capacity is being created in those facilities by taking this water out of the river. It changes the timeline for when they would otherwise need to do more improvements to their facilities.

AMERICAN OVERSIGHT

KLAICH: When those agreements were being negotiated, was there an attempt to monetize that savings? Do you have any idea what those savings might be?

TAGGERT: I apologize for not recalling that off the top of my head, but I recall it being in the tens of millions of dollars.

KLAICH: Governor, could I ask one more question of Mr. Sader while he's still here?

SANDOVAL: Of course.

KLAICH: Included in the $35 million that I understand is the size of the bond issue that is being requested for approval today, is that correct, Kendra?

SADER: That is correct.

KLAICH: Would be the acquisition of the easement that you were just talking about Bob?

SADER: It would include easements for the alignment of the right-of-way through a number of parcels. There are quite a few parcels, but much fewer—a lessor number of land owners.

KLAICH: Okay, that sounded like a yes, to me.

SADER: I'm sorry, that's a yes.

KLAICH: But that easement, that easement or right-of-way has not yet been acquired?

SADER: That's correct. We have not wanted to go forward with the right-of-way until we had these agreements

AMERICAN OVERSIGHT

completed and approved. Otherwise, there's a question, in our minds and in the landowners' minds of whether this pipeline is for real.

KLAICH: Okay. And, is it your belief that the easement can be acquired and the property or the project can be completed, this offsite project can be completed within the $35 million of the bond proceeds?

SADER: The $35 million is our best estimate at this point. It's an engineer's estimate. We'll refine the costs as we get all of the engineering completed. We believe it is in the $35 million range and if there is a surplus, the assessment payors are going to have to pay the surplus.

KLAICH: Okay. Governor, I have other questions, but not related to this area. Thank you very much.

SANDOVAL: Thank you. Dr. Bennett, any questions?

BENNETT: Not at this time, thank you Governor.

SANDOVAL: All right, thank you. So, before we leave the environmental piece, one more opportunity for any of the Board Members to ask questions. All right, then let's move on with the presentation. Thank you.

GORDON: Thank you. So, continuing on with some of the benefits related to the TRI Center, I'll just hit the high points on these as well and then we can certainly talk through any of the details. The idea here is that there's 12,700 developable acres in the Center itself. This water would

AMERICAN OVERSIGHT

essentially free up future development activity, as well as the intensity of that development activity.

We've talked about some of the companies, Tesla, you're very familiar with. We have some representatives in the room here today, in the Gigafactory and all of the investment being made there. Switch, as it relates to their 1.5 million square feet that's in the ground today, in their Citadel Campus within the Center and potential plans for an excess of 7 million square feet of data center facilities up in the TRI Center. Google has acquired a significant amount of land, as you're aware, within the TRI Center. They are also evaluating their development plans for the future up in TRI Center. Then you have these other developers, unknown developers, Reno Land, as well as Emerald City, that intend to develop a Town Square, if you will, up in the TRI Center. So, a solid group in terms of the participants in this project.

Essentially, the water infrastructure at TRI will increase the intensity, as well as the timeline for future development activity. So, you're talking about data centers, advanced manufacturing and other future development activity there. These are the types of facilities that require more water than typical distribution or warehouse facilities, which is why there's a need for this particular type of water and this project overall.

These types of developments generally lead to higher yields, higher levels of investment, these are capital intensive

AMERICAN OVERSIGHT

types of businesses. I think you've seen some of what's already taken place, in terms of the development activity by Tesla, as well as Switch and then you have other players looking to develop as well.

These project also generate employment with higher wages than the average. That's also a benefit overall. Just greater overall economic activity are generated by these hi-tech advanced manufacturing types of companies, as opposed to more traditional real estate development.

In terms of the private investment. We talked about the $35 million of this particular project. The storage, transmission and treatment facilities could add another $65-$105 million. So, a total project cost of about $100-$150 million. The private sector is going to be funding the balance of that, in addition to the payments under the special assessment district that the private sector is committing to.

In terms of the financing, I think you may hear more about that as part of this presentation, but essentially, the underlying real estate value will be required to have a 3.5 times value, relative to the amount that's being considered for bonding. So, it would be 3.5 times $35 million we're talking about under the special assessment district.

At present, the current appraisal is suggesting a 7 times value, when this project is completed. So, nearly twice the

AMERICAN OVERSIGHT

requirement. That provides a lot of security as it relates to the financing side of the equation.

At the same time, the group is also requesting a tax increment area, through Storey County be developed. Essentially, the idea being that as future development is created and investments are made, there's incremental value that is created with these same property owners that we're talking about under the special assessment district.

So, as increment is generated, they make more investments. Those—a portion of those incremental tax dollars would inure back to those private sector developers, to reimburse them for up to the amount of the offsite improvements, or the $35 million that we're talking about. That would be the maximum amount that would ever be reimbursed under a potential tax increment area, would be the $35 million that's being financed under a special assessment district.

That aligns with State statutes, specifically, if helpful for the record, NRS 278C.150, Developer Reimbursements for Construction of Wastewater Infrastructure Projects. Storey County would create that. Again, these would be the same companies and portions of those incremental revenues, would inure back to the private sector developers.

If there was no future development activity and no additional investments made, there would simply be no additional tax dollars going back to the private sector development. The

AMERICAN OVERSIGHT

more they invest, potentially the quicker they get reimbursed on that first $35 million. To the extent they don't, there is no reimbursement and they are fully committing to make the payments on that $35 million special assessment district, regardless if future tax revenues ultimately are generated.

The final leg in the stool, if you will, in terms of the benefits would be Storey County. We'll talk a little bit more here about what that means for the County itself. Obviously, the existence of the pipeline itself would add additional value in Storey County, open up properties for future development and higher intense uses that I've mentioned. All of that would provide increased economic opportunity within Storey County.

With respect to the tax increment area that I mentioned, that would be a reimbursement of a portion of the pipeline and overall infrastructure costs. It would exclude any taxes that are scheduled to go to special districts such as the school districts. Both their operations and capital portions of the property tax rate, those will continue to go there, as currently scheduled. Those are excluded from any increment or reimbursement back as part of this project.

Only 50% of the sales and use taxes are eligible for reimbursement back for this project. 50% would stay with the original taxing entities as they are currently scheduled and only half of the modified business tax or payroll tax would be

AMERICAN OVERSIGHT

eligible for reimbursement back towards these infrastructure costs.

Taxes, overall, over the next 20 years that are likely to be generated, assuming a relatively conservative schedule of development for the types of companies that we're talking about. It could be in excess of $1 billion. This $35 million would represent less than 5% of the total taxes being generated so that would mean more than 95% of the taxes being generated would still go back to all of the original taxing entities over the course of the next 20 years.

Once the $35 million reimbursement was made, as it relates to the offsite portion of the pipeline project, 100% of all incremental taxes would go back to the original taxing entities and no more would go to the private sector for reimbursement under the project.

The water will also provide a stable source of water and provide increased stability in terms of the overall economic activity for Storey County as a whole. Again, this infrastructure will be dedicated to the TRI/GID, once completed. So, pretty significant transfer to the GID or public entity.

At the end of the day, overall, there are significant economic and fiscal benefits to the parties involved. We've talked through what it means within Storey County in the local jurisdictions there. Also, as well as what happens in TRI Center

AMERICAN OVERSIGHT

and the additional opportunities that are there; the fiscal and economic benefits to Storey County as a whole.

This aligns exactly with the legislation that was designed that Director Anderson mentioned at the outset, as it relates to economic development, bonding capacity and makes a lot of sense for the reasons I've outlined here.

I'm happy to answer any questions. I know the balance of the team that works and represents Storey County is up north and can respond to any questions but we're here to answer questions and help as best we can.

SANDOVAL: Thank you. And, I suppose, you've said it and Pat said it, but I just want to make it in its simplest terms. So, the—if I'm a resident of Storey County, I have no risk, correct? If I'm a property owner, homeowner, in Storey County, do I have any risk at all associated with this project and this bonding, in a worse-case scenario?

GORDON: At its essence, all property owners are going to continue to pay the normal taxes and operate as usual. The only sort of exposure, I guess is where you're trying to get to, relates to the special assessment district and that is 100% consent of all the property owners within that district. I think Mr. Johnson and Ms. Follett had intended to walk through what would happen in a "meltdown" scenario or a worse-case scenario and what that looks like. So, if now is the time to have them sort of walk through that, that might be the best approach here.

AMERICAN OVERSIGHT

SANDOVAL: I apologize. I didn't realize you were going to make that portion of the presentation. So, why don't we hold the answer to that question and then, make the presentation and perhaps it will answer itself. Thank you.

JOHNSON: Thank you, Governor. For the record, Marty Johnson again. We will specifically answer that question here in just a moment. As Mr. Gordon went through his presentation, he hit some of these points, so I'll go through some of this a little quickly.

If you'll go back to the presentation that we did for the Storey County Commission and again, recognize the audience for that presentation was indeed the County Commission and the residents of Storey County. On the second slide, titled Assessment Districts, we do talk a little bit about how those work.

They are allowed under NRS 271. An assessment is indeed a lien on the property. It is co-equal to property taxes. So, if you do not pay an assessment, we can foreclose on your property. Part of the whole deal with an assessment district and bonds is that, if they are delinquencies, there will be foreclosures. It's not a might be, it's a will be.

The assessments are billed and collected semi-annually. They are not done with the tax bill. So, there is a need to have someone, whether that's a company, the County, whoever it might

AMERICAN OVERSIGHT

be, actually manage the billing and collection of the assessments in this process.

The assessments, under statute, can go for a term of up to 30 years. We aren't intending to go that long, which we'll talk about here on the next slide. So, if you'll turn to the next page, titled Proposed Bonds, and Governor, this is where we'll get to the answer about the citizens' risk.

Under the current proposal, the County would issue assessment district bonds and those bonds would then be purchased by the State through the Bond Bank Program. That allows the interest rate on the state bonds to be passed through to the County bonds, which provides pretty much the lowest cost to capital we're able to get for a Nevada local government.

Here is the key to how this works and the answer to your question, Governor. The bonds are paid first and foremost from the assessment payments. So, again, every six months there is a bill that needs to be paid for those assessments. Then typically, two months later and it can be a little bit longer than that depending on how things line up, the bond payments are made. So, the assessments' payments come in. We've got generally at least two months before we need to use those funds to make the bond payments.

To the extent the assessment payments are insufficient, we have other resources within the special assessment district and I'll talk about those cash flows on another slide.

AMERICAN OVERSIGHT

In addition to these other resources and cash available, we will have a reserve fund that is funded out of bond proceeds, the day of closing of the bond transaction, equal to one year's debt service. So, theoretically, if all of the property owners were delinquent, we have enough money in the bank to make the payment for at least a year.

If those three resources are insufficient, then the County is on the hook to the amount of its uncommitted General Fund balance or the amount of the annual payment. So, there is risk, but what we have worked with, the project sponsors to develop, is a plan where that risk is mitigated.

And again, under this proposal, if that uncommitted portion of the County's General Fund, which again our estimate for the end of this current fiscal year will be $2.8 million, if that money was gone, then the State's General Fund would be kicked in, in order to pay the state bonds.

Our goal is for that not to happen. The maximum term allowed for the bonds is 30 years, which is well within the terms of that lease that Ms. Mulroy was describing. The County's guidelines for these types of financing states 20 years but the developer has requested 25 and that is something that we are working with them on.

I'm going to skip over the next slide for a moment and go to the slide titled, Foreclosure. Because this is an important component in the security for this transaction in trying to make

AMERICAN OVERSIGHT

sure that the county's and eventually the State's General Fund would never be hit. As I mentioned, if there are delinquencies, we will foreclose. Foreclosure proceedings will initiated on those parcels and I'd like to ask Kendra Follett to run through this foreclosure process with you.

FOLLETT: Good afternoon, Governor and Board Members. This slide, the Foreclosure slide, it assumes a June 1 payment date, just for discussion purposes here. We'll have to determine what the actual payment dates will be. Let's assume a June 1 payment date. Sixty-days (60) days prior that June 1 date, a bill is sent to the property owner, notifying them that the payment is due on June 1st.

It will be then—if it continues on in delinquency, three consecutive notices are sent: one on the 5th day of the month, following the payment date and then the next 30 days later, the next 60 days later. With the third delinquent bill being mailed. Thereafter, at the time the third delinquent bill is mailed, a lot book is prepared where all of the liens on the parcel are identified.

As Marty mentioned before, by statute, assessment liens and property taxes have a co-equal lien in foreclosure. The Notice of Sale on the Foreclosure is sent the first of week of September and the foreclosure sale would occur sometime in September.

So, all in, it's about a three-month process and this is particular to assessment districts under Chapter 271. The

AMERICAN OVERSIGHT

foreclosure procedure happens fairly quickly compared to regular property tax foreclosures.

JOHNSON: Maybe just to add a couple of additional points on that, the foreclosure is initiated on the entire amount of the assessment. So, it's not just the amount that's delinquent. Once that property is sold and that money is received, a corresponding amount of bonds are paid off and so, that parcel is done. We don't care who owns it, if they're delinquent with their property taxes, at least as far as the assessment district is concerned because a portion of those bonds get paid off. But that is the mechanism under which that foreclosure happens.

So, again, if you think about the timing between the assessment payment and then approximately two months later, the bond payment, having a one year reserve, having this foreclosure process take three to four months, we will be able to move very quickly to make sure that there are resources there to make payments before we would ever have to get to that uncommitted portion of the County's General Fund.

So, I see a light on.

SANDOVAL: Thank you. Let me, if I may, Mr. Klaich, let me make a comment or a question and then I'll go to you. I suppose, the best representation is the local government and the fact that it has approved this. They're the ones that are closest to this and so, Mr. Whitten, I would imagine that this

AMERICAN OVERSIGHT

presentation was made to the County Commission and you are the government closest to the people that would affected by some type of a default. So, do you have any comment in that regard? And, were there residents from Storey County who appeared and spoke in support or opposition to this project?

WHITTEN: Thank you Governor. For the record, Pat Whitten. Your statement is fully accurate, relative to the support at this point in the process expressed by the County Commission. I would probably sum it up—first off, to answer your question about residents, yes. Even in Storey County, we have a handful that take a look at this and don't see it for the opportunities it presents and instead of labeling it a—a corporate partnership between the State, Storey County, and the excellent companies that are here, they call it "corporate welfare." So, we do have a handful of those that expressed concern.

I'd be lying if I didn't say, you know, my job as the County Manager, Mr. Gallagher's job, our Comptroller, who is in the audience with me today; our job is to try to reduce that risk as much as we can. I see this—currently what you see is where we are to date with this. It won't materially change in terms of the number of properties, but I will also state for the record that, on behalf of the County, we continue to find ways to layer in other safety nets that hitting the County's, the unreserved

AMERICAN OVERSIGHT

portions of the County's General Fund and also the State's would be the very last recourse that hopefully we never meltdown to.

SANDOVAL: Thank you. Mr. Klaich.

KLAICH: Thank you Governor. So, I understand Marty, that probably your answer to the Governor's question about, is there any risk, is there in fact a risk. Rather modest from your presentation. You've got a year's debt service on the bond's proceeds. If you have to get to the Storey County General Fund, looking at your defeasing [sic] schedule, you've probably got another year of money there.

I do have a question about the foreclosure, you know, I'm just a guy who has written a few Deeds of Trust and so nothing nearly this complex as you're proposing today. And, a three-month foreclosure seems interesting. What are you foreclosing on? The property of the defaulting partner within the special assessment district?

FOLLETT: Governor, if I may?

SANDOVAL: Yes, please proceed.

FOLLETT: Kendra Follett, Bond Counsel. You're foreclosing on the property that has the assessment lien on it. So, when the assessment ordinance is adopted, it will levy assessments which are liens against each of the parcels in the amount of the assessment allocated to each parcel. If they don't—if they're delinquent and you know, they're delinquent for this period of time, then you process the foreclosure.

AMERICAN OVERSIGHT

Now the foreclosure process is, you hold the foreclosure—the County will hold the foreclosure sale. It will sell the parcel for at least the amount of the assessment and any unpaid property taxes. Then a certificate will be issued to the person who buys it at auction in the foreclosure sale.

Now, thereafter, the County is out of it because the County has been paid the full amount of the assessment and any unpaid property taxes. All the rest of the liens are wiped out, mortgages, second mortgages, you know, whatever other liens are on there that are below property taxes and assessments. And, then that certificate holder who buys it at auction has a certificate and the property owner has a statutory period of time to redeem that certificate from the certificate holder after paying them penalties and fees. But at that point, the County is out.

KLAICH: So, if I buy it at a foreclosure sale, I've purchased some certificate that, okay. Let me ask you this absurd question. But, Tesla doesn't pay its assessment. The foreclosure is going to occur on the Gigafactory? Or, if Switch doesn't pay, the foreclosure is going to occur on the Citadel Campus?

FOLLETT: Well, as I understand it, the Tesla Gigafactory is not one of the parcels, but other parcels that they own are in the assessment district. So, whatever—yes,

AMERICAN OVERSIGHT

whoever the property owner is, it's foreclosed on the delinquent property owner.

JOHNSON: And, if I might, again, for the record, Marty Johnson, J&A Consulting Group. This might help answer this question. If you remember as Mr. Gordon was talking, we talked about having a value to lien of at least 3.5:1. So, part of what we do is get an appraisal as to what these various parcels will be worth when the project is complete and compare that to what the amount that is going to be assessed is and we want that ratio to be at least 3.5:1.

With the idea being that in the event we hit an economic downturn and someone does not pay their assessments, that we're not trying to get the dollar that the property was worth when we did it, we're looking for some cents on the dollar, in order to make everything whole.

So, we're not doing this at a 1:1 ratio, we're looking at 3.5:1. So, the equivalent of a, you know, million dollar home would need to go for $350,000 in order to make this all work. So, that helps create some of the—the security that we'll be able to get the money out of it that we need.

KLAICH: So, is Switch's campus in the assessment district?

JOHNSON: I'd have to ask Mr. Gordon, which parcels are which.

[crosstalk, echo]

AMERICAN OVERSIGHT

GORDON: Yes, it is.

KLAICH: Okay. Thank you very much, Governor.

SANDOVAL: Then, if I may follow-up and I think you provided this in your testimony. Whatever lien that is, is that superior to existing liens, on the properties? So, in other words, you're going to have a lien, but what if they already—

HUTCHISON: Yeah, what's the priority?

SANDOVAL: --where's the priority of this lien as opposed to any that may exist already?

FOLLETT: Kendra Follett, property taxes and special assessments by statute have a [inaudible] and everything is below it.

SANDOVAL: Okay, that's good to know.

FOLLETT: Except for federal taxes.

HUTCHISON: Thank you Kendra, can I—I just want to make sure I understand the relationship between the special assessment district and the tax increment area. Are those the same parcels or is the special assessment district larger and if so, what's the geographic area of the special assessment district?

JOHNSON: My understanding—for the record, Marty Johnson and I'll have Brian clarify this if I get it wrong. My understanding is that the special assessment district in the tax increment area will be the same parcel, except for two, I believe, is that correct Brian?

AMERICAN OVERSIGHT

GORDON: That is correct. So, there are two parcels that are within the special assessment district, but not within the tax increment area. They just happened to be two parcels that have improvements on them today. The idea being that, all of the properties in the tax increment area are sitting vacant today.

HUTCHISON: And, are those within TRIC, those two parcels, are they still within TRIC?

GORDON: Yes, they are all located within TRIC.

HUTCHISON: And those two parcel owners have consented to this arrangement?

GORDON: They have.

HUTCHISON: And they would benefit from the effluent project.

GORDON: They would. Those two property owners—

HUTCHISON: Right, because they're within TRIC and that would all be—so, the idea would be—the six developers are part of the tax incremental area, then you've got two additional parcel owners who have consented to this SAD approach, because they're going to benefit from the effluent pipeline, right?

GORDON: I'm sorry, let me just clarify so we're on the same page. The participants in the special assessment district and the TIA, they're the same six companies.

HUTCHISON: Okay.

AMERICAN OVERSIGHT

GORDON: Two of the parcels, one happens to be owned by Switch, one happens to be owned by Tesla, are in the special assessment district, but not in the tax increment area. So it's the same companies within both.

HUTCHISON: Okay. All right. And, so really what the—well, Governor, I was going to go into the tax increment area, if I can talk about that?

SANDOVAL: Yeah, please.

HUTCHISON: Okay. So, within the tax increment area, really what's happening then is these companies, the developers, are fronting the money and then they're getting paid on the back-end, through various taxes that are going to be used to pay the $35 million, correct?

GORDON: That's correct.

HUTCHISON: And then, once that—once those taxes have satisfied that $35 million, it goes back to the government entities that would otherwise receive those taxes, right?

GORDON: That's correct.

HUTCHISON: Okay. And then, the only way that Storey County is on the hook is if the special assessment district does not provide sufficient funding for the repayment of the bonds. That's when Storey County's General Fund would kick in, right?

GORDON: I'll defer to Mr. Johnson, but generally the—the—if the payment is under the special assessments district

AMERICAN OVERSIGHT

were not made for some reasons, then they would go through the procedures that he outlined.

HUTCHISON: And you consume the reserve fund.

GORDON: And any excess cash that's included in that.

HUTCHISON: Right. That's my understanding. That's when the County General Fund kicks in. When, if ever, does the State General Fund kick in?

JOHNSON: This is Marty Johnson for the record. So, Mr. Gordon is correct, it's only if the assessments aren't sufficient. We can't foreclose on the property for whatever reason and sell it, the reserve fund is gone. Then the uncommitted portion of the County's General Fund and when that is no longer sufficient or at zero, then the State General Fund kicks in.

HUTCHISON: Okay.

JOHNSON: But again, as Mr. Whitten said, our goal is to put as many layers in front of the County's General Fund, which by definition means, they're in front of the State's General Fund.

HUTCHISON: And, just a follow-up question again on the tax increment area. The taxes that are going to be coming into this tax increment area are based on future development. Currently, all the property is vacant, right?

AMERICAN OVERSIGHT

JOHNSON: That's correct. Again, for the record, Marty Johnson. The property taxes that are currently paid will continue to go to the local governments as they currently are. It is only the revenues generated by future increases in value for future business activities that are subject to being swept up in the tax increment area.

HUTCHISON: And, assuming the high unlikely, which is those vacant land is not ever developed, then the developers assume all that risk. In other words, if they—they don't develop that land in the future, there's no tax revenue that could be generated to reimburse them the $35 million, they eat that themselves, they assume that risk.

JOHNSON: That would be correct.

HUTCHISON: Okay.

SANDOVAL: Aren't you glad there's a bunch of litigators or former litigators?

KLAICH: Could I ask one more question, Governor?

SANDOVAL: Mr. Klaich, please.

KLAICH: I'd like to follow-up on the Lieutenant Governor's question. Way, way down after all these layers of mitigation you talked about, you indicate that the General Fund could kick in, is that correct?

JOHNSON: Yes, if you look at Slide 3 of this—

KLAICH: I've got it.

JOHNSON: Yeah.

AMERICAN OVERSIGHT

KLAICH: So, my question is, does that highly unlikely but possible incumbrance on the General Fund limit—limit the State's bonding capacity in any fashion? I don't know if there's somebody from the Treasurer's Office here, but if we approve this transaction, is the State otherwise limited in its ability to fund other projects that it might wish to?

CHATWOOD: Thank you, Mr. Klaich. Lori Chatwood, Deputy Treasurer of Debt Management for the State Treasurer's Office. I think the question would fall under what is material to the State. So, in the proposal that I've seen so far, the maximum annual debt service, the reserve fund, we're looking at a little bit more than $2 million a year.

So, to the extent that $2 million is going to inhibit the General Fund from providing those projects, I think that I could defer to Governor Sandoval, but I would say that's immaterial to the extent that year after year after year, the General Fund had to make that payment, then there would be a decision that could be a $20 million project for a CIP down the road.

KLAICH: You all have to provide the Governor with estimates on a biennial basis of bonding capacity that he has available to recommend projects for funding to the legislature, correct?

CHATWOOD: That is correct, Lori Chatwood. The affordability that we provide to the Governor's Office for the

AMERICAN OVERSIGHT

building of other bonding programs in the CIP is based upon the property tax, the $0.17 that we collect for those projects.

To the extent that this would be General Fund dollars, prior to it being that $0.17 general obligation pledge, it wouldn't affect our affordability.

To the extent that the General Fund would not be able to make that $2 million payment, then it would share in that $0.17 and projects would be reduced because this debt service would have to go under the affordability.

KLAICH: Let me try it again. So long as the assessments are being paid, in accordance with the—the project plan as set forth and everything is in good shape going forward, do you anticipate that anything that we're seeing today would limit the bonding capacity that you would report to the Governor as being available for other CIP Projects?

CHATWOOD: Correct. Again, Lori Chatwood, Deputy Treasurer. To the extent that all of the revenues are sufficient, there would be no impact. First of all, on capacity, being that this is a natural resource, it does not fall under the 2% constitutional debt limit. Therefore, the amount of capacity of bonding under the constitution is not affected.

Then, on a monetary basis, for the affordability of future bonds, because we would consider this self-supporting, not having to be—it is backed by the property tax, but not having to levy a

AMERICAN OVERSIGHT

property tax to pay for it because there's other available revenues, it would not impact our affordability.

KLAICH: I appreciate it. Thank you, Governor. I know I'm trying to get yes/no answers to questions on these incredibly complex transactions, but I believe that answers the question to my satisfaction, thank you.

SANDOVAL: Thank you, Mr. Klaich. These are really important questions that I think really—is also important to establish in the record that's necessary for this Board to move forward.

Ms. Chatwood, before you go and a question from me. Have you had the opportunity to review this transaction and have you reached any conclusions or have any opinions?

CHATWOOD: Governor, again, Members of the Board, [inaudible]. I cannot speak for the Treasurer's Office in whole, as we were just received last week the notification that Storey County approved this.

With the information before this Board now and in my position, I think this has belt and suspenders to date. I'm not saying we are through and wouldn't ask GOED for maybe some additional security, but at first blush, this looks very solid from my opinion.

SANDOVAL: Okay, Ms. Chatwood. Thank you, that's all I needed to know. All right, Mr. Specht, yes.

AMERICAN OVERSIGHT

CHATWOOD: Also, if I may add, [inaudible] Counsel also wanted me to also put on record that we're issuing this bond if this were to be approved, through the authority of SB 1, which has a blanket limit of $200 million.

So, this $35 million would go under that capacity, reducing that $200 million authority in the future. Is that correct? So, just to have that on the record.

SANDOVAL: There is another question, Mr. Specht.

SPECHT: Just one question please. One thing that I haven't heard—when I hear the foreclosures and you can foreclose in a few months, that always sounds wonderful but never happens. Whoever owns the property is going to do everything they can to prolong it and keep it as long as they can. So, you get many situations, if we get to the unfortunate situation where they make minimum payments, partial payments. They pay, get current, they go delinquent again.

So, that's a typical situation you see whenever you go through foreclosure. So, my question is, if we ever get to that point, is there ability to be able to assess the delinquent company fees? So, the County/State is made whole in this whole process, if someone goes to delinquency?

FOLLETT: If I may, Kendra Follett. Sherman and Howard, Bond Counsel to the County. Chapter 271 of NRS permits both daily penalty rates and daily interest rates during the

AMERICAN OVERSIGHT

delinquent process. So, you know, beginning on the day after the payment is due.

There are those fees and they—they increase quite rapidly, the amount of daily interest and daily penalties that are due on delinquent payments.

In the 271 process for foreclosure, there is a long history in the State of Nevada, of foreclosure under 271. As I mentioned before, it—local governments in Nevada have pursued this. They typically hire a consultant to both bill and commence the foreclosure proceedings on their behalf and this is done quite expeditiously and has been for years.

With—you know, no—no bond defaults in the State of Nevada for assessment districts that I'm aware of.

SANDOVAL: That's an important one and maybe Ms. Chatwood could—could confirm that. Again, we're talking about worse-case scenarios here, which we should. At least in your experience and Ms. Chatwood, in your experience if she's still there, are you aware of any foreclosure proceedings that resulted from a default in a situation like the one that we're discussing today?

CHATWOOD: Thank you. Again, Lori Chatwood, Deputy Treasurer. Governor, I'm afraid I can't answer that from the State's level because this would be the first assessment district bond that the State would be involved in. Under the current law, most assessment districts and TIAs happen at the local

AMERICAN OVERSIGHT

municipality level, not at the State level. So, I would have to defer to Marty Johnson and Kendra for their experience in local government finance.

SANDOVAL: Yeah. Okay, I appreciate that, Ms. Chatwood. As I said, I think this is an important exercise, in terms of being incredibly thorough. This is obviously an important project, but at the same time, we all—we being the members of this Board—have a duty to ask these kind of questions to make the record that I think is being made to provide us with the comfort, more importantly, an assurance to the constituencies that would be affected by this, that we ask the tough questions and made the record in terms of what the consequences could be.

Again, this—I half joked about litigators on here, but I think it's really important to make the record that we have, associated with the financial piece to this transaction. So, thank you.

All right. Mr. Barrett.

BARRETT: Yes, a question on the timing and the matching between the SAD and the tax increment fund. I think I understand when the SAD starts and the money is pulled down and the payments are due. They're due in, let's just call it 20 years. When does the TIF start and when do payments start coming in from the TIF, that would go back to the property owners?

JOHNSON: This is Marty Johnson. Let me take a first stab at that and then have Kendra follow-up with it. If you'll

AMERICAN OVERSIGHT

actually look at the last page of the presentation; and again, recognize this as just the Commission—the County Commission steps. These have changed a little bit since we're not on the agenda for IFC on Thursday.

The special assessment district, we anticipate will be created by the County Commission, by the September 18th meeting. So, the assessment district will be in place shortly after that, the assessments can be levied and that would be effective and we'd be able to issue bonds once a bond ordinance is adopted. Now, that takes two readings from the Storey County Commission and then the State Board of Finance, of course, would have to approve the issuance of the State bonds, which my guess would be somewhere in the November timeframe. So that's the assessment district part of this.

The tax increment area, we—meaning the County—cannot start forming that until after IFC approval. Assuming that were to happen in time for us to meet on September 18th as a County Commission and start that process, the tax increment area would be formed. And again, recognize I'm using the terms "formed" and "created", probably by November 2nd. Perhaps we could even get it done by October 16th, but more than likely, it's going to be early November.

At that point in time, it is effective. There will not be any money within that tax increment area until development is

AMERICAN OVERSIGHT

made. There are increases in property values that drive the revenues over what the baseline revenues are today.

So that will be up to the companies in when they start construction on those various parcels. It could be a year from now, it could be five years from now, it could be 25 years from now. But the tax increment area will start and the clock will start ticking on the—maximum life of that is 30 years, isn't it Kendra, on the tax increment area?

FOLLETT: Yes.

JOHNSON: It's at least as long as the bond repayment term is. It would mirror the 25 years for the bond repayment. If there are no incremental revenues during that time, then the property owners would not be able to be reimbursed.

Did that answer your question?

SPECHT: It did and it answered the next question which was the life of the TIF. So, thank you.

SANDOVAL: Does that complete that portion of the presentation?

JOHNSON: Yes, it does Governor.

SANDOVAL: Okay. Board Members, any further questions associated with the finance piece to this transaction?

HAVINS: I just have one, Governor.

SANDOVAL: Dr. Havins.

HAVINS: What is the alternative to this? What if this doesn't go forward? What is the effect on Storey County and

AMERICAN OVERSIGHT

what is the effect on this area of—where the businesses are located that are requiring additional water?

JOHNSON: For the record, Marty Johnson. I think I will have to ask Brian to address what the impact on the companies might be. In terms of the impact on Storey County itself, its finances theoretically will go along the way they currently do because there won't be any additional revenue, because without the water, there really can't be a whole lot more development out at the Industrial Park.

So, Brian, maybe you could fill in what the impact might be on the companies.

GORDON: Thank you. Brian Gordon for the record. The reality is, and I'll defer to Ms. Mulroy if she has additional insight, but there is currently about 6,000 acre-feet of water. The effluent water pipeline would supply another 4,000 acre-feet of water, bringing the total to 10,000 acre-feet.

If the pipeline project does not move forward, then 4,000 acre-feet of water is not transferred and moved toward TRI Center. That would limit the amount of development activity that would be available or could potentially be done up in the center itself.

SANDOVAL: And, if I could add to that, the avoided costs for what we discussed associated with Truckee Meadows, the $40 million or whatever tens of millions that it would cost, that I think Ms. Mulroy talked about and the added benefit of better

AMERICAN OVERSIGHT

water that goes into Pyramid Lake, which I don't know if you can put a price on that. So, I just think it's important to have those other pieces as part of the record.

HUTCHISON: Can I ask a follow-up question sir?

SANDOVAL: Yes, Mr. Lieutenant Governor.

HUTCHISON: Is the current 6,000 acre-feet of water available at TRIC being consumed, all of it? Or, is there any excess?

MULROY: It's all subscribed for, yes. In fact, the whole 10,000 is subscribed for. So—

HUTCHISON: So, the effect would be no more development then.

MULROY: No, you would have whatever 4,000 acre-feet within the total of 10,000 is supporting and Mr. Sader, who entered into the various agreements could speak to that in more detail, Pat Mulroy, by the way. That would be the limitation.

So, there would, by definition be some portions of the plan development that would not be able to move forward. Because the water simply isn't there.

HUTCHISON: And the existing facilities that are at TRIC have—have all subscribed to the 6,000 acre-feet.

MULROY: Absolutely.

HUTCHISON: Yeah. Okay.

SANDOVAL: Mr. Specht?

AMERICAN OVERSIGHT

SPECHT: Yes. One question I wanted to ask and I think it fits in well now, maybe I didn't hear it right earlier, but I'm trying to understand. Once this pipeline is built, what capacity is it at?

MULROY: 4,000 acre-feet annually.

SPECHT: Okay. So, someone who doesn't quite understand that, does that mean that the pipeline is 100% maximized at that point? Does that mean that there's future growth beyond what is planned today, with these companies that we're talking to? I'm trying to understand the growth.

MULROY: Right. Pat Mulroy. Mr. Sader can speak to it in greater detail. I think there is an oversizing component on this pipeline. If the Reno Sparks area should in the future, or Washoe County, as part of the larger package in the future would want to lease additional effluent TRIC, I think the pipeline would afford that opportunity. As the water agreements currently stand, now the water will not come as a steady flow. Because of the variability of the river and the necessity to manage the overall water system, TMWA is making some pretty stiff requirements in terms of what the reservoir capacity, the carryover capacity needs to be on the TRIC site in order to give themselves maximum flexibility to meet all the demands on the river.

So, it's going to be managed by TMWA. The objective is, it will be on a ramp up schedule, as the companies build up, there

AMERICAN OVERSIGHT

will be an up to 4,000 acre-feet a year of water available to TRIC.

SPECHT: Okay, follow-up. So, I understand that it's up to the management. I guess what I'm trying to get an understanding of is the fixed asset itself. If I buy the whole infrastructure, is that infrastructure going to be at full capacity once completed under the current plan, or is there an opportunity for additional growth, down the road with the fixed asset, however you want to manage it?

MULROY: Mr. Sader is handling the construction portion of this, but it is my understanding that there is a slide oversizing component, so the pipeline will have additional capacity, beyond the 4,000 acre-feet.

SPECHT: Thank you.

SPEAKER: Round two.

SADER: Bob Sader, representing TRI General Improvement District. Ms. Mulroy is exactly correct in what she's told you. We have looked at the size of this pipeline, initially we estimated our needs at 18-inches. This is a force main, water will be under substantial pressure. We then went up to 24. When we found out that flows from TMWRF, the Reno Sparks Sewer Plant would be variable during the year. Now, we have recently made a decision to go up to 30-inches in diameter, just for the question you're asking, in order to be able to accommodate additional flows in the future.

AMERICAN OVERSIGHT

We're hoping that that occurs. It is not part of our agreement now with the cities, but it seems to us, a fair possibility that there will be additional flows that we can agree on to accept the TRI Center.

SPECHT: Thank you.

SANDOVAL: Thank you. Any other questions on this component of the presentation?

SPEAKER: Governor, I have one more question for Mr. Sader while he's here.

SANDOVAL: All right, please proceed.

SPEAKER: Thank you very much, Governor. Bob, how did you arrive at $35 million? You don't have a contractor yet. You haven't acquired the right-of-way. Whose—can you tell me a little bit about how you arrived at this construction budget?

SADER: The District Engineers—this is Bob Sader again, for TRIGID. The District Engineers are Farr West Engineering. They have substantial experience building infrastructure and providing similar services to water and sewer systems all over Northern Nevada.

We attempted to acquire the best experts we could find, locally. They made the engineering estimates that currently come to $35 million, and that's the level we're projecting at this point. We will refine those as we get further into the engineering, but we're pretty confident that the current estimates are right on the mark.

AMERICAN OVERSIGHT

SPEAKER: And, Governor, if I could, if for example, it's more than $35 million, where does that money come from? If the bonds are going to be sold for $35 million, that's all there is, so where's the rest of the money?

SADER: We have always taken the position, I'm representing the GID, there are the six assessment entities involved. It's always been under discussion that if there is an overrun in costs that the private parties are going to have to pick that up. It's not borne by the County or by the State, that will be part of the—I assume, part of the financing agreement, or other agreements that will eventually be negotiated and signed before these bonds are used.

SPEAKER: You've been working with Farr West directly?

SADER: Yes, daily.

SPEAKER: And, have you seen the assumptions that they have been using and arriving at this construction budget and is it your belief that those are reasonable and can be met within the $35 million that is being discussed today?

SADER: Yes.

SPEAKER: Thank you. Thank you, Governor.

SANDOVAL: Any other questions on this financial component of the presentation? Let's move forward. Brian, did you have anything else?

AMERICAN OVERSIGHT

GORDON: I think we're all set on our end, unless the team up in Northern Nevada has any additional information to present.

JOHNSON: This is Marty Johnson, for the record. I didn't hear exactly what was said, but I think it was asked if we had any additional comments, at this time, I don't believe we do. We're happy to answer any further questions.

SANDOVAL: Were we going to hear from some of the private entities that are going to be participating in the project?

GORDON: We can certainly do that. Some of them are available, some of them were unable to attend here today. If there are specific questions or you want to hear from them, we can certainly do that.

SANDOVAL: I'd like to hear from them.

GORDON: Okay, in that case—

SPEAKER: May I ask one more question, before we move to that?

SANDOVAL: Yes.

SPEAKER: Not on the financial, but somewhat. Who is going to be the owner of the pipeline?

GORDON: So, ownership of the pipeline would transfer to TRIGID.

SPEAKER: When?

AMERICAN OVERSIGHT

GORDON: I'll let Mr. Sader answer that. I believe it would be at the conclusion of the construction of the project.

SADER: For the record, Bob Sader, TRI General Improvement District. We're going to require that the project be built before it's dedicated to the GID. It will be thoroughly inspected before we take ownership.

SPEAKER: Thank you, thank you.

GORDON: So, in terms of the private sector folks that are participating in this project, we have representatives from Tesla that are here, in Las Vegas, that can speak to the project and the benefits of the project.

Governor, Director Anderson, Members of the Board. Chris Riley, for the record. And, accompanied by my colleague here, Brian Scelfo, Senior Director of Corporate Development. For the record, I focus on workforce development and external education partnerships for Tesla. We're both here today in full support of the project. This has been, to the team's points here, a multiyear effort by experts on the engineering side, on you know, the water reclamation side. This has been a project that we see as very exciting for long-term growth at Gigafactory.

To your point, we thought it may also be helpful just to share a quick snapshot of where we are today, as Gigafactory. Talk about construction, production and I think something relative on the infrastructure side would also be a little bit about transportation.

AMERICAN OVERSIGHT

Construction of the facility. We're currently at 5.4 million square feet of operational space at Gigafactory. The current footprint today is about 1.9 million. That's 30%, approximately, of the full buildout that we're seeing.

We are producing both—well, in addition to cell production, we're up to 20 gigawatt hours of annual production which is an incredible feat for us and a big milestone. We're also producing all Model 3 Electric Motors, as well as our energy products there. And, continuing to build on that. We're seeing our capital spend and our employee head counts are continuing to grow. We have thousands of team members onsite across Tesla, Panasonic and our other partners there.

On the transportation side, we've also been seeing options for our employees continue to grow and we now have a dedicated shuttle network for around 1,600 plus employees who are utilizing daily shuttles to Gigafactory. We're continuing to work on that transportation infrastructure because we see the growth out here at this park. We see the growth in partnership with our other companies and being able to build this infrastructure is really key for that long-term growth to continue and those jobs and this partnership. Thank you.

SANDOVAL: Thank you, that's what I needed to know. Board Members, any questions for the Tesla representatives? Mr. Lieutenant Governor.

AMERICAN OVERSIGHT

HUTCHISON: Thank you. Mr. Riley, thank you for being here and for Tesla's contribution to Nevada. We're all, as you know, very excited about Tesla and many of us, I think, if not all of us, very supportive of Tesla and what they're doing in Nevada.

My question for you is, you've heard the testimony—I guess not the testimony, the presentation today about the vacant properties that Tesla owns will be used for the tax incremental area. What are the future plans for those parcels that are part of the TIA?

RILEY: I wouldn't be able to say yet.

SCELFO: Do you want me to speak to that a little bit?

[crosstalk]

SCELFO: So, our current Gigafactory, if you're familiar, a pretty—pretty large area. It's separated into different parcels. Right now, we're built on the largest parcel. As Chris mentioned, Mr. Riley mentioned, we're only a third built out today, so we'll be expanding into those parcels, hopefully as fast as we can.

HUTCHISON: So, is the current parcel, the largest parcel upon which the Gigafactory is currently located, that's not subject to the TIA, as far as you know, it's future development on other parcels.

SCELFO: That's right, yeah.

AMERICAN OVERSIGHT

HUTCHISON: Can you address that future development on the other parcels?

SCELFO: Yeah, so those other parcels are adjacent to where we're built today. We'll be expanding into those as fast as we can.

HUTCHISON: I see. So, as the Gigafactory expands, then it necessarily expands on to those parcels.

SCELFO: Yes, that's right.

HUTCHISON: The Gigafactory isn't on just one big parcel, and then we've got to wait for future development. It's all part of the Gigafactory expansion.

SCELFO: Yeah. When we talk about Gigafactory, legally, it's separated into a bunch of different—about 15 different legal parcels.

HUTCHISON: Okay.

SCELFO: And right now, we're on one large one. And then yes, as we build out, we'll expand it to those vacant parcels.

HUTCHISON: And, what's the rough timeframe for the full expansion, that you think in terms of the Gigafactory?

SCELFO: As fast as we can. [laugher] Yesterday if you ask my boss. Yeah, so—no, it will take several years, but the goal is to get to full capacity as quick as we can get the funding, manpower and water.

[crosstalk]

AMERICAN OVERSIGHT

RILEY: --just over four years ago, for us as a company, that was—you know, we didn't have that, nearly the facility we have now.

HUTCHISON: So, as a quick follow-up, do you have enough water that you've secured and, what's the word, committed to, allocated—

RILEY: Subscribed.

HUTCHISON: --subscribed to, to build out the Gigafactory or do you need this project in order to build it up fully?

SCELFO: No, we need this project. Yeah.

HUTCHISON: So, without this project going forward, the full Tesla Gigafactory could not be built?

SCELFO: That's absolutely right.

HUTCHISON: Okay, thank you.

SANDOVAL: Any other questions from Board Members? Any questions from northern Nevada? All right, thank you gentlemen.

SPEAKER: Thank you.

GORDON: The second participant I just have on my list here would be Switch, if you wanted to hear from them. Obviously, one of your Board Members is also an Employee of Switch, so my sense was he wasn't present for this particular meeting. When I heard the roll call, I'm not sure if anybody is

AMERICAN OVERSIGHT

present up in northern Nevada and wishes to speak on behalf of Switch. I'll leave it at that if they are. I'm seeing nothing.

The other participant that I have next on the list would be Google, who has acquired a significant amount of land in the TRI Center. I—my understanding is they've communicated with staff of GOED regarding their inability to be here at the meeting today. I don't know if they've shared any comments with staff, but my understanding is that they are in full support of this project and have indicated they are considering their development plans for the future and without this water, their development plans would be significantly reduced or may not happen at all, is my understanding.

SANDOVAL: Okay.

GORDON: And then we have Blockchains, who I believe is not present and then two of the other private sector developers, Reno Land, as well as Emerald City Empire. I don't know if they have anything in particular to share or contribute to the conversation, but they've also indicated to us that the water would be a necessary component of their ultimate development plans.

SANDOVAL: Okay. Anything else that you wanted to present?

GORDON: That's all we have for you today, but again, we're happy to answer more questions or provide additional insight to either you or your staff.

AMERICAN OVERSIGHT

SANDOVAL: Okay. Board Members, any further questions or comments? Director Anderson, do you have any concluding—

KLAICH: Governor?

SANDOVAL: Oh, yes, Mr. Klaich?

KLAICH: [inaudible] Okay. I would just like to say, I've asked a lot of questions and I don't want my questions to be misconstrued. I think anyone who lives in northern Nevada understands that the TRI Center has fundamentally changed the economy in northern Nevada and there may be those who don't think that change is for the better. I am not one of those.

I think that the development of the Center and the corporate citizens that have come to Nevada have benefited the region enormously and benefited the entire State.

The Storey County Manager indicated some of the folks that had come before the County Commission meeting last week and used a phrase of "corporate welfare". I think if you try to oversimplify this project and look merely at the aspect of it, of the issuance of these bonds, it's possible that a person could come to that conclusion.

Again, I'm not a person who would come to that conclusion. I think that Ms. Mulroy described early on in her testimony a very complicated jigsaw puzzle, which this certainly is. But ultimately, it seems to me that what we're asking, what we're being asked to do today is to facilitate the development of a very complex project that has very tangible benefits for the

AMERICAN OVERSIGHT

governmental entities involved and the economy of the region as a whole.

I haven't heard anything in the presentation or the responses to the questions at this point that would lead me to believe that we should do anything other than support it. If you entertain a motion to that affect, later in this meeting Governor, I'd be happy to support it.

SANDOVAL: Thank you, Mr. Klaich. We're reaching that point. Do—I've got some concluding remarks that I'd like to make. Director Anderson, did you have anything else that you wanted to say?

ANDERSON: Governor, I think I would just add a thank you to Brian Gordon and his team at Applied Analysis, great job at putting this together. I think Ms. Mulroy put really some fine capping pieces of why this is important both from the environmental piece, as well as keeping Nevada on the forefront of really innovative ways to get things done. Here we are with a great opportunity to look at both the private and public partnerships, seeing good policy in action once again.

I think both this Board and your Office, Governor, has done a tremendous job of making that case, thank you.

SANDOVAL: Thank you. Board Members, do any of the rest of us have any questions or comments?

BENNETT: Governor?

SANDOVAL: Yes, Dr. Bennett?

AMERICAN OVERSIGHT

BENNETT: Thank you very much. I want to concur with my colleague here in the North. Mr. Klaich was much more articulate than I think I could be, talking about what's before us today. I do have one quick question which either, probably Mr. Sader or Ms. Mulroy could answer. Assuming best case scenario, the permits are acquired, the pipeline is constructed relatively smoothly, when will water start flowing through that pipeline?

SADER: Dr. Bennett, Bob Sader, TIR General Improvement District. Our current schedule is to commence construction of the pipeline and other facilities necessary in the first quarter of 2019 and to be completed by the end of 2020.

BENNETT: Great, thank you very much. Thank you, Governor.

SANDOVAL: Thank you, Dr. Bennett. Any other questions or comments? Just a few brief comments by me.

I suppose I'll follow the order of the presentation somewhat. With regard to the financing, I'm comfortable. I think there's been a significant record that has been made that provides comfort to me, that there is not just sufficient, but extraordinary protection for the people of Storey County, for the people of the State of Nevada associated with the General Fund. Given the layers of protection that are part of this record, again, I think that from every direction, that we have the protections that we need.

AMERICAN OVERSIGHT

I think the record has been made to show that the tough questions have been asked. In terms of providing that record, that there is sufficient financial protection for everybody involved and that ultimately the responsibility is going to fall upon the entities that are within that special improvement district.

With regard to environmental issues. I also believe that there's been a substantial record that has been made that with regard to the avoided costs of the people of Washoe County. That they can avoid the construction of tens of millions of dollars for facilities that will be necessary to clean this water that would otherwise be redirected to the Tahoe Regional Industrial Center.

The water that actually is going to come into the river is going to be better for the benefit of the Tribe. The Tribe was something that was an important issue to me, to provide that record that the Tribe will be protected and the quality of water that ultimately makes its way to Pyramid Lake will be high-quality water.

The other component that was mentioned but I think needs to be repeated is the fact that the facilities will recycle water, there at the Tahoe Reno Industrial Center which will actually save water. Which will be another ultimate benefit to the people of Washoe County, of Storey County and that region.

AMERICAN OVERSIGHT

I'm glad that Mr. Whitten was there with regard to Storey County. As I said, the best evidence is those that are going to be affected directly and this matter was presented to the Storey County Commission and was considered and allowed for public input and public comment. I appreciate Mr. Whitten being candid that yes, there were a few negative voices to that, but overall there was great support for that. Those Commissioners are elected for a reason, to represent their constituencies and they voted in support of this project.

With regard to economic development, this is the difference between a lot of quality jobs in the region and to continue this New Nevada story of bringing literally some of the best, if not the best jobs in the country to Nevada, to allow for the completion of the Gigafactory. Tesla has exceeded everything that it has promised. I'm someone who was here and listened to that testimony and representation. They're far ahead of where they said they were going to be.

I was just at a press conference yesterday at Cimarron Memorial High School where they—initially they said they were going to donate $37.5 million to education in Nevada. The first tranche of that contribution, $1.5 million came yesterday at this announcement at Cimarron Memorial, which is going to be the first of hopefully the development of robotics teams in every high school or every school in the State and the investment into STEM education throughout Nevada.

AMERICAN OVERSIGHT

I know it was a sensitive situation given that Mr. Kramer is a member of this Board and he's an employee of Switch, but Switch is another significant company in this State that has built the world's largest data center here and will build—here in Las Vegas, but will build another one, and is building another one in northern Nevada. They're a significant and generous corporate citizen. They stand or it stands behind this. Google, hopefully they'll make the decision to go here, but that is a company that has been providing training—if you've been looking in the Reno newspaper, they've already been providing training, free of cost, to the citizens of Washoe County. I'm not sure if they've done it in Clark County as well, but they're not even here and they're doing philanthropic things, with regards to certification and training of people who need it.

Finally, I'll close with this, that we have some of the most trusted and experienced individuals who testified on behalf of this project.

Ms. Mulroy, I believe your knowledge and experience is unimpeachable when it comes to your testimony with regard to the water situation there and the water quality which is very important to me.

Mr. Taggert is one of the most preeminent water lawyers in the State and he's involved in this and has worked with Washoe County and Storey County, City of Sparks, City of Reno.

AMERICAN OVERSIGHT

Mr. Sader, who is a very well respected member of our Legislature and a former Chairman of the Judiciary Committee, and somebody who's had a long public service career, is involved with this project.

Applied Analysis. Mr. Aguero couldn't be here today, but it is an entity that I personally know and trust and have taken advantage of associated with some of the most complex tax issues and other issues associated with economic development in this State and without exception, all of the testimony and the projections that you've provided have always been right on the money and honest and to the point. So, same thing.

So, as I look at this global presentation and yes, this has been a long meeting, but this is a transformational project. It is going to allow for the State of Nevada to lead. We've had nothing but good economic news. We're the most improved state in the country when it comes to employment. We're adding 3,000 jobs a month in this state. Clark County is the fastest growing metropolitan area in the United States of America. Our average wage and Mr. Potts, maybe he's there, correct me if I'm wrong, but our average wage is the highest that it has ever been. We've increased the number—we're at a record level with regard to the number of employers in this State. We've replaced 175,000 lost jobs with 260,000 jobs. I believe that we're at a place where we're resilient, with regard to another recession because we have

AMERICAN OVERSIGHT

diversified in the economy in a way that is unlike any other state in the country.

I will tell you, you know, this is just me talking, but the other states would be begging to be in the position that we are in now, to be able to build a $35 million project that will help enhance companies like Tesla, and Google, and Switch and Blockchains. They would trade places with us in a heartbeat.

This is incredibly important to the future of this State. Everyone on this Board has, you know, the right to vote any way that you like. I've put a lot of thought into this and I've lived this from like, 2011 until now and we never conceived that we would be in the position that we are in now, to be able to make a decision to continue unprecedented growth, so that the State of Nevada is at the foundation of the Fourth Industrial Revolution, when it comes to the type of companies that are coming here, that have come here and will come here and will expand here.

So, I know I'm kind of preaching here, but you know, I'm really passionate about this. We are lucky—we are lucky that we have the ability to make a decision on a project like this.

So, I've really appreciated the questions that have been asked during the course of this meeting because it is important that we provide a record as to what's happened. I have full faith and the companies that are going to be participating in this, that they're going to do what they say they're going to do

AMERICAN OVERSIGHT

and make those payments, so that we never even have to have the conversation that we've had, with regard to foreclosures and—and those types of things. I'm absolutely confident that we'll never have to go there, but again, the record needed to be made.

So, that's my speech. That's my comments with regard to this. Sometimes those issues or those thoughts and facts—I shouldn't say thoughts, they're facts, sometimes get lost in these conversations. So, again, I don't need to have the last word. If anybody else has any comments, that sits on this Board, I'm happy to take them before I accept a motion.

I'm looking at you Mr. Lieutenant Governor, because I know you always have something to say. [laughter]

HUTCHISON: There's no one left to cross-examine, you're the Judge. [laughter] Well, Governor, I just appreciate the opportunity to be on this Board and to see this kind of progress and development. I was just thinking to myself, you don't want to hear this, but Heaven help the next Governor. I don't know what you do to beat the record that this Governor has and the leadership that we've seen come out of Governor Sandoval. We only have a few more months left with you, Governor, and we're going to miss you. I think this project and this meeting underscores how fortunate we've all been serve with you. As we've seen the New Nevada, this is, I think, a nice little encapsulation, this meeting of what we've seen over the last, almost eight years now.

AMERICAN OVERSIGHT

So, I don't have to have the last word either, but I would certainly be happy to make a motion, whenever you're ready for that, Governor. Again, this is just, I think a proud moment for us here in Nevada and for all Nevadans. Thank you, Governor.

SANDOVAL: Thank you, Mr. Lieutenant Governor. So, if there are no—we still have a bunch of things to go on the agenda. If there are no further questions, this is—I don't think it's as simple as approving the financial—finance proposal, Mr. Klaich, you had asked to make the motion. If I could lay down the form of the motion and if you would be wiling to make it, I'll proceed.

KLAICH: I would yield to the Lieutenant Governor.

HUTCHISON: No, no. You—Mr. Klaich, you've got the motion on this one. You'd spoken on it early. I was just saying, I'll support it 100%.

SANDOVAL: So, if I may, Mr. Klaich, what I would be looking the form of the motion to be would be first to approve the Tahoe Reno Industrial Effluent Water Pipeline Economic Development Financing Proposal, submitted by Storey County, Nevada. That we approve the submission of the proposal to the Interim Finance Committee of the Nevada Legislature. That we approve to enter into one or more agreements with Storey County or another local government to administer any districts and carry out the projects identified in the proposal as deemed necessary by the Executive Director. That we approve the provision of

AMERICAN OVERSIGHT

notice of the approval of the proposal to the Board of County Commissioners of Storey County and the State Board of Finance and that we—the motion include to take all action necessary or appropriate to effectuate the approval of the proposal and provisions of NRS 360.981 to 360.992.

KLAICH: Governor, I request that the five-part motion that you read, be made part of the record. I would motion for approval.

SANDOVAL: Thank you. Mr. Klaich has moved for approval of the motion as I just stated it. I'm not going to read it all again. Is there a second?

HUTCHISON: I'll second.

SANDOVAL: Lieutenant Governor seconded the motion. Are there any questions or discussion on the motion? I hear none. All those in favor, please say aye. [ayes around] Those opposed, say no. That motion passes unanimously. Congratulations.

All right, we have the Agenda Item Number 5 which is the review and approval of Storey County Resolutions 501 and 502. Director Anderson, are you going to cover that agenda item?

ANDERSON: Mr. Gordon, would you like to cover those or do we have someone that would like to speak to the resolutions?

AMERICAN OVERSIGHT

GORDON: I didn't have anything prepared for those particular items but I'm happy to read them into the record, if that's what you're looking for.

SANDOVAL: We don't need them—excuse me. I don't know if we need them read into the record. We have before us Resolution 18-501 and 18-502. If there's anyone present that could explain the contents of those resolutions and what they mean, that would be beneficial for our record.

GORDON: I would suggest that Ms. Follett introduce those two items.

FOLLETT: Kendra Follett, Bond Counsel to Storey County. Resolution 501 is a resolution approving the financing proposal. This is adopted by the Board of County Commissioners of Storey County and it directed notification to this—the Governor's Office of Economic Development and the IFC pursuant to the provisions of NRS 278C and NRS 360.

Resolution #502, it also concerns the same project and it directs notice to the IFC under a different provision of 278C which specifically relates to the tax increment area.

WHITTEN: And, if I may, Governor, Board Members. Pat Whitten, Storey County Manager, I can attest that the Storey County Board of Commissioners, a week ago from today, so last Tuesday, unanimously approved both Resolutions 501 and 502.

SANDOVAL: Thank you. And, I will incorporate all of our questions and answers from our prior discussion on Agenda

AMERICAN OVERSIGHT

Item Number 4 into this agenda item. I don't think we need to go over those, but those are obviously relevant to the approval of these resolutions.

So, Board Members, any questions associated with this agenda item? If there are none, the Chair will accept a motion to approve Storey County Resolutions 501 and 502, as presented in Agenda Item Number 5.

SPECHT: Motion—[crosstalk]

KLAICH: I would move for approval Governor.

SANDOVAL: Mr. Specht moved for approval. May I take your comment as a second, Mr. Klaich?

KLAICH: Yes, please, Governor.

SANDOVAL: Okay. Mr. Klaich has seconded the motion. Any questions or discussion on the motion? I hear none. All those in favor, please say aye. [ayes around] Those opposed, say no. That motion passes unanimously.

We'll move to Agenda Item Number 6, Public Comment. Is there any member of the public present in Las Vegas that would like to provide public comment to the Board? I hear and see no one. Is there anyone present in Carson City that would like to provide public comment to the Board?

KLAICH: No one coming to the table, Governor.

SANDOVAL: Thank you, Mr. Klaich. Is there a motion to adjourn, Agenda Item Number 7?

HAVINS: So moved.

AMERICAN OVERSIGHT

SANDOVAL: Dr. Havins has moved to adjourn. Mr. Barrett has seconded the motion. All in favor say aye. [ayes around] the motion passes unanimously. Thank you, ladies and gentlemen, this meeting is adjourned.

[end of meeting]

Subject: Governor's Tech Summit - Itinerary and Documents
Attachments: Tech Summit_Draft Governor's Itinerary.docx; Draft_Governor Opening Remarks_Tech Summit.docx; Tech Summit - Draft Panel Script.docx; TRIC-Blockchains Proclamation.docx

Andrew and Christina

I've attached some documents for the Governor's review for the upcoming Tech Summit. There may be some changes to the timeline of the event and the Chief Brand Officer of Switch may join the panel. I'll provide any updates on Friday. For the panel script, some of the questions may change.

As of today, Elon indicated that he is still planning to be at the Tech Summit. His team is working on the dialogue between the Governor and Elon. The topics are highlighted in the attached itinerary. I will send the script as soon as I receive it from Tesla.

Also, I've attached a draft proclamation for the Governor's review. The plan, if he's good with it, is to have him read it at the end of his opening remarks. The proclamation addresses the renaming of TRIC to "Innovation Park" and designating a portion of "Innovation Park" as "Blockchains City."

We are expecting 40 to 50 attendees at the event.

The following documents are attached:

1. Draft Governor's Itinerary for the Tech Summit
2. Draft Opening Remarks
3. Draft Panel Script
4. Draft Proclamation

Please let me know if there are any questions or desired changes. I'm coordinating closely with the panelists, and especially Tesla since they are hosting the event.

Thank you for your help!

A PROCLAMATION DESIGNATING THE TAHOE-RENO INDUSTRIAL CENTER "INNOVATION PARK" AND CREATING A HOME WITHIN THE PARK FOR BLOCKCHAIN-POWERED IDEAS, VENTURES AND BUSINESSES

Whereas, our everyday lives have become complicated by innumerous digital transactions, data privacy issues and mistrust about our presence in the virtual world; and

Whereas, a better world will be created through innovative solutions to these issues; and

Whereas, the State of Nevada has always welcomed visionaries ready to apply hard work and creativity to solve the toughest challenges; and

Whereas, the Tahoe-Reno Industrial Center is already a proven home for some of the world's most inventive and creative companies such as Tesla, Google and Switch; and

Whereas, today over 100 different companies use the Tahoe-Reno Industrial Center to power their business success; and

Whereas, the world is in need of a welcoming center of interaction, collaboration and incubation for additional innovators and ideas, such as blockchain technology; and

Whereas, blockchain technology has a near limitless potential to provide solutions to the world's most complex challenges, across every industry and sector; and

Whereas, this administration has endeavored to make the State of Nevada the physical center and most conducive home to the greatest innovators, including those embarking on the blockchain revolution; and

Whereas, as Governor I am proud to support Nevada's future as the worldwide center of blockchain thought and development, with all the benefits this will bring to every corner of our state.

Now, Therefore, I, Brian Sandoval, Governor of the State of Nevada do hereby designate the Tahoe-Reno Industrial Center as "Innovation Park" to honor this home of the talented and hard-working minds who are helping to power Nevada's economy of tomorrow. I further designate a portion of Innovation Park as "Blockchains City" dedicated to the worldwide movement to develop blockchain-powered ideas, ventures and businesses.

AMERICAN OVERSIGHT

GOVERNOR SANDOVAL:
GENTLEMAN, THANK YOU FOR YOUR WILLINGNESS TO PARTICIPATE IN TODAY'S PANEL DISCUSSION. I KNOW EACH OF YOU ARE BUSY MAKING GREAT THINGS HAPPEN AT YOUR RESPECTIVE COMPANIES. I'D LIKE TO TAKE THIS OPPORTUNITY TO ASK EACH OF YOU TWO OR THREE QUESTIONS REGARDING YOUR SUCCESSES AND FUTURE PLANS, OPPORTUNITIES, AND CHALLENGES.

JB, WE'LL START WITH YOU. THANK YOU AGAIN FOR HOSTING US AT THIS AMAZING, GROWING FACILITY. EVERYWHERE I TRAVEL, I'M ASKED ABOUT HOW WE GOT THE TESLA FACTORY IN NEVADA. I LOVE TO SHARE THE STORY. I ALSO LIKE TO TALK ABOUT THE CLOSE PARTNERSHIP BETWEEN TESLA AND THE STATE OF NEVADA ON WORKFORCE DEVELOPMENT. ***WHAT HAS BEEN DONE TO MEET YOUR NEEDS WITH THE TRAINING AND EDUCATION OF YOUR WORKFORCE?***

JB STRAUBEL:
3-5 MINUTE ANSWER.

GOVERNOR SANDOVAL:
THANK YOU, JB.
JEFFREY, IT'S EXCITING TO HAVE YOU ON THE PANEL. WITH YOUR RECENT LARGE LAND PURCHASE – 60,000 ACRES! - NEVADA AND THE WORLD IS EXCITED TO LEARN MORE ABOUT WHAT YOU PLAN TO DO TO CHANGE THE WORLD. **SO, WHY NEVADA AND WHAT ARE YOU PLANNING?**

JEFFREY BERNS:
THANK YOU, GOVERNOR SANDOVAL….
****BLOCKCHAINS WILL PLAY A 2 MINUTE VIDEO. JEFFREY WILL ANNOUNCE THEIR EVENT AT DEVCON4 IN PRAGUE.***

AMERICAN OVERSIGHT

GOVERNOR SANDOVAL:

THAT'S EXCITING NEWS, JEFFREY. I LOOK FORWARD TO LEARNING MORE.

MR. WATANABE, IT IS WONDERFUL TO HAVE PANASONIC IN NEVADA PARTNERING WITH TESLA IN THE MANUFACTURING OF CYLINDRICAL LITHIUM-ION CELLS. **RELATED TO THE QUESTION THAT I ASKED JB, WHAT IS YOUR CHALLENGE IN FINDING TALENT IN NORTHERN NEVADA?**

MR. WATANABE:

ANSWER

GOVERNOR SANDOVAL:

THANK YOU, MR. WATANABE. ONE MORE QUESTION FOR YOU. **WHAT INFRASTRUCTURE IS NEEDED TO ALLOW PANASONIC TO CONTINUE TO EXCEL IN ITS OPERATIONS?**

MR. WATANABE:

ANSWER

GOVERNOR SANDOVAL:

JEFFREY AND JB, SAME QUESTION TO EACH OF YOU. ***WHAT DO YOU SEE AS THE MOST PRESSING INFRASTRUCTURE NEED FOR THE TENANTS AT TRIC?***

JEFFREY BERNS:

ANSWER

JB STRAUBEL:

ANSWER

GOVERNOR SANDOVAL:

THANK YOU. I LOOK FORWARD TO SEEING THE IMPROVEMENTS MADE AND THEIR IMPACT.

JEFFREY, THERE ARE A LOT OF QUESTIONS ABOUT BLOCKCHAIN TECHNOLOGY AND HOW IT

AMERICAN OVERSIGHT

CAN BE USED. WE KNOW IT'S MORE THAN JUST CRYPTOCURRENCY. THE GOVERNMENT OF ESTONIA USES BLOCKCHAIN TECHNOLOGY FOR OFFICIAL GOVERNMENT RECORDS AND TRANSACTIONS. ***WHEN YOU THINK ABOUT THE POTENTIAL USES OF BLOCKCHAIN TECHNOLOGY, WHAT CURRENT OR POTENTIAL USE EXCITES YOU THE MOST?***

JEFFREY BERNS:

ANSWER

GOVERNOR SANDOVAL:

I WILL BE WATCHING CLOSELY AS THE USE OF BLOCKCHAIN TECHNOLOGY CONTINUES TO DEVELOP AND SPREAD.

JB, AS PRODUCTION AND OPERATIONS GROW AT GIGAFACTORY ONE, YOU WILL REQUIRE MORE ENERGY AND MORE RESOURCES. I KNOW THAT SUSTAINABILITY IS IMPORTANT TO TESLA. ***HOW DOES TESLA PLAN TO CONTINUE TO MEET IT'S SUSTAINABILITY GOALS?***

JB STRAUBEL:

ANSWER

GOVERNOR SANDOVAL:

THANK YOU. ONE LAST QUESTION FOR EACH OF YOU. ***IN TWO OR THREE SENTENCES WHAT DO YOU THINK IS THE MOST EXCITING CHALLENGE OR OPPORTUNITY THAT WILL BE ADDRESSED BY NEW TECHNOLOGY THAT IS ALREADY BEING DEVELOPED?***

MR. WATANABE:

ANSWER

JEFFREYREY BERNS:

ANSWER

AMERICAN OVERSIGHT

JB STRAUBEL:

ANSWER

GOVERNOR SANDOVAL:

GENTLEMEN, THANK YOU FOR YOUR TIME TODAY AND YOUR WONDERFUL INSIGHTS. THANK YOU FOR YOU WILLINGNESS TO DO BUSINESS IN NEVADA AND FOR YOUR GLOBAL OUTLOOK IN THE WAY YOU APPROACH THE MARKET. YOU ARE THE NEW NEVADA!

LADIES AND GENTLEMEN, THANK YOU FOR BEING HERE TODAY. EACH OF YOU ARE DIRECT PARTICIPANTS IN THIS EFFORT TO CREATE THE NEW NEVADA, WHILE PRESERVING THE BEST OF WHAT CAME BEFORE. IT'S AN HONOR AND PLEASURE TO WORK WITH YOU.

THANK YOU! AND GOD BLESS!

AMERICAN OVERSIGHT

THANK YOU, PAUL FOR THE KIND INTRODUCTION.

LADIES AND GENTLEMEN, IT IS AN HONOR TO BE HERE AT TESLA'S GIGAFACTORY ONE. TO CELEBRATE THE ACHIEVEMENTS OF THE PAST EIGHT YEARS. IT IS EQUALLY EXCITING TO LOOK TO WHAT THE FUTURE WILL BRING. THIS TECH SUMMIT IS AN OPPORTUNITY FOR US TO DO JUST THAT – CELEBRATE WHAT WE HAVE ACCOMPLISHED WITH AN EYE FOCUSED ON THE FUTURE – THE FUTURE THAT WILL BE CREATED AND DRIVEN BY THE DEMAND FOR NEW TECHNOLOGIES THAT WILL DRIVE JOB GROWTH AND IMPROVE THE LIVES OF NEVADANS.

EIGHT YEARS AGO, AT THIS TIME, I WAS IN THE FINAL MONTH OF MY CAMPAIGN FOR THE OFFICE OF GOVERNOR. FRIENDS AND COLLEAGUES ASKED ME WHY I WOULD EVER CONSIDER LEAVING A LIFETIME APPOINTMENT ON THE FEDERAL BENCH TO RUN FOR OFFICE IN THE MIDDLE OF A DESTRUCTIVE RECESSION. NEVADA WAS THE HARDEST HIT STATE. IN 2011, THE UNEMPLOYMENT RATE IN NEVADA SPIKED AT OVER 14%. NEVADA LOST OVER 175,000 JOBS. WE LED THE NATION IN HOME FORECLOSURES. I DECIDED TO RUN BECAUSE I LOVE NEVADA AND KNEW WE COULD DO BETTER.

UPON TAKING OFFICE, HARD DECISIONS HAD BE MADE, BUT AT THE SAME TIME WE HAD TO LOOK TO THE FUTURE. WE HAD TO SET A NEW PATH; I KNEW WE NEEDED TO DIVERSIFY OUR ECONOMY. TRADITIONALLY, OUR ECONOMY WAS DRIVEN BY MINING AND GAMING AND HOSPITALITY. THOSE HAD TO REMAIN A VITAL PART OF THE ECONOMY GOING FORWARD, BUT WE HAD TO EXPAND BEYOND THAT.

AMERICAN OVERSIGHT

AS GOVERNOR, I CREATED THE GOVERNOR'S OFFICE OF ECONOMIC DEVELOPMENT. PREVIOUSLY, THE RESPONSIBILITY WAS WITH THE LIEUTENANT GOVERNOR. BUT WE HAD TO ELEVATE THE FOCUS ON ECONOMIC DEVELOPMENT – IT BECAME ONE OF MY TOP PRIORITIES. I BROUGHT IN GREAT TALENT TO RUN THE GOVERNOR'S OFFICE OF ECONOMIC DEVELOPMENT – STEVE HILL, WHO NOW HEADS THE LAS VEGAS CONVENTION AND VISITORS AUTHORITY, AND NOW PAUL ANDERSON. WE FOCUSED ON IDENTIFYING SECTORS THAT COULD GROW AND STRENGTHEN THE ECONOMY AND CREATE NEW JOBS. THESE SECTORS INCLUDED DRONE TECHNOLOGY, WATER TECHNOLOGY, AUTOMOUS VEHICLES, AND OTHERS. WE PASSED LEGISLATION TO GOVERN THE TESTING AND USE OF THESE TECHNOLOGIES IN NEVADA IN AN EFFORT TO ATTRACT BUSINESSES AND ENTREPRENEURS. WE CREATED WATERSTART, A WATER TECHNOLOGY CENTER OF EXCELLENCE. NEVADA WAS SELECTED AS ONE OF SIX NATIONAL TEST SITES FOR UNMANNED AERIAL PLATFORMS. WE CREATED THE NEVADA INSTITUTE OF AUTONOMOUS SYSTEMS TO DRIVE GROWTH IN THE DRONE SECTOR.

WORKING WITH THE STATE LEGISLATURE WE ESTABLISHED BUSINESS INCENTIVES TO ATTRACT NEW BUSINESSES. I TRAVELED GLOBALLY TO PROMOTE NEVADA. IN OUR EFFORT TO DIVERSIFY, WE PURSUED NEW OPTIONS THAT MIGHT HAVE SEEMED OUT OF OUR REACH PREVIOUSLY. THE DECISION BY TESLA TO BUILD THE GIGAFACTORY IN NORTHERN NEVADA WAS A MAJOR WIN THAT HAS HAD FAR REACHING RESULTS. IT HAS CAUSED OTHER BUSINESS LEADERS TO ASK: WHY NEVADA?

AMERICAN OVERSIGHT

IN OUR EFFORTS TO DIVERSIFY THE ECONOMY, TO PURSUE JOBS THAT REQUIRED GREATER TECHNICAL SKILLS, AND WITH THE COMING OF TESLA, WE KNEW WE HAD TO FOCUS ON IMPROVING OUR EDUCATION AT ALL LEVELS. IN 2015 WE PASSED SWEEPING CHANGES TO EDUCATION THAT INCLUDED AN INVESTMENT OF $343 MILLION TO PREPARE STUDENTS TO MEET THE NEEDS OF THE NEW NEVADA ECONOMY. I'VE PUSHED FOR ADDITIONAL INVESTMENTS IN HIGHER EDUCATION. HAND-IN-HAND WITH PRIMARY AND HIGHER EDUCATION, I HAVE FOCUSED ON THE NEED FOR COMPREHENSIVE WORKFORCE DEVELOPMENT TO PREPARE OUR NEVADANS FOR JOBS LIKE THOSE AT THE GIGAFACTORY. IN FACT, WE HAVE WORKED DIRECTLY WITH TESLA, PANASONIC, AND OTHER GREAT EMPLOYERS TO MAKE SURE THAT THE STATE IS FOCUSED ON PROVIDING EDUCATION AND TRAINING TO MEET THEIR NEEDS. I CREATED THE GOVERNOR'S OFFICE OF WORKFORCE INNOVATION TO WORK WITH OUR EMPLOYERS AND EDUCATORS TO PREPARE NEVADANS FOR THE NEW NEVADA.

ACROSS THE STATE, OUR EFFORTS ARE PAYING OFF. WE HAVE REPLACED ALL OF THE JOBS THAT WERE LOST AND ADDED MANY MORE. AS OF AUGUST 2018, THE UNEMPLOYMENT RATE FOR NEVADA IS 4.5%. WE ARE IN THE TOP 5 STATES FOR THE BEST BUSINESS CLIMATES. IN SOUTHERN NEVADA, WE HAVE SEEN MORE ADVANCED MANUFACTURERS MOVING IN AND EXPANDING, THE RAIDERS WILL CALL LAS VEGAS HOME IN A NEW STADIUM. HERE IN NORTHERN NEVADA, WE HAVE SEEN COMPANIES LIKE GOOGLE, APPLE, WAL-MART AND OTHERS MOVE IN. TODAY IT'S EXCITING TO WELCOME BLOCKCHAINS, LLC TO THIS COMMUNITY OF CUTTING-EDGE BUSINESSES, INDUSTRY AND WORLD LEADERS. BLOCKCHAINS MADE WAVES BY PURCHASING OVER 60,000 ACRES OF LAND HERE AT TRIC.

AMERICAN OVERSIGHT

TOGETHER THE COMPANIES HERE ARE DEVELOPING AND UTILIZING EXCITING NEW TECHNOLOGIES THAT WILL DRIVE GROWTH AND IMPROVE LIVES ACROSS THE GLOBE.

IT IS THE DEMAND, THE NEED AND THE DEVELOPMENT FOR NEW TECHNOLOGIES THAT HAS BROUGHT US TOGETHER TODAY FOR THIS TECH SUMMIT. I LOOK FORWARD TO OUR DISCUSSIONS TODAY, TO REVIEW HOW WE GOT HEAR, BUT EVEN MORE IMPORTANTLY TO LOOK AHEAD.

Cc: Alan Bogomilsky; Elizabeth Tafeen; Chip Bowlby; JoelGrace
Subject: Income Averaging And Property Tax Exemption on Tax Credit Units

Michael,

Have you received an email from the Accessor's office that confirms that tax credit units at 80% of median will receive property tax exemption, in projects receiving Home Funds, as covered by the new IRS Income Averaging Program (with the average affordable unit at 60% of median)? In order to go forward with the program for teachers and veterans we need this confirmation in writing for the Sierra Summit project. Could you please call them and help them with the wording if they have not sent it? They may be hesitating because they do not technically know how to refer to the 80% of median units that were referenced under the Income Averaging Program, again restricted to projects with Home Funds. Thank you in advance for anything you might do. We would like to get this program refined and submitted to your department, for review, prior to releasing it to the Washoe County Schools administration.

Thank you,

Bob Klein

Subject: Introducing the 2019 Milken Institute MENA Summit Session & Speaker Highlights

View web version

February 12 - 13, 2019 | St. Regis Saadiyat Island, Abu Dhabi, UAE

Dear Daniel,

The Milken Institute cordially invites you to join us at the second annual **Milken Institute MENA Summit**, February 12-13, 2019, at the St. Regis Saadiyat Island in Abu Dhabi, United Arab Emirates.

This year's theme of *Navigating a World in Transition* will focus on timely and pressing topics such as modernizing economies across the globe, prioritizing investments in health-care systems, adapting regional workforces to technological innovations, and many other provocative issues.

Regional speakers will include:

AMERICAN OVERSIGHT

- **His Excellency Ambassador Yousef Al Otaiba**, Ambassador of the United Arab Emirates to the United States of America
- **His Excellency Khaldoon Khalifa Al Mubarak**, Board of Directors, Group CEO and Managing Director, Mubadala Investment Company
- **Her Excellency Noura bint Mohammed Al Kaabi**, Minister of Culture and Knowledge Development, United Arab Emirates
- **His Excellency Youssef Boutros-Ghali**, Former Minister of Finance, Egypt; Former Chairman, IMF Committee
- **Uche Orji**, Managing Director and CEO, Nigeria Sovereign Investment Authority
- **Mohammed Alardhi**, Executive Chairman, Investcorp; Former Chief, Oman Airforce
- **Naguib Sawiris**, Chairman, Orascom
- **His Excellency Salaheddine Mezouar**, President, General Confederation of Moroccan Enterprises; Former Minister of Foreign Affairs and Former Minister of Finance, Morocco

Sessions at this year's event will include:

- Maintaining Competitiveness Amidst Global Trade Disruption
- Impact of Technological Advancement on Global Capital Markets
- Africa: The Next Frontier for Fund Investors
- World-class Healthcare: Investing in Biomedical Innovation
- Emergence of Venture Capital Mega-Funds

AMERICAN OVERSIGHT

- Global Food Security and the Role of Technology

The event program and full list of regional and international speakers will be made available in January 2019.

Please use the Priority Code below when registering:

Subject: Invitation to the GCMAC Conference Call - Q1 2018

Dear Daniel,

Please join us Tuesday, **March 20, 2018 at 5:00 PM – 6:00 PM PST**, for our **Q1 GCMAC Conference Call**. This is an opportunity to have a wide-ranging conversation on the global markets with **Michael Milken**, chairman of the Milken Institute; **Christopher Ailman**, co-chairman of GCMAC and chief investment officer of the California State Teachers' Retirement System; **Hiromichi Mizuno**, co-chairman of GCMAC, executive managing director and chief investment officer of Japan's GPIF; and featuring perspectives from several of our members.

In addition to quarterly conference calls, GCMAC comes together at our major conferences and summits. The Milken Institute will next be convening GCMAC at our annual **Global Conference (April 29 – May 2 in Los Angeles)**. The theme of this year's conference is "Navigating a World in Transition." In both the Q1 GCMAC Conference Call and Global Conference, GCMAC will be exploring regional developments and the state of global markets, among other topics.

RSVP FOR THE CALL

Unable to attend? Click here

Please also save these dates for Institute events and GCMAC programming coming up:

- **Global Conference** – April 29 – May 2, 2018 (Los Angeles)

AMERICAN OVERSIGHT

- **Asia Summit** – September 13 – 14, 2018 (Singapore)
- **London Summit** – December 4, 2018 (London)

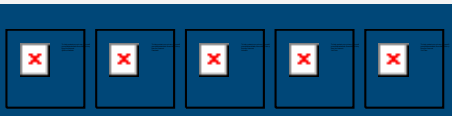
About our speakers:

Michael Milken
Mike Milken, chairman of the Milken Institute, has been at the forefront of successful initiatives in medical research, education, public health and access to capital for more than four decades. *Fortune* magazine called him "The Man Who Changed Medicine" and a recent *Forbes* cover listed him among "Visionaries Reimagining Our Children's Future." In 1982, he formalized previous philanthropy by co-founding the Milken Family Foundation. He also chairs *FasterCures*, which speeds progress against all life-threatening diseases. He hosted the Milken Institute Future of Health Summit in Washington, D.C., October 23-24, 2017, and will host the 21st annual Milken Institute Global Conference, April 29-May 2, 2018, in Los Angeles. The Milken Institute School of Public Health at George Washington University was named to recognize an Institute gift. As a financier, Mike is often said to have revolutionized modern capital markets by pricing and rewarding risk more efficiently. The thousands of companies he financed created millions of jobs.

A graduate of the University of California at Berkeley, Mike earned his M.B.A. at the Wharton School. He and his wife of 48 years, Lori, have three children and nine grandchildren. For more information, see mikemilken.com.

Christopher Ailman
Christopher Ailman is chief investment officer of the $202 billion California State Teachers' Retirement System, the largest teachers' fund and the second-largest pension fund in the United States. As chief investment officer, he leads an investment staff of 155 across eight divisions. Ailman has more than 30 years of institutional investment management experience. He is co-chair of the Milken Institute's Global Capital Markets Advisory Council. Ailman has received numerous awards and recognitions, including the aiCIO Innovation Award, and was named the No. 3 chief investment officer in the world by aiCIO magazine in 2013. He is a regular guest on CNBC and Bloomberg radio and TV. Ailman earned a B.A. in business economics from the University of California, Santa Barbara, and received his certified financial planner designation from the University of Southern California.

Hiromichi Mizuno
Hiromichi Mizuno is executive managing director and chief investment officer of Japan's Government Pension Investment Fund. Previously, he was a partner at Collar Capital, a London based private-equity firm, and



AMERICAN OVERSIGHT
NV-DA-20-0615-A-001761

held senior posts at Sumitomo Trust & Banking Co., Ltd. Mizuno is an executive advisor to the Hiroshima Innovation Platform and to the Japanese Cabinet on Health Care and Medical Promotion Strategy. He is a guest professor at the Osaka University Graduate School of Medicine and the Kindai University Global Economic Research Center. He is also an advisor to Kyoto University's Center for iPS Cell Research and Applications, as well as a senior fellow at the Tel Aviv University Graduate School of Management. Mizuno holds a B.A. from Osaka City University and an M.B.A. from Northwestern University's Kellogg School of Management

About **GCMAC**: For nearly a decade, GCMAC has provided CIOs of the world's largest pension funds, endowments, foundations, insurance companies and sovereign wealth funds with a private, off-the-record forum to discuss the opportunities and challenges facing institutional investors. Featuring investors who represent more than $20 trillion in assets under management, these curated roundtable discussions are designed to help investors understand immediate and long-term macroeconomic trends. In coming to Global Conference, you will receive an invitation to participate in one of these discussions as well as invitations to a number of private meetings and roundtables that are available to GCMAC members.

Subject: OZ Summit - Task Force Meeting Thursday, Feb 21th @9am

Hello Everyone:

We are only one month away from the Northern Nevada Opportunity Zone Summit and we need all hands on deck.

Here is the info for our next Opportunity Zone Task Force Meeting:
When: Thursday, February 21st, 9-10 am
Where: Bosma Business Center, 401 Ryland Street, Reno, NV 89502
RSVP: info@renozoneadvisors.com
Dial In Info: 712-770-4035 PIN: 629961#

Here is the link to the Summit Website: http://renozonesummit.com/

BIG NEWS: We were able to get Steve Glickman to be our Keynote Speaker! Steve is former White House Economic Advisor, former CEO of EIG, and chief architect of OZ. This is a huge deal for us to be able to get him here. He is going to be our lunch keynote, a special guest panelist for our OZ Pitchfest, and will be at the VIP Cocktail Reception afterward. Now we just need all of your help to fill the seats and get more sponsors.

The purpose of this week's meeting is as follows:
• To go over the agenda and logistics
• Talk about Sponsors
• Talk about what involvement the Task Force members would like to have
• Update you on all of the OZ deals and funds who have been coming out of the woodwork since we announced this – there are lots of potential deals and dollars looking to come here.

Please plan to be there or to dial in that day.

Email me directly with any questions.

Best Regards,

AMERICAN OVERSIGHT

Subject: INVITE - Conference Call Tomorrow at 9:30 a.m. on Opportunity Zones

State Leaders and Staff,

Please join the White House Office of Intergovernmental Affairs and Public Liaison for a conference call featuring Senior White House Officials tomorrow, **Wednesday, December 12, at 9:30 a.m. Eastern Time.** The call will preview the signing of the Executive Order on Opportunity Zones, designed to incentivize investment in American communities.

Opportunity Zone Briefing Call

- **Date:** Wednesday, December 12
- **Time:** 9:30 a.m. Eastern Time
- **Call-In Information:** RSVP Link

This call is transferrable, so please feel free to share this information. We will be providing further materials regarding Opportunity Zones as they become available.

Opportunity Zones Background

Opportunity Zones, created by the 2017 Tax Cuts and Jobs Act, were designed to spur investment in distressed communities throughout the country through tax benefits. Under a nomination process completed in June, 8,761 communities in all 50 states, the District of Columbia and five U.S. territories were designated as qualified Opportunity Zones. Opportunity Zones retain their designation for 10 years. Investors may defer tax on almost any capital gain up to Dec. 31, 2026 by making an appropriate investment in a zone, making an election after December 21, 2017, and meeting other requirements.

In November, the U.S. Department of the Treasury and the IRS released proposed regulations on Opportunity Zones designed to incentivize investment in American communities. The Treasury Department plans on issuing additional guidance before the end of the year after notice and comment.

Below you will find additional information in addition to:

- **Proposed Implementation Regulations** (click here)
- **List of Qualified Opportunity Zones** (click here)
- **Frequently Asked Questions** (click here)

Thanks,
Nic

Subject: Join us for the 2018 Milken Institute London Summit

View web version

Tuesday, December 4, 2018 | Park Plaza Westminster Bridge

Dear Daniel,

London Summit is the Milken Institute's premier gathering of leaders across the U.K. and Continental Europe. On December 4, as the Brexit hour draws near, summit speakers from the upper echelons of business and finance, government and diplomacy, technology, healthcare and energy, among other sectors, will analyze opportunities and challenges on these subjects and many others:

- The Future of the United Kingdom and the European Union
- New Rules: Open Banking, FinTech and Big Tech
- Energy Plays In A Carbon-Constrained World
- The Future of Human Performance
- Asset Management Outlook
- U.S. Overview: Political and Economic Currents After The Midterms

Subject: July 11, 2018 GOED Board Meeting - Agenda & Materials
Attachments: 4. GOED Board Meeting - May 17, 2018 - Minutes.pdf

Good Afternoon GOED Board Members,

The Agenda and materials for the July 11, 2018 GOED Board meeting are posted and available on our website: http://www.diversifynevada.com/meetings/goed-board-meeting-july-11

I have also attached the draft May 17, 2018 meeting minutes for your review.

Please note, we are still awaiting the materials for agenda items **8A**.- WINN Fund Growing the Nursing Workforce to Improve Population Health Outcomes and Create Jobs in the State of Nevada and item **9.**- Performance Measures Report. We will upload and distribute those materials to everyone upon receipt.

Please also be reminded of the change in location for this meeting:
North

STATE OF NEVADA
GOVERNOR'S OFFICE OF ECONOMIC DEVELOPMENT
BOARD MEETING
May 17, 2018

The meeting of the Board of Economic Development was called to order by Governor Brian Sandoval at the Legislative Counsel Bureau, 401 South Carson St, Room 3137, Carson City, Nevada, 89701; and via video conference at the Grant Sawyer Building, Legislative Counsel Bureau, Room 4412, 555 E. Washington Avenue, Las Vegas, Nevada, 89101.

1. CALL TO ORDER, ROLL CALL AND ESTABLISH QUORUM

VOTING BOARD MEMBERS PRESENT

Governor Brian Sandoval, State of Nevada
Lieutenant Governor Mark Hutchison, State of Nevada
Secretary of State Barbara Cegavske, State of Nevada
Dr. Weldon Havins, Director, Medical Jurisprudence and Ophthalmology, Touro University Nevada
Mr. Adam Kramer, Executive Vice President of Strategy, Switch, Inc.
Mr. James Barrett, Jr., President and Founder, The JABarrett Company
Dr. Dana Bennett, President, Nevada Mining Association
Mr. Dan Klaich, Voting Member at Large
Mr. Raymond Specht, Founder and CEO, Specht Leadership Consulting

NON-VOTING BOARD MEMBERS PRESENT

Mr. Don Soderberg, Director, Department of Employment Rehabilitation and Training

NON-VOTING BOARD MEMBERS ABSENT AND EXCUSED

Dr. Thom Reilly, Chancellor and Chief Executive Officer, Nevada System of Higher Education

STAFF MEMBERS PRESENT

Paul Anderson, Executive Director, GOED, Secretary of Board
Derek Armstrong, Deputy Director, GOED
Karsten Heise, Director of Technology Commercialization, GOED
Ryan Smith, Director of Business Operations, GOED
Brian Baluta, Director of Communications, GOED
Bob Potts, Director of Research, GOED
Stacey Bostwick, Workforce Development Program Coordinator, GOED
Gillian Barclay, Healthcare Industry Specialist, GOED
Michelle Sibley, Executive Assistant / HR Coordinator, GOED

AMERICAN OVERSIGHT

Melanie Sheldon, Program Manager, GOED
Mariah Heriman, Executive Assistant / Program Management Specialist, GOED

GUESTS PRESENT

Assemblywoman Irene Bustamante-Adams
Scott Anderson, Secretary of State's Office
Peter Keegen, Attorney General's Office
Shelli Long, Department of Taxation
Lezlie Helget, Department of Taxation
Lieutenant J. Wilson, Nevada Department of Corrections
Jeannette Calderan, Nevada State Board of Nursing
Catherine Prato-Lefkowitz, Nevada State Board of Nursing
Phil Klevorick, Clark County Economic Development
Bill Arent, City of Las Vegas
Barbara Coffee, City of Henderson
Peter Goldberg, City of North Las Vegas

2. PUBLIC COMMENT

Mr. Brian Wilcox, Chief Information Security Officer (CISO), BlackRidge Technology (BlackRidge), provided public comment in Carson City. Mr. Wilcox advised he was the former CISO for the State of Nevada prior to joining Blackridge, a military grade cyber defense security company headquartered in Reno, Nevada. Mr. Wilcox noted his previous role had awarded him a unique vantage point to understanding the strengths, weaknesses, threats, and opportunities of the state's cyber defenses. Mr. Wilcox advised he'd come in front of the Board as an extension of his public trust obligation fostered while in official capacity with the state. Mr. Wilcox noted BlackRidge was unique in providing a solution that forever changed safe internet communications. Transport Access Control (TAC), the primary of seven patents held by BlackRidge, acts as the liaison between the chaos of the internet and organizational networks, preventing unapproved traffic from being initiated. The solution authenticates every connection on the first packet of data, resulting in an immediate reduction in malicious, unwanted traffic that poses the bulk of cyber threats. Mr. Wilcox would continue informing Nevada's state entities that the next generation of cyber defenses had arrived and BlackRidge would be managing efforts through the Nevada Office of Cyber Defense Coordination.

AMERICAN OVERSIGHT

Mr. Jared Smith, Chief Operating Officer, Las Vegas Global Economic Alliance (LVGEA) provided public comment from Las Vegas. Mr. Smith noted the May 17 meeting agenda comprised the most projects LVGEA had ever represented at a GOED Board meeting. Mr. Smith commended the companies, Nevada's Economic Development infrastructure staff, and the state's incentive and abatement programs.

3. GOVERNOR SANDOVAL'S COMMENTS

Governor Brian Sandoval opened the meeting and welcomed new Nevada Governor's Office of Economic Development (GOED) Board member Mr. Adam Kramer, Executive Vice President of Strategy, Switch, Inc. Mr. Kramer thanked Governor Sandoval and noted he was greatly appreciative for the opportunity to serve on the Board.

Governor Sandoval noted the meeting's robust agenda and thanked the GOED Board, Regional Development Authorities, local governments, and Nevada's institutions of higher learning for their work with companies considering Nevada for relocation or expansion.

4. APPROVAL OF THE MARCH 15, 2018 BOARD MEETING MINUTES

A MOTION WAS MADE BY MR. DAN KLAICH TO APPROVE THE MARCH 15, 2018 MEETING MINUTES; THIS MOTION WAS SECONDED BY MR. KRAMER. THE MOTION PASSED UNANIMOUSLY.

5. ABATEMENT APPLICATIONS FOR BOARD APPROVAL:

A. ADVANCED TECHNOLOGIES MANAGEMENT, INC. DBA PICTOGRAPHICS

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Perry Ursem, Vice President of Business Retention and Expansion, LVGEA presented Advanced Technologies Management, Inc. dba Pictographics (Pictographics), and provided a brief overview of the company and abatements sought. Pictographics is an industry leader in print technology, utilizing the latest hardware to deliver the highest quality products. The company produced graphics for events, trade shows, interior design, and architectural installations and is was a manufacturer for strategic partners. The expansion would add 27 new jobs, producing an average hourly wage of $27.35, and capital investment projections of $17.6m. Mr. Ursem was joined by Mr. Craig Miller, President and Chief Executive Officer, Pictograhics.

Mr. Miller advised Pictographics planned to expand its existing southern Nevada manufacturing facility in conjunction with leasing or purchasing a second facility. The company started as a family-run, suburban home-based, credit-card-financed business and evolved into a 'world class' company. The company has been the principal graphics provider for the Fiesta Bowl, BCS

AMERICAN OVERSIGHT

National Championship, NBA All Star Games, and for key exhibitors at the Consumer Electronics Show (CES) including Intel, Nokia, and LG Electronics. Pictographics continued to expand its market by becoming a total solution provider and by partnering with other solutions companies. Mr. Miller noted the company was currently forming an alliance with Hewlett-Packard (HP) to become a manufacturing center for 3D printing. Pictographics had been named the beta site for HP's new 580 color printer and the beta site for Mimaki USA's 3DUJ-553 photorealistic 3D printer.

Lieutenant Governor Mark Hutchison asked whether the company's technology was intellectual property (IP) protected. Mr. Miller confirmed Pictographics had several patents and initial access to certain products and technologies. To support this the company had teamed up with high schools, and the university system, to develop the talent pipeline required for the progressive additive manufacturing sector. Additionally, the company planned to grow its intern program to offer internships to UNLV undergraduate and graduate students. Mr. Miller highlighted the University of Las Vegas' (UNLV) engineering program and noted the company had excellent experiences working with Mr. Rama Venkat, Dean, UNLV Howard R. Hughes College of Engineering.

A MOTION WAS MADE BY MR. KLAICH TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, MODIFIED BUSINESS TAX ABATEMENT, AND PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5A. THIS MOTION WAS SECONDED BY SECRETARY OF STATE BARBARA CEGAVSKE. THE MOTION PASSED UNANIMOUSLY.

B. AXION CORPORATION

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Stan Thomas, Executive Vice President, Economic Development Authority of Western Nevada (EDAWN), presented Axion Corporation and provided a brief overview of the company and abatements sought. Axion Corporation is a provider of satellite-based entertainment services for the consumer and commercial markets. Axion Corporation is considering establishing a facility in Reno, NV. The northern Nevada facility would house the company's engineering, manufacturing, distribution, headquarters, and satellite support services. The company planned to invest over $27m in capital equipment and anticipated hiring 205 employees with an average wage over $40.00 an hour. Mr. Thomas was joined by Mr. Thomas Wendt, Chief Executive Officer, Axion Corporation

Mr. Wendt advised Axion Corporation provided advanced satellite technologies and services that enabled consumer and residential access to a new generation of high throughput satellites. Axion Corporation would initially deliver products in the United States however the first satellite's coverage would include North America, Mexico, Latin America, the Caribbean. The company's initial target market was the 14 million households in the United States currently with little or no

AMERICAN OVERSIGHT

access to residential broadband services. The economic incentives and dynamic business climate were important reasons Axion Corporation had reviewed as a Nevada location.
Governor Sandoval inquired whether the company's service would be accessible in rural Nevada. Mr. Wendt confirmed this was accurate and advised the first three spot beams to be launched would be in northern Nevada. Thus, providing broadband capabilities to any citizen in the State of Nevada.

Governor Sandoval inquired about the specific skill sets sought in employees. Mr. Wendt advised approximately half of the company's employees would be required to have engineering skillsets. However, the company would also be seeking to fill roles in manufacturing, distribution, IT, business development, and corporate headquarter positions.

Governor Sandoval inquired whether the company planned to work with Nevada learning institutions for recruitment purposes. Mr. Wendt noted the company anticipated collaborating with the University of Reno (UNR) and UNLV for hiring and employment program purposes.

Secretary of State Cegavske inquired whether the company also planned to reach out to community colleges. Mr. Wendt advised EDAWN had connected the company with local community colleges and Axion Corporation was exploring the opportunity to develop a 12-week training process.

A MOTION WAS MADE BY LIEUTENANT GOVERNOR HUTCHISON TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5B. THIS MOTION WAS SECONDED BY DR. WELDON HAVINS. THE MOTION PASSED UNANIMOUSLY.

C. CAREMARK, LLC
- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

D. CAREMARK, LLC
- **CATALYST FUND**

Governor Sandoval advised Agenda Items 5C and 5D would be heard together.

Mr. Michael Walsh, Vice President of Economic Development, LVGEA, presented Caremark, LLC, and provided a brief overview of the company and abatements sought. Caremark, LLC, operates as a subsidiary of the American retail and health care company CVS Health (CVS). CVS is a Fortune 10 company and is presently the largest pharmacy chain in the United States in terms of number of locations and total prescription revenues. Caremark, LLC offers prescription benefits management services in the United States. The company designs and fulfills prescription drug benefit plans. The company offers prescription benefit services, including local retail pharmacy and home delivery options; specialty pharmacy services, such as pharmaceuticals and other therapeutic services for participants with chronic or genetic disorders; and care patterns

AMERICAN OVERSIGHT

disease management programs, which provide participant care for complex conditions. Caremark, LLC anticipates hiring 102 new employees in the first 24 months of operations, with an average hourly wage of $25.73. The company anticipated making a capital investment of $5m in equipment. Mr. Walsh thanked Mr. Gustavo Perez, Senior Manager - Indirect Tax, Ernst & Young for bringing this opportunity to the State of Nevada. Mr. Walsh was joined by Mr. Dan Klein, Director of Engineering, Caremark, LLC.

Mr. Klein advised CVS/Caremark, LLC had recently been focused on the creation of a prescription management service center that would provide innovative tools and strategies to help improve clinical outcomes for client plan members while assisting them in managing pharmacy overall health care costs. The company was seeking the most operationally efficient and cost-effective location to accommodate its business needs as the company was planning for large capital and hiring commitments. Mr. Klein highlighted the company's commitment to community engagement and corporate citizenship via event sponsorship, volunteerism, and disaster relief. The company is also committed to leveraging local universities to increase high-paying positions in the pharmaceutical sector, which in turn would drive industry growth. Mr. Klein noted the opportunity for partnerships and collaborations with UNLV, the College of Southern Nevada (CSN), and other southern Nevada institutions.

Governor Sandoval requested additional information on the role of a prescription management service. Mr. Klein advised the center would be staffed with employees versed in handling high-touch patient counseling, coaching, and therapy management. In the specialty pharmacy business there was a significant volume of high-touch patients requiring nursing, pharmacist intervention, and additional specialized medical services. The services provided by the new facility would be focused nationally and delivered telephonically.

Governor Sandoval inquired about the specific skill sets sought in employees. Mr. Klein advised the company would primarily be seeking pharmacy technicians, pharmacists, and nurses.

Governor Sandoval asked about the company's next steps should it be awarded the abatements sought. Mr. Klein advised the company would make it final decision, on the location for its prescription management service center, within a week.

Governor Sandoval inquired whether Nevada's incentive packages were important in terms of the company's decision to locate in Nevada. Mr. Klein confirmed this was a critical factor in the company's decision-making process.

A MOTION WAS MADE BY MR. RAYMOND SPECHT TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5C, AND A CATALYST FUND GRANT IN AN AMOUNT NOT TO EXCEED $350,000, AS DESCRIBED IN AGENDA ITEM 5D. THIS MOTION WAS SECONDED BY MR. KRAMER. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

E. FORTRESS INNOVATIONS, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Ursem, LVGEA, presented Fortress Innovations, Inc. and provided a brief overview of the company and abatements sought. Fortress Innovations, Inc. is a vertically integrated company that manufactures and sells a proprietary structural wall system named the "1WallSystem™ which allows construction to be done faster, stronger, less-expensive and with the highest energy-efficiency and fire ratings in the market. The company also manufactures steel framing components, steel trusses and distributes a suite of proprietary insulation paints/coatings for commercial, industrial and domestic/residential use that significantly increase energy performance by deflecting over 98% of the sun's heat and ultraviolet rays and significantly reduces acoustic levels while providing a protective "skin" over the structure to protect it against the elements over a 25-year life-cycle. The project would include 30 new hires at an average hourly wage of $25.18, and a capital investment of approximately $5.6m. Mr. Ursem was joined by Mr. Dean Pardee, Chief Executive Officer, Fortress Innovations, Inc.

Mr. Pardee advised the Fortress Innovations, Inc. planned to build a 275,000-square-foot permanent manufacturing facility in southern Nevada. In order to commence production while its manufacturing plant was built, the company would lease 10,000 to 20,000 square feet in a Nevada location. Mr. Pardee noted the company was a US military veteran 1st hiring company and would actively participate in military support, environmental, affordable housing, homelessness, and animal therapy support initiatives.

Governor Sandoval asked if the company planned to do its own development or sell its projects to developers. Mr. Pardee advised the company planned to do both. The company was currently speaking with several large builders and companies directly involved with the residential and commercial construction industry in Nevada. There may be opportunity build a client base, or form joint ventures in addition to the company's own projects.

Mr. James Barrett inquired about the specific skill sets sought in employees. Mr. Pardee advised, from a framing standpoint, a team could be trained within 48 hours. The company had significantly simplified the building process to enable this. The Los Angeles Department of Building and Safety had stated it was the best technology seen in 30 years.

Mr. Specht asked about the company's employment projection of 180 new jobs created in five-years. Mr. Pardee advised there would be employment across all areas of the company including factory workers, field construction, developers, and construction managers.

A MOTION WAS MADE BY MR. BARRETT TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5E. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

F. FULCRUM SIERRA BIOFUELS, LLC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**
- **REAL PROPERTY TAX ABATEMENT**

Ms. Nancy McCormick, Senior Vice President of Retention and Expansion, EDAWN, presented Fulcrum Sierra Biofuels, LLC and provided a brief overview of the company and abatements sought. Fulcrum Sierra BioFuels, LLC (Fulcrum) is a wholly-owned subsidiary of Fulcrum BioEnergy, Inc (FBE). FBE was formed to develop a reliable and efficient process for converting municipal solid waste (MSW) into renewable transportation fuels. Fulcrum Sierra BioFuels, LLC's existing Feedstock Processing Facility in Storey County processes MSW-derived feedstock to be shredded and compacted for transport to the company's Biorefinery, where it would be converted into renewable transportation fuels, including jet fuel and diesel. The Biorefinery, also in Storey County, would produce transportation fuel that competed directly with high-priced fossil fuels, and was expected to have a lower cost, lower carbon, and lower emissions than traditional fossil fuel alternatives. Collectively the Feedstock Processing Facility and Biorefinery would convert approximately 175,000 tons per year of MSW, or household garbage, into approximately 10.5 million gallons per year (800 barrels per day) of renewable Syncrude that would be upgraded and processed into low-carbon transportation fuel products. The project would include an equipment investment of approximately $13.25m, and building costs exceeding $12.9m. The company would add 13 positions at an average hourly rate of $22.04. Ms. McCormick was joined by Ms. Jeanne Benedetti, Senior Director Project Development, Fulcrum Sierra Biofuels, LLC.

Ms. Benedetti advised Fulcrum planned to commence the Stage 2 expansion of its Feedstock Processing Facility located in Storey County, Nevada. This will include an additional 29,000 square-feet of building to accommodate the installation of additional processing equipment.

Governor Sandoval inquired whether the waste streams came directly to the company, or through a waste management organization. Ms. Benedetti advised, the trash went through the local waste management transfer station. When Fulcrum was ready to receive a trash shipment it turned on a green light at the front of its facility. The route trucks going past would turn into Fulcrum’s facility rather than continuing a quarter mile to the scale house.

Governor Sandoval asked whether the company’s process could make landfills obsolete. Ms. Benedetti noted the company could not accept trash such as tires and mattresses, however the process contributed to a significant landfill reduction.

Mr. Klaich asked about the economics of this process. Ms. Benedetti advised Fulcrum’s product costs approximately one dollar a gallon to produce. As the feedstock was free the production costs were significantly less than those of fossil fuel.

A MOTION WAS MADE BY MR. KRAMER TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, A PERSONAL PROPERTY TAX ABATEMENT, AND A REAL PROPERTY

AMERICAN OVERSIGHT

ABATEMENT AS DESCRIBED IN AGENDA ITEM 5F. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

G. KRS GLOBAL BIOTECHNOLOGY, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

H. KRS GLOBAL BIOTECHNOLOGY, INC.

- **CATALYST FUND**

Governor Sandoval advised Agenda Items 5G and 5H would be heard together.

Mr. Walsh, LVGEA, presented KRS Global Biotechnology, Inc., and provided a brief overview of the company and abatements sought. KRS Global Biotechnology, Inc. makes custom pharmaceuticals; sterile products such as syringes and IV bags; purified water for drug manufacturing; and a kit used by hospitals and other compounding pharmacies to test their technicians. The company provides its services to patients, surgery centers, ophthalmology clinics, hospitals, universities, and veterinarians nationwide and is committed to being the top provider of these compounding services while developing quality processes that facilitate the highest level of safety for patients of parenteral, enteral, oral, and topical preparations. KRS Global Biotechnology, Inc. is a FDA registered medical device manufacturer and registered 'outsourcer of human drugs' under The Drug Quality and Security Act, a law designed to help protect consumers from exposure to pharmaceutical drugs that may be counterfeit, stolen, contaminated, or otherwise harmful. The project would involve the hire of 50 new employees in at an average hourly wage of $25.00 and a capital investment of $34.5m. Mr. Walsh was joined by Mr. Riccardo Roscetti, President and Chief Operating Officer, KRS Global Biotechnology, Inc.

Mr. Roscetti advised, as a result of the increased demand for the company's products and services, KRS Global Biotechnology, Inc. would be expanding capacity to provide additional manufacturing, research and development, and warehousing operations. The company is currently evaluating the construction of a licensed pharmaceutical manufacturing facility. The new facility would be 150,000 square foot of newly constructed space housing clean rooms, production lines, and warehousing.

Governor Sandoval asked about the roles to be filled at the company’s new facility. Mr. Roscetti advised there were various skill sets sought, one of these being technicians. The company had previously set up a technician training school, in Florida, for pharmacy tech certifications. Mr. Roscetti noted the company would seek opportunities to work with local colleges and universities to train the workforce for its new facility.

Governor Sandoval asked, assuming favorable consideration of its application, would the company be likely to select Nevada. Mr. Roscetti confirmed the company was committed to a Nevada location and noted the company had been attracted to Nevada for its well-trained

AMERICAN OVERSIGHT

workforce, attractive economic environment, and commitment to the biotechnology pharmaceutical space via the UNLV Medical School.

Lieutenant Governor Hutchison asked if UNLV's Medical School has been an integral factor in the company's decision to consider Nevada. Mr. Roscetti confirmed and advised generally, strong medical schools had the talent, production capabilities, and products sought by the company.

Lieutenant Governor Hutchison asked if the company had been in contact with the UNLV Medical School thus far. Mr. Roscetti advised the company planned to make contact regarding collaboration opportunities

A MOTION WAS MADE BY MR. BARRETT TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5G, AND A CATALYST FUND GRANT IN AN AMOUNT NOT TO EXCEED $640,000, AS DESCRIBED IN AGENDA ITEM 5H. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

I. POLARIS INDUSTIRES, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Andrew Haskin, Director of Business Development, Northern Nevada Development Authority (NNDA), presented Polaris Industries, Inc., and provided a brief overview of the company and abatements sought. Polaris Industries, Inc. designs, engineers, manufactures, and markets power sports vehicles worldwide. The company offers ORVs, including all-terrain vehicles and side-by-side vehicles for recreational and utility use; snowmobiles; motorcycles; and low emission, light duty hauling, passenger, commercial, and industrial vehicles, as well as snow bike conversion kit systems. Polaris Industries, Inc. also produces or supplies various replacement parts and accessories and manufactures, distributes, retails, and installs aftermarket parts and accessories for light trucks, jeeps, sport-utility vehicles, and other four-wheel drive vehicles. In addition, the company sells recreational apparel through a network of dealers and distributors, as well as online. The project would create 64 new jobs at an average hourly wage of $21.95 an hour with an approximate investment of $13.6m in capital equipment. Mr. Haskin was joined by Mr. Paul Eickhoff, Senior Director of Distribution, Polaris Industries, Inc.

Mr. Eickhoff advised Polaris Industries, Inc. was considering building a 500,000 square-foot facility in the Lyon County. The proposed project would establish the company's first western United States distribution center.

Governor Sandoval asked whether the company would seek a new or existing facility. Mr. Eickhoff advised the company would be seeking a green field, ground up build.

AMERICAN OVERSIGHT

Governor Sandoval asked, assuming favorable consideration of its application, would the company be likely to select Nevada. Mr. Eickhoff advised a decision was anticipated within the forthcoming few weeks.

Mr. Kramer noted the company's application listed the City of Fernley, as a potential location, and highlighted that the Mayor of Fernley was a committed partner in economic development, and would be a great local partner for the company.

A MOTION WAS MADE BY MR. KLAICH TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5H. THIS MOTION WAS SECONDED BY SECRETARY OF STATE CEGAVSKE. THE MOTION PASSED UNANIMOUSLY.

J. RITCHIE BROS. AUCTIONEERS (AMERICA), INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Ursem, LVGEA presented Ritchie Bros. Auctioneers (America) Inc. (RBA), and provided a brief overview of the company and abatements sought. RBA is the world's largest industrial auctioneer. The company is headquartered in Burnaby, Vancouver, and has 110 locations in 25 countries and 44 auction sites worldwide. RBA has been operating in the State of Nevada since October 29, 1997. The company operates across multiple sectors including transportation, agricultural, material handling, mining, forestry, petroleum, and marine industries. RBA sells, through unreserved public auctions, a broad range of used and unused industrial assets such as equipment, trucks and other assets utilized in the construction. The expansion would include 25 new jobs at an average hourly wage of $22.94 and project capital investment of $3m. Mr. Ursem thanked Ms. Gina Gavin, Director of Economic Development, City of North Las Vegas (NLV), NLV's Economic Development team, and Mayor John Lee for their letter support of RBA's application. Mr. Ursem was joined by Mr. Randy Berry, Senior Vice President of Digital Operations, RBA, and Mr. Connor Humphrey, Vice President, GovPlanet.

Mr. Berry advised the company planned to expand its southern Nevada operations to establish a 169,080 square-foot warehouse facility that would be used to manage the storage and distribution of equipment. The warehouse will be the central processing center in the region handling storage, logistics, inventory management, auction management, and delivery orders.

Governor Sandoval asked, assuming favorable consideration of its application, would the company be likely to expand in Nevada. Mr. Berry confirmed this was the case.

Governor Sandoval where the company new facility would be located. Mr. Humphrey confirmed the new facility would be located in NLV, close enough to leverage the company's existing auction site for certain asset types not requiring significant indoor storage and handling.

AMERICAN OVERSIGHT

Governor Sandoval asked about the company's hiring and recruitment plans. Mr. Berry advised the company would initially seek to fill key warehouse operations positions and would continue to hire warehouse staff as the company built out its operation. This would include supervisors, inventory management coordinators, merchandising, coordinators, receiving clerks, shipping clerks, and other support personnel.

Lieutenant Governor Hutchison inquired about the online aspect of the business. Mr. Berry noted the company had multiple online selling platforms including IronPlanet selling core heavy equipment, construction, and trucks, and GovPlanet which is focused on government assets.

Mr. Kramer abstained from the vote due to potential conflicts.

A MOTION WAS MADE BY DR. HAVINS TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5J. THIS MOTION WAS SECONDED BY MR. SPECHT. THE MOTION PASSED UNANIMOUSLY.

K. SEPHORA USA, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Walsh, LVGEA, presented Sephora USA, Inc. and provided a brief overview of the company and abatements sought. Sephora USA, Inc. is a French chain of cosmetics stores founded in 1969. Featuring nearly 300 brands, along with its own private label, Sephora offers beauty products including makeup, skincare, body, fragrance, nail color, and haircare. Sephora is owned by luxury conglomerate Moet Hennessy Louis Vuitton as of 1997. Sephora USA, Inc. operates approximately 1,900 locations in 33 countries worldwide, with an expanding base of over 430 stores across the Americas. The company also had 590 Sephora locations in JCPenney stores across the US. In addition to the company's number of stores, Sephora offered its products for sale on its website. The project would comprise approximately $36m in capital investment and the hire of 60 employees at an average wage of $24.05. Mr. Walsh was joined by Mr. Jeff Ritacco, Vice President of Logistics, Sephora USA, Inc. and John Lenio, Executive Vice President, CBRE Group.

Mr. Ritacco advised Sephora USA, Inc. was considering opening a 715,000 square-foot distribution facility in NLV. The proposed project would include a new regional distribution center which would ship products to stores and customers located in 11 western states. At full operations, the new distribution center would process approximately $100m in goods a year. Additionally, all employees would be new and there would be no transfer of jobs from one distribution center to another.

AMERICAN OVERSIGHT

Governor Sandoval asked about the company's next steps should it be awarded the abatements sought. Mr. Ritacco advised the company was keen to decide swiftly and noted the Board's approval of tax incentives would greatly assist the company's decision to locate in Nevada.

Governor Sandoval asked when the company planned to be operational at its new site. Mr. Ritacco advised operations were anticipated to commence by July of 2019.

Mr. Specht highlighted the company's focus on hiring veterans or persons with a disability status. Mr. Lenio advised such hires currently made up 15% of the company's Mississippi facility's workforce and the company frequently worked with states and counties to develop and implement training programs. Mr. Specht noted the potential for partnerships with Opportunity Village.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5K. THIS MOTION WAS SECONDED BY LIEUTENANT GOVERNOR HUTCHISON. THE MOTION PASSED UNANIMOUSLY.

6. ABATEMENT APPLICATIONS FOR DIRECTOR APPROVAL:

A. 3PEA INTERNATIONAL, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Ursem, LVGEA, presented 3PEA International, Inc., and provided a brief overview of the company and abatements sought. 3PEA International, Inc. designs and develops payment solutions, prepaid card programs, and processing services under the PaySign® brand name for corporate, consumer, and government applications. The company offers various services, including transaction processing, cardholder enrollment, value loading, cardholder account management, reporting, and customer service through PaySign® platform, a proprietary card processing platform. It also develops prepaid card programs for healthcare reimbursement payments, pharmaceutical co-pay assistance, corporate expense and per diem payments, and donor payments for source plasma and automobile dealership incentives, as well as payroll cards, general purpose re-loadable cards, travel cards, and loyalty rewards cards for the hospitality industry. In addition, the company offers Buy and Bill programs for patients to purchase directly from physician's office or through an infusion center for physician administered therapies; and Survey Instant Rewards card programs for organizations to gather survey data. The company's principal target markets for processing services comprise prepaid card issuers, retail and private-label issuers, small third-party processors, and small and mid-size financial institutions in the United States and internationally. The project would hire 35 new employees at an average hourly wage of $40.20 with a projected $828,000 in capital investment. Mr. Ursem was joined by Mr. Christian Mueller, Controller, 3PEA International, Inc., and Mr. Mark Newcomer, President and Chief Operating Office, 3PEA International, Inc.

AMERICAN OVERSIGHT

Mr. Newcomer advised, in order to accommodate its southern Nevada expansion plans, 3PEA International, Inc. was seeking to relocate from its current 11,541 square-foot space to a 21,000 square-foot facility. The company relocated to Nevada in 2004 with a total of three employees. Since that time, Nevada had afforded the company a great climate to grow in.

Governor Sandoval asked about the company's recruitment and hiring plans. Mr. Newcomer advised, so far, the company had been able to successfully source its workforce locally. These roles had included customer service relationship management, and front and back-end development, and biopharmaceutical sales.

Director Anderson noted the company's approval for an MBT abatement was contingent upon the Department of Taxation's pending determination on the company's status as a financial institution.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6A. DIRECTOR ANDERSON APPROVED THE COMPANY'S APPLICATION FOR A MODIFIED BUSINESS TAX ABATEMENT, PENDING THE OUTCOME OF THE DEPARTMENT OF TAXATION'S DETERMINATION OF THE COMPANY'S STATUS, AS DESCRIBED IN AGENDA ITEM 6A.

B. ALPHA GUARDIAN

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Walsh, LVGEA, presented Alpha Guardian and provided a brief overview of the company and abatements sought. Alpha Guardian is a leader in the residential safe, security and storage industry. The company was established in August 2017 following the announcement that MidOcean Partners was partnering with Cannon Safe, Inc. and simultaneously combining it with Stack-On Products to create a market leader in the residential safe and secure storage sector. Cannon and Stack-On bring together two highly complementary operations. The project would hire 35 new employees at an average wage of $26.92. The company planned to make a capital investment of $181,530. Mr. Walsh was joined by Mr. Jesse Bugarin, Chief Project Office Alpha Guardian and Mr. Roger Jenkins, Vice President of Finance, Alpha Guardian.

Mr. Bugarin advised Alpha Guardian was planning to expand its current Nevada operations. The company was currently renting a 24,000 square-foot facility in southern Nevada. The planned expansion would require a facility of at least 100,000 square feet. The company was also considering relocating its Chicago Stack-On brand operations from Illinois to Las Vegas.

Lieutenant Governor Hutchison asked about the operations at the expanded facility. Mr. Bugarin advised the expansion would primarily accommodate distribution.

AMERICAN OVERSIGHT

Mr. Jenkins noted the company had experienced great success working with UNLV to offer internship programs. One participant in the internship program had been hired by the company upon graduating. Mr. Jenkins also noted the company had a commitment to supporting its employees' learning and growth and had implemented a program called Alpha Guardian University. The program focused on adult literacy. Alpha Guardian University has executed 1,300 hours of training between 2016 and 2018.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6B.

C. CANNAE HOLDINGS, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Walsh, LVGEA, presented Cannae Holdings, Inc., and provided a brief overview of the company and abatements sought. Cannae Holdings, Inc. is a diversified investment company headquartered in Las Vegas. The firm primarily invests in restaurants, technology enabled healthcare services, financial services and more. Cannae's strategic acquisitions contain a mix of majority and minority owned businesses with significant underlying value. These holdings include majority and minority equity investment stakes in a number of entities, including American Blue-Ribbon Holdings, LLC (ABRH), and Ceridian Holding, LLC (Ceridian). In October 2017, the company purchased the shares of T-System Holding, LLC. T-System is a provider of clinical documentation and coding solutions to hospital-based and free-standing emergency departments and urgent care facilities. The project would hire 50 new employees at $36.90. The company planned to make a capital investment of approximately $1.1m. Mr Walsh was joined by Mr. Richard Cox, Executive Vice President and Chief Financial Officer, Cannae Holdings, Inc. and Mr. Gary Amico, Amico and Associates, Inc.

Mr. Cox advised Cannae Holdings, Inc. was considering building headquarter operations adjacent to its existing Las Vegas facility. The project would involve hiring of financial, information technology, and accounting personnel.

Mr. Cox highlighted the company's commitment to Las Vegas and the local community and noted the company was involved in various corporate citizenship and community engagement activities. The executive group of Cannae included Mr. Bill Foley, the lead person of the ownership group responsible for bringing the National Hockey League to Las Vegas and Nevada. The Vegas Golden Knights were associated with the Golden Knights Foundation, an organization that serves as the primary charitable link between the Vegas Golden Knights and the Las Vegas community.

The Folded Flag Foundation was also an organization with an executive board that included Mr. Bill Foley and Mr. Richard Cox, the CFO of Cannae Holdings, Inc. The Folded Flag Foundation's mission was to provide educational scholarships and support grants to the spouses and children of the United States military and governmental personnel who died as a result of

AMERICAN OVERSIGHT

hostile action or in an accident related to U.S. combat operations. The Folded Flag Foundation recently held an event at The Cosmopolitan on March 29, 2018 where it raised more than $50k to help support the families of fallen heroes.

Director Anderson asked whether the company intended to hire locally. Mr. Cox advised the company initially sought to recruit locally. So far, most of the company's workforce had been sourced from Las Vegas, and the company anticipated this continuing to the extent the required talent was available.

Director Anderson inquired whether the company worked with any of the universities for recruiting purposes. Mr. Cox advised the company offered entry level roles and was currently looking at partnerships with UNLV and other local learning institutions. The company also planned to explore collaborations with UNLV to develop internship programs.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6C.

7. WORKFORCE INNOVATION FOR THE NEW NEVADA (WINN) FUND PROGRAM APPLICATIONS - FOR BOARD APPROVAL

A. RENO AREA DATA ANALYTICS - REQUEST FOR APPROVAL TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $300,000

Ms. Stacey Bostwick, Workforce Development Program Coordinator, GOED, introduced Agenda Item 7A and noted GOED has been working with its partners Truckee Meadows Community College (TMCC), NCLab, and Desert Research Institute's AIC to develop a first building block of the Machine Learning option within the Advanced Automation and Robotics track of LEAP Advanced ICT (Information Communications Technology). This building block would address the growing workforce requirements for skills in Data Analytics and would be a decisive contribution to add to and considerably strengthen the talent pool in this field benefitting effectively every industry in Nevada as well as attracting 21st century technology heavy companies to locate in the state. This project was now seeking funding to develop a completely online, hands-on and self-paced learning program (non-credit) and make it available to 500 workers and job seekers, in the Reno area, to provide the skills and knowledge necessary for employment and growth in analytical professions. Ms. Bostwick was joined by Ms. Barbara Walden, Director of Applied Technologies, TMCC, Mr. Vasily Kamyshanov, the Chief Operating Officer, NCLab, and Mr. Russ Riggs, the Chief Operating Officer, Lift 361.

Ms. Walden noted, as Nevada's economy became more diverse, it brought the challenge of upskilling the workforce. The Panasonic Preferred Pathway (P3) training program was an example of meeting those workforce challenges via innovative programs and delivery methods. This had enabled Panasonic to hire the trained employees it required at the Tesla Gigafactory and allowed for Nevadans with no advanced manufacturing experience to receive the training necessary to work in one of Nevada's most promising and emerging industries. Another

AMERICAN OVERSIGHT

identified challenge was building Nevada's technology sector pipeline. Coding, cyber security, and data analytics were greatly in-demand skill sets. Additionally, these skills were not unique to technology, and crossed every industry sector including marketing, health care, business, and government.

Mr. Kamyshanov advised NCLab had developed online courses for STEM disciplines and was currently part of a Nevada Ready 21 Program for middle schools. NCLab is also working with Clark County, Washoe County, and rural areas of Nevada. This project would enable NCLab to qualify students to become workforce ready for technology based careers.

Mr. Riggs advised his company focused exclusively on analytics. The company offered custom analytics based on client's specific needs. The company's services were highly specialized and attracting talent had been difficult in the past. Mr. Riggs stated the project would introduce more data analytics into schools and equip more students with skills in this area.

Governor Sandoval inquired about the process of signing up for the program. Ms. Walden advised, for the purposes of the WINN funds, there would be an intake process including an application for the funding and assessment of an applicant's overall objective in participating and completing the program.

Director Anderson inquired about the program development and maintenance costs. Mr. Kamyshanov advised online education has a solid propriety platform to deliver complex knowledge to people, and this course would be developed together with participating companies to really match the job demand. Once the set was developed the costs to support it would be low. Once developed, it could easily scale to an unlimited number of students.

Director Anderson about the program timeframes. Ms. Waldon noted promotion and intake would commence within two months with a targeted course commencing by October 2018. Each course would take 80-120 hours for completion and it was estimated funding will be fully utilized by June 30, 2019. Program outcomes would be reported and evaluated using self-reported data gathered from participants and employer partners to understand the placement and wage gains experienced as a result of program completion.

A MOTION WAS MADE BY DR. DANA BENNETT TO APPROVE THE REQUEST OF RENO AREA DATA ANALYTICS TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $300,000 AS DESCRIBED IN AGENDA ITEM 7A. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

B. CLARK COUNTY HEALTH AND TECHNOLOGY - REQUEST FOR APPROVAL TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $700,000

Ms. Bostwick introduced Agenda Item 7B. Ms. Bostwick advised this program proposed to develop both a workforce increase in nursing and home health and infuse new technology training and the necessary skills to become effective bridges between clinical and community

AMERICAN OVERSIGHT

settings. This would help improve transitions from clinical to community settings, with strong potential to improve population health outcomes, reduce health disparities, and to control health care costs. Partners of the program include BrightStar Home Health, Hallmark Home Care, Homewatch Caregivers, Home Care Assistance, and the Nevada State Board of Nursing. The proposed strategy established increased capacity to on-ramp into healthcare through Home Healthcare or Nursing Assistant programs with new infusions of technology certifications. Beyond the strong economic value of creating new health jobs in southern Nevada, this approach would support efforts to mitigate the current economic burden incurred by the state due to chronic diseases and hospital readmissions. Students completing the program would represent the future of health care with skills and competencies in the use of technology to improve patient and community health outcomes. Ms. Bostwick was joined by Ms. Luz Castro, Health Care Specialist, College of Southern Nevada (CSN), Ms. Catherine Prato-Lefkowitz, Director of Nursing Education, Nevada State Board of Nursing, and Ms. Cynthia Knight, Director of Client and Caregiver Services, Homewatch Caregivers.

Ms. Castro explained the CSN Division of Workforce and Economic Development program strived to deliver a high-standard curriculum that taught and promoted all competencies and principles required for qualified home health aides and Certified Nursing Assistants (CNA). CNA programs are highly recognized by industry leaders and home health aides were among the fastest growing jobs in the industry. There were several barriers to the required education, the the primary being tuition. CSN also needed to innovate its programs with technology competencies to upskill and deliver a high-quality service to employers and the community. As the program certificates would be offered both online and in-person, students would have flexibility regarding different modes of matriculation. Several employers had already expressed interest in partnering with CSN and hiring its students upon completion of this program.

Ms. Knight advised there was currently a severe shortage of qualified candidates and this had inhibited growth of the business. Homewatch Caregivers had a contract with the Veterans Administration to provide care for veterans in their own home and the company was looking to CSN to develop qualified candidates as quickly as possible.

Ms. Catherine Prato-Lefkowitz advised a CNA certification was a valuable entry point into any health care occupation or profession. Many CNA students, particularly in high schools, had goals of becoming nurses, physicians, or dentists. Increasing the technological literacy for CNAs and nurses would be an effective path to increase competencies. Technology is commonplace in health care. However, it is not as commonplace in the training that CNAs and nurses receive.

Dr. Havins inquired about the tuition costs for a CNA program and the portion of this to be covered under the WINN program. Ms. Bostwick advised tuition for the CNA program was approximately $2,400. The program was structured to cover 100% of this fee.

Lieutenant Governor Hutchison asked how many tuitions would be covered by the program application. Ms. Bostwick advised the current application would cover 250 individuals. However, the objective would be to consistently seek opportunities for integration. In conjunction with WINN there may be scope to leverage additional funding sources for tuitions and increases in technology infusion and certification.

AMERICAN OVERSIGHT

A MOTION WAS MADE BY MR. BARRETT TO APPROVE THE REQUEST BY THE CLARK COUNTY HEALTH AND TECHNOLOGY TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $700,000 AS DESCRIBED IN AGENDA ITEM 7B. THIS MOTION WAS SECONDED BY DR. HAVINS. THE MOTION PASSED UNANIMOUSLY.

8. WORKFORCE INNOVATION FOR THE NEW NEVADA (WINN) FUND PROGRAM APPLICATIONS - FOR DIRECTOR APPROVAL

A. RENO AREA LOGISTICS AND MANUFACTURING RE-ENTRY INITIATIVE-REQUEST FOR APPROVAL TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $75,000

Ms. Bostwick introduced Agenda Item 8A and advised the objective of this program was to provide career development opportunities to individuals involved in the justice system, in northern Nevada, with a direct pathway to higher wage employment. This proposal would create trained, professional individuals, who otherwise may not have the opportunity to work in these industries, and who would meet the needs of local employers to expand their businesses. Quality Plastics, High Mountain Door and Trim, Reno Custom Crating, Sierra Meat and Seafood and Iron had all expressed a need for trained and skilled employees to sustain and expand their Manufacturing and Logistics businesses. Phase One would be launched in May 2018 and include a cohort of 30 participants. Ms. Bostwick was joined by Ms. Camille Vega, Re-Entry Coordinator, TMCC, Mr. Jonathan Wilson, Facility Manager, Northern Nevada Transitional Housing, and Mr. Bill Owensby, IT Director, Quality Plastics.

Ms. Vega stated current data showed one in three Americans had some sort of criminal record. These individuals had minimal support in re-entering society post incarceration. One-half of those released were incarcerated within their first year. Two-thirds were re-incarcerated within three years, and over five years, three-quarters were re-incarcerated. One of the greatest factors in reducing re-incarceration was meaningful employment.

Mr. Wilson advised he joined northern Nevada Transitional Housing in August 2017. Prior to this he'd been with the Department of Corrections for almost 15 years and had noted the lack of transitional support for inmates. Mr. Wilson and Ms. Vega had discussed the potential for certificate programs. Additionally, Mr. Wilson noted he had identified employers interested in participating in the program. Sought after skills pertained to manufacturing, logistics, food preparation, and food safety.

Mr. Bill Owensby advised Quality Plastics advocated for inmate re-entry with 40% of its currently staff being previously incarcerated. The typical new hires from these re-entry programs were reliable and consistent. Additionally, being gainfully employed could contribute to elevated self-worth and lower risks of reoffending. Mr. Owensby advised the company hired him from a restitution center two-years earlier. He now held the position of IT Director.

AMERICAN OVERSIGHT

Governor Sandoval highlighted his position as Chairman of the Board of Prison Commissioners and noted at times parole eligible inmates would select not to parole as they had no job or place to go. Governor Sandoval thanked the employers involved in the application and noted the importance of providing resources, tools and skills for a productive life.

Mr. Don Soderberg commended the program and noted the Nevada Department of Employment, Training and Rehabilitation (DETR) had also been involved in re-entry initiatives. Feedback often highlight how dependable and enthusiastic these employees were with some of the best employees being participants of re-entry programs.

Governor Sandoval asked if the program would also be available to women. Ms. Vega stated the first cohort would solely include 30 males. Best practices in re-entry program development and implementation had identified that men and women were best supported in separate training programs. Ms. Vegas advised the intention was to have a cohort of women in the second semester, pending additional funding.

Governor Sandoval thanked Ms. Vega and encouraged the group to come back to present a second application. Ms. Vega noted the objective was to do so in four months.

DIRECTOR ANDERSON APPROVED THE REQUST FOR RENO AREA LOGISTICS AND MANUFACTURING RE-ENTRY INITIATIVE TO ENTER INTO A WINN GRANT AGREEMENT NOT TO EXCEED $75,000.

9. DIRECTOR'S REPORT - REVIEW AND DISCUSSION

Director Anderson advised GOED's International Trade Division recently completed an advanced planning trip to Ghana, Botswana, and South Africa to prepare for a Governor-led trade mission that would take place in summer 2018. The trip was a success as partnership opportunities were identified in several sectors including trade, water technology, higher education, smart city technology, technology transfer, and good governance.

At the National Governors Association North America Summit in May 2018, Governor Sandoval and Premier Rachel Notley of Alberta, Canada signed an MOU focused on collaboration in the development, testing, and commercialization of drone technology. This followed a successful trade mission to Nevada of over fifty Alberta businesses in February 2018.

Mr. Randy Walden, GOED's Advanced Manufacturing Industry Specialist and Chair of State Apprenticeship Council; oversaw the approval of over 600 apprenticeships which included a recently announced 425 Panasonic employees. The apprentices would be attending classes at TMCC utilizing the flexible delivery manufacturing courses developed for the P3 program last year. This would be the first group of apprentices and would followed in the upcoming months by participants from Tesla as well as other manufacturers in Northern Nevada. Apprenticeships played a vital role in providing a highly qualified workforce for new and existing companies in Nevada.

AMERICAN OVERSIGHT

On April 20, 2018 GOED submitted a list of recommended census tracts, Governor Sandoval, to be designated as Opportunity Zones. Nevada's identification process has been held up as a 'best practice' by Policy Map who was involved in the creation of opportunity zone policy.

The Nevada Film Office (NFO) was working on revamping its online locations directory. The new online locations directory had been designed to better connect potential film locations around Nevada with production companies, giving local businesses more control and more opportunity. The directory was in the final stages and should launch in late May 2018 with an associated marketing campaign commercial promoted on Facebook, Twitter, and potentially local television.

Dr. Barclay was working with the Touro Center for Disaster Life Support, UNLV, the College of Southern Nevada, health industry corporate employers and other stakeholders to develop a series of certificates in Technology for Emergency Preparedness and Disaster Response. These certificates will be offered from high school to graduate level and will contribute to building and strengthening a technology-ready workforce.

Director Anderson welcomed Ms. Bostwick, as GOED's new WINN Coordinator. Ms. Bostwick is based in GOED's Las Vegas office.

10. STATE OF NEVADA UNEMPLOYMENT RATE UPDATE - as established by the Research and Analysis Division of the Nevada Department of Employment, Training and Rehabilitation.

Agenda item 10. was for information only. GOED is committed to providing this information for each Board meeting. There were no questions or comments regarding this item.

11. PUBLIC COMMENT

Mr. Cory Hunt, Deputy Director, GOED provided public comment from Carson City. Mr. Hunt stated May 18, 2018 would be his last day at GOED. Mr. Hunt thanked Governor Sandoval for the great privilege of serving the State of Nevada during his roles with the Governor's Office and GOED. Mr. Hunt also thanked Mr. Steve Hill, Mr. Paul Anderson, Mr. Bob Potts, the GOED Board, Nevada's RDA's, and GOED's staff. Mr. Hunt noted he looked forward to continuing opportunities and projects that would support Nevada's growth.

Governor Sandoval wished Mr. Hunt the best in his future endeavors and commended his contribution to the State of Nevada and dedication to the multiple projects he'd been involved in.

Assemblywoman Irene Bustamante-Adams, Chief Strategy Officer, Workforce Connections, provided comment from Las Vegas and thanked the GOED Board for supporting the Clark County Health and Technology WINN Fund application. Assemblywoman Bustamante-Adams also thanked Dr. Gillian Barclay, Healthcare Industry Specialist, GOED for bringing a global vision to Nevada and competitively positioning the state in terms of serving the employer.

AMERICAN OVERSIGHT

12. ADJOURNMENT

A MOTION WAS MADE BY DR. HAVINS TO ADJOURN THE BOARD MEETING. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

Stephanie M. Klapstein

Importance: High

Board Members, Directors and Assistants,

The July 9, 2018 Transportation Board Meeting packet is ready to be viewed on the FTP site, instructions for accessing the site can be found below.

To get to the site, click on this link: ftp://transboard.nevadadot.com

Once the screen comes up, click on 'View' and then 'Open FTP site in Windows Explorer'. If you are running Windows 7, an Internet Explorer Security window may come up letting you know a website wants to open web content on your computer. Click 'allow' to bring up the login screen.

To log on use the Username of transboard and password of NDOTmember (NDOT must be in caps, member must be in lower case, and there is no space between them).

Once logged in you will see several PDF documents. The packet is broken up by items for ease of navigating, though the document titled 'July 9, 2018 Board Packet' is the complete packet, including the agenda, in one file. Due to the size of the documents it may take a few moments for them to open. Copying the files from the FTP site to your computer should help them to open more quickly. Again, because of the size of the documents it may take a few minutes for them to copy to your computer.

****The Department has been encountering some issues with the FTP site so if you have trouble getting to the documents I have attached them to this email.****

AMERICAN OVERSIGHT

Please do not hesitate to contact Holli Stocks (hstocks@dot.nv.gov) or myself with any questions.
A hard copy packet can be provided upon request.

MEMORANDUM

July 27, 2018

TO: **Department of Transportation Board of Directors**

FROM: **Rudy Malfabon, Director**

SUBJECT: **July 9, 2018 Transportation Board of Directors Meeting**

Item #2: **Presentation of Awards – Informational Item Only**

Summary:

This item is to recognize the Department of Transportation and staff for awards and recognition received.

America's Transportation Awards seeks to recognize projects that make communities stronger, economies more efficient, and quality of life better. This year, 35 states together nominated 79 projects across three categories, including Quality of Life and Community Development.

Every year the **International Partnering Institute** recognizes projects and individuals who best exemplify the principles of partnering and promote the mission to transform the construction industry to achieve exceptional results through a culture of collaboration.

The **American Society of Civil Engineers** (**Truckee Meadows Branch**) annually awards an Outstanding Civil Engineering Project of the Year along with an Engineer of the Year award and student scholarships.

Awards: (**1**) 2018 America's Transportation Award: Quality of Life/Community Development, Medium Project; (**2**) 2018 International Partnering Institute Partnering Award – Ruby Level; (**3**) 2018 American Society of Civil Engineers (Truckee Meadows Branch) – Project of the Year**; (4)** NDOT Partnering Award (read more on pages 5-6)
Project: USA Parkway (SR 439) Design-Build Project
Recipients: NDOT Project Manager Pedro Rodriguez; District II Engineer Thor Dyson; District II Asst. District Engineer Rick Bosch; Resident Engineer Sam Lompa; Ames Construction

The 12-mile extension of State Route 439 (USA Parkway), successfully completed on budget and three months ahead of schedule, has bolstered regional connectivity and mobility while supporting skyrocketing development at the world's largest industrial park.

Buoyed by a 9.1 benefit-to-cost ratio, the project stood out as the best transportation project between $25 and $200 million in the western states for enhancing community and quality of life. During construction, crews battled unprecedented snowfall resulting in record-setting flooding; watermain failures; and frequent visits from horses, mountain lions, bighorn sheep, and coyotes.

AMERICAN OVERSIGHT

A region impacted heavily during the 2007-2009 economic downturn has been reinvigorated with growth opportunity rapidly translating to an economic boon. With residents around the region now more connected than ever, and commute times reduced by up to 38%, the roadway provides the public additional routes to travel if a weather event or traffic incident necessitates a temporary road closure in the region.

The annual **APWA Spring and Fall conferences** recognizes transportation, structures, and environmental projects and considers community need and service to the public among its criteria. This spring, NDOT swept both transportation categories: Project of the Year Under $5 Million and Project of the Year $5-10 Million.

Award: Spring 2018 Conference APWA Transportation Project of the Year $5-10 Million
Project: US Highway 50 Cave Rock Tunnel Extension and Water Quality Improvements
Recipients: NDOT Project Manager Devin Cartwright; NDOT staff; Q&D Construction

Working with community members and stakeholders such as the Washoe Tribe of Nevada and California, NDOT built a 60-foot-long, 27-foot-tall tunnel extension carefully blended into the surrounding landscape to protect the traveling public from falling rocks at Cave Rock. The project included measures to improve scenery, lighting upgrades, road repaving, and improved signage to alert motorists of icy conditions and bicyclists in the tunnel.

The project also included water quality improvements along nearly four miles of US Highway 50 to reduce stormwater pollution into Lake Tahoe. Substantial public outreach including public meetings and project updates helped keep community members updated and involved in the project. The final project cost was $6,600,000.

Award: Spring 2018 Conference APWA Transportation Project of the Year Under $5 Million
Project: Contract 3645, Pahrump Roundabouts
Recipients: NDOT Project Manager Shawn Paterson; NDOT Resident Engineer Don Christiansen; Las Vegas Paving

NDOT contracted Las Vegas Paving to construct a single-lane roundabout at the intersection of S.R. 372 and Blagg Road, and to construct a two-lane roundabout at the intersection of S.R. 372 and Pahrump Valley Blvd. The final project cost was $4,046,000.

This particular project stood out to APWA for the coordinated efforts of project staff to work with the community to understand and embrace all benefits of a roundabout. Additionally, the marriage between how project engineers drew up the roundabout and how Landscape & Aesthetics staff enhanced the roundabout was described as beautiful by APWA voters.

AMERICAN OVERSIGHT

High-value research projects are recognized each year at the **AASHTO Research Advisory Committee (RAC) Annual Meeting**. A compilation of these projects is published in a document and disseminated country-wide to provide a helpful resource to state DOTs. The publication also helps avoid or reduce duplication of research. Each of the four RAC regions selects its top four projects to form the AASHTO Research Sweet Sixteen Awards.

Award: AASHTO Research Sweet Sixteen Awards
Project: Streamlining Hydrologic Prediction Processes Using New and More Accurate Techniques and Methods
Recipients: NDOT Hydraulics Engineer Brian Wilson; NDOT Research Section: Ken Chambers, Manjunathan Kumar; Consultants: Principal Investigator Dr. Annje Dodd and Project Director Jeff House (House Moran Consulting, Inc.) and Dr. Baxter Vieux (Vieux and Assoc., Inc.)

Despite the arid nature of much of Nevada, both flooding and flash flooding occurs throughout. Yet, there is no one-size-fits-all drainage design that could accurately and responsibly work throughout the entirety of the state. The purpose of this research was to conduct a detailed analysis of storm events in Nevada; the intended goal was to develop more detailed storm analyses for use by NDOT throughout the state. Analysis of *actual* storm events in terms of temporal and spatial distributions is expected to be more representative of rainfall experienced in Nevada, thus making design of drainage infrastructure more efficient.

The impact of this research is already far-reaching and paying dividends. In fact, the total cost of the research project was less than $200,000, and an estimated annual savings of $3 million will benefit Nevadans as a result of this research. The NDOT Hydraulics division is now empowered with reliable data to make better-informed decisions for drainage designs unique to all regions throughout the state.

NDOT Excellence in Partnering Awards are given annually statewide to recognize completed projects that best optimized principles of partnering. The main purpose is to celebrate success, share lessons learned of best practices, and recognize all project stakeholders.

Award: 2016 Excellence in Partnering Award
Project: Contract 3609, Wells Bypass Project on Interstate 80, Mileposts EL 68.978 to EL 74.855
Recipients: NDOT Elko Construction Crew 908; WW Clyde, Inc.; Diversified Consulting Services

The 2016 Excellence in Partnering Award recognizes the collaborative efforts of NDOT Elko Construction Crew 908, the contractor, WW Clyde, staff provided as part of the consultant augmentation by Diversified Consulting Services and the Partnering Facilitator, Neal Flesner of Ventura Consulting Group in the completion of Contract 3609 consisting of cold mill, rubblization, and overlay of I-80 near the city of Wells.

This was WW Clyde's first major northern Nevada project and the team faced the obstacle of recent turnover on NDOT Elko Construction Crew 908. These and other challenges were successfully mitigated as the team worked diligently to create a cohesive partnering atmosphere. These efforts included mentoring by more experienced crew, contractor and consultant staff, along with proactive communication and collaboration between team members and continual coordination with the City of Wells and Elko County. This resulted in critical issues resolved in the field and completion of an exceptional project 21 days ahead of schedule.

AMERICAN OVERSIGHT

Award: 2017 Excellence in Partnering Award
Project: Contract 3585, Carson City Freeway, South Carson Street to Fairview Drive, CC 0.05 to CC 3.15
Recipients: NDOT Reno Construction Crew 907; Road and Highway Builders; Parsons; Venture Consulting Group

The 2017 Excellence in Partnering Silver Award recognizes NDOT Reno Construction Crew 907, staff provided as part of the consultant augmentation by Parsons, Road and Highway Builders (RHB), subcontractors, and Partnering Facilitator, Neal Flesner of Ventura Consulting Group in the successful completion of Contract 3585, Carson City Freeway.

This high-profile project utilized innovative stratagies to overcome challenges such as implementing a conveyor system to transport one million cubic yards of excavated material under South Carson Street to the Oasis pit, reducing hauling costs, but also significantly reducing impacts to traffic. RHB and NDOT also coordinated to have sound walls constructed using pre-cast panels rather than cast-in-place. This change allowed for more quality control, maintain critical path, and avoid the additional costs of the cold weather cast-in-place method. Revisions were required at the intersection of the new freeway and South Carson Street. Rather than ceasing operations, RHB continued work in the area and implemented revised designs as they became available.

Award: 2017 Excellence in Partnering Award
Project: Contract 3625, USA Parkway, US 50 to I 80, LY 0.00 – 8.53 and ST 0.00 – 10.00
Recipients: NDOT Reno Construction Crew 905; Ames Construction; HDR; DCS; RHA & Assoc.

The 2017 Excellence in Partnering Gold Award recognizes NDOT Reno Construction Crew 905, staff provided as part of the consltant augmentation by HDR, DCS, & QCTS, Ames Construction, and parterning facilitator, Renee Hoekstra, RHA & Associates in their successful completion of Contract 3625, USA Parkway.

The team utilized partnering practices to ensure the success of this major and vital project for the enhancement of regional mobility. As a design-build contract partnering was especially important. The team was able to partner to ensure stakeholder expectations were met in a constantly changing environment. The team negotiated nearly $5.5 million in owner directed changes without adding additional time to the project. The strong partnering relationship developed between NDOT and Ames Construction allowed for these added benefit changes to be expedited with project completion three months ahead of the original schedule.

Award: 2017 Excellence in Partnering Frontier Award
Project: Contract 3661, US 6, SR 318 to 0.30 miles east of Murry Street, WP 13.71 to WP 37.47
Recipients: NDOT Elko Construction Crew 912; Road & Highway Builders; Top Quality Resources

The 2017 Excellence in Partnering Frontier Award recognizes NDOT Elko Construction Crew 912, the contractor Road and Highway Builders, and the Partnering Facilitator, Ron Portaro of Top Quality Resources.

AMERICAN OVERSIGHT

Slope flattening and drainage pipe extension along the roadway, asphalt pavement renovation, electrical and ITS work, and other improvements were made in Ely, where a flexible work schedule and excellent team communications led to limited impact to the traveling public. Indeed, cooperation between NDOT, RHB, and the City of Ely is a testament to muiltiple parties working together to overcome an early winter and other obstacles, all in the name of keeping maintenance forces and the public safe.

NDOT and RHB were faced with challenges during the construction of this project. A waterline was damaged during the installation of a footing for a DMS sign. The project team came together to mitigate the issue without a negative impact to traffic, the local community, the project schedule or budget. The project team was also able to coordinate with local maintenance forces to complete the needed repairs at the Nevada Highway Patrol Inspection area in the project limits. The team was fully committed to the success of this contract and was able to deliver the project on time and under budget.

Award: 2017 Excellence in Partnering Silver Award
Project: Contract 3665, I 80, Fernley to LY/CH County Line, LY 5.844 to LY 15.912
Recipients: NDOT District II; Diversified Consulting Services; Granite Construction Company

The 2017 Excellence in Partnering Silver Award recognizes NDOT District II, consultant construction crew provided by Diversified Consulting Services, and the contractor Granite Construction.

The project consisted of repaving along I-80 east of Fernley, in both directions from east of the Nevada Pacific Parkway to the Nightingale Hot Springs exit. Approximately ten miles of the interstate was repaved, with two inches of the old interstate surface removed and repaved with three inches of new asphalt. Roadside drainage improvements were also made.

The project team recognized the value in forming strong relationships and working toward the same goal. The team was faced with two main challenges: The first was developing an accurate project schedule, which was importatnt due to the multiple highway paving projects the contractor had to complete. The second was the new NDOT specifications on “Percent Within Limits” (PWL) and “IRI”. The contract was completed 10 days ahead of schedule and the 8,000 daily drivers on the roadway were provided a smoother, safer interstate surface.

Award: 2017 Excellence in Partnering Frontier Award
Project: Aultman Street/Great Basin Highway, Ely, NV
Recipients: NDOT Ely Mainenance Crew 380; Reck Brothers, LLC

The 2017 Excellence in Partnering Frontier Award recognizes NDOT Ely Maintenance Crew 380, and the contractor Reck Brothers, LLC in the completion of Aultman Street/Great Basin Highway cold mill, over lay project.

This project demonstrated the success of utilizing partnering practices on a small rural project that resulted in both time and cost savings to the Department. The contractor and NDOT worked together to address the shortage in man-power and hauling equipment. NDOT provided the man power and equipment for traffic control and hauling materials to the project site allowing the contractor to complete the project ahead of schedule and under budget.

AMERICAN OVERSIGHT

Award: 2017 Excellence in Partnering Gold Award
Project: Pyramid/McCarran Intersection Improvement Project, Tyler Way to 0.23 miles north of Queen Way, WA 3.9 to WA 4.4
Recipients: NDOT; RTC Washoe County; City of Sparks; HDR; CME; NCE; BEC; CAG; Taylor Made Solutions; Granite Construction Company; Renee Hoekstra of RHA, LLC

The 2017 Excellence in Partnering Gold Award recognizes the collaborative efforts of the Regional Transportation Commission of Washoe County (RTC), Nevada Department of Transportation (NDOT), City of Sparks, HDR Engineering (HDR), Construction Materials Engineers (CME), Nichols Consulting Engineers (NCE), Black Eagle Consulting (BEC), CA Group, Inc. (CAG), Taylor Made Solutions, Granite Construction Company, partnering facilitator Renee Hoekstra of RHA, LLC., subcountractors and stakeholders in the successful completion of the Pyramid/McCarran intersection improvements.

This project required intersection reconstruction without severely disrupting the passage of 60,000 vehicles each day while maintating access to a regional shopping plaza and keeping construction impacts to the adjoining neighborhood at a minimum. Realizing these great challenges, the project team elected to build the project under a voluntary partnering agreement.

It was determined that public outreach was paramount for the success of the project. The team built trust with the local community by ensuring that the three-week lookahead schedules released to the public were reliable.

Some of the notable project successes were as follows:

- Despite extreme weather, the project was completed five months ahead of schedule.
- Partnering with NV Energy and AT&T trimmed utility relocation/installation from 18 months to two months.
- Utilizing marathon paving strategy reduced impact to local businesses from several weeks to just 72 hours.
- Utilizing precast retaining walls at no additional cost to the project to save 25 working days.
- No claims were filed, as all issues were resolved at the project level.

AMERICAN OVERSIGHT

Transcript of Nevada Department of Transportation
Board of Directors Meeting
June 11, 2018

Governor Brian Sandoval
Lt. Governor Mark Hutchison
Controller Ron Knecht
Virginia Valentine
Len Savage
BJ Almberg
Rudy Malfabon
Dennis Gallagher

Sandoval: Good morning, ladies and gentlemen. I will call the Department of Transportation Board of Directors Meeting to order. Can you hear us loud and clear in Northern Nevada?

Malfabon: Yes, Governor.

Sandoval: All right. We'll proceed with Agenda Item No. 1, the Director's Report. Director Malfabon, please proceed.

Malfabon: Thank you, Governor. Just wanted to mention that Bill Hoffman and Mary Martini are attending the Western States DOT's Meeting in South Dakota. Best wishes and safe travels to them.

Wanted to pull Condemnation Resolution under Agenda Item 10 from the Agenda. As we continue to work with property owners, we like to keep our projects on schedule and will often bring a condemnation resolution to the Board. As you've directed us Governor, and Board, to NDOT, to continue those types of discussions and negotiations. In this case, we were actually able to reach a settlement with a property owner, so we'll pull that item.

Wanted to express our condolences to Las Vegas Paving and just the entire Southern Nevada community and Nevada as a whole. We really lost a great leader with Bob Mendenhall. He was the founder of Las Vegas Paving Corporation. He passed away on June 2nd. He was really a giant in the asphalt paving industry. He did a lot of the early research into asphalt paving recycling; held a lot of patents. He really built up Las Vegas Paving to be one of the premier construction companies, not only in Nevada but they do work in other states as well now. They are actually #188 on the Top 400 Construction Contractors List from Engineering News Record. They've worked on every major freeway that NDOT has, as well as the Beltway for the County, and other major roads for other

DRAFT

AMERICAN OVERSIGHT

agencies in Southern Nevada and across the State. I just wanted to acknowledge his passing and express our condolences. He was a great benefactor also to the University of Nevada, Las Vegas, with some of his donations and building an Innovation Center down there in Southern Nevada.

Knecht: Governor? Governor?

Malfabon: The Controller would like to—

Sandoval: Mr. Controller.

Knecht: Thank you. If I may, just one question to Mr. Malfabon on the previous item, the pulling of Item 10. Does that mean that the parcel in question will be going back to the private land owner and that the State will no longer have any authority over it? If so, when?

Malfabon: I'm going to have Ruth Borrelli respond to that.

Borrelli: This is a settlement that we came to with the property owner. It is still necessary for the construction of the project. That's the item that's being pulled. I believe you're referring to another item under the Transportation Board. We will address that later.

Knecht: Here's the reason I ask. On Item 10, I looked at the map and campaign signs pop-up on that parcel all the time. In case I wanted to put one there this fall, I wanted to know who to talk to.

Borrelli: Oh, okay. And, we are only acquiring a portion of that property. So, you can place your signs outside of that, if the property owner so wishes. Thank you.

Knecht: Thank you. Thank you, Governor.

Malfabon: Yes indeed, you remind us that it is important week. Especially tomorrow.

Sandoval: Yeah, but if those signs are in the right-of-way, yank them Rudy. [laughter]

Malfabon: Yes, we always notify elected officials or people running for office of the rules.

Here is Emergency Operations. I just wanted to thank District 2, once again. They seem to be bear the brunt of a lot of bad weather in the winter and in the spring, had mudslides out at Topaz Lake. They closed down the highway on US-395 on May 21st. Then a couple of days later—we just had a series of storms that week and had flash flooding that took away a lot of the shoulder material, up to

AMERICAN OVERSIGHT

five feet and some areas had to be rebuilt. Our maintenance folks did an awesome job, thanks to Thor and the District 2 Management Team and the Maintainers in District 2 for their efforts.

Just to mention also with Emergency Operations, we just heard about another fire, kind of southwest of Lockwood. We're in fire season and thankfully we didn't have a big fire this weekend, on Saturday, when we had those high winds. Our folks will continue to assist in any kind of emergency operations to protect public safety and property.

Federal update. So, we're preparing a grant application, looking at the I-580, early action project. This is the project that the Board approved to look at bonding. We feel that it would be a good match for this program, which the administration and USDOT are looking at a significant local funding for projects and so we're bonding it. It does fit the bill for competing for this program. We'll also look at others. These grant applications are not due until July, so we have a little bit of time.

INFRA Grants, previously known as Fastlane, so concentrated on freight movement. There was $1.5 billion approximately, announced by USDOT subject to Congressional Review in the next couple of months. The reason it was so large was, they didn't issue the FY '17 grant funds available, they combined them with FY '18. Unfortunately, we didn't receive an award or entities in Nevada didn't receive one. Twenty-three states, primarily DOTs did receive awards. So, we were disappointed in that.

Good news is that, the US Senate and the House of Representatives are getting close to agreeing on appropriations bill for Federal FY '19, that starts October 1st. As you recall, sometimes when they don't agree, we get these little short-term extensions, they give us our spending authority. We're pleased that they're not that far apart and it looks like they will pass something. On the next slide you'll see some of the details, but the—go ahead to the next slide.

I put some blue arrows there on some important programs. The Administration wanted to zero out Capital Investment Grants for Federal Transit Administration and Congress funded that substantially. The Federal Highways, FHWA and Federal Transit Administration, Transit Formula Grants, the other two blue arrows give you a sense of that $45 billion to the FHWA and nearly $10 billion for Transit. Those are important programs to continue.

AMERICAN OVERSIGHT

As you can see at the bottom, the percent of FAST Act authorization level, they gave us a little bit extra from what was anticipated. The FAST Act had a little bit above 2% built in for inflation in the annual amounts authorized by Congress in that Surface Transportation Bill. So, we're pleased that they're not that far apart and they're also—there was a portion of it that's related to a bridge program, $800 million in bridge funding that's going to be distributed by the formula process. So, sometimes they have these monies available through grants, when they add a little bit of money. In this case, they're doing it by formula, meaning, all the states will get their fair share based on the current formula that distributes surface transportation funding.

We prefer formula—having that distributed by formula, rather than grants, as you can see in the last slide, where we didn't fair too well in the grant application process. We'd rather have it distributed by formula. Good news is, they're not far apart and they're going to likely pass that before they're done with the—before the federal fiscal year currently expires.

We've been working with the Reno Airport Staff and their consultant. Want to give a lot of thanks to Cole Mortensen and the Spaghetti Bowl Team. They've been working with the Airport's consultant and Airport Management Staff to not only keep our project on schedule but come up with some ideas and concepts that could meet the needs of both NDOT and the Airport.

Governor, I wanted to thank you also, for the meeting that we had with the airport leadership recently and appreciated your comments. As Cole was going in to present this week to the Airport Board on June 14th, you said you'd appreciate the leadership at the Airport kind of brief their Board Members so they're not beating up on him. I'm sure Cole appreciated that too.

We anticipate that they'll pass the resolution, just kind of stating what they want to see. Our goal was to keep the process of the environmental approval on schedule for the Spaghetti Bowl project. We advised the airport that while we're working on these details, which I'll show a graphic later, it's unlikely that it's developed enough to get it into the draft Environmental Impact Statement, but we're working to get it into the final EIS, which we want to get approval from the Feds by mid-2019. This is a very quick turnaround for an EIS of this magnitude. It's a large project.

This is a graphic of what we've been working on with the Airport's consultant. You can see that there's a lot of lines there but the point being that, on the top,

AMERICAN OVERSIGHT

you see that red and blue line, that's the flyover ramp. It misses the high school, that's the important thing is try to stay within the right-of-way with some of the concepts. Their concept is a little bit different. It has the roundabout where we didn't have ours as a roundabout on Plumb Lane.

The point is, we are trying to work with Kittelson and Associates, the Airport's consultant to come up with some concepts that can fit within the right-of-way, not add a significant amount of expense, relatively speaking, to the project and we believe that we are accomplishing that goal by continuing these meetings with the Airport. Not developed enough to just plunk into the draft EIS, but we're getting there. Then it will be subject to federal review, as far as the final document, the Environmental Impact Statement.

A little bit on the Early Action Project, which will—I'll talk about the rebranding effort a little bit later. The Request for Qualification was released after the Board approved us going forward with the project. Responses are due the middle of next month. The Federal Highway Administration felt that the environmental approval for the Spaghetti Bowl Project, the EIS, will cover the Early Action Project. It's kind of the—we had said it was more independent. They're saying, just keep it together as kind of the initial phase of the project. It won't affect the timing of our Early Action Project, the design-build project that was approved to go forward by the Board.

We're happy the timing of the NEPA process, the environmental process for Spaghetti Bowl is not going to delay the Early Action Project going forward. It is subject to the funding that's going to be approved by the Governor's Finance Office when they review NDOT's biennial budget request and then subsequently, the Legislative approval required in the 2019 session for bonding.

Speaking of branding concepts. We didn't want to call it Early Action Project. We wanted to call it something more, kind of more marketable and sexy. If you want to call a project sexy. We got some concept on the left that the team had kind of brainstormed and then a few logos in the right. If you look at the list on the left; Ramp Up, Spaghetti Bowl Express, Fast Track Rapid Auto Commute, ESC/East to South Connector, which Member Savage said, it's a lot bigger than that, so we noted his comments from the last month. Fast Lane, Phase I, Zoom or Zoom 1.0. EXCELerate, Biggest Little Interchange. It's something the City of Reno came up with.

AMERICAN OVERSIGHT

So, definitely would be interested in the Board Members thoughts about that. Governor, if the Board has preference, just let us know. I know it's kind of just new to the Board Members today, but we are definitely open to any kind of comments from the Board about what they think would fit. We want to have a brand-name associated with this Early Action Project, which would be in concert with the Spaghetti Bowl.

Wanted to mention to the Board the good news about the Project NEON bonding. You had previously approved it in March and the Board of Finance in March the issuance of approximately $140 million bond. We did continue to receive a high-rating from Standard & Poor's, AAA Rating. We had six bidders so a lot of interest. Approximately 3.3% interest rate from B of A. The State Treasurer announced significant savings by combining all these phases of Project NEON, which was one of the goals of the Transportation Board years ago when we were talking about getting Project NEON out the door. Get it built, rather than waiting the 20 years or so and doing it with bonding made sense, financially. It made it more affordable, although it's the biggest surface transportation project that NDOT has ever embarked on.

I think it's a good news story that we did the right thing by going with bonding and it was a significant amount of savings. I think that over the term of—had we gone with that 20-year term of delivering the project, it was about $1 billion in savings by doing it quickly and that project will be completed middle of next year.

I wanted to inform the Board about a meeting I had recently with the Stadium Developer and the MGM Representatives about the Hacienda HOV Ramp. As you recall, we're doing the environmental clearance for the Tropicana Interchange, along with the Hacienda HOV Ramp and the Harmon HOV Ramp. They're all in that same vicinity, near the resort corridor and the stadium.

What the MGM's concern was with the—the HOV plan update that NDOT did a few years ago was done before we knew where the stadium was going in. NDOT viewed it as, well the HOV ramp will actually be able to serve the stadium as well, but the MGM brought up some points that I think were good points about the location of the HOV ramp and they didn't support that. They were concerned that because of the fact that the pedestrian access is primarily going to be on Hacienda and they're not building a separate bridge for that, they felt that their plan was to basically close off Hacienda, except for one lane for transit, for access to the stadium on event days and then have all the other lanes—basically have

AMERICAN OVERSIGHT

most of the bridge accessible to pedestrians that are crossing over I-15 from the strip side, where primarily there's Mandalay Bay and kind of to the north, the Luxor and Excalibur. And the Monorail is looking to extending to that side of Las Vegas Boulevard as well, at Mandalay Bay.

So, given that their plan was to have Hacienda as a pedestrian access for the stadium events; not just NFL games or UNLV games, but also concerts and other special events throughout the year. It didn't—their concern was, their traffic control plan would have them closing off the HOV, so we wouldn't get the benefit of the HOV for supporting that and we looked at other concerns. You see the layout there, the stadium is well underway with all those cranes and construction effort there. You see the bridge that we're talking about, the grade separation or overpass, over I-15.

So, at the top of that aerial photo, you see Hacienda and it goes under the Mandalay Bay property. You can kind of see their concern there. They have a small sidewalk. There's access to garages or shopping at that—on that street. They felt it wasn't a good location for the HOV. They wanted us to look at the possibility of looking at Harmon for the access point for the HOV.

I think that they made some good points. We definitely don't want a situation where the stadium and the MGM can't support what we intend to construct there. We would like to—we're working with Federal Highway Administration and our environmental group that's working on the current Tropicana/Hacienda/Harmon Project to have this considered as some options to look at other HOV access points, rather than the northbound access point that was intended at Hacienda.

We'll continue to work with those groups. Looking at possibly revising the HOV Plan. One of the benefits of that is that, we didn't know, when we were putting together the HOV Plan, we didn't have all the details, but the replacement, the Hacienda Bridge, actually when you build something in the center of I-15, you have to shift the lanes over, northbound, which means the bridge supports for the Hacienda Bridge are in the way of some of those lanes that you shift over to make room for the improvements in the center of I-15.

So, it avoids the expense of complete removal and replacement of the Hacienda Bridge. One of the concerns from the stadium, obviously was, they don't want to see any construction in that area that would basically, affect the operations on opening day for the stadium in August 2020 is when it's anticipated. Also, it allows us to take another look at the most optimal, the best location for the

AMERICAN OVERSIGHT

northbound I-15 off-ramp; whether it's south of Harmon or North of Harmon, as I said, we're going to look at Hacienda and possibly look at changing the HOV plan to see what makes sense for—because we want to make it accessible to not only the tourists and the visitors for the strip but also for employees that are trying to get to where they work on the resort corridor.

Our concern is, obviously how does it affect the NEPA schedule for the Tropicana Interchange, which we anticipated trying to get approvals from the Federal Highway Administration in the early part of next year. I think that it's best to approach it realistically, to say what's the best location for the HOV, rather than taking the plan that was developed before the stadium site was determined and go any further with that. Given the points raised by the MGM and the stadium developer, we're willing to look at that and reconsider the best location for the HOV ramp.

The good news was, they both understood that Tropicana Interchange and the reconstruction there is needed. It will really open up I-15 underneath and improve operations at that interchange. They knew it'd be a significant impact to that area of the resort corridor with reconstructing the flyover and the interchange ramps, the bridge over I-15 but they weren't as concerned about that. It's still, it's further away from the stadium and it's good news that we can still have their support on the Tropicana Interchange Reconstruction that will be coming in the future years.

The RTC of Southern Nevada is going to hold a groundbreaking event for their I-11 Phase 2 Project, that's the lion's share of the I-11 route that bypasses Boulder City and connects to the existing interchange there by the O'Callahan-Tillman Bridge, over the Colorado River. Significant projects, significant amount of investment by the RTC of Southern Nevada. They moved the date to August 9th and I believe that's been coordinated with both Governors of both Arizona and your office Governor. It's going to be a huge event August 9th for that groundbreaking.

You'll have the award of Blue Diamond Road, that's a significant project that finishes the widening of SR-160, the road to Pahrump from Las Vegas next month. As I mentioned, Aggregate Industries was the apparent low bidder at nearly $59 million. It's a significant project in Southern Nevada that you'll approve next month. We're doing the bid analysis currently.

AMERICAN OVERSIGHT

Then, a significant project, Phase 3C of the Centennial Bowl, that's the interchange of the Beltway and the US-95 in the northwest part of the Valley there in Las Vegas. Advertise for bids, opening later this month on June 28th. It's in the $49-59 million range. You can see the amount of investment that we're doing on some projects in Southern Nevada.

No settlements expected at this week's Board of Examiner's Meeting. Dennis could probably put in more in legal terms for the Nassiri case, but I just put it succinctly there that the Nevada Supreme Court, they—Nassiri tried to get his attorneys to basically request a reconsideration. It wasn't granted. Previously, the Supreme Court told the District Court, basically that NDOT had prevailed and we had about $1 million in legal costs and fees that were due back from that case. There will be an opportunity to ask Dennis any questions about that during the Old Business, as well.

Lastly and sadly, we want to wish the best to Reid Kaiser, our Assistant Director of Operations. This is his last week. He's done a great job here at NDOT. Reid, thank you for the efforts that you did in improving relations with the Headquarters Divisions and just solid management of their programs and operations. Just to remind everyone, that's the bread and butter of what NDOT does, the construction, maintenance, traffic operations, equipment division, the materials division. They really get a lot done. That's where the rubber hits the road and Reid's leadership really led them to work diligently on their programs but also to work with the Districts and to be more in touch with what the District's needs are. Having a centralized organization such as NDOT, it's often that the Districts feel that they kind of get lost in the shuffle. Reid was very key in keeping those communications open with the Districts, as well as Tracey Larkin-Thomason's efforts with the Districts and just making that partnership work. I wanted to thank you Reid, for your years of service to the State of Nevada and to NDOT. I'm sure that some of the Board Members have comments too.

Kaiser: Thanks, Director Malfabon.

Sandoval: If I may, Mr. Director. I personally want to thank Reid for his service to the State of Nevada. Lieutenant Governor just leaned over and said, that's a big loss. It truly is. Reid, you know, I hope that you know that you have the satisfaction of driving anywhere in the State of Nevada and knowing that you've positively impacted every person in this State in all the projects that we do. That's really something to be proud of. In terms of meetings and my interactions with you, you've always been prepared, you've been professional. Everything that you

AMERICAN OVERSIGHT

touch, everything that you do is quality. Reid, we're truly going to miss you. This is a great opportunity for you and you know, it always makes me proud personally to see people who done a good job for the State of Nevada to move on to other things. You'll continue to have a positive impact on Nevada, but just in a different way. Speaking for me and speaking on behalf of all the people of the great State of Nevada, thank you very much for your service.

Kaiser: Thanks Governor. If I might, we have—the last eight years under your leadership, I know sometimes we kind of complain about these agreements, having to go over all the agreements and the contracts and everything, but—

Malfabon: We do not. [laughter]

Kaiser: You know, I appreciate your leadership because you have made us more cost-effective. We're a little leaner now and you know, in my opinion, under your leadership, we have become more efficient as a transportation community. I think that's what the State—the people who live in the State of Nevada, that's what they want. So, I appreciate your leadership that you've given to us in the last eight years.

Sandoval: Thank you Reid, that really means a lot. I think I saw the State Controller with his hand up.

Knecht: Thank you, Governor. I won't repeat all the things you said, but I agree with them. I just wanted to let Reid know that last meeting, I suggested maybe I'd bring a motion to keep him here, I thought real hard about that and decided it was in his best interest that I not do so. Reid, thanks a lot.

Kaiser: Thanks, Controller.

Sandoval: Member Savage.

Savage: Thank you, Governor. Reid, thank you for the many years of commitment and loyalty to NDOT. Today, NDOT is a better place, a better Department of Transportation because of Reid Kaiser. Personally, it's been an honor and a privilege to work with you shoulder-to-shoulder, Reid, over the past eight years. Your professionalism, integrity, consistency, ethics and professional standards are amongst the highest of any man or woman I've ever worked with over the last 35 years. You have reassured us all with your composure and your steadiness that the operations here at NDOT are the highest of quality in any state within the

DRAFT

AMERICAN OVERSIGHT

Union. We're going to truly miss you Reid and I wish you all the best in health and happiness in your future years. Thank you, Reid Kaiser.

Kaiser: Thanks Member Savage. I appreciate your leadership also on the CWG Board. Again, it's kind of the same that I said of the Governor. You know, there weren't always easy things that you guys brought up, you know, with unbalanced bidding and getting our projects closed out in a timely fashion, but again, with your leadership and Member Almberg and Frank Martin's, you know, we have made changes that I think the transportation community can appreciate and again, we our leaner—especially on the operations side, we're doing things better and more efficiently these days and I appreciate your leadership.

Savage: Well, thank you Reid. It's—you worked with us, we worked together. That means everything to all of us at the CWG. We appreciate it and we're going to miss you. Thank you, Reid.

Kaiser: Thanks.

Malfabon: Lieutenant Governor?

Hutchison: Yes. I just wanted to add my comments as well. Reid, everything that we have ever done together, again, has been first-class. You're a man of competence and character and I love to hold up examples of true public servants. You've got a lot of options, you've had a lot of options in your professional life and you've chose public service. When we talk about up and coming engineers and professionals going into public service, particularly with NDOT, we're going to hold you as an example of a true public servant who really sacrificed for the State of Nevada. As everybody here has said, the Governor and everybody else, we're grateful, wish you the very best and God bless you.

Kaiser: Thank you, Lieutenant Governor.

Sandoval: Rudy, did you have a comment?

Malfabon: No, I was just going to have one last item before we open it up for questions for the Director.

Sandoval: All right, please proceed.

Malfabon: Thank you, Governor. I just wanted to announce, the RTC of Washoe County is going to have a grand opening ceremony for the Southeast Connector on July 6th. I didn't have a slide for that but it's significant in that it's a big investment in

AMERICAN OVERSIGHT

transportation in Washoe County, but also should relieve some of the traffic that goes into the Spaghetti Bowl from Sparks, that once it heads south to the—either to Carson City or you can take that new road once it's opened up in July and it will alleviate some of the pressure that we see from traffic volumes at the Spaghetti Bowl on I-80. Definitely will attend that opening. If any Board Members are interested, it's July 6th. We can get you the details.

With that, that concludes the Director's update and willing to answer any questions from the Board.

Sandoval: Okay, thank you Rudy. I don't have any questions, just a few comments as I went through your presentation on the Reno Airport. I want to compliment you and Cole and everyone else involved in that project in terms of your efforts to communicate with the representatives there. I know that you've been reaching out to them from day one. We did have a meeting in my office and I think that everyone understands that NDOT's intent is to improve the quality of life and ability to move around in Washoe County in a much better effort and in no way would NDOT do anything to hurt the Airport. In fact, there's an opportunity here to improve ingress and egress to the Airport.

So, I was very pleased to see the Airport representatives now actively seek to participate in the process. Cole, you know, I appreciate you going to the Board Meeting on June 14th. As I said, this should not be and will not be an adversarial relationship. It will be one with the people, the State and particularly the people in Northern Nevada expect which is a spirit of cooperation and working together and I know—and I'm not saying we have not, because I think we have. I would expect that that meeting would be one that there would be a fair exchange of questions and answers. Really, you know, the big effort there is to avoid what could be a really big transportation problem in the future and get ahead of it.

I'm excited about that. With regard to the naming, my vote goes to Spaghetti Bowl Express. I like that. I mean, the other ones don't really describe where it is and I think that one, everyone there in Northern Nevada will know exactly what we're talking about.

Moving on to Project NEON bonding. I think it's extraordinary that there was $1 billion in savings by moving up the construction schedule from a 20 year one to a five-year one. Not only does it save taxpayers $1 billion, but as I mentioned to Lieutenant Governor and Member Valentine, you know, my comment then and my comment now is, the project would've been obsolete by the time it was

AMERICAN OVERSIGHT
NV-DA-20-0615-A-001821

finished in 20 years. I think that we've done the people of Southern Nevada a big service by being a lot smarter about things in terms of saving money and providing a quality project in a much quicker fashion.

Having been down here for the past several days, it's remarkable what NDOT and Kiewit have accomplished here in terms of the magnitude of this project but still doing a really good job in terms of allowing people to move around the best they can in the midst of the largest public works project in the history of the State. My compliments to you, Rudy, and Mr. Keller and everybody else associated with the project down here. I think you did a great job and Kiewit as well.

On to the stadium. I'm glad to see again, that we're trying to get in front of everything in terms of working with all the interested parties to—to make sure that this is done in an intelligent way, in terms of coordinating the stadium representatives, the gaming industry representatives and the transportation representatives. I think that's—one of the worst outcomes would be to have Day 1 and have a big traffic jam and not have everything done. I'm really pleased to see that we're ahead of this.

I do have a question there, Rudy and I don't know if I heard this anecdotally or internally. There was some discussion about a pedestrian ramp over the 15. Is that something that is still under consideration or ever was under consideration?

Malfabon: It was at one time, Governor, it was identified—it would be a pedestrian bridge, which I think they're looking at—because of the layout of the MGM properties, the Mandalay Bay and they found an approach that could work with Special Events to use the Hacienda Bridge. It still could come to pass that in future years, a pedestrian bridge could be built there, but for now, they felt that they could use Hacienda as a primary access for pedestrian traffic; which is going to be substantial from the Strip Area, South Strip, Mandalay Bay area.

Sandoval: All right, thank you. And then just finally, another comment with regard to the RTC, I-11, Phase 2 Project; also in coordination with our piece, the Boulder City Bypass. That again was something that really seemed like it wasn't possible. My compliments to NDOT, as well as the RTC for what I believe is a visionary project, in terms of the first piece to what will be a major transportation artery for the Southwest United States, connect Mexico, Canada and everyone in between. Particularly, for the benefit of the State of Nevada. This is really something that, you know, all of us won't be here, but when it's completed, I think people are really going to appreciate again the vision of NDOT and the RTC and everyone—

AMERICAN OVERSIGHT

and also our brothers and sisters from Arizona, from all of us working together to get this done. I know there's a lot more work that has to be accomplished in planning but this is a really big piece. I think a really massive indication of what the State of Nevada's intent and our commitment to making sure it gets done. Thank you for that Rudy.

Malfabon: Thank you, Governor.

Sandoval: Questions or comments from other Board Members with regard to the Director's Report, Member Valentine.

Valentine: Rudy, I'd like to acknowledge and thank you, Cole and Nick Johnson who appeared before the Northern Nevada Resort Association Board of Directors to talk about the Reno Ramps. I hope those will continue. I have one question, have they been added as a participating agency?

Malfabon: Cole is going to go ahead and address that Member Valentine.

Mortensen: First of all, I'd like to say thank you for all the kind words there. We have been considering them as a participating agency, I think since our meeting in late March. We actually did respond after it was apparent that there was some confusion as to whether or not there was an official document or something that made that happen. They will be and have been considered a participating agency since then. Basically what it boils down to is, it will be documented within the EIS and then we'll continue to work with them as we've worked with the other agencies to get through the process.

Valentine: I appreciate that. I have also a comment about that. I was a little surprised to see a traffic circle pop-up. I drive through traffic circles several times a day and they particularly, I think if you have people who are not familiar with how to drive in traffic circles, something like at an airport, where people are not familiar with the area, I think there could be some challenges associated with that. It surprised me too because I'm used to seeing traffic circles in conjunction [inaudible] and not necessarily capacity solutions. I hope that when you do your report, we—a good discussion about capacity and some of the alternatives, that things get a little bit lost and they don't really jump out at you from the graphics. I hope they'll consider that, to the Governor's point about long-term solutions as you are looking way down the road at increased volume.

Mortensen: Thank you. That's part of the reason why, at this point in time, we're not going to be able to include those alternatives as part of the draft EIS because we still have

AMERICAN OVERSIGHT

a lot of evaluation that has to be done. The traffic analysis and other environmental considerations as well, so basically at this point in time, the whole purpose for us doing the draft EIS is to allow us to discontinue looking at the other two alternatives and to discontinue doing any further evaluation on those. What it doesn't mean is that we're not going to be making changes to the preferred alternative that we presently have in going forward. We'll continue to work with them and make sure that we can do our best to handle those traffic volumes and make sure that we're mitigating any of the environmental concerns as we go forward.

Valentine: Thank you.

Sandoval: Mr. Lieutenant Governor.

Hutchison: Thank you. Governor, thank you. Rudy, thank you for your report. I just wanted to make a couple comments. One just on the passing of Bob Mendenhall, as Rudy you had mentioned and it was and is a loss for the great State of Nevada. As you mentioned, Bob was very innovative and really an icon in Nevada. I had an opportunity several months ago to take a tour of I-15, the I-15 stretch with his grandson Ryan. His legacy continues and his efforts continue and his history with the company will continue beyond his life. Some of that bridge work was excavation sites and that wildlife protection facilities that they came up with out there, I mean, those were very, very difficult engineering challenges that they conquered out there and very, very impressive. We continue to be blessed to have Bob's influence and his generosity in Southern Nevada and throughout the State.

I wanted to just follow-up on a couple of points and add my thanks on Project NEON. I drive Project NEON almost every day and it's never convenient to have a construction site in the middle of a freeway system like that, for anybody, but it is, I think as smooth as it possibly could be. I remember when we planned that and we thought about that and that was our number one priority, beyond making sure that the State of Nevada and the taxpayers receive a quality value for their tax dollars, but avoid the inconvenience as much as possible. I think we're accomplishing that. As I say, it's not convenient to have a construction project in the middle of I-15 and 95, but I think it's as smooth as it can possibly be. I just appreciate that. I haven't heard a lot of complaints, at least from my end down here.

Then again, just adding the emphasis that others have made to the pedestrian access for that stadium. Whatever we can do to coordinate with those hotels and

AMERICAN OVERSIGHT

the stadium, just—that's got to be a great game day experience, event day experience for everybody. Again, I'm very pleased that we're coordinating all those efforts.

Finally, maybe this is a best question for Counsel, in terms of Nassiri v. NDOT, what do we think our chances of actually recovering attorney's fees in that million dollar lawsuit there?

Gallagher: For the record, Dennis Gallagher, Counsel to the Board. If you'll indulge me for a moment because I know some Board Members aren't familiar with this case. It originated in 2012. NDOT was sued by Mr. Nassiri. Various tort and breach of contract allegations. Through the years, it was extensively motion practice to reduce the claims. Mr. Nassiri's theory of the case changed which added to the complexity to it and at different times, what he wanted from NDOT changed. At one point it was rescission plus $20 million. At another point, he wanted $45 million. Then at another point, he wanted $20 million but he got to keep the property.

Everything was thrown out except a couple of breach of contract related claims. We were scheduled to go to trial with that. The State opted to go to the Nevada Supreme Court to seek a Writ of Mandamus. Earlier this year, the Court entered such a Writ, directing the District Court to enter judgment in favor of NDOT on all remaining counts. Mr. Nassiri requested a rehearing from the Supreme Court which was denied earlier this year. We filed, on behalf of NDOT a Motion for Cost and Fees. The Judge ordered supplemental briefing. We submitted supplemental briefing and at argument on the supplemental briefing, the Judge ruled from the bench in favor of NDOT, awarding approximately $1 million worth of cost and fees. Significantly, that judgment will be entered against Mr. Nassiri both as an individual and his personal trust.

Hutchison: Mr. Gallagher, thank you very much. Congratulations to you, I know to outside counsel, had a chance to talk with him about the case. Competently handled, obviously, by his firm and managed by you. That's a big win and a great victory for us. Thank you.

Gallagher: Thank you, Lieutenant Governor.

Sandoval: Questions or comments from Northern Nevada?

Malfabon: None up here, Governor.

DRAFT

AMERICAN OVERSIGHT

Sandoval: Thank you. We will move to Agenda Item No. 2, Public Comment. Is there any member of the public present in Las Vegas that would like to provide public comment to the Board? There's no one. Is there anyone in Northern Nevada who would like to provide public comment to the Board?

Malfabon: Yes, there is Governor. Someone is approaching the podium. Please state your name.

O'Malley: My name is Cynthia O'Malley. Governor Sandoval, I'm so sorry to have missed you today. I hope I get to see you soon. I'm here because NDOT just did a fabulous job in dedicating the 12-mile segment of Highway 140 for my son Jacob O'Malley and Will Hawkins. I wanted to thank you again. It was so amazing how Governor Sandoval pushed this through and everybody here worked hard and got it done so quickly. So, thank you very much. Thank you. And, that day, on November 2nd when we met out there, it was a very special time. It will always be held in my heart and I will not forget it.

Governor Sandoval, I'm here today because I brought the ballcaps that I told you I'd bring for Len and Sean and Bill and you. Since you're not here, I wondered if I could make an appointment with you when you get back from Las Vegas, and give this to you in person?

Sandoval: Ms. O'Malley, thank you for being here. You don't need to make an appointment, you come any time you want.

O'Malley: Okay.

Sandoval: That was an extraordinary day. It makes me emotional just thinking about it. Please know, you're always in my thoughts and prayers and you know, again, your son is a hero and just a shining example for everyone. You know, again everyone at NDOT and everyone who was out there that day, it was truly a special moment. It will be a place that everyone will be able to come to and think and pray and reflect. It's such a beautiful, beautiful place. It's really nice to see you again. I apologize I was down here today. If I had known that you were going to be up there, I would've made a special effort to be there. Please know, any time you want to come in, I truly look forward to seeing you. I'm going to really, really treasure that hat.

O'Malley: Oh yes and you know, you will. I have something for your dog Charlie as well. Because, Gatsby was out there that day. I'd like to say, to give a recap too that, I don't know, probably Governor Sandoval knows this, but in April we were flown

AMERICAN OVERSIGHT

up with your tax dollars, thank you very much, to meet with and see the men that were behind the engine that day, the eight Boise Crew. There was eight men. They did their job and they saved the lives of Zachary and he's doing really well. We were flown up there because the National Director from Washington DC came and gave them all—they all received the Metal of Valor. I wanted to give that as a recap for everybody here, to know that happened. That was, gosh, they're eight young men, wonderful young men that did their job and went beyond the call of duty that day. That was really a special occasion that we went up there for and we were grateful to be there and to be able to thank them for the job they did. They saved Zach's life.

On this hat is the sticker that was done. It's called Never Forgotten. It has Engine 2410, O'Malley-Hawkins on here. And the date. What's special about this sticker is, it was asked to be put on the BLM engines in the State of Nevada as well, okay. So, they've made a hat and when I talked to the guys out there on November 2nd, you all said you wanted the Never Forgotten hats, so that's what I've brought you. I wondered, Governor Sandoval, if it would be okay, that I could give this to Len today and to Sean and then, at a later date, get maybe all four of us together and get a picture, altogether with the hat.

Sandoval: Absolutely, thank you. Thank you, thank you, very much. God bless you.

O'Malley: Thank you. So, can I give these to at least Len and Sean are here today, is that okay?

Sandoval: Yes, please.

O'Malley: Okay, thank you.

Savage: Governor, I typically don't speak during public comment, I don't think I ever have. This moment, it was very heartfelt and I want to thank Cynthia and may Jacob and Will rest in peace knowing they'll never be forgotten and this hat will be worn very proudly. I thank you, Cynthia. I thank you, Governor.

Sandoval: Thank you Len. Is there any other public comment from Northern Nevada?

Malfabon: I don't see any other speakers, Governor.

Sandoval: All right, thank you. We'll move to Agenda Item No. 3, which is the Approval of the May 14, 2018 Board Meeting Minutes, have the Members had an opportunity to review the minutes and are there any changes? Mr. Controller?

AMERICAN OVERSIGHT

Knecht: Governor? Thank you. At Page 4, in the third line of my remarks, towards the middle of the page, there seems to be a fugitive extra word there and we should take out the 'but' that's in that line. At Page 35, two items. The top line, the word reins should be R-E-I-N-S, not R-E-I-G-N-S. The second line from the bottom, there are three what's in that line, the second one should be 'want'. Those are all the changes I have, thank you.

Sandoval: Thank you, Mr. Controller. Do the Members have any other changes? If there are none, the Chair will accept a motion to approve the May 14, 2018 Minutes with the amendments recommended by the Controller.

Valentine: So moved.

Sandoval: Member Valentine has moved for approval, is there a second?

Hutchison: Second.

Sandoval: Second by the Lieutenant Governor. All the Southern Nevadans are going to get their motions this week. Any questions or discussion on the motion? I hear none, all in favor say aye. [ayes around] Those opposed say no. That motion passes unanimously. We'll move to Agenda Item No. 4, Approval of Agreements Over $300,000, Mr. Nellis, I would assume, you're up.

Nellis: Yes, good morning Governor, Members of the Board. For the record, Robert Nellis, Assistant Director for Administration. There are two agreements under Agenda Item No. 4, that can be found on Page 3 of 13 for the Board's consideration.

Line Item No. 1 is the first amendment with three service providers to increase authority by $400,000 and extend the termination date for the continuation of on-call archeological services due to limited staff resources, number of anticipated projects and to meet the requirements of the National Historic Preservation Act.

Line Item No. 2 is also the first amendment with three service providers to increase authority by $400,000 and extend the termination date for the continuation of on-call architectural historian services, due to limited staff resources, number of anticipated projects and to meet the requirements of the National Historic Preservation Act.

With that, Governor, that concludes Agenda Item No. 4. Does the Board have any questions regarding these two agreements?

AMERICAN OVERSIGHT
NV-DA-20-0615-A-001828

Sandoval: Thank you, Mr. Nellis. I have no questions. Board Members, any questions with regard to Agenda Item No. 4?

Knecht: Governor?

Sandoval: Is that you, Mr. Controller? Yes.

Knecht: Thank you. Mr. Nellis, a couple of questions. Could we have foreseen the need to run these projects three years, instead of one, at the time when they were first approved?

Nellis: Mr. Controller, I'll defer you to Cole Mortenson for those answers.

Mortensen: For the record, Cole Mortensen, Assistant Director of Engineering. I would have to verify with staff on that but my anticipation is, we've just started some more of these on-call lists. I would have to say, they're probably trying to find out how much use they actually get out of them, which is why they did one year to start with rather than the three. I think that that first year also helped them understand how much they'd be utilizing their services as well, which is why now they we're asking to extend it by two years, with the expectation of about $200,000 for each of those years.

Knecht: Fair enough. And, the problem that I see here is—actually two problems. One, there's an appearance here of getting the camel's nose under the tent and then two humps to follow. You know, as someone who used to have state contracts, getting an extension and more money in the amendment than the original had, it always looked like a great thing for the contractor. I guess, I understood your answer that you know, this is a start and a learning process. In the future, will we expect to see fewer of these back-end loaded amendments?

Mortensen: I understand your concern and your question there. Maybe to give you a little bit more comfort with this also. With this being an on-call, this isn't a direct contract guaranteeing each one of them would receive this funding.

Knecht: Right.

Mortensen: What this does is it allows us to open up the door to send out a quicker process to get smaller amounts of work done. So, even though we're amending this overall payable amount to $650,000, it doesn't mean that it is going to be spent or to given all to one contractor. But yeah, in the future, we're certainly—where we can, we certainly try to identify the total duration that we expect along with the

AMERICAN OVERSIGHT

total amount that we expect. In certain circumstances, it just doesn't work out that way.

Knecht: One final question here, how do we manage the budgetary aspects of this? We're looking at a new biennium here and I presume that the portion, the period and the dollars of the amendment that go into the new biennium are subject to legislative authorization and approval by the new Governor in the budget. Is that correct?

Malfabon: I'll respond to that, Mr. Controller. NDOT uses our Capital Improvement Program to pay the consultants that support our project delivery process, as well as our contractors that ultimately bill the project. Because that's a fluid situation, with receipt of grants or other funding adjustments, typically we do have to go to Interim Finance Committee for adjustments to the Capital Improvement Budget for NDOT. It's taken into account at that stage, when we go to IFC adjustments.

Knecht: Thank you, Mr. Malfabon and thank you, Governor.

Sandoval: Board Members, any other questions with regard to Agenda Item No. 4?

Almberg: I have one quick questions, Governor.

Sandoval: If there is none—oh yes, Mr. Almberg.

Almberg: This is—each of these items here have three consultants, for each of them. I'm just wondering, I realize that this work is given out by task order, whatever may come up and the simple question I have, have each of these consultants have had some type of task to do?

Mortensen: I would have to get that answer for you. Typically, with these, we'll send out a Request for Approach, or an RFA and then we'll get—it's a shorter type proposal, so they're not putting as much effort into it. Then they'll make the selection on who gets the work based off of the proposals that they receive. And, that doesn't necessarily mean that all three firms are going to submit a proposal either, right? It's just that we're asking them to submit, so that hopefully we can get them on board a little bit quicker. To—short answer to your question is, I don't know—

Almberg: Okay.

Mortensen: --if all three have, at this point in time or not.

Almberg: And I understand the process and I agree with the process, I was strictly wondering.

AMERICAN OVERSIGHT

Nellis: Member Almberg, I can answer that question. In the archeological services, all three have been issued task orders and then one had been issued a task order so far in the architectural history services.

Almberg: All right, thank you. That's all for me, Governor.

Sandoval: Thank you. Any other questions? If there are none, the Chair will accept a motion for approval of the agreements presented in Agenda Item No. 4.

Savage: Move to approve.

Sandoval: Member Savage has moved for approval. Is there a second?

Valentine: Second.

Sandoval: Second by Member Valentine. Any questions or discussion? I hear none, all in favor say aye. [ayes around] Those opposed say no. That motion passes unanimously. We'll move on to Agenda Item No. 5, Contracts, Agreements and Settlements, Mr. Nellis.

Nellis: Thank you, Governor. Again for the record, Robert Nellis. There are two attachments under Agenda Item No. 5 for the Board's information and no settlements this month.

Beginning with Attachment A, there are four contracts on Pages 4 and 5 of 14 in your packet. The first project is located on I-15 at 215 in Clark County. This is a capacity project in which restriping will modify the existing single lane southbound I-15 to westbound I-215 offramp to two lanes. There were two bids and the Director awarded the contract to CMMCM in the amount of $548,006.55.

The second project is located at the Elko Administration Building. This is for asbestos removal, rough carpentry, new doors and windows, as well as, mechanical and electrical improvements. The Director awarded the contract to Core International, in the amount of $343,730.13.

The third project is located in Fernley, Main Street from Hardie Lane to 400 feet west of Seventh Street. Construction includes ADA improvements, bike lane, curb gutters, sidewalks, approaches and drainage improvements. There were four bids and the Director awarded the contract to Granite Construction Company in the amount of $735,735.

DRAFT

AMERICAN OVERSIGHT

Lastly, the fourth project is at the Kingsbury Maintenance Station in Douglas County. This is for water line and sewer line installations. There were two bids and the Director awarded the contract to A&K Earthmovers in the amount of $544,000.

With that, does the Board have any questions regarding these four contracts before we turn to Attachment B?

Sandoval: Thank you, Mr. Nellis. I have no questions. Board Members, any questions with the first portion of this agenda item?

Hutchison: Governor?

Sandoval: Mr. Lieutenant Governor.

Hutchison: Thank you, just a quick question for you on Item 2. Were you surprised that there was only one bidder for that item?

Kaiser: Reid Kaiser, Assistant Director for Operations. Yeah, we were surprised and that—Northeast Nevada is very busy right now. In fact, this contractor had 11 subs on this job. Prices for the materials he was using has increased 40% this year. The contractors, the vertical contractors are very busy. That also gives an explanation as to why we were above the Engineer's estimate.

Hutchison: Okay. Thank you.

Sandoval: Thank you, Mr. Lieutenant Governor. Mr. Controller.

Knecht: Thank you Governor. Mr. Nellis, the first three projects came in nicely under the Engineer's estimate, so naturally I'm going to ask about the fourth one which came in about 30% over and its, you know, within seeing distance of the urban area here. Actually, you can see it from Carson City. Help us understand why that one came in 30% over.

Kaiser: Again, Reid Kaiser, Assistant Director for Operations. The biggest reason we think it came in over is, this job was up at Lake Tahoe and we had increased our Engineer's estimate a couple of times in the last couple of months because we've been meeting with the TRPA and trying to get this permit through. So, all we can figure is that, with it being in Lake Tahoe, there's longer hauls than what we had thought. I would have to assume that would be why the—why the contractor is over the engineer's estimate.

AMERICAN OVERSIGHT

Knecht: Okay. And, I guess there's an uphill aspect of that one too, as well as longer. Thank you, Reid. Thank you, Governor.

Sandoval: Any other questions?

Savage: Yes, Governor.

Sandoval: Member Savage.

Savage: On the same item, number 4, being over budget again 35%. We talked about this last month as well. I would like to take this discussion to our next meeting at the CWG because there does have to be a point where the Department says, we can't afford something if it's 35%, 50%, wherever that margin is. So, I would like to discuss it at our next meeting this afternoon at the CWG on a further basis. Because as a contractor on the private side, I realize materials and labor have increased substantially over this past year and will continue to do so. As a Department, wearing the other hat, we need to be well aware, on top of the game, understanding what those estimated costs are. So, just to reassure the Controller and the Governor and the rest of the Board, we will discuss this particular issue and other estimates at the next CWG. Thank you very much.

Nellis: Member Savage, Robert Nellis for the record, I believe part of the—this is a unique situation in this particular one where the engineer's estimate was eight months old and that was—there was a delay from acquiring a utility easement. So, we had a—we had an estimate, we've been working on this for a number of years and then, by the time we got that acquisition or ready to go, it didn't take into account the current cost escalation and the big climb that we're experiencing now. I believe this is a little unique from some of the other overages that you've seen.

Savage: Thank you, Mr. Nellis.

Sandoval: Thank you. Any other questions on this portion of the agenda? All right, Mr. Nellis, please continue.

Nellis: Thank you Governor. Turning to Attachment B in your packet. There are 62 agreements under this attachment. On Pages 11-14 for the Board's information. Items 1-18 are Acquisitions and Cooperative Agreements. 19-29 are Facility Agreements and a Grant. 30-34 are Interlocal Agreements and Leases. Lastly, Items 35-62 are for Right-of-Way Access and Service Providers.

DRAFT

AMERICAN OVERSIGHT

With that, that concludes this agenda item, Governor. Does the Board have any questions for us regarding these agreements?

Sandoval: Board Members, questions on this portion of the agenda? Mr. Lieutenant Governor?

Hutchison: Thank you. Thank you, Governor. Just a couple of—just a question really on two items. Item 41 and Item 49 are just for janitorial services, fairly routine services here. I'm just curious, these I'm sure are competitively bid. These are within the range that we've seen in the past, or is this something that we're seeing an escalation in costs because of labor issues or other market conditions?

Malfabon: I'll respond to that and maybe Tracy can add, but usually the Districts, when they're procuring the janitorial services they allow the vendors, the service providers to look at the sites. They consider some other factors, as well as obviously the cost. They try to keep these as simple projects, but also do a lot of leg work in advance, to let the janitorial companies know what the expectations are for service so that our—the public that uses these facilities is not inconvenienced or that has that clean rest area and they negotiate the terms of that but explain it all in advance, so we get a level playing field on the bids. Tracy, do you want to add anything to that?

Larkin: For the record, Tracy Larkin, Deputy Director for NDOT. These costs—adding on to what Rudy said, but these costs are fairly typical for what we are expecting to see in these areas.

Hutchison: Okay. Thank you and one more question for me and that's Item 46. $300,000 for a Hazardous Commodity Flow Study. I understand the importance of making sure that we deal with hazardous materials in a way that minimizes danger and maximizes safety, but just for the record, can somebody explain what we're doing here and the purpose of the $300,000 for this study?

Rosenberg: Sondra Rosenberg, Assistant Director for Planning. That's something that came out of our Statewide Freight Plan, from our Freight Partners that it was of interest to several agencies to better understand where hazardous commodities are flowing through the State, create some maps. Really, it's more of a partnership on communication on this issue. That money is coming from the Freight Funds that we get from the Federal Highway Administration. Again, it was something that popped up through that study. We're working with Emergency Management and several other agencies to develop that.

DRAFT

AMERICAN OVERSIGHT

Hutchison: Is Cambridge Systematics a company that we've contracted with before and has experience in this area?

Rosenberg: Yes. They have—actually, they've recently established a Nevada office who has worked with us under other consulting firms, but they are a national expert on freight issues. They were a subconsultant on the Freight Plan. They're a subconsultant on our statewide plan. We are very familiar and comfortable with their abilities.

Hutchison: All right, thank you Governor. Thank you.

Sandoval: Thank you, Mr. Lieutenant Governor. I'm going to jump in here, just while you're speaking Sondra, on Contract 32, with University of Nebraska and this—I know it's not a cost one but it says, due to a delay in the receipt of materials, can you provide a little bit more detail on that?

Kaiser: Governor, I'll handle that for Sondra. That was a—the delay in that contract was we sent them materials, concrete and cement from Northern Nevada and Southern Nevada. We were slow in acquiring those materials and getting that material to them so they could start the research. So, that's why we're requesting an extension in time on this agreement.

Sandoval: Okay, so that one is on us, right?

Kaiser: That one is on us. Yes, Governor.

Sandoval: Okay, thank you. That's all I have. Mr. Controller.

Knecht: Thank you, Governor. I've got three items. Mr. Mortensen, Item No. 8, Billboard relocation for $325,000. Anywhere in the State and most of the country, $325,000 is well above a starter house. What are they going to do for the billboard relocation that's going to cost $325,000? Are they going to disassemble the thing and move it and reconstruct it or are they just going to build it from scratch or, must be some hotdog kind of billboard?

Mortensen: If I may, Ruth Borrelli, our Chief Right-of-Way Agent will provide detail on that.

Borrelli: For the record, Ruth Borrelli, Chief Right-of-Way Agent. What they need to do, the structure is no longer compliant. So, they'll be demolishing, bringing down the structure. Then they had to acquire and reconstruct the new structure and place it. So, it also is bringing in the infrastructure necessary to support the billboard. That's power, power lines need to be brought in.

AMERICAN OVERSIGHT

Knecht: Okay. Power lines are required because this is an electronic billboard?

Borrelli: Correct.

Knecht: Gee, I thought electronics were going to save us money. Thank you, Ruth.

Borrelli: Thank you.

Knecht: Item 30 is Department of Public Safety, Office of Traffic Safety and it's an amendment, a no-cost amendment that extends a two-year contract to a five-year contract, roughly. I wondered about that. You know, there's been previous increases in the total of a modest nature but why are we extending it from two years to five years?

Rosenberg: For the record, Sondra Rosenberg, Assistant Director for Planning. I was looking around to see if one of my traffic safety folks was here. Unfortunately, I may have to get back with you on the details of that—oh, there you are. Never mind. Ken Mammen will answer that question.

Mammen: Good morning Governor, Members of the Board. For the record, Ken Mammen, Chief Traffic Safety Engineer. That agreement is one of our ongoing purposeful collection of data that we always have to have. There's two things going on here. We've got USOM, which is the School of Medicine, which we're working with on the Trend Newsletters. Then, of course, we get our crash and citation data base that we're constantly working on. It's a never-ending process, it will never go away. So, you'll always see these things come up and be extended.

Knecht: So, if it's information technology, instead of the old rule of thumb that you double the time, this one is 2.5 times the time.

Mammen: I can't answer the question on why it's—that the timeframe is. I can get back to you on that, why that transpired to that timeframe, but—I don't have an answer for why the timeframe is as it is.

Knecht: And I would appreciate that.

Mammen: Okay.

Knecht: Thank you very much. Finally, Item 48 is an amendment that increases the authority by about 135% from what it originally was for continuation of services on an on-call basis. What's going on there? This actually will extend the end

AMERICAN OVERSIGHT

date only slightly, if at all. I'm just wondering, why we have basically 135% increase.

Malfabon: Thor Dyson is approaching the podium, but typically they just need this type of service on-call for concrete pavement repairs. Thor, you want to add to that?

Dyson: Certainly. Thor Dyson, District Engineer for NDOT, Board Member Knecht, thank you. We anticipated that question. This is another one of those, it's on us. There was a clerical error, unintentional processing error on the contract and it was written for only $102,612. It was determined and agreed at that time that the amendment was spent down to make this agreement whole to the original amount. So, it was initially a clerical error on our part.

Knecht: Okay, and—

Dyson: And, it's an on-call. We're constantly using this particular service. Our infrastructure is always being hit, crashed into, destroyed, needing repair, needing to be made whole on a timely basis.

Knecht: Thank you. So, we have two of them out of 48 this time that are on us, or do we have any others that basically, that involve some problem with our contracting process or would you know?

Dyson: We have the one earlier that Mr. Kaiser was talking about and then this one. I'm trying to think if there was another one that we had. We had a tree trimming contract, yeah, No. 59, same thing. That was in our District. That one was for, again, a clerical error. We needed to change the rate from $340 to $352 per hour. It does not change the total amount of the agreement. It's—it includes for a four-person crew to, with equipment, to address tree trimming.

So, like last Saturday, it was pretty windy. Had a hard time standing up. We have a lot of tree damage. A lot of trees have been blown over. So, we'll be using some of these guys. Not only to trim the trees, but on an over time basis, if we need to, to augment our staff to address tree trimming and tree removal, dangerous trees along the highway. That could be anything from, you know, — let's say we have some issues that trees are partially or all in the right-of-way and it's going to be an issue falling on to traffic or it's a vision problem for people making turns.

Knecht: Mr. Dyson, thank you very much for your candor and your forthcoming and informed response.

AMERICAN OVERSIGHT

Dyson: I'm sorry we have—

Knecht: I would like to say we never have—we never make errors at the Controller's Office, but I know better. So, 3 out of 62, I'm comfortable with that.

Dyson: Well, we'll tighten it up, three is too many. Thanks.

Knecht: Thank you. Thank you Governor.

Sandoval: Thank you, Mr. Controller. Any further questions on this agenda item? Mr. Nellis, any further presentation?

Nellis: No sir, that concludes this agenda item.

Sandoval: Thank you very much. We'll move on to Agenda Item No. 6 which is a Resolution of Relinquishment. Director Malfabon.

Malfabon: Thank you, Governor. This is for disposal of a portion of NDOT right-of-way. Eight permanent easements along SR-593/Tropicana Avenue and SR-604/Las Vegas Boulevard, for the elevators/escalators and stairways to the pedestrian bridges in Clark County.

Apologize because we had to send you the additional reference materials separately. The original Board Packet had to be amended but it was correct on the agenda and we just had to get you that information and get you a hard copy as well.

This is, as I mentioned last month, the final action for those pedestrian bridges at Tropicana Avenue and Las Vegas Boulevard. Basically to transfer to property at the landings of these escalators and the stairways to the County, to Clark County. We'll all be complete and actually pop the champagne for transferring the pedestrian bridges to Clark County for this last action associated with the pedestrian bridges.

Sandoval: Thank you, Rudy. I actually went on them on Thursday, last Thursday. I will—I have no questions and you know, this is something that I talked about quite often and that I've followed since 2003. I've been a part of that discussion. If there are no questions, I don't want to discourage anybody but I will enthusiastically accept a motion for approval. Before I do, does anyone have any questions or comments on this agenda item?

Hutchison: Only comment, Governor is just, hallelujah, the day has arrived. [laughter]

DRAFT

AMERICAN OVERSIGHT

Sandoval: Yeah. Again, I know there have been a lot of people in the Department that have been involved in getting this done. I hope that no one takes my being a bit factious as being pejorative in any way. I just—I know something like this is a really big deal and takes a really long time. Fifteen years is—I don't think—and actually, I don't lay it on the Department at all. I lay it on other—others. [laughter] In any event, all is well that ends well. Is there a motion for approval of the resolution of relinquishment as presented in Agenda Item No. 6?

Hutchison: Move to approve.

Sandoval: Lieutenant Governor has moved for approval, is there a second?

Valentine: I'll second.

Sandoval: Second by Member Valentine. Any questions or discussion on the motion? All those in favor, please say aye. [ayes around] Those opposed say no. That motion passes unanimously. Thank you everyone who was associated with this. We'll move on to Agenda Item No. 7 which is another Resolution of Relinquishment, Director Malfabon.

Malfabon: Thank you, Governor. This is associated with disposal of a portion of NDOT right-of-way, parcel of land, in the City of Henderson in Clark County. We have a parcel of land associated with North Stephanie Street. It's within the City of Henderson's jurisdiction and the City of Henderson consented, by resolution, passed and adopted on May 15, of this year, to our relinquishment to the City of Henderson. It's just associated with a road that we do not maintain but we own the parcel and we're just transferring it to the City.

Sandoval: Thank you, Director Malfabon. Board Members, any questions with regard to Agenda Item No. 7? If there are none, the Chair will accept a motion for approval of the resolution of relinquishment as presented in Agenda Item No. 7.

Savage: Move to approve.

Sandoval: Member Savage has moved for approval. Member Valentine has seconded the motion. Any questions or discussion on the motion? If there are none, all in favor, say aye. [ayes around] Those opposed, say no. That motion passes unanimously. We'll move on to Agenda Item No. 8 which is a proposed Rescission of Logan G. Hand and Debra Hand Parcel from Condemnation Resolution #464. Director Malfabon.

DRAFT

AMERICAN OVERSIGHT

Malfabon: Thank you, Governor. One of the things associated with the US-50 project is we've continued to refine the design and in this case, we—the redesign changes that we've done for US-50 have resulted in us having to rescind this condemnation resolution because the property—the parcel in question, which lies along the north side of US-50 near Bowers Avenue, east of Onyx Street, we no longer require it. So, we're rescinding the action associated with Logan G. Hand and Debra L. Hand, and basically, if there's any questions about that, we can have Ruth Borrelli respond to those, but we no longer need the property. Therefore, we're rescinding the condemnation resolution previously passed.

Sandoval: Thank you, Director Malfabon. Board Members, any questions with regard to Agenda Item No. 8? Pretty straightforward. If there are none, then the Chair will accept a motion to approve the rescission of the Logan and Debra Hand parcel from Condemnation Resolution #464.

Knecht: So moved.

Sandoval: We have a motion by the Controller. Is there a second?

Valentine: I'll second.

Sandoval: Second by Member Valentine. Any questions or discussion? I hear none. All in favor, say aye. [ayes around] Those opposed, say no. That motion passes unanimously, we'll move on to Agenda Item No. 9, which is another proposed rescission of 303050 LLC and Bowers-USA, LLC, parcels from Condemnation Resolution #467. Director Malfabon.

Malfabon: Thank you, Governor. Similar to the previous item, NDOT redesigned so that we are—instead of building a road that required the acquisition of these portions of these parcels, we're going to be paving two County roads instead to get access to US-50. This affects previous condemnation resolutions approved by the Board for 303050 LLC and Bowers-USA, LLC. If the Board has any questions, we can have Ruth Borrelli, the Chief Right-of-Way Agent respond.

Sandoval: Just a reminder. This doesn't implicate some of the discussion that we had at a prior Board Meeting, where we had individuals who came and presented?

Malfabon: Governor, you might be referring to Mr. [inaudible]. That was associated with the USA Parkway project and we settled on a price for the acquisition of the property associated with USA Parkway. It's in the same area of USA Parkway, for this US-50 Project. Ruth, if you have anything to add?

AMERICAN OVERSIGHT

Borrelli: Ruth Borrelli, Chief Right-of-Way Agent, for the record. Governor, [phonetic] did come and speak to the Transportation Board, several months ago, when we made—when we had the original resolution on the agenda for condemnation, so you may be referring to that. Thank you.

Sandoval: Thank you. I probably should've asked that question in the prior agenda item, but it did—I wasn't sure if it was the same thing, thank you for the clarification. I have no other questions or comments. Board Members, any questions or comments on Agenda Item No. 9? If there are none, the Chair will accept a motion to approve the rescission presented in Agenda Item No. 9 with regard to Condemnation Resolution #467.

Hutchison: Move to approve.

Sandoval: Lieutenant Governor has moved for approval. Is there a second?

Valentine: I'll second.

Sandoval: Second by Member Valentine. Any questions or discussion? I hear none. All in favor, say aye. [ayes around] Those opposed, say no. That motion passes unanimously. Agenda Item No. 10 has been removed from the Agenda. So, we'll move to Agenda Item No. 11 which is the Fiscal Year 2019 Equipment Replacement and Additions Request. Director Malfabon.

Malfabon: Thank you, Governor. District Engineer, Thor Dyson, will present this item to the Board. Just to remind the Board, our equipment line item is approved by the Legislature and we're now on the—just getting ready to enter into the next State Fiscal Year, so we're requesting Board approval early, as we finish FY '18 and are getting ready for '19, so that State Purchasing can proceed in a timely manner with acquisition of this equipment. Thor?

Dyson: Thank you. Thor Dyson, District Engineer. It's a pleasure to be back here. [audio cut] Fiscal Year for 2019 Equipment. As Director Malfabon stated, it certainly has been approved by the Legislature and we're going through process like we did last December for FY '18.

We had Legislative approval. NDOT is required to have the Board review and approve our fleet units that are greater than $50,000. That's the procurement of new equipment is under NRS 408. It states that we'll not procure any equipment which exceeds $50,000 unless we have your approval.

DRAFT

AMERICAN OVERSIGHT

This is right out of the Legislature. NDOT is to replace heavy-duty equipment $7.5 million. That's again, for FY 2019. And, down at the bottom, Construction and Bridge, additional Special Equipment, for $620,000.

Here's the class codes, the number of units, a brief description of the unit and the approximate dollar amount that we put together for $7.5 million. A total of 99 units. This is statewide. This chart, you look at this table, one slide, but there is a tremendous amount of work and a tremendous amount of effort statewide, particularly with the Equipment Division. We've got Mr. Wayne Miller and Jeff Greenblot with us. They're here also to answer any questions, as well. I just want to say, a tremendous effort by the team. Mr. Mike Feese and some other individuals, of course, District 1 and 3 and headquarters with the Director's Office support. This slide right here represents a lot of work.

So, how do we replace our equipment? It's the same way I discussed back in December. We base it on miles and hours, the age, the downtime, the repair and recapitalization costs and then parts and parts availability.

This fiscal year, FY '19, we proposed to replace 4% of the current fleet. Before this replacement, more than 50% of the fleet meets replacement requirements. So, we'll have roughly 45% will meet fleet replacement criteria after this replacement. And, we're holding what we have, we're holding it together. There was a long time where we didn't replace equipment because of the recession and trying to be fiscally responsible and make things do with what we had. We're proud of that effort but now it's time to move forward and start replacing.

Here's a classic Class 12. It's one of—an older truck as you can tell. We've gotten a lot of life out of it. We're trying to replace this type of dump truck, which we use for multiple tasks for snow and ice operations, for hauling dirt and material, dealing with flash floods, debris, lots of debris. We're trying to move towards these Class 13s. Get out of the Class 12s. The Class 13s, they—first off, they have a higher resell value. Second, you can do more with them and you can get a lot out of these Class 13 dump trucks. You'll notice there's a stainless-steel bed on this truck and the reason is because we're out to save money by not painting it and having a stainless steel, we don't have the rust issues as you see on this. Our trucks are in very difficult, arduous environments.

Also, our trucks are going to be painted yellow—or, excuse me, white. This one here was before we decided to move to white. White is cheaper, so we're looking to save money on white trucks.

AMERICAN OVERSIGHT

I showed this last December. Not a lot has changed. This is our analysis for different units. For Class 13 Unit, here we have, this particular one, Unit 829, GMC, it's a 1995 diesel. It has 233,000 miles. It's, you know, 23 years old. The unit qualifies for replacement after 12 years or 200,000 miles. So, rather proud of squeezing every drop of blood out of this unit.

Same thing with the Class 35, front-end loader. Another case study that we have for Unit 2217. It's a frontend loader. I believe I showed this in December of 2017. 1998 diesel, it's got 5,400 miles [sic] and the unit qualifies for replacement after 17 years or 5,000 hours. We've done this analysis, Equipment Division, NDOT Headquarters, as well as the Districts, to justify why we need to replace our units.

Here's a couple of units that represent what we're asking for; a backhoe and a pick-up. You see this slide and you're going, gee Thor, what does this have to do with equipment? This is just debris, trash, picked up off the highway, only in the Reno/Sparks area. I believe it represents under two weeks of debris, probably closer to a week. We're constantly hauling, picking up debris and trash and we need equipment to do that. That's just in the Reno/Sparks area.

Here's—this is called the Fleet Augmentation. A high-speed profile system, six construction lab trailers and the Headquarters Bridge, which was purchased—I believe it's already been purchased, this Headquarters Bridge vehicle. I do want to say that the lab trailers on the last fiscal year, we—it's not—we already purchased those, but somehow in the Legislature write-up, it was written as an augmentation, it's not. It's a replacement. We're strictly replacement the lab trailers. We're not augmenting the lab trailers and I want to be clear and transparent on that. We've done three, this is the next three in FY '19. These trailers are pretty old.

How do we use our fleet and how does this impact how we move forward? Well, we don't like to look backwards. We want to look forwards, right? And, we want to be in the driver's seat looking forward. It's important to us that we stay current with technology. We stay current with, you know, parts availability. Stay current with safety aspects of our equipment. We want to look forward.

Here's how we use some of our current equipment. [plays video] This is on US-50, towards Spooner's Summit, I believe. We're constantly cleaning up, picking up debris.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-001843

Seeing this slide, up above already once. That's the Topaz Flood that we had back in May, May 21st. The equipment, the self-propelled broom below was critical in helping us clean up the debris that you see up above. The reason I say that is, once you remove all the debris, you still have to come back and really broom and sweep the asphalt, the roadway surface because it is slick. We've got the rocks and all the mud off, but there's still like two or three millimeters or even maybe a centimeter of material that can make people be in an unsafe condition.

Here's a shot, we use the drone that we have and you can see, Topaz Lodge, you can see NDOT's equipment. Immediate response. You can see the self-propelled brooms, they're in the lead, 1, 2, 3. Then you see a couple of sweeper trucks which is fine-tuning the sweeping. Then, up front, the water trucks. We have an NDOT truck there and then we have a rented water truck that we use. We just threw everything at it to get this thing opened up as quickly as possible. We're pretty proud of getting to these responses, these disasters as quickly as possible.

[plays video] This is just routine maintenance. We're trying to fix up our ditches. It's not a large project but we have lots and lots of small tiny ones all over the place. This type of equipment visits those areas along with our dump trucks and we're just trying to preserve the infrastructure. That's our main goal. We want to preserve the infrastructure.

[plays video] Same thing. Loader. Around the corner we have a dump truck and we're hauling off debris that slides down the mountain. Trying to keep things clean and stay storm water compliant and out of trouble. Ultimately though, most importantly, keep the public safe.

This was a bad, bad morning, December 19th in particular. It was December 19th. We had four accidents within three and a half hours, from 4:00 AM to 7:30; all on USA Parkway. These accidents were attributed to driver fatigue. NDOT crews responded from several different areas along with emergency crews. It was a pretty chaotic morning. Our equipment gets into these situations, helping out REMSA, NHP, law enforcement, Emergency Services and once things are kind of done, we spend a lot of time cleaning this up. What's not apparent is this was a very cold morning, no snow anywhere but very cold. Lyon County Fire Department had to put this fire out. When they did with all the water, the water froze. So, we had an ice condition.

Our equipment, again, I want to say is in very difficult elements. Difficult scenarios. This is a snow blower. It's over 20 years old. We're getting close to

AMERICAN OVERSIGHT

the last of the life of this thing. Our Equipment Division, I can't say enough about them, how they help us keep this going. I actually have a traveling mechanic with these snow blowers. We're going to need, at some time in the future to look at special request. One that doesn't tap into the replacement equipment but one that comes in for a special need to slowly start pulling out these old snow blowers. Like I said, they're 20 years old and older. That also includes our paint trucks. So, striping trucks. We want to eventually be coming back before the Board at some point to request these high dollar—a snow blower like this, nowadays costs about a million dollars. When you need one, you really need one. There's about 20 feet of snow that came down on this particular avalanche control on Mt. Rose.

Here's our equipment again, out on the rural areas of NDOT highways, just putting down chip seals along with the contractors. We need contractors to help us with chip seals. There's so many that need to be done that we're doing them as well.

So, why is this truck, why is this motor grader here? Again, our equipment is in very difficult situations. This is District 1, SR-774. A couple of years ago, we had a flash flood and we were trying to get some ditch lines established so the water would stay away from the highway and it sank. Talk about an empty feeling. We were able to pull it out with a loader and there was no damage at all, to either the loader or the motor grader. We're constantly in and out of these type of situations, before during and after storms, storm events.

This vehicle was, again, near—around Tonopah, Highway 6. This one broke our heart in the sense that, what was really good, no one got hurt, there was no fatalities, however, this was a brand-new truck that the Board had approved. What happened here was this was in a work zone and there were three cars traveling west. This was a Maintenance Supervisor traveling east. The three cars decided to pass another car in a no-passing zone. Our driver drove off to the shoulder to get out of the way, to avoid serious injury. The third car that was doing the passing westbound, clipped him and pretty much destroyed the truck. That's why we need to replace equipment.

We require—NRS requires that we go through these three bullet points. Purchasing and operating and maintaining the same item of equipment. We look at leasing and operating to maintain the same item of equipment. Then we look at the contracting performance of the work; which have been performed using the

AMERICAN OVERSIGHT

mobile equipment. We justify that, it's in your packet, like last December. We justify the needs to purchase the equipmen.t

It reflects the budget authorization of the Legislature. NRS requires that we have your approval to implement this procurement. After all the hard work and all the analysis that we've done, we recommend the Board approve this procurement as stated in the Staff Report.

I always put a plug in. We're always trying to hire temporary construction aides. We hire them at $12.00 an hour. If anyone wants to come work for us at $12.00 an hour, we're happy to accommodate you for a temporary six-month position. For the winter and permanent positions, maintenance workers, we start out at $14.00 an hour. So, we welcome anybody that has a Class A, CDL License and is drug-free of course, willing to come work for us at $14.00 an hour.

At that point, I'm going to defer to anyone that has questions. Thank you.

Sandoval: Thank you, Thor. I'm going to be in the job market in about six months. [laughter] So, you never know.

Dyson: I've got a job for you.

Sandoval: Okay. Just a couple of questions and just on a lighter note, who is the wonderful young lady whose photograph you have throughout the presentation?

Dyson: Well, they're my three kids. So, the lady driving the car in the beginning, that's my daughter. The other two are my twin boys. I don't know, how serious are we supposed to be at these meetings? [laughter] They're not NDOT employees, no.

Sandoval: Please don't even start to interpret my asking you that, going down that direction. I think it's wonderful and it brightens this up. I really appreciate that. I mean, I want to compliment you on how exhaustive the presentation is, in terms of providing the necessary detail to establish the record for the justification for the purchase of these vehicles. I mean, for all of us who sit as a Board, we know fully well how well maintained this equipment is, how well used it is, how you exhaust all of them to justify the purchase of new equipment. I think the purpose of providing such a detailed presentation is that, in the event anything is questioned later on we have the record to demonstrate that truly, you know, this isn't just replacement equipment for the sake of it. It's replacing equipment that frankly has been extended well beyond its useful life because of the quality of the maintenance that has been done on it through the years. Thank you for that, Thor.

AMERICAN OVERSIGHT

Just finally, I guess it's the old lawyer in me. When there's an at-fault accident by someone besides us, do we seek compensation for the replacement costs of our vehicles?

Dyson: We do.

Sandoval: Perhaps it's a question for Dennis.

Dyson: We do. We work with legal. I'm very familiar with legal and these type of issues. Our equipment is constantly being hit by members of the public for one reason or another. Not only our equipment but as well, our guard rail, barrier rail, hence the need for on-call contracts. Statewide, we fill out a property damage report, say on guide posts, guard rails and we submit that to Legal Division, to the Tort Claims folks. We go after the insurance companies to be made whole and to be compensated. It doesn't come back to my budget or Equipment Division's budget, but it does go back to the Highway Fund and maybe Dennis Gallagher would like to elaborate.

Gallagher: For the record, Dennis Gallagher, Counsel to the Board. Thor described the process pretty thoroughly. Generally, if there's insurance, we're very successful in recovering. There are the rare occasions where the driver involved in damaging state property is not insured. We pursue them up to a point, where we make the call, whether or not it's economically feasible.

Sandoval: All right, thank you. That's all I have. Board Members, any questions with regard to Agenda Item No. 11?

Hutchison: I've got one.

Sandoval: Mr. Lieutenant Governor.

Hutchison: Thank you. Can I just get a clarification on one of the fleet replacement items. That's miscellaneous trucks. And again, thank you for the presentation. I echo what the Governor said. We know these are justified but I think for the record in terms of just, what are we talking about here with—it looks like it's Class Code 11, Miscellaneous, 20 units, miscellaneous trucks. Is there a reason we can't itemize that out, in terms of what trucks they are? And it looks like it's about an average of about $75,000 a piece, if I'm doing my math right.

Dyson: So, some of these—if you look in the packet, miscellaneous trucks 11—

Hutchison: Right.

AMERICAN OVERSIGHT

Dyson: We've got aerial lift trucks, we've got [inaudible], compactor trucks, lube trucks, half-ton dump trucks, service trucks. It's a variety of equipment. Attenuator type trucks, swap loaders, single axles, flat beds. It would make this thing a lot longer. So, they fit a category in the Class 11. We could break it out if that's what you really want.

Hutchison: No, I just wanted to for the record, you can identify and itemize what we're talking about in those miscellaneous trucks. I prefer that it be compacted, like it is now, but I just thought it was important for the record.

Now, are we—one of the points that was made here in Page 2 of our packet is, the goal is to replace the fleet before they require regular major maintenance. It seems like, just probably because of the recession and our efforts to really try to maximize the mileage on these things, we may not be getting the maximum resell or we may not be replacing these really before they're in need of major maintenance, is that right?

Dyson: That's correct. We will do what we need to do as directed. If we need to hang on to the vehicle and maintain it and keep maintaining it, we'll do that, but if it's more prudent and we have direction to replace sooner, rather than later, so we can recoup some costs, we're happy to do that as well, Lieutenant Governor.

Hutchison: Thank you. No, I know you've been working hard with the budgets you've had over the last eight years or so and some of that budget was during a very difficult time economically for the State, I know that was a reason for it. I think we leave it to the best judgment of the professionals in terms of whether or not it makes sense to replace these earlier than we are, now that we're in a position maybe where we can do that. If we're going to save a lot of money on major maintenance, versus getting every drop we can out of these vehicles and extending the mileage beyond where we otherwise may want to extend them. I think in a lot of ways, we rely on your professional judgment and just kind of conditions on the ground.

Dyson: Thank you, appreciate that. Lieutenant Governor, back to your first question. In your Attachment C, it has it all broken down on Class 11. Every Class 11, what they are, a description.

Hutchison: Thank you. Thank you, Governor.

Sandoval: All right. Mr. Controller.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-001848

Knecht: Thank you Governor. Mr. Dyson, thank you for a very good report. You have a lovely family and if I were you, I'd feature them too. In fact, I do that with my wife and daughter. My question is, we've got all these graphs in here, bar charts and a line for Unit 0829; that's the fourth page of the presentation or the packet we got and a bunch of others like that. As I read those graphs, the bars are amounts spent per year over the last 19 fiscal years for each of those classes of equipment, is that right?

Dyson: Yes, that's correct.

Knecht: Okay. So that would include purchase, maintenance, etc., for example, for Unit 0829?

Dyson: I don't know about the purchase, but I think it does include the maintenance that we've accrued for that year.

Knecht: Okay. Is the dotted line, is that a statistical best-fit line to those bars, is that what that is?

Dyson: Yes.

Knecht: And, what do we use that for? I'm wondering what the value is of that measurement, that statistical best-fit, what do we use that for?

Dyson: Well, it's straight line projection of the costs that should be occurring on an annual basis, as you go in age of the vehicle. Outside of that, it's kind of shock and awe, right? Some of it's—some years you don't have anything and some years you have a big dollar amount.

Knecht: Yeah.

Dyson: It could be a variety of things, what's going on. It could be new engine. It could be something critical that was expensive.

Knecht: Many of them, for FY '03, FY '06 and FY '15 have a large amount and much lower amounts for many other years. You find those straight line projections to be useful, despite some cases the low [inaudible]? You can take account of that and you just look basically for a wide range around the expected value?

Dyson: Yeah, it's kind of—we want to be on that line, but we're not. And, things happen. Sometimes you get a lemon. Sometimes, you know, you got 10 trucks, same

AMERICAN OVERSIGHT

manufacturer, same spec and one of them was built on a Monday after the Detroit Lyons got beat, right. So, you're running that risk in the lemon factor. [laughter]

Knecht: Okay. I appreciate that explanation. Good work you all do and thank you.

Dyson: Sure, no problem.

Knecht: Thank you Governor.

Sandoval: Thank you. Any other questions from Board Members with regard to Agenda Item No. 11?

Savage: Governor, just one quick comment, if I could.

Sandoval: Of course.

Savage: Thank you Governor. Again, my compliments, Thor, to you, Mike, Wayne and Jeff; District 2, Equipment Division and District 1 and District 3. The Department is very conservative, I think on replacement of equipment. I think this is well justified. There was a wealth of information in the packet here. You did your cost analysis on straight buy-out versus lease versus contracting out. Again, those are very, very informative. I'm grateful for everyone being conservative because it is difficult to buy new equipment. If we don't have the equipment, we can't get the job done.

I support this agenda item and I do think we need to seriously look at—I was fortunate to ride in a Mount Rose Snowblower. Thor, you said it was 20 years. I thought it was 1940 vintage. [laughter] Those guys—there's a traveling mechanic, and it was not as nice as this tempered boardroom by any means. Quite the experience. Very dedicated employees and the job got done. I think we need to seriously look at some of the major equipment, even though it's a hard pill to swallow. We have to be prepared. Thank you Thor and I thank the men and women of the Department.

Dyson: Thank you, Mr. Savage. I do want to say on some of these larger pieces of equipment, the stripers and the snowblowers, I think we need to take a look, seriously and maybe do another analysis on these. We haven't done it in a while for these large pieces of equipment, maybe we should lease. I don't know if that's the right answer, but an analysis should be looked at. They're very expensive, large complicated finicky pieces of equipment and that could be something that we could consider later.

AMERICAN OVERSIGHT

Sandoval: Thank you. Any other questions or comments?

Almberg: Governor, I've got—

Sandoval: I just wanted—oh, go ahead, Mr. Almberg.

Almberg: I got one question real fast. On the construction lab trailers, we have three lab trailers for $540,000. Are those lab trailers equipped with new lab equipment?

Dyson: No.

Almberg: A lab trailer is that—is $180,000, that just seems very costly.

Dyson: They move around. They're all plumbed out for running lots of lab testing equipment. They get moved around to various sites throughout the entire state. They've got to be able to be air conditioned. They've got to have the ability to sustain difficult environments where the construction activity is and we want to keep them for a long time.

Malfabon: It's really the customization of the ventilation system and the power and some of the gas for the propane tanks, or portable units. They do a lot of testing and specialized equipment has to go on special cabinets and it's a lot of specialization needed for the new retrofit of that trailer.

Almberg: Sure.

Dyson: And we want them to be secure and stout as well, so we don't—they're out in the middle of nowhere, with lots of expensive equipment. We want them to be able to survive any vandalism and that type of thing.

Almberg: Sure. No, I mean, I just, it is higher than I would anticipate and I was hoping, I guess, that there was some lab equipment inside of it. I guess one last comment, just based on your pictures with the unfortunate of one of our vehicles on its side, during there—I'm just going to go back and take the opportunity to come in and respond that, I think that that is the exact reason why I am always going for on our rural highways, our needs for passing lanes and everything else because people get very impatient sitting in line behind construction equipment or just long lines of freight vehicles. I think it's very important that we continue to look at that. That's all for me, Governor, thank you.

Sandoval: Thank you, Member Almberg. I just wanted to comment on or build on something Len had talked about in terms of, you know, we're sitting here in our

AMERICAN OVERSIGHT

nice climate controlled environment and we shouldn't feel timid or hesitant about approving this equipment at all because, as part of this presentation, these are some of the most extreme conditions possible and at the end of the day, it's about public safety and making sure that people are able to get home in a safe way. When they're taking their kids—as Thor has included his family in here and as you look through some of these photographs with regard to falling rock and floods and fires and snow and some of the most extreme conditions that you can have in one state from the snow to the heat down here. We have to have, for the safety of the men and women of the Department as well as the traveling public, the best that we can offer.

I feel really good about this presentation and what you have here Thor. Again, I want to thank you and everyone in the Department that was responsible for presenting this. It truly is as detailed as it gets. I won't be around to approve those new snowblowers, but hopefully we'll get into the 70s instead of the 40s, right Len?

All right, if there are no further questions or presentation, Thor, anything else you wanted to add?

Dyson: It's just a team effort. A lot of folks at NDOT involved on this. It was a team effort.

Sandoval: All right. Well, hail to the team. All right. So, if there are no further questions or comments, the Chair will accept a motion for approval of the FY 2019 Equipment Replacement and Additions Request as presented in Agenda Item No. 11.

Savage: Move to approve.

Valentine: Second.

Sandoval: Member Valentine has moved for approval. Member Savage has seconded the motion. Any questions or discussion or the motion? If there are none the Chair—or, all those in favor, say aye. [ayes around] Those opposed say no. Okay, that motion passes unanimously. Thank you Thor.

Dyson: Thank you Governor and thank you Transportation Board, appreciate it.

Sandoval: We'll move to Agenda Item No. 12, Old Business. Mr. Director.

Malfabon: Thank you Governor. You have a lot of updates and reports to review. I'll just be very brief and go over them quickly.

DRAFT

AMERICAN OVERSIGHT

Project NEON, as was noted, there's a significant amount of construction going on, significant impacts to travelers on I-15, but we really don't receive as many complaints, I think because the people are seeing such a large amount of construction going on throughout that corridor for the NEON footprint. It is amazing to see how many lanes that we're going to have when it's finally finished in the middle of next year. We're just a little bit over a year away from substantial completion. The Main Event is going well. Kiewit is doing a great job.

The Spaghetti Bowl Quarterly Update. We are looking for November 2018 Public Meetings. As Cole had mentioned previously, we're really zeroing in on the preferred alternative so we don't have to spend a lot more effort environmentally on the other alternatives that don't make sense; either financially or scope wise.

The I-11, as mentioned previously, our Phase 1 is complete by Fisher Sand and Gravel. RTC is having their event August 9th for Phase 2, so we're really looking forward to opening that road and having more efficient movement of freight and motorists along that new Route I-11. The second route of public meetings will occur for the rest of the State in identifying those corridor alternatives and what makes sense. They'll have that second round of meetings in those five venues again; from Vegas all the way up to the Reno/Sparks area. July and August is when we'll have that second round of public meetings and get input. We'll give a final presentation to the Board.

The Pedestrian Safety. We had previously had the award approved by the Board for Kietzke and the Boulder Highway Pedestrian Safety Projects. There is a note mentioned in the update about a project on Lake Mead. We were looking at a Complete Street approach on Lake Mead in North Las Vegas. Due to scope creep, it really was getting out of hand as far as some of the reconstruction needed of the roadway that wasn't originally anticipated. Due to the type of road it is, if you looked at a cross-section of the road, it was—where the new curb, gutter and sidewalk would've gone, it would require a lot of reconstruction of the road that wasn't anticipate in the engineer's estimated. We had to rethink that and we're going to proceed with the pedestrian safety improvements. The Complete Street idea was just not penciling out on Lake Mead Boulevard in North Las Vegas. I think it was the right decision to move forward with the pedestrian safety and crossing improvements on that project. A lot of other good work has been taking place on our pedestrian safety program throughout the State.

AMERICAN OVERSIGHT

Dave Gaskin will give a presentation on Item E shortly.

On the Shared Radio System Update, negotiations are continuing this summer. We expect them to be complete in late August. Eventually, Transportation Board approval and IFC approval. The Legislature wanted to see the actual negotiated costs of the shared radio system update.

Freeway Service Patrol. There's a very comprehensive report there. The Board had previously authorized the award of the Freeway Service Patrol contracts in Washoe County and Clark County. Really, a lot of good information about clearance times and performance measures associated with this very effective program. Very well received program by the public and much appreciated by the public.

Dennis Gallagher can respond to any questions about Outside Counsel Costs and Monthly Litigation Report.

Good news on the Fatality Report. We're receiving that again, in a lot better format. Fatalities—I recently received the June 6th report and we have five less than this time last year. Pedestrians down 32% in Clark County, as far as fatalities. So, great news there. 36% lower statewide. These are just tremendous achievements by our safety group and our other partners, law enforcement, educators and emergency medical responders to achieve these types of improvements in pedestrian safety. And, motorcyclists, 28% less fatalities in Clark County and 15% total statewide. These are emphasis areas in our Strategic Highway Safety Program. Just hats off to our safety folks in their efforts and dedication to saving lives on our streets and highways in Nevada.

With that, Governor, I'm going to have Dave Gaskin give a presentation on the Stormwater Program Quarterly Report. Then, if there's any questions for Dennis or any of us, the Director's Office will respond to the Board's questions. Dave.

Gaskin: Thank you, Rudy. Good morning Governor and Members of the Board. Dave Gaskin, Deputy Director. Brief update on the Stormwater Program. This has been kind of a meeting of milestones and I have a few milestones of my own for you.

First one is a significant milestone but not a very positive one. We've been working on getting our stormwater permit from NDEP for the past three years. It's taking a long time. We hope that it will finally go out to public comment this week. That would mean that we'll hopefully have our renewed permit by some

AMERICAN OVERSIGHT

time next month in July. It's been a long time coming but hopefully we'll get there.

More positive note, we had our—what EPA was calling our Final Quarterly Compliance Meeting with them on the consent decree. We met down in Las Vegas. They wanted to see some of the activities and NDOT systems down in Southern Nevada. They were very interested. I want to thank Mary and Mario and Mike—the folks down there for helping set everything up. It was a very positive meeting. Ellen Blake, the head EPA point for the consent decree said during the meeting that NDOT now has one of the best programs in the nation. So, I was pleased to hear that.

Just progress on the consent decree. On June 1st, another milestone. We sent in the last two submittals under the consent decree on our UAV monitoring sites and the supplemental environmental project on our real=time monitoring. So, at this point, we have met or exceeded every requirement or deadline that was contained in the consent decree. Last week, June 7th, we submitted our termination request which was the final step in the process on our end. At this point, the parties, being EPA, NDOT and NDEP will confer informally and if things are all agreed to, which all the parties indicate they are then EPA will send for the Court's approval a joint stipulation terminating the consent decree. EPA said at our meeting in Vegas, they saw no reason why that shouldn't proceed in a quick fashion. We're hopeful about that. That's a major milestone.

I really wanted to thank everyone. When I came to NDOT, I didn't know what to expect, but starting with you Governor, setting up the support for this whole program and through Rudy and Bill, we had some very fiery and colorful meetings with Mishon and Joe Reynolds at the Capital and it's really come along way. With Dennis's help. But really, I didn't know what to expect from NDOT coming from the outside, but the reception that I've gotten from the front office and especially Tracy and the District Engineers; we really couldn't have done it without all of their help. I saw Mario sitting down there. I see Mike [inaudible] here today with Thor. It's just been excellent support and everybody is really helped move us along. Of course, with the Stormwater Division, hired some excellent folks that have really made it work. So, wanted to thank everybody.

We'll still wait a word on the termination request. It has to go through the Court, but we'll keep you updated.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-001855

In that final meeting down in Las Vegas, we met at the District 1 Maintenance Station. Had a very good discussion on how things were going. Mary, I wanted to thank, I know she's not present today but she gave a great presentation on the homeless situation. Thor has been of great assistance on that topic as well. We started at the Maintenance Station and went over to Project NEON. Dale Keller gave an excellent overview of the project but on the way, we went down F Street, underneath I-15, through this very long and dark overpass and it was just full of homeless. It was dark and they're walking like zombies around in there. I was looking, trying to find the door lock to make sure we could get through there in one piece but get through. It was scary. All around our District 1 Office, there's homeless all over. So, it's quite a topic. It's a big challenge for NDOT.

We looked at some other things at the Maintenance Yard. A lot of improvements that are being planned there from a stormwater perspective and in terms of an improved vehicle wash station and treatment system to treat the collected water. I think most of you have been there but it's got quite a gradient to it. It really slants off to the north and a lot of water flows through there. Just on the maintenance yard, there's a lot of activity.

As I mentioned, Dale gave a nice overview. Then we went to visit Project NEON, got a good view of that. It was very impressive. EPA was really amazed by everything being right in the middle of town, in the middle of everything, all this construction going on. It's pretty impressive.

As I mentioned, the homeless. You don't normally think of that being a stormwater issue but they are a lot of water quality impacts from the homeless being in the stormwater conveyances. They're very convenient places to get out of the sun and the heat and get out of the spotlight. They can't have a lot of water quality issues with biohazards and trash and other things. Big issue that—not just us, but EPA asked in particular to have us talk a bit about what we're doing because they recognize that as a national issue. NDOT is taking some leading edge action in dealing with that. There's no easy answer but there's a lot of mitigating measures that we can do.

We did visit our Continuous Real-Time Monitoring System which is out on East Vegas Valley Drive where the Sloan Channel meets Las Vegas Wash. EPA was very impressed with that. What that does is, stormwater is difficult to get samples of because it comes and it goes and by the time you get out there, it's hard to catch that flush of water. Usually the first flush is the worse quality water. We

AMERICAN OVERSIGHT

have some systems that can give it real-time—collect it real-time and transmit it out to everyone real-time on the internet.

One thing we've been talking about is we have some of these systems, the other jurisdictions have some. Some for water quality, some for flood control. So, why not work together and share our information. So, we are making a big push and something we've been talking with Tracy about is sharing data and sharing this so we can all appreciate the benefit of the work that we're doing.

The two last submittals under the consent decree involved our drone work with stormwater basins. Finding out what type of information we could get using these unmanned vehicles. It's been quite interesting. We've learned a lot about what we can do and what we can't do. EPA was quite impressed with that.

They also requested to visit the Clark County Wetlands Park, which hopefully all of you have been to down in the Las Vegas Wash. It's very impressive with lots of bike paths, lots of interpretative features. They have a whole museum that talks about water issues in the Las Vegas Valley. We have been working with them on some displays and helping them with their public outreach and education efforts.

Governor, you remember you were at the April 3rd partnering meeting with the Nevada Water Innovation Campus in Reno. The Governor was given a prestigious award for Public Official of the Year. He has been nominated for a national award in a similar manner and we hope to hear this month whether he will get that award. There were very many—all the top State Water Officials from the State, Northern Nevada, Southern Nevada were there and they were all very appreciative of the forum and the venue and really appreciated the comments from the Governor which were really from his heart, really spoke to all his work that he's done in improving the water environment of Nevada. So, congratulations again, Governor.

Stormwater Group has been very busy and NDOT in general, spreading the word for our Stormwater Division. Cliff Lawson spoke at the Nevada Transportation Conference. And, Krista Shamura has been involved in having a booth and sharing information at a lot of events like the GreenFest. I gave a talk at the American Public Works Association. Cliff again went to Texas to have a big meeting on the—with Agile Assets, just talking about our EAMS Project, the Enterprise Asset Management System, which is a big thing nationwide. Not just stormwater, but all aspects of transportation systems, tracking and managing your

AMERICAN OVERSIGHT

assets and being much more efficient in what you do and making sure those different management systems talk to each other. It's very important.

Part of the consent decree as the EPA expressed early on and their pleased with the progress we're making. So, appreciate our IT folks keeping up on that.

I don't have any pictures of my family, but can we make picture—maybe—maybe not, okay. That was just a picture of the Stormwater Group and Rudy. So, I got the work family. I got the work family, not the home family. That concludes my presentation and thank you very much. If you have any questions, I'd be glad to answer them.

Sandoval: Thank you Dave. I guess I'll start with the EPA and this consent decree. This is a red-letter day for the Department and for you, in terms of the amount of effort and investment we've made into getting this done. We've taken something that was maybe even over the [inaudible] in terms of the fines that we were looking at and the administrative action that could've been taken against the State and really taken it 180 degrees and brought it into a position, in a very short amount of time, where as you said, we're going to have this request. It's nothing short of remarkable. I want to thank you for your leadership and everybody else that's been associated with this. As I listened to you and thought about all this, at the end of the day, what it's about is the best quality water possible for everybody in the State. That's how you finish this, clean water for future generations. We've seen in some of our sister states where they've had some pretty extreme issues where the very essence of life, water, has been put at risk. We can be proud of the fact that with at least the water that we have control over and a fact that we are doing everything that we possibly can in terms of ensuring that it's treated properly and that it's kept as clean as possible.

This homeless situation is one that it is difficult statewide. Obviously, it's something that has to be addressed, but also I hope and I assume we're doing it with dignity and you know, treating these individuals with respect, that they deserve. We don't know why they're in that situation but we have to ensure that we provide them with the resources so that they can be successful. I know that we're doing that.

In any event—then finally, with the award, I really appreciate that, Dave. I may have commented on this in previous meetings. It really is a team effort. You know, it's just something that is really shared by everybody, by this Board. I know this Board has been absolutely committed to quality water and treating it

AMERICAN OVERSIGHT
NV-DA-20-0615-A-001858

properly and all the things I just described, everybody within the Department that's been working on this. Certainly, it's something that I share—in fact, I don't feel deserving. I think it's more deserving of all of you that have been really on the front lines in making sure that everything is happening that needs to be happening. Thank you for that.

Those are all the questions and comments I have. Board Members, any other questions with regard to Agenda Item 12E, or Mr. Lieutenant Governor.

Hutchison: Thank you. Mr. Gallagher, just quickly on the Outside Counsel contracts. Just underscoring what we talked about earlier with Nassiri. We've got total contracting authority of $1,032,000. We've got $341 left which means we've spent, $1,032,000 of that litigation. I know we all want to try to recover what we can of those attorney's fees back to the extent we can push that and get as much as we possibly can back, it would benefit, obviously the State.

My question is, I see that we've got, it looks like three new eminent domain cases related to US-50. Do we anticipate retaining outside counsel for those, Dennis and what's the status? I assume we're just getting started.

Gallagher: For the record, Dennis Gallagher, Counsel to the Board. Lieutenant Governor, those will be handled by the Attorney General's Office. You are correct, those cases were just recently filed within the past month.

Hutchison: Great.

Gallagher: The projection is for all of the cases for the Highway 50 Project and other cases for the foreseeable future will all be handled internally.

Hutchison: That's great news and great work. Dennis, as you know, that's something that I think we've been working towards and if we can do that in-house then it obviously saves the State money and you've done a great job managing these cases so far. I've got great confidence that the Attorney General's Office will competently and professionally handles these cases as they have in the past. Thank you very much. Thank you, Governor.

Sandoval: Thank you, Mr. Lieutenant Governor. Member Valentine?

Valentine: I would just like to say, congratulations on getting out from under the consent decree. That's about as successful a story as I've heard. Nicely done.

AMERICAN OVERSIGHT

Sandoval: Thank you. Questions or comments from Northern Nevada? On any of the items within Agenda Item 12. All right. We'll move to Agenda Item 13, is there any public comment from Las Vegas? I hear and see none. Any public comment from Northern Nevada?

Malfabon: Nobody is approaching the podium Governor, so it looks like none.

Sandoval: Thank you. Agenda Item No. 14, is there a motion to adjourn?

Hutchison: Move to adjourn.

Sandoval: Lieutenant Governor has moved. Is there a second?

Valentine: Second.

Sandoval: Second by Member Valentine. All in favor, say aye. [ayes around] Those opposed, say no. That motion passes. This meeting is adjourned. Thank you, ladies and gentlemen, have a wonderful week.

MEMORANDUM

June 29, 2018

TO: **Department of Transportation Board of Directors**
FROM: **Rudy Malfabon, Director**
SUBJECT: **July 9, 2018 Transportation Board of Directors Meeting**
Item #6: **Approval of Contracts Over $5,000,000 – For Possible Action**

Summary:

The purpose of this item is to present to the Board a list of construction contracts which are over $5,000,000 for discussion and approval.

Background:

The Department contracts for services relating to the construction, operation and maintenance of the State's multi-modal transportation system. Contracts listed in this item are all low-bid (or guaranteed maximum price for Construction Manager at Risk (CMAR) contracts) per statute.

The attached construction contracts constitute all contracts over $5,000,000 for which the bids were opened and the analysis completed by the Bid Review and Analysis Team and the Contract Compliance section of the Department from May 16, 2018, through June 20, 2018.

Analysis:

These contracts have been prepared following the Code of Federal Regulations, Nevada Revised Statutes, Nevada Administrative Code, State Administrative Manual, and/or Department policies and procedures.

List of Attachments:

A) State of Nevada Department of Transportation Contracts for Approval, May 16, 2018, through June 20, 2018.

Recommendation for Board Action:

Approval of the contracts listed on Attachment A.

Prepared by: Administrative Services Division

MEMORANDUM
Administrative Services

May 29, 2018

To: Rudy Malfabon, Director
Cole Mortensen, Assistant Director, Engineering
Reid Kaiser, Assistant Director, Operations

From: Tianne Simpson, Contract Services Manager – Administrative Services

Subject: Concurrence in Award for Contract No. 3716, Project No. NHP-160-1(028), SR 160, Blue Diamond Road, from the west edge of Mountain Springs Community to the beginning of mountainous area SR 160 Blue Diamond Road, and from 1.03 miles north of Mountain Springs Summit to the Clark County/Nye County Line, in Clark and Nye Counties, described as roadbed modification, cold mill, and place plantmix bituminous surface with open grade. The Engineer's Estimate is $65,330,045.23.

This memo is to confirm concurrence in award of the subject contract.

Bid proposals were opened on May 10, 2018. Aggregate Industries SWR, Inc. is the apparent low bidder at $58,561,165.00 and they submitted a properly executed proposal, bid bond and anti-collusion affidavit. The second low bidder is Fisher Sand & Gravel Co. with a bid of $60,500,000.00.

The project is Federally funded, required 5.60% DBE participation, and is not subject to State Bidder Preference provisions.

The subcontractor and supplier listings submitted by the Aggregate Industries SWR, Inc. have been reviewed and confirmed by Contract Services. The DBE information submitted by the Aggregate Industries SWR, Inc. has been reviewed and certified by the External Civil Rights office. Aggregate Industries SWR, Inc. has met the required DBE participation with a 6.27% commitment. The bid is below the Engineer's Estimate Range, and a copy of the Unofficial Bid Results report is attached for your reference. The BRAT Co-Chairs have provided their recommendation to award, and the report is attached.

Your concurrence in award of this contract by endorsement hereon is respectfully requested. Upon receipt a packet will be prepared to obtain Transportation Board approval of the award at the next available meeting.

MEMORANDUM

Contract Compliance

May 23, 2018

To: Rachell Bennett, Administrative Services Officer II

From: Teri Lewis, DBE/Title VI Assistant Manager DS

Subject: NDOT Bidder DBE Information – Contract no. 3716, SR 160, Blue Diamond Road, from the west edge of Mountain Springs Community to the beginning of mountainous area SR 160 Blue Diamond Road, and from 1.03 Miles North of Mountain Springs Summit to the Clark County / Nye County Line, in Clark; Nye County, for roadbed modification, cold mill, and place plantmix bituminous surface with open grade

Apparent low bid: $58,561,165.00

The DBE information for Nevada Barricade & Sign Company, Inc., C and S Company, Inc., The Barajas Group, and Wildhorse Investments submitted by the apparent low bidder, Aggregate Industries SWR, Inc. has been received by Contract Compliance and we have concluded:

Nevada Barricade & Sign Company, Inc., C and S Company, Inc., The Barajas Group, and Wildhorse Investments hold active State of Nevada business licenses and are Nevada certified DBE firms. Additionally, Nevada Barricade & Sign Company, Inc., C and S Company, Inc., and Wildhorse Investments hold active Nevada State Contractors Board licenses. All firms are clear of State disqualification and Federal exclusion.

The DBE goal of 5.60% has been met with a 6.27% DBE committed participation by the apparent low bidder Aggregate Industries SWR, Inc.

The DBE firms are approved for this contract.

MEMORANDUM
Administrative Services

May 24, 2018

To: **Lynn Hoffman, ASO III - Administrative Services**

From: **Bid Review and Analysis Team**

Subject: **BRAT Summary Report for Contract # 3716**

The Bid Review and Analysis Team (BRAT) met on May 23, 2018 to discuss bids for the above referenced contract. The following were in attendance:

Sharon Foerschler, Chief Construction Engineer
Scott Hein, Chief Roadway Design Engineer
Rachel Bennett, Admin Services Officer
Mark Caffaratti, Professional Engineer
Casey Connor, Professional Engineer
Billy Ezell, Associate Engineer
Brian Deal, Associate Engineer
Lynn Hoffman, Admin Services Officer
Shawn Howerton, Professional Engineer
Shawn Paterson, Professional Engineer
Tianne Simpson, Management Analyst
Sonia Jacinto-Acosta, PSI

Via Phone:
Jeffrey Freeman, Professional Engineer
Kevin Maxwell, Professional Engineer

The overall bid proposal was evaluated and determined to be acceptable. The Bib Tabulation and Price Sensitivity is attached.

The apparent low bidder, Aggregate Industries SWR, Inc., submitted a bid which is 90% of the Engineer's Estimate. The BRAT recommends award of this contract.

MEMORANDUM
Administrative Services

June 19, 2018

To: Rudy Malfabon, Director
Cole Mortensen, Assistant Director, Engineering
William Hoffman, Deputy Director

From: Tianne Simpson, Contract Services Manager – Administrative Services DS TS

Subject: Concurrence in Award for Contract No. 3722, Project No. SP-000M(047), SR 156, Lee Canyon Road, from Ski Run to US 95, and SR 157, Kyle Canyon Road, from the trailing edge of B-609 to SR 158, Deer Creek Road, Clark County, described as cold milling and plantmix bituminous surface with open grade. The Engineer's Estimate is $5,842,198.13.

This memo is to confirm concurrence in award of the subject contract.

Bid proposals were opened on June 7, 2018. Aggregate Industries SWR, Inc. is the apparent low bidder at $5,759,759.00. and they submitted a properly executed proposal, bid bond and anti-collusion affidavit. The second low bidder is Road and Highway Builders LLC with a bid of $6,393,393.00.

The project is State funded; required 2.10% DBE participation; and Bidder's Preference was applied but did not affect the successful contractor's ranking.

The subcontractor and supplier listings submitted by the Aggregate Industries SWR, Inc. have been reviewed and confirmed by Contract Services. The DBE information submitted by the Aggregate Industries SWR, Inc. has been reviewed and certified by the External Civil Rights office. Aggregate Industries SWR, Inc. has met the required DBE participation with a 2.67% commitment. The bid is within the Engineer's Estimate Range, and a copy of the Unofficial Bid Results report is attached for your reference. The BRAT Chair has provided his recommendation to award, and the report is attached.

Your concurrence in award of this contract by endorsement hereon is respectfully requested. Upon receipt a packet will be prepared to obtain Transportation Board approval of the award at the next available meeting.

Concurrence in award:

MEMORANDUM

Contract Compliance

June 14, 2018

To: Rachel Bennett, Administrative Services Officer II

From: Paulita De La Cruz/DBE Specialist DocuSigned by: 9A647C8047694B9...

Subject: NDOT Bidder DBE Information – Contract No. 3722 - SR 156, Lee Canyon Road, from Ski Run to US 95 and SR 157, Kyle Canyon Road, from the trailing edge of B-609 to SR 158, Deer Creek Road in Clark County for cold milling and plantmix bituminous surface with open grade

Apparent low bid: $5,759,759.00

The DBE information for C and S Company Inc. submitted by the apparent low bidder, Aggregate Industries SWR, Inc. has been received by Contract Compliance and we have concluded:

C and S Company Inc. holds an active State of Nevada business license, an active Nevada State Contractors Board license and is a Nevada certified DBE firm. C and S Company Inc. is clear of State disqualification and Federal exclusion.

The DBE goal of 2.10% has been met with a 2.67% DBE committed participation by the apparent low bidder Aggregate Industries SWR.

The DBE firm is approved for this contract.

MEMORANDUM
Administrative Services

June 14, 2018

To: **Lynn Hoffman, ASO III - Administrative Services**

From: **Bid Review and Analysis Team**

Subject: **BRAT Summary Report for Contract # 3722**

The Bid Review and Analysis Team (BRAT) met on June 14, 2018 to discuss bids for the above referenced contract. The following were in attendance:

Scott Hein, Chief Roadway Design Engineer
Robert Bratzler, Associate Engineer
Shawn Howerton, Professional Engineer
Jeff Johnson, Associate Engineer
Shawn Paterson, Professional Engineer
Tianne Simpson, Management Analyst

Via Phone:
Samih Alhwayek, Professional Engineer
Nate Enos, Associate Engineer

The overall bid proposal was evaluated and determined to be acceptable. The Bid Tabulation and Price Sensitivity is attached.

The apparent low bidder, Aggregate Industries SWR, submitted a bid which is 99% of the Engineer's Estimate. The BRAT recommends award of this contract.

MEMORANDUM

June 29, 2018

TO: **Department of Transportation Board of Directors**
FROM: **Rudy Malfabon, Director**
SUBJECT: **July 9, 2018, Transportation Board of Directors Meeting**
Item #7: **Approval of Agreements Over $300,000 - For Possible Action**

Summary:

The purpose of this item is to provide the Board a list of agreements over $300,000 for discussion and approval following the process approved at the July 11, 2011 Transportation Board meeting. This list consists of any design build contracts and all agreements (and amendments) for non-construction matters, such as consultants, service providers, etc. that obligate total funds of over $300,000, during the period from May 16, 2018, through June 12, 2018.

Background:

The Department contracts for services relating to the development, construction, operation and maintenance of the State's multi-modal transportation system. The attached agreements constitute new agreements and amendments which take the total agreement above $300,000 during the period from May 16, 2018, through June 12, 2018.

Analysis:

These agreements have been prepared following the Code of Federal Regulations, Nevada Revised Statutes, Nevada Administrative Code, State Administrative Manual, and/or Department policies and procedures. They represent the necessary support services needed to deliver the State of Nevada's multi-modal transportation system.

List of Attachments:

A) State of Nevada Department of Transportation Agreements for Approval, May 16, 2018, through June 12, 2018.

Recommendation for Board Action:

Approval of all agreements listed on Attachment A

Prepared by: Administrative Services Division

MEMORANDUM

District II

April 13, 2018

To: Thor Dyson, P.E., District Engineer

From: Marlene Revera, District Agreement Liaison

Subject: Approval Request for Service Provider Agreement P612-17-201

District II requests authorization to enter into a Service Provider Agreement with Boschung America, LLC. Boschung America, LLC is the only North American authorized provider of Boschung technology and parts providing factory trained engineering, installation expertise, commissioning, testing and service of Boschung products.

The Boschung Fast systems are located at:

- Browns Creek-I-580 at MP 9.51
- Galena Creek-I-580 at MP 10.28
- Steamboat Hills-I-580 at MP 13.28
- Galena Forest-I-580 at MP 14.3

The cost of the agreement will be $500,000.00 for a two-year agreement. Funds are available in the District II Cat 04 budget.

Approval of this memo by the District Engineer authorizes the request to solicit the services.

MEMORANDUM

May 29, 2018

TO: Tracy Larkin-Thomason, Assistant Director

FROM: Steve Cordle, Project Manager

SUBJECT: Negotiation Summary for Sole Source Agreement P612-17-201 Boschung System

---

A negotiation meeting was held at District II in Reno on April 18, 2018, with SERVICE PROVIDER MEMBER Chris Vitek and DEPARTMENT MEMBERS Steve Cordle and Marlene Revera of the Nevada Department of Transportation (DEPARTMENT) in attendance.

The DBE goal for this agreement has been established at Zero percent (0%).

This duration of this agreement will be two (2) years, ending on July 31, 2020.

The scope of services that are to be provided by the SERVICE PROVIDER was reaffirmed by both parties at the outset.

(INSERT OR ATTACH THE SCOPE OF SERVICES IF APPLICABLE)

The following schedule was agreed to by both parties:

Completion Date: July 31, 2020. To update the Boschung System, test software, switch chemicals and ensure the systems are running correctly.

Key personnel dedicated to this project are as follows:

Name	Title
Michael Fuess	ADE Maintenance
Brad Burge	Maintenance Manager
Troy Hammond	Highway Maintenance Supervisor II
Steve Cordle	Project Manager
Dane Rice	Highway Maintenance Worker IV

There are no sub-consultants being utilized on this Project.

The DEPARTMENT's original estimate was $500,000.00 including direct labor.

The SERVICE PROVIDER's original estimate was $500,000.00, including direct labor (technician labor at $120.00 per hour-as needed, technician labor, on site (overtime weekends, holidays), at $180.00 per hour-as needed.

Fixed Anti-Icing System and Roadside Weather Information System, Maintenance and Repair

Proposal #: 102882

Prepared For:

Nevada Department of Transportation

Prepared By:

Chris Vitek

PH: 724-658-3300 ext. 506

cgv@BoschungAmerica.com

AMERICAN OVERSIGHT

PURPOSE

The Nevada Department of Transportation (NVDOT) has several combined Roadside Weather Information System (RWIS) and Fixed Anti-Icing Spray System (FAST) installations that improve safety by preemptively spraying liquid anti-icing chemical on various locations listed below. This system consists of Boschung® proprietary hardware, computer programs, and devices. Potassium acetate is used for anti-icing. The systems are complex and require routine maintenance for effective operation. Public safety is in turn dependent on this.

The purpose of this contract is to maintain effective system operation through performing a fall startup inspection, a spring switch-over inspection, remote technical assistance, emergency on-site service call provision, materials provision, and a yearly certified operation training session.

SERVICE LOCATIONS:

- Browns Creek - I-580 at Milepost 9.51
- Galena Creek - I-580 at Milepost 10.28
- Steamboat Hills - I-580 at Milepost 13.28
- Galena Forest - I-580 at Milepost 14.3

SERVICES PROVIDED:

1) FALL SWITCHOVER

Switch system over from water to anti-icing chemical, operate all valves, spray units and devices through at least one complete cycle, operate computer control system, and check for operation within manufacturer's specification, check RWIS instrument function and output. Detailed service items are listed below

- Central Processing Unit (desktop computer)
    - Clean cabinet
    - Inspect PC for defects
    - Check modem operation and cable condition
    - Verify dial tone at modem
    - Test and reset PC power switches
    - Review system log for errors
    - Clean display screen
    - Perform check disk and defrag on PC
    - Assess hard drive capacity
    - Update software as needed

AMERICAN OVERSIGHT

- Road Weather Information System
  - Check stability of RPU
  - Replace padlock if defective
  - Clean dirt, trash, nests, and animal parts/debris from inside of cabinet
  - Check and if needed, place rodent control.
  - Check and seal any holes in cabinet
  - Check all RPU and panel hardware; tighten and replace if necessary
  - Verify power supply voltages
  - Clean lens on precipitation sensor and check operation
  - Clean shield on humidity sensor
  - Perform the shock test on the relative humidity sensor
  - Check relative humidity sensor output with a known source
  - Verify wind direction at all four compass points
  - Check modem operation at power interrupter
  - Check for dial tone and noise on the line
  - Clean pavement sensors
  - Run Auto-Test on pavement sensors
  - Inspect for cracks around sensor; notify NVDOT
- FAST
  - Replace system chemical filter
  - Verify and rectify, if required, operation of system and transfer pump
  - Check pressure switch operation limits
  - Verify flow meter operation and accuracy
  - Test main solenoid valve for proper operation
  - Check operation of level sensor
  - Check operation of valve units
  - Verify spray disk patterns; clean and adjust disks as needed
  - Inspect system for leaks, poor sealant, or loose components
  - Verify system programs (spray programs, customer set points, etc.)
  - Verify maintenance spray set points

AMERICAN OVERSIGHT

2) SPRING SWITCHOVER

Switchover system by flushing with water. Operate all valves, spray units and devices through at least one complete cycle, operate computer control system, and check for proper operation. Detailed service items are listed below

- Central Processing Unit
  - Clean dust and debris from cabinet
  - Inspect PC for defects
  - Check operation and condition of the modem and cables
  - Verify dial tone at modem
  - Test and reset power switches on the PC
  - Review system log for errors
- Road Weather Information System
  - Check stability of RPU
  - Check and seal any holes in cabinet
  - Check all RPU and panel hardware; tighten and replace if necessary
  - Verify power supply voltages
  - Check operation of the modem at power interrupter
  - Check for dial tone and noise on the line
  - Clean surface of pavement sensors (weather permitting)
  - Run Auto-Test on pavement sensors
  - Inspect for cracks around sensor; notify NVDOT for filling
- FAST
  - Check operation of valve units
  - Spray disk patterns; clean and adjust disks as needed
  - Inspect system for leaks
  - Flush system with water (switchover)
  - Initiate weekly maintenance spray cycle and verify set points

3) REMOTE TECHNICAL SUPPORT AND SITE MONITORING

- Remote technical support will be provided via telephone or email.
- Technician shall attempt to troubleshoot system malfunctions remotely
- Remote technical support will be unlimited through the contract period
- Site will be remotely investigated once weekly by a qualified technician

AMERICAN OVERSIGHT

4) UNSCHEDULED ON-SITE SERVICE (if Needed)

- Provide on-site service callouts when requested by NVDOT representative with a confirming written authorization.
- Perform service at the specific site.
- Notify the system operator when repair technician arrives on site.
- Troubleshoot system operation based on operator's reported symptoms.
- Repair or replace components as required to maintain autonomous operation of the system.
- Maintain an on-site log of tests performed and actions taken.
- Participate in exit interview with system operator where the following takes place :
- All changes to settings and control criteria are provided in a written report.
- System operator is trained in any changes made.
- Components replaced, removed, or recalibrated.
- List of items of concern or requiring more than routine maintenance are documented in writing.
- Provide written report of problems found, action taken, materials and parts used, and future recommendations.
- All unscheduled on-site service will be invoiced as used.

5) CERTIFIED OPERATION TRAINING

- Training is provided by a qualified Boschung America personal.
- Provide one full day Operation Training for up to 5 attendees annually.
- Training includes instruction for switching the Boschung FAST system over for winter or summer operation.
- Basic understanding of assisting Boschung Technician in rebooting FAST computer system

REPAIR/REPLACEMENT PARTS

- Replace damaged parts in kind.
- Work with original manufacturer(s) for parts under warranty and any new parts used must be approved by NVDOT.
- All parts will be priced according to Boschung America's pricelist .

AMERICAN OVERSIGHT

Unscheduled Labor and Parts

- Technician Labor $120 per hour (as Needed)
- Technician labor, on site (overtime, weekends, holidays) $180 per Hour (as Needed)
- Part and Replacement Parts will be billed per Boschung America price list provided to NVDOT
- Shipping cost will be prepaid and added to the invoice
    - FedEx or UPS Ground - Unless otherwise approved by the department

TIMELINESS

- Seasonal Switchovers
    - Service appointments will be scheduled with Nevada DOT – District 2 and Boschung America

- Unscheduled On-site Service
    - Provide on-site service as needed
    - NVDOT directs the hours that the service technician may work on the site depending on traffic and weather conditions

TRAFFIC CONTROL

- Traffic control, site access, special lift equipment, railroad permits, flaggers, etc. will be provided by NVDOT as designated on the work order.

MEMORANDUM

June 29, 2018

TO: **Department of Transportation Board of Directors**
FROM: **Rudy Malfabon, Director**
SUBJECT: **July 9, 2018, Transportation Board of Directors Meeting**
ITEM #8: **Contracts, Agreements, and Settlements – Informational Item Only**

Summary:

The purpose of this item is to inform the Board of the following:

- Construction contracts under $5,000,000 awarded May 16, 2018, through June 12, 2018.
- Agreements under $300,000 executed May 16, 2018, through June 12, 2018.

Any emergency agreements authorized by statute will be presented here as an informational item.

Background:

Pursuant to NRS 408.131(5), the Transportation Board has authority to "[e]xecute or approve all instruments and documents in the name of the State or Department necessary to carry out the provisions of the chapter". Additionally, the Director may execute all contracts necessary to carry out the provisions of Chapter 408 of NRS with the approval of the board, except those construction contracts that must be executed by the chairman of the board. Other contracts or agreements not related to the construction, reconstruction, improvement and maintenance of highways must be presented to and approved by the Board of Examiners. This item is intended to inform the Board of various matters relating to the Department of Transportation but which do not require any formal action by the Board.

The Department contracts for services relating to the construction, operation and maintenance of the State's multi-modal transportation system. Contracts listed in this item are all low-bid per statute and executed by the Governor in his capacity as Board Chairman. The projects are part of the STIP document approved by the Board. In addition, the Department negotiates settlements with contractors, property owners, and other parties to resolve disputes. These proposed settlements are presented to the Board of Examiners, with the support and advisement of the Attorney General's Office, for approval. Other matters included in this item would be any emergency agreements entered into by the Department during the reporting period.

AMERICAN OVERSIGHT

The attached construction contracts and agreements constitute all that were awarded for construction from May 16, 2018, through June 12, 2018 and agreements executed by the Department from May 16, 2018, through June 12, 2018. There were no settlements during the reporting period.

Analysis:

These contracts have been executed following the Code of Federal Regulations, Nevada Revised Statutes, Nevada Administrative Code, State Administrative Manual, and/or Department policies and procedures.

List of Attachments:

A) State of Nevada Department of Transportation Contracts Awarded – Under $5,000,000, May 16, 2018, through June 12, 2018.

B) State of Nevada Department of Transportation Executed Agreements – Informational, May 16, 2018, through June 12, 2018.

Recommendation for Board Action: Informational item only

MEMORANDUM

June 27, 2018

TO: **Department of Transportation Board of Directors**

FROM: **Rudy Malfabon, P.E., Director**

SUBJECT: **July 9, 2018, Transportation Board of Directors Meeting**

Item # 9: **Action Item: Condemnation Resolution No. 469**
US 50 from Roy's Rd. to US-95A, Widen from 2 to 4 Lanes, Phase 2; in Lyon County, Nevada.
7 Owners, 2 Parcels – For possible action

Summary:

The Department is acquiring property rights for the widening and reconstruction of US Highway 50 from Roy's Road to US-95A, Lyon County, Nevada. The Department is seeking the Board's approval of a condemnation action for the unresolved acquisition as described below.

Background:

Reza Zandian and Niloofar Foughani, Elias and Minoo Abrishami, Enayat and Naima Abrishami, Eagles Nest LLC, Johnathon Fayeghi, Rashad and Reem El-Sabawi, and Alborz Zandian - Negotiations are unresolved for the acquisition from Reza Zandian et al. It is necessary to acquire two temporary easements of 770 square-foot (0.02 acres) and 3,629 square-foot (0.08 acres) respectively, for the construction of the project (Attachment 1 - Location Map).

The acquisitions in question are located along the south side of US 50, between Roy's Road and Pinto Street, Stagecoach, Lyon County, and are highlighted in pink color on the right-of-way plans that are part of the Condemnation Resolution (Attachment 2).

The Department has submitted offers to owners and is continuing to work towards settlement, however, the Department is requesting this condemnation resolution to meet construction deadlines.

Analysis:

A condemnation resolution is requested so that the Department can certify the right-of-way to the Federal Highway Administration, and file any necessary pleading in any condemnation proceeding, pursuant to NRS Chapter 241, all required notices regarding this open meeting have been served.

RESOLUTION OF THE BOARD OF DIRECTORS OF THE DEPARTMENT OF TRANSPORTATION AUTHORIZING ACQUISITION BY CONDEMNATION OF PROPERTY FOR THE WIDENING AND RECONSTRUCTION OF US-50, FROM ROY'S ROAD TO US-95A, IN AN UNINCORPORATED AREA OF LYON COUNTY, NEVADA

CONDEMNATION RESOLUTION NO. 469

WHEREAS, the Department of Transportation of the State of Nevada (hereinafter the "Department") is empowered by chapter 408 of the Nevada Revised Statutes to acquire real property, interests therein, and improvements located thereon for the construction and maintenance of highways; and

WHEREAS, the Department has determined that the public interest and necessity require the acquisition, construction, and completion by the State of Nevada, acting by and through the Department, of a public improvement, namely the widening and reconstruction of US-50, from Roy's Road to US-95A, in an unincorporated area of Lyon County, State of Nevada and that the real property hereinafter described is necessary for said public improvement; and

WHEREAS, the right-of-way plans are attached hereto and incorporated herein depicting the parcels described herein; and

WHEREAS, the Department plans to obligate federal-aid funds for this project, and let a construction contract for said project, and the real property hereinafter described will be needed for said highway project; and

WHEREAS, pursuant to section 408.503 of the Nevada Revised Statutes, the Department shall not commence any legal action in eminent domain until the Board of Directors of the Department adopts a resolution declaring that the public interest and necessity require the highway improvement and that the property described is necessary for such improvement.

AMERICAN OVERSIGHT

NOW, THEREFORE, BE IT RESOLVED by the Board of Directors of the Department, pursuant to section 408.503 of the Nevada Revised Statutes:

That the public interest and necessity require the acquisition, construction, reconstruction, improvement, maintenance or completion by the State of Nevada, acting through the Department, of a public improvement, namely a public highway; and that the real property hereinafter described is necessary for said public improvement; and

That the proposed construction of said public highway improvement on and along an alignment heretofore approved is planned and located in a manner which will be the most compatible with the greatest public good and the least private injury.

BE IT FURTHER RESOLVED THAT the Department be and is hereby authorized and directed:

To acquire in the name of and in behalf of the State of Nevada, in fee simple absolute, unless a lesser estate is hereinafter described, the following described real property and interests therein by the exercise of the power of eminent domain in accordance with the provisions of chapters 37 and 408 of the Nevada Revised Statutes;

To commence and prosecute, if necessary, in the name of the State of Nevada, condemnation proceedings in the proper court to condemn said real property and interests therein; and

To make application to said court for an order permitting the Department to take possession and use of said real property as may be necessary for construction of said public highway improvement, and to pledge the public faith

AMERICAN OVERSIGHT

and credit of the State of Nevada as security for such entry or, should the Department deem such advisable, to deposit with the Clerk of such court, in lieu of such pledge, a sum equal to the value of the premises sought to be condemned as appraised by the Department, and to acquire the following real property:

PARCEL NOS. U-050-LY-020.019TE1 and U-050-LY-020.252TE1 owned by REZA ZANDIAN and NILOOFAR FOUGHANI, husband and wife as to an undivided 15% interest; ELIAS ABRISHAMI and MINOO ABRISHAMI, husband and wife as to an undivided 2/6th interest; ENAYAT ABRISHAMI and NAIMA ABRISHAMI, husband and wife as to an undivided 1/6th interest; EAGLES NEST, LLC, A California limited liability company, as to an undivided 12.50% interest; JOHNATHON FAYEGHI, an unmarried man, as to an undivided 3.0% interest; RASHAD EL-SABAWI and REEM EL-SABAWI, Trustees of the RASHAD AND REEM EL-SABAWI FAMILY TRUST, as to an undivided 9.50% interest; ALBORZ ZANDIAN, an unmarried man, 2.5% and NILOOFAR FOUGHANI ZANDIAN, 7.5%

Said real property situate , lying and being in the County of Lyon, State of Nevada, and more particularly described as being portions of the NE 1/4 of the NE 1/4 of Section 10, T. 17 N., R. 23 E., M.D.M., and further described as being a portion of SOUTH PARCEL as shown on that certain RECORD OF SURVEY FOR DEAD DOG RANCH filed for record on September 30, 2004, in the official records of Lyon County, Nevada, as File No. 332209, and the individual parcels being more fully described by metes and bounds as follows:

NRS 408.503 Eminent domain: Resolution by Board; precedence over other legal actions.

1. The Department shall not commence any legal action in eminent domain until the Board adopts a resolution declaring that the public interest and necessity require the acquisition, construction, reconstruction, improvement or completion by the State, acting through the Department, of the highway improvement for which the real property, interests therein or improvements thereon are required, and that the real property, interests therein or improvements thereon described in the resolution are necessary for such improvement.

2. The resolution of the Board is conclusive evidence:

(a) Of the public necessity of such proposed public improvement.

(b) That such real property, interests therein or improvements thereon are necessary therefor.

(c) That such proposed public improvement is planned or located in a manner that will be most compatible with the greatest public good and the least private injury.

3. All legal actions in all courts brought under the provisions of this chapter to enforce the right of eminent domain take precedence over all other causes and actions not involving the public interest, to the end that all such actions, hearings and trials thereon must be quickly heard and determined.

(Added to NRS by 1957, 691; A 1960, 392; 1987, 1810; 1989, 1306)

NRS 241.034 Meeting to consider administrative action against person or acquisition of real property by exercise of power of eminent domain: Written notice required; exception.

1. Except as otherwise provided in subsection 3:

(a) A public body shall not consider at a meeting whether to:

(1) Take administrative action against a person; or

(2) Acquire real property owned by a person by the exercise of the power of eminent domain,

➥ unless the public body has given written notice to that person of the time and place of the meeting.

(b) The written notice required pursuant to paragraph (a) must be:

(1) Delivered personally to that person at least 5 working days before the meeting; or

(2) Sent by certified mail to the last known address of that person at least 21 working days before the meeting.

➥ A public body must receive proof of service of the written notice provided to a person pursuant to this section before the public body may consider a matter set forth in paragraph (a) relating to that person at a meeting.

2. The written notice provided in this section is in addition to the notice of the meeting provided pursuant to NRS 241.020.

3. The written notice otherwise required pursuant to this section is not required if:

(a) The public body provided written notice to the person pursuant to NRS 241.033 before holding a meeting to consider the character, alleged misconduct, professional competence, or physical or mental health of the person; and

(b) The written notice provided pursuant to NRS 241.033 included the informational statement described in paragraph (b) of subsection 2 of that section.

4. For the purposes of this section, real property shall be deemed to be owned only by the natural person or entity listed in the records of the county in which the real property is located to whom or which tax bills concerning the real property are sent.

(Added to NRS by 2001, 1835; A 2001 Special Session, 155; 2005, 2247)

MEMORANDUM

June 25, 2018

TO: **Department of Transportation Board of Directors**

FROM: **Rudy Malfabon, P.E., Director**

SUBJECT: **July 9, 2018 Transportation Board of Directors Meeting**

ITEM #10: **Formal Amendments and Administrative Amendments to the FFY 2018-2021 Statewide Transportation Improvement Program (STIP)**

Summary:

At the September 11, 2017 State Transportation Board of Directors Meeting, the FFY 2018 – 2021 Statewide Transportation Improvement Program (STIP) was accepted by the Transportation Board. Formal Amendments and Administrative Amendments are made throughout the year to facilitate necessary project changes. NDOT staff work closely with the Metropolitan Planning Organizations (MPO's) and local governments facilitating project changes. NDOT staff routinely provide updates to the Board on changes to the STIP.

Attachment "A" is a list of Formal Amendments to the 2018-2021 STIP since the April 2018 quarterly update. NDOT requests the State Transportation Board's acceptance of the changes summarized in Attachment "A".

Attachment "B" is a list of Administrative Amendments to the 2018-2021 STIP since the April 2018 quarterly update. NDOT requests the State Transportation Board's acceptance of the changes summarized in Attachment "B".

Background:

The STIP is a federally-required, four-year, fiscally constrained program of federally-funded and regionally significant transportation projects throughout the state. NDOT staff works continuously with federal and regional agencies, local governments, as well as, planning boards to develop and update the Statewide Transportation Improvement Program (STIP). The current STIP can be found here: https://estip.nevadadot.com/default.asp?view_type=FED

To meet Nevada Revised Statute (NRS 408.203), NDOT also maintains a Work Program, which lists the projects the Department intends to work on during the current fiscal year (Annual Work Program), proposed projects for short term (two to four years) and proposed projects outside of that period (Long Range Element). The 2018 Work Program was approved by the Board in September 2017. The Work Program can be found here: https://estip.nevadadot.com/default.asp?view_type=AWP

AMERICAN OVERSIGHT

Attachment "A" details Formal Amendments to projects which have occurred between April 1, 2018 and June 30, 2018. This includes actions taken in RTCWA, RTCSNV, CAMPO, and TMPO Transportation Improvement Plans (TIPs) and includes changes made in the statewide Non-MPO area.

Formal Amendments are triggered when air quality conformity is required, a new federally funded or regionally significant project is added or deleted, or project costs increase by more than 40% and by more than $5 Million. This action requires a public comment period within the MPO, approval by the MPO Governing Board, approval from NDOT Director, and final approval from FHWA and FTA. This action can take 30-60 days from initiation of public comment period to federal approval.

Attachment "B" details Administrative Amendments to projects which have occurred between April 1, 2018 and June 30, 2018. This includes actions taken in RTCWA, RTCSNV, CAMPO and TMPO TIPs and includes changes made in the statewide Non-MPO area.

Administrative Amendments are triggered when increasing funds by more than $500,000 and increasing project cost by more than 20%, but less than 40%. Administrative Amendments are also triggered by significant changes in design or scope of a regionally significant project. This action is approved by the executive director of the MPO with final approval from the NDOT Director. This action can take 1-2 weeks to process.

All project amounts in the STIP are based on engineer's estimates for the use in requesting the obligation of funds from FHWA and FTA. Upon approval from the State Transportation Board at the time of the bid award, the STIP will be updated to reflect the Board's approval and for final approval from FHWA and FTA.

Analysis:

The attached lists of Formal and Administrative Amendments are those completed by the MPOs and NDOT between April 1, 2018 and June 30, 2018.

Recommendation for Board Action:

Acceptance of the Formal Amendments/Administrative Amendments to the FY 2018 – 2021 Statewide Transportation Improvement Program (STIP).

MEMORANDUM

June 27, 2018

TO: **Department of Transportation Board of Directors**
FROM: **Rudy Malfabon, Director**
SUBJECT: **July 9, 2018 Transportation Board of Directors Meeting**
Item #11: **Old Business**

Summary:

This item is to provide follow up and ongoing information brought up at previous Board Meetings.

Analysis:

a. Report of Outside Counsel Costs on Open Matters - *Informational item only.*

Please see Attachment A.

b. Monthly Litigation Report - *Informational item only.*

Please see Attachment B.

c. Fatality Report dated June 6, 2018- *Informational item only.*

Please see Attachment C.

List of Attachments:

a. Report of Outside Counsel Costs o*n Open Matters - Informational item only.*
b. Monthly Litigation Report - *Informational item only.*
c. Fatality Report dated June 6, 2018 - *Informational item only.*

Recommendation for Board Action:

Informational item only.

AMERICAN OVERSIGHT

Impaired (Alcohol, Marijuana, Other Drugs, and Multiple) data will be provided as part of this report every 6 months; 07/07 & 01/07.

Key: Fatalities= Total number of reported fatals (vehicle occupants, pedestrian, motorcyclist, bicyclist, and other).
Vehicle Occupants = Driver and occupant fatalities in a motor vehicle.
Vehicle Unrestrained = Driver and occupant fatalities in a motor vehicle unrestrained.
Pedestrian =A person fatality who is on foot or on a personal conveyance on the roadway.
Motorcyclist= A person riding a motor vehicle that has a seat or saddle for the use of its operator and is designed to travel on not more than three wheels in contact with the ground that is on the roadway involved in a fatal. Does not include scooters or mopeds.
Bicyclist= A person on a non-motorized other road vehicle propelled by pedaling (bicycle, tricycle, unicycle, pedalcar) on the roadway involved in a fatal.
Other = A person on a scooter, moped, ATV, or other motorized vehicle not captured above on a roadway involved in a fatal.

Hi Brian,

I have attached the newsletter PDF for you to review. As a reminder, we are still waiting on the story for page 3 – right now, the page is being filled with generic filler text. Also, for the story on the last spread, even with the graphic, it's not quite large enough to fill the space, so we're thinking we'd throw a generic Nevada stock photo in there unless you have something that works that you can send over.

Driverless ride share launches in Las Vegas

This May, a global technology leader in mobility, incentivized by GOED, launched of a fleet of **30 autonomous vehicles in Las Vegas** on the Lyft network. Aptiv PLC operates the vehicles on its fully-integrated autonomous driving platform, which are made available to the public in partnership with Lyft. On an opt-in basis, passengers have the ability to hail self-driving vehicles equipped with Aptiv technology to and from high-demand locations.

> *"With Aptiv's autonomous driving technology deployed throughout Las Vegas and broadly accessible through the Lyft app, a wide range of consumers will be able to share the experience of autonomous vehicles in a complex urban environment," said Kevin Clark, Aptiv president and chief executive officer. "More importantly, the resulting knowledge and data will allow us to* **further refine our autonomous driving capabilities and strengthen our portfolio of industry-leading active safety solutions.**"

AMERICAN OVERSIGHT

Story continued on next page »

NV-DA-20-0615-A-001950

The combination of Aptiv's autonomous driving technology and Lyft's ride-hailing app is the expansion of a successful partnership that launched in Las Vegas during CES 2018. That initial pilot provided more than 400 self-driving rides to the public and earned an average customer rating of 4.99 out of five stars. Like the CES program, vehicles will be operated by highly-trained safety drivers.

In March, the GOED board voted to approve Aptiv's application for tax abatements and two months later the company has already surpassed it projected number of jobs created and currently lists openings in Las Vegas for IT, engineering, and office administration positions.

GOED Executive Director Paul Anderson said Aptiv is exactly the sort of operation Nevada hoped to attract when last year the state legislature passed and Governor Brian Sandoval signed into law some of the most forward-looking autonomous vehicle regulations in the country.

"The holy grail for economic development is research and development," said Anderson. "And because of what it does — **attract some of the smartest people in the world and bring in talent** *— it becomes an entrepreneurial model to economic development."*

GOED listening tour covers 1,000 miles

In April, GOED's Executive Director Paul Anderson, Director of Rural Economic and Community Matthew Moore and Communications Director Brian Baluta undertook a **three-day, 1,000-mile listening tour** to connect with the Regional Development Authority partners and stakeholders across the vast Silver State.

All told, the trip featured stops in Pahrump, Fallon, Carson City, Eureka, Ely, Panaca and Caliente, for sessions with Nye County Regional Economic Development Authority (NCREDA), HWY 95 Rural Development Authority (HWY95), Northern Nevada Development Authority (NNDA), Northeastern Nevada Regional Development Authority (NNRDA), and Lincoln County Regional Development Authority (LCRDA).

The tour underscored:

1. Nevada's rural communities share many assets and challenges, including issues with federal land management, affordable housing, workforce development, and infrastructure.
2. There are many engaged and motivated individuals on the ground working diligently to face these challenges and build on opportunities.
3. GOED and the rural RDAs will continue to work closely to help ensure all of Nevada shares in growth and prosperity.

Governor Sandoval nominates 61 Opportunity Zones

In April, Governor Brian Sandoval today nominated 61 opportunity zones, pursuant to the Tax Cuts and Jobs Act of 2017, which established an **Opportunity Zone tax incentive, designed to encourage long-term private investment in low-income communities.**

The nominated census tracts from across Nevada can be found here: http://www.diversifynevada.com/programs-resources/opportunity-zones

> *"During my time as Governor, we have invested significant resources in Nevada," Governor Sandoval said. "While we have seen substantial returns, there are still parts of our state that need additional assistance.* **It is my hope that by nominating these 61 low-income opportunity zones, private investors will choose to fund projects in these areas that benefit the Nevadans who need it most.** *What's more, we believe that communities surrounding the 61 opportunity zones will also benefit from investment in the zones."*

61 opportunity zone nominations directly impact more than **230,000** Nevadans in some of Nevada's most disadvantaged communities.

Average family income is approximately **$37,000** — just **60%** of median statewide family income of approximately **$62,500**.

Average unemployment rate from **2011-2015** was **16%** — nearly **2x** greater than the national unemployment rate.

PolicyMap's Jeremy Nowak praised Nevada's approach to the nominations. "The Governor's office did a great job of taking a data driven approach…Hats off to Nevada."

Good Nevada news, by the numbers

For the first quarter of 2018, State Policy Reports' Index of State Economic Momentum – which ranks states based on personal income growth, employment growth, and population growth – **ranked Nevada No. 1**

Between the fourth quarter of 2016 and the same period in 2017, Nevada had the **strongest year-over-year growth in personal income**, and held the distinction of being the only state to record growth greater than 6%.

Federal data released in May showed in 2017 Nevada's **gross domestic product (GDP)** grew 3.5% after increasing 2.1% in 2016, **good for No. 3 in the nation.**

The Bureau of Economic Analysis data depict expansion across the state's economy, with real GDP increasing for nearly every major industry. Real estate served as the largest contributor to overall GDP, followed by durable goods manufacturing.

Nevada's GDP numbers also reflect steady in-migration to the state. According to Census estimates, its **population climbed 2 percent last year**, the largest increase nationally behind only Idaho.

According to the Nevada Department of Employment, Training & Rehabilitation (DETR) March 2018 economic report, Nevada added 3,500 jobs bringing employment in the state of Nevada to a **record high of 1,373,700 jobs**. Unemployment in March remained constant at 4.9%.

DETR's report also notes that in the fourth quarter of 2017, **personal income in Nevada reached $136 billion**, up 6.4% from a year ago. This increase has been ongoing in 30 of the past 31 quarters.

Additionally, Nevada's average personal income growth has exceeded that for the U.S. over 14 of the past 16 quarters, with income gains in the state averaging 5.1%, compared to 3.5% in the U.S.

"Although we are seeing some slight changes in employment and unemployment measures in March, state employment remains strong," David Schmidt, Chief Economist for DETR said. "Estimates show Nevada's labor force has averaged 1.49 million in the first quarter of 2018, up from 1.45 million during the same period in 2017. **This translates into an increase of 40,160 more Nevadans in the labor force, either working or actively seeking employment."**

No. 1	**in economic momentum, Q1 2018.**
No. 1	**in personal income growth, 2017.**
No. 3	**in GDP growth, 2017.**
No. 2	**in population growth, 2017.**

Record high 1,373,700 Nevadans employed, March 2018.

*PolicyMap's Jeremy Nowak praised Nevada's approach to the nominations. "***The Governor's office did a great job of taking a data driven approach…Hats off to Nevada."**

News

"Clark County expects the new NFL stadium will be a notable new draw for consumers and visitors," Moody's Patrick Liberatore wrote, adding that the stadium and upcoming expansion of the Las Vegas Convention Center should allow the city to host larger events and diversify visitor draws.

Subject: Logistics Information: April 17, 2019 Opportunity Zone Conference with State, Local, Tribal, & Community Leaders
Attachments: April 17 Opportunity Zone Conference Breakout Sessions -Agenda.pdf

Good evening,

Please see the information below in preparation for the **Opportunity Zone Conference & Breakout Sessions with State, Local, Tribal, & Community Leaders,** on Wednesday, April 17, 2019. Attached you will find an agenda for the conference and breakout sessions.

DATE: Wednesday, April 17, 2019 from 1:00 p.m. to 5:05 p.m. Eastern Time

LOCATION: Eisenhower Executive Office Building (EEOB) on the White House Complex.

ARRIVE AT: 17th Street NW and State Place NW, Washington D.C., 20502.

ARRIVAL TIME AND SECURITY PROCESS: Attendees can begin arriving on the White House Complex at 12:00 p.m. Please arrive at 17th and State Place **no later than 12:45 p.m.** to allow time to get through security.

Upon your arrival, Secret Service will check your driver's license, passport, or other government issued photo ID. This must be a current, valid form of identification. Paper copies and expired IDs will not be accepted. Keep in mind that if there are any discrepancies (including minor "typos") between the personal information that you submit and what is listed on your identification, this will delay your entrance into the EEOB. We strongly advise that all guests confirm that their personal information is correct before passing it along.

After your identification has been checked, you will go through security similar to what you are used to seeing at the airport. You will then be issued a temporary badge that will give you access to the Eisenhower Executive Office Building. Please plan to spend at least 15 minutes passing through security.

CONFERENCE END TIME: 5:05 p.m., followed by an optional reception ending at 6:15 p.m.

ITEMS ALLOWED: Most items are allowed into the Eisenhower Executive Office Building. You'll be able to bring purses, backpacks, phones, etc. Luggage is allowed. Prohibited items include guns, ammunition, fireworks, electric stun guns, mace, martial arts weapons/devices, or knives of any size. If you are unsure about a certain item, please feel free to reach out to our office for clarification.

ATTIRE: Business professional.

AGENDA: See attachment.

CONTACT: If you need help or have a specific question that was not addressed in this email, please contact Olivia Imhoff at Olivia.P.Imhoff2@who.eop.gov.

Sincerely,

May 2, 2018

Dear Governor Sandoval,

We are writing regarding the "qualified opportunity zone" nominations forwarded by you to the U.S. Secretary of Treasury on April 20, 2018, in accordance with the applicable federal legislation. One of the sixty-one nominations is census tract 32019960302 which includes a portion of Lyon County. Both undersigned parties to this letter had originally requested that this census tract be included as one of your nominations. We appreciate that you did include this tract, as the only one of the sixty-one nominated tracts that is "contiguous with a low-income community that is designated as a qualified opportunity zone" (Non-LIC) as defined in and allowed by the legislation. However, upon further analysis, and as parties with a deep understanding of the attributes and interests in the area, we now believe that census tract 32029970200 in Storey County, which includes the Tahoe Regional Industrial Center (TRI) property, would yield far more immediate benefits to the State as an opportunity zone because of its established position for economic growth, investment and ability to add in the near-term much-needed residential housing to the area. Because of this, we seek to withdraw our original request and support the replacement of the contiguous Non-LIC tract nominated with the tract in Storey County, as further explained in this letter.

Lyon County currently has three nominations, all of which include significant active and pending industrial parks. With the opportunity zone designation, the Crossroads Commerce Center (Crossroads), the Northern Nevada Industrial Center (NNIC) and the Traditions Project in Dayton have the potential to add and accelerate substantial investments within these industrial parks over the required 10-year federal time period. As such, the related new taxable revenues for both Fernley and Lyon County are estimated to have a significant positive impact on Lyon County which is reported to have the lowest taxable revenue of all seventeen counties in the State.

The third Lyon County nomination noted above, tract 32019960302, is the only non-LIC tract that was both submitted by Lyon County/NNDA and nominated by you and contains the Traditions Project. While not disputing the merits of this submission, all parties to the development are in agreement that the withdrawal of this census tract and its replacement with the tract impacting TRI, as would provide greater and quicker impact for the region and the state. Secondly, it is understood by all parties that the impact of this replacement would have great benefits for the Traditions project as well. We would also request that this tract (32019960302) be given top priority for a proposed recommendation by Treasury for a second round of assignments. This will be important for all in the region and the state.

The tract containing the TRI Center, as with the third Lyon County/NNDA submission, is another Non-LIC tract. Like Crossroads and NNIC, and with over 6,000-acres of remaining developable lands, the impact to Storey County as a Non-LIC nomination within the State will have a similar positive impact at TRI. There is a number of proposed investments at the TRI Center, some of which are both large-scale and may be contingent on an opportunity zone

AMERICAN OVERSIGHT

NV-DA-20-0615-A-001968

NNDA | Northern Nevada Development Authority

nomination. This development by sophisticated land owners will in our estimation drive positive economic development within the entire Sierra Region and has become a priority for our recommendations.

In addition, tax experts for TRI land owners believe an opportunity zone designation has the potential to accelerate or increase new investments by a minimum of 25% - 35% over the required 10-year federal time period. These additional investments would add millions of dollars in new property tax, sales tax and modified business tax revenue as part of the new taxable structures, equipment and related new job creation. While TRI is a recognized industrial powerhouse in Nevada, most current and significant land owners including (but not limited to) Tesla Motors, Switch and Google, enjoy 10- to 20-year abatements which leaves Storey County with far fewer new taxable revenues than many realize. An opportunity zone designation, therefore, becomes a critical part of the County's near- and long-term fiscal well-being.

Moreover, and significantly, since the suggested replacement nomination includes the only major planned residential area in Storey County, an opportunity zone nomination has the potential not only to address the current Reno MSA housing crisis, but also, to add adjacent housing to workers at TRI which is sorely lacking today.

Based on the significant benefits that would result from designation of census tract 32029970200 as a qualified opportunity zone, we are hereby withdrawing our request for the inclusion of census tract 32019960302 in this process based on the overall public interest and greater good that would be promoted and derived from a designation of the alternative TRI tract. We believe there is still an opportunity to accomplish this in conjunction with the Secretary of Treasury. To this end, we would respectfully ask you to work with Secretary of Treasury during the Treasury Department's "consideration period" outlined in the federal legislation for the inclusion and designation of census tract 32029970200 instead. Under law, the consideration period consists of the thirty (30) day period following submission of your nomination notice on April 20, 2018, which can be extended for an additional thirty (30) days upon request by you to the Secretary of Treasury.

Please contact us for any additional information that might be helpful in this process. We are extremely appreciative of all efforts to maximize these important benefits for all of Nevada.

Sincerely,

Jeffrey A. Page
