American Community Survey and DETR - it's all in our spreadsheet. The only reason for the change is Derek double checked all my numbers and we felt 234k was too specific; 230k gives us flexibility depending on if TRI is in or out.

Here are some high-level stats.

By the Numbers

Opportunity Zone Nominations DIRECTLY impact more than 234,000 Nevadans in some of our most disadvantaged communities. Communities surrounding these tracts are also expected to benefit significantly from investment in designated opportunity zones.

In the 61 tracts:

- ~$37,000 - Average family income
  - (Just 60% of median statewide family income of ~$62,500)
- 16% - Average unemployment rate from 2011-2015
  - Nearly 2x greater than the national unemployment rate

On Apr 20, 2018, at 8:34 AM, Brian Baluta <bbaluta@diversifynevada.com> wrote:

Mary-Sarah, As per the request, here is some verbiage on the methodology for nominating opportunity zones. We're also looking to DETR to run some numbers on the 61 tracts for the release. — BB

To identify the state's 61 priority tracts for Opportunity Zone designations, the Nevada Governor's Office of Economic Development (GOED) and the Nevada Department of Business and Industry solicited input from local governments, regional development authorities, the general public and other interested parties. GOED then utilized indices to measure market traction, social need, and investment opportunity. The methodology incorporates information including:

- % population below poverty
- % households with rent or mortgages greater than 30% of income
- % population not in the labor force
- % of population with less than a high school degree
- Concentrated income (Gini Index)
- Commercial lending
- Multifamily lending
- Small business lending
- Socioeconomic change
- Concentration of jobs

Summary:

The Tax Cuts and Jobs Act of 2017 established an Opportunity Zone tax incentive, which allows taxpayers to defer paying federal tax on capital gains from the sale of property if those gains are invested in Qualified Opportunity Funds that invest 90% of their assets in businesses located or property used in a designated low-income community. Investors receive modest reductions in their eventual tax bill if they maintain their Opportunity Fund investments for at least five and then seven years. Investors that hold capital in those funds for a full ten years also do not have to pay capital gains tax on the appreciation of their Opportunity Zone investments.

Hi Melanie,

Please find attached the transcript and minutes. Again, I am really sorry about the delay, it should've not taken that long but I really thought it was done.

Please let me know if you need any changes. We did the best we could on some of the names. Some we researched and were able to find proper spelling but others we just couldn't read on the sheet. We are happy to make any necessary changes though.

Thanks much,

Jaime Caris

Subject: Question re. Transcript

Good morning Jaime,

I hope you are well and having a great week. There really is no rush on this at all, I am just checking in. A colleague at LVGEA asked if the March GOED Meeting transcript (not minutes) was ready yet as he wanted to look for a comment. I know it was a very, very long meeting so it's absolutely fine if it's not ready yet. However, if it is, would you mind sending through? He doesn't need the minutes just the transcript.

Kind regards,

Melanie Sheldon

STATE OF NEVADA
GOVERNOR'S OFFICE of ECONOMIC DEVELOPMENT
BOARD MEETING
March 15, 2018

The meeting of the Board of Economic Development was called to order by Governor Brian Sandoval at the Capitol Building, 101 N. Carson Street, Carson City, Nevada, 89701; and via video conference at the Grant Sawyer Building, Governor's Conference Room, 555 E. Washington Avenue, Room 5100, Las Vegas, Nevada, 89101.

1. CALL TO ORDER, ROLL CALL AND ESTABLISH QUORUM

VOTING BOARD MEMBERS PRESENT

Governor Brian Sandoval, State of Nevada
Lieutenant Governor Mark Hutchison, State of Nevada
Secretary of State, Barbara Cegavske
Dr. Weldon Havins, Director, Medical Jurisprudence and Ophthalmology, Touro University Nevada
Mr. James Barrett, Jr., President and Founder, The JABarrett Company
Mr. Sam Routson, Chief Administrative Officer, Winnemucca Farms
Mr. Rob Roy, CEO/Founder, Switch

NON-VOTING BOARD MEMBERS PRESENT

Mr. Don Soderberg, Director, Department of Employment Rehabilitation and Training
Mr. John White, Chancellor and CEO, Nevada System of Higher Education

STAFF MEMBERS PRESENT

Mr. Steve Hill, Executive Director, GOED, Secretary of Board
Michael Dang, Director of Business Operations, GOED
Jenn Cooper, Communications Director, GOED
Bob Potts, Research Director, GOED
Steve Woodbury, Administrative Services Officer, GOED
Michelle Sibley, Executive Assistant / HR Coordinator, GOED
Melanie Sheldon, Executive Assistant / Business Development Specialist, GOED
Nichole Anderson, Administrative Assistant, Business Development Division, GOED

GUESTS PRESENT

Assemblywoman Irene Bustamante-Adams
Henna Rasul, Attorney General's Office
Barbara Coffee, City of Henderson
Michael Walsh, LVGEA
Nancy McCormick, EDAWN
Chris Ault, EDAWN

AMERICAN OVERSIGHT

Perry Ursem, LVGEA
Michael Walsh, LVGEA
Anthony Ruiz, LVGEA
Colin Brett McNeil, Aptiv
Todd Ohendt, Aptiv
Manu Namboodiri, Aptiv
Spencer Schmerling, Cascade
Todd Clark, Scientific Games
Phil Klevorick, Clark County, Economic Development
Frank Woodbeck
Dan Hunt, C4Mining
Patti Hunt, C4Mining
Derek Armstrong, GOED
Stuart Edenfield, WMI
April Ruelas, EWS
Rolayn Ruelas, EWS
Bill Legere, CNLV

2. PUBLIC COMMENT

Secretary of State Cegavske reminded staff to ensure that companies submitting applications for abatements are in good standing and have a business license with the State of Nevada.

3. GOVERNOR SANDOVAL'S COMMENTS

Governor Sandoval introduced Director Paul Anderson as GOED's Executive Director and noted he had previously had the privilege of working with him during Director Anderson's role as Assembly Leader in the Nevada legislature.

Governor Sandoval welcomed Mr. Raymond Specht to the GOED Board. Mr. Specht thanked Governor Sandoval and advised he was honored to have the opportunity to serve the State.

4. APPROVAL OF THE JANUARY 18, 2018 BOARD MEETING MINUTES

Governor Sandoval asked if any changes needed to be made to the minutes. There were no changes. Lieutenant Governor Hutchison and Mr. Raymond Specht abstained from the vote as they were not present at the previous meeting.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE JANUARY 19, 2017 MEETING MINUTES; THIS MOTION

AMERICAN OVERSIGHT

WAS SECONDED BY MR. DAN KLAICH. THE MOTION PASSED UNANIMOUSLY.

5. ABATEMENT APPLICATIONS FOR BOARD APPROVAL:

A. AEROSPEC NDT SERVICES, INC

- **AVIATION SALES AND USE TAX ABATEMENT**
- **AVIATION PERSONAL PROPERTY TAX ABATEMENT**

Mr. Stan Thomas, Executive Vice President, Economic Development Authority of Western Nevada (EDAWN), presented AeroSpec NDT Services, Inc., and provided a brief overview of the company and abatements sought. AeroSpec is an aviation company that provides non-destructive testing laboratory services for the commercial aviation. Mr. Thomas was joined by Mr. Ed Gordon, COO of AeroSpec.

Mr. Gordon advised that companies involved in commercial or military aircraft send their equipment to AeroSpec to have a complex set of non-destructive testing performed on the equipment to certify there are no delamination's, or pockets of air within the structure of the particular part of the aircraft. In addition to aircrafts, AeroSpec is also a certified qualified supplier to the pipeline industry in Mexico, following behind recently completed welding in trucks with sophisticated equipment to ensure the welds are sufficient.

There are advantages to the company relocating to Reno, Nevada. It would be possible for the company to ship and have customers' parts back within 24 hours. Also, the University of Reno is contemplating offering composite engineering which could lead to a relationship with AeroSpec where the university could perform various test and publish the results using AeroSpec's equipment.

Governor Sandoval asked whether an absolute decision has been made to relocate to northern Nevada. Mr. Gordon confirmed and noted that senior management is also looking to relocate.

Governor Sandoval inquired the skill set sought in potential employees. Mr. Gordon advised there are three levels within the company. Level I and Level II will operate the basic equipment and Level III will certify that the results are correct.

Governor Sandoval asked whether the company intends to hire locally. Mr. Gordon confirmed this is accurate.

Dr. Dana Bennett asked how the company anticipates engaging with the community. Mr. Gordon responded he will be a key spokesman as he is active in 15 organizations and the interest in this topic is high.

AMERICAN OVERSIGHT

Lieutenant Governor Hutchison thanked Mr. Gordon for his presentation and noted that the aerospace sector is a priority of GOED. Lieutenant Governor Hutchison asked Mr. Gordon to elaborate on his goals of Nevada's future in the aerospace industry and business. Mr. Gordon noted that some of the major complexities of building airplanes under composite reinforced plastic is the cost of the non-destruct testing and the fact that there are not enough qualified suppliers. Once the company is qualified, they will be a very competitive supplier within Nevada.

Lieutenant Governor Hutchison inquired whether Mr. Gordon believes Nevada is well-positioned to continue to grow the aerospace defense sector. Mr. Gordon confirmed this is his belief.

Lieutenant Governor Hutchison asked whether the $6.6M in capital investment will result in the workforce continuing to grow. Mr. Gordon confirmed that the workforce will continue to grow and noted that some companies are requesting that the equipment be brought onsite to perform the testing.

Governor Sandoval asked whether the company is currently testing. Mr. Gordon noted that when the capital is in place, it takes around eight months to be operational.

A MOTION WAS MADE BY DR. DANA BENNETT TO APPROVE THE APPLICATION FOR AN AVIATION SALES TAX ABATEMENT, AND AN AVIATION PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5A. THIS MOTION WAS SECONDED BY MR. DAN KLAICH. THE MOTION PASSED UNANIMOUSLY.

B. C4MINING COMPANY

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Perry Ursem, Vice President of Business Retention and Expansion for the Las Vegas Global Economic Alliance (LVGEA), presented C4Mining Company, and provided a brief overview of the company and abatements being sought. C4 provides block chain services for the cryptocurrency industry. C4 is not a financial services company, but rather an IT solutions provider that establishes connections between computer networks to allows cryptocurrencies to be mined and then transactions recorded anywhere in the world on the block chain. Mr. Ursem was joined by Mr. Dan Hunt, Founder and CEO.

Mr. Hunt noted that while many businesses in the cryptocurrency mining operations are based outside of the United States, C4 leased a small building in Las Vegas that has been turned in to a Research and Development facility. The company decided to relocate to Nevada after Bill 398 was passed, showing that Nevada is progressive and the legislature is interested in the technology C4 is building and willing to listen to changes.

AMERICAN OVERSIGHT

Governor Sandoval asked Mr. Hunt to explain mining cryptocurrency. Mr. Hunt stated it is a very complex mathematical problem and the company utilizes specialized computers that solve those problems, and then once they solve those problems, they get awarded the next block on the block chain. If an individual was going to send $1,000 through cryptocurrency, it would have to go through the block chain to have that happen. Once each block is solved, then that block says, okay, this is a real transaction, and then it moves on to the next block.

Governor Sandoval noted the average wage of $40.77 and asked Mr. Hunt if he felt confident he would find the right employees in southern Nevada. Mr. Hunt confirmed and noted he had looked into programming and block chain technology developers prior to relocating to Nevada. In addition, Mr. Hunt feels confident the skilled labor and subcontractor talent is available in southern Nevada, and the company will be collaborating with Cascade Financial with regards to customer service to handle the 24-hour customer service demand.

Secretary of State Cegavske noted the need for a 100K-sqaure-foot facility and inquired whether the current facility leased could be added onto. Mr. Hunt answered, no, there is not the option to add on to the current facility. Mr. Hunt added that one of the recent developments since submitting the application is putting the Miners into mobile data centers. The mobile data centers are 20-foot shipping containers that can be placed in locations where there is sufficient power. The 100K-square-foot building being sought would be utilized as a manufacturing facility for the container system, and the company would also utilize space for the process of emersion cooling of the computers.

Secretary of State Cegavske noted the need of a surplus of energy and space. Mr. Hunt advised the containers can be stacked seven-high in the facility but will need to be serviced and maintained on a high-level regularly by technicians.

Secretary of State Cegavske asked whether the fluctuating prices are of concern. Mr. Hunt answered that it is not a concern. Consultants have advised that at the end of 2018 bitcoin will be between somewhere between 20,000 and 30,000 a bitcoin. C4 will mine Ethereum, Lead Coin and Monero in addition to bitcoin. C4's core belief is that cryptocurrency, digital currency and block chain technology is the future of the financial system whether it is in the United States or around the world.

Mr. Hunt advised the Board that in addition to C4Mining Company, he, his wife, and Mr. David Frost also founded CryptoU. CryptoU is a company that travels the world teaching crypto education. The technology can be shifted wherever the census shifts. C4 is not a bitcoin mining company, it is a cryptocurrency mining company looking at furthering the block chain.

Lieutenant Governor Hutchison asked Mr. Hunt to elaborate on the idea that Nevada can serve as a place of clustering for C4's cryptocurrency mining company operations? Mr. Hunt responded that the industry is expanding greatly and Las Vegas is the perfect place to be due to the fact that Bill 398 is in place. In addition to the mining company

AMERICAN OVERSIGHT

operations, Mr. Hunt has also invested in bitcoin ATMs and will push this concept moving forward in the future.

Mr. Dan Klaich noted that while the application does not create the number of jobs statutorily required, the quality of the application in terms of the industry and wages far outweigh the requirements of quantity of jobs created.

Governor Sandoval thanked Mr. Klaich for his comments and stated that Nevada wants to remain ahead of the curve.

Director Anderson noted for clarification that the application passed two of the three statutory requirements.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5B. THIS MOTION WAS SECONDED BY MR. JAMES BARRETT. THE MOTION PASSED UNANIMOUSLY.

C. INTERNALDRIVE, INC. DBA ID TECH

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Chris Ault Jr., Vice President of Business Development for EDAWN, presented internalDrive, Inc. dba iD Tech, and provided a brief overview of the company and abatements being sought. iD Tech is a world-wide provider of STEM education who host world-wide education programs. Mr. Ault was joined by Mr. Dylan DeHart, Director of Logistics, as well as the Logistics Manager, Colin.

Mr. DeHart explained that iD Tech provides year-round programs and is going into its 20th summer as a STEM education summer camp. This summer, 58,000 students will attend across the country and internationally. iD Tech typically rents out lab space in universities and bring the kids into those universities. iD Tech uses their own equipment, computers and instructors, thereby giving the campers a great STEM education experience, and it also introduces the students to college life.

iD Tech's mission is to deliver the highest quality, most inspiring and innovative tech knowledge experiences to the next generation of visionaries, one student at a time. The company's core value is to deliver engaging educational experiences. Education is reinvented by offering cutting-edge curriculum in a lively hands-on environment while keeping the safety of each student as the number one goal. The company offers all-girl

AMERICAN OVERSIGHT

tech programs, robust scholarship programs, and proprietary learning platforms and curricula.

Each year, iD Tech has a surplus of equipment that can no longer be used that is donated to local schools. In the previous year, the company donated over $220K of robotics kits, office supplies and sports supplies to schools in San Jose, California. This same donation process will take place in Reno.

Mr. DeHart noted that while several other potential sites were investigated, Nevada was an attractive location to the company because Nevada offers better facilitates, higher vacancy rates, lower taxes, potential for abatements, and the proximity to the main office in California. The main office lease in California expires in December of 2019 and if the experience is positive in Reno, there is a possibility to move the Customer Service Departments, Curriculum Developers, Marketing, and some IT and other support staff from California to Nevada.

Governor Sandoval noted that because the employee relocating to Nevada will not endure a salary decrease, that will result in a 10% raise by crossing the state line. Governor Sandoval inquired whether the company will be hiring locally. Mr. DeHart confirmed this is accurate and advised that seven employees have been hired locally thus far, as well as a few hardware technicians to service and maintain a computer fleet of around 10,000 laptops.

Governor Sandoval asked whether the experience of finding employees has been positive. Mr. DeHart confirmed this is accurate.

Governor Sandoval complimented the company on providing 100% of the healthcare benefits upon hiring, and encouraged Mr. DeHart to reach out to Mr. Brian Mitchell, Executive Director of the Nevada Office of Science, Innovation and Technology, in regards to a possible collaboration between iD Tech and the office with STEM education.

Governor Sandoval also encouraged Mr. DeHart to reach out to Mr. Steve Canavero, Superintendent of Schools, in regards to the donation process and getting the supplies to the students.

Mr. Dan Klaich noted his appreciation of this particular application stating that STEM education for young students, and offering an all-girl program, is absolutely critical for the country. Mr. DeHart thanked Mr. Klaich and noted the company now offers 10 all-girl programs and the number of participants has risen from 14% to 26% in the past four years.

Secretary of State Cegavske noted her appreciation that the company made the decision to collaborate with the Girl Scouts.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A

AMERICAN OVERSIGHT

MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5C. THIS MOTION WAS SECONDED BY DR. DANA BENNETT. THE MOTION PASSED UNANIMOUSLY.

D. MECP1 RENO 1, LLC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Stan Thomas, Executive Vice President of EDAWN, presented MECP1 Reno 1, LLC, and provided a brief overview of the company and abatements sought. Mr. Thomas was joined by Matt Muell, Senior VP with EdgeCore Data Centers.

Mr. Muell explained that EdgeCore is a newly formed, privately held Data Center Owner/Operator and Developer currently in the process of creating scalable campus-style data center developments in six markets across the US, with Storey County in Nevada as one of the six.

It is envisioned that the campus in Storey County will be supporting up to 1M-square-feet of data center capacity that will be developed in phases over time. The investment will exceed $200M to $300M over a five to seven-year period, potentially growing substantially from there, including additional investments by tenants into additional data center infrastructure, servers, cabinets and the equipment that goes inside of the data center. It is believed that the ongoing construction phases will create 300 to 400 construction jobs. In addition, the company will employ 50 full-time employees at the campus. Those types of employees range from mechanical and electrical technicians, telecommunications operations staff, and security guard personnel.

Nevada was chosen for a couple of reasons, it is a disaster risk averse location relative to some of the competing locations that data center operators typically consider, Nevada offers a very attractive total cost of operation to the customer when equating the cost of power and taxes, and finally, the pro-business environment that Nevada offers is attractive. If awarded the abatements, the company plans to start development immediately and have the first building completed by early 2019.

Governor Sandoval asked whether Mr. Muell found the private cost of power in Nevada competitive. Mr. Muell confirmed that the cost of power in northern Nevada is extremely competitive relative to other locations that data centers should be in.

Governor Sandoval asked whether the company has analyzed the Energy Choice Initiative that is going to be on the ballot in the fall of 2018. Mr. Muell stated he has a call setup the following week with Nevada Energy to discuss the initiative.

AMERICAN OVERSIGHT

Governor Sandoval asked whether the availability of green energy in Nevada was also a factor in the decision-making process? Mr. Muell answered, absolutely, it's required by the customer base.

Governor Sandoval asked for the term, substitute market, to be defined. Mr. Muell responded that substitute marked refers to northern California primarily, which is a very large established data center market. It is believed that the latency characteristics of northern Nevada, in terms of just transmitting data back to that area, can support over 50% of the applications that are currently residing in the Bay area.

Lieutenant Governor Hutchison noted that he was particularly pleased with this application as it is a validation of policy making a difference with the Data Center Sales and Use Tax Abatements and the Personal Property Tax Abatements, prompting new companies to consider Nevada.

Governor Sandoval inquired whether the company considered Nevada because the Sales Tax Abatement for data centers had been dropped. Mr. Muell confirmed this is accurate.

A MOTION WAS MADE BY MR. DAN KLAICH TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5D. THIS MOTION WAS SECONDED BY MR. JAMES BARRETT. THE MOTION PASSED UNANIMOUSLY.

E. MONIN, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Stan Thomas, Executives Vice President with EDAWN, presented Monin Inc., and provided a brief overview of the company and abatements sought. Monin is a global manufacturer premium flavoring, and is planning to open up a syrup manufacturing facility in northern Nevada. Mr. Thomas was joined by Bill Lombardo, CEO for Monin.

Mr. Lombardo explained that Monin started 106 years ago in the center of France and currently operate in about 145 countries around the world. Monin Americas manufactures in Clear Water, Florida, and ship to 50 states and 27 foreign countries in this hemisphere. Monin is seeking to diversify manufacturing and to move to a western-base. The growth has been quite steady through the last 20 years since coming to the United States. The first plant was built in Clear Water 20-years ago, and currently has 155 employees.

Monin has been recognized in the Tampa Bay Area as one of the Top-10 employers in the small/medium category for the past eight years. The company's voluntarily turnover

AMERICAN OVERSIGHT

rate is less than 3% over the last 10 years. The company has built a good culture and the goal would be to bring that to Nevada.

While several other locations were investigated, Nevada was chosen. If the abatements sought are awarded, the company would proceed to contract land and then build a brand new facility. The company would hire 30 new employees within the first two years. The intent, if awarded the abatements, would be to move quickly and be operational by mid-2019 with a manufacturing warehouse and distribution facility. Monin also plans to build an innovation and training center as the company supplies flavorings to roughly 80K restaurants, hotels, cafes and bars

Governor Sandoval inquired to the specific skill set sought in future employees. Mr. Lombardo noted the company processes liquid, so a set of people that are somewhat good with chemistry will be needed, as well as, food safety and quality assurance, warehouse workers, managers, production supervisor, warehouse supervisor and logistics supervisors for delivery of the products.

Governor Sandoval asked whether water quality was a factor in the decision-making process. Mr. Lombardo responded both water quality and availability.

Governor Sandoval inquired whether the company would make an absolute decision to locate to Nevada if the abatements sought were awarded. Mr. Lombardo confirmed this is accurate and added that the company is anxious to move quickly and could be signing a purchase agreement within a matter of days.

A MOTION WAS MADE BY DR. HAVINS TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5E. THIS MOTION WAS SECONDED BY MR. RAYMOND SPECHT. THE MOTION PASSED UNANIMOUSLY.

F. SCIENTIFIC GAMES CORPORATION
- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

G. SCIENTIFIC GAMES CORPORATION
- **CATYLST FUND**

Governor Sandoval noted that Agenda Items 5F and 5G would be heard together.

AMERICAN OVERSIGHT

Mr. Perry Ursem, Las Vegas Global Economic Alliance, presented Scientific Games, and provided a brief overview of the company and abatements sought. Mr. Ursem was joined by Mr. Todd Clark, Vice President of Global Facility Services.

Mr. Clark noted that the times he has appeared before the GOED Board has been a wonderful experience and thanked the staff for all of their help. Since the last appearance, Scientific Games has hired six more companies, and it's been an incredible growth trajectory. All six of the companies have been integrated into the infrastructure of Scientific Games and the growth that's been made through those acquisitions have exceeded expectations. Scientific Games itself is doing extremely well and has experienced quarter-over-quarter growth for the past nine quarters.

The current campus is being transformed to not only house gaming, but also corporate and game development teams. The company will be seeking corporate relocations and hires in Nevada filling high-level positions such as individuals who can produce the map models, the content delivery, programming, and coders.

Governor Sandoval thanked Mr. Clark and noted the significant decisions made by Scientific Games to locate their operations in Nevada. Governor Sandoval asked Mr. Ursem whether any additional information was needed to be presented for Agenda Item 5G in regards to the Catalyst Fund. Mr. Ursem confirmed no further information would be presented.

Governor Sandoval asked whether the Catalyst Fund Application per employee grants would be relevant to the 195 jobs that will be added. Mr. Clark indicated the number of jobs being added over the next three years is closer to 300.

Governor Sandoval asked whether the company felt the employees sought could be found in southern Nevada. Mr. Clark confirmed and advised that Scientific Games is working in conjunction with Mr. Frank Woodbeck and UNLV to help develop programs so that when individuals come through the system, they can start immediately.

Governor Sandoval thanked Mr. Clark and noted that it is GOEDs desire for Las Vegas to be the thought leader and gaming capital of the world, and Scientific Games locating their headquarters in Las Vegas validates that.

Mr. Specht asked Mr. Clark to elaborate on his Economic Development experiences. Mr. Clark noted that while he has projects all over the world, Nevada has one of the best teams he has ever worked with, noting Scientific Games has been provided a great amount of support, direction and guidance.

Lieutenant Governor Hutchison congratulated the company on the incredible success noting almost 800 jobs have been created, and that the tax abatements were roughly $500K and the total tax revenue estimates from that abatement exceeds $26M.

AMERICAN OVERSIGHT

Governor Sandoval advised the Board that the 10-year cumulative economic impact of this application, total jobs reported, 789, total payroll supported, $350,811,580, and the total output estimate is $1,537,223,650.

A MOTION WAS MADE BY LIEUTENANT GOVERNOR HUTCHISON TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5F, AND TO APPROVE THE CATALYST FUND GRANT IN AN AMOUNT NOT TO EXCEED $1,825,000, AS DESCRIBED IN AGENDA ITEM 5G. THIS MOTION WAS SECONDED BY SECRETARY OF STATE CEGAVSKE. THE MOTION PASSED UNANIMOUSLY.

H. SMITH'S FOOD AND DRUG CENTERS, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Michael Walsh with the Las Vegas Global Economic Alliance, presented Smith's Food and Drug Centers, Inc., and provided a brief overview of the company and abatements sought. Smith's Food and Drug Centers operates as a subsidiary of the Kroger Company. Over the last 135 years, the company has evolved from a small grocery store into an organization with nearly 2,800 stores across 35 states. Kroger employs over 400K associates in its stores, manufacturing facilities, distribution centers, technology departments, divisions, and Corporate HQ. Mr. Walsh was joined by Mr. Ian Smith and Mr. Zach.

Mr. Smith took a moment to thank the City of Henderson and the LVGEA for their help during this process. The Kroger company has been in operation for 135 years and has close to 2,800 retail locations operating under the name of Smith's, King Scoopers and Kroger. Smith's has 42 distribution centers nationally and 38 manufacturing centers. The Kroger technology department employs over 2,000 people.

Smith's has been evaluating a project in the southwest United States for a little more than a year, and because of the Nevada's strong partnership and collaboration in helping the company connect to the appropriate people, Smith's felt very confident about moving forward in the State of Nevada to open a, close to, 500,000-square-foot distribution center.

Governor Sandoval inquired if the abatements sought are awarded, is it Smith's intent to locate in southern Nevada. Mr. Smith confirmed this is accurate.

Governor Sandoval asked when the company would be breaking ground. Mr. Smith responded the company is looking to operate by the end of 2018.

AMERICAN OVERSIGHT

Governor Sandoval asked where Smith's will be seeking employees. Mr. Smith noted that because of the LVGEAs connections to many work force entities, the majority of employees would be coming from Nevada.

Governor Sandoval thanked Mr. Smith for his positive comments regarding the entities who were involved with helping Smith's make the decision to locate to Nevada.

Secretary of State Cegavske noted that Smith's has wonderful customer service and asked whether the company will build or lease a facility. Mr. Smith advised the company is looking to lease and has been working with the City of Henderson.

Secretary of State Cegavske noted the company also considered Salt Lake City and inquired whether there are Smith's stores in Arizona and Utah. Mr. Smith advised there are both stores and distribution centers in each location. When deciding whether to open an additional facility in Nevada or move closer to the stores, it was determined that Nevada was the better option.

Lieutenant Governor Hutchison asked how the 482K-sqaure-foot building compares to other distribution facilities. Mr. Smith advised that the average distribution facility is between 300-500K-square-feet.

Lieutenant Governor Hutchison advised the Board that the incentives of about $840K will yield over $10M in anticipated new tax revenue. Lieutenant Governor Hutchison spoke a recent experience in Smith's where he received exceptional customer service.

A MOTION WAS MADE BY SECTERARY OF STATE CEGAVSKE TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5H. THIS MOTION WAS SECONDED BY LIEUTENANT GOVERNOR HUTCHISON. THE MOTION PASSED UNANIMOUSLY.

I. VM INNOVATIONS, INC. DBA VMI ENTERPRISES.
- **AVIATION SALES AND USE TAX ABATEMENT**
- **AVIATION PERSONAL PROPERTY TAX ABATEMENT**

Mr. Michael Walsh, Las Vegas Global Economic Alliance, presented VM Innovations, Inc. dba VMI Enterprises, LLC, and provided a brief overview of the company and abatements sought. Mr. Walsh was joined by Mr. Stuart Edenfield and another representative from the company. VM Innovations is currently the largest charter company operating from the Henderson Executive Airport. The company offers quick and convenient travel to and from Las Vegas from anywhere in the US.

AMERICAN OVERSIGHT

VM Innovations operates out of California and if awarded the abatements sought, would look to move the business and be based out of Nevada. Several states were considered and Nevada was chosen as the potential future location site.

VM Innovations intends to hire locally. Typically, the company partners with flight schools to hire employees, but will also utilize analytically gifted graduates from the University of Nevada. VM Innovations will be looking to hire pilots, data analysts, and some specialized kind of skills for repair and maintenance of the planes as well.

Governor Sandoval asked whether the new favorable Aviation Abatements were a significant factor in the company's decision to re-locate to Nevada. The company representative confirmed this was accurate and noted the company looked at both the incentives and the talent pipeline.

Lieutenant Governor Hutchison noted the journey since Assemblywoman Irene Bustamante-Adams introduced legislation on this tax incentive and now seeing the effort being brought to fruition.

A MOTION WAS MADE BY MR. DAN KLAICH TO APPROVE THE APPLICATION FOR AN AVIATION SALES AND USE TAX ABATEMENT AND AN AVIATION PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5I. THIS MOTION WAS SECONDED BY MR. JAMES BARRETT. THE MOTION PASSED UNANIMOUSLY.

6. ABATEMENT APPLICATIONS FOR DIRECTOR APPROVAL:

A. CASCADE FINANCIAL TECHNOLOGY CORPORATION

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Perry Ursem, Vice President for the Business Retention and Expansion, Las Vegas Global Alliance, presented Cascade Financial Technology Corporation, and provided a brief overview of the company and abatements sought. Cascade has developed and manages additional financial technology platform that provides clients with a variety of payment services to reach their customers. These financial technology solutions also grow customer market share for this company through innovative solutions that Cascade continuously creates. Mr. Ursem was joined by Mr. Spencer Schmerling, Chief Executive Officer.

Mr. Schmerling explained that Cascade is a Program Manager, an agent of a bank that allows the company to manage and market various financial products that otherwise would require a banking license to operate. The company markets prepaid cards, both reloadable and non-reloadable, debit cards and enabled wearable technology for tap-to-

AMERICAN OVERSIGHT

pay. The company's newest line of business is enabling cryptocurrency conversion that will allow individuals to use a prepaid card and spend that money in real time at any of the locations that accepts MasterCard, which is the company's preferred network. Mr. Schmerling disclosed that Mr. Hunt from C4Mining is an investor and on the Board for Cascade.

Cascade started in 2014 and has been headquartered in Nevada since then, but has not employed employees. Cascade was originally based out of California but a decision was made to bring all operations in-house instead of outsourcing. One of the biggest areas for the company is customer service called the, Customer Happiness Team. It was realized that being in Los Angeles, it was going to be very difficult to create a 24/7/365 call center in the economic environment with the cost of living, and a decision was made to relocate the company to Las Vegas.

At the time the application was submitted the company had 15 employees, now the company has a range in the low-20s with four recent hires. The company has three basic areas, the Customer Happiness Team, an Operations Team that handles bank compliance like anti-money laundering, Bank Secrecy Act, KYC, know your customer, complaint with all of the Patriot Act rules, and also extensive fraud mitigation, and a Tech Teal located in the Las Vegas office that will be expanding as well.

Mr. Specht asked how Mr. Schmerling sees Nevada capitalizing the Fintech industry. Mr. Schmerling noted the level of significant programming talent available in Nevada. Also, by being located in Nevada, it affords the company the opportunity to pay an attractive starting wage to employees.

Lieutenant Governor Hutchison noted the incentives request is $216K and the new tax revenue estimates total over $23M.

Director Anderson inquired whether the company has a timeline regarding the 20K-square-foot expansion on the facility. Mr. Schmerling advised the company is looking at some time in the third quarter of 2018.

Director Anderson stated that he also believes Nevada is well-positioned in the industry and thanked Mr. Schmerling for mentioning the talent pool available in Nevada and the opportunities of a better cost of living in Nevada.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6A.

B. DELPHI AUTOMOTIVE SYSTEMS, LLC

- **SALES TAX ABATEMENT**

AMERICAN OVERSIGHT

- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Perry Ursem, Las Vegas Global Economic Alliance, presented Delphi Automotive Systems, LLC, and provided a brief overview of the company and abatements sought. Mr. Ursem noted to Governor Sandoval that he laid the foundation for this application through his vision in AB 511. This application was brought to the Las Vegas Global Economic Alliance through Cresa Partners, a national site selection, strategy and operations consulting firm. Mr. Ursem was joined by Mr. Manu Namboodiri.

Mr. Namboodiri explained for clarification that Delphi Automotive Systems, LLC was split into two companies, Delphi and Aptiv, in December of 2017. Aptiv has been a leader in this autonomous space for a long period of time. The company earns $12-$13B in annual revenue and employs 150K employees in 140 countries. The company has visited Nevada on a number of occasions to showcase autonomous driving technology at CES and has always been satisfied with the relationships built in Nevada.

In this industry, the autonomous vehicles need to be running on the roads collecting miles, and having data collected. This cannot be done in a simulated fashion. It is the goal of the company to start this process in Nevada and then expand the foundation in different cities across the globe.

Governor Sandoval noted that he was afforded the opportunity to ride in one of Aptiv's autonomous vehicles and that it was an incredibly seamless ride, prompting him to make innovation his initiative moving forward. Governor Sandoval noted that Nevada was the first state to promulgate regulations to allow for the operation of autonomous vehicles, and both UNLV and University of Nevada have been aggressive in terms of adding faculty and curriculum to allow for companies like Aptiv to be able to hire locally and feel comfortable coming to Nevada.

Mr. James Barrett asked Mr. Namboodiri what his vision is of a global mobility command center. Mr. Namboodiri responded that the data and safety issues need to be understood. If there is not a driver physically in the vehicle, the data and operations could be managed from another city in a different state. For example, a car running in Cincinnati could be managed from Las Vegas.

Mr. Barrett asked whether the company sees Nevada as being the global base. Mr. Namboodiri confirmed that this is accurate.

Mr. Barrett asked whether the Return of Investment would be larger than stated on the application. Mr. Namboodiri noted that he did not want to be too explicit, but the goal is to come back multiple times.

Mr. Specht noted that the passing of the bills by the Legislature and the Governor has put Nevada in a great position and that other companies may follow behind Aptiv. Mr. Namboodiri responded, slowly.

AMERICAN OVERSIGHT

Mr. Dan Klaich noted that the applications presented in this meeting have been an all-star lineup of companies and that it is a joy to know that this is where Nevada is going in 2018 and beyond.

Governor Sandoval noted that it's critical not to underscore the importance of Aptiv's application and possible cascade effect with other companies following to Nevada. It is the belief that 100% autonomy is in the not too distant future.

Director Anderson noted that he believes the vision that Aptiv has going forward is revolutionary when it comes to transportation across the board. Director Anderson had an opportunity to ride in an Aptiv autonomous vehicle and felt that the ride was very natural and stated that, it was certainly adaptive, and the technology itself is integrated so well into the vehicle

Director Anderson noted that he believes that the Board is seeing policy in action by having had created an environment that makes a lot of sense for companies to come and invest.

Mr. Ursem took a moment to thank Mr. Phil Klevorick from the Clark County Economic Development Office for his time and efforts in this process.

Mr. Namboodiri took a moment to thank Director Anderson and GOED for their leadership.

DIRECTOR HILL APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6B.

C. **C. ELLSWORTH ADHESIVES SPECIALTY CHEMICAL DISTRIBUTION, INC.**

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Michael Walsh, Las Vegas Global Economic Alliance, presented Ellsworth Adhesives Specialty Chemical Distribution, Inc., and provided a brief overview of the company and abatement sought. Mr. Walsh took a moment to thank Mr. Cory Hunt for his outstanding work with this application. Ellsworth Adhesives is a global distributor of adhesive sealants and dispensing equipment. Mr. Walsh was joined by Mr. Kirk Westfahl, Director of Operations of Financial.

AMERICAN OVERSIGHT

Mr. Westfahl explained that Ellsworth Adhesives is a mid-western company found in 1974, and a second-generation privately held company by Paul and Patsy Ellsworth. Ellsworth Adhesives is a global company that has two main distribution centers, one in Germantown, Wisconsin, and one in Irvine, California. The facility in California no longer suits the needs of Ellsworth Adhesives and the company is looking to relocate to Reno by April or May of 2019. The company is confident the talent needed in employees in available in Nevada.

Another business unit of Ellsworth, Moldman Systems, is located in Reno. Moldman Systems will be housed in the facility for Ellsworth Adhesives. The company's largest company, Tesla, is also located in the TRIC Business District. Mr. Westfahl believes that Ellsworth Adhesives is one of the companies that is a cascading benefactors of the Legislature because the company services a lot of technology companies, whether it's automotive, electronic or heat dissipation.

Governor Sandoval thanked Mr. Westfahl for his comments, noting his appreciation of companies collaborating, and asked if the abatements sought are awarded, has the decision been made to relocate to Reno. Mr. Westfahl confirmed this is accurate.

Governor Sandoval asked whether the company would hire locally or bring employees from California. Mr. Westfahl advised that two or three would relocate from California but the rest would be hired locally.

Governor Sandoval inquired as to the skill sets the company is seeking. Mr. Westfahl noted that the skill set is varied from top management, production supervisors, managers, mechanical and electrical engineers on the Moldman System side, customer service and distribution.

Mr. Klaich noted again the quality of the companies and applications at this meeting.

Dr. Dana Bennett asked Mr. Westfahl to elaborate on the company's involvement with the community. Mr. Westfahl noted that the company makes substantial investments in safety so that employees can leave work the same way they came. As far as community involvement, the company is involved with three charitable organizations, the American Cancer Society, the Ronald McDonald House and Wounded Warriors. The owners match donations received and in the past three years, the company has raised over $100K in the effort. In addition, the company sponsors the Arts by hosting an event called, Gathering on the Green.

Lieutenant Governor Hutchison noted that this is another great example of an application being submitted as a result of policy and legislation.

Director Anderson asked Mr. Westfahl to elaborate on the internship efforts. Mr. Westfahl responded that the company works with high schools from a summer internship perspective. A few of the employees that work at Ellsworth today started in high school,

AMERICAN OVERSIGHT

including the company's CFO. The company invests heavily in summer interns or summer help, and a lot of those younger folks tend to stay on

Director Anderson thanked Mr. Westfahl and encouraged him to stay in contact with EDAWN when looking to buildout the internship programs and outreach.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6C.

7. WORKFORCE INNOVATION FOR THE NEW NEVADA FUND PROGRAM – (WINN) – FOR DIRECTOR APPROVAL — SNAP PILOT PROGRAM

Mr. Frank Woodbeck presented his report on the SNAP Pilot Program and stated, in September of last year, the Board approved an appropriation of nearly $40K from the WINN Fund to launch a Pilot Program in conjunction with the Department of Health and Human Services, Division of Welfare and Supportive Services to train Supplemental Nutrition Assistance Program, or SNAP, recipients in a 15-week advanced manufacturing entry-level course at Western Nevada College. Successful completion would qualify those individuals for entry-level positions at Tesla, Panasonic and Clickbond, our inaugural industry partners.

We sought 20 participants initially, paying all the tuition and fees, and as of January 22nd the launch date, we had 23 participants. As I told Director Whitley just a couple weeks ago, I will be very happy if 50% of those successfully matriculated. I wanted to give you a report on that first. Three withdraw, five who didn't show much activity in terms of completing, or haven't shown much activity in terms of completing their coursework, two have receiving necessary remedial coursework in math before proceeding, but we have 13 students moving forward rapidly through the program at an 80% pass rate in their testing so far, and 50% of the remaining cohort are women.

We plan for visits from representatives of those employers soon, but as of today, Tesla is planning to visit the WNC campus and talk with the members of that cohort on April 2nd, and they will host those students at the Gigafactory on April 4th where they'll have a tour and they'll go through and receive interviews for potential jobs at Tesla once they successfully complete their work.

Today after consultation with Director Whitley and Administrator Fisher who was with us today in Carson City, I'm requesting funding for expansion of this pilot to add up to 100 SNAP recipients in a second phase of the program, and expand to Reno and now include Truckee Meadows Community College at the Pennington Technical Center as an additional training site. And TMCC has a similar program which is called the P3

AMERICAN OVERSIGHT

Program, the Panasonic Preferred Pathway Program is what's it called, but it's really a generic entry-level course which is virtually the same as Western Nevada College. TMCCs version is an open-entry open-exit, so it allows for great flexibility for a student to pace themselves through the program, but the outcomes will still result in employment with those same industry partners who have all agreed to continue to work with us.

I've outlined the costs and estimates for enrollment in your book, but in this phase I'm also adding a resource component. I want to begin to give us a picture of the impact of programs such as this would have on an individual or on the system. I've engaged a Researcher, Dr. Justin Gardner, who has done work with DHHS before under other grants and is familiar with the population, and is now familiar with our goals as far as the program is concerned.

As an additional benefit to your investment, we will receive up to 45% of the expenditures in matching funds from federal government under the SNAP Employment and Training Program. Those funds, we're going to segregate and use those to add participants to the program, but at a later time.

In conclusion, pending successful completion of phase one, execution of phase two, I would seek to expand to southern Nevada this fall incorporating curriculum offerings at CSM, and focusing on training in advanced manufacturing, and/or healthcare, depending on the available employer partners that we find here in southern Nevada.

Governor Sandoval thanked Mr. Woodbeck and noted that this is a conversation that happened very long ago, in terms of seeking out new candidates to get this type of job training. We had talked about this SNAP population and giving them an opportunity as well, to have access to these high-quality jobs. Collaboration between you and the Department of Health and Human Services, and specifically Mr. Fisher's Division have afforded people who may not have otherwise been aware of these opportunities that now will get that and be able to go to work for a great employer and access to higher wages and benefits.

Lieutenant Governor Hutchison thanked Mr. Woodbeck for all of his work and stated that he is one of the great employees in the State of Nevada. Lieutenant Governor Hutchison asked if the 50% participation is what was expected. Mr. Woodbeck responded that the Division of Welfare and Supportive Services were asked to choose the candidates for this program, and then they would go through a screening process at the college. The outcome of 50% is acceptable and Mr. Woodbeck stated he is happy with it. The funds for the individuals who will not complete the program will either be relocated to the second phase or will fill in the first phase.

Lieutenant Governor Hutchison asked for Mr. Woodbeck to elaborate on the availability of federal funding related to this program. Mr. Woodbeck responded that the Snap Employment and Training Program is sponsored by the federal government, by the matching of 50%. Those funds are segregated because federal funds cannot be matched.

AMERICAN OVERSIGHT

Secretary of State Cegavske thanked Mr. Woodbeck for all of the work that he does for the community.

A Speaker inquired of Mr. Woodbeck what happened with the eight participants who are no longer part of the program. Mr. Woodbeck responded that once the participants are selected, they come and they go through a screening process at the college, then it goes through orientation. With at least three of the participants, they felt they weren't prepared to do that, or they couldn't schedule it even though we schedule flexibility in the classes. As far as the five are concerned, once the work is started, they might have felt as though they could not succeed.

A speaker noted that the numbers are phenomenal. This is a hard-to-serve population, and to get 13 of 23 people moving forward on something that's tough and technical, to getting a couple other people who are getting needed remedial work, is just a phenomenal service.

Mr. Klaich stated to Governor Sandoval that this program reflects an evolution of policy that started back when you revamped the economic development structure of the entire State. The first thing you did was bring higher education in the system, represented by the Chancellor here today. Then the big brother of this program was the Knowledge Fund, which you brought into legislation, then funded. And then we had brought in the WINN Fund, which incorporates the community colleges, because we found that the Knowledge Fund was specifically aimed at our Research Institutions and DRI. This really completes that circle from the original legislation to this program here today.

Governor Sandoval thanked Mr. Klaich for his comments and stated that other states are starting to look at Nevada's model and copy it.

Mr. Steve Fisher, Administrator for the Division of Welfare and Supportive Services, reported on the SNAP Pilot Program and stated that his staff are very excited; the SNAP recipients are very excited. The fact that we have 13 SNAP recipients who are going to successfully complete this certification course, and with the connection with these three businesses, are going to obtain a job that earns between $14 and $16 an hour, it's going to move these individuals to self-sufficiency.

Another point is that all of these recipients, not only are they receiving SNAP benefits, but they're also receiving Medicaid. So, that's going to move them off two public assistance programs by achieving a job that earns $14 to $16 an hour. So, that's fantastic. So, I am very excited for this next opportunity, if the Board so chooses to approve this today. I'm looking forward to, you know, running 100 SNAP recipients through this pilot in the north, and then expanding that to southern Nevada.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A REQUEST FOR FUNDING FOR PILOT PROGRAM, NOT TO EXCEED $210,000 AS DESCRIBED IN AGENDA ITEM 7.

AMERICAN OVERSIGHT

8 **Performance Measures Report** - Bob Potts, Research Director

Mr. Bob Potts presented the GOED Performance Measures report covering economic development activity in Q4 of 2017.

Pages 1 and 2 of the report talk about our business development activity, both in our office and RDAs across the State dealing with different partners. I'm going to talk mostly about the 4th Quarter of 2017, but to keep things in context, I'm going to also talk about all of 2017 because we have a complete calendar year worth of data now to talk about. Q4, 719 jobs brought in by 15 assisted companies. Looking at how those are broken out, they're about split even between incentivized and non-incentivized companies. Looking at 2017 as a whole, there is 6,014 initial jobs, those are the ones that we look at, at the contracts out to two years. And then once those are fully built out, out to 9,681, 74 companies in 2017 is what we worked with.

Overall, year-over-year gains. When comparing 2017 to 2016, about a little over 20% gains in all of those measures. Looking at how those companies are split up, most of them were manufacturers. Forty-five percent of them were manufacturers, followed by about a quarter of them, logistics operations, followed by eleven-percent IT. Average hourly wages in Q4 was $25.08. That was up a lot. Over 43% from the previous quarter, right at 60% from the previous year. For 2017, we're up over 8% of what we had averaged across all companies at $19.50 an hour.

The table down in the bottom is a full-year measures. I think the thing that stands out most there is, it's the most initial jobs we've had of any year, in 2017, 6,014 jobs by 74 companies. The buildout number would be also larger except for Tesla, Panasonic in 2014, once they finished building out. If you pull them out of the mix, 2017 was a really good year for us.

The chart up in the upper-right is really helpful to talk about the companies we've worked with, the new companies that have been incentivized, what their contract amount is and what we actually get as far as job counts from DETR. I can look back at their federal Employment Identification Number and see what's showing up and what we contracted for. If I add up all these years we have here, we're 41% above. The actual job counts are 41% above what they contracted for. It takes a little time to get ramped up, that's why you see it's a little below in 2016 and 2017.

Next page on Capital Investment, it was down a little bit in Q4 of 2017, as well as the year as a whole when compared to 2016. Part of the issue that we have with this is, we have Board meetings every other month, and we have quarterly reports. So, I have two quarterly reports a year that include two Board meetings worth of data, and two of them that only include one Board meetings worth of data, Q4 only includes one Board meetings worth of data, so it's a little bit of apples and oranges there.

AMERICAN OVERSIGHT

Recruitment Activity located at the bottom, slowed down in Q4, but that's pretty typical because of the holiday season. Leads and Prospects, however, are both up when you look at year-over-year numbers. Leads up 70% and Prospect is up 66%. The [inaudible] were exactly the same in Q4 of 2017 as they were in fourth quarter of 2016.

The Governor's led Trade Mission to Poland helped bring in an additional 33 leads and 4 prospects, bringing the total active leads that the Global Team is working with to 39, and the Prospect count to 13.

Procurement Technical Assistance Center had an incredibly successful first six months of this fiscal year. Summing up their activity over the first six months of this fiscal year, it's more than any full year that I have on record as far as their activities. And they are quick to give credit to a lot of their partners that they work with, BNI, they work with them, MSBDC, they work with, the local Chambers of Commerce's. They really have a great working relationship in bringing clients to work with these defense logistics agency contracts.

The ESB Program is measured on a semi-annual basis, there were 125 added in the second-half of 2017, bringing the total up to 1,139. That's a 34% increase over the number of businesses that certified in 2016. The solicited numbers in the second-half jumped 888, and that was a huge jump of solicitations and it mostly came from one local government entity in southern Nevada that really pushed with companies to try to submit a quote, bid or proposal on a contact. Because the local governments don't have to report, or they're not required to report until the end of this month, we have no contract information. That will be posted as soon as that's made available on our website, the Governor's website, and LCBs website.

The Film Office is in Q2 fiscal year, so this is the Q4 calendar year, 62 productions bringing the fiscal year to date count to 156 productions, with local productions spent in the State [phonetic] of $24.6M. Down in the lower box, that's the list of those production where there was over $500K spent in the State.

The chart there talks about responses to their level of satisfaction with the service by the Film Office. It looks like it dropped. We need to keep this chart in context. The vertical bar only captures, very good. If I were to put, good, fair, poor and very poor, you'd have one little line at the very top of this chart that would be kind of meaningless. Folks are really happy with that office.

The Rural Community Development [inaudible] Program was changed because Carson City has recently reverted into the States CBDG Program. The table at the top, as well as the first section of bullets refer to the Rural Programs, and I wanted to stay consistent so we could be apples-to-apples with the previous years. The Rural Allocations, $2.8M, 13 projects, economic impact of 75%. Seventy-five percent of the Funding has economic development impact associated with it. If you roll in the Carson City component, it

AMERICAN OVERSIGHT

comes to a total of $3. 3M in HUD allocation, funding another six projects, bringing the total to 19.

Nevada, state-wide, has had an incredible recovery since the Great Recession. Employment and is now at record levels. Nevada added 42,100 jobs for a total of 1.34M jobs in the State. Unemployment Rate is at 5%. Currently, Nevada has 69K employers in the State, which is up 13K since the Great Recession.

DETR's Research and Analysis Division shows that Nevada now has had 66 months with annual growth greater than that of the United States. For all the target sectors, this is the first time I've done this report where every metric for every target sector, Jobs and Wages has been positive whether you look at fourth quarter to third quarter, or fourth quarter to fourth quarter of last year.

The Q4 Job growth numbers, the fastest was tourism, gaming and entertainment, followed by natural resources, followed by manufacturing and logistics. Looking at earnings, fourth quarter over third quarter, the fastest growth was in manufacturing and logistics, followed by healthcare, and aerospace and defense. Looking at year-over-year growth, the greatest number of jobs we saw was in the IT sector followed by aerospace and defense, followed by manufacturing and logistics.

When looking at Earnings, tourism, gaming and entertainment had the biggest jump in percent terms, followed by IT and natural resources.

Governor Sandoval thanked Mr. Potts and asked if there were any questions from the Board.

A Speaker asked Mr. Potts whether he considers 5% unemployment to be full-unemployment in the State. Mr. Potts responded no and explained that there's still room to move but it's getting really tight. I think that what we're seeing right now in that 5% Unemployment Rate is not so much folks out of work, it's folks migrating from one job to the other. I think in actual terms, if you were to look at the unemployment rate in a different way, as folks actually being out of work and can't find a job, that would be a lower number.

8. DIRECTOR'S REPORT - REVIEW AND DISCUSSION

Director Anderson presented the Director's Report and stated, first off, I think I need to say thank you to the team. This packet represents a tremendous amount of work in vetting the companies and working with our Regional Development Authorities, and working with the Secretary of State's Office, the Lieutenant Governor's Office, and of course all of our different agencies, Tax Department as well. And so, I just want to say thank you to them. This packet represents approximately half-a-billion-dollars of capital investment that we've approved here today, along with 654 new jobs that are the initial

AMERICAN OVERSIGHT

job counts. And on the forecast side of it, up to 1,600 new jobs. That is really impressive, and especially as they come to us and say, you're the most business-friendly state, we're happy to work with you, it really is amazing to see that policy in action.

Today we saw, not only the general abatements, but the Data Center Abatements, the Aviation Abatements, folks that are because of AB 69 and Cory's work, as well as Ms. Bustamante-Adams work this last session. We've opened the doors and sort of removed a lot of the obstacles, and that's of course part of the whole New Nevada vision. And so, it's very exciting to see those things, having been in the Legislature and passed those tool sets, now being able to execute on those is really a privilege.

I want to just do some quick introductions as far as some new staff members that we have, and then I'll turn it over to Mr. Armstrong, to go over some things, and then I'll point out some very last items. In the back of our audience here, she's made it all the way to the end, Dr. Grace Chou is our new Director of Advanced Manufacturing. She is working primarily up north here to work with our advanced manufacturers and build, kind of, a one-voice, an opportunity for them all to talk about what each of them need and try to figure out how we can combine their efforts, whether that's transportation or housing or developments internally. We're excited and privileged to have her on the team. Also, Mr. Matthew Moore, who is our new Rural Director. It was apparently too warm here in Carson City, so he decided to go to Ely instead. Juan Manzano is our new Deputy Director in PTAC, just coming out of the military, and retired there and is now working over in our PTAC Office. And then, Mr. Armstrong, who many of us have worked with in the past. He is our new southern Deputy, Cory's counterpart in the south, and he's been working getting up to speed, but he's brought with him a tremendous amount of talent and some experience that has already proved invaluable to our office. With that, Mr. Armstrong, I'll turn it to you to give us a quick preview on the opportunity zones and what those are.

Mr. Armstrong explained that opportunity zones are a new community and economic development tool that was passed by Congress to incentivize investors to invest in low-income communities. They do this by offering several incentives to investors. One is a tax deferral, so if an investor invests in this program, they can defer taxes until 2026. There's a possibility of a [inaudible] on different percentages if the investor holds the investment for five or seven years. But the real opportunity for the investor is, after 10 years if they keep their investment, any appreciation on that investment is tax-free for them.

An opportunity zone is a Census Tract that's defined as low-income. Nevada, under the definition, has 243 of these low-income Census Tracts in the State. The Governor can designate up 25% of those Census Tracts to be opportunity zones, and with that comes the process of defining and really determining what should be opportunity zones in the State.

GOED, along with BNI, has done a lot of work to set a baseline and reach out to local municipalities to find out where the opportunities are and the critical needs, investment opportunities, for the State. BNI did a lot of work on setting a baseline where we know that there's current investment in similar programs like new markets, tax credits. Also,

AMERICAN OVERSIGHT

low-income housing Tax Credits in many other programs. And then on top of that, myself in the south and Cory up north, have worked with local governments to identify Census Tracts that would be priorities for locals. There is more need than the possibility of us designating them. I have a list of over 100 Census tracks in the State. The Governor has the possibility of designating 61.

With that, we're working on the ability to prioritize based off of, truly where the locals have the need, and then off of some things that align with the goals of the State, whether or not that deals with affordable housing, or some investments in the critical areas that GOED has. We are working with some national partners. Fortunately, we've been able to make contact with the group that really spurred this on the federal level, is the Economic Innovation Group. Cory was able to meet with the President of that company and really put us in contact with some national folks so we can collaborate on a national level to see what other states are doing, learn the lessons learned from those states, and make sure that we do this as best as possible.

The process moving forward for us to do that is, one, we're going to continue to work with BNI and the locals to really define the priorities, but we're going to develop a website which should be up, hopefully, the beginning of next week to solicit public comment for this as well. And that website is going to be a few things. It's going to be an interactive map. We've teamed up with Policymap that has really generated the national maps for this, and there is a lot of underlying data and overlays that we're able to access for that such as housing, unemployment, education and other indexes to really fine tune the prospects of prioritization. And then in addition to that, we've been receiving what other states are receiving in information when they're soliciting, their public comment, and really fine-tuning where the priorities are for that as well, to make sure that we're capturing the information that we need to make the decisions.

After that, we'll really have to work with BNI to make the selections so we can recommend to the Governor where those Census Tracts would be located. The timeline for nominating Tracts is pretty short. Based off of the legislation, there was 90 days from the enactment for us to nominate the Tracts to the Treasury Department. That date is March 22nd. However, the Treasury has issued the ability for the Governor to ask for a 30-day extension, and we've been in contact with the Governor's Office and we expect to have that extension. So, we'll have until April 20th to make those nominations. With the website going up at the beginning of next week, we should be able to get about 30 days of public comment in place to make sure that we hear everybody's voice.

Governor Sandoval noted the importance to make sure that all of the entities and communities are informed and aware of what is happening.

Director Anderson finished his report by stating that the bulk of the Director's Report is available in the packet itself. The first four items are from our International Division. It's amazing how much work they do on such a small team. As most of you know, Mr. Chris Sanchez went on to greener pastures, and Jared Van Wagner [phonetic] has picked up that torch and has run with it, and done a tremendous job just out of the gate. He and his team, again, just do so much work and effort with such a small team. They have an advanced mission coming up in a few weeks where they'll go and prepare, and figure out

AMERICAN OVERSIGHT

where the best places to go are, not only where we can find the most partners, but where it makes sense for Nevada to have partnerships there.

We also had an International Economic Development Council, it's item 17 in the Report. The IEDC was hosted in Las Vegas, included Economic Development Agencies from across the world. It was very impressive to see our team—and, Governor, to your point earlier, Nevada is setting the bar very high. A lot of our team presented at that conference, and there was a lot of good interactions and synergies, I think, that went well there.

Our Film Office is also doing a great job. Their Crew and Vendor Directory was recently released in the last quarter. It's impressive to see how much great feedback we get just from that Directory, and I know they're also converting that into an online directory as well pretty soon. With that, Governor, I don't know how many people we normally have at this meeting, but just from seeing what we had down south and doing a head count here, we had over 70 people here today and 12 different companies. So, very exciting to be a part of this and appreciate the opportunity to be here.

10. **STATE OF NEVADA UNEMPLOYMENT RATE UPDATE** - as established by the Research and Analysis Division of the Nevada Department of Employment, Training and Rehabilitation

Governor Sandoval noted that the unemployment rate is remarkable and asked whether any Board Members had questions regarding the Nevada Unemployment Rate Update. There were none.

11. PUBLIC COMMENTS

Governor Sandoval asked if there was any public comment. There was none.

12. ADJOURNMENT

Governor Sandoval adjourned the meeting.

AMERICAN OVERSIGHT

STATE OF NEVADA

GOVERNOR'S OFFICE OF ECONOMIC DEVELOPMENT

BOARD MEETING

Thursday, March 15, 2018

GOVERNOR: Good afternoon, ladies and gentlemen. I'll call the meeting to order. Will you please call the roll?

SPEAKER: Good afternoon. This is the roll call for the Governor's Office of Economic Development, March 15th, 2018. Governor Brian Sandoval?

GOVERNOR: Here.

SPEAKER: Lieutenant Governor Mark Hutchison?

HUTCHISON: I'm here.

SPEAKER: Secretary of State Barbara Cegavske?

CEGAVSKE: Here.

SPEAKER: Dr. Weldon Havins?

HAVINS: Here.

SPEAKER: Mr. Rob Roy? Not present. Mr. James Barrett?

BARRETT: Here.

SPEAKER: Dr. Dana Bennett?

BENNETT: Here.

SPEAKER: Mr. Dan Klaich? Mr. Raymond Specht?

SPECHT: Here.

SPEAKER: We have quorum, Governor.

AMERICAN OVERSIGHT

GOVERNOR: All right. Thank you. We'll move to Agenda Item No. 2, Public Comment. Are there any members of the public present that would like to provide public comment in northern Nevada? I hear and see none. I'm looking for tips for my bracket for the NCAA Tournament. [laughter] So, if anyone wants to come up and public comment on any those, that would be great.

CEGAVSKE: Is there anybody in Las Vegas that wants to make a public comment? It's—whenever it's appropriate, Governor, I just wanted to make a statement before we get into all of the Agenda 5. So, let me know when that's—[crosstalk]

GOVERNOR: This would be the appropriate time, Madam Secretary. And just for purposes of the record, is there any public comment from southern Nevada?

CEGAVSKE: No. We don't have anybody that stood up, and if they stood up, I don't know where they would stand up. It's crowded here.

GOVERNOR: We like it when it's crowded, Madam Secretary. That's a good sign. So, please proceed with your comments.

CEGAVSKE: Thank you, Governor. I just want to have a—again, make this recommendation to the staff that they look at everyone that comes before us and make sure that they are in good standing and have a business license with the State of Nevada. So, we do check them and we did find some concerns in this

AMERICAN OVERSIGHT

packet, but we did call and were able to hopefully get all of those issues remedied before. But I just want to make that, again, known to everybody, that we need to look at that. It does make a difference on how I look at it, and I how I vote. And I will make comments from now on, but at this point, I just wanted to make a general statement. Thank you.

GOVERNOR: Thank you, Madam Secretary. Any further public comment? I hear none. We'll move to Agenda Item No. 3 which are my comments. I don't have any formal comments except to welcome our new Executive Director, Paul Anderson. Very excited that he's here. I had an opportunity to sit down with him yesterday and talk about the Agenda today and what's happening in Nevada. I've also had the honor and privilege of serving with him in his role as the leader in the Legislature in the Nevada State Assembly. He's very experienced at—both through government and in private business. I think he is going to do a fabulous job, and has done a fabulous job. Truly excited for you to be here. Thank you. All right. Let's move to Agenda Item No. 4 which is approval of the January 18, 2018 Board Meeting Minutes. Have the Members had an opportunity to review the minutes and are there any changes?

CEGAVSKE: We have, and I don't see anybody that has from Las Vegas, Governor.

GOVERNOR: All right. If there are no changes, the Chair will accept a motion.

AMERICAN OVERSIGHT

CEGAVSKE: I move for approval of the minutes, January 18th Board meeting.

GOVERNOR: Secretary of State has moved for approval. [crosstalk] Mr. Klaich has seconded the motion. Any questions or discussion?

HUTCHISON: Governor, just if you could note that I will be abstaining since I was not present at that meeting. Thank you.

GOVERNOR: Okay. Thank you, Mr. Lieutenant Governor. All those in favor say aye. [ayes around] Those opposed say no. That motion passes. And if you would mark the Lieutenant Governor having as abstained. I'm going to move back to Agenda Item No. 3. And my apologies, Mr. Specht, I wanted to welcome you to the Economic Development Board. I'm very excited about your appointment. Not sure if you wanted the opportunity to make any comments?

SPECHT: No. I was very honored to receive that call, Governor, and any way I can serve to help the State, I'm more than happy to. That's all I'll say to keep it brief. It's nice to see a room this busy. Let's focus on that. If I may go back to the minutes for one second since I wasn't here at the last meeting. I would like to abstain. Thank you.

GOVERNOR: Thank you very much, sir. And if you would also mark Mr. Specht as having abstained from the vote. All right. Let's get to the main event which is Agenda Item No. 5,

AMERICAN OVERSIGHT

which are the Abatement Applications for Board Approval. Our first Agenda Item is 5A, AeroSpec NDT Services, Inc.

THOMAS: Good afternoon Governor and fellow Board Members. For the record, Stan Thomas, EVP with EDAWN. It's my pleasure to bring before you AeroSpec NDT Services. They're an aviation company that provides non-destructive testing laboratory services for the commercial aviation. They're bringing in $6.7M of capital equipment for the first year, and up to $124M over 20 years. Their average wage is over $31.37. This is a company that makes—hits two out of the three requirements, and we're excited about them looking at the possibility of moving to Reno. At this time, I'd like to introduce to you, Ed Gordon. He's a COO of AeroSpec, and it's all yours.

GORDON: Edward Gordon, Carson.

GOVERNOR: Good afternoon, sir.

GORDON: Thank you very much. Nice to meet you, Governor. We have met a couple of times at some military—like the Purple Heart Group. We've done a lot of research and I—even though I've lived a lot of my life in Seattle, I've been down here with Boeing doing research on facilities when I retired from the military and from Boeing. I've been down here several times and my wife and I decided to settle here, and one of the key areas we looked at was the huge markets in Utah and into California, from Southern California to San Francisco, and then of course up to Seattle, Washington. And all of the—whether it's

AMERICAN OVERSIGHT

rail, whether it's trucking, or whether it's by air, we have tremendous capability to move the products back to the customers.

Now, this service means that somebody like a Boeing or a Goodrich, or whatever—who is involved in commercial or military aircraft, they have to send the equipment to us. And then once we receive it, certify that it is in the condition that the contract calls for, we go through a very complex set of non-destructive testing. These are huge tanks and they have a complex set of software, and what we're looking for—what we call, delaminations or others, that are pockets of air within the structure of the particular part within the aircraft because, in time, it will break, and if it breaks it could be catastrophic.

And in addition to the aerospace and the business jet world, we are looking at pipeline business. We have a series of planned trucks, and trucks come with sophisticated equipment that once the pipeline welders have completed it, we run behind them and run the testing to make sure that the welds are sufficient. And if they are, you know—and if they're not, they come back and they have to complete it and then we have to rerun the test. So, our market is to pursue non-destructive testing within the aerospace and the commercial aerospace arena, and then also the pipelines. We are certified to produce the pipeline business within Mexico. We've already been a qualified supplier for them, and now that we will be starting the business, we will head down there.

AMERICAN OVERSIGHT

Now our average rate is $31.37 an hour. This is an aerospace startup, and we go from $6M capital to about $120 within 15, 20 years. This business could mean that we bring tanks, and send tanks, to other companies, and we operate and bring the tanks back here. So, it's up to the customers how they want the non-destructive testing to be performed. In any case, where we are in this place at Reno, we can be shipping and have their parts back within 24 hours, and that's one of the key areas. Secondly, we thought carefully about the University in Reno, Nevada, where I had the pleasure to attend Command General Staff College, one of the big secrets of the US Army back in the 1980s. I've noticed that the campus is now going into composite engineering, is one of the fields they're looking at, and our business could very well establish a relationship with them to perform various tests and results to be published by the University with our equipment. And, finally, we have lawyers in place and they have completed the bulk of all the filings except— the only one item that's left for the final filing would be the naming of the Board Members. And I've given my names to my present CEO, Frank Narbut, and I would say within a week he should have that completed and then the filing would be completed.

GOVERNOR: Thank you for your presentation, and thank you again for your service to our country. In here it doesn't

AMERICAN OVERSIGHT

indicate whether or not you've made that absolute decision to locate in northern Nevada. Have you made that decision?

GORDON: Oh. I made that decision. I'm here. Frank Narbut has been here several times, and Frank is one who's worked for Lockheed, Boeing, you name it. He's been all around the country. And having him stay here five times, he says, "I'm moving!" So, there's no problem with the senior management being here, and we know that we have the resources to work the training with the—they call them, three levels, in non-destructive testing. Level I and Level II will operate the basic equipment, and a Level III is—as they say in the industry is "next to God." He or she is the one who will certify that the results are correct, and we have that Level III. You can't do the business without Level III.

GOVERNOR: And I believe you mentioned, composite engineering is a degree that you will need for your employees, but I wanted to ask just a broader question. What is the skill set that you'll need if you're going to be hiring 30 individuals?

GORDON: The 30 individuals, they don't have to have a Composite Engineering Degree. We hope that several of them will come over and rise quickly to the Level II, and then hopefully come to the Level III. The government stipulates what you need for Level I, II and III, and a lot of it's years of experience of working, secondly, the experience of leadership out in the fields, and, thirdly, passing a test. You know, it

AMERICAN OVERSIGHT

usually takes five or more years working, that they can achieve that. So, a young graduate, for example, coming out of the University of Nevada could very well easily come into a Level II, work his way up and even be a very significant player at a Level III, a Non-Destruct Test Engineer, which is fairly high.

GOVERNOR: And then my final question is, is it your intent to hire locally?

GORDON: Yes. It's our intent to go locally. That's why we came here.

GOVERNOR: Yeah. And I'll—perhaps I'll leave it for—we have a former Chancellor of the University System—

GORDON: Oh.

GOVERNOR: That also sits here. So, I know he can talk a lot about the university system, but just—you may or may not be aware that there's been a substantial investment into building a new College of Engineering at the University of Nevada which will be—

GORDON: I've heard about [crosstalk] it and we were very happy about that.

GOVERNOR: All right. Thank you. I have no further questions. Any other questions from northern Nevada? Ms. Bennett?

BENNETT: Thank you, Governor. And welcome, Mr. Gordon. I really enjoyed looking through your application and I was particularly struck that this would launch essentially a new

AMERICAN OVERSIGHT

industry for the Reno area, and I think that's a very exciting thing to take note of. And you noted later on in your site selection factors that you looked in particular at the quality of life here, and I liked that you added that too, to your application. Could you talk a little bit about how you anticipate your company will get engaged in the community and continue to add to the quality of life in northern Nevada?

GORDON: Well, I will definitely be one of the key spokesmen since I'm in 15 organizations between military and genealogical societies. And everybody is interested, whether it's the F35 or a 787, or what Boeing is doing to the new 777, there's always a chance to talk about that. And I came here over five years ago and I was the groundwork, keeping on the quality of life, and my wife and I just loved it. And as I said, I grabbed Mr. Narbut over here a lot and he's now committed, he's working on purchasing a home here. And we believe that the quality of life in the area, especially—I mean, my drive when I was working in—on a special assignment in California was an hour-and-a-half each way to go to work. That is not—that is not what we hear in Reno. And you can do a lot of things, not to mention the great quality of the scenery and action to go out there and do something with the family and still come back the weekend and go to work.

BENNETT: All right. Thank you.

AMERICAN OVERSIGHT

GOVERNOR: Thank you. Any other questions or comments from northern Nevada? I hear none. Any questions from Southern Nevada?

CEGAVSKE: None. Governor.

HUTCHISON: Governor, can I just jump in here real quick?

GOVERNOR: Of course.

CEGAVSKE: Oh. Sorry. I should have known. Lieutenant Governor. [laughter]

HUTCHISON: I didn't know what Madam Secretary was going to say. I thought she was going to make comment, then she said, nobody had comments. So, I know we've got to move the Agenda along. First off, thank you very much for this application. I just—because there was so much effort and energy spent at the Legislature, and the Governor has made this a priority with GOED and identifying aerospace sector as a sector that we really want to promote, I was just interested in your application in terms of what you had said, was one of the goals of your company was to create a globally competitive aerospace industry around our aerospace non-destructive testing MRA capabilities in your training. I just wondered if you could kind of just speak as somebody who is in that industry, and has a goal towards expanding that industry, what you see in terms of Nevada's future in the aerospace industry and business, given what you currently see the State in terms of—not only just as

AMERICAN OVERSIGHT

general business client, but the things that you've taken advantage of here with your application, like we want you to, like with these tax abatements.

GORDON: Thank you for the question. Being an ex-Boeing person and also working with Lockheed, some of the biggest major complexities of building these airplanes under composite reinforced plastics is [crosstalk] the cost beyond reason. And one of the biggest costs that they found in development was non-destruct testing. There was not enough suppliers, not enough qualified suppliers, and the ones that they had, they found that the—it was a very [inaudible] industry and they needed competition. So, we looked at bases upon—after talking with Boeing and other companies, that once we get qualified, and we will get qualified, we will be very competitive and make this a much growing part of non-destruct testing within Nevada.

HUTCHISON: Thank you very much. Do you see Nevada then as well positioned to continue to grow this aerospace defense section cluster that you talked about in your application?

GORDON: Oh. Yes, I do. And I've talked to a lot of other folks from Boeing and they're looking at—I can't get into the details, but they're looking at Nevada too.

HUTCHISON: Thank you very much. And just last point, you had mentioned in your application you got about $6.6M in capital investment on the equipment side, and you anticipate over

AMERICAN OVERSIGHT

the next 20 years that could be as much as $124M. I assume that—that's a pretty good investment every year, you know, $6M-plus over the 20-year period. Do you see, as you make that capital investment equipment that your—that your workforce will grow, commensurate with that kind of that investment in equipment?

GORDON: Yes. Workforce will grow along with it, and the reason being is that, as we hit spikes, some of the firms—and I might have mentioned this earlier, some of the firms that we deal with, they want us to bring the equipment and our people onsite to perform the testing, and then after they get through a different period, then we can take that piece of equipment somewhere else and then invest in another tank with another customer. So, the driving capital is the brick and mortar, as well as the tanks. And if you've ever seen one of these non-destructive testing tanks—and we have our first one up and running—we'll have to invite you down because it's really aerospace at its best.

HUTCHISON: Great. Well, thank you very much. And appreciate you responding to those questions. I'm happy to support the application. Thank you, Governor.

GOVERNOR: Thank you, Mr. Lieutenant Governor. And just—I heard you just say you're testing as we speak then? So, you're up and running—

GORDON: Well, we're getting there. As soon as we get the capital in place, we have a site, we will—these things

AMERICAN OVERSIGHT

take about eight months. They're that complex, to fabricate, bring in, and then we have to make them certify that it works to the specifications, and that the software—that's the key driver because they—you know, they don't go in a straight line. Some of these parts are, you know, they're in circles and you have to get back into corners, especially the floor beams. And all that has to get checked out, and when that's being done, I think you will find it an interesting adventure to sit there and watch that go on and how fast it will be done, because it's so much computerized and that's the biggest cost, is the tank and all of the computerization that goes into the process.

GOVERNOR: All right. Well, thank you. And I was just thinking to myself that it was almost seven years ago that we were announcing our Economic Development Plan and it included aerospace and some people kind of shrugged their shoulders and said, really? And this is a validation, you know, of that day. I mean, there are other things that we have accomplished, but certainly we're very excited about the prospect of your making the decision to be here and the amount of growth that you're going to have in the future.

GORDON: Thank you, Governor. And as a second-cousin, sixth removed to Kit Carson, I love every day to look up there and see the Carson Mountains.

GOVERNOR: Wow. You're Nevada royalty. All right. If there are no further questions or comments with regard to

AMERICAN OVERSIGHT

Agenda Item 5A, the Chair will accept a motion to approve the Abatement Application of AeroSpec NDT Services, Inc., for an Aviation Sales and Use Tax Abatement and an Aviation Personal Property Tax Abatement, as presented in that Agenda Item.

BENNETT: So moved.

GOVERNOR: Dr. Bennett has moved for approval. Is there a second?

KLAICH: I'll second that motion.

GOVERNOR: Second by Mr. Klaich. Any questions or discussion on the motion? I hear none. All in favor say aye. [ayes around] Those opposed say no. That motion passes unanimously. Congratulations and good luck.

GORDON: And thank you very much for your time, sir.

GOVERNOR: You're very welcome. Thank you. Agenda Item No. 5B, C4Mining Company.

URSEM: Okay. Here we go. Okay. Thank you, Governor Sandoval, Lieutenant Governor, Madam Secretary, Director Anderson, and Members of the Board. For the record, Perry Ursem, Vice President of Business Retention/Expansion for the Las Vegas Global Economic Alliance. Here today in show of support for the application submitted by C4Mining Company. C4 provides block chain services for the cryptocurrency industry. C4 is not a financial services company, but rather an IT solutions provider that establishes connections between computer networks to allows

AMERICAN OVERSIGHT

cryptocurrencies to be mined, and then transactions recorded anywhere in the world on the block chain.

This company is exploring their options to locate operations in southern Nevada. This endeavor would create 13 new high-tech computer programming jobs producing an average hourly wage in excess of $40.00 an hour, with capital investment projections totaling approximately $25M. The application meets the requirements set forth by the Governor's Office of Economic Development, has full support by the Las Vegas Global Economic Alliance. And with me today from C4Mining is Mr. Dan Hunt, Founder and CEO, who will provide further insight to his company. Mr. Hunt?

HUNT: Thank you, Perry. Thank you, Governor, Lieutenant Governor, Madam Secretary, Members of the Board, we appreciate the opportunity. Last week on Friday, my wife and I moved from Pennsylvania and relocated to Nevada. We're very happy to do that. My father retired here, my brother works here, and my sister lives here in Nevada. So, we are excited to be the newest residents of Nevada here. We also have leased a small facility in Las Vegas as our Research and Development facility, to get started so we can start the process of doing the research and development for the type of mining that we are doing.

We have some innovative ideas that we're going to put into place for our mining operations that are very, very different than the other mining operations that are currently around the

AMERICAN OVERSIGHT

world. Our impetus to do this was because in the cryptocurrency world, most of the mining operations are not based in the United States. Most of them are based out of the United States, and we had a problem personally investing money into China, or Russia, or Iceland. So, to solve that problem, we have spent the last year of our lives researching the best way to do it, the best places to do it, and I'm happy to say that Bill 398 that went into law in Nevada about a year ago, is probably the major impetus for us coming to Nevada. That bill showed us that a) Nevada is progressive. They're interested in the technology that we are building, and it showed me that the Legislature here will—is willing to listen to the changes, and that's an environment that I like to work in.

I recently had worked with former Governor Rendell in Pennsylvania. My background is in the film and television industry, and we wrote the tax incentives for the State of Pennsylvania when Governor Rendell was in office, and I enjoyed working with an environment of people that wanted to work with the community. And when I saw 398, I saw the same thing that I saw with Governor Rendell, and that is one of the major reasons that we decided to come and look in Nevada. The State of Florida is heavily, heavily courting us to come there, and Colorado, not as heavy but they've continued to talk to us about coming there. They were very disappointed to see that our new zip code is

AMERICAN OVERSIGHT

89103. [laughter] So, that is the—a quick overview of what we did and how we do it, and why we're here.

GOVERNOR: Mr. Hunt, thank you. And perhaps for some folks could you, like, explain mining cryptocurrency for 1st graders? [laughing]

HUNT: It is a very—it is a very complex mathematical problem, that we have specialized computers that solve those problems, and then once they solve those problems, they get awarded the next block on the block chain. Now the block chain technology is incredible and it is the wave of our future. A different company that my wife and I have that we will be relocating to Nevada as well is called, CryptoU, and we do a five-hour seminar on block chain and cryptocurrency. And I know we don't want to take that kind of time today to do that, but very basically, a computer solves a math problem that then—that then approves the transaction. So, if the Lieutenant Governor was going to send me $1,000 through cryptocurrency, it would have to go through the block chain to have that happen. And once each block is solved, then that block says, okay, this is a real transaction, and then it moves on to the next block. So, that's in a nutshell how it works.

GOVERNOR: Okay. Everybody have that? [laughter] All right. Similar to my question in the last item, what is the skill set that you will be seeking? I mean, these are great jobs. The average wage is $40.77 an hour. So, obviously, it

AMERICAN OVERSIGHT

will be very attractive. What are you looking for, and do you—are you confident you can find that in southern Nevada?

HUNT: Yes. Before we even moved here, we looked into the programming and block chain technology developers, and there are a lot of those people that are located here in Nevada right now in the Las Vegas area. That was a big factor for us in the beginning. Skilled labor is another big factor. When we build the units and build all these, rafts and build the infrastructure for the electricity, that was a big factor in our decision to come here. Two weeks ago when we were here looking at apartments, we set down and met with Nevada Energy, who is here with us tonight, and Nevada Energy is very interested in what we're doing and how we're doing it. So, yes—so, all the—the jobs start from Programmers and Developers to skilled labor, and a lot of subcontracting type stuff with other businesses in the area.

So, yes, we believe that all of those things are here and available in the Las Vegas area—as well as customer service. You'll be hearing an application from another company, Cascade Financial, who has customer service of applications here in Nevada and they have call centers. So, we're going to be able to hire Cascade to run the customer service for our company, and they're very well suited in Las Vegas—very well suited to handle that 24-hour customer service, you know, environment that we need to be able to take care of the customers all the time.

AMERICAN OVERSIGHT

GOVERNOR: All right. Well, thank you. I'm going to begin with southern Nevada. Questions from southern Nevada?

CEGAVSKE: Yes. Thank you, Governor. Thank you very much for the presentation, appreciate it. I always thought just getting a new cell phone [laughter] was a way to go, but when I started learning—in the Secretary of State's Office, we have Securities Division, so I've learned about the bitcoin, and learned—not probably enough, about the block chain, but it's very unique. But some of the questions that I have for you are, number one, looking at space. You're—right now you're looking at 100,000-square-feet. How much of that 100,000 right now do you feel you're going to occupy and what more will you need? The place that you're leasing, can you add on to it? Because I know from listening to my staff try to teach me about this, that you need computer space and you need a lot of it, and it keeps growing.

HUNT: Yes. No, we can't add on to the space that we're in—

CEGAVSKE: Okay.

HUNT: Again, I told you my background is in the movie and television business—

CEGAVSKE: Yes.

HUNT: I have actually worked in the facility in the past that we leased here. It's actually a film stage and we looked at that facility because it already has power in it and it

AMERICAN OVERSIGHT

wasn't being used right now, so we took a short-term lease on that just to get into the space right now.

One of the developments that we have made since we started this application process is putting our miners into what we call, mobile data centers, or containers, 20-foot shipping containers. We will modify those 20-foot shipping containers to take about 200 units, and those 200 units will then be placed wherever we can for power—for the best range of power, i.e., a solar farm that is over-producing right now, and there are several of those in the State of Nevada, that we can just take that container and move it there and just basically plug it in because they'll have a satellite dish on the top and they'll be able to connect to the internet.

So, the types of facilities that we will be looking for are, yes, brick and mortar, that 100,000-square-feet—it's just a round number to put on the application. Our goal would be to have a manufacturing facility for our container system. We are also really heavily involved in what we call, emersion cooling, meaning the computers actually go in a tank that's 25—or, negative 25-degrees centigrade, very, very cold, and then they run in there so we don't have the heat problem that we have right now. So, we're looking for space that is probably not city space, we like to be as secretive as we possibly can as to what our locations are for security purposes, but there's plenty of space.

AMERICAN OVERSIGHT

And again, the offices here in Las Vegas have taken us around and shown us things. Actually, Nevada Power has several large, large lots that they took us around to and showed us that are right next to their substations, so the power is already there. So, again, that's part of the reason that—really, when we came here two weeks ago we were not planning on moving to Nevada, but after our meeting with Nevada Power, after our meeting with the local offices here, we realized that a) the people want to work with us, and b) the space and infrastructure is available, we just have to figure out how to make it work.

CEGAVSKE: Okay. And that again, with the electricity, was one of my questions too, is how that space and—because I know you need both, a lot of both. There's—[crosstalk]

HUNT: We need a lot of both.

CEGAVSKE: Yes.

HUNT: But with the containers—

CEGAVSKE: Yeah. That—[crosstalk]

HUNT: You can stack them seven high.

CEGAVSKE: Yeah.

HUNT: So, that cuts my space, you know—

CEGAVSKE: Right.

HUNT: Drastically down.

CEGAVSKE: Because you just [crosstalk] need to house them. You don't need employees necessarily, but you need to house them.

AMERICAN OVERSIGHT

HUNT: But they all have to be serviced.

CEGAVSKE: Yes. [crosstalk]

HUNT: So, you know, one of the reasons that UPS is so successful is, those trucks get serviced regularly.

CEGAVSKE: Uh-huh.

HUNT: So, we hire—and what we're doing in our Research and Development facility right now is, we are writing the protocols of how often our Techs need to go into those containers, shut them down, clean out the fans, clean out all the things, and do all that service. So, the life of that Miner is very important to us because our profit is based [crosstalk] after that first two-years on the contract. So, we need that thing to go for not the three years they say, maybe four years, so it's worth it for us to pay the extra Techs to come in and actually, you know, continue that maintenance on a very, very high level.

CEGAVSKE: Okay. And if I might, Governor, I do have a couple other questions. So, what we saw was the beginning price, we saw this price, and then we've seen it come down. Is that a concern to you, the mobility, because it looks like it really fluctuates right now a lot. [crosstalk]

HUNT: Yeah.

CEGAVSKE: Kind of like with Nevada gambling. [laughter]

AMERICAN OVERSIGHT

HUNT: So, no, it doesn't concern me. Our consultants tell us that at the end of 2018 bitcoin will be between somewhere between 20,000 and 30,000 a bitcoin. Now, our mining facilities will not mine just bitcoin, our mining facilities will probably mine the Top-10coins, which include Ethereum, Lead Coin, Monero. [phonetic] Just this morning we purchased $50,000 in equipment to mine Monero. We have [inaudible] in research and development right now. So, we're looking at all of them. So, no. That up and down, our core belief is that cryptocurrency, digital currency and block chain technology is the future of the financial system whether it's here in the United States or around the world. So, right now we're in that infancy stage where it's kind of up and down, up and down, up and down, but—no, we're not really concerned because we're in this for the long-haul.

CEGAVSKE: Okay. And is it about eight-years-old? Am I reading that right? That that's approximately when it came—

[crosstalk]

HUNT: That is absolutely correct.

CEGAVSKE: Okay. So, it's new, it's young, and so I'm just curious as to your consideration knowing how young it is and the investment you're going to make in this is substantial, so I'm just curious about that.

HUNT: My wife, sitting over here—

CEGAVSKE: Oh.

AMERICAN OVERSIGHT

HUNT: Is a 20-year teacher, science teacher, and retired last year with me to work in the block chain technology. We started CyrptoU with our partner, David Frost, out of Kansas. He's a Business Professor at Bethany College in Kansas. We have a program where we have literally traveled around the world teaching crypto education, and because we have taken—when we first looked at block chain when it was first introduced to me, and I saw the power of what it does and how it does it, a light bulb went off in me and said, this is the future.

Now, will it be in bitcoin? Maybe not. It might be in the Fedcoin that's going to come out in 2021. It might be in the light coin, or the Monero coin, or anything else down the road, but it will be something. Our technology can be shifted to wherever the census goes, so we can shift our technology. So, we're not a bitcoin mining company, we're a cryptocurrency mining company and we are looking at furthering the block chain. My wife and I have over $500,000 invested in different block chain technology companies around the world, and we do that because we believe that block chain is the future.

CEGAVSKE: And I'm thrilled with that, and I know that my Securities Division would love to work and learn. We do have somebody from our office that goes around and also does a PowerPoint presentation, and he tried it on me, [laughter] didn't work. But one of the things that we're concerned about in our arena is the bad players because—

AMERICAN OVERSIGHT

HUNT: Correct.

CEGAVSKE: As we know, there are those out there. So, I'm glad to know that there is somebody that we can come to talk to and work with you on some of those issues that come to us—because, again, this is new and my staff is really good, they understand it, they get it, they've been trying to explain it to me for weeks—you know, just with the block chain—they even had diagrams, they're working on me. So, I just want to thank you for coming and considering Nevada, and moving here, taking that leap, and knowing how young it is in the investment that you're doing. So, thank you.

GOVERNOR: Thank you, Madam Secretary. Other questions from southern Nevada?

HUTCHISON: Governor, just a real quick follow-up. Mr. Hunt, thank you very much for being here today. Welcome to the great State of Nevada. Outside of your family and the importance of your family, the best decision you will ever make is moving to Nevada. [laughter] Ever. The sun just shines different in Nevada than it does in Pennsylvania. So, welcome. [laughter]

CEGAVSKE: It shines.

HUTCHISON: Let me just ask you very quickly, because I think this is such an intriguing area that—as you mentioned, the Legislature has already seen the value in this industry and has pursued this industry. Can you just speak, just quickly, to this idea that Nevada can really serve as a place of clustering for

AMERICAN OVERSIGHT

this cryptocurrency mining company operations? You said that—you said that it really—you didn't want to invest in other foreign countries, I wonder if there is a real demand for your kind of company to be located in the United States, for a variety of reasons, and if Nevada can continue then, you think, on the forefront to attract the kind of companies in your business and in your industry, given where we're at currently.

HUNT: Yes and yes, if you want the short answer.

HUTCHISON: Kind of.

HUNT: This industry is expanding greatly. This week, my wife and I invested in a company, an ICO, or a token of a company, that is an academy to train programmers and train developers on block chain.

HUTCHISON: Yeah.

HUNT: Again, why did we invest in that? Because we believe in the education side of—

HUTCHISON: Right.

HUNT: Of what's going on. We're also invested in a company that has bitcoin ATMs, and we believe that bitcoin ATMs are going to be coming into Nevada. As a part-owner of that company, I'm going to push it very, very hard—

HUTCHISON: Yeah.

HUNT: To have the bitcoin ATMs. There's only one that I know of right now in the D Hotel here in Las Vegas. So—

AMERICAN OVERSIGHT

HUTCHISON: So, you really see this clustering then, of this industry, within Nevada?

HUNT: I do. I believe that Las Vegas is—and again, sorry Reno, Las Vegas is—it's got a great airport, I can get anywhere that I need to get. It is a great standard of living here, and I can easily attract outside people if I need, but UNLV's programs here—and I've worked pretty heavily with UNLVs programs—I was Adjunct Professor at Philadelphia University—by the way, Governor, that's where you want to go, Villanova. [laughter] I was [laughter]—

HUTCHISON: You got to pause long enough to let the Governor respond to that. [laughter]

GOVERNOR: We got them in the final game, all right? [laughter]

HUNT: But working with UNLV to help develop programs in their Business Department that help understand block chain—and Professor Frost and myself, and my wife, are doing that through our CryptoU Program, but we're going to try to reach out, and we've already reached out to the Business Department here to do those kind of things. So, yes, I believe Las Vegas is the perfect place because 398 is in place—

HUTCHISON: Yeah.

HUNT: Because this body is willing to listen to what we have to say, and willing to take the time to get educated.

AMERICAN OVERSIGHT

HUTCHISON: Yeah.

CEGAVSKE: Do I have to take one of those courses? [laughter] I do? Okay. [crosstalk]

HUNT: We're actually talking to the Department of Homeland Security to put together a course for all of their Agents to, you know, just have an overview of what they're looking for.

HUTCHISON: Well, thank you, Mr. Hunt. Again, congratulations on a great application. I know that there will be law makers—Governor, Assemblywoman Irene Bustamante-Adams is here, you know, I'm sure there will be law makers who will be very interested in continuing to pursue the conversation in terms of what we can do to really, really foster this clustering of this industry. So, thank you very much. Thank you, Governor.

GOVERNOR: Any other questions or comments from southern Nevada? From the north, Mr. Klaich.

KLAICH: Governor, just a quick comment. As I go through these, and looking at the last couple of meetings, there's been a lot of discussion on how the quality of businesses and the diversity has improved over the time that you've run this Council. And I just wanted to make a quick comment. When I see a negative come up in one of the statutory requirements, it's going to raise a flag in my mind, and always I'm going to be thinking, is there a reason to overlook that, or to look past it into the application. I think there's a ton of good reasons in

AMERICAN OVERSIGHT

this application, even though we're not creating the number of jobs that might be statutorily required, and they have to do with the type of industry, the wages, and I think where—as the gentleman has so eloquently put, where this is going in the future. So, just a general comment about the application and why—not withstanding that job creation number, I think this is a perfect application for this Board to approve.

GOVERNOR: Thank you, Mr. Klaich. And I appreciate your making the record because essentially you've read my mind in terms of quality over quantity. I mean, these are great jobs in a new area. You referenced the legislation that I had the privilege of signing, and this is what we had in mind when we signed this. I mean, I personally—and I think I can speak for every Member of this Board, is that, you know, we as Nevada want to be ahead of the curve, and this is a technology and an area of development that we want to be on the ground floor of, and now we are. And so, Mr. Hunt, I really congratulate you on your vision and seeing, you know, what the potential is here, and we're very pleased that you've decided to locate in Nevada and specifically Clark County. Any other questions or comments from up here? Mr. Anderson?

ANDERSON: Thank you, Governor. And just to reference Mr. Klaich's comment, just for clarity purposes. This particular application has two out of the three requirements, which is why we're maybe lower on those salary marks, but we do meet the

AMERICAN OVERSIGHT

statutory requirements across the board. So, just in case there was any—I thought of not having that clear.

GOVERNOR: All right. Any other questions or comments on Agenda Item 5B? I hear none. So, the Chair will accept a motion to approve the abatement application of C4Mining Company for a Sales Tax Abatement, Modified Business Tax Abatement and Personal Property Tax Abatement as presented in Agenda Item 5B.

CEGAVSKE: Move for the motion that the Governor just stated.

GOVERNOR: Secretary of State has moved for approval. Is there a second?

BARRETT: Second from Barrett.

GOVERNOR: Mr. Barrett has seconded the motion. Any questions or discussion on the motion? Hearing none, all in favor say aye. [ayes around] Those opposed say no. That motion passes unanimously. Mr. Hunt, thank you. Best of luck.

HUNT: Governor, thank you, and I look forward to working with you and your team, bringing more of block chain technology to Nevada.

GOVERNOR: We appreciate that.

CEGAVSKE: I look forward to those classes.

GOVERNOR: Agenda Item 5C, internalDrive, Inc. dba iD, Tech.

AULT: Good afternoon, Governor, Lieutenant Governor, Madam Secretary, Director Anderson and Board Members.

AMERICAN OVERSIGHT

For the record, I'm am Chris Ault Jr., Vice President of Business Development for EDAWN. I'm presenting an incentive application on behalf of internalDrive, Inc. dba iD Tech. iD Tech is a world-wide provider of STEM education. Their plans of setting up logistical operations in Reno, Nevada will enable them to fulfill equipment requirements for their technology education programs hosted world-wide, which will provide education to approximately 58,000 students this year. Their plans for location in Reno include the occupancy of 61,875-square-foot building, over $5,491,000 in capital expenditures, and an initial employee count of 14 at an average wage of $23.27.

iD Tech has a strong benefits package which includes medical, dental and vision benefits, overtime, PTO, sick and vacation time, merit increases, tuition assistance, retirement plan, profit sharing and 401K. Employee health insurance is covered 100% by the company and commences on the date of hire. iD Tech is requesting the Sales and Use Tax Abatement, Modified Business Tax Abatement and Personal Property Tax Abatement. EDAWN supports their application. I would like to introduce Dylan DeHart, Director of Logistics—Colin is also here, he's the Logistics Manager, to give you a brief summary and answer any questions you may have on iD Tech.

DEHART: Is that thing on?

AULT: There you go.

AMERICAN OVERSIGHT

DEHART: Oh. Thank you very much. It was a pleasure to meet you earlier, Governor Sandoval. I'd like to thank the Board for hearing our application, and would like to thank the Lieutenant Governor, Madam Secretary, and all those in southern Nevada for hearing us out on this. iD Tech, we've been in business for—this will be our 20th summer. We are a STEM education summer camp program. We also have some year-round programs that we offer. This year, we're going to be educating 58,000 students across the country and internationally.

Our typical model is to rent out lab space in universities and bring the kids into those universities. We outfit the labs with our own equipment, our own computers and our own instructors, thereby giving the campers a great STEM education experience, and it also introduces them to college life so they can, you know, get a feel for what it's like to be on a college campus, stay in the dorms, and really spark that hunger to go to college.

Our mission is to deliver the highest quality, most inspiring and innovative tech knowledge experiences to the next generation of visionaries, one student at a time. Our core values are to deliver engaging educational experiences. We reinvent education by offering cutting-edge curriculum in a lively hands-on environment. Our students possess limitless potential, and our staff inspire them by bringing joy and creativity to learning with a personalized approach. We—our

AMERICAN OVERSIGHT

number one goal is also to ensure the safety of every student. We take risks with innovation and technology, but not with our kids. The physical and emotional safety of our students is paramount. We set the standard as the number one technology summer camp in the world. We have innovators who invest in the things that others may thing are impossible to accomplish. We have all-girl tech programs, robust scholarship programs, and proprietary learning platforms and curricula. Our willingness to take risks and be on the cutting edge keeps us one step ahead of the competition.

Another benefit of being on the cutting edge is that, every year we have surplus equipment that we no longer use, so we donate that to local schools. Last year in San Jose, California where our warehouse was located, we donated 125 [inaudible] printers with enough filament to run for a whole school year, over 125 robotics kits, office supplies and sports supplies. And the total of our donations to local schools in San Jose last year was over $220K. We plan on replicating that here in Nevada now what we'll be located in Reno, and we have an Educational Hardware Coordinator that's going to be heading that up and reaching out to local schools to donate all of our office supplies, robotics kits, anything else that we won't be able to use for the next year.

Why did we choose Nevada? We chose Nevada because lower taxes, of course, over the Bay Area. There was lower facility

AMERICAN OVERSIGHT

and common area management fees relative to the area. Here it's in the, you know, $0.48 per square-foot, whereas the Bay Area, it's creeping into the $1.30 per square-foot for warehouse space. There is also a higher vacancy rate and better facilities. In the Bay Area, they are switching over a lot of warehouses to housing or to office space to maximize the profit on their properties. And then there's better quality of life for employees that are moving here. We did not give anybody a pay cut when they moved to Nevada, so they're going to get to enjoy their wage, and that's just part of the values we have as a company. We have profit-sharing, we share the wealth. When we hit our sales numbers, we bring everybody on the company on a company trip from the CEO to the hourly employee. There was also the potential for abatements, which was an attractive part of coming to Nevada. And there's also a proximity to the Bay Area and our main office. We can—you know, there's multiple direct flights into San Jose every day, so we can get back and forth as needed.

And some of the other areas that we're looking at were Phoenix, Sacramento, Tempe, Portland, Austin, Texas, Denver/Boulder area of Colorado. And for the reasons that I stated before, that's why we chose Nevada. We're also kind of operating as a beachhead for a potential main office expansion. Our main office lease is over December 2019, and we're looking to bring—if things work out here in Reno, Nevada, we're looking to

AMERICAN OVERSIGHT

bring Customer Service Departments, Curriculum Developers, Marketing, and some IT and other support staff to Nevada. Thank you very much.

GOVERNOR: Mr. DeHart, thank you—and I want to compliment whoever filled out your application because when I read this sentence, iD Tech camp summer tech programs are held at 150 prestigious campuses including Stanford, UNLV, and MIT. So, that's —we like to—[crosstalk]

DEHART: We know our bread is buttered.

GOVERNOR: So, well done. And, you know, with regard to the employees, as I'm sure you now know, you get a 10% raise just by crossing the state line.

DEHART: Looking forward to that.

GOVERNOR: Yes. But it's interesting, you know, you said you do have some employee relocations, will you be hiring some employees locally?

DEHART: Oh. Yes. We've already hired six employees in Reno. We're—actually, sorry, seven. We just had another one start on Monday. Those are year-round full-time employees with full benefits, retirement, all that stuff. We're also looking to hire two temporary employees, one of which we'll probably keep after our summer season. And so, we've hired a couple of Hardware Technicians to work on our computer fleet. We have a computer fleet of about 10,000 laptops that we have to

AMERICAN OVERSIGHT

house, maintain, image. So, we've hired some Computer Technicians here in Nevada to service that for us.

GOVERNOR: Now that's good news. And your experience has been positive with regard to finding the individuals that you need?

DEHART: Oh. Yeah. There's a lot of talented people in the Reno area.

GOVERNOR: I didn't hear that. Will you say that again? [laughter]

DEHART: There are many very talented people in the Reno area.

GOVERNOR: Thank you. The only other thing I have is—actually, two things. I wanted to compliment you on your healthcare package in providing 100% of the healthcare benefits upon hiring. That's remarkable.

DEHART: Thank you.

GOVERNOR: That's a really big deal. So, thank you for that. And then I would encourage you to reach out to an individual if you have not already, by the name of Brian Mitchell. He is the Executive Director of the Nevada Office of Science, Innovation and Technology. His office is actually right across the way here, but I think there's a lot of opportunity for collaboration between your company and that company—that company, excuse me, that office, because that office was established through a bill proposal by my office and approved by the

AMERICAN OVERSIGHT

Legislature for this very purpose—is to really encourage STEM education throughout the State of Nevada and work with students. So, there may be some really good opportunities there.

DEHART: Yes. And we're hoping that, you know, after we donate all this equipment to Reno schools in the fall of next year, kids will be walking around with their tee-shirts and using our equipment in local high schools and elementary schools, and start asking their parents about, can I go to iD Tech.

GOVERNOR: I suppose you should also reach out to the State Superintendent of Schools, Steve Canavero, C-A-N-A-V-E-R-O, and reference the Nevada 21 Program which is bringing more technology into the schools, and particularly getting the devices to the students. All right. Thank you. All right. Questions from northern Nevada? Mr. Klaich?

KLAICH: Governor, again a comment. I appreciate Director Anderson's comments regarding the last one I made that, the difference between two out of three and three out of three, and I was talking about three-out-of three, and I will tell you, when you say to me, STEM education for young people, and particularly for women, you've got me all in on that. Absolutely critical for our country and anything that we can do here in Nevada to help push that forward, I'm very appreciative of—and everything your company does. So, that was my only comment on that, Governor.

AMERICAN OVERSIGHT

DEHART: Thank you. Yeah. We've—in the last, you know, just four years, we went from 14% girls in our programs to 26%, and we now have 10 all-girl programs that are called our Lexi Café Programs. So, they're more of a casual learning environment, kind of like a coffee shop, and we teach them, you know, activism, entrepreneurship, and coding and tech. So, it's basically really important to our company.

GOVERNOR: All right. Questions or comments from southern Nevada?

CEGAVSKE: Yes. Governor, this is Barbara. I think everybody on this Board just wanted to know what the deal was with the Girl Scouts. Do they get a deal on the cookies? [laughter] How does that work, their partnering with them? But I just wanted to say, thank you for partnering with the Girl Scouts. I think that's absolutely wonderful. It's a great place to go because they have so many after school programs and programs within the Girl Scouts, that I think this is really a good bridge for you to have. And we're just trying to make light of the cookies, but thank you. Lieutenant Governor, did you have—

HUTCHISON: No. I just—congratulations on a great application. I will be more than happy to support it. Thank you very much.

CEGAVSKE: Anybody else?

SPEAKER: No.

AMERICAN OVERSIGHT

GOVERNOR: Any other questions or comments? I suppose my final one, Mr. DeHart, is hopefully we'll see a summer camp at the University of Nevada in Reno.

DEHART: Yes. That would be awesome. It would be a lot easier for us to fulfill too.

GOVERNOR: Yeah. I would imagine the logistics would be pretty simple there.

SPEAKER: [inaudible]

GOVERNOR: Yes. No, we can connect you obviously with who you need to talk to there.

DEHART: For sure. thank you.

GOVERNOR: All right. If there are no further questions or comments, the Chair will accept a motion to approve the Abatement Application of internalDrive, Inc. dba iD Tech, for a Sales Tax Abatement, Modified Business Tax Abatement and Personal Property Tax Abatement as presented in Agenda Item 5C.

CEGAVSKE: [crosstalk] Move for approval of 5C.

GOVERNOR: All right. The Secretary of State has moved for approval. Dr. Bennett has seconded the motion. Any questions or discussion on the motion? I hear none. All in favor say aye. [ayes around] Those opposed say no. That motion passes unanimously. Congratulations and best of luck.

DEHART: Thank you very much.

GOVERNOR: Thank you. We'll move to Agenda Item 5D which is the application of MECP1 Reno 1, LLC.

AMERICAN OVERSIGHT

THOMAS: Okay. For the record, Stan Thomas, EDAWN. And, fellow Board Members, another one, another company that's been exciting to work with. EdgeCore Data Centers will be building a campus of data centers in the Tahoe Reno Industrial Center, $106M of capital equipment over five years, 50 employees, average wage over $23.00, $24.00. At this time, they meet all the requirements, and so of course EDAWN supports this application fully. At this time, I'd like to introduce to you, Matt Muell, who is the Senior VP with EdgeCore Data Centers.

MUELL: [crosstalk] Good afternoon to you, Governor Sandoval, and thank you to the Board for considering this application. EdgeCore is a newly formed, privately held Data Center Owner/Operator and Developer. We are currently in the process of creating scalable campus-style data center developments in six markets across the US. We've chosen Storey County in Nevada as one of the six.

Our campus in Storey County, we envision it supporting up to 1M-square-feet of data center capacity that will be developed in phases over time. Our investment will exceed $200M to $300M, we believe, over a five to seven-year period, potentially growing substantially from there, including additional investments by our tenants into additional data center infrastructure, servers, cabinets, all that—all the equipment that goes inside of the data center. We believe there will be a substantial benefit to job creation, not only from the ongoing construction in phases of the

AMERICAN OVERSIGHT

project, will bring 300 to 400 construction jobs in waves as we develop out the campus.

We also believe we'll employ 50 full-time employees at our campus. Those types of employees range from mechanical and electrical technicians, telecommunications operations staff and security guard personnel. We chose Nevada for a couple of reasons. Number one, it is a disaster risk averse location relative to some of the competing locations that data center operators typically consider. Number two, we believe that Nevada, and particularly northern Nevada, offers a very attractive total cost of operation to our customer. The key inputs for that equation are the cost of power and taxes. So, we appreciate the opportunity to discuss tax incentive savings to help our customers create an environment that's very cost-competitive to some of your neighbors. And then, third, as was mentioned earlier by the mining company, is just the pro-business environment here, and witnessed that from Stan all the way through the local jurisdictions that we've been talking to. Just feels easy to get stuff done here and get buildings coming out of the ground quickly, which helps our company to position well against the competition and deliver a good product to the end customer. If we're granted these incentives, we intend to start our development immediately and hope to have our first building completed by early next year, and we would welcome all of you to come visit and take a tour. That's all I have.

AMERICAN OVERSIGHT

GOVERNOR: Well, thank you. And I appreciate—we have been called the "get it done" State, by some very prominent folks. So, I appreciate your joining in on that. And you've anticipated most of my questions because my first question was going to be with regard to power. And so, you've found that the private cost of power here is very competitive.

MUELL: Yeah. So, we've been evaluating, you know, 20 to 30 markets in the US. I've been doing this site selection for almost 13 years now, prior at a former public data center company. So, we have found that the cost of power in northern Nevada is extremely competitive relative to other locations that data centers should be in.

GOVERNOR: And have you analyzed the Energy Choice Initiative that is going to be on the ballot this fall?

MUELL: We are in the process of that. We actually have a call setup next week with Nevada Energy to discuss that.

GOVERNOR: Okay. Just curious because obviously you're a high-volume user of power.

MUELL: Yeah. We are, to some people's detriment. But, yes, we are evaluating that. And a key component of data center development, and to our customers, is sustainability. So, to the extent that we can use more green resources to produce electricity and utilize them to power the internet, then we're all for that.

AMERICAN OVERSIGHT

GOVERNOR: And you, again, you anticipated my next question. So, the availability of green energy in Nevada is also a factor in your decision-making process?

MUELL: Absolutely. It's definitely required by our customer base, which they just demanded it of us. So, yes.

GOVERNOR: And then the last question I have, looking at your correspondence, it says, accessibility to substitute markets. And I haven't heard the term, substitute market, before. So, will you explain that to me?

MUELL: Sure. That just refers to northern California primarily, which is a very large established data center market. We believe that the latency characteristics of northern Nevada, in terms of just transmitting data back to that area, can support over 50% of the applications that are currently residing in the Bay Area. And there should be an opportunity to transport some of that demand into northern Nevada.

GOVERNOR: I'm glad I asked that question. All right. Any other questions from Board Members? Any questions from northern Nevada? Questions from southern Nevada?

HUTCHISON: Governor, just by way of comment, this is another great example of policy making a difference and paving the way for new businesses and expanded businesses and, you know, economic diversification, things we've talked about for years and years—but under your leadership and the Legislative leadership and direction, we're starting to see this happen because you see

AMERICAN OVERSIGHT

these data center Sales and Use Tax Abatements now, and the Personal Tax Abatements, that we heard testimony about during that session, were so important to attracting these kind of businesses—and again, we know there's very prominent players within this industry that have said that if these kind of opportunities are available, that companies will come here. And we're seeing that in this application and it's just heartening to see these kind of developments, Governor. And just again, underscore the importance of policy and leadership. So, very happy to support this application. Thank you.

GOVERNOR: Thank you, Mr. Lieutenant Governor. Any other questions or comments from southern Nevada? If I might piggyback off the Lieutenant Governor's comments, and what he was eluding to was a bill that was brought forward in the Legislature, and I signed, which dropped the Sales Tax Abatement for data centers. And I guess the bottom line question is this, is you likely wouldn't be here today without that, correct?

MUELL: That is absolutely correct.

GOVERNOR: Which means there was $400M of investment that Nevada would not have received if not for that bill.

MUELL: That is correct, Governor.

GOVERNOR: Yeah. Well, thank you. Again, it's really important. I mean, there—it just makes a difference in terms of very large capital decision. And so, I think it's important for—obviously there is—it's nice to have that validation, but to hear

AMERICAN OVERSIGHT

it directly from the individuals that are making incredibly important decisions with regard to where they're going to deploy their capital. All right. Any other questions or comments? If there are none, the Chair will accept a motion to approve the Abatement Application of MECP1 Reno 1, LLC, for a Data Center Sales Tax Abatement and a Data Center Personal Property Tax Abatement as presented in Agenda Item 5D.

KLAICH: I'll make that motion, Governor.

GOVERNOR: Okay. Mr. Klaich has moved for approval. Is there a second?

BARRETT: Yes. Barrett.

GOVERNOR: Mr. Barrett has seconded the motion. Any questions or discussion on the motion? I hear none. All in favor say aye. [ayes around] Those opposed say no. That motion passes unanimously. Congratulations, good luck, and we look forward to that groundbreaking.

MUELL: Yeah.

GOVERNOR: Thank you. Agenda Item 5E, Monin, Inc.

THOMAS: For the record again, Stan Thomas with EDAWN. And another fine company that we want to introduce to you today. Application for incentives for Monin, and the Sales and Use Tax Abatement, Modified Business Tax Abatement, Personal Property Tax Abatement incentives. They are a global manufacturer of premium flavoring, and is planning to open up a syrup manufacturing facility in northern Nevada. They'll be

AMERICAN OVERSIGHT

investing over $11.8M in capital equipment, hiring 30 folks at the end of the second year, an average wage of almost $23.48. They have an extensive compensation package for their employees. They've hit two of the three requirements, and so EDAWN supports this application for incentives at this time. I'd like to introduce to you Bill Lombardo, the CEO for Monin. It's all yours, Bill.

LOMBARDO: Thank you, Stan. First, thank you very much for giving us the opportunity here, to the Governor and to the Lieutenant Governor, Madam Secretary and the Board Members. It's a great pleasure to be here today. As Stan indicated, we are actually a global company. We started 106 years ago in the center of France, we currently operate in about 145 countries around the world, and I am the CEO just of the operation just of the operation—what we call, Monin Americas.

So, we manufacture in Clearwater Florida, and we ship to 50 states and 27 foreign countries in this hemisphere today. We are seeking to diversify our manufacturing and to move to a western-base. Our growth has been quite steady through the last 20 years since we came to the US. We built the first plant there in Clearwater 20-years ago, and today we have 155 employees in the US, most of which are in Florida although one is proud to be a resident of Las Vegas. And we're celebrated, at least in the Tampa Bay Area where we're based, as one of the Top-10 employers in the small/medium category, for the last eight years in a row.

AMERICAN OVERSIGHT

And that's really based on high treatment of both—not just compensation, but just a lot of intangible benefits that we provide to the employees. Our voluntary turnover is less than 3% over the last 10 years, and we've kind of built a very good culture. And our goal would be to bring that culture here as well.

In our investigation, we have been operating a leased warehouse in California, southern California, for the last six-and-a-half years. So, we looked to California initially, but people quickly said that, you should take a look at Nevada. In our process here, we also looked at Utah and Arizona, but Nevada really got our attention. We are actively seeking land to build, and if given the approval here today for the Tax Abatements, we would proceed to contract land and then build a brand new facility. It would actually be roughly—as we've now figured out, about 100,000-square feet, would be our first phase. We would certainly employ a minimum of 30 employees, just based on the opportunity here that presents us in the west, within the next two years for sure. Base salary would certainly be there—and actually, our base wage which we put on the form does not include profit sharing, but we've consistently paid 5 to 12% profit share to wage employees for the last seven years now. So, that would be above and beyond that wage number.

We would move probably three employees here, but everyone else would be hired locally, and we've done a fairly—I would say,

AMERICAN OVERSIGHT

cursory investigation, into the strength of the employees here, and we find that there's certainly the quality that we're looking for. And so, we would feel very comfortable that we'll find the right quality here. So, our intent is to move forward quite quickly and to be operational by mid-2019 with a manufacturing warehouse and distribution facility.

The other thing that we do is, we are kind of known in our industry as the innovation people, so we actually supply flavorings to restaurants, hotels, cafes and bars. We're currently in about 80,000 locations in North America, and we work with some of the largest chains of restaurants and hotels. And so, we'll be building an innovation and training center here too, and we've done that in Florida, very successful, and we ended up bringing some of the more senior food and beverage and Executives from some of the largest chains—chain restaurants and chain hotels in America to our location, so that we would invite them to the Reno area as well, and I'm certain that they would come and spend some time here, and hopefully begin to appreciate what we are also appreciating from our visits here. I thank you for the opportunity for this, and we hope to get the abatements as indicated, and look forward to the growth into this area here.

GOVERNOR: Thank you. And you've anticipated almost all of the questions that I would normally ask. Curious, you mentioned you would—you're confident that you'll be able to find

AMERICAN OVERSIGHT

the employees that you will need locally. What is it—what is the specific skill set that you would be seeking?

LOMBARDO: Well, it's a—you know, it's a range of things. We actually process liquid, so it's a set of people that are somewhat good with chemistry, safety—food safety and quality assurance, but we have talked to a few of the food companies that are operating here in northern Nevada and they've assured me that those people do exist, and that they are available. We also have, obviously, some—what I call, production workers and warehouse workers, which would be a little bit lower-level, but also need, certainly, high skill. And for those that we don't—if we can't—if they don't have it, we are very big at training. We invest deeply in our employees to train them and to elevate their skills at our expense. And then we're also looking for managers, production supervisors, warehouse supervisors, logistics supervisors, for delivery of the products. So, it's quite a wide-range of skills that I'm confident that we can find.

GOVERNOR: Is water quality a factor in your decision making?

LOMBARDO: Water-quality and availability. So, you know, one of the issues that, you know, we dug deep into was—is to the water availability. We met yesterday with Mark Forry [phonetic] at [inaudible] who is excellent, and actually, I think exemplifies the people that we've met here in terms of their willingness to help business come here. But he explained all the

AMERICAN OVERSIGHT

rules and regulations. And although it's a little bit pricey, it's certainly available and the quality is absolutely high, as he expected to—he challenged us to the quality here versus Florida. And we're actually ironically based in Clearwater Florida, but as he said, that's just a marketing term.

GOVERNOR: All right. Well, thank you. Any questions from northern Nevada? Any questions or comments from southern Nevada on this application?

HUTCHISON: No, Governor.

GOVERNOR: I think you cleared the decks with regard to your presentation. And another exciting opportunity, particularly of a company of your history and reputation. It's an exciting development. And so, you did say, assuming favorable consideration of your application today that you would be locating here?

LOMBARDO: Yes. We're prepared to actually sign a purchase agreement very soon, maybe within days. So, we're anxious to move forward quickly.

GOVERNOR: That's exciting. All right. If there are no further questions or comments, the Chair will accept a motion to approve the Abatement Application of Monin, Inc. for a Sales Tax Abatement, Modified Business Tax Abatement and Personal Property Tax Abatement as presented in Agenda Item 5E.

HAVINS: So moved, Governor. Havins.

AMERICAN OVERSIGHT

GOVERNOR: Dr. Havins has moved for approval. Is there a second?

SPECHT: Second. Specht.

GOVERNOR: Second by Mr. Specht. Any questions or discussion on the motion? I hear none. All in favor say aye. [ayes around] Those opposed say no. That motion passes unanimously. Congratulations and best of luck.

LOMBARDO: Thank you very much. Appreciate it.

GOVERNOR: Thank you. Agenda Item 5F, Scientific Games Corporation.

URSEM: Thank you, Governor, again, Members of the Board. Perry Ursem, Las Vegas Global Economic Alliance. Here today showing support for the application submitted by Scientific Games. With the company's ongoing focus on the global headquarter footprint here in southern Nevada, Scientific Games is exploring options to expand current operations by adding 195 new jobs, producing an average hourly wage in excess of $30.00 an hour over the next couple of years. Capital investment projections total approximately $7M, of which $2M would be invested in capital equipment. Application meets the requirements set forth by the Governor's Office of Economic Development, full support of the LVGEA. And with me today from Scientific Games is Mr. Todd Clark, Vice President of Global Facility Services, who will provide further insight. Mr. Clark.

AMERICAN OVERSIGHT

CLARK: Thank you, Governor, Lieutenant Governor, Madam Secretary, and Board. This has been always a great experience. I know I've been up here a couple times already over the years, and the team that you have that help us out is just phenomenal. Between Perry, and Paul, Stan Thomas, Steve—who's no longer here obviously—and even Frank Woodbeck. I mean, we've all been getting a lot of support from your staff in all different facets. So, it's been a wonderful experience. I want to start off with—I think everybody is somewhat familiar with Scientific Games, but maybe not how much a difference a year can make.

From the last time I was here, we've gone through and acquired six more companies, and it's been an incredible growth trajectory. We've integrated all of those companies into our infrastructure and our—the structure of the company, and it's—the growth that's been made through those acquisitions have exceeded our expectations. And the company's also doing extremely well just on its own. We've had quarter-over-quarter growth the last, I believe, nine quarters now, and we just announced record earnings in revenue.

So, everything is really hitting the way it should be—that we had thought it would with all the acquisitions and the investment here. And we're positioning ourself for the future. One of the latest acquisitions was another company that was actually based here as well, MYX Gaming, who is opening up the

AMERICAN OVERSIGHT

whole sports betting and drill money wager avenues for us. And that is just exploding as well for us.

When we look at the last time we were here, we were making an investment into the campus that we have, and I think we've exceeded all of our capital that we had thought we would invest in the facility, we've loaned that away, and now I'm trying to figure out how I'm going to accommodate the growth because I've got all these people coming in—because we're looking at transforming the campus as, not only for gaming but also more for corporate and our game development teams. So, we're going to be looking for corporate relocations and hires here, we're going to be looking for the guys who can do all the map models, the content delivery, the programming, the coders. So, these are high-level positions that we're going to have here and it's an exciting time at the company.

We just had a corporate retreat out at Lake Las Vegas this last weekend, and just looking at the opportunities within the company, we're all very excited. So, we appreciate all of your help and all your support over the years, and would be more than happy to answer any questions that you have.

GOVERNOR: Thank you, Mr. Clark. And as you said, you have a very positive history before this Board, and there was some significant decisions made by Scientific Games to essentially consolidate operations in Las Vegas and follow through with regard to all of that. And so, I'm very pleased

AMERICAN OVERSIGHT

about this application, and perhaps—and I opened up Agenda Item 5F, which is with regard to the abatements, I also wanted to open up Agenda Item 5G with regard to the Catalyst Fund Application as well so that we could take them both at the same time. Mr. Ursem, I'm not sure if there's any further additional testimony that you wanted to provide in reference to 5G as well?

URSEM: Not at this time, Governor.

GOVERNOR: Okay. Then, Mr. Clark—so, I would assume at least with regard to the Catalyst Fund application is, those per employee grants would be relevant to the 195 new jobs that you'll be adding?

CLARK: Actually, we're thinking it's closer to 300 over the next three years.

GOVERNOR: Even better. [laughter]

CLARK: Going in the right direction.

GOVERNOR: Yes. And given that you've had extensive experience with regard to attracting employees there in southern Nevada, are you confident that you'll be able to find the people that you need there?

CLARK: We're confident that we can find a lot of the positions here, but we're also working with the folks at UNLV and Frank to help develop programs so that we could create—you know, bring people up through the system so they could hit the ground running with companies like ours.

AMERICAN OVERSIGHT

GOVERNOR: And that's what I'm hoping for, obviously, and Mr. Woodbeck there and his experience with the Higher System of Education and the community colleges. And you've already talked about the respective skill sets of the individuals that you'll be seeking. So, again, Scientific Games is a very well-respected company and congratulations on your growth and your success.

And, you know, I've said it before and perhaps I said it the last time you were before us is, you know, we are—we, being Nevada, Las Vegas is the entertainment capital of the world, the gaming capital of the world, but we also want to be the thought leader and gaming capital of the world. So, it truly is important for me, and I know everyone else, that with you making this decision, I think it validates that. That you do indeed—made that decision before and have made this decision now, and your confidence that Las Vegas is the place to be with regard to your headquarters. So, thank you for that. So, I'll begin with southern Nevada. Any questions or comments from southern Nevada?

CEGAVSKE: Yes. Go ahead.

SPECHT: Just one question, Governor.

GOVERNOR: Mr. Specht.

SPECHT: Congratulations on the success of your company—

CLARK: Thank you.

AMERICAN OVERSIGHT

SPECHT: Doing very well. That is absolutely awesome, and when you look at the incentives compared to tax revenue, I'd say that's wonderful. The question I had is, you talked about the economic Development experiences. Just tell me a little bit more about that.

CLARK: So, my Department within Scientific Games is responsible for real estate, facility management and construction, but also economic incentives. So, like I'm working on a project right now in Greece. I've got projects all over the world where we're looking at incentives, and I can tell you that Nevada has one of the best teams that I've worked with anywhere in the world. So, they provide a great amount of support and direction and guidance for us as compared to some other states and countries.

SPECHT: Thank you.

CLARK: And I wasn't paid for that by the way.

[laughter]

SPEAKER: You should be.

SPEAKER: You're about to.

SPECHT: Thank you.

CLARK: Thank you.

HUTCHISON: Governor?

GOVERNOR: Yes. Mr. Lieutenant Governor.

HUTCHISON: Thank you. Mr. Clark, thank you again for being here. I just echo the comments of the Governor and Mr.

AMERICAN OVERSIGHT

Specht about just what a tremendous success the company has been. And, you know, I think back of when you were first here, back in, I think, 2015 maybe—

CLARK: Correct.

HUTCHISON: And I think there were several hundred employees at that time that were coming in, and it was with the merger with Bally's. And then you look at the materials that we have now and you're adding to a 1,200 employee workforce—what? Another 300 jobs?

CLARK: Correct.

HUTCHISON: Then I think—and then I saw in the grant, the proposal grant, the total jobs that are supported just from that grant over—I mean, almost 800. And when you look at—as Mr. Specht had noted, and I just think it's remarkable when you think about, all right, what are we being asked to abate here? It's about $500K in tax abatements. Total tax revenue estimates from that abatement exceeds $26M. You know, this is almost $27M. I mean, that's a real win all the way around, not only for job creation, for economic impact, for having a thought-leader as the Governor said, and an industry leader here, this is an extraordinary application, and extraordinary history with the Board. And I want to thank you for all the hard work, and you've done everything you told us you would do, and it's a real success and a real compliment to you and to the entire company. So,

AMERICAN OVERSIGHT

thank you [crosstalk] and I'm grateful and happy to support this application. Thank you, Governor.

GOVERNOR: Thank you, Mr. Lieutenant Governor. Any other questions or comments? All right. And I think it does—just a follow-up from the Lieutenant Governor, we—we being the Board Members, have the benefit of having all this information right in front of us, but when you talk about the 10-year cumulative economic impact of this application, total jobs supported, 789, total payroll supported, $350,811,580, and the total output estimate is $1,537,223,650. That's big. [laughter]

So, I'm really excited about this application because it truly is another important component of the next chapter of what we're trying to accomplish here in Economic Development in Nevada. And I suppose finally just for purposes of the record before I take a motion, I think it's important to reference the Catalyst Fund portion on 5G, which the maximum aggregate amount paid shall not exceed $1,825,000 for Period 1, $475,000, Period 2, $900,000, and Period 3, $450,000. But as the Lieutenant Governor said, this is money well spent and these are—you know, these are numbers, but they're also people who are going to have the opportunity to work for a really great company. So—

CLARK: Thank you.

GOVERNOR: With that, if there are no further questions or comments, the Chair will accept a motion to Approve the Abatement Application of Scientific Games for a Sales Tax

AMERICAN OVERSIGHT

Abatement, Modified Business Tax Abatement and Personal Property Tax Abatement as presented in Agenda Item 5F, as well as a Catalyst Fund Grant in an amount not to exceed $1,825,000 as presented in Agenda Item 5G. I'll take a motion [crosstalk] from southern Nevada.

HUTCHISON: Move to approve.

GOVERNOR: Lieutenant Governor has—

CEGAVSKE: Second.

GOVERNOR: Moved for approval. Is there a second?

CEGAVSKE: Second.

GOVERNOR: Second by the Secretary of State. Any questions or comments on the motion? I hear none. All those in favor say aye. [ayes around] Those opposed say no. That motion passes unanimously. Mr. Clark, thank you and best of luck.

CLARK: Thank you.

GOVERNOR: Agenda Item 5H, Smith's Food and Drug Centers, Inc.

WALSH: Good afternoon, Governor, Lieutenant Governor, Madam Secretary, Director Anderson and Board Members. For the record, Michael Walsh with the Las Vegas Global Economic Alliance. I'd like to introduce you today to Smith's Food and Drug Centers. Present with me today is Ian Smith, Manager, Economic Incentives and Credits, and Zack Riggs, Senior Program Project Manager, Supply Chain and Logistics. Smith's is requesting a Sales and Use Tax Abatement, Modified Business Tax

AMERICAN OVERSIGHT

Abatement and the Personal Property Tax Abatement. Smith's will have a capital equipment investment of $7—a little over $7M, they will hire 182 employees within the first 24 months of operation at an average wage of $22.76. Smith's also offers a comprehensive benefits package to their employees. They meet the statutory requirements and have the full support of the Las Vegas Global Economic Alliance.

Smith's Food and Drug Centers operates as a subsidiary of the Kroger Company. Over the last 135 years, the company has evolved from a small grocery store into an organization with nearly 2,800 stores across 35 states. Kroger employs over 400,000 associates in its stores, manufacturing facilities, distribution centers, technology departments, divisions, and Corporate HQ.

Before I turn it over, I'd like to thank a few partners for their support and assistance with the project. Irene Bustamante-Adams from Workforce Solutions, Michelle Lindsay from NV Energy, Barbara Coffee and Ken Chopa [phonetic] from the City of Henderson, and to Melanie and Mariah [phonetic] for their support from the Governor's Office. So, without further ado, I'd like to introduce you to Ian and Zach to answer any questions that you may have, and to explain the project in further detail.

SMITH: Great. Thank you, Michael. And I'm not related to the Smith's entity [laughter] although I know that [crosstalk] had any questions about that. Michael, first and

AMERICAN OVERSIGHT

foremost, thank you very much. I'll echo the previous gentleman's comments. This has been an incredibly business-friendly organization that we've worked with from the State down to the City of Henderson. We really appreciate your collaboration. The LVGEA has just been tremendous in connecting us to the appropriate parties. This is a big decision that we're making in the sense that it's our second non-retail operations potentially in the State of Nevada. To get the business friendliness experience that we've had over the last year has been tremendous.

To Michael's point, the Kroger Company has been in operation for a little more than 130 years—135 to be exact. We have close to 2,800 retail operations. That's what most people are familiar with, is our retail stores, and in southern Nevada it's Smith's. If you've been in Colorado, it may be King Supers. If you're in the Midwest, it's Kroger. But we have stores in 35 different states. What most people aren't familiar with is our other operations that we have, including our supply chain network. We have 42 distribution centers nationally, 38 manufacturing centers. Our Kroger technology department employs over 2,000 people. So, we operate in several industries.

What we strive to accomplish is meeting and exceeding our customers' needs, and creating the great customer experience. So, that means, when you go to the store, you want to make sure that you have what you're looking for, hence why we're here

AMERICAN OVERSIGHT

today. We've been evaluating a project in the southwest United States for a little more than a year now, and because of the State's strong partnership and collaboration in helping us connect to the appropriate people, we feel very confident about moving forward in the State of Nevada to open a, potentially close to 500,000-square-foot distribution center. So, we feel very confident. The State support is critical, it's kind of that final step in this process—and thank you very much just for your time. We really appreciate it.

GOVERNOR: Thank you, Mr. Smith. And just for clarity, assuming favorable consideration of your application, is it Smith's intent to go ahead and locate there in southern Nevada?

SMITH: Yes. It's a very strong component in that decision-making process. So, this is certainly one last step to get the answer to be yes. So, yes.

GOVERNOR: Okay. And then when would you anticipate breaking ground on a facility?

SMITH: We would look to operate by the end of the year.

GOVERNOR: No. That's great. And where would you be seeking your employees?

SMITH: Southern Nevada. We've—once again, in large part due to the LVGEAs connections, we've connected with many workforce entities, the College of Southern Nevada as well,

AMERICAN OVERSIGHT

to help identify where to source the talent within southern Nevada. So, the majority of employees would be coming from Nevada.

GOVERNOR: Okay. That's all I have and I appreciate your comments regarding the State and all the entities that are associated with your due diligence and their business-friendliness because that's something truly that we pride ourselves on. And so, that's something that's been consistent during my entire experience on this Board, and it really is a distinguishing factor in a lot of decisions that are made by companies that seek to relocate or expand. So, for all of you that are in the room that were helpful and assisted in all of this, my personal thanks as well. Questions or comments from southern Nevada?

CEGAVSKE: Yes. Thank you, Governor. Thank you very much for being here. Full disclosure, I'm a card-carrying Smith's customer [laughter] and gas. But thank you very much, and what this says to me is that you're staying, and that the grocery stores are staying, you're not going to leave and I'm very excited about that because we've seen so many of the—a lot of the top stores are folding or going away, and this to me means that Smith's is staying. So, I appreciate the high quality of service that you give and product that's brought in. I really mean that sincerely. But to have you be here with a center, a distribution center, I'm really excited about that, I think that

AMERICAN OVERSIGHT

that is really good for us. And I didn't see the location here. Did you find something here, or are you—are you going to build, or are you leasing something?

SMITH: We are looking to lease. We've been working with the City of Henderson—

CEGAVSKE: Okay.

SMITH: For a space there.

CEGAVSKE: All right. And how much space do you need? I don't—oh. The 482,000?

SMITH: Right. Give or take.

CEGAVSKE: Okay. [crosstalk] All right. Give or take a few feet. Okay. And again, the packages—the employees that you have I think are very happy. You treat them very well, but one of the things I wanted to ask you was, I see that you had considered Arizona and Salt Lake City. I thought you were already in Salt Lake City, but I didn't know—are there any Smith's stores in Arizona at all?

SMITH: Yes.

CEGAVSKE: You are there. Okay. And Utah?

SMITH: Yes.

CEGAVSKE: But no distribution centers in either one?

SMITH: Actually, there's distribution centers in both spaces—

CEGAVSKE: Okay.

AMERICAN OVERSIGHT

SMITH: So, as we've grown, we started to grow in such a way that both—

CEGAVSKE: You need them—[crosstalk]

SMITH: So, the real question was whether or not we do some sort of regional expansion or try to move closer to the stores. In this case, the combination of some of the economic incentives were offered, and also location-wise, this felt like it was going to be a better option.

CEGAVSKE: Well, we agree with you. Thank you very much. Good luck.

GOVERNOR: Thank you, Madam Secretary. Any other questions or comments?

HUTCHISON: Governor?

GOVERNOR: Yeah. Mr. Lieutenant Governor.

HUTCHISON: Thank you, Mr. Smith. Thank you for being here and for this application. Just wanted to, again, compliment what you're doing here in the great State of Nevada. Four-hundred-and-eighty-two-thousand-square-feet distribution facility, how does that compare to your other distribution facilities? Is that about where you're usually at? Is it a big facility for you? Is it smaller?

SMITH: Yeah. This is about an average-sized grocery facility for us—

HUTCHISON: Okay.

AMERICAN OVERSIGHT

SMITH: For dry grocery, it's a little larger just because of the number of skews, number of items we carry in the Smith stores, but we would expect it to be somewhere in-between 300,000 to 500,000.

HUTCHISON: Okay. And then I would just note, Governor, as we always like to point out as we have in the last application—all these applications have been great this way, but just the incentives of about $840K yields over $10M in anticipated new tax revenue. So, again, money well spent and, again, good application.

I'll just make a note—you know, I've been a customer of Smith's for my entire life, ever since I was a young man, but I will tell you that I've always had great experiences there, the most friendly cashiers, the most friendly people around. I just have to tell you very quickly, I went to the store on Rampart and Lake Mead, that's what I'm talking about, Rampart and Lake Mead. My wife sent me there to get pizza ingredients for our grandchildren and she said, don't come back without Boboli pizza crust. It couldn't be any other kind of pizza crust. And it's normally right there at the end of the aisle, [laughter] right there, it's normally an endcap. And I, for the life of me, could not find that thing. I passed it a hundred times in that store and—so, anyway, so I finally just in desperation, embarrassed and went and asked somebody and they spent the next 20 minutes with me trying to find this Boboli pizza crust, even getting an off-

AMERICAN OVERSIGHT

duty Manager who was out just shopping—I don't know, found her, she got on the phone—everybody kind of made that happen. They had no idea, you know, I mean I'm just a guy there in my sweatpants on a Saturday night trying to find his wife's pizza ingredients. But you know what? We finally find it next to, of all places, it was the spaghetti sauce. [laughter] It wasn't the pizza sauce aisle. Anyway, all I'm going to tell you is, Rampart and Lake Mead, the best customer service.

SMITH: That's great to hear. It was either there or next to the beer section. [laughter] One of the two. [crosstalk]

HUTCHISON: Thank you. Anyway, Governor, thank you very much.

GOVERNOR: Thank you, Mr. Lieutenant Governor. Love the story. That was great. All right. Any other questions or comments with regard to this application? If there are none, the Chair will accept a motion to approve the Abatement Application of Smith's Food and Drug Centers, Inc. for a Sales Tax Abatement, Modified Business Tax Abatement and Personal Property Tax Abatement as presented in Agenda Item 5H.

CEGAVSKE: I move for approval, Governor.

GOVERNOR: All right. The Secretary of State has moved for approval. I think I know where the second is coming from. [laughter]

AMERICAN OVERSIGHT

HUTCHISON: I will second. And I will just encourage there to be a pay increase for the employees of that store. [laughter] It's the least the State of Nevada can do for those kind of customer service-related employees.

SMITH: Will do. I'll share a story with you later on.

HUTCHISON: Okay. Thank you, Governor.

GOVERNOR: Second by the Lieutenant Governor. Any questions or discussion on the motion? I hear none. All in favor say aye. [ayes around] Those opposed say no. That motion passes unanimously. Congratulations and best of luck.

CEGAVSKE: Oh. And, Governor, just for edification, there is a great Smith's in Carson City as well. Thank you.

GOVERNOR: You know what, I didn't want to pile on, but I literally [crosstalk] was just there a few days ago.

SMITH: Good to hear. [crosstalk]

GOVERNOR: All right. Thank you very much. We'll move to Agenda Item 5I, VM Innovations, Inc. dba VMI Enterprises, LLC.

WALSH: Good afternoon, Governor, Lieutenant Governor, Madam Secretary, Director Anderson and Board. For the record, Michael Walsh, Las Vegas Global Economic Alliance. I'd like to introduce you to VM innovations. Present with me today is Kush [inaudible].

AMERICAN OVERSIGHT

SPEAKER: Yeah. And Stuart Edenfield as well—

[crosstalk]

WALSH: And Stuart, thank you. Welcome. VM Innovations is considering expanding its current operations. They are currently the largest charter company operating from the Henderson Executive Airport. They are requesting Tax Abatement Incentives to include the Aviation Sales and Use Tax Abatement, the Aviation Personal Property Tax Abatement for equipment and aircraft. VM Innovations will have a total capital equipment investment of $785K, they will hire an additional eight employees at an average wage of $40.21. They meet the statutory requirements and have the full support of the Las Vegas Global Economic Alliance. A little bit about VM Innovations, they are a jet charter company operating a fleet of light jets. They offer quick and convenient travel to and from Las Vegas from anywhere in the US. And I'd like to turn it over to Kush [phonetic] to answer any questions that you may have about the project.

SPEAKER: Thank you, Michael. Thank you, Governor, Lieutenant Governor, Madam Secretary, Members of the Board. We're excited to be here today and we appreciate the opportunity to help us grow our business here in the State. And Stuart is—heads our operations as well as a pilot personally, as well. As Michael mentioned, we are a charter company. We operate out of California, as well as here, and our goal is to kind of—with the

AMERICAN OVERSIGHT

purpose of this abatement, to move the business and headquarters and make it—the base be out of Nevada.

And with that, we looked at several different states and it's been kind of an ongoing consulting with different agencies and seeing what kind of abatements and incentives out there available. And the State of Nevada has been definitely on the top of the list, and we'd like to—if approved, and if it makes sense to you, move forward and grow our business here, and move forward and kind of expand. And you've seen the numbers in there.

And whatever possible—with the goals of hiring talent, we'd like to hire the talent locally. We partner typically with the flight schools, and we'll look at University of Nevada as well to see if we can find, you know, recent graduates who are analytically gifted, if you will. Most of the talent will be—we'll be looking at pilots, data analysts, and some specialized kind of skills for repair and maintenance of the planes as well. And so—but whenever possible, we'll look to hire folks locally and grow the company locally, and be based out of here, at our office is in Henderson Executive Airport. So, with that, we're excited to be here and answer any of your questions you may have, and move forward. Thank you.

GOVERNOR: All right. Thank you. And just out of curiosity, and this is a similar comment as I made on that other data center legislation, is that, the Legislature—actually, it

AMERICAN OVERSIGHT

was the Economic Development—Office of Economic Development is the one that sponsored legislation to, I guess—put it this way, make the aviation abatements more favorable. And so, was that a significant factor in your decision that brought you here today?

SPEAKER: Absolutely it was. When we were looking at incentives, we'll look at talent pipeline, we'll look at incentives. Definitely top two. One of the top two, I guess. One was talent, the other was the incentives. So, it was absolutely one of the decision makers then for us.

GOVERNOR: No. And I know it's a little self-serving for me to say it but, again, the proof is in the pudding. And, you know, this was all talked about theoretically and there was indeed some criticism of this type of—of this bill. But at the end of the day, this is another example of a company that wouldn't be here expanding. I mean, you're here, but you wouldn't be expanding. Perhaps you would have expanded somewhere else if not for that bill.

So, again, my compliments to the Office of Economic Development for promoting and presenting that bill, and to the Legislature for approving it. So, I really, again, think it's important to note that. But otherwise, you anticipated my questions. And so, is it—assuming favorable consideration of your application today, is it essentially a done deal that you're going to do what's sought after in this application?

AMERICAN OVERSIGHT

SPEAKER: We look forward to—and excited to move forward. Yes.

GOVERNOR: All right. Thank you very much. Questions from southern Nevada?

HUTCHISON: Governor, just a quick comment just to dovetail on to yours. I mentioned that Irene Bustamante-Adams is here, and as you remember, Governor, during that session she had introduced legislation on this exact tax incentive as well, and then joined forces with you and with GOED to really make this a big bipartisan effort and there was just a lot of support. And these were the days that we dreamed of when—as you said, Governor, we heard testimony about this and considered this, but again—once again, leadership and a very business-friendly environment, and one that is visionary and it's bipartisan. It's one of the great, I think, benefits. And I've said it many times during the time that I've just spent in State Government is that, you know, Nevada is not Washington DC. We're a state that works for Nevadans and works for the common good and across political aisles.

So, I'm very pleased to see this application bring to fruition legislation and policy that we had worked on several years ago. So, I want to welcome you and congratulate you on this wonderful application. We really hope you move all your operations here—

SPEAKER: Thank you.

AMERICAN OVERSIGHT

HUTCHISON: To Las Vegas, and welcome you. Thank you. Thank you, Governor.

SPEAKER: One comment if I can make—I guess I agree with the previous statement made about the incentives team, Mike specifically, kind of guiding us through the process explaining—just being there for us and it's been incredibly helpful. So, we really appreciate that. Thank you.

WALSH: Thank you.

GOVERNOR: Thank you. And thank you, Mr. Lieutenant Governor. Any other questions or comments? The only other thing I wanted to note was your average wage which is $40.21. I mean, that's a significant wage, and by the way, the average one. So, obviously there are some that are higher than that. So, those are good quality jobs that you're bringing to the region. Any other questions or comments? I hear and see none, so the Chair will accept a motion to approve the Abatement Application of VM Innovations, Inc. dba VMI Enterprises, LLC for an Aviation Sales and Use Tax Abatement and Aviation Personal Property Tax Abatement, as presented in Agenda Item 5I.

KLAICH: So moved, Governor.

GOVERNOR: Mr. Klaich has moved for approval. Is there a second?

BARRETT: Yes. Second by Barrett.

GOVERNOR: Second by Mr. Barrett. Any questions or discussion on the motion? I hear none. All in favor say aye.

AMERICAN OVERSIGHT

[ayes around] Those opposed say no. That motion passes unanimously. Thank you very much. Best of luck.

SPEKAER: Thank you, Governor. Thank you [crosstalk] appreciate it.

GOVERNOR: We'll move to Agenda Item No. 6 which are Abatement Applications for Director Approval. The first is 6A, Cascade Financial Technology Corporation.

URSEM: Thank you, Governor, Lieutenant Governor, Madam Secretary, Director Anderson and Members of the Board. Again for the record, Perry Ursem with the Las Vegas Global Economic Alliance. I'm here to today in show of support for the application submitted by Cascade Financial Technology Corporation. Cascade has developed and manages additional financial technology platform that provides clients with a variety of payment services to reach their customers. These financial technology solutions also grow customer market share for this company through innovative solutions that Cascade continuously creates.

This company is planning to expand current operations here in southern Nevada which would add 64 new jobs to the community producing an average hourly wage in excess of $26.00 an hour. Capital investment projections total approximately $1.3M with approximately $730K of that used for capital equipment. I would also like to note that Cascade will cover 100% of the healthcare premium for their employees, so again another value-add for this

AMERICAN OVERSIGHT

company. Cascade's application meets the requirements set forth by the Governor's Office of Economic Development, has full support of the Las Vegas Global Economic Alliance. And with me today from Cascade Financial Technology Corporation is Mr. Spencer Schermling, Chief Executive Office, who will provide further insight to Cascade and their planned expansion efforts.

SCHMERLING: Thank you, Perry, and thank you for all your help. You've been fantastic in this process. Good afternoon, Governor, Lieutenant Governor, Madam Secretary, Director Anderson and Board Members. We appreciate the opportunity to present to you today. Cascade is what you would call a Program Manager, which is a pretty small niche of companies that do that. Basically, we're an agent of a bank—not in Nevada, unfortunately—that allows us to manage and market various financial products that otherwise would require a banking license to operate.

Our primary focus is in four areas. We market prepaid cards, both reloadable and non-reloadable, like gift cards. We market debit cards. We market payment enabled wearable technology, so if you've ever used Apple Pay, we're now enabling a lot of other things to tap to pay as well, including chips and keychains, and fitness devices, and even articles of clothing and so on. And our newest line of business is enabling cryptocurrency conversion so if you have cryptocurrency from, let's say, Mr. Hunt's company, you can take one of our prepaid

AMERICAN OVERSIGHT

cards and spend that money in real time at any of the locations that accepts MasterCard, which is our preferred network. I just thought I'd get that in. And also, under the heading of full-disclosure, Mr. Hunt is an investor and on our Board of Cascade.

Cascade started in 2014. We actually have been headquartered in Nevada since then but we had no employees. We were actually based out of California where we had about 10, 12 employees, and one of the—we made a major shift in our business, and that was that we were bringing all of our operations in-house instead of outsourcing, and one of the biggest areas for us is customer service, which is what we call our, Customer Happiness Team. And we realized being in Los Angeles, it was going to be very difficult to create a 24/7/365 call center in the economic environment, and with the cost of living, and transportation, and all the other issues that plague Los Angeles. And we made a decision at the time to pack up our whole entire company and move to Las Vegas.

At the time that we did this application we had 15 employees, we're now pushing in the low-20s with 4 recent hires, and we expect to, frankly, far exceed the number 79 here within the two years. We provide three basic areas of our company. The most prominent and the biggest is our Customer Happiness Team, as I referred to. We sort of look to Zappos as our inspiration. Although we won't order a pizza for you, we'll do a lot of the things that really separate a company out for providing excellent

AMERICAN OVERSIGHT

customer service. We feel that's been one of the areas that's been neglected in the prepaid industry, is customer service. So, we strive to provide American Express Platinum level customer service—not quite black card level, but at least platinum level, and our cardholders and our clients appreciate that.

We also have a big operations team where we do all the bank compliance like anti-money laundering, Bank Secrecy Act, KYC, know your customer, complaint with all of the Patriot Act rules, and also extensive fraud mitigation. Unfortunately, prepaid cards, debit cards and so on are a great source of traction to fraudsters and we have a significant amount of effort that we spend to thwart their efforts. And then as well, we have a rather large tech team which allows us—the higher wage jobs come from, and currently have about 10 people on our tech team in our Las Vegas office and we'll be expanding that as well. So, thank you again and certainly would be happy to answer any questions you have.

GOVERNOR: All right. Mr. Schmerling, thank you. A very thorough presentation, but my thanks for your making that decision to relocate your entire operation to Las Vegas. I mean, I know that was probably a monumental decision for you, but we're really proud of the fact that you did that. You know, I don't have any questions because you have responded to them, and all the information I needed was contained within the application. And this is for the Director's approval, but I'm very supportive

AMERICAN OVERSIGHT

of it. Any other questions or comments from Board Members on this Agenda item?

SPECHT: May I, Governor?

GOVERNOR: Yeah. Mr. Specht

SPECHT: Thank you. It's great that you decided to come here. It's great to hear that Fintech [phonetic] is looking to our state. This is an explosive industry that that just sprang up. What makes us exceptional? Where do you see our State going to capitalize in the Fintech industry, if I may ask?

SCHMERLING: Sure. Well, first is the talent. You couldn't operate a business like ours without significant programming talent. And we've been very pleasantly surprised with the level of talented programmers and the Fintech community in general here in Las Vegas. I'm sure it's as good up north as well, I just don't have personal experience with it, but here in Las Vegas we found extraordinary—not just programmers, but all of our technologists. We have probably three or four non-programmers in our technology team, and we've been extremely pleased with the quality of talent we're attracting.

Also, we're able to pay a good wage, and a wage that out here means something, where in Los Angeles, you know, if you paid someone—you know, let's say for [inaudible] and skilled job, you know, $15, $16 an hour, it's hard to really make a good living at that wage in Los Angeles. Here, you can actually afford to live

AMERICAN OVERSIGHT

here on that kind of a starting wage. So, we found that the cost of living has been really beneficial.

We also have a Hospitality Trained Workforce, which has been huge for us. When we bring in Customer Happiness Agents, we look for people that essentially are intelligent and happy, and the rest we can teach them. And we just hired someone from the MGM who recently—one of our newer hires and, you know, the casinos do a fantastic job of training their employees and—some of the companies like Zappos, I mentioned them earlier, you know, we find that a Happiness Agent who used to work at Zappos, like I said, some of our staff, we find that they come in with some very, very good qualities and some very good training. So, it really centers around the people I would say.

GOVERNOR: Thank you. Any other questions or comments from southern Nevada?

HUTCHISON: Governor, just a quick comment here about, incentives request is $216K and new tax revenue estimates total over $23M. Again, just a great ROI and great investment, and a great tip of the hat and comment to the company in terms of its growth and its impact on the community. So, we're grateful for you being here and for expanding, and giving us an opportunity to support the application. I hope you have many opportunities with C4Mining and I hope they're wildly successful, and we hope you're successful as well.

SCHMERLING: Thank you.

AMERICAN OVERSIGHT

HUTCHISON: Thank you.

GOVERNOR: Thank you, Mr. Lieutenant Governor. Any other questions or comments from southern Nevada? I hear none. Any comments or questions from northern Nevada? Director Anderson.

ANDERSON: Thank you, Governor. I just had one question on the timing. You're looking at expanding to a 20,000-square-foot facility. Have you got kind of a timeline figured out for that?

SCHMERLING: Well, our staff is hoping sooner than later. We're starting to burst at the seams a little bit. Realistically, we're looking at some time in the third quarter of this year.

ANDERSON: Okay. Great. And I think the Board covered most of the questions I had. So, I appreciate the input there. Frankly, this is—you know, financial technology is—was already stated as an exciting opportunity. I think Nevada is well-positioned as you—and I appreciate you pointing out the talent pool and the opportunities of better cost of living, better standard of living here in Nevada. I'm excited to see it grow. It's nice to see a local headquartered company continue to grow and expand here, and I am happy to support and approve the application.

SCHMERLING: Thank you.

AMERICAN OVERSIGHT

GOVERNOR: Okay. Thank you, Director Anderson. Thank you, Mr. Schemerling.

SCHMERLING: Thank you, Governor.

GOVERNOR: Next is Agenda Item 6B, Delphi Automotive Systems, LLC.

URSEM: Thank you, Governor, Lieutenant Governor, Madam Secretary, Director Anderson and Members of the Board. Again for the record, Perry Ursem with the Las Vegas Global Economic Alliance. Here today in support of an application by Aptiv. This is an exciting application that I believe has the potential of taking Nevada to a new—to new levels of recognition within the fast-growing autonomous vehicle industry.

Governor Sandoval, if I may point out, your vision in 2011 was State leadership to create special autonomous vehicle licensing legislation through AB 511, and then through the years through additional Senate Bills has laid a foundation for what we are about to hear today—and an opportunity not only to hear this, but also to see what Aptiv's vision is for southern Nevada.

Over the next two years, you can see through this application this opportunity will create 50 new jobs, producing average hourly wage in excess of $32.00 an hour. And capital investment projections are at approximately $1M through this effort. This application was brought to the Las Vegas Global Economic Alliance through Cresa Partners, a national site selection, strategy and operations consulting firm, and I would

AMERICAN OVERSIGHT

like to acknowledge and thank, from Cresa Partners, Mr. Todd Olend, Managing Director. Thank you. This application meets the requirements set forth by the Governor's Office of Economic Development, has full support of Las Vegas Global Economic Alliance. I would now like to direct the Board's attention to Mr. Manu Namboodiri, Senior Director—I'm still not getting it. I'll get it one of these days. Senior Director of Aptiv who would provide further insight to this opportunity, this vision Aptiv has for southern Nevada.

NAMBOODIRI: Thank you so much, Perry. I appreciate that. Thank you, Governor, for all your time here. And thank you, Madam Secretary and Lieutenant Governor, Members of the Board—and as well as Director Paul Anderson. I was very excited to be here. As you rightly pointed out, autonomous vehicles are a big part of our future, and we are excited to be one of the companies kind of leading the front of this. And for folks who do not know Aptiv, I think it might be a little confusing because it says Delphi on here and we're talking Aptiv. We're not trying to do a switch-a-roo here.

Delphi is heritage—has heritage in GM. We've been a company—or been around for over 100 years. Last December, we changed the name of part of our company and called it, Aptiv. We split the company into two, the reason being, you know, as you see the future moving forward, autonomous vehicles have a different cadence, they are pretty much computers on wheels. So,

AMERICAN OVERSIGHT

the heritage of—or the type of automotive infrastructure that it needs is completely different, right? So, that's why we founded Aptiv, and Aptiv has been a leader in this autonomous space for a long period of time. So, if you ask somebody, which company did the first coast-to-coast drive an autonomous vehicle nearly three years ago from San Francisco to New York covering over 3,500 miles at 99% autonomous mode? You would not guess it was Aptiv because—yeah. We've been kind of flying under the radar until we came here. All right.

So, we are excited to be doing this. We have some of the leading autonomous technologies as part of our portfolio, as a quick listing on the company itself, right? We are about a $12B to $13B in annual revenue company. We have about 150,000 employees globally. We are in 140 countries across the globe. So, we are a very substantial company, and autonomous driving and mobility is a big part of our future going forward. All right.

Now, why did we choose Vegas? This is—we've been coming to see, yes, for 20 years, Governor, right? And that's one of the things. And over the three, four years, we have been showcasing autonomous driving technology. Director Anderson took a ride in our vehicle when you was here last time, I'm sure you can ask him how he felt about that. [laughter] So—but it is an exciting time. You know, the reason why we are here is, every time we come to Vegas and every time we come to see—yes, the help and support that we get out here to do these things are tremendous,

AMERICAN OVERSIGHT

right? We come here two to three months before CES. We set up the infrastructure, we worked with the local government, they help us in mapping and navigating and working through all the issues. And then at the end of it, we rip everything out and go back to Michigan, right? We decided, why do we want to do that? Right. We are here, we are working, we're investing, we have a great relationship with the city, we have a great relationship with the government, why don't we continue that relationship going forward and try to figure out what else can we do here, right?

That was the genesis of the conversation we are having here today. Right. And we are speaking to multiple parties, government officials, locally here as well as other private organizations, to figure out what we can do here that is of value. So, that's kind of the story here.

We are looking at, you know, different roles, right? So, as again—think about running an autonomous vehicle requires you to collect miles. You can't just have a road—it do these things in a simulated fashion. The cars have to be running on the roads, they have to collect miles. That means a lot of effort on our part to run the vehicles, to operate the vehicles, to have drivers in them, to have technicians to collect data, to do data analytics. That's what we're trying to do here and we hope that the work that we do here can then be expanded as a foundation in different cities across the globe.

AMERICAN OVERSIGHT

So, that's a quick summary of what we are trying to do here. This is just an initial foray into the incentives world and us working with you. So, it's our first kind of coming here. We are very excited to hear—the gentleman who came by, this is the fourth or fifth time, he is coming when? Coming back? We hope that [crosstalk] the way we do our business as well, but we are very excited to be here. We are excited about this technology and I look forward to answering any questions. This is my colleague, Brett. He's been involved in a lot of these efforts as well.

GOVERNOR: Thank you for your presentation, and I really appreciate your enthusiasm. You mentioned CES, and you may or may not know that a couple of years ago I had the opportunity to ride in one of your vehicles—[crosstalk]

NAMBOODIRI: Yes.

GOVERNOR: With your equipment—or equipped with your software and technology, and it was a seamless ride. And it was an incredible experience, and frankly, it was part of what inspired me as Chairman of the National Governor's Association to make innovation my initiative going forward.

NAMBOODIRI: We are very pleased to hear that. I will go back and tell people that.

GOVERNOR: It's the truth. And, you know, part of my goal early on, and in reference to AB 511, was indeed to make Nevada a hub for autonomous technology, and to be—we were the

AMERICAN OVERSIGHT

first State in the Union to promulgate regulations to allow for the operation of autonomous vehicles. And both of our universities, UNLV and University of Nevada, have really been aggressive in terms of adding faculty and curriculum to allow for companies like yourself to be able to hire locally and feel comfortable coming here.

So, this really, again, this has been a great Agenda today because it really has put together what we envisioned years ago to happen and made it real. And so, again, I'm very excited and very supportive of this application, and hopeful that this will lead to many more and bigger things associated with your company. All right. [crosstalk] Any other questions or comments from Board Members?

BARRETT: Yes, Governor. Thank you.

GOVERNOR: Mr. Barrett.

BARRETT: As the Governor mentioned, his Office has been a big supporter of the autonomous vehicle movement, and I find that beyond CES, a lot of people don't really appreciate all the work that's going to take place and is going underway now. Would you share with us your vision of a global mobility command center? What that could mean to us here in Nevada?

NAMBOODIRI: So, when you start thinking about what it takes to deliver an autonomous service when there is no driver in the vehicle, right, a lot of that the driver does has to be replicated [inaudible]. There's data that goes through

AMERICAN OVERSIGHT

everywhere. There's a connectivity that has to be taken, there are safety issues that have to be understood. The other part is, if there is not a driver that's physically there, the management of the operations, the data analytics of that, could be potentially anywhere. You could have a car running in Cincinnati, being in some sense managed from Las Vegas, right? At least the data and operations side of it.

So, that's the way when you think about it, it allows for a different way of thinking about managing vehicles. And when we think about a command center, what we're building today is, how do we—what we're building today is, how do we run our vehicles in Nevada? That same learnings can be used to say, how can we run these vehicles in different places as well, as the company expands its— [inaudible]

BARRETT: And you would see Nevada as being your global base for—

NAMBOODIRI: So, when we do a lot of these things here, we are training the people here in Nevada to do that work for us as we do it here. That actually makes it a perfect point to actually expand locally as well.

BARRETT: So the Return on Investment would be bigger than the number that's on this piece of paper?

NAMBOODIRI: I would say—I don't want to be too explicit about it, but I think that's definitely the goal for us, to come back multiple times.

AMERICAN OVERSIGHT

BARRETT: Well, thank you. I appreciate your interest and the work you've done to date and look forward to the progress you're going to make.

NAMBOODIRI: Thank you so much, Mr. Barrett.

GOVERNOR: Thank you—

BARRETT: Thank you, Governor.

GOVERNOR: Thank you, Mr. Barrett. Other questions from Board Members?

SPECHT: I just had one comment—

GOVERNOR: Mr. Specht.

SPECHT: If I may, Governor. Having worked for a couple of automotive manufacturers, though on the financial services side, I sat in enough meetings internally that talked about autonomous vehicles. This is coming fast and furious, and this is coming quickly. Governor, your leadership and the Legislature's leadership in passing the bill, puts us in a great position. Your company coming here, I think, is going to make some of the competitors and some of the automotive manufacturers say, gee, why this state? And I think it's going to take a closer look here. So, it's great that you're coming here and we'd love to see some of your competition come right behind you. [laughter]

NAMBOODIRI: Slowly. [laughter]

GOVERNOR: Other questions or comments? Mr. Klaich.

AMERICAN OVERSIGHT

KLAICH: Governor, I don't want to prolong this too much, but I've just got to echo, this is an all-star lineup of companies that we're looking at today and this is yet another international company that's—really brings a brand name that is a household name that is choosing Nevada, and in this particular case, through the site selection experts. And it's just—it is really a joy to look through these companies today and know that this is where Nevada is going in 2018 and beyond.

GOVERNOR: And I appreciate your saying that, Mr. Klaich, because I agree that we probably can't underscore the importance of this application today in terms of, what I think, will have a cascade affect—albeit perhaps slowly, with other companies that come here, but it's really an exciting development. You know, I had a conversation with an individual that is very involved with autonomous vehicles and he had said that, someone who does not drive an autonomous vehicle in the near future will be the same as somebody who rode a horse when automobiles were invented.

NAMBOODIRI: Very true. Very true.

GOVERNOR: The day is not far off when cars won't have steering wheels. And, you know, we—I guess it kind of reminds me of the conversation that we had in the 90's when they had those big phones. It was a brick in your hand and now we have this computer that we have now, and how far it has come, and I really do believe that the same is going to happen with autonomous

AMERICAN OVERSIGHT

technology, but albeit much faster. I mean, it already is very common in an everyday vehicle, but you'll see probably 100% autonomy in the not too distant future. So, to have Delphi here, who is, you know, a leader in that area is really an exciting development for the state. So, if there are no other questions or comments, I'll turn it over to Director Anderson.

ANDERSON: Thank you, Governor. And I think this—Manu and his team came in, I believe it was the first or second week I started at GOED, and I've been excited about it ever since. And I've told them I won't be too big of a cheerleader right from the get-go, but I'm certainly hoping we see a seed planted that grows in tremendous fashion. I think the vision that Aptiv has going forward is certainly revolutionary when it comes to transportation across the board. And I can hardly wait for cars that don't have steering wheels, especially with teenage daughters in the home. [laughter] Looking forward to that sooner than later.

I did have the opportunity to ride in a vehicle during the CES, and it really was a flawless ride. It felt very natural. I've had an opportunity to be in other vehicles, other autonomous vehicles, and this by far was one of the most, again, natural experiences. It really just did feel like somebody was driving, and probably better than most drivers do. It was certainly adaptive, and the technology itself is integrated so well into the vehicle. I actually saw one on the road over by the airport

AMERICAN OVERSIGHT

just recently—and without any markings, and the only reason I knew it was one of their vehicles was because I had seen it at CES. But it really is amazing how well-integrated the product has become into those vehicles.

As the Governor pointed out and others have as well, I think we are seeing policy in action here where we've created an environment that makes a lot of sense for companies to come and invest. Aptiv is certainly one of those that—and among others, that are looking to come into Nevada for those reasons. This one is an easy one for me. I know that we're coming in with sort of a minimum application, but I'm excited to see what you guys can produce. I'm excited to see how quickly you can ramp up when the time is right and come back to us and talk to us about your successes as you move forward. So, Governor, with that, I'm very pleasantly—I'm happy to support and approve this application.

URSEM: Director Anderson, if I may. I would like to also point out and acknowledge one other person that is with us today. With respect to a number of solutions on the location selection, Phil Klevorick with Clark County and the Economic Development Offices there has been very instrumental, was actually involved with us as we got involved with the application process. I just to thank Phil for his time and efforts to this process as well. It's truly been a team effort from the State all the way through our local partners. So, I just want to say, thank you.

AMERICAN OVERSIGHT

KLEVORICK: Thank you.

NAMBOODIRI: I do want to echo that as well to Director Paul Anderson and his team from GOED, including Dan who is sitting in the back there. Extremely helpful, and I want to echo the speakers who said that before. This is—the experience of us coming here two, three years and through working with these teams has made it very easy for us to make this decision. So, thank you again for that great leadership.

GOVERNOR: All right. Thank you very much.

NAMBOODIRI: Thank you.

GOVERNOR: Our next application for Director consideration is Ellsworth Adhesives Specialty Chemical Distribution, Inc.

WALSH: Okay. Governor, Lieutenant Governor, Madam Secretary and Board, I've enjoyed my afternoon with you today but this is my last one. So, actually, it's a great line-up of companies today and kudos to the folks who are partners in the south. Also, we don't get a chance to recognize a lot of people, but I'm going to embarrass Cory. Cory has been an all-star and a partner with EDAWN, has been outstanding. He's had his hands all over ever company that we bring up here and we couldn't do it without him. So, take good care of him, Mr. Anderson.

It's my pleasure again to introduce to you Ellsworth Adhesives. They're applying for the Sales and Use Tax Abatement, Modified Business Tax Abatement and Personal Property Tax

AMERICAN OVERSIGHT

Abatement. They are a global distributor of adhesive sealants and dispensing equipment. They're relocating from southern California to Nevada. They're investing approximately $2.1M into capital equipment, hiring 18 folks, an average wage, for distribution, for $31.92. They're also building their own facility, a build-to-suit facility of 120,000-square feet. They've got an extensive benefit package of over $15K per employee.

Just a quality company and quality people that I've had a chance to meet and work with. They've hit two of the three of the requirements, and EDAWN of course supports this application. At this time, I want to introduce you to Kirk Westfahl. He's the Director of Operations of Finances, all the way from Wisconsin. Go ahead, Kirk.

WESTFAHL: Thank you, Stan. Thank you, Governor, Lieutenant Governor, Madam Secretary, Director Anderson and the rest of the Board for your time this afternoon. I just want to make a quick comment to the Lieutenant Governor. I think your wife and my wife must know each other because she is a huge fan of Boboli pizza crust as well as their sauce, and I've been in that situation when—[crosstalk]

HUTCHISON: Good Midwestern and western values—

WESTFAHL: Definitely—[crosstalk]

HUTCHISON: We both married way, way over our heads. I'm sure.

AMERICAN OVERSIGHT

WESTFAHL: Yes. Definitely. Definitely. So, our story is very similar to Monin's that you heard earlier. We're a mid-western company founded in 1974. We're a second-generation privately held company by Paul and Patsy Ellsworth. We're a global company and we've got two main distribution centers, one in Germantown, Wisconsin, and one in Irvine, California. We've outgrown that facility and that's what brings us here today. And we're very interested in Reno, and if the incentive package is approved, we'll be looking for moving ahead right away, and try to occupy a build facility by next April or May.

One of the things that brings us to Reno is the friendly business climate. You talked about before the talent, and we're confident that the talent is here. The $31.92 is really made up of all the way from top management to team leads and supervisors, to mechanical and electrical engineers, and then customer service and distribution employees. The other thing that is interesting in Reno is we have— one of the other business units of Ellsworth is Moldman Systems, and they're located in Reno. So, that company will also be housed in this facility. So, it's very important that we keep those employees here in the Reno area.

Another thing is, our largest customer, Tesla, is located out in the TRIC Business District. So, being close to our customers as a distributor is very important to us. I think while we don't benefit directly from the Legislation, we're one of those cascading benefactors of the Legislature because we

AMERICAN OVERSIGHT

service a lot of those technology companies whether it's automotive, [inaudible] electronic area and heat dissipation. So, we're very excited to be here, looking forward to this, and thank you for your consideration.

GOVERNOR: Thank you, Mr. Wesfahl. And I appreciate your making those comments because as I said, we love that cross-pollenization of companies working together, and that being a factor in your decision to move from California here, is great to hear. So, have you made that decision to move to Reno assuming favorable consideration by the Director?

WESTFAHL: Yes. This is one of the last things that we need to move forward, and as soon as we find that location—we've got a couple of locations that we're knee-deep in negotiations on, and this is one of the last pieces for that decision. But, yes.

GOVERNOR: And then would—given that you're relocating your head—or that operation here, would some, or all, of the employees that are in California move here? Or would it be a combination of some moving and hiring locally?

WESTFAHL: We would anticipate maybe two or three moving, but the rest would be hired here locally.

GOVERNOR: And, finally, what is the skill set that you would be seeking? Because that is a significant wage for average wage.

AMERICAN OVERSIGHT

WESTFAHL: The skill set is really varied all the way from top management, production supervisors to managers of that location, all the way down to mechanical and electrical engineers on the Moldman System side, and then you've got customer service and distribution. So, it's really a blended rate of all those.

GOVERNOR: Thank you. Questions from other Members? Mr. Klaich?

KLAICH: You know, again, this is just keeping with the quality of the companies that have come to us today. And I'm looking at your website and you touch all of our lives, whether it's 3M or Dow, or Armstrong, or Lock Tight. You know, all of us—it's not the pizza crust, Lieutenant Governor, but you know all of us who have been through Home Depot or Lowes with our wives have run into you every day, and good to have you here. And the cascading affect is, again, exactly within the vision that you set for us and we can see that coming to fruition. So, hopefully, welcome to Nevada.

WESTFAHL: Definitely. Thank you.

GOVERNOR: Dr. Bennett?

BENNETT: Thank you, Governor. And definitely welcome to Reno. I wanted to compliment you on the part that you included in your application that talks about your involvement in the communities where you're already located. Could you expand on that a little bit? And what caught my eye in particular is your support for the Arts.

AMERICAN OVERSIGHT

WESTFAHL: I think one of the things—a couple things that we do, you talked about it before, is that quality of life. A huge thing that we invest in is safety. So, even though we're a distributor, you wouldn't think that there's a lot involved in safety, but there is. So, most of our safety-side and dollars are spent on ergonomics. So, two-and-a-half years ago, we put a 60,000-square-foot addition on our facility in Germantown, and when we did that, we invested a significant amount in that type of equipment, whether it's vacuum-assist panels so that they can quickly break down pellets, or its tables that raise up to the individual's height, or workstations that raise up. So, from a safety perspective, it's important that how they came to work is how they leave. They can continue that quality of work outside of work.

We're also very involved just from a charitable organization perspective. So, the last couple of years—before that it was one, it was the American Cancer Society that we were supporting. Now we've really branched it out to three, and this year's we're supporting the American Cancer Society, the Ronald McDonald House, and then the Wounded Warriors. So, we encourage employees—and we have various events throughout the year to raise money for that, and then whatever we raise is also matched by our Owners. And in the last three years, we've raised over $100K in that effort.

AMERICAN OVERSIGHT

And then there's also, from an Arts perspective, we have something called, Gathering on the Green, and it's a local arts—from a music perspective, that comes to one of the local parks, and Paul and Patsy have been a huge event sponsor for that in the last—ever since I've been there. I've been there 13 years. So, they've been an event sponsor that way. So, we try and do a lot of things. We're just a mid-western, conservative—you know, we work hard and try and support our employees the best way we can.

GOVERNOR: Questions or comments from southern Nevada?

HUTCHISON: Governor, I just wanted to just make note of just, you know, not only is this a great example of policy in action as several people have said, not only with this company but previously, but it's also just a great example of the American dream. I just love the profile of the company that starts 40-years ago, you know, in somebody's house and then it becomes a global company that has the kind of employees, and the impact it has on people's lives. And it's just wonderful to see these kind of companies coming to Nevada as a result of policy and legislation. So, just all-around a wonderful application. Congratulations. We really look forward to embracing and welcoming your company. Thank you, Governor.

WESTFAHL: Thank you.

GOVERNOR: Thank you, Mr. Lieutenant Governor. Other questions or comments? I hear none. I'll turn it over to the Director.

AMERICAN OVERSIGHT

ANDERSON: Thank you, Governor. And the same section that Ms. Bennett pointed out caught my eye as well. There's a section in there that talks about some of your workforce development efforts, internships. Can you kind of speak to that and what you expect to see in Nevada as well?

WESTFAHL: We have a couple things that we do. We work with local high schools from a summer internship perspective, and we try and bring in young kids. A few of our employees that work at Ellsworth today started in high school. Our CFO actually started right in high school and he was one of those co-op type employees, and has just developed. He didn't—you know, started with his high school education, got his Bachelor's degree, and got his MBA. And we've got a couple other employees that are like that.

So, we continue that investment in our employees, and then in the community through the high school program. And then we also—with the summertime in Wisconsin, right, is your only couple months of good weather, so a lot of vacation time is spent in the summertime. So, that's where we invest heavily in just summer interns or summer help, and a lot of those younger folks tend to stay on with us. If they don't necessarily have a career in mind, don't know what they're going to do, they come to us, we treat them very well, they have a good experience, and we've got a lot of employees that have stayed on with us that started out through either the intern program or the summer help program.

AMERICAN OVERSIGHT

ANDERSON: Thank you very much. I think, you know, that's—it's nice to see a company with a track record like that coming to Nevada and wanting to invest in the community. We always look to that in many of the meetings, especially the initial meetings that we have with companies as they're coming through our office, it's—we want folks who want to be a partner with Nevada, not just take advantage of what we have. And I think, you know, your track record is impeccable. So, I appreciate that—

WESTFAHL: Thank you.

ANDERSON: And look forward to those investments. Please keep in contact with EDAWN and our office when you're looking to build out some of those internship programs and outreach. Certainly the Governor has mentioned a couple different offices in the State and local folks that would be happy to be engaged there and help you with those.

WESTFAHL: We will do so. And I would also like to echo everybody that came before me as far as—you know, Stan Thomas has been great. The rest of the folks within your organization. Bill Thomas at the City of Reno has helped us through some questions that we've had. So, everybody that we've come across here has been fantastic. So—[crosstalk]

ANDERSON: Very good to hear. Well, with that, Governor, I'm happy to support and approve the application.

GOVERNOR: Thank you, Mr. Westfahl.

AMERICAN OVERSIGHT

WESTFAHL: Thank you. Thank you.

GOVERNOR: Good luck. Agenda Item No. 7, Workforce Innovation for the New Nevada Fund Program. For Director Approval, the SNAP Pilot Program. [crosstalk]

WOODBECK: Thank you, Governor. Thank you. Thank you, Governor Sandoval, Lieutenant Governor Hutchison, Madam Secretary, Director Anderson and Members of the GOED Board. For the record, I'm Frank Woodbeck, Executive Director of Workforce Development for the Nevada System of Higher Education. If you remember in September of last year, you approved an appropriation of nearly $40K from the WINN Fund to launch a Pilot Program in conjunction with the Department of Health and Human Services, Division of Welfare and Support Services to train Supplemental Nutrition Assistance Program, or SNAP, recipients in a 15-week advanced manufacturing entry-level course at Western Nevada College. Successful completion would qualify those individuals for entry-level positions at Tesla, Panasonic and Clickbond, our inaugural industry partners.

We sought 20 participants initially, paying all the tuition and fees, and as of January 22nd the launch date, we had 23 participants. As I told Director Whitley just a couple weeks ago, I will be very happy if 50% of those successfully matriculated. Well, I wanted to give you a report on that first.

We have lost—three through withdrawal, five who didn't show much activity in terms of completing, or haven't shown much

AMERICAN OVERSIGHT

activity in terms of completing their coursework, two have been receiving necessary remedial coursework in math before proceeding, but we have 13 students moving forward rapidly through the program at an 80% pass rate in their testing so far, and 50% of the remaining cohort are women. So, I'm very, very pleased with that.

We plan for visits from representatives of those employers soon, but as of today, Tesla is planning to visit the WNC campus and talk with those—with the members of that cohort on April 2nd, and they will host those students at the Gigafactory on April 4th where they'll have a tour and they'll go through and receive interviews for potential jobs at Tesla once they successfully complete their work.

So, today after consultation with Director Whitley and Administrator Fisher who was with us today in Carson City, I'm requesting funding for expansion of this pilot to add up to 100 SNAP recipients in a second phase of the program, and expand to Reno and now include Truckee Meadows Community College at the Pennington Technical Center as an additional training site. And TMCC has a similar program which is called the P3 Program, the Panasonic Preferred Pathway Program is what's it called, but it's really a generic entry-level course which is virtually the same as Western Nevada College. TMCC's version is an open-entry open-exit, so it allows for great flexibility for a student to pace themselves through the program, but the outcomes will still

AMERICAN OVERSIGHT

result in employment with those same industry partners who have all agreed to continue to work with us.

I've outlined the costs and estimates for enrollment in your book, but in this phase I'm also adding a resource component. I want to begin to give us a picture of the impact of programs such as this—would have on an individual or on the system. And I've engaged a researcher, Dr. Justin Gardner, who has done work with DHHS before under other grants and is familiar with the population, and is now familiar with our goals as far as the program is concerned.

As an additional benefit to your investment, we will receive up to 45% of the expenditures in matching funds from the federal government under the SNAP Employment and Training Program. Those funds, we're going to segregate and use those to add participants to the program, but at a later time.

So, in conclusion, pending successful completion of phase one, execution of phase two, I would seek to expand to southern Nevada this fall, incorporating curriculum offerings at CSN, and focusing on training in advanced manufacturing, or—and/or healthcare, depending on the available employer partners that we find here in southern Nevada. So, thank you very, very much for your consideration. I'd be happy to answer any questions you may have.

GOVERNOR: Thank you, Mr. Woodbeck. And just no real questions because you've already established that this is a

AMERICAN OVERSIGHT

successful program, and I want to congratulate you on that. This is a conversation that happened very long ago, in terms of seeking out new candidates to get this type of job training. And we had talked about this SNAP population and giving them an opportunity as well, to have access to these high-quality jobs. And so, again, it took a lot of work. I'm going to turn it over to Mr. Fisher in a moment, but collaboration between you and the Department of Health and Human Services, and specifically Mr. Fisher's division—but now, you know, there are people who may not have otherwise been aware of these opportunities that now will get that and be able to go to work for a great employer and access to higher wages and benefits. So, thank you for that, Frank.

WOODBECK: Thank you, Governor. Thank you.

GOVERNOR: Any other questions or comments for Mr. Woodbeck?

HUTCHISON: Governor?

GOVERNOR: Mr. Lieutenant Governor.

HUTCHISON: Thank you. Mr. Woodbeck, thank you as always, for your work and effort on behalf of the State of Nevada. I've told you before, Frank, what—how I feel about you, and what I think you've done for Nevada and for Nevadans. You've been involved in the—throughout your career, and certainly in what you're doing now, in being somebody who changes, generationally, families in Nevada. And I want to thank you for

AMERICAN OVERSIGHT

your hard work. You've always been dedicated to that and you're one of the great employees in the State of Nevada as far as I'm concerned. One of the great public servants in this State. Let me just ask you a couple of follow-up questions if you don't mind. So, we're about at 50% participation it looks like, right?

WOODBECK: Right.

HUTCHISON: What do you attribute to that in terms of—I mean, is that good? Is that better than you expected? Is that—just give us—[crosstalk]

WOODBECK: [crosstalk] Quite frankly. We're dealing with a population generally that's [inaudible] in recent times. They're working just trying to make a living and raise a family. So, we purposefully asked the Division of Welfare and Supportive Services to choose the candidates that were for this program, and then they would go through a screening process at the college. Reason being is that their caseworkers know them better than we do. So, they would pick whoever they feel is suited for it, and they did that and referred them to us.

So, quite frankly, I mean, I actually picked 50% out of the sky, but I'm still happy with that kind of an outcome and I think we'll do better and better as we move forward. The other question may be, what are we doing with funds for the other folks who might have dropped out? We are going to use those funds for individuals either in the second phase or—the second phase was going to start immediately, or filling in the first phase.

AMERICAN OVERSIGHT

HUTCHISON: And would you mind just repeating what you said about the availability of federal funding related to this program?

WOODBECK: Right. So, the Snap Employment and Training Program is sponsored by the federal government. We receive—they actually match 50%, and then 5% is held back for administration, but 45% of those funds will come back to us and we can expand the program using that. We have to segregate the funds because we can't use federal—we can't use federal funds—get federal funds matched, so we'll segregate those funds into a separate [inaudible].

HUTCHISON: Thank you again, Frank, for your great work [crosstalk] with this program and with the State.

CEGAVSKE: I'll go after you.

REILLY: You want to go first?

CEGAVSKE: No.

REILLY: Okay. Thank you. Governor, as we had discussed, most recently the Board of Regents has adopted five high-profile goals, and one of those is aligned with workforce—actually, aligned to your top high-demand jobs, and really helping us align better with industry and our certifications, two-year, four-year and Master's Degree. So, I want to thank you and this Board for funding this program. It really identifies—it's really hard to place population into some high demand jobs. And, you know, the 50% I think is remarkable, and extending that

AMERICAN OVERSIGHT

to TMCC and expanding this down to CSN, this will be a major focus with the Board of Regents. So, we appreciate your support on this.

GOVERNOR: Thank you, Mr. Chancellor.

CEGAVSKE: Governor?

GOVERNOR: Madam Secretary.

CEGAVSKE: Thank you. I just want to echo what the Lieutenant Governor said. And thank you, Frank, so much for all that you've done. As long as I've known you, you've had different hats, but I'm really excited for where you are and what you've been doing in the community because I know it reaches further than what we've been talking about today. So, I just want to say thank you and I'm very, very excited about community colleges' involvement with you and what you do. So, I just can't echo enough what the Lieutenant Governor said, but just knowing you as long as I have and knowing what you've done and being in this position, we're very privileged to have you. So, thank you very much.

WOODBECK: Thank you very much.

SPEAKER: Governor, I have a question of my predecessor, Mr. Woodbeck, and then a comment. Frank, I see these numbers, three people have withdrawn and five are—have inactivity. Do we know what happened with those eight individuals?

AMERICAN OVERSIGHT

WOODBECK: I think that they—once they're selected, they come and they go through a screening process at the college, then it goes through orientation. And so, what has happened, I think, with at least three of them anyway, they decided that that was too [crosstalk] at the time, or they weren't prepared to do that, or they couldn't schedule it even though we schedule flexibility in the classes. As far as the five are concerned, once you start the work, it can look good from the outside and then once you start it, you know, they might not be able to—felt they couldn't succeed. So, we have a—and will continue to have a Teaching Assistant assigned to that core exclusively to help them whenever they're in the lab or whenever they're in the classroom, but it just— [inaudible]

SPEAKER: Thank you, Frank. Governor, Members of the Board, we have had history with the economy being so fueled in this market that when you have people who don't show up for training, it doesn't necessarily mean they don't want to do it, they wind up getting a job offer. In the long-term they don't get that job that you were going to train them for, but they're doing something better, and that's how fueled this market is.

I'm here to tell you, these numbers are phenomenal. I thought this was a great idea when Frank first came here, and I thought if he hit 40%, that would be knocking it out of the park. This is a hard-to-serve population, and to get 13 of 23 people moving forward on something that's tough and technical, to

AMERICAN OVERSIGHT

getting a couple other people who are getting needed remedial work, is just a phenomenal service. I had an offline conversation with Manny Lamar [phonetic] yesterday—maybe we should have been paying more attention in the meeting we were in, but we were talking about another hard-to-serve population where the numbers are at 50% and he looked at me and says, everybody around here thinks this is a low number but this is great. And it actually is.

You may not be able to see up in northern Nevada, we have Assemblywoman Bustamante-Adams here in our audience from Workforce Connections, and I'm sure she would agree, if you get a 50% success ratio on a hard-to-serve population, that's a parade. So, Frank, congratulations. This is— I was in support of this from day one, and this has exceeded my expectations. So, I'm very excited to see what happens with the expansion in the Reno market.

WOODBECK: So am I. Thank you.

GOVERNOR: Mr. Klaich?

KLAICH: If I could just follow-up on the Chancellor's comment. This really reflects an evolution of policy that started back when you revamped the economic development structure of the entire State. The first thing you did was bring higher education in the system, represented by the Chancellor here today. Then the big brother of this program was the Knowledge Fund, which you brought into legislation, then

AMERICAN OVERSIGHT

funded. And then we had brought in the WINN Fund, which incorporates the community colleges, because we found that the Knowledge Fund was specifically aimed at our Research Institutions and DRI. So, this really completes that circle from the original legislation to this program here today, and it's great to see.

GOVERNOR: Now thank you, Mr. Klaich. And I've said in other venues, imitation is the greatest form of flattery, and we are starting to see other states look at our model and copy it. And so, there are a lot of accolades to go around. And, Frank, again, I want to thank you, but given all these comments, you're not going anywhere are you, Frank? [laughter]

WOODBECK: No, sir. [crosstalk]

GOVERNOR: Okay. Good, because it sounds like goodbye and I was like wondering. [laughter] All right. Let me turn it over to Mr. Fisher. [crosstalk] Do you have any comments, sir?

FISHER: Thank you, Governor, Members of the Board. For the record, Steve Fisher. I'm the Administrator for the Division of Welfare and Supportive Services. And I just want to echo what's already been said. Thank you, Don, you took most of my talking points. Appreciate that. But, no, this is a very, very exciting partnership. My staff are very excited; the SNAP recipients are very excited. I mean, the fact that we have 13 SNAP recipients who, it looks like, are going to successfully complete this certification course, and with the connection with

AMERICAN OVERSIGHT

these three businesses, are going to obtain a job that earns between $14 and $16 an hour, it's going to move these individuals to self-sufficiency.

Kind of another point I'd like to make is that all of these recipients, not only are they receiving SNAP benefits, but they're also receiving Medicaid. So, that's going to move them off two public assistance programs by achieving a job that earns $14 to $16 an hour. So, that's fantastic. So, I am very excited for this next opportunity, if the Board so chooses to approve this today. I'm looking forward to, you know, running 100 SNAP recipients through this pilot in the north, and then expanding that to southern Nevada. So, thank you very much, Frank. Appreciate the partnership.

WOODBECK: Thank you, Steve.

GOVERNOR: Thank you, Mr. Fisher. Board Members, any comments or questions for Mr. Fisher? All right. Keep up the good work. And excited to hear, internally, the enthusiasm with your staff and the SNAP recipients. If there are no further questions or comments, I will turn this over to the Director. But it says, "For Director Approval."

ANDERSON: Great. Thank you, Governor. [crosstalk] I need some clarification here. [laughter] Governor, this obviously is a very exciting opportunity for us and I'm happy to support and approve the WINN Application.

AMERICAN OVERSIGHT

GOVERNOR: Thank you, Mr. Director. And again, this is exciting. I'm looking forward to the evolution of it all. All right. Let's move on to Agenda Items 8, 9 and 10. And it's part of the curse, I suppose—and perhaps, blessing, of being at the tail-end of the Agenda. I think some folks have some scheduling issues in terms of having to move forward because this has been a very aggressive Agenda. So, those who are presenting on 7, 8 and 9, as well as, 10, if you could move a little quicker, that'd be appreciated. Thank you.

POTTS: Absolutely. So, for the record, this is Bob Potts, Research Director, Governor's Office of Economic Development. It's great to see you again, Governor, Lieutenant Governor, Madam Secretary and all the rest of the Board. I will move fairly quickly through this report. I'm just going to kind of put it in context. This is all—this is activity that's gone on in our Agency and Economic Development Agencies across the state. I included a cover page on this report and I'd like feedback whether or not that's helpful or not. This is—the data that's in here for the most part reflects just the 4th Quarter of 2017. The top section has to do with Business Development, and the bottom half has to do with Divisions within our Agency. So, let me know whether that's helpful or not. Okay.

Pages 1 and 2 of the report reflect—talk about our business development activity, both in our office and RDAs across the State dealing with different partners. In the first—so, I'm going

AMERICAN OVERSIGHT

to talk mostly about the 4th Quarter of 2017, but to keep things in context, I'm going to also talk about all of 2017 because we have a complete calendar year's worth of data now to talk about. Fourth quarter, 719 jobs brought in by 15 assisted companies. If we look at how those are broken out, they're about split even between incentivized and non-incentivized companies. If I look at 2017 as a whole, there is 6,014 initial jobs, those are the ones that we look at, at the contracts out to two years. And then once those are fully built out, out to 9,681,74 companies in 2017 is what we worked with.

Overall, year-over-year gains. When we compare 2017 to 2016, about a little over 20% gains in all of those measures. If we go over and I look at how those companies are split up, most of them were manufacturers, all right? Forty-five percent of them were manufacturers, followed by about a quarter of them, logistics operations, followed by eleven-percent IT. That mix kind of holds since GOED was formed back in 2012, where a large proportion of the companies that we work with are manufacturers, but that cuts across IT, food manufacturing. And so, it touches a lot of different industries as well, but they're all—where there is actually a production change in what they do.

Average hourly wages in the fourth quarter was $25.08. That was up a lot. Over 43% from the previous quarter, right at 60% from the previous year. For 2017, we're up over 8% of what we had averaged across all companies at $19.50 an hour.

AMERICAN OVERSIGHT

Again, the table down in the bottom, that's full-year measures. I think the thing that stands out most there is, it's the most initial jobs we've had of any year, in 2017, 6,014 jobs by 74 companies. The build out number would be also larger except for Tesla, Panasonic in 2014, once they finished building out. So, if you pull them out of the mix, 2017 was a really good year for us.

I will point out that little chart up in the upper-right, I think that's really helpful to talk about the companies we've worked with, the new companies that have been incentivized, what their contract amount is and what we actually get as far as job counts from DETR. I can look back at their Federal Employment Identification Number and see what's showing up and what we contracted for, and for—if I add up all these years we have here, we're 41% above. The actual job counts are 41% above what they contracted for. It takes a little time to get ramped up, that's why you see it's a little below in 2016 and 2017.

Next page on Capital Investment, it was down a little bit in the fourth quarter of 2017, as well as the year as a whole when compared to 2016. If you start—part of the issue that we have with this is, we have Board meetings every other month, and we have quarterly reports. So, I have two quarterly reports a year that include two Board meetings' worth of data, and two of them that only include one Board meeting's worth of data. The

AMERICAN OVERSIGHT

fourth quarter only includes one Board meetings worth of data, so it's a little bit of apples and oranges there.

If you look at our Recruitment Activity down there at the bottom, it slowed down in fourth quarter, but that's pretty typical because of the holiday season. Leads and Prospects, however, are both up when you look at year-over-year numbers. Leads up 70% and Prospect is up 66%. The wins were exactly the same in fourth quarter of 2017 as they were in fourth quarter of 2016.

Next page, on Page 3, it talks about activity within our International Trade Division. The highlight—and I won't spend a lot of time here because I know the Director has a whole front page talking about what the Global Team has done on there, as well as what's in the narrative here. The short of it is, the Governor—the Governor's-led Trade Mission to Poland helped bring in an additional 33 leads and 4 prospects, bringing the total active leads that the Global Team is working with to 39, and the Prospect count to 13. So, they've got a lot of stuff going on as far as the numbers are concerned.

Going on to the next page, Page 4, our Procurement Technical Assistance Center, they had an incredibly successful first six months of this fiscal year. If you sum up their activity over the first six months of this fiscal year, it's more than any full year that I have on record as far as their activities. And they're quick to give credit to a lot of their

AMERICAN OVERSIGHT

partners that they work with, you know, BNI, they work with them, MSBDC, they work with, the local Chambers of Commerce's. And so, they really have a great working relationship in bringing clients to work with these defense logistics agency contracts.

The ESB Program, there were 125—so, we measure this on a semi-annual basis, there were 125 added in the second-half of 2017, bringing the total up to 1,139. That's a 34% increase over the client base that we had in 2016—or, not client base, the number of businesses that certified. If we look at the solicited numbers in the second-half, that jumped 888, and that was a huge jump of solicitations and it mostly came from one local government entity in southern Nevada that really pushed with companies to try to submit a quote, bid or proposal on a contact. Because the local governments don't have to report, or they're not required to report until the end of this month, we have no contract information. That will be posted—public posting as soon as that's made available, on our website, the Governor's website, and LCB's website.

The next page, talking about the Film Office. The Film Office in second quarter fiscal year, so this is the fourth quarter calendar year, 62 productions bringing the fiscal year to date count to 156 productions, with local productions spent in the State of $24.6M. Down in the lower box, that's the list of those production where there was over $500K spent in the State.

AMERICAN OVERSIGHT

The chart there talks about responses to their level of satisfaction with the service by the Film Office. It looks like it dropped. We need to keep this chart in context. The vertical bar only captures, very good. If I were to put, good, fair, poor and very poor, you'd have one little line at the very top of this chart that would be kind of meaningless. So, you got to kind of—folks are really happy with that office.

The Rural Community Development Allocations Program, I kind of changed this a little bit because Carson City has recently reverted into the States CBDG Program. So, the table at the top, as well as the first section of bullets there, that refers to the Rural Programs, and I wanted to stay consistent so we could be apples-to-apples with the previous years. If we look at just the Rural Allocations, $2.8M, 13 projects, economic impact of 75%--75% of the Funding has economic development impact associated with it. If you roll in the Carson City component, it comes to a total of $3.3M in HUD allocation, funding another six projects, bringing the total to 19.

The last—so, this is where I'll really cut back, on the Job and Sector over—on Page 6 and following. Nevada state-wide, has had an incredible recovery since the Great Recession. Employment, we're now at record levels. The numbers that you see there in the text I have there are already antiquated because January numbers have been released. But for the year, we added 42,100 jobs for a total of 1.34M jobs in the State. Unemployment

AMERICAN OVERSIGHT

Rate is at 5%. Currently, we have 69K Employers in the State, which is up 13,000 since the Great Recession.

I think one of the interesting stats that comes out of DETR's Research and Analysis Division is that we've now had 66 months with annual growth greater than that of the United States. So, we are leading the curve in spades. So, for all the target sectors, this is the first time I've done this report where every metric for every target sector, Jobs and Wages has been positive whether you look at the fourth quarter to third quarter, or fourth quarter to fourth quarter of last year. So, we've seen growth in all of those. I can go into each of those a little bit and talk about which ones had the highest growth, or I can leave it there and move on to the next Agenda item. Your discretion.

GOVERNOR: Why don't you keep going. [crosstalk]

POTTS: Okay. So, the Jobs numbers, if I look at the fourth quarter, the growth numbers, the fastest was tourism, gaming and entertainment, followed by natural resources, followed by manufacturing and logistics. If we look at earnings, fourth quarter over third quarter, fastest was—on the earning side, the fastest growth was in manufacturing and logistics, followed by healthcare, and aerospace and defense. If I look at year-over-year growth, the greatest number of jobs we saw was in the IT sector followed by—and this is percent growth, this isn't level growth—the next one would be aerospace and defense followed by manufacturing and logistics.

AMERICAN OVERSIGHT

When we look at earnings, Tourism, Gaming and Entertainment had the biggest jump in percent terms, followed by IT and Natural Resources. I included in all the text in there, not only the quarter-over-quarter change in growth, but also the annual growth for each one of these sectors as well. I will leave it at that and open it up to questions if you're good to go with that.

GOVERNOR: Thank you, Mr. Potts.

POTTS: Absolutely.

GOVERNOR: Great news. And, as you said, this is a first in terms of having growth in every single sector. So, that's important.

POTTS: Both in Jobs and Wages.

GOVERNOR: Good to see. All right. Board Members, any questions for Mr. Potts associated with the Performance Measures Report?

SPEAKER: Governor?

GOVERNOR: Yes.

SPEAKER: One quick question, Mr. Potts. Do you consider 5% unemployment to be full-unemployment in the State?

POTTS: Do I—no—so economists will tell you that 5% is considered full-employment, right? I think that there's still room to move but it's getting really tight. I think that what we're seeing right now in that 5% unemployment rate is not so much folks out of work, it's folks migrating from one job to the other. And so, I think in actual terms, if you were to look at

AMERICAN OVERSIGHT

the unemployment rate in a different way, as folks actually being out of work and can't find a job, that would be a lower number. What we're seeing is migration within workforce.

SPEAKER: All right. Thank you very much.

GOVERNOR: Any other questions? I see Mr. Armstrong at the table. You know, welcome to the team, Mr. Armstrong. Did you have a presentation that you would like to make?

ARMSTRONG: Yes, Mr. Governor. As part of the Director's Report, I'm going to be discussing opportunities zones.

GOVERNOR: Okay. Then let's move from the Performance Measures Report—thank you, Mr. Potts—onto to the Director's Report.

ANDERSON: Thank you, Governor. I appreciate the opportunity to report back on how our team is doing. Kudos to Mr. Potts. I think that's the shortest briefing I've ever had from him. [laughter] recognizing the brevity and need to move ahead. I will do the same.

First off, I think I need to say thank you to the team. This packet represents a tremendous amount of work in vetting the companies and working with our Regional Development Authorities, and working with the Secretary of State's Office, the Lieutenant Governor's Office, and of course all of our different agencies, Tax Department as well. And so, I just want to say thank you to them. This packet represents approximately half-a-billion-

AMERICAN OVERSIGHT

dollars of capital investment that we've approved here today, along with 654 new jobs that are the initial job counts. And on the forecast side of it, up to 1,600 new jobs. And I—that's really impressive, and especially as they come to us and say, you're the most business-friendly state, we're happy to work with you, it really is amazing to see that policy in action.

Today we saw, not only the general abatements, but the Data Center Abatements, the Aviation Abatements, folks that are here because of AB 69 and Cory's work, as well as Ms. Bustamante-Adams work this last session. We've opened the doors and sort of removed a lot of the obstacles, and that's of course part of the whole New Nevada vision. And so, it's very exciting to see those things, having been in the Legislature and passed those tool sets, now being able to execute on those is really a privilege.

So, thank you to the team as well as all of our partners that we work with. I want to just do some quick introductions as far as some new staff members that we have, and then I'll turn it over to—if it's okay with you, Governor, to Mr. Armstrong, to go over some things, and then I'll point out some very last items. In the back of our audience here, she's made it all the way to the end, Dr. Grace Chou is our new Director of Advanced Manufacturing. She is working primarily up north here to work with our advanced manufacturers and build, kind of, a one-voice, an opportunity for them all to talk about what each of them need and try to figure out how we can combine their efforts, whether

AMERICAN OVERSIGHT

that's transportation or housing or developments internally. We're excited and privileged to have her on the team. So, welcome to the team. Mr. Matt Moore—Matthew Moore, who is our new Rural Director. It was apparently too warm here in Carson City, so he decided to go to Ely instead. So, he's enjoying some cold weather there. Juan Manzano is our new Deputy Director in PTAC, just coming out of the military, and retired there and is now working over in our PTAC Office. And then, Mr. Armstrong, who many of us have worked with in the past. He is our new southern Deputy, Cory's counterpart in the south, and he's been working—well, frankly, just getting up to speed, but he's brought with him a tremendous amount of talent and some experience that has already proved invaluable to our office. So, with that, Mr. Armstrong, I'll turn it to you to kind of give us a quick preview on the opportunity zones and what those are.

ANDERSON: Thank you, Mr. Director. And thank you, Mr. Governor. So, just as a quick introduction, we wanted to have a conversation about what opportunities are because it was part of the Tax Cuts and Jobs Act of 2017—the Tax Bill that Congress passed last year. So, it wasn't widely known but everybody is kind of getting up to speed right now. So, if there's questions, hopefully I can answer some of those now.

So, opportunity zones are a new community and economic development tool that was passed by Congress to incentivize investors to invest in low-income communities. They do this by

AMERICAN OVERSIGHT

offering several incentives to investors. One is a tax deferral, so if an investor invests in this program, they can defer taxes until 2026. There's a possibility of a step-up [inaudible] on different percentages if the investor holds the investment for five or seven years. But the real opportunity for the investor is, after 10 years if they keep their investment—and any appreciation on that investment is tax-free for them. So, what is—that's just a quick introduction for the investor.

So, what is an opportunity zone? So, an opportunity zone is a Census Tract that's defined as low-income—and I won't get into the low-income definition due to time, but Nevada, under the definition, has 243 of these low-income Census Tracts in the State. And with that, the Governor can designate up 25% of those Census Tracts to be opportunity zones. So, with that comes the process of defining and really determining what should be opportunity zones in the State.

So, GOED, along with BNI, has done a lot of work to set a baseline and reach out to local municipalities to find out where the opportunities are and the critical needs, investment opportunities, for the State. BNI did a lot of work on setting a baseline where we know that there's current investment in similar programs like new markets, tax credits. Also, low-income housing Tax Credits in many other programs. And then on top of that, myself in the south and Cory up north, have worked with local governments to identify Census Tracts that would be priorities

AMERICAN OVERSIGHT

for locals. We've seen that there's more need than the possibility of us designating them. I have a list of over 100 Census Tracks in the State. The Governor has the possibility of designating 61.

With that, we're working on the ability to prioritize based off of, truly where the locals have the need, and then off of some things that align with the goals of the State, whether or not that deals with affordable housing, or some investments in the critical areas that GOED has. We are working with some national partners. Fortunately, we've been able to make contact with the group that really spurred this on the federal level, is the Economic Innovation Group. Cory was able to meet with the President of that company and really put us in contact with some national folks so we can collaborate on a national level to see what other states are doing, learn the lessons learned from those states, and make sure that we do this as best as possible.

So, the process moving forward for us to do that is, one, we're going to continue to work with BNI and the locals to really define the priorities, but we're going to develop a website which should be up, hopefully, the beginning of next week to solicit public comment for this as well. And that website is going to be a few things. It's going to be an interactive map that—we've teamed up with Policymap that has really generated the national maps for this. So—and there's a lot of underlying data and overlays that we're able to access for that such as housing,

AMERICAN OVERSIGHT

unemployment, education and other indexes to really fine tune the prospects of prioritization. And then in addition to that, we've been receiving what other states are receiving in information when they're soliciting, their public comment, and really fine-tuning where the priorities are for that as well, to make sure that we're capturing the information that we need to make the decisions.

After that, we'll really have to work with BNI to make the selections so we can recommend to the Governor where those Census Tracts would be located. The timeline for nominating Tracts is pretty short. So, based off of the legislation, there was 90 days from the enactment for us to nominate the Tracts to the Treasury Department. That date is March 22nd. However, the Treasury has issued the ability for the Governor to ask for a 30-day extension, and we've been in contact with the Governor's Office and we expect to have that extension. So, we'll have until April 20th to make those nominations. So, with the website going up at the beginning of next week, we should be able to get about 30 days of public comment in place to make sure that we hear everybody's voice. With that, I think I'll take questions.

GOVERNOR: Thank you, Mr. Armstrong. A lot of potential there. And, yes, I'm going to extend it so we can— [laughter] get as much, you know, done as we possibly can and make sure that all the entities, the communities, are aware of

AMERICAN OVERSIGHT

what's going on. I think that's really important that they be informed. Director Anderson?

ANDERSON: Thank you, Governor. And thank you, Mr. Armstrong, for that update. That was certainly just an informational item. We—this Board in particular doesn't have any direct action to take on that, but it's, I think, important to know. As the Governor noted that, you know, it's important to get all of our folks engaged, all of our municipalities and agencies to understand what opportunities we have and how to filter those and prioritize those. So, I appreciate Mr. Armstrong's efforts on that front.

I'm just going to hit maybe just a couple bullet points. The bulk of the Director's Report is available in the packet itself. I do want to call attention to a couple different items. The first four items are frankly from our International Division. It's amazing how much work they do on such a small team. As most of you know, Mr. Chris Sanchez went on to greener pastures, and Jared Van Wagner [phonrtic] has picked up that torch and has run with it, and done a tremendous job just out of the gate. He and his team, again, just do so much work and effort in such a small—with such a small team. But we're in the process of preparing for another Trade Mission. They have an advanced mission coming up in a few weeks where they'll go and prepare, and figure out where the best places to go are, not only where we can find the

AMERICAN OVERSIGHT

most partners, but where it makes sense for Nevada to have partnerships there.

We also had an International Economic Development Council, it's item 17 in the Report. The IEDC was hosted in Las Vegas, included Economic Development Agencies from across the world. It was very impressive to see our team—and, Governor, to your point earlier, Nevada is setting the bar very high. A lot of our folks were able to—a lot of our team presented at that conference, and there was a lot of good interactions and synergies, I think, that went well there.

Our Film Office is also doing a great job. Their Crew and Vendor Directory was recently released in the last quarter. And that's—it's impressive to see how much great feedback we get just from that Directory, and I know they're also converting that into an online directory as well pretty soon. With that, Governor, I don't know how many people we normally have at this meeting, but just from seeing what we had down south and doing a head count here, we had over 70 people here today and 12 different companies. So, very exciting to be a part of this and appreciate the opportunity to be here. And that concludes my report.

GOVERNOR: Well, thank you, Director. And most the Members have heard me say this before—I mean, we've been going a little over three hours, our first meeting was a short one-page Agenda and lasted about 15 or 20 minutes. So, we really have come a long way. And again, welcome aboard. Thank you for your

AMERICAN OVERSIGHT

leadership, and I think it's going to be a really strong year. Board Members, any questions for the Director on his Report? Okay. I hear none.

Agenda Item No. 10 which is the Unemployment Rate Update. I think it speaks for itself. Any questions from Board Members on that? It's pretty remarkable. I remember the days when everything was above seven. So, we've come a long way. Board Members any questions on Agenda 10—Item 10? Okay.

We'll move to Agenda Item No. 11, Public Comment. Any member of the public in northern Nevada that would like to provide public comment to the Board? I hear and see none. Any member of the public present in southern Nevada that would like to provide public comment to the Board?

HUTCHISON: No one here, Governor.

GOVERNOR: It's not marked as an Action Item, so I will declare our meeting adjourned. Thank you, ladies and gentlemen. Have a great day. And again, my compliments to the staff and everybody else involved. Have a great day. Thank you.

[end of meeting]

Subject: RE: REMINDER: White House Conference Call Regarding Proposed Regulations on Opportunity Zones

Hello Joy,

Thank you for the call today!

One question, there has been talk about weather housing development (acquisition rehab, new LIHTC, or market rate) will work as an O-Fund investment. I have heard concern that it seemed not to be referenced in the proposed regs. Can you advise at to weather housing is considered a viable and acceptable investment for O-Zone.

Good Afternoon Olivia,

The Nevada Governor's Office of Economic Development has requested that I represent the state at the Opportunity Zone Conference on April 17th. As you can see from the confirmation below, I have completed the registration. Still, due to the late completion I wanted to reach out directly to you to ensure there are no other details you may need from me in order to be able to attend the conference. I would like to confirm attendance before I expend state funds on travel plans.

Thank you sincerely,

Karen Schnog

Ladies and Gentlemen:

Subject to further comment by Cox Castle as our co counsel to the Borrower and by7 the Borrower, the attached clarifying changes in Section 12 would address our concerns regarding the proposed transfer provisions of the Bond Regulatory Agreement in lieu of the proposed insert I sent around. My apologies for too quick a read on the prior draft, which occurred when the sky appeared to be falling on all of us in late December. Wade

Subject: RE: Sierra Summit - Revised Bond Documents -- NGO Comments

Ladies and Gentlemen,

Our comments on the Bond documents are attached. For the provision of the Reg Agreement which governs a proposed transfer of the Project, we'd suggest the following language. This language has been used in Regulatory Agreements on over the past 10 years or more on many financings in the western US and elsewhere. Please note that Cox Castle, as outside co counsel to the Borrower, will have further comments on this language and possibly other comments on the Bond Docs, but we wanted to get these basic comments around for the group's review. Thanks. Wade Norris

AMERICAN OVERSIGHT

Transfer of the Project

. For the Compliance Period, the Owner shall not Transfer the Project, in whole or in part, without the prior written consent of the Issuer, which consent shall not be unreasonably withheld or delayed if the following conditions are satisfied: (A) the receipt by the Issuer of evidence acceptable to the Issuer that (1) the Owner shall not be in default hereunder or under the Loan Agreement, if in effect (which may be evidenced by a Certificate of Continuing Program Compliance), or the transferee undertakes to cure any defaults of the Owner to the reasonable satisfaction of the Issuer; (2) the continued operation of the Project shall comply with the provisions of this Regulatory Agreement; (3) either (a) the transferee or its Manager has at least three years' experience in the ownership, operation and management of similar size rental housing projects, and at least one year's experience in the ownership, operation and management of rental housing projects containing below-market-rate units, without any record of material violations of discrimination restrictions or other state or federal laws or regulations or local governmental requirements applicable to such projects, or (b) the transferee agrees to retain a Manager with the experience and record described in subclause (a) above, or (c) the transferring Owner or its management company will continue to manage the Project, or another management company reasonably acceptable to the Issuer will manage, for at least one year following such Transfer and, if applicable, during such period the transferring Owner or its management company will provide training to the transferee and its manager in the responsibilities relating to the Low Income Units; and (4) the person or entity that is to acquire the Project does not have pending against it, and does not have a history of significant and material building code violations or complaints concerning the maintenance, upkeep, operation, and regulatory agreement compliance of any of its projects as identified by any local, state or federal regulatory agencies; (B) the execution by the transferee of any document reasonably requested by the Issuer with respect to the assumption of the Owner's obligations under this Regulatory Agreement and the Loan Agreement (if then in effect), including without limitation an instrument of assumption hereof and thereof, and delivery to the Issuer of an opinion of such transferee's counsel to the effect that each such document and this Regulatory Agreement are valid, binding and enforceable obligations of such transferee, subject to bankruptcy and other standard limitations affecting creditor's rights; (C) receipt by the Issuer and the Trustee of an opinion of Bond Counsel to the effect that any such Transfer will not adversely affect the Tax-Exempt status of interest on the Bonds; and (D) receipt by the Issuer of all fees and/or expenses then currently due and payable to the Issuer by the Owner.

It is hereby expressly stipulated and agreed that any Transfer of the Project in violation of this Section 12 shall be null, void and without effect, shall cause a reversion of title to the Owner, and shall be ineffective to relieve the Owner of its obligations under this Regulatory Agreement. The written consent of the Issuer to any Transfer of the Project shall constitute conclusive evidence that the Transfer is not in violation of this Section 12. Nothing in this Section shall affect any provision of any other document or instrument between the Owner and any other party which requires the Owner to satisfy certain conditions or obtain the prior written consent of such other party in order to Transfer the Project. Upon any Transfer that complies with this Regulatory Agreement, the Owner shall be fully released from its obligations hereunder to the extent such obligations have been fully assumed in writing by the transferee of the Project.

The foregoing notwithstanding, the Project may be transferred pursuant to a foreclosure, exercise of power of sale or deed in lieu of foreclosure or comparable conversion under the Deed of Trust without the consent of the Issuer or compliance with the provisions of this Section 12. The Issuer hereby approves the transfer of limited partnership interests in the Owner to affiliates of the investor limited partner of the Owner, including, without limitation, the transfer of partnership interests in the Owner from the investor limited partner and non-managing [membership/partnership] interests in the limited partner of Owner.

For the Compliance Period, the Owner shall not: (1) encumber any of the Project or grant commercial leases of any part thereof, or permit the conveyance, transfer or encumbrance of any part of the Project, except for (A) Permitted Encumbrances, or (B) a Transfer in accordance with the terms of this Regulatory Agreement,

AMERICAN OVERSIGHT

in each case upon receipt by the Issuer and the Trustee of an opinion of Bond Counsel to the effect that such action will not adversely affect the Tax-Exempt status of interest on the Bonds (provided that such opinion will not be required with respect to any encumbrance, lease or transfer relating to a commercial operation or ancillary facility that will be available for tenant use and is customary to the operation of multifamily housing developments similar to the Project); (2) demolish any part of the Project or substantially subtract from any real or personal property of the Project, except to the extent that what is demolished or removed is replaced with comparable property or such demolition or removal is otherwise permitted by the Loan Agreement or the Deed of Trust; or (3) permit the use of the dwelling accommodations of the Project for any purpose except rental residences.

(c) the transferee or its management company will continue to manage the Project, or another management company reasonably acceptable to the Issuer will manage, for at least one year following such transfer and, if applicable, during such period the transferring owner or its management company will provide training to the transferee and its manager in the responsibilities relating to the Very Low Income Units; and

(4) the person or entity that is to acquire the Project does not have pending against it, and does not have a history of significant and material building code violations or complaints concerning the maintenance, upkeep, operation, and regulatory agreement compliance of any of its projects as identified by any local, state or federal regulatory agencies;

(B) the execution by the transferee of any document reasonably requested by the Issuer with respect to the assumption of the Borrower's obligations under this Regulatory Agreement and the Loan Agreement (if then in effect), including without limitation an instrument of assumption hereof and thereof, and delivery to the Issuer of an opinion of such transferee's counsel to the effect that each such document and this Regulatory Agreement are valid, binding and enforceable obligations of such transferee, subject to bankruptcy and other standard limitations affecting creditor's rights;

(C) receipt by the Issuer of an opinion of Bond Counsel to the effect that any such transfer will not adversely affect the Tax-Exempt status of interest on the Bonds; and

(D) receipt by the Issuer of all fees and/or expenses then currently due and payable to the Issuer by the Borrower.

It is hereby expressly stipulated and agreed that any sale, transfer or other disposition of the Project in violation of this section shall be ineffective to relieve the Borrower of its obligations under this Regulatory Agreement. Nothing contained in this section shall affect any document or instrument between the Borrower and the Issuer or the Trustee which requires the Borrower to obtain the consent of the Issuer or the Trustee as a precondition to sale, transfer or other disposition of any direct or indirect interest in the Project or of any direct or indirect interest in the Borrower.

(b) Notwithstanding the foregoing, the restrictions relating to the sale or transfer of the Project contained in paragraph (a) of this Section 12 shall not apply in the case of a transfer or other disposition of the Project by foreclosure under the Deed of Trust or deed in lieu of foreclosure or comparable conversion of the loan secured thereby and payment in full and retirement of the Bonds within a reasonable period of time thereafter.

(c) Notwithstanding the foregoing, the restrictions relating to the sale or transfer of the Project contained in paragraph (a) of this Section 12 shall not apply in the case of:

AMERICAN OVERSIGHT

which would result in a change of ownership of the Project for federal income tax purposes

(i) The Master Lease or the grant of a leasehold interest in a part of the Project of three years or less (or such longer lease term as the Issuer may permit by prior written approval) not containing an option to purchase;

which shall be governed by the provisions of Section 12(a) above.

(ii) sales or transfers of fixtures or any personal property in connection with the weatherization, preservation or maintenance of the Project pursuant to: (A) paragraph (e) of Section 6 of this Regulatory Agreement, or (B) the preservation and maintenance provisions of the Loan Agreement or the Deed of Trust; or

(iii) transfers by devise or descent or by operation of law upon the death of a joint tenant or a partner of the Borrower; provided however, that the delivery of evidence and opinions pursuant to paragraph (a) of this Section 12 shall be required in connection with transfers under this sub-paragraph (iii) of this paragraph (c).

(d) [The Borrower hereby covenants and agrees that any sale or other transfer of the entities constituting the Borrower or any change in the ownership of such entities of the Borrower shall be subject to the prior written consent of the Issuer.]

Upon written request of the Borrower to the Issuer, the Issuer may waive the foregoing restrictions in its sole and absolute discretion.

(e) The Borrower hereby covenants and agrees to pay the Issuer (i) an initial Issuer's closing fee in the amount of $_____, and (ii) as compensation for the Issuer's monitoring of the provisions of this Regulatory Agreement, to pay the Ongoing Issuer's Fee. In the event that the Bonds are prepaid in full prior to the end of the term of this Regulatory Agreement, the Ongoing Issuer's Fee for the remainder of the term of this Regulatory Agreement shall be paid by the Borrower at the time of the prepayment of the Bonds and shall be a lump sum amount equal to the present value (based on a discount rate equal to the then-current MMD (Municipal Market Data) rate for the maturity coincident with the remaining number of years in the Qualified Project Period, as determined by the Issuer at the time of prepayment) of the Ongoing Issuer's Fee for the number of years remaining in the Qualified Project Period, subject to the restrictions of the Code. The Issuer may waive the foregoing payment in its sole and absolute discretion.

In addition thereto, the Borrower will pay upon demand all of the fees and expenses paid or incurred by the Trustee or the Issuer in enforcing the provisions hereof.

The provisions of this Section shall survive the term of the Bonds and this Regulatory Agreement; provided, however, the provisions of this Section shall, in the case of the Trustee, survive the term of this Regulatory Agreement or the resignation or removal of such Trustee, but only as to claims arising from events occurring during the term of this Regulatory Agreement or the Trustee's tenure as Trustee under Indenture, and shall, in the case of the Issuer, survive the term of this Regulatory Agreement, but only as to claims arising from events occurring during the term of this Regulatory Agreement.

(f) Borrower hereby agrees that it expressly waives its right to the Qualified Contract as set forth in 26 USC § 42(h)(6)(E) and (F).

AMERICAN OVERSIGHT

Paul – No problem. Please see attached. Note, we have shifted from revenue bonds (sourced to tax increment as indicated in the presentation from a year ago) to SID bonds (secured by real estate in the current structure).

Let me know if I can help in any way.

Subject: Re: Updated Basque Trade Mission Schedule

Mary-Sarah

Below is some additional information to assist the Governor with comments during some of the meetings. I hit the ones that are outside of his normal comments. Please let me know if you have additional questions.

Will you please send me anything you provide to the Governor for comments in case I need to make any adjustments based on changes by our partners in Spain? Also, I'm happy to assist with putting together bullets for each meeting to give to the Governor once I land in Bilbao.

Meetings:

Friday, June 22:
Premier of Bizkaia Meeting:
- Mention Basque diaspora in Nevada and the Center for Basque Studies at UNR.
- Renewable energy and smart grid technology: highlight current status of renewable energy in Nevada and proposed plans by NV Energy to grow renewable energy. For smart grid technology, speak to the work by MGM and other resorts to utilize microgrid technology. The Bizkaia region is the home of Iberdrola, the fourth largest electric utility in the world and ranks number one for the production of renewable energy. Additionally, there is a robust electrical sector in the area focused on generation, transmission, and smart grid technology. They are interested in working with partners in Nevada to pilot new technology and see Nevada as a possible entry point into the US market. ***I'm also expecting a presentation from NV Energy. I can pull from that presentation to provide the Governor additional information.***
Blockchain technology: Blockchain, LLC will be with us on the trade mission, so it would be beneficial to highlight what they are planning in Nevada, to include the purchase of land at TRIC. Blockchain is of interest to the Bizkaia government because they can provide electricity at a low cost to that industry. Also, in conjunction with Blockchain there is a lot of work being done around AI in Bizkaia. ***I can also ask Michon Martin to give the Governor more information on this on the ground prior to this meeting.***

Monday, June 25:
Basque Universities:
- Rather than focus on the NSHE structure, I would suggest he mention some of the major institutions of higher education in the State and their participation in trade missions and global engagement. Greg Mosier from UNR will be there and could discuss what the College of Business is doing in Poland with the Warsaw School of Economics and a few other universities.
- TMCC culinary program. I sent you a separate email with the info that TMCC sent over to me. A brief mention of the program and the ties to the Bilbao Culinary School (ESHBI) would be helpful. I'll have some material I can hand out on the program after the discussion.

AMERICAN OVERSIGHT

Bilbao Culinary School:
- TMCC culinary program. Again, mention the program and that they are already working with this institution. This is a great opportunity for the Governor to learn about the program in Bilbao.

Thursday, June 28:
National Center for Renewable Energies:
- Brief mention by the Governor of renewable energy efforts and plans in Nevada followed by an introduction of Jeff Brigger.

President of Navarre:
- Same as above regarding renewable energy, smart grids and blockchain.
- Government of Navarre expressed some interest in smart city technology and efforts in Nevada. A brief mention of the work around transportation by the RTC and the testing of autonomous vehicles.

Trade and Investment Meeting:
- Same as above. Jeff Brigger can speak to renewable energy and smart grids in more detail.

At this point, I only see him making prepared remarks/speech in two venues.

- One is at the CEO Summit in Barcelona. He mentioned that he wanted to base it off of his remarks in Poland.
- The other would be at the USAC Reception on Thursday, June 28th in San Sebastian. This is wide open to what he wants to discuss.

Subject: FW: Updated Basque Trade Mission Schedule

Hi Jarad,

Christina forwarded the itinerary you sent over late Friday afternoon. For the remarks you all are hoping the Governor can make at specific meetings, the suggestions are quite specific. In order to prepare the Governor most efficiently, do you all have bullets that would support the suggestions?

For instance, in the first meeting on Friday morning, one suggestion you've made is for the Governor to address "shared interests in renewable energy, smart grid and smart city technology and blockchain technology" - do you have bullets about what is shared on each of those items?

Additionally, I presume that some of these meetings do not lend themselves to prepared remarks, so it would need to be a more bulleted form – is that a correct presumption?

Thank you!

Subject: wow - connecting Silicon Valley to Northern Nevada

Reno could get Silicon Valley air shuttle

Flying could be the new driving — at least between Reno and Silicon Valley.

Blackbird, a San Francisco-based air travel startup, is looking at launching a round-trip flight between Reno and Palo Alto, Calif., to better connect the Biggest Little City's growing technology sector with the center of the tech industry.

> The flight would operate between Reno-Tahoe International Airport and Palo Alto Airport (in other words, goodbye RNO-SFO, notorious for delays, and hello RNO-PAO).
>
> As part of its consideration of the proposed route, Blackbird executives will attend VentureBeat's Blueprint 2018, a conference focusing on regional technology expansion, from March 5 to 7 at the Nevada Museum of Art.

AMERICAN OVERSIGHT

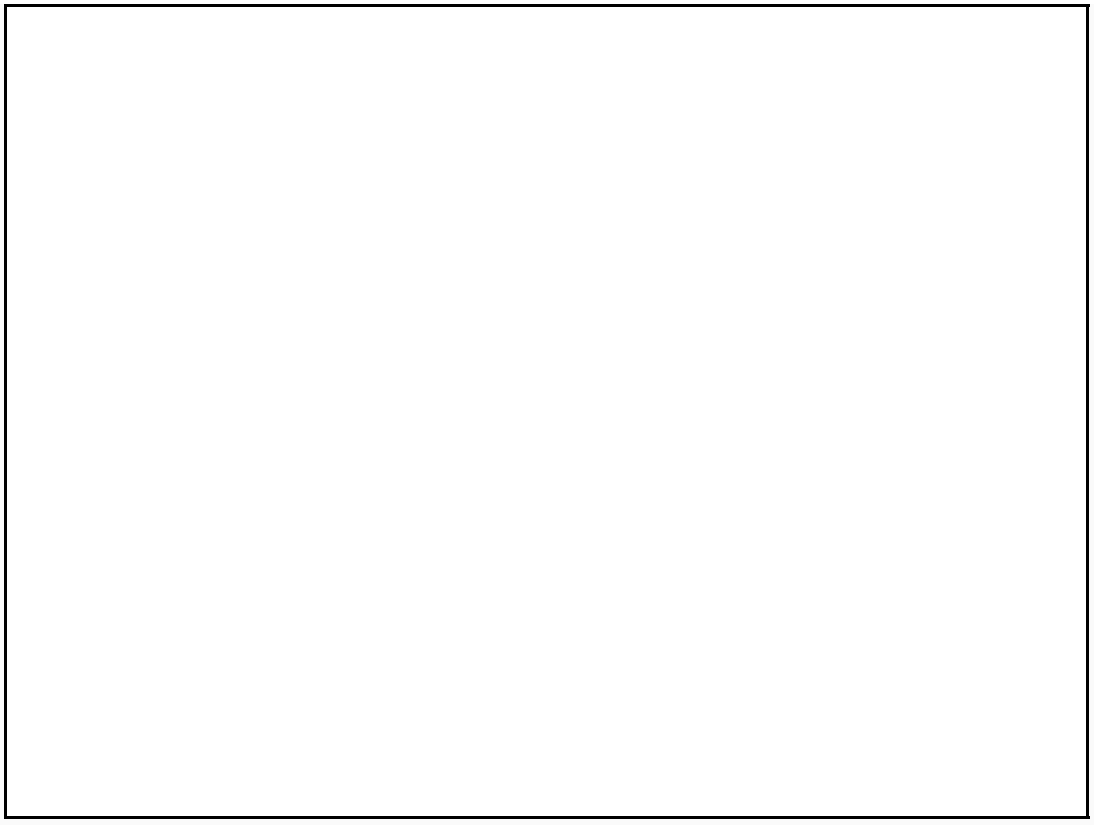
NV-DA-20-0615-A-005693

Blackbird, a San Francisco aviation startup, is considering a Reno-Palo Alto, Calif., route to better connect Reno's growing technology sector with Silicon Valley. *(Photo: Provided to RGJ Media)*

Blackbird will be soliciting feedback on the route from local officials, businesses leaders and other interested parties. Executives also will be talking up affordability, convenience and avoiding congestion.

"We're just starting the process," said Rudd Davis, CEO of Blackbird. "We're reaching out to the community to see what it needs. We want to help support and fuel the growth taking place in the city by making Reno more accessible."

Swiss seats



Blackbird currently operates eight flights between cities in California.

The flights are booked through the Blackbird app. Its first flight, Palo Alto to Truckee, debuted in January 2017; its most recent, Palo Alto to Santa Monica, began Feb. 19.

Before round-trip flights from Reno to Palo Alto can begin, "we want to establish relationships with certain businesses that commit to a certain number of seats in advance," Davis said. "This is how we launch all of our routes."

The plane Blackbird intends to use for the flight is the Swiss-made **Pilatus PC-12**, a popular turbine-powered business aircraft with a maximum altitude of 30,000 feet and a maximum range of nearly 1,900 miles.

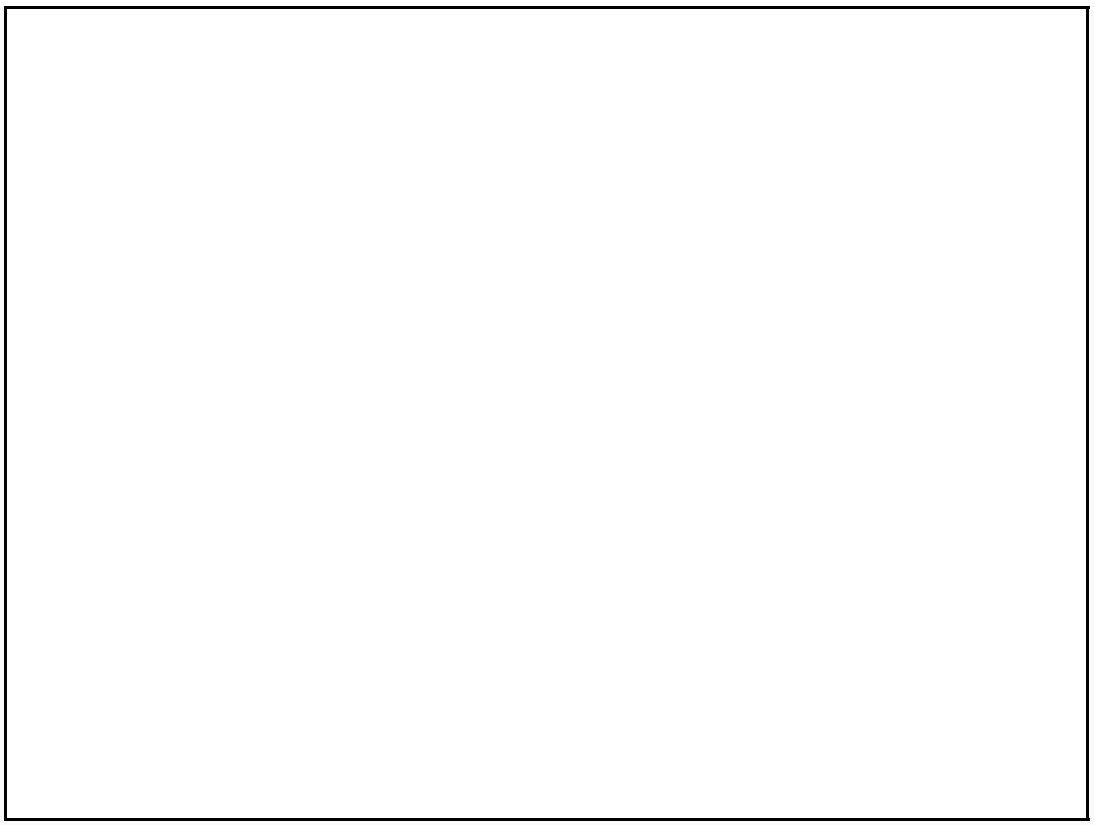
AMERICAN OVERSIGHT

The cabin of the Pilatus PC-12, a popular turbine-powered business aircraft with a maximum range of about 1,900 miles. *(Photo: Provided to RGJ Media by Pilatus)*

Seats would run about $640 round-trip, Davis said, with that price dropping to about $600 if bundles of seats are purchased, those seats then used by fliers as needed.

United Airlines (and its affiliates) currently operate the only nonstop flights between Reno and San Francisco International Airport.

A recent check of such flights, midweek with a 30-day advance purchase, showed fares, when seats were available, ranging from about $520 to about $700.



Those fares, when available, ranged from about $630 to about $850 with a 2-week advance.

Consistent price

Davis, the Blackbird CEO, said officials contacted the company last December about a potential Reno-Silicon Valley route.

Mike Kazmierski, CEO of the Economic Development Authority of Western Nevada, said the air service would allow the region “to expand our efforts to attract technology companies, high-level talent and venture capital to reinforce our growing technology community.”

AMERICAN OVERSIGHT

Rudd Davis, CEO of Blackbird, a San Franciso aviation startup that is considering a route from Reno to Palo Alto, Calif., in Silicon Valley. Davis is attending the Blueprint technology conference March 5-7, 2018, at the Nevada Museum of Art. *(Photo: Provided to RGJ Media)*

Davis said Blackbird, following contacts made at the Blueprint conference, would set up individual presentations for businesses interested in hearing more about the Reno-Palo Alto flight.

Reno, he added, “has traditionally been regarded as being more isolated. If there is a consistent air shuttle running at a consistent price, it will facilitate additional businesses coming to the area.”

Subject: Re: Daybreak/Newport Land

Thank you!

Andrew-I'm not sure if you have been following the Daybreak saga, but our client has encountered significant roadblocks with the City of Reno. We would love to meet with you and Paul to discuss how this development moving forward is an integral part of the great economic development work that the Governor has spearheaded by bringing Tesla, Panasonic, Switch, etc to Northern Nevada.

As you may know, these companies are struggling to find housing for their workers, and are nearing crisis levels. Daybreak, at over 4,000 units of varying size, cost, and layout, provides a unique opportunity to alleviate the stress being felt out at TRIC. Please let us know when you might be available to meet. We are back in front of City Council on the 28th, and are hoping to meet before that time. Thanks, Andrew.

Best,
Matt Robinson

> Hello,

AMERICAN OVERSIGHT

Our client, Newport Land, is currently attempting to get the Daybreak Community approved by the Reno City Council. This community has long been looked at as a means for Tesla, Panasonic, and Switch employees to secure attainable housing in the area.

We are hoping we might be able to meet with Paul Anderson and Andrew Clinger sometime this month to go over the project and where we stand. Please let me know if this will be possible. Thank you.

Best,

Matt Robinson

in Section 4.1 of the Opportunity Zone Nomination Instructions on the Opportunity Zone State Resource page, here: https://www.cdfifund.gov/Pages/ozonestateresource.aspx.

States must submit the modification letter and revised Nomination Tool as attachments to ***a new Service Request in AMIS*** in accordance with the procedure in Section 6.2 of the Opportunity Zone Nomination Instructions. ***The modification letter must be submitted before the date that the Secretary of the Treasury designates the original nominations submitted by the State and no later than the end of the current consideration period of the Stateâ€™s nomination.*** Template language for the required letter is provided below. States should not modify their original nomination Service Request or attachments in AMIS.

TEMPLATE: COMBINED SUBMISSION OF MODIFICATION LETTER AND CONSIDERATION PERIOD EXTENSION REQUEST

[Title]
[State CEO]
[Address]

The Honorable Steven T. Mnuchin
Secretary
U.S. Department of the Treasury
1500 Pennsylvania Avenue, NW
Washington, DC 20220

Dear Mr. Secretary:

This letter serves as a notification that the [State/Commonwealth/District/Territory] of [Name of State/Commonwealth/District/Territory] intends to modify the nomination of census tracts for designation as Qualified Opportunity Zones under section 1400Z-1(b)(1) of the Internal Revenue Code, which was submitted on [date original nomination submitted]. The [State/Commonwealth/District/Territory] of [Name of State/Commonwealth/District/Territory] formally nominates the tracts identified in the accompanying revised Opportunity Zone Nomination Tool for designation as Qualified Opportunity Zones under section 1400Z-1(b)(1) of the Internal Revenue Code.

In addition, the [State/Commonwealth/District/Territory] of [Name of State/Commonwealth/District/Territory] formally requests under section 1400Z-1(b)(2) of the Internal Revenue Code that the Secretary extend the consideration period for the Secretary to certify the nomination and designate the nominated census tract as Qualified Opportunity Zones by up to 30 days as needed to facilitate the [State/Commonwealth/District/Territory]â€™s request to modify its original nomination.

Hi, Andrew – as you are probably aware (or may have guessed), the State's nomination of the non-LIC contiguous tract based on 2012-2016 ACS data has created some challenges on this end. With the extension of the consideration period, we have until June 18 to act. I will give you a heads up before any action. Hope this helps.

AMERICAN OVERSIGHT

For Immediate Release: ***Contact:***
April 20, 2018
Mary-Sarah Kinner
mkinner@gov.nv.gov

GOVERNOR SANDOVAL NOMINATES 61 OPPORTUNITY ZONES

CARSON CITY, NV – Governor Brian Sandoval today nominated 61 opportunity zones, pursuant to the Tax Cuts and Jobs Act of 2017, which established an Opportunity Zone tax incentive, designed to encourage long-term private investment in low-income communities.

"During my time as Governor, we have invested significant resources in Nevada," Governor Brian Sandoval said. "While we have seen substantial returns, there are still parts of our state that need additional assistance. It is my hope that by nominating these 61 low-income opportunity zones, private investors will choose to fund projects in these areas that benefit the Nevadans who need it most. What's more, we believe that communities surrounding the 61 opportunity zones will also benefit from investment in the zones."

The 61 opportunity zone nominations directly impact more than 230,000 Nevadans in some of Nevada's most disadvantaged communities.

In the 61 tracts:
- Average family income is approximately $37,000
  - (Just 60% of median statewide family income of approximately $62,500)
- Average unemployment rate from 2011-2015 is16%
  - Nearly 2x greater than the national unemployment rate

The Opportunity Zone program runs on essentially two tracks – first, Governors in each state nominate opportunity zones, which are low-income community census tracts that could benefit from significant private investment. Second, once the zones are certified by the U.S. Treasury Department, interested private investors must invest in opportunity funds, specialized vehicles that can then be utilized to invest in the certified opportunity zones.

Subject: RE: Final BDR

Hi Pam,
Below are some proposed amendments to the "match" language for the Springs Preserve. Please let me know your thoughts and if LCB is good with any of them. As stated, if by inserting DCNR as the match-decider the appropriation becomes a grants process for us ("Mother may I please" process) instead of a direct appropriation like in the old Conservation Bond then we would elect to take DCNR out as the match-decider and leave the old language in. Let me know if there are any questions. Thank you!

Original Draft Bill Language received from LCB on Nov. 8

The Las Vegas Springs Preserve in Clark County shall match the allocation made pursuant to this subsection with an amount of money or value of services, material or equipment that is not more than 50 percent, as determined by _____, of the cost of each project that is completed pursuant to this subsection.

Amendment #1 *(we would prefer this one)*

AMERICAN OVERSIGHT

The Las Vegas Springs Preserve in Clark County shall match the allocation made pursuant to this subsection with an amount of money or value of services, material or equipment that is ~~not more than~~ ***equal to*** ~~*50*~~ ***25*** percent, ~~as determined by _____,~~ of the cost of each project that is completed pursuant to this subsection.

(Same match percentage would be applicable to Clark County Wetlands Park/ Las Vegas Wash)

Amendment #2

The Las Vegas Springs Preserve in Clark County shall match the allocation made pursuant to this subsection with an amount of money or value of services, material or equipment that is ~~not more than~~ ***not more than*** 50 percent, as determined by ***the State Director of Conservation and Natural Resources***, of the cost of each project that is completed pursuant to this subsection.

Amendment #3

The Las Vegas Springs Preserve in Clark County shall match the allocation made pursuant to this subsection with an amount of money or value of services, material or equipment that is ~~not more than~~ ***between 25-*** 50 percent, as determined by ***the State Director of Conservation and Natural Resources***, of the cost of each project that is completed pursuant to this subsection.

Hi Neena and Robbie - Please consider this an e-introduction. Neena represents a new company to Nevada that recently met with Governor Sandoval. The company, Aqua Metals, is a battery disposal/recycle business and is located at the Tahoe Reno Industrial Center. Robbie is the Administrator of Fleet Services and manages the state fleet, except for NDOT and NHP vehicles. I'll leave it up to the two of you to connect, but please let me know if you need any additional information or help.

Hi Jessica: I hope you had a great weekend and are not too stressed about next week! I'm just confirming that my flight leaves NM for Reno at 10:15 not 11:30. Correct? Also, I tried to get the early bird check for the 18th since I leave so early and SWA says SWABIZ has to make that request. Can you ask NGA to get me early check in please. I'll pay for it if necessary. Thanks.

Nevada marijuana tax revenue blows past 12-month projections

Chris Kudialis

Las Vegas Sun

https://lasvegassun.com/news/2018/jun/28/nevada-marijuana-tax-revenue-blows-past-12-month-p/

Tax revenue from marijuana sales in Nevada surpassed official projections for the first year of recreational sales in just 10 months, according to new figures released Thursday by the Nevada Department of Taxation.

Authorities said $6.55 million in state marijuana tax was raised in April, putting Nevada at $55.53 million in total tax collections since recreational marijuana sales began on July 1, 2017. That exceeds the initial 12-month projection of $50.3 million through July 1, 2018.

“Both taxes that contribute to that total have substantially outperformed projections,” said Bill Anderson, executive director of the Nevada Department of Taxation.

The 15 percent wholesale tax — paid by cultivation and production facilities that supply dispensaries — generated nearly $3 million in April.

AMERICAN OVERSIGHT

The 10 percent excise tax brought in about $3.6 million. The excise tax, paid only on recreational pot, has raised $34 million this fiscal year.

Gov. Brian Sandoval's office projected that the two taxes combined would raise an average of $5 million a month from July 2017 to July 2019, a total of $120 million.

Officials projected the first year of recreational sales would raise lesser amounts, with the final six months of 2019 ramping up to collect the most.

By law, revenue from the wholesale tax is allocated to fund state and local government regulation of the industry, and what's left is deposited into the Distributive School Account. Revenue from the excise tax is deposited into the Nevada Rainy Day Fund.

Nevada Attorney General Adam Laxalt releases school safety report

Meghin Delaney

Las Vegas Review Journal

https://www.reviewjournal.com/news/politics-and-government/nevada/nevada-attorney-general-adam-laxalt-releases-school-safety-report/

Nevada Attorney General Adam Laxalt released a wide-ranging set of recommendations on school safety Thursday, but there's no clear idea of what the measures may cost or who would foot the bill.

The report stems from a school safety summit Laxalt held in March with education and safety officials after a Feb. 14 shooting at a school in Parkland, Florida, reignited the national conversation on school safety nationwide. During that summit, he stressed prioritizing the physical safety and "hardening" of schools to make it more difficult for an assailant to enter campus.

"Our goal was to provide as much information as humanly possible," Laxalt, the Republican candidate for governor, told the Review-Journal on Thursday.

On funding, he said it would be a “balancing act” that would be up to the next Legislature and governor to work on.

The seven major themes of the report including increasing police presence, adding new safety features, improving communication between schools and law enforcement officials and enacting “red flag” laws to evaluate potential threats with a nexus to mental illness or domestic violence.

Governor Brian Sandoval, who also convened a school safety task force in the wake of the Parkland shooting, declined to comment on the report. Laxalt said he will send the report to the governor’s task force for consideration.

Laxalt recommends districts attempt to move toward having a police officer in every school, although the report recognizes that is often cost prohibitive, particularly in the rural areas.

The report incorrectly notes the officers serving in Clark County schools are Metropolitan Police Department officers. The school district has its own police department, although often works with Metro when responding to incidents.

There are some physical recommendations, including more clearly marking school buildings from the outside to ensure law enforcement reporting to scene can find the right location, increasing perimeter fencing and having one entry on all campuses. The report also recommends reducing shrubbery outside the school so an active assailant cannot hide.

The report includes other actionable items, many of which the Legislature would need to take up. Laxalt recommends clarifying an exemption to the state’s public records law so that law enforcement can share emergency response plans confidentially. He wants to expand some privacy measures through a new anti-bullying app, called Safe Voice, by changing Nevada Administrative Code.

Christy McGill, who works in the Nevada Department of Education and oversees anti-bullying efforts, said in a statement the recommendations would be helpful as conversations around school safety continue.

“Teamwork will be key as schools, law enforcement, students, parents, community and mental health come together to create safe and respectful schools,” she said.

Laxalt also issued a memorandum on the Federal Educational Rights and Privacy Act to clarify when it’s appropriate for school districts to immediately share information with law enforcement. FERPA generally protects student information,

AMERICAN OVERSIGHT

and there have been cases where schools have been hesitant to share information because they do not want to violate FERPA. The memorandum clarifies emergency cases.

The report also does not mention whether Laxalt thinks districts should take advantage of an existing Nevada law which allows principals to give employees written permission to carry guns in schools. On Thursday, he reiterated he thinks that should be a local decision.

“It’s certainly not something we talked about as a statewide solution,” he said.

Most of the state’s 17 districts — including Clark County — do not allow principals to give teachers permission, although there’s been increased conversation around the topic.

Background check law

On Thursday, Nevada Democrats spokeswoman Helen Kalla said it was clear Laxalt scrambled to finish the report after the group criticized him for how long it took to be compiled.

“The fact is that Laxalt is nothing more than a puppet for the Washington gun lobby, even working with them to block the ballot measure to expand background checks, which he has since refused to work to enforce after Nevada voters approved it,” Kalla said in a statement.

The campaign for Steve Sisolak, the Democrat running for governor, cited Laxalt’s conclusion that a voter-approved background check law cannot be legally enforced as reason to dismiss the attorney general’s safety plan.

“Adam Laxalt can’t even be trusted to work to enforce the voter-approved background check law,” campaign press secretary Christina Amestoy said. “As governor, Steve will take every common sense step he can to keep our children safe.”

Governor’s committee

Chaired by former state superintendent Dale Erquiaga, the 25-person group convened by Governor Brian Sandoval is set to deliver a set of recommendations in July. Sandoval will consider the recommendations and may build them into his draft budget.

During the first task force meeting in May, Equiaga split the large group into two factions, to "wordsmith and craft" recommendations. One group is focus on safety aspects, and the other will focus on the well-being of students.

But Sandoval's power is limited, as he leaves office before the next Legislature convenes. Ultimately, the next governor will have control over whether any proposed safety measures move forward to the Legislature.

The group is slated to meet through the end of calendar year, to continue to look at long-term solutions to school safety issues.

Las Vegas summit highlights need for workplace learning

Bailey Schulz

Las Vegas Review Journal

https://www.reviewjournal.com/business/las-vegas-summit-highlights-need-for-workplace-learning/

Nevada will need to create at least 270,000 jobs over the next 12 years to meet the growing needs of tomorrow's workforce. Work-based learning can help fill those positions.

That's according to Jeremy Aguero, principal of Applied Analysis.

"We need to train these students to be thinkers and doers," he said.

Aguero's comments came during the Governor's Education to Workforce Summit held Thursday at The Smith Center, where employers, analysts, educators and members of governmental organizations such as the Governor's Office of Workforce Innovation, gathered to discuss work-based learning opportunities.

Work-based learning can help connect the workforce of tomorrow with in-demand jobs, according to Manny Lamarre, the executive director of OWINN. He said the state hopes to have 55,000 young adults engaged in work-based learning — which includes internships, co-ops, apprenticeships and more — by 2025.

"We need more young people entering the workforce to support the tax dollars, to support our community," Lamarre said.

There are currently about 512,400 students in the state's K-12 system. Even with more Nevada students obtaining degrees for in-demand fields like health services, nursing, sciences and engineering, Aguero said more needs to be done.

"It's not even close enough in terms of what's going to be necessary to ensure that those half-million students that are coming through our system are ready to take the jobs that are going to be available to them in a decade when they come out of school," he said.

There are a number of ways to create jobs for this growing workforce, Aguero said, including more internship and apprenticeship programs. But it's important to keep in mind the types of jobs Nevada needs to fill.

The state falls about about 8,000 jobs short of the national average in professional and business services, 11,000 short in information, 64,000 short in manufacturing and 80,000 short in education and health services.

"Our economy is more diversified today than it was at the peak of the last economic cycle," Aguero said. "But we are not a diversified economy."

Lieutenant Jeff Varner works with Nevada Highway Patrol interns. He said law enforcement isn't the most sought-after line of work, but work-based learning programs have helped.

"It provided us with an opportunity to recruit," Varner said. "You get a little bit of experience within the agency, and there's a possibility that we'll have these interns come back to us."

Gov. Brian Sandoval, who was unable to attend the event but relayed a message via video, said Nevada is expected to have about 630,000 open jobs by 2024. A majority of those will require more than a secondary diploma, but less than a four-year degree.

AMERICAN OVERSIGHT

“If Nevada is to continue to grow and thrive economically, we must provide skilled workers to employers and allow young adults to participate in the workforce,” he said.

Mary Beth Sewald, president and CEO of the Las Vegas Metro Chamber of Commerce and the keynote speaker at Thursday’s summit, said it’s important to connect young people with the credentials and experiences needed to find adequate jobs.

“We just cannot sustain these long-term economic growth issues that we have and compete in a global economy unless we really get serious about marrying education and the workforce,” she said. “It needs to be education that is more focused on marketable and practical skill sets that are actually relevant to what employers need.”

She said employers and organizations need to commit to programs like internships, mentorships and apprenticeships to make a difference in the lives of the workforce of tomorrow.

“Workforce training can’t be two years behind,” she said. “It needs to be two years ahead.”

Nevada marijuana sales have another strong month

Wade Tyler Millward

Las Vegas Review Journal

https://www.reviewjournal.com/news/pot-news/nevada-marijuana-sales-have-another-strong-month/

Days before the first anniversary of recreational marijuana sales in Nevada, the industry has given the state a present.

Data from the state Department of Taxation show the amount of tax revenue from marijuana has exceeded state projections for the first year — two months ahead of time.

The state collected $6.55 million in marijuana tax revenues in April, bringing the total since recreational sales become legal to $55.53 million, according to the department Thursday.

AMERICAN OVERSIGHT

The recreational marijuana industry has accounted for 17 percent of the state's taxable sales base this year, according to the department.

April numbers didn't break the monthly record set in March. July 2017, the first month for recreational marijuana, remains the lowest period of tax revenue from marijuana.

The total combined sales for medical, recreational and marijuana-related goods since recreational became legal is $433.51 million.

A year into recreational sales, and four years into the legalized sales of medical marijuana, the industry still has its critics.

Kevin Sabet, co-founder of Alexandria, Virginia-based Smart Approaches to Marijuana, said better data on the effects of legalization on crime, impaired driving, the black market and other facets of life are needed.

"One year is simply not enough time to truly grasp the damaging effects legalization has on a state," Sabet said. "It will take decades for a full assessment."

Nevada Highway Patrol to equip officers with overdose reversal drug

Jessie Bekker

Las Vegas Review Journal

https://www.reviewjournal.com/local/local-nevada/nevada-highway-patrol-to-equip-officers-with-overdose-reversal-drug/

The Nevada Highway Patrol announced Thursday that it will equip officers who undergo training with the opioid-overdose reversal drug, naloxone.

Each trooper that completes the hourlong online training will be given two doses of the naloxone nasal spray, sold under the brand Narcan, according to a news release from the Nevada Department of Public Safety Highway Patrol Division.

The training, which debuted Wednesday, is not mandatory, Trooper Jason Buratczuk said.

The drug can be used up to an hour and a half after a person has overdosed on an opioid, including heroin, the release said. Once administered, naloxone causes a person to enter withdrawal.

There were 12.8 opioid overdose deaths per 100,000 Nevadans in 2016, according to state data.

Nevada pot taxes exceed yearly projection in 10 months

Geoff Dornan

Nevada Appeal

https://www.nevadaappeal.com/news/government/nevada-pot-taxes-exceed-yearly-projection-in-10-months/

Nevada's marijuana tax revenues have surpassed the fiscal year projection in just 10 months.

Taxation Department Director Bill Anderson said through April, the combined revenues from the medical and recreational marijuana taxes total $55.53 million. He said that's 110 percent of what was projected for all of fiscal 2018. He said the Wholesale Marijuana Tax paid by cultivators of medical and recreational marijuana brought in $21.47 million so far. The Retail Marijuana Tax paid by non medical retail purchasers generated $34.06 million.

Pot tax revenue for the entire fiscal 2018 was projected to be $50.32 million.

Taxable sales for medical and recreational marijuana through April total $433.51 million.

Anderson said when looked at another way, total taxable sales are up $1.96 billion for the 10-month period while marijuana related sales are up more than $338 million.

"In other words, the launch of the adult-use industry accounts for a bit more than 17 percent of the overall growth in Nevada's taxable sales base so far this fiscal year," he said.

AMERICAN OVERSIGHT

For just April, Anderson said marijuana tax revenues were $6.55 million. That's less than March, which recorded a bit more than $7 million in tax revenues.

The Wholesale Marijuana Tax rate is 15 percent on revenues generated by cultivators along with fees, penalties and assessments. After paying costs of enforcing and collecting the tax, $5 million of that revenue goes to local governments and the rest to the state's K-12 education budget.

The Retail Marijuana Tax is 10 percent and those revenues go into the state's Rainy Day Fund.

Officials told Nevada lacks indigent defendant services

Geoff Dornan

Nevada Appeal

https://www.nevadaappeal.com/news/government/officials-told-nevada-lacks-indigent-defendant-services/

The executive director of the Sixth Amendment Center said Thursday Nevada needs to provide more support and services to improve legal representation to indigent defendants in the state's rural counties.

David Carroll told the Right to Counsel Commission headed by Supreme Court Justice Michael Cherry the U.S. Supreme Court says under the 14th Amendment, "the state must guarantee local government is capable of providing adequate representation and must ensure they are doing so."

He said Nevada has no mechanism to oversee the indigent defense process operated independently by most of the state's counties.

The 6th Amendment guarantees defendants a fair and speedy trial, an attorney and the right to confront his or her accusers.

In some Nevada counties such as Humboldt, he said the system is working. District Judge John Stegelmilch told the commission it's working well in Lyon, too.

AMERICAN OVERSIGHT

But that's not the case statewide.

"The state is failing that 14th Amendment obligation," Carroll said, adding, as a result, Nevada is being sued by the American Civil Liberties Union that argues defendant rights are being violated in many cases.

"The state is responsible for whatever problems that have endured for the past 20 years because it's a state responsibility," Carroll said.

As an example, he said, "No one can say with clarity how much is being spent on indigent services." He said five rural counties don't even show public defender expenditures as a separate budget item.

The state public defender only provides those services in Carson City and Storey County. The largest counties, Clark and Washoe, have fully staffed public defender offices. For the rest of the state, the counties are on their own with no state funding or other support.

Carroll conducted an extensive study of how Nevada counties provide indigent defense services, visiting every court in the state in the process. He said he and rural county officials believe local governments are in the best position to decide how to provide those services in each jurisdiction because one size doesn't fit all. He said recreating the statewide public defender's operation that was disbanded in 1980 isn't the answer and locals universally believe public defenders who live in their communities are better able to provide those legal services. In some cases, he said that would be private lawyers under contract to provide legal services. In others, they would be county employees.

He said the counties are concerned the state might step in and just take over the system, imposing one system on everyone.

But he said those jurisdictions made it clear they would welcome state involvement and support in providing services such as creating a central repository for data so county commissioners have some place to go to determine if the applicants for those public defender contracts are good or bad for the jobs.

"What if the state body vetted attorneys so they know this attorney can handle these kinds of cases?" he asked.

He said everyone of the more than 150 interviewed for his study agreed rural public defenders could use training and would appreciate the state taking on that responsibility. In addition, he said they supported the idea of the state listing

AMERICAN OVERSIGHT

NV-DA-20-0615-A-005745

qualified investigators in different specialties as well as expert witnesses to help both contract public defenders and those employed directly by the counties find qualified help to defend people.

Commission member Drew Christensen representing the Clark County Commission said that county is trying to keep a repository of qualified experts available to lawyers. He said in Clark, the most common request is for psychologists.

Carroll said the Clark County public defender's office provides training and maybe the state could partner with them to provide classes and support for rural defense counsel.

The commission will meet again July 27 to hear more from Carroll on some counties that are having more problems with indigent defense.

Nevada attorney general presents safe school plan

Geoff Dornan

Nevada Appeal

https://www.nevadaappeal.com/news/government/nevada-attorney-general-presents-safe-school-plan/

Attorney General Adam Laxalt on Thursday issued a series of recommendations to improve school safety.

The recommendations were generated in the March Law Enforcement Summit on School Safety and will be submitted to the governor's Statewide School Safety Task Force and the Nevada Legislature.

He said the recommendations focus on seven major topics and includes some things that will require legislative action or long term planning.

"Our schools should be places of teaching and learning, not the site of violent crimes," he said.

The proposals listed include:

Increase patrols by school resource officers, reducing response times for any incident or attack;

Enhancing the existing technologies for running background checks and criminal histories on suspects;

Modernizing safety features in schools including changes to floor plan designs;

Creating active-assailant training programs for law enforcement, teachers and students, establishing incident command procedures;

Evaluating potential threats to schools and improving communications between teachers, administrators and law enforcement. Establishing response plans for specific schools and improving training programs; and

Enacting laws to reinforce mental health services and strengthening the ability to evaluate and address potential threats, especially related to mental illness or domestic violence. That would include encouraging students to download the "SafeVoice Nevada" mobile app.

"I am confident that, if Nevada takes these important steps, our schools and children will be safer," Laxalt said.

Laxalt told The Associated Press the question of letting teachers carry guns on campus should be left to individual school districts.

"I would not propose that we force anyone who doesn't want to, to carry a gun," he said.

Another recommendation was the Legislature next year should consider a "red flag" law to allow judges to approve petitions to confiscate guns from people found to pose a "serious and immediate threat of violence to themselves or others."

His office couldn't be reached to explain what those recommendations would cost to implement or where the money would come from.

AMERICAN OVERSIGHT

But in the recommendations it was stated federal grants could fund expansion of a student tracking system more comprehensive than one already used in the Clark County School District. It would flag for administrators those students who pose "even a marginal threat of violence to other students and teachers."

Nevada's safe campus plan looks at 'red flag' gun laws

Ken Ritter

Associated Press

https://elkodaily.com/news/state-and-regional/nevada-s-safe-campus-plan-looks-at-red-flag-gun/article_fb76e8a9-6f80-541b-a3bb-01a4b5d60183.html#tracking-source=home-top-story-1

LAS VEGAS (AP) — Hardening school campuses, encouraging students to report troubled classmates and having the Legislature look at so-called “red flag” laws to confiscate guns from people deemed to be a threat are among ways to make Nevada schools safer, the state attorney general said Thursday.

A school safety report from Attorney General Adam Laxalt calls for expanded use of a mobile app called SafeVoice Nevada, widening an assessment program to identify and track troubled students from one school to another, and added armed officers on campus who, in Laxalt’s words, are “trained, armed and able to immediately take out an assailant.”

“It was unanimous in our summit that the more resources they have, the faster they can respond to a school incident,” Laxalt said in an interview.

Laxalt referred to a “summit” he convened with law enforcers and school officials in March — the same day students walked out of schools to remember the 17 people killed in a shooting at a high school in Parkland, Florida.

Laxalt told The Associated Press the question of letting teachers carry guns on campus should be left to individual school districts.

“I would not propose that we force anyone who doesn’t want to to carry a gun,” he said.

The Republican attorney general, who is running to replace term-limited GOP Gov. Brian Sandoval, said he also spoke broadly about school safety with U.S. Attorney General Jeff Sessions on Monday in Reno.

AMERICAN OVERSIGHT

Laxalt's 32-page report is separate from a study commissioned in February by Sandoval.

A 25-member task force has been meeting and plans to submit its report to the governor in August, Christy McGill said, a state education official involved in both efforts. She said the governor's task force may incorporate some elements of Laxalt's report in its recommendations for changes to state law.

"We're really pushing for everyone to work as a team," McGill said.

Since most school shootings are carried out by students at schools they attend, Laxalt's report said federal grants could fund expansion of a student tracking system more comprehensive than one already used in the Clark County School District in and around Las Vegas. It would flag for administrators those students who pose "even a marginal threat of violence to other students and teachers."

Laxalt, who has campaign backing from the National Rifle Association, has been blamed with Sandoval for not enacting a gun background check initiative that they opposed but that voters approved in November 2016. It would turn over to the FBI the responsibility for vetting gun buyers during private gun sales. Sandoval and Laxalt say that a state gun-buyer screening program is more complete, and that the FBI has refused to take the job.

"Our current system is a strong system— more comprehensive than the federal system," Laxalt said Thursday.

His recommendation is to automate and streamline the state Central Repository for Nevada Records of Criminal History to more quickly add mental health findings and court records of actions such as protective orders.

"We want to ensure there are no gaps in the system for people wanting to purchase firearms, and that law enforcement can access information in real time," Laxalt said.

The Legislature next year should consider a "red flag" law to allow judges to approve petitions to confiscate guns from people found to pose a "serious and immediate threat of violence to themselves or others," the report said.

Laxalt said any measure must also ensure "proper due process for the person potentially getting their firearm seized."

AMERICAN OVERSIGHT

Hardened campuses could be built with bullet-resistant materials, perimeter fencing and key-card identification at doorways, the report said. It points to upgraded video surveillance with more cameras in classrooms; public address systems capable of reaching students and teachers on campus; and the ability to promptly notify family members in an emergency.

The report recommends encouraging more students, parents, teachers and administrators to use the Nevada SafeVoice mobile app, and calls for Sandoval to sign a "statement of emergency regulations" to allow tips about school threats to be forwarded to police and sheriffs for investigation.

It provides an attorney general's office opinion that a Federal Family Educational Rights and Privacy Act of 1974 requirement for parental permission to disclose information does not apply because school officials can invoke a health and safety exception.

Big Pharma abandons lawsuit over Nevada's insulin pricing transparency law after state approves trade secret protection regulations

Megan Messerly

The Nevada Independent

https://thenevadaindependent.com/article/big-pharma-abandons-lawsuit-over-nevadas-insulin-pricing-transparency-law-after-state-approves-trade-secret-protection-regulations

Two national drug lobbying organizations dropped a lawsuit Thursday challenging the constitutionality of Nevada's first-in-the-nation insulin pricing transparency law a little less than a month after the state approved regulations allowing drug companies to protect certain information they turn over to the state from public disclosure.

Attorneys representing two associations and the state agreed in a joint court filing that the newly adopted regulations resolve drug companies' concerns that the new law would require manufacturers of diabetes drugs to disclose trade secret-protected information in conflict with federal law and in violation of the U.S. Constitution. The decision to abandon a legal fight comes nine months after the Pharmaceutical Researchers and Manufacturers of America (PhRMA) and the Biotechnology Innovation Organization (BIO) challenged the law in U.S. District Court.

PhRMA's Executive Vice President and General Counsel James Stansel said in a statement Thursday that the regulations addressed the "most significant legal flaw" in the legislation and that it had agreed to drop its lawsuit "given the changes to the interpretation and implementation of the law." However, he noted that the association was doing so while "specifically reserving rights to reinstitute the litigation in the future."

AMERICAN OVERSIGHT

In the joint filing, both sides agreed that drug companies could take action against the state in federal court for disclosing any information that is considered a trade secret under federal trade secret law.

It is unclear what changed since earlier this month when the drug lobbying organizations withdrew a motion asking the court to temporarily halt the law from being implemented in light of the newly-approved regulations but reiterated their belief that the law is unconstitutional on its face and that there is no legal way for it to be executed without violating the U.S. Constitution.

“Plaintiffs continue to believe that SB 539 is facially unconstitutional for the reasons explained in their pending motion for summary judgment,” the drug lobbying associations wrote in a June 8 filing.

The organizations had also expressed significant concern with the regulations as written before they were approved.

A spokeswoman for PhRMA said that drug companies want to have a “thoughtful conversation” with lawmakers, patients and others in the state on improving affordability and access to drugs and blamed recent price increases on the middlemen in the drug pricing process known as pharmacy benefit managers (PBMs), which act as the go-betweens for drug companies and insurers.

“While biopharmaceutical manufacturers rebate more than one-third of a medicine’s sticker price back to middlemen, those savings often don’t make it to the patient at the pharmacy counter, even while these middlemen continue to grow their profits,” PhRMA spokeswoman Priscilla VanderVeer said in a statement. “Patients need solutions that actually lower their out-of-pocket costs and we look forward to working with every health care stakeholder in Nevada to make that a reality.”

The law, which was passed during the 2017 legislative session and heavily lobbied against by the pharmaceutical industry, requires manufacturers of so-called essential diabetes drugs and PBMs to report certain data points to the state in an attempt to understand the reasons for year over year increases in the price of those drugs. Those data points include things like profits manufacturers have earned from the drug, the cost of research that went into it and the profits PBMs have kept from negotiating rebates on the drugs.

The original bill, sponsored by Democratic Sen. Yvanna Cancela, only required disclosures from drug manufacturers but was vetoed by the governor partly because it didn’t mandate the same level of transparency from PBMs. The vetoed bill was eventually grafted onto a PBM transparency measure sponsored by Republican Senate Leader Michael Roberson and signed into law by the governor.

AMERICAN OVERSIGHT

The regulation, which was approved by the Department of Health and Human Services late last month, allows drug manufacturers and PBMs to request that information they report to the state be kept confidential if they believe its disclosure would constitute a misappropriation of a trade secret. Then, if the department receives a public records request to release that information, state officials would make an initial determination about whether the information constitutes a trade secret and should be released but allow manufacturers 30 days to take action in court to prevent the disclosure of the information if they disagree.

Bobbette Bond, the policy director for the Culinary Health Fund who helped shepherd the law through the legislative process, praised the Department of Health and Human Services for working hard to figure out a way to move forward but expressed disappointment that the state essentially conceded that federal trade secret law preempts state law. The legislation specifically removed the information manufacturers and PBMs report to the state from the state's trade secret law in order to remove any potential concerns over its disclosure.

"We will now see how this plays out when PhRMA next claims that information about how they set prices is more important than the public interest in understanding their rising prices and profits for medicine often funded by taxpayer dollars and essential for survival," Bond said in an email.

Attorney General and Republican gubernatorial candidate Adam Laxalt, whose office represented the department and the governor in the lawsuit, praised the victory in a tweet Thursday evening.

"I'm proud that my office did its job in the PhRMA case. Today's dismissal is a victory for our clients," Laxalt said.

Separately from the lawsuit, the department has decided to delay penalizing any drug manufacturers, sales representatives, pharmacy benefit managers and nonprofit organizations that fail to report information in compliance with the law until January since the regulations were only adopted less than a month ago. The first reports are due to the state on July 1.

In a notice posted to its website earlier this month, the department said that it will not proceed with any enforcement action until Jan. 15 as long as the entities work in good faith to ensure that they are reporting the necessary data — which vary among the four groups — to the state over the next six months. Under the law, any drug company, pharmacy benefit manager or nonprofit organization that fails to report the information required under the law is subject to an up to $5,000 a day penalty, while pharmaceutical reps are subject to an up to $500 a day fine.

The decision to delay enforcement of the penalties also applies to nonprofit organizations involved in the funding of medical research or patient advocacy, which are required to report any donations or anything of value they receive from manufacturers of prescription drugs, certain third parties or pharmacy benefit managers or trade or advocacy groups for such entities. That information is required to be both reported to the state and posted to a publicly available website by Feb. 1.

AMERICAN OVERSIGHT

It also grants pharmaceutical sales reps, who are required to annually report the details of their interactions with doctors, extra leeway. The department has said that about 48 percent of the 2,572 pharmaceutical sales reps in Nevada did not submit reports of their activities to the state for 2017.

Laxalt's school safety report recommends more funding for law enforcement, 'red flag' policies on guns for mentally ill

Jackie Valley and Michelle Rindels

The Nevada Independent

https://thenevadaindependent.com/article/laxalts-school-safety-report-recommends-more-funding-for-law-enforcement-red-flag-policies-on-guns-for-mentally-ill

In an effort to prevent school shootings, Attorney General Adam Laxalt is recommending increased funding for law enforcement to patrol schools, for systems that would electronically transmit criminal records to a background check repository and for capital improvements to schools such as better fencing, bullet-resistant building materials and key card systems.

The 32-page report released by his office Thursday outlines recommendations that fall into several categories — school resource officers, school building design, tactical response to a crisis and threat detection. It's the culmination of a half-day school safety summit he organized in March, which brought together law enforcement officials, teachers, school administrators and security experts to discuss the hot-button issue after a school shooting in Parkland, Florida, left 17 dead and reignited a national debate about school safety and gun control.

"Our schools should be places of teaching and learning, not the site of violent crimes," Laxalt said in a statement. "Just as I have done with Nevada's sexual assault kit backlog, elder abuse crisis and opioid epidemic, I am proud to lead Nevada's effort to bring law enforcement and others together to identify concrete solutions to Nevada's existing public safety problems. I am confident that if Nevada takes these important steps, our schools and children will be safer."

Although Laxalt, the Republican nominee for governor, has recommended numerous changes that would require the Legislature to allocate additional funding, he has also pledged not to raise taxes. His office didn't immediately respond to an inquiry about whether the plans could be pulled off while adhering to a no-new-taxes pledge. Some of the recommendations, however, suggest that local agencies seek federal grants to cover expenses.

What the report doesn't include: any recommendation about arming teachers. The report steered clear of that controversial subject and, in fact, noted that "school staff should not be relied upon to adhere to the active-assailant plan, such as in evacuation, since in most cases they will have been victims themselves, and will be experiencing trauma that potentially makes them unreliable."

AMERICAN OVERSIGHT

Among the recommendations:

Appropriate additional funding, or seek federal funding, to ensure law enforcement can respond quickly to school violence.

Automate criminal record processing to ensure a more complete criminal background check repository, and consider funding a unified electronic records transmission system to keep the database up-to-date.

Strive to create a single point of entry at schools and install multiple security cameras that are accessible to law enforcement.

Develop “new mechanisms” for funding school safety-related capital improvements.

Ensure all law enforcement has copies of floor plans of schools within their jurisdiction.

Pre-designate a single agency as the point of command in the incident of a school shooting, so local police, sheriff’s offices and school police agencies don’t conflict with each other during a crisis.

Make an exemption so that shared active-assailant response plans are confidential and not subject to disclosure through the public records law.

Ensure officers have active assailant training from the FBI. The report notes it will bring the FBI to its next law enforcement summit to provide training.

Establish working relationships between police and school principals, and have law enforcement request school emergency plans.

Fund a statewide system similar to Clark County’s Family Tracs program that would ensure information about a student’s behavioral and disciplinary history follows a student when they move from school to school.

Apply for grants that would increase the ability for law enforcement to assess threats.

Encourage students to download an app called “SafeVoice Nevada,” which debuted last year and allows students to anonymously submit tips to police.

Educate districts so the federal Family Education Rights and Privacy Act (FERPA) is not seen as a barrier to sharing important information about school safety risks.

The Legislature should evaluate whether more mental health-related information, such as medical diagnoses and Legal 2000 records, should be made available to law enforcement in real time.

Counties should look into establishing Mobile Outreach Safety Teams (MOST), which are partnerships between law enforcement and clinicians that assist in de-escalating mental-health crisis situations.

The Legislature should study the effect of “red flag” laws in other states and consider enacting something similar in Nevada. Those laws allow police, family members or prosecutors to petition the courts for a civil order that would temporarily take away a person’s firearms if they’re deemed an immediate threat to themselves or others.

AMERICAN OVERSIGHT

Laxalt held his summit two days after Gov. Brian Sandoval convened school superintendents in Carson City to kick off dialogue about how to bolster student safety. The governor proceeded to issue an executive order creating a School Safety Task Force consisting of 25 members — including two superintendents, principals, teachers, parents, state lawmakers students and a judge, among others — to examine the fears vexing school districts across the nation and offer recommendations for what can be done in Nevada.

The task force will submit an initial report to Sandoval featuring recommendations that could be immediately enacted and then a final report by Nov. 30. Sandoval envisions the task force report as something that could guide lawmakers' policy decisions in the 2019 legislative session, although the recommendations aren't binding and Sandoval will be out of office by then.

Laxalt's report will be submitted to Sandoval's task force and the Legislature.

Amazon launches start-up service to deliver its own packages

Associated Press

https://www.reviewjournal.com/business/amazon-launches-start-up-service-to-deliver-its-own-packages/

SEATTLE — Your Amazon packages, which usually show up in a UPS truck, an unmarked vehicle or in the hands of a mail carrier, may soon be delivered from an Amazon van.

The online retailer, wanting more control over how its packages are delivered, rolled out a program Thursday that lets entrepreneurs around the country launch businesses that deliver Amazon packages. They'll be able to lease blue vans with the Amazon logo stamped on it, buy Amazon uniforms for drivers and get support from Amazon to grow their business. In return, Amazon gets more ways to ship its packages to shoppers without having to rely on UPS, FedEx and other package delivery services.

With these vans on the road, Amazon said more shoppers would be able to track their packages on a map, contact the driver or change where a package is left — all of which it can't do if the package is in the back of UPS or FedEx truck.

Amazon has beefed up its delivery network in other ways: It has a fleet of cargo planes it calls "Prime Air," announced last year that it was building an air cargo hub in Kentucky and pays people as much as $25 an hour to deliver packages with their cars through Amazon Flex.

AMERICAN OVERSIGHT

Recently, the company has come under fire from President Donald Trump who tweeted that Amazon should pay the U.S. Postal Service more for shipping its packages. Dave Clark, Amazon's senior vice president of worldwide operations, said the new program is not a response to the president, but a way to make sure the company can deliver its growing number of orders. "This is really about meeting growth for our future," Clark said.

Through the program, Amazon said it can cost as little as $10,000 for someone to start the delivery business. They don't have to lease the Amazon blue vans, but if they do, those vehicles can only be used to deliver Amazon packages, the company said. The entrepreneur will be responsible for hiring delivery people, and Amazon would be the customer, paying the business to pick up packages from its 75 delivery centers around the country and delivering them to shopper's doorsteps. An Amazon representative declined to give details on how much it will pay for the deliveries.

One man who was part of Amazon's test of the program, told reporters that the number of packages Amazon needs to be delivered keeps his business busy.

"We don't have to go make sales speeches," said Olaoluwa Abimbola, who has hired 40 workers in five months. "There's constant work, every day. All we have to do is show up."

Hi Abigail and all,

Many thanks for your assistance with this. Abigail – would 5:45pm on Friday work for the gift exchange, here at the Embassy? Bec has apportioned some time to do the exchange in the 1st floor conference room. Grateful if you could please confirm that this would work for you.

Thanks again,
Will

Subject: Gift Protocol and Scheduling [SEC=UNCLASSIFIED]

UNCLASSIFIED

Hi All –

On this email I've included the folks I worked with from the respective Governors' offices on gift exchanges. I've also included two NGA representatives in Abigail Hunter and Arianna Cicchinelli, who've helped immensely with coordinating all things Winter Meeting. Finally, I've cc-ed the Embassy's gift officer/liaison Will Read.

Protocol for exchanging gifts is done at a staff level in Australia, so the purpose of this email is to find the best time that Will Read can exchange gifts with Governors' staff. He'll have the PM's gifts for Governors Sandoval, Bullock and Murphy in hand by Thursday afternoon.

AMERICAN OVERSIGHT

We're hoping to have any gift exchanges completed on Friday as the PM is departing Washington directly from the NGA Winter Meeting at the JW Marriott on Saturday. Two options we discussed:

1) Will Read exchanging any gifts with a NGA representative and/or Governors' staff on Friday at the JW Marriott.
2) Will Read exchanging any gifts with a NGA representative and/or Governors' staff on Friday at the Embassy Reception.

Finally, the PM is required to declare gifts from foreign officials with Australian customs. He also must report the "cost in country" (cost with no sales tax) of the gift with Parliament. If your Governor is planning to provide the PM with a gift, please let Will know the cost of the gift, so we can alert the PM's team.

There are several parties involved here, so if we can find a time to do all of the swaps at once that would be preferable.

Please don't hesitate to let Will or myself know if y'all have any questions.

Best -
Alex

Subject: Gift Protocol and Scheduling [SEC=UNCLASSIFIED]

UNCLASSIFIED

Hi All –

On this email I've included the folks I worked with from the respective Governors' offices on gift exchanges. I've also included two NGA representatives in Abigail Hunter and Arianna Cicchinelli, who've helped immensely with coordinating all things Winter Meeting. Finally, I've cc-ed the Embassy's gift officer/liaison Will Read.

Protocol for exchanging gifts is done at a staff level in Australia, so the purpose of this email is to find the best time that Will Read can exchange gifts with Governors' staff. He'll have the PM's gifts for Governors Sandoval, Bullock and Murphy in hand by Thursday afternoon.

We're hoping to have any gift exchanges completed on Friday as the PM is departing Washington directly from the NGA Winter Meeting at the JW Marriott on Saturday. Two options we discussed:

1) Will Read exchanging any gifts with a NGA representative and/or Governors' staff on Friday at the JW Marriott.
2) Will Read exchanging any gifts with a NGA representative and/or Governors' staff on Friday at the Embassy Reception.

Finally, the PM is required to declare gifts from foreign officials with Australian customs. He also must report the "cost in country" (cost with no sales tax) of the gift with Parliament. If your Governor is planning to provide the PM with a gift, please let Will know the cost of the gift, so we can alert the PM's team.

There are several parties involved here, so if we can find a time to do all of the swaps at once that would be preferable.

Please don't hesitate to let Will or myself know if y'all have any questions.

Best -
Alex

GOVERNOR SANDOVAL STATEMENT ON OPPORTUNITY ZONE DESIGNATION

CARSON CITY, NV – Governor Brian Sandoval this afternoon made the following statement after being notified by the U.S. Treasury that Nevada's Opportunity Zone designations have been certified:

"I am incredibly pleased that Nevada's Opportunity Zone designations have been certified by the U.S. Department of the Treasury and the Internal Revenue Service. As I've stated previously, during my Administration we have made significant investments throughout our state, but more work remains to be done. Today's announcement not only encourages private investment in areas of Nevada that are most in need, it will also kick start construction of affordable housing projects – a priority of my Administration – across the state.

"From Southern Nevada to Northern Nevada and areas in between, the certification of Nevada's designated Opportunity Zones will benefit communities big and small. I applaud the Trump Administration and Congress for supporting The Tax Cuts and Jobs Act earlier this year.

"Today's certification is another step in continuing to build the new Nevada and I thank the Governor's Office of Economic Development and my staff for their diligent work on this issue."

# # #

The list of certified Opportunity Zones in Nevada is available here.

BACKGROUND ON OPPORTUNITY ZONES:
The Opportunity Zone program, established in The Tax Cuts and Jobs Act of 2017, is a tax incentive, designed to encourage long-term private investment in low-income communities. The program essentially runs on two tracks – first, Governors in each state nominate opportunity zones, which are low-income community census tracts that could benefit from significant private investment. Second, once the zones are certified by the U.S. Treasury Department, interested private investors must invest in opportunity funds, specialized vehicles that can then be utilized to invest in the certified opportunity zones.

Hi, Neena.

Our COO has requested that our Plant Director, Ben Taecker join us as well tomorrow. We hope this will be okay. I have his Bio below.

Bio
Ben Taecker currently works as the Plant Director for Aqua Metals. He has a Mechanical engineering degree from South Dakota State university and 17 years of experience in manufacturing. After working for a smelter for 6 years, he made the move from South Carolina to Nevada in February of 2017 to be part of Aqua Metals. He is excited about being part of the new processes that Aqua Metals uses to eliminate many of the environmental hazards found at traditional smelters.

Cheers,

Dustin P. Moore

To: 'Patrick Cates'; Ward Patrick
Cc: Jenni Cartwright; Aaron Wike; Ron B. Cothran; DanielMarlow; Julie Kidd
Subject: RE: Marlette/Carson City

Patrick, The draft agreement to Carson has minimum requirements included (although I understand they may need to be modified). The plan for the new agreement was to roll the pumping cost into the overall rate, as opposed to breaking it out as a separate charge. Of course, these terms are subject to further negotiation, depending on Carson's willingness (or not) to act as a partner going forward.

Subject: RE: Marlette/Carson City

I suggest putting some language in the draft agreement. There was language around minimum purchases in the prior agreement. I'm looking at paragraph 6. A. 4. From the agreement executed in 2000.

Also, does anybody know under what authority we charge them pumping costs? I don't see that referenced in this agreement. Maybe I'm missing it.

Subject: RE: Marlette/Carson City
Importance: High

I identified the lack of minimum back in November, and explained that we need Carson (or someone) to buy 396,000 kgal/year and Storey County to buy $75,000 kgal/year. I think Aaron missed our meeting on November 16th. I'd have to check my notes, but I thought SPWD was going to follow up on getting a minimum written into the contract.

Subject: Re: Marlette/Carson City

It appears neither agreement has a minimum.

It's also important to note that we can only change rates on odd number years and we must notify the county in January for a rate change to be effective in July. So we only have a 30 day window to decide if that's a direction we want to take.

Cc: Julie Kidd; Daniel Marlow; Ron B. Cothran
Subject: RE: Marlette/Carson City

Thanks. Hmmmm. Where is the minimum? All I see is 4.5 that talks about a minimum of 500 gpm. I don't know what that means. That's a rate of flow, not how much water we actually sell them? I'm not clear. We need language that clearly articulates a minimum annual purchase.

AMERICAN OVERSIGHT

Ryan: as we discussed a few months ago—Fulcrum is preparing for the ground-breaking event at their facility in TRIC.

In order to best accommodate Governor Sandoval, Fulcrum would like to know if Governor Sandoval has any conflicts on either May 16 or May 17?

If not, we will follow-up with a formal invite, but the object here is to have their Board commit to one of those dates at a meeting on Tuesday and we want to ensure we're working to accommodate Governor Sandoval's schedule as best we possibly can.

The sooner we can get answer back on this—the better. And obviously, please keep this close as we haven't shared this with anyone else at this point.

Best,

****

Subject: RE: Microwave Utilizations
Attachments: Radio Usage Information_.xlsx; Usage for FY19 Funding Shortfall V2.xlsx

Hello everyone,

I have attached the radio usage document that was distributed today for your reference. Please keep in mind that these statistics cover usage data from November 29, 2015 through November 29, 2016. This is also the only comprehensive usage data we have available at this time, and is assumed to be reflective of ongoing radio system activity.

I suggest that non-state users not be included in the calculations in the "Usage for FY 2019 Funding Shortfall document" as their contribution will be in the form of user fees and not an upfront contribution to the project. I have provided an update to this document titled "Usage for FY 2019 Funding Shortfall document V2" with suggested changes shaded blue (Microwave Usage worksheet rows 100-103). This changes the bottom line in the spreadsheet to 74% Highway Fund and 26% Non-Highway Fund and excludes non-state users.

Thanks,

Felicia

Subject: Microwave Utilizations

Good afternoon.

I would like to sincerely thank you all for your time this morning – I thought the meeting was very productive, and we made good progress towards a solution for the Microwave project funding shortfall. Attached is a breakdown of the EITS Microwave System circuit usage for FY18, as well as a quick update on the total funding need.

AMERICAN OVERSIGHT

Updated Unfunded Microwave Project Costs FY19		
Per Powerpoint/meeting 4-19-18 - Aviat	1,882,095	
Per Powerpoint/meeting 4-19-18 - Federal Engineering	9,726	
Delayed Network Monitoring (7/1/18 to 1/1/19)	(118,033)	(ongoing annual Network Monitoring will be $
Network Monitoring Credits (per site adjustments)	(39,002)	
Total Unfunded Project Costs FY19	**$ 1,734,786**	

Please don't hesitate to let me know if you need any further information.

Thanks,

Jenni Cartwright | Administrator | Administrative Services Division
State of Nevada | Department of Administration
209 E. Musser Street, Room 304, Carson City, NV 89701-3716

To: Joel Grace <jgrace@renolandinc.com>
Subject: RE: New Opportunity Zone Tax Program

Hi Joel,

So glad you see the benefit. New information and guidance comes out daily on the Opportunity Zones (OZ). Hopefully I can answer some of your questions. The only direct link / requirement for the state is for the governor to nominate the census tracts to be designated by the Treasury as Opportunity Zones. The governor must send the list by March 21st (sorry a day earlier then 22nd). OR he can submit an extension for an additional 30 days. The governor can only designate 61 zones in the state (25% of the low income tracts). Right now B&I and GOED are working on the list of recommended tracts for nomination. The first thing you can do is reach out to GOED and the city of Reno to request that your zone be on their recommended list.

Next, this is really a private equity investment incentive. So it is not a state or federal program but actually a new capital gains tax deferral/decrease. It creates a new type of investment mechanism which will be "Certified Opportunity Funds" (O funds) that must invest 90% of their fund into Opportunity Zones. The tax incentive is an increase in basis depending how long the investment is held (5 years = 10% increase in basis; 7 years = 15% total increase in basis; over 10 years =no tax on gain of investment over 10 years). It will be up to the private equity funds to be certified treasury and manage the investments so that the investors can receive the tax benefit. It is estimated that 2 plus trillion dollars of unrealized capital gains is sitting in the stock market that could be realized or activated to take advantage of this incentive and create huge investment into opportunity zones. But the guidance from Treasury and IRS is not out regarding how this

AMERICAN OVERSIGHT

will work (yet). It is expected that it will be announced within 6 months because the investment time to take advantage of incentive is a short window (funds need to be invested by end of 2019 to receive maximum benefit).

The state does not have an official program or way to target these funds as of yet (and it may not have as this is a private investment mechanism). So what a business can do is talk to decision makers to try to ensure that the related zones are on the nomination list. Then the next thing is to monitor the progress and when the O Funds begin to form look to see how investment from these funds may continue to develop the area. There is the possibility for partnerships to form an O Fund but as I said there is little to no guidance on how certification of the funds will work. It will take effort of more expertise than mine to sort that part out (accountants and attorneys).

So my comment to you is really a heads up, that there may be potential for significant additional private equity investment in the Park Lane area and surrounding census tracts to change the entire outlook of that area.

I hope I didn't jump the gun by telling you… I just find the investment and efforts you are putting into that area very promising and would like to see it catalyze a whole new outlook for the neighborhood. I will let you know as things develop, but you will likely want to track this information as well and seek potential strategies that will assist opportunity zone investment in your area.

I hope this information is helpful. Best,

Subject: FW: New Opportunity Zone Tax Program

Hi Joel,

There has been a lot of buzz on Opportunity Zones which is a new program added to the recently passed tax bill.

I am sending this email to share information regarding the program. The goal of the Opportunity Zones is to encourage investment in low-income census tracts by decreasing tax on capital gains. Since the program is so new the details have not been fully clarified. Here is just one (of many) links if you are interested in finding out more.
http://eig.org/opportunityzones

In this act the state governor is charged with nominating census tracts to be designated as opportunity zones where these dollars can be invested and receive tax benefit. As the state agency that works with NMTC, B&I is working to assist in defining the list of nominated zones with an eye on low-income tracts that are already attracting investment to further leverage and catalyze progress. Still, we will not make the final decision as to which zones will be nominated and we are only charged with defining eligible zones. In addition, because only 25% of the low-income zones in the state can be nominated, and due to the fact that the governor has a very limited timeframe, the zone nominations are due March 22nd, 2018, time is critical in this process. Time for outreach is limited. Discussion of zone designation should be directed to GOED at this time. Further it should be understood by all interested parties that if the state fails to make nominations then the US Treasury will make the zone designation without our input. In my respectful and unsolicited opinion, although input should be encouraged, understanding of the limitations and cooperation should be the emphasis for all parties in this process so our state is able to nominate the tracts that will maximize the outcomes to low income communities for these investment. Furthermore, it is truly unknown how much investment this program will generate given that the details of how these investments are made and tracked are still unclear (hundreds of people much smarter than me with legal and accounting degrees are working diligently on this clarification).

Finally, “opportunity” seems to be the hot word this year. There are Opportunity Funds, Opportunity Zones, Opportunity Investments, and several many “opportunities” about there. I believe it will take an effort to not get one confused with the other.

It is my hope that this information is helpful to you as a collaborative partner to support economic growth and diversity in Nevada.

Sincerely,

Sent: Thursday, August 02, 2018 9:10 AM
To: Christina Davis <cmdavis@gov.nv.gov>
Subject: NGA Thank You's FOR APPROVAL

CD,

Attached are draft thank you letters for the Governor's approval. The list (included below) includes all presenters and foreign dignitaries who participated in the NGA Summer Meeting.

As you can see, these letters are to be signed by both Governor Sandoval and Bullock. Once the Governor approves, NGA will print them out here and mail to you with pre-metered postage. Are you ok with then sending the entire package on to Montana once he signs?

Also, there are three chair's initiative draft thank yous included. These will ONLY be signed by Governor Sandoval and I will send in a separate package to keep everything clear.

Here are the following thank you notes as requested:

- Liz Schrayer, USGLC
- Mr. Kentaro Sonoura
- Gov. Hirai
- John Krafcik, CEO Waymo (Sandoval only)
- Matt Delaney, CEO Marble (Sandoval only)
- Colin Tooze, Director Uber (Sandoval only)
- Graeme Conway, Macquarie
- Josphat Nanok, Head of Kenyan Governors Association
- Annagret Kramp-Karrenbauer, General Secretary of the CDU

AMERICAN OVERSIGHT

- Govs. Only presenters (Opportunity Zones and SCOTUS)
- Thursday infrastructure roundtable participants
- Former Governors at the transition lunch
- Other international participants

Please let me know if you have any questions. Thanks!

Michael thanks for the introduction!

Hi Elizabeth,

So far our EV charging program is just a plan that NV Energy has submitted. Intervenors in the docket and the Public Utilities Commission will determine what the final program looks like. This should be completed by the end of June with a program start date of mid-September. Does this work with your schedule? I am happy to discuss this further in person or over the phone.

Best regards,

Kelly Webster

Howdy Elizabeth,

I hope all is treating you and the Klein team very well!

By way of virtual introduction I'm copying in Kelly Webster from NV Energy who is a great point-of-contact/resource for the LISEP and EV Charging programs at NV Energy.

I think Summit Club would be an excellent project to integrate these programs. It's the first of so many kinds for the state why not add some more firsts?

Thank you all and let me know if I can help further. Have a wonderful day!

Michael

Hi Michael,

AMERICAN OVERSIGHT

I just wanted to follow up on the call you had with Bob today to see if we could get the information on the NV Energy pilot program for charging stations that you mentioned, as Bob is very excited to learn more about that. If there is some documentation, or a good person to reach out to at NV Energy, it would be fantastic if you could pass that along.

Thank you,

To: Christina Davis
Subject: Re: October 9th Tech Summit
Attachments: Tech Summit_Draft Run of Show.docx; Draft_Panel Run of Show.docx

Christina

Yes, I'm helping with the planning of the tech summit. We had hoped to start at 12pm on Tuesday, October 9th. If the Governor isn't available, until 4pm I will circle back with everyone and discuss adjustments.

I actually have a phone call with Andrew Clinger later today. I've attached our draft outline of the run of show for the summit and a separate draft of a panel discussion that we hope will be part of it.

We hoped to have the Governor do the following at the Tech Summit:

- Open the Summit with remarks and perhaps a sit down discussion with Elon Musk
- Moderate a panel with the CEOs/Senior Executives of Tesla, Blockchains, Switch, Panasonic, Google, Wal-Mart, and possibly Apple
- Make any pronouncements/announcements regarding TRIC or anything else at the end
- Participate in media interviews before or after the event

We're working on soft invitations to the panel members. So far Tesla, Blockchains, and Switch have confirmed. I'll be asking Andrew this afternoon about any other individuals, businesses, or groups the Governor would like to invite.

Please let me know if you have any questions. I'll have more information to get to you later today.

Thanks
Jarad

To: Jarad Van Wagoner <jarad.vanwagoner@rrpartners.com>
Subject: October 9th Tech Summit

Hi Jarad, I heard through the grapevine that you may be assisting in the planning of this "tech summit". If so, can you please provide me whatever you have to this point and keep me in the loop on the Governor's participation as we move forward? Based on a conversation a few weeks ago with Chris (with Tesla) we agreed to a 4:00 p.m. start time and a likely location to be the Gigafactory. The Governor has BOE and Board of Finance that day, so an earlier arrival for him is not possible. That is literally all the information I have at this point so if you have anything further that might be helpful, that would be awesome! Thanks.

Christina Davis
Special Assistant to the Governor
Nevada Governor Brian Sandoval

AMERICAN OVERSIGHT

Tech Summit – Draft Agenda

Date: October 9, 2018
Time: 12:00PM (There may be some activities prior to official start of summit)
Venue: Gigafactory (Lobby or showroom)

- Opening Remarks - Governor Sandoval
  - Welcome
  - Talk about vision for New Nevada, opportunity with TRIC and Tesla and what's happened since.
  - Announce new name for TRIC (pending)
- Governor Sandoval – Elon Musk Q&A
  - Why Tesla chose Nevada
  - Governor's visionary role of Nevada in terms of tech and innovation
  - Announce partnership between Tesla & Blockchains, LLC (pending)
- Local Business Owner Impacted by Tesla
  - Invite one or two local business owners, that were positively impacted by the Tesla Gigafactory, to make brief remarks
- Panel Discussion – (***See separate draft run of show***)
  - Panel discussion by CEO/Executives of
  - Panel Moderated by: Governor Sandoval or Gary Shapiro
  - Panel Topic: Challenges and opportunities shared by companies in TRIC
    - Need to dig into more details
    - Specific questions for each CEO
- Company Presentations and Announcements
  - Other Company Presentations/Announcements
  - Jeff Berns' Presentation/Announcements:
    - Describe project, four tech pillars
    - Announce social contract
- Governor Sandoval Proclamation
  - New Nevada led to Blockchain landing at TRIC and creation of the City
  - Proclamation of new city
  - Sign MOUs
    - What are the details of the MOUs? Who is signing them?
- Press/Media Interaction
  - Is Governor open to one-on-one interview or does he prefer a pool interview?
  - Planning on local news channels and some national print media.
- Networking Reception/Event???
  - Tesla likely will provide tours of the Gigafactory to include a VIP tour
  - May be an option to test drive a Tesla vehicle.

AMERICAN OVERSIGHT

Panel Run of Show
60-75 Minutes Total

Opening/Introductory Remarks – 10 to 20 minutes

- Option 1: Introductory Remarks by Moderator (Governor) – 5-10 minutes
    - Introduce:
        - Participants
        - General topic and format

- Moderator would need scripted, short bio/highlights for each participant

- Option 2: Introductory Remarks by Moderator (Governor) – 15-20 minutes
    - Invite each participant to introduce themselves
        - 2-3 minutes each
    - Introduce general topic and format

Question and Answer – 25 to 35 minutes

- Moderator will ask each participant two or three questions, depending on number of panelists
- Option to allow panel members to ask other panel members one question.

- All questions will need to be vetted/determined with the participants. NO SURPRISE QUESTIONS.

Closing Remarks – 5 to 15 minutes

- Option 1: Moderator makes closing remarks to summarize the discussion.

- Option 2: Moderator offers each participant to make a 90 second closing statement
    - Moderator offers each participant opportunity to make a 90 second closing statement
    - Moderator wraps up panel with summary – 3-5 minutes

Potential Panel Representation

- Tesla
- Blockchain
- Switch
- Wal-Mart
- Panasonic
- Google
- Apple

Potential Discussion/Question Topics

- Government policy impact on innovation. Opportunities and concerns
- Infrastructure opportunities and challenges – public and/or private

AMERICAN OVERSIGHT

- Social impact of innovation – opportunities and challenges
- What is your (Company Name) mission? Why do you do what you do?

Pam and Andrew,

A rep from HUD called and let us know that Secretary Carson will be in Nevada tomorrow and that they are looking for some information on our designated opportunity zones. Specifically, they are trying to find any crossover between the designations and state housing needs.

I reached out to Cory to get a better understanding of the lay of the land and he mentioned that HUD is exploring ways to replace CDBG funds with new OZ designations. I think it's best we figure out how to decline to share as to not give away any talking points.

AMERICAN OVERSIGHT

Second, have attached a copy for Governor Sandoval a letter that has been sent to GOED concerning the process of selecting Opportunity Zone areas. West Wendover would like due consideration of that designation believing that it could definitely help us in attracting business and other investments.

I appreciate if you could pass the letter on to Governor Sandoval.

And yes... Amtrak is still on our dream board. With the loss of Greyhound service recently, we now have no public transportation access to the national transportation system. Solutions are never easy, especially in our case... :)

Hope all is well with you, please make sure to stop in and say hello if you are in the area, would be nice to see you again.

Chris

Date: Thursday, March 15, 2018 at 5:36 PM
To: Opportunity Zone <ZoneO@cdfi.treas.gov>
Subject: RE: Opportunity Zone Nomination Information

This email is a reminder that your State has until 11:59 p.m., March 21, 2018, to submit either a nomination of eligible census tracts for designation as Opportunity Zones, or to request a one-time, 30-day extension (to April 20, 2018). Per statute, failure to submit timely nominations results in loss of the ability to designate any Opportunity Zones.

For States planning to submit a nomination on March 21, 2018, requesting an extension does not limit the ability to submit the nomination on or prior to that date, but may give the State additional flexibility in the event of any last minute changes or technical difficulties

If you believe your State already has submitted its nomination or an extension request and that you are receiving this reminder in error, please let me know. Thank you, and please also do not hesitate to reach out to me with any questions.

AMERICAN OVERSIGHT

From: Opportunity Zone
Sent: Monday, March 05, 2018 2:13 PM
Subject: Opportunity Zone Nomination Information

Attached is a letter informing your governor or chief executive officer as to how they can nominate eligible census tracts for designation as Opportunity Zones. Titles II and V of the concurrent resolution on the budget for fiscal year 2018, signed into law on December 22, 2017, added Subchapter Z—Opportunity Zones to the Internal Revenue Code and provides certain tax benefits for private investment in distressed areas. The authority to implement these sections of the new tax law has been delegated to the Internal Revenue Service (IRS). The Community Development Financial Institutions Fund (CDFI Fund) is supporting the IRS with the Opportunity Zone nomination and designation process.

In order for investors to take advantage of the tax benefits, the law requires governors or chief executive officers of States and possessions to nominate census tracts in their jurisdictions as Opportunity Zones.

To assist in the nomination process, the CDFI Fund has developed a Nomination Tool, which can be used to identify and select eligible census tracts to nominate for designation as Opportunity Zones. The Nomination Tool as well as Nomination Instructions on completing and submitting a nomination, can be found at https://www.cdfifund.gov/Pages/ozonestateresource.aspx.

Subject: Opportunity Zones - Churchill County

Hello Christina,

A few months ago I read an article about a provision tucked into the new Tax Bill to help communities struggling with economic development. The article said that Governors of each state were being asked to designate "Opportunity Zones" from a pool of low-income, high-poverty census tracts for nomination. One of our Commissioners inquired this morning and asked if I could reach out to the Governor's Office to see if Nevada is participating; if "Opportunity Zones" have already been designated, and who the appropriate contacts are. Any help you are able to provide to point me in the right direction would be much appreciated.

Thank you,

Good afternoon Chip,

GOED has launched the Opportunity Zone web page inviting public input regarding the proposed nomination of census tracts. I thought you and your associates would be interested in providing official feedback.

Mike, I didn't get your email below. CJ, thanks for the forward. That said, a couple updates.

- The policy map with the overlays of all the qualifying tracks along with which tracks have been submitted for potential designation by the municipalities and other interested parties should be up by Monday/Tuesday. This will allows for a couple weeks of direct public review and comment. I will make sure everyone has the link once its completed.

- Derek has reached out to the Nevada State director for Indian affairs (I'm sure I messed up that position title) however as of yesterday had not received any response.

- Andrew has forwarded any direct requests that went to the Governor's office directly and we have included those in the lists.

- The confidential inquiry is updated and its potential identified.

- We have also reached out to all the municipalities and have a call with the City of Las Vegas shortly. They have all submitted their desired tracks.

Since there are a low volume of direct inquiries I think directing them to the website for comment will likely be the best path outside of just forwarding via email in the interim.

Best regards,

Paul Anderson

Good morning Paul,

Please let me know if you would like B & I to weigh in on Mike's question. I believe it is best answered by GOED. I heard from Bob this morning the map will be up by the end of the week. This is great news.

Best,
CJ

Subject: Opportunity Zones

Attached please find a letter of request from the Nevada Department of Health and Human Services that Northern Nevada Adult Mental Health Services campus be considered for inclusion in an Opportunity Zone.

I believe that GOED and B&I are working on the process to determine what areas the Governor will designate as OZs, and this is supposed to be done by April 20th.

I have now heard from a few entities that want to advocate for specific OZs:

...Pyramid Lake Indian Tribe

...City of Henderson

...City of North Las Vegas

...Confidential inquiry (Paul is aware) to have the area near the Las Vegas Convention Center included

...DHHS/NNAMHS campus

AMERICAN OVERSIGHT

I just keep referring inquiries to you (Andrew/Paul/CJ). It doesn't feel to me like there is a process in place for entities to provide input or requests to be included. But, maybe I just do not know what efforts are being made to get input.

What is the process? Do we just keep forwarding an connecting people?

Hey Guys –

The Summit is moving along nicely, BUT .. we have to change the date again.

The new date is **MARCH 19 -20.**

The educational portion will still be the 19th and the tours will be the 20th.

Please let me know ASAP if you know of any conflicts with that date and other events going on in Northern Nevada.

I AM FINALIZING THIS BY THE END OF THE DAY TODAY!

Thank you!!

Kaya

Hi Guys - Here is an update on the summit.

We have engaged Karen with Red Carpet to help plan this. We are getting a contract today from the Row and Randi is still going to get us a quote from GSR because she knows someone over there.

Can you all meet in person this week to work on this?

Thursday at 3pm? If that doesn't work give me some times that will.

Thanks!

AMERICAN OVERSIGHT

Good morning! The Row staff has sent over some preliminary numbers for the event, which I think are conducive to a good response for the event- a $50 room rate at both the Eldorado and Silver Legacy, for a single king room, plus the resort fee of $25 and a city fee of $3 for a total of $78 + tax per night. I blocked a total of 250 rooms for 2/25 and 2/26 and 50 rooms for 2/27. Double queen rooms would be subject to an additional $10 fee.

Food and beverage minimums would apply, or a venue room fee for the catering space. Once we begin to finalize the arrangements, that information can be decided upon. General session at the Reno Ballroom and the cocktail reception at the Eldorado Ballroom on the evening of 2/26- guests would then be on their own for dinner that night, unless you would like that to be a catered event as well.

They'll be sending over a contract today- I'll send that over to you when I get it.

Let me know if you have any questions about the planning agreement, if at all possible, I'd like to get that finalized today or tomorrow if you would like to move forward with our services.

Warmly,

Karen Nichols

Subject: Re: O-Zone / TRIC

Late yesterday, Sen Heller spoke to the Treasury Secretary about this. While the secretary couldn't guarantee an outcome, he was sensitive to our concerns and said the governor should nominate the parcel.

Also, the Heller office is working with Sen Scott's office (author of the Ozone provision) on a legislative fix since Treasury is not following congressional intent. So that means, if the Governor nominates it and Treasury fails to certify it, we might get a second bite at the apple later.

I'm working with Heller staff to brainstorm ideas of what that legislation might look like but it'll certainly state explicitly that the most recent data can/should be used when identifying eligible parcels.

That's the latest for now. Any comments or questions are welcome.

Dan,

Lance asked me to pass on to you the following information about pending additional projects in the vicinity of the Lyon County/Storey County line along the USA Parkway Tech Corridor:

1. Indications in the publicly available info are that Google will be breaking ground this year on their 1200 acre site (the actual type of facility is still highly confidential, but needless to say it will be Tech related).
2. TRI still owns a very nice 100 ac site along USA Parkway just South of Chips's property - this 100 ac site is also slated for Tech land use.
3. You're already aware of Jeff and David's plans for Blockchains, and Chip's plan for Reno Land's sites.
3. And further North, adjacent to Comstock Meadows, both Switch and Tesla are anticipated to continue their build out programs on a consistent basis over the near term.

Thanks.

Kris

Just a quick update from my end. It seems that the Community Development Financial Institutions Fund is saying that only LIC tracts can be nominated using 12-16 data, even though there is nowhere in statute or in guidance that says it must be this way. I'm working closely with Joe Boddicker from Sen. Heller's office (and he's working closely with Sen. Scott's office, who authored the OZones provision) to get to the bottom of this. I spoke with Joe earlier today and he's now elevated this issue to the assistant secretary level so as soon as he gets back to me with more information, I'll keep you all posted.

In the meantime, let's still prepare to send our letter to the Governor by tomorrow. Do we have any additional information on potential investment at TRI and/or projects that can be undertaken if we are granted the OZ designation?

Hi Chip,

I've been communicating with Jeff Merkowitz and he has said the same thing to me re: 11-15 ACS data versus 12-16 ACS data for contiguous tracts. I've asked him to provide me documentation that directs him to only accept the 11-15 ACS data for contiguous tracts but I haven't gotten a response yet. I've also been in constant contact with Sen. Heller's tax counsel about this issue and he's been reaching out to Treasury. I'll share whatever information I get from him as soon as I get it.

Please let me know if you have any questions,

dan

All --- See the below message that just came in and attachment. The below just came in but the attachments have been sent in the past. I wanted to make sure Dan Mauer has everything I have. Available off and on all day to discuss and answer questions. I will have Joel Grace from my office take the point on putting economics or whatever together on our site for your report.

Review the below and attached and let's discuss.

Chip,

I just confirmed with Cory that the State does not currently see a pathway for the TRIC census tract to be nominated, due to the recent CDFI Fund position does not remove the CDFI Fund prohibition to use of the 2012-2016 ACS census data to designate the TRIC census track as a non-LIC contiguous option.

Most likely the best, and maybe the only path forward is for someone above the Jeff Merkowitz, Senior Advisor, CDFI to review the attached white paper and overrule the current 2011-2015 ACS census data **only** opinion.

If you want to discuss this further, please contact me at your convenience.

AMERICAN OVERSIGHT

Also, the Heller office is working with Sen Scott's office (author of the Ozone provision) on a legislative fix since Treasury is not following congressional intent. So that means, if the Governor nominates it and Treasury fails to certify it, we might get a second bite at the apple later.

I'm working with Heller staff to brainstorm ideas of what that legislation might look like but it'll certainly state explicitly that the most recent data can/should be used when identifying eligible parcels.

That's the latest for now. Any comments or questions are welcome.

The industrial park that plays host to Tesla, Google and Switch in the Reno area is almost sold out as a blockchain software company is finalizing plans to buy more than half of its land.

Blockchains LLC, is purchasing 64,000 acres at the Tahoe-Reno Industrial Center, with the deal expected to fully close by the first week of February, said Lance Gilman, principal and director of the industrial park.

AMERICAN OVERSIGHT

The company specializes in financial services, security, software and apps using blockchain technology — a secure digital ledger or record that is typically associated with cryptocurrencies such as Bitcoin. Blockchains LLC specifically deals with the Ethereum blockchain, which anchors the second-biggest cryptocurrency in the world. The Ethereum cryptocurrency is only trumped by Bitcoin in terms of market cap.

Ethereum's blockchain technology also has a more flexible design than Bitcoin's and can be used to create smart contracts that are not limited to virtual currency. Governments in Brazil and Ukraine, for example, are looking into using the technology to create more secure electoral records and platforms.

MORE IN BUSINESS:Apple CEO Tim Cook makes surprise visit to Reno<http://www.rgj.com/story/money/business/2018/01/17/apple-ceo-tim-cook-makes-surprise-visit-reno-facility-groundbreaking/1040598001/>

Blockchains will use 150 of the acres it purchased at the industrial center to build a campus park that will house the company's headquarters, Gilman said. What the company will do with the rest of the land remains to be seen.

"I believe they're going to showcase to the world everything that the blockchain technology is capable of," Gilman said. "Now will they do all the work themselves or work with other developers to house other users? Only time will tell."

The deal leaves only 250 acres of the 104,000-acre industrial park unsold, Gilman said. It also makes Blockchains the biggest developer and landowner at Tahoe-Reno Industrial Center. Tesla remains the biggest user with more than 3,000 acres, Gilman added. Developers typically buy land and build it to suit others while users buy a large block of land to build out their own facilities.

Gilman says the industrial park is in talks with interested parties for the remaining 250 acres and expects it to be sold within the year. Even if all the land is sold out, Gilman and the rest of the Tahoe-Reno Industrial brain trust will still be involved with the park for several years through development and infrastructure projects.

Gilman's group first purchased the land located in Storey County east of Reno-Sparks in 1998, The industrial park then opened for business in 2000, weathering the impact of the 9/11 terrorist attacks as well as the Great Recession.

Since then, Tahoe-Reno Industrial Center saw the arrival of big-name technology companies in the park. Tesla, which arrived in 2014, continues to construct the largest building in the world with the Gigafactory<http://www.rgj.com/story/news/2014/09/13/art-tesla-deal-nv-won-gigafactory/15593371/>. Switch just built the largest data center building in the world<http://www.rgj.com/story/money/business/2017/02/15/switch-largest-data-center-building-world-opens-near-reno/97925188/> at the park and will have what's expected to be the world's largest data center campus<http://www.rgj.com/story/money/reno-rebirth/2015/09/22/switch-supernap-reno-largest-data-center-in-world/72595628/> as well once the whole project is built out. Silicon Valley heavyweight Google also bought land at the park last year<http://www.rgj.com/story/money/business/2017/04/17/google-buys-land-near-tesla-gigafactory-east-reno-data-center-technobubble/100566250/>, which likely will be used to house a data center.

The last year has been good for Reno's two major industrial parks. Reno Technology Park, which is located across the freeway from Tahoe-Reno Industrial Center saw its remaining land purchased by Apple last year, which the company is using as part of a $1 billion expansion of its existing data center<http://www.rgj.com/story/money/business/2018/01/17/sneak-peek-rare-look-inside-apple-reno-data-center/1038984001/> on the property.

The growth that has been driven by the incoming companies, combined with near-zero construction during the recession, is fueling a housing crunch<http://www.rgj.com/story/money/business/2017/05/15/reno-housing-crunch-affordability-low-supply-real-estate/101493422/> in the region marked by skyrocketing house prices<http://www.rgj.com/story/money/business/2018/01/15/going-going-reno-sparks-housing-inventory-hits-record-low/1030660001/> in the last couple of years as well as one of the biggest surge in rents in the

AMERICAN OVERSIGHT

nation<http://www.rgj.com/story/money/business/2018/01/17/reno-renters-give-city-f-grade-apartment-list-survey/1036786001/>.

Gilman expects that it will take several years for the balance between wages and housing affordability to normalize, given current conditions.

“The folks who are willing to build housing, infrastructure and roadways are here now and they just need a reasonable amount of time and a faster permitting process to get the work done,” Gilman said. “I expect it to take a minimum of five years, perhaps even 10 years.”

Hi Chip,

Thank you for your note. I am pleased to hear DB agreed to the draw down. Your comments about Bob are on target, sometimes he is too smart for his own good. We need to get 'er done!

I am so glad you are on the Summit Club team. Have a great weekend!

Best,
CJ

Good afternoon,

AMERICAN OVERSIGHT

The purpose of this e-mail is to officially extend the deadline for the use of private activity bond volume cap for the Summit Club project to February 21, 2018. Additionally, please find attached inducement letter extension.

We look forward to celebrating the closing and the commencement of construction. Everyone has worked really hard on this development and the Summit Club will expand housing choices to the Truckee Meadows community.

Subject: Tech Summit - Updated Documents

Andrew and Christina

I've attached updated documents for the Governor to review, change, and/or approve. It includes the following documents:

1. Tech Summit Draft Itinerary
2. Draft of Governor's Opening Remarks
3. Draft Script for Master of Ceremonies – Paul Anderson
4. Draft Script for Panel Discussion
    a. This likely will continue to change as the panelists revise and finalize their questions.
    b. ***Please let me know if the Governor would like to change anything.***
5. Draft Proclamation Renaming TRIC to Innovation Park
    a. ***Will you please let me know as soon as you are able if the Governor approves the proclamation?***

I'm still waiting on the dialogue from Tesla for the conversation between the Governor and Elon. Also, I've asked for bios for each of the panelists to send to the Governor.

One more question from Tesla:

- ***EDAWN would like to present Elon Musk with a special coin at the end of his discussion with the Governor. Is the Governor okay with the presentation being made while is on the stage? It should only take 1 to 2 minutes.***

Please let me know if there are any questions.

Thank you for all of your help!

AMERICAN OVERSIGHT

OZ was a program created by tax reform to allow govs to designate census tracts in their states for private investment in affordable housing and other similar projects. I know CJ has been working on it - copying Tyler who has been talking with her about it.

WH knows it's short notice and he'd need to be on a plane tomorrow eve at the latest to make it work. LMK.

Subject: 12.3 - Conference Call TODAY on Reforming America's Healthcare System through Choice and Competition
Importance: High

Good morning,

The Administration is pleased to announce the release of our **Report on Reforming America's Healthcare System through Choice and Competition**. This report, prepared by HHS in collaboration with the Departments of Treasury, Labor, the FTC, and the White House, describes the extent to which State and Federal laws, regulations, guidance, and polices discourage choice and competition in health care markets, and identifies actions that States or the Federal Government could take to develop a better functioning health care market.

To learn more about the report, please find further information below:

Conference Call Today
Please join us for a conference call with Senior White House Officials on the details of the report **today**, Monday, December 3 at 2:00 pm. To receive the call-in details, please register using this RSVP link.

Full Report
The full text of the report will be released this afternoon on the HHS website. A link to the full report will be circulated in advance of the Conference Call.

HHS Secretary Azar Speech (Tuesday)
On Tuesday, December 4, White House Surrogates will be offering remarks at AEI on the Choice and Competition Report.

- 9:10 am Brian Blase, Special Assistant to the President, NEC
- 12:25 pm HHS Secretary Alex Azar keynote address

Reforming America's Healthcare System Through Choice and Competition

AMERICAN OVERSIGHT

NV-DA-20-0615-A-005934

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES
U.S. DEPARTMENT OF THE TREASURY
U.S. DEPARTMENT OF LABOR

The President
The White House
Washington, DC 20500

Dear Mr. President:

On October 12, 2017, through Executive Order 13813, you directed the Administration, to the extent consistent with the law, to facilitate the development and operation of a health care system that provides high-quality care at affordable prices for the American people by promoting choice and competition. We are pleased to provide you with this report, prepared by the Department of Health and Human Services (HHS) in collaboration with the Departments of the Treasury and Labor, the Federal Trade Commission, and several offices within the White House. This report describes the influence of state and federal laws, regulations, guidance, and polices on choice and competition in health care markets and identifies actions that states or the Federal Government could take to develop a better functioning health care market.

As health care spending continues to rise, Americans are not receiving the commensurate benefit of living longer, healthier lives. Health care bills are too complex, choices are too restrained, and insurance premiums and out-of-pocket costs are climbing faster than wages and tax revenue. Health care markets could work more efficiently and Americans could receive more effective, high-value care if we remove and revise certain federal and state regulations and policies that inhibit choice and competition.

The Administration has already taken significant steps to improve health care markets by addressing government rules and programs that limit choice and competition and produce higher prices for the American people. Among the most significant actions:

- In October 2018, the Departments of HHS, the Treasury, and Labor proposed a rule that would provide employers with significant new flexibility in how they fund health coverage through Health Reimbursement Arrangements (HRAs). If finalized, this flexibility would empower individuals to take greater control over what health insurance benefits they receive. The Treasury estimates that more than 10 million employees would benefit from this change within the next decade.

AMERICAN OVERSIGHT

- In August 2018, the Departments of HHS, the Treasury, and Labor finalized a rule to expand Americans' ability to purchase short-term, limited-duration insurance—coverage for which premiums are generally much more affordable than Affordable Care Act (ACA) plans. Millions of Americans, including middle-class families who cannot afford ACA plans, will benefit from the additional choice and competition resulting from this reform.
- In June 2018, the Labor Department finalized a rule to expand the ability of employers, including sole proprietors without common law employees, to join together and offer health coverage through Association Health Plans. For many employers, employees, and their families, these employee benefit plans will offer greater flexibility and more affordable benefits.
- In May 2018, HHS released "American Patients First," a historic blueprint for actions to bring down the high price of drugs and reduce out-of-pocket costs. HHS has taken a number of actions that were laid out in the blueprint to empower consumers and promote competition, building on accomplishments such as the Food and Drug Administration's record pace of generic drug approvals.
- In December 2017, you signed the Tax Cuts and Jobs Act, which eliminated the onerous and regressive individual mandate tax penalty. This freed Americans to finance their health care needs in the way that works best for them.
- The Administration has enacted reforms to deliver better value through choice and competition in the Medicare program, including payment changes that establish site-neutral payment policies for a number of Medicare services, a simplification of how physicians are paid for evaluation and management visits, new consumer-transparency measures, and flexibility for insurers to offer more options and benefits in Medicare Advantage.
- HHS and the Treasury have issued revised guidance under section 1332 of the ACA that significantly expands the ability of states to reform their individual insurance markets while ensuring that people with pre-existing conditions are protected.

While the Administration has made much progress in reforming the American health care system significant obstacles remain. This report identifies four areas where federal and state rules inhibit adequate choice and competition and offers recommendations for improving public policy in each of these four areas.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-005936

Health Care Workforce and Labor Markets: Reduced competition among clinicians leads to higher prices for health care services, reduces choice, and negatively impacts overall health care quality and the efficient allocation of resources. Government policies have suppressed competition by reducing the available supply of providers and restricting the range of services that they can offer. This report recommends policies that will broaden providers' scope of practice while improving workforce mobility, including telehealth, to encourage innovation and to allow providers more easily to meet patients' needs. The report also recommends that the Federal Government streamline funding for graduate medical education to allocate taxpayer dollars efficiently and to address physician supply shortages.

Health Care Provider Markets: State policies that restrict entry into provider markets can stifle innovative and more cost-effective ways to provide care while limiting choice and competition. These policies have resulted in higher health care prices and fewer incentives for providers to improve quality. This report makes several recommendations to promote choice and competition in provider markets, including state action to repeal or scale back Certificate of Need laws and encourage the development of value-based payment models that offer flexibility and risk-based incentives for providers, especially without unduly burdening small or rural practices.

Health Care Insurance Markets: Government mandates often reduce choice and competition in insurance markets and increase overall premiums. In the individual and small group markets, many consumers face limited coverage options that cover services they do not want or need and that drive up premiums, while others have been completely priced out of the market. Regulations that limit coverage choices should be changed so that states have more flexibility to develop policies that account for diverse consumer preferences. This report recommends scaling back government mandates, eliminating barriers to competition, and allowing consumers maximum opportunity to purchase health insurance that meets their needs.

Consumer-Driven Health Care: Our health care system's excessive reliance on third-party payment insulates consumers from the true price of health care and offers them little incentive to search for low-cost, high-quality care. When federal and state health policies give consumers more control over their health care dollars, they can use that power to demand greater value. For example, promoting and expanding Health Saving Accounts (HSAs) and HRAs would expand personal control and introduce more consumer power into the health care market. The report recommends expanding access to HSAs, implementing reference pricing where appropriate, and developing price and quality transparency initiatives to ensure that newly empowered health care consumers can make well-informed decisions about their care.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-005937

We know the United States health care system too often fails to deliver the value it should. This report identifies barriers on the federal and state levels to market competition that stifle innovation, lead to higher prices, and do not incentivize improvements in quality. It recommends policies that will foster a health care system that delivers high-quality care at affordable prices through greater choice, competition, and consumer-directed health care spending. While American consumers and many providers would significantly benefit from the reforms laid out in this report, there are entrenched and powerful special interest groups that reap large profits from the status quo. It will take bold leadership to confront these incumbents and implement reforms, but under your direction, we are convinced we can significantly improve the American health care system.

We look forward to working with you as we create a more effective and efficient health care market that provides information for consumers as they make health care decisions for their families, rewards quality, encourages innovation, and delivers care at prices the American people can afford.

Sincerely,

/Alex M. Azar II/	/Steven T. Mnuchin/	/Alexander Acosta/
Alex M. Azar II Secretary U.S. Department of Health and Human Services	Steven T. Mnuchin Secretary U.S. Department of the Treasury	Alexander Acosta Secretary U.S. Department of Labor

AMERICAN OVERSIGHT

NV-DA-20-0615-A-005940

Background

Executive Order 13813, "Promoting Healthcare Choice and Competition Across the United States," directs the administration, to the extent consistent with law, to facilitate "the development and operation of a healthcare system that provides high-quality care at affordable prices for the American people" by increasing consumer choice and promoting competition in healthcare markets and by removing and revising government regulation. Section 6 of the executive order requires the Secretary of Health and Human Services (HHS), in consultation with the secretaries of the Treasury and Labor and the Federal Trade Commission, to provide a report to the President. The purpose of the report is to review existing state and federal laws, regulations, guidance, requirements and policies that limit competition and choice and to identify actions that states or the federal government could take to further these goals. It also includes input contained in 262 comments received in response to a request for information (RFI) publicly released on December 26, 2017.[1]

This report was the result of a working group created to research key issues related to healthcare choice and competition and draft the report. The working group consisted of staff within the departments of Health and Human Services, Treasury and Labor, as well as staff with the Federal Trade Commission, the Office of Management and Budget, the Council of Economic Advisers, the National Economic Council, the Domestic Policy Council, the White House Counsel's Office, and the Office of Information and Regulatory Affairs. The drafting was generally divided so that the department or component with lead jurisdiction and most expertise was the primary section author.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-005941

Introduction

The United States healthcare system increasingly imposes a bewildering array of complexity and inefficiency on consumers, employers, workers and taxpayers while powerful institutions that benefit from the status quo resist efforts at reform. Moreover, our nation's healthcare system is encumbered with mandates and regulations that raise costs, decrease competition, and sometimes do little on net to improve the nation's health. These inefficiencies, mandates and regulations contribute to higher costs and higher health insurance premiums. Health insurance premiums, particularly for individual coverage (the markets most affected by the Affordable Care Act, or ACA) have soared—more than doubling in the individual market between 2013 and 2017[2]— while out-of-pocket spending has also skyrocketed.[3] Even though the ACA was supposed to hold down healthcare costs, premiums in the individual market rose after 2013 when the ACA's insurance rules took effect. The average monthly premiums for all plans rose: For the benchmark plan—the second-lowest cost silver plan—premiums increased by 88 percent between 2014 and 2018 in states with the federally run healthcare exchange (Healthcare.gov).[4] Spending by employers for employer-sponsored health benefits is also rising. The average premium for family coverage has increased 20 percent since 2013 and 55 percent since 2008.[5] While private spending is increasing, so, too, is government spending. Spending on government health programs now accounts for nearly half of all U.S. healthcare expenditures, increasing the burden on taxpayers.[6] Part of this increase in government spending is driven by an aging population, as the baby boomer generation shifts from private coverage to Medicare. Given the magnitude of this spending, it should not be surprising that there are growing concerns about whether the spending is producing benefits that justify the cost.

In addition to increased spending, the federal regulation of healthcare has risen sharply. Unfortunately, government bureaucracies are often slow to change and adapt to health-care innovations and new payment models. Given government's large role in the healthcare sector, this likely contributes to lower productivity in the sector. For example, the Office of the Actuary at the Centers for Medicare and Medicaid Services (CMS) found that

AMERICAN OVERSIGHT

multifactor productivity—the output from joined units of capital and labor—in hospitals had a 0.1 to 0.6 percent 10-year moving average productivity growth rate from 1990 to 2013, compared to 1 percent in private nonfarm businesses.[7] Slower-than-average productivity growth suggests that there is a misallocation of resources and widespread inefficiency in the healthcare system, particularly in public programs.[8] Since the government share of healthcare spending is so large, government rules impose inefficiencies on private firms dependent on public funding, even if they also serve privately funded patients. Simply put, government has played a large role in limiting the value Americans obtain for their healthcare spending. The United States is spending a large and increasing share of its national income on healthcare, and much of this spending does not lead to citizens living longer, healthier lives.

One of the most important mechanisms available to enhance the value Americans receive for their healthcare spending is increased competition. Market competition should encourage healthcare providers to charge lower prices and provide higher-quality services. Although the traditional view among economists is that government should step in to correct so-called market failures, this report finds many cases where government regulation and rules prevent healthcare markets from working efficiently. This report examines many sectors of the U.S. healthcare market to assess the degree to which competition for healthcare services exists and the role government regulation plays in affecting competition for healthcare services. In doing so, the report identifies numerous government policies that inhibit choice and competition in healthcare markets, dampen productivity gains among providers, lead to increased consolidation and market concentration, and prevent the introduction of more efficient or innovative ways of delivering and paying for care.

A highly-effective and well-functioning healthcare market is important for two reasons. First, the state of health and well-being Americans enjoy contributes in economic and non-economic ways to the quality of American life. Second, the significant resources Americans spend on healthcare crowd out resources that would otherwise be available for other individual and national priorities. The United States spends nearly one-fifth of its national income on healthcare,[9] and much of this spending provides little, if any, positive value. For example, the 2018 Economic Report to the President, prepared by the Council of Economic Advisers, reviewed several studies that showed a poor relationship between government coverage expansions and health improvements.

AMERICAN OVERSIGHT

When it comes to healthcare, Americans should expect more value for the dollars they spend. This report details many opportunities to increase the value provided throughout our healthcare system through the actions that create greater choice and competition.

AMERICAN OVERSIGHT

Section 1:
The Importance of Choice and Competition in Healthcare Markets

Economists generally accept that free-market competition produces the most efficient production and distribution of goods and services. When consumers have choices, the incentives and information needed to optimize value, firms have the incentive to improve quality and lower costs through innovation. Competitive market forces and the incentive to innovate typically raise quality and drive down prices, including quality-adjusted prices, for goods and services over time (features observed in many well-functioning sectors of the economy but which are generally absent in the highly regulated healthcare market).[10] However, when government policies and regulations suppress competition, producers may use their market power to raise prices, produce lower-quality goods and services, or become complacent in innovating. In other words, without competitive pressure, the incentive to lower prices, improve quality, and innovate diminishes. As the government share of healthcare spending has increased over time, the healthcare market has become increasingly vulnerable to rules and regulations that impede market forces.

The importance of market competition is apparent in the relevant data. Hospitals without local competitors typically charge higher prices, which could add thousands of dollars to a hospital bill.[11] Since healthcare expenses largely drive insurance premiums, these costs are mostly passed on to consumers or taxpayers. The lack of insurer competition also leads to higher prices: Researchers have estimated that adding a single insurer offering to health exchange plans in 2014 reduced premiums by 4.5 percent on average.[12] A recent paper in Health Affairs estimated that exchange plan premiums were 50 percent higher, on average, in rating areas with only one insurer compared to those with more than two insurers.[13] The lack of competition produces similar affects within the employer market for health insurance. A paper in the American Economic Review estimated that premiums in average markets were approximately 7 percentage points higher by 2007 due to increases in local

concentration of health insurers from 1998 through 2006.[14] One example is that, according to one study, the merger between Aetna and Prudential in 1999 led to a 7 percent increase in premiums for large employers.[15] Similarly, according to another study, the merger of Sierra and United Health in 2008 led to an almost 14 percent increase in small group premiums.[16]

Perhaps more importantly, there is evidence that the lack of competition in provider markets leads to reduced quality of care.[17] For example, a 2000 study of more than 500,000 Medicare beneficiaries found that those who experienced a heart attack had a statistically significant (1.5 percentage point) higher chance of dying within one year of treatment if they received care in a hospital with fewer potential competitors.[18] To drive that point home, Americans have 790,000 heart attacks each year.[19] Assuming that half the country lives in relatively noncompetitive hospital markets, we would expect from these findings that 5,925 premature deaths to be associated with a lack of competition. Of course, this calculation is just for heart attacks, just one of numerous diseases or conditions that kill Americans prematurely each year.

Other findings demonstrate the relationship between competitive healthcare markets and improved outcomes, increased quality, and lower prices. For example, the inflation-adjusted price of LASIK eye surgery declined by 25 percent between 1999 and 2011, even as quality markedly improved.[20] Notably, third-party payers (including the government) generally do not cover the procedure and so ophthalmologists have had to compete directly for consumer dollars.[21] Similarly, though the price of healthcare grew at double the rate of inflation between 1992 and 2012, the price of cosmetic surgery—for which consumers pay

AMERICAN OVERSIGHT

almost exclusively out of pocket—grew at less than half the rate of inflation.[22] These examples also highlight that when consumers are spending their own dollars and shopping accordingly, providers have greater incentives to improve quality and cut costs.

Unfortunately, a lack of consumer choice permeates most health insurance markets as well. Most Americans receive insurance selected by their employer or receive coverage through government programs, characterized by exceptionally heavy regulation and bureaucratic controls. Because of the ACA, insurance companies were not allowed to offer certain low-cost plans and withdrew from some markets. Although some people who were previously uninsured are covered, many with subsidies, Americans without employer or publicly-supported coverage often face limited choices in the individual market.[23] Starting in 2014, new individual market plans had to satisfy ACA requirements. In 2017, people in one-third of U.S. counties could purchase health insurance only through the ACA exchanges from a single insurer.[24] As additional insurers have withdrawn from government-designed and regulated markets, people in more than half of U. S. counties (representing 29 percent of exchange enrollees) have options from only a single insurer in 2018.[25]

Governments and Market Failure in Healthcare

It is a common refrain that healthcare is "unique," and in some ways, it is. But "unique" is frequently used to imply that free-market principles that govern other major sectors of the economy cannot be applied to healthcare. The reasons given for the uniqueness of healthcare vary, but some of the most common are: the difficulties involved in shopping for services, the expertise gap between patients and healthcare professionals (asymmetric information), economies of scale intrinsic to the sector, and the predominant reliance on third-party payers. The merit of these commonly cited reasons for why healthcare is unique is considered below.

Notably, government policies promote some of these features, particularly third-party payment. While some of these features do limit the application of free-market principles, the common claim that the healthcare sector as a whole cannot function under free-market

AMERICAN OVERSIGHT

principles is not true. Notably, government policies promote many factors that prevent the free-market from operating. Specifically, government has encouraged excessive third-party payment, created counterproductive barriers to entry, incentivized opaque pricing practices, skewed innovation activity, and placed restrictions on the reimbursement policies of government programs. Overall, these practices have resulted in less choice, less competition, and sub-optimally functioning markets that deliver higher prices and lower quality.

Healthcare Emergencies

Some healthcare expenditures are for emergency services that are not conducive to consumer shopping. That said, the common claim that the healthcare sector as a whole cannot function under free-market principles is untrue. The vast majority of healthcare services are routine or elective services that can be organized by markets to enhance patient welfare. One study found that emergency department spending is roughly six percent of total United States health spending.[26] Another study classified 43 percent of healthcare spending as "shoppable," with another 11 percent of spending on prescription drugs, an item that is generally shoppable.[27] Distinguishing between shoppable and non-shoppable healthcare services is important, and encouraging normal market economic forces to govern the shoppable transactions constituting the majority of the sector is prudent. As this report explains, government policy and regulation often does precisely the opposite, actively discouraging the application of normal market forces to the shoppable category of healthcare services, and, in effect, treating the whole sector as if it were similar to emergency services.

Asymmetric Information

Another common argument contends that the gap in expertise between the sellers of healthcare services (i.e., healthcare providers) and buyers (i.e., patients) makes the idea of informed consumer choices implausible. While true to some extent, the same could be said about other markets that operate successfully under free-market principles, as anyone who has taken a car to an auto-mechanic or employed a financial adviser can attest. Indeed, the implication that healthcare providers will take advantage of patients by selling them services they do not understand or need suspects the worst of professions (such as medicine and nursing) that adopt strict ethical standards. Even if there were agreement that this risk is justified, there are other ways to solve this problem without abandoning free-market principles. For instance, in many markets where there is a gap in expertise between buyers and sellers, the less knowledgeable party will employ an unbiased consultant to help them

AMERICAN OVERSIGHT

make good decisions. In addition, third-party entities, like consumer watchdog groups, can produce reviews of actors within the healthcare system. The lack of transparent, reliable price and quality information currently inhibits such reviews.

Economies of Scale

Another reason given by some against market-based healthcare is that there are inherent economies of scale within healthcare that lead to natural monopolies and limit the extent to which markets can properly function. For example, there might be high fixed costs in building and equipping a healthcare facility. Once the facility is built, the marginal cost of extra services declines. This is why, the argument goes, it may make economic sense to have only a single hospital or nursing home in lightly-populated rural areas, and why certain healthcare mergers can increase economic efficiency by lowering production costs.[28] These natural economies of scale contribute to the creation of entities with significant pricing power. One can make a similar argument with regard to disease burdens, wherein smaller communities are only likely to have a need for so many specialists of a certain type given a population size and disease incidence rate. This leads to an economic incentive for specialists to form a practice together and take advantage of their pricing power. Furthermore, it is possible that a relatively small market cannot support the entrance of a competitor that would drive down prices since demand for the relevant type of specialist is roughly fixed among the population, meaning that the addition of another provider would merely drive prices to a point where neither entity were profitable and one ultimately would exit.

While these claims have some merit, most people live in areas with markets large enough to sustain multiple hospitals, nursing homes, or other providers. More importantly, economies of scale are inherent in many markets, yet the markets function well for consumers. Overall, there is little reason to think that these issues are so intrinsic to healthcare markets that they undermine a market-based approach. Indeed, with vigorous law enforcement to prevent unlawful consolidation and anti-competitive behavior, there is good reason to think that healthcare markets will function like most other competitive markets.

As this report will discuss, the government has actually adopted many policies that promote consolidation in the healthcare sector, favoring established incumbents at the expense of smaller providers and start-ups. Additionally, the ability to create regional monopolies in healthcare markets is largely dependent on geographic factors, which recent innovations such as telehealth could substantially disrupt. Rather than adopt policies that allow disruptive technology like telehealth to compete, the government has often intervened to

---

[28] While a theoretical possibility, the empirical evidence for such economies of scale is weak. A recent health economics paper looking at the impact of hospital mergers on costs summarized the extant literature, stating, "On balance, the evidence thus far fails to support strong claims of systematic cost savings from mergers; while these articles typically find cost savings for at least some subset of studied mergers, overall the evidence is mixed." Schmitt M. Do hospital mergers reduce costs? *J Health Econ*. 2017;52:75.

AMERICAN OVERSIGHT

create an uneven playing field that limits choice and competition to the benefit of established incumbents and at the expense of consumers. While there are economies of scale in healthcare markets, they are hardly unique and do not prevent the market as a whole from functioning well. What is unique is the extent to which the government has adopted policies that exacerbate these issues.

Third-Party Payment

Why do healthcare markets not function like other economic markets with price transparency, clear quality metrics, shopping, and declining real, quality-adjusted prices through time? The answer is primarily because government policies have combined to produce an excessive reliance on third-party payment mechanisms and numerous barriers to entry.

Third-party payment mechanisms insulate the ultimate consumer from the direct payment for healthcare goods and services. Instead of paying for healthcare services directly, consumers rely on an intermediary to do so on their behalf. Some degree of third-party payment in healthcare is understandable and necessary since there are low-probability, hard-to-predict, and costly health events that would otherwise subject an individual or family to a large financial loss. While insurance, along with saving and financing, is an efficient mechanism to reduce the impact of unlikely and high-cost events, insurance that covers routine, predictable, or shoppable services has significant drawbacks. First, an insurance system is often administratively complex to implement and accordingly can have high administrative costs. Second, consumers are incented to extract as much value out of an insurance policy as possible (since the premium is in effect a fixed fee), which in turn creates a coverage-induced demand for low-value products and services, and generates greater administrative costs as insurers validate claims. For these reasons, firms offer, and insurance consumers in most other markets select, policies that provide protection against improbable but high-cost events. Because routine, predictable, or shoppable services are not covered by a third party in other insurance markets, consumers have significant incentive to maximize the value they receive from these uncovered, routine services.

Auto insurance is a good example. Auto insurance typically covers a car crash and related healthcare expenses, but it does not cover gasoline or routine maintenance. Imagine if auto insurance did provide coverage for gasoline and routine maintenance. First, consumers would shop for their gas less carefully (since the insurance pool would bear the marginal cost of premium gasoline versus standard gasoline), and they would consume more maintenance. Second, in response to rising utilization and corresponding premium increases, auto insurance companies might establish preferred networks of gasoline and maintenance providers to better incentivize consumer behavior and control cost. In the long term, complex bureaucratic management schemes might emerge to tackle resource allocation with large national networks coming to dominate the market. While one could keep going with this thought experiment, the example highlights that as insurance covers

AMERICAN OVERSIGHT

NV-DA-20-0615-A-005950

more of an individual's routine expenses, consumers experience diminished incentives to obtain value.

Federal policy has a long history of subsidizing highly-comprehensive health insurance.[29] In the 1940s and 1950s, the exclusion of employer-provided health insurance premiums from income and payroll taxes created incentives for employers to offer comprehensive insurance coverage to compete for workers. Notably, this incentivized employers to compensate employees with health insurance rather than wage increases or other benefits that lacked a comparably generous tax exemption. The creation of Medicare and Medicaid in 1965 led to additional government subsidization of comprehensive coverage. Most recently, the ACA mandated that individuals have comprehensive coverage or pay a tax penalty. (This penalty has been reduced to $0 as of 2019 because of the Tax Cuts and Jobs Act of 2017.) Similarly, employers with 50 or more full-time workers who do not offer comprehensive coverage pay a tax penalty if at least one of their employees receives a premium tax credit for an exchange plan. The ACA also created additional federal subsidies for comprehensive coverage through Medicaid expansion and premium tax credits and cost-sharing reduction payments for exchange plans.

Because of open-ended tax subsidies for employer-provided health insurance, health insurance in the United States generally covers routine, predictable and shoppable services in addition to low-probability events. Federal laws, including the ACA, and state laws governing health insurance policies also require coverage for specific health benefits, often with low or no copayments. The Medicaid program, with nominal or zero copays and deductibles, exemplifies this problem. As a result, consumers typically do not have an incentive to shop for value, eliminating one mechanism that could help constrain provider prices. This set of policy choices has created a market for healthcare goods and services that is inherently inflationary.

As healthcare costs increase, insurers should feel market pressure to aggressively manage these costs on behalf of their customers. In competitive insurance markets, insurers feel the pressure of market forces to lower healthcare costs and premiums. However, some have claimed that insurers benefit from rising provider costs.[30] One recent article discussed that insurers may lack adequate incentives to bring down provider charges, partly because higher provider prices translate into higher insurer profits.[31] This may be particularly problematic in markets without vigorous competition among payers. Regardless of the motivation, one might ascribe to insurer actions, healthcare costs have consistently increased faster than wages and the overall economy.

---

[29] In World War II, employers offered health insurance as a way to get around wage controls. The IRS then decided that those health insurance benefits would not be taxed as income, and Congress codified the practice in 1954.

AMERICAN OVERSIGHT

Third-party payment also creates notable separation between producers and consumers, and leaves bureaucracies with the role of allocating resources. Bureaucracies are extremely susceptible to pressure from special interest groups, which lobby lawmakers to require coverage for the products they produce or services they provide. While a boon to special interests, mandated benefits cause a greater amount of healthcare services to be financed through third-party arrangements, raising premiums and taxes. The increased premiums, in turn, may incentivize some people to obtain more treatment and services so as to maximize the value received for the premium paid. This behavior drives up utilization and increases low-value spending. Moreover, excessive third-party payment results in providers serving the interest of payers—government bureaucracies and insurance companies—rather than consumers.

In conclusion, in most other markets, consumers pay the full price of what they purchase and are therefore likely to carefully consider the value of products relative to alternatives. Active shopping by consumers motivates competition on price and quality among producers. Third-party payment for routine, predictable and shoppable expenses reduces consumers' incentives to obtain maximum value and has contributed to opaque and byzantine prices and bureaucratic complexities. As a result, consumers have less ability and less incentive to carefully shop for healthcare, compare prices and quality, and select the most efficient providers. This, in turn, means that providers have a diminished incentive to innovate and increase their efficiency.

Barriers to Entry

Under normal market conditions, high prices and/or high profit margins attract new producers and sellers. This increased supply leads to lower prices and higher quality over time. Without the possibility of new entrants and real competition, however, existing producers can use market power to keep prices high and quality low.

While barriers to entry can be the result of normal market forces, such as economies of scale, they may also be the result of government restrictions. Government-erected barriers to entry can lead to a highly-concentrated and inefficient market. Moreover, firms protected from competitive forces can be expected to devote resources to maintaining these rents (e.g., by erecting or maintaining entry barriers) rather than to improving efficiency and innovating.[32] Some government-erected barriers, such as patents, are enacted to support a careful balance that promotes innovation and consumer options. However, many government-erected barriers harm consumers by blocking or restricting market entry.[33]

AMERICAN OVERSIGHT

NV-DA-20-0615-A-005952

These harmful barriers, such as state laws requiring potential new entrants to gain governmental permission (and, occasionally, permission from established incumbents) to enter markets, or preventing healthcare professionals from practicing to their full ability, are of primary interest in this report.

Over the past few decades, there has been a substantial increase in mergers and acquisitions throughout the healthcare sector, particularly among healthcare providers. More recently, industry consolidation (fewer and larger firms in the market) and industry concentration (the extent to which a small number of firms control most of the transactions) has occurred, in part, due to the increased complexity and administrative burden resulting from the ACA[34] and other government requirements. As will be discussed in Section 2 of this report, significant evidence shows that reduced competition in healthcare markets contributes to higher prices and reduced quality.

Need for Better Health Policies

Perhaps the best evidence for why the healthcare system needs reform and that the ACA moved the system in the wrong direction was outlined in the President's 2018 Economic Report.[35] This report (at pages 283-285) details the literature showing that our previous focus on expanding health insurance coverage has had mixed and surprisingly small effects on health outcomes. Probably the best investigation– the oft-cited Oregon Medicaid study– found that low-income, uninsured individuals randomly selected to enroll in Medicaid did not experience statistically significant improvement in any of the physical measures of health observed—cholesterol, blood pressure, and blood sugar–although there were some benefits for mental health.[36]

A subsequent Oregon Medicaid expansion study estimated that Medicaid enrollees only valued each dollar of program spending at between 20 to 40 cents, and that 60 percent of expansion costs were transfers to providers who would have otherwise provided

AMERICAN OVERSIGHT

uncompensated care to these patients.[37] A separate study of how many enrollees dropped out when charged higher premiums for Medicaid-like coverage in Massachusetts found that most enrollees valued coverage at less than half the cost. The availability of uncompensated care was the central reason that enrollees place low value on the coverage – substantially less than the cost of providing that coverage.[38]

Notably, despite the ACA expanding coverage options to the uninsured, largely through Medicaid, American life expectancy dropped three-tenths of a year from 2014 to 2017—in part due to rising opioid abuse—something that has not happened since the 1960s.[39] The Economic Report of the President outlined several explanations for why insurance, particularly expansions of public programs like the ACA's Medicaid expansion, have limited health benefits and in many locations contribute to access problems. Some Medicaid recipients have difficulty finding providers to provide care.[40] Moreover, as Atul Gawande, former adviser to President Bill Clinton, has discussed, some medical care can actually decrease health because there are separate health risks associated with the receipt of medical care, including over-testing and resulting issues like stress, radiation exposure and over-treatment (e.g. medically unnecessary surgeries), that need to be counted.[41]

This report discusses government-induced barriers to competition and choice and makes recommendations that would reduce or eliminate these barriers. These reforms are critical to unleashing competitive forces to improve consumer choices and spur provider and payer innovation to deliver high-value products and services to consumers. Without enacting a bold set of reforms that increase choice and competition in healthcare, government-created inefficiencies will continue to dominate the U.S. healthcare system, particularly publicly-financed care, frustrating Americans as the rising cost of healthcare squeezes family and government budgets. Reform will involve taking on entrenched special interests that maintain their advantage over consumers by lobbying government to restrain competitive forces.

In particular, this report aims to address these issues as crystalized in the following problem statement: Many government laws, regulations, guidance, requirements and policies, at both the federal and state level, have reduced incentives for price- and non-price competition, increased barriers to entry, promoted and allowed excessive consolidation,

AMERICAN OVERSIGHT

and resulted in healthcare markets that lack the benefits of vigorous competition. Increasing competition and innovation in the healthcare sector will reduce costs and increase quality of care—improving the lives of Americans.

The remaining three sections of this report are devoted to analyzing these important issues with a focus on changing government regulations to improve health-market outcomes through enhancing choice and competition. Section 2 provides detailed analysis of trends in consolidation and concentration in certain healthcare markets. Section 3 provides analysis of several specific areas of federal and state policies associated with increased consolidation or reduced competition. Section 4 presents recent and emerging policy alternatives that can address these issues by facilitating more efficient allocation of healthcare dollars. The final section offers specific policy recommendations based on these analyses.

Section 2:
Trends in Healthcare Market Consolidation

Assessing the Competitiveness of Healthcare Markets

Healthcare markets, like all other markets, benefit from vigorous competition. Recent trends, however, point to a level of consolidation that is changing the competitive landscape for the worse. Although the relationship between market concentration and competitive conditions is not always clear (particularly when markets are not, or cannot be, defined carefully), rising levels of concentration may provide a basis for concern that some markets are becoming less competitive. This section reviews recent evidence about hospital and physician consolidation, the impact of such consolidation on the competitiveness of local markets, and the degree to which government regulations have contributed to consolidation.

While it may be appealing to analyze trends in common measures of market concentration to investigate how the competitiveness of markets has changed over time, economists and antitrust experts recognize that such analysis can be misleading.[42] For one thing, trends in concentration can be caused by underlying market forces that may or may not be related to the competitiveness of markets.[43] In addition, computing these trends in overly broad areas that include providers that do not compete for the same patients can skew results.[44] This is why national trends in concentration for services that are usually procured on a local level (such as healthcare) may not be particularly meaningful. Only determining the set of competing suppliers in a particular local area enables calculation of concentration measures that reflect plausible levels of competition in economically relevant markets.

Of course, consolidation leading to concentration beyond a certain point harms consumers by reducing competition. That is why U.S. antitrust agencies have continued to pursue an active healthcare merger enforcement agenda. However, if a major hospital provides a

---

[42] See Salinger M. The concentration-margins relationship reconsidered. Brookings Papers on Economic Activity. Microeconomics 1990; Ohlhausen MK. Does the United States economy lack competition? *Criterion J Innov*. 2016 Aug 20;1:47-63.

[43] For instance, suppose the population in a well-defined hospital market that had been served by two similarly sized independent hospitals was growing, and one of the hospitals expanded to better serve the area. This market would become more concentrated because the expanded hospital would have more than half the market, but this increased concentration would not necessarily represent lost competition. An insurer interested in adding a hospital to its network could still benefit from the competition between these two hospitals. The expansion of the hospital generally would not constitute an antitrust problem. Alternatively, suppose the population in this market was shrinking, causing one of the two hospitals to close. This would produce a more concentrated and less competitive market, but the closing of an under-utilized hospital would not necessarily raise antitrust concerns.

superior level of service and takes over less-skilled providers, the quality of care delivered to patients could rise. As discussed below, some specific instances of recent consolidation have produced less competitive markets.

Trends in Merger Activity

According to a recent analysis of metropolitan areas that are considered single markets, roughly 77 percent of Americans in these urban markets live in highly concentrated hospital markets.[45] Over the past several decades, many hospitals have consolidated into multi-hospital systems.[46] According to data compiled by Irving Levin Associates, depicted by the American Hospital Association in Figure 1, the number of announced hospital transactions (including mergers and acquisitions) per year fell from 139 in 1998 to 38 in 2003, before starting to increase in 2010 and reaching 102 in 2015.[47] In 2010 alone, the number of mergers jumped 40 percent to 59, with more than 60 deals in each subsequent year. The number of hospitals involved in those deals has shown more variation from year to year, although data from recent years show a rise in mergers and acquisition.

Figure 1: Announced Hospital Mergers and Acquisitions, 1998-2015

Source: Irving Levin Associates, Inc. (2016). *The Health Care Services Acquisition Report*, Twenty-Second Edition.
(1) In 2004, the privatization of Select Medical Corp., an operator of long-term and acute-care hospitals, and divestiture of hospitals by Tenet Healthcare Corporation helped to increase the number of hospitals affected.
(2) In 2006, the privatization of Hospital Corporation of America, Inc. affected 176 acute-care hospitals. The acquisition was the largest health care transaction ever announced.
(3) In 2013, consolidation of several investor-owned systems resulted in a large number of hospitals involved in acquisition activity.
Chart 2.10 in 2009 and earlier years' Chartbooks.

An acquisition that combines healthcare providers that were competing in some aspect of their business may substantially lessen competition and thereby violate Section 7 of the Clayton Act.[48] Because preservation of healthcare competition is vital to preserving consumer choice, price containment, and quality, federal antitrust authorities, specifically the Federal Trade Commission (FTC) and the Department of Justice, have for many years maintained vigorous enforcement programs to scrutinize healthcare mergers for their potential effects on competition. Antitrust enforcers seek to identify and challenge mergers likely to have anti-competitive effects.

Empirical evidence on the impact of mergers on competition in healthcare markets—based on studies by FTC staff and independent scholars—shows that healthcare consumers benefit from competitive markets and the associated lower prices and higher quality services.[49] Economic studies also consistently demonstrate that reducing hospital

[48] 15 U.S.C. § 18. Section 7 of the Clayton Act prohibits mergers if "in any line of commerce or in any activity affecting commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly."

AMERICAN OVERSIGHT

competition leads to higher prices for hospital care.[50] These effects are not limited to for-profit hospitals: mergers between not-for-profit hospitals can also result in substantial anti-competitive price increases.[51] Economic evidence also shows that hospital competition tends to be highly localized.[52]

The Impact of Lost Competition

FTC merger retrospective studies, supplemented by a large and growing body of literature, strongly suggest that healthcare providers with significant market power can (and often do) negotiate higher-than-competitive payment rates.[53] The price differences ultimately paid by consumers in concentrated markets can be significant.[54] For example, price increases as high as 40 percent have resulted when competition was lost after one hospital system acquired a competing hospital.[55]

Federal antitrust agencies prevailed in some early challenges to anti-competitive hospital mergers[56] and obtained a number of consent decrees that allowed problematic hospital

mergers to proceed only if certain hospitals were divested.[57] However, in the 1990s, several courts rejected the agencies' attempts to block hospital mergers (on the grounds that the government had not established geographic or products markets) that they claimed would harm competition.[58] This string of losses led the FTC to launch a Hospital Merger Retrospective Project to determine whether consummated hospital mergers led to higher prices. The FTC selected four consummated hospital mergers for intensive study and published retrospective studies in early 2011.[59] The study of one consummated merger in particular—the Evanston/Highland Park (Illinois) merger—led to an FTC administrative challenge determining that the acquisition had violated the antitrust laws.[60]

The Hospital Merger Retrospective Project led to important insights about the nature of hospital competition and the competitive effects of hospital mergers that have continued to guide FTC case selection and enforcement decisions today.[61] For instance, in 2011, the FTC challenged ProMedica Health System's acquisition of its rival, St. Luke's Hospital.[62] The proposed merger would have given ProMedica, already the largest hospital system in the Toledo, Ohio, area, over half the market for general acute care hospital services and over 80 percent of the market for inpatient obstetrics services. Hospital documents indicated that St. Luke's management saw the acquisition leading to higher prices by increasing its "negotiating clout" over insurers. The FTC's order required ProMedica to

AMERICAN OVERSIGHT

NV-DA-20-0615-A-005960

undo its merger and re-establish St. Luke's as an independent competitor. The FTC has since successfully challenged other hospital mergers as well.[63]

The FTC has also challenged mergers between competing physician practices. For example, the FTC and the State of Idaho successfully challenged the acquisition by St. Luke's Health System of Saltzer Medical Group in Nampa, Idaho.[64] St. Luke's, the state's dominant health system, had numerous employed primary care physicians from prior acquisitions, including eight primary care physicians in Nampa, before acquiring from Saltzer 16 additional primary care physicians also practicing in Nampa. Although their prior acquisitions gave St. Luke's greater bargaining power, payers had been able to resist at least some of St. Luke's demands because of the presence of an alternative provider, Saltzer. The FTC alleged, and the court agreed, that the St. Luke's acquisition of Saltzer eliminated that remaining competitive option and would have led to higher prices for physician services.[65]

In sum, consolidation in well-defined antitrust markets can harm competition and consumers. Retrospective studies of healthcare mergers provide credible examples of harmful consolidation. These studies lend support for vigorous antitrust enforcement to prevent the accumulation of market power in healthcare markets. They can also help to guide case selection by the antitrust agencies and illustrate the mechanism by which excessive consolidation can stifle competition and harm healthcare consumers. However, as will be discussed in Section 3, certain state policies, such as certificate-of-need laws and certificates of public advantage, may suppress entry or prevent antitrust scrutiny of mergers that lead to increased concentration in local healthcare markets.[66]

Consolidation in Specific Healthcare Markets

While the evidence above demonstrates that some specific transactions have had anti-competitive consequences, it does not speak to general trends in the ownership structure of healthcare service providers. This section discusses research tracking various measures of concentration that differ from those used in antitrust analysis, generally calculating concentration in geographic areas that are broader than geographic markets consistent with antitrust standards, as well as explaining possible limitations with measures.[67]

[66] *Statement of the Commission, Phoebe Putney Health System, Inc.*, Dkt. No. 9348 (Mar. 31, 2015), https://www.ftc.gov/system/files/documents/public_statements/634181/150331phoebeputneycommstmt.pdf. Accessed August 22, 2018.

[67] As noted earlier, commonly used measures of concentration in the literature may be misleading and not as meaningful regarding the level of competition, compared to measures that take into account specific market attributes such as the set of competing suppliers in a particular local area or underlying market forces that may or may not be related to the competitiveness of a market.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-005961

Consequently, while these studies provide information about trends in changes of ownership of various types of healthcare providers, they do not reliably distinguish between concentration that may lessen competition and concentration that may be competitively benign.

Measures of Concentration

Industrial organization economists and antitrust practitioners have developed several market concentration indices. Two of the more common are the "four firm concentration ratio" (CR_4) and the Herfindahl-Hirschman Index (HHI). The CR_4 is the sum of the market shares of the four largest firms (as measured by market share), and the HHI is the sum of the squared share of each firm in the market, multiplied by 10,000. For example, a market with five firms each having a share of 20 percent would have a CR_4 of 80 percent and an HHI of 2,000. A merger between any two of those five firms will yield a CR_4 of 100 percent and an HHI of 2,800. The 2010 Department of Justice-Federal Trade Commission Horizontal Merger Guidelines[68] explain the HHI as a measure of market concentration for use in merger analysis. These guidelines generally classify markets with an HHI below 1,500 as unconcentrated and markets with an HHI exceeding 2,500 as highly concentrated. However, these thresholds apply only to well-defined antitrust markets, i.e., markets carefully defined to reflect the scope of both geographic and product/service competition that is relevant in antitrust analysis. HHIs calculated for broader geographic units, such as counties or metropolitan statistical areas (MSAs), may sometimes be informative, but considerable care is required in interpreting the results. HHIs calculated for larger geographic regions can both overstate and understate changes in the level of concentration in a relevant geographic market as it would be defined for purposes of antitrust analysis.[69]

---

[68] U.S. Department of Justice and Federal Trade Commission. *Horizontal Merger Guidelines*. Section 1. August 19, 2010. http://www.ftc.gov/os/2010/08/100819hmg.pdf. Accessed August 21, 2018.

[69] For example, consider 10 properly defined identical geographic markets, each served by a distinct monopolist hospital. Within the actual geographic markets, the HHIs would be 10,000. If all 10 of those hospitals were to merge into a hospital system, the post-merger HHI in each properly defined market would still be 10,000, so there would be no change. However, if the market was defined too broadly to include all of these true geographic markets, the pre-merger HHI would reflect 10 hospitals each having a 10 percent market share, or $10\times10^2=1{,}000$, and the post-merger HHI would be 10,000. Defining the market too broadly suggests that this merger increased concentration significantly even though it did not change the competitive landscape in any properly defined geographic market. Alternatively, suppose each of these identical geographic markets was served by two identical hospitals each, all of which are initially independent. The HHI in each geographic market would be $50^2+50^2=5{,}000$. Suppose a hospital system forms by combining the two hospitals in one of these geographic markets. The HHI in that geographic market would now be 10,000. Now, suppose that the market was again defined overly broadly to include all 20 hospitals in 10 geographic markets. The pre-merger HHI would reflect 20 hospitals, each with a 5 percent share, or $20\times 5^2=500$, and the post-merger HHI would be $18\times5^2+10^2=550$. The very significant increase in concentration in the one geographic market impacted by the merger is muted by absence of change in the nine other geographic markets.

AMERICAN OVERSIGHT

Inpatient Hospital Industry

Much of the research into concentration in the healthcare sector has been focused on hospitals, largely due to data availability and the outsized role of hospitals in the healthcare system. Recent analysis suggests a noticeable shift during 2010-2016 in site of practice for primary care physicians into hospital systems, as well an increase in the number of hospital consolidations since 2009.[70] One recent study by Gaynor et al.[71] measured concentration in the hospital industry by calculating the HHI for each MSA in the United States. The study calculated concentration measures at the MSA level using each hospital system's share of admissions.[72] It found that the mean HHI across MSAs in the inpatient hospital industry increased from 2,370 in 1987 to 3,261 in 2006—an increase of more than 900 points.[73] It also found that most of this increase had occurred by the year 2000. The report found that the mean hospital HHI increased by an average of about 100 points per year over the period 1990-2000 but was largely flat over the period 2000-2006. It also found that the percentage of MSAs with an HHI that exceeded 2,500 increased from 65 percent in 1990 to 77 percent in 2006.

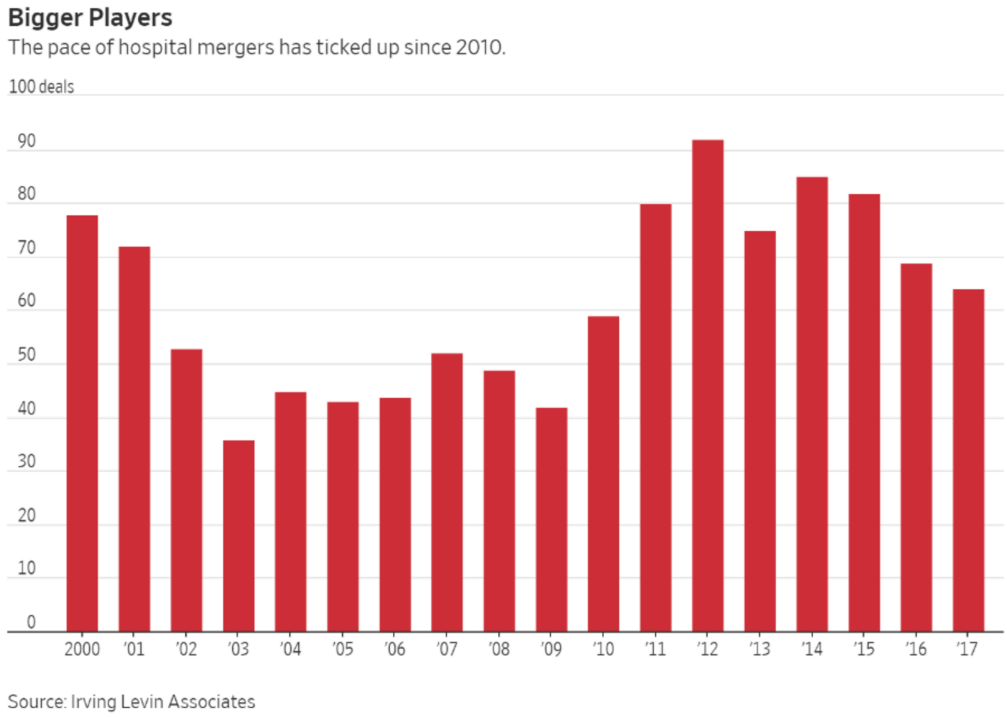
[71] See Gaynor M, Ho K, Town RJ. The industrial organization of healthcare markets. *J Econ Lit* 2015;53(2):235-284.



[72] In this and similar analyses, all hospitals in the same system are treated as part of the same "firm" for purposes of evaluating market concentration indices.

[73] Gaynor, et al. used a population weighted average mean in computing their mean HHI. They also dropped any MSA for which the population exceeded 3 million. They did so because in it is likely that there were multiple relevant hospital markets in these MSAs. Hence, the MSA-level HHI is more likely to be uninformative in these MSAs. See Gaynor M, Ho K, Town RJ. The industrial organization of health-care markets. *J Econ Lit* 2015;53(2):235-284.

AMERICAN OVERSIGHT

Figure 2: The Pace of Hospital Mergers Has Ticked Up Since 2010[74]

More recent work by Fulton measured hospital concentration over the period 2010-2016.[75] Like Gaynor et al., Fulton calculated the HHI for inpatient hospitals within each MSA in the United States. He found that the mean HHI across MSAs increased from about 5,500 to about 5,786, an increase of 5.2 percent. This finding implies an average increase in the mean HHI of about 48 points per year. Fulton also reported that the percentage of MSAs with an HHI that exceeded 2,500 increased from about 87 percent in 2010 to 90 percent in 2016. The mean HHI of 5,500 in 2010 found by Fulton is substantially higher than the mean HHI of 3,261 in 2006 found earlier by Gaynor.[76]

---

[74] Mathews, Anna Wilde. Behind Your Rising Health-Care Bills: Secret Hospital Deals That Squelch Competition. September 18, 2018. https://www.wsj.com/articles/behind-your-rising-health-care-bills-secret-hospital-deals-that-squelch-competition-1537281963

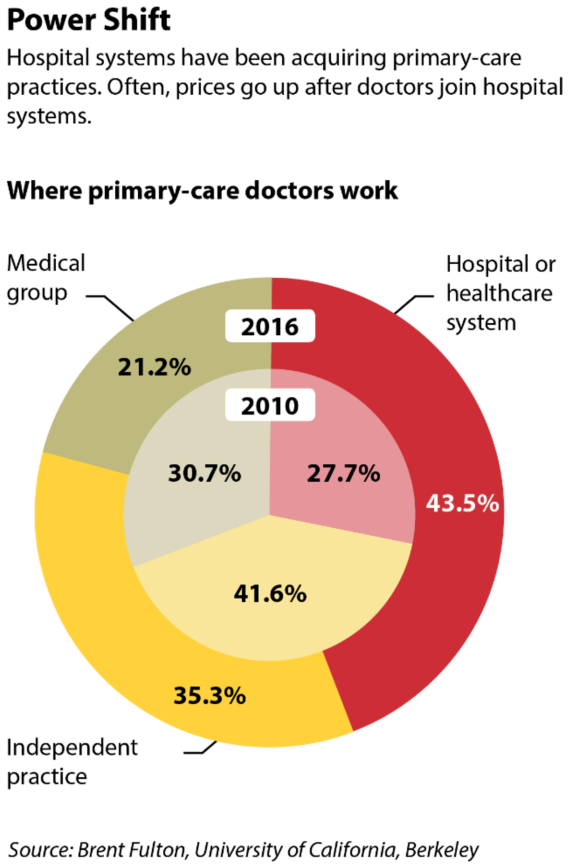
[75] See Fulton, BD. Health care market concentration trends in the United States: evidence and policy responses. *Health Aff.* 2017;36(9):1530-1538.

[76] Methodological differences between the two studies largely explain this difference in the mean HHI. Specifically, Fulton applied an unweighted mean HHI across MSAs, whereas, as noted above, Gaynor, et al. applied a population-weighted mean. Since lower-population MSAs are generally more concentrated than higher-population MSAs, weighting the mean HHI by MSA population will likely result in a significantly lower mean HHI. This methodological difference likely explains most the jump in the mean HHI in 2006 found by Gaynor, et al. and the mean HHI in 2010 found by Fulton. Gaynor M, Ho K, Town RJ. The industrial organization of health-care markets. *J Econ Lit* 2015;53(2):235-284 and Fulton, BD. Health care market concentration trends in the United States: evidence and policy responses. *Health Aff.* 2017;36(9):1530-1538.

AMERICAN OVERSIGHT

Physician Services

More recently, researchers have been able to obtain data to study consolidation involving physician practices. Fulton calculated HHIs at the MSA level for primary care physicians and specialist physicians.[77] He found a high degree of concentration at the MSA level for specialist physician services, but the increase over the period 2010-2016 was modest. The mean HHI across MSAs ranged from about 3,000 to about 3,400 over the period. The mean HHI increased by about 5 percent over the period 2010-2016. This implies an average increase in the mean HHI of about 26 points per year. The percentage of MSAs with an HHI that exceeded 2,500 for specialist physicians increased from about 60 percent in 2010 to about 62 percent in 2016. Fulton also found that the levels of concentration for primary care physician services were much lower, but the increase over the period 2010-2016 was more substantial. The mean HHI for primary care services across MSAs ranged from about 1,700 to about 2,300 over the period 2010-2016, but increased by about 29 percent over this period. This implies an average increase in the mean HHI of about 87 points per year. The percentage of MSAs with an HHI greater than 2,500 for primary care physicians increased from about 21 percent in 2010 to about 35 percent in 2016.



Other research, while not examining trends in physician consolidation, also found higher concentration levels for specialist physicians than for primary care physicians. Kleiner examined shares by physician practice within specialty-specific geographic areas using

[77] Among specialist physicians, Fulton included cardiologists, hematologists/oncologists, radiologists, and orthopedists. To calculate the specialist-physician HHI at the MSA level, he calculated the HHI for each of the aforementioned specialties, and then calculated a weighted average of the HHI across specialties at the MSA level. Fulton, BD. Health care market concentration trends in the United States: evidence and policy responses. *Health Aff.* 2017;36(9):1530-1538.

AMERICAN OVERSIGHT

Figure 3: Hospital Systems are Increasingly Acquiring Primary Care Practices[78]

2009 patient-level Medicare data.[79] The study found median two firm concentration ratios (CR_2) across all areas of 33 percent for primary care services, but 58 percent for cardiology, 72 percent for oncology, 49 percent for orthopedics, and 57 percent for radiology. Similarly, it found a median HHI of 761 for primary care services, but 2,370 for cardiology, 3,606 for oncology, 1,751 for orthopedics, and 2,190 for radiology. These differences in concentration metrics between specialist physicians and primary care physicians may be due to higher barriers to entry faced by specialists.

Some of the consolidation in physician services might be due to the acquisition of physician practices by local hospitals, as opposed to mergers between physician practices. For example, in a market consisting of two hospitals and ten physician practices, an acquisition of the ten practices by the two local hospitals would yield a significant increase in concentration in the market for physician services. Hospitals have increasingly been acquiring physician practices. One study reported that the share of physician practices in the United States owned by hospitals doubled over the period 2002-2008.[80] Another study examined the effect of the acquisition of physician practices by hospitals on prices and expenditures over the period 2007-2013.[81] It reported that hospitals

AMERICAN OVERSIGHT

acquired 10 percent of the physician practices in their sample during their sample period. In its 2013 Report to the Congress, the Medicare Payment Advisory Commission (MedPAC), an independent, non-partisan, Congressional support agency, similarly reported that while the number of physicians and dentists employed by hospitals was relatively constant from 1998 to 2003, it increased by 55 percent from 2003 to 2011.[82] Another survey by the Medical Group Management Association found a 75 percent increase in the employment of doctors by hospitals between 2000 and 2012.[83] The overall effects of a hospital becoming the owner of a physician practice raise significant anti-competitive concerns, although in some cases they can produce pro-competitive effects.[84]

Need for Continued Vigilance

While the studies cited above do not definitively confirm that increased concentration has led to increased market power or increased payments, they do demonstrate a steady stream of transactions affecting the ownership of hospitals and physician services. Given the strong evidence of consumer harm from some transactions that have been shown to diminish competition, these concentration trends highlight the need for continued vigilance by the antitrust authorities to identify and prevent anti-competitive activity. Furthermore, in instances where markets have become concentrated due to a lawful accumulation of market power, elimination of regulatory barriers to entry can help to keep that in check, as will be discussed in the next section.

Recommendations: Address Potential Antitrust and Provider Consolidation

- The administration should continue monitoring market competition, especially in areas that may be less competitive and thus more likely to be affected by alternative payment models.
- The administration should ascertain the impact of horizontal and vertical integration among provider practices on competition and prices.

Section 3: Government Healthcare Policies and Their Effect on Competition

Healthcare Workforce and Labor Markets

In competitive markets, suppliers of goods or services respond to market signals that suggest growing demand for the goods or services by increasing prices, which provides incentives to increase the supply of goods and services. Government policies that reduce the available supply of qualified healthcare service providers or the range of services they may safely offer can increase the prices paid for healthcare services, reduce access to care, and suppress the benefits of competition and innovation in healthcare delivery. Such regulations can also unnecessarily limit the types or locations of providers authorized to practice or the range of services they can provide.

Government rules restrict competition if they keep healthcare providers from practicing to the "top of their license"— i.e., to the full extent of their abilities, given their education, training, skills, and experience, consistent with the relevant standards of care. Such rules, including restrictions on the appropriate use of telehealth technologies, unnecessarily limit the types or locations of providers authorized to practice, or the range of services they can provide, in contrast to regulations tailored to address specific and non-speculative health and safety concerns.

With respect to physicians in particular, certain policies relating to graduate medical education (GME), as well as significant restrictions on the ability of foreign-trained doctors to practice in the United States may also unnecessarily limit the supply of physicians available to provide care to Americans. Reduced competition among qualified physicians inevitably leads to higher prices for physician services and generally reduces the quality of care. Consistent with overarching patient health and safety concerns, the discussion below examines potential benefits of more flexible approaches to GME and the treatment of foreign-trained doctors that could increase physician supply and promote additional competition and consumer choice.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-005968

Scope of Practice

State licensing and scope-of-practice (SOP) restrictions are common components of state licensure statutes and regulatory codes for healthcare professions.[85] Licensure regulates entry into an occupation since a worker must obtain the permission of a government agency or government-authorized regulatory board before providing certain services.[86] For numerous healthcare occupations, a state licensing authority stipulates minimum education, training requirements, and certification, among other criteria, for those who seek to acquire or maintain a license to practice a given profession or provide certain services.[87] SOP regulations "describe the metes-and-bounds of licensure—what a given professional license permits a person to do and, often, prohibits others from doing."[88]

SOP laws and regulations, like other health and safety regulations, may be justified when there are substantial risks of consumer harm.[89] These regulations may be especially important with respect to certain healthcare professions, where consumers might be at risk of serious harm if they were treated by unqualified individuals, and where patients might find it difficult (if not impossible) to assess quality of care at the time of delivery.[90] Still, even well-intentioned regulations may impose unnecessary restrictions on provider supply and, therefore, competition. Oftentimes, too, SOP restrictions limit provider entry and ability to practice in ways that do not address demonstrable or substantial risks to consumer

health and safety.[91] When this happens, these undue restrictions are likely to reduce healthcare competition and harm consumers—including patients, and taxpayers more generally.[92]

When state regulators impose excessive entry barriers and undue restrictions on SOP for particular types of providers, they often are not responding to legitimate consumer protection concerns. There is a risk that healthcare professionals with overlapping skill sets will seek these restrictions; they view SOP restrictions as an easy, state-sanctioned opportunity to insulate themselves from competition.[93] The risk of anti-competitive harm may be even greater when the regulatory board that imposes SOP restrictions on one occupation is controlled by members of another, overlapping occupation that provides complementary or substitute services,[94] and the board members are themselves active market participants with a financial stake in the outcome.[95]

the use of . . . APRNs in primary, chronic, and transitional care,"[102] and expressed concern that SOP restrictions "have undermined the nursing profession's ability to provide and improve both general and advanced care."[103] In fact, research suggests that allowing allied health professionals to practice to the full extent of their abilities is not a zero sum game for other medical professionals, and may actually improve overall health system capacity.[104] The previously mentioned IOM report found that APRNs' scope of practice varies widely "for reasons that are related not to their ability, education or training, or safety concerns, but to **the political decisions of the state** in which they work."[105]

State decisions about scope of practice and reimbursement can also affect the development and utilization of allied health professionals, particularly in public programs. Private insurance has the flexibility to incentivize patients to find lower-cost, higher-quality provider alternatives when feasible. Public programs, more restricted by state regulations, can be less responsive to such changes in the healthcare workforce, even after scope of practice regulations accommodate them. Currently, for example, states vary widely in the degree to which they permit their Medicaid programs to reimburse allied health professionals directly for services. Services provided under the direct supervision of a physician are reimbursed as if the physician provided those services. State Medicaid programs can also pay for PA, nurse practitioner, and certified nurse midwife (CNM) services provided outside of a physician's office, but only if state scope-of-practice laws do not require onsite supervision by physicians. Some states allow allied health professionals to bill Medicaid directly, while other states require them to bill under the physician's number. For patients to realize the benefits of changes to state SOP restrictions, state Medicaid programs would need to reimburse allied health professionals independently for their services.

As noted by FTC staff, "when APRN access to the primary care market is restricted, healthcare consumers—patients and other payers—are denied some of the competitive

AMERICAN OVERSIGHT

benefits that APRNs, as additional primary care service providers, can offer."[106] Slightly more than half the states require supervision and "collaborative practice" requirements, which can operate as de facto supervision requirements. These are a particular source of concern to the extent that they raise the cost of APRN-provided services.[107] In addition, rigid "collaborative practice agreement" requirements can impede collaborative care rather than foster it because they limit the ability of healthcare professionals to adapt to varied healthcare demands, thereby constraining provider innovation in team-based care.[108] Economic analysis indicates that expanding APRN SOP, consistent with APRN education, training, and experience, would have clear consumer benefits, particularly in rural and poorer areas:

> In underserved areas and for underserved populations, the benefits of expanding supply are clear: Consumers will have access to services that were otherwise unavailable. Even in well-served areas, the supply expansion will tend to lower prices for any given level of demand, thus lowering healthcare costs.[109]

Similar concerns about the competitive impact of supervision and "collaborative practice" requirements can apply to other healthcare occupations. Even when some form of collaboration or supervision might be desirable, particular requirements might be unnecessary, over-rigid, and costly barriers to the efficient delivery of healthcare services.[110]

Extremely rigid collaborative practice agreements and other burdensome forms of physician and dentist supervision are generally not justified by legitimate health and safety concerns. Thus, many states have granted full practice authority to APRNs, but there is significant room for improvement in other states and for other professions.[111] Emerging

healthcare occupations, such as dental therapy, can increase access and drive down costs for consumers, while still ensuring safe care. States should be particularly wary of undue statutory and regulatory impediments to the development of such new occupations.

Recommendations: Broaden Scope of Practice

- States should consider changes to their scope-of-practice statutes to allow all healthcare providers to practice to the top of their license, utilizing their full skill set.
- The federal government and states should consider accompanying legislative and administrative proposals to allow non-physician and non-dentist providers to be paid directly for their services where evidence supports that the provider can safely and effectively provide that care.
- States should consider eliminating requirements for rigid collaborative practice and supervision agreements between physicians and dentists and their care extenders (e.g., physician assistants, hygienists) that are not justified by legitimate health and safety concerns.
- States should evaluate emerging healthcare occupations, such as dental therapy, and consider ways in which their licensure and scope of practice can increase access and drive down consumer costs while still ensuring safe, effective care.

Workforce Mobility

State-based licensing requirements, by their nature, inhibit provider mobility.[112] These requirements add time and expense when healthcare providers seek to move or work across state lines. Markets cannot be as responsive to economic change when workers cannot easily move to meet the demand for their services.[113]

Accessed August 22, 2018. For examples of state restrictions on SOP besides supervision requirement see, e.g., Institute of Medicine, National Academy of Sciences. *The Future of Nursing: Leading Change, Advancing Health.* Washington, D.C.: National Academies Press; 2011:100-102, Box 3-1 Variation in State Licensure Requirements; FTC Staff. Policy perspectives: competition and the regulation of advanced practice nurses. Federal Trade Commission. March 7, 2014. https://www.ftc.gov/reports/policy-perspectives-competition-regulation-advanced-practice-nurses. Accessed August 22, 2018, at notes 35-37 and accompanying text.

[112] Licensing rules are almost always state-based. See, e.g., *Dent v. West Virginia*, 129 U.S. 114 (1889) (upholding the authority of the State of West Virginia to license physicians); Health Resources and Services Administration, U.S. Department of Health and Human Services. Telehealth licensure report. Report 111-66. Special Report to the Senate Appropriations Committee (Requested by Senate). 2010. ("For over 100 years, health care in the United States has primarily been regulated by the states. Such regulation includes the establishment of licensure requirements and enforcement standards of practice for health providers, including physicians, nurses, pharmacists, mental health practitioners, etc.")

[113] See, e.g., *Occupational Licensing: Regulation and Competition: Hearing Before the Subcomm. on Regulatory Reform, Commercial and Antitrust Law of the House Comm. on the Judiciary,* 115th Cong. 1, 8-9 (2017) (statement of Maureen K. Ohlhausen, Acting Chairman, Federal Trade Commission). https://www.ftc.gov/system/files/documents/public_statements/1253073/house_testimony_licensing_and_rbi_act_sept_

AMERICAN OVERSIGHT

State-based licensing also often inhibits delivery of healthcare services across state lines by making it more difficult for qualified healthcare professionals licensed in one state to work in another state, even though most healthcare providers complete nationally certified education and training programs and sit for national qualifying exams.[114] Appropriate standards of care do not differ from state to state. Yet, even when a profession's underlying standards are national in scope, and when state licensing requirements are similar throughout the United States, the process of obtaining a license in another state is often slow, burdensome, and costly.[115] There is little economic justification for the redundant licensing processes that many states impose on licensed, out-of-state applicants. Even when there may be plausible consumer-protection concerns, the harm to consumers likely outweighs any benefits.[116]

The effects of state-based licensing are especially apparent in fields where providers routinely communicate electronically and provide services in multiple states. For this reason, state-based licensing requirements can inhibit the efficient development and use of telehealth (discussed below), as well as in-person services.[117]

Interstate compacts and model laws can mitigate the effects of state-based licensing requirements by enhancing license portability. Professional associations and associations

AMERICAN OVERSIGHT

of licensing boards typically draft model laws, which may be passed with minor variations between jurisdictions. Almost all states and other United States jurisdictions have adopted model laws with license portability provisions in other professions such as accountancy and pharmacy.[118] By contrast, interstate compacts, which are binding contracts between two or more states authorized by the United States Constitution, must be identical and have been used only recently to improve licensure portability.[119] The first interstate licensure compact, on nurse licensure, was initially implemented in 1999 and has been adopted by 30 states.[120] Other licensure compacts in the health professions are in the early stages of implementation.[121] Federal grants to state professional licensing boards have encouraged the development and implementation of various licensure compacts in several professions.[122]

Model laws and interstate compacts typically use one of two approaches to enhance licensure portability. One is reciprocity as practitioners licensed by one state are able to practice in other states without obtaining another license. Second, some states require a license in each state of practice but expedite the process.[123] By making it easier to practice in multiple states, interstate compacts and model laws can enhance access to healthcare services and improve provider mobility.

AMERICAN OVERSIGHT

Recommendations: Improve Workforce Mobility

- States should consider adopting interstate compacts and model laws that improve license portability, either by granting practitioners licensed in one state a privilege to practice elsewhere, or by expediting the process for obtaining licensure in multiple states.
- The federal government should consider legislative and administrative proposals to encourage the formation of interstate compacts or model laws that would allow practitioners to more easily move across state lines, thereby encouraging greater mobility of healthcare service providers.

Telehealth

Telehealth, the use of telecommunications to provide healthcare services, has been hailed as a significant innovation in healthcare delivery.[124] It encompasses a broad variety of services and technologies, and is particularly effective when it replicates in-person care, speeds input from knowledgeable practitioners, provides information more frequently than would be possible with in-person visits, or involves conditions that can be evaluated from digital images. Examples of healthcare services that may be provided by telehealth include mental health services,[125] dermatology,[126] ophthalmology,[127] specialist-to-provider

consultations in neurology and pathology,[128] and direct-to-consumer services for minor conditions.[129]

Telehealth often increases the virtual supply of providers and extends their reach to new locations, promoting beneficial competition. By doing so, telehealth can enhance price and non-price competition, reduce transportation expenditures, and improve access to quality care.[130] Indeed, telehealth has great potential to improve access in underserved locations, reduce costs, and generate improved short- and long-term health outcomes.[131]

Nonetheless, a variety of regulatory barriers have kept telehealth from reaching its full potential to increase competition and access. State laws and regulations typically require that providers be licensed in the state where the patient is located, thus restricting the provision of telehealth services across state lines.[132] State licensing requirements and

AMERICAN OVERSIGHT

variations in scope of practice are barriers for even well-established and natural telehealth services, such as mental and behavioral healthcare.[133] Public and private reimbursement laws and policies are also frequently cited as major impediments to the development and use of telehealth services.[134] For example, Medicare fee-for-service pays for telehealth services only when patients are located at certain types of healthcare facilities ("originating sites")[135] in rural areas with a shortage of health professionals.[136] Another barrier is that states may require practitioners to have first provided services in person before caring for a patient by telehealth.[137]

E-Health Law. N.p: Law Journal Press; 2014, 1.02[2] ("A large number of states require out-of-state telemedicine physicians to obtain a full, unrestricted medical license in order to 'see' patients in the state via telemedicine.")

U.S. Government Accountability Office. GAO-17-365. 2017. Highlights, at 8-9, 21-25. https://www.gao.gov/products/GAO-17-365#summary. Accessed August 23, 2018. (Medicare telehealth coverage restrictions that limit the geographic and practice settings in which beneficiaries may receive services are barriers to the use of telehealth). Legislators have been cautious about expanding coverage of telemedicine services in part because of concerns that its ease of use could lead to overutilization. In practice, however, Medicare telemedicine-related spending is very low. *See ibid.* at 14, 18 (in 2014, Medicare paid 175,000 telehealth claims for a total of about $14 million, less than 0.01 percent of the approximately $257 billion in total annual Medicare expenditures on Part B services); Neufeld JD, Doarn CR. Telemedicine spending by Medicare: a snapshot from 2012. *Telemed J E Health*. 2015 Aug;21(8):686-693. In addition, concerns about improper claims for reimbursement of telehealth services have been overblown. An Office of Inspector General (OIG) audit found that the Centers for Medicare and Medicaid Services (CMS) paid for some telehealth services that did not meet Medicare requirements, but most claims for telehealth services were appropriate. To reduce the number of unallowable claims, OIG recommended post-payment reviews to detect errors, and education and training of practitioners on Medicare telehealth requirements. See CMS paid practitioners for telehealth services that did not meet Medicare requirements. Department of Health and Human Services, Office of Inspector General. A-05-16-00058. Accessed August 23, 2018. (Discussing initial in-person evaluation requirements before speech/language/pathology or audiology services may be provided by telehealth in Kentucky and Texas.) It is difficult to draw a bright line between services for which health and safety considerations warrant a prior in-person examination and those that do not, in part because rapid changes in technology and healthcare priorities may lead to changing views of the need for an in-person visit. See, e.g., Letter from Jonathan Linkous, chief executive officer, American Telemedicine Association, to Imelda L. Paredes, executive assistant, Drug Enforcement

AMERICAN OVERSIGHT

Recommendations: Facilitate Telehealth to Improve Patient Access

- States should consider adopting licensure compacts or model laws that improve license portability by allowing healthcare providers to more easily practice in multiple states, thereby creating additional opportunities for telehealth practice. Interstate licensure compacts and model laws should foster the harmonization of state licensure standards and approaches to telehealth.
- States and the federal government should explore legislative and administrative proposals modifying reimbursement policies that prohibit or impede alternatives to in-person services, including covering telehealth services when they are an appropriate form of care delivery. In particular, Congress should consider proposals modifying geographic location and originating site requirements in Medicare fee-for-service that restrict the availability of telehealth services to Medicare beneficiaries in their homes and in most geographic areas.
- States generally should consider allowing individual healthcare providers and payers to mutually determine whether and when it is safe and appropriate to provide telehealth services, including when there has not been a prior in-person visit.
- Congress and other policymakers should increase opportunities for license portability through policies that maintain accountability and disciplinary mechanisms, including permitting licensed professionals to provide telehealth service to out-of-state patients.

Foreign-Trained Doctors

The United States has the highest physician salaries in the world, with per-capita physician spending significantly higher than in other countries and making up about a fifth of overall healthcare spending.[138] Increasing the supply of goods or services in any market is generally the best approach to lowering prices, and physician services are no exception. Expanding domestic education and training opportunities—including the opening of new medical schools is a priority—efforts should be made to reduce the burdens on highly skilled, fully trained, foreign medical doctors looking to practice in the United States. Currently, any physician trained outside the United States or Canada must obtain an

Educational Commission for Foreign Medical Graduates (ECFMG) certification, complete a United States residency program, and apply for a state license.[139] This process is expensive (exams can cost up to $15,000). [140]

In the interim, easing the licensing pathway for highly qualified, foreign-trained doctors is one step that could be taken in the short-run to expand the supply of medical practitioners and thus constrain the price of physician services and lower overall healthcare costs for American consumers.

While increasing the supply of high-skilled, domestically trained United States medical professionals might help to constrain salaries for specialty physicians, facilitating the entry of additional foreign-trained doctors would be particularly helpful in alleviating the country's shortage of primary care physicians (PCPs). On average, PCPs earn 46 percent less than medical specialists. Because American medical school students graduate with an average of $180,000 of debt, many of them pursue higher paid specialties rather than the much needed primary-care fields.[141] While forecasts are often inaccurate, it is projected that by 2025, the United States will face a shortage of between 14,900 and 35,600 PCPs.[142] Foreign-trained doctors have already helped meet this growing need—over 40 percent of current American PCPs were trained abroad; however, if it were easier for foreign-trained doctors to enter the United States marketplace, this percentage would likely rise.[143]

Highly skilled, foreign-trained doctors could also be encouraged to practice in underserved regions of the country, where Americans often are unwilling to practice. For example, under the Conrad 30 Waiver Program, foreign-trained doctors can receive sponsorship to work in the United States if they commit to spend at least three years in an underserved region.[144] Over the past decade, this program has attracted more than 10,000 foreign-trained doctors to practice in areas faced with physician shortages.[145]

Recommendations: Ease Restrictions on Foreign-Trained Doctors

- The Department of Health and Human Services, in coordination with the Accreditation Council for Graduate Medical Education (GME), should identify foreign medical residency programs comparable in quality and rigor to American programs. Graduates of such equivalent programs should be granted "residency waivers," allowing them to forgo completing an American residency and instead apply directly for state licensure.
- States should create an expedited pathway for highly qualified, foreign-trained doctors seeking licensure who have completed a residency program equivalent to an American GME program.

Federal Funding of Medical Education

Spending on physician services comprises approximately 20 percent of all healthcare expenditures in the United States, and prices for physician services tend to be substantially higher in the U.S. than in other wealthy countries.[146] As mentioned above, one option to reduce prices is to increase the supply of physicians. Physician supply in the United States, measured as physicians per 1,000 population, is well below the OECD median and is lower than 8 of 10 other OECD countries.[147] Unlike many other professions, in which market forces determine supply, the number of persons trained to be physicians is limited by organizations that are themselves often run by physicians, which creates natural conflict-of-interest concerns and raises questions concerning cartel-style rent seeking. Some barriers to entry in the physician sector (such as extensive educational, training and testing requirements, including state licensing and specialty board certification), may be justified to ensure professional competence. Nonetheless, this does not warrant non-market-based limits placed on the number of persons seeking to enter the medical field. Medical schools admit only a fraction of applicants, with many qualified individuals unable to enter due to the sharply limited spaces available.

Not only is the supply of potential physician practitioners limited, federal policy currently subsidizes medical training for an artificially low number of persons. The Department of Education administers loan programs that are available to medical school students, including private loans guaranteed by the federal government and direct loans from the

AMERICAN OVERSIGHT

federal government through the students' schools. The Health Resources and Services Administration (HRSA), part of HHS, administers National Health Service Corps (NHSC) scholarships and loan repayment programs for health professionals who commit to practice in underserved areas and to train in primary care. An even larger amount of federal support is directed toward Graduate Medical Education (GME)—residency and fellowship programs that provide further training for medical school graduates. As of 2015, federal taxpayers paid $287 million to support the NHSC, $10.3 billion for Medicare GME, and $2.4 billion for Medicaid GME, and $265 million for the Children's Hospital Graduate Medical Education Payment Program.[148] Medical education is costly, but its estimated rate of financial return is high and clearly sufficient to entice many qualified individuals to seek admission to medical school. Current subsidies of medical education are generally regressive by reducing the cost to the very persons who can expect high financial returns to their valuable education and training.

The Structure of Medical Education

Medical education in the United States generally consists of four years of college education, followed by four years of medical school (undergraduate medical education), followed by graduate medical education (GME) consisting of three to six years of residency training in a medical specialty that is sometimes followed by a year or more of additional fellowship training. Medical school graduates must complete at least a year of residency training (often called an internship), depending on the state, to be licensed.

Medical students attend either allopathic medical schools (granting M.D. degrees) or osteopathic schools of medicine (granting D.O. degrees). The Liaison Committee on Medical Education (LCME), jointly sponsored by the Association of American Medical Colleges (AAMC) and the American Medical Association (AMA), is the United States Department of Education's recognized body for accrediting allopathic medical schools.[149] The American Osteopathic Association's (AOA) Commission on Osteopathic College Accreditation accredits osteopathic schools. In 2017-2018 there were 118,885 United States medical students including 46,315 men and 43,571 women at allopathic schools[150] and 15,904 men and 13,076 women at osteopathic schools.[151] Residents and fellows train at programs accredited by the Accreditation Council for Graduate Medical Education (ACGME) or programs jointly accredited by the ACGME and the AOA. The Department

of Veterans Affairs, through affiliation agreements with medical schools and teaching hospitals, is the largest single provider of medical training in the United States, providing the site of training for medical students, residents and a small number of fellows.[152]

To receive postgraduate training medical students must participate in a "match" process that determines where they receive residency training. This process is administered by the National Resident Matching Program that is sponsored in part by the AAMC. Applicants and training programs both submit rank-ordered preference lists, and then an algorithm matches applicants to programs to produce stable matchings as favorable as possible to applicants.[153] In 2004—in response to a lawsuit alleging that operating the match and accrediting residency programs was anti-competitive and violated the anti-trust statutes by limiting the number of residency positions and driving down resident choices and salaries—Congress granted the matching program an anti-trust exemption.[154]

Graduate Medical Education (GME) Funding

Funding for GME subsidizes training for medical school graduates in hospitals and other teaching institutions in what are commonly known as residency and fellowship training programs. In 2015, federal agencies and state Medicaid programs provided $16.3 billion to support GME. Five federal agencies (see Table 1) spent $14.5 billion with the bulk of federal funding coming through Medicare (71 percent), Medicaid (16 percent), and the VA (10 percent); 45 state Medicaid agencies spent an additional $1.8 billion on GME.[155]

Table 1. Federal Spending on Graduate Medical Education (GME) Training, 2015

Program	Total GME spending (dollars in millions)	Percent of total spending (percent)
HHS programs		
Medicare	10,335	71
Medicaid (federal share)	2,351	16
Children's Hospital GME Payment Program	249	2
Teaching Health Center GME Program	76	1
VA program	1,499	10
Total	**14,509**	**100**

Source: GAO analysis of departments of Health and Human Services (HHS) and Veterans Affairs (VA) data and GAO web-based survey administered to state Medicaid agencies. GAO-18-240.

About 30 percent of Medicare GME spending is for direct graduate medical education (DGME) to pay the salaries of residents and supervising physicians. Another 70 percent goes for indirect medical education (IME) to provide funding to hospitals that run training programs.[156] DGME payments are based on a per-resident amount and the number of full-time-equivalent (FTE) residents. IME Medicare payments are an add-on to the predetermined amount paid under the inpatient prospective payment system for each discharge with an adjustment for the number of FTE residents per hospital bed to represent the incremental care costs of providing GME training. DGME payments are also adjusted for the share of hospitals' patients covered by Medicare. The Balanced Budget Amendment of 1997 capped the number of FTE residents that programs may count for DGME and IME payment at the number of FTE residents working at the end of 1996.[157]

While GME programs undoubtedly generate indirect costs, they also produce benefits for teaching institutions. Residents are an inexpensive source of labor. They work longer, more irregular hours than more experienced health professionals. They also increase attending

physicians' productivity by enabling them to increase the amount of patient services they can perform and for which they can bill.[158]

The Medicare Payment Advisory Commission (MedPAC), an independent agency that advises Congress about Medicare, estimates that indirect graduate medical education payments are at least twice as high as actual costs, exceeding actual costs by $3.5 billion each year.[159] Similarly, an HHS-sponsored study found that Medicare is overpaying for IME costs.[160] Some residency programs generate profits for hospitals. Hospitals value residency programs enough that they self-finance 12,000 residency positions.[161]

The current number of first year residency positions (30,232) exceeds the number of American medical school graduates (18,818 allopathic graduates and 4,617 osteopathic graduates) applying for them. The balance of positions are largely filled with foreign-born or U.S. citizen graduates of foreign medical schools, or in some cases, they go unfilled.[162]

Physician Supply in the United States

There is likely an inadequate supply of physicians in the United States. Moreover, there is an uneven distribution in physician supply (both geographically and across specialties), GME training slots, and in government support for GME.[163] Yet there is inadequate information to assess overall physician needs, and for different specialties in different geographic areas.[164] GME slots are currently determined by the industry accrediting bodies and the hospitals or medical schools themselves. Similarly, medical school positions are accredited by physician industry groups.

AMERICAN OVERSIGHT

These findings suggest several areas for policy research and potential change. First, as requested in the FY 2019 President's Budget, the federal government should more efficiently spend taxpayer resources by streamlining federal Health and Human Services spending on graduate medical education into a single graduate medical education grant program. Under this Budget proposal, total funds available for graduate medical education in FY 2019 would equal the sum of Medicare's 2016 payments for DGME and IME, Medicaid's 2016 payments for GME, and the Children's Hospital GME Payment Program, adjusted for inflation. This amount would increase annually with inflation as measured by the consumer price index for all urban consumers (CPI-U) minus one percentage point per year. The new grant program would be funded out of the Treasury and jointly operated by the administrators of CMS and HRSA. This proposal is estimated to save $48.1 billion between 2019 and 2028. The Budget proposal also provides the HHS Secretary with the authority to modify amounts distributed to hospitals based on the proportion of residents training in priority specialties or programs and based on other criteria identified by the Secretary, including addressing healthcare professional shortages and educational priorities. This flexibility will allow the federal government to more effectively target funding to those hospitals that are committed to building a strong medical workforce and to addressing medically underserved communities and health professional shortages.

Recommendations: Streamline Federal Funding of Medical Education

- As proposed in the FY 2019 President's Budget, the federal government should streamline federal Health and Human Services spending on graduate medical education into a single graduate medical education grant program. The budget proposal also provides the Secretary with the authority to modify amounts distributed to hospitals based on the proportion of residents training in priority specialties or programs and based on other criteria identified by the Secretary, including addressing healthcare professional shortages and educational priorities.
- The administration should continue the work done by the HRSA's National Center for Health Workforce Analysis, which studies U. S. physician supply needs across specialties and geographic areas. HRSA should launch a study that will also assess:
    - The administration's workforce development programs.
    - Gaps between existing programs and future workforce needs and identifying actions needed to address them.

Healthcare Provider Markets

Certificate of Need (CON) Requirements

State "certificate-of-need" ("CON") laws require healthcare providers to obtain permission from a state (or state-authorized) agency to construct new healthcare facilities, expand existing ones, or offer certain healthcare services.[165] States initially adopted CON laws to further laudable policy goals, including cost control and access to care. The evidence to date, however, suggests that CON laws are frequently costly barriers to entry for healthcare providers rather than successful tools for controlling costs or improving healthcare quality. Based on that evidence and their enforcement experience, the two federal antitrust agencies–the FTC and the Antitrust Division of the Justice Department—have long suggested that states should repeal or retrench their CON laws.[166]

Most states adopted CON programs in response to a since-repealed federal mandate, the National Health Planning and Resources Development Act of 1974,[167] which offered the states powerful incentives to adopt CON programs.[168] CON programs were supposed to control healthcare costs and mitigate incentives for an arms race in healthcare spending fostered by cost-based healthcare reimbursement systems.[169] Although both public and commercial reimbursement systems have changed significantly over time, many states have maintained substantial CON requirements. Congress repealed the 1974 Development Act in 1986, and a number of states have since repealed or revised their CON laws.[170]

Accessed September 26, 2018 (providing a table an interactive map representing some of the variation in state CON laws.).

AMERICAN OVERSIGHT

Fifteen states have eliminated their CON requirements altogether.[171] Although most other states maintain CON programs,[172] some remaining CON laws address only specific types of healthcare facilities (such as hospitals or nursing homes),[173] exempt certain types of healthcare facilities,[174] or apply only to facilities of a certain size.[175] Some CON laws are subject to sunset provisions.[176]

CON proponents continue to raise cost control as a justification for CON programs; they also argue that CON laws improve the quality of healthcare services and assure access to healthcare services by disadvantaged citizens. However, available evidence suggests that CON laws have failed to produce cost savings, higher quality healthcare, or greater access to care, whether in underserved communities or in underserved areas.

CON Laws Impose Costs, Including Loss of Beneficial Competition

Empirical evidence on competition in healthcare markets generally demonstrates that consumers benefit from lower prices when provider markets are more competitive.[177] Scrutiny of hospital mergers by the FTC and the Antitrust Division has been particularly useful in understanding concentrated provider markets, and retrospective studies of the effects of provider consolidation by agency staff and independent scholars suggest that

AMERICAN OVERSIGHT

"increases in hospital market concentration lead to increases in the price of hospital care."[178]

FTC and Antitrust Division staff have examined the competitive impact of CON laws for several decades. For example, staff from the FTC's Bureau of Economics conducted several studies of CON laws in the late 1980s, both before and after repeal of the federal law that had encouraged their adoption.[179] In addition, the agencies jointly conducted 27 days of hearings on healthcare competition matters in 2003, receiving testimony about CON laws and market entry, hospital provider concentration, and other pertinent aspects of healthcare competition;[180] they jointly released a substantial report on healthcare competition issues, including those related to CON laws, in 2004.[181] Finally, through their competition advocacy programs, the Agencies have reviewed numerous state CON laws and encouraged states to consider the competitive impact of those laws.[182]

AMERICAN OVERSIGHT

The best empirical evidence suggests that greater competition incentivizes providers to become more efficient. Recent work shows that hospitals faced with a more competitive environment have better management practices.[183] Consistent with this is evidence suggesting that repealing or narrowing CON laws can reduce the per-patient cost of healthcare.[184] Studies have found no empirical evidence that CON laws have restricted "over-investment."[185] However, CON laws can restrict investments that would benefit consumers and lower costs in the long term and are likely to increase, rather than constrain, healthcare costs. This is because CON regimes impose the legal and regulatory costs of preparing an application, then seeing that application through an often-lengthy approval process and potential third-party challenges.[186] As a result, healthcare providers must spend resources on administrative processes rather than on constructing healthcare facilities or

AMERICAN OVERSIGHT

delivering healthcare services. In addition, those regulatory costs can be a barrier to entry, discouraging some would-be providers from entering certain healthcare markets, and discouraging some incumbent providers from expanding or innovating in ways that would make business sense but for the costs of the CON system. Even for providers willing to bear those regulatory costs, CON requirements may be hard barriers to entry if their applications are denied. Hence, CON laws can diminish the supply of healthcare facilities and services while exacerbating concentration in provider markets.

CON Laws Have Not Improved Healthcare Quality or Access

CON proponents have argued that CON laws support policy goals relating to healthcare quality and access. However, CON laws would be an indirect—and likely inefficient—way to achieve these goals. Moreover, the evidence suggests CON laws are ineffective. There is no compelling evidence suggesting that CON laws improve quality or access, inefficiently or otherwise.

Quality-based arguments on behalf of CON laws typically refer to evidence on volume/outcome relationships (i.e., the extent to which quality of care is related to how often a particular healthcare institution or provider performs a given procedure), rather than direct evidence of CON laws' impact on care quality. Even this volume/outcome evidence is mixed. Pronounced effects may be limited to certain relatively complicated procedures;[187] and even there, where certain studies have shown a volume/outcome relationship (e.g., coronary artery bypass graft surgery[188]), evidence suggests that volume effects may not offset CON laws' larger negative impact on quality.[189] Studies that directly analyze the impact of changes in CON laws on health outcomes provide a more complete picture; the weight of that research has found that repealing or narrowing CON laws is generally unlikely to lower quality of care, and may improve the quality of certain types of care.[190] Moreover, CON programs can tend to foster or sustain undue provider

---

[187] See Halm EA, Lee C, Chassin MR. Is volume related to outcome in health care? A systematic review and methodological critique of the literature. *Ann Intern Med*. 2002 Sep 17;137(6):511, 514. ("We found the most consistent and striking differences in mortality rates between high- and low-volume providers for several high-risk procedures and conditions, including pancreatic cancer, esophageal cancer, abdominal aortic aneurysms, pediatric cardiac problems, and treatment of AIDS. The magnitude of volume-outcome relationships for more common procedures, such as [coronary artery bypass graft surgery], coronary angioplasty, and carotid endarterectomy, for which selective referral and regionalization policies have been proposed, was much more modest.")

AMERICAN OVERSIGHT

concentration; and additional empirical evidence suggests that, "[a]t least for some procedures, hospital concentration reduces quality."[191]

Evidence also fails to support the claim that CON programs would increase access to care for the indigent, or in medically underserved areas. The general argument has been that CON laws, by limiting competition, allow incumbent healthcare providers to earn greater profits—by charging higher prices and preserving their volume of lucrative procedures—than they would earn in a competitive environment. It is posited that those extra profits will be used to cross-subsidize care for the underserved. There are inherent weaknesses in this supposition. First, the charity-care rationale is at odds with the cost-control rationale. The notion that CON-protected incumbents would use their market power and profits to cross-subsidize charity care presumes that those providers will charge supra-competitive prices for non-charity care. Such supra-competitive pricing might harm many healthcare consumers, including low-income or under-insured patients who are ineligible for charity care. Second, because CON programs impede entry, expansion, and innovation, they can impede access to care for all patients, including low-income patients. Finally, the evidence does not show that CON laws promote charity care. Research suggests that safety-net hospitals are no stronger financially in CON states than in non-CON states.[192] There is also empirical evidence contradicting the notion that dominant providers use their market power to cross-subsidize charity care, including an empirical study of the relationship between competition and charity care that found a "complete lack of support for the 'cross-subsidization hypothesis.'"[193]

CON Laws Can Foster Competition Problems Missed By Benefit/Cost Analysis

Not only may CON laws impose costly barriers to provider entry, but by interfering with market forces that normally determine the supply of facilities and services, they can

AMERICAN OVERSIGHT

suppress supply, misallocate resources, and shield incumbent healthcare providers from competition from new entrants.[194] In addition, incumbent firms may use CON laws to thwart or delay entry or expansion by new or existing competitors.[195] CON programs have also facilitated anti-competitive agreements among competitors. For example, in 2006, a hospital in Charleston, West Virginia, used the threat of objection during the CON process to keep a potentially competitive hospital from expanding.[196]

Finally, as illustrated by the FTC's experience in the *Phoebe Putney* case, CON laws can entrench anti-competitive mergers by limiting the government's ability to implement effective structural remedies to consummated transactions. *Phoebe Putney* involved a challenge to the merger of two hospitals in Albany, Georgia.[197] Seeking a preliminary injunction in federal court, the FTC alleged that the merger would create a monopoly of inpatient general acute care hospital services sold to commercial health plans in Albany and surrounding areas. The district court dismissed the suit, finding that the merger was protected from antitrust scrutiny by the "state action doctrine."[198] The United States Court of Appeals for the Eleventh Circuit affirmed the district court's dismissal on state action grounds, although finding that "the joint operation of [the two hospitals] would substantially lessen competition or tend to create, if not create, a monopoly."[199] The Supreme Court reversed this decision, unanimously holding that "state action immunity" did not apply.[200] However, the merging parties already had consummated the transaction while appeals were pending, and Georgia's CON regime precluded structural relief for the anticompetitive merger.[201] As the Commission explained, "[W]hile [divestiture] would

AMERICAN OVERSIGHT

have been the most appropriate and effective remedy to restore the lost competition in Albany and the surrounding six-county area from this merger to monopoly, Georgia's [CON] laws and regulations unfortunately render a divestiture in this case virtually impossible."[202]

Certificates of Public Advantage

Certificate-of-public-advantage (COPA) regulations allow healthcare providers to enter into cooperative agreements that might otherwise be subject to antitrust scrutiny and can cover a wide range of provider collaboration and merger activity.[203] COPA schemes displace competition in favor of state regulatory oversight and may, under the state action doctrine, immunize provider activity for conduct that might otherwise violate federal antitrust laws.[204] Typically, states have the authority to approve COPA proposals if they determine that the likely benefits of the cooperative agreement outweigh any disadvantages attributable to a reduction in competition.[205] In practical terms, COPAs significantly limit the ability of antitrust enforcement agencies to challenge collaborations and mergers that create or enhance provider market power, and therefore are likely to harm consumers.[206]

---

[202] *Statement of the Federal Trade Commission*, at 1, *In the Matter of Phoebe Putney Health Sys., Inc.*, Dkt. No. 9348, (March 31, 2015):1. https://www.ftc.gov/system/files/documents/public_statements/634181/150331phoebeputneycommstmt.pdf. Accessed August 23, 2018.

[203] Several states have passed COPA statutes since the 1990s, and there appears to be a recent resurgence in the implementation of COPA regulations. The following hospital mergers have been permitted to proceed pursuant to COPA oversight: HealthSpan Hospital System (Minnesota, 1994); Mission Health System (North Carolina, 1995); Benefis Health System (Montana, 1996); Palmetto Health System (South Carolina, 1998); Cabell Huntington Hospital/St. Mary's Medical Center (West Virginia, 2016); and Mountain States Health Alliance/Wellmont Health System (Tennessee and Virginia, 2017). In addition, the Staten Island Performing Provider System in New York recently received a COPA for certain collaborative activities (2016). See COPA Application #COPA-SIPPS Staten Island PPS. New York Department of Health, Public Health and Health Planning Council. https://www.health.ny.gov/facilities/public_health_and_health_planning_council/meetings/2016-11-17/docs/copa-sipps_staten_island_pps.pdf. Accessed August 23, 2018.

[204] To obtain antitrust immunity for conduct that might otherwise violate the federal antitrust laws, the state action doctrine requires both a clear articulation of the state's intent to displace competition in favor of regulation and that the state provide active supervision over the regulatory scheme or body. *See N.C. State Bd. of Dental Exam'rs v. FTC*, 135 S. Ct. 1101, 1114 (2015); *FTC v. Phoebe Putney Health Sys., Inc.*, 133 S. Ct. 1003, 1013 (2013).

[205] Benefits typically considered by the states include cost efficiencies, quality improvements, population health improvements, preservation of hospital facilities and resources, and increased patient access to healthcare services. Disadvantages typically considered by the states include price increases, an inability of health plans to negotiate reasonable contract terms with providers, and reduced quality and access for healthcare services attributable to a reduction in competition.

[206] For example, the Federal Trade Commission recently dismissed an administrative complaint filed in the matter of Cabell Huntington Hospital's proposed acquisition of St. Mary's Medical Center, after the West Virginia state legislature passed a COPA statute intended to shield the transaction from an antitrust challenge, and the West Virginia Health Care Authority approved the hospitals' COPA application. See Statement of the Federal Trade Commission In the Matter of Cabell Huntington Hospital, Inc., Dkt. No. 9366 (Jul. 6, 2016). https://www.ftc.gov/system/files/documents/public_statements/969783/160706cabellcommstmt.pdf. Accessed September 26, 2018.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-005995

Moreover, COPA review and oversight frequently are subject to the influence of special interests through state political processes.

As a condition for COPA approval, states often impose terms and conditions on the COPA recipient intended to mitigate the potential for anti-competitive harms. Such regimes may include rate regulation, prohibitions on certain contracting practices, and commitments to improve quality or return cost savings to the local community. These types of regulatory conditions are often difficult to implement and monitor and may not accomplish intended goals. In addition, some states that have approved COPA schemes have later repealed or revised the COPA statutes allowing them, effectively terminating the state regulatory oversight that was supposed to constrain the exercise of market power and potentially empowering an unrestrained monopolist.[207] For these reasons, the FTC has raised concerns that COPAs may create or enhance provider market power without offering sufficient mechanisms for mitigating potential harms to competition and consumers.[208]

As discussed in Section 1, compelling empirical research suggests that market-based competition among healthcare providers yields positive results for consumers such as reduced prices and improved quality of care. Conversely, there is limited empirical research regarding the impact of COPA regulations. For this reason, FTC staff are currently

---

[207] In 2015, the North Carolina legislature repealed the state's COPA statute, leaving no effective constraint on Mission Health System, which had operated under a COPA since 1995. See S.B. 698, Gen. Assemb., 2015-16 Session, Session Law 2015-288 (N.C. 2015), http://www.ncleg.net/Sessions/2015/Bills/Senate/PDF/S698v5.pdf. assessing the potential benefits and disadvantages of COPAs and recently issued a notice requesting empirical research and public comments on these issues.[209]

The antitrust laws are intended to achieve the goals of reduced prices, improved quality, and greater innovation and access for healthcare services and not prevent procompetitive provider collaborations that would generate efficiencies and benefit consumers.[210] COPAs that immunize otherwise anti-competitive collaborations and mergers from antitrust scrutiny pose a substantial risk of consumer harm.

Recommendations: Repeal or Scale Back CON and COPA Requirements

- States should consider repeal of Certificate of Need (CON) statutes or, at a minimum, significantly scale back the scope of their CON regimes, for example by ensuring that competitors of CON applicants cannot weigh in on these applications.
- The FTC and its staff should make appropriate policy recommendations after completing ongoing research on the benefits and disadvantages of CON and COPA statutes and regimes.
- States should discontinue the use of COPAs to shield anti-competitive provider collaborations and mergers from antitrust scrutiny in the absence of any clear evidence that these regulatory schemes produce better results than market-based competition.

Nonprofit Exemption from Federal Trade Commission Jurisdiction

Currently, the FTC Act limits the FTC's jurisdiction over nonprofits. The FTC Act applies to "persons, partnerships, or corporations,"[211] and the act defines "corporation" as an entity that "is organized to carry on business for its own profit or that of its members."[212] In healthcare provider markets, where the FTC has particular expertise, the inability to regulate conduct by various nonprofit entities has prevented the agency from taking action

AMERICAN OVERSIGHT

against potentially anti-competitive behavior of nonprofits engaged in business.[213] Economic research suggests that antitrust law and policy could yield significant efficiency gains for nonprofit firms; therefore, the promotion of competition for both nonprofit and for-profit organizations would yield significant social value.[214] The FTC has jurisdiction over nonprofit entities for purposes of the Clayton Act, most notably Section 7, which prohibits mergers or acquisitions where "the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly."[215] The FTC has accordingly challenged a number of healthcare mergers involving a nonprofit entity,[216] and courts generally recognize that the nonprofit status of a healthcare provider does not mitigate the potential for anti-competitive harm arising from the merger.[217]

Nonetheless, the jurisdictional limitation contained in the FTC Act creates an arbitrary and inefficient burden on the FTC's ability to enforce the antitrust laws to prevent anti-competitive conduct by certain nonprofit entities. For example, nonprofit healthcare entities may structure an affiliation that has the economic effect of a merger but is technically an agreement between competitors—thus subject to Section one of the Sherman Act rather than a merger subject to the Clayton Act. Similarly, while investigating a merger involving nonprofit healthcare providers, FTC staff may discover an anti-competitive agreement subject to the Sherman Act. In both instances, because the FTC's ability to enforce the Sherman Act through the FTC Act is limited to for-profit corporations, the FTC would have to refer these cases to the Antitrust Division at Justice, which has direct authority to enforce the Sherman Act without the limitations related to nonprofit

---

[213] For example, the Commission generally cannot challenge anti-competitive conduct, such as collusive behavior, by nonprofit hospitals. In three past enforcement actions, the Commission alleged that groups of physicians and hospitals had participated in unlawful price-fixing arrangements but was able to sue only the physicians and a for-profit hospital. See Piedmont Health Alliance.138 F.T.C. 675 (2004) (consent order), https://www.ftc.gov/enforcement/cases-proceedings/0210119i/piedmont-health-alliance-inc-et-al-matter. AMERICAN OVERSIGHT

entities.218 This referral process serves no public interest objective, but prevents the federal government from making the best use of the FTC's valuable institutional knowledge and experience. Removing the nonprofit limitation from the FTC Act would streamline the competition investigation and enforcement process.

Recommendations: Amend Federal Trade Commission (FTC) Jurisdiction Over Nonprofits

- Congress should amend the Federal Trade Commission Act to extend FTC's jurisdiction to nonprofit healthcare entities to prevent unfair methods of competition.

Employment Agreement Non-Compete Clauses

Non-compete clauses were first found to be anti-competitive in 1414.[219] Legal scholars suggest that the point of these clauses was "shoring up the crumbling values of the medieval economic system against enterprising master craftsmen," aka entrepreneurs. These clauses can have dramatic economic consequences: California's public policy against enforcement of non-compete clauses, for example, is credited with fostering Silicon's Valley's rapid growth and innovation, outpacing the rival high-tech district around Boston.[220]

In the healthcare industry, some hospitals and physician groups continue to use these restrictive covenants to limit providers from practicing, typically in a certain geographical area for a given period after the provider leaves employment of the contracting hospital or physician group.[221] A survey of physicians found that roughly 45 percent of physicians in group practices were bound by non-compete agreements.[222] The AMA suggests that these contracts may disrupt competition and the continuity of care, and could constrain a patient's choice of provider. However, recent empirical analysis found evidence consistent with these agreements being used to prevent patients from being poached by departing doctors.[223]

AMERICAN OVERSIGHT

At least one case has viewed a non-compete clause in the healthcare industry with skepticism. The Tennessee Supreme Court opined on a non-compete clause between a physician and a private medical practice that had employed him in the 2005 case Murfreesboro Medical Clinic (MMC) v. David Udom.[224] Here, the court ruled that certain provisions in non-compete clauses can be harmful to public policy and therefore unenforceable. The court indicated that the non-compete clause in question had been too broad and was not based on the extent to which MMC would compete with a provider (in this case, David Udom).

While there is not a large body of case law on non-compete clauses in the healthcare industry, cases in other industries also suggest that non-compete clauses that are unreasonable in scope and duration may not be enforceable. The enforceability of non-compete clauses, including those clauses and contractual provisions related to healthcare, is typically an issue of state law.

Legal experts have suggested that a non-compete clause may be defensible where it is reasonable in scope and duration and necessary to protect against a former employee who had access to trade secret information or closely-guarded customer relationships injuring a business by utilizing that information or those customer relationships upon leaving.[225,226] Employers that invest in substantial training for their provider employees might also seek to protect the investment that they make in their human capital. However, it is not clear that healthcare industry non-compete clauses are always proportionate to or even based on these concerns. In fact, other experts suggest that these clauses reduce bargaining power for employees because they reduce worker mobility.[227]

Various reports on non-compete clauses have also suggested that they are overly burdensome and restrictive on providers. Further scrutiny of these and other restrictive covenants is warranted, particularly where they impede patient access to care and limit the supply of providers. By suppressing competition, these clauses may inflate healthcare prices, elevating patient and federal spending on healthcare goods and services.

Recommendations: Scrutinize Non-Compete Clauses and Other Restrictive Covenants

- States should scrutinize restrictive covenants such as non-compete clauses, particularly their impact on patient access to care and on the supply of providers.

Health Insurance Markets

"Any-Willing-Provider" (AWP) Laws

"Any-willing-provider" (AWP) laws, like related "freedom of choice" (FOC) laws, are restrictions on certain types of selective contracting practices by health plans or pharmacy benefit plans. AWP laws require plan sponsors—or sometimes intermediaries, such as pharmacy benefit managers (PBMs)—to contract with any healthcare provider willing to meet the terms of participation in that plan's network agreements.[228] FOC laws permit plan beneficiaries (or enrollees) to choose their providers, regardless of whether a chosen provider is part of their plan's network.[229] Research suggests that AWP (and, perhaps to a lesser extent, FOC) laws can suppress pro-competitive forms of health and pharmacy benefit plan contracting.[230]

Basic economic theory suggests that a buyer can obtain a negotiating advantage by contracting selectively with a subset of providers, or at least having a credible option to do so, because providers will compete aggressively to be included. For that reason, health plans and pharmacy benefit plans often seek to employ some form of selective contracting, entering into agreements with limited networks of providers. Commonly, plans also offer tiered benefits to incent the use of lower-cost (or otherwise more efficient) providers,

[229] *McRand, Inc. v. Van Beelen*, 138 Ill. App.3d 1045 (1985). https://www.leagle.com/decision/19851183138illapp3d104511046. Accessed August 24, 2018.

[230] State AWP (and FOC) laws vary substantially in scope – e.g., applying to some types of plans but not others, or some types of providers but not others. They also vary in stringency and may impose greater or lesser restraints, via varied enforcement mechanisms, on plan contracting and benefits design. Vita MG, Regulatory restrictions on selective contracting: an empirical analysis of 'any-willing-provider' regulations. *J Health Econ*. 2011;20:959; Klick J, Wright JD. The effect of any willing provider and freedom of choice laws on healthcare expenditures. *Am Law Econ Rev*. 2015;17:198-200. For example, some states have adopted AWP laws for pharmacy services. See, e.g., Carroll A, Ambrose JM. Any-willing-provider laws: their financial effect on HMOs. *J Health Polit Policy Law*. 2002;27:928. Depending on these variables, AWP and FOC laws may have greater or lesser economic impact. See, e.g., Vita MG, Regulatory restrictions on selective contracting: an empirical analysis of "any-willing-provider" regulations. *J Health Econ*. 2011;20:959.

AMERICAN OVERSIGHT

services, or prescription drugs by plan beneficiaries.[231] Incentives to use a preferred tier may include (a) lower copayments, (b) lower co-insurance percentages, or (c) lower deductibles.[232] In effect, such tools differentiate the out-of-pocket prices associated with different providers, services, or drugs—tier by tier—for the beneficiaries of plans that employ tiering.[233]

Selective contracting and tiered benefits are not always efficiency-enhancing or procompetitive. They can also limit consumer choice. To guard against such concerns and potential conflicts of interest,[234] some states have enacted AWP or FOC laws, but, as will be explained below, these rules raise their own set of issues.

Medicare includes a type of AWP restriction—an "any willing pharmacy" provision—while also permitting selective contracting and tiered benefits. The Medicare Prescription Drug, Improvement, and Modernization Act of 2003, Pub. L. 173, 117 Stat. 2066, requires that Medicare part D plans "permit the participation of any pharmacy that meets the terms and conditions under the plan," but permits them to, "notwithstanding… [that requirement] reduce coinsurance or copayments for part D eligible individuals enrolled in the plan below the level otherwise required." That is, part D plans cannot wholly exclude participation by "willing" pharmacies but can engage in tiering—a form of selective contracting (and selective benefits).[235] In 2018, the Centers for Medicare and Medicaid Services clarified the Part D AWP rules and their expectations regarding statutorily required AWP provisions, including the ability of plans to maintain preferred networks. CMS's intent was "to ensure that Part D plan sponsors could continue to develop and maintain preferred networks while complying with the any willing pharmacy requirement, which applies to standard terms and conditions."[236]

Tiered hospital networks. *Health Aff.* 2003;147:W3. Coverage for the non-preferred tier is therefore lower – in some limiting cases, zero.

[232] See Robinson JC. Applying value-based insurance design to high-cost health services. *Health Aff.* 2010;29(11):2010.

[233] Often—not always—drug benefits are designed to encourage substitution of lower-cost generic versions of branded products. See Robinson JC. Applying value-based insurance design to high-cost health services. *Health Aff.* 2010;29(11):2011.

[234] Beneficiaries or subscribers might generally prefer more choice rather than less, all other things being equal. Providers might also have more self-interested reasons for favoring AWP or FOC laws to the extent that they suffer financially when excluded from preferred tiers of provider networks and/or to the extent that competitive bidding can otherwise diminish profits, say, in significantly concentrated provider markets. See, e.g., Vita MG, Regulatory restrictions on selective contracting: an empirical analysis of "any-willing-provider" regulations. *J Health Econ.* 2011;20:956.

AMERICAN OVERSIGHT

AWP Laws are Costly Restraints on Plan Contracting

Although limited or "narrow" networks may limit patient choice and are not necessarily efficiency-enhancing or procompetitive, empirical evidence suggests that AWP and FOC laws broadening networks can make it more difficult for health insurers, health plans, or PBMs to negotiate discounts from providers, and that these laws tend to result in higher costs. Evidence also suggests that selective contracting—which AWP laws constrain—tends to lower healthcare costs and expenditures.[237]

Empirical Evidence on AWP

Several studies have analyzed state-by-state policy variation to measure the effects of AWP laws, finding that such laws undercut negotiating strategies whereby providers compete for inclusion in a network or a preferred tier. For example, one recent study examined state-level per capita health expenditure data from 1991-2009 and associated

AWP laws with approximately 5 percent higher per-capita drug expenditures.[238] A 2009 study similarly examined variations in state AWP laws applicable to drug purchases. It found that AWP states have higher prescription drug spending than states without AWP laws. The conclusion was the same, even when using different econometric techniques to control for variations across the states, such as differences in demographics, market structure, and regulatory environment.[239] An earlier study, looking at both the imposition and relative stringency of health plan AWP laws, found that AWP laws generally undermine the ability of managed care organizations to lower healthcare spending by extracting discounts in return for inclusion in a limited network. Specifically, the study found that per capita total healthcare expenditures are higher in states with relatively strong AWP laws, observing an impact on both hospital and physician expenditures.[240]

---

[237] The limited literature on this issue tends to look at the effect of any-willing-provider laws on total spending, instead of prices. Because the quantity of healthcare is generally measured to have a negative, though small, relationship with healthcare prices, these studies likely understate the effect of AWP laws on prices. See, e.g., *Fed. Trade Comm'n Staff Comment to the Ctrs. for Medicare & Medicaid Servs.*, 8, n.15 (March 2014). https://www.ftc.gov/system/files/documents/advocacy_documents/federal-trade-commission-staff-comment-centers-medicare-medicaid-services-regarding-proposed-rule/140310cmscomment.pdf. Accessed August 24, 2018.

[238] Klick J, Wright JD. The effect of any-willing-provider and freedom-of-choice laws on healthcare expenditures. *Am Law Econ Rev*. 2015;17:204-05. Klick & Wright find smaller, and not statistically significant effects associated with FOC laws. That may be due, they suggest, to the commonly weaker restraints provided by FOC laws that, in effect, permit beneficiaries to leave the bounds of a network by forgoing the savings gleaned by selective contracting on an *ad hoc* basis, doing less general damage to selective contracting. *Ibid.*, at 194.

[240] Vita M. Regulatory restrictions on selective contracting: an empirical analysis of "any-willing-provider" regulations. *J Health Econ*. 2001;20:955, 960-66. Panel data show, e.g., that states with highly restrictive AWP/FOC laws spent approximately 2 percent more on healthcare than states without such policies.

AMERICAN OVERSIGHT

Empirical research on these laws has focused on the impacts on costs, not prices.[241] A 2005 Maryland study, however, examined the impact of AWP/FOC types of restrictions on mail-order provision of, for example, maintenance drugs. The Maryland report estimated that greater use of mail-order maintenance drugs—enabled by liberalizing Maryland insurance law—would save Maryland consumers 2-to-6 percent on retail drug purchases overall, with 5-to-10 percent savings for third-party carriers.[242]

Empirical Evidence on Selective Contracting

Related research has examined the effect of selective contracting, more generally, in connection with healthcare provider markets. For example, a study of limited network health plans in Massachusetts found that large premium differences between broad and limited network plans were driven by real reductions in spending by those beneficiaries who switched from broad to narrow network plans; the study did not find reduced access to care or any adverse impact on beneficiary health.[243] An earlier study of Massachusetts health plans, based on different data sources, also found savings associated with selective contracting.[244] Another study concluded that Connecticut health plans' ability to negotiate discounts with hospitals increased with a plan's willingness and/or ability to channel patients to selected hospitals, consistent with the predictions of a theoretical model introduced in the same study.[245] These studies show that buyers in health insurance markets can and do use selective contracting, harnessing the benefits of competition to negotiate lower prices.

More recently, CMS released two studies analyzing prescription drug data from March 2012 for Medicare Part D plans.[246] In both studies, CMS found substantial savings on average associated with preferred pharmacies and mail-order pharmacies. It has been noted that those CMS studies do not control for product mix, which can vary substantially across

AMERICAN OVERSIGHT

types of pharmacies.[247] Acknowledging that limitation, the findings are generally consistent with the independent research on selective contracting discussed above.[248]

Recommendations: Scrutinize Any-Willing-Provider (AWP) Laws

- Federal and state policymakers should carefully scrutinize the impact on competition and consumers of AWP laws, rules, and proposals, along with other restraints on network formation and selective contracting.

Network Adequacy Requirements

Due to increased federal regulation of insurance through the ACA, premiums and deductibles have soared, forcing insurers to narrow provider networks to temper those prices. In 2017, 9 percent of firms with at least 200 employees offered their employees a health plan with a narrow network that included fewer providers than a typical Health Maintenance Organization,[249] an increase of 2 percentage points from 2016.[250] Among ACA-compliant individual market health plans offered on exchanges in 2016, nearly one-third had fewer than 25 percent of physicians within their service area participating as in-network providers.[251]

Narrow network plans bolster competition among hospitals and physician groups vying to be included in networks to secure patient volume. Furthermore, narrow network plans offer lower premiums relative to broader network plans.[252] This feature is particularly beneficial to lower-income consumers, who tend to be extremely price sensitive,[253] suggesting they

are more interested in the size of the premium relative to the breadth of the provider network.

A potential concern regarding narrow networks is that enrollees may not have adequate choice or access to providers. Networks may lack the capacity to serve all enrollees within a health plan or lack specific specialists, leading some enrollees with only the option of more expensive care from out-of-network providers.[254] These issues pertain to private insurance (group and individual markets) as well as Medicaid managed care and Medicare Advantage plans, where insurers generally contract with a limited number of providers. This discussion applies generally to issues across these markets except where noted.

Regulations, primarily through state authority, have attempted to achieve network adequacy by requiring health plans to show sufficient capacity and access, often defined by quantitative standards (e.g., physician-to-enrollee ratios, distance, and wait times). For example, CMS requires states to develop standards for travel time and distance from enrollees' homes to providers to regulate Medicaid managed care plans. In private markets, states are primarily responsible for the enforcement of network adequacy standards. CMS's 2017 market stabilization final rule relieved burden on issuers by relying on states to regulate network adequacy for qualified health plans in the individual and small-group markets. Across states, there is substantial variation in the number and types of network adequacy measures used.

Impact on Competition and Choice

Measures used to determine network adequacy may not align with a network's ability to meet enrollees' preferences, may discourage innovative ways to meet those preferences, and may ultimately limit consumers' choices. For example, using proximity measures to regulate network adequacy may discourage insurers and providers from developing telemedicine capabilities[255] or utilizing regional or national centers of excellence outside the residency area.[256] Relying on current measures may also restrict entry into the insurance market by insurers with innovative plan designs. For example, vertically integrated health

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006006

systems may be less likely to enter a market if network adequacy standards would force them to compete with other providers.[257]

Inadequate or erroneous provider directories in network plans may also discourage providers from competing on price or quality to attract patients. If consumers cannot accurately identify in-network providers, or compare networks of competing insurers, it is more difficult for them to make informed choices. In addition, without proper information, enrollees may be more likely to unknowingly receive care out of network, leading to instances of "surprise billing." Of patients aged 18-64 who receive out-of-network care, nearly 70 percent are unaware that the provider is outside their plan's network prior to receiving care.[258]

While CMS requires Medicare Advantage, Medicaid managed-care plans, and qualified health plans in the exchange to update and provide consumer-accessible provider directories, ensuring that enrollees receive accurate information in real-time may still be difficult. In a review of provider locations from online directories, CMS found errors in over half of the locations for Medicare Advantage providers, with 33 percent of errors due to the provider not working at or not accepting the plan at the listed location (CMS 2018).[259]

The provision of accurate and timely information would also bolster competition. To facilitate more competition and innovation, network adequacy standards should place greater emphasis on network outcomes while giving states flexibility to meet their specific needs. In 2015, the National Association of Insurance Commissioners opposed blanket federal network adequacy requirements in its Health Benefit Plan Network Access and Adequacy Model Act, especially as strict quantitative measure are unlikely to meet varying needs across states. Current quantitative standards could be less restrictive and used primarily as minimum thresholds to determine whether an insurer can enter a market or when a network has actually failed an enrollee.[260] These standards should take into account alternative network designs and be used alongside external review by physicians when networks fail to provide adequate access to enrollees.[261] Insurers could be allowed to have more flexibility with provider contractors, such as "spot contracts," to fill in network gaps as needed.[262]

Recommendations: Loosen Network Adequacy Requirements

- The administration should continue to provide flexible network adequacy standards for Medicare Advantage and other federally sponsored programs and avoid stringent requirements that are not conducive to innovation and modern medicine and that do not allow states flexibility to meet their specific needs.
- Similarly, states should consider loosening network adequacy standards and avoid stringent requirements.

The ACA Rules Limit Choice

The Affordable Care Act introduced a number of mandates and burdensome requirements that significantly reduced choice and competition in insurance markets and caused premiums, particularly in the individual market, to soar. This occurred to a significant extent because government rules and price controls on health insurance premiums, designed to assist some people with higher anticipated health expenditures, inhibited the application of actuarially determined pricing and created an adverse selection spiral in the individual market. These requirements also produced a significant reduction in coverage options for most consumers. In addition to reducing consumer choice and competition between insurers, the higher administrative costs associated with the ACA mandates disproportionately hurt smaller employers, in part because smaller employers were unable to spread these costs as broadly as larger employers and in part because the large-group market is not bound by all of the ACA's mandates. Therefore, as a general matter, smaller employers that continued to offer coverage were forced to disproportionately raise premium contributions paid by covered workers, making them less competitive with larger employers and with other smaller employers that chose not to offer health coverage to their employees.[263]

ACA's Harmful Insurance Rules

The ACA forces insurers offering coverage in the individual and small-group markets to offer a mandated set of government-defined benefits.[264] This mandate reduces consumer choice and represents a hidden cost on the majority of consumers by forcing them to pay for more coverage – and the corresponding expense – than many customers would

[264] The 10 required categories are: 1) ambulatory patient services, 2) emergency services, 3) hospitalization, 4) maternity and newborn care, 5) mental health and substance use disorder services, 6) prescription drugs, 7) rehabilitative and habilitative services and devices, 8) laboratory services, 9) preventive and wellness services and chronic disease management, and 10) pediatric services.

AMERICAN OVERSIGHT

otherwise choose to buy voluntarily in insurance packages. Excessive mandates hinder innovation in plan design and greater access to coverage; they also limit public efforts to assure affordability without substantial government subsidies. This leaves significant swathes of consumers with coverage that includes numerous items they do not want or need and contributes to pricing others out of the market, including some of the 6.5 million people who paid the penalty for not having minimum essential coverage under the ACA.[265] The ACA further restricts choice and competition through a prohibition on people over the age of 30 purchasing catastrophic insurance (unless they qualify for a hardship exemption).

The ACA also requires insurers to cover numerous preventive services without cost sharing under the premise that a government-imposed system-wide increase in "free" preventive care will lower overall healthcare costs.[266] Under the ACA, the U. S. Preventive Services Task Force (USPSTF), the Advisory Committee on Immunization Practices of the CDC, and HRSA are tasked with determining the required preventive services.[267] However, a New England Journal of Medicine study found that "sweeping statements about the cost-saving potential of prevention…are overreaching. Studies have concluded that preventing illness can in some cases save money but in other cases can add to healthcare costs."[268] Other research finds that 80 percent of preventive services add more to future expenditures than they save in healthcare costs.[269] These findings suggest that the ACA's coverage mandates, while certainly providing some benefit, increase premiums, as well as lead to unnecessary utilization. Atul Gawande, former adviser to President Bill Clinton and President Barack Obama, has warned about the risks of over-testing and over-treating.[270] Over-testing leads to problems like additional radiation exposure and stress from the abundance of false positive results, and over-treating leads to problems like medical errors and hospital-acquired infections.

The Medical Loss Ratio (MLR) is an ACA mandate requiring that insurers in the individual and small-group markets spend at least 80 percent of premiums on healthcare costs,

[266] This requirement is distinct from proposals discussed elsewhere in this report concerning the ability of high-deductible health plans (HDHPs) that enable individuals to contribute to health savings accounts (HSAs) to cover preventive services before the patient pays the full deductible if it is cost efficient for them to do so.

[267] The USPSTF is an independent, volunteer panel comprised of experts from the fields of preventive medicine and primary care. The Task Force does not consider the costs of a preventive service when determining what policies to recommend. USPSTF determines the services under Public Health Service Act (PHS Act) §2713(a)(1), while the CDC determines services under PHS Act §2713(a)(2), and HRSA determines services under PHS Act §2713(a)(3) and (4).

AMERICAN OVERSIGHT

allowing 20 percent for administrative costs and profit.[271] The MLR was intended to provide a minimum guaranty of value to customers, as companies that fail to meet this ratio are obligated to pay a rebate to their customers.[272] However, the MLR may create a perverse incentive that encourages insurance companies, particularly in the absence of competition, to increase premiums.[273] Some health policy experts also believe that the MLR regulations will harm the ability of some insurers, particularly smaller insurers, to compete, thus reducing consumer choices.[274]

A number of ACA rules have contributed to large increases in average premiums and have driven down choices in the individual and small-group markets. In 2013, the year before many of the ACA rules took effect, 395 insurers operated in the individual market.[275] By 2017, this number had fallen to 218, and 70 percent of counties (including 36 percent of U. S. residents) had no more than two insurers selling individual plans in the exchange.[276] In the exchanges in 2018, 29 percent of enrollees had only one issuer to choose from, up from 20 percent in 2017; 55 percent of enrollees had at most two insurers to choose from, up from 44 percent in 2017.[277] This problem is most pronounced in rural counties. As a result of high and rising premiums, relatively young and healthy people, particularly those in the middle-class who earn too much to qualify for a premium subsidy, have largely avoided the exchanges. Moreover, the ACA's special enrollment periods created an incentive for people to wait until they need healthcare to seek insurance in the exchanges, an incentive that has exacerbated adverse selection and led to spikes in premiums.[278] In an attempt to mitigate this problem, the Department of Health and Human Services issued an April 2017 rule aimed at significantly restricting peoples' ability to game the special enrollment periods.[279]

AMERICAN OVERSIGHT

The administration has taken two major actions to provide Americans, particularly middle-class Americans without employer-sponsored insurance, with additional and more affordable health insurance choices. In June, the Labor Department released a final rule expanding the ability of employers, including sole proprietors without common law employees, to join together to form an association health plan (AHP).[280] In August, the departments of Health and Human Services, the Treasury, and Labor released a final rule expanding the ability of consumers to purchase short-term, limited-duration insurance—much more affordable products that can better serve many consumers' needs.[281] According to the Congressional Budget Office, about 6 million Americans will benefit from these actions and enroll in these plans within a few years.[282]

Recommendations: Loosen Insurance Rules and Mandates

- The administration should continue to work with Congress to enact legislation that remedies key problems resulting from the ACA, that promotes greater choice and competition in healthcare markets, and that produces a sustainable government healthcare financing structure.
- Similarly, the administration should provide states with the maximum ability to expand healthcare choice and competition and create a sustainable financing structure.
- States should allow maximum consumer choice and competition in their healthcare markets, including through Association Health Plans and short-term limited-duration insurance.
- Congress should repeal the ACA's employer mandate consistent with the FY 2019 President's Budget.

ACA Rules Restricting Physician-Owned Hospitals Reduce Competition

The ACA placed an effective moratorium on the opening and expansion of physician-owned hospitals.[283] According to the Physician Hospitals of America, 37 planned hospitals have not been constructed, and over 30,000 planned healthcare jobs have gone uncreated

because of these ACA restrictions on physician-owned hospitals.[284] These restrictions, which were favored by the American Hospital Association, were included to address potential financial conflicts of interest with doctors referring patients to their own hospitals and concerns that physicians may be referring the healthiest patients to their own hospitals.[285] Those concerns may have been overstated, considering that many studies suggest physician-owned hospitals provider higher-quality care and that patients benefit when traditional hospitals have greater competition.

Physician-owned hospitals, furthermore, have been shown to provide patients with high-quality care. According to a study published by the Journal of the American College of Surgeons, physician-owned surgical hospitals outperform other hospitals in the Medicare value-based purchasing program.[286] More than 40 percent of physician-owned hospitals received the top 5-star rating in a 2015 release by the Centers for Medicare and Medicaid Services (CMS), compared to only 5 percent of general hospitals.[287, 288] Further, patients are 3-to-5 times less likely to experience complications at a physician-owned specialty hospital than at a general hospital.[289]

Recommendations: Replace Restrictions on Physician-Owned Hospitals

- Congress should consider repealing the ACA changes to physician self-referral law that limited physician-owned hospitals.

ACA Section 1557 (Nondiscrimination Requirements)

ACA Section 1557 has been implemented in such a way that creates a number of burdens on healthcare providers and payers. For example, current rules concerning persons with limited English proficiency require covered entities to include a notice of the right to translation services in 15 languages in nearly all "significant communications" that go to

AMERICAN OVERSIGHT

beneficiaries, enrollees, applicants, and members of the public.[290] As a result, covered entities have printed and mailed additional "tagline" sheets they are required to include in documents they frequently mail to customers such as explanations of benefits.[291] Entities have not been permitted to have online translations alone without mailing "tagline" sheets. Entities covered by the Section 1557 regulation are required to repeatedly notify a population of primarily English and Spanish speakers in multiple languages that they have a right to request translations repeatedly.

It is critical to structure anti-discrimination provisions so they are not barriers to entry that favor larger entities who can better absorb these types of costs and thereby limit competition. However, these and other new requirements imposed on the healthcare industry by the Section 1557 regulations were estimated to cost covered entities $637.5 million over the first two years.[292] This burden is especially hard for smaller entities to enact because unlike larger market players, they cannot take advantage of economies of scale by spreading the additional costs incurred over their larger enrollee population.

Recommendations: Reconsider Section 1557 of the ACA

- The administration should reconsider regulations authored under Section 1557 of the ACA to ensure they do not create undue administrative burdens and serve as unnecessary barriers to entry that inhibit competition.

Giving Americans Control over Their Healthcare Spending

The introduction to this report highlights how third-party payment distorts healthcare markets, increases spending and premiums, and reduces consumers' incentives to seek value from their healthcare decisions. Federal law currently favors third-party control and payment through the federal exclusion of employer-sponsored insurance (ESI) premiums, including employer contributions for self-insured plans, from both income and payroll taxes, the design of the Medicare and Medicaid programs, and the ACA premium tax credits. Easing restrictions on other types of arrangements available for this tax preference could put more control in the hands of consumers and could thus promote cost-conscious consumer behavior.

The primary vehicles that put more control in the hands of consumers and reduce the bias toward third-party payment are high deductible health plans (HDHPs) paired with HSAs

AMERICAN OVERSIGHT

and Health Reimbursement Arrangements (HRAs). Research demonstrates that consumer-directed health plans, such as these, can lower healthcare spending, largely through reductions in usage of outpatient care and pharmaceuticals.[293]

Benefits of Expanding Health Savings Accounts

Under tax provisions originally enacted in 2003, persons enrolled in certain HDHPs—which are generally referred to here as HSA-qualified plans— may contribute to savings accounts to pay for healthcare expenses on a tax-preferred basis. Contributions made by an individual's employer or by an individual through payroll deduction are excluded from wages for purposes of income and payroll taxes. Contributions made directly by an individual are deductible for income-tax purposes. Individuals must be enrolled in an HSA-qualified plan and generally cannot be enrolled in any health plan other than the HSA-qualified plan to be allowed to make HSA contributions. Annual HSA contributions are limited to $3,450 for persons enrolled in single coverage under an HSA-qualified plan ($6,900 for persons enrolled in family coverage) for 2018.[294] HSA-qualified plans are required to meet the following requirements[295]:

1. Minimum deductibles ($1,350 for self-only coverage or $2,700 for family coverage in 2018).
2. An annual limit on the sum of the deductible and out-of-pocket expenses ($6,550 for self-only coverage and $13,300 for family coverage).
3. The out-of-pocket expense limits do not apply to any out-of-network benefits if the plan uses a network (that is, the out-of-pocket cap applies to the deductible and cost sharing only on in-network benefits).
4. Only preventive care benefits as defined in applicable guidance[296] may be provided before the minimum deductible is met.
5. The health plan coverage must not be not limited to vision, dental, disability, workers compensation or other specified types of limited insurance coverage.

HSA funds not used to pay health expenses over the course of the year may be saved for future use, and any funds unspent when individuals turn 65 may be withdrawn for any use

AMERICAN OVERSIGHT

without penalty.[297] Thus, HSAs promote savings for later healthcare expenses, an extremely beneficial feature since healthcare expenditures tend to grow with age.

Unfortunately, many people—likely around 60 percent—who have deductibles exceeding the required minimum deductibles for HSA-qualified plans do not have HSA-qualified plans.[298] Some of the common reasons that plans are not HSA-qualified plans are because of 1) separate drug coverage based on a tiered copayment structure with no or a low deductible, 2) coverage of generic drugs before the deductible is met, or 3) coverage of primary care visits (for free or with a copayment) before the deductible is met. Thus, certain innovative insurance products, which attempt to incentivize cost-effective health treatments and health behaviors, cannot be coupled with HSAs.

For example, an insurer looking to prudently manage the costs of diabetes by offering insulin coverage before the deductible with the goal of reducing much larger future costs that might occur from mismanagement of the disease could preclude its enrollees from contributing to an HSA. Alternatively, an insurer might offer a plan with an actuarial value[299] similar to that of an HSA-qualified plan, but with a low deductible combined with higher copays. This plan could provide even more of an incentive for individuals to be as cost-conscious as the HSA-qualified plan requirements provide but would not be an HSA-qualified plan.

A third example of an arrangement that might not meet the current HSA requirements is a fixed-fee arrangement between providers and consumers, such as a direct primary care arrangement with a primary care physician where the patient pays a monthly fee in exchange for a set number of visits as well as basic treatments. Some or all fees under such fixed-fee arrangements might not be healthcare expenses under section 213(d) of the Internal Revenue Code (the "Code"). If so, HSA funds used for paying these fees could be subject to income taxes and a penalty.[300] Also, if the fixed-fee arrangement is determined to be insurance for tax purposes, the arrangement would likely be considered a health plan and preclude the individual from contributing to an HSA during the year because

---

[297] Withdrawals prior to age 65 not spent on qualified medical expenses are subject to income taxes plus a 20 percent penalty. Withdrawals after age 65 not spent on qualified medical expenses are subject to income taxes but are not subject to a penalty, resulting in tax-free return on investment, similar to the tax treatment of 401(k) retirement plans. Withdrawals for medical care are not subject to income taxes or the penalty. Therefore, HSA funds used for future medical care receive both tax-free return on investment and the exclusion of the contribution from income (and payroll taxes if contributed through an employer plan). This is like adding the tax preference for 401(k)'s to the tax exclusion for employer sponsored health benefits.

[298] Cohen RA, Martinez ME, Zammitti EP. Health insurance coverage: early release of estimates from the National Health Interview Survey. January-March 2017. National Center for Health Statistics. https://www.cdc.gov/nchs/data/nhis/earlyrelease/insur201708.pdf. Accessed August 24, 2018

[299] The actuarial value measures the fraction of covered benefits paid by the plan for a standard population. Hence, it measures the expected generosity of the plan.

[300] Internal Revenue Code §§ 223(f)(1), (2) and (4).

AMERICAN OVERSIGHT

individuals who have a health plan in addition to an HSA-qualified plan cannot contribute to an HSA.[301]

These constraints on HSA-qualified plans and the requirement that prevents an HSA contributor from having any health plan other than an HSA-qualified plan, limit the popularity of HSAs, reduce choice, and potentially increase healthcare spending as people eschew HSA-qualified plans and instead choose plans with greater third-party payment. An alternative standard for determining HSA-qualified plans would allow individuals with certain cost-conscious plan features to benefit from HSAs.

One such proposal would be to allow anyone enrolled in a health insurance plan with a 70 percent actuarial value (AV) or below to contribute to an HSA. This will incentivize employers whose current plans have an actuarial value above the threshold to switch to offer a plan or plans with a somewhat higher deductible and copayments (and a lower actuarial value) because their workers could then newly participate in an HSA. Economic theory suggests employers would fund employees' HSAs with premium savings. Expanding HSAs and the corresponding incentive to obtain greater value from healthcare spending could lead to less consumption of healthcare, particularly lower-value services and treatments, and further premium reductions.

Individuals whose current plans are at or below 70 percent AV that are not currently paired with HSAs would have an expanded tax-preference for out-of-pocket spending causing some of them to spend more although this incentive is limited since unspent HSA amounts roll over from one year to the next. However, some, but not all, of those whose current plans are above 70 percent AV and who switch to 70 percent or lower AV plans would bear higher after-tax, out-of-pocket costs for services and therefore have an increased incentive to seek value for their healthcare spending. In these situations, providers would be subject to more pressure to set transparent prices and to compete for customer business by lowering prices and improving quality. In addition, unlike with current HSA-qualified plans, insurers would have flexibility to include highly cost-effective care before the deductible is met.[302]

As noted above, an additional constraint on the availability and use of HSAs is the requirement that HSA-qualified plans can only provide certain preventive care benefits before the minimum deductible is met. Reconsideration of the scope of care that qualifies as preventive could make HSA-qualified plans more attractive and thus enhance access to HSAs. Short of creating a new statutory standard for HSA-qualified plans, the existing regulatory definition of preventive care could reasonably be interpreted more expansively for purposes of the HSA and related HSA-qualified plan rules. A broader interpretation could improve cost-effectiveness and give consumers greater options for financing their

---

[301] It is unclear whether, under current rules, consumer-provider fixed-fee arrangements, such as direct primary-care arrangements, should be considered health plans and thus be prohibited from being coupled with HSA-qualified plans.
[302] The direct immediate budgetary cost of deeming 70 percent AV plans as HSA-qualified plans could be relatively small. This is because among individuals in employer-sponsored plans much of the cost of tax-preferred HSA spending would be offset by reduced tax-preferred premiums.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006016

healthcare. One reasonable approach would be to consider treatments preventive if they are highly cost-effective and treat a chronic condition that would, in a relatively high share of cases, become more severe or develop into a new condition that is considerably more expensive to treat, if the original condition were left untreated.

Another HSA reform that would reduce the bias in favor of comprehensive, employer-sponsored coverage would be allowing people with an HSA-qualified plan who also choose consumer-provider, fixed-fee arrangements, such as direct primary care arrangements, to contribute to an HSA. Doing so would provide another avenue for first-party payment of healthcare services, thereby expanding choice and making HSA-qualified plans more attractive relative to comprehensive insurance. Some of these types of arrangements are simply pre-payment, outside of traditional insurance arrangements with all the corresponding administrative costs, for certain healthcare services that are known and regular in nature. For example, a patient with diabetes might purchase a fixed-fee arrangement that supplied insulin, testing equipment, and a quarterly visit with a healthcare provider specializing in treating diabetes patients. Healthcare providers would then have an incentive to compete with respect to price and quality to attract patients with HSAs.

Another limitation of current law is that Medicare beneficiaries in HDHPs are not allowed to make tax-deductible contributions to their HSAs or Medicare Savings Accounts (MSAs) even if Medicare serves as their secondary coverage. This limitation reduces the ability of working seniors to save for future healthcare expenses and leads them to rely more upon third-party payment for healthcare services in retirement. The FY2019 President's Budget proposed to give Medicare beneficiaries greater flexibility to take control of their healthcare. The Budget proposal would allow beneficiaries enrolled in Medicare MSA Plans to contribute to their MSAs. Beneficiaries would also have a one-time opportunity to roll over the funds from their private HSAs to their Medicare MSAs. These beneficiaries who elect this plan option would not be allowed to purchase Medigap or other supplemental insurance. Medicare beneficiaries who have an employer-sponsored HDHP would be allowed to make contributions to their HSAs, although Medicare would not cover any expenses before the HDHP deductible is met. The Budget estimated that this proposal would reduce government revenue by about $11 billion, over 10 years.

Although the premiums for employer-sponsored coverage—both the premiums paid by the employer and employee—are generally excluded from federal income and payroll taxes, the premiums paid for non-group coverage do not receive this same tax treatment. The ACA's premium tax credits provide assistance for the purchase of individual market plans, but this assistance declines rapidly as household income rises and does not extend to people in households with income above 400 percent of the federal poverty line. As part of its proposal to replace the ACA, the President's FY2019 Budget recommended increasing HSA contribution limits and allowing the use of tax-preferred HSA funds to pay HDHP premiums. The Treasury Department's budget estimates suggest that, as part of ACA repeal, raising the HSA contribution limits to the out-of-pocket maximums and allowing

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006017

the purchase of HDHP premiums from HSAs would reduce government revenue by $28 billion over 10 years.

Another option to increase consumer control through HSA expansion would be to allow persons enrolled in Healthcare Sharing Ministries as defined in Code section 5000A(d)(2)(B)(ii) to contribute to HSAs. Healthcare Sharing Ministries are organizations in which people with shared religious or ethical beliefs help pay each other's medical costs. Contributions to HSAs by participants in Health Sharing Ministries would be permissible provided that the individuals (1) remain responsible for an amount of their own (or their family's own) healthcare expenses equal to the applicable annual deductible for an HSA-qualified plan, and (2) with respect to any particular medical expense, are not eligible for payment, sharing, or reimbursement of the expense in any manner by both the Healthcare Sharing Ministry and the HSA. In other words, the HSA-qualified plan deductible would still apply and a medical expense could not be reimbursed twice. These arrangements would encourage individuals to keep medical spending low by encouraging less costly behaviors and greater negotiation with medical providers. In expanding the flexibility of these arrangements, however, distinguishing genuine Healthcare Sharing Ministries from plans and organizations that mischaracterize themselves as such would be essential.

Benefit of Expanding Health Reimbursement Arrangements

Since HSAs are the property of the individual, increasing consumers' ability to use HSAs is likely the best way to encourage first-party payment. Expanding HRAs could also encourage more efficiency through greater consumer control over their healthcare and somewhat reduced third-party payment.

Originally described in IRS guidance in 2002,[303] HRAs allow employers to reimburse their employees' medical expenses. An HRA is an arrangement that is funded solely by an employer and that reimburses an employee for medical expenses incurred by the employee or his or her family up to a maximum dollar amount for a period. Historically, HRAs have often been used by employers that did not choose to offer group insurance to their workers, as well as to supplement group coverage.

As a result of the interpretation of some ACA provisions, HRAs can currently only be offered if employers also offer ACA-compliant group health insurance plans. In implementing the ACA, the Obama administration determined that standalone HRAs violated the ACA prohibition on annual dollar limits and the requirement that group health plans provide certain preventive care without cost sharing. Although the Obama administration issued regulations allowing HRAs to be offered as long as the employee had other group health insurance coverage, the Obama administration restricted individuals' ability to use an HRA to purchase individual market insurance of their own choosing, even

if the insurance did not have annual and lifetime dollar limits and covered preventive care without cost sharing.

The following two expansions of HRAs, both proposed in a notice of proposed rule-making issue on October 23, 2018, would increase their usability and provide employers, and their employees, with a greater set of alternatives for financing health coverage. First, reversing the Obama administration restriction on HRAs for individuals with individual market insurance would encourage more employers to offer HRAs, increase consumer choice, and provide equal tax treatment for employee-selected coverage in the individual market as for traditional employer-selected group coverage.[304] In essence, allowing HRAs to be integrated with non-group coverage that does not have annual dollar limits and that covers the necessary preventive care without cost sharing would allow employers to provide a tax-advantaged, defined contribution arrangement for each employee to select the health insurance that best works for his or her circumstances. In addition to the benefit for workers, the proposed rule would better enable businesses to focus on what they do best—serve their customers—and not on navigating and managing complex health benefit designs.

This proposed rule is increasingly important as fewer employees at small and mid-sized firms are enrolled in employer coverage and most employers that do offer a plan only provide their workers a single option. For firms that employ 3-24 workers, the percentage of workers covered by employer health benefits has fallen from 44% in 2010 to 30% in 2018. For firms that employ 25-49 workers, the percentage of workers covered by employer health benefits has fallen from 59 percent in 2010 to 44 percent in 2018. 81 percent of small to midsized employers (fewer than 200 employees), and even 42 percent of larger employers (at least 200 employees), offering health benefits only provide a single coverage option for their employees. Economists have found that increasing plans available to employees is extremely valuable, providing the median consumer equivalent benefit as a 13 percent premium reduction.[305]

An additional way to expand the use of HRAs is to allow a limited "excepted benefit" HRA that, as with all excepted benefits, would not be subject to the ACA's market rules (such as the prohibition on annual dollar limits and the requirement to cover preventive care without cost sharing) or certain other requirements for group health plans under the Code and the Employee Retirement Income Security Act of 1974 (ERISA). Providing an excepted benefit HRA would reduce the bias toward comprehensive ESI and allow employees another tax-advantaged arrangement to finance limited healthcare expenses. The proposed regulation would permit employers that offer traditional group coverage to

AMERICAN OVERSIGHT

provide an HRA of up to $1,800 per year (indexed to inflation) to reimburse an employee for certain qualified medical expenses, including standalone dental benefits and premiums for a short-term health insurance plan.

According to preliminary estimates from the Treasury Department, once fully phased in, roughly 800,000 employers are expected to provide HRAs to pay for individual health insurance coverage to over 10 million employees. Some experts, such as Harvard Business School professor Regina Herzlinger, suggest the effect could be larger since expanded HRAs will create a more efficient healthcare system as consumerism will be unleashed.[306] This phenomenon could lead to increased workforce investment and higher wages as less is spent on health insurance and could spur innovation among providers and insurers as they directly compete for consumer dollars.

Recommendations: Realign Incentives

- Congress should expand consumers' abilities to benefit from Health Savings Accounts (HSAs), including by allowing a greater number of plans (e.g. any plan with an actuarial value below 70 percent) to be HSA-qualified plans, raising the contribution limit on HSAs, allowing people to use their HSA to pay HSA-qualified non-group premiums, allowing Medicare beneficiaries in enrolled high-deductible health plans to contribute to an HSA, and enabling consumers with HSAs to enter into provider-consumer fixed-fee arrangements, including direct primary-care arrangements.
- The administration should explore ways to administratively expand consumers' abilities to benefit from HSAs, including by interpreting preventive services to allow HSA-qualified plans greater ability to cover preventive low-cost treatments for chronic conditions.
- Consistent with Executive Order 13813, the administration should work through the regulatory process to increase the usability of HRAs, to expand employers' ability to offer HRAs to their employees, and to allow HRAs to be used in conjunction with non-group coverage.

The Unintended Consequences of Federal Policies

Delivery System Reform

Policymakers generally agree that the U. S. healthcare system's reliance on fee-for-service, third-party financing has contributed to a system that produces high costs with uneven quality. The increasing recognition among policymakers of this dynamic has led to recent

AMERICAN OVERSIGHT

reimbursement policies that attempt to move away from rewarding volume (fee-for-service) to rewarding value. Many delivery system reform efforts to date have sought to transfer risk to entities with better incentives for managing costs and delivering value to patients. One of the most successful examples of this has been Medicare Advantage, which has moved away from a fee-for-service model, improved incentives, and has generally produced higher value (better care per unit of cost) for patients. The success of Medicare Advantage is based on better empowering consumers—letting them determine what constitutes value, as opposed to deferring the judgement to Washington. As HHS Secretary Azar has stated, if the government writes the equation for value, the answer is never going to be cheap or simple, and special interests will find a way to manipulate it. Relying on the free exchange of information between buyers and sellers, among competing interests, can deliver better outcomes from our healthcare system at a lower cost with patients, not the government, in charge.[307]

ACOs

Various structures have been tried in different settings by the prior administration. However, they have often relied on the government (rather than patients and the private sector) to define value, rather than allowing patient choice. One such approach has been the development of Accountable Care Organizations (ACOs), groups of doctors, hospitals and other providers that work together to manage and coordinate care for Medicare fee-for-service beneficiaries through an accountable care organization, whose performance is evaluated according to quality standards established by the government. ACOs were intended to improve coordination of care between primary care providers, specialists, and hospitals by holding providers accountable for patient outcomes and total costs. When considering the future of ACOs and broader delivery system reform efforts, it is critical to understand the history of ACOs and their effect on provider competition.

The largest Medicare ACO program is the Medicare Shared Savings Program (MSSP), in which Medicare shares in the financial savings and losses generated by ACOs. In 2018, there were 561 MSSP ACOs, which enrolled 10.5 million beneficiaries.[308] Importantly, most MSSP participants are not responsible for financial risk if their spending is above established targets (i.e., one-sided financial risk). New payment models such as Medicare's Next Generation ACOs require providers to take on both shared savings and shared

losses[309] (i.e., two-sided financial risk).[310] These models may offer important learning opportunities to test public-private initiatives that aim to increase value since two-sided financial risk represents better incentives to achieve value than one-sided financial risk. Over time, two-sided financial risk should be paired with some control over the inputs to match outcome accountability.

ACO Impact on Provider Competition

While changes such as ACOs and other alternative payment models (APMs) may hold the promise of improved care coordination and better aligned financial incentives, they may also encourage provider consolidation that increases market concentration, drives up prices, and decreases competition between providers. This may occur as hospitals purchase physician practices (vertical integration), or through mergers between hospitals or between physician practices (horizontal integration). Although a causal link has not yet been identified, some studies have found that vertical integration has been associated with higher prices and spending in some markets and for some providers.[311] In California, hospital-owned physician practices have higher per-patient spending than physician-owned practices.[312] Most economists believe that horizontal integration threatens consumers with higher prices as well as reduced options.

Some experts have suggested that hospital-acquired practices increase the use of evidence-based care such as disease registries, nurse care managers, and reminders to patients that can improve quality of care and outcomes more than physician-owned practices that do not use such care management practices.[313] However, hospital-owned practices may have higher rates of emergency department visits and higher Medicare spending per patient.[314]

---

[309] Shared savings and losses are determined against a benchmark based on baseline and national and regional trends.
[310] A patient-centered medical home is a model of care coordination in which care is comprehensive and coordinated across multiple resources within the healthcare system as well as the broader community. AMERICAN OVERSIGHT

This may be why greater physician-hospital integration has been linked to higher commercial prices for outpatient care[315] and hospital prices.[316]

The FTC and the Justice Department worked closely with CMS to develop ACO eligibility criteria so Medicare Shared Savings Program ACO applicants meet clinical integration requirements, avoiding antitrust concerns.[317] In order to facilitate compliance with antitrust rules, the FTC and DOJ developed antitrust guidance and policy for ACOs,[318] defining antitrust safety zones as well as areas of potential concern where providers have high market power based on their share of the primary service area. The antitrust authorities continue to monitor ACOs for potential antitrust violations.

Research to date indicates that ACOs tend to develop in competitive markets; and only in a minority of markets have ACOs increased physician concentration.[319] One recent study found that markets with higher ACO penetration did not experience differential changes in physician-hospital integration, practice size, or market concentration of physicians or hospitals from 2008 to 2013.[320] The study also found high ACO penetration markets had more competitive hospital and insurance markets and higher commercial HMO penetration. The authors did note that continued consolidation might be a defensive response to the potential threat from new payment models, as larger health systems may be able to resist payer pressures to enter into risk contracts.

Importantly, provider consolidation began prior to the start of delivery system reform efforts. In one study of hospital acquisition of practices between 2006 and 2013, vertical integration peaked in 2011. Hospitals mostly bought small primary care, multi-specialty, or cardiology practices; case studies of hospitals indicated the primary motivation was to increase referrals and negotiate higher payment rates with insurers.[321]

A Robert Wood Johnson Foundation project on the impact of hospital consolidation concluded that early trends in consolidation were primarily to improve bargaining power and did not necessarily involve clinical integration.[322] Some potential factors related to delivery-system reform that may be contributing to provider consolidation include large health system economies of scale and ability to handle increasing quality and cost measurement reporting. The capital and resource requirements to transform a primary care practice, even within a practice, are substantial. The financial and administrative demands of delivery system reform may incentivize small practices and solo practitioners to accept buy-outs by hospitals and health systems or leave the profession prematurely. The trend toward large systems is likely not be better for patients. A 2013 study found that larger health systems participating in payment reform have not shown better patient outcomes or lower spending,[323] whereas small practices have seen lower rates of preventable admissions.[324] Thus, it is important that delivery system reform efforts do not harm smaller practices that lack economies of scale to satisfy new rules and requirements accompanying delivery system reform more easily.

Recommendations: Delivery System Reform

- The administration should focus on identifying alternative payment models that allow free markets and patients to define value, rather than rely on technical and burdensome definitions invented in Washington.
- The administration should evaluate the best metrics for measuring value and quality in the healthcare sector, eliminating unnecessary and potentially counterproductive measures and reducing the burden on providers.
- The administration should ensure that smaller physician and provider practices are not unduly harmed by delivery system reform and corresponding requirements.
- The administration should ensure that these delivery system reform models, which aim to hold providers accountable to a set of population-based metrics and total spending, foster collaboration across systems within a geographic area and do not produce harmful consolidation, particularly horizontal consolidation.
- The Administration should pursue policies and programs that encourage value, competition, and choice, such as Medicare Advantage, and move away from a fee-for-service model.

Positively Realigning Incentives through Payment Reform

Patients with certain clinical needs can often seek care in one of a variety of settings. Medicare fee-for-service (FFS) reimbursement is often based predominately on the setting of care and not the patient's underlying medical need. This can create incentives for providers to refer patients selectively to more highly reimbursed care settings, unjustifiably increasing concentration and spending. Two examples of service types with multiple venue options are post-acute care (PAC) and certain physician services furnished in hospital outpatient departments (HOPD).

Post-Acute Care

Medicare post-acute care (PAC) providers are primarily used for recuperation and rehabilitation. These providers include home health agencies (HHAs), skilled nursing facilities (SNFs), inpatient rehabilitation facilities (IRFs), and long-term care hospitals (LTCHs). In 2016, Medicare spent approximately $60 billion on Medicare PAC services. Per statute, separate Medicare prospective payment systems (PPSs) were developed for each Medicare PAC setting. Base PPS payments for each of these settings differs considerably, even though the clinical characteristics of patients and the services delivered at any of the four PAC settings may be similar. The 2018 base PAC PPS payments (i.e., base payments prior to adjustments such as case mix) are about $15,000 per discharge for IRF, about $400 per diem for SNF (up to 100 days in a covered spell of illness), about $3,000 per 60-day episode for an HHA, and about $41,000 per discharge for a standard LTCH stay or an inpatient hospital with comparable payment rate for patients who meet statutorily specified LTCH eligibility criteria. A unified or site-neutral PAC prospective payment system would base Medicare payment on the clinical characteristics of the patient instead of the provider setting.

Hospital Outpatient Departments

Many of the services delivered by hospital outpatient departments (HOPDs), such as evaluation and management visits, endoscopies, and imaging services, are also delivered in physician offices and ambulatory surgical centers (ASCs). Medicare FFS benefit payments are projected to be $50 billion in 2018 and $100 billion in 2027 for these services.[325] Conceptually, physician reimbursement for ambulatory services has two components: the professional component, which covers the physician time, and the technical (also called facility) component, which covers the cost of the office, equipment, and auxiliary staff's time. The professional component is paid under the Medicare Physicians Fee Schedule (PFS) regardless of the place of service. However, the technical component is typically higher in the HOPD than in a physician's office or ambulatory surgical center.

---

[325] CBO Baseline, 2017. These figures include some services that are not paid under OPPS. Some of these HOPD payments are copayments and some are paid via Part B premium. Also, these figures pertain to FFS enrollees only. Any change in payment rates will yield savings on the Medicare Advantage side.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006025

Sec. 603 of the Bipartisan Budget Act of 2015 (BBA) modified how off campus outpatient services are paid. Prior to enactment of the BBA, hospitals were able to purchase freestanding clinics and bill for outpatient services under the Outpatient Prospective Payment System (OPPS) for the services furnished at these off-campus provider based departments. Sec. 603 changed the incentives so that after January 1, 2017, services furnished by certain off-campus provider based departments would no longer be payable under the OPPS (and would generally instead be paid lower rates under the Physician Fee Schedule), effectively decreasing payments for these services and eliminating an incentive for hospitals to purchase these freestanding clinics. Clinics purchased by the hospitals prior to November 2, 2015 or which were located less than 250 yards away from a remote location of the hospital were "grandfathered," and continue to have services rendered paid under OPPS. Elimination of this incentive to consolidate will hopefully serve to maintain market competition and slow increases in Medicare and private insurance sending.

Recommendations: Positively Realigning Incentives through Payment Reform

- Congress should establish site neutral payment policies based on the anticipated clinical needs and risk factors of the patient, rather than the site of service. In delivering these reforms, Congress should account for differing levels of patient acuity.
- State Medicaid programs should embrace site neutrality as a goal and reform their payment systems to pay for the value delivered where value is defined according to a relatively limited, straightforward, and non-gameable set of metrics. Additionally, metrics should not be designed and proposed solely by the entities to which they will ultimately apply.

Quality Improvement and the Measurement and Reporting of Quality

One of the earliest experiences with quality reporting was the publication of "report cards" in New York and Pennsylvania, which started reporting physician and hospital coronary artery bypass graft (CABG) surgery mortality rates in the 1990s. These efforts led to some early successes, including a 41 percent decline in risk-adjusted mortality rates[326] and 27 surgeons with low volume and high mortality rates ceasing performing CABG surgeries.[327] Potential drawbacks are that report cards may have produced some "cherry picking" by providers, so that fewer severely ill patients received CABG and health outcomes for

AMERICAN OVERSIGHT

severely ill patients worsened.[328] Several other studies have demonstrated positive results from measuring quality outcomes and publishing the results.[329]

While value is best determined by private sector interactions, the government can play a productive role in collecting and making available data that patients and insurance companies can use to make more informed decisions. In the past, the government has often failed to establish sensible metrics, creating significant reporting burdens for providers and metrics that are not informative for patients or industry and can easily be gamed when reimbursement is tied to them.

Quality Reporting History

Following the publication of the landmark reports, To Err is Human and Crossing the Quality Chasm by the Institute of Medicine in 1999 and 2001 respectively, numerous quality-reporting requirements have been imposed on providers. The premise of quality reporting is that it will motivate providers to improve the quality of healthcare they deliver and provide patients with the information they need to make informed choices about their

---

[328] Dranov D, Kessler D, McClellan M, Satterthwaite M. Is more information better? The effects of 'Report Cards' on health care providers. *J Polit Econ*. 2003;111(3):555-588.

[329] In 1997, for example, the Cleveland Health Quality Choice project began a regional initiative to disseminate data to profile hospital performance and found improved outcomes in risk-adjusted mortality for six medical and two surgical procedures. (Rosenthal GE, Quinn L, Harper DL. Declines in hospital mortality associated with a regional initiative to measure hospital performance. *Am J Med Qual*. 1997 Summer;12(2):103-112. PMID: 9161057). In addition, a 2008 Pennsylvania study showed significantly lower odds of in-hospital mortality associated with intensive public reporting (OR=0.59-0.79, p<0.01). (Hollenbeak CS, Gorton CP, Tabak YP, et al. Reductions in mortality associated with intensive public reporting of hospital outcomes. *Am J Med Qual*. 2008;23:279–286). The CABG Outcomes Public Reporting Program (CCORP), mandated by the California legislature in 2003, also generates annual report cards, including risk-adjusted operative mortality rates, for all nonfederal hospitals and surgeons who perform the procedure. The program reported observed mortality decreased statewide (2.90% to 2.22%, p<0.01) and no evidence that high-risk patients denied CABG because of public reporting. (Li Z, Carlisle DM, Marcin JP, et al. Impact of public reporting on access to coronary artery bypass surgery: the California Outcomes Reporting Program. *Ann Thorac Surg*. 2010 Apr;89(4):1131-1138. PMID: 20338320). In addition, in 2016 a systematic review and meta-analysis of impact of public reporting on clinical outcomes, showed positive impact of public reporting on overall mortality (RR=0.85 [95% CI, 0.79-0.92]). (Campanella P, Vukovic V, Parente P, et al. The impact of public reporting on clinical outcomes: a systematic review and meta-analysis. *BMC Health Serv Res*. 2016 Jul 22;16:296.) Finally, an evaluation of state-mandated health-care-associated infection reporting laws on central-line associated bloodstream infection rates at the hospital/ICU level found that states with such laws had lower CLABSI rates beginning approximately six months prior to the law's effective date (IRR = 0.66; p < .001). This effect has persisted for > 6.5 years. (Liu H, Herzig CTA, Dick AW, et al. Impact of state reporting laws on central line-associated bloodstream infection rates in U.S. adult intensive care units. *Health Serv Res*. 2017 Jun;52(3):1079-1098). See also Hannan EL, Kumar D, Racz M, et al. New York State's Cardiac Surgery Reporting System: four years later. *Ann Thorac Surg*. 1994 Dec;58(6):1852-1857. Review. PMID: 24509280.

AMERICAN OVERSIGHT

care. Early quality public reporting initiatives centered around hospital mortality rates,[330] and required many providers to abstract data manually from patient charts.

The Deficit Reduction Act of 2005 mandated that HHS develop a plan for value-based purchasing for Medicare hospitals starting in 2009, which led to Medicare's first pay-for-reporting programs for hospitals and physicians.[331] Medicare tested the first hospital pay-for-performance program through a partnership with Premier, an alliance of hospitals, in the Hospital Quality Incentive Demonstration,[332] a six-year program that awarded top-performing hospitals with bonuses based on evidence-based quality measures for five clinical conditions. This demonstration showed improvements in quality for participants and those who publicly reported quality.[333] Refinements to Premier's methodology, rewarding both achievement and improvement as a means to address disparities,[334] have led to implementation of similar features in Medicare's current value-based purchasing programs.

Since 2003, HHS has published a national report on quality and disparities through national databases in the Agency for Healthcare Research and Quality (AHRQ). The data show continued disparities among providers alongside overall improvements. The National Quality Forum is now looking at methodologies to display this data to providers to help improve care for disadvantaged populations (including poor, rural, and vulnerable populations) by reporting potentially preventable admissions that reflect the quality of primary care or higher rates of delayed care due to affordability.[335]

Medicare's Physician Value-Modifier (VM) program, a physician pay-for-performance program, sought to extend the goals of quality improvement in the ambulatory care setting and assess population outcomes such as preventable admissions, using Medicare claims

AMERICAN OVERSIGHT

data. In addition, the Quality Payment Program, enacted in 2015 through MACRA, has created another requirement for physicians to report on measures. Like the Value Modifier Program, the Quality Payment Program also assesses clinicians and group practices on population level outcomes including all-cause readmissions and avoidable ER visits.

Quality metrics have a greater effect on providers than on patients. Many of the patients did not consult the report cards, and of those who did, many reported that they did not affect their choice of hospitals or surgeons.[336] However, the quality metrics certainly affect providers who do not wish to be publicly identified as potentially harming patients, and this seemingly drives many providers to improve. Although measuring quality has generally produced positive results, the proliferation of measures produces a burden that discourages providers and likely takes away from patient care. Moreover, many providers have learned to game certain measures or have become sophisticated in explaining away bad results as attributable to improper risk adjustment.

The shift to value-based payment, the large number of quality measures, and the potential lack of alignment in measures required by different payers (e.g., Medicare, state Medicaid agencies, and health insurers) further increases the burden of quality reporting on providers. Each year physicians and their staff in four common practice areas (cardiology, orthopedics, primary care, and multispecialty) spend 15.1 hours per week per physician on reporting quality measures—about 785 hours per physician per year—at an estimated average annual cost of $40,069 per physician or $15.4 billion per year for these specialties.[337] This is clearly too much, especially given the problems intrinsic to many of the metrics being recorded. CMS estimated the total costs burden of MIPS in the first year to be $1.3 billion in 2017, decreasing to $694 million by 2018 due to fewer clinicians being eligible under revised volume requirements.

Half of physicians and 38 percent of nurse practitioners and physician assistants report that quality reporting requirements have a negative impact on the quality of care.[338] This stands out as another example of well-intentioned government action having unintended consequences. To address this issue, the National Quality Forum (NQF) has endorsed a set of common quality reporting measures for use by public and private payers. Under current

AMERICAN OVERSIGHT

law, NQF endorsement is required to ensure standardization and stakeholder input in measures used for quality reporting and performance-based payment.

Another recent private-public effort, Core Quality Measures Collaborative,[339] has worked to align measure specifications across payers including Medicare and Medicaid. In addition, CMS's Meaningful Measures Initiative removed 18 hospital reporting measures and is proposing removal of 36 measures from the MIPS program that have showed no variation and are topped-out (i.e. already showing high level of performance with minimal to no variation).

Impact of Quality Reporting on Competition

A recent report by the Government Accountability Office (GAO) predicts that many small practices will be unable to transition to MIPS due to lack of financial resources.[340] The new requirements potentially disadvantage small, independent practices or solo practitioners who, unlike large health systems, are less likely to have the administrative infrastructure and staffing resources (e.g., a practice manager or other administrative staff) to report efficiently on quality and conduct regular quality improvement activities to improve performance. One potential concern is that practices that participate in these programs may harm patient care if they need to divert limited resources to reports and bureaucracy and away from actual quality improvement and patient care. The financial effects from penalties, diverted resources, and poor performance results could affect their ability to stay in business, force them to merge with larger systems, or lead to early retirement.

The GAO also suggests that small practices could work with partners to share in financial risk and help coordinate services, as well as work with non-partners in order to support quality reporting, patient surveys, and EHR requirements. Since many practices would like to remain independent and there is increasing evidence that small independent practices provide higher quality of care, such as fewer preventable hospital admissions, at lower cost,[341] enabling them to achieve these benefits while remaining independent is important.

Recommendations: Quality Improvement and the Measurement and Reporting of Quality

- As proposed by the Centers for Medicare and Medicaid Services' Patients over Paperwork initiative, the administration should streamline and standardize quality measures across programs to avoid duplicative reporting requirements and limit the number of measures where the expected cost of collecting the measure

exceeds the expected benefit. In addition, the administration should collaborate with state Medicaid programs, private payers, and other government payers to align and streamline quality measures and reporting structures to reduce physician burden.

- The administration should seek to develop measures that are meaningful to providers and patients, and help them assess quality and value.
- The administration should focus on providing a framework for quality reporting in plain language that is more accessible and appealing to consumers.
- The administration should consider providing incentives and technical assistance to support the development of virtual provider groups (e.g., independent practice associations, alternative payment models, or regional quality collaboratives) that can increase the competitiveness of small practices through access to shared resources and help build capacity for care management.
- HHS should explore opportunities to initiate research into machine learning techniques that can directly access data on CMS beneficiaries from the provider Electronic Medical Records (EMRs) using open application program interfaces in order to enable quality analysis and payments based on value while reducing burden and cost and benefitting the public.

Section Four:
Enabling Consumer-Driven Healthcare

Rising healthcare spending is partly attributable to consumers' insulation from the true market price of healthcare services through the presence of third-party payment. Historically, consumers have had little reason to seek out, or price shop for, lower-cost or higher-value providers and services due to the abundance of third-party payment. Instead, reimbursement rates are negotiated between third-party payers, generally the government or insurers, and providers. And consumers generally are provided with little information on the prices of healthcare products and services.

Perhaps not surprisingly, there is a wide variation in prices charged across providers, even within a geographic area.[342] Substantial savings could be achieved if consumers actively shopped and selected lower-cost providers. For example, Table 2 demonstrates the potential savings for people who self-pay relative to the insurance rate. Unlike most industries, which typically offer relatively uniform prices to most consumers, the reimbursement of a specific service will vary significantly based on the third-party payer with which a consumer is aligned. It is also worth noting that consumers may receive a lower price by paying cash for services.[343] Yet it can be difficult for consumers to find price information.

Table 2

[342] Newman D, Parente S, Barrette E, Kennedy K. DATAWATCH: Prices for common medical services vary substantially among the commercially insured. *Health Aff.* 2016;35:5923-5927. doi:10.1377/hlthaff.2015.1379.

AMERICAN OVERSIGHT

The Cash Advantage

Patients who pay cash upfront for medical services can sometimes make out better than they would by using their insurance, especially if they have high-deductible plans and pay the insured rate in full. Some examples:

PROCEDURE	FACILITY | CITY	SELF-PAY RATE	INSURANCE RATE	INSURANCE COMPANY
MRI of the foot	**Regional Medical Imaging** | Flint, Mich.	**$379**	**$445**	Aetna
Tonsillectomy	**Banner Desert Medical Center** | Mesa, Ariz.	**$2,858***	**$5,442**	Arizona Blue Cross Blue Shield
MRI of the knee	**Boulder Community Hospital** | Boulder, Colo.	**$600**	**$1,100**	Arizona Blue Cross Blue Shield

Note: Insurers' rates may vary by plan. *Not including physicians' fees, typically $1,000 to $1,400.

Sources: the providers; insurers' cost-estimator tools

TABLE: WALL STREET JOURNAL

In sum, the abundance of third-party payment creates a system in which consumers generally do not shop on price and providers lack incentives to compete on price and quality to attract and retain patients. Of note, while the third-party payers have knowledge of the reimbursement schedule, price transparency at this level is inefficient for two reasons: (1) Insurers may lack incentives to obtain lower prices especially if profits are capped at a percentage of spending, and (2) Insurance introduces moral hazard and waste.

Despite the current foundational impediments to establishing a consumer-driven market, some examples provide insight into the results that might be achievable if consumers had greater incentives and ability to make informed decisions about their healthcare consumption.

Some government tax policies and payers' benefit design strategies have sought to encourage consumers to become more actively engaged in purchase decisions. As discussed earlier, consumer-directed models, such HDHP linked to HSAs, hold the promise of increasing consumer engagement in their healthcare decisions. So do initiatives that leverage the power of consumer shopping, like reference pricing. As of 2017, more than 20 million people were enrolled in an HSA-qualified plan, although only about 40 percent

AMERICAN OVERSIGHT

of these enrollees contributed to an HSA.[344] One study found that HDHPs produce lower spending, primarily due to less utilization.[345] Combining HDHPs with consumer-driven HSAs could create more effective incentive structures than existing third-party arrangements, incentivizing patients to shop for higher-value care without forgoing necessary treatments. However, patients cannot make fully informed decisions about where to receive care without information about the cost and quality of providers. Unfortunately, consumers often lack meaningful and understandable price information.

Price Transparency in Action: in CalPERS PPO plans

Since 2011, CalPERS has used reference pricing for its PPO enrollees. Services that use reference pricing include joint replacement, arthroscopy, cataract removal, and colonoscopy.

Results:

- 9-14 percentage point increase in the use of low-price facilities.
- Reduction in prices 17-21%.

Payers Can Improve Incentives

Empowering consumers with price information and realigning financial incentives to give consumers a greater stake in their healthcare decisions has been shown to lower prices without affecting quality. One model for increasing consumer engagement is the use of reference-based pricing. Reference pricing places an upper limit on the amount of reimbursement a payer will pay for a medical service. Generally, the reference price is set to a specific percentile of the distribution of provider reimbursements in a market, such as the median reimbursement. If an enrollee receives care from a provider that charges above the reference price, then the enrollee is responsible for the difference.

Reference pricing has been shown to reduce the variation in prices across providers, as providers increasingly compete on price. When the California Public Employees' Retirement System (CalPERS), which provides benefits to over 1.4 million enrollees, started using reference pricing, higher-cost providers soon responded by lowering their prices to attract these enrollees (Robinson 2017).[346] CalPERS distributed lists of hospitals that exceeded a certain quality threshold and had different prices for its enrollees. Consumers increasingly used lower-cost providers with no negative impact on quality.[347]

[347] *Id.*

AMERICAN OVERSIGHT

(See Figure 2.) CalPERS' experience highlights the potential for realigning incentives using reference-based pricing, to lower cost and increase value in the healthcare system.

The Centers of Excellence contracting approach is another method that many payers use to obtain value for employees. Under this approach, an employer or insurer contracts with specific high-value providers for particular services or procedures and offers its health plan enrollees lower cost sharing for using those providers. Often these arrangements rely on bundled payments, in which the payer reimburses the provider a set amount for a pre-defined episode of care.[348] Centers of Excellence contracting is often used in non-emergency situations in which a consumer can travel to obtain care from a nationally recognized physician or hospital. For example, Walmart covers its health plan enrollees at zero-cost sharing if they travel to the Mayo Clinic, Cleveland Clinic, or another select high-quality provider for cardiac, spine, and transplant surgeries.[349] In addition, Walmart covers travel and lodging costs for the patient and a caregiver.

Price Transparency in Action:

Finding Value in Imaging

In 2010, AIM Health started calling patients referred to MRI providers with substantially higher cost ($400+) or poorer quality than other sites. Patients were notified of a higher value site, but were not forced to switch.

Results:

Reduced Patient Costs

- Saved patients $220 (18.7%) per scan relative to patients in other cities.

Promoted Site Neutrality

- 30% decline in hospital price premium for MRIs
- Use of hospital-based facilities fell from 53% to 45%, 2010-2012

Current State of Price-Transparency Efforts

Meaningful and timely consumer access to prices can supplement benefit designs to help consumers choose lower-cost, higher-value providers. In a competitive, functioning insurance market, insurers would have an incentive to use such approaches.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006035

To be effective, price transparency efforts must distinguish between the charges a provider bills and the rate negotiated between payers and each provider. Some health plans and self-insured employers have developed price transparency tools for their enrollees. CalPERS uses a price transparency platform that allows patients to see providers' prices along with out-of-pocket costs. Over 90 percent of enrollees in Aetna commercial health plans have access to Aetna's Member Payment Estimator which provides personalized out-of-pocket costs for more than 600 medical services—a helpful resource because it uses negotiated plan prices instead of relatively meaningless charges,[350] and takes into account cost-sharing responsibilities such as any remaining deductible amount.

State governments purchase significant volumes of healthcare goods and services through Medicaid, departments of corrections, and public sector employees' pension and health benefit funds.[351] In this capacity, states have an incentive to reduce their healthcare spending. Realigning incentives and promoting price transparency may help states do so. Most states have some laws related to price transparency; however, states may be able to do more.[352]

At the federal level, the ACA requires hospitals to report annually and make public a list of hospital charges for items and services. Starting in 2013, CMS publicly released average hospital-specific charges per patient and average Medicare payments for common diagnosis-related groups and ambulatory procedures. As part of the FY 2019 Inpatient Prospective Payment System Proposed Rule, CMS updated its guidelines to require hospitals to make available a list of their current standard charges via the internet in a machine readable format and to update this information at least annually, or more often as appropriate, which may make it easier for consumers to find charges and for third parties to collect and analyze data when developing value and price transparency tools or reports. This data may show the very high rates that many hospitals charge for certain services and treatments. The agency also sought comment on how to make this information available in a consumer-friendly interface.

Boosting price transparency will likely have limited utility unless the dampening effect of third-party payment on consumer engagement is also addressed. One study classified 43 percent of healthcare spending as shoppable;[353] however, third-party payment reduces the

---

[350] Charges are defined as the prices of a service, diagnostic test, medical procedure, and other items for which a hospital bills a patient or insurer before any discount is applied. For the most part, charges do not reflect the actual price a consumer pays, as charges do not take into account any discount received through insurance or discount the hospital applies for paying in cash.

AMERICAN OVERSIGHT

incentive to shop, resulting in low utilization of price transparency tools. Studies have found that only between 1 percent and 20 percent of patients use price transparency tools when they are available.[354] The most promising results for price transparency tools have been for services that rely less on the established physician-patient relationship and are relatively fungible and shoppable, such as imaging and laboratory tests. Price shopping for imaging services is associated with savings of up to 19 percent.[355] In addition, some evidence suggests this shopping is associated with increased price competition among providers offering these services.[356]

Further development of a consumer market for healthcare, anchored around readily available healthcare prices will likely require reforms to the third-party payment system. Research suggests that without strong financial incentives and accessible data on value (like those present in the CalPERS reference pricing example) consumers are often unwilling to change providers, overly rely on current providers for referrals, and conflate high prices with perceived quality regardless of actual outcomes. Many patients also naturally lose interest in the cost of healthcare once they meet their insurance deductible.[357]

Importantly, price information may be less useful to consumers if price comparisons do not group, or bundle, services into common episodes of care. An episode of care can include multiple services and fees, which makes it difficult for consumers to obtain accurate price estimates. Consumers may be unaware, for example, of separate physician and facility fees, resulting in higher than expected prices and surprise medical bills. By developing a standardized set of services, such as those used in bundled payment approaches, price transparency efforts could better help consumers compare providers.

Not surprisingly, many insurers and providers do not wish to publicize price information, which inhibits price transparency efforts. Employers may lack access to healthcare pricing information if providers or insurers are unwilling to release their prices. In some instances, even self-insured employers lack access to pricing data that their administrator deems

AMERICAN OVERSIGHT

proprietary information,[358] even though the employer is paying for much of their employees' healthcare. The Labor Department has finalized a rule that enhances small employers' and sole proprietors' options for banding together to form Association Health Plans under Title I of the Employee Retirement Income Security Act.[359] Small employers and sole proprietors that form these plans may be able to gain the market power necessary to leverage providers into these pricing arrangements.

Recommendations: Facilitate Price Transparency

- It should be a priority of this administration to ensure that patients are engaged with their healthcare decisions, and have the information they need to be savvy consumers of healthcare. Federal agencies should eliminate any federal rules or policies that create unnecessary barriers to state, federal or private sector initiatives that provide price transparency.
- The administration should consider legislative proposals to empower patients as they shop for healthcare by making it easier to pay directly.
- Congress should seek to empower patients as they shop around for healthcare by making it easier to pay for their healthcare directly. Actions might include:
    - Allowing all Americans, including Medicare beneficiaries, to maintain and contribute to a Health Savings Account, not only those enrolled in high deductible health plans.
    - Increasing flexibility for beneficiaries and providers in the Medicare program by allowing for direct negotiations between these parties so that beneficiaries can access services at a price or under a payment plan that works for them.
- Congress, federal agencies and states should incentivize providers to compete on price, including right to shop modeled on successful state efforts as well as understandable reference pricing models.

Empowering Patients: Using Choice to Bring a Longer-Term View to Healthcare

Difficulty accessing price and use data is a barrier to choice and competition in healthcare. Without ready access to such data, consumers, even those with properly aligned incentives, struggle to shop for value. While a wealth of data exists in the healthcare sector, patients

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006038

are often least able to benefit from it. By realigning incentives and better leveraging health data, providers, payers and researchers can help consumers choose more effective treatment options, cut down on wasteful spending, and reduce the growth in their own spending on unnecessary services or treatments.

Claims data captures information on diagnoses, procedures and therapies administered, and retail and outpatient drug dispensing, as well as site of care (provider office, hospital, etc.). When available to payers, researchers and others, such data can fuel insightful comparisons of long-term patient outcomes using different treatment options.[360] While any one data set (claims, clinical, etc.) may not contain all facets of a patient's experience, each can add value. For example, claims data have been increasingly recognized as central to studying long-term patient outcomes and some payers already use it to monitor the effectiveness of patient management.[361] Claims data can also be used to compare population-level outcomes between different payment models and delivery systems, allowing the healthcare system to optimize patient care.[362] The healthcare system has generated claims data over decades, providing a low-cost means to shed light on long-term cost, use and outcomes, across therapeutic options.[363] Today's more advanced technology can now connect claims data across time and location in a secure manner.[364]

To better inform their healthcare decisions and allow patients and providers alike to take a holistic view of patient health, longitudinal studies will be important. These studies are more challenging if patients move across multiple payers over time, and making best use of such data would likely require cooperation among payers and providers. Of course, this data can and should be readily accessible for enrollees in Medicare and Medicaid.

Twenty-five states, in an attempt to support price transparency efforts and make information more accessible for consumers, employers, researchers and others, have established All-Payer Claims Databases (APCDs). Research on this data may generate useful findings, up-to-date price transparency tools, or other patient engagement applications, as well as allow self-insured employers to manage their own costs better. These efforts have had mixed results to date.

AMERICAN OVERSIGHT

The eventual hope is that this data will allow payers, employers and researchers to better identify variations in pricing and quality across providers and payers. This in turn would help employers and others develop reference-pricing or center-of-excellence payment arrangements. In addition, states, academics and third parties could use these databases to develop price transparency tools, as well as research patient outcomes across providers, services and therapies. These tools may help patients find providers that offer services they value – supplementing often-outdated provider directories. They may also fill in gaps for consumers who lack access to a price transparency tool through their provider, and give employers a tool to compare prices of services across insurers.[365] Leveraging claims data may also help reduce the overuse of unnecessary or wasteful care, likely saving money for consumers, employers and taxpayers.[366]

Once claims data are accessible in a secure manner, any value-added analyses, presentations or tools built from it could be commercialized. This would leverage market forces to boost availability of insights about population health. Consumers could also access user-friendly information comparing price or value at potential sites of care.

Recommendations: Using Choice to Bring a Longer-Term View to Healthcare

- The administration should continue to publicly release and increase access to claims data from taxpayer-funded federal healthcare programs and encourage the private sector and states to build consumer-friendly websites capable of displaying price information for the most common transactions. The administration should work to ensure that such data are technically and financially accessible for third-party transparency advocates, vendors, developers, researchers, employers, state and local governments, and the general public.
- States should coordinate their efforts on maximizing the utility of claims data (consistent with all relevant federal and state privacy protections), including simplifying the process for reporting data and using a standard reporting format.

Healthcare Information Technology and Non-Competitive Healthcare Markets

Modern Computing and Non-Healthcare Markets

In the last two decades, we have seen transformations of many major markets, including airlines, autos, banking, brokerage, entertainment, lodging, music, printing, publishing,

AMERICAN OVERSIGHT

shipping, taxi and telephone industries driven, in part, through the availability of massive volumes of real-time price and service data. Information technology offers intriguing possibilities to transform healthcare markets as well by injecting information and competition into many points in the healthcare industry. With most American adults carrying smartphones, both the hardware and software required to assemble new combinations of real-time medical information—including data on care, nature of services, and provider prices—is widely available.

Current State of Healthcare Information Technology

Historically, healthcare IT systems have focused on revenue optimization, typically through support for large amounts of billing documentation required to maximize fee for service revenues from federal and private payers. In contrast to sectors of the economy with competitive markets where there is great focus on automation, hospitals and providers employ almost no automation. It is worthwhile to examine which non-market incentives and disincentives have driven the apparent disinterest in automation. Similarly, consumers also have very limited software tools to understand, shop for, purchase or participate in their healthcare. The limited consumer access to healthcare information has been largely limited to federally mandated portals.

A common theme throughout healthcare is the limited state of interoperability. Patients have very limited ability to obtain or move their records. Providers similarly have significant barriers to get healthcare information from other providers, including systems that cannot communicate with each other. Payers have effectively no access to electronic clinical data about their patients.

Currently, health information technology (health IT) too often facilitates anti-competitive practices. These practices include blocking clinical information exchange between providers, as well as selectively providing minimal support for regional information sharing. Another practice common to the highest-priced delivery systems is using a single health IT vendor that systematically and preferentially shares clinical data with other high-priced providers to the exclusion of competitors.[367] At least one health IT vendor has also engaged in policies where it effectively forced smaller hospitals to buy their software installs from larger local competitors[368].

AMERICAN OVERSIGHT

Importance of Interoperability

The ability to move the patient's clinical information from incumbent providers to competing providers is a key goal of interoperability and can promote competition and the growth of new and disruptive business models. Today this is the capability typically labeled as "interoperability." A broader model of interoperability that includes a network of patients and payers would also allow them to identify providers with best outcomes for specific procedures and treatments. It would also allow prescribers to see cost information about drugs prior to prescribing. Such interoperability would accelerate the development of consumer-facing apps that integrate medical healthcare, cost, and wellness data to help consumers make decisions about their care. Increasing interoperability may also empower consumers by lowering the switching costs that patients experience when moving from one provider to another. In its absence, providers can use the switching costs and barriers to entry associated with incompatible health information systems to impede patient mobility and competition between providers.

Barriers to Interoperability

Medical Complexity

The vast biologic complexity underlying human health is an intrinsic barrier to interoperability. This complexity means that a given diagnosis, treatment or procedure in medical records can be recorded in many different ways. Sharing the underlying biological, microbial, genetic and protein data is even harder.

Lack of Business Drivers

Most of United States healthcare employs a fee-for-service model, where clinicians and health systems bill patients or their payers for each service (test or procedure) used rather than for the value of that service. Under this model, a hospital can generate more revenue by ordering its own imaging or lab tests rather than using results previously gathered by another provider. The fee-for-service model provides little incentive to connect with other clinicians or service providers and leads to significant disconnects across the care continuum, including among long-term and post-acute care facilities, outpatient services and support providers, behavioral health providers, free-standing imaging centers, and emergency medical services.

Not surprising, health IT installations interoperate more readily with other sites under the same ownership. Across the country, large health systems are acquiring small hospitals and provider practices, and limiting communications outside of their own network. This network effect can raise barriers to entry and provider competition. These acquisitions are designed to allow the systems to dictate prices to insurers and to craft narrow referral networks that also result in higher prices and difficult or disproportionately costly access for out-of-network services. In cases where there are less-expensive local competitors,

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006042

health systems have reportedly blocked use of those services by refusing to allow electronic orders for those services, such as imaging tests, to be sent outside of their system.

Lack of Accessible Application Programming Interfaces

The consumer app economy has blossomed in recent years, due in great part to data holders publishing application programming interfaces (APIs) that open their databases to third-party software developers. For example, ride-sharing apps rely on many different APIs to offer their service (i.e., mapping APIs for location, banking APIs for payments). In contrast, most medical data captured in electronic health records (EHRs) today is not readily accessible through APIs. Typically, EHR developers have either not published their APIs, charged prohibitively high fees, or set onerous contractual conditions to use their APIs. Lack of API access discourages new market entrants and new business models. Even if API access were opened, however, different classification ontologies would limit their utility. Accordingly, this would need to be addressed as well.

Lack of Network Exchange

Most systems do not or cannot communicate with one another. There are currently more than 100 regional and state health-information networks. Additionally, some EHR developers have their own networks for their customers. Limited interoperability often affects patients who may be traveling and cannot retrieve their records from home. Typically, today's health information networks prohibit flow of information to non-providers who may also have important HIPAA-compliant[369] interests in that data, specifically insurers paying for those services.[370]

Therefore, it is often impracticable to query for information across networks for even one patient. Importantly there are also no standards-based APIs to allow payers to query provider EMR databases to get information about more than one of their patients at a time. Thus, payers have almost no computational way to get clinical data and have to rely on inference from claims data. Payers have a difficult time measuring and paying for care based on provider clinical performance and must rely on narrow quality measures or one-off data extracts to contract intelligently.

Overcoming Interoperability Barriers and the 21st Century Cures Act

Congress passed the 21st Century Cures Act in December 2016. Provisions in the act calling for usability and interoperability reflect the broad national consensus that the 2009 HITECH Act's $30 billion- plus EHR stimulus program did not materially address either usability or interoperability despite leading to widespread EHR purchases.

---

[369] HIPAA refers to the Health Insurance Portability and Accountability Act.

[370] Samal L, Dykes PC, Greenberg JO, et al. Care coordination gaps due to lack of interoperability in the United States: a qualitative study and literature review. *BMC Health Serv Res.* 2016 April 22;16:143. https://bmchealthservres.biomedcentral.com/articles/10.1186/s12913-016-1373-y. Accessed August 25, 2018.

AMERICAN OVERSIGHT

The 21st Century Cures Act provides powerful tools to increase the interoperability of health data and, by extension, market competition. Three pro-competitive provisions are worth noting specifically. First, the Cures Act defines information blocking broadly and outlaws it. In doing so, the Cures Act bans the practice of providers blocking access to an individual's health data. This will ease patients' ability to seek alternative providers or types of care. The legislation charged HHS with crafting a narrow set of exceptions to adequately address any concerns about privacy, security and appropriate patient care that might arise by enacting this provision.

A second major health IT provision of the Cures Act is the mandate to create a "Trusted Exchange Framework" and a "Common Agreement" to get the various health information networks to share data. ONC supervision here is needed to expand the "permitted purposes" of data sharing to facilitate data flow and more competitive markets.

The third key provision is the requirement that developers of certified electronic health records publish application programming interfaces and allow "health information from such technology to be accessed, exchanged, and used without special effort through the use of application programming interfaces." This "open API" requirement is designed to foster plug-and-play capability with apps. The "without special effort" provision means the API must use modern industry software design and healthcare interoperability standards. Importantly, the availability of an open API should allow for population-level queries of batch data. Today there is no reasonable data standard for an insurer to get easily computable data across the population of patients a provider sees. Moreover, American healthcare providers have almost no computational accountability for the care they provide. The national discussions about "learning health systems," "big data," and machine learning are meaningless without computational access to clinical data sets. That is why many large American payers are working in conjunction with ONC and the Health Level Seven International (HL7) FHIR standards group to build out these computational accountability standards.

CMS proposed requirements that promote interoperability of health data in their 2019 payment rules and is overhauling the EHR Incentive Program (formerly known as "Meaningful Use") to an interoperability-focused program now renamed "Promoting Interoperability." In the 2019 IPPS (Inpatient Prospective Payment System) rule, CMS has incentivized a number of interoperability measures including closing the referral loop through health information exchange and providing patients electronic access to view, download and transmit their data. The IPPS and other CMS payment rules in the public comment period also provide incentives to use the electronic health records certified to the 2015 standards (which support APIs). CMS' Blue Button 2.0 initiative allows Medicare beneficiaries complete access to their Medicare claims data and will significantly improve beneficiary experience by providing this data in a universal and secure digital format that patients can share with the care provider of their choosing. Giving patients complete access to their claims data will break down barriers to interoperability by allowing patients to see a full picture of their care encounters and prescriptions on the device of their choosing as

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006044

they share it with their care team. CMS is also calling on all health insurers to release their claims data in a similar fashion to the Blue Button 2.0 initiative so that all patients have the same benefits as Medicare beneficiaries.

To promote data sharing and care coordination further, CMS is ensuring that patients have access to their healthcare data after a hospital discharge, and that their data are transferred with them to their next care setting. ONC and CMS are working on identifying the key provider burdens generated by using current electronic medical records and working on strategies to address these burdens.

Recommendations: Improve Health IT

- The administration should expeditiously implement provisions of 21st Century Cures Act to prevent information blocking, make it easier for patients anywhere to get their core health information, support "Open Application Programming Interfaces" to allow patients to get data on their smart phones, and encourage support of population-level data queries to allow payers electronic access to clinical data.
- CMS and ONC should continue work on documentation burden reduction to allow EHRs to provide informative medical records rather than boilerplate text for providers and patients.
- CMS should continue its emphasis on fostering interoperability across the healthcare sector.
- CMS should continue its efforts to make data available to patients through efforts such as "MyHealthEData" and Blue Button 2.0.
- ONC should continue making standards more comprehensive and robust.

Appendix: Recommendations to Restore Choice and Competition to the Healthcare Sector

Recommendations: Address Potential Antitrust and Provider Consolidation

- The administration should continue monitoring market competition, especially in areas that may be less competitive and thus more likely to be affected by alternative payment models.
- The administration should ascertain the impact of horizontal and vertical integration among provider practices on competition and prices.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006045

Recommendations: Broaden Scope of Practice

- States should consider changes to their scope-of-practice statutes to allow all healthcare providers to practice to the top of their license, utilizing their full skill set.
- The federal government and states should consider accompanying legislative and administrative proposals to allow non-physician and non-dentist providers to be paid directly for their services where evidence supports that the provider can safely and effectively provide that care.
- States should consider eliminating requirements for rigid collaborative practice and supervision agreements between physicians and dentists and their care extenders (e.g., physician assistants, hygienists) that are not justified by legitimate health and safety concerns.
- States should evaluate emerging healthcare occupations, such as dental therapy, and consider ways in which their licensure and scope of practice can increase access and drive down consumer costs while still ensuring safe, effective care.

Recommendations: Improve Workforce Mobility

- States should consider adopting interstate compacts and model laws that improve license portability, either by granting practitioners licensed in one state a privilege to practice elsewhere, or by expediting the process for obtaining licensure in multiple states.
- The federal government should consider legislative and administrative proposals to encourage the formation of interstate compacts or model laws that would allow practitioners to more easily move across state lines, thereby encouraging greater mobility of healthcare service providers.

Recommendations: Facilitate Telehealth to Improve Patient Access

- States should consider adopting licensure compacts or model laws that improve license portability by allowing healthcare providers to more easily practice in multiple states, thereby creating additional opportunities for telehealth practice. Interstate licensure compacts and model laws should foster the harmonization of state licensure standards and approaches to telehealth.
- States and the federal government should explore legislative and administrative proposals modifying reimbursement policies that prohibit or impede alternatives to in-person services, including covering telehealth services when they are an appropriate form of care delivery. In particular, Congress should consider proposals modifying geographic location and originating site requirements in Medicare fee-for-service that restrict the availability of telehealth services to Medicare beneficiaries in their homes and in most geographic areas.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006046

- States generally should consider allowing individual healthcare providers and payers to mutually determine whether and when it is safe and appropriate to provide telehealth services, including when there has not been a prior in-person visit.
- Congress and other policymakers should increase opportunities for license portability through policies that maintain accountability and disciplinary mechanisms, including permitting licensed professionals to provide telehealth service to out-of-state patients.

Recommendations: Ease Restrictions on Foreign-Trained Doctors

- The Department of Health and Human Services, in coordination with the Accreditation Council for Graduate Medical Education (GME), should identify foreign medical residency programs comparable in quality and rigor to American programs. Graduates of such equivalent programs should be granted "residency waivers," allowing them to forgo completing an American residency and instead apply directly for state licensure.
- States should create an expedited pathway for highly qualified, foreign-trained doctors seeking licensure who have completed a residency program equivalent to an American GME program.

Recommendations: Streamline Federal Funding of Medical Education

- As proposed in the FY 2019 President's Budget, the federal government should streamline federal Health and Human Services spending on graduate medical education into a single graduate medical education grant program. The budget proposal also provides the Secretary with the authority to modify amounts distributed to hospitals based on the proportion of residents training in priority specialties or programs and based on other criteria identified by the Secretary, including addressing healthcare professional shortages and educational priorities.
- The administration should continue the work done by the HRSA's National Center for Health Workforce Analysis, which studies U. S. physician supply needs across specialties and geographic areas. HRSA should launch a study that will also assess:
    - The administration's workforce development programs.
    - Gaps between existing programs and future workforce needs and identifying actions needed to address them.

Recommendations: Repeal or Scale Back CON and COPA Requirements

- States should consider repeal of Certificate of Need (CON) statutes or, at a minimum, significantly scale back the scope of their CON regimes, for example

AMERICAN OVERSIGHT

by ensuring that competitors of CON applicants cannot weigh in on these applications.
- The FTC and its staff should make appropriate policy recommendations after completing ongoing research on the benefits and disadvantages of CON and COPA statutes and regimes.
- States should discontinue the use of COPAs to shield anti-competitive provider collaborations and mergers from antitrust scrutiny in the absence of any clear evidence that these regulatory schemes produce better results than market-based competition.

Recommendations: Amend Federal Trade Commission (FTC) Jurisdiction Over Nonprofits

- Congress should amend the Federal Trade Commission Act to extend FTC's jurisdiction to nonprofit healthcare entities to prevent unfair methods of competition.

Recommendations: Scrutinize Non-Compete Clauses and Other Restrictive Covenants

- States should scrutinize restrictive covenants such as non-compete clauses, particularly their impact on patient access to care and on the supply of providers.

Recommendations: Scrutinize Any-Willing-Provider (AWP) Laws

- Federal and state policymakers should carefully scrutinize the impact on competition and consumers of AWP laws, rules, and proposals, along with other restraints on network formation and selective contracting.

Recommendations: Loosen Network Adequacy Requirements

- The administration should continue to provide flexible network adequacy standards for Medicare Advantage and other federally sponsored programs and avoid stringent requirements that are not conducive to innovation and modern medicine and that do not allow states flexibility to meet their specific needs.
- Similarly, states should consider loosening network adequacy standards and avoid stringent requirements.

Recommendations: Loosen Insurance Rules and Mandates

- The administration should continue to work with Congress to enact legislation that remedies key problems resulting from the ACA, that promotes greater choice and competition in healthcare markets, and that produces a sustainable government healthcare financing structure.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006048

- Similarly, the administration should provide states with the maximum ability to expand healthcare choice and competition and create a sustainable financing structure.
- States should allow maximum consumer choice and competition in their healthcare markets, including through Association Health Plans and short-term limited-duration insurance.
- Congress should repeal the ACA's employer mandate consistent with the FY 2019 President's Budget.

Recommendations: Replace Restrictions on Physician-Owned Hospitals

- Congress should consider repealing the ACA changes to physician self-referral law that limited physician-owned hospitals.

Recommendations: Reconsider Section 1557 of the ACA

- The administration should reconsider regulations authored under Section 1557 of the ACA to ensure they do not create undue administrative burdens and serve as unnecessary barriers to entry that inhibit competition.

Recommendations: Realign Incentives

- Congress should expand consumers' abilities to benefit from Health Savings Accounts (HSAs), including by allowing a greater number of plans (e.g. any plan with an actuarial value below 70 percent) to be HSA-qualified plans, raising the contribution limit on HSAs, allowing people to use their HSA to pay HSA-qualified non-group premiums, allowing Medicare beneficiaries in enrolled high-deductible health plans to contribute to an HSA, and enabling consumers with HSAs to enter into provider-consumer fixed-fee arrangements, including direct primary-care arrangements.
- The administration should explore ways to administratively expand consumers' abilities to benefit from HSAs, including by interpreting preventive services to allow HSA-qualified plans greater ability to cover preventive low-cost treatments for chronic conditions.
- Consistent with Executive Order 13813, the administration should work through the regulatory process to increase the usability of HRAs, to expand employers' ability to offer HRAs to their employees, and to allow HRAs to be used in conjunction with non-group coverage.

Recommendations: Delivery System Reform

- The administration should focus on identifying alternative payment models that allow free markets and patients to define value, rather than rely on technical and burdensome definitions invented in Washington.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006049

- The administration should evaluate the best metrics for measuring value and quality in the healthcare sector, eliminating unnecessary and potentially counterproductive measures and reducing the burden on providers.
- The administration should ensure that smaller physician and provider practices are not unduly harmed by delivery system reform and corresponding requirements.
- The administration should ensure that these delivery system reform models, which aim to hold providers accountable to a set of population-based metrics and total spending, foster collaboration across systems within a geographic area and do not produce harmful consolidation, particularly horizontal consolidation.
- The Administration should pursue policies and programs that encourage value, competition, and choice, such as Medicare Advantage, and move away from a fee-for-service model.

Recommendations: Positively Realigning Incentives through Payment Reform

- Congress should establish site neutral payment policies based on the anticipated clinical needs and risk factors of the patient, rather than the site of service. In delivering these reforms, Congress should account for differing levels of patient acuity.
- State Medicaid programs should embrace site neutrality as a goal and reform their payment systems to pay for the value delivered where value is defined according to a relatively limited, straightforward, and non-gameable set of metrics. Additionally, metrics should not be designed and proposed solely by the entities to which they will ultimately apply.

Recommendations: Quality Improvement and the Measurement and Reporting of Quality

- As proposed by the Centers for Medicare and Medicaid Services' Patients over Paperwork initiative, the administration should streamline and standardize quality measures across programs to avoid duplicative reporting requirements and limit the number of measures where the expected cost of collecting the measure exceeds the expected benefit. In addition, the administration should collaborate with state Medicaid programs, private payers, and other government payers to align and streamline quality measures and reporting structures to reduce physician burden.
- The administration should seek to develop measures that are meaningful to providers and patients, and help them assess quality and value.
- The administration should focus on providing a framework for quality reporting in plain language that is more accessible and appealing to consumers.
- The administration should consider providing incentives and technical assistance to support the development of virtual provider groups (e.g., independent practice associations, alternative payment models, or regional quality collaboratives) that

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006050

can increase the competitiveness of small practices through access to shared resources and help build capacity for care management.

- HHS should explore opportunities to initiate research into machine learning techniques that can directly access data on CMS beneficiaries from the provider Electronic Medical Records (EMRs) using open application program interfaces in order to enable quality analysis and payments based on value while reducing burden and cost and benefitting the public.

Recommendations: Facilitate Price Transparency

- It should be a priority of this administration to ensure that patients are engaged with their healthcare decisions, and have the information they need to be savvy consumers of healthcare. Federal agencies should eliminate any federal rules or policies that create unnecessary barriers to state, federal or private sector initiatives that provide price transparency.
- The administration should consider legislative proposals to empower patients as they shop for healthcare by making it easier to pay directly.
- Congress should seek to empower patients as they shop around for healthcare by making it easier to pay for their healthcare directly. Actions might include:
    - Allowing all Americans, including Medicare beneficiaries, to maintain and contribute to a Health Savings Account, not only those enrolled in high deductible health plans.
    - Increasing flexibility for beneficiaries and providers in the Medicare program by allowing for direct negotiations between these parties so that beneficiaries can access services at a price or under a payment plan that works for them.
- Congress, federal agencies and states should incentivize providers to compete on price, including right to shop modeled on successful state efforts as well as understandable reference pricing models.

Recommendations: Using Choice to Bring a Longer-Term View to Healthcare

- The administration should continue to publicly release and increase access to claims data from taxpayer-funded federal healthcare programs and encourage the private sector and states to build consumer-friendly websites capable of displaying price information for the most common transactions. The administration should work to ensure that such data are technically and financially accessible for third-party transparency advocates, vendors, developers, researchers, employers, state and local governments, and the general public.
- States should coordinate their efforts on maximizing the utility of claims data (consistent with all relevant federal and state privacy protections), including simplifying the process for reporting data and using a standard reporting format.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006051

Recommendations: Improve Health IT

- The administration should expeditiously implement provisions of 21st Century Cures Act to prevent information blocking, make it easier for patients anywhere to get their core health information, support "Open Application Programming Interfaces" to allow patients to get data on their smart phones, and encourage support of population-level data queries to allow payers electronic access to clinical data.
- CMS and ONC should continue work on documentation burden reduction to allow EHRs to provide informative medical records rather than boilerplate text for providers and patients.
- CMS should continue its emphasis on fostering interoperability across the healthcare sector.
- CMS should continue its efforts to make data available to patients through efforts such as "MyHealthEData" and Blue Button 2.0.
- ONC should continue making standards more comprehensive and robust.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006052

PRESIDENT DONALD J. TRUMP IS WORKING TO PROMOTE CHOICE AND COMPETITION IN OUR HEALTHCARE SYSTEM

"The American people deserve a healthcare system that works for them, not one that takes advantage of them."
– President Donald J. Trump

PROMOTING CHOICE AND COMPETITION: The Trump Administration is tackling Federal and State rules that limit choice and competition in healthcare markets.

- Today, the Trump Administration released a report reviewing existing State and Federal laws, regulations, requirements, and policies that impede healthcare choice and competition.
- The report follows the President's 2017 executive order aimed at promoting healthcare choice and competition across the United States.
    - The report was authored by the Secretaries of Health and Human Services, Labor, and Treasury in collaboration with numerous Federal departments and agencies.
- The report identifies areas where Federal and State requirements limit healthcare choice and competition, including:
    - Rules reducing the supply of healthcare providers and the services they can offer.
    - Rules promoting consolidation and restricting entry into the healthcare market.
    - Government mandates that restrict choice in health insurance coverage.
    - Policies that limit consumer-driven care.

ADDRESSING FAILURES IN THE SYSTEM: Improving healthcare choice is critical to addressing the failures in our healthcare system that prevent patients from receiving the value they deserve.

- The Administration's report recommends policies that promote greater choice and competition to foster a healthcare system that delivers high-quality care at affordable prices.
- State and Federal requirements often create barriers to competition that stifle innovation, lead to higher prices, and may lower the quality of care.
- Despite ever-increasing healthcare expenditures, evidence shows that Americans, in general, are not leading longer, healthier lives.
    - Premiums and out-of-pocket costs in the individual and small group markets have skyrocketed.
    - The average premium has more than doubled since 2013.
    - Taxpayers are also bearing the burden, as government health programs now account for nearly half of all healthcare expenditures in the United States.

INCREASING CHOICE AND REDUCING COSTS: This report continues the President's determined effort to promote choice and competition in our Nation's healthcare system.

- Earlier this year, President Trump released a blueprint for reducing the high price of prescription drugs and out-of-pocket costs.
    - The Administration has taken a number of actions laid out in the blueprint designed to empower consumers and encourage competition.
- The Administration has brought Americans new freedom in their choice of health insurance:
    - Proposing a new rule to give employers flexibility in how they fund health benefits.
    - Broadening the availability of short-term, limited-duration insurance plans.
    - Expanding Association Health Plans for employers.
    - Eliminating Obamacare's burdensome individual mandate penalty.
- In Medicare, the Administration has introduced new measures around price transparency, opened up new choices in Medicare Advantage, and reduced seniors' prescription drug costs.

VIP Reception—Governor's Residence

Saturday, July 21, 5:30-6:30 p.m.

Governor Sandoval

[SANDOVAL OPENS]

THANK YOU ALL FOR JOINING US FOR THE FINAL VIP RECEPTION OF THE 2018 NGA SUMMER MEETING.

I HOPE YOU ALL HAD A WONDERFUL TIME AND CONTINUE TO DO SO THIS EVENING. SPECIAL THANKS TO GOVERNOR MARTINEZ FOR HOSTING US THIS EVENING.

I KNOW WE ARE ALL LEAVING SANTA FE ARMED WITH NEW IDEAS AND STRATEGIES TO ADVANCE OUR STATES AND IMPROVE OUR CONSTITUENTS' LIVES.

AT OUR FIRST RECEPTION, I SPOKE ABOUT THE SPIRIT OF THE WILD WEST, GUIDING US FORWARD INTO AN UNKNOWN FUTURE.

AMERICAN OVERSIGHT

I LEAVE MORE CONFIDENT THAN EVER THAT WE ARE BETTER PREPARED FOR WHATEVER MIGHT COME OUR WAY AS GOVERNORS.

THANK YOU ALL FOR GIVING ME THE IMMENSE PRIVILEGE OF LEADING THE NGA. EVEN THOUGH MY TIME AS CHAIR HAS ENDED, I LEAVE MORE CONFIDENT THAN EVER IN THE FUTURE OF THE ORGANIZATION AND THE NATION.

WE HAVE TWO FEARLESS CHAMPIONS OF GOVERNORS LEADING US. HAILING FROM THE GREAT STATE OF MONTANA, PLEASE JOIN ME IN WELCOMING MY DEAR FRIEND AND THE NEW CHAIR OF THE NATIONAL GOVERNORS ASSOCIATION, STEVE BULLOCK.

[GOV BULLOCK REMARKS]

[GOV MARTINEZ REMARKS]

[PATTISON REMARKS]

AMERICAN OVERSIGHT

Showdown at Bonanza Creek

Saturday, July 21, 6:30-9 p.m.

Governor Sandoval

[SANDOVAL OPENS]

WELCOME THE FINAL EVENT OF THE 2018 SUMMER MEETING. THE HARD WORK IS NOW COMPLETE, AND WE CAN REFLECT UPON OUR EXPERIENCE OVER THE PAST FEW DAYS.

SINCE THURSDAY, WE'VE HAD 14 CONFERENCE SESSIONS. WE'VE HEARD FROM ESTEEMED INTERNATIONAL DELEGATES AND INFLUENTIAL BUSINESS LEADERS.

WE PUT ASIDE PARTISANSHIP AND ATTEMPTED TO ANSWER ONE SIMPLE QUESTION: AS GOVERNORS, HOW CAN WE DO OUR JOBS BETTER?

AMERICAN OVERSIGHT

WHILE NONE OF US CAN BE PERFECT LEADERS, WE CAN ALL STRIVE TO IMPROVE. THE LAST FEW DAYS OFFERED US THE OPPORTUNITY TO GROW AS GOVERNORS TO BETTER SERVE OUR CONSTITUENTS BACK HOME.

WE DISCUSSED VEXING ISSUES SUCH AS ECONOMIC TRANSFORMATION AND THE OPIOID EPIDEMIC, WHICH CLAIMS THOUSANDS OF LIVES EVERY YEAR FROM ALL STATES.

IN ADDITION TO ADDRESSING THE ISSUES OF THE PRESENT, WE SECURED A BETTER GRASP ON WHAT THE FUTURE LOOKS LIKE.

WE ARE BETTER PREPARED TO MANAGE BOTH THE UPSIDES AND THE CHALLENGES OF ADVANCED TECHNOLOGY AND ALL OF US ARE BETTER PREPARED TO INNOVATE BACK IN OUR STATES.

AMERICAN OVERSIGHT

WE ALSO HAD SOME FUN ALONG THE WAY, SHARING LAUGHS AND FORGING RELATIONSHIPS THAT WILL PAY DIVIDENDS FOR YEARS TO COME. I SPEAK FOR ALL OF US WHEN I SAY OUR FEW DAYS IN SANTA FE WERE WELL SPENT.

IN ADDITION TO ACQUIRING NEW KNOWLEDGE, NGA ALSO GAINED A NEW CHAIR. GOVERNOR STEVE BULLOCK IS WELL-PREPARED TO LEAD THIS ORGANIZATION INTO THE FUTURE, AND I AM EXCITED ABOUT HIS NEW INITIATIVE FOCUSING ON CREATING GOOD JOBS FOR ALL AMERICANS.

I WOULD AGAIN LIKE TO THANK HIM FOR ALL HE DID AS NGA'S VICE CHAIR AND WISH HIM HIS FAMILY ALL THE BEST AS HE BEGINS HIS NEW ROLE.

ONE YEAR AGO, I STOOD BEFORE YOU AND VOWED TO RAISE AWARENESS ABOUT INNOVATIONS IN TECHNOLOGY, ENERGY AND TRANSPORTATION.

AMERICAN OVERSIGHT

THROUGHOUT THE LAST YEAR, I BELIEVE WE'VE MET OUR GOAL AND I LEAVE MY CHAIRMANSHIP MORE CONFIDENT IN THE FUTURE OF THE NGA THAN EVER BEFORE.

THANK YOU TO ALL THE GOVERNORS, GUESTS, INTERNATIONAL VISITORS AND PARTNERS ASSEMBLED HERE.

A HUGE THANK YOU TO THE NGA STAFF FOR ALL THE WORK THAT WENT INTO THIS MEETING AS WELL AS FOR ALL THE SUPPORT THEY'VE OFFERED TO US THROUGHOUT THE YEARS.

NGA BROUGHT TOGETHER DEMOCRATS AND REPUBLICANS TO DISCUSS POLICIES IMPROVING AMERICAN LIVES. WE CHECK THE POLITICS AT THE DOOR AND WORK TOGETHER TO SOLVE THE ISSUES PLAGUING OUR STATES.

THE BURDEN IS UPON US AS GOVERNORS, AS LEADERS AND AS AMERICANS, TO BRING THE GOODWILL AND COMRADERY EXPERIENCED HERE IN SANTA FE BACK TO OUR HOME STATES.

WE ALL FACE SERIOUS CHALLENGES WHILE GOVERNING.

AMERICAN OVERSIGHT

I HOPE THAT YOU WILL RETURN TO THOSE CHALLENGES WITH NEW IDEAS, NEW PERSPECTIVES AND NEW FRIENDS TO SUPPORT YOU AND THE PEOPLE YOU SERVE.

THANK YOU FOR THE OPPORTUNITY TO LEAD THE NGA. IT IS NOW MY HONOR TO INTRODUCE MY GOOD FRIEND AND THE NEWEST CHAIR OF THE NATIONAL GOVERNORS ASSOCIATION, STEVE BULLOCK.

Governor Bullock

[TRANSITION TO BULLOCK]

AMERICAN OVERSIGHT

Passing of the Gavel & Closing Plenary

Saturday, July 21, 3-4 p.m.

Governor Sandoval

[GOVERNOR SANDOVAL OPENS]

PLEASE TAKE YOUR SEATS SO WE CAN BEGIN.

WELCOME TO THE CLOSING SESSION OF THE 2018 NATIONAL GOVERNORS ASSOCIATION SUMMER MEETING.

[CLOSING CHAIRMANSHIP REMARKS]

IT'S BEEN SUCH AN HONOR TO LEAD THIS ORGANIZATION OVER THE LAST YEAR. WHEN I THINK BACK TO OUR LAST SUMMER MEETING IN RHODE ISLAND, I'M PROUD HOW FAR WE'VE COME AND ALL THAT WE HAVE ACCOMPLISHED TOGETHER.

AMERICAN OVERSIGHT

I DIDN'T LEAD THE NGA ALONE. THE ORGANIZATION'S ENTIRE STAFF WAS WITH ME EVERY STEP OF THE WAY.

THEIR BIPARTISAN COUNSEL WAS CRUCIAL NOT ONLY TO MY SUCCESS AS CHAIR, BUT ALSO TO OUR COLLECTIVE SUCCESS AS GOVERNORS.

I WOULD LIKE TO TAKE A MOMENT TO EXPRESS OUR GRATITUDE TO NGA CEO AND EXECUTIVE DIRECTOR SCOTT D. PATTISON AND THE ENTIRE STAFF FOR ALL THEIR ASSISTANCE OVER THE LAST YEAR.

[HOLD FOR APPLAUSE]

I WOULD ALSO LIKE TO THANK MY COLLEAGUES FOR SUPPORTING ME THROUGHOUT THIS JOURNEY.

WHEN WE LEFT PROVIDENCE LAST YEAR, I KNEW THAT WE HAD THE COLLECTIVE POTENTIAL TO POSITIVELY IMPACT THE LIVES OF AMERICANS IN EVERY CORNER OF THIS COUNTRY.

AMERICAN OVERSIGHT

I'M PROUD TO REPORT A YEAR LATER THAT WE DID JUST THAT AND I AM GRATEFUL TO EACH OF YOU FOR PLAYING A PART IN THAT EFFORT.

NGA BRINGS TOGETHER BOTH SIDES OF THE AISLE IN A TIME WHEN POLITICAL COOPERATION SEEMS TO BE INCREASINGLY RARE.

THE PAST FEW DAYS REAFFIRMED THAT GOVERNORS ARE PREPARED TO ROLL UP THEIR SLEEVES AND SHARE THE SOLUTIONS THAT HAVE WORKED IN THEIR STATES.

OVER THE PAST FEW DAYS WE'VE EATEN TOGETHER, LAUGHED TOGETHER, AND MOST IMPORTANTLY, WE LEARNED TOGETHER. NOW IS THE TIME TO PASS THE BATON.

I'M CONFIDENT THAT THE INCOMING CHAIR, GOVERNOR STEVE BULLOCK OF MONTANA, WILL CARRY ON THIS LEGACY OF BIPARTISAN POLICY EXCELLENCE.

AMERICAN OVERSIGHT

I AM GRATEFUL FOR THE SUPPORT HE OFFERED ME AS VICE CHAIR AND I AM EXCITED TO SEE ALL THE GREAT WORK THAT HE AND GOVERNOR HOGAN WILL DO FOR THE ORGANIZATION. I NOW RECOGNIZE GOVERNOR KATE BROWN FOR THE PURPOSE OF EXECUTIVE NOMINATIONS.

[TRANSITION TO OFFICIAL NOMINATIONS]

[GOVERNOR KATE BROWN WILL NOMINATE BULLOCK AND HOGAN]

[TRANSITION TO GOVERNOR SANDOVAL]

THANK YOU, GOVERNOR BROWN AND THE MEMBERS OF THIS YEAR'S NOMINATIONS COMMITTEE.

IS THERE A SECOND?

[NOTE: ANY OTHER GOVERNOR PRESENT MAY SECOND FROM THE FLOOR]

[GOVERNOR SANDOVAL]

IS THERE ANY DEBATE?

AMERICAN OVERSIGHT

[GOVERNOR SANDOVAL]

HEARING NONE, ALL GOVERNORS IN FAVOR OF ACCEPTING THE REPORT OF THE NOMINATIONS COMMITTEE PLEASE SAY AYE. ALL OPPOSED, NAY. THE AYES HAVE IT.

CONGRATULATIONS TO NGA'S NEW CHAIR, GOVERNOR STEVE BULLOCK, VICE CHAIR GOVERNOR LARRY HOGAN AND THE OTHER MEMBERS OF THE 2018-2019 NGA EXECUTIVE COMMITTEE.

[GAVEL PASSING (TBD)]

- **TBD**
- **IT IS NOW MY HONOR TO INTRODUCE MY COLLEAGUE, MY FRIEND AND THE NEW CHAIR OF NGA, GOVERNOR STEVE BULLOCK OF MONTANA.**

AMERICAN OVERSIGHT

Opening Plenary

Friday, July 20, 9-10 a.m.

Governor Sandoval

[SANDOVAL OPENS]

GOOD MORNING GOVERNORS, DISTINGUISHED INTERNATIONAL VISITORS AND GUESTS FROM BUSINESS, INDUSTRY, ACADEMIA, THE FEDERAL GOVERNMENT, PHILANTHROPIES AND CIVIL SOCIETY.

WELCOME TO THE 2018 SUMMER MEETING OF THE NATION'S GOVERNORS IN BEAUTIFUL SANTA FE, NEW MEXICO!

[INSERT FOR PRESENTATION OF FLAG AND SINGING OF ANTHEM]

AMERICAN OVERSIGHT

I AM PLEASED TO ONCE AGAIN COME TOGETHER WITH MY COLLEAGUES TO LEARN ABOUT THE KEY ISSUES OF THE DAY, LIKE HOW TO PREPARE OUR WORKFORCE FOR INCREASING AUTOMATION, HOW TO CONTINUE TO GROW OUR ECONOMIES AND WHAT IT MEANS TO BE A GOVERNOR IN AN INCREASINGLY GLOBAL WORLD.

WE HAVE A SPECIAL SESSION ON WOMEN IN LEADERSHIP WHERE WE WILL HEAR FROM LEADING CEOS. WE WILL SHARE IDEAS ON HOW TO TACKLE TOUGH CHALLENGES SUCH AS THE PERSISTENT OPIOID CRISIS. AND WE WILL DISCUSS HOW, TOGETHER, WE CAN DEVELOP BI-PARTISAN APPROACHES TO IMPROVE THE LIVES OF ALL AMERICANS.

THANK YOU, GOVERNOR SUSANA MARTINEZ AND FIRST GENTLEMAN CHUCK FRANCO, FOR BEING WONDERFUL HOSTS AND SHOWING US A FANTASTIC TIME HERE IN THE LAND OF ENCHANTMENT.

AMERICAN OVERSIGHT

WE ARE LOOKING FORWARD TO SEVERAL EXCELLENT SOCIAL EVENTS TO COMPLEMENT OUR BUSINESS SESSIONS. GOVERNOR MARTINEZ, CAN YOU PLEASE SHARE WITH US YOUR WELCOMING REMARKS.

[TRANSITION TO SUSANA MARTINEZ]

[TRANSITION BACK TO SANDOVAL AND CHAIR'S INITIATIVE]

THANK YOU, GOVERNOR MARTINEZ, FOR YOUR HOSPITALITY AND ALL THE WORK YOU DO FOR THE PEOPLE OF NEW MEXICO.

I AM EXCITED TO KICK OFF OUR MEETING WITH A SESSION DEDICATED TO THE THEME OF MY CHAIR'S INITIATIVE: *AHEAD OF THE CURVE: INNOVATION GOVERNORS.*

I LOOK FORWARD TO ENGAGING ALL OF YOU IN A DISCUSSION OF HOW WE AS GOVERNORS CAN PREPARE OUR STATES FOR THE INCREDIBLE TECHNOLOGY THAT IS TRANSFORMING OUR TRANSPORTATION AND ENERGY SECTORS AND SO MANY OTHER ASPECTS OF OUR DAILY LIVES.

AMERICAN OVERSIGHT

IT HAS BEEN MY HONOR TO SERVE AS NGA CHAIR THIS PAST YEAR AND EXPLORE WITH YOU THE TOPIC OF TECHNOLOGY INNOVATION.

I STAND HERE TODAY CONFIDENT THAT THE FOURTH INDUSTRIAL REVOLUTION IS TRULY UPON US.

AND, THANKS TO YOUR ENGAGEMENT AND YOUR STAFF'S PARTICIPATION, WE ARE ALL MUCH BETTER PREPARED TO TACKLE THE MANY POLICY, WORKFORCE, COMMUNICATIONS, CYBER AND OTHER CHALLENGES THAT GO ALONG WITH OUR MOVE TO A MORE CONNECTED, DIGITAL WORLD.

AS I PROMISED AT THE NGA SUMMER MEETING IN PROVIDENCE LAST YEAR, WE ARE WELL ON OUR WAY TO BECOMING "INNOVATION GOVERNORS" AND STAYING AHEAD OF THE CURVE.

I'D LIKE TO SHARE WITH YOU A FEW HIGHLIGHTS OF THE PAST YEAR AND HOW NGA WILL CONTINUE TO ENGAGE STATES IN THE FUTURE.

AMERICAN OVERSIGHT

WE'VE CAPTURED A FEW SPECIAL SCENES IN THE PLACEMAT YOU SEE BEFORE YOU. YOU'LL SEE THERE, THE LIST OF SPONSORS THAT HAVE PROVIDED INVALUABLE SUPPORT TO BOLSTER OUR EFFORTS. [NGA WILL HAVE PLACEMATS IN FRONT OF EACH OF THE GOVERNORS WITH THE "ABOUT THE INITIATIVE" SIDE SHOWING.]

WE BEGAN THE INITIATIVE IN RENO, NEVADA, WHERE WE GATHERED TO MAP OUT THE INITIATIVE AND TOUR THE STATE-OF-THE-ART SWITCH DATA CENTER, JUST AROUND THE CORNER FROM THE TESLA GIGA-FACTORY, HOME TO THE WORLD'S LARGEST PRODUCER OF LITHIUM-ION BATTERIES.

WHO COULD FORGET WHEN WE LAUNCHED THE INITIATIVE LAST JULY WITH A THOUGHT-PROVOKING DISCUSSION WITH TESLA CEO ELON MUSK AND A DRONE-DELIVERED GAVEL?

AMERICAN OVERSIGHT

WE THEN DOUBLED DOWN ON EXPLORING ENERGY INNOVATION THROUGH AN ENERGY INNOVATION SUMMIT HOSTED BY GOVERNOR HICKENLOOPER IN DENVER, THAT EXAMINED HOW SMART GRID TECHNOLOGIES, DISTRIBUTED GENERATION, ENERGY STORAGE, SENSORS FOR COAL AND NATURAL GAS OPERATIONS AND OTHER TECHNOLOGIES ARE CREATING AN ELECTRICITY SYSTEM THAT IS SAFER, MORE EFFICIENT, CLEANER AND MORE RESILIENT.

WE SAW THE LATEST TECHNOLOGIES IN ACTION AT THE SOLAR DECATHLON – IN NET-ZERO-ENERGY-USE HOUSES, BUILT BY COLLEGE STUDENTS NO LESS.

WE GATHERED AGAIN IN LAS VEGAS, NEVADA, FOR A TRANSPORTATION INNOVATION SUMMIT, WHERE WE WERE HOSTED BY THE CONSUMER TECHNOLOGY ASSOCIATION AT CES, THE WORLD'S LARGEST TECHNOLOGY SHOWCASE AND HEARD FROM THOUGHT-LEADERS ABOUT THE INCREDIBLE ADVANCEMENTS IN AUTONOMOUS VEHICLES, ELECTRIC VEHICLES, RIDE SHARING AND DRONES.

AMERICAN OVERSIGHT

WE TOOK RIDES IN AN AUTONOMOUS SHUTTLE AND IT WAS MY PLEASURE TO BE JOINED AT CES BY GOVERNOR BULLOCK AND GOVERNOR SNYDER TO HIGHLIGHT HOW STATES ARE TRULY THE LABORATORIES OF INNOVATION.

AT OUR NGA 2018 WINTER MEETING, I WAS THRILLED TO HAVE IBM CEO GINNI ROMETTY JOIN ME TO DISCUSS INNOVATION IN COMPUTATION AND STRATEGIES TO PREPARE THE WORKFORCE AND TO GIVE US ALL THE "BLOCKCHAIN FOR DUMMIES" LESSON WE'VE BEEN TOO AFRAID TO REQUEST.

IN TOTAL, WE ENGAGED OVER 150 OFFICIALS FROM A TOTAL OF 39 STATES AND HELPED THEM DEVELOP IDEAS FOR KEY ACTIONS TO IMPLEMENT BACK HOME.

WE ALSO ENGAGED ADDITIONAL THOUGHT-LEADERS AS PART OF AN AHEAD-OF-THE-CURVE PODCAST. I HOPE YOU WILL ALL GIVE IT A LISTEN ON YOUR TRAVELS BACK HOME.

AMERICAN OVERSIGHT

LAST BUT NOT LEAST, WE HELD A SPECIAL ROUNDTABLE AT DELOITTE'S INNOVATION GREENHOUSE IN SAN JOSE, TO GATHER INPUT ON A GROUNDBREAKING SET OF STATE INNOVATION ROADMAPS THAT I AM PLEASED TO PRESENT TO YOU TODAY.

IF YOU FLIP YOUR PLACEMATS TO THE OTHER SIDE, [PAUSE TO FLIP PLACEMATS] YOU WILL SEE A SNAPSHOT OF THOSE ROADMAPS—ONE COVERS TRANSPORTATION INNOVATION AND ONE COVERS ENERGY INNOVATION.

WE HAVE PRINTED COPIES OF EACH FOR YOU AS WELL, AND WE HOPE YOU WILL FIND THEM USEFUL TOOLS THAT PROVIDE YOU WITH A MENU OF OPTIONS TO DEVELOP YOUR OWN INNOVATION STRATEGIES.

[SMARTER STATES LAUNCH]

AMERICAN OVERSIGHT

WHILE MY INITIATIVE IS FORMALLY COMING TO AN END, WE KNOW THAT STATES CONTINUE TO SEEK WAYS TO TAKE ADVANTAGE OF NEW TECHNOLOGIES.

I AM PLEASED TO ANNOUNCE THAT TODAY, AS A LEGACY TO AHEAD OF THE CURVE, THE NATIONAL GOVERNORS ASSOCIATION IS LAUNCHING A NEW *SMARTER STATES, SMARTER COMMUNITIES* INITIATIVE.

THIS MULTIYEAR EFFORT TO HELP STATES USE DATA ANALYTICS, ADVANCED COMMUNICATIONS NETWORKS AND CONNECTED TECHNOLOGIES TO IMPROVE SAFETY, MOBILITY, EFFICIENCY AND PRODUCTIVITY FOR THE CITIZENS OF THEIR STATES.

THE EFFORT WILL START WITH A NGA LEARNING LAB LATER THIS YEAR, WHERE GOV. RAUNER SET OUT TO MAKE ILLINOIS THE FIRST "SMART STATE" AND ASKED NGA TO HELP DEVELOP A COHORT OF SMARTER STATES SO THAT WE CAN LEARN FROM EACH OTHER.

AMERICAN OVERSIGHT

I'M PLEASED TO ANNOUNCE THAT NGA HAS SELECTED THE STATES OF XX, XX, XX AND XX, [WILL HAVE FINALIZED THESE BY JULY 13] TO BE PART OF THAT FIRST COHORT.

WE APPRECIATE THE SUPPORT OF CROWN CASTLE, SAS, SIEMENS, VERIZON AND THE DEPARTMENT OF ENERGY [ADD MORE NAMES AS SPONSORS ARE FINALIZED] IN HELPING CREATE SMARTER STATES, SMARTER COMMUNITIES.

I HOPE YOU ALL TAKE SOME TIME TO VISIT THE SMARTER STATES EXPO AT THIS MEETING, WHERE LEADING TECHNOLOGY INNOVATORS WILL BE DEMONSTRATING SMART TECHNOLOGIES IN ACTION.

[MARBLE ROBOT DEMONSTRATION]

AMERICAN OVERSIGHT

WHILE I COULD FILL THE REST OF THE HOUR DESCRIBING TO YOU THE CONVERSATIONS WE HAD AND EXCITING TECHNOLOGY WE EXPERIENCED, I WOULD RATHER BRING YOU A LITTLE INNOVATION IN ACTION.

I NOW WELCOME TO THE MEETING FOR THE FIRST TIME, A SIDEWALK ROBOT.

THIS ROBOT OFFERS A GLIMPSE INTO THE FUTURE WHEN MEDICINES, GROCERIES AND OTHER ITEMS OF DAILY NEED WILL COME TO US BY AUTONOMOUS ROBOTS SUCH AS THIS ONE DEVELOPED BY THE MARBLE COMPANY BASED IN SAN FRANCISCO, CALIFORNIA.

I'M PLEASED THAT MARBLE CEO MATT DELANEY COULD JOIN US HERE TODAY.

AMERICAN OVERSIGHT

AS WE PLAY A SHORT VIDEO THAT SHOWS THE CAPABILITIES OF THE ROBOT IN MORE DETAIL, IT WILL HELP ME DELIVER TO YOU A SPECIAL GIFT TO HELP YOU REMEMBER THE GREAT STATE OF NEVADA.

[MARBLE ROBOT WILL LEAVE THE ROOM]

[TRANSITION TO FIRESIDE CHAT]

NOW, I PROMISED YOU A GREAT DISCUSSION TODAY AND I KNOW I CAN DELIVER WITH OUR NEXT GUEST.

A KEY ISSUE OF THIS INITIATIVE HAS BEEN AUTONOMOUS VEHICLES AND THE IMPACTS THEY WILL HAVE ON OUR LIVES.

MY OWN CLAIM TO FAME IS THAT I WAS THE FIRST GOVERNOR TO RIDE IN AN AUTONOMOUS CAR, BACK IN 2011.

AMERICAN OVERSIGHT

IT WAS KNOWN THEN AS THE "GOOGLE CAR" AND THE COMPANY HAS SINCE SPUN OUT THIS SPECIAL PROJECT INTO THE COMPANY THAT IS WAYMO TODAY.

IF YOU ARE NOT FAMILIAR WITH WAYMO, WE HAVE A BRIEF VIDEO TO INTRODUCE YOU A LEADER IN SELF-DRIVING CAR TECHNOLOGY.

[VIDEO PLAYS FOR 90 SECONDS]

I AM VERY PLEASED TO HAVE THE CEO OF THIS INNOVATIVE COMPANY, JOHN KRAFCIK, JOINING US THIS MORNING.

I HAD THE GREAT PLEASURE OF MEETING JOHN DURING MY RECENT TRIP TO SAN JOSE AND WAS INSPIRED BY THE VISION HE HAS FOR A SAFER, AUTONOMOUS FUTURE.

PLEASE JOIN ME IN WELCOMING JOHN TO THE STAGE FOR A FIRESIDE CHAT THAT WE'LL FOLLOW UP WITH SOME Q&A WITH THE GOVERNORS.

AMERICAN OVERSIGHT

[KRAFCIK JOINS SANDOVAL ON STAGE]

THANK YOU FOR JOINING US JOHN. WE ARE VERY EXCITED TO HAVE YOU WITH US TODAY.

WAYMO IS ON THE LEADING EDGE OF DEVELOPING AUTONOMOUS VEHICLE TECHNOLOGY, BUT, I SUSPECT THAT SOME GOVERNORS MAY NOT REALIZE THAT WAYMO HAS BEEN LEADING IN THIS SPACE FOR NEARLY A DECADE.

[TRANSITION TO Q & A]

CAN YOU SHARE WITH US HOW WAYMO WAS FOUNDED, AND WHAT MAJOR PROJECT IS IN THE WORKS? AND BEFORE WE DO A DEEP DIVE ON HOW THIS REVOLUTIONARY TECHNOLOGY WILL IMPACT OUR LIVES, CAN YOU GIVE US A BRIEF PRIMER ON THE TECHNOLOGY BEHIND YOUR AUTONOMOUS VEHICLES?

AMERICAN OVERSIGHT

[JOHN KRAFCIK ANSWER]

THE VIDEO WE JUST SAW SHOWED THE WAYMO CARS ON THE ROAD IN A STATE RIGHT NEXT DOOR TO HERE, IF I AM NOT MISTAKEN? CAN YOU TALK ABOUT WHAT WAYMO HAS LEARNED FROM THE RIDERS, AND HOW THEY ARE REACTING TO TRAVELING IN AN AUTONOMOUS VEHICLE?

[JOHN KRAFCIK ANSWER]

THERE WAS A BELIEF THAT MANY IN THE TECHNOLOGY SECTOR WHO WERE PUSHING THIS ENVELOPE WOULD COME OUT WITH THEIR OWN VEHICLES AND COMPETE WITH THE LEGACY AUTO COMPANIES, BUT IT SEEMS LIKE THE OPPOSITE HAS OCCURRED. WAYMO AND OTHERS ARE ENTERING INTO AGREEMENTS TO PURCHASE VEHICLES FROM EXISTING COMPANIES AND USE THEIR SOFTWARE EXPERTISE TO MODIFY THEM TO BE AUTONOMOUS.

AMERICAN OVERSIGHT

CAN YOU TALK ABOUT THE RECENT ANNOUNCEMENTS FROM WAYMO ABOUT THE PURCHASE OF VEHICLES, AND WHY YOU HAVE TAKEN THIS PATH INSTEAD OF DEVELOPING YOUR OWN VEHICLES FROM SCRATCH?

[JOHN KRAFCIK ANSWER]

WITH SUCH A LARGE FLEET OF VEHICLES ON THE ROAD, HOW ARE YOU GOING TO MANAGE CLEANING AND MAINTAINING THE VEHICLES, AND WHERE WILL THEY BE STORED DURING SLOW PERIODS? RIGHT NOW, IT FALLS TO THE DRIVER TO CLEAN THEIR CAR AND BRING IT IN FOR TUNE-UPS AND OIL CHANGES, AND PARK IT IN A GARAGE, ON THE STREET, OR IN A DRIVEWAY.

WILL WAYMO ESTABLISH VEHICLE DEPOTS LIKE HOW TRANSIT DISTRICTS HAVE LARGE BUS DEPOTS OR RAIL YARDS?

[JOHN KRAFCIK ANSWER]

AMERICAN OVERSIGHT

WHILE ON THE TOPIC OF THE VEHICLES, CAN WE TALK ABOUT THE PROPULSION? LAST SUMMER WE HAD ELON MUSK WITH US, AND HE TALKED ABOUT THE FUTURE BEING BOTH AUTONOMOUS AND ELECTRIC.

IN NEVADA, WE HAVE MADE A CONCERTED EFFORT TO PREPARE FOR THE INCREASE OF EVS BY BUILDING OUT AN ELECTRIC HIGHWAY SYSTEM TO ELIMINATE RANGE ANXIETY FOR DRIVERS. IS WAYMO PREPARING FOR A FLEET OF EVS?

[JOHN KRAFCIK ANSWER]

I IMAGINE THE ENGINES MAY BE EASIER TO MAINTAIN THAN A FLEET FOR TRADITIONAL VEHICLES IN USE ALL DAY LONG.

I THINK ALL OF US ARE INTRIGUED BY THE CONCEPT OF SELF-DRIVING VEHICLES, AND 36 STATES HAVE EITHER ENACTED LEGISLATION OR EXECUTIVE ORDERS TO ESTABLISH GUIDELINES FOR THEIR TESTING AND OPERATION, WITH NEVADA BEING THE FIRST OF COURSE, BACK IN 2011.

AMERICAN OVERSIGHT

ONE OF THE GREATEST POTENTIAL BENEFITS OF THIS TECHNOLOGY IS THE POTENTIAL TO SIGNIFICANTLY REDUCE THE TRAFFIC FATALITIES OUR NATION SEES EVERY YEAR, A STAGGERING 37,461 LIVES LOST IN 2016, OR ABOUT ONE DEATH EVERY MINUTE.

RECENTLY, THOUGH, WE HAVE ALL SEEN THE NEWS ABOUT ACCIDENTS OR INCIDENTS INVOLVING AUTONOMOUS VEHICLES WHICH HAS SPURRED DEBATE ABOUT THE SAFETY OF HAVING THESE VEHICLES ON THE ROADS TODAY.

HOW DO YOU RESPOND TO THESE CONCERNS? IS IT TIME TO SLOW DOWN AND DO MORE VIRTUAL TESTING, INSTEAD?

[JOHN KRAFCIK ANSWER]

AMERICAN OVERSIGHT

THE ROADMAP ON TRANSPORTATION INNOVATION WE HAVE RELEASED TODAY GOES INTO GREAT DEPTHS ON THE POTENTIAL BENEFITS, CHALLENGES AND CONCERNS THAT STATES NEED TO GRAPPLE WITH AS AUTONOMOUS VEHICLES ENTER THE TRANSPORTATION SYSTEM.

THESE RANGE FROM IMPROVED SAFETY ON THE ROADS AND INCREASED PRODUCTIVITY FOR WORKERS, TO INCREASED VEHICLE MILES TRAVELED AND THE POTENTIAL LOSS OF JOBS DUE TO AUTOMATION.

CAN YOU TALK ABOUT SOME OF THE BENEFITS THIS TECHNOLOGY? DO YOU HAVE ANY CONCERNS ABOUT THE TECHNOLOGY? HOW CAN THOSE BE ADDRESSED THROUGH PREEMPTIVE POLICY CHANGES?

[JOHN KRAFCIK ANSWER]

AMERICAN OVERSIGHT

HOW CAN WE IN THE GOVERNMENT, OR YOU IN THE PRIVATE SECTOR OR MAYBE BOTH OF US IN A PARTNERSHIP EDUCATE THE PUBLIC ABOUT THIS TECHNOLOGY, ITS BENEFITS AND THE FUTURE THAT IS ON THE HORIZON?

[JOHN KRAFCIK ANSWER]

THERE WAS A RECENT ANNOUNCEMENT THAT WAYMO HAS TEAMED UP WITH UBER, FORD AND OTHERS IN THIS SPACE TO LOOK AT THE IMPACTS OF AUTONOMOUS VEHICLES ON THE NATION'S WORKFORCE.

THE IMPACT OF THIS TECHNOLOGY ON JOBS IS SOMETHING WE HEAR FROM MANY GOVERNORS.

CAN YOU TALK BRIEFLY ABOUT THIS PARTNERSHIP AND HOW WE CAN PROACTIVELY ADDRESS THIS ISSUE?

[JOHN KRAFCIK ANSWER]

AMERICAN OVERSIGHT

ONE THING I WANT TO GET YOUR THOUGHTS ON IS TIED TO THE TIMELINE OF THE TECHNOLOGY.

SELF-DRIVING CARS ARE CLEARLY GOING TO CHANGE TRAFFIC PATTERNS AND TRANSPORTATION CHOICES.

WE PROBABLY WON'T NEED AS MANY PARKING GARAGES, WE MIGHT NOT NEED HIGHWAY LANES TO BE AS WIDE AS THEY ARE, AND METERED PARKING SPOTS MAY BECOME EXTINCT.

HOWEVER, AS GOVERNORS WE ARE ROUTINELY FACED WITH MAKING DECISIONS ABOUT INFRASTRUCTURE INVESTMENTS THAT HAVE A LIFESPAN OF 30, 50 OR EVEN 75 YEARS.

ARE WE BUILDING THINGS TODAY WE WILL NOT NEED 20 YEARS FROM NOW, AND IF SO, HOW CAN WE MAKE SURE WE ARE NOT LEAVING OUR CHILDREN WITH STRANDED ASSETS THEY DO NOT NEED BUT MUST CONTINUE TO PAY FOR?

[JOHN KRAFCIK ANSWER]

AMERICAN OVERSIGHT

ARE THERE THINGS WE SHOULD BE INVESTING IN TODAY THAT ARE NOT A PRIORITY FOR OUR STATE AND LOCAL GOVERNMENTS, OR ARE THERE CHANGES WE SHOULD MAKE TO THE INFRASTRUCTURE WE ARE BUILDING TODAY?

[JOHN KRAFCIK ANSWER]

GOVERNORS LIKE TO BE ACTIVE. WE TOOK THESE JOBS BECAUSE WE WANT TO GET THINGS DONE.

WE WANT TO MAKE LIFE BETTER FOR OUR CITIZENS, IMPROVE THE OPPORTUNITIES FOR OUR EMPLOYERS, ENHANCE THE SAFETY, RELIABILITY AND RESILIENCY OF OUR INFRASTRUCTURE AND, YES, LEAVE A BETTER WORLD FOR ALL OUR CHILDREN.

WHAT ADVICE WOULD YOU GIVE TO GOVERNORS FOR THE ACTIONS THEY CAN TAKE TO PROMOTE TRANSPORTATION INNOVATION WHILE PROTECTING THE PUBLIC?

[JOHN KRAFCIK ANSWER]

AMERICAN OVERSIGHT

[BEGIN Q & A WITH GOVERNORS]

I WOULD LIKE TO INVITE OTHER GOVERNORS TO JOIN IN THE DISCUSSION AND SHARE THEIR QUESTIONS ABOUT INNOVATION WITH JOHN.

[SANDOVAL—CLOSING]

PLEASE JOIN ME IN THANKING JOHN FOR HELPING US LEARN MORE ABOUT WHAT WE AS GOVERNORS CAN DO TO STAY AHEAD OF THE CURVE AND PREPARE OUR STATES AND THE CITIZENS WE SERVE FOR THE FUTURE.

I HOPE EVERYONE ENJOYED THE CONVERSATION AND IS READY FOR MORE TO COME THROUGHOUT THE WEEKEND. STAY TUNED FOR OUR NEXT PLENARY HERE SHORTLY. THANK YOU.

AMERICAN OVERSIGHT

La Noche de Fuego

Friday, July 20, 6-9 p.m.

Governor Sandoval

[GOVERNOR SANDOVAL OPENS]

WELCOME. THANK YOU TO THE GOVERNORS, THEIR FAMILIES, NGA SPONSORS AND SPECIAL GUESTS FOR COMING TONIGHT.

DAY TWO OF THE NGA SUMMER MEETING IS NOW IN THE BOOKS. I KNOW THAT I'VE LEARNED SO MUCH FROM MY COLLEAGUES, NGA PARTNERS AND THE PANELISTS, AND I HOPE YOU ALL FEEL THE SAME WAY.

MUCH LIKE LAST NIGHT, OUR GOAL NOW IS TO REFLECT ON TODAY'S EVENTS AND CONNECT WITH EACH OTHER.

I HOPE YOU ALL HAVE A WONDERFUL EVENING AND ENJOY THE PROGRAM TONIGHT.

AMERICAN OVERSIGHT

SPECIAL THANKS TO THE KIWANIS CLUB FOR THEIR WORK TO PUT TOGETHER WHAT I'M SURE WILL BE A MEMORABLE PROGRAM.

IF YOU WOULD PLEASE JOIN ME IN WELCOMING GOVERNOR BULLOCK TO SAY A FEW WORDS.

[TRANSITION TO BULLOCK]

AMERICAN OVERSIGHT

Governors Only—Opportunity Zones

Friday, July 20, 3:45-5 p.m.

Governor Sandoval

[SANDOVAL OPENS AND CALLS MEETING TO ORDER]

[COG READ OUT—TBD BY NGA]

FOR OUR NEXT ORDER OF BUSINESS, WE WILL TURN TO A DISCUSSION ON THE NEWLY ESTABLISHED OPPORTUNITY ZONES PROGRAM, WHICH CAME OUT OF THE TAX REFORM BILL LATE LAST YEAR.

OUR STATES HAVE ALL MADE SELECTIONS FOR WHICH AREAS WOULD BE BEST SERVED BY RECEIVING AN OPPORTUNITY ZONES DESIGNATION, AND NOW WE MUST TURN OUR ATTENTION TO HOW TO BEST LEVERAGE AVAILABLE POLICY TOOLS TO GUARANTEE ECONOMIC DEVELOPMENT AND JOB GROWTH IN THESE LESSER SERVED COMMUNITIES.

AMERICAN OVERSIGHT

JOINING US TODAY TO PROVIDE POLICY AND MESSAGING CONSIDERATIONS AS YOU DEVELOP YOUR STATE OPPORTUNITY ZONES' STRATEGIC PLAN ARE TWO EXPERTS IN THE ECONOMIC DEVELOPMENT FIELD.

FIRST, WE HAVE JOHN LETTIERI, THE PRESIDENT AND CO-FOUNDER OF THE ECONOMIC INNOVATION GROUP. AT EIG, JOHN LEADS THE ORGANIZATION'S POLICY DEVELOPMENT, ECONOMIC RESEARCH AND LEGISLATIVE AFFAIRS EFFORTS.

PRIOR TO CO-FOUNDING EIG, JOHN WAS THE VICE-PRESIDENT OF PUBLIC POLICY AT THE ORGANIZATION FOR INTERNATIONAL INVESTMENT AND SERVED AS A FOREIGN POLICY AIDE FOR FORMER U.S. SENATOR CHUCK HAGEL.

NEXT, WE HAVE SARAH BIANCHI, SENIOR ADVISOR AT THE GOVERNANCE PROJECT, WHERE SHE HAS BEEN FOCUSED ON THE IMPLEMENTATION OF THE OPPORTUNITY ZONES PROGRAM.

AMERICAN OVERSIGHT

PRIOR TO JOINING THE GOVERNANCE PROJECT, SARAH SERVED IN THE CLINTON WHITE HOUSE ON THE DOMESTIC POLICY COUNCIL AND IN THE OBAMA ADMINISTRATION AS THE DEPUTY ASSISTANT TO THE PRESIDENT FOR ECONOMIC POLICY AND THE DIRECTOR OF POLICY FOR VICE PRESIDENT BIDEN.

OUTSIDE OF HER PUBLIC SERVICE WORK, SARAH HAS WORKED AS A MANAGING DIRECTOR AT BLACKROCK, AN INVESTMENT ADVISOR AT ETON PARK CAPITAL AND MOST RECENTLY AS THE GLOBAL HEAD OF POLICY DEVELOPMENT AT AIRBNB.

I WILL NOW TURN IT OVER TO JOHN TO BEGIN FOR HIS OPENING REMARKS.

[TRANSITION TO JOHN LETTIERI FOR HIS REMARKS]

[TRANSITIONS BACK TO SANDOVAL]

AMERICAN OVERSIGHT

THANK YOU, JOHN. WE WILL NOW TURN TO SARAH FOR SOME INSIGHTS ABOUT WHAT SPECIFIC STRATEGIES AND POLICIES GOVERNORS CAN CONSIDER AS THEY DEVELOP THEIR OPPORTUNITY ZONES PLAN.

[TRANSITIONS TO SARAH BIANCHI FOR HER REMARKS]

[TRANSITIONS BACK TO SANDOVAL]

THANK YOU, SARAH. I WOULD NOW LIKE TO OPEN UP THE FLOOR TO ALL GOVERNORS FOR ANY QUESTIONS THAT YOU MIGHT HAVE FOR OUR PANELISTS, OR TO HEAR ABOUT ANY SPECIFIC STRATEGIES THAT YOUR STATE MIGHT ALREADY BE EMPLOYING.

[SANDOVAL CONCLUSION]

THANK YOU TO EVERYONE WHO PARTICIPATED IN TODAY'S CONVERSATIONS. I LOOK FORWARD TO SEEING YOU ALL AT THE SOCIAL EVENTS TONIGHT, AND FOR ANOTHER GREAT DAY OF DIALOGUE TOMORROW.

AMERICAN OVERSIGHT

Govs-Only Joint Lunch on Transition - Former Governors Panel

Saturday, July 21, 12:15 p.m.-1:30 p.m.

12:40pm
[GOVERNOR SANDOVAL]
KICK OFF

I AM PLEASED TO KICK OFF A SPECIAL JOINT LUNCH SESSION FOR GOVERNORS AND CHIEFS OF STAFF.

GIVEN THE NUMBER OF GUBERNATORIAL ELECTIONS AND GOVERNOR SERVING IN THEIR FINAL YEAR, I HAVE ASKED SCOTT TO MODERATE A TALENTED PANEL OF FORMER GOVERNORS WHO WILL SHARE THEIR WORDS OF WISDOM AND PRACTICAL ADVICE ABOUT GOVERNING STRONG DURING THE FINAL YEAR IN OFFICE AND LIFE AFTER BEING GOVERNOR.

DON'T WORRY THERE WILL BE AMPLE TIME FOR QUESTION AND ANSWER AND OPEN DISCUSSION.

AMERICAN OVERSIGHT

SO LET'S GET STARTED. PLEASE JOIN ME IN WELCOMING

FORMERS GOVERNORS:

- **GEORGE ALLEN OF VIRGINIA**
- **JIM EDGAR OF ILLINOIS**
- **JOHN ENGLER OF MICHIGAN**
- **JANE SWIFT OF MASSACHUSETTS**

12:45pm (SCOTT PATTISON) REMARKS

1:15 pm
AUDIENCE QUESTION

1:30pm (SCOTT WILL WRAP UP and CLOSE SESSION)

AMERICAN OVERSIGHT

Governors Only—NGA's Response to School Safety & SCOTUS: Implications for the States

Saturday, 8:30am – 10:00am

Governor Sandoval

[GOV SANDOVAL]

GOOD MORNING, GOVERNORS.

THANK YOU FOR JOINING US ON THIS EARLY MORNING. WE HAVE AN EXCITING DAY AHEAD.

BEFORE WE HAVE A CONVERSATION ABOUT THIS YEAR'S SUPREME COURT RULINGS AND HOW STATES CAN RESPOND, I WANT TO TURN IT OVER TO NGA'S CEO SCOTT PATTISON TO DISCUSS HOW NGA IS ADDRESSING THE SCHOOL VIOLENCE EPIDEMIC THROUGH BIPARTISAN ASSISTANCE TO STATES.

AMERICAN OVERSIGHT

THIS EFFORT INCLUDES THREE DIVISIONS FROM THE CENTER FOR BEST PRACTICES: HOMELAND SECURITY AND PUBLIC SAFETY, EDUCATION AND HEALTH.

SCOTT, WHAT CAN YOU TELL US ABOUT THIS ISSUE THAT WEIGHS ON THE MINDS OF EVERYONE IN THIS ROOM?

[SCOTT PATTISON REMARKS]

THANK YOU, SCOTT. SPEAKING ON BEHALF OF MY COLLEAGUES, WE APPRECIATE KNOWING THAT NGA CAN QUICKLY MOBILIZE ITS RESOURCES TO PROVIDE SUPPORT TO GOVERNORS WHEN FACED WITH AN UNANTICIPATED CHALLENGE.

I KNOW HOW MUCH WORK HAS BEEN PUT INTO THE SCHOOL SAFETY RESPONSE, AND I WANT TO THANK YOU FOR THESE EFFORTS.

AMERICAN OVERSIGHT

NOW, WE WILL TURN TO A DISCUSSION ABOUT THE SUPREME COURT TERM THAT JUST CONCLUDED AT THE END OF JUNE.

NO TERM IN RECENT MEMORY HAS RESULTED IN THIS MANY DECISIONS HAVING SUCH SIGNIFICANT IMPLICATIONS FOR GOVERNORS AND OUR STATES.

JOINING US TODAY TO SHARE THEIR INSIGHTS ARE TWO EXPERTS WHO ARE PREPARED TO DISCUSS WHAT GOVERNORS SHOULD BE THINKING ABOUT AS A STATE-SPECIFIC RESPONSE TO SEVERAL KEY DECISIONS OF THE COURT.

NOTE: GOVERNOR DAUGAARD MAY WANT TO INTRODUCE ERIC CITRON IN WHICH CASE, JUST RECOGNIZE GOVERNOR DAUGAARD AND THEN INTRODUCE A.G. BURNETT.

AMERICAN OVERSIGHT

FIRST, IT IS MY PLEASURE TO INTRODUCE ERIC CITRON. ERIC IS A PARTNER AT THE FIRM OF GOLDSTEIN & RUSSELL, IN THEIR SUPREME COURT PRACTICE.

PREVIOUSLY, ERIC CLERKED FOR TWO JUSTICES OF THE SUPREME COURT: SANDRA DAY O'CONNOR AND ELENA KAGEN, FOLLOWING EARLIER CLERKSHIPS IN THE FEDERAL DISTRICT AND APPEALS COURTS.

I THINK IT'S FAIR TO SAY THAT ERIC KNOWS HIS WAY AROUND A FEDERAL COURTROOM.

MOST RELEVANT TO OUR SESSION TODAY, ERIC WAS A COUNSEL FOR THE PETITIONER IN THE RECENTLY ANNOUNCED *SOUTH DAKOTA V. WAYFAIR* OVERTURNING *QUILL* AND *BELLA HESS,* WHICH NOW ALLOWS STATES TO COLLECT TAXES ON SALES FROM COMPANIES WITHOUT A PHYSICAL PRESENCE IN A STATE.

AMERICAN OVERSIGHT

NEXT, IT IS MY PLEASURE TO INTRODUCE MY FRIEND A.G. BURNETT.

A.G. IS A PARTNER AT THE FIRM OF MCDONALD CARANO, AND FROM 2012 UNTIL LAST DECEMBER, A.G. WAS CHAIR OF THE NEVADA GAMING CONTROL BOARD.

I INVITED HIM TO COME TODAY TO SHARE HIS PERSPECTIVES ON THE SUPREME COURT'S DECISION IN THE *MURPHY* DECISION, ALLOWING STATES TO DECIDE WHETHER TO ALLOW SPORTS GAMING.

I WILL NOW TURN IT OVER TO ERIC TO BEGIN FOR HIS OPENING REMARKS.

[ERIC CITRON REMARKS]

AMERICAN OVERSIGHT

[GOV SANDOVAL]

THANK YOU, ERIC.

NOW, I WILL TURN IT OVER TO A.G. FOR SOME INSIGHTS ABOUT WHAT SPECIFIC STRATEGIES AND POLICIES GOVERNORS CAN CONSIDER AS A RESPONSE TO THE *MURPHY* DECISION.

[A.G. BURNETT REMARKS]

THANK YOU, A.G.

I WOULD NOW LIKE TO OPEN UP THE FLOOR TO ALL GOVERNORS FOR QUESTIONS FROM OUR SPEAKERS, OR TO SHARE ANY SPECIFIC STRATEGIES THAT YOUR STATE HAS ALREADY EMPLOYED.

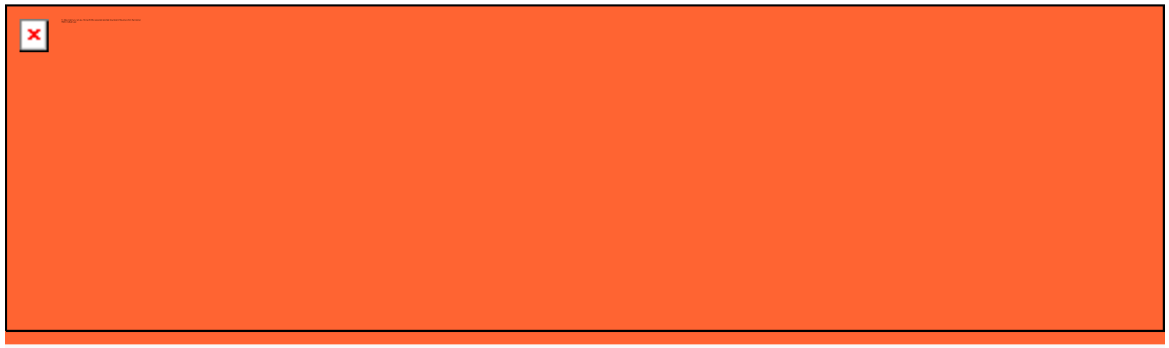
[OPEN DISCUSSION]

AMERICAN OVERSIGHT

[GOV SANDOVAL]

THANK YOU, EVERYONE, AND ESPECIALLY THANKS TO ERIC AND A.G.

WE GAINED MANY VALUABLE INSIGHTS INTO HOW TO RESPOND TO THE RECENT DECISIONS FROM THE SUPREME COURT.



WE ARE NOW ADJOURNED.

AMERICAN OVERSIGHT

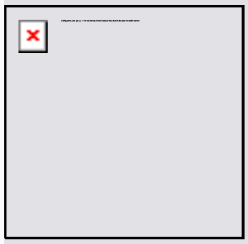
Subject: Reminder - 2018 Milken Institute Global Conference

View web version

Dear Daniel,

We look forward to having you join us at the **2018 Milken Institute Global Conference**.



The details of the event are summarized below.

Event:	2018 Milken Institute Global Conference
Attending:	Daniel Schwartz
Confirmation Number:	HHNB6YS7VHC
Date:	Sunday, April 29, 2018 - Wednesday, May 2, 2018
Location:	The Beverly Hilton
Address:	9876 Wilshire Blvd., Beverly Hills, California 90210, USA
Dress Code:	Business Attire
Credential Pick-up:	**Click here** for credential pick-up information
Local Area Guests:	**PRE-PURCHASE A PARKING PASS HERE**
Beverly Hilton Guests:	Guests with accommodations at the Beverly Hilton do not need to pre-pay for parking.

AMERICAN OVERSIGHT

Note: The entrance to the Beverly Hilton from Santa Monica Blvd. will be closed Monday through Wednesday.

Please bring a photo ID with you to registration.

POLITICO's 'Morning Money' Comes to Global Conference

Click here to subscribe.

Be sure to sign up for "Morning Money" author Ben White's daily coverage of Global Conference. Beginning April 29, White, Politico's chief economic correspondent, will write a special edition of the "Morning Money" newsletter focused exclusively on the people and events at the conference.

Add this event to your calendar

Subject: Reminder - Invitation to the GCMAC Conference Call - Q1 2018

Dear Daniel,

You were recently invited to **GCMAC Conference Call - Q1 2018** on Tuesday, March 20, 2018 and we have not received a response yet.

Please view the below invitation and respond by clicking the RSVP button.

We hope you are able to join us.

Dear Daniel,

Please join us Tuesday, **March 20, 2018 at 5:00 PM – 6:00 PM PST**, for our **Q1 GCMAC Conference Call**. This is an opportunity to have a wide-ranging conversation on the global markets with **Michael Milken**, chairman of the Milken Institute; **Christopher Ailman**, co-chairman of GCMAC and chief investment officer of the California State Teachers' Retirement System; **Hiromichi Mizuno**, co-chairman of GCMAC, executive managing director and chief investment officer of Japan's GPIF; and featuring perspectives from several of our members.

In addition to quarterly conference calls, GCMAC comes together at our major conferences and summits. The Milken Institute will next be convening GCMAC at our annual **Global Conference (April 29 – May 2 in**

AMERICAN OVERSIGHT

Los Angeles). The theme of this year's conference is "Navigating a World in Transition." In both the Q1 GCMAC Conference Call and Global Conference, GCMAC will be exploring regional developments and the state of global markets, among other topics.

RSVP FOR THE CALL

Unable to attend? Click here

Please also save these dates for Institute events and GCMAC programming coming up:

- **Global Conference** – April 29 – May 2, 2018 (Los Angeles)
- **Asia Summit** – September 13 – 14, 2018 (Singapore)
- **London Summit** – December 4, 2018 (London)

About our speakers:

Michael Milken
Mike Milken, chairman of the Milken Institute, has been at the forefront of successful initiatives in medical research, education, public health and access to capital for more than four decades. *Fortune* magazine called him "The Man Who Changed Medicine" and a recent *Forbes* cover listed him among "Visionaries Reimagining Our Children's Future." In 1982, he formalized previous philanthropy by co-founding the Milken Family Foundation. He also chairs *FasterCures*, which speeds progress against all life-threatening diseases. He hosted the Milken Institute Future of Health Summit in Washington, D.C., October 23-24, 2017, and will host the 21st annual Milken Institute Global Conference, April 29-May 2, 2018, in Los Angeles. The Milken Institute School of Public Health at George Washington University was named to recognize an Institute gift. As a financier, Mike is often said to have revolutionized modern capital markets by pricing and rewarding risk more efficiently. The thousands of companies he financed created millions of jobs.

A graduate of the University of California at Berkeley, Mike earned his M.B.A. at the Wharton School. He and his wife of 48 years, Lori, have three children and nine grandchildren. For more information, see mikemilken.com.

Christopher Ailman
Christopher Ailman is chief investment officer of the $202 billion California State Teachers' Retirement System, the largest teachers' fund and the second-largest pension fund in the United States. As chief investment

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006108

officer, he leads an investment staff of 155 across eight divisions. Ailman has more than 30 years of institutional investment management experience. He is co-chair of the Milken Institute's Global Capital Markets Advisory Council. Ailman has received numerous awards and recognitions, including the aiCIO Innovation Award, and was named the No. 3 chief investment officer in the world by aiCIO magazine in 2013. He is a regular guest on CNBC and Bloomberg radio and TV. Ailman earned a B.A. in business economics from the University of California, Santa Barbara, and received his certified financial planner designation from the University of Southern California.

Hiromichi Mizuno
Hiromichi Mizuno is executive managing director and chief investment officer of Japan's Government Pension Investment Fund. Previously, he was a partner at Collar Capital, a London based private-equity firm, and held senior posts at Sumitomo Trust & Banking Co., Ltd. Mizuno is an executive advisor to the Hiroshima Innovation Platform and to the Japanese Cabinet on Health Care and Medical Promotion Strategy. He is a guest professor at the Osaka University Graduate School of Medicine and the Kindai University Global Economic Research Center. About **GCMAC**: For nearly a decade, GCMAC has provided CIOs of the world's largest pension funds, endowments, foundations, insurance companies and sovereign wealth funds with a private, off-the-record forum to discuss the opportunities and challenges facing institutional investors. Featuring investors who represent more than $20 trillion in assets under management, these curated roundtable discussions are designed to help investors understand immediate and long-term macroeconomic trends. In coming to Global Conference, you will receive an invitation to participate in one of these discussions as well as invitations to a number of private meetings and roundtables that are available to GCMAC members.

Subject: Reminder: You Are Invited to Our 2018 MENA Summit

View web version

Please join us for the inaugural **Milken Institute MENA Summit**, an exclusive, invitation-only event that will convene the brightest minds in business, government, technology, medicine and philanthropy to address the most pressing issues in the region and around the world.

Featured Speakers

This event will gather senior leaders from the MENA region, the United States, Asia, and Europe to foster powerful, solutions-oriented conversations. The Summit's full list of speakers will be released at the end of January.

The Milken Institute is pleased to announce a featured speaker of the MENA Summit:

AMERICAN OVERSIGHT

Featured Panels

- ☐ International Capital Flows: Strategic Investment for Sustainable Growth
- ☐ Navigating Investments from Cryptocurrencies to Blockchain
- ☐ Prioritizing Precision, Prevention, and Innovation in Healthcare
- ☐ AI and the Future of Work in MENA
- ☐ Urban Farming, Agritech, and Food Security in the Middle East

To view our current public agenda, please visit the 2018 MENA Summit page on the Milken Institute website **here**.

**Note, the 2018 MENA Summit schedule is subject to change.*

WESTERN GOVERNORS' ASSOCIATION

Policy Resolution 2019-XX

Compensatory Mitigation – Version 1

A. BACKGROUND

1. Through their sovereign and statutory powers, states have primary management authority over all fish and wildlife within their borders. Following decades of work by staff and contractors, states have developed extensive science, expertise, and knowledge of species within their borders.

2. Governors bear responsibility for managing state interests, authorities and property rights within state borders – including fish and wildlife – and oversee state agencies charged with properly managing wildlife, habitat and related resources within their states.

3. States are the primary recipients of economic benefits associated with healthy species and ecosystems. At the same time, the economic costs of compliance with federal environmental regulations can fall disproportionately on western states and local communities. States recognize the importance of economic development and note that it is often not possible to both advance an economic development project and entirely avoid negative impacts to fish and wildlife populations and habitat.

4. Compensatory mitigation plays an important role in wildlife management and conservation, and states rely on its use in developing and executing species conservation strategies. Compensatory mitigation strategies employed by states include, but are not limited to, habitat restoration, establishment, enhancement, or conservation activities.

5. The mitigation hierarchy is a commonly referenced and widely utilized strategy in determining compensatory mitigation requirements for resource development projects. The mitigation hierarchy consists of first avoiding adverse impacts to wildlife populations and habitat where practicable, then minimizing adverse impacts where they cannot be avoided. The final step in the mitigation hierarchy is employing compensatory mitigation measures to replace or offset adverse impacts that remain following avoidance and minimization. This practice is memorialized under the Council of Environmental Quality's implementing regulations and other federal policy and guidance.[1]

6. While states exercise primary management authority over fish and wildlife within their borders, habitat for fish and wildlife often spans a patchwork of land ownership types, complicating state efforts to manage and conserve species under their management jurisdiction. This is particularly challenging in western states, where federal ownership constitutes a generally higher percentage of overall land ownership.

B. GOVERNORS' POLICY STATEMENT

1. States have the responsibility to establish appropriate statutes, regulations, policies and programs to manage fish and wildlife within their borders. This responsibility extends to

[1] 40 CFR 1508.20

DRAFT

AMERICAN OVERSIGHT

the development of compensatory mitigation standards and implementation of compensatory mitigation for species under their management purview.

2. Compensatory mitigation approaches vary from state to state, but they are designed to fully offset residual impacts to habitat function. Governors recognize that habitat functionality is the primary metric by which mitigation outcomes are measured. Compensatory mitigation efforts must sufficient to fully offset residual impacts to habitat function at the site-specific and range-wide scale necessary to meet conservation goals.

3. Where state mitigation standards are in place, consistency with existing state policy should be the primary guiding principle for a federal agency's development or implementation of compensatory mitigation on lands within their management authority or jurisdiction.

4. Western Governors urge federal agencies to adopt and implement state-supported compensatory mitigation programs and policies. Consistency between federal mitigation standards and those in state-supported programs allows wildlife managers, state and federal regulators, and developers to use a consistent compensatory mitigation program across differing land ownership within a state.

5. Western Governors recognize that that the diversity of conceivable species, habitat and project-specific circumstances make quantifying measures, with clearly defined goals, for compensatory mitigation difficult. Governors are concerned about federal agencies' potential inconsistent use and lack of assessment criteria for ambiguous mitigation goals such as "net conservation gain," and they believe that measures should be designed to avoid inappropriate uses of such a goal.

6. Western Governors recognize that mitigation of development impacts to habitat or natural resources must account for a level of risk and uncertainty that a particular compensatory mitigation action may fail to adequately offset adverse impacts to wildlife and habitat. Federal agencies should acknowledge a variety of tools and measures for incorporating risk and uncertainty based on the diverse experience of states in designing and implementing compensatory mitigation programs.

7. Governors believe that federal mitigation policies should be developed in coordination with Governors, and the state agency officials they designate, to achieve the following objectives:

    - Provide measurable and documentable habitat and conservation values, services and functions that are at least equal to the lost or degraded values, services and functions caused by the impact.

    - Incorporate measures to account for a level of risk that a particular compensatory mitigation action may fail or not achieve its stated objectives, and uncertainty about the level and duration of estimated impacts.

    - Provide benefits that are durable and in place for at least the duration of the residual adverse impacts.

    - Encourage the application of compensatory mitigation offsets prior to the impact occurring to ensure no lag time occurs between impacts and offsets.

DRAFT

AMERICAN OVERSIGHT

- Offer transparency and certainty to developers and regulators. This necessitates early and substantive consultation with States and consistency with State designed compensatory mitigation standards where they exist.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct WGA staff to work with Congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

DRAFT

AMERICAN OVERSIGHT

AMENDED AND RESTATED
ARTICLES OF INCORPORATION
OF
WESTERN GOVERNORS' FOUNDATION

Pursuant to the provisions of the Colorado Revised Nonprofit Corporation Act (the "Act"), Western Governors' Foundation, a Colorado nonprofit corporation (the "Corporation"), adopts the following Amended and Restated Articles of Incorporation. The Amended and Restated Articles of Incorporation constitute an amendment and restatement of the original Articles of Incorporation of the Corporation filed with the Colorado Secretary of State on April 2, 1985; correctly set forth the current provisions of the Articles of Incorporation of the Corporation, as amended, and restated; and supersede the Corporation's original Articles of Incorporation and all amendments and supplements thereto or restatements thereof. The Corporation has no voting members and the Amended and Restated Articles of Incorporation were duly adopted by unanimous consent of the Board of Directors of the Corporation on _____, 2018.

ARTICLE I

The name of the Corporation is Western Governors' Foundation.

ARTICLE II

The period of its duration shall be perpetual.

ARTICLE III

The Corporation is organized exclusively for charitable, scientific, literary or educational purposes within the meaning of and pursuant to section 501(c)(3) of the Internal Revenue Code of 1986 (or under the corresponding provision of any future United States Internal Revenue law). Within the scope of the foregoing purposes, the Corporation shall be organized and operated exclusively (i) for the benefit of, (ii) to perform the functions of, or (iii) to carry out the purposes of Western Governors' Association ("WGA"), a Colorado nonprofit corporation, and a governmental unit within the meaning of section 170(b)(1)(A)(v) of the Code. If WGA is dissolved for any reason and is no longer in existence, the purpose of the Corporation shall be to support the governmental units (within the meaning of section 170(b)(1)(A)(v) of the Code) whose Governors were the members of WGA at the time of its dissolution. References in these Articles of Incorporation to the "Code" shall be to the Internal Revenue Code of 1986, as amended from time to time.

ARTICLE IV

A. No part of the income or net earnings of the Corporation shall inure to the benefit of, or be distributable to, any member, director or officer of the Corporation or any other private individual (except that reasonable compensation may be paid for

DRAFT

AMERICAN OVERSIGHT

services rendered to or for the Corporation affecting one or more of its purposes, and reimbursement may be made for any expenses incurred for the Corporation by any officer, director, agent or employee, or any other person or corporation, pursuant to a policy adopted by the Board of Directors); and provided further that no member, director or officer of the Corporation, or any other private individual shall be entitled to share in any distribution of any of the corporate assets on dissolution of the Corporation or otherwise. No substantial part of the activities of the Corporation shall consist of carrying on propaganda or otherwise attempting to influence legislation, except as otherwise provided in section 501(h) of the Code. The Corporation shall not participate in or intervene in (including the publishing or distributing of statements) any political campaign on behalf of, or in opposition to, any candidate for public office.

B. No part of the assets of the Corporation shall inure to the benefit of or be distributable to any organization whose income or net earnings or any part thereof inure to the benefit of any private shareholder or other individual or any substantial part of the activities of which consists of carrying on propaganda or otherwise attempting to influence legislation.

C. Upon dissolution of the Corporation, all of its assets shall be paid over or transferred to WGA, but if WGA is no longer in existence or is no longer qualified to receive assets from the Corporation, then such assets shall be distributed to one or more exempt organizations of the kind described in section 501(c)(3) of the Code, or to governmental units within the meaning of section 170(b)(1)(A)(v) of the Code, as determined by the Board of Directors of the Corporation.

D. Notwithstanding any other provision hereof, this Corporation shall not conduct or carry on any activities not permitted to be conducted or carried on by an organization which is tax exempt under the provisions of section 501(c)(3) of the Code.

E. Notwithstanding any other provision of these Articles during any period that the Corporation is a "private foundation" within the meaning of section 509 of the Code, the Corporation shall be required to distribute its income for each taxable year of the Corporation at such time and in such manner as not to subject the Corporation to tax under section 4942 of the Code; and the Corporation shall be prohibited from engaging in any act of self-dealing as defined in section 4941(d) of the Code, from retaining any excess business holdings in violation of the provisions of section 4943(c) of the Code, from making any investments in such manner as to subject the Corporation to tax under section 4944 of the Code, and from making any taxable expenditures as defined in section 4945(d) of the Code.

ARTICLE V

The Corporation shall have no voting members and all business affairs of the Corporation shall be conducted by its Board of Directors.

AMERICAN OVERSIGHT

ARTICLE VI

The address of the registered office of the Corporation is 1600 Broadway, Suite 1700, Denver, CO 80202, and the name of its initial registered agent at such address is Dan Baer.

ARTICLE VII

The address of the principal office of the Corporation is 1600 Broadway, Suite 1700, Denver, CO 80202.

ARTICLE VIII

There shall be no personal liability, either direct or indirect, of any director of the Corporation to the Corporation or to its members for monetary damages for any breach or breaches of fiduciary duty as a director; except that this provision shall not eliminate the liability of a director to the Corporation or to its members for monetary damages for any breach, act, omission or transaction as to which the Colorado Revised Nonprofit Corporation Act (as in effect from time to time) prohibits expressly the elimination of liability. This provision shall not limit the rights of directors of the Corporation for indemnification or other assistance from the Corporation. This provision shall not restrict or otherwise diminish the provisions of section 13-21-115.7, Colorado Revised Statutes (concerning no liability of directors except for wanton and willful acts or omissions), any amendment or successor provision to such section, or any other law limiting or eliminating liabilities. Any repeal or modification of the foregoing provisions of this Article by the members of the Corporation or any repeal or modification of the provision of the Colorado Revised Nonprofit Corporation Act which permits the elimination of liability of directors by this Article shall not affect adversely any elimination of liability, right or protection of a director of the Corporation with respect to any breach, act, omission, or transaction of such director occurring prior to the time of such repeal or modification.

ARTICLE IX

The Articles of Incorporation and the Bylaws of the Corporation may be altered, amended or repealed by the affirmative vote of a majority of the full Board of Directors of the Corporation provided that, if WGA is then in existence, any such alteration, amendment or repeal is approved by the affirmative vote of two-thirds of the members of the WGA Board of Directors.

The (a) name or names, and (b) mailing address or addresses, of any one or more of the individuals who cause this document to be delivered for filing, and to whom the Secretary of State may deliver notice if filing of this document is refused, are:

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006122

BYLAWS
OF
WESTERN GOVERNORS' FOUNDATION

(a Colorado Nonprofit Corporation)

ARTICLE I.
OFFICES

1. Business Offices. The principal office of the corporation shall be located at such place as may be designated by the corporation from time to time in filings with the Secretary of State of Colorado. The corporation may have such other offices, either within or without the State of Colorado, as the Board of Directors may determine or as the affairs of the corporation may require from time to time.

2. Registered Office. The corporation shall have and continuously maintain in the State of Colorado a registered office, and a registered agent whose office is identical with such registered office, as required by the Colorado Revised Nonprofit Corporation Act. The registered office may be, but need not be, identical with the principal office if the principal office is in the State of Colorado. The address of the registered office may be changed from time to time by the corporation as long as the proper filings are made with the Secretary of State of Colorado.

ARTICLE II.
NO VOTING MEMBERS

The corporation shall have no voting members and the Board of Directors shall be elected as provided in Article III below.

ARTICLE III.
BOARD OF DIRECTORS

1. General Powers. The affairs of the corporation shall be managed under the direction of its Board of Directors. Directors need not be residents of the State of Colorado, but they shall be natural persons who are at least eighteen years of age.

2. Number, Tenure and Qualifications. The number of Directors shall be between three and nine. The number of Directors within that range shall be fixed or changed from time to time by the Board of Directors. Directors serving in that capacity at the time of the adoption of these revised and restated bylaws shall continue to serve as Directors for two years from that time or until their death, removal or resignation. All successor Directors shall be appointed by Western Governors' Association, a Colorado nonprofit corporation ("WGA"), to serve for a term of up to four years. Each Director shall serve for the term for which they are elected and until their successor shall have been appointed or elected and qualified, or until such Director's earlier death, resignation or removal. A Director may serve successive terms if reappointed or reelected.

DRAFT

AMERICAN OVERSIGHT

At least a majority of the members of the Board of Directors shall not be disqualified persons (as defined in Section 4946 of the Internal Revenue Code of 1986, as amended (the Code)) other than foundation managers.

It is the intention of the corporation that it be regarded as "operated, supervised or controlled by" WGA within the meaning of Section 509(a)(3)(B)(i) of the Code.

3. Removal. The Directors may be removed with or without cause by WGA at any time by giving written notice to the Director who is being removed and to the corporation. Such removal shall be effective when the notice of removal is received by both the Director to be removed and the corporation unless the notice states a later effective date.

4. Meetings. The Board of Directors shall meet at least one time each year at a meeting designated as the annual meeting and called by the Chairperson of the Board. Additional meetings may be called by the Chairperson of the Board or upon the written request of at least two Directors. All meetings shall be held at the time and place designated by the Chairperson of the Board.

5. Notice of Meetings. Notice of each meeting of Directors shall be given to each Director. If such notice is given (a) by personally delivering written notice to a Director, (b) by personally telephoning such Director, or (c) by delivering notice to such Director by electronic mail, it shall be so given at least two (2) days prior to the meeting. If such notice is given either (y) by depositing a written notice in the United States mail, postage prepaid, or (z) by transmitting a facsimile directed to such Director, it shall be so given at least four (4) days prior to the meeting. Notice shall be sent to the street or electronic addresses or facsimile numbers of the Directors set forth in the corporation's records. The notice of all meetings shall state the place, date and hour thereof, but need not, unless otherwise required by statute, state the purpose or purposes thereof.

6. Quorum. Two-Thirds of the Board of Directors shall constitute a quorum for the transaction of business at any meeting of the Board; but if less than two-thirds of the Directors are present at said meeting, a majority of the Directors present may adjourn the meeting from time to time without further notice.

7. Manner of Acting. The act of two-thirds of the Directors shall be the act of the Board of Directors, unless the act of a greater number is required by law or by these bylaws.

8. Vacancies. Any vacancy occurring in the Board of Directors, including any vacancy resulting from the removal of a Director or from an increase in the number of Directors, shall be filled by WGA. A Director appointed or elected to fill a vacancy shall be elected for the unexpired term of his or her predecessor in office.

9. Compensation. Directors as such shall not receive any stated salaries for their services, but by resolution of the Board of Directors a fixed sum and expenses of attendance, if any, may be allowed for attendance at each meeting of the Board; but

AMERICAN OVERSIGHT

nothing herein contained shall be construed to preclude any Director from serving the corporation in some other capacity and receiving compensation therefor.

10. Informal Action by Directors. Any action required by law or permitted to be taken at a meeting of Directors may be taken without a meeting if notice is transmitted in writing to each member of the Board and each member of the Board by the time stated in the notice: (x) votes in writing for such action; or (y) (i) votes in writing against such action, abstains from voting, or fails to respond or vote; and (ii) fails to demand in writing, that action not be taken without a meeting. The notice required by this Section shall state (a) the action to be taken; (b) the time by which a Director must respond; (c) that failure to respond by the time stated in the notice will have the same effect as abstaining in writing by the time stated in the notice and failing to demand in writing by the time stated in the notice that action not be taken without a meeting; and (d) any other matters the corporation determines to include. Action is taken under this Section only if at the end of the time stated in the notice transmitted pursuant to this Section the affirmative votes in writing for such action received by the corporation and not revoked equal or exceed the minimum number of votes that would be necessary to take such action at a meeting at which all of the Directors then in office were present and voted, and the corporation has not received a written demand that such action not be taken without a meeting other than a demand that has been revoked. A writing by a Director under this Section shall be in a form sufficient to inform the corporation of the identity of the Director, the vote, abstention, demand, or revocation of the Director, and the proposed action to which such vote, abstention, demand or revocation relates. All communications under this Section may be transmitted or received by the corporation by electronically transmitted facsimile, electronic mail, or other form of wire or wireless communication. For purposes of this Section, communications to the corporation are not effective until received.

11. Meetings by Telephone. Members of the Board of Directors or any committee designated thereby may hold or participate in a meeting of the Board of Directors or such committee by means of conference telephone or similar communications equipment provided that all such persons so participating in such meeting can hear each other at the same time.

ARTICLE IV.
OFFICERS

1. Officers. The officers of the corporation shall be a Chairperson of the Board, a Vice Chairperson of the Board, a President, and such other officers as may be elected in accordance with the provisions of this Article. The Board of Directors may elect or appoint such other officers as it shall deem desirable, such officers to have the authority and perform the duties prescribed, from time to time, by the Board of Directors. The Chairperson of the Board and the Vice Chairperson of the Board shall be elected from among the members of the Board. No individual may simultaneously hold more than one office in the Corporation. The officers must be natural persons who are at least eighteen years of age.

AMERICAN OVERSIGHT

2. Election and Term of Office. The officers of the corporation shall be elected annually by the Board of Directors at the next regular meeting of the Board of Directors following the annual meeting of the Board of Directors. If the election of officers shall not be held at such meeting, such election shall be held as soon thereafter as conveniently may be. New offices may be created and filled at any meeting of the Board of Directors. Each officer shall hold office until his or her successor shall have been duly elected and shall have qualified.

3. Removal. Any officer elected or appointed by the Board of Directors may be removed by the Board of Directors at any time with or without cause, but such removal shall be without prejudice to the contract rights, if any, of the officer so removed.

4. Vacancies. A vacancy in any office because of death, resignation, removal, disqualification or otherwise, may be filled by the Board of Directors for the unexpired portion of the term.

5. Chairperson of the Board. The Chairperson of the Board shall preside at meetings of the Board of Directors, shall consult with the President and keep generally advised about the state of the corporation and shall perform such other duties as may be determined by the Board.

6. Vice Chairperson of the Board. The Vice Chairperson of the Board shall perform the duties of the Chairperson of the Board in case of the absence or resignation of the Chairperson or inability of the Chairperson to act.

7. President. The President shall be the principal executive officer of the corporation and shall in general supervise and control all of the business and affairs of the corporation. He or she shall preside at all meetings of the Board of Directors if the offices of Chairperson and Vice Chairperson of the Board are vacant or the Chairperson and Vice Chairperson are absent or unable to act. The President may sign contracts or other instruments which the Board of Directors has authorized to be executed, except in the cases where the signing and execution thereof shall be expressly delegated by the Board of Directors or by these bylaws or by statute to some other officer or agent of the corporation; and in general he or she shall perform all duties incident to the office of President and such other duties as may be prescribed by the Board of Directors from time to time.

The President shall have charge and custody of and be responsible for all funds and securities of the corporation; and, with the assistance of staff of the corporation, shall receive and give receipts for moneys due and payable to the corporation from any source whatsoever, and deposit all such moneys in the name of the corporation in such banks, trust companies or other depositaries as shall be selected by the Board of Directors.

The President shall be the custodian of the corporate records and shall ensure that minutes of the meetings of the Board of Directors are kept in one or more books provided for that purpose. With the assistance of staff of the corporation, the President

AMERICAN OVERSIGHT

shall see that all notices are duly given in accordance with the provisions of these bylaws or as required by law, and shall keep a register of the post-office and email addresses of each Director which shall be furnished to the President by such Director.

ARTICLE V.
COMMITTEES

1. Committees of Directors. The Board of Directors may create one or more committees of the Board and appoint one or more Directors to serve on them, by vote of a majority of all Directors in office, which committees shall have and exercise the authority of the Board of Directors in the management of the corporation as may be delegated to such committee by the Board of Directors, except that no such committee shall have the authority of the Board of Directors in reference to authorizing distributions, electing, appointing or removing any Director, amending articles of incorporation, amending, altering or repealing the bylaws; approving a plan of merger, or approving a sale, lease exchange or other distribution of all, or substantially all of the corporation's property, with or without goodwill, otherwise than in the usual and regular course of business.

2. Advisory Committees. The corporation may have other committees similarly appointed which shall not have the authority of the Board of Directors in the management of the corporation and which shall serve solely as advisory committees to the Board.

3. Term of Office. Committees may be terminated and members may be appointed and removed from committees as determined by the Board of Directors from time to time.

ARTICLE VI.
STANDARDS OF CONDUCT FOR OFFICERS AND DIRECTORS

Each Director shall discharge the Director's duties as a Director, including the Director's duties as a member of a committee of the Board, and each officer with discretionary authority shall discharge the officer's duties under that authority: (a) in good faith; (b) with the care an ordinarily prudent person in a like position would exercise under similar circumstances; and (c) in a manner the Director or officer reasonably believes to be in the best interests of the corporation. A Director or officer may rely on information, opinions, reports, or statements, including financial statements and other financial data, if prepared or presented by: (i) one or more officers or employees of the corporation whom the Director or officer reasonably believes to be reliable and competent in the matters presented; (ii) legal counsel, a public accountant, or other person as to matters the Director or officer reasonably believes are within such person's professional or expert competence; or (iii) in the case of a Director, a committee of the Board of Directors of which the Director is not a member if the Director reasonably believes the committee merits confidence.

A Director or officer is not acting in good faith if the Director or officer has knowledge concerning the matter in question that makes reliance otherwise permitted

AMERICAN OVERSIGHT

by the above unwarranted. A Director or officer is not liable as such to the corporation for any action taken or omitted as a Director or officer, if, in connection with such action or omission, the Director or officer performed the duties of the position in compliance with this Article.

ARTICLE VII.
CONFLICTING INTEREST TRANSACTIONS

1. Conflicting Interest Transactions. As used in this Article, "conflicting interest transaction" means: a contract, transaction, or other financial relationship between the corporation and a Director of the corporation, or between the corporation and a party related to a Director, or between the corporation and an entity in which a Director of the corporation is a Director or officer or has a financial interest.

2. Prohibition Against Loans to Directors or Officers. No loans shall be made by the corporation to its Directors or officers. Any Director or officer who assents to or participates in the making of any such loan shall be liable to the corporation for the amount of such loan until the repayment thereof.

3. Voidability of Conflicting Interest Transactions. No conflicting interest transaction shall be void or voidable or be enjoined, set aside, or give rise to an award of damages or other sanctions in a proceeding by or in the right of the corporation, solely because the conflicting interest transaction involves a Director of the corporation or a party related to a Director or an entity in which a Director of the corporation is a Director or officer or has a financial interest or solely because the Director is present at or participates in the meeting of the corporation's Board of Directors or of the committee of the Board of Directors that authorizes, approves, or ratifies the conflicting interest transaction or solely because the Director's vote is counted for such purpose if:

(A) The material facts as to the Director's relationship or interest and as to the conflicting interest transaction are disclosed or are known to the Board of Directors or the committee, and the Board of Directors or committee in good faith authorizes, approves, or ratifies the conflicting interest transaction by the affirmative vote of a majority of the disinterested Directors, even though the disinterested Directors are less than a quorum; or

(B) The conflicting interest transaction is fair as to the corporation.

4. Approval of Conflicting Interest Transactions. Common or interested Directors may be counted in determining the presence of a quorum at a meeting of the Board of Directors or of a committee which authorizes, approves, or ratifies the conflicting interest transaction.

5. Party Related to Director. For purposes of this Article, a "party related to a Director" shall mean a spouse, a descendent, an ancestor, a sibling, the spouse or descendent of a sibling, an estate or trust in which the Director or a party related to a Director has a beneficial interest, or an entity in which a party related to a Director is a Director, officer, or has a financial interest.

AMERICAN OVERSIGHT

ARTICLE VIII.
INDEMNIFICATION

1. Indemnification. To the extent permitted or required by the act (as defined below) and any other applicable law, if any Director or officer (as defined below) of the corporation is made a party to or is involved in (for example as a witness) any proceeding (as defined below) because such person is or was a Director or officer of the corporation, the corporation (I) shall indemnify such person from and against any judgments, penalties, fines (including but not limited to ERISA excise taxes), amounts paid in settlement and reasonable expenses (including but not limited to expenses of investigation and preparation, and fees and disbursements of counsel, accountants or other experts) incurred by such person in such proceeding, and (II) shall advance to such person expenses incurred in such proceeding.

The corporation may in its discretion (but is not obligated in any way) to indemnify and advance expenses to an employee or agent of the corporation to the same extent as to a Director or officer.

The foregoing provisions for indemnification and advancement of expenses are not exclusive, and the corporation may at its discretion provide for indemnification or advancement of expenses in a resolution of its Directors, in a contract or in its articles of incorporation.

Any repeal or modification of the foregoing provisions of this article for indemnification or advancement of expenses shall not affect adversely any right or protection stated in such provisions with respect to any act or omission occurring prior to the time of such repeal or modification. If any provision of this article or any part thereof shall be held to be prohibited by or invalid under applicable law, such provision or part thereof shall be deemed amended to accomplish the objectives of the provision or part thereof as originally written to the fullest extent permitted by law, and all other provisions or parts shall remain in full force and effect.

As used in this article, the following terms have the following meanings:

(A) Act. The term "act" means the Colorado Revised Nonprofit Corporation Act as it exists on the date this Article is adopted, and as the Colorado Revised Nonprofit Corporation Act may be thereafter amended from time to time. In the case of any amendment of the Act after the date of adoption of this article, when used with reference to an act or omission occurring prior to effectiveness of such amendment, the term "act" shall include such amendment only to the extent that the amendment permits a corporation to provide broader indemnification rights than the Colorado Revised Nonprofit Corporation Act permitted prior to the amendment.

(B) Director or Officer. The term "Director" or "officer" means (I) a Director or officer of the corporation and (II) while an individual is a Director or officer of the corporation, the individual's serving at the corporation's request as a Director, officer, partner, member, manager, trustee, employee, fiduciary, or agent of another domestic or foreign corporation, nonprofit corporation, or other person or of an

AMERICAN OVERSIGHT

employee benefit plan, and (III) any other position (not with the corporation itself) in which a Director or officer of the corporation is serving at the request of the corporation and for which indemnification by the corporation is permitted by the act.

(C) Proceeding. The term "proceeding" means any threatened, pending or completed action, suit, or proceeding whether civil, criminal, administrative or investigative, and whether formal or informal.

(D) Code. The term "Code" means the Internal Revenue Code of 1986, as amended from time to time.

2. Limitation. Notwithstanding any other provision of this Article VIII, during any period that the corporation is a "private foundation" within the meaning of section 509 of the Code, or any corresponding provision of any future United States tax law, the corporation shall not indemnify any person from or against or advance to any person the cost of, such expenses, judgments, fines, or amounts paid or necessarily incurred, nor shall the corporation purchase or maintain such insurance, to the extent that any such indemnification, purchase, or maintenance would be determined to be an act of self-dealing within the meaning of section 4941 of the Code, to be a taxable expenditure within the meaning of section 4945 of the Code, or to be otherwise prohibited under the Code, unless and to the extent (i) a court orders such indemnification, or (ii) the purchase or maintenance of such insurance can be treated as reasonable compensation to such person.

ARTICLE IX.
BOOKS AND RECORDS

The corporation shall keep correct and complete books and records of account and shall also keep minutes of the proceedings of its Board of Directors and committees having any of the authority of the Board of Directors, and shall keep at its registered or principal office a record giving the names and addresses of the Directors. All books and records of the corporation may be inspected by any Director or his or her agent or attorney for any proper purpose at any reasonable time.

ARTICLE X.
WAIVER OF NOTICE

Whenever any notice is required to be given under the provisions of the Colorado Revised Nonprofit Corporation Act or under the provisions of the articles of incorporation or the bylaws of the corporation, a Director may waive any notice required to be given to such Director by the Act or these bylaws: (i) whether before or after the date or time stated in the notice as the date or time when any action will occur, by delivering a written waiver to the corporation which is signed by the Director entitled to the notice for inclusion in the minutes, but such delivery and filing shall not be conditions of the effectiveness of the waiver; or (ii) by a Director's attendance at the meeting whereby such Director waives objection to lack of notice or defective notice, unless the Director at the beginning of the meeting objects to the holding thereof or transacting business at the meeting because of lack of notice or defective notice and the

AMERICAN OVERSIGHT

Director also does not vote for or assent to action taken at the meeting. Further, even if a Director attends or participates in a meeting, the Director does not waive any required notice if special notice was required of a particular purpose and the Director objects to transacting business with respect to the purpose for which such special notice was required and does not thereafter vote for or assent to action taken at the meeting with respect to such purpose.

ARTICLE XI.
AMENDMENTS TO BYLAWS

The Board of Directors may amend these bylaws at any time to add, change, or delete a provision; provided, however, to be effective, any amendment of these bylaws shall require written approval of WGA.

ARTICLE XII.
VOTE REQUIRED FOR APPROVAL BY WGA

Unless otherwise provided in these bylaws, at any time when the approval of WGA or of the WGA Board of Directors is required to take any action, such action shall require the affirmative vote of two-thirds of the members of the WGA Board of Directors.

WGA Resolutions Development Process Calendar – Fall 2018

Under the revised Western Governors' Association bylaws, initial drafts of resolutions must be circulated no less than 60 days prior to a vote of the Governors. **For the fall 2018 resolution cycle, that deadline will be October 8, 2018.**

September 14, 2018	Fall 2018 SAC Strategic Planning Meeting (Vancouver B.C. and via Conference Call).
September 20, 2018	Regularly Scheduled Biweekly SAC Call
October 4, 2018	Regularly Scheduled Biweekly SAC Call
October 8, 2018	Bylaw-driven deadline for all initial draft resolutions to be received by WGA.
October 18, 2018	SAC Call to Review and Discuss Draft Resolutions.[1]
October 25, 2018	SAC Call to Review and Discuss Draft Resolutions.
November 1, 2018	SAC Call to Review and Discuss Draft Resolutions.
November 8, 2018	SAC Call to Review and Discuss Draft Resolutions.
November 15, 2018	SAC Call to Review and Finalize All Draft Resolutions Meeting Bylaw Requirements of Co-sponsorship.
November 27, 2018	Meeting Notice, Resolutions and Ballots Go Out to Governors.
Date During Balloting Period TBD	Governors-Only Call – To Discuss Any Draft Resolutions Requiring Gubernatorial Resolution
December 6, 2018	SAC Call (2018 Winter Meeting Logistics)
December 7, 2018	Governors' Completed Ballots Requested Back to WGA Staff.
December 11-13, 2018	Governors' 2018 Winter Meeting / Announcement of Resolution Ballot Results.

CA, CO, ID, NM, OR, SD, UT, WA agree to participate. 9/25/18: AK joins working group. 10/3/18: Working group call. No attendees.		

AMERICAN OVERSIGHT

Reimagining the Rural West

FY19 Planning Activities

Action Request:
WGA requests SAC assistance with the first planning year objective - populating the initiative advisory group. Please connect WGA with the appropriate person in your governor's office with policy expertise related to rural development to provide feedback and assist with scoping efforts.

Please assist WGA with this effort by October 19th.

Initiative Overview:

The Western Governors' "Reimagining the Rural West" Initiative will examine the elements critical to the ongoing and future vitality of rural western communities, with the goal of identifying actions western states can take to best support these communities, especially by effecting changes in federal policies. The initiative will be organized around three topical pillars: Opportunity, Connectivity and Community. Suggested topics or objectives are identified for each.

1. Opportunity

This pillar will examine strategies for strengthening rural western economies, in particular through leveraging the West's strengths (e.g. resource-based industries) and advantages (e.g. frequent proximity to public lands). This includes opportunities such as growing the outdoor economy, modernizing the energy industry, capitalizing on restoration and conservation services, and applying new technologies to agriculture.

Suggested Topics:

- Advancing Western Governors' all-of-the-above energy vision, which calls for making the West a leader in energy education, technology development, research and innovation;
- Providing a platform for states to share best practices in developing the outdoor recreation economy, including through establishment of offices of outdoor recreation, strategies to leverage the private sector, and identifying federal policies or investments that would support that industry's growth;
- Advancing Western Governors' forest and rangeland management priorities related to expanding markets for forest products and diversified rangeland goods and services and supporting forest and rangeland restoration activities; and
- Developing and utilizing economic incentives, such as federal Opportunity Zones, to attract businesses and foster entrepreneurism.

AMERICAN OVERSIGHT

2. Connectivity

The Connectivity pillar will foster solutions-oriented discussions around the rural West's infrastructure challenges with a focus on broadband and transportation – the infrastructure needed to bridge the gap between rural communities and metropolitan areas.

Suggested Topics:

- Developing funding strategies and solutions for rural infrastructure investments, including how states can drive private sector investment through tax or other incentives;

- Sharing best practices and developing recommendations for prioritization of infrastructure funding, focusing on investments that are critical to attract and retain businesses and investments that adapt to or anticipate changing or emerging technologies;

- Facilitating deployment of rural broadband by:

    - Convening stakeholders and state officials to discuss best practices for building rural broadband systems that provide continuous, low-cost access;

    - Engaging with states to "ground-truth" broadband data that is available to federal agencies. Low-quality data affects the allocation of federal funding to rural communities through FCC and USDA loan and grant programs;

    - Examining innovative broadband mapping strategies, such as nonprofit entities collecting Internet Service Provider infrastructure data to estimate coverage; and

    - Coordinating with USDA to ensure the new broadband pilot program managed by the Rural Utility Service prioritizes areas that wholly or severely lack access to broadband.

- Identifying critical transportation infrastructure (surface and air) and federal regulations that may impact the rural communities' ability to maintain this infrastructure.

3. Community

This pillar will explore the amenities and attributes that make rural communities attractive places to live, identifying critical elements (e.g. access to education, affordable housing, healthcare) and strategies for reinforcing or developing those elements.

Suggested Topics:

- Showcasing western communities that are doing a good job attracting and retaining young people and families and developing recommendations for other communities to replicate that success;

- Identifying and disseminating best practices for communities to collect and analyze locally generated socioeconomic data to inform policy decisions and connect communities to

AMERICAN OVERSIGHT

groups/tools that are working to support that effort (such as the Headwaters Economic tool);

- Facilitating conversation on how to engage tribal populations while building community;

- Providing a forum for states to share best practices in rural workforce development such as strategies to close rural skills gaps in sectors such as healthcare and education; models for providing access to post-secondary education in rural communities; expanding apprenticeship in rural industries and businesses; and identifying and training skills for a resilient workforce that can adapt and innovate as technologies change;

- Evaluating federal policies affecting rural healthcare, including the sustainability of rural hospitals and deployment of telehealth services;

- Evaluating federal policies affecting the distribution of funding for rural development to determine whether rural areas are able to capture their fair share, and if not, identifying solutions such as providing tools or resources and advocating for legislative or regulatory changes; and

- Sharing best practices and developing policy recommendations to alleviate the rural housing shortage.

Planning Year Objectives:

1. Build Advisory Group (October 2018)

WGA staff will build out an advisory group for the initiative. The advisory group will consist of state policymakers with a broad expertise in rural economic development and sustainability. WGA will work with SAC to identify participants from Governors' offices or state agencies.

The advisory group's first task will be to develop survey instruments that will be deployed in the planning year to identify to refine the scope of the initiative and identify potential outcomes. The advisory group will also help WGA distribute the survey to appropriate stakeholders.

2. Develop and Distribute Initial Survey (November – December 2018)

Working with the advisory group, WGA will develop an initial survey to gather information pertinent to the initiative. This survey will gauge states' interest in the suggested topics put forth in the initiative framework, solicit best practices and case studies, and help to identify potentially overlooked topics of inquiry.

3. Establish Stakeholder Interest and List (Ongoing)

The team will conduct outreach to stakeholders (nonprofit organizations, federal agencies, state and local government, business community) and build out an initiative list that will be used for distribution and to populate initiative events.

4. Develop Potential Sponsors (December 2018 – May 2019)

AMERICAN OVERSIGHT

The WGA team will develop and secure initiative sponsors before the launch of the initiative in June 2019. The team will work to identify interested sponsors at the Winter Meeting. Sponsorship materials will be developed and finalized by March 2019 with the goal of securing initiative sponsors before the initiative roll-out in June.

5. Develop and Finalize Initiative Plan (January – April 2019)

The WGA team will develop and finalize the initiative plan by April 2019. The plan will identify the concrete outcomes the initiative will work toward and how it will do so. The plan will detail the number and type of in-person events needed and the topics to be addressed at each. WGA will present the plan to SAC for feedback at the Spring Strategic Planning Meeting.

WGA Staff: Lauren DeNinno (ldeninno@westgov.org), Britta Beckstead (bbeckstead@westgov.org), and Kevin Moss (kmoss@westgov.org)

AMERICAN OVERSIGHT

DRAFT – INTERNAL USE ONLY

WESTERN GOVERNORS' ASSOCIATION

Policy Resolution 2018-XX

Foreign Visitor Preclearance
Version 1

A. BACKGROUND

1. The U.S. Department of Commerce estimates that nearly ~~75~~ 76 million foreign visitors entered the country during ~~2014~~2016. The vast majority of these travelers arrived in the United States by plane.[1]

2. Tourism is a significant revenue source for western states and territories, many of which count international travelers as major contributors to state and local economies and look to international tourism to drive local employment.

3. As a result of utilizing technology such as Automated Passport Control equipment, average wait time at airport passport and immigration processing areas have declined in recent years, but still frequently exceeds 60 minutes.[2]

~~3. Arriving airline passengers sometimes experience wait times in the airport passport and immigration processing area in excess of 90 minutes.~~

4. Foreign visitor preclearance allows international travelers to be screened by U.S. Customs and Border Patrol (CBP) officers prior to boarding an international flight. This preclearance allows passengers to bypass U.S. customs stations upon arrival at an American airport.

5. The Transportation Security Administration requires passenger and property screening at foreign preclearance airports to conform with U.S. aviation security screening standards.

6. Preclearance arrangements between the U.S. and Canada began in 1952. Since that time CBP has established over 600 American law enforcement officers and agricultural specialists at 15 preclearance airports in six countries: Ireland, Canada, Aruba, The Bahamas, Bermuda and United Arab Emirates. CBP also staffs a pre-inspection facility for passenger/vehicle ferry traffic to the U.S. in Victoria, Canada.[3]

7. While there were earlier announcements in 2015 and 2016 to possibly expand the preclearance program to eleven new airports in nine countries, CBP has only concluded agreements to cover Stockholm, Sweden (signed November 4, 2016) and Punta Cana, Dominican Republic (signed December 1, 2016).[4]

---

[1] International Trade Administration Fast Facts, http://tinet.ita.doc.gov/outreachpages/download_data_table/Fast_Facts_2016.pdf
[2] U.S. Customs and Border Protection, Airport Wait Times, https://awt.cbp.gov/
[3] U.S. Customs and Border Protection, Preclearance Locations, https://www.cbp.gov/border-security/ports-entry/operations/preclearance
[4] "DHS Announces 11 New Airports Selected For Possible Preclearance Expansion Following Second Open Season" https://www.dhs.gov/news/2016/11/04/dhs-announces-11-new-airports-selected-possible-preclearance-expansion-following

AMERICAN OVERSIGHT

~~7. On March 16, 2015, U.S. Department of Homeland Security (DHS) Secretary Jeh Johnson signed a new preclearance agreement with the government of Canada. On May 29, 2015, CBP announced its intention to expand air preclearance operations to ten additional airports in nine countries:~~

- ~~Brussels Airport, Belgium;~~
- ~~Punta Cana Airport, Dominican Republic;~~
- ~~Narita International Airport, Japan;~~
- ~~Amsterdam Airport Schipol, Netherlands;~~
- ~~Oslo Airport, Norway;~~
- ~~Madrid-Barajas Airport, Spain;~~
- ~~Stockholm Arlanda Airport, Sweden;~~
- ~~Istanbul Ataturk Airport, Turkey;~~
- ~~London Heathrow Airport, United Kingdom; and~~
- ~~Manchester Airport, United Kingdom.~~

8. In FY2017, CBP precleared more than 19 million passengers.[5]

~~8. These represent some of the busiest last points of departure to the United States – in 2014 nearly 20 million passengers traveled from these airports to the U.S.~~

9. The DHS has supported preclearance as both a security imperative – enabling CBP to identify and stop potential terror threats before they reach U.S. soil – and a strong economic opportunity.

B. GOVERNORS' POLICY STATEMENT

1. In recognition of the economic and national security benefits provided by foreign visitor preclearance, Western Governors support CBP's use of preclearance to reduce excessive wait times at American immigration and processing areas.

2. Western Governors support the efforts of DHS and CBP to increase the number of international airports and countries at which foreign visitor preclearance is used. Such expansion will streamline legitimate international travel and will further protect the safety and security of American citizens as well as international visitors.

3. Preclearance also allows smaller airports with no or few full-time CBP personnel to accept direct international flights from preclearance-approved foreign airports. Western Governors recognize the benefit this provides small or rural airports in accepting international travelers more efficiently. ~~that accept a significant number of international travelers, for instance Antonio B. Won Pat International Airport in Guam, where passengers on arriving international flights can wait 2-3 hours for visa processing.~~

4. In recognition of the benefits provided by foreign visitor preclearance, and in order to expand its use, DHS should work to complete the negotiation process with foreign countries and add new preclearance-approved international airports as soon as possible.

[5] Remarks of Acting Commissioner Kevin K. McAleenan at Press Event Marking Release of CBP's Trade and Travel Fiscal Year 2017 Report, February 13, 2018, https://www.cbp.gov/newsroom/speeches-and-statements/remarks-acting-commissioner-kevin-k-mcaleenan-press-event-marking

AMERICAN OVERSIGHT

5. Additionally DHS and CBP should work with western states to help identify optimal international foreign visitor preclearance airports for future consideration and should work with western state tourism directors to expand international travel opportunities in western states.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct WGA staff to work with Congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

DRAFT

AMERICAN OVERSIGHT

Memorandum

TO: Western Governors
FROM: Jim Ogsbury, Executive Director, Western Governors' Association
DATE: October 1, 2018
SUBJECT: Western Governors' Foundation

Background

The Western Governors' Foundation is a 501(C)(3) organization, which was established to support the Western Governors' Association. Its explicit purpose is, "to make distributions to the Western Governors' Association." In effect, the Foundation is a passive financial arm of the Association, collecting contributions from sponsors for transfer to the Association. The overwhelming majority of contributions to WGA, however, are made directly to the Association.

Dues-paying members of the Association serve as Directors of the Foundation.

Reconstruction of the Foundation

At the 2018 Annual Meeting of WGA, the Executive Committee authorized pursuit of the Foundation's reinvention as an authentic philanthropic organization, supporting the Association through "charitable, scientific, literary, or educational" activities as countenanced under Section 501(C)(3) of the Internal Revenue Code. Pursuant to this direction, WGA engaged counsel and developed the attached draft comprehensive amendments to the Foundation's Articles of Incorporation and Bylaws. Salient features of the new draft governing documents follow:

- The Foundation Board would be composed of 3-9 individuals, appointed by the Association. Although there are no proposed restrictive qualifications to Board service, we anticipate that the Board would be composed of interested current and former Western Governors.

DRAFT

AMERICAN OVERSIGHT

- To maintain the Foundation's favorable tax status and reduce administrative burden, the Foundation would be "operated, supervised or controlled" by the Association.

- Management responsibilities would be invested in a President, appointed by the Board. Currently, the Executive Director of the Association serves as the Executive Director of the Foundation.

Implementation

Reconstruction of the Foundation will involve a 3-step process:

1. An affirmative vote to adopt the revised Articles and Bylaws.
2. Resignation of current directors from the Foundation Board.
3. Appointment of new Foundation Board members by the Association.

According to counsel, the Foundation may not adopt the new governing documents by ballot. Accordingly, we hope that a quorum of Foundation directors (9) will assemble at the WGA Winter Meeting in Hawaii to consider the proposal.

In the meantime, we encourage Governors to affirmatively resign as Directors of the Foundation Board to facilitate the Foundation's reinvention. Such resignation should be made effective immediately following the reorganization vote. A draft letter of resignation is attached for your reference and use. Governors who are interested in taking an active role in the Foundation may be reappointed to the Foundation Board at a later time.

Thank you for your attention to this important matter. Please contact me if you have any questions or require further information.

DRAFT

AMERICAN OVERSIGHT

[Date]

Mr. James D. Ogsbury
Executive Director
Western Governors' Foundation
1600 Broadway
Denver, Colorado 80202

Dear Mr. Ogsbury:

I hereby resign as a Director of the Western Governors' Foundation, effective December 14, 2018.

Sincerely,

DRAFT

AMERICAN OVERSIGHT

DRAFT – INTERNAL USE ONLY

WESTERN GOVERNORS' ASSOCIATION

Policy Resolution 2019-XX

Cybersecurity – VERSION 1

Commented [BB1]: 9/17 Work Group Call. Attendees: WA. Discussed WA edits shown below.
9/24 Work Group Call: No attendees. WA provided feedback/edits on draft.
10/1 Work Group Call: No attendees.
10/2-10/3: WA and ND provided additional edits.

A. BACKGROUND

1. In the age of automation, digitization, big data, artificial intelligence, and machine-to-machine learning, the United States' capabilities to prevent, detect and respond to cyberattacks are of ever-growing importance to our society. The cybersecurity of our nation is an all-of-government and industry-wide endeavor.

2. Cybersecurity is especially imperative for critical infrastructure, which includes the nation's electric grid, energy resource supply and delivery chains, finance, communications, election systems, the chemical industry, commercial facilities, critical manufacturing, defense industrial base, emergency services, food and agriculture, government facilities, healthcare and public health, information technology, transportation, and water and wastewater systems.

3. Addressing cybersecurity needs across ~~these~~ critical infrastructure sectors ~~and others~~ is further complicated by the increasing interdependency and interconnectedness of our nation's data systems to myriad of non-critical infrastructure systems and ~~the~~ a dynamic threat environment. Effective cybersecurity ~~regimes~~ programs require strategic and functional relationships and information-sharing between federal, state and local levels of government, and the public and private sectors.

Commented [BB2]: 10/2: ND edits.

4. The cybersecurity of their states and the nation is a high priority of Western Governors. State governments are responsible for securing public networks, the state's digital assets, and citizen data, as well as coordinating their cybersecurity efforts with federal agencies and potentially-affected private entities (e.g., utilities, financial institutions, transportation, and health). Governors lead efforts to plan and implement state cybersecurity programs, respond to cyberattacks, and investigate intrusions.

Commented [BB3]: 10/2: ND edits.

~~4.~~5. State election systems remain targets of foreign interference. As governors, we remain committed to protecting our states' election systems. There is nothing more fundamental to the enduring success of our American democracy, and we take seriously our responsibility to protect the integrity and security of our elections. This is an imminent national security threat that transcends party lines. This is a matter of protecting and preserving fair elections—the underpinning of our democracy.

Commented [BB4]: 10/3: WA edition.

~~5.~~6. The Office of Management and Budget and Department of Homeland Security (DHS) May 2018 Federal Cybersecurity Risk Determination Report and Action Plan concluded that 71 of 96 federal agencies are at risk or high risk of cyber intrusions. It also determined that federal agencies are not equipped to determine how threat actors seek to gain access to their information. This deficiency results in ineffective allocations of the agencies' limited cyber resources.

Commented [BB5]: 10/2: ND Comment: Are we absolutely certain we want this, as it's currently worded, in here? First, is this entirely accurate? Second, States aren't in a much better state of capability… Third, I am unsure of the point being made here…

AMERICAN OVERSIGHT

~~6.~~7. Currently, there is a severe deficit of cyber workers, especially in government. Our nation cannot defend itself without a well-trained, experienced cyber workforce. The ~~private and~~ public sector~~s~~ must dedicate resources to cybersecurity education, training, and recruitment programs and encourage the private sector to do the same through effective policy.

Commented [BB6]: 9/17: WA edit.

B. GOVERNORS' POLICY STATEMENT

~~1.~~ Western Governors urge Congress to improve coordination of congressional oversight and legislative activity on cybersecurity. The federal government has a responsibility to provide adequate funding for states to meet election security needs. Western Governors encourage Congress and the Administration to work cooperatively with states in developing election security legislation and mandates, and to fully fund implementation.

Commented [BB7]: 10/3: WA edit.

~~2.~~1.

~~3.~~2. Federal agencies must engage in early, meaningful, substantive, and ongoing consultation with Governors or their designees on all aspects of cybersecurity. The federal government must also continue to clarify the roles and responsibilities of federal agencies in preventing, preparing for, and responding to cyberattacks. Centralized authority, points of contact, and formalized communication pathways are necessary to address increasingly complex threats. In addition, these pathways must occur at each level within government and other organizations.

Commented [BB8]: 9/24: Based on WA suggestion.

~~4.~~3. The increasing number and inconsistency of federal security regulations puts an unnecessary burden on state governments and is an inefficient use of often-constrained security resources. The federal government should establish a working group with representatives from states and federal agencies, as well as restore the position of the White House cybersecurity coordinator, to harmonize disparate agency regulations.

Commented [BB9]: 9/17: WA edit.

~~5.~~4. Western Governors recommend that the federal government continue the DHS State, Local, Tribal, and Territorial Engagement Program, which provides cybersecurity risk briefings and resources to Governors and other officials. The Governors also support DHS's Office of Cybersecurity and Communications, with which state chief information officers regularly interact.

~~6.~~5. The National Institute for Standards and Technology (NIST) Cybersecurity Framework and other standards can facilitate effective, consistent, and risk-based decision-making in government and industry. Real-world simulations of attacks on critical infrastructure are essential to prepare our nation for potential threats.

~~7.~~6. The federal government should use the full range of economic tools, including travel and financial sanctions, to deter cyberattacks organized or supported by nation-states.

~~8.~~7. The public and private sectors must take steps to mitigate global supply chain risks (e.g. installation of malicious software or hardware). Government and industry should also increase the cybersecurity awareness of government and private employees through training and education.

~~9.~~8. The Administration should propose, and Congress should provide, long-term authorization and sufficient appropriations for high-quality cybersecurity education and workforce development programs to grow and sustain the cybersecurity workforce. The federal government should

AMERICAN OVERSIGHT

also expand the CyberCorp: Scholarship for Service program and continue to support educational initiatives, such as NIST's Initiative for Cybersecurity Education and National Centers of Academic Excellence in Cyber Defense.

~~10.~~9. Western Governors support policies that incentivize the private sector to improve cybersecurity and share information regarding cyber threats as early as possible, including policies to improve access to information or create common standards for information-sharing. The federal government should emphasize the benefits of information-sharing, while alleviating private sector concerns with this essential communication. The federal government and states should continue to investigate liability protections, such as safe harbor provisions, for entities that report cyber intrusions.

Commented [BB10]: 9/24: Based on WA suggestion.

~~11.~~10. Our nation requires innovation in detecting, preventing, and responding to continually-evolving cyber threats. More research is required to understand the use of blockchain and encryption by perpetrators and its utility for defense against cyber threats, and address vulnerabilities of other emerging technologies, including connected vehicles and Internet of Things devices. The federal government should provide funding and technical assistance for these and other types of cybersecurity research and development.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct WGA staff to work with congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

AMERICAN OVERSIGHT

Fiscal Year 2019 Congressional Priorities

This document outlines Western Governors' priorities for congressional action through the FY2019 appropriations process and 2018 legislative year. It is comprised of positions adopted by Western Governors in their policy resolutions, recommendations adopted through the WGA initiative process, and other positions adopted by the Governors. It is organized by the committees of jurisdiction in the House and Senate; in cases where provisions may have multiple committees of jurisdiction, items may be duplicated.

Proposed Legislative Action	Governors' Policy
Multiple Committees	
Cooperating Agency Better define "cooperating agency" under NEPA processes.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship Letter: Governors Request Involvement in Council on Environmental Quality Environmental Reviews Comments: Western Governors' Recommendations to Improve Forest Service NEPA Process
Settlement Negotiations Where their roles and responsibilities are impacted, states should be meaningfully consulted during settlement negotiations, including negotiations aimed at avoiding, rather than resolving, litigation. Provide notice to affected Governors' offices and give co-regulating states opportunities to participate in the proceedings. Where legally permissible, that right should extend to federal agencies' settlement negotiations impacting state environmental and natural resource management prerogatives.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship
Cost/Benefit Analyses Seek mandatory use of a refined model for federal land management agencies' economic impact and cost/benefit analyses designed in conjunction with affected states and counties.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Streamlining Coordinate, streamline, and increase the flexibility of infrastructure planning and permitting guidelines, rules, and policies to: (i) allow for timely decision-making in the design, financing, and construction of needed infrastructure; (ii) account for regional differences; (iii) balance economic and environmental considerations; and (iv) minimize costs.	WGA Policy Resolution 2015-08, Water Resource Management in the West WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship
Preemption Require agencies to develop step-by-step internal guidelines on compliance with the preemption provisions of Executive Order 13123. Require internal oversight procedure by which agency scrutinizes potential preemptions of state authority. Improve preemption and federalism review requirements in OIRA's "A-4 Circular" checklist.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship Letter: Concerns about Provisions in the Hydropower Policy Modernization Act of 2017
Consultation Seek opportunities for more meaningful consultation through: agency-specific processes, Executive Branch cross-cutting regulatory efforts, administrative reorganization, and Congressional regulatory reform. Consult with states on a regular basis: as a predicate to federal action; through the pre-publication stage of rulemaking; after publication and before adoption of rules and regulations; and on an ongoing basis throughout implementation. Clarify definitions in key enabling statutes to better define state-federal consultation.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship Letter to Agencies: Executive Order, "Enforcing the Regulatory Reform Agenda" Letter: Lack of Consultation on DOI Proposed Regional Office Boundaries
Executive Order 13132 Revise Executive Order 13132, *Federalism*. Clarify which federal actions trigger the state consultation requirements under Executive Order 13132, *Federalism*. Require agencies to share assumptions supporting federalism assessment impact analyses.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship Comments: Governors Submit Analysis and Recommendations Regarding WOTUS Letter: Concerns over Potential EPA CERLCA 108(b) Financial Assurance Requirements Comments I: CERCLA 108(b) Financial Assurance Rule for Hardrock Mining Industry

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Request a GAO analysis of how often federalism reviews occur in key agencies and what they include. Require OMB/OIRA to update directions to agencies' "federalism official" designations and "consultation plans" regarding the identification of policies with federalism implications and ensuring meaningful and timely consultation with states. Make consultations plans and contact information for designated federalism officials publicly available.	
Federalism Office and Joint Select Committee Establish a permanent Joint Select Committee on Intergovernmental Relations and a federalism office in the executive branch - potential models include the ACIR and CEQ.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship
House / Senate Appropriations	
State Authority / State Wildlife Data Request that the Committee include the following language in its report on Interior Appropriations: "The Committee is concerned that the Department of Interior, its bureaus, and the U.S. Forest Service are not maximizing the opportunity to save funds and leverage states' on-the-ground wildlife expertise. State wildlife agencies often have the best available science on species and retain primary jurisdiction over most wildlife on Federal, State, and private lands. The federal government should recognize and fully utilize state resources, including scientific information about species population numbers, conservation status, and habitat availability, among other data. "The Committee directs the federal agencies to cooperatively engage with state wildlife agencies to ensure that federal agencies use state fish and wildlife data and analyses as a principal source to inform federal land use, land planning, and related natural resource decisions while respecting the limitations of state data privacy laws. The agencies should not duplicate analysis of raw data previously prepared by the states. Federal agencies should also provide their data to state wildlife managers to ensure that the most complete data is available to be incorporated into all decision support systems."	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship WGA Policy Resolution 2017-11, Species Conservation and the Endangered Species Act WGA Policy Resolution 2017-08, State Wildlife Science, Data and Analysis Appropriations Requests Testimony, FY 2015, 2016, 2017 and 2018

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
State Authority / ESA Request that the Committee include the following language in its report on Interior Appropriations: "The committee intends that states be allowed the option to request and be granted intervention as a matter of right in all administrative and judicial actions, not initiated by the state, which concern any of the provisions of the Endangered Species Act (ESA), except for the provisions dealing with prohibitions on international trade of banned substances. "The ESA is premised on a strong federal-state partnership. States should be provided the opportunity to be full partners in administering and implementing the ESA, as defined in Section 6(a) of the ESA: 'In carrying out the program authorized by the Act, the Secretary shall cooperate to the maximum extent practicable with the States.' State agencies often have the best available science and expertise. "The U.S. Fish and Wildlife Service (FWS) is directed: • To provide states a right of first refusal to be full partners in recovery planning and species management. The Secretary should be given authority to provide grants for any additional administrative costs to states for the development and/or administration of recovery plans. • To outline clear and quantifiable recovery goals in consultation with the affected state(s) at the time of an ESA listing decision. The agency should provide objective recovery criteria that both state and federal agencies may work toward accomplishing in the recovery process. In cases where quantification of recovery goals is not initially feasible, the FWS should be required to work with the affected state(s) to publish a plan, including a timetable, describing the steps the FWS will take in identifying measurable goals. Recovery goals should be reviewed and changed using an adaptive framework. The required objective criteria should include a clear articulation of the required population, population trends, or other relevant criteria, including amelioration of threats identified in the listing process. • To provide states a right of first refusal to be full partners in listing, critical habitat designations, recovery planning, and delisting decisions, particularly when modeling is used in analysis. When the FWS intends to rely on the precautionary principle or best professional judgement, particularly when coupled with the use of long-term modeling and forecasting, in place of current observational science and measurable impacts,	WGA Policy Resolution 2017-11, Species Conservation and the Endangered Species Act A-7: The ESA is premised on a strong federal-state partnership. But the Act and its implementation should seek to provide expanded and meaningful consultation opportunities for states to comment, participate, or perform before the federal government takes action under the ESA.

DRAFT

Proposed Legislative Action	Governors' Policy
states should be a full partner in analyses, model development and consulted with prior to final decisions. The FWS should partner with states to establish consistent criteria to assess modeling uncertainty related to projected scientific information, such as climate change, in their scientific review."	
State Authority / CWA Request that the Committee include the following language in its report on Interior Appropriations: "The Committee directs federal agencies to engage in active and meaningful consultation with states regarding any new definitions of federal jurisdiction over state-managed resources such as water."	WGA Policy Resolution 2017-04, Water Quality in the West B-1: State Authority and Implementation of CWA B-1-a: CWA Jurisdiction
USFS / Groundwater Request that the Committee include the following language in its report on Interior Appropriations: "States have exclusive authority over the allocation and administration of rights to groundwater located within their borders and are primarily responsible for protecting, managing, and otherwise controlling the resource. The regulatory reach of federal government was not intended to, and should not, be applied to the management and protection of groundwater resources. No funds appropriated under this Act shall be used to develop a groundwater management strategy. Instead, the Committee urges agencies to recognize and respect state primacy and comply with current federal statutory authorities."	WGA Policy Resolution 2015-08, Water Resource Management in the West B-1: State Primacy in Water Management: As the preeminent authority on water management within their boundaries, states have the right to develop, use, control and distribute the surface water and groundwater located within their boundaries, subject to international treaties and interstate agreements and judicial decrees.
EPA Water Transfers Rule Request that the Committee include the following language in its report on Interior Appropriations: "The Environmental Protection Agency excludes water transfers that do not involve the addition of a pollutant from the permitting requirements of the Clean Water Act's National	WGA Policy Resolution 2015-08, Water Resource Management in the West B-1: State Primacy in Water Management: As the preeminent authority on water management within their boundaries, states have the right to develop, use, control and distribute the surface water and groundwater located within their

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Pollutant Discharge Elimination System (NPDES). States already have the authority to address water quality issues associated with transfers. Transporting water through constructed conveyances to supply beneficial uses should not trigger NPDES permit requirements simply because the source and receiving water contain different chemical concentrations and physical constituents. The Committee supports EPA's current water transfers rule, which exempts water transfers between waters of the United States from NPDES permitting requirements."	boundaries, subject to international treaties and interstate agreements and judicial decrees. WGA Policy Resolution 2017-04, Water Quality in the West B-2-c: Western Governors believe that transporting water through constructed conveyances to supply beneficial uses should not trigger NPDES permit requirements simply because the source and receiving water contain different chemical concentrations and physical constituents. Western Governors generally support EPA's current water transfers rule, which exempts water transfers between waters of the United States from NPDES permitting requirements
Corps of Engineers Water Supply Contracts Request that the Committee include the following language in its report on Energy and Water Development Appropriations: "The administration of water supply contracts by the U.S. Army Corps of Engineers should not have any negative effect on states' primary authority in the management, allocation, planning, and protection of water resources within their boundaries. These contracts supply water for agricultural, industrial and municipal uses across the United States. States' primary authority over water extends to all naturally-occurring waters, including those impounded in Corps reservoirs. The rights of states to access and appropriate such waters must not be precluded by any federal regulations, including the Surplus Waters Rule proposed by the Corps in December 2016. States often enjoy effective working relationships with local Corps staff in creating flexibility in response to current and future drought. Regional and national Corps staff must support local decisions. Congress should address any obstacles that hinder flexible water control operations."	WGA Policy Resolution 2015-08, Water Resource Management in the West B-1: State Primacy in Water Management: As the preeminent authority on water management within their boundaries, states have the right to develop, use, control and distribute the surface water and groundwater located within their boundaries, subject to international treaties and interstate agreements and judicial decrees.
Wild Horses and Burros Request that the Committee include the following language in its report on Interior Appropriations: "The Committee continues to believe that the horse and burro management program in its current state is unsustainable and the Committee cannot afford to allow this situation to	WGA Policy Resolution 2018-01, Wild Horse and Burro Management B-1: Current wild horse and burro population levels, the continued exponential growth of these populations, and the federal agencies' inability to meet direction for attaining AMLs presents an urgent concern for management policy and practice.

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
persist. The Committee believes that a process to establish, monitor and adjust Appropriate Management Levels (AMLs) for wild horses and burros that is transparent to stakeholders, supported by scientific information (including state data), and amenable to adaptation with new information and environmental and social change is integral to addressing both the long-term viability of wild horse and burro populations, and near-term concerns about the rangeland impacts of overpopulation. Accordingly, the Committee directs the Department to adjust its AML approach to be transparent, based on sound science and adaptable. "The Committee supports continued research to develop and refine a variety of fertility-control methods, including immunocontraceptives, which allow for self-sustaining populations of wild horses and burros while maintaining the genetic viability of the protected herds. The Committee recognizes that the Department has invested in such research but has been slow to employ on-the-ground use of methods supported by this effort. The Committee directs the Department to expedite its implementation of scientifically sound and humanely implemented fertility control methods for wild horses and burros."	B-2. [Governors] support thoughtful, appropriate and science-based management decisions for wild horse and burro management. In particular, we support management decisions that ensure populations are managed within AMLs in order to promote horse and burro herd health, species conservation and recovery, and habitat as well as forage vitality for wild and domestic species.
Quagga and Zebra Mussels Direct DOI to implement mandatory inspection and decontamination of all high-risk watercraft leaving waterbodies under their jurisdiction infested with quagga and zebra mussels, and provide DOI agencies with both the resources and statutory authority required to implement these actions.	WGA Policy Resolution 2016-05, Combating Invasive Species Letter: Western Governors Request Clarification on DOI Collaboration with States on Invasive Mussel Prevention Letter: Western Governors Request Collaboration with DOI on Invasive Mussels
USFS / Insect and Disease Designation Funding Request appropriate funding for USFS I&D projects in the Interior Appropriations bill.	WGA Policy Resolution 2017-10, National Forest and Rangeland Management A-16: The 2014 Farm Bill provided the Forest Service with several new tools to accelerate forest restoration. A Governor could nominate landscapes substantially affected or threatened by insects and disease to the Secretary of Agriculture for designation as Priority Areas for expedited NEPA and administrative process and judicial review. B-7: The 2014 Farm Bill authorities are significant expansions of Forest Service authority and are powerful new tools to boost forest management, promote collaboration, and limit

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
	the impacts of administrative objections and litigation. Western Governors encourage federal agencies to fully implement the tools provided in the 2014 Farm Bill.
SNOTEL Funding Request adequate funding for SNOTEL in the Interior Appropriations bill.	WGA Policy Resolution 2015-08, Water Resource Management in the West 4-A: Western States Need Reliable Water Resource Information: Basic information on the status, trends and projections of water resource availability is essential to sound water management. Basic Water Data: Western Governors support the U.S. Geological Survey's Cooperative Water Program and National Streamflow Information Program (NSIP), the Natural Resources Conservation Service's Snow Survey and Water Supply Forecasting Program, the National Oceanic and Atmospheric Administration's (NOAA) weather and hydrology-related data collection, monitoring, and drought information programs, and the National Aeronautics and Space Administration's National Land Imaging (Landsat) Program with its thermal infrared sensor. Western Governors support federal efforts to coordinate water data gathering and information programs across multiple agencies. Letter: Importance of Snow Survey and Water Supply Forecasting Program
PILT and SRS Funding Request full funding of PILT and SRS in the Interior Appropriations bill.	WGA Policy Resolution 2017-03, Tax-Exempt Federal Lands and Secure Rural Schools B-1: Western Governors believe that the federal government must honor its historic PILT agreement with states and counties in the West to compensate them for tax-exempt federal lands within their borders.
USDA Specialty Crops Funding	WGA Policy Resolution 2017-09, Western Agriculture

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Request adequate funding for the USDA Specialty Crop Block Grant Program (SCBGP) that provides critical research, education, and promotion tools to the fruit and vegetable producers in the Agriculture Appropriations bill.	
USDA Market Access and Foreign Market Development Funding Support funding for USDA Market Access and Foreign Market Development Programs to promote opportunities for western producers to increase export revenues and encourage trade agreements.	WGA Policy Resolution 2017-09, Western Agriculture
Federal Funding for Disaster Recovery Request adequate funding for federal disaster recovery and assistance programs.	WGA Policy Resolution 2018-03, Federal Disaster Recovery Assistance for Communities in the West B-2: Federal agencies conducting disaster recovery and assistance, as well as the programs which they administer, should receive adequate and consistent funding and flexibility to direct funds where they are most needed.
USDA NRCS Emergency Watershed Program Request adequate funding for USDA NRCS Emergency Watershed Protection Program.	WGA Policy Resolution 2018-03, Federal Disaster Recovery Assistance for Communities in the West B-3: Additionally, the historically-underfunded USDA NRCS Emergency Watershed Protection Program should be revisited and strengthened.
House / Senate Agriculture	
Cross-Boundary Projects Identify barriers to cross-boundary projects involving federal, state and private lands. Develop training on state and federal contracting procedures for cross-boundary projects and use Service First authorities. Establish multi-agency pilot projects, which can suggest models for subsequent formal agreements. Target funding from USFS, BLM, NRCS and state sources to address cross-boundary management goals in priority areas consistent with state plans.	National Forest and Rangeland Management Initiative June 2017 Special Report

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Codify and direct funding for the Joint Chiefs Landscape Restoration Program to facilitate continued partnership and investment between USFS and NRCS to support restoration projects where federal and private land ownership and management goals intersect.	
Grazing Improve flexibility and integration of grazing management and targeted grazing as tools to achieve restoration and land management goals.	WGA Policy Resolution 2018-02, Public Lands Grazing National Forest and Rangeland Management Initiative June 2017 Special Report
Funding Fully fund conservation title programs that provide technical and financial assistance for forest and rangeland management in partnership with private landowners. Take steps to provide greater flexibility in the deployment of conservation title programs to achieve restoration objectives.	National Forest and Rangeland Management Initiative June 2017 Special Report
Snow Survey and Weather Forecasting Work closely with states and other resource managers to improve predictive and adaptive capabilities for extreme weather variability and related impacts. Coordinate water data gathering and information programs across multiple agencies. Provide adequate funding for the NRCS Snow Survey and Water Supply Forecasting Program, as it provides states with vital data in their management of water resources.	WGA Policy Resolution 2015-08, Water Resource Management in the West Letter: Importance of Snow Survey and Water Supply Forecasting Program
Restoration Use authorities in the 2014 Farm Bill (Good Neighbor Authority and Stewardship Contracting Authority) to increase the pace and scale of forest management and restoration on BLM lands. Increase flexibility in the GNA program on road construction and reconstruction and create flexibility in allocations of program income to support GNA projects across larger geographies.	WGA Policy Resolution 2017-10, National Forest and Rangeland Management National Forest and Rangeland Management Initiative June 2017 Special Report Appropriations Requests Testimony 2016, 2017 and 2018 Letter: Governors' Support for Accelerated Implementation of Forest Management Projects

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Authorize the use of stewardship and GNA funds for recreation improvements and restoration planning and implementation. Expand the use of GNA agreements and other 2014 Farm Bill tools to achieve all-lands restoration objectives across federal, state, local government and privately-owned lands. Prioritize restoration activities across all ownerships to create resilient landscapes. Where programmatic agreements are already in place, use GNA agreements to address priority restoration needs. Explore the use of strike teams, interagency ESA consultation support, and other modular capacity to accelerate restoration in priority areas, including the expanded use of existing statutory authorities. Leverage the use of state, tribal, and local expertise and science in federal environmental review, consultation, and permitting. Collaborate with environmental regulators to reduce legislative and regulatory barriers to restoration activities.	
Wildfire Identify fuels management priorities in consultation with states to focus resources on greatest wildfire threats. Improve interagency communication, fire response capability, and coordination, including the sharing of firefighting resources between federal and state agencies. Ensure these activities support fire prevention, full suppression strategies and management of wildfire for resource benefits. Continue to seek opportunities, including revisions to forest plans, to enhance safety and reduce costs in suppression decisions while protecting communities. Facilitate the expanded use of prescribed fire.	WGA Policy Resolution 2017-10, National Forest and Rangeland Management WGA Policy Resolution 2017-09, Western Agriculture WGA Policy Resolution 2015-08, Water Resource Management in the West National Forest and Rangeland Management Initiative June 2017 Special Report Letter: State Collaboration in Addressing Rangeland Fire Risk Letter: Wildfire Funding Reform

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Incentivize local governments to take voluntary actions to support the creation and expansion of fire-adapted communities and resilience. Provide additional analyses to help communities evaluate the full costs of suppression in the wildland urban interface.	
Environmental Review Congress should direct federal agencies to build consistency in environmental analysis and bring agency practice in conducting EAs more in line with the administrative policy intent of streamlined, summary documents. Agency guidance should clarify significance thresholds and Extraordinary Circumstances language for NEPA based on best practices and provide, where possible, consistent approaches to interpreting these NEPA requirements when agencies and the courts have had conflicting interpretations. Implement NEPA streamlining efforts that promote best practices or procedural innovations, including the use of landscape-scale, programmatic, adaptive and iterative analyses. Support independent research and analysis from NGO, academic, and other partners to inform NEPA and ESA process improvements, including time and cost estimates for different project types. Develop metrics for successful outcomes, including cost and time performance indicators. Consider standardized approaches to environmental analysis to increase efficiency and reduce time to decision. Ensure agency NEPA implementation policy includes comprehensive training and accountability for field practitioners. Use information technology to improve the efficiency and transparency of NEPA and reduce redundant data, analysis and business practices. Build consistency in environmental analysis and bring agency practice in conducting EAs more in line with the administrative policy intent of streamlined, summary documents.	National Forest and Rangeland Management Initiative June 2017 Special Report

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Provide improved analytical tools no-action alternatives.	
Alternatives, Significance Thresholds, Extraordinary Circumstances, and Categorical Exclusions (CE) Provide improved analytical tools no-action alternatives. Allow agencies to analyze only the action and no-action alternatives when a project is collaboratively developed, unless a third alternative is proposed and meets the purpose and need of the project. Clarify significance thresholds and Extraordinary Circumstances language for NEPA based on best practices and provide, where possible, consistent approaches to interpreting these NEPA requirements when agencies and the courts have had conflicting interpretations. Develop a new NEPA restoration CE that is based on decisions documented in a Decision Notice and Finding of No Significant Impact over the past five years where no significant impacts to the environment occurred. Project activities could include commercial and noncommercial timber harvest, hazardous fuels removal projects, prescribed burning, post-fire restoration and herbicide use. The CE should use the best available science, rely on collaboration, and have environmental safeguards for consistency with appropriate management plans and existing law and policy. In designing the CE, Congress should rely on agency analysis of past decisions.	WGA Policy Resolution 2017-09, Western Agriculture National Forest and Rangeland Management Initiative June 2017 Special Report
Invasive Species Ensure a more focused and streamlined federal approach to invasive species. Promote greater coordination, collaboration, and communication with states and Pacific islands. Provide greater transparency of invasive species data and management decisions. Strengthen the national network of native and non-native seed reserve and storage facilities for rehabilitation and restoration.	WGA Policy Resolution 2016-05, Combating Invasive Species Letter: Western Governors Request Clarification on DOI Collaboration with States on Invasive Mussel Prevention Letter: Western Governors Request Collaboration with DOI on Invasive Mussels Letter: Recommendations for State Experts for Invasive Species Advisory Council Letter: Governors' Concern Regarding Invasive Species Management Testimony: Oversight Hearing on Invasive Species

	Letter: Governors' Comments on the 2015-2020 National Seed Strategy for Rehabilitation and Restoration Letter: Secretarial Order 3336: Rangeland Fire Prevention, Management, and Restoration
Strengthen Farm Bill Authorities Expand the use of GNA agreements and other 2014 Farm Bill tools to achieve all-lands restoration objectives across federal, state, local government and privately-owned lands. Where programmatic agreements are already in place, use GNA agreements to address priority restoration needs. Increase flexibility in the GNA program on road construction and reconstruction and create flexibility in allocations of program income to support GNA projects across larger geographies. Expand use of authorities included in the 2014 Farm Bill to increase the pace and scale of forest management and restoration on western National Forests and adjacent non-federal lands. Authorize the use of stewardship and GNA funds for recreation improvements and restoration planning and implementation. Permanently authorize the insect and disease designation provisions of Section 602 of the 2014 Farm Bill and eliminate project constraints from Section 603 for condition class or fire regimes outside of the wildland-urban interface. Consider extending the length of stewardship or timber contracts up to 20 years, or allowing for periodic review and extension of contacts to provide economic certainty to restoration industry partners and address related cancellation ceiling constraints. Allow for a portion (up to five percent) of retained receipts from stewardship contracting to be used for subsequent project planning and analysis. Fully fund conservation title programs such as Environmental Quality Incentives Program (EQIP), Conservation Technical Assistance (CTA), Conservation Stewardship Program (CSP), Conservation Reserve Program (CRP), Agricultural Conservation Easement Program (ACEP),	WGA Policy Resolution 2017-10, National Forest and Rangeland Management WGA Policy Resolution 2017-09, Western Agriculture National Forest and Rangeland Management Initiative June 2017 Special Report Letter: Governors' Response to GNA Guidance Letter Letter: Governors' Support for Accelerated Implementation of Forest Management Projects

CERCLA 108(b) Financial Assurance Consult with Western Governors and state regulators prior to determining whether to pursue any CERCLA section 108(b) financial assurance regulations.	WGA Policy Resolution 2017-06, Financial Assurance Regulation Comments II: CERCLA 108(b) Financial Assurance Rule for Hardrock Mining Industry Letter: Concerns over Potential EPA CERLCA 108(b) Financial Assurance Requirements

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Determine that EPA should never have identified classes of facilities within the hardrock mining industry for CERCLA 108(b) financial assurance regulation.	Comments I: CERCLA 108(b) Financial Assurance Rule for Hardrock Mining Industry
Good Samaritans and Abandoned Mines Protect volunteer remediating parties, including local and state government agencies, which conduct clean up, from becoming legally responsible under section 301(a) and section 402 of the CWA for any continuing discharges from the abandoned mine site after completion of a cleanup project. Consider legislative and administrative remedies to address potential CERCLA and RCRA liabilities. Support efforts to encourage public-private partnerships that would facilitate cleanups by Good Samaritans.	WGA Policy Resolution 2016-07, Cleaning Up Abandoned Mines in the West B-1: To add greater certainty, Western Governors call on Congress to amend the Clean Water Act to legally protect volunteering remediating parties, including local and state government agencies, which conduct authorized remediation from becoming legally responsible under section 301(a) and section 402 of the CWA for any continuing discharges from the abandoned mine site after completion of a cleanup project, provided that the remediating party -- or "Good Samaritan" -- does not otherwise have liability for that abandoned or inactive mine site. B-2: Legislative and administrative remedies to address potential CERCLA and RCRA liabilities should also be considered, as should liabilities associated with remining that deter the mining industry, likely the best suited industry in terms of equipment, technology and expertise, from improving conditions at abandoned mine sites. B-3: As the costs to clean up abandoned hardrock mines are significant, the Western Governors support efforts by Congress and the Administration to encourage public-private partnerships that would facilitate cleanups by Good Samaritans.
Clean Air Act Ensure that new rules are drafted and issued, where appropriate, in coordination with existing regulations, considering common elements and requirements. Provide states and local entities with adequate support and technical assistance to help them comply with regulations promulgated under the CAA.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship Letter: WGA Provides Western Perspective on Impacts of Wildfires on Air Quality Appropriations Requests Testimony, FY 2017 and 2018 Letter: Regarding CAA Final Exceptional Events Language Letter: Concern Over Pending Revision to Exceptional Events Rule, Given Reduced Ground-Level Ozone NAAQS

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Collaborate with states to identify priority areas and focus on programs that provide the greatest benefits to air quality. Adhere closely to the timelines in the CAA. Recognize and account for unique circumstances of individual states. Avoid one-size-fits-all rulemakings (exceptional events and ozone NAAQS examples). Complete and publish timely guidance for implementation of the 2015 revised NAAQs for ground-level ozone. Avoid duplication of state programs. Permit states to create programs tailored to individual state needs, industries, and economies. Engage states as co-regulators (e.g. with respect to methane emissions). Provide those states with delegated authority timely implementation guidance when new and revised regulations are published.	Comments: Proposed Reduction to Ground-Level Ozone NAAQS
Hydraulic Fracturing Regulation Recognize that the states, territories, and flag islands have regulated the practice of hydraulic fracturing for decades and redundant federal regulation is not required where sufficient state regulations exist.	WGA Policy Resolution 2018-04, Energy in the West Comments: Governors Agree with BLM, States are Best Equipped to Regulate Hydraulic Fracturing Letter: Input on BLM Proposed rule, Oil and Gas: Hydraulic Fracturing and Federal and Indian lands
House / Senate Homeland Security	
Federal Emergency Management Agency State Cooperation Work directly with individual states and territories to jointly identify their individual and common disaster risks and needs, and the best methods to determine the necessity and provision of federal disaster assistance. 	Comments: Proposed USFS Directive for National Best Management Practices for Water Quality Letter: Concern on USFS Proposed Groundwater Management Directive
Collaboration Expand opportunities for state and local collaborative involvement in decision-making processes. Enable state leadership to reinforce and reward collaboration on USFS and DOI planning and projects. Leverage the use of state, tribal, and local expertise and science in federal environmental review, consultation, and permitting. Reward successful implementation of collaborative projects through increased funding, retained-receipt authority, or other capacity to pursue subsequent projects. Pass legislation, such as the 21st Century Conservation Service Corps Act, to make it easier for young people and veterans to complete quality, cost-effective maintenance and improvement projects on public and tribal lands and waters across the country. These programs could address the backlogged maintenance needs of land and water management agencies; enhance outdoor recreation opportunities; improve the accessibility of public lands; and respond to wildfires and other natural disasters.	WGA Policy Resolution 2017-10, National Forest and Rangeland Management National Forest and Rangeland Management Initiative June 2017 Special Report Appropriations Requests Testimony 2016, 2017, and 2018 Letter: Governors' Response to GNA Guidance Letter Letter: Governors' Support for Accelerated Implementation of Forest Management Projects
Multiple Use Establish a balance between multiple uses of public lands as required by federal statutes. Account for local needs and state priorities when evaluating the viability of various uses.	WGA Policy Resolution 2017-10, National Forest and Rangeland Management National Forest and Rangeland Management Initiative June 2017 Special Report Letter: Western Governors Commend House and Senate Leaders on Training Support Act
Fuels Management and Reduction Identify fuels management priorities in consultation with states to focus resources on greatest wildfire threats.	WGA Policy Resolution 2017-10, National Forest and Rangeland Management Letter: State Collaboration in Addressing Rangeland Fire Risk USFS Inspector General's Report "Forest Service Wildland Fire Activities – Hazardous Fuels Reduction." (July, 2016)

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Consult with states in development of a consistent, cross-agency process for identifying and selecting highest priority hazardous fuels projects. Involve states in development and implementation of risk assessment tools for identifying and prioritizing hazardous fuels reductions projects on western NFS lands. Implement tracking measurements to quantify and report acres treated for hazardous fuels reduction as an accomplishment only after an entire project has been completed and the desired condition is achieved. Allow for investment of a portion of hazardous fuels funding on state and private lands commensurate with program funding increases for NFS lands.	
Wildfire Address the associated impacts of wildfire funding on federal natural resource management capacity, planning and project implementation. Ensure budget actions continue to support state wildfire and forestry capacity, including the USFS State and Private Forestry programs. Improve interagency communication, fire response capability, and coordination, including the sharing of firefighting resources between federal and state agencies. Ensure these activities support fire prevention, full suppression strategies and management of wildfire for resource benefits. Continue to seek opportunities, including revisions to forest plans, to enhance safety and reduce costs in suppression decisions while protecting communities. Incentivize local governments to take voluntary actions to support the creation and expansion of fire-adapted communities and resilience. Provide additional analyses to help communities evaluate the full costs of suppression in the wildland urban interface.	WGA Policy Resolution 2017-10, National Forest and Rangeland Management WGA Policy Resolution 2017-09, Western Agriculture National Forest and Rangeland Management Initiative June 2017 Special Report Letter: Wildfire Funding Reform
Wood Products	WGA Policy Resolution 2017-09, Western Agriculture

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Expand opportunities for existing programs and financing to support wood product business development and infrastructure. Encourage collaboration between USFS research and development, state and private forestry, and NFS capacities that support existing and emerging wood products technologies. Encourage appropriate research, development and deployment focused on commercially-ready technologies with high potential to contribute to current and emerging restoration objectives. Better align these capacities with the contributions of states and industry partners and actively pursue public-private partnerships, with the goal of providing sustainable economic development opportunities for rural communities. Pass legislation to promote forest and rangeland product markets and technologies, and expand funding for the Community Wood Energy Program. Use program funds to create and incentivize state, federal and tribal partnerships in support of these objectives.	National Forest and Rangeland Management Initiative June 2017 Special Report
Seed Reserves Utilize state expertise to develop a national network for the production and storage of native and non-native seed reserves adequate to meet the West's rehabilitation and restoration needs. Maintain these storage facilities on a 10-year planning horizon.	Letter: Governors' Comments on the 2015-2020 National Seed Strategy for Rehabilitation and Restoration Letter: Secretarial Order 3336: Rangeland Fire Prevention, Management, and Restoration Testimony: Oversight Hearing on Invasive Species
Invasive Species Ensure a more focused and streamlined federal approach to invasive species. Promote greater coordination, collaboration, and communication with states and Pacific islands Provide greater transparency of invasive species data and management decisions.	WGA Policy Resolution 2016-05, Combating Invasive Species Letter: Western Governors Request Clarification on DOI Collaboration with States on Invasive Mussel Prevention Letter: Western Governors Request Collaboration with DOI on Invasive Mussels Letter: Recommendations for State Experts for Invasive Species Advisory Council

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Strengthen the national network of native and non-native seed reserve and storage facilities for rehabilitation and restoration.	Letter: Governors' Concern Regarding Invasive Species Management Testimony: Oversight Hearing on Invasive Species Letter: Governors' Comments on the 2015-2020 National Seed Strategy for Rehabilitation and Restoration Letter: Secretarial Order 3336: Rangeland Fire Prevention, Management, and Restoration
Cross-Boundary Projects Identify business practice barriers to cross-boundary projects involving federal, state and private lands. Develop training on state and federal contracting procedures for cross-boundary projects and use Service First authorities. Establish multi-agency pilot projects, which can suggest models for subsequent formal agreements. Target funding from USFS, BLM, NRCS and state sources to address cross-boundary management goals in priority areas consistent with state plans. Increase training of state, tribal, and other partners in USFS analysis, administration, and practices to facilitate cross-boundary projects.	National Forest and Rangeland Management Initiative June 2017 Special Report
Restoration Improve flexibility and integration of grazing management and targeted grazing as tools to achieve restoration and land management goals. Prioritize restoration activities across all ownerships to create resilient landscapes. Explore the use of strike teams, interagency ESA consultation support and other modular capacity to accelerate restoration in priority areas, including the expanded use of existing statutory authorities. Collaborate with environmental regulators to reduce legislative and regulatory barriers to restoration activities.	WGA Policy Resolution 2017-10, National Forest and Rangeland Management WGA Policy Resolution 2018-02, Public Lands Grazing National Forest and Rangeland Management Initiative June 2017 Special Report Letter: Governors' Response to GNA Guidance Letter Letter: Governors' Support for Accelerated Implementation of Forest Management Projects

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Expand use of authorities included in the 2014 Farm Bill to increase the pace and scale of forest management and restoration on western National Forests and adjacent non-federal lands. Authorize the use of stewardship and GNA funds for recreation improvements and restoration planning and implementation. Codify and fund the USFS State and Private Landscape Scale Restoration Competitive Grant program to prioritize work consistent with state forestry goals and action plans. Codify and direct funding for the Joint Chiefs Landscape Restoration Program. Modify employee relocation practices to optimize leadership development and longevity.	
State and Local Liaisons Invest in key state and federal liaison positions with decision-making authority to provide better engagement and understanding between state and federal forest, wildlife, and rangeland agencies. Facilitate the participation of local governments by dedicating staff to develop and provide technical assistance and enhance communications across local, tribal, state and federal partners.	National Forest and Rangeland Management Initiative June 2017 Special Report
Environmental Review Implement NEPA streamlining efforts that promote best practices or procedural innovations, including the use of landscape-scale, programmatic, adaptive and iterative analyses. Support independent research and analysis from NGO, academic, and other partners to inform NEPA and ESA process improvements. Develop metrics for successful outcomes, including cost and time performance indicators. Consider standardized approaches to environmental analysis to increase efficiency and reduce time to decision.	National Forest and Rangeland Management Initiative June 2017 Special Report

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Ensure agency NEPA implementation policy includes comprehensive training and accountability for field practitioners. Use information technology to improve the efficiency and transparency of NEPA and reduce redundant data, analysis and business practices. Build consistency in environmental analysis and bring agency practice in conducting EAs more in line with the administrative policy intent of streamlined, summary documents.	
Alternatives, Significance Thresholds, Extraordinary Circumstances, and Categorical Exclusions (CEs) Provide improved analytical tools no-action alternatives. Allow agencies to analyze only the action and no-action alternatives when a project is collaboratively developed, unless a third alternative is proposed and meets the purpose and need of the project. Clarify significance thresholds and Extraordinary Circumstances language for NEPA based on best practices and provide, where possible, consistent approaches to interpreting these NEPA requirements when agencies and the courts have had conflicting interpretations. Develop a new NEPA restoration CE that is based on decisions documented in a Decision Notice and Finding of No Significant Impact over the past five years where no significant impacts have occurred.	National Forest and Rangeland Management Initiative June 2017 Special Report
Streamlined Environmental Analysis Pilot Program Create a new pilot program to prioritize landscape-scale, streamlined environmental analysis for restoration projects envisioned over geographies greater than 100,000 acres (using either environmental assessments or environmental impact statements, depending on context and size of the project) in landscapes with demonstrated ecological and economic need and effective existing collaboration among diverse stakeholders. The analysis should be sufficient to allow for project-scale implementation and adaptive management, and should include the following elements:	WGA Policy Resolution 2017-09, Western Agriculture National Forest and Rangeland Management Initiative June 2017 Special Report

DRAFT

Proposed Legislative Action	Governors' Policy
• Site descriptions or land allocations that identify locations within the landscape in which specific restoration or maintenance treatments can be used appropriately; • Standards and guidelines consistent with the appropriate forest plan and project-level design criteria for projects; • Identification of the cumulative impacts of the project; and • Provisions allowing for the implementation of project-level actions barring the introduction of new information or unforeseen circumstances. Congress should consider creating a limited and short-term categorical exclusion (CE) under NEPA available to expedite work in these pilot landscapes while environmental analyses are being developed, available for use at the agency's discretion provided the analyses achieve defined progress milestones.	
Land Use Planning, USFS Forest Plans and BLM Resource Management Plans (RMPs) Enhance state-federal consultation regarding BLM's planning processes. Federal-state consultation should be substantive, take place on an early and ongoing basis, and involve both Governors and state regulators. RMPs should be developed and amended with meaningful and substantial input from governors and state regulators before they are released for public comment. Apply Governors' Consistency Reviews to ensure consistency of RMPs with state plans, policies, programs, and processes. Maintain the existing appeals process and timelines for Consistency Reviews and provide sufficient time for their completion. Ensure that the standard for consistency in the RMP process matches the requirement of FLPMA 1712(c)(9). Retain existing minimum public comment time frames and existing requirements for publication of a *Federal Register* notice at the start of every planning effort, as well as extend these publication requirements to Notices of Intent to prepare EAs as part of RMP amendments.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship National Forest and Rangeland Management Initiative June 2017 Special Report Letter: Lack of Consultation on DOI Proposed Regional Office Boundaries Letter: Governors Encourage Collaboration on BLM Planning and Environmental Review Letter: Governors Request Engagement with BLM on Land Use Planning and NEPA Processes Letter: Governors Concerned by Final BLM Planning 2.0 Rule Testimony: BLM Proposed Rule, Resource Management Planning Comments: BLM Proposed Rule, Resource Management Planning Letter: Request for Extension of Comment Period for BLM Proposed Rule, Resource Management Planning Letter: Request for Clarification on Aspects of BLM's Resource Management Planning (Planning 2.0) Initiative

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Resolve outstanding issues with potential requirements to reinitiate endangered species consultations following the adoption, amendment or revision of an appropriate management plan.	
Local Offices and Workforce Give BLM state office directors independent authority to respond to issues that are unique to individual states. Modify employee relocation practices to optimize leadership development and longevity.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship Letter: Lack of Consultation on DOI Proposed Regional Office Boundaries Letter: Governors Request Engagement with BLM on Land Use Planning and NEPA Processes
Mitigation Policy Develop mitigation requirements and processes that may affect state and private land in cooperation with the Governors in whose states DOI lands are situated. Clearly define and predictably implement mitigation requirements and processes so they can be incorporated in project planning. Revise BLM Mitigation Policy to better define key terms.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship Letter: Governors Request DOI Establish Preference for State-based Mitigation Programs Letter II: Reiterating Request for Clarification on Secretarial Order 3330 Letter I: Request for Clarification on Secretarial Order 3330
Royalties and Leasing Provide states a forum to advise DOI on federal mineral leasing royalty policy (such as through reestablishment of the Royalty Policy Committee). Support legislation, regulatory changes, and agency practices that provide transparency and certainty, ensure fair value for the American public, and more efficiently administer the sales and leases of the resources on these federal lands.	WGA Policy Resolution 2017-12, States' Share of Royalties and Leasing Revenues from Federal Lands and Minerals and States' Role in Associated Federal Policy
Grazing Promote grazing allotment flexibility on federal lands, within FWS and BLM permitting systems and across ownership boundaries, to respond to changing range conditions and environmental considerations.	WGA Policy Resolution 2018-02, Public Lands Grazing National Forest and Rangeland Management Initiative June 2017 Special Report

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Improve flexibility and integration of grazing management and targeted grazing as tools to achieve restoration and land management goals.	
Vegetation Management Apply clear, coordinated and consistent federal vegetation management practices to maintain the health of western forests, prevent dangerous and damaging fires, and maintain grid reliability. Enable utilities to take necessary vegetation management actions on or adjacent to federal transmission rights-of-way without fear of strict liability imposition.	WGA Policy Resolution 2017-10, National Forest and Rangeland WGA Policy Resolution 2016-06, Wildland Fire Management and Resilient Landscapes WGA Policy Resolution 2018-04, Energy in the West Letter: Support for Expedited Review of Reintroduced Electricity Reliability and Forest Protection Act Testimony: WGA Advocates for Responsible Vegetation Management for Electricity Assets on Federal Lands
State Authority / Energy Development Direct DOI, EPA and other federal agencies must work collaboratively with states when considering regulations that would affect development of oil, natural gas, coal, solar, wind, geothermal or other energy resources on federal land or Indian land. When a state is meeting the minimum requirements of a delegated program, the role of federal agencies should be limited to the provision of funding, technical assistance and research support. States should be free to develop implementation and enforcement approaches that make sense within their jurisdictions, without intervention by the federal government.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship C-3-a: Each Executive department and agency should be required to have a clear and accountable process to provide each state – through its Governor as the top elected official of the state and other representatives of state and local governments as he or she may designate – with *early*, *meaningful* and *substantive* input in the development of regulatory policies that have federalism implications. This includes the development, prioritization and implementation of federal environmental statutes, policies, rules, programs, reviews, budgets and strategic planning.
State Authority / Vegetation Management Direct USFS and other federal land management agencies to work collaboratively with states to achieve effective and efficient cross-jurisdictional coordination that enables utilities to undertake necessary vegetation management actions on federal transmission rights-of-way – and to do so without fear of strict liability imposition for necessary vegetation management actions taken adjacent to transmission rights-of-way.	WGA Policy Resolution 2017-10, National Forest and Rangeland Management B-9: Western Governors believe clear, coordinated and consistent application of federal vegetation management practices is integral to maintaining the health of western forests, preventing dangerous and damaging fires, and maintaining grid reliability.
Enhanced Oil Recovery	WGA Policy Resolution 2015-06, Enhanced Oil Recovery

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Direct federal agencies to promote development and deployment of CO2 capture and commoditization. States should be able to create programs tailored to individual state needs, industries and economies and recognize CO2 sequestration that results from EOR in meeting federal regulatory objectives. EPA should abide by principles already established by the Agency in its regulations promulgated to ensure the long-term storage of CO2 in different geologic formations.	B-3: In order to expand deployment of CO2 capture at power plants and other industrial sources, the President and Congress should enact federal incentives to increase CO2 supply available for the oil industry to purchase and use in EOR. Federal incentives have the potential to leverage private and state investment, harness the ingenuity of entrepreneurs and capitalize on billions of dollars' worth of DOE-sponsored research and development to enable new commercial carbon capture and pipeline projects
Financial Assurance Regulation EPA should be directed to work collaboratively and substantively with states to determine the necessity of financial assurance regulations for the hardrock mining; coal and petroleum products manufacturing; chemical manufacturing and electricity generation, transmission and distribution industries.	WGA Policy Resolution 2017-06, Financial Assurance Regulation B-3: Prior to determining whether to pursue CERCLA section 108(b) financial assurance regulations for any of the chemical manufacturing; petroleum and coal products manufacturing; or electric power generation, transmission and distribution industries, EPA should consult with Western Governors and state regulators regarding existing state regulations. EPA should take into account state data and expertise in development and analysis of underlying science that serves as the legal basis for federal regulatory action. B-4: In the event EPA opts to pursue financial assurance regulation of the chemical manufacturing industry; petroleum and coal products manufacturing industry; or electric power generation, transmission and distribution industry, it should enter substantive pre-publication consultation with Western Governors and state regulators to prevent duplication or preemption of existing state law. This should include substantive consultation with states during development of rules or decisions and a review by states of any proposal before a formal rulemaking is launched.
House Natural Resources / Senate Environment and Public Works	
Petitions Require petitioners to provide a copy of petitions to affected states so states may provide any existing state data regarding the petitioned species. Army Corps of Engineers Water Supply Rule Fulfill the expanded procedural rulemaking requirements of Executive Order 13132. Recognize state authority over water management and allocation within their borders – states must not be required to relinquish any of their rights to natural flows of rivers which have been impounded by USACE or any other federal agencies. Define "surplus water" to expressly exclude natural flows (and any quantification of such flows) which would have occurred without the development of federal water projects. Allow access to divert and appropriate natural flows in USACE reservoir projects and do not charge storage fees to appropriators where such users are making withdrawals of natural flows within USACE reservoirs.	Letter: Governors Offer Analysis, Recommendations to Army Corps on Regulation of "Surplus Waters" Appropriations Requests Testimony FY2018
Drought Seventeen Bureau of Reclamation states, Hawaii and Alaska are affected by water shortages because of extended drought conditions and infrastructure to assure adequate water supplies. This challenge has both regional and national aspects, including how best to meet the need for efficient infrastructure financing to maintain and enhance adequate water	WGA Policy Resolution 2015-08, Water Resource Management in the West B-2: Infrastructure investments are essential to our nation's continued economic prosperity and environmental protection, and they assist states in meeting federally-mandated standards.

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
supplies, avert further economic and environmental harm, and maintain food security. The following policy solutions should be considered: • Providing incentives for innovative water management policies among states (with federal, tribal and local partners) that preserve states' primacy in water management, recognize state law, and align with the financial, environmental and social values of water to Western citizens today and in the future; • Strengthening federal efforts to maintain adequate collection of drought and water data; • Coordinating information programs across multiple agencies, enhancing data networks (where appropriate) and facilitating better use of existing information; • Promoting greater investment in water infrastructure through tools such as loan guarantees, revolving funds, infrastructure banks, and water trust funds; and • Creating a budget neutral federal loan program that will make it possible for Western states, and other concerned public and private entities in western states, to secure financing on reasonable terms to complete important water resources management projects.	Congress should consider facilitating greater investment in water infrastructure, utilizing such tools as loan guarantees, revolving funds, infrastructure banks and water trust funds. Capital budgeting and asset management principles should be used to determine funding priorities based on long-term sustainability and not annual incremental spending choices. It should be accompanied by dedicated sources of funding with appropriate financing, cost-sharing, pricing and cost recovery policies. Federal and state policymakers should also consider other tools to promote investment in water infrastructure and reduce financing costs, including: public-private partnerships; bond insurance; risk pooling; and credit enhancements. Congress should remove the state volume caps for private activity bonds used for water and wastewater projects, provide guaranteed tax-exempt status for bonds issued by state or local agencies to finance water infrastructure, provide loan guarantees, and otherwise support and encourage alternatives to direct federal investment of limited general funds.
Harbor Maintenance Trust Fund Fully fund the Harbor Maintenance Trust Fund and reform the Harbor Maintenance Tax to ensure Western ports remain competitive.	WGA Policy Resolution 2015-05, Transportation Infrastructure in the Western United States

WGA Resolutions Development Process Calendar –Spring 2018

Under the revised Western Governors' Association bylaws, initial drafts of resolutions must be circulated no less than 60 days prior to a vote of the Governors. **For the spring 2018 resolution cycle, that deadline will be April 26, 2018**[1]

Here is the calendar plan for the spring 2018 policy development cycle:

- **January 1 –April 26 1–**Staff Council members identify any policy issues their Governor may want to offer a resolution on, to be voted on by ballot in advance of the 2018 Annual Meeting. Interested states are identified to help craft a first draft of the resolution.
- **March 14**) –Spring 2018 SAC Strategic Planning Meeting (Denver, CO).
- **April 5**– Regularly Scheduled Biweekly SAC Call
- **April 19**– Regularly Scheduled Biweekly SAC Call
- **April 26–** Bylaw-driven deadline for all initial draft resolutions to be circulated to SAC.
- **May 3–** SAC call to review and discuss draft resolutions.[2]
- **May 10–** SAC call to review and discuss draft resolutions.
- **May 17–** SAC call to review and discuss draft resolutions.
- **May 21** – Governors-Only Call – to discuss any draft resolutions requiring gubernatorial direction.
- **May 24–** SAC call to review and discuss draft resolutions.
- **May 31–** SAC call to review and discuss draft resolutions.

[1] WGA Bylaws, Article VI(A)(3) : "A resolution may be proposed by a Director at any time. Providing sufficient time for deliberation, discussion and negotiation of its content, the Directors shall vote on the resolution (as revised or not during the review period) not less than sixty (60) days following the circulation of the initial draft to all the Directors."

[2] The resolution development calendar suggests moving to weekly SAC calls in May-mid-June to help facilitate negotiation of resolution language. If all weeks are not necessary, we will release dates accordingly.

DRAFT

AMERICAN OVERSIGHT

- **June 7–** SAC call to review and finalize all draft resolutions meeting bylaw requirements of co-sponsorship. Identify where language differences still exist and summarize the dispute for the Governors' consideration.

- **June 8** (COB)**--** All proposed resolutions with required co-sponsors and memo summarizing which resolutions are still in conflict sent to Vice Chair Ige.

- **June 8-11 —** Vice Chair Ige reviews and gathers Governors' input to any resolutions in conflict.

- **June 12 –** Meeting notice, resolutions and ballots go out to Governors.

- **June 22 –** Governors' completed ballots requested back to WGA staff.

- **June 24-27 –** Governors' 2018 Annual Meeting / announcement of resolution ballot results.

MEMORANDUM

To: WGA Staff Advisory Council
From: Lauren DeNinno, Policy Advisor and WIPP Project Director
Date: 2/7/2018
Re: Funding and Consultation with DOE regarding WIPP Cooperative Agreement

---

Action Requested: Please advise WGA whether this is an area that Governor's wish to: a) assert their policy on Building a Stronger State-Federal Relationship generally; b) send a letter opposing the potential change to how this cooperative agreement is funded; or c) see their WIPP TAG members to directly address.

The Department of Energy (DOE) is considering changes to how cooperative agreements with the states for the safe and uneventful transportation of nuclear waste are funded. Nine western states currently receive funding through a cooperative agreement between WGA and DOE related to shipments of nuclear waste to the Waste Isolation Pilot Plant (WIPP) in New Mexico. Federal funding has been needs-based since the program's inception. Due to budget constraints, DOE is now considering switching to formula funding and has solicited suggestions from its Carlsbad Field Office (CBFO) regarding which factors would need to be weighted. DOE has not provided additional information or consulted with the states at this time.

Background

WIPP, located near Carlsbad, New Mexico, is the United States' (indeed, the world's) only deep geologic repository for the permanent disposal of nuclear waste. It was established by the WIPP Land Withdrawal Act (Public Law 102-579, as amended by P.L. 104-201) for the disposal of defense-generated transuranic (TRU) waste. Several DOE sites in the West generated TRU waste as a result of nuclear weapons production, including Idaho National Laboratory; Los Alamos and Sandia National Laboratories in New Mexico; Rocky Flats Environmental Technology Site in Colorado; the Hanford Site in Washington State; Lawrence Livermore and Lawrence Berkeley National Laboratories and GE Vallecitos Nuclear Center, all in California; and the Nevada Test Site.

The DOE Office of Environmental Management is responsible for cleaning up these legacy sites and transporting the TRU waste generated during cleanup activities to WIPP for permanent disposal. The WIPP Land Withdrawal Act directed DOE to develop transportation safety programs with any states or Indian tribes through whose jurisdiction the waste would be transported as well as to provide technical and financial assistance to the states and tribes to support the programs.

In 1989, the Secretary of Energy entered into a cooperative agreement with WGA to prepare procedures for planning and operating the WIPP transportation program. In turn, WGA established a Technical Advisory Group (TAG), consisting of representatives from western states[1] located along the WIPP transportation corridor, to address issues that would help ensure the "safe and uneventful" movement of the waste.

The cooperative agreement has been renewed several times and the current period of performance is through 6/30/2021. WGA serves as the pass-through entity for funds allocated from the federal

[1] Arizona, California, Colorado, Idaho, Oregon, Nebraska, Nevada, New Mexico, Texas, Utah, Washington and Wyoming

DRAFT

AMERICAN OVERSIGHT

government to be used by the states. These funds can be used by the states for a variety of purposes in support of the transportation safety program, including inspections, emergency response preparedness, program management and public information efforts. The level of funding varies by state and is approved by DOE on a yearly basis.

Funding Changes

The TAG learned in the summer of 2017 that DOE was considering a formula-based funding model for the cooperative agreement. James Mason, Institutional Affairs Manager at CBFO, communicated that reduced budgets have led to increased scrutiny and oversight of the cooperative agreements and that DOE is interested in tying the level of funding to the number of shipments that are expected to be completed each year.

Members of the TAG oppose a change from need-based funding. The funding states receive is used for a number of purposes, including fixed costs that do not vary based on the number of shipments DOE completes, such as program oversight, training, providing equipment to first responders and hospitals along the route, and maintaining qualified commercial vehicle inspectors. For this reason, states that are not currently on an active shipping route continue to receive funding to maintain readiness for resumption of shipments in the future.

Further, each state's needs vary in ways that would be difficult to account for in a formula. CBFO has suggested that factors such as whether the state inspects each shipment crossing its border, the number of miles traveled, and the size and number of populations centers along the route would be factors considered in the formula. However, additional state-by-state variations affect how much funding each state currently requires.

The WIPP Land Withdrawal Act directs DOE to "provide in-kind, financial, technical, and other appropriate assistance to any State or Indian tribe through whose jurisdiction the Secretary plans to transport transuranic waste to or from WIPP, for the purpose of WIPP-specific transportation safety programs".

Consultation with States

Beyond the potentially detrimental funding change, members of the TAG are also concerned by the deterioration of the collaborative relationship between the states and DOE in recent years. Congress recognized the benefits of a cooperative program between the states and DOE in the WIPP Land Withdrawal Act and enshrined that cooperation in statute. Further, in 1995, 2003, and 2009, DOE and WGA signed a Memorandum of Agreement[2] outlining the joint responsibilities of both parties for the safe and uneventful transportation of TRU waste to WIPP and "committing to work cooperatively".

Western Governors note the value of this cooperation in WGA Policy Resolution 2016-03, *Transportation of Radioactive Waste, Radioactive Materials, and Spent Nuclear Fuel,* which notes that "the success of the WIPP TRU waste transportation campaign is directly attributable to a collaborative partnership and planning effort between DOE and the western states to develop and implement the WGA WIPP Transportation Safety Program".

[2] The MOA is "to be reviewed and reaffirmed by the Secretary of Energy and the Western Governors within one year following the election of a new President of the United States". WGA initiated this process in May 2017 and has been told that the MOA is undergoing DOE legal review since that time.

DRAFT

AMERICAN OVERSIGHT

Nonetheless, DOE has not been honest nor forthcoming in its communication with the states regarding this proposed fundamental change to the program. The TAG expects the states, as full and equal partners in transportation safety program, to be consulted and to provide input at the outset of discussions on potential changes, not after DOE has already chosen its preferred path forward. If DOE is considering formula-based funding in particular, the input of the states on what factors need to be considered would be essential to the continued success of the partnership.

WGA Policy Nexus

In Policy Resolution 2016-03, Western Governors state that "DOE must continue to provide sufficient and timely in-kind, financial, technical and other appropriate assistance to any state or Indian tribe through whose jurisdiction TRU waste will be transported for the purpose of planning, developing and implementing the WGA WIPP Transportation Safety Program." Many members of the TAG believe that formula funding will not provide sufficient funding to many states.

More importantly, the TAG, which is composed of representatives designated by the Governors of each state, exists as an apparatus for state-federal consultation. Despite this and the clear intent of Congress in the WIPP Land Withdrawal Act, DOE is not engaging in early, meaningful or substantive consultation with the states as articulated in WGA Policy Resolution 2017-01, *Building a Stronger State-Federal Relationship.*

WGA Staff: Lauren DeNinno (ldeninno@westgov.org)

DRAFT

AMERICAN OVERSIGHT

MEMORANDUM

TO: WGA Staff Council
FROM: WGA Staff: Kevin Moss and Lauren DeNinno
DATE: February 8, 2018
RE: Rural Broadband Access

ACTION REQUESTED:

Western Governors support expanding broadband access to rural Americans in WGA Policy Resolution 2017-09, *Western Agriculture*. Please advise what avenues WGA should advance this policy, as rural broadband is emerging as a priority of the White House with directions for action to multiple agencies.

Introduction

Broadband internet access, defined as 25 Mbps download/3 Mbps upload, has become a modern necessity for individuals, businesses, schools, and government. It has the potential to connect rural communities to their more urban counterparts through telework, telehealth, online education and other tools. However, according to the Federal Communication Commission's (FCC) 2016 Broadband Progress Report, of the 34 million Americans that lack access to broadband coverage, 23.4 million live in rural communities. The disparity between rural and urban broadband access is mainly due to the high cost of building infrastructure and laying miles of fiberoptic cable to rural communities. New technology could potentially serve some rural western communities for a much lower cost than traditional broadband infrastructure.

Executive Branch Overview

Expanding rural broadband access has emerged as a clear priority of the Trump administration. President Trump issued Executive Order 13821 and a memorandum to DOI on January 8, 2018 to expedite and streamline rural broadband projects. The E.O. advocates using "all viable tools to accelerate the deployment and adoption of affordable, reliable, modern high-speed broadband connectivity in rural America," and that agencies "should seek to reduce barriers to capital investment, remove obstacles to broadband services, and more efficiently employ Government resources." The memorandum directs the Secretary of the Interior to develop a plan to increase access to tower facilities and other DOI infrastructure to support rural broadband development.

USDA released a report on January 8, 2018 highlighting the findings of the Interagency Task Force on Rural Prosperity and Agriculture. One of the identified objectives is achieving "e-connectivity" for rural America. Specific recommendations for increasing broadband connection in rural communities include "reducing regulatory barriers to infrastructure deployment" and "incentivizing private capital investment." USDA also emphasized the need to enhance rural high-speed internet access to support rural development in their 2018 Farm Bill & Legislative Priorities.

TV White Spaces Technology

AMERICAN OVERSIGHT

The high cost of laying fiber and building infrastructure combined with few potential customers is the main reason for the lack of broadband access in many rural communities. A potential low-cost solution to this problem is Microsoft's TV white spaces technology, which uses spectrum in the television band to provide wireless services. Microsoft's Ryan Harkins presented on this technology at the final Workforce Development Initiative workshop and the 2017 Winter Meeting.

TV white spaces technology has the potential to bring cost-effective broadband access to areas with a population density of 2-200 people/sq. mile, approximately 80% of rural America[1]. Fixed wireless 4G technology and satellite connections present more cost-effective access for higher and lower population densities, respectively.

Microsoft is partnering with local ISPs to conduct TV white spaces pilot projects in 13 states, including Arizona, Montana, North Dakota, South Dakota, and Washington. Microsoft supplies the hardware and technical expertise to get the projects up and running while the local ISP will run and maintain the network. Microsoft is focusing the pilot projects in areas where broadband access will have significant applications in agriculture, education, and health care. The pilot projects will demonstrate the technology's viability and encourage other companies to offer the service. Most of the pilot projects are still in the planning and development stage.

The FCC is currently considering policy measures that will affect the regulatory environment for the development of TV white spaces technology.

FCC Background

In April 2017, the FCC held their Spectrum Auction, in which licenses to operate at specific bands of electromagnetic spectrum were bought and sold between television stations and wireless providers. This auction, authorized by Congress as part of the 2012 Middle Class Tax Relief and Job Creation Act, incentivized broadcast stations to repurpose spectrum for mobile broadband and other licensed and unlicensed uses. All told, wireless broadband providers spent over $19 billion to purchase 70 MHz of spectrum in the 600 MHz band.

The next step in the FCC process is the "repack," the shuffling of TV stations and other services to new frequencies to most efficiently allocate the remaining spectrum. This complicated process will last until 2020. As part of the repack, channel 37 (608-614 MHz) and the "duplex gap" (652-663 MHz) will be allocated for *unlicensed* use by a variety of wireless services, including TV white spaces technology. The FCC is also considering reserving a third channel in the broadcast TV band (54-608 MHz) for unlicensed use, which would serve as the core broadband access channel for TV white space users. The FCC communicated a tentative decision to reserve this third "vacant" channel in FCC 15-68, a 2015 notice of proposed rulemaking. The FCC is planning to vote on whether to reserve this third unlicensed channel, but has not announced when the vote will be held.

Reserving a third unlicensed channel would help promote the adoption of TV white space technology in rural communities and Microsoft believes it is critical for the technology to be adopted at scale. However, reserving the channel could have potential negative impacts on local television providers and translator stations by reducing the amount of available television spectrum. These stations often provide free, over-the-air broadcasts for news, weather, and emergency messages that many rural Americans rely upon. A bipartisan coalition of 43

[1] *A Rural Broadband Strategy. Connecting Rural America to New Opportunities*. Microsoft (2017).

AMERICAN OVERSIGHT

Congressional representatives sent a letter to the FCC in July 2017 urging them to reserve three 6 MHz channels for unlicensed use to help promote rural broadband internet access.

On February 1st, the FCC finalized bidding procedures for the Connect America Fund Phase II Auction, and confirmed that TV white space bands could be used for "last mile" connection. The Phase II auction, scheduled for July 24th, 2018, will award up to $198 million annually for 10 years to service providers that commit to offer voice and broadband services to fixed locations in unserved high-cost areas.

WGA Policy Nexus

Western Governors support expanding broadband access to rural Americans in WGA Policy Resolution 2017-09 *Western Agriculture*, which states:

> Western Governors support the continued efforts of the Rural Utilities Service to provide financial assistance for drinking water, wastewater facilities and broadband connectivity in rural and remote areas, particularly in communities that have minimal or no such infrastructure. Expanding broadband access to rural America will allow citizens to compete in a global market and have access to IT health care, education and public safety resources.

In 2015, in anticipation of the Spectrum Auction, WGA also sent a letter to the FCC urging the commissioners to consider the needs of rural Americans and to ensure that the "auction process leaves no community without access to free, over-the-air television broadcasts."

WGA Policy Resolution 2017-12 Workforce Development in the West also notes that "workforce development challenges are particularly acute in rural communities." Participants in the Workforce Development Initiative identified the lack of rural broadband internet access as a serious challenge facing rural communities in the west. Broadband is essential for rural students to learn digital skills and take advantage of online resources. It is also critical for small business owners competing in a global marketplace. Many workforce development solutions for rural communities use online resources to deliver training and education opportunities.

Action Items

The following list presents the various ways in which WGA could engage on policy related to rural broadband deployment and access.

1. Engage with USDA about the connection between broadband access and rural development. Support the findings related to broadband deployment by the Interagency Task Force on Rural Prosperity and Agriculture Report and in the 2018 Farm Bill & Legislative Priorities.
2. Encourage DOI to consider rural communities' broadband needs when designating West-wide energy corridors under Section 368 of the Energy Policy Act of 2005. These corridors are intended to streamline permitting for linear infrastructure, which includes broadband infrastructure.
3. Send a letter to the FCC regarding the eventual vote on whether to reserve a third 6 MHz channel in the television band for unlicensed use.

SUBJECT: EPA Lead and Copper Rule Revisions – Federalism Consultation
DATE: Feb. 7, 2018

On Jan. 8, WGA staff, as well as representatives from several organizations of state and local officials,[1] participated in a federalism consultation[2] with the EPA Office of Ground Water and Drinking Water to discuss long-term revisions to the Lead and Copper Rule (LCR) under the federal Safe Drinking Water Act (SDWA). EPA is soliciting federalism comments and has posed a series of questions for input from state and local officials. **Comments must be received on or before Mar. 8, 2018**.

The LCR, which applies to 68,000 public water systems nationwide, is a treatment technique rule that requires water systems to conduct tap sampling for lead and copper to determine actions water systems must take to reduce exposure to lead and copper in drinking water. EPA's presentation of potential revisions includes new requirements on states, local governments, and utilities which could impose substantial costs and particularly impact smaller, rural water systems.

Additional information on the LCR can be found at: https://www.epa.gov/dwreginfo/lead-and-copper-rule.

Action Requested: Please review the questions that have been posed by EPA, below, and provide input as to what issues should be addressed in any comments that WGA may submit as part of EPA's LCR federalism consultation.

Nexus to WGA Policy

Policy Resolution 2017-04, *Water Quality in the West*, contains the following applicable provisions:

---

[1] Other organizations participating in the consultation included: National Governors' Assoc., National Conference of State Legislatures, Council of State Governments, National League of Cities, U.S. Conference of Mayors, National Assoc. of Counties, National Assoc. of Towns and Townships, Environmental Council of States, Assoc. of State Drinking Water Administrators, Assoc. of Metropolitan Water Agencies, National Rural Water Assoc., American Water Works Assoc., American Public Works Assoc., National School Board Assoc., and the American Assoc. of School Board Administrators.

[2] As mandated under Executive Order 13132, *Federalism* (64 Fed. Reg. 43255, Aug. 4, 1999). EPA announced that the agency intends to use the meeting to also satisfy consultation requirements mandated by the Unfunded Mandates Reform Act.

AMERICAN OVERSIGHT

- Sec. (b)(8), Federal Assistance in Meeting SDWA Standards: Western Governors believe that the SDWA and its standards for drinking water contaminants have been instrumental in ensuring safe drinking water supplies for the nation. It is essential that the federal government, through EPA, provide adequate support to the states and water systems to meet federal requirements. Assistance is particularly needed for small and rural systems, which often lack the resources needed to comply with federal treatment standards.

- Sec. (b)(9), Drinking Water Standards: In any drinking water standards that the EPA may revise or propose for these and other contaminants, including disinfection byproducts, EPA should consider the disproportionate impact that such standards may have on Western states and give special consideration to feasible technology based on the resources and needs of smaller water systems.

- Sec. (b)(10), Risk Assessments: Analysis of the costs of treatment for drinking water contaminants should carefully determine the total costs of capital improvements, operation and maintenance when determining feasible technology that can be applied by small systems. These costs should be balanced against the anticipated human health benefits before implementing or revising drinking water standards.

- Sec. (b)(11): EPA Support and Technical Assistance: The federal government through EPA should provide states and local entities with adequate support and technical assistance to help them comply with federal water quality and drinking water requirements. EPA should also collaborate with and allow states to identify and establish priority areas, timelines, and focus on programs that provide the largest public health and environmental benefits

Background

In 2017, EPA announced plans to revise and strengthen provisions of the LCR, hastened by the recent drinking water supply crisis in Flint, MI, as well as other well-publicized failures of public water systems. EPA Administrator Scott Pruitt has also announced EPA's new war on lead and recently sent a letter to other Cabinet officials, announcing a Feb. 15 meeting to "consider actions that the federal partners may undertake over the next one to three years to further reduce childhood lead exposures and eliminate associated health impacts."

The LCR, first promulgated in 1991 and revised in 2000 and 2007, requires water systems to conduct tap sampling for lead and copper to determine what actions must be taken to reduce exposure to lead and copper. Under the LCR, water systems must work with their customers to collect samples from locations with lead service lines and/or leaded plumbing materials. When action levels are exceeded in more than ten percent of tap water samples collected during any monitoring period (i.e., if the 90th percentile level is greater than the action level), a water system must take certain actions, depending on the size of the system.

LCR Revisions, Federalism Consultation, and EPA Requests for Input

At the Jan. 8 federalism consultation, EPA presented slides that followed recommendations provided in a 2015 Report from the National Drinking Water Advisory Council (NDWAC), a Federal Advisory Committee established under the SDWA. Key areas of focus identified for LCR revisions include: (i) Lead Service Line Replacement; (ii) Corrosion Control Treatment; (iii) Tap Sampling; (iv) Public Education and Transparency; and (v) Renewed Copper Requirements. Noticeably

AMERICAN OVERSIGHT

absent was a clear and comprehensive discussion of costs to be borne by states or any enhancements to federal funding mechanisms for the extensive revisions presented.

1. **Lead Service Line Replacement:** Although lead plumbing fixtures (pipes, solder, flux) were banned under the SDWA in 1986, EPA estimates that 6.5 to 10 million lead service lines are currently still in use throughout the country. Estimates for replacing all lead service lines nationwide range from $16 to $80 billion. Adding complexity to replacement is the fact that, in most communities, lead service lines are partially or entirely privately-owned. Homeowners and renters may be unwilling or unable to replace the portion of the water lines located on their private property. There is a great deal of legal uncertainty as to the authority of EPA, states, local governments, and water utilities to mandate replacement of privately-owned lines and the payment for such replacement.

   EPA has requested input to the following questions regarding lead service line replacement - What are the opportunities and challenges to state and local governments if EPA were to modify the LCR to:

   a. Require systems to create an inventory of lead service lines currently in use?

   b. Require proactive full lead service line replacement on a specified schedule (*e.g.*, 10, 15, 25, 35 years from promulgation)?

   c. Allow partial lead service line replacement only for emergency repair or "unwilling or unable customers" when conducting infrastructure (*i.e.*, public water main) replacement?

   d. Require pitcher filters to be distributed and regularly maintained by public water systems for three months immediately following lead service line replacement?

2. **Improved Corrosion Control Treatment:** Corrosion control treatment involves the addition of chemicals or chemical adjustment of drinking water pH to reduce the corrosivity of drinking water and, thus, reduce the leaching of lead and copper from plumbing materials. If the lead or copper action level is exceeded in more than 10% of samples during any monitoring period, a water system must take certain actions. Requirements vary depending on the size of the water system at issue.

   EPA has requested input to the following questions regarding corrosion control treatment – What are the opportunities and challenges to state and local governments if EPA were to modify the LCR to:

   a. Change the current system size threshold for (currently 50,000 people served)?

   b. Require all systems with lead service lines (regardless of size of population served) to install and maintain corrosion control treatment?

   c. Require plumbed in point-of-use treatment devices to be provided (and regularly maintained) for households with lead service lines?

   d. Prescribe default requirements for corrosion control treatment that must be maintained unless a public water system can demonstrate the use of equally effective techniques to the state?

AMERICAN OVERSIGHT

e. Require public water systems to conduct periodic reviews of corrosion control treatment and demonstrate effectiveness to the states?

f. Require public water systems to find and fix problems in corrosion control treatment if a tap sample exceeds an action level?

3. **Transparency and Public Education:** The LCR requires public education within 60 days after discovery of systems that exceed the lead action level. Educational materials currently distributed include information on the sources and health effects of lead, as well as steps consumers can take to reduce exposure to lead in drinking water.

   EPA has requested input to the following questions regarding transparency and public education - What opportunities and challenges would state and local governments face if the LCR were revised to require:

   a. Public water systems to provide ongoing, targeted outreach with special emphasis on all customers with lead service lines?

   b. Public water systems to provide notification to customers within 24 hours of exceeding established action levels (as currently required by the 2016 WIIN Act)?

   c. Public Water Systems to make information available to customers concerning (i) the results of all tap sampling; (ii) results of water quality parameter monitoring, and (iii) the number and locations of lead service lines?

4. **Tap Sampling:** The LCR is the only national primary drinking water regulation that requires sampling in homes, often by the consumers themselves. EPA seeks input regarding tap sampling - what are the opportunities and challenges for states and local governments if sampling protocols under the LCR were revised to:

   a. Change where water systems are required to collect tap samples (*e.g.*, sites based on customer request, schools served by the system)?

   b. Change the way tap samples are collected (*e.g.*, increased number of samples, instruct customers to collect tap samples when drawing water for drinking or cooking)?

   c. Establish a household action level that, if exceeded, would trigger a report to the consumer and to the applicable health agency for follow-up?

5. **Revised Provisions Concerning Copper:** EPA seeks input regarding revisions to the copper provisions of the LCR - what opportunities and challenges would state and local governments face if EPA revised the LCR to:

   a. Establish a screen to determine if water systems have water aggressive to copper?

   b. Modify tap sampling requirements to separate sampling sites for copper from those for lead?

AMERICAN OVERSIGHT

Concerns Expressed by Participants During Jan. 8 Federalism Consultation

Participants in the Jan. 8 federalism consultation raised the following questions/issues relating to any potential updates to the LCR:

1. **Unfunded Mandates Imposed on States, Local Governments, and Water Utilities.** EPA estimates that lead service line replacement would cost an average of $4,700 for each private house/building. Some industry estimates place this number as high as $8,700 per line. Estimates for replacement of the millions of lead service lines currently in use range from $16 to $80 billion. EPA has implied that these costs would be borne by state and local governments and agencies.

2. **Lead Service Line Inventories.** What entities will be responsible for any required inventory of lead service lines that are currently in use? How will such inventories be conducted? What would be the scope of such inventory studies (*i.e.,* entire systems, select sampling, public/private water service lines)? Who would have access to / own the information that is developed as part of a federally-mandated lead service line inventory?

3. **Partial Lead Service Line Replacement.** Consultation participants expressed concern as to the effectiveness of only replacing lead service lines that are part of public water supply systems, rather than an all-inclusive approach to replace the entirety of lead service lines, including those portions located on private property.

4. **New National Standards.** Will and, if so, how new national standards for corrosion control treatment and action levels will be established and imposed. The current target levels for lead in drinking water were developed in the context of feasibility, rather than public health standards.

5. **Sampling at Water Service Lines vs. Taps.** Will EPA be distinguishing sample levels at the connection point from public water supplies from those measured at the tap? Several plumbing fixtures currently in use consist of lead solder and piping which is not factored into measurements from public water lines, but which are a source of lead ingestion.

6. **Public Outreach and Education.** Will utilities, states, and local governments be required to develop and implement public education campaigns? Will EPA establish a clearinghouse of educational materials that can be utilized?

7. **Private Sampling Requirements.** How to implement private tap sampling and confirm that such sampling is being conducted accurately and effectively.

Proposed Areas for Comment

The following issues are expressed in WGA policy and apply to the issues raised, and questions presented, by EPA in its Jan. 8 LCR federalism consultation:

1. Respect state laws and states' role as co-regulators under the SDWA.

2. Accurately assess all costs associated with any revisions to the LCR and clearly communicate what parties must cover such costs.

AMERICAN OVERSIGHT

3. Avoid imposing unfunded mandates on states and local governments.

4. Allow for flexibility to states in receiving and dispersing federal funds and grants.

5. Incorporate state involvement, data, and expertise into decisions surrounding LCR revisions and any standards established thereby.

6. Consult with individual states, through governors' offices, to fully understand the various concerns and potential impacts of any proposed LCR revisions.

Conclusion

EPA has prioritized LCR revisions as part of its larger "war on lead" which was recently announced by Administrator Pruitt. Planned revisions, as presented by EPA in its federalism consultation, could impose substantial financial burdens and regulatory duties on states and local governments. EPA has not presented detailed plans for federal funding beyond the mechanisms currently in place.

EPA has requested comments from WGA and other state and local officials in response to the concepts presented at the Jan. 8 federalism consultation. Several provisions of WGA Policy Resolution 2017-04, *Water Quality in the West* provide the basis for comments that express the views and concerns of Western Governors on this important issue. Comments must be received by Mar. 8, 2018.

WGA Staff: Ward Scott (wscott@westgov.org)

AMERICAN OVERSIGHT

Potential CERCLA Resolution

Action Request: Are the Governors interested in pursuing a new resolution regarding the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund), 42 U.S.C. §9601 et. seq.?

Introduction

The Trump Administration has made the reform of the Superfund program a priority. CERCLA is also an area where there is a unique division of responsibility between the federal government and states, overlap with the principles espoused in WGA Policy Resolution 2017-01, *Building a Stronger State-Federal Relationship*, and a need to improve the program's operation from the perspective of state waste management officials.

This memorandum provides an overview of the Superfund program, describes the Administration's recent actions on CERCLA, and summarizes the recommendations of the Association of State & Territorial Solid Waste Management Officials (ASTSWMO) for improving the program.

Background

CERCLA was enacted to ensure the cleanup of sites that may endanger public health or the environment. It gave the Environmental Protection Agency (EPA) the authority to: (1) respond to actual and threatened releases of hazardous substances and pollutants that may pose an imminent and substantial danger; (2) compel parties responsible for the contamination (Potentially Responsible Parties or PRPs) to clean up the sites; and (3) pay for the cleanups and recover costs from PRPs.[1]

CERCLA also established a Hazardous Substance Superfund, a trust fund, and a process for federal agencies to use funding from federal appropriations. Since the 1995 expiration of taxes that originally funded the trust fund, appropriations have been the largest source of funding for the trust fund, as well as interest, fines and penalties, and recovery from PRPs. EPA may only use trust funds and conduct remedial actions at sites listed on the EPA's National Priority List (NPL).

At the request of a state, EPA may defer oversight of the cleanup of a site eligible for listing on the NPL to state cleanup programs and not list a site on the NPL.[2] States are also involved in the cleanup of sites eligible for the NPL in several ways, including:

- EPA must ensure meaningful and substantial state involvement in CERCLA response actions;[3]
- States may designate a release as its highest priority for listing on the NPL;[4]

[1] EPA's implementing regulations for CERCLA are at 40 CFR Part 300.
[2] 42 U.S.C. §9605(h).
[3] 40 CFR §300.500.
[4] 40 CFR §300.425(c); 40 CFR §300.515(c).

AMERICAN OVERSIGHT

- EPA must consult with states in the listing process and before deleting a site from the NPL prior to developing the notice of intent to delete;[5]

- EPA must communicate with states on Applicable or Relevant and Appropriate Requirements (ARARs) and respond to state comments on waivers from or disagreements about state ARARs;[6]

- EPA must consult with states before determining a remedial action;[7]

- States must agree to pay 10 percent of the cost of remedial actions, as well as all operations and maintenance costs, at non-federal NPL sites before EPA will pay for 90 percent of the remedial action;[8]

- If a state is the support agency, EPA must provide the state agency with an opportunity to review and comment on proposed plans and determinations at various stages of the cleanup;[9] and

- States can assume the lead oversight role at NPL sites under cooperative agreements with EPA.[10]

Federally owned and operated facilities are also subject to CERCLA and state laws concerning removal, remedial action, and enforcement.[11] EPA and the responsible federal agency must afford state and local officials the opportunity to participate in the planning and selection of the remedial action, including but not limited to the review of all applicable data.

Brownfields are sites where the expansion, redevelopment, or reuse is complicated by the actual or potential contamination of the site, which is not listed or proposed for listing on the NPL (and does not meet a few other statutory exclusions).[12] These sites are eligible for grants to state, local, and other government entities for characterization, assessment, and remediation.[13]

Current WGA Policy on CERCLA

Current WGA policy on CERCLA is limited to funding and liability issues with the cleanup of abandoned mines at the end of operations and preventing duplication of state financial assurance programs on the front-end of operations. Western Governors' direction on CERCLA cleanup is limited to the following in WGA Policy Resolution 2016-07, *Cleaning Up Abandoned Mines in the West*. Western Governors do not specify what remedies for CERCLA liabilities Congress and agencies should consider. In addition, the discussion of private-public partnerships is limited to only those partnerships that would facilitate cleanups by Good Samaritans. However, the cleanup of Superfund sites was emphasized by the Governors as a priority at their March 2017 breakfast with Administrator Pruitt.

AMERICAN OVERSIGHT

Opportunities to Improve Superfund in the Trump Administration

EPA Draft 2018-2022 Strategic Plan

According to EPA's Draft 2018-2022 Strategic Plan, EPA plans to:

- Provide technical support to the states through technical support centers for remediating CERCLA designated contaminated sites and returning them to productive use.
- Assist regional, state, and local leaders in reducing costs and setting science-based cleanup levels in areas designated under CERCLA.
- Facilitate prompt site CERCLA cleanup and use an "enforcement first" approach that maximizes the participation of liable and viable parties in performing and paying for cleanups.
- Address liability concerns that can be a barrier to potential reuse of Superfund sites.
- Focus its resources on the highest priority sites, particularly those that may present an immediate risk to human health or the environment, and resolving formal disputes regarding federal facility cleanups under federal facility agreements.

Superfund Task Force

Administrator Pruitt created the Superfund Task Force to determine how EPA could restructure the cleanup process, realign incentives to promote expeditious remediation and revitalization, reduce burdens on cooperating parties, and encourage private investment. The Administrator required the Task Force to consider recommendations for expanding the role and addressing the liability concerns of states, tribes, and local governments. The Task Force Report includes the following recommendations potentially relevant to Western Governors:

- Improve the process for prioritization, review, and approval of sites on the NPL.
- Evaluate EPA retaining engagement and direction of the Feasibility Studies.
- Draft a proposed policy to clarify groundwater requirements for cleanups, which should reflect input from partners to CERCLA cleanups (e.g. federal facilities, state and tribal governments, communities, and environmental organizations).
- Review the use of and funding for third party contractors and potentially modify the protocol for use of outside contractors.
- Use alternative tools to pursue liable parties at NPL sites, including designating states as leads on sites.
- Develop guidance regarding: the use of special use funds as financial incentives for Potentially Responsible Parties (PRPs) and non-liable parties; prioritizing sites with potential for redevelopment to receive special use funds; and using special account funds to preserve scarce EPA and state resources.
- Promote efficiency and consistency in settlements, as well as PRPs' ability to reserve certain rights in settlement agreements.

AMERICAN OVERSIGHT

- Develop a policy for the regions, to be shared with, or ideally co-signed by federal agencies and the states, which reinforces the importance of the timelines in Federal Facility Agreements.

- Use Memorandums of Understanding with federal agencies, states, and tribes to identify lead agencies for each site or certain phases.

- Create a workgroup to research existing state programs and identify opportunities for independent third parties to perform tasks at NPL sites, such as long-term monitoring.

- Conduct stakeholder outreach, including to states, on Environmental Liability Transfer and other risk management approaches and create a national workgroup to identify creative risk management tools.

- Outline a potential new policy for third parties to identify or create opportunities for new investment in cleaning up contaminated sites and identify potential opportunities to expand Good Samaritans or other non-liable party approaches under section 107(d) for addressing liability issues and promoting sustainable redevelopment.

- Propose potential new enforcement guidance to address liability issues acting as a barrier to reuse for local governments, including issues raised by the applicability of the statutory liability protections potentially applicable to local governments.

- Facilitate the involvement of additional funding institutions; explore partnerships that could bring unique financing options to finance revitalization; and facilitate agreements that enable more non-liable parties to fund cleanups as part of site reuse activities.

- Convene regularly scheduled meetings with states, local governments and federally recognized tribes, as well as other groups.

- Establish a federal advisory committee to obtain state and local government concerns and to evaluate the effectiveness of the Task Force Recommendations in accelerating cleanup and reuse of Superfund sites.

EPA Superfund Lists

Superfund Sites for Immediate, Intense Attention List: EPA has released a list of Superfund site targeted for immediate, intense attention, which was one of the recommendations of the Superfund Task Force. The list is comprised of sites that require timely resolution of specific issues to expedite cleanup and that would benefit from the Administrator's direct engagement. There is no commitment of additional funding associated with the inclusion of a site on the list. This list currently includes sites in CA, CO, MT, NV, OK, OR, and WA.

Superfund Redevelopment Focus List: EPA has released a list of Superfund National Priorities List sites with the greatest expected redevelopment and commercial potential based on outside interest, access to transportation corridors, land values, and other factors. This list currently includes sites in CA, CO, ID, MT, OR, UT, and WA.

AMERICAN OVERSIGHT

Leaked Infrastructure Plan

A leaked Executive Branch infrastructure plan proposes "Principles for Infrastructure Improvement" regarding Brownfields and Superfund reform:

- Replicate the Brownfield Grant/Revolving Loan Fund Program for Superfund.
- Clarify EPA's ability to create special accounts for third party funds for CERCLA cleanup response without state assurances.
- Provide liability relief to states and municipalities acquiring contaminated property through actions as sovereign governments.
- Provide EPA express settlement authority to enter into administrative agreements.
- Integrate cleanup, infrastructure, and long-term stewardship needs by creating flexibility in funding and execution requirements.
- Clarify risks to non-liable third parties that perform Superfund cleanup.

ASTSWMO Recommendations for Improving the Superfund Process

The Association of State & Territorial Solid Waste Management Officials (ASTSWMO) has provided many recent recommendations for improving Superfund in testimony and publications. These recommendations are summarized below:

Testimony from August 1, 2017 Senate Environment and Public Works Committee hearing and Testimony from January 18, 2018 House Energy & Commerce Committee hearing

- EPA regional offices need to consistently apply policy and guidance and be held accountable for ensuring consistent implementation.
- EPA should improve the process for identifying states regulations as potential ARARs.
- CERCLA and its implementing regulations should clarify that state environmental covenant and land use control laws and regulations are essential components of many remedial actions, especially those that require longer lasting remediation activities and those which utilize risk management cleanup approaches.
- CERCLA's exemption from permits should be reconsidered, because it leads to inconsistency in the requirements for PRP-led, state-led, and EPA-led cleanups.
- Prior to transferring NPL sites to states, EPA should have the authority to consider whether a state has sufficient funds to pay 100% of the operation and maintenance costs. If a state does not have sufficient funds, CERCLA should provide a process for funding state shortfalls, including greater flexibility and credit for state "in-kind" contributions to cleanups.
- EPA should involve states in identifying sites for third party investment and piloting on how to accelerate remedies at those sites, which is one of the Superfund Task Force recommendations.

AMERICAN OVERSIGHT

- States and EPA should be authorized to enter into Cost Oversight Agreements where PRPs pay state oversight costs directly.

- EPA should include states in any settlements or consent decrees with PRPs.

- The federal facilities compliance provisions of CERCLA should be strengthened and clarified in a manner similar to improvements made to the federal Solid Waste Disposal Act through the Federal Facilities Compliance Act of 1992.

- Superfund should clearly recognize that investigations and cleanups conducted under other cleanup authorities achieve results at least as protective as CERCLA actions and more readily defer action to those programs when appropriate.

- EPA should ensure that needed regulatory cleanup standards for emerging contaminants are developed and updated in an expeditious manner using sound science and the best information available.

- Congress should consider authorizing states to directly implement the Preliminary Assessment/Site Inspection component of the program and the PRP-led and funded removal and remedial program components, while removal and remedial actions conducted by EPA using funding from the Superfund Trust Fund should continue to be implemented by EPA.

- The National Contingency Plan (NCP) should be updated to provide for a more streamlined process for managing and implementing PRP-led cleanups, as compared to cleanups conducted directly by EPA using funds from the Superfund Trust Fund where additional documentation may be required to support future cost-recovery efforts and other litigation needs.

October 31, 2017 Comments of EPA 2018-2022 Draft Strategic Plan

- Although states support moving sites through the cleanup process, any reprioritization of resources to focus on remedial actions, construction completions, ready-for-reuse determinations, and NPL site deletions cannot be at the expense of the pre-remedial program.

- EPA requires funding to provide a centralized and consistent clearinghouse for technical expertise that states cannot and should not maintain individually.

"On Time and Under Budget" Superfund Site Assessment Program Process Analysis: States' Perspectives, August 2017

- Additional Site Assessment Program federal funding is required for states to conduct the evaluation of sites for consideration for additional work and possible listing on the NPL.

- Provide training and possibly policy clarification to ensure that EPA Regions and states are aware of the options and flexibility available to them under the Site Assessment Program.

- Allow states to treat each site differently on a site-specific basis for the Site Assessment Program, not through a "one size fits all" requirement.

AMERICAN OVERSIGHT

Position Paper on 128(a) Brownfields Funding, April 27, 2017

- Increase funding for the Brownfields program to reflect and accommodate the steady increase in applications for grant funding.

Position Paper on Federal Facilities, October 2013

- Involve states in the critical decisions related to the environmental response and close-out actions at federal facilities.
- Federal agencies must provide designated state regulatory personnel with appropriate access to facilities and should meet all federal and state reporting and information requirements.
- Collaborate with states in the development of federal agencies' guidance, contracting practices, policy and regulation related to environmental compliance and remediation at federal facilities.
- Federal and state agencies should continue to adopt and implement the findings of the 1996 Federal Facilities Environmental Restoration Dialogue Final Report in the environmental restoration of all federal facilities.
- Develop federal legislation to clarify that federal facilities are subject to appropriate state regulations and are not unduly shielded by sovereign immunity and lead agency authority. In addition, states continue to oppose all legislative efforts resulting in the exemptions of federal facilities from federal and state environmental statutes.
- Federal, state, and local agencies must work collaboratively in establishing long-term stewardship decisions to ensure that remedies that do not achieve unrestricted use remain protective. State and local authorities regarding institutional controls must be recognized by the federal agencies.
- States and federal agencies should work collaboratively to address emerging contaminants unique to federal facilities.
- The federal government should ensure that federal agencies request and receive adequate funding to carry out both their responsibilities for regulatory compliance with all applicable federal and state regulations, and for remediation and restoration of federal facilities.
- Federal agencies should ensure that state costs for the regulation of federal facilities, including state oversight costs, are fully and timely reimbursed to the same extent and in the same manner as other regulated entities.
- With the increased use of performance-based remediation contracts, federal agencies must ensure that regulators are adequately involved at key stages of the contracting process both pre- and post-award. In addition, federal agency oversight of contractors must be maintained to minimize possible conflicts with state regulators concerning performance standards and completion of performance objectives.
- Community involvement is a requirement of most federal and/or state environmental regulations and should be adhered to by all parties. Approaches should recognize that communities are unique and have specific needs that vary from site to site.

AMERICAN OVERSIGHT

Now that 2018 is firmly underway, it is time to think about how to plan for the upcoming WGA resolution development cycle.

A reminder that, pursuant to the bylaws, WGA must receive all initial draft resolution by April 26. See full calendar for the cycle attached. Also attached is a complete list of all current policy resolutions and their expiration dates.

Based on the expiring resolutions, other resolution arrangements SAC has previously agreed to, new topics floated in recent weeks and the possibility of moving up resolutions to ease the transition after the 2018 elections, this promises to be a particularly substantial cycle. Below see my quick summary. We will plan to discuss this list and begin to get organized during the SAC call scheduled for January 25. I hope you can all plan to join us.

HP

Resolution expiring in June, 2018 (see notes).

#	Title	Date Adopted	Date Expires
2015-05	Transportation Infrastructure in the Western United States	June 2015	June 2018
2015-06	Enhanced Oil Recovery	June 2015	June 2018
2015-08	Water Resource Management in the West	June 2015	June 2018
2015-09	National Minerals Policy	June 2015	June 2018

Other Topics (see notes):

Amend Current Reso	Energy and Transmission – Vision document to pair with resolution passed in Dec. 2017.		

AMERICAN OVERSIGHT

Amend Current Reso.	Workforce Development – Resolution amendments to reflect Chair Initiative.		
Possible New Topic	Trade – Discussion on recent SAC calls indicates interest in a possible trade resolution this cycle.		
Possible New Topic	CERCLA --		
Renewal of Lapsed Resolution	Air Resolution – Per SAC, planned renewal of lapsed air resolution (principles already identified via discussions with WESTAR).		
Current – Move Up	Water Quality – Per SAC, Water Quality renewal will move up to restore pairing with Water Management Resolution.		
Current – Move Up	Foreign Visitor Preclearance (WGA staff suggests moving this up to June 2018 cycle, to help ease 2018-post election transition complexities).		
Current – Move Up	Transportation of Radioactive Waste, Radioactive Materials, and Spent Nuclear Fuel (This is set to expire December 2018. WGA staff suggests moving this up to June 2018 cycle, to help ease 2018-post election transition complexities).		
Current – Move Up	Cleaning Up Abandoned Mines in the West – Per discussion with CO, possible move up of resolution to solidify WGA involvement through transition, etc.		

AMERICAN OVERSIGHT

Air Quality and Methane Emissions Policy Resolution

Action Request: Does SAC support beginning the work group process for a new air resolution with the goals of SAC review at the March 2018 SAC meeting and finalization for the June 2018 WGA Annual Meeting?

Reasons for a New Air Resolution

Air quality and emissions policy involves distinctly western issues and presents opportunities for improving the state-federal relationship. WGA Policy Resolution 2014-13, *State Clean Air Act Authority and Air Quality Regulation*, expired in 2017 and WGA Policy Resolution 2015-02, *Methane Emissions Regulation*, will expire in 2018. During the revision of WGA Policy Resolution 2018-04, *Energy in the West*, SAC members discussed the incorporation of the WGA Policy Resolution 2015-02, *Methane Emissions Regulation*, in an air quality resolution.

Some of the policy objectives in these expired or expiring WGA air resolutions are now encompassed by WGA Policy Resolution 2017-01, *Building a Stronger State-Federal Relationship*. However, there are several important issues for Western Governors that WGA policy will no longer address without a new resolution, such as background ozone, regional haze, exceptional events, and methane emissions regulation.

Recent WGA Actions on Air Policy

In recent years, Western Governors have been most active on air quality and emissions policy through comments and letters on the Exceptional Events Rule (EER), ozone National Ambient Air Quality Standards (NAAQS), and the BLM and EPA methane rules:

- Appropriations Requests Testimony, FY 2017 and 2018
- August 11, 2016 Letter on White House review of final EER
- April 22, 2016 Comments on BLM Proposed Methane Rule
- February 3, 2016 Comments on Proposed EER
- August 27, 2015 Letter on Proposed Revisions to EER
- May 20, 2015 Letter on Plans for BLM Methane Rule
- March 27, 2015 Comments Proposed Ozone NAAQS

The Governors' regulatory reform recommendations, updated July 2017, urges federal agencies to:

- Recognize state authority under the Clean Air Act (CAA).
- Ensure that newly promulgated rules are drafted and issued, where appropriate, in coordination with existing regulations, considering elements and requirements common to both.
- Provide states and local entities with adequate support and technical assistance to help them comply with regulations promulgated under the CAA.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006214

- Collaborate with states to identify priority areas and focus on programs that provide the greatest benefit to air quality.

- Adhere closely to the timelines in the CAA.

- Recognize and account for unique circumstances of individual states. Avoid one-size-fits-all rulemakings (exceptional events and ozone example).

- Complete and publish timely guidance for state use in connection with implementation of the 2015 revised NAAQS for ground-level ozone.

- Avoid duplication of state programs. Permit states to create programs tailored to individual state needs, industries, and economies. Engage states as co-regulators (e.g. with respect to methane emissions).

- Provide those states with delegated authority timely implementation guidance when new and revised regulations are published.

On December 19, 2017, WGA held a webinar as part of the Forest and Rangeland Initiative on "Prescribed Fire: Smoke Management and Regulatory Challenges." The speakers described the air quality impacts from wildfire to public health, safety, and transportation, the benefits of prescribed fire to mitigate these impacts, and the barriers to increasing the use of prescribed fire. They noted the importance of coordination between state air agencies, state health departments, EPA, other federal agencies, and federal land managers for encouraging the use of prescribed fire to address wildfire air quality impacts. Despite changes to the Exceptional Events Rule, air quality impacts and public perception remain barriers to the use of prescribed fire.

Recent Federal Agency Actions on Air Quality and Methane Emissions

Air Quality

- EPA Draft 2018-2022 Strategic Plan states that EPA will: (1) work with states to accurately measure air quality and ensure that more Americans are living and working in areas that meet high air quality standards; (2) reduce non-attainment areas; (3) improve efficiency and effectiveness of State Implementation Plan (SIP) process, including EPA Review process; (4) provide grants and technical assistance to state, local, and tribal air pollution control agencies; and (5) engage in both domestic and international forums to address stratospheric ozone. EPA FY18-22 Transformation Strategy defines the strategic measure of meeting legal deadlines imposed on EPA.

- The Department of Commerce Report on Streamlining Permitting and Reducing Regulatory Burdens recommends that EPA extend NAAQS reviews from five to 10 years and delay the implementation of the 2015 NAAQS. The report notes that "the pace at which the [NAAQS] standard is being tightened is hurried/ implementation is further complicated by measurement and air quality modeling issues, in particular accounting for ozone transported from international sources." It also recommends that EPA "issue guidance on modeling concurrent with promulgation of revised" NAAQS.

AMERICAN OVERSIGHT

- EPA EO 13783 Energy Burdens Report notes that EPA has formed the Ozone Compliance Task Force, which is reviewing administrative options to enable states to enter into cooperative agreements with EPA to provide regulatory relief and meaningfully improve ozone air quality. It also describes plans to streamline SIP approvals through a nationally consistent process.

- In the Fall 2017 Unified Agenda on EPA's Regulatory Entries for Active Actions, EPA states that it is "considering developing implementing regulations that would increase consistency across EPA divisions and offices, increase reliability to affected stakeholders, and increase transparency during the development of regulatory actions." The rulemaking would "provide the public with a better understanding of how EPA is evaluating costs when developing a regulatory action and allow the public to provide better feedback to EPA on potential proposed rules. An Advanced Notice of Proposed Rulemaking is anticipated for February 2018. EPA also notes plans to update exceptional events guidance in its Statement of Regulatory Priorities.

- According to a November 2017 EPA presentation to WESTAR/WRAP, EPA is:

    - Considering whether to revise the 2013 Interim Exceptional Events Guidance Documents, Stratospheric Ozone Intrusions Document, Alternate Paths for Data Exclusion Document, and Prescribed Fire/Ozone Document.

    - Transitioning to a national electronic tracking system for Exceptional Events in 2018.

    - Planning on launching the State Plan Electronic Collection System (SPeCs) to provide an electronic system for the submission of SIPs, EPA review, and a public dashboard.

Methane Emissions

- EPA's Regulatory Entries for Active Actions as part of the Fall 2017 Unified Agenda describe is plans to reconsider its final rules: (1) "Oil and Natural Gas Sector: Emission Standards for New, Reconstructed, and Modified Sources,'' 82 FR 27645, with expectations of a Notice of Proposed Rulemaking in August 2018 and final rule in September 2019; and (2) "Release of Final Control Techniques Guidelines for the Oil and Natural Gas Industry," 81 FR 74798, with expectation of a Notice of Proposed Withdrawal by January 2018.

- BLM has suspended or delayed certain requirements in its final rule, "Waste Prevention, Production Subject to Royalties, and Resource Conservation," 81 FR 83008 (November 18, 2016) until January 17, 2019, while it engages in its regulatory review of the rule. DOI EO 13783 Energy Burdens Report states that BLM is "currently drafting a proposed rule that would eliminate overlap with [EPA's] Clean Air Act authorities while also clarifying regulatory provisions related to the beneficial use of gas on Federal and Indian Lands."

Strawman Resolution

A strawman WGA policy resolution 2018-XX, Air Quality and Emissions Regulation, is attached to this memorandum. This strawman resolution was drafted by looking at past and recent WGA policy work, areas where expanded policy may be beneficial in the new Administration, and in consultation with WESTAR, the Western States Air Resources Council.

WESTAR was involved with the initial drafting of WGA Policy Resolution 2014-13, *State Clean Air Act Authority and Air Quality Regulation*, and is participating in the State-Federal Relationship

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006216

Coalition. WESTAR is comprised of representatives of state air quality agencies in Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming.

Proposed Work Plan

- Jan. 26 – Please notify WGA staff that you would like to be included in the Air Resolution Work Group. A SAC member can join the work group at any point upon notification to WGA staff.
- Six weekly work group calls from the week of Jan. 29 to the week March 5. Suggested times and dates: (1) Wednesdays at 9 am or 1 pm MT; or (2) Fridays at 9 am MT.
- March 9 – Circulation of the work group's draft resolution to SAC.
- March 14 – Discussion of the work group's draft resolution at the SAC meeting.

Western governors demand info on reorganization boundaries

Kellie Lunney, E&E News reporter

Published: Friday, February 2, 2018

The Western Governors' Association says the Interior Department hasn't given the group an opportunity yet to weigh in on proposed changes to bureaus' regional boundaries — a key component of the department's major reorganization effort.

"Western Governors regret that DOI did not seek input from western states on the impact of this proposal and did not seek to engage in meaningful consultation with Western Governors regarding these proposed changes," the group wrote in a letter yesterday to Secretary Ryan Zinke.

The letter says the group of governors "did not have the opportunity to hear in advance the basis for DOI's proposal and consequently were not able to provide comments before the proposal was released to the public on January 10."

Interior mapped out the management restructuring proposal — which includes dividing the department's various bureaus into 13 geographic regions across the country based on watershed and other natural resource lines — during January meetings with 150 senior executives at headquarters (*Greenwire*, Jan. 11).

A spokesman for the Western Governors' Association today said that "WGA was invited to one briefing call with other regional groups after the proposed boundary maps had been released." He was referring to a Jan. 12 phone briefing with Interior Associate Deputy Secretary Jim Cason on the department's draft regional boundaries.

WGA Chairman and South Dakota Gov. Dennis Daugaard (R) and WGA Vice Chairman and Hawaii Gov. David Ige (D) signed the Feb. 1 letter. It included a list of questions on the proposed reorganization as well as April 2017 correspondence to Zinke requesting an opportunity to provide feedback on the historic overhaul.

Interior spokeswoman Heather Swift said the governors "are welcome to share their ideas and opinions with the secretary personally, or their staff are also encouraged to reach out to the secretary's staff" on restructuring plans, adding that Zinke "always appreciates" when "governors reach out to him to weigh in on ideas."

Swift also pointed out that there is no "final proposal for regional boundaries or the reorganization" yet.

A list of 39 "frequently asked questions" sent from Interior to state and local stakeholders Jan. 19 about the proposed department restructuring said the regional boundaries will be in place later this year (*Greenwire*, Feb. 2).

"We urge you to delay implementation of these proposed regional boundary changes and engage with Governors about options that will both meet DOI's objectives and prove to be workable for state and local governments," said the Feb. 1 letter from WGA.

AMERICAN OVERSIGHT

Their questions ranged from how the department is assessing the cost of the overhaul to the impact of the proposal on the ability of Interior bureaus to coordinate with states. They also asked: "Why has DOI deviated from the use of state boundaries in this proposal?"

Interior's proposed boundary change could be particularly significant for the Bureau of Land Management, which currently divides the management of nearly 245 million federal acres in its jurisdiction mostly along state lines — not ecosystems.

Governors in the West have traditionally supported a single BLM state office, with one state director with whom their staff can coordinate on issues or problems. Any BLM move away from state boundaries is likely to encounter stiff resistance from stakeholders in both parties.

Interior deputy pitches agency overhaul to Utah's rural leaders

By Amy Joi O'Donoghue @amyjoi16
Published: February 2, 2018 6:54 pm

SALT LAKE CITY — Daggett County Commissioner Jack Lytle looked at a map of a proposed reorganization of Interior Department agencies by regions and not on state lines and was stricken.

"That was scary," he told the Interior's Associate Deputy Secretary James Cason during a Friday panel discussion in Salt Lake City hosted by Rep. Rob Bishop, R-Utah and his House Committee on Natural Resources.

The meeting at the Governor's Office of Economic Development put multiple rural county commissioners from several Western states in the same room with Cason, as well as Utah's Lt. Gov. Spencer Cox and James Ogsbury, executive director of the Western Governors Association.

In theory, everyone likes the idea of a more locally driven, reorganized Interior Department that eliminates duplication and paperwork, has individual agencies working together — not as silos — and merges broad functions like environmental reviews or compliance.

"When I look at the structure of some of our federal agencies, it really is the best the 1940s can buy. It's time," Cox said, acknowledging the need for an overhaul.

Interior Secretary Ryan Zinke has proposed a massive reorganization of the department — the largest in the agency's history — impacting its 2,400 offices across the nation.

He is particularly set on relocating the headquarters of the Bureau of Land Management, the U.S. Fish & Wildlife Service and the Bureau of Reclamation to the West — something Cason said could happen in fiscal year 2019.

AMERICAN OVERSIGHT

"Our land is out here and we are managing it from 3,000 miles away," Cason said.

During this fiscal year, Zinke has already turned a "fanciful" nod to upending the agency's structure by breaking all its smaller parts into 13 distinct regions delineated by major watersheds with unique flora and fauna.

"We've basically been organized in bureau stovepipes," Cason said, unveiling a map that would section off part of Utah into the Great Basin region and another part in the Colorado River region.

Nevada, noted a Nevada Farm Bureau representative, would be in three regions.

Cason said the idea is to merge the functions of these bureaus into regions and get decision-making closer to the ground where it impacts people and livelihoods.

"What we are trying to do is to create common boundaries that delineate specific geographic areas and get all of our employees to work together," Cason said.

"You can't get timely decisions, so the decisions go all the way up to the secretary level, instead of down at the field (level). People can't play nicely together in the sandbox."

Bishop said he organized the discussion because there has clearly been some consternation over the proposal by state and county leaders — and in D.C. — about the ramifications such a reorganization might bring.

Ogsbury, head of the Western Governors Association, said regional boundaries might create confusion over a state's sovereign role, and no reorganization can constitutionally diminish their role at the planning table.

Cason said the perimeters of the watershed boundaries were actually delineated by county boundaries to remain cognizant of local autonomy.

Local commissioners worried, however, that being swallowed up into a larger region might diminish the significance of their input.

"We already see it on so many levels," Carbon County Commissioner Jae Potter said during a break at the forum.

"We get overlooked."

DRAFT

AMERICAN OVERSIGHT

January XX, 2018
Honorable Wilbur Ross
Secretary
U.S. Department of Commerce
1401 Constitution Avenue, N.W.
Washington, D.C. 20230

Dear Secretary Ross:

Robust international trade is essential to the economies of western states. Federal policies and relationships with international trade partners have created new markets for goods and services that are grown, produced or manufactured in western states and encouraged investments in our communities and businesses. Western Governors encourage federal policies that continue providing the stability and certainty upon which these successful trade relationships depend.

Commented [LD1]: 2/5: WA suggested additions

Canada and Mexico are top trade partners for most western states. Nationwide, agricultural exports to Canada and Mexico totaled $43 billion in 2016. According to the National Association of Manufacturers, Canada and Mexico purchase one-third of all U.S. manufactured goods exports.

Agreements between the United States and its trade partners provide a solid foundation for our citizens to engage in productive international trade activity, enhance our economic competitiveness, and contribute to the functioning of our local governments, states, and the nation. These agreements can and should be modernized to recognize advances in science and technology, resolve outstanding issues, protect U.S. workers and the environment, and ensure that the rules established by these agreements are enforced by all parties. Western Governors urge that any changes be undertaken without negatively affecting our citizens' ability to compete in the international marketplace or harming our overall economic competitiveness.

Commented [LD2]: 2/5: WA suggested addition

Western Governors support the economic opportunities for American goods and businesses facilitated by international trade agreements and encourage you to maintain the stability of the United States' trade policies.

Sincerely,

Dennis Daugaard
Governor of South Dakota
Chair, WGA

David Ige
Governor of Hawaii
Vice Chair, WGA

Honorable Sonny Perdue, Secretary, U.S. Department of Agriculture

DRAFT

AMERICAN OVERSIGHT

February xx, 2018

Honorable Steven Mnuchin
Secretary
U.S. Department of the Treasury
1500 Pennsylvania Avenue, N.W.
Washington, D.C. 20220

Dear Secretary Mnuchin:

On behalf of Western Governors, I am writing to inquire about the Department of the Treasury's plans to issue guidance for the application and/or implementation of "opportunity zones" designations under H.R. 1, the Tax Cuts and Jobs Act (Sec. 13823 of P.L. 115-97).

The Western Governors' Association (WGA) represents the Governors of 19 western states and three U.S. territories in the Pacific. The organization is an instrument of the Governors for bipartisan policy development, information exchange, and collective action on issues of critical importance to the West.

Section 13823 of the recently enacted tax bill contains the Investing in Opportunity Act, a bipartisan initiative of Senators Tim Scott (R-S.C.) and Cory Booker (D-N.J.). The new law is designed to spur investment and create new business opportunities in economically distressed communities. These economic incentives have the potential to be of great value to western states.

Governors are required by the statute to nominate population census tracts for designation as qualified opportunity zones by March 22, 2018. It has been reported that the Department may issue nomination guidance to states at some point. Such guidance could have a significant effect on a Governor's consideration of census tracts for nomination. It would be helpful to know whether, and when, the Department intends to offer nomination guidance.

Thank you for your prompt reply. Western Governors look forward to collaborating with you in genuine partnership as you implement the Investing in Opportunity Act provisions of H.R. 1. With appreciation and best wishes, I am

Respectfully,

James D. Ogsbury
Executive Director

AMERICAN OVERSIGHT

Proposed draft letter to the Senate Environment and Public Works Committee chair from the Western Governors' Association

Western Governors offer these comments to the Chairman of Senate Committee on Environment and Public Works regarding proposed legislation to amend the Endangered Species Act (ESA). The Western Governors' Association (WGA) appreciates the Chairman's willingness to productively engage with Governors, and that the Chairman has approached this polarizing topic in an inclusive, thoughtful manner. The proposed bill reflects this fact and offers meaningful, bipartisan solutions to challenging species conservation issues.

WGA represents the Governors of the 19 western states and 3 U.S. territories in the Pacific. The association is an instrument of the Governors for bipartisan policy development, information-sharing, and collective action on issues of critical importance to the western United States. Issues surrounding the ESA and its implementation are increasingly important to Western Governors.

Congress passed the ESA in 1973, codifying the responsibility to protect imperiled species and the habitats upon which they rely. Since then, the ESA has prevented a number of extinctions and facilitated the recovery of some of our nation's most iconic species. Yet, the ESA is not perfect. We can and should continually strive to make it work better for wildlife and people.

For more than two years, the WGA Species Conservation and Endangered Species Act Initiative has engaged a diverse and bipartisan collection of interested organizations to discuss ways of improving the ESA's effectiveness and efficiency. Using a series of public workshops, facilitated work sessions, substantive webinars, and other tools, WGA gathered valuable insight that enabled Governors to adopt a series of recommendations for improving the ESA in June 2017.

Most of the WGA recommendations seek regulatory improvements because the rulemaking process does not require amending the statute. However, some recommendations can only be implemented through congressional action. The proposed bill is generally consistent with the WGA recommendations, and WGA offers its support for the portions of the bill that are consistent with existing Western Governors' policy. In other instances, the proposed bill addresses issues where WGA has no formal policy and as to those, WGA takes no position. With respect to each section of the bill:

Title I – Enhancing the Federal-State Partnership

Section 101. Definitions

Western Governors support directing the Secretary of the Interior to define the terms "great weight" and "maximum extent possible." Both terms enhance the Secretary's consultation requirements with states when implementing the ESA.

Section 102. Recovery Teams

Governors support establishing recovery teams that are empowered to develop and implement recovery plans, propose modifications to recovery plans when appropriate, and recommend delisting and downlisting listed species that the Secretary must act upon once the established recovery goals are met. Governors also support providing impacted states the opportunity to lead the recovery team, if they so choose.

DRAFT

AMERICAN OVERSIGHT

Too often, species that meet or exceed recovery goals for more than a decade remain listed. This prevents the allocation of resources to species that are truly imperiled, reduces public support for the species on the landscape, erodes support for the ESA with critical landowners, and leads to increased tension between state and federal wildlife management agencies.

Western Governors support the provision of this section that delays judicial review of a determination to delist a species until the conclusion of the statutorily mandated post-delisting monitoring review period as long as there is a federally reviewed and endorsed conservation plan in place. Delaying judicial review will allow state management plans to be implemented and evaluated for success.

Section 103. State-Federal consultation relating to conservation and recovery of wildlife.

Roughly 30 percent of all listed species have no recovery plan: some species languish more than 15 years with no discernable path to recovery. For species without recovery teams, Western Governors support empowering states to lead recovery plan development and implementation, subject to plan approval from the Secretary. This would reduce federal agency workload, allow for more efficient species recovery, and utilize local expertise to ensure local support for recovery efforts.

Section 104. Consultation with States regarding land acquisition.

Western Governors support language requiring the Secretary seek and give great weight to comments provided by states regarding proposed land acquisitions within that state's boundaries. This is consistent with WGA policy that seeks meaningful consultation opportunities for all ESA matters potentially impacting states.

Section 105. Cooperation with States and Indian Tribes.

Western Governors stress that states have primary management authority over all fish and wildlife within their borders and appreciate the language in this section recognizing this fact. Governors also support improving consultation requirements between states and the Secretary when implementing the ESA.

Section 106. State consultation regarding experimental populations.

Western Governors do not take a position regarding the specific language of this section; however, Governors generally support efforts to require increased consultation with states on matters related to ESA implementation.

Section 107. State participation in settlements.

Western Governors do not take a position regarding the specific language of this section; however, Governors generally support efforts to require increased consultation with states on matters related to ESA implementation.

Section 108. Award system for State agencies.

No position.

AMERICAN OVERSIGHT

Section 109. State feedback regarding U.S. Fish and Wildlife Service employees.

No position.

Title II – Encouraging Conservation Activities through Regulatory Certainty

Western Governors generally support efforts to improve regulatory certainty for public and private stakeholders that can encourage conservation. However, the Governors take no position with respect to the specific language in title II.

Title III – Strengthening Conservation Decisionmaking through Increased Transparency

Sec. 301. Policy relating to best scientific and commercial data available.

Western Governors support transparency, but also support protecting sensitive information about species or information that identifies the property of a specific landowner from disclosure under the Freedom of Information Act. Landowners frequently decline to participate in voluntary conservation programs because they fear information about their property will become part of the public record. Since private landowners control nearly 70 percent of all habitat in the United States, protecting privacy and providing certainty are critical for proper ESA implementation.

Sec. 302. Transparency of information.

Western Governors support requiring state approval before a federal agency releases state provided data. In many cases, states possess data that their laws prohibit disclosing to the public. If states provide this data to the federal agencies, and those agencies release that data to the public, states could be liable for violating their sunshine laws. Requiring state consent prior to federal agencies releasing state-provided data will alleviate this concern and result in better data for federal agencies to rely upon when making listing determinations.

Sec. 303. Information provided to States.

Western Governors support providing states with all information used in the federal decision-making process, subject to well-defined exceptions, and receiving comment from affected states prior to making a listing decision. Frequently, states possess valuable species information that federal agencies will find persuasive in listing determinations. This provision allows the federal agencies to make better decisions based on the evaluation of state data.

Sec. 304. Transparency in litigation.

No position.

Title IV—Optimizing Conservation Through Resource Prioritization

Sec. 401. Prioritization of listing petitions, reviews, and determinations.

Western Governors support the creation of a prioritization system for addressing listing petitions, reviews, and determinations. Congress established the current listing deadlines in 1982 to

AMERICAN OVERSIGHT

encourage timely determinations from the federal agencies. However, after more than 35 years, these arbitrary deadlines have outlived their usefulness. They discourage voluntary conservation, limit the development of good science for informed decision-making, and give rise to significant litigation.

Creating a prioritization schedule ensures the immediate protection of species at the greatest risk of extinction. Further, delaying listing determinations for species with active conservation plans provides incentive for states, local government, and private individuals to engage in proactive, voluntary conservation. Incentivizing conservation can eliminate the need to list a species, which is always better than a threatened or endangered finding. Finally, a prioritization schedule gives the federal agencies flexibility to prioritize their workload without the fear of litigation.

Title V—Studies to Improve Conservation

No position.

Title VI—Reauthorization

Sec. 601. Reauthorization.

Western Governors support efforts to reauthorize appropriations for the ESA.

Western Governors acknowledge that any congressional effort to amend the ESA will be complicated and spark diverse opinions. WGA supports your work to modernize the ESA and appreciates your efforts to conduct this process in a thoughtful, bipartisan manner. Each Governor reserves judgment on whether to continue supporting this bill as it moves through the legislative process. Please do not hesitate to contact us if we can be of further assistance.

Sincerely,

Western Governors

WGA Resolutions Development Process Calendar –Spring 2018

Under the revised Western Governors' Association bylaws, initial drafts of resolutions must be circulated no less than 60 days prior to a vote of the Governors. **For the spring 2018 resolution cycle, that deadline will be April 26, 2018**[1]

Here is the calendar plan for the spring 2018 policy development cycle:

- **January 1 –April 26 1–**Staff Council members identify any policy issues their Governor may want to offer a resolution on, to be voted on by ballot in advance of the 2018 Annual Meeting. Interested states are identified to help craft a first draft of the resolution.
- **March 14**) –Spring 2018 SAC Strategic Planning Meeting (Denver, CO).
- **April 5**– Regularly Scheduled Biweekly SAC Call
- **April 19**– Regularly Scheduled Biweekly SAC Call
- **April 26–** Bylaw-driven deadline for all initial draft resolutions to be circulated to SAC.
- **May 3–** SAC call to review and discuss draft resolutions.[2]
- **May 10–** SAC call to review and discuss draft resolutions.
- **May 17–** SAC call to review and discuss draft resolutions.
- **May 21** – Governors-Only Call – to discuss any draft resolutions requiring gubernatorial direction.
- **May 24–** SAC call to review and discuss draft resolutions.
- **May 31–** SAC call to review and discuss draft resolutions.

[1] WGA Bylaws, Article VI(A)(3) : "A resolution may be proposed by a Director at any time. Providing sufficient time for deliberation, discussion and negotiation of its content, the Directors shall vote on the resolution (as revised or not during the review period) not less than sixty (60) days following the circulation of the initial draft to all the Directors."

[2] The resolution development calendar suggests moving to weekly SAC calls in May-mid-June to help facilitate negotiation of resolution language. If all weeks are not necessary, we will release dates accordingly.

DRAFT

AMERICAN OVERSIGHT

- **June 7–** SAC call to review and finalize all draft resolutions meeting bylaw requirements of co-sponsorship. Identify where language differences still exist and summarize the dispute for the Governors' consideration.

- **June 8** (COB)**--** All proposed resolutions with required co-sponsors and memo summarizing which resolutions are still in conflict sent to Vice Chair Ige.

- **June 8-11 —** Vice Chair Ige reviews and gathers Governors' input to any resolutions in conflict.

- **June 12 –** Meeting notice, resolutions and ballots go out to Governors.

- **June 22 –** Governors' completed ballots requested back to WGA staff.

- **June 24-27 –** Governors' 2018 Annual Meeting / announcement of resolution ballot results.

AMERICAN OVERSIGHT

MEMORANDUM

To: WGA Staff Advisory Council
From: Lauren DeNinno, Policy Advisor and WIPP Project Director
Date: 2/7/2018
Re: Funding and Consultation with DOE regarding WIPP Cooperative Agreement

---

Action Requested: Please advise WGA whether this is an area that Governor's wish to: a) assert their policy on Building a Stronger State-Federal Relationship generally; b) send a letter opposing the potential change to how this cooperative agreement is funded; or c) see their WIPP TAG members to directly address.

The Department of Energy (DOE) is considering changes to how cooperative agreements with the states for the safe and uneventful transportation of nuclear waste are funded. Nine western states currently receive funding through a cooperative agreement between WGA and DOE related to shipments of nuclear waste to the Waste Isolation Pilot Plant (WIPP) in New Mexico. Federal funding has been needs-based since the program's inception. Due to budget constraints, DOE is now considering switching to formula funding and has solicited suggestions from its Carlsbad Field Office (CBFO) regarding which factors would need to be weighted. DOE has not provided additional information or consulted with the states at this time.

Background

WIPP, located near Carlsbad, New Mexico, is the United States' (indeed, the world's) only deep geologic repository for the permanent disposal of nuclear waste. It was established by the WIPP Land Withdrawal Act (Public Law 102-579, as amended by P.L. 104-201) for the disposal of defense-generated transuranic (TRU) waste. Several DOE sites in the West generated TRU waste as a result of nuclear weapons production, including Idaho National Laboratory; Los Alamos and Sandia National Laboratories in New Mexico; Rocky Flats Environmental Technology Site in Colorado; the Hanford Site in Washington State; Lawrence Livermore and Lawrence Berkeley National Laboratories and GE Vallecitos Nuclear Center, all in California; and the Nevada Test Site.

The DOE Office of Environmental Management is responsible for cleaning up these legacy sites and transporting the TRU waste generated during cleanup activities to WIPP for permanent disposal. The WIPP Land Withdrawal Act directed DOE to develop transportation safety programs with any states or Indian tribes through whose jurisdiction the waste would be transported as well as to provide technical and financial assistance to the states and tribes to support the programs.

In 1989, the Secretary of Energy entered into a cooperative agreement with WGA to prepare procedures for planning and operating the WIPP transportation program. In turn, WGA established a Technical Advisory Group (TAG), consisting of representatives from western states[1] located along the WIPP transportation corridor, to address issues that would help ensure the "safe and uneventful" movement of the waste.

The cooperative agreement has been renewed several times and the current period of performance is through 6/30/2021. WGA serves as the pass-through entity for funds allocated from the federal

[1] Arizona, California, Colorado, Idaho, Oregon, Nebraska, Nevada, New Mexico, Texas, Utah, Washington and Wyoming

DRAFT

AMERICAN OVERSIGHT

government to be used by the states. These funds can be used by the states for a variety of purposes in support of the transportation safety program, including inspections, emergency response preparedness, program management and public information efforts. The level of funding varies by state and is approved by DOE on a yearly basis.

Funding Changes

The TAG learned in the summer of 2017 that DOE was considering a formula-based funding model for the cooperative agreement. James Mason, Institutional Affairs Manager at CBFO, communicated that reduced budgets have led to increased scrutiny and oversight of the cooperative agreements and that DOE is interested in tying the level of funding to the number of shipments that are expected to be completed each year.

Members of the TAG oppose a change from need-based funding. The funding states receive is used for a number of purposes, including fixed costs that do not vary based on the number of shipments DOE completes, such as program oversight, training, providing equipment to first responders and hospitals along the route, and maintaining qualified commercial vehicle inspectors. For this reason, states that are not currently on an active shipping route continue to receive funding to maintain readiness for resumption of shipments in the future.

Further, each state's needs vary in ways that would be difficult to account for in a formula. CBFO has suggested that factors such as whether the state inspects each shipment crossing its border, the number of miles traveled, and the size and number of populations centers along the route would be factors considered in the formula. However, additional state-by-state variations affect how much funding each state currently requires.

The WIPP Land Withdrawal Act directs DOE to "provide in-kind, financial, technical, and other appropriate assistance to any State or Indian tribe through whose jurisdiction the Secretary plans to transport transuranic waste to or from WIPP, for the purpose of WIPP-specific transportation safety programs".

Consultation with States

Beyond the potentially detrimental funding change, members of the TAG are also concerned by the deterioration of the collaborative relationship between the states and DOE in recent years. Congress recognized the benefits of a cooperative program between the states and DOE in the WIPP Land Withdrawal Act and enshrined that cooperation in statute. Further, in 1995, 2003, and 2009, DOE and WGA signed a Memorandum of Agreement[2] outlining the joint responsibilities of both parties for the safe and uneventful transportation of TRU waste to WIPP and "committing to work cooperatively".

Western Governors note the value of this cooperation in WGA Policy Resolution 2016-03, *Transportation of Radioactive Waste, Radioactive Materials, and Spent Nuclear Fuel,* which notes that "the success of the WIPP TRU waste transportation campaign is directly attributable to a collaborative partnership and planning effort between DOE and the western states to develop and implement the WGA WIPP Transportation Safety Program".

[2] The MOA is "to be reviewed and reaffirmed by the Secretary of Energy and the Western Governors within one year following the election of a new President of the United States". WGA initiated this process in May 2017 and has been told that the MOA is undergoing DOE legal review since that time.

DRAFT

AMERICAN OVERSIGHT

Nonetheless, DOE has not been honest nor forthcoming in its communication with the states regarding this proposed fundamental change to the program. The TAG expects the states, as full and equal partners in transportation safety program, to be consulted and to provide input at the outset of discussions on potential changes, not after DOE has already chosen its preferred path forward. If DOE is considering formula-based funding in particular, the input of the states on what factors need to be considered would be essential to the continued success of the partnership.

WGA Policy Nexus

In Policy Resolution 2016-03, Western Governors state that "DOE must continue to provide sufficient and timely in-kind, financial, technical and other appropriate assistance to any state or Indian tribe through whose jurisdiction TRU waste will be transported for the purpose of planning, developing and implementing the WGA WIPP Transportation Safety Program." Many members of the TAG believe that formula funding will not provide sufficient funding to many states.

More importantly, the TAG, which is composed of representatives designated by the Governors of each state, exists as an apparatus for state-federal consultation. Despite this and the clear intent of Congress in the WIPP Land Withdrawal Act, DOE is not engaging in early, meaningful or substantive consultation with the states as articulated in WGA Policy Resolution 2017-01, *Building a Stronger State-Federal Relationship.*

DRAFT

AMERICAN OVERSIGHT

MEMORANDUM

TO: WGA Staff Council
FROM: WGA Staff: Kevin Moss and Lauren DeNinno
DATE: February 8, 2018
RE: Rural Broadband Access

ACTION REQUESTED:

Western Governors support expanding broadband access to rural Americans in WGA Policy Resolution 2017-09, *Western Agriculture*. Please advise what avenues WGA should advance this policy, as rural broadband is emerging as a priority of the White House with directions for action to multiple agencies.

Introduction

Broadband internet access, defined as 25 Mbps download/3 Mbps upload, has become a modern necessity for individuals, businesses, schools, and government. It has the potential to connect rural communities to their more urban counterparts through telework, telehealth, online education and other tools. However, according to the Federal Communication Commission's (FCC) 2016 Broadband Progress Report, of the 34 million Americans that lack access to broadband coverage, 23.4 million live in rural communities. The disparity between rural and urban broadband access is mainly due to the high cost of building infrastructure and laying miles of fiberoptic cable to rural communities. New technology could potentially serve some rural western communities for a much lower cost than traditional broadband infrastructure.

Executive Branch Overview

Expanding rural broadband access has emerged as a clear priority of the Trump administration. President Trump issued Executive Order 13821 and a memorandum to DOI on January 8, 2018 to expedite and streamline rural broadband projects. The E.O. advocates using "all viable tools to accelerate the deployment and adoption of affordable, reliable, modern high-speed broadband connectivity in rural America," and that agencies "should seek to reduce barriers to capital investment, remove obstacles to broadband services, and more efficiently employ Government resources." The memorandum directs the Secretary of the Interior to develop a plan to increase access to tower facilities and other DOI infrastructure to support rural broadband development.

USDA released a report on January 8, 2018 highlighting the findings of the Interagency Task Force on Rural Prosperity and Agriculture. One of the identified objectives is achieving "e-connectivity" for rural America. Specific recommendations for increasing broadband connection in rural communities include "reducing regulatory barriers to infrastructure deployment" and "incentivizing private capital investment." USDA also emphasized the need to enhance rural high-speed internet access to support rural development in their 2018 Farm Bill & Legislative Priorities.

TV White Spaces Technology

AMERICAN OVERSIGHT

The high cost of laying fiber and building infrastructure combined with few potential customers is the main reason for the lack of broadband access in many rural communities. A potential low-cost solution to this problem is Microsoft's TV white spaces technology, which uses spectrum in the television band to provide wireless services. Microsoft's Ryan Harkins presented on this technology at the final Workforce Development Initiative workshop and the 2017 Winter Meeting.

TV white spaces technology has the potential to bring cost-effective broadband access to areas with a population density of 2-200 people/sq. mile, approximately 80% of rural America[1]. Fixed wireless 4G technology and satellite connections present more cost-effective access for higher and lower population densities, respectively.

Microsoft is partnering with local ISPs to conduct TV white spaces pilot projects in 13 states, including Arizona, Montana, North Dakota, South Dakota, and Washington. Microsoft supplies the hardware and technical expertise to get the projects up and running while the local ISP will run and maintain the network. Microsoft is focusing the pilot projects in areas where broadband access will have significant applications in agriculture, education, and health care. The pilot projects will demonstrate the technology's viability and encourage other companies to offer the service. Most of the pilot projects are still in the planning and development stage.

The FCC is currently considering policy measures that will affect the regulatory environment for the development of TV white spaces technology.

FCC Background

In April 2017, the FCC held their Spectrum Auction, in which licenses to operate at specific bands of electromagnetic spectrum were bought and sold between television stations and wireless providers. This auction, authorized by Congress as part of the 2012 Middle Class Tax Relief and Job Creation Act, incentivized broadcast stations to repurpose spectrum for mobile broadband and other licensed and unlicensed uses. All told, wireless broadband providers spent over $19 billion to purchase 70 MHz of spectrum in the 600 MHz band.

The next step in the FCC process is the "repack," the shuffling of TV stations and other services to new frequencies to most efficiently allocate the remaining spectrum. This complicated process will last until 2020. As part of the repack, channel 37 (608-614 MHz) and the "duplex gap" (652-663 MHz) will be allocated for *unlicensed* use by a variety of wireless services, including TV white spaces technology. The FCC is also considering reserving a third channel in the broadcast TV band (54-608 MHz) for unlicensed use, which would serve as the core broadband access channel for TV white space users. The FCC communicated a tentative decision to reserve this third "vacant" channel in FCC 15-68, a 2015 notice of proposed rulemaking. The FCC is planning to vote on whether to reserve this third unlicensed channel, but has not announced when the vote will be held.

Reserving a third unlicensed channel would help promote the adoption of TV white space technology in rural communities and Microsoft believes it is critical for the technology to be adopted at scale. However, reserving the channel could have potential negative impacts on local television providers and translator stations by reducing the amount of available television spectrum. These stations often provide free, over-the-air broadcasts for news, weather, and emergency messages that many rural Americans rely upon. A bipartisan coalition of 43

[1] *A Rural Broadband Strategy. Connecting Rural America to New Opportunities*. Microsoft (2017).

AMERICAN OVERSIGHT

Congressional representatives sent a letter to the FCC in July 2017 urging them to reserve three 6 MHz channels for unlicensed use to help promote rural broadband internet access.

On February 1st, the FCC finalized bidding procedures for the Connect America Fund Phase II Auction, and confirmed that TV white space bands could be used for "last mile" connection. The Phase II auction, scheduled for July 24th, 2018, will award up to $198 million annually for 10 years to service providers that commit to offer voice and broadband services to fixed locations in unserved high-cost areas.

WGA Policy Nexus

Western Governors support expanding broadband access to rural Americans in WGA Policy Resolution 2017-09 *Western Agriculture*, which states:

> Western Governors support the continued efforts of the Rural Utilities Service to provide financial assistance for drinking water, wastewater facilities and broadband connectivity in rural and remote areas, particularly in communities that have minimal or no such infrastructure. Expanding broadband access to rural America will allow citizens to compete in a global market and have access to IT health care, education and public safety resources.

In 2015, in anticipation of the Spectrum Auction, WGA also sent a letter to the FCC urging the commissioners to consider the needs of rural Americans and to ensure that the "auction process leaves no community without access to free, over-the-air television broadcasts."

WGA Policy Resolution 2017-12 Workforce Development in the West also notes that "workforce development challenges are particularly acute in rural communities." Participants in the Workforce Development Initiative identified the lack of rural broadband internet access as a serious challenge facing rural communities in the west. Broadband is essential for rural students to learn digital skills and take advantage of online resources. It is also critical for small business owners competing in a global marketplace. Many workforce development solutions for rural communities use online resources to deliver training and education opportunities.

Action Items

The following list presents the various ways in which WGA could engage on policy related to rural broadband deployment and access.

1. Engage with USDA about the connection between broadband access and rural development. Support the findings related to broadband deployment by the Interagency Task Force on Rural Prosperity and Agriculture Report and in the 2018 Farm Bill & Legislative Priorities.
2. Encourage DOI to consider rural communities' broadband needs when designating West-wide energy corridors under Section 368 of the Energy Policy Act of 2005. These corridors are intended to streamline permitting for linear infrastructure, which includes broadband infrastructure.
3. Send a letter to the FCC regarding the eventual vote on whether to reserve a third 6 MHz channel in the television band for unlicensed use.

AMERICAN OVERSIGHT

WGA Staff: Kevin Moss (kmoss@westgov.org) and Lauren DeNinno (ldeninno@westgov.org)

AMERICAN OVERSIGHT

WESTERN GOVERNORS' ASSOCIATION

TO: Staff Advisory Council
FROM: Ward Scott, WGA Policy Advisor
SUBJECT: EPA Lead and Copper Rule Revisions – Federalism Consultation
DATE: Feb. 7, 2018

On Jan. 8, WGA staff, as well as representatives from several organizations of state and local officials,[1] participated in a federalism consultation[2] with the EPA Office of Ground Water and Drinking Water to discuss long-term revisions to the Lead and Copper Rule (LCR) under the federal Safe Drinking Water Act (SDWA). EPA is soliciting federalism comments and has posed a series of questions for input from state and local officials. **Comments must be received on or before Mar. 8, 2018**.

The LCR, which applies to 68,000 public water systems nationwide, is a treatment technique rule that requires water systems to conduct tap sampling for lead and copper to determine actions water systems must take to reduce exposure to lead and copper in drinking water. EPA's presentation of potential revisions includes new requirements on states, local governments, and utilities which could impose substantial costs and particularly impact smaller, rural water systems.

Additional information on the LCR can be found at: https://www.epa.gov/dwreginfo/lead-and-copper-rule.

Action Requested: Please review the questions that have been posed by EPA, below, and provide input as to what issues should be addressed in any comments that WGA may submit as part of EPA's LCR federalism consultation.

Nexus to WGA Policy

Policy Resolution 2017-04, *Water Quality in the West*, contains the following applicable provisions:

---

[1] Other organizations participating in the consultation included: National Governors' Assoc., National Conference of State Legislatures, Council of State Governments, National League of Cities, U.S. Conference of Mayors, National Assoc. of Counties, National Assoc. of Towns and Townships, Environmental Council of States, Assoc. of State Drinking Water Administrators, Assoc. of Metropolitan Water Agencies, National Rural Water Assoc., American Water Works Assoc., American Public Works Assoc., National School Board Assoc., and the American Assoc. of School Board Administrators.

[2] As mandated under Executive Order 13132, *Federalism* (64 Fed. Reg. 43255, Aug. 4, 1999). EPA announced that the agency intends to use the meeting to also satisfy consultation requirements mandated by the Unfunded Mandates Reform Act.

AMERICAN OVERSIGHT

- Sec. (b)(8), Federal Assistance in Meeting SDWA Standards: Western Governors believe that the SDWA and its standards for drinking water contaminants have been instrumental in ensuring safe drinking water supplies for the nation. It is essential that the federal government, through EPA, provide adequate support to the states and water systems to meet federal requirements. Assistance is particularly needed for small and rural systems, which often lack the resources needed to comply with federal treatment standards.

- Sec. (b)(9), Drinking Water Standards: In any drinking water standards that the EPA may revise or propose for these and other contaminants, including disinfection byproducts, EPA should consider the disproportionate impact that such standards may have on Western states and give special consideration to feasible technology based on the resources and needs of smaller water systems.

- Sec. (b)(10), Risk Assessments: Analysis of the costs of treatment for drinking water contaminants should carefully determine the total costs of capital improvements, operation and maintenance when determining feasible technology that can be applied by small systems. These costs should be balanced against the anticipated human health benefits before implementing or revising drinking water standards.

- Sec. (b)(11): EPA Support and Technical Assistance: The federal government through EPA should provide states and local entities with adequate support and technical assistance to help them comply with federal water quality and drinking water requirements. EPA should also collaborate with and allow states to identify and establish priority areas, timelines, and focus on programs that provide the largest public health and environmental benefits

Background

In 2017, EPA announced plans to revise and strengthen provisions of the LCR, hastened by the recent drinking water supply crisis in Flint, MI, as well as other well-publicized failures of public water systems. EPA Administrator Scott Pruitt has also announced EPA's new war on lead and recently sent a letter to other Cabinet officials, announcing a Feb. 15 meeting to "consider actions that the federal partners may undertake over the next one to three years to further reduce childhood lead exposures and eliminate associated health impacts."

The LCR, first promulgated in 1991 and revised in 2000 and 2007, requires water systems to conduct tap sampling for lead and copper to determine what actions must be taken to reduce exposure to lead and copper. Under the LCR, water systems must work with their customers to collect samples from locations with lead service lines and/or leaded plumbing materials. When action levels are exceeded in more than ten percent of tap water samples collected during any monitoring period (i.e., if the 90th percentile level is greater than the action level), a water system must take certain actions, depending on the size of the system.

LCR Revisions, Federalism Consultation, and EPA Requests for Input

At the Jan. 8 federalism consultation, EPA presented slides that followed recommendations provided in a 2015 Report from the National Drinking Water Advisory Council (NDWAC), a Federal Advisory Committee established under the SDWA. Key areas of focus identified for LCR revisions include: (i) Lead Service Line Replacement; (ii) Corrosion Control Treatment; (iii) Tap Sampling; (iv) Public Education and Transparency; and (v) Renewed Copper Requirements. Noticeably

AMERICAN OVERSIGHT

absent was a clear and comprehensive discussion of costs to be borne by states or any enhancements to federal funding mechanisms for the extensive revisions presented.

1. **Lead Service Line Replacement:** Although lead plumbing fixtures (pipes, solder, flux) were banned under the SDWA in 1986, EPA estimates that 6.5 to 10 million lead service lines are currently still in use throughout the country. Estimates for replacing all lead service lines nationwide range from $16 to $80 billion. Adding complexity to replacement is the fact that, in most communities, lead service lines are partially or entirely privately-owned. Homeowners and renters may be unwilling or unable to replace the portion of the water lines located on their private property. There is a great deal of legal uncertainty as to the authority of EPA, states, local governments, and water utilities to mandate replacement of privately-owned lines and the payment for such replacement.

   EPA has requested input to the following questions regarding lead service line replacement - What are the opportunities and challenges to state and local governments if EPA were to modify the LCR to:

   a. Require systems to create an inventory of lead service lines currently in use?

   b. Require proactive full lead service line replacement on a specified schedule (*e.g.*, 10, 15, 25, 35 years from promulgation)?

   c. Allow partial lead service line replacement only for emergency repair or "unwilling or unable customers" when conducting infrastructure (*i.e.*, public water main) replacement?

   d. Require pitcher filters to be distributed and regularly maintained by public water systems for three months immediately following lead service line replacement?

2. **Improved Corrosion Control Treatment:** Corrosion control treatment involves the addition of chemicals or chemical adjustment of drinking water pH to reduce the corrosivity of drinking water and, thus, reduce the leaching of lead and copper from plumbing materials. If the lead or copper action level is exceeded in more than 10% of samples during any monitoring period, a water system must take certain actions. Requirements vary depending on the size of the water system at issue.

   EPA has requested input to the following questions regarding corrosion control treatment – What are the opportunities and challenges to state and local governments if EPA were to modify the LCR to:

   a. Change the current system size threshold for (currently 50,000 people served)?

   b. Require all systems with lead service lines (regardless of size of population served) to install and maintain corrosion control treatment?

   c. Require plumbed in point-of-use treatment devices to be provided (and regularly maintained) for households with lead service lines?

   d. Prescribe default requirements for corrosion control treatment that must be maintained unless a public water system can demonstrate the use of equally effective techniques to the state?

AMERICAN OVERSIGHT

e. Require public water systems to conduct periodic reviews of corrosion control treatment and demonstrate effectiveness to the states?

f. Require public water systems to find and fix problems in corrosion control treatment if a tap sample exceeds an action level?

3. **Transparency and Public Education:** The LCR requires public education within 60 days after discovery of systems that exceed the lead action level. Educational materials currently distributed include information on the sources and health effects of lead, as well as steps consumers can take to reduce exposure to lead in drinking water.

   EPA has requested input to the following questions regarding transparency and public education - What opportunities and challenges would state and local governments face if the LCR were revised to require:

   a. Public water systems to provide ongoing, targeted outreach with special emphasis on all customers with lead service lines?

   b. Public water systems to provide notification to customers within 24 hours of exceeding established action levels (as currently required by the 2016 WIIN Act)?

   c. Public Water Systems to make information available to customers concerning (i) the results of all tap sampling; (ii) results of water quality parameter monitoring, and (iii) the number and locations of lead service lines?

4. **Tap Sampling:** The LCR is the only national primary drinking water regulation that requires sampling in homes, often by the consumers themselves. EPA seeks input regarding tap sampling - what are the opportunities and challenges for states and local governments if sampling protocols under the LCR were revised to:

   a. Change where water systems are required to collect tap samples (*e.g.*, sites based on customer request, schools served by the system)?

   b. Change the way tap samples are collected (*e.g.*, increased number of samples, instruct customers to collect tap samples when drawing water for drinking or cooking)?

   c. Establish a household action level that, if exceeded, would trigger a report to the consumer and to the applicable health agency for follow-up?

5. **Revised Provisions Concerning Copper:** EPA seeks input regarding revisions to the copper provisions of the LCR - what opportunities and challenges would state and local governments face if EPA revised the LCR to:

   a. Establish a screen to determine if water systems have water aggressive to copper?

   b. Modify tap sampling requirements to separate sampling sites for copper from those for lead?

AMERICAN OVERSIGHT

Concerns Expressed by Participants During Jan. 8 Federalism Consultation

Participants in the Jan. 8 federalism consultation raised the following questions/issues relating to any potential updates to the LCR:

1. **Unfunded Mandates Imposed on States, Local Governments, and Water Utilities.** EPA estimates that lead service line replacement would cost an average of $4,700 for each private house/building. Some industry estimates place this number as high as $8,700 per line. Estimates for replacement of the millions of lead service lines currently in use range from $16 to $80 billion. EPA has implied that these costs would be borne by state and local governments and agencies.

2. **Lead Service Line Inventories.** What entities will be responsible for any required inventory of lead service lines that are currently in use? How will such inventories be conducted? What would be the scope of such inventory studies (*i.e.,* entire systems, select sampling, public/private water service lines)? Who would have access to / own the information that is developed as part of a federally-mandated lead service line inventory?

3. **Partial Lead Service Line Replacement.** Consultation participants expressed concern as to the effectiveness of only replacing lead service lines that are part of public water supply systems, rather than an all-inclusive approach to replace the entirety of lead service lines, including those portions located on private property.

4. **New National Standards.** Will and, if so, how new national standards for corrosion control treatment and action levels will be established and imposed. The current target levels for lead in drinking water were developed in the context of feasibility, rather than public health standards.

5. **Sampling at Water Service Lines vs. Taps.** Will EPA be distinguishing sample levels at the connection point from public water supplies from those measured at the tap? Several plumbing fixtures currently in use consist of lead solder and piping which is not factored into measurements from public water lines, but which are a source of lead ingestion.

6. **Public Outreach and Education.** Will utilities, states, and local governments be required to develop and implement public education campaigns? Will EPA establish a clearinghouse of educational materials that can be utilized?

7. **Private Sampling Requirements.** How to implement private tap sampling and confirm that such sampling is being conducted accurately and effectively.

Proposed Areas for Comment

The following issues are expressed in WGA policy and apply to the issues raised, and questions presented, by EPA in its Jan. 8 LCR federalism consultation:

1. Respect state laws and states' role as co-regulators under the SDWA.

2. Accurately assess all costs associated with any revisions to the LCR and clearly communicate what parties must cover such costs.

AMERICAN OVERSIGHT

3. Avoid imposing unfunded mandates on states and local governments.

4. Allow for flexibility to states in receiving and dispersing federal funds and grants.

5. Incorporate state involvement, data, and expertise into decisions surrounding LCR revisions and any standards established thereby.

6. Consult with individual states, through governors' offices, to fully understand the various concerns and potential impacts of any proposed LCR revisions.

Conclusion

EPA has prioritized LCR revisions as part of its larger "war on lead" which was recently announced by Administrator Pruitt. Planned revisions, as presented by EPA in its federalism consultation, could impose substantial financial burdens and regulatory duties on states and local governments. EPA has not presented detailed plans for federal funding beyond the mechanisms currently in place.

EPA has requested comments from WGA and other state and local officials in response to the concepts presented at the Jan. 8 federalism consultation. Several provisions of WGA Policy Resolution 2017-04, *Water Quality in the West* provide the basis for comments that express the views and concerns of Western Governors on this important issue. Comments must be received by Mar. 8, 2018.

WGA Staff: Ward Scott (wscott@westgov.org)

AMERICAN OVERSIGHT

Potential CERCLA Resolution

Action Request: Are the Governors interested in pursuing a new resolution regarding the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund), 42 U.S.C. §9601 et. seq.?

Introduction

The Trump Administration has made the reform of the Superfund program a priority. CERCLA is also an area where there is a unique division of responsibility between the federal government and states, overlap with the principles espoused in WGA Policy Resolution 2017-01, *Building a Stronger State-Federal Relationship*, and a need to improve the program's operation from the perspective of state waste management officials.

This memorandum provides an overview of the Superfund program, describes the Administration's recent actions on CERCLA, and summarizes the recommendations of the Association of State & Territorial Solid Waste Management Officials (ASTSWMO) for improving the program.

Background

CERCLA was enacted to ensure the cleanup of sites that may endanger public health or the environment. It gave the Environmental Protection Agency (EPA) the authority to: (1) respond to actual and threatened releases of hazardous substances and pollutants that may pose an imminent and substantial danger; (2) compel parties responsible for the contamination (Potentially Responsible Parties or PRPs) to clean up the sites; and (3) pay for the cleanups and recover costs from PRPs.[1]

CERCLA also established a Hazardous Substance Superfund, a trust fund, and a process for federal agencies to use funding from federal appropriations. Since the 1995 expiration of taxes that originally funded the trust fund, appropriations have been the largest source of funding for the trust fund, as well as interest, fines and penalties, and recovery from PRPs. EPA may only use trust funds and conduct remedial actions at sites listed on the EPA's National Priority List (NPL).

At the request of a state, EPA may defer oversight of the cleanup of a site eligible for listing on the NPL to state cleanup programs and not list a site on the NPL.[2] States are also involved in the cleanup of sites eligible for the NPL in several ways, including:

- EPA must ensure meaningful and substantial state involvement in CERCLA response actions;[3]
- States may designate a release as its highest priority for listing on the NPL;[4]

[1] EPA's implementing regulations for CERCLA are at 40 CFR Part 300.
[2] 42 U.S.C. §9605(h).
[3] 40 CFR §300.500.
[4] 40 CFR §300.425(c); 40 CFR §300.515(c).

AMERICAN OVERSIGHT

- EPA must consult with states in the listing process and before deleting a site from the NPL prior to developing the notice of intent to delete;[5]

- EPA must communicate with states on Applicable or Relevant and Appropriate Requirements (ARARs) and respond to state comments on waivers from or disagreements about state ARARs;[6]

- EPA must consult with states before determining a remedial action;[7]

- States must agree to pay 10 percent of the cost of remedial actions, as well as all operations and maintenance costs, at non-federal NPL sites before EPA will pay for 90 percent of the remedial action;[8]

- If a state is the support agency, EPA must provide the state agency with an opportunity to review and comment on proposed plans and determinations at various stages of the cleanup;[9] and

- States can assume the lead oversight role at NPL sites under cooperative agreements with EPA.[10]

Federally owned and operated facilities are also subject to CERCLA and state laws concerning removal, remedial action, and enforcement.[11] EPA and the responsible federal agency must afford state and local officials the opportunity to participate in the planning and selection of the remedial action, including but not limited to the review of all applicable data.

Brownfields are sites where the expansion, redevelopment, or reuse is complicated by the actual or potential contamination of the site, which is not listed or proposed for listing on the NPL (and does not meet a few other statutory exclusions).[12] These sites are eligible for grants to state, local, and other government entities for characterization, assessment, and remediation.[13]

Current WGA Policy on CERCLA

Current WGA policy on CERCLA is limited to funding and liability issues with the cleanup of abandoned mines at the end of operations and preventing duplication of state financial assurance programs on the front-end of operations. Western Governors' direction on CERCLA cleanup is limited to the following in WGA Policy Resolution 2016-07, *Cleaning Up Abandoned Mines in the West*. Western Governors do not specify what remedies for CERCLA liabilities Congress and agencies should consider. In addition, the discussion of private-public partnerships is limited to only those partnerships that would facilitate cleanups by Good Samaritans. However, the cleanup of Superfund sites was emphasized by the Governors as a priority at their March 2017 breakfast with Administrator Pruitt.

AMERICAN OVERSIGHT

Opportunities to Improve Superfund in the Trump Administration

EPA Draft 2018-2022 Strategic Plan

According to EPA's Draft 2018-2022 Strategic Plan, EPA plans to:

- Provide technical support to the states through technical support centers for remediating CERCLA designated contaminated sites and returning them to productive use.
- Assist regional, state, and local leaders in reducing costs and setting science-based cleanup levels in areas designated under CERCLA.
- Facilitate prompt site CERCLA cleanup and use an "enforcement first" approach that maximizes the participation of liable and viable parties in performing and paying for cleanups.
- Address liability concerns that can be a barrier to potential reuse of Superfund sites.
- Focus its resources on the highest priority sites, particularly those that may present an immediate risk to human health or the environment, and resolving formal disputes regarding federal facility cleanups under federal facility agreements.

Superfund Task Force

Administrator Pruitt created the Superfund Task Force to determine how EPA could restructure the cleanup process, realign incentives to promote expeditious remediation and revitalization, reduce burdens on cooperating parties, and encourage private investment. The Administrator required the Task Force to consider recommendations for expanding the role and addressing the liability concerns of states, tribes, and local governments. The Task Force Report includes the following recommendations potentially relevant to Western Governors:

- Improve the process for prioritization, review, and approval of sites on the NPL.
- Evaluate EPA retaining engagement and direction of the Feasibility Studies.
- Draft a proposed policy to clarify groundwater requirements for cleanups, which should reflect input from partners to CERCLA cleanups (e.g. federal facilities, state and tribal governments, communities, and environmental organizations).
- Review the use of and funding for third party contractors and potentially modify the protocol for use of outside contractors.
- Use alternative tools to pursue liable parties at NPL sites, including designating states as leads on sites.
- Develop guidance regarding: the use of special use funds as financial incentives for Potentially Responsible Parties (PRPs) and non-liable parties; prioritizing sites with potential for redevelopment to receive special use funds; and using special account funds to preserve scarce EPA and state resources.
- Promote efficiency and consistency in settlements, as well as PRPs' ability to reserve certain rights in settlement agreements.

AMERICAN OVERSIGHT

- Develop a policy for the regions, to be shared with, or ideally co-signed by federal agencies and the states, which reinforces the importance of the timelines in Federal Facility Agreements.

- Use Memorandums of Understanding with federal agencies, states, and tribes to identify lead agencies for each site or certain phases.

- Create a workgroup to research existing state programs and identify opportunities for independent third parties to perform tasks at NPL sites, such as long-term monitoring.

- Conduct stakeholder outreach, including to states, on Environmental Liability Transfer and other risk management approaches and create a national workgroup to identify creative risk management tools.

- Outline a potential new policy for third parties to identify or create opportunities for new investment in cleaning up contaminated sites and identify potential opportunities to expand Good Samaritans or other non-liable party approaches under section 107(d) for addressing liability issues and promoting sustainable redevelopment.

- Propose potential new enforcement guidance to address liability issues acting as a barrier to reuse for local governments, including issues raised by the applicability of the statutory liability protections potentially applicable to local governments.

- Facilitate the involvement of additional funding institutions; explore partnerships that could bring unique financing options to finance revitalization; and facilitate agreements that enable more non-liable parties to fund cleanups as part of site reuse activities.

- Convene regularly scheduled meetings with states, local governments and federally recognized tribes, as well as other groups.

- Establish a federal advisory committee to obtain state and local government concerns and to evaluate the effectiveness of the Task Force Recommendations in accelerating cleanup and reuse of Superfund sites.

EPA Superfund Lists

Superfund Sites for Immediate, Intense Attention List: EPA has released a list of Superfund site targeted for immediate, intense attention, which was one of the recommendations of the Superfund Task Force. The list is comprised of sites that require timely resolution of specific issues to expedite cleanup and that would benefit from the Administrator's direct engagement. There is no commitment of additional funding associated with the inclusion of a site on the list. This list currently includes sites in CA, CO, MT, NV, OK, OR, and WA.

Superfund Redevelopment Focus List: EPA has released a list of Superfund National Priorities List sites with the greatest expected redevelopment and commercial potential based on outside interest, access to transportation corridors, land values, and other factors. This list currently includes sites in CA, CO, ID, MT, OR, UT, and WA.

AMERICAN OVERSIGHT

Leaked Infrastructure Plan

A leaked Executive Branch infrastructure plan proposes "Principles for Infrastructure Improvement" regarding Brownfields and Superfund reform:

- Replicate the Brownfield Grant/Revolving Loan Fund Program for Superfund.
- Clarify EPA's ability to create special accounts for third party funds for CERCLA cleanup response without state assurances.
- Provide liability relief to states and municipalities acquiring contaminated property through actions as sovereign governments.
- Provide EPA express settlement authority to enter into administrative agreements.
- Integrate cleanup, infrastructure, and long-term stewardship needs by creating flexibility in funding and execution requirements.
- Clarify risks to non-liable third parties that perform Superfund cleanup.

ASTSWMO Recommendations for Improving the Superfund Process

The Association of State & Territorial Solid Waste Management Officials (ASTSWMO) has provided many recent recommendations for improving Superfund in testimony and publications. These recommendations are summarized below:

Testimony from August 1, 2017 Senate Environment and Public Works Committee hearing and Testimony from January 18, 2018 House Energy & Commerce Committee hearing

- EPA regional offices need to consistently apply policy and guidance and be held accountable for ensuring consistent implementation.
- EPA should improve the process for identifying states regulations as potential ARARs.
- CERCLA and its implementing regulations should clarify that state environmental covenant and land use control laws and regulations are essential components of many remedial actions, especially those that require longer lasting remediation activities and those which utilize risk management cleanup approaches.
- CERCLA's exemption from permits should be reconsidered, because it leads to inconsistency in the requirements for PRP-led, state-led, and EPA-led cleanups.
- Prior to transferring NPL sites to states, EPA should have the authority to consider whether a state has sufficient funds to pay 100% of the operation and maintenance costs. If a state does not have sufficient funds, CERCLA should provide a process for funding state shortfalls, including greater flexibility and credit for state "in-kind" contributions to cleanups.
- EPA should involve states in identifying sites for third party investment and piloting on how to accelerate remedies at those sites, which is one of the Superfund Task Force recommendations.

AMERICAN OVERSIGHT

- States and EPA should be authorized to enter into Cost Oversight Agreements where PRPs pay state oversight costs directly.

- EPA should include states in any settlements or consent decrees with PRPs.

- The federal facilities compliance provisions of CERCLA should be strengthened and clarified in a manner similar to improvements made to the federal Solid Waste Disposal Act through the Federal Facilities Compliance Act of 1992.

- Superfund should clearly recognize that investigations and cleanups conducted under other cleanup authorities achieve results at least as protective as CERCLA actions and more readily defer action to those programs when appropriate.

- EPA should ensure that needed regulatory cleanup standards for emerging contaminants are developed and updated in an expeditious manner using sound science and the best information available.

- Congress should consider authorizing states to directly implement the Preliminary Assessment/Site Inspection component of the program and the PRP-led and funded removal and remedial program components, while removal and remedial actions conducted by EPA using funding from the Superfund Trust Fund should continue to be implemented by EPA.

- The National Contingency Plan (NCP) should be updated to provide for a more streamlined process for managing and implementing PRP-led cleanups, as compared to cleanups conducted directly by EPA using funds from the Superfund Trust Fund where additional documentation may be required to support future cost-recovery efforts and other litigation needs.

October 31, 2017 Comments of EPA 2018-2022 Draft Strategic Plan

- Although states support moving sites through the cleanup process, any reprioritization of resources to focus on remedial actions, construction completions, ready-for-reuse determinations, and NPL site deletions cannot be at the expense of the pre-remedial program.

- EPA requires funding to provide a centralized and consistent clearinghouse for technical expertise that states cannot and should not maintain individually.

"On Time and Under Budget" Superfund Site Assessment Program Process Analysis: States' Perspectives, August 2017

- Additional Site Assessment Program federal funding is required for states to conduct the evaluation of sites for consideration for additional work and possible listing on the NPL.

- Provide training and possibly policy clarification to ensure that EPA Regions and states are aware of the options and flexibility available to them under the Site Assessment Program.

- Allow states to treat each site differently on a site-specific basis for the Site Assessment Program, not through a "one size fits all" requirement.

AMERICAN OVERSIGHT

Position Paper on 128(a) Brownfields Funding, April 27, 2017

- Increase funding for the Brownfields program to reflect and accommodate the steady increase in applications for grant funding.

Position Paper on Federal Facilities, October 2013

- Involve states in the critical decisions related to the environmental response and close-out actions at federal facilities.
- Federal agencies must provide designated state regulatory personnel with appropriate access to facilities and should meet all federal and state reporting and information requirements.
- Collaborate with states in the development of federal agencies' guidance, contracting practices, policy and regulation related to environmental compliance and remediation at federal facilities.
- Federal and state agencies should continue to adopt and implement the findings of the 1996 Federal Facilities Environmental Restoration Dialogue Final Report in the environmental restoration of all federal facilities.
- Develop federal legislation to clarify that federal facilities are subject to appropriate state regulations and are not unduly shielded by sovereign immunity and lead agency authority. In addition, states continue to oppose all legislative efforts resulting in the exemptions of federal facilities from federal and state environmental statutes.
- Federal, state, and local agencies must work collaboratively in establishing long-term stewardship decisions to ensure that remedies that do not achieve unrestricted use remain protective. State and local authorities regarding institutional controls must be recognized by the federal agencies.
- States and federal agencies should work collaboratively to address emerging contaminants unique to federal facilities.
- The federal government should ensure that federal agencies request and receive adequate funding to carry out both their responsibilities for regulatory compliance with all applicable federal and state regulations, and for remediation and restoration of federal facilities.
- Federal agencies should ensure that state costs for the regulation of federal facilities, including state oversight costs, are fully and timely reimbursed to the same extent and in the same manner as other regulated entities.
- With the increased use of performance-based remediation contracts, federal agencies must ensure that regulators are adequately involved at key stages of the contracting process both pre- and post-award. In addition, federal agency oversight of contractors must be maintained to minimize possible conflicts with state regulators concerning performance standards and completion of performance objectives.
- Community involvement is a requirement of most federal and/or state environmental regulations and should be adhered to by all parties. Approaches should recognize that communities are unique and have specific needs that vary from site to site.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006255

Now that 2018 is firmly underway, it is time to think about how to plan for the upcoming WGA resolution development cycle.

A reminder that, pursuant to the bylaws, WGA must receive all initial draft resolution by April 26. See full calendar for the cycle attached. Also attached is a complete list of all current policy resolutions and their expiration dates.

Based on the expiring resolutions, other resolution arrangements SAC has previously agreed to, new topics floated in recent weeks and the possibility of moving up resolutions to ease the transition after the 2018 elections, this promises to be a particularly substantial cycle. Below see my quick summary. We will plan to discuss this list and begin to get organized during the SAC call scheduled for January 25. I hope you can all plan to join us.

HP

Resolution expiring in June, 2018 (see notes).

#	Title	Date Adopted	Date Expires
2015-05	Transportation Infrastructure in the Western United States	June 2015	June 2018
2015-06	Enhanced Oil Recovery	June 2015	June 2018
2015-08	Water Resource Management in the West	June 2015	June 2018
2015-09	National Minerals Policy	June 2015	June 2018

Other Topics (see notes):

Amend Current Reso	Energy and Transmission – Vision document to pair with resolution passed in Dec. 2017.		

AMERICAN OVERSIGHT

Amend Current Reso.	Workforce Development – Resolution amendments to reflect Chair Initiative.		
Possible New Topic	Trade – Discussion on recent SAC calls indicates interest in a possible trade resolution this cycle.		
Possible New Topic	CERCLA --		
Renewal of Lapsed Resolution	Air Resolution – Per SAC, planned renewal of lapsed air resolution (principles already identified via discussions with WESTAR).		
Current – Move Up	Water Quality – Per SAC, Water Quality renewal will move up to restore pairing with Water Management Resolution.		
Current – Move Up	Foreign Visitor Preclearance (WGA staff suggests moving this up to June 2018 cycle, to help ease 2018-post election transition complexities).		
Current – Move Up	Transportation of Radioactive Waste, Radioactive Materials, and Spent Nuclear Fuel (This is set to expire December 2018. WGA staff suggests moving this up to June 2018 cycle, to help ease 2018-post election transition complexities).		
Current – Move Up	Cleaning Up Abandoned Mines in the West – Per discussion with CO, possible move up of resolution to solidify WGA involvement through transition, etc.		

AMERICAN OVERSIGHT

Air Quality and Methane Emissions Policy Resolution

Action Request: Does SAC support beginning the work group process for a new air resolution with the goals of SAC review at the March 2018 SAC meeting and finalization for the June 2018 WGA Annual Meeting?

Reasons for a New Air Resolution

Air quality and emissions policy involves distinctly western issues and presents opportunities for improving the state-federal relationship. WGA Policy Resolution 2014-13, *State Clean Air Act Authority and Air Quality Regulation*, expired in 2017 and WGA Policy Resolution 2015-02, *Methane Emissions Regulation*, will expire in 2018. During the revision of WGA Policy Resolution 2018-04, *Energy in the West*, SAC members discussed the incorporation of the WGA Policy Resolution 2015-02, *Methane Emissions Regulation*, in an air quality resolution.

Some of the policy objectives in these expired or expiring WGA air resolutions are now encompassed by WGA Policy Resolution 2017-01, *Building a Stronger State-Federal Relationship*. However, there are several important issues for Western Governors that WGA policy will no longer address without a new resolution, such as background ozone, regional haze, exceptional events, and methane emissions regulation.

Recent WGA Actions on Air Policy

In recent years, Western Governors have been most active on air quality and emissions policy through comments and letters on the Exceptional Events Rule (EER), ozone National Ambient Air Quality Standards (NAAQS), and the BLM and EPA methane rules:

- Appropriations Requests Testimony, FY 2017 and 2018
- August 11, 2016 Letter on White House review of final EER
- April 22, 2016 Comments on BLM Proposed Methane Rule
- February 3, 2016 Comments on Proposed EER
- August 27, 2015 Letter on Proposed Revisions to EER
- May 20, 2015 Letter on Plans for BLM Methane Rule
- March 27, 2015 Comments Proposed Ozone NAAQS

The Governors' regulatory reform recommendations, updated July 2017, urges federal agencies to:

- Recognize state authority under the Clean Air Act (CAA).
- Ensure that newly promulgated rules are drafted and issued, where appropriate, in coordination with existing regulations, considering elements and requirements common to both.
- Provide states and local entities with adequate support and technical assistance to help them comply with regulations promulgated under the CAA.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006258

- Collaborate with states to identify priority areas and focus on programs that provide the greatest benefit to air quality.

- Adhere closely to the timelines in the CAA.

- Recognize and account for unique circumstances of individual states. Avoid one-size-fits-all rulemakings (exceptional events and ozone example).

- Complete and publish timely guidance for state use in connection with implementation of the 2015 revised NAAQS for ground-level ozone.

- Avoid duplication of state programs. Permit states to create programs tailored to individual state needs, industries, and economies. Engage states as co-regulators (e.g. with respect to methane emissions).

- Provide those states with delegated authority timely implementation guidance when new and revised regulations are published.

On December 19, 2017, WGA held a webinar as part of the Forest and Rangeland Initiative on "Prescribed Fire: Smoke Management and Regulatory Challenges." The speakers described the air quality impacts from wildfire to public health, safety, and transportation, the benefits of prescribed fire to mitigate these impacts, and the barriers to increasing the use of prescribed fire. They noted the importance of coordination between state air agencies, state health departments, EPA, other federal agencies, and federal land managers for encouraging the use of prescribed fire to address wildfire air quality impacts. Despite changes to the Exceptional Events Rule, air quality impacts and public perception remain barriers to the use of prescribed fire.

Recent Federal Agency Actions on Air Quality and Methane Emissions

Air Quality

- EPA Draft 2018-2022 Strategic Plan states that EPA will: (1) work with states to accurately measure air quality and ensure that more Americans are living and working in areas that meet high air quality standards; (2) reduce non-attainment areas; (3) improve efficiency and effectiveness of State Implementation Plan (SIP) process, including EPA Review process; (4) provide grants and technical assistance to state, local, and tribal air pollution control agencies; and (5) engage in both domestic and international forums to address stratospheric ozone. EPA FY18-22 Transformation Strategy defines the strategic measure of meeting legal deadlines imposed on EPA.

- The Department of Commerce Report on Streamlining Permitting and Reducing Regulatory Burdens recommends that EPA extend NAAQS reviews from five to 10 years and delay the implementation of the 2015 NAAQS. The report notes that "the pace at which the [NAAQS] standard is being tightened is hurried/ implementation is further complicated by measurement and air quality modeling issues, in particular accounting for ozone transported from international sources." It also recommends that EPA "issue guidance on modeling concurrent with promulgation of revised" NAAQS.

AMERICAN OVERSIGHT

- EPA EO 13783 Energy Burdens Report notes that EPA has formed the Ozone Compliance Task Force, which is reviewing administrative options to enable states to enter into cooperative agreements with EPA to provide regulatory relief and meaningfully improve ozone air quality. It also describes plans to streamline SIP approvals through a nationally consistent process.

- In the Fall 2017 Unified Agenda on EPA's Regulatory Entries for Active Actions, EPA states that it is "considering developing implementing regulations that would increase consistency across EPA divisions and offices, increase reliability to affected stakeholders, and increase transparency during the development of regulatory actions." The rulemaking would "provide the public with a better understanding of how EPA is evaluating costs when developing a regulatory action and allow the public to provide better feedback to EPA on potential proposed rules. An Advanced Notice of Proposed Rulemaking is anticipated for February 2018. EPA also notes plans to update exceptional events guidance in its Statement of Regulatory Priorities.

- According to a November 2017 EPA presentation to WESTAR/WRAP, EPA is:

    - Considering whether to revise the 2013 Interim Exceptional Events Guidance Documents, Stratospheric Ozone Intrusions Document, Alternate Paths for Data Exclusion Document, and Prescribed Fire/Ozone Document.

    - Transitioning to a national electronic tracking system for Exceptional Events in 2018.

    - Planning on launching the State Plan Electronic Collection System (SPeCs) to provide an electronic system for the submission of SIPs, EPA review, and a public dashboard.

Methane Emissions

- EPA's Regulatory Entries for Active Actions as part of the Fall 2017 Unified Agenda describe is plans to reconsider its final rules: (1) "Oil and Natural Gas Sector: Emission Standards for New, Reconstructed, and Modified Sources,'' 82 FR 27645, with expectations of a Notice of Proposed Rulemaking in August 2018 and final rule in September 2019; and (2) "Release of Final Control Techniques Guidelines for the Oil and Natural Gas Industry," 81 FR 74798, with expectation of a Notice of Proposed Withdrawal by January 2018.

- BLM has suspended or delayed certain requirements in its final rule, "Waste Prevention, Production Subject to Royalties, and Resource Conservation," 81 FR 83008 (November 18, 2016) until January 17, 2019, while it engages in its regulatory review of the rule. DOI EO 13783 Energy Burdens Report states that BLM is "currently drafting a proposed rule that would eliminate overlap with [EPA's] Clean Air Act authorities while also clarifying regulatory provisions related to the beneficial use of gas on Federal and Indian Lands."

Strawman Resolution

A strawman WGA policy resolution 2018-XX, Air Quality and Emissions Regulation, is attached to this memorandum. This strawman resolution was drafted by looking at past and recent WGA policy work, areas where expanded policy may be beneficial in the new Administration, and in consultation with WESTAR, the Western States Air Resources Council.

WESTAR was involved with the initial drafting of WGA Policy Resolution 2014-13, *State Clean Air Act Authority and Air Quality Regulation*, and is participating in the State-Federal Relationship

AMERICAN OVERSIGHT

Coalition. WESTAR is comprised of representatives of state air quality agencies in Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming.

Proposed Work Plan

- Jan. 26 – Please notify WGA staff that you would like to be included in the Air Resolution Work Group. A SAC member can join the work group at any point upon notification to WGA staff.
- Six weekly work group calls from the week of Jan. 29 to the week March 5. Suggested times and dates: (1) Wednesdays at 9 am or 1 pm MT; or (2) Fridays at 9 am MT.
- March 9 – Circulation of the work group's draft resolution to SAC.
- March 14 – Discussion of the work group's draft resolution at the SAC meeting.

Western governors demand info on reorganization boundaries

Kellie Lunney, E&E News reporter

Published: Friday, February 2, 2018

The Western Governors' Association says the Interior Department hasn't given the group an opportunity yet to weigh in on proposed changes to bureaus' regional boundaries — a key component of the department's major reorganization effort.

"Western Governors regret that DOI did not seek input from western states on the impact of this proposal and did not seek to engage in meaningful consultation with Western Governors regarding these proposed changes," the group wrote in a letter yesterday to Secretary Ryan Zinke.

The letter says the group of governors "did not have the opportunity to hear in advance the basis for DOI's proposal and consequently were not able to provide comments before the proposal was released to the public on January 10."

Interior mapped out the management restructuring proposal — which includes dividing the department's various bureaus into 13 geographic regions across the country based on watershed and other natural resource lines — during January meetings with 150 senior executives at headquarters (*Greenwire*, Jan. 11).

A spokesman for the Western Governors' Association today said that "WGA was invited to one briefing call with other regional groups after the proposed boundary maps had been released." He was referring to a Jan. 12 phone briefing with Interior Associate Deputy Secretary Jim Cason on the department's draft regional boundaries.

WGA Chairman and South Dakota Gov. Dennis Daugaard (R) and WGA Vice Chairman and Hawaii Gov. David Ige (D) signed the Feb. 1 letter. It included a list of questions on the proposed reorganization as well as April 2017 correspondence to Zinke requesting an opportunity to provide feedback on the historic overhaul.

Interior spokeswoman Heather Swift said the governors "are welcome to share their ideas and opinions with the secretary personally, or their staff are also encouraged to reach out to the secretary's staff" on restructuring plans, adding that Zinke "always appreciates" when "governors reach out to him to weigh in on ideas."

Swift also pointed out that there is no "final proposal for regional boundaries or the reorganization" yet.

A list of 39 "frequently asked questions" sent from Interior to state and local stakeholders Jan. 19 about the proposed department restructuring said the regional boundaries will be in place later this year (*Greenwire*, Feb. 2).

"We urge you to delay implementation of these proposed regional boundary changes and engage with Governors about options that will both meet DOI's objectives and prove to be workable for state and local governments," said the Feb. 1 letter from WGA.

AMERICAN OVERSIGHT

Their questions ranged from how the department is assessing the cost of the overhaul to the impact of the proposal on the ability of Interior bureaus to coordinate with states. They also asked: "Why has DOI deviated from the use of state boundaries in this proposal?"

Interior's proposed boundary change could be particularly significant for the Bureau of Land Management, which currently divides the management of nearly 245 million federal acres in its jurisdiction mostly along state lines — not ecosystems.

Governors in the West have traditionally supported a single BLM state office, with one state director with whom their staff can coordinate on issues or problems. Any BLM move away from state boundaries is likely to encounter stiff resistance from stakeholders in both parties.

Interior deputy pitches agency overhaul to Utah's rural leaders

By Amy Joi O'Donoghue @amyjoi16
Published: February 2, 2018 6:54 pm

SALT LAKE CITY — Daggett County Commissioner Jack Lytle looked at a map of a proposed reorganization of Interior Department agencies by regions and not on state lines and was stricken.

"That was scary," he told the Interior's Associate Deputy Secretary James Cason during a Friday panel discussion in Salt Lake City hosted by Rep. Rob Bishop, R-Utah and his House Committee on Natural Resources.

The meeting at the Governor's Office of Economic Development put multiple rural county commissioners from several Western states in the same room with Cason, as well as Utah's Lt. Gov. Spencer Cox and James Ogsbury, executive director of the Western Governors Association.

In theory, everyone likes the idea of a more locally driven, reorganized Interior Department that eliminates duplication and paperwork, has individual agencies working together — not as silos — and merges broad functions like environmental reviews or compliance.

"When I look at the structure of some of our federal agencies, it really is the best the 1940s can buy. It's time," Cox said, acknowledging the need for an overhaul.

Interior Secretary Ryan Zinke has proposed a massive reorganization of the department — the largest in the agency's history — impacting its 2,400 offices across the nation.

He is particularly set on relocating the headquarters of the Bureau of Land Management, the U.S. Fish & Wildlife Service and the Bureau of Reclamation to the West — something Cason said could happen in fiscal year 2019.

AMERICAN OVERSIGHT

"Our land is out here and we are managing it from 3,000 miles away," Cason said.

During this fiscal year, Zinke has already turned a "fanciful" nod to upending the agency's structure by breaking all its smaller parts into 13 distinct regions delineated by major watersheds with unique flora and fauna.

"We've basically been organized in bureau stovepipes," Cason said, unveiling a map that would section off part of Utah into the Great Basin region and another part in the Colorado River region.

Nevada, noted a Nevada Farm Bureau representative, would be in three regions.

Cason said the idea is to merge the functions of these bureaus into regions and get decision-making closer to the ground where it impacts people and livelihoods.

"What we are trying to do is to create common boundaries that delineate specific geographic areas and get all of our employees to work together," Cason said.

"You can't get timely decisions, so the decisions go all the way up to the secretary level, instead of down at the field (level). People can't play nicely together in the sandbox."

Bishop said he organized the discussion because there has clearly been some consternation over the proposal by state and county leaders — and in D.C. — about the ramifications such a reorganization might bring.

Ogsbury, head of the Western Governors Association, said regional boundaries might create confusion over a state's sovereign role, and no reorganization can constitutionally diminish their role at the planning table.

Cason said the perimeters of the watershed boundaries were actually delineated by county boundaries to remain cognizant of local autonomy.

Local commissioners worried, however, that being swallowed up into a larger region might diminish the significance of their input.

"We already see it on so many levels," Carbon County Commissioner Jae Potter said during a break at the forum.

"We get overlooked."

1:30 – 2:15p.m.	**DOI / FWS / BLM** A conversation with representatives of the agencies.
2:15 – 3 p.m.	**EPA** A discussion on cooperative federalism in delegated authority context.
3 – 3:30 p.m.	**Department of Homeland Security / Federal Emergency Management Agency**
3:30 – 4 p.m.	**Department of Education**
4 p.m.	**Meeting Adjourns**
5:30 – 7 p.m.	**WGA-Hosted Reception** (*101 Constitution Ave NW #900, WDC)*

DRAFT

AMERICAN OVERSIGHT

January XX, 2018
Honorable Wilbur Ross
Secretary
U.S. Department of Commerce
1401 Constitution Avenue, N.W.
Washington, D.C. 20230

Dear Secretary Ross:

Robust international trade is essential to the economies of western states. Federal policies and relationships with international trade partners have created new markets for goods and[LD1] services that are grown, produced or manufactured in western states and encouraged investments in our communities and businesses. Western Governors encourage federal policies that continue providing the stability and certainty upon which these successful trade relationships depend.

Canada and Mexico are top trade partners for most western states. Nationwide, agricultural exports to Canada and Mexico totaled $43 billion in 2016. According to the National Association of Manufacturers, Canada and Mexico purchase one-third of all U.S. manufactured goods exports.

Agreements between the United States and its trade partners provide a solid foundation for our citizens to engage in productive international trade activity, enhance our economic competitiveness, and contribute to the functioning of our local governments, states, and the nation. These agreements can and should be modernized to recognize advances in science and technology, resolve outstanding issues, protect[LD2] U.S. workers and the environment, and ensure that the rules established by these agreements are enforced by all parties. Western Governors urge that any changes be undertaken without negatively affecting our citizens' ability to compete in the international marketplace or harming our overall economic competitiveness.

Western Governors support the economic opportunities for American goods and businesses facilitated by international trade agreements and encourage you to maintain the stability of the United States' trade policies.

Sincerely,

Dennis Daugaard
Governor of South Dakota
Chair, WGA

David Ige
Governor of Hawaii
Vice Chair, WGA

cc: Honorable Robert Lighthizer, United States Trade Representative
Honorable Sonny Perdue, Secretary, U.S. Department of Agriculture

DRAFT

AMERICAN OVERSIGHT

February xx, 2018

Honorable Steven Mnuchin
Secretary
U.S. Department of the Treasury
1500 Pennsylvania Avenue, N.W.
Washington, D.C. 20220

Dear Secretary Mnuchin:

On behalf of Western Governors, I am writing to inquire about the Department of the Treasury's plans to issue guidance for the application and/or implementation of "opportunity zones" designations under H.R. 1, the Tax Cuts and Jobs Act (Sec. 13823 of P.L. 115-97).

The Western Governors' Association (WGA) represents the Governors of 19 western states and three U.S. territories in the Pacific. The organization is an instrument of the Governors for bipartisan policy development, information exchange, and collective action on issues of critical importance to the West.

Section 13823 of the recently enacted tax bill contains the Investing in Opportunity Act, a bipartisan initiative of Senators Tim Scott (R-S.C.) and Cory Booker (D-N.J.). The new law is designed to spur investment and create new business opportunities in economically distressed communities. These economic incentives have the potential to be of great value to western states.

Governors are required by the statute to nominate population census tracts for designation as qualified opportunity zones by March 22, 2018. It has been reported that the Department may issue nomination guidance to states at some point. Such guidance could have a significant effect on a Governor's consideration of census tracts for nomination. It would be helpful to know whether, and when, the Department intends to offer nomination guidance.

Thank you for your prompt reply. Western Governors look forward to collaborating with you in genuine partnership as you implement the Investing in Opportunity Act provisions of H.R. 1. With appreciation and best wishes, I am

Respectfully,

James D. Ogsbury
Executive Director

WGA CONGRESSIONAL ACTION REPORT

House 2018 Calendar here / Senate 2018 Calendar here

February 2-9, 2018

Reporting of action posted through 8 a.m. ET, February 9, 2018

This weekly report tracks the work of the U.S. House of Representatives and U.S. Senate, with particular emphasis on Committees covering issues of significance to the Western Governors' Association. It is published on weeks when one or both Congressional chambers are in session.

U.S. HOUSE OF REPRESENTATIVES

Actions taken on the floor this week:

- H.R. 4547 - Strengthening Protections for Social Security Beneficiaries Act of 2018
- H.R. 2371 - Western Area Power Administration Transparency Act
- H.R. 2888 - Ste. Genevieve National Historical Park Establishment Act
- S. 1438 - Gateway Arch National Park Designation
- H.R. 2504 - Treatment in Licensing Requirements for Export of Certain Echinoderms
- H.R. 219 - Swan Lake Hydroelectric Project Boundary Correction Act
- H.R. 2646 - United States-Jordan Defense Cooperation Extension Act
- H.R. 1997 - Ukraine Cybersecurity Cooperation Act of 2017
- H.R. 3851 - War Crimes Rewards Expansion Act
- H.R. 772 - Common Sense Nutrition Disclosure Act of 2017
- H.R. 1153 - Mortgage Choice Act of 2017
- H.R. 4924 – Amending the Congressional Accountability Act of 1995 to Reform the Procedures Provided for the Initiation, Investigation, and Resolution of Sexual Harassment Claims

AMERICAN OVERSIGHT

- H.Res. 724 - Requiring Each Employing office of the House of Representatives to Adopt an Anti-harassment and Anti-Discrimination Policy for the Office's Workplace, Establishing the Office of Employee Advocacy to Provide Legal Assistance and Consultation to Employees of the House Regarding Procedures and Proceedings under the Congressional Accountability Act of 1995
- H.R. 1892 - Further Extension of Continuing Appropriations Act, 2018

House Agriculture Committee

Western Governors' Association
Breakfast Meeting

D R A F T

Sunday, February 25, 2018

7:00 a.m. – Breakfast available
7:20 a.m. – Meeting

Hosted by Administrator Scott Pruitt
Chaired by Governor Dennis Daugaard, South Dakota
U.S. Environmental Protection Agency
Green Room, 3rd Floor
1200 Pennsylvania Avenue N.W.
Washington, D.C. 20004

Please arrive via the North Courtyard

Agenda

7:00 a.m.	**Breakfast Available**
7:20 a.m.	**Welcome** *Scott Pruitt, Administrator, EPA*
7:30 a.m.	**Opening Remarks** *Dennis Daugaard, Governor of South Dakota and WGA Chairman*
7:40 a.m.	**Governors' Remarks**
8:20 a.m.	**Roundtable Discussion**
9:00 a.m.	**Conclusion**

WGA Day-of Contacts:
Jim Ogsbury, Executive Director – (303) 520-1882
Troy Timmons, Director of Strategic Initiatives – (303) 618-4502

EPA Day-of Contacts:
Becky Cook-Shyovitz – (202) 309-4476
William Stull (Security) – (202) 695-9384

AMERICAN OVERSIGHT

Proposed draft letter to the Senate Environment and Public Works Committee chair from the Western Governors' Association

Western Governors offer these comments to the Chairman of Senate Committee on Environment and Public Works regarding proposed legislation to amend the Endangered Species Act (ESA). The Western Governors' Association (WGA) appreciates the Chairman's willingness to productively engage with Governors, and that the Chairman has approached this polarizing topic in an inclusive, thoughtful manner. The proposed bill reflects this fact and offers meaningful, bipartisan solutions to challenging species conservation issues.

WGA represents the Governors of the 19 western states and 3 U.S. territories in the Pacific. The association is an instrument of the Governors for bipartisan policy development, information-sharing, and collective action on issues of critical importance to the western United States. Issues surrounding the ESA and its implementation are increasingly important to Western Governors.

Congress passed the ESA in 1973, codifying the responsibility to protect imperiled species and the habitats upon which they rely. Since then, the ESA has prevented a number of extinctions and facilitated the recovery of some of our nation's most iconic species. Yet, the ESA is not perfect. We can and should continually strive to make it work better for wildlife and people.

For more than two years, the WGA Species Conservation and Endangered Species Act Initiative has engaged a diverse and bipartisan collection of interested organizations to discuss ways of improving the ESA's effectiveness and efficiency. Using a series of public workshops, facilitated work sessions, substantive webinars, and other tools, WGA gathered valuable insight that enabled Governors to adopt a series of recommendations for improving the ESA in June 2017.

Most of the WGA recommendations seek regulatory improvements because the rulemaking process does not require amending the statute. However, some recommendations can only be implemented through congressional action. The proposed bill is generally consistent with the WGA recommendations, and WGA offers its support for the portions of the bill that are consistent with existing Western Governors' policy. In other instances, the proposed bill addresses issues where WGA has no formal policy and as to those, WGA takes no position. With respect to each section of the bill:

Title I – Enhancing the Federal-State Partnership

Section 101. Definitions

Western Governors support directing the Secretary of the Interior to define the terms "great weight" and "maximum extent possible." Both terms enhance the Secretary's consultation requirements with states when implementing the ESA.

Section 102. Recovery Teams

Governors support establishing recovery teams that are empowered to develop and implement recovery plans, propose modifications to recovery plans when appropriate, and recommend delisting and downlisting listed species that the Secretary must act upon once the established recovery goals are met. Governors also support providing impacted states the opportunity to lead the recovery team, if they so choose.

DRAFT

AMERICAN OVERSIGHT

Too often, species that meet or exceed recovery goals for more than a decade remain listed. This prevents the allocation of resources to species that are truly imperiled, reduces public support for the species on the landscape, erodes support for the ESA with critical landowners, and leads to increased tension between state and federal wildlife management agencies.

Western Governors support the provision of this section that delays judicial review of a determination to delist a species until the conclusion of the statutorily mandated post-delisting monitoring review period as long as there is a federally reviewed and endorsed conservation plan in place. Delaying judicial review will allow state management plans to be implemented and evaluated for success.

Section 103. State-Federal consultation relating to conservation and recovery of wildlife.

Roughly 30 percent of all listed species have no recovery plan: some species languish more than 15 years with no discernable path to recovery. For species without recovery teams, Western Governors support empowering states to lead recovery plan development and implementation, subject to plan approval from the Secretary. This would reduce federal agency workload, allow for more efficient species recovery, and utilize local expertise to ensure local support for recovery efforts.

Section 104. Consultation with States regarding land acquisition.

Western Governors support language requiring the Secretary seek and give great weight to comments provided by states regarding proposed land acquisitions within that state's boundaries. This is consistent with WGA policy that seeks meaningful consultation opportunities for all ESA matters potentially impacting states.

Section 105. Cooperation with States and Indian Tribes.

Western Governors stress that states have primary management authority over all fish and wildlife within their borders and appreciate the language in this section recognizing this fact. Governors also support improving consultation requirements between states and the Secretary when implementing the ESA.

Section 106. State consultation regarding experimental populations.

Western Governors do not take a position regarding the specific language of this section; however, Governors generally support efforts to require increased consultation with states on matters related to ESA implementation.

Section 107. State participation in settlements.

Western Governors do not take a position regarding the specific language of this section; however, Governors generally support efforts to require increased consultation with states on matters related to ESA implementation.

Section 108. Award system for State agencies.

No position.

AMERICAN OVERSIGHT

Section 109. State feedback regarding U.S. Fish and Wildlife Service employees.

No position.

Title II – Encouraging Conservation Activities through Regulatory Certainty

Western Governors generally support efforts to improve regulatory certainty for public and private stakeholders that can encourage conservation. However, the Governors take no position with respect to the specific language in title II.

Title III – Strengthening Conservation Decisionmaking through Increased Transparency

Sec. 301. Policy relating to best scientific and commercial data available.

Western Governors support transparency, but also support protecting sensitive information about species or information that identifies the property of a specific landowner from disclosure under the Freedom of Information Act. Landowners frequently decline to participate in voluntary conservation programs because they fear information about their property will become part of the public record. Since private landowners control nearly 70 percent of all habitat in the United States, protecting privacy and providing certainty are critical for proper ESA implementation.

Sec. 302. Transparency of information.

Western Governors support requiring state approval before a federal agency releases state provided data. In many cases, states possess data that their laws prohibit disclosing to the public. If states provide this data to the federal agencies, and those agencies release that data to the public, states could be liable for violating their sunshine laws. Requiring state consent prior to federal agencies releasing state-provided data will alleviate this concern and result in better data for federal agencies to rely upon when making listing determinations.

Sec. 303. Information provided to States.

Western Governors support providing states with all information used in the federal decision-making process, subject to well-defined exceptions, and receiving comment from affected states prior to making a listing decision. Frequently, states possess valuable species information that federal agencies will find persuasive in listing determinations. This provision allows the federal agencies to make better decisions based on the evaluation of state data.

Sec. 304. Transparency in litigation.

No position.

Title IV—Optimizing Conservation Through Resource Prioritization

Sec. 401. Prioritization of listing petitions, reviews, and determinations.

Western Governors support the creation of a prioritization system for addressing listing petitions, reviews, and determinations. Congress established the current listing deadlines in 1982 to

AMERICAN OVERSIGHT

encourage timely determinations from the federal agencies. However, after more than 35 years, these arbitrary deadlines have outlived their usefulness. They discourage voluntary conservation, limit the development of good science for informed decision-making, and give rise to significant litigation.

Creating a prioritization schedule ensures the immediate protection of species at the greatest risk of extinction. Further, delaying listing determinations for species with active conservation plans provides incentive for states, local government, and private individuals to engage in proactive, voluntary conservation. Incentivizing conservation can eliminate the need to list a species, which is always better than a threatened or endangered finding. Finally, a prioritization schedule gives the federal agencies flexibility to prioritize their workload without the fear of litigation.

Title V—Studies to Improve Conservation

No position.

Title VI—Reauthorization

Sec. 601. Reauthorization.

Western Governors support efforts to reauthorize appropriations for the ESA.

Western Governors acknowledge that any congressional effort to amend the ESA will be complicated and spark diverse opinions. WGA supports your work to modernize the ESA and appreciates your efforts to conduct this process in a thoughtful, bipartisan manner. Each Governor reserves judgment on whether to continue supporting this bill as it moves through the legislative process. Please do not hesitate to contact us if we can be of further assistance.

Sincerely,

Western Governors

DRAFT – INTERNAL USE ONLY

WESTERN GOVERNORS' ASSOCIATION

Policy Resolution 2019-XX

Cybersecurity – VERSION 1

Commented [BB1]: 9/17 Work Group Call. Attendees: WA. Discussed WA edits shown below.
9/24 Work Group Call: No attendees. WA provided feedback/edits on draft.
10/1 Work Group Call: No attendees.
10/2-10/3: WA and ND provided additional edits.

A. BACKGROUND

1. In the age of automation, digitization, big data, artificial intelligence, and machine-to-machine learning, the United States' capabilities to prevent, detect and respond to cyberattacks are of ever-growing importance to our society. The cybersecurity of our nation is an all-of-government and industry-wide endeavor.

2. Cybersecurity is especially imperative for critical infrastructure, which includes the nation's electric grid, energy resource supply and delivery chains, finance, communications, election systems, the chemical industry, commercial facilities, critical manufacturing, defense industrial base, emergency services, food and agriculture, government facilities, healthcare and public health, information technology, transportation, and water and wastewater systems.

3. Addressing cybersecurity needs across ~~these~~ critical infrastructure sectors ~~and others~~ is further complicated by the increasing interdependency and interconnectedness of our nation's data systems to myriad of non-critical infrastructure systems and ~~the~~ a dynamic threat environment. Effective cybersecurity ~~regimes~~ programs require strategic and functional relationships and information-sharing between federal, state and local levels of government, and the public and private sectors.

Commented [BB2]: 10/2: ND edits.

4. The cybersecurity of their states and the nation is a high priority of Western Governors. State governments are responsible for securing public networks, the state's digital assets, and citizen data, as well as coordinating their cybersecurity efforts with federal agencies and potentially-affected private entities (e.g., utilities, financial institutions, transportation, and health). Governors lead efforts to plan and implement state cybersecurity programs, respond to cyberattacks, and investigate intrusions.

Commented [BB3]: 10/2: ND edits.

~~4.~~5. State election systems remain targets of foreign interference. As governors, we remain committed to protecting our states' election systems. There is nothing more fundamental to the enduring success of our American democracy, and we take seriously our responsibility to protect the integrity and security of our elections. This is an imminent national security threat that transcends party lines. This is a matter of protecting and preserving fair elections—the underpinning of our democracy.

Commented [BB4]: 10/3: WA edition.

~~5.~~6. The Office of Management and Budget and Department of Homeland Security (DHS) May 2018 Federal Cybersecurity Risk Determination Report and Action Plan concluded that 71 of 96 federal agencies are at risk or high risk of cyber intrusions. It also determined that federal agencies are not equipped to determine how threat actors seek to gain access to their information. This deficiency results in ineffective allocations of the agencies' limited cyber resources.

Commented [BB5]: 10/2: ND Comment: Are we absolutely certain we want this, as it's currently worded, in here? First, is this entirely accurate? Second, States aren't in a much better state of capability… Third, I am unsure of the point being made here…

AMERICAN OVERSIGHT

~~6.~~7. Currently, there is a severe deficit of cyber workers, especially in government. Our nation cannot defend itself without a well-trained, experienced cyber workforce. The ~~private and~~ public sector~~s~~ must dedicate resources to cybersecurity education, training, and recruitment programs and encourage the private sector to do the same through effective policy.

Commented [BB6]: 9/17: WA edit.

B. GOVERNORS' POLICY STATEMENT

~~1.~~ Western Governors urge Congress to improve coordination of congressional oversight and legislative activity on cybersecurity. The federal government has a responsibility to provide adequate funding for states to meet election security needs. Western Governors encourage Congress and the Administration to work cooperatively with states in developing election security legislation and mandates, and to fully fund implementation.

Commented [BB7]: 10/3: WA edit.

~~2.~~1.

~~3.~~2. Federal agencies must engage in early, meaningful, substantive, and ongoing consultation with Governors or their designees on all aspects of cybersecurity. The federal government must also continue to clarify the roles and responsibilities of federal agencies in preventing, preparing for, and responding to cyberattacks. Centralized authority, points of contact, and formalized communication pathways are necessary to address increasingly complex threats. In addition, these pathways must occur at each level within government and other organizations.

Commented [BB8]: 9/24: Based on WA suggestion.

~~4.~~3. The increasing number and inconsistency of federal security regulations puts an unnecessary burden on state governments and is an inefficient use of often-constrained security resources. The federal government should establish a working group with representatives from states and federal agencies, as well as restore the position of the White House cybersecurity coordinator, to harmonize disparate agency regulations.

Commented [BB9]: 9/17: WA edit.

~~5.~~4. Western Governors recommend that the federal government continue the DHS State, Local, Tribal, and Territorial Engagement Program, which provides cybersecurity risk briefings and resources to Governors and other officials. The Governors also support DHS's Office of Cybersecurity and Communications, with which state chief information officers regularly interact.

~~6.~~5. The National Institute for Standards and Technology (NIST) Cybersecurity Framework and other standards can facilitate effective, consistent, and risk-based decision-making in government and industry. Real-world simulations of attacks on critical infrastructure are essential to prepare our nation for potential threats.

~~7.~~6. The federal government should use the full range of economic tools, including travel and financial sanctions, to deter cyberattacks organized or supported by nation-states.

~~8.~~7. The public and private sectors must take steps to mitigate global supply chain risks (e.g. installation of malicious software or hardware). Government and industry should also increase the cybersecurity awareness of government and private employees through training and education.

~~9.~~8. The Administration should propose, and Congress should provide, long-term authorization and sufficient appropriations for high-quality cybersecurity education and workforce development programs to grow and sustain the cybersecurity workforce. The federal government should

AMERICAN OVERSIGHT

also expand the CyberCorp: Scholarship for Service program and continue to support educational initiatives, such as NIST's Initiative for Cybersecurity Education and National Centers of Academic Excellence in Cyber Defense.

~~10.~~9. Western Governors support policies that incentivize the private sector to improve cybersecurity and share information regarding cyber threats as early as possible, including policies to improve access to information or create common standards for information-sharing. The federal government should emphasize the benefits of information-sharing, while alleviating private sector concerns with this essential communication. The federal government and states should continue to investigate liability protections, such as safe harbor provisions, for entities that report cyber intrusions.

~~11.~~10. Our nation requires innovation in detecting, preventing, and responding to continually-evolving cyber threats. More research is required to understand the use of blockchain and encryption by perpetrators and its utility for defense against cyber threats, and address vulnerabilities of other emerging technologies, including connected vehicles and Internet of Things devices. The federal government should provide funding and technical assistance for these and other types of cybersecurity research and development.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct WGA staff to work with congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

Commented [BB10]: 9/24: Based on WA suggestion.

DRAFT

AMERICAN OVERSIGHT

[Date]

Mr. James D. Ogsbury
Executive Director
Western Governors' Foundation
1600 Broadway
Denver, Colorado 80202

Dear Mr. Ogsbury:

I hereby resign as a Director of the Western Governors' Foundation, effective December 14, 2018.

Sincerely,

DRAFT

AMERICAN OVERSIGHT

Memorandum

TO: Western Governors
FROM: Jim Ogsbury, Executive Director, Western Governors' Association
DATE: October 1, 2018
SUBJECT: Western Governors' Foundation

Background

The Western Governors' Foundation is a 501(C)(3) organization, which was established to support the Western Governors' Association. Its explicit purpose is, "to make distributions to the Western Governors' Association." In effect, the Foundation is a passive financial arm of the Association, collecting contributions from sponsors for transfer to the Association. The overwhelming majority of contributions to WGA, however, are made directly to the Association.

Dues-paying members of the Association serve as Directors of the Foundation.

Reconstruction of the Foundation

At the 2018 Annual Meeting of WGA, the Executive Committee authorized pursuit of the Foundation's reinvention as an authentic philanthropic organization, supporting the Association through "charitable, scientific, literary, or educational" activities as countenanced under Section 501(C)(3) of the Internal Revenue Code. Pursuant to this direction, WGA engaged counsel and developed the attached draft comprehensive amendments to the Foundation's Articles of Incorporation and Bylaws. Salient features of the new draft governing documents follow:

- The Foundation Board would be composed of 3-9 individuals, appointed by the Association. Although there are no proposed restrictive qualifications to Board service, we anticipate that the Board would be composed of interested current and former Western Governors.

DRAFT

AMERICAN OVERSIGHT

- To maintain the Foundation's favorable tax status and reduce administrative burden, the Foundation would be "operated, supervised or controlled" by the Association.

- Management responsibilities would be invested in a President, appointed by the Board. Currently, the Executive Director of the Association serves as the Executive Director of the Foundation.

Implementation

Reconstruction of the Foundation will involve a 3-step process:

1. An affirmative vote to adopt the revised Articles and Bylaws.
2. Resignation of current directors from the Foundation Board.
3. Appointment of new Foundation Board members by the Association.

According to counsel, the Foundation may not adopt the new governing documents by ballot. Accordingly, we hope that a quorum of Foundation directors (9) will assemble at the WGA Winter Meeting in Hawaii to consider the proposal.

In the meantime, we encourage Governors to affirmatively resign as Directors of the Foundation Board to facilitate the Foundation's reinvention. Such resignation should be made effective immediately following the reorganization vote. A draft letter of resignation is attached for your reference and use. Governors who are interested in taking an active role in the Foundation may be reappointed to the Foundation Board at a later time.

Thank you for your attention to this important matter. Please contact me if you have any questions or require further information.

DRAFT

AMERICAN OVERSIGHT

DRAFT – INTERNAL USE ONLY

WESTERN GOVERNORS' ASSOCIATION

Policy Resolution 2018-XX

Foreign Visitor Preclearance
Version 1

A. BACKGROUND

1. The U.S. Department of Commerce estimates that nearly ~~75~~ 76 million foreign visitors entered the country during ~~2014~~2016. The vast majority of these travelers arrived in the United States by plane.[1]

2. Tourism is a significant revenue source for western states and territories, many of which count international travelers as major contributors to state and local economies and look to international tourism to drive local employment.

3. As a result of utilizing technology such as Automated Passport Control equipment, average wait time at airport passport and immigration processing areas have declined in recent years, but still frequently exceeds 60 minutes.[2]

~~3. Arriving airline passengers sometimes experience wait times in the airport passport and immigration processing area in excess of 90 minutes.~~

4. Foreign visitor preclearance allows international travelers to be screened by U.S. Customs and Border Patrol (CBP) officers prior to boarding an international flight. This preclearance allows passengers to bypass U.S. customs stations upon arrival at an American airport.

5. The Transportation Security Administration requires passenger and property screening at foreign preclearance airports to conform with U.S. aviation security screening standards.

6. Preclearance arrangements between the U.S. and Canada began in 1952. Since that time CBP has established over 600 American law enforcement officers and agricultural specialists at 15 preclearance airports in six countries: Ireland, Canada, Aruba, The Bahamas, Bermuda and United Arab Emirates. CBP also staffs a pre-inspection facility for passenger/vehicle ferry traffic to the U.S. in Victoria, Canada.[3]

7. While there were earlier announcements in 2015 and 2016 to possibly expand the preclearance program to eleven new airports in nine countries, CBP has only concluded agreements to cover Stockholm, Sweden (signed November 4, 2016) and Punta Cana, Dominican Republic (signed December 1, 2016).[4]

---

[3] U.S. Customs and Border Protection, Preclearance Locations, https://www.cbp.gov/border-security/ports-entry/operations/preclearance
[4] "DHS Announces 11 New Airports Selected For Possible Preclearance Expansion Following Second Open Season" https://www.dhs.gov/news/2016/11/04/dhs-announces-11-new-airports-selected-possible-preclearance-expansion-following

AMERICAN OVERSIGHT

~~7. On March 16, 2015, U.S. Department of Homeland Security (DHS) Secretary Jeh Johnson signed a new preclearance agreement with the government of Canada. On May 29, 2015, CBP announced its intention to expand air preclearance operations to ten additional airports in nine countries:~~

- ~~Brussels Airport, Belgium;~~
- ~~Punta Cana Airport, Dominican Republic;~~
- ~~Narita International Airport, Japan;~~
- ~~Amsterdam Airport Schipol, Netherlands;~~
- ~~Oslo Airport, Norway;~~
- ~~Madrid-Barajas Airport, Spain;~~
- ~~Stockholm Arlanda Airport, Sweden;~~
- ~~Istanbul Ataturk Airport, Turkey;~~
- ~~London Heathrow Airport, United Kingdom; and~~
- ~~Manchester Airport, United Kingdom.~~

8. In FY2017, CBP precleared more than 19 million passengers.[5]

~~8. These represent some of the busiest last points of departure to the United States – in 2014 nearly 20 million passengers traveled from these airports to the U.S.~~

9. The DHS has supported preclearance as both a security imperative – enabling CBP to identify and stop potential terror threats before they reach U.S. soil – and a strong economic opportunity.

B. GOVERNORS' POLICY STATEMENT

1. In recognition of the economic and national security benefits provided by foreign visitor preclearance, Western Governors support CBP's use of preclearance to reduce excessive wait times at American immigration and processing areas.

2. Western Governors support the efforts of DHS and CBP to increase the number of international airports and countries at which foreign visitor preclearance is used. Such expansion will streamline legitimate international travel and will further protect the safety and security of American citizens as well as international visitors.

3. Preclearance also allows smaller airports with no or few full-time CBP personnel to accept direct international flights from preclearance-approved foreign airports. Western Governors recognize the benefit this provides small or rural airports in accepting international travelers more efficiently. ~~that accept a significant number of international travelers, for instance Antonio B. Won Pat International Airport in Guam, where passengers on arriving international flights can wait 2-3 hours for visa processing.~~

4. In recognition of the benefits provided by foreign visitor preclearance, and in order to expand its use, DHS should work to complete the negotiation process with foreign countries and add new preclearance-approved international airports as soon as possible.

[5] Remarks of Acting Commissioner Kevin K. McAleenan at Press Event Marking Release of CBP's Trade and Travel Fiscal Year 2017 Report, February 13, 2018, https://www.cbp.gov/newsroom/speeches-and-statements/remarks-acting-commissioner-kevin-k-mcaleenan-press-event-marking

AMERICAN OVERSIGHT

5. Additionally DHS and CBP should work with western states to help identify optimal international foreign visitor preclearance airports for future consideration and should work with western state tourism directors to expand international travel opportunities in western states.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct WGA staff to work with Congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

FY19 Planning Activities

Action Request:
WGA requests SAC assistance with the first planning year objective - populating the initiative advisory group. Please connect WGA with the appropriate person in your governor's office with policy expertise related to rural development to provide feedback and assist with scoping efforts.

Please assist WGA with this effort by October 19th.

Initiative Overview:

The Western Governors' "Reimagining the Rural West" Initiative will examine the elements critical to the ongoing and future vitality of rural western communities, with the goal of identifying actions western states can take to best support these communities, especially by effecting changes in federal policies. The initiative will be organized around three topical pillars: Opportunity, Connectivity and Community. Suggested topics or objectives are identified for each.

1. Opportunity

This pillar will examine strategies for strengthening rural western economies, in particular through leveraging the West's strengths (e.g. resource-based industries) and advantages (e.g. frequent proximity to public lands). This includes opportunities such as growing the outdoor economy, modernizing the energy industry, capitalizing on restoration and conservation services, and applying new technologies to agriculture.

Suggested Topics:

- Advancing Western Governors' all-of-the-above energy vision, which calls for making the West a leader in energy education, technology development, research and innovation;
- Providing a platform for states to share best practices in developing the outdoor recreation economy, including through establishment of offices of outdoor recreation, strategies to leverage the private sector, and identifying federal policies or investments that would support that industry's growth;
- Advancing Western Governors' forest and rangeland management priorities related to expanding markets for forest products and diversified rangeland goods and services and supporting forest and rangeland restoration activities; and
- Developing and utilizing economic incentives, such as federal Opportunity Zones, to attract businesses and foster entrepreneurism.

AMERICAN OVERSIGHT

2. Connectivity

The Connectivity pillar will foster solutions-oriented discussions around the rural West's infrastructure challenges with a focus on broadband and transportation – the infrastructure needed to bridge the gap between rural communities and metropolitan areas.

Suggested Topics:

- Developing funding strategies and solutions for rural infrastructure investments, including how states can drive private sector investment through tax or other incentives;
- Sharing best practices and developing recommendations for prioritization of infrastructure funding, focusing on investments that are critical to attract and retain businesses and investments that adapt to or anticipate changing or emerging technologies;
- Facilitating deployment of rural broadband by:
    - Convening stakeholders and state officials to discuss best practices for building rural broadband systems that provide continuous, low-cost access;
    - Engaging with states to "ground-truth" broadband data that is available to federal agencies. Low-quality data affects the allocation of federal funding to rural communities through FCC and USDA loan and grant programs;
    - Examining innovative broadband mapping strategies, such as nonprofit entities collecting Internet Service Provider infrastructure data to estimate coverage; and
    - Coordinating with USDA to ensure the new broadband pilot program managed by the Rural Utility Service prioritizes areas that wholly or severely lack access to broadband.
- Identifying critical transportation infrastructure (surface and air) and federal regulations that may impact the rural communities' ability to maintain this infrastructure.

3. Community

This pillar will explore the amenities and attributes that make rural communities attractive places to live, identifying critical elements (e.g. access to education, affordable housing, healthcare) and strategies for reinforcing or developing those elements.

Suggested Topics:

- Showcasing western communities that are doing a good job attracting and retaining young people and families and developing recommendations for other communities to replicate that success;
- Identifying and disseminating best practices for communities to collect and analyze locally generated socioeconomic data to inform policy decisions and connect communities to

AMERICAN OVERSIGHT

groups/tools that are working to support that effort (such as the Headwaters Economic tool);

- Facilitating conversation on how to engage tribal populations while building community;

- Providing a forum for states to share best practices in rural workforce development such as strategies to close rural skills gaps in sectors such as healthcare and education; models for providing access to post-secondary education in rural communities; expanding apprenticeship in rural industries and businesses; and identifying and training skills for a resilient workforce that can adapt and innovate as technologies change;

- Evaluating federal policies affecting rural healthcare, including the sustainability of rural hospitals and deployment of telehealth services;

- Evaluating federal policies affecting the distribution of funding for rural development to determine whether rural areas are able to capture their fair share, and if not, identifying solutions such as providing tools or resources and advocating for legislative or regulatory changes; and

- Sharing best practices and developing policy recommendations to alleviate the rural housing shortage.

Planning Year Objectives:

1. Build Advisory Group (October 2018)

WGA staff will build out an advisory group for the initiative. The advisory group will consist of state policymakers with a broad expertise in rural economic development and sustainability. WGA will work with SAC to identify participants from Governors' offices or state agencies.

The advisory group's first task will be to develop survey instruments that will be deployed in the planning year to identify to refine the scope of the initiative and identify potential outcomes. The advisory group will also help WGA distribute the survey to appropriate stakeholders.

2. Develop and Distribute Initial Survey (November – December 2018)

Working with the advisory group, WGA will develop an initial survey to gather information pertinent to the initiative. This survey will gauge states' interest in the suggested topics put forth in the initiative framework, solicit best practices and case studies, and help to identify potentially overlooked topics of inquiry.

3. Establish Stakeholder Interest and List (Ongoing)

The team will conduct outreach to stakeholders (nonprofit organizations, federal agencies, state and local government, business community) and build out an initiative list that will be used for distribution and to populate initiative events.

4. Develop Potential Sponsors (December 2018 – May 2019)

AMERICAN OVERSIGHT

The WGA team will develop and secure initiative sponsors before the launch of the initiative in June 2019. The team will work to identify interested sponsors at the Winter Meeting. Sponsorship materials will be developed and finalized by March 2019 with the goal of securing initiative sponsors before the initiative roll-out in June.

5. Develop and Finalize Initiative Plan (January – April 2019)

The WGA team will develop and finalize the initiative plan by April 2019. The plan will identify the concrete outcomes the initiative will work toward and how it will do so. The plan will detail the number and type of in-person events needed and the topics to be addressed at each. WGA will present the plan to SAC for feedback at the Spring Strategic Planning Meeting.

WGA Staff: Lauren DeNinno (ldeninno@westgov.org), Britta Beckstead (bbeckstead@westgov.org), and Kevin Moss (kmoss@westgov.org)

BYLAWS
OF
WESTERN GOVERNORS' FOUNDATION

(a Colorado Nonprofit Corporation)

ARTICLE I.
OFFICES

1. Business Offices. The principal office of the corporation shall be located at such place as may be designated by the corporation from time to time in filings with the Secretary of State of Colorado. The corporation may have such other offices, either within or without the State of Colorado, as the Board of Directors may determine or as the affairs of the corporation may require from time to time.

2. Registered Office. The corporation shall have and continuously maintain in the State of Colorado a registered office, and a registered agent whose office is identical with such registered office, as required by the Colorado Revised Nonprofit Corporation Act. The registered office may be, but need not be, identical with the principal office if the principal office is in the State of Colorado. The address of the registered office may be changed from time to time by the corporation as long as the proper filings are made with the Secretary of State of Colorado.

ARTICLE II.
NO VOTING MEMBERS

The corporation shall have no voting members and the Board of Directors shall be elected as provided in Article III below.

ARTICLE III.
BOARD OF DIRECTORS

1. General Powers. The affairs of the corporation shall be managed under the direction of its Board of Directors. Directors need not be residents of the State of Colorado, but they shall be natural persons who are at least eighteen years of age.

2. Number, Tenure and Qualifications. The number of Directors shall be between three and nine. The number of Directors within that range shall be fixed or changed from time to time by the Board of Directors. Directors serving in that capacity at the time of the adoption of these revised and restated bylaws shall continue to serve as Directors for two years from that time or until their death, removal or resignation. All successor Directors shall be appointed by Western Governors' Association, a Colorado nonprofit corporation ("WGA"), to serve for a term of up to four years. Each Director shall serve for the term for which they are elected and until their successor shall have been appointed or elected and qualified, or until such Director's earlier death, resignation or removal. A Director may serve successive terms if reappointed or reelected.

DRAFT

AMERICAN OVERSIGHT

At least a majority of the members of the Board of Directors shall not be disqualified persons (as defined in Section 4946 of the Internal Revenue Code of 1986, as amended (the Code)) other than foundation managers.

It is the intention of the corporation that it be regarded as "operated, supervised or controlled by" WGA within the meaning of Section 509(a)(3)(B)(i) of the Code.

3. Removal. The Directors may be removed with or without cause by WGA at any time by giving written notice to the Director who is being removed and to the corporation. Such removal shall be effective when the notice of removal is received by both the Director to be removed and the corporation unless the notice states a later effective date.

4. Meetings. The Board of Directors shall meet at least one time each year at a meeting designated as the annual meeting and called by the Chairperson of the Board. Additional meetings may be called by the Chairperson of the Board or upon the written request of at least two Directors. All meetings shall be held at the time and place designated by the Chairperson of the Board.

5. Notice of Meetings. Notice of each meeting of Directors shall be given to each Director. If such notice is given (a) by personally delivering written notice to a Director, (b) by personally telephoning such Director, or (c) by delivering notice to such Director by electronic mail, it shall be so given at least two (2) days prior to the meeting. If such notice is given either (y) by depositing a written notice in the United States mail, postage prepaid, or (z) by transmitting a facsimile directed to such Director, it shall be so given at least four (4) days prior to the meeting. Notice shall be sent to the street or electronic addresses or facsimile numbers of the Directors set forth in the corporation's records. The notice of all meetings shall state the place, date and hour thereof, but need not, unless otherwise required by statute, state the purpose or purposes thereof.

6. Quorum. Two-Thirds of the Board of Directors shall constitute a quorum for the transaction of business at any meeting of the Board; but if less than two-thirds of the Directors are present at said meeting, a majority of the Directors present may adjourn the meeting from time to time without further notice.

7. Manner of Acting. The act of two-thirds of the Directors shall be the act of the Board of Directors, unless the act of a greater number is required by law or by these bylaws.

8. Vacancies. Any vacancy occurring in the Board of Directors, including any vacancy resulting from the removal of a Director or from an increase in the number of Directors, shall be filled by WGA. A Director appointed or elected to fill a vacancy shall be elected for the unexpired term of his or her predecessor in office.

9. Compensation. Directors as such shall not receive any stated salaries for their services, but by resolution of the Board of Directors a fixed sum and expenses of attendance, if any, may be allowed for attendance at each meeting of the Board; but

AMERICAN OVERSIGHT

nothing herein contained shall be construed to preclude any Director from serving the corporation in some other capacity and receiving compensation therefor.

10. Informal Action by Directors. Any action required by law or permitted to be taken at a meeting of Directors may be taken without a meeting if notice is transmitted in writing to each member of the Board and each member of the Board by the time stated in the notice: (x) votes in writing for such action; or (y) (i) votes in writing against such action, abstains from voting, or fails to respond or vote; and (ii) fails to demand in writing, that action not be taken without a meeting. The notice required by this Section shall state (a) the action to be taken; (b) the time by which a Director must respond; (c) that failure to respond by the time stated in the notice will have the same effect as abstaining in writing by the time stated in the notice and failing to demand in writing by the time stated in the notice that action not be taken without a meeting; and (d) any other matters the corporation determines to include. Action is taken under this Section only if at the end of the time stated in the notice transmitted pursuant to this Section the affirmative votes in writing for such action received by the corporation and not revoked equal or exceed the minimum number of votes that would be necessary to take such action at a meeting at which all of the Directors then in office were present and voted, and the corporation has not received a written demand that such action not be taken without a meeting other than a demand that has been revoked. A writing by a Director under this Section shall be in a form sufficient to inform the corporation of the identity of the Director, the vote, abstention, demand, or revocation of the Director, and the proposed action to which such vote, abstention, demand or revocation relates. All communications under this Section may be transmitted or received by the corporation by electronically transmitted facsimile, electronic mail, or other form of wire or wireless communication. For purposes of this Section, communications to the corporation are not effective until received.

11. Meetings by Telephone. Members of the Board of Directors or any committee designated thereby may hold or participate in a meeting of the Board of Directors or such committee by means of conference telephone or similar communications equipment provided that all such persons so participating in such meeting can hear each other at the same time.

ARTICLE IV.
OFFICERS

1. Officers. The officers of the corporation shall be a Chairperson of the Board, a Vice Chairperson of the Board, a President, and such other officers as may be elected in accordance with the provisions of this Article. The Board of Directors may elect or appoint such other officers as it shall deem desirable, such officers to have the authority and perform the duties prescribed, from time to time, by the Board of Directors. The Chairperson of the Board and the Vice Chairperson of the Board shall be elected from among the members of the Board. No individual may simultaneously hold more than one office in the Corporation. The officers must be natural persons who are at least eighteen years of age.

AMERICAN OVERSIGHT

2. Election and Term of Office. The officers of the corporation shall be elected annually by the Board of Directors at the next regular meeting of the Board of Directors following the annual meeting of the Board of Directors. If the election of officers shall not be held at such meeting, such election shall be held as soon thereafter as conveniently may be. New offices may be created and filled at any meeting of the Board of Directors. Each officer shall hold office until his or her successor shall have been duly elected and shall have qualified.

3. Removal. Any officer elected or appointed by the Board of Directors may be removed by the Board of Directors at any time with or without cause, but such removal shall be without prejudice to the contract rights, if any, of the officer so removed.

4. Vacancies. A vacancy in any office because of death, resignation, removal, disqualification or otherwise, may be filled by the Board of Directors for the unexpired portion of the term.

5. Chairperson of the Board. The Chairperson of the Board shall preside at meetings of the Board of Directors, shall consult with the President and keep generally advised about the state of the corporation and shall perform such other duties as may be determined by the Board.

6. Vice Chairperson of the Board. The Vice Chairperson of the Board shall perform the duties of the Chairperson of the Board in case of the absence or resignation of the Chairperson or inability of the Chairperson to act.

7. President. The President shall be the principal executive officer of the corporation and shall in general supervise and control all of the business and affairs of the corporation. He or she shall preside at all meetings of the Board of Directors if the offices of Chairperson and Vice Chairperson of the Board are vacant or the Chairperson and Vice Chairperson are absent or unable to act. The President may sign contracts or other instruments which the Board of Directors has authorized to be executed, except in the cases where the signing and execution thereof shall be expressly delegated by the Board of Directors or by these bylaws or by statute to some other officer or agent of the corporation; and in general he or she shall perform all duties incident to the office of President and such other duties as may be prescribed by the Board of Directors from time to time.

The President shall have charge and custody of and be responsible for all funds and securities of the corporation; and, with the assistance of staff of the corporation, shall receive and give receipts for moneys due and payable to the corporation from any source whatsoever, and deposit all such moneys in the name of the corporation in such banks, trust companies or other depositaries as shall be selected by the Board of Directors.

The President shall be the custodian of the corporate records and shall ensure that minutes of the meetings of the Board of Directors are kept in one or more books provided for that purpose. With the assistance of staff of the corporation, the President

AMERICAN OVERSIGHT

shall see that all notices are duly given in accordance with the provisions of these bylaws or as required by law, and shall keep a register of the post-office and email addresses of each Director which shall be furnished to the President by such Director.

ARTICLE V.
COMMITTEES

1. Committees of Directors. The Board of Directors may create one or more committees of the Board and appoint one or more Directors to serve on them, by vote of a majority of all Directors in office, which committees shall have and exercise the authority of the Board of Directors in the management of the corporation as may be delegated to such committee by the Board of Directors, except that no such committee shall have the authority of the Board of Directors in reference to authorizing distributions, electing, appointing or removing any Director, amending articles of incorporation, amending, altering or repealing the bylaws; approving a plan of merger, or approving a sale, lease exchange or other distribution of all, or substantially all of the corporation's property, with or without goodwill, otherwise than in the usual and regular course of business.

2. Advisory Committees. The corporation may have other committees similarly appointed which shall not have the authority of the Board of Directors in the management of the corporation and which shall serve solely as advisory committees to the Board.

3. Term of Office. Committees may be terminated and members may be appointed and removed from committees as determined by the Board of Directors from time to time.

ARTICLE VI.
STANDARDS OF CONDUCT FOR OFFICERS AND DIRECTORS

Each Director shall discharge the Director's duties as a Director, including the Director's duties as a member of a committee of the Board, and each officer with discretionary authority shall discharge the officer's duties under that authority: (a) in good faith; (b) with the care an ordinarily prudent person in a like position would exercise under similar circumstances; and (c) in a manner the Director or officer reasonably believes to be in the best interests of the corporation. A Director or officer may rely on information, opinions, reports, or statements, including financial statements and other financial data, if prepared or presented by: (i) one or more officers or employees of the corporation whom the Director or officer reasonably believes to be reliable and competent in the matters presented; (ii) legal counsel, a public accountant, or other person as to matters the Director or officer reasonably believes are within such person's professional or expert competence; or (iii) in the case of a Director, a committee of the Board of Directors of which the Director is not a member if the Director reasonably believes the committee merits confidence.

A Director or officer is not acting in good faith if the Director or officer has knowledge concerning the matter in question that makes reliance otherwise permitted

AMERICAN OVERSIGHT

by the above unwarranted. A Director or officer is not liable as such to the corporation for any action taken or omitted as a Director or officer, if, in connection with such action or omission, the Director or officer performed the duties of the position in compliance with this Article.

ARTICLE VII.
CONFLICTING INTEREST TRANSACTIONS

1. Conflicting Interest Transactions. As used in this Article, "conflicting interest transaction" means: a contract, transaction, or other financial relationship between the corporation and a Director of the corporation, or between the corporation and a party related to a Director, or between the corporation and an entity in which a Director of the corporation is a Director or officer or has a financial interest.

2. Prohibition Against Loans to Directors or Officers. No loans shall be made by the corporation to its Directors or officers. Any Director or officer who assents to or participates in the making of any such loan shall be liable to the corporation for the amount of such loan until the repayment thereof.

3. Voidability of Conflicting Interest Transactions. No conflicting interest transaction shall be void or voidable or be enjoined, set aside, or give rise to an award of damages or other sanctions in a proceeding by or in the right of the corporation, solely because the conflicting interest transaction involves a Director of the corporation or a party related to a Director or an entity in which a Director of the corporation is a Director or officer or has a financial interest or solely because the Director is present at or participates in the meeting of the corporation's Board of Directors or of the committee of the Board of Directors that authorizes, approves, or ratifies the conflicting interest transaction or solely because the Director's vote is counted for such purpose if:

(A) The material facts as to the Director's relationship or interest and as to the conflicting interest transaction are disclosed or are known to the Board of Directors or the committee, and the Board of Directors or committee in good faith authorizes, approves, or ratifies the conflicting interest transaction by the affirmative vote of a majority of the disinterested Directors, even though the disinterested Directors are less than a quorum; or

(B) The conflicting interest transaction is fair as to the corporation.

4. Approval of Conflicting Interest Transactions. Common or interested Directors may be counted in determining the presence of a quorum at a meeting of the Board of Directors or of a committee which authorizes, approves, or ratifies the conflicting interest transaction.

5. Party Related to Director. For purposes of this Article, a "party related to a Director" shall mean a spouse, a descendent, an ancestor, a sibling, the spouse or descendent of a sibling, an estate or trust in which the Director or a party related to a Director has a beneficial interest, or an entity in which a party related to a Director is a Director, officer, or has a financial interest.

AMERICAN OVERSIGHT

ARTICLE VIII.
INDEMNIFICATION

1. Indemnification. To the extent permitted or required by the act (as defined below) and any other applicable law, if any Director or officer (as defined below) of the corporation is made a party to or is involved in (for example as a witness) any proceeding (as defined below) because such person is or was a Director or officer of the corporation, the corporation (I) shall indemnify such person from and against any judgments, penalties, fines (including but not limited to ERISA excise taxes), amounts paid in settlement and reasonable expenses (including but not limited to expenses of investigation and preparation, and fees and disbursements of counsel, accountants or other experts) incurred by such person in such proceeding, and (II) shall advance to such person expenses incurred in such proceeding.

The corporation may in its discretion (but is not obligated in any way) to indemnify and advance expenses to an employee or agent of the corporation to the same extent as to a Director or officer.

The foregoing provisions for indemnification and advancement of expenses are not exclusive, and the corporation may at its discretion provide for indemnification or advancement of expenses in a resolution of its Directors, in a contract or in its articles of incorporation.

Any repeal or modification of the foregoing provisions of this article for indemnification or advancement of expenses shall not affect adversely any right or protection stated in such provisions with respect to any act or omission occurring prior to the time of such repeal or modification. If any provision of this article or any part thereof shall be held to be prohibited by or invalid under applicable law, such provision or part thereof shall be deemed amended to accomplish the objectives of the provision or part thereof as originally written to the fullest extent permitted by law, and all other provisions or parts shall remain in full force and effect.

As used in this article, the following terms have the following meanings:

(A) Act. The term "act" means the Colorado Revised Nonprofit Corporation Act as it exists on the date this Article is adopted, and as the Colorado Revised Nonprofit Corporation Act may be thereafter amended from time to time. In the case of any amendment of the Act after the date of adoption of this article, when used with reference to an act or omission occurring prior to effectiveness of such amendment, the term "act" shall include such amendment only to the extent that the amendment permits a corporation to provide broader indemnification rights than the Colorado Revised Nonprofit Corporation Act permitted prior to the amendment.

(B) Director or Officer. The term "Director" or "officer" means (I) a Director or officer of the corporation and (II) while an individual is a Director or officer of the corporation, the individual's serving at the corporation's request as a Director, officer, partner, member, manager, trustee, employee, fiduciary, or agent of another domestic or foreign corporation, nonprofit corporation, or other person or of an

AMERICAN OVERSIGHT

employee benefit plan, and (III) any other position (not with the corporation itself) in which a Director or officer of the corporation is serving at the request of the corporation and for which indemnification by the corporation is permitted by the act.

(C) Proceeding. The term "proceeding" means any threatened, pending or completed action, suit, or proceeding whether civil, criminal, administrative or investigative, and whether formal or informal.

(D) Code. The term "Code" means the Internal Revenue Code of 1986, as amended from time to time.

2. Limitation. Notwithstanding any other provision of this Article VIII, during any period that the corporation is a "private foundation" within the meaning of section 509 of the Code, or any corresponding provision of any future United States tax law, the corporation shall not indemnify any person from or against or advance to any person the cost of, such expenses, judgments, fines, or amounts paid or necessarily incurred, nor shall the corporation purchase or maintain such insurance, to the extent that any such indemnification, purchase, or maintenance would be determined to be an act of self-dealing within the meaning of section 4941 of the Code, to be a taxable expenditure within the meaning of section 4945 of the Code, or to be otherwise prohibited under the Code, unless and to the extent (i) a court orders such indemnification, or (ii) the purchase or maintenance of such insurance can be treated as reasonable compensation to such person.

ARTICLE IX.
BOOKS AND RECORDS

The corporation shall keep correct and complete books and records of account and shall also keep minutes of the proceedings of its Board of Directors and committees having any of the authority of the Board of Directors, and shall keep at its registered or principal office a record giving the names and addresses of the Directors. All books and records of the corporation may be inspected by any Director or his or her agent or attorney for any proper purpose at any reasonable time.

ARTICLE X.
WAIVER OF NOTICE

Whenever any notice is required to be given under the provisions of the Colorado Revised Nonprofit Corporation Act or under the provisions of the articles of incorporation or the bylaws of the corporation, a Director may waive any notice required to be given to such Director by the Act or these bylaws: (i) whether before or after the date or time stated in the notice as the date or time when any action will occur, by delivering a written waiver to the corporation which is signed by the Director entitled to the notice for inclusion in the minutes, but such delivery and filing shall not be conditions of the effectiveness of the waiver; or (ii) by a Director's attendance at the meeting whereby such Director waives objection to lack of notice or defective notice, unless the Director at the beginning of the meeting objects to the holding thereof or transacting business at the meeting because of lack of notice or defective notice and the

AMERICAN OVERSIGHT

Director also does not vote for or assent to action taken at the meeting. Further, even if a Director attends or participates in a meeting, the Director does not waive any required notice if special notice was required of a particular purpose and the Director objects to transacting business with respect to the purpose for which such special notice was required and does not thereafter vote for or assent to action taken at the meeting with respect to such purpose.

ARTICLE XI.
AMENDMENTS TO BYLAWS

The Board of Directors may amend these bylaws at any time to add, change, or delete a provision; provided, however, to be effective, any amendment of these bylaws shall require written approval of WGA.

ARTICLE XII.
VOTE REQUIRED FOR APPROVAL BY WGA

Unless otherwise provided in these bylaws, at any time when the approval of WGA or of the WGA Board of Directors is required to take any action, such action shall require the affirmative vote of two-thirds of the members of the WGA Board of Directors.

AMERICAN OVERSIGHT

WESTERN GOVERNORS' FOUNDATION
BYLAWS CERTIFICATE

The undersigned certifies that he or she is the Executive Director of Western Governors' Foundation, a Colorado nonprofit corporation, and that, as such, he or she is authorized to execute this Certificate on behalf of the corporation, and further certifies that attached hereto is a complete and correct copy of the bylaws of the corporation adopted by the Board of Directors of the corporation effective as of _____.

_____
[_____], Executive Director

11018820_4

AMERICAN OVERSIGHT

AMENDED AND RESTATED
ARTICLES OF INCORPORATION
OF
WESTERN GOVERNORS' FOUNDATION

Pursuant to the provisions of the Colorado Revised Nonprofit Corporation Act (the "Act"), Western Governors' Foundation, a Colorado nonprofit corporation (the "Corporation"), adopts the following Amended and Restated Articles of Incorporation. The Amended and Restated Articles of Incorporation constitute an amendment and restatement of the original Articles of Incorporation of the Corporation filed with the Colorado Secretary of State on April 2, 1985; correctly set forth the current provisions of the Articles of Incorporation of the Corporation, as amended, and restated; and supersede the Corporation's original Articles of Incorporation and all amendments and supplements thereto or restatements thereof. The Corporation has no voting members and the Amended and Restated Articles of Incorporation were duly adopted by unanimous consent of the Board of Directors of the Corporation on _____, 2018.

ARTICLE I

The name of the Corporation is Western Governors' Foundation.

ARTICLE II

The period of its duration shall be perpetual.

ARTICLE III

The Corporation is organized exclusively for charitable, scientific, literary or educational purposes within the meaning of and pursuant to section 501(c)(3) of the Internal Revenue Code of 1986 (or under the corresponding provision of any future United States Internal Revenue law). Within the scope of the foregoing purposes, the Corporation shall be organized and operated exclusively (i) for the benefit of, (ii) to perform the functions of, or (iii) to carry out the purposes of Western Governors' Association ("WGA"), a Colorado nonprofit corporation, and a governmental unit within the meaning of section 170(b)(1)(A)(v) of the Code. If WGA is dissolved for any reason and is no longer in existence, the purpose of the Corporation shall be to support the governmental units (within the meaning of section 170(b)(1)(A)(v) of the Code) whose Governors were the members of WGA at the time of its dissolution. References in these Articles of Incorporation to the "Code" shall be to the Internal Revenue Code of 1986, as amended from time to time.

ARTICLE IV

A. No part of the income or net earnings of the Corporation shall inure to the benefit of, or be distributable to, any member, director or officer of the Corporation or any other private individual (except that reasonable compensation may be paid for

DRAFT

AMERICAN OVERSIGHT

services rendered to or for the Corporation affecting one or more of its purposes, and reimbursement may be made for any expenses incurred for the Corporation by any officer, director, agent or employee, or any other person or corporation, pursuant to a policy adopted by the Board of Directors); and provided further that no member, director or officer of the Corporation, or any other private individual shall be entitled to share in any distribution of any of the corporate assets on dissolution of the Corporation or otherwise. No substantial part of the activities of the Corporation shall consist of carrying on propaganda or otherwise attempting to influence legislation, except as otherwise provided in section 501(h) of the Code. The Corporation shall not participate in or intervene in (including the publishing or distributing of statements) any political campaign on behalf of, or in opposition to, any candidate for public office.

B. No part of the assets of the Corporation shall inure to the benefit of or be distributable to any organization whose income or net earnings or any part thereof inure to the benefit of any private shareholder or other individual or any substantial part of the activities of which consists of carrying on propaganda or otherwise attempting to influence legislation.

C. Upon dissolution of the Corporation, all of its assets shall be paid over or transferred to WGA, but if WGA is no longer in existence or is no longer qualified to receive assets from the Corporation, then such assets shall be distributed to one or more exempt organizations of the kind described in section 501(c)(3) of the Code, or to governmental units within the meaning of section 170(b)(1)(A)(v) of the Code, as determined by the Board of Directors of the Corporation.

D. Notwithstanding any other provision hereof, this Corporation shall not conduct or carry on any activities not permitted to be conducted or carried on by an organization which is tax exempt under the provisions of section 501(c)(3) of the Code.

E. Notwithstanding any other provision of these Articles during any period that the Corporation is a "private foundation" within the meaning of section 509 of the Code, the Corporation shall be required to distribute its income for each taxable year of the Corporation at such time and in such manner as not to subject the Corporation to tax under section 4942 of the Code; and the Corporation shall be prohibited from engaging in any act of self-dealing as defined in section 4941(d) of the Code, from retaining any excess business holdings in violation of the provisions of section 4943(c) of the Code, from making any investments in such manner as to subject the Corporation to tax under section 4944 of the Code, and from making any taxable expenditures as defined in section 4945(d) of the Code.

ARTICLE V

The Corporation shall have no voting members and all business affairs of the Corporation shall be conducted by its Board of Directors.

AMERICAN OVERSIGHT

ARTICLE VI

The address of the registered office of the Corporation is 1600 Broadway, Suite 1700, Denver, CO 80202, and the name of its initial registered agent at such address is Dan Baer.

ARTICLE VII

The address of the principal office of the Corporation is 1600 Broadway, Suite 1700, Denver, CO 80202.

ARTICLE VIII

There shall be no personal liability, either direct or indirect, of any director of the Corporation to the Corporation or to its members for monetary damages for any breach or breaches of fiduciary duty as a director; except that this provision shall not eliminate the liability of a director to the Corporation or to its members for monetary damages for any breach, act, omission or transaction as to which the Colorado Revised Nonprofit Corporation Act (as in effect from time to time) prohibits expressly the elimination of liability. This provision shall not limit the rights of directors of the Corporation for indemnification or other assistance from the Corporation. This provision shall not restrict or otherwise diminish the provisions of section 13-21-115.7, Colorado Revised Statutes (concerning no liability of directors except for wanton and willful acts or omissions), any amendment or successor provision to such section, or any other law limiting or eliminating liabilities. Any repeal or modification of the foregoing provisions of this Article by the members of the Corporation or any repeal or modification of the provision of the Colorado Revised Nonprofit Corporation Act which permits the elimination of liability of directors by this Article shall not affect adversely any elimination of liability, right or protection of a director of the Corporation with respect to any breach, act, omission, or transaction of such director occurring prior to the time of such repeal or modification.

ARTICLE IX

The Articles of Incorporation and the Bylaws of the Corporation may be altered, amended or repealed by the affirmative vote of a majority of the full Board of Directors of the Corporation provided that, if WGA is then in existence, any such alteration, amendment or repeal is approved by the affirmative vote of two-thirds of the members of the WGA Board of Directors.

The (a) name or names, and (b) mailing address or addresses, of any one or more of the individuals who cause this document to be delivered for filing, and to whom the Secretary of State may deliver notice if filing of this document is refused, are:

WESTERN GOVERNORS' ASSOCIATION

Policy Resolution 2019-XX

Compensatory Mitigation – Version 1

A. BACKGROUND

1. Through their sovereign and statutory powers, states have primary management authority over all fish and wildlife within their borders. Following decades of work by staff and contractors, states have developed extensive science, expertise, and knowledge of species within their borders.

2. Governors bear responsibility for managing state interests, authorities and property rights within state borders – including fish and wildlife – and oversee state agencies charged with properly managing wildlife, habitat and related resources within their states.

3. States are the primary recipients of economic benefits associated with healthy species and ecosystems. At the same time, the economic costs of compliance with federal environmental regulations can fall disproportionately on western states and local communities. States recognize the importance of economic development and note that it is often not possible to both advance an economic development project and entirely avoid negative impacts to fish and wildlife populations and habitat.

4. Compensatory mitigation plays an important role in wildlife management and conservation, and states rely on its use in developing and executing species conservation strategies. Compensatory mitigation strategies employed by states include, but are not limited to, habitat restoration, establishment, enhancement, or conservation activities.

5. The mitigation hierarchy is a commonly referenced and widely utilized strategy in determining compensatory mitigation requirements for resource development projects. The mitigation hierarchy consists of first avoiding adverse impacts to wildlife populations and habitat where practicable, then minimizing adverse impacts where they cannot be avoided. The final step in the mitigation hierarchy is employing compensatory mitigation measures to replace or offset adverse impacts that remain following avoidance and minimization. This practice is memorialized under the Council of Environmental Quality's implementing regulations and other federal policy and guidance.[1]

6. While states exercise primary management authority over fish and wildlife within their borders, habitat for fish and wildlife often spans a patchwork of land ownership types, complicating state efforts to manage and conserve species under their management jurisdiction. This is particularly challenging in western states, where federal ownership constitutes a generally higher percentage of overall land ownership.

B. GOVERNORS' POLICY STATEMENT

1. States have the responsibility to establish appropriate statutes, regulations, policies and programs to manage fish and wildlife within their borders. This responsibility extends to

[1] 40 CFR 1508.20

DRAFT

AMERICAN OVERSIGHT

the development of compensatory mitigation standards and implementation of compensatory mitigation for species under their management purview.

2. Compensatory mitigation approaches vary from state to state, but they are designed to fully offset residual impacts to habitat function. Governors recognize that habitat functionality is the primary metric by which mitigation outcomes are measured. Compensatory mitigation efforts must sufficient to fully offset residual impacts to habitat function at the site-specific and range-wide scale necessary to meet conservation goals.

3. Where state mitigation standards are in place, consistency with existing state policy should be the primary guiding principle for a federal agency's development or implementation of compensatory mitigation on lands within their management authority or jurisdiction.

4. Western Governors urge federal agencies to adopt and implement state-supported compensatory mitigation programs and policies. Consistency between federal mitigation standards and those in state-supported programs allows wildlife managers, state and federal regulators, and developers to use a consistent compensatory mitigation program across differing land ownership within a state.

5. Western Governors recognize that that the diversity of conceivable species, habitat and project-specific circumstances make quantifying measures, with clearly defined goals, for compensatory mitigation difficult. Governors are concerned about federal agencies' potential inconsistent use and lack of assessment criteria for ambiguous mitigation goals such as "net conservation gain," and they believe that measures should be designed to avoid inappropriate uses of such a goal.

6. Western Governors recognize that mitigation of development impacts to habitat or natural resources must account for a level of risk and uncertainty that a particular compensatory mitigation action may fail to adequately offset adverse impacts to wildlife and habitat. Federal agencies should acknowledge a variety of tools and measures for incorporating risk and uncertainty based on the diverse experience of states in designing and implementing compensatory mitigation programs.

7. Governors believe that federal mitigation policies should be developed in coordination with Governors, and the state agency officials they designate, to achieve the following objectives:

    - Provide measurable and documentable habitat and conservation values, services and functions that are at least equal to the lost or degraded values, services and functions caused by the impact.

    - Incorporate measures to account for a level of risk that a particular compensatory mitigation action may fail or not achieve its stated objectives, and uncertainty about the level and duration of estimated impacts.

    - Provide benefits that are durable and in place for at least the duration of the residual adverse impacts.

    - Encourage the application of compensatory mitigation offsets prior to the impact occurring to ensure no lag time occurs between impacts and offsets.

DRAFT

AMERICAN OVERSIGHT

- Offer transparency and certainty to developers and regulators. This necessitates early and substantive consultation with States and consistency with State designed compensatory mitigation standards where they exist.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct WGA staff to work with Congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

Good Evening State Partners,

Attached for your review is the BLM Nevada and California's current preliminary draft chapters 1 and 2 and our revised adaptive management appendix that we have populated after several meetings with our State partners and with our cooperating agencies this week.

Following your review, these documents will be used to conduct the draft environmental analysis (chapter 4). Before moving ahead, we would like to ensure that our State partners are comfortable with the language that we have developed following our cooperators' meeting (specifically within **chapter 2 - Alternative B**). During your review, please let us know if you are uncomfortable with any language that we have revised. If you have alternative language to address your concern, please share that with us, as that will help expedite our revision process.

Please note that these documents have yet to be sent through a writer-editor (so I apologize up front if there are editorial/formatting errors). We are also working on revising the clarification language (for lek buffers and required design features), therefore, those documents (appendices) are not part of the attachments. The completed Preliminary Draft Amendment/EIS (including chapters 1-5 and appendices) will be shared for all of our cooperators to review on April 10th.

If you can please send us feedback by COB Monday, that would be greatly appreciated (and I apologize for the very short turn around).

I hope you all have a wonderful weekend.

CHAPTER 2
ALTERNATIVES

2.1 INTRODUCTION

This chapter describes the alternatives evaluated as a part of this RMPA/EIS. This Draft EIS analyzes in detail the No-Action Alternative (Alternative A) and one action alternative (Alternative B), which was developed to meet the purpose and need presented in **Chapter 1**. In addition to the alternatives considered in detail, this chapter also describes an alternative considered but eliminated from detailed analysis.

Components of Alternatives

Goals are broad statements of desired outcomes and are not quantifiable or measurable. Objectives are specific measurable desired conditions or outcomes intended to meet goals. Goals and objectives can vary across alternatives, resulting in different allowable uses and management actions for some resources and resource uses.

Management actions and allowable uses are designed to achieve objectives. Management actions are measures that guide day-to-day and future activities. Allowable uses delineate uses that are permitted, restricted, or prohibited, and may include stipulations or restrictions. Allowable uses also identify lands where specific uses are excluded to protect resource values, or where certain lands are open or closed in response to legislative, regulatory, or policy requirements. Implementation decisions are site-specific actions and are typically not addressed in RMPs.

2.2 ALTERNATIVES CONSIDERED BUT NOT ANALYZED IN DETAIL

2.2.1 Increase Protection for Greater Sage-Grouse

During scoping, some commenters asked for increased or additional constraints on land uses and development activities that result in ground disturbance to protection for greater sage-grouse habitat, beyond, above what is in the current management plan, including increased constraints on development. This

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006325

alternative does not meet the purpose and need for the amendment because increasing constraints on land uses and development activities would not align with the purpose of this plan amendment to continue conserving, enhancing, and restoring greater sage-grouse and their habitat while improving coordination with the State management strategies for greater sage-grouse. Further, additional constraints on land uses or development activities without a documented need would not meet the purpose of SO 3353, which directs the BLM to promote habitat conservation while contributing to economic growth and energy independence. As analyzed in the 2015 Nevada and Northeastern California Propose Land Use Plan Amendment and Final EIS, all of the previously analyzed alternatives, including one proposing constraints stricter than the current management plan, were predicted to result in a loss of economic opportunity, as well as opportunities for development on public lands.

2.3 Description of Alternatives

2.3.1 Alternative A (No-Action Alternative)

Under Alternative A, the No Action Alternative, the BLM would not amend the current Nevada and Northeastern California Greater Sage-Grouse Approved Resource Management Plan Amendment. Greater sage-grouse habitat would continue to be managed under current management direction. Goals and objectives for BLM-administered lands and federal mineral estate would not change. Allowable uses and restrictions would also remain the same, as they pertain to activities such as: mineral leasing and development, recreation, lands and realty, and livestock grazing.

2.3.2 Alternative B (Management Plan Alignment)

This alternative is derived from the State conservation plan and a collaborative process with cooperating agencies to support conservation outcomes for greater sage-grouse. SO 3353 directed BLM to collaborate with states and stakeholders to improve compatibility between federal management plans and other plans and programs at the state level, while ensuring consistency with BLM's multiple use mission. This enhanced cooperation between BLM and the Governor's office will lead to improved management and coordination across the range of greater Sage-grouse. This alternative aligns the BLM with the State of Nevada's conservation plan in regards to habitat management area mapping, adaptive management, mitigation, and seasonal timing restrictions.

2.4 Comparative Summary of Alternatives (NOTE: BLM Nevada and California's GIS staff is currently working on updating these figures.)

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006327

AMERICAN OVERSIGHT

Topic	2015 ARMPA Decision Number	Alternative A (No Action)	Alternative B (Management Plan Alignment)
Issue: Modifying Habitat Management Area Designations • Need for adjusting habitat management areas so that they conform to management areas identified by the State of Nevada and based on updated information from USGS. This would provide consistency in management across jurisdictions and to third parties operating on public and state or private lands. • Integration of flexibility into the plans to be able to update habitat management areas without the need for a plan amendment. • Maintaining all habitat areas as identified in the ARMPA, including SFAs, which should be provided with the most protections.			
Conform to management areas identified by the States	Appendix A (Maps)	PHMA, GHMA, and OHMA boundaries are based on the 2015 Approved Resource Management Plan Amendment HMA maps (See Appendix X: Maps). • Manage 9,309,400 acres as PHMA • Manage 5,720,600 acres as GHMA • Manage 5,876,600 acres as OHMA	PHMA, GHMA, and OHMA boundaries are based on composite management categories contained within USGS' Spatially explicit modeling of annual and seasonal habitat for greater sage-grouse (Centrocercus urophasianus) in Nevada and Northeastern California—an updated decision-support tool for management (Coates et al. 2016) and adopted by the State of Nevada on December 11, 2015 (See Appendix X: Maps). • Manage X acres as PHMA • Manage X acres as GHMA • Manage X acres as OHMA
Habitat management area flexibility	MD SSS 17	As site-specific GRSG data (habitat assessments, lek counts, telemetry, etc.) is collected, the information will be included into future modeling efforts using the "Spatially Explicit Modeling of Greater Sage-Grouse Habitat in Nevada and Northeastern California" (Coates et al. 2014) to reflect the most up-to-date spatial representation of GRSG habitat categories. Through plan maintenance or plan amendment/revision, as appropriate, and in consultation with the Nevada Department of Wildlife and USFWS, based on the best scientific information, the updated modeling efforts may be adopted and appropriate allocation decisions and management actions will be applied to PHMA, GHMA, and OHMA. Future modeling efforts to incorporate site-specific GRSG data will utilize	Consistent with the State of Nevada's GRSG Conservation Plan (2014, as amended), the habitat management mapping process will be reviewed and refined every 3 to 5 years. New or improved spatial data (e.g., additional GRSG telemetry data, updated or improved vegetation community data) will be incorporated during the refinement process. The review and refinement process will be scientifically based and include review and input from the SETT, NDOW, BLM, USFS, and USFWS. For refinements in California, this process will also include CDFW. Other stakeholders will be encouraged to participate in the process by submitting relevant information to the listed

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006329

Topic	2015 ARMPA Decision Number	Alternative A (No Action)	Alternative B (Management Plan Alignment)
		the same modeling methods (as described under Methods and Results in Coates et al. 2014) used to develop the current Nevada and Northeastern California Subregions' GRSG habitat management categories. The addition of site-specific GRSG data will allow for the refinement of the spatial representation of the GRSG habitat management categories.	agencies. The USGS habitat suitability modeling processes (Coates et al. 2016) will be the basis for future refinements. As these habitat management categories are approved by the State of Nevada and California, adjustments to PHMA, GHMA, and/or OHMA boundaries based on the process described above will be made by the BLM through plan maintenance. Project proposals that are in the middle of a NEPA analysis (e.g., between draft and final) when new maps are adopted will be considered for exemption from using the new map. BLM recognizes that landscape level mapping may not accurately reflect on-the-ground conditions. At the onset of a proposed project, habitat evaluations of the project site and its surrounding areas shall be conducted by a qualified biologist with sage-grouse experience using methods as defined in Stiver et al 2015, or other scientifically valid techniques.
Issue: Removing Sagebrush Focal Area Designations • Do SFAs contribute to achieving conservation outcomes? • Relevance of this habitat designation in the absence of a mineral withdrawal • Constraints on mineral development within SFAs			
SFA	MD SSS 5 Objective Veg 1 MD Fire 2 Objective Fire 2-4 MD Fire 11-12 MD LG 2	Designate 2,797,400 acres as SFA. SFA will be managed as PHMAs, with the following additional management: • Recommended for withdrawal from the General Mining Act of 1872, subject to valid existing rights • Managed as NSO, without waiver, exception, or modification, for fluid mineral leasing • Prioritized for vegetation management and conservation actions in these areas, including, but not	No similar action (no areas would be managed as SFA). Lands previously identified as SFA will be managed according to their underlying habitat management area designation (PHMA, GHMA, or OHMA, as identified under this alternative).

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006330

Topic	2015 ARMPA Decision Number	Alternative A (No Action)	Alternative B (Management Plan Alignment)
	MD LG 3 MD LG 4 MD LG 5 MD LG 11 MD WHB 3-7 MD MR 3 MD MR 4a MD MR 16 MD LR 24 MD MIT 2	limited to land health assessments, wild horse and burro management actions, review of livestock grazing permits/leases, and habitat restoration.	
Issue: Adaptive Management • Ensure Federal, State, and local partners are part of the causal factor analysis process. • Lack of flexibility with implementing and removing hard trigger adaptive management responses. • Incorporate best available science into the land use plan adaptive management strategy.			
Adaptive Management	MD SSS 18 MD SSS 19 MD SSS 20 MD SSS 21 MD SSS 24 Appendix J	A biologically significant unit (see Appendix A; Figure 2-2) that has hit a soft trigger due to vegetation disturbance will be a priority for restoration treatments consistent with Fire and Invasives Assessment Tool (FIAT) (Appendix J). If a soft trigger is reached, the BLM will identify the causal factor and apply additional project-level adaptive management and/or mitigation measures contained in the authorization (and for future similar authorizations), to alleviate the specific or presumptive causes in the decline of GRSG populations or its habitats and include the following: The adjustment in management would be based on the causal factor and would affect only the area being impacted in the lek cluster or other appropriate scale (e.g., BSU) • GRSG populations and habitat would continue to be monitored annually.	A BSU (see Appendix X; Figure X) that has hit a soft or hard trigger due to vegetation disturbance will be a priority for restoration treatments. <u>Soft Trigger Response</u> Consistent with the Department of the Interiors' Adaptive Management Technical Guide (DOI, 2009), if a soft trigger is reached (as specified in Appendix X), the BLM (in coordination with Federal, State, and local partners) will: 1) Identify the causal factor (causal factor analysis process is described in Appendix X). 2) Implement project specific management responses, based on the causal factor(s). These responses would only be applied to all existing and future projects at the

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006331

Topic	2015 ARMPA Decision Number	Alternative A (No Action)	Alternative B (Management Plan Alignment)
		• If the causal factor were not readily discernable, then an interdisciplinary team, including the BLM, Forest Service (as applicable), and state wildlife agency representatives, would identify the appropriate mitigation or adjusted management actions in a timely manner Once a hard trigger has been reached, all responses in Table J-1 and Table J-2 in Appendix J will be implemented. This includes where soft triggers have been reached for both population and habitat. When a hard trigger is hit in a PAC that has multiple BSUs, including those that cross state lines, the WAFWA Management Zone GRSG Conservation Team will convene to determine the cause, will put project level responses in place, as appropriate, and will discuss further appropriate actions to be applied. The team will also investigate the status of the hard triggers in other BSUs in the PAC and will invoke the appropriate plan response. Adopting any further actions at the plan level may require initiating a plan amendment process. The hard and soft trigger data will be analyzed as soon as it becomes available after the signing of the ROD and then at a minimum, analyzed annually thereafter.	scale at which the soft trigger was reached (e.g. lek cluster, BSU). 3. Develop an emergency/contingency response plan based on site specific/local information, in the event that the population and/or habitat in a given lek cluster or BSU continues to decline. Hard Trigger Response: Consistent with the Department of the Interiors' Adaptive Management Technical Guide (DOI, 2009), once a hard trigger has been reached, the BLM will implement the site specific actions outlined in the emergency/contingency response plan developed as part of the soft trigger response. If the hard trigger was reached, but not preceded by a soft trigger or the emergency/contingency response was not developed, the BLM (in coordination with Federal, State, and local partners) will: 1. Identify the causal factor(s) (causal factor(s) analysis process is described in Appendix X) and determine the appropriate response (in cooperation with Federal, State, and local partners) to alleviate the specific or presumptive causes in the decline of GRSG populations or its habitats. 2) Implement management responses, based on the causal factor(s). These responses would only be applied at the scale at which the hard trigger was reached (e.g. lek cluster, BSU). In some instances, BLM may implement

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006332

Topic	2015 ARMPA Decision Number	Alternative A (No Action)	Alternative B (Management Plan Alignment)
			temporary closures (in accordance with 43 CFR Part 8364.1, and as directed under BLM Instruction Memorandum No. 2013-035) to respond to a causal factor(s) that has resulted in a catastrophic event (i.e., a wildfire). No exceptions to allocation decisions in areas (e.g. lek cluster, BSU) that have tripped a hard trigger. If the response is appropriate at the plan level, a plan amendment process may be required to implement the response. The hard and soft trigger data will be analyzed as soon as it becomes available after the signing of the ROD and then at a minimum, analyzed annually thereafter.
Issue: Mitigation • Alignment with the State of Nevada's mitigation strategy to the greatest extent possible.			
Mitigation	MD MIT 1 MD MIT 2 Appendix F Appendix N	In PHMA, in undertaking BLM management actions, and consistent with valid existing rights and applicable law, in authorizing third-party actions that result in habitat loss and degradation, the BLM will require and ensure mitigation that provides a net conservation gain to the species, including accounting for any uncertainty associated with the effectiveness of such mitigation. The project/activity with associated mitigation (such as the use of the State of Nevada Conservation Credit System) will result in an overall net conservation gain to GRSG (see **Appendix F**). In GHMAs, in undertaking BLM management actions, and consistent with valid existing rights and applicable law, in authorizing third-party actions that result in habitat loss and degradation, the BLM will require and ensure	Same as Alternative A, except Appendix F, Mitigation Strategy, would be updated to include the following clarifying language and concepts: (For BLM lands in Nevada only) When authorizing third-party actions, the BLM would apply the mitigation hierarchy as described in the State of Nevada's Greater Sage-Grouse Conservation Plan, section 3.1.2 (2014), which is to "avoid, minimize, and mitigate," impacts to GRSG in PHMA and GHMA, noting this approach is consistent with, and nearly identical to that which is described in the CEQ regulations at 40 CFR 1508.20. When authorizing third-party actions that would result in direct, indirect, or cumulative impacts to GRSG or their habitat, the BLM would require those impacts to be

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006333

Topic	2015 ARMPA Decision Number	Alternative A (No Action)	Alternative B (Management Plan Alignment)
		mitigation that provides a net conservation gain to the species, including accounting for any uncertainty associated with the effectiveness of such mitigation. The project/activity with associated mitigation (such as the use of the State of Nevada Conservation Credit System) in GHMAs will result in an overall net conservation gain to GRSG (see Appendix F, Regional Mitigation Strategy). In Nevada only, the BLM will consult with the Sagebrush Ecosystem Technical Team (SETT) for application of the "avoid, minimize, and compensate" mitigation strategy and the Conservation Credit System developed by the Nevada Natural Heritage Program and the SETT (2014a, 2014b) or other applicable mitigation system such as outlined in Appendix I. This will be to ensure that a net conservation gain of GRSG habitat is achieved in mitigating human disturbances in PHMAs and GHMAs (see Appendix F) on all agency-authorized activities. The specifics of the coordination will be identified in an MOU between the agencies. Subject to valid existing rights and applicable law, authorize locatable mineral development activity, by approving plans of operation and apply mitigation and best management practices that minimize the loss of PHMAs and GHMAs or that enhance GRSG habitat by applying the "avoid, minimize and compensatory mitigation" process through an applicable mitigation system, such as the Nevada Conservation Credit System and exemplified in the Barrick Nevada Sage-Grouse Bank Enabling Agreement (March 2015).	quantified using the State of Nevada's Habitat Quantification Tool (HQT) to ensure consistency in tracking/reporting changes to habitat quality and quantity. When adverse impacts to GRSG and its habitat remain after avoidance and minimization, mitigation would be considered subject to the federal regulations governing the authorization and valid existing rights. When it is determined that an activity requires compensatory mitigation, or a proponent voluntarily offers to conduct compensatory mitigation, the BLM will coordinate with the Sagebrush Ecosystem Technical Team (SETT) regarding use of the Conservation Credit System (CCS) and/or evaluation of other proponent-developed mitigation options. This assumes the evaluation of mitigation options would be evaluated using HQT.

AMERICAN OVERSIGHT

Topic	2015 ARMPA Decision Number	Alternative A (No Action)	Alternative B (Management Plan Alignment)
		In Nevada, coordinate with the SETT on the application of a compensatory mitigation program, such as the Nevada Conservation Credit System (CCS) (Appendix N) for mitigating activities that result in habitat loss and degradation of GRSG habitat in Nevada, where the application of compensatory mitigation will occur on or the credit will be applied to disturbance on BLM-administered lands. Identify compensatory mitigation areas in PHMAs and GHMAs with the potential to achieve GRSG habitat objectives (Table 2 2), in accordance with FIAT, the SFA prioritization, and the State of Nevada Strategic Action Plan.	
Issue: Allocation Exception Process • Simplify the various exception processes in the plan amendment. • Address inflexible use of landscape-scale mapping of PHMA, GHMA, and OHMA in regards to the application of land use plan allocations and stipulations. • Unnecessary constraints related to public works projects • Lack of flexibility associated with land disposals			
Allocation Exception Process	MD MR 4a MD MR 3 MD MR 21 MD RE 4 MD LR 21 MD REC 3 Appendix G	(Geothermal) For BLM land in the state of Nevada only, in the portions of the PHMAs outside of SFA, geothermal projects may be considered for authorization if all of the following conditions are met: • A team comprised of BLM, FWS, and NDOW specialists advises the BLM State Director on appropriate mitigation measures for the project and its ancillary facilities, including lek buffer distances using the best available science; • Mitigation actions are consistent with this Plan's mitigation strategy such as the Nevada Conservation Credit System, and	In PHMA and GHMA, the State Director may grant an exception to the land use plan allocations and stipulations described in Section 2-5 if one of the following applies (in coordination with NDOW and/or CDFW): i. The location of the proposed authorization is determined to be non-habitat (by a qualified biologist with sage-grouse experience using methods as defined in Stiver et al 2015, or other scientifically valid techniques) and would not result in direct, indirect, or cumulative impacts

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006335

Topic	2015 ARMPA Decision Number	Alternative A (No Action)	Alternative B (Management Plan Alignment)
		• The footprint of the project is consistent with the disturbance management protocols identified in this plan (see MD SSS 2 and Appendix E) (Salable Minerals) PHMAs are closed to new mineral material sales (see Appendix A; Figure 2-6). However, these areas remain open to free use permits and the expansion of existing active pits, if requirements in MD MR 20 can be met [Objective SSS 4 and apply MDs SSS 1 through SSS 4]. (Oil and Gas) In PHMAs outside of SFA, no waivers or modifications to an oil and gas lease no-surface-occupancy stipulation will be granted. In PHMAs, the Authorized Officer may grant an exception to an oil and gas lease no-surface-occupancy stipulation only where the proposed action: i. Will not have direct, indirect, or cumulative effects on GRSG or its habitat; or, ii. Is proposed to be undertaken as an alternative to a similar action occurring on a nearby parcel, and will provide a clear conservation gain to GRSG. Exceptions based on conservation gain (ii) may only be considered in (a) PHMAs of mixed ownership where federal minerals underlie less than fifty percent of the total surface, or (b) Areas of the public lands where the proposed exception is an alternative to an action occurring on a nearby parcel subject to a valid federal oil and gas lease existing as of the date of this RMP amendment. Exceptions based on conservation gain must also include measures, such as enforceable institutional controls and	on GRSG and its habitat. Management direction would not apply to those areas of non-habitat; ii. Impacts from the proposed action could be offset through the use of the mitigation hierarchy (avoid, minimize, mitigate) to achieve a net conservation gain and demonstrate that the individual and cumulative impacts of the project would not result in habitat fragmentation or other impacts that would cause sage-grouse populations to decline (State plan 2014, pg 15). iii. The proposed action must be authorized to address public health and safety concerns, specifically as they relate to local, state, and national priorities. iv. Renewals or re-authorizations of existing infrastructure in previously disturbed sites or expansions of existing infrastructure that do not result in direct, indirect, or cumulative impacts on GRSG and its habitat. v. Land tenure exceptions would be considered for lands identified for disposal or exchange in previous RMPs as part of the due process of carrying out Congressional Acts (e.g., the respective Lincoln and White Pine County Conservation, Recreation, and Development Acts) or the agency can demonstrate that the disposal, including land exchanges, will have no direct or indirect adverse impact on conservation of the GRSG.

AMERICAN OVERSIGHT

Topic	2015 ARMPA Decision Number	Alternative A (No Action)	Alternative B (Management Plan Alignment)
		buffers, sufficient to allow the BLM to conclude that such benefits will endure for the duration of the proposed action's impacts (see Appendix G). Any exceptions to this lease stipulation may be approved by the Authorized Officer only with the concurrence of the State Director. The Authorized Officer may not grant an exception unless the applicable state wildlife agency, the USFWS, and the BLM unanimously find that the proposed action satisfies (i) or (ii). Such finding shall initially be made by a team of one field biologist or other GRSG expert from each respective agency. In the event the initial finding is not unanimous, the finding may be elevated to the appropriate BLM State Director, USFWS State Ecological Services Director, and state wildlife agency head for final resolution. In the event their finding is not unanimous, the exception will not be granted. Approved exceptions will be made publicly available at least quarterly. (Wind Energy) Within PHMAs, wind facilities associated with existing industrial infrastructure (e.g., a mine site) to provide on-site power generation could be considered for approval, subject to a net conservation gain. (Land Tenure) Lands classified as PHMAs and GHMAs for GRSG will be retained in federal management, unless: (1) the agency can demonstrate that disposal of the lands, including land exchanges, will provide a net conservation gain to GRSG or (2) the agency can demonstrate that the disposal, including land exchanges, of the lands will have no direct or indirect adverse impact on conservation of the GRSG (see Appendix A; Figure 2-12).	

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006337

Topic	2015 ARMPA Decision Number	Alternative A (No Action)	Alternative B (Management Plan Alignment)
		(Recreation) In PHMA, do not construct new recreation facilities (e.g., campgrounds, trails, trailheads, staging areas) unless the development will have a net conservation gain to GRSG and its habitat (such as concentrating recreation, diverting use away from critical areas, etc.), or unless the development is required for visitor health and safety or resource protection.	
Issue: Seasonal Timing Restrictions • Alignment with the State's conservation plan to the greatest extent possible. • Consider exceptions and/or modifications to seasonal timing restrictions to allow for beneficial habitat improvement projects to occur in a timely manner. • Seasonal timing restrictions need to be adjusted to allow for urgent public health and safety concerns to be addressed without delay.			
Seasonal Timing Restrictions	MD SSS 2E MD SSS 3D Appendix G	Seasonal restrictions will be applied during the periods specified below to manage discretionary surface-disturbing activities and uses on public lands (i.e., anthropogenic disturbances) that are disruptive to GRSG, to prevent disturbances to GRSG during seasonal life-cycle periods. 1. In breeding habitat within 4 miles of active and pending GRSG leks from March 1 through June 30: a. Lek—March 1 to May 15 b. Lek hourly restrictions—6 p.m. to 9 a.m. c. Nesting—April 1 to June 30 2. Brood-rearing habitat from May 15 to September 15 a. Early—May 15 to June 15 b. Late—June 15 to September 15 3. Winter habitat from November 1 to February 28	Same as alternative A, except: The seasonal dates may be modified or removed (in coordination with NDOW and/or CDFW) based on site-specific information that indicates: i. A project proposal's NEPA document and/or project record, and correspondence from NDOW and/or CDFW, ensures that any modification (shortening/extending seasonal timeframes or waiving the seasonal timing restrictions all together) is justified on the basis that it serves to better protect or enhance GRSG and its habitat than if the strict application of seasonal timing restrictions are implemented. Under this scenario modifications can occur if: a) A proposed authorization would have beneficial or negligible impacts to GRSG.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006338

Topic	2015 ARMPA Decision Number	Alternative A (No Action)	Alternative B (Management Plan Alignment)
		The seasonal dates may be modified due to documented local variations (e.g., higher/lower elevations) or annual climatic fluctuations (e.g., early/late spring, long/heavy winter), in coordination with NDOW and California Department of Fish and Wildlife (CDFW), in order to better protect GRSG and its habitat. Footnote: The conditions would not be applicable to vegetation treatments being conducted to enhance GRSG habitat, with exceptions for seasonal restrictions and noise.	b) There are documented local variations (e.g., higher/lower elevations) and/or annual climatic fluctuations (e.g., early/late spring, long/heavy winter) that indicate that the GRSG are not using the area during a given seasonal life cycle period. ii. Modifications are needed to address an urgent public health and safety concern in a timely manner (e.g. maintaining a road impacted by flooding).
ISSUE: Modifying Habitat Objectives • Consideration of local conditions. • Consistency with State of Nevada's Habitat Objectives			
Modifying Habitat Objectives	No similar action.	No similar action.	Habitat objectives (desired conditions) will be revised periodically by a team consisting of at least representatives from the SETT, USFWS, NDOW, CDFW, USFS, USGS, and BLM. The team will review the best available science and make adjustments based on regionally and locally derived data. As these desired conditions (habitat objectives) are updated, adjustments will be made by the BLM through plan maintenance.

AMERICAN OVERSIGHT

2.6 PLAN EVALUATION, MONITORING, AND ADAPTIVE MANAGEMENT

Plan evaluation is the process by which the plan and monitoring data are reviewed to determine if management goals and objectives are being met and if management direction is sound. Land use plan evaluations determine if decisions are being implemented, if mitigation measures are satisfactory, if there are significant changes in the related plans of other entities, if there is new data of significance to the plan, and if decisions should be amended or revised.

Monitoring data gathered over time is examined and used to draw conclusions on whether management actions are meeting stated objectives, and if not, why not. Conclusions are then used to make recommendations on whether to continue current management or to identify what changes need to be made in management practices to meet objectives. The BLM will use land use plan evaluations to determine if the decisions in the ARMPA, supported by the accompanying NEPA analysis, are still valid in light of new information and monitoring data. Evaluations will follow the protocols established by the BLM Land Use Planning Handbook (H-1601-1) or other appropriate guidance in effect at the time the evaluation is initiated.

The ARMPA also includes an adaptive management strategy that includes soft and hard triggers and responses. These triggers are not specific to any particular project but identify habitat and population thresholds. Triggers are based on the two key metrics that are being monitored during the life of the ARMPA: habitat loss and population declines. Soft triggers represent an intermediate threshold indicating that management changes are needed at the implementation level to address habitat or population losses. If a soft trigger were tripped during the life of the plans, the BLM's response would be to apply more conservative or restrictive conservation measures to mitigate for the specific cause in the decline of populations or habitats, with consideration of local knowledge and conditions. These adjustments will be made to preclude tripping a "hard" trigger (which signals more severe habitat loss or population declines). Hard triggers represent a threshold indicating that immediate action is necessary to stop a severe deviation from GRSG conservation objectives set forth in the ARMPA. In the event that new scientific information becomes available demonstrating that the response to the hard trigger would be insufficient to stop a severe deviation from GRSG conservation objectives set forth in the ARMPA, the BLM would implement interim management direction to ensure that conservation options are not foreclosed. The BLM would also undertake any appropriate plan amendments or revision if necessary. More information regarding the ARMPA's adaptive management strategy can be found in Appendix X.

CHAPTER 1
PURPOSE OF AND NEED FOR ACTION

1.1 INTRODUCTION

Greater sage-grouse is a state-managed species dependent on sagebrush steppe ecosystems which are managed in partnership across its range by federal, state and local authorities. State agencies responsible for fish and wildlife management possess broad powers for the protection and management of fish, wildlife and plants within their borders, except where preempted by federal law. Similarly, the United States (US) Department of Interior (DOI) has broad responsibilities to manage federal lands and resources for the public's benefit. Approximately half of greater sage-grouse habitat is managed by the BLM and US Forest Service (Forest Service).

State agencies are at the forefront of efforts to maintain healthy fish and wildlife populations and to conserve at-risk species. State-led efforts to conserve the species and its habitat date back to the 1950s. For the past two decades, state wildlife agencies, federal agencies, and many others in the range of the species have been collaborating to conserve greater sage-grouse and its habitats.

In response to a 2010 determination by the US Fish and Wildlife Service (USFWS) that the listing of the greater sage-grouse under the Endangered Species Act was "warranted, but precluded" by other priorities, the BLM in coordination with the DOI and the US Department of Agriculture developed a management strategy that included targeted sage-grouse management actions. In 2015, the agencies adopted amendments and revisions to 98 BLM and Forest Service land use plans (LUPs) across ten western states. These LUPs addressed, in part, threats to the greater sage-grouse and its habitat. These plans govern the management of 67 million acres of greater sage-grouse habitat on federal lands.

In September 2015, the USFWS determined that the greater sage-grouse did not warrant listing under the Endangered Species Act of 1973. The USFWS attributed it's 2010 "warranted but precluded" determination primarily to "inadequate regulatory mechanisms." In concluding "not warranted" in 2015, the USFWS based its decision in part on regulatory certainty from the

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006347

conservation commitments and management actions in the federal LUP amendments (LUPAs) and revisions, as well as on other private, state, and federal conservation efforts.

The BLM is currently implementing the 2015 greater sage-grouse plans. The plans recommended that sagebrush focal areas (SFA) be proposed for withdrawal; however, this proposed withdrawal was cancelled on October 11, 2017.

On March 29, 2017, the Secretary of the Interior (Secretary) issued Secretarial Order (SO) 3349 ordering agencies to reexamine practices "to better balance conservation strategies and policies with the equally legitimate need of creating jobs for hard-working Americans families." On June 7, 2017, the Secretary issued SO 3353 with a purpose of enhancing cooperation among eleven western states and the BLM in managing and conserving greater sage-grouse. Secretarial Order 3353 directed an Interior Review Team consisting of the BLM, USFWS, and US Geological Survey (USGS) to coordinate with the Sage-grouse Task Force and review the 2015 greater sage-grouse plans and associated policies to identify provisions that may require modification to make the plans more consistent with the individual state plans and better balance the BLM's multiple-use mission as directed by SO 3349 "American Energy Independence." On August 4, 2017, the Interior Review Team submitted its "Report in Response to Secretarial Order 3353." This report made recommendations for modifying the sage-grouse plans and associated policies to better align with the individual state plans. On August 4, 2017, the Secretary issued a memo to the Deputy Secretary directing the BLM to implement the recommendations found in the report.

Consistent with the report, the BLM published a Notice of Intent titled "Notice of Intent to Amend Land Use Plans Regarding Greater Sage-Grouse Conservation and Prepare Associated Environment Impact Statements or Environmental Assessments" in the Federal Register on October 11, 2017. During this public scoping period, the BLM sought public comments on whether all, some, or none of the 2015 greater sage-grouse plans should be amended, what issues should be considered, and if plans should be completed at the state level rather than at the national level. In addition, the BLM recognizes that greater sage-grouse is a state managed species dependent on sagebrush steppe habitats managed in partnership between federal, state and local authorities. Input from state governors would weigh heavily when considering what management changes should be made and when ensuring consistency with the BLM's multiple-use mission.

On March 31, 2017, the United States District Court for the District of Nevada held that the BLM violated the NEPA by failing to prepare a supplemental Environmental Impact Statement (EIS) for the designation of SFA in the Nevada and Northeastern California Greater Sage-Grouse Resource Management Plan (RMP) Amendment in Nevada. This action will respond to the court's request to analyze the inclusion of SFA.

1.2 Purpose of and Need for Action

The BLM is preparing this land use plan amendment in response to SO 3353 and in accordance with SO 3349. The purpose of this action is to continue conserving, enhancing, and restoring greater sage-grouse and their habitat while improving coordination with state management strategies for greater sage-grouse. Using its discretion and authority under Federal Land Policy and Management Act (FLPMA), BLM proposes modifying greater sage-grouse habitat

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006348

management within existing land-use plans to improve alignment with individual state plans or management strategies while balancing BLM's multiple-use and sustained yield mission.

1.3 Planning Area and Current Management

The planning area boundary includes all lands regardless of jurisdiction (see **Figure 1-1**, Planning Area). **Table 1-1**, Land Management in the Planning Area, outlines the number of surface acres that are administered by specific federal agencies, states, and local governments and lands that are privately owned in the planning area. It includes other BLM-administered lands that are not allocated as habitat management areas for greater sage-grouse. The 2015 ARMPA did not establish any additional management for these lands, which will continue to be managed according to the existing, underlying land use plan for the areas.

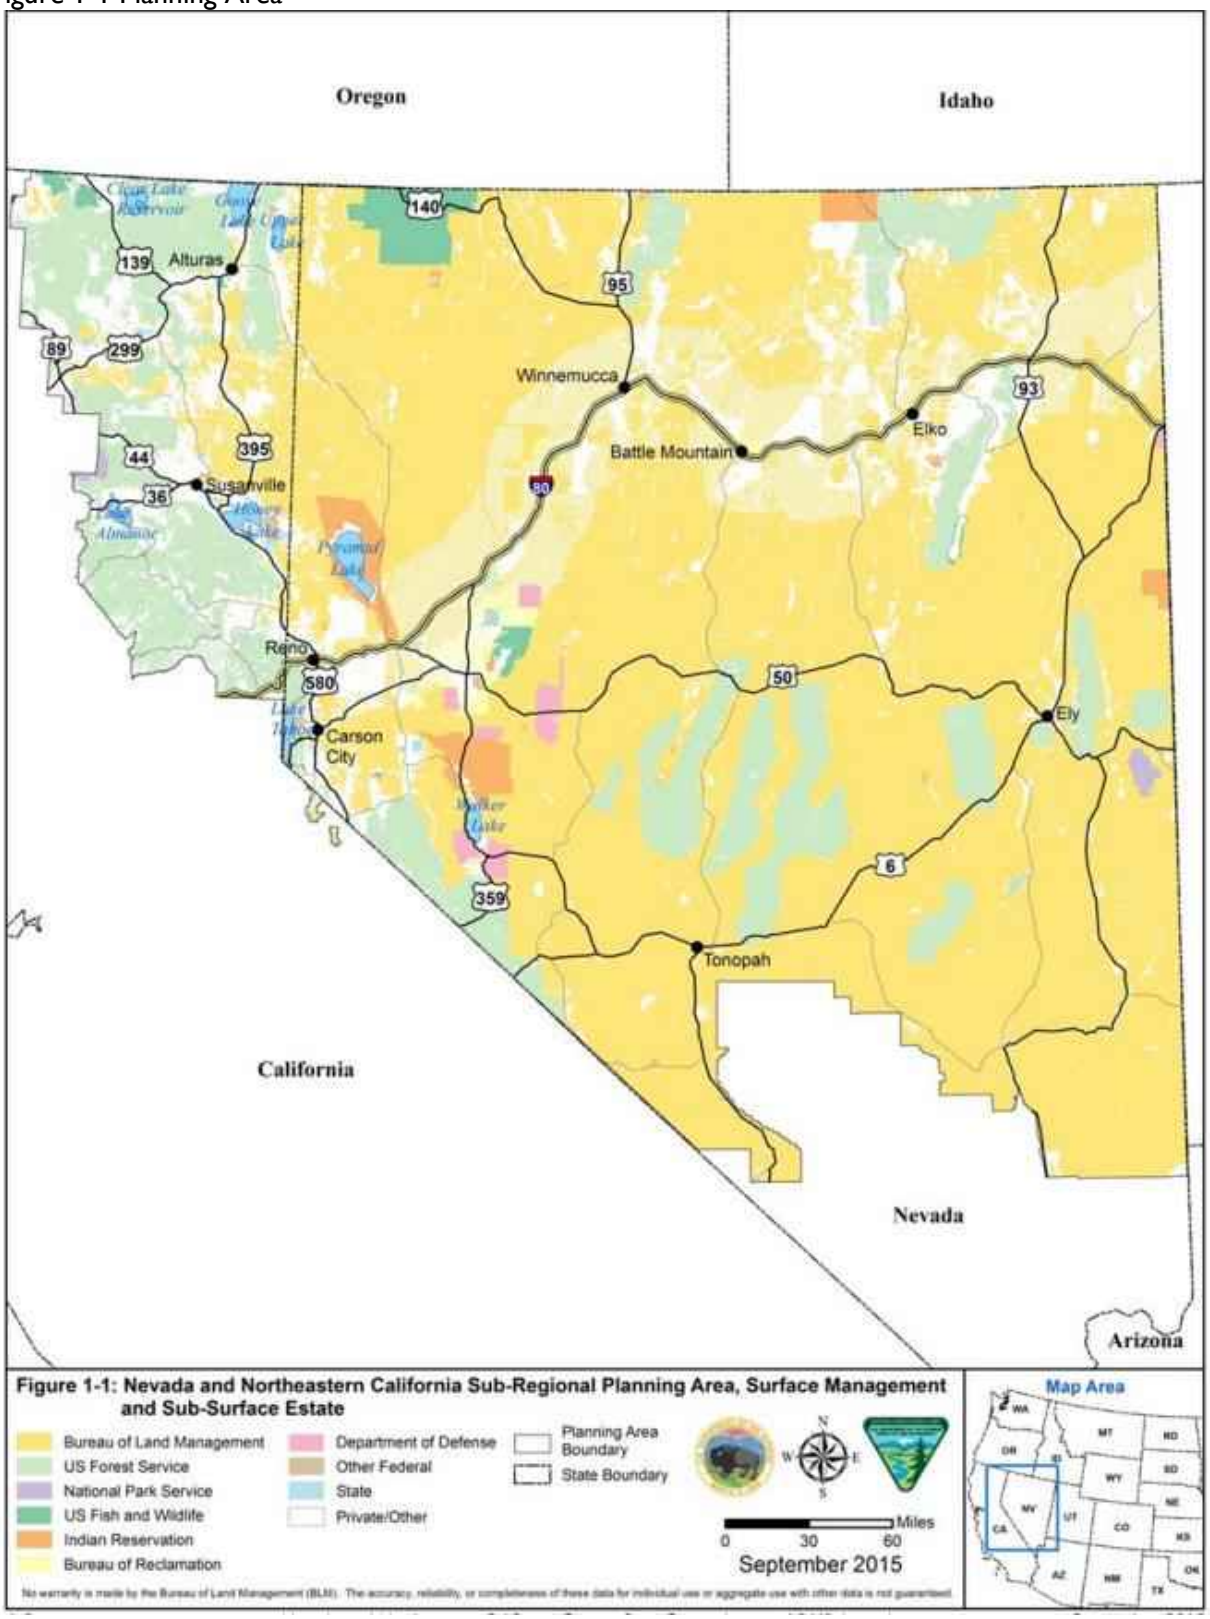

Table 1-1
Land Management in the Planning Area

Surface Land Management	Total Surface Land Management Acres
BLM	45,359,000
Forest Service	9,719,900
Private	11,857,800
Indian reservation	922,000
USFWS	805,900
Other	326,100
State	195,600
National Park Service	160,100
Other federal	3,200
Bureau of Reclamation	431,200
Local government	17,800
Department of Defense	402,000
Total acres	**70,200,600**

1.4 PLANNING CRITERIA

Planning criteria establish constraints, guidelines, and standards for the planning process and help the BLM define the scope of the planning effort and estimate the extent of data collection and analysis. The following criteria are based on standards prescribed by applicable laws and regulations; agency guidance; results of consultation and coordination with the public and other federal, state, and local agencies, analysis pertinent to the planning area; and professional judgment.

The BLM has identified these planning criteria:

- The BLM will comply with all laws, regulations, policies, and guidance related to public lands management and implementing NEPA on BLM-administered lands.
- Greater sage-grouse is a state-managed species dependent on sagebrush steppe habitats managed in partnership by federal, state and local authorities. State game and fish agencies' greater sage-grouse data and expertise will be used to the fullest extent practicable in making management determinations on BLM-administered lands.
- Lands addressed in the RMPA will be BLM-administered land in greater sage-grouse habitats, including surface and split-estate lands with federal subsurface mineral rights. Any decisions in the RMPA will apply only to BLM-administered lands.
- This RMPA will comply with Secretarial orders, including 3353 (Greater Sage-Grouse Conservation and Cooperation with Western States), which strives for compatibility with state conservation plans.
- This RMPA will incorporate, as appropriate, information in a USGS report that identified and annotated greater sage-grouse science published since January 2015 (Carter et al. 2018) and a report that synthesized and outlined the potential management implications of this new science (Hanser et al. 2018).
- This RMPA will comply with BLM Manual 6840, Special Status Species Management.
- This RMPA will recognize valid existing rights.
- All activities and uses within greater sage-grouse habitats will follow existing land health standards.
- Where more restrictive land use allocations or decisions are in effect for other resources (e.g., WSAs, ACECs, cultural resources, riparian areas) under existing RMPs, those more restrictive land use allocations or decisions will not be amended by this RMPA.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006351

1.5 Issues and Related Resource Topics Identified Through Scoping

An issue is a point of disagreement, debate, or dispute regarding an anticipated outcome from a proposed action. Issues are based on anticipated environmental effects; as such, issues can help shape the proposal and alternatives. The BLM used internal, agency, and public scoping to identify issues to consider in the environmental analysis. A summary of the scoping process is presented in a report titled "Potential Amendments to Land Use Plans Regarding Greater Sage-Grouse Conservation Scoping Report" (https://goo.gl/FopNgW). When determining whether to retain an issue for more detailed analysis in this Draft RMPA/EIS, the interdisciplinary team considered, among other things, the following:

- The environmental impacts associated with the issue and the threats to species and habitat associated with the issue are central to development of a greater sage-grouse management plan or of critical importance
- A detailed analysis of environmental impacts related to the issue is necessary to make a reasoned choice between alternatives
- The environmental impacts associated with the issue are a significant point of contention among the public or other agencies
- There are potentially significant impacts on resources associated with the issue

Ultimately, it is important for decision-makers and the public to understand the impacts that each of the alternatives would have on specific resources; therefore, the BLM uses resource topics as a heading to indicate which resources would be affected by a management change. Importantly, resource topics will help organize the discussions of the affected environment (**Chapter 3**) and environmental consequences (**Chapter 4**).

The sections below lay out how issues raised during scoping, as well as related resource topics, are considered in this EIS. Generally, they fall into the following categories:

- Issues and related resource topics retained for further consideration in this Draft RMPA/EIS. These were issues raised during scoping that are retained in this Draft RMPA/EIS and for which alternatives will be developed to address the issues. In some cases, the resolution in the alternatives were previously analyzed in the 2015 Final EIS. In other cases, additional analysis is needed in this EIS. Because the issues are analyzed under resource topics in 2015, the resource topics corresponding with those retained for further analysis are also considered in this EIS. Just like issues, they may have been analyzed in the 2015 Final EIS for those decisions being included in this EIS.
- Clarification of decisions in the 2015 ARMPA. This section describes decisions or frameworks in the 2015 ARMPA that require clarification as to their application or implementation. No

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006352

new analysis is required, as the intentions behind the decisions were analyzed in the 2015 Final EIS.

- Issues and resource topics not carried forward for additional consideration or analysis. These are issues brought up during scoping that are not carried forward in this EIS. While some of these issues are considered in this EIS, they do not require additional analysis because they were analyzed in the 2015 Final EIS. Others are not carried forward in this EIS because they do not further the purpose of aligning with the State's conservation plan. Similar to issues, there are resource topics that are not retained for further analysis in this EIS. This is because either they are not affected by the changes proposed in **Chapter 2** or because the effect was analyzed in the 2015 Final EIS.

1.5.1 Issues and Related Resource Topics Retained for Further Consideration in this Draft RMPA/EIS

Table 1-1 summarizes those issues identified through scoping and that have been retained for consideration and additional discussion in **Chapters 3** and **4**.

Based on these issues identified in **Table 1-2** that have not been previously analyzed, the resource topics that have the potential to be significantly impacted are: greater sage-grouse, vegetation (including weeds and special status vegetation), land use and realty, renewable energy, minerals and energy, socioeconomics, and livestock grazing. Therefore, these resource topics are carried forward for detailed analysis.

Table 1-1 identifies the corresponding resource topics to which the issues relate. The level of detail in the description of each resource topic and the effects from implementing any of the alternatives also are described in **Chapters 3** and **4**.

Table 1-2
Issues and Related Resource Topics

Issues	Resource Topics Related to the Issues
Modifying Habitat Boundary Designations ● Need for adjusting habitat management areas so that they conform with management areas identified by the states. This would provide consistency in management across jurisdictions and to third parties operating on public and state or private lands. ● Integration of flexibility into the plans to be able to adjust habitat management areas without the need for a plan amendment ● Maintaining all habitat areas as identified in the ARMPA, including SFAs, which should be provided with the most protections.	All, except for livestock grazing

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006353

Table 1-2
Issues and Related Resource Topics

Issues	Resource Topics Related to the Issues
Removing Sagebrush Focal Area Designations • Do SFAs contribute to achieving conservation outcomes? • Relevance of this habitat designation in the absence of a mineral withdrawal • Constraints on mineral development within SFAs	All, except for livestock grazing
Adaptive Management • Ensure Federal, State, and local partners are part of the casual factor analysis process. • Lack of flexibility with implementing and removing hard trigger adaptive management responses. • Incorporate best available science into the land use plan adaptive management strategy.	All
Allocation Exception Process • Simplify the various exception processes in the plan amendment. • Address inflexible use of landscape-scale mapping of PHMA, GHMA, and OHMA in regards to the application of land use plan allocations and stipulations. • Unnecessary constraints related to public works projects • Lack of flexibility associated with land disposals	All
Mitigation • Alignment with the State's mitigation strategy to the greatest extent possible.	All
Seasonal Timing Restrictions • Alignment with State's conservation plan to the greatest extent possible. • Consider exceptions and/or modifications to seasonal timing restrictions to allow for beneficial habitat improvement projects to occur in a timely manner. • Seasonal timing restrictions need to be adjusted to allow for urgent public health and safety concerns to be addressed without delay.	All
Modifying Habitat Objectives • Consideration of local conditions. • Consistency with State of Nevada's Habitat Objectives	All

1.5.2 Clarification of Planning Decisions in the 2015 ARMPA

The following issues with existing planning decisions were raised during scoping. These issues require clarification to language in the ARMPA but do not require new analysis. The clarifying language for these planning decisions is displayed in this planning document to communicate how these issues are being addressed.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006354

Table 1-3
Issues and Related Resource Topics

Issue	Area in Draft LUPA where Clarification is Provided or if this Issue is Addressed through Policy/Implementation
Modifying Lek Buffers • Clarification regarding the application of lek buffer distances.	Appendix X
Fire and Invasive Grasses and Weeds • Provide the necessary prioritization of all three aspects of fire management: pre-suppression, suppression, and rehabilitation and find ways to expedite on the ground treatments to address this present and widespread threat in the Nevada and Northeastern California Sub-region.	Policy/Implementation
Increase Opportunities for Outcome Based Grazing • Identify and complete a number of authorizations to support the development of rigorous and defensible Outcome-Based Grazing.	Policy/Implementation
Changing Requirements for Design Features • Ensure consistency with the State's conservation plan's Design Features and Management Actions. • Clarify the application of required design features.	Appendix X

1.5.3 Issues and Resource Topics Not Carried Forward for Additional Analysis (scoping issues outside the scope and scoping issues previously analyzed)

Issues and Related Resource Topics Not Carried Forward for Additional Analysis

Population-based management was raised as an issue for consideration during scoping for this EIS. It is not carried forward for detailed analysis because the BLM does not manage species populations, an authority that falls under the jurisdiction of the State of Nevada and California.

Because the following issues were analyzed in the 2015 Final EIS, and no significant new information has emerged, they do not require additional analysis in this EIS. These issues were analyzed under most resource topics in the 2015 Final EIS. The related resource topics are dismissed from additional analysis. The types of impacts on these resources are described in the range of alternatives in the 2015 Final EIS. The impacts of implementing the alternatives in this Draft RMPA/EIS are within the range of alternatives previously analyzed. Therefore, these resource topics are not carried forward for additional analysis in this Draft RMPA/EIS.

- Effects of NSO stipulations on greater sage-grouse habitat on non-BLM land
- Mitigation for oil and gas development
- Prioritization of fluid mineral leases outside of PHMA and GHMA
- Numerical noise limitations within PHMA

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006355

- Contribution of disturbance caps toward greater sage-grouse conservation objectives
- Vegetation treatments and wildfire response
- Habitat assessment framework
- Mitigation standard

The following issues were evaluated as part of the 2015 LUPA. For the same reasons they were dismissed in the 2015 LUPA, similarly they are not carried forward for detailed analysis in this EIS:

- Hunting greater sage-grouse
- Predator control
- Aircraft overflights in PHMA/GHMA

Resource Topics Not Carried Forward for Additional Analysis

The resource topics below are dismissed from detailed analysis because they have no potentially significant impacts from actions proposed in this EIS:

- Geology
- Indian Trust Resources
- Noise
- Air Quality and Visibility
- Special Designations (e.g., areas of critical environmental concern, research natural areas, wilderness, wilderness study areas, wild and scenic rivers, and national trails)
- Environmental Justice
- Wildland Fire and Fire Management*
- Wild Horses and Burros
- Recreation
- Comprehensive Travel and Transportation Management
- Visual Resources
- Water Resources
- Soil Resources
- Cultural and Heritage Resources
- Lands with Wilderness Characteristics

1.6 Relationship to Other Policies, Plans, and Programs

The BLM recognizes the importance of state and local plans. The BLM will work to be consistent with or complementary to the management actions in these plans whenever possible.

AMERICAN OVERSIGHT

1.6.1 State Plans

State plans considered during this planning effort are the following:

- Nevada's 2003 Statewide Comprehensive Outdoor Recreation Plan—Assessment and Policy Plan (Nevada Department of Conservation and Natural Resources 2003)
- Nevada Comprehensive Preservation Plan (Nevada State Historic Preservation Office 2003)
- Nevada Sage-Grouse Conservation Strategy (State of Nevada 2001, 2004, 2012)
- Nevada Sage-Grouse Conservation Plan (State of Nevada 2014)
- Nevada's Coordinated Invasive Weed Strategy (Nevada Weed Action Committee 2000)
- Nevada Division of State Lands, Lands Identified for Public Acquisition (Nevada Department of Conservation & Natural Resources 1999)
- State of Nevada Drought Plan (Nevada Department of Conservation and Natural Resources 1993)
- Nevada Division of State Lands, Nevada Statewide Policy Plan for Public Lands (Nevada Department of Conservation & Natural Resources 1985)

1.6.2 Local Plans

Local land use plans considered during this planning effort are the following:

- Carson City Comprehensive Master Plan, Nevada (Carson City 2006)
- Churchill County Master Plan, Nevada (Churchill County 2010)
- Churchill County Water Resource Plan, Nevada (Churchill County 2007)
- City of Caliente Master Plan, Nevada (City of Caliente 2011)
- Douglas County Comprehensive Master Plan, Nevada (Douglas County 2012)
- Douglas County Open Space Plan, Nevada (Douglas County 2007)
- Elko County General Open Space Plan, Nevada (Elko County 2003)
- Elko County Public Lands Policy Plan, Nevada (Elko County 2008)
- Elko County Water Resource Management Plan, Nevada (Elko County 2007)
- Esmeralda County Master Plan, Nevada (Esmeralda County 2011)
- Esmeralda County Public Lands Policy Plan, Nevada (Esmeralda County 2013)
- Eureka County Master Plan, Nevada (Eureka County 2010)
- Humboldt County Master Plan, Nevada (Humboldt County 2002)
- Humboldt County Master Plan Open Space Element Amendment, Nevada (Humboldt County 2003)
- Lander County Master Plan, Nevada (Lander County 2010)

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006357

- Lander County Policy Plan for Federally Administered Lands, Nevada (Lander County 2005) Lander County Water Resources Plan, Nevada (Lander County 2011)
- Lassen County Fire Safe Plan, California (Lassen County 2012)
- Lassen County General Plan, California (Lassen County 1999)
- Lincoln County Master Plan, Nevada (Lincoln County 2007)
- Lincoln County Open Space and Community Lands Plan, Nevada (Lincoln County 2011)
- Lincoln County Public Lands Policy Plan, Nevada (Lincoln County 2010)
- Lyon County Comprehensive Master Plan, Nevada (Lyon County 2010)
- Modoc County General Plan, California (Modoc County 1988)
- Nye County Comprehensive Master Plan, Nevada (Nye County 2011)
- Pershing County Master Plan, Nevada (Pershing County 2002)
- Pershing County Natural Resources Management Plan: Natural Resources and Federal or State Land Use, Nevada (Pershing County 2010)
- Shasta County General Plan, California (Shasta County 2004)
- Siskiyou County General Plan, California (Siskiyou County 2010)
- Storey County Master Plan, Nevada (Storey County 1994)
- Title 7 of the Nye County Code (Comprehensive Land Use and Management Plan for Federal and State Lands within Nye County), Nevada (Nye County 2009)
- Tri-Party Framework for Interactions to Address Public Lands Issues in Nye County, Nevada (includes Nye County, the BLM, and Forest Service), Nevada (Nye County1996)
- Truckee Meadows Regional Plan (Washoe County Only), Nevada (TMRPA 2007)
- Washoe County Comprehensive Plan, Nevada (Washoe County 2005a)
- Washoe County Open Space & Natural Resource Management Plan, Nevada (Washoe County 2008)
- Washoe County Water Resources Management Plan, Nevada (Washoe County 2005b)
- White Pine County Comprehensive Master Plan, Nevada (White Pine County 2009) White Pine County Public Lands Policy Plan, Nevada (White Pine County 2007)

Appendix J
Adaptive Management Plan

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

APPENDIX J
ADAPTIVE MANAGEMENT PLAN

INTRODUCTION

Adaptive management is a decision process that promotes flexible resource management decision-making. These decisions can be adjusted in the face of uncertainties as outcomes from management actions and other events become better understood. Carefully monitoring these outcomes both advances scientific understanding and helps with adjusting resource management directions as part of an iterative learning process.

On February 1, 2008, the Department of the Interior published its Adaptive Management Implementation Policy (522 DM 1). The adaptive management strategy presented in this LUPA EIS complies with this policy and direction.

In relation to the BLM's National Greater Sage-Grouse Planning Strategy, adaptive management would help identify if GRSG conservation measures presented in this LUPA EIS contain the needed level of certainty for effectiveness. Principles of adaptive management are incorporated into the conservation measures in the plan to lessen threats to GRSGs and their habitat, thereby increasing the likelihood that the conservation measures and plan would be effective in reducing threats to them.

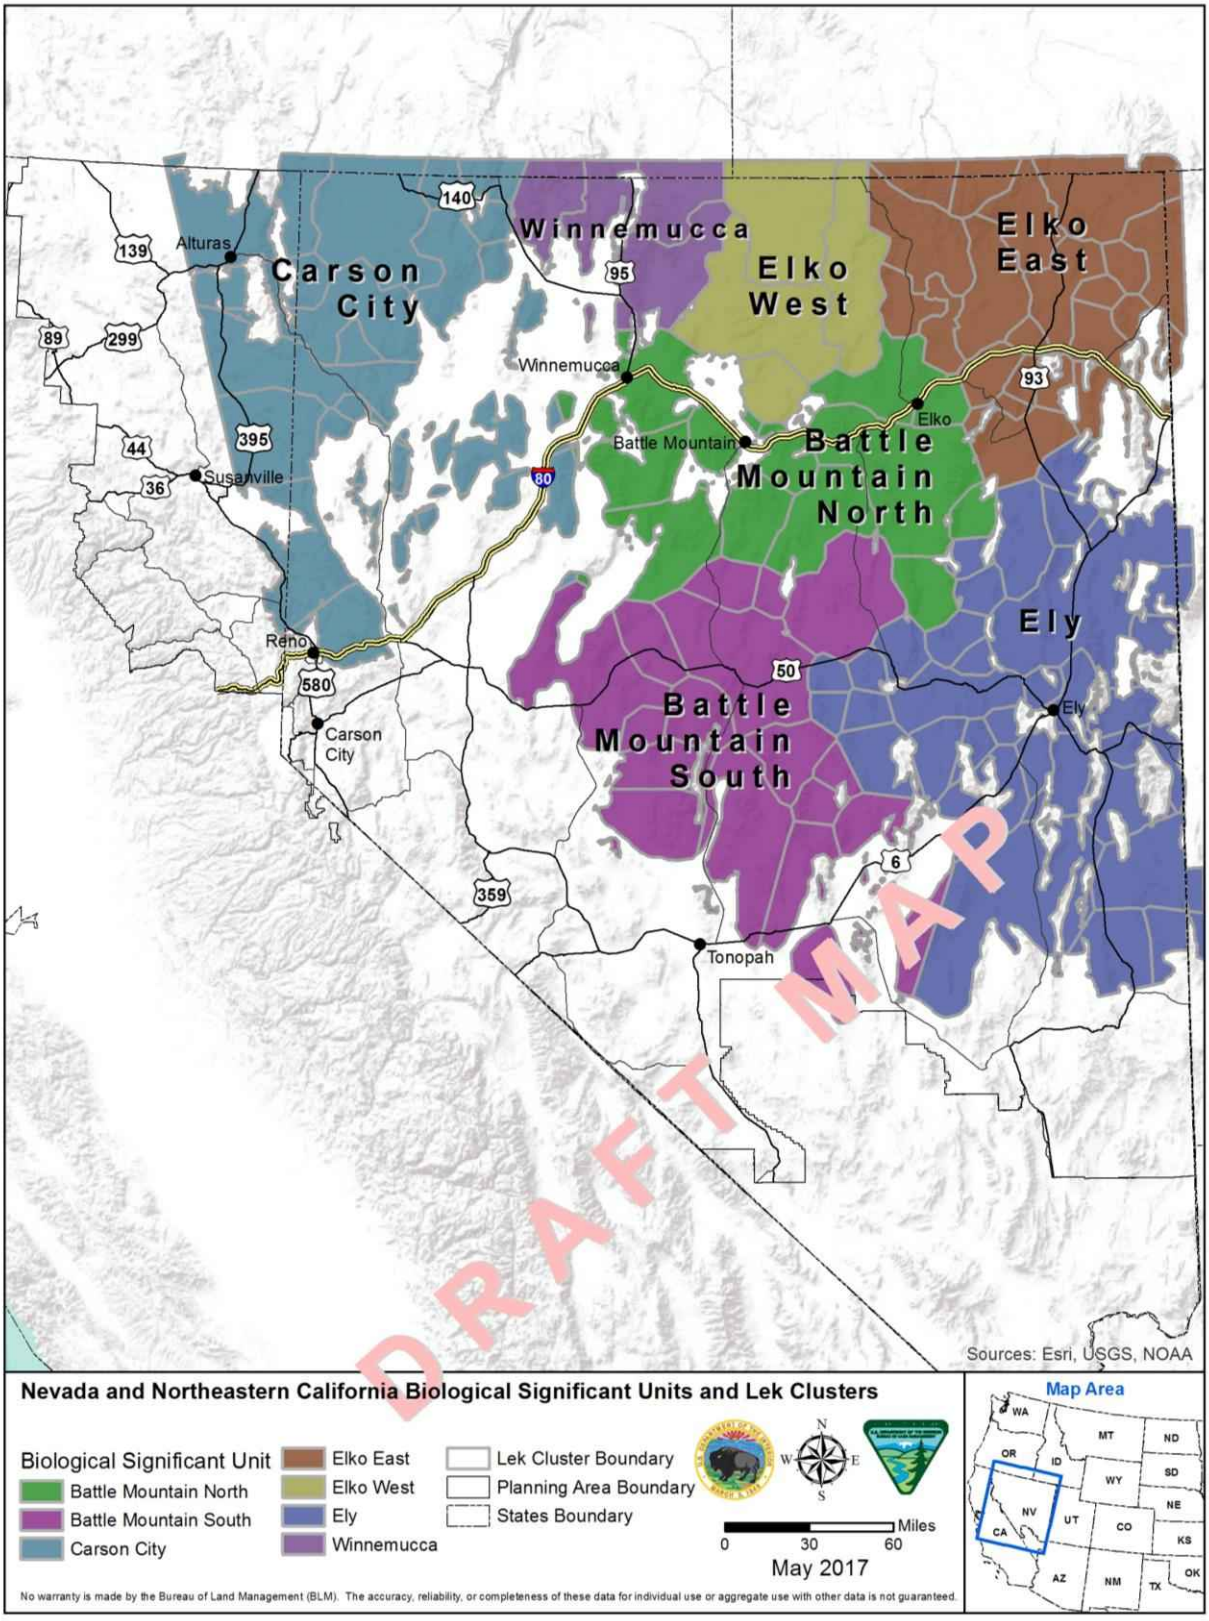
The following provides the BLM's adaptive management strategy for the Nevada and Northeastern California Greater Sage-Grouse Sub-region LUPA.

This LUPA contains a monitoring framework plan (**Appendix E**) that includes an effectiveness monitoring component. The agencies intend to use the data collected from the effectiveness monitoring to identify any changes in habitat conditions related to the goals and objectives of the plan and other range-wide conservation strategies (DOI 2004; Stiver et al. 2006; USFWS 2013). The BLM will use the information collected through the monitoring framework plan outlined in **Appendix E** to determine when adaptive management soft and hard triggers are met (see below).

The adaptive management strategy includes soft and hard triggers and responses. The triggers are not specific to any particular project, but identify GRSG population and habitat thresholds outside of natural fluctuations or variations. Triggers are based on the two key metrics that are being monitored; population declines and habitat loss. Adaptive management, with specific triggers, provide additional certainty that the regulatory mechanisms included in the LUPA are robust and able to respond to a variety of conditions and circumstances quickly and effectively to conserve GRSG habitat and populations. Tripping a soft trigger will initiate a state-federal interagency dialogue to evaluate causal factors and recommend adjustments to implementation-level activities to reverse the trend.

ADAPTIVE MANAGEMENT ANALYSIS SCALES

AMERICAN OVERSIGHT



The scales used to analyze adaptive management triggers and apply adaptive management responses are at the lek, lek cluster, and biologically significant units (BSU) as defined below. The boundaries of the BSU and lek clusters may be adjusted over time, based on the understanding of local GRSG population interactions, genetic sampling and climate variation. Population monitoring methods may be updated based on new science and advances in technology (e.g., integrated population models).

The hierarchy of GRSG population and habitat scales is as follows:

- Lek—Individual breeding display sites where male and female GRSGs congregate, with males performing courtship displays to gain mating opportunities with females.
- Lek cluster—A group of leks in the same vicinity, between which GRSG may interchange over time and representing a group of closely related individuals. Agencies may revise the lek clusters based on new data.
- BSU— represents nested lek clusters with similar climates and vegetation conditions. Agencies may revise the lek clusters based on new data.

AMERICAN OVERSIGHT

DEFINITIONS OF ADAPTIVE MANAGEMENT SOFT AND HARD TRIGGERS

Soft Triggers

Soft triggers represent an intermediate threshold indicating that management changes are needed at the project/implementation level to address GRSG habitat and population losses. If a soft trigger is reached, the BLM would apply additional implementation level management responses to alleviate the known or probable causes in the decline of GRSG habitat or populations with consideration of local knowledge and conditions.

Hard Triggers

Hard triggers represent a threshold indicating that immediate action is necessary to stop a severe deviation from GRSG conservation goals and objectives, as set forth in the LUPA.

ADAPTIVE MANAGEMENT POPULATION ANALYSIS

Population Growth Rate Calculation For Triggers

GRSG state-space models (Coates et al. 2017) will be used to estimate the rate of GRSG population growth (increase or decrease in population numbers) and the number of males at three hierarchically-nested spatial scales: individual lek, lek cluster, and BSU. Lek count data collected by NDOW and CDFW will inform the state-space models, and are used to determine thresholds for population stability and decoupling from higher-order scales . Some lek clusters may need additional monitoring of leks within to gain adequate sampling data in order to be modeled, although the state-space model method will incorporate uncertainty levels from limited samples into each analysis and in threshold determinations (Coates et al. 2017).

Population Soft and Hard Triggers

Modeled growth rates from GRSG population estimates will be calculated at the relevant management level annually as lek data are finalized by the state wildlife management agencies. The GRSG state-space model will be used to establish population growth rates at the lek, lek cluster, and BSU level. The rate at which population stability declines and decouples at the scale of interest from the specified higher-order scale dictates whether or not a soft or hard trigger is reached. Thresholds for stability and decoupling for soft and hard triggers listed below were determined from simulation analyses that used 17 years of lek data (2000-2016). These simulations estimated the ranges of values where management action would have an effect on stabilizing population growth or synchronizing decoupled scales. The threshold value listed below for each criteria represents the most likely threshold value (from a range of values), that if crossed, would associate most strongly with continued decline or decoupling if management action is not taken (Coates et al. 2017). Soft triggers occur when thresholds for slower rates of decline and decoupling are surpassed (i.e., the threshold is high, so less severe deviations for stability or decoupling can trigger) over longer time period, whereas hard triggers occur when thresholds for fast and precipitous rates of decline and decoupling are surpassed (i.e., the threshold is low, so more severe deviations for stability or decoupling can trigger) over shorter time periods.

Specific triggers at each GRSG population scale (Coates et al. in prep 2017) are as follows:

1. Individual lek;
    a. Two criteria are needed to reach a soft trigger:
        i. The estimated population rate of change of a lek is less than 0.90 for two consecutive years; and

AMERICAN OVERSIGHT

ii. The estimated population rate of change of a lek relative to the BSU is less than 0.89 for the same two consecutive years identified in a-i.

b. To reach a hard trigger, either:

i. the estimated population rate of change of a lek is less than 0.90 (slow stability threshold) for three out of four consecutive years and less than 0.89 (slow decoupling threshold) relative to the BSU (as described above) for three out of four consecutive years; or

ii. the estimated population rate of change of a lek is less than 0.55 (most likely rapid stability threshold) and 0.52 (the most likely rapid decoupling threshold) relative to the BSU, two out of three consecutive years.

2. Lek cluster

a. Two criteria are needed to reach a soft trigger:

i. The estimated population rate of change of a lek cluster is less than 0.91for two consecutive years; and

ii. The estimated population rate of change of a lek cluster relative to the BSU is less than 0.92 for the same two consecutive years identified in a-i.

b. To reach a hard trigger, either:

i. The estimated population rate of change of a lek cluster is less than 0.91, and less than 0.92 relative to the BSU, for three out of four consecutive years; or

ii. The estimated population rate of change of a lek cluster is less than 0.55, and less than 0.52 relative to the BSU for two out of three consecutive years.

3. BSU

a. Two criteria are needed to reach a soft trigger:

i. The estimated population rate of change of a BSU is less than 0.97 for two consecutive years; and

ii. The estimated population rate of change of a BSU relative to the entire subregion is less than 0.93 for the same two consecutive years. The subregion comprises all the mapped BSUs in Nevada and northeast California

b. To reach a hard triggers, either:

i. The estimated population rate of change of a BSU is less than 0.97, and less than 0.93 relative to the entire subregion for three out of four consecutive years; or

ii. The estimated population rate of change of a BSU is less than 0.55, and less than 0.52, relative to the entire subregion for two out of three consecutive years.

ADAPTIVE MANAGEMENT HABITAT ANALYSIS

Habitat Trends for Triggers

Triggers for habitat trend would be evaluated at the lek cluster and BSU scales and would be based on changes in the percentage of sagebrush cover.

Habitat Soft and Hard Triggers

1. At the lek cluster scale:
   a. In areas with 25 to 65 percent sagebrush cover, if there were a decline in sagebrush

AMERICAN OVERSIGHT

cover of 2 percent, then a soft trigger would be hit. A hard trigger would be hit if there were a decline of 5 percent or greater of sagebrush cover.

b. In areas with greater than 65 percent landscape sagebrush cover, a soft trigger would be hit if there were a decline of 5 percent in landscape sagebrush cover. A hard trigger would be hit if there were a decline of 10 percent or greater in landscape sagebrush cover.

2. At the BSU:

a. In areas with 25 to 65 percent sagebrush cover, if there were a decline in sagebrush cover of 2 percent, then a soft trigger would be hit. A hard trigger would be hit if there were a decline of 5 percent or greater of sagebrush cover.

b. In areas with greater than 65 percent landscape sagebrush cover, a soft trigger would be hit if there were a decline of 5 percent in landscape sagebrush cover. A hard trigger would be hit if there were a decline of 10 percent or greater in landscape sagebrush cover.

c. If soft triggers are hit for both GRSG habitat and populations within a BSU, this would result in a hard trigger response for that BSU.

TRIGGER RESPONSES AND CAUSAL FACTOR ANALYSIS PROCESS

Step 1 (Assessment of Annual GRSG Population and Habitat Baseline Conditions): In coordination with appropriate federal, state, and local partners (including local community based conservation groups), BLM will use the processes and formulas outlined above to evaluate population and habitat data to determine if the adaptive management soft and hard triggers (addressed above) have been exceeded. This step should occur as soon as practicable after population data from the state and habitat data from the land management agencies are available (January of each year). Technical specialists from appropriate state and federal agencies may be necessary to validate the analysis based on this process. A determination regarding whether a hard or soft trigger has been exceeded will be made before proceeding to step 2. Once the annual population and habitat information has been assessed and hard or soft triggers have been determined to be exceeded, BLM will notify the appropriate district and field offices as soon as possible. The offices should consider whether approval of pending authorizations within the affected adaptive management response area (lek cluster or BSU) would exacerbate the trigger or would otherwise be inconsistent with the trigger responses.

Step 2 (Initiate Causal Factor Analysis Including the Identification of Trigger Responses): Within four weeks after Step 1 is completed and a finding has been made that a soft or hard trigger has been exceeded, the BLM will organize a group of federal, state and local partners (including local community based conservation groups) to conduct the causal factor analysis that will identify why a soft and/or hard trigger was tripped at the lek, lek cluster, and/or BSU scale. The casual factor analysis area at each scale are as follows:

a. Lek: GRSG seasonal habitats associated with the lek;

b. Lek cluster: GRSG seasonal habitats associated with the lek cluster;

c. BSU: GRSG seasonal habitats associated with the BSU.

AMERICAN OVERSIGHT

This causal factor analysis should determine the possible or probable cause(s) of the population and/or habitat decline or lack of a positive population response to favorable environmental conditions. Findings from this causal factor analysis process and recommended management actions that aim to address the causal factors should be documented in a brief report, which will be prepared by the BLM's Nevada and California State Offices. If a soft trigger has been tripped, the same group of federal, state and local partners (including local community based conservation groups) that helped define the casual factor(s) will also develop an emergency/contingency plan that will outline immediate management actions that have to take place, in the event a hard trigger is reached.

Step 3 (Implement Trigger Responses): District and/or field offices will implement project specific management responses, based on the causal factor(s) identified in step 2. These responses would only be applied at the scale in which the soft trigger was reached (e.g. lek cluster, BSU). If a hard trigger is reached, district and/or field offices will implement the site specific actions outlined in the emergency/contingency response plan developed as part of the soft trigger response. If the hard trigger was reached, but not preceded by a soft trigger or the emergency/contingency response was not developed, the BLM (in coordination with Federal, State, and local partners) will identify the causal factor(s) (as outlined in step 2) and identify and implement the appropriate management response to address the populate/habitat decline. In some instances, BLM may implement temporary closures (in accordance with 43 CFR Part 8364.1, and as directed under BLM Instruction Memorandum No. 2013-035) to respond to a causal factor(s) that have resulted in a catastrophic event (i.e., a wildfire). In addition, BLM will no longer permit exceptions to allocation decisions in areas (e.g. lek cluster, BSU) that have tripped a hard trigger until population/habitat levels go below the trigger threshold. If the hard trigger response is appropriate at the plan level, a plan amendment process may be required to implement the response.

Step 4 (Monitor Responses): District and/or field offices will continue to monitor the lek cluster(s) and BSU(s) in which a trigger response is being applied to determine if the responses are adequately addressing the reason for the population and/or habitat decline. This information will be used in the "Assessment of Annual GRSG Population and Habitat Baseline Conditions" step in the following year.

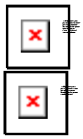
Subject: See America's Best-Performing Cities

A robust high-tech sector and broad-based growth in jobs and wages lifted Utah's Provo-Orem area to No. 1 in the Milken Institute's Best-Performing Cities 2017 index. Raleigh and Dallas—also benefiting from strength in technology and research—ranked second and third.

The index, published annually since 1999, provides an objective benchmark for examining the unique characteristics of economic growth in metropolitan areas.

AMERICAN OVERSIGHT



Understanding these factors can help communities create a strategic vision for sustaining growth and prosperity.

Nevada Governor's Office of
ECONOMIC DEVELOPMENT
Empowering Success

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006378

STATE OF NEVADA
GOVERNOR'S OFFICE OF ECONOMIC DEVELOPMENT
BOARD MEETING
August 14, 2018

The meeting of the Board of Economic Development was called to order by Governor Brian Sandoval at the Grant Sawyer Building, Governor's Conference Room, 555 E. Washington Avenue, Room 5100, Las Vegas, Nevada, 89101; and via video conference at the Capitol Building, 101 N. Carson Street, Carson City, Nevada 89701.

1. CALL TO ORDER, ROLL CALL AND ESTABLISH QUORUM

VOTING BOARD MEMBERS PRESENT
Governor Brian Sandoval, State of Nevada
Lieutenant Governor Mark Hutchison, State of Nevada
Dr. Weldon Havins, Touro University, Nevada
Mr. James Barrett, Jr., President and Founder, The JABarrett Company
Dr. Dana Bennett, President, Nevada Mining Association
Mr. Dan Klaich, voting member at large
Mr. Raymond Specht, Founder & CEO Specht Leadership Consulting

BOARD MEMBERS ABSENT AND EXCUSED
Secretary of State Barbara Cegavske, State of Nevada
Mr. Adam Kramer, Executive Vice President of Strategy, Switch, Inc.

NON-VOTING BOARD MEMBERS PRESENT
Mr. Don Soderberg, Director, Department of Employment Rehabilitation and Training

NON-VOTING BOARD MEMBERS ABSENT AND EXCUSED
Dr. Thom Reilly, Chancellor and Chief Executive Officer, Nevada System of Higher Education

STAFF MEMBERS PRESENT
Paul Anderson, Executive Director, GOED, Secretary of Board
Derek Armstrong, Deputy Director, GOED
Matt Moore, Deputy Director, GOED
Bob Potts, Director of Research, GOED
Jessica Sanders, Program Specialist – CDBG, GOED
Melanie Sheldon, Program Manager, GOED
Mariah Heriman, Executive Assistant / Program Management Specialist, GOED

GUESTS PRESENT
Assemblywoman Irene Bustamante-Adams
Sonia Mendez, Office of Assemblywoman Irene Bustamante-Adams

AMERICAN OVERSIGHT

Nicole Linan, Lieutenant Governor's Office
Scott Anderson, Secretary of State's Office
Lori Chatwood, State Treasurer's Office
Henna Rasul, Attorney General's Office
Michelle Briggs, Attorney General's Office
Russell Guindon, Legislative Council Bureau
Pat Whitten, Storey County
Hugh Gallagher, Storey County
Bob Sader, TRIC General Improvement District Management
Brian Gordon, Applied Analysis
Paul Taggert, Taggert & Taggert, Ltd.
Alise Porto, Switch, Inc.
Patricia Mulroy, Switch, Inc.
Gary Milliken, Switch, Inc
Chris Reilly, Tesla, Inc.
Brian Scelfo, Tesla, Inc.
Martin Johnson, JNA Consulting Group, LLC
Randall W. Aleman, Emerald Lake T.C.
Kendra Follett, Sherman & Howard, LLC
Matthew Digesti, Blockchains
Leo Drozdoff, Drozdoff Group, LLC
Alex Samuelson, The Griffin Company, LLC

2. PUBLIC COMMENT

Governor Sandoval asked if anyone from the public sought to make public comment. No public comment was provided.

3. GOVERNOR SANDOVAL'S COMMENTS

Governor Sandoval noted he had recently led a trade mission to Ghana and South Africa. The trip had been focused on collaboration and trade in the areas of water technology, education and mining. More details would be provided at the next full Governor's Office of Economic Development (GOED) Board meeting.

4. REVIEW AND APPROVAL OF ECONOMIC DEVELOPMENT FINANCING PROPOSAL (EDFP) TAHOE RENO INDUSTRIAL CENTER (TRIC) EFFLUENT WATER PIPELINE

Director Paul Anderson, Executive Director, GOED provided an overview of the TRIC Effluent Pipeline Project and the request for bonding authority of $35 million to facilitate construction of the pipeline.

AMERICAN OVERSIGHT

The authority from GOED came out of SB 1, often referred to as the Faraday Special Session, that referenced a development at Apex Industrial Park, North Las Vegas. One of the qualifiers to access bonding authority was the presence of a qualified project making a capital investment of over $1 billion. TRIC's qualifying project was the Tesla Gigafactory. Given the strategic positioning of TRIC relative to the Truckee Meadows Water Reclamation Facility (TMWRF) and the needs of TRIC's tenants, the objective of this financing proposal was to develop an approximate 13-mile effluent water pipeline from TMWRF to TRIC, as well as several storage, advanced treatment and transmission components at TRIC. The entire project will be known as the "Effluent Project'; the pipeline from TMWRF to TRIC as the 'off-site Effluent Project' and the on-site improvements as the 'onsite Effluent Project'. Only the off-site Effluent Project will be considered for financing as part of an Economic Development Financing Proposal (EDFP). Increased availability of Process Water at TRIC from the Effluent Project is expected to resolve short and long-term load and capacity issues for TMWRF, improve water quality in the Truckee River and facilitate continued major future economic development benefitting all of northern Nevada.

Director Anderson introduced Mr. Pat Whitten, Storey County Manager. Mr. Whitten advised Storey County appeared before the Board a year prior, asking the Board to consider the EDFP as a means to further stimulate economic growth and build out in TRIC. Subsequently, selected project and financing elements had been modified and Storey County was back with a revised approach to finance the off-site Effluent Project.

Instead of one developer involved, there would now be six, including corporate giants such as Google, Tesla and Switch. The new developers brought a desire and a willingness to provide up-front funding through a Special Assessment District (SAD) process. Having low cost water available to these companies, coupled with the recent inclusion of TRIC in the Federal Government Opportunity Zone Program provided the catalyst these companies needed to fully develop their TRIC properties. On August 7, 2018, The Storey County Board of Commissioners voted unanimously to forward the proposal for consideration.

Mr. Whitten was joined by Mr. Martin Johnson, President, JNA Consulting Group, LLC. Mr. Johnson advised JNA Consulting Group, LLC were the financial advisors to Storey County and had been asked to assist the county with this project. Mr. Johnson noted, selected landowners would agree to self-assess the cost of the off-site Effluent Project by way of a special assessment district (SAD) to support approximately $35 million in bonds for the development of the off-site Effluent Project. The SAD bonds would be sourced to infrastructure bonding capacity allocated to GOED for economic development purposes. The $35 million off-site Effluent Project bond financing was also expected to comply with Storey County's SAD guidelines. In addition to the financing of the off-site Effluent Project, Storey County would create a tax increment area pursuant to Senate Bill 442 (SB442) of the 2017 Session of the Nevada Legislature that would allow for a cumulative reimbursement up to an amount equivalent to the debt service, including principal and interest, of the off-site Effluent Project SAD financing.

AMERICAN OVERSIGHT

Mr. Brian Gordon, Principal, Applied Analysis was introduced and advised, in addition to the off-site Effluent Project, the SAD participants intended to privately finance (either directly or through a third-party) the on-site Effluent Project. The on-site Effluent Project is expected to be segmented into two individual phases. The first phase focuses on common infrastructure shared among the SAD participants, and it will include water transmission and storage infrastructure, including wells and a reservoir. This first phase of the on-site Effluent Project is estimated to cost approximately $30 million. In addition to this phase of the project, selected water users require more advanced water treatment to generate water suitable for use in their operations. This second phase of the onsite Effluent Project is estimated to cost between $35 million and $85 million, depending on the number of participants, the technology employed and the costs associated with a potential third-party operator of these facilities. The combined cost of the total Effluent Project is expected to range from $100 million to $150 million.

As far as environmental benefits, the Truckee Meadows water shed had been fragile and one of the most litigated water sources in the western United States. This included the Truckee River. This project would divert 4,000 acre-feet, of high nitrate water, that would typically go into the Truckee River. This water would be diverted to TRIC where it would then be utilized by the landowners. If the project didn't move forward, TMWRF at some point, would be required to invest in water treatment infrastructure and this would entail an estimated capital cost of $30-40 million, in conjunction with annual recurring maintenance costs of approximately $1.5 million.

Ms. Patricia Mulroy, Consultant, Switch, Inc. was introduced and advised the pipeline would remove nitrates causing TMWRF to be out of compliance with EPA Clean Water Standards. Additionally, it would allow TMWFF to discharge without causing nitrate issues that are problematic for the endangered cui-ui fish species in river. The Pyramid Lake Paiute Tribe were also reliant on the river as a water source.

Two agreements were negotiated. The first was the effluent agreement, with the cities of Sparks and Reno, who control the TMWRF facility. In terms of ownership, the water will stay within the Reno Sparks area. TRIC will simply lease the water supply for the term of 50-60 years. TRIC would reimburse the City of Sparks and the TMWRF facilities for all extraneous expenses, and any capital improvements required in order to facilitate this endeavor and make the Reno Sparks area whole. The second agreement was recently approved by Truckee Meadows Water Authority (TMWA) which is the return flow management agreement. The agreement requires the TRIC landowners to turn over their Truckee River Rights of 1,500 acre-feet, to manage the river for instream flows for use by TMWA during the course of this agreement. The landowners will also pay for an adjudication process on ground water rights that are available through State right-of-ways with the Department of Transportation. The cost of that adjudication will be borne by the landowners and the water as well will be turned over to TMWA for management purposes to make the river whole.

AMERICAN OVERSIGHT

Governor Sandoval inquired if TMWA rate payers would incur savings as they would not be required to pay for the water treatment in years to come. Ms. Mulroy advised the rate payers would benefit. The mitigated cost of $40 million would prevent the wastewater rates from increasing. The larger benefit for TMWA and the Reno Sparks area, is the provision of maximum flexibility to TMWA in terms of managing the flows in the river regardless what the hydrology looked like in the system.

Governor Sandoval asked if the Pyramid Lake Paiute Tribe would receive a higher quality of water. Ms. Mulroy advised the tribe would receive a greatly improved quality of water and noted all parties were committed to making sure the Tribe would not be negatively affected by this agreement.

Governor Sandoval asked is there was any type of return discharge from TRIC back to the river. Ms. Mulroy advised the Nevada Department of Environmental Protection (NDEP) had been clear there could be no discharge back into the river. The intent was to have a second pass-thru for reuse. Water not put to full consumptive use would once again enter the recycle process and be utilized. The water would stay contained in the TRIC area, thus saving water.

Lieutenant Governor Mark Hutchinson asked for clarification on the term of the lease. Ms. Mulroy stated the original term was 40 years with the option to extend.

Lieutenant Governor Hutchinson asked how the lease terms coincided with the infrastructure life expectation. Ms. Mulroy stated the bonds should be paid off before the lease expired and it would be a 20-25-year window for the bonding. The life of the infrastructure extends past the anticipated date timeframes for the bonds to be paid off. This could potentially be 80-90 years.

Lieutenant Governor Hutchinson asked Ms. Mulroy if she foresaw any additional challenges or objections from third parties. Ms. Mulroy advised there had been several public forums held and, to date, no issues had been raised.

Mr. James Barrett asked about the project's permitting process. Ms. Mulroy noted the permit process was still to occur. However, there was full commitment to being compliant with all the conditions around those permits.

Governor Sandoval asked if there were any environmental concerns associated with the construction portion of the project. Mr. Bob Sader, TRIC Improvement District, was introduced and advised he had been very involved in the right-of-way process for the path of the pipeline. There had been three or four different alignments and the alignment with the least environmental impacts had been selected. Additionally, there were no wetlands, the pipeline would not cross the Truckee River, nor would it enter Federal Lands. There were two state parcels, owned by the State of Nevada and there had been discussions with the Public Lands around the application for that. There had also been a high-degree of engineering on the right-of-way.

AMERICAN OVERSIGHT

Mr. Dan Klaich asked if the agreements with Reno and Sparks had been finalized. Ms. Mulroy confirmed this was the case. The agreements were approved by both the Sparks City Council and the Reno City Council, in terms of the lease agreement and the return flow management agreement.

Mr. Paul Taggert, Senior Partner, Taggart & Taggart, Ltd., was introduced and advised the return flow management agreement had been approved by Reno, Sparks and TMWA.

Mr. Klaich asked Mr. Taggert if he believed the agreements provided substantial economic benefits to the cities of Reno and Sparks. Mr. Taggert confirmed this was the case. There would be a cost mitigation in upgrading the TMWRF facility for treating effluent as capacity would be created in the facilities by taking this water out of the river. This changed the timeline for required facility improvements.

Mr. Klaich inquired if the easement or right-of-way been acquired. Mr. Taggart advised the easement had not yet been acquired and the right-of-way would be deferred until all agreements were completed and approved.

Mr. Klaich inquired if the off-site Effluent Project' project could be completed within the $35 million range. Mr. Taggart advised the $35 million was the best estimate at this point. Costs would be refined as the engineering was completed. If there was a surplus, the assessment payors would incur this.

Mr. Gordon provided an overview of the benefits related to TRIC. There were 12,700 developable acres in TRIC itself. The proposed projects would free up future development activity, as well as the intensity of development activity. These types of developments generally led to higher yields and higher levels of investment. These landowners were also creators of higher than average wage employment. In terms of financing, the underlying real estate value would be required to have a 3.5 times value, relative to the amount being considered for bonding. It would be 3.5 times $35 million under the SAD. Currently, the current appraisal is suggesting a 7 times value, when the project is completed. This provides significant security as it relates to the financing side of the equation. Additionally, the group is also requesting a Tax Increment Area (TIA) be developed. A portion of the incremental tax dollars would inure back to the landowners, as reimbursement up to the amount of the offsite improvements, or the $35 million. This is the maximum amount to be reimbursed under a potential TIA. This aligns with NRS 278C.150-Developer Reimbursements for Construction of Wastewater Infrastructure Projects. If there was no future development activity and no additional investments made, there would be no additional tax dollars going back to the private sector development.

The existence of the pipeline itself would add additional value in Storey County and open-up properties for future development and higher intense. All of this would increase economic opportunity within Storey County. The TIA would be a reimbursement of a portion of the pipeline and overall infrastructure costs. It would exclude any taxes that were

AMERICAN OVERSIGHT

scheduled to go to special districts such as the school districts as these were excluded from any increment or reimbursement back as part of this project. Fifty percent of the sales and use taxes were eligible for reimbursement. Fifty percent would stay with the original taxing entities as they were currently scheduled and only half of the modified business tax or payroll tax would be eligible for reimbursement back towards the infrastructure costs.

Once the $35 million reimbursement was made, as it relates to the off-site Effluent Project, one hundred percent of all incremental taxes would go back to the original taxing entities and no more would go to the private sector for reimbursement under the project. The pipeline would also provide a stable source of water and provide increased stability in terms of the overall economic activity for Storey County as a whole.

Governor Sandoval asked if property owners and homeowners of Storey County had any risk associated with this project and the bonding. Mr. Gordon advised all property owners would continue to pay the normal taxes and operate as usual. The exposure related to the SAD which required one hundred percent consent of all property owners within that district. An assessment was a lien on the property and co-equal to property taxes. If an assessment is not paid, foreclosure can occur on the property. Assessment districts and bonds can incur foreclosures for delinquencies. The assessments would be billed and collected semi-annually. The assessments, under statute, could go for a term of up to 30 years. Under the current proposal, the county would issue assessment district bonds and those bonds would then be purchased by the State through the Bond Bank Program. This allowed the interest rate on the state bonds to be passed through to the County bonds, which provided the lowest possible cost to capital for a Nevada local government. The bonds would be paid first from the assessment payments. Every six months there would be a bill for those assessments. Approximately two months later the bond payments would be made. To the extent the assessment payments are insufficient, there were other resources within the SAD. In addition to the other resources and cash available, there would be a reserve fund that is funded out of bond proceeds, the day of closing of the bond transaction, equal to one year's debt service. Theoretically, if all the property owners were delinquent, there would be enough money in the bank to make the payment for at least one year. If those three resources were insufficient, the county would be responsible for the amount of its uncommitted General Fund balance or the amount of the annual payment.

Governor Sandoval noted Storey County's approval was a significant factor and asked Mr. Whitten if there had been any opposition from the residents of the county. Mr. Whitten advised the vast majority were in favor of the pipeline although it had also been labelled 'corporate welfare.'

Lieutenant Governor Hutchison inquired about the geographic area of the SAD. Mr. Gordon advised there were two parcels located in TRIC within the SAD, but not within the TIA. One was owned by Switch and the other by Tesla.

AMERICAN OVERSIGHT

Lieutenant Governor Hutchison inquired if the TIA would entail developers fronting the money and receiving reimbursement, through various taxes that are going to be used to pay the $35 million. Mr. Gordon confirmed this was the case.

The Lieutenant Governor noted if the vacant land was never developed, the developers would assume all the risk. Mr. Gordon confirmed this was the case.

Mr. Klaich asked if the approval of the project would limit the state's ability to fund other projects. Lori Chatwood, Deputy Treasurer of Debt Management, Nevada State Treasurer's Office advised the maximum annual debt service was slightly more than $2 million a year. Therefore, this should not limit funding other projects.

Mr. Klaich asked Ms. Chatwood if she anticipated anything limiting the bonding capacity reported to the Governor as being available for additional CIP Projects. Ms. Chatwood advised that to the extent all of the revenues were sufficient, there would be no impact. Being that the project comprised a natural resource, it did not fall under the 2% constitutional debt limit. Therefore, the amount of capacity of bonding under the constitution was not affected.

Governor Sandoval asked Ms. Chatwood if she had reached any conclusions or opinions regarding the transaction. Ms. Chatwood noted, at first blush, the proposal looked solid. Ms. Chatwood advised, for the record, if the proposal were to be approved, the bond would be issued through the authority of SB 1 which had a blanket limit of $200 million. Therefore, the $35 million would go under that capacity, reducing that $200 million authority in the future.

Mr. Barrett inquired about matching between the SAD and the TIA. Mr. Johnson advised the SAD would be created by the County Commission at the September 18th meeting and bonds could be issued once a bond ordinance was adopted. This would take two readings from the Storey County Commission. Subsequently, the State Board of Finance would need to approve the issuance of the State bonds, which would be in November 2018. the County could not start forming the TIA prior to receiving Interim Finance Committee (IFC) approval. Assuming this was to happen in time for the September 18th meeting, the process to form a TIA could commence.

Dr. Havins inquired about the anticipated impacts, should the project not be approved. Mr. Johnson advised there would not be any additional revenue raised as, without the water, there could not be further development at TRIC.

Mr. Specht inquired about the pipeline's capacity. Ms. Mulroy advised it would be 4,000 acre-feet annually. Mr. Specht asked if that meant this the pipeline is 100% maximized at that point. Ms. Mulroy stated there was an oversizing component on the pipeline. If Reno, Sparks or Washoe County wished to lease additional effluent TRIC in the future, the pipeline would afford that opportunity. Mr. Sader advised it was initially estimated the pipe would need to be 18-inches. It was increased to 24 inches when it was determined the flows

AMERICAN OVERSIGHT

from TMWRF and the Reno Sparks Sewer Plant would be variable during the year. Currently, the decision was to go up to 30-inches in diameter, in order to be able to accommodate additional flows in the future

Mr. Klaich asked how the $35 million construction budget was calculated Mr. Sader advised the district engineers were from Farr West Engineering (Farr West). The firm had substantial experience building infrastructure and providing similar services to water and sewer systems all over northern Nevada. Farr West had made the $35 million estimate.

Mr. Klaich asked about additional funding, should the project cost more than $35 million. Mr. Sader advised the private parties involved would cover any overrun costs. It would not be borne by the county or by the state.

Mr. Klaich inquired about the ownership of the pipeline. Mr. Sader advised ownership of the pipeline would transfer to TRIGID upon completion.

Governor Sandoval asked if the private entity participants, in attendance, wished to make any comments. Mr. Chris Reilly, Workforce Development and Education Lead, Tesla, Inc. and Mr. Brian Scelfo, Senior Director, Corporate Development, Tesla, Inc. advised they were in in full support of the project and saw this as exciting for long-term growth at the Tesla Gigafactory.

Lieutenant Governor Hutchison inquired about future plans for the Tesla, Inc. parcels that were part of the TIA. Mr. Scelfo advised the Gigafactory is separated into different parcels. Currently, only the largest parcel had been developed. However, the company planned to expand onto the other parcels swiftly.

Lieutenant Governor Hutchison inquired about the impacts of the pipeline project on the Gigafactory expansion plans. Mr. Scelfo advised future expansion would not be possible without approval of the project.

Dr. Bennett asked when water would start flowing through that pipeline. Mr. Sader advised the current schedule would commence construction of the pipeline, and other facilities necessary, in the first quarter of 2019 with a completion date of late 2020.

Governor Sandoval noted he was comfortable with the financing proposal and felt there was extraordinary protection for the citizens of both Storey County and the State of Nevada Ultimately, the responsibility would fall upon the entities within the SAD. Regarding environmental issues, Governor Sandoval noted the people of Washoe County would benefit from the avoided costs of facilities necessary to clean the water that would otherwise be redirected to TRIC. The water coming into the river would also be beneficial to the Pyramid Lake Paiute Tribe. It was of great importance the Tribe be protected in conjunction with receiving higher quality water.

AMERICAN OVERSIGHT

Governor Sandoval noted the water would be recycled at TRIC which would actually save water. This would be another benefit to the residents of Washoe County, Storey County and the region. Regarding economic development, the project continued the New Nevada story of bringing some of the best jobs in the country to Nevada. Tesla, Inc. had exceeded its initial commitments to the state. At a recent Cimarron Memorial High School press conference, Tesla, Inc. made a $1.5 million contribution to support the development of robotics teams and STEM education throughout Nevada. Switch, Inc. had built the world's largest data center and planned to build another facility in northern Nevada. Google had already been providing training, free of cost, to citizens of Washoe County.

Governor Sandoval noted significantly trusted and experienced individuals had testified on behalf of the project. Ms. Mulroy had impeccable knowledge regarding the water situation and water quality. Mr. Taggert was a prominent water lawyer in the state and had worked on the project in consultation with Washoe County, Storey County, the City of Sparks and City of Reno. Mr. Sader, was a well-respected member of Nevada's Legislature, a former Chairman of the Judiciary Committee and had an extensive public service career. Governor Sandoval also noted Applied Analysis was an entity he knew and trusted and had provided expertise and guidance on some of the most complex issues associated with economic development in the state.

The proposed Effluent Pipeline project was a transformational project and would allow the State of Nevada to lead. Nevada had generated tremendous economic results. It was the most improved state in the country in terms of employment. The state was at a record level of employers. Clark County was the fastest growing metropolitan area in the United States of America. Nevada's average wage was the highest it's ever been, and 175,000 jobs lost, in the Great Recession, had been replaced with 260,000 jobs. Governor Sandoval noted he had full faith in the companies participating in the project.

Governor Sandoval said the form of the motion for Agenda Item 4 would be:

- To approve the TRIC EDFP submitted by Storey County.
- To approve the submission of the proposal to the IFC of the Nevada Legislature.
- To approve to enter into one or more agreements with Storey County or another local government to administer any districts and carry out the projects identified in the proposal as deemed necessary by the Executive Director.
- To approve the provision of notice of the approval of the proposal to the Board of County Commissioners of Storey County and the State Board of Finance and that the motion include to take all action necessary or appropriate to effectuate the approval of the proposal and provisions of NRS 360.981 to 360.992.

A MOTION WAS MADE BY MR. KLAICH TO APPROVE THE FIVE-PART MOTION FORMULATED BY GOVERNOR SANDOVAL. THIS MOTION WAS SECONDED BY LIEUTENANT GOVERNOR HUTCHISON. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

5. REVIEW AND APPROVAL OF STOREY COUNTY RESOLUTIONS 501 & 502

Ms. Kendra Follett, Bond Counsel to Storey County, provided the following information: Resolution 501 is a resolution approving the financing proposal. This is adopted by the Board of County Commissioners of Storey County and it directed notification to the Governor's Office of Economic Development and the IFC pursuant to the provisions of NRS 278C and NRS 360. Resolution 502, also concerns the same project and it directs notice to the IFC under a different provision of 278C which specifically relates to the tax increment area.

Mr. Whitten advised the Storey County Board of Commissioners unanimously approved both Resolutions 501 and 502 a week ago.

The Governor said he would accept a motion to approve Storey County Resolutions 501 and 502, as presented in Agenda Item Number 5.

A MOTION WAS MADE BY MR. SPECHT TO APPROVE STOREY COUNTY RESOLUTIONS 501 & 502 AS PRESENTED IN AGENDA ITEM NUMBER 5. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

6. PUBLIC COMMENT

Governor Sandoval asked if anyone from the public sought to make public comment. No public comment was provided.

7. ADJOURNMENT

A MOTION WAS MADE BY DR. HAVINS TO ADJOURN THE MEETING. THIS MOTION WAS SECONDED BY MR. BARRETT. THE MOTION PASSED UNANIMOUSLY

2. PUBLIC COMMENT

Governor Brian Sandoval asked if anyone from the public sought to make public comment. No public comment was provided.

3. GOVERNOR SANDOVAL'S COMMENTS

Governor Sandoval advised he had led a State trade mission to the Basque region of Spain in June 2018 and had signed MOUs with the President of Bizkaia and the President of Navarra. The MOUs encourage closer ties, collaboration and trade in the areas of smart grid technology, renewable energy, blockchain technology, water technology, and agri-food industries.

In addition to many productive meetings, the trade delegation toured a facility where a key piece of the future of Southern Nevada's access to water is in the process of being built. Headquartered in the Basque Country of Spain, Indar, a world leader in rotating electrical machines, is manufacturing massive, cutting-edge submersible pumps to draw water from Lake Mead through the unprecedented infrastructure project known as the third straw.

The trade delegation also met with a manufacturer of cell phone-controlled door locks. The Governor noted a direct application to school safety and the ability for staff and teachers to have increased control in the event of an emergency. Governor Sandoval advised he had established a Statewide School Safety Task Force, charged with the safety of Nevada's schoolchildren and was excited about the potential application of this product.

The Governor's Office of Economic Development (GOED) International Trade division recently announced the creation of a new initiative aimed at attracting international, high-growth companies looking to establish U.S. footholds and expand. Nevada Global will partner with economic development agencies abroad to identify candidate businesses and connect them to Nevada's startup accelerator community.

4. APPROVAL OF THE MAY 17, 2018 BOARD MEETING MINUTES

A MOTION WAS MADE BY SECRETARY OF STATE BARBARA CEGAVSKE TO APPROVE THE MAY 17, 2018 MEETING MINUTES. THIS MOTION WAS SECONDED BY MR. JAMES BARRETT. THE MOTION PASSED UNANIMOUSLY.

5. ABATEMENT APPLICATIONS FOR BOARD APPROVAL

A. BENTLY HERITAGE, LLC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Andrew Haskin, Director of Business Development, Northern Nevada Development Authority (NNRDA), presented Bently Heritage and provided an overview of the company and abatements sought. Bently Heritage, LLC is a distilled spirits manufacturing business established in April 2016. The company had created a sustainable estate distillery in two historic properties located near downtown Minden. The company's products included premium spirits such as whiskey, gin, and vodka from local grains and botanicals. The company planned to hire an additional six employees at an average wage of $21.95 per hour and make a capital equipment investment of approximately $4.2 million. Mr. Haskin was joined by Mr. Carlos Luri, Director of Government Affairs and Mr. Bryan Davis, Marketing Director, Bentley Heritage, LLC.

Mr. Luri advised Bently Heritage, LLC would be expanding its current facility by building two new rickhouses, for whiskey storage and adding a bottling line. The distillery was also expected to open for public tours and tastings in the fall of 2018. Mr. Luri noted the recent public interest in craft distilling and historical tourism was anticipated to create a hub of activity in downtown Minden. This hub was expected to draw visitors from the Tahoe Basin and beyond which would bring additional revenues to local retailers, lodging and dining establishments.

Governor Sandoval asked if the botanicals and grains used in the company’s products were from Nevada. Mr. Davis confirmed and advised the company was constructing greenhouses on its ranch property to allow sustainable growth and harvesting of winter rye, wheat, and barley which would be malted in-house on the company’s own malting floor.

Governor Sandoval noted the company’s repurposing of two historic properties and asked the date these buildings were first constructed. Mr. Luri advised the Flour Mill had been built in 1906 and the Butter Factory was also over 100 years old.

Governor Sandoval commended the company for its commitment to Nevada’s history and noted that morning he’d had the privilege of being a part of a blessing ceremony at the Stewart Indian School, which was constructed in 1890 and was also undergoing a renovation and revitalization development.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE ABATEMENT APPLICATION OF BENTLY HERITAGE, LLC, FOR A SALES TAX ABATEMENT, MODIFIED BUSINESS TAX ABATEMENT, AND PERSONAL PROPERTY TAX ABATEMENT AS PRESENTED IN AGENDA ITEM 5A.

AMERICAN OVERSIGHT

THIS MOTION WAS SECONDED BY MR. DAN KLAICH. THE MOTION PASSED UNANIMOUSLY.

B. BIGELOW AEROSPACE

- **AVIATION SALES & USE TAX ABATEMENT**
- **AVIATION PERSONAL PROPERTY TAX ABATEMENT**

Ms. Kylie Rowe, Vice President of Economic Development, Las Vegas Global Economic Alliance (LVGEA) presented Bigelow Aerospace and provided an overview of the company and abatements sought. Bigelow Aerospace was founded in 1999, and their global headquarters is in North Las Vegas. The company is considering expanding its current operations. The expansion would accommodate the company's new project: the development and manufacture of Bigelow Aerospace's flagship spacecraft, the B330, an entirely autonomous platform outfitted with two dissimilar propulsion systems and entire suite of environmental life support systems. The B330 is the only spacecraft of its kind being developed in the world. Within the first year, the expansion would create five new jobs at an average hourly wage of $25 per hour and include capital investments of approximately $51 million in capital equipment and $6.5 billion investment in aviation parts over the forthcoming 20 years. Ms. Rowe was joined by Ms. Blair Bigelow, Vice President of Corporate Strategy, Bigelow Aerospace.

Ms. Bigelow advised Bigelow Aerospace was a relatively small outfit focused on accomplishing extraordinary things. The company hoped to be a symbol to Nevada for entrepreneurship, innovation, and technology advancement. To accommodate a new, groundbreaking project, the company was considering expanding its current North Las Vegas operations.

Governor Sandoval noted Bigelow Aerospace employed cutting edge aeronautical and mechanical engineers and asked if the company had a relationship with the University of Las Vegas (UNLV) and the University of Reno (UNR) engineering schools. Ms. Bigelow confirmed the company enjoyed a relationship with both schools and hoped to partner with them in the future.

Governor Sandoval inquired about the specific skill sets sought in employees. Ms. Bigelow advised the company sought skills in specialized avionics along with structural, electrical and mechanical engineering.

Governor Sandoval thanked the company for the innovation it bought to the state and noted Bigelow Aerospace was a Nevadan company set to play an important role in in the history of mankind.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE ABATEMENT APPLICATION OF BIGELOW AEROSPACE FOR AN AVIATION SALES AND USE TAX ABATEMENT AND AN AVIATION PERSONAL PROPERTY TAX ABATEMENT AS PRESENTED IN AGENDA ITEM

AMERICAN OVERSIGHT

5B. THIS MOTION WAS SECONDED BY MR. ADAM KRAMER. THE MOTION PASSED UNANIMOUSLY.

C. CYANCO COMPANY, LLC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

D. CYANCO COMPANY, LLC – CATALYST FUND

Mr. Sheldon Mudd, Executive Director, Northeastern Nevada Regional Development Authority (NNRDA), presented Cyanco Company, LLC and provided a brief overview of the company and abatements sought. Cyanco Company, LLC manufactures and markets chemicals products. The company produced solid to liquid systems, cyanide control systems, peroxide assisted leaches, analyzers and sodium cyanide for the gold mining industry. The company started producing liquid sodium cyanide in 1990 at a single plant in Winnemucca, Nevada. The original plant was designed to produce 28 million pounds of product annually. A second plant came online in 1997 and investments had been made in both plants over the years to debottleneck, implement improvements and enhancements and increase production. Today, the two plants had production capacity of over 240 million pounds annually. The company's expansion would generate 20 full-time jobs at an average of $44.53 per hour and an approximate capital equipment investment of $11 million. Mr. Mudd was joined by Paul Rostek, President and General Manager, Cyanco Company, LLC.

Mr. Paul Rostek advised Cyanco Company, LLC was considering expanding its Humboldt County facility. The project would involve the establishment of a new solid sodium cyanide manufacturing facility with an annual production capacity of 60 million pounds. The company would export 100% of product from its new solids facility to serve its customers in Canada, Mexico, Texas and other locations outside of Nevada. Over the company's history in Nevada, it has delivered more than two billion pounds of product safely without incident. Mr. Rostek advised the company also provided annual training exercises for employees, mines and first responders.

Governor Sandoval noted the company was considering both Texas and Nevada and asked about the company's next steps should it be awarded the abatements sought. Mr. Rostek advised the company anticipated making its decision very swiftly and advised the company was still in discussions regarding incentives at the local level.

Mr. Kramer asked what led the company to consider expanding in Winnemucca. Mr. Rostek advised Cyanco Company, LLC has been a proud member of the Winnemucca and Humboldt County communities for more than 25 years and enjoyed an excellent working relationship with the city and the county. Additionally, the company currently had two solution trains. If the Nevada mining requirements increased, the solids plant could accommodate a third train for converting excess into solids for global shipping. Therefore,

AMERICAN OVERSIGHT

the Winnemucca location represented a much broader strategic importance than just the initial solids plant. It could also be the launching pad for further expansions in Winnemucca.

Secretary of State Cegavske highlighted the company's letters of support for the application and noted the local communities were very supportive of the company's potential expansion.

Dr. Dana Bennett advised she would be abstaining from voting on Agenda items 5C and 5D as Cyanco Company, LLC was a member of Nevada Mining Association's governing board of directors.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE ABATEMENT APPLICATION OF CYANCO COMPANY, LLC FOR A SALES TAX ABATEMENT, MODIFIED BUSINESS TAX ABATEMENT AND PERSONAL PROPERTY TAX ABATEMENT AS PRESENTED IN AGENDA 5C AND CATALYST FUND GRANT IN AN AMOUNT NOT TO EXCEED $100,000, AS DESCRIBED IN AGENDA ITEM 5D. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

E. G4 WORKS, LLC

- **AVIATION SALES TAX ABATEMENT**
- **AVIATION PERSONAL PROPERTY TAX ABATEMENT**

Mr. Michael Walsh, Vice President of Economic Development, LVGEA, presented G4 Works, LLC and provided a brief overview of the company and abatements sought. G4 Works, LLC operated as a subsidiary of Allegiant Travel Company (Allegiant). Allegiant operated an airline founded in 1998 and was now as one of America's premier ultra-low-cost-carriers, offering non-stop air service to leisure travelers from under-served small and medium-sized communities to world-class destinations. Allegiant provides nonstop, scheduled service from 120 U.S. cities. In addition to its scheduled service, the airline also operated charter service throughout the U.S., Mexico and Canada Within the first year, the expansion would create seven new jobs at an average hourly wage of $20.52 per hour and include capital investments of approximately $6.2 million in capital equipment and $595,564 investment in aviation parts over the forthcoming 20 years. Mr. Walsh was joined by Mr. Scott Sheldon, Chief Financial Officer and Mr. Jonathan Jackson, Specialist, Government Affairs, Allegiant Travel Company.

Mr. Sheldon advised G4 Works, LLC was considering establishing an aircraft maintenance and distribution center in southern Nevada. The project would create a stock warehouse in Las Vegas. This warehouse would contain aircraft parts and tools capable of servicing Allegiant Travel Company's planes at the Las Vegas McCarran International Airport, as well as at other airports across the Allegiant network and strengthen the operational efficiency of Allegiant's aircraft maintenance in the region.

AMERICAN OVERSIGHT

Governor Sandoval inquired about the specific skill sets sought for the jobs in the company's application. Mr. Sheldon advised the company would be seeking to fill a variety of positions including parts clerks, technical purchasing skill sets and other technical expertise in the areas of parts procurement.

Governor Sandoval asked if the company planned to do the maintenance on its new western fleet in Las Vegas. Mr. Sheldon advised the parts and tooling support would be housed out of Las Vegas. Currently, Allegiant was at the tail end of a complete fleet transition from an MD-80 operator to an all airbus operator. This would involve significant network configuration changes. The company planned to use Las Vegas as a launching ground and support base for its western destinations. Historically, the company has used Arizona as a teardown facility for its MD-80 fleet in addition to its parts support. The fleet transition provided an opportunity and enhance its Southern Nevada activities and operations.

Mr. Kramer commended Governor Sandoval and Director Anderson, for their involvement in passing the aviation abatement legislation. G4 Works, LLC's application was in complete alignment with the intent of attracting, retaining, and growing aviation operations in Nevada.

Governor Sandoval concurred on the importance of the bill and noted it had greatly increased Nevada's competitiveness in this area.

A MOTION WAS MADE BY DR. BENNETT TO APPROVE THE ABATEMENT APPLICATION OF G4 WORKS, LLC, FOR AN AVIATION SALES TAX ABATEMENT AND AN AVIATION PERSONAL PROPERTY TAX ABATEMENT AS PRESENTED IN AGENDA ITEM 5E. THIS MOTION WAS SECONDED BY DR. WELDON HAVINS. THE MOTION PASSED UNANIMOUSLY.

6. ABATEMENT APPLICATIONS FOR DIRECTOR APPROVAL

A. FIGURE TECHNOLOGIES, INC.

- **SALES TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Stan Thomas, Executive Vice President, Economic Development Authority of Western Nevada (EDAWN) presented Figure Technologies, Inc. and provided an overview of the company and abatements sought. Figure Technologies, Inc. is a financial technology company with the mission of leveraging blockchain, AI, and advanced analytics to unlock new access points for consumer credit products that can transform the financial lives of its customers. The company provides home equity release solutions, including home equity lines of credit, home improvement loans and home buy-lease back offerings for retirement. Concurrently, Figure Technologies, Inc. is building a blockchain protocol for the origination, custody, trading and securitization of whole loans and other assets. The company had significantly de-risked capital for equity release takeout, with participation from multiple leading buy and sell side firms who will transact using the blockchain. The company also provided its members with financial literacy products via content and support

AMERICAN OVERSIGHT

on its site. The products were built on the three pillars of financial literacy, financial empowerment and action. Figure Technologies, Inc. currently had offices in San Francisco, CA and Bozeman, MT. The company planned to hire 65 employees at $30.01 per hour and make and approximate capital investment of $264,615. Mr. Thomas was joined by Ms. June Ou, Chief Operating Officer, Figure Technologies, Inc.

Ms. Ou advised Figure Technologies, Inc. was considering locating a facility in downtown Reno. The proposed facility would house the company's customer service, loan servicing, financial advisory and engineering operations. Ms. Ou noted the company had been pleased with Reno thus far and generally impressed with the local and state government in terms of their commitment to the residents of Nevada.

Governor Sandoval inquired about the company's workforce and recruitment requirements. Ms. Ou advised the company sought to fill a variety of positions. There would be customer service positions which may be of interest to graduates of UNR. These jobs could also provide pathways to certified financial planning certifications or registered investment advisors. The company would also be hiring positions in asset management, marketing and engineering.

Governor Sandoval noted the company has already made an initial connection with UNR and suggested the company also connect with UNLV. Ms. advised the company planned to be involved in the local community and engaged with the universities. Engineers at the company's Montana facility often volunteered to teach University classes.

Governor Sandoval asked about the company's next steps should it be awarded the abatements sought. Ms. Ou advised the company had already put recruitment plans in place for the Reno facility.

Mr. Kramer suggested the company might, at some point, be interested in connecting with an existing Reno based company called Filament, an innovative startup that develops blockchain solutions to leverage industrial internet of things data.

Director Anderson advised the company would be returning with a Catalyst Application for the September 20, 2018 Board Meeting. There would also be discussions around WINN funding to assist in building a pipeline of qualified employees.

Governor Sandoval noted it was tremendous to have a company of this caliber see Reno and Nevada as a place to locate, grow and thrive.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6A.

AMERICAN OVERSIGHT

B. POLARIS INDUSTRIES, INC. – Catalyst Fund

Mr. Haskin, NNDA, presented Polaris Industries, Inc.'s Catalyst Fund application. Polaris Industries, Inc. designs, engineers, manufactures and markets power sports vehicles worldwide. The company offers ORVs, including all-terrain vehicles and side-by-side vehicles for recreational and utility use; snowmobiles; motorcycles; and low emission, light duty hauling, passenger, commercial and industrial vehicles, as well as snow bike conversion kit systems. Polaris Industries, Inc. also produces or supplies various replacement parts and accessories and manufactures, distributes, retails, and installs aftermarket parts and accessories for light trucks, jeeps, sport-utility vehicles, and other four-wheel drive vehicles. The project would create 64 new jobs at an average hourly wage of $21.95 an hour with an approximate investment of $13.6m in capital equipment. The company's catalyst application was in addition to its application for standard abatements at the March 15, 2018 GOED Board Meeting where the company was approved for a Modified Business Tax abatement, Sales and Use Tax abatement, and a Personal Property tax abatement. Mr. Haskin was joined by Mr. Paul Eickhoff, Senior Director of Distribution, Polaris Industries, Inc.

Mr. Eickhoff advised Polaris Industries, Inc. would be establishing a new western United States distribution center in Fernley, Nevada. The company currently had existing distribution centers in Ohio and South Dakota and was looking for western United States presence to maximize efficiency and delivery speed to the company's customers. Mr. Eickhoff noted the company appreciated being considered for the Catalyst Fund grant and looked forward to a continued partnership with the state of Nevada, Lyon County, and city of Fernley.

Director Anderson noted Polaris Industries, Inc. was creating quality jobs with good wages and he looked forward to seeing the continued growth of the company in Nevada. Director Anderson also thanked Lyon County for its assistance in the Catalyst Fund grant process.

DIRECTOR ANDERSON APPROVED THE CATALYST FUND GRANT IN AN AMOUNT NOT TO EXCEED $100,000, AS DESCRIBED IN AGENDA ITEM 6B.

7. WORKFORCE INNOVATION FOR THE NEW NEVADA (WINN) FUND PROGRAM FOR BOARD APPROVAL

A. RATIFICATION OF SUPPLEMENTAL NUTRITION ASSISTANCE PROGRAM (SNAP) RECIPIENT PILOT PROGRAM – Requesting funding for pilot program, not to exceed $210,000 – approved by Director at March 15 Board meeting, now to be approved by Board.

Director Anderson advised this item had initially been approved at the March 15, 2018 Board Meeting. However, the dollar amount exceeded Director approval. Therefore, today's agenda item would comprise an update and a ratification of the item. Director Anderson introduced Ms. Stacey Bostwick, Workforce Development Program Coordinator, GOED

AMERICAN OVERSIGHT

Ms. Bostwick advised this application pertained to phase two of the project. The GOED Board had also approved an appropriation for phase one which was launched in January 2018. Western Nevada College was the primary education provider in phase one with an initial plan to serve 20 individuals on SNAP. Phase two is a program expansion to offer an additional 100 placements. Both Truckee Meadows Community College and Western Nevada College were gaining impetus with these programs. Therefore, there would be robust program data available next quarter. Ms. Bostwick advised that utilizing state funding, such as WINN, or local funding for investments in workforce training, produced potential to unlock federal funding for educational institutions and generate opportunities for program development and expansion to meet the demands of local employers.

Governor Sandoval asked if the program would also be made available in Southern Nevada. Ms. Bostwick advised all existing WINN funded projects in manufacturing, technology and health would be used as a platform to expand on a wider level.

Governor Sandoval commended the program and noted it provided individuals an opportunity to enter or re-enter the workforce and access quality employment, wages and benefits.

A MOTION WAS MADE BY MR. BARRETT TO APPROVE THE RATIFICATION OF THE SNAP PILOT PROGRAM AS PRESENTED IN AGENDA ITEM NUMBER 7. THIS MOTION WAS SECONDED BY DR. HAVINS. THE MOTION PASSED UNANIMOUSLY.

8. WORKFORCE INNOVATION FOR NEW NEVADA (WINN) FUND PROGRAM FOR DIRECTOR APPROVAL.

A. GROWING THE NURSING WORKFORCE TO IMPROVE POPULATION HEALTH OUTCOMES AND CREATE JOBS IN THE STATE OF NEVADA
Request for approval to enter into a WINN Grant agreement not to exceed $90,000.

Ms. Bostwick advised Agenda item 8. would be moved to the September 20, 2018 GOED Board Meeting. The project scope had recently changed due to additional employer partners wishing to participate.

9. PERFORMANCE MEASURES REPORT

Bob Potts, Research Director, GOED presented the GOED Performance Measures report covering economic development activity in Q2 of 2018.

There were 35 assisted companies reported in the first half of 2018. Of these, 21 are new to Nevada and 14 are existing companies expanding operations. These companies are expected to add 2,294 jobs to Nevada's economy in the next two years and to more than double that count once they are fully staffed.

AMERICAN OVERSIGHT

Of the 35 companies, 34 percent were manufacturers followed by logistics and operations (33 percent), and information technology (11 percent). The remaining 20 percent were essentially evenly split between the aerospace, tourism, healthcare and finance sectors.

The average hourly wage paid by companies assisted this year stands at $28.59. This reflects a $7.71 improvement over what it was for the same period last year when they stood at $20.88.

Capital investment by the 35 companies assisted this year currently stands at $329.8 million. This reflects a $153.2 million, or 86.7 percent improvement over what it was the same period last year.

Regarding recruitment activity, there were 23 wins in the first quarter of 2018. This represents a 53.3 percent increase from both the previous quarter and the first quarter of 2017. Activity in the earlier stages of the recruitment pipeline also showed marked improvement. When compared to last quarter, New Leads and Prospects were up by 52.8 and 8.4 percent, respectively; when compared to last year, they were up by 91.9 and 38.5 percent, respectively.

In the first quarter, there were an additional 10 leads and two prospects added to the Global Recruiting Pipeline. After removing those which have become inactive, the current inventory of all active global leads and prospects now stands at 46 and 12, respectively.

Performance activity for the Nevada Procurement Technical Assistance Center (PTAC) through the first nine months of this fiscal year had been exceptionally strong. Year to-date, the number of contracts was already 43.5 percent above last year's total and the contract amount even greater at 125.6 percent. The number of clients had slipped slightly in the most recent quarter, but the year-to-date average was still well above historic annual counts. The Nevada PTAC credits much of its recent success to resource partners like the U.S. Small Business Administration, the Nevada Department of Business and Industry, the Nevada Small Business Development Center and local chambers of commerce in promoting their free counseling services, training seminars and networking events.

In 2017, the number of Certified Emerging Small Businesses (ESB's) expanded by 34.2 percent and now stands at 1,139. For the year, the number of ESB's solicited to submit a quote, bid, or proposal on a contract improved by 335.0 percent when compared to 2016. This significant growth was largely the result of a broad outreach campaign by the Clark County School District. From 2016 to 2017, the number, amount, and average contract amount grew by 4.3, 7.9, and 3.4 percent, respectively.

Over the past two quarters, customers responded with perfect scores to the Nevada Film Office (NFO) Client Satisfaction Survey. Only once before in 2014 was customer satisfaction with the NFO this high. The Index is an aggregate measure on how customers

AMERICAN OVERSIGHT

rated their experience on availability, responsiveness, knowledge, willingness to help, and overall level of service. Since inception in 2014, client responses to the Nevada Film Office's Satisfaction Survey have consistently been very good.

The Community Development Block Grant Program (CDGB) underwent some big changes in 2017 when Carson City reverted to the state's CDBG program. As an Entitlement program, Carson City's focus is urban with different priorities than that of the GOED-CDBG rural programs. In 2018, there were 14 grants totaling $3,524,603. Rural Nevada received 9 grants with a total allocation of $3,061,919 and Urban Nevada received five grants with a total allocation of $462,684.

The number of workers in Nevada's economy continues to set record levels and currently stands at 1,374,200. This reflects a gain of 261,600 jobs since the recessionary low and 76,900 above the pre-recession high. Nevada currently has the fastest private sector job growth in the country. The unemployment rate currently stands at 4.8 percent; a 0.3 percentage point improvement from this time last year and 8.9 points below the recessionary high of 13.7 percent. The prerecession unemployment low was 3.9 percent.

With the addition of 210 jobs, there are currently 14,300 workers employed in Nevada's Aerospace and Defense sector. Average annual earnings also improved by $380 and now stand at $85,500. When compared to last year, there had been a 5.9 percent increase in jobs and a 1.8 percent increase in earnings.

The number of jobs in Nevada's Business Information Technology sector expanded in the second quarter with the addition of 220 positions. Average earnings were essentially unchanged with only a slight improvement of $80 per year. For the year, job counts had improved by 3.8 percent and earnings by 1.7 percent.

When compared to last quarter, an additional 1,200 jobs were added to Nevada's Health and Medical sector for a total of 111,800 workers employed. Growth in earnings, however, was flat and currently stands at $56,400. When compared to last year, job counts in Nevada's healthcare sector had expanded by 5.0 percent and earnings by 0.6 percent.

There are currently 54,200 workers in Nevada's Natural Resource Technologies sector with the addition of 1,760 jobs in the second quarter. Average annual earnings had been unchanged and currently stand at $66,400. When compared to last year, job counts had improved by 8.7 percent and earnings by 1.2 percent.

Although there was a slight annual earnings improvement of $110 in Nevada's Manufacturing and Logistics sector, job counts improved by more than 2,700 workers in the second quarter. Overall, the sector now employs 125,100 workers with average annual earnings of $59,400. For the year, jobs had grown by 6.29 percent and earnings by 3.2 percent.

Growth has been strong in Nevada's Manufacturing sector with the addition of 1,340 workers in the second quarter. Currently there are 46,200 workers employed in the sector

AMERICAN OVERSIGHT

making, on average, $55,900 per year. Since last year, job counts had grown by 7.2 percent and average annual earnings by 1.8 percent.

10. DIRECTOR'S REPORT – REVIEW AND DISCUSSION

Director Anderson advised the Governor led Basque Region Trade Mission had proved very productive. The delegation had the opportunity to meet with a large group of commercial entities in conjunction with higher education institutions.

A month prior to the launch of Nevada Global, GOED implemented a soft launch/pilot which generated a significant amount of interest. As part of the soft launch Nevada Global conducted its first recruiting trip to Poland led by GOED's Director of Special Projects, Pawel Pietrasienski. Mr. Pietrasienski conducted a one-week boot camp for thirty companies in Lublin, Poland in partnership with the Lubelskie Government and the Polish American Chamber of Commerce of Nevada. Five of the companies that participated in the boot camp would visit Nevada for one week in July for an orientation of Nevada Global.

In the forthcoming months, an inbound delegation will be visiting from Spain. This delegation would also participate in a Nevada Global boot camp as preparation to enter the U.S. market

In June 2018, GOED signed an MOU with the World Trade Center (WTC), which was owned and operated by the Las Vegas Convention and Visitors Authority. This would further enhance collaboration to build the Las Vegas brand as a global business destination and grow international visitation to both the destination and to tradeshows like CES. Additionally, the MOUs provided the opportunity to expand business opportunities across several industry sectors.

During the months of May and June 2018, GOED International Trade Division provided financial assistance awards through the State Trade Expansion Program Grant to 9 companies for a total amount of $43,000. The financial assistance awards are used to assist companies by offsetting the cost of engaging in export sales activities. GOED had applied for additional funding in order to expand the program in the next biennium.

Nevada Institute for Autonomous Systems (NIAS) has intensified human resource efforts to stand up the Nevada Drone Center of Excellence (NDCOE) for Public Safety and recently completed a Nevada Drone Industry State-wide survey that reflected strong support toward the State of Nevada and NIAS to open the NDCOE. NIAS is in the process of conducting sponsorship reach outs and standing up a fund-raising capability from ground zero. Safe and successful UAS operations rely on quality training, end user education and maximizing public safety processes.

GOED and Bank of Nevada approved two more Nevada Opportunity Fund Loans totaling $150,000. Senate Bill 126 created the Nevada Opportunity Fund. The Nevada Opportunity

AMERICAN OVERSIGHT

Fund was created during the last legislative session to help provide small business owners access to funding. One million dollars of state funds were set aside and available through the Governor's Office of Economic Development to assist businesses unable to meet conventional small business loan qualifications. The Opportunity Loan program had now approved 4 of 5 applicants for a total of $225K. GOED and Bank of Nevada were developing the program and marketing to expand into rural areas.

The Community Development Block Grant (CDBG) approved eight projects for full funding, one project approved for partial funding with conditions. An additional six entitlement projects for ~$500K for Carson City were also approved. This was a great investment in the rural communities, and certainly more community development focused versus pure economic development. This was an important piece of the puzzle when looking at rural communities and the opportunities for CDBG grants and the Main Street Program.

The IRS certified Nevada's 61 Opportunity Zone census tracts. GOED was currently looking to build a task force to ensure investment opportunities are highlighted to as many people as possible and to encourage local investment.

The Nevada Film Office's new online locations directory was completed and online. The Directory was designed to better connect potential film locations around Nevada with production companies, giving local businesses more control and more opportunity.

Together with the Nevada Department of Transportation (NDOT), Nevada Procurement Technical Assistance Center (PTAC) went on an outreach trip at the beginning of May to Winnemucca, Lovelock, Elko, Battle Mountain, Ely and Eureka. The purpose was to promote PTAC's free procurement technical assistance regarding public sector contracting and subcontracting, provide training on how to do business with the government, and deliver training on how to do business with NDOT. A total of 11 business representatives attended the workshops.

The Workforce Innovations for New Nevada (WINN) program is expanding and growing. A focus issue was establishing a pipeline of nursing and health professionals. The first stage of the solution strategy would be rolled out from July to December 2018 and would target faculty development for the Certified Nursing Assistant (CAN) programs offered at the high school level. Director Anderson highlighted Ms. Bostwick as a tremendous resource for the WINN program.

Director Anderson commended Mr. Potts, GOED's Research Director, for his contribution to the state and the nation regarding workforce development. Director Anderson noted Mr. Potts' comprehensive understanding of workforce development, how it affects the ability to grow in a sustainable way, and how to build the infrastructure and pipelines for employers immediate and future needs.

AMERICAN OVERSIGHT

In June 2018 GOED welcomed Mr. Joel Lenz as its new Mining Industry Specialist. Mr. Lenz had over 35 years of Nevada mining and leadership experience culminating as the General Manager of the Newmont Phoenix mine. Mr. Lenz was based in GOED's Elko office.

11. STATE OF NEVADA UNEMPLOYMENT RATE UPDATE ABATEMENT APPLICATIONS FOR BOARD APPROVAL as established by the Research and Analysis Division of the Nevada Department of Employment, Training and Rehabilitation.

Agenda item 11. was for information only. GOED is committed to providing this information for each Board meeting. There were no questions or comments regarding this item.

12. PUBLIC COMMENT

Governor Sandoval asked if anyone from the public sought to make public comment. No public comment was provided.

13. ADJOURNMENT

A MOTION WAS MADE BY SECRETARY CEGAVSKE TO ADJOURN THE MEETING. THIS MOTION WAS SECONDED BY DR. BENNETT. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

- Six Months In, Tax Reform Is Paying Off (see below)

"There's never been a better time to hire in America, to invest in America, and to start living the American Dream."
– President Donald J. Trump

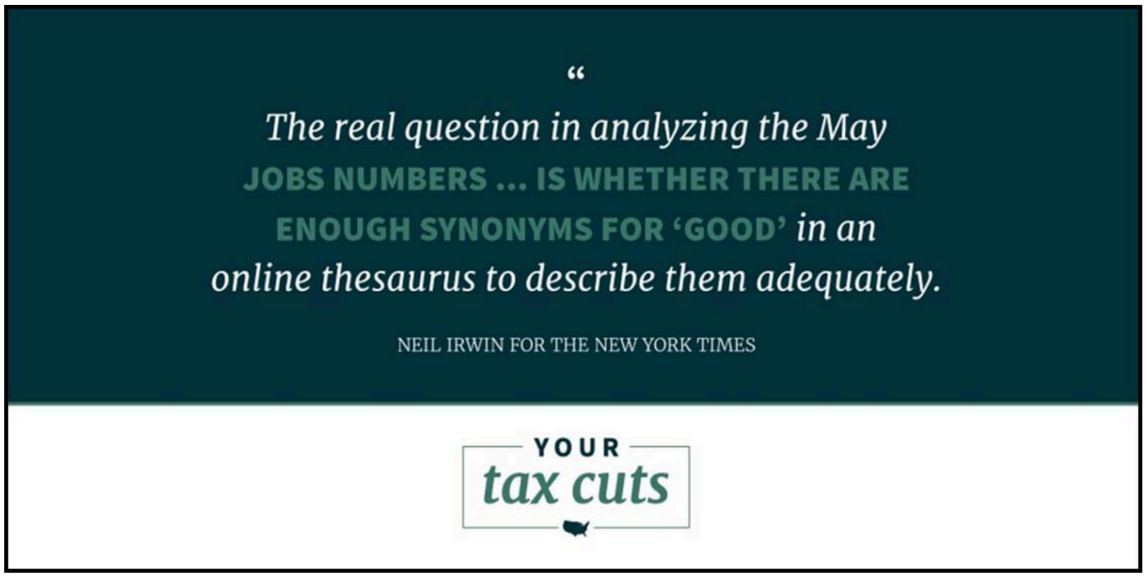
AMERICAN OVERSIGHT

Factsheet | Six Months Later: Tax Reform Delivers An Economic Resurgence

A BOOMING ECONOMY: Just 6 months after President Donald J. Trump signed the Tax Cuts and Jobs Act into law, the American economy is booming and confidence is soaring.

- President Trump's tax cuts have revitalized the American economy, with 54 percent of Americans now rating the economy as good or excellent, the highest ever recorded by CNBC.
- Businesses are bringing money held overseas back to the United States.
    - In the first quarter of 2018, more than $300 billion was repatriated back to the United States, setting a new record high, according to the Bureau of Economic Analysis (BEA).
- Optimism among employers has reached historic highs in the 6 months since the tax cuts.
    - Manufacturer optimism has reached its highest level in the 20-year history of the National Association of Manufacturers survey.
    - Small business optimism stands at its second-highest level on record since the National Federation of Independent Business began its survey 45 years ago.
- The economy looks poised to continue its winning streak, with many economists expecting second quarter GDP growth to exceed 4 percent.

A WIN FOR AMERICAN WORKERS AND FAMILIES: American workers and families have seen some of the biggest benefits from President Trump's tax cuts.



- Americans are seeing more money in their paychecks following President Trump's cuts.
    - More than 6 million American workers have received a bonus as a result of the tax cuts.
    - In the first 3 months of 2018, nominal hourly compensation for workers grew at its fastest rate in at least a decade.
- Nearly two-thirds of Americans believe now is a good time to find a quality job, according to Gallup.
- The unemployment rate has fallen to 3.8 percent, matching the lowest level in nearly 50 years.
- Job openings reached a record high of 6.7 million in April 2018, topping the number of job seekers for the first time on record.
- Families are benefiting from lower utility bills, as 30 million Americans in at least 30 states have had their utility bills cut as a result of the tax cuts.
- American workers can expect to see even more gains moving forward, as employers plan to hire more workers and boost compensation according to recent surveys.

CRITICS' PREDICTIONS FALL FLAT: The positive results of President Trump's tax cuts are proving the alarmist opponents flat-out wrong.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006407

- The dire predictions by critics of the Tax Cuts and Jobs Act simply do not match up with the incredible results seen over the last 6 months.
- House Minority Leader Nancy Pelosi (D-CA) referred to the bill to "Armageddon."
- Senate Minority Leader Chuck Schumer (D-NY) claimed, "what has been sold as a job creator and wage booster will, of course, do little of either."
- The day after President Trump's election, the liberal columnist and economist Paul Krugman said, "we are very probably looking at a global recession, with no end in sight."

[Treasury, IRS Announce Development of Postcard-Size Form 1040 for 2019]

Washington— Delivering on the promise to simplify taxes for the American people, the U.S. Department of the Treasury and the Internal Revenue Service (IRS) today announced that Americans will be able to fill out their individual income tax returns on a single postcard-size form for the 2019 tax season.
The 2019 IRS Form 1040 will replace the current Form 1040, as well as the Form 1040A and the Form 1040EZ. The IRS circulated a copy of the new form and will work with the tax community to finalize the streamlined Form 1040 over the summer.

"As part of the historic Tax Cuts and Jobs Act, this Administration committed to making taxes simple and fair for American families. We are delivering on this promise," said Secretary Steven T. Mnuchin. "The new, postcard-size Form1040 is designed to simplify and expedite filing tax returns, providing much-needed relief to hardworking taxpayers."
This simplified Form 1040 will streamline tax returns so that all 150 million taxpayers can use the same form. The new form consolidates the three versions of the 1040 into one simple form. The IRS will still obtain the information from each taxpayer needed to determine their tax liability or refund.

SBA Administrator Linda McMahon | Nurturing a Small Business Boon

Mike Zaffaroni calls the newest piece of equipment at his landscaping company in Jacksonville, Florida, his "Tax Cut Truck."

He had long wanted to expand the services he offers to his customers and says the tax cuts President Donald J. Trump signed into law six months ago were the motivation he needed to buy the $80,000 truck and forklift.

"Without the tax cuts, we're not so sure it would have been the right move for us financially," he said.

Under the new tax law, Mr. Zaffaroni will be able to write off the entire cost of the purchase this year. Along with the lower tax rates and other benefits of the law, he says his accountant estimates he'll save 7 percent to 10 percent on his taxes this year. That's a big saving for a small company like his, and it's money he'll reinvest in his business.

AMERICAN OVERSIGHT

“We’re going to be able to expand, we’re going to add a product line, we’ll be able to deliver more materials than we were able to before,” Mr. Zaffaroni said. “We’ve actually already hired another driver, so that also adds another job.”

I toured Mr. Zaffaroni’s company, Liberty Landscape Supply, soon after he was named Florida’s National Small Business Person of the Year, and just days after the truck was delivered.

“It makes it very real,” he told me. “A lot of America doesn’t really understand the implication these tax cuts have on each individual small business.”

Under the Tax Cuts and Jobs Act President Trump signed into law, most small businesses will now be able to deduct 20 percent off their business income in addition to having their taxable income taxed at lower rates. And for the first five years, they’ll be able to write off investments in new equipment the year the investment is made.

As head of the United States Small Business Administration, I constantly hear from small business owners like Mr. Zaffaroni who are investing their tax savings in their companies and their employees — raising wages, providing bonuses and benefits, and creating more jobs.

As we mark six months since Mr. Trump signed the Tax Cuts and Jobs Act into law, we continue to see more Americans working. The unemployment rate of 3.8 percent matches the lowest level it’s been in nearly 50 years. The unemployment rate for women is at the lowest level since 1953. African-American and Hispanic unemployment rates have hit record lows. A Gallup poll found two-thirds of Americans believe now is a good time to find a quality job. The number of job openings is at a record high and, for the first time on record, there are more job openings than unemployed people looking for work.

Families all across the country are not only seeing more take-home pay because their taxes are lower. The paychecks for workers are getting bigger, too. In the first quarter of 2018, private sector workers saw their hourly compensation increase at a 4 percent annual rate — the fastest pace in at least 12 years. As a result of the tax cuts, at least 6 million workers have already seen bigger paychecks, bonuses and increased benefits.

With more money in their pockets, Americans are spending again — and that’s good news for small businesses. After years of stagnation, small businesses now have the confidence they need to hire more workers or purchase new equipment, like the truck at Liberty Landscape Supply. In surveys done by the U.S. Chamber of Commerce, CNBC, the National Federation of Independent Businesses and the National Association of Manufacturers, members report their highest-ever levels of optimism. A survey done by Bank of America found that 37 percent of small business owners are planning to invest in their businesses this year as a result of the tax cuts.

Surrounded by germinating flowers and tree saplings, Mr. Zaffaroni means it when he says his business is growing. Since buying a small landscaping company with just one employee in 2007, business has blossomed. Liberty Landscape Supply now has six full-time employees, a farm and two locations, and he’s making plans to open more. He needs cash to make that happen, and the Tax Cuts and Jobs Act is providing the seed money he needs.

“It sounds like it was designed specifically for businesses like mine and we want to take advantage of it,” he said.

Six Months In, Tax Reform Is Paying Off

Today on Fox Business "Mornings With Maria," Administration officials outlined the many benefits Americans are experiencing as a result of President Trump's tax cuts and reforms after just six months.

STEVEN MNUCHIN, SECRETARY OF THE TREASURY: "We're beginning to see the impact of the tax cuts on bigger growth, a healthy economy, and hardworking taxpayers getting money back."

> MNUCHIN: "As we said all along, the President's economic agenda was focused on tax cuts, regulatory relief, and trade, and we're really seeing now the impacts of tax cuts and regulatory relief kick in. As you commented, we're expecting a very big quarter, and let me give the disclaimer, I have no advanced notice as to what it is. The Atlanta Fed is projecting 4.7. Whether we hit that or not, this is an enormous quarter, and we're beginning to see the impact of the tax cuts on bigger growth, a healthy economy, and hardworking taxpayers getting money back."

ALEX ACOSTA, SECRETARY OF LABOR: "Everyone is winning with these tax cuts."

> ACOSTA: "We've had 1 million new jobs alone since the tax cut, 3.4 million since President Trump was elected. And it's not just the new jobs. It's wages are going up. Everyone is winning with these tax cuts."

MICK MULVANEY, DIRECTOR OF THE OFFICE OF MANAGEMENT AND BUDGET: "It's exactly what we hoped it would be."

> MULVANEY: "Add to that the confidence levels, business, individuals, everybody looks at the government now and says you know what, they're not out to get us, they're not going to stick it to us. They're actually going to let us succeed and let us prosper without getting in our way. And that's why you see consumer confidence up, business confidence up, foreign investors now have more confidence in the United States, so it's exactly what we hoped it would be."

LINDA MCMAHON, ADMINISTRATOR OF THE SMALL BUSINESS ADMINISTRATION: "It's amazing what tax cuts have done, and how it has stimulated the economy."

> MCMAHON: "For the first time, we have more jobs than we have people looking for them … It's amazing what tax cuts have done, and how it has stimulated the economy."

IVANKA TRUMP, SENIOR ADVISOR TO THE PRESIDENT: "Families are going to experience the relief, the doubling of the child tax credit, which is enormously important to American families and working families."

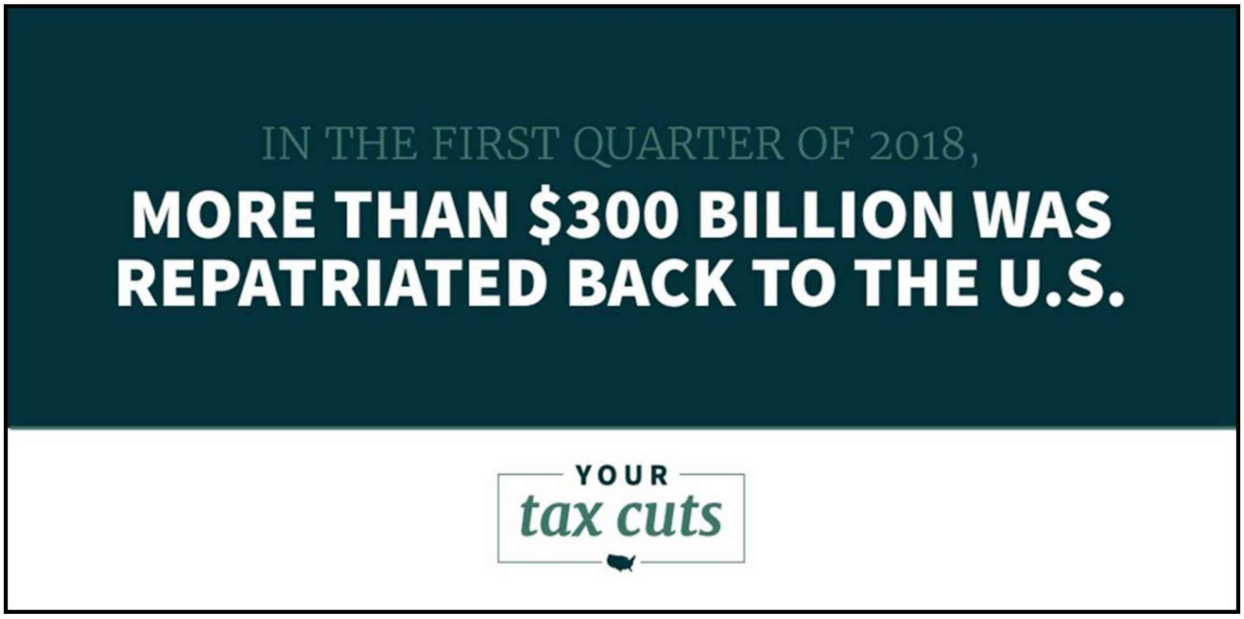
AMERICAN OVERSIGHT

TRUMP: "We see it every single day in terms of the amount people are investing in their businesses, they're becoming more competitive, they're more able to compete in the global landscape. Families are going to experience the relief, the doubling of the child tax credit, which is enormously important to American families and working families, as the cost of raising children has gone up so dramatically, yet for so long until recently wages have all been stagnant. So it's a very exciting time, and I think we see it manifested in the optimism of the American worker and of American small business and large business."

KELLYANNE CONWAY, COUNSELOR TO THE PRESIDENT: "If there are more jobs available than job seekers, it gives you freedom."

CONWAY: "You talk about the metrics surrounding the tax cut, but it's the buoyancy, it's the confidence that people are spending their money, they can make plans. If there are more jobs available than job seekers, it gives you freedom. You're not stuck in your job."

LARRY KUDLOW, NATIONAL ECONOMIC COUNCIL DIRECTOR: "A lot of our critics said you could never beat two percent [economic growth]. We're now beating three percent, and we're on an upswing."



KUDLOW: "If anything it's come on faster and stronger. It's a very healthy economy right now. Folks said it couldn't be done. You know, GDP may be an abstract number, but it's a good measure of the overall economy. A lot of our critics said you could never beat two percent. We're now beating three percent, and we're on an upswing coming up when the numbers come out for the second quarter, and I think it's going to hold up."

KEVIN HASSETT, CHAIR OF THE COUNCIL OF ECONOMIC ADVISERS: "Not only are American firms putting money back to work in the U.S., but foreign firms are as well."

HASSETT: "If we look at the economic data, the big thing that we see is that the capital spending explosion that we predicted would happen – which is ultimately going to benefit workers because the jobs are coming home and the wages go up when there is more capital – it's happening already. In fact, if you look even at foreign direct investment, it skyrocketed in the first quarter because not only are American firms putting money back to work in the U.S., but foreign firms are as well."

JOVITA CARRANZA, TREASURER OF THE UNITED STATES: "It's a great, great return for the taxpayers who have been waiting for decades."

CARRANZA: "It's a comprehensive tax reform that not only impacts small businesses, entrepreneurs, start-ups, mid-sized companies with their capex expenditures, now they're affording better benefits, health benefits for their employees, they're matching 401(k) plans, they're actually promoting from within. So it's a great, great return for the taxpayers who have been waiting for decades."

AMERICAN OVERSIGHT

Please let me know if you have any questions.

Thanks,
Nic

AMERICAN OVERSIGHT

THE WHITE HOUSE

Office of the Press Secretary

For Immediate Release June 29,2018

REMARKS BY PRESIDENT TRUMP
CELEBRATING THE SIX-MONTH ANNIVERSARY
OF THE TAX CUTS AND JOBS ACT

East Room

12:23 P.M. EDT

THE PRESIDENT: Thank you very much, everybody. The economy is indeed doing well. (Applause.) Six months ago, we unleashed an economic miracle by signing the biggest tax cuts and reforms -- I have to add the word "reform." Very important word. But the tax cuts is what got us there, and that's what's really doing it. The biggest tax cuts in American history.

Now it's my great honor to welcome you back to the White House to celebrate six months of new jobs, bigger paychecks, and keeping more of your hard-earned money where it belongs, in your pocket or wherever else you want to spend it. (Applause.)

Before going any further, I'd like to address the horrific shooting that took place yesterday at Capital Gazette newsroom in Annapolis, Maryland. This attack shocked the conscience of our nation, and filled our hearts with grief.

Journalists, like all Americans, should be free from the fear of being violently attacked while doing their job. To the families of the victims: There are no words to express our sorrow for your loss. Horrible, horrible event. Horrible thing happened. On your suffering, we pledge our eternal support. The suffering is so great. I've seen some of the people. So great. My government will not rest until we have done everything in our power to reduce violent crime and to protect innocent life. We will not ever leave your side. So our warmest, best wishes and regrets. Horrific, horrible thing. Thank you. Thank you. (Applause.)

AMERICAN OVERSIGHT

For today's event, we're honored to be joined by our great Vice President, Mike Pence. Stand up, Mike. (Applause.) Also joining us are Secretary Steven Mnuchin, who's been keeping very busy lately. Steve. (Applause.) Secretary Wilbur Ross. Wilbur. (Applause.) Secretary Alex Acosta. Just came up with a great healthcare plan. (Applause.) Thank you, Alex. Great healthcare plan. People are really liking it. Association. Sonny Perdue, the great Secretary of Agriculture. (Applause.) Small Business Administrator Linda McMahon. Doing an incredible job. (Applause.) Director Mick Mulvaney. (Applause.) And Treasurer Jovita Carranza. Jovita. Jovita. Thank you. (Applause.)

Thanks also to a really great friend of mine, Mississippi Governor Phil Bryant, and all of the other state, local, federal official that have done so much to help us with this incredible tac cut and job plan. You see how it's working. (Applause.) Although, I have to say, I think the cutting of regulations maybe had just as big an impact. (Applause.) I don't want to say this to you, but I think the cutting of regulations had just as big an impact.

I also want to welcome Juanita Duggan, Kay Coles James, Karen Kerrigan, and Michael Bellaman for helping us. (Applause.) Your support has been incredible in getting this very difficult legislation to the finish line and passed. Please stand up. Stand up. What a team. Great team. (Applause.) Great team. Thank you very much.

And there are so many others in the room. You know, you're never going to speak to me again. (Laughter.) But we're not going to give any more names. Right? Let's get down to business. (Laughter.) Other than these names, who are the important ones? Okay?

We're also especially proud of the Republican members of Congress who fought -- I mean, they fought with us. They -- we didn't get a Democrat vote. We didn't get one vote for these massive tax cuts. So I want to thank Roger Wicker, Representative Diane Black, Kevin Brady -- what a warrior. Kevin. Kevin, come on. Stand up, Kevin. Come on. (Applause.) Mike Kelly, my friend. And Jason Smith.

Our great Republican members of Congress worked night and day to score this landmark victory. This really was a landmark victory for their constituents, but much more importantly, for the country. Unfortunately, every single Democrat in the House

AMERICAN OVERSIGHT

and Senate -- that's right, every one single one -- voted against lower taxes for the hardworking Americans. And you see what's happened. It's turned out to be something very special.

The Tax Cuts and Jobs Act slashed income taxes all across the board. We nearly doubled the standard deduction and did double the child tax credit -- (applause) -- which Ivanka wanted very much, I will tell you. Stand up, Ivanka. Stand up, honey. (Applause.) Whoa. She got a bigger hand than the politicians. (Laughter.) You better be careful. That means you're all in trouble.

The typical family of four earning $75,000 will see an income tax cut of more than $2,000 -- and, in some cases, more -- (applause) -- slashing their tax bill in half.

We cut taxes for businesses of all sizes to make this the best place on Earth to start a business, to invest. We have billions and billions of dollars of additional revenue coming in. We lowered the corporate tax rate so the American worker finally has a level playing field. We allowed companies to deduct every single penny of investment in new equipment. And it's called expensing. It's the biggest secret in the plan. I think it'll go down as maybe the most important element. It's one-year expensing. Nobody thought we'd ever see that. So incredible for starting up a business or running a business.

We greatly reduced the burden of the unfair estate tax, commonly known as the "death tax." You know, that's such a big thing. And most farms and most small business will not pay any estate tax or death tax anymore. (Applause.) Such a big thing.

We created opportunity zones to promote more jobs in low-income communities. We opened ANWR -- that's a big one. We opened up ANWR. (Applause.) That was one that they said no President could get it for many years. I wasn't going to do it because I was angry at someone. I said I'm not going to do it. And then when I heard Ronald Reagan couldn't do, nobody could do it, they had been trying for 50 years -- I said, oh, let's do that immediately. (Laughter.) It's like a challenge, right? (Applause.) A challenge. And they've started that process. It's going to be something -- one of the biggest in the world.

We also repealed, in our tax cut plan, we repealed the most, I guess you could say, unpopular thing I've seen in a long time in politics, or in legislation: the individual mandate on

AMERICAN OVERSIGHT

Obamacare. (Applause.) The individual mandate. How about that one? That's not a very good one. That's where you have the privilege of paying a fortune in order to not pay to have bad healthcare. (Laughter.) Think of that. So, in other words, you pay a lot of money not to have healthcare. So it's not working too good. We got rid of it. That's a big thing. We got no credit, but that's okay. (Applause.) That's okay. I've had some people come up to me -- they say they like that as much as the tax cuts. That was a big thing.

And Obamacare is just about over. We have come up with so many plans. And we have a plan coming out -- an additional plan, Secretary Azar -- coming out in a very short period of time, which is going to be -- I think it's going to perhaps match your plan from Department of Labor. It's going to be something very special.

Six months after our tax cuts, more than 6 million workers have received bonuses, pay raises, and retirement account contributions. (Applause.) And one of the beautiful elements of what I do -- I love to see happy faces -- but I'll stand on line sometimes before or after a speech, and I'll be with a lot of people that want pictures; for whatever reason, they want a picture of me. (Laughter.)

And I stand with the police a lot, and I'll see a policeman, and in particular, one in New York City. And he said, "Sir, I want to thank you. You've made me a hero to my wife and to my family. I've always been a horrible investor. But this year, my 401(k)" -- think of it -- "is up like 46 percent," I think he said. "My wife thinks I'm a genius. She thinks I'm the greatest investor for the first time in my life." (Applause.)

And, you know, in terms of value or worth, we've created $7 trillion worth of value for our country. And people don't know this: We're double the size -- almost double the size. Because we hear China -- and China is terrific and our relationship is terrific. We're straightening out the balance, and I think most people want to see that.

But we're the largest economy in the world, by far. And as you know, we've increased a lot over the last one and a half years. But we're almost the double the size of China and far bigger than anybody else. And we're going up very rapidly. And it's going to continue to go up very
rapidly. (Applause.) Biggest in the world, by far. Think of

AMERICAN OVERSIGHT

that. We are the biggest -- did you know that? The biggest economy in the world, by far. That's the only way to do it, right? Good. It really is. It's pretty good. And they helped us a little bit. Right? Just a little bit. That's okay. Every little bit counts.

So the share of small businesses raising benefits and pay has just set a new all-time record, and manufacturing optimism -- to me is so important, because it's all about optimism -- is the highest ever recorded. (Applause.) This is a statistic that's been around for a long time. Highest ever recorded. Hundreds of billions of dollars are coming back from overseas. Over $300 billion was just repatriated into our country in the first quarter alone. Think of that: $300 billion. (Applause.) Money we never would have seen. Trillions more dollars are on their way back.

And as you know, Apple announced they're going to spend $350 billion -- not million. I would have been happy with that too. (Laughter.) But $350 billion is being brought back. I guess the total amount they're bringing back is approximately $230 billion, and they're putting up the rest the old-fashioned way. They're bringing this money back. It would never have come back. They're going to build an incredible campus and lots of other things.

We just left Wisconsin, and what Foxconn is building up in Wisconsin is literally -- and I said it -- the Eighth Wonder of the World. It's incredible what they're doing. Fifteen-thousand jobs. It's going to cost $15 billion. It is something that is so incredible you have to go see it. Nobody would believe what's happening.

More than 100 utility companies have lowered prices as a direct result of our business tax cuts, saving Americans $3 billion on their utility bills. Utility bills are going down.

Unemployment claims are at a 44-year low. (Applause.) That's a good one. Forty-four years. Something I am so proud of -- I love it. Unemployment for African Americans is at the lowest level in the history of our country. (Applause.) Okay? I'm looking at Kevin -- that was a good job. You were right about that, Kevin -- huh? (Laughter.) That was a -- that is something. We were all right. Everybody in this room was right.

AMERICAN OVERSIGHT

And I have to say, unemployment for Hispanic Americans, likewise, is at the lowest point in the history of our country. (Applause.) Unemployment for women -- and now, if you listened to my speech two weeks ago, you would have heard me say is the lowest in 21 years. Now I'm saying it's the lowest in 65 years and soon will be the lowest in history. (Applause.) Big difference -- 21 years, 65 years. Hopefully, in a week or two it will be "history." We're close to history. Sixty-five years is a long time.

I'm also very proud to say that unemployment for the disabled Americans has reached record lows, giving these incredible Americans the chance to realize their unlimited potential. And that's what it is: unlimited potential. (Applause.)

Many former inmates are also getting a second chance at life. We are keeping our promise to buy American and hire American. And what's happening is our economy is so good, our unemployment is so low, and our employment is so high -- maybe that's an even nicer way of saying. And people that want to get a second chance -- inmates, people coming out of jail, where the stigma was so great, people weren't hiring. Businesses weren't hiring. They're hiring them now in record numbers. And you know what? These businesses are saying they are fantastic. They're set.

And there's one gentleman in particular. He hired 10 inmates. Never did it before. And he said -- I wouldn't say he said all of them -- but he said seven of them are so incredible. That's not a bad percentage. I think that's a better percentage than we have. (Laughter.) He said seven of them are as good as he's ever had, and he's going to do a lot more of it. So there's nothing like a great economy to solve that problem, Jared. Right? (Applause.) And, Chris -- thank you very much, Chris. (Applause.)

But this is all because we're one country and, really, one family. And we salute one great and beautiful American flag. We love that flag. (Applause.)

And at last, our country finally has a tax system that is pro-jobs, pro-worker, pro-family, and pro-American. (Applause.)

So, one incredible citizen who has benefitted from our Tax Cuts and Job Act is LaSonya Hill. I love that name, LaSonya. (Laughter.) If I have another daughter, I think I'm

AMERICAN OVERSIGHT

going to name her -- (laughter) -- is that okay? Can I copy it? I like that name. Of Jacksonville, Florida. Great place. I know it well.

LaSonya is the director at customer care at Crowley ~~Marine~~ [Maritime]. Following the Tax Cuts and Jobs Act, Crowley was able to pay employees like LaSonya a big tax cut bonus. They took a lot of money, and they gave it around to the employees. That bonus will help support the education of her two sons, Cameron and Christian. (Applause.) Pretty good, right? Pretty good.

So, we're so happy for your family, and I know your sons are going to make you very proud. They're great young men. And, LaSonya, please, would you say a few words? Please. (Applause.)

MS. HILL: Thank you, Mr. President, for the invite. It's an honor to be here today. As you said, Crowley Maritime was able to benefit from the tax reform by paying employees bonuses. And in return, my family, we were able to invest in our children's education. (Applause.) My son, Cameron, he will be entering into his senior year at Morehouse College in Atlanta, Georgia. (Applause.) And my youngest, Christian Hill, he will be entering into his freshman year at Savannah State, both in the fall. (Applause.)

So because of this, Crowley Maritime is a fantastic company. I've been there 24 years. I'm very honored to work for such a great company, and for the company to benefit from such a great tax opportunity in which they were able to give back to the employees.

And so I want to thank not only Mr. President for allowing us the opportunity to tell our story, but also Crowley as a company that I've been with for so long throughout my career. So thank you again. (Applause.)

THE PRESIDENT: Thank you. Good job. And, by the way, she got the biggest, by far -- (laughter) -- including you, Ivanka, and including all of my political geniuses out here. Great job. It's like you're a professional speaker. Very good.

MS. HILL: Thank you.

THE PRESIDENT: Have you done that before?

AMERICAN OVERSIGHT

MS. HILL: I have not. (Laughter.)

THE PRESIDENT: You have not? That's called potential. (Laughter.) Thank you, honey, very much. It's beautiful -- beautiful family.

Another American who has used his tax cut to give back to others is Guy Berkebile, President of Guy Chemical in Somerset, Pennsylvania -- the great state of Pennsylvania. Incredible place. Guy increased bonuses, raised salaries, and purchased new equipment. Guy has also hired 30 new employees to help meet customer demand, which is actually booming right now. The best he's ever had.

And here with Guy are two of his tremendous employees: Leigh and Deist and Michelle Trulick. We want to ask Guy, maybe, if you could come up, say a few words about the tax cuts and how it's affected your company. And I assume your people that work for you are really happy.

Please. (Applause.)

MR. BERKEBILE: President Trump and the members of Congress who have voted for this tax bill, I can't tell you how much it means to my company and my employees. When I founded my company in 1995, I mortgaged my house seven times in order to pay for the growth of the company over the next 10, 15 years before the company finally got large enough that it could stand on its own.

The money that we are saving from the corporate tax cuts I have reinvested back into our business and into our employees. We recently just built an addition onto our manufacturing facility in Somerset, Pennsylvania. This addition includes new equipment, a new compounding room, and a new lab for research and development that is five times larger than our old lab. (Applause.)

This investment on our company has led to a 35 percent increase in sales over the first quarter of 2018, in addition to the 30 new jobs that we created this year so far. (Applause.)

So with the tax cut money, I have been increasing salaries, and we have also increased bonuses to our employees. I have some of my employees that have come down and are sitting out here in the fourth row. And I have two right here.

AMERICAN OVERSIGHT

Michelle Trulick -- her son also works for us too -- Michelle is one of our line leaders. She is using the additional money from her increased bonus to fix her car, I take it, so she has a reliable way to work every day. (Laughter.) And her and her husband are also taking a vacation, a second honeymoon, to celebrate their 25th wedding anniversary this year. (Applause.)

And Leigh Deist, he's a Navy veteran. (Applause.) We're proud of our servicemen back home. He is our head of maintenance. He's the guy that keeps my plant running. He and his wife have two young daughters under the age of four, so he's using his additional money from his bonus to help offset his expenses for childcare. And they are also taking their first vacation in five years. (Applause.)

President Trump, I'd like to thank you very much for fighting for American businesses and our workers who keep our factories running. (Applause.)

THE PRESIDENT: How did he do? Pretty good, right? (Laughter.) Pretty good. Wow. That's a good combination, I want to tell you. A lot of talent.

I just want everybody to keep up the great work, because common sense is being restored in Washington again because hardworking Americans are in charge of their government once again. Washington tried to change us, but that's not going to happen. Instead, we're changing Washington and we're changing it quickly and for the better. (Applause.)

That's why our economy is booming. That's why our families are thriving. That's why our businesses are growing. And that is why America is winning like never, ever before. We're setting records every day.

These are victories, and they're your victories. And now what we're doing is we're straightening out our trade. Our trade has been a disaster. We were being taken advantage of as a country by many, many countries -- friends and enemies, and those in between. And sometimes our friends, in terms of trade, were treating us worse than the enemies.

And I want to just tell you that's being taken care of very well and very beautifully. Our steel industry is coming back. Never have they seen anything like what's happened over the last four months with steel. They were dumping

AMERICAN OVERSIGHT

steel. Dumping. All over our land, they were dumping steel. And we were losing our steel business.

United States Steel, the head called me up two days ago. He said, it's the most incredible thing that we've ever seen. We haven't expanded in 30 years, we haven't done anything remotely like expansion, and we're now expanding and renovating areas of plants that haven't been used in forever. You remember U.S. Steel was massive. They had plants that went a mile and a half long and they were using little corners of plants. He said, "This has not happened for decades. It's back."

We were in South Carolina the other night, and Georgetown Steel -- Georgetown is a wonderful company -- couldn't make it. They closed four years ago. They announced -- as I literally was getting off the plane, they announced that they were opening up their steel mill; 600 people are employed. (Applause.)

And don't forget: What it means is it means jobs. But we can't lose the steel industry. Steel we need. Certain industries we have to have. But it means jobs. But you know what else it means? Billions of dollars will come into our Treasury. Nobody talks about that. Billions and billions of dollars.

But what's happening with steel, aluminum -- what's happening with other industries where we're working to revive them -- believe it or not, washing machines -- they were dumping washing machines, and they weren't good machines, all over the country. And we put a big tariff on a certain country for doing it. And now we have these washing machine plants that were closed; they're open and they're thriving. (Applause.)

Solar panels, 32 plants -- it's a new industry, so they weren't old. Thirty-two plants all over the country; two were open, the rest had gone out of business. Now those two -- and those two were in bad shape -- now they're doing great and they're looking at 10, 11, and even 12 re-openings of solar plants all over the country. And these are really great panels, so the level of quality.

And just to finish, many countries are calling, saying, "Let's negotiate." (Laughter.) They were never doing that. They're saying, "Let's negotiate, please. Please, we want to negotiate." They weren't doing that before. Of course, I'm not sure if your past representatives would have known the

AMERICAN OVERSIGHT

difference. But let me tell you, they're calling and they want to negotiate. And all we want is fairness.

We're going to be the smart country again, not the stupid country that was taken advantage of by everybody. (Laughter and applause.) And you made this possible. You are all truly making America great again -- a slogan that I'm very proud of. That was a slogan that seemed to have worked.

I tell you what, it was a very special -- and it's so accurate, even more so than America First. You know, America First is very threatening to others. And we don't want to be threatening. But "Make America Great Again," that's what's happening.

We're bringing back our pride. We're bringing back our jobs. We're bringing back our wealth. And for the citizens of this great land, we're bringing back our beautiful American Dreams. We have dreams. You guys have dreams, I'll bet, right? Big ones. Because now you're on a level playing field. Now you're on a level beautiful playing field. Go out there. (Applause.) Going to be fantastic. These are going to be great futures.

So I want to thank you all. I want to just say God bless you all. Very, very special people. Thank you for all the help. Our country is doing so well -- possibly as well as it's ever done. I don't think it's ever done like this, in terms of the economy.

We have -- we're rebuilding our military. $700 billion we got approved, and $716 billion for the following year. So we'll have the strongest, best, most-modern military that we've ever had, relatively speaking. And we need it. (Applause.) And we hope we never have to use it. But the stronger it gets, the less likely it is that we'll ever have to use it.

So we're going to have something very special. I want to thank a couple of the generals; some of my great generals are in the back. These are tough cookies. We have the best in the world. We have the best military in the world, but now we're going to have -- it's equipped with the finest.

And remember what else that means: That means jobs, because we build it here. When we build those beautiful planes from Lockheed, and from Boeing, and Grumman, and all of the different

AMERICAN OVERSIGHT

places, we are -- this is American jobs. The ships -- it's all American jobs. So it means a lot.

Jobs mean nothing compared to the importance of having the right -- that's in one case -- this is probably the only case where the jobs aren't as important. We have to get the military taken care of. But jobs are a secondary benefit and we have jobs all over the country.

So I just want to thank everybody for being here. This is very special time for the country. Very special time for you. God bless you all. Thank you very much. (Applause.)

KLEIN FINANCIAL CORPORATION

January 24, 2018

To: Michael Holliday – Chief Financial Officer, Nevada Housing Division

Re: Tax Credit Linked Contingent Subordinate Debt Request

As we discussed yesterday, the equity capital in the Sierra Summit property is now up at approximately $28 million for the closing and the Sierra Summit Venture, DWF V Summit Club Holdings, LLC, is making the initial advance under the tax credit pay in schedule to meet the bank's requirements. With the turbulence in the tax credit market, given the drop in demand due to the recent tax cuts, Sierra Summit is carrying the tax credit investments during the first 12 months, with the expectation that tax credit markets will firm up and the price for the credits on Sierra Summit will increase; because, at 12 months, occupied units and therefore, tax credit deliveries are expected to begin immediately, at the time of the pay in by the third party tax credit investor. Furthermore, the new tax law does increase tax credit yield, because of a rise in authorized expensing of five year and 15 year property. Early delivery of credits – a short time after the investment – increases tax credit pricing, as does higher expensing of qualified costs.

Price Shortfall

Despite this plan, given the corporate tax rate cuts, lower demand may result in a drop in the tax credit price and Sierra Summit needs to protect itself against that possibility, given that the project is already at $28 million of capital for closing. Sierra Summit, therefore, makes the following requests to the State Department of Housing for a contingency, "backup", $1,500,000 increase in subordinate debt on the same terms as the $3,000,000 subordinate loan, if one of the four points below do not restore the full, effective, net proceeds to Sierra Summit of the tax credit sale:

1. Sierra Summit believes there is a reasonable potential for the Sierra Summit census track to be designated in 2018 as a Difficult to Develop Area (DDA). The immediate area has very high rents at the new developments which are substantially outside the range of affordability for families and individuals at 60% of median. Those DDA determinations could reasonably be expected to be posted sometime in April. If a DDA designation results for the Sierra Summit project, providing a 30% basis boost, Sierra Summit would not then need the additional subordinate debt.

2. If Sierra Summit in 2018 does not become part of a HUD designated DDA, under their normal process, the Sierra Summit Joint Venture will conduct a survey – in collaboration with the State Department of Housing – and file an appeal, requesting a DDA designation. If that appeal is successful, Sierra Summit would not then need the additional subordinate debt.

3. Within approximately 12 months, after the initial closing, Sierra Summit intends to close a tax credit investment agreement with a third party tax credit investor. As stated above, by

☐ 550 S CALIFORNIA AVE., SUITE 330 • PALO ALTO, CA 94306 • (650) 833-0100 • (650) 833-0105 FAX
☐ 2607 FRESNO STREET, SUITE A • FRESNO, CA 93721 • (559) 441-7901 • (559) 441-8457 FAX

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006431

deferring the initial tax credit investment, from the third party, to a date 12 months out, it is expected that the tax credit price will increase because of the following factors:

a. Tax credits will begin to accrue almost immediately, on completed units, which will benefit the investor, for a portion of the investment, in the 2018 tax year.

b. The new tax law provides for 100% bonus depreciation for five year and fifteen year property, which is an increase from a 50% bonus depreciation schedule. This will enhance the tax credit investor's yield.

c. With units expected to be completed and occupied, the investors can validate the rent on the market rate portion (for the completed and occupied sample of market rate units), and the ability to carry the project debt on a sustained basis. With the risk reduced on validating the market rate rents, the price should increase.

d. Given that the entire build out is scheduled to occur in approximately 26 months, the investor can see that the construction budget and the construction contractor and subcontractor teams are performing well and that no additional capital calls can be expected, as a risk for the tax credit investor. This reduction in construction risk will help support a higher price. The general contractor, Whiting Turner, has reported to Sierra Summit a $700 million net worth and therefore their Guaranteed Maximum Price Contract should further validate the ability of the Sierra Summit project to be completed, without financial risk.

If the overall average price of the tax credits is at least one dollar ($1.00) per credit dollar, Sierra Summit will then not need any further subordinate debt.

4. The currently pending Hatch-Cantwell bill in the U.S. Senate (Affordable Housing Credit Improvement Act of 2017 (S. 548)) that would bring the value of the 4% credit percentage up to a true 4% rate - eliminating the Treasury rate adjustment that currently places the value at about 3.23% per year – and that would reportedly permit the State of Nevada to designate projects as qualified for an equivalent DDA 30% basis boost, has a reasonable chance of passage before the end of Senator Hatch's term in 2018, given that he is Chairman of the U.S. Senate Finance Committee; and, the Bill has multiple Republican and Democratic Co-Sponsors. If the final language of the Bill, as interpreted by the IRS – at the end of 2018 – can be applied to the Sierra Summit project (since the bonds are being issued in 2018), and the Sierra Summit investor and/or tax credit investor agree that there are no unintended negative tax or financial impacts from the final language of the Bill, **this Bill could substantially increase the originally projected tax credits in absolute dollars, above the credits projected at initial closing at one dollar ($1.00) per credit.** If the benefits of this Bill can be applied and the investment proceeds from the tax credits exceed the original amount projected at one dollar ($1.00) per credit, $11,088,194, then Sierra Summit will not need any further subordinate debt.

Timing

The analysis of the shortfall would occur at 12 months from the initial bond closing. At that time, it would be determined if Sierra Summit had been able to conclude a tax credit sale that would yield net proceeds equal to the $11,088,194 currently projected, on the revised costs, at one dollar ($1.00). To the extent of any shortfall, the subordinate debt would be provided, with up to the first $1 million

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006432

funded at the end of year one, and if needed, up to an additional $500,000 funded at the end of year two. Again, this $1,500,000 in subordinate debt, would have the same terms and conditions – be under the same documents – as the existing $3 million in State of Nevada subordinate debt. For example, if Sierra Summit received $10,500,000 net, only $588,000 in additional subordinate debt would be advanced. If Sierra Summit received $11,900,000, whether due to pricing or new DDA rules, or any of the other above factors, no additional subordinate debt would be advanced.

Consideration

Sierra Summit greatly appreciates your consideration of this request. As you know, out of our commitment to complete this project for the State and the City of Reno, the Sierra Summit Venture now has greater than $10 million of additional equity, **above the $18 million submitted to the State in our analysis – just months ago**, and a tax credit advance, all to make this project work at closing. This "backup" assistance would be greatly appreciated. If this request is acceptable to the State, a letter confirming the State's commitment to this additional "backup" gap funding would be appreciated immediately for the benefit of our equity investor, with formal documentation with counsel to follow shortly thereafter.

In November your tax credit reservation, based upon our cost information at that date, was approximately $10,605,660. We will submit information with the finalization of our costs this week that we believe demonstrate credits of $11,088,194 at one dollar ($1.00). We know that in 2017 there were tax credit sales at $1.03 to $1.05; but, Sierra Summit does not need that price to close the gap in the sources.

Sincerely,

DWF V Summit Club Holdings, LLC

President Donald J. Trump, framed in the colorful blooms of the White House Rose Garden, delivers remarks on the benefits of tax reform for American workers and businesses of all sizes, Thursday, April 12, 2018, in Washington, D.C. (Official White House Photo by Shealah Craighead)

PRESIDENT TRUMP OP-ED | America's Economy Is Back And Roaring And Its People Are Winning

Tuesday is a day hardworking Americans may dread more than any other. Tax Day. A day that individuals and families, small business owners and part-time workers struggle to conquer a burdensome, complex and extremely unfair tax code to determine how much money they owe the government.

But we are changing Tax Day for Americans across the country.

This is the last year Americans will fill out outdated, complicated tax forms. In the years ahead, because I signed one of the largest tax cuts in history and the most sweeping tax reform in a generation, many Americans will complete their taxes on a simple, single sheet of paper. Remarkably, Congress had to pass this critical legislation without a single Democrat's vote.

A typical family of four earning $73,000 a year can expect to see an income tax cut of more than $2,000 when they file their tax return in 2019 — slashing their income tax bill in half. The standard deduction has been nearly doubled, so now twice as much income is earned tax-free.

The tax law also doubled the child tax credit and lowers rates across the board for hardworking families.

I made sure the IRS acted quickly to deliver some of the benefits of this tax cut legislation to Americans. As a result, Americans began to see bigger paychecks as early as February. And more savings are on the way.

America's competitive edge has also been restored. We significantly cut our corporate tax rate from one of the highest in the developed world, which means that American workers and businesses are finally able to win again against foreign competitors. We know that when American workers compete on a level playing field, American workers win.

We have already created 3 million jobs since the election — including more than 290,000 new jobs in manufacturing and more than 75,000 in mining and logging jobs.

On the announcement of my signing this historic tax reform, companies immediately started announcing thousands of new jobs and making enormous investments in their workers. Unemployment claims have reached a 44-year low. After years of wage stagnation, real wages are rising.

Apple will invest $350 billion in the U.S. economy over the next five years, including $30 billion as a direct result of the tax cuts. Fiat Chrysler announced that 2,500 jobs are coming back to near the Motor City. And millions of American workers received a tax cut bonus from their employers — pay raises, more money for retirement, or bonus checks — all because of we rolled up our sleeves, put America First, and made our tax code fairer and simpler.

The tax cut bill is also lowering the size of Americans' monthly utility bills. Major electric companies from California to Maine have credited our tax law as the reason for lowering their prices and giving consumers a break.

This year also marks the last time Americans will have to contend with Obamacare's cruel individual mandate because our tax law repealed it. These penalties largely hit lower-income and middle-class Americans — 80% of the penalties were paid by families making less than $50,000 per year.

We have also opened up the Arctic National Wildlife Refuge for energy exploration — something leaders have tried to do for decades — creating even more jobs and more energy savings. Energy exports are at a record high, and net energy imports are at their lowest level since 1982. We are at the doorstep of energy independence.

I want every American to have good jobs, rising paychecks and the opportunity to live a life of meaning, purpose and joy. That is why I insisted that the tax law also create "Opportunity Zones" that target investments in distressed communities. These Opportunity Zones will create more jobs in areas of our country that need them the most and benefit those whom Washington has too often left behind.

On this Tax Day, America is strong and roaring back. Paychecks are climbing. Tax rates are going down. Businesses are investing in our great country. And most important, the American people are winning.

Donald Trump is the president of the United States.

PRESIDENT TRUMP VISITS FLORIDA | Tax Cuts for Florida Small Businesses Roundtable

The President's full remarks can be found here.

TAX DAY | Tax Cuts Will Generate Greater Economic Opportunity for All

ENCOURAGING ENTREPRENEURSHIP: Small business owners will be able to grow and thrive under the Tax Cuts and Jobs Act.

AMERICAN OVERSIGHT

- The Tax Cuts and Jobs Act will help more American entrepreneurs gain the financial footing they need to expand and invest in their futures.
    - Small businesses which organize as sole proprietorships, S corporations, and partnerships will be able to deduct 20 percent of their qualified business income.
    - Businesses will be able to fully write off the cost of capital investments for the next 5 years.
- Optimism among small business owners continues to soar following the President's signing of the Tax Cuts and Jobs Act into law.
    - Small business confidence surged to a record high following the passage of tax reform, according to a CNBC/Survey Monkey survey.
    - Optimism among small business owners remains at a historically high level, according to a National Federation of Independent Businesses (NFIB) survey from March 2018.
    - Small business optimism reached an eleven-year high in the first quarter of 2018, according to the Wells Fargo/Gallup Small Business Index.
- President Trump's tax cuts will benefit small businesses, including minority-owned businesses, which are a critical driver of our Nation's economic success.
    - Minority-owned businesses generate more than $1 trillion in economic output annually.
    - The number of minority-owned businesses is growing at a faster rate than non-minority owned businesses.
    - Nearly 8 million Americans are employed by minority-owned businesses.
- A recent survey by the Chamber of Commerce and MetLife shows that minority-owned businesses are looking forward to even more success in 2018.
    - 93 percent of minority-owned businesses expect to have a good year in 2018 according to the MetLife and Chamber of Commerce Small Business Index.
    - 71 percent of minority-owned businesses are expecting an increase in revenue in 2018.

GREATER OPPORTUNITY FOR WORKERS | The Tax Cuts And Jobs Act Will Help Spur More Business Growth And Job Creation, Benefiting American Workers

- Businesses are ready to expand as a result of the tax cuts and reforms signed into law by President Trump, creating more employment opportunities for those seeking work.
    - Expected employment growth for 2018 has reached an all-time high among American manufacturers, according to a National Association of Manufacturers (NAM) survey.
    - Job creation plans among small businesses remain at a historically high level according to a March 2018 survey by the National Federation of Independent Businesses.

AMERICAN OVERSIGHT

- The Tax Cuts and Jobs Act will build upon Administration efforts to revitalize the American economy and increase economic opportunity for all.
    - More than 2.5 million jobs have been created since President Trump took office.
    - The unemployment rate has remained at a 17-year low of 4.1 percent since October of last year.
    - In 2017, Hispanic and African American unemployment rates reached their lowest levels on record.

REVITALIZING COMMUNITIES | The Tax Cuts And Jobs Act Will Expand Economic Opportunity In Underserved Communities

- The Tax Cuts and Jobs Act includes the bipartisan Opportunity Zones Program, which will incentivize investment in economically distressed communities designated as Opportunity Zones.
    - o More than 52 million low-income Americans live in communities that may benefit from the Opportunity Zones Program.
- Investments are pooled into Opportunity Funds and deployed into communities where they will help fund new and small businesses, develop blighted properties, finance construction and refurbishment, and more.
- On April 9, 2018, the Treasury Department and the Internal Revenue Service (IRS) announced the first round of Opportunity Zone designations for communities in 18 States.

Official White House Photo by *Shealah Craighead & Joyce N. Boghosian*

STATE LEADERS ON OPPORTUNITY ZONES | What They Are Saying

- **Gov. Doug Ducey (AZ):** "We applaud this federal initiative to stimulate economic development in low-income areas. Ensuring opportunity for all Arizonans has been a focus of my administration. Arizona's economy is thriving, and we are excited to see how Opportunity Zones will build on our effort." Source.
- **Governor John Hickenlooper (CO):** "Colorado's opportunity zones can help create momentum in communities that need a little boost in their economic recovery efforts. We owe it to these areas of the state to take advantage of every potential incentive. Hopefully we will see significant dividends in the future." Source.
- **Governor Kim Reynolds (IA):** "We need to take advantage of all the tools and resources we have at our disposal to spur economic growth. I am optimistic that Iowa's participation in the Opportunity Zones Program will serve as a catalyst for investment and job creation and result in prosperity for Iowa communities statewide." Source.
- **Governor Butch Otter (ID)**: "This is a great way to drive more capital investment toward Idaho neighborhoods and communities that aren't benefiting as they should from our statewide economic growth. There are no real strings attached to this market-driven tax treatment by the feds. Nobody is dictating the kind of investments the locals should pursue to promote their own prosperity." Source.
- **Governor Matt Bevin (KY)**: "The Opportunity Zones approved today by the U.S. Department of the Treasury provide one more reason for companies and businesses to consider locating in Kentucky. Kentucky will maximize this golden chance to attract economic development projects to communities most in need across the commonwealth, and the Kentucky Opportunity Zone Initiative will strengthen and rebuild both rural and urban areas. Whether along the Mississippi River in West Kentucky, throughout West Louisville's neighborhoods, or in the heart of Appalachia, these zones will spur investment, growth and community development." Source.
- **State Senate President Robert Stivers (KY):** "With the designation of these new Opportunity Zones, communities most in need across our commonwealth will have a means to attract investments that create jobs, build infrastructure and increase both tax local revenue and overall economic prosperity. The Kentucky Opportunity Zone Initiative holds the promise of creating a significant and widespread positive impact for Kentuckians. I look forward to the development of these Opportunity Zones and the long-term prosperity they will bring to our state." Source.
- **State House Speaker Pro Tempore David Osborne (KY):** "Through these federal designations, the Kentucky Opportunity Zone Initiative can attract capital investments for a broad range of development projects. What this means is lower-income and distressed communities in Opportunity Zones across Kentucky stand to see new jobs created and their economies significantly improved through a variety of potential commercial, industrial, housing, infrastructure and other investment projects." Source.

- **Governor Charlie Baker (MA)**: "Our administration is committed to helping cities and towns in Massachusetts unlock opportunity for private investments and economic growth. This program will allow municipalities across the Commonwealth to work collaboratively with investors to pursue developments that address their individual and community needs." Source.
- **Gov. Rick Snyder (MI):** "These zones have the potential to help Michiganders take advantage of the full economic development potential in all corners of the state," Gov. Snyder said. "This is a unique opportunity for investors and promising news for eligible communities." Source.
- **Gov. Phil Bryant (MS):** "Opportunity Zones in Mississippi will attract significant private sector investment, help grow our state's economy and create new jobs. This program is another business advantage existing industries and new companies will find in our state." Source.
- **Governor Phil Murphy (NJ):** "I'm pleased the Treasury Department has accepted all 169 sites I proposed last month for designation as Opportunity Zones. Now, these cities and towns will have additional means to generate economic growth throughout their respective communities and, more importantly, create economic opportunities for their residents." Source.
- **Gov. Pete Ricketts (NE):** "Thanks to the Tax Cuts and Jobs Act, 20 communities across Nebraska now have another tool to help attract new investment and job opportunities. This announcement builds on the positive news we've seen from companies from Nelnet to Wal-Mart, who are reinvesting their tax cuts into their workforce through higher wages and bonuses. None of this would have been possible without the great work of Nebraska's federal delegation, which unanimously supported the tax relief bill." Source.
- **Governor Mary Fallin (OK):** "I appreciate our partnership with the U.S. Department of Treasury in making these designations. The creation of federal opportunity zones will bring new and unique opportunities to both investors and Oklahoma communities. Investors have different projects in which they are willing to invest their capital, and it is our intent to provide them with a range of opportunities. With the potential investments in these areas, we hope that poverty will be reduced, our communities will see revitalization, and that the investments will spur job creation. I also want to acknowledge the Oklahoma Department of Commerce for its work in coordinating this effort." Source.
- **Gov, Ricardo Rossello (PR):** "These zones are created to foster investment in the nation's disadvantaged communities. New investments in Opportunity Zones can receive preferential tax treatment, which will, in turn, be a boost to our economy. Our thanks to Treasury Secretary Steve Mnuchin for understanding the need of Puerto Rico to participate in these opportunities zones. Thanks also to the resident commissioner, Jenniffer González, for her work in raising awareness about the economic challenges facing the Island and collaborating so we are included as one of the territories that will benefit from this initiative." Source.
- **Gov. WICHITA BUSINESS JOURNAL: Wichita Companies 'Reinvesting' In Employees through Tax Cut Bonuses

"Aldrich, president and CEO of Wichita Railway Services, provided his employees bonuses of $3,000 to $6,000 using funds that would have otherwise gone toward corporate income tax. The federal government's Tax Cuts and Jobs Act, signed into law in December, lowered tax rates for businesses and individuals."

SPRINGFIELD NEWS-LEADER (MISSOURI): Springfield Solar Company Hiring More Workers, Credits Trump's Tax Cut

"A Springfield solar company announced Monday it's adding 30 new jobs thanks to a corporate tax rate cut championed by President Donald Trump. According to a press release, Sun Solar employed about 100 people at the start of 2018, 17 percent of whom are U.S. military veterans."

SMALL BUSINESS | Tax Cuts Are Energizing American Employers of All Sizes

ENERGIZING AMERICAN BUSINESS: Optimism and plans for growth are soaring as businesses feel the benefits of President Donald J. Trump's tax cuts.

- Optimism among American manufacturers has reached unprecedented levels according to the most recent Outlook Survey from the National Association of Manufacturers (NAM).
    - Manufacturer optimism stood at 93.5 percent in the most recent survey, the second highest reading in the survey's history.

AMERICAN OVERSIGHT

    - Projected employment growth, new capital investments, and inventory increases all reached all-time highs in the survey.
    - According to the survey, manufacturers expect sales to grow over the next year at the second fastest pace on record.
    - Manufacturers anticipate wages will grow at the fastest pace in 17 years.
- Small businesses are worrying less about taxes and are investing more in their workers according to a National Federation of Independent Businesses (NFIB) survey from March 2018.
    - Taxes received the fewer votes as the number one problem facing small businesses for the first time since 1982.
    - The proportion of small businesses that reported raising their worker's compensation reached its highest level since 2000.
- A March 2018 survey of business executives by Ernst & Young, looking at how companies plan on using their tax savings found that:
    - 75 percent expect to expand manufacturing in the United States.
    - 89 percent plan to increase worker compensation.
    - 66 percent will likely pass on some of their tax savings to customers.
    - 69 percent expect to bring back more earnings to the U.S. from overseas than they would have otherwise.
- The Federal Reserve cited the Tax Cuts and Jobs Act as a key factor in increasing their economic projections for the United States over the next several years.

BENEFITING EMPLOYERS OF ALL SIZES: Businesses of all sizes are using their tax savings to invest in their hardworking employees.

- From small family businesses on up, American employers have been able to raise wages and increase benefits for their workers as a result of the Tax Cuts and Jobs Act.
    - More than 5.5 million hardworking taxpayers have received bonuses, pay raises, and increased benefits.
- Wichita Railway Services gave each of its five employees a tax cut bonus between $3,000 and $6,000.
- In March, Muncie Aviation Company gave its 55 full-time and 8 part-time employees a bonus due to its tax savings and 2017 business performance.
- Cox Enterprises has announced it will provide most of its nearly 60,000 employees with bonuses between $1,000 and $2,000 in April.
- McCormick & Company has announced it will provide $1,000 tax cut bonuses to eligible hourly employees in May.
- McDonald's Corporation announced it would invest $150 million in its education program which provides employees with opportunities to earn a high school diploma, college tuition assistance, and free education advising.

REVITALIZING THE ECONOMY: The Tax Cuts and Jobs Act is contributing to a healthy American economy under President Trump.

- United States gross domestic product (GDP) growth for the fourth quarter of 2017 was revised up to 2.9 percent, beating expectations.
- More than 2.5 million jobs have been added since President Trump took office.
    - 263,000 manufacturing jobs have been added.
    - 277,000 construction jobs have been added.
- The unemployment rate has remained at a 17-year low of 4.1 percent since October of last year.
- The number of Americans receiving unemployment insurance benefits has fallen to its lowest point since 1973.

PRESIDENT TRUMP OP-ED | America's Economy Is Back And Roaring And Its People Are Winning

Tuesday is a day hardworking Americans may dread more than any other. Tax Day. A day that individuals and families, small business owners and part-time workers struggle to conquer a burdensome, complex and extremely unfair tax code to determine how much money they owe the government.

But we are changing Tax Day for Americans across the country.

This is the last year Americans will fill out outdated, complicated tax forms. In the years ahead, because I signed one of the largest tax cuts in history and the most sweeping tax reform in a generation, many Americans will complete their taxes on a simple, single sheet of paper. Remarkably, Congress had to pass this critical legislation without a single Democrat's vote.

A typical family of four earning $73,000 a year can expect to see an income tax cut of more than $2,000 when they file their tax return in 2019 — slashing their income tax bill in half. The standard deduction has been nearly doubled, so now twice as much income is earned tax-free.

The tax law also doubled the child tax credit and lowers rates across the board for hardworking families.

I made sure the IRS acted quickly to deliver some of the benefits of this tax cut legislation to Americans. As a result, Americans began to see bigger paychecks as early as February. And more savings are on the way.

America's competitive edge has also been restored. We significantly cut our corporate tax rate from one of the highest in the developed world, which means that American workers and businesses are finally able to win again against foreign competitors. We know that when American workers compete on a level playing field, American workers win.

We have already created 3 million jobs since the election — including more than 290,000 new jobs in manufacturing and more than 75,000 in mining and logging jobs.

On the announcement of my signing this historic tax reform, companies immediately started announcing thousands of new jobs and making enormous investments in their workers. Unemployment claims have reached a 44-year low. After years of wage stagnation, real wages are rising.

Apple will invest $350 billion in the U.S. economy over the next five years, including $30 billion as a direct result of the tax cuts. Fiat Chrysler announced that 2,500 jobs are coming back to near the Motor City. And millions of American workers received a tax cut bonus from their employers — pay raises, more money for retirement, or bonus checks — all because of we rolled up our sleeves, put America First, and made our tax code fairer and simpler.

The tax cut bill is also lowering the size of Americans' monthly utility bills. Major electric companies from California to Maine have credited our tax law as the reason for lowering their prices and giving consumers a break.

This year also marks the last time Americans will have to contend with Obamacare's cruel individual mandate because our tax law repealed it. These penalties largely hit lower-income and middle-class Americans — 80% of the penalties were paid by families making less than $50,000 per year.

We have also opened up the Arctic National Wildlife Refuge for energy exploration — something leaders have tried to do for decades — creating even more jobs and more energy savings. Energy exports are at a record high, and net energy imports are at their lowest level since 1982. We are at the doorstep of energy independence.

I want every American to have good jobs, rising paychecks and the opportunity to live a life of meaning, purpose and joy. That is why I insisted that the tax law also create "Opportunity Zones" that target investments in distressed communities. These Opportunity Zones will create more jobs in areas of our country that need them the most and benefit those whom Washington has too often left behind.

On this Tax Day, America is strong and roaring back. Paychecks are climbing. Tax rates are going down. Businesses are investing in our great country. And most important, the American people are winning.

Donald Trump is the president of the United States.

PRESIDENT TRUMP VISITS FLORIDA | Tax Cuts for Florida Small Businesses Roundtable

The President's full remarks can be found here.

TAX DAY | Tax Cuts Will Generate Greater Economic Opportunity for All

ENCOURAGING ENTREPRENEURSHIP: Small business owners will be able to grow and thrive under the Tax Cuts and Jobs Act.

- The Tax Cuts and Jobs Act will help more American entrepreneurs gain the financial footing they need to expand and invest in their futures.
    - Small businesses which organize as sole proprietorships, S corporations, and partnerships will be able to deduct 20 percent of their qualified business income.
    - Businesses will be able to fully write off the cost of capital investments for the next 5 years.
- Optimism among small business owners continues to soar following the President's signing of the Tax Cuts and Jobs Act into law.
    - Small business confidence surged to a record high following the passage of tax reform, according to a CNBC/Survey Monkey survey.
    - Optimism among small business owners remains at a historically high level, according to a National Federation of Independent Businesses (NFIB) survey from March 2018.
    - Small business optimism reached an eleven-year high in the first quarter of 2018, according to the Wells Fargo/Gallup Small Business Index.
- President Trump's tax cuts will benefit small businesses, including minority-owned businesses, which are a critical driver of our Nation's economic success.
    - Minority-owned businesses generate more than $1 trillion in economic output annually.
    - The number of minority-owned businesses is growing at a faster rate than non-minority owned businesses.
    - Nearly 8 million Americans are employed by minority-owned businesses.
- A recent survey by the Chamber of Commerce and MetLife shows that minority-owned businesses are looking forward to even more success in 2018.
    - 93 percent of minority-owned businesses expect to have a good year in 2018 according to the MetLife and Chamber of Commerce Small Business Index.
    - 71 percent of minority-owned businesses are expecting an increase in revenue in 2018.

GREATER OPPORTUNITY FOR WORKERS | The Tax Cuts And Jobs Act Will Help Spur More Business Growth And Job Creation, Benefiting American Workers

- Businesses are ready to expand as a result of the tax cuts and reforms signed into law by President Trump, creating more employment opportunities for those seeking work.
    - Expected employment growth for 2018 has reached an all-time high among American manufacturers, according to a National Association of Manufacturers (NAM) survey.

AMERICAN OVERSIGHT

- Job creation plans among small businesses remain at a historically high level according to a March 2018 survey by the National Federation of Independent Businesses.

- The Tax Cuts and Jobs Act will build upon Administration efforts to revitalize the American economy and increase economic opportunity for all.
  - More than 2.5 million jobs have been created since President Trump took office.
  - The unemployment rate has remained at a 17-year low of 4.1 percent since October of last year.
  - In 2017, Hispanic and African American unemployment rates reached their lowest levels on record.

REVITALIZING COMMUNITIES | The Tax Cuts And Jobs Act Will Expand Economic Opportunity In Underserved Communities

- The Tax Cuts and Jobs Act includes the bipartisan Opportunity Zones Program, which will incentivize investment in economically distressed communities designated as Opportunity Zones.
  - More than 52 million low-income Americans live in communities that may benefit from the Opportunity Zones Program.
- Investments are pooled into Opportunity Funds and deployed into communities where they will help fund new and small businesses, develop blighted properties, finance construction and refurbishment, and more.
- On April 9, 2018, the Treasury Department and the Internal Revenue Service (IRS) announced the first round of Opportunity Zone designations for communities in 18 States.

Official White House Photo by *Shealah Craighead & Joyce N. Boghosian*

STATE LEADERS ON OPPORTUNITY ZONES | What They Are Saying

- **Gov. Doug Ducey (AZ):** "We applaud this federal initiative to stimulate economic development in low-income areas. Ensuring opportunity for all Arizonans has been a focus of my administration. Arizona's economy is thriving, and we are excited to see how Opportunity Zones will build on our effort." Source.
- **Governor John Hickenlooper (CO):** "Colorado's opportunity zones can help create momentum in communities that need a little boost in their economic recovery efforts. We owe it to these areas of the state to take advantage of every potential incentive. Hopefully we will see significant dividends in the future." Source.
- **Governor Kim Reynolds (IA):** "We need to take advantage of all the tools and resources we have at our disposal to spur economic growth. I am optimistic that Iowa's participation in the Opportunity Zones Program will serve as a catalyst for investment and job creation and result in prosperity for Iowa communities statewide." Source.
- **Governor Butch Otter (ID)**: "This is a great way to drive more capital investment toward Idaho neighborhoods and communities that aren't benefiting as they should from our statewide economic growth. There are no real strings attached to this market-driven tax treatment by the feds. Nobody is dictating the kind of investments the locals should pursue to promote their own prosperity." Source.
- **Governor Matt Bevin (KY)**: "The Opportunity Zones approved today by the U.S. Department of the Treasury provide one more reason for companies and businesses to consider locating in Kentucky. Kentucky will maximize this golden chance to attract economic development projects to communities most in need across the commonwealth, and the Kentucky Opportunity Zone Initiative will strengthen and rebuild both rural and urban areas. Whether along the Mississippi River in West Kentucky, throughout West Louisville's neighborhoods, or in the heart of Appalachia, these zones will spur investment, growth and community development." Source.
- **State Senate President Robert Stivers (KY):** "With the designation of these new Opportunity Zones, communities most in need across our commonwealth will have a means to attract investments that create jobs, build infrastructure and increase both tax local revenue and overall economic prosperity. The Kentucky Opportunity Zone Initiative holds the promise of creating a significant and widespread positive impact for Kentuckians. I look forward to the development of these Opportunity Zones and the long-term prosperity they will bring to our state." Source.
- **State House Speaker Pro Tempore David Osborne (KY):** "Through these federal designations, the Kentucky Opportunity Zone Initiative can attract capital investments for a broad range of development projects. What this means is lower-income and distressed communities in Opportunity Zones across Kentucky stand to see new jobs created and their economies significantly improved through a variety of potential commercial, industrial, housing, infrastructure and other investment projects." Source.

- **Governor Charlie Baker (MA)**: "Our administration is committed to helping cities and towns in Massachusetts unlock opportunity for private investments and economic growth. This program will allow municipalities across the Commonwealth to work collaboratively with investors to pursue developments that address their individual and community needs." Source.
- **Gov. Rick Snyder (MI):** "These zones have the potential to help Michiganders take advantage of the full economic development potential in all corners of the state," Gov. Snyder said. "This is a unique opportunity for investors and promising news for eligible communities." Source.
- **Gov. Phil Bryant (MS):** "Opportunity Zones in Mississippi will attract significant private sector investment, help grow our state's economy and create new jobs. This program is another business advantage existing industries and new companies will find in our state." Source.
- **Governor Phil Murphy (NJ):** "I'm pleased the Treasury Department has accepted all 169 sites I proposed last month for designation as Opportunity Zones. Now, these cities and towns will have additional means to generate economic growth throughout their respective communities and, more importantly, create economic opportunities for their residents." Source.
- **Gov. Pete Ricketts (NE):** "Thanks to the Tax Cuts and Jobs Act, 20 communities across Nebraska now have another tool to help attract new investment and job opportunities. This announcement builds on the positive news we've seen from companies from Nelnet to Wal-Mart, who are reinvesting their tax cuts into their workforce through higher wages and bonuses. None of this would have been possible without the great work of Nebraska's federal delegation, which unanimously supported the tax relief bill." Source.
- **Governor Mary Fallin (OK):** "I appreciate our partnership with the U.S. Department of Treasury in making these designations. The creation of federal opportunity zones will bring new and unique opportunities to both investors and Oklahoma communities. Investors have different projects in which they are willing to invest their capital, and it is our intent to provide them with a range of opportunities. With the potential investments in these areas, we hope that poverty will be reduced, our communities will see revitalization, and that the investments will spur job creation. I also want to acknowledge the Oklahoma Department of Commerce for its work in coordinating this effort." Source.
- **Gov, Ricardo Rossello (PR):** "These zones are created to foster investment in the nation's disadvantaged communities. New investments in Opportunity Zones can receive preferential tax treatment, which will, in turn, be a boost to our economy. Our thanks to Treasury Secretary Steve Mnuchin for understanding the need of Puerto Rico to participate in these opportunities zones. Thanks also to the resident commissioner, Jenniffer González, for her work in raising awareness about the economic challenges facing the Island and collaborating so we are included as one of the territories that will benefit from this initiative." Source.
- **Gov. Henry McMaster (SC):** "We're confident that we've been able to implement a collaborative approach to designating these communities – with input from local governments across the state – that will eventually mean further private investment and economic growth in the areas that need it most." Source.
- **Governor Greg Abbot (TX):** "This program will help highlight areas of Texas that are prime for business investment, and it will serve to bring more opportunities to hardworking families across the entire state," said Governor Abbott. "As we continue to recover after Harvey, these Opportunity Zone designations will also provide a much needed boost for local communities impacted by the storm. With the potential for billions in new investment, I look forward to our state continuing to flourish, bringing further growth and opportunity to the people of Texas." Source.
- **Governor Kenneth Mapp (VI):** "These new incentives can help us attract new investments in hotel development, retail businesses and industry in our most underserved communities and can also help those looking to rebuild after the hurricanes. I would like to thank the U.S. Department of Treasury Secretary Steven Mnuchin and his team for implementing this important program." Source.
- **Governor Scott Walker (WI):** "With our newly designated Economic Opportunity Zones, Wisconsin's thriving businesses will have a new opportunity to invest in their neighbors and help our local communities. Right now, more people are employed in our state than ever before in our history, and Wisconsin is at near record lows for unemployment. These recommendations reach communities across our state – urban, rural, and tribal – that are positioned for strong and sustained growth." Source.

- A March 2018 survey of business executives by Ernst & Young, looking at how companies plan on using their tax savings found that:
    - 75 percent expect to expand manufacturing in the United States.
    - 89 percent plan to increase worker compensation.
    - 66 percent will likely pass on some of their tax savings to customers.
    - 69 percent expect to bring back more earnings to the U.S. from overseas than they would have otherwise.
- The Federal Reserve cited the Tax Cuts and Jobs Act as a key factor in increasing their economic projections for the United States over the next several years.

BENEFITING EMPLOYERS OF ALL SIZES: Businesses of all sizes are using their tax savings to invest in their hardworking employees.

- From small family businesses on up, American employers have been able to raise wages and increase benefits for their workers as a result of the Tax Cuts and Jobs Act.
    - More than 5.5 million hardworking taxpayers have received bonuses, pay raises, and increased benefits.
- Wichita Railway Services gave each of its five employees a tax cut bonus between $3,000 and $6,000.
- In March, Muncie Aviation Company gave its 55 full-time and 8 part-time employees a bonus due to its tax savings and 2017 business performance.
- Cox Enterprises has announced it will provide most of its nearly 60,000 employees with bonuses between $1,000 and $2,000 in April.
- McCormick & Company has announced it will provide $1,000 tax cut bonuses to eligible hourly employees in May.
- McDonald's Corporation announced it would invest $150 million in its education program which provides employees with opportunities to earn a high school diploma, college tuition assistance, and free education advising.

REVITALIZING THE ECONOMY: The Tax Cuts and Jobs Act is contributing to a healthy American economy under President Trump.

- United States gross domestic product (GDP) growth for the fourth quarter of 2017 was revised up to 2.9 percent, beating expectations.
- More than 2.5 million jobs have been added since President Trump took office.
    - 263,000 manufacturing jobs have been added.
    - 277,000 construction jobs have been added.
- The unemployment rate has remained at a 17-year low of 4.1 percent since October of last year.
- The number of Americans receiving unemployment insurance benefits has fallen to its lowest point since 1973.

"Any leader who says $1,000 in the pockets of working families is crumbs is out of touch with the American people."

Vice President Mike Pence

Please let us know if you have any questions.

Thanks,
Nic

Subject: Tech Summit - Invitations and Invitee List
Attachments: Governors Tech Summit - Draft Invite List_RR_9.24.18.xlsx; Tech Summit_Attendee Invitation.docx; Tech Summit_Panel Invite.docx

Andrew

I've attached the updated invitations for the Tech Summit for your review and approval. One is for Panelists and one is for attendees.

I've also attached the invitee list. Proposed panelists or contacts for panelist are highlighted on the spreadsheet.

Please let me know if you want to make any changes to the invites. We can add or take people of the invitee list as well.

For now, we were thinking it would make sense for the invites to go out from the Governor's Office and we can have me as the contact for the RSVP. I'm working on a couple of email addresses that I will add into the invitee list and send back to you.

For Panasonic, we're waiting for the name of who will be on the panel. I'll highlight that name later for the invite.

I'll send you the updated run of show in a separate email with an update on the potential panelists.

Please let me know if you have any questions.

Thanks
Jarad

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006462

I am excited to announce the Nevada Governor's Tech Summit to be held at the Tesla Gigafactory on October 9th. As part of the Tech Summit, I will moderate a panel to discuss opportunities and challenges facing the adoption and development of new technologies. The panel will consist of leaders of some of Nevada's most innovative businesses and institutions. Leaders from Tesla, Blockchains-LLC, and others will participate in the panel.

Press is invited and the event will be livestreamed on Facebook.

Will you or a member of your executive leadership team participate in the panel?

Date: October 9th, 2018

Time:
Time:
Pre-Event Attractions
2:30 – 3:45pm
Tours: Come see the breathtaking Tesla Gigafactory to get a sense of the scope of the operation that currently is employing 12,000 Nevadans directly. Experience Tesla model vehicles.

Food Trucks: An entire new food economy has grown around the Gigafactory. Enjoy the fare of local vendors that feeds thousands

Tech Summit:
4:00 – 6:30pm
Tesla Gigafactory
Electric Avenue
Sparks NV 89434

Please RSVP to Jarad Van Wagoner at jarad.vanwagoner@rrpartners.com by September 26th.

AMERICAN OVERSIGHT

You are cordially invited to attend the Nevada Governor's Tech Summit to be held at the Tesla Gigafactory on October 9th. The Tech Summit will celebrate the accomplishments and future of the New Nevada in diversifying and expanding the economy through innovation in advanced manufacturing, digital and information services, and logistics and distribution.

The Summit will include a discussion between Governor Brian Sandoval and Elon Musk, the CEO of Tesla. A panel discussion with leaders of some of Nevada's most innovative companies will follow. The panel, moderated by Governor Sandoval, will discuss opportunities and challenges facing the adoption and development of new technologies in the Fourth Industrial Revolution.

This is your opportunity to mix and mingle with the leaders creating the New Nevada and moving it into the future! Press is invited and the event will be livestreamed on Facebook.

Subject: Tech Summit - Proclamation

Andrew

The proclamation for the summit would address two things:

1. Potential renaming of TRIC. We're in discussions with the tenants and developers to take the temperature on a few options. Waiting to see if we can get it done in time for the Tech Summit.
2. Announcement of founding of Blockchains City within TRIC.

I'm hoping we have an update on the possible renaming of TRIC next week.

On another note, I had a phone call with Tesla yesterday regarding invitations and media for the Tech Summit. They had invited Mary-Sarah and Brian Baluta to participate. I just wanted to make you aware that they are in the loop on some of the discussions regarding the invitations, media alerts/press release, and press invites.

We're finalizing the invitations this week. After that we can discuss how to have the Governor's office send them out and how to process RSVPs. I'm going to suggest that Tesla, as the host location, help with the RSVPs.

Please let me know if you have any questions.

Thanks
Jarad

Subject: Tech Summit - Updated Documents
Attachments: Tech Summit_Draft Governor's Itinerary.docx; Draft_Governor Opening Remarks_Tech Summit.docx; Tech Summit_MC Script_Paul Anderson.docx; Tech Summit - Draft Panel Script.docx; TRIC Innovation Park_BC proclamation draft.docx

Andrew and Christina

I've attached updated documents for the Governor to review, change, and/or approve. It includes the following documents:

1. Tech Summit Draft Itinerary
2. Draft of Governor's Opening Remarks
3. Draft Script for Master of Ceremonies – Paul Anderson
4. Draft Script for Panel Discussion
    a. This likely will continue to change as the panelists revise and finalize their questions.
    b. ***Please let me know if the Governor would like to change anything.***
5. Draft Proclamation Renaming TRIC to Innovation Park
    a. ***Will you please let me know as soon as you are able if the Governor approves the proclamation?***

I'm still waiting on the dialogue from Tesla for the conversation between the Governor and Elon. Also, I've asked for bios for each of the panelists to send to the Governor.

One more question from Tesla:

- ***EDAWN would like to present Elon Musk with a special coin at the end of his discussion with the Governor. Is the Governor okay with the presentation being made while is on the stage? It should only take 1 to 2 minutes.***

Please let me know if there are any questions.

Thank you for all of your help!

A PROCLAMATION DESIGNATING THE TAHOE-RENO INDUSTRIAL CENTER "INNOVATION PARK"

Whereas, the State of Nevada has always welcomed visionaries ready to apply hard work and creativity to solve the toughest challenges; and

Whereas, this administration has endeavored to make the State of Nevada the physical center and most conducive home for individuals and companies on the leading edge of their respective industries; and

Whereas, the Tahoe-Reno Industrial Center has quickly become an important center for some of the world's most inventive and creative companies such as Tesla, Google, Switch, and Panasonic; and

Whereas, Tesla, Google, Switch, and Panasonic are utilizing cutting edge technology and processes to change and improve the world and drive economic growth, locally and globally; and

Whereas, Nevada is now home to Blockchains, LLC, a company focused on using blockchain technology to change the world with a technology that has near limitless potential to provide solutions to the world's most complex challenges; and

Whereas, today over 100 different companies use the Tahoe-Reno Industrial Center to power their business success; and

Whereas, the world is in need of a welcoming center of interaction, collaboration and incubation for additional innovators and ideas, such as energy, transporation, blockchain technology, data management, and advanced manufacturing; and

Whereas, this administration has endeavored to make the State of Nevada the physical center and most conducive home to the greatest innovators, including those embarking on the cutting edge technological change and revolution; and

Whereas, as Governor I am proud that Nevada has become home to this array of innovators and recognize the key place the Tahoe-Reno Industrial Center occupies in creating business success, and know that it will continue to power excellence as it grows and develops.

Now, Therefore, I, Brian Sandoval, Governor of the State of Nevada do hereby designate the Tahoe-Reno Industrial Center as "Innovation Park" to honor the talented and hard-working minds who are helping to power Nevada's economy of tomorrow.

AMERICAN OVERSIGHT

PAUL ANDERSON:
LADIES AND GENTLEMEN, IT IS MY PLEASURE TO WELCOME YOU TO THE GOVERNOR'S TECH SUMMIT. I AM PAUL ANDERSON, THE EXECUTIVE DIRECTOR OF THE GOVERNOR'S OFFICE OF ECONOMIC DEVELOPMENT. ON BEHALF OF GOVERNOR BRIAN SANDOVAL, THANK YOU FOR BEING HERE THIS AFTERNOON. WE ALSO EXPRESS OUR DEEP GRATITUDE TO TESLA AND THE TEAM AT GIGAFACTORY ONE FOR HOSTING THIS EVENT IN THEIR AMAZING FACILITY.

THIS IS A DYNAMIC AND EXCITING TIME IN NEVADA AS OUR ECONOMY CONTINUES TO GROW AND DIVERSIFY. THE GIGAFACTORY REPRESENTS THIS GROWTH AND THE EFFORTS OF GOVERNOR SANDOVAL TO WORK WITH THOUGHT AND INNOVATION LEADERS SUCH AS ELON MUSK TO CHANGE THE WORLD. *(PERHAPS ADD SOME STATISTICS OF THE ECONOMIC IMPACT OF TESLA: NUMBER OF JOBS CREATED, THEIR PERFORMANCE).*

ALONG WITH TESLA, WE ARE HAPPY TO WELCOME THEIR PARTNER HERE AT THE GIGAFACTORY, PANASONIC, AND TO WELCOME BLOCKCHAINS, LLC. WE LOOK FORWARD TO HEARING FROM THEM LATER DURING THE PROGRAM.

GOVERNOR BRIAN SANDOVAL WAS ELECTED GOVERNOR OF THE GREAT STATE OF NEVADA ALMOST EIGHT YEARS AGO. GOVERNOR SANDOVAL IS A DEDICATED PUBLIC SERVANT – HE WAS SERVED IN THE NEVADA STATE LEGISLATURE, HE WAS APPOINTED AS THE YOUNGEST CHAIRMAN OF THE GAMING COMMISSION OF NEVADA, HE SERVED AS THE NEVADA STATE ATTORNEY GENERAL, AND HE WAS APPOINTED BY PRESIDENT GEORGE W. BUSH AS A JUDGE OF THE UNITED STATES DISTRICT COURT OF THE DISTRICT OF NEVADA, A LIFELONG APPOINTMENT. GOVERNOR SANDOVAL LEFT THE FEDERAL BENCH IN ORDER TO RUN FOR THE OFFICE OF GOVERNOR OF NEVADA IN 2010. HE WON THE ELECTION AND ASSUMED OFFICE IN 2011 AND WAS REELECTED FOR A SECOND TERM IN 2014.

GOVERNOR SANDOVAL HAS MADE ECONOMIC DEVELOPMENT AND INNOVATION CORNERSTONES OF HIS ADMINISTRATION. IT IS MY PLEASURE TO WELCOME TO THE STAGE GOVERNOR BRIAN SANDOVAL.

GOVERNOR SANDOVAL WALKS ON STAGE, GREETS PAUL, AND TAKES THE PODIUM TO MAKE REMARKS.

GOVERNOR SANDOVLA MAKES REMARKS AND FINISHES. HE STEPS BACK AND PAUL STEPS BACK TO THE PODIUM. GOVERNOR SANDOVAL WILL WAIT FOR PAUL TO INTRODUCE ELON MUSK AND TO GREET HIM ON STAGE.

PAUL ANDERSON:
THANK YOU, GOVERNOR SANDOVAL. WE WILL NOW HAVE THE OPPORTUNITY TO WELCOME TO THE STAGE THE CEO OF TESLA, ELON MUSK.

AMERICAN OVERSIGHT

ELON COMES TO STAGE, SHAKES HANDS WITH GOVERNOR SANDOVAL. THEY SIT DOWN ACROSS FROM EACH OTHER AND BEGIN DISCUSSION.

WHEN THEIR DISCUSSION ENDS, PAUL RETURNS TO PODIUM. (ELON MAY STAY ON THE STAGE FOR A PICTURE WITH THE OTHER PANELISTS; OR HE MAY DEPART THE STAGE.). GOVERNOR WILL REMAIN ON STAGE TO AWAIT THE OTHER PANELISTS.

SEATS WILL BE REARRANGED BY CREW TO PLACE FOUR CHAIRS FOR THE PANEL DISCUSSION.

PAUL ANDERSON:
GOVERNOR SANDOVAL AND ELON, THANK YOU FOR YOUR INSIGHTS INTO THE TESLA-NEVADA STORY AND THE IMPACT OF TESLA ON THE STATE. WE NOW HAVE THE OPPORTUNITY TO LISTEN AS GOVERNRO SANDOVAL MODERATES A PANEL FOCUSED ON OPPORTUNITIES AND CHALLENGES FACING THREE OF OUR INNOVATIVE AND DYNAMIC COMPANIES – TESLA, BLOCKCHAINS, LLC, AND PANASONIC

THE GOVERNOR WILL BE JOINED ON THE PANEL BY THE CHIEF TECHNICAL OFFICER FOR TESLA, JB STRAUBEL; THE CHIEF EXECUTIVE OFFICER OF BLOCKCHAINS, LLC, JEFFREY BERNS; AND PANASONIC'S DIRECTOR OF TESLA ENERGY BUSINESS DIVISION, SHAWN WATANABE.

THE PANELISTS WILL COME TO THE STAGE AND TAKE THEIR SEATS. GOVERNOR SANDOVAL WILL FOLLOW THE SCRIPT OF QUESTIONS.

GOVERNOR WILL CLOSE THE SUMMIT IN HIS REMARKS FROM THE PANEL.

AMERICAN OVERSIGHT

GOVERNOR SANDOVAL:

GENTLEMAN, THANK YOU FOR YOUR WILLINGNESS TO PARTICIPATE IN TODAY'S PANEL DISCUSSION. I KNOW EACH OF YOU ARE BUSY MAKING GREAT THINGS HAPPEN AT YOUR RESPECTIVE COMPANIES. I'D LIKE TO TAKE THIS OPPORTUNITY TO ASK EACH OF YOU TWO OR THREE QUESTIONS REGARDING YOUR SUCCESSES AND FUTURE PLANS, OPPORTUNITIES, AND CHALLENGES.

JB, WE'LL START WITH YOU. THANK YOU AGAIN FOR HOSTING US AT THIS AMAZING, GROWING FACILITY. EVERYWHERE I TRAVEL, I'M ASKED ABOUT HOW WE GOT THE TESLA FACTORY IN NEVADA. I LOVE TO SHARE THE STORY. I ALSO LIKE TO TALK ABOUT THE CLOSE PARTNERSHIP BETWEEN TESLA AND THE STATE OF NEVADA ON WORKFORCE DEVELOPMENT. ***WHAT HAS BEEN DONE TO MEET YOUR NEEDS WITH THE TRAINING AND EDUCATION OF YOUR WORKFORCE?***

JB STRAUBEL:

3-5 MINUTE ANSWER.

GOVERNOR SANDOVAL:

THANK YOU, JB.

JEFF, IT'S EXCITING TO HAVE YOU ON THE PANEL. WITH YOUR RECENT LARGE LAND PURCHASE – 69,000 ACRES! - NEVADA AND THE WORLD IS EXCITED TO LEARN MORE ABOUT YOUR PLANS. YOU HAVE A SHORT VIDEO FOR US TO WATCH.

(*VIDEO ROLLS)*

JEFF, WILL YOU PLEASE EXPLAIN WHAT WE JUST SAW AND HOW DO YOU PLAN TO CHANGE THE WORLD?

JEFFREY BERNS:

THANK YOU, GOVERNOR SANDOVAL….

AMERICAN OVERSIGHT

GOVERNOR SANDOVAL:

THAT'S EXCITING NEWS, JEFFREY. I LOOK FORWARD TO LEARNING MORE.

SHAWN, IT IS WONDERFUL TO HAVE PANASONIC IN NEVADA PARTNERING WITH TESLA IN THE MANUFACTURING OF CYLINDRICAL LITHIUM-ION CELLS. **RELATED TO THE QUESTION THAT I ASKED JB, WHAT IS YOUR CHALLENGE IN FINDING TALENT IN NORTHERN NEVADA?**

MR. WATANABE:

ANSWER

GOVERNOR SANDOVAL:

THANK YOU, SHAWN. ONE MORE QUESTION FOR YOU. **WHAT INFRASTRUCTURE IS NEEDED TO ALLOW PANASONIC TO CONTINUE TO EXCEL IN ITS OPERATIONS?**

MR. WATANABE:

ANSWER

GOVERNOR SANDOVAL:

THANK YOU. I LOOK FORWARD TO SEEING THE IMPROVEMENTS MADE AND THEIR IMPACT.

JEFF, YOUR BACKGROUND IS IN CONSUMER PROTECTION. IN FACT, YOU LED TWENTY LAWFIRMS IN THE ONLY SUCCESSFUL LAWSUIT AGAINST BIG BANKS FOR THEIR PREDATORY LENDING WHICH LED TO THE HOUSING COLLAPSE. AS I MENTIONED IN MY COMMENTS EARLIER, NEVADA WAS EXTREMELY HARD HIT BY THE HOUSING COLLPASE. **WILL YOU PLEAES EXPLAIN TO EVERYONE WHY YOU WENT FROM LAW INTO BLOCKCHAIN TECHNOLOGY?**

JEFFREY BERNS:

ANSWER

GOVERNOR SANDOVAL:

AMERICAN OVERSIGHT

I WILL BE WATCHING CLOSELY AS THE USE OF BLOCKCHAIN TECHNOLOGY CONTINUES TO DEVELOP AND SPREAD.

JB, AS PRODUCTION AND OPERATIONS GROW AT GIGAFACTORY ONE, YOU WILL REQUIRE MORE ENERGY AND MORE RESOURCES. I KNOW THAT SUSTAINABILITY IS IMPORTANT TO TESLA. ***HOW DOES TESLA PLAN TO CONTINUE TO MEET IT'S SUSTAINABILITY GOALS?***

JB STRAUBEL:

ANSWER

GOVERNOR SANDOVAL:

THANK YOU. ONE LAST QUESTION FOR EACH OF YOU. ***IN TWO OR THREE SENTENCES WHAT DO YOU THINK IS THE MOST EXCITING CHALLENGE OR OPPORTUNITY THAT WILL BE ADDRESSED BY NEW TECHNOLOGY THAT IS ALREADY BEING DEVELOPED?***

MR. WATANABE:

ANSWER

JEFFREYREY BERNS:

ANSWER

JB STRAUBEL:

ANSWER

GOVERNOR SANDOVAL:

JB, JEFF, AND SHAWN – THANK YOU FOR YOUR TIME TODAY AND YOUR WONDERFUL INSIGHTS. THANK YOU FOR YOU WILLINGNESS TO DO BUSINESS IN NEVADA AND FOR YOUR GLOBAL OUTLOOK IN THE WAY YOU APPROACH THE MARKET. YOU ARE THE NEW NEVADA!

AMERICAN OVERSIGHT

LADIES AND GENTLEMEN, THANK YOU FOR BEING HERE TODAY. EACH OF YOU ARE DIRECT PARTICIPANTS IN THIS EFFORT TO CREATE THE NEW NEVADA, WHILE PRESERVING THE BEST OF WHAT CAME BEFORE. IT'S AN HONOR AND PLEASURE TO WORK WITH YOU.

THANK YOU! AND GOD BLESS!

AMERICAN OVERSIGHT

THANK YOU, PAUL FOR THE KIND INTRODUCTION.

LADIES AND GENTLEMEN, IT IS AN HONOR TO BE HERE AT TESLA'S GIGAFACTORY ONE. TO CELEBRATE THE ACHIEVEMENTS OF THE PAST EIGHT YEARS. IT IS EQUALLY EXCITING TO LOOK TO WHAT THE FUTURE WILL BRING. THIS TECH SUMMIT IS AN OPPORTUNITY FOR US TO DO JUST THAT – CELEBRATE WHAT WE HAVE ACCOMPLISHED WITH AN EYE FOCUSED ON THE FUTURE – THE FUTURE THAT WILL BE CREATED AND DRIVEN BY THE DEMAND FOR NEW TECHNOLOGIES THAT WILL DRIVE JOB GROWTH AND IMPROVE THE LIVES OF NEVADANS.

EIGHT YEARS AGO, AT THIS TIME, I WAS IN THE FINAL MONTH OF MY CAMPAIGN FOR THE OFFICE OF GOVERNOR. FRIENDS AND COLLEAGUES ASKED ME WHY I WOULD EVER CONSIDER LEAVING A LIFETIME APPOINTMENT ON THE FEDERAL BENCH TO RUN FOR OFFICE IN THE MIDDLE OF A DESTRUCTIVE RECESSION. NEVADA WAS THE HARDEST HIT STATE. IN 2011, THE UNEMPLOYMENT RATE IN NEVADA SPIKED AT OVER 14%. NEVADA LOST OVER 175,000 JOBS. WE LED THE NATION IN HOME FORECLOSURES. I DECIDED TO RUN BECAUSE I LOVE NEVADA AND KNEW WE COULD DO BETTER.

UPON TAKING OFFICE, HARD DECISIONS HAD BE MADE, BUT AT THE SAME TIME WE HAD TO LOOK TO THE FUTURE. WE HAD TO SET A NEW PATH; I KNEW WE NEEDED TO DIVERSIFY OUR ECONOMY. TRADITIONALLY, OUR ECONOMY WAS DRIVEN BY MINING AND GAMING AND HOSPITALITY. THOSE HAD TO REMAIN A VITAL PART OF THE ECONOMY GOING FORWARD, BUT WE HAD TO EXPAND BEYOND THAT.

AMERICAN OVERSIGHT

AS GOVERNOR, I CREATED THE GOVERNOR'S OFFICE OF ECONOMIC DEVELOPMENT. PREVIOUSLY, THE RESPONSIBILITY WAS WITH THE LIEUTENANT GOVERNOR. BUT WE HAD TO ELEVATE THE FOCUS ON ECONOMIC DEVELOPMENT – IT BECAME ONE OF MY TOP PRIORITIES. I BROUGHT IN GREAT TALENT TO RUN THE GOVERNOR'S OFFICE OF ECONOMIC DEVELOPMENT – STEVE HILL, WHO NOW HEADS THE LAS VEGAS CONVENTION AND VISITORS AUTHORITY, AND NOW PAUL ANDERSON. WE FOCUSED ON IDENTIFYING SECTORS THAT COULD GROW AND STRENGTHEN THE ECONOMY AND CREATE NEW JOBS. THESE SECTORS INCLUDED DRONE TECHNOLOGY, WATER TECHNOLOGY, AUTOMOUS VEHICLES, AND OTHERS. WE PASSED LEGISLATION TO GOVERN THE TESTING AND USE OF THESE TECHNOLOGIES IN NEVADA IN AN EFFORT TO ATTRACT BUSINESSES AND ENTREPRENEURS. WE CREATED WATERSTART, A WATER TECHNOLOGY CENTER OF EXCELLENCE. NEVADA WAS SELECTED AS ONE OF SIX NATIONAL TEST SITES FOR UNMANNED AERIAL PLATFORMS. WE CREATED THE NEVADA INSTITUTE OF AUTONOMOUS SYSTEMS TO DRIVE GROWTH IN THE DRONE SECTOR.

WORKING WITH THE STATE LEGISLATURE WE ESTABLISHED BUSINESS INCENTIVES TO ATTRACT NEW BUSINESSES. I TRAVELED GLOBALLY TO PROMOTE NEVADA. IN OUR EFFORT TO DIVERSIFY, WE PURSUED NEW OPTIONS THAT MIGHT HAVE SEEMED OUT OF OUR REACH PREVIOUSLY. THE DECISION BY TESLA TO BUILD THE GIGAFACTORY IN NORTHERN NEVADA WAS A MAJOR WIN THAT HAS HAD FAR REACHING RESULTS. IT HAS CAUSED OTHER BUSINESS LEADERS TO ASK: WHY NEVADA?

AMERICAN OVERSIGHT

IN OUR EFFORTS TO DIVERSIFY THE ECONOMY, TO PURSUE JOBS THAT REQUIRED GREATER TECHNICAL SKILLS, AND WITH THE COMING OF TESLA, WE KNEW WE HAD TO FOCUS ON IMPROVING OUR EDUCATION AT ALL LEVELS. IN 2015 WE PASSED SWEEPING CHANGES TO EDUCATION THAT INCLUDED AN INVESTMENT OF $343 MILLION TO PREPARE STUDENTS TO MEET THE NEEDS OF THE NEW NEVADA ECONOMY. I'VE PUSHED FOR ADDITIONAL INVESTMENTS IN HIGHER EDUCATION. HAND-IN-HAND WITH PRIMARY AND HIGHER EDUCATION, I HAVE FOCUSED ON THE NEED FOR COMPREHENSIVE WORKFORCE DEVELOPMENT TO PREPARE OUR NEVADANS FOR JOBS LIKE THOSE AT THE GIGAFACTORY. IN FACT, WE HAVE WORKED DIRECTLY WITH TESLA, PANASONIC, AND OTHER GREAT EMPLOYERS TO MAKE SURE THAT THE STATE IS FOCUSED ON PROVIDING EDUCATION AND TRAINING TO MEET THEIR NEEDS. I CREATED THE GOVERNOR'S OFFICE OF WORKFORCE INNOVATION TO WORK WITH OUR EMPLOYERS AND EDUCATORS TO PREPARE NEVADANS FOR THE NEW NEVADA.

ACROSS THE STATE, OUR EFFORTS ARE PAYING OFF. WE HAVE REPLACED ALL OF THE JOBS THAT WERE LOST AND ADDED MANY MORE. AS OF AUGUST 2018, THE UNEMPLOYMENT RATE FOR NEVADA IS 4.5%. WE ARE IN THE TOP 5 STATES FOR THE BEST BUSINESS CLIMATES. IN SOUTHERN NEVADA, WE HAVE SEEN MORE ADVANCED MANUFACTURERS MOVING IN AND EXPANDING, THE RAIDERS WILL CALL LAS VEGAS HOME IN A NEW STADIUM. HERE IN NORTHERN NEVADA, WE HAVE SEEN COMPANIES LIKE GOOGLE, APPLE, WAL-MART AND OTHERS MOVE IN. TODAY IT'S EXCITING TO WELCOME BLOCKCHAINS, LLC TO THIS COMMUNITY OF CUTTING-EDGE BUSINESSES, INDUSTRY AND WORLD LEADERS. BLOCKCHAINS MADE WAVES BY PURCHASING OVER 60,000 ACRES OF LAND HERE AT TRIC.

AMERICAN OVERSIGHT

TOGETHER THE COMPANIES HERE ARE DEVELOPING AND UTILIZING EXCITING NEW TECHNOLOGIES THAT WILL DRIVE GROWTH AND IMPROVE LIVES ACROSS THE GLOBE.

IT IS THE DEMAND, THE NEED AND THE DEVELOPMENT FOR NEW TECHNOLOGIES THAT HAS BROUGHT US TOGETHER TODAY FOR THIS TECH SUMMIT. I LOOK FORWARD TO OUR DISCUSSIONS TODAY, TO REVIEW HOW WE GOT HEAR, BUT EVEN MORE IMPORTANTLY TO LOOK AHEAD.

Subject: Texas v. Azar - Fact Sheet
Attachments: TX v Azar Factsheet_Final.pdf; ATT00001.htm

Governor's Senior Staff,

Attached is a fact sheet from the White House on *Texas V. Azar.*

Here is a statement from White House Press Secretary Sarah Sanders:

> "Obamacare has been struck down by a highly respected judge. The judge's decision vindicates President Trump's position that Obamacare is unconstitutional. Once again, the President calls on Congress to replace Obamacare and act to protect people with preexisting conditions and provide Americans with quality affordable healthcare. We expect this ruling will be appealed to the Supreme Court. Pending the appeal process, the law remains in place."

Here is a statement from the Department of Health and Human Services:

> "The recent U.S. District Court decision regarding the Affordable Care Act is not an injunction that halts the enforcement of the law and not a final judgment. Therefore, HHS will continue administering and enforcing all aspects of the ACA as it had before the court issued its decision. This decision does not require that HHS make any changes to any of the ACA programs it administers or its enforcement of any portion of the ACA at this time. As always, the Trump Administration stands ready to work with Congress on policy solutions that will deliver more insurance choices, better healthcare, and lower costs while continuing to protect individuals with pre-existing conditions."

Please let me know if you have any questions.

Thanks,
Nic

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006497

THE WHITE HOUSE

Understanding Texas v. Azar

Top Line

What did the ruling say?
In its decision on December 14, 2018, the district court declared that the individual mandate is unconstitutional, and that the rest of the Affordable Care Act (ACA) is invalid because it cannot stand without the individual mandate. However, the court did not grant an injunction, and therefore the health insurance exchanges and other provisions of the law are not immediately impacted.

When does the ruling take effect? How will this affect Healthcare.gov open enrollment?
The judge's decision does not have a timeline for implementation. It is a declaratory judgment on part of the case, not a judgment on the entire case or an order on implementation. The Exchange plans will therefore continue to enroll individuals for 2019.

Will Congress need to act immediately?
No, Congress does not need to immediately act. The Trump Administration looks forward to working with Congress on a bipartisan basis to continue to protect people with pre-existing conditions, help Americans harmed by the ACA, and allow Americans to access affordable health care coverage.

What are the next steps?
There are likely to be further judicial proceedings regarding the merits and implementation of the district court's decision.

Additional Legal Background

What is the background for the Texas v. Azar litigation?
In NFIB v. Sebelius, the Supreme Court held in 2012 that the individual mandate could be justified as an exercise of Congress's taxing power because it was the triggering event for a tax liability. In the recent Tax Cuts and Jobs Act of 2017, however, Congress made the tax penalty $0 starting with the 2019 tax year.

What did Texas assert about the individual mandate when it filed its lawsuit?
Texas and other states brought suit arguing that once the tax penalty had been lowered to $0, the individual mandate could no longer be justified as a tax and was therefore unconstitutional. Texas argued, based on the intent of Congress when it adopted the ACA, that the whole ACA would need to be invalidated if the individual mandate was invalidated.

What type of relief did Texas seek in its lawsuit?
Texas sought an injunction precluding the federal government from enforcing the ACA.

Did the federal government agree with all of the claims argued by Texas?
No, the federal government took the position that Congress saw the individual mandate as inseverable from the guaranteed issue and community rating provisions of the ACA—as the Obama administration had previously argued—but that the rest of the ACA could stand even without the individual mandate.

Subject: Council Concern on Northern Connector and EDAWN

Mayor Schieve and Reno Council Members

I offer my apologies for any misunderstanding as far as what we have been calling a second road to TRI. It seems that Council Member McKenzie has misunderstood actions taken by EDAWN and voiced his concerns publicly in his attacks on EDAWN. I attempted to explain to him in the e-mail below (which includes notes from the meeting) that the only reason EDAWN was addressing this regional transportation issue is because it is directly impacting employers we are working with, and that there are no plans at RTC or NDOT to address the growing congestion on the I-80 corridor to TRI. I personally discussed this concern with NDOT to verify that there is nothing planned beyond a turn lane at USA Parkway for the next 10 years and that without regional support to raise the issue it may be much longer than that before anything is even considered.

The road to TRI is becoming unsafe for the Reno/Sparks residents traveling there every day and there will likely be three times as much traffic by 2025. There are serious accidents occurring almost daily with no other option to get there from the metro area. We have a single point of failure that will get much worse in the very near future. Because the region is larger than Washoe County I convened a meeting to further define the issue and to highlight one option to consider. In no way was this anything but an initial meeting to conduct fact finding and to raise the issue as this very serious regional challenge that does not seem to be on anyone's radar.

To ignore the problem and its serious impacts on economic development would be irresponsible in my view and this concern has been discussed at several EDAWN Board meetings. I actually had an employee that works at TRI tell me that they spend more time in traffic here than they did in the Bay

AMERICAN OVERSIGHT

Area? Additionally, we always invite City of Reno representation to any meeting we have - We have been very transparent in raising this as a serious regional concern.

I only wish EDAWN had the power to redirect NDOT funding as Councilman McKenzie has alleged. If someone can tell me or the 8,000 employees and 50+ companies that work there and live here that there is a plan – then I have just wasted my time. If not, then I would ask for your help in first acknowledging the problem and second actively engaging as part of a regional effort to identify potential solutions. Just telling RTC to do nothing may not be the most strategic approach.

I am always available to discuss this or any issue you have with me or EDAWN, at a Council Meeting or one-on-one. We work very hard as part of a very large team to improve the economic vitality of the region based on a strategic plan that the City of Reno helped us develop but we cannot be successful in our efforts without your continued support.

Respectfully

Mike

To: Paul McKenzie (mckenziep@reno.gov) <mckenziep@reno.gov>
Subject: Northern Connector

Paul

I would be glad to meet with you to discuss this issue. Below is a summary of a meeting we held to start the process of addressing this growing regional transportation need with a map attached. Many of your residents in the North Valleys drive to TRI daily and that commute is not only getting much longer but is getting more dangerous. The projections are included in the summary below.

You recently said that "EDAWN has been working behind the scenes to try and redirect our transportation priorities to assist TRI at the detriment of the transportation issues in Reno-Sparks area, primarily the spaghetti bowl…It is my belief that the City of Reno partners should be working with us not against us."

Not sure what behind the scenes is as we have discussed this issue at the EDAWN Board meeting for more than 6 months, where the City of Reno has a seat, and provided invites and follow ups to meetings we have had with the City, like the meeting below? Our role and involvement is merely to get the region together to address a significant transportation problem, a problem that until now, is not even on the NDOT or RTC plans to address in the next 10 years!

AMERICAN OVERSIGHT

Until we get a regional solution to propose to the state there is little reason to worry about redirected funding to a spaghetti bowl that will not even have dirt moved until 2022 and will not be complete until 2025 at the earliest . By the way, by 2025 the Industrial park that bears Reno's name (TRI) will have an estimated 25,000 employees mostly from Reno and Sparks sitting in a brand new spaghetti bowl parking lot, going nowhere because the two lanes to TRI will be three times as congested as they are now.

Thanks

Mike

Subject: Norther Connector Meeting Nov 30 2017 - Initial Concept Discussion

To Team Members

First off, thanks for taking the time to discuss a second route from the Reno-Sparks metro area to TRI. I think most would agree the current single route (I-80) is already overloaded and at times a safety issue. Also, the need for a second route is good for the region and especially for the companies that chose to locate at TRI and the thousands of employees that are residents of Washoe County that are expecting a safe and reasonable commute.

The purpose of the meeting was to first validate support for a second route to TRI and to start the process to gain regional consensus on the Northern Route as the one most likely to be accomplish in the next five years. The reasons highlighted for the near term need are:

- **I-80 overloaded at current TRI employee count of 8,000 (Includes Construction)**
- **Projections for TRI to hit 25,000 in next 10 years**
- **I-80 the only connection to the metro area: 90% plus of employees live or are expected to live in the Reno-Sparks metro area**
- **At least 75% of the employees expected to live North of I-80**
- **Widening of I-80 is not likely in the next 10 years. Environmental issues with the river could take 8 years alone**
- **Accidents on I-80 currently average three major delays per week. Safety is becoming increasingly an issue**

The advantages of the proposed northern alignment include:

- **Most of TRI employees now live North of I-80**
- **Would relieve pressure off Spaghetti Bowl and I-395**

AMERICAN OVERSIGHT

- **Connect North Reno with North Sparks**
- **Opens up more land for affordable/workforce housing**
- **Opens up land for Sparks Business Park**
- **Takes significant pressure off of Pyramid Highway**
- **BLM Land right away can be acquired quickly**
- **May be fastest option – Doable in less than 5 years if region supports it**

Funding of the Northern Connection would likely depend on partial reallocation of existing resources and prioritization of the project as one of the region's top needs to get additional state and federal funds. Local governments have not yet agreed to this.

RTC will start the planning process for the route with a grant request to the Federal Land Access Program (FLAP). They are asking for about $450,000 for a planning study and expect the study to be complete in about a year. The RTC will keep us apprised of the status of the grant request.

Follow on Actions:

1. **EDAWN will set up a meeting in Jan/Feb to review progress - date (TBD)**
2. **RTC will apply for a Federal Land Access Program Grant**
3. **Regional Planning will be brought into the discussion – EDAWN**
4. **RTC will check with the UP Railway to see if they will entertain use of right away along their track to add that as an road option**
5. **EDAWN will work with Jim Dolan to see where the southern route discussion is with Storey County**
6. **GOED will work with RTC and the BLM to get the easement for the route through the BLM land**
7. **All Committee members will identify issues and or concerns from their organizations on this alternative**
8. **EDAWN further refine the connection to TRI – Map options**

Conclusion:

There was general agreement that the route selected was possible and could be completed in 5 years however, it would take a coordinated effort by the region to accomplish this. There does not seem to be another option that would be possible in the next 10 years and there is not unanimous agreement for support of this route at this time.

If you have other action items or corrections to this summary please let me know and we will add them to the list or make the necessary changes.

Thanks

Mike

Organizations involved: RTC, EDAWN, Cities of Reno and Sparks, Counties of Washoe and Storey, NDOT, GOED: Regional Planning to be added.

Subject: Today's briefing packet
Attachments: Governor's Economic Briefing June 2018 - DRAFT.pptx

Mike and Christina: I'm attaching today's briefing packet. There is a "bug" going around our office, and it's found its way to me. I really shouldn't be around the Governor (or anyone else), so as to not pass it along to him. I'm going to go home, and call into our meeting, if that's ok. Christina, I'll be in touch a couple of minutes before 3pm. Will you please make copies for the other attendees?

Thanks.

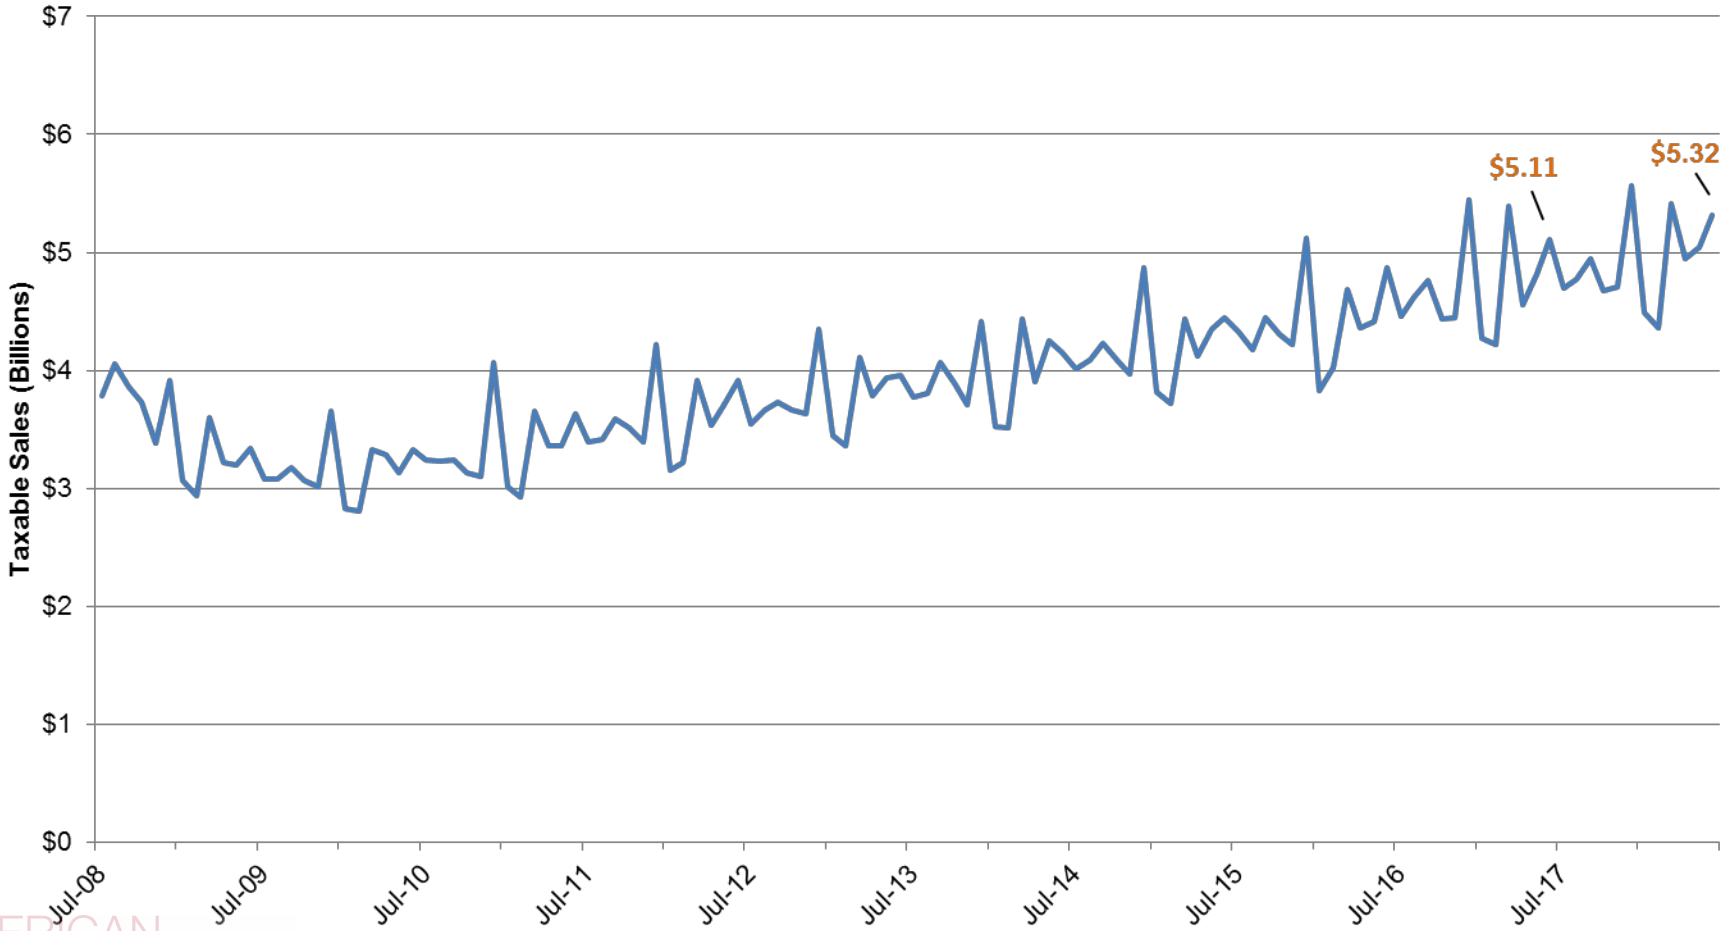
DEPARTMENT OF TAXATION

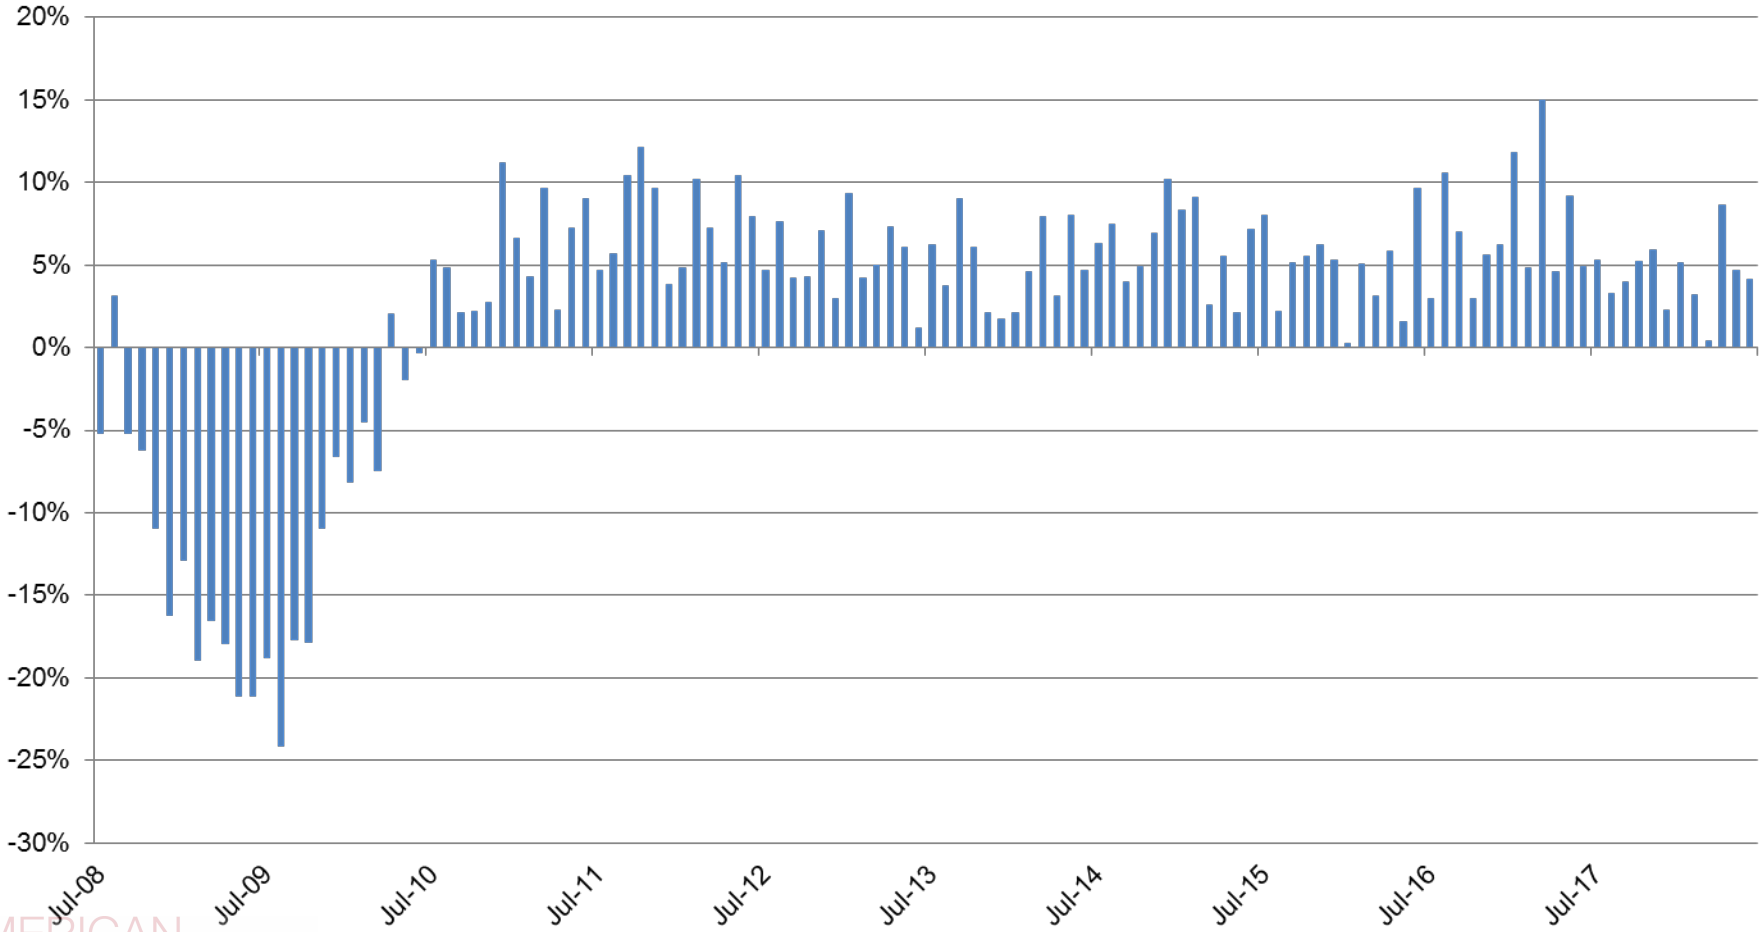
Governor's Economic Briefing on the State of Nevada



June 2018

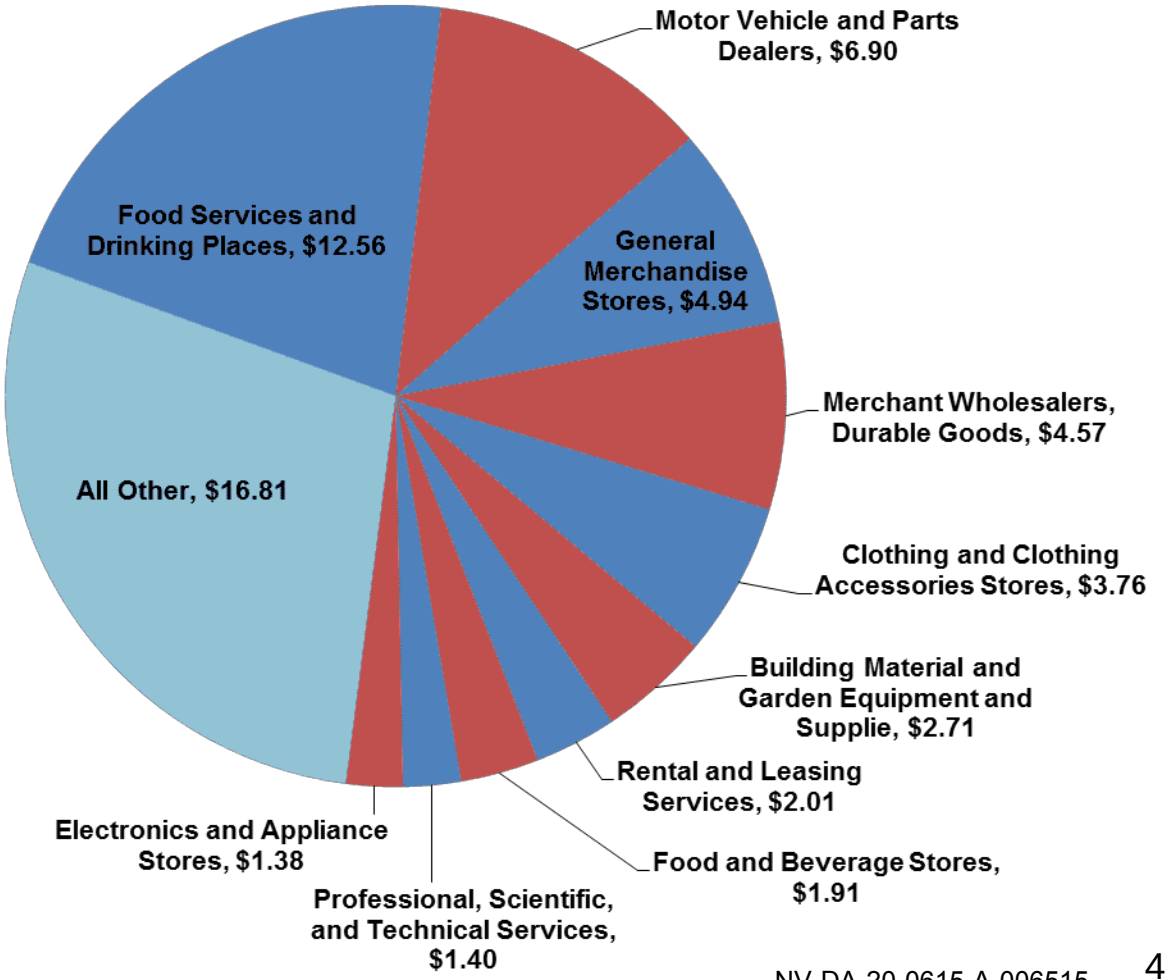
Department of Taxation

William D. Anderson, Executive Director
Shellie Hughes, Chief Deputy Executive Director
Kile Porter, Deputy Executive Director
Hayley Owens, Economist



AMERICAN OVERSIGHT

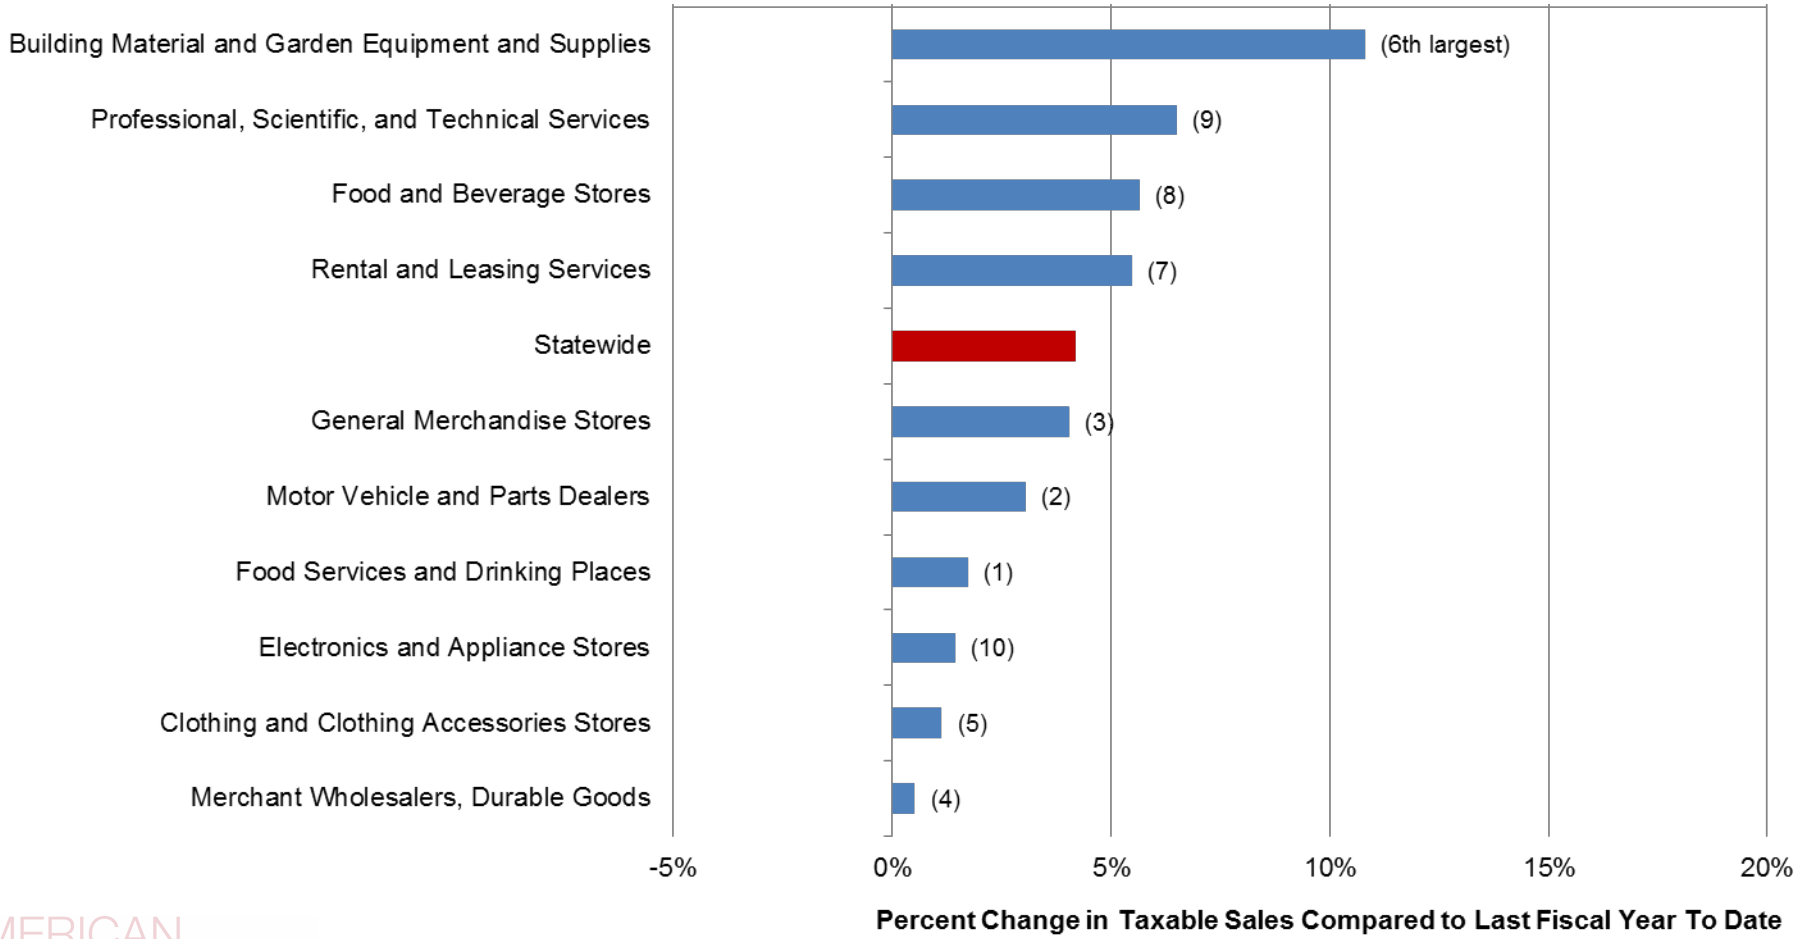
Taxable sales were $5.32B in June, up from $5.11B a year ago; Up about 60% from June 2010



AMERICAN OVERSIGHT

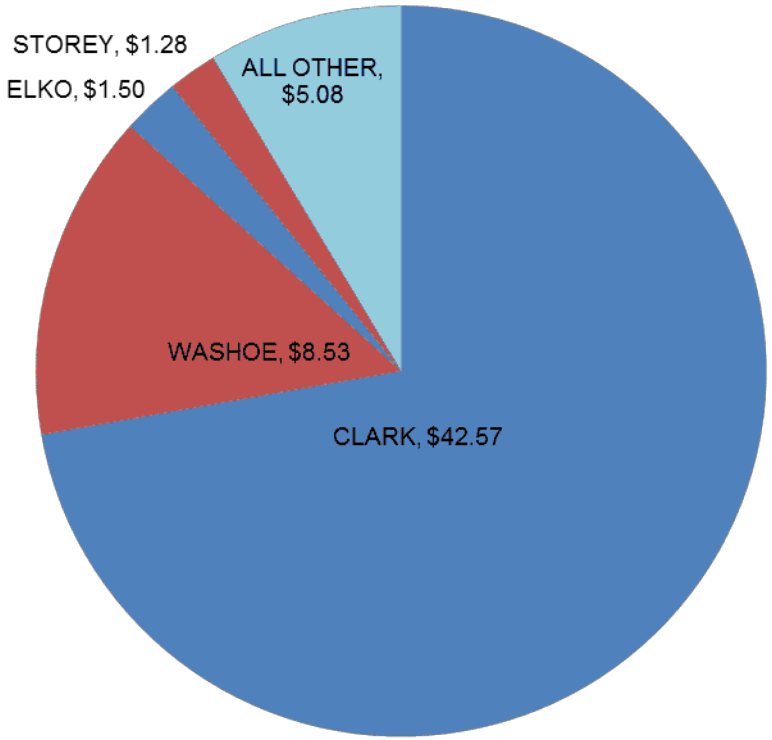
June marks 96 straight months of taxable sales growth; Up 4.1% vs. 2017; 22 of the 24 months during and just after the recession showed declines

AMERICAN OVERSIGHT



The top four categories make up nearly 50% of statewide taxable sales; Food services and drinking places leads the way with $12.56B in taxable sales

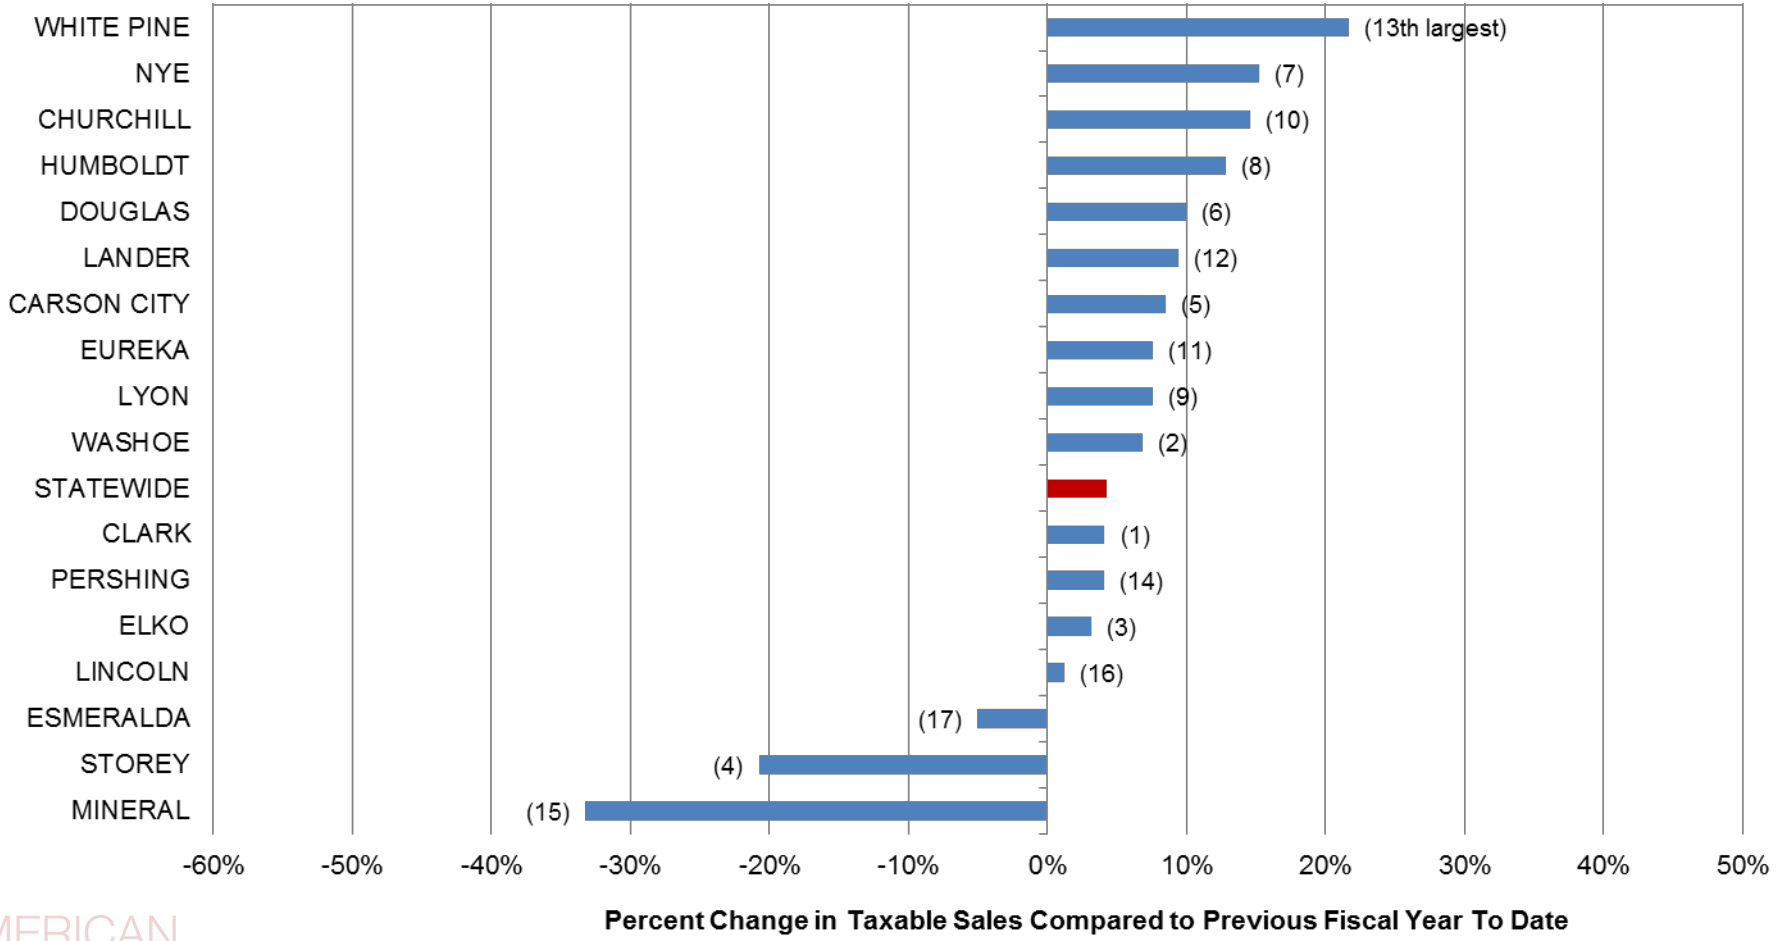
Taxable Sales FYTD (Billions)



AMERICAN OVERSIGHT

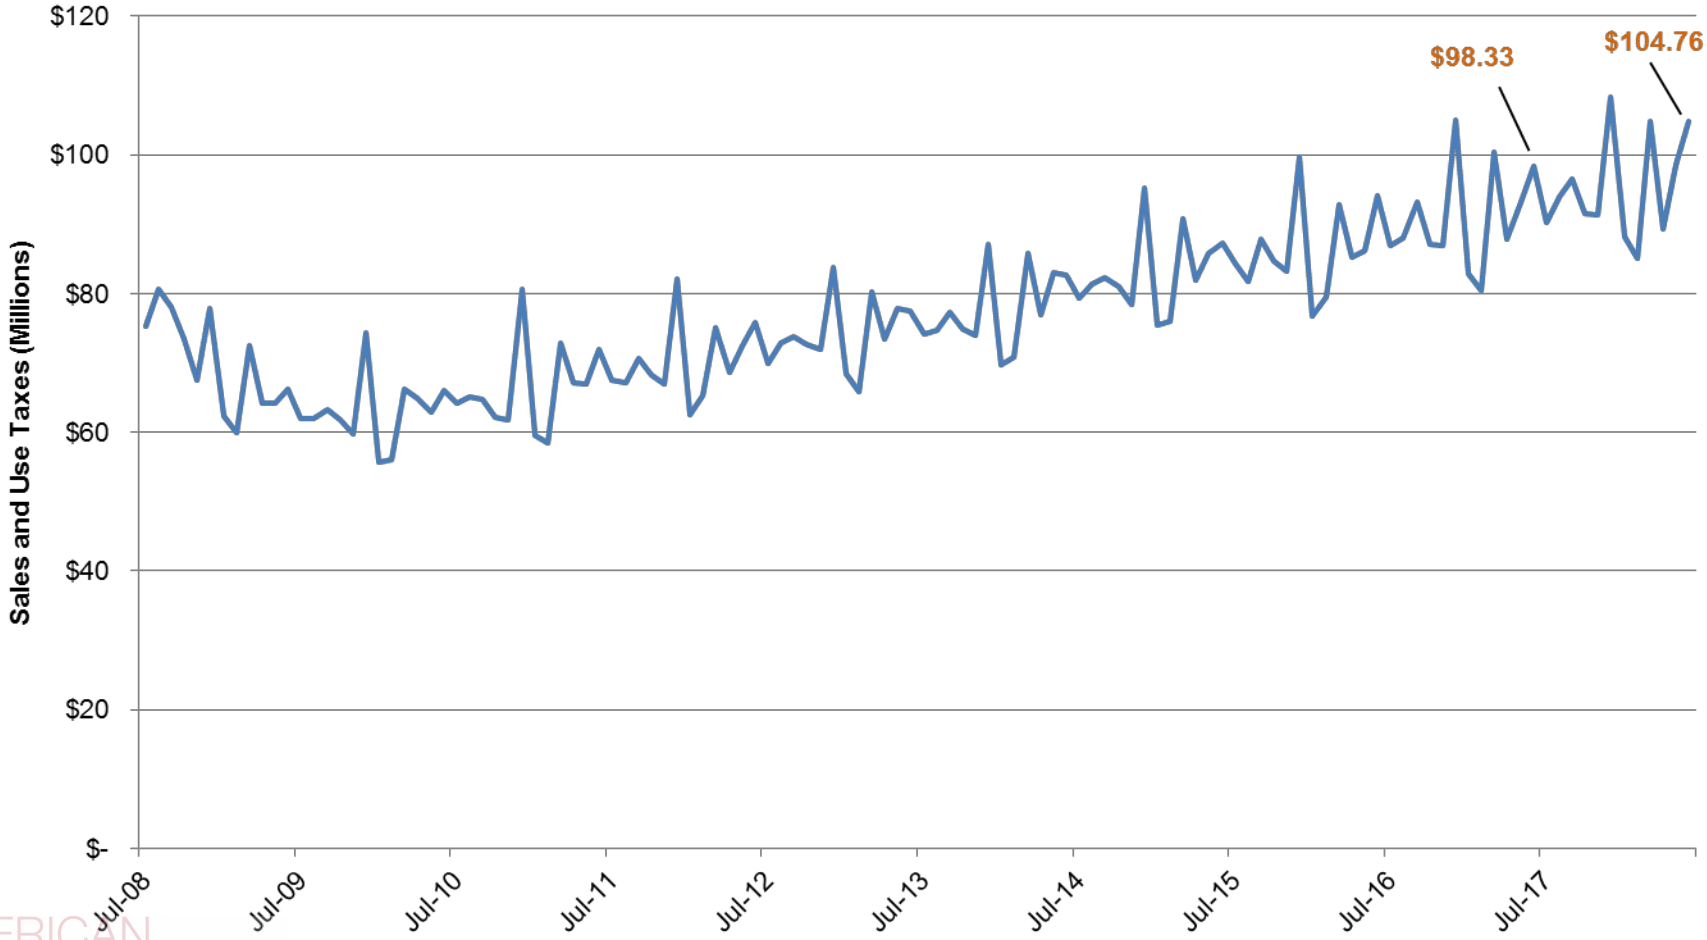
For the largest sales categories, building materials lead the way with over 10% growth this year

AMERICAN OVERSIGHT



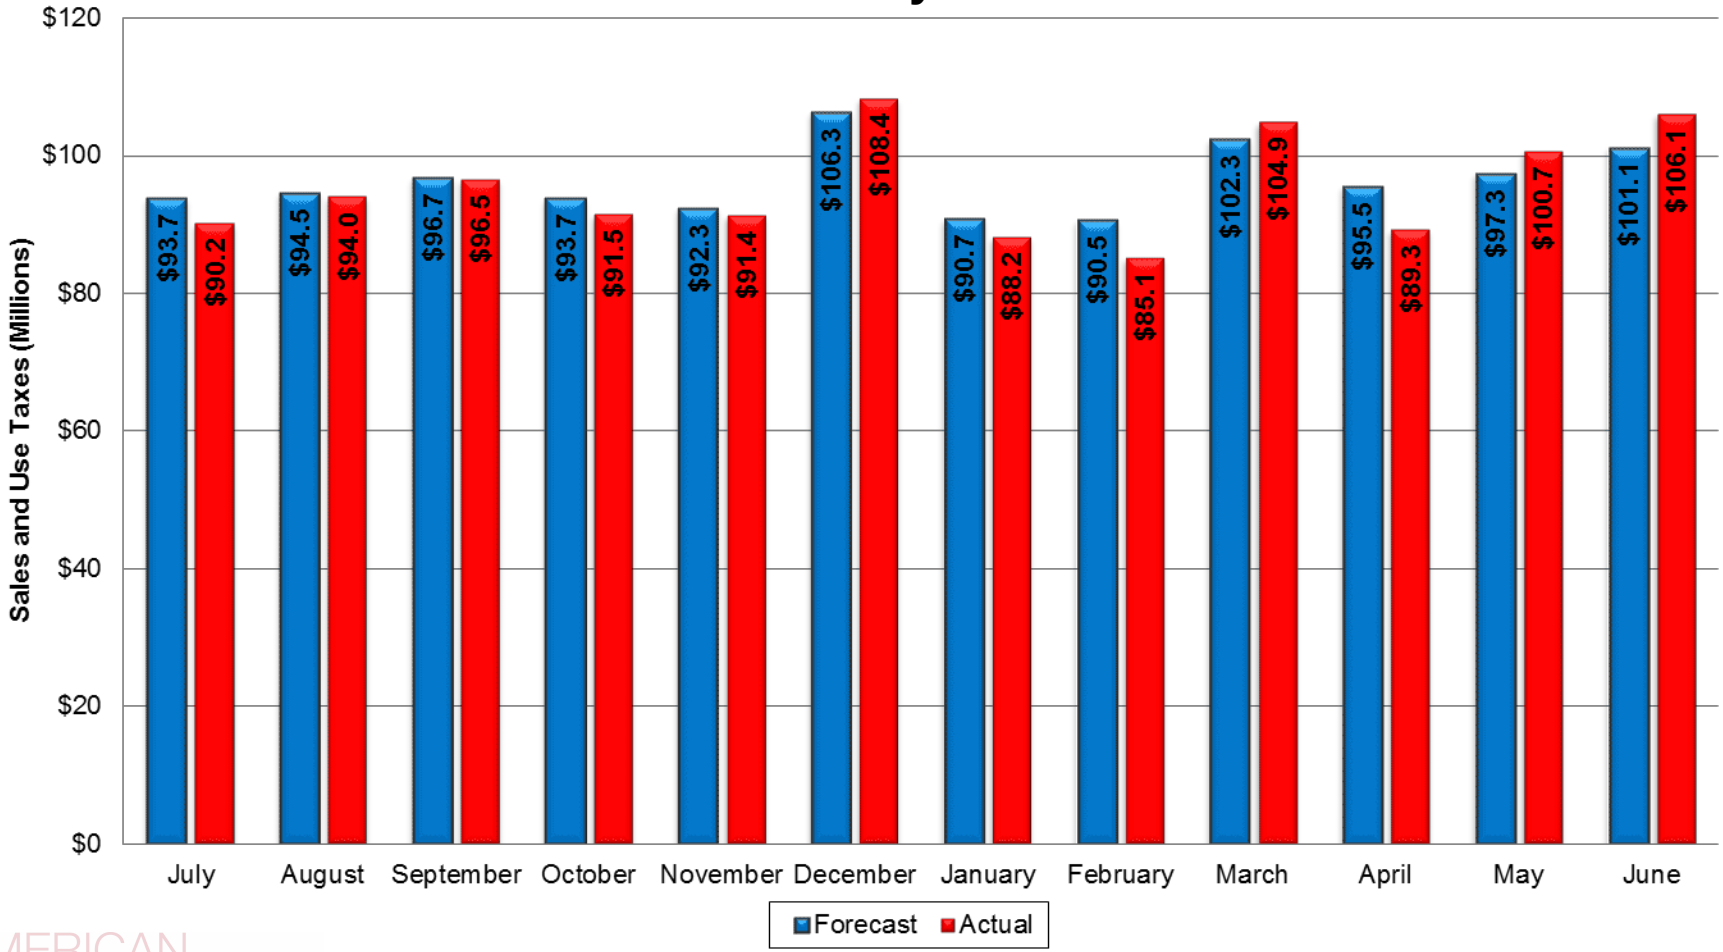
Clark County contributes about 72% of statewide taxable sales; Washoe, Elko, and Storey Counties also contribute large shares

Taxable Sales FYTD (Billions)



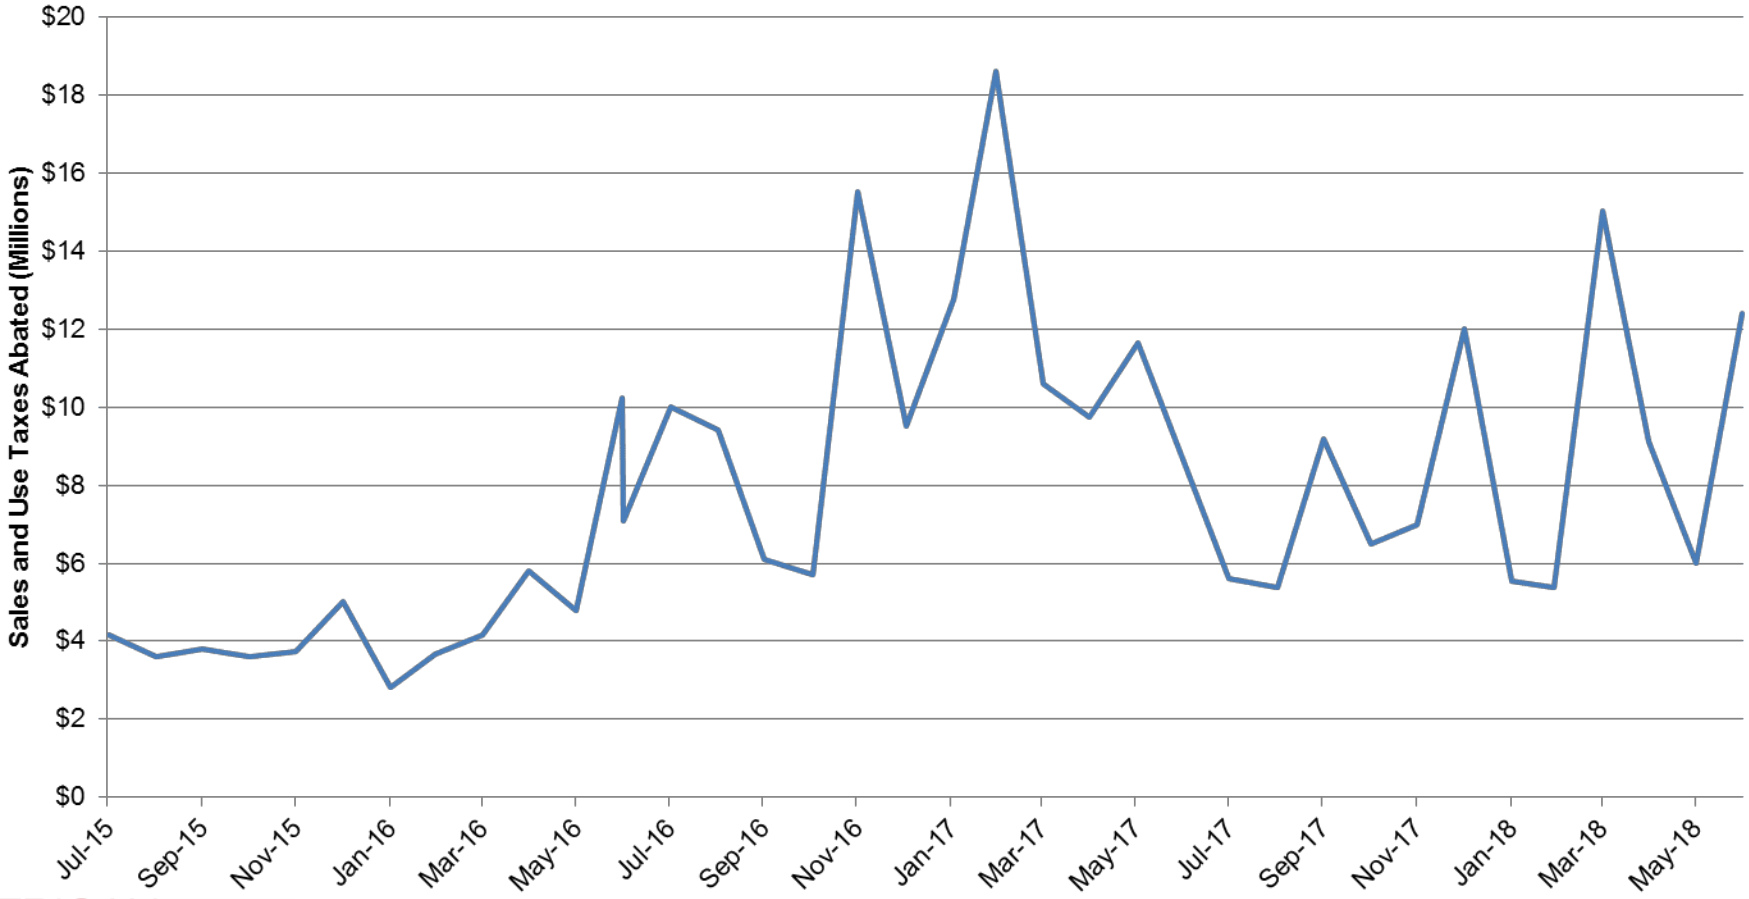
AMERICAN OVERSIGHT

Several rural counties lead the way in terms of growth; All four counties with double-digit growth this year are rural



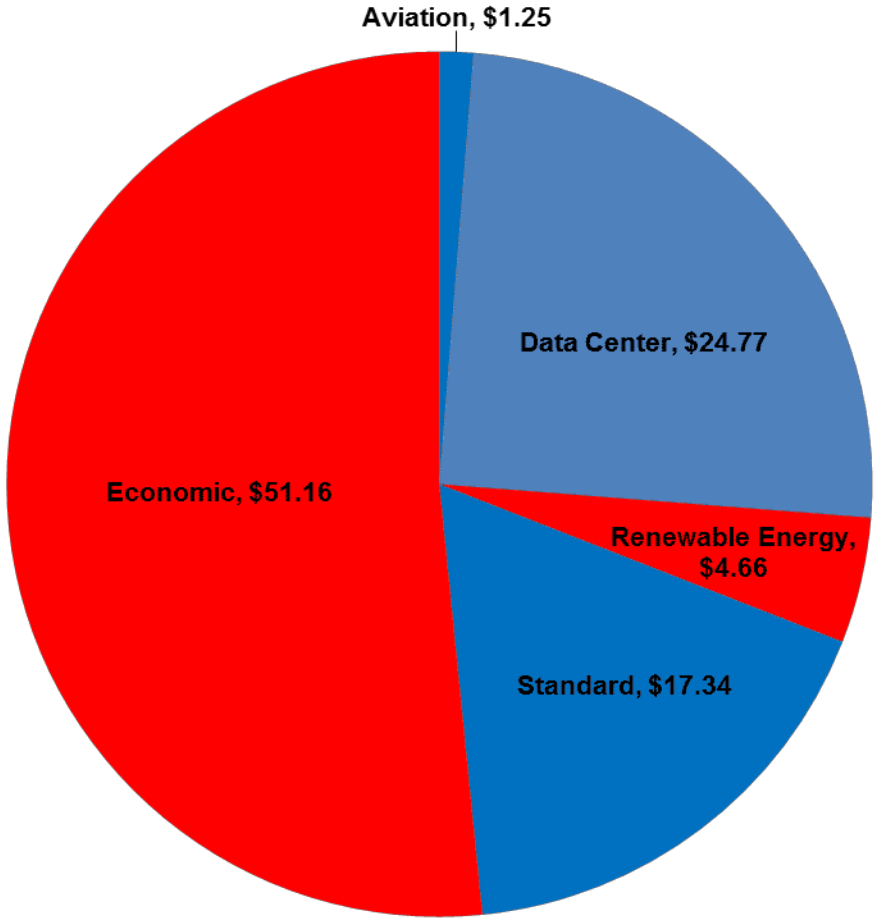
AMERICAN OVERSIGHT

General Fund sales tax collections = $104.76M vs. $98.33M a year ago; Up nearly 5% for the fiscal year



AMERICAN OVERSIGHT

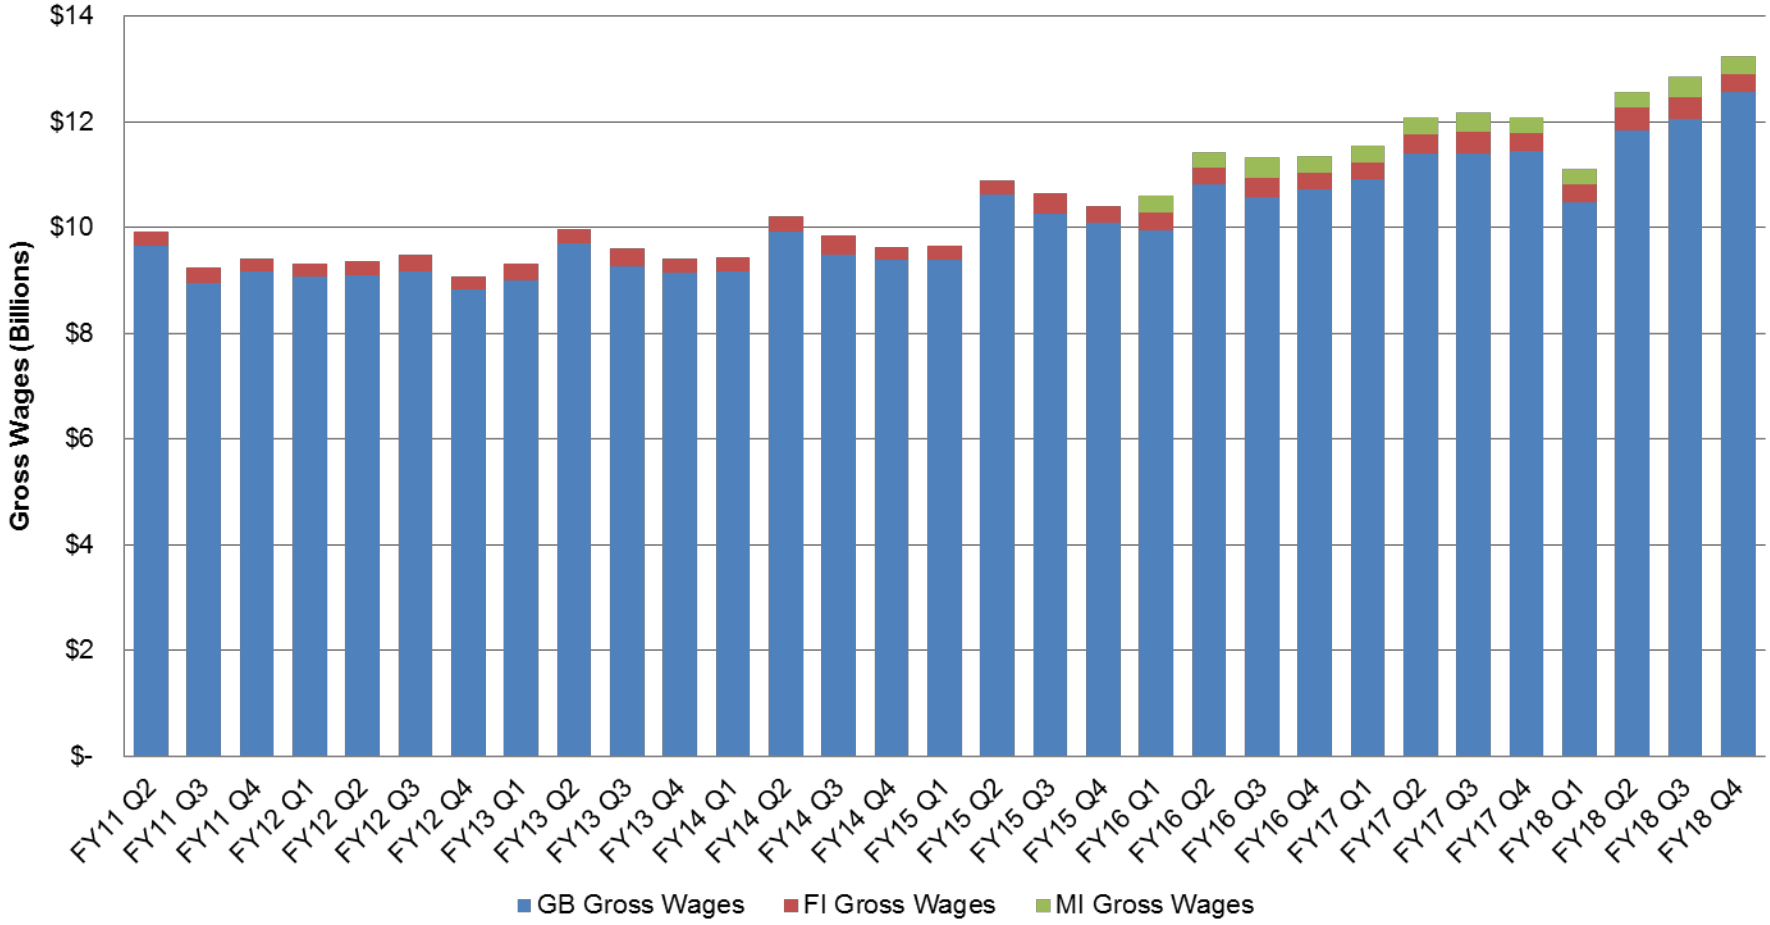
Sales tax collections almost 5% higher than projected in June, 0.7% ($8.59M) lower fiscal year-to-date



AMERICAN OVERSIGHT

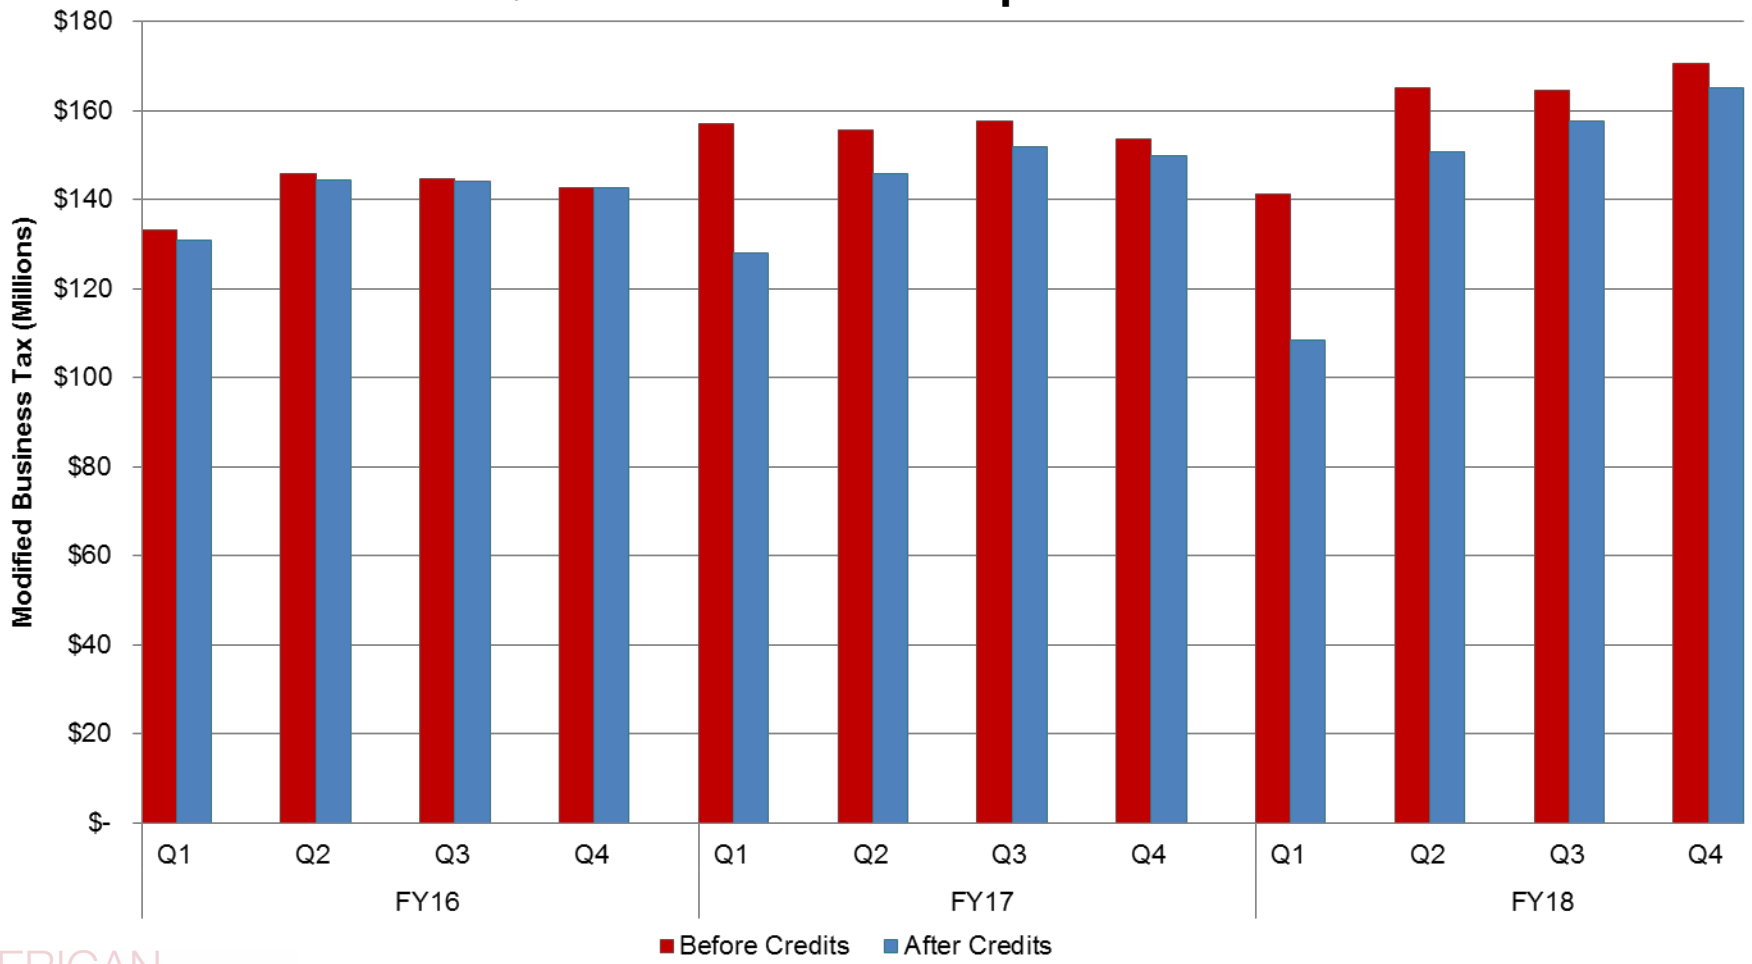
Sales and use taxes abated increased over the previous two fiscal years

AMERICAN OVERSIGHT



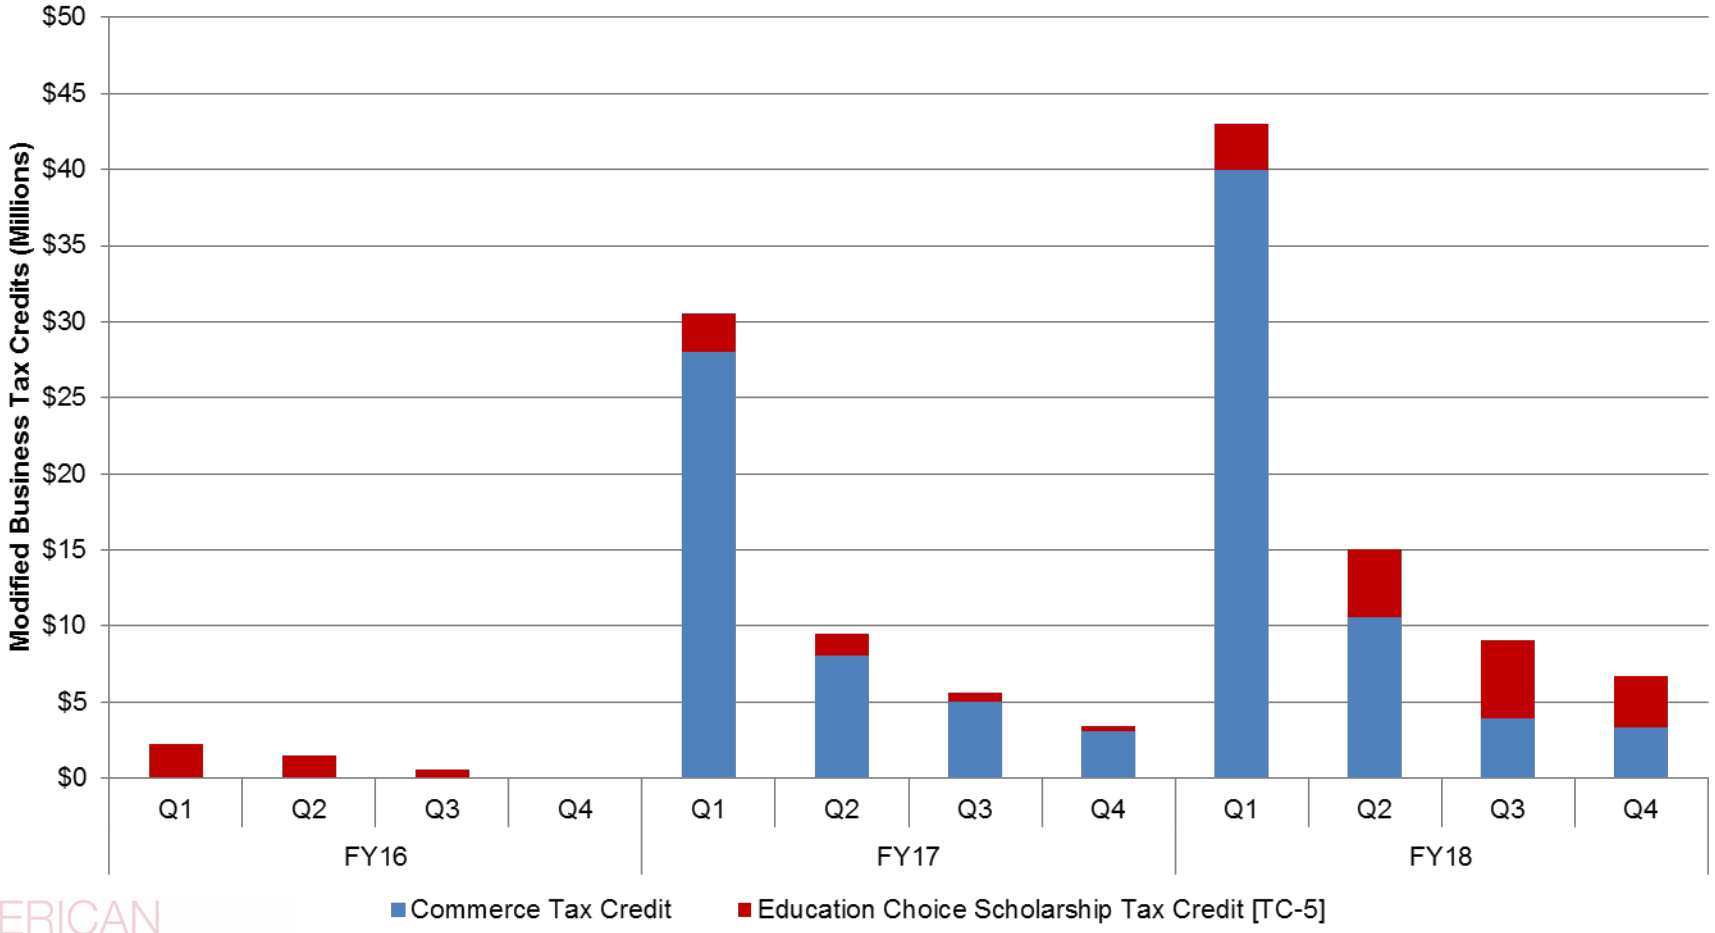
About $99.18M in sales and use taxes abated in FY18; economic diversification abatements account for over half of the abated taxes

Sales and Use Tax Abated (Millions)



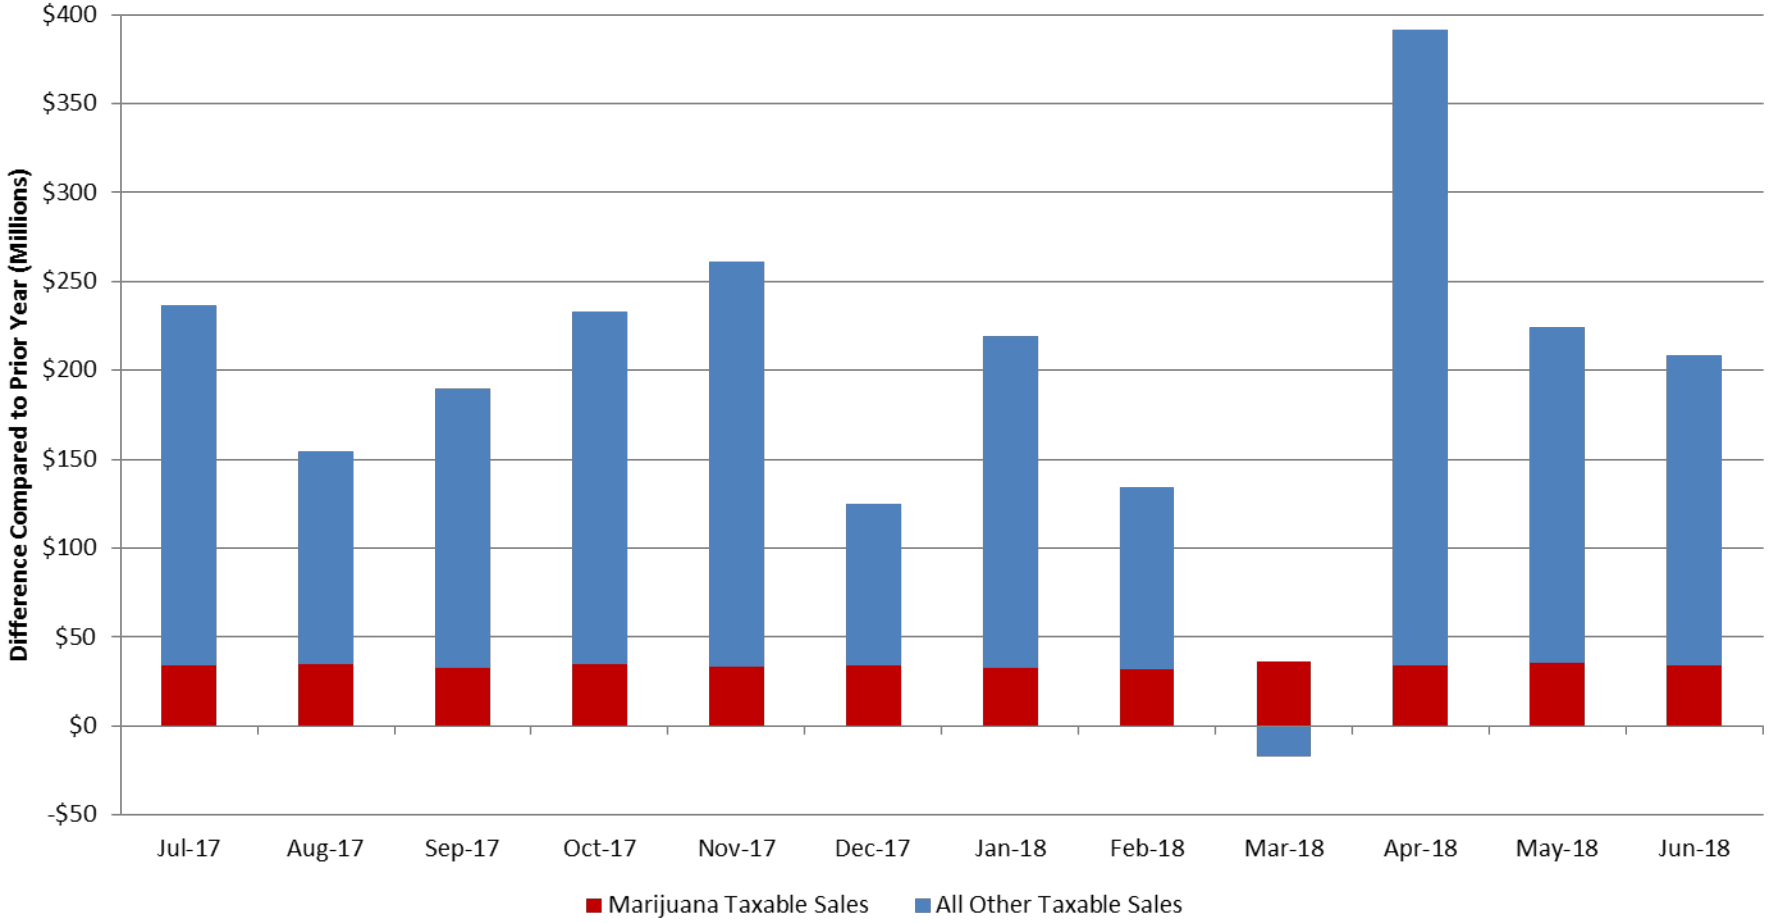
AMERICAN OVERSIGHT

Gross wages totaled $13.24B for the fourth quarter of the fiscal year; A 9.6% increase over the same quarter last year; Upward trend evident since FY15



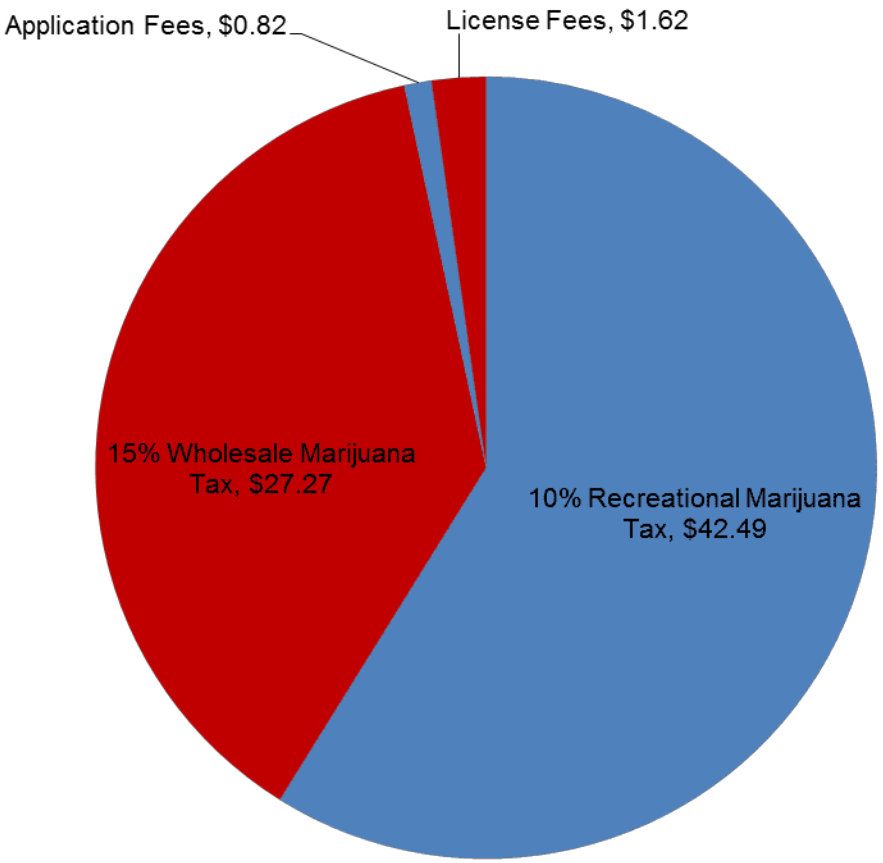
AMERICAN OVERSIGHT

$581.84M in modified business tax collected FYTD; $45.12M in commerce tax credits and $14.28M in scholarship credits claimed FYTD



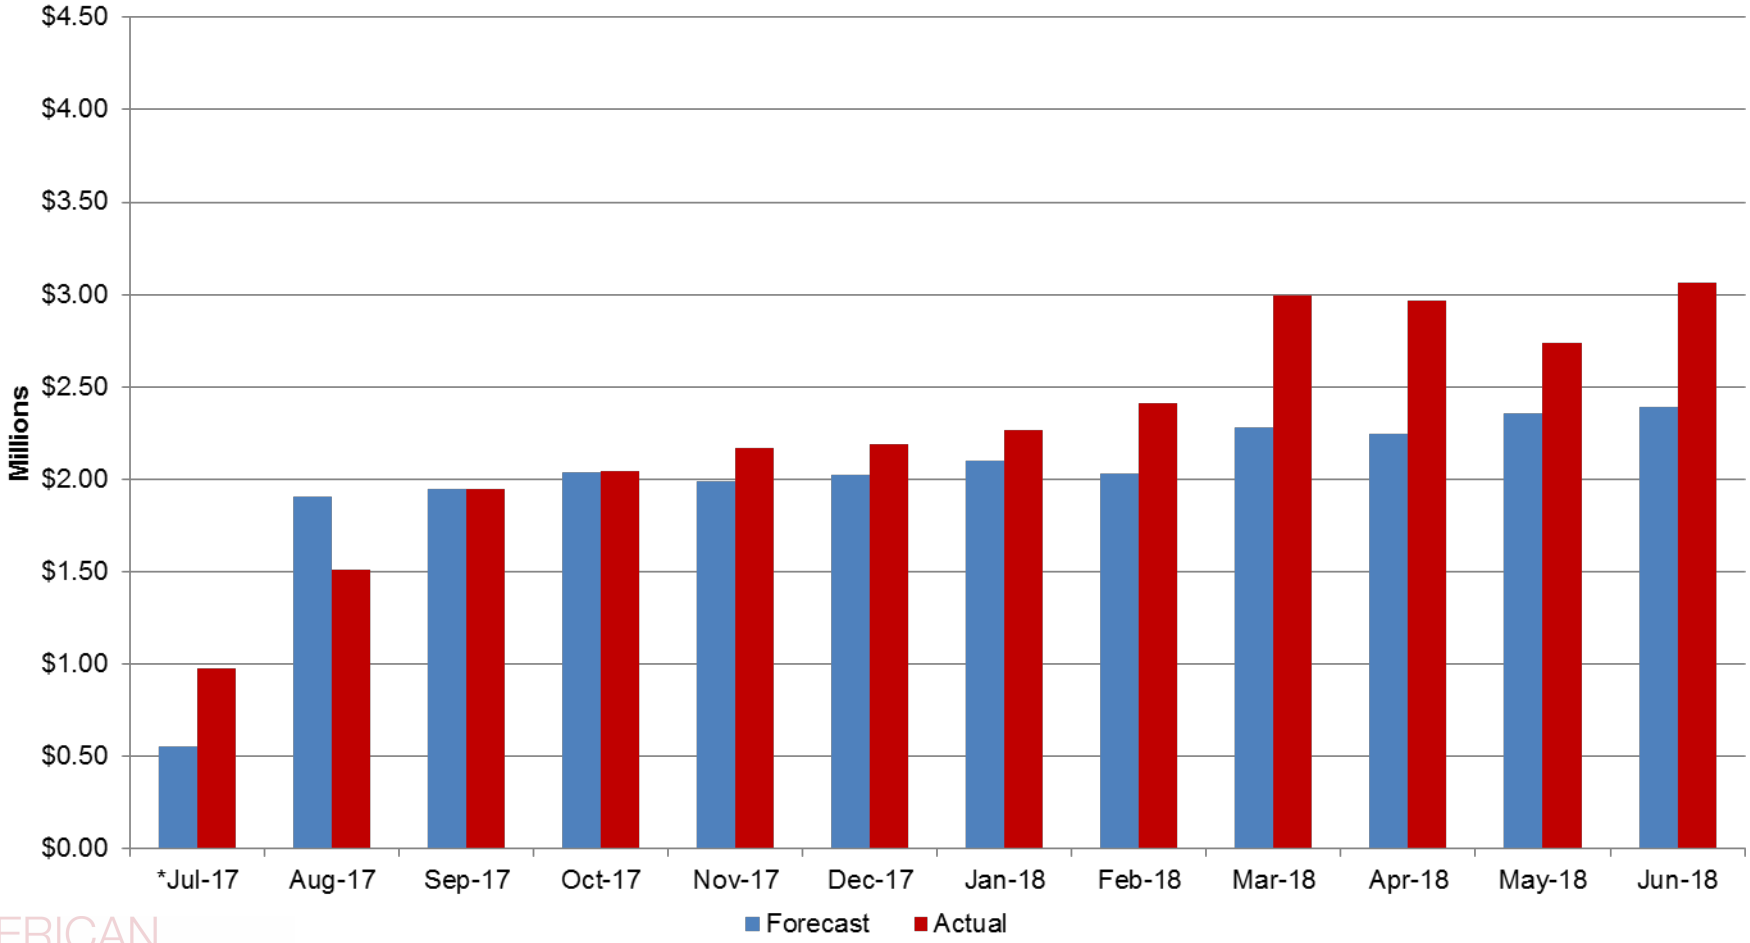
AMERICAN OVERSIGHT

Majority of MBT commerce tax credits taken in first quarter; available education choice credits expanded to $26M in FY18 from $6M in FY17



AMERICAN OVERSIGHT

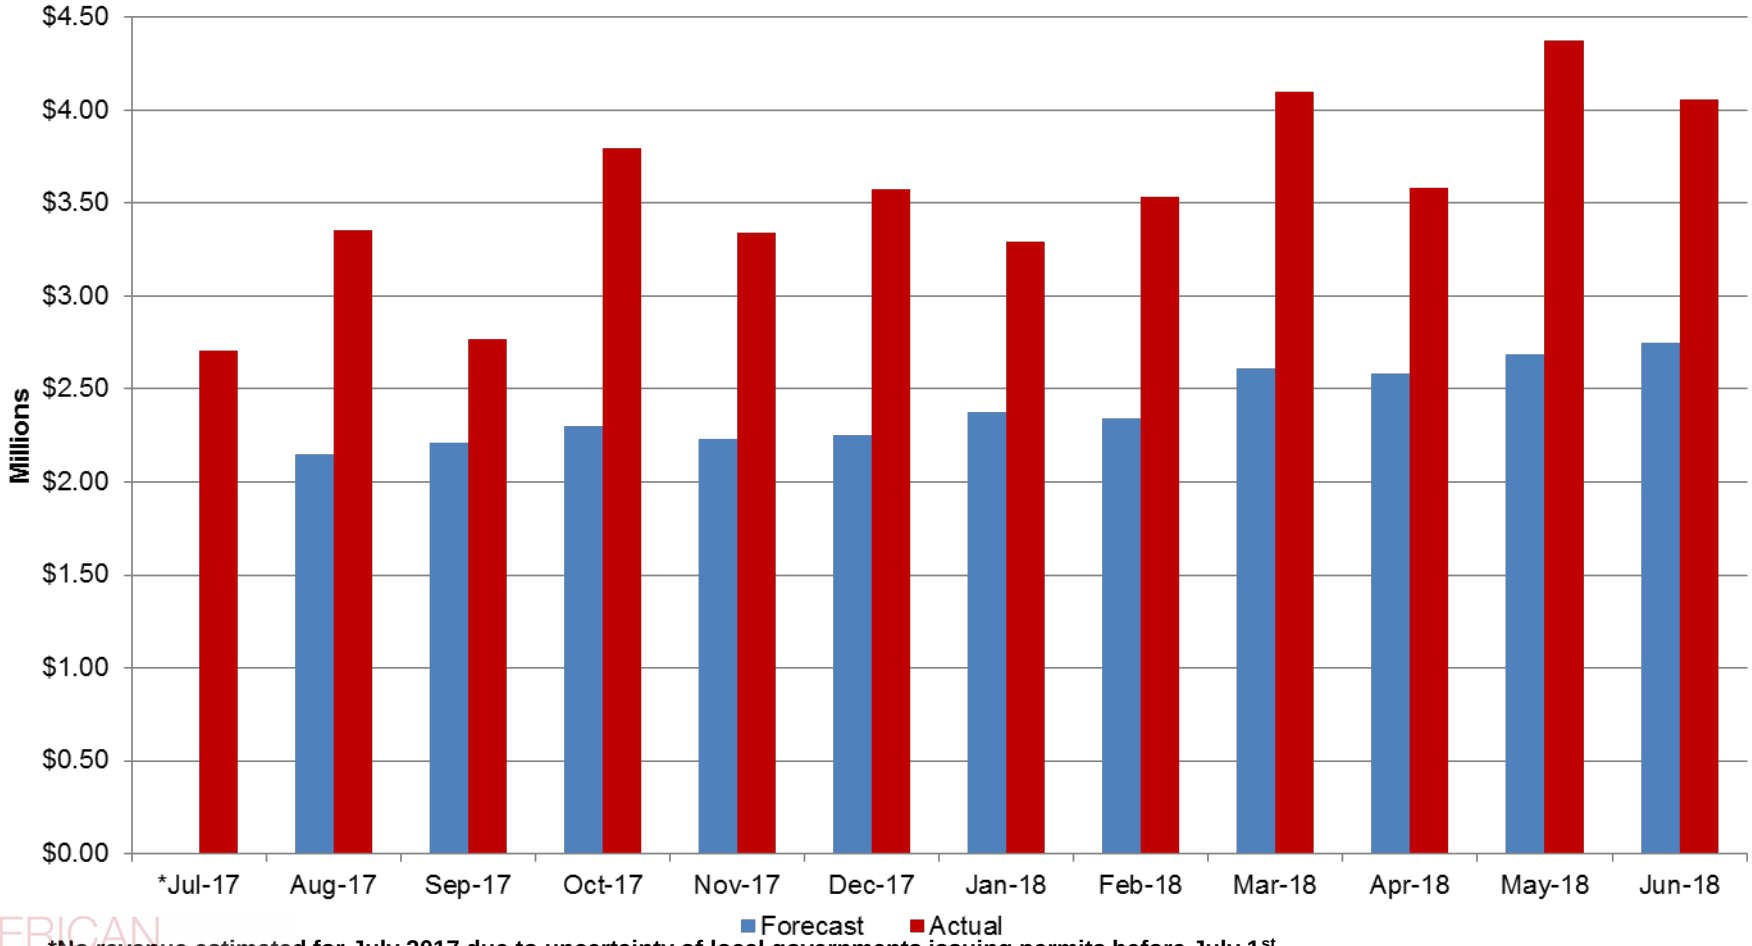
Taxable sales of marijuana establishments account for a good portion of the difference in taxable sales compared to the prior year



AMERICAN OVERSIGHT

Fiscal year 2018: $69.8 million in excise tax collections vs. $50.3 million projected

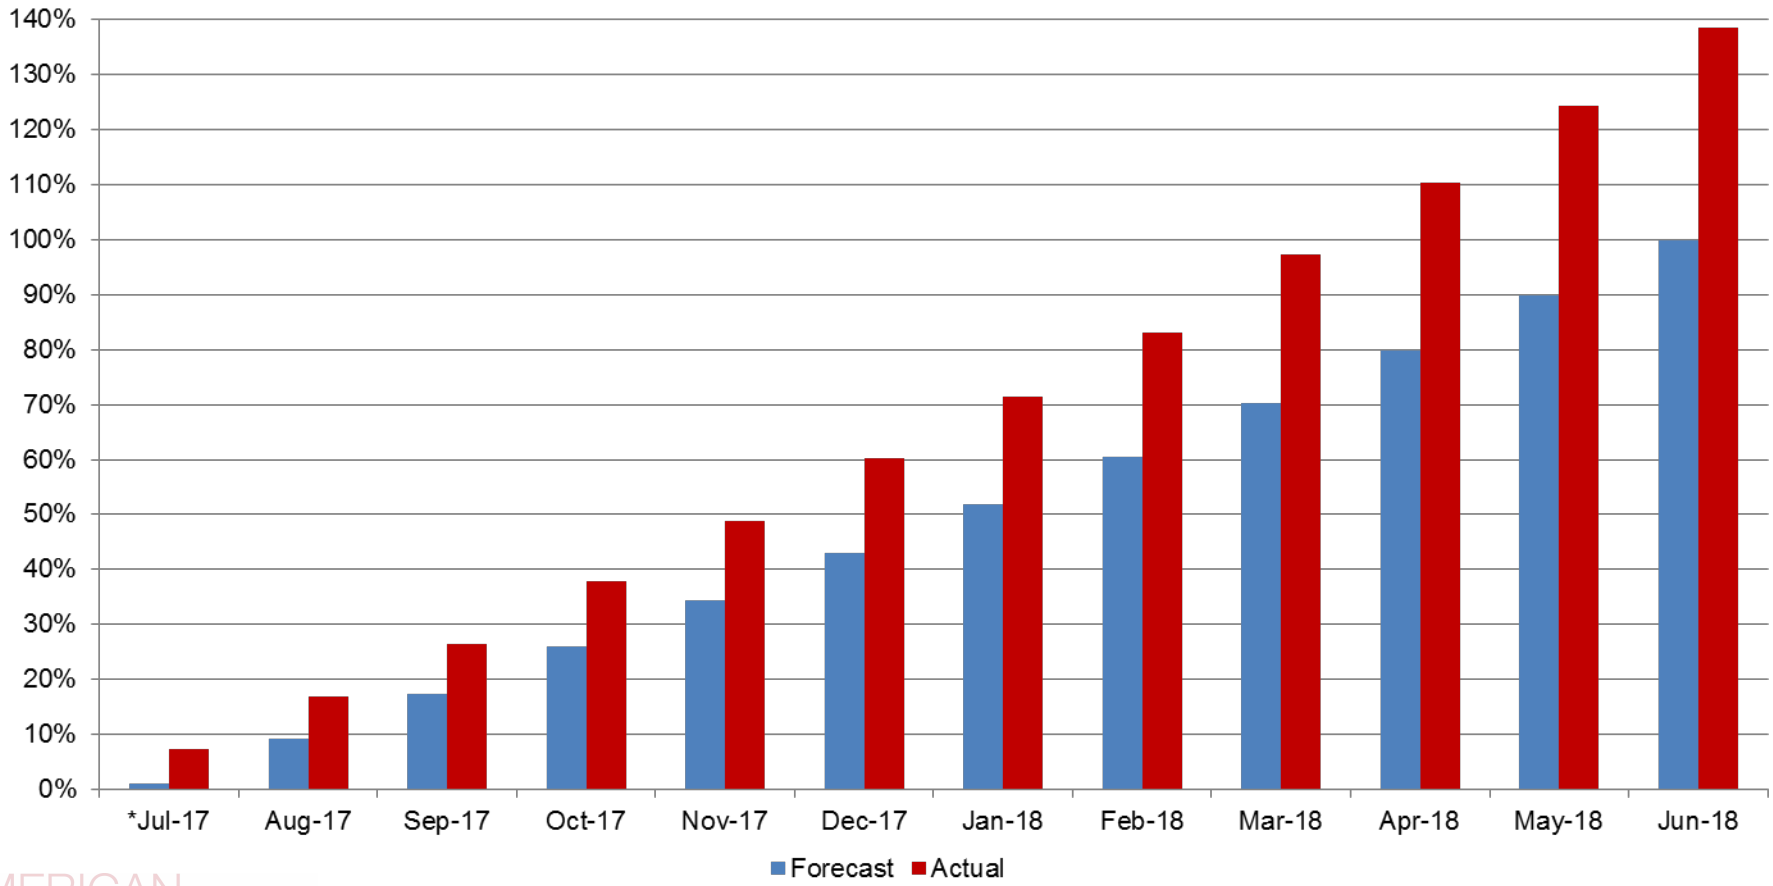
AMERICAN OVERSIGHT



15% Wholesale Marijuana Tax revenues were more than $3 million for June
Above forecast and trending upward

***No revenue estimated in recreational market for July 2017 due to uncertainty of local governments issuing permits before July 1st.**

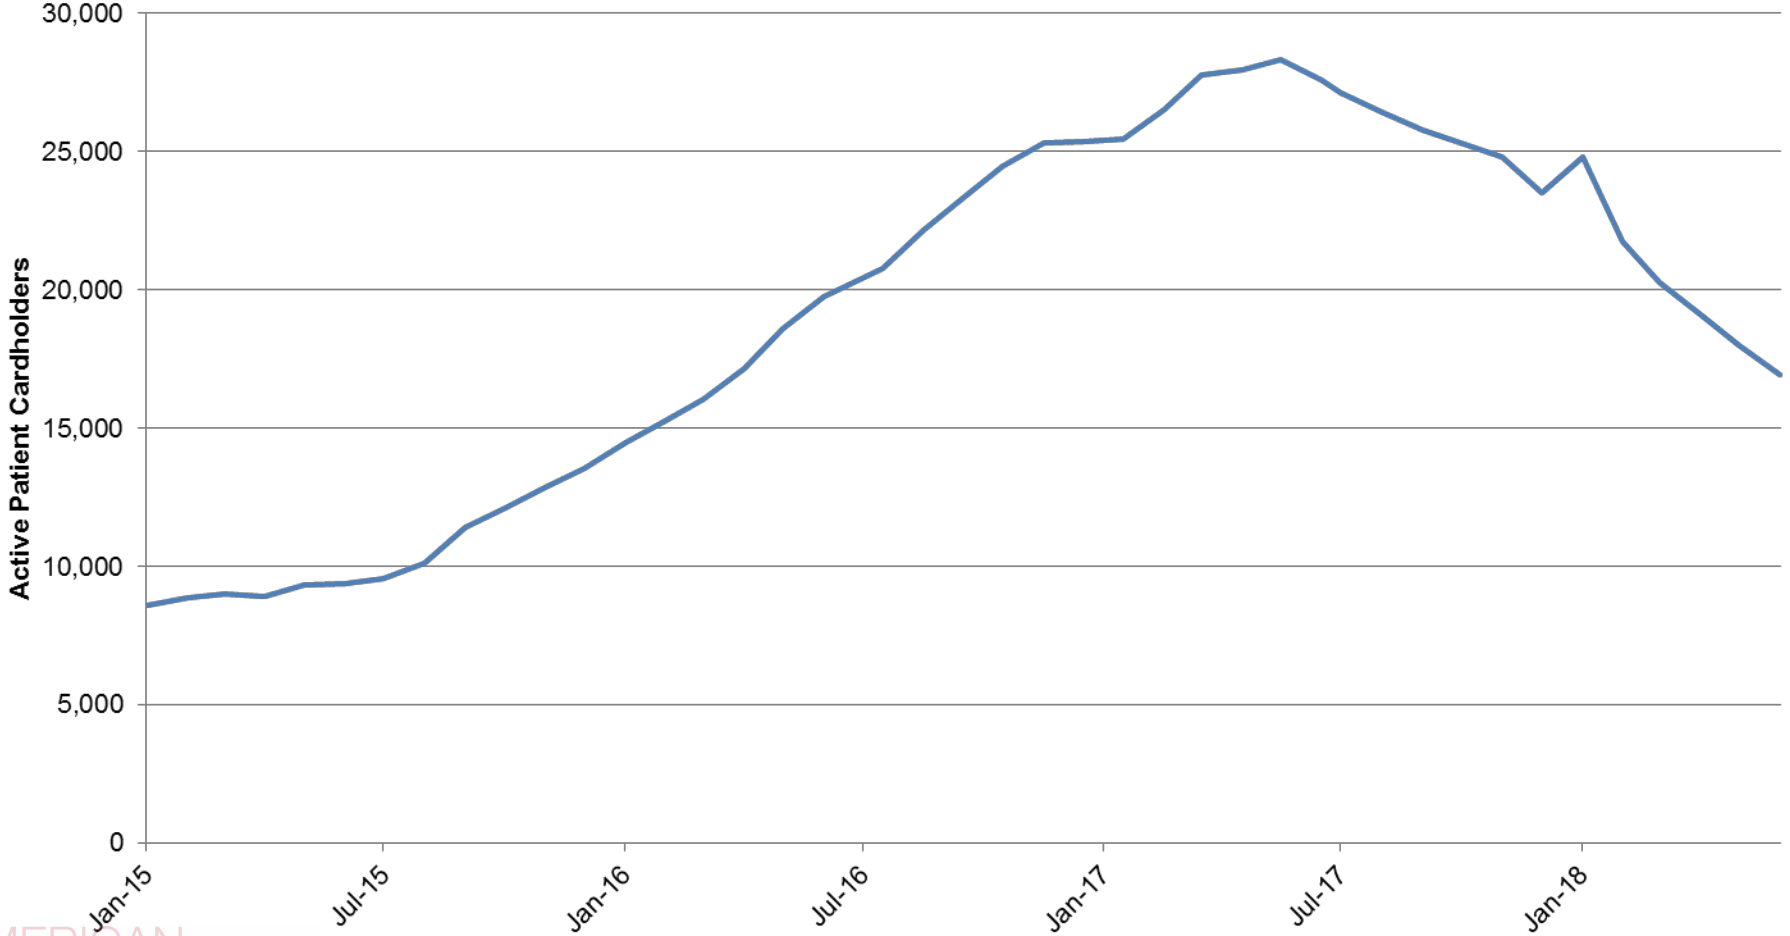
AMERICAN OVERSIGHT



10% Retail Marijuana Tax revenues were more than $4.50 million for June
Coming in well above projections

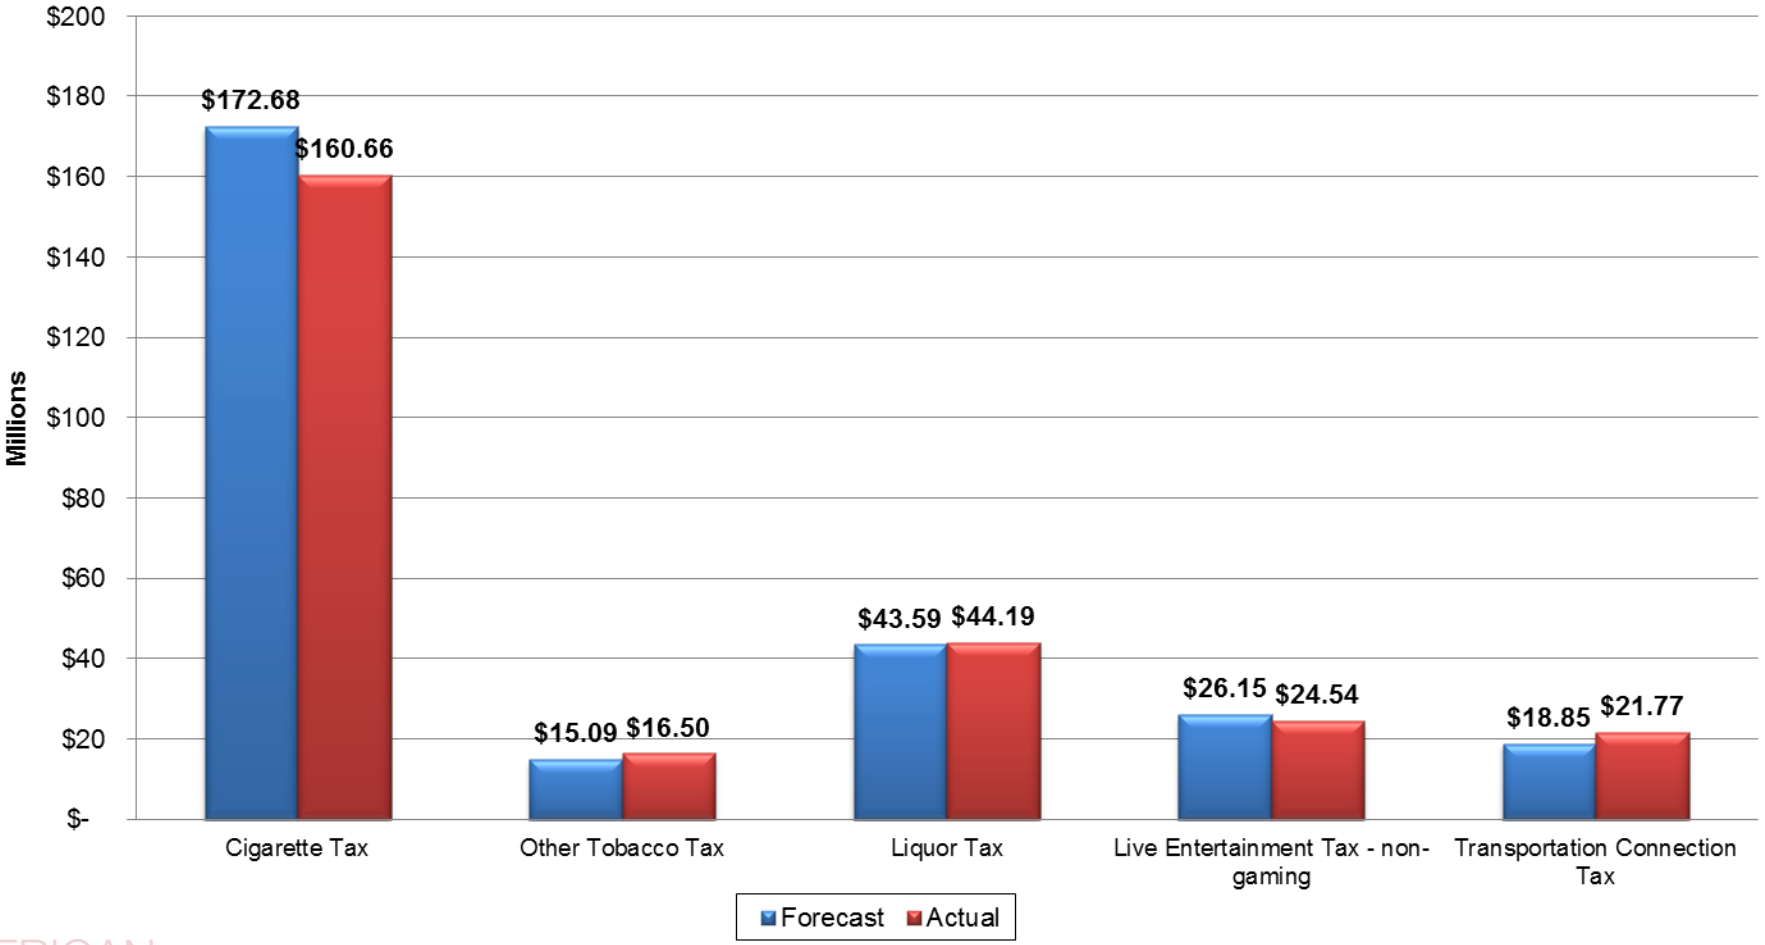
***No revenue estimated for July 2017 due to uncertainty of local governments issuing permits before July 1st.**

AMERICAN OVERSIGHT



Marijuana excise tax collections came in at nearly 140% of what was projected for fiscal year 2018

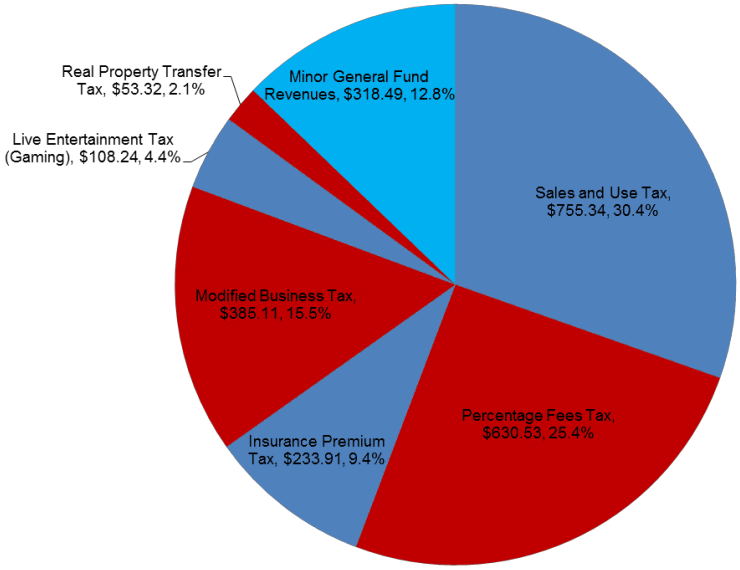
***No revenue estimated in recreational market for July 2017 due to uncertainty of local governments issuing permits before July 1st.**



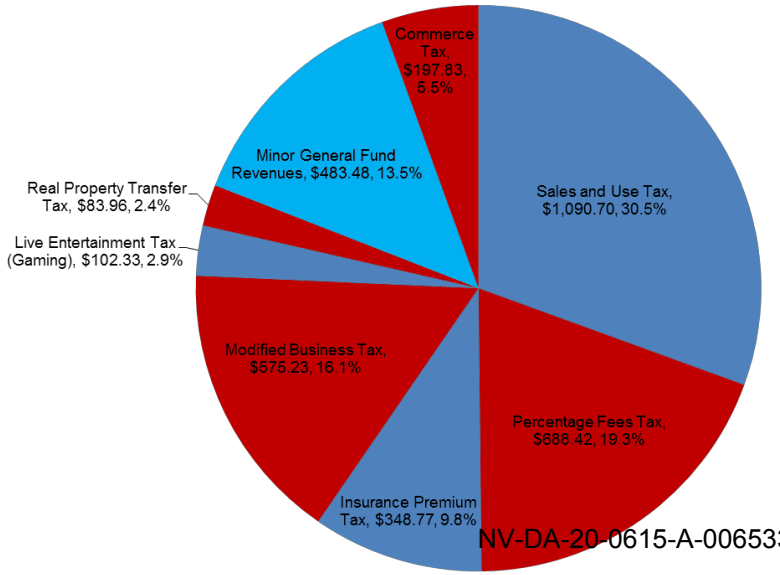
AMERICAN OVERSIGHT

The number of medical marijuana cardholders has been impacted by legalization of adult-use marijuana

AMERICAN OVERSIGHT



Select monthly excise taxes (fiscal year to-date) comparison of estimated revenue to actual distributions



AMERICAN OVERSIGHT

Commerce tax accounted for 5.5% of General Fund revenue in 2017, other tax portions little changed from 2010

General Fund Revenue Sources in 2010 (Millions)

General Fund Revenue Sources in 2017 (Millions)

AMERICAN OVERSIGHT

Reduction of Modified Business Tax (MBT) Rates Based on MBT & Commerce Tax Collections

- Commerce tax collections totaled $201.93 million in FY18, compared to $186.05 projected by the Economic Forum (a difference of 8.5 percent).
- Modified Business Tax collections totaled $581.84 million for the fiscal year, almost 11 percent higher than the projected amount of $525.62 million.
- By September 30th each year, the Department must evaluate whether an adjustment to the Modified Business Tax (MBT) rate is necessary based upon the amounts collected for both the MBT and the Commerce tax in the previous fiscal year.
  - To do this, the amounts of MBT and commerce tax collected for the previous fiscal year (in this case, FY18) are summed and compared to the amounts which were forecasted by the Economic Forum.
  - If the collected amount exceeds the forecasted amount by more than 4 percent, the MBT rates (for general business, financial institutions and mining) must be decreased proportionally so that the combined collected amount *would have been* only four percent higher than the forecasted amount.
- Currently, the MBT rates are 1.475 percent for general business and two percent each for financial institutions and mining.
- In FY18, actual combined revenues from the MBT and the Commerce tax were 10.1% higher than forecasted. As a result, a reset of the MBT rates will be necessary.

AMERICAN OVERSIGHT

2. PUBLIC COMMENT

Governor Brian Sandoval asked if anyone from the public sought to make public comment. No public comment was provided.

3. GOVERNOR SANDOVAL'S COMMENTS

Governor Sandoval advised he had led a State trade mission to the Basque region of Spain in June 2018 and had signed MOUs with the President of Bizkaia and the President of Navarra. The MOUs encourage closer ties, collaboration and trade in the areas of smart grid technology, renewable energy, blockchain technology, water technology, and agri-food industries.

In addition to many productive meetings, the trade delegation toured a facility where a key piece of the future of Southern Nevada's access to water is in the process of being built. Headquartered in the Basque Country of Spain, Indar, a world leader in rotating electrical machines, is manufacturing massive, cutting-edge submersible pumps to draw water from Lake Mead through the unprecedented infrastructure project known as the third straw.

The trade delegation also met with a manufacturer of cell phone-controlled door locks. The Governor noted a direct application to school safety and the ability for staff and teachers to have increased control in the event of an emergency. Governor Sandoval advised he had established a Statewide School Safety Task Force, charged with the safety of Nevada's schoolchildren and was excited about the potential application of this product.

The Governor's Office of Economic Development (GOED) International Trade division recently announced the creation of a new initiative aimed at attracting international, high-growth companies looking to establish U.S. footholds and expand. Nevada Global will partner with economic development agencies abroad to identify candidate businesses and connect them to Nevada's startup accelerator community.

4. APPROVAL OF THE MAY 17, 2018 BOARD MEETING MINUTES

A MOTION WAS MADE BY SECRETARY OF STATE BARBARA CEGAVSKE TO APPROVE THE MAY 17, 2018 MEETING MINUTES. THIS MOTION WAS SECONDED BY MR. JAMES BARRETT. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

5. ABATEMENT APPLICATIONS FOR BOARD APPROVAL

A. BENTLY HERITAGE, LLC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Andrew Haskin, Director of Business Development, Northern Nevada Development Authority (NNRDA), presented Bently Heritage and provided an overview of the company and abatements sought. Bently Heritage, LLC is a distilled spirits manufacturing business established in April 2016. The company had created a sustainable estate distillery in two historic properties located near downtown Minden. The company's products included premium spirits such as whiskey, gin, and vodka from local grains and botanicals. The company planned to hire an additional six employees at an average wage of $21.95 per hour and make a capital equipment investment of approximately $4.2 million. Mr. Haskin was joined by Mr. Carlos Luri, Director of Government Affairs and Mr. Bryan Davis, Marketing Director, Bentley Heritage, LLC.

Mr. Luri advised Bently Heritage, LLC would be expanding its current facility by building two new rickhouses, for whiskey storage and adding a bottling line. The distillery was also expected to open for public tours and tastings in the fall of 2018. Mr. Luri noted the recent public interest in craft distilling and historical tourism was anticipated to create a hub of activity in downtown Minden. This hub was expected to draw visitors from the Tahoe Basin and beyond which would bring additional revenues to local retailers, lodging and dining establishments.

Governor Sandoval asked if the botanicals and grains used in the company’s products were from Nevada. Mr. Davis confirmed and advised the company was constructing greenhouses on its ranch property to allow sustainable growth and harvesting of winter rye, wheat, and barley which would be malted in-house on the company’s own malting floor.

Governor Sandoval noted the company’s repurposing of two historic properties and asked the date these buildings were first constructed. Mr. Luri advised the Flour Mill had been built in 1906 and the Butter Factory was also over 100 years old.

Governor Sandoval commended the company for its commitment to Nevada’s history and noted that morning he’d had the privilege of being a part of a blessing ceremony at the Stewart Indian School, which was constructed in 1890 and was also undergoing a renovation and revitalization development.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE ABATEMENT APPLICATION OF BENTLY HERITAGE, LLC, FOR A SALES TAX ABATEMENT, MODIFIED BUSINESS TAX ABATEMENT, AND PERSONAL PROPERTY TAX ABATEMENT AS PRESENTED IN AGENDA ITEM 5A.

AMERICAN OVERSIGHT

THIS MOTION WAS SECONDED BY MR. DAN KLAICH. THE MOTION PASSED UNANIMOUSLY.

B. BIGELOW AEROSPACE

- **AVIATION SALES & USE TAX ABATEMENT**
- **AVIATION PERSONAL PROPERTY TAX ABATEMENT**

Ms. Kylie Rowe, Vice President of Economic Development, Las Vegas Global Economic Alliance (LVGEA) presented Bigelow Aerospace and provided an overview of the company and abatements sought. Bigelow Aerospace was founded in 1999, and their global headquarters is in North Las Vegas. The company is considering expanding its current operations. The expansion would accommodate the company's new project: the development and manufacture of Bigelow Aerospace's flagship spacecraft, the B330, an entirely autonomous platform outfitted with two dissimilar propulsion systems and entire suite of environmental life support systems. The B330 is the only spacecraft of its kind being developed in the world. Within the first year, the expansion would create five new jobs at an average hourly wage of $25 per hour and include capital investments of approximately $51 million in capital equipment and $6.5 billion investment in aviation parts over the forthcoming 20 years. Ms. Rowe was joined by Ms. Blair Bigelow, Vice President of Corporate Strategy, Bigelow Aerospace.

Ms. Bigelow advised Bigelow Aerospace was a relatively small outfit focused on accomplishing extraordinary things. The company hoped to be a symbol to Nevada for entrepreneurship, innovation, and technology advancement. To accommodate a new, groundbreaking project, the company was considering expanding its current North Las Vegas operations.

Governor Sandoval noted Bigelow Aerospace employed cutting edge aeronautical and mechanical engineers and asked if the company had a relationship with the University of Las Vegas (UNLV) and the University of Reno (UNR) engineering schools. Ms. Bigelow confirmed the company enjoyed a relationship with both schools and hoped to partner with them in the future.

Governor Sandoval inquired about the specific skill sets sought in employees. Ms. Bigelow advised the company sought skills in specialized avionics along with structural, electrical and mechanical engineering.

Governor Sandoval thanked the company for the innovation it bought to the state and noted Bigelow Aerospace was a Nevadan company set to play an important role in in the history of mankind.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE ABATEMENT APPLICATION OF BIGELOW AEROSPACE FOR AN AVIATION SALES AND USE TAX ABATEMENT AND AN AVIATION PERSONAL PROPERTY TAX ABATEMENT AS PRESENTED IN AGENDA ITEM

AMERICAN OVERSIGHT

5B. THIS MOTION WAS SECONDED BY MR. ADAM KRAMER. THE MOTION PASSED UNANIMOUSLY.

C. CYANCO COMPANY, LLC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

D. CYANCO COMPANY, LLC – CATALYST FUND

Mr. Sheldon Mudd, Executive Director, Northeastern Nevada Regional Development Authority (NNRDA), presented Cyanco Company, LLC and provided a brief overview of the company and abatements sought. Cyanco Company, LLC manufactures and markets chemicals products. The company produced solid to liquid systems, cyanide control systems, peroxide assisted leaches, analyzers and sodium cyanide for the gold mining industry. The company started producing liquid sodium cyanide in 1990 at a single plant in Winnemucca, Nevada. The original plant was designed to produce 28 million pounds of product annually. A second plant came online in 1997 and investments had been made in both plants over the years to debottleneck, implement improvements and enhancements and increase production. Today, the two plants had production capacity of over 240 million pounds annually. The company's expansion would generate 20 full-time jobs at an average of $44.53 per hour and an approximate capital equipment investment of $11 million. Mr. Mudd was joined by Paul Rostek, President and General Manager, Cyanco Company, LLC.

Mr. Paul Rostek advised Cyanco Company, LLC was considering expanding its Humboldt County facility. The project would involve the establishment of a new solid sodium cyanide manufacturing facility with an annual production capacity of 60 million pounds. The company would export 100% of product from its new solids facility to serve its customers in Canada, Mexico, Texas and other locations outside of Nevada. Over the company's history in Nevada, it has delivered more than two billion pounds of product safely without incident. Mr. Rostek advised the company also provided annual training exercises for employees, mines and first responders.

Governor Sandoval noted the company was considering both Texas and Nevada and asked about the company's next steps should it be awarded the abatements sought. Mr. Rostek advised the company anticipated making its decision very swiftly and advised the company was still in discussions regarding incentives at the local level.

Mr. Kramer asked what led the company to consider expanding in Winnemucca. Mr. Rostek advised Cyanco Company, LLC has been a proud member of the Winnemucca and Humboldt County communities for more than 25 years and enjoyed an excellent working relationship with the city and the county. Additionally, the company currently had two solution trains. If the Nevada mining requirements increased, the solids plant could accommodate a third train for converting excess into solids for global shipping. Therefore,

AMERICAN OVERSIGHT

the Winnemucca location represented a much broader strategic importance than just the initial solids plant. It could also be the launching pad for further expansions in Winnemucca.

Secretary of State Cegavske highlighted the company's letters of support for the application and noted the local communities were very supportive of the company's potential expansion.

Dr. Dana Bennett advised she would be abstaining from voting on Agenda items 5C and 5D as Cyanco Company, LLC was a member of Nevada Mining Association's governing board of directors.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE ABATEMENT APPLICATION OF CYANCO COMPANY, LLC FOR A SALES TAX ABATEMENT, MODIFIED BUSINESS TAX ABATEMENT AND PERSONAL PROPERTY TAX ABATEMENT AS PRESENTED IN AGENDA 5C AND CATALYST FUND GRANT IN AN AMOUNT NOT TO EXCEED $100,000, AS DESCRIBED IN AGENDA ITEM 5D. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

E. G4 WORKS, LLC

- **AVIATION SALES TAX ABATEMENT**
- **AVIATION PERSONAL PROPERTY TAX ABATEMENT**

Mr. Michael Walsh, Vice President of Economic Development, LVGEA, presented G4 Works, LLC and provided a brief overview of the company and abatements sought. G4 Works, LLC operated as a subsidiary of Allegiant Travel Company (Allegiant). Allegiant operated an airline founded in 1998 and was now as one of America's premier ultra-low-cost-carriers, offering non-stop air service to leisure travelers from under-served small and medium-sized communities to world-class destinations. Allegiant provides nonstop, scheduled service from 120 U.S. cities. In addition to its scheduled service, the airline also operated charter service throughout the U.S., Mexico and Canada Within the first year, the expansion would create seven new jobs at an average hourly wage of $20.52 per hour and include capital investments of approximately $6.2 million in capital equipment and $595,564 investment in aviation parts over the forthcoming 20 years. Mr. Walsh was joined by Mr. Scott Sheldon, Chief Financial Officer and Mr. Jonathan Jackson, Specialist, Government Affairs, Allegiant Travel Company.

Mr. Sheldon advised G4 Works, LLC was considering establishing an aircraft maintenance and distribution center in southern Nevada. The project would create a stock warehouse in Las Vegas. This warehouse would contain aircraft parts and tools capable of servicing Allegiant Travel Company's planes at the Las Vegas McCarran International Airport, as well as at other airports across the Allegiant network and strengthen the operational efficiency of Allegiant's aircraft maintenance in the region.

AMERICAN OVERSIGHT

Governor Sandoval inquired about the specific skill sets sought for the jobs in the company's application. Mr. Sheldon advised the company would be seeking to fill a variety of positions including parts clerks, technical purchasing skill sets and other technical expertise in the areas of parts procurement.

Governor Sandoval asked if the company planned to do the maintenance on its new western fleet in Las Vegas. Mr. Sheldon advised the parts and tooling support would be housed out of Las Vegas. Currently, Allegiant was at the tail end of a complete fleet transition from an MD-80 operator to an all airbus operator. This would involve significant network configuration changes. The company planned to use Las Vegas as a launching ground and support base for its western destinations. Historically, the company has used Arizona as a teardown facility for its MD-80 fleet in addition to its parts support. The fleet transition provided an opportunity and enhance its Southern Nevada activities and operations.

Mr. Kramer commended Governor Sandoval and Director Anderson, for their involvement in passing the aviation abatement legislation. G4 Works, LLC's application was in complete alignment with the intent of attracting, retaining, and growing aviation operations in Nevada.

Governor Sandoval concurred on the importance of the bill and noted it had greatly increased Nevada's competitiveness in this area.

A MOTION WAS MADE BY DR. BENNETT TO APPROVE THE ABATEMENT APPLICATION OF G4 WORKS, LLC, FOR AN AVIATION SALES TAX ABATEMENT AND AN AVIATION PERSONAL PROPERTY TAX ABATEMENT AS PRESENTED IN AGENDA ITEM 5E. THIS MOTION WAS SECONDED BY DR. WELDON HAVINS. THE MOTION PASSED UNANIMOUSLY.

6. ABATEMENT APPLICATIONS FOR DIRECTOR APPROVAL

A. FIGURE TECHNOLOGIES, INC.

- **SALES TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Stan Thomas, Executive Vice President, Economic Development Authority of Western Nevada (EDAWN) presented Figure Technologies, Inc. and provided an overview of the company and abatements sought. Figure Technologies, Inc. is a financial technology company with the mission of leveraging blockchain, AI, and advanced analytics to unlock new access points for consumer credit products that can transform the financial lives of its customers. The company provides home equity release solutions, including home equity lines of credit, home improvement loans and home buy-lease back offerings for retirement. Concurrently, Figure Technologies, Inc. is building a blockchain protocol for the origination, custody, trading and securitization of whole loans and other assets. The company had significantly de-risked capital for equity release takeout, with participation from multiple leading buy and sell side firms who will transact using the blockchain. The company also provided its members with financial literacy products via content and support

AMERICAN OVERSIGHT

on its site. The products were built on the three pillars of financial literacy, financial empowerment and action. Figure Technologies, Inc. currently had offices in San Francisco, CA and Bozeman, MT. The company planned to hire 65 employees at $30.01 per hour and make and approximate capital investment of $264,615. Mr. Thomas was joined by Ms. June Ou, Chief Operating Officer, Figure Technologies, Inc.

Ms. Ou advised Figure Technologies, Inc. was considering locating a facility in downtown Reno. The proposed facility would house the company's customer service, loan servicing, financial advisory and engineering operations. Ms. Ou noted the company had been pleased with Reno thus far and generally impressed with the local and state government in terms of their commitment to the residents of Nevada.

Governor Sandoval inquired about the company's workforce and recruitment requirements. Ms. Ou advised the company sought to fill a variety of positions. There would be customer service positions which may be of interest to graduates of UNR. These jobs could also provide pathways to certified financial planning certifications or registered investment advisors. The company would also be hiring positions in asset management, marketing and engineering.

Governor Sandoval noted the company has already made an initial connection with UNR and suggested the company also connect with UNLV. Ms. advised the company planned to be involved in the local community and engaged with the universities. Engineers at the company's Montana facility often volunteered to teach University classes.

Governor Sandoval asked about the company's next steps should it be awarded the abatements sought. Ms. Ou advised the company had already put recruitment plans in place for the Reno facility.

Mr. Kramer suggested the company might, at some point, be interested in connecting with an existing Reno based company called Filament, an innovative startup that develops blockchain solutions to leverage industrial internet of things data.

Director Anderson advised the company would be returning with a Catalyst Application for the September 20, 2018 Board Meeting. There would also be discussions around WINN funding to assist in building a pipeline of qualified employees.

Governor Sandoval noted it was tremendous to have a company of this caliber see Reno and Nevada as a place to locate, grow and thrive.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6A.

AMERICAN OVERSIGHT

B. POLARIS INDUSTRIES, INC. – Catalyst Fund

Mr. Haskin, NNDA, presented Polaris Industries, Inc.'s Catalyst Fund application. Polaris Industries, Inc. designs, engineers, manufactures and markets power sports vehicles worldwide. The company offers ORVs, including all-terrain vehicles and side-by-side vehicles for recreational and utility use; snowmobiles; motorcycles; and low emission, light duty hauling, passenger, commercial and industrial vehicles, as well as snow bike conversion kit systems. Polaris Industries, Inc. also produces or supplies various replacement parts and accessories and manufactures, distributes, retails, and installs aftermarket parts and accessories for light trucks, jeeps, sport-utility vehicles, and other four-wheel drive vehicles. The project would create 64 new jobs at an average hourly wage of $21.95 an hour with an approximate investment of $13.6m in capital equipment. The company's catalyst application was in addition to its application for standard abatements at the March 15, 2018 GOED Board Meeting where the company was approved for a Modified Business Tax abatement, Sales and Use Tax abatement, and a Personal Property tax abatement. Mr. Haskin was joined by Mr. Paul Eickhoff, Senior Director of Distribution, Polaris Industries, Inc.

Mr. Eickhoff advised Polaris Industries, Inc. would be establishing a new western United States distribution center in Fernley, Nevada. The company currently had existing distribution centers in Ohio and South Dakota and was looking for western United States presence to maximize efficiency and delivery speed to the company's customers. Mr. Eickhoff noted the company appreciated being considered for the Catalyst Fund grant and looked forward to a continued partnership with the state of Nevada, Lyon County, and city of Fernley.

Director Anderson noted Polaris Industries, Inc. was creating quality jobs with good wages and he looked forward to seeing the continued growth of the company in Nevada. Director Anderson also thanked Lyon County for its assistance in the Catalyst Fund grant process.

DIRECTOR ANDERSON APPROVED THE CATALYST FUND GRANT IN AN AMOUNT NOT TO EXCEED $100,000, AS DESCRIBED IN AGENDA ITEM 6B.

7. WORKFORCE INNOVATION FOR THE NEW NEVADA (WINN) FUND PROGRAM FOR BOARD APPROVAL

A. RATIFICATION OF SUPPLEMENTAL NUTRITION ASSISTANCE PROGRAM (SNAP) RECIPIENT PILOT PROGRAM – Requesting funding for pilot program, not to exceed $210,000 – approved by Director at March 15 Board meeting, now to be approved by Board.

Director Anderson advised this item had initially been approved at the March 15, 2018 Board Meeting. However, the dollar amount exceeded Director approval. Therefore, today's agenda item would comprise an update and a ratification of the item. Director Anderson introduced Ms. Stacey Bostwick, Workforce Development Program Coordinator, GOED

AMERICAN OVERSIGHT

Ms. Bostwick advised this application pertained to phase two of the project. The GOED Board had also approved an appropriation for phase one which was launched in January 2018. Western Nevada College was the primary education provider in phase one with an initial plan to serve 20 individuals on SNAP. Phase two is a program expansion to offer an additional 100 placements. Both Truckee Meadows Community College and Western Nevada College were gaining impetus with these programs. Therefore, there would be robust program data available next quarter. Ms. Bostwick advised that utilizing state funding, such as WINN, or local funding for investments in workforce training, produced potential to unlock federal funding for educational institutions and generate opportunities for program development and expansion to meet the demands of local employers.

Governor Sandoval asked if the program would also be made available in Southern Nevada. Ms. Bostwick advised all existing WINN funded projects in manufacturing, technology and health would be used as a platform to expand on a wider level.

Governor Sandoval commended the program and noted it provided individuals an opportunity to enter or re-enter the workforce and access quality employment, wages and benefits.

A MOTION WAS MADE BY MR. BARRETT TO APPROVE THE RATIFICATION OF THE SNAP PILOT PROGRAM AS PRESENTED IN AGENDA ITEM NUMBER 7. THIS MOTION WAS SECONDED BY DR. HAVINS. THE MOTION PASSED UNANIMOUSLY.

8. WORKFORCE INNOVATION FOR NEW NEVADA (WINN) FUND PROGRAM FOR DIRECTOR APPROVAL.

A. GROWING THE NURSING WORKFORCE TO IMPROVE POPULATION HEALTH OUTCOMES AND CREATE JOBS IN THE STATE OF NEVADA
Request for approval to enter into a WINN Grant agreement not to exceed $90,000.

Ms. Bostwick advised Agenda item 8. would be moved to the September 20, 2018 GOED Board Meeting. The project scope had recently changed due to additional employer partners wishing to participate.

9. PERFORMANCE MEASURES REPORT

Bob Potts, Research Director, GOED presented the GOED Performance Measures report covering economic development activity in Q2 of 2018.

There were 35 assisted companies reported in the first half of 2018. Of these, 21 are new to Nevada and 14 are existing companies expanding operations. These companies are expected to add 2,294 jobs to Nevada's economy in the next two years and to more than double that count once they are fully staffed.

AMERICAN OVERSIGHT

Of the 35 companies, 34 percent were manufacturers followed by logistics and operations (33 percent), and information technology (11 percent). The remaining 20 percent were essentially evenly split between the aerospace, tourism, healthcare and finance sectors.

The average hourly wage paid by companies assisted this year stands at $28.59. This reflects a $7.71 improvement over what it was for the same period last year when they stood at $20.88.

Capital investment by the 35 companies assisted this year currently stands at $329.8 million. This reflects a $153.2 million, or 86.7 percent improvement over what it was the same period last year.

Regarding recruitment activity, there were 23 wins in the first quarter of 2018. This represents a 53.3 percent increase from both the previous quarter and the first quarter of 2017. Activity in the earlier stages of the recruitment pipeline also showed marked improvement. When compared to last quarter, New Leads and Prospects were up by 52.8 and 8.4 percent, respectively; when compared to last year, they were up by 91.9 and 38.5 percent, respectively.

In the first quarter, there were an additional 10 leads and two prospects added to the Global Recruiting Pipeline. After removing those which have become inactive, the current inventory of all active global leads and prospects now stands at 46 and 12, respectively.

Performance activity for the Nevada Procurement Technical Assistance Center (PTAC) through the first nine months of this fiscal year had been exceptionally strong. Year to-date, the number of contracts was already 43.5 percent above last year's total and the contract amount even greater at 125.6 percent. The number of clients had slipped slightly in the most recent quarter, but the year-to-date average was still well above historic annual counts. The Nevada PTAC credits much of its recent success to resource partners like the U.S. Small Business Administration, the Nevada Department of Business and Industry, the Nevada Small Business Development Center and local chambers of commerce in promoting their free counseling services, training seminars and networking events.

In 2017, the number of Certified Emerging Small Businesses (ESB's) expanded by 34.2 percent and now stands at 1,139. For the year, the number of ESB's solicited to submit a quote, bid, or proposal on a contract improved by 335.0 percent when compared to 2016. This significant growth was largely the result of a broad outreach campaign by the Clark County School District. From 2016 to 2017, the number, amount, and average contract amount grew by 4.3, 7.9, and 3.4 percent, respectively.

Over the past two quarters, customers responded with perfect scores to the Nevada Film Office (NFO) Client Satisfaction Survey. Only once before in 2014 was customer satisfaction with the NFO this high. The Index is an aggregate measure on how customers

AMERICAN OVERSIGHT

rated their experience on availability, responsiveness, knowledge, willingness to help, and overall level of service. Since inception in 2014, client responses to the Nevada Film Office's Satisfaction Survey have consistently been very good.

The Community Development Block Grant Program (CDGB) underwent some big changes in 2017 when Carson City reverted to the state's CDBG program. As an Entitlement program, Carson City's focus is urban with different priorities than that of the GOED-CDBG rural programs. In 2018, there were 14 grants totaling $3,524,603. Rural Nevada received 9 grants with a total allocation of $3,061,919 and Urban Nevada received five grants with a total allocation of $462,684.

The number of workers in Nevada's economy continues to set record levels and currently stands at 1,374,200. This reflects a gain of 261,600 jobs since the recessionary low and 76,900 above the pre-recession high. Nevada currently has the fastest private sector job growth in the country. The unemployment rate currently stands at 4.8 percent; a 0.3 percentage point improvement from this time last year and 8.9 points below the recessionary high of 13.7 percent. The prerecession unemployment low was 3.9 percent.

With the addition of 210 jobs, there are currently 14,300 workers employed in Nevada's Aerospace and Defense sector. Average annual earnings also improved by $380 and now stand at $85,500. When compared to last year, there had been a 5.9 percent increase in jobs and a 1.8 percent increase in earnings.

The number of jobs in Nevada's Business Information Technology sector expanded in the second quarter with the addition of 220 positions. Average earnings were essentially unchanged with only a slight improvement of $80 per year. For the year, job counts had improved by 3.8 percent and earnings by 1.7 percent.

When compared to last quarter, an additional 1,200 jobs were added to Nevada's Health and Medical sector for a total of 111,800 workers employed. Growth in earnings, however, was flat and currently stands at $56,400. When compared to last year, job counts in Nevada's healthcare sector had expanded by 5.0 percent and earnings by 0.6 percent.

There are currently 54,200 workers in Nevada's Natural Resource Technologies sector with the addition of 1,760 jobs in the second quarter. Average annual earnings had been unchanged and currently stand at $66,400. When compared to last year, job counts had improved by 8.7 percent and earnings by 1.2 percent.

Although there was a slight annual earnings improvement of $110 in Nevada's Manufacturing and Logistics sector, job counts improved by more than 2,700 workers in the second quarter. Overall, the sector now employs 125,100 workers with average annual earnings of $59,400. For the year, jobs had grown by 6.29 percent and earnings by 3.2 percent.

Growth has been strong in Nevada's Manufacturing sector with the addition of 1,340 workers in the second quarter. Currently there are 46,200 workers employed in the sector

AMERICAN OVERSIGHT

making, on average, $55,900 per year. Since last year, job counts had grown by 7.2 percent and average annual earnings by 1.8 percent.

10. DIRECTOR'S REPORT – REVIEW AND DISCUSSION

Director Anderson advised the Governor led Basque Region Trade Mission had proved very productive. The delegation had the opportunity to meet with a large group of commercial entities in conjunction with higher education institutions.

A month prior to the launch of Nevada Global, GOED implemented a soft launch/pilot which generated a significant amount of interest. As part of the soft launch Nevada Global conducted its first recruiting trip to Poland led by GOED's Director of Special Projects, Pawel Pietrasienski. Mr. Pietrasienski conducted a one-week boot camp for thirty companies in Lublin, Poland in partnership with the Lubelskie Government and the Polish American Chamber of Commerce of Nevada. Five of the companies that participated in the boot camp would visit Nevada for one week in July for an orientation of Nevada Global.

In the forthcoming months, an inbound delegation will be visiting from Spain. This delegation would also participate in a Nevada Global boot camp as preparation to enter the U.S. market

In June 2018, GOED signed an MOU with the World Trade Center (WTC), which was owned and operated by the Las Vegas Convention and Visitors Authority. This would further enhance collaboration to build the Las Vegas brand as a global business destination and grow international visitation to both the destination and to tradeshows like CES. Additionally, the MOUs provided the opportunity to expand business opportunities across several industry sectors.

During the months of May and June 2018, GOED International Trade Division provided financial assistance awards through the State Trade Expansion Program Grant to 9 companies for a total amount of $43,000. The financial assistance awards are used to assist companies by offsetting the cost of engaging in export sales activities. GOED had applied for additional funding in order to expand the program in the next biennium.

Nevada Institute for Autonomous Systems (NIAS) has intensified human resource efforts to stand up the Nevada Drone Center of Excellence (NDCOE) for Public Safety and recently completed a Nevada Drone Industry State-wide survey that reflected strong support toward the State of Nevada and NIAS to open the NDCOE. NIAS is in the process of conducting sponsorship reach outs and standing up a fund-raising capability from ground zero. Safe and successful UAS operations rely on quality training, end user education and maximizing public safety processes.

GOED and Bank of Nevada approved two more Nevada Opportunity Fund Loans totaling $150,000. Senate Bill 126 created the Nevada Opportunity Fund. The Nevada Opportunity

AMERICAN OVERSIGHT

Fund was created during the last legislative session to help provide small business owners access to funding. One million dollars of state funds were set aside and available through the Governor's Office of Economic Development to assist businesses unable to meet conventional small business loan qualifications. The Opportunity Loan program had now approved 4 of 5 applicants for a total of $225K. GOED and Bank of Nevada were developing the program and marketing to expand into rural areas.

The Community Development Block Grant (CDBG) approved eight projects for full funding, one project approved for partial funding with conditions. An additional six entitlement projects for ~$500K for Carson City were also approved. This was a great investment in the rural communities, and certainly more community development focused versus pure economic development. This was an important piece of the puzzle when looking at rural communities and the opportunities for CDBG grants and the Main Street Program.

The IRS certified Nevada's 61 Opportunity Zone census tracts. GOED was currently looking to build a task force to ensure investment opportunities are highlighted to as many people as possible and to encourage local investment.

The Nevada Film Office's new online locations directory was completed and online. The Directory was designed to better connect potential film locations around Nevada with production companies, giving local businesses more control and more opportunity.

Together with the Nevada Department of Transportation (NDOT), Nevada Procurement Technical Assistance Center (PTAC) went on an outreach trip at the beginning of May to Winnemucca, Lovelock, Elko, Battle Mountain, Ely and Eureka. The purpose was to promote PTAC's free procurement technical assistance regarding public sector contracting and subcontracting, provide training on how to do business with the government, and deliver training on how to do business with NDOT. A total of 11 business representatives attended the workshops.

The Workforce Innovations for New Nevada (WINN) program is expanding and growing. A focus issue was establishing a pipeline of nursing and health professionals. The first stage of the solution strategy would be rolled out from July to December 2018 and would target faculty development for the Certified Nursing Assistant (CAN) programs offered at the high school level. Director Anderson highlighted Ms. Bostwick as a tremendous resource for the WINN program.

Director Anderson commended Mr. Potts, GOED's Research Director, for his contribution to the state and the nation regarding workforce development. Director Anderson noted Mr. Potts' comprehensive understanding of workforce development, how it affects the ability to grow in a sustainable way, and how to build the infrastructure and pipelines for employers immediate and future needs.

AMERICAN OVERSIGHT

In June 2018 GOED welcomed Mr. Joel Lenz as its new Mining Industry Specialist. Mr. Lenz had over 35 years of Nevada mining and leadership experience culminating as the General Manager of the Newmont Phoenix mine. Mr. Lenz was based in GOED's Elko office.

11. STATE OF NEVADA UNEMPLOYMENT RATE UPDATE ABATEMENT APPLICATIONS FOR BOARD APPROVAL as established by the Research and Analysis Division of the Nevada Department of Employment, Training and Rehabilitation.

Agenda item 11. was for information only. GOED is committed to providing this information for each Board meeting. There were no questions or comments regarding this item.

12. PUBLIC COMMENT

Governor Sandoval asked if anyone from the public sought to make public comment. No public comment was provided.

13. ADJOURNMENT

A MOTION WAS MADE BY SECRETARY CEGAVSKE TO ADJOURN THE MEETING. THIS MOTION WAS SECONDED BY DR. BENNETT. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

STATE OF NEVADA
GOVERNOR'S OFFICE OF ECONOMIC DEVELOPMENT
BOARD MEETING
August 14, 2018

The meeting of the Board of Economic Development was called to order by Governor Brian Sandoval at the Grant Sawyer Building, Governor's Conference Room, 555 E. Washington Avenue, Room 5100, Las Vegas, Nevada, 89101; and via video conference at the Capitol Building, 101 N. Carson Street, Carson City, Nevada 89701.

1. CALL TO ORDER, ROLL CALL AND ESTABLISH QUORUM

VOTING BOARD MEMBERS PRESENT
Governor Brian Sandoval, State of Nevada
Lieutenant Governor Mark Hutchison, State of Nevada
Dr. Weldon Havins, Touro University, Nevada
Mr. James Barrett, Jr., President and Founder, The JABarrett Company
Dr. Dana Bennett, President, Nevada Mining Association
Mr. Dan Klaich, voting member at large
Mr. Raymond Specht, Founder & CEO Specht Leadership Consulting

BOARD MEMBERS ABSENT AND EXCUSED
Secretary of State Barbara Cegavske, State of Nevada
Mr. Adam Kramer, Executive Vice President of Strategy, Switch, Inc.

NON-VOTING BOARD MEMBERS PRESENT
Mr. Don Soderberg, Director, Department of Employment Rehabilitation and Training

NON-VOTING BOARD MEMBERS ABSENT AND EXCUSED
Dr. Thom Reilly, Chancellor and Chief Executive Officer, Nevada System of Higher Education

STAFF MEMBERS PRESENT
Paul Anderson, Executive Director, GOED, Secretary of Board
Derek Armstrong, Deputy Director, GOED
Matt Moore, Deputy Director, GOED
Bob Potts, Director of Research, GOED
Jessica Sanders, Program Specialist – CDBG, GOED
Melanie Sheldon, Program Manager, GOED
Mariah Heriman, Executive Assistant / Program Management Specialist, GOED

GUESTS PRESENT
Assemblywoman Irene Bustamante-Adams
Sonia Mendez, Office of Assemblywoman Irene Bustamante-Adams

AMERICAN OVERSIGHT

Nicole Linan, Lieutenant Governor's Office
Scott Anderson, Secretary of State's Office
Lori Chatwood, State Treasurer's Office
Henna Rasul, Attorney General's Office
Michelle Briggs, Attorney General's Office
Russell Guindon, Legislative Council Bureau
Pat Whitten, Storey County
Hugh Gallagher, Storey County
Bob Sader, TRIC General Improvement District Management
Brian Gordon, Applied Analysis
Paul Taggert, Taggert & Taggert, Ltd.
Alise Porto, Switch, Inc.
Patricia Mulroy, Switch, Inc.
Gary Milliken, Switch, Inc
Chris Reilly, Tesla, Inc.
Brian Scelfo, Tesla, Inc.
Martin Johnson, JNA Consulting Group, LLC
Randall W. Aleman, Emerald Lake T.C.
Kendra Follett, Sherman & Howard, LLC
Matthew Digesti, Blockchains
Leo Drozdoff, Drozdoff Group, LLC
Alex Samuelson, The Griffin Company, LLC

2. PUBLIC COMMENT

Governor Sandoval asked if anyone from the public sought to make public comment. No public comment was provided.

3. GOVERNOR SANDOVAL'S COMMENTS

Governor Sandoval noted he had recently led a trade mission to Ghana and South Africa. The trip had been focused on collaboration and trade in the areas of water technology, education and mining. More details would be provided at the next full Governor's Office of Economic Development (GOED) Board meeting.

4. REVIEW AND APPROVAL OF ECONOMIC DEVELOPMENT FINANCING PROPOSAL (EDFP) TAHOE RENO INDUSTRIAL CENTER (TRIC) EFFLUENT WATER PIPELINE

Director Paul Anderson, Executive Director, GOED provided an overview of the TRIC Effluent Pipeline Project and the request for bonding authority of $35 million to facilitate construction of the pipeline.

AMERICAN OVERSIGHT

The authority from GOED came out of SB 1, often referred to as the Faraday Special Session, that referenced a development at Apex Industrial Park, North Las Vegas. One of the qualifiers to access bonding authority was the presence of a qualified project making a capital investment of over $1 billion. TRIC's qualifying project was the Tesla Gigafactory. Given the strategic positioning of TRIC relative to the Truckee Meadows Water Reclamation Facility (TMWRF) and the needs of TRIC's tenants, the objective of this financing proposal was to develop an approximate 13-mile effluent water pipeline from TMWRF to TRIC, as well as several storage, advanced treatment and transmission components at TRIC. The entire project will be known as the "Effluent Project'; the pipeline from TMWRF to TRIC as the 'off-site Effluent Project' and the on-site improvements as the 'onsite Effluent Project'. Only the off-site Effluent Project will be considered for financing as part of an Economic Development Financing Proposal (EDFP). Increased availability of Process Water at TRIC from the Effluent Project is expected to resolve short and long-term load and capacity issues for TMWRF, improve water quality in the Truckee River and facilitate continued major future economic development benefitting all of northern Nevada.

Director Anderson introduced Mr. Pat Whitten, Storey County Manager. Mr. Whitten advised Storey County appeared before the Board a year prior, asking the Board to consider the EDFP as a means to further stimulate economic growth and build out in TRIC. Subsequently, selected project and financing elements had been modified and Storey County was back with a revised approach to finance the off-site Effluent Project.

Instead of one developer involved, there would now be six, including corporate giants such as Google, Tesla and Switch. The new developers brought a desire and a willingness to provide up-front funding through a Special Assessment District (SAD) process. Having low cost water available to these companies, coupled with the recent inclusion of TRIC in the Federal Government Opportunity Zone Program provided the catalyst these companies needed to fully develop their TRIC properties. On August 7, 2018, The Storey County Board of Commissioners voted unanimously to forward the proposal for consideration.

Mr. Whitten was joined by Mr. Martin Johnson, President, JNA Consulting Group, LLC. Mr. Johnson advised JNA Consulting Group, LLC were the financial advisors to Storey County and had been asked to assist the county with this project. Mr. Johnson noted, selected landowners would agree to self-assess the cost of the off-site Effluent Project by way of a special assessment district (SAD) to support approximately $35 million in bonds for the development of the off-site Effluent Project. The SAD bonds would be sourced to infrastructure bonding capacity allocated to GOED for economic development purposes. The $35 million off-site Effluent Project bond financing was also expected to comply with Storey County's SAD guidelines. In addition to the financing of the off-site Effluent Project, Storey County would create a tax increment area pursuant to Senate Bill 442 (SB442) of the 2017 Session of the Nevada Legislature that would allow for a cumulative reimbursement up to an amount equivalent to the debt service, including principal and interest, of the off-site Effluent Project SAD financing.

AMERICAN OVERSIGHT

Mr. Brian Gordon, Principal, Applied Analysis was introduced and advised, in addition to the off-site Effluent Project, the SAD participants intended to privately finance (either directly or through a third-party) the on-site Effluent Project. The on-site Effluent Project is expected to be segmented into two individual phases. The first phase focuses on common infrastructure shared among the SAD participants, and it will include water transmission and storage infrastructure, including wells and a reservoir. This first phase of the on-site Effluent Project is estimated to cost approximately $30 million. In addition to this phase of the project, selected water users require more advanced water treatment to generate water suitable for use in their operations. This second phase of the onsite Effluent Project is estimated to cost between $35 million and $85 million, depending on the number of participants, the technology employed and the costs associated with a potential third-party operator of these facilities. The combined cost of the total Effluent Project is expected to range from $100 million to $150 million.

As far as environmental benefits, the Truckee Meadows water shed had been fragile and one of the most litigated water sources in the western United States. This included the Truckee River. This project would divert 4,000 acre-feet, of high nitrate water, that would typically go into the Truckee River. This water would be diverted to TRIC where it would then be utilized by the landowners. If the project didn't move forward, TMWRF at some point, would be required to invest in water treatment infrastructure and this would entail an estimated capital cost of $30-40 million, in conjunction with annual recurring maintenance costs of approximately $1.5 million.

Ms. Patricia Mulroy, Consultant, Switch, Inc. was introduced and advised the pipeline would remove nitrates causing TMWRF to be out of compliance with EPA Clean Water Standards. Additionally, it would allow TMWFF to discharge without causing nitrate issues that are problematic for the endangered cui-ui fish species in river. The Pyramid Lake Paiute Tribe were also reliant on the river as a water source.

Two agreements were negotiated. The first was the effluent agreement, with the cities of Sparks and Reno, who control the TMWRF facility. In terms of ownership, the water will stay within the Reno Sparks area. TRIC will simply lease the water supply for the term of 50-60 years. TRIC would reimburse the City of Sparks and the TMWRF facilities for all extraneous expenses, and any capital improvements required in order to facilitate this endeavor and make the Reno Sparks area whole. The second agreement was recently approved by Truckee Meadows Water Authority (TMWA) which is the return flow management agreement. The agreement requires the TRIC landowners to turn over their Truckee River Rights of 1,500 acre-feet, to manage the river for instream flows for use by TMWA during the course of this agreement. The landowners will also pay for an adjudication process on ground water rights that are available through State right-of-ways with the Department of Transportation. The cost of that adjudication will be borne by the landowners and the water as well will be turned over to TMWA for management purposes to make the river whole.

AMERICAN OVERSIGHT

Governor Sandoval inquired if TMWA rate payers would incur savings as they would not be required to pay for the water treatment in years to come. Ms. Mulroy advised the rate payers would benefit. The mitigated cost of $40 million would prevent the wastewater rates from increasing. The larger benefit for TMWA and the Reno Sparks area, is the provision of maximum flexibility to TMWA in terms of managing the flows in the river regardless what the hydrology looked like in the system.

Governor Sandoval asked if the Pyramid Lake Paiute Tribe would receive a higher quality of water. Ms. Mulroy advised the tribe would receive a greatly improved quality of water and noted all parties were committed to making sure the Tribe would not be negatively affected by this agreement.

Governor Sandoval asked is there was any type of return discharge from TRIC back to the river. Ms. Mulroy advised the Nevada Department of Environmental Protection (NDEP) had been clear there could be no discharge back into the river. The intent was to have a second pass-thru for reuse. Water not put to full consumptive use would once again enter the recycle process and be utilized. The water would stay contained in the TRIC area, thus saving water.

Lieutenant Governor Mark Hutchinson asked for clarification on the term of the lease. Ms. Mulroy stated the original term was 40 years with the option to extend.

Lieutenant Governor Hutchinson asked how the lease terms coincided with the infrastructure life expectation. Ms. Mulroy stated the bonds should be paid off before the lease expired and it would be a 20-25-year window for the bonding. The life of the infrastructure extends past the anticipated date timeframes for the bonds to be paid off. This could potentially be 80-90 years.

Lieutenant Governor Hutchinson asked Ms. Mulroy if she foresaw any additional challenges or objections from third parties. Ms. Mulroy advised there had been several public forums held and, to date, no issues had been raised.

Mr. James Barrett asked about the project's permitting process. Ms. Mulroy noted the permit process was still to occur. However, there was full commitment to being compliant with all the conditions around those permits.

Governor Sandoval asked if there were any environmental concerns associated with the construction portion of the project. Mr. Bob Sader, TRIC Improvement District, was introduced and advised he had been very involved in the right-of-way process for the path of the pipeline. There had been three or four different alignments and the alignment with the least environmental impacts had been selected. Additionally, there were no wetlands, the pipeline would not cross the Truckee River, nor would it enter Federal Lands. There were two state parcels, owned by the State of Nevada and there had been discussions with the Public Lands around the application for that. There had also been a high-degree of engineering on the right-of-way.

AMERICAN OVERSIGHT

Mr. Dan Klaich asked if the agreements with Reno and Sparks had been finalized. Ms. Mulroy confirmed this was the case. The agreements were approved by both the Sparks City Council and the Reno City Council, in terms of the lease agreement and the return flow management agreement.

Mr. Paul Taggert, Senior Partner, Taggart & Taggart, Ltd., was introduced and advised the return flow management agreement had been approved by Reno, Sparks and TMWA.

Mr. Klaich asked Mr. Taggert if he believed the agreements provided substantial economic benefits to the cities of Reno and Sparks. Mr. Taggert confirmed this was the case. There would be a cost mitigation in upgrading the TMWRF facility for treating effluent as capacity would be created in the facilities by taking this water out of the river. This changed the timeline for required facility improvements.

Mr. Klaich inquired if the easement or right-of-way been acquired. Mr. Taggart advised the easement had not yet been acquired and the right-of-way would be deferred until all agreements were completed and approved.

Mr. Klaich inquired if the off-site Effluent Project' project could be completed within the $35 million range. Mr. Taggart advised the $35 million was the best estimate at this point. Costs would be refined as the engineering was completed. If there was a surplus, the assessment payors would incur this.

Mr. Gordon provided an overview of the benefits related to TRIC. There were 12,700 developable acres in TRIC itself. The proposed projects would free up future development activity, as well as the intensity of development activity. These types of developments generally led to higher yields and higher levels of investment. These landowners were also creators of higher than average wage employment. In terms of financing, the underlying real estate value would be required to have a 3.5 times value, relative to the amount being considered for bonding. It would be 3.5 times $35 million under the SAD. Currently, the current appraisal is suggesting a 7 times value, when the project is completed. This provides significant security as it relates to the financing side of the equation. Additionally, the group is also requesting a Tax Increment Area (TIA) be developed. A portion of the incremental tax dollars would inure back to the landowners, as reimbursement up to the amount of the offsite improvements, or the $35 million. This is the maximum amount to be reimbursed under a potential TIA. This aligns with NRS 278C.150-Developer Reimbursements for Construction of Wastewater Infrastructure Projects. If there was no future development activity and no additional investments made, there would be no additional tax dollars going back to the private sector development.

The existence of the pipeline itself would add additional value in Storey County and open-up properties for future development and higher intense. All of this would increase economic opportunity within Storey County. The TIA would be a reimbursement of a portion of the pipeline and overall infrastructure costs. It would exclude any taxes that were

AMERICAN OVERSIGHT

scheduled to go to special districts such as the school districts as these were excluded from any increment or reimbursement back as part of this project. Fifty percent of the sales and use taxes were eligible for reimbursement. Fifty percent would stay with the original taxing entities as they were currently scheduled and only half of the modified business tax or payroll tax would be eligible for reimbursement back towards the infrastructure costs.

Once the $35 million reimbursement was made, as it relates to the off-site Effluent Project, one hundred percent of all incremental taxes would go back to the original taxing entities and no more would go to the private sector for reimbursement under the project. The pipeline would also provide a stable source of water and provide increased stability in terms of the overall economic activity for Storey County as a whole.

Governor Sandoval asked if property owners and homeowners of Storey County had any risk associated with this project and the bonding. Mr. Gordon advised all property owners would continue to pay the normal taxes and operate as usual. The exposure related to the SAD which required one hundred percent consent of all property owners within that district. An assessment was a lien on the property and co-equal to property taxes. If an assessment is not paid, foreclosure can occur on the property. Assessment districts and bonds can incur foreclosures for delinquencies. The assessments would be billed and collected semi-annually. The assessments, under statute, could go for a term of up to 30 years. Under the current proposal, the county would issue assessment district bonds and those bonds would then be purchased by the State through the Bond Bank Program. This allowed the interest rate on the state bonds to be passed through to the County bonds, which provided the lowest possible cost to capital for a Nevada local government. The bonds would be paid first from the assessment payments. Every six months there would be a bill for those assessments. Approximately two months later the bond payments would be made. To the extent the assessment payments are insufficient, there were other resources within the SAD. In addition to the other resources and cash available, there would be a reserve fund that is funded out of bond proceeds, the day of closing of the bond transaction, equal to one year's debt service. Theoretically, if all the property owners were delinquent, there would be enough money in the bank to make the payment for at least one year. If those three resources were insufficient, the county would be responsible for the amount of its uncommitted General Fund balance or the amount of the annual payment.

Governor Sandoval noted Storey County's approval was a significant factor and asked Mr. Whitten if there had been any opposition from the residents of the county. Mr. Whitten advised the vast majority were in favor of the pipeline although it had also been labelled 'corporate welfare.'

Lieutenant Governor Hutchison inquired about the geographic area of the SAD. Mr. Gordon advised there were two parcels located in TRIC within the SAD, but not within the TIA. One was owned by Switch and the other by Tesla.

AMERICAN OVERSIGHT

Lieutenant Governor Hutchison inquired if the TIA would entail developers fronting the money and receiving reimbursement, through various taxes that are going to be used to pay the $35 million. Mr. Gordon confirmed this was the case.

The Lieutenant Governor noted if the vacant land was never developed, the developers would assume all the risk. Mr. Gordon confirmed this was the case.

Mr. Klaich asked if the approval of the project would limit the state's ability to fund other projects. Lori Chatwood, Deputy Treasurer of Debt Management, Nevada State Treasurer's Office advised the maximum annual debt service was slightly more than $2 million a year. Therefore, this should not limit funding other projects.

Mr. Klaich asked Ms. Chatwood if she anticipated anything limiting the bonding capacity reported to the Governor as being available for additional CIP Projects. Ms. Chatwood advised that to the extent all of the revenues were sufficient, there would be no impact. Being that the project comprised a natural resource, it did not fall under the 2% constitutional debt limit. Therefore, the amount of capacity of bonding under the constitution was not affected.

Governor Sandoval asked Ms. Chatwood if she had reached any conclusions or opinions regarding the transaction. Ms. Chatwood noted, at first blush, the proposal looked solid. Ms. Chatwood advised, for the record, if the proposal were to be approved, the bond would be issued through the authority of SB 1 which had a blanket limit of $200 million. Therefore, the $35 million would go under that capacity, reducing that $200 million authority in the future.

Mr. Barrett inquired about matching between the SAD and the TIA. Mr. Johnson advised the SAD would be created by the County Commission at the September 18th meeting and bonds could be issued once a bond ordinance was adopted. This would take two readings from the Storey County Commission. Subsequently, the State Board of Finance would need to approve the issuance of the State bonds, which would be in November 2018. the County could not start forming the TIA prior to receiving Interim Finance Committee (IFC) approval. Assuming this was to happen in time for the September 18th meeting, the process to form a TIA could commence.

Dr. Havins inquired about the anticipated impacts, should the project not be approved. Mr. Johnson advised there would not be any additional revenue raised as, without the water, there could not be further development at TRIC.

Mr. Specht inquired about the pipeline's capacity. Ms. Mulroy advised it would be 4,000 acre-feet annually. Mr. Specht asked if that meant this the pipeline is 100% maximized at that point. Ms. Mulroy stated there was an oversizing component on the pipeline. If Reno, Sparks or Washoe County wished to lease additional effluent TRIC in the future, the pipeline would afford that opportunity. Mr. Sader advised it was initially estimated the pipe would need to be 18-inches. It was increased to 24 inches when it was determined the flows

AMERICAN OVERSIGHT

from TMWRF and the Reno Sparks Sewer Plant would be variable during the year. Currently, the decision was to go up to 30-inches in diameter, in order to be able to accommodate additional flows in the future

Mr. Klaich asked how the $35 million construction budget was calculated Mr. Sader advised the district engineers were from Farr West Engineering (Farr West). The firm had substantial experience building infrastructure and providing similar services to water and sewer systems all over northern Nevada. Farr West had made the $35 million estimate.

Mr. Klaich asked about additional funding, should the project cost more than $35 million. Mr. Sader advised the private parties involved would cover any overrun costs. It would not be borne by the county or by the state.

Mr. Klaich inquired about the ownership of the pipeline. Mr. Sader advised ownership of the pipeline would transfer to TRIGID upon completion.

Governor Sandoval asked if the private entity participants, in attendance, wished to make any comments. Mr. Chris Reilly, Workforce Development and Education Lead, Tesla, Inc. and Mr. Brian Scelfo, Senior Director, Corporate Development, Tesla, Inc. advised they were in in full support of the project and saw this as exciting for long-term growth at the Tesla Gigafactory.

Lieutenant Governor Hutchison inquired about future plans for the Tesla, Inc. parcels that were part of the TIA. Mr. Scelfo advised the Gigafactory is separated into different parcels. Currently, only the largest parcel had been developed. However, the company planned to expand onto the other parcels swiftly.

Lieutenant Governor Hutchison inquired about the impacts of the pipeline project on the Gigafactory expansion plans. Mr. Scelfo advised future expansion would not be possible without approval of the project.

Dr. Bennett asked when water would start flowing through that pipeline. Mr. Sader advised the current schedule would commence construction of the pipeline, and other facilities necessary, in the first quarter of 2019 with a completion date of late 2020.

Governor Sandoval noted he was comfortable with the financing proposal and felt there was extraordinary protection for the citizens of both Storey County and the State of Nevada Ultimately, the responsibility would fall upon the entities within the SAD. Regarding environmental issues, Governor Sandoval noted the people of Washoe County would benefit from the avoided costs of facilities necessary to clean the water that would otherwise be redirected to TRIC. The water coming into the river would also be beneficial to the Pyramid Lake Paiute Tribe. It was of great importance the Tribe be protected in conjunction with receiving higher quality water.

AMERICAN OVERSIGHT

Governor Sandoval noted the water would be recycled at TRIC which would actually save water. This would be another benefit to the residents of Washoe County, Storey County and the region. Regarding economic development, the project continued the New Nevada story of bringing some of the best jobs in the country to Nevada. Tesla, Inc. had exceeded its initial commitments to the state. At a recent Cimarron Memorial High School press conference, Tesla, Inc. made a $1.5 million contribution to support the development of robotics teams and STEM education throughout Nevada. Switch, Inc. had built the world's largest data center and planned to build another facility in northern Nevada. Google had already been providing training, free of cost, to citizens of Washoe County.

Governor Sandoval noted significantly trusted and experienced individuals had testified on behalf of the project. Ms. Mulroy had impeccable knowledge regarding the water situation and water quality. Mr. Taggert was a prominent water lawyer in the state and had worked on the project in consultation with Washoe County, Storey County, the City of Sparks and City of Reno. Mr. Sader, was a well-respected member of Nevada's Legislature, a former Chairman of the Judiciary Committee and had an extensive public service career. Governor Sandoval also noted Applied Analysis was an entity he knew and trusted and had provided expertise and guidance on some of the most complex issues associated with economic development in the state.

The proposed Effluent Pipeline project was a transformational project and would allow the State of Nevada to lead. Nevada had generated tremendous economic results. It was the most improved state in the country in terms of employment. The state was at a record level of employers. Clark County was the fastest growing metropolitan area in the United States of America. Nevada's average wage was the highest it's ever been, and 175,000 jobs lost, in the Great Recession, had been replaced with 260,000 jobs. Governor Sandoval noted he had full faith in the companies participating in the project.

Governor Sandoval said the form of the motion for Agenda Item 4 would be:

- To approve the TRIC EDFP submitted by Storey County.
- To approve the submission of the proposal to the IFC of the Nevada Legislature.
- To approve to enter into one or more agreements with Storey County or another local government to administer any districts and carry out the projects identified in the proposal as deemed necessary by the Executive Director.
- To approve the provision of notice of the approval of the proposal to the Board of County Commissioners of Storey County and the State Board of Finance and that the motion include to take all action necessary or appropriate to effectuate the approval of the proposal and provisions of NRS 360.981 to 360.992.

A MOTION WAS MADE BY MR. KLAICH TO APPROVE THE FIVE-PART MOTION FORMULATED BY GOVERNOR SANDOVAL. THIS MOTION WAS SECONDED BY LIEUTENANT GOVERNOR HUTCHISON. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

5. REVIEW AND APPROVAL OF STOREY COUNTY RESOLUTIONS 501 & 502

Ms. Kendra Follett, Bond Counsel to Storey County, provided the following information: Resolution 501 is a resolution approving the financing proposal. This is adopted by the Board of County Commissioners of Storey County and it directed notification to the Governor's Office of Economic Development and the IFC pursuant to the provisions of NRS 278C and NRS 360. Resolution 502, also concerns the same project and it directs notice to the IFC under a different provision of 278C which specifically relates to the tax increment area.

Mr. Whitten advised the Storey County Board of Commissioners unanimously approved both Resolutions 501 and 502 a week ago.

The Governor said he would accept a motion to approve Storey County Resolutions 501 and 502, as presented in Agenda Item Number 5.

A MOTION WAS MADE BY MR. SPECHT TO APPROVE STOREY COUNTY RESOLUTIONS 501 & 502 AS PRESENTED IN AGENDA ITEM NUMBER 5. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

6. PUBLIC COMMENT

Governor Sandoval asked if anyone from the public sought to make public comment. No public comment was provided.

7. ADJOURNMENT

A MOTION WAS MADE BY DR. HAVINS TO ADJOURN THE MEETING. THIS MOTION WAS SECONDED BY MR. BARRETT. THE MOTION PASSED UNANIMOUSLY

2. PUBLIC COMMENT

Secretary of State Barbara Cegavske reminded staff to ensure companies submitting abatement applications are in good standing with their business license related affairs.

3. GOVERNOR SANDOVAL'S COMMENTS

Governor Sandoval opened the meeting and welcomed GOED's new Executive Director Mr. Paul Anderson. Governor Sandoval noted he'd previously had the privilege of working with him during Director Anderson's role as Assembly Leader in the Nevada legislature.

Governor Sandoval welcomed Mr. Raymond Specht to the GOED Board. Mr. Specht thanked Governor Sandoval and noted he was greatly appreciative of the opportunity to serve the State of Nevada.

4. APPROVAL OF THE JANUARY 18, 2018 BOARD MEETING MINUTES

Lieutenant Governor Mark Hutchison and Mr. Specht abstained from the vote as they were not present at the previous meeting.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE JANUARY 18, 2018 MEETING MINUTES. THIS MOTION WAS SECONDED BY MR. DAN KLAICH. THE MOTION PASSED UNANIMOUSLY.

5. ABATEMENT APPLICATIONS FOR BOARD APPROVAL:

A. AEROSPEC NDT SERVICES, INC.

- **AVIATION SALES AND USE TAX ABATEMENT**
- **AVIATION PERSONAL PROPERTY TAX ABATEMENT**

Mr. Stan Thomas, Executive Vice President, Economic Development Authority of Western Nevada (EDAWN), presented AeroSpec NDT Services, Inc., and provided a brief overview of the company and abatements sought. AeroSpec NDT Services, Inc. is an established service provider for the Non-Destructive Testing Industry (NDT). The company provides

AMERICAN OVERSIGHT

NDT laboratory services for the commercial aviation, defense, pipeline, and automotive industries. Mr. Thomas was joined by Mr. Edward Gordon Carson, Chief Operating Officer, AeroSpec NDT Services, Inc.

Mr. Carson advised the company was considering establishing a Corporate Headquarters in Washoe County. Mr. Carson noted a Reno location was advantageous due to the possibility of 24-hour turnaround shipping of customer parts. Additionally, the University of Reno (UNR) was contemplating offering a composite engineering accreditation, creating potential for a partnership where the university could perform various tests and publish the results using AeroSpec NDT Services, Inc.'s equipment.

Governor Sandoval asked about the company's next steps should it be awarded the abatements sought. Mr. Carson confirmed the company's Senior Management had made the decision to locate in Nevada

Governor Sandoval inquired about the employee skill sets sought by the company. Mr. Carson advised there were three levels within the company. Level I and Level II positions operated the basic equipment. Level III certified results of the testing. A young graduate could easily enter at a Level II position and work up to a Level III Non-Destruct Test Engineer position.

Governor Sandoval asked whether the company intended to hire locally. Mr. Carson confirmed this was the company's intention.

Governor Sandoval noted there had been a substantial investment in building a new College of Engineering at the UNR Campus. Mr. Carson confirmed the company was aware and had been pleased to learn of this.

Dr. Dana Bennett asked about the company's community engagement plans. Mr. Carson advised he was currently a member of 15 organizations and societies and this enabled him to be an active spokesperson within the community.

Lieutenant Governor Hutchison inquired whether Mr. Carson believed Nevada was well-positioned for growth in the Aerospace and Defense sector. Mr. Carson answered in the affirmative and advised he was aware of other aviation companies also considering Nevada as a potential location.

A MOTION WAS MADE BY DR. BENNETT TO APPROVE THE APPLICATION FOR AN AVIATION SALES TAX ABATEMENT, AND AN AVIATION PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5A. THIS MOTION WAS SECONDED BY MR. KLAICH. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

B. C4MINING COMPANY

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Perry Ursem, Vice President of Business Retention and Expansion, Las Vegas Global Alliance (LVGEA) presented C4Mining Company and provided a brief overview of the company and abatements sought. C4Mining Company is a cryptocurrency mining company. The company provides mining services that enable non-technical qualified clients to generate bitcoin through the mining process. Bitcoin miners use special software to solve math problems and are issued a certain number of bitcoins in exchange for their effort. This provides a decentralized way to issue the currency and creates an incentive for mining. Mr. Ursem was joined by Mr. Dan Hunt, Founder and Chief Executive Officer, C4Mining Company.

Mr. Hunt noted C4Mining Company decided to relocate to Nevada after Senate Bill 398 was passed. This demonstrated the Nevada's Legislature receptiveness to innovation and the state's progressiveness in the blockchain technology arena.

Governor Sandoval asked if Mr. Hunt felt confident the company could source its required workforce in southern Nevada. Mr. Hunt answered in the affirmative and advised he had researched programming and blockchain technology developers prior to relocating to Nevada.

Secretary of State Cegavske noted the company initially planned to lease a 100,000 square-foot facility and asked if there was scope to expand this facility. Mr. Hunt advised this would not be an option. However, C4Mining Company had been in discussions with NV Energy, regarding potential long-term locations, and was confident the required space and infrastructure was available. Mr. Hunt expressed his appreciation for NV Energy's assistance and willingness to work with the company.

Secretary of State Cegavske asked whether the fluctuating prices of cryptocurrency was a concern. Mr. Hunt advised the company's consultants had predicted, by the end of 2018, Bitcoin would be somewhere between $20,000 and $30,000 each. In addition to Bitcoin, the company's mining facilities would mine the Top-10 coins including Ethereum, Litecoin, and Monero. Additionally, the company's core belief was that cryptocurrency, digital currency, and blockchain technology was the future of the Global financial system.

Mr. Klaich noted, while the company's application comprised fewer jobs, the quality of the application in terms of the industry and wages far outweighed the quantity of jobs listed.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5B. THIS MOTION WAS SECONDED BY MR. JAMES BARRETT. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

C. INTERNALDRIVE, INC. DBA ID TECH

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Chris Ault Jr., Vice President of Business Development, EDAWN, presented internalDrive, Inc. dba iD Tech (iD Tech), and provided a brief overview of the company and abatements sought. iD Tech is a summer computer camp provider specializing in computer technology education for children ages 7 through 18. The company had provided STEM education programs since 1999 and grown to become a worldwide provider of STEM education with programs nationwide and in countries such as England, Singapore, Hong Kong, and China. Mr. Ault was joined by Mr. Dylan DeHart, Director of Logistics, iD Tech, and Mr. Konstantin Kagnovich, Logistics Manager, iD Tech.

Mr. DeHart noted, while several other potential sites were investigated, Nevada was an attractive location due to its quality facilities, higher vacancy rates, lower taxes, potential for abatements, and proximity to the company's main office in California. Mr. DeHart advised iD Tech's San Jose, CA facility's lease would expire in December 2019 and there could be potential to relocate the company's Customer Service Departments, Curriculum Developers, Marketing, IT, and support staff to Nevada. The company also had a strong focus on community engagement and planned to replicate this is Nevada. Every year the company donates surplus equipment to local schools and had made over $220K in donations to San Jose schools in 2017.

Governor Sandoval inquired whether the company planned to hire locally. Mr. DeHart confirmed and advised seven employees have been hired locally thus far, including hardware technicians to service and maintain the company's computer fleet of approximately 10,000 laptops.

Governor Sandoval asked about the company's recruitment and hiring experience in Nevada thus far. Mr. DeHart confirmed the experience had been positive from a hiring and workforce perspective.

Governor Sandoval suggested the company contact Mr. Brian Mitchell, Executive Director, Nevada Governor's Office of Science, Innovation and Technology, regarding a possible collaboration around STEM education. Governor Sandoval also suggested Mr. DeHart contact Dr. Steve Canavero, superintendent of public instruction for the State of Nevada, regarding donations of surplus equipment to local schools.

Mr. Klaich emphasized the importance of STEM education for young students, and commended the company's outreach programs encouraging girls to pursue STEM subjects. Mr. DeHart noted the company now offered 10 female focused programs and the number of participants had risen from 14% to 26% in the past four years. Secretary of State Cegavske also commended the company for its work with the Girl Scouts of southern Nevada.

A MOTION WAS MADE BY SECRETARY OF STATE CEGAVSKE TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS

AMERICAN OVERSIGHT

TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5C. THIS MOTION WAS SECONDED BY DR. BENNETT. THE MOTION PASSED UNANIMOUSLY.

D. MECP1 RENO 1, LLC

- **DATA CENTER TAX ABATEMENT**
- **DATA CENTER PERSONAL PROPERTY TAX ABATEMENT**

Mr. Thomas, EDAWN, presented MECP1 Reno 1, LLC, and provided a brief overview of the company and abatements sought. MECP1 Reno 1, LLC is an EdgeCore (EdgeCore) Data Centers project. EdgeCore is a US-based, privately-held owner, developer and operator of high-availability enterprise-class, cloud-connected data centers. The company provides colocation services, including disaster avoidance, uninterrupted power, cooling infrastructure, internet connectivity, and 24/7 security and facilities staffing. Mr. Thomas was joined by Mr. Matt Muell, Senior Vice President, EdgeCore.

Mr. Muell advised EdgeCore's Reno data center campus would be located in the Tahoe-Reno Industrial Corridor and involved ground up construction of six data center buildings, and investments in additional infrastructure, to support multi-national telecom, cloud, government, and digital enterprise customers. The company had selected Nevada for multiple reasons including its disaster risk adverse location, competitive total cost of operation regarding power fees and taxes, and the attractive pro-business environment. If awarded the abatements sought, the company planned to commence development. It was anticipated the first building would be completed by early 2019.

Governor Sandoval asked if the company had found the private cost of power, in Nevada, competitive. Mr. Muell confirmed and noted the company had been evaluating 20 to 30 markets in the US and had found the cost of power in northern Nevada to be extremely competitive relative to other data center locations.

Governor Sandoval asked whether the availability of green energy in Nevada was a factor in the decision-making process. Mr. Muell confirmed and noted this was a requirement of the company's customer base.

Governor Sandoval noted the company's application listed 'proximity to substitute markets' as an advantage of a Nevada location, and asked the company to explain this term. Mr. Muell advised the term primarily referred to northern California, which was a very large established data center market. The company believed the latency characteristics of northern Nevada, in terms of transmitting data back to that area, could support over 50% of the applications currently residing in the Bay Area and provide opportunity to transport some of that demand into northern Nevada.

Lieutenant Governor Hutchison noted the company's Data Center Abatement application was a strong example of policy making a difference and paving the way for new businesses, expanded businesses, and economic diversification. Mr. Muell confirmed the Data Center Abatement had been integral to the company's decision to locate in Nevada.

AMERICAN OVERSIGHT

A MOTION WAS MADE BY MR. KLAICH TO APPROVE THE APPLICATION FOR A DATA CENTER SALES TAX ABATEMENT AND A DATA CENTER PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5D. THIS MOTION WAS SECONDED BY MR. BARRETT. THE MOTION PASSED UNANIMOUSLY.

E. MONIN, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Thomas, EDAWN, presented Monin Inc., and provided a brief overview of the company and abatements sought. Monin, Inc. is a global manufacturer of premium beverage syrups, concentrates, sweeteners, and flavorings. The company offers over 200 products made from premium and authentic ingredients. Monin, Inc. manufactures and ships to 50 states and 27 foreign countries. Mr. Thomas was joined by Mr. William Lombardo, Chief Executive Officer, Monin, Inc.

Mr. Lombardo advised Monin, Inc. is seeking to diversify its manufacturing and move to a western-base. The company is considering building a 100,000 square-foot manufacturing and distribution facility in Reno. The company is headquartered in Clearwater, FL and had been named a Top-10 employer, in the small/medium category, for the past eight years in a row. The company would seek to replicate its strong and positive company culture at its new facility.

Governor Sandoval inquired about the specific skill set sought in employees. Mr. Lombardo advised the company sought skills in chemistry, food safety, quality assurance, production supervision, warehouse supervision and management, and logistics. Mr. Lombardo noted the company had undertaken a cursory investigation into the strength of the local workforce and felt confident it could find the right quality of employee. The company would potentially move three employees to Nevada and hire the rest locally.

Governor Sandoval asked whether water quality was a factor in the company's decision-making process. Mr. Lombardo confirmed both water quality and availability were integral.

Governor Sandoval asked about the company's next steps should it be awarded the abatements sought. Mr. Lombardo advised the company planned to move swiftly and have a manufacturing and distribution facility operational by mid-2019. The company also planned to build an innovation and training center.

A MOTION WAS MADE BY DR. WELDON HAVINS TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5E. THIS MOTION WAS SECONDED BY MR. SPECHT. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

F. SCIENTIFIC GAMES CORPORATION
- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

G. SCIENTIFIC GAMES CORPORATION
- **CATYLST FUND**

Governor Sandoval noted that Agenda Items 5F and 5G would be heard together.

Mr. Ursem, LVGEA, presented Scientific Games Corporation, and provided a brief overview of the company and abatements sought. Scientific Games Corporation is a leading developer of technology-based products and services and associated content for worldwide gaming and lottery markets. The company's portfolio includes instant and draw-based lottery games, electronic gaming machines and game content, server-based lottery and gaming systems, sports betting technology, loyalty and rewards programs, and social, mobile and interactive content and services. Mr. Ursem was joined by Mr. Todd Clark, Vice President, Global Facility Services, Scientific Games Corporation.

Mr. Clark advised, since the company's last appearance before the GOED Board, it had experienced a significant growth trajectory and had acquired six companies. These companies had been integrated into the Scientific Games infrastructure and the growth resulting from the acquisitions had exceeded expectations. The company had also experienced quarter-over-quarter growth for the past nine quarters. Mr. Clark noted the company was now seeking to add to its Nevada based Global Headquarters. As part of this project, the company would significantly expand its existing footprint in the state.

Governor Sandoval asked whether the company felt it could find its required workforce in southern Nevada. Mr. Clark confirmed the company was confident in sourcing the majority of its workforce locally. The company was also working with Mr. Frank Woodbeck Vice Chancellor, Workforce Development, Nevada System of Higher Education (NSHE) and the University of Las Vegas (UNLV) to develop workforce programs and pipelines.

Mr. Specht asked Mr. Clark about his experience with Economic Development in Nevada. Mr. Clark advised he managed projects on a global scale and Nevada had some of best Economic Development professionals he had worked with. Mr. Clark noted Scientific Games Corporation had been provided a great amount of support, direction, and guidance.

A MOTION WAS MADE BY LIEUTENANT GOVERNOR HUTCHISON TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5F AND A CATALYST FUND GRANT IN AN AMOUNT NOT TO EXCEED $1,825,000, AS DESCRIBED IN AGENDA ITEM 5G. THIS MOTION WAS SECONDED BY SECRETARY OF STATE CEGAVSKE. THE MOTION PASSED UNANIMOUSLY.

AMERICAN OVERSIGHT

H. SMITH'S FOOD AND DRUG CENTERS, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Michael Walsh, Vice President of Economic Development, LVGEA, presented Smith's Food and Drug Centers, Inc., and provided a brief overview of the company and abatements sought. Smith's Food & Drug Centers, Inc. operates as a subsidiary of The Kroger Co (Kroger). Kroger was founded as a small downtown Cincinnati grocery store in 1883 by Barney Kroger. Over the last 135 years, the company has evolved from a small grocery store into an organization with nearly 2,800 stores across 35 states, operating under approximately two dozen banners, including the Smith's banner in Nevada. Kroger also operates 783 convenience stores under six banners in 19 states, 38 food production or manufacturing facilities, 1,480 supermarket fuel centers, and 2,266 pharmacies. Mr. Walsh was joined by Mr. Ian Smith, Manager, Economic Incentives and Credits, The Kroger Co, and Mr. Zach Riggs, Senior Project/ Program Manager, The Kroger Co.

Mr. Smith thanked the City of Henderson and LVGEA for their help during the abatement application process. Mr. Smith advised Smith's Food & Drug Centers, Inc. is considering opening a 482,000 square-foot distribution facility in Henderson. The company had been evaluating a project in the southwest United States for approximately one year. Due to Nevada's input in facilitating connections with the appropriate people, the company felt confident about moving forward with a Nevada location.

Governor Sandoval asked about the company’s next steps should it be awarded the abatements sought. Mr. Smith advised the abatements were the last critical factor in the company’s decision and, if receiving a favorable decision, the company would locate in Nevada with operations planned to commence operations by late 2018.

Governor Sandoval asked how the company planned to source its workforce. Mr. Smith advised, due to LVGEA’s connections, the company had connected with many workforce entities, and the College of Southern Nevada (CSN), to identify talent sources.

Secretary of State Cegavske asked whether the company planned to build or lease a facility. Mr. Smith advised the company was looking to lease and had been working with the City of Henderson regarding identification of a suitable site.

A MOTION WAS MADE BY SECTERARY OF STATE CEGAVSKE TO APPROVE THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5H. THIS MOTION WAS SECONDED BY LIEUTENANT GOVERNOR HUTCHISON. THE MOTION PASSED UNANIMOUSLY.

I. VM INNOVATIONS, INC. DBA VMI ENTERPRISES, LLC

- **AVIATION SALES AND USE TAX ABATEMENT**
- **AVIATION PERSONAL PROPERTY TAX ABATEMENT**

Mr. Walsh, LVGEA, presented VM Innovations, Inc. dba VMI Enterprises, LLC (VMI Enterprises, LLC), and provided a brief overview of the company and abatements sought. VMI Enterprises, LLC is a jet charter company operating a fleet of light jets and serving Las Vegas customers as well as people who are interested in private travel to Las Vegas. The company offers travel to/from Las Vegas from anywhere in the US. The company operates from the Henderson Executive Airport, a premier business aviation facility and a primary reliever airport to McCarran International Airport. Mr. Walsh was joined by Mr. Stuart Edenfield, Director, VMI Enterprises, LLC and Mr. Kush Abdulloev, Director, VMI Enterprises, LLC

Mr. Abdullov noted the company was considering expanding its current operations at the Henderson Executive Airport. The expansion would initially comprise office space with the potential to include a new hangar in the future. The company was currently headquartered in California. If the company's application received a favorable decision it would look at potentially relocating its headquarters to Nevada.

Governor Sandoval asked about the company's hiring and recruitment plans. Mr. Abdullov advised the company intended to hire locally. Currently the company partnered with flight schools for hiring purposes. Going forward, there were also plans to utilize analytically gifted graduates from Nevadan Universities. The company would also seek to hire pilots, data analysts, specialized aircraft repair and maintenance skills.

Governor Sandoval asked whether Nevada's Aviation Abatements were a significant factor in the VMI Enterprises, LLC's decision to expand in the state. Mr. Abdullov confirmed and noted the company had evaluated Nevada's incentives and talent pipeline and determined the state to be a good location to grow a business.

Lieutenant Governor Hutchison noted the company's Aviation Abatement application was another strong example of successful policy making. Lieutenant Governor Hutchison noted Assemblywoman Irene Bustamante-Adams was currently in attendance at the Board meeting and highlighted her integral involvement in introducing the Aviation Abatement legislation

A MOTION WAS MADE BY MR. KLAICH TO APPROVE THE APPLICATION FOR AN AVIATION SALES AND USE TAX ABATEMENT, AND AN AVIATION PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 5I. THIS MOTION WAS SECONDED BY MR. BARRETT. THE MOTION PASSED UNANIMOUSLY.

5. ABATEMENT APPLICATIONS FOR DIRECTOR APPROVAL:

A. CASCADE FINANCIAL TECHNOLOGY CORPORATION

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Ursem, LVGEA presented Cascade Financial Technology Corporation (Cascade), and provided a brief overview of the company and abatements sought. Cascade Financial Technology Corp. is a prepaid program manager and offers services to help organizations execute their prepaid program objectives. The company provides prepaid card services, prepaid consulting services, Person-to-Person (P2P) mobile payments, and prepaid call center services. Cascade Financial Technology Corp. also offers General Purpose Reloadable (GPR) prepaid cards, gift card programs, rewards and loyalty programs, and commercial prepaid programs. Mr. Ursem was joined by Mr. Spencer Schmerling, Chief Executive Officer, Cascade.

Mr. Schmerling noted Cascade planned to expand its Clark County facility from approximately 2,000 square feet to over 20,000 square feet within the next few months. The company was originally based out of California. However, over time it became apparent it would be difficult, due to the economic environment and cost of living, to establish a 24/7/365 call center in the Los Angeles area. Subsequently, a decision was made to relocate the company to Las Vegas, NV.

Mr. Specht asked how Mr. Schmerling saw Nevada capitalizing the Financial Technology industry. Mr. Schmerling highlighted the level of significant programming talent available, in the state, and noted being located in Nevada affords companies the opportunity to pay an attractive starting wage.

Director Anderson inquired about the timeline for the company's facility expansion. Mr. Schmerling advised this would commence in the third quarter of 2018.

Director Anderson stated his belief Nevada was well-positioned for growth in the Financial Technology industry.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6A.

B. DELPHI AUTOMOTIVE SYSTEMS, LLC

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Ursem, LVGEA, presented Delphi Automotive Systems, LLC, and provided a brief overview of the company and abatements sought. Delphi Automotive Systems, LLC

AMERICAN OVERSIGHT

provides products and services worldwide. The company designs and engineers a variety of automotive systems and components including fuel cells, entertainment systems, sensors, powertrain systems, driver interfaces, and security devices.

Mr. Ursem noted Governor Sandoval laid the foundation for this application through Assembly Bill 69. Mr. Ursem also thanked Mr. Phil Klevorick, Program Manager, Clark County Economic Development Office, for his time and efforts regarding the company's Abatement application process. Mr. Ursem was joined by Mr. Manu Namboodiri, Senior Director, Delphi Automotive Systems, LLC.

Mr. Namboodiri advised Delphi Automotive Systems, LLC was an Aptiv PLC company. Aptiv had been a leader in this autonomous space for a long period of time and employs 150,000 employees in 140 countries. The company had visited Nevada on multiple occasions to showcase autonomous driving technology at the Consumer Electronics Show (CES) and had been satisfied with the relationships established in Nevada. The company was now considering Nevada as a location for a multi-phased project which could lead to the establishment of a Global Mobility Command Center.

Governor Sandoval noted that Nevada was the first state to promulgate regulations to allow for the operation of autonomous vehicles, and both UNLV and UNR have been aggressive in terms of adding faculty and curriculum to allow for companies like Aptiv to hire locally and feel comfortable coming to Nevada.

Governor Sandoval noted the importance of Aptiv's application and possible cascade effect on similar companies considering locating in Nevada

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6B.

C. ELLSWORTH ADHESIVES SPECIALTY CHEMICAL DISTRIBUTION, INC.

- **SALES TAX ABATEMENT**
- **MODIFIED BUSINESS TAX ABATEMENT**
- **PERSONAL PROPERTY TAX ABATEMENT**

Mr. Thomas, EDAWN, presented Ellsworth Adhesives Specialty Chemical Distribution, Inc. (Ellsworth Adhesives), and provided a brief overview of the company and abatements sought. Ellsworth Adhesives is a global distributor of adhesives, sealants, and dispensing equipment for a wide range of markets including transportation, medical, power, and general industry. The company employs 260 individuals in North America and over 1000 staff on a global basis. Ellsworth Adhesives has operations in the United States, Canada, Mexico, Brazil, Europe, and the Asia Pacific.

AMERICAN OVERSIGHT

Mr. Thomas commended Mr. Cory Hunt, Deputy Director, GOED, for his outstanding work on this application. Mr. Thomas was joined by Mr. Kirk Westfahl, Director, Operations and Finance, Ellsworth Adhesives.

Mr. Westfahl advised the company's current location in Irvine, California facility no longer suited its needs. The company was in the process of evaluating several states, for relocation of its West Coast distribution facility, and Reno was being considered as a potential site. The relocation would involve the building of a new 120,000 square foot facility to serve customers primarily located in the west and southwest portion of the United States, and Mexico.

Governor Sandoval asked about the company's next steps should the it be awarded the abatements sought. Mr. Westfahl advised the company would commence a relocation to northern Nevada.

Governor Sandoval asked whether the company would hire locally or bring employees from California. Mr. Westfahl advised two or three existing employees would relocate from California and the rest would be hired locally.

Governor Sandoval asked about the employee skills sets required by the company. Mr. Westfahl advised the company planned to hire across a wide spectrum of roles including top management, production supervisors, managers, mechanical and electrical engineers and, customer service and distribution. The company also currently worked with high schools to offer summer internship programs. Mr. Westfahl noted the company was confident the required talent was available in Nevada.

Dr. Bennett asked Mr. Westfahl to elaborate on the company's involvement with the community. Mr. Westfahl advised the company was involved with three charitable organizations, the American Cancer Society, Ronald McDonald House, and Wounded Warriors. The company owners matched all donations received. In addition, the company supported the Arts by sponsoring a music event called Gathering on the Green.

Director Anderson encouraged Mr. Westfahl to stay in contact with EDAWN when looking to develop and establish the company's Nevadan internship and outreach programs.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A SALES TAX ABATEMENT, A MODIFIED BUSINESS TAX ABATEMENT, AND A PERSONAL PROPERTY TAX ABATEMENT AS DESCRIBED IN AGENDA ITEM 6C.

6. WORKFORCE INNOVATION FOR THE NEW NEVADA (WINN) FUND - SUPPLEMENTAL NUTRITION ASSISTANCE PROGRAM (SNAP) RECIPIENT PILOT PROGRAM PHASE 2 - REQUEST FUNDING NOT TO EXCEED $210,000

Mr. Frank Woodbeck, NSHE, presented the WINN Fund SNAP Pilot Program Phase 2 - request funding not to exceed $210,000.

AMERICAN OVERSIGHT

Mr. Woodbeck advised, at the September 19, 2017 GOED Board meeting, the Board had approved an appropriation for Phase 1 of the SNAP Pilot Program, not to exceed $40,000. Phase 1 would be launched in partnership with the Nevada Department of Health & Human Services, and Division of Welfare & Supportive Services.

Phase 1 was launched in January 2018 with the goal of training up to 20 participants over a twelve to sixteen-week program for Manufacturing Technicians – MT1, qualifying them for entry level positions with various companies, including: Tesla, Panasonic, and ClickBond. At launch date the Program had 23 enrollments. As of March 8, 2018, the Program had 13 students moving forward rapidly through the program with an 80% test pass rate

Mr. Woodbeck advised the success of Phase 1 had resulted in a decision to propose expansion of the program to encompass northwestern Nevada, with Carson City and Reno as the source markets for participant recruitment; and expansion of curriculum offerings to now include Truckee Meadows Community College (TMCC). Following consultation with the Nevada Department of Health & Human Services Director, Richard Whitley, and Division of Welfare & Supportive Services Administrator, Steve Fisher, it was proposed this training opportunity be expanded to an additional one hundred SNAP Participants. As with the Phase 1, the participants would be chosen by the NV Department of Health & Human Services, Division of Welfare and Supportive Services. Each applicant would be required to have a high school diploma or equivalent and be interviewed by a screening committee comprised of a representative of the company (or companies) providing end-of-training employment, and a representative of the college providing the training. Successful participants would earn ten (10) credits at WNC or TMCC toward an AAS degree, a level one certification, and would undergo an ACT WorkKeys test to further certify their technical skill level as a part of the program. The ACT test would result in each successful participant receiving a National Career Readiness Certificate (NCRC), which is a nationally-recognized and "portable" certification sought by the participating companies, as well as other manufacturing companies throughout the state and nation.

Governor Sandoval thanked all parties involved in developing and launching the program and noted it had afforded Program participants the opportunity to access quality employment, wages, and benefits.

DIRECTOR ANDERSON APPROVED THE APPLICATION FOR A REQUEST FOR FUNDING FOR SNAP RECIPIENT PILOT PROGRAM PHASE 2, NOT TO EXCEED $210,000 AS DESCRIBED IN AGENDA ITEM 7.

8 PERFORMANCE MEASURES REPORT – MR. BOB POTTS, RESEARCH DIRECTOR, GOED

Mr. Potts presented the GOED Performance Measures report covering economic development activity in Q4 of 2017.

AMERICAN OVERSIGHT

In Q4 2017, 15 companies added 719 jobs to Nevada's economy. This brings the annual total to 6,014 additional jobs by 74 companies. Once these companies are fully staffed, the build-out job estimate is 9,681.

Forty-three percent of assisted companies were manufacturers followed by logistics and operations (26 percent), and information technology (11 percent). The remaining 20 percent were essentially evenly split between the mining, healthcare, aerospace, and tourism sectors.

The average hourly wage paid by assisted companies in Q4 2017 was $25.08. This reflects a $7.59 hourly increase from the previous quarter, and $9.05 from a year ago. Worker pay for companies receiving incentives was $29.97 per hour as compared to non-incentivized company pay of $19.05 an hour. The average hourly wage for all assisted companies in 2017 was $19.48.

There were 15 recruitment activity wins in the fourth quarter. This represented a 44.4 percent decrease from the third quarter, but the same amount as reported last year. The number of New Leads and Prospects as reported by RDAs across the state were also down in the current quarter (28.0 percent and 26.5 percent, respectively), but were above those reported last year (68.8 percent and 66.0 percent, respectively).

GOED conducted a Governor-led trade mission to Poland in October, which resulted in multiple new agreements focusing on education and technology innovation with Polish officials at national and provincial levels, as well as business leaders, for reciprocal trade missions to Nevada for the purposes of cooperation, investment and site selection. The Trade Mission brought in an additional 33 leads and 4 prospects, bringing the total active leads that the Global Team is working with to 39, and the Prospect count to 13.

The Nevada Procurement Technical Assistance Center (PTAC) had a very successful start to the fiscal year by exceeding full-year contract and contract amounts on record. The number of clients slipped slightly in the most recent quarter, however the year-to-date average is still well above historical counts. The Nevada PTAC credits much of its recent success to resource partners such as the U.S. Small Business Administration, the Nevada Department of Business and Industry, the Nevada Small Business Development Center, and local chambers of commerce in promoting their counseling services, training seminars, and networking events.

The Emerging Small Business Program is measured on a semi-annual basis. The current number of Certified Emerging Small Businesses (ESB's) has expanded by 34.2 percent since the end of last year to a total of 1,139. Local government agencies have until the end of March to report contract metrics. Soon after those are received, the complete annual ESB activity report of both state and local agencies will be sent to the Governor's Office, the Legislative Council Bureau, and posted to the GOED website.

Customer responses to the Nevada Film Office Client Satisfaction Survey decreased slightly in the most recent quarter, but were still well within the "very good" range of 101.5 and 100.9.

AMERICAN OVERSIGHT

The Rural Community Development Block Grant Program (CDGB) was changed because Carson City reverted to the state's CDBG program in 2017 receiving $459,890 in HUD allocation to fund six projects. Carson City's focus is urban with different priorities than GOED's existing rural programs.

Nevada, state-wide, has had an incredible recovery since the Great Recession. Employment and is now at record levels. Nevada's job count hit record levels in December by peaking at 1,359,800 bringing the annual average count to 1,341,400. This reflects a gain of 42,600 positions when compared to last year. and a gain of 223,600 jobs since the recessionary low of 1,117,900 in 2010. Over the year, the annual unemployment rate has dropped by 8.7 percentage points from the recessionary high of 13.7 percent to the current annual rate of 5.0 percent.

There are currently 13,800 workers in Nevada's Aerospace and Defense sector with the addition of 79 jobs in the current quarter. Average annual earnings also improved by $1,100 and now stand at $84,800. When compared to last year there has been a 5.3 percent increase in jobs and a 1.7 percent increase in earnings.

There were an additional 790 jobs added to Nevada's Business Information Technology sector in the fourth quarter. This reflects an annualized growth rate of 7.0 percent and brings the total employment base to 62,800. Annual earnings also improved by $611 in the current quarter to $47,600. Earnings are now 3.0 percent above what they were this time last year.

When compared to last quarter, an additional 1,360 jobs were added to Nevada's Health and Medical sector for a total of 109,200 workers employed in the sector. Average annual earnings also grew by $900 and currently stands at $56,400. When compared to last year, job counts in Nevada's healthcare sector have expanded by 3.8 percent and earnings by 2.2 percent.

Nevada's Natural Resource Technologies sector showed solid growth in the fourth quarter with the addition of 765 jobs and $795 in annual earnings. Over the year, jobs have improved by 2.9 percent and wages by 2.7 percent. The sector now represents 51,000 workers with average annual earnings of $66,200.

The number of jobs and average annual earnings in Nevada's Manufacturing and Logistics sector both improved in the fourth quarter. Job counts grew by almost 1,600 for a total of 120,600 workers employed in the sector. Average annual earnings also grew to $58,600 with the addition of $1,000 per year. For the year, jobs have grown by 3.9 percent and earnings by 2.6 percent.

With the addition of 430 workers in the current quarter there are now 44,000 workers employed in Nevada's Manufacturing sector. Average annual earnings also improved by $834 and now stands at $55,700. When compared to last year sector growth has been solid with a 3.6 percent increase in jobs and a 2.8 percent increase in earnings.

Job counts in Nevada's Mining sector increased slightly in the fourth quarter with the addition of 149 workers to a total of 13,800. Average annual earnings showed somewhat stronger growth with the addition of $900 per year, raising Nevada's already highest paying sector to the record level of $94,600. When compared to last year, job counts have improved by 3.8 percent and earnings by 2.1 percent.

AMERICAN OVERSIGHT

Both the number of jobs and annual earnings grew in Nevada's Tourism, Gaming, and Entertainment sector in the fourth quarter. Job growth was especially strong with the addition of 8,600 workers, while earnings improved by a slight $170 a year. When compared to last year, job counts grew by 2.3 percent and worker pay by 4.3 percent. Currently, Nevada's largest industry sector employs 416,400 workers who make, on average, $34,000 per year.

9. MARCH 2018 DIRECTOR'S REPORT - REVIEW AND DISCUSSION

Director Anderson commended the GOED Business Development team and the Regional Development Authorities (RDAs) for their work in coordinating the GOED Board Packets and bringing companies in front of the Board. He also highlighted the contribution of the Secretary of State's Office, the Lieutenant Governor's Office, the Department of Taxation and all other agencies involved in the Board meeting process. Director Anderson noted the current Board packet represented approximately half-a-billion-dollars of capital investment, 654 initial new jobs, and approximately 1,600 forecasted new jobs.

Director Anderson highlighted the Data Center Abatement applications, Aviation Abatements applications, and applications submitted as a result of Assembly Bill 69. Director Anderson commended Mr. Hunt, Deputy Director, GOED and Assemblywoman Bustamante-Adams for their extensive work, in these areas, during past legislative sessions.

Director Anderson commended the work of GOED's International Trade Division for the impressive work done by such a small team. The team were currently preparing for an advance Trade Mission to Africa scheduled for mid-April 2018.

Director Anderson noted the International Economic Development Council (IEDC) 2018 Leadership Summit took place January 2018 in Las Vegas. IEDC is the world's largest professional organization serving the economic development profession. Many GOED staff members presented at the conference and this led to some very productive interactions.

Director Anderson advised the Nevada Film Office (NFO) released its Crew and Vendor Directory in early 2018. This had received positive feedback. The NFO was now focusing on revamping the online locations directory to better connect potential film locations around Nevada with production companies, giving local businesses more control and more opportunity.

Director Anderson noted some new staff members had recently joined GOED. He welcomed Dr. Grace Chou as GOED's new Director of Advanced Manufacturing. Dr Chou is based in GOED's Carson City Office.
Director Anderson welcomed Mr. Matthew Moore as GOED's new Director of Rural Community and Economic Development. Mr. Moore is based in GOED's Carson City Office.

Director Anderson welcomed Mr. Juan Manzano, as GOED's Deputy Director, PTAC. Mr. Manzano is based in GOED's Las Vegas PTAC office.

AMERICAN OVERSIGHT

Director Anderson welcomed Mr. Derek Armstrong as GOED's new southern Deputy Director. Mr. Armstrong is based in GOED's Las Vegas office.

Director Anderson noted Mr. Armstrong would be providing a brief overview of the Opportunity Zones Program. Mr. Armstrong advised Opportunity Zones were a new community development program established by Congress in the Tax Cuts and Jobs Act of 2017 to encourage long-term investments in low-income urban and rural communities nationwide. The Opportunity Zones Program provided a tax incentive for investors to re-invest their unrealized capital gains into Opportunity Zones designated by the chief executives of every U.S. state and territory. The program afforded Governor Sandoval the ability to nominate up to 61 census tracts in Nevada to be part of an Opportunity Zone. These census tracts must meet certain criteria in order to be eligible.

GOED, along the Nevada Department of Business & Industry (BI), had undertaken significant work to set a baseline and reach out to local municipalities to identify opportunities and critical needs. Mr Armstrong and GOED's Northern Deputy Director Mr. Hunt had worked with local governments to identify priority Census Tracts for locals. Additionally, GOED was working with national partners such as the Economic Innovation Group to enable collaboration on a federal level.

10. **STATE OF NEVADA UNEMPLOYMENT RATE UPDATE** - as established by the Research and Analysis Division of the Nevada Department of Employment, Training and Rehabilitation

Governor Sandoval highlighted the positive progress the state had made in terms of its unemployment numbers.

11. PUBLIC COMMENT

Governor Sandoval asked if anyone from the public sought to make a comment. No Public comment was provided.

12. **ADJOURNMENT**

Governor Sandoval adjourned the March 15, 2018 meeting.

Updating the U.S. Budget Outlook
March 2, 2018

Read the paper.

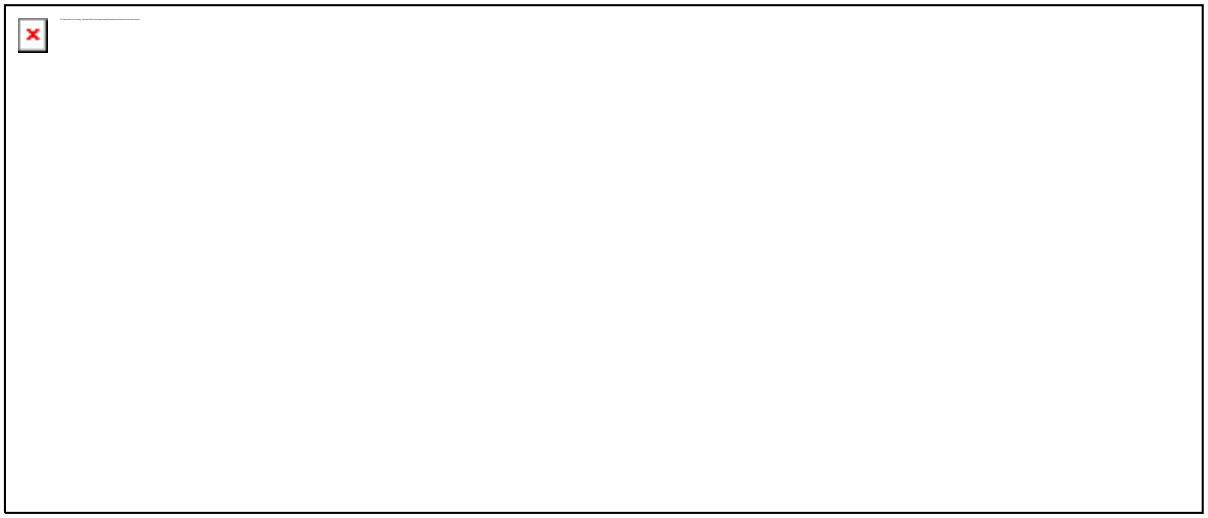
The national debt is currently higher than at any time in history outside of World War II and the years immediately after, ar unsustainably. Moreover, recent tax and spending legislation have made a bad situation even worse.

Because of the rapid pace of legislative change, the Congressional Budget Office (CBO) has not had the opportunity to up since June 2017. In this paper, we construct our own rough budget projections based on CBO's methods.

Our projections show that under current law, **trillion-dollar deficits will return permanently by next year** and **debt will economy within a decade**. Under potentially more realistic policy assumptions, the country will be facing a **$2.4 trillion d percent of Gross Domestic Product (GDP)** by 2028. These projections show a fiscal situation that is clearly unsustainab

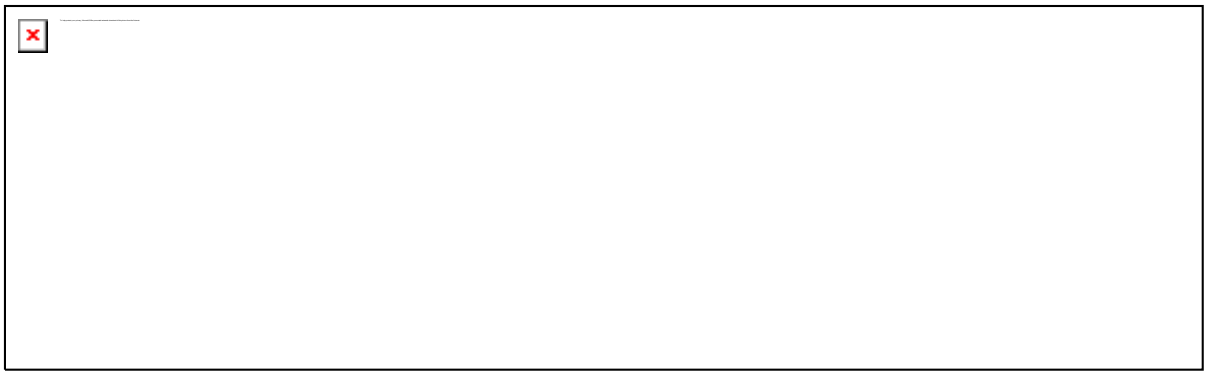
In this paper, we show:

- Legislation passed since June 2017 will add roughly $2.4 trillion to the baseline debt through 2028; continuing vari will add another $3.6 trillion to the debt.
- Under our baseline projection, debt will rise from 76 percent of GDP ($14.7 trillion) at the end of 2017 to **101 perce trillion)** by 2028. Previously, projections suggested debt would reach 93 percent ($27 trillion).
- Our baseline projections also show deficits rising from $665 billion in 2017 to **$1.1 trillion** by 2019 and **$1.7 trillio** projections showed trillion-dollar deficits returning in 2022 and a $1.5 trillion deficit in 2028. As a percent of GDP, t 3.5 percent in 2017 to 5.3 percent in 2019 and 5.7 percent by 2028. It was previously expected to reach 3.3 and 5 those years.
- Debt and deficits would be much worse if temporary spending increases and tax cuts are made permanent. Under scenario, debt will reach **113 percent of GDP ($33 trillion)** by 2028, and the deficit will total $2.4 trillion (8.2 perce
- Spending under our baseline projections will rise from 20.8 percent of GDP in 2017 to 24.3 percent by 2028 (25.3 alternative scenario), the second highest level in modern history. Revenue will remain between 16 and 18 percent tax cuts expire (and beyond that under our alternative scenario), which is unusually low for a healthy economy.



While our specific projections are uncertain, they make clear that the country faces an unsustainable fiscal situation that h deteriorated in the last year.

AMERICAN OVERSIGHT

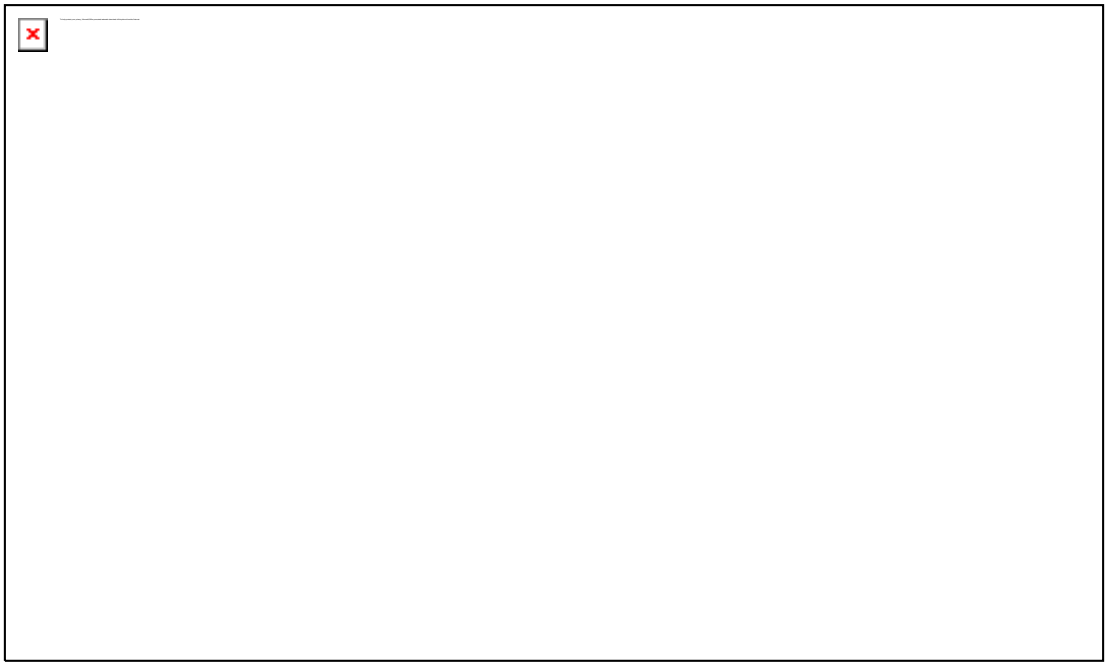


Constructing Our Updated Projections

Much has happened since June 2017. Our projections begin with CBO's prior baseline and incorporate the effects of recer administrative changes – most significantly the Tax Cuts and Jobs Act (TCJA) and the Bipartisan Budget Act of 2018 (BBA attempted to adjust GDP projections and economic feedback based on new legislation. Importantly, our estimates do not a other economic or technical changes that are likely to further impact baseline projections.

In June 2017, CBO projected debt would reach $25.5 trillion or 91 percent of GDP by 2027, which suggests debt of about percent of GDP by 2028. We estimate that legislative and administrative changes since June will increase debt in 2028 by percent of GDP by 2028, for a total of $29.4 trillion or 101 percent of GDP.

We estimate debt would grow by an additional $3.6 trillion if various expiring policies were extended. Under that alternative reach $33 trillion and 113 percent of GDP by 2028.



Deficit Projections

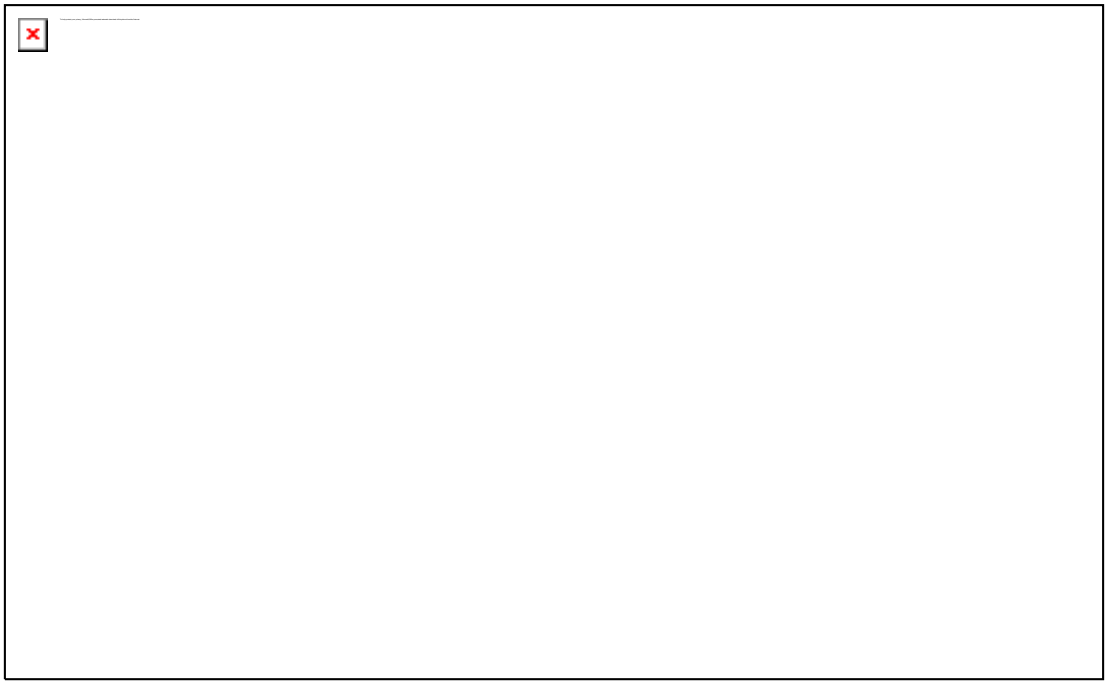
Under current law, we expect the permanent return of trillion-dollar deficits next year. Specifically, we expect deficits to rise billion to more than $1.1 trillion in fiscal year 2019 and to $1.7 trillion by 2028. As a share of GDP, we project the deficit to percent of GDP in 2017 to 5.3 percent in 2019 and to 5.7 percent by 2028.

These deficits are significantly worse than those in CBO's June projections, which saw trillion-dollar deficits returning in 20 percentage point of GDP lower, on average, throughout the budget window.

AMERICAN OVERSIGHT

Under our alternative scenario, deficits would grow even higher, reaching **$2.4 trillion** or **8.2 percent of GDP** by 2028. De
reached that percent of GDP three times since World War II – all during the Great Recession.

Debt Projections



Rising deficits will put pressure on today's post-war record levels of debt. Previously, CBO projected debt to rise from 76 p
trillion) in 2017 to 91 percent ($25.5 trillion) in 2027, which would have meant debt of roughly 93 percent of GDP by 2028.

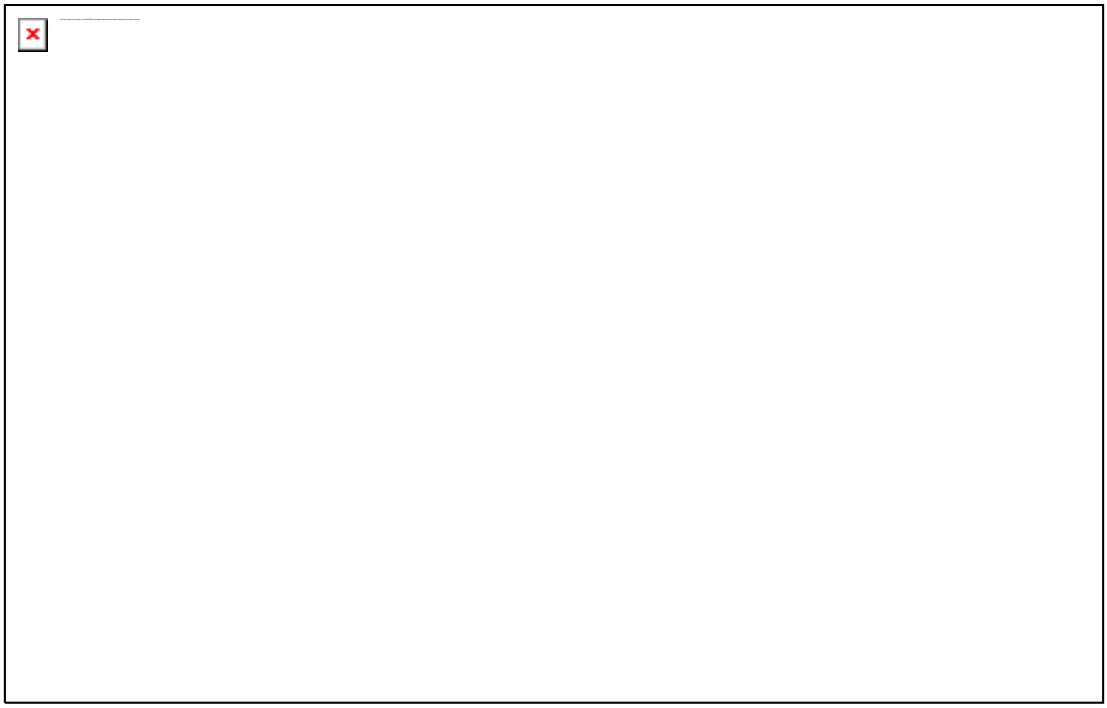
Under our updated baseline projections, debt will exceed the size of the economy within a decade, growing by nearly $15
of GDP ($29.4 trillion) by 2028. This is within 5 percentage points of the all-time record set in 1946 just after World War II
any other peacetime level of debt.

Under our alternative scenario, debt will exceed its historic record by 2027 and reach **113 percent of GDP** ($33 trillion) by
have not yet run long-term projections, debt would likely continue to grow rapidly beyond 2028 and could be twice the size
about 25 years.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006590

While our high and rising debt was already on an unsustainable path a year ago, our updated projections show substantia
since then and suggest the country is approaching uncharted territory. These high levels of debt will most likely crowd out
slow wage growth, and could increase the likelihood of an eventual fiscal crisis.



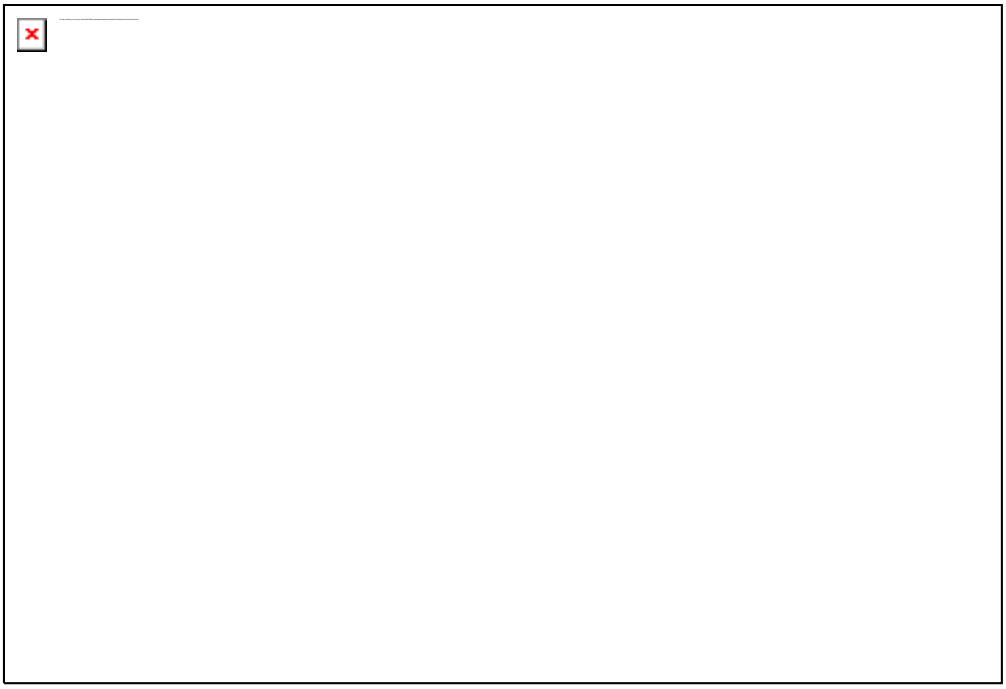
Spending and Revenue Projections

Recent legislation has significantly changed spending and revenue levels over the next decade, especially in the near ter
these changes have widened the gap between spending and revenue compared to CBO's June baseline.

We project revenue will fall in the next few years but eventually recover to prior-law levels as much of the recent tax bill ex
estimate that as the tax law takes effect, revenue will drop from 17.3 percent of GDP in 2017 to 16.4 percent in 2019 – low
been in the last 50 years other than in the aftermath of the last two recessions. We project revenue will remain below 2017
that, revenue will rise rapidly as a result of various expirations and future tax increases in the bill, reaching 18.5 percent of
these expirations, we project revenue will remain below 17.3 percent of GDP through the entire budget window.

Meanwhile, spending is projected to rise rapidly. We estimate that spending will jump from 20.8 percent of GDP in 2017 to
in part because of the budget deal's near-term increase in discretionary spending. Spending will then gradually rise to 24.3
2028, the second-highest level as a share of GDP since World War II. Under our alternative scenario, spending will reach
2028, which would represent a new post-war record.

AMERICAN OVERSIGHT



While the near-term spending increase is largely due to increased discretionary spending in the Bipartisan Budget Act, tha
disappears under current law. Long-term spending growth is driven largely by the rising costs of Social Security, health ca
debt. Even under prior law, outlays would have totaled about 23.7 percent of GDP by 2028.

In fact, under our current law projections, Social Security and health care spending will rise from 10.2 percent of GDP in 2
GDP by 2028, while discretionary spending will fall from 6.3 to 5.5 percent (under our alternative scenario, it will fall only s

Perhaps more troubling, rising debt and interest rates means that interest costs will be the fastest growing part of the budg
we project interest will grow from $263 billion (1.4 percent of GDP) in 2017 to $965 billion (3.3 percent of GDP) by 2028, a
be 14 percent of the budget. Under our alternative scenario, interest costs will exceed $1 trillion (3.6 percent of GDP), and
more on interest than defense or Medicaid.

AMERICAN OVERSIGHT

Conclusion

Much has changed since CBO last published its budget and economic projections in June of last year, but much has also remains at post-war record high levels, structural deficits remain large, and entitlement programs are slated to grow at an the population continues to age.

Yet legislation enacted since June 2017 has turned a dismal fiscal situation into a dire one. Revenue is lower, spending is larger, and the national debt is rapidly headed toward a new record. To make matters worse, the pressure for policymaker deficits through various policy extensions has intensified.

Importantly, these projections also do not supplant the need for CBO's thorough budget outlook scheduled to be released much more rigorous analysis than we are able to with access to crucial data and sophisticated modeling. We merely seek conversation until CBO has a chance to release its full report.

A year ago, paying for new legislation and securing the solvency of various trust funds would have been sufficient to preve rapidly as a share of GDP. Unfortunately, lawmakers chose instead to ignore impending trust fund insolvencies and charg cuts and spending hikes to the national credit card.

The complete disregard for budgetary constraints that lawmakers have shown in the past year – and in the past few years have largely undone the progress made on deficits earlier in the decade.

As a result, an aggressive combination of spending reductions, revenue increases, and entitlement reform will be needed. will quickly re-focus on deficit reduction to prevent debt from reaching unprecedented levels.

Read the paper.

State Leaders and Staff,

Below is a summary of actions President Trump and his Administration have taken in the State-Federal world this past week.

CNBC "The Us Economy Grew At A 3.5% Pace In The Third Quarter, Faster Than Expected"
"The U.S. economy grew at a faster-than-expected rate in the third quarter as inflation was kept in check and consumer spending surged, according to data released by the Commerce Department on Friday." Read the full article here. Additionally, President Trump's policies are delivering record-breaking economic results for African American (fact sheet here).

Unprecedented Outreach to State and Local Leaders
Tuesday – President Trump hosted state and local leaders from Alaska, California, and Hawaii. President Trump said, "Since I first took office, my Administration has made it a priority to invite County Commissioners from across the United States to the White House…I'm pleased to say that more than 3,700 local officials from all 50 States have now participated in a White House State Leadership Conference." See more of what state and local leaders are saying about the unprecedented outreach here.

Proposal to Help Small Businesses Strengthen Retirement Security for Millions of American Workers
Monday – DOL announced a Notice of Proposed Rulemaking (NPRM) to help small businesses strengthen retirement security in America. The proposed rule would make it easier for small businesses to offer retirement savings plans to their workers through Association Retirement Plans, which would allow small businesses to band together to offer 401(k) plans to their employees. More information here. You can find the NPRM here.

America's Water Infrastructure Act

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006596

Tuesday – President Trump signed S. 3021 (America's Water Infrastructure Act of 2018) in the Oval Office. The act provides for the conversation and development of water and related resources, and to provide for water pollution control activities. More information here.

State Relief and Empowerment Waivers
Tuesday – CMS and Treasury issued new guidance so states can move their insurance markets away from the one-size-fits-all rules and regulations imposed by the Affordable Care Act (ACA) and increase choice and competition within their insurance markets. More information here.

Proposal to Expand Access to Quality, Affordable Health Coverage
Tuesday – Treasury, HHS, and DOL issued a proposed regulation that expands the usability of health reimbursement arrangements (HRAs). Find more information here. You can find the NPRM here.

Combatting Opioid Epidemic
Wednesday – President Trumped hosted *A Year of Historic Progress and Action to Combat the Opioid Crisis* at the White House joined by several state and local leaders where President Trump signed H.R. 6 (SUPPORT for Patients and Communities Act) into law and announced privates sector initiatives to combat the opioid crisis. Check out the Fact Sheet, What They Are Saying, and ONDCP Statement here. Additionally, Senior Counselor to the President Kellyanne Conway wrote an Op-Ed titled, "We Can Bring the Opioid Crisis to an End" – Read the full op-ed here.

Lowering Drug Prices for American Patients and Saving Taxpayer Dollars by Confronting Global Freeloading
Thursday – President Trump spoke at Health and Human Services about prescription drug prices. You can find the fact sheet on the President lowering drug prices for American patients here and the CEA report on FDA reforms and reduced biopharmaceutical drug prices here. HHS APSE also released a report here.

Ivanka Trump's Affordable Childcare Visit to Lynn Meadows Discovery Center
Thursday – Advisor to the President Ivanka Trump visited the Lynn Meadows Discovery Center in Gulfport, Mississippi, and participated in a tour of exhibits offered at the center, followed by a roundtable discussion with Lynn Meadows Discovery Center leadership, elected officials, childcare experts, and area academic and business leaders. More information here.

Presidential Memorandum on Developing a Sustainable Spectrum Strategy for America's Future
Thursday – The President signed a Presidential Memorandum on developing a sustainable spectrum strategy for America's future. Find the full Presidential Memorandum here.

ICYMI – Opportunity Zones Proposed Regulations
Last Friday – Treasury and IRS announced proposed regulations on opportunity zones designed to incentivize investment in American communities. More details here. Find the proposed regulations here. View the guidance here. Instructions for Form 8996 (Qualified Opportunity Fund) can be found here.

NATIONAL PRESCRIPTION DRUG TAKE BACK DAY

OCTOBER 27, 2018

Visit takebackday.dea.gov to find a safe collection site

AMERICAN OVERSIGHT

DEA NATIONAL Rx TAKE BACK

Drug Enforcement Administration

National Prescription Drug Take Back Day

The National Prescription Drug Take Back Day addresses a crucial public safety and public health issue. According to the 2016 National Survey on Drug Use and Health, 6.2 million Americans misuse controlled prescription drugs. The study shows that the majority of misused prescription drugs were obtained from family and friends, often from the home medicine cabinet.

The DEA's Take Back Day events provide an opportunity for Americans to prevent drug addiction and overdose deaths.

Law Enforcement Participation

To participate, a new law enforcement partner will need to locate their Drug Enforcement Administration National Prescription Take Back point of contact by using the following link: https://www.deadiversion.usdoj.gov/drug_disposal/takeback/poc.htm.

The LE partner will need to reach out to their DEA POC and obtain a NTBI database username and password, to access the following link: https://www.deadiversion.usdoj.gov/NTBI.

Once logged in to the NTBI database, select "New Registration," and submit the required information.

After completing the initial registration, and upon acceptance by DEA, the LE partner will receive a separate email that contains their "Participant ID."

The LE partner will be required to log back into the NTBI system using the same username and password and enter their "Participant ID." The LE partner will then register each of their proposed NTBI sites. An approved LE partner must maintain at least one active NTBI site in the database.

Once the law enforcement agency has successfully registered their Take Back sites, DEA will provide the partner law enforcement agency with the appropriate Take Back Day supplies (collection boxes, collection bags, sealing tape, and advertising posters). The DEA will also provide partner law enforcement agencies with guidance regarding advertising and the use of social media.

Saturday, October 27

THE WHITE HOUSE

National Prescription Drug Take Back Day

Digital Toolkit

Background

Twice a year, the Drug Enforcement Administration (DEA) proclaims a national day to ask all Americans to safely dispose of unused medication. Many businesses, medical offices, and first responders are hosting take back events to safely dispose of unused medication. National Take Back Day happens twice a year; at the last National Take Back Day, Americans collected a record-breaking 900,000 pounds of prescription drugs, more than the weight of three Boeing 757s.

AMERICAN OVERSIGHT

Take Back Day – October 27th

- On Saturday, October 27th police stations, retail pharmacies, and community centers will be hosting prescription drug take back events at over 4,000 locations.
- To find a location near you, visit **TakeBackDay.DEA.gov.**
- Go to your medicine cabinet and check for any unused or expired medications, including opioids.
- Opioids go by many names, including Vicodin, Oxycontin, Percocet, Opana, tramadol, morphine, Kadian, and Avinz.

Unused Perscription Drugs Could Be a Danger for Friends or Family

- Everyone knows old leftovers in your refrigerator can make you sick. But leftover drugs in your medicine cabinet can be much more harmful—they can kill.
- America has tons of leftover prescription opioids: the vast majority of people do not use all the pills they are prescribed.
    - A 2017 study found that up to 92 percent of patients prescribed opioids did not use their full prescription.[1]
- Every day, 47 people die from overdoses involving prescription opioids. Just because something is prescribed, doesn't mean it is safe for all purposes.[2]
- Each year, more than 11 million Americans abuse or misuse prescription pain medicines.
    - The majority of these cases come from taking drugs from a family or friend's prescription in their own medicine cabinet.
- Misusing opioids is a proven route toward becoming addicted to heroin.
    - Nearly 80 percent of Americans recent heroin initiates reported misusing prescription opioids first.[3]
- Many people do not know they have been prescribed an opioid:
    - Vicodin, Oxycontin, Percocet, Opana, tramadol, and morphine such as Kadian and Avinza are all opioids.[4]
- Senior citizens are especially likely to keep unused pills. A grandparent's medicine cabinet is an easy place for teenagers, or other loved ones, to fuel their addiction. Check your own cabinet first and encourage loved ones to clean out their unused medications too.
- Unused medicine is a threat to the lives of children, seniors, and pets. Accidental drug misuse sends thousands of Americans to the emergency room each year. If you don't need it, safely dispose of your left-over drugs for your family's safety.

AMERICAN OVERSIGHT

How to Get Rid of Unused Prescription Drugs

- On Take Back Day, unneeded medication can be dropped off at any one of the thousands of disposal dropoff sites.
    - A tool to locate your nearest collection site is available at: https://takebackday.dea.gov

- Year round, you can drop off unneeded prescription drugs at participating police and sheriff departments and retail pharmacies or use a safe disposal kit to deactivate the drug.
    - Some retail pharmacies, such as Walgreens and Walmart, offer drug-disposal programs on site.
    - A number of other retail pharmacies, such as Costco, CVS, or Rite Aid, sell postage-paid envelopes for customers to mail any prescriptions.
    - Free safe disposal mail-in envelopes are offered by the National Safety Council at NSC.org/TakeBack..

- On National Take Back Day (Saturday, October 27, 2018), the DEA, in partnership with Federal, State, local, and tribal law enforcement, businesses, medical offices, Federal agencies, and first responders will host events to collect and safely dispose of unneeded medication.
    - National Take Back Day happens twice per year.
- Each Take Back Day, thousands of pounds of prescription drugs are disposed, helping to prevent incidents of drug abuse and misuse across the Nation.
    - According to the DEA, results from the October 2017 National Take Back Day show:
        - 4,274 law enforcement partners participated
        - There were 5,321 collection sites
        - 912,305 pounds of prescription drugs were collected (more than the weight of three Boeing 757 airplanes)

SOCIAL MEDIA

- Oct. 27 is Prescription Drug #TakeBackDay . Check your medicine cabinet for unused or expired prescription drugs and visit https://takebackday.dea.gov to find a safe disposal spot near you.

- There are over 4,000 locations where you can safely drop off your unused or expired prescription drugs. Visit https://takebackday.dea.gov to find your nearest location.

- Mark your calendars! On Saturday, Oct. 27, over 4,000 police stations, pharmacies and community centers will be hosting prescription drug #TakeBackDay locations. Visit https://takebackday.dea.gov to plan your drop off.

- Protect your family and friends. Get rid of your unused prescription drugs on #TakeBackDay on April 28. Visit https://takebackday.dea.gov/ to learn more.

- Do you know how to dispose of prescription drugs safely? Visit https://takebackday.dea.gov/ to learn more.

- Nearly 80% of America's new heroin users report misusing prescription opioids first. Don't let unused pills become the first step down a deadly path for yourself or someone you love. Find a disposal site at https://takebackday.dea.gov/ #TakeBackday

- Opioids have many names. Check your medicine cabinet for unused Vicodin, Oxycontin, Percocet, Opana, Kadian, or Avinza and take them to a #TakeBackDay safe disposal site on April 28.

- 47 people die every day from overdoses involving prescription opioids. Protect your family and friends. Find a disposal site at https://takebackday.dea.gov/ #TakeBackDay

Governors in Washington in February – WGA Events

AMERICAN OVERSIGHT

There are several events for WGA in late February when Governors will be in Washington, DC, for the NGA Meeting. WGA will be holding a coordination call for SAC next Thursday (Feb. 15) at 2 p.m. See calendar below for call-in information.

- **Feb. 25 – Western Governors and Cabinet Officials Breakfast** – Western Governors will have a breakfast meeting with cabinet officials on Sunday, Feb. 25, from 7-9 a.m. ET. Scott Pruitt, Administrator of the Environmental Protection Agency, will host the event at EPA's headquarters in Washington, D.C. See updated agenda attached.

  Action Item**:** Please RVSP for your Governor and any attending staff through Toni Vigil *(tvigil@westgov.org).*

- **Feb. 27 – Speaker's Intergovernmental Taskforce / House Oversight Committee Joint Hearing: *Federalism Implications of Treating States as Stakeholders*** – Several Western Governors (Herbert, Otter and Martinez so far) will be featured in a joint hearing to be held on Feb. 27 by the Speaker's Bipartisan Intergovernmental Taskforce and the House Oversight Committee. The focus will be on the federalism implications of treating states as stakeholders. The hearing will be at 10 a.m. (2154 Rayburn H.O.B.)

  Action Item: If your Governor is interested in joining his/her colleagues in this opportunity, please let Jim know asap (jogsbury@westgov.org)

- **Feb. 27 – WGA-Led State & Local Government Associations Summit** – WGA has organized the upcoming State & Local Government Associations Summit, to be held Feb. 27 (8:30 a.m. – 4 p.m. ET) at the Pew Center, 901 E St., NW, Washington, DC. The event will feature discussions with officials from the White House, OMB and various federal agencies regarding how to realign the state-federal relationship. See agenda attached. This is designed as a small-room discussion, so seating is limited.

  Action Item: WGA is holding a small number of seats and can accommodate up to 8 more SAC members. Those seats will be allocated on a first-come-first-served basis. Contact Toni (tvigil@westgov.org) for RSVP availability.

- **Feb. 27 – WGA WDC Reception –** WGA will be hosting a reception on the evening of Feb. 27, from 5:30-7 p.m. at the Capitol View Conference Center, located on the 9th floor of 101 Constitution Ave., NW, Washington, DC. We would be delighted to have your Governor and staff attend**.**

  Action Item: Please RSVP to Toni *(tvigil@westgov.org)*

WGA Congressional Priorities

Attached is a draft copy of WGA's FY19 congressional priorities. These are compiled primarily from WGA policy resolutions and previous appropriations priorities and will guide WGA's legislative efforts and communications with Congress during the 2018 calendar year and federal FY19 appropriations process.

Action Requested: Please read the document; if there are items that should be added to or removed from this list, or items requiring modification, let Troy know by COB Thursday, Feb. 15.

WGA Staff: Troy Timmons (ttimmons@westgov.org)

RESOLUTIONS

Thanks to the many SAC members who participated in Thursday's SAC call discussion regarding our upcoming resolution cycle. Based on your feedback, we are expecting a robust set of resolutions to advance. See the initial status sheet attached. A couple of data points:

- You will find attached Word versions of several current resolutions. Based on the SAC conversation yesterday, these are being forwarded for your input. We look forward to early input on:
  - Enhanced Oil Recovery
  - Water Resource Management in the West
  - Water Quality in the West
  - National Minerals Policy

- The Energy Work Group will begin its weekly calls again on Thursday, Feb. 22. They will be working through the "Energy Vision" we expect to incorporate as an amendment to the current Energy in the West resolution. If you aren't already part of that group and wish to join, note the calendar details below.

- Take a look at the attached CERCLA backgrounder. Per SAC discussion on Thursday, we will be bringing this topic back for your consideration on our next SAC call on Feb. 22.

WGA Staff: Holly Propst (hpropst@westgov.org)

INITIATIVES

Workforce Development Initiative

- **Register for Feb. 15 Webinar** – WGA will hold a webinar on *Strategies to Expand Youth Apprenticeship* this coming Thursday (Feb. 15) from 11 a.m.-12:30 p.m. MT. The webinar will examine successful state-led youth apprenticeship programs and how they can be expanded. Registration is open. Please share with all who may be interested.

  This is the first webinar in a series that will build on major themes and issues in workforce development identified during the workshops.
  - March 8 – *Moving Toward Career Readiness Goals* - register
  - March 21 – *Rural Workforce Development Challenges* - register
  - April 5 – *Policy for Innovation in Education and Training* - register

  Action Item: Please let Lauren know if you have suggestions for panelists or topic refinement.

WGA Staff: Lauren DeNinno (ldeninno@westgov.org)

National Forest and Rangeland Management

AMERICAN OVERSIGHT

- **Feb. 13 Water Quality Concerns Webinar –** The initiative will host a webinar this coming Tuesday, (Feb. 13) at 10 a.m. MT to examine water quality and land management practices. The webinar will look at pre- and post-wildfire practices that can promote water quality and ecosystem health; models for addressing forest health and water quality issues through public-private partnerships; and drivers for public-private investment in mitigation and restoration activities. Check out the panelists and register for the webinar here.

WGA Staff: Troy Timmons (ttimmons@westgov.org)

Species Conservation and ESA

- **Proposed WGA Letter to Senate EPW Regarding Draft ESA Legislation –** Attached please find a proposed WGA letter to the Senate Committee on Environment and Public Works on draft ESA legislation. Prior to the February 8 SAC comment deadline, Washington proposed minor clarifying edits to the letter that were accepted. The letter will now move onto signature approval.

- **Watch the Webinar – Pecos Watershed Conservation Initiative –** This week WGA hosted the latest in a series of webinars for the Species Conservation and ESA Initiative. The webinar was a case study examination of the Pecos Watershed Conservation Initiative, a collaborative and voluntary conservation project between industry, state and federal agencies in the Permian Basin of Texas and New Mexico that targets landscape-scale conservation strategies to proactively address species conservation water quality issues in the region.

  The webinar was well attended, with roughly 80 attendees calling in to hear the discussion, and a lively question and answer session followed the panelist presentations. A summary of the discussion will be available in next week's SAC email, but you can watch the webinar now.

WGA Staff: Zach Bodhane (zbodhane@westgov.org)

OTHER ACTION ITEMS

Draft WGA Letter: Support for Trade – WGA drafted the attached letter expressing support for international trade and emphasizing the importance of certainty and stability in international trade agreements. This letter was suggested by South Dakota following discussions with Secretary of Agriculture Sonny Perdue at WGA's Winter Meeting. As of the SAC call on Feb. 8, the required threshold of 13 states had approved sending this as a WGA letter. Washington provided redlines which were discussed on the call.

Action Item: The letter is closed for additional edits beyond the redlines in the attached draft. The question for SAC is whether to accept the WA-proffered edits. Please let us know by COB on Monday, Feb. 12, if you have problems with the revised language. Silence will be treated as assent to the redlines.

WGA Staff: Lauren DeNinno (ldeninno@westgov.org)

Draft WGA Letter: Letter RE: Water Transfers Rule – The attached draft letter to the Senate Committee on Environment and Public Works expresses Western Governors' support for the legislative codification of EPA's Water Transfer Rule (Rule). The Rule exempts water transfers (*i.e.*, conveyances between water bodies without intervening industrial, municipal, or commercial use) from NPDES permitting requirements under the Clean Water Act (CWA). EPA has exempted such transfers since the CWA's enactment in 1972.

AMERICAN OVERSIGHT

WGA Policy Resolution 2017-04, Water Quality in the West, expressly supports the Rule. Additionally, WGA issued a letter to EPA Administrator Gina McCarthy, urging EPA to appeal the U.S. District Court for the Southern District of New York's decision in *Catskill Mountains Chapter of Trout Unlimited, Inc. v. EPA*, which had struck down the Rule as an unreasonable interpretation of the CWA. EPA successfully defended the Rule on appeal. The case, however, is now being petitioned to the U.S. Supreme Court. A legislative solution would ensure the Rule's durability to similar challenges and protect western states from superfluous regulatory requirements and substantial financial obligations.

Action Item: Please send any feedback on this letter to Ward by COB on Wednesday, Feb. 14.

WGA Staff: Ward Scott (wscott@westgov.org)

EPA Requests Comments Regarding Planned Revisions to SDWA Lead and Copper Rule – WGA staff, as well as representatives from several organizations of state and local officials, participated in a January 2018 federalism consultation with the EPA Office of Water to discuss long-term revisions to the Lead and Copper Rule (LCR) under the federal Safe Drinking Water Act. WGA staff has drafted a memo outlining the LCR and proposed revisions and is preparing strawman comments which will be circulated next week for SAC review. Comments must be received by EPA on or before March 8, 2018.

Action Item: Please review the attached memo and the questions posed by EPA to determine what substantive input should be included in any comments that WGA may submit as part of EPA's LCR federalism consultation. Please provide any feedback by COB on Tuesday, Feb. 13.

WGA Staff: Ward Scott (wscott@westgov.org)

HAPPENING ON THE HILL

- **Weekly Congressional Action Report –** Congress had another drama-filled week as the chambers struggled to find a way forward on budget issues. For a full wrap-up of this week's action, see the attached WGA Congressional Action Report.

  WGA Staff: Holly Propst (hpropst@westgov.org

- **Government Shutdown Short-lived –** The House, at about 5:30 this morning, approved a $320 billion budget agreement and continuing resolution for FY18 appropriations through March 23 (H.R. 1892). The House approved the stopgap by a 240-186 vote; the Senate had approved the bill earlier this morning by a 71-28 margin. President Trump signed the bill shortly after House passage, ending a federal government shutdown that had started at midnight EST. You can find bill language here, a summary of the measure here, and a summary of supplemental disaster funding provisions here.

  The package includes the Furthering Carbon Capture, Utilization, Technology, Underground Storage, and Reduced Emissions (FUTURE) Act, S. 1535. WGA submitted a letter in support of this bill on Aug. 3. It furthers the responsible use of enhanced oil recovery (EOR) using carbon dioxide (CO2) – an objective of the Governors

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006612

set forth in WGA Policy Resolution 2015-06, *Enhanced Oil Recovery* – by creating greater regulatory certainty for the Carbon Dioxide Sequestration Credit, created by Section 45Q of the Internal Revenue Code of 1986.

WGA will provide a more in-depth review of the bill in next week's Friday email. Notably not included in the budget agreement was language addressing the budgetary practice of "fire borrowing"; another window of opportunity to fix fire funding will open with the anticipated omnibus FY18 appropriations measure to be considered as the March 23 spending deadline nears.

WGA Staff: Troy Timmons (ttimmons@westgov.org)

- **House Passes WAPA Transparency Act --** On Feb. 7, the House passed a bipartisan bill (H.R. 2371) that requires the Western Area Power Administration (WAPA) to establish a pilot project during which WAPA must publish information about its costs and rates from 2008 to present, as well as annually thereafter for seven years, on a publicly available website.

  WGA Staff: Britta Beckstead (bbeckstead@westgov.org)

IN THE EXECUTIVE BRANCH

Opportunity Zones Guidance Released

The Department of the Treasury and Internal Revenue Service released guidance yesterday for Governors on the procedure for designating population census tracts as Qualified Opportunity Zones under H.R. 1, the Tax Cuts and Jobs Act (Sec. 13823 of P.L. 115-97). Section 13823 contains the Investing in Opportunity Act, designed to spur investment and create new business opportunities in economically distressed communities. Governors are required by the statute to nominate population census tracts for designation as qualified opportunity zones by March 22, 2018 and may request a 30-day extension of that deadline.

Fiscal Year 2019 Congressional Priorities

This document outlines Western Governors' priorities for congressional action through the FY2019 appropriations process and 2018 legislative year. It is comprised of positions adopted by Western Governors in their policy resolutions, recommendations adopted through the WGA initiative process, and other positions adopted by the Governors. It is organized by the committees of jurisdiction in the House and Senate; in cases where provisions may have multiple committees of jurisdiction, items may be duplicated.

Proposed Legislative Action	Governors' Policy
Multiple Committees	
Cooperating Agency Better define "cooperating agency" under NEPA processes.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship Letter: Governors Request Involvement in Council on Environmental Quality Environmental Reviews Comments: Western Governors' Recommendations to Improve Forest Service NEPA Process
Settlement Negotiations Where their roles and responsibilities are impacted, states should be meaningfully consulted during settlement negotiations, including negotiations aimed at avoiding, rather than resolving, litigation. Provide notice to affected Governors' offices and give co-regulating states opportunities to participate in the proceedings. Where legally permissible, that right should extend to federal agencies' settlement negotiations impacting state environmental and natural resource management prerogatives.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship
Cost/Benefit Analyses Seek mandatory use of a refined model for federal land management agencies' economic impact and cost/benefit analyses designed in conjunction with affected states and counties.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship

DRAFT

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006618

Proposed Legislative Action	Governors' Policy
Streamlining Coordinate, streamline, and increase the flexibility of infrastructure planning and permitting guidelines, rules, and policies to: (i) allow for timely decision-making in the design, financing, and construction of needed infrastructure; (ii) account for regional differences; (iii) balance economic and environmental considerations; and (iv) minimize costs.	WGA Policy Resolution 2015-08, Water Resource Management in the West WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship
Preemption Require agencies to develop step-by-step internal guidelines on compliance with the preemption provisions of Executive Order 13123. Require internal oversight procedure by which agency scrutinizes potential preemptions of state authority. Improve preemption and federalism review requirements in OIRA's "A-4 Circular" checklist.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship Letter: Concerns about Provisions in the Hydropower Policy Modernization Act of 2017
Consultation Seek opportunities for more meaningful consultation through: agency-specific processes, Executive Branch cross-cutting regulatory efforts, administrative reorganization, and Congressional regulatory reform. Consult with states on a regular basis: as a predicate to federal action; through the pre-publication stage of rulemaking; after publication and before adoption of rules and regulations; and on an ongoing basis throughout implementation. Clarify definitions in key enabling statutes to better define state-federal consultation.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship Letter to Agencies: Executive Order, "Enforcing the Regulatory Reform Agenda" Letter: Lack of Consultation on DOI Proposed Regional Office Boundaries
Executive Order 13132 Revise Executive Order 13132, *Federalism*. Clarify which federal actions trigger the state consultation requirements under Executive Order 13132, *Federalism*. Require agencies to share assumptions supporting federalism assessment impact analyses.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship Comments: Governors Submit Analysis and Recommendations Regarding WOTUS Letter: Concerns over Potential EPA CERLCA 108(b) Financial Assurance Requirements Comments I: CERCLA 108(b) Financial Assurance Rule for Hardrock Mining Industry

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Request a GAO analysis of how often federalism reviews occur in key agencies and what they include. Require OMB/OIRA to update directions to agencies' "federalism official" designations and "consultation plans" regarding the identification of policies with federalism implications and ensuring meaningful and timely consultation with states. Make consultations plans and contact information for designated federalism officials publicly available.	
Federalism Office and Joint Select Committee Establish a permanent Joint Select Committee on Intergovernmental Relations and a federalism office in the executive branch - potential models include the ACIR and CEQ.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship
House / Senate Appropriations	
State Authority / State Wildlife Data Request that the Committee include the following language in its report on Interior Appropriations: "The Committee is concerned that the Department of Interior, its bureaus, and the U.S. Forest Service are not maximizing the opportunity to save funds and leverage states' on-the-ground wildlife expertise. State wildlife agencies often have the best available science on species and retain primary jurisdiction over most wildlife on Federal, State, and private lands. The federal government should recognize and fully utilize state resources, including scientific information about species population numbers, conservation status, and habitat availability, among other data. "The Committee directs the federal agencies to cooperatively engage with state wildlife agencies to ensure that federal agencies use state fish and wildlife data and analyses as a principal source to inform federal land use, land planning, and related natural resource decisions while respecting the limitations of state data privacy laws. The agencies should not duplicate analysis of raw data previously prepared by the states. Federal agencies should also provide their data to state wildlife managers to ensure that the most complete data is available to be incorporated into all decision support systems."	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship WGA Policy Resolution 2017-11, Species Conservation and the Endangered Species Act WGA Policy Resolution 2017-08, State Wildlife Science, Data and Analysis Appropriations Requests Testimony, FY 2015, 2016, 2017 and 2018

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
State Authority / ESA Request that the Committee include the following language in its report on Interior Appropriations: "The committee intends that states be allowed the option to request and be granted intervention as a matter of right in all administrative and judicial actions, not initiated by the state, which concern any of the provisions of the Endangered Species Act (ESA), except for the provisions dealing with prohibitions on international trade of banned substances. "The ESA is premised on a strong federal-state partnership. States should be provided the opportunity to be full partners in administering and implementing the ESA, as defined in Section 6(a) of the ESA: 'In carrying out the program authorized by the Act, the Secretary shall cooperate to the maximum extent practicable with the States.' State agencies often have the best available science and expertise. "The U.S. Fish and Wildlife Service (FWS) is directed: • To provide states a right of first refusal to be full partners in recovery planning and species management. The Secretary should be given authority to provide grants for any additional administrative costs to states for the development and/or administration of recovery plans. • To outline clear and quantifiable recovery goals in consultation with the affected state(s) at the time of an ESA listing decision. The agency should provide objective recovery criteria that both state and federal agencies may work toward accomplishing in the recovery process. In cases where quantification of recovery goals is not initially feasible, the FWS should be required to work with the affected state(s) to publish a plan, including a timetable, describing the steps the FWS will take in identifying measurable goals. Recovery goals should be reviewed and changed using an adaptive framework. The required objective criteria should include a clear articulation of the required population, population trends, or other relevant criteria, including amelioration of threats identified in the listing process. • To provide states a right of first refusal to be full partners in listing, critical habitat designations, recovery planning, and delisting decisions, particularly when modeling is used in analysis. When the FWS intends to rely on the precautionary principle or best professional judgement, particularly when coupled with the use of long-term modeling and forecasting, in place of current observational science and measurable impacts,	WGA Policy Resolution 2017-11, Species Conservation and the Endangered Species Act A-7: The ESA is premised on a strong federal-state partnership. But the Act and its implementation should seek to provide expanded and meaningful consultation opportunities for states to comment, participate, or perform before the federal government takes action under the ESA.

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
states should be a full partner in analyses, model development and consulted with prior to final decisions. The FWS should partner with states to establish consistent criteria to assess modeling uncertainty related to projected scientific information, such as climate change, in their scientific review."	
State Authority / CWA Request that the Committee include the following language in its report on Interior Appropriations: "The Committee directs federal agencies to engage in active and meaningful consultation with states regarding any new definitions of federal jurisdiction over state-managed resources such as water."	WGA Policy Resolution 2017-04, Water Quality in the West B-1: State Authority and Implementation of CWA B-1-a: CWA Jurisdiction
USFS / Groundwater Request that the Committee include the following language in its report on Interior Appropriations: "States have exclusive authority over the allocation and administration of rights to groundwater located within their borders and are primarily responsible for protecting, managing, and otherwise controlling the resource. The regulatory reach of federal government was not intended to, and should not, be applied to the management and protection of groundwater resources. No funds appropriated under this Act shall be used to develop a groundwater management strategy. Instead, the Committee urges agencies to recognize and respect state primacy and comply with current federal statutory authorities."	WGA Policy Resolution 2015-08, Water Resource Management in the West B-1: State Primacy in Water Management: As the preeminent authority on water management within their boundaries, states have the right to develop, use, control and distribute the surface water and groundwater located within their boundaries, subject to international treaties and interstate agreements and judicial decrees.
EPA Water Transfers Rule Request that the Committee include the following language in its report on Interior Appropriations: "The Environmental Protection Agency excludes water transfers that do not involve the addition of a pollutant from the permitting requirements of the Clean Water Act's National	WGA Policy Resolution 2015-08, Water Resource Management in the West B-1: State Primacy in Water Management: As the preeminent authority on water management within their boundaries, states have the right to develop, use, control and distribute the surface water and groundwater located within their

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Pollutant Discharge Elimination System (NPDES). States already have the authority to address water quality issues associated with transfers. Transporting water through constructed conveyances to supply beneficial uses should not trigger NPDES permit requirements simply because the source and receiving water contain different chemical concentrations and physical constituents. The Committee supports EPA's current water transfers rule, which exempts water transfers between waters of the United States from NPDES permitting requirements."	boundaries, subject to international treaties and interstate agreements and judicial decrees. WGA Policy Resolution 2017-04, Water Quality in the West B-2-c: Western Governors believe that transporting water through constructed conveyances to supply beneficial uses should not trigger NPDES permit requirements simply because the source and receiving water contain different chemical concentrations and physical constituents. Western Governors generally support EPA's current water transfers rule, which exempts water transfers between waters of the United States from NPDES permitting requirements
Corps of Engineers Water Supply Contracts Request that the Committee include the following language in its report on Energy and Water Development Appropriations: "The administration of water supply contracts by the U.S. Army Corps of Engineers should not have any negative effect on states' primary authority in the management, allocation, planning, and protection of water resources within their boundaries. These contracts supply water for agricultural, industrial and municipal uses across the United States. States' primary authority over water extends to all naturally-occurring waters, including those impounded in Corps reservoirs. The rights of states to access and appropriate such waters must not be precluded by any federal regulations, including the Surplus Waters Rule proposed by the Corps in December 2016. States often enjoy effective working relationships with local Corps staff in creating flexibility in response to current and future drought. Regional and national Corps staff must support local decisions. Congress should address any obstacles that hinder flexible water control operations."	WGA Policy Resolution 2015-08, Water Resource Management in the West B-1: State Primacy in Water Management: As the preeminent authority on water management within their boundaries, states have the right to develop, use, control and distribute the surface water and groundwater located within their boundaries, subject to international treaties and interstate agreements and judicial decrees.
Wild Horses and Burros Request that the Committee include the following language in its report on Interior Appropriations: "The Committee continues to believe that the horse and burro management program in its current state is unsustainable and the Committee cannot afford to allow this situation to	WGA Policy Resolution 2018-01, Wild Horse and Burro Management B-1: Current wild horse and burro population levels, the continued exponential growth of these populations, and the federal agencies' inability to meet direction for attaining AMLs presents an urgent concern for management policy and practice.

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
persist. The Committee believes that a process to establish, monitor and adjust Appropriate Management Levels (AMLs) for wild horses and burros that is transparent to stakeholders, supported by scientific information (including state data), and amenable to adaptation with new information and environmental and social change is integral to addressing both the long-term viability of wild horse and burro populations, and near-term concerns about the rangeland impacts of overpopulation. Accordingly, the Committee directs the Department to adjust its AML approach to be transparent, based on sound science and adaptable. "The Committee supports continued research to develop and refine a variety of fertility-control methods, including immunocontraceptives, which allow for self-sustaining populations of wild horses and burros while maintaining the genetic viability of the protected herds. The Committee recognizes that the Department has invested in such research but has been slow to employ on-the-ground use of methods supported by this effort. The Committee directs the Department to expedite its implementation of scientifically sound and humanely implemented fertility control methods for wild horses and burros."	B-2. [Governors] support thoughtful, appropriate and science-based management decisions for wild horse and burro management. In particular, we support management decisions that ensure populations are managed within AMLs in order to promote horse and burro herd health, species conservation and recovery, and habitat as well as forage vitality for wild and domestic species.
Quagga and Zebra Mussels Direct DOI to implement mandatory inspection and decontamination of all high-risk watercraft leaving waterbodies under their jurisdiction infested with quagga and zebra mussels, and provide DOI agencies with both the resources and statutory authority required to implement these actions.	WGA Policy Resolution 2016-05, Combating Invasive Species Letter: Western Governors Request Clarification on DOI Collaboration with States on Invasive Mussel Prevention Letter: Western Governors Request Collaboration with DOI on Invasive Mussels
USFS / Insect and Disease Designation Funding Request appropriate funding for USFS I&D projects in the Interior Appropriations bill.	WGA Policy Resolution 2017-10, National Forest and Rangeland Management A-16: The 2014 Farm Bill provided the Forest Service with several new tools to accelerate forest restoration. A Governor could nominate landscapes substantially affected or threatened by insects and disease to the Secretary of Agriculture for designation as Priority Areas for expedited NEPA and administrative process and judicial review. B-7: The 2014 Farm Bill authorities are significant expansions of Forest Service authority and are powerful new tools to boost forest management, promote collaboration, and limit

	the impacts of administrative objections and litigation. Western Governors encourage federal agencies to fully implement the tools provided in the 2014 Farm Bill.
SNOTEL Funding Request adequate funding for SNOTEL in the Interior Appropriations bill.	WGA Policy Resolution 2015-08, Water Resource Management in the West 4-A: Western States Need Reliable Water Resource Information: Basic information on the status, trends and projections of water resource availability is essential to sound water management. Basic Water Data: Western Governors support the U.S. Geological Survey's Cooperative Water Program and National Streamflow Information Program (NSIP), the Natural Resources Conservation Service's Snow Survey and Water Supply Forecasting Program, the National Oceanic and Atmospheric Administration's (NOAA) weather and hydrology-related data collection, monitoring, and drought information programs, and the National Aeronautics and Space Administration's National Land Imaging (Landsat) Program with its thermal infrared sensor. Western Governors support federal efforts to coordinate water data gathering and information programs across multiple agencies. Letter: Importance of Snow Survey and Water Supply Forecasting Program
PILT and SRS Funding Request full funding of PILT and SRS in the Interior Appropriations bill.	WGA Policy Resolution 2017-03, Tax-Exempt Federal Lands and Secure Rural Schools B-1: Western Governors believe that the federal government must honor its historic PILT agreement with states and counties in the West to compensate them for tax-exempt federal lands within their borders.
USDA Specialty Crops Funding	WGA Policy Resolution 2017-09, Western Agriculture

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Request adequate funding for the USDA Specialty Crop Block Grant Program (SCBGP) that provides critical research, education, and promotion tools to the fruit and vegetable producers in the Agriculture Appropriations bill.	
USDA Market Access and Foreign Market Development Funding Support funding for USDA Market Access and Foreign Market Development Programs to promote opportunities for western producers to increase export revenues and encourage trade agreements.	WGA Policy Resolution 2017-09, Western Agriculture
Federal Funding for Disaster Recovery Request adequate funding for federal disaster recovery and assistance programs.	WGA Policy Resolution 2018-03, Federal Disaster Recovery Assistance for Communities in the West B-2: Federal agencies conducting disaster recovery and assistance, as well as the programs which they administer, should receive adequate and consistent funding and flexibility to direct funds where they are most needed.
USDA NRCS Emergency Watershed Program Request adequate funding for USDA NRCS Emergency Watershed Protection Program.	WGA Policy Resolution 2018-03, Federal Disaster Recovery Assistance for Communities in the West B-3: Additionally, the historically-underfunded USDA NRCS Emergency Watershed Protection Program should be revisited and strengthened.
House / Senate Agriculture	
Cross-Boundary Projects Identify barriers to cross-boundary projects involving federal, state and private lands. Develop training on state and federal contracting procedures for cross-boundary projects and use Service First authorities. Establish multi-agency pilot projects, which can suggest models for subsequent formal agreements. Target funding from USFS, BLM, NRCS and state sources to address cross-boundary management goals in priority areas consistent with state plans.	National Forest and Rangeland Management Initiative June 2017 Special Report

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Codify and direct funding for the Joint Chiefs Landscape Restoration Program to facilitate continued partnership and investment between USFS and NRCS to support restoration projects where federal and private land ownership and management goals intersect.	
Grazing Improve flexibility and integration of grazing management and targeted grazing as tools to achieve restoration and land management goals.	WGA Policy Resolution 2018-02, Public Lands Grazing National Forest and Rangeland Management Initiative June 2017 Special Report
Funding Fully fund conservation title programs that provide technical and financial assistance for forest and rangeland management in partnership with private landowners. Take steps to provide greater flexibility in the deployment of conservation title programs to achieve restoration objectives.	National Forest and Rangeland Management Initiative June 2017 Special Report
Snow Survey and Weather Forecasting Work closely with states and other resource managers to improve predictive and adaptive capabilities for extreme weather variability and related impacts. Coordinate water data gathering and information programs across multiple agencies. Provide adequate funding for the NRCS Snow Survey and Water Supply Forecasting Program, as it provides states with vital data in their management of water resources.	WGA Policy Resolution 2015-08, Water Resource Management in the West Letter: Importance of Snow Survey and Water Supply Forecasting Program
Restoration Use authorities in the 2014 Farm Bill (Good Neighbor Authority and Stewardship Contracting Authority) to increase the pace and scale of forest management and restoration on BLM lands. Increase flexibility in the GNA program on road construction and reconstruction and create flexibility in allocations of program income to support GNA projects across larger geographies.	WGA Policy Resolution 2017-10, National Forest and Rangeland Management National Forest and Rangeland Management Initiative June 2017 Special Report Appropriations Requests Testimony 2016, 2017 and 2018 Letter: Governors' Support for Accelerated Implementation of Forest Management Projects

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Authorize the use of stewardship and GNA funds for recreation improvements and restoration planning and implementation. Expand the use of GNA agreements and other 2014 Farm Bill tools to achieve all-lands restoration objectives across federal, state, local government and privately-owned lands. Prioritize restoration activities across all ownerships to create resilient landscapes. Where programmatic agreements are already in place, use GNA agreements to address priority restoration needs. Explore the use of strike teams, interagency ESA consultation support, and other modular capacity to accelerate restoration in priority areas, including the expanded use of existing statutory authorities. Leverage the use of state, tribal, and local expertise and science in federal environmental review, consultation, and permitting. Collaborate with environmental regulators to reduce legislative and regulatory barriers to restoration activities.	
Wildfire Identify fuels management priorities in consultation with states to focus resources on greatest wildfire threats. Improve interagency communication, fire response capability, and coordination, including the sharing of firefighting resources between federal and state agencies. Ensure these activities support fire prevention, full suppression strategies and management of wildfire for resource benefits. Continue to seek opportunities, including revisions to forest plans, to enhance safety and reduce costs in suppression decisions while protecting communities. Facilitate the expanded use of prescribed fire.	WGA Policy Resolution 2017-10, National Forest and Rangeland Management WGA Policy Resolution 2017-09, Western Agriculture WGA Policy Resolution 2015-08, Water Resource Management in the West National Forest and Rangeland Management Initiative June 2017 Special Report Letter: State Collaboration in Addressing Rangeland Fire Risk Letter: Wildfire Funding Reform

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Incentivize local governments to take voluntary actions to support the creation and expansion of fire-adapted communities and resilience. Provide additional analyses to help communities evaluate the full costs of suppression in the wildland urban interface.	
Environmental Review Congress should direct federal agencies to build consistency in environmental analysis and bring agency practice in conducting EAs more in line with the administrative policy intent of streamlined, summary documents. Agency guidance should clarify significance thresholds and Extraordinary Circumstances language for NEPA based on best practices and provide, where possible, consistent approaches to interpreting these NEPA requirements when agencies and the courts have had conflicting interpretations. Implement NEPA streamlining efforts that promote best practices or procedural innovations, including the use of landscape-scale, programmatic, adaptive and iterative analyses. Support independent research and analysis from NGO, academic, and other partners to inform NEPA and ESA process improvements, including time and cost estimates for different project types. Develop metrics for successful outcomes, including cost and time performance indicators. Consider standardized approaches to environmental analysis to increase efficiency and reduce time to decision. Ensure agency NEPA implementation policy includes comprehensive training and accountability for field practitioners. Use information technology to improve the efficiency and transparency of NEPA and reduce redundant data, analysis and business practices. Build consistency in environmental analysis and bring agency practice in conducting EAs more in line with the administrative policy intent of streamlined, summary documents.	National Forest and Rangeland Management Initiative June 2017 Special Report

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Determine that EPA should never have identified classes of facilities within the hardrock mining industry for CERCLA 108(b) financial assurance regulation.	Comments I: CERCLA 108(b) Financial Assurance Rule for Hardrock Mining Industry
Good Samaritans and Abandoned Mines Protect volunteer remediating parties, including local and state government agencies, which conduct clean up, from becoming legally responsible under section 301(a) and section 402 of the CWA for any continuing discharges from the abandoned mine site after completion of a cleanup project. Consider legislative and administrative remedies to address potential CERCLA and RCRA liabilities. Support efforts to encourage public-private partnerships that would facilitate cleanups by Good Samaritans.	WGA Policy Resolution 2016-07, Cleaning Up Abandoned Mines in the West B-1: To add greater certainty, Western Governors call on Congress to amend the Clean Water Act to legally protect volunteering remediating parties, including local and state government agencies, which conduct authorized remediation from becoming legally responsible under section 301(a) and section 402 of the CWA for any continuing discharges from the abandoned mine site after completion of a cleanup project, provided that the remediating party -- or "Good Samaritan" -- does not otherwise have liability for that abandoned or inactive mine site. B-2: Legislative and administrative remedies to address potential CERCLA and RCRA liabilities should also be considered, as should liabilities associated with remining that deter the mining industry, likely the best suited industry in terms of equipment, technology and expertise, from improving conditions at abandoned mine sites. B-3: As the costs to clean up abandoned hardrock mines are significant, the Western Governors support efforts by Congress and the Administration to encourage public-private partnerships that would facilitate cleanups by Good Samaritans.
Clean Air Act Ensure that new rules are drafted and issued, where appropriate, in coordination with existing regulations, considering common elements and requirements. Provide states and local entities with adequate support and technical assistance to help them comply with regulations promulgated under the CAA.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship Letter: WGA Provides Western Perspective on Impacts of Wildfires on Air Quality Appropriations Requests Testimony, FY 2017 and 2018 Letter: Regarding CAA Final Exceptional Events Language Letter: Concern Over Pending Revision to Exceptional Events Rule, Given Reduced Ground-Level Ozone NAAQS

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Collaborate with states to identify priority areas and focus on programs that provide the greatest benefits to air quality. Adhere closely to the timelines in the CAA. Recognize and account for unique circumstances of individual states. Avoid one-size-fits-all rulemakings (exceptional events and ozone NAAQS examples). Complete and publish timely guidance for implementation of the 2015 revised NAAQs for ground-level ozone. Avoid duplication of state programs. Permit states to create programs tailored to individual state needs, industries, and economies. Engage states as co-regulators (e.g. with respect to methane emissions). Provide those states with delegated authority timely implementation guidance when new and revised regulations are published.	Comments: Proposed Reduction to Ground-Level Ozone NAAQS
Hydraulic Fracturing Regulation Recognize that the states, territories, and flag islands have regulated the practice of hydraulic fracturing for decades and redundant federal regulation is not required where sufficient state regulations exist. AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Expand use of authorities included in the 2014 Farm Bill to increase the pace and scale of forest management and restoration on western National Forests and adjacent non-federal lands. Authorize the use of stewardship and GNA funds for recreation improvements and restoration planning and implementation. Codify and fund the USFS State and Private Landscape Scale Restoration Competitive Grant program to prioritize work consistent with state forestry goals and action plans. Codify and direct funding for the Joint Chiefs Landscape Restoration Program. Modify employee relocation practices to optimize leadership development and longevity.	
State and Local Liaisons Invest in key state and federal liaison positions with decision-making authority to provide better engagement and understanding between state and federal forest, wildlife, and rangeland agencies. Facilitate the participation of local governments by dedicating staff to develop and provide technical assistance and enhance communications across local, tribal, state and federal partners.	National Forest and Rangeland Management Initiative June 2017 Special Report
Environmental Review Implement NEPA streamlining efforts that promote best practices or procedural innovations, including the use of landscape-scale, programmatic, adaptive and iterative analyses. Support independent research and analysis from NGO, academic, and other partners to inform NEPA and ESA process improvements. Develop metrics for successful outcomes, including cost and time performance indicators. Consider standardized approaches to environmental analysis to increase efficiency and reduce time to decision.	National Forest and Rangeland Management Initiative June 2017 Special Report

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Ensure agency NEPA implementation policy includes comprehensive training and accountability for field practitioners. Use information technology to improve the efficiency and transparency of NEPA and reduce redundant data, analysis and business practices. Build consistency in environmental analysis and bring agency practice in conducting EAs more in line with the administrative policy intent of streamlined, summary documents.	
Alternatives, Significance Thresholds, Extraordinary Circumstances, and Categorical Exclusions (CEs) Provide improved analytical tools no-action alternatives. Allow agencies to analyze only the action and no-action alternatives when a project is collaboratively developed, unless a third alternative is proposed and meets the purpose and need of the project. Clarify significance thresholds and Extraordinary Circumstances language for NEPA based on best practices and provide, where possible, consistent approaches to interpreting these NEPA requirements when agencies and the courts have had conflicting interpretations. Develop a new NEPA restoration CE that is based on decisions documented in a Decision Notice and Finding of No Significant Impact over the past five years where no significant impacts have occurred.	National Forest and Rangeland Management Initiative June 2017 Special Report
Streamlined Environmental Analysis Pilot Program Create a new pilot program to prioritize landscape-scale, streamlined environmental analysis for restoration projects envisioned over geographies greater than 100,000 acres (using either environmental assessments or environmental impact statements, depending on context and size of the project) in landscapes with demonstrated ecological and economic need and effective existing collaboration among diverse stakeholders. The analysis should be sufficient to allow for project-scale implementation and adaptive management, and should include the following elements:	WGA Policy Resolution 2017-09, Western Agriculture National Forest and Rangeland Management Initiative June 2017 Special Report

DRAFT

Proposed Legislative Action	Governors' Policy
• Site descriptions or land allocations that identify locations within the landscape in which specific restoration or maintenance treatments can be used appropriately; • Standards and guidelines consistent with the appropriate forest plan and project-level design criteria for projects; • Identification of the cumulative impacts of the project; and • Provisions allowing for the implementation of project-level actions barring the introduction of new information or unforeseen circumstances. Congress should consider creating a limited and short-term categorical exclusion (CE) under NEPA available to expedite work in these pilot landscapes while environmental analyses are being developed, available for use at the agency's discretion provided the analyses achieve defined progress milestones.	
Land Use Planning, USFS Forest Plans and BLM Resource Management Plans (RMPs) Enhance state-federal consultation regarding BLM's planning processes. Federal-state consultation should be substantive, take place on an early and ongoing basis, and involve both Governors and state regulators. RMPs should be developed and amended with meaningful and substantial input from governors and state regulators before they are released for public comment. Apply Governors' Consistency Reviews to ensure consistency of RMPs with state plans, policies, programs, and processes. Maintain the existing appeals process and timelines for Consistency Reviews and provide sufficient time for their completion. Ensure that the standard for consistency in the RMP process matches the requirement of FLPMA 1712(c)(9). Retain existing minimum public comment time frames and existing requirements for publication of a *Federal Register* notice at the start of every planning effort, as well as extend these publication requirements to Notices of Intent to prepare EAs as part of RMP amendments.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship National Forest and Rangeland Management Initiative June 2017 Special Report Letter: Lack of Consultation on DOI Proposed Regional Office Boundaries Letter: Governors Encourage Collaboration on BLM Planning and Environmental Review Letter: Governors Request Engagement with BLM on Land Use Planning and NEPA Processes Letter: Governors Concerned by Final BLM Planning 2.0 Rule Testimony: BLM Proposed Rule, Resource Management Planning Comments: BLM Proposed Rule, Resource Management Planning Letter: Request for Extension of Comment Period for BLM Proposed Rule, Resource Management Planning Letter: Request for Clarification on Aspects of BLM's Resource Management Planning (Planning 2.0) Initiative

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Resolve outstanding issues with potential requirements to reinitiate endangered species consultations following the adoption, amendment or revision of an appropriate management plan.	
Local Offices and Workforce Give BLM state office directors independent authority to respond to issues that are unique to individual states. Modify employee relocation practices to optimize leadership development and longevity.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship Letter: Lack of Consultation on DOI Proposed Regional Office Boundaries Letter: Governors Request Engagement with BLM on Land Use Planning and NEPA Processes
Mitigation Policy Develop mitigation requirements and processes that may affect state and private land in cooperation with the Governors in whose states DOI lands are situated. Clearly define and predictably implement mitigation requirements and processes so they can be incorporated in project planning. Revise BLM Mitigation Policy to better define key terms.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship Letter: Governors Request DOI Establish Preference for State-based Mitigation Programs Letter II: Reiterating Request for Clarification on Secretarial Order 3330 Letter I: Request for Clarification on Secretarial Order 3330
Royalties and Leasing Provide states a forum to advise DOI on federal mineral leasing royalty policy (such as through reestablishment of the Royalty Policy Committee). Support legislation, regulatory changes, and agency practices that provide transparency and certainty, ensure fair value for the American public, and more efficiently administer the sales and leases of the resources on these federal lands.	WGA Policy Resolution 2017-12, States' Share of Royalties and Leasing Revenues from Federal Lands and Minerals and States' Role in Associated Federal Policy
Grazing Promote grazing allotment flexibility on federal lands, within FWS and BLM permitting systems and across ownership boundaries, to respond to changing range conditions and environmental considerations.	WGA Policy Resolution 2018-02, Public Lands Grazing National Forest and Rangeland Management Initiative June 2017 Special Report

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Improve flexibility and integration of grazing management and targeted grazing as tools to achieve restoration and land management goals.	
Vegetation Management Apply clear, coordinated and consistent federal vegetation management practices to maintain the health of western forests, prevent dangerous and damaging fires, and maintain grid reliability. Enable utilities to take necessary vegetation management actions on or adjacent to federal transmission rights-of-way without fear of strict liability imposition.	WGA Policy Resolution 2017-10, National Forest and Rangeland WGA Policy Resolution 2016-06, Wildland Fire Management and Resilient Landscapes WGA Policy Resolution 2018-04, Energy in the West Letter: Support for Expedited Review of Reintroduced Electricity Reliability and Forest Protection Act Testimony: WGA Advocates for Responsible Vegetation Management for Electricity Assets on Federal Lands
State Authority / Energy Development Direct DOI, EPA and other federal agencies must work collaboratively with states when considering regulations that would affect development of oil, natural gas, coal, solar, wind, geothermal or other energy resources on federal land or Indian land. When a state is meeting the minimum requirements of a delegated program, the role of federal agencies should be limited to the provision of funding, technical assistance and research support. States should be free to develop implementation and enforcement approaches that make sense within their jurisdictions, without intervention by the federal government.	WGA Policy Resolution 2017-01, Building a Stronger State-Federal Relationship C-3-a: Each Executive department and agency should be required to have a clear and accountable process to provide each state – through its Governor as the top elected official of the state and other representatives of state and local governments as he or she may designate – with *early*, *meaningful* and *substantive* input in the development of regulatory policies that have federalism implications. This includes the development, prioritization and implementation of federal environmental statutes, policies, rules, programs, reviews, budgets and strategic planning.
State Authority / Vegetation Management Direct USFS and other federal land management agencies to work collaboratively with states to achieve effective and efficient cross-jurisdictional coordination that enables utilities to undertake necessary vegetation management actions on federal transmission rights-of-way – and to do so without fear of strict liability imposition for necessary vegetation management actions taken adjacent to transmission rights-of-way.	WGA Policy Resolution 2017-10, National Forest and Rangeland Management B-9: Western Governors believe clear, coordinated and consistent application of federal vegetation management practices is integral to maintaining the health of western forests, preventing dangerous and damaging fires, and maintaining grid reliability.
Enhanced Oil Recovery	WGA Policy Resolution 2015-06, Enhanced Oil Recovery

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
Direct federal agencies to promote development and deployment of CO2 capture and commoditization. States should be able to create programs tailored to individual state needs, industries and economies and recognize CO2 sequestration that results from EOR in meeting federal regulatory objectives. EPA should abide by principles already established by the Agency in its regulations promulgated to ensure the long-term storage of CO2 in different geologic formations.	B-3: In order to expand deployment of CO2 capture at power plants and other industrial sources, the President and Congress should enact federal incentives to increase CO2 supply available for the oil industry to purchase and use in EOR. Federal incentives have the potential to leverage private and state investment, harness the ingenuity of entrepreneurs and capitalize on billions of dollars' worth of DOE-sponsored research and development to enable new commercial carbon capture and pipeline projects
Financial Assurance Regulation EPA should be directed to work collaboratively and substantively with states to determine the necessity of financial assurance regulations for the hardrock mining; coal and petroleum products manufacturing; chemical manufacturing and electricity generation, transmission and distribution industries.	WGA Policy Resolution 2017-06, Financial Assurance Regulation B-3: Prior to determining whether to pursue CERCLA section 108(b) financial assurance regulations for any of the chemical manufacturing; petroleum and coal products manufacturing; or electric power generation, transmission and distribution industries, EPA should consult with Western Governors and state regulators regarding existing state regulations. EPA should take into account state data and expertise in development and analysis of underlying science that serves as the legal basis for federal regulatory action. B-4: In the event EPA opts to pursue financial assurance regulation of the chemical manufacturing industry; petroleum and coal products manufacturing industry; or electric power generation, transmission and distribution industry, it should enter substantive pre-publication consultation with Western Governors and state regulators to prevent duplication or preemption of existing state law. This should include substantive consultation with states during development of rules or decisions and a review by states of any proposal before a formal rulemaking is launched.
House Natural Resources / Senate Environment and Public Works	
Petitions Require petitioners to provide a copy of petitions to affected states so states may provide any existing state data regarding the petitioned species. 	Comments: Notice of Proposed Rulemaking by USACE Regarding "Surplus Water"
Clean Water Act Engage the states as co-regulators and ensure that state water managers have a robust and meaningful voice in the development of any federal rule regarding Clean Water Act jurisdiction. Allow states to adopt flexible water quality standards and establish total maximum daily loads that are tailored to the specific characteristics of western water bodies, including variances for unique state and local conditions. Coordinate with states in establishing and, if necessary, modifying any water quality standards under Section 303 of the Clean Water Act to ensure any changes do not unduly interfere with sound existing practices.	WGA Policy Resolution 2015-08, Water Resource Management in the West WGA Policy Resolution 2017-04, Water Quality in the West Appropriations Requests Testimony, FY2015, 2016, 2017 and 2018 Comments: WOTUS Rulemaking Federalism Analysis and Recommendations Comments: Final Waters of the United States (WOTUS) Rule Request for Extended Comment Period - Waters of the United States (WOTUS) Rule Letter: Concern Regarding Clean Water Act Jurisdiction Rulemaking
Army Corps of Engineers Water Supply Rule Fulfill the expanded procedural rulemaking requirements of Executive Order 13132. Recognize state authority over water management and allocation within their borders – states must not be required to relinquish any of their rights to natural flows of rivers which have been impounded by USACE or any other federal agencies. Define "surplus water" to expressly exclude natural flows (and any quantification of such flows) which would have occurred without the development of federal water projects. Allow access to divert and appropriate natural flows in USACE reservoir projects and do not charge storage fees to appropriators where such users are making withdrawals of natural flows within USACE reservoirs.	Letter: Governors Offer Analysis, Recommendations to Army Corps on Regulation of "Surplus Waters" Appropriations Requests Testimony FY2018
Drought Seventeen Bureau of Reclamation states, Hawaii and Alaska are affected by water shortages because of extended drought conditions and infrastructure to assure adequate water supplies. This challenge has both regional and national aspects, including how best to meet the need for efficient infrastructure financing to maintain and enhance adequate water	WGA Policy Resolution 2015-08, Water Resource Management in the West B-2: Infrastructure investments are essential to our nation's continued economic prosperity and environmental protection, and they assist states in meeting federally-mandated standards.

DRAFT

AMERICAN OVERSIGHT

Proposed Legislative Action	Governors' Policy
supplies, avert further economic and environmental harm, and maintain food security. The following policy solutions should be considered: • Providing incentives for innovative water management policies among states (with federal, tribal and local partners) that preserve states' primacy in water management, recognize state law, and align with the financial, environmental and social values of water to Western citizens today and in the future; • Strengthening federal efforts to maintain adequate collection of drought and water data; • Coordinating information programs across multiple agencies, enhancing data networks (where appropriate) and facilitating better use of existing information; • Promoting greater investment in water infrastructure through tools such as loan guarantees, revolving funds, infrastructure banks, and water trust funds; and • Creating a budget neutral federal loan program that will make it possible for Western states, and other concerned public and private entities in western states, to secure financing on reasonable terms to complete important water resources management projects.	Congress should consider facilitating greater investment in water infrastructure, utilizing such tools as loan guarantees, revolving funds, infrastructure banks and water trust funds. Capital budgeting and asset management principles should be used to determine funding priorities based on long-term sustainability and not annual incremental spending choices. It should be accompanied by dedicated sources of funding with appropriate financing, cost-sharing, pricing and cost recovery policies. Federal and state policymakers should also consider other tools to promote investment in water infrastructure and reduce financing costs, including: public-private partnerships; bond insurance; risk pooling; and credit enhancements. Congress should remove the state volume caps for private activity bonds used for water and wastewater projects, provide guaranteed tax-exempt status for bonds issued by state or local agencies to finance water infrastructure, provide loan guarantees, and otherwise support and encourage alternatives to direct federal investment of limited general funds.
Harbor Maintenance Trust Fund Fully fund the Harbor Maintenance Trust Fund and reform the Harbor Maintenance Tax to ensure Western ports remain competitive.	WGA Policy Resolution 2015-05, Transportation Infrastructure in the Western United States

AMERICAN OVERSIGHT

February XX, 2018

Honorable John Barrasso
Chairman
Committee on Environment
and Public Works
U.S. Senate
410 Dirksen Senate Office Building
Washington, D.C. 20510

Honorable Thomas Carper
Ranking Member
Committee on Environment
and Public Works
U.S. Senate
456 Dirksen Senate Office Building
Washington, D.C. 20510

Dear Chairman Barrasso and Ranking Member Carper:

Western Governors wish to reiterate our long-standing support for the Environmental Protection Agency's (EPA's) Water Transfers Rule (Rule). The Rule exempts water transfers from the National Pollutant Discharge Elimination System (NPDES) permitting requirements of the Clean Water Act (CWA). "Water transfers" are defined as activities which convey or connect waters of the United States without subjecting the transferred water to intervening industrial, municipal, or commercial use. We request that this well-reasoned protection of states' ability to effectively manage their water resources be made permanent through federal legislation. As the primary authority in management and allocation of their water resources, states will benefit from the long-term certainty of the Rule's codification.

The Rule is essential for the social and economic health of the arid West, where growing populations rely on thousands of water transfers to satisfy vital domestic, agricultural, and industrial needs. Water transfers have been excluded from the permitting requirements of the NPDES program since the passage of the CWA in 1972. In 2008, EPA promulgated the Water Transfers Rule in order to clarify and formalize this pragmatic approach, which has been consistently applied by several presidential administrations. In 2017, the U.S. Court of Appeals for the Second Circuit upheld the Rule as a reasonable interpretation of the directives expressed by Congress in the CWA. Importantly, the court recognized that states have their own mechanisms by which water transfers are effectively regulated and monitored. The appellants, however, have recently filed for review with the U.S. Supreme Court, and the Rule faces legal uncertainty.

Western Governors have long supported the Water Transfers Rule, as expressed in the attached WGA Policy Resolution 2017-04, Water Quality in the West:

> Western Governors believe that transporting water through constructed conveyances to supply beneficial use should not trigger NPDES permit requirements simply because the source and receiving water contain different chemical concentrations and physical constituents. Western Governors generally support EPA's current water transfers rule, which exempts water transfers between waters of the United States from NPDES permitting requirements.

Requiring the issuance of NPDES permits for water transfers would be prohibitively expensive and technically impractical. Furthermore, it would increase the existing considerable risk to reliable western water supplies while providing nominal, if any, water quality benefits. Given the critical role that water transfers have in meeting our nation's – and particularly the West's – water needs, it is imperative that the Rule remain in place.

DRAFT

AMERICAN OVERSIGHT

Western Governors appreciate Congress's long-standing support of states' authority in the management of water resources and of the states' implementation of their federally-delegated authorities under the CWA. The Water Transfers Rule represents a sensible and effective approach to water resource delivery while ensuring that water quality is not significantly diminished. We ask that you protect the Rule from future challenge or misinterpretation through the enactment of federal legislation that excludes water transfers from permitting under the CWA's NPDES program.

Sincerely,

Dennis Daugaard
Governor of South Dakota
Chair, WGA

David Ige
Governor of Hawaii
Vice Chair, WGA

	CERCLA (Working Group:) *(Staff Lead: Britta Beckstead)*	2/8/18 This issue is pending, subject to further evaluation by SAC of WGA staff memo recirculated 2/9/18.		

AMERICAN OVERSIGHT

Western Governors' Association
Policy Resolution 2015 - 08

Water Resource Management in the West

A. BACKGROUND

1. Water is a crucial resource for communities, industries, habitats, farms, and Western states. Clean, reliable water supplies are essential to maintain and improve quality of life. The scarce nature of water in much of the West makes it particularly important to our states.

2. States are the primary authority for allocating, administering, protecting, and developing water resources, and they are primarily responsible for water supply planning within their boundaries. States have the ultimate say in the management of their water resources and are best suited to speak to the unique nature of Western water law and hydrology.

3. Many communities in the West anticipate challenges in meeting future water demands. Supplies are nearly fully allocated in many basins across the West, and increased demand from population growth, economic development, and extreme weather and fire events places added stress on those limited water resources. Sustainability of our natural resources, specifically water, is imperative to the foundations upon which the West was developed. Growth and development can only continue upon our recognition of continued state stewardship of our unique resources and corresponding responsibilities.

4. Strong state, regional and national economies require reliable deliveries of good-quality water, which in turn depend on adequate infrastructure for water and wastewater. Investments in water infrastructure also provide jobs and a foundation for long-term economic growth in communities throughout the West. Repairs to aging infrastructure are costly and often subject to postponement.

5. Western Governors recognize the essential role of partnership with federal agencies in Western water management and hope to continue the tradition of collaboration between the states and federal agencies.

6. Tribal governments and Western states also share common water resource management challenges. The Western Governors Association and Western States Water Council have had a long and productive partnership with tribes, working to resolve water rights claims.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006661

B. GOVERNORS' POLICY STATEMENT

1. **State Primacy in Water Management:** As the preeminent authority on water management within their boundaries, states have the right to develop, use, control and distribute the surface water and groundwater located within their boundaries, subject to international treaties and interstate agreements and judicial decrees.

   a. **Federal Recognition of State Authority:** The federal government has long recognized the right to use water as determined under the laws of the various states; Western Governors value their partnerships with federal agencies as they operate under this established legal framework.

      While the Western Governors acknowledge the important role of federal laws such as the Clean Water Act, the Endangered Species Act and the Safe Drinking Water Act, nothing in any act of Congress or Executive Branch regulatory action should be construed as affecting or intending to affect states' primacy over the allocation and administration of their water resources.

      Reauthorization of the Water Resources Reform & Development Act, proposed federal surplus water rulemakings, and/or storage reallocation studies should recognize and defer to the states' legal right to allocate, develop, use, control, and distribute their waters, including but not limited to state storage and use requirements.

   b. **Managing State Waters for Environmental Purposes:** States and federal agencies should coordinate efforts to avoid, to the extent possible, the listing of water-dependent species under the Endangered Species Act (ESA). When ESA listings cannot be avoided, parties should promote the use of existing state tools, such as state conservation plans and in-stream flow protections, to conserve and recover species.

2. **Infrastructure Needs:** Aging infrastructure for existing water and wastewater facilities and the need for additional water projects cannot be ignored. Infrastructure investments are essential to our nation's continued economic prosperity and environmental protection, and they assist states in meeting federally-mandated standards.

   a. **Federal Support for Infrastructure Investment:** Congress should provide adequate support for the Clean Water Act (CWA) and Safe Drinking Water Act (SDWA) State Revolving Funds. Further, Congress should fully utilize the receipts accruing to the Reclamation Fund for their intended purpose in the continuing conservation, development and wise use of western resources to meet Western water-related

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006662

needs, including the construction of Congressionally-authorized Bureau of Reclamation rural water projects and facilities that are part of a Congressionally-authorized Indian water rights settlement.

Congress should reauthorize Water Resources Reform & Development Act (WRRDA) legislation on a regular schedule and appropriate funding so all projects and studies authorized in WRRDA can be completed in a timely manner.

Congress also should consider facilitating greater investment in water infrastructure, utilizing such tools as loan guarantees, revolving funds, infrastructure banks and water trust funds.

Capital budgeting and asset management principles should be used to determine funding priorities based on long-term sustainability and not annual incremental spending choices. It should be accompanied by dedicated sources of funding with appropriate financing, cost-sharing, pricing and cost recovery policies.

b. **Alternatives to Direct Federal Investment:** Federal and state policymakers should also consider other tools to promote investment in water infrastructure and reduce financing costs, including: public-private partnerships; bond insurance; risk pooling; and credit enhancements.

Congress should remove the state volume caps for private activity bonds used for water and wastewater projects, provide guaranteed tax-exempt status for bonds issued by state or local agencies to finance water infrastructure, provide loan guarantees, and otherwise support and encourage alternatives to direct federal investment of limited general funds.

c. **Hydropower:** Congress and the Administration should authorize and implement appropriate hydropower projects and programs through efficient permitting processes that enhance renewable electric generation capacity and promote economic development, while ensuring protection of important environmental resources and indigenous people's rights.

d. **Infrastructure Planning and Permitting:** Infrastructure planning and permitting guidelines, rules and regulations should be coordinated, streamlined and sufficiently flexible to: 1) allow for timely decision-making in the design, financing and construction of needed infrastructure; 2) account for regional differences; 3) balance economic and environmental considerations; and 4) minimize the cost of compliance.

3. **Western States Require Innovative and Integrated Water Management.** Western Governors believe effective solutions to water resource challenges require an integrated

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006663

approach among states and with federal, tribal and local partners. Federal investments should assist states in implementing state water plans designed to provide water for municipal, rural, agricultural, industrial and habitat needs, and should provide financial and technical support for development of watershed and river basin water management plans when requested by states.

Integrated water management planning should also account for flood control, water quality protection, and regional water supply systems. Water resource planning must occur within a framework that preserves states' authority to manage water through policies which recognize state law and the financial, environmental and social values of the water resource to citizens of the western states today and in the future.

a. **Water Transfers:** Western Governors recognize the potential benefits of market-based water transfers, meaning voluntary sales or leases of water rights. The Governors support water transfers that avoid or mitigate damages to agricultural economies and communities while preventing injury to other water rights, water quality and the environment.

b. **Energy Development:** Western Governors recognize that energy development and electricity generation may create new water demands. Western Governors recommend increased coordination across the energy and water management communities, and support ongoing work to assess the interconnection of energy and water through the Regional Transmission Expansion Planning Project for the Western interconnection and similar efforts.

c. **Conservation and Efficiency:** Because of diminished water resources and declining and inconsistent snowpack, Western Governors encourage adoption of strategies to sustain water resources and extend existing water supplies further through water conservation, water reuse and recycling, desalination and reclamation of brackish waters, and reductions in *per capita* water use. The Governors encourage the use of and research into promising water-saving strategies.

d. **Local Watershed Planning:** Western Governors encourage federal agencies and Congress to provide resources such as technical support to states and local watershed groups. States may empower these watershed groups to address local water issues associated with water quality, growth and land management to complement state water needs.

e. **Intergovernmental Collaboration and Conflict Resolution:** Western Governors support the negotiated settlement of interstate water disputes, Indian and Hawaiian water rights claims, and other federal water needs and claims, the settlement of which are in the best interest of Western states.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006664

f. **State-Federal Coordination:** Western Governors recognize the important role of federal agencies in advancing sound water resource management in the Western states. Governors appreciate the efforts of federal agencies to coordinate water-related activities, particularly through the Western States Water Council, and support the continuation of these key state-federal partnerships.

4. **Western States Need Reliable Water Resource Information:** Basic information on the status, trends and projections of water resource availability is essential to sound water management.

   a. **Basic Water Data:** Western Governors support the U.S. Geological Survey's Cooperative Water Program and National Streamflow Information Program (NSIP), the Natural Resources Conservation Service's Snow Survey and Water Supply Forecasting Program, the National Oceanic and Atmospheric Administration's (NOAA) weather and hydrology-related data collection, monitoring, and drought information programs, and the National Aeronautics and Space Administration's National Land Imaging (Landsat) Program with its thermal infrared sensor. Western Governors support federal efforts to coordinate water data gathering and information programs across multiple agencies.

   b. **Extreme Weather Events Planning**: Western Governors recognize the significant potential impacts of extreme weather events and variability in water supplies. Western Governors urge Congress and the Administration to work closely with states and other resource managers to improve predictive and adaptive capabilities for extreme weather variability and related impacts. We specifically urge the federal government to place a priority on improving the sub-seasonal and seasonal precipitation forecasting capabilities that could support water management decision-making.

   c. **Water Data Exchange:** The Western Governors' Association and the Western States Water Council have worked together to create the Water Data Exchange, an online portal that will enable states to share their water data with each other, federal agencies, and the public via a common platform. The Governors encourage the use of state water data in planning for both the public and private sectors.

5. **Drought Preparedness and Response:** As exceptional levels of drought persist across the West, Governors are leading on drought preparedness and response through the Western Governors' Drought Forum. The Drought Forum provides a framework for leaders from states, businesses, non-profits, communities, research organizations and federal agencies to share best practices and identify policy options for drought management. The Governors have identified several areas in need of additional attention from Drought Forum partners, including:

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006665

a. **Data and Analysis:** Basic data on snowpack, streamflow and soil moisture is essential to understanding drought. Though a great deal of information already exists, enhanced drought data collection and real-time analysis at a higher resolution is essential. Governors support state and federal efforts to maintain adequate collection of drought and water data, enhance data networks where appropriate, and facilitate better use of existing information.

   The Governors appreciate the collaborative efforts on drought provided through NOAA's National Weather Service River Forecast Centers and Weather Forecast Offices, and the Office of Atmospheric Research's labs and programs, such as the National Integrated Drought Information System (NIDIS).

b. **Produced, Reused and Brackish Water:** Technology exists to use produced, reused, recycled and brackish water—sources traditionally considered to be marginal or wastewater. Adoption of this technology has been limited by inadequate data, regulatory obstacles, financial barriers, public attitudes and logistical uncertainties. Governors support regulatory streamlining and policy options to encourage use of produced, brackish, and re-used water where appropriate.

c. **Forest Health and Soil Stewardship:** Better land management practices for forests and farmland may help improve availability and soil moisture retention. Wildfires can cause sediment runoff in water systems, leading to problems for reservoir management and water quality. Governors support policies and practices that encourage healthy and resilient forests and soils in order to make the most of existing water supplies.

d. **Water Use Efficiency and Conservation:** Public awareness of drought has directed increasing attention to water conservation strategies, both in-home and on-farm. Governors encourage municipal, industrial and agricultural water conservation strategies as drought management strategy.

e. **Infrastructure and Investment:** Water infrastructure to store and convey water is crucial to drought management, but maintenance and expansion of that infrastructure is often difficult to fund. Governors support efforts to make the most of existing infrastructure, while seeking creative solutions to add more infrastructure with limited resources.

f. **Working within Institutional Frameworks to Manage Drought**: Legal frameworks and regulatory regimes can sometimes limit the ability of state, local and federal agencies to respond quickly to drought conditions. Governors believe that

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006666

innovative, flexible policy solutions, such as streamlined processing of temporary water transfers, should be considered when managing drought.

g. **Communication and Collaboration:** Communication among state officials, federal agency representatives, water providers, agricultural users and citizens is a crucial component of effective drought response. The Western Governors' Drought Forum will continue to provide a framework for sharing best practices through its online resource library, informational webinars, and strategy-sharing meetings for the duration of this resolution.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct the WGA staff, where appropriate, to work with Congressional committees of jurisdiction and the Executive Branch to achieve the objectives of this resolution including funding, subject to the appropriation process, based on a prioritization of needs.

2. Furthermore, the Governors direct WGA staff to develop, as appropriate and timely, detailed annual work plans to advance the policy positions and goals contained in this resolution. Those work plans shall be presented to, and approved by, Western Governors prior to implementation. WGA staff shall keep the Governors informed, on a regular basis, of their progress in implementing approved annual work plans.

Western Governors enact new policy resolutions and amend existing resolutions on a bi-annual basis. Please consult westgov.org/policies for the most current copy of a resolution and a list of all current WGA policy resolutions.

AMERICAN OVERSIGHT

Western Governors' Association
Policy Resolution 2015-09

National Minerals Policy

A. BACKGROUND

1. Federal lands account for as much as 86 percent of the land area in certain western states. These same states account for 75 percent of our nation's metals production. Few countries are as blessed with the abundance of minerals and metals as is the United States.

2. The Mining and Minerals Policy Act of 1970 formally recognized the importance of mining and domestic minerals production as a policy of the United States, including "the development of economically sound and stable domestic mining, minerals, metal and mineral reclamation industries," "the orderly and economic development of mineral resources … to help assure satisfaction of industrial, security and environmental needs," "mining, mineral and metallurgical research," "… including the use and recycling of scrap to promote the wise and efficient use of our natural and reclaimable resources; the study and development of methods for the disposal, control and reclamation of mineral waste products, and the reclamation of mined land, so as to lessen adverse impacts of mineral extraction."

3. Access to domestic minerals is increasingly important to decrease our reliance on foreign sources. Twenty-five years ago, the United States was dependent on foreign sources for 45 nonfuel mineral materials, 8 of which the U.S. imported 100 percent of the Nation's requirements, and for another 19 commodities the United States imported more than 50 percent of the Nation's needs. By 2014, U.S. import dependence for nonfuel mineral materials had risen significantly from 45 to 65 commodities, 19 of which the United States imported 100 percent of the Nation's requirements, and for another 24 commodities, imported more than 50 percent of the Nation's needs.

4. A major factor contributing to the U.S.' reliance on foreign sources of minerals is a duplicative and inefficient mine permitting system that discourages development of domestic resources. It takes seven to 10 years in the United States to navigate this cumbersome federal process to bring a mine into production, compared with approximately two years in countries such as Canada and Australia that have comparable environmental standards.

5. Ensuring timely access to domestic minerals will strengthen our economy and keep us competitive globally as demand for minerals continues to grow, especially for manufacturing and construction. Our antiquated and duplicative permitting process

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006668

discourages investment and jeopardizes the growth of downstream industries, related jobs and technological innovation that all depend on a secure and reliable mineral supply chain. Permitting delays also impede America's ability to meet growing demand for many consumer products from smart phones and hybrid car batteries to renewable energy technologies like wind turbines and solar panels – all of which require minerals and metals critical for their manufacture.

6. The Mining Law has provided the framework for developing hardrock minerals on the public lands. It has been supplemented by a large body of federal, state, tribal and local environmental and reclamation laws and regulations (including regulations promulgated by the federal land management agencies) to assure protection of the environment, wildlife and cultural resources during mineral exploration and development and to ensure reclamation of lands after active mining ceases.

   The National Academy of Sciences' National Research Council, after a comprehensive review of these laws and regulations at the direction of the Congress, concluded that existing laws and regulations are "complicated but generally effective." It also identified "specific issues or 'gaps' in existing..." regulations intended to protect the environment."

7. The same National Research Council report contained recommendations for addressing the significant permitting delays facing mining projects on federal lands. As the Council found the lack of early, consistent cooperation and participation by all the involved federal, state, and local agencies results in excessive costs, delays and inefficiencies in the permitting of mines on federal lands.

8. Hardrock mining operations on both public and private lands in the Western States are subject to Federal environmental laws under both the U.S. Environmental Protection Agency (EPA) and the Army Corps of Engineers. In most states, the Clean Water Act, the Clean Air Act, the Toxic Substances Control Act, the Resource Conservation and Recovery Act, and the Safe Drinking Water Act are administered by state environmental agencies with oversight by the EPA. Hardrock mining operations are also subject to regulatory programs for the protection of plants and wildlife, including the Endangered Species Act, the Migratory Bird Treaty Act, and the Bald Eagle Protection Act.

9. Furthermore, the modern hardrock mining industry is extensively regulated by the federal government on U.S. Bureau of Land Management- and U.S. Forest Service-administered lands, including review of the mining plan of operations, comprehensive permit, design, operations, closure, reclamation requirements, corrective action and financial assurance requirements, to ensure that the mining operations will not result in unnecessary or undue degradation of public lands.

10. The Western States also extensively regulate hardrock mining operations on both private and public lands, and uniformly impose permit and stringent design and operating

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006669

standards, as well as financial assurances to ensure that hardrock mining operations are conducted in a manner that is protective of human health and the environment, and that, at closure, the mined lands are returned to a safe, stable condition for productive post-mining use.

11. Under the federal Mining Law, no royalties are owed to the federal or state governments for hardrock minerals extracted from the public lands. However, such mining operations, which are most often located in rural areas lacking economic opportunities, can result in significant high-wage employment, royalties from private and state lands, increased state and local tax revenues and development of infrastructure necessary to support communities.

B. GOVERNORS' POLICY STATEMENT

1. Now is the time to build on the 1970 Mining and Minerals Policy Act with legislation and policies that will unlock our mineral potential to ensure access to the metals that are critical to U.S. economic and national security—providing vital base materials for electronics, telecommunications, satellites, aircraft, manufacturing and alternative energy technologies (particularly wind and solar).

2. Western Governors recognize that the minerals mining industry is an important component to both local and national economies. Reliable supplies of minerals and metals play a critical role in meeting our economic and national security needs.

3. WGA commends efforts by the United States Geological Survey and state geological surveys to identify potential, critical minerals deposits for alternative energy technologies and other consumer products vital to modern society.

4. The Congress, in consultation with the states, should develop a National Minerals Policy that truly enables mineral exploration and development in a manner that balances the nation's industrial and security needs with adequate protection of natural resources and the environment. Without reducing environmental or other protections afforded by current laws and regulations, any policy must address the length of the mine permitting process to ensure we can develop and provide the domestic resources that are critical to our national and economic security. Any policy should also take into account the potential long term effects (including potential environmental effects) of mining operations and should maintain policies and procedures in place to mitigate any long term effects.

5. A National Minerals Policy should address permitting delays, patenting, maintenance fees, an equitable government revenue mechanism, and the development of a clean-up fund and program for reclaiming abandoned hard rock mines. Relevant stakeholders, including the mining industry, should continue to work with Congress to determine the

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006670

elements of a royalty system that is workable and fair.

6. New financial assurance requirements imposed upon the hardrock mining industry under CERCLA Section 108(b) would duplicate or supplant existing and proven state financial assurance regulations in this area. This is of particular concern to the western states, because CERCLA is a non-delegable federal program that provides no opportunity for implementation through state environmental agencies. The western states have developed deep experience in mine permitting, regulation, and closure. Federal preemption of state bonding programs will threaten these effective state programs.

7. The U.S. Department of the Interior and the U.S. Department of Agriculture should take an active role, working with western states, in the development of a National Minerals Policy that recognizes the importance of a domestic supply of minerals for our country.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct the WGA staff, where appropriate, to work with Congressional committees of jurisdiction and the Executive Branch to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to develop, as appropriate and timely, detailed annual work plans to advance the policy positions and goals contained in this resolution. Those work plans shall be presented to, and approved by, Western Governors prior to implementation. WGA staff shall keep the Governors informed, on a regular basis, of their progress in implementing approved annual work plans.

Western Governors enact new policy resolutions and amend existing resolutions on a bi-annual basis. Please consult westgov.org/policies for the most current copy of a resolution and a list of all current WGA policy resolutions.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006671

Western Governors' Association
Policy Resolution 2015-06

Enhanced Oil Recovery

A. BACKGROUND

1. Enhanced oil recovery (EOR), using carbon dioxide (CO_2), when performed appropriately and responsibly offers a safe and commercially proven method of domestic oil production. The U.S. oil and gas industry, which pioneered the CO_2 EOR process in West Texas in 1972, is the world leader. Over four decades, the EOR industry has captured, transported, and injected large volumes of CO_2 for oil recovery with no major accidents, serious injuries or fatalities reported.

2. The CO_2 EOR process works by injecting CO_2 obtained from natural and anthropogenic sources into existing oil fields – often referred to as "brownfields" – to free up additional crude trapped in rock formations. This CO_2 "flooding" can result in recovery of about twenty percent of the original oil in place.[1] CO_2 flooding utilizes existing assets to recover significant additional resources stimulating the economy and minimizing surface disturbance that new exploration and development projects necessarily entail. In addition, many areas favorable for CO_2 application exist where new or continued significant drilling activity is unlikely to occur at a meaningful scale for years, if ever.

3. As of 2013, EOR using CO_2 produced approximately 280,000 barrels of domestic oil per day, or four percent of U.S. crude oil production.[2]

4. America has an estimated 21.4 billion barrels of oil, requiring 8.9 billion metric tons of CO_2, that could be economically recovered with today's EOR technologies. With advances in technology, 63.3 billion barrels of oil, requiring 16.2 billion metric tons of CO2, could be economically recovered, which is roughly double current U.S. proven reserves[3].

5. EOR enhances our nation's energy and fiscal security by reducing dependence on foreign oil, often imported from unstable and hostile regimes. It allows reduction of our trade deficit by keeping dollars now spent on oil imports here at home and at work in the U.S. economy.

---

[1] National Energy Technology Laboratory – *Untapped Domestic Energy Supply and Long Term Carbon Storage Solution*
[2] Energy Information Administration – Annual Energy Outlook 2015
[3] U.S. Department of Energy, National Energy Technology Laboratory

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006672

6. Coal and oil production and utilization and other industrial processes are a vital component of many western states' economies. EOR provides a long-term path for continued low-carbon production and use of our nation's coal and oil resources and presents an opportunity for state and local governments to stimulate economic activity and realize additional revenue at a time when most governments face significant fiscal challenges.

7. CO_2 is currently limited in availability from high-volume sources needed for EOR – natural sources will not close a supply gap projected to grow. Further, CO_2 capture and pipeline transport capacity to oil fields is not sufficient.

8. CO_2 capture equipment, installed on a broad range of industrial processes, has the potential to supply significant volumes of CO_2 to the EOR industry enabling the U.S. to achieve significant net carbon reductions through the sequestration of CO_2.[4]

9. The U.S. has the opportunity to provide global leadership in carbon capture research and technology development, hydrocarbon recovery and geologic storage research and technologies, manufacturing, engineering and other services.

B. GOVERNORS' POLICY STATEMENT

1. In recognition of the environmental and economic benefits of EOR, Western Governors support policies and incentives that advance investment in EOR projects, infrastructure, technology and research.

2. Western Governors support efforts to increase the awareness of the many benefits CO_2 EOR.

3. In order to expand deployment of CO_2 capture at power plants and other industrial sources, the President and Congress should enact federal incentives to increase CO_2 supply available for the oil industry to purchase and use in EOR. Federal incentives have the potential to leverage private and state investment, harness the ingenuity of entrepreneurs and capitalize on billions of dollars' worth of DOE-sponsored research and development to enable new commercial carbon capture and pipeline projects.

---

[4] As of 2014, approximately 13.6 million metric tons of CO2 was captured that would otherwise be released into the atmosphere has been sequestered as a result of EOR (U.S. Department of Energy – Quadrennial Energy Review). Over the life of a project, for every 2.5 barrels of oil produced, it is estimated that a typical commercial EOR project can safely prevent one metric ton of CO_2 from entering the atmosphere (Kuuskraa, Godec, Dipietro – Energy Procedia). Further, the volume that could be captured and sequestered from industrial facilities and power plants to support economically recoverable EOR reserves could be 8.9 to 16.2 billion metric tons of CO_2. This is equal to the total U.S. CO_2 production from fossil fuel electricity generation for approximately 4 to 8 years (EPA 2015 Green House Gas Inventory).

AMERICAN OVERSIGHT

4. Federal policies aimed to limit CO_2 emissions should promote, and not impede, development and deployment of CO_2 capture and commoditization. Federal regulations should allow states to create programs tailored to individual state needs, industries and economies and recognize CO_2 sequestration that results from EOR in meeting federal regulatory objectives. As such, EPA should abide by principles already established by the Agency in its regulations promulgated to ensure the long-term storage of CO_2 in different geologic formations.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct the WGA staff, where appropriate, to work with EPA and other federal agencies, Congressional committees of jurisdiction, and the Executive Branch to achieve the objectives of this resolution including funding, subject to the appropriation process, based on a prioritization of needs.

2. Additionally the Governors direct the WGA staff to develop, as appropriate and timely, detailed annual work plans to advance the policy positions and goals contained in this resolution. Those work plans shall be presented to, and approved by, Western Governors prior to implementation. WGA staff shall keep the Governors informed, on a regular basis, of their progress in implementing approved annual work plans.

Western Governors enact new policy resolutions and amend existing resolutions on a bi-annual basis. Please consult westgov.org/policies for the most current copy of a resolution and a list of all current WGA policy resolutions.

AMERICAN OVERSIGHT

Western Governors' Association
Policy Resolution 2017-04

Water Quality in the West

A. BACKGROUND

1. Clean water is essential to strong economies and quality of life. In most of the West, water is a scarce resource that must be managed with sensitivity to social, environmental, and economic values and needs. Because of their unique understanding of these needs, states are in the best position to manage the water within their borders.

2. States have federally-recognized authority to manage and allocate water within their boundaries. The Clean Water Act (CWA) Section 101(g) expressly says that "the authority of each state to allocate quantities of water within its jurisdiction shall not be superseded, abrogated, or otherwise impaired by this Act."

3. States and the Environmental Protection Agency (EPA) work together as co-regulators under the CWA and the Safe Drinking Water Act (SDWA). The U.S. Congress has provided for, by statute, the authority for states to obtain approval to implement certain federal program responsibilities. When a state has been approved to implement a program and the state is meeting minimum program requirements, the role of federal agencies like EPA should be funding, technical assistance and research support. States should be free to develop, implement and enforce those requirements using an approach that makes sense in their specific jurisdiction, subject to the minimum requirements of the federal acts.

4. The CWA was last reauthorized in 1987; attempts to reauthorize the Act since then have failed. Current federal regulations, guidance and programs pertaining to the CWA do not always recognize the specific conditions and needs of most of the West, where water is scarce and even wastewater becomes a valuable resource to both humans and the environment. The West includes a variety of waters; small ephemeral washes, large perennial rivers, effluent-dependent streams, and wild, scenic rivers. In addition to natural rivers, streams and lakes, there are numerous man-made reservoirs, waterways and water conveyance structures. States need more flexibility to determine how to best manage these varying resources.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006675

B. GOVERNORS' POLICY STATEMENT

Clean Water Act (CWA)

1. **State Authority and Implementation of CWA:** States have jurisdiction over water resource allocation decisions and are responsible for how to balance state water resource needs within CWA objectives. New regulations, rulemaking, and guidance should recognize this state authority.

    a) **CWA Jurisdiction:** Western Governors urge EPA and the Corps to engage the states as co-regulators and ensure that state water managers have a robust and meaningful voice in the development of any rule regarding CWA jurisdiction, particularly in the early stages of development before irreversible momentum precludes effective state participation.

    b) **Total Maximum Daily Loads (TMDLs)/Adaptive Management:** States should have the flexibility to adopt water quality standards and set total maximum daily loads (TMDLs) that are tailored to the specific characteristics of Western water bodies, including variances for unique state and local conditions.

    c) **Anti-degradation:** CWA Section 303 gives states the primary responsibility to establish water quality standards (WQS) subject to EPA oversight. Given the states' primary role in establishing WQS, EPA should directly involve the states in the rulemaking process for any proposed changes to its existing regulations. Before imposing new anti-degradation policies or implementation requirements, EPA should document the need for new requirements and strive to ensure that new requirements do not interfere with sound existing practices.

    d) **Groundwater:** States have exclusive authority over the allocation and administration of rights to use groundwater located within their borders and are primarily responsible for allocating, protecting, managing, and otherwise controlling the resource. The regulatory reach of the CWA was not intended to, and should not, be applied to the management and protection of groundwater resources. The federal government should not develop a groundwater quality strategy; instead, it must recognize and respect state primacy, reflect a true state-federal partnership, and comply with current federal statutory authorities.

2. **Permitting:** Actions taken by EPA in its CWA permitting processes should not impinge upon state authority over water management or the states' responsibility to implement CWA provisions.

    a) **State Water Quality Certification:** Section 401 of the CWA requires applicants for a federal license to secure state certification that potential discharges from their activities will not violate state water quality standards. Section 401 of the CWA is

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006676

operating as it should and states' mandatory conditioning authority should be retained without amendment.

b) **General Permits:** Reauthorization of the CWA must reconcile the continuing administrative need for general permits with their site-specific permitting requirements under the CWA. EPA should promulgate rules and guidance that better support the use of general permits where it is more effective to permit groups of dischargers rather than individual dischargers.

c) **Water Transfers:** Water transfers that do not involve the addition of a pollutant have not been subject to the permitting requirements of the CWA's National Pollutant Discharge Elimination System (NPDES). States already have authority to address the water quality issues associated with transfers. Western Governors believe that transporting water through constructed conveyances to supply beneficial uses should not trigger NPDES permit requirements simply because the source and receiving water contain different chemical concentrations and physical constituents. Western Governors generally support EPA's current water transfers rule, which exempts water transfers between waters of the United States from NPDES permitting requirements.

d) **Pesticides:** Western Governors generally support the primary role of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) in regulating agriculture and public health related pesticide applications to waters of the U.S. and will seek state-based solutions that complement rather than duplicate FIFRA in protecting water supplies.

3. **Nonpoint Source Pollution:** Nonpoint source pollution requires state watershed-oriented water quality management plans, and federal agencies should collaborate with states to carry out the objectives of these plans. The CWA should not supersede other ongoing federal, state and local nonpoint source programs. Federal water policies must recognize that state programs enhanced by federal efforts could provide a firm foundation for a national nonpoint source policy that maintains the non-regulatory and voluntary nature of the program. In general, the use of point source solutions to control nonpoint source pollution is also ill-advised.

a) **Forest Roads**: Stormwater runoff from forest roads has been managed as a nonpoint source of pollution under EPA regulation and state law since enactment of the CWA. Western Governors support solutions that are consistent with the long-established treatment of forest roads as nonpoint sources, provided that forest roads are treated equally across ownership within each state.

b) **Nutrient Pollution**: Nitrogen and phosphorus (nutrient) pollution is a significant cause of water quality impairment across the nation, and continued cooperation between states and EPA is needed. However, nutrients produced by non-point

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006677

sources fall outside of NPDES jurisdiction and should not be treated like other pollutants that have clear and consistent thresholds over a broad range of aquatic systems and conditions.

States should be allowed sufficient flexibility to utilize their own incentives and authorities to establish standards and control strategies to address nutrient pollution, rather than being forced to abide by one-size-fits-all federal numeric criteria. Successful tools currently in use by states include best management practices, nutrient trading, controlling other water quality parameters, and other innovative approaches.

4. **CWA Reauthorization:** The Western Governors support reauthorization of the CWA, provided that it recognizes the unique hydrology and legal framework in Western states. Further, any CWA reauthorization should include a new statement of purpose to encourage the reuse of treated wastewater to reduce water pollution and efficiently manage water resources.

5. **Good Samaritan Legislation:** Congress should enact a program to protect volunteering remediating parties who conduct authorized remediation of abandoned hardrock mines from becoming legally responsible under the CWA and/or the Comprehensive Environmental Response, Compensation, and Liability Act for any continuing discharges after completion of a remediation project, provided that the remediating party – or "Good Samaritan" – does not otherwise have liability for that abandoned mine or inactive mine site.

6. **Stormwater (Wet Weather) Pollution:** In the West, stormwater discharges to ephemeral streams in arid regions pose substantially different environmental risks than do the same discharges to perennial surface waters. The Western Governors emphasize the importance of state primacy in water management, including management of ephemeral streams. State water agencies are well-equipped to provide tailored approaches that reflect the unique management needs of ephemeral streams.

7. **State-Tribal Coordination:** Western Governors endorse government-to-government cooperation among the states, tribes and EPA in support of effective and consistent CWA implementation. While retaining the ability of the Governors to take a leadership role in coordination with the tribes, EPA should promote effective consultation, coordination, and dispute resolution among the governments, with emphasis on lands where tribes have treatment-as-state status under Section 518 of the CWA.

AMERICAN OVERSIGHT

Safe Drinking Water Act (SDWA)

8. **Federal Assistance in Meeting SDWA Standards:** Western Governors believe that the SDWA and its standards for drinking water contaminants have been instrumental in ensuring safe drinking water supplies for the nation. It is essential that the federal government, through EPA, provide adequate support to the states and water systems to meet federal requirements. Assistance is particularly needed for small and rural systems, which often lack the resources needed to comply with federal treatment standards.

9. **Drinking Water Standards:** Contaminants such as arsenic, chromium, perchlorate and fluoride often occur naturally in the West. Western Governors support EPA technical assistance and research to improve both the efficiency and affordability of treatment technologies for these contaminants. In any drinking water standards that the EPA may revise or propose for these and other contaminants, including disinfection byproducts, EPA should consider the disproportionate impact that such standards may have on Western states and give special consideration to feasible technology based on the resources and needs of smaller water systems.

10. **Risk Assessments:** Analysis of the costs of treatment for drinking water contaminants should carefully determine the total costs of capital improvements, operation and maintenance when determining feasible technology that can be applied by small systems. These costs should be balanced against the anticipated human health benefits before implementing or revising drinking water standards.

11. **Emerging Contaminants/Pharmaceuticals:** The possible health and environmental impacts of emerging contaminants and pharmaceuticals are of concern to Western Governors. Although states have existing authorities to address possible risks associated with emerging contaminants and pharmaceuticals, there is a need for more reliable science showing impacts on human health as more information regarding these contaminants becomes available.

12. **Hydraulic Fracturing:** States currently employ a range of effective programmatic elements and regulations to ensure that hydraulic fracturing does not impair water quality, including but not limited to requirements pertaining to well permitting, well construction, the handling of exploration and production waste fluids, the closure of wells, and the abandonment of well sites.

    Federal efforts to study the potential impacts of hydraulic fracturing on water quality should leverage state knowledge, expertise, policies, and regulations. Such efforts should also be limited in scope, based upon sound science, and driven by the states. Western Governors oppose efforts that would diminish the primary and exclusive authority of states over the allocation of water resources necessary for hydraulic fracturing.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006679

Compliance with Federal Water Quality and Drinking Water Requirements

13. **State Revolving Funds:** Western Governors support EPA's Clean Water State Revolving Fund (SRF) and Drinking Water SRF as important tools that help states and local communities address related water infrastructure needs and comply with federal water quality and drinking water requirements. Western Governors also urge Congress and the Administration to ensure that the SRF Programs provide greater flexibility and fewer restrictions on state SRF management.

14. **Restoring and Maintaining Lakes and Healthy Watersheds:** Historically, the Section 314 Clean Lakes Program and the Section 319 Nonpoint Source Management Program provided states with critical tools to restore and maintain water quality in lakes and watersheds. Western Governors urge the Administration and Congress to support these programs. Such support should not come at the expense of other federal watershed protection programs.

15. **EPA Support and Technical Assistance:** The federal government through EPA should provide states and local entities with adequate support and technical assistance to help them comply with federal water quality and drinking water requirements. EPA should also collaborate with and allow states to identify and establish priority areas, timelines, and focus on programs that provide the largest public health and environmental benefits.

16. **EPA Grant Funding for Primary Service: Rural Water Programs:** Some rural communities still lack basic water and sanitary services needed to assure safe, secure sources of water for drinking and other domestic needs. Adequate federal support, including but not limited to the Rural Utilities Service programs of the Department of Agriculture and State Revolving Funds through EPA, are necessary to augment state resources.

Water Quality Monitoring and Data Collection

17. **Water Data Needs:** Western water management is highly dependent upon the availability of data regarding both the quality and quantity of surface and ground waters. EPA should provide support to the states in developing innovative monitoring and assessment methods, including making use of biological assessments, sensors and remote sensing, as well as demonstrating the value to the states of the national probabilistic aquatic resource surveys.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct WGA staff to work with Congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

Western Governors enact new policy resolutions and amend existing resolutions on a bi-annual basis. Please consult www.westgov.org/policies for the most current copy of a resolution and a list of all current WGA policy resolutions.

WESTERN GOVERNORS' ASSOCIATION

TO: Staff Advisory Council
FROM: Ward Scott, WGA Policy Advisor
SUBJECT: EPA Lead and Copper Rule Revisions – Federalism Consultation
DATE: Feb. 7, 2018

On Jan. 8, WGA staff, as well as representatives from several organizations of state and local officials,[1] participated in a federalism consultation[2] with the EPA Office of Ground Water and Drinking Water to discuss long-term revisions to the Lead and Copper Rule (LCR) under the federal Safe Drinking Water Act (SDWA). EPA is soliciting federalism comments and has posed a series of questions for input from state and local officials. **Comments must be received on or before Mar. 8, 2018**.

The LCR, which applies to 68,000 public water systems nationwide, is a treatment technique rule that requires water systems to conduct tap sampling for lead and copper to determine actions water systems must take to reduce exposure to lead and copper in drinking water. EPA's presentation of potential revisions includes new requirements on states, local governments, and utilities which could impose substantial costs and particularly impact smaller, rural water systems.

Additional information on the LCR can be found at: https://www.epa.gov/dwreginfo/lead-and-copper-rule.

Action Requested: Please review the questions that have been posed by EPA, below, and provide input as to what issues should be addressed in any comments that WGA may submit as part of EPA's LCR federalism consultation.

Nexus to WGA Policy

Policy Resolution 2017-04, *Water Quality in the West*, contains the following applicable provisions:

---

[1] Other organizations participating in the consultation included: National Governors' Assoc., National Conference of State Legislatures, Council of State Governments, National League of Cities, U.S. Conference of Mayors, National Assoc. of Counties, National Assoc. of Towns and Townships, Environmental Council of States, Assoc. of State Drinking Water Administrators, Assoc. of Metropolitan Water Agencies, National Rural Water Assoc., American Water Works Assoc., American Public Works Assoc., National School Board Assoc., and the American Assoc. of School Board Administrators.

[2] As mandated under Executive Order 13132, *Federalism* (64 Fed. Reg. 43255, Aug. 4, 1999). EPA announced that the agency intends to use the meeting to also satisfy consultation requirements mandated by the Unfunded Mandates Reform Act.

AMERICAN OVERSIGHT

- Sec. (b)(8), Federal Assistance in Meeting SDWA Standards: Western Governors believe that the SDWA and its standards for drinking water contaminants have been instrumental in ensuring safe drinking water supplies for the nation. It is essential that the federal government, through EPA, provide adequate support to the states and water systems to meet federal requirements. Assistance is particularly needed for small and rural systems, which often lack the resources needed to comply with federal treatment standards.

- Sec. (b)(9), Drinking Water Standards: In any drinking water standards that the EPA may revise or propose for these and other contaminants, including disinfection byproducts, EPA should consider the disproportionate impact that such standards may have on Western states and give special consideration to feasible technology based on the resources and needs of smaller water systems.

- Sec. (b)(10), Risk Assessments: Analysis of the costs of treatment for drinking water contaminants should carefully determine the total costs of capital improvements, operation and maintenance when determining feasible technology that can be applied by small systems. These costs should be balanced against the anticipated human health benefits before implementing or revising drinking water standards.

- Sec. (b)(11): EPA Support and Technical Assistance: The federal government through EPA should provide states and local entities with adequate support and technical assistance to help them comply with federal water quality and drinking water requirements. EPA should also collaborate with and allow states to identify and establish priority areas, timelines, and focus on programs that provide the largest public health and environmental benefits

Background

In 2017, EPA announced plans to revise and strengthen provisions of the LCR, hastened by the recent drinking water supply crisis in Flint, MI, as well as other well-publicized failures of public water systems. EPA Administrator Scott Pruitt has also announced EPA's new war on lead and recently sent a letter to other Cabinet officials, announcing a Feb. 15 meeting to "consider actions that the federal partners may undertake over the next one to three years to further reduce childhood lead exposures and eliminate associated health impacts."

The LCR, first promulgated in 1991 and revised in 2000 and 2007, requires water systems to conduct tap sampling for lead and copper to determine what actions must be taken to reduce exposure to lead and copper. Under the LCR, water systems must work with their customers to collect samples from locations with lead service lines and/or leaded plumbing materials. When action levels are exceeded in more than ten percent of tap water samples collected during any monitoring period (i.e., if the 90th percentile level is greater than the action level), a water system must take certain actions, depending on the size of the system.

LCR Revisions, Federalism Consultation, and EPA Requests for Input

At the Jan. 8 federalism consultation, EPA presented slides that followed recommendations provided in a 2015 Report from the National Drinking Water Advisory Council (NDWAC), a Federal Advisory Committee established under the SDWA. Key areas of focus identified for LCR revisions include: (i) Lead Service Line Replacement; (ii) Corrosion Control Treatment; (iii) Tap Sampling; (iv) Public Education and Transparency; and (v) Renewed Copper Requirements. Noticeably

AMERICAN OVERSIGHT

absent was a clear and comprehensive discussion of costs to be borne by states or any enhancements to federal funding mechanisms for the extensive revisions presented.

1. **Lead Service Line Replacement:** Although lead plumbing fixtures (pipes, solder, flux) were banned under the SDWA in 1986, EPA estimates that 6.5 to 10 million lead service lines are currently still in use throughout the country. Estimates for replacing all lead service lines nationwide range from $16 to $80 billion. Adding complexity to replacement is the fact that, in most communities, lead service lines are partially or entirely privately-owned. Homeowners and renters may be unwilling or unable to replace the portion of the water lines located on their private property. There is a great deal of legal uncertainty as to the authority of EPA, states, local governments, and water utilities to mandate replacement of privately-owned lines and the payment for such replacement.

   EPA has requested input to the following questions regarding lead service line replacement - What are the opportunities and challenges to state and local governments if EPA were to modify the LCR to:

   a. Require systems to create an inventory of lead service lines currently in use?

   b. Require proactive full lead service line replacement on a specified schedule (*e.g.*, 10, 15, 25, 35 years from promulgation)?

   c. Allow partial lead service line replacement only for emergency repair or "unwilling or unable customers" when conducting infrastructure (*i.e.*, public water main) replacement?

   d. Require pitcher filters to be distributed and regularly maintained by public water systems for three months immediately following lead service line replacement?

2. **Improved Corrosion Control Treatment:** Corrosion control treatment involves the addition of chemicals or chemical adjustment of drinking water pH to reduce the corrosivity of drinking water and, thus, reduce the leaching of lead and copper from plumbing materials. If the lead or copper action level is exceeded in more than 10% of samples during any monitoring period, a water system must take certain actions. Requirements vary depending on the size of the water system at issue.

   EPA has requested input to the following questions regarding corrosion control treatment – What are the opportunities and challenges to state and local governments if EPA were to modify the LCR to:

   a. Change the current system size threshold for (currently 50,000 people served)?

   b. Require all systems with lead service lines (regardless of size of population served) to install and maintain corrosion control treatment?

   c. Require plumbed in point-of-use treatment devices to be provided (and regularly maintained) for households with lead service lines?

   d. Prescribe default requirements for corrosion control treatment that must be maintained unless a public water system can demonstrate the use of equally effective techniques to the state?

AMERICAN OVERSIGHT

e. Require public water systems to conduct periodic reviews of corrosion control treatment and demonstrate effectiveness to the states?

f. Require public water systems to find and fix problems in corrosion control treatment if a tap sample exceeds an action level?

3. **Transparency and Public Education:** The LCR requires public education within 60 days after discovery of systems that exceed the lead action level. Educational materials currently distributed include information on the sources and health effects of lead, as well as steps consumers can take to reduce exposure to lead in drinking water.

   EPA has requested input to the following questions regarding transparency and public education - What opportunities and challenges would state and local governments face if the LCR were revised to require:

   a. Public water systems to provide ongoing, targeted outreach with special emphasis on all customers with lead service lines?

   b. Public water systems to provide notification to customers within 24 hours of exceeding established action levels (as currently required by the 2016 WIIN Act)?

   c. Public Water Systems to make information available to customers concerning (i) the results of all tap sampling; (ii) results of water quality parameter monitoring, and (iii) the number and locations of lead service lines?

4. **Tap Sampling:** The LCR is the only national primary drinking water regulation that requires sampling in homes, often by the consumers themselves. EPA seeks input regarding tap sampling - what are the opportunities and challenges for states and local governments if sampling protocols under the LCR were revised to:

   a. Change where water systems are required to collect tap samples (*e.g.*, sites based on customer request, schools served by the system)?

   b. Change the way tap samples are collected (*e.g.*, increased number of samples, instruct customers to collect tap samples when drawing water for drinking or cooking)?

   c. Establish a household action level that, if exceeded, would trigger a report to the consumer and to the applicable health agency for follow-up?

5. **Revised Provisions Concerning Copper:** EPA seeks input regarding revisions to the copper provisions of the LCR - what opportunities and challenges would state and local governments face if EPA revised the LCR to:

   a. Establish a screen to determine if water systems have water aggressive to copper?

   b. Modify tap sampling requirements to separate sampling sites for copper from those for lead?

AMERICAN OVERSIGHT

Concerns Expressed by Participants During Jan. 8 Federalism Consultation

Participants in the Jan. 8 federalism consultation raised the following questions/issues relating to any potential updates to the LCR:

1. **Unfunded Mandates Imposed on States, Local Governments, and Water Utilities.** EPA estimates that lead service line replacement would cost an average of $4,700 for each private house/building. Some industry estimates place this number as high as $8,700 per line. Estimates for replacement of the millions of lead service lines currently in use range from $16 to $80 billion. EPA has implied that these costs would be borne by state and local governments and agencies.

2. **Lead Service Line Inventories.** What entities will be responsible for any required inventory of lead service lines that are currently in use? How will such inventories be conducted? What would be the scope of such inventory studies (*i.e.,* entire systems, select sampling, public/private water service lines)? Who would have access to / own the information that is developed as part of a federally-mandated lead service line inventory?

3. **Partial Lead Service Line Replacement.** Consultation participants expressed concern as to the effectiveness of only replacing lead service lines that are part of public water supply systems, rather than an all-inclusive approach to replace the entirety of lead service lines, including those portions located on private property.

4. **New National Standards.** Will and, if so, how new national standards for corrosion control treatment and action levels will be established and imposed. The current target levels for lead in drinking water were developed in the context of feasibility, rather than public health standards.

5. **Sampling at Water Service Lines vs. Taps.** Will EPA be distinguishing sample levels at the connection point from public water supplies from those measured at the tap? Several plumbing fixtures currently in use consist of lead solder and piping which is not factored into measurements from public water lines, but which are a source of lead ingestion.

6. **Public Outreach and Education.** Will utilities, states, and local governments be required to develop and implement public education campaigns? Will EPA establish a clearinghouse of educational materials that can be utilized?

7. **Private Sampling Requirements.** How to implement private tap sampling and confirm that such sampling is being conducted accurately and effectively.

Proposed Areas for Comment

The following issues are expressed in WGA policy and apply to the issues raised, and questions presented, by EPA in its Jan. 8 LCR federalism consultation:

1. Respect state laws and states' role as co-regulators under the SDWA.

2. Accurately assess all costs associated with any revisions to the LCR and clearly communicate what parties must cover such costs.

AMERICAN OVERSIGHT

3. Avoid imposing unfunded mandates on states and local governments.

4. Allow for flexibility to states in receiving and dispersing federal funds and grants.

5. Incorporate state involvement, data, and expertise into decisions surrounding LCR revisions and any standards established thereby.

6. Consult with individual states, through governors' offices, to fully understand the various concerns and potential impacts of any proposed LCR revisions.

Conclusion

EPA has prioritized LCR revisions as part of its larger "war on lead" which was recently announced by Administrator Pruitt. Planned revisions, as presented by EPA in its federalism consultation, could impose substantial financial burdens and regulatory duties on states and local governments. EPA has not presented detailed plans for federal funding beyond the mechanisms currently in place.

EPA has requested comments from WGA and other state and local officials in response to the concepts presented at the Jan. 8 federalism consultation. Several provisions of WGA Policy Resolution 2017-04, *Water Quality in the West* provide the basis for comments that express the views and concerns of Western Governors on this important issue. Comments must be received by Mar. 8, 2018.

WGA Staff: Ward Scott (wscott@westgov.org)

AMERICAN OVERSIGHT

Potential CERCLA Resolution

Action Request: Are the Governors interested in pursuing a new resolution regarding the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund), 42 U.S.C. §9601 et. seq.?

Introduction

The Trump Administration has made the reform of the Superfund program a priority. CERCLA is also an area where there is a unique division of responsibility between the federal government and states, overlap with the principles espoused in WGA Policy Resolution 2017-01, *Building a Stronger State-Federal Relationship*, and a need to improve the program's operation from the perspective of state waste management officials.

This memorandum provides an overview of the Superfund program, describes the Administration's recent actions on CERCLA, and summarizes the recommendations of the Association of State & Territorial Solid Waste Management Officials (ASTSWMO) for improving the program.

Background

CERCLA was enacted to ensure the cleanup of sites that may endanger public health or the environment. It gave the Environmental Protection Agency (EPA) the authority to: (1) respond to actual and threatened releases of hazardous substances and pollutants that may pose an imminent and substantial danger; (2) compel parties responsible for the contamination (Potentially Responsible Parties or PRPs) to clean up the sites; and (3) pay for the cleanups and recover costs from PRPs.[1]

CERCLA also established a Hazardous Substance Superfund, a trust fund, and a process for federal agencies to use funding from federal appropriations. Since the 1995 expiration of taxes that originally funded the trust fund, appropriations have been the largest source of funding for the trust fund, as well as interest, fines and penalties, and recovery from PRPs. EPA may only use trust funds and conduct remedial actions at sites listed on the EPA's National Priority List (NPL).

At the request of a state, EPA may defer oversight of the cleanup of a site eligible for listing on the NPL to state cleanup programs and not list a site on the NPL.[2] States are also involved in the cleanup of sites eligible for the NPL in several ways, including:

- EPA must ensure meaningful and substantial state involvement in CERCLA response actions;[3]
- States may designate a release as its highest priority for listing on the NPL;[4]

[1] EPA's implementing regulations for CERCLA are at 40 CFR Part 300.
[2] 42 U.S.C. §9605(h).
[3] 40 CFR §300.500.
[4] 40 CFR §300.425(c); 40 CFR §300.515(c).

AMERICAN OVERSIGHT

- EPA must consult with states in the listing process and before deleting a site from the NPL prior to developing the notice of intent to delete;[5]

- EPA must communicate with states on Applicable or Relevant and Appropriate Requirements (ARARs) and respond to state comments on waivers from or disagreements about state ARARs;[6]

- EPA must consult with states before determining a remedial action;[7]

- States must agree to pay 10 percent of the cost of remedial actions, as well as all operations and maintenance costs, at non-federal NPL sites before EPA will pay for 90 percent of the remedial action;[8]

- If a state is the support agency, EPA must provide the state agency with an opportunity to review and comment on proposed plans and determinations at various stages of the cleanup;[9] and

- States can assume the lead oversight role at NPL sites under cooperative agreements with EPA.[10]

Federally owned and operated facilities are also subject to CERCLA and state laws concerning removal, remedial action, and enforcement.[11] EPA and the responsible federal agency must afford state and local officials the opportunity to participate in the planning and selection of the remedial action, including but not limited to the review of all applicable data.

Brownfields are sites where the expansion, redevelopment, or reuse is complicated by the actual or potential contamination of the site, which is not listed or proposed for listing on the NPL (and does not meet a few other statutory exclusions).[12] These sites are eligible for grants to state, local, and other government entities for characterization, assessment, and remediation.[13]

Current WGA Policy on CERCLA

Current WGA policy on CERCLA is limited to funding and liability issues with the cleanup of abandoned mines at the end of operations and preventing duplication of state financial assurance programs on the front-end of operations. Western Governors' direction on CERCLA cleanup is limited to the following in WGA Policy Resolution 2016-07, *Cleaning Up Abandoned Mines in the West*. Western Governors do not specify what remedies for CERCLA liabilities Congress and agencies should consider. In addition, the discussion of private-public partnerships is limited to only those partnerships that would facilitate cleanups by Good Samaritans. However, the cleanup of Superfund sites was emphasized by the Governors as a priority at their March 2017 breakfast with Administrator Pruitt.

AMERICAN OVERSIGHT

Opportunities to Improve Superfund in the Trump Administration

EPA Draft 2018-2022 Strategic Plan

According to EPA's Draft 2018-2022 Strategic Plan, EPA plans to:

- Provide technical support to the states through technical support centers for remediating CERCLA designated contaminated sites and returning them to productive use.
- Assist regional, state, and local leaders in reducing costs and setting science-based cleanup levels in areas designated under CERCLA.
- Facilitate prompt site CERCLA cleanup and use an "enforcement first" approach that maximizes the participation of liable and viable parties in performing and paying for cleanups.
- Address liability concerns that can be a barrier to potential reuse of Superfund sites.
- Focus its resources on the highest priority sites, particularly those that may present an immediate risk to human health or the environment, and resolving formal disputes regarding federal facility cleanups under federal facility agreements.

Superfund Task Force

Administrator Pruitt created the Superfund Task Force to determine how EPA could restructure the cleanup process, realign incentives to promote expeditious remediation and revitalization, reduce burdens on cooperating parties, and encourage private investment. The Administrator required the Task Force to consider recommendations for expanding the role and addressing the liability concerns of states, tribes, and local governments. The Task Force Report includes the following recommendations potentially relevant to Western Governors:

- Improve the process for prioritization, review, and approval of sites on the NPL.
- Evaluate EPA retaining engagement and direction of the Feasibility Studies.
- Draft a proposed policy to clarify groundwater requirements for cleanups, which should reflect input from partners to CERCLA cleanups (e.g. federal facilities, state and tribal governments, communities, and environmental organizations).
- Review the use of and funding for third party contractors and potentially modify the protocol for use of outside contractors.
- Use alternative tools to pursue liable parties at NPL sites, including designating states as leads on sites.
- Develop guidance regarding: the use of special use funds as financial incentives for Potentially Responsible Parties (PRPs) and non-liable parties; prioritizing sites with potential for redevelopment to receive special use funds; and using special account funds to preserve scarce EPA and state resources.
- Promote efficiency and consistency in settlements, as well as PRPs' ability to reserve certain rights in settlement agreements.

AMERICAN OVERSIGHT

- Develop a policy for the regions, to be shared with, or ideally co-signed by federal agencies and the states, which reinforces the importance of the timelines in Federal Facility Agreements.

- Use Memorandums of Understanding with federal agencies, states, and tribes to identify lead agencies for each site or certain phases.

- Create a workgroup to research existing state programs and identify opportunities for independent third parties to perform tasks at NPL sites, such as long-term monitoring.

- Conduct stakeholder outreach, including to states, on Environmental Liability Transfer and other risk management approaches and create a national workgroup to identify creative risk management tools.

- Outline a potential new policy for third parties to identify or create opportunities for new investment in cleaning up contaminated sites and identify potential opportunities to expand Good Samaritans or other non-liable party approaches under section 107(d) for addressing liability issues and promoting sustainable redevelopment.

- Propose potential new enforcement guidance to address liability issues acting as a barrier to reuse for local governments, including issues raised by the applicability of the statutory liability protections potentially applicable to local governments.

- Facilitate the involvement of additional funding institutions; explore partnerships that could bring unique financing options to finance revitalization; and facilitate agreements that enable more non-liable parties to fund cleanups as part of site reuse activities.

- Convene regularly scheduled meetings with states, local governments and federally recognized tribes, as well as other groups.

- Establish a federal advisory committee to obtain state and local government concerns and to evaluate the effectiveness of the Task Force Recommendations in accelerating cleanup and reuse of Superfund sites.

EPA Superfund Lists

Superfund Sites for Immediate, Intense Attention List: EPA has released a list of Superfund site targeted for immediate, intense attention, which was one of the recommendations of the Superfund Task Force. The list is comprised of sites that require timely resolution of specific issues to expedite cleanup and that would benefit from the Administrator's direct engagement. There is no commitment of additional funding associated with the inclusion of a site on the list. This list currently includes sites in CA, CO, MT, NV, OK, OR, and WA.

Superfund Redevelopment Focus List: EPA has released a list of Superfund National Priorities List sites with the greatest expected redevelopment and commercial potential based on outside interest, access to transportation corridors, land values, and other factors. This list currently includes sites in CA, CO, ID, MT, OR, UT, and WA.

AMERICAN OVERSIGHT

Leaked Infrastructure Plan

A leaked Executive Branch infrastructure plan proposes "Principles for Infrastructure Improvement" regarding Brownfields and Superfund reform:

- Replicate the Brownfield Grant/Revolving Loan Fund Program for Superfund.
- Clarify EPA's ability to create special accounts for third party funds for CERCLA cleanup response without state assurances.
- Provide liability relief to states and municipalities acquiring contaminated property through actions as sovereign governments.
- Provide EPA express settlement authority to enter into administrative agreements.
- Integrate cleanup, infrastructure, and long-term stewardship needs by creating flexibility in funding and execution requirements.
- Clarify risks to non-liable third parties that perform Superfund cleanup.

ASTSWMO Recommendations for Improving the Superfund Process

The Association of State & Territorial Solid Waste Management Officials (ASTSWMO) has provided many recent recommendations for improving Superfund in testimony and publications. These recommendations are summarized below:

Testimony from August 1, 2017 Senate Environment and Public Works Committee hearing and Testimony from January 18, 2018 House Energy & Commerce Committee hearing

- EPA regional offices need to consistently apply policy and guidance and be held accountable for ensuring consistent implementation.
- EPA should improve the process for identifying states regulations as potential ARARs.
- CERCLA and its implementing regulations should clarify that state environmental covenant and land use control laws and regulations are essential components of many remedial actions, especially those that require longer lasting remediation activities and those which utilize risk management cleanup approaches.
- CERCLA's exemption from permits should be reconsidered, because it leads to inconsistency in the requirements for PRP-led, state-led, and EPA-led cleanups.
- Prior to transferring NPL sites to states, EPA should have the authority to consider whether a state has sufficient funds to pay 100% of the operation and maintenance costs. If a state does not have sufficient funds, CERCLA should provide a process for funding state shortfalls, including greater flexibility and credit for state "in-kind" contributions to cleanups.
- EPA should involve states in identifying sites for third party investment and piloting on how to accelerate remedies at those sites, which is one of the Superfund Task Force recommendations.

AMERICAN OVERSIGHT

- States and EPA should be authorized to enter into Cost Oversight Agreements where PRPs pay state oversight costs directly.

- EPA should include states in any settlements or consent decrees with PRPs.

- The federal facilities compliance provisions of CERCLA should be strengthened and clarified in a manner similar to improvements made to the federal Solid Waste Disposal Act through the Federal Facilities Compliance Act of 1992.

- Superfund should clearly recognize that investigations and cleanups conducted under other cleanup authorities achieve results at least as protective as CERCLA actions and more readily defer action to those programs when appropriate.

- EPA should ensure that needed regulatory cleanup standards for emerging contaminants are developed and updated in an expeditious manner using sound science and the best information available.

- Congress should consider authorizing states to directly implement the Preliminary Assessment/Site Inspection component of the program and the PRP-led and funded removal and remedial program components, while removal and remedial actions conducted by EPA using funding from the Superfund Trust Fund should continue to be implemented by EPA.

- The National Contingency Plan (NCP) should be updated to provide for a more streamlined process for managing and implementing PRP-led cleanups, as compared to cleanups conducted directly by EPA using funds from the Superfund Trust Fund where additional documentation may be required to support future cost-recovery efforts and other litigation needs.

October 31, 2017 Comments of EPA 2018-2022 Draft Strategic Plan

- Although states support moving sites through the cleanup process, any reprioritization of resources to focus on remedial actions, construction completions, ready-for-reuse determinations, and NPL site deletions cannot be at the expense of the pre-remedial program.

- EPA requires funding to provide a centralized and consistent clearinghouse for technical expertise that states cannot and should not maintain individually.

"On Time and Under Budget" Superfund Site Assessment Program Process Analysis: States' Perspectives, August 2017

- Additional Site Assessment Program federal funding is required for states to conduct the evaluation of sites for consideration for additional work and possible listing on the NPL.

- Provide training and possibly policy clarification to ensure that EPA Regions and states are aware of the options and flexibility available to them under the Site Assessment Program.

- Allow states to treat each site differently on a site-specific basis for the Site Assessment Program, not through a "one size fits all" requirement.

AMERICAN OVERSIGHT

Position Paper on 128(a) Brownfields Funding, April 27, 2017

- Increase funding for the Brownfields program to reflect and accommodate the steady increase in applications for grant funding.

Position Paper on Federal Facilities, October 2013

- Involve states in the critical decisions related to the environmental response and close-out actions at federal facilities.
- Federal agencies must provide designated state regulatory personnel with appropriate access to facilities and should meet all federal and state reporting and information requirements.
- Collaborate with states in the development of federal agencies' guidance, contracting practices, policy and regulation related to environmental compliance and remediation at federal facilities.
- Federal and state agencies should continue to adopt and implement the findings of the 1996 Federal Facilities Environmental Restoration Dialogue Final Report in the environmental restoration of all federal facilities.
- Develop federal legislation to clarify that federal facilities are subject to appropriate state regulations and are not unduly shielded by sovereign immunity and lead agency authority. In addition, states continue to oppose all legislative efforts resulting in the exemptions of federal facilities from federal and state environmental statutes.
- Federal, state, and local agencies must work collaboratively in establishing long-term stewardship decisions to ensure that remedies that do not achieve unrestricted use remain protective. State and local authorities regarding institutional controls must be recognized by the federal agencies.
- States and federal agencies should work collaboratively to address emerging contaminants unique to federal facilities.
- The federal government should ensure that federal agencies request and receive adequate funding to carry out both their responsibilities for regulatory compliance with all applicable federal and state regulations, and for remediation and restoration of federal facilities.
- Federal agencies should ensure that state costs for the regulation of federal facilities, including state oversight costs, are fully and timely reimbursed to the same extent and in the same manner as other regulated entities.
- With the increased use of performance-based remediation contracts, federal agencies must ensure that regulators are adequately involved at key stages of the contracting process both pre- and post-award. In addition, federal agency oversight of contractors must be maintained to minimize possible conflicts with state regulators concerning performance standards and completion of performance objectives.
- Community involvement is a requirement of most federal and/or state environmental regulations and should be adhered to by all parties. Approaches should recognize that communities are unique and have specific needs that vary from site to site.

DRAFT

AMERICAN OVERSIGHT

January XX, 2018
Honorable Wilbur Ross
Secretary
U.S. Department of Commerce
1401 Constitution Avenue, N.W.
Washington, D.C. 20230

Dear Secretary Ross:

Robust international trade is essential to the economies of western states. Federal policies and relationships with international trade partners have created new markets for goods and[LD1] services that are grown, produced or manufactured in western states and encouraged investments in our communities and businesses. Western Governors encourage federal policies that continue providing the stability and certainty upon which these successful trade relationships depend.

Canada and Mexico are top trade partners for most western states. Nationwide, agricultural exports to Canada and Mexico totaled $43 billion in 2016. According to the National Association of Manufacturers, Canada and Mexico purchase one-third of all U.S. manufactured goods exports.

Agreements between the United States and its trade partners provide a solid foundation for our citizens to engage in productive international trade activity, enhance our economic competitiveness, and contribute to the functioning of our local governments, states, and the nation. These agreements can and should be modernized to recognize advances in science and technology, resolve outstanding issues, protect[LD2] U.S. workers and the environment, and ensure that the rules established by these agreements are enforced by all parties. Western Governors urge that any changes be undertaken without negatively affecting our citizens' ability to compete in the international marketplace or harming our overall economic competitiveness.

Western Governors support the economic opportunities for American goods and businesses facilitated by international trade agreements and encourage you to maintain the stability of the United States' trade policies.

Sincerely,

Dennis Daugaard
Governor of South Dakota
Chair, WGA

David Ige
Governor of Hawaii
Vice Chair, WGA

WGA CONGRESSIONAL ACTION REPORT

House 2018 Calendar here / Senate 2018 Calendar here

February 2-9, 2018

Reporting of action posted through 8 a.m. ET, February 9, 2018

This weekly report tracks the work of the U.S. House of Representatives and U.S. Senate, with particular emphasis on Committees covering issues of significance to the Western Governors' Association. It is published on weeks when one or both Congressional chambers are in session.

U.S. HOUSE OF REPRESENTATIVES

Actions taken on the floor this week:

- H.R. 4547 - Strengthening Protections for Social Security Beneficiaries Act of 2018
- H.R. 2371 - Western Area Power Administration Transparency Act
- H.R. 2888 - Ste. Genevieve National Historical Park Establishment Act
- S. 1438 - Gateway Arch National Park Designation
- H.R. 2504 - Treatment in Licensing Requirements for Export of Certain Echinoderms
- H.R. 219 - Swan Lake Hydroelectric Project Boundary Correction Act
- H.R. 2646 - United States-Jordan Defense Cooperation Extension Act
- H.R. 1997 - Ukraine Cybersecurity Cooperation Act of 2017
- H.R. 3851 - War Crimes Rewards Expansion Act
- H.R. 772 - Common Sense Nutrition Disclosure Act of 2017
- H.R. 1153 - Mortgage Choice Act of 2017
- H.R. 4924 - Amending the Congressional Accountability Act of 1995 to Reform the Procedures Provided for the Initiation, Investigation, and Resolution of Sexual Harassment Claims

AMERICAN OVERSIGHT

- H.Res. 724 - Requiring Each Employing Office of the House of Representatives to Adopt an Anti-harassment and Anti-Discrimination Policy, Establishing the Office of Employee Advocacy to Provide Legal Assistance and Consultation to Employees of the House Regarding Procedures and Proceedings under the Congressional Accountability Act of 1995
- H.R. 1892 - Further Extension of Continuing Appropriations Act, 2018
- H.R. 4771 - Small Bank Holding Company Relief Act of 2018
- S. 96 - Improving Rural Call Quality and Reliability Act of 2017
- H.R. 582 - Kari's Law Act of 2017 (concurring with Senate amendments)
- H.R. 1301 – DOD Appropriations

House Agriculture Committee

Majority**:**

- Hearing: Full Committee – "*USDA Secretary RE: State of the Rural Economy*." February 6, 2018 – release, Conaway statement and hearing markup/details.

AMERICAN OVERSIGHT

Governors Say Interior Department Shift Didn't Include Them

A bipartisan group representing 19 Western governors says Interior Secretary Ryan Zinke didn't consult with them before disclosing plans for a major agency reorganization.

Feb. 8, 2018, at 5:05 p.m.

AP

By DAN ELLIOTT, Associated Press

DENVER— A bipartisan group of 19 Western governors said Interior Secretary Ryan Zinke did not consult with them about major plans for reorganizing the agency and have asked him to delay implementing the proposal until he speaks with them.

The Feb. 1 letter from the Western Governors' Association said the group had asked Zinke in April 2017 to be consulted on any reshuffling of the department, which wields considerable authority over public lands in the West. They said last week that Zinke has still not sought the views of its members, who represent every state in the western half of the nation, from Texas to Hawaii.

Zinke, who was a Republican congressman from Montana, said last month he wants to reorganize the department's regions along river basins and other natural boundaries instead of state lines. The plan also calls for all of the department's component agencies, such as the National Park Service and Fish and Wildlife Service, to use the same set of regional boundaries.

Association spokesman Joe Rassenfoss said Thursday the group had not received a response from Zinke. Interior Department spokeswoman Heather Swift said the governors "are welcome to share their ideas and opinions with the secretary or their staff are also encouraged to reach out to the secretary's staff." That did not satisfy the association.

"Western governors expect to be treated as the chief executives of a sovereign level of government, not as stakeholders," Jim Ogsbury, executive director of the group, said Thursday in an email to The Associated Press. He said the governors want to be "authentic partners" in the process.

Zinke told the *Washington Post* last month that many issues the Interior Department deals with, such as a single species of fish, follow natural boundaries, not political ones.

The Interior Department oversees nearly 700,000 square miles (more than 1.8 million square kilometers) through four of its major component agencies: the Bureau of Land Management, Fish and Wildlife Service, National Park Service and Bureau of Reclamation. The Bureau of Indian Affairs, which is also part of the Interior Department, has some responsibilities for another 103,000 square miles (about 265,000 square kilometers) of Native American land.

The Western Governors' Association sent Zinke 10 questions about the reorganization plan, including why the changes were even necessary, and why all the department's units couldn't have the same regions based on state boundaries. The governors pointed out that under Zinke's plan, some states

AMERICAN OVERSIGHT

would be divided among two or three of the new regions. They asked how that would affect the department's ability to coordinate with states.

The association's letter was signed by its chairman, South Dakota Republican Gov. Dennis Daugaard, and its vice chairman, Hawaii Democrat David Ige. The association includes 12 GOP governors, six Democrats and one independent.

AMERICAN OVERSIGHT

Proposed draft letter to the Senate Environment and Public Works Committee chair from the Western Governors' Association

Western Governors offer these comments to the Chairman of Senate Committee on Environment and Public Works regarding proposed legislation to amend the Endangered Species Act (ESA). The Western Governors' Association (WGA) appreciates the Chairman's willingness to productively engage with Governors, and that the Chairman has approached this polarizing topic in an inclusive, thoughtful manner. The proposed bill reflects this fact and offers meaningful, bipartisan solutions to challenging species conservation issues.

WGA represents the Governors of the 19 western states and 3 U.S. territories in the Pacific. The association is an instrument of the Governors for bipartisan policy development, information-sharing, and collective action on issues of critical importance to the western United States. Issues surrounding the ESA and its implementation are increasingly important to Western Governors.

Congress passed the ESA in 1973, codifying the responsibility to protect imperiled species and the habitats upon which they rely. Since then, the ESA has prevented a number of extinctions and facilitated the recovery of some of our nation's most iconic species. Yet, the ESA is not perfect. We can and should continually strive to make it work better for wildlife and people.

For more than two years, the WGA Species Conservation and Endangered Species Act Initiative has engaged a diverse and bipartisan collection of interested organizations to discuss ways of improving the ESA's effectiveness and efficiency. Using a series of public workshops, facilitated work sessions, substantive webinars, and other tools, WGA gathered valuable insight that enabled Governors to adopt a series of recommendations for improving the ESA in June 2017.

Most of the WGA recommendations seek regulatory improvements because the rulemaking process does not require amending the statute. However, some recommendations can only be implemented through congressional action. The proposed bill is generally consistent with the WGA recommendations, and WGA offers its support for the portions of the bill that are consistent with existing Western Governors' policy. In other instances, the proposed bill addresses issues where WGA has no formal policy and as to those, WGA takes no position. With respect to each section of the bill:

Title I – Enhancing the Federal-State Partnership

Section 101. Definitions

Western Governors support directing the Secretary of the Interior to define the terms "great weight" and "maximum extent possible." Both terms enhance the Secretary's consultation requirements with states when implementing the ESA.

Section 102. Recovery Teams

Governors support establishing recovery teams that are empowered to develop and implement recovery plans, propose modifications to recovery plans when appropriate, and recommend delisting and downlisting, at which point the Service shall initiate a status review of the species for purposes of considering delisting or downlisting of a listed species once the established recovery

AMERICAN OVERSIGHT

goals are met. Governors also support providing impacted states the opportunity to lead the recovery team, if they so choose.

Too often, species that meet or exceed recovery goals for more than a decade remain listed. This prevents the allocation of resources to species that are truly imperiled, reduces public support for the species on the landscape, erodes support for the ESA with critical landowners, and leads to increased tension between state and federal wildlife management agencies.

Western Governors support the provision of this section that delays judicial review of a determination to delist a species until the conclusion of the statutorily mandated post-delisting monitoring review period as long as there is a federally reviewed and endorsed conservation plan in place. Delaying judicial review will allow state management plans to be implemented and evaluated for success.

Section 103. State-Federal consultation relating to conservation and recovery of wildlife.

Roughly 30 percent of all listed species have no recovery plan: some species languish more than 15 years with no discernable path to recovery. For species without recovery teams, Western Governors support empowering states to lead recovery plan development and implementation, subject to plan approval from the Secretary. This would reduce federal agency workload, allow for more efficient species recovery, and utilize local expertise to ensure local support for recovery efforts.

Section 104. Consultation with States regarding land acquisition.

Western Governors support language requiring the Secretary seek and give great weight to comments provided by states regarding proposed land acquisitions within that state's boundaries. This is consistent with WGA policy that seeks meaningful consultation opportunities for all ESA matters potentially impacting states.

Section 105. Cooperation with States and Indian Tribes.

Western Governors stress that states have primary management authority over all fish and wildlife within their borders and appreciate the language in this section recognizing this fact. Governors also support improving consultation requirements between states and the Secretary when implementing the ESA.

Section 106. State consultation regarding experimental populations.

Western Governors do not take a position regarding the specific language of this section; however, Governors generally support efforts to require increased consultation with states on matters related to ESA implementation.

Section 107. State participation in settlements.

Western Governors do not take a position regarding the specific language of this section; however, Governors generally support efforts to require increased consultation with states on matters related to ESA implementation.

Section 108. Award system for State agencies.

DRAFT

AMERICAN OVERSIGHT

No position.

Section 109. State feedback regarding U.S. Fish and Wildlife Service employees.

No position.

Title II – Encouraging Conservation Activities through Regulatory Certainty

Western Governors generally support efforts to improve regulatory certainty for public and private stakeholders that can encourage conservation. However, the Governors take no position with respect to the specific language in title II.

Title III – Strengthening Conservation Decisionmaking through Increased Transparency

Sec. 301. Policy relating to best scientific and commercial data available.

Western Governors support transparency, but also support protecting sensitive information about species or information that identifies the property of a specific landowner from disclosure under the Freedom of Information Act. Landowners frequently decline to participate in voluntary conservation programs because they fear information about their property will become part of the public record. Since private landowners control nearly 70 percent of all habitat in the United States, protecting privacy and providing certainty are critical for proper ESA implementation.

Sec. 302. Transparency of information.

Western Governors support requiring state approval before a federal agency releases state provided data. In many cases, states possess data that their laws prohibit disclosing to the public. If states provide this data to the federal agencies, and those agencies release that data to the public, states could be liable for violating their sunshine laws. Requiring state consent prior to federal agencies releasing state-provided data will alleviate this concern and result in better data for federal agencies to rely upon when making listing determinations.

Sec. 303. Information provided to States.

Western Governors support providing states with all information used in the federal decision-making process, subject to well-defined exceptions, and receiving comment from affected states prior to making a listing decision. Frequently, states possess valuable species information that federal agencies will find persuasive in listing determinations. This provision allows the federal agencies to make better decisions based on the evaluation of state data.

Sec. 304. Transparency in litigation.

No position.

Title IV—Optimizing Conservation Through Resource Prioritization

Sec. 401. Prioritization of listing petitions, reviews, and determinations.

DRAFT

AMERICAN OVERSIGHT

Western Governors support the creation of a prioritization system for addressing listing petitions, reviews, and determinations. Congress established the current listing deadlines in 1982 to encourage timely determinations from the federal agencies. However, after more than 35 years, these arbitrary deadlines have outlived their usefulness. They discourage voluntary conservation, limit the development of good science for informed decision-making, and give rise to significant litigation.

Creating a prioritization schedule ensures the immediate protection of species at the greatest risk of extinction. Further, delaying listing determinations for species with active conservation plans provides incentive for states, local government, and private individuals to engage in proactive, voluntary conservation. Incentivizing conservation can eliminate the need to list a species, which is always better than a threatened or endangered finding. Finally, a prioritization schedule gives the federal agencies flexibility to prioritize their workload without the fear of litigation.

Title V—Studies to Improve Conservation

No position.

Title VI—Reauthorization

Sec. 601. Reauthorization.

Western Governors support efforts to reauthorize appropriations for the ESA.

Western Governors acknowledge that any congressional effort to amend the ESA will be complicated and spark diverse opinions. WGA supports your work to modernize the ESA and appreciates your efforts to conduct this process in a thoughtful, bipartisan manner. Each Governor reserves judgment on whether to continue supporting this bill as it moves through the legislative process. Please do not hesitate to contact us if we can be of further assistance.

Sincerely,

Western Governors

Welcome to the Oct. 12, 2018 edition of the WGA SAC Friday Email.

SUMMARY OF COMING EVENTS & DEADLINES
(*See details in the report and master calendar below.)*

- WGA Working Lands Roundtable: Invasive Species and Restoration – (**Ongoing Today -- Livestream**)
- Deadline: SAC Recommendations for Panelists/Participants in BISI Helena Workshop – (**Today COB**)
- Input Deadline: Draft Legislative Language -- Aquatic Invasive Species Containment – **Oct. 16**
- SAC Resolutions Call – **Oct. 18**
- SAC Recommendations Sought – Planning for Burgum Rural Development Initiative – **Oct. 19**
- Input Requested: WSWC Policy Positions **– Oct. 23**
- SAC Resolutions Call – **Oct. 25**
- SAC Resolutions Call – **Nov. 1**
- Deadline: SAC Recommendations for Panelists/Participants in BISI Hawaii Workshop – **Nov. 2**
- SAC Resolutions Call – **Nov. 8**
- Meeting / Call-in: WGA, State Invasive Species Coordinators, DOI – Discussion on Quagga/Zebra Mussels Rapid Response **– Nov. 13**
- Biosecurity and Invasive Species Initiative MT Workshop – **Nov. 14**
- SAC Resolutions Call – **Nov. 15**
- WGA New Governor Orientation Luncheon – **Nov.16**
- Ballots and Winter Meeting Briefing Books Delivered – **Nov. 27**
- SAC Call (Winter Meeting Logistics) – **Dec. 6**
- Ballot Return Deadline – **Dec. 7**
- Biosecurity and Invasive Species Initiative HI Workshop – **Dec. 9-10**

AMERICAN OVERSIGHT

- SAC Winter Meeting (Hawaii, The Big Island) – **Dec. 11**
- WGA 2018 Winter Meeting (Hawaii, The Big Island) – **Dec. 10-13**

HOUSEKEEPING

2018 Winter Meeting Update

The agenda for the 2018 Winter Meeting is coming together, attendee registration is going strong and nine Governors already have registered to join Gov. David Ige Dec. 10-13 on the Big Island. The Secretaries of Agriculture and Veterans Affairs will speak, as will the Administrator of the Small Business Administration. Governors registered to join Gov. Ige include Lolo Moliga, Kate Brown, Ralph Torres, Matt Mead, Doug Burgum, Dennis Daugaard, Brian Sandoval, Gary Herbert and Mary Fallin. Ten members from SAC have registered.

Action Item: Read the attached agenda and register here if you have not already.

WGA Staff: Joe Rassenfoss (joe@westgov.org)

ACTION / REPORTING ITEMS

Biosecurity / Invasive Species

WGA Working Lands Roundtable Ongoing in Cheyenne – Join Through Livestream

The *WGA Working Lands Roundtable*, a workshop focused on the intersection of restoration and invasive species, is ongoing in Cheyenne, WY today. The event features panels focused on the *Western Governors' Biosecurity and Invasive Species Initiative*, the Chairman's Initiative of Hawaii **Gov. David Ige**. The schedule and links to watch the event livestream (both yesterday and today's sessions) is available here.

WGA Staff: Zach Bodhane (zbodhane@westgov.org)

Register Now for BISI Workshops

Registration is open for the WGA Biosecurity and Invasive Species Initiative workshop series. Please register for the workshops and send participant recommendations to Bill Whitacre. Draft agendas for all BISI workshops can be found here.

- Workshop #3: Early Detection and Rapid Response | Nov. 14 | Helena, MT | Register here.

AMERICAN OVERSIGHT

- Workshop #4: Biosecurity and Agriculture | Dec. 9-10 | Kona Coast, Island of Hawaii | Register here.

WGA Staff: Bill Whitacre (bwhitacre@westgov.org)

Quagga and Zebra Mussels

- **Sen. Bennett Aquatic Invasive Species Legislation –** One of WGA's top invasive species priorities is for DOI agencies to implement mandatory inspection and decontamination of watercraft leaving waterbodies under their jurisdiction infested with invasive quagga and zebra mussels. WGA has been working with Sen. Michael Bennet's (D-CO) office to develop bill language which would give DOI agencies the authorities necessary to conduct inspections and decontaminations. Sen. Bennet's office has indicated that they would be open to introducing the language as a stand-alone bill or attaching it to another vehicle, most likely a Bureau of Reclamation reauthorization. They have requested WGA's input on the draft bill language, as well as WGA's help to promote the language and identify a Republican Senator to co-sponsor the bill.

  Action Item: Please review the attached draft language and section-by-section description of a draft bill providing DOI authorities for aquatic invasive species containment. Send any comments on the language or suggestions for Republican co-sponsors to Bill Whitacre by COB on Oct. 16.

- **Mussels Meeting with DOI on Nov. 13, Helena MT –** On Nov. 13 (the eve of the third WGA BISI workshop), WGA plans to host a meeting between state aquatic invasive species (AIS) staff and Department of the Interior (DOI) staff, including Scott Cameron, DOI Principal Deputy Assistant Secretary for Policy, Management and Budget. The meeting will address report language included with the House FY19 Interior, Environment, and Related Agencies Appropriations bill directing DOI, USDA, and USACE to work with WGA and western states to develop a joint Federal/State incident command system for rapid response for new invasive quagga and zebra mussel detections. Committee staff did not consult with WGA or western states before including the language.

  Action Item: Participation from SAC members in this meeting, either in person or by phone, would help advance western states' goals on this issue. The meeting will run from 4:30 – 7:30 p.m. MT on Tuesday, Nov. 13th. Please call 1-800-704-9804 and enter access code: 38539797#. Please RSVP to Bill Whitacre if you plan to join the meeting.

WGA Staff: Bill Whitacre (bwhitacre@westgov.org)

Cross-Cut

Final Document: Follow-up Letter on Webinar Between Governors' Offices – WH, CEQ, EPA, USACE on One Federal Decision E.O., Delegation of Authority to States for CWA 404

The attached letter has been sent to officials at the White House, CEQ, EPA, and Corps of Engineers to follow up on the Sept. 6 webinar for SAC regarding the Administration's One Federal Decision policy and states' assumption of primary permitting under Clean Water Act Section 404. The letter includes a series of questions for the Administration on its plans for implementation and the impacts on – and potential roles for – western states.

WGA Staff: Ward Scott (wscott@westgov.org) and Britta Beckstead (bbeckstead@westgov.org)

Energy

Final WGA Document: Affordable Clean Energy Plan Letter on EPA Failure to Consult

At the Sept. 14 SAC meeting, SAC directed WGA staff to draft a letter on EPA's proposed rule to replace the Clean Power Plan, the Affordable Clean Energy plan. SAC members noted EPA's failure to consult with Governors or state agencies.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006719

The attached letter highlights this failure, reminds EPA of states' sovereign status, and emphasizes that consultation cannot be accomplished through the public comment process. It aligns with other WGA work on the state-federal relationship and WGA Policy Resolution 2017-01, *Building a Stronger State-Federal Relationship*.

WGA Staff: Britta Beckstead (bbeckstead@westgov.org)

Rural Development

Vice Chairman Initiative Planning – "Reimagining the Rural West"

WGA requests SAC assistance with populating the advisory group for the next Chair's Initiative, Reimagining the Rural West. The advisory group will provide feedback and assist with scoping efforts during the planning year of the initiative. See the attached planning activities document for more details.

Action Item: Please connect WGA with the appropriate person in your Governor's office with policy expertise related to rural development by COB on Oct. 19.

WGA Staff: Lauren DeNinno (ldeninno@westgov.org), Britta Beckstead (bbeckstead@westgov.org) and Kevin Moss (kmoss@westgov.org)

Species Conservation / ESA

Final WGA Document: Letter to DOI Regarding WGA Task Force on Collaborative Conservation

Attached please find a WGA letter to Secretary Zinke regarding the proposal to develop a Western Governors' Task Force on Collaborative Conservation. Through the Task Force, WGA will bring together high-level state and federal representatives to collaboratively identify opportunities for proactive conservation of at-risk species.

Beyond identifying at-risk species and coordinating regional species and habitat conservation efforts, the Task Force will also provide a forum for dialogue on policies, programs, data sharing, implementation and stakeholder outreach to promote a regional exercise direct mutual state-federal efforts to prioritize conservation efforts and land management strategies.

WGA Staff: Zach Bodhane (zbodhane@westgov.org)

Water

WRDA Reauthorization

- **Senate Passes Water Resources Development Legislation** – On Oct. 10, the Senate passed S. 3021, *America's Water Infrastructure Act of 2018*, by a vote of 99-1. The House had passed the bill unanimously by voice vote on Sept. 13. S. 3021 will now go to President Trump to be signed into law. The bill, which authorizes numerous water storage/delivery and flood control projects, contains several provisions which align with WGA policy and corresponds with the Western Governors' call for Congress to "authorize water resources development legislation on a regular schedule" (*i.e.*, on a biennial basis). The four titles of S. 3021 address: (i) water resources development; (ii) drinking water system improvement; (iii) energy; and (iv) other matters, including expansion of water infrastructure funding and financing.

  WGA is compiling an analysis. It will be circulated next week.

WGA Staff: Ward Scott (wscott@westgov.org)

Clean Water Act Section 401

- **Senators Send Letter to EPA Urging Agency Action on Clean Water Act Section 401** – On Oct. 4, Senators Barrasso, Capito, Daines, Enzi, and Inhofe sent a letter to EPA Acting Administrator Andrew Wheeler, urging the agency to "work with other

AMERICAN OVERSIGHT

federal agencies to determine whether new clarifying guidance or regulations are needed in light of recent of abuses of the [CWA] Section 401 process by certain states." The letter requests that the agency "take immediate steps to review" its current guidance because a "select number of states have hijacked Section 401 to delay or block the development of natural gas pipelines and a coal export terminal." This letter represents another concerning call to curtail state authority under Section 401 as part of larger efforts to streamline environmental permitting processes.

WGA Policy Resolution 2018-08, *Water Quality in the West*, expresses that "Section 401 is operating as it should, and states' mandatory conditioning authority should be retained without amendment." Additionally, a WGA-led coalition of ten associations of state officials sent an Aug. 9 letter to Congressional leadership, expressing concerns about various proposals to alter the state water quality certification under Section 401 and urging Congress to "reject any legislative or administrative effort that would diminish, impair or subordinate states' ability to manage or protect water quality within their boundaries."

- **EPA Quarterly Outreach Meeting Focusing on Water Issues –** On Oct. 8, WGA Policy Advisor Ward Scott attended EPA's Quarterly Outreach Meeting with Intergovernmental Associations at EPA headquarters, the focus of which was "Updates and Dialogue on Key Water Issues." The agenda included updates on EPA's plans for: (i) Waters of the United States – Next Steps; (ii) CWA Section 404(c) process: proposing changes to EPA's authority, pre-, during, and post-permit issuance; (iii) CWA Section 404(g): potential changes to regulations governing state assumption of CWA dredge and fill program; and (iv) CWA Section 401: state authority to certify and impose conditions on federal discharge permits.

  EPA officials stated that the agency has developed a new WOTUS rule, which is currently in review at OMB and will be released in a Notice of Proposed Rulemaking soon. However, they would not commit to a timeline or discuss specifics about what will be included in the newly developed rule.

  EPA officials expressed that the agency is heavily focused on state assumption of permitting authority under CWA Section 404 (dredge/fill permitting) and is seeking states that are interested in taking on the authority. They stated that the main impediment to state assumption – which waters can be assumed by states – has been clarified in a July 30 memo from the Army Corps of Engineers. EPA officials expressed that "at least seven states" have expressed interest in assuming permitting authority but refused to divulge those states. When questioned, EPA officials stated that no new funds would be made available to states wishing to administer the program and that it was the agency's hope that monetary benefits from faster permitting processes at the state level could offset costs. EPA stated that they will begin developing a rule to facilitate state assumption, which could be released by the end of 2018.

  Of concern, EPA officials stated that they will begin working on actions to address "perceived abuses" of Section 401 by certain states. When questioned, officials acknowledged that these efforts are largely being driven by two projects for which state certification under Section 401 was recently denied. Recognizing that Section 401 authority is a particularly sensitive issue to states, EPA officials were very reluctant to divulge any material details of their plans, including: (i) the areas of focus of any proposed changes; (ii) a timeline for agency action; (iii) whether action will take the form of a rulemaking (requiring public notice and comment) or something internal (*e.g.*, guidance, handbook update); and (iv) how the agency will engage with states in the process. Officials would not commit to conducting a federalism consultation with states at this time, even though the agency has acknowledged that action to change Section 401 would have federalism implications.

- **FY19 House Interior and Environment Appropriations Report Language Directs EPA to Develop Guidance to Finalize Guidance on the Implementation of CWA Section 401**

  The Fiscal Year 2019 Interior and Environment appropriations have been included in H.R. 3354, which passed the House by a vote of 211-198 and awaits Senate consideration. The House report (H. Rpt. 115-765) includes the following language addressing Clean Water Act (CWA) Section 401:

  > The Committee encourages the Administrator of the Environmental Protection Agency to finalize guidance on the implementation of Clean Water Act Section 401 (33 U.S.C. 1341). Such guidance shall reinforce that the statutory time period for review does not exceed one year, that the scope of review is limited to Federal water quality standards, and that waiver of the certification obligation occurs when a State fails to act within one year from the date of application. The guidance shall also include a suggested

AMERICAN OVERSIGHT

schedule for a State making a Section 401 decision, which recognizes that the entirety of the State's review must occur within one year.

This language reflects a larger effort to curtail states' authority to implement Section 401 and is particularly concerning because such a prescribed result would substantially narrow the scope of state review and limit their flexibility to processes applications for certification (which would ultimately result in a greater number of denials). To remove the concerning language from the House report, the conference committee must affirmatively contradict or reverse the position.

Action Item: Please contact the offices of any conference committee members you have relationships with (listed below) and express that the report language addressing Section 401 would likely result in the curtailment of states' authority to protect water resources within their boundaries and that the language should be affirmatively withdrawn by language in the conference committee report.

House conferees include: Rep. Rodney Frelinghuysen (R-NJ); Rep. Robert Aderholt (R-AL); Rep. Mike Simpson (R-ID); Rep. Ken Calvert (R-CA); Rep. Tom Cole (R-OK); Rep. Mario Diaz-Balart (R-FL); Rep. Tom Graves (R-GA); Rep. David Young (R-IA); Rep. John Rutherford (R-FL); Rep. Nita Lowey (D-NY); Rep. David Price (D-NC); Rep. Sanford Bishop (D-GA); Rep. Betty McCollum (D-MN); Rep. Michael Quigley (D-IL); and Rep. Chellie Pingree (D-ME).

Senate conferees include: Sen. Richard Shelby (R-AL); Sen. Susan Collins (R-ME); Sen. Lisa Murkowski (R-AK); Sen. John Hoeven (R-ND); Sen. James Lankford (R-OK); Sen. Cindy Hyde-Smith (R-MS); Sen. Patrick Leahy (D-VT); Sen. Jack Reed (D-RI); Sen. Tom Udall (D-NM); Sen. Jeff Merkley (D-OR); and Sen. Chris Coons (D-DE).

WGA Staff: Ward Scott (wscott@westgov.org)

SAC Review Sought – WSWC Policy Positions

The Western States Water Council (WSWC) 2018 Fall Meeting will be held on Oct. 23-26 in Coeur D'Alene, ID. In advance of its Meeting, WSWC has shared, for SAC review, policy positions which will be considered, including: (i) A Vision on Water; (ii) Federal Water and Climate Data Collection and Analysis Programs; (iii) Drought Preparedness, Prediction, and Early Warning Programs; (iv) Bureau of Reclamation Drought Response Program; (v) States' Water Rights and Natural Flows; (vi) Clean Water Act Jurisdiction; and (vii) State CWA Section 401 Certification Authority. Attached are the proposed WSWC Positions, along with a memorandum providing analysis of each Position as it relates to applicable WGA policy.

Action Item: Please review the proposed WSWC Policy Positions and corresponding WGA analysis and contact your state's designated WSWC representative before Oct. 23 with any concerns that can be addressed at WSWC's upcoming Fall Meeting. Also, please do not hesitate to contact me directly with any questions or concerns.

WGA Staff: Ward Scott (wscott@westgov.org)

HAPPENING ON THE HILL

WGA Congressional Action Report

See the attached WGA Congressional Action Report for all the action on the Hill this week. All the action was in the Senate this week, as the House is in recess through the elections. The full 115th Congress will be back, post-election, to complete action on funding matters. The current continuing resolution will keep the government open through Dec. 7, 2018.

WGA Staff: Holly Propst (hpropst@westgov.org)

IN THE EXECUTIVE BRANCH

DOE Seeks Comment on High-Level Waste Interpretation

AMERICAN OVERSIGHT

The Department of Energy (DOE) is seeking input (83 FR 50909, Oct. 10, 2018) on its interpretation of the definition of the statutory term "high-level radioactive waste" (HLW). The term indicates that not all wastes from the reprocessing of spent nuclear fuel ("reprocessing wastes") are HLW. Under this interpretation, DOE would dispose of some reprocessing wastes in accordance with their radiological characteristics (and not as HLW), rather than in a HLW repository. Certain wastes from Hanford in Washington and the Idaho National Laboratory would be eligible for disposal at low-level waste repositories under the interpretation. Input is due to DOE by December 10, 2018.

WGA Staff: Troy Timmons (ttimmons@westgov.org)

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006724

Sunday, June 9 through Wednesday, June 12, 2019	**WGA 2019 Annual Meeting** Vail, Colorado

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006725

October10, 2018

The Honorable Ryan Zinke
Secretary
United States Department of the Interior
1849 C Street, N.W.
Washington D.C. 20240

Dear Secretary Zinke:

Western Governors, through the Western Governors' Association (WGA), write to express our goal to engage the U.S. Department of the Interior (DOI) in an ongoing and substantive partnership to prioritize conservation actions for at-risk species and preserve the integrity of western working landscapes and communities. To accomplish this goal, WGA proposes to develop the Western Governors' Task Force on Collaborative Conservation (Task Force).

Western Governors are appreciative of your September 10, 2018 Memorandum to DOI Heads of Bureaus and Offices and your July 17, 2018 Memorandum of Understanding with the Association of Fish and Wildlife Agencies and the Western Association of Fish and Wildlife Agencies recognizing the authority and expertise of states in managing wildlife within their borders. In addition to reliance on state agency expertise and knowledge in fish and wildlife management, collaboration with states is a necessary component of any successful species conservation effort. Cooperation between states and federal agencies is necessary to address the large-scale conservation needs that span federal, state and private lands and require a cross-boundary management approach. Moreover, efforts like the State-Federal Sage Grouse Task Force demonstrate Western Governors' ability to lead regional conservation efforts.

Western states are home to diverse and bountiful wildlife populations that contribute to economic opportunity and quality of life. At the same time, a working landscape operating on the principles of multiple use is key to the prosperity of western communities. Throughout the history of the West, species conservation and working land development have been characterized as competing interests. The Task Force will challenge this narrative by providing a venue for state and federal officials to engage in solutions-oriented dialogue on policies, programs, data sharing efforts and other actions to collectively identify and prioritize actions to conserve and manage at-risk western wildlife populations and landscapes.

A truly collaborative and proactive approach to species conservation efforts in the West is long overdue. Western Governors propose to build upon ongoing efforts to increase coordination among stakeholders, pursue on-the-ground conservation actions, and improve habitat for at-risk species. Our objective is to create a coordinated regional effort to identify at-risk species and landscapes and direct a multi-faceted response long before the threat of an Endangered Species Act (ESA) listing is imminent. The explanatory statement accompanying H.R. 1625, the Consolidated Appropriations Act of 2018 (Pub. L. 115-141), recognizes the value of such an approach and notes that the U.S. Fish and Wildlife Service (Service):

> should look to its other programs and its partners to fund and implement conservation activities on the ground. The Service is commended for its efforts in the Southeast to work with States and others to preclude the need to list many of the

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006726

hundreds of species recently petitioned for listing, and is expected to expand this model nationwide.

Through the Task Force, Western Governors propose to partner with the Service and other DOI agencies to fulfill this congressional direction. Few groups are as well situated as WGA to lead such an effort. Western Governors have a proven track record in leading regional dialogues on Species Conservation and the ESA, National Forest and Rangeland Management, and Biosecurity and Invasive Species.

Governors are ready, willing and able to engage with DOI to achieve mutually-identified conservation goals developed in concert with private landowners, local governments, and multiple stakeholders. We look forward to your response and working with you to advance proactive conservation solutions for the betterment of western wildlife and communities.

Sincerely,

David Ige
Governor of Hawai'i
Chair, WGA

Doug Burgum
Governor of North Dakota
Vice Chair, WGA

Jim Kurth, Acting Director, U.S. Fish and Wildlife Service

AMERICAN OVERSIGHT

Western States Water Council – Fall 2018 Policy Positions to be Considered

The Western States Water Council (WSWC) 2018 Fall Meeting will be held on October 23-26 in Coeur D'Alene, Idaho. This memorandum is intended to provide a summary of WSWC policy positions that will be considered for renewal or adoption.

Position Nos. 384, 385, 386, 387, and 388 are scheduled to sunset and will be considered for revision/re-adoption. Position 410, addressing "Waters of the United States" and the jurisdictional scope of the federal Clean Water Act (CWA) will be considered for revision. Additionally, a newly-drafted position addressing state authority under CWA Section 401 will be considered.

Action Item: Please review the proposed WSWC Policy Positions and corresponding WGA analysis and contact your state's designated WSWC representative with any concerns that can be addressed at WSWC's upcoming Fall Meeting. For additional information, please contact WGA Policy Advisor Ward Scott (wscott@westgov.org)

(Sunsetting) Position 384: A Vision on Water

WSWC Principles

- Water must be elevated to a higher public policy priority given the importance of the resource to our public health, economy, food security, environment, and western way of life. We must cultivate a western water conservation ethic through greater understanding of, and appreciation for, water's value.

- State primacy is fundamental to a sustainable water future. Federal water planning, policy development, regulation, protection, and management must recognize, defer to, and support state water laws, plans, policies, programs, water rights administration, adjudication and regulation, compacts and settlements. Rather than attempt to dictate water policy, the federal government should engage states early in meaningful consultation and contribute its fair share of funding to support implementation of state water planning and management, thus avoiding, or at least minimizing, the need for federal regulatory mandates.

- An integrated, collaborative, and grassroots approach to water resources management is critical to the environmentally sound and efficient use of our water resources. States, federal agencies, tribes, and local communities should work together to identify water problems and develop optimal solutions at the lowest appropriate level. Striving for cooperation rather than litigation, we must recognize and respect national, state, regional, local and tribal differences in values related to water resources.

- Sustainable water resource management and development should yield long term economic growth, enhanced protection and restoration of significant aquatic ecosystems, and improved economic and environmental security and quality of life.

AMERICAN OVERSIGHT

- A secure and sustainable water future will be determined by our ability to maintain, replace, expand and make the most efficient use of critical water infrastructure. We must preserve and improve existing infrastructure, as well as encourage and support innovative water supply strategies and new storage options to better balance supplies with demands.

- All levels of government must prioritize the collection, analysis and open sharing of reliable data regarding water availability, quality, and usage given its importance to research for sound science and data driven decision making.

Applicable WGA Policy

- Policy Resolution 2018-08, *Water Resource Management in the West:*

    - **(A)(1):** Water is a crucial resource for communities, industries, habitats, farms, and western states. Clean, reliable water supplies are essential to maintain and improve quality of life. The scarce nature of water in much of the West makes it particularly important to our states.

    - **(A)(2):** States are the primary authority for allocating, administering, protecting, and developing water resources, and they are primarily responsible for water supply planning within their boundaries. States have the ultimate say in the management of their water resources and are best suited to speak to the unique nature of western water law and hydrology.

    - **(A)(4):** Strong state, regional and national economies require reliable deliveries of good-quality water, which in turn depend on adequate infrastructure for water and wastewater.

    - **(A)(5):** Western Governors recognize the essential role of partnership with federal agencies in western water management and hope to continue the tradition of collaboration between the states and federal agencies.

    - **(B)(3) Western States Require Innovative and Integrated Water Management:** Western Governors believe effective solutions to water resource challenges require an integrated approach among states and with federal, tribal and local partners. Federal investments should assist states in implementing state water plans designed to provide water for municipal, rural, agricultural, industrial and habitat needs, and should provide financial and technical support for development of watershed and river basin water management plans when requested by states.

      Integrated water management planning should also account for flood control, water quality protection, and regional water supply systems. Water resource planning must preserve state authority to manage water through policies which recognize state law and financial, environmental and social values of water to citizens of western states today and in the future.

    - **(B)(4) Western States Need Reliable Water Resources Information:** Basic information on the status, trends and projections of water resource availability is essential to sound water management.

AMERICAN OVERSIGHT

Analysis: The principles expressed in WSWC's Position No. 384 are reflective of, and in no way conflict with, the policy positions included in WGA Policy Resolution 2018-08.

(Sunsetting) Position No. 385: Federal Water and Climate Data Collection and Analysis Programs

WSWC Policy Position: WSWC urges the Administration and Congress to give a high priority to the allocation and appropriation of sufficient funds for weather and climate observation programs.

Nexus to WGA Policy:

- Policy Resolution 2018-08, *Water Resource Management in the West*:
    - **(B)(4) Western States Need Reliable Water Resource Information:** Basic information on the status, trends and projections of water resource availability is essential to sound water management.
    - **(B)(4)(a) Basic Water Data:** Western Governors support the U.S. Geological Survey's Groundwater and Streamflow Information Program, the Natural Resources Conservation Service's Snow Survey and Water Supply Forecasting Program, the National Oceanic and Atmospheric Administration's weather and hydrology-related data collection, monitoring, and drought information programs, and the National Aeronautics and Space Administration's National Land Imaging (Landsat) Program with its thermal infrared sensor. Western Governors support federal efforts to coordinate water data gathering and information programs across multiple agencies.
    - **(B)(4)(b) Extreme Weather Events Planning:** Western Governors recognize the significant potential impacts of extreme weather events and variability in water supplies. Western Governors urge Congress and the Administration to work closely with states and other resource managers to improve predictive and adaptive capabilities for extreme weather variability and related impacts. We specifically urge the federal government to place a priority on improving the sub-seasonal and seasonal precipitation forecasting capabilities that could support water management decision-making.

Analysis: WSWC's Position No. 385 is largely reflective of, and in no way conflicts with, the policy positions included in WGA Policy Resolution 2018-08.

(Sunsetting) Position No. 386: Drought Preparedness, Prediction, and Early Warning Programs

WSWC Policy Position: WSWC urges the Administration and Congress to support federal programs including, but not limited to, NIDIS and other programs designed to improve our forecasting and response capabilities.

AMERICAN OVERSIGHT

Nexus to WGA Policy:

- Policy Resolution 2018-08, *Water Resource Management in the West*:

    - **(B)(5) Drought Preparedness and Response:** As exceptional levels of drought persist across the West, Governors are leading on drought preparedness and response through the Western Governors' Drought Forum. The Drought Forum provides a framework for leaders from states, businesses, non-profits, communities, research organizations and federal agencies to share best practices and identify policy options for drought management.

    - **(B)(5)(a) Data and Analysis:** Basic data on snowpack, streamflow and soil moisture is essential to understanding drought. Though a great deal of information already exists, enhanced drought data collection and real-time analysis at a higher resolution is essential. Governors support state and federal efforts to maintain adequate collection of drought and water data, enhance data networks where appropriate, and facilitate better use of existing information.

      The Governors appreciate the collaborative efforts on drought provided through NOAA's National Weather Service River Forecast Centers and Weather Forecast Offices, and the Office of Atmospheric Research's labs and programs, such as the National Integrated Drought Information System (NIDIS).

Analysis: WSWC's Position No. 386 is largely reflective of, and in no way conflicts with, the policy positions included in WGA Policy Resolution 2018-08.

Position No. 387: Bureau of Reclamation Drought Response Program

WSWC Policy Positions:

- WSWC strongly supports legislation to permanently authorize Title I activities under the Reclamation States Emergency Drought Relief Act and provide for adequate appropriations to meet priority needs and continue the Reclamation Drought Response Program.

- WSWC urges and encourages the Administration and Congress to assess and consider the need for a comprehensive national drought preparedness and response program on par with federal efforts to address other natural disasters such as hurricanes, tornadoes, and similar extreme events.

Nexus to WGA Policy:

- Policy Resolution 2018-08, *Water Resource Management in the West*:

    - **(B)(4)(f) Working within Institutional Frameworks to Manage Drought:** Legal frameworks and regulatory regimes can sometimes limit the ability of state, local and federal agencies to respond quickly to drought conditions. Governors believe that innovative, flexible policy solutions, such as streamlined processing of temporary water transfers, should be considered when managing drought.

AMERICAN OVERSIGHT

- **(B)(4)(g) Communication and Collaboration:** Communication among state officials, federal agency representatives, water providers, agricultural users and citizens is a crucial component of effective drought response. The Western Governors' Drought Forum will continue to provide a framework for sharing best practices through its online resource library, informational webinars, and strategy sharing meetings for the duration of this resolution.

Analysis: WGA policy does not address activities under the Reclamation States Emergency Drought Relief Act or Reclamation Drought Response Program. Otherwise, WSWC's Position No. 387 aligns with the policy positions included in WGA Policy Resolution 2018-08.

(Sunsetting) Position No. 388: States' Water Rights and Natural Flows

WSWC Policy Positions:

- WSWC urges USACE to recognize the legal right of states to develop, use, control, distribute and allocate states' surface waters, including natural flows.

- Any policy of USACE to require storage contracts to access natural flows within a reservoir boundary would be a violation of states' rights to develop, use, control, and distribute surface water.

- WSWC opposes any efforts that would diminish the primary and exclusive authority of states over the allocation of surface water.

Nexus to WGA Policy

- Policy Resolution 2018-08, *Water Resource Management in the West*:

  - **(B)(1) State Primacy in Water Management:** As the preeminent authority on water management within their boundaries, states have the right to develop, use, control and distribute the surface water and groundwater located within their boundaries, subject to international treaties and interstate agreements and judicial decrees.

  - **(B)(1)(a) Federal Recognition of State Authority:** The federal government has long recognized the right to use water as determined under the laws of the various states; Western Governors value their partnerships with federal agencies as they operate under this established legal framework.

    While the Western Governors acknowledge the important role of federal laws such as the Clean Water Act (CWA), the Endangered Species Act (ESA), and the Safe Drinking Water Act (SDWA), nothing in any act of Congress or Executive Branch regulatory action should be construed as affecting or intending to affect states' primacy over the allocation and administration of their water resources.

AMERICAN OVERSIGHT

Authorization of water resources development legislation, proposed federal surplus water rulemakings, and/or storage reallocation studies should recognize natural flows and defer to the states' legal right to allocate, develop, use, control, and distribute their waters, including but not limited to state storage and use requirements.

Analysis: WSWC's Position No. 388 is largely reflective of, and in no way conflicts with, the policy positions included in WGA Policy Resolution 2018-08.

(Proposed Updates) Position 410: Clean Water Act Jurisdiction

WSWC Policy Positions: Ensure that any federal effort to clarify or define CWA jurisdiction and define "Waters of the United States":

1. Gives as much weight and deference as possible to state needs, priorities, and concerns;

2. Includes robust and meaningful state participation and consultation in the development and implementation of any rule acknowledging the inherent federalism implications;

3. Gives full force and effect to Congress' intent and the purposes of CWA language deferring to state authority over water resources;

4. Provides for a rebuttable presumption that perennial streams are WOTUS, and that ephemeral and intermittent streams are not, but rather are presumed to be protected as "waters of the state" under state law and policy;

5. Recognizes that Justice Kennedy's "significant nexus" test in *Rapanos* requires a connection between waters that is more than speculative or insubstantial to establish jurisdiction. Federal CWA jurisdiction efforts should also quantify "significance" to ensure that the term's usage does not extend jurisdiction to waters with a *de minimis* connection to jurisdictional waters, applied to individual waters on a case-by-case and not watershed basis;

6. Complies with the limits Congress and the U.S. Supreme Court have placed on CWA jurisdiction, while providing clear and recognizable limits to the extent of CWA jurisdiction, consistent with the plurality opinion authored by Justice Scalia in *Rapanos*;

7. Specifically excludes waters and features outside the scope of CWA jurisdiction, including:

    a. Groundwater, including any subsurface water, and groundwater that may discharge to surface waters;

    b. Man-made conveyances and related control features for water supply, stormwater and flood water management, including: (i) agricultural irrigation canals, laterals and ditches and drains; (ii) municipal and industrial water supply pipelines, conduits, and aqueducts; (iii) storm sewers, drains, and flood flow bypass features; (iv) roadside barrow pits, ditches, and culverts.

    c. Man-made impoundments on ephemeral or intermittent streams (or off stream

AMERICAN OVERSIGHT

impoundments), such as farm and stock ponds, dugouts and similar features; and

d. Dip ponds that are excavated on a temporary, emergency basis to combat wildfires and address dust abatement; and

e. Isolated, intrastate waters and wetlands, including prairie potholes and playa lakes, as well as intrastate terminal lakes, individually or in combination with similarly situated waters, and

f. Ephemeral and intermittent streams; and

g. Wetlands adjacent to intermittent streams.

8. Acknowledges that states have authority to protect all "waters of the state," and that excluding waters from federal jurisdiction does not mean that they will be exempt from state regulation and protection;

9. Continues to provide access to appropriate technical and financial assistance to the States to protect and improve water quality under existing EPA programs without regard to jurisdictional determinations;

10. Continues to provide access to appropriate technical and financial assistance to the States to protect and improve water quality under existing EPA programs without regard to jurisdictional determinations;

11. Provides for mapping of jurisdictional waters as a joint federal/state/tribal effort employing the best available data and tools, with appropriate provisions and processes for map maintenance; and

12. Includes an appropriate delay in the effective date of any new rule or otherwise allows for a transition enabling States to take such actions as may be necessary to address any gaps in state law, regulation and protection.

Nexus to WGA Policy:

- Policy Resolution 2018-12, *Water Quality in the West*:
    - **(B)(1) State Authority and Implementation of CWA:** States have jurisdiction over water resource allocation decisions and are responsible for how to balance state water resource needs within CWA objectives. New regulations, rulemaking, and guidance should recognize this state authority.
    - **(B)(1)(a) CWA Jurisdiction:** Western Governors urge EPA and the Corps to engage the states as co-regulators and ensure that state water managers have a robust and meaningful voice in the development of any rule regarding CWA jurisdiction, particularly in the early stages of development before irreversible momentum precludes effective state participation.
    - **(B)(1)(d) Groundwater:** States have exclusive authority over the allocation and administration of rights to use groundwater located within their borders and are

AMERICAN OVERSIGHT

primarily responsible for allocating, protecting, managing, and otherwise controlling the resource. The regulatory reach of the CWA was not intended to, and should not, be applied to the management and protection of groundwater resources. The federal government should not develop a groundwater quality strategy; instead, it must recognize and respect state primacy, reflect a true state-federal partnership, and comply with current federal statutory authorities.

Analysis: WSWC's policy position does not conflict with WGA policy and clearly reflects WGA's emphasis on state authority under CWA (including states' exclusive authority over groundwater resources). However, WSWC's positions go further in defining the appropriate jurisdictional bounds (and exclusions) of CWA. WGA has, in past communications with EPA and USACE, deferred to WSWC's technical analysis of such issues and has incorporated, by reference, WSWC comments to the agencies.

(New Position) WSWC Policy Position in Support of State CWA Section 401 Certification Authority

WSWC Policy Positions:

- WSWC opposes any changes that may weaken the deference to state water laws and diminish the primary state authority and responsibility for the appropriation, allocation, development, conservation, and protection of their water resources, including the protection of water quality and designated uses, as well as minimum streamflows.

- WSWC strongly supports early state engagement in federal permitting and licensing actions and the integration of state and federal environmental requirements and review processes for critical infrastructure.

Nexus to WGA Policy:

- Policy Resolution 2018-12, *Water Quality in the West*:

    - **(B)(2) Permitting:** Actions taken by EPA in its CWA permitting processes should not impinge upon state authority over water management or the states' responsibility to implement CWA provisions.

    - **(B)(2)(a) State Water Quality Certification:** Section 401 of the CWA requires applicants for a federal license to secure state certification that potential discharges from their activities will not violate state water quality standards. Section 401 is operating as it should, and states' mandatory conditioning authority should be retained without amendment.

Analysis: WSWC's newly proposed policy position addressing state authority under CWA Section 401 aligns with WGA policy.

WGA Staff: Ward Scott (wscott@westgov.org)

AMERICAN OVERSIGHT

Western States Water Council

A VISION ON WATER

Position #384 adopted on October 9, 2015

Our Mission

To ensure that the West has an adequate, secure and sustainable supply of water of suitable quality to meet its diverse economic and environmental needs now and in the future.

Our Present Condition

Water in the West is an increasingly scarce and precious resource. Population growth, competing economic and ecological demands, and changing social values have left surface and ground water supplies stressed in many areas. This has increased the number and complexity of conflicts among users and uses. A secure water future is becoming more costly and increasingly uncertain given our unpredictable climate, aging and often inadequate infrastructure, data limitations regarding water supplies and demands, competing or poorly defined water rights, and a constantly evolving regulatory landscape. Effectively addressing these challenges will require stronger collaboration and cooperation that transcends political and geographic boundaries between states, federal agencies, tribes, and local communities.

Our Principles

- Water must be elevated to a higher public policy priority given the importance of the resource to our public health, economy, food security, environment, and western way of life. We must cultivate a western water conservation ethic through greater understanding of, and appreciation for, water's value.
- State primacy is fundamental to a sustainable water future. Federal water planning, policy development, regulation, protection, and management must recognize, defer to, and support state water laws, plans, policies, programs, water rights administration, adjudication and regulation, compacts and settlements. Rather than attempt to dictate water policy, the federal government should engage states early in meaningful consultation and contribute its fair share of funding to support implementation of state water planning and management, thus avoiding, or at least minimizing, the need for federal regulatory mandates.
- An integrated, collaborative, and grassroots approach to water resources management is critical to the environmentally sound and efficient use of our water resources. States, federal agencies, tribes, and local communities should work together to identify water problems and develop optimal solutions at the lowest appropriate level. Striving for cooperation rather than litigation, we must recognize and respect national, state, regional, local and tribal differences in values related to water resources.
- Sustainable water resource management and development should yield long term economic growth, enhanced protection and restoration of significant aquatic ecosystems, and improved economic and environmental security and quality of life.
- A secure and sustainable water future will be determined by our ability to maintain, replace, expand and make the most efficient use of critical water infrastructure. We must preserve and improve existing infrastructure, as well as encourage and support innovative water supply strategies and new storage options to better balance supplies with demands.
- All levels of government must prioritize the collection, analysis and open sharing of reliable data regarding water availability, quality, and usage given its importance to research for sound science and data driven decision making.

AMERICAN OVERSIGHT

Position No. ~~385~~
(See also No. 385, 345, 320, 284, 256, and 235)
Adopted as revised October ~~9, 2015~~26, 2018

POSITION
of the
WESTERN STATES WATER COUNCIL
regarding
FEDERAL WATER AND CLIMATE DATA COLLECTION AND ANALYSIS PROGRAMS
~~Manhattan, Kansas~~ Coeur d'Alene, Idaho
October ~~9, 2015~~26, 2018

WHEREAS, the Western States Water Council is a policy advisory body representing eighteen states, and has long been involved in western water conservation, development, protection, and management issues, and the member states and political subdivisions have long been partners in cooperative federal water and climate data collection and analysis programs; and

WHEREAS, in the West, water is a critical, vital resource and sound decision-making demands accurate and timely data on precipitation, temperature, evapotranspiration, soil moisture, snow depth, snow water content, streamflow, groundwater, water quality and similar information; and

WHEREAS, the demands for water and related climate data continue to increase, and this information is used by federal, state, tribal, and local government agencies, as well as private entities and individuals to: (1) forecast flooding, drought and other climate-related events; (2) project future water supplies for agricultural, municipal, and industrial uses; (3) estimate streamflows for hydropower production, recreation, and environmental purposes, such as for fish and wildlife management, including endangered species needs; and (4) facilitate water management and administration of water rights, decrees, and interstate compacts; and

WHEREAS, without timely and accurate information, human life, health, welfare, property, and environmental and natural resources are at considerably greater risk of loss; and

WHEREAS, critical and vital information is gathered and disseminated through a number of important federal programs including, but not limited to: (1) the Snow Survey and Water Supply Forecasting Program, administered by the National Water and Climate Center (NWCC) in Portland, Oregon, and funded through USDA's Natural Resources Conservation Service (NRCS); (2) NWCC's Soil and Climate Analysis Network (SCAN); (3) the U.S. Geological Survey's (USGS) ~~Cooperative Streamgaging Program~~ Groundwater and Streamflow Information Program (GWSIP) and National Streamflow ~~Information Program (NSIP)~~Network, which are funded through the Department of Interior; (4) Landsat thermal data, archived and distributed by the USGS, and other remotely-sensed data acquired through the National Atmospheric and Space Administration (NASA) and its water-related missions; (~~5) USGS ground water measurement and monitoring~~; (~~6~~5) the National Oceanic and Atmospheric Administration's (NOAA) National Weather Service and Climate Programs Office; and (~~7~~6) the Environmental Protection Agency's National Environmental Information Exchange Network (NEIEN); and

WHEREAS, state-of-the-art technology has been developed to provide real or near real-time data in formats that can be shared and used by different computer programs with the potential to vastly improve the water-related information available to decisionmakers in natural resources and emergency management, and thus better protect the public safety, welfare and the environment; and

AMERICAN OVERSIGHT

WHEREAS, over a number of years, the lack of capital investments in water data programs has led to the discontinuance, disrepair, or obsolescence of vital equipment needed to maintain existing water resources related data gathering activities; and

WHEREAS, there is a serious need for adequate and consistent federal funding to maintain, restore, modernize, and upgrade federal water, weather and climate observation programs, not only to avoid the loss or further erosion of critical information and data, but also to address new emerging needs, with a primary focus on coordinated data collection and dissemination.

NOW THEREFORE BE IT RESOLVED, that the Western States Water Council urge the Administration and the Congress to give a high priority to the allocation and appropriation of sufficient funds for these critical, vital programs, which benefit so many, yet have been or are being allowed to erode to the point that it threatens the quantity and quality of basic data provided to a myriad, growing and diffuse number of decisionmakers and stakeholders, with significantly adverse consequences.

AMERICAN OVERSIGHT

F:\USERS\CHERYL\COMTG\Coeur d'Alene, ID - Oct 2018\Positions\#385_rev_Water & Climate Data Collection_2018Sep.docx

AMERICAN OVERSIGHT

Position No. ~~386~~
Readopted
(formerly Position No. 386, October 9, 2015 and 346, October 12, 2012)

POSITION
of the
WESTERN STATES WATER COUNCIL
regarding
DROUGHT PREPAREDNESS, PREDICTION AND EARLY WARNING PROGRAMS
~~Manhattan, Kansas~~Coeur d'Alene, Idaho
October ~~9, 2015~~26, 2018

WHEREAS, the Western States Water Council is a policy advisory body representing eighteen states, and has long been involved in western water conservation, development, protection, and management issues, and western states have a long history of promoting drought preparedness, planning and response programs, ~~-~~in cooperation with federal agencies; and

WHEREAS, in the West, water is often scarce even in "wet" years and drought is a recurring threat to our environment, economy and way of life – affecting not only the West, but also the Nation; and

WHEREAS, according to the National Centers for Environmental Information, from 2015-2017, ~~three of the top five national natural disasters, in terms of~~ economic losses~~, have been droughts, and the current exceptional drought in California and~~ due to drought have been estimated at $11.1B while also contributing to $34.1B in wildlife losses; and

WHEREAS, continuing exceptional, extreme ~~to~~and severe conditions ~~along~~ afflict the West ~~Coast~~ and elsewhere, highlighting the need for greater attention to developing more comprehensive and coordinated drought prediction, preparedness, planning and response programs at all levels; and

~~**WHEREAS**, the Western Governors' Association has taken a lead role in identifying needs and best management practices through an ongoing series of forums, webinars and reports; and~~

WHEREAS, there is a need for maintaining and improving existing monitoring networks that help provide drought early warning signals, as well as for tracking the impacts of drought; and

WHEREAS, there is a continuing need for developing new monitoring technologies, such as remote sensing, that provide more timely data on water availability and better spatial coverage for assessing drought impacts; and

WHEREAS, early drought warning systems facilitate early drought assessment and mitigation efforts to minimize drought impacts; and

WHEREAS, there is a need for continuing federal research to develop new predictive capability for precipitation at ~~intra~~subseasonal to ~~interannual~~seasonal time scales – such as research on the influence of other ocean-atmosphere interactions on the El Niño-Southern Oscillation (ENSO), the only factor now providing some limited understanding ~~of~~ for precipitation and temperature prediction; and

WHEREAS, there is a continuing need for a permanent federal role in coordination of research programs related to drought early warning and prediction;

AMERICAN OVERSIGHT

NOW THEREFORE BE IT RESOLVED, that the Western States Water Council urge the Administration and the Congress to support federal programs including but not limited to the National Integrated Drought Information System (NIDIS), under the National Oceanic and Atmospheric Administration (NOAA), and other programs designed to improve our forecasting and response capabilities.

AMERICAN OVERSIGHT

Position No. ~~387~~
Readopted
(formerly Position No. 387, October 9, 2015 and #347, October 12, 2012)

POSITION
of the
WESTERN STATES WATER COUNCIL
regarding
BUREAU OF RECLAMATION DROUGHT RESPONSE PROGRAM
~~Manhattan, Kansas~~Coeur d'Alene, Idaho
October ~~9, 2015~~26, 2018

WHEREAS, the Western States Water Council is a policy advisory body representing eighteen states and since its inception~~,~~ the Council has been actively involved in national drought preparedness, planning and response, as well as related policy and program development and implementation; and

WHEREAS, in the West, water is often scarce ~~even in "wet" years~~ and drought is a recurring threat ~~to our environment, economy and way of life – affecting not only the West, but also the Nation~~; and

WHEREAS, ~~three of the top five national natural disasters, in terms of~~ according to the National Centers for Environmental Information, from 2015-2017, economic losses~~, have been droughts, and the current exceptional drought in California and~~ due to drought have been estimated at $11.1B~~extreme to severe conditions along the West Coast and elsewhere highlight the need for greater attention to developing more comprehensive and coordinated drought prediction, preparedness, planning and response programs at all levels~~; and

~~**WHEREAS**, the Western Governors' Association has taken a lead role in identifying needs and best management practices through an ongoing series of forums, webinars and reports; and~~

WHEREAS, the Reclamation States Emergency Drought Relief Act of 1991 (43 U.S.C. 2214(c)) and subsequent reauthorizations, under Title I, provide only temporary authority for some critical Reclamation actions; and

WHEREAS, Reclamation's current Drought Response Program supports a proactive approach to drought and provides financial assistance to water managers and users to: (1) develop drought contingency plans; (2) implement drought resiliency projects to build the capacity of communities to mitigate and respond to drought – increasing the reliability of water supplies, improving water management and operational flexibility, facilitate~~e~~ing voluntary sales, transfers or exchanges of water, and provide~~e~~ing benefits for fish and wildlife and the environment; and (3) undertake emergency actions to minimize losses due to drought through temporary construction activities and other activities, including water purchases and the use of Reclamation facilities to convey and store water; and

WHEREAS, there is a continuing need for making permanent the temporary authority allowing Reclamation the flexibility to continue delivering water to meet authorized project purposes, meet environmental requirements, respect state water rights, work with all stakeholders, and provide leadership, innovation, and assistance~~,; and~~

NOW THEREFORE BE IT RESOLVED, that the Western States Water Council strongly supports legislation to permanently authorize Title I activities under the Reclamation States Emergency Drought Relief Act, and provide for adequate appropriations to meet priority needs and continue the Reclamation Drought Response Program.

BE IT FURTHER RESOLVED that the Council urge and encourage the Administration and the Congress to assess and consider the need for a comprehensive national drought preparedness and response program on par with federal efforts to address other natural disasters such as hurricanes, tornadoes and similar extreme events.

AMERICAN OVERSIGHT

Position No. ~~387~~

AMERICAN OVERSIGHT

Position No. 4__

(formerly Position No. 388, October 9, 2015; 348, October 12, 2012)

POSITION
of the
WESTERN STATES WATER COUNCIL
regarding
STATES' WATER RIGHTS AND NATURAL FLOWS
Coeur d'Alene, Idaho
October 26, 2018

WHEREAS, the Western States Water Council strongly supports preservation of the States' inherent right to develop, use, control, and distribute water; and

WHEREAS, States have exclusive authority over the allocation and administration of rights to the use of surface water located within their borders and are primarily responsible for protecting, managing and otherwise controlling the resource; and

WHEREAS, States are in the best position to protect and allow for the orderly and rational allocation and administration of the resource through state laws and regulations that are specific to their individual circumstances; and

WHEREAS, the Flood Control Act of 1944 specifically declared the policy of Congress to recognize the interests and rights of the Missouri River Basin States in determining the development of the watersheds within their borders and likewise their interests and rights in water use and control, and to preserve and protect to the fullest extent established and potential uses of the rivers' natural flows, those flows being the natural flows that would pass through the states in the absence of the U.S. Army Corps of Engineers dams; and

WHEREAS, the federal government has long recognized the right to use water as determined under the laws of the various states; and

WHEREAS, the various states have the authority and duty to manage permitting of stored water to supplement natural flows; and

WHEREAS, federal agencies in the western states, such as the Bureau of Reclamation, generally recognize western water laws and natural flows through reservoir operations, with releases from storage that supplement natural flows, and water service contracts that supplement natural flow; and

WHEREAS, representatives of the U.S. Army Corps of Engineers have indicated that all waters entering its Missouri River mainstem reservoirs are stored waters to be allocated and controlled by the U.S. Army Corps of Engineers without recognition of the States' rights to natural flows being separate from the captured floodwaters stored within those reservoirs; and

AMERICAN OVERSIGHT

(formerly Position No. 388, October 9, 2015; 348, October 12, 2012)

WHEREAS, in its Proposed Rule on Use of U.S. Army Corps of Engineers Reservoir Projects for Domestic, Municipal & Industrial Water Supply (81 FR 91556) the Corps asserts that its contracting authority over surplus waters was intended by Congress to include "withdrawals that could potentially have been accommodated from the natural flow of the river had the reservoir never been constructed" (at 91565).

NOW, THEREFORE, BE IT RESOLVED, that the Western States Water Council urge the Army Corps of Engineers to recognize the legal right of the States to the development, use, control, distribution and allocation of the States' surface waters, including natural flows.

BE IT FURTHER RESOLVED, that any policy of the U.S. Army Corps of Engineers to require storage contracts to access natural flows within a reservoir boundary would be a violation of the States' rights to develop, use, control, and distribute surface water.

BE IT FURTHER RESOLVED, that the Western States Water Council opposes any and all efforts that would diminish the primary and exclusive authority of States over the allocation of surface water.

**Nebraska abstained from voting on the position in October 2012.*

AMERICAN OVERSIGHT

Position No. ___
Revised and Readopted
(*see former Positions No. 410 – June 29, 2017 and No. 369 – July 18, 2014)*

RESOLUTION
of the
WESTERN STATES WATER COUNCIL
regarding
CLEAN WATER ACT JURISDICTION
Couer d'Alene, Idaho
October 26, 2018

WHEREAS, the Clean Water Act (CWA) is built upon the principle of cooperative federalism in which Congress intended the states, the Environmental Protection Agency (EPA), and the U.S. Army Corps of Engineers to implement the CWA as partners, delegating co-regulator authority to the states;

WHEREAS, the CWA's cooperative federalism framework has resulted in significant water quality improvements since the law's enactment in 1972, and western states have made great strides in protecting water quality and coordinating water quality and water quantity decisions; and

WHEREAS, EPA has actively sought meaningful state consultation, engagement and participation in its review and development of a new proposed rule to define Waters of the United States; and

WHEREAS, States are best positioned to manage the water within their borders because of their on-the-ground knowledge of the unique aspects of their hydrology, geology, and legal frameworks; and

WHEREAS, States have both state statutory and constitutional authority pursuant to their "waters of the state" jurisdiction to protect the quality of waters within their borders and such jurisdiction generally extends beyond the limits of federal jurisdiction under the CWA; and

WHEREAS, CWA Section 101(b) supports the states' critical role in protecting water quality by stating: "It is the policy of Congress to recognize, preserve, and protect the primary responsibilities and rights of States to prevent, reduce, and eliminate pollution;" and

WHEREAS, CWA Section 101(g) further provides that the primary and exclusive authority of each state to "allocate quantities of water within its jurisdiction shall not be superseded, abrogated, or otherwise impaired by this Act;" and

WHEREAS, a one-size-fits-all national approach to federal regulations, guidance, and programs pertaining to the CWA does not recognize specific conditions and needs in the West, where water can be scarce and a variety of unique waterbodies exist, including but not limited to small ephemeral washes and arroyos, snow dependent intermittent streams, effluent dependent and dominated streams, prairie potholes, playa lakes, and terminal lakes, as well as numerous man-made reservoirs, impoundments, and water and stormwater conveyance structures; and

~~**WHEREAS**, past federal efforts to clarify the extent of CWA jurisdiction following the U.S. Supreme Court's decisions in SWANCC v. U.S. Army Corps of Engineers, 531 U.S. 159 (2001), and Rapanos v. United States, 547 U.S. 715 (2006), failed to include adequate state consultation in their development, despite repeated requests from the Western States Water Council to do so; and~~

WHEREAS, physical, biological, and chemical differences between waters, and hydrologic differences, both spatially and temporally, as well as considerable differences in legal doctrines that govern water in western states, mean that any federal effort to clarify CWA jurisdiction will inevitably impact each State differently, thus underscoring the need to thoroughly involve states in developing and

AMERICAN OVERSIGHT

implementing any rule so as to clearly respect and avoid conflict with state authority over the regulation of water quality and the allocation of waters and water rights within their respective borders; and

WHEREAS, any efforts to redefine or clarify CWA jurisdiction have, on their face, numerous federalism implications that have the potential to significantly impact states and alter the distribution of power and responsibilities among the states and the federal government~~, and therefore trigger federalism consultation with the states under Executive Order 13132~~; and

WHEREAS, as co-regulators, States are separate and apart from the general public, and have a unique role with the federal government in the development and implementation of any rule to clarify or redefine CWA jurisdiction; and

~~**WHEREAS**, information-sharing does not equate to meaningful consultation, and the uncertainty and differences of opinion that exist regarding CWA jurisdiction requires EPA and the Corps to develop and implement federal CWA jurisdiction efforts in authentic partnership with the states; and~~

WHEREAS, uncertainty and differences of opinion have and continue to exist regarding CWA jurisdiction among States, and challenge EPA and the Corps to develop and implement any new rule in authentic partnership with the States, based on principles of cooperative federalism, and together to provide greater certainty and a clearer definition of the limits of federal jurisdiction; and

WHEREAS, perennial streams with a "relatively permanent surface water connection" to navigable waters are now presumptively considered to be under federal CWA jurisdiction, consistent with Justice Scalia's plurality opinion in *Rapanos*; and

WHEREAS, the vast majority of streams in the West are intrastate and intermittent or ephemeral, with little if any connection to waters that are "navigable in fact," nor significantly impact the physical, biological or chemical integrity of WOTUS, including arroyos, coulees, washes and similar features; and

WHEREAS, an expansive definition of Waters of the United States that includes ephemeral and intermittent streams requires States to designate uses for those streams and set water quality standards to protect those uses, as well as develop Total Maximum Daily Loads, without weighing related costs and benefits, which is an inefficient and ineffective application of limited state and federal resources; and

NOW, THERFORE BE IT RESOLVED that Congress and the Administration should ensure that any federal effort to clarify or define CWA jurisdiction and define Waters of the United States:

1. Gives as much weight and deference as possible to state needs, priorities, and concerns.

2. Includes robust and meaningful state participation and consultation in the development and implementation of any rule, ~~should take place as early as possible, and before the publication of any proposal for public comment, when irreversible momentum may preclude effective state participation and the consideration of alternate ways of meeting federal objectives~~ acknowledging the inherent federalism implications. ~~and comply with Executive Order 13132's state consultation criteria.~~

3. Gives full force and effect to ~~and does not diminish or in any way detract from~~ Congress' intent and the purposes of CWA Sections 101(b) and 101(g).

4. Provides for a rebuttable presumption that perennial streams are WOTUS, and that ephemeral and intermittent streams are not, but rather are presumed to be protected as "waters of the

AMERICAN OVERSIGHT

state" under state law and policy.

5. Recognizes that Justice Kennedy's "significant nexus" test in *Rapanos* requires a connection between waters that is more than speculative or insubstantial to establish jurisdiction. Federal CWA jurisdiction efforts should also quantify "significance" to ensure that the term's usage does not extend jurisdiction to waters with a *de minimis* connection to jurisdictional waters, applied to individual waters on a case-by-case and not watershed basis.

6. Complies with the limits Congress and the U.S. Supreme Court have placed on CWA jurisdiction, while providing clear and recognizable limits to the extent of CWA jurisdiction, consistent with the plurality opinion authored by Justice Scalia in *Rapanos*.

7. Specifically excludes waters and features outside the scope of CWA jurisdiction, including:

   (a) Groundwater, including any subsurface water, and groundwater that may discharge to surface waters;

   (b) Man-made conveyances and related control features for water supply, stormwater and flood water management, including: (i) agricultural irrigation canals, laterals and ditches and drains; (ii) municipal and industrial water supply pipelines, conduits, and aqueducts; (iii) storm sewers, drains, and flood flow bypass features; (iv) roadside barrow pits, ditches, and culverts.

   (c) Man-made impoundments on ephemeral or intermittent streams (or off stream impoundments), such as farm and stock ponds, dugouts and similar features; and

   (d) Dip ponds that are excavated on a temporary, emergency basis to combat wildfires and address dust abatement; and

   (e) Isolated, intrastate waters and wetlands, including prairie potholes and playa lakes, as well as intrastate terminal lakes, individually or in combination with similarly situated waters, and

   (f) Ephemeral and intermittent streams; and

   (g) Wetlands adjacent to intermittent streams.

8. Acknowledges that states have authority to protect all "waters of the state," and that excluding waters from federal jurisdiction does not mean that they will be exempt from state regulation and protection.

9. Continues to provide access to appropriate technical and financial assistance to the States to protect and improve water quality under existing EPA programs without regard to jurisdictional determinations.

10. Provides a clearly delineated process for resolving differences of opinion over federal and non-federal jurisdiction, and jurisdiction between different States and Tribes (treated as States).

11. Provides for mapping of jurisdictional waters as a joint federal/state/tribal effort employing the best available data and tools, with appropriate provisions and processes for map maintenance.

12. Includes an appropriate delay in the effective date of any new rule or otherwise allows for a

AMERICAN OVERSIGHT

transition enabling States to take such actions as may be necessary to address any gaps in state law, regulation and protection.

AMERICAN OVERSIGHT

Position #

RESOLUTION
of the
WESTERN STATES WATER COUNCIL
In support of
STATE CWA SECTION 401 CERTIFICATION AUTHORITY

Coeur d'Alene, Idaho
October 26, 2018

WHEREAS, States have responsibly exercised their delegated authority under the Clean Water Act (CWA) Section 401 and under state water quality statutes to protect water quality, and must consider proposed activities and discharges in light of the states' designated water uses and related water quality standards; and

WHEREAS, the Council supports a balanced and integrated approach to achieve water and energy policy goals that plans for the future in sustainable ways, and recognizes legitimate state water and water quality management, protection and planning authorities to balance competing water uses; and

WHEREAS, the western states strongly support the planning and development of critical infrastructure and streamlined permitting processes, but such efforts should not come at the expense of states' authority to allocate, manage, and protect their water resources; and

WHEREAS, the development of hydropower and other federally permitted and licensed projects involving activities that may impact states' water quality standards should be appropriately undertaken in compliance with substantive and procedural state water law and delegated authority under CWA Section 401; and

WHEREAS, CWA Section 101(b) supports the states' critical role in protecting water quality by stating: "It is the policy of Congress to recognize, preserve, and protect the primary responsibilities and rights of States to prevent, reduce, and eliminate pollution."; and

WHEREAS, CWA Section 101(g) of the CWA further provides that it is the primary and exclusive authority of each state to "allocate quantities of water within its jurisdiction shall not be superseded, abrogated, or otherwise impaired by this Act;" and

WHEREAS, Section 27 of the Federal Power Act declares: "That nothing herein contained shall be construed as affecting or intending to affect or in any way to interfere with the laws of the respective States relating to the control, appropriation, use, or distribution of water used in irrigation or for municipal or other uses, or any vested right acquired therein."; and

WHEREAS, the Supreme Court has narrowly interpreted the Federal Power Act (16 U.S.C. 791a et seq.) reading Section 27 (16 U.S.C. 821) to limit state authority to set streamflow requirements on federally permitted and licensed projects, holding in *First Iowa Hydro-Electric Cooperative v. Federal Power Commission*, 328 U.S. 152 (1946) and in *California v. FERC*, 495 U.S. 490 (1990) that federal requirements preempted any state requirements, including efforts to establish minimum stream flows, noting that "…Congress remains free to alter what we have done"; and

WHEREAS, these rulings eroded state authority over state resources, and the Council has supported federal legislation to restore states' primary authority for regulating streamflows and water use and clarifying Congressional intent under the Federal Power Act; and

AMERICAN OVERSIGHT

WHEREAS, in *P.U.D. No. 1 of Jefferson County v. Washington Department of Ecology*, 511 U.S. 700 (1994), the Supreme Court upheld a state's delegated authority to impose minimum stream flow conditions under the CWA Section 401 certification process where necessary to protect a designated use for fish habitat, expressly rejecting any implied limitations on Section 401 certifications based on the *First Iowa* interpretation of the Federal Power Act; and

WHEREAS, an overly narrow reading of Section 401 would deprive the states of the ability to maintain the very beneficial uses that the Clean Water Act was designed to protect, and threaten the existing partnership between states and federal agencies based on cooperative federalism; and

WHEREAS, the vast majority of Section 401 certification requests are processed within 90 days, well within the one year allowed by current law, with relatively little if any backlog of certification actions; and

WHEREAS, most delays are typically due to submission of an incomplete application, applicants' non-responsiveness to requests for additional information, the completion of necessary study requirements, the size and complexity of some projects (and related impacts), substantive changes to the proposed project requiring further review, or constraints on state resources; and

WHEREAS, CWA Section 401 certification denials by states are rare and carefully considered, and are not examples of the failure of the system, as the current process is well-understood, reliable and supported by case law that provides certainty for both the states, federal agencies, and the regulated community; and

NOW, THEREFORE, BE IT RESOLVED that the Western States Water Council opposes any changes that may weaken the deference to state water laws and diminish the primary state authority and responsibility for the appropriation, allocation, development, conservation, and protection of their water resources, including the protection of water quality and designated uses, as well as minimum streamflows.

BE IT FURTHER RESOLVED that the Western States Water Council strongly supports early state engagement in federal permitting and licensing actions and the integration of state and federal environmental requirements and review processes for critical infrastructure.

AMERICAN OVERSIGHT

WESTERN GOVERNORS' ASSOCIATION

Policy Resolution 2019-XX

Compensatory Mitigation – Version 3

A. BACKGROUND

1. Through their sovereign and statutory powers, states have primary management authority over all fish and wildlife within their borders. Following decades of work by staff and contractors, states have developed extensive science, expertise, and knowledge of species within their borders.

2. Governors bear responsibility for managing state interests, authorities and property rights within state borders – including fish and wildlife – and oversee state agencies charged with properly managing wildlife, habitat and related resources within their states.

3. States are the primary recipients of economic benefits associated with healthy species and ecosystems. At the same time, the economic costs of compliance with federal environmental regulations can fall disproportionately on western states and local communities. States recognize the importance of economic development and note that it is often not possible to both advance an economic development project and entirely avoid negative impacts to fish and wildlife populations and habitat.

4. Compensatory mitigation plays an important role in fish and wildlife management and conservation, and states rely on its use in developing and executing species conservation strategies. Compensatory mitigation strategies employed by states include, but are not limited to, habitat protection, habitat restoration, establishment, enhancement, or conservation activities.

5. The mitigation hierarchy is a commonly referenced and widely utilized strategy in determining compensatory mitigation requirements for resource development projects. The mitigation hierarchy consists of first avoiding adverse impacts to fish and wildlife populations and habitat where practicable, then minimizing adverse impacts where they cannot be avoided, and then committing to rectifying direct impacts through restoration where possible. The next ~~final~~ step ~~in the mitigation hierarchy~~ is employing compensatory mitigation measures to replace resources or offset adverse impacts that remain following avoidance and minimization. This practice is memorialized under the Council of Environmental Quality's implementing regulations and other federal policy and guidance.[1] States have identified and utilized a final step in the mitigation hierarchy, monitoring project impacts and mitigation actions and taking appropriate corrective measures to achieve the identified goal.

6. While states exercise primary management authority over fish and wildlife within their borders, habitat for fish and wildlife often spans a patchwork of land ownership types, complicating state efforts to manage and conserve species under their management jurisdiction. This is particularly challenging in western states, where federal ownership constitutes a generally higher percentage of overall land ownership.

Commented [ZB4]: WA edit -10/10/18

DRAFT

AMERICAN OVERSIGHT

B. GOVERNORS' POLICY STATEMENT

1. States have the responsibility to establish appropriate statutes, regulations, policies and programs to manage fish and wildlife within their borders. This responsibility extends to the development of compensatory mitigation standards and implementation of compensatory mitigation for species under their management purview.

2. Compensatory mitigation approaches vary from state to state, but they are designed to fully offset residual impacts to habitat function and value[2]. Governors recognize that habitat functionality ~~is~~ and value are the primary metric by which mitigation outcomes are measured. Compensatory mitigation efforts must be sufficient to fully offset residual impacts to habitat function at the site-specific and range-wide scale necessary to meet conservation goals.

3. Where state mitigation standards are in place, consistency with existing state policy should be the primary guiding principle for a federal agency's development or implementation of compensatory mitigation on lands within their management authority or jurisdiction.

4. Western Governors urge federal agencies to adopt and implement state-supported compensatory mitigation programs and policies. Consistency between federal mitigation standards and those in state-supported programs allows wildlife managers, state and federal regulators, and developers to use a consistent compensatory mitigation program across differing land ownership within a state. State agencies will engage federal agencies in the development or amendment of compensatory mitigation programs and policies.

~~5. Western Governors recognize that that the diversity of conceivable species, habitat and project-specific circumstances make quantifying measures, with clearly defined goals, for compensatory mitigation difficult. Governors are concerned about federal agencies' potential inconsistent use and lack of assessment criteria for ambiguous mitigation goals such as "net conservation gain," and they believe that measures should be designed to avoid inappropriate uses of such a goal.~~

~~6.~~5. Western Governors recognize that mitigation of development impacts to habitat or natural resources must account for a level of risk and uncertainty that a particular compensatory mitigation action may fail to adequately offset adverse impacts to fish, wildlife and habitat. Federal agencies should acknowledge a variety of tools and measures for incorporating risk and uncertainty based on the diverse experience of states in designing and implementing compensatory mitigation programs.

~~7.~~6. Governors believe that federal mitigation policies should be developed in coordination with Governors, and the state agency officials they designate, to achieve the following objectives:

- Provide measurable and documentable habitat and conservation values, services and functions that are at least equal to the lost or degraded values, services and functions caused by the impact.

[2] Habitat value is an assessment of the affected fish and wildlife habitat based on three attributes; scarcity, suitability and importance. Importance is the relative significance of the affected habitat, compared to other examples of a similar habitat type in a landscape context.

Commented [ZB5]: WA edit – 10/10/18

Commented [ZB6]: WA footnote addition below – 10/10/18

Commented [ZB7]: WA edit – 10/10/18

Commented [ZB8]: WA comment on B-3 and B-4

"Agree with these two sections in concept, but they are overly simplistic in practice. State standards are different across the West on mitigation ratios, on their acceptance of mitigation banking and in-lieu fee mitigation, on their approach to out-of-kind mitigation. If Federal agency's adopt different standards for their lands in different states, based upon the standards utilized within that state, you create more consistency within a state's borders at the cost of less consistency across the federal agency, which may be more confusing."

Commented [ZB9]: WA edit – 10/10/18

Commented [ZB10]: WA edit – 10/10/18

Comment: "Washington would strongly oppose this section. Our mitigation policies do not yet identify "net conservation gain" as a mitigation goal, but we have increasing seen that goal applied in individual projects. Previous federal compensatory mitigation policies have considered "net conservation benefit" and WA has not opposed. Quantifying and measuring impacts and habitat function value, and ensuring additionality, timeliness, and effectiveness in delivering function and value of compensatory mitigation is a critical component of DFW's mitigation policy. The consistency and challenges of measuring to "no net loss" is not objectively more burdensome than measuring to "net conservation gain" and limiting compensatory mitigation standards in this way is really not appropriate for this resolution.

DRAFT

AMERICAN OVERSIGHT

- Incorporate measures to account for a level of risk that a particular compensatory mitigation action may fail or not achieve its stated objectives, and uncertainty about the level and duration of estimated impacts.

- Compensatory mitigation projects should be sited and designed to support the most effective conservation or restoration projects; the effectiveness of mitigation actions should be based on the best available science.

- Provide benefits that are durable and in place for at least the duration of the residual adverse impacts.

- Encourage the application of compensatory mitigation offsets prior to the impact occurring to ensure no lag time occurs between impacts and offsets.

- Offer transparency and certainty to developers, regulators, and the public to the extent feasible. This necessitates early and substantive consultation with States and consistency with State designed compensatory mitigation standards where they exist.

Commented [ZB11]: ID edit – 10/4/18

Commented [ZB12]: ID edit – 10/4/18

Commented [ZB13]: WA edit – 10/10/18

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct WGA staff to work with Congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

AMERICAN OVERSIGHT

Reimagining the Rural West

FY19 Planning Activities

Action Request:
WGA requests SAC assistance with the first planning year objective - populating the initiative advisory group. Please connect WGA with the appropriate person in your governor's office with policy expertise related to rural development to provide feedback and assist with scoping efforts.

Please assist WGA with this effort by October 19th.

Initiative Overview:

The Western Governors' "Reimagining the Rural West" Initiative will examine the elements critical to the ongoing and future vitality of rural western communities, with the goal of identifying actions western states can take to best support these communities, especially by effecting changes in federal policies. The initiative will be organized around three topical pillars: Opportunity, Connectivity and Community. Suggested topics or objectives are identified for each.

1. Opportunity

This pillar will examine strategies for strengthening rural western economies, in particular through leveraging the West's strengths (e.g. resource-based industries) and advantages (e.g. frequent proximity to public lands). This includes opportunities such as growing the outdoor economy, modernizing the energy industry, capitalizing on restoration and conservation services, and applying new technologies to agriculture.

Suggested Topics:

- Advancing Western Governors' all-of-the-above energy vision, which calls for making the West a leader in energy education, technology development, research and innovation;
- Providing a platform for states to share best practices in developing the outdoor recreation economy, including through establishment of offices of outdoor recreation, strategies to leverage the private sector, and identifying federal policies or investments that would support that industry's growth;
- Advancing Western Governors' forest and rangeland management priorities related to expanding markets for forest products and diversified rangeland goods and services and supporting forest and rangeland restoration activities; and
- Developing and utilizing economic incentives, such as federal Opportunity Zones, to attract businesses and foster entrepreneurism.

AMERICAN OVERSIGHT

2. Connectivity

The Connectivity pillar will foster solutions-oriented discussions around the rural West's infrastructure challenges with a focus on broadband and transportation – the infrastructure needed to bridge the gap between rural communities and metropolitan areas.

Suggested Topics:

- Developing funding strategies and solutions for rural infrastructure investments, including how states can drive private sector investment through tax or other incentives;
- Sharing best practices and developing recommendations for prioritization of infrastructure funding, focusing on investments that are critical to attract and retain businesses and investments that adapt to or anticipate changing or emerging technologies;
- Facilitating deployment of rural broadband by:
    - Convening stakeholders and state officials to discuss best practices for building rural broadband systems that provide continuous, low-cost access;
    - Engaging with states to "ground-truth" broadband data that is available to federal agencies. Low-quality data affects the allocation of federal funding to rural communities through FCC and USDA loan and grant programs;
    - Examining innovative broadband mapping strategies, such as nonprofit entities collecting Internet Service Provider infrastructure data to estimate coverage; and
    - Coordinating with USDA to ensure the new broadband pilot program managed by the Rural Utility Service prioritizes areas that wholly or severely lack access to broadband.
- Identifying critical transportation infrastructure (surface and air) and federal regulations that may impact the rural communities' ability to maintain this infrastructure.

3. Community

This pillar will explore the amenities and attributes that make rural communities attractive places to live, identifying critical elements (e.g. access to education, affordable housing, healthcare) and strategies for reinforcing or developing those elements.

Suggested Topics:

- Showcasing western communities that are doing a good job attracting and retaining young people and families and developing recommendations for other communities to replicate that success;
- Identifying and disseminating best practices for communities to collect and analyze locally generated socioeconomic data to inform policy decisions and connect communities to

AMERICAN OVERSIGHT

groups/tools that are working to support that effort (such as the Headwaters Economic tool);

- Facilitating conversation on how to engage tribal populations while building community;

- Providing a forum for states to share best practices in rural workforce development such as strategies to close rural skills gaps in sectors such as healthcare and education; models for providing access to post-secondary education in rural communities; expanding apprenticeship in rural industries and businesses; and identifying and training skills for a resilient workforce that can adapt and innovate as technologies change;

- Evaluating federal policies affecting rural healthcare, including the sustainability of rural hospitals and deployment of telehealth services;

- Evaluating federal policies affecting the distribution of funding for rural development to determine whether rural areas are able to capture their fair share, and if not, identifying solutions such as providing tools or resources and advocating for legislative or regulatory changes; and

- Sharing best practices and developing policy recommendations to alleviate the rural housing shortage.

Planning Year Objectives:

1. Build Advisory Group (October 2018)

WGA staff will build out an advisory group for the initiative. The advisory group will consist of state policymakers with a broad expertise in rural economic development and sustainability. WGA will work with SAC to identify participants from Governors' offices or state agencies.

The advisory group's first task will be to develop survey instruments that will be deployed in the planning year to identify to refine the scope of the initiative and identify potential outcomes. The advisory group will also help WGA distribute the survey to appropriate stakeholders.

2. Develop and Distribute Initial Survey (November – December 2018)

Working with the advisory group, WGA will develop an initial survey to gather information pertinent to the initiative. This survey will gauge states' interest in the suggested topics put forth in the initiative framework, solicit best practices and case studies, and help to identify potentially overlooked topics of inquiry.

3. Establish Stakeholder Interest and List (Ongoing)

The team will conduct outreach to stakeholders (nonprofit organizations, federal agencies, state and local government, business community) and build out an initiative list that will be used for distribution and to populate initiative events.

4. Develop Potential Sponsors (December 2018 – May 2019)

AMERICAN OVERSIGHT

The WGA team will develop and secure initiative sponsors before the launch of the initiative in June 2019. The team will work to identify interested sponsors at the Winter Meeting. Sponsorship materials will be developed and finalized by March 2019 with the goal of securing initiative sponsors before the initiative roll-out in June.

5. Develop and Finalize Initiative Plan (January – April 2019)

The WGA team will develop and finalize the initiative plan by April 2019. The plan will identify the concrete outcomes the initiative will work toward and how it will do so. The plan will detail the number and type of in-person events needed and the topics to be addressed at each. WGA will present the plan to SAC for feedback at the Spring Strategic Planning Meeting.

WGA Staff: Lauren DeNinno (ldeninno@westgov.org), Britta Beckstead (bbeckstead@westgov.org), and Kevin Moss (kmoss@westgov.org)

AMERICAN OVERSIGHT

The Honorable David Ross
Assistant Administrator
Office of Water
U.S. Environmental Protection Agency
1200 Pennsylvania Avenue, N.W.
Washington, D.C. 20460

Dear Deputy Director Hoelscher, Associate Director Herrgott, Assistant Secretary James, and Assistant Administrator Ross:

Thank you for your webinar presentation to Western Governors' staff on the Administration's One Federal Decision policy and states' assumption of primary permitting authority under Clean Water Act (CWA) Section 404. Western Governors are eager to work in true partnership with the Administration and federal agencies to build a stronger state-federal relationship. By operating as authentic collaborators on the development and execution of policy, the states and federal government can improve their service to the public, resulting in a nation that is stronger, more resilient and united.

Specifically, Western Governors appreciate the Administration's interest in improving the administrative process and creating additional opportunities for state assumption of federal authority. Western Governors look forward to working with the Administration in the development of more efficient infrastructure permitting and environmental review processes. We can accomplish this while providing enhanced opportunities for state input and consultation, and conserving natural resource, wildlife, environmental quality, and cultural values.

On a related item, our staff was encouraged by the short discussion about CWA Section 401 authority. Western Governors are pleased to hear that the Administration no longer seeks statutory changes to the CWA that would restrict or eliminate the current delegations of authority authorized by the statute. Respecting and supporting current state authority under the law is an important foundation on which to build future opportunities. We also appreciate your efforts to provide additional opportunity for state assumption of federal authorities, such as the CWA Section 404 permitting authority. Taken together, these two significant actions signal a desire to work collaboratively with states to improve environmental regulatory processes. Western Governors would like to build on this positive momentum and begin to discuss concrete, definable actions we can jointly take to improve these processes.

To prepare for these discussions and opportunities, Governors would like to better understand the Administration's goals and plans for state delegation and infrastructure permitting and environmental reviews. Below are observations and questions regarding the Administration's recent actions concerning state delegation, permitting, and environmental review in the One

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006761

Federal Decision policy, White House's Legislative Outline for Rebuilding Infrastructure in America (Infrastructure Plan), and CWA Section 404.

One Federal Decision Policy and Infrastructure Plan

Executive Order (EO) 13807, Establishing Discipline and Accountability in the Environmental Review and Permitting Process for Infrastructure Projects (EO), established the One Federal Decision policy for major infrastructure projects. This policy requires federal agencies to designate a single lead federal agency, then establish and adhere to a project timetable for federal environmental and authorization decisions. The policy establishes a goal of completing all federal decisions for major infrastructure projects within two years. The EO only addresses federal agencies (whether lead, cooperating, or participating) and does not discuss state delegation.

Following publication of the EO, the Office of Management and Budget (OMB) and Council on Environmental Quality (CEQ) issued a memorandum (Memorandum) on its implementation. This document includes a template Memorandum of Understanding (MOU) for federal agencies with each other. Several federal departments and agencies, including U.S. Army Corps of Engineers and Environmental Protection Agency (EPA), have executed an MOU modeled on the template. The MOU establishes non-federal cooperating agency responsibilities and includes non-federal cooperating agencies in the schedule for projects (Permitting Timetable). It also requires the schedule to "account for any federally-required decisions or authorizations, including those that are assumed by, or delegated to, State, tribal, or local agencies." It does not otherwise discuss state delegation.

The Infrastructure Plan sets forth the goal of, "delegating more decision-making to States and enhancing coordination between State and Federal reviews." The plan, however, it limits its recommendation of expanded delegation to states to the contexts of National Environmental Policy Act (NEPA) and Department of Transportation (DOT) non-NEPA project-level decisions. The Infrastructure Plan does not mention the CWA as an area for increased state delegation.

Your response to the following questions would help Western Governors better understand the Administration's One Federal Decision policy, its Infrastructure Plan, and the future implementation of these policies:

- How will the Administration ensure that state consultation is not compromised with the One Federal Decision policy's two-year goal for all permitting, authorization, and NEPA decisions?

- What processes did OMB and CEQ use to consult with states on the Memorandum, which could impact state NEPA, permitting, and authorization decisions?

- Do the references to cooperating agencies in the Memorandum include instances where states are delegated with authority by statutes other than NEPA, such as in the Clean Water Act or Clean Air Act?

AMERICAN OVERSIGHT

- Does the Permitting Timetable described in the MOU apply to state decisions or authorizations, such as those pursuant to the Clean Water Act or Clean Air Act? What will happen if a state fails to meet the deadline in the Permitting Timetable?

- What actions is the Administration taking to expand delegation of federal NEPA authority to states? Is this delegation intended to be on a project-by-project or programmatic basis? Will there be federal funding for state assumption of federal NEPA authority?

- What actions is the Administration taking to expand delegation of federal DOT project-level authority to states? Is this delegation intended to be on a project-by-project or programmatic basis? Will there be federal funding for state assumption of federal DOT authority?

- How is CEQ's review of its NEPA regulations being coordinated with the One Federal Decision policy? How is the Administration ensuring that the cooperating agency-lead agency relationship will be improved by this review of the NEPA regulations? What are CEQ's plans for consulting with Governors on its review of its regulations?

Clean Water Act Section 404

The Administration has expressed its commitment to empower more states and tribes to assume primary authority for the issuance of dredge-and-fill permits under Section 404 of the CWA. On August 7, the Army Corps of Engineers issued a memorandum adopting the findings of the EPA Assumable Waters Subcommittee's May 2017 Final Report. The report clarifies which waters may have administrative authority assumed by states and which waters would remain under the administrative authority of the Corps of Engineers.

Your response to the following questions would help Western Governors better understand the CWA Section 404 permitting program and issues involved with states' assumption of the program:

- Which states have expressed interest in assuming Section 404 permitting authority? What concerns have been expressed by state officials? What reasons have states provided for their interest in assuming Section 404 permitting authority?

- Beyond the lack of clarity as to which waters would be eligible for state assumption of administrative authority, what factors have states cited as prohibitive to their assumption of Section 404 permitting authority?

- How does state assumption of permitting authority under Section 404 relate to the One Federal Decision policy or Infrastructure Plan?

- How will the current rulemaking efforts of EPA and the Corps of Engineers to clarify "waters of the United States," as that term applies to the jurisdictional scope of the CWA, affect state permitting authority under Section 404 (where assumed by states)?

AMERICAN OVERSIGHT

- What is the process for a state that would like to assume Section 404 authority? How can the Western Governors' Association best facilitate such assumption? Who at the EPA and Corps of Engineers are the best points of contact for Governors' offices to discuss assumption of Section 404 authority?

- Is there federal funding for state assumption of Section 404 authority? Will funds be shifted from other state-assumed programs under the CWA? If no new funds are to be designated for state Section 404 programs, how does the Administration envision states' implementation would be funded?

- What type of engagement with states and state consultation do the EPA and Corps of Engineers plan to undertake in the development of revised regulations addressing state assumption of Section 404 permitting authority?

- During the webinar, the Endangered Species Act (ESA) was identified as an area of potential complication in states' assumption of Section 404 permitting authority. What issues does the Administration anticipate may arise in the implementation of the ESA when states assume Section 404 permitting authority, particularly in the context of consultations under ESA Section 7? How have New Jersey and Michigan – the two states that have already assumed Section 404 permitting authority – addressed these issues?

The answers to these questions will help western states better understand the Administration's plans and goals regarding CWA and infrastructure permitting and environmental review, as well as the opportunities for expanded state delegation in these areas. We look forward to your responses and further discussion of these topics.

Sincerely,

David Ige

Federal Decision policy, White House's Legislative Outline for Rebuilding Infrastructure in America (Infrastructure Plan), and CWA Section 404.

One Federal Decision Policy and Infrastructure Plan

Executive Order (EO) 13807, Establishing Discipline and Accountability in the Environmental Review and Permitting Process for Infrastructure Projects (EO), established the One Federal Decision policy for major infrastructure projects. This policy requires federal agencies to designate a single lead federal agency, then establish and adhere to a project timetable for federal environmental and authorization decisions. The policy establishes a goal of completing all federal decisions for major infrastructure projects within two years. The EO only addresses federal agencies (whether lead, cooperating, or participating) and does not discuss state delegation.

Following publication of the EO, the Office of Management and Budget (OMB) and Council on Environmental Quality (CEQ) issued a memorandum (Memorandum) on its implementation. This document includes a template Memorandum of Understanding (MOU) for federal agencies with each other. Several federal departments and agencies, including U.S. Army Corps of Engineers and Environmental Protection Agency (EPA), have executed an MOU modeled on the template. The MOU establishes non-federal cooperating agency responsibilities and includes non-federal cooperating agencies in the schedule for projects (Permitting Timetable). It also requires the schedule to "account for any federally-required decisions or authorizations, including those that are assumed by, or delegated to, State, tribal, or local agencies." It does not otherwise discuss state delegation.

The Infrastructure Plan sets forth the goal of, "delegating more decision-making to States and enhancing coordination between State and Federal reviews." The plan, however, it limits its recommendation of expanded delegation to states to the contexts of National Environmental Policy Act (NEPA) and Department of Transportation (DOT) non-NEPA project-level decisions. The Infrastructure Plan does not mention the CWA as an area for increased state delegation.

Your response to the following questions would help Western Governors better understand the Administration's One Federal Decision policy, its Infrastructure Plan, and the future implementation of these policies:

- How will the Administration ensure that state consultation is not compromised with the One Federal Decision policy's two-year goal for all permitting, authorization, and NEPA decisions?

- What processes did OMB and CEQ use to consult with states on the Memorandum, which could impact state NEPA, permitting, and authorization decisions?

- Do the references to cooperating agencies in the Memorandum include instances where states are delegated with authority by statutes other than NEPA, such as in the Clean Water Act or Clean Air Act?

AMERICAN OVERSIGHT

- Does the Permitting Timetable described in the MOU apply to state decisions or authorizations, such as those pursuant to the Clean Water Act or Clean Air Act? What will happen if a state fails to meet the deadline in the Permitting Timetable?

- What actions is the Administration taking to expand delegation of federal NEPA authority to states? Is this delegation intended to be on a project-by-project or programmatic basis? Will there be federal funding for state assumption of federal NEPA authority?

- What actions is the Administration taking to expand delegation of federal DOT project-level authority to states? Is this delegation intended to be on a project-by-project or programmatic basis? Will there be federal funding for state assumption of federal DOT authority?

- How is CEQ's review of its NEPA regulations being coordinated with the One Federal Decision policy? How is the Administration ensuring that the cooperating agency-lead agency relationship will be improved by this review of the NEPA regulations? What are CEQ's plans for consulting with Governors on its review of its regulations?

Clean Water Act Section 404

The Administration has expressed its commitment to empower more states and tribes to assume primary authority for the issuance of dredge-and-fill permits under Section 404 of the CWA. On August 7, the Army Corps of Engineers issued a memorandum adopting the findings of the EPA Assumable Waters Subcommittee's May 2017 Final Report. The report clarifies which waters may have administrative authority assumed by states and which waters would remain under the administrative authority of the Corps of Engineers.

Your response to the following questions would help Western Governors better understand the CWA Section 404 permitting program and issues involved with states' assumption of the program:

- Which states have expressed interest in assuming Section 404 permitting authority? What concerns have been expressed by state officials? What reasons have states provided for their interest in assuming Section 404 permitting authority?

- Beyond the lack of clarity as to which waters would be eligible for state assumption of administrative authority, what factors have states cited as prohibitive to their assumption of Section 404 permitting authority?

- How does state assumption of permitting authority under Section 404 relate to the One Federal Decision policy or Infrastructure Plan?

- How will the current rulemaking efforts of EPA and the Corps of Engineers to clarify "waters of the United States," as that term applies to the jurisdictional scope of the CWA, affect state permitting authority under Section 404 (where assumed by states)?

AMERICAN OVERSIGHT

- What is the process for a state that would like to assume Section 404 authority? How can the Western Governors' Association best facilitate such assumption? Who at the EPA and Corps of Engineers are the best points of contact for Governors' offices to discuss assumption of Section 404 authority?

- Is there federal funding for state assumption of Section 404 authority? Will funds be shifted from other state-assumed programs under the CWA? If no new funds are to be designated for state Section 404 programs, how does the Administration envision states' implementation would be funded?

- What type of engagement with states and state consultation do the EPA and Corps of Engineers plan to undertake in the development of revised regulations addressing state assumption of Section 404 permitting authority?

- During the webinar, the Endangered Species Act (ESA) was identified as an area of potential complication in states' assumption of Section 404 permitting authority. What issues does the Administration anticipate may arise in the implementation of the ESA when states assume Section 404 permitting authority, particularly in the context of consultations under ESA Section 7? How have New Jersey and Michigan – the two states that have already assumed Section 404 permitting authority – addressed these issues?

The answers to these questions will help western states better understand the Administration's plans and goals regarding CWA and infrastructure permitting and environmental review, as well as the opportunities for expanded state delegation in these areas. We look forward to your responses and further discussion of these topics.

Sincerely,

David Ige

DRAFT – INTERNAL USE ONLY

Western Governors' Association
Policy Resolution 2019-xx

Western Health Care Considerations – VERSION 1

A. **BACKGROUND**

1. Adequate access to health care services is an important element of maintaining and enhancing the quality of life in western states and attracting new economic opportunities for their growing populations.

2. Low population densities and the vast distances between population centers make it difficult for providers to establish economically-sustainable health care systems in rural areas. One indicator of this difficulty is the closure of rural hospitals, which forces residents to travel substantial distances to receive an adequate level of care. Hospital closures can also dramatically affect economic opportunity in rural communities, as health care providers often offer higher wages and a greater number of jobs than other local employers.

3. Distance and density also inhibit construction of the technology infrastructure that would provide or improve broadband connectivity in rural and remote areas. Expanding broadband infrastructure permits rural Americans to access internet-based health care information and services.

4. The health care sector faces severe personnel shortages in western states. This challenge is particularly acute in the West's rural areas. Ensuring access to health care services requires an adequate number and distribution of physicians, nurses and other trained health care professionals. The growth and aging of the population, as well as the need to deliver health care services to tribal communities and veterans, demand a renewed focus on developing our nation's health care workforce.

5. Home to extraordinary landscapes and resources, Western states offer the country's best opportunities for outdoor recreation. Western states lead the nation in many rankings of personal health, overall well-being, and quality of life. These same states, however, struggle with higher-than average suicide rates. The ten states with the highest suicide rates in the nation are all located in the West.

6. Substance abuse involving alcohol, legal prescription drugs, and controlled substances is a major public health and safety crisis confronting communities across the United States. Although the scope and scale of substance abuse varies widely among states in the West, every state faces challenges in addressing this problem within its borders.

B. **GOVERNORS' POLICY STATEMENT**

1. Western states have developed a body of experience, knowledge and perspective with respect to health care. The Western Governors' Association (WGA) is ideally situated to collect and disseminate information – including best practices, case studies and policy

AMERICAN OVERSIGHT

options – that states can use to improve the public policy foundation for improved health care services.

2. Federal efforts to address health care workforce and access should incorporate input from Governors, who are best positioned to assess the needs of (and craft solutions for) their particular states. State-federal collaboration and coordination are integral to addressing these health care challenges.

3. States and the federal government should examine the role health care providers play in the social and economic health of local communities. They should further identify the steps that can be taken to ensure that the vital infrastructure of health care delivery can be maintained and expanded to address health care needs in the West.

4. The federal government should work with states to facilitate the deployment of broadband to underserved rural and remote areas, recognizing that adequate broadband access positively affects rural populations' ability to access internet-based health care options.

5. Despite successes in addressing the shortage of qualified health care workers, significant challenges remain. Governors urge the federal government to examine and implement programs to ensure states have an adequate health care workforce that is prepared to serve diverse populations in urban, suburban and rural communities.

6. Western Governors should examine the quality and adequacy of mental health services available in the West, as these services can have a positive effect on preventing suicide and treating substance abuse.

7. The federal government should work with Western Governors to develop substance abuse prevention and treatment strategies that work in concert with state efforts and recognize regional variations in substance abuse patterns.

8. Western states should examine policies to promote data-sharing between states to address cross-border substance abuse concerns, such as interstate drug purchases and trafficking. For example, expanded access to state prescription drug monitoring programs could be a valuable tool for identifying and addressing opioid abuse in western states.

C. **GOVERNORS' MANAGEMENT DIRECTIVE**

1. The Governors direct WGA staff to work with Congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

Western Governors enact new policy resolutions and amend existing resolutions on a bi-annual basis. Please consult westgov.org/resolutions for the most current copy of a resolution and a list of all current WGA policy resolutions.

AMERICAN OVERSIGHT

DRAFT – INTERNAL USE ONLY

WESTERN GOVERNORS' ASSOCIATION

Policy Resolution 2018-XX

Foreign Visitor Preclearance
Version 1

A. BACKGROUND

1. The U.S. Department of Commerce estimates that nearly ~~75~~ 76 million foreign visitors entered the country during ~~2014~~2016. The vast majority of these travelers arrived in the United States by plane.[1]

2. Tourism is a significant revenue source for western states and territories, many of which count international travelers as major contributors to state and local economies and look to international tourism to drive local employment.

3. As a result of utilizing technology such as Automated Passport Control equipment, average wait time at airport passport and immigration processing areas have declined in recent years, but still frequently exceeds 60 minutes.[2]

~~3. Arriving airline passengers sometimes experience wait times in the airport passport and immigration processing area in excess of 90 minutes.~~

4. Foreign visitor preclearance allows international travelers to be screened by U.S. Customs and Border Patrol (CBP) officers prior to boarding an international flight. This preclearance allows passengers to bypass U.S. customs stations upon arrival at an American airport.

5. The Transportation Security Administration requires passenger and property screening at foreign preclearance airports to conform with U.S. aviation security screening standards.

6. Preclearance arrangements between the U.S. and Canada began in 1952. Since that time CBP has established over 600 American law enforcement officers and agricultural specialists at 15 preclearance airports in six countries: Ireland, Canada, Aruba, The Bahamas, Bermuda and United Arab Emirates. CBP also staffs a pre-inspection facility for passenger/vehicle ferry traffic to the U.S. in Victoria, Canada.[3]

7. While there were earlier announcements in 2015 and 2016 to possibly expand the preclearance program to eleven new airports in nine countries, CBP has only concluded agreements to cover Stockholm, Sweden (signed November 4, 2016) and Punta Cana, Dominican Republic (signed December 1, 2016).[4]

---

[1] International Trade Administration Fast Facts, http://tinet.ita.doc.gov/outreachpages/download_data_table/Fast_Facts_2016.pdf
[2] U.S. Customs and Border Protection, Airport Wait Times, https://awt.cbp.gov/
[3] U.S. Customs and Border Protection, Preclearance Locations, https://www.cbp.gov/border-security/ports-entry/operations/preclearance
[4] "DHS Announces 11 New Airports Selected For Possible Preclearance Expansion Following Second Open Season" https://www.dhs.gov/news/2016/11/04/dhs-announces-11-new-airports-selected-possible-preclearance-expansion-following

AMERICAN OVERSIGHT

~~7. On March 16, 2015, U.S. Department of Homeland Security (DHS) Secretary Jeh Johnson signed a new preclearance agreement with the government of Canada. On May 29, 2015, CBP announced its intention to expand air preclearance operations to ten additional airports in nine countries:~~

- ~~Brussels Airport, Belgium;~~
- ~~Punta Cana Airport, Dominican Republic;~~
- ~~Narita International Airport, Japan;~~
- ~~Amsterdam Airport Schipol, Netherlands;~~
- ~~Oslo Airport, Norway;~~
- ~~Madrid-Barajas Airport, Spain;~~
- ~~Stockholm Arlanda Airport, Sweden;~~
- ~~Istanbul Ataturk Airport, Turkey;~~
- ~~London Heathrow Airport, United Kingdom; and~~
- ~~Manchester Airport, United Kingdom.~~

8. In FY2017, CBP precleared more than 19 million passengers.[5]
~~8. These represent some of the busiest last points of departure to the United States – in 2014 nearly 20 million passengers traveled from these airports to the U.S.~~

9. The DHS has supported preclearance as both a security imperative – enabling CBP to identify and stop potential terror threats before they reach U.S. soil – and a strong economic opportunity.

B. GOVERNORS' POLICY STATEMENT

1. In recognition of the economic and national security benefits provided by foreign visitor preclearance, Western Governors support CBP's use of preclearance to reduce excessive wait times at American immigration and processing areas.

2. Western Governors support the efforts of DHS and CBP to increase the number of international airports and countries at which foreign visitor preclearance is used. Such expansion will streamline legitimate international travel and will further protect the safety and security of American citizens as well as international visitors.

3. Preclearance also allows smaller airports with no or few full-time CBP personnel to accept direct international flights from preclearance-approved foreign airports. Western Governors recognize the benefit this provides small or rural airports in accepting international travelers more efficiently. ~~that accept a significant number of international travelers, for instance Antonio B. Won Pat International Airport in Guam, where passengers on arriving international flights can wait 2-3 hours for visa processing.~~

4. In recognition of the benefits provided by foreign visitor preclearance, and in order to expand its use, DHS should work to complete the negotiation process with foreign countries and add new preclearance-approved international airports as soon as possible.

---

[5] Remarks of Acting Commissioner Kevin K. McAleenan at Press Event Marking Release of CBP's Trade and Travel Fiscal Year 2017 Report, February 13, 2018, https://www.cbp.gov/newsroom/speeches-and-statements/remarks-acting-commissioner-kevin-k-mcaleenan-press-event-marking

AMERICAN OVERSIGHT

5. Additionally DHS and CBP should work with western states to help identify optimal international foreign visitor preclearance airports for future consideration and should work with western state tourism directors to expand international travel opportunities in western states.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct WGA staff to work with Congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

DRAFT

AMERICAN OVERSIGHT

Title: To amend the River and Harbor Act of 1958, the Reclamation Safety of Dams Act of 1978, and the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 to prevent the spread of invasive species in western waters, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Preventing Invasive Species in Western Waters Act of 2018".

SEC. 2. WATERCRAFT INSPECTION ASSISTANCE.

(a) Corps of Engineers Watercraft Inspection.—Section 104 of the River and Harbor Act of 1958 (33 U.S.C. 610) is amended—

(1) by striking subsection (b) and inserting the following:

"(b) Authorization of Appropriations.—

"(1) IN GENERAL.—There is authorized to be appropriated $110,000,000 to carry out this section for each fiscal year, of which—

"(A) $30,000,000 shall be made available to carry out subsection (d)(1)(A)(i);

"(B) $30,000,000 shall be made available to carry out subsection (d)(1)(A)(ii); and

"(C) $30,000,000 shall be made available to carry out subsection (d)(1)(A)(iii).

"(2) CONTROL OPERATIONS.—Any funds under paragraph (1) used for control operations shall be allocated by the Chief of Engineers on a priority basis, based on the urgency and need of each area and the availability of local funds."; and

(2) in subsection (d)—

(A) by striking paragraph (1) and inserting the following:

"(1) IN GENERAL.—

"(A) WATERCRAFT INSPECTION STATIONS.—In carrying out this section, the Secretary shall establish, operate, and maintain new or existing watercraft inspection stations—

"(i) to protect the Columbia River Basin;

"(ii) to protect the Upper Missouri River Basin; and

"(iii) to protect the Arkansas River Basin.

"(B) LOCATIONS.—The Secretary shall place watercraft inspection stations under subparagraph (A) at locations, as determined by the Secretary in consultation with States within the areas described in subparagraph (A), with the highest likelihood of preventing the spread of aquatic invasive species at reservoirs operated and maintained by the Secretary.

AMERICAN OVERSIGHT

"(C) RAPID RESPONSE.—The Secretary shall assist the States within the areas described in subparagraph (A) with rapid response to any aquatic invasive species, including quagga or zebra mussel, infestation."; and

(B) by striking paragraph (3)(A) and inserting the following:

"(A) the Governors of the States within the areas described in clause (i), (ii), or (iii) of paragraph (1)(A), as applicable;".

(b) Bureau of Reclamation Watercraft Inspection.—

(1) IN GENERAL.—The Reclamation Safety of Dams Act of 1978 is amended by inserting after section 5B (43 U.S.C. 509b) the following:

"SEC. 5C. WATERCRAFT INSPECTION.

"(a) Watercraft Inspection in Reclamation States.—

"(1) IN GENERAL.—Notwithstanding section 3, the Secretary of the Interior, acting through the Commissioner of Reclamation (referred to in this section as the 'Secretary'), shall provide financial assistance, including financial assistance to establish, operate, or maintain a watercraft inspection station, under this Act to a reclamation State [(as defined in section 4014 of the Water Infrastructure Improvements for the Nation Act (43 U.S.C. 390b note; Public Law 114–322))] or an aquatic invasive species control project to prevent the spread of aquatic invasive species into and out of reservoirs operated and maintained by the Secretary if the Secretary determines that the financial assistance is—

"(A) necessary;

"(B) in the interests of the United States; and

"(C) not inconsistent with the purposes of this Act.

"(2) NON-FEDERAL INSPECTION STATIONS.—The Secretary may provide financial assistance under paragraph (1) to a reclamation State for the reclamation State to establish, operate, or maintain a non-Federal watercraft inspection station.

"(b) Cost Share.—The non-Federal share of the cost of establishing, operating, and maintaining a watercraft inspection station (including a non-Federal watercraft inspection station) under subsection (a), including personnel costs, shall be—

"(1) not less than 50 percent; and

"(2) provided by the reclamation State, or a unit of local government in the reclamation State, in which the watercraft inspection station or other project is located.

"(c) Priority.—In providing financial assistance under subsection (a), the Secretary shall give priority to a reclamation State that demonstrates the capacity to fund the watercraft inspection station in accordance with subsection (b).

"(d) Coordination.—In carrying out this section, the Secretary shall consult and coordinate with—

"(1) each of the reclamation States [(as defined in section 4014 of the Water Infrastructure Improvements for the Nation Act (43 U.S.C. 390b note; Public Law 114-322))];

AMERICAN OVERSIGHT

"(2) affected Indian Tribes; and

"(3) the heads of appropriate Federal agencies.".

(2) CONFORMING AMENDMENT.—Section 3 of the Reclamation Safety of Dams Act of 1978 (43 U.S.C. 507) is amended by striking "section 5B" and inserting "sections 5B and 5C".

SEC. 3. WATERCRAFT INSPECTION AND DECONTAMINATION.

(a) Mandatory Inspection and Decontamination.—

(1) DEFINITION OF TASK FORCE AGENCY.—In this subsection, the term "task force agency" means any Federal agency the head of which is a member of the Aquatic Nuisance Species Task Force under section 1201(b) of the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (16 U.S.C. 4721(b)).

(2) MANDATORY INSPECTION AND DECONTAMINATION.—Each task force agency may, as appropriate, conduct mandatory inspections and decontamination of watercraft to limit the movement of aquatic nuisance species (as defined in section 1003 of the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (16 U.S.C. 4702)) into, out of, or across the waters of the United States.

(b) Aquatic Nuisance Species Task Force.—Section 1201(b) of the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (16 U.S.C. 4721(b)) is amended—

(1) in paragraph (6), by striking "and" at the end;

(2) by redesignating paragraph (7) as paragraph (8); and

(3) by inserting after paragraph (6) the following:

"(7) the Director of the National Park Service; and".

(c) Aquatic Nuisance Species Program.—Section 1202 of the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (16 U.S.C. 4722) is amended—

(1) in subsection (b)—

(A) in paragraph (5), by striking "and" at the end;

(B) in paragraph (6), by striking the period at the end and inserting "; and"; and

(C) by adding at the end the following:

"(7) not later than 90 days after the date of enactment of the Preventing Invasive Species in Western Waters Act of 2018, clarify the authority of each member of the Task Force to inspect watercraft and recommend legislative or regulatory changes to eliminate existing gaps in authorities between members of the Task Force to effectively manage and control the movement of aquatic nuisance species into, out of, and across ~~[Federal land and water/~~waters of the United States~~]~~.''; and

(2) in subsection (e)(1)—

(A) in the first sentence, by inserting ", infrastructure," after "environment"; and

AMERICAN OVERSIGHT

(B) in the second sentence, by inserting "(including through the use of watercraft inspection stations)" after "aquatic nuisance species".

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006777

Section 1: Short Title

"Preventing Invasive Species in Western Waters Act of 2018"

Section 2: Watercraft Inspection Financial Assistance

U.S. Army Corps of Engineers: This section directs the Secretary to establish, operate, and maintain new or existing watercraft inspection stations to protect the Columbia River Basin, the Upper Missouri River Basin, and the Arkansas River Basin. It authorizes $30,000,000 to carry out this section, and directs the Secretary to place watercraft inspection stations at locations with the highest likelihood of preventing the spread of aquatic invasive species.

Bureau of Reclamation: This section amends dam safety statute to direct the Secretary of the Interior, through the Commissioner of Reclamation, to provide financial assistance to states to establish, operate, or maintain watercraft safety inspection stations when such invasive species control projects could prevent the spread of aquatic invasive species into and out of Bureau of Reclamation reservoirs. The financial assistance could include cost-share of up to 50%, to be matched with non-federal funds. Priority for financial assistance would pbe provided to reclamation States that have the capacity to fund watercraft inspection stations.

Section 3: Mandatory Watercraft Inspection Authority

This section provides each federal agency that is a member of the Aquatic Nuisance Species (ANS) Task Force with the discretionary authority to conduct mandatory inspection and decontamination of watercraft to limit the movement of ANS into and out of U.S. waters. This section adds the National Park Service as an explicit member of the ANS Task Force and updates the statute to clarify the role of watercraft inspection stations to protect federal infrastructure. Finally, this Section requires the Task Force to report back within 90 days on other legislative or regulatory changes that would eliminate existing gaps in authorities between Task Force agencies to effectively manage and control the movement of aquatic nuisance species.

DRAFT – INTERNAL USE ONLY

WESTERN GOVERNORS' ASSOCIATION

Policy Resolution 2019-XX

Cybersecurity – VERSION 1

Commented [BB1]: 9/17 Work Group Call. Attendees: WA. Discussed WA edits shown below.
9/24 Work Group Call: No attendees. WA provided feedback/edits on draft.
10/1 Work Group Call: No attendees.
10/2-10/3: WA and ND provided additional edits.

A. BACKGROUND

1. In the age of automation, digitization, big data, artificial intelligence, and machine-to-machine learning, the United States' capabilities to prevent, detect and respond to cyberattacks are of ever-growing importance to our society. The cybersecurity of our nation is an all-of-government and industry-wide endeavor.

2. Cybersecurity is especially imperative for critical infrastructure, which includes the nation's electric grid, energy resource supply and delivery chains, finance, communications, election systems, the chemical industry, commercial facilities, critical manufacturing, defense industrial base, emergency services, food and agriculture, government facilities, healthcare and public health, information technology, transportation, and water and wastewater systems.

3. Addressing cybersecurity needs across ~~these~~ critical infrastructure sectors ~~and others~~ is further complicated by the increasing interdependency and interconnectedness of our nation's data systems to myriad of non-critical infrastructure systems and ~~the~~ a dynamic threat environment. Effective cybersecurity ~~regimes~~ programs require strategic and functional relationships and information-sharing between federal, state and local levels of government, and the public and private sectors.

Commented [BB2]: 10/2: ND edits.

4. The cybersecurity of their states and the nation is a high priority of Western Governors. State governments are responsible for securing public networks, the state's digital assets, and citizen data, as well as coordinating their cybersecurity efforts with federal agencies and potentially-affected private entities (e.g., utilities, financial institutions, transportation, and health). Governors lead efforts to plan and implement state cybersecurity programs, respond to cyberattacks, and investigate intrusions.

Commented [BB3]: 10/2: ND edits.

~~4.~~5. State election systems remain targets of foreign interference. As governors, we remain committed to protecting our states' election systems. There is nothing more fundamental to the enduring success of our American democracy, and we take seriously our responsibility to protect the integrity and security of our elections. This is an imminent national security threat that transcends party lines. This is a matter of protecting and preserving fair elections—the underpinning of our democracy.

Commented [BB4]: 10/3: WA edition.

~~5.~~6. The Office of Management and Budget and Department of Homeland Security (DHS) May 2018 Federal Cybersecurity Risk Determination Report and Action Plan concluded that 71 of 96 federal agencies are at risk or high risk of cyber intrusions. It also determined that federal agencies are not equipped to determine how threat actors seek to gain access to their information. This deficiency results in ineffective allocations of the agencies' limited cyber resources.

Commented [BB5]: 10/2: ND Comment: Are we absolutely certain we want this, as it's currently worded, in here? First, is this entirely accurate? Second, States aren't in a much better state of capability… Third, I am unsure of the point being made here…

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006779

DRAFT – INTERNAL USE ONLY

~~6.~~7. Currently, there is a severe deficit of cyber workers, especially in government. Our nation cannot defend itself without a well-trained, experienced cyber workforce. The ~~private and~~ public sector~~s~~ must dedicate resources to cybersecurity education, training, and recruitment programs and encourage the private sector to do the same through effective policy.

Commented [BB6]: 9/17: WA edit.

B. GOVERNORS' POLICY STATEMENT

~~1.~~ Western Governors urge Congress to improve coordination of congressional oversight and legislative activity on cybersecurity. The federal government has a responsibility to provide adequate funding for states to meet election security needs. Western Governors encourage Congress and the Administration to work cooperatively with states in developing election security legislation and mandates, and to fully fund implementation.

Commented [BB7]: 10/3: WA edit.

~~2.~~1.

~~3.~~2. Federal agencies must engage in early, meaningful, substantive, and ongoing consultation with Governors or their designees on all aspects of cybersecurity. The federal government must also continue to clarify the roles and responsibilities of federal agencies in preventing, preparing for, and responding to cyberattacks. Centralized authority, points of contact, and formalized communication pathways are necessary to address increasingly complex threats. In addition, these pathways must occur at each level within government and other organizations.

Commented [BB8]: 9/24: Based on WA suggestion.

~~4.~~3. The increasing number and inconsistency of federal security regulations puts an unnecessary burden on state governments and is an inefficient use of often-constrained security resources. The federal government should establish a working group with representatives from states and federal agencies, as well as restore the position of the White House cybersecurity coordinator, to harmonize disparate agency regulations.

Commented [BB9]: 9/17: WA edit.

~~5.~~4. Western Governors recommend that the federal government continue the DHS State, Local, Tribal, and Territorial Engagement Program, which provides cybersecurity risk briefings and resources to Governors and other officials. The Governors also support DHS's Office of Cybersecurity and Communications, with which state chief information officers regularly interact.

~~6.~~5. The National Institute for Standards and Technology (NIST) Cybersecurity Framework and other standards can facilitate effective, consistent, and risk-based decision-making in government and industry. Real-world simulations of attacks on critical infrastructure are essential to prepare our nation for potential threats.

~~7.~~6. The federal government should use the full range of economic tools, including travel and financial sanctions, to deter cyberattacks organized or supported by nation-states.

~~8.~~7. The public and private sectors must take steps to mitigate global supply chain risks (e.g. installation of malicious software or hardware). Government and industry should also increase the cybersecurity awareness of government and private employees through training and education.

~~9.~~8. The Administration should propose, and Congress should provide, long-term authorization and sufficient appropriations for high-quality cybersecurity education and workforce development programs to grow and sustain the cybersecurity workforce. The federal government should

AMERICAN OVERSIGHT

also expand the CyberCorp: Scholarship for Service program and continue to support educational initiatives, such as NIST's Initiative for Cybersecurity Education and National Centers of Academic Excellence in Cyber Defense.

~~10.~~9. Western Governors support policies that incentivize the private sector to improve cybersecurity and share information regarding cyber threats as early as possible, including policies to improve access to information or create common standards for information-sharing. The federal government should emphasize the benefits of information-sharing, while alleviating private sector concerns with this essential communication. The federal government and states should continue to investigate liability protections, such as safe harbor provisions, for entities that report cyber intrusions.

Commented [BB10]: 9/24: Based on WA suggestion.

~~11.~~10. Our nation requires innovation in detecting, preventing, and responding to continually-evolving cyber threats. More research is required to understand the use of blockchain and encryption by perpetrators and its utility for defense against cyber threats, and address vulnerabilities of other emerging technologies, including connected vehicles and Internet of Things devices. The federal government should provide funding and technical assistance for these and other types of cybersecurity research and development.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct WGA staff to work with congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

DRAFT

AMERICAN OVERSIGHT

United States Senate

WASHINGTON, DC 20510

October 4, 2018

Andrew R. Wheeler
Acting Administrator
U.S. Environmental Protection Agency
1200 Pennsylvania Avenue, N.W.
Washington, D.C. 20460

Dear Acting Administrator Wheeler:

We are writing to request your review of the federal government's implementation of Clean Water Act Section 401 to ensure it is consistent with the statute. We ask that you work with other federal agencies to determine whether new clarifying guidance or regulations are needed in light of recent abuses of the Section 401 process by certain states.

In the last few years, a troubling trend directed at fossil energy projects has arisen. A select number of states have hijacked Section 401 to delay or block the development of natural gas pipelines and a coal export terminal. While the focus of these abuses today is fossil energy, the approach could be used to target any type of project that is disfavored politically.

To address this concern, we introduced S. 3303, the Water Quality Certification Improvement Act of 2018. This bill clarifies appropriate considerations and processes to evaluate water quality impacts under Section 401. Recent obstruction of energy infrastructure projects has directly threatened national security by forcing reliance on foreign energy and increased air emissions.[1] This obstruction has hurt American workers,[2] states,[3] and tribes.[4]

We are firmly committed to states' and tribes' central role in protecting water resources, as we have maintained in other contexts.[5] In the few instances mentioned above, Section 401 is currently being used inappropriately to "fight" projects rather than protect water quality.[6] As the primary agency responsible for implementation of the Clean Water Act,[7] the Environmental Protection Agency (EPA) plays a critical role in ensuring that the statute is fairly

AMERICAN OVERSIGHT

and uniformly applied. To our knowledge, the most recent EPA document regarding Section 401 is a 2010 interim "handbook" issued by the prior administration. EPA did not ask for public comment on the handbook, and it contains clear misstatements of law. For example, the handbook suggests that a state's "reasonable period" of time to act on a request for a water quality certification begins to run when an application is complete.[8] This is incorrect. That period begins to run when the state receives the application.[9]

We ask that you take immediate steps to review this handbook and other EPA materials. We also request that that EPA – as the lead federal agency – work with other federal agencies to determine what government-wide direction is needed, including the need for new clarifying guidance or regulations. All parties must have a clear understanding of the appropriate scope of water quality certification decisions. The federal permits and licenses that trigger the water quality certification process are often issued by other federal agencies, including the Federal Energy Regulatory Commission and U.S. Army Corps of Engineers. EPA must ensure that these agencies have consistent, coordinated direction.

Sincerely,

John Barrasso, M.D.

WGA CONGRESSIONAL ACTION REPORT

House 2018 Calendar here / Senate 2018 Calendar here

October 8-12, 2018

Reporting of action posted through 8 a.m. ET, October 12, 2018

This weekly report tracks the work of the U.S. House of Representatives and U.S. Senate, with particular emphasis on Committees covering issues of significance to the Western Governors' Association. It is published on weeks when one or both Congressional chambers are in session.

U.S. HOUSE OF REPRESENTATIVES

The House is in recess until after the 2018 elections. The current continuing resolution will keep the government open through Dec. 7, 2018.

U.S. SENATE

Confirmations:

- James Porter - U.S. Third Circuit Judge
- Ryan Nelson - U.S. Ninth Circuit Judge
- Richard Sullivan - U.S. Second Circuit Judge
- William Ray II - U.S. District Judge for the Northern District of GA
- Liles Clifton - U.S. District Judge for the Northern District of AL
- Michael Juneau - U.S. District Judge for the Western District of LA
- Mark Norris - U.S. District Judge for the Western District of TN
- Eli Richardson - U.S. District Judge for the Middle District of TN

AMERICAN OVERSIGHT

October 10, 2018

The Honorable William L. Wehrum
Assistant Administrator
Office of Air and Radiation
U.S. Environmental Protection Agency
1200 Pennsylvania Avenue, N.W.
Washington, D.C. 20460

Dear Assistant Administrator Wehrum:

Western Governors write to express our concerns regarding the Environmental Protection Agency's (EPA's) proposed rule, Emission Guidelines for Greenhouse Gas Emissions From Existing Electric Utility Generating Units; Revisions to Emission Guideline Implementing Regulations; Revisions to New Source Review Program, 83 FR 44746. While our states may have various opinions on the substance of this proposed action, we are united in our concern regarding the lack of meaningful consultation with states in advance of its publication.

The EPA acknowledges that the proposed rule may have federalism implications and impose substantial direct compliance costs on states. Yet, the agency did not consult with Governors or their designees regarding the proposed rule prior to its publication. In the proposal, EPA specifically solicits comment from state officials through the same process as the American public and does not describe any plans to consult with states.

Pursuant to the U.S. Constitution and our system of federalism, state governments are co-sovereigns and co-regulators with the federal government. As the chief elected officials of sovereignties, Western Governors expect to engage with federal officials on the formulation and execution of public policy through early, meaningful, substantive, and ongoing consultation, which must occur outside of, in addition, and prior to the public comment process.

The rulemaking procedures required by the Administrative Procedure Act do not satisfy the federal government's duty to consult with states as co-sovereigns, especially where federal authority is delegated to states. Executive Order 13132 requires agencies to consult with state officials early in the process of developing proposed rules with federalism implications that impose substantial direct costs on states. It also requires agencies to have a consultation process, distinct from notice and comment procedures, to ensure meaningful input from state officials. Western Governors urge EPA to engage in meaningful and substantive consultation with Governors or their designees on the proposed rule as soon as possible and take concrete actions to assure that federalism concerns are addressed before the rulemaking proceeds.

Thank you for your attention to this critical issue. We will also submit this letter through regulations.gov for administrative recordkeeping purposes, while maintaining it is an insufficient channel for state-federal communications on agency actions with substantive impacts on states.

Sincerely,

David Ige
Governor of Hawai'i
Chair, WGA

Doug Burgum
Governor of North Dakota

2:15 – 3:00 p.m.	**Roundtable I: Chair's Initiative – Western Governors' Biosecurity and Invasive Species** WGA Chair and Hawaii **Governor David Ige** will moderate a session featuring the Governors and invited guests discussing the threats that invasive species pose to the West, and the role that biosecurity plays in addressing those risks.
3:00 – 3:30 p.m.	**Keynote II: TBD**
3:30 – 4:30 p.m.	**Roundtable II: Harnessing the Power of Outdoor Recreation** Leaders of state offices of outdoor recreation will discuss how their offices are leveraging the fast-growing industry to spur economic growth and invigorate local communities. Panelists: **Tom Adams**, Utah Office of Outdoor Recreation; **Luis Benitez**, Colorado Outdoor Recreation Industry Office; **Domenic Bravo**, Wyoming Outdoor Recreation Office & State Parks; **Rachel VandeVoort**, Montana Governor's Office of Outdoor Recreation.

DRAFT

AMERICAN OVERSIGHT

5:00 – 7:00 p.m.	**Opening Reception** Governors, Governors-elect, Spouses and All Attendees

Wednesday, December 12, 2018

8:00 a.m. – 5:00 p.m.	**Registration Open**
8:00 – 9:00 a.m.	**Private Breakfast - Governors and Spouses** **Governors-elect and spouses welcome; No staff*
9:15 – 9:45 a.m.	**Keynote III & Conversation with Secretary of Agriculture Sonny Perdue** The Secretary of Agriculture will discuss policy issues of significance to Hawaii and the West, followed by a public conversation with the Western Governors.
9:45 – 10:00 a.m.	**Keynote IV: U.S. Secretary of Veterans Affairs, Robert Wilkie** The Secretary of Veterans Affairs will discuss policy issues of significance to Hawaii and the West, then join the following roundtable discussion.
10:00 – 10:45 a.m.	**Roundtable III: Helping Veterans Move from "Jobs" to "Careers"** Veterans have the skills in demand for today's economy, but obstacles remain to translating that experience to the civilian workforce. Secretary of Veterans Affairs **Robert Wilkie** and invited guests will share ideas and have a conversation with the Governors on how to help veterans embark on meaningful careers that maximize the potential of this talented pool of workers.
10:45 – 11:15 a.m.	**Keynote V: Henk Rogers** Henk Rogers became a video game legend when he brought Tetris to the West in the '80s. The Dutch-born entrepreneur, who now lives in Hawaii, established the Blue Planet Foundation, which worked to gain approval for the 2015 bill that directed state utilities to generate 100 percent of their electricity sales from renewable sources by 2045.

DRAFT

AMERICAN OVERSIGHT

11:15 a.m. – 12:15 p.m.	**Roundtable IV: Renewable Energy Integration and Technology** Panelists will examine tools and strategies to balance the variable power provided by wind and solar in Hawaii and the West, and how to ensure reliability in the face of a changing resource mix. Panelists**: James P. Griffin**, Hawai'i Public Utilities Commission; **Stacey Crowley**, California Independent System Operator; **Jim Robb**, North American Electric Reliability Corporation; **Dave Lock**, Tri-State Generation and Transmission Association.
12:15 – 1:15 p.m.	**Lunch – all attendees**
1:00 – 5:00 p.m.	**Local Tours/Activities** *(optional)* **or Afternoon at Leisure**
6:00 – 7:00 p.m.	**Governors' Reception with WGA Sponsors and VIPs** **Governors-elect and staff welcome*
7:00 – 9:00 p.m.	**Hawaiian Luau Dinner Reception** *All Attendees*

Thursday, December 13, 2018

8:00 – 11:30 a.m.	**Registration Open**
8:15 – 9:15 a.m.	**Governors' Breakfast with WGA Sponsors** **Governors-elect and staff welcome*
9:30 – 10:00 a.m.	**Keynote VI & Conversation with U.S. Administrator Linda McMahon, Small Business Administration** The Administrator will discuss policy issues of significance to Hawaii and the West, including disaster assistance and workforce development, followed by a public conversation with the Western Governors
10:00 – 10:45 a.m.	**Roundtable V: Social Determinants and Western Health Care** Health care experts will look at how the places we live, work and play affect health risks and outcomes, and some of the unique challenges facing western states in promoting healthy lifestyles.

DRAFT

AMERICAN OVERSIGHT

10:45 – 11:45 a.m.	**Governors' Conversation: Riding into the Sunset** Western Governors nearing the end of their time in office reflect on lessons they have learned and their hopes for the future of their states and the western region.
11:45 a.m. – Noon	**Update: Governors' Policy and Business Session** Vice Chair, North Dakota Doug Burgum, will offer an update on WGA resolutions and other business.
Noon	**Closing Remarks – Governor David Ige**

SUMMARY OF COMING EVENTS & DEADLINES
(*See details in the report and master calendar below.)*

- Input Requested: Draft Coalition Letter: EPA Action on CWA Section 401 – **Oct. 29 (MONDAY)**
- Input Requested: Letter to EPA on Regional Haze / Draft Exceptional Events Guidance – **Oct. 31**
- SAC Resolutions Call – **Nov. 1**
- Input Requested: Draft Aquatic Invasive Species Bill – **Nov. 2**
- Input Requested: Request for Support of Esplanade for Use on Rangeland Invasives – **Nov. 2**
- Deadline: SAC Recommendations for Panelists/Participants in BISI Hawaii Workshop – **Nov. 2**
- SAC Resolutions Call – **Nov. 8**
- Meeting / Call-in: WGA, State Invasive Species Coordinators, DOI – Discussion on Quagga/Zebra Mussels Rapid Response – **Nov. 13**
- Biosecurity and Invasive Species Initiative MT Workshop – **Nov. 14**
- SAC Resolutions Call – **Nov. 15**
- WGA New Governor Orientation Luncheon – **Nov.16**
- Ballots and Winter Meeting Briefing Books Delivered – **Nov. 27**
- SAC Call (Winter Meeting Logistics) – **Dec. 6**
- Ballot Return Deadline – **Dec. 7**
- Biosecurity and Invasive Species Initiative HI Workshop – **Dec. 9-10**
- SAC Winter Meeting (Hawaii, The Big Island) – **Dec. 11**
- WGA 2018 Winter Meeting (Hawaii, The Big Island) – **Dec. 10-13**

HOUSEKEEPING

December 2018 SAC Meeting

Attached find the near-final draft agenda for the upcoming SAC meeting at the 2018 WGA Winter Meeting on the Big Island. Join us from 8:30-11:30 a.m. on Tuesday Dec. 11 in the Paniolo Lounge, Fairmont Orchid Hotel.

Action Item: If you haven't already, please RSVP to Deb Kinsley (dkinsley@westgov.org)

WGA Staff: Holly Propst (hpropst@westgov.org)

2018 Winter Meeting Update

The agenda for the 2018 Winter Meeting is coming together, attendee registration is going strong and ten Governors already have registered to join WGA Chair David Ige Dec. 10-13 on the Big Island. The Secretaries of Agriculture and Veterans Affairs will speak, as will the Administrator of the Small Business Administration.

Western Governors joining Governor Ige include: WGA Vice Chair Doug Burgum (North Dakota), Dennis Daugaard (South Dakota), Mary Fallin (Oklahoma), Gary Herbert (Utah), Matt Mead (Wyoming), Brian Sandoval (Nevada), Kate Brown (Oregon), Lolo Matalasi Moliga (American Samoa), Eddie Calvo (Guam) and Ralph Torres (Northern Mariana Islands). Ten members from SAC have registered.

Action Item: Read the attached agenda and register here if you have not already.

WGA Staff: Joe Rassenfoss (joe@westgov.org)

RESOLUTIONS

Resolution Development – Update

Thanks to SAC members who joined yesterday's resolution development conference call. As discussed, your assistance in incorporating appropriate feedback from your states is greatly appreciated.

- Resolution Status Sheet Updated (Attachment)
- Foreign Visitor Preclearance (Attachment)
- Cybersecurity (Attachment)
- Compensatory Mitigation (Attachment)
- Western Health Care (Attachment)

ACTION / REPORTING ITEMS

Air Quality

Draft WGA Letter to EPA on Regional Haze Reform and Draft Exceptional Events Guidance

In August and September, the Environmental Protection Agency (EPA) issued a Regional Haze Reform Roadmap and draft exceptional events guidance. The Western States Air Resources Council (WESTAR) recently submitted comments on these documents to EPA.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006797

The attached draft letter highlights issues presented by EPA's documents (and WESTAR's comments) that align with the Governors' policy and emphasizes the need for effective cooperative federalism on regional haze and exceptional events, which are of critical importance to the West.

Action Item: Input requested by COB on Wednesday, Oct. 31.

WGA Staff: Britta Beckstead (bbeckstead@westgov.org)

EPA Proposes Extension of the Deadline for 2016 Municipal Solid Waste Landfill Emission Plans

On Oct. 23, EPA proposed extending plan submission deadlines for the 2016 Municipal Solid Waste (MSW) Emission Guidelines to Aug. 29, 2019 to align with the state plan timing in the proposed Affordable Clean Energy Plan. EPA is also currently reviewing these Emission Guidelines and its 2016 final rules for MSW Landfill New Source Performance Standards (NSPS). See more information about the proposal and the MSW Emission Guidelines and NSPS here.

Biosecurity / Invasive Species

BISI Workshops -- Update

- Workshop #3: Early Detection and Rapid Response | Nov. 14 | Helena, MT | Register here.
- Workshop #4: Biosecurity and Agriculture | Dec. 9-10 | Kona Coast, Island of Hawaii | Register here.

WGA Staff: Bill Whitacre (bwhitacre@westgov.org)

Draft Aquatic Invasive Species Bill

In the Oct. 5 email, WGA staff circulated for comment a draft bill from Sen. Michael Bennet (D-CO) which would provide the Department of the Interior and other federal agencies the authorities necessary to implement mandatory inspection and decontamination for all watercraft leaving infested waters under their jurisdiction. WGA staff has incorporated all comments received into the new revised version of the bill (attached). If approved by SAC, WGA will work with Sen. Bennet and other cosponsors to support passage of the bill.

Action Item: Please review the attached draft bill and contact Bill Whitacre with any comments or recommendations for potential cosponsors by COB on Friday, Nov. 2.

WGA Staff: Bill Whitacre (bwhitacre@westgov.org)

Request for Support: Registration of Esplanade for Use on Rangeland Invasives

Bayer U.S. has asked WGA to submit a letter to EPA supporting the registration of the herbicide Esplanade 200 SC (indaziflam) for use to control invasive grasses on western rangelands. Bayer has provided information in the attached "Stakeholder Support Request" document. On May 1, 2015, WGA responded to a similar request and submitted comments to USFWS supporting the registration of the weed-suppressive bacteria *Pseudomonas fluorescens* (ACK55) as a biopesticide agent to combat invasive grasses. Bayer would like a letter of support by Nov. 9, 2018

Action Item: Please review the attached request document and contact Bill Whitacre with any comments by COB on Friday, Nov. 2.

EPA's Proposed Methane Rule Revisions

On Oct. 12, EPA published proposed revisions to its final rule, Oil and Natural Gas Sector: Emission Standards for New, Reconstructed, and Modified Sources; Final Rule, 81 FR 35824 (June 3, 2016). The revisions address: fugitive emissions requirements; well site pneumatic pump standards; the requirements for certification of closed vent systems; alternative means of emission limitations, well completions (location of a separator during flowback, screen-outs and coil tubing cleanouts); onshore natural gas processing plants (definition of capital expenditure and monitoring); storage vessels (maximum average daily throughput); and general clarifications (certifying official and recordkeeping and reporting).

WGA Policy Resolution 2018-05, *Air Quality and Methane Emissions Regulation*, notes that "[m]any western states – in cooperation with industry in those states – have already implemented regulatory strategies that reduce methane emissions from oil and gas operations, while expanding the use and sale of methane."

Note the attached Executive Director's letter on this topic.

WGA Staff: Britta Beckstead (bbeckstead@westgov.org)

Rural Development

Opportunity Zones Guidance – Analysis

On Oct. 19, 2018, the U.S. Department of Treasury issued proposed guidance for the new Opportunity Zone tax incentive created in the Tax Cuts and Jobs Act of 2017. The guidance provides clarity about the establishment and operation of the special funds that can make investments through the program, and the tax breaks for capital gains that individual taxpayers and companies funnel into those funds.

Treasury indicated that they anticipate the proposed regulations, which are pending publication in the Federal Register, could be finalized in the spring. There will also be a second round of guidance issued before the end of the year. The attached memo provides an analysis of the first round of regulations.

Here is a map showing the census tracts that have been designated as Opportunity Zones in each state.

WGA Staff: Lauren DeNinno (ldeninno@westgov.org)

Species Conservation

Southwestern Willow Flycatcher Conservation Program

On Friday, Oct. 26, 2018 the U.S. Department of Agriculture, Animal and Plant Health Inspection Service (APHIS) announced a draft conservation program pursuant to the Endangered Species Act (ESA) for the endangered southwestern willow flycatcher.

The conservation program will focus on restoring habitat for the southwestern willow flycatcher impacted by invasive species control efforts targeted at eradicating tamarisk. In 2000, APHIS began issuing permits for the release of tamarisk leaf beetle as a means of biological control of tamarisk. The beetles spread beyond the targeted control area and began negatively impacting tamarisk in southwestern willow flycatcher habitat, triggering a lawsuit claiming that APHIS failed to comply with ESA Section 7.

The proposed conservation program, APHIS is proposing to offset negative impacts to southwestern willow flycatcher habitat through a number of measures. APHIS will be accepting comments on the proposed conservation program until Nov. 26, 2018.

WGA Staff: Zach Bodhane (zbodhane@westgov.org)

Water

Clean Water Act Section 401

AMERICAN OVERSIGHT

- **Draft Coalition Letter: Response to Announced EPA Action on Clean Water Act Section 401**

  EPA's Office of Water has announced that the agency plans to take action to address "perceived abuses" by certain states of their authority under Section 401 of the federal Clean Water Act. Calls for EPA to undertake regulatory changes have appeared in report language of the currently-proposed FY2018 House Interior and Environment Appropriations bill, as well as an Oct. 4 letter from Senators to EPA.

  WGA Policy Resolution 2018-08, *Water Quality in the West*, expresses that "Section 401 is operating as it should, and states' mandatory conditioning authority should be retained without amendment." Additionally, a WGA-led coalition of ten associations of state officials sent an Aug. 9 letter to Congressional leadership, expressing concerns about various proposals to alter the state water quality certification under Section 401 and urging Congress to "reject any legislative or administrative effort that would diminish, impair or subordinate states' ability to manage or protect water quality within their boundaries."

  WGA has now drafted, for your review, the attached draft coalition letter to EPA's Office of Water, expressing the importance of state authority under Section 401 and urging the agency to engage with states to avoid curtailing such authority. Once approved, WGA will circulate to associations of state officials in hopes of engaging EPA as a coalition.

  Action Item: Please review the attached draft letter and let WGA staff know if you have any questions by COB on Monday, Oct. 29.

- **FY19 House Interior and Environment Appropriations Report Language Directs EPA to Finalize Guidance on the Implementation of CWA Section 401**

  The Fiscal Year 2019 Interior and Environment appropriations have been included in H.R. 3354, which passed the House by a vote of 211-198 and awaits Senate consideration. The House report (H. Rpt. 115-765) includes the following language addressing Clean Water Act (CWA) Section 401:

  > The Committee encourages the Administrator of the Environmental Protection Agency to finalize guidance on the implementation of Clean Water Act Section 401 (33 U.S.C. 1341). Such guidance shall reinforce that the statutory time period for review does not exceed one year, that the scope of review is limited to Federal water quality standards, and that waiver of the certification obligation occurs when a State fails to act within one year from the date of application. The guidance shall also include a suggested schedule for a State making a Section 401 decision, which recognizes that the entirety of the State's review must occur within one year.

  This language reflects a larger effort to curtail states' authority to implement Section 401 and is particularly concerning because such a prescribed result would substantially narrow the scope of state review and limit their flexibility to processes applications for certification (which would ultimately result in a greater number of denials). To remove the concerning language from the House report, the conference committee must affirmatively contradict or reverse the position.

  Action Item: Please contact the offices of any conference committee members you have relationships with (listed below) and express that the report language addressing Section 401 would likely result in the curtailment of states' authority to protect water resources within their boundaries and that the language should be affirmatively withdrawn by language in the conference committee report.

  House conferees: Rodney Frelinghuysen (R-NJ); Robert Aderholt (R-AL); Mike Simpson (R-ID); Ken Calvert (R-CA); Tom Cole (R-OK); Mario Diaz-Balart (R-FL); Tom Graves (R-GA); David Young (R-IA); John Rutherford (R-FL); Nita Lowey (D-NY); David Price (D-NC); Sanford Bishop (D-GA); Betty McCollum (D-MN); Michael Quigley (D-IL); and Chellie Pingree (D-ME).

  Senate conferees: Richard Shelby (R-AL); Susan Collins (R-ME); Lisa Murkowski (R-AK); John Hoeven (R-ND); James Lankford (R-OK); Cindy Hyde-Smith (R-MS); Patrick Leahy (D-VT); Jack Reed (D-RI); Tom Udall (D-NM); Jeff Merkley (D-OR); and Chris Coons (D-DE).

President Issues Memorandum Addressing Development of Western Water Infrastructure

On Oct. 19, President Trump issued a Presidential Memorandum, Promoting the Reliable Supply and Delivery of Water in the West, directing the Secretaries of the Interior and Commerce to streamline ongoing environmental reviews of water infrastructure associated with the Central Valley Project, California State Water Project, Klamath Irrigation Project, and hydropower projects located within the Columbia River Basin. The Memorandum also directs the Secretaries to improve the use of forecasting technology, desalination technology, recycled water, and technology for water management and monitoring. The attached analysis provides a summary of provisions included in the Memorandum and their relation to applicable WGA policy.

WGA Staff: Ward Scott (wscott@westgov.org)

HAPPENING ON THE HILL

WGA Congressional Action Report

Both the House and Senate are in recess until after the 2018 elections. The full 115th Congress will be back, starting Nov. 13, to complete action on funding matters. The current continuing resolution will keep the government open through Dec. 7, 2018. The WGA Congressional Action Report will resume when the action does.

WGA Staff: Holly Propst (hpropst@westgov.org)

HAPPENING IN THE EXECUTIVE BRANCH

HHS Releases Guidance on State Waivers for Health Care Insurance

The Department of Health and Human Services (HHS) announced this week that it has issued new guidance on State Innovation Waivers under Section 1332 of the Affordable Care Act. The guidance increases flexibility on coverage "guardrails" to permit the use of insurance plans that otherwise would not meet the coverage requirements of current federal law, loosens the requirement that state legislatures enact a law to prompt a state to seek a waiver, and provides "new functionality for states to leverage components of the federal platform and work with private industry." HHS hopes that waivers approved under the new guidance will be implemented in the 2020 health plan year; the Centers for Medicare & Medicaid Services is preparing to publish a series of Waiver Concepts to spur conversation about innovative waiver applications with states.

WGA Staff: Troy Timmons (ttimmons@westgov.org)

Administration Announces HRA Changes

The Departments of the Treasury, Health and Human Services, and Labor announced the issuance of a proposed rule to expand the usability of health reimbursement arrangements (HRAs). The proposed rule would allow employers to integrate HRAs with individual health insurance coverage if certain conditions are met and establish conditions for certain HRAs to be recognized as limited excepted benefits. The intent of the proposed rule is to create a new tax-preferred option for employers to fund employee health coverage: in this case, employers would fund the cost of individual health insurance coverage under an HRA, and the employee would own the coverage. This would allow an employee to maintain coverage even if he or she left the employer and was no longer covered by the HRA. The proposal would also allow employers offering traditional employer-sponsored coverage to offer an HRA of up to $1,800 per year to reimburse an employee for certain qualified medical expenses, including premiums for short-term, limited-duration insurance plans. A fact sheet can be found here.

AMERICAN OVERSIGHT

Presidential Memorandum: Promoting the Reliable Supply and Delivery of Water in the West

On October 19, President Trump issued a Presidential Memorandum, Promoting the Reliable Supply and Delivery of Water in the West, "to promote more efficient environmental reviews of water infrastructure projects in the West" in response to "decades of uncoordinated regulatory actions [that] have diminished the ability of Federal infrastructure to deliver needed water and have increased costs in the West."

The Memorandum directs the Secretary of the Interior and the Secretary of Commerce to streamline ongoing environmental reviews of water infrastructure associated with the Central Valley Project, California State Water Project, Klamath Irrigation Project, and hydropower projects located within the Columbia River Basin. The Memorandum also directs the Secretaries to improve the use of forecasting technology, desalination technology, recycled water, and technology for water management and monitoring. The following is a summary of the Memorandum:

Section 1. Policy. Directs the Secretaries of the Interior and Commerce to "work together to minimize unnecessary regulatory burdens and foster more efficient decisionmaking so that water projects are better able to meet the demands of their authorized purposes."

Section 2. Streamlining Western Water Infrastructure Regulatory Processes. Directs the Secretaries of the Interior and Commerce to:

- Within 30 days, (i) identify major water infrastructure projects in California in which the Department of the Interior (DOI) and Department of Commerce (DOC) have joint responsibility under the Endangered Species Act (ESA) or individual responsibilities under the National Environmental Policy Act (NEPA); and (ii) designate an official to coordinate ESA and NEPA compliance responsibilities, identify regulations and procedures that potentially burden the project, and develop a plan to appropriately suspend, revise, or rescind any regulations or procedures that unduly burden the project beyond the degree necessary to protect the public interest or otherwise comply with the law.

- Develop a timeline for completing applicable environmental compliance requirements for projects in California over which DOI and DOC have joint responsibility under the ESA or individual responsibilities under NEPA.

- Ensure that the ongoing review and issuance of their respective final biological opinions for the long-term coordinated operations of the Central Valley Project and California State Water Project is completed not later than June 15, 2019.

- Complete the joint consultation presently underway for the Klamath Irrigation Project by August 2019.

AMERICAN OVERSIGHT

- Provide monthly updates to the Chair of the Council on Environmental Quality (CEQ), and other components of the Executive Office of the President, as appropriate, regarding projects in meeting established timelines.

Section 3. Improve Forecasts and Water Availability. Directs the Secretaries of the Interior and Commerce to convene water experts and resource managers to develop an action plan to improve the information and modeling capabilities related to water availability and water infrastructure projects.

Section 4. Improving Use of Technology to Increase Water Reliability. Directs the Secretary of the Interior to direct DOI bureaus to promote the expanded use of technology for improving the accuracy and reliability of water and power deliveries, including investment in technology and reduction of regulatory burdens to enable broader-scale use of desalination technology and recycled water. Additionally, the Secretary is directed to invest in programs that promote and encourage innovation, research, and development of technology that improve water management.

Section 5. Consideration of Locally Developed Plans in Hydroelectric Projects Licensing. Directs the Secretaries of the Interior and Commerce to give appropriate consideration to relevant information in locally-developed plans when participating in Federal Energy Regulatory Commission licensing activities for hydroelectric projects.

Section 6. Streamlining Regulatory Processes and Removing Unnecessary Burdens on the Columbia River Basin Water Infrastructure. Directs the Secretary of the Interior, Secretary of Commerce, Secretary of Energy, and the Assistant Secretary for the Army for Civil Works under the direction of the Secretary of the Army, to submit to the Chair of CEQ within 60 days a schedule to complete the Columbia River Operations Environmental Impact Statement and associated Biological Opinion (due by 2020).

AMERICAN OVERSIGHT

WESTERN GOVERNORS' ASSOCIATION

Policy Resolution 2019-XX

Compensatory Mitigation – Version 6

A. BACKGROUND

1. Through their sovereign and statutory powers, states have primary management authority over all fish and wildlife within their borders. Following decades of work by staff and contractors, states have developed extensive science, expertise, and knowledge of species within their borders.

2. Governors bear responsibility for managing state interests, authorities and property rights within state borders – including fish and wildlife – and oversee state agencies charged with properly managing wildlife, habitat and related resources within their states.

3. States are the primary recipients of economic benefits associated with healthy species and ecosystems. At the same time, the economic costs of compliance with federal environmental regulations can fall disproportionately on western states and local communities. States recognize the importance of economic development and note that it is often not possible to both advance an economic development project and entirely avoid negative impacts to fish and wildlife populations and habitat.

4. Compensatory mitigation plays an important role in fish and wildlife management and conservation, and states rely on its use in developing and executing species conservation strategies. Compensatory mitigation strategies employed by states include, but are not limited to, habitat protection, habitat restoration, establishment, enhancement, or conservation activities.

5. The mitigation hierarchy is a commonly referenced and widely utilized strategy in determining compensatory mitigation requirements for resource development projects. The mitigation hierarchy consists of first avoiding adverse impacts to fish and wildlife populations and habitat where practicable, then minimizing adverse impacts where they cannot be avoided, and then committing to rectifying direct impacts through restoration where possible. The next step is employing compensatory mitigation measures to replace resources or offset adverse impacts that remain following avoidance and minimization. This practice is memorialized under the Council of Environmental Quality's implementing regulations and other federal policy and guidance.[1] Some states have identified and utilized a final step in the mitigation hierarchy, monitoring project impacts and mitigation actions and taking appropriate corrective measures to achieve the identified goal.

6. While states exercise primary management authority over fish and wildlife within their borders, habitat for fish and wildlife often spans a patchwork of land ownership types, complicating state efforts to manage and conserve species under their management jurisdiction. This is particularly challenging in western states, where federal ownership constitutes a generally higher percentage of overall land ownership.

[1] 40 CFR 1508.20

DRAFT

AMERICAN OVERSIGHT

B. GOVERNORS' POLICY STATEMENT

1. States have the responsibility to establish appropriate statutes, regulations, policies and programs to manage fish and wildlife within their borders. This responsibility extends to the development of compensatory mitigation standards and implementation of compensatory mitigation for species under their management purview.

2. Compensatory mitigation approaches vary from state to state, but they are designed to fully offset residual impacts to habitat function and value[2]. Governors recognize that habitat functionality and value are the primary metric by which mitigation outcomes are measured. Compensatory mitigation efforts must be sufficient to fully offset residual impacts to habitat function at the site-specific and range-wide scale necessary to meet conservation goals.

3. Where state mitigation programs or standards are in place, consistency with existing state policy should be the primary guiding principle for a federal agency's development or implementation of compensatory mitigation on lands within their management authority or jurisdiction.

4. Western Governors urge federal agencies to adopt and implement state-supported compensatory mitigation programs and policies. Consistency between federal mitigation standards and those in state-supported programs allows wildlife managers, state and federal regulators, and developers to use a consistent compensatory mitigation program across differing land ownership within a state. States will engage federal agencies in the development or amendment of compensatory mitigation programs and policies.

~~5. Western Governors recognize that that the diversity of conceivable species, habitat and project-specific circumstances make quantifying measures, with clearly defined goals, for compensatory mitigation difficult. Governors are concerned about federal agencies' potential inconsistent use and lack of assessment criteria for ambiguous mitigation goals such as "net conservation gain," and they believe that measures should be designed to avoid inappropriate uses of such a goal.~~

5. Western Governors recognize that the diversity of conceivable species, habitat, and project specific circumstances make quantifying measures, with clearly defined goals for compensatory mitigation, challenging for both state and federal agencies. ~~Governors are concerned about federal agencies' potential inconsistent use and lack of assessment criteria for ambiguous mitigation goals.~~ Governors urge federal agencies, in consultation with states, to provide consistency in the use of and improve assessment criteria for mitigation goals. Governors believe mitigation goals should establish clear expectations backed by effective assessment criteria. ~~to avoid inappropriate use of any mitigation goal.~~

6. Western Governors recognize that mitigation of development impacts to habitat or natural resources must account for a level of risk and uncertainty that a particular compensatory mitigation action may fail to adequately offset adverse impacts to fish, wildlife and habitat.

[2] Habitat value is an assessment of the affected fish and wildlife habitat based on three attributes; scarcity, suitability and importance. Importance is the relative significance of the affected habitat, compared to other examples of a similar habitat type in a landscape context.

Commented [ZB1]: WA edit – 10/10/18

Comment: "Washington would strongly oppose this section. Our mitigation policies do not yet identify "net conservation gain" as a mitigation goal, but we have increasing seen that goal applied in individual projects. Previous federal compensatory mitigation policies have considered "net conservation benefit" and WA has not opposed. Quantifying and measuring impacts and habitat function value, and ensuring additionality, timeliness, and effectiveness in delivering function and value of compensatory mitigation is a critical component of DFW's mitigation policy. The consistency and challenges of measuring to "no net loss" is not objectively more burdensome than measuring to "net conservation gain" and limiting compensatory mitigation standards in this way is really not appropriate for this resolution.

Commented [ZB2]: ID edit – 10/22/18

Commented [ZB3]: WA edit – 10/25/18

ID approved WA edit - 10/25/18

Commented [ZB4]: WA edit – 10/25/18

ID approved WA edit - 10/25/18

DRAFT

AMERICAN OVERSIGHT

Federal agencies should acknowledge a variety of tools and measures for incorporating risk and uncertainty based on the diverse experience of states in designing and implementing compensatory mitigation programs.

7. Governors believe that federal mitigation policies should be developed in coordination with Governors, and the state agency officials they designate, to achieve the following objectives:

- Provide measurable and documentable habitat and conservation values, services and functions that are at least equal to the lost or degraded values, services and functions caused by the impact.
- Incorporate measures to account for a level of risk that a particular compensatory mitigation action may fail or not achieve its stated objectives, and uncertainty about the level and duration of estimated impacts.
- Compensatory mitigation projects should be sited and designed to support the most effective conservation or restoration projects; the effectiveness of mitigation actions should be based on the best available science.
- Provide benefits that are durable and in place for at least the duration of the residual adverse impacts.
- Encourage the application of compensatory mitigation offsets prior to the impact occurring to ensure no lag time occurs between impacts and offsets.
- Offer transparency and certainty to developers, regulators, and the public to the extent feasible. This necessitates early and substantive consultation with States and consistency with State designed compensatory mitigation standards where they exist.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct WGA staff to work with Congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

AMERICAN OVERSIGHT

November XX, 2018

The Honorable William Wehrum
Assistant Administrator
U.S. Environmental Protection Agency
Office of Air and Radiation (6103A)
1200 Pennsylvania Avenue, N.W.
Washington, D.C. 20460

Dear Assistant Administrator Wehrum:

Western Governors support the recent comments submitted by the Western States Air Resources Council (WESTAR) on the Environmental Protection Agency's (EPA) September 11, 2018 Regional Haze Reform Roadmap (Roadmap) and August 2018 draft exceptional events guidance. The letter highlights issues of significance to Governors regarding these regulatory activities. We appreciate that the Roadmap's key principles for implementation of the regional haze program include leveraging state leadership, reducing burdens on states, and supporting states in their implementation of the Clean Air Act. Furthermore, we are grateful for EPA's engagement with WESTAR on the exceptional events guidance.

The scheme of cooperative federalism embraced by the Roadmap requires adequate funding, timely guidance, comprehensive scientific research and data, and meaningful consultation with states as outlined in Western Governors' Policy Resolution 2018-05, *Air Quality and Emissions Regulation*. The Roadmap notes the importance of timely regional haze guidance yet indicates that guidance will not be completed until Spring 2019 – when many states will have already completed their technical analyses. Western Governors urge EPA to devote resources to finalize this guidance as soon as possible and to provide funding for state regional haze planning and implementation. If issuing the guidance earlier is not possible, it is of the utmost importance for EPA to consult with state air quality agencies and regional organizations on what the guidance will contain.

Additionally, EPA must ensure meaningful and substantive consultation with states before making determinations on the extent and scope of an exceptional events analysis. Exceptional events guidance, procedures and policies should encourage collaboration with states as co-regulators and eliminate one-sided, top-down decision-making. EPA should also advance the scientific understanding of the distinction of different sources of ozone through transparent, comprehensive research coordinated with state air quality agencies and regional organizations.

Please do not hesitate to contact Western Governors if we can assist in advancing the recommendations described above. Thank you for your continued commitment to cooperative federalism. We look forward to continuing to work with you to strengthen EPA's partnership with states.

Sincerely,

David Ige
Governor of Hawai'i
Chair, WGA

Doug Burgum
Governor of North Dakota
Vice Chair, WGA

DRAFT

AMERICAN OVERSIGHT

Analysis: Proposed Guidance for Opportunity Zones

Background

Congress created opportunity zones in the Tax Cuts and Jobs Act of 2017 to address uneven economic recovery and persistent lack of growth in low-income communities nationwide. Governors designated 25% of qualifying low-income census tracts in their states as qualified opportunity zones (view map). The federal opportunity zone program is designed to spur investment and job creation by providing investors with favorable tax treatment for reinvesting capital gains in these communities. The legislation also encourages investors to pool resources and risk in a new investment vehicle, qualified opportunity funds (QOFs).

Proposed Guidance "Investing in Qualified Opportunity Funds"

Although opportunity zones have been designated, there remains substantial uncertainty around definitions and implementation that has limited investment by QOFs so far. The U.S. Department of Treasury is responsible for coming up with regulations to guide the formation and operation of QOFs and clarify what investments qualify.

Treasury issued the first proposed guidance related to opportunity zones on October 19th, 2018. The guidance addresses "the type of gains that may be deferred by investors, the time by which corresponding amounts must be invested in QOFs, and the manner in which investors may elect to defer specified gains" and "proposed regulations applicable to QOFs, including rules for self-certification, valuation of QOF assets, and guidance on qualified opportunity zone businesses".

The proposed guidance clarifies what investments will qualify for deferred tax treatment and is expected to encourage a wide range of investments. It also ensures that investments will not be penalized if a community loses its opportunity zone designation after the first 10-year period of the program, a major source of uncertainty for investors.

It also addresses what businesses must do to qualify. Seventy percent of a business's property must be in the opportunity zone to be eligible. Also, capital received from a QOF investment has to be put to use within 31 months.

The proposed guidance includes a number of regulations, a more detailed breakdown of which is available here.

A number of questions remain and a second proposed rulemaking related to opportunity zones is expected later this year. However, Treasury expects that the guidance will provide enough confidence and clarity for QOFs to begin operating and for taxpayers to begin investing in them.

The proposed rulemaking is pending publication on the Federal Register, at which point a 60-day comment period will commence. The regulations are expected to be finalized in the spring of 2019.

WGA Staff: Lauren DeNinno (ldeninno@westgov.org)

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006816

October 25, 2018

Andrew Wheeler
Acting Administrator
U.S. Environmental Protection Agency
1200 Pennsylvania Avenue, N.W.
Washington, D.C. 20460

Dear Acting Administrator Wheeler:

The Environmental Protection Agency (EPA) has proposed revisions to its final rule, Oil and Natural Gas Sector: Emission Standards for New, Reconstructed, and Modified Sources (81 FR 35824 June 3, 2016). Western Governors had requested that EPA consult with states in advance of the 2016 rulemaking to avoid duplicative regulation (May 20, 2015 letter). This consultation did not occur. Western Governors therefore support EPA's decision to review this rule.

Many western states have already implemented regulatory strategies to reduce methane emissions from oil and gas operations, and EPA should recognize these reductions in its regulation of methane (WGA Policy Resolution 2018-05, *Air Quality and Methane Emissions Regulation*). According to the proposal, EPA has determined that certain existing state programs are equivalent to or go beyond the rule's proposed amendments. EPA has proposed that these state requirements can be alternatives to EPA's requirements and has provided an opportunity for other states to apply for similar consideration.

Western Governors appreciate EPA's review and incorporation of existing state programs into the proposed revisions. We urge EPA to engage in meaningful and substantive consultation with states regarding these changes prior to finalizing the proposal.

Sincerely,

James D. Ogsbury
Executive Director

AMERICAN OVERSIGHT

DRAFT – INTERNAL USE ONLY

WESTERN GOVERNORS' ASSOCIATION

Policy Resolution 2018-XX

Foreign Visitor Preclearance
Version 2

A. BACKGROUND

1. The U.S. Department of Commerce estimates that nearly 76 million foreign visitors entered the country during 2016. The vast majority of these travelers arrived in the United States by plane.[1]

2. Tourism is a significant revenue source for western states and territories, many of which count international travelers as major contributors to state and local economies and look to international tourism to drive local employment.

3. As a result of utilizing technology such as Automated Passport Control equipment, average wait time at airport passport and immigration processing areas have declined in recent years, but still frequently exceeds 60 minutes.[2]

4. Foreign visitor preclearance allows international travelers to be screened by U.S. Customs and Border Patrol (CBP) officers prior to boarding an international flight. This preclearance allows passengers to bypass U.S. customs stations upon arrival at an American airport.

5. The Transportation Security Administration requires passenger and property screening at foreign preclearance airports to conform with U.S. aviation security screening standards.

6. Preclearance arrangements between the U.S. and Canada began in 1952. Since that time CBP has established over 600 American law enforcement officers and agricultural specialists at 15 preclearance airports in six countries: Ireland, Canada, Aruba, The Bahamas, Bermuda and United Arab Emirates. CBP also staffs a pre-inspection facility for passenger/vehicle ferry traffic to the U.S. in Victoria, Canada.[3]

7. While there were earlier announcements in 2015 and 2016 to possibly expand the preclearance program to eleven new airports in nine countries, CBP has only concluded agreements to cover Stockholm, Sweden (signed November 4, 2016) and Punta Cana, Dominican Republic (signed December 1, 2016).[4]

[4] "DHS Announces 11 New Airports Selected For Possible Preclearance Expansion Following Second Open Season" https://www.dhs.gov/news/2016/11/04/dhs-announces-11-new-airports-selected-possible-preclearance-expansion-following

AMERICAN OVERSIGHT

8. In FY2017, CBP precleared more than 19 million passengers.[5]

9. The DHS has supported preclearance as both a security imperative – enabling CBP to identify and stop potential terror threats before they reach U.S. soil – and a strong economic opportunity.

B. GOVERNORS' POLICY STATEMENT

1. In recognition of the economic and national security benefits provided by foreign visitor preclearance, Western Governors support CBP's use of preclearance to reduce excessive wait times at American immigration and processing areas.

2. Western Governors support the efforts of DHS and CBP to increase the number of international airports and countries at which foreign visitor preclearance is used. Such expansion will streamline legitimate international travel and will further protect the safety and security of American citizens as well as international visitors.

3. Preclearance also allows smaller airports with no or few full-time CBP personnel to accept direct international flights from preclearance-approved foreign airports. Western Governors recognize the benefit this provides small or rural airports in accepting international travelers more efficiently.

4. In recognition of the benefits provided by foreign visitor preclearance, and in order to expand its use, DHS should work to complete the negotiation process with foreign countries and add new preclearance-approved international airports as soon as possible.

5. Additionally DHS and CBP should work with western states to help identify optimal international foreign visitor preclearance airports for future consideration and should work with western state tourism directors to expand international travel opportunities in western states.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct WGA staff to work with Congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

AMERICAN OVERSIGHT

Title: To amend the River and Harbor Act of 1958, the Reclamation Safety of Dams Act of 1978, and the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 to prevent the spread of invasive species in western waters, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Preventing Invasive Species in Western Waters Act of 2018".

SEC. 2. WATERCRAFT INSPECTION ASSISTANCE.

(a) Corps of Engineers Watercraft Inspection.—Section 104 of the River and Harbor Act of 1958 (33 U.S.C. 610) is amended—

(1) by striking subsection (b) and inserting the following:

"(b) Authorization of Appropriations.—

"(1) IN GENERAL.—There is authorized to be appropriated $110,000,000 to carry out this section for each fiscal year, of which—

"(A) $30,000,000 shall be made available to carry out subsection (d)(1)(A)(i);

"(B) $30,000,000 shall be made available to carry out subsection (d)(1)(A)(ii); and

"(C) $30,000,000 shall be made available to carry out subsection (d)(1)(A)(iii).

"(2) CONTROL OPERATIONS.—Any funds under paragraph (1) used for control operations shall be allocated by the Chief of Engineers on a priority basis, based on the urgency and need of each area and the availability of local funds."; and

(2) in subsection (d)—

(A) by striking paragraph (1) and inserting the following:

"(1) IN GENERAL.—

"(A) WATERCRAFT INSPECTION STATIONS.—In carrying out this section, the Secretary shall consult with States to establish, operate, and maintain new or existing watercraft inspection stations—

"(i) to protect the Columbia River Basin;

"(ii) to protect the Upper Missouri River Basin; and

"(iii) to protect the Arkansas River Basin; and

"(iv) to protect all other waters of the United States under the authority of the Secretary.

"(B) LOCATIONS.—The Secretary shall place watercraft inspection stations under subparagraph (A) at locations, as determined by the Secretary in consultation with States within the areas described in subparagraph (A), with the highest likelihood of

preventing the spread of aquatic invasive species at reservoirs operated and maintained by the Secretary.

"(C) RAPID RESPONSE.—The Secretary shall assist the States within the areas described in subparagraph (A) with rapid response to any aquatic invasive species, including quagga or zebra mussel, infestation."; and

(B) by striking paragraph (3)(A) and inserting the following:

"(A) the Governors of the States within the areas described in clause (i), (ii), or (iii) of paragraph (1)(A), as applicable;".

(b) Bureau of Reclamation Watercraft Inspection.—

(1) IN GENERAL.—The Reclamation Safety of Dams Act of 1978 is amended by inserting after section 5B (43 U.S.C. 509b) the following:

"SEC. 5C. WATERCRAFT INSPECTION.

"(a) Watercraft Inspection in Reclamation States.—

"(1) IN GENERAL.—Notwithstanding section 3, the Secretary of the Interior, acting through the Commissioner of Reclamation (referred to in this section as the 'Secretary'), shall provide financial assistance, including financial assistance to establish, operate, or maintain a watercraft inspection station, under this Act to a reclamation State [(as defined in section 4014 of the Water Infrastructure Improvements for the Nation Act (43 U.S.C. 390b note; Public Law 114–322))] or an aquatic invasive species control project to prevent the spread of aquatic invasive species into and out of reservoirs operated and maintained by the Secretary if the Secretary determines that the financial assistance is—

"(A) necessary;

"(B) in the interests of the United States; and

"(C) not inconsistent with the purposes of this Act.

"(2) NON-FEDERAL INSPECTION STATIONS.—The Secretary may provide financial assistance under paragraph (1) to a reclamation State for the reclamation State to establish, operate, or maintain a non-Federal watercraft inspection station.

"(b) Cost Share.—The non-Federal share of the cost of establishing, operating, and maintaining a watercraft inspection station (including a non-Federal watercraft inspection station) under subsection (a), including personnel costs, shall be—

"(1) not less than 50 percent; and

"(2) provided by the reclamation State, or a unit of local government in the reclamation State, in which the watercraft inspection station or other project is located.

"(c) Priority.—In providing financial assistance under subsection (a), the Secretary shall give priority to a reclamation State that demonstrates the capacity to fund the watercraft inspection station in accordance with subsection (b).

"(d) Coordination.—In carrying out this section, the Secretary shall consult and coordinate with—

AMERICAN OVERSIGHT

"(1) each of the reclamation States [(as defined in section 4014 of the Water Infrastructure Improvements for the Nation Act (43 U.S.C. 390b note; Public Law 114-322))];

"(2) affected Indian Tribes; and

"(3) the heads of appropriate Federal agencies.".

(2) CONFORMING AMENDMENT.—Section 3 of the Reclamation Safety of Dams Act of 1978 (43 U.S.C. 507) is amended by striking "section 5B" and inserting "sections 5B and 5C".

SEC. 3. WATERCRAFT INSPECTION AND DECONTAMINATION.

(a) Mandatory Inspection and Decontamination.—

(1) DEFINITION OF TASK FORCE AGENCY.—In this subsection, the term "task force agency" means any Federal agency the head of which is a member of the Aquatic Nuisance Species Task Force under section 1201(b) of the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (16 U.S.C. 4721(b)).

(2) MANDATORY INSPECTION AND DECONTAMINATION.—Each task force agency may, as appropriate, conduct mandatory inspections and decontamination of watercraft to limit the movement of aquatic nuisance species (as defined in section 1003 of the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (16 U.S.C. 4702)) into, out of, or across the waters of the United States.

(b) Aquatic Nuisance Species Task Force.—Section 1201(b) of the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (16 U.S.C. 4721(b)) is amended—

(1) in paragraph (6), by striking "and" at the end;

(2) by redesignating paragraph (7) as paragraph (8); and

(3) by inserting after paragraph (6) the following:

"(7) the Director of the National Park Service; and".

(c) Aquatic Nuisance Species Program.—Section 1202 of the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (16 U.S.C. 4722) is amended—

(1) in subsection (b)—

(A) in paragraph (5), by striking "and" at the end;

(B) in paragraph (6), by striking the period at the end and inserting "; and"; and

(C) by adding at the end the following:

"(7) not later than 90 days after the date of enactment of the Preventing Invasive Species in Western Waters Act of 2018, clarify the authority of each member of the Task Force to inspect watercraft and recommend legislative or regulatory changes to eliminate existing gaps in authorities between members of the Task Force to effectively manage and control the movement of aquatic nuisance species into, out of, and across waters of the United States."; and

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006822

(2) in subsection (e)(1)—

(A) in the first sentence, by inserting ", infrastructure," after "environment"; and

(B) in the second sentence, by inserting "(including through the use of watercraft inspection stations)" after "aquatic nuisance species".

DRAFT – INTERNAL USE ONLY

WESTERN GOVERNORS' ASSOCIATION

Policy Resolution 2019-XX

Cybersecurity – VERSION 2

Commented [BB1]: 10/18: SAC Call Attendees: CA, CO, Guam, ID, MT, NV, OR, WA. Walked through V1 of resolution; no additional edits or issues discussed (redlines to V1 have been accepted in V2). WA indicated interest in co-sponsorship.
10/19: V2 shared with SAC.

A. BACKGROUND

1. In the age of automation, digitization, big data, artificial intelligence, and machine-to-machine learning, the United States' capabilities to prevent, detect and respond to cyberattacks are of ever-growing importance to our society. The cybersecurity of our nation is an all-of-government and industry-wide endeavor.

2. Cybersecurity is especially imperative for critical infrastructure, which includes the nation's electric grid, energy resource supply and delivery chains, finance, communications, election systems, the chemical industry, commercial facilities, critical manufacturing, defense industrial base, emergency services, food and agriculture, government facilities, healthcare and public health, information technology, transportation, and water and wastewater systems.

3. Addressing cybersecurity needs across critical infrastructure sectors is further complicated by the increasing interdependency and interconnectedness of our nation's data systems to myriad of non-critical infrastructure systems and a dynamic threat environment. Effective cybersecurity programs require strategic and functional relationships and information-sharing between federal, state and local levels of government, and the public and private sectors.

4. The cybersecurity of their states and the nation is a high priority of Western Governors. State governments are responsible for securing public networks, the state's digital assets, and citizen data, as well as coordinating their cybersecurity efforts with federal agencies and potentially-affected private entities (e.g., utilities, financial institutions, transportation, and health). Governors lead efforts to plan and implement state cybersecurity programs, respond to cyberattacks, and investigate intrusions.

5. State election systems remain targets of foreign interference. As Governors, we remain committed to protecting our states' election systems. There is nothing more fundamental to the enduring success of our American democracy, and we take seriously our responsibility to protect the integrity and security of our elections. This is an imminent national security threat that transcends party lines. This is a matter of protecting and preserving fair elections—the underpinning of our democracy.

6. The Office of Management and Budget and Department of Homeland Security (DHS) May 2018 Federal Cybersecurity Risk Determination Report and Action Plan concluded that 71 of 96 federal agencies are at risk or high risk of cyber intrusions. It also determined that federal agencies are not equipped to determine how threat actors seek to gain access to their information. This deficiency results in ineffective allocations of the agencies' limited cyber resources.

7. Currently, there is a severe deficit of cyber workers, especially in government. Our nation cannot defend itself without a well-trained, experienced cyber workforce. The public sector

AMERICAN OVERSIGHT

must dedicate resources to cybersecurity education, training, and recruitment programs and encourage the private sector to do the same through effective policy.

B. GOVERNORS' POLICY STATEMENT

1. Western Governors urge Congress to improve coordination of congressional oversight and legislative activity on cybersecurity. The federal government has a responsibility to provide adequate funding for states to meet election security needs. Western Governors encourage Congress and the Administration to work cooperatively with states in developing election security legislation and mandates, and to fully fund implementation.

2. Federal agencies must engage in early, meaningful, substantive, and ongoing consultation with Governors or their designees on all aspects of cybersecurity. The federal government must also continue to clarify the roles and responsibilities of federal agencies in preventing, preparing for, and responding to cyberattacks. Centralized authority, points of contact, and formalized communication pathways are necessary to address increasingly complex threats. In addition, these pathways must occur at each level within government and other organizations.

3. The increasing number and inconsistency of federal security regulations puts an unnecessary burden on state governments and is an inefficient use of often-constrained security resources. The federal government should establish a working group with representatives from states and federal agencies, as well as restore the position of the White House cybersecurity coordinator, to harmonize disparate agency regulations.

4. Western Governors recommend that the federal government continue the DHS State, Local, Tribal, and Territorial Engagement Program, which provides cybersecurity risk briefings and resources to Governors and other officials. The Governors also support DHS's Office of Cybersecurity and Communications, with which state chief information officers regularly interact.

5. The National Institute for Standards and Technology (NIST) Cybersecurity Framework and other standards can facilitate effective, consistent, and risk-based decision-making in government and industry. Real-world simulations of attacks on critical infrastructure are essential to prepare our nation for potential threats.

6. The federal government should use the full range of economic tools, including travel and financial sanctions, to deter cyberattacks organized or supported by nation-states.

7. The public and private sectors must take steps to mitigate global supply chain risks (e.g. installation of malicious software or hardware). Government and industry should also increase the cybersecurity awareness of government and private employees through training and education.

8. The Administration should propose, and Congress should provide, long-term authorization and sufficient appropriations for high-quality cybersecurity education and workforce development programs to grow and sustain the cybersecurity workforce. The federal government should also expand the CyberCorp: Scholarship for Service program and continue to support educational initiatives, such as NIST's Initiative for Cybersecurity Education and National Centers of Academic Excellence in Cyber Defense.

AMERICAN OVERSIGHT

9. Western Governors support policies that incentivize the private sector to improve cybersecurity and share information regarding cyber threats as early as possible, including policies to improve access to information or create common standards for information-sharing. The federal government should emphasize the benefits of information-sharing, while alleviating private sector concerns with this essential communication. The federal government and states should continue to investigate liability protections, such as safe harbor provisions, for entities that report cyber intrusions.

10. Our nation requires innovation in detecting, preventing, and responding to continually-evolving cyber threats. More research is required to understand the use of blockchain and encryption by perpetrators and its utility for defense against cyber threats, and address vulnerabilities of other emerging technologies, including connected vehicles and Internet of Things devices. The federal government should provide funding and technical assistance for these and other types of cybersecurity research and development.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct WGA staff to work with congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

DRAFT

AMERICAN OVERSIGHT

October XX, 2018

The Honorable David Ross
Assistant Administrator
Office of Water
U.S. Environmental Protection Agency
1200 Pennsylvania Avenue, N.W.
Washington, D.C. 20460

Dear Assistant Administrator Ross:

We understand that the Environmental Protection Agency (EPA) Office of Water is considering regulatory action to address "perceived abuses" by states in the implementation of their statutory authority under Clean Water Act (CWA) Section 401. We urge you to reject any changes to agency rules, guidance, or policy that may diminish, impair, or subordinate states' well-established sovereign and statutory authorities to protect water quality within their boundaries.

States have primary legal authority over the allocation, administration, protection and development of their water resources. Responsible growth and development, as well as proper environmental management, depend upon the recognition and preservation of state stewardship.

In passing the CWA, Congress purposefully designated states as co-regulators under a system of cooperative federalism that recognizes state interests, equities, and authority. Section 101 of the Act clearly expresses congressional intent to:

> recognize, preserve, and protect the primary responsibilities and rights of States to prevent, reduce, and eliminate pollution, to plan the development and use (including restoration, preservation, and enhancement) of land and water resources, and to consult with the Administrator in the exercise of his authority under this chapter.

This declaration reflects an understanding that a one-size-fits-all approach to water management and protection does not accommodate the practical realities of states' geographic and hydrologic diversity.

A vital component of the CWA's system of cooperative federalism is state authority to certify and condition federal permits of discharges into waters of the United States under Section 401. This authority has historically ensured that activities associated with federally permitted discharges will not impair state water quality. The U.S. Supreme Court has addressed this issue of state authority and concluded that, "[s]tate certifications under [Section] 401 are essential in the scheme to preserve state authority to address the broad range of pollution." *S.D. Warren Co. v. Maine Board of Environmental Protection*, 547 U.S. 370 (2006), citing 116 Cong. Rec. 8984 (1970).

We question the need for any agency action to clarify or amend EPA's policy or regulations governing the implementation of CWA Section 401. We are aware of no evidence to support assertions that states have "abused" their statutory authority. Moreover, instances of delays or denials of state water quality certifications are extremely limited, and parties seeking to challenge a state's action or determination have adequate avenues for legal relief. For decades, states have exercised their authority under CWA Section 401 efficiently, effectively and equitably. Calls to

DRAFT

AMERICAN OVERSIGHT

curtail state authority to issue, condition, or deny water quality certifications are unsupported by data or demonstrable facts.

Curtailing or reducing state authority under CWA Section 401 -- or diminishing the vital role of states in maintaining water quality within their boundaries -- would inflict serious harm to the division of state and federal authorities established by Congress. Any regulatory effort to streamline environmental permitting should be developed in consultation with states and must not be achieved at the expense of state authority. EPA must also recognize, and defer to, states' sovereign authority over the management and allocation of their water resources. EPA should ensure that the CWA continues to effectively protect water quality, while maintaining the partnerships and proper balance of authority between states and the federal government.

Sincerely,

DRAFT

Western Governors' Association
2018 Winter Meeting
December 10-13, 2018 | Hawai'i

Governors' Draft Agenda
(subject to change)

NOT FOR PUBLIC DISTRIBUTION

Dress for meeting is business casual.
Hawaiian Island attire is also welcome and suggested for all evening events.

Monday, December 10, 2018

1:00 – 5:00 p.m.	**Early Registration Open**
5:30 – 7:00 p.m.	**Governors' Reception with WGA Chairman-level and Platinum-level Sponsors, VIPs and Governors' Staff** **Governors-elect and staff welcome*
7:00 – 9:00 p.m.	**Private Dinner – Governors & First Spouses** **Governors-elect welcome; no staff*

Tuesday, December 11, 2018

8:00 a.m. – 5:00 p.m.	**Registration Open**
8:00 – 9:30 a.m.	**Chairman Sponsor Breakfast with WGA Chair Governor David Ige and Vice Chair Governor Doug Burgum** **All Governors, Governors-elect, Spouses, and staff welcome (attendance optional)*
8:00 – 11:00 a.m.	**Open Time for Governors to Schedule Private Meetings**
8:30 – 11:30 a.m.	**Staff Advisory Council Meeting**
11:00 a.m. – 12:30 p.m.	**First Spouse Brunch**

DRAFT

AMERICAN OVERSIGHT

11:00 – 11:30 a.m.	**WGA Executive Committee Meeting** **No staff*
11:30 a.m. – 12:30 p.m.	**Governors' Private Lunch Meeting** **One staff per Governor; Governors-elect and staff welcome*
12:30 – 1:00 p.m.	**Governors' Group Photo and Press Conference**
1:00 – 1:45 p.m.	**Welcome and Opening Remarks** Jim Ogsbury, WGA Executive Director Governor David Ige, WGA Chair
1:45 – 2:15 p.m.	**Keynote I : Nainoa Thompson** The first Hawaiian to practice the ancient Polynesian art of navigation since the 14th century, **Nainoa Thompson** piloted the double-hulled canoes Hokuleʻa and Hawaiʻiloa from Hawaiʻi to island nations in Polynesia without the aid of western instruments. The President of the Polynesian Voyaging Society will share the cultural significance of the canoes' travels around the globe.
2:15 – 3:00 p.m.	**Roundtable I: Chair's Initiative – Western Governors' Biosecurity and Invasive Species** WGA Chair and Hawaii **Governor David Ige** will moderate a session featuring the Governors and invited guests discussing the threats that invasive species pose to the West, and the role that biosecurity plays in addressing those risks.
3:00 – 3:30 p.m.	**Keynote II: TBD**
3:30 – 4:30 p.m.	**Roundtable II: Harnessing the Power of Outdoor Recreation** Leaders of state offices of outdoor recreation will discuss how their offices are leveraging the fast-growing industry to spur economic growth and invigorate local communities. Panelists: **Tom Adams**, Utah Office of Outdoor Recreation; **Luis Benitez**, Colorado Outdoor Recreation Industry Office; **Domenic Bravo**, Wyoming Outdoor Recreation Office & State Parks; **Rachel VandeVoort**, Montana Governor's Office of Outdoor Recreation.

DRAFT

AMERICAN OVERSIGHT

5:00 – 7:00 p.m.	**Opening Reception** Governors, Governors-elect, Spouses and All Attendees

Wednesday, December 12, 2018

8:00 a.m. – 5:00 p.m.	**Registration Open**
8:00 – 9:00 a.m.	**Private Breakfast - Governors and Spouses** **Governors-elect and spouses welcome; No staff*
9:15 – 9:45 a.m.	**Keynote III & Conversation with Secretary of Agriculture Sonny Perdue** The Secretary of Agriculture will discuss policy issues of significance to Hawaii and the West, followed by a public conversation with the Western Governors.
9:45 – 10:00 a.m.	**Keynote IV: U.S. Secretary of Veterans Affairs, Robert Wilkie** The Secretary of Veterans Affairs will discuss policy issues of significance to Hawaii and the West, then join the following roundtable discussion.
10:00 – 10:45 a.m.	**Roundtable III: Helping Veterans Move from "Jobs" to "Careers"** Veterans have the skills in demand for today's economy, but obstacles remain to translating that experience to the civilian workforce. Secretary of Veterans Affairs **Robert Wilkie** and invited guests will share ideas and have a conversation with the Governors on how to help veterans embark on meaningful careers that maximize the potential of this talented pool of workers.
10:45 – 11:15 a.m.	**Keynote V: Henk Rogers** Henk Rogers became a video game legend when he brought Tetris to the West in the '80s. The Dutch-born entrepreneur, who now lives in Hawaii, established the Blue Planet Foundation, which worked to gain approval for the 2015 bill that directed state utilities to generate 100 percent of their electricity sales from renewable sources by 2045.

DRAFT

AMERICAN OVERSIGHT

11:15 a.m. – 12:15 p.m.	**Roundtable IV: Renewable Energy Integration and Technology** Panelists will examine tools and strategies to balance the variable power provided by wind and solar in Hawaii and the West, and how to ensure reliability in the face of a changing resource mix. Panelists**: James P. Griffin**, Hawai'i Public Utilities Commission; **Stacey Crowley**, California Independent System Operator; **Jim Robb**, North American Electric Reliability Corporation; **Dave Lock**, Tri-State Generation and Transmission Association.
12:15 – 1:15 p.m.	**Lunch – all attendees**
1:00 – 5:00 p.m.	**Local Tours/Activities** *(optional)* **or Afternoon at Leisure**
6:00 – 7:00 p.m.	**Governors' Reception with WGA Sponsors and VIPs** **Governors-elect and staff welcome*
7:00 – 9:00 p.m.	**Hawaiian Luau Dinner Reception** *All Attendees*

Thursday, December 13, 2018

8:00 – 11:30 a.m.	**Registration Open**
8:15 – 9:15 a.m.	**Governors' Breakfast with WGA Sponsors** **Governors-elect and staff welcome*
9:30 – 10:00 a.m.	**Keynote VI & Conversation with U.S. Administrator Linda McMahon, Small Business Administration** The Administrator will discuss policy issues of significance to Hawaii and the West, including disaster assistance and workforce development, followed by a public conversation with the Western Governors
10:00 – 10:45 a.m.	**Roundtable V: Social Determinants and Western Health Care** Health care experts will look at how the places we live, work and play affect health risks and outcomes, and some of the unique challenges facing western states in promoting healthy lifestyles.

DRAFT

AMERICAN OVERSIGHT

10:45 – 11:45 a.m.	**Governors' Conversation: Riding into the Sunset** Western Governors nearing the end of their time in office reflect on lessons they have learned and their hopes for the future of their states and the western region.
11:45 a.m. – Noon	**Update: Governors' Policy and Business Session** Vice Chair, North Dakota Doug Burgum, will offer an update on WGA resolutions and other business.
Noon	**Closing Remarks – Governor David Ige**

SUMMARY OF COMING EVENTS & DEADLINES
(*See details in the report and master calendar below.)*

- Bylaw-Dictated Deadline for Initial Resolution Drafts – **Oct. 8**
- WGA Working Lands Roundtable: Invasive Species and Restoration – **Oct. 11-12**
- Deadline: SAC Recommendations for Panelists/Participants in BISI Helena Workshop – **Oct. 12**
- Input Deadline: Draft Legislative Language -- Aquatic Invasive Species Containment – **Oct. 16**
- SAC Resolutions Call – **Oct. 18**
- SAC Recommendations Sought – Planning for Burgum Rural Development Initiative – **Oct. 19**
- SAC Resolutions Call – **Oct. 25**
- SAC Resolutions Call – **Nov. 1**
- Deadline: SAC Recommendations for Panelists/Participants in BISI Hawaii Workshop – **Nov. 2**
- SAC Resolutions Call – **Nov. 8**
- Biosecurity and Invasive Species Initiative MT Workshop – **Nov. 14**
- SAC Resolutions Call – **Nov. 15**
- WGA New Governor Orientation Luncheon – **Nov.16**
- Ballots and Winter Meeting Briefing Books Delivered – **Nov. 27**
- SAC Call (Winter Meeting Logistics) – **Dec. 6**
- Ballot Return Deadline – **Dec. 7**
- Biosecurity and Invasive Species Initiative HI Workshop – **Dec. 9-10**
- SAC Winter Meeting (Hawaii, The Big Island) – **Dec. 11**
- WGA 2018 Winter Meeting (Hawaii, The Big Island) – **Dec. 10-13**

AMERICAN OVERSIGHT

HOUSEKEEPING

New Governor Orientation

On Friday, Nov. 16, WGA will host an orientation session for Governors-Elect of western states at the Broadmoor in Colorado Springs, Colorado. The luncheon session, organized in connection with the Seminar for New Governors of the National Governors' Association, will take place from 12-2 pm in the Schreyvogel Room of the Broadmoor Hotel. All incumbent Governors are welcome and encouraged to attend. Concurrent with the orientation session, WGA will host a luncheon for spouses of Governors-Elect in the La Taverne Restaurant of the Broadmoor.

Action Item: All current Governors and their spouses are invited and encouraged to attend these events.

WGA Staff: Jim Ogsbury (jogsbury@westgov.org)

Western Governors' Foundation

As authorized by the WGA executive committee, the Association is pursuing reinvention of the Western Governors' Foundation (WGF) as an authentic philanthropic organization. Draft revised bylaws and articles of incorporation of WGF are attached. Also attached please find a draft memorandum to Governors explaining this effort in greater detail.

Action Item: To effect the changes contemplated, two actions are required by WGA Governors in their capacity as WGF directors: an affirmative vote to adopt the proposed governing documents at the WGA Winter Meeting in Hawaii and resignation from the WGF board, effective following the vote.

WGA Staff: Jim Ogsbury (jogsbury@westgov.org)

2018 Winter Meeting Update

The agenda for the 2018 Winter Meeting is coming together, attendee registration is going strong and eight Governors already have registered to join Gov. David Ige Dec. 10-13 on the Big Island. The Secretaries of Agriculture and Veterans Affairs will speak, as will the Administrator of the Small Business Administration. Governors registered to join Gov. Ige include Lolo Moliga, Kate Brown, Ralph Torres, Matt Mead, Doug Burgum, Dennis Daugaard, Brian Sandoval, Gary Herbert and Mary Fallin. Ten members from SAC have registered.

Action Item: Read the attached agenda and register here if you have not already.

WGA Staff: Joe Rassenfoss (joe@westgov.org)

Communications Report: Q1 of Fiscal Year 2019

Western Governors earned extensive coverage and wide exposure via WGA digital channels and email during the First Quarter of 2019 (July 1-Sept. 30, 2018). The Governors were included in nearly 90 stories on topics such as Section 401 of the Clean Water Act and the *Western Governors' Biosecurity and Invasive Species Initiative* in the likes of the Associated Press, E&E News, *The Washington Post, Politico* and *The Hill*. Total website visits were up 24% compared to Q1 last year, while four WGA webinars in the quarter attracted a combined 1,006 viewers. Read the Q1 Overview and collected coverage (attached).

WGA Staff: Joe Rassenfoss (joe@westgov.org)

RESOLUTIONS

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006835

Resolution Development – Update

Resolution Status Sheet Updated (Attachment)

- Foreign Visitor Preclearance (Attachment) –
- Cybersecurity (Attachment)
- Compensatory Mitigation (Attachment)
- Rural Health Care – Draft Pending

A reminder that – pursuant to WGA bylaw requirements – initial drafts for any resolutions to be considered by SAC this cycle must be submitted to WGA by COB on Monday, Oct. 8.

WGA Staff: Holly Propst (hpropst@westgov.org)

ACTION / REPORTING ITEMS

Biosecurity / Invasive Species

Register Now for BISI Workshops

Registration is open for the WGA Biosecurity and Invasive Species Initiative workshop series. Please register for the workshops and send participant recommendations to Bill Whitacre. Draft agendas for all BISI workshops can be found here.

- **Registration for Restoration Workshop –** Next Thursday and Friday (Oct. 11-12), WGA will host the inaugural WGA Working Lands Roundtable in Cheyenne, WY. The meeting, which will focus on cross-boundary and collaborative land restoration, also includes panel discussions in connection with the *Western Governors' Biosecurity and Invasive Species Initiative*.

  Action Item: WGA is still looking to fill out attendee spots; please contact Zach Bodhane (zbodhane@westgov.org) with attendee recommendations.

- Workshop #3: Early Detection and Rapid Response | Nov. 14 | Helena, MT | Register here.
- Workshop #4: Biosecurity and Agriculture | Dec. 9-10 | Kona Coast, Island of Hawaii | Register here.

WGA Staff: Bill Whitacre (bwhitacre@westgov.org)

Quagga and Zebra Mussels

- **Sen. Bennett Aquatic Invasive Species Legislation –** One of WGA's top invasive species priorities is for DOI agencies to implement mandatory inspection and decontamination of watercraft leaving waterbodies under their jurisdiction infested with invasive quagga and zebra mussels. WGA has been working with Sen. Michael Bennet's (D-CO) office to develop bill language which would give DOI agencies the authorities necessary to conduct inspections and decontaminations. Sen. Bennet's office has indicated that they would be open to introducing the language as a stand-alone bill or attaching it to another vehicle, most likely a Bureau of Reclamation reauthorization. They have requested WGA's input on the draft bill language, as well as WGA's help to promote the language and identify a Republican Senator to co-sponsor the bill.

  Action Item: Please review the attached draft language and section-by-section description of a draft bill providing DOI authorities for aquatic invasive species containment. Send any comments on the language or suggestions for Republican co-sponsors to Bill Whitacre by COB on Oct. 16.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006836

- **Mussels Meeting with DOI on Nov. 13, Helena MT –** On Nov. 13 (the eve of the third WGA BISI workshop), WGA plans to host a meeting between state aquatic invasive species (AIS) staff and Department of the Interior (DOI) staff, including Scott Cameron, DOI Principal Deputy Assistant Secretary for Policy, Management and Budget. The meeting will address report language included with the House FY19 Interior, Environment, and Related Agencies Appropriations bill directing DOI, USDA, and USACE to work with WGA and western states to develop a joint Federal/State incident command system for rapid response for new invasive quagga and zebra mussel detections. Committee staff did not consult with WGA or western states before including the language.

  During the Nov. 13 meeting, WGA and states will discuss the report language with Cameron and potential actions if the language is included in the final explanatory statement accompanying an omnibus spending bill. WGA and states plan to reiterate their position that invasive mussel containment is western states' first priority, and that any new rapid response measures should only follow improved DOI containment policies and practices. WGA staff is working with state AIS staff to prepare a document stating these priorities in advance of the meeting.

  The meeting is tentatively scheduled for 4:30-7:30 pm MT on Nov. 13. Call-in information will be forthcoming.

  Action Item: Participation from SAC members in this meeting, either in person or by phone, would help advance western states' goals on this issue. Please contact Bill Whitacre if you would like to participate in the Nov. 13 meeting between WGA, states, and DOI regarding invasive mussel containment and rapid response.

WGA Staff: Bill Whitacre (bwhitacre@westgov.org)

Energy

Nominations for the DOI Royalty Policy Committee

The Department of the Interior is seeking nominations for individuals to serve on the Royalty Policy Committee from: (1) states, (2) tribes, (3) mineral and/or energy stakeholders, and (4) academia/public interest; see the announcement here. The Committee provides advice to the Secretary on the fair market value of, and the collection of revenues derived from, the development of energy and mineral resources on federal and Indian lands. WGA Policy Resolution 2017-02, *States' Share of Royalties and Leasing Revenues from Federal Lands and Minerals and States' Role in Associated Federal Policy*, urged reestablishment of this Committee.

Action Item: DOI has set a deadline of Nov. 2 for nominations.

WGA Staff: Britta Beckstead (bbeckstead@westgov.org)

Rural Development

Vice Chairman Initiative Planning – "Reimagining the Rural West"

WGA requests SAC assistance with populating the advisory group for the next Chair's Initiative, Reimagining the Rural West. The advisory group will provide feedback and assist with scoping efforts during the planning year of the initiative. See the attached planning activities document for more details.

Action Item: Please connect WGA with the appropriate person in your Governor's office with policy expertise related to rural development by COB on Oct. 19.

WGA Staff: Lauren DeNinno (ldeninno@westgov.org), Britta Beckstead (bbeckstead@westgov.org) and Kevin Moss (kmoss@westgov.org)

Radioactive Waste

Governors-DOE MOA – Regional Protocol for the Safe and Uneventful Transportation of Transuranic Waste

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006837

Western Governors and the U.S. Department of Energy (DOE) in 1995 entered into a Memorandum of Agreement (MOA), Regional Protocol for the Safe and Uneventful Transportation of Transuranic Waste. The MOA, which is signed by WGA leadership and the Secretary of Energy, is to be reviewed and reaffirmed with each new administration. The MOA was signed in 2003 and 2009 and is due to be renewed with the current administration.

The MOA details the history of DOE's coordination with western states for the safe and uneventful transportation of transuranic waste and sets forth principles for ongoing coordination. It also endorses the regional planning process, in which western states, through the WIPP Transportation Technical Advisory Group (WIPP TAG), engage with the DOE Carlsbad Field Office to implement the WIPP transportation safety program.

The WIPP TAG includes Governor-appointed technical advisors from each state affected by shipments of transuranic waste (WA, OR, CA, ID, NV, AZ, WY, UT, CO, NM, NE, TX). WGA and the WIPP TAG worked with DOE to update the MOA for the current renewal. That document is attached.

Action Item: Please review the attached MOA. Feedback requested by COB on Wednesday, Oct. 10.

WGA Staff: Lauren DeNinno (ldeninno@westgov.org

Water

NCSL Sends Letter Urging Congress to Uphold State Authority under CWA Section 401

On Oct. 3, the National Conference of State Legislatures sent a letter to congressional leadership, expressing "NCSL's concerns surrounding recent congressional attempts to erode the cooperative federalism principles within the Clean Water Act (CWA) by restricting states' authorities to protect and manage their water resources."

The letter cites S.3303, the Water Quality Certification Improvement Act of 2018; draft infrastructure legislation, Building 21, released by the House Committee on Transportation and Infrastructure; as well as House report language contained in FY2019 Appropriations Bills (Energy and Water; Interior and Environment) as efforts that "are in direct opposition to the original intent of the CWA and would deprive state of the ability to defend the very resources the CWA was designed to protect."

WGA Staff: Ward Scott (wscott@westgov.org)

WGA Staff to Meet with EPA to Discuss Water-Related Policy Issues

Next Wednesday (Oct. 10), the Environmental Protection Agency (EPA) will host its Quarterly Outreach Meeting with intergovernmental associations in Washington, DC. The announced agenda includes discussion addressing: (i) CWA Sec. 404(c) Process: Proposing changes to EPA's authority, pre-, during, and post-permit issuance; (ii) CWA Sec. 404(g): Potential changes to regulations governing state assumption of CWA dredge and fill program; and (iii) CWA Sec. 401: State authority to certify and impose conditions on federal discharge permits. WGA will host a pre-meeting conference call with co-signatories of its Aug. 9 letter to congressional leadership urging Congress to reject legislative and administrative efforts to curtail state authority under CWA Sec. 401. The focus of the call will be to hear from coalition members about what information they hope to receive from the EPA meeting and what issues should be emphasized from state/local interests.

Additionally, WGA staff is working with EPA to set up a follow-up meeting with EPA's Office of Water (after the Quarterly Outreach Meeting) to learn more details of EPA's plans and to emphasize that states must be consulted in a meaningful way, early in the development of any new rules or policies relating to water management and/or quality. WGA staff will try to have a conference line established for SAC members to call in to the meeting. WGA staff will update SAC members as soon as information regarding a potential follow-up meeting becomes available.

WGA Staff: Ward Scott (wscott@westgov.org)

FY19 House Interior and Environment Appropriations Report Language Directs EPA to Develop Guidance to Finalize Guidance on the Implementation of CWA Section 401

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006838

The Fiscal Year 2019 Interior and Environment appropriations have been included in H.R. 3354, which passed the House by a vote of 211-198 and awaits Senate consideration. The House report (H. Rpt. 115-765) includes the following language addressing Clean Water Act (CWA) Section 401:

> The Committee encourages the Administrator of the Environmental Protection Agency to finalize guidance on the implementation of Clean Water Act Section 401 (33 U.S.C. 1341). Such guidance shall reinforce that the statutory time period for review does not exceed one year, that the scope of review is limited to Federal water quality standards, and that waiver of the certification obligation occurs when a State fails to act within one year from the date of application. The guidance shall also include a suggested schedule for a State making a Section 401 decision, which recognizes that the entirety of the State's review must occur within one year.

This language reflects a larger effort to curtail states' authority to implement Section 401 and is particularly concerning because such a prescribed result would substantially narrow the scope of state review and limit their flexibility to processes applications for certification (which would ultimately result in a greater number of denials). To remove the concerning language from the House report, the conference committee must affirmatively contradict or reverse the position.

Action Item**:** Please contact the offices of any conference committee members you have relationships with (listed below) and express that the report language addressing Section 401 would likely result in the curtailment of states' authority to protect water resources within their boundaries and that the language should be affirmatively withdrawn by language in the conference committee report.

House conferees include: Rep. Rodney Frelinghuysen (R-NJ); Rep. Robert Aderholt (R-AL); Rep. Mike Simpson (R-ID); Rep. Ken Calvert (R-CA); Rep. Tom Cole (R-OK); Rep. Mario Diaz-Balart (R-FL); Rep. Tom Graves (R-GA); Rep. David Young (R-IA); Rep. John Rutherford (R-FL); Rep. Nita Lowey (D-NY); Rep. David Price (D-NC); Rep. Sanford Bishop (D-GA); Rep. Betty McCollum (D-MN); Rep. Michael Quigley (D-IL); and Rep. Chellie Pingree (D-ME).

Senate conferees include: Sen. Richard Shelby (R-AL); Sen. Susan Collins (R-ME); Sen. Lisa Murkowski (R-AK); Sen. John Hoeven (R-ND); Sen. James Lankford (R-OK); Sen. Cindy Hyde-Smith (R-MS); Sen. Patrick Leahy (D-VT); Sen. Jack Reed (D-RI); Sen. Tom Udall (D-NM); Sen. Jeff Merkley (D-OR); and Sen. Chris Coons (D-DE).

WGA Staff: Ward Scott (wscott@westgov.org)

HAPPENING ON THE HILL

WGA Congressional Action Report

See the attached WGA Congressional Action Report for all the action on the Hill this week. All the action was in the Senate this week, as the House is in recess through the elections. The full 115th Congress will be back, post-election, to complete action on funding matters. The current continuing resolution will keep the government open through Dec. 7, 2018.

WGA Staff: Holly Propst (hpropst@westgov.org)

Congress Approves Energy and Water, Mil Con, and Legislative Branch FY19 Appropriations

Attached find a WGA analysis of H.R. 5895, the Energy and Water, Legislative Branch, and Military Construction and Veterans Affairs Appropriations Act, 2019. The $147.5 billion package provides Fiscal Year 2019 appropriations for the departments of Energy and Veterans Affairs, the Army Corps of Engineers, and the operations of Congress. The bill includes several items of interest to Western Governors; please access the analysis for additional details.

WGA Staff: Troy Timmons (ttimmons@westgov.org)

Public Lands Omnibus

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006839

- **SENR Advances Large Package of Bills --** On Wednesday, the Senate Energy and Natural Resources Committee approved 40 bills in a remarkable burst of generally bipartisan productivity (only three recorded votes were taken during the markup). Among the bills reported was S. 3172, the Restore Our Parks Act, which would provide $1.3 billion per year for five years to help reduce the National Park Service's deferred maintenance backlog, which totaled $11.6 billion in FY 2017. The Committee also reported S. 569, sponsored by Ranking Member Maria Cantwell (D-WA) to permanently reauthorize and mandate full funding of $900 million per year for the Land and Water Conservation Fund. Also approved was S. 2160, a bill to establish a pilot program examining alternative dispute resolution processes for certain projects in US Forest Service Region 1; see the related item below for additional detail on that measure.

  As discussed on yesterday's SAC call, these bills, along with nearly 120 others approved by the Senate Energy Committee over the course of the 115th Congress, are potential items for inclusion in a broad public lands legislative package, which is being discussed as a possible floor agenda item during the anticipated lame duck session before adjournment. WGA will monitor the progress of any such legislative vehicle and report on items of interest to Western Governors.

- **S. 2160 – Protect Collaboration for Healthier Forests Act –** The Senate Energy and Natural Resources Committee advanced S. 2160, the Protect Collaboration for Healthier Forests Act, to the full Senate on Wednesday. S. 2160, introduced by Senator Daines (R-MT), would create an arbitration pilot program in Forest Service Region 1 to serve as an alternative dispute resolution (ADR) process in lieu of judicial review for projects that:

  - Are developed through a collaborative process;
  - Are carried out under the Collaborative Forest Landscape Restoration Program;
  - Are identified in a community wildfire protection plan;
  - Reduce hazardous fuels or mitigate insect or disease infestations; and
  - Are located, in whole or in part, in the wildland-urban interface.

  Only two projects may be designated for arbitration per calendar year.

  WGA has examined ADR tools, including arbitration, through its National Forest and Rangeland Management initiative. WGA hosted a webinar during year one of the initiative that examined the role of litigation in forest management and the potential to use arbitration and other ADR tools in lieu of traditional litigation. Western Governors called for further dialogue on this topic in the Initiative's June 2017 Special Report. WGA hosted a follow-up webinar in August that examined strategies to improve and strengthen collaborative decision-making in natural resources planning.

WGA Staff: Troy Timmons (ttimmons@westgov.org) and Kevin Moss (kmoss@westgov.org)

Senate Approves Opioid Package; Bill Awaits President's Signature

As reported in last week's SAC email, House and Senate leaders agreed on final language for H.R. 6, the SUPPORT for Patients and Communities Act (agreement text here). The bill is an aggregation of provisions to address the opioid crisis. The House approved the agreement under suspension of the rules last Friday afternoon by a 393-8 vote; the Senate approved the bill Wednesday by a 98-1 margin. The measure now goes to the White House for consideration.

WGA Staff: Troy Timmons (ttimmons@westgov.org)

WESTERN GOVERNORS' ASSOCIATION

Policy Resolution 2019-XX

Compensatory Mitigation – Version 2

A. BACKGROUND

1. Through their sovereign and statutory powers, states have primary management authority over all fish and wildlife within their borders. Following decades of work by staff and contractors, states have developed extensive science, expertise, and knowledge of species within their borders.

2. Governors bear responsibility for managing state interests, authorities and property rights within state borders – including fish and wildlife – and oversee state agencies charged with properly managing wildlife, habitat and related resources within their states.

3. States are the primary recipients of economic benefits associated with healthy species and ecosystems. At the same time, the economic costs of compliance with federal environmental regulations can fall disproportionately on western states and local communities. States recognize the importance of economic development and note that it is often not possible to both advance an economic development project and entirely avoid negative impacts to fish and wildlife populations and habitat.

4. Compensatory mitigation plays an important role in wildlife management and conservation, and states rely on its use in developing and executing species conservation strategies. Compensatory mitigation strategies employed by states include, but are not limited to, habitat restoration, establishment, enhancement, or conservation activities.

5. The mitigation hierarchy is a commonly referenced and widely utilized strategy in determining compensatory mitigation requirements for resource development projects. The mitigation hierarchy consists of first avoiding adverse impacts to wildlife populations and habitat where practicable, then minimizing adverse impacts where they cannot be avoided. The final step in the mitigation hierarchy is employing compensatory mitigation measures to replace or offset adverse impacts that remain following avoidance and minimization. This practice is memorialized under the Council of Environmental Quality's implementing regulations and other federal policy and guidance.[1]

6. While states exercise primary management authority over fish and wildlife within their borders, habitat for fish and wildlife often spans a patchwork of land ownership types, complicating state efforts to manage and conserve species under their management jurisdiction. This is particularly challenging in western states, where federal ownership constitutes a generally higher percentage of overall land ownership.

B. GOVERNORS' POLICY STATEMENT

1. States have the responsibility to establish appropriate statutes, regulations, policies and programs to manage fish and wildlife within their borders. This responsibility extends to

[1] 40 CFR 1508.20

DRAFT

AMERICAN OVERSIGHT

the development of compensatory mitigation standards and implementation of compensatory mitigation for species under their management purview.

2. Compensatory mitigation approaches vary from state to state, but they are designed to fully offset residual impacts to habitat function. Governors recognize that habitat functionality is the primary metric by which mitigation outcomes are measured. Compensatory mitigation efforts must be sufficient to fully offset residual impacts to habitat function at the site-specific and range-wide scale necessary to meet conservation goals.

3. Where state mitigation standards are in place, consistency with existing state policy should be the primary guiding principle for a federal agency's development or implementation of compensatory mitigation on lands within their management authority or jurisdiction.

4. Western Governors urge federal agencies to adopt and implement state-supported compensatory mitigation programs and policies. Consistency between federal mitigation standards and those in state-supported programs allows wildlife managers, state and federal regulators, and developers to use a consistent compensatory mitigation program across differing land ownership within a state.

5. Western Governors recognize that that the diversity of conceivable species, habitat and project-specific circumstances make quantifying measures, with clearly defined goals, for compensatory mitigation difficult. Governors are concerned about federal agencies' potential inconsistent use and lack of assessment criteria for ambiguous mitigation goals such as "net conservation gain," and they believe that measures should be designed to avoid inappropriate uses of such a goal.

6. Western Governors recognize that mitigation of development impacts to habitat or natural resources must account for a level of risk and uncertainty that a particular compensatory mitigation action may fail to adequately offset adverse impacts to wildlife and habitat. Federal agencies should acknowledge a variety of tools and measures for incorporating risk and uncertainty based on the diverse experience of states in designing and implementing compensatory mitigation programs.

7. Governors believe that federal mitigation policies should be developed in coordination with Governors, and the state agency officials they designate, to achieve the following objectives:

   - Provide measurable and documentable habitat and conservation values, services and functions that are at least equal to the lost or degraded values, services and functions caused by the impact.

   - Incorporate measures to account for a level of risk that a particular compensatory mitigation action may fail or not achieve its stated objectives, and uncertainty about the level and duration of estimated impacts.

   - Compensatory mitigation projects should be sited and designed to support the most effective conservation or restoration projects; the effectiveness of mitigation actions should be based on the best available science.

Commented [ZB1]: ID edit – 10/4/18

DRAFT

AMERICAN OVERSIGHT

- Provide benefits that are durable and in place for at least the duration of the residual adverse impacts.

- Encourage the application of compensatory mitigation offsets prior to the impact occurring to ensure no lag time occurs between impacts and offsets.

- Offer transparency and certainty to developers, regulators, and the public. This necessitates early and substantive consultation with States and consistency with State designed compensatory mitigation standards where they exist.

Commented [ZB2]: ID edit – 10/4/18

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct WGA staff to work with Congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

DRAFT

AMERICAN OVERSIGHT

July 2018 Communications Report

TRADITIONAL MEDIA

The new WGA fiscal year kicked off in July with enormous media exposure for Western Governors. The Governors' involvement with the draft bill created by Senator Barrasso earned the majority of the attention (51 stories). WGA also earned mentions in 19 stories on topics such as water, licensure and our methane resolution. (See list of stories, and links, at bottom of this document.)

In all, those stories, op-eds and press releases appeared in 204 media outlets online, including the Associated Press, *E&E News, The Washington Post*, ABC News Radio, *The Hill*, NPR, *High Country News, Las Vegas Review-Journal, Rapid City Journal, Casper Star Tribune, Washington Examiner*, Capital Press and even *Mother Jones*.

But let's be honest, the coolest publication WGA appeared in during July was *Cowsmopolitan*, an online magazine covering the dairy trade based in Alberta.

WGA WEBSITE TRAFFIC

Visitation in July was up strongly (25%) over the same month in 2017 and Calendar Year 2018 traffic also remained well ahead (21%) of last year. As expected, we did not continue the past fiscal year's explosive growth in pageviews– in fact, during July we experienced a 7% decline. The growth in the past fiscal year owed much to the new website's architecture, which captures more pageviews than the old website, so we will not have that built-in advantage going forward.

Top content in July reflected strong interest in the *Biosecurity and Invasive Species Initiative*, as the blog post featuring the launch webinar was the second-most visited destination (816 pageviews). (We also just launched the website for the initiative.) Winners, and I suppose some of the also-rans, flocked to the main page for Celebrate the West (530 views), our third-ranked page for July.

The rest of the Top 10 was largely occupied by our main pages, but the Top 25 also included:

- 220 views for the 13th ranked ESA initiative (certainly boosted by Barrasso draft);
- 199 views for the 15th ranked blog on the invasive species data management guidelines;

AMERICAN OVERSIGHT

- 198 views for the 16th ranked blog that compiles all of our new resolutions;
- 195 views for the 17th ranked blog with the Workforce report;
- 194 views for the 19th ranked blog about Winter Meeting registration;
- 184 views for the 20th ranked blog with Mt. Rushmore video, which just launched on July 26.

JULY
Compared to July, 2017

- Total Users: Up 25% (4,091 vs 3,277)
- Total Visits: Up 20% (4,864 vs 4,051)
- Pageviews: Down 7% (15,595 vs 16,878)

2018 Calendar Year to Date
Compared to 2017 to date

- Total Users: Up 21% (32,178 vs 26,613)
- Total Visits: Up 19% (33,392 vs 27,957)
- Pageviews: Up 19% (123,395 vs 103,762)

SOCIAL MEDIA

Growth during the past month has WGA closing in on two milestones: we're less than 100 away from 4,000 Twitter followers and just 22 away from 800 on Facebook. In addition, engagement remains strong with our social media audiences.

Twitter:

- 3,909 Followers as of 7/31/18
  - 32 followers gained in the month
- 364 Tweets earned 130,000 Impressions
- 384 'Clicks' on tweets/posts by our followers
- 454 Engagements: RTs, Likes, Replies

Facebook:

- 778 Likes as of 7/31/18
  - 21 new likes gained in the month
- 531 average impressions daily
- 633 Engagements: Comments, Likes, Shares, Clicks

LinkedIn

- 328 Followers as of 7/31/18
  - 3 new followers gained in the month
- 107 average impressions daily
- 40 clicks

AMERICAN OVERSIGHT

VIDEO

WGA hosted one webinar during the month, the "Biosecurity and Invasive Species Initiative Launch." We also posted the 'Expansion' of Mount Rushmore video from the Annual Meeting on July 26 and it already has piled up 123 views and 147 minutes of viewing. During the month overall:

- 413 total views in July 2018
- 3,172 minutes watched
    - Average view duration: 7:40
- Subscribers: 98 (3 gained)
- Top video: Biosecurity and Invasive Species Initiative Launch
    - 1,813 minutes watched, 99 views

EMAIL NEWSLETTERS

WGA email newsletters delivered during July included The Roundup on Fridays, Congressional Action Report, Regulatory Tracking Report, Western Policy Network Report, Oklahoma sponsor lunch invitation, and a webinar alert.

- 11 emails sent
    - 34,004 total number of recipients
- 24% average 'open' rate
    - 7,363 unique opens during the month
- Audience Platform 'opens': 40% mobile, 60% desktop
- 4.8% 'bounce' rate for all email deliveries combined

ENDANGERED SPECIES Barrasso floats proposed ESA overhaul

Kellie Lunney, E&E News reporter
Published: Monday, July 2, 2018
Sen. Barrasso (R-Wyo.) Photo credit: C-SPAN

Republican Wyoming Sen. John Barrasso's proposal would reauthorize the landmark Endangered Species Act for the first time since 1992. C-SPAN

States would get greater input into the federal process for listing endangered species under a draft bill released today by Senate Environment and Public Works Chairman John Barrasso.

The Wyoming Republican's proposal would expand states' authority in writing species recovery goals, habitat objectives and other criteria for delisting or downlisting at-risk animals and plants under the Endangered Species Act.

The "recovery teams" could modify such criteria by unanimous votes "based on a material change to the best scientific and commercial data available" with the Interior secretary's approval, according to a discussion draft of the proposal.

"We must do more than just keep listed species on life support — we need to see them recovered," Barrasso said in a statement. "This draft legislation will increase state and local input and improve transparency in the listing process."

The Interior secretary then would have 90 days to approve or reject the team's recommendation.

Barrasso's proposal would also revamp the judicial review process for decisions to delist species under the ESA — a tool that environmental groups use to delay listing changes.

"A determination to delist will not be subject to judicial review until the expiration of the monitoring period for a delisted species," the Barrasso draft says.

Jamie Rappaport Clark, president and CEO of Defenders of Wildlife, blasted the proposal, calling the draft "partisan" and a "reckless power grab designed to wrest away authority from scientists and wildlife experts and give it to states that lack the resources — and sometimes the political will — needed to save wildlife from extinction."

The group also took particular issue with language that would change the judicial review process.

"The Barrasso bill would undercut accountability by exempting federal decisions from judicial review when they fail to meet statutory deadlines for listing species," said a press release from the organization.

"It would delay court challenges for delisting decisions for five years, leaving wrongly-delisted species exposed to hunting, extractive industries, and other significant threats to their existence," it said.

CONFIDENTIAL: Western Governors' Association, 2018

AMERICAN OVERSIGHT

Defenders of Wildlife also said the law already provides sufficient flexibility for federal, state, local and tribal officials to collaborate on ensuring a species' survival.

Barrasso, who worked closely with the Western Governors' Association in drafting the language, has sought feedback on updating the ESA over the last year and a half through hearings and briefings.

The WGA in a Feb. 14 letter to Barrasso praised his efforts to overhaul the 1973 landmark law and said the proposed bill's provisions were "generally consistent" with the group's recommendations.

"The Western Governors' Association appreciates the Chairman's willingness to productively engage with Governors, and that the Chairman has approached this polarizing topic in an inclusive, thoughtful manner," wrote South Dakota Gov. Dennis Daugaard (R) and Hawaii Gov. David Ige (D).

"The proposed bill reflects this fact and offers meaningful, bipartisan solutions to challenging species conservation issues," the WGA chairmen added.

Barrasso's reforms also aim to boost transparency of the ESA listing process by making scientific and commercial data readily available online.

However, language in the proposal also "prohibits the secretary from disclosing information pursuant to the Freedom of Information Act that includes sensitive information regarding a species, identifies the property of a specific landowner, or includes sensitive personal or business-related information."

Additionally, the discussion draft would create a priority system for tackling listing petitions, status reviews and determinations based on the urgency of a species' survival and conservation efforts "so that resources can be utilized in the most effective manner," said the summary from Barrasso's office.

The proposed bill would reauthorize the ESA for the first time since 1992.

INTERIOR Utah Gov. Herbert pitches Zinke on moving BLM headquarters

Scott Streater, E&E News reporter
Published: Wednesday, July 25, 2018

Utah Gov. Gary Herbert (R) used a visit yesterday by Interior Secretary Ryan Zinke to his state as another opportunity to pitch moving the headquarters of the Bureau of Land Management to the Beehive State.

Paul Edwards, Herbert's deputy chief of staff for communications and policy, confirmed that the governor and Zinke — who was in Utah yesterday to deliver brief remarks during the Days of '47 rodeo in Salt Lake City — did speak about a possible move of BLM headquarters from Washington, D.C., to his state.

That brief conversation at the rodeo, however, was a continuation of a much longer discussion the governor had with Zinke on the issue at the Western Governors' Association's

AMERICAN OVERSIGHT

annual meeting last month in South Dakota, Edwards said. Zinke did not commit to anything — yesterday or at the WGA annual meeting — and he made no announcements during his visit to Utah.

But once again, Edwards said, Zinke showed his willingness to listen."Like any large organization, being able to hear about the benefits and advantages we have here in Utah, with a high quality of living, lower housing costs than in D.C., and access to these great outdoors, that's a big opportunity," Edwards told E&E News.

Edwards suggested that conversations between Zinke and the governor have centered on a potential BLM move to Salt Lake City.

"Having good access to a major airport hub in the Intermountain West, presumably, would make it easier for them to engage with the very lands they have jurisdiction over," he said. "Having these people who have jurisdiction for [the federal land] to have the opportunity to be right here and appreciate the unique geography and topography and meteorology and biology of these lands, we just think that would be a huge benefit."

Zinke and other Interior officials have been clear that they are exploring moving BLM's national headquarters to a city in the West and are currently evaluating potential sites as part of an agency-wide reorganization. Zinke has proposed dividing the Interior Department into 13 geographic regions across the country based on watershed and other natural resource boundary lines. He also has touted the potential benefits of moving more staff into the field, including improved permitting, efficiency and collaboration (E&E News PM, Jan. 5).

Zinke did not address the Interior reorganization effort during his brief appearance at the rodeo on Pioneer Day, according to press reports. The vast majority of the 245 million acres that BLM manages are in the West. Interior officials have said moving the bureau to the West would make it more responsive to the people most affected by agency land-management decisions.

Colorado Sen. Cory Gardner (R) and Rep. Scott Tipton (R) have introduced companion bills directing Interior to develop a strategy, including a proposed timeline, for moving BLM's headquarters to one of 12 Western states (E&E News PM, May 2, 2017). Tipton, in particular, has been vocal about his support for moving BLM's headquarters to Colorado. His bill has 19 co-sponsors, including Colorado Rep. Jared Polis, a liberal Democrat who's running for governor.

Tipton issued a press statement last week once again touting the benefits of moving BLM out West. "Ninety-nine percent of the land that the BLM manages is located in the West, and the decisions made by the Bureau have daily impacts on those who live there, so it only makes sense to move the headquarters to a western state," Tipton's statement said.

Tipton's congressional district in western Colorado, he said, would be an ideal location. Both he and Gardner have stated they would like to see the headquarters move to Grand Junction, Colo., in Tipton's district. "The district I am fortunate enough to represent serves as a microcosm of almost every western land-management issue, and I encourage the Department of the Interior to strongly consider Colorado's Third District for the new BLM headquarters," he said.

Herbert will continue to lobby for Utah, Edwards said. "Gov. Herbert and Secretary Zinke have formed a good relationship, and this is an ongoing conservation," he said. "We appreciate the

CONFIDENTIAL: Western Governors' Association, 2018

AMERICAN OVERSIGHT

secretary's close attention to the issues here in the western U.S., and his efforts to be out here frequently, on the ground, observing the issues we are wrestling with."

AMERICAN OVERSIGHT

Excerpt: Wyoming's governor has backed Barrasso's effort to change the Endangered Species Act. Gov. Matt Mead has, to some extent, been the catalyst for ESA changes — putting the law on the docket for the Western Governors Association to consider and recently traveling to Washington to testify in favor of giving states greater authority managing threatened and potentially threatened species. On the Clean Water Act, however, Mead has not rallied to the senator's defense. The governor said in an email that he does not hold a position for or against the bill but believes that "it does not appear to erode Wyoming's ability to protect its water."

Coverage Behind Paywalls

States groups oppose moves to limit Clean Water Act certification authority

By Annie Snider, Politico Pro Energy Whiteboard

08/09/2018 12:00 PM EDT

Ten bipartisan groups representing state governments, led by the Western Governors Association, are staunchly opposing Republican efforts to curtail states' authority to shape or deny federal water permits, an issue teed up as part of this year's government spending battle.

In a letter to House and Senate leaders sent today, the groups are calling on lawmakers to reject efforts to limit states' ability under Section 401 of the Clean Water Act to certify and condition Clean Water Act permits governing discharges into rivers, streams and wetlands. That authority has become controversial as states like New York have denied or attempted to deny certification for major new pipeline projects.

GOP lawmakers have sought to limit or entirely remove states' authority, including in this year's House Appropriations bill, House and Senate energy legislation and standalone bills.

"Because each state is unique, we need the flexibility and authority to address our individual water needs," the letter states. "We urge Congress to reject any legislative or administrative effort that would diminish, impair or subordinate states' ability to manage or protect water quality within their boundaries."

Groups signing the letter include the Association of Clean Water Administrators, the Conference of Western Attorneys General and the Western States Water Council.

In addition to pipeline projects, the authority also has implications for hydropower dam relicensing. Republican Maryland Gov. Larry Hogan has used the authority to require Exelon Corporation to limit nutrient pollution flowing through its Conowingo Dam into the Chesapeake Bay in order to be relicensed.

CLEAN WATER ACT: Western governors urge Congress to uphold state permit power

Jeremy P. Jacobs, E&E News reporter
Published: Thursday, August 9, 2018

Western governors called on Congress today to stop undermining states' authority to regulate water pollution.

CONFIDENTIAL: Western Governors' Association, 2018

AMERICAN OVERSIGHT

The Western Governors' Association and other groups pointed to multiple attempts — both in Congress and from the White House — to weaken a provision of the Clean Water Act that gives states authority to approve, deny or place conditions on permits, Section 401.

"Section 401 in particular represents a vital state authority," WGA policy adviser Ward Scott said in an interview. "It is often the only opportunity for states to engage in the permitting of facilities that would potentially impact their water."

WGA, which represents 19 states and three Pacific territories, and nine other groups wrote a letter for congressional leaders saying attempts to limit Section 401 represent a threat to the cooperative relationship between state and federal regulators that was the goal of the Clean Water Act.

"To implement the CWA," the letter says, "Congress purposefully designated states as co-regulators under a system of cooperative federalism that recognizes state interests and authority."

The group points to several efforts to reform the law that it says will limit states' Section 401 authority, including recent appropriations language and infrastructure bills. Further, similar changes were outlined in the White House's infrastructure proposal and regulatory agenda.

In most of those cases, changes to Section 401 are billed as an effort to streamline permitting.

But the WGA said those efforts are misguided. Its members support streamlining permitting for infrastructure projects, and they claim that Section 401 is working.

Further, EPA's website states that Section 401 certification shouldn't "add another layer of bureaucracy or cause delays."

"In most cases, Section 401 certification review is conducted at the same time as the Federal agency review," EPA's website says. "Section 401 review allows for better consideration of State- or Tribe-specific concerns in the federal permitting process."

WGA said efforts to reform Section 401 belie political talking points that tout support for state authority in the regulatory process.

"The emergence of this issue is a reflection of fair-weather federalism," WGA Executive Director Jim Ogsbury said.

New wildfire strategy emphasizes greater federal-state cooperation

By Daniel Enoch, AgriPulse

Agriculture Secretary Sonny Perdue today unveiled a new strategy for managing catastrophic wildfires that emphasizes greater cooperation with states to identify priorities for targeted treatment in areas with the highest payoffs.

Speaking at the U.S. Capitol with a handful of U.S. senators pledging their support, Perdue noted that he'd visited California earlier this week and seen first-hand the devastation that wildfires of unprecedented fury had inflicted on western communities.

AMERICAN OVERSIGHT

"We commit to work more closely with the states to reduce the frequency and severity of wildfires," Perdue promised. "We commit to strengthening the stewardship of public and private lands. This report outlines our strategy and intent to help one another prevent wildfire from reaching this level."

A key component of the 24-page report – Toward Shared Stewardship Across Landscapes: An Outcome-based Investment Strategy – is to prioritize decisions on forest treatments in direct coordination with states using the most advanced science tools, USDA said in a news release. This allows the U.S. Forest Service – an agency within USDA -- to increase the scope and scale of critical forest treatments, including the removal of dead trees and underbrush, that protect communities and create resilient forests.
USDA said the Forest Service will be able to build upon new authorities created by the 2018 omnibus spending bill that include categorical exclusions for land treatments to improve forest conditions, new road maintenance authorities and longer stewardship contracting in strategic areas. USFS will also continue cutting red tape to make timber sale contracts more flexible, the department said.

Interim USFS Chief Vicki Christiansen, who stood with Perdue in unveiling the strategy, said the challenges posed by today's wildfires require a new approach. "This year Congress has given us new opportunities to stand shoulder-to-shoulder with state leaders to identify land management priorities that include mitigating wildfire risks," she said.

Joining Perdue at today's event were Democratic Senators Ron Wyden of Oregon and Maria Cantwell of Washington and Republicans Steve Daines of Montana and Lisa Murkowski of Alaska, who said the new strategy was "exactly what we need at this point in time."

Murkowski said smoke from the wildfires in the lower 48 could be tasted all the way up in her home state. Indeed, as the senator spoke the Washington Post was reporting that high altitude winds were carrying smoke from the fires 3,000 miles into the Mid-Atlantic region and over the nation's capital.

In the West, Wyden said this new breed of wildfires, which are "bigger, hotter and more powerful" than their predecessors, was creating "clean air refugees" – people who were "literally traipsing from place to place just trying to find breathable air."

The USDA plan received immediate endorsements from Jim Ogsbury, executive director of the Western Governors' Association, and George Geissler, president of the National Association of State Foresters and state forester of Washington, both of whom attended today's briefing.

"This new approach will have state forestry agencies and the USDA Forest Service working together as we should, shoulder-to-shoulder, to manage wildfire," Geissler said in a release.

Last year, federal agencies spent $2.9 billion to suppress wildfires across the nation. Those fires charred more than 10 million acres, destroyed more than 8,000 residences and resulted in the deaths of dozens of Americans, including 14 wildland firefighters. Officials say this year could be even more destructive. The National Interagency Fire Center says that as of Aug. 16, 101 large fires are burning across the country, mostly in Western states. Since Jan. 1, nearly 41,000 fires had scorched some 5.7 million acres.

AMENDED AND RESTATED
ARTICLES OF INCORPORATION
OF
WESTERN GOVERNORS' FOUNDATION

Pursuant to the provisions of the Colorado Revised Nonprofit Corporation Act (the "Act"), Western Governors' Foundation, a Colorado nonprofit corporation (the "Corporation"), adopts the following Amended and Restated Articles of Incorporation. The Amended and Restated Articles of Incorporation constitute an amendment and restatement of the original Articles of Incorporation of the Corporation filed with the Colorado Secretary of State on April 2, 1985; correctly set forth the current provisions of the Articles of Incorporation of the Corporation, as amended, and restated; and supersede the Corporation's original Articles of Incorporation and all amendments and supplements thereto or restatements thereof. The Corporation has no voting members and the Amended and Restated Articles of Incorporation were duly adopted by unanimous consent of the Board of Directors of the Corporation on _____, 2018.

ARTICLE I

The name of the Corporation is Western Governors' Foundation.

ARTICLE II

The period of its duration shall be perpetual.

ARTICLE III

The Corporation is organized exclusively for charitable, scientific, literary or educational purposes within the meaning of and pursuant to section 501(c)(3) of the Internal Revenue Code of 1986 (or under the corresponding provision of any future United States Internal Revenue law). Within the scope of the foregoing purposes, the Corporation shall be organized and operated exclusively (i) for the benefit of, (ii) to perform the functions of, or (iii) to carry out the purposes of Western Governors' Association ("WGA"), a Colorado nonprofit corporation, and a governmental unit within the meaning of section 170(b)(1)(A)(v) of the Code. If WGA is dissolved for any reason and is no longer in existence, the purpose of the Corporation shall be to support the governmental units (within the meaning of section 170(b)(1)(A)(v) of the Code) whose Governors were the members of WGA at the time of its dissolution. References in these Articles of Incorporation to the "Code" shall be to the Internal Revenue Code of 1986, as amended from time to time.

ARTICLE IV

A. No part of the income or net earnings of the Corporation shall inure to the benefit of, or be distributable to, any member, director or officer of the Corporation or any other private individual (except that reasonable compensation may be paid for

DRAFT

AMERICAN OVERSIGHT

services rendered to or for the Corporation affecting one or more of its purposes, and reimbursement may be made for any expenses incurred for the Corporation by any officer, director, agent or employee, or any other person or corporation, pursuant to a policy adopted by the Board of Directors); and provided further that no member, director or officer of the Corporation, or any other private individual shall be entitled to share in any distribution of any of the corporate assets on dissolution of the Corporation or otherwise. No substantial part of the activities of the Corporation shall consist of carrying on propaganda or otherwise attempting to influence legislation, except as otherwise provided in section 501(h) of the Code. The Corporation shall not participate in or intervene in (including the publishing or distributing of statements) any political campaign on behalf of, or in opposition to, any candidate for public office.

B. No part of the assets of the Corporation shall inure to the benefit of or be distributable to any organization whose income or net earnings or any part thereof inure to the benefit of any private shareholder or other individual or any substantial part of the activities of which consists of carrying on propaganda or otherwise attempting to influence legislation.

C. Upon dissolution of the Corporation, all of its assets shall be paid over or transferred to WGA, but if WGA is no longer in existence or is no longer qualified to receive assets from the Corporation, then such assets shall be distributed to one or more exempt organizations of the kind described in section 501(c)(3) of the Code, or to governmental units within the meaning of section 170(b)(1)(A)(v) of the Code, as determined by the Board of Directors of the Corporation.

D. Notwithstanding any other provision hereof, this Corporation shall not conduct or carry on any activities not permitted to be conducted or carried on by an organization which is tax exempt under the provisions of section 501(c)(3) of the Code.

E. Notwithstanding any other provision of these Articles during any period that the Corporation is a "private foundation" within the meaning of section 509 of the Code, the Corporation shall be required to distribute its income for each taxable year of the Corporation at such time and in such manner as not to subject the Corporation to tax under section 4942 of the Code; and the Corporation shall be prohibited from engaging in any act of self-dealing as defined in section 4941(d) of the Code, from retaining any excess business holdings in violation of the provisions of section 4943(c) of the Code, from making any investments in such manner as to subject the Corporation to tax under section 4944 of the Code, and from making any taxable expenditures as defined in section 4945(d) of the Code.

ARTICLE V

The Corporation shall have no voting members and all business affairs of the Corporation shall be conducted by its Board of Directors.

AMERICAN OVERSIGHT

ARTICLE VI

The address of the registered office of the Corporation is 1600 Broadway, Suite 1700, Denver, CO 80202, and the name of its initial registered agent at such address is Dan Baer.

ARTICLE VII

The address of the principal office of the Corporation is 1600 Broadway, Suite 1700, Denver, CO 80202.

ARTICLE VIII

There shall be no personal liability, either direct or indirect, of any director of the Corporation to the Corporation or to its members for monetary damages for any breach or breaches of fiduciary duty as a director; except that this provision shall not eliminate the liability of a director to the Corporation or to its members for monetary damages for any breach, act, omission or transaction as to which the Colorado Revised Nonprofit Corporation Act (as in effect from time to time) prohibits expressly the elimination of liability. This provision shall not limit the rights of directors of the Corporation for indemnification or other assistance from the Corporation. This provision shall not restrict or otherwise diminish the provisions of section 13-21-115.7, Colorado Revised Statutes (concerning no liability of directors except for wanton and willful acts or omissions), any amendment or successor provision to such section, or any other law limiting or eliminating liabilities. Any repeal or modification of the foregoing provisions of this Article by the members of the Corporation or any repeal or modification of the provision of the Colorado Revised Nonprofit Corporation Act which permits the elimination of liability of directors by this Article shall not affect adversely any elimination of liability, right or protection of a director of the Corporation with respect to any breach, act, omission, or transaction of such director occurring prior to the time of such repeal or modification.

ARTICLE IX

The Articles of Incorporation and the Bylaws of the Corporation may be altered, amended or repealed by the affirmative vote of a majority of the full Board of Directors of the Corporation provided that, if WGA is then in existence, any such alteration, amendment or repeal is approved by the affirmative vote of two-thirds of the members of the WGA Board of Directors.

The (a) name or names, and (b) mailing address or addresses, of any one or more of the individuals who cause this document to be delivered for filing, and to whom the Secretary of State may deliver notice if filing of this document is refused, are:

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006873

BYLAWS
OF
WESTERN GOVERNORS' FOUNDATION

(a Colorado Nonprofit Corporation)

ARTICLE I.
OFFICES

1. Business Offices. The principal office of the corporation shall be located at such place as may be designated by the corporation from time to time in filings with the Secretary of State of Colorado. The corporation may have such other offices, either within or without the State of Colorado, as the Board of Directors may determine or as the affairs of the corporation may require from time to time.

2. Registered Office. The corporation shall have and continuously maintain in the State of Colorado a registered office, and a registered agent whose office is identical with such registered office, as required by the Colorado Revised Nonprofit Corporation Act. The registered office may be, but need not be, identical with the principal office if the principal office is in the State of Colorado. The address of the registered office may be changed from time to time by the corporation as long as the proper filings are made with the Secretary of State of Colorado.

ARTICLE II.
NO VOTING MEMBERS

The corporation shall have no voting members and the Board of Directors shall be elected as provided in Article III below.

ARTICLE III.
BOARD OF DIRECTORS

1. General Powers. The affairs of the corporation shall be managed under the direction of its Board of Directors. Directors need not be residents of the State of Colorado, but they shall be natural persons who are at least eighteen years of age.

2. Number, Tenure and Qualifications. The number of Directors shall be between three and nine. The number of Directors within that range shall be fixed or changed from time to time by the Board of Directors. Directors serving in that capacity at the time of the adoption of these revised and restated bylaws shall continue to serve as Directors for two years from that time or until their death, removal or resignation. All successor Directors shall be appointed by Western Governors' Association, a Colorado nonprofit corporation ("WGA"), to serve for a term of up to four years. Each Director shall serve for the term for which they are elected and until their successor shall have been appointed or elected and qualified, or until such Director's earlier death, resignation or removal. A Director may serve successive terms if reappointed or reelected.

DRAFT

AMERICAN OVERSIGHT

At least a majority of the members of the Board of Directors shall not be disqualified persons (as defined in Section 4946 of the Internal Revenue Code of 1986, as amended (the Code)) other than foundation managers.

It is the intention of the corporation that it be regarded as "operated, supervised or controlled by" WGA within the meaning of Section 509(a)(3)(B)(i) of the Code.

3. Removal. The Directors may be removed with or without cause by WGA at any time by giving written notice to the Director who is being removed and to the corporation. Such removal shall be effective when the notice of removal is received by both the Director to be removed and the corporation unless the notice states a later effective date.

4. Meetings. The Board of Directors shall meet at least one time each year at a meeting designated as the annual meeting and called by the Chairperson of the Board. Additional meetings may be called by the Chairperson of the Board or upon the written request of at least two Directors. All meetings shall be held at the time and place designated by the Chairperson of the Board.

5. Notice of Meetings. Notice of each meeting of Directors shall be given to each Director. If such notice is given (a) by personally delivering written notice to a Director, (b) by personally telephoning such Director, or (c) by delivering notice to such Director by electronic mail, it shall be so given at least two (2) days prior to the meeting. If such notice is given either (y) by depositing a written notice in the United States mail, postage prepaid, or (z) by transmitting a facsimile directed to such Director, it shall be so given at least four (4) days prior to the meeting. Notice shall be sent to the street or electronic addresses or facsimile numbers of the Directors set forth in the corporation's records. The notice of all meetings shall state the place, date and hour thereof, but need not, unless otherwise required by statute, state the purpose or purposes thereof.

6. Quorum. Two-Thirds of the Board of Directors shall constitute a quorum for the transaction of business at any meeting of the Board; but if less than two-thirds of the Directors are present at said meeting, a majority of the Directors present may adjourn the meeting from time to time without further notice.

7. Manner of Acting. The act of two-thirds of the Directors shall be the act of the Board of Directors, unless the act of a greater number is required by law or by these bylaws.

8. Vacancies. Any vacancy occurring in the Board of Directors, including any vacancy resulting from the removal of a Director or from an increase in the number of Directors, shall be filled by WGA. A Director appointed or elected to fill a vacancy shall be elected for the unexpired term of his or her predecessor in office.

9. Compensation. Directors as such shall not receive any stated salaries for their services, but by resolution of the Board of Directors a fixed sum and expenses of attendance, if any, may be allowed for attendance at each meeting of the Board; but

AMERICAN OVERSIGHT

nothing herein contained shall be construed to preclude any Director from serving the corporation in some other capacity and receiving compensation therefor.

10. Informal Action by Directors. Any action required by law or permitted to be taken at a meeting of Directors may be taken without a meeting if notice is transmitted in writing to each member of the Board and each member of the Board by the time stated in the notice: (x) votes in writing for such action; or (y) (i) votes in writing against such action, abstains from voting, or fails to respond or vote; and (ii) fails to demand in writing, that action not be taken without a meeting. The notice required by this Section shall state (a) the action to be taken; (b) the time by which a Director must respond; (c) that failure to respond by the time stated in the notice will have the same effect as abstaining in writing by the time stated in the notice and failing to demand in writing by the time stated in the notice that action not be taken without a meeting; and (d) any other matters the corporation determines to include. Action is taken under this Section only if at the end of the time stated in the notice transmitted pursuant to this Section the affirmative votes in writing for such action received by the corporation and not revoked equal or exceed the minimum number of votes that would be necessary to take such action at a meeting at which all of the Directors then in office were present and voted, and the corporation has not received a written demand that such action not be taken without a meeting other than a demand that has been revoked. A writing by a Director under this Section shall be in a form sufficient to inform the corporation of the identity of the Director, the vote, abstention, demand, or revocation of the Director, and the proposed action to which such vote, abstention, demand or revocation relates. All communications under this Section may be transmitted or received by the corporation by electronically transmitted facsimile, electronic mail, or other form of wire or wireless communication. For purposes of this Section, communications to the corporation are not effective until received.

11. Meetings by Telephone. Members of the Board of Directors or any committee designated thereby may hold or participate in a meeting of the Board of Directors or such committee by means of conference telephone or similar communications equipment provided that all such persons so participating in such meeting can hear each other at the same time.

ARTICLE IV.
OFFICERS

1. Officers. The officers of the corporation shall be a Chairperson of the Board, a Vice Chairperson of the Board, a President, and such other officers as may be elected in accordance with the provisions of this Article. The Board of Directors may elect or appoint such other officers as it shall deem desirable, such officers to have the authority and perform the duties prescribed, from time to time, by the Board of Directors. The Chairperson of the Board and the Vice Chairperson of the Board shall be elected from among the members of the Board. No individual may simultaneously hold more than one office in the Corporation. The officers must be natural persons who are at least eighteen years of age.

AMERICAN OVERSIGHT

2. Election and Term of Office. The officers of the corporation shall be elected annually by the Board of Directors at the next regular meeting of the Board of Directors following the annual meeting of the Board of Directors. If the election of officers shall not be held at such meeting, such election shall be held as soon thereafter as conveniently may be. New offices may be created and filled at any meeting of the Board of Directors. Each officer shall hold office until his or her successor shall have been duly elected and shall have qualified.

3. Removal. Any officer elected or appointed by the Board of Directors may be removed by the Board of Directors at any time with or without cause, but such removal shall be without prejudice to the contract rights, if any, of the officer so removed.

4. Vacancies. A vacancy in any office because of death, resignation, removal, disqualification or otherwise, may be filled by the Board of Directors for the unexpired portion of the term.

5. Chairperson of the Board. The Chairperson of the Board shall preside at meetings of the Board of Directors, shall consult with the President and keep generally advised about the state of the corporation and shall perform such other duties as may be determined by the Board.

6. Vice Chairperson of the Board. The Vice Chairperson of the Board shall perform the duties of the Chairperson of the Board in case of the absence or resignation of the Chairperson or inability of the Chairperson to act.

7. President. The President shall be the principal executive officer of the corporation and shall in general supervise and control all of the business and affairs of the corporation. He or she shall preside at all meetings of the Board of Directors if the offices of Chairperson and Vice Chairperson of the Board are vacant or the Chairperson and Vice Chairperson are absent or unable to act. The President may sign contracts or other instruments which the Board of Directors has authorized to be executed, except in the cases where the signing and execution thereof shall be expressly delegated by the Board of Directors or by these bylaws or by statute to some other officer or agent of the corporation; and in general he or she shall perform all duties incident to the office of President and such other duties as may be prescribed by the Board of Directors from time to time.

The President shall have charge and custody of and be responsible for all funds and securities of the corporation; and, with the assistance of staff of the corporation, shall receive and give receipts for moneys due and payable to the corporation from any source whatsoever, and deposit all such moneys in the name of the corporation in such banks, trust companies or other depositaries as shall be selected by the Board of Directors.

The President shall be the custodian of the corporate records and shall ensure that minutes of the meetings of the Board of Directors are kept in one or more books provided for that purpose. With the assistance of staff of the corporation, the President

AMERICAN OVERSIGHT

shall see that all notices are duly given in accordance with the provisions of these bylaws or as required by law, and shall keep a register of the post-office and email addresses of each Director which shall be furnished to the President by such Director.

ARTICLE V.
COMMITTEES

1. Committees of Directors. The Board of Directors may create one or more committees of the Board and appoint one or more Directors to serve on them, by vote of a majority of all Directors in office, which committees shall have and exercise the authority of the Board of Directors in the management of the corporation as may be delegated to such committee by the Board of Directors, except that no such committee shall have the authority of the Board of Directors in reference to authorizing distributions, electing, appointing or removing any Director, amending articles of incorporation, amending, altering or repealing the bylaws; approving a plan of merger, or approving a sale, lease exchange or other distribution of all, or substantially all of the corporation's property, with or without goodwill, otherwise than in the usual and regular course of business.

2. Advisory Committees. The corporation may have other committees similarly appointed which shall not have the authority of the Board of Directors in the management of the corporation and which shall serve solely as advisory committees to the Board.

3. Term of Office. Committees may be terminated and members may be appointed and removed from committees as determined by the Board of Directors from time to time.

ARTICLE VI.
STANDARDS OF CONDUCT FOR OFFICERS AND DIRECTORS

Each Director shall discharge the Director's duties as a Director, including the Director's duties as a member of a committee of the Board, and each officer with discretionary authority shall discharge the officer's duties under that authority: (a) in good faith; (b) with the care an ordinarily prudent person in a like position would exercise under similar circumstances; and (c) in a manner the Director or officer reasonably believes to be in the best interests of the corporation. A Director or officer may rely on information, opinions, reports, or statements, including financial statements and other financial data, if prepared or presented by: (i) one or more officers or employees of the corporation whom the Director or officer reasonably believes to be reliable and competent in the matters presented; (ii) legal counsel, a public accountant, or other person as to matters the Director or officer reasonably believes are within such person's professional or expert competence; or (iii) in the case of a Director, a committee of the Board of Directors of which the Director is not a member if the Director reasonably believes the committee merits confidence.

A Director or officer is not acting in good faith if the Director or officer has knowledge concerning the matter in question that makes reliance otherwise permitted

AMERICAN OVERSIGHT

by the above unwarranted. A Director or officer is not liable as such to the corporation for any action taken or omitted as a Director or officer, if, in connection with such action or omission, the Director or officer performed the duties of the position in compliance with this Article.

ARTICLE VII.
CONFLICTING INTEREST TRANSACTIONS

1. Conflicting Interest Transactions. As used in this Article, "conflicting interest transaction" means: a contract, transaction, or other financial relationship between the corporation and a Director of the corporation, or between the corporation and a party related to a Director, or between the corporation and an entity in which a Director of the corporation is a Director or officer or has a financial interest.

2. Prohibition Against Loans to Directors or Officers. No loans shall be made by the corporation to its Directors or officers. Any Director or officer who assents to or participates in the making of any such loan shall be liable to the corporation for the amount of such loan until the repayment thereof.

3. Voidability of Conflicting Interest Transactions. No conflicting interest transaction shall be void or voidable or be enjoined, set aside, or give rise to an award of damages or other sanctions in a proceeding by or in the right of the corporation, solely because the conflicting interest transaction involves a Director of the corporation or a party related to a Director or an entity in which a Director of the corporation is a Director or officer or has a financial interest or solely because the Director is present at or participates in the meeting of the corporation's Board of Directors or of the committee of the Board of Directors that authorizes, approves, or ratifies the conflicting interest transaction or solely because the Director's vote is counted for such purpose if:

(A) The material facts as to the Director's relationship or interest and as to the conflicting interest transaction are disclosed or are known to the Board of Directors or the committee, and the Board of Directors or committee in good faith authorizes, approves, or ratifies the conflicting interest transaction by the affirmative vote of a majority of the disinterested Directors, even though the disinterested Directors are less than a quorum; or

(B) The conflicting interest transaction is fair as to the corporation.

4. Approval of Conflicting Interest Transactions. Common or interested Directors may be counted in determining the presence of a quorum at a meeting of the Board of Directors or of a committee which authorizes, approves, or ratifies the conflicting interest transaction.

5. Party Related to Director. For purposes of this Article, a "party related to a Director" shall mean a spouse, a descendent, an ancestor, a sibling, the spouse or descendent of a sibling, an estate or trust in which the Director or a party related to a Director has a beneficial interest, or an entity in which a party related to a Director is a Director, officer, or has a financial interest.

AMERICAN OVERSIGHT

ARTICLE VIII.
INDEMNIFICATION

1. Indemnification. To the extent permitted or required by the act (as defined below) and any other applicable law, if any Director or officer (as defined below) of the corporation is made a party to or is involved in (for example as a witness) any proceeding (as defined below) because such person is or was a Director or officer of the corporation, the corporation (I) shall indemnify such person from and against any judgments, penalties, fines (including but not limited to ERISA excise taxes), amounts paid in settlement and reasonable expenses (including but not limited to expenses of investigation and preparation, and fees and disbursements of counsel, accountants or other experts) incurred by such person in such proceeding, and (II) shall advance to such person expenses incurred in such proceeding.

The corporation may in its discretion (but is not obligated in any way) to indemnify and advance expenses to an employee or agent of the corporation to the same extent as to a Director or officer.

The foregoing provisions for indemnification and advancement of expenses are not exclusive, and the corporation may at its discretion provide for indemnification or advancement of expenses in a resolution of its Directors, in a contract or in its articles of incorporation.

Any repeal or modification of the foregoing provisions of this article for indemnification or advancement of expenses shall not affect adversely any right or protection stated in such provisions with respect to any act or omission occurring prior to the time of such repeal or modification. If any provision of this article or any part thereof shall be held to be prohibited by or invalid under applicable law, such provision or part thereof shall be deemed amended to accomplish the objectives of the provision or part thereof as originally written to the fullest extent permitted by law, and all other provisions or parts shall remain in full force and effect.

As used in this article, the following terms have the following meanings:

(A) Act. The term "act" means the Colorado Revised Nonprofit Corporation Act as it exists on the date this Article is adopted, and as the Colorado Revised Nonprofit Corporation Act may be thereafter amended from time to time. In the case of any amendment of the Act after the date of adoption of this article, when used with reference to an act or omission occurring prior to effectiveness of such amendment, the term "act" shall include such amendment only to the extent that the amendment permits a corporation to provide broader indemnification rights than the Colorado Revised Nonprofit Corporation Act permitted prior to the amendment.

(B) Director or Officer. The term "Director" or "officer" means (I) a Director or officer of the corporation and (II) while an individual is a Director or officer of the corporation, the individual's serving at the corporation's request as a Director, officer, partner, member, manager, trustee, employee, fiduciary, or agent of another domestic or foreign corporation, nonprofit corporation, or other person or of an

AMERICAN OVERSIGHT

employee benefit plan, and (III) any other position (not with the corporation itself) in which a Director or officer of the corporation is serving at the request of the corporation and for which indemnification by the corporation is permitted by the act.

(C) Proceeding. The term "proceeding" means any threatened, pending or completed action, suit, or proceeding whether civil, criminal, administrative or investigative, and whether formal or informal.

(D) Code. The term "Code" means the Internal Revenue Code of 1986, as amended from time to time.

2. Limitation. Notwithstanding any other provision of this Article VIII, during any period that the corporation is a "private foundation" within the meaning of section 509 of the Code, or any corresponding provision of any future United States tax law, the corporation shall not indemnify any person from or against or advance to any person the cost of, such expenses, judgments, fines, or amounts paid or necessarily incurred, nor shall the corporation purchase or maintain such insurance, to the extent that any such indemnification, purchase, or maintenance would be determined to be an act of self-dealing within the meaning of section 4941 of the Code, to be a taxable expenditure within the meaning of section 4945 of the Code, or to be otherwise prohibited under the Code, unless and to the extent (i) a court orders such indemnification, or (ii) the purchase or maintenance of such insurance can be treated as reasonable compensation to such person.

ARTICLE IX.
BOOKS AND RECORDS

The corporation shall keep correct and complete books and records of account and shall also keep minutes of the proceedings of its Board of Directors and committees having any of the authority of the Board of Directors, and shall keep at its registered or principal office a record giving the names and addresses of the Directors. All books and records of the corporation may be inspected by any Director or his or her agent or attorney for any proper purpose at any reasonable time.

ARTICLE X.
WAIVER OF NOTICE

Whenever any notice is required to be given under the provisions of the Colorado Revised Nonprofit Corporation Act or under the provisions of the articles of incorporation or the bylaws of the corporation, a Director may waive any notice required to be given to such Director by the Act or these bylaws: (i) whether before or after the date or time stated in the notice as the date or time when any action will occur, by delivering a written waiver to the corporation which is signed by the Director entitled to the notice for inclusion in the minutes, but such delivery and filing shall not be conditions of the effectiveness of the waiver; or (ii) by a Director's attendance at the meeting whereby such Director waives objection to lack of notice or defective notice, unless the Director at the beginning of the meeting objects to the holding thereof or transacting business at the meeting because of lack of notice or defective notice and the

AMERICAN OVERSIGHT

Director also does not vote for or assent to action taken at the meeting. Further, even if a Director attends or participates in a meeting, the Director does not waive any required notice if special notice was required of a particular purpose and the Director objects to transacting business with respect to the purpose for which such special notice was required and does not thereafter vote for or assent to action taken at the meeting with respect to such purpose.

ARTICLE XI.
AMENDMENTS TO BYLAWS

The Board of Directors may amend these bylaws at any time to add, change, or delete a provision; provided, however, to be effective, any amendment of these bylaws shall require written approval of WGA.

ARTICLE XII.
VOTE REQUIRED FOR APPROVAL BY WGA

Unless otherwise provided in these bylaws, at any time when the approval of WGA or of the WGA Board of Directors is required to take any action, such action shall require the affirmative vote of two-thirds of the members of the WGA Board of Directors.

Western Governors' Association – Draft Resolutions Status –--Fall 2018[1]

10-05-18

#	*Resolution Topic*	*SAC Review Status*	*Sponsors*	*Notes*
	Foreign Visitor Preclearance *(Renewal of Expired Resolution)* *(Staff Lead: Lauren DeNinno)*	9/20: HI indicated they would like this resolution to be considered during this resolution process during the SAC call. SAC indicated a working group was not needed. 9/28: HI submitted a revised version of the expiring resolution. This was circulated to SAC as V1. 10/4/18: V1 continues to be circulated without additional edits to-date.		
	Cybersecurity *(New Topic)* (Working Group: ND, WA) *(Staff Lead: Britta Beckstead)*	9/17/18: Work Group call. Attendees: WA. 9/24/18: Work Group call. No attendees. WA provided edits/feedback on draft. 10/1/18: Work Group call. No attendees. 10/2-10/3: ND and WA provided feedback/edits. 10/4/18: Shared V1 and broadly discussed resolution with SAC. There are no additional work group calls planned at this time. Attendees: Ak, CO, HI, ID, NM, NV, OR, SD, UT, WA, WY.		
	Compensatory Mitigation *(New Topic)*	9/25/18: Working Group call. Attendees: WA, MT, UT. No substantive edits provided.		

[1] *Article VI(A)(3) of the Western Governors' Association bylaws requires initial drafts of resolutions to be circulated no less than 60 days prior to a vote of the Governors.*

AMERICAN OVERSIGHT

	(Working Group: CO, ID, MT, NV, UT, WA) *(Staff Lead: Zach Bodhane)*	10/2/18: Working Group call. Attendees. CO, ID, UT, NV. No substantive edits provided. NV noted that they may have edits in the future but did not object to moving forward with full SAC consideration. 10/4/18: V1 shared with SAC. 10/4/18 – ID submitted edits. V2 circulated in Friday email.		
	Health Care *(New Topic)* (Working Group: AK, CA, CO, ID, NM, OR, SD, UT, WA) *(Staff Lead: Troy Timmons)*	9/20/18: Resolution discussed on SAC call. Working group established. CA, CO, ID, NM, OR, SD, UT, WA agree to participate. 9/25/18: AK joins working group. 10/3/18: Working group call. No attendees. 10/4/18: SAC authorizes WGA to produce draft resolution text based on individual discussions with working group members.		

AMERICAN OVERSIGHT

Reimagining the Rural West

FY19 Planning Activities

Action Request:
WGA requests SAC assistance with the first planning year objective - populating the initiative advisory group. Please connect WGA with the appropriate person in your governor's office with policy expertise related to rural development to provide feedback and assist with scoping efforts.

Please assist WGA with this effort by October 19th.

Initiative Overview:

The Western Governors' "Reimagining the Rural West" Initiative will examine the elements critical to the ongoing and future vitality of rural western communities, with the goal of identifying actions western states can take to best support these communities, especially by effecting changes in federal policies. The initiative will be organized around three topical pillars: Opportunity, Connectivity and Community. Suggested topics or objectives are identified for each.

1. Opportunity

This pillar will examine strategies for strengthening rural western economies, in particular through leveraging the West's strengths (e.g. resource-based industries) and advantages (e.g. frequent proximity to public lands). This includes opportunities such as growing the outdoor economy, modernizing the energy industry, capitalizing on restoration and conservation services, and applying new technologies to agriculture.

Suggested Topics:

- Advancing Western Governors' all-of-the-above energy vision, which calls for making the West a leader in energy education, technology development, research and innovation;
- Providing a platform for states to share best practices in developing the outdoor recreation economy, including through establishment of offices of outdoor recreation, strategies to leverage the private sector, and identifying federal policies or investments that would support that industry's growth;
- Advancing Western Governors' forest and rangeland management priorities related to expanding markets for forest products and diversified rangeland goods and services and supporting forest and rangeland restoration activities; and
- Developing and utilizing economic incentives, such as federal Opportunity Zones, to attract businesses and foster entrepreneurism.

AMERICAN OVERSIGHT

2. Connectivity

The Connectivity pillar will foster solutions-oriented discussions around the rural West's infrastructure challenges with a focus on broadband and transportation – the infrastructure needed to bridge the gap between rural communities and metropolitan areas.

Suggested Topics:

- Developing funding strategies and solutions for rural infrastructure investments, including how states can drive private sector investment through tax or other incentives;

- Sharing best practices and developing recommendations for prioritization of infrastructure funding, focusing on investments that are critical to attract and retain businesses and investments that adapt to or anticipate changing or emerging technologies;

- Facilitating deployment of rural broadband by:

    - Convening stakeholders and state officials to discuss best practices for building rural broadband systems that provide continuous, low-cost access;

    - Engaging with states to "ground-truth" broadband data that is available to federal agencies. Low-quality data affects the allocation of federal funding to rural communities through FCC and USDA loan and grant programs;

    - Examining innovative broadband mapping strategies, such as nonprofit entities collecting Internet Service Provider infrastructure data to estimate coverage; and

    - Coordinating with USDA to ensure the new broadband pilot program managed by the Rural Utility Service prioritizes areas that wholly or severely lack access to broadband.

- Identifying critical transportation infrastructure (surface and air) and federal regulations that may impact the rural communities' ability to maintain this infrastructure.

3. Community

This pillar will explore the amenities and attributes that make rural communities attractive places to live, identifying critical elements (e.g. access to education, affordable housing, healthcare) and strategies for reinforcing or developing those elements.

Suggested Topics:

- Showcasing western communities that are doing a good job attracting and retaining young people and families and developing recommendations for other communities to replicate that success;

- Identifying and disseminating best practices for communities to collect and analyze locally generated socioeconomic data to inform policy decisions and connect communities to

AMERICAN OVERSIGHT

groups/tools that are working to support that effort (such as the Headwaters Economic tool);

- Facilitating conversation on how to engage tribal populations while building community;

- Providing a forum for states to share best practices in rural workforce development such as strategies to close rural skills gaps in sectors such as healthcare and education; models for providing access to post-secondary education in rural communities; expanding apprenticeship in rural industries and businesses; and identifying and training skills for a resilient workforce that can adapt and innovate as technologies change;

- Evaluating federal policies affecting rural healthcare, including the sustainability of rural hospitals and deployment of telehealth services;

- Evaluating federal policies affecting the distribution of funding for rural development to determine whether rural areas are able to capture their fair share, and if not, identifying solutions such as providing tools or resources and advocating for legislative or regulatory changes; and

- Sharing best practices and developing policy recommendations to alleviate the rural housing shortage.

Planning Year Objectives:

1. Build Advisory Group (October 2018)

WGA staff will build out an advisory group for the initiative. The advisory group will consist of state policymakers with a broad expertise in rural economic development and sustainability. WGA will work with SAC to identify participants from Governors' offices or state agencies.

The advisory group's first task will be to develop survey instruments that will be deployed in the planning year to identify to refine the scope of the initiative and identify potential outcomes. The advisory group will also help WGA distribute the survey to appropriate stakeholders.

2. Develop and Distribute Initial Survey (November – December 2018)

Working with the advisory group, WGA will develop an initial survey to gather information pertinent to the initiative. This survey will gauge states' interest in the suggested topics put forth in the initiative framework, solicit best practices and case studies, and help to identify potentially overlooked topics of inquiry.

3. Establish Stakeholder Interest and List (Ongoing)

The team will conduct outreach to stakeholders (nonprofit organizations, federal agencies, state and local government, business community) and build out an initiative list that will be used for distribution and to populate initiative events.

4. Develop Potential Sponsors (December 2018 – May 2019)

AMERICAN OVERSIGHT

The WGA team will develop and secure initiative sponsors before the launch of the initiative in June 2019. The team will work to identify interested sponsors at the Winter Meeting. Sponsorship materials will be developed and finalized by March 2019 with the goal of securing initiative sponsors before the initiative roll-out in June.

5. Develop and Finalize Initiative Plan (January – April 2019)

The WGA team will develop and finalize the initiative plan by April 2019. The plan will identify the concrete outcomes the initiative will work toward and how it will do so. The plan will detail the number and type of in-person events needed and the topics to be addressed at each. WGA will present the plan to SAC for feedback at the Spring Strategic Planning Meeting.

WGA Staff: Lauren DeNinno (ldeninno@westgov.org), Britta Beckstead (bbeckstead@westgov.org), and Kevin Moss (kmoss@westgov.org)

AMERICAN OVERSIGHT

August 2018 Communications Report

TRADITIONAL MEDIA

The policy work of Western Governors continued to earn strong media exposure during August. The Governors' efforts on Section 401 of the Clean Water Act, continued interest in WGA's species conservation work and the shared stewardship event with the Department of Agriculture earned 26 stories and mentions of WGA during August. (Story list and links at end of monthly statistics.)

Thanks to an ESA report in *USA Today* that ran in an additional 71 Gannet properties, the stories found their way into more than 125 publications. The stories appeared, in part, in *Politico*, Bloomberg News, *E&E News,* McClatchy News Service *(*including *Sacramento Bee and Fresno Bee), Casper Star Tribune, Jackson Hole News & Guide, Missoulian, Wyoming Public Media, Des Moines Register, Detroit Free Press, Evansville Courier and Press, Louisville Courier Journal, Argus Leader* (SD), and the *Statesman Journal* (Salem, OR).

WGA WEBSITE TRAFFIC

Unique website visitors in August were well ahead (29%) of the same month in 2017, as were total site visits (21%). The same was true of Fiscal Year and Calendar Year traffic, which posted 25% and 20% increases respectively. August also saw pageviews bounce back, growing 4% over last year after a 7% decline in July. That, however, was not enough to move pageviews ahead for the fiscal year. Top content in August showed continued high interest in the *Biosecurity and Invasive Species Initiative*, as the blog post featuring the launch webinar and the Initiative main page were the fourth and fifth most visited web pages.

AUGUST

- Total Users: 28% (4,799 vs 3,736)
- Total Visits: 21% (6,332 vs 5,223)
- Pageviews: 4% (14,379 vs 13,843)

Excerpt: Wyoming's governor has backed Barrasso's effort to change the Endangered Species Act. Gov. Matt Mead has, to some extent, been the catalyst for ESA changes — putting the law on the docket for the Western Governors Association to consider and recently traveling to Washington to testify in favor of giving states greater authority managing threatened and potentially threatened species. On the Clean Water Act, however, Mead has not rallied to the senator's defense. The governor said in an email that he does not hold a position for or against the bill but believes that "it does not appear to erode Wyoming's ability to protect its water."

Excerpt: One bill whose provisions haven't been included in the Trump Administration's proposed rule changes are those found in the LOCAL Act sponsored by Rep. Scott Tipton, R-Colo. That bill would create a variety of incentives, including about $41 million per year for the next five years, for farmers and other landowners to engage in habitat protection efforts on their own land. Similar measures have been backed by the Idaho Farm Bureau Federation and the Western Governors' Association.

Coverage Behind Paywalls

States groups oppose moves to limit Clean Water Act certification authority

By Annie Snider, Politico Pro Energy Whiteboard

08/09/2018 12:00 PM EDT

Ten bipartisan groups representing state governments, led by the Western Governors Association, are staunchly opposing Republican efforts to curtail states' authority to shape or deny federal water permits, an issue teed up as part of this year's government spending battle.

In a letter to House and Senate leaders sent today, the groups are calling on lawmakers to reject efforts to limit states' ability under Section 401 of the Clean Water Act to certify and condition Clean Water Act permits governing discharges into rivers, streams and wetlands. That authority has become controversial as states like New York have denied or attempted to deny certification for major new pipeline projects.

GOP lawmakers have sought to limit or entirely remove states' authority, including in this year's House Appropriations bill, House and Senate energy legislation and standalone bills.

CONFIDENTIAL: Western Governors' Association, 2018

AMERICAN OVERSIGHT

"Because each state is unique, we need the flexibility and authority to address our individual water needs," the letter states. "We urge Congress to reject any legislative or administrative effort that would diminish, impair or subordinate states' ability to manage or protect water quality within their boundaries."

Groups signing the letter include the Association of Clean Water Administrators, the Conference of Western Attorneys General and the Western States Water Council.

In addition to pipeline projects, the authority also has implications for hydropower dam relicensing. Republican Maryland Gov. Larry Hogan has used the authority to require Exelon Corporation to limit nutrient pollution flowing through its Conowingo Dam into the Chesapeake Bay in order to be relicensed.

CLEAN WATER ACT: Western governors urge Congress to uphold state permit power

Jeremy P. Jacobs, E&E News reporter
Published: Thursday, August 9, 2018

Western governors called on Congress today to stop undermining states' authority to regulate water pollution.

The Western Governors' Association and other groups pointed to multiple attempts — both in Congress and from the White House — to weaken a provision of the Clean Water Act that gives states authority to approve, deny or place conditions on permits, Section 401.

"Section 401 in particular represents a vital state authority," WGA policy adviser Ward Scott said in an interview. "It is often the only opportunity for states to engage in the permitting of facilities that would potentially impact their water."

WGA, which represents 19 states and three Pacific territories, and nine other groups wrote a letter for congressional leaders saying attempts to limit Section 401 represent a threat to the cooperative relationship between state and federal regulators that was the goal of the Clean Water Act.

"To implement the CWA," the letter says, "Congress purposefully designated states as co-regulators under a system of cooperative federalism that recognizes state interests and authority."

The group points to several efforts to reform the law that it says will limit states' Section 401 authority, including recent appropriations language and infrastructure bills. Further, similar changes were outlined in the White House's infrastructure proposal and regulatory agenda.

In most of those cases, changes to Section 401 are billed as an effort to streamline permitting.

But the WGA said those efforts are misguided. Its members support streamlining permitting for infrastructure projects, and they claim that Section 401 is working.

Further, EPA's website states that Section 401 certification shouldn't "add another layer of bureaucracy or cause delays."

CONFIDENTIAL: Western Governors' Association, 2018

AMERICAN OVERSIGHT

"In most cases, Section 401 certification review is conducted at the same time as the Federal agency review," EPA's website says. "Section 401 review allows for better consideration of State- or Tribe-specific concerns in the federal permitting process."

WGA said efforts to reform Section 401 belie political talking points that tout support for state authority in the regulatory process.

"The emergence of this issue is a reflection of fair-weather federalism," WGA Executive Director Jim Ogsbury said.

New wildfire strategy emphasizes greater federal-state cooperation

By Daniel Enoch, AgriPulse

Agriculture Secretary Sonny Perdue today unveiled a new strategy for managing catastrophic wildfires that emphasizes greater cooperation with states to identify priorities for targeted treatment in areas with the highest payoffs.

Speaking at the U.S. Capitol with a handful of U.S. senators pledging their support, Perdue noted that he'd visited California earlier this week and seen first-hand the devastation that wildfires of unprecedented fury had inflicted on western communities.

"We commit to work more closely with the states to reduce the frequency and severity of wildfires," Perdue promised. "We commit to strengthening the stewardship of public and private lands. This report outlines our strategy and intent to help one another prevent wildfire from reaching this level."

A key component of the 24-page report – Toward Shared Stewardship Across Landscapes: An Outcome-based Investment Strategy – is to prioritize decisions on forest treatments in direct coordination with states using the most advanced science tools, USDA said in a news release. This allows the U.S. Forest Service – an agency within USDA -- to increase the scope and scale of critical forest treatments, including the removal of dead trees and underbrush, that protect communities and create resilient forests.
USDA said the Forest Service will be able to build upon new authorities created by the 2018 omnibus spending bill that include categorical exclusions for land treatments to improve forest conditions, new road maintenance authorities and longer stewardship contracting in strategic areas. USFS will also continue cutting red tape to make timber sale contracts more flexible, the department said.

Interim USFS Chief Vicki Christiansen, who stood with Perdue in unveiling the strategy, said the challenges posed by today's wildfires require a new approach. "This year Congress has given us new opportunities to stand shoulder-to-shoulder with state leaders to identify land management priorities that include mitigating wildfire risks," she said.

Joining Perdue at today's event were Democratic Senators Ron Wyden of Oregon and Maria Cantwell of Washington and Republicans Steve Daines of Montana and Lisa Murkowski of Alaska, who said the new strategy was "exactly what we need at this point in time."

CONFIDENTIAL: Western Governors' Association, 2018

AMERICAN OVERSIGHT

Murkowski said smoke from the wildfires in the lower 48 could be tasted all the way up in her home state. Indeed, as the senator spoke the Washington Post was reporting that high altitude winds were carrying smoke from the fires 3,000 miles into the Mid-Atlantic region and over the nation's capital.

In the West, Wyden said this new breed of wildfires, which are "bigger, hotter and more powerful" than their predecessors, was creating "clean air refugees" – people who were "literally traipsing from place to place just trying to find breathable air."

The USDA plan received immediate endorsements from Jim Ogsbury, executive director of the Western Governors' Association, and George Geissler, president of the National Association of State Foresters and state forester of Washington, both of whom attended today's briefing.

"This new approach will have state forestry agencies and the USDA Forest Service working together as we should, shoulder-to-shoulder, to manage wildfire," Geissler said in a release.

Last year, federal agencies spent $2.9 billion to suppress wildfires across the nation. Those fires charred more than 10 million acres, destroyed more than 8,000 residences and resulted in the deaths of dozens of Americans, including 14 wildland firefighters. Officials say this year could be even more destructive. The National Interagency Fire Center says that as of Aug. 16, 101 large fires are burning across the country, mostly in Western states. Since Jan. 1, nearly 41,000 fires had scorched some 5.7 million acres.

CONFIDENTIAL: Western Governors' Association, 2018

AMERICAN OVERSIGHT

H.R. 5895, The Energy and Water, Legislative Branch, and Military Construction and Veterans Affairs Appropriations Act, 2019 Western Issues Summary

On September 12, the House approved the conference report on H.R. 5895, the Energy and Water, Legislative Branch, and Military Construction and Veterans Affairs Appropriations Act, 2019 (text here, conference report (H. Rpt. 115-929, here) by a 377-20 margin. The Senate had adopted the conference report on the three-bill package the day before on a 92-5 vote. President Trump signed the "minibus" appropriations package into law on Friday, September 21.

The $147.5 billion package funds the departments of Energy and Veterans Affairs, the Army Corps of Engineers, and the operations of Congress. Energy and Water programs would receive $44.6 billion, a 3.2 percent increase over Fiscal Year (FY) 2018, and $8.1 billion (22 percent) more than requested by the Administration. The Military Construction-VA portion is the most expensive of the three packages: the bill provides $98.1 billion overall (5.8 percent over FY18, and about $ 1 billion more than the President's request). This includes $921 million designated for Overseas Contingency Operations funded outside regular spending caps. The Legislative Branch is funded at $4.8 billion, about 3 percent higher than FY18.

The bill includes several items of interest to Western Governors. Highlights include:

- $35.7 billion for the Department of Energy: $1.2 billion (3 percent) more than the current level and $5.5 billion (18 percent) more than requested by the Administration;
- $6.0 billion for environmental cleanup of defense nuclear facilities;
- $6.6 billion for science activities (5 percent more than FY18 and 22 percent more than requested);
- $7.0 billion for the Army Corps of Engineers, $172 million (2.5 percent) more than FY18 and $2.2 billion (46 percent) more than the request;
- $1.6 billion for the Bureau of Reclamation (6 percent more than FY18 and 48 percent more than requested);
- $898 million for the Nuclear Regulatory Commission, $11 million (1 percent) less than FY18 funding and $597 million (6 percent) less than the request; and
- $370 million for the Federal Energy Regulatory Commission, $2 million more than FY18 and equal to the President's request.

Dropped from the final bill were several House-added appropriations and riders affecting various policy matters. The conference package:

- Eliminated $268 million from the House bill to relaunch the license application review for the Yucca Mountain nuclear waste disposal site in Nevada;
- Removed House language that could have made it easier for the White House to revoke the "Waters of the United States" regulation; and
- Deleted House language reversing a court decision directing additional water releases from hydroelectric dams in the Pacific Northwest to aid spawning salmon downstream.

AMERICAN OVERSIGHT

The following table provides additional detail on appropriations matters with a direct link to WGA policy. The conference report retains the report language of the separate House and Senate Appropriations Committees' reports (H. Rpt. 115-697 and S. Rpt. 115-258) unless the conference report specifically rejects or modifies those committee reports.

Conference Agreement	WGA Policy
DEPARTMENT OF ENERGY	
Overall Funding: $35.7 billion for DOE, $1.2 billion above FY18 and $5.5 billion above the budget request.	
Renewable Energy and Energy Efficiency	
Overall Funding: $2.4 billion for energy efficiency and renewable energy activities, $57 million (2%) more than FY18 and $1.7 billion above the President's request. It allows the department to use $20 million to bring cybersecurity into early-stage technology research and development so that it is built into new technology for this effort to encompass all these programs. The agreement rejects the administration's proposal to eliminate funding for weatherization assistance programs and state energy program grants. Instead, the bill provides $257 million for weatherization aid ($6 million higher than FY18) and $55 million for state energy grants (no change from FY18). It also provides $320 million for advanced manufacturing programs (5% more than FY18) and $226 million for building technologies research ($5 million higher than FY18). **Renewable Energy:** The bill provides $528 million for renewable energy programs, 1.5% more than FY18, but more than triple the President's request: **Solar**: The bill provides $247 million for solar energy. The Senate report directs DOE to create a 5-year domestic manufacturing capability consortium focused on inherently scalable production methods such as solution processing, roll-to-roll manufacturing, the science of inherent material stability, and ultrahigh efficiency through tandem manufacturing. **Wind**: The bill provides $92 million for wind energy. **Water Power**: The bill provides $105 million for water power.	In WGA Policy Resolution 2018-04, *Energy in the West*, the Governors recognize the following as energy policy priorities for the West: • Secure the United States' energy supply and systems, and safeguard against risks to cybersecurity and physical security; • Ensure energy is clean, affordable, and reliable by providing a balanced portfolio of renewable, non-traditional, and traditional resources; • Make the West a leader in energy education, technology development, research, and innovation; and Utilize an all-of-the-above approach to energy development and use in the West, while protecting the environment, wildlife, and natural resources.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006901

Conference Agreement	WGA Policy
Geothermal: $84 million is appropriated for geothermal technologies. The Senate report states that cybersecurity vulnerabilities must be addressed as renewable energy technologies enter the marketplace. The Committee also believes there is a gap with respect to distributed generators and behind-the-substation generators, storage, smart buildings technologies and electric vehicles where the potential for cyberattacks will continue to grow and threaten the modern grid.	
Sustainable Transportation: These programs would receive $690 million, 2% above FY18 but more than three times the Administration's request. The bill provides $344 million for vehicle technologies, $226 million for bioenergy technologies, and $120 million for hydrogen and fuel cell technologies. House Committee report language requests a report from DOE that models the demands on the electric grid and the overall energy consumption of the transportation sector of varying levels of network penetration of an interconnected hyperloop system.	The Energy Vision for the West articulates the Governors' goals to increase the development and use of alternative transportation fuels and vehicles, including the necessary infrastructure for those vehicles, and prioritize energy efficiency associated with transportation.
Cybersecurity, Energy Security, and Emergency Response	
Electricity Transmission & Distribution / Cybersecurity: The agreement restructures program accounts and provides $156 million for electricity delivery, $95 million more than the President's request. Of that total, the bill provides: • $46 million for energy storage activities (about 6 times the request); • $40 million for resilient distribution system (4 times the request); and • $39 million for transmission reliability (triple the request). The measure also establishes a new, separate line-item for Cybersecurity, Energy Security, and Emergency Response (CESER). This funding is directed to activities that protect energy infrastructure, and help restore the grid after emergency events. The measure provides $120 million for those activities, including $90 million for cybersecurity activities. Conferees directed DOE to use $10 million of the funding for the DarkNet project, which examines removing critical infrastructure from the internet	WGA Policy Resolution 2018-04, *Energy in the West*, prioritizes securing the United States' energy supply and systems, and safeguard against risks to cybersecurity and physical security and improving the United States electric grid's reliability and resiliency.

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006902

Conference Agreement	WGA Policy
and shielding the nation's electricity infrastructure from disruptive cyber penetration.	
Electricity Delivery	
Overall Funding: $175 million for electricity delivery, $22.7 million above FY18 levels. **Storage:** The bill provides $41 million for energy storage. The Senate Committee report encourages DOE to support state energy offices and universities with energy storage planning and deployment; participate in industry-led safety codes and standards development; and prioritize pilot scale initiatives with relevant utilities and state energy organizations that have the potential to advance real-time deployment and testing of these technologies. **Grid Modernization:** The Senate Committee report directs DOE to continue ongoing work between national laboratories, industry, and universities to improve grid reliability and resiliency through the Grid Modernization Initiative with an emphasis on grid cyber resilience, grid storage to improve grid flexibility, and advanced sensors and control systems. The House Committee report requests reports on the activities and costs necessary to achieve a North American grid model and on the potential of dynamic line rating systems to address transmission congestion management.	In the Energy Vision for the West, the Governor encourage innovation and application of energy storage, including pumped hydro storage, battery storage, and compressed air energy storage where cost-effective. The Energy Vision for the West describes the following specific steps recommended by the Governors to increase grid reliability and resiliency: • Encourage regional reliability organizations, utilities, state agencies and public utility commissions to assess the provision of essential reliability services under future scenarios that include a changing resource mix in the West. • Support grid operator situational awareness of distributed energy resources by promoting coordination between utilities and distributed energy resource developers. • Improve understanding of grid resources and services and the need for new power production facilities and transmission/distribution infrastructure through data, analysis, and coordination. Prepare for potential disruptions to the grid from wildfires, flooding, earthquakes, tornadoes, cyberattacks and other disturbances and emergencies, as well as increase the grid's ability to withstand and reduce the magnitude of such events.
Nuclear Energy and Waste	
Nuclear Energy: The bill allocates $1.3 billion for nuclear energy activities, including $100 million for advanced small modular reactor research and development and $62.5 million for used nuclear fuel disposition research The House Committee report encourages DOE to explore ways to support research and development that would enable non-light water reactor demonstrations by the 2020s and continue its important work on safe transportation of nuclear fuel.	Nuclear energy is part of the all-of-the-above energy approach outlined in WGA Policy Resolution 2018-04, *Energy in the West.* The Governors advocate for accelerating the introduction of small modular reactors into the marketplace in the Energy Vision for the West.
Nuclear Waste Disposal: The agreement retains Senate language to establish a pilot program to license, construct, and operate one or more federal consolidated storage facilities to provide interim	WGA Policy Resolution 2018-10, *Transportation, Storage and Disposal of Radioactive Waste, Radioactive Materials and Spent Nuclear Fuel*, states: "In the event that centralized interim storage, either

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006903

Conference Agreement	WGA Policy
storage for spent nuclear fuel and high-level radioactive waste. Before siting a consolidated storage facility, the bill requires DOE to enter into an agreement with the state's Governor and affected local government and tribes. The agreement rejected House appropriations of $190 million to restart DOE's licensing activities for the Yucca Mountain high-level radioactive waste disposal facility.	private or federal, is deemed necessary, no such facility, whether publicly or privately owned, shall be located within the geographic boundaries of a western state or U.S. territory without the written consent of the Governor in whose state or territory the facility is to be located."
Fossil Energy	
Generally: The agreement provides $740 million for fossil fuel energy research and development. The agreement requires DOE to continue to carry out advanced coal processing research and development, including advancing early stage research for converting coal pitch and coal to carbon fiber and other value-added products, which the Administration had proposed cutting. The House and Senate Committee reports prohibits the use of funds for the closure of any National Energy Technology Laboratory site.	Fossil fuel energy is part of the all-of-the-above energy approach outlined in WGA Policy Resolution 2018-04, *Energy in the West.*
Carbon Capture, Utilization, and Storage: The bill provides $25 million to continue to support two large-scale pilots on transformational coal technologies.	The Governors support federal policies that promote the development and deployment of carbon dioxide capture and commoditization in WGA Policy Resolution 2018-07, *Enhanced Oil Recovery*.
Coal Research: The agreement provides $18 million for DOE to continue advancing technologies for the recovery of rare earth elements and minerals from U.S. coal and coal byproduct sources.	WGA Policy Resolution 2018-09, *National Minerals Policy*, urges the federal government to create legislation and policy that will unlock our mineral potential to ensure access to the metals that are critical to U.S. economic and national security – providing vital base materials for electronics, telecommunications, satellites, aircraft, manufacturing and alternative energy technologies (particularly wind and solar).
Natural Gas Technologies: The bill provides $10 million for environmentally prudent development and $5.2 million for risk-based data management systems. This funding shall support the continued integration of FracFocus and risk based data management systems for improved public access to state-oil and gas-related data, as well as for state regulatory agencies to support electronic permitting for operators, eForms for improved processing time for new permits, operator training from the improved FracFocus 3.2 after enhancements are implemented, and miscellaneous reports, such as	WGA Policy Resolution 2018-12, *Water Quality in the West*, states: "Federal efforts to study the potential impacts of hydraulic fracturing on water quality should leverage state knowledge, expertise, policies, and regulations. Such efforts should also be limited in scope, based upon sound science, and driven by the states. Western Governors oppose efforts that would diminish the primary and exclusive authority of states over the allocation of water resources necessary for hydraulic fracturing." WGA Policy Resolution 2018-05, *Air Quality and Methane Emissions in the West*, urges the federal

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006904

Conference Agreement	WGA Policy
Produced Water Report: Current and Future Beneficial Uses Report. The conference report recommends $2.5 million be directed to further research on multipronged approaches for characterizing the constituents of and managing the cleaning of water produced during the extraction of oil and natural gas.	government, in any methane regulation, to: (1) ensure that the capture, commoditization, and sale of methane is promoted; (2) give states flexibility to achieve methane emission reduction standards; (3) recognize methane emissions reductions that result from existing state regulation; and (4) work with states to ensure the consistent use of a single, clear method of quantifying methane emissions.
Science, Research and Development	
Generally: The agreement appropriates $6.6 billion for science activities: $325 million (5%) more than FY18 and $1.2 billion (22%) above the request. **Research and Development Policy:** Both houses encourage DOE to continue to support innovative science research and development, and to focus on implementing mid- and late-stage research and development activities.	In WGA Policy Resolution 2018-04, *Energy in the West*, the Governors set forth the goal of making the West a leader in energy education, technology development, research, and innovation. The Energy Vision for the West calls on Congress and DOE to support and fund research, development, demonstration, and deployment of advanced energy technologies.
U.S. ARMY CORPS OF ENGINEERS	
Overall Funding: $7.0 billion for Civil Works programs of the USACE, $172 million (2.5%) more than FY18 and $2.2 billion (46%) more than requested.	WGA Policy Resolution 2018-08, Water Resource Management in the West, supports federal investment in water and wastewater infrastructure.
Harbor Maintenance Trust Fund: The bill provides $1.5 billion for Harbor Maintenance Trust Fund-related activities.	WGA Policy Resolution 2018-06, *Transportation Infrastructure in the Western United States*, urges Congress to fully fund the Harbor Maintenance Trust Fund to ensure western ports remain competitive.
Natural Disasters: The bill allocates $35 million for natural disaster preparation and support for emergency operations in response to disasters.	WGA Policy 2018-03, *Federal Disaster Recovery Assistance for Communities in the West*, states that federal agencies conducting disaster recovery and assistance should receive adequate and consistent funding and flexibility to direct funds where they are most needed.
Aquatic Plant Control Program: The agreement includes $5 million for watercraft inspection stations and $1 million for related monitoring.	WGA Policy Resolution 2016-05, *Combating Invasive Species*, sets forth the Governors' support for coordinated prevention efforts and early detection and rapid response with multistate management and eradication actions to limit or eliminate new introductions and existing species expansion.
Hydropower: The House Committee report urges USACE to review options for expanded non-federal hydropower at appropriate sites, including evaluations of seasonal pool levels and regional impacts. The Senate Committee report directs USACE to conduct an independent, external peer review of	The Energy Vision for the West notes the Governors' priority of increasing the amount of electricity generated from new, retrofitted, or relicensed hydroelectric facilities, including small, irrigation, and flood control hydropower projects. WGA Policy Resolution 2018-08, *Water Resource Management in the West*, expresses that "Congress

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006905

Conference Agreement	WGA Policy
risk-informed dam safety practices at USACE, FERC, and Reclamation.	and the Administration should authorize and implement appropriate hydropower projects and programs through efficient permitting processes that enhance renewable electric generation capacity and promote economic development, while ensuring protection of important environmental resources and indigenous people's rights."
Permitting Timelines (and Clean Water Act Section 401): The House Committee report urges USACE to encourage timely permitting in its districts, examine best practices among those districts with the lowest permitting timelines, and implement the same across other districts with lagging and protracted timelines. The House report states that it "is concerned that infrastructure permits across the country are being impacted by unnecessary and unlimited delays in the section 401 water quality certification process." It encourages USACE to provide additional guidance on this issue. The Senate Committee report strongly encourages the continuation of USACE's pursuit of 12 specific actions to improve permitting efficiencies, including "aggressive implementation" of Executive Order 13807 (One Federal Decision).	WGA Policy Resolution 2018-15, *Modernizing Western Infrastructure*, sets forth the Governors' support improved infrastructure permitting and environmental review processes that result in more efficient reviews without shortening timelines for state input and consultation, or compromising natural resource, wildlife, environmental quality or cultural values. WGA Policy Resolution 2018-08, *Water Resource Management in the West*, states that "Infrastructure planning and permitting guidelines, rules and regulations should be coordinated, streamlined and sufficiently flexible to: (1) allow for timely decision-making in the design, financing and construction of needed infrastructure; (2) account for regional differences; (3) balance economic and environmental considerations; and (4) minimize the cost of compliance." WGA Policy Resolution 2018-12, *Water Quality in the West*, expresses that, "Section 401 of the CWA requires applicants for a federal license to secure state certification that potential discharges from their activities will not violate state water quality standards. Section 401 is operating as it should, and states' mandatory conditioning authority should be retained without amendment." WGA's July 16, 2018 Letter to the House Appropriations Subcommittee on Energy and Water states: Reducing the states' Section 401 authority and vital role maintaining water quality within their borders would inflict serious harm to the division of authority established by the U.S. Constitution and reinforced statutorily in the CWA.
Surplus Water: The agreement retains House Committee report language that urges USACE to consider adoption of the alternative definition of "surplus water" as excluding "natural flows" from stored water in the Missouri River mainstem reservoirs in its proposed rule, Use of U.S. Army Corps Engineers Reservoir Projects for Domestic, Municipal & Industrial Water Supply, 83 FR 9555.	The Governors' February 27, 2017 letter to USACE states that it is "WGA's position that natural flows should be expressly and clearly exempted from any USACE rule which claims any degree of authority to manage and/or allocate surplus water."

AMERICAN OVERSIGHT
NV-DA-20-0615-A-006906

Conference Agreement	WGA Policy
BUREAU OF RECLAMATION	
Overall Funding: $1.6 billion for BOR, $85 million (6%) more than FY18 and $508 million (48%) more than the Administration's request.	
Hydroelectric Dams: The House Committee report requires that BOR, prior to the funding, carrying out, or approving the removal of a hydroelectric dam, study the environmental and fiscal impacts of dam removal on the county or counties where the dams are located. The conference report specifies that no funding may be used to remove of any federally-owned or operated dam unless authorized by Congress.	WGA Policy Resolution 2018-08, *Water Resource Management in the West*, calls on Congress to authorize and implement appropriate hydropower projects and programs through efficient permitting processes that enhance renewable electric generation capacity and promote economic development, while ensuring protection of important environmental resources and indigenous people's rights.
Drought Resiliency: The Senate Committee report recommends $196 million for the drought resiliency programs authorized in the WIIN Act and directs BOR to continue working with federal and state agencies to perform real-time monitoring of water supply conditions and their impact on endangered species. The report also urges BOR to expedite the development and testing of a web-based Water Supply Decision Support System that will help federal, state, municipal, tribal, and private water managers and users to make better water use decisions to support drought resilience in the western states.	WGA Policy Resolution 2018-08, *Water Resource Management in the West*, provides the following recommendations for drought resiliency: creating better drought and water data; regulatory streamlining for reusing water; better land management practices; water conservation and efficiency; and effective infrastructure and frameworks. It also notes that the Governors encourage the use of state water data in planning for both the public and private sectors and support federal efforts to coordinate water data gathering and information programs across multiple agencies.
Miscellaneous Provisions	
Workforce: The House Committee report encourages DOE to work with two-year, public community and technical colleges on job training programs that lead to an industry-recognized credential in the energy workforce. The Committee also encourages funding within EERE programs to be allocated to training and workforce development programs that support workers in trades required for the continued growth of the U.S. energy efficiency and clean energy sectors.	The direction aligns with the Governors' goals set forth in WGA Policy Resolution 2018-04, *Energy in the West*, and WGA Policy Resolution 2018-13, *Workforce Development in the Western United States*. The Energy Vision for the West, which articulates the Governors' objectives of encouraging training and education in energy-related fields and ensuring there is an adequate workforce operating under the highest safety standards and creating employment opportunities for displaced energy workers.

MEMORANDUM BETWEEN THE
WESTERN GOVERNORS
AND THE
U.S. DEPARTMENT OF ENERGY

REGIONAL PROTOCOL FOR THE SAFE AND UNEVENTFUL TRANSPORTATION OF TRANSURANIC WASTE

Purpose

The purposes of this Memorandum of Agreement (MOA) are to enhance the safety and security of the transport of transuranic (TRU) waste shipments to and from the Waste Isolation Pilot Plant (WIPP) and other TRU waste shipments originating in or destined for the West; to facilitate communication between the Secretary of the U.S. Department of Energy (DOE); the Manager of the DOE, Carlsbad Field Office (CBFO); and the Western Governors on TRU waste transportation issues; to implement the provisions of the WIPP Land Withdrawal Act (Public Law 102-579, as amended); and to endorse the planning principles and transportation procedures contained in the Western Governors' Association WIPP Transportation Safety Program Implementation Guide (WIPP Guide) and the Cooperative Agreement between the Western Governors' Association (WGA) and the DOE-CBFO. In addition, the undersigned agree to work cooperatively, through the regional planning process, to develop the planning and operating procedures for TRU waste shipments originating in or destined for the western United States. Finally, the undersigned support the principle that the transportation of all DOE-Environmental Management (EM) shipments of radioactive materials should be safe and uneventful.

Findings

Managing the safe and uneventful transportation of TRU waste from DOE facilities to the WIPP in southeastern New Mexico is the joint responsibility of Federal, state, local and tribal governments. It is also the joint responsibility of these governments to manage the safe and uneventful transportation of TRU waste originating in or destined for the western United States.

AMERICAN OVERSIGHT

The potential risks of TRU waste and the complexities of transporting this waste to the WIPP brought 10 western states, the DOE and the U.S. Department of Transportation together to establish a set of principles and procedures for achieving the objective of "safe and uneventful transportation."

In 1989, the Secretary of Energy entered into a Cooperative Agreement with the WGA to prepare procedures for planning and operating the WIPP transportation program. Working as partners, WGA, DOE and the western states developed a model program to plan for WIPP shipments, to prepare the western states and units of local government to support the WIPP shipments, and to cooperatively support and operate the transportation system. The Governors have adopted several policy resolutions that stress that "the objective of the Western Governors' Association is the safe and uneventful transportation of nuclear waste."

In 1995, 2003 and again in 2009 the Western Governors and the Secretary of Energy signed an MOA committing to work cooperatively to implement the elements of the WIPP Guide. Both parties agreed to jointly support the regional planning process for the safe and uneventful transportation of TRU waste originating in or destined for the West. These protocols were successfully utilized by DOE and the western states in other DOE campaigns, such as the cesium capsule return program and shipments of nitric acid to Great Britain.

Congress recognized the benefits of a cooperative program among the states, the tribes, and DOE in the WIPP Land Withdrawal Act (Act). The Act requires DOE to provide technical assistance and funds for training public safety officials in the states and tribes through whose jurisdictions TRU waste will be shipped, assist the States through monetary grants or contributions in-kind to acquire equipment to respond to incidents involving TRU waste, and provide in-kind, financial, technical, or other appropriate assistance to states and tribes for WIPP-specific transportations safety programs.

DOE-CBFO, in its Cooperative Agreement with WGA, agreed that the WIPP transportation program would be conducted using the standards and procedures developed through the Western Regional Planning Process. This process recognizes that many of the procedures are above the minimum Federal regulatory requirements, but were employed to achieve a high level of safety and shipment success when WIPP opened in 1999.

These standards and procedures are described in the WIPP Guide and implemented through the DOE-CBFO "TRU Waste Transportation Plan."

WGA, the western states and DOE-CBFO periodically review the WIPP Guide and the "TRU Waste Transportation Plan" to ensure the objectives of the Western Governors' policy resolution, the provisions of this MOA, and the TRU waste transportation program are met. The Western Governors, through WGA, and DOE-CBFO negotiate and concur

AMERICAN OVERSIGHT

on changes to the WIPP Guide, which are then incorporated into the TRU Waste Transportation Plan. DOE-CBFO and its carrier contractors follow the WIPP Guide and the TRU Waste Transportation Plan in transporting TRU waste to WIPP. DOE-CBFO, as part of DOE-EM, has as one of its primary functions the National TRU Waste Program, which is charged with planning and coordinating the shipment of TRU waste between generator and interim storage sites, and to the WIPP facility. The Assistant Secretary for EM, who sets the policy for the TRU waste program, will work through the regional process to develop the planning and operating procedures for TRU waste shipments originating in or destined for the western United States.

The WIPP Guide

The WIPP Guide defines the following elements of the safe transportation program:

- Accident Prevention
  - High-Quality Drivers and Carrier Compliance
  - Independent Inspections
  - Bad Weather and Road Conditions
  - Safe Parking During Abnormal Conditions
  - Advance Notice of Shipments
  - Access to Information on Shipment Status
- Emergency Preparedness
  - Training and Exercises
  - Medical Preparedness
  - Emergency Response Plans and Procedures
  - Emergency Response Equipment
- Security Plan
- Public Information
- Highway Routing of WIPP Shipments
- Program Evaluation

DOE-CBFO completed the first shipment to the WIPP Facility on March 26, 1999, and as of the origination date of this MOA, has safely completed more than 12,000 shipments from thirteen DOE sites to the WIPP facility. DOE-CBFO has used the procedures from the WIPP Guide in developing the TRU Waste Transportation Plan and transportation operating procedures. Additionally, DOE-CBFO contractors have incorporated these procedures into their management and operating procedures. In part, it has been these procedures and the planning process which have produced the exemplary safety record of the WIPP program and its extraordinary acceptance by the public and elected officials over the past 19 years.

On September 11, 2001, the United States was attacked by foreign terrorists, which changed the perception of threats to radioactive material shipments in this Nation. In order to address these threats and facilitate communication between the western states

AMERICAN OVERSIGHT

and the DOE, the Assistant Secretary for EM and the Western Governors agreed to work to coordinate security planning, communications and response to threats regarding DOE TRU waste shipments.

Principles

The Secretary of Energy and the Chair of the Western Governors' Association, on behalf of their respective organizations, pledge to each other the following:

1. The undersigned reaffirm the objective of the U. S. Department of Energy and the Western Governors to be the safe and uneventful transportation of TRU waste within the United States.

2. The undersigned hereby endorse the collaborative Regional Planning Process as embodied in a Cooperative Agreement between the DOE-CBFO and WGA and used in the development and identification of principles and protocols for the WIPP Guide as the most appropriate mechanism for addressing the safe and uneventful transportation of TRU waste shipments originating in or destined for the West.

3. The undersigned endorse the standards, principles and procedures contained in the "WIPP Guide" and "TRU Waste Transportation Plan" for conducting TRU waste shipments, originating in or destined for the West, not including shipments within the same DOE site or other TRU waste shipments as agreed to between DOE and the states. The WIPP Guide and the TRU Waste Transportation Plan are considered to be living documents reflecting the continuing agreements and actions taken by the WGA, the western states and the DOE-CBFO as part of the regional planning process.

4. The undersigned commit to work cooperatively to identify and develop appropriate security procedures for the safe and uneventful transportation of TRU waste shipments. The DOE-CBFO, WGA and the western states agree to work to coordinate the planning, preparedness and response to security related activities involving the shipment of TRU waste.

5. The undersigned agree to continue a dialogue and implement the regional planning process on other anticipated DOE radioactive material shipments (e.g., low level waste, Foreign Research Reactor Fuel, etc.) originating in or destined for the West and on lessons learned from past shipments that may have value for future shipments and campaigns. This would include the provisions of advanced notification of spent fuel shipments, Highway Route Controlled Quantity shipments, high volume shipping campaigns, or other high visible shipments as agreed to by the parties.

AMERICAN OVERSIGHT

Implementation of Principles

To implement these principles, each Western Governor will:

1. Reaffirm his or her continued support for the safe transportation of TRU waste and operations of WIPP as being paramount to the expeditious cleanup and disposal of TRU waste from DOE facilities in the West and other parts of the country;

2. Agree to negotiate in good faith with DOE-CBFO the continued use of standards and procedures in the WIPP Guide for the safe and uneventful transportation of TRU waste originating in or destined for the West;

3. Corridor states shall appoint to the WGA WIPP Transportation Technical Advisory Group a Governor's representative who shall be responsible for representing the Governor and state in identifying, developing and implementing principles, procedures and agreements between the western states and the DOE-CBFO as they address the safe and uneventful transportation of shipments of TRU waste;

4. Coordinate security related activities with the DOE-CBFO for the transportation and protection of TRU waste shipments originating in or destined for the West; and

5. Provide copies of this MOA to western state agencies with instructions to coordinate their planning, programming and procedural development processes for shipment of TRU waste with the designated state representative.

To implement these principles, the Secretary of Energy will:

1. Conduct TRU waste shipments through the western states in accordance with the protocols contained in the WIPP Transportation Program Implementation Guide and TRU Waste Transportation Plan, not including shipments within the same DOE site or other TRU waste shipments as agreed to between DOE and the states;

2. Participate in and support the WGA regional planning process through the Cooperative Agreement;

3. Agree to provide to the Western Governors, through the WGA, early notification of planned shipments of TRU waste originating in or destined for the West;

4. Designate the Manager of the DOE-CBFO as the Secretary's representative to the WGA WIPP Transportation Technical Advisory Group; and

AMERICAN OVERSIGHT

5. Appoint a Security Representative to the WGA WIPP Transportation Technical Advisory Group to coordinate activities between the DOE-CBFO and the western states for the protection of TRU waste shipments originating in or destined for the West.

Review and Affirmation

To ensure that the WIPP Guide and the TRU Waste Transportation Plan reflect a current, living document, the DOE-CBFO and WGA will use a mutually agreed upon process for making revisions to these documents. These documents and their procedural components will be reviewed by WGA, the western states, and the DOE-CBFO periodically to ensure both documents continue to meet the objective that all TRU waste shipments are "safe and uneventful." The Manager of the DOE-CBFO and the Executive Director of the WGA will periodically provide assurances to the Western Governors and the Secretary of Energy that the documents "represent the standards, principles and procedures for conducting TRU waste shipments." When changes are made to the WIPP Guide or TRU Waste Transportation Plan, all relevant DOE-EM policy documents and other agreements will be reviewed and revised as appropriate to ensure consistency.

Notwithstanding the above provisions, this MOA shall not be binding on DOE shipments of nuclear weapons, nuclear weapons components, and special nuclear materials made for purposes of national security as authorized by the Atomic Energy Act or the Nuclear Waste Policy Act.

This MOA is to be reviewed and reaffirmed by the Secretary of Energy and the Western Governors within one year following the election of a new President of the United States.

AMERICAN OVERSIGHT

DRAFT – INTERNAL USE ONLY

WESTERN GOVERNORS' ASSOCIATION

Policy Resolution 2018-XX

Foreign Visitor Preclearance
Version 1

A. BACKGROUND

1. The U.S. Department of Commerce estimates that nearly ~~75~~ 76 million foreign visitors entered the country during ~~2014~~2016. The vast majority of these travelers arrived in the United States by plane.[1]

2. Tourism is a significant revenue source for western states and territories, many of which count international travelers as major contributors to state and local economies and look to international tourism to drive local employment.

3. As a result of utilizing technology such as Automated Passport Control equipment, average wait time at airport passport and immigration processing areas have declined in recent years, but still frequently exceeds 60 minutes.[2]

~~3. Arriving airline passengers sometimes experience wait times in the airport passport and immigration processing area in excess of 90 minutes.~~

4. Foreign visitor preclearance allows international travelers to be screened by U.S. Customs and Border Patrol (CBP) officers prior to boarding an international flight. This preclearance allows passengers to bypass U.S. customs stations upon arrival at an American airport.

5. The Transportation Security Administration requires passenger and property screening at foreign preclearance airports to conform with U.S. aviation security screening standards.

6. Preclearance arrangements between the U.S. and Canada began in 1952. Since that time CBP has established over 600 American law enforcement officers and agricultural specialists at 15 preclearance airports in six countries: Ireland, Canada, Aruba, The Bahamas, Bermuda and United Arab Emirates. CBP also staffs a pre-inspection facility for passenger/vehicle ferry traffic to the U.S. in Victoria, Canada.[3]

7. While there were earlier announcements in 2015 and 2016 to possibly expand the preclearance program to eleven new airports in nine countries, CBP has only concluded agreements to cover Stockholm, Sweden (signed November 4, 2016) and Punta Cana, Dominican Republic (signed December 1, 2016).[4]

---

[2] U.S. Customs and Border Protection, Airport Wait Times, https://awt.cbp.gov/
[3] U.S. Customs and Border Protection, Preclearance Locations, https://www.cbp.gov/border-security/ports-entry/operations/preclearance
[4] "DHS Announces 11 New Airports Selected For Possible Preclearance Expansion Following Second Open Season" https://www.dhs.gov/news/2016/11/04/dhs-announces-11-new-airports-selected-possible-preclearance-expansion-following

AMERICAN OVERSIGHT

~~7. On March 16, 2015, U.S. Department of Homeland Security (DHS) Secretary Jeh Johnson signed a new preclearance agreement with the government of Canada. On May 29, 2015, CBP announced its intention to expand air preclearance operations to ten additional airports in nine countries:~~

- ~~Brussels Airport, Belgium;~~
- ~~Punta Cana Airport, Dominican Republic;~~
- ~~Narita International Airport, Japan;~~
- ~~Amsterdam Airport Schipol, Netherlands;~~
- ~~Oslo Airport, Norway;~~
- ~~Madrid-Barajas Airport, Spain;~~
- ~~Stockholm Arlanda Airport, Sweden;~~
- ~~Istanbul Ataturk Airport, Turkey;~~
- ~~London Heathrow Airport, United Kingdom; and~~
- ~~Manchester Airport, United Kingdom.~~

8. In FY2017, CBP precleared more than 19 million passengers.[5]

~~8. These represent some of the busiest last points of departure to the United States – in 2014 nearly 20 million passengers traveled from these airports to the U.S.~~

9. The DHS has supported preclearance as both a security imperative – enabling CBP to identify and stop potential terror threats before they reach U.S. soil – and a strong economic opportunity.

B. GOVERNORS' POLICY STATEMENT

1. In recognition of the economic and national security benefits provided by foreign visitor preclearance, Western Governors support CBP's use of preclearance to reduce excessive wait times at American immigration and processing areas.

2. Western Governors support the efforts of DHS and CBP to increase the number of international airports and countries at which foreign visitor preclearance is used. Such expansion will streamline legitimate international travel and will further protect the safety and security of American citizens as well as international visitors.

3. Preclearance also allows smaller airports with no or few full-time CBP personnel to accept direct international flights from preclearance-approved foreign airports. Western Governors recognize the benefit this provides small or rural airports in accepting international travelers more efficiently. ~~that accept a significant number of international travelers, for instance Antonio B. Won Pat International Airport in Guam, where passengers on arriving international flights can wait 2-3 hours for visa processing.~~

4. In recognition of the benefits provided by foreign visitor preclearance, and in order to expand its use, DHS should work to complete the negotiation process with foreign countries and add new preclearance-approved international airports as soon as possible.

[5] Remarks of Acting Commissioner Kevin K. McAleenan at Press Event Marking Release of CBP's Trade and Travel Fiscal Year 2017 Report, February 13, 2018, https://www.cbp.gov/newsroom/speeches-and-statements/remarks-acting-commissioner-kevin-k-mcaleenan-press-event-marking

AMERICAN OVERSIGHT

5. Additionally DHS and CBP should work with western states to help identify optimal international foreign visitor preclearance airports for future consideration and should work with western state tourism directors to expand international travel opportunities in western states.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct WGA staff to work with Congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

DRAFT

AMERICAN OVERSIGHT

Memorandum

TO: Western Governors
FROM: Jim Ogsbury, Executive Director, Western Governors' Association
DATE: October 1, 2018
SUBJECT: Western Governors' Foundation

Background

The Western Governors' Foundation is a 501(C)(3) organization, which was established to support the Western Governors' Association. Its explicit purpose is, "to make distributions to the Western Governors' Association." In effect, the Foundation is a passive financial arm of the Association, collecting contributions from sponsors for transfer to the Association. The overwhelming majority of contributions to WGA, however, are made directly to the Association.

Dues-paying members of the Association serve as Directors of the Foundation.

Reconstruction of the Foundation

At the 2018 Annual Meeting of WGA, the Executive Committee authorized pursuit of the Foundation's reinvention as an authentic philanthropic organization, supporting the Association through "charitable, scientific, literary, or educational" activities as countenanced under Section 501(C)(3) of the Internal Revenue Code. Pursuant to this direction, WGA engaged counsel and developed the attached draft comprehensive amendments to the Foundation's Articles of Incorporation and Bylaws. Salient features of the new draft governing documents follow:

- The Foundation Board would be composed of 3-9 individuals, appointed by the Association. Although there are no proposed restrictive qualifications to Board service, we anticipate that the Board would be composed of interested current and former Western Governors.

DRAFT

AMERICAN OVERSIGHT

- To maintain the Foundation's favorable tax status and reduce administrative burden, the Foundation would be "operated, supervised or controlled" by the Association.

- Management responsibilities would be invested in a President, appointed by the Board. Currently, the Executive Director of the Association serves as the Executive Director of the Foundation.

Implementation

Reconstruction of the Foundation will involve a 3-step process:

1. An affirmative vote to adopt the revised Articles and Bylaws.
2. Resignation of current directors from the Foundation Board.
3. Appointment of new Foundation Board members by the Association.

According to counsel, the Foundation may not adopt the new governing documents by ballot. Accordingly, we hope that a quorum of Foundation directors (9) will assemble at the WGA Winter Meeting in Hawaii to consider the proposal.

In the meantime, we encourage Governors to affirmatively resign as Directors of the Foundation Board to facilitate the Foundation's reinvention. Such resignation should be made effective immediately following the reorganization vote. A draft letter of resignation is attached for your reference and use. Governors who are interested in taking an active role in the Foundation may be reappointed to the Foundation Board at a later time.

Thank you for your attention to this important matter. Please contact me if you have any questions or require further information.

DRAFT

AMERICAN OVERSIGHT

[Date]

Mr. James D. Ogsbury
Executive Director
Western Governors' Foundation
1600 Broadway
Denver, Colorado 80202

Dear Mr. Ogsbury:

I hereby resign as a Director of the Western Governors' Foundation, effective December 14, 2018.

Sincerely,

DRAFT

AMERICAN OVERSIGHT

Title: To amend the River and Harbor Act of 1958, the Reclamation Safety of Dams Act of 1978, and the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 to prevent the spread of invasive species in western waters, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Preventing Invasive Species in Western Waters Act of 2018".

SEC. 2. WATERCRAFT INSPECTION ASSISTANCE.

(a) Corps of Engineers Watercraft Inspection.—Section 104 of the River and Harbor Act of 1958 (33 U.S.C. 610) is amended—

(1) by striking subsection (b) and inserting the following:

"(b) Authorization of Appropriations.—

"(1) IN GENERAL.—There is authorized to be appropriated $110,000,000 to carry out this section for each fiscal year, of which—

"(A) $30,000,000 shall be made available to carry out subsection (d)(1)(A)(i);

"(B) $30,000,000 shall be made available to carry out subsection (d)(1)(A)(ii); and

"(C) $30,000,000 shall be made available to carry out subsection (d)(1)(A)(iii).

"(2) CONTROL OPERATIONS.—Any funds under paragraph (1) used for control operations shall be allocated by the Chief of Engineers on a priority basis, based on the urgency and need of each area and the availability of local funds."; and

(2) in subsection (d)—

(A) by striking paragraph (1) and inserting the following:

"(1) IN GENERAL.—

"(A) WATERCRAFT INSPECTION STATIONS.—In carrying out this section, the Secretary shall establish, operate, and maintain new or existing watercraft inspection stations—

"(i) to protect the Columbia River Basin;

"(ii) to protect the Upper Missouri River Basin; and

"(iii) to protect the Arkansas River Basin.

"(B) LOCATIONS.—The Secretary shall place watercraft inspection stations under subparagraph (A) at locations, as determined by the Secretary in consultation with States within the areas described in subparagraph (A), with the highest likelihood of preventing the spread of aquatic invasive species at reservoirs operated and maintained by the Secretary.

AMERICA'S OVERSIGHT

"(C) RAPID RESPONSE.—The Secretary shall assist the States within the areas described in subparagraph (A) with rapid response to any aquatic invasive species, including quagga or zebra mussel, infestation."; and

(B) by striking paragraph (3)(A) and inserting the following:

"(A) the Governors of the States within the areas described in clause (i), (ii), or (iii) of paragraph (1)(A), as applicable;".

(b) Bureau of Reclamation Watercraft Inspection.—

(1) IN GENERAL.—The Reclamation Safety of Dams Act of 1978 is amended by inserting after section 5B (43 U.S.C. 509b) the following:

"SEC. 5C. WATERCRAFT INSPECTION.

"(a) Watercraft Inspection in Reclamation States.—

"(1) IN GENERAL.—Notwithstanding section 3, the Secretary of the Interior, acting through the Commissioner of Reclamation (referred to in this section as the 'Secretary'), shall provide financial assistance, including financial assistance to establish, operate, or maintain a watercraft inspection station, under this Act to a reclamation State [(as defined in section 4014 of the Water Infrastructure Improvements for the Nation Act (43 U.S.C. 390b note; Public Law 114–322))] or an aquatic invasive species control project to prevent the spread of aquatic invasive species into and out of reservoirs operated and maintained by the Secretary if the Secretary determines that the financial assistance is—

"(A) necessary;

"(B) in the interests of the United States; and

"(C) not inconsistent with the purposes of this Act.

"(2) NON-FEDERAL INSPECTION STATIONS.—The Secretary may provide financial assistance under paragraph (1) to a reclamation State for the reclamation State to establish, operate, or maintain a non-Federal watercraft inspection station.

"(b) Cost Share.—The non-Federal share of the cost of establishing, operating, and maintaining a watercraft inspection station (including a non-Federal watercraft inspection station) under subsection (a), including personnel costs, shall be—

"(1) not less than 50 percent; and

"(2) provided by the reclamation State, or a unit of local government in the reclamation State, in which the watercraft inspection station or other project is located.

"(c) Priority.—In providing financial assistance under subsection (a), the Secretary shall give priority to a reclamation State that demonstrates the capacity to fund the watercraft inspection station in accordance with subsection (b).

"(d) Coordination.—In carrying out this section, the Secretary shall consult and coordinate with—

"(1) each of the reclamation States [(as defined in section 4014 of the Water Infrastructure Improvements for the Nation Act (43 U.S.C. 390b note; Public Law 114-322))];

AMERICAN OVERSIGHT

"(2) affected Indian Tribes; and

"(3) the heads of appropriate Federal agencies.".

(2) CONFORMING AMENDMENT.—Section 3 of the Reclamation Safety of Dams Act of 1978 (43 U.S.C. 507) is amended by striking "section 5B" and inserting "sections 5B and 5C".

SEC. 3. WATERCRAFT INSPECTION AND DECONTAMINATION.

(a) Mandatory Inspection and Decontamination.—

(1) DEFINITION OF TASK FORCE AGENCY.—In this subsection, the term "task force agency" means any Federal agency the head of which is a member of the Aquatic Nuisance Species Task Force under section 1201(b) of the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (16 U.S.C. 4721(b)).

(2) MANDATORY INSPECTION AND DECONTAMINATION.—Each task force agency may, as appropriate, conduct mandatory inspections and decontamination of watercraft to limit the movement of aquatic nuisance species (as defined in section 1003 of the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (16 U.S.C. 4702)) into, out of, or across the waters of the United States.

(b) Aquatic Nuisance Species Task Force.—Section 1201(b) of the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (16 U.S.C. 4721(b)) is amended—

(1) in paragraph (6), by striking "and" at the end;

(2) by redesignating paragraph (7) as paragraph (8); and

(3) by inserting after paragraph (6) the following:

"(7) the Director of the National Park Service; and".

(c) Aquatic Nuisance Species Program.—Section 1202 of the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (16 U.S.C. 4722) is amended—

(1) in subsection (b)—

(A) in paragraph (5), by striking "and" at the end;

(B) in paragraph (6), by striking the period at the end and inserting "; and"; and

(C) by adding at the end the following:

"(7) not later than 90 days after the date of enactment of the Preventing Invasive Species in Western Waters Act of 2018, clarify the authority of each member of the Task Force to inspect watercraft and recommend legislative or regulatory changes to eliminate existing gaps in authorities between members of the Task Force to effectively manage and control the movement of aquatic nuisance species into, out of, and across ~~[Federal land and water/~~waters of the United States~~]~~.''; and

(2) in subsection (e)(1)—

(A) in the first sentence, by inserting ", infrastructure," after "environment"; and

AMERICAN OVERSIGHT

(B) in the second sentence, by inserting "(including through the use of watercraft inspection stations)" after "aquatic nuisance species".

AMERICAN OVERSIGHT

Section 1: Short Title

"Preventing Invasive Species in Western Waters Act of 2018"

Section 2: Watercraft Inspection Financial Assistance

U.S. Army Corps of Engineers: This section directs the Secretary to establish, operate, and maintain new or existing watercraft inspection stations to protect the Columbia River Basin, the Upper Missouri River Basin, and the Arkansas River Basin. It authorizes $30,000,000 to carry out this section, and directs the Secretary to place watercraft inspection stations at locations with the highest likelihood of preventing the spread of aquatic invasive species.

Bureau of Reclamation: This section amends dam safety statute to direct the Secretary of the Interior, through the Commissioner of Reclamation, to provide financial assistance to states to establish, operate, or maintain watercraft safety inspection stations when such invasive species control projects could prevent the spread of aquatic invasive species into and out of Bureau of Reclamation reservoirs. The financial assistance could include cost-share of up to 50%, to be matched with non-federal funds. Priority for financial assistance would pbe provided to reclamation States that have the capacity to fund watercraft inspection stations.

Section 3: Mandatory Watercraft Inspection Authority

This section provides each federal agency that is a member of the Aquatic Nuisance Species (ANS) Task Force with the discretionary authority to conduct mandatory inspection and decontamination of watercraft to limit the movement of ANS into and out of U.S. waters. This section adds the National Park Service as an explicit member of the ANS Task Force and updates the statute to clarify the role of watercraft inspection stations to protect federal infrastructure. Finally, this Section requires the Task Force to report back within 90 days on other legislative or regulatory changes that would eliminate existing gaps in authorities between Task Force agencies to effectively manage and control the movement of aquatic nuisance species.

AMERICAN OVERSIGHT

DRAFT – INTERNAL USE ONLY

WESTERN GOVERNORS' ASSOCIATION

Policy Resolution 2019-XX

Cybersecurity – VERSION 1

A. BACKGROUND

1. In the age of automation, digitization, big data, artificial intelligence, and machine-to-machine learning, the United States' capabilities to prevent, detect and respond to cyberattacks are of ever-growing importance to our society. The cybersecurity of our nation is an all-of-government and industry-wide endeavor.

2. Cybersecurity is especially imperative for critical infrastructure, which includes the nation's electric grid, energy resource supply and delivery chains, finance, communications, election systems, the chemical industry, commercial facilities, critical manufacturing, defense industrial base, emergency services, food and agriculture, government facilities, healthcare and public health, information technology, transportation, and water and wastewater systems.

3. Addressing cybersecurity needs across ~~these~~ critical infrastructure sectors ~~and others~~ is further complicated by the increasing interdependency and interconnectedness of our nation's data systems to myriad of non-critical infrastructure systems and ~~the~~ a dynamic threat environment. Effective cybersecurity ~~regimes~~ programs require strategic and functional relationships and information-sharing between federal, state and local levels of government, and the public and private sectors.

4. The cybersecurity of their states and the nation is a high priority of Western Governors. State governments are responsible for securing public networks, the state's digital assets, and citizen data, as well as coordinating their cybersecurity efforts with federal agencies and potentially-affected private entities (e.g., utilities, financial institutions, transportation, and health). Governors lead efforts to plan and implement state cybersecurity programs, respond to cyberattacks, and investigate intrusions.

~~4.~~5. State election systems remain targets of foreign interference. As Governors, we remain committed to protecting our states' election systems. There is nothing more fundamental to the enduring success of our American democracy, and we take seriously our responsibility to protect the integrity and security of our elections. This is an imminent national security threat that transcends party lines. This is a matter of protecting and preserving fair elections—the underpinning of our democracy.

~~5.~~6. The Office of Management and Budget and Department of Homeland Security (DHS) May 2018 Federal Cybersecurity Risk Determination Report and Action Plan concluded that 71 of 96 federal agencies are at risk or high risk of cyber intrusions. It also determined that federal agencies are not equipped to determine how threat actors seek to gain access to their information. This deficiency results in ineffective allocations of the agencies' limited cyber resources.

Commented [BB1]: 9/17 Work Group Call. Attendees: WA. Discussed WA edits shown below.
9/24 Work Group Call: No attendees. WA provided feedback/edits on draft.
10/1 Work Group Call: No attendees.
10/2-10/3: WA and ND provided additional edits.
10/4 SAC Call: Shared V1 and broadly discussed resolution. There are no additional work group calls planned at this time. Attendees: Ak, CO, HI, ID, NM, NV, OR, SD, UT, WA, WY.

Commented [BB2]: 10/2: ND edits.

Commented [BB3]: 10/2: ND edits.

Commented [BB4]: 10/3: WA edition.

AMERICAN OVERSIGHT

NV-DA-20-0615-A-006926

~~6.~~7. Currently, there is a severe deficit of cyber workers, especially in government. Our nation cannot defend itself without a well-trained, experienced cyber workforce. The ~~private and~~ public sector~~s~~ must dedicate resources to cybersecurity education, training, and recruitment programs and encourage the private sector to do the same through effective policy.

Commented [BB5]: 9/17: WA edit.

B. GOVERNORS' POLICY STATEMENT

~~1.~~ Western Governors urge Congress to improve coordination of congressional oversight and legislative activity on cybersecurity. The federal government has a responsibility to provide adequate funding for states to meet election security needs. Western Governors encourage Congress and the Administration to work cooperatively with states in developing election security legislation and mandates, and to fully fund implementation.

Commented [BB6]: 10/3: WA edit.

~~2.~~1.

~~3.~~2. Federal agencies must engage in early, meaningful, substantive, and ongoing consultation with Governors or their designees on all aspects of cybersecurity. The federal government must also continue to clarify the roles and responsibilities of federal agencies in preventing, preparing for, and responding to cyberattacks. Centralized authority, points of contact, and formalized communication pathways are necessary to address increasingly complex threats. In addition, these pathways must occur at each level within government and other organizations.

Commented [BB7]: 9/24: Based on WA suggestion.

~~4.~~3. The increasing number and inconsistency of federal security regulations puts an unnecessary burden on state governments and is an inefficient use of often-constrained security resources. The federal government should establish a working group with representatives from states and federal agencies, as well as restore the position of the White House cybersecurity coordinator, to harmonize disparate agency regulations.

Commented [BB8]: 9/17: WA edit.

~~5.~~4. Western Governors recommend that the federal government continue the DHS State, Local, Tribal, and Territorial Engagement Program, which provides cybersecurity risk briefings and resources to Governors and other officials. The Governors also support DHS's Office of Cybersecurity and Communications, with which state chief information officers regularly interact.

~~6.~~5. The National Institute for Standards and Technology (NIST) Cybersecurity Framework and other standards can facilitate effective, consistent, and risk-based decision-making in government and industry. Real-world simulations of attacks on critical infrastructure are essential to prepare our nation for potential threats.

~~7.~~6. The federal government should use the full range of economic tools, including travel and financial sanctions, to deter cyberattacks organized or supported by nation-states.

~~8.~~7. The public and private sectors must take steps to mitigate global supply chain risks (e.g. installation of malicious software or hardware). Government and industry should also increase the cybersecurity awareness of government and private employees through training and education.

~~9.~~8. The Administration should propose, and Congress should provide, long-term authorization and sufficient appropriations for high-quality cybersecurity education and workforce development programs to grow and sustain the cybersecurity workforce. The federal government should

AMERICAN OVERSIGHT

also expand the CyberCorp: Scholarship for Service program and continue to support educational initiatives, such as NIST's Initiative for Cybersecurity Education and National Centers of Academic Excellence in Cyber Defense.

~~10.~~9. Western Governors support policies that incentivize the private sector to improve cybersecurity and share information regarding cyber threats as early as possible, including policies to improve access to information or create common standards for information-sharing. The federal government should emphasize the benefits of information-sharing, while alleviating private sector concerns with this essential communication. The federal government and states should continue to investigate liability protections, such as safe harbor provisions, for entities that report cyber intrusions.

~~11.~~10. Our nation requires innovation in detecting, preventing, and responding to continually-evolving cyber threats. More research is required to understand the use of blockchain and encryption by perpetrators and its utility for defense against cyber threats, and address vulnerabilities of other emerging technologies, including connected vehicles and Internet of Things devices. The federal government should provide funding and technical assistance for these and other types of cybersecurity research and development.

C. GOVERNORS' MANAGEMENT DIRECTIVE

1. The Governors direct WGA staff to work with congressional committees of jurisdiction, the Executive Branch, and other entities, where appropriate, to achieve the objectives of this resolution.

2. Furthermore, the Governors direct WGA staff to consult with the Staff Advisory Council regarding its efforts to realize the objectives of this resolution and to keep the Governors apprised of its progress in this regard.

Commented [BB9]: 9/24: Based on WA suggestion.

Subject: WH Invite: Opportunity Zones

Gov has been invited to a small event at the WH with POTUS on WEDNESDAY at 215p re: opportunity zones.

OZ was a program created by tax reform to allow govs to designate census tracts in their states for private investment in affordable housing and other similar projects. I know CJ has been working on it - copying Tyler who has been talking with her about it.

WH knows it's short notice and he'd need to be on a plane tomorrow eve at the latest to make it work. LMK.

IT Priorities for State Governments in 2018

In their State of the State addresses, only five governors mentioned the looming topic of cybersecurity. But security and risk management is a top priority for state government IT leaders, who gathered in Baltimore in April for the National Association of State Chief Information Officers Midyear Conference. This special report looks at what’s leading the state government IT agenda this year, including recent Route Fifty stories from Georgia and Oregon.

Subject: WTAS: Support for the Trump Administration's Approval of Opportunity Zones

THE WHITE HOUSE
Office of the Press Secretary

FOR IMMEDIATE RELEASE
April 18, 2018

WHAT THEY ARE SAYING:
SUPPORT FOR THE TRUMP ADMINISTRATION'S APPROVAL OF OPPORTUNITY ZONES

Senators

Senate Majority Leader Mitch McConnell (R-KY): "Today's Opportunity Zones announcement is another reason why tax reform is good for Kentucky families and our state's economy. Opportunity Zones will breathe new life into struggling communities left behind by Obama-era policies. From coal country to farming communities and everywhere in between, overregulation was holding our economy and our workers short of their full potential. We are getting the government's foot off the brake and letting the economy flourish."

Sen. Cory Gardner (R-CO): "Now that this legislation has been signed into law and the state of Colorado has submitted its Opportunity Zone proposals, we are close to seeing this major benefit from the Tax Cuts and Jobs Act begin to encourage needed growth in areas that have gone too long without it. Soon the United States Treasury Department will certify the Opportunity Zones and then investors will begin using the new tax provisions to invest in underserved communities and create opportunities for more Coloradans. This could mean a new timber plant in the San Luis Valley, a new small business on the Western Slope, or an agriculture processing plant on the Eastern Plains. Struggling communities in both urban and rural parts of the state will benefit."

Sen. Rand Paul (R-KY): "As a leading voice and long-time advocate for lowering the tax rate in low-income communities to spur economic development, I am pleased that Kentucky will be benefiting from the newly created Opportunity Zones. I look forward to the positive results of this initiative to incentivize more business investments to locate in these areas and provide more jobs and opportunities."

Sen. Roy Blunt (R–MO): "The Opportunity Zones program will help spur new investments in communities where they're needed most. By bringing investment incentives to underserved areas, the program will help create more jobs, drive economic growth, and improve the quality of life for families across our state. The Opportunity Zones program is another example of how tax reform is directly

AMERICAN OVERSIGHT

benefitting Missourians, and turning the page on years of slow growth and stagnant wages. I'm proud to support this program, and I'll keep working to advance pro-growth policies that will help more hardworking families get ahead."

Sen. Deb Fischer (R-NE): "For the past two weeks, I've been traveling across Nebraska and hearing about the positive proceeds from tax reform. Nebraskans are excited; they have more money in their pockets and many businesses are raising wages and giving workers bonuses. The designation of these 44 opportunity zones is another good result of the Tax Cuts and Jobs Act, which helps continue the pattern of economic growth in our local communities."

Sen. Ben Sasse (R-NE): "Nebraskans believe in dignity and in community. We want to see every neighborhood succeed and we want to tackle poverty with opportunity. Washington has a long way to go but Congress took an important step by including Opportunity Zones in the Tax Cuts and Jobs Act. It's simple: we want to celebrate the American Dream in every zip code by expanding investments in economically distressed communities."

Governors

Governor Doug Ducey (R-AZ): "We applaud this federal initiative to stimulate economic development in low-income areas. Ensuring opportunity for all Arizonans has been a focus of my administration. Arizona's economy is thriving, and we are excited to see how Opportunity Zones will build on our effort."

Governor John Hickenlooper (D-CO): "Colorado's opportunity zones can help create momentum in communities that need a little boost in their economic recovery efforts. We owe it to these areas of the state to take advantage of every potential incentive. Hopefully we will see significant dividends in the future."

Governor C.L. "Butch" Otter (R-ID): "This is a great way to drive more capital investment toward Idaho neighborhoods and communities that aren't benefiting as they should from our statewide economic growth. There are no real strings attached to this market-driven tax treatment by the feds. Nobody is dictating the kind of investments the locals should pursue to promote their own prosperity."

Governor Matt Bevin (R-KY): "The Opportunity Zones approved today by the U.S. Department of the Treasury provide one more reason for companies and businesses to consider locating in Kentucky. Kentucky will maximize this golden chance to attract economic development projects to communities most in need across the commonwealth, and the Kentucky Opportunity Zone Initiative will strengthen and rebuild both rural and urban areas. Whether along the Mississippi River in West Kentucky, throughout West Louisville's neighborhoods, or in the heart of Appalachia, these zones will spur investment, growth and community development."

Governor Charlie Baker (R-MA): "Our administration is committed to helping cities and towns in Massachusetts unlock opportunity for private investments and economic growth. This program will allow municipalities across the Commonwealth to work collaboratively with investors to pursue developments that address their individual and community needs."

Governor Rick Snyder (R-MI): "These zones have the potential to help Michiganders take advantage of the full economic development potential in all corners of the state. This is a unique opportunity for investors and promising news for eligible communities."

Governor Phil Bryant (R-MS): "Opportunity Zones in Mississippi will attract significant private sector investment, help grow our state's economy and create new jobs. This program is another business advantage existing industries and new companies will find in our state."

Governor Pete Ricketts (R-NE): "Thanks to the Tax Cuts and Jobs Act, 20 communities across Nebraska now have another tool to help attract new investment and job opportunities. This announcement builds on the positive news we've seen from companies from Nelnet to Wal-Mart, who are reinvesting their tax cuts

AMERICAN OVERSIGHT

into their workforce through higher wages and bonuses. None of this would have been possible without the great work of Nebraska's federal delegation, which unanimously supported the tax relief bill."

Governor Phil Murphy (D-NJ): "I'm pleased the Treasury Department has accepted all 169 sites I proposed last month for designation as Opportunity Zones. Now, these cities and towns will have additional means to generate economic growth throughout their respective communities and, more importantly, create economic opportunities for their residents."

Governor Mary Fallin (R-OK): "I appreciate our partnership with the U.S. Department of Treasury in making these designations. The creation of federal opportunity zones will bring new and unique opportunities to both investors and Oklahoma communities. Investors have different projects in which they are willing to invest their capital, and it is our intent to provide them with a range of opportunities. With the potential investments in these areas, we hope that poverty will be reduced, our communities will see revitalization, and that the investments will spur job creation. I also want to acknowledge the Oklahoma Department of Commerce for its work in coordinating this effort."

Governor Scott Walker (R-WI): "With our newly designated Economic Opportunity Zones, Wisconsin's thriving businesses will have a new opportunity to invest in their neighbors and help our local communities. Right now, more people are employed in our state than ever before in our history, and Wisconsin is at near record lows for unemployment. These recommendations reach communities across our state – urban, rural, and tribal – that are positioned for strong and sustained growth."

Governor Ricardo Rosselló (D-PR): "These zones are created to foster investment in the nation's disadvantaged communities. New investments in Opportunity Zones can receive preferential tax treatment, which will, in turn, be a boost to our economy."

Governor Kenneth Mapp (I-VI): "These new incentives can help us attract new investments in hotel development, retail businesses and industry in our most underserved communities and can also help those looking to rebuild after the hurricanes."

State Leaders & Officials

Colorado Department of Local Affairs Executive Director Irv Halter: "The Department of Local Affairs was eager to be a part of the Opportunity Zone program promoting economic development and assistance in distressed communities. The ability to provide affordable housing and economic growth to underserved populations, allows us to strengthen Colorado communities."

Colorado Office of Economic Development and International Trade Director of Business Funding and Incentives Jeff Kraft: "By working closely with local communities and investors and balancing need along with potential opportunity, we've selected areas of the state that are ripe for meaningful investment."

Idaho Department of Commerce Director Bobbi-Jo Meuleman: "As the lead economic development agency for the State, I am excited about the potential this program could have in stimulating new investments across all areas of Idaho."

Kentucky Cabinet for Economic Development Secretary Terry Gill: "Through the Kentucky Opportunity Zone Initiative, we want to bring all our cabinet's resources and knowledge to the table and partner with communities to take full advantage of these designations. Success in this initiative will improve the long-term economic wellbeing of individuals and communities within these zones across the commonwealth."

Kentucky Cabinet for Economic Development Executive Officer Vivek Sarin: "We see unparalleled prospects that can develop from this initiative, so we're working to ensure Kentucky's Opportunity Zones stand out as the most competitive and attractive in the nation."

Kentucky Senate President Robert Stivers (R): "With the designation of these new Opportunity Zones, communities most in need across our commonwealth will have a means to attract investments that create

jobs, build infrastructure and increase both tax local revenue and overall economic prosperity. The Kentucky Opportunity Zone Initiative holds the promise of creating a significant and widespread positive impact for Kentuckians. I look forward to the development of these Opportunity Zones and the long-term prosperity they will bring to our state."

Kentucky House Speaker Pro Tempore David Osborne (R): "Through these federal designations, the Kentucky Opportunity Zone Initiative can attract capital investments for a broad range of development projects. What this means is lower-income and distressed communities in Opportunity Zones across Kentucky stand to see new jobs created and their economies significantly improved through a variety of potential commercial, industrial, housing, infrastructure and other investment projects."

Michigan State Housing Development Authority Executive Director Earl Poleski: "The benefits can be combined with other incentives such as New Market Tax Credits (NMTC), Low-Income Housing Tax Credit (LIHTC) and historic rehabilitation tax credit, adding a valuable tool for economic and community development."

Mississippi Development Authority Executive Director Glenn McCullough, Jr.: "Global companies know the advantages of the state's productive workforce coupled with our superior business climate. By adding Qualified Opportunity Zones, investing in Mississippi becomes an even more logical business decision for companies looking to locate or expand in our state."

Nebraska Department of Economic Development Director Dave Rippe: "We would like to thank our federal delegation for their work in passing the Tax Cuts and Jobs Act, which made the opportunity zones program a reality. We're eager to begin working with our communities to harness this program to its full potential to grow Nebraska. We also appreciate the support of the numerous local leaders who submitted program applications. Their commitment to the economic well-being of their communities is an invaluable asset to our state."

Oklahoma Native American Affairs Secretary Chris Benge: "We are pleased with the representation in the tribal nations. These tracts will provide a range of opportunities for investors to collaborate with many of the tribal nations and the state of Oklahoma."

Oklahoma Department of Commerce and Tourism Secretary Deby Snodgrass: "Our expectation is that the benefit from these designations will spill over into other census tracts, and will impact development and incomes in nearby neighborhoods as well."
