RE: ICE FOIA Case Number 2020-ICFO-29037

Dear Mehreen Rasheed:

This letter is the final response to your Freedom of Information Act (FOIA) request to U.S. Immigration and Customs Enforcement (ICE), dated March 20, 2020. You have requested various records pertaining to ICE Health Service Corps Quality Improvement Audits, inspection reports and action plans for several detention and correctional centers. ICE has considered your request under the FOIA, 5 U.S.C. § 552.

A search of the ICE Enforcement and Removal Operations (ERO) for records responsive to your request produced 2966 pages and 3 excel spreadsheets that are responsive to your request. After review of those documents, I have determined that 1,032 pages will be released in their entirety. Portions of 1,934 pages will be withheld pursuant to Exemptions of the FOIA as described below.

ICE has applied Exemption 5 to protect from disclosure intra-agency documents that contain the recommendations, opinions, and conclusions of agency employees. The disclosure of these communications would discourage the expression of candid opinions and inhibit the free and frank exchange of information and opinions among agency personnel on important agency decision-making by having a chilling effect on the agency's deliberative process.

FOIA Exemption 5 protects from disclosure those inter- or intra-agency documents that are normally privileged in the civil discovery context. The three most frequently invoked privileges are the deliberative process privilege, the attorney work-product privilege, and the attorney-client privilege. After carefully reviewing the responsive documents, I have determined that portions of the responsive documents qualify for protection under the deliberative process privilege, the attorney-client privilege, and the attorney work-product privilege. The deliberative process privilege protects the integrity of the deliberative or decision-making processes within the agency by exempting from mandatory disclosure opinions, conclusions, and recommendations

AMERICAN OVERSIGHT

included within inter-agency or intra-agency memoranda or letters. The release of this internal information would discourage the expression of candid opinions and inhibit the free and frank exchange of information among agency personnel. The attorney work-product privilege protects documents and other memoranda prepared by an attorney in contemplation of litigation. The attorney-client privilege protects confidential communications between an attorney and his client relating to a legal matter for which the client has sought professional advice. It applies to facts divulged by a client to his attorney, and encompasses any opinions given by an attorney to his client based upon, and thus reflecting, those facts, as well as communications between attorneys that reflect client-supplied information. The attorney-client privilege is not limited to the context of litigation.

ICE has applied FOIA Exemptions 6 and 7(C) to protect from disclosure the names, e-mail addresses, and phone numbers of DHS employees contained within the documents.

FOIA Exemption 6 exempts from disclosure personnel or medical files and similar files the release of which would cause a clearly unwarranted invasion of personal privacy. This requires a balancing of the public's right to disclosure against the individual's right to privacy. The privacy interests of the individuals in the records you have requested outweigh any minimal public interest in disclosure of the information. Any private interest you may have in that information does not factor into the aforementioned balancing test.

FOIA Exemption 7(C) protects records or information compiled for law enforcement purposes that could reasonably be expected to constitute an unwarranted invasion of personal privacy. This exemption takes particular note of the strong interests of individuals, whether they are suspects, witnesses, or investigators, in not being unwarrantably associated with alleged criminal activity. That interest extends to persons who are not only the subjects of the investigation, but those who may have their privacy invaded by having their identities and information about them revealed in connection with an investigation. Based upon the traditional recognition of strong privacy interest in law enforcement records, categorical withholding of information that identifies third parties in law enforcement records is ordinarily appropriate. As such, I have determined that the privacy interest in the identities of individuals in the records you have requested clearly outweigh any minimal public interest in disclosure of the information. Please note that any private interest you may have in that information does not factor into this determination.

ICE has applied FOIA Exemption 7(E) to protect from disclosure internal agency case numbers contained within the document.

FOIA Exemption 7(E) protects records compiled for law enforcement purposes, the release of which would disclose techniques and/or procedures for law enforcement investigations or prosecutions or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law. I have determined that disclosure of certain law enforcement sensitive information contained within the responsive records could reasonably be expected to risk circumvention of the law. Additionally, the techniques and procedures at issue are not well known to the public.

AMERICAN OVERSIGHT

You have a right to appeal the above withholding determination. Should you wish to do so, you must send your appeal and a copy of this letter, within 90 days of the date of this letter following the procedures outlined in the DHS FOIA regulations at 6 C.F.R. Part 5 § 5.8. You may submit your appeal electronically at GILDFOIAAppeals@ice.dhs.gov or via regular mail to:

U.S. Immigration and Customs Enforcement
Office of the Principal Legal Advisor
U.S. Department of Homeland Security
500 12th Street, S.W., Mail Stop 5900
Washington, D.C. 20536-5900

Your envelope and letter should be marked "FOIA Appeal." Copies of the FOIA and DHS regulations are available at www.dhs.gov/foia.

Provisions of FOIA allow DHS to charge for processing fees, up to $25, unless you seek a waiver of fees. In this instance, because the cost is below the $25 minimum, there is no charge.

If you need any further assistance or would like to discuss any aspect of your request, please contact the FOIA office and refer to FOIA case number **2020-ICFO-29037**. You may send an e-mail to ice-foia@ice.dhs.gov, call toll free (866) 633-1182, or you may contact our FOIA Public Liaison, Fernando Pineiro, in the same manner. Additionally, you have a right to right to seek dispute resolution services from the Office of Government Information Services (OGIS) which mediates disputes between FOIA requesters and Federal agencies as a non-exclusive alternative to litigation. If you are requesting access to your own records (which is considered a Privacy Act request), you should know that OGIS does not have the authority to handle requests made under the Privacy Act of 1974. You may contact OGIS as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

Sincerely,

Joshua J. Fahrnkopf
Supervisory Paralegal Specialist

Enclosure: 2966 pages and 3 excel spreadsheets

Sick Call Review - Review Complete

Number of sick call encounters reviewed.	25.00
Number of sick call encounters where the encounter was the third time that the patient has complained about the same issue.	5.00
Of the sick call encounters where the encoutner was the third time that the patient has complained about the same issue, how many were referred to a provider?	4.00
Number of sick call encounters with a full set of vitals including pain raiting and weight.	25.00
Number of sick call encounters with a pain scale greater than 0.	15.00
Of the sick call encounters with a pain scale greater than 0, how many indicated that the pain was addressed?	15.00
Number of sick call encounters where nursing protocols/guidelines are referenced by name in the documentation.	7.00
Number of sick call encounters where the reason is documented in the "Reason" field.	24.00
Number of sick call encounters where the reason for the visit was from an approved category.	24.00
Number of sick call encounters addressed by a nurse.	23.00
Of the sick call encounters addressed by a nurse, how many followed the SOAP format of documentation with appropriate nursing diagnosis?	23.00
Findings	(b)(5)
Deliverables	NO DATA

AMERICAN OVERSIGHT

Sick Call Observations - Review Complete

Does the facility have a defined process in place addressing sick call services?	Yes
Is the facility using a team-based approach for sick call?	Yes
Was sick call offered to detainees in segregation	Yes
For detainees that were not seen in segregation, is there a documented note in the medical record?	Yes
Findings	No descrepancies. Sick call was performed efficiently and provided the detainee with education on his condition.
Deliverables	NO DATA

MHU 23 Hour Observation Review - Review Complete

Number of MHU 23 hour observation records reviewed.	
Number of MHU 23 hour observation records with admission encounters.	0.00
Number of MHU 23 hour observation records with discharge encounters.	0.00
Number of MHU 23 hour observation records with mental health and physical conditions with provisional diagnosis provided on admission.	0.00
Number of MHU 23 hour observation records with telephone order admission.	0.00
Number of MHU 23 hour observation records with telephone order admission that were signed by a provider within 48 hours.	0.00
Number of MHU 23 hour observation records labeled "Observation".	0.00
Findings	NO DATA
Deliverables	NO DATA

MHU Full Admission - Review Complete

Are all patients within sight or hearing of a qualified health professional?	N/A - See findings below.
Number of nurses in the MHU at time of observation.	0.00
Number of patients in the MHU at time of observation.	0.00
Number of MHU full admission records reviewed.	25.00
Number of MHU full admission records with admission encounters.	22.00
Number of MHU full admission records with discharge encounters.	16.00
Number of MHU full admission records with mental health and physical conditions with provisional diagnosis provided on admission.	14.00
Number of MHU full admission records with no PE within the past year.	0.00
Of the MHU full admission records with no PE within the past year, how many had a PE completed during MHU admission?	0.00
Number of MHU full admission records with acuity level assigned.	23.00
Number of MHU full admission records with all medications placed on pill line.	25.00
Number of MHU full admission records with 24 hour chart reviews everyday.	23.00
Number of MHU full admission records for patients in segregation for medical overflow.	16.00
Of the MHU full admission records for patients in segregation for medical overflow, how many records indicate that the patients were rounded on according to MHU policy?	15.00
Number of MHU full admission records with a nursing care plan.	25.00
Of the MHU full admission records with a nursing care plan, how many records indicate that the plan was addressed and reviewed daily?	24.00
Number of MHU full admission records where patient education was provided daily (e.g., admission education, daily plan of care).	24.00

AMERICAN OVERSIGHT

Number of MHU full admission records with mental health diagnoses.	14.00
Of the MHU full admission records with mental health diagnoses, how many records indicate that the patient was assessed on initial admission, re-evaluated in seven days, and every seven days thereafter?	14.00
Number of MHU full admission records without mental health diagnoses.	11.00
Of the MHU full admission records without mental health diagnoses, how many records indicate that the patient was assessed every 30 days?	0.00
Findings	9- no discharge encounter 2- no 24 hour chart check 2- no acuity level 3- no admission encounter 1- no daily nursing check
Deliverables	NO DATA

Suicide Watch Review - Review Complete

Number of suicide watch records reviewed.	10.00
Number of suicide watch records where the patient was evaluated for suicide risk by a mental health profession or physician within 24 hours of being placed on suicide watch.	10.00
Number of suicide watch records where the patient was assessed to determine if a suicide smock was medically indicated.	10.00
Number of suicide watch records where the need for finger foos was annotated.	10.00
Number of suicide watch records where a daily mental health assessment was conducted and documented by a mental health or mid-level provider.	10.00
Number of suicide watch records where the patient was released from suicide watch by a mental health provider or physician.	10.00
Number of suicide watch records where a suicide risk assessment was conducted prior to release from suicide watch.	10.00
Number of suicide watch records where checks were conducted and documented at least every eight hours by clinical staff.	10.00
Number of suicide watch records where checks were conducted and documented at least every 15 minutes by custody staff (IHSC form uploaded and within record).	7.00
Findings	This reviewer only found 10 suicide charts. 3/10 charts did not have the custody form scanned into eCW
Deliverables	NO DATA

AMERICAN OVERSIGHT

Suicide Watch Observation - Review Complete

Number of patients on suicide watch.	0.00
Number of patients on suicide watch with nursing assessment performed within the past 8 hours.	0.00
Number of patients on suicide watch with 15 minute checks being performed on a staggered schedule.	0.00
Number of patients on suicide watch with an assessment by a mental health or mid-level provider within the last 24 hours.	0.00
Number of patients on suicide watch with restrictive environment compliant with current orders (e.g., smock, finger food, activity, etc).	0.00
Findings	- There were no patients on suicide watch during the site assessment, they had one detainee on mental health observations. It was discovered one detainee was ordered 30 minute mental health observation which is against IHSC OM 16-002.
Deliverables	(b)(5)

Hunger Strike - Review Complete

Number of hunger strike records reviewed.	1.00
Number hunger strike records with I&O's tracked via eCW flowsheet (approved eCW form included).	0.00
Number of hunger strike records which indicate that the patient was educated with documentation on the adverse effects of a hunger strike.	1.00
Number of hunger strike records which indicate that the patient was evaluated by a mental health provider.	1.00
Number of hunger strike records with complete orthostatic vital signs, height, weight, urinalysis, mental health evaluation, and physical assessment during the initial evaluation.	0.00
Number of hunger strike records with orthostatic vital signs including weight taken every 24 hours.	0.00
Number of hunger strike records that were discontinued by the Clinical Director or a physician.	1.00
Number of hunger strike records with special needs.	1.00
Of the hunger strike records with special needs, how many records indicate that the needs were addressed?	1.00
Findings	This reviewer only found one hunger strike chart. The chart did not have consistent tracking of I/O's. I did not find the IHSC Form 839 scanned in to the chart or the electronic version. The following are not negative findings: The chart did not have initial orthostatic vitals signs noted because the detainee refused (refusal form noted in chart). The detainee refused labs (refusal forms noted in chart).

Segregation - Review Complete

Number of segregation records reviewed.	25.00
Number of segregation records that indicate the patient was medically cleared for segregation.	25.00
Number of segregation records where daily segregation rounds by nursing are documented.	23.00
Number of segregation records where the patient was offered sick-call services daily (typically offered during rounds).	25.00
Number of segregation records where the patient's mental health status was evaluated at least every 30 days.	25.00
Number of segregation records where the patient was seen weekly by mental health.	25.00
Findings	NO DATA
Deliverables	NO DATA

After Hours Medication Review - Review Complete

Number of after hours medication records reviewed.	5.00
Number of after hours medication records with the patient's identification number documented.	5.00
Number of after hours medication records with medication order(s) documented in eCW.	5.00
Number of after hours medication records that were generated by a nurse as a telephone order.	4.00
Number of after hours medication records that were generated by a nurse as a telephone order and were signed by a provider.	4.00
Does the pharmacy have a reconciliation process?	Yes
Does the pharmacy follow the reconciliation process?	Yes
Findings	- 1 chart was ordered by and given by a NP. - Log did nto include detainees first and last names
Deliverables	(b)(5)

AMERICAN OVERSIGHT

After Hours Medication Observation - Review Complete

Is a medication log in place and reflective of quantities of medication stored in the night cabinet?	Yes
Do line entries contain the date, time, patient name, alien number, medication name, and quantity removed?	Yes
Are after hours medication orders documented as dispensed in eCW?	Yes
Is the night cabinet, clean, stocked, and organized?	Yes
Is the night cabinet reviewed three times per week?	Yes
Are medications in the night cabinet within their use date (i.e., not expired)?	Yes
Findings	No Findings - Cabinet was very well organized, meds easy to find. Documentation is clear and easy to follow.

AMERICAN OVERSIGHT

Language Access Review - Review Complete

Number of language access records reviewed.	25.00
Number of records where the patient was asked what language they speak.	23.00
Number of records where the patient's primary langauage or languag of choice is documented in their medical record.	23.00
Number of records where the translator use was addressed and documented (interpreter name or number, and language).	8.00
Reasons for why a translator was not used.	Out of the 25 charts reviewed for language access purposes, 8 documented use of a translato, and provided translator name or number. For the 17 that did not use a translator, they all documented why a translator was not used. Following are the reasons that were provided: 1. provider fluent in detainee's language 2. not applicable/patient speaks English
Findings	Out of the 25 charts reviewed, two (2) did not document that the detainee was asked what language they speak, and/or did not document detainee's primary language/language of choice.
Deliverables	NO DATA

Language Access Observations - Review Complete

Are the "I Speak" posters and pocket guides readily available and posted in the clinic?	NO DATA
Does the facility have a process in place to address accessing sign language interpreters and telecommunication (TDD/TTY) for individuals with hearing disabilities?	NO DATA
Findings	"I Speak" 8x10 posters in all patient exam rooms and intake areas. - Facility has sign language process available; however, some staff were not aware of the process; however, they knew to contact AHSA or HSA if the need raised.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Diagnostic Services - Review Complete

Are on-site diagnostic services (laboratory and radiology) certified or licensed to provide those services?	Yes
Is there a procedure manual for each service provided?	Yes
Does each manual include protocols for the calibration of testing devices to ensure accuracy.	Yes
Is there a current certificate for CLIA-waived testing?	Yes
Are all aspects of the CLIA-waived standards addressed by written policy and defined procedures?	Yes
Are invoices from LabCorp or other radiology companies reconciled?	Yes
Are radiation signs posted on all doors leading to areas with radiation producing equipment?	Yes
Are radiation exposure reports reviewed quarterly?	Yes
Are staff seen wearing dosimeter badges while performing radiography services or while working in an area with radiation producing equipment?	Yes
Are staff dosimeter badges and controls stored in a central location and not near a radioactive source?	Yes
Are there safety checks for biomedical and diagnostic equipment?	Yes
Findings	No Findings - Lab is well organized and staff are knowledgeable about the processes and procedures for the lab and radiology.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Log Books - Review Complete

Number of refridgerator temperature logs reviewed.	3.00
Number of refridgerator temperature logs that are up to date.	3.00
Number of refridgerator temperature logs that are out of range.	0.00
Of the refridgerator temperature logs that are out of range, how many logs have documentation of action taken?	0.00
Are the sharps counts accurate?	Yes
Are two signatures present for each shift change on the sharps counts?	Yes
Are the narcotic counts accurate?	Yes
Are two signatures present for each shift change on the narcotics counts?	Yes
Are the crash cart/bag and AEDS checked daily and on every shift?	Yes
Are cleaning logs present in the MHU and up to date?	Yes
Findings	- Pharmacy refrigerator temperature is not recorded on weekends or holidays as no pharmacy staff are working and current thermometer does not record multiple days temperature. - Hemmoult control log was not in use. - U/A Daily controls were not being performed, it was being performed when a new box was opened.
Deliverables	(b)(5)

AMERICAN OVERSIGHT

Daily Assignment Sheets - Review Complete

Number of daily assignment sheets reviewed.	3.00
Number of daily assignment sheets completed and archived .	3.00
Number of daily assignment sheets with one emergency team identified per shift.	0.00
Number of daily assignment sheets with appropriate scheduling changes (staffing, leave, call outs, etc).	3.00
Number of daily assignment sheets with clinic inspection completed and signed.	0.00
Are detainee referrals documented?	Yes
Findings	(b)(5)
Deliverables	(b)(5)

AMERICAN OVERSIGHT

Shift Reports and Time Cards - Review Complete

Are reports held on time?	Yes
Is there at least one representative from each department?	Yes
Is there a time card for each contract employee?	Yes
Are lunch hours reflected on the time card?	Yes
Are written changes verified (initials, signature) by the HSA or AHSA(s)?	No - See findings below.
Findings	The adjustments to time are submitted via email by the employee to the HSA/AHSA and approval or denial is sent sent back with cc to the AA. The employee annotates what is approved on their e-timesheet. The printout from the timeclock does not have annotation of approved changes.
Deliverables	(b)(5)

Personnel Files - Review Complete

Number of PHS officer personnel files reviewed.	2.00
Number of federal civil service employee personnel files reviewed.	0.00
Number of contractor personnel files reviewed.	8.00
Does the facility have a process for tracking requirements electronically?	Yes
Is the "electronic tracker" up to date and complete?	Yes
Is all current malpractice insurance information for contractors up to date?	Yes
Of all personnel file records reviewed, how many records are for priveleged staff (physician, psychiatrist, psychologist, dentist, and social worker)?	3.00
Of the personnel file records for priveleged staff, how many are current?	3.00
Number of personnel files with current and signed Health and Ability form.	10.00
Number of personnel files with a signed statement of confidentiality (one time).	10.00
Number of personnel files with a signed statement of risks and responsibility (one time).	10.00
Number of personnel files with a signed statement of acknowledgement of understanding of local, national, and residential standards (one time).	10.00
Number of personnel files with a signed release of information form (one time).	10.00
Findings	- Dates were annotated with a line versus actual dates
Deliverables	(b)(5)

AMERICAN OVERSIGHT

Credentialing Files- Review Complete

Number of PHS officer credentialing files reviewed.	2.00
Number of federal civil service employee credentialing files reviewed.	0.00
Number of contractor credentialing files reviewed.	8.00
Does the facility have a process for tracking requirements electronically?	Yes
Is the "electronic tracker" up to date and complete?	Yes
Number of credentialing files with health statements.	10.00
Number of credentialing files with current, valid, and unrestricted license.	9.00
Number of credentialing files with license primary source verification.	9.00
Number of credentialing files with documentation of primary education.	9.00
Number of credentialing files with education primary source verification.	0.00
Number of credentialing files reviewed for physicians or psychiatrists.	1.00
Number of physician or psychiatrist credentialing files with documentation of residency.	0.00
Number of credentialing files reviewed for board certified physicians or psychiatrists.	1.00
Number of board certified physician or psychiatrist credentialing files with documentation of board certification.	1.00
Number of credentialing files with a curriculum vitae or resume.	10.00
Number of PHS officer credentialing files with at least two years of evaluations (COERS).	2.00
Number of credentialing files with documented past or pending actions against a practitioner's license.	0.00
Number of credentialing files with current National Provider Data Bank information.	3.00
Number of credentialing files with scope of practice.	8.00
Number of credentialing files with personnel actions (positive or negative).	0.00

AMERICAN OVERSIGHT

Number of credentialing files with positive personnel actions (awards, recommendations, letters of appreciatio, etc).	0.00
Number of credentialing files with negative personnel actions (letter of counseling, etc).	0.00
Number of credentialing files with a competency assessment or peer review.	8.00
Number of peer reviews reviewed.	1.00
Number of peer reviews completed per local policy (clinical performance, appropriate use of resources, technical skills, clinical judgment, performance improvement activites).	1.00
Number of peer reviews with corrective actions.	0.00
Number of peer reviews with corrective actions addressed.	0.00
Findings	- 1 file was MRT (no license required) - Only 1 CV had any indication of being revised within last year. - Only 3 files required NPD - Only 8 files required Scope of Practice - 1 MD was missing current peer review - Electronic Tracker system is identified as Best Practice.
Deliverables	NO DATA

Grievances

Evaluation Method:	Observation	
Items to Review *(review 100% during past year)*	**Yes, No, or N/A**	**Comments**
1. Have there been any medical grievances reported through QI/JIC/CRCL/DRIL *(if so, provide type in comment section)*	Yes	CRCL - all addressed in timely manner
2. Is there a local procedure (SOP) for managing grievances?	Yes	LOP 302 Medical Grievance Mechanisms
3. Is there an identified grievance officer?	Yes	CDR Spady-Grove
4. Is the log book kept and up to date?	Yes	
5. Were all Grievances addressed in a timely manner?	Yes	
6. Number of Formal/Informal grievances: 18 / 0		

Findings/ Recommendations:	. No trends noted
Deliverables:	**N/A**

ON-SITE OBSERVATIONS

During site observations, the reviewers should observe staff members carrying out the task, interview staff, review medical records and review supporting documents (i.e. logs, minutes, binders, electronic trackers, etc.).

Medication Administration (Observations-Onsite Review)

Question (10 ENCOUNTERS)	Improvement Plan(1,2, or3)	Comments
Is pre-pouring occurring? **(Be sure to observe more than one nurse on multiple shifts) Level 2@100%**		No 10/10
Are nurses adhering to the six rights of medication administration (right patient, right drug, right route, right dose, right time, and right documentation)? **Level 2 @100%**		Yes 10/10
Are mouth checks being conducted with every administration? Observe 10patients(if possible) on multiple shifts **Level 1 @80%**		Yes 10/10
Are all entries in the MAR complete (allergies, staff initials, etc.)? Observe 10 different MAR; **Level 1 @80%**		Yes 10/10
Are nurses documenting the medication administration immediately after The medication is administered**? Level 2 @100%**		Yes 10/10
Number of all medication refusals documented on the MAR/eMAR **Denominator**		8

AMERICAN OVERSIGHT

Of the identified medication refusals from the MAR, how many refusals did have an accompanying signed refusal form? **Level 2@90%** .		8 of 8 100%
Of the identified high risk medication refusals, how many times were providers NOT notified of the refusal in eCW **Level 1 @100%; See guide on ECW notification**		None

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-000028

Emergency Preparedness and Response

Question	Improvement Plan(1,2, or3)	Comments
Is there documentation showing completed date and time of man-down drills (once per month for each operating shift)? Refer to guide: **level1@90%** Is there documentation showing completed date and time of fire drills (once a quarter for each operating shift)? Refer to guide **level 1 @90%** Is there documentation showing completed date and time of mass casualty drills * (each shift should have a complete drill with in a three year period)? *Table top/mock drills are acceptable replacements for drills not conducted facility wide Refer to guide: **level 1 @90%** Are clinic staff trained on emergency equipment (AED, first Aid kits, fire extinguisher, etc?) Yes/No **level1@90%**		YES 100% Yes Yes Yes Yes
Do emergency scenarios vary? Yes/No?? **Level100%ifNo**		YES 100% Yes
Is the difference between a drill and an actual event evident in the write-up?): **Level 1 @100%**		YES 100% Yes
Is there process in place to distribute "an after-action report to all staff**?** **Level 1 @90%:**		YES 100% Yes
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event? **Level 1 @100%**		YES 100% Yes
Comments:	None

After Hours Medication Chart Review - Review Complete

How many after hours medication log records were reviewed?	6
Of the after hours med log records reviewed, how many records documented the patient's identification number?	6
Of the after hours med log records reviewed, how many records were generated by a nurse as a telephone order?	1
Of the records generated by a nurse as a telephone order, how many were signed by a provider within 24 hours of return for next work shift?	1
Is an After-Hours Cabinet (AHC) medication sign out log in place for the documentation of medications removed?	Yes
Is all the necessary information entered into the fields of the AHC sign out log?	Yes
After Hours Medication Chart Review Findings	5 out of the 6 meds reviewed had an order in the system by the provider. Thus, a telephone encounter was not needed. One of the 6 orders was not documented in the chart via TE to the provider.
After Hours Medication Chart Review Deliverables	Recommendation (b)(5) (b)(5)

After Hours Medication Observation - Review Complete

Is a medication log in place and reflective of quantities of medication stored in the night cabinet?	Yes
Do line entries contain the date, time, patient name, alien number, medication name, and quantity removed?	Yes
Is the after hours verbal medication order entered into eCW by the prescriber upon return to duty?	Yes
Is the after hours medication administration properly documented on the MAR or in the electronic health record?	No
Is the night cabinet, clean, stocked, and organized?	Yes
	Yes

AMERICAN OVERSIGHT

Is the After-Hours Cabinet physically inspected (by pharmacist or designee) on a monthly basis to ensure the absence of expired, recalled or deteriorated medications?	
After Hours Medication Encounters Findings	Log does not reflect the time that the medication was removed, but it has all other qualifiers (date, name, A#, med, and quanity removed). Medication is not noted in eCW via a telephone encounter. Site is currently using sMARt. Reeconsiliation is performed weekly by pharmacy, but not annotated on log. One of nine entries was not initiated by the nurse and created a missed dose.
After Hours Medication Encounters Deliverables	1. Update log to include the time that the medication was removed. Provide updated log to RHSA by 10/01/2019. (b)(5) (b)(5)

Chronic Care Chart Review - Review Complete

How many chronic care records were reviewed?	25
Of the chronic care records reviewed, how many had a PE--Complex completed within two business days?	24
Of the chronic care records reviewed, how many had chronic conditions properly documented in eCW Problem List?	24
Of the chronic care records reviewed, how many detainees arrived at the facility on chronic medications?	14
Of the chronic care records with medications, how many encounters indicated that medications were continued as clinically indicated??	13
Of the chronic care records reviewed, how many detainees had psychiatric medications?	3
Of the chronic care records with psychiatric medications, how many encounters indicated that the detainee was seen by an MD or MLP every 30 days for medication assessment or review?	3
Of the chronic care records with psychiatric medications, how many encounters indicated that the detainee was seen by an MD or psychiatrist every 90 days for chronic care management?	0
Of the chronic care records reviewed, how many chronic care patients were identified as stable?	3
Of the stable chronic care patients, how many encounters indicated that the detainee was seen within 90 days?	3
Of the chronic care records reviewed, how many chronic care patients were identified as unstable?	16
	16

AMERICAN OVERSIGHT

Of the unstable chronic care patients, how many encounters indicated that follow-up appointments were scheduled earlier than 90 days ?	
Of the chronic care records reviewed, how many had a global alert (IHSC 834 or electronic equivalent) completed?	11
Chronic Care Records Findings	1 of the 25 detainees did not have a PE within 2 days of arrival to facility. 1 of the 25 did not have an updated problem list. 14 of the 25 arrived on medications. 13 of the 14 continued medications as clinically indicated. 11 detainees were not on medications prior to coming to facility. 3 of the 25 were not on medications prior to coming to facility. 3 of the 25 were seen by a MD or APP every 30 days for medication review. This did not apply to the other 22. Of the 25 records reviewed none of the detainees required a visit with a psychiatrist or MD for chronic care management of psychatric medications. Most were not at facility for the full 90 days. 3 out of 25 detainees were seen within 90 days for chronic care management. 16 of the 25 detainees were seen more frequently than 90 days. 11 of the 25 detainees had a global alert set and 14 did not.
Chronic Care Records Deliverables	(b)(5)

Chronic Care Observation - Review Complete

How many chronic care encounters were observed?	7
Of chronic care encounters observed, how many were considered stable patients?	6
Of the stable patients observed, how many were completed within the appropriate timeframe?	7
Of chronic care encounters observed, how many were considered unstable patients?	1
Of the unstable patients observed, how many were completed within the appropriate timeframe?	1
Of the chronic care encounters observed, how many had a treatment plan?	7
Chronic Care Encounters Findings	1) BEST PRACTICE: Provider chronic care visits are based on the primary provider model. Provider primary care model is based on the last two A#'s. 2) One APP is missing from the list. Review of workloads support that the O-5 billeted APP dooes not have an active caseload.
Chronic Care Encounters Deliverables	1. Site to update the APP distribution list to include all APPs by 09/21/2019 and forward plan to RHSA for review. 2. HSA to monitor staff workloads and provide APP daily averages for workloads for the month of August. Submit to RHSA by 11/01/2019.

AMERICAN OVERSIGHT

Consent Forms Chart Review - Review Complete

How many consent forms were reviewed?	25
Of the consent forms reviewed, how many were general consent forms?	25
Of the general consent forms reviewed, how many were complete?	25
Of the consent forms reviewed, how many were dental consent forms?	11
Of the dental consent forms reviewed, how many were complete?	11
Of the consent forms reviewed, how many were psychotropic consent forms?	2
Of the psychotropic consent forms reviewed, how many were complete?	2
Consent Forms Findings	None
Consent Forms Deliverables	None

Daily Assignment Sheets - Review Complete

How many daily assignment sheets were reviewed?	20
Of the daily assignment sheets reviewed, how many were archived appropriately?	20
Of the daily assignment sheets reviewed, how many had at least one emergency team identified per shift?	6
Daily Assignment Sheets Findings	The facility does not complete the assignments sheets to include emergency teams consistently. While at site reported that they use badges to provide a visual of who is on emergency response teams. Great idea, but is not consistently being used. Staff report is not used to inform team of assignments so only a few staff were able to state who the responders were for the day. Daily assignmments are saved each shift into PDF docs on the shared drive, but are not updates to reflect call out or AL. There does not appear to be a review by the administrative team prior to being stored. Nursing board is a best practice.
Daily Assignment Sheets Deliverables	(b)(5)

AMERICAN OVERSIGHT

Diagnostic Services - Review Complete

Are laboratory services provided in adherence with CLIA Waived testing?	Yes
Is there a current certificate for CLIA-waived testing?	Yes
Are radiation signs posted on all doors leading to areas with radiation producing equipment?	Yes
Is there documentation of a quarterly (monthly for declared pregnancies) review of the dosimetry report by the HSA or Compliance Officer?	Yes
Are staff seen wearing dosimeter badges while performing radiography services or while working in an area with radiation producing equipment?	Yes
Are staff dosimeter badges and controls stored in a central location and not near a radioactive source?	No
Diagnostic Services Findings	Dosimeters are stored in individual desks. Unable to locate one dosimeter during survey.
Diagnostic Services Deliverables	(b)(5)

Emergency Preparedness and Response Observation - Review Complete

Is there documentation showing completed date and time of man-down drills?	Yes
Is there documentation showing completed date and time of fire drills?	Yes
Is there documentation showing completed date and time of mass casualty drills?	Yes
Are clinic staff trained on emergency equipment?	Yes
Do emergency scenarios vary?	Yes
Is it evident that the emergency incident was either an actual event, full drill, or table top exercise?	Yes
Is there a system in place to distribute an after-action report to all staff?	No
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event ?	Yes
Emergency Preparedness and Response Findings	1. Man down drills were completed on 2 of 3 shifts. Ensure that three drills are performed each month. 2. Disaster drill from 2018 did not have a full assessment to indicate stregths and weaknesses. Upcoming disaster drill (Nov 2019) will utilize IHSC generated form, this no CAP for this item. 3. No evidence of dissemination of findings from drills to staff. 4. Trauma bags with expired supplies and secured without replenishing par levels x 4 days. Poor tracking and accountability of trauma bag use and

AMERICAN OVERSIGHT

	inventory. 5. Live ERT drill showed a lack of team cohesion or familiarity with team approach (leader, scribe, etc)
Emergency Preparedness and Response Deliverables	1. Three drills per month will be performed. Provide evidence of compliance to the RHSA by 10/01/2019. 2. Ensure that drills (SWOT) are incorporated into the monthly staff meetings. Provide evidence to HSA by 10/01/2019. 3. Revamp Trauma bag inventory, update inventory list (monthly audit vs inventory restock; include exp dates for all inventory that has a shelf life), revamp process of managing checks on the bags (daily, monthly and updates after being opened). Provide evidence of completion to RHSA by 10/01/2019.

Environmental Health Observation - Review Complete

Are clinic Safety Data Sheets (SDS) files complete, current, and accessible?	Yes
Are hazardous chemicals, including cleaning supplies, labeled and securely stored?	Yes
Are Public Health, Safety, and Preparedness Toolkit checklists maintained locally and documented (with CO/HSA Signatures or designee) to show corrective action with completion date?	No
Do Airborne Isolation and Inspection (AII) rooms requiring transmission based precautions have appropriate signage for the required precaution(s)?	Yes
Is documentation of daily checks on (AII) rooms' negative pressures complete?	Yes
Is the OSHA Form 300A summary completed and posted in clinic from February 1st through April 30th each year?	Yes
Environmental Health Findings	SDS are located in nursing office. 3 are in bright yellow binders and a 4th white binder also exists. Staff unfamiliar with the binders or the difference between the white vs yellow SDS binders. There is no eveidence that the binders are reviewed annually. Nurse manager was unable to provide evidence of the daily, quarterly or annual chacklist.
Environmental Health Deliverables	(b)(5)

Grievances - Review Complete

AMERICAN OVERSIGHT

Number of medical grievances reported through QI/JIC/CRCL/DRIL.	17
Is there a local SOP for managing grievances?	Yes
Is there an identified grievance officer?	Yes
Is there a log book and is it up to date?	Yes
Number of medical grievances that were not addressed in a timely manner.	3
Number of formal grievances.	7
Number of informal grievances.	0
Grievances Findings	Designated grievance officer has transitioned several times over the past year. Logs were current, but incomplete and unable to assess if 3/7 entries were completed within the 5 days. Outcomes refelected that grievances were investigated and outcomes at times substantiated. There was a significant decrease in the number of grievances as compared to the previous year. The site reports that they determine if written grievances "count" as a grievance and if not that it is not logged.
Grievances Deliverables	(b)(5)

Hunger Strike Chart Review - Review Complete

How many of hunger strike records were reviewed?	1
Of the hunger strike records reviewed, how many had with I&O's tracked in the health record?	1
Of the hunger strike records reviewed, how many indicated that the patient was educated on the adverse effects of a hunger strike and education was documented in health record?	1
Of the hunger strike records reviewed, how many indicated that the patient was counseled on termination of hunger strike and counseling was documented in health record?	1
Of the hunger strike records reviewed, how many indicated that the patient was evaluated by a mental health provider?	1
Of the hunger strike records reviewed, how many had a complete medical history, orthostatic vital signs, height, weight, urinalysis, mental health evaluation, physical assessment, clinically necessary laboratory tests deemed appropriate, and modification or augmentation of standard treatment protocols when medically indicated during the initial evaluation or refusal form?	0
Of the hunger strike records reviewed, how many had orthostatic vital signs including weight taken every 24 hours?	0

AMERICAN OVERSIGHT

Of the hunger strike records reviewed, how many were discontinued by the Clinical Director, or a physician?	0
Of the hunger strike records that were discontinued, how many indicated that IHSC healthcare personnel offered detainee appropriate follow-up with behavioral health and medical care and offer was documented in patient's chart?	0
Of the hunger strike records reviewed, how many had special needs to include restriction of commissary items?	1
Hunger Strike Records Findings	Hunger strike reviewed was not in the 3 month timeframe indicated, but due to process issues noted, the review was added. Although, documentation of input and output was noted, the use of the template in eCW was incosistent. The pt remained on HS until he was transferred from the facility. Thus, the following questions were not applicable: 1) Of the hunger strike records reviewed, how many had a complete medical history, orthostatic vital signs, height, weight, urinalysis, mental health evaluation, physical assessment, clinically necessary laboratory tests deemed appropriate, and modification or augmentation of standard treatment protocols when medically indicated during the initial evaluation or refusal form? 2) Of the hunger strike records reviewed, how many had orthostatic vital signs including weight taken every 24 hours? 3) Of the hunger strike records reviewed, how many were discontinued by the Clinical Director, or a physician? 4) Of the hunger strike records that were discontinued, how many indicated that IHSC healthcare personnel offered detainee appropriate follow-up with behavioral health and medical care and offer was documented in patient's chart? The patient was refusing vital signs and assessment; As a result, no orthostatic vitals, vitals, or weights were assessed.
Hunger Strike Records Deliverables	None.

Hunger Strike Observation - Review Complete

How many patients were on a hunger strike at the time of observation?	0
Of the patients on a hunger strike, how many was water available for?	0
Of the patients on a hunger strike, how many were offered meals?	0
Of the patients on a hunger strike who were offered food, how much food was offered?	N/A
Of the food offered, how much of the food was eaten?	N/A
Of the patients on a hunger strike, how many had special needs?	0
Of the special needs patients on a hunger strike, how many records indicated that the needs were addressed?	0
Hunger Strike Encounters Findings	N/A-No detianees on hunger strike during observation period.
Hunger Strike Encounters Deliverables	N/A

AMERICAN OVERSIGHT

Infectious Disease Prevention - Review Complete

Are hand washing equipment and hand sanitizers available in the clinic?	Yes
Are contact and outbreak investigations documented in the PHSP Unit reporting tool on SharePoint?	Yes
Is hand hygiene monitoring conducted and documented on the quarterly review?	Yes
Infectious Disease Prevention Findings	Policy followed.
Infectious Disease Prevention Deliverables	(b)(5)

Intake Screen Chart Review - Review Complete

How many intake screen records were reviewed?	25
Of the intake screen records reviewed, how many had detainee identified with at least two detainee identifiers?	25
Of the intake screen records reviewed, how many used a translator?	9
Of the intake screen records that used a translator, how many listed a translator name or ID number ?	9
Of the intake screen records that did not use a translator, how many provide a reason for not using a translator?	16
Of the intake screen records reviewed, how many records had a complete pain assessment using the pain scale indicator?	25
Of the intake screen records reviewed, how many records had a pain scale greater than 0?	0
Of the records with a pain scale greater than 0, how many were assessed?	0
Of the intake screen records reviewed, how many used the eCW Intake Screening template?	25
Of the intake screen records reviewed, how many had clinically significant findings?	6
Of the intake records with clinically significant findings, how many were referred appropriately?	6
Of the intake screen records reviewed, how many were reviewed by an RN or above within 24 hours?	4
Intake Screen Records Findings	Of the 25 intake records reviewed, eight (8) were conducted by a LVN or LPN, thus requiring the review of a RN or higher within 24 hours. Of those eight (8) records, four (4) did not meet that

AMERICAN OVERSIGHT

	requirement. Additionally, there were two records reviewed where, potentially, eCW template defaults were not changed to reflect the patient's answers or conditions. - In one record, the patient had a history of being sexually abused by their hsuband within the past six months. They were appropriately referred to mental health, but their intake screening was still coded as "normal." - In the other record, during the intake a patient had a rash and itching in their genital area. They were seen two weeks later for follow-up of this problem. Their intake screening was still coded as "normal."
Intake Screen Records Deliverables	(b)(5)

Intake Screen Observation - Review Complete

How many intake screen encounters were observed?	11
Of the intake screen encounters observed, how many did the nurse review the prescreen and transfer paperwork prior to initiating the intake screening?	2
Of the intake screen encounters observed, how many included a full set of vital signs?	11
Of the intake screen encounters observed, how many used the eCW Intake Screening template?	11
Of the intake screen encounters that used the eCW Intake Screening template, how many were completed appropriately?	11
Of the intake screen encounters observed, how many was the patient was educated on access to care, upcoming PE appointment, and provided the grievance guide?	11
Of the intake screen encounters observed, how many included security advice of special needs and housing disposition?	11
Intake Screen Encounters Findings	The nurse reviewed the prescreen and transfer paperwork prior to initiating the intake screening for TWO patients. This is NOT a negative finding as there was only TWO patients who arrived with this information.
Intake Screen Encounters Deliverables	No recommendations

Language Access Chart Review - Review Complete

How many language access records were reviewed?	25
Of the language access records reviewed, how many indicate that patient was asked what language he or she speaks?	25
Of the language access records reviewed, how many document the patient's primary language or language of choice in his or her medical record?	25

AMERICAN OVERSIGHT

Of the language access records reviewed, how many addressed and documented the use of a translator?	25
Of the language access records reviewed, how many did not use a translator?	13
Of the language access records that did not use a translator, how many documented reasons why a translator was not used?	12
Language Access Records Findings	No significant findings.
Language Access Records Deliverables	None

Language Access Observation - Review Complete

Are the "I Speak" posters and pocket guides readily available and posted in the clinic?	Yes
Does the facility have a process in place to address accessing sign language interpreters and telecommunication (TDD/TTY) for individuals with hearing disabilities?	Yes
Language Access Encounter Findings	I speak posters are in both holding cells and in the intake area. The posters in the holding area are very small and very visible due to size and location.
Language Access Encounter Deliverables	(b)(5)

Log Books - Review Complete

How many pharmacy refrigerator temperature logs were reviewed?	4
Of the pharmacy refrigerator temperature logs reviewed, how many have entries per shift for the past three months?	2
Of the pharmacy refrigerator temperature logs reviewed, how many refrigerator temperature logs are out of range?	0
Of the temperature logs that are out of range, how many logs have documentation of action taken and follow-up?	0
Are the sharps secured and the count accurate?	Yes
In review of the past 3 months of sharps counts, are two signatures present for each shift changes?	Yes
Are the narcotics secured with double lock and counts within the last 3 months accurate?	Yes
In review of past 3 months of controlled substance logs, are two signatures present for each shift change on the narcotics counts?	Yes
	No

AMERICAN OVERSIGHT

Are the urgent care cart/trauma bag and AEDs checked daily for content, signatures, AED functionality, and expiration for the past 3 months?	
Log Books Findings	Pharmacy had two refridgerator entries not signed. Failure was related to a TDY staff covering the pharmacy and omitting that step. Logs were maintained in paper format and would benefit from moving towards an electronic format.
Log Books Deliverables	1. Failure was related to a TDY staff covering the pharmacy and omitting that step. No further action required. 2. TEAM to review all logs related to emergecy preparedness and counts to ensure best methodologies are employed. Any audits should be reflected on the actual "count" sheet. Provide RHSA SWOT analysis and any log updates developed and implemented; submit by 11/01/19.

Medication Administration Observation - Review Complete

Is prepouring occurring?	No
How many medication administrations were observed?	15
Of the medication administrations observed, how many times were nurses adhering to ALL six rights of medication administration?	15
Of the medication administrations observed, how many mouth checks were conducted?	15
Of the medication administrations observed, how many times did nurses document the medication administration immediately after the medication was administered?	15
How many MAR entries were observed?	15
Of the MAR entries observed, how many were complete?	15
Of the MAR entries observed, how many medication refusals were documented?	0
Of the identified medication refusals, how many refusals had accompanying eCW documentation ?	0
Of the identified medication refusals, how many were high-risk medications?	0
Of the identified high-risk medication refusals, how many times were providers notified of the refusal?	0
Medication Administration Findings	Patient identification was suboptimal and heavily relied on the patient ID. Patient was not active in the identification process. Minimal patient engagement in medication administration process. The pill-line nurse was also responsible for dispensing KOP and recieving requests for KOP refills.
Medication Administration Deliverables	1. Patient ID training to be performed by 10/01/2019 to include the best practice of patient involvement in the process. Forward the RN attendance roster to the RHSA as evidence of completion. 2. No refusals observed. Reviewed a random selection of resusal forms from July. It appears that the medication refusals are completed

AMERICAN OVERSIGHT

without the patient present as 100% of the refuals were annotated as patient refused to sign. It is unclear if the patient was present for the process. Informal recommendation: Review process and policy with staff to ensure intent of policy is being followed. 3. NM to perform a chart review of refusals to ensure patient encounters are entered on the 10 refusals reviewed during the survey and provide HSA and RHSA findings and CAP if indicated. Forward to RHSA by 10/15/2019.

Meetings - Review Complete

Of the two previous staff meetings, how many were conducted monthly and properly documented?	2
Of the two previous public health, safety, and preparedness meetings, how many were properly documented?	0
Of the two previous quality improvement meetings, how many were conducted quarterly and properly documented?	0
Out of the two previous quarterly ICE/HSA meetings, how many were conducted and properly documented?	2
Meetings Findings	Due to loss of FHPM the PHSP and QI quarterly meetings were not completed or available for review. Staff meetings were adequate - informal recommendation- update to include monthy updates on safety. emergency preparedness (Drills -SWOT) and CQI initiatives.
Meetings Deliverables	(b)(5)

MHU Full Admission Chart Review - Review Complete

How many MHU full admission records were reviewed?	25
Of the MHU full admission records reviewed, how many had admission encounters?	14
Of the MHU full admission records reviewed, how many had a documented PE within the past year?	17
Of the MHU full admission records without a documented PE, how many received a PE within 24 hours of admission to the MHU?	7
Of the MHU full admission records reviewed, how many had a nursing care plan?	2
Of the MHU full admission records with a nursing care plan, how many records indicate the plan was addressed and reviewed daily?	2
Of the MHU full admission records reviewed, how many had patient education provided daily?	25

AMERICAN OVERSIGHT

Of the MHU full admission records reviewed, how many indicated detainee had an existing mental health diagnosis prior to admission?	6
Of the records that indicate that the detainee had a mental health diagnoses, how many received a mental health reassessment every seven (7) days, or more frequently, if indicated	6
Of the MHU full admission records reviewed, how many records did not have a mental health diagnoses?	19
Of the MHU full admission records without mental health diagnoses, how many records indicate the patient was assessed every 30 days by a MHP?	0
MHU Full Admission Records Findings	1) 11 of the 25 charts did not have the admission orders documented via eCW MHU Admission template (especially the mental health cases) 2) Only 1 chart was identifed as not having the PE completed within 24 hours of the MHU admission (MHU admission on 5/3/19 and PE completed on 5/7/19) 3) Only 2 of the 25 charts had nursing care plans; however detainees were educated daily on condition/treatment 4) One chart without mental health diagnosis and not assessed every 30 days by a BHP was identified.
MHU Full Admission Records Deliverables	(b)(5)

MHU Full Admission Observation - Review Complete

Are all patients within sight or hearing of a qualified health professional?	No
How many nurses are in the MHU full admission at the time of observation?	1
How many patients are in the MHU full admission at the time of observation?	1
How many MHU full admission patients have a 24-hour chart review everyday?	0
Of the MHU full admission records, were 24-hour charts completed appropriately?	None
How many MHU full admission patients have medications?	1
Of the MHU full admissions patients with medicaitons, how many have all medications placed on pill line?	1
MHU Full Admission Encounters Findings	(b)(5)

MHU Full Admission Encounters Deliverables

Personnel and Credentialing Files - Review Complete

Does the facility have a process for tracking requirements electronically?	Yes
How many personnel and credentialing files were reviewed?	12
Of personnel and credentialing files reviewed, how many were PHS officers?	3
Of the PHS officer records, how mand had at least two years of evaluations (COERS)?	0
Of personnel and credentialing files reviewed, how many were federal civil service employees?	0
Of personnel and credentialing files reviewed, how many were contractors?	9
Of personnel and credentialing files reviewed, how many records are for privileged staff?	1
Of the privileged staff records reviewed, how many were Licensed Independent Practitioners (LIPs)?	1
Of the LIP staff records reviewed, how many had personnel files records current?	1
Of the LIP staff records reviewed, how many had a competency assessment or peer review?	1
Of personnel and credentialing files reviewed, how many contained a current and signed Health and Ability form?	12
Of personnel and credentialing files reviewed, how many contained a signed statement of confidentiality?	12
Of personnel and credentialing files reviewed, how many contained a signed statement of risks and responsibility?	12
Of personnel and credentialing files reviewed, how many contained a signed statement of acknowledgement of understanding of local, national, and residential standards?	12
Of personnel and credentialing files reviewed, how many contained a signed release of information form?	12
Of personnel and credentialing files reviewed, how many contained current, valid, and unrestricted license?	12
Of personnel and credentialing files reviewed, how many contained documentation of primary education , license primary source, and annual verification?	8

AMERICAN OVERSIGHT

Of personnel and credentialing files reviewed, how many were reviewed for physicians or psychiatrists?	1
Of the physician or psychiatrist records, how many had documentation of residency?	1
Of the physician or psychiatrist records, how many were board certified?	1
Of the board certified physicians and psychiatrists, how many had documentation of board certification?	1
Of personnel and credentialing files reviewed, how many had a copy of a curriculum vitae or a resume?	9
Of personnel and credentialing files reviewed, how many had current National Provider Data Bank information?	1
Of the staff records reviewed, how many had scope of practice documentation if applicable?	12
Personnel and Credentialing Files Findings	Credential folders were maintained exceptionally well. PHS officers did not have CV or COERs on file please ensure that the onboarding documents are printed and filed accordingly. No process in place to have performance appraisals included in the credential folders.
Personnel and Credentialing Files Deliverables	(b)(5)

Physical Exam Chart Review - Review Complete

How many physical exam charts were reviewed?	25
Of the physical exam charts reviewed, how many used language services?	15
Of the physical examinations that used language services, how many contained identification of the translator or interpreter?	15
Of the physical exam charts reviewed, how many were for juveniles?	0
Of the juvenile physical exam charts reviewed, how many were completed within 7 days of arrival to the facility?	0
Of the physical exam charts reviewed, how many were for adults?	25
Of the adult physical exam charts reviewed, how many PE-S's were completed within 14 days of arrival to the facility?	14
Of the physical exam charts reviewed, how many had a pain assessment?	25
Of the physical exam charts with pain assessment, how many were addressed ?	3
Of the physical exam charts reviewed, how many were reviewed by an MD? PE-C within 7 days.	5
	14

AMERICAN OVERSIGHT

Of the physical exam charts reviewed, how many were reviewed by an MD? PE-S within 14 days.	
Of the physical exam charts reviewed, how many were for adult females?	4
Of the adult female physical exam charts reviewed, how many had a record of the last menstrual cycle?	4
Of the adult female physical exam charts reviewed, how many had a record with a pap test offered?	0
Of the adult female physical exam charts reviewed, how many had a record where a pap test was not indicated?	4
Physical Exam Records Findings	MD Chronic Care review has a compliance of 50%.
Physical Exam Records Deliverables	(b)(5)

Physical Exam Observation - Review Complete

How many physical exam encounters were observed?	4
Of the physical exam encounters observed, how many included a full set of vital signs?	4
Of the physical exam encounters observed, how many were completed within the specified timeframe?	3
Of the physical exam encounters observed, how many included a detainee request for a chaperone?	0
Of the physical exam encounters observed, how many had an abnormal vital sign?	0
Of the physical examination encounters observed with an abnormal vital sign, how many were addressed and/or referred to a higher level of care?	0
Of the physical exam encounters observed, how many indicated that a Snellen test was conducted during the examination?	4
Of the physical exam encounters observed, how many were properly designated as either PE-Complex or PE-Simple in accordance with the IHSC Directive on Health Assessments?	4
Of the physical examination encounters observed, how many were referred to the next level of care as directed by IHSC policy?	4
Physical Exam Encounters Findings	

AMERICAN OVERSIGHT

	One PE Complex was performed at the 4 day mark. This was rectified upon notification. Lead APP distributes PE-C workflow for APPs to include distribution of appointments from intake. Most intakes identified as a PE-C are seen th same day. BEST PRACTICE RECOMMENDATION: Consider reviewing the unassigned PE-Cs within eCW daily to ensure that all PEs are performed within 48 hours per policy.
Physical Exam Encounters Deliverables	No recommendations for deliverables. Track and trend compliance of PE-C visits locally.

Prescreen Observation - Review Complete

How many prescreen encounters were observed?	11
Of the prescreen encounters observed, are language services being used during prescreen if appropriate?	No
Of the prescreen encounters observed, how many prescreen encounters had documentation completed in eCW prior to intake screening?	11
Of the prescreen encounters observed, how many prescreening encounters were prioritized to level one when clinically indicated based on self-reported history or objective findings?	11
Prescreen Encounters Findings	RN did not utilize interpreter services, but spoke to the patients in Spanish. Unable to determine the proficiency of the RNs Spansish. Patients with a language barrier were identified and pre-screening questions were completed with intake to verify responses. RN did not ask all pre-screening questions.
Prescreen Encounters Deliverables	(b)(5)

Risk Management - Review Complete

Trends	Trends June-July 2019: 3-low risk, 1-no process vulnerability, 2-pending determination
Number of active Root Cause Analyses(RCA)/Sequence of Events (SOE).	0
Number of RCAs or SOEs completed during the last six (6) months.	1
Number of corrective actions generated from RCAs or SOEs during the last six (6) months.	6
List all corrective actions identified in the preceding field and note their status and due dates.	Completion of action items pending. Due July 2019 to the MQMU RCS
Risk Management Findings	RCA action items pending. Site to follow up with Regional Compliance Specialist for follow up

AMERICAN OVERSIGHT

Risk Management Deliverables	RCA action items pending. Site to follow up with Regional Compliance Specialist for follow up

Schedules - Review Complete

How many schedules were reviewed?	3
Of the schedules reviewed, how many had a legend to explain codes?	3
Of the schedules reviewed, how many had staff assigned "40 hours per week" per scheduling period?	3
Of the schedules reviewed, how many had provider coverage on weekend/holidays?	3
Of the schedules reviewed, how many had actual work hours reflected for non-traditional shifts?	3
Are there signed approvals for non-traditional shifts?	Yes
Is there a PDF copy each time a change was made to the schedule?	No
Schedules Findings	Schedules are PDF'ed several times per month. It does not appear that all changes are made in red font and PDF'ed each time a change is made. Encourage that the schedule is also PDF'ed when initially posted and at the time in which the schedule has ended.
Schedules Deliverables	None

Segregation Chart Review - Review Pending

How many segregation records were reviewed?	25
Of the segregation records reviewed, how many indicate the patient was medically cleared for segregation?	25
Of the segregation records reviewed, how many indicate if daily segregation rounds by nursing are documented ?	21
Of the segregation records reviewed, how many offered the patient daily sick-call services?	25
Of the sick call services offered, how many were documented and noted whether patient accepted or denied sick call services?	25
Of the segregation records reviewed, how many patients had no history of a mental health diagnosis or mental health status was evaluated at least every 30 days?	4
Of the segregation records reviewed, how many patients had a history of a mental health diagnosis?	10
Of the patients with a mental health diagnosis, how many were seen weekly by Mental Health?	4
Segregation Records Findings	

AMERICAN OVERSIGHT

	Num_NonMH: 4 Yes 21 N/A - Reviewer determined N/A if detainee was in segregation < 30 days Num_MHWeekly: Yes 3 No 4 N/A - Reviewer determined N/A if detainee in segregation < 1 week.
Segregation Records Deliverables	No data reported

Segregation Observation - Review Complete

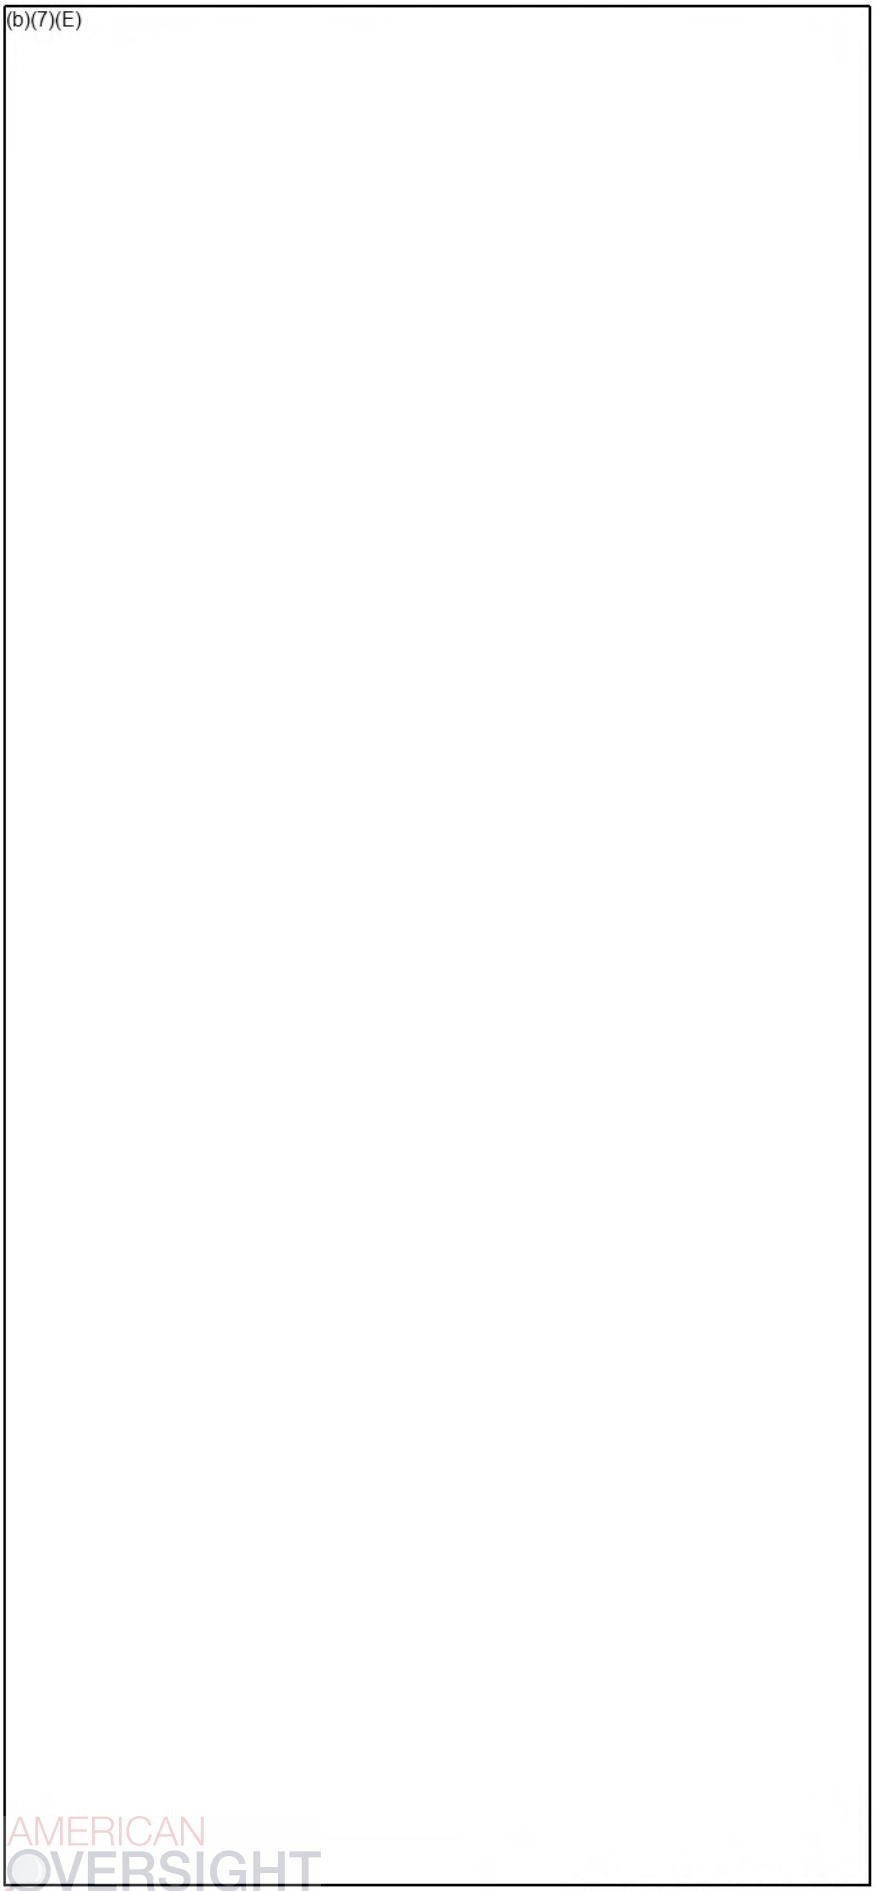
How many patients in segregation were observed in MHU full admission for medical overflow?	25
Of the patients in segregation observed in MHU full admission for medical overflow, how many records indicate that the patients were rounded on according to MHU policy?	0
Were sick call services offered to detainees in segregation or other specialty housing units?	Yes
Segregation Encounters Findings	Nurse observed performing rounds in segregation. Documenation noted and correctly completed on the segregation sheet (i.e. signature/print/time). BEST PRACTICE RECOMMENDATION: 1) Consider utilizing the medical examination room to assess all sick call complaints to appropriately document needs via RN sick call documention. 2) Ensure that all needs are assessed and addressed when performing rounds. The RN asked general questions such as are you ok and do you need anything, but specific questions were not asked (i.e. pain was not cosistently assessed with every patient, MH needs and status not consistenly asked). Brave 500 (female seg) does have a medical treatment room available with a computer and phone available. Medical supply room is available for restocking needs but it is not being utlized.
Segregation Encounters Deliverables	(b)(5)

Shift Report and Time Cards - Review Complete

Are shift reports conducted?	No
Is there at least one representative from each department?	No
Are written changes verified (initials, signature) on time cards by the HSA or AHSA(s)?	No

AMERICAN OVERSIGHT

Shift Report and Time Cards Findings	Shift reports are not held twice per day as is customary. Morning shift report is held and is multidisciplinary. A second hand off is performed nurse-to-nurse at 1900. Time cards are utilized and staff punch in and out for lunch. 20 timecards reviewed. 4 hand hand written entries without any verification (initials by the HSA). One staff member routinely hand writes there lunch break on their card instead of punching in and out.
Shift Report and Time Cards Deliverables	(b)(5)



Sick Call Chart Review - Review Complete

How many sick call records were reviewed?	25
Of the sick call records reviewed, how many were the third time that the patient complained about the same issue?	1
Of the sick call records where the encounter was the third time that the patient has complained about the same issue, how many were referred to a provider?	1
Of the sick call records reviewed, how many included a full set of vital signs?	25
Of the sick call records reviewed, how many had a pain scale greater than 0?	10
Of the sick call records with a pain scale greater than 0, how many indicated that the pain was addressed?	10
Of the sick call records reviewed, how many included nursing protocols/guidelines referenced by name in the documentation?	22
Of the sick call records reviewed, how many included the reason documented in the "Reason" field?	24
Of the sick call records reviewed, how many had the reason for visit from an approved category?	25
Of the sick call records reviewed, how many were addressed by a nurse?	20
Of the sick call records addressed by a nurse, how many followed the SOAP format of documentation with appropriate nursing diagnosis?	19
Does the facility have a defined process in place addressing sick call services?	Yes
Sick Call Records Findings	Four encounters were address by the APP. Two encounters the nurse didn't use the pain scale.
Sick Call Records Deliverables	No deliverables required.

Suicide Watch Chart Review - Review Complete

AMERICAN OVERSIGHT

2020-ICFO-29037 1092 of 2966

(b)(7)(E)

How many suicide watch records were reviewed?	
Of the suicide watch records, how many had a patient evaluated for suicide risk by a mental health profession or physician within 24 hours of being placed on suicide?	3
Of the suicide watch records, how many had a patient assessed to determine if a suicide smock was medically indicated via a Special Needs form?	3
Of the suicide watch records, how many had the need for finger food annotated via a Special Needs form?	3
Of the suicide watch records, how many had a daily mental health assessment conducted and documented by a mental health or mid-level provider?	3
Of the suicide watch records, how many had a patient released from suicide watch?	3
Of the suicide watch records, how many had a patient released from suicide watch by a mental health provider or physician?	3
Of the suicide watch records, how many had a suicide risk assessment conducted prior to release from suicide watch?	3
Of the suicide watch records, how many had checks conducted and documented at least every eight hours by clinical staff?	3
Of the suicide watch records, how many had checks conducted and documented at least every 15 minutes by custody staff?	3
Suicide Watch Pre-Audit Findings	No findings
Suicide Watch Pre-Audit Deliverables	No deliverables to report

Suicide Watch Observation - Review Complete

How many patients are on suicide watch?	0
Of the patients on suicide watch, how many have a nursing assessment performed within the past 8 hours?	0
Of the patients on suicide watch, how many have 15 minute checks being performed on a staggered schedule?	0
Of the patients on suicide watch, how many have an assessment by a mental health or mid-level provider within the last 24 hours?	0
Of the patients on suicide watch, how many have a restrictive environment compliant with current orders?	0
Suicide Watch Encounters Findings	The site did not have patients on suicide watch during this observation.
Suicide Watch Encounters Deliverables	No recommendations

Training - Review Complete

AMERICAN OVERSIGHT

How many training folders were reviewed?	12
Of the training folders reviewed, how many had a HSD-500?	12
Of the training folders reviewed, how many had a signed position description ?	12
Of the training folders reviewed, how many were registered nurse training folders?	5
Of the registered nurse training folders reviewed, how many documented RN Physical Exam Training?	3
Of the training folders reviewed, how many had continuing medical education credits documented?	12
Training Findings	Two RNs did not have PE competencies in records.
Training Deliverables	(b)(5)

Transfer Summary Chart Review - Review Complete

How many transfers were reviewed?	25
Of the transfers reviewed, how many outgoing transfers were authenticated appropriately (signed, stamped, and dated)?	25
Of the transfers observed, how many outgoing transfers were completed by an LVN or above?	25
Of the transfer summary records reviewed for TB status, how many correctly documented no TB treatment status?	20
Of the transfer summary records reviewed for TB status, how many incorrectly documented no TB treatment status? (TB meds listed??)	0
Of the transfer summary records reviewed for TB status, how many correctly documented TB treatment status?	4
Of the transfer summary records reviewed for TB status, how many incorrectly documented TB treatment status? (Taking TB meds)	1
Transfers Findings	Transfer summary says chest x-ray negative even though it was positive and patient was being treated for presumptive TB General Transfer Summary: 5/25 did not have chronic medical conditions listed within the transfer summary. 100% in all other areas of review.
Transfers Deliverables	No deiverables identoified.
Of the transfer summaries reviewed, how many listed the detainee's chronic medical conditions appropriately?	20
Of the transfer summaries reviewed, how many had "clear medication instructions" documented appropriately?	25

AMERICAN OVERSIGHT

Workforce Health Files - Review Complete

Are workforce health files kept separate from other files?	Yes
Is access to staff records limited to the compliance officer, HSA, and AHSA(s) and AA?	No
How many workforce health files were reviewed?	12
Of the twelve workforce health files reviewed, how many had past year's TB (PPD or CXR) documentation?	12
Of the twelve workforce health files reviewed, how many had a Hepatitis B vaccination or declination form?	12
Of the twelve workforce health files reviewed, how many had a yearly Ishihara Color Blind test?	12
Of the twelve workforce health files reviewed, how many had a yearly respirator medical clearance?	8
Of the twelve workforce health files reviewed, how many had a yearly respirator fit test?	10
Of the twelve workforce health files reviewed, how many had emergency contacts?	12
Are staff recordable injuries documented on Workforce Injury Tool?	Yes
Workforce Health Files Findings	Twelve records reviewed. Two PHS staff did not have fit test clearance or testing results in the files. STGi has not been submitting the clearance (2) at the time of hore or testing. Files are maintained seperately but are in an unlocked file cabinet in an office that is typically locked when administrators are not present. Files are well organized and an up to date tracker in place to ensure compliance.

Number of prescreen encounters prioritized.	0.00
Of the prescreen encounters prioritized, how many were referred to intake in a timely manner?	0.00
Findings	Prescreens were conducted the same time as intake screening. Detainees arrived in the facility at 0600, but as of 11:40 am there no prescreen or intakes initiated. Privacy concerns where the door open with other detainees within 7 feet of the intake room.
Deliverables	(b)(5)

AMERICAN OVERSIGHT

Intake Screening Review - Review Complete

Number of intake screenings reviewed.	25.00
Number of intake screenings with detainee identified with at least two detainee identifiers.	23.00
Of the intake records reviewed, how many used a translator?	5.00
Of the intake screening records that used a translator, how many listed a translator name or ID number?	5.00
Of the intake screening records that did not use a translator, how many listed a reason for not using a translator?	12.00
Number of notes with TB clearance noted (PPD, CXR, current CXR from other facility).	25.00
Of the intake screening records, how many were TB negative?	24.00
Of the intake screening records that are TB negative, how many were signed, dated, and stamped by an RN or above?	10.00
Of the intake screening records, how many were TB positive?	1.00
Of the intake screening records that are TB positive, how many were signed, dated, and stamped by an RN or above?	0.00
Number of intake screenings with a complete pain assessment using the pain scale indicator.	25.00
Number of intake screenings with pain scale greater than 0.	0.00
Of the intake screenings with a pain scale greater than 0, how many were addressed?	0.00
Number of intake screenings with mental health screening completed.	23.00
Number of intake screenings that used the eCW Intake Screening template.	23.00
Of the intake screenings that used the eCW Intake Screening template, how many were completed appropriately (i.e., default answers changed to reflect the patient's response)?	23.00
Number of intake screenings with clinically significant findings.	6.00

AMERICAN OVERSIGHT

Of the intake screenings with clinically significant findings, how many were referred appropriately?	6.00
Number of intake screenings reviewed by an RN or above within 24 hours.	0.00
Findings	25 Intake charts reviewed; on six (6) of them, the person conducting the intake screening put "Self" for Interpreter Name or Number, for Intake Screening they conducted. Since the person conducting the intake screening did not utilize someone else for interpretor services, I have checked this encounter as a "no" for an interpretator being utilized. Recommend re-training/education to staff on appropriate notation when they do not seek another colleague, or the Language Line, for interpreator services. "Provider fluent in detainee's language" should have been selected for these intakes. On two (2) intake screenings reviewed- Appropriate e-CW template for intake screening not utilized. Not able to evaluate whether a translator was used, whether the detainee's language was identified, whether a mental health screening was completed, etc. due to those questions not being on these intakes. Out of the 25 Intakes reviewed, there was one TB positive pation. There is documentation of TB status within record (detainee was TB positive) but the documentation was not signed, dated and stamped by an RN or higher. For 13 charts reviewed- There is documentation of TB status within record (detaine was TB negative) but the documentation was not signed, dated and stamped by an RN or higher For one (1) chart reviewed- there was TB documtation in the record, but the TB documentation did not state whether detainee was negative or positive. Since there was no evidence elsewhere in the record that the detainee was positive, assumed the detainee was negative. This documentation was not signed, dated and stamped by a RN or higher. For one (1) chart reviewed, the intake screening was conducted by a LVN, but the intake screening was not reviewed by a RN or higher within 24 hours. There is no evidence/documentation of review by a RN, on the intake screening.
Deliverables	NO DATA

Last ACA Findings	None
Last NCCHC Accreditation	2018-02-14T05:00:00Z
Last NCCHC Findings	None
Last PBNDS Accreditation	2019-01-10T05:00:00Z
Last PBNDS Findings	Finding: Review of medical records confirmed that detainees who are identified as being "at risk" are immediately referred to a

AMERICAN OVERSIGHT

	behavioral health provider but are not always evaluated within 24 hours of referral. One of seventeen detainees on suicide watch since the last inspection was not evaluated by a mental health professional within 24 hours. This detainee was placed on suicide watch on a Saturday and was evaluated the following Monday, just outside the 24-hour window. Per the HSA, it is policy that a mental health provider is always on-call and will come on-site on weekends if needed. There was only one other weekend referral in the past year and documentation was reviewed that the mental health provider did come in and evaluate that detainee within 24 hours.
Accreditation Comments	Training completed and corrected for PBNDS finding.

After Hours Medication Chart Review - Review Complete

How many after hours medication log records were reviewed?	29
Of the after hours med log records reviewed, how many records documented the patient's identification number?	28
Of the after hours med log records reviewed, how many records were generated by a nurse as a telephone order?	15
Of the records generated by a nurse as a telephone order, how many were signed by a provider within 24 hours of return for next work shift?	13
Is an After-Hours Cabinet (AHC) medication sign out log in place for the documentation of medications removed?	Yes
Is all the necessary information entered into the fields of the AHC sign out log?	Yes
After Hours Medication Chart Review Findings	Provider signed the telephone encounter outside of 24 hour return to work.
After Hours Medication Chart Review Deliverables	None

After Hours Medication Observation - Review Complete

Is a medication log in place and reflective of quantities of medication stored in the night cabinet?	Yes
Do line entries contain the date, time, patient name, alien number, medication name, and quantity removed?	Yes
Is the after hours verbal medication order entered into eCW by the prescriber upon return to duty?	No
Is the after hours medication administration properly documented on the MAR or in the electronic health record?	Yes
Is the night cabinet, clean, stocked, and organized?	Yes
	Yes

AMERICAN OVERSIGHT

Is the After-Hours Cabinet physically inspected (by pharmacist or designee) on a monthly basis to ensure the absence of expired, recalled or deteriorated medications?	
After Hours Medication Encounters Findings	Because after hours medications are taken out of the cart, medications are not ordered in eCW so patient does not recieve double dose of medication. Medications properly documented as given by nurse or provider when removed from cart.
After Hours Medication Encounters Deliverables	None

Chronic Care Chart Review - Review Complete

How many chronic care records were reviewed?	25
Of the chronic care records reviewed, how many had a PE--Complex completed within two business days?	22
Of the chronic care records reviewed, how many had chronic conditions properly documented in eCW Problem List?	25
Of the chronic care records reviewed, how many detainees arrived at the facility on chronic medications?	20
Of the chronic care records with medications, how many encounters indicated that medications were continued as clinically indicated??	20
Of the chronic care records reviewed, how many detainees had psychiatric medications?	5
Of the chronic care records with psychiatric medications, how many encounters indicated that the detainee was seen by an MD or MLP every 30 days for medication assessment or review?	5
Of the chronic care records with psychiatric medications, how many encounters indicated that the detainee was seen by an MD or psychiatrist every 90 days for chronic care management?	3
Of the chronic care records reviewed, how many chronic care patients were identified as stable?	25
Of the stable chronic care patients, how many encounters indicated that the detainee was seen within 90 days?	25
Of the chronic care records reviewed, how many chronic care patients were identified as unstable?	0
Of the unstable chronic care patients, how many encounters indicated that follow-up appointments were scheduled earlier than 90 days ?	0
Of the chronic care records reviewed, how many had a global alert (IHSC 834 or electronic equivalent) completed?	12
Chronic Care Records Findings	Global Alerts are not being set continuously within ECW. Also, Two detainees were seen in 96 days instead of the required 90 for MD or Psyc. encounter. Some PE-C's were not completed within 48 hours but seen the following day.

AMERICAN OVERSIGHT

Chronic Care Records Deliverables	Lead Provider instructed training on setting Global Alerts. Training roster obtained.

Chronic Care Observation - Review Complete

How many chronic care encounters were observed?	25
Of chronic care encounters observed, how many were considered stable patients?	25
Of the stable patients observed, how many were completed within the appropriate timeframe?	25
Of chronic care encounters observed, how many were considered unstable patients?	0
Of the unstable patients observed, how many were completed within the appropriate timeframe?	0
Of the chronic care encounters observed, how many had a treatment plan?	25
Chronic Care Encounters Findings	No findings
Chronic Care Encounters Deliverables	None

Consent Forms Chart Review - Review Complete

How many consent forms were reviewed?	25
Of the consent forms reviewed, how many were general consent forms?	25
Of the general consent forms reviewed, how many were complete?	25
Of the consent forms reviewed, how many were dental consent forms?	3
Of the dental consent forms reviewed, how many were complete?	3
Of the consent forms reviewed, how many were psychotropic consent forms?	3
Of the psychotropic consent forms reviewed, how many were complete?	3

Consent Forms Deliverables	None

Daily Assignment Sheets - Review Complete

How many daily assignment sheets were reviewed?	25

AMERICAN OVERSIGHT

Of the daily assignment sheets reviewed, how many were archived appropriately?	25
Of the daily assignment sheets reviewed, how many had at least one emergency team identified per shift?	25
Daily Assignment Sheets Findings	No findings
Daily Assignment Sheets Deliverables	None

Diagnostic Services - Review Complete

Are laboratory services provided in adherence with CLIA Waived testing?	Yes
Is there a current certificate for CLIA-waived testing?	Yes
Are radiation signs posted on all doors leading to areas with radiation producing equipment?	Yes
Is there documentation of a quarterly (monthly for declared pregnancies) review of the dosimetry report by the HSA or Compliance Officer?	Yes
Are staff seen wearing dosimeter badges while performing radiography services or while working in an area with radiation producing equipment?	Yes
Are staff dosimeter badges and controls stored in a central location and not near a radioactive source?	Yes
Diagnostic Services Findings	No Findings
Diagnostic Services Deliverables	None

Emergency Preparedness and Response Observation - Review Complete

Is there documentation showing completed date and time of man-down drills?	Yes
Is there documentation showing completed date and time of fire drills?	Yes
Is there documentation showing completed date and time of mass casualty drills?	Yes
Are clinic staff trained on emergency equipment?	Yes
Do emergency scenarios vary?	Yes
Is it evident that the emergency incident was either an actual event, full drill, or table top exercise?	Yes
Is there a system in place to distribute an after-action report to all staff?	Yes
	Yes

AMERICAN OVERSIGHT

Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event ?	
Emergency Preparedness and Response Findings	No findings
Emergency Preparedness and Response Deliverables	None

Environmental Health Observation - Review Complete

Are clinic Safety Data Sheets (SDS) files complete, current, and accessible?	Yes
Are hazardous chemicals, including cleaning supplies, labeled and securely stored?	Yes
Are Public Health, Safety, and Preparedness Toolkit checklists maintained locally and documented (with CO/HSA Signatures or designee) to show corrective action with completion date?	Yes
Do Airborne Isolation and Inspection (AII) rooms requiring transmission based precautions have appropriate signage for the required precaution(s)?	Yes
Is documentation of daily checks on (AII) rooms' negative pressures complete?	Yes
Is the OSHA Form 300A summary completed and posted in clinic from February 1st through April 30th each year?	Yes
Environmental Health Findings	No findings
Environmental Health Deliverables	None

Grievances - Review Complete

Number of medical grievances reported through QI/JIC/CRCL/DRIL.	8
Is there a local SOP for managing grievances?	Yes
Is there an identified grievance officer?	Yes
Is there a log book and is it up to date?	Yes
Number of medical grievances that were not addressed in a timely manner.	0
Number of formal grievances.	0
Number of informal grievances.	8
Grievances Findings	None
Grievances Deliverables	None

Hunger Strike Chart Review - Review Complete

How many of hunger strike records were reviewed?	0
Of the hunger strike records reviewed, how many had with I&O's tracked in the health record?	0
Of the hunger strike records reviewed, how many indicated that the patient was educated on the adverse effects of a hunger strike and education was documented in health record?	0
Of the hunger strike records reviewed, how many indicated that the patient was counseled on termination of hunger strike and counseling was documented in health record?	0
Of the hunger strike records reviewed, how many indicated that the patient was evaluated by a mental health provider?	0
Of the hunger strike records reviewed, how many had a complete medical history, orthostatic vital signs, height, weight, urinalysis, mental health evaluation, physical assessment, clinically necessary laboratory tests deemed appropriate, and modification or augmentation of standard treatment protocols when medically indicated during the initial evaluation or refusal form?	0
Of the hunger strike records reviewed, how many had orthostatic vital signs including weight taken every 24 hours?	0
Of the hunger strike records reviewed, how many were discontinued by the Clinical Director, or a physician?	0
Of the hunger strike records that were discontinued, how many indicated that IHSC healthcare personnel offered detainee appropriate follow-up with behavioral health and medical care and offer was documented in patient's chart?	0
Of the hunger strike records reviewed, how many had special needs to include restriction of commissary items?	0
Hunger Strike Records Findings	there were no hungerstrike detainees from October 2018 through March 2019
Hunger Strike Records Deliverables	N/A

Hunger Strike Observation - Review Complete

How many patients were on a hunger strike at the time of observation?	0
Of the patients on a hunger strike, how many was water available for?	0
Of the patients on a hunger strike, how many were offered meals?	0
Of the patients on a hunger strike who were offered food, how much food was offered?	n/a
Of the food offered, how much of the food was eaten?	n/a
	0

AMERICAN OVERSIGHT

Of the patients on a hunger strike, how many had special needs?	
Of the special needs patients on a hunger strike, how many records indicated that the needs were addressed?	0
Hunger Strike Encounters Findings	none
Hunger Strike Encounters Deliverables	N/A

Infectious Disease Prevention - Review Complete

Are hand washing equipment and hand sanitizers available in the clinic?	Yes
Are contact and outbreak investigations documented in the PHSP Unit reporting tool on SharePoint?	Yes
Is hand hygiene monitoring conducted and documented on the quarterly review?	Yes
Infectious Disease Prevention Findings	None
Infectious Disease Prevention Deliverables	None

Intake Screen Chart Review - Review Complete

How many intake screen records were reviewed?	25
Of the intake screen records reviewed, how many had detainee identified with at least two detainee identifiers?	25
Of the intake screen records reviewed, how many used a translator?	25
Of the intake screen records that used a translator, how many listed a translator name or ID number ?	25
Of the intake screen records that did not use a translator, how many provide a reason for not using a translator?	0
Of the intake screen records reviewed, how many records had a complete pain assessment using the pain scale indicator?	0
Of the intake screen records reviewed, how many records had a pain scale greater than 0?	0
Of the records with a pain scale greater than 0, how many were assessed?	0
Of the intake screen records reviewed, how many used the eCW Intake Screening template?	25
Of the intake screen records reviewed, how many had clinically significant findings?	3
Of the intake records with clinically significant findings, how many were referred appropriately?	3

AMERICAN OVERSIGHT

Of the intake screen records reviewed, how many were reviewed by an RN or above within 24 hours?	25
Intake Screen Records Findings	all 25 dteainees had documented that they stated that they were having no pain. so there was no pain to be assessed.
Intake Screen Records Deliverables	None

Intake Screen Observation - Review Complete

How many intake screen encounters were observed?	10
Of the intake screen encounters observed, how many did the nurse review the prescreen and transfer paperwork prior to initiating the intake screening?	10
Of the intake screen encounters observed, how many included a full set of vital signs?	10
Of the intake screen encounters observed, how many used the eCW Intake Screening template?	10
Of the intake screen encounters that used the eCW Intake Screening template, how many were completed appropriately?	10
Of the intake screen encounters observed, how many was the patient was educated on access to care, upcoming PE appointment, and provided the grievance guide?	6
Of the intake screen encounters observed, how many included security advice of special needs and housing disposition?	10
Intake Screen Encounters Findings	Watched 2 nurses complete the intake process . One nurse completed 4 of the ten and did not inform the detainees about the upcoming PE or the facility grievance process.
Intake Screen Encounters Deliverables	I notified the NM and she will be educating the nursing staff during the next nursing meeting and the HSA educated the staff at a shift reort of the need to educate the detainees during intake (pe's, grievances)

Language Access Chart Review - Review Complete

How many language access records were reviewed?	25
Of the language access records reviewed, how many indicate that patient was asked what language he or she speaks?	25
Of the language access records reviewed, how many document the patient's primary language or language of choice in his or her medical record?	25
Of the language access records reviewed, how many addressed and documented the use of a translator?	25
Of the language access records reviewed, how many did not use a translator?	0

AMERICAN OVERSIGHT

Of the language access records that did not use a translator, how many documented reasons why a translator was not used?	0
Language Access Records Findings	none
Language Access Records Deliverables	None

Language Access Observation - Review Complete

Are the "I Speak" posters and pocket guides readily available and posted in the clinic?	Yes
Does the facility have a process in place to address accessing sign language interpreters and telecommunication (TDD/TTY) for individuals with hearing disabilities?	Yes
Language Access Encounter Findings	None
Language Access Encounter Deliverables	None

Log Books - Review Complete

How many pharmacy refrigerator temperature logs were reviewed?	2
Of the pharmacy refrigerator temperature logs reviewed, how many have entries per shift for the past three months?	2
Of the pharmacy refrigerator temperature logs reviewed, how many refrigerator temperature logs are out of range?	0
Of the temperature logs that are out of range, how many logs have documentation of action taken and follow-up?	0
Are the sharps secured and the count accurate?	Yes
In review of the past 3 months of sharps counts, are two signatures present for each shift changes?	Yes
Are the narcotics secured with double lock and counts within the last 3 months accurate?	Yes
In review of past 3 months of controlled substance logs, are two signatures present for each shift change on the narcotics counts?	Yes
Are the urgent care cart/trauma bag and AEDs checked daily for content, signatures, AED functionality, and expiration for the past 3 months?	Yes
Log Books Findings	none
Log Books Deliverables	None

Medication Administration Observation - Review Complete

AMERICAN OVERSIGHT

Is prepouring occurring?	No
How many medication administrations were observed?	10
Of the medication administrations observed, how many times were nurses adhering to ALL six rights of medication administration?	10
Of the medication administrations observed, how many mouth checks were conducted?	10
Of the medication administrations observed, how many times did nurses document the medication administration immediately after the medication was administered?	10
How many MAR entries were observed?	10
Of the MAR entries observed, how many were complete?	10
Of the MAR entries observed, how many medication refusals were documented?	0
Of the identified medication refusals, how many refusals had accompanying eCW documentation ?	0
Of the identified medication refusals, how many were high-risk medications?	0
Of the identified high-risk medication refusals, how many times were providers notified of the refusal?	0
Medication Administration Findings	None
Medication Administration Deliverables	None

Meetings - Review Complete

Of the two previous staff meetings, how many were conducted monthly and properly documented?	2
Of the two previous public health, safety, and preparedness meetings, how many were properly documented?	2
Of the two previous quality improvement meetings, how many were conducted quarterly and properly documented?	2
Out of the two previous quarterly ICE/HSA meetings, how many were conducted and properly documented?	2
Meetings Findings	None

MHU Full Admission Chart Review - Review Complete

How many MHU full admission records were reviewed?	No data reported
	No data reported

AMERICAN OVERSIGHT

Of the MHU full admission records reviewed, how many had admission encounters?	
Of the MHU full admission records reviewed, how many had a documented PE within the past year?	No data reported
Of the MHU full admission records without a documented PE, how many received a PE within 24 hours of admission to the MHU?	No data reported
Of the MHU full admission records reviewed, how many had a nursing care plan?	No data reported
Of the MHU full admission records with a nursing care plan, how many records indicate the plan was addressed and reviewed daily?	No data reported
Of the MHU full admission records reviewed, how many had patient education provided daily?	No data reported
Of the MHU full admission records reviewed, how many indicated detainee had an existing mental health diagnosis prior to admission?	No data reported
Of the records that indicate that the detainee had a mental health diagnoses, how many received a mental health reassessment every seven (7) days, or more frequently, if indicated	No data reported
Of the MHU full admission records reviewed, how many records did not have a mental health diagnoses?	No data reported
Of the MHU full admission records without mental health diagnoses, how many records indicate the patient was assessed every 30 days by a MHP?	No data reported
MHU Full Admission Records Findings	Facility does not have an Medical Housing Unit at this time.
MHU Full Admission Records Deliverables	N/A

MHU Full Admission Observation - Review Complete

Are all patients within sight or hearing of a qualified health professional?	No data reported
How many nurses are in the MHU full admission at the time of observation?	No data reported
How many patients are in the MHU full admission at the time of observation?	No data reported
How many MHU full admission patients have a 24-hour chart review everyday?	No data reported
Of the MHU full admission records, were 24-hour charts completed appropriately?	No data reported
How many MHU full admission patients have medications?	No data reported
Of the MHU full admissions patients with medicaitons, how many have all medications placed on pill line?	No data reported

AMERICAN OVERSIGHT

MHU Full Admission Encounters Findings	Facility does not have an Medical Housing Unit at this time.
MHU Full Admission Encounters Deliverables	N/A

Personnel and Credentialing Files - Review Complete

Does the facility have a process for tracking requirements electronically?	Yes
How many personnel and credentialing files were reviewed?	12
Of personnel and credentialing files reviewed, how many were PHS officers?	6
Of the PHS officer records, how mand had at least two years of evaluations (COERS)?	6
Of personnel and credentialing files reviewed, how many were federal civil service employees?	0
Of personnel and credentialing files reviewed, how many were contractors?	6
Of personnel and credentialing files reviewed, how many records are for privileged staff?	2
Of the privileged staff records reviewed, how many were Licensed Independent Practitioners (LIPs)?	1
Of the LIP staff records reviewed, how many had personnel files records current?	1
Of the LIP staff records reviewed, how many had a competency assessment or peer review?	1
Of personnel and credentialing files reviewed, how many contained a current and signed Health and Ability form?	12
Of personnel and credentialing files reviewed, how many contained a signed statement of confidentiality?	12
Of personnel and credentialing files reviewed, how many contained a signed statement of risks and responsibility?	12
Of personnel and credentialing files reviewed, how many contained a signed statement of acknowledgement of understanding of local, national, and residential standards?	12
Of personnel and credentialing files reviewed, how many contained a signed release of information form?	12
Of personnel and credentialing files reviewed, how many contained current, valid, and unrestricted license?	12
Of personnel and credentialing files reviewed, how many contained documentation of primary education , license primary source, and annual verification?	12
Of personnel and credentialing files reviewed, how many were reviewed for physicians or psychiatrists?	1

AMERICAN OVERSIGHT

Of the physician or psychiatrist records, how many had documentation of residency?	0
Of the physician or psychiatrist records, how many were board certified?	1
Of the board certified physicians and psychiatrists, how many had documentation of board certification?	1
Of personnel and credentialing files reviewed, how many had a copy of a curriculum vitae or a resume?	1
Of personnel and credentialing files reviewed, how many had current National Provider Data Bank information?	3
Personnel and Credentialing Files Findings	Assuming that the term "Documentation of Primary Education" mean documentation and verification of initial degree, all 12 folders meet this requirement. If the statement is refering to Primary Education as it relates to schooling as a child,none of the 12 Folders contained that information. The Personnel folders are tracked eletranically: The contract personnel and federal personnel are tracked and mainted separately
Personnel and Credentialing Files Deliverables	None

Physical Exam Chart Review - Review Complete

How many physical exam charts were reviewed?	25
Of the physical exam charts reviewed, how many used language services?	16
Of the physical examinations that used language services, how many contained identification of the translator or interpreter?	16
Of the physical exam charts reviewed, how many were for juveniles?	0
Of the juvenile physical exam charts reviewed, how many were completed within 7 days of arrival to the facility?	0
Of the physical exam charts reviewed, how many were for adults?	25
Of the adult physical exam charts reviewed, how many PE-S's were completed within 14 days of arrival to the facility?	15
Of the physical exam charts reviewed, how many had a pain assessment?	25
Of the physical exam charts with pain assessment, how many were addressed ?	3
Of the physical exam charts reviewed, how many were reviewed by an MD? PE-C within 7 days.	25
Of the physical exam charts reviewed, how many were reviewed by an MD? PE-S within 14 days.	22
Of the physical exam charts reviewed, how many were for adult females?	4

AMERICAN OVERSIGHT

Of the adult female physical exam charts reviewed, how many had a record of the last menstrual cycle?	4
Of the adult female physical exam charts reviewed, how many had a record with a pap test offered?	2
Of the adult female physical exam charts reviewed, how many had a record where a pap test was not indicated?	2
Physical Exam Records Findings	21 Male Charts Reviewed 4 Adult female charts reviewed. Of the 4 female charts 2 PE-S charted no indiction vaginal exam was notindicated, 1 PE-C a Pap was completed, 1 PE-C the patient refused the PAP. PEs that did not document language services indicated the patient spoke english
Physical Exam Records Deliverables	None

Physical Exam Observation - Review Complete

How many physical exam encounters were observed?	15
Of the physical exam encounters observed, how many included a full set of vital signs?	15
Of the physical exam encounters observed, how many were completed within the specified timeframe?	15
Of the physical exam encounters observed, how many included a detainee request for a chaperone?	0
Of the physical exam encounters observed, how many had an abnormal vital sign?	4
Of the physical examination encounters observed with an abnormal vital sign, how many were addressed and/or referred to a higher level of care?	4
Of the physical exam encounters observed, how many indicated that a Snellen test was conducted during the examination?	15
Of the physical exam encounters observed, how many were properly designated as either PE-Complex or PE-Simple in accordance with the IHSC Directive on Health Assessments?	15
Of the physical examination encounters observed, how many were referred to the next level of care as directed by IHSC policy?	0
Physical Exam Encounters Findings	15 charts reviewed, the four charts with abnormal vitals signs were vitals of PE-Cs
Physical Exam Encounters Deliverables	None

Segregation Chart Review - Review Complete

How many segregation records were reviewed?	15
Of the segregation records reviewed, how many indicate the patient was medically cleared for segregation?	15
Of the segregation records reviewed, how many indicate if daily segregation rounds by nursing are documented ?	15
Of the segregation records reviewed, how many offered the patient daily sick-call services?	15
Of the sick call services offered, how many were documented and noted whether patient accepted or denied sick call services?	15
Of the segregation records reviewed, how many patients had no history of a mental health diagnosis or mental health status was evaluated at least every 30 days?	14
Of the segregation records reviewed, how many patients had a history of a mental health diagnosis?	1
Of the patients with a mental health diagnosis, how many were seen weekly by Mental Health?	1
Segregation Records Findings	No finding at this time
Segregation Records Deliverables	None

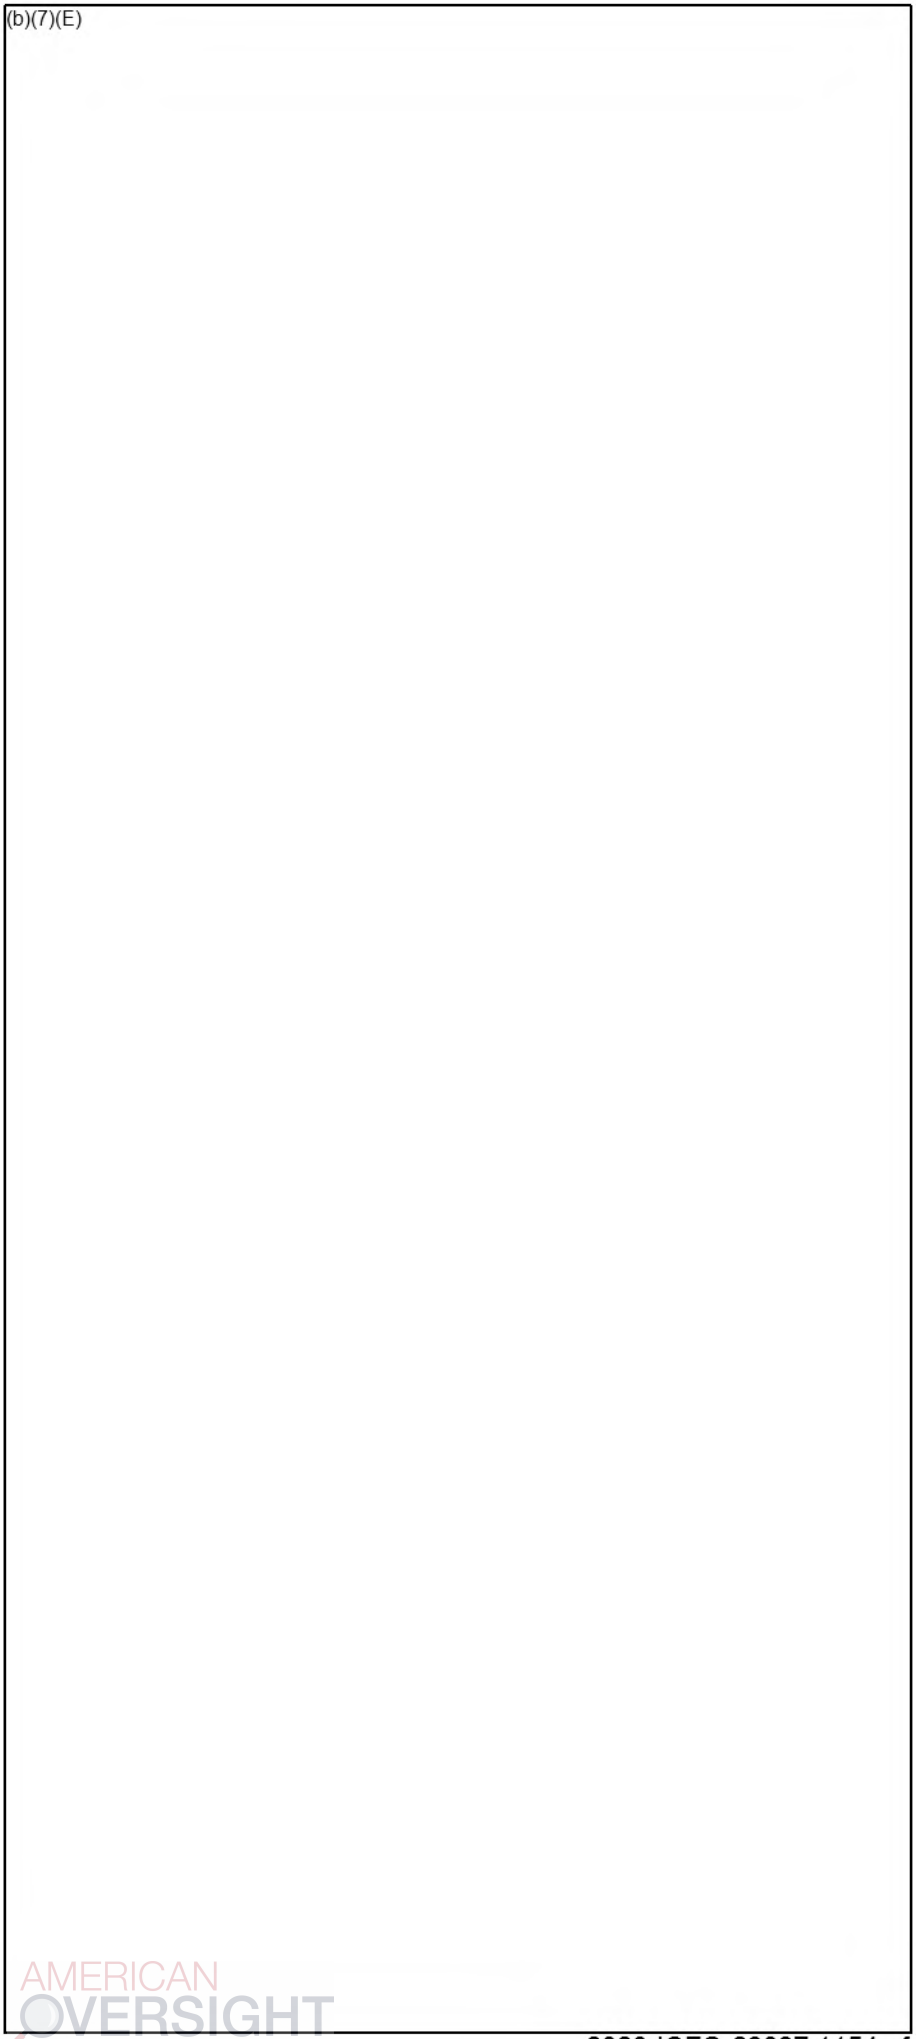
Segregation Observation - Review Complete

How many patients in segregation were observed in MHU full admission for medical overflow?	0
Of the patients in segregation observed in MHU full admission for medical overflow, how many records indicate that the patients were rounded on according to MHU policy?	0
Were sick call services offered to detainees in segregation or other specialty housing units?	Yes
Segregation Encounters Findings	Currently we do Not have a functioning MHU
Segregation Encounters Deliverables	None

Shift Report and Time Cards - Review Complete

AMERICAN OVERSIGHT

Are shift reports conducted?	Yes
Is there at least one representative from each department?	Yes
Are written changes verified (initials, signature) on time cards by the HSA or AHSA(s)?	Yes
Shift Report and Time Cards Findings	Houston CDF is currently using electronically time cards.
Shift Report and Time Cards Deliverables	No findings



Sick Call Chart Review - Review Complete

How many sick call records were reviewed?	25
Of the sick call records reviewed, how many were the third time that the patient complained about the same issue?	2
Of the sick call records where the encounter was the third time that the patient has complained about the same issue, how many were referred to a provider?	2
Of the sick call records reviewed, how many included a full set of vital signs?	23
Of the sick call records reviewed, how many had a pain scale greater than 0?	14
Of the sick call records with a pain scale greater than 0, how many indicated that the pain was addressed?	14
Of the sick call records reviewed, how many included nursing protocols/guidelines referenced by name in the documentation?	22
Of the sick call records reviewed, how many included the reason documented in the "Reason" field?	25
Of the sick call records reviewed, how many had the reason for visit from an approved category?	25
Of the sick call records reviewed, how many were addressed by a nurse?	22
Of the sick call records addressed by a nurse, how many followed the SOAP format of documentation with appropriate nursing diagnosis?	22
Does the facility have a defined process in place addressing sick call services?	Yes
Sick Call Records Findings	2 out of 23 sick chart found without a full set of vital sign
Sick Call Records Deliverables	Re-edcuate and remind nurses to obtain a full set of vital sign for each encounter.

Suicide Watch Chart Review - Review Complete

How many suicide watch records were reviewed?	4
Of the suicide watch records, how many had a patient evaluated for suicide risk by a mental health profession or physician within 24 hours of being placed on suicide?	4
	2

AMERICAN OVERSIGHT

Of the suicide watch records, how many had a patient assessed to determine if a suicide smock was medically indicated via a Special Needs form?	
Of the suicide watch records, how many had the need for finger food annotated via a Special Needs form?	2
Of the suicide watch records, how many had a daily mental health assessment conducted and documented by a mental health or mid-level provider?	4
Of the suicide watch records, how many had a patient released from suicide watch?	4
Of the suicide watch records, how many had a patient released from suicide watch by a mental health provider or physician?	4
Of the suicide watch records, how many had a suicide risk assessment conducted prior to release from suicide watch?	4
Of the suicide watch records, how many had checks conducted and documented at least every eight hours by clinical staff?	4
Of the suicide watch records, how many had checks conducted and documented at least every 15 minutes by custody staff?	4
Suicide Watch Pre-Audit Findings	no special need form for finger food and suicide mock noted in 2 chart.
Suicide Watch Pre-Audit Deliverables	Notified and reminded the mental health providers to complete special need form for finger food and suicide mock for every suicide watch patient.

Suicide Watch Observation - Review Complete

How many patients are on suicide watch?	0
Of the patients on suicide watch, how many have a nursing assessment performed within the past 8 hours?	No data reported
Of the patients on suicide watch, how many have 15 minute checks being performed on a staggered schedule?	No data reported
Of the patients on suicide watch, how many have an assessment by a mental health or mid-level provider within the last 24 hours?	No data reported
Of the patients on suicide watch, how many have a restrictive environment compliant with current orders?	No data reported
Suicide Watch Encounters Findings	No suicide watch observed during this health assessemtn.
Suicide Watch Encounters Deliverables	None

Training - Review Complete

How many training folders were reviewed?	25
Of the training folders reviewed, how many had a HSD-500?	25

Year	Site	Explanation
FY 2017 only	• Stewart Detention Center	• Site closed in NOV 2018. Therefore, no reports were documented for **2019-2020**. Unable to not find a report for **2018** likely due to the site closing.
FY17-19 (Pending 2020 Onsite Assessment)	• South Texas Detention Complex (Pearsall) • Jena/Lasalle Detention Facility • Houston Contract Detention Facility	• Houston: missing **2018** report. An assessment was not completed due to a hurricane that damaged the facility. • **2020**: All three of these sites are scheduled for an onsite assessment in FY2020. Site visits are on hold pending reversal of travel restrictions.
FY17-19 (Pending 2020 Self-assessment Assessment)	• Eloy Federal Contract Facility (Eloy) • Northwest Detention Center (Tacoma) • Port Isabel Detention Center (PIDC) • Otay Mesa Detention Center (San Diego) • Florence Correctional Center • El Paso Service Processing Center	• **2020**: All six of these sites are scheduled for a self-assessment in FY2020. Self-assessment reports are due June 2020.

(b)(7)(E)

AMERICAN OVERSIGHT

Accreditation - Review Complete

Last ACA Accreditation	2014-11-17
Last ACA Findings	NO DATA
Last NCCHC Accreditation	2014-04-28
Last NCCHC Findings	Essential Standards Not in Compliance J-A-06 Continuous Quality Improvement Program J-G-04 Basic Mental Health Services Important Standard Not in Compliance J-D-05 Hospital and Specialty Care J-A-06 Continuous Quality Improvement Program (E). The comprehensive CQI program monitors major aspects of health care through a multidisciplinary committee that meets at least quarterly. The membership includes the HSA, CQI nurse, pharmacist, dentist, medical records clerk, and staff nurses as needed. An outcome CQI study examined glycosylated hemoglobin levels in diagnosed diabetic patients. Patients participated in education programs on disease process, diet, medication compliance, foot care and exercise. The majority of patients showed a decrease in their A 1 C levels over a three month period. The second study examined the prenatal care, specialized care and post-partum care of high risk pregnant inmates. Collaboration with community-based obstetricians resulted in newly implemented processes which improved the care delivered to all pregnant inmates. A process CQI study related to the influx of patients on medications that caused a delay to chronic care. Mid-level providers' schedules and locations were established. The nurse practitioners examined new intakes in the clinic room attached to housing. This move raised the threshold to 90%, as new intakes were examined in chronic care clinics within 72 hours and medications were started. A second process study examined the intake process because it was very time consuming and resulted in more than a 12 hour wait to complete. Schedules were modified, officers were educated and a new process was established. Now when the transportation bus arrives, the nurse goes on the bus to conduct a brief receiving screening to determine which new arrivals need to be seen as soon as possible. Those patients are then placed ahead of the others and go directly to the clinic for further evaluation. However, the responsible physician is not involved in the CQI program. He does not attend meetings or take part in the outcome or process studies, nor did he

AMERICAN OVERSIGHT

participate in the review of the CQI program. The standard is not met Corrective action is required for Compliance Indicator #2. The responsible physician should be involved in the CQI program, e.g., by identifying thresholds, interpreting data, and solving problems. Acceptable documentation includes a copy of CQI minutes demonstrating that the responsible physician is taking an active role in the CQI program. Documentation should also indicate how the responsible physician will be involved in the CQI program in the future. In order to receive accreditation, verification that this standard has been met is required. J-G-04 Basic Mental Health Services (E). On-site outpatient services includes the identification and referral of inmates with mental health needs, crisis intervention services, psychotropic medication management when indicated, short term individual counseling, and follow-up as needed. There are no organized psychosocial/psychoeducational programs. The standard is not met Corrective action is required for Compliance Indicator #2d. Regardless of a facility's type or size, basic on-site outpatient services should include individual counseling, group counseling, and psychosocial/psychoeducational programs. Acceptable documentation includes verification that psychosocial/psychoeducational programs will be available to inmates who need such services; the frequency and duration of such services should also be noted. In order to receive accreditation, verification that this standard has been met is required. J-D-05 Hospital and Specialty Care (I). Arrangements with a local hospital for inpatient medical and specialized medical outpatient care are by verbal agreement. Upon the patient's return from the hospital, the nurse calls the facility for treatment and follow up orders. The standard is not met. Corrective action is required for Compliance Indicators #1 and 2. Written agreements include a contract, letter of agreement, or memorandum of understanding between the facility and the hospital, clinic, or specialist for the care and treatment of patients. The standard intends that inmates have access to necessary hospitalization and specialty services and that the RHA anticipates and resolves problems in advance of the delivery of specialty care in order to ensure continuity. Agreements should require that the offsite facilities or health professionals give the inmate a summary of the treatment given and any follow-up instructions; this

AMERICAN OVERSIGHT

	information is to accompany the inmate on return to the facility. Acceptable documentation includes copies of written agreements with community hospitals and off-site specialists that include a provision for a summary of treatment and follow-up instructions to be returned with the inmate; an agreement should also clearly specify delivery services. Corrective action is required in order to meet this standard. NOTE: Facility submitted their response to the above findings, which NCCHC accepted. The facility received their initial NCCHC accreditation. Currently, IHSC is awaiting word from NCCHC on their next survey of the facility.
Last PBNDS Accreditation	2016-09-13
Last PBNDS Findings	No medical findings
Comments	NO DATA

Grievances - Review Complete

Number of medical grievances reported through QI/JIC/CRCL/DRIL	83.00
Is there a local SOP for managing grievances?	Yes
Is there an identified grievance officer?	Yes
Is there a log book and is it up to date?	Yes
Number of medical grievances that were not addressed in a timely manner.	3.00
Number of formal grievances.	83.00
Number of informal grievances.	0.00
Findings	Less than 3 percent not addressed timely. Not significant.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Risk Management - Review Complete

Trends	NO DATA
Number of active RCAs/SOEs	1.00
Number of RCAs or SOEs completed during the last six (6) months.	1.00
Number of corrective actions generated from RCAs or SOEs during the last six (6) months.	0.00
List all corrective actions identified in the preceding field and note their status and due dates.	NO DATA
Findings	Pending RCA related to mortality review with IIU. Pending further review.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Medication Administration - Review Complete

Is pre-pouring occuring?	No - See findings below.
Are nurses adhering to the six rights of medication administration (right patient, right drug, right route, right dose, right time, and right documentation)?	Yes
Are nurses using two forms of identification prior to administration?	Yes
Are mouth checks being conducted with every administration?	Yes
Are nurses administering only medications that they prepare?	Yes
Are all entries in the MAR complete (allergies, staff initials, etc)?	Yes
Number of all medication refusals documented on the MAR.	1.00
Of the identified medication refusals from the MAR, how many refusals did not have accompanying eCW documentation?	10.00
Number of high risk medication refusals.	5.00
Of the identified high risk medication refusals, how many times were providers NOT notified of the refusal?	1.00
Are nurses documenting the medication administration immediately after the medication is administered?	Yes
Findings	The nurse did an excellent job with the medication administration. She signed as she administered. The nurses are placing the refusal on the MAR however there is no documentation or explanation on the back of the MAR for the reason for refusal. There was only one encounter to the MLP for high risk medications.
Deliverables	The Nurse Manager will teach/retrain the nurses on the process of completing MAR refusal, including notification to the MLP. Explain High risk medication to the nurses. Ensure the process is completed appropriately.

AMERICAN OVERSIGHT

Emergency Preparedness and Response- Review Complete

Is there documentation of the man-down drills on each shift (once per month), mass casualty drills, and fire drills that have been conducted?	Yes
Do emergency scenarios vary?	Yes
Is the difference between a drill and an actual event evident in the write-up?	Yes
Do all staff participate in the drills?	Yes
Are all staff trained on emergency equipment?	Yes
Is emergency equipment checked daily and documented?	Yes
Is there documentation to support the training?	Yes
Did all staff receive an "after-action" debriefing?	Yes
If mortality related response, did staff involved submit a sequence of events statement of occurrence within 24 hours of incident and offered any adjustment support?	Yes
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event?	Yes
Findings	No findings
Deliverables	NO DATA

Consent Forms - Review Complete

Number of consent forms reviewed.	25.00
Number of consent forms that were complete (not missing detainee signature, witness, or date).	25.00
Number of dental consent forms among the identified consent forms.	3.00
Number of dental consent forms that were complete (missing detainee signature, witness, or date).	3.00
Number of psychotropic consent forms among the identified consent forms.	1.00
Number of psychotropic consent forms that were complete (not missing detainee signature, witness or date).	1.00
Number of consent forms completed by a staff member other than the one completing the intake encounter.	0.00
Among the consent forms completed by a staff member other than the one completing the intake encounter, how many addressed the use of translation?	0.00
Findings	5 detainees were identified to be Psychotropic meds. 4 out of the 5 A numbers (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) did not have the psychotropic consent forms on file. Please assess on on-site observations
Deliverables	1st A# consent found. 2nd Consent pending scanning, 3rd ASF detainee, 4 th Incorrect A#.

AMERICAN OVERSIGHT

Transfers - Review Complete

Number of transfers reviewed.	25.00
Number of transfers authenticated appropriately (signed, stamped, and dated).	25.00
Number of transfers initiated in eCW.	25.00
Number of transfers completed by LVN or above.	25.00
Number of transfers with TB clearance annotated correctly.	22.00
Out of the transfers reviewed, how many had a positive chest X-ray?	2.00
Out of the transfers with positive chest X-ray, how many had lab results documented to verify non-infectiousness?	0.00
Out of the transfers reviewed, how many have active TB?	0.00
Out of the transfers with active TB, how many are not being treated for TB?	0.00
Number of transfers with chronic medical conditions or lack thereof annotated.	14.00
Number of transfers with medication instructions clearly provided.	14.00
Number of transfers signed by a proper level provider.	25.00
Findings	(b)(6); (b)(7)(C) Transfer summary indicated TB screening modality as "CXR", but documentation reflected "PPD results" (b)(6); (b)(7)(C) Detainee with TB: Transfer summary indicated a positive CXR, but does not indicate negative labs or that a copy of the TB-CM was attached. TB-CM is still pending TB classification. Also transfer summary indicates that detainee was not being treated for Active TB, but TB medications are listed. (b)(6); (b)(7)(C) Transfer summary indicated "TB screening modality" as symptom screening, should reflect CXR as noted below on the transfer summary.

Intake Screening Review - Review Complete

Number of intake screenings reviewed.	25.00
Number of intake screenings with detainee identified with at least two detainee identifiers.	25.00
Of the intake records reviewed, how many used a translator?	21.00
Of the intake screening records that used a translator, how many listed a translator name or ID number?	21.00
Of the intake screening records that did not use a translator, how many listed a reason for not using a translator?	4.00
Number of notes with TB clearance noted (PPD, CXR, current CXR from other facility).	25.00
Of the intake screening records, how many were TB negative?	25.00
Of the intake screening records that are TB negative, how many were signed, dated, and stamped by an RN or above?	7.00
Of the intake screening records, how many were TB positive?	0.00
Of the intake screening records that are TB positive, how many were signed, dated, and stamped by an RN or above?	0.00
Number of intake screenings with a complete pain assessment using the pain scale indicator.	0.00
Number of intake screenings with pain scale greater than 0.	1.00
Of the intake screenings with a pain scale greater than 0, how many were addressed?	1.00
Number of intake screenings with mental health screening completed.	25.00
Number of intake screenings that used the eCW Intake Screening template.	25.00
Of the intake screenings that used the eCW Intake Screening template, how many were completed appropriately (i.e., default answers changed to reflect the patient's response)?	25.00
Number of intake screenings with clinically significant findings.	6.00

AMERICAN OVERSIGHT

Of the intake screenings with clinically significant findings, how many were referred appropriately?	2.00
Number of intake screenings reviewed by an RN or above within 24 hours.	1.00
Findings	18 of out 25 Intake records reviewed, did not have TB documentation that was signed, dated and stamped by RN or above. During intake screening, detainee "states she has been sexually abused by partner. Does not want to speak to MH @ this time." However, there is no refusal form in the chart. Detainee responded affirmatively to having ever been physically or sexually abused; 7 years old; no mental health referral initiated 45-year old detainee indicates during Intake screening that they had a CVA 22 years ago. Intake screening coded as normal and scheduled for PE-S Intake screening conducted by LVN; RN documented their confirmatory sign-off, but not within 24 hours. Intake signed off on by LVN 4/1/17; Confirmatory sign-off by RN on 4/3/17 Of the 25 Intake charts reviewed, 4 were conducted by a LVN, requiring review by a RN or higher. Of those four charts, 1 was reviewed by a RN within 24 hours. The three others were reviewed by a RN, but not within 24 hours.

Intake Screening Observations - Review Complete

Number of intake screenings observed.	4.00
Number of intake screening observations where the nurse reviewed the prescreen and transfer paperwork prior to initating the intake screening.	4.00
Number of intake screening observations where a full set of vital signs were taken.	4.00
Number of intake screening observations that used language services.	2.00
Of the intake screening observations that used language services, how many were appropriately conducted?	2.00
Number of intake screenings observations documented in eCW within one hour of the evaluation.	4.00
Number of intake screening observations where the patient was educated on access to care, upcoming PE appointment, and the grievance process.	0.00
Number of intake screening observations with security advice of special needs and housing disposition.	0.00
Of the intake screening observations with security advice, how many contained clear communications?	0.00
Findings	The detainees were educated on access to care but were not educated on PE appointments and the grievance process.
Deliverables	The HSA is aware and the staff was educated on the entire process to include PE appointments and the grievance process.

AMERICAN OVERSIGHT

Chronic Care Review - Review Complete

Number of chronic care encounters reviewed.	25.00
Number of chronic care encounters with appropriate referrals based on category and severity.	9.00
Number of chronic care encounters with a PE-C completed within 48 hours.	18.00
Number of chronic care encounters with chronic condictions properly document in eCW Problem List (e.g., asthma, hypertension, etc).	25.00
Number of chronic care encounters with medications.	25.00
Of the chronic care encounters with medications, how many were provided or continued appropriately?	24.00
Number of chronic care encounters with psychiatric medications.	4.00
Of the chronic care encounters with psychiatric medication, how many encounters indicated that the detainee was seen by an MD or MLP every 30 days for medication assessment or review?	4.00
Of the chronic care encounters with psychiatric medication, how many encounters indicated that the detainee was seen by an MD or psychiatrist every 90 days?	4.00
Number of chronic care patients identified as stable.	10.00
Of the stable chronic care patients, how many encounters indicated that the detainee was seen within 90 days?	15.00
Number of chronic care patients identified as unstable.	0.00
Of the unstable chronic care patients, how many encounters indicated that follow-up appointments were scheduled earlier than 90 days?	6.00
Number of chronic care encounters where a global alert (IHSC 834 or electronic equivalent) was completed.	19.00
Number of chronic care encounters where baseline medical data was document on form IHSC 847 or electronic equivalent.	25.00

Findings

AMERICAN OVERSIGHT

	1) 9 charts were appropriately referred based on category/severity but remainder did not require referrals 2) only 18 PE-C were completed within 48 hours 3) 1 particular patient's Cholesterol medication was not continued and was clinically indicated 4) Only 10 charts were identified as Stable/Good Control; poor documentation of the Status of Chronic Care Control (Stable/Fair/Good ect) Recommend use of Chronic Care Templates which includes the necessary status control 5) No chart was identified as Poor Control when 9 should have been identified as Poor Control with sooner chronic f/u (Less than 90 days) for overal better management 6) Only 19 charts had Global Alert completed/documented 7) Recommend
	(b)(5)
Deliverables	NO DATA

Chronic Care Observations - Review Complete

Number of chronic care encounters observed.	5.00
Number of chronic care encounters observed that utilized language services.	5.00
Number of chronic care encounters observed that were completed within the timeframe indicated by a previous visit (90 days for stable intake screening or stable prior chronic care visit, >90 days for unstable patients).	5.00
Findings	No findings.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Physical Examinations Review - Review Complete

Number of physical examinations reviewed.	25.00
Number of physical examinations reviewed that used language services.	25.00
Of the physical examinations that used language services, how many contained identification of the translator/interpretter (name, ID, etc)?	25.00
Number of physical examinations reviewed for juveniles.	0.00
Of the physical examinations for juveniles, how many were completed within 7 days of arrival to the facility?	0.00
Number of physical examinations reviewed for adults.	25.00
Of the physicial examinations for adults, how many were completed within 14 days of arrival to the facility?	25.00
Number of physical examinations with pain assessment.	0.00
Of the physical examinations with pain assessment, how many were addressed?	0.00
Number of physical examinations with clinically significant findings.	0.00
Of the physical examinations with clinically significant findings, how many had a plan to address them?	0.00
Number of physical examinations reviewed by an MD (PE-C within 7 days; PE-S within 14 days).	0.00
Number of physical examinations for females.	0.00
FEMALE ONLY - Number of physical examinations with a record of the last menstrual cycle.	0.00
FEMALE ONLY - Number of physical examinations with a last menstrual cycle greater than 45 days prior to the encounter.	0.00
FEMALE ONLY - Number of physical examinations with a last menstrual cycle greater than 45 days prior to the encounter with appropriate documentation.	0.00
FEMALE ONLY - Number of physical examinations with a pap test offered.	0.00

AMERICAN OVERSIGHT

FEMALE ONLY - Number of physical examinations where a pap test was not indicated.	0.00
FEMALE ONLY - Number of physical examinations where a pap test was not indicated with appropriate documentation.	0.00
Findings	(6) PE-Complex not performed within 48 hours.
Deliverages	NO DATA

Physical Examinations Observations - Review Complete

Number of physical examination encounters observed.	4.00
Number of physical examination encounters with a full set of vital signs taken.	4.00
Number of physical examination encounters observed that were completed within 14 days.	4.00
Number of physical examinations that offered a chaperone.	
Of the physical examinations that offered a chaperone, how many accepted?	0.00
Of the physical examinations with a chaperone, how many contained documentation of the chaperone's name?	0.00
Of the physical examinations that offered a chaperone, how many refused?	0.00
Of the physical examinations that refused a chaperone, how many contained appropriate documentation of refusal?	0.00
Findings	None of the detainees were offered chaperones but there was no examination of the breast or genitalia. There were no signs in the rooms that suggest that a chaperone could be provided.
Deliverables	The HSA made the appropriate signs and the staff were educated on the chaperone use process. Recommend that the PE template include the use of chaperones.

AMERICAN OVERSIGHT

Sick Call Review - Review Complete

Number of sick call encounters reviewed.	25.00
Number of sick call encounters where the encounter was the third time that the patient has complained about the same issue.	3.00
Of the sick call encounters where the encoutner was the third time that the patient has complained about the same issue, how many were referred to a provider?	4.00
Number of sick call encounters with a full set of vitals including pain raiting and weight.	25.00
Number of sick call encounters with a pain scale greater than 0.	12.00
Of the sick call encounters with a pain scale greater than 0, how many indicated that the pain was addressed?	9.00
Number of sick call encounters where nursing protocols/guidelines are referenced by name in the documentation.	12.00
Number of sick call encounters where the reason is documented in the "Reason" field.	17.00
Number of sick call encounters where the reason for the visit was from an approved category.	25.00
Number of sick call encounters addressed by a nurse.	25.00
Of the sick call encounters addressed by a nurse, how many followed the SOAP format of documentation with appropriate nursing diagnosis?	20.00
Findings	1) SOAP Format not completely/well documented (subjective and physical exam findings not complete/well documented or omitted) 2) Two occurrance where Inappropriate verbal order for antibiotic prescription medication given from provider to nurse without face to face documentation/evalutation by the provider 3) Remind to use nursing diagnosis
Deliverables	NO DATA

AMERICAN OVERSIGHT

Sick Call Observations - Review Complete

Does the facility have a defined process in place addressing sick call services?	Yes
Is the facility using a team-based approach for sick call?	Yes
Was sick call offered to detainees in segregation	Yes
For detainees that were not seen in segregation, is there a documented note in the medical record?	No - See findings below.
Findings	All the detainees in Segregation were seen. The detainees sign up for sick but they are consistently not seen on the day they sign up. The wait varies and is between 2-7 days. The log is not completed properly.
Deliverables	(b)(5)

AMERICAN OVERSIGHT

MHU 23 Hour Observation Review - Review Complete

Number of MHU 23 hour observation records reviewed.	
Number of MHU 23 hour observation records with admission encounters.	3.00
Number of MHU 23 hour observation records with discharge encounters.	3.00
Number of MHU 23 hour observation records with mental health and physical conditions with provisional diagnosis provided on admission.	3.00
Number of MHU 23 hour observation records with telephone order admission.	3.00
Number of MHU 23 hour observation records with telephone order admission that were signed by a provider within 48 hours.	3.00
Number of MHU 23 hour observation records labeled "Observation".	0.00
Findings	The staff training needs to occur to begin placing "Observation" under reason.
Deliverables	NO DATA

MHU Full Admission - Review Complete

Are all patients within sight or hearing of a qualified health professional?	N/A - See findings below.
Number of nurses in the MHU at time of observation.	0.00
Number of patients in the MHU at time of observation.	0.00
Number of MHU full admission records reviewed.	20.00
Number of MHU full admission records with admission encounters.	20.00
Number of MHU full admission records with discharge encounters.	16.00
Number of MHU full admission records with mental health and physical conditions with provisional diagnosis provided on admission.	20.00
Number of MHU full admission records with no PE within the past year.	0.00
Of the MHU full admission records with no PE within the past year, how many had a PE completed during MHU admission?	0.00
Number of MHU full admission records with acuity level assigned.	19.00
Number of MHU full admission records with all medications placed on pill line.	20.00
Number of MHU full admission records with 24 hour chart reviews everyday.	20.00
Number of MHU full admission records for patients in segregation for medical overflow.	0.00
Of the MHU full admission records for patients in segregation for medical overflow, how many records indicate that the patients were rounded on according to MHU policy?	0.00
Number of MHU full admission records with a nursing care plan.	20.00
Of the MHU full admission records with a nursing care plan, how many records indicate that the plan was addressed and reviewed daily?	20.00
Number of MHU full admission records where patient education was provided daily (e.g., admission education, daily plan of care).	20.00

AMERICAN OVERSIGHT

Number of MHU full admission records with mental health diagnoses.	2.00
Of the MHU full admission records with mental health diagnoses, how many records indicate that the patient was assessed on initial admission, re-evaluated in seven days, and every seven days thereafter?	2.00
Number of MHU full admission records without mental health diagnoses.	18.00
Of the MHU full admission records without mental health diagnoses, how many records indicate that the patient was assessed every 30 days?	0.00
Findings	(1) chart without an observation level (4) charts without discharge encounters
Deliverables	NO DATA

Suicide Watch Review - Review Complete

Number of suicide watch records reviewed.	1.00
Number of suicide watch records where the patient was evaluated for suicide risk by a mental health profession or physician within 24 hours of being placed on suicide watch.	1.00
Number of suicide watch records where the patient was assessed to determine if a suicide smock was medically indicated.	1.00
Number of suicide watch records where the need for finger foos was annotated.	1.00
Number of suicide watch records where a daily mental health assessment was conducted and documented by a mental health or mid-level provider.	1.00
Number of suicide watch records where the patient was released from suicide watch by a mental health provider or physician.	1.00
Number of suicide watch records where a suicide risk assessment was conducted prior to release from suicide watch.	1.00
Number of suicide watch records where checks were conducted and documented at least every eight hours by clinical staff.	1.00
Number of suicide watch records where checks were conducted and documented at least every 15 minutes by custody staff (IHSC form uploaded and within record).	1.00
Findings	(b)(6); (b)(7)(C) This reviewer only found one chart in the last year.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Suicide Watch Observation - Review Complete

Number of patients on suicide watch.	0.00
Number of patients on suicide watch with nursing assessment performed within the past 8 hours.	0.00
Number of patients on suicide watch with 15 minute checks being performed on a staggered schedule.	0.00
Number of patients on suicide watch with an assessment by a mental health or mid-level provider within the last 24 hours.	0.00
Number of patients on suicide watch with restrictive environment compliant with current orders (e.g., smock, finger food, activity, etc).	0.00
Findings	There were no detainees on suicidal watch during this visit.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Hunger Strike - Review Complete

Number of hunger strike records reviewed.	3.00
Number hunger strike records with I&O's tracked via eCW flowsheet (approved eCW form included).	3.00
Number of hunger strike records which indicate that the patient was educated with documentation on the adverse effects of a hunger strike.	3.00
Number of hunger strike records which indicate that the patient was evaluated by a mental health provider.	3.00
Number of hunger strike records with complete orthostatic vital signs, height, weight, urinalysis, mental health evaluation, and physical assessment during the initial evaluation.	0.00
Number of hunger strike records with orthostatic vital signs including weight taken every 24 hours.	3.00
Number of hunger strike records that were discontinued by the Clinical Director or a physician.	3.00
Number of hunger strike records with special needs.	0.00
Of the hunger strike records with special needs, how many records indicate that the needs were addressed?	0.00
Findings	Inconsistent charting of orthostatic vital signs. No special needs forms documented. Recommend review of the HS policy, review of how to chart orthostatic vital signs to include qualifiers for the HR and BP (i.e. sitting/standing/lying BPs and HRs can be qualified in eCW), recommed review of how to chart SNFs
Deliverables	NO DATA

AMERICAN OVERSIGHT

Segregation - Review Complete

Number of segregation records reviewed.	7.00
Number of segregation records that indicate the patient was medically cleared for segregation.	7.00
Number of segregation records where daily segregation rounds by nursing are documented.	7.00
Number of segregation records where the patient was offered sick-call services daily (typically offered during rounds).	7.00
Number of segregation records where the patient's mental health status was evaluated at least every 30 days.	0.00
Number of segregation records where the patient was seen weekly by mental health.	7.00
Findings	No findings.
Deliverables	NO DATA

After Hours Medication Review - Review Complete

Number of after hours medication records reviewed.	0.00
Number of after hours medication records with the patient's identification number documented.	0.00
Number of after hours medication records with medication order(s) documented in eCW.	0.00
Number of after hours medication records that were generated by a nurse as a telephone order.	0.00
Number of after hours medication records that were generated by a nurse as a telephone order and were signed by a provider.	0.00
Does the pharmacy have a reconciliation process?	NO DATA
Does the pharmacy follow the reconciliation process?	NO DATA
Findings	NO DATA
Deliverables	NO DATA

AMERICAN OVERSIGHT

After Hours Medication Observation - Review Complete

Is a medication log in place and reflective of quantities of medication stored in the night cabinet?	Yes
Do line entries contain the date, time, patient name, alien number, medication name, and quantity removed?	No - See findings below.
Are after hours medication orders documented as dispensed in eCW?	No - See findings below.
Is the night cabinet, clean, stocked, and organized?	Yes
Is the night cabinet reviewed three times per week?	No - See findings below.
Are medications in the night cabinet within their use date (i.e., not expired)?	Yes
Findings	The medications were up to date with labelling however when they were retrieved from the cabinet the slips were not completed in its entirety. The A numbers or other identifiers were not utilized for removal therefore we could not confirm the documentation in eCW.
Deliverables	The HSA created new sheets with all the required information (A#, Last name, first name) for the retrieval process including the providers information. The staff was educated on the process. This was implemented prior to our departure.

AMERICAN OVERSIGHT

Language Access Review - Review Complete

Number of language access records reviewed.	25.00
Number of records where the patient was asked what language they speak.	22.00
Number of records where the patient's primary langauage or languag of choice is documented in their medical record.	24.00
Number of records where the translator use was addressed and documented (interpreter name or number, and language).	24.00
Reasons for why a translator was not used.	In 5 out of 25 charts, the detainee's primary language documented on Intake was Spanish, but the provider/nurse documented that the detainee spoke English fluently in the encounters reviewed (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) In 3 out of 25 charts, the detainee was reported to speak English, but the language was not docmented in the encounter note. However, the provider/nurse did document that the detainee spoke English fluently to satisfy the question "reason no interpreter was used." (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) One chart had an interpreter number documented as "000." This is likely not correct as interpreter numbers documented in other charts are six digits (b)(6); (b)(7)(C) Overall, this reviewer recommends: (1) Ensuring that the detainee's primary language is clarified, (2) Using an interpreter when the detainee's primary language is not English or if the provider/nurse does not speak the detainee's primary language, and (3) Documenting the language used in encounters
Findings	NO DATA
Deliverables	NO DATA

AMERICAN OVERSIGHT

Language Access Observations - Review Complete

Are the "I Speak" posters and pocket guides readily available and posted in the clinic?	Yes
Does the facility have a process in place to address accessing sign language interpreters and telecommunication (TDD/TTY) for individuals with hearing disabilities?	Yes
Findings	GEO has the TTY line available for the detainees.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Diagnostic Services - Review Complete

Are on-site diagnostic services (laboratory and radiology) certified or licensed to provide those services?	Yes
Is there a procedure manual for each service provided?	Yes
Does each manual include protocols for the calibration of testing devices to ensure accuracy.	Yes
Is there a current certificate for CLIA-waived testing?	Yes
Are all aspects of the CLIA-waived standards addressed by written policy and defined procedures?	Yes
Are invoices from LabCorp or other radiology companies reconciled?	Yes
Are radiation signs posted on all doors leading to areas with radiation producing equipment?	Yes
Are radiation exposure reports reviewed quarterly?	Yes
Are staff seen wearing dosimeter badges while performing radiography services or while working in an area with radiation producing equipment?	Yes
Are staff dosimeter badges and controls stored in a central location and not near a radioactive source?	Yes
Are there safety checks for biomedical and diagnostic equipment?	Yes
Findings	Further clarification is needed in items 3 and 11- calibration of testing devices to ensure accuracy and saftey checks for medical and diagnostic equipment.
Deliverables	NO DATA

After Hours Medication Chart Review - Review Complete

How many after hours medication log records were reviewed?	25
Of the after hours med log records reviewed, how many records documented the patient's identification number?	25
Of the after hours med log records reviewed, how many records were generated by a nurse as a telephone order?	25
Of the records generated by a nurse as a telephone order, how many were signed by a provider within 24 hours of return for next work shift?	23
Is an After-Hours Cabinet (AHC) medication sign out log in place for the documentation of medications removed?	Yes
Is all the necessary information entered into the fields of the AHC sign out log?	Yes
After Hours Medication Chart Review Findings	2 records generated by a nurse as a telephone order were not signed by a provider within 24 hours of return for next work shift
After Hours Medication Chart Review Deliverables	2 records generated by a nurse as a telephone order were not signed by a provider within 24 hours of return for next work shift; this one provider has been reeducated on the importance of this process

After Hours Medication Observation - Review Complete

Is a medication log in place and reflective of quantities of medication stored in the night cabinet?	Yes
Do line entries contain the date, time, patient name, alien number, medication name, and quantity removed?	Yes
Is the after hours verbal medication order entered into eCW by the prescriber upon return to duty?	No
Is the after hours medication administration properly documented on the MAR or in the electronic health record?	Yes
Is the night cabinet, clean, stocked, and organized?	Yes
	Yes

AMERICAN OVERSIGHT

Is the After-Hours Cabinet physically inspected (by pharmacist or designee) on a monthly basis to ensure the absence of expired, recalled or deteriorated medications?	
After Hours Medication Encounters Findings	Is the after hours verbal medication order entered into eCW by the prescriber upon return to Duty: Telephone Orders is done by nurse the APP comes in and does not complete the order in eCW.
After Hours Medication Encounters Deliverables	Is the after hours verbal medication order entered into eCW by the prescriber upon return to Duty: Telephone Orders is done by nurse the APP comes in and does not complete the order in eCW. The new Smart system will assist with this issue; along with enforcement of proper process to medical staff

Chronic Care Chart Review - Review Complete

How many chronic care records were reviewed?	25
Of the chronic care records reviewed, how many had a PE--Complex completed within two business days?	25
Of the chronic care records reviewed, how many had chronic conditions properly documented in eCW Problem List?	25
Of the chronic care records reviewed, how many detainees arrived at the facility on chronic medications?	24
Of the chronic care records with medications, how many encounters indicated that medications were continued as clinically indicated??	24
Of the chronic care records reviewed, how many detainees had psychiatric medications?	2
Of the chronic care records with psychiatric medications, how many encounters indicated that the detainee was seen by an MD or MLP every 30 days for medication assessment or review?	2
Of the chronic care records with psychiatric medications, how many encounters indicated that the detainee was seen by an MD or psychiatrist every 90 days for chronic care management?	0
Of the chronic care records reviewed, how many chronic care patients were identified as stable?	1
Of the stable chronic care patients, how many encounters indicated that the detainee was seen within 90 days?	25
Of the chronic care records reviewed, how many chronic care patients were identified as unstable?	0
Of the unstable chronic care patients, how many encounters indicated that follow-up appointments were scheduled earlier than 90 days ?	0
Of the chronic care records reviewed, how many had a global alert (IHSC 834 or electronic equivalent) completed?	2
Chronic Care Records Findings	Detainees that were on psychiatric medication length of stay was less then 90 days

AMERICAN OVERSIGHT

Chronic Care Records Deliverables	none

Chronic Care Observation - Review Complete

How many chronic care encounters were observed?	10
Of chronic care encounters observed, how many were considered stable patients?	9
Of the stable patients observed, how many were completed within the appropriate timeframe?	9
Of chronic care encounters observed, how many were considered unstable patients?	1
Of the unstable patients observed, how many were completed within the appropriate timeframe?	1
Of the chronic care encounters observed, how many had a treatment plan?	10
Chronic Care Encounters Findings	None

Consent Forms Findings	none
Consent Forms Deliverables	none

Daily Assignment Sheets - Review Complete

How many daily assignment sheets were reviewed?	10
	10

AMERICAN OVERSIGHT

Of the daily assignment sheets reviewed, how many were archived appropriately?	
Of the daily assignment sheets reviewed, how many had at least one emergency team identified per shift?	10
Daily Assignment Sheets Findings	The assignments are given at shift reprot daily and are written on a dry erase board in the nurses station. The reviewer noted this information given over a 10 day period.
Daily Assignment Sheets Deliverables	none

Diagnostic Services - Review Complete

Are laboratory services provided in adherence with CLIA Waived testing?	Yes
Is there a current certificate for CLIA-waived testing?	Yes
Are radiation signs posted on all doors leading to areas with radiation producing equipment?	Yes
Is there documentation of a quarterly (monthly for declared pregnancies) review of the dosimetry report by the HSA or Compliance Officer?	Yes
Are staff seen wearing dosimeter badges while performing radiography services or while working in an area with radiation producing equipment?	Yes
Are staff dosimeter badges and controls stored in a central location and not near a radioactive source?	Yes
Diagnostic Services Findings	none
Diagnostic Services Deliverables	none

Emergency Preparedness and Response Observation - Review Complete

Is there documentation showing completed date and time of man-down drills?	Yes
Is there documentation showing completed date and time of fire drills?	Yes
Is there documentation showing completed date and time of mass casualty drills?	Yes
Are clinic staff trained on emergency equipment?	Yes
Do emergency scenarios vary?	Yes
Is it evident that the emergency incident was either an actual event, full drill, or table top exercise?	Yes
Is there a system in place to distribute an after-action report to all staff?	Yes

AMERICAN OVERSIGHT

Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event ?	Yes
Emergency Preparedness and Response Findings	none
Emergency Preparedness and Response Deliverables	none

Environmental Health Observation - Review Complete

Are clinic Safety Data Sheets (SDS) files complete, current, and accessible?	Yes
Are hazardous chemicals, including cleaning supplies, labeled and securely stored?	Yes
Are Public Health, Safety, and Preparedness Toolkit checklists maintained locally and documented (with CO/HSA Signatures or designee) to show corrective action with completion date?	Yes
Do Airborne Isolation and Inspection (AII) rooms requiring transmission based precautions have appropriate signage for the required precaution(s)?	Yes
Is documentation of daily checks on (AII) rooms' negative pressures complete?	Yes
Is the OSHA Form 300A summary completed and posted in clinic from February 1st through April 30th each year?	Yes
Environmental Health Findings	none
Environmental Health Deliverables	none

Grievances - Review Complete

Number of medical grievances reported through QI/JIC/CRCL/DRIL.	2
Is there a local SOP for managing grievances?	Yes
Is there an identified grievance officer?	Yes
Is there a log book and is it up to date?	Yes
Number of medical grievances that were not addressed in a timely manner.	0
Number of formal grievances.	2
Number of informal grievances.	0
Grievances Findings	none
Grievances Deliverables	none

Hunger Strike Chart Review - Review Complete

How many of hunger strike records were reviewed?	0
Of the hunger strike records reviewed, how many had with I&O's tracked in the health record?	0
Of the hunger strike records reviewed, how many indicated that the patient was educated on the adverse effects of a hunger strike and education was documented in health record?	0
Of the hunger strike records reviewed, how many indicated that the patient was counseled on termination of hunger strike and counseling was documented in health record?	0
Of the hunger strike records reviewed, how many indicated that the patient was evaluated by a mental health provider?	0
Of the hunger strike records reviewed, how many had a complete medical history, orthostatic vital signs, height, weight, urinalysis, mental health evaluation, physical assessment, clinically necessary laboratory tests deemed appropriate, and modification or augmentation of standard treatment protocols when medically indicated during the initial evaluation or refusal form?	0
Of the hunger strike records reviewed, how many had orthostatic vital signs including weight taken every 24 hours?	0
Of the hunger strike records reviewed, how many were discontinued by the Clinical Director, or a physician?	0
Of the hunger strike records that were discontinued, how many indicated that IHSC healthcare personnel offered detainee appropriate follow-up with behavioral health and medical care and offer was documented in patient's chart?	0
Of the hunger strike records reviewed, how many had special needs to include restriction of commissary items?	0
Hunger Strike Records Findings	no patients identified during the evaluation period
Hunger Strike Records Deliverables	n/a

Hunger Strike Observation - Review Complete

How many patients were on a hunger strike at the time of observation?	0
Of the patients on a hunger strike, how many was water available for?	0
Of the patients on a hunger strike, how many were offered meals?	0
Of the patients on a hunger strike who were offered food, how much food was offered?	No hunger strikes for the evaluation period.
Of the food offered, how much of the food was eaten?	No data reported
Of the patients on a hunger strike, how many had special needs?	0

AMERICAN OVERSIGHT

Of the special needs patients on a hunger strike, how many records indicated that the needs were addressed?	0
Hunger Strike Encounters Findings	no hunger strikes for the evaluation period
Hunger Strike Encounters Deliverables	n/a

Infectious Disease Prevention - Review Complete

Are hand washing equipment and hand sanitizers available in the clinic?	Yes
Are contact and outbreak investigations documented in the PHSP Unit reporting tool on SharePoint?	Yes
Is hand hygiene monitoring conducted and documented on the quarterly review?	Yes
Infectious Disease Prevention Findings	none
Infectious Disease Prevention Deliverables	none

Intake Screen Chart Review - Review Complete

How many intake screen records were reviewed?	25
Of the intake screen records reviewed, how many had detainee identified with at least two detainee identifiers?	25
Of the intake screen records reviewed, how many used a translator?	15
Of the intake screen records that used a translator, how many listed a translator name or ID number ?	15
Of the intake screen records that did not use a translator, how many provide a reason for not using a translator?	10
Of the intake screen records reviewed, how many records had a complete pain assessment using the pain scale indicator?	25
Of the intake screen records reviewed, how many records had a pain scale greater than 0?	1
Of the records with a pain scale greater than 0, how many were assessed?	1
Of the intake screen records reviewed, how many used the eCW Intake Screening template?	25
Of the intake screen records reviewed, how many had clinically significant findings?	6
Of the intake records with clinically significant findings, how many were referred appropriately?	6
Of the intake screen records reviewed, how many were reviewed by an RN or above within 24 hours?	0

AMERICAN OVERSIGHT

Intake Screen Records Findings	5 recorded needed to be reviewed by an RN however this did not occur in the 24 hour timeframe
Intake Screen Records Deliverables	The nurse manager discussed sign off with LPN's during evening and morining report.

Intake Screen Observation - Review Complete

How many intake screen encounters were observed?	10
Of the intake screen encounters observed, how many did the nurse review the prescreen and transfer paperwork prior to initiating the intake screening?	10
Of the intake screen encounters observed, how many included a full set of vital signs?	10
Of the intake screen encounters observed, how many used the eCW Intake Screening template?	10
Of the intake screen encounters that used the eCW Intake Screening template, how many were completed appropriately?	10
Of the intake screen encounters observed, how many was the patient was educated on access to care, upcoming PE appointment, and provided the grievance guide?	10
Of the intake screen encounters observed, how many included security advice of special needs and housing disposition?	0
Intake Screen Encounters Findings	none
Intake Screen Encounters Deliverables	none

Language Access Chart Review - Review Complete

How many language access records were reviewed?	25
Of the language access records reviewed, how many indicate that patient was asked what language he or she speaks?	25
Of the language access records reviewed, how many document the patient's primary language or language of choice in his or her medical record?	25
Of the language access records reviewed, how many addressed and documented the use of a translator?	25
Of the language access records reviewed, how many did not use a translator?	8
Of the language access records that did not use a translator, how many documented reasons why a translator was not used?	8
Language Access Records Findings	none
Language Access Records Deliverables	none

AMERICAN OVERSIGHT

Language Access Observation - Review Complete

Are the "I Speak" posters and pocket guides readily available and posted in the clinic?	Yes
Does the facility have a process in place to address accessing sign language interpreters and telecommunication (TDD/TTY) for individuals with hearing disabilities?	No
Language Access Encounter Findings	We have hearing amplifiers but nothing for someone that is completly deaf
Language Access Encounter Deliverables	ICE leadership is aware

Log Books - Review Complete

How many pharmacy refrigerator temperature logs were reviewed?	5
Of the pharmacy refrigerator temperature logs reviewed, how many have entries per shift for the past three months?	3
Of the pharmacy refrigerator temperature logs reviewed, how many refrigerator temperature logs are out of range?	5
Of the temperature logs that are out of range, how many logs have documentation of action taken and follow-up?	0
Are the sharps secured and the count accurate?	Yes
In review of the past 3 months of sharps counts, are two signatures present for each shift changes?	No
Are the narcotics secured with double lock and counts within the last 3 months accurate?	Yes
In review of past 3 months of controlled substance logs, are two signatures present for each shift change on the narcotics counts?	No
Are the urgent care cart/trauma bag and AEDs checked daily for content, signatures, AED functionality, and expiration for the past 3 months?	No
Log Books Findings	Sometimes log signatures were missing and whole counts were missing.
Log Books Deliverables	(b)(5)

Medication Administration Observation - Review Complete

Is prepouring occurring?	No
How many medication administrations were observed?	10

AMERICAN OVERSIGHT

Of the medication administrations observed, how many times were nurses adhering to ALL six rights of medication administration?	10
Of the medication administrations observed, how many mouth checks were conducted?	8
Of the medication administrations observed, how many times did nurses document the medication administration immediately after the medication was administered?	10
How many MAR entries were observed?	10
Of the MAR entries observed, how many were complete?	0
Of the MAR entries observed, how many medication refusals were documented?	0
Of the identified medication refusals, how many refusals had accompanying eCW documentation ?	0
Of the identified medication refusals, how many were high-risk medications?	0
Of the identified high-risk medication refusals, how many times were providers notified of the refusal?	0
Medication Administration Findings	Errors have been noted on EMARS. Medications were giving past expiration dates.
Medication Administration Deliverables	Work closely with sMARt Team regarding any potential discrepancies .

Meetings - Review Complete

Of the two previous staff meetings, how many were conducted monthly and properly documented?	2
Of the two previous public health, safety, and preparedness meetings, how many were properly documented?	2
Of the two previous quality improvement meetings, how many were conducted quarterly and properly documented?	2
Out of the two previous quarterly ICE/HSA meetings, how many were conducted and properly documented?	2
Meetings Findings	ICE/HSA meetings are conducted on a weekly bases
Meetings Deliverables	none

MHU Full Admission Chart Review - Review Complete

How many MHU full admission records were reviewed?	25
Of the MHU full admission records reviewed, how many had admission encounters?	19

AMERICAN OVERSIGHT

Of the MHU full admission records reviewed, how many had a documented PE within the past year?	22
Of the MHU full admission records without a documented PE, how many received a PE within 24 hours of admission to the MHU?	2
Of the MHU full admission records reviewed, how many had a nursing care plan?	19
Of the MHU full admission records with a nursing care plan, how many records indicate the plan was addressed and reviewed daily?	21
Of the MHU full admission records reviewed, how many had patient education provided daily?	21
Of the MHU full admission records reviewed, how many indicated detainee had an existing mental health diagnosis prior to admission?	4
Of the records that indicate that the detainee had a mental health diagnoses, how many received a mental health reassessment every seven (7) days, or more frequently, if indicated	3
Of the MHU full admission records reviewed, how many records did not have a mental health diagnoses?	21
Of the MHU full admission records without mental health diagnoses, how many records indicate the patient was assessed every 30 days by a MHP?	22
MHU Full Admission Records Findings	1. Of the 25 MHU full admission records reviewed, 6 did not have admission orders documented via the eCW MHU admission template. 2. Two detainees did not have a PE documented within the past year due to being new to IHSC system and came to MHU during intake. One detainee was in MHU for one day then transfered . 3. Of the 25 MHU full admission charts reviewed, nursing care plans were completed per policy, however, there was no documentation indicating the care plan was reviewed/updated daily on 4 of the MHU patients.
MHU Full Admission Records Deliverables	1. Providers will be instructed and educated on utilizing the MHU admission template for all MHU admissions. 2. Providers were educated on policy and need for PEC to be completed within 24 hours of MHU admission. 3. Nursing staff were educated during staff meetings that all MHU full admission require a nursing care plan and that it must be reviewed and/or updated daily.

MHU Full Admission Observation - Review Complete

Are all patients within sight or hearing of a qualified health professional?	Yes
How many nurses are in the MHU full admission at the time of observation?	5
How many patients are in the MHU full admission at the time of observation?	6

AMERICAN OVERSIGHT

How many MHU full admission patients have a 24-hour chart review everyday?	23
Of the MHU full admission records, were 24-hour charts completed appropriately?	No data reported
How many MHU full admission patients have medications?	25
Of the MHU full admissions patients with medicaitons, how many have all medications placed on pill line?	25
MHU Full Admission Encounters Findings	Some MHU templates were completed during a PEC. At times, the MD does not list follow up time frame. Mental Health team is thorough and follow up well. Two detainees were in MHU less than 24 hours.
MHU Full Admission Encounters Deliverables	Medical staff were instructed at time of observation as well as during staff meetings that 24 hour chart reviews are required daily.

Personnel and Credentialing Files - Review Complete

Does the facility have a process for tracking requirements electronically?	Yes
How many personnel and credentialing files were reviewed?	12
Of personnel and credentialing files reviewed, how many were PHS officers?	2
Of the PHS officer records, how mand had at least two years of evaluations (COERS)?	2
Of personnel and credentialing files reviewed, how many were federal civil service employees?	1
Of personnel and credentialing files reviewed, how many were contractors?	9
Of personnel and credentialing files reviewed, how many records are for privileged staff?	5
Of the privileged staff records reviewed, how many were Licensed Independent Practitioners (LIPs)?	5
Of the LIP staff records reviewed, how many had personnel files records current?	5
Of the LIP staff records reviewed, how many had a competency assessment or peer review?	5
Of personnel and credentialing files reviewed, how many contained a current and signed Health and Ability form?	12
Of personnel and credentialing files reviewed, how many contained a signed statement of confidentiality?	12
Of personnel and credentialing files reviewed, how many contained a signed statement of risks and responsibility?	12
	12

AMERICAN OVERSIGHT

Of personnel and credentialing files reviewed, how many contained a signed statement of acknowledgement of understanding of local, national, and residential standards?	
Of personnel and credentialing files reviewed, how many contained a signed release of information form?	12
Of personnel and credentialing files reviewed, how many contained current, valid, and unrestricted license?	12
Of personnel and credentialing files reviewed, how many contained documentation of primary education , license primary source, and annual verification?	10
Of personnel and credentialing files reviewed, how many were reviewed for physicians or psychiatrists?	1
Of the physician or psychiatrist records, how many had documentation of residency?	1
Of the physician or psychiatrist records, how many were board certified?	1
Of the board certified physicians and psychiatrists, how many had documentation of board certification?	1
Of personnel and credentialing files reviewed, how many had a copy of a curriculum vitae or a resume?	12
Of personnel and credentialing files reviewed, how many had current National Provider Data Bank information?	5
Of the staff records reviewed, how many had scope of practice documentation if applicable?	7
Personnel and Credentialing Files Findings	Verification of diploma is needed on one contractor. STGi has been notified and is currently working on getting verification which will be sent over as soon as they receive it. Annual Licensure verification on one contractor is in the process of being verified per STGi. Verification documentation will be sent over as soon as it is processed. There are fees associated with both verifications; therefore, STGi is responsible for payment.
Personnel and Credentialing Files Deliverables	Currently at 90% for a goal of 100%. We are working with the contractor to obtain 100% verification. UPDATE: Spoke with Site HSA on 11/19/2019. All files have been updated and verification has been received for all providers. Issue has been resolved.

Physical Exam Chart Review - Review Complete

How many physical exam charts were reviewed?	25
Of the physical exam charts reviewed, how many used language services?	15
Of the physical examinations that used language services, how many contained identification of the translator or interpreter?	15
Of the physical exam charts reviewed, how many were for juveniles?	0

AMERICAN OVERSIGHT

Of the juvenile physical exam charts reviewed, how many were completed within 7 days of arrival to the facility?	0
Of the physical exam charts reviewed, how many were for adults?	25
Of the adult physical exam charts reviewed, how many PE-S's were completed within 14 days of arrival to the facility?	13
Of the physical exam charts reviewed, how many had a pain assessment?	25
Of the physical exam charts with pain assessment, how many were addressed ?	3
Of the physical exam charts reviewed, how many were reviewed by an MD? PE-C within 7 days.	7
Of the physical exam charts reviewed, how many were reviewed by an MD? PE-S within 14 days.	11
Of the physical exam charts reviewed, how many were for adult females?	5
Of the adult female physical exam charts reviewed, how many had a record of the last menstrual cycle?	5
Of the adult female physical exam charts reviewed, how many had a record with a pap test offered?	0
Of the adult female physical exam charts reviewed, how many had a record where a pap test was not indicated?	5
Physical Exam Records Findings	We have no juveniles; Paps offered, none were indicated 13 - PE-Ss completed within 14 days the others were n/a as they were PE-C per policy. 12 - PE-Cs completed within 14 days the others were n/a as they were PE-S per policy. 5 of the PE-Cs and 2 of the PE-Ss were not reviewed in the proper time frame due to limited staffing availabililty.
Physical Exam Records Deliverables	Working close together with Clinical Services to ensure there is overlap of coverage. During periods of limited staffing.

Physical Exam Observation - Review Complete

How many physical exam encounters were observed?	10
Of the physical exam encounters observed, how many included a full set of vital signs?	10
Of the physical exam encounters observed, how many were completed within the specified timeframe?	10
Of the physical exam encounters observed, how many included a detainee request for a chaperone?	2
Of the physical exam encounters observed, how many had an abnormal vital sign?	2
Of the physical examination encounters observed with an abnormal vital sign, how many were addressed and/or referred to a higher level of care?	2

AMERICAN OVERSIGHT

Of the physical exam encounters observed, how many indicated that a Snellen test was conducted during the examination?	10
Of the physical exam encounters observed, how many were properly designated as either PE-Complex or PE-Simple in accordance with the IHSC Directive on Health Assessments?	10
Of the physical examination encounters observed, how many were referred to the next level of care as directed by IHSC policy?	0
Physical Exam Encounters Findings	None of the PEs required next level of care. Abnormal VS were addressed and refered to a higher lever of care.
Physical Exam Encounters Deliverables	none

Prescreen Observation - Review Complete

How many prescreen encounters were observed?	10
Of the prescreen encounters observed, are language services being used during prescreen if appropriate?	Yes
Of the prescreen encounters observed, how many prescreen encounters had documentation completed in eCW prior to intake screening?	10
Of the prescreen encounters observed, how many prescreening encounters were prioritized to level one when clinically indicated based on self-reported history or objective findings?	10
Prescreen Encounters Findings	english was checked on all prescreens when some only spoke spanish.
Prescreen Encounters Deliverables	Remind staff during shift report and monthly Staff Meetings of the importance of individualizing Templates. Per RHSA Sawyers, site to discuss this with the RHSA and RNM during biweekly triad meetings.

Risk Management - Review Complete

Trends	No data reported
Number of active Root Cause Analyses(RCA)/Sequence of Events (SOE).	0
Number of RCAs or SOEs completed during the last six (6) months.	0
Number of corrective actions generated from RCAs or SOEs during the last six (6) months.	2
List all corrective actions identified in the preceding field and note their status and due dates.	No data reported
Risk Management Findings	No data reported
Risk Management Deliverables	No data reported

Suicide Watch Chart Review - Review Complete

How many suicide watch records were reviewed?	1
Of the suicide watch records, how many had a patient evaluated for suicide risk by a mental health profession or physician within 24 hours of being placed on suicide?	1
Of the suicide watch records, how many had a patient assessed to determine if a suicide smock was medically indicated via a Special Needs form?	1
Of the suicide watch records, how many had the need for finger food annotated via a Special Needs form?	1
Of the suicide watch records, how many had a daily mental health assessment conducted and documented by a mental health or mid-level provider?	1
Of the suicide watch records, how many had a patient released from suicide watch?	1
Of the suicide watch records, how many had a patient released from suicide watch by a mental health provider or physician?	1
Of the suicide watch records, how many had a suicide risk assessment conducted prior to release from suicide watch?	1
Of the suicide watch records, how many had checks conducted and documented at least every eight hours by clinical staff?	1
Of the suicide watch records, how many had checks conducted and documented at least every 15 minutes by custody staff?	1
Suicide Watch Pre-Audit Findings	Only one patient during the evaluation period
Suicide Watch Pre-Audit Deliverables	none

Suicide Watch Observation - Review Complete

How many patients are on suicide watch?	1
Of the patients on suicide watch, how many have a nursing assessment performed within the past 8 hours?	0
	0

AMERICAN OVERSIGHT

Of the patients on suicide watch, how many have 15 minute checks being performed on a staggered schedule?	
Of the patients on suicide watch, how many have an assessment by a mental health or mid-level provider within the last 24 hours?	1
Of the patients on suicide watch, how many have a restrictive environment compliant with current orders?	1
Suicide Watch Encounters Findings	Patient refused to have vitals taken
Suicide Watch Encounters Deliverables	Ensure custody is performing 15min staggered interval checks despite the detainee refusing medical care. Provide follow up to RHSA and RNM during Local Triads.

Training - Review Complete

How many training folders were reviewed?	12
Of the training folders reviewed, how many had a HSD-500?	12
Of the training folders reviewed, how many had a signed position description ?	12
Of the training folders reviewed, how many were registered nurse training folders?	5
Of the registered nurse training folders reviewed, how many documented RN Physical Exam Training?	5
Of the training folders reviewed, how many had continuing medical education credits documented?	6
Training Findings	2 files were LPN - Continuing education does not apply to them 3 of the files had documentation of CEs but not for 2018-19 Employees have been contacted to submit documentation of CEs
Training Deliverables	LPN/LVN are not required to do CE in the state of LA.

Transfer Summary Chart Review - Review Complete

How many transfers were reviewed?	25
Of the transfers reviewed, how many outgoing transfers were authenticated appropriately (signed, stamped, and dated)?	25
Of the transfers observed, how many outgoing transfers were completed by an LVN or above?	25
Of the transfer summary records reviewed for TB status, how many correctly documented no TB treatment status?	25
Of the transfer summary records reviewed for TB status, how many incorrectly documented no TB treatment status? (TB meds listed??)	25
Of the transfer summary records reviewed for TB status, how many correctly documented TB treatment status?	25

AMERICAN OVERSIGHT

Of the transfer summary records reviewed for TB status, how many incorrectly documented TB treatment status? (Taking TB meds)	0
Transfers Findings	none
Transfers Deliverables	none
Of the transfer summaries reviewed, how many listed the detainee's chronic medical conditions appropriately?	25
Of the transfer summaries reviewed, how many had "clear medication instructions" documented appropriately?	5

Workforce Health Files - Review Complete

Are workforce health files kept separate from other files?	Yes
Is access to staff records limited to the compliance officer, HSA, and AHSA(s) and AA?	Yes
How many workforce health files were reviewed?	12
Of the twelve workforce health files reviewed, how many had past year's TB (PPD or CXR) documentation?	11
Of the twelve workforce health files reviewed, how many had a Hepatitis B vaccination or declination form?	11
Of the twelve workforce health files reviewed, how many had a yearly Ishihara Color Blind test?	0
Of the twelve workforce health files reviewed, how many had a yearly respirator medical clearance?	11
Of the twelve workforce health files reviewed, how many had a yearly respirator fit test?	12
Of the twelve workforce health files reviewed, how many had emergency contacts?	12
Are staff recordable injuries documented on Workforce Injury Tool?	Yes
Workforce Health Files Findings	Hep B - Series has been started but is not complete and no declination on file
Workforce Health Files Deliverables	none

Accreditation - Review Complete

Last ACA Accreditation	2016-12-05
Last ACA Findings	NO DATA
Last NCCHC Accreditation	2015-03-31
Last NCCHC Findings	This facility's initial NCCHC survey was conducted March 31-April 1, 2015. Facility found compliant on 100% of all applicable essential standards, and all applicable important standards.
Last PBNDS Accreditation	2016-03-22
Last PBNDS Findings	No medical findings. Next PBNDS audit is 3-28-17
Comments	NO DATA

Grievances - Review Complete

Number of medical grievances reported through QI/JIC/CRCL/DRIL	14.00
Is there a local SOP for managing grievances?	Yes
Is there an identified grievance officer?	Yes
Is there a log book and is it up to date?	Yes
Number of medical grievances that were not addressed in a timely manner.	0.00
Number of formal grievances.	14.00
Number of informal grievances.	0.00
Findings	NO DATA
Deliverables	NO DATA

AMERICAN OVERSIGHT

Risk Management - Review Complete

Trends	Facility reported a total of 133 incident reports during 1st quarter of FY 17. No identifiable trends noted.
Number of active RCAs/SOEs	0.00
Number of RCAs or SOEs completed during the last six (6) months.	0.00
Number of corrective actions generated from RCAs or SOEs during the last six (6) months.	0.00
List all corrective actions identified in the preceding field and note their status and due dates.	None
Findings	None
Deliverables	None

AMERICAN OVERSIGHT

Medication Administration - Review Complete

Is pre-pouring occuring?	No - See findings below.
Are nurses adhering to the six rights of medication administration (right patient, right drug, right route, right dose, right time, and right documentation)?	Yes
Are nurses using two forms of identification prior to administration?	Yes
Are mouth checks being conducted with every administration?	Yes
Are nurses administering only medications that they prepare?	Yes
Are all entries in the MAR complete (allergies, staff initials, etc)?	No - See findings below.
Number of all medication refusals documented on the MAR.	7.00
Of the identified medication refusals from the MAR, how many refusals did not have accompanying eCW documentation?	0.00
Number of high risk medication refusals.	0.00
Of the identified high risk medication refusals, how many times were providers NOT notified of the refusal?	0.00
Are nurses documenting the medication administration immediately after the medication is administered?	Yes
Findings	- Mouth checks are being performed on every detainee; however, checks may be assisted with the use of pen lights to ensure no cheeking of medications. -(b)(5) (b)(5)
Deliverables	NO DATA

AMERICAN OVERSIGHT

Emergency Preparedness and Response- Review Complete

Is there documentation of the man-down drills on each shift (once per month), mass casualty drills, and fire drills that have been conducted?	Yes
Do emergency scenarios vary?	Yes
Is the difference between a drill and an actual event evident in the write-up?	Yes
Do all staff participate in the drills?	No - See findings below.
Are all staff trained on emergency equipment?	Yes
Is emergency equipment checked daily and documented?	Yes
Is there documentation to support the training?	Yes
Did all staff receive an "after-action" debriefing?	Yes
If mortality related response, did staff involved submit a sequence of events statement of occurrence within 24 hours of incident and offered any adjustment support?	Yes
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event?	Yes
Findings	Available via SharePoint. Drills consist of nursing staff and providers. Mortality sequence of events did not occur within 24 hours however facility was provided with a different submission deadline. Best Practice-HSA advocated to have all staff equiped with radios. Emergecy calls are heard immediately due to all staff having access to this.

Intake Screening Review - Review Complete

Number of intake screenings reviewed.	25.00
Number of intake screenings with detainee identified with at least two detainee identifiers.	25.00
Of the intake records reviewed, how many used a translator?	6.00
Of the intake screening records that used a translator, how many listed a translator name or ID number?	6.00
Of the intake screening records that did not use a translator, how many listed a reason for not using a translator?	18.00
Number of notes with TB clearance noted (PPD, CXR, current CXR from other facility).	23.00
Of the intake screening records, how many were TB negative?	23.00
Of the intake screening records that are TB negative, how many were signed, dated, and stamped by an RN or above?	7.00
Of the intake screening records, how many were TB positive?	0.00
Of the intake screening records that are TB positive, how many were signed, dated, and stamped by an RN or above?	0.00
Number of intake screenings with a complete pain assessment using the pain scale indicator.	0.00
Number of intake screenings with pain scale greater than 0.	1.00
Of the intake screenings with a pain scale greater than 0, how many were addressed?	0.00
Number of intake screenings with mental health screening completed.	25.00
Number of intake screenings that used the eCW Intake Screening template.	25.00
Of the intake screenings that used the eCW Intake Screening template, how many were completed appropriately (i.e., default answers changed to reflect the patient's response)?	25.00
Number of intake screenings with clinically significant findings.	8.00

AMERICAN OVERSIGHT

Of the intake screenings with clinically significant findings, how many were referred appropriately?	4.00
Number of intake screenings reviewed by an RN or above within 24 hours.	16.00
Findings	NO DATA
Deliverables	NO DATA

Intake Screening Observations - Review Complete

Number of intake screenings observed.	3.00
Number of intake screening observations where the nurse reviewed the prescreen and transfer paperwork prior to initating the intake screening.	3.00
Number of intake screening observations where a full set of vital signs were taken.	3.00
Number of intake screening observations that used language services.	3.00
Of the intake screening observations that used language services, how many were appropriately conducted?	3.00
Number of intake screenings observations documented in eCW within one hour of the evaluation.	3.00
Number of intake screening observations where the patient was educated on access to care, upcoming PE appointment, and the grievance process.	3.00
Number of intake screening observations with security advice of special needs and housing disposition.	3.00
Of the intake screening observations with security advice, how many contained clear communications?	3.00
Findings	Process is well structured for intake.

Language Access Review - Review Complete

Number of language access records reviewed.	25.00
Number of records where the patient was asked what language they speak.	24.00
Number of records where the patient's primary langauage or languag of choice is documented in their medical record.	24.00
Number of records where the translator use was addressed and documented (interpreter name or number, and language).	9.00
Reasons for why a translator was not used.	(b)(6); (b)(7)(C) No interpreter used, detainee deaf/mute-nurse documented that the detainee could "read lips and communicates with gestures;" (b)(6); (b)(7)(C) -Detainee reported Portuguese as his language, nurse documented "DETAINEE'S NATIVE LANGUAGE IS PORTUGUESE, BUT ABLE TO COMMUNICATE IN SPANISH;" (b)(6); (b)(7)(C) Detainee reported Spanish as his language on intake, nurse documented "Detainee speaks English fluently; (b)(6); (b)(7)(C) Hindi documented on Intake, but nurse used a Punjabi interpreter (this may not be a finding as Hindi/Punjabi may be interchangable, this reveiwer can not verify this though); (b)(6); (b)(7)(C) Spanish documented on Intake, but nurse documented that the detainee spoke English fluently; (b)(6); (b)(7)(C) Detainee speaks Somali. Nurse documented that he spoke the detainee's native language. Can not verify that nurse speaks Somali, but it is likely a negative finding.

Language Access Observations - Review Complete

Are the "I Speak" posters and pocket guides readily available and posted in the clinic?	NO DATA
Does the facility have a process in place to address accessing sign language interpreters and telecommunication (TDD/TTY) for individuals with hearing disabilities?	NO DATA
Findings	- Exam rooms and intake rooms had the "I Speak signs posted."
Deliverables	NO DATA

AMERICAN OVERSIGHT

Diagnostic Services - Review Complete

Are on-site diagnostic services (laboratory and radiology) certified or licensed to provide those services?	Yes
Is there a procedure manual for each service provided?	Yes
Does each manual include protocols for the calibration of testing devices to ensure accuracy.	Yes
Is there a current certificate for CLIA-waived testing?	Yes
Are all aspects of the CLIA-waived standards addressed by written policy and defined procedures?	Yes
Are invoices from LabCorp or other radiology companies reconciled?	Yes
Are radiation signs posted on all doors leading to areas with radiation producing equipment?	Yes
Are radiation exposure reports reviewed quarterly?	Yes
Are staff seen wearing dosimeter badges while performing radiography services or while working in an area with radiation producing equipment?	Yes
Are staff dosimeter badges and controls stored in a central location and not near a radioactive source?	Yes
Are there safety checks for biomedical and diagnostic equipment?	Yes
Findings	NO DATA
Deliverables	NO DATA

Log Books - Review Complete

Number of refridgerator temperature logs reviewed.	4.00
Number of refridgerator temperature logs that are up to date.	4.00
Number of refridgerator temperature logs that are out of range.	0.00
Of the refridgerator temperature logs that are out of range, how many logs have documentation of action taken?	0.00
Are the sharps counts accurate?	Yes
Are two signatures present for each shift change on the sharps counts?	Yes
Are the narcotic counts accurate?	Yes
Are two signatures present for each shift change on the narcotics counts?	Yes
Are the crash cart/bag and AEDS checked daily and on every shift?	Yes
Are cleaning logs present in the MHU and up to date?	Yes
Findings	-no logs to show monthly inventories were performed on emergency equipment as well as inventory when seals are broken. - Why tool logs for thermometers and stethescopes? Are there tool logs for hemostatss, scissors, etc. - identified 2 containers of vacucontainers that were expired. Staff removed them from use and disposed of htem.
Deliverables	-Refrigerator temeprature not recorded on weekends in pharmacya nd dental due to no staff in those areas on weekends and the thermometer used does not record multiple days. A model number for an optional thermater was provided to the AHSA.

PRE-ARRIVAL REVIEW

Accreditation

Most recent ACA, NCCHC, and PBNDS surveys. List type of survey and date.

Evaluation Method		
Survey	**Date**	**Findings / Recommendations**
PBNDS	3/20/2018 to 3/22/20181	No findings
NCCHC	4/22/2018	J-G-05

NCCHC Findings: Suicide Prevention Program 1d (2d in 2018 manual). standard was not met. "Nonacutely suicidal inmates are monitored by facility staff at unpredictable intervals with no more than 15 minutes between checks.

Recommendations (b)(5)

(b)(5)

Comments STDC communicated to auditors that the watch is continuous while the documentation is every 15 minutes.

AMERICAN OVERSIGHT

Grievances

Evaluation Method:	Observation	
Items to Review *(review 100% during past year)*	**Yes, No, or N/A**	**Comments**
1. Have there been any medical grievances reported through QI/JIC/CRCL/DRIL *(if so, provide type in comment section)*	NO	
2. Is there a local procedure (SOP) for managing grievances?	YES	
3. Is there an identified grievance officer?	YES	
4. Is the log book kept and up to date?	YES	
5. Were all Grievances addressed in a timely manner?	YES	
6. Number of Formal/Informal grievances: 0 20 / 3 0		

Findings/ Recommendations:	. No findings
Deliverables:	**N/A**

AMERICAN OVERSIGHT

Incident Reports/RCA/SOE

Evaluation Method:			
Items to Review *(review 100% during past year)*		**Yes, No, or N/A**	**Comments**
1. Were there any trends noted from reported incident reports or RCAs for FY17?		NO	No significant upward trends were noted.
2. Are there any active RCAs/SOE?		NO	
3. Has a RCA or SOE been completed during this FY? If so, complete #4		NO	
4. Was a CAP initiated and/or completed for the RCA or SOE?		N/A	
a. If CAP initiated, note status and due date.		N/A	
Findings/ Recommendations:

On-Site Observations

During site observations, the reviewers should observe staff members carrying out the task, interview staff, review medical records and review supporting documents (i.e. logs, minutes, binders, electronic trackers, etc.).

Medication Administration (Observations-Onsite Review)

Question (10 ENCOUNTERS)	Improvement Plan (1,2, or 3)	Comments
Is pre-pouring occurring? **(Be sure to observe more than one nurse on multiple shifts) Level 2@100%**	N/A	Observed 4 nurses on 2 shifts 0% pre-pour
Are nurses adhering to the six rights of medication administration (right patient, right drug, right route, right dose, right time, and right documentation)? **Level 2 @100%**	N/A	4/4 @ 100%
Are mouth checks being conducted with every administration? Observe 10 patients (if possible) on multiple shifts **Level 1 @80%**	N/A	4/4 @ 100%
Are all entries in the MAR complete (allergies, staff initials, etc.)? Observe 10 different MAR; **Level 1 @80%**	N/A	10/10 100%
Are nurses documenting the medication administration immediately after the medication is administered**? Level 2 @100%**	N/A	4/4 @ 100%
Number of all medication refusals documented on the MAR/eMAR **Denominator**	N/A	4/6 refusales; 6/6 notified; 6/27 mars

AMERICAN OVERSIGHT

Of the identified medication refusals from the MAR, how many refusals did have an accompanying signed refusal form? **Level 2@90%** .	2	
Of the identified high risk medication refusals, how many times were providers NOT notified of the refusal in eCW **Level 1 @100%; See guide eon ECW notification**	0	

AMERICAN OVERSIGHT

Emergency Preparedness and Response

Question	Improvement Plan (1,2, or 3)	Comments
Is there documentation showing completed date and time of man-down drills (once per month for each operating shift)? Refer to guide: **level 1 @90%** Is there documentation showing completed date and time of fire drills (once a quarter for each operating shift)? Refer to guide **level 1 @90%** Is there documentation showing completed date and time of mass casualty drills * (each shift should have a complete drill within a three year period)? *Table top/mock drills are acceptable replacements for drills not conducted facility wide Refer to guide: **level 1 @90%** Are clinic staff trained on emergency equipment (AED, first Aid kits, fire extinguisher, etc?) Yes/No **level 1 @90%**	0	
Do emergency scenarios vary? Yes/No?? **Level 100% if No**	N/A	Yes
Is the difference between a drill and an actual event evident in the write-up?): **Level 1 @100%**	N/A	Yes
Is there process in place to distribute "an after-action report to all staff? **Level 1 @90%:**	N/A	Yes
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event? **Level 1 @100%**	N/A	Yes
Comments:

Pre-Screening

Reviewer:

Evaluation Method:	**Observe 10 pre-screens if Possible**	
Items to Review	**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of prescreen encounters observed. **Denominator**	10	
2. Are language services being used during pre-screen if appropriate? **Level 2: if No**		100% completed.
3. Number of prescreens with documentation completed in eCW prior to intake screening. **Denominator**	10	
4. Number of prescreen encounters prioritized. **Level 1: @90%**		100% completed.
5. Number of Pre-screens encounters not prioritized appropriately: **Level 1 @90%**		100% completed.
Findings/ Recommendations:	No findings	

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-000278

Intake Screening

Evaluation Method:	Observe 10 "Intakes" if Possible		
Items to Review *(review 25 records in the past month)*		**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of intake screenings observed. (N/A) **Denominator**		10	
2. Number of intake screening observations where the nurse reviewed the prescreen and transfer paperwork prior to initiating the intake screening. **Level 1 @90%**		N/A	100%
3. Number of intake screening observations where a full set of vital signs (Blood Pressure, Respirations, Pulse, Temperature, weight, Pain Rating and (if appropriate) O2 Sat were taken. **Level 2: @90%**		N/A	100%
4. Number of intake screening observations that used language services. **Level 2:@90%**		N/A	100%
5. Of the intake screenings that used the eCW Intake Screening template, how many were completed appropriately (i.e., default answers changed to reflect the patient's response)? **Level 1 @90%**		N/A	100%
6. Of the intake screening observations that used language services, how many were appropriately conducted? **Level 2:@90%**		N/A	100%
7. Number of intake screening observations where the patient was educated on access to care, upcoming PE appointment, and provided the grievance guide. **Level 2:@90%**		N/A	100%

AMERICAN OVERSIGHT

8. Number of intake screening observations with security advice of special needs and housing disposition. **Level 1 @90%**	N/A	
Intake screenings are correctly being done and documented in eCW per IHSC policy.		
Deliverables:	No findings.	

AMERICAN OVERSIGHT

Chronic Care

Evaluation Method:	Observe 10 "Chronic Care Encounters"		
Questions		**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of chronic care encounters observed that utilized language services appropriately. **Level 2 @90%**		N/A	100%
2. Number of chronic care encounters observed that were completed within the time frame indicated by a previous visit (90 days for stable intake screening or stable prior chronic care visit **Level 2 @90%**		N/A	100%
3. Number of chronic care encounters observed that were not completed within the timeframe indicated by a previous visit (greater than 90 days for unstable patients). **Level 2 @90%**		N/A	100%
Findings/ Recommendations:	No findings. Best Practice: Pearsall uses Rendering Provider model for 9 CQI managed Chronic conditions to ensure continuity of care. Morning Provider Huddle ensures all scheduled detainees are seen on a daily basis.		
Deliverables:	N/A		

AMERICAN OVERSIGHT

Physical Exams

Evaluation Method:	Observe 10 physical exams completed by different providers	
Items to Review *(review 25 records in the past month)*	**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of physical examination encounters with a full set of vital signs (Blood Pressure, Respirations, Pulse, Temperature, weight, Pain Rating and (if appropriate) O2 Sat) taken **Level 2@90%**	N/A	10 Physical exams observed, and 35 charts reviewed
2. Number of physical examination encounters observed that were completed within the specified timeframe. (Two Business days for PE-Cs, 7 days for –juveniles and, 14-days for adults) **Level 2@90%**	N/A	The majority of the PE's observed and reviewed have been completed at day #10, and several of them were completed at day #7 & 8
3. Number of physical examination encounters observed that offered detainee provider referral when appropriate **Level 1 @90%**	N/A	Of all the PE's observed and reviewed, none of them needed a referral to higher level of care.
Findings/ Recommendations:		
Deliverables:

AMERICAN OVERSIGHT

Summary

Topic	Recommendation
Staffing	Needs to include: PM; ICO; NM; PMHNP. Does this include FT & CSL Staff?
Medication Administration	Pg 7 & 8: Squares are too big and not fillable
Chronic Care	Replace word "stable" with "controlled" e.g. Many detainees may be "stable" but be outside
	of the CQI control recommendations. As with A1C for a DM or B/P for HTN
MHU 23 hour Observation	Create eBO Report for 23 OBS; Had to find detainees by going through old Kardex
CLIA Waived Testing	Further define requirements for adherence with CLIA Waived testing requirements.
Personnel/Credentialing Files	Organize this section so it matches the layout of the folders. There was a lot of flipping back
	and forth throughout the audit process.
Training Files	Credentialing Section (pg 33): Training Files separate from Credential Files. Move question
	#22, #23, #24, #25, #26 into Training section on page 35
Employee Health Files	Question #8: Emergency Contact part of Credential File not Employee Health File

AMERICAN OVERSIGHT

Recommendations from Facility

Suicide Watch Observations: Observation and Watch Checklist form has been revised to remove pre-printed times

Last ACA Accreditation	2016-12-05T05:00:00Z
Last ACA Findings	

AMERICAN OVERSIGHT

	100% on all applicable mandatory standards 98.7% on all applicable non-mandatory standards Finding on non-mandatory standard 1-HC-1A-17: The facility does not complete a full dental exam by a dentist on all detainees within the first 30 days. NOTE: Under ACA's Health Care (HC) standards, a full dental exam within the first 30 days is required. However, in 2018 IHSC facilities began to be surveyed under ACA's ALDF standards, which requires a full dental exam within 1 year.
Last NCCHC Accreditation	2018-02-26T05:00:00Z
Last NCCHC Findings	J-G-05: Suicide Prevention Program The facility has provided additional documentation to support its compliance with J-G-05, specifically, that non-acutely suicidal detainees should be monitored on an unpredictable scheduled (not to exceed 15 minutes). The additional documentation has been submitted to NCCHC, and IHSC is awaiting an Update Report from NCCHC to indicate whether they feel the standard is now met.

After Hours Medication Chart Review - Review Complete

How many after hours medication log records were reviewed?	10
Of the after hours med log records reviewed, how many records documented the patient's identification number?	10
Of the after hours med log records reviewed, how many records were generated by a nurse as a telephone order?	10
Of the records generated by a nurse as a telephone order, how many were signed by a provider within 24 hours of return for next work shift?	3
Is an After-Hours Cabinet (AHC) medication sign out log in place for the documentation of medications removed?	Yes
Is all the necessary information entered into the fields of the AHC sign out log?	Yes
After Hours Medication Chart Review Findings	No Par Level Noted.
After Hours Medication Chart Review Deliverables	See CAP.

After Hours Medication Observation - Review Complete

Is a medication log in place and reflective of quantities of medication stored in the night cabinet?	No
Do line entries contain the date, time, patient name, alien number, medication name, and quantity removed?	Yes

AMERICAN OVERSIGHT

Is the after hours verbal medication order entered into eCW by the prescriber upon return to duty?	Yes
Is the after hours medication administration properly documented on the MAR or in the electronic health record?	Yes
Is the night cabinet, clean, stocked, and organized?	Yes
Is the After-Hours Cabinet physically inspected (by pharmacist or designee) on a monthly basis to ensure the absence of expired, recalled or deteriorated medications?	Yes
After Hours Medication Encounters Findings	There is not a log in place that identifies how many meds are in the after hours cart. Nurses sign out meds, but there isn't a par level to verify how many are left for accountability. Pharmacist stated this was a low priority for him. Sometimes meds are signed out the next day.
After Hours Medication Encounters Deliverables	(b)(5)

Chronic Care Chart Review - Review Complete

How many chronic care records were reviewed?	25
Of the chronic care records reviewed, how many had a PE--Complex completed within two business days?	24
Of the chronic care records reviewed, how many had chronic conditions properly documented in eCW Problem List?	25
Of the chronic care records reviewed, how many detainees arrived at the facility on chronic medications?	13
Of the chronic care records with medications, how many encounters indicated that medications were continued as clinically indicated??	13
Of the chronic care records reviewed, how many detainees had psychiatric medications?	2
Of the chronic care records with psychiatric medications, how many encounters indicated that the detainee was seen by an MD or MLP every 30 days for medication assessment or review?	2
Of the chronic care records with psychiatric medications, how many encounters indicated that the detainee was seen by an MD or psychiatrist every 90 days for chronic care management?	2
Of the chronic care records reviewed, how many chronic care patients were identified as stable?	12
Of the stable chronic care patients, how many encounters indicated that the detainee was seen within 90 days?	12
Of the chronic care records reviewed, how many chronic care patients were identified as unstable?	13
	13

AMERICAN OVERSIGHT

Of the unstable chronic care patients, how many encounters indicated that follow-up appointments were scheduled earlier than 90 days ?	
Of the chronic care records reviewed, how many had a global alert (IHSC 834 or electronic equivalent) completed?	25
Chronic Care Records Findings	No data reported
Chronic Care Records Deliverables	No data reported

Chronic Care Observation - Review Complete

How many chronic care encounters were observed?	10
Of chronic care encounters observed, how many were considered stable patients?	10
Of the stable patients observed, how many were completed within the appropriate timeframe?	10
Of chronic care encounters observed, how many were considered unstable patients?	0
Of the unstable patients observed, how many were completed within the appropriate timeframe?	0
Of the chronic care encounters observed, how many had a treatment plan?	10
Chronic Care Encounters Findings	None
Chronic Care Encounters Deliverables	None

Consent Forms Chart Review - Review Complete

How many consent forms were reviewed?	25
Of the consent forms reviewed, how many were general consent forms?	25
Of the general consent forms reviewed, how many were complete?	25
Of the consent forms reviewed, how many were dental consent forms?	14
Of the dental consent forms reviewed, how many were complete?	14

Daily Assignment Sheets - Review Complete

How many daily assignment sheets were reviewed?	108
Of the daily assignment sheets reviewed, how many were archived appropriately?	108
Of the daily assignment sheets reviewed, how many had at least one emergency team identified per shift?	108
Daily Assignment Sheets Findings	None
Daily Assignment Sheets Deliverables	None

Diagnostic Services - Review Complete

Are laboratory services provided in adherence with CLIA Waived testing?	Yes
Is there a current certificate for CLIA-waived testing?	Yes
Are radiation signs posted on all doors leading to areas with radiation producing equipment?	Yes
Is there documentation of a quarterly (monthly for declared pregnancies) review of the dosimetry report by the HSA or Compliance Officer?	Yes
Are staff seen wearing dosimeter badges while performing radiography services or while working in an area with radiation producing equipment?	Yes
Are staff dosimeter badges and controls stored in a central location and not near a radioactive source?	Yes
Diagnostic Services Findings	None
Diagnostic Services Deliverables	None

Emergency Preparedness and Response Observation - Review Complete

Is there documentation showing completed date and time of man-down drills?	Yes
Is there documentation showing completed date and time of fire drills?	Yes
Is there documentation showing completed date and time of mass casualty drills?	Yes
Are clinic staff trained on emergency equipment?	Yes
Do emergency scenarios vary?	Yes
	Yes

AMERICAN OVERSIGHT

Is it evident that the emergency incident was either an actual event, full drill, or table top exercise?	
Is there a system in place to distribute an after-action report to all staff?	Yes
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event ?	Yes
Emergency Preparedness and Response Findings	none
Emergency Preparedness and Response Deliverables	n/a

Environmental Health Observation - Review Complete

Are clinic Safety Data Sheets (SDS) files complete, current, and accessible?	Yes
Are hazardous chemicals, including cleaning supplies, labeled and securely stored?	Yes
Are Public Health, Safety, and Preparedness Toolkit checklists maintained locally and documented (with CO/HSA Signatures or designee) to show corrective action with completion date?	No
Do Airborne Isolation and Inspection (AII) rooms requiring transmission based precautions have appropriate signage for the required precaution(s)?	Yes
Is documentation of daily checks on (AII) rooms' negative pressures complete?	Yes
Is the OSHA Form 300A summary completed and posted in clinic from February 1st through April 30th each year?	Yes
Environmental Health Findings	Daily, weekly, monthly, PHSP checklists not currently accessible. However, local HOU does perform daily walk-thrus which are documentd and the monthly Health & Safety assessments via SharePoint are completed.
Environmental Health Deliverables	(b)(5)

Grievances - Review Complete

Number of medical grievances reported through QI/JIC/CRCL/DRIL.	0
Is there a local SOP for managing grievances?	No
Is there an identified grievance officer?	Yes
Is there a log book and is it up to date?	Yes
Number of medical grievances that were not addressed in a timely manner.	0

AMERICAN OVERSIGHT

Number of formal grievances.	0
Number of informal grievances.	28
Grievances Findings	None
Grievances Deliverables	n/a

Hunger Strike Chart Review - Review Complete

How many of hunger strike records were reviewed?	1
Of the hunger strike records reviewed, how many had with I&O's tracked in the health record?	1
Of the hunger strike records reviewed, how many indicated that the patient was educated on the adverse effects of a hunger strike and education was documented in health record?	1
Of the hunger strike records reviewed, how many indicated that the patient was counseled on termination of hunger strike and counseling was documented in health record?	1
Of the hunger strike records reviewed, how many indicated that the patient was evaluated by a mental health provider?	1
Of the hunger strike records reviewed, how many had a complete medical history, orthostatic vital signs, height, weight, urinalysis, mental health evaluation, physical assessment, clinically necessary laboratory tests deemed appropriate, and modification or augmentation of standard treatment protocols when medically indicated during the initial evaluation or refusal form?	1
Of the hunger strike records reviewed, how many had orthostatic vital signs including weight taken every 24 hours?	1
Of the hunger strike records reviewed, how many were discontinued by the Clinical Director, or a physician?	1
Of the hunger strike records that were discontinued, how many indicated that IHSC healthcare personnel offered detainee appropriate follow-up with behavioral health and medical care and offer was documented in patient's chart?	1
Of the hunger strike records reviewed, how many had special needs to include restriction of commissary items?	1
Hunger Strike Records Findings	None
Hunger Strike Records Deliverables	n/a

Hunger Strike Observation - Review Complete

How many patients were on a hunger strike at the time of observation?	0
	0

AMERICAN OVERSIGHT

Of the patients on a hunger strike, how many was water available for?	
Of the patients on a hunger strike, how many were offered meals?	0
Of the patients on a hunger strike who were offered food, how much food was offered?	n/a
Of the food offered, how much of the food was eaten?	n/a
Of the patients on a hunger strike, how many had special needs?	0
Of the special needs patients on a hunger strike, how many records indicated that the needs were addressed?	0
Hunger Strike Encounters Findings	n/a
Hunger Strike Encounters Deliverables	n/a

Infectious Disease Prevention - Review Complete

Are hand washing equipment and hand sanitizers available in the clinic?	Yes
Are contact and outbreak investigations documented in the PHSP Unit reporting tool on SharePoint?	Yes
Is hand hygiene monitoring conducted and documented on the quarterly review?	Yes
Infectious Disease Prevention Findings	None
Infectious Disease Prevention Deliverables	n/a

Intake Screen Chart Review - Review Complete

How many intake screen records were reviewed?	25
Of the intake screen records reviewed, how many had detainee identified with at least two detainee identifiers?	25
Of the intake screen records reviewed, how many used a translator?	24
Of the intake screen records that used a translator, how many listed a translator name or ID number ?	5
Of the intake screen records that did not use a translator, how many provide a reason for not using a translator?	20
Of the intake screen records reviewed, how many records had a complete pain assessment using the pain scale indicator?	25
Of the intake screen records reviewed, how many records had a pain scale greater than 0?	0
Of the records with a pain scale greater than 0, how many were assessed?	0

AMERICAN OVERSIGHT

Of the intake screen records reviewed, how many used the eCW Intake Screening template?	25
Of the intake screen records reviewed, how many had clinically significant findings?	3
Of the intake records with clinically significant findings, how many were referred appropriately?	3
Of the intake screen records reviewed, how many were reviewed by an RN or above within 24 hours?	25
Intake Screen Records Findings	Column J, Question Did the intake screening use the eCW template?: No, Possibly an old saved template, Pain and Translator section is combined with intake information.
Intake Screen Records Deliverables	Please inform staff members to use current intake templates. ***Last question is not listed on audit tool.

Intake Screen Observation - Review Complete

How many intake screen encounters were observed?	16
Of the intake screen encounters observed, how many did the nurse review the prescreen and transfer paperwork prior to initiating the intake screening?	16
Of the intake screen encounters observed, how many included a full set of vital signs?	16
Of the intake screen encounters observed, how many used the eCW Intake Screening template?	16
Of the intake screen encounters that used the eCW Intake Screening template, how many were completed appropriately?	16
Of the intake screen encounters observed, how many was the patient was educated on access to care, upcoming PE appointment, and provided the grievance guide?	16
Of the intake screen encounters observed, how many included security advice of special needs and housing disposition?	0
Intake Screen Encounters Findings	None
Intake Screen Encounters Deliverables	None

Language Access Chart Review - Review Complete

How many language access records were reviewed?	25
Of the language access records reviewed, how many indicate that patient was asked what language he or she speaks?	25
Of the language access records reviewed, how many document the patient's primary language or language of choice in his or her medical record?	25

AMERICAN OVERSIGHT

Of the language access records reviewed, how many addressed and documented the use of a translator?	7
Of the language access records reviewed, how many did not use a translator?	18
Of the language access records that did not use a translator, how many documented reasons why a translator was not used?	17
Language Access Records Findings	One sick Call encounter documented the use of an interpretor. However, the Interpreter name or number was not llisted. (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) Visit date 01/18/2019
Language Access Records Deliverables	No data reported

Language Access Observation - Review Complete

Are the "I Speak" posters and pocket guides readily available and posted in the clinic?	Yes
Does the facility have a process in place to address accessing sign language interpreters and telecommunication (TDD/TTY) for individuals with hearing disabilities?	Yes
Language Access Encounter Findings	None
Language Access Encounter Deliverables	n/a

Log Books - Review Complete

How many pharmacy refrigerator temperature logs were reviewed?	2
Of the pharmacy refrigerator temperature logs reviewed, how many have entries per shift for the past three months?	2
Of the pharmacy refrigerator temperature logs reviewed, how many refrigerator temperature logs are out of range?	0
Of the temperature logs that are out of range, how many logs have documentation of action taken and follow-up?	0
Are the sharps secured and the count accurate?	Yes
In review of the past 3 months of sharps counts, are two signatures present for each shift changes?	No
Are the narcotics secured with double lock and counts within the last 3 months accurate?	Yes
In review of past 3 months of controlled substance logs, are two signatures present for each shift change on the narcotics counts?	Yes
Are the urgent care cart/trauma bag and AEDs checked daily for content, signatures, AED functionality, and expiration for the past 3 months?	Yes

AMERICAN OVERSIGHT

Log Books Findings	There were 7 shift counts that did not have two signatures. HSA was informed and corrected on spot.
Log Books Deliverables	None

Medication Administration Observation - Review Complete

Is prepouring occurring?	No
How many medication administrations were observed?	25
Of the medication administrations observed, how many times were nurses adhering to ALL six rights of medication administration?	25
Of the medication administrations observed, how many mouth checks were conducted?	25
Of the medication administrations observed, how many times did nurses document the medication administration immediately after the medication was administered?	25
How many MAR entries were observed?	25
Of the MAR entries observed, how many were complete?	25
Of the MAR entries observed, how many medication refusals were documented?	0
Of the identified medication refusals, how many refusals had accompanying eCW documentation ?	0
Of the identified medication refusals, how many were high-risk medications?	0
Of the identified high-risk medication refusals, how many times were providers notified of the refusal?	0
Medication Administration Findings	None
Medication Administration Deliverables	None

Meetings - Review Complete

Of the two previous staff meetings, how many were conducted monthly and properly documented?	2
Of the two previous public health, safety, and preparedness meetings, how many were properly documented?	2
Of the two previous quality improvement meetings, how many were conducted quarterly and properly documented?	2
Out of the two previous quarterly ICE/HSA meetings, how many were conducted and properly documented?	2
Meetings Findings	None

MHU Full Admission Chart Review - Review Complete

How many MHU full admission records were reviewed?	25
Of the MHU full admission records reviewed, how many had admission encounters?	25
Of the MHU full admission records reviewed, how many had a documented PE within the past year?	25
Of the MHU full admission records without a documented PE, how many received a PE within 24 hours of admission to the MHU?	13
Of the MHU full admission records reviewed, how many had a nursing care plan?	25
Of the MHU full admission records with a nursing care plan, how many records indicate the plan was addressed and reviewed daily?	25
Of the MHU full admission records reviewed, how many had patient education provided daily?	25
Of the MHU full admission records reviewed, how many indicated detainee had an existing mental health diagnosis prior to admission?	8
Of the records that indicate that the detainee had a mental health diagnoses, how many received a mental health reassessment every seven (7) days, or more frequently, if indicated	8
Of the MHU full admission records reviewed, how many records did not have a mental health diagnoses?	0
Of the MHU full admission records without mental health diagnoses, how many records indicate the patient was assessed every 30 days by a MHP?	0
MHU Full Admission Records Findings	None
MHU Full Admission Records Deliverables	None

MHU Full Admission Observation - Review Complete

Are all patients within sight or hearing of a qualified health professional?	Yes
How many nurses are in the MHU full admission at the time of observation?	4
How many patients are in the MHU full admission at the time of observation?	13
	13

AMERICAN OVERSIGHT

How many MHU full admission patients have a 24-hour chart review everyday?	
Of the MHU full admission records, were 24-hour charts completed appropriately?	No data reported
How many MHU full admission patients have medications?	8
Of the MHU full admissions patients with medicaitons, how many have all medications placed on pill line?	8
MHU Full Admission Encounters Findings	None
MHU Full Admission Encounters Deliverables	None

Personnel and Credentialing Files - Review Complete

Does the facility have a process for tracking requirements electronically?	Yes
How many personnel and credentialing files were reviewed?	25
Of personnel and credentialing files reviewed, how many were PHS officers?	5
Of the PHS officer records, how mand had at least two years of evaluations (COERS)?	5
Of personnel and credentialing files reviewed, how many were federal civil service employees?	0
Of personnel and credentialing files reviewed, how many were contractors?	20
Of personnel and credentialing files reviewed, how many records are for privileged staff?	3
Of the privileged staff records reviewed, how many were Licensed Independent Practitioners (LIPs)?	3
Of the LIP staff records reviewed, how many had personnel files records current?	3
Of the LIP staff records reviewed, how many had a competency assessment or peer review?	3
Of personnel and credentialing files reviewed, how many contained a current and signed Health and Ability form?	25
Of personnel and credentialing files reviewed, how many contained a signed statement of confidentiality?	25
Of personnel and credentialing files reviewed, how many contained a signed statement of risks and responsibility?	25
Of personnel and credentialing files reviewed, how many contained a signed statement of acknowledgement of understanding of local, national, and residential standards?	25
Of personnel and credentialing files reviewed, how many contained a signed release of information form?	25

AMERICAN OVERSIGHT

Of personnel and credentialing files reviewed, how many contained current, valid, and unrestricted license?	25
Of personnel and credentialing files reviewed, how many contained documentation of primary education , license primary source, and annual verification?	25
Of personnel and credentialing files reviewed, how many were reviewed for physicians or psychiatrists?	1
Of the physician or psychiatrist records, how many had documentation of residency?	1
Of the physician or psychiatrist records, how many were board certified?	1
Of the board certified physicians and psychiatrists, how many had documentation of board certification?	1
Of personnel and credentialing files reviewed, how many had a copy of a curriculum vitae or a resume?	25
Of personnel and credentialing files reviewed, how many had current National Provider Data Bank information?	9
Of the staff records reviewed, how many had scope of practice documentation if applicable?	25
Personnel and Credentialing Files Findings	None
Personnel and Credentialing Files Deliverables	n/a

Physical Exam Chart Review - Review Complete

How many physical exam charts were reviewed?	25
Of the physical exam charts reviewed, how many used language services?	7
Of the physical examinations that used language services, how many contained identification of the translator or interpreter?	7
Of the physical exam charts reviewed, how many were for juveniles?	0
Of the juvenile physical exam charts reviewed, how many were completed within 7 days of arrival to the facility?	0
Of the physical exam charts reviewed, how many were for adults?	25
Of the adult physical exam charts reviewed, how many PE-S's were completed within 14 days of arrival to the facility?	25
Of the physical exam charts reviewed, how many had a pain assessment?	25
Of the physical exam charts with pain assessment, how many were addressed ?	25
Of the physical exam charts reviewed, how many were reviewed by an MD? PE-C within 7 days.	0

AMERICAN OVERSIGHT

Of the physical exam charts reviewed, how many were reviewed by an MD? PE-S within 14 days.	25
Of the physical exam charts reviewed, how many were for adult females?	0
Of the adult female physical exam charts reviewed, how many had a record of the last menstrual cycle?	0
Of the adult female physical exam charts reviewed, how many had a record with a pap test offered?	0
Of the adult female physical exam charts reviewed, how many had a record where a pap test was not indicated?	0
Physical Exam Records Findings	All the physical Exams reviewed were PE-S.
Physical Exam Records Deliverables	No data reported

Physical Exam Observation - Review Complete

How many physical exam encounters were observed?	10
Of the physical exam encounters observed, how many included a full set of vital signs?	10
Of the physical exam encounters observed, how many were completed within the specified timeframe?	10
Of the physical exam encounters observed, how many included a detainee request for a chaperone?	0
Of the physical exam encounters observed, how many had an abnormal vital sign?	0
Of the physical examination encounters observed with an abnormal vital sign, how many were addressed and/or referred to a higher level of care?	No data reported
Of the physical exam encounters observed, how many indicated that a Snellen test was conducted during the examination?	10
Of the physical exam encounters observed, how many were properly designated as either PE-Complex or PE-Simple in accordance with the IHSC Directive on Health Assessments?	10
Of the physical examination encounters observed, how many were referred to the next level of care as directed by IHSC policy?	0
Physical Exam Encounters Findings	None
Physical Exam Encounters Deliverables	n/a

Prescreen Observation - Review Complete

How many prescreen encounters were observed?	16
	Yes

AMERICAN OVERSIGHT

Of the prescreen encounters observed, are language services being used during prescreen if appropriate?	
Of the prescreen encounters observed, how many prescreen encounters had documentation completed in eCW prior to intake screening?	16
Of the prescreen encounters observed, how many prescreening encounters were prioritized to level one when clinically indicated based on self-reported history or objective findings?	3
Prescreen Encounters Findings	None
Prescreen Encounters Deliverables	None

Risk Management - Review Complete

Trends	Trends identified are related to medication errors RE: sMARt implementation. Multiple units invloved. Not unique to the local site. Global issue.
Number of active Root Cause Analyses(RCA)/Sequence of Events (SOE).	0
Number of RCAs or SOEs completed during the last six (6) months.	0
Number of corrective actions generated from RCAs or SOEs during the last six (6) months.	0
List all corrective actions identified in the preceding field and note their status and due dates.	None
Risk Management Findings	None
Risk Management Deliverables	n/a

Schedules - Review Complete

How many schedules were reviewed?	3
Of the schedules reviewed, how many had a legend to explain codes?	3
Of the schedules reviewed, how many had staff assigned "40 hours per week" per scheduling period?	3
Of the schedules reviewed, how many had provider coverage on weekend/holidays?	3
Of the schedules reviewed, how many had actual work hours reflected for non-traditional shifts?	0
Are there signed approvals for non-traditional shifts?	Yes
Is there a PDF copy each time a change was made to the schedule?	Yes

AMERICAN OVERSIGHT

Schedules Findings	None
Schedules Deliverables	None

Segregation Chart Review - Review Complete

How many segregation records were reviewed?	25
Of the segregation records reviewed, how many indicate the patient was medically cleared for segregation?	24
Of the segregation records reviewed, how many indicate if daily segregation rounds by nursing are documented ?	24
Of the segregation records reviewed, how many offered the patient daily sick-call services?	25
Of the sick call services offered, how many were documented and noted whether patient accepted or denied sick call services?	25
Of the segregation records reviewed, how many patients had no history of a mental health diagnosis or mental health status was evaluated at least every 30 days?	25
Of the segregation records reviewed, how many patients had a history of a mental health diagnosis?	10
Of the patients with a mental health diagnosis, how many were seen weekly by Mental Health?	8
Segregation Records Findings	Note: Several detainees were in seg for a very short period of time (few days). Could not find one seg-clearance note and one daily nursing seg note.
Segregation Records Deliverables	No data reported

Segregation Observation - Review Complete

How many patients in segregation were observed in MHU full admission for medical overflow?	1
Of the patients in segregation observed in MHU full admission for medical overflow, how many records indicate that the patients were rounded on according to MHU policy?	1
Were sick call services offered to detainees in segregation or other specialty housing units?	Yes
Segregation Encounters Findings	None
Segregation Encounters Deliverables	n/a

Shift Report and Time Cards - Review Complete

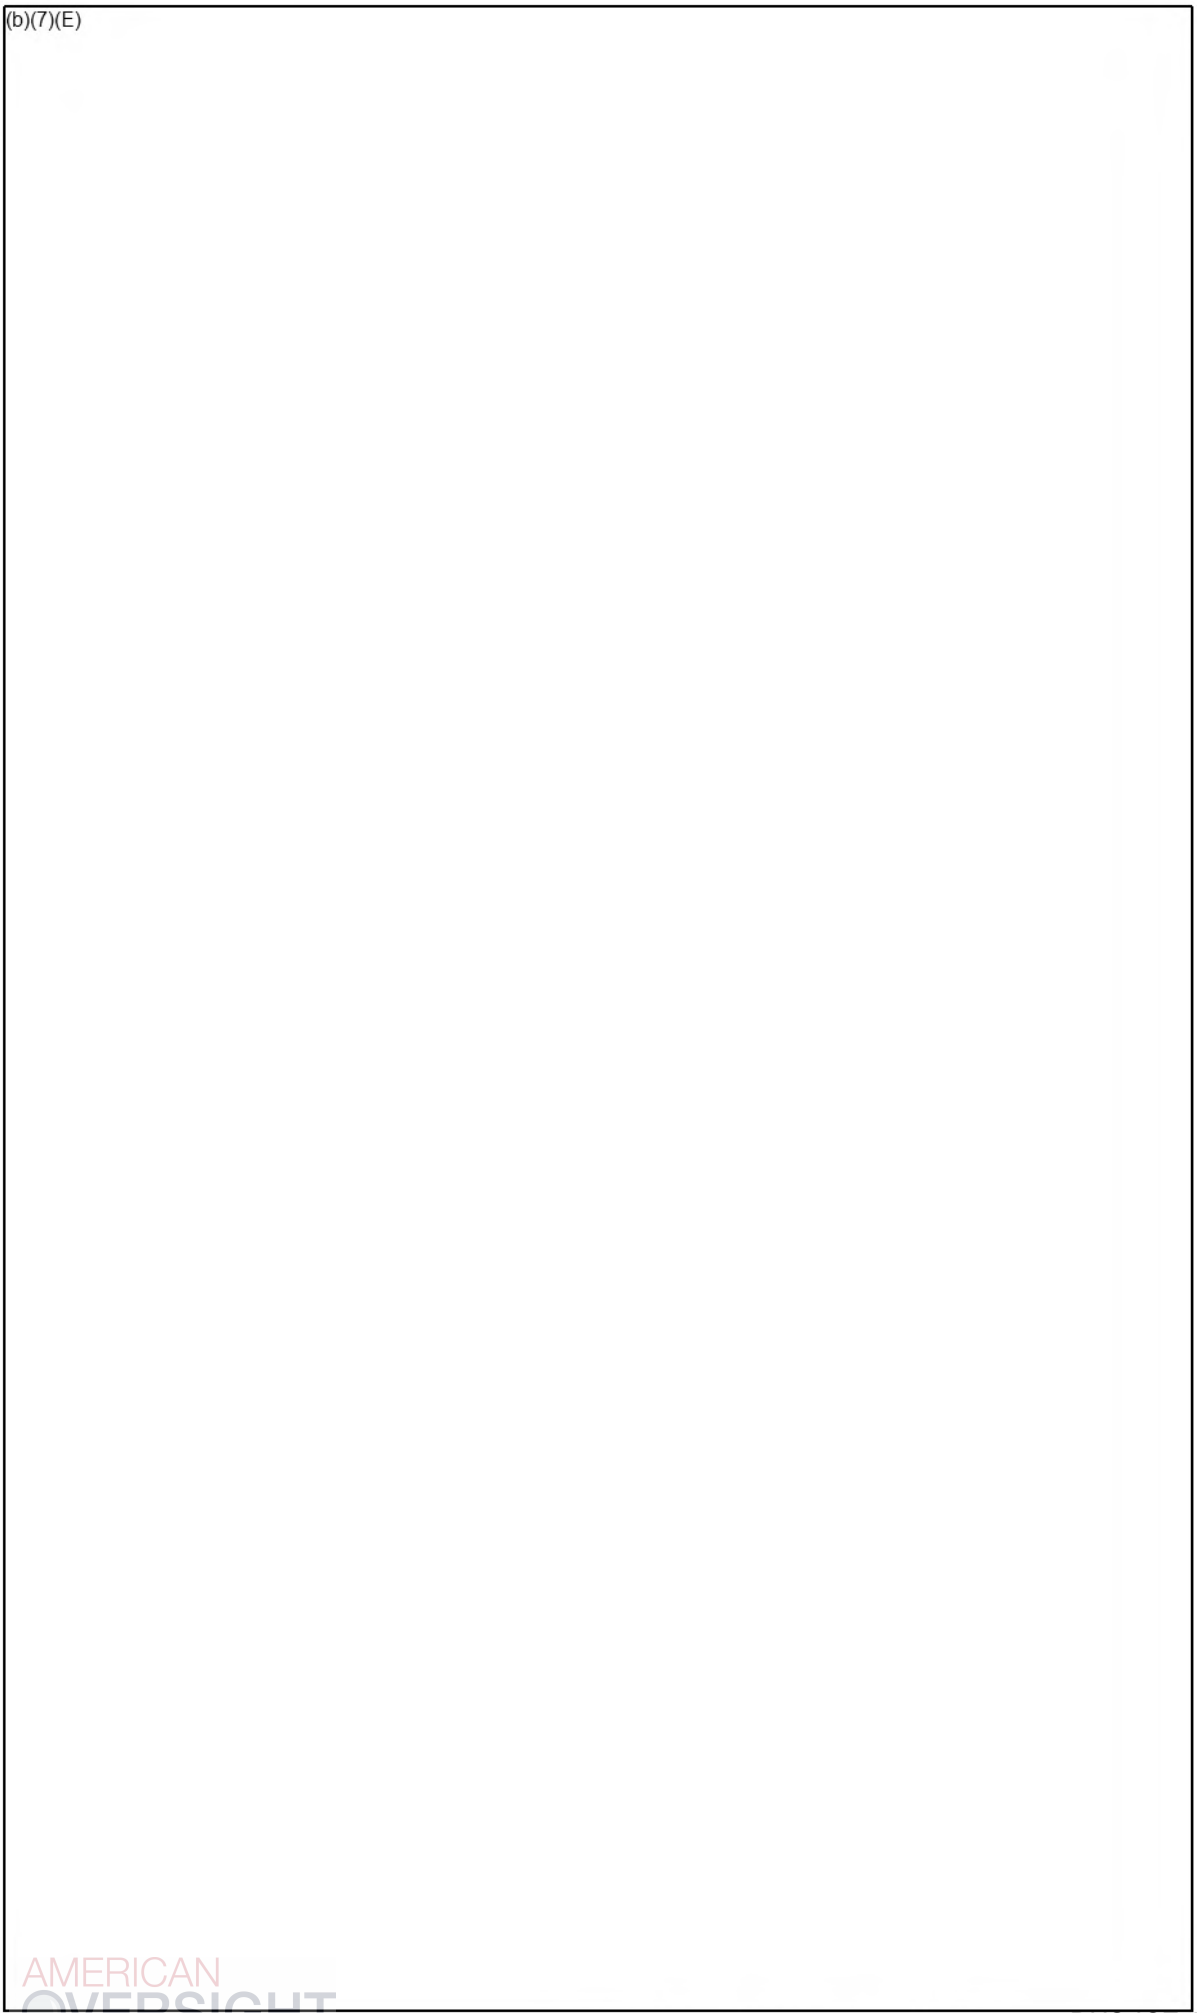
AMERICAN OVERSIGHT

Are shift reports conducted?	Yes
Is there at least one representative from each department?	Yes
Are written changes verified (initials, signature) on time cards by the HSA or AHSA(s)?	No
Shift Report and Time Cards Findings	GTM initials were not consistantly documented on the time card whene changes were required.
Shift Report and Time Cards Deliverables	Recommendation: (b)(5) (b)(5)

Sick Call Chart Review - Review Complete

How many sick call records were reviewed?	25
Of the sick call records reviewed, how many were the third time that the patient complained about the same issue?	4
Of the sick call records where the encounter was the third time that the patient has complained about the same issue, how many were referred to a provider?	4
Of the sick call records reviewed, how many included a full set of vital signs?	23
Of the sick call records reviewed, how many had a pain scale greater than 0?	12
Of the sick call records with a pain scale greater than 0, how many indicated that the pain was addressed?	12
Of the sick call records reviewed, how many included nursing protocols/guidelines referenced by name in the documentation?	21
Of the sick call records reviewed, how many included the reason documented in the "Reason" field?	25
Of the sick call records reviewed, how many had the reason for visit from an approved category?	25
Of the sick call records reviewed, how many were addressed by a nurse?	25
Of the sick call records addressed by a nurse, how many followed the SOAP format of documentation with appropriate nursing diagnosis?	25
Does the facility have a defined process in place addressing sick call services?	Yes
Sick Call Records Findings	When addressing pain and referred to provider must indicate referred for pain and stated reason. Reevaluate pain indicator; perhaps use template for description of pain and flow sheet for actual numerical accountability . *SCR_Num_Guidelines-Of the sick call records reviewed, how many included nursing protocols/guidelines referenced by name in the documentation? 21/22- indicates 22 number of RN's that completed encounter. 3 were completed by APP/CD

AMERICAN OVERSIGHT



Sick Call Records Deliverables	overall process (good) rating however does have loop hole for perfect storm. Continuity of care excellent . Follow-up by providers should be commended

Accreditation - Review Complete

Last ACA Accreditation	2017-06-05
Last ACA Findings	NO DATA
Last NCCHC Accreditation	2016-06-06
Last NCCHC Findings	Last NCCHC survey June 6-8, 2016. Found 100% compliant in all applicable essential standards. Found compliant in 96% of all applicable important standards. (Found not compliant in J-C-02 Clinical Performance Enhancement). J-C-02 Clinical Performance Enhancement (I). A clinical performance enhancement process evaluates the appropriateness of services delivered by all direct patient care clinicians, registered nurses (RN) and licensed practical nurses (LPN). A professional of at least equal training in the same general discipline completes the reviews annually. We reviewed a written record listing the names of the individuals being reviewed and the date of their most recent review, which included the required elements. However, the clinical performances for mid-level providers had not been completed at the time of the survey. The standard is not met. Corrective action is required for Compliance Indicator #1. The clinical performance of the facility's direct patient care clinicians and RNs and LPNs should be reviewed at least annually. Clinical performance enhancement review processes are designed to enhance competence and address areas in need of improvement. Ultimately, honing the practitioner's clinical skills positively impacts patient care. The following is acceptable documentation for compliance: a log or other written record providing the names of the mid-level providers, the dates of their most recent clinical performance enhancement reviews in accordance with the standard (including the name and credentials of the reviewer), and the signatures of the clinicians being reviewed to attest that the results were shared. Corrective action is required in order to meet this standard. Facility re-accredited.
Last PBNDS Accreditation	2017-01-31
Last PBNDS Findings	No medical findings

AMERICAN OVERSIGHT

Medication Administration - Review Complete

Is pre-pouring occuring?	No - See findings below.
Are nurses adhering to the six rights of medication administration (right patient, right drug, right route, right dose, right time, and right documentation)?	Yes
Are nurses using two forms of identification prior to administration?	Yes
Are mouth checks being conducted with every administration?	No - See findings below.
Are nurses administering only medications that they prepare?	Yes
Are all entries in the MAR complete (allergies, staff initials, etc)?	Yes
Number of all medication refusals documented on the MAR.	2.00
Of the identified medication refusals from the MAR, how many refusals did not have accompanying eCW documentation?	0.00
Number of high risk medication refusals.	0.00
Of the identified high risk medication refusals, how many times were providers NOT notified of the refusal?	0.00
Are nurses documenting the medication administration immediately after the medication is administered?	Yes
Findings	1. Observed that insulin multi-use vials are marked with "opened on/expires on" stickers; however, it is the insulin box that is labeled, not the vial itelf. 2. Mouthchecks were not completed during this observation. May be an isolated incident with this RN versus systemic issue. 3. Observed that the controlled narcotics and sharps located in the Pill Line room share the same log book/sheet. Would recommend two individual log books. Log book sheet properly provides columns for name, A#, item, #removed or #added; however, 1600 hour insulin syringes are removed in bulk numbers without proper documentation of which detainee the sharp was utilized for. 4. Unable to locate multiple refusal forms in eCW for meds refused on Pill Line.

AMERICAN OVERSIGHT

Emergency Preparedness and Response- Review Complete

Is there documentation of the man-down drills on each shift (once per month), mass casualty drills, and fire drills that have been conducted?	No - See findings below.
Do emergency scenarios vary?	Yes
Is the difference between a drill and an actual event evident in the write-up?	Yes
Do all staff participate in the drills?	No - See findings below.
Are all staff trained on emergency equipment?	Yes
Is emergency equipment checked daily and documented?	Yes
Is there documentation to support the training?	Yes
Did all staff receive an "after-action" debriefing?	Yes
If mortality related response, did staff involved submit a sequence of events statement of occurrence within 24 hours of incident and offered any adjustment support?	N/A - See findings below.
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event?	Yes
Findings	Doing mostly real life drills, not many preplanned. Not always hitting every shift every month. Recommend (b)(5)
Deliverables	NO DATA

Environmental Health - Review Complete

Are clinic Safety Data Sheets (SDS) files complete, current, and accessible?	Yes
Are hazardous chemicals (including cleaning supplies) labeled and securely stored?	N/A - See findings below.
The Public Health, Safety, and Preparedness Toolkit daily, weekly, monthly, and annual checklists are completed, signed by the HSA or designee, and maintained locally.	Yes
Items not in compliance with the Public Health, Safety, and Preparedness Toolkit daily, weekly, monthly, quarterly and annual checklists are documented to show corrective action with the completion date.	Yes
Are all airborne infection isolation (AII) room doors labeled "restricted area" and include requirements for entry?	Yes
Is documentation of daily checks on AII rooms' negative pressures complete?	Yes
Is the OSHA Form 300A summary completed and posted in clinic from Feb 1st through April 30th each year?	N/A - See findings below.
Findings	I am told Medical does not store any hazordous chemicals Not up due to time of year.

AMERICAN OVERSIGHT

Consent Forms - Review Complete

Number of consent forms reviewed.	25.00
Number of consent forms that were complete (not missing detainee signature, witness, or date).	25.00
Number of dental consent forms among the identified consent forms.	2.00
Number of dental consent forms that were complete (missing detainee signature, witness, or date).	2.00
Number of psychotropic consent forms among the identified consent forms.	7.00
Number of psychotropic consent forms that were complete (not missing detainee signature, witness or date).	7.00
Number of consent forms completed by a staff member other than the one completing the intake encounter.	0.00
Among the consent forms completed by a staff member other than the one completing the intake encounter, how many addressed the use of translation?	0.00
Findings	2 detainees had dental visits from the charts reviewed and they both had consent forms. 7 detainees reviwed were on psychotropic medications and they all had consent forms.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Transfers - Review Complete

Number of transfers reviewed.	25.00
Number of transfers authenticated appropriately (signed, stamped, and dated).	25.00
Number of transfers initiated in eCW.	25.00
Number of transfers completed by LVN or above.	25.00
Number of transfers with TB clearance annotated correctly.	19.00
Out of the transfers reviewed, how many had a positive chest X-ray?	10.00
Out of the transfers with positive chest X-ray, how many had lab results documented to verify non-infectiousness?	4.00
Out of the transfers reviewed, how many have active TB?	2.00
Out of the transfers with active TB, how many are not being treated for TB?	0.00
Number of transfers with chronic medical conditions or lack thereof annotated.	12.00
Number of transfers with medication instructions clearly provided.	12.00
Number of transfers signed by a proper level provider.	25.00
Findings	(b)(6); (b)(7)(C) (TB suspect) transfer summary documents CXR Results: Positive; consistent with TB. No lab results documented to verify non-infectiouness, no note indicting the TB-CM report was attached, transfer summary indicates detainee not being treated for TB, however "Current Medications" list RIPE TB treatment (b)(6); (b)(7)(C) (Active TB case) transfer summary indicates that the detainee is not being treated for active TB, but in the medical history labs indicate positive results for M.TB and medications include TB medications. Transfer summary includes too much information making interpretation of non-infectiousness difficult. A# (b)(6); (b)(7)(C) (Active TB case) transfer summary indicates negative CXR, actual results are positive. Also indicates not on TB treatment but TB medications listed on summary. (b)(6); (b)(7)(C) TB suspect) transfer summary indicates positive CXR and TB-CM attached, however, most current TB-CM

AMERICAN OVERSIGHT

	note only shows 2 neg smears, everything else is pending, although all smear results are in eCW. A# (b)(6); (b)(7)(C) (TB suspect) transfer summary indicates positive CXR and TB-CM attached, however, most current TB-CM note only shows pending smear results (b)(6); (b)(7)(C) (TB suspect) transfer summary indicated a neg CXR when actual CXR was pos for that date in eCW, also it indicates that patient not on TB treatment buy RIPE TB treatment listed under medications.

Prescreening Review - Review Complete

Number of prescreens reviewed.	25.00
Number of prescreens with detainee identified with at least two detainee identifiers.	25.00
Number of prescreens triaged according to prescreen policy.	25.00
Number of prescreens that used a translator.	0.00
Of the prescreen records that used a translator, how many listed a translator name or ID number?	0.00
Of the prescreen records that did not use a translator, how many listed a reason for not using a translator?	25.00
Number of prescreens with documentation completed in eCW prior to intake screening.	22.00
Findings	Out of 25 pre-screening charts reviewed, the documentation on three (3) of them was completed in eCW, after the intake screening documentation. No other pre-screening issues identified.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Prescreening Observations - Review Complete

Number of prescreen encounters observed.	8.00
Number of prescreen encounters observed that allowed for patient privacy.	8.00
If privacy was not provided, where was the prescreen performed?	N/A
Number of prescreen encounters that used language services.	0.00
Number of prescreen encounters completed within two hours of arrival.	8.00
Number of prescreen encounters documented in eCW prior to initiation of intake screening.	8.00
Number of prescreen encounters prioritized.	0.00
Of the prescreen encounters prioritized, how many were referred to intake in a timely manner?	0.00
Findings	All 8 prescreens were Spanish-speaking; screening RN was Spanish-speaking. No priority prescreens were identified.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Intake Screening Review - Review Complete

Number of intake screenings reviewed.	25.00
Number of intake screenings with detainee identified with at least two detainee identifiers.	25.00
Of the intake records reviewed, how many used a translator?	0.00
Of the intake screening records that used a translator, how many listed a translator name or ID number?	0.00
Of the intake screening records that did not use a translator, how many listed a reason for not using a translator?	25.00
Number of notes with TB clearance noted (PPD, CXR, current CXR from other facility).	25.00
Of the intake screening records, how many were TB negative?	25.00
Of the intake screening records that are TB negative, how many were signed, dated, and stamped by an RN or above?	8.00
Of the intake screening records, how many were TB positive?	0.00
Of the intake screening records that are TB positive, how many were signed, dated, and stamped by an RN or above?	0.00
Number of intake screenings with a complete pain assessment using the pain scale indicator.	25.00
Number of intake screenings with pain scale greater than 0.	0.00
Of the intake screenings with a pain scale greater than 0, how many were addressed?	0.00
Number of intake screenings with mental health screening completed.	25.00
Number of intake screenings that used the eCW Intake Screening template.	25.00
Of the intake screenings that used the eCW Intake Screening template, how many were completed appropriately (i.e., default answers changed to reflect the patient's response)?	25.00
Number of intake screenings with clinically significant findings.	2.00

AMERICAN OVERSIGHT

Of the intake screenings with clinically significant findings, how many were referred appropriately?	2.00
Number of intake screenings reviewed by an RN or above within 24 hours.	8.00
Findings	25 Intake charts reviewed. On one chart- Person conducting Intake Screening incorrectly documented that interpreter had been used; they listed themselves as the interpreter for the Intake Screening they conducted. For the purporses of this chart review, I have counted these occurrences as an interpreter NOT being utilized 17 of out 25 charts reviewed- Evidence of TB screening found in the medical record; however, no evidence that it was signed, dated and stamped by a RN or higher Out of the 25 charts reviewed- 10 of the intake screenings were conducted by LVN, thus requiring confirmatory sign-off by RN within 24 hours. Out of those 10 charts, eight (8) had confirmatory sign-off by RN within 24 hours. Two did not.
Deliverables	NO DATA

Physical Examinations Review - Review Complete

Number of physical examinations reviewed.	25.00
Number of physical examinations reviewed that used language services.	1.00
Of the physical examinations that used language services, how many contained identification of the translator/interpretter (name, ID, etc)?	1.00
Number of physical examinations reviewed for juveniles.	0.00
Of the physical examinations for juveniles, how many were completed within 7 days of arrival to the facility?	0.00
Number of physical examinations reviewed for adults.	25.00
Of the physicial examinations for adults, how many were completed within 14 days of arrival to the facility?	25.00
Number of physical examinations with pain assessment.	1.00
Of the physical examinations with pain assessment, how many were addressed?	1.00
Number of physical examinations with clinically significant findings.	25.00
Of the physical examinations with clinically significant findings, how many had a plan to address them?	25.00
Number of physical examinations reviewed by an MD (PE-C within 7 days; PE-S within 14 days).	24.00
Number of physical examinations for females.	0.00
FEMALE ONLY - Number of physical examinations with a record of the last menstrual cycle.	0.00
FEMALE ONLY - Number of physical examinations with a last menstrual cycle greater than 45 days prior to the encounter.	0.00
FEMALE ONLY - Number of physical examinations with a last menstrual cycle greater than 45 days prior to the encounter with appropriate documentation.	0.00
FEMALE ONLY - Number of physical examinations with a pap test offered.	0.00

AMERICAN OVERSIGHT

FEMALE ONLY - Number of physical examinations where a pap test was not indicated.	0.00
FEMALE ONLY - Number of physical examinations where a pap test was not indicated with appropriate documentation.	0.00
Findings	(1) PE-C was not reviewed by MD within 7 day period.
Deliverages	NO DATA

Physical Examinations Observations - Review Complete

Number of physical examination encounters observed.	4.00
Number of physical examination encounters with a full set of vital signs taken.	4.00
Number of physical examination encounters observed that were completed within 14 days.	4.00
Number of physical examinations that offered a chaperone.	
Of the physical examinations that offered a chaperone, how many accepted?	0.00
Of the physical examinations with a chaperone, how many contained documentation of the chaperone's name?	0.00
Of the physical examinations that offered a chaperone, how many refused?	0.00
Of the physical examinations that refused a chaperone, how many contained appropriate documentation of refusal?	0.00
Findings	No findings; physical exams performed were thorough and met all requirements. Per IHSC Directive 03-07 Health Assessment, a chaperone is to be used any time a detainee requests one, any time examination of breasts and/or genitals is conducted or circumstances when staff feel that it is appropriate. None of the forementioned criteria applied to these four physical examinations.

After Hours Medication Review - Review Complete

Number of after hours medication records reviewed.	6.00
Number of after hours medication records with the patient's identification number documented.	6.00
Number of after hours medication records with medication order(s) documented in eCW.	3.00
Number of after hours medication records that were generated by a nurse as a telephone order.	0.00
Number of after hours medication records that were generated by a nurse as a telephone order and were signed by a provider.	0.00
Does the pharmacy have a reconciliation process?	No - See findings below.
Does the pharmacy follow the reconciliation process?	No - See findings below.
Findings	There does not appear to be any clearly stated and understood process for the after hours cart usage and reconciliation of orders.
Deliverables	NO DATA

After Hours Medication Observation - Review Complete

Is a medication log in place and reflective of quantities of medication stored in the night cabinet?	No - See findings below.
Do line entries contain the date, time, patient name, alien number, medication name, and quantity removed?	No - See findings below.
Are after hours medication orders documented as dispensed in eCW?	No - See findings below.
Is the night cabinet, clean, stocked, and organized?	Yes
Is the night cabinet reviewed three times per week?	Yes
Are medications in the night cabinet within their use date (i.e., not expired)?	Yes
Findings	There is no line entries for time, states how many meds are removed but not how many are left. A#s are used but rarely names.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Language Access Review - Review Complete

Number of language access records reviewed.	25.00
Number of records where the patient was asked what language they speak.	25.00
Number of records where the patient's primary langauage or languag of choice is documented in their medical record.	25.00
Number of records where the translator use was addressed and documented (interpreter name or number, and language).	0.00
Reasons for why a translator was not used.	Out of the 25 charts review, no translator was used for any. Reasons: 1. "Provider fluent in patient's native language." 2. "Not applicable, patient speaks English." Out of the 25 charts reviewed, on one chart, the person conducting the intake screening incorrectly documented that an interpreter had been used. They documented themself as the interpreter. Since they did not seek the use of the language line or a colleague to interpret, I counted this chart as no interpreter used.
Findings	NO DATA
Deliverables	NO DATA

Language Access Observations - Review Complete

Are the "I Speak" posters and pocket guides readily available and posted in the clinic?	Yes

Number of refridgerator temperature logs that are up to date.	1.00
Number of refridgerator temperature logs that are out of range.	0.00
Of the refridgerator temperature logs that are out of range, how many logs have documentation of action taken?	0.00
Are the sharps counts accurate?	Yes
Are two signatures present for each shift change on the sharps counts?	Yes
Are the narcotic counts accurate?	Yes
Are two signatures present for each shift change on the narcotics counts?	Yes
Are the crash cart/bag and AEDS checked daily and on every shift?	Yes
Are cleaning logs present in the MHU and up to date?	N/A - See findings below.
Findings	Refridgerator checks in pharmacy not done from Feb- June, July record missing. No weekend checks Freezer in pharmacy: July record missing, not done on weekends. Narc/Sharp log in Pill line room is combined would recommend these be two separate logs.

On-Site Observations

During site observations, the reviewers should observe staff members carrying out the task, interview staff, review medical records and review supporting documents (i.e. logs, minutes, binders, electronic trackers, etc.).

Medication Administration (Observations-On site Review)

Question (10 ENCOUNTERS)	Improvement Plan (1,2, or 3)	Comments
Is pre-pouring occurring? **(Be sure to observe more than one nurse on multiple shifts)** **Level 2@100%**	No	
Are nurses adhering to the six rights of medication administration (right patient, right drug, right route, right dose, right time, and right documentation)? **Level 2 @100%**	Yes	
Are mouth checks being conducted with every administration? Observe 10 patients (if possible) on multiple shifts **Level 1 @80%**	Yes	
Are all entries in the MAR complete (allergies, staff initials, etc.)? Observe 10 different MAR; **Level 1 @80%**	Yes	
Are nurses documenting the medication administration immediately after the medication is administered**? Level 2 @100%**	Yes	
Number of all medication refusals documented on the MAR/eMAR **Denominator**	6	

AMERICAN OVERSIGHT

Facility: **Reviewers:** Dates:

Of the identified medication refusals from the MAR, how many refusals did have an accompanying signed refusal form? **Level 2@90%** .	Yes	
Of the identified high risk medication refusals, how many times were providers NOT notified of the refusal in eCW **Level 1 @100%; See guide eon ECW notification**	Yes, all refusals identified were psch meds and had Telephone encounter sent to provider.	

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-000381

Facility: **Reviewers:** Dates:

Emergency Preparedness and Response

Question	Improvement Plan (1,2, or 3)	Comments
Is there documentation showing completed date and time of man-down drills (once per month for each operating shift)? Refer to guide : **level 1 @90%** Is there documentation showing completed date and time of fire drills (once a quarter for each operating shift)? Refer to guide **level 1 @90%** Is there documentation showing completed date and time of mass casualty drills * (each shift should have a complete drill within a three year period)? *Table top/mock drills are acceptable replacements for drills not conducted facility wide Refer to guide: **level 1 @90%** Are clinic staff trained on emergency equipment (AED, first Aid kits, fire extinguisher, etc?) Yes/No **level 1 @90%**	Yes Yes Yes Yes	
Do emergency scenarios vary? Yes/No?? **Level 100 % if No**	Yes	
Is the difference between a drill and an actual event evident in the write-up?): **Level 1 @100%**	Yes	All were drills
Is there process in place to distribute "an after-action report to all staff**?** **Level 1 @90%:**	Yes	
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event? **Level 1 @100%**	Yes

Facility:	Reviewers:	Dates:

Summary

Topic	Findings/Recommendation
Chronic Care	Providers not consistently putting global alerts on these detainees.
Sick Call	Refer detainee to APP after third sick call of same complaint, Always reference nursing guideline in sick call note that you are using
MHU	24 hour chart checks not being done consistently. 6 of the 10 record reviews did not have them.
MHU	Detainees in MHU for over 30 days were not being seen by BHP.
SHU	4 out of 25 segregation detainees did not have daily nursing notes
Pharmacy Refrigerator Checks	Pharmacy not doing temperature checks on weekend or holidays to ensure temperature did not go out of range
Meetings	Monthly staff meetings not being conducted
Employee medical files	Yearly Respirator medical clearance forms not being completed
Training files	Very unorganized, recommend each employee has own file plus create a spreadsheet to keep track of training.
Transfer summaries	Documentation regarding TB treatment and x-ray results are not consistently correct on forms

After Hours Medication Chart Review - Review Complete

How many after hours medication log records were reviewed?	10
Of the after hours med log records reviewed, how many records documented the patient's identification number?	10
Of the after hours med log records reviewed, how many records were generated by a nurse as a telephone order?	7
Of the records generated by a nurse as a telephone order, how many were signed by a provider within 24 hours of return for next work shift?	7
Is an After-Hours Cabinet (AHC) medication sign out log in place for the documentation of medications removed?	Yes
Is all the necessary information entered into the fields of the AHC sign out log?	Yes
After Hours Medication Chart Review Findings	NOTE: Only 7 ouf of 10 records had a TE generated from the nurse because the order was written by the APP on weekend or after pharmacy hours. Some APPs work 12 hour shifts so they are in-house for a few hours after pharmacy leaves.
After Hours Medication Chart Review Deliverables	None

After Hours Medication Observation - Review Complete

Is a medication log in place and reflective of quantities of medication stored in the night cabinet?	Yes
Do line entries contain the date, time, patient name, alien number, medication name, and quantity removed?	Yes
Is the after hours verbal medication order entered into eCW by the prescriber upon return to duty?	Yes
Is the after hours medication administration properly documented on the MAR or in the electronic health record?	Yes
Is the night cabinet, clean, stocked, and organized?	Yes
	Yes

AMERICAN OVERSIGHT

Is the After-Hours Cabinet physically inspected (by pharmacist or designee) on a monthly basis to ensure the absence of expired, recalled or deteriorated medications?	
After Hours Medication Encounters Findings	Identified as BEST PRACTICE! Cart is available in medical clinic after pharmacy hours however during pharmacy hours it is stored in the pharmacy. This eliminates the tempatation to use for convenience reasons during normal pharmacy operations.
After Hours Medication Encounters Deliverables	None

Chronic Care Chart Review - Review Complete

How many chronic care records were reviewed?	25
Of the chronic care records reviewed, how many had a PE--Complex completed within two business days?	23
Of the chronic care records reviewed, how many had chronic conditions properly documented in eCW Problem List?	25
Of the chronic care records reviewed, how many detainees arrived at the facility on chronic medications?	17
Of the chronic care records with medications, how many encounters indicated that medications were continued as clinically indicated??	17
Of the chronic care records reviewed, how many detainees had psychiatric medications?	1
Of the chronic care records with psychiatric medications, how many encounters indicated that the detainee was seen by an MD or MLP every 30 days for medication assessment or review?	1
Of the chronic care records with psychiatric medications, how many encounters indicated that the detainee was seen by an MD or psychiatrist every 90 days for chronic care management?	1
Of the chronic care records reviewed, how many chronic care patients were identified as stable?	24
Of the stable chronic care patients, how many encounters indicated that the detainee was seen within 90 days?	24
Of the chronic care records reviewed, how many chronic care patients were identified as unstable?	1
Of the unstable chronic care patients, how many encounters indicated that follow-up appointments were scheduled earlier than 90 days ?	1
Of the chronic care records reviewed, how many had a global alert (IHSC 834 or electronic equivalent) completed?	16
Chronic Care Records Findings	1) Of the 25 charts reviewed, 9 of the charts had Global alert documented as Medical Hold or disability (unsure why that was documented instead of Med/Psych alert); none of those 9 charts were TB cases which would account for the documentation of a medical hold. 2) Difficult identifying chronic follows appointments for

AMERICAN OVERSIGHT

	those with chronic mental health conditions on psych medications, it was identified that they are not being scheduled as chronic follow ups; assuming since this site has a Psych APP the monthly chronic follow up to review psych medication side effects are being completed as mental health appointments. I was only able to find one mental health on pysch medication detainee labeled as chronic appointment/follow up. 3) Kudos to the facility's RNs for identifying and referring detainees during the RN sick call who failed to report chronic conditions duirng intake.
Chronic Care Records Deliverables	1) Follow up with site to ascertain their understanding of Med/Psych alert vs. Medical Hold vs. Disability Global Alerts 2) Follow up with site to ascertain their process for documenting monthly chronic care follow up appointment for detainees with chronic mental health conditions on psych medications. (are they documenting them as Chronic F/U vs Mental Health encounter types)

Chronic Care Observation - Review Complete

How many chronic care encounters were observed?	9
Of chronic care encounters observed, how many were considered stable patients?	9
Of the stable patients observed, how many were completed within the appropriate timeframe?	9
Of chronic care encounters observed, how many were considered unstable patients?	0
Of the unstable patients observed, how many were completed within the appropriate timeframe?	0
Of the chronic care encounters observed, how many had a treatment plan?	9
Chronic Care Encounters Findings	No Global Alert concerns noted during observations as was noted with the Chronic Care Chart Review. Discussed with team and CD, Mental Health CH appointments. They have a new PMHNP who previously worked as FNP so they are still working with Chief Psychiatrist to best determine exactly her role within the clinic.
Chronic Care Encounters Deliverables	None

Consent Forms Chart Review - Review Complete

How many consent forms were reviewed?	25
Of the consent forms reviewed, how many were general consent forms?	25
Of the general consent forms reviewed, how many were complete?	25
Of the consent forms reviewed, how many were dental consent forms?	11

AMERICAN OVERSIGHT

Of the dental consent forms reviewed, how many were complete?	11
Of the consent forms reviewed, how many were psychotropic consent forms?	13
Of the psychotropic consent forms reviewed, how many were complete?	13
Consent Forms Findings	No findings. All consent forms reviewed for dental procudres and psychotropic medications had appropiate consent forms.
Consent Forms Deliverables	No deliverables expected from site

Daily Assignment Sheets - Review Complete

How many daily assignment sheets were reviewed?	6
Of the daily assignment sheets reviewed, how many were archived appropriately?	6
Of the daily assignment sheets reviewed, how many had at least one emergency team identified per shift?	6
Daily Assignment Sheets Findings	Daily assignment sheets were updated on morning shift. However, evening shift numbers were not updated consistently. The NM corrected the currrent assignment shift sheet and reported that she would review evening assignments to ensure appropriate updates.
Daily Assignment Sheets Deliverables	Send three (3) random assignment sheets to RHSA for review from May 2019 and June 2019 by 1 JUL 2019.

Diagnostic Services - Review Complete

Are laboratory services provided in adherence with CLIA Waived testing?	Yes
Is there a current certificate for CLIA-waived testing?	Yes
Are radiation signs posted on all doors leading to areas with radiation producing equipment?	Yes
Is there documentation of a quarterly (monthly for declared pregnancies) review of the dosimetry report by the HSA or Compliance Officer?	Yes
Are staff seen wearing dosimeter badges while performing radiography services or while working in an area with radiation producing equipment?	Yes
Are staff dosimeter badges and controls stored in a central location and not near a radioactive source?	Yes
Diagnostic Services Findings	No recommendations
Diagnostic Services Deliverables	No deliverables

AMERICAN OVERSIGHT

Emergency Preparedness and Response Observation - Review Complete

Is there documentation showing completed date and time of man-down drills?	Yes
Is there documentation showing completed date and time of fire drills?	Yes
Is there documentation showing completed date and time of mass casualty drills?	Yes
Are clinic staff trained on emergency equipment?	Yes
Do emergency scenarios vary?	Yes
Is it evident that the emergency incident was either an actual event, full drill, or table top exercise?	Yes
Is there a system in place to distribute an after-action report to all staff?	No
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event ?	Yes
Emergency Preparedness and Response Findings	1)There is documentation of man down drills, but no roster of attendance. It has been recommended that an attendance roster with signatures is completed. 2)Fire drills are completed per policy, but drill scenario locations are not varied. Recommend varied locations of fires reported in the drill. 3) Drills debrief minutes are not shared with the facility. Recommend sharing drills with staff in the facility and maintaining a signature roster of review for staff members that were not present. 4) Recommend saving pdf versions of staff drills and training rosters. 5) Recommend reviewing emergency response bag with the team when changes or updates are made.
Emergency Preparedness and Response Deliverables	1 JUL 2019-provide RHSA with documentation of drill rosters and meetings minutes from May 2019 and June 2019.

Environmental Health Observation - Review Complete

Are clinic Safety Data Sheets (SDS) files complete, current, and accessible?	Yes
Are hazardous chemicals, including cleaning supplies, labeled and securely stored?	Yes
Are Public Health, Safety, and Preparedness Toolkit checklists maintained locally and documented (with CO/HSA Signatures or designee) to show corrective action with completion date?	Yes
Do Airborne Isolation and Inspection (AII) rooms requiring transmission based precautions have appropriate signage for the required precaution(s)?	Yes
Is documentation of daily checks on (AII) rooms' negative pressures complete?	Yes

AMERICAN OVERSIGHT

Is the OSHA Form 300A summary completed and posted in clinic from February 1st through April 30th each year?	Yes
Environmental Health Findings	(b)(5)
Environmental Health Deliverables	No deliverables

Grievances - Review Complete

Number of medical grievances reported through QI/JIC/CRCL/DRIL.	3
Is there a local SOP for managing grievances?	No
Is there an identified grievance officer?	Yes
Is there a log book and is it up to date?	Yes
Number of medical grievances that were not addressed in a timely manner.	0
Number of formal grievances.	11
Number of informal grievances.	0
Grievances Findings	No recommendations
Grievances Deliverables	No deliverables

Hunger Strike Chart Review - Review Complete

How many of hunger strike records were reviewed?	0
Of the hunger strike records reviewed, how many had with I&O's tracked in the health record?	0
Of the hunger strike records reviewed, how many indicated that the patient was educated on the adverse effects of a hunger strike and education was documented in health record?	0
Of the hunger strike records reviewed, how many indicated that the patient was counseled on termination of hunger strike and counseling was documented in health record?	0
Of the hunger strike records reviewed, how many indicated that the patient was evaluated by a mental health provider?	0
Of the hunger strike records reviewed, how many had a complete medical history, orthostatic vital signs, height, weight, urinalysis, mental health evaluation, physical assessment, clinically necessary laboratory tests deemed appropriate, and modification or augmentation of standard treatment protocols when medically indicated during the initial evaluation or refusal form?	0
Of the hunger strike records reviewed, how many had orthostatic vital signs including weight taken every 24 hours?	0
	0

AMERICAN OVERSIGHT

Of the hunger strike records reviewed, how many were discontinued by the Clinical Director, or a physician?	
Of the hunger strike records that were discontinued, how many indicated that IHSC healthcare personnel offered detainee appropriate follow-up with behavioral health and medical care and offer was documented in patient's chart?	0
Of the hunger strike records reviewed, how many had special needs to include restriction of commissary items?	0
Hunger Strike Records Findings	No Hunger strike encounter found during chart review peroid
Hunger Strike Records Deliverables	None expected

Hunger Strike Observation - Review Complete

How many patients were on a hunger strike at the time of observation?	0
Of the patients on a hunger strike, how many was water available for?	0
Of the patients on a hunger strike, how many were offered meals?	0
Of the patients on a hunger strike who were offered food, how much food was offered?	N/A
Of the food offered, how much of the food was eaten?	N/A
Of the patients on a hunger strike, how many had special needs?	0
Of the special needs patients on a hunger strike, how many records indicated that the needs were addressed?	0
Hunger Strike Encounters Findings	No detainees on Hunger Strike during site visit.
Hunger Strike Encounters Deliverables	None

Infectious Disease Prevention - Review Complete

Are hand washing equipment and hand sanitizers available in the clinic?	Yes
Are contact and outbreak investigations documented in the PHSP Unit reporting tool on SharePoint?	Yes
Is hand hygiene monitoring conducted and documented on the quarterly review?	Yes
Infectious Disease Prevention Findings	No recommendations
Infectious Disease Prevention Deliverables	No deliverables

Intake Screen Chart Review - Review Complete

AMERICAN OVERSIGHT

How many intake screen records were reviewed?	25
Of the intake screen records reviewed, how many had detainee identified with at least two detainee identifiers?	25
Of the intake screen records reviewed, how many used a translator?	4
Of the intake screen records that used a translator, how many listed a translator name or ID number ?	4
Of the intake screen records that did not use a translator, how many provide a reason for not using a translator?	21
Of the intake screen records reviewed, how many records had a complete pain assessment using the pain scale indicator?	25
Of the intake screen records reviewed, how many records had a pain scale greater than 0?	0
Of the records with a pain scale greater than 0, how many were assessed?	0
Of the intake screen records reviewed, how many used the eCW Intake Screening template?	25
Of the intake screen records reviewed, how many had clinically significant findings?	7
Of the intake records with clinically significant findings, how many were referred appropriately?	7
Of the intake screen records reviewed, how many were reviewed by an RN or above within 24 hours?	9
Intake Screen Records Findings	Out of the 25 intake screen records reviewed, 18 of them were completed by a LVN or LPN, thus requiring the review of a RN or higher within 24 hours. Out of those 18 intake screens completed by a LVN or LPN, nine (9) of them were reviewed by a RN or higher within 24 hours. Nine others did not meet that requirement. Out of the 25 intake screen records reviewed, one record suggested that a default drop-down option was not changed to reflect the patient's response. On one record, the detainee's language spoken was listed as English, perhaps the first default option in e-CW? However, the record clearly indicated that a Chinese translator was utilized during the Intake screening.
Intake Screen Records Deliverables	Refer to RCA for intake checks. No deliverables related to template updates. 1 JUL 2019-site will f/u with RM regarding RCA findings to include intake checks.

Intake Screen Observation - Review Complete

How many intake screen encounters were observed?	3
Of the intake screen encounters observed, how many did the nurse review the prescreen and transfer paperwork prior to initiating the intake screening?	3

AMERICAN OVERSIGHT

Of the intake screen encounters observed, how many included a full set of vital signs?	3
Of the intake screen encounters observed, how many used the eCW Intake Screening template?	3
Of the intake screen encounters that used the eCW Intake Screening template, how many were completed appropriately?	3
Of the intake screen encounters observed, how many was the patient was educated on access to care, upcoming PE appointment, and provided the grievance guide?	3
Of the intake screen encounters observed, how many included security advice of special needs and housing disposition?	3
Intake Screen Encounters Findings	Only 3 intakes observed due to intake arrived during night shift and were completed prior to start of day shift.
Intake Screen Encounters Deliverables	None

Language Access Chart Review - Review Complete

How many language access records were reviewed?	25
Of the language access records reviewed, how many indicate that patient was asked what language he or she speaks?	25
Of the language access records reviewed, how many document the patient's primary language or language of choice in his or her medical record?	25
Of the language access records reviewed, how many addressed and documented the use of a translator?	2
Of the language access records reviewed, how many did not use a translator?	23
Of the language access records that did not use a translator, how many documented reasons why a translator was not used?	23
Language Access Records Findings	None
Language Access Records Deliverables	None

Language Access Observation - Review Complete

Are the "I Speak" posters and pocket guides readily available and posted in the clinic?	Yes
Does the facility have a process in place to address accessing sign language interpreters and telecommunication (TDD/TTY) for individuals with hearing disabilities?	Yes
Language Access Encounter Findings	No recommendations
Language Access Encounter Deliverables	No deliverables

AMERICAN OVERSIGHT

Log Books - Review Complete

How many pharmacy refrigerator temperature logs were reviewed?	6
Of the pharmacy refrigerator temperature logs reviewed, how many have entries per shift for the past three months?	6
Of the pharmacy refrigerator temperature logs reviewed, how many refrigerator temperature logs are out of range?	0
Of the temperature logs that are out of range, how many logs have documentation of action taken and follow-up?	0
Are the sharps secured and the count accurate?	Yes
In review of the past 3 months of sharps counts, are two signatures present for each shift changes?	Yes
Are the narcotics secured with double lock and counts within the last 3 months accurate?	Yes
In review of past 3 months of controlled substance logs, are two signatures present for each shift change on the narcotics counts?	Yes
Are the urgent care cart/trauma bag and AEDs checked daily for content, signatures, AED functionality, and expiration for the past 3 months?	No
Log Books Findings	Logs for urgent care trauma bag and crash cart do not have numbers for the lock. Urgent care bag was documented as being checked in January 2019. Lock numbers on the bag did not match the inventory lock number documented. Staff is placing a check mark that the cart and bag lock are present, but lock numbers are not being documented.
Log Books Deliverables	Recommendation from RHSA (b)(5) (b)(5)

Medication Administration Observation - Review Complete

Is prepouring occurring?	No
How many medication administrations were observed?	44
Of the medication administrations observed, how many times were nurses adhering to ALL six rights of medication administration?	44

AMERICAN OVERSIGHT

Of the medication administrations observed, how many mouth checks were conducted?	
Of the medication administrations observed, how many times did nurses document the medication administration immediately after the medication was administered?	44
How many MAR entries were observed?	10
Of the MAR entries observed, how many were complete?	10
Of the MAR entries observed, how many medication refusals were documented?	10
Of the identified medication refusals, how many refusals had accompanying eCW documentation ?	10
Of the identified medication refusals, how many were high-risk medications?	4
Of the identified high-risk medication refusals, how many times were providers notified of the refusal?	4
Medication Administration Findings	None
Medication Administration Deliverables	None

Meetings - Review Complete

Of the two previous staff meetings, how many were conducted monthly and properly documented?	0
Of the two previous public health, safety, and preparedness meetings, how many were properly documented?	0
Of the two previous quality improvement meetings, how many were conducted quarterly and properly documented?	2
Out of the two previous quarterly ICE/HSA meetings, how many were conducted and properly documented?	0
Meetings Findings	Staff meetings are not being held monthly. The last staff meeting was April 2019. ICE/HSA meetings are being held but meeting minutes were not located in the scanned documenation. (b)(5)
Meetings Deliverables	1) Staff and PHSP meetings: SIte to send staff meeting minutes x 2 (May 2019 and June 2019) to RHSA by 1 JUL 2019. Meetings need to be regularly scheduled (i.e. reoccuring calendar meeting invite monthly)-Meeting schedule needs to be sent to RHSA in pdf format. Send a pdf copy of the meeting invite to the RHSA to show that it is reoccurring (a copy is needed, but the RHSA does not need to be cc'd on the actual meeting)

MHU Full Admission Chart Review - Review Complete

AMERICAN OVERSIGHT

How many MHU full admission records were reviewed?	25
Of the MHU full admission records reviewed, how many had admission encounters?	25
Of the MHU full admission records reviewed, how many had a documented PE within the past year?	25
Of the MHU full admission records without a documented PE, how many received a PE within 24 hours of admission to the MHU?	0
Of the MHU full admission records reviewed, how many had a nursing care plan?	25
Of the MHU full admission records with a nursing care plan, how many records indicate the plan was addressed and reviewed daily?	1
Of the MHU full admission records reviewed, how many had patient education provided daily?	1
Of the MHU full admission records reviewed, how many indicated detainee had an existing mental health diagnosis prior to admission?	16
Of the records that indicate that the detainee had a mental health diagnoses, how many received a mental health reassessment every seven (7) days, or more frequently, if indicated	13
Of the MHU full admission records reviewed, how many records did not have a mental health diagnoses?	9
Of the MHU full admission records without mental health diagnoses, how many records indicate the patient was assessed every 30 days by a MHP?	3
MHU Full Admission Records Findings	non urgent MH detainees didn't appear to be prioritized for MH follow-up however status may change quickly when non stationary
MHU Full Admission Records Deliverables	On average assess calendar dates to be effective for non urgent mental health status detainees.

MHU Full Admission Observation - Review Complete

Are all patients within sight or hearing of a qualified health professional?	Yes
How many nurses are in the MHU full admission at the time of observation?	2
How many patients are in the MHU full admission at the time of observation?	20
How many MHU full admission patients have a 24-hour chart review everyday?	20
Of the MHU full admission records, were 24-hour charts completed appropriately?	No data reported
How many MHU full admission patients have medications?	20

AMERICAN OVERSIGHT

Of the MHU full admissions patients with medicaitons, how many have all medications placed on pill line?	20
MHU Full Admission Encounters Findings	MFO_MD_ChartAppr_YES (Yes/No options not available in the drop down menu)
MHU Full Admission Encounters Deliverables	None

Personnel and Credentialing Files - Review Complete

Does the facility have a process for tracking requirements electronically?	Yes
How many personnel and credentialing files were reviewed?	22
Of personnel and credentialing files reviewed, how many were PHS officers?	8
Of the PHS officer records, how mand had at least two years of evaluations (COERS)?	0
Of personnel and credentialing files reviewed, how many were federal civil service employees?	1
Of personnel and credentialing files reviewed, how many were contractors?	7
Of personnel and credentialing files reviewed, how many records are for privileged staff?	6
Of the privileged staff records reviewed, how many were Licensed Independent Practitioners (LIPs)?	4
Of the LIP staff records reviewed, how many had personnel files records current?	0
Of the LIP staff records reviewed, how many had a competency assessment or peer review?	3
Of personnel and credentialing files reviewed, how many contained a current and signed Health and Ability form?	8
Of personnel and credentialing files reviewed, how many contained a signed statement of confidentiality?	8
Of personnel and credentialing files reviewed, how many contained a signed statement of risks and responsibility?	8
Of personnel and credentialing files reviewed, how many contained a signed statement of acknowledgement of understanding of local, national, and residential standards?	6
Of personnel and credentialing files reviewed, how many contained a signed release of information form?	8
Of personnel and credentialing files reviewed, how many contained current, valid, and unrestricted license?	7
Of personnel and credentialing files reviewed, how many contained documentation of primary education , license primary source, and annual verification?	7

AMERICAN OVERSIGHT

Of personnel and credentialing files reviewed, how many were reviewed for physicians or psychiatrists?	1
Of the physician or psychiatrist records, how many had documentation of residency?	1
Of the physician or psychiatrist records, how many were board certified?	1
Of the board certified physicians and psychiatrists, how many had documentation of board certification?	1
Of personnel and credentialing files reviewed, how many had a copy of a curriculum vitae or a resume?	2
Of personnel and credentialing files reviewed, how many had current National Provider Data Bank information?	5
Of the staff records reviewed, how many had scope of practice documentation if applicable?	22
Personnel and Credentialing Files Findings	None
Personnel and Credentialing Files Deliverables	None

Physical Exam Chart Review - Review Complete

How many physical exam charts were reviewed?	27
Of the physical exam charts reviewed, how many used language services?	10
Of the physical examinations that used language services, how many contained identification of the translator or interpreter?	10
Of the physical exam charts reviewed, how many were for juveniles?	0
Of the juvenile physical exam charts reviewed, how many were completed within 7 days of arrival to the facility?	0
Of the physical exam charts reviewed, how many were for adults?	25
Of the adult physical exam charts reviewed, how many PE-S's were completed within 14 days of arrival to the facility?	10
Of the physical exam charts reviewed, how many had a pain assessment?	27
Of the physical exam charts with pain assessment, how many were addressed ?	27
Of the physical exam charts reviewed, how many were reviewed by an MD? PE-C within 7 days.	17
Of the physical exam charts reviewed, how many were reviewed by an MD? PE-S within 14 days.	9
Of the physical exam charts reviewed, how many were for adult females?	6
	6

AMERICAN OVERSIGHT

Of the adult female physical exam charts reviewed, how many had a record of the last menstrual cycle?	
Of the adult female physical exam charts reviewed, how many had a record with a pap test offered?	0
Of the adult female physical exam charts reviewed, how many had a record where a pap test was not indicated?	0
Physical Exam Records Findings	Regarding the language services, the N/A represents that the staff member was able to translate for the provider or the provider was fluent in the detainee's native language. This was appropriately documented in the medical record. The majority of the females were pregnant and had appointments with OBGYN.
Physical Exam Records Deliverables	None

Physical Exam Observation - Review Complete

How many physical exam encounters were observed?	9
Of the physical exam encounters observed, how many included a full set of vital signs?	9
Of the physical exam encounters observed, how many were completed within the specified timeframe?	9
Of the physical exam encounters observed, how many included a detainee request for a chaperone?	0
Of the physical exam encounters observed, how many had an abnormal vital sign?	0
Of the physical examination encounters observed with an abnormal vital sign, how many were addressed and/or referred to a higher level of care?	0
Of the physical exam encounters observed, how many indicated that a Snellen test was conducted during the examination?	2
Of the physical exam encounters observed, how many were properly designated as either PE-Complex or PE-Simple in accordance with the IHSC Directive on Health Assessments?	9
Of the physical examination encounters observed, how many were referred to the next level of care as directed by IHSC policy?	1
Physical Exam Encounters Findings	None
Physical Exam Encounters Deliverables	None

Prescreen Observation - Review Complete

How many prescreen encounters were observed?	3
Of the prescreen encounters observed, are language services being used during prescreen if appropriate?	Yes

AMERICAN OVERSIGHT

Of the prescreen encounters observed, how many prescreen encounters had documentation completed in eCW prior to intake screening?	3
Of the prescreen encounters observed, how many prescreening encounters were prioritized to level one when clinically indicated based on self-reported history or objective findings?	0
Prescreen Encounters Findings	Only 3 Prescreen Encounters observed due to intake arrived during night shift and were completed prior to arrival at the facility. No level one encounters observed.
Prescreen Encounters Deliverables	None

Risk Management - Review Complete

Trends	Failure to refer to higher level of care from intake (3 cases have been identified at present; 2 resulted in hospitalization due to this breach in the intended process; Documentation of a RCA is completed for this identified process vulnerability; action plan implementation is in progress)
Number of active Root Cause Analyses(RCA)/Sequence of Events (SOE).	2
Number of RCAs or SOEs completed during the last six (6) months.	2
Number of corrective actions generated from RCAs or SOEs during the last six (6) months.	5
List all corrective actions identified in the preceding field and note their status and due dates.	All 5 caps are in progress: they have been developed and in implementation phase; Next follow up date for the action plans is June 30, 2019 and anticipated completion date: October 1, 2019.
Risk Management Findings	refer to information above; Overall excellent/commendable RM/FHPM/Facility leadership collaboration is noted.
Risk Management Deliverables	refer to information above

Schedules - Review Complete

How many schedules were reviewed?	10
Of the schedules reviewed, how many had a legend to explain codes?	10
Of the schedules reviewed, how many had staff assigned "40 hours per week" per scheduling period?	10
Of the schedules reviewed, how many had provider coverage on weekend/holidays?	10
Of the schedules reviewed, how many had actual work hours reflected for non-traditional shifts?	10
Are there signed approvals for non-traditional shifts?	Yes

AMERICAN OVERSIGHT

Is there a PDF copy each time a change was made to the schedule?	Yes
Schedules Findings	No recommendations
Schedules Deliverables	No deliverables

Segregation Chart Review - Review Complete

How many segregation records were reviewed?	17
Of the segregation records reviewed, how many indicate the patient was medically cleared for segregation?	17
Of the segregation records reviewed, how many indicate if daily segregation rounds by nursing are documented ?	17
Of the segregation records reviewed, how many offered the patient daily sick-call services?	17
Of the sick call services offered, how many were documented and noted whether patient accepted or denied sick call services?	17
Of the segregation records reviewed, how many patients had no history of a mental health diagnosis or mental health status was evaluated at least every 30 days?	3
Of the segregation records reviewed, how many patients had a history of a mental health diagnosis?	10
Of the patients with a mental health diagnosis, how many were seen weekly by Mental Health?	10
Segregation Records Findings	None
Segregation Records Deliverables	None

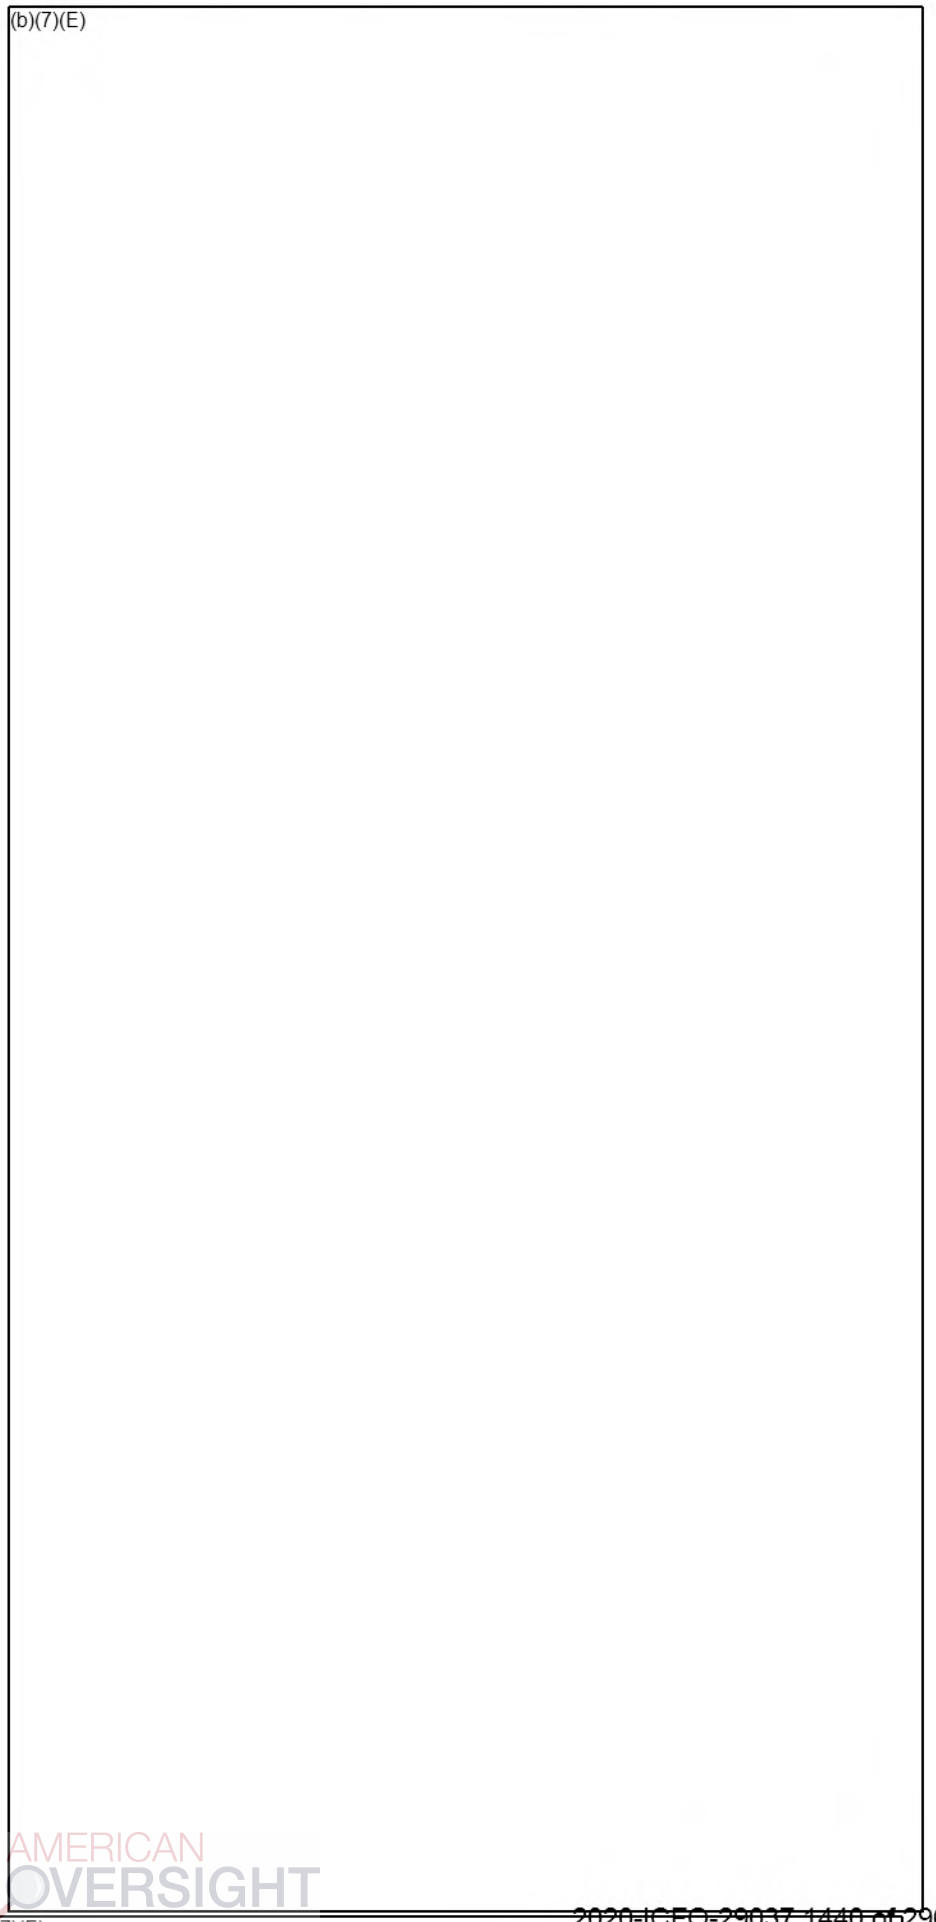
Segregation Observation - Review Complete

How many patients in segregation were observed in MHU full admission for medical overflow?	0
Of the patients in segregation observed in MHU full admission for medical overflow, how many records indicate that the patients were rounded on according to MHU policy?	0
Were sick call services offered to detainees in segregation or other specialty housing units?	Yes
Segregation Encounters Findings	Question confusing. There were 3 total detainees in segregation. None in MHU. Rounds performed daily in Segregation and sick call offered daily.
Segregation Encounters Deliverables	None

AMERICAN OVERSIGHT

Shift Report and Time Cards - Review Complete

Are shift reports conducted?	Yes
Is there at least one representative from each department?	Yes
Are written changes verified (initials, signature) on time cards by the HSA or AHSA(s)?	No
Shift Report and Time Cards Findings	5 out of 15 time cards reviewed and changes were noted, but initials were not present on the time care. Inconsistent verification on time cards noted.
Shift Report and Time Cards Deliverables	Send random time cards to RHSA (10 total-5 for May 2019 and 5 for June 2019. Info due to RHSA by 1 JUL 2019.



Sick Call Chart Review - Review Complete

How many sick call records were reviewed?	25
Of the sick call records reviewed, how many were the third time that the patient complained about the same issue?	5
Of the sick call records where the encounter was the third time that the patient has complained about the same issue, how many were referred to a provider?	4
Of the sick call records reviewed, how many included a full set of vital signs?	25
Of the sick call records reviewed, how many had a pain scale greater than 0?	13
Of the sick call records with a pain scale greater than 0, how many indicated that the pain was addressed?	12
Of the sick call records reviewed, how many included nursing protocols/guidelines referenced by name in the documentation?	23
Of the sick call records reviewed, how many included the reason documented in the "Reason" field?	25
Of the sick call records reviewed, how many had the reason for visit from an approved category?	25
Of the sick call records reviewed, how many were addressed by a nurse?	25
Of the sick call records addressed by a nurse, how many followed the SOAP format of documentation with appropriate nursing diagnosis?	25
Does the facility have a defined process in place addressing sick call services?	Yes
Sick Call Records Findings	1 out of 5 patients was not referred to a provider. 12 out of 13 patients had a pain score indicated
Sick Call Records Deliverables	None

Suicide Watch Chart Review - Review Complete

How many suicide watch records were reviewed? 13

AMERICAN OVERSIGHT

Of the suicide watch records, how many had a patient evaluated for suicide risk by a mental health profession or physician within 24 hours of being placed on suicide?	13
Of the suicide watch records, how many had a patient assessed to determine if a suicide smock was medically indicated via a Special Needs form?	5
Of the suicide watch records, how many had the need for finger food annotated via a Special Needs form?	6
Of the suicide watch records, how many had a daily mental health assessment conducted and documented by a mental health or mid-level provider?	12
Of the suicide watch records, how many had a patient released from suicide watch?	13
Of the suicide watch records, how many had a patient released from suicide watch by a mental health provider or physician?	13
Of the suicide watch records, how many had a suicide risk assessment conducted prior to release from suicide watch?	12
Of the suicide watch records, how many had checks conducted and documented at least every eight hours by clinical staff?	13
Of the suicide watch records, how many had checks conducted and documented at least every 15 minutes by custody staff?	13
Suicide Watch Pre-Audit Findings	Regarding the data for the Special Needs Forms questions: some of the information are placed in the treatment plan in the provider note and not on the Special Needs Forms.
Suicide Watch Pre-Audit Deliverables	By 1 JUL 2019-send RHSA random checks from SW between May-June 2019 to check SNF and note documentation. Reviews are not to exceed 5 charts checked.

Suicide Watch Observation - Review Complete

How many patients are on suicide watch?	0
Of the patients on suicide watch, how many have a nursing assessment performed within the past 8 hours?	0
Of the patients on suicide watch, how many have 15 minute checks being performed on a staggered schedule?	0
Of the patients on suicide watch, how many have an assessment by a mental health or mid-level provider within the last 24 hours?	0
Of the patients on suicide watch, how many have a restrictive environment compliant with current orders?	0
Suicide Watch Encounters Findings	No detainees on Suicide Watch during site visit.
Suicide Watch Encounters Deliverables	None

AMERICAN OVERSIGHT

Training - Review Complete

How many training folders were reviewed?	25
Of the training folders reviewed, how many had a HSD-500?	25
Of the training folders reviewed, how many had a signed position description ?	10
Of the training folders reviewed, how many were registered nurse training folders?	10
Of the registered nurse training folders reviewed, how many documented RN Physical Exam Training?	10
Of the training folders reviewed, how many had continuing medical education credits documented?	10
Training Findings	None
Training Deliverables	None

Transfer Summary Chart Review - Review Complete

How many transfers were reviewed?	25
Of the transfers reviewed, how many outgoing transfers were authenticated appropriately (signed, stamped, and dated)?	25
Of the transfers observed, how many outgoing transfers were completed by an LVN or above?	25
Of the transfer summary records reviewed for TB status, how many correctly documented no TB treatment status?	25
Of the transfer summary records reviewed for TB status, how many incorrectly documented no TB treatment status? (TB meds listed??)	0
Of the transfer summary records reviewed for TB status, how many correctly documented TB treatment status?	25
Of the transfer summary records reviewed for TB status, how many incorrectly documented TB treatment status? (Taking TB meds)	0
Transfers Findings	25 charts were reviewed. 100% of the 25 authenticated appropriately (signed, stamped, and dated). All transfer summaries were completed by a LVN or above. 2 out of 25 charts did not have medical and mental health conditions listed. 3 of the 25 had medications and they were documented appropriately.
Transfers Deliverables	None
Of the transfer summaries reviewed, how many listed the detainee's chronic medical conditions appropriately?	23
Of the transfer summaries reviewed, how many had "clear medication instructions" documented appropriately?	3

AMERICAN OVERSIGHT

Workforce Health Files - Review Complete

Are workforce health files kept separate from other files?	Yes
Is access to staff records limited to the compliance officer, HSA, and AHSA(s) and AA?	Yes
How many workforce health files were reviewed?	12
Of the twelve workforce health files reviewed, how many had past year's TB (PPD or CXR) documentation?	12
Of the twelve workforce health files reviewed, how many had a Hepatitis B vaccination or declination form?	12
Of the twelve workforce health files reviewed, how many had a yearly Ishihara Color Blind test?	12
Of the twelve workforce health files reviewed, how many had a yearly respirator medical clearance?	12
Of the twelve workforce health files reviewed, how many had a yearly respirator fit test?	12
Of the twelve workforce health files reviewed, how many had emergency contacts?	12
Are staff recordable injuries documented on Workforce Injury Tool?	Yes

AMERICAN OVERSIGHT

Accreditation - Review Complete

Last ACA Accreditation	2016-11-14
Last ACA Findings	Last ACA survey: November 15-15, 2016. No issues identified; the facility received 100/100.
Last NCCHC Accreditation	2014-01-06
Last NCCHC Findings	Last full NCCHC survey conducted January 6-8, 2014. Initially found non-compliant with two essential standards: J-A-04; Administrative Meetings and Reports J-A-07; Emergency Response Plan Health staff meets monthly to discuss health services operations. Attendees include the responsible physician, staff physicians and mid-level providers, the HSA and assistant HSA, mental health and nursing staff, dentist, pharmacist, and medical records representative. We reviewed the meeting minutes and attendance rosters. However, the warden does not receive monthly statistics on health services utilization; rather, these are given to Iha AFOD as we were told that medical activities were ICE management concerns, ahd not for the purview of the warden. The standard is not met. Corrective action is required for Compliance Indicator #4. Statistical reports of health services should be made at least monthly and provided to the facility administrator. The Intention of the standard is to facilitate joint monitoring of the health care delivery system. The following is acceptable documentation for compliance: copies of the next two monthly statistical reports with evidence that they were received by the facility administrator. In order to receive accreditation, verification that this standard has been met is required. J-A-07 E!mergency R111sponse Plan(!!!). Disaster drills have been held and documented as required. The 2011 and 2012 drills involved health staff and were critiqued and shared with them. Man-down drills have also been documented appropriately, including the sharing of critiques. However, the 2013 disaster drill did not involve medical staff, except for one representative who was asked to attend. The intent was to have the nurse then communicate the training back to the medical staff; however, the staff we interviewed indicated that they were unaware of the drill and confirmed they had little to no involvement. This drill occurred during the day shift, when numerous staff was present. We discussed the benefit of having all available staff participate with the HSA. The standard

AMERICAN OVERSIGHT

	Is not met. Corrective action is required for Compliance Indicator# 2. At least one mass disaster drill should be conducted annually so that over a three-year period, each shift has perticipaled. Practicing the emergency response plan makes health staff better able to respond to disasters when they occur in order to protect the health, safety, and welfare of inmates, staff, and visitors. When actual emergencies, whether or not they involve injuries, are critiqued, the intent of the standard is met. Acceptable documentation includes a plan by the RHA that addresses how this shift will be brought up to date with practicing the mass disaster (or by critiquing actual an actual event). In order to receive accreditation, verification that this standard has been met is required. The facility provided their corrective action plan, which was accepted by NCCHC. The facility was re-accredited. NOTE: NCCHC also did a partial-day visit to the new Otay Mesa facility on June 14, 2016. Because the facility had undergone a name change (from San Diego to Otay Mesa) and moved into a new building, NCCHC wanted to ensure their mission was still the same, and that the name change and move would not impact their accreditation status. No issues were identified from that visit.
Last PBNDS Accreditation	2017-03-28
Last PBNDS Findings	The site had a PBNDS inspection 3/28-3/30/2017. Per the HSA, no medical findings were noted. Pending the final report from Nakamoto.
Comments	NO DATA

Medication Administration - Review Complete

Is pre-pouring occuring?	No - See findings below.
Are nurses adhering to the six rights of medication administration (right patient, right drug, right route, right dose, right time, and right documentation)?	Yes
Are nurses using two forms of identification prior to administration?	Yes
Are mouth checks being conducted with every administration?	Yes
Are nurses administering only medications that they prepare?	Yes
Are all entries in the MAR complete (allergies, staff initials, etc)?	Yes
Number of all medication refusals documented on the MAR.	0.00
Of the identified medication refusals from the MAR, how many refusals did not have accompanying eCW documentation?	0.00
Number of high risk medication refusals.	0.00
Of the identified high risk medication refusals, how many times were providers NOT notified of the refusal?	0.00
Are nurses documenting the medication administration immediately after the medication is administered?	Yes
Findings	No findings noted
Deliverables	NO DATA

AMERICAN OVERSIGHT

Emergency Preparedness and Response- Review Complete

Is there documentation of the man-down drills on each shift (once per month), mass casualty drills, and fire drills that have been conducted?	Yes
Do emergency scenarios vary?	Yes
Is the difference between a drill and an actual event evident in the write-up?	Yes
Do all staff participate in the drills?	Yes
Are all staff trained on emergency equipment?	Yes
Is emergency equipment checked daily and documented?	Yes
Is there documentation to support the training?	Yes
Did all staff receive an "after-action" debriefing?	Yes
If mortality related response, did staff involved submit a sequence of events statement of occurrence within 24 hours of incident and offered any adjustment support?	N/A - See findings below.
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event?	Yes
Findings	All drills are being completed and include all shifts. Scenarios reviewed included a heart attack, hanging and anaphylaxis. All equipment checks done and training complete.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Environmental Health - Review Complete

Are clinic Safety Data Sheets (SDS) files complete, current, and accessible?	Yes
Are hazardous chemicals (including cleaning supplies) labeled and securely stored?	Yes
The Public Health, Safety, and Preparedness Toolkit daily, weekly, monthly, and annual checklists are completed, signed by the HSA or designee, and maintained locally.	Yes
Items not in compliance with the Public Health, Safety, and Preparedness Toolkit daily, weekly, monthly, quarterly and annual checklists are documented to show corrective action with the completion date.	Yes
Are all airborne infection isolation (AII) room doors labeled "restricted area" and include requirements for entry?	No - See findings below.
Is documentation of daily checks on AII rooms' negative pressures complete?	Yes
Is the OSHA Form 300A summary completed and posted in clinic from Feb 1st through April 30th each year?	Yes
Findings	Entry to negative pressure rooms is from a locked hallway. One entry is marked with signage indicating proper entry requirements and the other is not. No signs noted on any of the doors to the isolation rooms.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Consent Forms - Review Complete

Number of consent forms reviewed.	25.00
Number of consent forms that were complete (not missing detainee signature, witness, or date).	25.00
Number of dental consent forms among the identified consent forms.	2.00
Number of dental consent forms that were complete (missing detainee signature, witness, or date).	2.00
Number of psychotropic consent forms among the identified consent forms.	4.00
Number of psychotropic consent forms that were complete (not missing detainee signature, witness or date).	4.00
Number of consent forms completed by a staff member other than the one completing the intake encounter.	0.00
Among the consent forms completed by a staff member other than the one completing the intake encounter, how many addressed the use of translation?	0.00
Findings	4 out of the 25 charts reviewed had psychotropic consent forms. 2 of the charts had dental consents. Review additional dental and psychotropic consent forms on site. A# (b)(6); (b)(7)(C) had a diagnosis of Major Depressive disorder but no psychotropic medication on EMAR.
Deliverables	NO DATA

Transfers - Review Complete

Number of transfers reviewed.	25.00
Number of transfers authenticated appropriately (signed, stamped, and dated).	25.00
Number of transfers initiated in eCW.	25.00
Number of transfers completed by LVN or above.	25.00
Number of transfers with TB clearance annotated correctly.	22.00
Out of the transfers reviewed, how many had a positive chest X-ray?	4.00
Out of the transfers with positive chest X-ray, how many had lab results documented to verify non-infectiousness?	3.00
Out of the transfers reviewed, how many have active TB?	4.00
Out of the transfers with active TB, how many are not being treated for TB?	0.00
Number of transfers with chronic medical conditions or lack thereof annotated.	3.00
Number of transfers with medication instructions clearly provided.	3.00
Number of transfers signed by a proper level provider.	25.00
Findings	(b)(6); (b)(7)(C) CXR Date indicates 06/26/2017, should be 6/15/15 as indictd in on the transfer summary from BOP. (b)(6); (b)(7)(C) TB Clearance Modality was through Symptom Screening only, without documentation of CXR entered into eCW. Negative CXR dated 1/12/16 was per transfer summary from MCC, but no transfer summary was scanned into eCW (b)(6); (b)(7)(C) Transfer summary indicates that detainee is not being treated for active TB, but has TB medications listed on summary. Also transfer summary does not reference attached TB-CM with AFB lab results.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Prescreening Review - Review Complete

Number of prescreens reviewed.	25.00
Number of prescreens with detainee identified with at least two detainee identifiers.	25.00
Number of prescreens triaged according to prescreen policy.	7.00
Number of prescreens that used a translator.	0.00
Of the prescreen records that used a translator, how many listed a translator name or ID number?	0.00
Of the prescreen records that did not use a translator, how many listed a reason for not using a translator?	25.00
Number of prescreens with documentation completed in eCW prior to intake screening.	10.00
Findings	Out of 25 charts reviewed, only 7 were triaged per pre-screen policy. There were 8 records reviewed that listed disposition as "medically cleared for custody." That is not in accordance with the pre-screen policy, which indicates that the priority level must be listed, ie. No Priority, Priority-1, etc. Out of 25 records reviewed, 15 pre-screens were completed in e-CW, AFTER the intake screening.

Prescreening Observations - Review Complete

Number of prescreen encounters observed.	5.00
Number of prescreen encounters observed that allowed for patient privacy.	5.00
If privacy was not provided, where was the prescreen performed?	Screenings are conducted in a secured outside perimeter once detainee leaves transportation vehicle and prior to entering the facility. Each detainee is separated and asked prescreening questions. Detainees not being interviewed cannot hear the questions being asked by the medical staff.
Number of prescreen encounters that used language services.	3.00
Number of prescreen encounters completed within two hours of arrival.	5.00
Number of prescreen encounters documented in eCW prior to initiation of intake screening.	5.00
Number of prescreen encounters prioritized.	1.00
Of the prescreen encounters prioritized, how many were referred to intake in a timely manner?	1.00
Findings	Prescreenngs observed were conducted in accordance with policy. It was noted that prescreenings were prioritzed and seen first.
Deliverables	NO DATA

Intake Screening Review - Review Complete

Number of intake screenings reviewed.	25.00
Number of intake screenings with detainee identified with at least two detainee identifiers.	25.00
Of the intake records reviewed, how many used a translator?	12.00
Of the intake screening records that used a translator, how many listed a translator name or ID number?	12.00
Of the intake screening records that did not use a translator, how many listed a reason for not using a translator?	13.00
Number of notes with TB clearance noted (PPD, CXR, current CXR from other facility).	25.00
Of the intake screening records, how many were TB negative?	25.00
Of the intake screening records that are TB negative, how many were signed, dated, and stamped by an RN or above?	25.00
Of the intake screening records, how many were TB positive?	0.00
Of the intake screening records that are TB positive, how many were signed, dated, and stamped by an RN or above?	0.00
Number of intake screenings with a complete pain assessment using the pain scale indicator.	25.00
Number of intake screenings with pain scale greater than 0.	1.00
Of the intake screenings with a pain scale greater than 0, how many were addressed?	1.00
Number of intake screenings with mental health screening completed.	25.00
Number of intake screenings that used the eCW Intake Screening template.	25.00
Of the intake screenings that used the eCW Intake Screening template, how many were completed appropriately (i.e., default answers changed to reflect the patient's response)?	24.00
Number of intake screenings with clinically significant findings.	12.00

AMERICAN OVERSIGHT

Of the intake screenings with clinically significant findings, how many were referred appropriately?	5.00
Number of intake screenings reviewed by an RN or above within 24 hours.	0.00
Findings	Of the 25 intake charts reviewed, 5 of them were conducted by a LVN. All five charts were reviewed and signed off by a RN, but none of them were signed off within 24 hrs. Two Intakes were conducted on 1/2/17, but not signed off by the LVN until 1/4/17. Three other intakes were conducted on 1/5/17, but not signed off until 1/7/17.

After Hours Medication Review - Review Complete

Number of after hours medication records reviewed.	10.00
Number of after hours medication records with the patient's identification number documented.	9.00
Number of after hours medication records with medication order(s) documented in eCW.	7.00
Number of after hours medication records that were generated by a nurse as a telephone order.	2.00
Number of after hours medication records that were generated by a nurse as a telephone order and were signed by a provider.	2.00
Does the pharmacy have a reconciliation process?	Yes
Does the pharmacy follow the reconciliation process?	Yes
Findings	Facility utilizes a system of one key and requires two (2) signatures anytime something is removed from the night stock. One entry did not have an A# listed and charge nurse is looking into this. Some medications were noted to have been given during sick call and urgent care encounters on the weekends or after pharmacy had left. Findings were reviewed with pharmacist who explained the above listed were acceptable.
Deliverables	NO DATA

AMERICAN OVERSIGHT

After Hours Medication Observation - Review Complete

Is a medication log in place and reflective of quantities of medication stored in the night cabinet?	Yes
Do line entries contain the date, time, patient name, alien number, medication name, and quantity removed?	No - See findings below.
Are after hours medication orders documented as dispensed in eCW?	No - See findings below.
Is the night cabinet, clean, stocked, and organized?	Yes
Is the night cabinet reviewed three times per week?	Yes
Are medications in the night cabinet within their use date (i.e., not expired)?	Yes
Findings	Log does not reflect the time medication was removed. Use of some medications there was already an existing order in eCW and the medication was used to fill that order, i.e. return from outside appointment and KOP medications not avilable due to being housed in MHU to be seen by provider. Findings were reviewed with pharmacist who explained the above listed were acceptable.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Language Access Review - Review Complete

Number of language access records reviewed.	25.00
Number of records where the patient was asked what language they speak.	25.00
Number of records where the patient's primary langauage or languag of choice is documented in their medical record.	25.00
Number of records where the translator use was addressed and documented (interpreter name or number, and language).	2.00
Reasons for why a translator was not used.	23 out of 25 charts reviewed documented English as primary language. 2 charts spanish indicated as the primary language. Interpretor numbers were listed for the 2 two charts with spanish as primary language.
Findings	N/A
Deliverables	N/A

Language Access Observations - Review Complete

Are the "I Speak" posters and pocket guides readily available and posted in the clinic?	Yes
Does the facility have a process in place to address accessing sign language interpreters and telecommunication (TDD/TTY) for individuals with hearing disabilities?	Yes
Findings	Facility has a process in place to utilize sign language interpretors and TDD/TYY phones for individuals with hearing disabilities. Discussed with HSA that the site would benefit if an LOP was in place for staff guidance.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Diagnostic Services - Review Complete

Are on-site diagnostic services (laboratory and radiology) certified or licensed to provide those services?	Yes
Is there a procedure manual for each service provided?	Yes
Does each manual include protocols for the calibration of testing devices to ensure accuracy.	Yes
Is there a current certificate for CLIA-waived testing?	Yes
Are all aspects of the CLIA-waived standards addressed by written policy and defined procedures?	Yes
Are invoices from LabCorp or other radiology companies reconciled?	Yes
Are radiation signs posted on all doors leading to areas with radiation producing equipment?	Yes
Are radiation exposure reports reviewed quarterly?	Yes
Are staff seen wearing dosimeter badges while performing radiography services or while working in an area with radiation producing equipment?	Yes
Are staff dosimeter badges and controls stored in a central location and not near a radioactive source?	Yes
Are there safety checks for biomedical and diagnostic equipment?	Yes
Findings	CLIA Waiver expires 05/17/2017
Deliverables	NO DATA

AMERICAN OVERSIGHT

Log Books - Review Complete

Number of refridgerator temperature logs reviewed.	18.00
Number of refridgerator temperature logs that are up to date.	18.00
Number of refridgerator temperature logs that are out of range.	4.00
Of the refridgerator temperature logs that are out of range, how many logs have documentation of action taken?	0.00
Are the sharps counts accurate?	Yes
Are two signatures present for each shift change on the sharps counts?	Yes
Are the narcotic counts accurate?	Yes
Are two signatures present for each shift change on the narcotics counts?	Yes
Are the crash cart/bag and AEDS checked daily and on every shift?	Yes
Are cleaning logs present in the MHU and up to date?	Yes
Findings	It was found that out of the 18 temp logs checked, 4 nursing station medicine refrig temp logs were out of range by 1 degree. Specifically, they were read at 37 degrees and no notification was sent to pharmacy as required when temp is over 36 degrees as per local policy. The temp range is written on the log with instructions on what to do if an out of range temperature is logged. HSA addressed at shift report and corrective action was taken.

Daily Assignment Sheets - Review Complete

Number of daily assignment sheets reviewed.	3.00
Number of daily assignment sheets completed and archived .	3.00
Number of daily assignment sheets with one emergency team identified per shift.	3.00
Number of daily assignment sheets with appropriate scheduling changes (staffing, leave, call outs, etc).	2.00
Number of daily assignment sheets with clinic inspection completed and signed.	0.00
Are detainee referrals documented?	Yes
Findings	Clinic inspection is logged seperately and not reflected on the shift report
Deliverables	NO DATA

Shift Reports and Time Cards - Review Complete

Are reports held on time?	Yes
Is there at least one representative from each department?	Yes
Is there a time card for each contract employee?	Yes
Are lunch hours reflected on the time card?	Yes
Are written changes verified (initials, signature) by the HSA or AHSA(s)?	Yes
Findings	Report done on time and thorough. No findings.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Meetings - Review Complete

Out of the two previous staff meetings, how many were conducted at the appropriate time and properly documented?	2.00
Out of the two previous public health, safety, and preparedness meetings, how many were conducted at the appropriate time and properly documented?	2.00
Out of the two previous quality improvement meetings, how many were conducted at the appropriate time and properly documented?	2.00
Out of the two previous ICE/HSA meetings, how many were conducted at the appropriate time and properly documented?	2.00
Findings	NO DATA

Personnel Files - Review Complete

Number of PHS officer personnel files reviewed.	6.00
Number of federal civil service employee personnel files reviewed.	0.00
Number of contractor personnel files reviewed.	14.00
Does the facility have a process for tracking requirements electronically?	Yes
Is the "electronic tracker" up to date and complete?	Yes
Is all current malpractice insurance information for contractors up to date?	Yes
Of all personnel file records reviewed, how many records are for priveleged staff (physician, psychiatrist, psychologist, dentist, and social worker)?	5.00
Of the personnel file records for priveleged staff, how many are current?	5.00
Number of personnel files with current and signed Health and Ability form.	20.00
Number of personnel files with a signed statement of confidentiality (one time).	20.00
Number of personnel files with a signed statement of risks and responsibility (one time).	20.00
Number of personnel files with a signed statement of acknowledgement of understanding of local, national, and residential standards (one time).	20.00
Number of personnel files with a signed release of information form (one time).	20.00
Findings	No findings.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Credentialing Files- Review Complete

Number of PHS officer credentialing files reviewed.	6.00
Number of federal civil service employee credentialing files reviewed.	0.00
Number of contractor credentialing files reviewed.	14.00
Does the facility have a process for tracking requirements electronically?	Yes
Is the "electronic tracker" up to date and complete?	Yes
Number of credentialing files with health statements.	20.00
Number of credentialing files with current, valid, and unrestricted license.	20.00
Number of credentialing files with license primary source verification.	20.00
Number of credentialing files with documentation of primary education.	20.00
Number of credentialing files with education primary source verification.	20.00
Number of credentialing files reviewed for physicians or psychiatrists.	2.00
Number of physician or psychiatrist credentialing files with documentation of residency.	2.00
Number of credentialing files reviewed for board certified physicians or psychiatrists.	2.00
Number of board certified physician or psychiatrist credentialing files with documentation of board certification.	2.00
Number of credentialing files with a curriculum vitae or resume.	20.00
Number of PHS officer credentialing files with at least two years of evaluations (COERS).	4.00
Number of credentialing files with documented past or pending actions against a practitioner's license.	0.00
Number of credentialing files with current National Provider Data Bank information.	4.00
Number of credentialing files with scope of practice.	18.00
Number of credentialing files with personnel actions (positive or negative).	0.00

AMERICAN OVERSIGHT

Number of credentialing files with positive personnel actions (awards, recommendations, letters of appreciatio, etc).	4.00
Number of credentialing files with negative personnel actions (letter of counseling, etc).	0.00
Number of credentialing files with a competency assessment or peer review.	20.00
Number of peer reviews reviewed.	15.00
Number of peer reviews completed per local policy (clinical performance, appropriate use of resources, technical skills, clinical judgment, performance improvement activites).	15.00
Number of peer reviews with corrective actions.	0.00
Number of peer reviews with corrective actions addressed.	0.00
Findings	Credentialing folders well organized. 1 out of 20 folders needed the scope of practice to be signed. 1 out of 20 folders needed an updated scope of practice. 2 of the 6 officers were new and did not have two years of COERs as well as LOAs.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Employee Health Files - Review Complete

Are employee health files kept separate from other files?	Yes
Is access to employee records limited to the compliance officer, HSA, and AHSA(s).	Yes
Is the "electronic tracker" up to date and complete?	Yes
Number of employee health files reviewed.	6.00
Number of employee health files with current TB (PPD or CXR) documentation.	6.00
Number of employee health files with current Hepatitis B vaccination or declination form.	6.00
Number of employee health files with current Ishihara Color Blind test (only required for personnel completing CLIA-waived lab testing).	4.00
Number of employee health files with current respirator medical clearance.	6.00
Number of employee health files with current respirator fit test.	6.00
Number of employee health files with emergency contacts.	6.00
Are employee recorable injuries documented on OSHA Form 301 and OSHA 300 Log?	Yes
Findings	No findings.
Deliverables	NO DATA

PRE-ARRIVAL REVIEW

Accreditation

Most recent ACA, NCCHC, and PBNDS surveys. List type of survey and date.

Evaluation Method		
Survey	**Date**	**Findings / Recommendations**
ACA	Nov 14-15, 2016	
NCCHC	June 14-16, 2017-	
PBNDS	Jan 23-25, 2018	
Comments	All update to date and completed.	

AMERICAN OVERSIGHT

Grievances

Evaluation Method:	Observation	
Items to Review *(review 100% during past year)*	**Yes, No, or N/A**	**Comments**
1. Have there been any medical grievances reported through QI/JIC/CRCL/DRIL *(if so, provide type in comment section)*	Yes	Reported at monthly staff meetings, all staff receive annual live training on the grievance process in the facility, reported in QI/QA meetings.
2. Is there a local procedure (SOP) for managing grievances?	Yes	LOP
3. Is there an identified grievance officer?	Yes	LCDR (b)(7)(E)
4. Is the log book kept and up to date?	Yes	Log book encrypted on local share drive.
5. Were all Grievances addressed in a timely manner?	No	9 past deadline.
6. Number of Formal/Informal grievances: 0 / 3		Formal 238 as of 8/29/2018. No informal tracked.

Findings/ Recommendations:	. 9 addressed late out of 238 = 2.1%. Log shows who was late (1 person late 6 times) all will be informed by MGO and HSA on importance on timely adjudication.
Deliverables:	**N/A**

On-Site Observations

During site observations, the reviewers should observe staff members carrying out the task, interview staff, review medical records and review supporting documents (i.e. logs, minutes, binders, electronic trackers, etc.).

Medication Administration (Observations-Onsite Review)

Question (10 ENCOUNTERS)	Improvement Plan (1,2, or 3)	Comments
Is pre-pouring occurring? **(Be sure to observe more than one nurse on multiple shifts) Level 2@100%**		No
Are nurses adhering to the six rights of medication administration (right patient, right drug, right route, right dose, right time, and right documentation)? **Level 2 @100%**		Yes
Are mouth checks being conducted with every administration? Observe 10 patients (if possible) on multiple shifts **Level 1 @80%**		Yes
Are all entries in the MAR complete (allergies, staff initials, etc.)? Observe 10 different MAR; **Level 1 @80%**		10 of 10
Are nurses documenting the medication administration immediately after the medication is administered**? Level 2 @100%**		yes
Number of all medication refusals documented on the MAR/eMAR **Denominator**		6

AMERICAN OVERSIGHT

Of the identified medication refusals from the MAR, how many refusals did have an accompanying signed refusal form? **Level 2@90%** .		6
Of the identified high risk medication refusals, how many times were providers NOT notified of the refusal in eCW **Level 1 @100%; See guide eon ECW notification**		0

AMERICAN OVERSIGHT

Emergency Preparedness and Response

Question	Improvement Plan (1,2, or 3)	Comments
Is there documentation showing completed date and time of man-down drills (once per month for each operating shift)? Refer to guide: **level 1 @90%** Is there documentation showing completed date and time of fire drills (once a quarter for each operating shift)? Refer to guide **level 1 @90%** Is there documentation showing completed date and time of mass casualty drills * (each shift should have a complete drill within a three year period)? *Table top/mock drills are acceptable replacements for drills not conducted facility wide Refer to guide: **level 1 @90%** Are clinic staff trained on emergency equipment (AED, first Aid kits, fire extinguisher, etc?) Yes/No **level 1 @90%**		yes yes yes yes
Do emergency scenarios vary? Yes/No?? **Level 100% if No**	yes	
Is the difference between a drill and an actual event evident in the write-up?): **Level 1 @100%**	yes	
Is there process in place to distribute "an after-action report to all staff? **Level 1 @90%:**	yes	
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event? **Level 1 @100%**	yes	
Comments:	all within compliance	
Deliverables:	none

Transfers

Reviewer

Evaluation Method:	Section Completed Under the Pre-Audit Chart Reviews	
Items to Review *(review 25 records in the past month)*	**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of outgoing transfers authenticated appropriately (signed, stamped, and dated): **Level 1 @100%**	Level 1	25
2. Number of outgoing transfers completed by LVN or above. **Level 1 @100%,**	Level 1	25
3. Number of notes with TB clearance noted (PPD, CXR, current CXR from other facility) Level 2 @90%	Level 1	25
4. Of the 25 transfers reviewed for TB clearance documentation, how many correctly documented no TB treatment status? **see guide Level 2@90%**	Level 2	9 out of 9
5. Of the 25 transfers reviewed for TB clearance documentation, how many - incorrectly documented no TB treatment status? see guide **Level 2@90%**	Level 2	6 charts state was still on tx. at time of release, but in template documented is NOT on tx.
6. Of the 25 transfers reviewed for TB clearance documentation, how many - correctly documented TB treatment status? see guide: **Level 2@90%**	Level 2	10 of 10
7. Of the 25 transfers reviewed for TB clearance documentation, how many - incorrectly documented TB treatment status? see guide: **Level 2@90%**	Level 2	0

AMERICAN OVERSIGHT

Findings/ Recommendations:	Some nurses were documenting patient not on TB treatment when RIPE Tx was listed under Current Medications.
Deliverables:	This finding was reviewed at August's staff meeting and will also be further reviewed by the Nurse Manager. Nurses were reminded that transfer summaries with chronic care and meds must be reviewed/signed by an RN.

Pre-Screening

Reviewer:

Evaluation Method:	**Observe 10 pre-screens if Possible**	
Items to Review	**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of prescreen encounters observed. **Denominator**		10
2. Are language services being used during pre-screen if appropriate? **Level 2: if No**		yes
3. Number of prescreens with documentation completed in eCW prior to intake screening. **Denominator**		10
4. Number of prescreen encounters prioritized. **Level 1: @90%**		10
5. Number of Pre-screens encounters not prioritized appropriately: **Level 1 @90%**		0
Findings/ Recommendations:

AMERICAN OVERSIGHT

Last NCCHC Accreditation	2017-06-14T04:00:00Z
Last NCCHC Findings	J-G-01 Chronic Disease Services (E). Chronic illnesses are listed on the problem list, and the RHA maintains a list of chronic care patients. The responsible physician establishes and annually approves clinical protocols consistent with national clinical practice guidelines. We confirmed there were guidelines for all nine disease entities. However, the RHA uses Medical Practice Guidelines, dated 2012. We noted that new guidelines have been developed, although there was no documentation of the date that they were implemented. The providers were unaware that they existed, and there was no documentation of any training for them, nor was there documentation to confirm the guidelines are followed. The treatment plans do not include all the appropriate elements; frequency of follow-up, monitoring condition, and status and taking action as indicated, type and frequency of diagnostic testing and therapeutic regiments; instruction on diet, exercise, medication and adaptation to correctional environment, and clinical justification of deviation from the protocols. The standard is not met. Corrective action is required for Compliance Indicator #1. The responsible physician should establish and annually approve clinical protocols consistent with national clinical practice guidelines. These clinical protocols for the management of chronic diseases should include, but are not limited to, the following: asthma; diabetes; high blood cholesterol; HIV; hypertension; seizure disorder; tuberculosis; sickle cell; and major mental illness. Acceptable documentation includes copies of chronic disease protocols, consistent with national clinical practice guidelines, which have been reviewed and approved by the responsible physician. In order to receive accreditation, verification that this standard has been met is required. Corrective action is required for Compliance Indicator #2. Documentation in the medical record should confirm that clinicians are following chronic disease protocols by determining the frequency of follow-up for medical evaluation based on disease control; monitoring the patient's condition (e.g., poor, fair, good) and status (e.g. stable, improving, deteriorating) and taking appropriate action to improve patient outcome; indicating the type and frequency of diagnostic testing and therapeutic regimens (e.g. diet, medication, exercise); instructing the patient on diet, exercise, adaptation to the correctional environment, and medication; and clinically justifying any deviation from the protocol. Documentation of corrective action should be forwarded to demonstrate that patients receive clinical care that meets national clinical standards. The following is acceptable documentation for compliance: results of a CQI process study that assesses clinicians' compliance in following chronic disease protocols. The CQI study should also include a sufficient number of charts to demonstrate compliance with the standard. In order to receive accreditation, verification that this standard has been met is required. In February 2018, the RHA submitted the results of a CQI study of eight chronic care records (representing the most common conditions from February 14-22, 2018). The records were reviewed for the following criteria: 1) provider determined frequency of follow-up based on disease control; 2) provider noted condition and status; 3) appropriate action taken to improve outcome; 4) provider indicated type and frequency of diagnostic testing and therapeutic regiments (e.g., diet, medication,

AMERICAN OVERSIGHT

	exercise); 5) documented instruction on diet, exercise, adaptation to correctional environment and/or medication; and 6) documented clinical deviation from protocol. A threshold of 87% was selected. Compliance was demonstrated at 100% in all applicable cases for the first five criteria (the sixth was not applicable in this study). The RHA also submitted a list of guidelines based on national guidelines (such as the Federal Bureau of Prisons), and evidence of provider training in February 2018. Further corrective action is required regarding compliance with the protocols; the study should consist of a sufficient number of examples to demonstrate compliance. It is also recommended that a higher threshold is used to measure compliance. The standard is not met.
Last PBNDS Accreditation	2019-01-23T05:00:00Z
Last PBNDS Findings	No formal findings available by HQ staff preparing this report.
Accreditation Comments	No further action required.

After Hours Medication Chart Review - Review Complete

How many after hours medication log records were reviewed?	10
Of the after hours med log records reviewed, how many records documented the patient's identification number?	10
Of the after hours med log records reviewed, how many records were generated by a nurse as a telephone order?	2
Of the records generated by a nurse as a telephone order, how many were signed by a provider within 24 hours of return for next work shift?	2
Is an After-Hours Cabinet (AHC) medication sign out log in place for the documentation of medications removed?	Yes
Is all the necessary information entered into the fields of the AHC sign out log?	No
After Hours Medication Chart Review Findings	Indiviuals pulling medications did not consistently document the detainee's complete name, but the A# was always presents. The count was noted to be off in one drawer because a medication bottle was accidently placed in the wrong pocket. Most of the medications that were pulled from the cart were on the weekends or holidays (primarly after a visit with a provider).
After Hours Medication Chart Review Deliverables	(b)(5)

AMERICAN OVERSIGHT

After Hours Medication Observation - Review Complete

Is a medication log in place and reflective of quantities of medication stored in the night cabinet?	Yes
Do line entries contain the date, time, patient name, alien number, medication name, and quantity removed?	No
Is the after hours verbal medication order entered into eCW by the prescriber upon return to duty?	Yes
Is the after hours medication administration properly documented on the MAR or in the electronic health record?	Yes
Is the night cabinet, clean, stocked, and organized?	Yes
Is the After-Hours Cabinet physically inspected (by pharmacist or designee) on a monthly basis to ensure the absence of expired, recalled or deteriorated medications?	Yes
After Hours Medication Encounters Findings	There were inconsistenties regarding the documentation of the detainee's complete name on the log.
After Hours Medication Encounters Deliverables	See corrective action and deliverable in the section above. No additional actions required.

Chronic Care Chart Review - Review Complete

How many chronic care records were reviewed?	25
Of the chronic care records reviewed, how many had a PE--Complex completed within two business days?	20
Of the chronic care records reviewed, how many had chronic conditions properly documented in eCW Problem List?	25
Of the chronic care records reviewed, how many detainees arrived at the facility on chronic medications?	10
Of the chronic care records with medications, how many encounters indicated that medications were continued as clinically indicated??	10
Of the chronic care records reviewed, how many detainees had psychiatric medications?	2
Of the chronic care records with psychiatric medications, how many encounters indicated that the detainee was seen by an MD or MLP every 30 days for medication assessment or review?	2
Of the chronic care records with psychiatric medications, how many encounters indicated that the detainee was seen by an MD or psychiatrist every 90 days for chronic care management?	2
Of the chronic care records reviewed, how many chronic care patients were identified as stable?	3
Of the stable chronic care patients, how many encounters indicated that the detainee was seen within 90 days?	2

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-000535
2020 ICFO 29037 1535 of 2966
(b)(7)(E)
12/16/2019

Of the chronic care records reviewed, how many chronic care patients were identified as unstable?	
Of the unstable chronic care patients, how many encounters indicated that follow-up appointments were scheduled earlier than 90 days ?	20
Of the chronic care records reviewed, how many had a global alert (IHSC 834 or electronic equivalent) completed?	1
Chronic Care Records Findings	There was a failure for patients with chronic care diagnosis to have "global alerts" set.
Chronic Care Records Deliverables	(b)(5)

Chronic Care Observation - Review Complete

How many chronic care encounters were observed?	5
Of chronic care encounters observed, how many were considered stable patients?	4
Of the stable patients observed, how many were completed within the appropriate timeframe?	4
Of chronic care encounters observed, how many were considered unstable patients?	1
Of the unstable patients observed, how many were completed within the appropriate timeframe?	1
Of the chronic care encounters observed, how many had a treatment plan?	5
Chronic Care Encounters Findings	The providers did an excellent job educating the patient during the visit. They consistently utilized Up to date during the visit and utilized the teach back methods.
Chronic Care Encounters Deliverables	No CAP or deliverables indicated based on the findings.

Consent Forms Chart Review - Review Complete

How many consent forms were reviewed?	25
Of the consent forms reviewed, how many were general consent forms?	9
Of the general consent forms reviewed, how many were complete?	9
	16

AMERICAN OVERSIGHT

Of the consent forms reviewed, how many were dental consent forms?	
Of the dental consent forms reviewed, how many were complete?	16
Of the consent forms reviewed, how many were psychotropic consent forms?	1
Of the psychotropic consent forms reviewed, how many were complete?	1
Consent Forms Findings	No findings. Dental and psychotropic forms were complete
Consent Forms Deliverables	No CAP or deliverables identified on this review.

Daily Assignment Sheets - Review Complete

How many daily assignment sheets were reviewed?	25
Of the daily assignment sheets reviewed, how many were archived appropriately?	25
Of the daily assignment sheets reviewed, how many had at least one emergency team identified per shift?	25
Daily Assignment Sheets Findings	Daily assignment sheets were archived to include those with revisions. However, 0/25 assignment sheets were completed fully and are not being used as intended. Areas identified as incomplete include: on-call provider, census, leave/call-outs, workload data. Outdated form being utilized.
Daily Assignment Sheets Deliverables	(b)(5)

Diagnostic Services - Review Complete

Are laboratory services provided in adherence with CLIA Waived testing?	Yes
Is there a current certificate for CLIA-waived testing?	No
Are radiation signs posted on all doors leading to areas with radiation producing equipment?	Yes
Is there documentation of a quarterly (monthly for declared pregnancies) review of the dosimetry report by the HSA or Compliance Officer?	Yes
Are staff seen wearing dosimeter badges while performing radiography services or while working in an area with radiation producing equipment?	Yes
	Yes

AMERICAN OVERSIGHT

Are staff dosimeter badges and controls stored in a central location and not near a radioactive source?	
Diagnostic Services Findings	Clia Waived Certificate is expired.
Diagnostic Services Deliverables	1. By Oct 1st, application for CLIA renewal will be submitted. 2. By December 15th, provide RHSA a copy of the active CLIA certificate.

Emergency Preparedness and Response Observation - Review Complete

Is there documentation showing completed date and time of man-down drills?	Yes
Is there documentation showing completed date and time of fire drills?	Yes
Is there documentation showing completed date and time of mass casualty drills?	Yes
Are clinic staff trained on emergency equipment?	Yes
Do emergency scenarios vary?	Yes
Is it evident that the emergency incident was either an actual event, full drill, or table top exercise?	Yes
Is there a system in place to distribute an after-action report to all staff?	Yes
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event ?	Yes
Emergency Preparedness and Response Findings	After-action report is distributed at the staff meeting. However, there was only a focus on deficiencies. In the future, please addresss both the stregnths, opportunities for improvement and corrective actions planned for implementation. It just needs to be more robust.
Emergency Preparedness and Response Deliverables	(b)(5)

Environmental Health Observation - Review Complete

Are clinic Safety Data Sheets (SDS) files complete, current, and accessible?	Yes
Are hazardous chemicals, including cleaning supplies, labeled and securely stored?	Yes
Are Public Health, Safety, and Preparedness Toolkit checklists maintained locally and documented (with CO/HSA Signatures or designee) to show corrective action with completion date?	No
Do Airborne Isolation and Inspection (AII) rooms requiring transmission based precautions have appropriate signage for the required precaution(s)?	Yes

AMERICAN OVERSIGHT

Is documentation of daily checks on (AII) rooms' negative pressures complete?	Yes
Is the OSHA Form 300A summary completed and posted in clinic from February 1st through April 30th each year?	Yes
Environmental Health Findings	Tool Kits are not being used as prescribed.
Environmental Health Deliverables	1, Effective October 1st, ensure all PHSP toolkit inspection lists are utilized and submitted to the HSA for review and signature. 2. By December 15th, provide RHSA copies of the tolkit and evidence that these inspections are reviewed by the HSA.

Grievances - Review Complete

Number of medical grievances reported through QI/JIC/CRCL/DRIL.	37
Is there a local SOP for managing grievances?	Yes
Is there an identified grievance officer?	Yes
Is there a log book and is it up to date?	Yes
Number of medical grievances that were not addressed in a timely manner.	0
Number of formal grievances.	37
Number of informal grievances.	0
Grievances Findings	Thirty seven formal medical grievances were file in the past three months and 100% were addressed within 5 days. In the past twelve months there were 238 grievances with 10 that were addressed beyong 5 days. Adjustments to the management of the grievance process has improved timeliness. Grievance log follows national policy guidance and grievance officer performs a throurough review of eacah complaint and documentaton shows some complaints have been substantiated. A consistent method of sharing information for substaiated claims was not in place. In an effort to use this data for CQI initiatives, instructed grievance officer to share finding with the FHPM and local administrators. Grievance officer immediately acted on guidance and most recent substantiated claim was forwarded and corrective action is actively being worked on.
Grievances Deliverables	(b)(5)

Hunger Strike Chart Review - Review Complete

How many of hunger strike records were reviewed?	2
Of the hunger strike records reviewed, how many had with I&O's tracked in the health record?	0

AMERICAN OVERSIGHT

Of the hunger strike records reviewed, how many indicated that the patient was educated on the adverse effects of a hunger strike and education was documented in health record?	2
Of the hunger strike records reviewed, how many indicated that the patient was counseled on termination of hunger strike and counseling was documented in health record?	2
Of the hunger strike records reviewed, how many indicated that the patient was evaluated by a mental health provider?	2
Of the hunger strike records reviewed, how many had a complete medical history, orthostatic vital signs, height, weight, urinalysis, mental health evaluation, physical assessment, clinically necessary laboratory tests deemed appropriate, and modification or augmentation of standard treatment protocols when medically indicated during the initial evaluation or refusal form?	0
Of the hunger strike records reviewed, how many had orthostatic vital signs including weight taken every 24 hours?	0
Of the hunger strike records reviewed, how many were discontinued by the Clinical Director, or a physician?	1
Of the hunger strike records that were discontinued, how many indicated that IHSC healthcare personnel offered detainee appropriate follow-up with behavioral health and medical care and offer was documented in patient's chart?	2
Of the hunger strike records reviewed, how many had special needs to include restriction of commissary items?	1
Hunger Strike Records Findings	1) Detainee refused having vitals signs taken (including orthostatic vitals), hunger strike assessment and I&O 2) Only one of the two charts the hunger strike was discontinued by the CD; however the APP did document that the CD was informed of the case/discharge plan. 3) For one of the two cases the detainee was simultaneously on Suicide Watch/Precautions while on Hunger Strike; special needs for finger foods only was noted but not one for restriction of commissary items; however suicide precaution special needs would trump hunger strike special needs orders. So I did not ding them for not having restrictions of commissary items special needs form completed.
Hunger Strike Records Deliverables	(b)(5)

Hunger Strike Observation - Review Complete

How many patients were on a hunger strike at the time of observation?	1

AMERICAN OVERSIGHT

Of the patients on a hunger strike, how many was water available for?	1
Of the patients on a hunger strike, how many were offered meals?	1
Of the patients on a hunger strike who were offered food, how much food was offered?	1
Of the food offered, how much of the food was eaten?	1
Of the patients on a hunger strike, how many had special needs?	1
Of the special needs patients on a hunger strike, how many records indicated that the needs were addressed?	1
Hunger Strike Encounters Findings	Staff did a great job at considering the detainee's religious beliefs as it relates to food.
Hunger Strike Encounters Deliverables	No CAP or deliverables indicated.

Infectious Disease Prevention - Review Complete

Are hand washing equipment and hand sanitizers available in the clinic?	Yes
Are contact and outbreak investigations documented in the PHSP Unit reporting tool on SharePoint?	Yes
Is hand hygiene monitoring conducted and documented on the quarterly review?	No
Infectious Disease Prevention Findings	No evidence of hand hygiene monitoring for the January-March 2019 timeframe.
Infectious Disease Prevention Deliverables	(b)(5)

Intake Screen Chart Review - Review Complete

How many intake screen records were reviewed?	25
Of the intake screen records reviewed, how many had detainee identified with at least two detainee identifiers?	25
Of the intake screen records reviewed, how many used a translator?	8
Of the intake screen records that used a translator, how many listed a translator name or ID number ?	8
Of the intake screen records that did not use a translator, how many provide a reason for not using a translator?	17
Of the intake screen records reviewed, how many records had a complete pain assessment using the pain scale indicator?	25
	0

AMERICAN OVERSIGHT

Of the intake screen records reviewed, how many records had a pain scale greater than 0?	
Of the records with a pain scale greater than 0, how many were assessed?	0
Of the intake screen records reviewed, how many used the eCW Intake Screening template?	25
Of the intake screen records reviewed, how many had clinically significant findings?	8
Of the intake records with clinically significant findings, how many were referred appropriately?	8
Of the intake screen records reviewed, how many were reviewed by an RN or above within 24 hours?	16
Intake Screen Records Findings	No process failures identified on the intake chart review.
Intake Screen Records Deliverables	No CAPS or deliverables required.

Intake Screen Observation - Review Complete

How many intake screen encounters were observed?	8
Of the intake screen encounters observed, how many did the nurse review the prescreen and transfer paperwork prior to initiating the intake screening?	3
Of the intake screen encounters observed, how many included a full set of vital signs?	8
Of the intake screen encounters observed, how many used the eCW Intake Screening template?	3
Of the intake screen encounters that used the eCW Intake Screening template, how many were completed appropriately?	3
Of the intake screen encounters observed, how many was the patient was educated on access to care, upcoming PE appointment, and provided the grievance guide?	3
Of the intake screen encounters observed, how many included security advice of special needs and housing disposition?	0
Intake Screen Encounters Findings	Two staff assessed. The TDY nurse performed the intake questions using the template and asked 100% of questions and provided the required pt education. The local nurse relied on memory and asked numerous questions combined into one generic question which did not meet the intent of the intake. The pre-screening was not reviewed prior and no education to the upcoming scheduled PE. RN stated that it confused the patients especially when they run behind on PEs. Nurse documented responses to 100% of the questions on intake although she only recieved resposes to 40%. No patienys screened has any identified special needs.
Intake Screen Encounters Deliverables	(b)(5)

AMERICAN OVERSIGHT

(b)(5)

Language Access Chart Review - Review Complete

How many language access records were reviewed?	25
Of the language access records reviewed, how many indicate that patient was asked what language he or she speaks?	25
Of the language access records reviewed, how many document the patient's primary language or language of choice in his or her medical record?	25
Of the language access records reviewed, how many addressed and documented the use of a translator?	4
Of the language access records reviewed, how many did not use a translator?	21
Of the language access records that did not use a translator, how many documented reasons why a translator was not used?	21
Language Access Records Findings	Of the 25 records reviewed, four (4) documented use of a translator. For the 21 records that did not document use of a translator, they each contained a reason why the translator was not utilized. None of the 25 charts reviewed were out of compliance for language access.
Language Access Records Deliverables	No CAPS or deliverables required.

Language Access Observation - Review Complete

Are the "I Speak" posters and pocket guides readily available and posted in the clinic?	Yes
Does the facility have a process in place to address accessing sign language interpreters and telecommunication (TDD/TTY) for individuals with hearing disabilities?	Yes
Language Access Encounter Findings	During the onsite review "I speak" posters were present along with the language interpreter call information visible throughout the clinic. During patient encounters ensure providers are asking patients their language of preference and offer the use of the interperter line. Also, consider an ask back method to determine if an interpreter line is needed.
Language Access Encounter Deliverables	(b)(5)

AMERICAN OVERSIGHT

Log Books - Review Complete

How many pharmacy refrigerator temperature logs were reviewed?	10
Of the pharmacy refrigerator temperature logs reviewed, how many have entries per shift for the past three months?	10
Of the pharmacy refrigerator temperature logs reviewed, how many refrigerator temperature logs are out of range?	0
Of the temperature logs that are out of range, how many logs have documentation of action taken and follow-up?	0
Are the sharps secured and the count accurate?	Yes
In review of the past 3 months of sharps counts, are two signatures present for each shift changes?	Yes
Are the narcotics secured with double lock and counts within the last 3 months accurate?	Yes
In review of past 3 months of controlled substance logs, are two signatures present for each shift change on the narcotics counts?	Yes
Are the urgent care cart/trauma bag and AEDs checked daily for content, signatures, AED functionality, and expiration for the past 3 months?	Yes
Log Books Findings	Of the pharmacy refrigerator temperature logs reviewed, the facility only has one shift. Reviewed 10 logs from January-May, 2019.
Log Books Deliverables	No CAPS or deliverables indicated.

Medication Administration Observation - Review Complete

Is prepouring occurring?	No
How many medication administrations were observed?	15
Of the medication administrations observed, how many times were nurses adhering to ALL six rights of medication administration?	15
Of the medication administrations observed, how many mouth checks were conducted?	15
Of the medication administrations observed, how many times did nurses document the medication administration immediately after the medication was administered?	15
How many MAR entries were observed?	10
Of the MAR entries observed, how many were complete?	10
Of the MAR entries observed, how many medication refusals were documented?	1
	1

AMERICAN OVERSIGHT

Of the identified medication refusals, how many refusals had accompanying eCW documentation ?	
Of the identified medication refusals, how many were high-risk medications?	1
Of the identified high-risk medication refusals, how many times were providers notified of the refusal?	1
Medication Administration Findings	Medication administration followed all practices associated with the safe delivery of medication. Mouth checks are performed routinely and documentationperformed in real-time. Refusal forms completed as patients refused medications and chart review performed to alert provider. Patient refusing psychotropic medications had an appointment next day with (b)(6); (b)(7)(C)
Medication Administration Deliverables	Incidental findings which crossed several clinical areas: patient identification typically lacked patient involvement and rested soley on agreeing with their name and highly reliant on the patient's ID. Recommend retrain and monitoring to ensure active patient participation in the ID process (have patient verbalize one identifier: name, DOB or A#). No CAP or deliverable required.

Meetings - Review Complete

Of the two previous staff meetings, how many were conducted monthly and properly documented?	2
Of the two previous public health, safety, and preparedness meetings, how many were properly documented?	0
Of the two previous quality improvement meetings, how many were conducted quarterly and properly documented?	1
Out of the two previous quarterly ICE/HSA meetings, how many were conducted and properly documented?	2
Meetings Findings	Staff meeting minutes documented appropriately for last two months. Some information was "rolled" from meeting to meeting recommend fresh info at each meeting to ensure current issues are highlighted. No health and safety meeting minutes available. Local CQI meeting held in April, but no meeting minutes documented. Previous CQI meeting minutes well documented and included the national meeting minutes. ICE/PHS meeting present, but do not include all of the elements required by NCCHC.
Meetings Deliverables	(b)(5)

MHU Full Admission Chart Review - Review Complete

AMERICAN OVERSIGHT

How many MHU full admission records were reviewed?	25
Of the MHU full admission records reviewed, how many had admission encounters?	14
Of the MHU full admission records reviewed, how many had a documented PE within the past year?	18
Of the MHU full admission records without a documented PE, how many received a PE within 24 hours of admission to the MHU?	7
Of the MHU full admission records reviewed, how many had a nursing care plan?	16
Of the MHU full admission records with a nursing care plan, how many records indicate the plan was addressed and reviewed daily?	2
Of the MHU full admission records reviewed, how many had patient education provided daily?	8
Of the MHU full admission records reviewed, how many indicated detainee had an existing mental health diagnosis prior to admission?	7
Of the records that indicate that the detainee had a mental health diagnoses, how many received a mental health reassessment every seven (7) days, or more frequently, if indicated	5
Of the MHU full admission records reviewed, how many records did not have a mental health diagnoses?	18
Of the MHU full admission records without mental health diagnoses, how many records indicate the patient was assessed every 30 days by a MHP?	18
MHU Full Admission Records Findings	1) The charts were difficut to review. I found out that they have two different types of MHU's. An actual MHU and then an MHU dorm, which was confusing because the Provider notes didn't have any Admission or Discharge notes stating which MHU is being used. Also I wasnt sure of their process or if the same standards apply for both types of MHU's. MHU Dorm Status has little or no charting only RN 24 hr chart reviews for most charts and no provider discharge notes. Only one Provider order stated "step down to the MHU Dorm, visits and vitals per nursing protocol" 2) "Reason" section frequently did not list MHU Admission or Dischrage, making it difficult to know which chart to review.
MHU Full Admission Records Deliverables	(b)(5)

AMERICAN OVERSIGHT

MHU Full Admission Observation - Review Complete

Are all patients within sight or hearing of a qualified health professional?	Yes
How many nurses are in the MHU full admission at the time of observation?	25
How many patients are in the MHU full admission at the time of observation?	25
How many MHU full admission patients have a 24-hour chart review everyday?	25
Of the MHU full admission records, were 24-hour charts completed appropriately?	No data reported
How many MHU full admission patients have medications?	25
Of the MHU full admissions patients with medicaitons, how many have all medications placed on pill line?	25
MHU Full Admission Encounters Findings	No data reported
MHU Full Admission Encounters Deliverables	No data reported

Personnel and Credentialing Files - Review Complete

Does the facility have a process for tracking requirements electronically?	Yes
How many personnel and credentialing files were reviewed?	11
Of personnel and credentialing files reviewed, how many were PHS officers?	8
Of the PHS officer records, how mand had at least two years of evaluations (COERS)?	1
Of personnel and credentialing files reviewed, how many were federal civil service employees?	0
Of personnel and credentialing files reviewed, how many were contractors?	3
Of personnel and credentialing files reviewed, how many records are for privileged staff?	4
Of the privileged staff records reviewed, how many were Licensed Independent Practitioners (LIPs)?	2
Of the LIP staff records reviewed, how many had personnel files records current?	2
Of the LIP staff records reviewed, how many had a competency assessment or peer review?	2
Of personnel and credentialing files reviewed, how many contained a current and signed Health and Ability form?	10

AMERICAN OVERSIGHT

Of personnel and credentialing files reviewed, how many contained a signed statement of confidentiality?	10
Of personnel and credentialing files reviewed, how many contained a signed statement of risks and responsibility?	10
Of personnel and credentialing files reviewed, how many contained a signed statement of acknowledgement of understanding of local, national, and residential standards?	8
Of personnel and credentialing files reviewed, how many contained a signed release of information form?	10
Of personnel and credentialing files reviewed, how many contained current, valid, and unrestricted license?	10
Of personnel and credentialing files reviewed, how many contained documentation of primary education , license primary source, and annual verification?	8
Of personnel and credentialing files reviewed, how many were reviewed for physicians or psychiatrists?	1
Of the physician or psychiatrist records, how many had documentation of residency?	0
Of the physician or psychiatrist records, how many were board certified?	1
Of the board certified physicians and psychiatrists, how many had documentation of board certification?	1
Of personnel and credentialing files reviewed, how many had a copy of a curriculum vitae or a resume?	10
Of personnel and credentialing files reviewed, how many had current National Provider Data Bank information?	3
Of the staff records reviewed, how many had scope of practice documentation if applicable?	1
Personnel and Credentialing Files Findings	Overall, the personnel and credentialing files were well organized. An excel tracking system is used to track all staff members. The newest staff member's (arrived in April 2019) file was partially complete. Signed statement of acknowledgement of understanding of local, etc. were not documented in the same location. In addition, PE competencies are not signed off on. No, plan in place to ensure completion. Two years of PHS COERs are not present. Scope of practice documentation not present.
Personnel and Credentialing Files Deliverables	(b)(5)

Physical Exam Chart Review - Review Complete

AMERICAN OVERSIGHT

How many physical exam charts were reviewed?	25
Of the physical exam charts reviewed, how many used language services?	9
Of the physical examinations that used language services, how many contained identification of the translator or interpreter?	9
Of the physical exam charts reviewed, how many were for juveniles?	0
Of the juvenile physical exam charts reviewed, how many were completed within 7 days of arrival to the facility?	0
Of the physical exam charts reviewed, how many were for adults?	25
Of the adult physical exam charts reviewed, how many PE-S's were completed within 14 days of arrival to the facility?	11
Of the physical exam charts reviewed, how many had a pain assessment?	25
Of the physical exam charts with pain assessment, how many were addressed ?	8
Of the physical exam charts reviewed, how many were reviewed by an MD? PE-C within 7 days.	1
Of the physical exam charts reviewed, how many were reviewed by an MD? PE-S within 14 days.	3
Of the physical exam charts reviewed, how many were for adult females?	6
Of the adult female physical exam charts reviewed, how many had a record of the last menstrual cycle?	6
Of the adult female physical exam charts reviewed, how many had a record with a pap test offered?	6
Of the adult female physical exam charts reviewed, how many had a record where a pap test was not indicated?	6
Physical Exam Records Findings	25 Charts were reviewed. Language line was used for 9 and documented properly. Providers were fluent in the languages used by the other 16 detainees. The facility does not house children. 11 of the physical exams were PE simples. They were done within 14 days of arrival. 14 required PE complexes. All 25 had pain assessments. 8 had pain and the pain was addressed. 1 PE C was reviewed by MD within the specified 7 days. 3 PE S' were reviewed by MD with 14 days. 4 records were not reviewed by MD. Many of the records had a MD review but were past the specified time of 7 days for PE C's and 14 days for the PE Simples. 6 of the 25 were females. Menstrual cycles were documented for all. None of the females required paps. The audit tool asks if PE simples were done within 14 days. There is not a question asking if PE complexes were done within 2 days.
Physical Exam Records Deliverables	No corrective action at this time. (b)(5)

(b)(5)

AMERICAN OVERSIGHT

Physical Exam Observation - Review Complete

How many physical exam encounters were observed?	10
Of the physical exam encounters observed, how many included a full set of vital signs?	10
Of the physical exam encounters observed, how many were completed within the specified timeframe?	10
Of the physical exam encounters observed, how many included a detainee request for a chaperone?	0
Of the physical exam encounters observed, how many had an abnormal vital sign?	1
Of the physical examination encounters observed with an abnormal vital sign, how many were addressed and/or referred to a higher level of care?	1
Of the physical exam encounters observed, how many indicated that a Snellen test was conducted during the examination?	10
Of the physical exam encounters observed, how many were properly designated as either PE-Complex or PE-Simple in accordance with the IHSC Directive on Health Assessments?	10
Of the physical examination encounters observed, how many were referred to the next level of care as directed by IHSC policy?	0
Physical Exam Encounters Findings	Facility is working ahead of schedule on PEs as time permits - proactive measure incase of large influx of patients. Best practice! All questions are not being asked as outlines in the PE templates; poses risk for incorrect/faulty history. Encourage staff to follow questionairre as outlined to ensure the best history possible. There were no PEs that required a referral to a higher level of care.
Physical Exam Encounters Deliverables	(b)(5)

Prescreen Observation - Review Complete

How many prescreen encounters were observed?	14
Of the prescreen encounters observed, are language services being used during prescreen if appropriate?	Yes
Of the prescreen encounters observed, how many prescreen encounters had documentation completed in eCW prior to intake screening?	14
Of the prescreen encounters observed, how many prescreening encounters were prioritized to level one when clinically indicated based on self-reported history or objective findings?	6
Prescreen Encounters Findings	Observations occurred with only one staff member (TDY from HQ). No findings or recommendations.

AMERICAN OVERSIGHT

Prescreen Encounters Deliverables	No corrective actions or deliverables indicated.

Risk Management - Review Complete

Trends	No RM trending data to review.
Number of active Root Cause Analyses(RCA)/Sequence of Events (SOE).	0
Number of RCAs or SOEs completed during the last six (6) months.	0
Number of corrective actions generated from RCAs or SOEs during the last six (6) months.	0
List all corrective actions identified in the preceding field and note their status and due dates.	N/A
Risk Management Findings	No data analysis of IRs.
Risk Management Deliverables	(b)(5)

Schedules - Review Complete

How many schedules were reviewed?	3
Of the schedules reviewed, how many had a legend to explain codes?	3
Of the schedules reviewed, how many had staff assigned "40 hours per week" per scheduling period?	2
Of the schedules reviewed, how many had provider coverage on weekend/holidays?	3
Of the schedules reviewed, how many had actual work hours reflected for non-traditional shifts?	3
Are there signed approvals for non-traditional shifts?	Yes
Is there a PDF copy each time a change was made to the schedule?	Yes
Schedules Findings	Schedule maintainance/revisions are not performed timely. The schedules most probably do not reflect actual hours worked by employees. No systematic process to revise schedule as changes are made. Officer reflected as attending CME was actually on AL. These are incidental findings and will be addessed by RHSA on-site.
Schedules Deliverables	(b)(5)

Segregation Chart Review - Review Complete

How many segregation records were reviewed?	0
Of the segregation records reviewed, how many indicate the patient was medically cleared for segregation?	0
Of the segregation records reviewed, how many indicate if daily segregation rounds by nursing are documented ?	0
Of the segregation records reviewed, how many offered the patient daily sick-call services?	0
Of the sick call services offered, how many were documented and noted whether patient accepted or denied sick call services?	0
Of the segregation records reviewed, how many patients had no history of a mental health diagnosis or mental health status was evaluated at least every 30 days?	0
Of the segregation records reviewed, how many patients had a history of a mental health diagnosis?	0
Of the patients with a mental health diagnosis, how many were seen weekly by Mental Health?	No data reported
Segregation Records Findings	No segregation records were found with 90 days
Segregation Records Deliverables	No CAP or deliverables required.

Segregation Observation - Review Complete

How many patients in segregation were observed in MHU full admission for medical overflow?	0
Of the patients in segregation observed in MHU full admission for medical overflow, how many records indicate that the patients were rounded on according to MHU policy?	0
Were sick call services offered to detainees in segregation or other specialty housing units?	No data reported
Segregation Encounters Findings	No data to review.
Segregation Encounters Deliverables	No CAP or deliverables required.

Shift Report and Time Cards - Review Complete

Are shift reports conducted?	Yes
Is there at least one representative from each department?	Yes
Are written changes verified (initials, signature) on time cards by the HSA or AHSA(s)?	No

AMERICAN OVERSIGHT

Shift Report and Time Cards Findings	Changes are made to timecards without HSA or AHSAs signature. Multiple timecards are used throughout a reporting period for staff.
Shift Report and Time Cards Deliverables	Ensure timecards with changes are verified. No CAP or deliverables required.

Sick Call Chart Review - Review Complete

How many sick call records were reviewed?	25
Of the sick call records reviewed, how many were the third time that the patient complained about the same issue?	2
Of the sick call records where the encounter was the third time that the patient has complained about the same issue, how many were referred to a provider?	2
Of the sick call records reviewed, how many included a full set of vital signs?	25
Of the sick call records reviewed, how many had a pain scale greater than 0?	6
Of the sick call records with a pain scale greater than 0, how many indicated that the pain was addressed?	6
Of the sick call records reviewed, how many included nursing protocols/guidelines referenced by name in the documentation?	24
Of the sick call records reviewed, how many included the reason documented in the "Reason" field?	24
Of the sick call records reviewed, how many had the reason for visit from an approved category?	24
Of the sick call records reviewed, how many were addressed by a nurse?	25
Of the sick call records addressed by a nurse, how many followed the SOAP format of documentation with appropriate nursing diagnosis?	25
Does the facility have a defined process in place addressing sick call services?	No data reported
Sick Call Records Findings	Review met thresholds.
Sick Call Records Deliverables	No CAP or deliverables required.

Of the suicide watch records, how many had the need for finger food annotated via a Special Needs form?	8

AMERICAN OVERSIGHT

Of the suicide watch records, how many had a daily mental health assessment conducted and documented by a mental health or mid-level provider?	13
Of the suicide watch records, how many had a patient released from suicide watch?	13
Of the suicide watch records, how many had a patient released from suicide watch by a mental health provider or physician?	13
Of the suicide watch records, how many had a suicide risk assessment conducted prior to release from suicide watch?	13
Of the suicide watch records, how many had checks conducted and documented at least every eight hours by clinical staff?	13
Of the suicide watch records, how many had checks conducted and documented at least every 15 minutes by custody staff?	7
Suicide Watch Pre-Audit Findings	4 of 13 were missing special needs for suicide smock 5 of 13 were missing special needs for finger foods 6 of 13 were missing the 15 min checklist
Suicide Watch Pre-Audit Deliverables	(b)(5)

Suicide Watch Observation - Review Complete

How many patients are on suicide watch?	1
Of the patients on suicide watch, how many have a nursing assessment performed within the past 8 hours?	1
Of the patients on suicide watch, how many have 15 minute checks being performed on a staggered schedule?	1
Of the patients on suicide watch, how many have an assessment by a mental health or mid-level provider within the last 24 hours?	1
Of the patients on suicide watch, how many have a restrictive environment compliant with current orders?	1
Suicide Watch Encounters Findings	No significant findings.
Suicide Watch Encounters Deliverables	No CAP or deliverables required.

Training - Review Complete

How many training folders were reviewed?	12
Of the training folders reviewed, how many had a HSD-500?	11

AMERICAN OVERSIGHT

Of the training folders reviewed, how many had a signed position description ?	10
Of the training folders reviewed, how many were registered nurse training folders?	6
Of the registered nurse training folders reviewed, how many documented RN Physical Exam Training?	2
Of the training folders reviewed, how many had continuing medical education credits documented?	6
Training Findings	HSD- 500 was signed within 3 days. It is a best practice to have the dates reflect the actual date of orientation. Continung educ - PALMS CDR [redacted] - No HSD-500 filed - in progress; no RN training [redacted] - PD present unsigned Wocom - PE Assessment expires 06/17 [redacted] - expired PE assessment 05/18 [redacted] - PE training expired 02/19
Training Deliverables	(b)(5)

Transfer Summary Chart Review - Review Complete

How many transfers were reviewed?	25
Of the transfers reviewed, how many outgoing transfers were authenticated appropriately (signed, stamped, and dated)?	25
Of the transfers observed, how many outgoing transfers were completed by an LVN or above?	25
Of the transfer summary records reviewed for TB status, how many correctly documented no TB treatment status?	25
Of the transfer summary records reviewed for TB status, how many incorrectly documented no TB treatment status? (TB meds listed??)	25
Of the transfer summary records reviewed for TB status, how many correctly documented TB treatment status?	25
Of the transfer summary records reviewed for TB status, how many incorrectly documented TB treatment status? (Taking TB meds)	0
Transfers Findings	Ensure that the Problem List represents the Transfer Summary
Transfers Deliverables	No CAP or deliverables required.
Of the transfer summaries reviewed, how many listed the detainee's chronic medical conditions appropriately?	23
Of the transfer summaries reviewed, how many had "clear medication instructions" documented appropriately?	10

AMERICAN OVERSIGHT

Workforce Health Files - Review Complete

Are workforce health files kept separate from other files?	Yes
Is access to staff records limited to the compliance officer, HSA, and AHSA(s) and AA?	Yes
How many workforce health files were reviewed?	12
Of the twelve workforce health files reviewed, how many had past year's TB (PPD or CXR) documentation?	12
Of the twelve workforce health files reviewed, how many had a Hepatitis B vaccination or declination form?	12
Of the twelve workforce health files reviewed, how many had a yearly Ishihara Color Blind test?	0
Of the twelve workforce health files reviewed, how many had a yearly respirator medical clearance?	9
Of the twelve workforce health files reviewed, how many had a yearly respirator fit test?	9
Of the twelve workforce health files reviewed, how many had emergency contacts?	12
Are staff recordable injuries documented on Workforce Injury Tool?	No
Workforce Health Files Findings	A detailed table of content is used to list all requirements and date in which the requirement is completed. The table of content is updated annually by erasing previous date and inputting new date (in pencil). Ishihara color blind test is conducted during onboarding; not conducted yearly. Workforce Injury Tool is not in use.

Accreditation - Review Complete

Last ACA Accreditation	2015-06-01
Last ACA Findings	Last ACA survey June 2015; Compliant with 100% of all applicable mandatory standads; 98.7%of non-mandatory standards.
Last NCCHC Accreditation	2015-04-08
Last NCCHC Findings	Stewart's initial NCCHC survey was conducted April 8-9, 2015. They were found compliant with 100% of all applicable mandatory standards, and 100% of all applicable non-mandatory standards. They had no corrective action to respond to.
Last PBNDS Accreditation	2017-05-02
Last PBNDS Findings	No medical findings.
Comments	NO DATA

AMERICAN OVERSIGHT

Grievances - Review Complete

Number of medical grievances reported through QI/JIC/CRCL/DRIL	24.00
Is there a local SOP for managing grievances?	No - See findings below.
Is there an identified grievance officer?	Yes
Is there a log book and is it up to date?	No - See findings below.
Number of medical grievances that were not addressed in a timely manner.	0.00
Number of formal grievances.	38.00
Number of informal grievances.	0.00
Findings	No local grievance procedure. Collateral duty assigned to AHSA via appointment letter. Local grievances were routinely managed in less than 5 days. There were two outliers; one pt released prior to the grievance being addressed and and one hospitalized (unavailable). Several of the grievances were founded and corrective action implemented. Electronic log book not up to date - due to transition of responsibilities and current orientation to new duties. HSA will correct on the spot. Encouraged HSA to direct new Grievance Officer to read IHSC policy to enhance understanding of requirements and implement and additional local requirements (LOP).
Deliverables	Develop grievance LOP

Medication Administration - Review Complete

Is pre-pouring occuring?	No - See findings below.
Are nurses adhering to the six rights of medication administration (right patient, right drug, right route, right dose, right time, and right documentation)?	Yes
Are nurses using two forms of identification prior to administration?	Yes
Are mouth checks being conducted with every administration?	No - See findings below.
Are nurses administering only medications that they prepare?	Yes
Are all entries in the MAR complete (allergies, staff initials, etc)?	Yes
Number of all medication refusals documented on the MAR.	6.00
Of the identified medication refusals from the MAR, how many refusals did not have accompanying eCW documentation?	3.00
Number of high risk medication refusals.	3.00
Of the identified high risk medication refusals, how many times were providers NOT notified of the refusal?	3.00
Are nurses documenting the medication administration immediately after the medication is administered?	Yes
Findings	Staff reports that refusal forms from pill-line yesterday are pending to be documented in eCW - "I will chart it as a late entry". Uncertain if this is a routine practice. On two occassions mouth checks were not performed. MARs were documented well no "holes" in MARs, signatures well docuimented. Refusals only documented in eCW on 3/6 occassions. Documentation consisted of "medication refused" in telephone encounter. No specific information regarding the refusal or type of medication refused included in the documentation. Refusal forms are incomplete and pose an opportunity for improvement.
Deliverables	(b)(5)

AMERICAN OVERSIGHT

Emergency Preparedness and Response- Review Complete

Is there documentation of the man-down drills on each shift (once per month), mass casualty drills, and fire drills that have been conducted?	No - See findings below.
Do emergency scenarios vary?	Yes
Is the difference between a drill and an actual event evident in the write-up?	Yes
Do all staff participate in the drills?	No - See findings below.
Are all staff trained on emergency equipment?	No - See findings below.
Is emergency equipment checked daily and documented?	Yes
Is there documentation to support the training?	No - See findings below.
Did all staff receive an "after-action" debriefing?	Yes
If mortality related response, did staff involved submit a sequence of events statement of occurrence within 24 hours of incident and offered any adjustment support?	Yes
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event?	Yes
Findings	Annual Mass Casualty was 13FEB17 Write-ups are missing for several months to properly verify man-down drills and Fire Drills are being done. Could not verify all staff participating due to missing write-ups/documentation. Currently drills are done during shift change times to capture two shifts each drill per administration. Recommend AAR/After Action Debriefing be documented on drill write ups. Need to keep records of staff training on emergency equipment/documentation Recommend updating the call tree with current staff.
Deliverables	(b)(5)

AMERICAN OVERSIGHT

Environmental Health - Review Complete

Are clinic Safety Data Sheets (SDS) files complete, current, and accessible?	No - See findings below.
Are hazardous chemicals (including cleaning supplies) labeled and securely stored?	Yes
The Public Health, Safety, and Preparedness Toolkit daily, weekly, monthly, and annual checklists are completed, signed by the HSA or designee, and maintained locally.	Yes
Items not in compliance with the Public Health, Safety, and Preparedness Toolkit daily, weekly, monthly, quarterly and annual checklists are documented to show corrective action with the completion date.	No - See findings below.
Are all airborne infection isolation (AII) room doors labeled "restricted area" and include requirements for entry?	Yes
Is documentation of daily checks on AII rooms' negative pressures complete?	Yes
Is the OSHA Form 300A summary completed and posted in clinic from Feb 1st through April 30th each year?	Yes
Findings	SDS is not current. Per HSA, Core Civic is responsible for maintaining SDS at the facility. For items deficient in PHSP checks, need to document corrective action completion date.
Deliverables	(b)(5)

AMERICAN OVERSIGHT

Consent Forms - Review Complete

Number of consent forms reviewed.	25.00
Number of consent forms that were complete (not missing detainee signature, witness, or date).	25.00
Number of dental consent forms among the identified consent forms.	6.00
Number of dental consent forms that were complete (missing detainee signature, witness, or date).	6.00
Number of psychotropic consent forms among the identified consent forms.	7.00
Number of psychotropic consent forms that were complete (not missing detainee signature, witness or date).	7.00
Number of consent forms completed by a staff member other than the one completing the intake encounter.	0.00
Among the consent forms completed by a staff member other than the one completing the intake encounter, how many addressed the use of translation?	0.00
Findings	6 out of the 7 detainees with psychotropic consent forms had consent forms from stewart. 1 detainee A (b)(6); (b)(7)(C) (transferred from Krome to Stewart due to hurricane), had a psych form from Krome

Prescreening Review - Review Complete

Number of prescreens reviewed.	24.00
Number of prescreens with detainee identified with at least two detainee identifiers.	24.00
Number of prescreens triaged according to prescreen policy.	22.00
Number of prescreens that used a translator.	11.00
Of the prescreen records that used a translator, how many listed a translator name or ID number?	11.00
Of the prescreen records that did not use a translator, how many listed a reason for not using a translator?	0.00
Number of prescreens with documentation completed in eCW prior to intake screening.	0.00
Findings	Twenty-five (25) charts were pulled. Out of those 25, one did not have pre-screening documentation included. Therefore, 24 pre-screens were reviewed. Out of 24 pre-screens reviewed, 22 were triaged per pre-screening policy (with a priority level listed). Two pre-screenss did not document a priority level. Out of the 13 pre-screens where a translator was not utilized, nine (9) documented a reason for not utilizing a translator. Four (4) did not document a reason for not utilizing a translator.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Prescreening Observations - Review Complete

Number of prescreen encounters observed.	4.00
Number of prescreen encounters observed that allowed for patient privacy.	4.00
If privacy was not provided, where was the prescreen performed?	RN used space/distance to afford for privacy. RN did not use questionairre to perform pre-screen. Pre-screen performed after 1.5 hours of being in the facility. Communication between intake officer and clinic coordinator occurred, but clinic coordinator had delays in identifying an individual to perform the pre-screen. Language services should have been utilized as one individual reported that they spoke "little english" and an interpretoir was not secured.
Number of prescreen encounters that used language services.	0.00
Number of prescreen encounters completed within two hours of arrival.	4.00
Number of prescreen encounters documented in eCW prior to initiation of intake screening.	4.00
Number of prescreen encounters prioritized.	4.00
Of the prescreen encounters prioritized, how many were referred to intake in a timely manner?	4.00
Findings	RN used space/distance to afford for privacy. RN did not use questionairre to perform pre-screen. Pre-screen performed after 1.5 hours of being in the facility. Communication between intake officer and clinic coordinator occurred, but clinic coordinator had delays in identifying an individual to perform the pre-screen. Language services should have been utilized as one individual reported that they spoke "little english" and an interpretor was not secured.

Intake Screening Review - Review Complete

Number of intake screenings reviewed.	25.00
Number of intake screenings with detainee identified with at least two detainee identifiers.	25.00
Of the intake records reviewed, how many used a translator?	19.00
Of the intake screening records that used a translator, how many listed a translator name or ID number?	19.00
Of the intake screening records that did not use a translator, how many listed a reason for not using a translator?	6.00
Number of notes with TB clearance noted (PPD, CXR, current CXR from other facility).	23.00
Of the intake screening records, how many were TB negative?	23.00
Of the intake screening records that are TB negative, how many were signed, dated, and stamped by an RN or above?	2.00
Of the intake screening records, how many were TB positive?	0.00
Of the intake screening records that are TB positive, how many were signed, dated, and stamped by an RN or above?	0.00
Number of intake screenings with a complete pain assessment using the pain scale indicator.	25.00
Number of intake screenings with pain scale greater than 0.	0.00
Of the intake screenings with a pain scale greater than 0, how many were addressed?	0.00
Number of intake screenings with mental health screening completed.	25.00
Number of intake screenings that used the eCW Intake Screening template.	25.00
Of the intake screenings that used the eCW Intake Screening template, how many were completed appropriately (i.e., default answers changed to reflect the patient's response)?	25.00
Number of intake screenings with clinically significant findings.	7.00

AMERICAN OVERSIGHT

Of the intake screenings with clinically significant findings, how many were referred appropriately?	6.00
Number of intake screenings reviewed by an RN or above within 24 hours.	0.00
Findings	Of the 25 Intake charts reviewed, 23 had TB clearance or documentation. Two (2) had no TB documentation in the medical record (i.e. no TB clearance noted under the Scanned Docs, Labs, etc tabs of e-CW). Of the 23 Intakes with TB documentation/clearance, two had TB records which were signed, dated and stamped by a RN or higher. Of the 25 intake screenings reviewed, seven (7) had clinically significant findings. Of those, six were referred appropriately. On one intake screening, as to the question of whether they had any signficant dental problems, the detainee indicated they had a chipped tooth in the front of their mouth. There was no documentation discovered on the intake screening, that the issue was addressed via a referral to dental or other mechanism. Of the 25 intake screenings reviewed, nine (9) of them were conducted by a LVN or LPN, thus requiring confirmatory sign-off by a RN or higher within 24 hours. Of those 9 intakes conducted by a LVN or LPN, zero were in compliance with this requirement. Four (4) were lacking any documentation/evidence of a confirmatory sign off. Of the remaining five: The intake screening was conducted on August 7; confirmatory sign-off was done on October 30. The inake screening was conducted on October 10; confirmatory sign-off was October 30. Intake screening was conducted on September 6; confirmatory sign-off was on October 30. Intake screening was conducted on September 18; confirmatory sign-off was on October 30.

AMERICAN OVERSIGHT

Physical Examinations Observations - Review Complete

Number of physical examination encounters observed.	1.00
Number of physical examination encounters with a full set of vital signs taken.	1.00
Number of physical examination encounters observed that were completed within 14 days.	1.00
Number of physical examinations that offered a chaperone.	
Of the physical examinations that offered a chaperone, how many accepted?	0.00
Of the physical examinations with a chaperone, how many contained documentation of the chaperone's name?	0.00
Of the physical examinations that offered a chaperone, how many refused?	0.00
Of the physical examinations that refused a chaperone, how many contained appropriate documentation of refusal?	0.00
Findings	Physical exam was not performed in a systematic manner. Physical assessment performed before the history and was not performed from head to toe. Patient complained of sore throat and throat visualized but neck not assessed. Extensive musculoskelatal exam performed, but not required as much of what was assessed could be observed by the patients ability to walk, sit and stand. EYes were not assessed. Area being used did not allow for palpation of the abdomen. OTC medications were provided for the patients complaint, but the medications and labels were disorganized making it very inefficient. Many areas of preventative health education were provided, but RN failed to educate the patient on what tthe S&S related to his medical complaint would necesitate his return for further evaluation. Told the patient if he did not take CTM and nasal spray as dtrected that "an infection could go to his brain." She also informed the patient that he needed to have some teeth pulled- no within the rNs scope of practice.

Findings	NO DATA
Deliverables	NO DATA

AMERICAN OVERSIGHT

Sick Call Observations - Review Complete

Does the facility have a defined process in place addressing sick call services?	Yes
Is the facility using a team-based approach for sick call?	No - See findings below.
Was sick call offered to detainees in segregation	Yes
For detainees that were not seen in segregation, is there a documented note in the medical record?	N/A - See findings below.
Findings	Patients in segregation are offered sick call during seg rounds and seen/evaluated in/through the seg window or room if s/c is managed by RN. If seg sick call request is elevated to a MLP then the detainee is taken to medical. Appropriate equipment/setting/access to language services should be afforded to all individuals. New process for sick call implemented. Appears to be effective. However, it is noted that a high percentage of individuals who request sick call through security and up being a "no show" when sick call is initiated. Evaluate cause of "no shows" to ensure adequate access to care and seek guidance from Chief Nurse if these "no shows" should actually be considered "refusals". No team approach to accomplish sick call; HSA will revisit when renovations occur and more space is available.

MHU Full Admission - Review Complete

Are all patients within sight or hearing of a qualified health professional?	No - See findings below.
Number of nurses in the MHU at time of observation.	0.00
Number of patients in the MHU at time of observation.	5.00
Number of MHU full admission records reviewed.	25.00
Number of MHU full admission records with admission encounters.	10.00
Number of MHU full admission records with discharge encounters.	16.00
Number of MHU full admission records with mental health and physical conditions with provisional diagnosis provided on admission.	25.00
Number of MHU full admission records with no PE within the past year.	7.00
Of the MHU full admission records with no PE within the past year, how many had a PE completed during MHU admission?	7.00
Number of MHU full admission records with acuity level assigned.	3.00
Number of MHU full admission records with all medications placed on pill line.	16.00
Number of MHU full admission records with 24 hour chart reviews everyday.	25.00
Number of MHU full admission records for patients in segregation for medical overflow.	11.00
Of the MHU full admission records for patients in segregation for medical overflow, how many records indicate that the patients were rounded on according to MHU policy?	11.00
Number of MHU full admission records with a nursing care plan.	25.00
Of the MHU full admission records with a nursing care plan, how many records indicate that the plan was addressed and reviewed daily?	25.00
Number of MHU full admission records where patient education was provided daily (e.g., admission education, daily plan of care).	25.00

AMERICAN OVERSIGHT

Number of MHU full admission records with mental health diagnoses.	6.00
Of the MHU full admission records with mental health diagnoses, how many records indicate that the patient was assessed on initial admission, re-evaluated in seven days, and every seven days thereafter?	6.00
Number of MHU full admission records without mental health diagnoses.	19.00
Of the MHU full admission records without mental health diagnoses, how many records indicate that the patient was assessed every 30 days?	0.00
Findings	1) MHU admission and discharge notes are not being labeled/identifiable; MHU and discharge templates were not utilized therefore no acuity level was assigned. 2) physical exam never completed the entire time detainee was in custody and admitted to the MHU (b)(6); (b)(7)(C) 3) Several of the cases the detainees were housed in Segregation for MHU/Medical Overflow; they were rounded on daily per MHU policy 4) previously ordered KOP medications should be discontinued and re-ordered as pill line upon MHU admission (this was not reflected in eCW for several cases) 5) Serveral MHU admission encounter/orders were via telephone encounter even though the detainee was seen by the provider and the MHU admission template was not utilized 6) Except for rescue inhalers and NItro all medications should be ordered Pill line upon MHU admission (per the chart reviewed only the RIPE Therapy medications and the Psych medications were ordered as Pill line and all other medications were being ordered as KOP upon MHU admission) 7) some cases the MHU discharge note by a proivder is missing altogether 8) for (b)(6); (b)(7)(C) on 10/2/17 MLP documented MHU Provider rounds for detainee in segregation, detainee was not present during the encounter due to being out on recreation yard but discharged the patient without seeing him

Suicide Watch Review - Review Complete

Number of suicide watch records reviewed.	6.00
Number of suicide watch records where the patient was evaluated for suicide risk by a mental health profession or physician within 24 hours of being placed on suicide watch.	5.00
Number of suicide watch records where the patient was assessed to determine if a suicide smock was medically indicated.	5.00
Number of suicide watch records where the need for finger foos was annotated.	6.00
Number of suicide watch records where a daily mental health assessment was conducted and documented by a mental health or mid-level provider.	6.00
Number of suicide watch records where the patient was released from suicide watch by a mental health provider or physician.	5.00
Number of suicide watch records where a suicide risk assessment was conducted prior to release from suicide watch.	5.00
Number of suicide watch records where checks were conducted and documented at least every eight hours by clinical staff.	2.00
Number of suicide watch records where checks were conducted and documented at least every 15 minutes by custody staff (IHSC form uploaded and within record).	2.00
Findings	Nursing rounds documented, but some rounds were documented as grater than 8 hours.Custody forms are not consistently scanned into charts.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Suicide Watch Observation - Review Complete

Number of patients on suicide watch.	0.00
Number of patients on suicide watch with nursing assessment performed within the past 8 hours.	0.00
Number of patients on suicide watch with 15 minute checks being performed on a staggered schedule.	0.00
Number of patients on suicide watch with an assessment by a mental health or mid-level provider within the last 24 hours.	0.00
Number of patients on suicide watch with restrictive environment compliant with current orders (e.g., smock, finger food, activity, etc).	0.00
Findings	No suicide watches at time of site- visit. Initially instructed that there was one suicide watch; it was later determined that the individual was not on and suicide prevention interventions. Recommend that there is better communication regarding the type of "watch" an individual is placed on in the MHU.

Segregation - Review Complete

Number of segregation records reviewed.	25.00
Number of segregation records that indicate the patient was medically cleared for segregation.	25.00
Number of segregation records where daily segregation rounds by nursing are documented.	25.00
Number of segregation records where the patient was offered sick-call services daily (typically offered during rounds).	25.00
Number of segregation records where the patient's mental health status was evaluated at least every 30 days.	4.00
Number of segregation records where the patient was seen weekly by mental health.	24.00
Findings	1) overall good segregation documentation; segregation clearance noted for all of the charts reviewed; only 1 chart noted to have a daily RN seg round encounter missing (b)(6); (b)(7)(C) on 9/27/17) 2) 4 charts were noted where the detainee was in Segregation longer than 30 days and the 30 days mental health status was evaluated 3) 24 cases were seen weekly by mental health; 1 case the detainee was in seg in less than a week therefore no weekly MHU seg round encounter was noted. Of the 24 charts that had the weekly MHU Seg round notes completed there were 2 cases where the weekly MHU Seg round was missing. (b)(6); (b)(7)(C) MH Seg encounter on 10/4/17 and the next one isn't until 10/18/17) (b)(6); (b)(7)(C) MH Seg round on 9/13/17 and next one wasn't until 9/26/17)

After Hours Medication Observation - Review Complete

Is a medication log in place and reflective of quantities of medication stored in the night cabinet?	No - See findings below.
Do line entries contain the date, time, patient name, alien number, medication name, and quantity removed?	No - See findings below.
Are after hours medication orders documented as dispensed in eCW?	Yes
Is the night cabinet, clean, stocked, and organized?	Yes
Is the night cabinet reviewed three times per week?	No - See findings below.
Are medications in the night cabinet within their use date (i.e., not expired)?	Yes
Findings	After hours cabinet nicely stocked and organized. Accountability log is present, but does not have an area to identify quantity removed or added to stock. Providers are not routinely following procedures as it relates to accountability of medications. The quarterly pharmacy audit demonstrated significant discepancies, but no documentaed action taken.
Deliverables	(b)(5)

AMERICAN OVERSIGHT

Language Access Review - Review Complete

Number of language access records reviewed.	25.00
Number of records where the patient was asked what language they speak.	25.00
Number of records where the patient's primary langauage or languag of choice is documented in their medical record.	25.00
Number of records where the translator use was addressed and documented (interpreter name or number, and language).	17.00
Reasons for why a translator was not used.	Twenty-five Intake charts were reviewed for Language Access purposes. Of those 25: All 25 documented the patient's primary language. Of the 25, 17 documented use of an interpreter, including the interpreter name and number. Of the remaining six, all documented a reason for an interpreter not being utilized. The reasons were: Not applicable, patient speaks English No, provider fluent in patient's native language On one chart, there was an apparent discrepancy between the Pre-screening and Intake screening documentation, regarding use of an interpreter. On this particular detainee, the same RN conducted both the pre-screening and the intake screening. For the pre-screening, the RN documented no interpreter was utilized because "provider fluent in detainee's native language." However, the intake screening indicates interpretation was provided and lists the interpreter's number.
Findings	NO DATA

Diagnostic Services - Review Complete

Are on-site diagnostic services (laboratory and radiology) certified or licensed to provide those services?	Yes
Is there a procedure manual for each service provided?	No - See findings below.
Does each manual include protocols for the calibration of testing devices to ensure accuracy.	No - See findings below.
Is there a current certificate for CLIA-waived testing?	Yes
Are all aspects of the CLIA-waived standards addressed by written policy and defined procedures?	No - See findings below.
Are invoices from LabCorp or other radiology companies reconciled?	Yes
Are radiation signs posted on all doors leading to areas with radiation producing equipment?	Yes
Are radiation exposure reports reviewed quarterly?	Yes
Are staff seen wearing dosimeter badges while performing radiography services or while working in an area with radiation producing equipment?	N/A - See findings below.
Are staff dosimeter badges and controls stored in a central location and not near a radioactive source?	Yes
Are there safety checks for biomedical and diagnostic equipment?	Yes
Findings	Need local operating procedures for all CLIA processes and staff were not knowledgable on what CLIA meant. This should be part of each nurse's orientation.
Deliverables	NO DATA

Training - Review Complete

Number of training folders reviewed.	11.00
Number of training folders with HSD-500.	11.00
Number of training folders with a signed position description.	11.00
Number of registered nurse training folders reviewed.	3.00
Number of registered nurse training folders with RN Physical Exam Training.	3.00
Number of training folders with continuing medical education credits.	11.00
Number of training folders with BLS for health care providers or CPR and AED certification.	11.00
Number of radiation safetoy officer training folders with radiation safety training.	0.00
Findings	Facility keeps the HSD 500 in personnel files. HSA attended Radiation Safety Officer training; awaiting certificate
Deliverables	NO DATA

Infectious Disease Prevention - Review Complete

Are hand washing equipment and hand sanitizer available in the clinic?	Yes
Are contact and outbreak investigations documented in the PHSP Unit reporting tool on SharePoint?	Yes
Is hand hygiene monitoring conducted and documented?	No - See findings below.
Findings	Hand Hygiene monitoring is not currently conducted and documented. HSA is aware and will initiate monitoring and documentation.
Deliverables	Hand Hygiene monitoring and documentation.

AMERICAN OVERSIGHT

Schedules - Review Complete

Number of schedules reviewed.	3.00
Number of schedules with a legend to explain codes.	3.00
Number of schedules with staff assigned 20 "shifts" per scheduling period.	3.00
Number of schedules with evenly distributed staffing throughout the week.	0.00
Number of schedules with provider coverage on weekend/holidays.	3.00
Number of schedules with actual work hours reflected for non-traditional shifts.	3.00
Are there signed approvals for non-traditional shifts?	Yes
Is there a PDF copy each time a change was made to the schedule?	No - See findings below.
Findings	The MLP schedule is not consistent with the "level" of providers from day to day. Cuurrently utilizing self-scheduling and guiding staff to develop a schedule that is a mix between level scheduling and operational needs. HSA was aware of the opportunity for improvement and is actively working towards that end. No corrective action indicated, but RHSA may want to follow-up. Archiving process is not maintained as each schedule is modified. HSA advised and will make the required changes.

Medication Administration - Review Complete

Is pre-pouring occuring?	No - See findings below.
Are nurses adhering to the six rights of medication administration (right patient, right drug, right route, right dose, right time, and right documentation)?	Yes
Are nurses using two forms of identification prior to administration?	No - See findings below.
Are mouth checks being conducted with every administration?	No - See findings below.
Are nurses administering only medications that they prepare?	Yes
Are all entries in the MAR complete (allergies, staff initials, etc)?	Yes
Number of all medication refusals documented on the MAR.	1.00
Of the identified medication refusals from the MAR, how many refusals did not have accompanying eCW documentation?	0.00
Number of high risk medication refusals.	0.00
Of the identified high risk medication refusals, how many times were providers NOT notified of the refusal?	0.00
Are nurses documenting the medication administration immediately after the medication is administered?	Yes
Findings	During my observation it was noted that the pill line nurse was not using two forms of identification; when asked, she stated she knew these individuals. Out of approximately 35 passes, I saw 3 detainees who did not have a mouth check.

AMERICAN OVERSIGHT

Transfers - Review Complete

Number of transfers reviewed.	25.00
Number of transfers authenticated appropriately (signed, stamped, and dated).	25.00
Number of transfers initiated in eCW.	25.00
Number of transfers completed by LVN or above.	25.00
Number of transfers with TB clearance annotated correctly.	23.00
Out of the transfers reviewed, how many had a positive chest X-ray?	3.00
Out of the transfers with positive chest X-ray, how many had lab results documented to verify non-infectiousness?	2.00
Out of the transfers reviewed, how many have active TB?	0.00
Out of the transfers with active TB, how many are not being treated for TB?	0.00
Number of transfers with chronic medical conditions or lack thereof annotated.	2.00
Number of transfers with medication instructions clearly provided.	2.00
Number of transfers signed by a proper level provider.	25.00
Findings	25 transfer summaries were reviewed for audit of the following 3 agreed-upon TB-related questions: 4. Was TB clearance annotated correctly? 23 records -- YES; 2 -- records NO (including 3 records for TB patients) 5. If detainee had positive CXR, were lab results documented to verify non-infectiousness? 3 records - NO. For the 3 records corresponding to TB patients, the TB-CM report that must be printed and attached to transfer summaries were missing documentation of the 3rd sputa result. 6. If the transfer summary indicates that the detainee is not being treated for active TB, are anti-TB medications not listed? 23 records -- YES; 1 record -- N/A; 1 record -- NO (Transfer summary indicated "detainee not being treated for Active TB" should have indicated "yes", detainee on TB treatment). Recommendation - please be reminded to educate nursing staff to review relevant documentation to

Prescreening Review - Review Complete

Number of prescreens reviewed.	25.00
Number of prescreens with detainee identified with at least two detainee identifiers.	25.00
Number of prescreens triaged according to prescreen policy.	5.00
Number of prescreens that used a translator.	2.00
Of the prescreen records that used a translator, how many listed a translator name or ID number?	2.00
Of the prescreen records that did not use a translator, how many listed a reason for not using a translator?	23.00
Number of prescreens with documentation completed in eCW prior to intake screening.	16.00
Findings	Based on charts reviewed, there appeared to be some inconsistency in the documentation of use of a translator, on the pre-screening, vs. use of a translator on the intake screening, For example, of the 25 pre-screenings reviewed, 8 had documentation consistent to the intake screening (i.e. both the pre-screening and the intake screening may have indicated no translator was used due to the detainee speaking fluent English. However, there appeared to be inconsistency with the rest of the charts. For example, the pre-screening may indicate that no translator was available during the pre-screen, but the intake screening would indicate use of a translator, and include the translator number. This reviewer is unclear as to whether there is a lack of a phone where the pre-screens are conducted, thus they could not call a translator. Alternatively, perhaps there is a drop-down menu for use of a translator during pre-screening, and they kept a default option.) Additionally, there were some charts were the pre-screen would indicate there was no translator available, but the intake screening would say the detainee speaks fluent English. Of the 25 pre-screens reviewed, only five indicated the detainee was triaged according to the pre-screen policy. Per the pre-screen policy, No Priority should be documented/indicated for detainees with no medical issues, and Priority Levels should be documented for others. Only five charts indicated No Priority or a Priority Level. Of the 25 pre-screens

AMERICAN OVERSIGHT

	reviewed, 16 of them were compleltely documented in eCW pior to the Intake screening. Nine were documented in eCW after the intake screening was documented.

Intake Screening Review - Review Complete

Number of intake screenings reviewed.	25.00
Number of intake screenings with detainee identified with at least two detainee identifiers.	25.00
Of the intake records reviewed, how many used a translator?	8.00
Of the intake screening records that used a translator, how many listed a translator name or ID number?	8.00
Of the intake screening records that did not use a translator, how many listed a reason for not using a translator?	16.00
Number of notes with TB clearance noted (PPD, CXR, current CXR from other facility).	25.00
Of the intake screening records, how many were TB negative?	24.00
Of the intake screening records that are TB negative, how many were signed, dated, and stamped by an RN or above?	24.00
Of the intake screening records, how many were TB positive?	1.00
Of the intake screening records that are TB positive, how many were signed, dated, and stamped by an RN or above?	1.00
Number of intake screenings with a complete pain assessment using the pain scale indicator.	25.00
Number of intake screenings with pain scale greater than 0.	2.00
Of the intake screenings with a pain scale greater than 0, how many were addressed?	2.00
Number of intake screenings with mental health screening completed.	25.00
Number of intake screenings that used the eCW Intake Screening template.	25.00
Of the intake screenings that used the eCW Intake Screening template, how many were completed appropriately (i.e., default answers changed to reflect the patient's response)?	25.00
Number of intake screenings with clinically significant findings.	9.00

AMERICAN OVERSIGHT

Of the intake screenings with clinically significant findings, how many were referred appropriately?	9.00
Number of intake screenings reviewed by an RN or above within 24 hours.	2.00
Findings	Of the 25 Intake Charts reviewed, three Intakes were conducted by a LVN, thus requiring review by a RN or higher. Of those three Intakes conducted by a LVN, two were reviewed by a RN within 24 hours. One did not indicate a review by a RN.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Intake Screening Observations - Review Complete

Number of intake screenings observed.	2.00
Number of intake screening observations where the nurse reviewed the prescreen and transfer paperwork prior to initating the intake screening.	1.00
Number of intake screening observations where a full set of vital signs were taken.	2.00
Number of intake screening observations that used language services.	0.00
Of the intake screening observations that used language services, how many were appropriately conducted?	0.00
Number of intake screenings observations documented in eCW within one hour of the evaluation.	0.00
Number of intake screening observations where the patient was educated on access to care, upcoming PE appointment, and the grievance process.	2.00
Number of intake screening observations with security advice of special needs and housing disposition.	0.00
Of the intake screening observations with security advice, how many contained clear communications?	0.00
Findings	During the intake, RN realized that they had not reviewed the prescreening form and stated that they normally do so. Both detainees spoke English so no language services were needed. RN stated they normally enter the data into eCW at time it is gathered, but reverted to gathering on paper due to clinic movement issues. Stated would enter as soon as they could.

Number of MHU full admission records with 24 hour chart reviews everyday.	24.00
Number of MHU full admission records for patients in segregation for medical overflow.	1.00
Of the MHU full admission records for patients in segregation for medical overflow, how many records indicate that the patients were rounded on according to MHU policy?	1.00
Number of MHU full admission records with a nursing care plan.	24.00
Of the MHU full admission records with a nursing care plan, how many records indicate that the plan was addressed and reviewed daily?	9.00
Number of MHU full admission records where patient education was provided daily (e.g., admission education, daily plan of care).	24.00

AMERICAN OVERSIGHT

Number of MHU full admission records with mental health diagnoses.	14.00
Of the MHU full admission records with mental health diagnoses, how many records indicate that the patient was assessed on initial admission, re-evaluated in seven days, and every seven days thereafter?	14.00
Number of MHU full admission records without mental health diagnoses.	10.00
Of the MHU full admission records without mental health diagnoses, how many records indicate that the patient was assessed every 30 days?	10.00
Findings	Nursing staff is incosistently charting care plans as noted previously. After a second review of charts, it was noted that initial care plans are being done and scanned in eCW. However, when an additional NANDA diagnosis is added to the existing care plan (s), there is inconsistency in scanning the new CPs into eCW. Some nurses are using eCW based CPs to chart and some are using paper CPs. When paper CPs are used, nurses are referencing that the CP is being continued and are writing that the issue is resolved when the CP is not in use anymore. The lead HSA of this site visit was made aware of the findings and is in agreement with citing the lack of additional care plans scanned into eCW (specifically when a new diagnosis is added/identified by nursing staff) as a negative finding for the charts reviewed. This reviewer consulted the IHSC Chief Nurse, who recommended the use of paper CPs until approved eCW CPs are established.

Diagnostic Services - Review Complete

Are on-site diagnostic services (laboratory and radiology) certified or licensed to provide those services?	Yes
Is there a procedure manual for each service provided?	Yes
Does each manual include protocols for the calibration of testing devices to ensure accuracy.	Yes
Is there a current certificate for CLIA-waived testing?	Yes
Are all aspects of the CLIA-waived standards addressed by written policy and defined procedures?	Yes
Are invoices from LabCorp or other radiology companies reconciled?	Yes
Are radiation signs posted on all doors leading to areas with radiation producing equipment?	Yes
Are radiation exposure reports reviewed quarterly?	Yes
Are staff seen wearing dosimeter badges while performing radiography services or while working in an area with radiation producing equipment?	Yes
Are staff dosimeter badges and controls stored in a central location and not near a radioactive source?	Yes
Are there safety checks for biomedical and diagnostic equipment?	Yes
Findings	Clia certification does not expire until 2018
Deliverables	none

AMERICAN OVERSIGHT

Log Books - Review Complete

Number of refridgerator temperature logs reviewed.	14.00
Number of refridgerator temperature logs that are up to date.	14.00
Number of refridgerator temperature logs that are out of range.	1.00
Of the refridgerator temperature logs that are out of range, how many logs have documentation of action taken?	1.00
Are the sharps counts accurate?	Yes
Are two signatures present for each shift change on the sharps counts?	Yes
Are the narcotic counts accurate?	Yes
Are two signatures present for each shift change on the narcotics counts?	Yes
Are the crash cart/bag and AEDS checked daily and on every shift?	No - See findings below.
Are cleaning logs present in the MHU and up to date?	Yes
Findings	The refrigerator in the lab was out of range twice last month, when it was found to be too cold. It was determined the freezer door was open and that lowered the refrigerator temp. IHSC policy requires AEDs, crash cart and the emergency bag be checked daily. A best practice would be that they be checked each shift.

Number of PHS officer credentialing files with at least two years of evaluations (COERS).	0.00
Number of credentialing files with documented past or pending actions against a practitioner's license.	0.00
Number of credentialing files with current National Provider Data Bank information.	3.00
Number of credentialing files with scope of practice.	15.00
Number of credentialing files with personnel actions (positive or negative).	0.00

AMERICAN OVERSIGHT

Number of credentialing files with positive personnel actions (awards, recommendations, letters of appreciatio, etc).	4.00
Number of credentialing files with negative personnel actions (letter of counseling, etc).	0.00
Number of credentialing files with a competency assessment or peer review.	15.00
Number of peer reviews reviewed.	11.00
Number of peer reviews completed per local policy (clinical performance, appropriate use of resources, technical skills, clinical judgment, performance improvement activites).	11.00
Number of peer reviews with corrective actions.	0.00
Number of peer reviews with corrective actions addressed.	0.00
Findings	All credentialing folders need to be updated with the PHS officers COERs and CV's. Out of the 15 charts only 1 was missing the health statement and only 2 were missing confidentiality form. The AA is in the process of updating her tracker.
Deliverables	none

AMERICAN OVERSIGHT

Employee Health Files - Review Complete

Are employee health files kept separate from other files?	Yes
Is access to employee records limited to the compliance officer, HSA, and AHSA(s).	No - See findings below.
Is the "electronic tracker" up to date and complete?	No - See findings below.
Number of employee health files reviewed.	10.00
Number of employee health files with current TB (PPD or CXR) documentation.	9.00
Number of employee health files with current Hepatitis B vaccination or declination form.	9.00
Number of employee health files with current Ishihara Color Blind test (only required for personnel completing CLIA-waived lab testing).	6.00
Number of employee health files with current respirator medical clearance.	8.00
Number of employee health files with current respirator fit test.	10.00
Number of employee health files with emergency contacts.	0.00
Are employee recorable injuries documented on OSHA Form 301 and OSHA 300 Log?	Yes
Findings	Access includes the HSA designee which is the Administrative Assistant, who is in the process of updating the health records tracker. Emergency contact information is maintained in the personnel file.
Deliverables	None

AMERICAN OVERSIGHT

Training - Review Complete

Number of training folders reviewed.	15.00
Number of training folders with HSD-500.	15.00
Number of training folders with a signed position description.	14.00
Number of registered nurse training folders reviewed.	8.00
Number of registered nurse training folders with RN Physical Exam Training.	8.00
Number of training folders with continuing medical education credits.	0.00
Number of training folders with BLS for health care providers or CPR and AED certification.	15.00
Number of radiation safetoy officer training folders with radiation safety training.	0.00
Findings	no CMEs noted in the training files for YR 2016. The HSA stated that she was informed that only CMEs that are paid for by the Agency or CMEs that were obtained while using admin leave to complete them are the only CME's that are required to go in the training folder
Deliverables	none

Infectious Disease Prevention - Review Complete

Are hand washing equipment and hand sanitizer available in the clinic?	Yes
Are contact and outbreak investigations documented in the PHSP Unit reporting tool on SharePoint?	Yes
Is hand hygiene monitoring conducted and documented?	Yes
Findings	No Findings: I verified documentation of the recent Varicella outbreak had been entered into sharepoint.
Deliverables	None

AMERICAN OVERSIGHT

Schedules - Review Complete

Number of schedules reviewed.	3.00
Number of schedules with a legend to explain codes.	3.00
Number of schedules with staff assigned 20 "shifts" per scheduling period.	3.00
Number of schedules with evenly distributed staffing throughout the week.	3.00
Number of schedules with provider coverage on weekend/holidays.	3.00
Number of schedules with actual work hours reflected for non-traditional shifts.	3.00
Are there signed approvals for non-traditional shifts?	No - See findings below.
Is there a PDF copy each time a change was made to the schedule?	Yes
Findings	There was no signed approval for non traditional shifts but the HSA sent a approval request to the Regional during our visit and she is awaiting approval
Deliverables	none

DHS-ICE-20-0618-A-000646

PRE-ARRIVAL REVIEW

Accreditation

Most recent ACA, NCCHC, and PBNDS surveys. List type of survey and date.

Evaluation Method		
Survey	**Date**	**Findings / Recommendations**
ACA	Sept 25-26 2017	No findings 100% compliant
NCCHC	Jan 22-24 2018	No findings 100% compliant
PBNDS	Apr 17-19 2018	No findings 100% compliant
Comments	Fully successful accreditations with no findings and no corrective action plans indicated. Many accolades and best practices identified by auditors. Some of which are now in the 2016 PBNDS revisions.	

AMERICAN OVERSIGHT

Grievances

Evaluation Method:	Observation	
Items to Review *(review 100% during past year)*	**Yes, No, or N/A**	**Comments**
1. Have there been any medical grievances reported through QI/JIC/CRCL/DRIL *(if so, provide type in comment section)*	YES	1 grievance elevated to JIC.
2. Is there a local procedure (SOP) for managing grievances?	Yes	
3. Is there an identified grievance officer?	Yes	
4. Is the log book kept and up to date?	Yes	
5. Were all Grievances addressed in a timely manner?	Yes	
6. Number of Formal/Informal grievances: 9 / 2		

Findings/ Recommendations:	. We are a pilot site sponsored by ICE for an electronic grievance system. Currently operated by Talton using tablets.
Deliverables:	**N/A** Our experience with electronic grievances is it results in a higher than normal number of false grievances as the detainees use it as an email communication/request system.

AMERICAN OVERSIGHT

Incident Reports/RCA/SOE

Evaluation Method:			
Items to Review *(review 100% during past year)*		**Yes, No, or N/A**	**Comments**
1. Were there any trends noted from reported incident reports or RCAs for FY17?		No	CAP assigned by MQM and completed addressing psychiatric med refusals and consents.
2. Are there any active RCAs/SOE?		No	
3. Has a RCA or SOE been completed during this FY? If so, complete #4		N/A	
4. Was a CAP initiated and/or completed for the RCA or SOE?		N/A	
a. If CAP initiated, note status and due date.		NA	
Findings/ Recommendations:	Facility independently initiated a CAP following a pattern of medication errors related to pharmacy practices. Additionally initiated HFEMA to address higher than normal new admissions with active withdrawal symptoms.		
Deliverables:			

AMERICAN OVERSIGHT

ON-SITE OBSERVATIONS

During site observations, the reviewers should observe staff members carrying out the task, interview staff, review medical records and review supporting documents (i.e. logs, minutes, binders, electronic trackers, etc.).

Medication Administration (Observations-Onsite Review)

Question (10 ENCOUNTERS)	Improvement Plan (1,2, or 3)	Comments
Is pre-pouring occurring? **(Be sure to observe more than one nurse on multiple shifts) Level 2@100%**	N/A	No
Are nurses adhering to the six rights of medication administration (right patient, right drug, right route, right dose, right time, and right documentation)? **Level 2 @100%**	N/A	Yes
Are mouth checks being conducted with every administration? Observe 10 patients (if possible) on multiple shifts **Level 1 @80%**	N/A	Yes
Are all entries in the MAR complete (allergies, staff initials, etc.)? Observe 10 different MAR; **Level 1 @80%**	N/A	Yes
Are nurses documenting the medication administration immediately after the medication is administered**? Level 2 @100%**	N/A	Yes
Number of all medication refusals documented on the MAR/eMAR **Denominator**	NA	10/10

AMERICAN OVERSIGHT

Of the identified medication refusals from the MAR, how many refusals did have an accompanying signed refusal form? **Level 2@90%** .	N	A	10/10 100%
Of the identified high risk medication refusals, how many times were providers NOT notified of the refusal in eCW **Level 1 @100%; See guide eon ECW notification**	N	A	0/10 all were notified.

AMERICAN OVERSIGHT

Emergency Preparedness and Response

Question	Improvement Plan (1,2, or 3)	Comments
Is there documentation showing completed date and time of man-down drills (once per month for each operating shift)? Refer to guide: **level 1 @90%**	NA	Yes. All documentation for monthly man down present and reviewed with staff per policy.
Is there documentation showing completed date and time of fire drills (once a quarter for each operating shift)? Refer to guide **level 1 @90%**	NA	Yes. Each fire drill is recorded and reviewed with staff per policy.
Is there documentation showing completed date and time of mass casualty drills * (each shift should have a complete drill within a three year period)? *Table top/mock drills are acceptable replacements for drills not conducted facility wide Refer to guide: **level 1 @90%**	NA	Yes. All documentation for the annual mass casualty drill down present and reviewed with staff per policy.
Are clinic staff trained on emergency equipment (AED, first Aid kits, fire extinguisher, etc?) Yes/No **level 1 @90%**	NA	Yes. Annual training noted for all staff for equipment.
Do emergency scenarios vary? Yes/No?? **Level 100 % if No**	NA	Yes. Good mixture of scenarios to cover multi events.
Is the difference between a drill and an actual event evident in the write-up?): **Level 1 @100%**	NA	Yes. On top of write up a box clearly distinguishes between drill and real events.
Is there process in place to distribute "an after-action report to all staff? **Level 1 @90%:**	NA	Yes. After actions are read at shift report and left in binder to read for those not present.
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event? **Level 1 @100%**	NA	Yes. AA updates call list monthly and recall tree is initiated quarterly to ensure accuracy.
Comments:	Comprehensive plan in place and followed for all above.	
Deliverables:	None	

AMERICAN OVERSIGHT

Consent Forms

	Section Completed Under the Pre-Audit Chart Reviews		
Question		**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of consent forms (General consent) that were complete (not missing detainee signature, witness, or date). **Level 1 @100%:** Can escalate to Level 2 if not resolved by the completion of the assessment		NA	10/10 100% compliance. No forms missing and all sections filled out correctly.
2. Number of dental consent forms among the identified consent forms.		NA	10
3. Number of dental consent forms that were complete (missing detainee signature, witness, or date) **Level 1 @90%**		NA	10/10 100% compliance. No forms missing and all sections filled out correctly.
4. Number of psychotropic consent forms among the identified consent forms.		NA	10
5. Number of psychotropic consent forms that were complete (not missing detainee signature, witness or date) **(Level 1 @90%)**		NA	10/10 100% compliance. No forms missing and all sections filled out correctly.
Findings/ Recommendations:	Transfer Summaries completed in the pre-audit Chart Reviews		
Deliverables:	None		

AMERICAN OVERSIGHT

Transfers

Reviewer

Evaluation Method:	**Section Completed Under the Pre-Audit Chart Reviews**	
Items to Review *(review 25 records in the past month)*	**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of outgoing transfers authenticated appropriately (signed, stamped, and dated): **Level 1 @100%**	NA	25/25 100%
2. Number of outgoing transfers completed by LVN or above. **Level 1 @100%,**	NA	25/25 100%
3. Number of notes with TB clearance noted (PPD, CXR, current CXR from other facility) Level 2 @90%	NA	25/25 100%
4. Of the 25 transfers reviewed for TB clearance documentation, how many correctly documented no TB treatment status? **see guide Level 2@90%**	NA	25/25 100%
5. Of the 25 transfers reviewed for TB clearance documentation, how many - incorrectly documented no TB treatment status? see guide **Level 2@90%**	NA	All were documented correctly 25/25 100%
6. Of the 25 transfers reviewed for TB clearance documentation, how many - correctly documented TB treatment status? see guide: **Level 2@90%**	NA	25/25 100%
7. Of the 25 transfers reviewed for TB clearance documentation, how many - incorrectly documented TB treatment status? see guide: **Level 2@90%**	NA	All were documented correctly 25/25 100%

AMERICAN OVERSIGHT

Findings/ Recommendations:	no findings noted
Deliverables:	None

Pre-Screening

Reviewer:

Evaluation Method:	**Observe 10 pre-screens if Possible**	
Items to Review	**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of prescreen encounters observed. **Denominator**	NA	10
2. Are language services being used during pre-screen if appropriate? **Level 2: if No**	NA	Yes
3. Number of prescreens with documentation completed in eCW prior to intake screening. **Denominator**	NA	10/10
4. Number of prescreen encounters prioritized. **Level 1: @90%**	NA	10/10
5. Number of Pre-screens encounters not prioritized appropriately: **Level 1 @90%**	NA	0/10 all completed correctly.
Findings/ Recommendations:	None	

AMERICAN OVERSIGHT

Intake Screening

Evaluation Method:	Observe 10 "Intakes" if Possible		
Items to Review *(review 25 records in the past month)*		**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of intake screenings observed. (N/A) **Denominator**		NA	10
2. Number of intake screening observations where the nurse reviewed the prescreen and transfer paperwork prior to initiating the intake screening. **Level 1 @90%**		NA	10/10
3. Number of intake screening observations where a full set of vital signs (Blood Pressure, Respirations, Pulse, Temperature, weight, Pain Rating and (if appropriate) O2 Sat were taken. **Level 2: @90%**		NA	10/10
4. Number of intake screening observations that used language services. **Level 2:@90%**		NA	8/8
5. Of the intake screenings that used the eCW Intake Screening template, how many were completed appropriately (i.e., default answers changed to reflect the patient's response)? **Level 1 @90%**		NA	10/10
6. Of the intake screening observations that used language services, how many were appropriately conducted? **Level 2:@90%**		NA	8/8
7. Number of intake screening observations where the patient was educated on access to care, upcoming PE appointment, and provided the grievance guide. **Level 2:@90%**		NA	10/10

AMERICAN OVERSIGHT

8. Number of intake screening observations with security advice of special needs and housing disposition. **Level 1 @90%**	N/A	
Deliverables:	None	

AMERICAN OVERSIGHT

Chronic Care

Evaluation Method:	Observe 10 "Chronic Care Encounters"		
Questions		**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of chronic care encounters observed that utilized language services appropriately. **Level 2 @90%**		NA	10/10
2. Number of chronic care encounters observed that were completed within the time frame indicated by a previous visit (90 days for stable intake screening or stable prior chronic care visit **Level 2 @90%**		NA	10/10
3. Number of chronic care encounters observed that were not completed within the timeframe indicated by a previous visit (greater than 90 days for unstable patients). **Level 2 @90%**		NA	all appointments completed within designated timeframe
Findings/ Recommendations:	no deficiencies noted		
Deliverables:	None		

AMERICAN OVERSIGHT

Physical Exams

Evaluation Method:	Observe 10 physical exams completed by different providers	
Items to Review *(review 25 records in the past month)*	**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of physical examination encounters with a full set of vital signs (Blood Pressure, Respirations, Pulse, Temperature, weight, Pain Rating and (if appropriate) O2 Sat) taken **Level 2@90%**	NA	10/10
2. Number of physical examination encounters observed that were completed within the specified timeframe. (Two Business days for PE-Cs, 7 days for –juveniles and, 14-days for adults) **Level 2@90%**	NA	10/10
3. Number of physical examination encounters observed that offered detainee provider referral when appropriate **Level 1 @90%**	NA	none observed needing referral.
Findings/ Recommendations:	no findings noted	
Deliverables:	None	

AMERICAN OVERSIGHT

Sick Call

Evaluation Method:	Observation		
Items to Review *(Observe 10 "Sick Call "Encounters if possible)*		**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Is sick call offered face-to-face on a daily basis?? **Level 1 if NO**		NA	yes
2. Does site have a daily sick call process established (designated daily sick call times, designated Sick Call Area and, team approach being implemented) **Level 1; if NO**		NA	yes
3. Is translator services offered when appropriate during a sick call process? **Level 1; if NO**		NA	yes
4. Did RN utilize nursing protocols/guidelines during sick call encounters?		NA	10/10
5. Is a guardian present for any minor (<18 years of age) sick call? **Level 1; if NO and applicable**		NA	NA
6. Is there a sick call log used to document all encounters?		NA	yes Sick call log is kept electronically
Findings/ Recommendations:	1 note by RN stated they used nursing guidelines and correctly documented the treatment but did not specifically identify which guideline was utilized. (b)(5)		
Deliverables:	NM will provide retraining as indicated.		

AMERICAN OVERSIGHT

Medical Housing Unit 23 hr Observation

Evaluation		
Items to Review *(Observe 10 MHU 23-HR OBS if possible)*	**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of MHU 23 hour observation records reviewed. **Denominator**	NA	10
2. Number of MHU 23 hour observation records with documentation regarding return to general population	NA	10
3. Number of MHU 23 hour observation records with mental health and physical conditions with provisional diagnosis documented on placement in the medical housing unit	NA	10
4. Number of MHU 23 hour observation records with telephone order admission that were signed by a provider within 2 business day. **Level 1: @80%**	NA	10
Findings/ Recommendations:	None	
Deliverables:	None	

AMERICAN OVERSIGHT

Medical Housing Unit full Admission Observation

Evaluation Method:	Observation	
Items to Review *(10 detainees if possible)*	**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Are all patients within sight or hearing of a qualified health professional? **Yes/No**??	NA	yes staff on duty at nursing station 24/7 within sight or hearing.
2. Number of nurses in the MHU at time of observation **(Denominator)**	NA	2
3. Number of patients in the MHU at time of observation	NA	8
4. Number of MHU full admission records with 24 hour chart reviews every day. (Review one 24-hour chart in detail to confirm review was done appropriately) **Level 1: @90%**	NA	8/8
5. Number of MHU full admission records with all medications (except KOP med exceptions see guide) placed on pill line. **Level 2 @90%**	NA	8/8
Findings/ Recommendations:	no findings noted.	
Deliverables:	None	

AMERICAN OVERSIGHT

Suicide Watch- Observations

Evaluation Method:	None observed on Site		
Items to Review *(Observe 10 detainees on "suicide watch" if possible)*		**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of patients on suicide watch **Denominator**		NA	2
2. Number of patients on suicide watch with nursing assessment performed within the past 8 hours. **Level 3 @ 100%**		NA	2/2
3. Number of patients on suicide watch with 15 minute checks being performed on a staggered schedule. **Level 3@ 100%.**		NA	2/2
4. Number of patients on suicide watch with an assessment by a mental health or mid-level provider within the last 24 hours. **Level 3 @ 100%.**		NA	2/2
5. Number of patients on suicide watch with restrictive environment compliant with current orders (e.g., smock, finger food, activity, etc). **Level 3@ 100%**		NA	2/2
Findings/ Recommendations:	no discrepancies noted		
Deliverables:	None		

AMERICAN OVERSIGHT

Hunger Strike-Observations

Reviewer:

Evaluation Method:			
Items to Review *(Observe 10 detainees on "Hunger Strike" if possible)*		**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Was water available to detainees on hunger strike? **Level 3: if NO @90%**		NA	yes
2. Were meals (if observed during meal times) offered to patient and how MUCH OF THE of the food SERVED was eaten **Level 3: If NO @90%**		NA	yes
3. Of the hunger strike records with special needs, how many records indicate that the needs were addressed? **Level 3 @90%**		NA	6/6 = 100%
Findings/ Recommendations:	None		
Deliverables:	None		

AMERICAN OVERSIGHT

Segregation- Observations

Reviewer:

Evaluation Method:			
Items to Review *(Observe 10 detainees in "Segregation" if possible)*		**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of MHU full admission records for patients in segregation for medical overflow. **(Denominator)**		NA	6
2. Of the MHU full admission records for patients in segregation for medical overflow, how many records indicate that the patients were rounded on every 8 hours according to MHU policy **Level 3 @90%**		NA	6/6
3. Was sick call offered to detainees in segregation or other specialty housing units? **Level 2 @90%**		NA	100%
Findings/ Recommendations:	no deficiencies noted		
Deliverables:	None		

AMERICAN OVERSIGHT

After-Hours Medication (night pharmacy)

Reviewer:

Evaluation Method:	Observation	
Items to Review	**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of after-hours medication log records reviewed. **(Denominator)**	NA	10
2. Number of after-hours medication LOG records that were generated by a nurse as a telephone order. **Level 2 @90%**	NA	3/3
3. Number of afterhours medication records that were generated by a nurse as a telephone order and were signed by a provider within 24 hours returning for next work shift **Level 2 @90%**	NA	3/3
4. Does the pharmacy have a reconciliation process?: **Level 2 if NO @90%**	NA	YES
5. Is an After-Hours Cabinet (AHC) medication sign out log in place for the documentation of medications removed from the AHC: **Level 1 @100%**	NA	YES
6. Is all necessary information entered the fields of the After-Hours Cabinet (AHC) sign out log. **Level 1 @100%**	NA	YES
7. Is a medication log in place and reflective of quantities of medication	NA	YES

AMERICAN OVERSIGHT

stored in the night cabinet? **(Level 1 if NO)**	YES	
8. Do line entries contain the date, time, patient name, alien number, medication name, and quantity removed? **Level 2 @100%: if NO**	YES	
9. Is the after-hours verbal medication order entered eCW by the prescriber upon return to duty? **Level 2@100%**	YES	
10. Is the after-hours medication administration properly documented on the MAR or in the electronic health record? **Level 2@100%**	YES	
11. Is the night cabinet, clean, stocked, and organized?	YES	
12. Is the After-Hours Cabinet physically inspected (by pharmacist or designee) on a monthly basis to ensure the absence of expired, recalled or deteriorated medications? **Level 2 @100%**	YES	
Findings/ Recommendations	None	
Deliverables:	None	

AMERICAN OVERSIGHT

Language Access- Observations

Reviewer:

Evaluation Method:	**Observation**	
Items to Review	**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Are the "I Speak" posters and pocket guides readily available and posted in the clinic?	NA	Yes
2. Does the facility have a process in place to address accessing sign language interpreters and telecommunication (TDD/TTY) for individuals with hearing disabilities? **If No; level 2; @100%**	NA	Yes
Findings/ Recommendations:	The facility has access to TDD/TTY communication devices. In the past they have brought in Sign Language interpreters to the dorms, court, asylum, and medical appointments.	
Deliverables:	None	

AMERICAN OVERSIGHT

Diagnostic Services

Evaluation Method:	Observation	
Items to Review	**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Are laboratory services provided in adherence with CLIA Waived testing? **Level 3: @90%**	NA	Yes
2. Is there a current certificate for CLIA-waived testing? **Level 2@100%: CLIA services stopped until obtained.**	NA	Yes posted on wall of lab.
3. Are radiation signs posted on all doors leading to areas with radiation producing equipment? **Level 1 @100%, "SPOT-FIX, may escalate to Tier 2 If multiple rooms noted not addressed by the end of the visit**	NA	Yes posted on only door leading into x-ray room.
4. Are Dosimetry reports reviewed quarterly (MONTHLY FOR DECLARED PREGNACIES) by the Compliance officer or HSA? (Yes/No): **If No level 2@100%**	NA	yes
5. Are staff seen wearing dosimeter badges while performing radiography services or while working in an area with radiation producing equipment? **Level 2@100%**	NA	yes

AMERICAN OVERSIGHT

6. Are staff dosimeter badges and controls stored in a central location and not near a radioactive source? **Level 2@ 100%**		Yes
Findings/ Recommendations:	No findings noted.	
Deliverables:	None	

AMERICAN OVERSIGHT

Log Books

Reviewer:

Evaluation Method:	Observation	
Items to Review	**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of pharmacy refrigerator temperature logs reviewed **(Denominator)**	NA	Pharmacy has 4 refrigerators and 3 months were reviewed totaling 360 entries.
2. Number of pharmacy refrigerator temperature logs that have entries per shift for the past three months. **Level 1 @90%**	NA	7/360 were missing on the log
3. Number of refrigerator temperature logs that are out of range. **(Denominator)**	NA	7
4. Of the refrigerator temperature logs that are out of range, how many logs have documentation of action taken and follow-up ?(**Level 1 @90%)**	NA	6 entries had documentation 1 entry was missing
Are the sharps secured and count accurate? **Level 2 @100%, if NO**	NA	yes
In review of the past 3 months of sharps counts, are two signatures present for each shift changes ?(**Level 1 @90%)**	NA	Yes all sharps signed out as well as all sharps wasted are signed by 2 nurses.
Are the narcotics secured, (double locked) and counts within the last 3 months accurate (clinic and pharmacy supply)? **Level 3 @90%**	NA	yes
In review of 3 months of controlled substance logs, are two signatures present for each shift change on the narcotics counts? **Level 1 @90%**	NA	yes

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-000671

Are the urgent care cart/trauma bag and AEDS checked daily for content (signatures, AED functionality, and expiration for the past 3 months? **Level 2 @90%**		Yes
Findings/ Recommendations:	None	

Daily Assignment Sheet (DAS)

Evaluation Method:	Observation	
Items to Review *(review 10 random days)*	**Improvement Plan Levels (1,2, or 3)**	**Comments**
1. Number of daily assignment sheets reviewed per month) **Denominator**	NA	10
2. Number of daily assignment sheets that were archived appropriately.	NA	*No IP level; Observation only for 2018 audits*
3. Number of daily assignment sheets reviewed had at least one emergency team identified per shift. **Level 1 @90%**	NA	28/30
Findings/ Recommendations:	None Will reinforce to staff to write down emergency responders on DAS	
Deliverables:	None

After Hours Medication Chart Review - Review Complete

How many after hours medication log records were reviewed?	10
Of the after hours med log records reviewed, how many records documented the patient's identification number?	10
Of the after hours med log records reviewed, how many records were generated by a nurse as a telephone order?	0
Of the records generated by a nurse as a telephone order, how many were signed by a provider within 24 hours of return for next work shift?	No data reported
Is an After-Hours Cabinet (AHC) medication sign out log in place for the documentation of medications removed?	Yes
Is all the necessary information entered into the fields of the AHC sign out log?	No
After Hours Medication Chart Review Findings	Best Practices- 1. Zip ties to secure individual med boxes provides a visual cue on which meds need to reconsiled each day; efficiency noted. 2. Color coded expirations labels on outside of each box; enhanced efficiency of monthy review. Findings 1. After Hours Medication Log is in place. Log entries do not include the patients name or time medication was removed. Numerous errors in logging; subtraction errors, failure to log medications out, "corrections to inventory" indicated poor accountability of prescribed medications. Documentation of errors does not conform with expected practice, correction in variety of colored pens, consist of "scribbled out" entries, individuals documenting over others entries. Pharmacy reports techs check inventory daily and expirations monthly, but management of medication variances have not consistently resulted in identifying where the meds went and have not been tracked on the IR tool. Unable to verify that the daily audit is performed as no documentation exists to document these quality checks. Unable to readily identify if the medications were taken based on T/O, V/O or by provider. 2. After hours cabinet is located in the lab where biohazardous material is spun and stored. 3. Checked 10 medication boxes; counts accurate. One medication label indicated the wrong count and this error was not identified for several months on the log before a correction to the count was made. No incident report for this issue. 4. OTC cabinet has labels that cover the manufacturer's directions.
After Hours Medication Chart Review Deliverables	(b)(5)

AMERICAN OVERSIGHT

(b)(5)

After Hours Medication Observation - Review Complete

Is a medication log in place and reflective of quantities of medication stored in the night cabinet?	Yes
Do line entries contain the date, time, patient name, alien number, medication name, and quantity removed?	No
Is the after hours verbal medication order entered into eCW by the prescriber upon return to duty?	Yes
Is the after hours medication administration properly documented on the MAR or in the electronic health record?	Yes
Is the night cabinet, clean, stocked, and organized?	Yes
Is the After-Hours Cabinet physically inspected (by pharmacist or designee) on a monthly basis to ensure the absence of expired, recalled or deteriorated medications?	No
After Hours Medication Encounters Findings	1. The after hours medication cabinet is checked daily by the pharmacy techs, but the method of securing the boxes does not allow one to check for deteriorated medications. There is no log to ensure that the cabinet is checked for recalled items.
After Hours Medication Encounters Deliverables	(b)(5)

Chronic Care Chart Review - Review Complete

How many chronic care records were reviewed?	25
Of the chronic care records reviewed, how many had a PE--Complex completed within two business days?	24
	25

AMERICAN OVERSIGHT

Of the chronic care records reviewed, how many had chronic conditions properly documented in eCW Problem List?	
Of the chronic care records reviewed, how many detainees arrived at the facility on chronic medications?	21
Of the chronic care records with medications, how many encounters indicated that medications were continued as clinically indicated??	21
Of the chronic care records reviewed, how many detainees had psychiatric medications?	16
Of the chronic care records with psychiatric medications, how many encounters indicated that the detainee was seen by an MD or MLP every 30 days for medication assessment or review?	16
Of the chronic care records with psychiatric medications, how many encounters indicated that the detainee was seen by an MD or psychiatrist every 90 days for chronic care management?	24
Of the chronic care records reviewed, how many chronic care patients were identified as stable?	24
Of the stable chronic care patients, how many encounters indicated that the detainee was seen within 90 days?	24
Of the chronic care records reviewed, how many chronic care patients were identified as unstable?	1
Of the unstable chronic care patients, how many encounters indicated that follow-up appointments were scheduled earlier than 90 days ?	1
Of the chronic care records reviewed, how many had a global alert (IHSC 834 or electronic equivalent) completed?	21
Chronic Care Records Findings	Findings: 4 charts missing global alerts.
Chronic Care Records Deliverables	No deliverables needed/recommended. Discussed chart review findings with facility leadership during onsite visit.

Chronic Care Observation - Review Complete

How many chronic care encounters were observed?	4
Of chronic care encounters observed, how many were considered stable patients?	4
Of the stable patients observed, how many were completed within the appropriate timeframe?	4
Of chronic care encounters observed, how many were considered unstable patients?	0
Of the unstable patients observed, how many were completed within the appropriate timeframe?	0
Of the chronic care encounters observed, how many had a treatment plan?	4

AMERICAN OVERSIGHT

Chronic Care Encounters Findings	1) Best practice noted: • Provider/triage nurse completed peak flow as indicated by the chronic condition, • Provider reviewed lab results, disease control status and treatment plan with the detainee. • Provider reviewed the chronic medication refill process with detainee. • One of the chronic care encounters observed revealed that the APP had been consulting with CD and Pharmacy for chronic care management as needed. • Besides requesting chronic medication refill via the sick call process, the facility has a "pharmacy refill request form" process in place. The forms are located in the dorms and detainees can submit the form in a drop box near the Pill Line window marked "Medication Refill Request." Pharmacy checks this box M-F. At a glance it appears to be working efficiently. 2) Detainee refused a scheduled Chronic follow up appointment and no face to face refusal was obtained as the detainee refused to come to the clinic. Facility has a “Detainee Refusing Medical Services and/or Medication form” that custody has the detainee sign if he/she refuses to come to the clinic process in place. The form is then attached to IHSC refusal form and scanned into the detainee’s chart.
Chronic Care Encounters Deliverables	(b)(5)

Consent Forms Chart Review - Review Complete

How many consent forms were reviewed?	25
Of the consent forms reviewed, how many were general consent forms?	8
Of the general consent forms reviewed, how many were complete?	8
Of the consent forms reviewed, how many were dental consent forms?	8
Of the dental consent forms reviewed, how many were complete?	8
Of the consent forms reviewed, how many were psychotropic consent forms?	9
Of the psychotropic consent forms reviewed, how many were complete?	9
Consent Forms Findings	A total of 25 consent forms were reviewed. There were 8 general consents, 8 dental consents, and 9 for psychotopic medication consents. 100% of the consents were not missing any required data.
Consent Forms Deliverables	No deliverables needed/recommended. Discussed chart review findings with facility leadership during onsite visit.

AMERICAN OVERSIGHT

Daily Assignment Sheets - Review Complete

How many daily assignment sheets were reviewed?	30
Of the daily assignment sheets reviewed, how many were archived appropriately?	0
Of the daily assignment sheets reviewed, how many had at least one emergency team identified per shift?	18
Daily Assignment Sheets Findings	•30 daily assignment sheets were reviewed to include those with minor revisions. •Facility is utilizing the current IHSC Daily Assignment form, however the last two pages of the document are not being used. •The sheets are updated on every shift; however, several were not filled out completely as intended; Areas identified as incomplete includes: emergency teams for a given shift (12/30) and the dates (April more so than May and June). •Daily assignments sheets were being disorderly archived in a filing cabinet in MRT pending scanning. Site is behind on scanning the documents; last daily assignment sheet that has been scanned were June/July 2018.
Daily Assignment Sheets Deliverables	(b)(5)

Diagnostic Services - Review Complete

Are laboratory services provided in adherence with CLIA Waived testing?	Yes
Is there a current certificate for CLIA-waived testing?	Yes
Are radiation signs posted on all doors leading to areas with radiation producing equipment?	Yes
Is there documentation of a quarterly (monthly for declared pregnancies) review of the dosimetry report by the HSA or Compliance Officer?	Yes
Are staff seen wearing dosimeter badges while performing radiography services or while working in an area with radiation producing equipment?	Yes

AMERICAN OVERSIGHT

Are staff dosimeter badges and controls stored in a central location and not near a radioactive source?	Yes
Diagnostic Services Findings	1. Did not observe x-ray technician; wear of badge unobserved. 2. PII (stack of x-ray logs) left in unlocked office.
Diagn/ stic Services Deliverables	(b)(5)

Emergency Preparedness and Response Observation - Review Complete

Is there documentation showing completed date and time of man-down drills?	Yes
Is there documentation showing completed date and time of fire drills?	Yes
Is there documentation showing completed date and time of mass casualty drills?	Yes
Are clinic staff trained on emergency equipment?	Yes
Do emergency scenarios vary?	Yes
Is it evident that the emergency incident was either an actual event, full drill, or table top exercise?	Yes
Is there a system in place to distribute an after-action report to all staff?	Yes
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event ?	Yes
Emergency Preparedness and Response Findings	1) Last Mass casualty drill 12/5/18; Medical Emergency Equipment training: 3/11/19; 2) Facility has a self-study binder as well as ensuring PALMS training are completed 3) Scenarios vary (i.e. seizure, choking, unresponsive, hanging/suicide, chest pain, SOB, fire) 4) Staff are afforded the opportunity to review the after-action reports as they are kept in a binder in the multipurpose room for their review/signing of the roster. 5) Positive feedback/strengths/observations are being documented in the after-action reports such as "rapid response time, patient safety was ensured, clear delegation of roles, great teamwork/cohesive unit response, good communication, Recognized Geo ensured patient safety and worked well with team etc." Very few deficiencies or opportunities for improvement were noted in the after-action reports. 6) Copy of the Emergency call back roster is kept at Nursing station BEST PRACTICE NOTED: A "Medical Responder", "START Triage," and "Use of Force Debriefing (script)" cards are passed along during shift change ensuring the emergency

AMERICAN OVERSIGHT

	response team members acknowledges this responsibility during his/her shift.
Emergency Preparedness and Response Deliverables	NONE

Environmental Health Observation - Review Complete

Are clinic Safety Data Sheets (SDS) files complete, current, and accessible?	Yes
Are hazardous chemicals, including cleaning supplies, labeled and securely stored?	Yes
Are Public Health, Safety, and Preparedness Toolkit checklists maintained locally and documented (with CO/HSA Signatures or designee) to show corrective action with completion date?	Yes
Do Airborne Isolation and Inspection (AII) rooms requiring transmission based precautions have appropriate signage for the required precaution(s)?	Yes
Is documentation of daily checks on (AII) rooms' negative pressures complete?	Yes
Is the OSHA Form 300A summary completed and posted in clinic from February 1st through April 30th each year?	Yes
Environmental Health Findings	All areas within compliance.
Environmental Health Deliverables	None.

Grievances - Review Complete

Number of medical grievances reported through QI/JIC/CRCL/DRIL.	0
Is there a local SOP for managing grievances?	No
Is there an identified grievance officer?	Yes
Is there a log book and is it up to date?	Yes
Number of medical grievances that were not addressed in a timely manner.	0
Number of formal grievances.	11
Number of informal grievances.	0
Grievances Findings	Eleven formal medical grievances were file in the past three months and all were addressed within 5 business days as required by policy. Unable to identify any medical grievances reported through QI/JIC/CRCL/DRIL (this was verified with the Grievance Officer). The facility does not have a local SOP for managing grievances but follows the IHSC Detainee Medical Grievance System guidance. The Grievance binder/log is well maintained.
Grievances Deliverables	NONE

Hunger Strike Chart Review - Review Complete

How many of hunger strike records were reviewed?	1
Of the hunger strike records reviewed, how many had with I&O's tracked in the health record?	1
Of the hunger strike records reviewed, how many indicated that the patient was educated on the adverse effects of a hunger strike and education was documented in health record?	1
Of the hunger strike records reviewed, how many indicated that the patient was counseled on termination of hunger strike and counseling was documented in health record?	1
Of the hunger strike records reviewed, how many indicated that the patient was evaluated by a mental health provider?	1
Of the hunger strike records reviewed, how many had a complete medical history, orthostatic vital signs, height, weight, urinalysis, mental health evaluation, physical assessment, clinically necessary laboratory tests deemed appropriate, and modification or augmentation of standard treatment protocols when medically indicated during the initial evaluation or refusal form?	1
Of the hunger strike records reviewed, how many had orthostatic vital signs including weight taken every 24 hours?	1
Of the hunger strike records reviewed, how many were discontinued by the Clinical Director, or a physician?	1
Of the hunger strike records that were discontinued, how many indicated that IHSC healthcare personnel offered detainee appropriate follow-up with behavioral health and medical care and offer was documented in patient's chart?	1
Of the hunger strike records reviewed, how many had special needs to include restriction of commissary items?	0
Hunger Strike Records Findings	Only located 1 Hunger Strike record from 3500 entries. On special needs specify commissary restriction not just confiscation of food.
Hunger Strike Records Deliverables	(b)(5)

Hunger Strike Observation - Review Complete

How many patients were on a hunger strike at the time of observation?	0
Of the patients on a hunger strike, how many was water available for?	0
Of the patients on a hunger strike, how many were offered meals?	0

AMERICAN OVERSIGHT

Of the patients on a hunger strike who were offered food, how much food was offered?	N/A
Of the food offered, how much of the food was eaten?	N/A
Of the patients on a hunger strike, how many had special needs?	0
Of the special needs patients on a hunger strike, how many records indicated that the needs were addressed?	0
Hunger Strike Encounters Findings	N/A
Hunger Strike Encounters Deliverables	None

Infectious Disease Prevention - Review Complete

Are hand washing equipment and hand sanitizers available in the clinic?	Yes
Are contact and outbreak investigations documented in the PHSP Unit reporting tool on SharePoint?	Yes
Is hand hygiene monitoring conducted and documented on the quarterly review?	Yes
Infectious Disease Prevention Findings	• Are hand washing equipment and hand sanitizers available in the clinic? o Yes, each provider room, Lab, and Urgent care rooms have sinks with soap. Hand sanitizer dispensers are located throughout the clinic, with one in the nursing station, teleradiology and before entering the breakroom. • Are contact and outbreak investigations documented in the PHSP Unit reporting tool on SharePoint? o Yes, the active cohort of Mumps is posted on the Cohort tracking tool and the Mumps tracking tool • Is hand hygiene monitoring conducted and documented on the quarterly review? o Yes, 3Q, 5/14/19 and 2Q, 2/5/19 were completed with no negative findings. o Q3 was completed but not yet filed within the PHSP binder; it is now placed in the binder.
Infectious Disease Prevention Deliverables	none

Intake Screen Chart Review - Review Complete

How many intake screen records were reviewed?	25
Of the intake screen records reviewed, how many had detainee identified with at least two detainee identifiers?	25
Of the intake screen records reviewed, how many used a translator?	11
Of the intake screen records that used a translator, how many listed a translator name or ID number ?	11
Of the intake screen records that did not use a translator, how many provide a reason for not using a translator?	0

AMERICAN OVERSIGHT

Of the intake screen records reviewed, how many records had a complete pain assessment using the pain scale indicator?	25
Of the intake screen records reviewed, how many records had a pain scale greater than 0?	3
Of the records with a pain scale greater than 0, how many were assessed?	3
Of the intake screen records reviewed, how many used the eCW Intake Screening template?	25
Of the intake screen records reviewed, how many had clinically significant findings?	11
Of the intake records with clinically significant findings, how many were referred appropriately?	11
Of the intake screen records reviewed, how many were reviewed by an RN or above within 24 hours?	1
Intake Screen Records Findings	Translator use was appropriate. If not used, it was due to provider fluent or English speaking detainee, 0 documented above.
Intake Screen Records Deliverables	(b)(5)

Intake Screen Observation - Review Complete

How many intake screen encounters were observed?	8
Of the intake screen encounters observed, how many did the nurse review the prescreen and transfer paperwork prior to initiating the intake screening?	8
Of the intake screen encounters observed, how many included a full set of vital signs?	8
Of the intake screen encounters observed, how many used the eCW Intake Screening template?	8
Of the intake screen encounters that used the eCW Intake Screening template, how many were completed appropriately?	8
Of the intake screen encounters observed, how many was the patient was educated on access to care, upcoming PE appointment, and provided the grievance guide?	8
Of the intake screen encounters observed, how many included security advice of special needs and housing disposition?	8
Intake Screen Encounters Findings	Findings- Three staff observed. Two of the nurses asked 100% of the questions as intended. One nurse, on one intake, generalized

AMERICAN OVERSIGHT

	some questions instead of asking them individualy. This same nurse asked 100% of the questions on subsequent observations. The surveyor moved from room to room to maximize opportunity to see multiple intakes. Clinic processes very efficient. Intakes thorough with relevant additional questioning when patient responded affirmative to questions asked. Time and care taken to get a full assessment of patient's needs and referrals to the appropriate level of provider initiated.
Intake Screen Encounters Deliverables	None.

Language Access Chart Review - Review Complete

How many language access records were reviewed?	25
Of the language access records reviewed, how many indicate that patient was asked what language he or she speaks?	25
Of the language access records reviewed, how many document the patient's primary language or language of choice in his or her medical record?	25
Of the language access records reviewed, how many addressed and documented the use of a translator?	13
Of the language access records reviewed, how many did not use a translator?	12
Of the language access records that did not use a translator, how many documented reasons why a translator was not used?	12
Language Access Records Findings	Out of the 25 intake records reviewed for language access purposes, 13 documented that a translator was utilized. For the 12 where a translator was not utilized, all 12 documented the reason why a translator was not utilized. All 25 records reviewed were in compliance for language access purposes.
Language Access Records Deliverables	No data reported

Language Access Observation - Review Complete

Are the "I Speak" posters and pocket guides readily available and posted in the clinic?	Yes
Does the facility have a process in place to address accessing sign language interpreters and telecommunication (TDD/TTY) for individuals with hearing disabilities?	Yes
Language Access Encounter Findings	Staff able to verbalize the process for TYY/TDD access to services.
Language Access Encounter Deliverables	None

Log Books - Review Complete

ATTORNEY OVERSIGHT

How many pharmacy refrigerator temperature logs were reviewed?	3
Of the pharmacy refrigerator temperature logs reviewed, how many have entries per shift for the past three months?	3
Of the pharmacy refrigerator temperature logs reviewed, how many refrigerator temperature logs are out of range?	0
Of the temperature logs that are out of range, how many logs have documentation of action taken and follow-up?	0
Are the sharps secured and the count accurate?	Yes
In review of the past 3 months of sharps counts, are two signatures present for each shift changes?	Yes
Are the narcotics secured with double lock and counts within the last 3 months accurate?	No
In review of past 3 months of controlled substance logs, are two signatures present for each shift change on the narcotics counts?	Yes
Are the urgent care cart/trauma bag and AEDs checked daily for content, signatures, AED functionality, and expiration for the past 3 months?	Yes
Log Books Findings	1. Sharps are bagged in packs. When counting, the count is being performed by bag. Recommend using breakaway tape and date and initials on bag of individual performing the the bag preparation. Nurse can count by 10s if bags are properly sealed, dated and initials. 2. Narcotic and sharps logs contain errors that have been scribbled over and counts are not always documented correctly on first try. 3. Pharmacy controlled substance cabinet has an exceess amount of crushed medication returned from nursing. It appears that controlled substances are being prepared in advance of confirming that the patient wants them which would indicate pre-pouring is occurring. 4. Excess number of controlled substances are stored in the pill-cart.
Log Books Deliverables	(b)(5)

Medication Administration Observation - Review Complete

Is prepouring occurring?	Yes
How many medication administrations were observed?	13
	13

AMERICAN OVERSIGHT

Of the medication administrations observed, how many times were nurses adhering to ALL six rights of medication administration?	
Of the medication administrations observed, how many mouth checks were conducted?	7
Of the medication administrations observed, how many times did nurses document the medication administration immediately after the medication was administered?	13
How many MAR entries were observed?	13
Of the MAR entries observed, how many were complete?	13
Of the MAR entries observed, how many medication refusals were documented?	10
Of the identified medication refusals, how many refusals had accompanying eCW documentation ?	6
Of the identified medication refusals, how many were high-risk medications?	10
Of the identified high-risk medication refusals, how many times were providers notified of the refusal?	10
Medication Administration Findings	Findings: 1. Patient IID only contained the nurse scanning the ID 2. Mouth checks did not meet expected threshold. 3. Pre-pouring was occuring for segregation patients and insulin patients. 4. Non-compliance with the refusal process. Refusal forms not being utilized, no consistent face-to-face encounter related to the refusal or seeking information with regards to the reason of the refusal. Alternate form used.
Medication Administration Deliverables	(b)(5)

Meetings - Review Complete

Of the two previous staff meetings, how many were conducted monthly and properly documented?	2
	2

AMERICAN OVERSIGHT

Of the two previous public health, safety, and preparedness meetings, how many were properly documented?	
Of the two previous quality improvement meetings, how many were conducted quarterly and properly documented?	2
Out of the two previous quarterly ICE/HSA meetings, how many were conducted and properly documented?	2
Meetings Findings	Positive findings - 1. Staff meetings were in a very nice format. Staff attendance rosters with exceptional compliance in having all signatures in a timely fashion. 2. Health and Safety meeting would benefit from being more robust; consider using a SWOT format when reporting on man down drills and fire drills to include plans for corrective actions and any follow-up to include effectiveness of CAPs documented.
Meetings Deliverables	None

MHU Full Admission Chart Review - No data reported

How many MHU full admission records were reviewed?	No data reported
Of the MHU full admission records reviewed, how many had admission encounters?	No data reported
Of the MHU full admission records reviewed, how many had a documented PE within the past year?	No data reported
Of the MHU full admission records without a documented PE, how many received a PE within 24 hours of admission to the MHU?	No data reported
Of the MHU full admission records reviewed, how many had a nursing care plan?	No data reported
Of the MHU full admission records with a nursing care plan, how many records indicate the plan was addressed and reviewed daily?	No data reported
Of the MHU full admission records reviewed, how many had patient education provided daily?	No data reported
Of the MHU full admission records reviewed, how many indicated detainee had an existing mental health diagnosis prior to admission?	No data reported
Of the records that indicate that the detainee had a mental health diagnoses, how many received a mental health reassessment every seven (7) days, or more frequently, if indicated	No data reported
Of the MHU full admission records reviewed, how many records did not have a mental health diagnoses?	No data reported
Of the MHU full admission records without mental health diagnoses, how many records indicate the patient was assessed every 30 days by a MHP?	No data reported
MHU Full Admission Records Findings	No data reported

AMERICAN OVERSIGHT

MHU Full Admission Records Deliverables	No data reported

MHU Full Admission Observation - Review Complete

Are all patients within sight or hearing of a qualified health professional?	Yes
How many nurses are in the MHU full admission at the time of observation?	4
How many patients are in the MHU full admission at the time of observation?	4
How many MHU full admission patients have a 24-hour chart review everyday?	4
Of the MHU full admission records, were 24-hour charts completed appropriately?	No data reported
How many MHU full admission patients have medications?	4
Of the MHU full admissions patients with medicaitons, how many have all medications placed on pill line?	4
MHU Full Admission Encounters Findings	1) A detainee in MHU without MHU Admission encounter/orders; the 24-hour chart check and daily MHU Provider round after being placed in the MHU were the opportunities to have identified this oversight.
MHU Full Admission Encounters Deliverables	(b)(5)

Personnel and Credentialing Files - Review Complete

Does the facility have a process for tracking requirements electronically?	Yes
How many personnel and credentialing files were reviewed?	12
Of personnel and credentialing files reviewed, how many were PHS officers?	3
Of the PHS officer records, how mand had at least two years of evaluations (COERS)?	3
Of personnel and credentialing files reviewed, how many were federal civil service employees?	1
Of personnel and credentialing files reviewed, how many were contractors?	9
Of personnel and credentialing files reviewed, how many records are for privileged staff?	4

AMERICAN OVERSIGHT

Of the privileged staff records reviewed, how many were Licensed Independent Practitioners (LIPs)?	4
Of the LIP staff records reviewed, how many had personnel files records current?	4
Of the LIP staff records reviewed, how many had a competency assessment or peer review?	3
Of personnel and credentialing files reviewed, how many contained a current and signed Health and Ability form?	12
Of personnel and credentialing files reviewed, how many contained a signed statement of confidentiality?	12
Of personnel and credentialing files reviewed, how many contained a signed statement of risks and responsibility?	12
Of personnel and credentialing files reviewed, how many contained a signed statement of acknowledgement of understanding of local, national, and residential standards?	12
Of personnel and credentialing files reviewed, how many contained a signed release of information form?	12
Of personnel and credentialing files reviewed, how many contained current, valid, and unrestricted license?	12
Of personnel and credentialing files reviewed, how many contained documentation of primary education , license primary source, and annual verification?	12
Of personnel and credentialing files reviewed, how many were reviewed for physicians or psychiatrists?	1
Of the physician or psychiatrist records, how many had documentation of residency?	1
Of the physician or psychiatrist records, how many were board certified?	1
Of the board certified physicians and psychiatrists, how many had documentation of board certification?	1
Of personnel and credentialing files reviewed, how many had a copy of a curriculum vitae or a resume?	12
Of personnel and credentialing files reviewed, how many had current National Provider Data Bank information?	12
Of the staff records reviewed, how many had scope of practice documentation if applicable?	12
Personnel and Credentialing Files Findings	One peer review was in progress and awaiting reciept from HQs. AA was actively engaged in repeated follow-up since its expiration. racker was up to date and had areas that were pending updates highlighted. Very good system in place that is effectively managing all personnel, training, and health records requirements.
Personnel and Credentialing Files Deliverables	None.

AMERICAN OVERSIGHT

Physical Exam Chart Review - Review Complete

How many physical exam charts were reviewed?	25
Of the physical exam charts reviewed, how many used language services?	18
Of the physical examinations that used language services, how many contained identification of the translator or interpreter?	18
Of the physical exam charts reviewed, how many were for juveniles?	0
Of the juvenile physical exam charts reviewed, how many were completed within 7 days of arrival to the facility?	0
Of the physical exam charts reviewed, how many were for adults?	25
Of the adult physical exam charts reviewed, how many PE-S's were completed within 14 days of arrival to the facility?	16
Of the physical exam charts reviewed, how many had a pain assessment?	25
Of the physical exam charts with pain assessment, how many were addressed ?	25
Of the physical exam charts reviewed, how many were reviewed by an MD? PE-C within 7 days.	9
Of the physical exam charts reviewed, how many were reviewed by an MD? PE-S within 14 days.	14
Of the physical exam charts reviewed, how many were for adult females?	1
Of the adult female physical exam charts reviewed, how many had a record of the last menstrual cycle?	1
Of the adult female physical exam charts reviewed, how many had a record with a pap test offered?	0
Of the adult female physical exam charts reviewed, how many had a record where a pap test was not indicated?	1
Physical Exam Records Findings	facility received a pass rating (maintained the threshold) for all criteria above.
Physical Exam Records Deliverables	No deliverables needed/recommended based on the chronic care chart review findings. Discussed chart review findings with facility leadership during onsite visit.

Physical Exam Observation - Review Complete

How many physical exam encounters were observed?	8
Of the physical exam encounters observed, how many included a full set of vital signs?	8
Of the physical exam encounters observed, how many were completed within the specified timeframe?	8

AMERICAN OVERSIGHT

Of the physical exam encounters observed, how many included a detainee request for a chaperone?	0
Of the physical exam encounters observed, how many had an abnormal vital sign?	0
Of the physical examination encounters observed with an abnormal vital sign, how many were addressed and/or referred to a higher level of care?	0
Of the physical exam encounters observed, how many indicated that a Snellen test was conducted during the examination?	8
Of the physical exam encounters observed, how many were properly designated as either PE-Complex or PE-Simple in accordance with the IHSC Directive on Health Assessments?	8
Of the physical examination encounters observed, how many were referred to the next level of care as directed by IHSC policy?	0
Physical Exam Encounters Findings	• 8 PEs were observed (3 PE-C were completed by TDY providers, 2 PE-S were completed by RN staff and 3 PE-C were completed by Facility Providers) • Facility is working ahead on PE-S; as time permits, the weekend and evening staff have been working proactively to accomplish this task. • An annual PE refused to come to clinic; Face to face refusal form was not obtained • Best practice Observed: o All questions were asked as outlined in the PE templates; (even when the provider was conducting the evaluation in the MHU, she utilized a printed copy of the PE template/questions) o HPI/Peak flow completed/documented as appropriate o Provider inquired about receipt of patient education brochure at intake; provided information regarding dental/mental health services and treatment plan o “A chaperone will be provided upon request” sign was posted in exam rooms (in English and Spanish) o Translation services provided during PE-C in the MHU room (portable phone)
Physical Exam Encounters Deliverables	IHSC Refusal of treatment policy/process was reviewed with the RHSA. Deliverable for meeting intent of refusal process addressed in another section of this assessment.

Prescreen Observation - Review Complete

How many prescreen encounters were observed?	8
Of the prescreen encounters observed, are language services being used during prescreen if appropriate?	Yes
Of the prescreen encounters observed, how many prescreen encounters had documentation completed in eCW prior to intake screening?	8
Of the prescreen encounters observed, how many prescreening encounters were prioritized to level one when clinically indicated based on self-reported history or objective findings?	0
Prescreen Encounters Findings	Prescreening performed by memory and one question not asked for any of the 8 new entrants. The question regarding being suicidal

AMERICAN OVERSIGHT

	was done in a manner that was leading for a negative response. Nurse did not look comfortable askingthis question. No other findings noted.
Prescreen Encounters Deliverables	1. Spot check 5 nurses performing prescreen and intake to ensure all questions are being asked consistently. Report findings to RHSA by 10/01/2019.

Risk Management - Review Complete

Trends	1) 2018 Top 6 Event Types via the IR system: Injury (144), Fall (22) Altercation (physical) (19), Medical Emergency (14), Use of Force (14), Medication Error (Med. Administration) (12); Facility has been locally tracking/addressing Medication related incidents 2) Downward trend in IR reporting volume is noted (2016: 387; 2017: 356; 2018: 274)
Number of active Root Cause Analyses(RCA)/Sequence of Events (SOE).	1
Number of RCAs or SOEs completed during the last six (6) months.	1
Number of corrective actions generated from RCAs or SOEs during the last six (6) months.	5
List all corrective actions identified in the preceding field and note their status and due dates.	Action Item #1: Inclusion of psychiatrist in overall plan of care for high level cases and having documentation to support this inclusion; In progress/monitoring phase: DUE 6/28/19 Action Item #2: Management of mental health cases where detainees are not engaging in the assessment; In progress/monitoring phase; DUE 6/28/19 Action Item #3: Addressing possibly extending suicide watch based on finding high risk device that coud be used for to commit suicide. Identification of rope as suicidal ideation with plan and not a gesture. In progress/monitoring phase: DUE: 6/28/19 Action Item #4: Depression Screening; Mental Health Provider reviewing RN sick call notes for mental health related issues will address differential diagnosis using symptoms per DSM V; In progress/monitoring phase; DUE 6/28/19 Action Item #5: During DC Investigation outbrief, Investigators tasked ICE/GEO with fixing the process of Room Inspection Sheets findings; to be completed/monitored by GEO/ICE Custody
Risk Management Findings	Improved collaboration/communication between RM/FHPM during the event review process; FHPM referring cases for further review to SME (facility leader/HSA, Pharmacist and/or CD) as necessary. The use of Risk Stratification during the event review process is being implemented. FHPM/RM/RCS working to track/trend recurring identified process vulnerabilities.
Risk Management Deliverables	1) Facility leaders to support FHPM in her risk management activities to increase incident reporting volume

Schedules - Review Complete

AMERICAN OVERSIGHT

How many schedules were reviewed?	3
Of the schedules reviewed, how many had a legend to explain codes?	3
Of the schedules reviewed, how many had staff assigned "40 hours per week" per scheduling period?	3
Of the schedules reviewed, how many had provider coverage on weekend/holidays?	3
Of the schedules reviewed, how many had actual work hours reflected for non-traditional shifts?	3
Are there signed approvals for non-traditional shifts?	Yes
Is there a PDF copy each time a change was made to the schedule?	Yes
Schedules Findings	Please not the cTR vendor is permitting CTR staff to take paid holidays without any backfill of the loss of hours created. This will have adverse impact at sites that are at critical staffinglevels already.
Schedules Deliverables	No data reported

Segregation Chart Review - Review Complete

How many segregation records were reviewed?	15
Of the segregation records reviewed, how many indicate the patient was medically cleared for segregation?	13
Of the segregation records reviewed, how many indicate if daily segregation rounds by nursing are documented ?	14
Of the segregation records reviewed, how many offered the patient daily sick-call services?	14
Of the sick call services offered, how many were documented and noted whether patient accepted or denied sick call services?	14
Of the segregation records reviewed, how many patients had no history of a mental health diagnosis or mental health status was evaluated at least every 30 days?	6
Of the segregation records reviewed, how many patients had a history of a mental health diagnosis?	6
Of the patients with a mental health diagnosis, how many were seen weekly by Mental Health?	6
Segregation Records Findings	Facility received failed rating on one criteria above (ensuring medical segregation clearance); Of the 15 charts reviewed 2 did not have segregation clearance; Level 3 with threshold requirement of 100%. Otherwise facility passed all other criteria above.
Segregation Records Deliverables	(b)(5)

AMERICAN OVERSIGHT

Segregation Observation - Review Complete

How many patients in segregation were observed in MHU full admission for medical overflow?	1
Of the patients in segregation observed in MHU full admission for medical overflow, how many records indicate that the patients were rounded on according to MHU policy?	1
Were sick call services offered to detainees in segregation or other specialty housing units?	Yes
Segregation Encounters Findings	1) Detainee was housed in the MHU as a “Boarder Status;” however, this was not well understood as MHU 24 hour nursing care and charting continued. 2) Difficult to differential which medical log entries were for MHU RN Rounds versus RN Seg Rounds, RN Pill Line rounds and RN Insulin/Accucheck Rounds in the segregation log book.
Segregation Encounters Deliverables	(b)(5)

Shift Report and Time Cards - Review Complete

Are shift reports conducted?	Yes
Is there at least one representative from each department?	Yes
Are written changes verified (initials, signature) on time cards by the HSA or AHSA(s)?	Yes
Shift Report and Time Cards Findings	1, CTR staff are not punching in and out for lunch due to the programming of the time clock in use. 2. Shift reports ae well represented and it is thought that all staff report.
Shift Report and Time Cards Deliverables	None,

Sick Call Chart Review - Review Complete

How many sick call records were reviewed?	25
Of the sick call records reviewed, how many were the third time that the patient complained about the same issue?	0
Of the sick call records where the encounter was the third time that the patient has complained about the same issue, how many were referred to a provider?	0
Of the sick call records reviewed, how many included a full set of vital signs?	25
	20

AMERICAN OVERSIGHT

Of the sick call records reviewed, how many had a pain scale greater than 0?	
Of the sick call records with a pain scale greater than 0, how many indicated that the pain was addressed?	20
Of the sick call records reviewed, how many included nursing protocols/guidelines referenced by name in the documentation?	17
Of the sick call records reviewed, how many included the reason documented in the "Reason" field?	25
Of the sick call records reviewed, how many had the reason for visit from an approved category?	25
Of the sick call records reviewed, how many were addressed by a nurse?	17
Of the sick call records addressed by a nurse, how many followed the SOAP format of documentation with appropriate nursing diagnosis?	25
Does the facility have a defined process in place addressing sick call services?	No data reported
Sick Call Records Findings	Facility received pass rating (met the threshold) for all sick call criteria mentioned above.
Sick Call Records Deliverables	No deliverables needed/recommended. Discussed chart review findings with facility leadership during onsite visit.

Staffing Information - Review Complete

(b)(5)

AMERICAN OVERSIGHT

(b)(5)

Suicide Watch Chart Review - Review Complete

How many suicide watch records were reviewed?	20
Of the suicide watch records, how many had a patient evaluated for suicide risk by a mental health profession or physician within 24 hours of being placed on suicide?	20
Of the suicide watch records, how many had a patient assessed to determine if a suicide smock was medically indicated via a Special Needs form?	15
Of the suicide watch records, how many had the need for finger food annotated via a Special Needs form?	15
Of the suicide watch records, how many had a daily mental health assessment conducted and documented by a mental health or mid-level provider?	18
Of the suicide watch records, how many had a patient released from suicide watch?	20
Of the suicide watch records, how many had a patient released from suicide watch by a mental health provider or physician?	20
Of the suicide watch records, how many had a suicide risk assessment conducted prior to release from suicide watch?	18
Of the suicide watch records, how many had checks conducted and documented at least every eight hours by clinical staff?	20
Of the suicide watch records, how many had checks conducted and documented at least every 15 minutes by custody staff?	15
Suicide Watch Pre-Audit Findings	1) Suicide Smock order via Special Needs form a) 2 of the 20 charts reviewed were identified as NOT having the suicide smock ordered via the Special Needs form b) 3 of the 20 charts could not

AMERICAN OVERSIGHT

	be be verified if the suicide smock was order via Special Needs form since the "Last D/C date" had been entered and you are not able to review previous Special Needs log. 2) Finger Food only order via Special Needs form a) 2 of the 20 charts reviewed were identified as NOT having the finger food ordered via the Special Needs form b) 3 of the 20 charts could not be be verified if the finger food only was order via Special Needs form since the "Last D/C date" had been entered and you are not able to review previous Special Needs log. 3) 2 of the 20 charts reviewed were identified as missing the daily MH or APP assessment/note causing a fail for this criteria 4) 2 of the 20 charts reviewed were identified as not having the Follow up SRA smartform completed during the suicide precautions (specifically when detainee being stepped down from suicide watch to constant watch); Facility appears to be implementing the suicide precaution Step-down protocol; however, the follow up SRA is not being completed daily until the detainee is discharge from Suicide precautions; Per IHSC Directive 07-04 Effective 4/30/19: 6-3.4 The BHP, CD or designee must complete a follow up SRA for patients on suicide precautions. (Suicide Precautions includes three levels (suicide watch, constant watch, and mental health observation) 5) 2 of the 20 charts reviewed was noted to be missing the Suicide Observation Checklist documentation (it is usually scanned into the detainee's record once detainee is discharged from suicide precautions); 3 of the 20 was asssigned as N/A since the detainee was still on suicide precautions at the time of the audit 6) At times difficult if the detainee was being placed on SW or CW during the initial SRA. "pt placed on suicide constant watch" 7) Incidental/Best Practice Indentified: a) Mental Health "Pink Card" self-referral process b) documentation in the note that there was good communication/notification from custody staff to medical regarding hiddent sharps found in detainee's room
Suicide Watch Pre-Audit Deliverables	1) Kudos - Continue good work with ensuring that detainees were evaluated by a MHP within 24 hours of being placed on suicide precautions 2) Remind staff to document Suicide Smock/Finger Foods only via Special Needs form 3) Remind staff (either MHP or medical) to document daily on detainee on suicide precaution 4) Kudos - continue to ensure that only a MHP/Physician is the one to discontinue the suicide precautions 5) Remind staff that Follow up SRA is to be documented/completed for detainee on all level of suicide precautions (step-down protocol: SW, CW, MHO) IHSC Directive 7-04; 6-3.3 and 6-3.4 6) Remind staff that the Suicide Observation Checklist is to be scanned into detainee's chart once he/she is discharged from suicide precautions 7) Encourage staff to be clear on the watch being ordered/implemented during the Initial SRA in their documentation: Suicide Watch vs Constant Watch vs Mental Health Observation. 8) Kudos - continue with MH "pink card" self-referral process and documentation of good communication/notification from custody to medical regarding self-injurious findings during custody searches.

Suicide Watch Observation - Review Complete

AMERICAN OVERSIGHT

How many patients are on suicide watch?	3
Of the patients on suicide watch, how many have a nursing assessment performed within the past 8 hours?	3
Of the patients on suicide watch, how many have 15 minute checks being performed on a staggered schedule?	3
Of the patients on suicide watch, how many have an assessment by a mental health or mid-level provider within the last 24 hours?	3
Of the patients on suicide watch, how many have a restrictive environment compliant with current orders?	3
Suicide Watch Encounters Findings	1) There were three (3) detainees on suicide precaution (constant watch) during this site visit observation 2) Good catch by nursing staff for identifying, documenting and notifying the CD/MHU provider that one of the 3 detainees on suicide precaution had been refusing his meals for the past few days without the detainee officially declaring a hunger strike. Detainee was identified as potentially dehydrated and was referred to the ER. Remind nursing staff to have high suspicion and know when to initiate the tracking and notification of a possible hunger strike to higher level of care. (detainee had been refusing meals since 7/5/19 approximately 7 missed meals) 3) Good Practice Noticed: Custody had the restrictive environment special needs form with the current order readily available/posted to ensure compliance.
Suicide Watch Encounters Deliverables	(b)(5)

Training - Review Complete

How many training folders were reviewed?	12
Of the training folders reviewed, how many had a HSD-500?	12
Of the training folders reviewed, how many had a signed position description ?	7
Of the training folders reviewed, how many were registered nurse training folders?	7
Of the registered nurse training folders reviewed, how many documented RN Physical Exam Training?	12
Of the training folders reviewed, how many had continuing medical education credits documented?	12
Training Findings	Signed position descriptions, HSA-500 and RN PE competencies housed in personnel record - acceptable place. Records maintainance immpeccable.
Training Deliverables	None

AMERICAN OVERSIGHT

Transfer Summary Chart Review - Review Complete

How many transfers were reviewed?	25
Of the transfers reviewed, how many outgoing transfers were authenticated appropriately (signed, stamped, and dated)?	25
Of the transfers observed, how many outgoing transfers were completed by an LVN or above?	25
Of the transfer summary records reviewed for TB status, how many correctly documented no TB treatment status?	17
Of the transfer summary records reviewed for TB status, how many incorrectly documented no TB treatment status? (TB meds listed??)	1
Of the transfer summary records reviewed for TB status, how many correctly documented TB treatment status?	3
Of the transfer summary records reviewed for TB status, how many incorrectly documented TB treatment status? (Taking TB meds)	4
Transfers Findings	Multiple TB-CM's not attached, Negative IGRA used to show TB status despite positive chest x-ray and treatment for TB, multiple cases where transfer summary stated that patient asn't being treated for TB even though they were. For general Transfer summaries, two detainees have medications listed but no medical conditions listed
Transfers Deliverables	No data reported
Of the transfer summaries reviewed, how many listed the detainee's chronic medical conditions appropriately?	25
Of the transfer summaries reviewed, how many had "clear medication instructions" documented appropriately?	25

Workforce Health Files - Review Complete

Are workforce health files kept separate from other files?	Yes
Is access to staff records limited to the compliance officer, HSA, and AHSA(s) and AA?	Yes
How many workforce health files were reviewed?	12
Of the twelve workforce health files reviewed, how many had past year's TB (PPD or CXR) documentation?	12
Of the twelve workforce health files reviewed, how many had a Hepatitis B vaccination or declination form?	12
Of the twelve workforce health files reviewed, how many had a yearly Ishihara Color Blind test?	0

AMERICAN OVERSIGHT

Of the twelve workforce health files reviewed, how many had a yearly respirator medical clearance?	12
Of the twelve workforce health files reviewed, how many had a yearly respirator fit test?	12
Of the twelve workforce health files reviewed, how many had emergency contacts?	12
Are staff recordable injuries documented on Workforce Injury Tool?	No data reported
Workforce Health Files Findings	Ishihara - one staff in orientation and the Pharmacy Tech and Pharmacist did not have Ishihara's performed. The remainder of charts reviewed were out of complaince with the annual requirement-testing was out of date. Encouraged that pharmacy department be included as their color coding expiration process and identification of pills would require one to be able to discern different colors. Emergency contact info not in the file as per guidance. Best practice- site performs annual updates of the emergency contact sheets *Kudos*

Accreditation - Review Complete

Last ACA Accreditation	2015-11-04
Last ACA Findings	NO DATA
Last NCCHC Accreditation	2016-12-07
Last NCCHC Findings	Last NCCHC survey conducted December 7-9, 2016. The facility was found non-compliant in two essential standards, for which they have submitted corrective actions to NCCHC. There are 40 essential standards; 38 are applicable to this facility and 36 (95%) were found to be in compliance. One hundred percent of the applicable essential standards must be met. Our findings include: Essential Standards Not in Compliance J-E-06 Oral Care J-E-12 Continuity and Coordination of Care Essential Standards Not Applicable J-E-03 Transfer Screening J-G-03 Infirmary Care There are 27 important standards; 26 are applicable to this facility and 26 (100%) were found to be in compliance. Eighty-five percent or more of the applicable important standards must be met. Our findings include: · Important Standards Not in Compliance None Important Standard Not Applicable J-C-08 Health Care Liaison J-E-06 Oral Care (E). Trained RNs complete the oral screening and provide instructions in oral hygiene and preventive oral education during intake. Oral care is timely and it includes immediate access for urgent or painful conditions. The system of established priorities for oral treatment is not limited to extractions. However, the dentist does not complete an oral examination within 12 months of detainees' admission. At the time of the survey, we found that 16 detainees had not received their annual oral screening, and were scheduled to be completed the following week. The standard is·not met. Corrective action is required for Compliance Indicator #3. An oral examination should be performed by a dentist within 12 months of admission. Documentation of corrective action is required in order to verify that oral examinations are being conducted and that they are done in this 12-month time frame. Acceptable documentation includes evidence of necessary policy and procedure changes, including staff training and results of a CQI process study assessing the timeliness of oral examinations for inmates within 12 months of admission. In order to receive accreditation, verification that this standard has been met is

AMERICAN OVERSIGHT

	required. J-E-12 Continuity and Coordination of Care During Incarceration (E). Clinician orders are evidence-based and implemented in a timely manner. Deviations are clinically justified, documented and shared with the patient. Patients receive treatment and diagnostic tests ordered by clinicians, who discuss such care with them. When a patient returns from the emergency room, urgent care or hospitalization, protocols are followed in accordance with the standard. The responsible physician determines the frequency of periodic health assessments on the basis of protocols promulgated by nationally recognized professional organizations (the Bureau of Prisons). However, while the clinician review diagnostic tests in a timely manner, they are not appropriately acted upon, nor are treatment plans modified as clinically indicated. The clinicians review, but do not always act upon, the recommendations of specialty consultants in a timely manner. Chart reviews are not of sufficient frequency and number to .assure that clinically appropriate care is ordered and implemented by attending health staff. The standard is not met. Corrective action is required for Compliance Indicators #3. #7, and #9. All aspects of care should be coordinated and monitored from admission to discharge. Diagnostic tests should be reviewed by the clinic;:ian in a timely manner. Recommendations from specialty . consultations should be reviewed and acted upon by clinicians in a timely manner. Chart reviews should be done to assure that appropriate care is ordered and implemented and that care is coordinated by all health staff, including medical, dental, mental health and nursing. Acceptable documentation includes a plan by the RHA on how all aspects of this standard will be corrected. The plan should include necessary policy and procedure changes as well as evidence of training for appropriate staff. In addition, a CQI process study that evaluates the continuity and coordination of care following the implementation of the corrective action plan should be included. The CQI study should include a sufficient number of examples to demonstrate compliance with the standard. In order to receive accreditation,' verification that this standard has been met is required.

Emergency Preparedness and Response- Review Complete

Is there documentation of the man-down drills on each shift (once per month), mass casualty drills, and fire drills that have been conducted?	Yes
Do emergency scenarios vary?	Yes
Is the difference between a drill and an actual event evident in the write-up?	Yes
Do all staff participate in the drills?	Yes
Are all staff trained on emergency equipment?	Yes
Is emergency equipment checked daily and documented?	Yes
Is there documentation to support the training?	Yes
Did all staff receive an "after-action" debriefing?	Yes
If mortality related response, did staff involved submit a sequence of events statement of occurrence within 24 hours of incident and offered any adjustment support?	N/A - See findings below.
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event?	Yes
Findings	None
Deliverables	None

AMERICAN OVERSIGHT

Environmental Health - Review Complete

Are clinic Safety Data Sheets (SDS) files complete, current, and accessible?	No - See findings below.
Are hazardous chemicals (including cleaning supplies) labeled and securely stored?	Yes
The Public Health, Safety, and Preparedness Toolkit daily, weekly, monthly, and annual checklists are completed, signed by the HSA or designee, and maintained locally.	Yes
Items not in compliance with the Public Health, Safety, and Preparedness Toolkit daily, weekly, monthly, quarterly and annual checklists are documented to show corrective action with the completion date.	N/A - See findings below.
Are all airborne infection isolation (AII) room doors labeled "restricted area" and include requirements for entry?	Yes
Is documentation of daily checks on AII rooms' negative pressures complete?	Yes
Is the OSHA Form 300A summary completed and posted in clinic from Feb 1st through April 30th each year?	Yes
Findings	"Safety Data Sheets (SDS)" folder as current one still says MSDS. Keep contents updated
Deliverables	(b)(5)

Intake Screening Review - Review Complete

Number of intake screenings reviewed.	25.00
Number of intake screenings with detainee identified with at least two detainee identifiers.	25.00
Of the intake records reviewed, how many used a translator?	1.00
Of the intake screening records that used a translator, how many listed a translator name or ID number?	1.00
Of the intake screening records that did not use a translator, how many listed a reason for not using a translator?	24.00
Number of notes with TB clearance noted (PPD, CXR, current CXR from other facility).	24.00
Of the intake screening records, how many were TB negative?	24.00
Of the intake screening records that are TB negative, how many were signed, dated, and stamped by an RN or above?	7.00
Of the intake screening records, how many were TB positive?	0.00
Of the intake screening records that are TB positive, how many were signed, dated, and stamped by an RN or above?	0.00
Number of intake screenings with a complete pain assessment using the pain scale indicator.	25.00
Number of intake screenings with pain scale greater than 0.	0.00
Of the intake screenings with a pain scale greater than 0, how many were addressed?	0.00
Number of intake screenings with mental health screening completed.	25.00
Number of intake screenings that used the eCW Intake Screening template.	25.00
Of the intake screenings that used the eCW Intake Screening template, how many were completed appropriately (i.e., default answers changed to reflect the patient's response)?	25.00
Number of intake screenings with clinically significant findings.	6.00

AMERICAN OVERSIGHT

Of the intake screenings with clinically significant findings, how many were referred appropriately?	5.00
Number of intake screenings reviewed by an RN or above within 24 hours.	2.00
Findings	Of the 25 Intakes reviewed: 24 had TB clearance noted. Of the 24 charts that had TB clearance noted, seven (7) were signed, dated and stamped by a RN or higher. One (1) chart did not have TB clearance noted under the Labs, Diagnostic Imaging, or Scanned Docs tabs within e-CW. However, a note within the Intake Screening by the LV, indicates: "TB prophy refused Normal CXR 11/01/2016" Six had clinically signficant findings; One of those six charts indicated the detainee had a history of hyperlipids, but the detainee's Intake was coded as normal 3 Intake screenings were conducted by an LVN, thus requiring confirmatory sign-off by a RN or higher within 24 hrs. Of those three charts, one did not have confirmatory sign-off at all by a RN
Deliverables	NO DATA

Hunger Strike - Review Complete

Number of hunger strike records reviewed.	0.00
Number hunger strike records with I&O's tracked via eCW flowsheet (approved eCW form included).	0.00
Number of hunger strike records which indicate that the patient was educated with documentation on the adverse effects of a hunger strike.	0.00
Number of hunger strike records which indicate that the patient was evaluated by a mental health provider.	0.00
Number of hunger strike records with complete orthostatic vital signs, height, weight, urinalysis, mental health evaluation, and physical assessment during the initial evaluation.	0.00
Number of hunger strike records with orthostatic vital signs including weight taken every 24 hours.	0.00
Number of hunger strike records that were discontinued by the Clinical Director or a physician.	0.00
Number of hunger strike records with special needs.	0.00
Of the hunger strike records with special needs, how many records indicate that the needs were addressed?	0.00
Findings	No hunger strikes in the last 7 months
Deliverables	NO DATA

AMERICAN OVERSIGHT

Segregation - Review Complete

Number of segregation records reviewed.	25.00
Number of segregation records that indicate the patient was medically cleared for segregation.	23.00
Number of segregation records where daily segregation rounds by nursing are documented.	25.00
Number of segregation records where the patient was offered sick-call services daily (typically offered during rounds).	25.00
Number of segregation records where the patient's mental health status was evaluated at least every 30 days.	1.00
Number of segregation records where the patient was seen weekly by mental health.	14.00
Findings	1) overall good segregation documentation 2) Incidental finding with one case where the Intake was completed on 6/29/17 but PE-C completed on 7/14/17 Delay in getting PE completed otherwise good seg documentation 3) One case noted where two weekly mental health segregation rounds were not completed (Mental health segregation round on 5/31/17 then the next one wasn't until 6/20/17) otherwise good documentation 4) One case where the segregation clearance note was not documented 5) Majority of the charts reviewed the detainee was in Segregation for 1 day to less than 1 week therefore no weekly Mental health Segregation rounds were completed/indicated in those cases.

After Hours Medication Review - Review Complete

Number of after hours medication records reviewed.	25.00
Number of after hours medication records with the patient's identification number documented.	25.00
Number of after hours medication records with medication order(s) documented in eCW.	25.00
Number of after hours medication records that were generated by a nurse as a telephone order.	3.00
Number of after hours medication records that were generated by a nurse as a telephone order and were signed by a provider.	3.00
Does the pharmacy have a reconciliation process?	Yes
Does the pharmacy follow the reconciliation process?	Yes
Findings	A random review was conducted of eight medications in the after hours cart. Seven out of eight medication counts were not accurate.
Deliverables	(b)(5)

AMERICAN OVERSIGHT

After Hours Medication Observation - Review Complete

Is a medication log in place and reflective of quantities of medication stored in the night cabinet?	Yes
Do line entries contain the date, time, patient name, alien number, medication name, and quantity removed?	Yes
Are after hours medication orders documented as dispensed in eCW?	Yes
Is the night cabinet, clean, stocked, and organized?	Yes
Is the night cabinet reviewed three times per week?	No - See findings below.
Are medications in the night cabinet within their use date (i.e., not expired)?	Yes
Findings	A random review was conducted of eight medications in the after hours cart. Seven out of eight medication counts were not accurate.
Deliverables	(b)(5)

Language Access Review - Review Complete

Number of language access records reviewed.	25.00
Number of records where the patient was asked what language they speak.	25.00
Number of records where the patient's primary langauage or languag of choice is documented in their medical record.	25.00
Number of records where the translator use was addressed and documented (interpreter name or number, and language).	1.00
Reasons for why a translator was not used.	Of the 25 charts reviewed, one (1) indicated a translator was used. For the 24 charts were a translator was not used, the reason listed was "provider fluent in patient's native language."
Findings	NO DATA
Deliverables	NO DATA

AMERICAN OVERSIGHT

Language Access Observations - Review Complete

Are the "I Speak" posters and pocket guides readily available and posted in the clinic?	Yes
Does the facility have a process in place to address accessing sign language interpreters and telecommunication (TDD/TTY) for individuals with hearing disabilities?	Yes
Findings	"I Speak" posters are posted in main clinic waiting area but not posted in each exam room. Facility leadership stated they had hardship in securing the "I Speak" posters; HQ will assist in securing these for facility. There is currently no TDD/TTY access at the facility. There is access to sign language interpretors.
Deliverables	NO DATA

AMERICAN OVERSIGHT

Diagnostic Services - Review Complete

Are on-site diagnostic services (laboratory and radiology) certified or licensed to provide those services?	Yes
Is there a procedure manual for each service provided?	Yes
Does each manual include protocols for the calibration of testing devices to ensure accuracy.	Yes
Is there a current certificate for CLIA-waived testing?	Yes
Are all aspects of the CLIA-waived standards addressed by written policy and defined procedures?	Yes
Are invoices from LabCorp or other radiology companies reconciled?	Yes
Are radiation signs posted on all doors leading to areas with radiation producing equipment?	Yes
Are radiation exposure reports reviewed quarterly?	Yes
Are staff seen wearing dosimeter badges while performing radiography services or while working in an area with radiation producing equipment?	Yes
Are staff dosimeter badges and controls stored in a central location and not near a radioactive source?	Yes
Are there safety checks for biomedical and diagnostic equipment?	No - See findings below.
Findings	Last biomedical and diagnostic equipment check was 5/16; facility leadership is fully aware of expiration date and need for annual check; however, they do not currently have any funding to pay for services - they have requested funds to secure safety checks before expiration date but have not yet received funds.
Deliverables	A call was placed to RMU requesting STAT fullfillment of funding request for facility so they could secure safety checks immediately and be up to date. Limited funding drop was completed the following day by HQ and facility is scheduling appointment to rectify deficiency.

Personnel Files - Review Complete

Number of PHS officer personnel files reviewed.	7.00
Number of federal civil service employee personnel files reviewed.	1.00
Number of contractor personnel files reviewed.	17.00
Does the facility have a process for tracking requirements electronically?	Yes
Is the "electronic tracker" up to date and complete?	Yes
Is all current malpractice insurance information for contractors up to date?	N/A - See findings below.
Of all personnel file records reviewed, how many records are for priveleged staff (physician, psychiatrist, psychologist, dentist, and social worker)?	3.00
Of the personnel file records for priveleged staff, how many are current?	3.00
Number of personnel files with current and signed Health and Ability form.	21.00
Number of personnel files with a signed statement of confidentiality (one time).	25.00
Number of personnel files with a signed statement of risks and responsibility (one time).	25.00
Number of personnel files with a signed statement of acknowledgement of understanding of local, national, and residential standards (one time).	25.00
Number of personnel files with a signed release of information form (one time).	25.00
Findings	A lot of outdated forms that still have DIHS present and "Draft" watermarks. Four charts had outdated Health and Ability Forms. HSA was briefed.
Deliverables	None

AMERICAN OVERSIGHT

Credentialing Files- Review Complete

Number of PHS officer credentialing files reviewed.	7.00
Number of federal civil service employee credentialing files reviewed.	1.00
Number of contractor credentialing files reviewed.	17.00
Does the facility have a process for tracking requirements electronically?	Yes
Is the "electronic tracker" up to date and complete?	Yes
Number of credentialing files with health statements.	25.00
Number of credentialing files with current, valid, and unrestricted license.	24.00
Number of credentialing files with license primary source verification.	24.00
Number of credentialing files with documentation of primary education.	24.00
Number of credentialing files with education primary source verification.	24.00
Number of credentialing files reviewed for physicians or psychiatrists.	1.00
Number of physician or psychiatrist credentialing files with documentation of residency.	1.00
Number of credentialing files reviewed for board certified physicians or psychiatrists.	1.00
Number of board certified physician or psychiatrist credentialing files with documentation of board certification.	1.00
Number of credentialing files with a curriculum vitae or resume.	25.00
Number of PHS officer credentialing files with at least two years of evaluations (COERS).	7.00
Number of credentialing files with documented past or pending actions against a practitioner's license.	0.00
Number of credentialing files with current National Provider Data Bank information.	4.00
Number of credentialing files with scope of practice.	20.00
Number of credentialing files with personnel actions (positive or negative).	0.00

AMERICAN OVERSIGHT

Number of credentialing files with positive personnel actions (awards, recommendations, letters of appreciatio, etc).	5.00
Number of credentialing files with negative personnel actions (letter of counseling, etc).	0.00
Number of credentialing files with a competency assessment or peer review.	1.00
Number of peer reviews reviewed.	1.00
Number of peer reviews completed per local policy (clinical performance, appropriate use of resources, technical skills, clinical judgment, performance improvement activites).	1.00
Number of peer reviews with corrective actions.	0.00
Number of peer reviews with corrective actions addressed.	0.00
Findings	El Paso has a GS MRT and her folder was reviewed as part of the random selection.
Deliverables	None

AMERICAN OVERSIGHT

Employee Health Files - Review Complete

Are employee health files kept separate from other files?	Yes
Is access to employee records limited to the compliance officer, HSA, and AHSA(s).	Yes
Is the "electronic tracker" up to date and complete?	Yes
Number of employee health files reviewed.	25.00
Number of employee health files with current TB (PPD or CXR) documentation.	25.00
Number of employee health files with current Hepatitis B vaccination or declination form.	25.00
Number of employee health files with current Ishihara Color Blind test (only required for personnel completing CLIA-waived lab testing).	25.00
Number of employee health files with current respirator medical clearance.	25.00
Number of employee health files with current respirator fit test.	25.00
Number of employee health files with emergency contacts.	25.00
Are employee recorable injuries documented on OSHA Form 301 and OSHA 300 Log?	Yes
Findings	NO DATA

percent of the applicable essential standards must be met. Our findings include: Essential Standards Not in Compliance J-E-06 Oral Care J-E-12 Continuity and Coordination of Care J-E-06 Oral Care (E). Trained RNs complete the oral screening and provide instructions in oral hygiene and preventive oral education during intake. Oral care is timely and it includes immediate access for urgent or painful conditions. The system of established priorities for oral treatment is not limited to extractions. However, the dentist does not complete an oral examination within 12 months of detainees' admission. At the time of the survey, we found that 16 detainees had not received their annual oral screening, and were scheduled to be completed the following week. The standard is·not met. Corrective action is required for Compliance Indicator #3.-An oral examination should be p rformed by a dentist within 12 months of admission. Documentation of corrective action is required in order to verify that oral examinations are being conducted and that they are done in this 12-month time frame. Acceptable documentation includes evidence of necessary policy and procedure changes, including staff training and results of a CQI process study assessing the timeliness of oral examinations for inmates within 12 months of admission. In order to receive accreditation, verification that this standard has been met is required. J-E-06 Oral Care (E). Daily Assignment Sheets - Review Complete

How many daily assignment sheets were reviewed?	10
Of the daily assignment sheets reviewed, how many were archived appropriately?	10
Of the daily assignment sheets reviewed, how many had at least one emergency team identified per shift?	10
Daily Assignment Sheets Findings	Daily Assigment sheet are completed electronically. Therefore, El Paso's archieving process is automatic.
Daily Assignment Sheets Deliverables	No deliverables.

Diagnostic Services - Review Complete

Are laboratory services provided in adherence with CLIA Waived testing?	Yes
Is there a current certificate for CLIA-waived testing?	Yes
Are radiation signs posted on all doors leading to areas with radiation producing equipment?	Yes
	Yes

AMERICAN OVERSIGHT

Is there documentation of a quarterly (monthly for declared pregnancies) review of the dosimetry report by the HSA or Compliance Officer?	
Are staff seen wearing dosimeter badges while performing radiography services or while working in an area with radiation producing equipment?	Yes
Are staff dosimeter badges and controls stored in a central location and not near a radioactive source?	Yes
Diagnostic Services Findings	None
Diagnostic Services Deliverables	None

Emergency Preparedness and Response Observation - Review Complete

Is there documentation showing completed date and time of man-down drills?	Yes
Is there documentation showing completed date and time of fire drills?	Yes
Is there documentation showing completed date and time of mass casualty drills?	Yes
Are clinic staff trained on emergency equipment?	Yes
Do emergency scenarios vary?	Yes
Is it evident that the emergency incident was either an actual event, full drill, or table top exercise?	Yes
Is there a system in place to distribute an after-action report to all staff?	No
Is the contact information for all staff up to date for notification, accountability, or recall purposes prior to, during, or after an emergency event ?	Yes
Emergency Preparedness and Response Findings	1. Man Down and Fire Dirlls are completed per policy with documentation to support. However, the forms used do not clearly identify if the scenario is actual, drill, or table top. 2. Suggested to incorporate suicide scenarios quarterly to ensure staff are aware of how to obtain cutdown tool. 3. Communicates the results of any AAR during shift report. However, not captured in any minutes. Recommendation: Always create documentation to prove you are closing the loop. In this case, capturing the AAR in the monthly staff meetings.
Emergency Preparedness and Response Deliverables	(b)(5)

Environmental Health Observation - Review Complete

	Yes

AMERICAN OVERSIGHT

Are clinic Safety Data Sheets (SDS) files complete, current, and accessible?	
Are hazardous chemicals, including cleaning supplies, labeled and securely stored?	Yes
Are Public Health, Safety, and Preparedness Toolkit checklists maintained locally and documented (with CO/HSA Signatures or designee) to show corrective action with completion date?	No
Do Airborne Isolation and Inspection (AII) rooms requiring transmission based precautions have appropriate signage for the required precaution(s)?	Yes
Is documentation of daily checks on (AII) rooms' negative pressures complete?	Yes
Is the OSHA Form 300A summary completed and posted in clinic from February 1st through April 30th each year?	Yes
Environmental Health Findings	Daily, Weekly, Quarterly PHSP checks are being done. However, Daily PHSP Checklist was not being used. Initiated beginning May 2019 and will be used moving forward.
Environmental Health Deliverables	Daily PHSP Checklist: Produce 3 consecutive days for each month (May, June, and July) for a total of 9 NLY 1 AUG 19.

Grievances - Review Complete

Number of medical grievances reported through QI/JIC/CRCL/DRIL.	18
Is there a local SOP for managing grievances?	No
Is there an identified grievance officer?	Yes
Is there a log book and is it up to date?	Yes
Number of medical grievances that were not addressed in a timely manner.	0
Number of formal grievances.	17
Number of informal grievances.	0
Grievances Findings	Grievance process is solid. Numbers reflecting FY19 to date.
Grievances Deliverables	No deliverables.

Hunger Strike Chart Review - Review Complete

How many of hunger strike records were reviewed?	1
Of the hunger strike records reviewed, how many had with I&O's tracked in the health record?	1
	1

AMERICAN OVERSIGHT

Of the hunger strike records reviewed, how many indicated that the patient was educated on the adverse effects of a hunger strike and education was documented in health record?	
Of the hunger strike records reviewed, how many indicated that the patient was counseled on termination of hunger strike and counseling was documented in health record?	1
Of the hunger strike records reviewed, how many indicated that the patient was evaluated by a mental health provider?	1
Of the hunger strike records reviewed, how many had a complete medical history, orthostatic vital signs, height, weight, urinalysis, mental health evaluation, physical assessment, clinically necessary laboratory tests deemed appropriate, and modification or augmentation of standard treatment protocols when medically indicated during the initial evaluation or refusal form?	1
Of the hunger strike records reviewed, how many had orthostatic vital signs including weight taken every 24 hours?	1
Of the hunger strike records reviewed, how many were discontinued by the Clinical Director, or a physician?	1
Of the hunger strike records that were discontinued, how many indicated that IHSC healthcare personnel offered detainee appropriate follow-up with behavioral health and medical care and offer was documented in patient's chart?	0
Of the hunger strike records reviewed, how many had special needs to include restriction of commissary items?	1
Hunger Strike Records Findings	The detainee arrived to the facility on day 6 of the hunger strike status. The detainee had appropriate care and monitoring; medical, nursing and behavioral health services were conducted. There was one fall-out however. The detainee was not provided an evaluation from a behavioral health provider after the hunger strike was discontinued. The detainee remained in MHU for 4 days post hunger strike status. Detainee left facility 3 weeks after the hunger strike status was discontinued.
Hunger Strike Records Deliverables	No data reported

Hunger Strike Observation - Review Complete

How many patients were on a hunger strike at the time of observation?	0
Of the patients on a hunger strike, how many was water available for?	No data reported
Of the patients on a hunger strike, how many were offered meals?	No data reported
Of the patients on a hunger strike who were offered food, how much food was offered?	No data reported
Of the food offered, how much of the food was eaten?	No data reported
Of the patients on a hunger strike, how many had special needs?	No data reported

AMERICAN OVERSIGHT

Of the special needs patients on a hunger strike, how many records indicated that the needs were addressed?	No data reported
Hunger Strike Encounters Findings	No detainees were on hunger strike at the time of the survey.
Hunger Strike Encounters Deliverables	No detainees were on hunger strike at the time of the survey.

Infectious Disease Prevention - Review Complete

Are hand washing equipment and hand sanitizers available in the clinic?	Yes
Are contact and outbreak investigations documented in the PHSP Unit reporting tool on SharePoint?	Yes
Is hand hygiene monitoring conducted and documented on the quarterly review?	Yes
Infectious Disease Prevention Findings	No findings.
Infectious Disease Prevention Deliverables	No deliverables.

Intake Screen Chart Review - Review Complete

How many intake screen records were reviewed?	25
Of the intake screen records reviewed, how many had detainee identified with at least two detainee identifiers?	25
Of the intake screen records reviewed, how many used a translator?	0
Of the intake screen records that used a translator, how many listed a translator name or ID number ?	0
Of the intake screen records that did not use a translator, how many provide a reason for not using a translator?	25
Of the intake screen records reviewed, how many records had a complete pain assessment using the pain scale indicator?	25
Of the intake screen records reviewed, how many records had a pain scale greater than 0?	0
Of the records with a pain scale greater than 0, how many were assessed?	0
Of the intake screen records reviewed, how many used the eCW Intake Screening template?	25
Of the intake screen records reviewed, how many had clinically significant findings?	4
Of the intake records with clinically significant findings, how many were referred appropriately?	4
Of the intake screen records reviewed, how many were reviewed by an RN or above within 24 hours?	4

AMERICAN OVERSIGHT

Intake Screen Records Findings	Of the 25 Intake screen records reviewed, six (6) of the intakes were completed by a LVN, thus requiring the review of a RN or higher, within 24 hours. Of those 6 intakes, four (4) of them met that requirement. Two (2) did not meet the requirement.
Intake Screen Records Deliverables	No data reported

Intake Screen Observation - Review Complete

How many intake screen encounters were observed?	5
Of the intake screen encounters observed, how many did the nurse review the prescreen and transfer paperwork prior to initiating the intake screening?	5
Of the intake screen encounters observed, how many included a full set of vital signs?	5
Of the intake screen encounters observed, how many used the eCW Intake Screening template?	5
Of the intake screen encounters that used the eCW Intake Screening template, how many were completed appropriately?	5
Of the intake screen encounters observed, how many was the patient was educated on access to care, upcoming PE appointment, and provided the grievance guide?	5
Of the intake screen encounters observed, how many included security advice of special needs and housing disposition?	5
Intake Screen Encounters Findings	RNs completed all observed intake screenings.
Intake Screen Encounters Deliverables	None.

Language Access Chart Review - Review Complete

How many language access records were reviewed?	25
Of the language access records reviewed, how many indicate that patient was asked what language he or she speaks?	25
Of the language access records reviewed, how many document the patient's primary language or language of choice in his or her medical record?	25
Of the language access records reviewed, how many addressed and documented the use of a translator?	2
Of the language access records reviewed, how many did not use a translator?	23
Of the language access records that did not use a translator, how many documented reasons why a translator was not used?	5
Language Access Records Findings	No discrepancies

AMERICAN OVERSIGHT

Language Access Records Deliverables	No recommendations to review

Language Access Observation - Review Complete

Are the "I Speak" posters and pocket guides readily available and posted in the clinic?	Yes
Does the facility have a process in place to address accessing sign language interpreters and telecommunication (TDD/TTY) for individuals with hearing disabilities?	Yes
Language Access Encounter Findings	TDD/TYY located in MHU and the property of custody.
Language Access Encounter Deliverables	No deliverables.

Log Books - Review Complete

How many pharmacy refrigerator temperature logs were reviewed?	15
Of the pharmacy refrigerator temperature logs reviewed, how many have entries per shift for the past three months?	15
Of the pharmacy refrigerator temperature logs reviewed, how many refrigerator temperature logs are out of range?	0
Of the temperature logs that are out of range, how many logs have documentation of action taken and follow-up?	0
Are the sharps secured and the count accurate?	Yes
In review of the past 3 months of sharps counts, are two signatures present for each shift changes?	Yes
Are the narcotics secured with double lock and counts within the last 3 months accurate?	Yes
In review of past 3 months of controlled substance logs, are two signatures present for each shift change on the narcotics counts?	Yes
Are the urgent care cart/trauma bag and AEDs checked daily for content, signatures, AED functionality, and expiration for the past 3 months?	Yes
Log Books Findings	No findings.
Log Books Deliverables	No deliverables.

Medication Administration Observation - Review Complete

Is prepouring occurring?	No
How many medication administrations were observed?	10

AMERICAN OVERSIGHT

Of the medication administrations observed, how many times were nurses adhering to ALL six rights of medication administration?	10
Of the medication administrations observed, how many mouth checks were conducted?	10
Of the medication administrations observed, how many times did nurses document the medication administration immediately after the medication was administered?	10
How many MAR entries were observed?	10
Of the MAR entries observed, how many were complete?	10
Of the MAR entries observed, how many medication refusals were documented?	0
Of the identified medication refusals, how many refusals had accompanying eCW documentation ?	No data reported
Of the identified medication refusals, how many were high-risk medications?	No data reported
Of the identified high-risk medication refusals, how many times were providers notified of the refusal?	No data reported
Medication Administration Findings	At the time of the observation, there were no medication referrals. Pill line nurse was able to answer detainees' questions regarding treatment and follow up.
Medication Administration Deliverables	None.

Meetings - Review Complete

Of the two previous staff meetings, how many were conducted monthly and properly documented?	2
Of the two previous public health, safety, and preparedness meetings, how many were properly documented?	2
Of the two previous quality improvement meetings, how many were conducted quarterly and properly documented?	2
Out of the two previous quarterly ICE/HSA meetings, how many were conducted and properly documented?	0
Meetings Findings	1. Governing Body meeting minutes includes both PHSP-related items and Quality Improvement. PBNDs requires the QA/QI minutes to be seperate. Recommendation: Seperate GB and QI minutes beginning FY19 Q3 2. ICE/HSA meetings (aka Stakeholder's Meeting) are conducted weekly and facilitated by ICE AFOD. AFOD does not take meeting minutes.
Meetings Deliverables	(b)(5)

MHU Full Admission Chart Review - Review Complete

AMERICAN OVERSIGHT

How many MHU full admission records were reviewed?	25
Of the MHU full admission records reviewed, how many had admission encounters?	10
Of the MHU full admission records reviewed, how many had a documented PE within the past year?	18
Of the MHU full admission records without a documented PE, how many received a PE within 24 hours of admission to the MHU?	7
Of the MHU full admission records reviewed, how many had a nursing care plan?	14
Of the MHU full admission records with a nursing care plan, how many records indicate the plan was addressed and reviewed daily?	14
Of the MHU full admission records reviewed, how many had patient education provided daily?	14
Of the MHU full admission records reviewed, how many indicated detainee had an existing mental health diagnosis prior to admission?	4
Of the records that indicate that the detainee had a mental health diagnoses, how many received a mental health reassessment every seven (7) days, or more frequently, if indicated	3
Of the MHU full admission records reviewed, how many records did not have a mental health diagnoses?	21
Of the MHU full admission records without mental health diagnoses, how many records indicate the patient was assessed every 30 days by a MHP?	1
MHU Full Admission Records Findings	One of the 4 mental health admission refused to see mental health. Some admissions (without mental health diagnoses) were less than 30 days and did not require a BHP visit every 30 days.
MHU Full Admission Records Deliverables	No data reported

MHU Full Admission Observation - Review Complete

Are all patients within sight or hearing of a qualified health professional?	Yes
How many nurses are in the MHU full admission at the time of observation?	1
How many patients are in the MHU full admission at the time of observation?	0
How many MHU full admission patients have a 24-hour chart review everyday?	0
Of the MHU full admission records, were 24-hour charts completed appropriately?	No data reported

AMERICAN OVERSIGHT

How many MHU full admission patients have medications?	0
Of the MHU full admissions patients with medicaitons, how many have all medications placed on pill line?	0
MHU Full Admission Encounters Findings	At the time of observation, all MHU patients were discharged leaving zero.
MHU Full Admission Encounters Deliverables	No deliverables

Personnel and Credentialing Files - Review Complete

Does the facility have a process for tracking requirements electronically?	Yes
How many personnel and credentialing files were reviewed?	18
Of personnel and credentialing files reviewed, how many were PHS officers?	5
Of the PHS officer records, how mand had at least two years of evaluations (COERS)?	3
Of personnel and credentialing files reviewed, how many were federal civil service employees?	1
Of personnel and credentialing files reviewed, how many were contractors?	12
Of personnel and credentialing files reviewed, how many records are for privileged staff?	7
Of the privileged staff records reviewed, how many were Licensed Independent Practitioners (LIPs)?	5
Of the LIP staff records reviewed, how many had personnel files records current?	5
Of the LIP staff records reviewed, how many had a competency assessment or peer review?	5
Of personnel and credentialing files reviewed, how many contained a current and signed Health and Ability form?	18
Of personnel and credentialing files reviewed, how many contained a signed statement of confidentiality?	18
Of personnel and credentialing files reviewed, how many contained a signed statement of risks and responsibility?	18
Of personnel and credentialing files reviewed, how many contained a signed statement of acknowledgement of understanding of local, national, and residential standards?	18
Of personnel and credentialing files reviewed, how many contained a signed release of information form?	18
Of personnel and credentialing files reviewed, how many contained current, valid, and unrestricted license?	15
	15

AMERICAN OVERSIGHT

Of personnel and credentialing files reviewed, how many contained documentation of primary education , license primary source, and annual verification?	
Of personnel and credentialing files reviewed, how many were reviewed for physicians or psychiatrists?	1
Of the physician or psychiatrist records, how many had documentation of residency?	1
Of the physician or psychiatrist records, how many were board certified?	1
Of the board certified physicians and psychiatrists, how many had documentation of board certification?	1
Of personnel and credentialing files reviewed, how many had a copy of a curriculum vitae or a resume?	18
Of personnel and credentialing files reviewed, how many had current National Provider Data Bank information?	8
Personnel and Credentialing Files Findings	All files were organized and uniformed. Reviewer needed AA to navigate the multiple folders (personnel, credentialing, health, training) as conflicting /contradicting information has been provided by HQ over the years. However, the upcoming plan of HQ retaining credentialing files for all field staff will prove to be beneficial and provide much needed uniformity and guidance for the field.
Personnel and Credentialing Files Deliverables	No deliverables.

Physical Exam Chart Review - Review Complete

How many physical exam charts were reviewed?	25
Of the physical exam charts reviewed, how many used language services?	2
Of the physical examinations that used language services, how many contained identification of the translator or interpreter?	2
Of the physical exam charts reviewed, how many were for juveniles?	0
Of the juvenile physical exam charts reviewed, how many were completed within 7 days of arrival to the facility?	0
Of the physical exam charts reviewed, how many were for adults?	25
Of the adult physical exam charts reviewed, how many PE-S's were completed within 14 days of arrival to the facility?	13
Of the physical exam charts reviewed, how many had a pain assessment?	25
Of the physical exam charts with pain assessment, how many were addressed ?	25
Of the physical exam charts reviewed, how many were reviewed by an MD? PE-C within 7 days.	9

AMERICAN OVERSIGHT

Of the physical exam charts reviewed, how many were reviewed by an MD? PE-S within 14 days.	13
Of the physical exam charts reviewed, how many were for adult females?	7
Of the adult female physical exam charts reviewed, how many had a record of the last menstrual cycle?	7
Of the adult female physical exam charts reviewed, how many had a record with a pap test offered?	0
Of the adult female physical exam charts reviewed, how many had a record where a pap test was not indicated?	25
Physical Exam Records Findings	None.
Physical Exam Records Deliverables	None.

Physical Exam Observation - Review Complete

How many physical exam encounters were observed?	8
Of the physical exam encounters observed, how many included a full set of vital signs?	8
Of the physical exam encounters observed, how many were completed within the specified timeframe?	8
Of the physical exam encounters observed, how many included a detainee request for a chaperone?	8
Of the physical exam encounters observed, how many had an abnormal vital sign?	2
Of the physical examination encounters observed with an abnormal vital sign, how many were addressed and/or referred to a higher level of care?	2
Of the physical exam encounters observed, how many indicated that a Snellen test was conducted during the examination?	8
Of the physical exam encounters observed, how many were properly designated as either PE-Complex or PE-Simple in accordance with the IHSC Directive on Health Assessments?	8
Of the physical examination encounters observed, how many were referred to the next level of care as directed by IHSC policy?	2
Physical Exam Encounters Findings	The team had good communication with the detainees. They took the time to explain things and to inform the detainee what to expect.
Physical Exam Encounters Deliverables	None.

Prescreen Observation - Review Complete

How many prescreen encounters were observed?	7

AMERICAN OVERSIGHT

Of the prescreen encounters observed, are language services being used during prescreen if appropriate?	Yes
Of the prescreen encounters observed, how many prescreen encounters had documentation completed in eCW prior to intake screening?	7
Of the prescreen encounters observed, how many prescreening encounters were prioritized to level one when clinically indicated based on self-reported history or objective findings?	1
Prescreen Encounters Findings	None
Prescreen Encounters Deliverables	None

Risk Management - Review Complete

Trends	No data reported
Number of active Root Cause Analyses(RCA)/Sequence of Events (SOE).	0
Number of RCAs or SOEs completed during the last six (6) months.	0
Number of corrective actions generated from RCAs or SOEs during the last six (6) months.	0
List all corrective actions identified in the preceding field and note their status and due dates.	N/A
Risk Management Findings	No RCAs/SoEs, or CAPs for FY18 to present.
Risk Management Deliverables	No deliverables.

Schedules - Review Complete

How many schedules were reviewed?	5
Of the schedules reviewed, how many had a legend to explain codes?	5
Of the schedules reviewed, how many had staff assigned "40 hours per week" per scheduling period?	5
Of the schedules reviewed, how many had provider coverage on weekend/holidays?	5
Of the schedules reviewed, how many had actual work hours reflected for non-traditional shifts?	5
Are there signed approvals for non-traditional shifts?	Yes
Is there a PDF copy each time a change was made to the schedule?	Yes
Schedules Findings	1. Non-shift approval request is due for renewal. Recommendation: Have the CC and NM collaborate to ensure all potential non-core

AMERICAN OVERSIGHT
DHS-ICE-20-0618-A-000779

3/26/2020

	shifts are requested. Send to HSA for concurrence. If HSA is in agreement, forward to RHSA for final approval. 2. PDF copies are made daily regardless of changes
Schedules Deliverables	No deliverables.

Segregation Chart Review - Review Complete

How many segregation records were reviewed?	25
Of the segregation records reviewed, how many indicate the patient was medically cleared for segregation?	24
Of the segregation records reviewed, how many indicate if daily segregation rounds by nursing are documented ?	21
Of the segregation records reviewed, how many offered the patient daily sick-call services?	25
Of the sick call services offered, how many were documented and noted whether patient accepted or denied sick call services?	25
Of the segregation records reviewed, how many patients had no history of a mental health diagnosis or mental health status was evaluated at least every 30 days?	22
Of the segregation records reviewed, how many patients had a history of a mental health diagnosis?	3
Of the patients with a mental health diagnosis, how many were seen weekly by Mental Health?	3
Segregation Records Findings	5 charts were missing one day of seg rounds (most were noted to be on 2/19/19). One note did not have a seg clearance noted.
Segregation Records Deliverables	No data reported

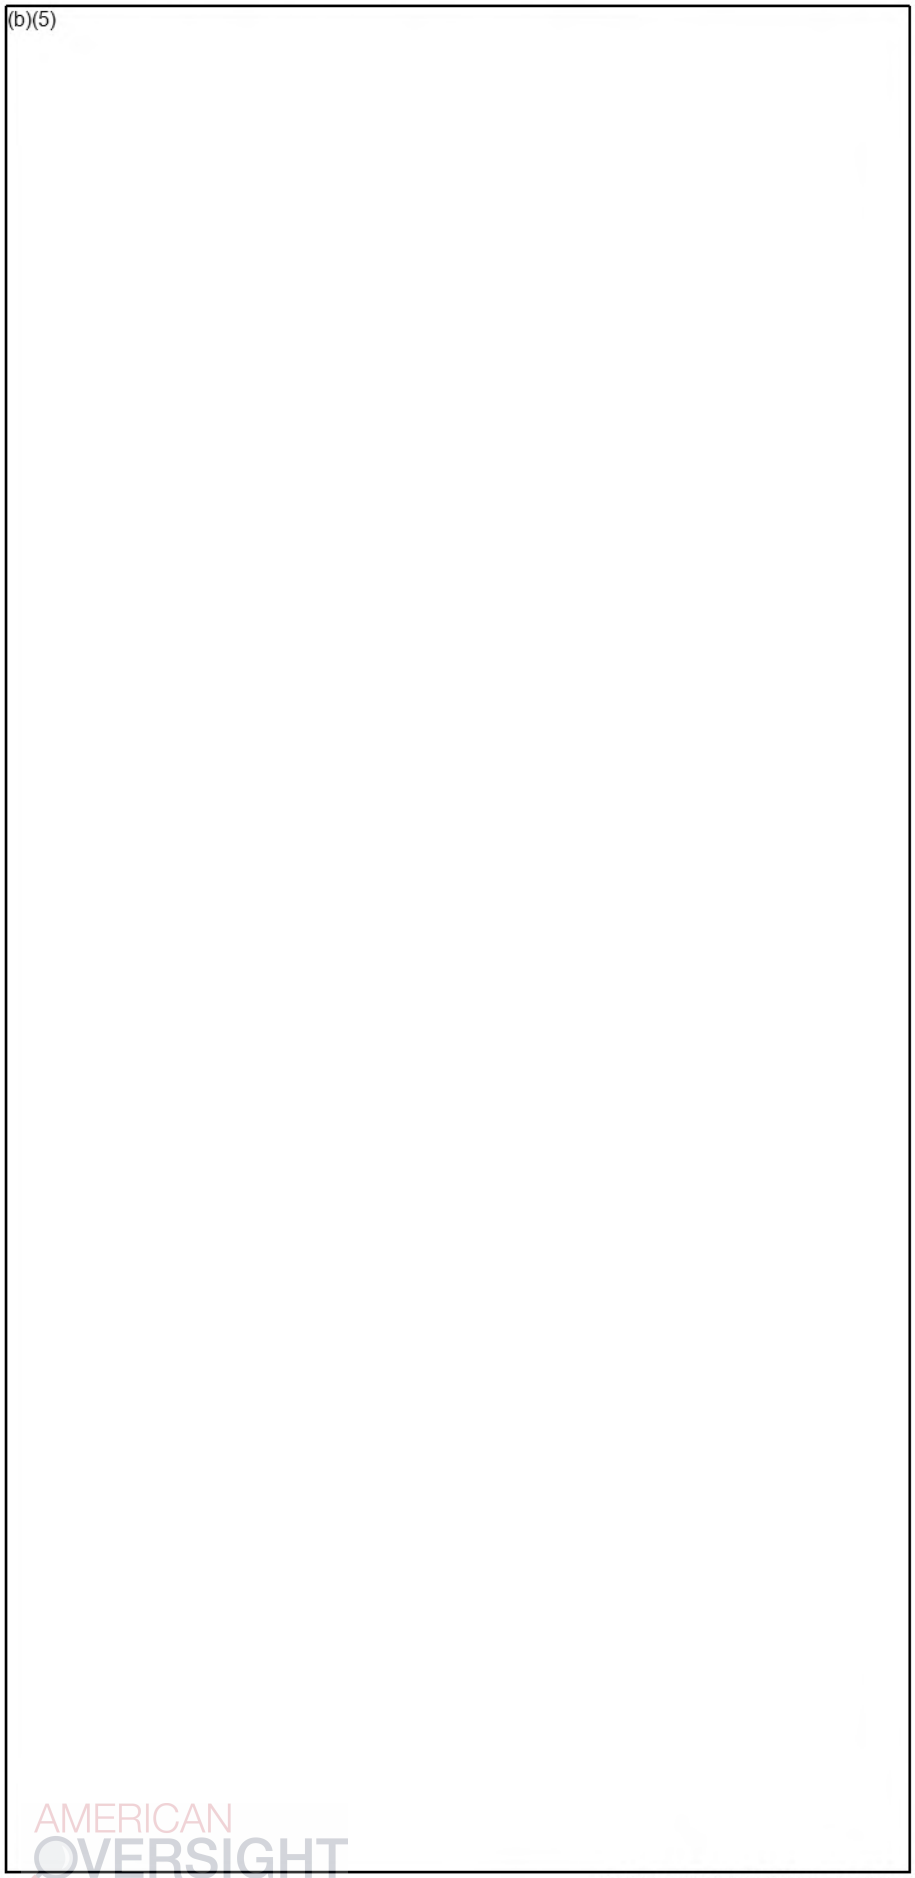
Segregation Observation - Review Complete

How many patients in segregation were observed in MHU full admission for medical overflow?	0
Of the patients in segregation observed in MHU full admission for medical overflow, how many records indicate that the patients were rounded on according to MHU policy?	0
Were sick call services offered to detainees in segregation or other specialty housing units?	No data reported
Segregation Encounters Findings	No patients in Seg at the time of observation.
Segregation Encounters Deliverables	N/A

Shift Report and Time Cards - Review Complete

AMERICAN OVERSIGHT

Are shift reports conducted?	Yes
Is there at least one representative from each department?	Yes
Are written changes verified (initials, signature) on time cards by the HSA or AHSA(s)?	No
Shift Report and Time Cards Findings	Not many changes are noted on the time cards. Recommendation: Con Coordinator or GTM to provide initials when changes are made. Reminded Con Coordinator & GTMs that time card is a legal document.
Shift Report and Time Cards Deliverables	No deliverables.

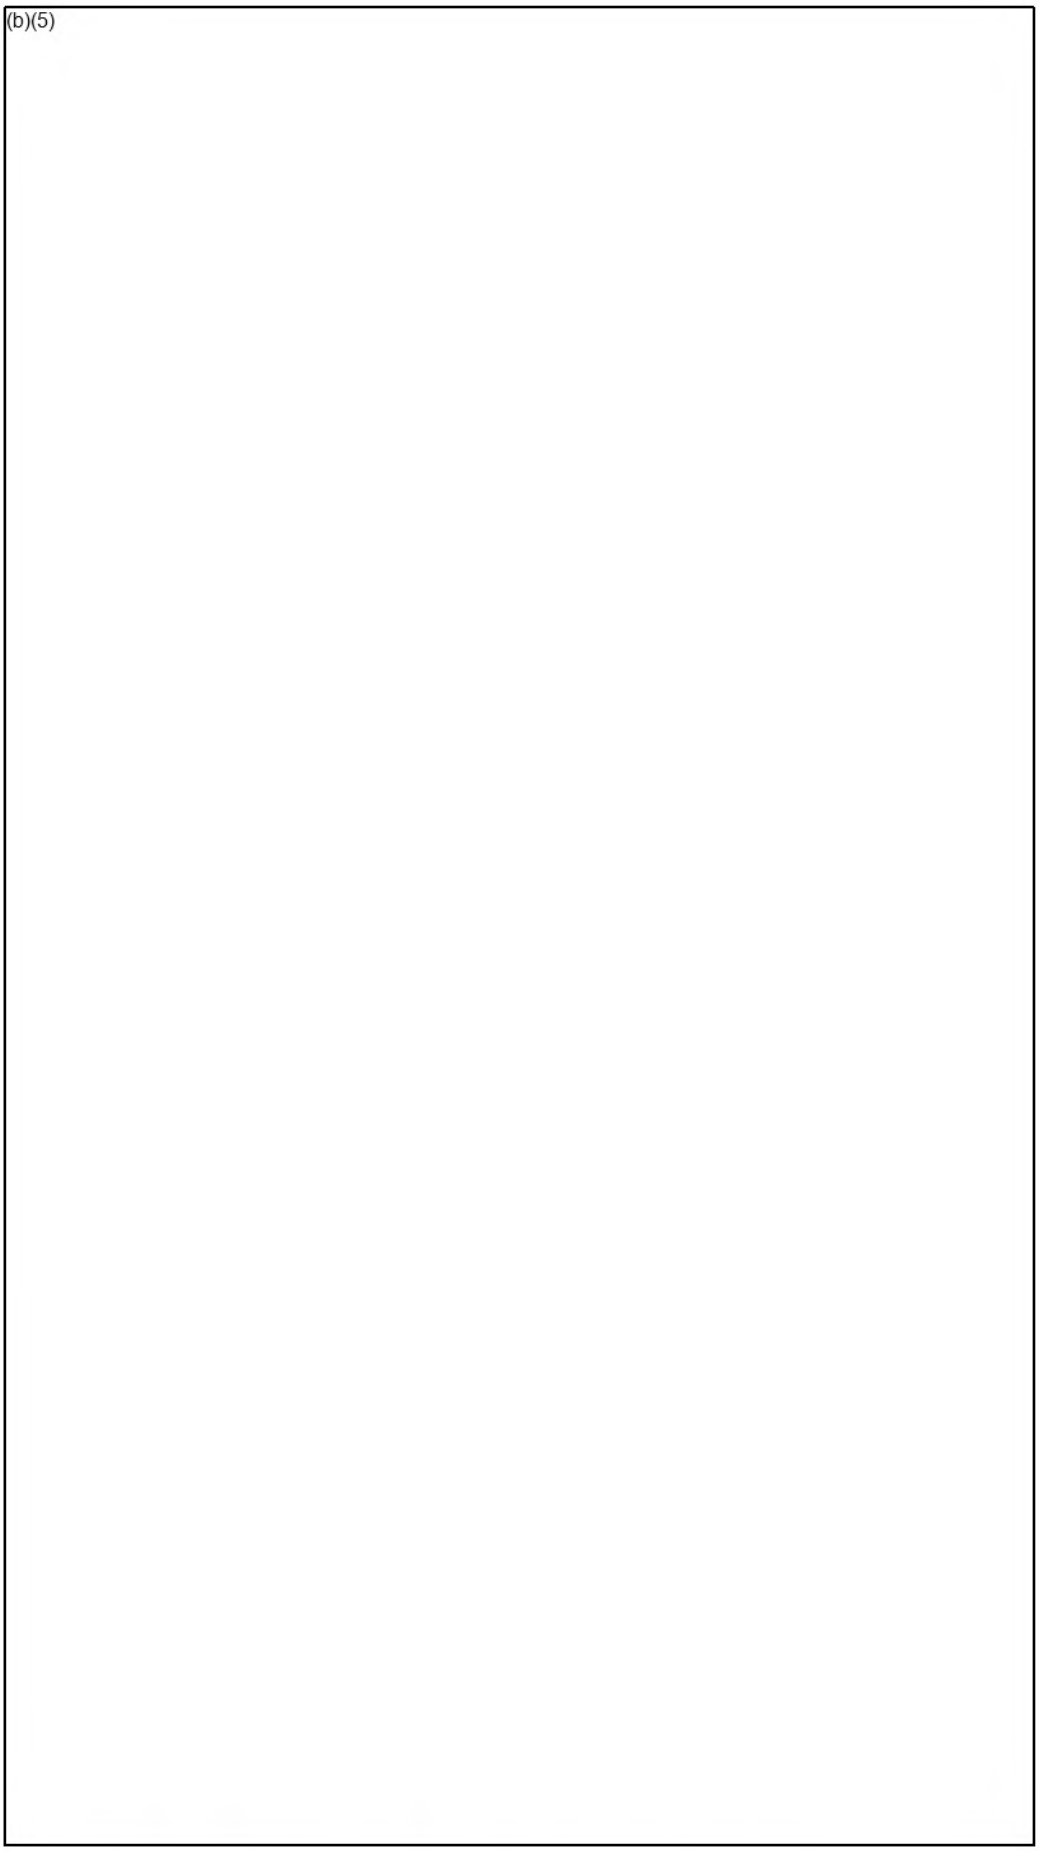


Sick Call Chart Review - Review Complete

How many sick call records were reviewed?	25
Of the sick call records reviewed, how many were the third time that the patient complained about the same issue?	2
Of the sick call records where the encounter was the third time that the patient has complained about the same issue, how many were referred to a provider?	2
Of the sick call records reviewed, how many included a full set of vital signs?	24
Of the sick call records reviewed, how many had a pain scale greater than 0?	20
Of the sick call records with a pain scale greater than 0, how many indicated that the pain was addressed?	20
Of the sick call records reviewed, how many included nursing protocols/guidelines referenced by name in the documentation?	18
Of the sick call records reviewed, how many included the reason documented in the "Reason" field?	24
Of the sick call records reviewed, how many had the reason for visit from an approved category?	25
Of the sick call records reviewed, how many were addressed by a nurse?	25
Of the sick call records addressed by a nurse, how many followed the SOAP format of documentation with appropriate nursing diagnosis?	25
Does the facility have a defined process in place addressing sick call services?	No data reported
Sick Call Records Findings	1) 7 of the 25 charts did not reference a RN guideline by name; "2008 rn guideline" was documented in several of the charts and others did not document/mention the RN guideline at all; otherwise good sick call documentation and referral to a provider as per RN sick call policy 2) Only 1 chart did not have a full set of vitals
Sick Call Records Deliverables	No data reported

AMERICAN OVERSIGHT

Staffing Information - Review Complete



(b)(5)

(b)(5)

Suicide Watch Chart Review - Review Complete

AMERICAN OVERSIGHT

2020-ICFO-29037 1783 of 2966

(b)(7)(E)

How many suicide watch records were reviewed?	
Of the suicide watch records, how many had a patient evaluated for suicide risk by a mental health profession or physician within 24 hours of being placed on suicide?	3
Of the suicide watch records, how many had a patient assessed to determine if a suicide smock was medically indicated via a Special Needs form?	3
Of the suicide watch records, how many had the need for finger food annotated via a Special Needs form?	2
Of the suicide watch records, how many had a daily mental health assessment conducted and documented by a mental health or mid-level provider?	2
Of the suicide watch records, how many had a patient released from suicide watch?	3
Of the suicide watch records, how many had a patient released from suicide watch by a mental health provider or physician?	3
Of the suicide watch records, how many had a suicide risk assessment conducted prior to release from suicide watch?	3
Of the suicide watch records, how many had checks conducted and documented at least every eight hours by clinical staff?	1
Of the suicide watch records, how many had checks conducted and documented at least every 15 minutes by custody staff?	0
Suicide Watch Pre-Audit Findings	Evening/night shift exceeded 8 hour documentation in eCW. 2 charts could not access special needs. Zero noted as to custody staff documenting 15 minute checks due to inproper filling in of form and duplicate forms for same day. 15 minute blocks were filled, but not correctly.
Suicide Watch Pre-Audit Deliverables	Comments on Excel sheet (b)(7)(E) Observation checklist 1/15 missing in scanned documents. 1/16 with year illegible, old checklist used with predetermined times. 1/16 CDO "MO" documented 179- unsure what that is, does not match options, CDO "MV" also documented 79- unknown option. (b)(7)(E) observation checkllist with initials only, no codes, duplicate days with different information. (b)(7)(E) missing signature with initials (NN) , "DO" are putting their id numbers with codes which makes it difficult to understand. Facility really just needs to educate their custody staff on how to use form and fill out properly. "DO" is deportation officer at many facilities, however custody staff appear to use same abbrevaition to designate themselves.

Suicide Watch Observation - Review Complete

How many patients are on suicide watch?	0
Of the patients on suicide watch, how many have a nursing assessment performed within the past 8 hours?	0
	0

AMERICAN OVERSIGHT

Of the patients on suicide watch, how many have 15 minute checks being performed on a staggered schedule?	
Of the patients on suicide watch, how many have an assessment by a mental health or mid-level provider within the last 24 hours?	0
Of the patients on suicide watch, how many have a restrictive environment compliant with current orders?	0
Suicide Watch Encounters Findings	There were not any detainee on suicide watch at the time of the observation.
Suicide Watch Encounters Deliverables	None.

Training - Review Complete

How many training folders were reviewed?	18
Of the training folders reviewed, how many had a HSD-500?	18
Of the training folders reviewed, how many had a signed position description ?	18
Of the training folders reviewed, how many were registered nurse training folders?	4
Of the registered nurse training folders reviewed, how many documented RN Physical Exam Training?	4
Of the training folders reviewed, how many had continuing medical education credits documented?	No data reported
Training Findings	Continuing education documentation is not consistantly located in the same place due to conflicting infomration provided by HQ (maintaining multiple files/person). Credentialing system pending HQ modification. Therefore, no deliverables will be requested from the site until the HQ transition has occurred and process re-evaluated.
Training Deliverables	No deliverables.

Transfer Summary Chart Review - Review Complete

How many transfers were reviewed?	25
Of the transfers reviewed, how many outgoing transfers were authenticated appropriately (signed, stamped, and dated)?	25
Of the transfers observed, how many outgoing transfers were completed by an LVN or above?	25
Of the transfer summary records reviewed for TB status, how many correctly documented no TB treatment status?	3
Of the transfer summary records reviewed for TB status, how many incorrectly documented no TB treatment status? (TB meds listed??)	0

AMERICAN OVERSIGHT

Of the transfer summary records reviewed for TB status, how many correctly documented TB treatment status?	2
Of the transfer summary records reviewed for TB status, how many incorrectly documented TB treatment status? (Taking TB meds)	1
Transfers Findings	TB Findings: 2 out of 7 charts was correct for all areas. 1 out of 7 charts had incorrect information and 4 out of 7 TB charts did not have a transfer summary completed when the detainee left the facility, so an audit of the TB Transfer Summary could not be completed. General Transfer: No findings identified for general transfers. Four (4)out of 25 detainees had chronic medications. All four (4) were listed and labeled appropiately
Transfers Deliverables	No data reported
Of the transfer summaries reviewed, how many listed the detainee's chronic medical conditions appropriately?	25
Of the transfer summaries reviewed, how many had "clear medication instructions" documented appropriately?	4

Workforce Health Files - Review Complete

Are workforce health files kept separate from other files?	Yes
Is access to staff records limited to the compliance officer, HSA, and AHSA(s) and AA?	Yes
How many workforce health files were reviewed?	18
Of the twelve workforce health files reviewed, how many had past year's TB (PPD or CXR) documentation?	18
Of the twelve workforce health files reviewed, how many had a Hepatitis B vaccination or declination form?	18
Of the twelve workforce health files reviewed, how many had a yearly Ishihara Color Blind test?	18
Of the twelve workforce health files reviewed, how many had a yearly respirator medical clearance?	18
Of the twelve workforce health files reviewed, how many had a yearly respirator fit test?	18
Of the twelve workforce health files reviewed, how many had emergency contacts?	18
Are staff recordable injuries documented on Workforce Injury Tool?	Yes
Workforce Health Files Findings	No findings.
Workforce Health Files Deliverables	No deliverables.

AMERICAN OVERSIGHT

DIAGNOSTIC SERVICES AND SPECIALTY CARE ACCESS

DATE 09/19/2017 REVIEWER (b)(6); (b)(7)(C)

FACILITY REVIEWED Imperial Regional Detention Facility

Purpose: To assess timeliness of off-site diagnostic services and specialty care.

Source: Referrals log, medical records or MedPars

Sample: 10 specialty patients chosen by acuity or risk of harm if access is delayed, particularly in specialties where timely access has been a problem for detainees in this facility.

Item # Measure

1. Was there a documented time urgency included on the order for specialty care or diagnostic services?
2. Was the appointment accomplished within 45 days of the order or within the ordered timeframe, e.g., "return in 90 days"?
3. Was the patient re-evaluated for deterioration every 30 days until off-site service completed?
4. Did the facility clinician acknowledge the specialist's report in the medical record within 7 days of the date the service was performed?

EVALUATION OF CARE PRIOR TO EMERGENCY DEPARTMENT/HOSPITAL VISIT FOR CONDITIONS SENSITIVE TO AMBULATORY CARE

DATE 3/6/2017 REVIEWER (b)(6); (b)(7)(C)

FACILITY REVIEWED Imperial Regional Detention Facility

Purpose: To determine whether earlier intervention might have prevented morbidity and cost of outside care. To measure continuity and coordination of care for inbound patients.

Source: Emergency Department (ED) logs.

Sample: Within the past 6 months, 10 patients sent to ED with ambulatory sensitive conditions, such as seizure, alcohol and/or substance withdrawal, skin or deep tissue infections, DKA, abdominal pain, or chest pain.

Item # Measure

1. Is there an outbound progress note?
2. *Is there evidence that earlier intervention might have prevented deterioration to the point of need for ED/hospital care? If yes, please describe in the narrative portion of the report.
3. Is there discharge documentation from the hospital or ED in the chart?
4. Is there an inbound assessment?
5. Does the assessment reflect hospital findings and concurrence or deviation from hospital recommendations?

HEALTH ASSESSMENT

DATE 3/6/2016 REVIEWER (b)(6); (b)(7)(C)

FACILITY REVIEWED Imperial Regional Detention Facility

Purpose: To determine compliance with detention standards to assure continuity and coordination of care for serious medical needs.

Source: Detainees arriving during recent period, at least 2 weeks prior to review, to allow for evaluation of timely follow-up.

Sample: 20 medical records chosen at random.

Item # Measure

1. Initial screen complete within 12 hours of booking?
2. PPD placed during medical screening and read within 48-72 hours, or chest x-ray is taken, or if PPD is positive by history, chest x-ray is ordered and read?
3. Are detainees who screen positive for mental illness or suicide risk referred for evaluation?
4. Is there timely follow-up for significant findings of acute and chronic conditions?*
5. Is there a complete health evaluation? Vital signs, adequate medical and behavioral health history, physical examination by licensed MD/PA/NP/RN within 14 days of booking? Patients with HIV, diabetes, dialysis, asthma (on daily meds), and other chronic illness will be seen within 48 hours or addressed by phone and seen on the next business day.

MEDICAL RECORDKEEPING PRACTICES

DATE 3/6/2017 REVIEWER (b)(6); (b)(7)(C)

FACILITY REVIEWED Imperial Regional Detention Facility

Instructions: For all answers that are "partial compliance" or "non-compliant", the reviewer should insert a comment in the narrative section of the report. For example, if most of the progress notes are legible, but one or two practitioner's notes are barely legible, the appropriate comment would be "Dr. XX's notes are not legible."

Sample: Ten records of detainees with chronic disease; two worksheets are required for this audit

MEDICATION ADMINISTRATION PRACTICES

DATE 3/10/2017 REVIEWER (b)(6); (b)(7)(C)

FACILITY REVIEWED Imperial Regional Detention Facility

Purpose: To assess continuity of ordered care and notification to clinician of poor adherence to medication orders.

Source: MARS.

Sample: MAR and medical record for 10 patients. Medication refusals and/or no shows are defined as those instances in which a patient refuses medications on 3 consecutive days or for 3 consecutive doses and /or 4 or more doses in a week.

1 Does facility have a policy in place stating which medications, if missed a certain number of consecutive doses, require provider notification and/or follow-up? YES
2 Based on review of current month MARs or previous month's MARs, if available, what percentage of MARs that have either blanks, consecutive refusals, or no shows on the MARs? not av
3 In the medical record filing area, how many months of MARs are unfiled, not counting unfiled MARs within 14 days of the end of the previous month? 0
4 Estimate the percentage of patients on self-administered medication ordered by a provider. 50%
5 OTCs provided by medical, commissary or both? Both

Item # Measure

1 What is the number of refusals and/or no shows during the previous month for each patient?
2 Is there documentation in the medical record that the prescribing clinician was notified of consecutive refusals?
3 Was there an appropriate response from the clinician (i.e., was the patient interviewed or was the prescription changed or discontinued?)

Medical Care

☐ Compliant Non-Compliant with: ☒ 1 – 2 Standards ☐ 3 Standards ☐ >3 Standards

Description of deficiencies:

No new medical care deficiencies found during this site visit.

Continued deficiency finding:
PBNDS 2011: 4.3 Medical Care, B. Designation of Authority; Health care personnel perform duties within their scope of practice for which they are credentialed by training, licensure, certification, job description, and/or written standing or direct orders by personnel authorized by law to give such orders.

-Two of ten (20%) charts had upon intake, nurses continuing previously prescribed medications from other facilities without receiving orders from a mid-level provider or physician at the facility to continue the medication. The detainee's medications that they arrive to the facility with are placed on pill line (except for inhalers). Only medications that are labeled appropriately in separate bottles/blister packs are continued until re-ordered by the facility provider. The provider co-signs the order usually within 24 hours. (Outside RN scope of practice)

Resolved findings:
-20 of 20 (100%) had a complete health examination including vital signs, adequate medical and behavioral health history, and physical examination by licensed MD/PA/NP/RN within 14 days of booking or within 48 hours if on daily medications or have a chronic illness.

-OHU medical housing had a separate section in the medical chart in ten out of ten (100%) charts reviewed.

Previous Site Visit March 2017:

AMERICAN OVERSIGHT

-Upon intake, nurses continue prescribed medications without first consulting or getting approval from a mid-level or MD to continue the medication. (Outside RN scope of practice)

19 of 20 (95%) had a complete health examination including vital signs, adequate medical and behavioral health history, and physical examination by licensed MD/PA/NP/RN within 14 days of booking or within 48 hours if on daily medications or have a chronic illness. (PBNDS 2011)

-OHU medical housing had a separate section designated in the medical chart in nine out of ten (90%) charts reviewed. (PBNDS 2011)

Chronic Care *Enter all detainees with chronic conditions on the IGSA/CDF chronic care tracking sheet and submit with report.*

Total number with chronic conditions:	Total number with unstable chronic conditions:
60	0

☒ Compliant Non-Compliant with: ☐ 1 – 2 Standards ☐ 3 Standards ☐ >3 Standards

Description of deficiencies:
No current deficiencies noted.

Previous Site Visit March 2017:
No deficiencies.

Hunger Strike

Total number on active hunger strike:	Total number of hunger strikes in last 12 months:
0	5

☒ Compliant Non-Compliant with: ☐ 1 – 2 Standards ☐ 3 Standards ☐ >3 Standards

Description of deficiencies:
Three hunger strikes charts were available to review. All medical staff are current on hunger strike training. No deficiencies were noted.

At time of review, the clinical director will not compose a declaration for a force feed court order and will not provide orders for an involuntary force feed within the IRDF facility.

Previous Site Visit March 2017:
No hunger strike charts available to review.

AMERICAN OVERSIGHT

Suicide Prevention and Intervention

Total number on suicide watch:	Total number of suicide watches in last 12 months:
0	44

☒ Compliant Non-Compliant with: ☐ 1 – 2 Standards ☐ 3 Standards ☐ >3 Standards

Description of deficiencies:

Reviewed 10 medical records. Detainees are placed in a secure one-to-one observation status in a fully modified cell in the observation housing unit (OHU) when a suicidal ideation or attempt is made. Detainees are followed up by a qualified behavioral health provider at least every 24 hours while on suicide watch.

The facility has one designated suicide watch room, which has been modified to be without structures that could aid in self-harm. If a second detainee requires a 1:1 suicide watch, they are sent to Alvarado Parkway Institute, an inpatient psychiatric hospital, when appropriate.

Previous Site Visit March 2017:
No deficiencies noted.

Terminal Illness, Advance Directives, and Death

Total number of active DNR cases:	Total number of deaths in last 12 months:
0	0

☒ Compliant Non-Compliant with: ☐ 1 – 2 Standards ☐ 3 Standards ☐ >3 Standards

Description of deficiencies:

There have been no reported deaths, detainees with terminal illness, or detainees with advance directives within the last 12 months.

Previous Site Visit March 2017:
No deficiencies noted.

Other Observations

IHSC FMC Site Visit September 18-22, 2017. The facility transitioned to PBNDS 2016 revisions on June 1, 2017.

47 total charts reviewed.

Facility Data:
Imperial Regional Detention facility is a dedicated IGSA with MTC as the contractor for both security and medical personnel.
The average length of stay is 88 days.

In the observation housing unit (OHU) located in the medical department there are six negative pressure rooms, one designated suicide watch room, and seven non-negative pressure rooms. There is a desk within sound of the OHU rooms where a security staff member is posted. The officer posted there conducts visual rounds no less than every 30 minutes, and more frequently, as the provider orders.

Staffing-

(b)(7)(E)

AMERICAN OVERSIGHT

(b)(7)(E)

Deficiencies for Areas Evaluated

Deficiencies are resolved when findings are 100%.

Two of ten (20%) charts had upon intake, nurses continue previously prescribed medications from other facilities without first consulting and getting approval from a mid-level or MD to continue the medication. (Outside RN scope of practice)

Audit Tool findings (not deficiencies):

In one out of five charts with a diagnosis of diabetes reviewed, a blood sugar was not measured at the intake screening though the diagnosis of diabetes was noted. (Quality of Care)

A documented time urgency is not consistently included on the order for specialty care or diagnostic services. (Quality of care)

In three of ten charts reviewed for laboratory testing, there was not documentation showing the patient was advised of their laboratory results. (Quality of care)

There is no annual dental refresher training for nursing staff for RN physical exams and dental sick call evaluations. (Quality of care)

AMERICAN OVERSIGHT

Suicide Screening

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Ten of ten (100%) charts reviewed had the suicidal patient evaluated by a mental health professional within 24 hours of identification or immediately if the situation was emergent, and the patient was evaluated daily while on suicide watch by a qualified mental health professional. Constant 1:1 monitoring was practiced while the patient was on suicide watch in all ten charts reviewed. Zero of ten (0%) charts had evidence that earlier intervention might have prevented deterioration to the point of need for a suicide watch. Documentation that the checks were documented consistently were not available in the medical charts to review. The constant 1:1 documentation of checks are stored in the custody files and were not available to be reviewed at time of the site visit.

Additional Comments:
In the previous three months, 15 patients were placed on suicide watch at the facility and four patients were sent to Alvarado Parkway Institute (API) inpatient psychiatric hospital for suicidality.

The facility uses an acceptable suicide risk management screening tool during the intake screening that asks for history of suicide attempts and current suicidal ideation. Training logs indicate that all screeners and staff in direct contact with detainees are trained to assess suicide risk.

Previous Site Visit March 2017:
All findings met 100% audit tool criteria.

Health Assessment

20 charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. 20 of 20 (100%) charts had the initial screen completed within 12 hours of booking and had a complete health examination including vital signs, adequate medical and behavioral health history, and physical examination by licensed MD/PA/NP/RN within 14 days of booking or within 48 hours if on daily medications or chronic illness was noted. 18 of 18 (100%) charts had a chest x-ray ordered and read. Three of three (100%) charts of detainees who screened positive for mental illness or suicide risk were referred for evaluation. 16 of 16 (100%) charts had timely follow-up for significant findings of acute and chronic conditions.

Additional Comments:
In 20 charts reviewed, none were noted to have PPDs placed during intake as chest x-rays are performed. Two charts had a negative chest x-ray result within six months from a previous housing facility.

Previous Site Visit March 2017:
Findings met audit tool criteria except one chart reviewed with a hypertension diagnosis did not have a complete health examination within 48 hours.

Urgent Care (Sick Call)

Three charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Three of three (100%) charts had timely and appropriate evaluation by nursing staff, care was delivered within the scope of the nurse's license, vital signs were documented, a nursing referral to a MD/PA/NP/DMD submitted within 24 hours where appropriate, and if referred, an MD/PA/NP/DMD assessment and plan documented.

Additional Comments:
Only three charts were available to review that contained an urgent care visit for a potentially serious complaint that occurred one to three weeks prior to review.

All telephone orders documented by the RN were co-signed by the ordering provider.

Previous Site Visit March 2017:
All findings met 100% audit tool criteria.

Evaluation of Care Provider to ED/Hospital Visit for Conditions Sensitive to Ambulatory Care

AMERICAN OVERSIGHT

Four charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Four of four (100%) charts had an outbound progress note, discharge documentation from the hospital or emergency room in the chart, had an inbound assessment, and had assessments that reflect hospital findings and concurrence with hospital recommendations. Zero of four (0%) charts had evidence that earlier intervention might have prevented deterioration to the point of need for hospital care.

Previous Site Visit March 2017:
All findings met 100% audit tool criteria. No charts reviewed had evidence that earlier intervention would have prevented the need for emergency care.

Medication Administration Practices

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Four of four (100%) charts had documentation that the prescribing clinician was notified of consecutive refusals and there was an appropriate response from the clinician.

Additional Comments:

The facility uses MTC medical policy "Pharmaceutical Management" No. 904E.128FNI which states "Detainees who are on direct observation therapy and refuse medication three consecutive times will be placed on chart review for the medical provider. Upon review the medical provider will determine if medication will be continued, detainee will be seen or medication will be discontinued. Medications for the following conditions will be placed on for review after only one refusal, TB and HIV."

All previous months of MARs were filed in the record filing area. Over the counter medications are provided by both the medical department and can be purchased from the commissary. The current and previous month of MARs was not available to review the percentage that have blanks, consecutive refusals, or no shows.

40% of patients are on self-administered medication, also called keep on person (KOP) medication. This percentage dropped from 50% provider ordered KOP medication during the previous review. MTC Corporate has recommended that NSAIDS (non-steroidal anti-inflammatory drugs) are only to be administered via pill line for for a maximum of 10 doses ordered at one time.

Previous Site Visit March 2017:
All findings met 100% audit tool criteria. 50% of patients were on self-administered medication.

AMERICAN OVERSIGHT

Continuity of Medication

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Ten of ten (100%) charts had the period of time from completion of intake screening to the ordering of medications [by a provider with medication prescribing privileges] less than 24 hours, and had a less than 24 hour period of time from the order to first dose of medication.

Additional Comments:
Though all findings meet the audit tool criteria, two charts of ten (20%) reviewed had the nurse continuing medications from intake without a IRDF provider order. This is outside the RN scope of practice. No MTC medical policy was available to review that allows this process.

Previous Site Visit March 2017:
Three of ten charts had the Registered Nurse (RN) continuing medication at intake listed on the transfer summary without a MD/NP at IRDF providing a medication order. No IRDF policy was given to the FMC that included a standing order to continue previously prescribed medication at intake without a facility provider order.

Mental Health Screen

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Five of five (100%) charts of detainees with positive screens for mental illness were evaluated by mental health professionals in a timely manner (emergent= immediately, urgent= within 24 hours; routine= within 7 days).

Previous Site Visit March 2017:
All findings met 100% audit tool criteria.

Medical Recordkeeping Practices

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Ten of ten (100%) charts were compliant for identifying information including detainee name, ID number, date of birth, and gender. All ten charts were compliant for current problem list, receiving screen and health assessment forms, progress notes, clinician orders for medication signed, MARs placed in the record within 2 weeks of previous month, consents for medical care and treatment, date and time of each encounter, integrated medical, dental, and mental health record, timely filing within 72 hours, and content organized for easy retrieval of outside records, pertinent diagnostics and consultations.

Seven of seven (100%) charts were compliant for labs and diagnostic reports acknowledged and dated. Six of six (100%) charts were compliant for flowsheets. Eight of eight (100%) charts were compliant for signed refusals of care. Four of four (100%) charts were compliant for results of specialty consultations and referrals acknowledged and dated, and discharge summaries from the ED and hospitalizations. Two of two (100%) charts were compliant for a special needs treatment plan. One of one (100%) chart was compliant for a consolidated medical record, records from prior stays incorporated.

Additional Comments:
The facility uses a paper medical record. Med/psych alert stickers and chronic care labels were listed on all outside covers of chronic care charts reviewed. OHU medical housing had a separate section designated in ten out of ten (100%) charts reviewed.

Previous Site Visit March 2017:
OHU medical housing had a separate section in nine out of ten charts reviewed. No loose, unfastened papers were noted in medical charts.

Nine of ten charts had a current problem list including medical and mental health diagnoses and known allergies. One of ten was partially compliant, missing the mental health diagnosis on the problem list. Six of nine charts were partially compliant for MARs placed in the record within two weeks of the previous month.

AMERICAN OVERSIGHT

Pregnant Women

Two charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Two of two (100%) charts had a pregnancy test performed on females aged 18-54 during intake screening and prior to an x-ray or before initiation of medications, had an OB/GYN consult ordered within 7 days of pregnancy confirmation, had the patient screened for HIV, STI, and viral hepatitis, and had prenatal vitamins prescribed.

Additional Comments:
Pregnancy tests are performed on all females age 18-65 during intake screening.

Both charts reviewed were housed at IRDF for less than 20 days.

Previous Site Visit March 2017:
No charts were available to review for this area.
Local ICE ERO continues to release any female identified as pregnant during intake.

Dental Care

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Ten of ten (100%) charts were screened for symptoms during the intake process, the patient was evaluated by a qualified health professional within 48 hours of request, and the dental clinical notes describe findings, diagnosis, and treatment plans. Seven of seven (100%) charts had the patient scheduled for follow-up treatment as recommended.

Additional Comments:
Dental scheduled appointments are now also written in the narrative section of the medical chart. Previously the appointments were only entered into the Offender Data System (ODS) computerized database.

A RN evaluates dental sick calls through a face-to face encounter within 24 hours. The RN then places a chart review for the dentist to review the sick call assessment. The dentist schedules the patient to be seen within 5-14 days based on the acuity of the complaint in the RN assessment.

Four of four charts had an annual dental exam and cleaning documented in the medical chart for detainees in custody over one year.

The dentist provides dental assessment training only upon new RN hire. Nursing staff who perform dental sick call triage and the dental assessment of the physical exam do not receive annual refresher training.

Previous Site Visit March 2017:
All findings met 100% audit tool criteria. Annual dental examination refresher training for RN PE and sick call evaluations is not being provided to nursing staff. Dental scheduled appointments are entered into ODS, but are not written in the narrative section of the medical chart. Only when an appointment needs to be rescheduled does a notation of the scheduled appointment appear in the medical chart.

AMERICAN OVERSIGHT

Acute Laboratory Testing

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Ten of ten (100%) charts reviewed had blood drawn or test done within one business day of ordered date, report was back within 24 hours for acute labs or within 7 days for routine labs, had clinical acknowledgment and an appropriate clinical response. Seven of ten (70%) charts had documentation the patient was advised of laboratory results.

Additional Comments:
The director of nursing checks the lab log weekly.

For all acute or urgently needed lab work, detainees are transported to El Centro Regional Medical Center within 24 hours for lab draw. IRDF's contracted laboratory provider, Garcia labs, does not process stat labs. Garcia labs consistently provides routine lab results to the facility in a timely manner.

Previous Site Visit March 2017:
All findings met audit tool criteria except one of ten charts had blood drawn or test done within one business day of the ordered lab.

Diagnostic Services and Specialty Care Access

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Ten of ten (100%) charts had the appointment accomplished within 45 days of the order or within the ordered timeframe, and the facility clinician acknowledged the specialist's report in the medical record within 7 days of the date the service was performed. Three of ten (30%) charts had a documented time urgency included on the order for specialty care or diagnostic services.

Additional Comments:
All of the specialty care referrals were completed within 30 days. Detainees are referred to appropriate specialists in a timely manner through the MedPAR system.

Previous Site Visit March 2017:
Zero charts had a documented time urgency for the specialty care or diagnostic service ordered. Eight of ten had the facility clinician acknowledge the specialist's report in the medical record within seven days of the date of service.

Mental Health Treatment Planning

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Ten of ten (100%) charts had a clinical assessment, treatment, and follow-up plan documented and had treatment plans updated at a minimum of every 90 days.

Additional Comments:
Treatment plans were updated every 21-45 days dependent upon patient acuity.

Previous Site Visit March 2017:
All findings met 100% audit tool criteria.

Treatment of Disability

Two charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Two of two (100%) charts had the patient disability prominently noted in the file along with any needed accommodations, had the patient assessed for assistance with activities of daily living (ADL) upon identification of disability, and had appropriate accommodation orders entered. ADL assistance was not needed by the patient in either case.

In one chart reviewed the disability was right foot drop. Orders for orthotics for gait and balance were entered. A lower bunk/low tier bed and the use of a cane were also entered.

In another chart reviewed the disability was hearing loss. A hearing aid with extra batteries were given to the patient.

AMERICAN OVERSIGHT

Additional Comments:
The facility maintains a current list of all patients with disabilities.

Previous Site Visit March 2017:
No cases of disability available to review.

Complaints and Grievances

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. There were ten medical grievances from June 2017 through August 2017. The facility's grievances do not reveal any possible barriers to care or repetitive concerns that could affect clinical care. All grievances were addressed within five working days of receipt.

One grievance was due to availability of care.
One grievance was due to denial or refusal of specific request.
Three grievances were due to a delay in care. All three were related to dental complaints. A RN evaluates the patient in a face-to-face encounter within 24 hours. The dentist reviews the RN sick call assessment and schedules an appointment within 14 days based on the dental complaint and corresponding RN assessment.

Five grievances were for "other" complaints. One such grievance was a complaint that the patient was not receiving a cure for his issue and only received medication that relieved his symptoms. One grievance was a request to obtain shoes and medication from his personal property. One grievance stated the patient had not seen the dentist, but the patient was seen prior to the grievance response. Another grievance was a request for a second medical opinion. Another grievance was a patient accusation that a security guard was given confidential information about his medical condition. This accusation was found to not be true.

Additional Comments:
All ten grievances were informal grievances and the detainees were satisfied with the response provided by the medical department.

Previous Site Visit March 2017:
There were 13 total medical grievances in the last three months prior to review. One was a formal grievance, while 12 were informal. All 13 grievances were addressed within five business days.

AMERICAN OVERSIGHT

ASSESSMENT OF QUALITY OF HEALTH SERVICES
CHRONIC DISEASES

Diabetes

Five charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Five of five (100%) charts had the patient seen for chronic care by a NP/MD within 14 days of illness identification and had aspirin prescribed as clinically indicated. Four of four (100%) charts had a baseline HgbA1c performed within 30 days of intake or within the last 3 months, had lipids measured within one year, was followed at least every 90 days with appropriate vital signs, and had a degree of control documented. Three of three (100%) charts had a strategy to attain diabetes control documented if HgbA1C was above goal. Four of five (80%) charts had the blood sugar measured and recorded on intake.

In one chart reviewed, a blood sugar was not taken at the intake screening though the diagnosis of diabetes was noted.

Additional Comments:
The clinical director follows the American Diabetes Association and Bureau of Prison Diabetes clinical practice guidelines.

Previous Site Visit March 2017:
All findings met 100% audit tool criteria.

Human Immunodeficiency Virus (HIV)

Four charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Four of four (100%) charts had a CD4+ and viral load completed within 14 days of arrival or within the last three months, patient was seen by an ID specialist within 30 days of HIV identification, had antiretroviral treatment considered and documented, patient was seen by a mid-level provider or physician for chronic care at least every 90 days, and had a chest x-ray completed within 72 hours of problem identification if not already done.

HIV status was identified by recent laboratory results for one chart reviewed, by medical records for one chart reviewed, and by patient interview for two charts reviewed.

Additional Comments:
The clinical director follows Bureau of Prison HIV clinical practice guidelines.

Previous Site Visit March 2017:
All findings met 100% audit tool criteria.

Hypertension

Four charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Four of four (100%) charts had a blood pressure reading noted at intake, was seen by a MD/NP within 14 days of illness identification, had a treatment plan initiated if the blood pressure was >140 systolic or >90 diastolic, and had a chronic disease guideline including baseline laboratory testing followed.

Additional Comments:
The clinical director follows the Bureau of Prison Hypertension clinical guidelines and the American Academy of Family Physicians clinical practice guidelines.

Previous Site Visit March 2017:
All findings met 100% audit tool criteria.

Asthma

Three charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Three of three (100%) charts were seen in the chronic care clinic by a mid-level provider or physician within 14 days of illness identification, had a peak flow completed at the initial physical exam, had a peak flow completed at the chronic care appointment or within the last three months, and had a chronic disease guideline followed which addressed disease severity, prescription of medication consistent with severity, and documented degree of control.

Additional Comments:

AMERICAN OVERSIGHT

The clinical director follows the American Academy of Family Physicians asthma clinical practice guidelines and the Bureau of Prison Asthma guidelines.

Previous Site Visit March 2017:
All findings met 100% audit tool criteria.

Seizure Disorder

Two charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Two of two (100%) charts had an appropriate neurological history completed at the initial physical exam, were seen in the chronic care clinic by a NP/MD within 14 days of illness identification, had serum drug levels performed and acknowledged every 3 months until stable, and then every 6 months when indicated, had a treatment plan, and had orders for a bottom bunk.

Additional Comments:
The clinical director uses the American Academy of Family Physicians guidelines to manage seizures.

Previous Site Visit March 2017:
The one chart available to review met audit tool criteria except did not have orders for a bottom bunk.

AMERICAN OVERSIGHT

Recommendations

(b)(5)

Facility Actions

A closeout meeting was conducted with the Health Services Administrator.

A summary of site visit deficiencies was emailed to the FOD, DFOD over detention, AFOD of IRDF, SDDO/AOIC, and CORs on 10/2/2017.

Additional Comments

On 10/3/2017, the CORs asked MTC for clarification on if MTC medical staff will conduct a force feed, if necessary, after a Federal court order is obtained by ICE. A response from MTC is pending as of 10/9/2017.

SUICIDE SCREENING

DATE 3/6/2017 REVIEWER (b)(6); (b)(7)(C)

FACILITY REVIEWED Imperial Regional Detention Facility

Purpose: To assess conformance with nationally-accepted guidelines for suicide risk assessment and prevention.

Source: Patients on suicide watch or hospitalized for suicidality within the last 3 months or since the most recent review.

Sample: Medical records for 10 patients placed on suicide watch or hospitalized for suicidality within the last 3 months or since the most recent review.

1 What is the total number of patients placed on suicide watch or hospitalized for suicidality within the last 3 months or since the most recent review? 10

2 Does the facility use an acceptable suicide risk management screening instrument, including at a minimum, asking for a history of suicide attempts and for current suicidal ideation? ■ Yes ☐ No

3 Are all screeners and all staff in direct contact with detainees trained to assess suicide risk (see training logs)? ■ Yes ☐ No

Item # Measure

1 Was the suicidal patient evaluated by a mental health professional within 24 hours of identification (unless the situation was emergent in which case the evaluation should be immediate)?

2 Was the patient evaluated by a qualified mental health professional daily while on suicide watch?

3 What type of monitoring was practiced while the patient was on suicide watch?

4 Were checks documented consistently?

5 Is there evidence that earlier intervention might have prevented deterioration to the point of need for a suicide watch? If yes, please describe.

TREATMENT OF DISABILITY

DATE: 3/6/2017 REVIEWER (b)(6); (b)(7)(C)

FACILITY REVIEWED: Imperial Regional Detention Facility

Purpose: To assess the care of patients with disabilities who need accommodations to access the facility's programs or activities as a result of their disabilities.

An individual is considered to have a "disability" if s/he has a physical or mental impairment that substantially limits one or more major life activities, or has a record of such impairment.
See also: https://www.dhs.gov/sites/default/files/publications/guide-interacting-with-people-who-have-disabilties_09-26-13.pdf

Sources: Facility logs, tour of facility, list of patients who require DME (to include walkers, canes, wheel chairs, hearing aids, or other items to assist the patients to access the facility's programs and activities), and interviews with patients with disabilities who need accommodations to access the facility's programs and activities.

Sample: 10 patients within the population who have a disability that requires medical involvement. Determine if the patients with disabilities received appropriate treatment and disability accommodations through medical record examination. Mark as "Y" for yes, "N" for no, and "N/A" for not applicable. Do not leave any area blank.

General Question: Does the facility maintain a current list of all patients with disabilities on site? Yes

Item # Measure

1 Is the disability prominently noted in the file, along with any needed accommodations?
2 Was the patient assessed for assistance with activities of daily living (ADL) upon identification of disability?
3 Were appropriate accommodation orders entered (e.g., lower bunk, mobility device (wheelchair, walker, canes, crutches), hearing aid, assistive listening device, sign language interpreter, meal, etc.)?
4 Was ADL assistance provided, if applicable?

URGENT CARE (SICK CALL)

DATE 3/6/2017 REVIEWER (b)(6); (b)(7)(C)

FACILITY REVIEWED Imperial Regional Detention Facility

Purpose: To assess for timely and appropriate nursing care for acute conditions.

Source: Urgent care log, sick call request list, or sick call visit list, preferably with reason for visit noted on log.

Sample: 10 urgent care visits by detainees with potentially serious complaints that occurred 1 to 3 weeks prior to review. Common potentially serious complaints include chest pain, abdominal pain, seizure, vomiting, skin infection, diabetic complications, etc.

Item # Measure

1 Was there timely and appropriate evaluation by nursing staff, depending on the nature of the complaint?
2 Was care delivered within the scope of the nurse's license?
3 Were vital signs documented during the nurse's assessment?
4 If necessary, was a nursing referral to a MD/PA/NP/DMD submitted within 24 hour where appropriate?
5 If referred, was an MD/PA/NP/DMD assessment and plan documented?

INTRODUCTION TO THE QMC

These Quality of Medical Care (QMC) audit tools focus on the assessment of clinical performance using a set of standardized measures. The measures are based on either nationally-accepted clinical guidelines or industry best practices regarding healthcare services for chronic diseases, such as National Commission for Correctional Healthcare, National Institutes of Health, American Diabetes Association, etc.

Measurement of clinical performance is only one aspect of a facility quality assessment. It is an adjunct, not a substitute, for assessment of the effectiveness of policies and procedures, sanitation and hygiene, space and equipment, etc.

- These tools are designed to provide a snapshot of care for current or recent detainees, focused on areas of high risk.
- The data collected can be used to analyze opportunities for improvement, for tracking and trending performance over a period of time, and for cross-comparisons with other facilities.
- The measures on each audit tool are "proxy" measures which can be used to generalize about the health care for a specific situation or condition based on the answers to each question. For example, there are eight measures on the diabetes audit tool. If performance on these measures is acceptable, it is assumed that the overall care for diabetics is acceptable.

- The recommended sampling design is intended to measure recent care provided in the facility, generally on patients who have been in custody for enough time to provide expected care, follow-through and measurable outcomes. For example, the health assessment sample is taken from a list of detainees in custody $\geq$ 14 days.
- In most cases, the recommended sample size will provide a reliable picture of care that can be generalized.
- While the goal is 100% compliance, the performance objective for most of the audit tools is $\geq$ 90%. That is, a facility is meeting expectations when performance on each measure meets or exceeds 90%.
- The performance objective for the audit tool on ambulatory sensitive conditions is 100%.
- In general, the answers are either "yes," "no," or "not applicable due to length of stay" (N/A - LOS) or "not applicable – not due to length of stay" (N/A - NLOS). In general, a 'yes' response indicates that the measure has been met and a 'no' response indicates the measure has not been met. Two exceptions to this are noted in the section below.

AUDIT TOOL COMPLETION

Reviewers are required to complete each audit tool. If there are no detainees who meet the criteria for a particular audit tool, this should be noted on the worksheet by clicking the appropriate box. If there are no detainees who meet the criteria, but there are general questions to answer on the tool, the answers to these questions should still be filled out. If the number of detainees who meet the audit tool criteria is less than the recommended sample size, the reviewer should answer the measures for the number of detainees available and add a note in the overall remarks section about why the full sample size was not reviewed. If certain measures are not applicable to a particular detainee, the reviewer will select the 'NA – LOS' answer, if the reason it was not applicable is related to the shortened stay of the detainee in the facility. If the reason is not applicable due to other reasons, the reviewer will select 'NA – Not LOS' as the answer.

Reviewers should note that in item #2 in the Evaluation of Care Prior to Emergency Department/Hospital Visit for Conditions Sensitive to Ambulatory Care audit tool a 'no' response is the desired answer that would indicate that the criteria was met. Thus if all responses are 'no' for this item, this reflects 100% compliance with this measure. The same should be noted by reviewers for item #5 in the Suicide Screening audit tool. A 'no' response is the desired answer that would indicate the criteria was met.

TIPS FOR REVIEWERS

- Keep control of the medical record sample selection. Select the records to review from the primary or secondary source identified on each audit tool. Ask the medical records staff to return the list of selected records with the corresponding stack of records to know why those records were requested and what proportion of the requests were not available.

- Take note of the proportion of the requested medical records that were not available and the proportion of laboratory and diagnostic reports that were not filed and acknowledged within the medical record. These are indicators of medical record system problems.

AMERICAN OVERSIGHT

• Try to maintain the sample size. If several records requested are not available, select the same number of additional records to maintain the expected sample size.
• If a question asks for clinical judgment as to timeliness or appropriateness and the reviewer is unsure of the answer, make a simple note of the circumstances and discuss with a physician before finalizing the data. This may be done "back in the office."
• Don't neglect to ask for any paper records in facilities that use electronic health records. Many facilities maintain a paper record for certain documents.
• Don't hesitate to use a detainee's record for more than one audit tool. If the name shows up on two lists, and it was selected multiple times, use that record again.
• Don't make any assumptions about the reason for the absence of medical record documentation for any measure in the audit tools. Inquire with the facility health authority to obtain a clear understanding of the absence of information.
• Don't let facility staff select the records for review. This introduces bias, even if not intentional.
• Don't confuse the policy governing a certain practice with what was actually done in specific instance. Actual practice should be well-documented in the medical record.
• Don't think about calculating a composite score for an audit tool. Composite scores are misleading. Failure to achieve ≥ 90% on any single measure is an opportunity for improvement that can reduce a potential risk to detainees.

COMPLAINTS AND GRIEVANCES							
Number of Files Reviewed for Patients Meeting this Criteria:	2						
Purpose:	To assess use of medical grievance data as part of the quality management program.						
Source:	Facility grievance logs.						
Sample:	Facility's periodic grievance analyses, with underlying data (grievances and responses). Include no greater than 30 A#'s per grievance category.						
Guidelines:	NCCHC 2014 J-A-06, J-A-11.						
Remarks:	The Director of Nursing serves as the medical grievance officer.						
Reviewer:	(b)(6); (b)(7)(C)			**Date Reviewed:**	5/23/2018		
Facility (f)							
fCG-1:	Does your review of the facility's grievances reveal any possible barriers to care or repetitive concerns that could affect clinical care? If yes, please address in the remarks section whether and how the facility uses this information to implement change.				N		
fCG-2:	How many medical grievances were submitted over the past 3 months?			2			
fCG-3:	Of medical grievances submitted over the past three months, how many were appropriately addressed within 5 working days of receipt?			2			
Clinical (c)							
cCG-1	What is the A# for each of the grievances submitted over the past 3 months for each category in the table below?						
cCG-2	What was the number of grievances submitted, by A#, over the past 3 months for each category in the table below?

HEALTH ASSESSMENT						
Number of Files Reviewed for Patients Meeting this Criteria:	20					
Purpose:	To determine compliance with detention standards to assure continuity and coordination of care for serious medical needs.					
Source:	Detainees arriving during recent period, at least 2 weeks prior to review, to allow for evaluation of timely follow-up.					
Sample:	20 medical records chosen at random.					
Guidelines:	NCCHC 2014 J-E-04; ACA 2004 4-ALDF-4C-24, 4-ALDF-4C-25					
Remarks:	All new arrivals without chest x-ray confirmed TB clearance receive a chest x-ray, except for pregnant detainees who recieve a PPD. Physical examatinations are completed on the same day as the intake screening by a Registered Nurse. The Clinical Director reviews and signs off on all physical examinations.					
Reviewer:	(b)(6); (b)(7)(C)			**Date Reviewed:**	5/21/2018	

Clinical (c)	
cHA-1	Initial screen complete within 12 hours of booking?
cHA-2	PPD placed during medical screening and read within 48-72 hours, or chest x-ray is taken, or if PPD is positive by history, chest x-ray is ordered and read?
cHA-3	Are detainees who screen positive for mental illness or suicide risk referred for evaluation?
cHA-4	Is there timely follow-up for significant findings of acute and chronic conditions? *A significant finding is a condition that, without timely intervention, could lead to deterioration in function, pain, death, or risk to the public health.
cHA-5	Is there a complete health evaluation? Vital signs, adequate medical and behavioral health history, physical examination by licensed MD/PA/NP/RN within 14 days of booking? Patients with HIV, diabetes, dialysis, asthma (on daily meds), and other chronic illness will be seen within 2 business days or addressed by phone and seen on the next business day.

LABORATORY TESTING						
Number of Files Reviewed for Patients Meeting this Criteria:	10					
Purpose:	To assess timeliness, continuity, and coordination of care.					
Source:	Medical records, laboratory logs, sick call logs, and/or chronic care logs.					
Sample:	10 orders for labs within the last 6 months (refer to User Guide for additional guidance) , if available.					
Guidelines:						
Remarks:	The Director of Nursing (DON) or Health Services Administrator (HSA) checks the lab log weekly. For all acute or urgently needed lab work, detainees are transported to El Centro Regional Medical Center within 24 hours for lab draw. IRDF's contracted laboratory provider, Garcia labs, does not process stat labs. Garcia labs consistently provides routine lab results to the facility in a timely manner.

MEDICATION ADMINISTRATION RECORDS									
Number of Files Reviewed for Patients Meeting this Criteria:	10								
Purpose:	To assess continuity of ordered care and notification to clinician of poor adherence to medication orders.								
Source:	MARS.								
Sample:	MAR and medical record for 10 patients, if available. Medication refusals and/or no shows are defined as those instances in which a patient refuses medications on 3 consecutive days or for 3 consecutive doses and /or 4 or more doses in a week.								
Guidelines:									
Remarks:	The facility uses MTC medical policy "Pharmaceutical Management" No. 904E.128FNI which states "Detainees who are on direct observation therapy and refuse medication three consecutive times will be placed on chart review for the medical provider. Upon review the medical provider will determine if medication will be continued, detainee will be seen or medication will be discontinued. Medications for the following conditions will be placed on for review after only one refusal, TB and HIV."								
Reviewer:	(b)(6); (b)(7)(C)			**Date Reviewed:**	5/23/2018				
Facility (f)									
fMAR-1:	Does facility have a policy in place stating which medications, if missed a certain number of consecutive doses, require provider notification and/or follow-up?				Y				
fMAR-2:	Based on review of current month MARs or previous month's MARs, if available, what percentage of MARs that have either blanks, consecutive refusals, or no shows on the MARs?				4				
fMAR-3:	In the medical record filing area, how many months of MARs are unfiled, not counting unfiled MARs within 14 days of the end of the previous month?				0				
fMAR-4:	Estimate the percentage of patients on self-administered medication ordered by a provider.				47				
fMAR-5:	OTCs provided by medical, commissary or both?				Both				
Clinical (c)									
cMAR-1	What is the number of refusals and no shows during the previous month for each patient?								
cMAR-2	Is there documentation in the medical record that the prescribing clinician was notified of consecutive refusals?								
cMAR-3	Was there an appropriate response from the clinician (i.e., was the patient interviewed or was the prescription changed or discontinued?)

MEDICAL RECORD-KEEPING PRACTICES

Number of Files Reviewed for Patients Meeting this Criteria:	10
Purpose:	To assess completeness of the medical record and appropriateness of medical record practices.
Source:	Medical Records, Chronic Care Log, and MARs.
Sample:	10 records of detainees with chronic disease, if available.
Instructions:	For all answers that are "partial compliance" or "non-compliant", the reviewer should insert a comment in the remarks section of the report. For example, if most of the progress notes are legible, but one or two practitioner's notes are barely legible, the appropriate comment would be "Dr. XX's notes are not legible."
Guidelines:	NCCHC 2014 J-H-01, J-H-03.

AMERICAN OVERSIGHT

INTRODUCTION TO THE QMC

These Quality of Medical Care (QMC) audit tools focus on the assessment of clinical performance using a set of standardized measures. The measures are based on either nationally-accepted clinical guidelines or industry best practices regarding healthcare services for chronic diseases, such as National Commission for Correctional Healthcare, National Institutes of Health, American Diabetes Association, etc.

Measurement of clinical performance is only one aspect of a facility quality assessment. It is an adjunct, not a substitute, for assessment of the effectiveness of policies and procedures, sanitation and hygiene, space and equipment, etc.

- These tools are designed to provide a snapshot of care for current or recent detainees, focused on areas of high risk.
- The data collected can be used to analyze opportunities for improvement, for tracking and trending performance over a period of time, and for cross-comparisons with other facilities.
- The measures on each audit tool are "proxy" measures which can be used to generalize about the health care for a specific situation or condition based on the answers to each question. For example, there are eight measures on the diabetes audit tool. If performance on these measures is acceptable, it is assumed that the overall care for diabetics is acceptable.

- The recommended sampling design is intended to measure recent care provided in the facility, generally on patients who have been in custody for enough time to provide expected care, follow-through and measurable outcomes. For example, the health assessment sample is taken from a list of detainees in custody $\geq$ 14 days.
- In most cases, the recommended sample size will provide a reliable picture of care that can be generalized.
- While the goal is 100% compliance, the performance objective for most of the audit tools is $\geq$ 90%. That is, a facility is meeting expectations when performance on each measure meets or exceeds 90%.
- The performance objective for the audit tool on ambulatory sensitive conditions is 100%.
- In general, the answers are either "yes," "no," or "not applicable due to length of stay" (N/A - LOS) or "not applicable – not due to length of stay" (N/A - NLOS). In general, a 'yes' response indicates that the measure has been met and a 'no' response indicates the measure has not been met. Two exceptions to this are noted in the section below.

AUDIT TOOL COMPLETION

Reviewers are required to complete each audit tool. If there are no detainees who meet the criteria for a particular audit tool, this should be noted on the worksheet by clicking the appropriate box. If there are no detainees who meet the criteria, but there are general questions to answer on the tool, the answers to these questions should still be filled out. If the number of detainees who meet the audit tool criteria is less than the recommended sample size, the reviewer should answer the measures for the number of detainees available and add a note in the overall remarks section about why the full sample size was not reviewed. If certain measures are not applicable to a particular detainee, the reviewer will select the 'NA – LOS' answer, if the reason it was not applicable is related to the shortened stay of the detainee in the facility. If the reason is not applicable due to other reasons, the reviewer will select 'NA – Not LOS' as the answer.

Reviewers should note that in item #2 in the Evaluation of Care Prior to Emergency Department/Hospital Visit for Conditions Sensitive to Ambulatory Care audit tool a 'no' response is the desired answer that would indicate that the criteria was met. Thus if all responses are 'no' for this item, this reflects 100% compliance with this measure. The same should be noted by reviewers for item #5 in the Suicide Screening audit tool. A 'no' response is the desired answer that would indicate the criteria was met.

TIPS FOR REVIEWERS

- Keep control of the medical record sample selection. Select the records to review from the primary or secondary source identified on each audit tool. Ask the medical records staff to return the list of selected records with the corresponding stack of records to know why those records were requested and what proportion of the requests were not available.

- Take note of the proportion of the requested medical records that were not available and the proportion of laboratory and diagnostic reports that were not filed and acknowledged within the medical record. These are indicators of medical record system problems.

AMERICAN OVERSIGHT

• Try to maintain the sample size. If several records requested are not available, select the same number of additional records to maintain the expected sample size.
• If a question asks for clinical judgment as to timeliness or appropriateness and the reviewer is unsure of the answer, make a simple note of the circumstances and discuss with a physician before finalizing the data. This may be done "back in the office."
• Don't neglect to ask for any paper records in facilities that use electronic health records. Many facilities maintain a paper record for certain documents.
• Don't hesitate to use a detainee's record for more than one audit tool. If the name shows up on two lists, and it was selected multiple times, use that record again.
• Don't make any assumptions about the reason for the absence of medical record documentation for any measure in the audit tools. Inquire with the facility health authority to obtain a clear understanding of the absence of information.
• Don't let facility staff select the records for review. This introduces bias, even if not intentional.
• Don't confuse the policy governing a certain practice with what was actually done in specific instance. Actual practice should be well-documented in the medical record.
• Don't think about calculating a composite score for an audit tool. Composite scores are misleading. Failure to achieve ≥ 90% on any single measure is an opportunity for improvement that can reduce a potential risk to detainees.

EVALUATION OF CARE PRIOR TO EMERGENCY DEPARTMENT/HOSPITAL VISIT FOR CONDITIONS SENSITIVE TO AMBULATORY CARE								
Number of Files Reviewed for Patients Meeting this Criteria:* (please select 0 if no files/patients reviewed)	4							
Purpose:	To determine whether earlier intervention might have prevented morbidity and cost of outside care. To measure continuity and coordination of care for inbound patients.							
Source:	Emergency Department (ED) logs.							
Sample:	Within the past 6 months, 10 patients (if available) sent to ED with ambulatory sensitive conditions, such as seizure, alcohol and/or substance withdrawal, skin or deep tissue infections, DKA, abdominal pain, or chest pain.							
Guidelines:	NCCHC 2014 J-E-12.							
Remarks:	Previous FMC Site Visit May 2018: All areas within this category had 100% compliance.							
Reviewer:	(b)(6); (b)(7)(C)					**Date Reviewed:**	7/10/2019	
Clinical (c)								
cEED-1	Is there an outbound progress note?							
cEED-2	Is there evidence that earlier intervention might have prevented deterioration to the point of need for ED/hospital care? If yes, please describe in the remarks portion of the report.*This will require physician review in some cases. If a physician assists with completion of this review, please include his or her name in the report comments.							
cEED-3	Is there discharge documentation from the hospital or ED in the chart?							
cEED-4	Is there an inbound assessment?							
cEED-5	Does the assessment reflect hospital findings and concurrence or justification for deviation from hospital recommendations?

COMPLAINTS AND GRIEVANCES							
Number of Files Reviewed for Patients Meeting this Criteria:* (please select 0 if no files/patients reviewed)	19						
Purpose:	To assess use of medical grievance data as part of the quality management program.						
Source:	Facility grievance logs.						
Sample:	Facility's periodic grievance analyses, with underlying data (grievances and responses). Include no greater than 30 A#'s per grievance category.						
Guidelines:	NCCHC 2014 J-A-06, J-A-11.						
Remarks:	(b)(6); (b)(7)(C) Grievances include pt unhappy he was removed from work duty after complaining of unrelieved hand pain. "Other" grievances include requests to know when an off-site or follow up appointment was scheduled. This category also includes grievances submitted instead of a sick call request to be seen by medical staff immediately. Medical staff cannot provide specific date of appointment due to security precautions, but informed patients if an upcoming appointment was scheduled. Previous FMC Site Visit May 2018: Grievances addressed within one business day.						
Reviewer:	(b)(6); (b)(7)(C)			**Date Reviewed:**	7/11/2019		
Facility (f)							
fCG-1:	Does your review of the facility's grievances reveal any possible barriers to care or repetitive concerns that could affect clinical care? If yes, please address in the remarks section whether and how the facility uses this information to implement change.				N		
fCG-2:	How many medical grievances were submitted over the past 3 months?			26			
fCG-3:	Of medical grievances submitted over the past three months, how many were appropriately addressed within 5 working days of receipt?			26			
Clinical (c)							
cCG-1	What is the A# for each of the grievances submitted over the past 3 months for each category in the table below?						
cCG-2	What was the number of grievances submitted, by A#, over the past 3 months for each category in the table below?						
Totals:	19	5	4	2	2	1	12

HEALTH ASSESSMENT						
Number of Files Reviewed for Patients Meeting this Criteria:* (please select 0 if no files/patients reviewed)	20					
Purpose:	To determine compliance with detention standards to assure continuity and coordination of care for serious medical needs.					
Source:	Detainees arriving during recent period, at least 2 weeks prior to review, to allow for evaluation of timely follow-up.					
Sample:	20 medical records chosen at random.					
Guidelines:	NCCHC 2014 J-E-04; ACA 2004 4-ALDF-4C-24, 4-ALDF-4C-25					
Remarks:	All new arrivals without tuberculosis clearance receive a 1-view chest x-ray. Previous FMC Site Visit May 2018: All areas within this category had 100% compliance.					
Reviewer:	(b)(6); (b)(7)(C)			**Date Reviewed:**	7/9/2019	
Clinical (c)						
cHA-1	Initial screen complete within 12 hours of booking?					
cHA-2	PPD placed during medical screening and read within 48-72 hours, or chest x-ray is taken, or if PPD is positive by history, chest x-ray is ordered and read?					
cHA-3	Are detainees who screen positive for mental illness or suicide risk referred for evaluation?					
cHA-4	Is there timely follow-up for significant findings of acute and chronic conditions? *A significant finding is a condition that, without timely intervention, could lead to deterioration in function, pain, death, or risk to the public health.					
cHA-5	Is there a complete health evaluation? Vital signs, adequate medical and behavioral health history, physical examination by licensed MD/PA/NP/RN within 14 days of booking? Patients with HIV, diabetes, dialysis, asthma (on daily meds), and other chronic illness will be seen within 2 business days or addressed by phone and seen on the next business day.

MEDICATION ADMINISTRATION RECORDS									
Number of Files Reviewed for Patients Meeting this Criteria:* (please select 0 if no files/patients reviewed)	10								
Purpose:	To assess continuity of ordered care and notification to clinician of poor adherence to medication orders.								
Source:	MARS.								
Sample:	MAR and medical record for 10 patients, if available. Medication refusals and/or no shows are defined as those instances in which a patient refuses medications on 3 consecutive days or for 3 consecutive doses and /or 4 or more doses in a week.								
Guidelines:									
Remarks:	Previous FMC Site Visit May 2018: In one chart the notification of consecutive refusals was made in the ODS computer system rather than within the medical paper chart.								
Reviewer:	(b)(6); (b)(7)(C)			**Date Reviewed:**	7/10/2019				

Facility (f)		
fMAR-1:	Does facility have a policy in place stating which medications, if missed a certain number of consecutive doses, require provider notification and/or follow-up?	Y
fMAR-2:	Based on review of current month MARs or previous month's MARs, if available, what percentage of MARs that have either blanks, consecutive refusals, or no shows on the MARs?	10
fMAR-3:	In the medical record filing area, how many months of MARs are unfiled, not counting unfiled MARs within 14 days of the end of the previous month?	0
fMAR-4:	Estimate the percentage of patients on self-administered medication ordered by a provider.	46
fMAR-5:	OTCs provided by medical, commissary or both?	Both

Clinical (c)	
cMAR-1	What is the number of refusals and no shows during the previous month for each patient?
cMAR-2	Is there documentation in the medical record that the prescribing clinician was notified of consecutive refusals?
cMAR-3	Was there an appropriate response from the clinician (i.e., was the patient interviewed or was the prescription changed or discontinued?)

TREATMENT OF DISABILITY							
Number of Files Reviewed for Patients Meeting this Criteria:* (please select 0 if no files/patients reviewed)		5					
Purpose:	To assess the care of patients with disabilities who need accommodations to access the facility's programs or activities as a result of their disabilities.						
Source:	hearing aids, or other items to assist the patients to access the facility's programs and activities), and interviews with patients with disabilities who need accommodations to access the facility's programs and activities.						
Sample:	10 patients (if available) within the population who have a disability that requires medical involvement. Determine if the patients with disabilities received appropriate treatment and disability accommodations through medical record examination.						
Guidelines:	NCCHC J-G-02.						
Remarks:	The IRDF detainee disability accomodation workgroup meets and provides a written notification within five working days after the initial request or referral for accomodation per MTC Medical policy Serial No 904E.105.1FNI. A 30 day re-assessment occurs and then continuous 90 day re-assessments occur while housed at IRDF. The Director of Nursing (DON) maintains a tracking log of when the re-assessment is due to occur. Previous FMC Site Visit May 2018: All areas within this category had 100% compliance.

URGENT CARE (SICK CALL)								
Number of Files Reviewed for Patients Meeting this Criteria:* (please select 0 if no files/patients reviewed)	5							
Purpose:	To assess for timely and appropriate nursing care for acute conditions.							
Source:	Urgent care log, sick call request list, or sick call visit list, preferably with reason for visit noted on log.							
Sample:	10 urgent care visits for detainees with potentially serious complaints that occurred 1 to 3 weeks prior to review, if available. Common potentially serious complaints include chest pain, abdominal pain, seizure, vomiting, skin infection, diabetic complications, etc.							
Guidelines:	NCCHC 2014 J-A-01, J-E-07; ACA 2004 4-ALDF-4C-03, 4-ALDF-4D-03.							
Remarks:	Detainees can electronically submit sick call requests 24/7 via a hand-held tablet system. Detainees are educated on tablet use upon arrival by custody staff. Entries can currently be made in English and Spanish. Talton is attempting to incorporate more languages in their TellMate system. Medical staff review and triage sick call requests daily at 2300. Previous FMC Site Visit May 2018: All areas within this category had 100% compliance.

Facility Name- Imperial Regional Detention Facility
Address (Street and Name)- 1572 Gateway Road
City, State and Zip Code- Calexico, CA 92231
County- Imperial
Date[s] of FMC Follow-up- Within 30 days of approved UCAP
Complete and Return to ICE HQ No Later Than: September 25, 2017
Facility Corrective Action Plan Assigned to – HSA (b)(6); (b)(7)(C)
Date of Final Submission:

AMERICAN OVERSIGHT

Department of Homeland Security
Immigration and Customs Enforcement
Office of Enforcement and Removal Operations

Instructions for the Corrective Plan of Action Response

Provide a detailed description of the corrective action taken by the facility to address each of the findings identified in the ICE Health Service Corps Field Medical Coordinator (FMC) review. Please ensure that each stated corrective plan of action addresses the noted medical findings to the fullest extent possible, and that it incorporates the recommendations. In the event a finding or recommendation cannot be implemented within the authorized timeline, please include an explanation in the "Corrective Plan of Action" column. The explanation should include a work around solution while pending final resolution, and an approximate completion date.

Exceptions to this timeline may be granted for necessary construction and staffing requirements, but will require an estimated completion date and temporary "work around" as part of the approved UCAP. Serious life and safety issues must be corrected immediately.

ICE Uniform Corrective Action Plan (FMC Reviews) Imperial Regional Detention Facility (San Diego AOR)			
Assessment and Findings	**Recommendations**	**Corrective Plan of Action**	**Completion Date**
Dental scheduled appointments are entered into the Offender Data System (ODS) computerized database, but are not written in the narrative section of the medical chart. Only when an appointment needs to be rescheduled does a notation of the scheduled appointment appear in the medical chart. (Quality Of Care (QOC))	(b)(5)	HSA conducted verbal guidance on 3/13/2017 to Dentist and Dental Assistant regarding dental scheduled appointments to be entered into the Offender Data System (ODS) and correspondingly written in the narrative section of the medical chart. Upon monthly chart audits done in April and May 2017, dental charts reflect 100% compliance per internal CQI.	5/31/2017 Resolved finding per FMC September 2017 site visit.

AMERICAN OVERSIGHT

Gender is not included among identifying information in medical charts all charts reviewed. (QOC)	(b)(5)	Gender identification was added to demographics on all labels in the ODS system to identify information in the medical charts on 3/16/17. All charts have the gender included in the demographics.	3/16/2017 Resolved finding per FMC September 2017 site visit.
All previous months of Medication Administration Records (MARs) were not included in the medical record. (QOC)		All MAR's are filed in the medical records within a reasonable time. On 3/31/17, there was a monthly meeting conducted to inform all medical personnel to file the MAR's away within appropriate time (No more than two weeks from print out). Filing of the MAR's are also being track in our monthly QI tool kit.	3/31/2017 Resolved finding per FMC September 2017 site visit.
Annual dental examination refresher training for registered nurses is not being provided by the Dentist. (QOC)		This is not a mandatory requirement; however, education will be included in our monthly meetings to include educational materials and at least one dental specific in-service provided to medical staff per calendar year. **IRDF NOV 2017 Update:** Per the HSA, the Dentist or designee, will provide a dental	Ongoing- to be noted on future UCAP.

AMERICAN OVERSIGHT

		educational in-service at the January 2018 monthly staff meeting. This in-service will include signs and symptoms for RNs to focus on during a dental assessment. The facility does not want to initiate annual dental refresher training at this time until they have approval from MTC Corporate.	
Documented time urgency is not included on the order for specialty care or diagnostic services. (QOC)	(b)(5)	Providers will document the time urgency for specialty diagnostics. All providers will be instructed to document; routine, stat, within two days, etc. Compliance will be evaluated and will be added starting in October 2017 and forward to the CQI tool kit for internal audits. **IRDF NOV 2017 Update:** CQI tool kit sent to FMC to review. Compliance less than 100% for October 2017.	Ongoing due to less than 100% compliance on CQI tool- to be noted on future UCAP.

AMERICAN OVERSIGHT

A delay in reviewing specialist reports for specialty care and diagnostic services was noted. (QOC)	(b)(5)	Medical records personnel were verbally instructed to obtain the reports in a timely manner and to place the findings for a provider chart review. Reports are obtained from specialty consultants and are given to the providers for review as soon as possible.	3/31/2017 Resolved finding per FMC September 2017 site visit.
A medical chart with a seizure diagnosis did not have a bottom bunk ordered. (QOC)		HSA conducted verbal guidance on 3/10/17. Providers were made aware of issue. Seizures as well as other conditions per Providers discretion are given low bunk low tear to ensure patient safety and appropriate accommodations to the patients in need.	3/10/17 Resolved finding per FMC September 2017 site visit.
Prior CAP findings:			
A chronic care medical chart was not seen for a full physical evaluation until 21 days after arrival. A complete health assessment should be completed within two business days if a chronic diagnosis is present. (PBNDS 2011)		**IRDF March 2016 Update**: Nurses have been educated regarding intake screenings and when to refer detainees to a provider. Staff received additional training on February 19, 2016 regarding intake findings that should be referred to NP and/or	

AMERICAN OVERSIGHT

		Provider. The facility has developed a committee to monitor for compliance in the month of February. A nurse was assigned to monitor the CQI program in addition to the committee that was already in place. **FMC Update August 2016**: Compliance has decreased from 80% on the February 2016 site visit to 70% compliance during the August 2016 site visit. **FMC Update March 2017**: Compliance has increased to 95%. Remains a finding. All physicals are completed upon arrival. HSA and Medical Director chose to waive the 14 day grace period and now all new intakes have the physical assessment, Dental assessment and Mental Health assessment upon arrival for all intakes. A QI study was performed and it	4/18/2017 Resolved finding per FMC September 2017 site visit.

AMERICAN OVERSIGHT

		was concluded that we were 100 percent compliant. The study was concluded on 4/18/17. This is also being traced in the CQI tool kit for internal audits.	
Medical charts do not have a separate area labelled consistently for medical housing in the observation housing unit. This continues to be a finding during the March 2017 site visit. (PBNDS 2011).	(b)(5)	Medical Records staff was educated to resume the file separation process. Chart dividers are available and implementation will start on August 10, 2015. A daily progress note sheet has been developed and implemented on 11/8/14 for use in patients housed in the observation unit. Chart dividers were also implemented on 11/8/14 for organization and uniformity in filing system. Staff announcement of such change took place on 11/8/14. FMC Update: 9/28/15 – Progress notes mixed in with other	

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-000897

		medical records. **FMC FEB 2016 Update:** Medical charts do have a divider system in place as of Feb site visit. However, the Observation Unit housing is not a separate area of the medical chart. **IRDF March 2016 Update:** Medical charts are divided by the use of tabs, with the exception of medical observation. We are in the process of make this divisions and separating the medical observation from the rest of the chart. Expected completion date is 4/22/16 **FMC AUG 2016 Update:** The medical observation housing unit is not labelled separately in the majority of charts. **FMC MARCH 2017 Update:** Compliance increased to 90% compared to 29% compliance during August 2016 site visit.	

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-000898

		Remains a finding. All charts have dividers to distinguish the medical observation unit. The original idea was for the medical records to place the OHU tab only in the OHU charts, however, HSA decided that all charts without exception will have OHU tabs to assure 100 percent compliance. As of 9/26/17, all charts have the OHU dividers.	9/26/2017 Resolved finding per FMC September 2017 site visit.
Upon intake, nurses continue prescribed medications without first consulting and getting orders from a mid-level provider or MD to continue the medication. (Outside RN scope of practice, PBNDS 2011)	(b)(5)	**FMC MARCH 2017 Update:** Compliance increased to 70% compared to 0% compliance during the August 2016 site visit. Remains a finding. HSA provided an in-service to nurses on March 31, 2017 during the monthly staff minutes. **IRDF OCT 2017 Update:** HSA will provide a refresher training to assure 100 percent compliance. The nurses will be	Verified by FMC on 11/6/2017. Resolved finding.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-000899

		trained to obtain a providers orders to continue; change or discharge medications. Provider on call will give further orders for continuation. Medications will not be given without first consulting with provider. This will also be monitored in the CQI internal audit. **IRDF NOV 2017 Update:** New policy memo has been created. Staff meeting on 9/29/2017 discussing new policy sent to FMC. CQI Chart review audits began in OCT 2017 with 100% compliance for OCT 2017.	
Staffing levels have been inconsistent due to changes in leadership, voluntary resignations and the use of scheduled staff to perform coverage for administration. During the September 2015 site visit, staffing had improved; however, there were still two vacancies: part-time nurse practitioner (NP) and full-time registered nurse (RN). Since the site visit, the Health Services Administrator has been on extended medical leave projected to last until July 2016 and the DON has been filling the role of DON and acting HSA. (PBNDS	(b)(5)	HSA is on medical leave again until July 2016. DON is currently working as both a DON and acing HSA. MTC Medical Corporate and IRDF Human Resources will work to fill the open position. Emphasis will be placed on hiring a RN position. DON has been filled effective 8/17/15. Currently vacancies: 1 RN and 1 dental assistant.	Resolved finding per FMC September 2017 site visit.

AMERICAN OVERSIGHT

2011)		**FMC MARCH 2017 Update:** HSA position remains filled since January 2016. Dental assistant position has been filled since November 2015.	
No psychiatrist is available to physically assess detainees during the week. (Quality of care)	(b)(5)	IRDF staffing report reflects a psychiatrist for 16 hours per week, which is currently being met. MTC Medical will explore options to increase the availability of the psychiatrist. **FMC FEB 2016 Update**: Additional psychiatrist hours are not being added at this time given the current workload. Current hours are sufficient to cover current workload. **FMC MARCH 2017 Update:** Current mental health staffing is sufficient for facility needs. Additional psychiatrist working hours during the week are not needed per the HSA.	Resolved finding per FMC September 2017 site visit.

☒ Compliant Non-Compliant with: ☐ 1 – 2 Standards ☐ 3 Standards ☐ >3 Standards

Description of deficiencies:

There have been no reported deaths, detainees with terminal illness, or detainees with advance directives within the last 12 months.

Previous Site Visit May 2018:
No deficiencies.

Other Observations

The Imperial Regional Detention Facility (IRDF) IHSC Site Visit was conducted July 8, 2019 through July 12, 2019. The site visit was completed by (b)(6); (b)(7)(C) the San Diego Field Medical Coordinator(FMC). 52 charts were reviewed in detail.

IRDF is a dedicated ICE IGSA with MTC as the contractor for both security and medical personnel. The average length of stay at IRDF is 104 days. Per local ERO, plans for IRDF bed expansion are pending review from ERO HQ Custody Management Division pursuant to the California wide detention bed procurement.

Review of medical staff training was found to have mandatory training up to date. Personnel files were organized and filed appropriately in the HSA's office. Review of 20 randomly selected medical staff credential files had their required license and BLS card current.

Most recent audits:
Department of Justice (DOJ) audit: June 3, 2019- June 6, 2019.
Nakamoto audit: January 15, 2019 - January 19, 2019.
American Correctional Association (ACA) audit: November 12, 2018 - November 14, 2018.
National Commission on Correctional Health Care (NCCHC) audit: January 30, 2017 - February 1, 2017.

Deficiencies for Areas Evaluated

Quality of Care findings (not deficiencies):

Hypertension:
One of eight (13%) charts was seen by a MD/NP after 19 days of illness identification rather than in 14 days for stable patients with hypertension. The physical exam (PE) was conducted by a RN on the day of arrival.

Laboratory Testing:
Two of ten (20%) charts reviewed did not have documentation that the patient was advised of their laboratory results.

AMERICAN OVERSIGHT

Medical Record-Keeping Practices:
Three of ten (30%) charts did not have all medical and mental health diagnoses listed on the problem list.

Facility Actions

IHSC San Diego FMC met with the new Assistant Warden and acting Warden (until a permanent replacement is hired) during the site visit. A closeout meeting was conducted with the Health Services Administrator (HSA) on July 12, 2019. Quality of care findings were communicated daily to the HSA and DON throughout the five day site visit. FMC met with IRDF AFOD while on-site and notified the SND Field Office there were no findings of concern.

Additional Comments

The facility is planning to have their next NCCHC audit in January 2020.

Medical Care

☒ Compliant Non-Compliant with: ☐ 1 – 2 Standards ☐ 3 Standards ☐ >3 Standards

Description of deficiencies:

No medical care deficiencies were found during this site visit.

Resolved findings:
PBNDS 2011: 4.3 Medical Care, B. Designation of Authority; Health care personnel perform duties within their scope of practice for which they are credentialed by training, licensure, certification, job description, and/or written standing or direct orders by personnel authorized by law to give such orders.

Registered Nurses (RNs) are no longer ordering prescription medications outside their scope of practice. In all ten charts reviewed, there were signed mid-level provider (MLP)/Medical Doctor (MD) orders within the medical chart to continue medications listed on the receiving transfer summary.

Previous Site Visit September 2017:
Two of ten charts had upon intake, nurses continuing previously prescribed medications from other facilities without receiving orders from a mid-level provider or physician at the facility to continue the medication. The detainee's medications that they arrive to the facility with are placed on pill line (except for inhalers). Only medications that are labeled appropriately in separate bottles/blister packs are continued until re-ordered by the facility provider. The provider co-signs the order usually within 24 hours. (Outside RN scope of practice)

Hunger Strike

Total number on active hunger strike:	Total number of hunger strikes in last 12 months:
0	13

☒ Compliant Non-Compliant with: ☐ 1 – 2 Standards ☐ 3 Standards ☐ >3 Standards

Description of deficiencies:

All medical staff are current on hunger strike training. No deficiencies were noted.
Two hunger strikes charts were available to review.

The Clinical Director (CD) is now willing to compose a declaration for a force feed court order if needed for a detainee's deteriorating health. The CD will not order or supervise a force feed within the IRDF facility. The detainee will be sent off-site to the nearest accepting hospital for treatment and monitoring.

Previous Site Visit September 2017:
At time of review, the clinical director will not compose a declaration for a force feed court order and will not provide orders for an involuntary force feed within the IRDF facility. No deficiencies were noted in the three charts reviewed.

AMERICAN OVERSIGHT

Suicide Prevention and Intervention

Total number on suicide watch:	Total number of suicide watches in last 12 months:
0	59

☒ Compliant Non-Compliant with: ☐ 1 – 2 Standards ☐ 3 Standards ☐ >3 Standards

Description of deficiencies:

Reviewed ten medical records. Detainees are placed in a secure one-to-one observation status in a fully modified cell in the observation housing unit (OHU) when a suicidal ideation or attempt is made. Detainees are followed up by a qualified behavioral health provider at least every 24 hours while on suicide watch.

The facility has one designated suicide watch room, which has been modified to be without structures that could aid in self-harm. If a second detainee requires a 1:1 suicide watch, they are sent to Alvarado Parkway Institute, an inpatient psychiatric hospital, when appropriate.

Previous Site Visit September 2017:
No deficiencies noted.

Terminal Illness, Advance Directives, and Death

Total number of active DNR cases:	Total number of deaths in last 12 months:
0	0

☒ Compliant Non-Compliant with: ☐ 1 – 2 Standards ☐ 3 Standards ☐ >3 Standards

Description of deficiencies:

There have been no reported deaths, detainees with terminal illness, or detainees with advance directives within the last 12 months.

Previous Site Visit September 2017:
No deficiencies noted.

Other Observations

IHSC FMC Site Visit May 21-25, 2018.

62 total charts reviewed.

Facility Data:
Imperial Regional Detention facility (IRDF) is a dedicated IGSA with MTC as the contractor for both security and medical personnel.
The average length of stay is 97 days.

In the observation housing unit (OHU) located in the medical department there are six negative pressure rooms, one designated suicide watch room, and seven non-negative pressure rooms. (b)(7)(E)

(b)(7)(E)

The CLIA certification expires on 7/28/2019. The medical department was kept clean. Sharps containers and biohazard trash were maintained below the maximum level. A random sharps inventory check was conducted by the FMC with all items accounted for appropriately. The pharmacy was kept organized with inventory logs maintained up to date. The door to the pharmacy is kept locked at all times.

Review of medical staff training was found to have mandatory training up to date. Personnel files were organized and filed appropriately in the HSA's office. Reviewed 33 of 33 medical staff credential files. All had their required license and BLS card current.

(b)(7)(E)

Deficiencies for Areas Evaluated

Quality of Care findings (not deficiencies):

AMERICAN OVERSIGHT

-In one chart reviewed, the period of time from the medication order to the first dose was more than 24 hours. (Quality of Care)

-In one chart reviewed, dental treatment was rescheduled repeatedly causing a delay in care. (Quality of care)

-A documented time urgency is not consistently included on the order for specialty care or diagnostic services. (Quality of care)

-In one chart reviewed for laboratory testing, there was not documentation showing the patient was advised of their laboratory results. (Quality of care)

-In one chart reviewed the patient was not re-evaluated every 30 days until the off-site appointment was completed. (Quality of care)

-In another chart reviewed, the facility clinician did not review the off-site specialist's report within seven days of the date the service was performed. (Quality of care)

AMERICAN OVERSIGHT

ASSESSMENT OF QUALITY OF HEALTH SERVICES

Suicide Screening

Ten charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

All areas within this category had 100% compliance.

Previous Site Visit September 2017:
All findings within ten charts reviewed met 100% audit tool criteria.

Health Assessment

20 charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

All areas within this category had 100% compliance.

Previous Site Visit September 2017:
All findings within 20 charts reviewed met 100% audit tool criteria.

Urgent Care (Sick Call)

Four charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

All areas within this category had 100% compliance.

Previous Site Visit September 2017:
All findings within three charts reviewed met 100% audit tool criteria.

Evaluation of Care Provider to ED/Hospital Visit for Conditions Sensitive to Ambulatory Care

Five charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

All areas within this category had 100% compliance.

Previous Site Visit September 2017:
All findings within four charts reviewed met 100% audit tool criteria.

Medication Administration Practices

Ten charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

In one chart reviewed, a psychotropic medication was refused six times. The mental health provider discontinued the medication. There was no notification within the medical chart of the consecutive refusals, instead the notification was made via the ODS computer system.

Additional comments:
47% of patients were on self-administered medication, also called keep on person (KOP) medication. The month of May 2018 MARs had 4% consecutive refusals. No MARs reviewed had blanks.

AMERICAN OVERSIGHT

Previous Site Visit September 2017:
All findings within ten charts reviewed met 100% audit tool criteria. 40% of patients were on self-administered medication. This percentage dropped from 50% provider ordered KOP medication during the previous review. MTC Corporate has recommended that NSAIDS (non-steroidal anti-inflammatory drugs) are only to be administered via pill line for a maximum of 10 doses ordered at one time.

AMERICAN OVERSIGHT

Continuity of Medication

Ten charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

In one chart reviewed, the period of time from the medication order to the first dose was more than 24 hours. The detainee arrived at IRDF on Friday 3/2/2018. The detainee was taking Metformin 850mg per the transfer summary and did not arrive with the medication in his property. Diamond pharmacy does not deliver medications on the weekends. The detainee received the medication on 3/5/2018. Blood sugar checks were taken on 3/3/18 and 3/4/18 to monitor his blood sugar levels.

The remaining areas within this category had 100% compliance.

Additional comments:
In all ten charts reviewed, there were signed provider orders within the medical chart to continue medications listed on the receiving transfer summary.

Previous Site Visit September 2017:
Though all findings meet the audit tool criteria, two of ten (20%) charts reviewed had the nurse continuing medications from intake without a IRDF provider order. This is outside the RN scope of practice.

Mental Health Screen

Ten charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

All areas within this category had 100% compliance.
In one chart reviewed, the mental health provider attempted to evaluate the patient two days after the intake screening for a routine mental health referral. The detainee refused the initial mental health evaluation.

Previous Site Visit September 2017:
All findings within ten charts reviewed met 100% audit tool criteria.

Medical Recordkeeping Practices

Ten charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

All areas within this category had 100% compliance.

Additional comments:
The facility currently uses paper charting for medical documentation. There has been discussion between IHSC and ERO proposing a contract modification to implement an electronic health record in the future.

Previous Site Visit September 2017:
All findings within ten charts reviewed met 100% audit tool criteria.

Pregnant Women

Four charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

All areas within this category had 100% compliance.

Additional Comments:
Pregnancy tests are performed on all females age 18-65 during intake screening.

Previous Site Visit September 2017:
All findings within two charts reviewed met 100% audit tool criteria.

Dental Care

AMERICAN OVERSIGHT

Ten charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

All areas within this category had 100% compliance.

In one chart reviewed, dental treatment was rescheduled repeatedly causing a delay in care. The Dentist saw the patient on 4/9/2018 for a tooth pain sick call and scheduled a filling to occur on 4/23/2018. Due to staff illness, the filling was rescheduled to 5/10/2018. The 5/10/18 filling appointment did not occur due to the patient being in court. The filling appointment was then rescheduled to 5/30/2018. The filling was completed on 5/29/2018 by the Dentist.

Additional comments:
A RN evaluates dental sick calls through a face-to face encounter within 24 hours of receiving the sick call complaint. The RN then places a chart review for the dentist to review the sick call assessment. The dentist schedules the patient to be seen within 30 days based on the acuity of the complaint in the RN assessment.

Previous Site Visit September 2017:
All findings within ten charts reviewed met 100% audit tool criteria.

AMERICAN OVERSIGHT

Acute Laboratory Testing

Ten charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

In one chart reviewed, the patient had baseline labs drawn for hypertension and diabetes. There was no documentation in the medical chart of the patient being advised of his lab results.

All other areas within this category had 100% compliance.

Previous Site Visit September 2017:
All findings within ten charts reviewed met 100% audit tool criteria.

Diagnostic Services and Specialty Care Access

Ten charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

Five of ten (50%) charts had a documented time urgency included on the order for specialty care or diagnostic services.

In one chart reviewed the patient was not re-evaluated every 30 days until the off-site appointment was completed. An optometry referral was ordered on 3/6/2018. The off-site appointment was completed on 4/16/2018.

In another chart reviewed, a mammogram was completed on 4/26/2018. The Nurse Practitioner did not notate that the study results were reviewed until 5/9/2018.

Previous Site Visit September 2017:
Three of ten (30%) charts had a documented time urgency included on the order for specialty care or diagnostic services. All other findings within ten charts reviewed met 100% audit tool criteria.

Mental Health Treatment Planning

Ten charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

All areas within this category had 100% compliance.

Previous Site Visit September 2017:
All findings within ten charts reviewed met 100% audit tool criteria.

Treatment of Disability

Four charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

All areas within this category had 100% compliance.

Additional Comments:
The facility maintains a current list of all patients with disabilities.
ADL assistance was not needed by any of the four patients in the charts reviewed.

Previous Site Visit September 2017:
All findings within two charts reviewed met 100% audit tool criteria.

Complaints and Grievances

Two medical grievances were submitted from February 2018 through April 2018. Both grievances were appropriately addressed within one business day of receipt.

AMERICAN OVERSIGHT

Previous Site Visit September 2017:
There were ten medical grievances from June 2017 through August 2017. The facility's grievances do not reveal any possible barriers to care or repetitive concerns that could affect clinical care. All grievances were addressed within five working days of receipt.

AMERICAN OVERSIGHT

ASSESSMENT OF QUALITY OF HEALTH SERVICES
CHRONIC DISEASES

Diabetes

Eight charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

All areas within this category had 100% compliance.
In one chart reviewed, aspirin was not clinically indicated to be prescribed due to the detainee's age and diabetes being the only chronic condition.
In three charts reviewed, the HgbA1C was under the 8.0 goal.

Previous Site Visit September 2017:
Four of five (80%) charts had the blood sugar measured and recorded on intake. All other findings within the five charts reviewed met the audit tool criteria.

Human Immunodeficiency Virus (HIV)

Seven charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

In one chart reviewed, the detainee was not seen by an HIV or Infectious Disease (ID) specialist within 30 days of HIV identification. The detainee arrived to IRDF on 12/25/17 and saw the off-site ID specialist on 3/13/18. The Clinical Director (CD) of IRDF spoke with the ID doctor via telephone and together consulted on the plan of care to wait on the ID referral until all lab work returned. The detainee's CD4 count was normal, and there was an undetectable viral load. The ID doctor advised the CD to continue the medication Atripla once daily until the off-site ID appointment.

All remaining areas within this category had 100% compliance.

Previous Site Visit September 2017:
All findings within four charts reviewed met 100% audit tool criteria.

Hypertension

Ten charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

All areas within this category had 100% compliance.

Previous Site Visit September 2017:
All findings within four charts reviewed met 100% audit tool criteria.

Asthma

Four charts were available to be reviewed using the Quality of Medical Care Inspection Worksheet.

All areas within this category had 100% compliance.
Two of four charts did not have a peak flow completed at the initial physical exam which is conducted the same day as the intake screening. This was due to neither patient stating they had a diagnosis of asthma during their intake medical screening.

In one chart reviewed, the asthma diagnosis was given after the detainee had an urgent care complaint of shortness of breath and wheezing one month after arrival to the facility.
In another chart reviewed, the detainee placed a sick call three days after arrival to the facility stating he had asthma since age six.

Previous Site Visit September 2017:
All findings within three charts reviewed met 100% audit tool criteria.

Seizure Disorder

Four charts were available to be reviewed using the Quality of Medical Care Inspection

AMERICAN OVERSIGHT

Worksheet.

All areas within this category had 100% compliance.

Previous Site Visit September 2017:
All findings within two charts reviewed met 100% audit tool criteria.

AMERICAN OVERSIGHT

Recommendations

(b)(5)

Facility Actions

A closeout meeting was conducted with the Health Services Administrator (HSA) on 5/25/2018. FMC findings were communicated daily to the HSA and DON throughout the five day site visit.

The SND Field Office was informed there were no standards deficiencies found during this site visit.

Additional Comments

The IRDF September 2017 UCAP was approved by IHSC leadership on 2/6/2018. All findings were addressed and completed.

Medical Care

☐ Compliant Non-Compliant with: ☐ 1 – 2 Standards ☒ 3 Standards ☐ >3 Standards

Description of deficiencies:

No new medical care deficiencies found during this site visit.

Continued deficiency finding:
PBNDS 2011: 4.3 Medical Care, B. Designation of Authority; Health care personnel perform duties within their scope of practice for which they are credentialed by training, licensure, certification, job description, and/or written standing or direct orders by personnel authorized by law to give such orders.

Three of ten (30%) charts had upon intake, nurses continuing previously prescribed medications from other facilities without first consulting and receiving orders from a mid-level provider or physician at the facility to continue the medication. (Outside RN scope of practice)

PBNDS 2011: 4.3 Medical Care, L. Comprehensive Health Assessment; Each facility's health care provider shall conduct a comprehensive health assessment ... within 14 days of the detainee's arrival unless more immediate attention is required due to an acute or identifiable chronic condition.

19 of 20 (95%) had a complete health examination including vital signs, adequate medical and behavioral health history, and physical examination by licensed MD/PA/NP/RN within 14 days of booking or within 48 hours if on daily medications or have a chronic illness.

PBNDS 2011: 4.3 Medical Care, F. Facilities, 3. Medical Housing; If there is a specific area, separate from other housing areas, where detainees are admitted for health observation and care under the supervision and direction of health care personnel ...maintenance of a

AMERICAN OVERSIGHT

separate medical housing record distinct from the complete medical record.

-OHU medical housing had a separate section designated in the medical chart in nine out of ten (90%) charts reviewed.

Resolved findings:
-All four of four (100%) mid-level provider encounters involving a sensitive area exam had a chaperone's name listed.

-No charts of detainees who identify as transgender were available to review.

Previous Site Visit August 2016:
-Upon intake, nurses continue prescribed medications without first consulting or getting approval from a mid-level or MD to continue the medication. (Outside RN scope of practice)

-A nurse performed a urine dipstick without a provider's order.(Outside RN scope of practice)

-Lack of documentation of a chaperone during private examinations remains deficient. Four of six (67%) charts reviewed with a sensitive area exam had a chaperone documented.

-Eight of ten (80%) had a complete health evaluation within 14 days.

-Four of 14 (29%) charts had a separate section labeled "OHU" for medical housing admissions.

-Transgender detainees who were already receiving hormone therapy when taken into ICE custody shall have continued access. One chart had a transgender detainee who had been on hormone therapy for years not continued on hormone therapy because she was not actively taking the medication for 15 days prior to entering custody.

Chronic Care *Enter all detainees with chronic conditions on the IGSA/CDF chronic care tracking sheet and submit with report.*

AMERICAN OVERSIGHT

Suicide Prevention and Intervention

Total number on suicide watch:	Total number of suicide watches in last 12 months:
0	21

☒ Compliant Non-Compliant with: ☐ 1 – 2 Standards ☐ 3 Standards ☐ >3 Standards

Description of deficiencies:

Reviewed 10 of 10 medical records. Detainees are placed in a secure one-to-one observation status in a modified cell in the observation housing unit (OHU) when a suicidal ideation or attempt is made. Detainees are followed up by a behavioral health provider at least every 24 hours when on suicide watch.

Security staff post orders in the OHU protocol binders are noted to include the allowance of personal hygiene supplies and showers when on suicide watch. The facility has one designated suicide watch room, which has been modified to be without structures that could aid in self-harm. If a second detainee requires a 1:1 suicide watch, they are sent to Alvarado Parkway Institute, an inpatient psychiatric hospital, when appropriate.

Previous Site Visit August 2016:
There is one designated suicide watch room, without furniture or objects that could be used for self-harm. The OHU room adjacent to the suicide watch room is sometimes used as a "step-down" room, where detainees can be moved to as their suicide watch is ending. This room has a sink, toilet, and metal bed frame that could be used for self-harm.
The HSA insists the "step-down" adjacent room is never used for actively suicidal patients.

Terminal Illness, Advance Directives, and Death

Total number of active DNR cases:	Total number of deaths in last 12 months:
0	0

☒ Compliant Non-Compliant with: ☐ 1 – 2 Standards ☐ 3 Standards ☐ >3 Standards

Description of deficiencies:

There have been no reported deaths, detainees with terminal illness, or detainees with advance directives within the last 12 months.

Previous Site Visit August 2016:
No deficiencies noted.

Other Observations

IHSC FMC Site Visit March 6- March 10, 2017.

48 total charts reviewed.

Facility Data:
Imperial Regional Detention facility is a dedicated IGSA with MTC as the contractor for both security and medical personnel.
The current average length of stay is 80 days.

In the observation housing unit (OHU) located in the medical department there are six negative pressure rooms, one suicide watch room, and seven non-negative pressure rooms. There is a desk within sound of the OHU rooms where a security staff member is posted; however, the windows of some of the OHU rooms are difficult to see through from the desk due to the facility layout. The officer posted there makes rounds no less than every 30 minutes, and more frequently, as the provider orders.

Staffing-

(b)(7)(E)

AMERICAN OVERSIGHT

(b)(7)(E)

The psychiatrist remains available on weekends for medication review and adjustment and takes phone calls during the week in regards to medication adjustments. The psychiatrist provides telephone orders for psychiatric medications for new arrivals and evaluates the detainee at a later date when an appointment is available. The LCSW evaluates detainees pending the psychiatrist's evaluation.

The clinical director routinely see chronic care patients every 21-45 days rather than waiting every 90 days.

Review of medical staff training was found to have mandatory training up to date. Personnel files were organized and filed appropriately in the HSA's office. Reviewed (b)(7)(E) medical staff credential files. All had their required license and BLS card current.

(b)(7)(E)

During the walk through of the housing units, the FMC noted soap dispensers were now installed (new since prior site visit) in the majority of housing units. The medical clinic is kept clean, mopped, trash and bio-harzard bins emptied before full, and sharp containers were replaced when full.

Deficiencies for Areas Evaluated

Deficiencies are resolved when findings are 100%.

Three of ten (30%) charts had upon intake, nurses continue previously prescribed medications from other facilities without first consulting and getting approval from a mid-level or MD to continue the medication. (Outside RN scope of practice)

19 of 20 (95%) had a complete health examination including vital signs, adequate medical and behavioral health history, and physical examination by licensed MD/PA/NP/RN within 14 days of booking or within 48 hours if on daily medications or have a chronic illness. (PBNDS 2011)

OHU medical housing had a separate section designated in the medical chart in nine out of ten (90%) charts reviewed. (PBNDS 2011)

Audit Tool findings (not deficiencies):

Dental scheduled appointments are entered into the Offender Data System (ODS) computerized database, but are not written in the narrative section of the medical chart. Only when an appointment needs to be rescheduled does a notation of the scheduled appointment appear in the medical chart. As a medical chart reviewer, it is difficult to determine if/when follow-up appointments are scheduled. (Quality of Care)

Gender is not included among identifying information in medical charts in ten of ten charts reviewed. (Quality of Care)

All previous months of MARs weren't included in the medical record, six of nine did not have a January 2017 MAR included in the medical record. (Quality of Care)

AMERICAN OVERSIGHT

Annual dental examination refresher training for RN PE and sick call exams is not being provided by the Dentist. (Quality of care)

A documented time urgency is not included on the order for specialty care or diagnostic services. (Quality of care)

A delay in reviewing specialist reports for specialty care and diagnostic services is noted in two out of ten charts reviewed. (Quality of care)

AMERICAN OVERSIGHT

Suicide Screening

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area.

Ten of ten (100%) charts reviewed had the suicidal patient evaluated by a mental health professional within 24 hours of identification or immediately if the situation was emergent, and the patient was evaluated daily while on suicide watch by a qualified mental health professional. Constant 1:1 monitoring was practiced while the patient was on suicide watch in all ten charts reviewed. Zero of ten (0%) charts had evidence that earlier intervention might have prevented deterioration to the point of need for a suicide watch. Documentation that the checks were documented consistently were not available in the medical charts to review. The constant 1:1 documentation of checks are stored in the custody files and were not available to be reviewed at time of site visit.

Additional Comments:

In the previous three months, ten patients were placed on suicide watch.

The facility uses an acceptable suicide risk management screening tool during the intake screening that asks for history of suicide attempts and current suicidal ideation.

Training logs indicate that all screeners and staff in direct contact with detainees are trained to assess suicide risk.

Previous Site Visit August 2016:
All findings met audit tool criteria.

Health Assessment

20 charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. 20 of 20 (100%) charts had the initial screen completed within 12 hours of booking and had timely follow-up for significant findings of acute and chronic conditions. 18 of 18 (100%) charts had a chest x-ray ordered and read. Seven of seven (100%) charts of detainees who screen positive for mental illness or suicide risk were referred for evaluation. 19 of 20 (95%) had a complete health examination including vital signs, adequate medical and behavioral health history, and physical examination by licensed MD/PA/NP/RN within 14 days of booking or within 48 hours if on daily medications or have a chronic illness.

Additional Comments:
In one chart reviewed the detainee arrived to the facility on February 9, 2017. He was seen at a chronic care appointment for hypertension by the clinical director on February 10, 2017; however, the complete health evaluation was not completed until March 3, 2017. This was 21 days after his arrival to the facility.

In 20 charts reviewed, none were noted to have PPDs placed during intake as chest x-rays are performed. All charts are noted to have chest x-ray results in the medical record.

Previous Site Visit August 2016:
87% of charts had timely follow up of a chronic or acute condition. 80% had a complete health evaluation with 14 days or 48 hours if chronic in nature.

Urgent Care (Sick Call)

Eight charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Eight of eight (100%) charts had timely and appropriate evaluation by nursing staff, care was delivered within the scope of the nurse's license, vital signs were documented, a nursing referral to a MD/PA/NP/DMD submitted within 24 hours where appropriate, and if referred, an MD/PA/NP/DMD assessment and plan documented.

Additional Comments:
All telephone orders documented by the RN were co-signed by the ordering provider.

AMERICAN OVERSIGHT

Previous Site Visit August 2016:
86% charts had timely and appropriate evaluations by nursing staff within the scope of the nurse's license. 100% had vital signs documented. 83% had referrals to MD/MLP within 24 hours where appropriate, and 100% had a MD/MLP assessment and treatment plan documented.

Evaluation of Care Provider to ED/Hospital Visit for Conditions Sensitive to Ambulatory Care

Six charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Six of six (100%) charts had an outbound progress note, discharge documentation from the hospital or emergency department in the chart, and an inbound assessment. Zero of six (0%) had evidence that earlier intervention might have prevented deterioration to the point of need for hospital care. Five of five (100%) had assessments that reflect hospital findings and concurrence with hospital recommendations.

Previous Site Visit August 2016:
No charts reviewed had evidence that earlier intervention would have prevented the need for emergency care. All findings met audit tool criteria.

Medication Administration Practices

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Two of two (100%) charts had documentation that the prescribing clinician was notified of consecutive refusals and there was an appropriate response from the clinician.

Additional Comments:

The facility has policy "Pharmaceutical Management" No. 904E.128FNI in place which states "detainees who are on direct observation therapy and refuse medication three consecutive times will be placed on chart review for the medical provider. Upon review the medical provider will determine if medication will be continued, detainee will be seen or medication will be discontinued. Medications for the following conditions will be placed on for review after only one refusal, TB and HIV."

All previous months of MARs were filed in the record filing area. Over the counter medications are provided by both the medical department and can be purchased from the commissary. 50% of patients are on self-administered medication, also called keep on person (KOP) medication. The current and previous month of MARs was not available to review the percentage that have blanks, consecutive refusals, or no shows.

Previous Site Visit August 2016:
Three of six charts had refusals with the prescribing clinician notified with documentation of the consecutive refusals. All six had an appropriate response from the clinician.

AMERICAN OVERSIGHT

Continuity of Medication

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Seven of ten (70%) charts had the period of time from the completion of intake screening to the ordering of medications [by a provider with medication prescribing privileges] less than 24 hours. Ten of ten (100%) had a less than 24 hour period of time from the order to first dose of medication.

Additional Comments:
Three of ten (30%) charts had the Registered Nurse (RN) continuing medication at intake listed on the transfer summary without a MD/NP/PA at IRDF providing a medication order.

Notations by the RN in the medical chart included, "New arrival with prescription medications, as per protocol, patient to continue .," and "medications to be continued x 30 days as per policy, review with provider next business day."

No IRDF policy was given to the FMC that included a standing order to continue previously prescribed medication at intake without a facility provider order.

Previous Site Visit August 2016:
Upon intake, nurses continue previously prescribed medications from other facilities without first consulting or getting approval from a mid-level or MD to continue the medication. (Outside RN scope of practice)

Mental Health Screen

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Eight of eight (100%) charts of detainees with positive screens for mental illness were evaluated by mental health professionals in a timely manner (emergent= immediately, urgent= within 24 hours; routine= within 7 days).

Previous Site Visit August 2016:
All findings met audit tool criteria.

Medical Recordkeeping Practices

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Ten of ten (100%) were partially compliant for including all identifying information. All ten charts had the detainee name, ID number, and date of birth, but all were missing the gender. Nine of ten (90%) had a current problem list including medical and mental health diagnoses and known allergies. One of ten (10%) was partially compliant, missing the mental health diagnosis on the problem list. Ten of ten (100%) were compliant with receiving screen and health assessment forms, progress notes with documentation of significant findings, diagnoses, treatments, and dispositions preferably in SOAP format, clinician orders for medications signed, consents for medical care and treatment, date and time of each encounter, integrated medical, dental, and mental health record, timely filing within 72 hours, and content organized for easy retrieval of outside records, pertinent diagnostics and consultations. Six of nine (66%) were partially compliant for MARs placed in the record within two weeks of the previous month. Though these charts had the previous month of February in the charts, they did not have the January MAR placed in these six medical records. Three of nine (33%) were compliant with the MAR placed in the medical record within two weeks of the previous month because they arrived in February. Nine of nine (100%) were compliant for acknowledged and dated lab and diagnostic reports.

Seven of seven (100%) were compliant for flow sheets. Five of five (100%) were complaint for signed refusals of care. Three of three (100%) were compliant for results of specialty consultations and referrals acknowledged and dated, and immunization records were applicable. Two of two (100%) were compliant for discharge summaries from ED and hospitalizations, and consolidated medical record with records from prior stays incorporated. Six of six (100%) were compliant for special needs treatment plan where applicable.

AMERICAN OVERSIGHT

Additional Comments:
Med/psych alert stickers and chronic care labels were listed on all outside covers of chronic care charts reviewed. OHU medical housing had a separate section designated in nine out of ten (90%) charts reviewed. No loose, unfastened papers were noted in medical charts.

Previous Site Visit August 2016:
85% charts reviewed had both a med/psych alert sticker and chronic care stamp on the front of the medical record and had the master list of problems/health issues updated at the front of the chart. 29% charts had a separate section labeled "OHU" for OHU admissions to be kept separate from the rest of the record.

An allergy sticker was noted on charts with documented allergies in all five charts with allergies reviewed. One out of 15 charts had loose papers not fastened into the chart.

Pregnant Women

No charts were available to review for this area.

Local ICE ERO continues to release any female identified as pregnant during intake.

Additional Comments:
Pregnancy tests are performed on all females during intake screening.

Previous Site Visit August 2016:
No pregnant women housed at IRDF at that time.

Dental Care

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Ten of ten (100%) charts were screened for dental symptoms during the intake process and dental clinical notes included findings, diagnosis, treatment and plans. Nine of nine (100%) were evaluated by a qualified health professional within 48 hours of request. Eight of eight (100%) charts had the patient scheduled for follow-up treatment as recommended.

Additional Comments:
Three of three charts had an annual dental exam/cleaning or refusal form documented in the medical chart for detainees in custody over one year.

Dental scheduled appointments are entered into the Offender Data System (ODS) computerized database, but are not written in the narrative section of the medical chart. Only when an appointment needs to be rescheduled does a notation of the scheduled appointment appear in the medical chart. As a medical chart reviewer, it is difficult to determine if/when follow-up appointments are scheduled.

Annual dental examination refresher training for RN PE and sick call evaluations is not being provided to nursing staff. The dentist provides dental assessment training only upon new RN hire.

Previous Site Visit August 2016:
Five of six charts reviewed had an annual dental exam documented after being in custody for one year and had a dental cleaning.

AMERICAN OVERSIGHT

Acute Laboratory Testing

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. One of ten (10%) charts reviewed had blood drawn or test done within one business day of ordered lab. Ten of ten (100%) had the report back within 24 hours for acute labs and within seven days for routine labs, and had clinical acknowledgment and appropriate clinical response. Nine of nine (100%) charts reviewed had the patient notified of laboratory results.

Additional Comments:

The director of nursing checks the lab log daily.

Routine and chronic care labs are not drawn on the next business day because the lab draw schedule is compiled more than 24 hours prior. The facility provider rarely puts a time frame on lab orders; however, all labs done at the facility are drawn within 2-3 business days. Garcia labs consistently provides results to the facility in a timely manner.

For all acute or urgently needed lab work, detainees are transported to El Centro Regional Medical Center within 24 hours for lab draw. IRDF's contracted laboratory provider, Garcia labs, does not process stat labs.

Previous Site Visit August 2016:
No charts were available to review for this area.

Diagnostic Services and Specialty Care Access

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Zero charts had a documented time urgency for the specialty care or diagnostic service ordered. Ten of ten (100%) had the appointment completed within 45 days of the order or within the ordered timeframe. Eight of ten (80%) had the facility clinician acknowledge the specialist's report in the medical record within seven days of the date of service.

One chart reviewed had a mammogram report reviewed by the facility provider ten days after the date of service due to holiday leave of the facility clinician.

Another chart reviewed had a delay from the neurology office faxing the completed report to the facility. The facility provider reviewed the report the day it was received from the neurologist's office, 12 days after the date of service. This delay in reviewing the report was not the fault of the facility and attempts of obtaining the report from the off-site provider was documented in the medical record.

Additional Comments:

None of the appointments took longer than 30 days to schedule. Detainees are referred to appropriate specialists in a timely manner through the MedPAR system.

Previous Site Visit August 2016:
All ten charts had the appointment within the ordered timeframe or within 45 days of the order, and the facility clinician acknowledged the specialist's report within seven days of the date of service. All findings met audit tool criteria.

Mental Health Treatment Planning

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. All ten of ten (100%) charts had a clinical assessment, treatment, and follow-up plan documented. Eight of eight (100%) had a treatment plan updated at a minimum of every 90 days.

Additional Comments:
Two of the ten charts reviewed were for detainees in custody less than 90 days.

Previous Site Visit August 2016:

AMERICAN OVERSIGHT

All ten charts had a clinical assessment, treatment, and follow-up plan documented. Five of five had a treatment plan updated at a minimum of every 90 days. All findings met audit tool criteria.

Treatment of Disability

No charts were available to review for this area.

Additional Comments:
The facility maintains a current list of all patients with disabilities.

Previous Site Visit August 2016:
No cases of disability available to review.

Complaints and Grievances

13 charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. There were 13 total medical grievances in the last three months. The facility's grievances does not reveal any possible barriers to care or repetitive concerns that could affect clinical care. All grievances were addressed within five working days of receipt.

Three grievances were regarding availability of care.
Three grievances were for denial or refusal of specific care.
One grievance was for delay in care.
Two grievances were for competency/professional skillset of medical staff (the same individual grieved against the same staff member twice).
Three grievances were for attitude, demeanor, or conduct of staff.
One grievance was for "other," which was a sick call request and not a grievance, however it was included on the grievance tracker and responded to within the appropriate time frame.

12 of the 13 were informal grievances, while one was a formal grievance and was referred to the Grievance Appeal Board.

Previous Site Visit August 2016:
There were 28 total medical grievances in the last three months. Nine of these were formal grievances, while 19 were informal in nature. All of the 28 grievances were addressed within five business days.

AMERICAN OVERSIGHT

Diabetes

Seven charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Seven of seven (100%) charts had a blood sugar recorded on intake, was seen by a mid-level provider or physician for chronic care within 14 days of illness identification, and had lipids measured within one year. Six of six (100%) had a baseline HgbA1c performed within 30 days of intake or within the past three months. Four of four (100%) had the patient followed up at least every 90 days with vital signs, aspirin prescribed as clinically indicated, degree of control documented, and a strategy to attain diabetes control if HgbA1C was above goal.

Additional Comments:
The clinical director follows the American Diabetes Association and Bureau of Prison Diabetes clinical practice guidelines.

Previous Site Visit August 2016:
All findings met audit tool criteria except for three of four (75%) charts had a degree of control documented.

Human Immunodeficiency Virus (HIV)

Six charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Six of six (100%) charts had a CD4+ and viral load completed within 14 days of arrival or within the last three months, had antiretroviral treatment considered and documented, patient was seen by a mid-level provider or physician for chronic care at least every 90 days, and had a chest x-ray completed within 72 hours of problem identification if not already done. Five of five (100%) were seen by a HIV or ID specialist within 30 days of HIV identification.

HIV status was identified by recent laboratory results for three charts reviewed, by medical records for two charts reviewed, and by patient interview for one chart reviewed.

Additional Comments:
In one chart reviewed the clinical director consulted with the off-site infectious disease doctor prior to sending the patient for an ID consult. The ID doctor advised to begin treatment, Atripla 600-200-300mg tablet daily and to get a HIV genotype prior to sending for the ID consult.

The clinical director follows Bureau of Prison HIV clinical practice guidelines.

Previous Site Visit August 2016:
No charts were available to review for this area.

Hypertension

Ten charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Ten of ten (100%) charts had a blood pressure reading at intake and was seen by a MD/PA/NP within 14 days of illness identification. Six of six (100%) had a treatment plan initiated within 14 days of identification if the blood pressure was >140 systolic or >90 diastolic. Nine of nine (100%) had a chronic disease guideline including baseline laboratory testing followed.

Additional Comments:
The clinical director follows the Bureau of Prison Hypertension clinical guidelines and the American Academy of Family Physicians clinical practice guidelines.

Previous Site Visit August 2016:
All findings met audit tool criteria.

Asthma

Three charts were reviewed using the IHSC Quality of Care Audit tool to evaluate this area. Three of three (100%) charts were seen in the chronic care clinic by a mid-level provider or physician within 14 days of illness identification, had a peak flow completed at the chronic care appointment or within the last three months, and had a chronic disease guideline

AMERICAN OVERSIGHT

followed which addressed disease severity, prescription of medication consistent with severity, and documented degree of control. Three of three (100%) had a peak flow completed at the initial physical exam/intake screening which are conducted the same day.

In September 2016 IRDF began completing the physical health assessment directly after the intake screening. A peak flow is not repeated at both the intake screening and health assessment.

The clinical director follows the American Academy of Family Physicians asthma clinical practice guidelines and the Bureau of Prison Asthma guidelines.

Previous Site Visit August 2016:
75% charts had the patient seen in chronic care clinic within 14 days and had a peak flow completed at the physical exam. 100% charts had a peak flow completed within the last three months and had a chronic disease guideline followed that addressed disease severity, medication prescribed consistent with severity, and degree of control.

Seizure Disorder

One chart was reviewed using the IHSC Quality of Care Audit tool to evaluate this area. One of one (100%) had an appropriate neurological history completed at the initial physical exam, seen in the chronic care clinic by a mid-level provider or MD within 14 days of illness identification, had serum drug levels performed and acknowledged every 3 months until stable, and then every 6 months when indicated, and had a treatment plan established. Zero of one (0%) had orders for a bottom bunk.

Additional Comments:

The clinical director uses the American Academy of Family Physicians guidelines to manage seizures. No other charts with a diagnosis of seizures were available to be reviewed.

In the one chart reviewed, the patient arrived to the facility on 9/13/2016. He was prescribed seizure prophylactic medication for six months by a doctor in India. That treatment ended on 10/31/2016. The patient denied past seizure activity.

Previous Site Visit August 2016:
Two of two charts had a neurological history completed at the initial PE. All three charts had the patient seen in the chronic care clinic within 14 days, had a treatment plan, and orders for a bottom bunk. One detainee should have had serum drug levels performed every three months until stable; however, there was no evidence that serum drug levels were drawn.

AMERICAN OVERSIGHT

Recommendations

(b)(5)

Facility Actions

A closeout meeting was conducted with the Health Services Administrator and Director of Nursing.

A summary of site visit findings was emailed to the FOD, DFOD over detention, AFOD of IRDF, SDDO/AOIC, HSA, DON, COR, DSM, Warden, and Assistant Warden on March 15, 2017.

Additional Comments

On April 17, 2017, MTC management removed the posted officer from the OHU position. The FMC notified ERO (COR, AFOD, SDDO/AOIC) of this safety concern and PBNDS 2011 deficiency. A contract deficiency report was submitted by ERO to the contractor on April 20, 2017. The COR and AFOD are following up as appropriate.

ACCREDITATION REPORT

Commission on Accreditation for Corrections

ICE Health Service Corps (IHSC)
Eloy Detention Center
Eloy, Arizona

The mission of the Commission on Accreditation for Corrections is to upgrade and improve practices and conditions in adult and juvenile correctional facilities and programs through an accreditation process which is founded on a commitment to accountability, professionalism and respect for basic human rights and which recognizes sound and effective correctional practices, while striving towards excellence in the field of corrections.

October 19, 2018

ICE Health Service Corps (IHSC)
Eloy Detention Center (IHSC)
Eloy, Arizona

Congratulations!

It is a pleasure to officially inform you that the Eloy Detention Center (IHSC) was accredited by the Commission on Accreditation for Corrections at the American Correctional Association 2018 Congress of Correction on August 6, 2018 in Minneapolis, Minnesota.

Your accreditation represents the satisfactory completion of a rigorous self-evaluation, followed by an outside review by a team of experienced, independent auditors.

Every profession strives to provide a high quality of service to society. To know that you, your staff, and other officials are complying with the requirements of the accreditation process is indeed a statement of a high level of commitment to the staff and persons under your care.

On behalf of the American Correctional Association and the Commission on Accreditation for Corrections, thank you for your commitment to the corrections profession and to the accreditation process.

Sincerely,

Denise M. Robinson

Denise Robinson, Chairperson
Commission on Accreditation for Corrections

For Immediate Release

Eloy Detention Center (IHSC) Awarded National Accreditation

Denise Robinson, Chairperson of the Commission on Accreditation for Corrections (CAC), and Bridget Bayliss-Curren, Director of Standards and Accreditation, American Correctional Association recently announced the accreditation of the Eloy Detention Center (IHSC). The award was presented in conjunction with the American Correctional Association Congress of Correction Conference on August 6, 2018 in Minneapolis, Minnesota.

In presenting the award, Denise Robinson, Chairperson of the CAC, and Lannette Linthicum, President of the American Correctional Association (ACA), complimented the facility on their professional level of operation and their success in completing the accreditation process. The agency is one of over 1,500 correctional organizations currently involved in accreditation across the nation.

The accreditation program is a professional peer review process based on national standards that have evolved since the founding of the Association in 1870. The standards were developed by national leaders from the field of corrections, law, architecture, health care, and other groups who are interested in sound correctional management.

ACA standards address services, programs, health care and security operations essential to effective correctional management. Through accreditation, an agency is able to maintain a balance between protecting the public and providing an environment that safeguards the life, health, and safety of staff and offenders. Standards set by ACA reflect practical up-to-date policies and procedures and function as a management tool for agencies and facilities throughout the world.

The three-year accreditation award granted to the Eloy Detention Center (IHSC) does not signal the end of their involvement in the accreditation process. During the award period, staff will work to improve any deficiencies identified during the audit and maintain continuous compliance with the standards.

Congratulations on your accreditation award! You are now a member of the elite in achieving correctional excellence. The certificate you have received is but a small symbol of the enormous dedication and commitment demonstrated by each and every member of your staff to the accreditation process, and I urge you to display it prominently as a continual reminder of the level of professionalism achieved. This is just the beginning of your journey, however, for the true test of excellence is the test of time. It is critical that your operation be able to sustain this achievement over time and be constant through both prosperity and adversity.

Achieving American Correctional Association Accreditation means you have demonstrated your dedication to getting the job done right, and that you are holding your agency to a higher standard.

Thank you for your commitment to the American Correctional Association and the standards and accreditation process.

JeffreyWashington, Deputy Director
American Correctional Association

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-000958

Overview of the American Correctional Association

The American Correctional Association is the oldest and most prestigious correctional membership organization in the United States. Founded in 1870, ACA currently represents more than 20,000 correctional practitioners in the United States and Canada. Members include all levels of staff from a wide variety of correctional disciplines and programs as well as professionals in allied fields and representatives from the general public. In addition, the Association represents the interests of 74 affiliated organizations whose goals, while similar to those of ACA, focus on specialized fields and concerns within the realm of corrections.

At its first organizational meeting held in Cincinnati, Ohio, in 1870, the Association elected then-Ohio governor and future U.S. President, Rutherford B. Hayes, as its first president. The Declaration of Principles developed at that first meeting became the guidelines for correctional goals in both the United States and Europe.

Since that time, ACA has continued to take a leadership role in corrections and work toward a unified voice in correctional policy. In recent years, one of the Association's major goals has been the development of national correctional policies and resolutions of significant issues in corrections. These policies are considered for ratification at the Association's two annual conferences and ratified policies are then disseminated to the field and other interested groups. ACA has also had a major role in designing and implementing professional standards for correctional practices, as well as methods for measuring compliance with those standards.

The Association conducts research and evaluation activities, provides training and technical assistance, and carries out the regular responsibilities of any professional membership organization, including a full publications program. The Association's two annual conferences, held in varying cities across the nation, attract more than 5,000 delegates and participants each year from the 50 states, U.S. territories, and several foreign countries.

Membership in ACA is open to any individual, agency, or organization interested in the improvement of corrections and the purposes and objectives of the Association. Members include the majority of state, local, provincial, and territorial correctional agencies; individual correctional institutions and local jails, pretrial programs and agencies, schools of criminal justice in colleges and universities, libraries; and various probation, parole, and correctional agencies. Most of ACA's members are employed at the federal, state, and local levels. Members also include more than 200 volunteers affiliated with these agencies as administrators or as members of advisory boards and committees.

AMERICAN OVERSIGHT

Organizational Purposes of the American Correctional Association

Among the most significant purposes of the Association as outlined in its Constitution, are:

> *To provide a professional association of persons, agencies, and organizations, both public and private, who hold in common the goal of improving the profession of corrections and enhancing their contribution to that profession.*
>
> *To broaden and strengthen support for the Association's goals by advocating Association policies, resolutions, positions, and standards to policymakers and the public and by forming coalitions with other professional organizations sharing these goals.*
>
> *To develop standards for all areas of corrections and implement a system for accreditation for correctional programs, facilities and agencies based on these standards. Where feasible, standards shall be based on performance outcome.*
>
> *To conduct or sponsor corrections conferences, congresses, institutes, forums, seminars and meetings.*
>
> *To publish and distribute journals and other informative materials relating to criminology, crime prevention, and corrections and to encourage and stimulate research of these matters.*
>
> *To promote recognition of corrections as a profession, and those who work in corrections as professionals, and to ensure validity of that recognition by encouraging the recruitment and development of highly qualified corrections professionals, and by developing and implementing a certification program for corrections professionals*

In carrying out these purposes, ACA supports programs for policy analysis, demonstration, effective delivery of health services to offender populations and research. ACA also provides testimony, consultation, publications, conferences, workshops, and other activities designed to stimulate constructive action regarding correctional issues.

Standard and Accreditation

Perhaps ACA'S greatest influence has been the development of national standards and the accreditation process. ACA standards address services, programs, and operations essential to effective correctional management. Through accreditation, an agency is able to maintain a balance between protecting the public and providing an environment that safeguards the life, health, and safety of staff and offenders. Standards set by ACA reflect practical up-to-date policies and procedures and function as a management tool for correctional agencies in the United States and Mexico.

AMERICAN OVERSIGHT

Organizational Structure of the American Correctional Association

Executive Committee

The Executive Committee is composed of the elected officers of the Association - president, vice president, treasurer, two Board of Governors' members, the immediate past president, the president-elect, and the ACA executive director. The Executive Committee meets at least quarterly and exercises most of the powers of the Board of Governors during the intervals between meetings of the board.

Board of Governors

ACA's bylaws vest control of the Association with an 18-member elected Board of Governors composed of the officers of the Association and five at-large members. To ensure the interdisciplinary nature of the Association, board members must represent the following areas:

Correctional Administration
Institutions
Juvenile
Probation
Parole, Aftercare or Post-Release Supervision
Community Programs
Detention
Education
Health Care

Delegate Assembly

The Delegate Assembly is composed of delegates from the professional affiliates, geographical chapters, membership at-large, Board of Governors, past presidents of ACA, and representatives of each military service. The Delegate Assembly can establish policy, define Association positions on broad social and professional issues, and determine major programs and legislative priorities. They meet at least twice annually, at the Winter Conference and Congress of Correction.

Committees

The majority of the Association's activities take place through committees. Each committee chair reports to the Association's Board of Governors at least twice a year. In this way, the Association collectively benefits from the involvement and contribution of the hundreds of individuals who function on the various committees. Ad-hoc committees are appointed by the president of the Association.

The current committees and councils are:

Committee on Affirmative Action
Committee on Constitution and Bylaws

AMERICAN OVERSIGHT

Committee on International Relations
Committee on Congress Program Planning
Committee on Legal Issues
Committee on Correctional Awards
Committee on Membership
Committee on Military Affairs \
Council of Professional Affiliates
Council of Dual-Membership Chapters and State and Geographical Affiliates
Nominating Committee
Council on Professional Education
Credentials Committee
Research Council
Eligibility Committee
Resolutions & Policy Development Comm
Committee on Ethics
Performance Standards Committee
Legislative Affairs Committee

Affiliates and Chapters

Affiliates and state chapters are major features of the Association's structure. They represent professional, regional, and state groups across the United States and Canada. Affiliates and chapters contribute to the professional development of all members by providing consultation in their respective areas of interest and by participating in seminars and workshops at ACA's annual conferences.

The following affiliates and chapters are currently associated with ACA:

American Catholic Correctional Chaplains Association
American Correctional Chaplains Association

AMERICAN OVERSIGHT

Major Activities of the American Correctional Association

Legislation

The American Correctional Association is involved with all major issues affecting corrections today. Members and ACA staff maintain close working relationships with committees of the U.S. Congress and all federal agencies and groups whose decisions affect correctional policy. Expert testimony on a wide range of correctional issues is prepared for congressional committee and subcommittee hearings, and recommendations are provided to federal administrative agencies.

To ensure that the concerns and issues of the corrections profession are represented in proposed legislation and public policy, ACA's legislative liaison is addressing legislative and government concerns that will impact the corrections profession. ACA has established partnerships between chapters and affiliates and other national policy making organizations to present a strong collective voice for correctional reform throughout the world.

Professional Development

The purpose of the Association's Professional Development Department is to plan, promote, and coordinate professional development through training seminars, workshops, and published materials including curriculums, resource guides, and monographs.

ACA's training plan calls for a variety of professional development activities. Nationally advertised workshops cover topics such as training for trainers, management training, community-based employment programs, and stress management. On-site workshops for state and local departments of corrections are offered in curriculum development, supervision, communications, and report-writing skills.

The *Training for Correctional Staff Trainers* workshops further the skills of correctional professionals qualified to initiate and deliver training. These workshops also enable agencies to comply with national standards for accreditation and ensure that training is job-related and professionally developed and presented.

The department also offers correspondence courses to further professional development. More than 6,000 correctional personnel have completed or are in the process of completing ACA's self-instruction training program for correctional officers. This program, developed under the auspices of the National Institute of Corrections, provides 40 hours of basic training in accordance with ACA standards. A score of at least 80 percent on the comprehensive examination must be attained to achieve certification.

The Association has similar courses available for correctional supervisors, juvenile caseworkers, and food service employees. Additional courses which cover report writing skills, correctional management skills, legal issues for probation and parole officers, and legal issues for correctional officers are also available.

AMERICAN OVERSIGHT

Publications

As one of the leading publishers of practical correctional publications, ACA produces books, videos and lesson plans. Among the wide-ranging subjects available are management, community, security, counseling, law, history and health. These excellent resources for career advancement appeal to practitioners and scholars alike. Directories for every major sector of corrections also are published by ACA.

The following are just a few of the many publications that ACA offers.

Corrections Today is the major corrections magazine in the United States. Published six times a year, the magazine focuses on the interests of the professional correctional employee and administrator. Articles include reports of original research, experiences from the field, discussion of public policy, and the perspectives of prominent practitioners and academicians.

The Juvenile and Adult Directory has been published since 1939. This publication is the only up-to-date, comprehensive directory of all U.S. and Canadian juvenile and adult correctional departments, institutions, agencies and paroling authorities.

The National Jail and Adult Detention Directory was first published in 1978. It is a source of information concerning jails. The directory attempts to list all jails in the United States that house offenders or detainees for more than 48 hours.

The Probation and Parole Directory provides more than 500 pages of information regarding federal, state, and county adult and juvenile probation, parole and aftercare systems in the United States. It includes statistics on caseloads, expenditures and personnel.

Correctional standards are the most significant improvement in correctional programming. As the basis for accreditation, they give administrators a nationally recognized system for upgrading and improving their correctional services. The association currently publishes more than 20 manuals for every correctional discipline.

To aid in the development of policy with relation to accreditation, *Guidelines for the Development of Policies and Procedures* are available for adult correctional institutions, adult parole authorities/adult probation and parole field services, adult local detention facilities, adult community residential services, juvenile detention facilities, and juvenile training schools.

Conventions

ACA hosts two national conventions each year that attract more than 5,000 professionals from all aspects of corrections; the Winter Conference held in January, and the Congress of Correction, held in August. These events include a variety of workshops, exhibits, and seminars devoted to addressing topics specific to the corrections profession.

AMERICAN OVERSIGHT

Contracts and Grants

The American Correctional Association has a history of successful grant and contract management and administration. ACA has completed contracts and grants of more than $30 million. These diverse initiatives, which are funded through federal and private sources, add to the technical expertise and knowledge of the organization as well as to the total field of corrections.

Performance Based Standards & Expected Practices Accreditation Department

Perhaps ACA's greatest influence has been the development of national standards and the accreditation process. ACA standards address services, programs, and operations essential to effective correctional management. Through accreditation, an agency is able to maintain a balance between protecting the public and providing an environment that safeguards the life, health, and safety of staff and offenders. Standards set by ACA reflect practical up-to-date policies and procedures and function as a management tool for correctional agencies in the United States and Mexico.

AMERICAN OVERSIGHT

Overview of the Commission on Accreditation for Corrections

The Commission on Accreditation for Corrections (CAC) is a private, nonprofit organization established in 1974 with the dual purpose of developing comprehensive, national standards for corrections and implementing a voluntary program of accreditation to measure compliance with those standards.

The Commission was originally developed as part of the American Correctional Association. In 1979, by joint agreement, the Commission separated from the Association in order to independently administer the accreditation program. Between 1978 and 1986, the organizations shared the responsibility for developing and approving standards and electing members of the Commission. On November 7, 1986, the Commission on Accreditation for Corrections officially realigned itself with the American Correctional Association.

The Commission meets at least twice each year. The responsibility of rendering accreditation decisions rests solely with this board. The members of the Commission represent the full range of adult and juvenile corrections and the criminal justice system. They are elected from the following categories:

Correctional Administration
Juvenile Institutions
Probation Parole, Aftercare or Post-Release Supervision
Community Programs
Detention
Education
Health Care
Legal
Architecture
Non-correctional administration

Association Staff

Accreditation activities are supported by the staff of the American Correctional Association, Performance Based Standards & Expected Practices Accreditation Department, under the leadership of the director of the department. Performance Based Standards & Expected Practices Accreditation Department staff is responsible for the daily operation of the accreditation program. Agencies in the process have contact primarily with the accreditation specialist responsible for their state or agency.

AMERICAN OVERSIGHT

Auditors

Over 600 corrections professionals in the United States have been selected, trained, and employed on a contract basis by the Association. These individuals perform the field work for the Association which includes providing assistance to agencies working toward accreditation, conducting on-site audits of agencies to assess compliance with standards and confirming that requirements are met, and monitoring to ensure maintenance of the conditions required for accreditation. Teams of auditors, referred to visiting committees or audit teams, are formed to conduct standards compliance audits of agencies seeking accreditation and reaccreditation.

Auditors are recruited nationally through announcements in prominent criminal justice publications and at major correctional meetings. Affirmative action and equal employment opportunity requirements and guidelines are followed in the recruitment of auditors. All ACA auditors have a minimum of three years of responsible management experience, have received a recommendation from an agency administrator, and have demonstrated knowledge in the substantive area(s) in which they are employed to assist the Association. In addition, all auditors must successfully complete the Association's auditor training and be members of the ACA in good standing.

Traditional Standards and Expected Practices Development

Development of the ACA standards began in 1974 with an extensive program of drafting, field testing, revising, and approving standards for application to all areas of corrections. Since then, over 1,200 correctional facilities and programs have adopted the standards for implementation through accreditation, and many others have applied the standards informally themselves.

In the development of standards, the goal was to prescribe the best possible practices that could be achieved in the United States today, while being both realistic and practical. Steps were taken to ensure that the standards would be representative of past standards development efforts, reflect the best judgment of corrections professionals regarding good corrections practice, recognize current case law, and be clear, relevant, and comprehensive. The standards development and approval process has involved participation by a wide range of concerned individuals and organizations. Twenty-two manuals of standards are now used in the accreditation process:

Standards for Adult Correctional Institutions –Fourth Edition
Performance -Based Standards for Adult Probation and Parole Field Services
Performance -Based Standards for Adult Local Detention Facilities—Fourth Edition

Performance -Based Standards for Therapeutic Communities
Standards for Small Juvenile Detention Facilities
Performance-Based Health Care Standards for Adult Correctional Institutions
Performance Based Core Jail Standards-First Edition
Performance Based International Correctional Core Standards- Adult
Performance Based International Correctional Core Standards- Juvenile
Standards for Administration of Correctional Agencies - Second Edition
Standards for Adult Parole Authorities - Second Edition
Standards for Electronic Monitoring Programs
Standards for Adult Correctional Boot Camps Programs

The standards establish clear goals and objectives critical to the provision of constitutional and humane correctional programs and services. The standards include the requirement for practices to promote sound administration and fiscal controls, an adequate physical plant, adherence to legal criteria and provision of basic services. Basic services called for by the standards include the establishment of a functional physical plant, training of staff, adoption of sanitation and safety minimums, and provision of a safe and secure living environment. In offering specific guidelines for facility and program operations, the manuals of standards address due process and discipline, including access to the courts, mail and visitation, searches, and conditions of confinement of special management offenders.

The standards are systematically revised to keep pace with the evolution of different correctional practices, case law, and after careful examination of experiences, applying them over a period of time and circumstances. The ACA Standards Committee, which includes membership from the Commission on Accreditation for Corrections, is responsible for standards development and revision.

The ACA publishes biannual supplements to the standards with updated information and clarifications until new editions of standards manuals are published. Each supplement addresses standards interpretations, deletions, revisions, and additions for all manuals of standards issued by the Standards and Accreditation Department.

Suggestions and proposals for revisions to the standards from the field and interested others are encouraged. Performance Based Standards & Expected Practices Accreditation Department has developed an on-line process specifically for this purpose. Proposals should be submitted via the ACA website.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-000969

Accreditation Process Descriptions

For over 120 years, the American Correctional Association has been the only national body involved in the development of standards for the correctional field. ACA standards are supported by ACA's Performance Based Standards & Expected Practices Accreditation Department and the Commission on Accreditation for Corrections, which is the evaluating and certifying body for accreditation. The department is responsible for the administration of accreditation and ongoing development of correctional standards.

The accreditation process is a voluntary program for all types of correctional agencies. For these agencies, accreditation offers the opportunity to evaluate their operations against national standards, to remedy deficiencies, and to upgrade the quality of programs and services. The recognized benefits of such a process include: improved management; a defense against lawsuits through documentation; demonstration of a "good faith" effort to improve conditions of confinement; increased accountability and enhanced public credibility for administrative and line staff; a safer and more humane environment for personnel and offenders; and the establishment of measurable criteria for upgrading programs, staffing, and physical plant on a continuous basis.

A major component of the accreditation process is the standards compliance audit conducted by a visiting committee. The purpose of the audit is to measure operations against the standards, based on documentation provided by the agency.

The Visiting Committee Report

The results of the standards compliance audit are contained in the visiting committee report, a document prepared by the visiting committee chairperson. The report is distributed to the agency administrator and members of the visiting committee. This report is also submitted to the Commission on Accreditation for Corrections for consideration at the accreditation hearing.

The following information is usually contained in the visiting committee report:

Agency and Audit Narrative

The agency narrative includes a description of program services, a description of physical plant, number of offenders served on the days of the audit, a summary significant incidents and consent decrees, class action lawsuits and/or judgments against the agency/facility, if applicable. The audit narrative, prepared by the visiting committee chairperson, describes audit activities and findings. The narrative examines issues or concerns that may affect the quality of life and services in an agency or facility. Quality of life issues include areas such as staff training, adequacy of medical service, sanitation, use of segregation and detention, reported and/or documented incidences of violence and crowding in institutions, offender activity levels, programming and provision of basic services. The audit narrative also contains comments as a result of staff and offender interviews, and a detailed explanation of all noncompliant and not applicable standards.

AMERICAN OVERSIGHT

Agency Response

The agency has three options for standards found in noncompliance: a plan of action; an appeal; or a waiver request.

A **plan of action** is a detailed statement of tasks to be performed in order to achieve compliance with a standard found in noncompliance at the time of the audit. The plan of action designates staff responsibilities and timetables for completion.

An **appeal** is the agency's attempt to change the visiting committee's decision on a standard. The result of a successful appeal is a change in the status of the standard and a recalculation of the compliance tally.

A **waiver** may be requested when noncompliance with a standard does not adversely affect the life, health, or safety of staff and offenders and when quality of life conditions compensate for the lack of implementation of a plan of action. The granting of a waiver by the Commission waives the requirement for submitting a plan of action; however, it does not change the noncompliant finding.

Auditor's Response

This section contains the visiting committee's final reply to all responses received from the agency and includes comments regarding the acceptability of plans of action, appeals, and waivers.

AMERICAN OVERSIGHT

AccreditationHearings

The Commission on Accreditation for Corrections is solely responsible for rendering accreditation decisions and considers an agency's application at its next regular meeting following completion of the visiting committee report. The Commission is divided into panels that are empowered to reach and render accreditation decisions. These panels hear the individual application for accreditation and include a quorum of at least three Commissioners which includes the panel hearing chairperson. Agencies are notified in writing of the date, time, and location of the hearings by Performance Based Standards & Expected Practices & Accreditation Department Staff.

The panel hearing is the last step in the process. With the panel chairperson presiding, panel members discuss issues and raise questions relative to all aspects of agency operations and participation in the process. The information presented during the hearing and in the visiting committee report is considered by the panel members in rendering accreditation decisions.

The agency is invited to have a representative at the hearing and, in most cases, one or more individuals attend. When special conditions warrant, the visiting committee chairperson or a member of the visiting committee also may be asked to attend the hearings. When this occurs, the auditor provides information to help clarify controversial issues and responds to questions and concerns posed by panel members.

Attendance by any other parties (i.e. media representatives, public officials, or personnel from agencies other than the applicant) occurs only with the permission of the applicant agency. In these cases, the applicant agency representatives and panel members discuss procedures to be followed before commencement of the hearing.

Conduct of Hearings

The panel schedule provides ample time for review of each individual agency pursuing accreditation. Hearings are conducted by the panel chairperson in accordance with established procedures. Panel proceedings require that a formal vote be taken on all final actions, i.e., agency appeals, waiver requests, and the final accreditation decision of the Commission. All panel proceedings are tape-recorded to assist in preparing minutes of the hearings. Panel activities generally occur as follows:

- Applicant agency representatives are requested by Standards and Accreditation Department staff to be on-call to allow for scheduling flexibility.
- A designated waiting area is usually provided for this purpose.
- When the panel is ready to review the agency, the Standards and Accreditation Department staff representative notifies agency representative(s).
- The hearing opens with an introduction by the panel chairperson. The agency representative is asked to give a brief description of the program.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-000972

- If a visiting committee member is present at the hearing, the panel chairperson may request that the auditor present an account of the visit, focusing on matters particularly pertinent to the decision or specific panel actions. In some cases, however, the panel may wish to call on the visiting committee member only to request additional information at different points during the hearing.

- The panel chairperson leads a standard by standard review of non- compliance issues. The agency representative presents information relative to their request for waivers, plans of action, appeals, and discretionary compliance requests. The agency may also present additional materials, including photographs or documentation, for review by the panel.

- Following the agency presentation, the chairperson has the option of calling the panel into executive session to consider the information provided, determine findings, and make an accreditation decision. Whether or not panel deliberations occur in the presence of agency personnel or in executive session varies from panel to panel, considering the preference of panel members and the sensitivity of issues to be discussed regarding the application.

In final deliberations, the Commission panel:

- Ensures compliance with all mandatory standards and at least 90 percent of all other standards.

- Responds with a formal vote to all appeals submitted by the applicant agency.

- Responds with a formal vote to all request for waivers and plans of action submitted by the applicant agency.

At this time, the panel also:

- Assures that an acceptable plan of action will be submitted for every non- compliant standard, including those standards for which appeals of non- compliance and waiver requests have been denied by the panel. In judging the acceptability of plans of action, the panel ensures that all of the information requested on the form is provided. Furthermore, the feasibility of plans to achieve compliance is considered, including specific tasks, time frames, and resource availability (staff and funding) for implementing proposed remedies.

- Addresses to its satisfaction any concerns it has with visiting committee comments about the quality of life in the facility or program, patterns of non-compliance, or any other conditions reviewed by the panel relating to the life, health, and safety of residents and staff.

- For each application, a roll call vote to award accreditation, extend an agency in Candidate or Correspondent Status, or deny accreditation is conducted. The options for final action available to the panel are outlined in the next chapter.

- If the panel has deliberated in executive session, agency representatives are invited back into the meeting and informed of the panel's final decision and actions or recommendations on all other issues raised by the applicant. If accreditation has not been granted, the chairperson discusses with agency personnel specific reasons for the decision and the conditions of extension in Candidate or Correspondent Status and procedures for appeal.

AMERICAN OVERSIGHT

Accreditation Decisions

Three decisions relative to the accreditation of an agency are available to panels:

- *Three-year accreditation award* based on sufficient compliance with standards, acceptance of adequate plans of action for all non-compliant standards and satisfaction of any other life, health, and safety conditions established by the panel. The balance of the contract must be paid in full in order to receive a certificate of accreditation.

- *Extension of the applicant agency in Candidate Status* (initial accreditation only) for reasons of insufficient standards compliance, inadequate plans of action, or failure to meet other requirements as determined by the panel. The Commission may stipulate additional requirements for accreditation if, in its opinion, conditions exist in the facility or program that adversely affect the life, health, or safety of the offenders or staff. Extension of an applicant in Candidate Status is for period of time specified by the panel and for identified deficiencies if in the panel's judgment, the agency is actively pursuing compliance.

- *Probationary Status* is determined when the panel specifies that compliance levels are marginal, there is a significant decrease in compliance from the previous audit (in the case of reaccreditation), or there are quality of life issues that would indicate continued monitoring. While an award of accreditation is granted, a monitoring visit must be completed and the report presented at the next meeting of the Commission. The cost for a monitoring visit is borne by the agency at a rate of cost plus 25%. The agency does not have to appear before the Commission for the review of the monitoring visit report. If they choose to do so, all related travel expenses are borne by the agency. Specific expectations for removal from probation are outlined.

- *Denial of accreditation* removes the agency from Accredited Status (in the case of reaccreditation) and withdraws the agency from the accreditation program. Situations such as insufficient standards compliance, inadequate plans of action, failure to meet other requirements as determined by the panel or quality of life issues may lead to the denial of accreditation, it is withdrawn from the process and is not eligible to re-apply (as an applicant) for accreditation status for a minimum of six months from the date of that panel hearing. The Commission will explain the process for appeal.

The agency receives written notification of all decisions relative to accreditation after the hearing.

Appeal Process

The accreditation process includes an appeal procedure to ensure the equity, fairness, and reliability of its decisions, particularly those that constitute either denial or withdrawal of Accredited Status, or placement into probationary status. Therefore, if an agency is denied accreditation, it is immediately appealed to the full commission.

If an agency is put in probationary status by the panel, it may submit an appeal of the placement into probationary status. The basis for reconsideration of probationary status is based on grounds that the decision(s) were:

- A misinterpretation of the criteria and/or procedures promulgated by the Commission

- Based on incorrect facts or an incorrect interpretation of facts

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-000974

- Unsupported by substantial evidence
- Based on information that is no longer accurate
- The reasonableness of the expected practices, criteria, and/or procedures for the process may not serve as the basis for reconsideration.

The procedures for reconsideration are as follows:

- The agency can submit a verbal appeal immediately to the Performance Based Standards & Expected Practices & Accreditation or a written request for reconsideration within 30 days of the adverse decision stating the basis for the request.
- The Executive Committee of the Commission, composed of the officers of the Commission, reviews the request and decides whether or not the agency's request presents sufficient evidence to warrant a reconsideration hearing before the Commission. The agency is notified in writing of the Executive Committee's decision.
- If the decision is made to conduct a hearing, the hearing is scheduled for as soon as possible if the appeal is made verbally or if in writing, for the next full Commission meeting and the agency is notified of the date.
- The agency, at its option and expense, has the right of representation, including counsel.
- Following the hearing held before the Commission, the decision, reflecting a majority opinion, is made known to the agency immediately.
- Pending completion of the reconsideration process, the agency maintains its prior status.
- Until a final decision has been reached, all public statements concerning the agency's accredited status are withheld.

Following completion of the reconsideration process, any change in the status of an agency is reflected in the next regularly published list of accredited agencies.

AMERICAN OVERSIGHT

Accredited Status

The accreditation period is three years, during which time the agency must maintain the level of compliance achieved during the audit and work towards compliance of those expected practices found in non-compliance. Regular contact with Performance Based Standards & Expected Practices & Accreditation Department staff should also be maintained. The Annual Report, Critical Incident Report and Significant Incident Summary forms discussed below are available on the ACA website at www.aca.org or through your Accreditation Specialist.

Annual Report

During the three year accreditation period, the agency submits an annual report to the Performance Based Standards & Expected Practices &Accreditation Department. This statement is due on the anniversary of the accreditation (panel hearing) date utilizing the annual report form, which is available on the ACA website or from Performance Based Standards & Expected Practices & Accreditation Department staff. It contains the following information:

Current compliance levels - This includes any changes in compliance since accreditation, listing on a case by case basis any expected practice with which the agency has fallen out of compliance or achieved compliance.

Update of Plans of Action - A progress report is included with respect to Plans of Action submitted to the hearing panel, indicating the status of the completion of the plans. Potential revision to plans reflecting the need to request additional time, funds, and/or resources to achieve compliance should also be included.

Significant Incident Report Summary - A report is made of events and occurrences at the agency during the preceding year that impact on compliance, agency operation, or the quality of services provided by the agency.

Performance Based Standards & Expected Practices & Accreditation Department staff review the annual report received from the agency and respond to clarify issues or request additional information if necessary.

Critical Incident Report

In addition to submission of the annual report, the agency is responsible for notifying Performance Based Standards & Expected Practices & Accreditation Department staff of any critical incident that has the potential to affect expected practice compliance or facility accreditation as soon as possible within the context of the incident itself, using the Critical Incident Report template on the ACA website or through Performance Based Standards & Expected Practices Accreditation Department staff.

Monitoring Visits

Monitoring visits to agencies in Accredited Status are conducted by an ACA auditor(s) in order to assess continuing compliance with the standards. A monitoring visit may be conducted at any time during the accreditation period, with advance notice to the agency. The determination of need for a monitoring visit is based on:

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-000976

- Compliance levels, findings, and recommendations by the Commission on Accreditation for Corrections during the hearing.

- Incidents or events reported by the agency in its annual report.

- Problems indicated by adverse media reports or correspondence received by Performance Based Standards & Expected Practices & Accreditation Department staff, disturbances at the agency, or special investigations.

The length of the visit varies depending on the number of standards or special issues that must be addressed during the visit. The visits are conducted similar to standards compliance audits, but on a reduced scale. Monitoring visits are charged to the agency at a rate of cost plus twenty-five percent.

Activities, as a general rule, involve a review of all mandatory standards, all standards found in non-compliance at the time of accreditation, and any other concerns identified by the Commission. The visit also involves a tour of the agency and interviews with staff and offenders to ensure maintenance of the requirements of accreditation. It concludes with an exit interview during which the auditor informs the agency staff of the findings of the visit.

Following the visit, the auditor prepares a monitoring visit report that addresses findings of the visit. The report includes a list of standards reviewed, explanation of non-compliance findings, results of the tour and interviews with agency staff and offenders, and discussion of any issues believed to be relevant to the agency's accreditation. The report, as with others prepared by auditors, is reviewed and sent to the agency by Performance Based Standards & Expected Practices Accreditation Department staff.

When a monitoring visit to the agency reveals deficiencies in maintaining compliance levels that existed at the time of accreditation, or less than 100 percent compliance with mandatory standards, the agency prepares a response providing explanation of the problems indicated in the report. When the agency has failed to maintain compliance with all mandatory standards, the monitoring visit report and the agency response are submitted to the Commission on Accreditation for Corrections for review during a regular hearing. Agency representatives are advised of the date, time, and location of the review, and are invited to attend. At the discretion of the Commission, the agency may be placed in probationary status and a revisit conducted to determine if deficiencies have been corrected.

Revocation of Accreditation

If the Commission panel believes that an agency's failure to maintain continuous compliance with certain standards is detrimental to life, health, and safety of residents and staff, the Commission may place an agency on probation. Probationary status last for a specific period of time designated by the Commission at its next regularly schedule meeting. The Commission again reviews the program and considers removing the probationary status or revoking accreditation. When the agency corrects the deficiencies within the probationary status period and the corrections have been verified and accepted, the agency resumes its status as an accredited agency. An agency that does not satisfactorily correct the deficiencies may be withdrawn from accreditation.

AMERICAN OVERSIGHT

Another condition that may result in a rehearing and consideration of revocation is following a significant event in an agency (i.e. major disturbance, death from other than natural causes or allegations of physical/sexual abuse of offenders). Failure to notify the Performance Based Standards & Expected Practices & Accreditation in a timely manner may result in suspension of the agency's accreditation. Once ACA is notified of the major event, the Director of Standards and Accreditation may consult with the Executive Committee of the Commission, who may request a monitoring visit. If a visit is warranted, ACA will notify the agency and a date will be established with the concurrence of the facility. The monitoring visit will take place within 14 days of this notification. The monitoring visit report will be sent to the Director of Standards within 7 days of the monitoring visit and then forwarded to the Executive Committee of the Commission. Following review of the report, a determination will be made by the Executive Committee as to whether revocation of accreditation is warranted. Prior to any rehearing, agency representatives will be notified, so that any issues may be addressed and responded to in writing.

Accreditation is revoked for the following reasons:

- Failure on the part of the agency to adhere to the provisions on the contract.
- Failure on the part of the agency to maintain continuous compliance with the standards at levels sufficient for accreditation.
- Intentional misrepresentation of facts, lack of good faith, or lack of deliberate speed or a concerted effort to progress in the accreditation process, including the implementation of plans of action.
- Failure to notify ACA of significant incidents in the annual report to the Commission.
- Adverse conditions of confinement that affect the life health, and/or safety of staff and offenders.
- Failure to comply with the conditions of probation or suspension.

Performance Based Standards & Expected Practices & Accreditation Department staff notify the agency in writing of the specific reasons identified by the Commission for the revocation hearing.

Expiration of Accredited Status

Accreditation is granted for a three year period. Unless the agency has applied for reaccreditation and completed activities in the process required for reaccreditation, the Commission withdraws the agency from Accreditation Status after this three year period.

For agencies in Accredited Status that are seeking subsequent accreditation, administrative extensions of Accredited Status may be granted under certain conditions. For example, relocation of the facility, staff turnover, and major renovations often warrant an extension. In these cases, a written request to the Director of Performance Based Standards & Expected Practices & Accreditation is required, outlining the reasons for extending the accreditation period. Agencies that fail to successfully complete an audit within the three year period, or do not receive an extension prior to their expiration date, are withdrawn from Accredited Status.

AMERICAN OVERSIGHT

Visiting Committee Report and Hearing Minutes

CONFIDENTIALITY

The American Correctional Association and the Commission on Accreditation for Corrections do not disclose to external parties specific information contained in this Accreditation Report or information discussed in the Accreditation Hearing. The Association encourages all participating agencies to provide information to the media about their accreditation activities, including disclosure of the Self-Evaluation and Accreditation Report.

STANDARDS COMPLIANCE INITIAL AUDIT

ICE Health Service Corps (IHSC)
Eloy Detention Center (IHSC)
Eloy, Arizona

March 12-13, 2018

VISITING COMMITTEE MEMBERS

(b)(6); (b)(7)(C), Chairperson
ACA Auditor

(b)(6); (b)(7)(C)
ACA Auditor

AMERICAN OVERSIGHT

A. Introduction

The audit of the Eloy Detention Center (IHSC), Eloy, Arizona was conducted on March 12-13, 2018 utilizing the American Correctional Association (ACA) Standards for Performance Based, Health Care for Adult Local Detention Facilities, 4th Edition and the 2016 Standards Supplement. The following team conducted the audit: (b)(6); (b)(7)(C) Chairperson and (b)(6); (b)(7)(C) Team Member. This is an initial audit because the facility is using a new accreditation manual for the PB,HCALDF. Eloy Detention Center (IHSC) was previously accredited using the PB,HCACI accreditation manual in 2015.

B. Facility Demographics

Rated Capacity: 1,484 (Males – 1,000 and Females - 484)
Actual Population: 1,484 (Males – 1,000 and Females - 484) as of 03/12/2018
Average Daily Population for the last 12 months: 1,383
Average Length of Stay: 51 days

(b)(7)(E)

Age Range of Detainees: 18-75+
Gender: Male/Female

(b)(7)(E)

C. Facility Description

The Eloy Detention Center-IHSC (EDC-IHSC) provides detention services, housing, and transportation for detainees who are in administrative custody of the Immigration and Customs Enforcement (ICE). Detainees at the EDC-IHSC are either awaiting deportation or are currently in the removal proceedings. The EDC-IHSC is privately owned and operated by the CoreCivic, formerly the Corrections Corporation of America (CCA) under a contract with the Department of Homeland Security. Medical services are provided by the Immigration Health Service Corporation (IHSC). The facility houses individuals, both male and female, who are pending immigration review. The facility mission is to protect the public, staff and provide a secure and humane environment for all detainees.

AMERICAN OVERSIGHT

EDC-IHSC is situated on 47 acres of land approximately seven miles from the city of Eloy in Pinal County, Arizona. The facility is physically located at 1705 East Hanna Road, Eloy, Arizona 85131.

Eloy Detention Center (EDC) opened in May of 1994, and was the Federal Bureau of Prisons' first contract for a secure facility with a private company. EDC is a 1,484-bed facility. The male and female detainees are housed in six housing units and two special housing units. The Administration Building and General Service Building separate the general housing units and one special housing unit into two separate sides; north and south. The general housing units hold 250 detainees in five pods. (b)(7)(E) (b)(7)(E) There are currently two pods containing female detainees. Special Housing Units are divided into two 24-bed units separated by an officer station. The institution also has four court rooms used for deportation hearings. Each month an average of 592 detainees are admitted, 587 are released and 97 medical transports. This 392,000 square foot facility contains state-of-the-art safety and security equipment, (b)(7)(E) (b)(7)(E)

(b)(7)(E)

ICE Health Services Corps Vision Statement: To be the best health care delivery system in detention and correctional health care

ICE Health Services Corps Mission Statement -"IHSC is committed to providing health care services to reduce global disease and support the safe apprehension, enforcement and removal of detained individuals involved in immigration proceedings".

ICE Health Services Corps Core Values: Integrity, Commitment, Accountability, Service and Excellence.

Eloy Detention Center first achieved American Correctional Association dual accreditation (ACI & ALDF) in August of 2003 and has continued to remain accredited since that time. The facility received the nation's first Department of Homeland Security Federal PREA certification in 2017.

AMERICAN OVERSIGHT

Other accreditation for the EDC-IHSC includes National Commission on Correctional Health Care (NCCHC), 10/2015 and Performance Based National Detention Standards (PBNDS), 2/2018 (ICE).

Eloy is adjacent to three other prisons also managed by the CoreCivic: the Red Rock Correctional Center, the La Palma Correctional Facility and the Saguaro Correctional Center.

(b)(7)(E)

AMERICAN OVERSIGHT

D. Pre-Audit Meeting

On Sunday, March 11, 2018 the members of the medical audit team were transported from the Phoenix Sky Harbor International Airport, Phoenix, Arizona to the Holiday Inn Casa Grande, Casa Grande, Arizona by Warden Michael Donahue for (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) Team Member. The distance from the airport to the hotel was approximately 53.6 miles.

The audit team met at the hotel on that evening to discuss the information provided by the Association staff and the officials from the Eloy Detention Center (IHSC).

The chairperson divided the standards into the following groups:

Standards #4-ALDF-2A-45 to 4C-40 to (b)(6); (b)(7)(C)
Standards #4-ALDF-4D-02 to 4D-27 to

The audit team members attended an "ice-breaker" dinner at the Eva's Mexican Restaurant that Sunday approximately from 5:00 p.m. to 6:30 p.m. that evening with the following CoreCivic employees: Warden Michael Donahue, (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) General conversation followed as the team member and the facility staff became acquainted, and general audit goals and procedures for the audit were discussed.

E. The Audit Process

1. Transportation

On Monday, March 12, 2018, the audit team was picked up from the hotel by Warden Michael Donahue at 5:50 a.m. and arriving EDC at 6:15 a.m. The team followed the EDC's security procedures and was escorted to the facility by Warden Michael Donahue for a brief housekeeping meeting with the Health Services Administrator (HSA) (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) The team expressed the appreciation of the Association for the opportunity to be involved with Eloy Detention Center in the accreditation process. The meeting lasted from 6:15 a.m. to 6:30 a.m. The team visited the night shift and observed the shift change from 6:30 a.m. to 7:25 a.m.

AMERICAN OVERSIGHT

2. Entrance Interview

At 7:30 a.m. the same day, the audit team proceeded with the formal entrance meeting at the IHSC break room. The audit schedule and procedures were discussed, and the staffs were asked about any problem areas of which the teams should be aware. The staffs were advised that the audit team would meet with them each evening prior to their departure from the facility to discuss the progress of the audit up to that point, and any problems that were encountered, and the audit team will attempt to review all the mandatory standards on the first day. Escorts were requested to accompany the auditors on the tour and subsequent visits to departments, and to note the number of detainees and the names and titles of employees with whom the auditors spoke. The staffs were asked if any detainee or employee had requested to speak with the auditors. No requests had been made.

The audit chairperson expressed the team's appreciation and the appreciation of the American Correctional Association for the opportunity to be involved with the audits in its initial-accreditation process, and emphasized the goals of the accreditation, which are to improve the efficiency and effectiveness of correctional systems throughout the United States. The chairperson explained the reason for the initial vs. re-accreditation audit. The audit teams were aware that the staff had worked long and hard in preparation for this event, and accordingly the teams would endeavor to provide a fair, equitable and thorough audit as possible while holding them accountable to high standards. The team members would visit as many departments and areas as possible relating to the audit and meet and speak with as many staffs and detainees as possible in the time available, while at the same time strive to be as non-intrusive as possible. It was requested that when audit team members paused to speak with detainees, that staff step away so that the conversation may remain private and the team would like to observe the practice in any medical emergency. The audit team reemphasized that the purpose of the audit is to be helpful and to assist the facility in achieving its initial-accreditation. The entrance meeting lasted until 7:40 a.m.

The following persons were in attendance:

Chief Medical Officer
Health Services Administrator
Health Services Administrator

Assistant Health Services Administrator
Nurse Manager
Program Manager
Registered Nurse
Medical Director
Physician Assistant
Nurse Practitioner

4. Conditions of Confinement/Quality of Life

During the tour, the team evaluated the conditions of confinement at the facility. The following narrative description of the relevant programmatic services and functional areas summarizes the findings regarding the quality of life. The facility noise levels are within reason. There was no offensive order or smell of fresh paint. There was no evidence of pest or rodent infestation or complaint. All areas of the facility are clean and well maintained. Chemicals are properly stored and well controlled; SDS sheets are available. Tools are on shadow boards and appropriately stored and inventoried. The housing units are clean with the detainee living areas neat and organized. There is a large outdoor exercise area with a soccer field, fixed weights, and basketball hoops. Each housing unit has a day room equipped with a television, board games, puzzles and a microwave. The housing units were quiet and there appeared to be a very low level of tension in the units.

Security:

(b)(7)(E)

AMERICAN OVERSIGHT

Environmental conditions:

Temperature, airflow and lighting are kept at comfortable levels throughout all areas medical and the facility. The noise levels were low. The audit team did not observe any shouting, banging on doors, offensive smell or smell of paint. The audit team interviewed several detainees on overall environmental welfare and condition inside the facility and they were complimentary.

Sanitation:

Sanitation is provided using detainees and staff assistance. The medical areas were remarkably clean with all cleaning materials kept in clean rooms with no caustic or toxic chemicals present.

Cleaning solutions were all distributed from a central location where they are properly diluted before distribution. The master SDS of all chemicals are kept in the main clinic and updated accordingly.

Food Service:

Food Service is provided by staff working for Trinity Services Group. The food service area is clean. The area is inspected weekly by food service staff, monthly by the safety officer and annually be the health department. A five weeks menu cycle, approved annually by a Registered Dietitian, is utilized and based on three hot meals per day. A diet for health, hyper calorie diet, renal diet, vegetarian and texture modifications are available.

There are two dining halls (north and south) 250 each capacity. The audit team observed trays and sampled one lunch meal of Jello, mix vegetable, marsh potato with gravy, two slices of wheat bread, baked chicken, butter, salt and pepper and a choice of Kool-Aid drink or water on the first day of the audit. The meal was nutritionally adequate, palatable and temperature tested. There are no pork products served.

Medical diets are provided by the food service department upon receipt of written instructions from the facility Clinical Director. Meal samples are kept for 72 hours. At the time of the audit, there were 10 medical diets. These diet orders contain both start and stop dates. These may be ordered anywhere from one day to length of stay. Pregnant detainees receive special diets and extra snacks. Medical evaluations and screenings are done on detainee workers which monitored cuts/sores, burns, runny nose, nail condition and cold/flu symptoms.

Refrigerators, freezers and the dry storage area are clean, orderly and clutter-free, and temperatures are in the appropriate ranges. The dishwasher was in proper working order, and documentation reflected temperatures in the appropriate range.

AMERICAN OVERSIGHT

Medical Care

Medical services at the Eloy Detention Center-IHSC (EDC-IHSC)) are contracted through the INGENESIS. They also utilize Public Health Service (PHS), part-time and as needed contracted staffing. They provide medical, mental health and dental services. EDC medical receives transfers and in-transit, border patrol and intra and inter system transfer detainees and some with the history of high-risk behaviors, compounded by lack of medical care and or mental health treatment, and are more likely to have chronic illnesses and infectious diseases. The facility has a responsible physician (MD) and a Health Services Administrator (HSA). The working relationship between medical, mental health, program, dental and security are very remarkable. Medical staffs are well trained and caring professionals. The team interviewed several detainees and they were complimentary of medical services. Telemedicine is not practiced at the EDC-IHSC. The audit observed an intake process from the border patrol on the first day of the audit, and medical responded accordingly.

EDC-IHSC clinic operates (b)(7)(E) (b)(7)(E) (Sunday-Saturday). The Public Health Service staffs are on call. Schedules allows for shift briefings.

The following fulltime staffs support the IHSC clinic: (b)(7)(E) (b)(7)(E)

EDC-IHSC medical clinic has the followings:

AMERICAN OVERSIGHT

- 2 AEDs (secured and inspected)
- 1 EKG (secured and inspected, and read on site)
- 1 Fixed digital chest x-ray machine
- 2 Emergency bags (secured, inspected and sealed)
- 2 Emergency stretcher with straps (secured and inspected)
- 2 Dedicated emergency medical vehicle-gulf carts (1-north and 1-south)
- 2 Transport gurneys (secured and inspected)
- 1 Secure medication room
- 1 Medication administration room
- 2 Pill windows (1-North and 1-South)
- 3 Refrigerators -Flu, TB Solutions, etc.(1-Pharmacy, 1-Lab and 1-Medline)
- 1 Refrigerator (Specimen)
- 2 Portable oxygen cylinders (secured and inspected by AirGas)
- 2 Negative pressure rooms (cameras, toilets and sinks, and last inspected 10/23/2017)
- 8 Suicide observation rooms (cameras, toilets and sinks)

EDC-IHSC is an ADA compliant facility and has an ADA Coordinator.
It complies with the Disability Placement Program (DPP) that provides for housing accessible lockers, bunk beds with grabs bars, accessible TTY phones, volume control phones, accessible dayroom tables and accessible path of travel. There are ample supplies of walking sticks, crutches and wheel chairs in the facility.

EDC-IHSC clinic uses the following hospitals for inpatient hospitalization:

1. Banner Casa Grande Medical Center, Casa Grande, Arizona (ER)
2. Maricopa Medical Center, Phoenix, Arizona (ER)
3. Promise Hospital, Phoenix, Arizona (Infirmary Service)
4. St. Mary's Hospital, Tucson, Arizona

EDC-IHSC has an agreement with the Eloy and Florence Fire Department (11-22 miles, 7-10 minutes) for ambulance services in case of medical emergencies. Non-emergent medical transportation is done by facility staff to either a hospital facility or community provider for offsite consultations. The nurses have Basic Life Support (BLS) certified through the American Heart Association (AHA). Medical maintain basic TTA protocol medicines. The Master SDS is maintained in medical. Officers are trained on first aid, CPR and AED, and are considered first responders. Upon admittance to the EDC-IHSC, detainees receive a detainee handbook to aid in adjustment to detention setting. This documentation contains information regarding medical services, sick call process, grievance procedures and hygiene rules. Other methods are used to inform detainees about MRSA, AIDS, Hepatitis, and the spread of HIV, blood borne pathogens and safety.
There is a language line translation and video orientation in English, Spanish, Mandarin, Chinese, and Punjabi at the time of the audit.

AMERICAN OVERSIGHT

Sick call is provided seven days a week in General Population (GP) from 5:00 a.m.to 7:00 p.m. and Segregation (SEG) at 7:45 a.m. to 9:00 a.m. (cell side) and as needed. Detainees sign up for sick calls at each housing unit between the hours of 5:00 a.m. and 06:00 a.m. Detainees housed in SEG access all medical services via face to face encounters with an RN during daily rounds. Detainees housed in GP access all medical services via call out logs. The average monthly sick calls are 974. The audit team observed sick call process in GP and SEG on the second day of the audit and found the process well organized. Medical requests are triaged within one to two days, and any patient with symptoms is seen within one day. There is no medical copay. No detainee is denied health care service. EDC-IHSC uses detainee electronic medical records. Medical grievance is through the grievance box, collected by a grievance coordinator, and reviewed by the HSA within two days. EDC-IHSC averages 1-2 substantiated medical grievances per year mostly on medication preference, medication refills, comfort items and time line to see a provider. Specialty services/consults are provided through off-site contracted specialists. The turnaround time is 48-72 hours depending on medical acuity and specialty.

Optometry service is contracted through the South Western Eye Clinic. There were fourteen pregnant detainees at the time of the audit on March 12, 2018. All pregnant females are referred to an offsite OB-GYN specialist. The number of chronic care detainees excluding mental health at the time of the audit was 159.

EDC-IHSC has a plan for the management of communicable diseases including education on prevention, diagnosis, treatment and isolation. EDC-IHSC has an infectious disease coordinator. EDC-IHSC has two single-bed negative pressure rooms with last inspection date of October 23, 2017 by the Air Management Solutions, Powder Springs, GA. Infirmary service is provided through the Promise Hospital, Phoenix, Arizona. MRSA precautions are in place. Universal precautions are practiced throughout the facility. There are available first aid and blood borne pathogen kits. There are eye wash stations present in appropriate areas. Hand sanitizers (non-alcohol) dispensers were located throughout medical and other areas. Sanitation and housekeeping is provided by detainees. The total monthly TB tests are seven. An annual TB screening is conducted on all detainees after 12 months. EDC-IHSC offers limited TB sticks, mostly chest x-rays on site.

Medications are stored in medication rooms and secured behind double locks. A nurse administers medications including diabetic lines four times a day and seven days a week in GP and SEG at 5:00 a.m., 10:00 a.m., 4:00 p.m., 7:00 p.m. and as needed. Prior to giving medications, detainee's identification is confirmed and mouth cavities checked after administration. The audit team observed medication administrations in the GP and SEG on the second day of the audit and found the process organized and timely. All no shows or refusal to medications are documented and /or referred.

AMERICAN OVERSIGHT

The HSA checks the MARS paper record for missed doses. The audit team examined the manual during the audit and found it current. There are ten medical diets, including 50 diabetics (26-insulin and 24-non insulin dependents) at the time of the audit. Some insulin dependent diabetics receive midnight snacks. Health care outcome measures show better management of hypertension and A1C levels. The average monthly detainees on prescription medications are 2824 (including multiple encounters), and controlled medications are 17. Some medications are crushed per doctor's order. Detainees are provided script medications upon release depending on illness; 14 days-normal, 30 days-TB/HIV. Specific over-the-counter (OTC) medications are offered at the Commissary, and reviewed and approved by the Clinical Director (MD).

IHSC clinic has a dispensary, and supported by (b)(7)(E)

(b)(7)(E)

A random inventory count on sharps and controlled medications was accurate. The pharmacy has a refrigerator for the storage of insulin, vaccines and ice packs.

The audit team found the temperature log and inventory current. Basic medical supplies and materials are obtained through McKesson. The disposal of expired, unused, discontinued, recalled, over stocked medications including prescription, (pills and liquids) and narcotics are arranged through the Reverse Distributor-Pharma logistics. At the time of the audit there were some medications awaiting disposal. Records are maintained on disposal process. The audit team recommended the addition of the Rx Destroyer or the Stryker's Cactus Smart Sink System as part of control medications and narcotic disposals process, and to ensure that all patient specific medications have filled date, original Rx date and expiration date.

EDC-IHSC medical has a draw only lab. Specimens are collected on site. Blood is spun and sent out for analysis to the LabCorp five days a week, including STAT labs and reports received through fax/phone within 24-48 hours. Average monthly detainee lab tests are 1104. Stericycle is contracted to pick up the biohazard and sharps wastes. The audit team checked the specimen refrigerator temperature log and found the records current. Chronic care patients receive annual screening test. Laboratory results are also incorporated into the EMR. Digital radiology is used in the facility with hard copy over-reads scanned into the electronic health record (EMR).

AMERICAN OVERSIGHT

IHSC clinic has a fixed wall stand digital chest x-ray machine. (b)(7)(E) (b)(7)(E) Radiology services (MRI, Ultrasound, etc.), including STATS are provided through the Banner Casa Grande General Hospital and AZ-Tech with results received within hours by phone/fax depending on urgency.

EDC-IHSC performs detoxification from alcohol, opiates hypnotics, other stimulants and sedative hypnotic drugs. Substance abuse treatment is provided, as are a large number of behavioral health groups and classes. All detainees enrolled and participating in these groups had individual treatment plans in place. There are regularly scheduled multi-disciplinary team meetings, including medication management when appropriate and necessary.

(b)(7)(E)

(b)(7)(E) Dental services are provided from 06:30 a.m.to 02:30 p.m. (Monday-Friday). The dentist visits Tuesday and Thursday. Dental services include basic dentistry, fillings, partials, root canal, extractions, cleaning, oral cancer screenings and patient education. The detainees access dental health services through the sick call log process. The audit team reviewed the licenses, registrations, records and random inventory of sharps and instruments and found them accurate. The dental area is clean. Dental instruments and sharps not used at the year of expiration are re-autoclaved and repackaged. Dental spore test is through Crosstex.

The Dentist has a standing order; dental emergency outside the expertise of the nurse is referred to one of the contracted hospitals. Dental at EDC-IHSC is equipped with one dental bitewing digital x-ray machine, two dental chairs and one Panorex digital x-ray machine. The dental wait time is less than seven days. Urgent requests are seen within 24 hrs. The average monthly dental appointment is 124.

Dental amalgam disposal is through the Wastewise. Dosimeter reading is through Landauer Dosimetry. Dental chair traps are cleaned weekly. Dental supplies are through the Henry Schein and dental equipment services are through the A-Tech.

(b)(7)(E)

(b)(7)(E) They provide services from 7:00 a.m. to 7:30 p.m. (Sunday-Saturday) and on call. Daily rounds are conducted. Detainees access mental health services via the sick call log process. Staffs can refer services. There are approximately 372 detainees seen monthly. All suicide ideations are referred to mental health and monitored, and are observed 1:1. Mental health utilizes the eight single-bed isolation rooms. There are available suicide smocks and blankets. Tele-psychiatry is practiced at EDC-IHSC. EDC-IHSC maintains zero tolerance for sexual abuse and harassment.

AMERICAN OVERSIGHT

Detainees are provided information on enhanced victim services and rape crisis hotline. Rounds are done daily and are evaluated every 30, 60 or 90 days depending on needs. Program services include crisis intervention, individual and group counseling and medication management. EDC-IHSC has no therapeutic community program and does not house severely developmentally and disabled detainees. EDC-IHSC utilizes the following mental health hospitals:

1. Desert Vista Behavioral Health, Mesa, Arizona
2. Cornerstone Behavioral Health – El Dorado, Tucson, Arizona
3. Sonora Behavioral Health Hospital, Tucson, Arizona
4. Alvarado Parkway Institute Behavioral Health System Outpatient Services, San Diego, California

There were approximately 76 detainees on psychotropic medication at the time of the audit.

Laundry:

The Laundry operates four Commercial Washing Machines with an automatic detergent feed and four dryers in a clean facility. Detainees exchange clothing twice per week and linens once per week. Undergarments are exchanged daily. Staff employees wash the detainees' personal clothing.

F. Examination of Records

Following the facility tour, the team proceeded to a medical private office to review the accreditation paper files and evaluate compliance levels of the policies and procedures. The facility has no notices of non-compliance with local, state, or federal laws or regulations.

1. Litigation

   The facility had no consent decrees, class action lawsuits or adverse judgments in the past year according to records.

2. Significant Incidents/Health Care Outcome Measures

   The Significant Incident Summary and the health care section of the Outcome Measure were reviewed with the Health Care Administrative Team. During the audit period, the number of detainee-on-detainee assaults was 32 and detainee-on-staff assault is 18. While the numbers are noteworthy and will impact health care services, it was determined that it was within the appropriate range that would be expected for an institution of this size, population, custody level and mission. There was discussion regarding the following sections on the outcomes measures for the audit period:

AMERICAN OVERSIGHT

Section 4C (8) Number of offenders with an individualized services/treatment plan for a diagnosed mental disorder (excluding sole diagnosis of substance abuse) at a given point in time was 116, and the average daily population in the past 12 months of the audit period was 1375. The EDC-IHSC provided statement that the facility receives intake from the Border Patrol and has younger population with diverse cultural background and sometimes with an adjustment problem.
Section 4C (9) Number of inmate suicide attempts in the past 12 months was 4, and the average daily population in the past 12 months of the audit period was 1375. EDC-IHSC medical is monitoring the matter and coordinating activities with the mental health.

Section 4C (33) Number of pharmacy dispensing errors in the past 12 months was 2, and the number of prescriptions dispensed by the pharmacy in the past 12 months of the audit period was 23876. The EDC-IHSC provided statement that patient received medication not ordered due to pharmacy adding the wrong prescription label to the wrong Medication Administration Record (MAR). There was no adverse reaction to the patient. The other incident includes the Pharmacist filling wrong dosage/strength of prescribed medication which patient received. Process study was completed: Staff Pharmacist received additional training/counselling regarding pharmacy MAR process, with an emphasis on ensuring only the pharmacist can place new patient labels on MAR. There have been no further repeat incidences since this corrective action was put in place.

Section 4C (34) Number of nursing medication administration errors in the past 12 months was 34, and the number of medications administered in the past 12 months of the audit period was 3996. The EDC-IHSC provided statement that the errors were predominantly due to failure to follow medication verification process, where medications were not being verified by nursing staff once received from pharmacy by nurses. Process study (started July 2017) was completed: Nursing staff received additional training in regards to medication verification process as well as individual counselling was given to nurses identified to have the trend of not verifying medications on their shift upon receipt of medications and MAR. There was 100% compliance of medication verification by December 2017. Another trend that contributed to medication errors was constant distraction to pill line nurses during pill line hours in regards to patient medication. Staff training was completed with focus on reducing distraction during pill line hours; "Do Not Disturb during pill line hours" was also implemented and posted on the Pill Line door.

3. Departmental Visits

The team revisited the following departments to review conditions relating to departmental policy and operations:

AMERICAN OVERSIGHT

Department Visited	Person(s) Contacted
Food Service	(b)(6); (b)(7)(C)
Medical	
Security	
ICE	

4. Shifts

a. Day and Night Shifts

The team was present at the facility from 6:30 a.m. to 4:30 p.m. on the first day of the audit. The team observed shift briefing at 7:00 a.m. The briefing was mutual and participatory. The team briefly introduced themselves and discussed the purpose of the audit and matters pertaining to the audit.

AMERICAN OVERSIGHT

The team observed medication administration while the rest of the medical staff was busy taking care of the detainees and are pleasant and professional. (b)(6); (b)(7)(C)

(b)(6); (b)(7)(C)

5. Status of Previously Non-compliant Standards/Plans of Action

There were no standards previously found non-compliant.

G. Interviews

During the course of the audit, team members met with both staff and detainees to verify observations and/or to clarify questions concerning facility operations.

1. Detainee Interviews

The audit team interviewed and spoke to approximately 89 detainees (68-males and 21-females); including eight pregnant females who stated that they generally felt secure at the facility and were treated fairly by staff. Their basic needs were being met and they felt that they were making positive progress towards eventual and successful release. They also felt that their basic medical needs were being met. They have ready access to sick call process and all were aware of the grievance process.

Detainee morale appeared to be good and they were cooperative, respectful and were aware of the audit, and participated in the preparation for the audit. Notices of the ACA Accreditation process were observed to have been posted at different locations readily available to the detainees.

2. Staff Interviews

The audit team interviewed and spoke to approximately 65 employees and observed them in the performance of their duties. The audit team observed structured medical shift change briefings. Staffs were polite, cooperative, and conducted themselves in a professional manner. There was a normal working relationship between medical, dental, mental health, programs and security, and communication flowed freely. Gender and ethnic diversity was good and morale also appeared to be good. Staff indicated that their training were excellent and are applicable to their positions and job needs.

AMERICAN OVERSIGHT

H. Exit Discussion

The exit interview was held at 11:45 a.m. in the facility conference room with Capt. (b)(6); (b)(7)(C) Chief Medical Officer, CDR (b)(6); (b)(7)(C) Health Services Administrator (Florence Facility), 25 IHSC employees, three ICE employees and five Core Civic employees.

The chairperson explained the procedures that would follow the audit. The team discussed the compliance levels of the mandatory and non-mandatory standards and reviewed their individual findings with the group.
The chairperson expressed appreciation for the cooperation of everyone concerned and congratulated the facility team for the progress made and encouraged them to continue to strive to maintain their high level of professionalism in the correctional field.

ACCREDITATION REPORT

Commission on Accreditation for Corrections

ICE Health Service Corps
Northwest Detention Center
Tacoma, Washington

The mission of the Commission on Accreditation for Corrections is to upgrade and improve practices and conditions in adult and juvenile correctional facilities and programs through an accreditation process which is founded on a commitment to accountability, professionalism and respect for basic human rights and which recognizes sound and effective correctional practices, while striving towards excellence in the field of corrections.

March 12, 2018

ICE Health Service Corps (IHSC)
Northwest Detention Center (IHSC)
Tacoma, Washington

Congratulations!

It is a pleasure to officially inform you that the Northwest Detention Center (IHSC) was accredited by the Commission on Accreditation for Corrections at the American Correctional Association 2018 January Conference on January 8, 2018 in Orlando, Florida.

Your accreditation represents the satisfactory completion of a rigorous self-evaluation, followed by an outside review by a team of experienced, independent auditors.

Every profession strives to provide a high quality of service to society. To know that you, your staff, and other officials are complying with the requirements of the accreditation process is indeed a statement of a high level of commitment to the staff and persons under your care.

On behalf of the American Correctional Association and the Commission on Accreditation for Corrections, thank you for your commitment to the corrections profession and to the accreditation process.

Sincerely,

Denise M. Robinson

Denise Robinson, Chairperson
Commission on Accreditation for Corrections

For Immediate Release

Northwest Detention Center (IHSC) Awarded National Accreditation

Denise Robinson, Chairperson of the Commission on Accreditation for Corrections (CAC), and Bridget Bayliss-Curren, Director of Standards and Accreditation, American Correctional Association recently announced the accreditation of the Northwest Detention Center (IHSC). The award was presented in conjunction with the American Correctional Association 2018 Winter Conference on January 8, 2018 in Orlando, Florida.

In presenting the award, Denise Robinson, Chairperson of the CAC, and Lannette Linthicum, President of the American Correctional Association (ACA), complimented the facility on their professional level of operation and their success in completing the accreditation process. The agency is one of over 1,500 correctional organizations currently involved in accreditation across the nation.

The accreditation program is a professional peer review process based on national standards that have evolved since the founding of the Association in 1870. The standards were developed by national leaders from the field of corrections, law, architecture, health care, and other groups who are interested in sound correctional management.

ACA standards address services, programs, health care and security operations essential to effective correctional management. Through accreditation, an agency is able to maintain a balance between protecting the public and providing an environment that safeguards the life, health, and safety of staff and offenders. Standards set by ACA reflect practical up-to-date policies and procedures and function as a management tool for agencies and facilities throughout the world.

The three-year accreditation award granted to the Northwest Detention Center (IHSC) does not signal the end of their involvement in the accreditation process. During the award period, staff will work to improve any deficiencies identified during the audit and maintain continuous compliance with the standards.

www.aca.org

Congratulations on your accreditation award! You are now a member of the elite in achieving correctional excellence. The certificate you have received is but a small symbol of the enormous dedication and commitment demonstrated by each and every member of your staff to the accreditation process, and I urge you to display it prominently as a continual reminder of the level of professionalism achieved. This is just the beginning of your journey, however, for the true test of excellence is the test of time. It is critical that your operation be able to sustain this achievement over time and be constant through both prosperity and adversity.

Achieving American Correctional Association Accreditation means you have demonstrated your dedication to getting the job done right, and that you are holding your agency to a higher standard.

Thank you for your commitment to the American Correctional Association and the accreditation process.

Bridget Bayliss Curren

AMERICAN OVERSIGHT

Overview of the American Correctional Association

The American Correctional Association (ACA) is a professional membership organization composed of individuals, agencies and organizations involved in all facets of the corrections field, including adult and juvenile services, community corrections, probation and parole and jails. It has thousands of members in the United States, Canada and other nations, as well as over 100 chapters and affiliates representing states, professional specialties, or university criminal justice programs. For more than 145 years, ACA has been the driving force in establishing national correctional policies and advocating safe, humane and effective correctional operations. Today, ACA is the world-wide authority on correctional policy and standards, disseminating the latest information and advances to members, policymakers, individual correctional workers and departments of correction. ACA was founded in 1870 as the National Prison Association and became the American Prison Association in 1907.

At its first meeting in Cincinnati, the assembly elected Rutherford B. Hayes, then governor of Ohio and later U.S. president, as the first president of the association. At that same meeting, a *Declaration of Principles* was developed, which became the accepted guidelines for corrections in the United States and Europe. At the 1954 annual Congress of Correction in Philadelphia, the name of the American Prison Association was changed to the American Correctional Association, reflecting the changing philosophy of corrections and its increasingly important role in society.

Since that time, ACA has continued to take a leadership role in corrections and work toward a professional unified voice in correctional policy. In recent years, one of the Association's major goals has been the development of national and international policies and resolutions of significant issues in corrections. Policies are considered for ratification at the Association's two annual conferences and ratified policies are then widely disseminated. Since its formation, ACA has also had a major role in designing professional standards, and more recently performance based standards and expected practices, for correctional organizations. Since the early 1980s ACA has been involved in a program of accreditation to recognize programs representing excellence in more than 20 different disciplines within the field, with emphasis on evidenced based practices.

Membership in ACA is open to any individual, agency, or organization interested in corrections and the purposes and objectives of the Association. Members include the majority of state, local, provincial, and territorial correctional agencies, individual correctional institutions, local jails, pretrial programs and agencies, juvenile justice programs, schools of criminal justice in colleges and universities, libraries, and various probation, parole, and correctional agencies. Many of ACA's members are employed at federal, military, private, state, and local agencies. Members also include volunteers affiliated with these agencies as service providers or as members of advisory boards and committees.

AMERICAN OVERSIGHT

Organizational Purposes of the American Correctional Association

Among the most significant purposes of the Association as outlined in its Constitution, are:

- *To provide a professional association of persons, agencies, and organizations, both public and private, who hold in common the goal of improving the profession of corrections and enhancing their contribution to that profession.*

- *To broaden and strengthen support for the Association's goals by advocating Association policies, resolutions, positions, and standards to policymakers and the public and by forming coalitions with other professional organizations sharing these goals.*

- *To develop standards for all areas of corrections and implement a system for accreditation for correctional programs, facilities and agencies based on these standards. Where feasible, standards shall be based on performance outcome.*

- *To conduct or sponsor corrections conferences, congresses, institutes, forums, seminars and meetings.*

- *To publish and distribute journals and other informative materials relating to criminology, crime prevention, and corrections and to encourage and stimulate research of these matters.*

- *To promote recognition of corrections as a profession, and those who work in corrections as professionals, and to ensure validity of that recognition by encouraging the recruitment and development of highly qualified corrections professionals, and by developing and implementing a certification program for corrections professionals*

In carrying out these purposes, ACA supports programs for policy analysis, demonstration, effective delivery of health services to offender populations and research. ACA also provides testimony, consultation, publications, conferences, workshops, and other activities designed to stimulate constructive action regarding correctional issues.

AMERICAN OVERSIGHT

Organizational Structure of the American Correctional Association

Executive Committee

The Executive Committee is composed of the elected officers of the Association - president, vice president, treasurer, two Board of Governors members, the immediate past president, the president-elect, and the ACA executive director. The Executive Committee meets at least quarterly and exercises most of the powers of the Board of Governors during the intervals between meetings of the board.

Board of Governors

ACA's bylaws vest control of the Association with a 19-member elected Board of Governors composed of the officers of the Association and five at-large members. The 19 elected governors shall general reflect the Association's composition. The following areas of practice shall be represented by at least one board member:

Correctional Administration
Institutions
Juvenile
Probation
Community Programs
Detention
Education
Health Care
Parole, Aftercare or Post-Release Supervision

AMERICAN OVERSIGHT

Delegate Assembly

The Delegate Assembly is composed of delegates from the professional affiliates, geographical chapters, membership at-large, Board of Governors, past presidents of ACA, and representatives of each military service. The Delegate Assembly can establish policy, define Association positions on broad social and professional issues, and determine major programs and legislative priorities. They meet at least twice annually, at the Winter Conference and Congress of Correction.

Committees

The majority of the Association's activities take place through committees. Each committee chair reports to the Association's Board of Governors at least twice a year. In this way, the Association collectively benefits from the involvement and contribution of the hundreds of individuals who function on the various committees. Ad-hoc committees are appointed by the president of the Association.

Affiliates and Chapters

Affiliates and state chapters are major features of the Association's structure. They represent professional, regional, and state groups across the United States and Canada. Affiliates and chapters contribute to the professional development of all members by providing consultation in their respective areas of interest and by participating in seminars and workshops at ACA's annual conferences.

Major Activities of the American Correctional Association

Legislation

The American Correctional Association is involved with all major issues affecting corrections today. Members and ACA staff maintain close working relationships with committees of the U.S. Congress and all federal agencies and groups whose decisions affect correctional policy. Expert testimony on a wide range of correctional issues is prepared for congressional committee and subcommittee hearings, and recommendations are provided to federal administrative agencies.

To ensure that the concerns and issues of the corrections profession are represented in proposed legislation and public policy, ACA's legislative liaison is addressing legislative and government concerns that will impact the corrections profession. ACA has established partnerships between chapters and affiliates and other national policy making organizations to present a strong collective voice for correctional reform throughout the world.

AMERICAN OVERSIGHT

ACA's Office of Correctional Health serves ACA members, jurisdictions and its affiliates by supporting health services programs for the effective delivery of health to offender populations. We offer comprehensive services, support, and resources to help correctional facilities provide security and quality care for the offender population. The office is responsible for improving ACA's performance-based health care standards, trainings and the health certification program. The health certification program includes Nurse, Nurse Manager, Health Services Administrator and Correctional Behavioral Health.

Professional Development

The purpose of the Association's Professional Development Department is to plan, promote, and coordinate professional development through training seminars, workshops, and published materials including curriculums, resource guides, and monographs.

ACA's training plan calls for a variety of professional development activities. Nationally advertised workshops cover topics such as training for trainers, management training, community-based employment programs, and stress management. On-site workshops for state and local departments of corrections are offered in curriculum development, supervision, communications, and report-writing skills.

The *Training for Correctional Staff Trainers* workshops further the skills of correctional professionals qualified to initiate and deliver training. These workshops also enable agencies to comply with national standards for accreditation and ensure that training is job- related and professionally developed and presented.

The department also offers correspondence courses to further professional development. More than 6,000 correctional personnel have completed or are in the process of completing ACA's self-instruction training program for correctional officers. This program, developed under the auspices of the National Institute of Corrections, provides 40 hours of basic training in accordance with ACA standards. A score of at least 80 percent on the comprehensive examination must be attained to achieve certification.

The Association has similar courses available for correctional supervisors, juvenile caseworkers, and food service employees. Additional courses which cover report writing skills, correctional management skills, legal issues for probation and parole officers, and legal issues for correctional officers are also available.

AMERICAN OVERSIGHT

Publications

As one of the leading publishers of practical correctional publications, ACA produces books, videos, and lesson plans. Among the wide ranging subjects available are management, community, security, counseling, law, history, and health. These excellent resources for career advancement appeal to practitioners and scholars alike. Directories for every major sector of corrections are also published by ACA.

The following is just a few of the many publications that ACA offers:

Corrections Today is the major corrections magazine in the United States. Published seven times a year, it focuses on the interests of the professional correctional employee and administrator. Articles include reports of original research, experiences from the field, discussion of public policy, and the perspectives of prominent practitioners and academicians.

Correctional standards are the most significant improvement in correctional programming. As the basis for accreditation, they give administrators a nationally recognized system for upgrading and improving their correctional services. The Association currently publishes over 20 manuals for every correctional discipline.

To aid in the development of policy with relation to accreditation, *Guidelines for the Development of Policies and Procedures* are available for adult correctional institutions, adult parole authorities/adult probation and parole field services, adult local detention facilities, adult community residential services, juvenile detention facilities, and juvenile training schools.

Conventions

ACA hosts two national conventions each year that attract more than 5,000 professionals from all aspects of corrections; the Winter Conference held in January, and the Congress of Correction, held in August. These events include a variety of workshops, exhibits, and seminars devoted to addressing topics specific to the corrections profession.

Performance Standards and Accreditation

Perhaps ACA'S greatest influence has been the development of national standards and the accreditation process. ACA performance standards address services, programs, and operations essential to effective correctional management. Through accreditation, an agency is able to maintain a balance between protecting the public and providing an environment that safeguards the life, health, and safety of staff and offenders. Performance standards set by ACA reflect practical up-to-date policies and procedures and function as a management tool for over 1,500 correctional agencies in the United States. ACA has continued this progress with the promulgation of the performance based standard and expected practice format.

AMERICAN OVERSIGHT

Overview of the Commission on Accreditation for Corrections

The Commission on Accreditation for Corrections (CAC) is a private, nonprofit organization established in 1974 with the dual purpose of developing comprehensive, national standards for corrections and implementing a voluntary program of accreditation to measure compliance with those standards.

The Commission was originally developed as part of the American Correctional Association. In 1979, by joint agreement, the Commission separated from the Association in order to independently administer the accreditation program. Between 1978 and 1986, the organizations shared the responsibility for developing and approving standards and electing members of the Commission. On November 7, 1986, the Commission on Accreditation for Corrections officially realigned itself with the American Correctional Association.

The Commission is governed by a Board of Commissioners who reflect the Association's composition, including adult and juvenile components; the geographical distribution of its membership; and representation of ethnic and racial minorities, women, and management and non-management staff. The responsibility of rendering accreditation decisions rests solely with the Commission.

They represent the following specific categories:

Correctional Administration
Juvenile
Institutions
Probation
Parole, Aftercare or Post-Release Supervision
Community Programs
Detention
Education
Health Care
Legal
Architecture
Non-correctional administration

AMERICAN OVERSIGHT

Association Staff

Accreditation activities are supported by the staff of the American Correctional Association, Standards and Accreditation Department, under the leadership of the director of the department. Standards and Accreditation Department staff is responsible for the daily operation of the accreditation program. Agencies in the process have contact primarily with the accreditation specialist responsible for their state or agency.

Auditors

Auditors are corrections professionals who have been selected, trained, and certified by the Association. These individuals perform the field work for the Association which includes providing assistance to agencies working toward accreditation and conducting on-site audits of agencies to assess compliance with program requirements. In certain cases, when the Commission believes it necessary, they monitor agencies to ensure maintenance of the conditions required for accreditation. Teams of auditors, referred to as Visiting Committees, are formed to conduct compliance audits of agencies seeking accreditation and reaccreditation.

Auditors are recruited through announcements in prominent criminal justice publications, online and at major correctional meetings. Affirmative action and equal employment opportunity requirements and guidelines are followed in the recruitment of auditors. All auditors have a minimum of five years of corrections experience, have received a recommendation from an agency administrator, and have demonstrated knowledge in the substantive area(s) in which they are engaged to assist the Association. In addition, all auditors must successfully complete the auditor orientation course (found at www.aca.org), participate in an ACA sanctioned training every three years (check out www.aca.org for details on training dates and times) and be members of the ACA in good standing. All auditors are approved by ACA.

Performance Based Standards and Expected Practices Development

Development of the traditional ACA standards began in 1974 with an extensive program of drafting, field testing, revising, and approving them for application to all areas of corrections. Since then; local, state, national and international correctional facilities and programs have adopted the traditional standards, performance standards, and expected practices as outlined in ACA's accreditation manuals, for implementation through accreditation.

Steps are taken to ensure that accreditation manuals' development efforts reflect the best judgment of corrections professionals regarding good corrections practice. Traditional standards, performance standards, and expected practices endeavor to be clear, relevant, and comprehensive. The development and approval process for traditional standards, performance standards, and expected practices has involved participation by a wide range of concerned individuals and organizations and over twenty accreditation manuals are now used in the accreditation process:

AMERICAN OVERSIGHT

Performance-Based Core Jail Standards-First Edition
Performance-Based International Correctional Core Standards- Adult
Performance-Based International Correctional Core Standards- Juvenile

Standards for Juvenile Community Residential Facilities –3rd Edition
Standards for Juvenile Correctional Boot Camps
Standards for Juvenile Day Treatment Programs
Standards for Juvenile Detention Facilities -–3rd Edition
Standards for Juvenile Probation and Aftercare Services –Second Edition
Standards for Small Juvenile Detention Facilities

Performance based standards and expected practices establish clear goals and objectives critical to the provision of constitutional and humane correctional programs and services. The performance based standards include the requirement for practices to promote sound administration and fiscal controls, an adequate physical plant, adherence to legal criteria and provision of basic services. Basic services called for by the standards include the establishment of a functional physical plant, training of staff, adoption of sanitation and safety minimums, and provision of a safe and secure living environment. In offering specific guidelines for facility and program operations, the manuals of standards address due process and discipline, including access to the courts, mail and visitation, searches, and conditions of confinement of special management offenders.

In January 1996, ACA's Standards Committee (known today as the Performance Standards Committee) adopted innovative new guidelines for the development of *performance-based* professional standards. In August 1996, ACA President Bobbie Huskey published an article "Measuring Performance: ACA's New Paradigm in the Making," in *Corrections Today* which suggested that moving toward performance measurement required "a fundamental shift in thinking" for the field.

Without exception, the drafters of the new performance-based model found that all prior traditional standards described *activities* or *expected practices* that were prescribed for practitioners. The performance-based model, they believed, should emphasize *conditions* to be achieved and maintained.

AMERICAN OVERSIGHT

In August 2000, in San Antonio, Texas, the Performance Standards Committee adopted the Adult Community Residential Services Performance Based Accreditation manual. For two decades, the ACA has been engaged in the transition of the traditional standards and accreditation system from one that has been focused on the evaluation of acceptable practices from the perspective of process evaluation to one that is fundamentally linked to the measurement of outcomes resulting from the adoption of professional practices. This evolution evolves from the recognition that the measurement of the successful completion of a process or activity is not sufficient for accreditation purposes. The process must also evaluate and measure the results, the outcomes, of such practices.

To that end, involvement in accreditation now requires an understanding of general "performance standards" and the definition of expected practices and specific measurable outcomes associated with them. This is the foundation of the transition to the performance based model.

The term "performance-based standard" or "performance standard" is not the equivalent of the traditional term "standard". The traditional "standard" is replaced by "expected practice" in the performance-based system and has no further utilization in the new performance-based system.

In the traditional accreditation process, validation of compliance with the standards was accomplished through the generation and organization of primary and secondary documentation. The equivalent system exists in the performance based system except that primary documentation has been renamed "protocols" and secondary documentation has been renamed "process indicators". Primary and secondary documentation, now termed protocols and process indicators comprise the essential elements of the performance based compliance file from the agency/program perspective. The concept and documentation of protocols is identical to that of the traditional manual's primary documentation. The concept and documentation of process indicators is identical to that of the traditional manual's secondary documentation.

Through this transition, the accreditation process establishes clear goals and objectives critical to the provision of safe, constitutional, effective and humane correctional programs and services. Accreditation addresses services, programs, and operations essential to good correctional practice, including safety, security, order, care, programming, justice and administration and management.

Revision Process

The performance standards and expected practices are systematically revised, and new performance standards and expected practices considered, to keep pace with the evolution of correctional practices and law and performance benchmarks. After careful examination, the ACA Performance Standards Committee determines revisions and updates as necessary.

Suggestions and proposals for revisions to the performance standards or expected practices from the field and others interested are encouraged.

AMERICAN OVERSIGHT

The Performance Standards Committee meets before each ACA Conference to review proposed performance standards and expected practices, (as well as traditional standards not yet converted to the performance based model). Proposals from the field should be submitted via the ACA website at www.aca.org. The portal is opened for submissions approximately 5 months prior to the next scheduled ACA Conference and remains open for at least 8 weeks. The portal is then closed and the submitted revisions are formatted appropriately. They are then posted on the ACA website, at www.aca.org, for the field to comment on for a period of 4 weeks after which the submissions and comments are taken down and compiled for the Performance Standards Committee's consideration at the upcoming conference. The minutes from the Committee are posted on the ACA website within 4 weeks of the end of the conference.

These changes are published by ACA through revision to appropriate agency accreditation manuals as necessary upon the conclusion of semi-annual meetings of the Performance Standards Committee. Agencies are responsible for compliance with the expected practices in effect at the beginning of the 3 year accreditation cycle. However, agencies may choose to apply new changes to the expected practices that have been issued following the program's entry into accreditation but prior to their next contract inception. In selecting to meet the revised expected practices, agencies are required to notify their Accreditation Specialist of their decisions to do so as soon as possible before the next compliance audit. The Accreditation Specialist will ensure the information is provided to the Visiting Committee.

Accreditation Process Descriptions

For over 120 years, the American Correctional Association has been the only national body involved in the development of standards for the correctional field. ACA standards are supported by ACA's Standards and Accreditation Department and the Commission on Accreditation for Corrections, which is the evaluating and certifying body for accreditation. The department is responsible for the administration of accreditation and ongoing development of correctional standards.

The accreditation process is a voluntary program for all types of correctional agencies. For these agencies, accreditation offers the opportunity to evaluate their operations against national standards, to remedy deficiencies, and to upgrade the quality of programs and services. The recognized benefits of such a process include: improved management; a defense against lawsuits through documentation; demonstration of a "good faith" effort to improve conditions of confinement; increased accountability and enhanced public credibility for administrative and line staff; a safer and more humane environment for personnel and offenders; and the establishment of measurable criteria for upgrading programs, staffing, and physical plant on a continuous basis.

A major component of the accreditation process is the standards compliance audit conducted by a visiting committee. The purpose of the audit is to measure operations against the standards, based on documentation provided by the agency.

AMERICAN OVERSIGHT

The Visiting Committee Report

The results of the compliance audit are contained in the Visiting Committee report. The finished report consists of a number of sections, which are compiled through an exchange of information between the Visiting Committee, the agency, and Performance Based Standards & Expected Practices Accreditation Department staff. The report is sent to agency staff for review and distribution to the agency administrator. The completed Visiting Committee report is submitted to the Commission for consideration at the next regularly scheduled panel hearing.

The following information is usually contained in the visiting committee report:

Audit Narrative - This section is prepared by the Visiting Committee chairperson and includes a description of program services, physical plant and number of offenders served on the date of the audit. It also details audit activities and findings, including issues or concerns that may affect the quality of life and services in an agency or facility, as well as information and impressions obtained during interviews with staff and offenders. The quality of life issues include the level of staff training, adequacy of medical services, sanitation, restricted housing, patterns of violence, and crowding in institutions, (including effects on housing (double-celling), offender activity levels, programs, and provision of basic services).

Compliance Tally - The tally is completed by the audit chairperson using a form prepared by the Performance Based Standards & Expected Practices Accreditation Department. Compliance percentages are calculated based on audit findings.

Audit Findings - Each expected practice found non-compliant or non-applicable is outlined, as well as the reasons for the findings.

Significant Incident Summary – The agency provides an electronic copy of this document to the Visiting Committee.

Annual Report – The agency provides its annual report on accreditation status (required annually for accredited facilities and as applicable for initial accreditation).

Outcome Measures (as applicable) - The agency provides an electronic copy of these documents to the Visiting Committee

Agency Response- The agency has three options for standards found in noncompliance: a plan of action; an appeal; or a waiver for the requirement of a plan of action request.

> A **plan of action** is a detailed statement of tasks to be performed in order to achieve compliance with a standard found in noncompliance at the time of the audit. The plan of action designates staff responsibilities and timetables for completion.
>
> An **appeal** is the agency's attempt to change the visiting committee's decision on a standard. The result of a successful appeal is a change in the

AMERICAN OVERSIGHT

status of the standard and a recalculation of the compliance tally.

A **waiver for the requirement of a plan of action** may be requested when noncompliance with a standard does not adversely affect the life, health, or safety of staff and offenders and when quality of life conditions compensate for the lack of implementation of a plan of action. The granting of a waiver by the Commission waives the requirement for submitting a plan of action; however, it does not change the non-compliant finding.

Auditor's *Response* - This section contains the Visiting Committee's final response to all comments received from the agency and Performance Based Standards & Expected Practices Accreditation Department staff, including:

- ✓ comments on agency appeals of the Visiting Committee's findings stating whether or not the committee agrees with the Appeal
- ✓ comments regarding the acceptance or rejection of Waiver requests
- ✓ comments on the acceptability of Plans of Action

Accreditation Hearings

The Commission on Accreditation for Corrections is solely responsible for rendering accreditation decisions and considers an agency's application at its next regular meeting following completion of the Visiting Committee report. The Commission is divided into panels that are empowered to reach and render accreditation decisions. These panels hear the individual application for accreditation and include a quorum of at least three Commissioners which includes the panel hearing chairperson. Agencies are notified in writing of the date, time, and location of the hearings by Performance Based Standards & Expected Practices Accreditation Department staff.

With the panel chairperson presiding, panel members discuss issues and raise questions relative to all aspects of agency operations and participation in the process. The information presented during the hearing and in the Visiting Committee report is considered by the panel members in rendering accreditation decisions.

The agency is invited to have a representative at the hearing and, in most cases, one or more individuals attend. When special conditions warrant, the Visiting Committee chairperson or a member of the Visiting Committee also may be asked to attend the hearings. When this occurs, the auditor provides information to help clarify controversial issues and responds to questions and concerns posed by panel members.

AMERICAN OVERSIGHT

Attendance by any other parties (i.e. media representatives, public officials, or personnel from agencies other than the applicant) occurs only with the permission of the applicant agency. In these cases, the applicant agency representatives and panel members discuss procedures to be followed before commencement of the hearing.

Conduct of Hearings

The panel schedule provides ample time for review of each individual agency pursuing accreditation. Hearings are conducted by the panel chairperson in accordance with established procedures. Panel proceedings require that a formal vote be taken on all final actions, i.e., agency appeals, Waiver requests, and the final accreditation decision of the Commission. All panel proceedings are tape-recorded to assist in preparing minutes of the hearings. Panel activities generally occur as follows:

- applicant agency representatives are requested by Performance Based Standards & Expected Practices Accreditation Department staff to be on-call to allow for scheduling flexibility
- a designated waiting area is usually provided for this purpose
- when the panel is ready to review the agency, the Performance Based Standards & Expected Practices Accreditation Department staff representative notifies agency representative(s)
- the hearing opens with an introduction by the panel chairperson
- the agency representative is asked to give a brief description of the program
- if a Visiting Committee member is present at the hearing, the panel chairperson may request that the auditor present an account of the visit, focusing on matters particularly pertinent to the decision or specific panel actions. In some cases, however, the panel may wish to call on the Visiting Committee member only to request additional information at different points during the hearing.
- the panel chairperson leads review of each individual non-compliance finding. The agency representative presents information relative to their requests for Waivers, Plans of Action, and appeals. The agency may also present additional materials, including photographs or documentation, for review by the panel.
- following the agency presentation, the chairperson has the option of calling the panel into executive session to consider the information provided, determine findings, and make an accreditation decision. Whether or not panel deliberations occur in the presence of agency personnel or in executive session, varies from panel to panel, considering the preference of panel members and the sensitivity of issues to be discussed regarding the application.

AMERICAN OVERSIGHT

In final deliberations, the Commission panel:

- ensures compliance with all mandatory expected practices and at least 90 percent of all other expected practices
- responds with a formal vote to all appeals submitted by the applicant agency
- responds with a formal vote to all requests for Waivers, and Plans of Action submitted by the applicant agency

At this time, the panel also:

- assures that an acceptable Plan of Action will be submitted for every non-compliance finding, including those for which appeals of non-compliance and Waiver requests have been denied by the panel. In judging the acceptability of Plans of Action, the panel ensures that all of the information requested on the form is provided. Furthermore, the feasibility of plans to achieve compliance is considered, including specific tasks, time frames, and resource availability (staff and funding) for implementing proposed remedies.

- addresses to its satisfaction any concerns it has with Visiting Committee comments about the quality of life in the facility or program, patterns of non-compliance, or any other conditions reviewed by the panel relating to the life, health, and safety of residents and staff

Following each applicant hearing, a roll call vote is conducted to consider the award of accreditation, extend an agency in the accreditation process or deny accreditation.

If the panel has deliberated in executive session, agency representatives are invited back into the meeting and informed of the panel's final decision and actions or recommendations on all other issues raised by the applicant.

If accreditation has not been granted, the chairperson discusses with agency personnel specific reasons for the decision and the conditions of extension as well as procedures for appeal.

Accreditation Decisions

The decisions available to the Commission panel relating to the accreditation of an agency are:

- *Three-year accreditation award* based on sufficient compliance with expected practices, acceptance of adequate Plans of Action for all applicable non-compliant findings, (or approval of the Waivers of the requirement that a Plan of Action be submitted) and satisfaction of any other life, health, and safety conditions established by the panel.

AMERICAN OVERSIGHT

- *Extension of the applicant agency in initial accreditation process* (initial accreditation only) for reasons of insufficient compliance, inadequate Plans of Action, or failure to meet other requirements as determined by the panel, the Commission may stipulate additional requirements for accreditation if, in its opinion, conditions exist in the facility or program that adversely affect the life, health, or safety of the offenders or staff. Extension of an agency is for a period of time specified by the panel and for identified deficiencies if in the panel's judgment, the agency is actively pursuing compliance.

- Continuation of accreditation in *Probationary Status* after reaccreditation hearings is considered when the panel specifies that compliance levels are marginal, there is a significant decrease in compliance from the previous audit (in the case of reaccreditation), or there are quality of life issues that would indicate continued monitoring. Probationary Status lasts for a specific period of time designated by the Commission to allow for correction of deficiencies. While an award of accreditation is granted, a monitoring visit *must* be completed and the report presented at the next meeting of the Commission. At the end of the probationary status, another monitoring visit MAY be conducted to ensure that the deficiencies have been corrected. Following the visit, a report is prepared for review by the Commission at its next regularly scheduled meeting. The Commission again reviews the program and considers removing the probationary status or the revocation of accreditation. When the agency corrects the deficiencies within the probationary status period and the corrections have been verified and accepted by the Commission on Accreditation of Corrections by the Commission on Accreditation of Corrections, the agency resumes its status as an accredited agency.

- *Denial of accreditation* denies initial accreditation or removes the agency from Accredited Status (in the case of reaccreditation) and withdraws the agency from the accreditation program. Situations such as insufficient compliance, inadequate Plans of Action, failure to meet other requirements as determined by the panel or quality of life issues may lead to the denial of accreditation. If an agency is denied accreditation by the panel, it is immediately appealed to the full commission. If the agency is denied accreditation by the full commission, it is withdrawn from the process and is not eligible to re-apply (as an applicant) for accreditation status for a minimum of six months from the date of that panel hearing.

The agency receives written notification of all decisions relative to accreditation after the hearing.

Appeal Process

The accreditation process includes an appeal procedure to ensure the equity, fairness, and reliability of its decisions, particularly those that constitute either denial or withdrawal of Accredited Status, or placement into probationary status. Therefore, if an agency is denied accreditation, it is immediately appealed to the full commission.

AMERICAN OVERSIGHT

If an agency is put in probationary status by the panel, it may submit an appeal of the placement into probationary status.

The basis for reconsideration of probationary status is based on grounds that the decision(s) were:

- ✓ A misinterpretation of the criteria and/or procedures promulgated by the Commission
- ✓ based on incorrect facts or an incorrect interpretation of facts
- ✓ unsupported by substantial evidence
- ✓ based on information that is no longer accurate

The reasonableness of the expected practices, criteria, and/or procedures for the process may not serve as the basis for reconsideration. The procedures for reconsideration are as follows:

- ✓ The agency can submit a verbal appeal immediately to the Director of Performance Based Standards & Expected Practices Accreditation or a written request for reconsideration within 30 days of the adverse decision stating the basis for the request.
- ✓ The Executive Committee of the Commission, composed of the officers of the Commission, reviews the request and decides whether or not the agency's request presents sufficient evidence to warrant a reconsideration hearing before the Commission. The agency is notified in writing of the Executive Committee's decision.
- ✓ If the decision is made to conduct a hearing, the hearing is scheduled for as soon as possible if the appeal is made verbally or if in writing, for the next full Commission meeting and the agency is notified of the date.
- ✓ The agency, at its option and expense, has the right of representation, including counsel.
- ✓ Following the hearing held before the Commission, the decision, reflecting a majority opinion, is made known to the agency immediately.
- ✓ Pending completion of the reconsideration process, the agency maintains its prior status. Until a final decision has been reached, all public statements concerning the agency's accredited status are withheld.
- ✓ Following completion of the reconsideration process, any change in the status of an agency is reflected in the next regularly published list of accredited agencies.

AMERICAN OVERSIGHT

Accredited Status

The accreditation period is three years, during which time the agency must maintain the level of compliance achieved during the audit and work towards compliance of those expected practices found in non-compliance. Regular contact with Performance Based Standards & Expected Practices Accreditation Department staff should also be maintained. The Annual Report, Critical Incident Report and Significant Incident Summary forms discussed below are available on the ACA website at www.aca.org or through your Accreditation Specialist.

Annual Report

During the three year accreditation period, the agency submits an annual report to the Performance Based Standards & Expected Practices Accreditation Department. This report is due on the anniversary of the accreditation (panel hearing) date utilizing the template provided by ACA staff (also available at www.aca.org). It contains the following information:

Current Compliance Levels - This includes any changes in compliance since accreditation, listing on a case by case basis any expected practice with which the agency has fallen out of compliance or achieved compliance.

Update of Plans of Action - A progress report is included with respect to Plans of Action submitted to the hearing panel, indicating the status of the completion of the plans. potential revision to plans reflecting the need to request additional time, funds, and/or resources to achieve compliance should also be included.

Significant Incident Report Summary - A report is made of events and occurrences at the agency during the preceding year that impact on compliance, agency operation, or the quality of services provided by the agency. Performance Based Standards & Expected Practices Accreditation Department staff review the annual report received from the agency and respond to clarify issues or request additional information if necessary.

Critical Incident Report

In addition to submission of the annual report, the agency is responsible for notifying Performance Based Standards & Expected Practices Accreditation Department staff of any critical incident that has the potential to affect compliance or facility accreditation as soon as possible within the context of the event itself. This information is to be submitted to ACA as soon as possible within the context of the incident itself, using the Critical Incident Report template available at www.aca.org.

Monitoring Visits

Monitoring visits to agencies in Accredited Status are conducted by an ACA auditor(s) in order to assess continuing compliance. A monitoring visit may be conducted at any time during the accreditation period with notice to the agency. The determination of need for a monitoring visit is based on:

AMERICAN OVERSIGHT

- ➢ compliance levels, findings, and recommendations by the Commission on Accreditation for Corrections during the hearing
- ➢ incidents or events reported by the agency in its annual report and any Critical Incident Reports
- ➢ other incidents or reports that may indicate the need for on-site review

The length of the visit varies depending on the number of expected practices or special issues that must be addressed during the visit. Monitoring visits may be charged to the agency.

Monitoring visits, as a general rule, involve a review of all mandatory expected practices, all non-compliance findings at the time of accreditation, and any other concerns identified. The visit also involves a tour of the agency and interviews with staff and offenders to ensure maintenance of the requirements of accreditation. It concludes with an exit interview during which the auditor informs the agency staff of the findings of the visit.

Following the visit, the auditor prepares a monitoring visit report that addresses findings of the visit.

The report includes a list of expected practiced reviewed, explanation of non-compliance findings, results of the tour and interviews with agency staff and offenders, and discussion of any issues believed to be relevant to the agency's accreditation. The report, as with others prepared by auditors, is reviewed and sent to the agency by Performance Based Standards & Expected Practices Accreditation Department staff.

When a monitoring visit to the agency reveals deficiencies in maintaining adequate compliance levels, including less than 100 percent compliance with mandatory expected practices, the agency prepares a response providing explanation of the problems indicated in the report. When the agency has failed to maintain compliance with all mandatory expected practices, the monitoring visit report and the agency response are submitted to the Commission on Accreditation for Corrections Executive Committee for review and referral to a Commission on Accreditation panel if necessary.

The Performance Based Standards & Expected Practices Accreditation Department may also request that the agency respond to public criticism, notoriety, or patterns of complaint about agency activity. The Performance Based Standards & Expected Practices Accreditation Department may conduct an on-site monitoring visit to the agency to verify continued compliance.

AMERICAN OVERSIGHT

Revocation of Accreditation

If a Commission panel believes that an agency's failure to maintain continuous compliance is detrimental to life, health, and safety of residents and staff, the Commission may place an agency on probation or revoke accreditation.

In the event information in annual reports, significant incident reports, or critical incident reports, or monitoring visits describe circumstances that would merit consideration of revocation of accreditation and the Commission on Accreditation for Corrections is not scheduled to be in session in a reasonable amount of time, the Commission on Accreditation of Corrections' Executive Committee may function as a panel for the purpose of consideration of the revocation action.

Expiration of Accredited Status

Accreditation is granted for a three-year period. Unless the agency has applied for reaccreditation and completed activities in the process required for reaccreditation, the Commission withdraws the agency from Accredited Status after this three-year period.

When unanticipated extenuating circumstances occur, (which may include natural disaster, disturbance, or other significant operational disruption outside of the control of the program), that limit an accredited program's ability to present themselves as scheduled for reaccreditation audit and subsequent Commission on Accreditation for Corrections panel action, then the Commission on Accreditation for Corrections Executive Committee or the Executive Director acting on their behalf may extend the accreditation of the program beyond the reaccreditation date by placing them in probationary status pending resolution of the relevant issue and subsequent audit and Commission on Accreditation for Corrections Panel action.

AMERICAN OVERSIGHT

Visiting Committee Report and Hearing Minutes

CONFIDENTIALITY

The American Correctional Association and the Commission on Accreditation for Corrections do not disclose to external parties specific information contained in this Accreditation Report or information discussed in the Accreditation Hearing. The Association encourages all participating agencies to provide information to the media about their accreditation activities, including disclosure of the Self-Evaluation and Accreditation Report.

COMMISSION ON ACCREDITATION FOR CORRECTIONS

STANDARDS COMPLIANCE REACCREDITATION AUDIT

ICE Health Service Corps
Northwest Detention Center (IHSC)
Tacoma, Washington

September 25-26, 2017

VISITING COMMITTEE MEMBERS

(b)(6); (b)(7)(C)
ACA Auditor

(b)(6); (b)(7)(C)
ACA Auditor

AMERICAN OVERSIGHT

A. Introduction

The audit of the Northwest Detention Center (IHSC), Tacoma, Washington was conducted on September 25-26, 2017 utilizing the American Correctional Association (ACA) Standards for Performance Based, Health Care for Adult Correctional Institution, 1st Edition and the 2014 Standards Supplement. The following team conducted the audit: Ernest Umunna, Chairperson and Randy Cross, Team Member. Although, this was a dual audit, there was a joint entrance and a separate exit conferences for the audit.

B. Facility Demographics

Rated Capacity: 1575 (Males - 1399 and Females - 176)
Actual Population: 1432 (Males - 1318 and Females - 114)
Average Daily Population for the last 12 months: 1429
Average Length of Stay: 0 Months: 85 days

(b)(7)(E)

Age Range of Detainees: 18-75
Gender: Male/Female

(b)(7)(E)

C. Facility Description

The Northwest Detention Center (NWDC) contracts with the Department of Homeland Security, Immigration and Customs Enforcement (ICE), Office of Enforcement and Removal Operation (ERO) to house individuals, including male and female adults, who are pending immigration review. NWDC opened on April 23, 2004, with 500 contractual beds. In November 2005, the GEO Group, Inc. (GEO) acquired the (NWDC). The facility is physically located at 1623 East J Street, Tacoma Washington, about 40 minutes south of Seattle and 1.2 miles from the Tacoma Dome Bus Station. The facility is located on 15.3 acres in an industrial area of the city. The contractual capacity was increased from 500 to 800 beds in July 2006, and again to 1000 beds in January 2008. In October 2009, the contractual capacity was increased to 1575 as it currently stands.

AMERICAN OVERSIGHT

The demand for increased bed space necessitated an expansion of the institution's infrastructure and resulting in a major expansion project in November 2008. The project was completed in May 2010. Space was added to accommodate additional housing units and the third courtroom, as well as an extended office space for the administration areas for the ICE and GEO, Additionally, two outdoor recreation yards were constructed and became operational in June 2015. A large portion of the detainee population comes from Central and South America. In 2015, 79% of the detainees admitted to the facility were from Central America (Mexico, El Salvador, Guatemala, Honduras, and Ecuador). The remainder of the population came from 114 countries. The NWDC is surrounded by a single perimeter fence. The vehicle entrance is controlled by accessing one of two gates. There is also a gate entrance for buses and vans transporting detainees in/out of the intake area. Entrance into the facility is controlled by a post at the main visitor entrance and a second key control entrance for facility staff.

There are administrative offices for both facility and ICE staff, a conference room, a physical fitness area, staff lockers, an armory, and control center in the front of the building. Access into the secure area of the facility is gained through the pedestrian sally port, controlled by the Master Center. Inside the facility there is a 438 foot main hallway providing access to the laundry, food service, visiting room, medical clinic, library and other program areas. There is a noncontact visiting area with private rooms for attorney visits. There are 18 male and 2 female housing pods contained within 17 housings units (labeled A-G) plus a segregation unit (H). 11 housing pods are all dormitory style, 5 are cell housing and 4 are a combination of cells and dorms. All cells are double celled except the segregation cells which are single. There is an intake booking area with holding cells, property storage, officer's station, and two health care/mental health rooms. All cells have a one piece sink and toilet, and there are community showers in all pods. Dorm style pods have group showers, sinks, and toilets. The medical holding cells all have an in-cell shower, toilet and sink. The facility also has three courtrooms within the secure perimeter that are utilized for deportation hearings.

ICE Health Services Corps Mission Statement -"IHSC is committed to providing health care services to reduce global disease and support the safe apprehension, enforcement and removal of detained individuals involved in immigration proceedings".

The Northwest Detention Center (NWDC) in Tacoma is the fourth largest such Immigration and Customs Enforcement, or ICE, detention facility in the country. The mission of the "NWDC is to provide conditions that are safe, secure and sanitary for detainees waiting processing for an administrative hearing or removal".

AMERICAN OVERSIGHT

(b)(7)(E)

D. Pre-Audit Meeting

On Sunday, September 24, 2017 the members of the audit team were transported from the Seattle-Tacoma International Airport to the Holiday Inn Express & Suites Tacoma Downtown by (b)(6); (b)(7)(C) Director, ACA Accreditation, Contract Compliance, GEO Group, Inc. The distance from the airport to the hotel was approx. 23.8 miles (54 minutes).

The audit team met briefly at the hotel on that evening to discuss the information provided by the Association staff and the officials from the Northwest Detention Center(IHSC). The chairperson divided the standards into the following groups:

Standards #HC 1A-01 to 3A-11 to (b)(6); (b)(7)(C)
Standards #HC 3A-12 to 7C-01 to

The audit team attended an "ice-breaker" dinner at the Shenanigans restaurant approximately from 06:00 PM to 07:50 PM that evening with Lowell Clark - Warden –

(b)(6); (b)(7)(C)

AMERICAN OVERSIGHT

ALDF audit team and other facility staffs. General conversation followed as the team member and the IHSC staff became acquainted, and general audit goals and procedures for the audit were discussed.

E. The Audit Process

1. Transportation

On Monday, September 25, 2017, the audit team was picked up from the hotel by (b)(6); (b)(7)(C) Director, ACA Accreditation, Contract Compliance, GEO Group, Inc. at 07:30 AM and arriving NWDC at 07:40 AM. The team followed the NWDC's security procedures.

2. Entrance Interview

The team was escorted to the main executive conference room by (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) Director, ACA Accreditation, Contract Compliance (GEO Group) for a brief meeting with Warden Clark Lowell from 07:50 AM to 08:26 AM to express appreciation and explain the purpose of the audits. At 8:35 AM the audit team proceeded with the formal entrance meeting at the same conference room for a joint entrance audit meeting. The audit schedule and procedures were discussed, and the NWDC-IHSC staffs were asked about any problem areas of which the team should be aware. The NWDC-IHSC executive staffs were advised that the audit team would meet with them each evening prior to their departure from the facility to discuss the progress of the audit up to that point, and any problems that were encountered, and the audit team will attempt to review all the mandatory standards on the first day. Escorts were requested to accompany the auditors on the tour and subsequent visits to departments, and to note the number of detainees and the names and titles of employees with whom the auditors spoke.

The NWDC-IHSC staffs were asked if any detainee or employee had requested to speak with the auditors. No requests had been made. The audit chair expressed the team's appreciation and the appreciation of the ACA for the opportunity to be involved with the NWDC-IHSC audit in its re-accreditation process, and emphasized the goals of the accreditation, which are to improve the efficiency and effectiveness of correctional systems throughout the United States. The audit team was aware that the facility staff, especially the NWDC-IHSC staff had worked long and hard in preparation for this event, and accordingly the team would endeavor to provide a fair, equitable and thorough audit as possible while holding them accountable to high standards. The team members would visit as many departments and areas as possible relating to the audit and meet and speak with as many staff and detainees as possible in the time available, while at the same time strive to be as non-intrusive as possible.

AMERICAN OVERSIGHT

It was requested that when audit team members paused to speak with detainees, that staffs step away so that the conversation may remain private and the team would like to observe the practice in any medical emergency. The audit team reemphasized that the purpose of the audit is to be helpful and to assist the facility in achieving its re-accreditation. The entrance meeting lasted until 08:50 AM.

The following persons were in attendance:

(b)(6); (b)(7)(C)	Warden - NWDC Asst. Warden/Finance - NWDC Chief of Security - NWDC Compliance Administrator - NWDC HR Manager - NWDC Administrative Assistant - NWDC GEO Transport Incorporated Manager - NWDC Asst. Food Services Manager - NWDC Corporate Contract Compliance - GEO Asst. 4. Conditions of Confinement/Quality of Life

During the tour, the team evaluated the conditions of confinement at the facility. The following narrative description of the relevant programmatic services and functional areas summarizes the findings regarding the quality of life.

AMERICAN OVERSIGHT

Food Service:

Foodservices are provided by GEO Employees. Food service staffs includes (b)(7)(E) (b)(7)(E) (b)(7)(E) All meals provided are approved by a certified dietician and are nutritionally balanced, and are properly prepared. Meals are served in clean and safe surroundings. Detainees are provided three hot meals per day. There is no pork products served in this facility. Medical diets are provided by the Food Service Department upon receipt of written instructions from the facility Clinical Director. Meals are served in the day room of each housing units. Detainees in the Special Management Unit (SMU), SEG etc. are served in their cells. Meal schedules are breakfast at 05:30 AM, Lunch at 12:30 PM and Dinner at 05:30 PM. The audit team ate the detainee's dinner meal of applesauce, broccoli, white rice, hot dog (2), and hot dog buns and fruit punch on the first day of the audit. The food was well prepared, tasty and hot, and served in adequate portions.

The facility utilizes a "Diet for Health" menu and based on a six week menu cycle. Meals samples are kept for 72 hours. At the time of the audit, there were 160 medical diets. These diet orders contain both start and stop dates. These may be ordered anywhere from one day to length of stay. Diabetics on insulin have midnight snacks. Medical evaluations and screenings are done on detainee workers which monitored cuts/sores, burns, runny nose, nail condition and cold/flu symptoms. Detainees are allowed to handle food preparation. Refrigerators, freezers and the dry storage area were clean, orderly and clutter-free, and temperatures were in the appropriate ranges. The dishwasher was in proper working order, and documentation reflected temperatures in the appropriate range. Produce, milk and meat product are delivered twice per month. Expirations on food service products are carefully monitored.

Medical Care:

Medical services at the NWDC-IHSC are contracted through the INGENESIS. They also utilize Public Health Service (USPHS), Government Service (GS) staffing, Agency Nurses (Maxim Healthcare Services) and PRN's to provide medical, mental health and dental services. NWDC-IHSC medical receives detainees throughout the U.S and some with the history of high-risk behaviors, compounded by lack of medical care and /or mental health treatment, and are more likely to have chronic illnesses and infectious diseases. NWDC-IHSC is not an Intake/Diagnostic facility, but receives detainees off the street occasionally. The facility has a responsible physician (MD) and a Health Services Administrator (HSA). The working relationship between medical, mental health, program, dental and security are very remarkable. Medical staffs are well trained and caring professionals.

AMERICAN OVERSIGHT

Other accreditations for the NWDC-IHSC include National Commission on Correctional Health Care (NCCHC) and Performance Based National Detention Standards (ICE). The audit team observed the weekly (Tuesdays) agency shareholders meeting on the second day of the audit and found the meeting comprehensive and participatory. The meeting involved representatives from GEO Group, ICE, IHSC, Courts, CE's Office of the Principal Legal Advisor (OPLA), Contracting Officers Technical Representative (COR), Field Medical Coordinator (FMC) and Detention Services Manager (DSM). There are peer review evaluations and multidisciplinary team meetings.

(b)(7)(E)

NWDC-IHSC medical has the followings:

- 2 AED's (secured and inspected)
- 1 EKG (secured and inspected, and read on site)
- 1 Fixed wall digital chest x-ray machine
- 1 Emergency bag (secured, inspected and sealed)
- 1 Secure administration medication room
- 1 Medication room
- 1 Pill window
- 4 Refrigerators (Flu, TB Solutions, etc.)
- 1 Refrigerator (Specimen)
- 4 Portable oxygen cylinders (secured and inspected by Airgas)
- 1 Oxygen concentrator (secured and inspected by Airgas)

AMERICAN OVERSIGHT

- 4 Negative pressure rooms (toilet and sink, and inspected 01/17/2017 by Air Management Solutions, Powder Springs, GA)
- 5 Suicide observation rooms (toilets and sinks)
- 2 Medical holding cells (toilets and sinks)

NWDC-IHSC has a Disability Placement Program (DPP) that provides for housing accessible lockers, bunk beds with grabs bars, accessible TTY phones, volume control phones, accessible dayroom tables and accessible path of travel. There are ample supplies of walking sticks, crutches and wheel chairs in the facility. Physical Therapy is provided through the St. Joseph's Outpatient Physical Therapy, Tacoma, WA.

NWDC-IHSC uses the following hospitals for inpatient hospitalization:

1. St. Joseph Medical Center, Tacoma, WA (local ER)
2. Tacoma General Hospital, Tacoma, WA

NWDC-IHSC has an agreement with the Tacoma Fire Department and EMS (4 minutes, 1.1 miles) in case of medical emergencies. Non-emergent medical transportation is done by facility staff to either a hospital facility or community provider for offsite consultations. The nurses have Basic Life Support (BLS) certified through the American Heart Association (AHA). Medical maintain basic TTA protocol medicine such as Epi pen, Narcan, Glucagon and etc. The Master SDS is maintained in medical. Officers are trained on first aid, CPR and AED, and are considered first responders. Upon admittance to the IHSC/NWDC, detainees receive a detainee handbook to aid in adjustment to detention setting. This documentation contains information regarding medical services, sick call process, grievance procedures and hygiene rules. Other methods are used to inform detainees about MRSA, AIDS, Hepatitis, and the spread of HIV, blood borne pathogens and safety. The audit team observed a medical emergency on the second day of the audit and medical responded within time.

Sick call is provided 7 days/week in General Population (GP), Special Management Unit (SMU) and SEG from 05:30 AM-until completed daily for males and females. The pod officer announces sick call and any detainee who wishes to come to sick call exits the dorm and reports to the intake area (F-Pod detainees report to the F-Medical office hallway) where they are triaged. The females are addressed first, then the males to ensure the populations are not mixed. In SEG, the detainees can sign up using a paper form, or verbally requesting of the RN doing SEG rounds at 0530 – 0600. Detainees sign up for sick calls at each housing unit electronically and in paper form. Detainees housed in SMU or SEG access all medical services via face to face encounters with an RN during daily rounds. Detainees housed in GP access all medical services via call out logs or electronic system.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001047

The average monthly sick calls are 708. The audit team observed sick call process in clinic and SMU on the second day of the audit and found the process well organized. Medical requests are triaged within 5 days, and any patient with symptoms is seen within one day. …." We do not have a medical Kite (request) system. All detainees are asked to come to sick call for any medical concern or request and are triaged at that time to determine the appropriate level of response/ care to provide. Any detainee who reports to sick call will be seen that same day.

There is no medical copay. No detainee is denied health care service. NWDC-IHSC uses detainee electronic medical records. Medical grievance is through the grievance box, collected by a grievance coordinator, and reviewed by the HSA within 7 days. Detainees have the option to submit a grievance using a paper form submitted through the medical grievance box outside of medical, or to use the electronic grievance system. Detainees are encouraged to use the electronic grievance system as it is sent directly to the medical grievance officer and received immediately upon submission. The system has a translation feature, so the detainee can write in the language most comfortable to them. The reply is sent straight to the detainee and the full communication is maintained in the database. The system creates an electronic log for accountability and tracking.

NWDC-IHSC averages six substantiated medical grievances per year mostly on medication preference, medication refills and time line to see a provider.

Services such as Physical Therapy, General Surgery, Cardiology, Dermatology, Endocrinology, Endodontist, Gastroenterology, Hematology, Infectious Disease, Internal Medicine, Nephrology, Neurology, Orthopedic, OBGYN, Ophthalmology, Oncology, ENT, Podiatry, Pain Management, Urology, Pulmonary, Neuro Surgery, Plastic Surgery, Oral Surgery, Rheumatology, Optometry, Asthma and Allergy, Sleep Study are provided through off-site contracted specialists. The turnaround time to see an offsite contracted specialist is emergent-immediate, urgent 1-day and routine 14-days. There were no pregnant detainees or detainees on dialysis at the time of the audit. The number of chronic care detainees excluding mental health at the time of the audit was116. Males 50+ and females 40+ are provided with age specific annual medical examinations.

NWDC-IHSC has a plan for the management of communicable diseases including education on prevention, diagnosis, treatment and isolation. NWDC-IHSC has an infectious disease coordinator. NWDC-IHSC has four negative pressure rooms (5-beds). Infirmary services are provided at the St. Joseph's Medical Center, Tacoma, WA. MRSA precautions are in place. Universal precautions are practiced throughout the facility. There are available first aid and blood borne pathogen kits. There are eye wash stations present in appropriate areas. Hand sanitizers (non-alcohol) dispensers were located throughout medical and other areas. Sanitation and housekeeping is provided using detainee help. The total monthly TB tests are 404. An annual TB testing is conducted on all detainees after 12 months. NWDC-IHSC does not offer TB sticks only chest x-rays.

AMERICAN OVERSIGHT

Medications are stored in a medication room and secured behind double locks. A nurse administers medications three times a day and seven days a week in GP and SMU by direct observed therapy (DOT) at 08:00 AM, 12:50 PM and 08:00 PM for males and 08:30 AM, 01:15 PM and 07:30 PM (females). Prior to giving medications, detainee's identification is confirmed and mouth cavities checked after administration.

The audit team observed medication administrations in the GP and SMU, including diabetic line on the second day of the audit and found the process organized and timely. All no shows or refusal to medications are documented and /or referred. The HSA checks the electronic MARS record for missed doses. Keep on person medications are issued on 1:1 exchange. There are separate diabetic lines two times a day and seven days a week at 05:00 AM and 05:00 PM. At the time of the audit there were 67 diabetics (19-Insulin and 48 Non-insulin dependents). Insulin diabetic detainees receive mid-night snacks. Medical diets are coordinated with the food service. The audit team examined the manual during the audit and found it current. The manual is updated regularly by medical. There were 160 medical diets at the time of the audit. The average monthly detainees on prescription medications were 787, and controlled medications were 45. Some medications are crushed per doctor's order. Detainees are provided 30-day medications upon release. Per policy, detainees are provided a 7 day supply for most medications, those medication that policy states a 30 day supply should be given are filled as such. Additionally, the physician may request a 30 day supply be given upon release/deportation.

Specific Over-The-Counter (OTC) medications are offered at the Commissary, and reviewed and approved by the Clinical Director. NWDC-IHSC does not perform detoxification from alcohol, opiates hypnotics, other stimulants and sedative hypnotic drugs.. Detainees who come into our facility under the influence of alcohol or other substances are monitored and treated in accordance with National IHSC policy. Detainees determined to be experiencing severe withdrawal symptoms are referred to the local emergency room for assessment and treatment.

(b)(7)(E)

(b)(7)(E) Medications are ordered through McKesson Pharmacy. The backup pharmacy is the Diamond and a local Walgreen Pharmacy. Detainees are allowed keep-on-person (KOP) medications. The pharmacy is audited by the IHSC yearly, the HSA quarterly and internal audits. A random inventory count on sharps and controlled medications was accurate. The pharmacy has a refrigerator and a freezer for the storage of insulin, vaccines and ice packs. The audit team found the temperature log and inventory current. Basic medical supplies and materials are obtained through McKesson.

AMERICAN OVERSIGHT

The disposal of expired, unused, discontinued, recalled, over stocked medications including prescription, (pills and liquids) and narcotics are arranged through the Reverse Distributors. At the time of the audit there were medications awaiting disposal. Records are maintained on disposal process.

NWDC-IHSC medical has a draw only lab. Specimens are collected on site. Blood is spun and sent out for analysis to the LabCorp 5–days/week and reports received through fax/phone within 24-48 hours. STAT labs are also sent to the LabCorp and results received through fax/phone within 2-4 hours. Average monthly detainee lab tests are 924. Stericycle is contracted to pick up the biohazard and sharps wastes. The audit team checked the specimen refrigerator temperature log and found the records current. Chronic care patients receive annual screening test. Laboratory results are also incorporated into the EMR. NWDC-IHSC has a fixed wall stand digital chest x-ray machine. The X-ray department is supported by a fulltime contracted Radiology Technician (contract) through the XRAD Tele-Services and dosimetry by Pulse Imaging. All Intakes except transfers receive chest x-rays. Per IHSC policy , All Intakes except transfers (who have been in continuous ICE custody) ,with current chest x-rays, receive chest x-rays. Radiology services (MRI, Ultrasound, etc.) including STAT are provided through the St. Joseph's Medical Center Diagnostic Imaging, Tacoma, WA with results received in 2-48 hours by phone/fax.

(b)(7)(E)

(b)(7)(E) Dental services are provided from 05:30 AM - 05:00 PM (Monday-Friday). Dental services include basic dentistry, prophylaxis, fillings, partials, extractions, selected root canals, adjustment to existing dentures, cleaning, oral cancer screenings and patient education. The detainees access dental health services through the sick call process. The audit team reviewed the licenses, registrations, records and random inventory of sharps and instruments and found them accurate. The dental area was clean. Dental instruments and sharps not used at the year of expiration are re-autoclaved and repackaged.

The Dentist has a standing order; dental emergency outside the expertise of the nurse is referred to one of the contracted hospitals. The Dentist is notified. Dental at NWDC-IHSC is equipped with one (1) digital dental bitewing x-ray machine, two (2) dental chairs and one (1) Panorex digital x-ray machine. The dental wait time is less than 7 days. Urgent requests are seen within 24 hrs. The average monthly dental appointment is 343. Dental amalgam disposal is through WasteWise. Dosimeter reading is through PRS Dosimetry. Dental chair traps are cleaned weekly. Dental supplies are through Two Rivers Medical and dental equipment service, including dental compressor service is obtained through the Henry Schein. Broken tools are documented and disposed by facility maintenance.

AMERICAN OVERSIGHT

(b)(7)(E)

(b)(7)(E) They provide services 06:30 AM-08:00 PM (Mon-Fri) and 07:00 AM-03:30 PM (Sat) and on call. Daily rounds are conducted and detainees are evaluated every 30/60/90 days depending on needs. Detainees access mental health services via the sick call process. Staffs can refer services. There are approximately 428 detainees seen monthly. There were approximately 123 detainees on psychotropic medication at the time of the audit. All suicide ideations are referred to Mental Health and monitored, and observed 1:1. NWDC-IHSC has five suicide observation rooms. There are available suicide garments. NWDC-IHSC maintains zero tolerance for sexual abuse and harassment. Detainees are provided information on enhanced victim services and rape crisis hotline. Program services include crisis intervention, individual and group counseling and medication management. Severely developmentally and disabled detainees receive a mental health evaluation where appropriate and are referred for placement at the following inpatient psychiatric hospitals:

1. Greater Lakes Recovery Center, Tacoma, WA
2. Greater Lakes Evaluation and Treatment, Parkland, WA
3. Telecare Recovery Partnership, Lakewood, WA
4. Metropolitan Counsel Evaluation and Treatment Psychiatric Unit, Tacoma, WA
5. Recovery Innovation (leased space on the grounds of Western State Psychiatric Hospital, Tacoma, WA
6. Alvarado Parkway Institute, San Diego, CA

Laundry:

The audit team observed adequate supply of bed linens, pillows and blankets. Laundry process is done using mess bags. Bed linens, pillow cases and clothing are exchanged weekly and blankets are exchanged quarterly. Medical wastes are contained and washed separately using biohazard dissolving bags.

F. Examination of Records

Following the facility tour, the team proceeded to the medical conference room to review the accreditation files and evaluate compliance levels of the policies and procedures. The facility has no notices of non-compliance with local, state, or federal laws or regulations.

1. Litigation

The facility had no consent decrees, class action lawsuits or adverse judgments in the past year.

AMERICAN OVERSIGHT

2. Significant Incidents/Health Care Outcome Measures

The audit team reviewed the Significant Incident Summary and the Health Care Outcome Measures with the health care administrative team. During the audit period there were no deaths or serious medication errors. The audit team discussed the following sections on the Healthcare Outcome Measures for the audit period as follows:

1. Section 1A (9): Number of detainee with an active individualized services/treatment plan for a diagnosed mental disorder (excluding sole diagnosis of substance abuse) at a given point in time was 213 in 2016-17, and with average detainee population of 1435. The NWDC-IHSC provided statement that the number suggested increase in better tracking and facility sometimes receives detainees off the street.
2. Section 3A (1): Number of detainee grievances related to health care services found in favor of the detainee in the past twelve (12) months was 6 in 2016-17, and with average number of evaluated grievances of 201. The NWDC-IHSC provided statement that grievances are due to detainees self-diagnosing and medication refills.

The values stated for the measures reflected a very busy facility with high transfer detainees from diverse population and age, with a wide variety of health concerns. The medical auditor concurs with the responses.

3. Departmental Visits

The team revisited the following departments to review conditions relating to departmental policy and operations:

Department Visited	Person(s) Contacted
Intake	(b)(7)(E)
Medical	
D2 Dorm (Female)	

AMERICAN OVERSIGHT

D1 Dorm (Female)

Law Library
Barber Shop
Laundry Room
Food Service

Recreation Yard

(b)(7)(E)

4. Shifts

a. Day, Evening and Night Shifts

The audit team was present at the facility during the day, evening and night shifts from 05:57 AM to 05:45 PM on the first day of the audit. The team observed evening shift briefing from 07:15 AM-07:30 AM (3rd and 1st shifts) and 03:15 PM-03:30 PM (2nd shift). The briefing was mutual and participatory. Shift briefings are a normal occurrence. The shift supervisors passed on information to the oncoming shift. A familiar and easy rapport was evident among the staff, and information was freely exchanged. The audit team briefly introduced themselves and discussed the purpose of the audit and matters pertaining to the audit. The audit team observed diabetic line and spoke to 19 detainees (males and females) and 10 staffs, while the rest of the medical staff was busy taking care of the detainees and pleasant and professional.

5. Status of Previously Non-compliant Standards/Plans of Action

There were no standards previously found non-compliant.

The team reviewed the status of standards previously found non-compliant, for which a waiver was not granted, and found the following:

There were no standards previously found non-compliant for which a waiver was not granted.

G. Interviews

During the course of the audit, team members met with both staff and detainees to verify observations and/or to clarify questions concerning facility operations.

1. Detainee Interviews

The audit team interviewed and spoke to approximately 124 detainees (males-63 and females-61) including the youngest and oldest of the males and females who stated that they generally felt secure at the facility and were treated fairly by staff.

AMERICAN OVERSIGHT

Their basic needs were being met and they felt that they were making positive progress towards eventual and successful release. They also felt that their basic medical needs were being met. They have ready access to sick call process and all were aware of the grievance process and the use of the 24 hr. card. Detainee morale appeared to be good and they were cooperative, respectful and were aware of the audit, and participated in the preparation for the audit. Notices of the ACA Accreditation process were observed to have been posted at different locations readily available to the detainees, and there were no detainees requested to speak privately with the audit team.

2. Staff Interviews

The audit team interviewed and spoke to approximately 51 employees, including 23 medical staffs, and observed them in the performance of their duties. The audit team observed structured medical shift change briefings. Staffs were polite, cooperative, and conducted themselves in a professional manner. There was a normal working relationship between medical, dental, mental health, programs and security, and communication flowed freely. Gender and ethnic diversity was good and morale also appeared to be good. Staff indicated that their training were excellent and are applicable to their positions and job needs.

H. Exit Discussion

The exit interview was held at 12:02 PM in the medical conference room with (b)(6); (b)(7)(C)
(b)(6); (b)(7)(C)

The chairperson explained the procedures that would follow the audit. The audit team discussed the compliance levels of the mandatory and non-mandatory standards and reviewed their individual findings with the group.

The chairperson expressed appreciation for the cooperation of everyone concerned and congratulated the facility team for the progress made and encouraged them to continue to strive to maintain their high level of professionalism in the correctional field.

Significant Incident Summary
This report is required for all **residential** accreditation programs.

This summary is required to be provided to the Chair of your visiting team upon their arrival for an accreditation audit and included in the facility's Annual Report. The information contained on this form will also be summarized in the narrative portion of the visiting committee report and will be incorporated into the final report. Please type the data. If you have questions on how to complete the form, please contact your Accreditation Specialist.

This report is for Adult Correctional Institutions, Adult Local Detention Facilities, Core Jail Facilities, Boot Camps, Therapeutic Communities, Juvenile Correctional Facilities, Juvenile Detention Facilities, Adult Community Residential Services, and Small Juvenile Detention Facilities.

ACCREDITATION REPORT

Commission on Accreditation for Corrections

ICE Health Service Corps
Port Isabel Service Processing Center (IHSC)
Los Fresnos, Texas

The mission of the Commission on Accreditation for Corrections is to upgrade and improve practices and conditions in adult and juvenile correctional facilities and programs through an accreditation process which is founded on a commitment to accountability, professionalism and respect for basic human rights and which recognizes sound and effective correctional practices, while striving towards excellence in the field of corrections.

October 10, 2017

ICE Health Service Corps
Port Isabel Service Processing Center (IHSC)
Los Fresnos, Texas

Congratulations!

It is a pleasure to officially inform you that the Port Isabel Service Processing Center (IHSC) was accredited by the Commission on Accreditation for Corrections at the American Correctional Association 2017 August Conference on August 21, 2017 in St. Louis, Missouri.

Your accreditation represents the satisfactory completion of a rigorous self-evaluation, followed by an outside review by a team of experienced, independent auditors.

Every profession strives to provide a high quality of service to society. To know that you, your staff, and other officials are complying with the requirements of the accreditation process is indeed a statement of a high level of commitment to the staff and persons under your care.

On behalf of the American Correctional Association and the Commission on Accreditation for Corrections, thank you for your commitment to the corrections profession and to the accreditation process.

Sincerely,

Denise M. Robinson

For Immediate Release

Port Isabel Service Processing Center (IHSC) Awarded National Accreditation

Denise Robinson, Chairperson of the Commission on Accreditation for Corrections (CAC), and Bridget Bayliss-Curren, Director of Standards and Accreditation, American Correctional Association recently announced the accreditation of the Port Isabel Service Processing Center (IHSC). The award was presented in conjunction with the American Correctional Association 2017 Summer Conference on August 21, 2017 in St. Louis, Missouri.

In presenting the award, Denise Robinson, Chairperson of the CAC, and Lannette Linthicum, President of the American Correctional Association (ACA), complimented the facility on their professional level of operation and their success in completing the accreditation process. The agency is one of over 1,500 correctional organizations currently involved in accreditation across the nation.

The accreditation program is a professional peer review process based on national standards that have evolved since the founding of the Association in 1870. The standards were developed by national leaders from the field of corrections, law, architecture, health care, and other groups who are interested in sound correctional management.

ACA standards address services, programs, health care and security operations essential to effective correctional management. Through accreditation, an agency is able to maintain a balance between protecting the public and providing an environment that safeguards the life, health, and safety of staff and offenders. Standards set by ACA reflect practical up-to-date policies and procedures and function as a management tool for agencies and facilities throughout the world.

The three-year accreditation award granted to the Port Isabel Service Processing Center (IHSC) does not signal the end of their involvement in the accreditation process. During the award period, staff will work to improve any deficiencies identified during the audit and maintain continuous compliance with the standards.

Congratulations on your accreditation award! You are now a member of the elite in achieving correctional excellence. The certificate you have received is but a small symbol of the enormous dedication and commitment demonstrated by each and every member of your staff to the accreditation process, and I urge you to display it prominently as a continual reminder of the level of professionalism achieved. This is just the beginning of your journey, however, for the true test of excellence is the test of time. It is critical that your operation be able to sustain this achievement over time and be constant through both prosperity and adversity.

Achieving American Correctional Association Accreditation means you have demonstrated your dedication to getting the job done right, and that you are holding your agency to a higher standard.

Thank you for your commitment to the American Correctional Association and the standards and accreditation process.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001070

Overview of the American Correctional Association

The American Correctional Association is the oldest and most prestigious correctional membership organization in the United States. Founded in 1870, ACA currently represents more than 20,000 correctional practitioners in the United States and Canada. Members include all levels of staff from a wide variety of correctional disciplines and programs as well as professionals in allied fields and representatives from the general public. In addition, the Association represents the interests of 74 affiliated organizations whose goals, while similar to those of ACA, focus on specialized fields and concerns within the realm of corrections.

At its first organizational meeting held in Cincinnati, Ohio, in 1870, the Association elected then-Ohio governor and future U.S. President, Rutherford B. Hayes, as its first president. The *Declaration of Principles* developed at that first meeting became the guidelines for correctional goals in both the United States and Europe.

Since that time, ACA has continued to take a leadership role in corrections and work toward a unified voice in correctional policy. In recent years, one of the Association's major goals has been the development of national correctional policies and resolutions of significant issues in corrections. These policies are considered for ratification at the Association's two annual conferences and ratified policies are then disseminated to the field and other interested groups. ACA has also had a major role in designing and implementing professional standards for correctional practices, as well as methods for measuring compliance with those standards.

The Association conducts research and evaluation activities, provides training and technical assistance, and carries out the regular responsibilities of any professional membership organization, including a full publications program. The Association's two annual conferences, held in varying cities across the nation, attract more than 5,000 delegates and participants each year from the 50 states, U.S. territories, and several foreign countries.

Membership in ACA is open to any individual, agency, or organization interested in the improvement of corrections and the purposes and objectives of the Association. Members include the majority of state, local, provincial, and territorial correctional agencies; individual correctional institutions and local jails, pretrial programs and agencies, schools of criminal justice in colleges and universities, libraries; and various probation, parole, and correctional agencies. Most of ACA's members are employed at the federal, state, and local levels. Members also include more than 200 volunteers affiliated with these agencies as administrators or as members of advisory boards and committees.

AMERICAN OVERSIGHT

Organizational Purposes of the American Correctional Association

Among the most significant purposes of the Association as outlined in its Constitution, are:

To promote the coordination of correctional organizations, agencies, programs, and services to reduce fragmentation and duplication of effort and increase the efficiency of correctional services on a national basis.

To develop and maintain liaisons and a close working relationship in America with national, regional, state, and local associations and agencies in the correctional, criminal justice, civic, and related fields for mutual assistance and the interchange of ideas and information, and to extend and strengthen cooperative working relationships with similar associations and agencies on the international level.

To develop and promote effective standards for the care, custody, training, and treatment of offenders in all age groups and all areas of the correctional field: detention facilities and services, institutions and other facilities for juvenile and adult offenders, probation, parole, community residential centers, and other community-based programs and services.

To conduct studies, surveys, and program evaluations in the correctional field, and provide technical assistance to correctional organizations, departments, institutions, and services.

To publish and distribute journals and other professional materials dealing with all types of correctional activities.

To promote the professional development of correctional staff at all levels.

In carrying out these purposes, ACA sponsors programs for policy analysis, demonstration, and research. ACA also provides testimony, consultation, publications, conferences, workshops, and other activities designed to stimulate constructive action regarding correctional problems.

Standard and Accreditation

Perhaps ACA'S greatest influence has been the development of national standards and the accreditation process. ACA standards address services, programs, and operations essential to effective correctional management. Through accreditation, an agency is able to maintain a balance between protecting the public and providing an environment that safeguards the life, health, and safety of staff and offenders. Standards set by ACA reflect practical up-to-date policies and procedures and function as a management tool for over 1,500 correctional agencies in the United States.

AMERICAN OVERSIGHT

Organizational Structure of the American Correctional Association

Executive Committee

The Executive Committee is composed of the elected officers of the Association - president, vice president, treasurer, two Board of Governors' members, the immediate past president, the president-elect, and the ACA executive director. The Executive Committee meets at least quarterly and exercises most of the powers of the Board of Governors during the intervals between meetings of the board.

Board of Governors

ACA's bylaws vest control of the Association with an 18-member elected Board of Governors composed of the officers of the Association and five at-large members. To ensure the interdisciplinary nature of the Association, board members must represent the following areas:

At-Large Citizen (not employed in corrections)
Correctional Administration (Adult)
Correctional Administration (Juvenile)
Institutions (Adult)
Institutions (Juvenile)
Probation (Adult)
Probation (Juvenile)
Parole or Post-Release Supervision (Adult)
Community Programs (Adult)
Community Programs (Juvenile)
Aftercare or Post-Release Supervision (Juvenile)
Detention (Adult)
Detention (Juvenile)
At-Large (Ethnic Minority) (3)
Education
Member At-Large

Delegate Assembly

The Delegate Assembly is composed of delegates from the professional affiliates, geographical chapters, membership at-large, Board of Governors, past presidents of ACA, and representatives of each military service. The Delegate Assembly can establish policy, define Association positions on broad social and professional issues, and determine major programs and legislative priorities. They meet at least twice annually, at the Winter Conference and Congress of Correction.

Committees

The majority of the Association's activities take place through committees. Each committee chair reports to the Association's Board of Governors at least twice a year. In this way, the Association collectively benefits from the involvement and contribution of the hundreds of individuals who function on the various committees. Ad-hoc committees are appointed by the president of the Association.

The current committees and councils are:

Committee on Affirmative Action
Committee on Constitution and Bylaws

AMERICAN OVERSIGHT

Committee on International Relations
Committee on Congress Program Planning
Committee on Legal Issues
Committee on Correctional Awards
Committee on Membership
Committee on Military Affairs
Council of Professional Affiliates
Council of Dual-Membership Chapters and State and Geographical Affiliates
Nominating Committee
Council on Professional Education
Credentials Committee
Research Council
Eligibility Committee
Resolutions & Policy Development Comm
Committee on Ethics
Standards Committee
Legislative Affairs Committee

Affiliates and Chapters

Affiliates and state chapters are major features of the Association's structure. They represent professional, regional, and state groups across the United States and Canada. Affiliates and chapters contribute to the professional development of all members by providing consultation in their respective areas of interest and by participating in seminars and workshops at ACA's annual conferences.

The following affiliates and chapters are currently associated with ACA:

Alabama Council on Crime and Delinquency
Alston Wilkes Society
American Assn for Correctional Psychology
American Correctional Chaplains Association
American Correctional Food Service Association
American Correctional Health Services Assn
American Institute of Architects
American Jail Association
American Probation and Parole Association

AMERICAN OVERSIGHT

Major Activities of the American Correctional Association

Legislation

The American Correctional Association is involved with all major issues affecting corrections today. Members and ACA staff maintain close working relationships with committees of the U.S. Congress and all federal agencies and groups whose decisions affect correctional policy. Expert testimony on a wide range of correctional issues is prepared for congressional committee and subcommittee hearings, and recommendations are provided to federal administrative agencies.

To ensure that the concerns and issues of the corrections profession are represented in proposed legislation and public policy, ACA's legislative liaison is addressing legislative and government concerns that will impact the corrections profession. ACA has established partnerships between chapters and affiliates and other national policy making organizations to present a strong collective voice for correctional reform throughout the world.

Professional Development

The purpose of the Association's Professional Development Department is to plan, promote, and coordinate professional development through training seminars, workshops, and published materials including curriculums, resource guides, and monographs.

ACA's training plan calls for a variety of professional development activities. Nationally advertised workshops cover topics such as training for trainers, management training, community-based employment programs, and stress management. On-site workshops for state and local departments of corrections are offered in curriculum development, supervision, communications, and report-writing skills.

The *Training for Correctional Staff Trainers* workshops further the skills of correctional professionals qualified to initiate and deliver training. These workshops also enable agencies to comply with national standards for accreditation and ensure that training is job-related and professionally developed and presented.

The department also offers correspondence courses to further professional development. More than 6,000 correctional personnel have completed or are in the process of completing ACA's self-instruction training program for correctional officers. This program, developed under the auspices of the National Institute of Corrections, provides 40 hours of basic training in accordance with ACA standards. A score of at least 80 percent on the comprehensive examination must be attained to achieve certification.

The Association has similar courses available for correctional supervisors, juvenile caseworkers, and food service employees. Additional courses which cover report writing skills, correctional management skills, legal issues for probation and parole officers, and legal issues for correctional officers are also available.

AMERICAN OVERSIGHT

Publications

As one of the leading publishers of practical correctional publications, ACA produces books, videos, and lesson plans. Among the wide ranging subjects available are management, community, security, counseling, law, history, and health. These excellent resources for career advancement appeal to practitioners and scholars alike. Directories for every major sector of corrections are also published by ACA.

The following is just a few of the many publications that ACA offers:

Corrections Today is the major corrections magazine in the United States. Published seven times a year, it focuses on the interests of the professional correctional employee and administrator. Articles include reports of original research, experiences from the field, discussion of public policy, and the perspectives of prominent practitioners and academicians.

On the Line is published five times a year and contains national and local news of interest to the criminal justice professional.

Corrections Compendium Newsletter publishes cutting-edge information about the corrections environment. Survey information is compiled from 52 U.S. and 14 Canadian correctional systems.

The Juvenile and Adult Directory has been published since 1939. A revised edition of the directory is released each January. This publication is the only up-to-date, comprehensive directory of all U.S. and Canadian juvenile and adult correctional departments, institutions, agencies, and paroling authorities.

The National Jail and Adult Detention Directory was first published in 1978. It is a source of information concerning jails. The directory, published every two years, attempts to list all jails in the United States that house offenders or detainees for more than 48 hours.

The Probation and Parole Directory, updated every two years, provides over 500 pages of information regarding federal, state, and county adult and juvenile probation, parole and aftercare systems in the United States. It includes statistics on caseloads, expenditures, and personnel.

The State of Corrections, formerly *The Proceedings*, includes the events of both the Congress of Correction and the Winter Conference. Published since 1870, it includes selected speeches and panel presentations concerning the latest thoughts and practices in the criminal justice field.

Correctional standards are the most significant improvement in correctional programming. As the basis for accreditation, they give administrators a nationally recognized system for upgrading and improving their correctional services. The Association currently publishes over 20 manuals for every correctional discipline.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001077

To aid in the development of policy with relation to accreditation, *Guidelines for the Development of Policies and Procedures* are available for adult correctional institutions, adult parole authorities/adult probation and parole field services, adult local detention facilities, adult community residential services, juvenile detention facilities, and juvenile training schools.

Conventions

ACA hosts two national conventions each year that attract more than 5,000 professionals from all aspects of corrections; the Winter Conference held in January, and the Congress of Correction, held in August. These events include a variety of workshops, exhibits, and seminars devoted to addressing topics specific to the corrections profession.

Contracts and Grants

The American Correctional Association has a history of successful grant and contract management and administration. ACA has completed contracts and grants of more than $30 million. These diverse initiatives, which are funded through federal and private sources, add to the technical expertise and knowledge of the organization as well as to the total field of corrections.

Standards and Accreditation

Perhaps ACA's greatest influence has been the development of national standards and the accreditation process. ACA standards address services, programs, and operations essential to effective correctional management. Through accreditation, an agency is able to maintain a balance between protecting the public and providing an environment that safeguards the life, health, and safety of staff and offenders. Standards set by ACA reflect practical up-to-date policies and procedures and function as a management tool for over 1,200 correctional agencies in the United States.

AMERICAN OVERSIGHT

Overview of the Commission on Accreditation for Corrections

The Commission on Accreditation for Corrections (CAC) is a private, nonprofit organization established in 1974 with the dual purpose of developing comprehensive, national standards for corrections and implementing a voluntary program of accreditation to measure compliance with those standards.

The Commission was originally developed as part of the American Correctional Association. In 1979, by joint agreement, the Commission separated from the Association in order to independently administer the accreditation program. Between 1978 and 1986, the organizations shared the responsibility for developing and approving standards and electing members of the Commission. On November 7, 1986, the Commission on Accreditation for Corrections officially realigned itself with the American Correctional Association.

The Commission meets at least twice each year. The responsibility of rendering accreditation decisions rests solely with this board. The members of the Commission represent the full range of adult and juvenile corrections and the criminal justice system. They are elected from the following categories:

National Association of Juvenile Correctional Agencies (1 representative)
Council of Juvenile Correctional Administrators (1 representative)
Association of State Correctional Administrators (2 representatives)
National Sheriffs' Association (2 representatives)
American Jail Association (1 representative)
North American Association of Wardens and Superintendents (1 representative)
International Community Corrections Association (1 representative)
American Probation and Parole Association (1 representative)
Association of Paroling Authorities International (1 representative)
National Juvenile Detention Association (1 representative)
American Bar Association (1 representative)
American Institute of Architects (1 representative)
National Association of Counties (1 representative)
Correctional Health (Physician) (1 representative)
Juvenile Probation/Aftercare (1 representative)
Adult Probation/Parole (1 representative)
At-Large (17 representatives)
Citizen At-Large (Not in Corrections) (1 representative)

Association Staff

Accreditation activities are supported by the staff of the American Correctional Association, Standards and Accreditation Department, under the leadership of the director of the department. Standards and Accreditation Department staff is responsible for the daily operation of the accreditation program. Agencies in the process have contact primarily with the accreditation specialist responsible for their state or agency.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001079

Auditors

Over 600 corrections professionals in the United States have been selected, trained, and employed on a contract basis by the Association. These individuals perform the field work for the Association which includes providing assistance to agencies working toward accreditation, conducting on-site audits of agencies to assess compliance with standards and confirming that requirements are met, and monitoring to ensure maintenance of the conditions required for accreditation. Teams of auditors, referred to visiting committees or audit teams, are formed to conduct standards compliance audits of agencies seeking accreditation and reaccreditation.

Auditors are recruited nationally through announcements in prominent criminal justice publications and at major correctional meetings. Affirmative action and equal employment opportunity requirements and guidelines are followed in the recruitment of auditors. All auditors employed by the Association have a minimum of three years of responsible management experience, have received a recommendation from an agency administrator, and have demonstrated knowledge in the substantive area(s) in which they are employed to assist the Association. In addition, all auditors must successfully complete the Association's auditor training and be members of the ACA in good standing.

Standards Development

Development of the ACA standards began in 1974 with an extensive program of drafting, field testing, revising, and approving standards for application to all areas of corrections. Since then, over 1,200 correctional facilities and programs have adopted the standards for implementation through accreditation, and many others have applied the standards informally themselves.

In the development of standards, the goal was to prescribe the best possible practices that could be achieved in the United States today, while being both realistic and practical. Steps were taken to ensure that the standards would be representative of past standards development efforts, reflect the best judgment of corrections professionals regarding good corrections practice, recognize current case law, and be clear, relevant, and comprehensive. The standards development and approval process has involved participation by a wide range of concerned individuals and organizations. Twenty-three manuals of standards are now used in the accreditation process:

Standards for the Administration of Correctional Agencies
Standards for Adult Parole Authorities
Standards for Adult Probation and Parole Field Services
Standards for Adult Correctional Institutions
Standards for Adult Local Detention Facilities
Standards for Small Jail Facilities
Standards for Electronic Monitoring Programs
Standards for Adult Community Residential Services
Standards for Adult Correctional Boot Camps
Standards for Correctional Industries
Standards for Core Jails

AMERICAN OVERSIGHT

Standards for Correctional Training Academies
Standards for Juvenile Community Residential Facilities
Standards for Correctional Facilities
Standards for Juvenile Detention Facilities
Standards for Juvenile Day Treatment Programs
Standards for Juvenile Correctional Boot Camps
Standards for Therapeutic Communities
Standards for Small Juvenile Detention Facilities
Standards for Performance-Based Health Care in Adult Correctional Institutions
Certification Standards for Health Care Programs
Standards for Adult Correctional Institutions (in Spanish)

The standards establish clear goals and objectives critical to the provision of constitutional and humane correctional programs and services. The standards include the requirement for practices to promote sound administration and fiscal controls, an adequate physical plant, adherence to legal criteria and provision of basic services. Basic services called for by the standards include the establishment of a functional physical plant, training of staff, adoption of sanitation and safety minimums, and provision of a safe and secure living environment. In offering specific guidelines for facility and program operations, the manuals of standards address due process and discipline, including access to the courts, mail and visitation, searches, and conditions of confinement of special management offenders.

The standards are systematically revised to keep pace with the evolution of different correctional practices, case law, and after careful examination of experiences, applying them over a period of time and circumstances. The ACA Standards Committee, which includes membership from the Commission on Accreditation for Corrections, is responsible for standards development and revision.

The ACA publishes biannual supplement to the standards with updated information and clarifications until new editions of standards manuals are published. Each supplement addresses standards interpretations, deletions, revisions, and additions for all manuals of standards issued by the Standards and Accreditation Department.

Suggestions and proposals for revisions to the standards from the field and interested others are encouraged. The Standards and Accreditation Department has developed a standards proposal form specifically for this purpose. The standards proposal form can be obtained from the Standards Supplement, the ACA website, or Standards and Accreditation Department staff (Appendix A). Proposals should be submitted via the ACA website.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001081

Accreditation Process Descriptions

For over 120 years, the American Correctional Association has been the only national body involved in the development of standards for the correctional field. ACA standards are supported by ACA's Standards and Accreditation Department and the Commission on Accreditation for Corrections, which is the evaluating and certifying body for accreditation. The department is responsible for the administration of accreditation and ongoing development of correctional standards.

The accreditation process is a voluntary program for all types of correctional agencies. For these agencies, accreditation offers the opportunity to evaluate their operations against national standards, to remedy deficiencies, and to upgrade the quality of programs and services. The recognized benefits of such a process include: improved management; a defense against lawsuits through documentation; demonstration of a "good faith" effort to improve conditions of confinement; increased accountability and enhanced public credibility for administrative and line staff; a safer and more humane environment for personnel and offenders; and the establishment of measurable criteria for upgrading programs, staffing, and physical plant on a continuous basis.

A major component of the accreditation process is the standards compliance audit conducted by a visiting committee. The purpose of the audit is to measure operations against the standards, based on documentation provided by the agency.

The Visiting Committee Report

The results of the standards compliance audit are contained in the visiting committee report, a document prepared by the visiting committee chairperson. The report is distributed to the agency administrator and members of the visiting committee. This report is also submitted to the Commission on Accreditation for Corrections for consideration at the accreditation hearing.

The following information is usually contained in the visiting committee report:

Agency and Audit Narrative

The agency narrative includes a description of program services, a description of physical plant, number of offenders served on the days of the audit, a summary significant incidents and consent decrees, class action lawsuits and/or judgments against the agency/facility, if applicable. The audit narrative, prepared by the visiting committee chairperson, describes audit activities and findings. The narrative examines issues or concerns that may affect the quality of life and services in an agency or facility. Quality of life issues include areas such as staff training, adequacy of medical service, sanitation, use of segregation and detention, reported and/or documented incidences of violence and crowding in institutions, offender activity levels, programming and provision of basic services. The audit narrative also contains comments as a result of staff and offender interviews, and a detailed explanation of all noncompliant and not applicable standards.

AMERICAN OVERSIGHT

Agency Response

The agency has three options for standards found in noncompliance: a plan of action; an appeal; or a waiver request.

A **plan of action** is a detailed statement of tasks to be performed in order to achieve compliance with a standard found in noncompliance at the time of the audit. The plan of action designates staff responsibilities and timetables for completion.

An **appeal** is the agency's attempt to change the visiting committee's decision on a standard. The result of a successful appeal is a change in the status of the standard and a recalculation of the compliance tally.

A **waiver** may be requested when noncompliance with a standard does not adversely affect the life, health, or safety of staff and offenders and when quality of life conditions compensate for the lack of implementation of a plan of action. The granting of a waiver by the Commission waives the requirement for submitting a plan of action; however, it does not change the noncompliant finding.

A **discretionary compliance request** is when there are circumstances in which agencies choose not to comply with a particular standard for a variety of reasons. These reasons include:

- An unwillingness to request funds from a parent agency or funding source.
- A preference to satisfy the standard/expected practice's intent in an alternative fashion.
- An objection from a parent agency, higher level government official or funding source to the nature of the standard/expected practice.
- A clear policy in place at a higher level that is contrary to the requirements of the standard/expected practice.
- An existing provision in a collective bargaining agreement that makes compliance impossible (without bargaining with the employees' union to effect such a change).

Auditor's Response

This section contains the visiting committee's final reply to all responses received from the agency and includes comments regarding the acceptability of plans of action, appeals, and waivers.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001083

Accreditation Hearings

The Commission on Accreditation for Corrections is solely responsible for rendering accreditation decisions and considers an agency's application at its next regular meeting following completion of the visiting committee report. The Commission is divided into panels that are empowered to reach and render accreditation decisions. These panels hear the individual application for accreditation and include a quorum of at least three Commissioners which includes the panel hearing chairperson. Agencies are notified in writing of the date, time, and location of the hearings by Standards and Accreditation Department Staff.

The panel hearing is the last step in the process. With the panel chairperson presiding, panel members discuss issues and raise questions relative to all aspects of agency operations and participation in the process. The information presented during the hearing and in the visiting committee report is considered by the panel members in rendering accreditation decisions.

The agency is invited to have a representative at the hearing and, in most cases, one or more individuals attend. When special conditions warrant, the visiting committee chairperson or a member of the visiting committee also may be asked to attend the hearings. When this occurs, the auditor provides information to help clarify controversial issues and responds to questions and concerns posed by panel members.

Attendance by any other parties (i.e. media representatives, public officials, or personnel from agencies other than the applicant) occurs only with the permission of the applicant agency. In these cases, the applicant agency representatives and panel members discuss procedures to be followed before commencement of the hearing.

Conduct of Hearings

The panel schedule provides ample time for review of each individual agency pursuing accreditation. Hearings are conducted by the panel chairperson in accordance with established procedures. Panel proceedings require that a formal vote be taken on all final actions, i.e., agency appeals, waiver requests, and the final accreditation decision of the Commission. All panel proceedings are tape-recorded to assist in preparing minutes of the hearings. Panel activities generally occur as follows:

- Applicant agency representatives are requested by Standards and Accreditation Department staff to be on-call to allow for scheduling flexibility.
- A designated waiting area is usually provided for this purpose.
- When the panel is ready to review the agency, the Standards and Accreditation Department staff representative notifies agency representative(s).
- The hearing opens with an introduction by the panel chairperson.
- The agency representative is asked to give a brief description of the

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001084

program.

- If a visiting committee member is present at the hearing, the panel chairperson may request that the auditor present an account of the visit, focusing on matters particularly pertinent to the decision or specific panel actions. In some cases, however, the panel may wish to call on the visiting committee member only to request additional information at different points during the hearing.

- The panel chairperson leads a standard by standard review of non-compliance issues. The agency representative presents information relative to their request for waivers, plans of action, appeals, and discretionary compliance requests. The agency may also present additional materials, including photographs or documentation, for review by the panel.

- Following the agency presentation, the chairperson has the option of calling the panel into executive session to consider the information provided, determine findings, and make an accreditation decision. Whether or not panel deliberations occur in the presence of agency personnel or in executive session varies from panel to panel, considering the preference of panel members and the sensitivity of issues to be discussed regarding the application.

In final deliberations, the Commission panel:

- Ensures compliance with all mandatory standards and at least 90 percent of all other standards.

- Responds with a formal vote to all appeals submitted by the applicant agency.

- Responds with a formal vote to all request for waivers, discretionary compliance, and plans of action submitted by the applicant agency.

At this time, the panel also:

- Assures that an acceptable plan of action will be submitted for every non-compliant standard, including those standards for which appeals of non-compliance and waiver requests have been denied by the panel. In judging the acceptability of plans of action, the panel ensures that all of the information requested on the form is provided. Furthermore, the feasibility of plans to achieve compliance is considered, including specific tasks, time frames, and resource availability (staff and funding) for implementing proposed remedies.

- Addresses to its satisfaction any concerns it has with visiting committee comments about the quality of life in the facility or program, patterns of non-compliance, or any other conditions reviewed by the panel relating to

AMERICAN OVERSIGHT

the life, health, and safety of residents and staff.

For each application, a roll call vote to award accreditation, extend an agency in Candidate or Correspondent Status, or deny accreditation is conducted. The options for final action available to the panel are outlined in the next chapter.

If the panel has deliberated in executive session, agency representatives are invited back into the meeting and informed of the panel's final decision and actions or recommendations on all other issues raised by the applicant. If accreditation has not been granted, the chairperson discusses with agency personnel specific reasons for the decision and the conditions of extension in Candidate or Correspondent Status and procedures for appeal.

Accreditation Decisions

Three decisions relative to the accreditation of an agency are available to panels:

- *Three-year accreditation award* based on sufficient compliance with standards, acceptance of adequate plans of action for all non-compliant standards and satisfaction of any other life, health, and safety conditions established by the panel. The balance of the contract must be paid in full in order to receive a certificate of accreditation.

- *Extension of the applicant agency in Candidate Status* (initial accreditation only) for reasons of insufficient standards compliance, inadequate plans of action, or failure to meet other requirements as determined by the panel. The Commission may stipulate additional requirements for accreditation if, in its opinion, conditions exist in the facility or program that adversely affect the life, health, or safety of the offenders or staff. Extension of an applicant in Candidate Status is for period of time specified by the panel and for identified deficiencies if in the panel's judgment, the agency is actively pursuing compliance.

- *Probationary Status* is determined when the panel specifies that compliance levels are marginal, there is a significant decrease in compliance from the previous audit (in the case of reaccreditation), or there are quality of life issues that would indicate continued monitoring. While an award of accreditation is granted, a monitoring visit must be completed and the report presented at the next meeting of the Commission. The cost for a monitoring visit is borne by the agency at a rate of cost plus 25%. The agency does not have to appear before the Commission for the review of the monitoring visit report. If they choose to do so, all related travel expenses are borne by the agency. Specific expectations for removal from probation are outlined.

- *Denial of accreditation* removes the agency from Accredited Status (in the case of reaccreditation) and withdraws the agency from the accreditation program. Situations such as insufficient standards compliance, inadequate plans of action, failure to meet other requirements as determined by the panel or quality of life issues may lead to the denial of accreditation, it is

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001086

withdrawn from the process and is not eligible to re-apply (as an applicant) for accreditation status for a minimum of six months from the date of that panel hearing. The Commission will explain the process for appeal.

The agency receives written notification of all decisions relative to accreditation after the hearing.

Appeal Process

The accreditation process includes an appeal procedure to ensure the equity, fairness, and reliability of its decisions, particularly those that constitute either denial or withdrawal of Accredited Status. Therefore, an agency may submit an appeal of any denial or withdrawal of accreditation.

The basis for reconsideration is based on grounds that the decision(s) were:

- Arbitrary, capricious, or otherwise in substantial disregard of the criteria and/or procedures promulgated by the Commission.
- Based on incorrect facts or an incorrect interpretation of facts.
- Unsupported by substantial evidence.
- Based on information that is no longer accurate.

The reasonableness of the standards, criteria, and/or procedures for the process may not serve as the basis for reconsideration. The procedures for reconsideration are as follows:

- The agency submits written request for reconsideration to the Director of Standards within 30 days of the adverse decision stating the basis for the request.
- The Executive Committee of the Commission, composed of the officers of the Commission, reviews the request and decides whether or not the agency's request presents sufficient evidence to warrant a reconsideration hearing before the Commission. The agency is notified in writing of the Executive Committee's decision.
- If the decision is made to conduct a hearing, the hearing is scheduled for the next full Commission meeting and the agency is notified of the date.
- The agency, at its option and expense, has the right of representation, including counsel.
- Following the hearing held before the Commission, the decision, reflecting a majority opinion, is made known to the agency immediately.
- Pending completion of the reconsideration process, the agency maintains its

AMERICAN OVERSIGHT

prior status. Until a final decision has been reached, all public statements concerning the agency's accredited status are withheld.

- Following completion of the reconsideration process, any change in the status of an agency is reflected in the next regularly published list of accredited agencies.

AMERICAN OVERSIGHT

Accredited Status

The accreditation period is three years, during which time the agency must maintain the level of standards compliance achieved during the audit and work towards compliance of those standards found in non-compliance. Regular contact with Standards and Accreditation Department staff should also be maintained.

Annual Report

During the three year accreditation period, the agency submits an annual report to the Standards and Accreditation Department. This statement is due on the anniversary of the accreditation (panel hearing) date and contains the following information:

Current standards compliance levels – This includes any changes in standards compliance since accreditation, listing on a standard-by-standard basis any standard with which the agency has fallen out of compliance or achieved compliance.

Update of plans of action – A progress report is included with respect to plans of action submitted to the hearing panel, indicating completion of plans resulting in compliance with standards and revised plans reflecting the need for additional time, funds, and/or resources to achieve compliance.

Significant Events- A report is made of events and occurrences at the agency during the preceding year that impact on standards compliance, agency operation, or the quality of services provided by the agency. This might include:

- A change in the agency administration and/or major staffing changes mission change or program revisions.
- Mission change or program revisions.
- Changes in the offender population, including number of offenders or general offender profile.
- Physical plant renovations, additions, or closing.
- Any major disturbances, such as extended periods or lock-down, employee work stoppages, etc.
- Any significant incident to include allegations of physical/sexual abuse.
- A death from other than natural causes.

Standards and Accreditation Department staff review the annual report received from the agency and respond to clarity issues or request additional information if necessary.

In addition to submission of the annual report, the agency is responsible for notifying Standards and Accreditation Department staff of any major incident, event, or circumstances

AMERICAN OVERSIGHT

that might affect standards compliance. This notice must be provided to the Standards and Accreditation Department immediately following the event. For example, an agency must notify the Standards and Accreditation Department if it is the subject of a court order, has a major disturbance, escape, physical/sexual abuse (to include allegations), employee work stoppage, death from unnatural causes, or experiences a major fire or other disaster. It it the responsibility of the accredited agency to inform Standards and Accreditation Department staff or provide them with copies of news articles, special reports, or results of investigations that address conditions that affect standards compliance.

Finally, the Standards and Accreditation Department may request that the agency respond to public criticism, notoriety, or patterns of complaint about agency activity that suggests failure to maintain standards compliance. The Standards and Accreditation Department may conduct an on-site monitoring visit to the agency to verify continued compliance.

Monitoring Visits

Monitoring visits to agencies in Accredited Status are conducted by an ACA auditor(s) in order to assess continuing compliance with the standards. A monitoring visit may be conducted at anytime during the accreditation period, with advance notice to the agency. The determination of need for a monitoring visit is based on:

- Compliance levels, findings, and recommendations by the Commission on Accreditation for Corrections during the hearing.
- Incidents or events reported by the agency in its annual report.
- Problems indicated by adverse media reports or correspondence received by Standards and Accreditation Department staff, disturbances at the agency, or special investigations.

The length of the visit varies depending on the number of standards or special issues that must be addressed during the visit. The visits are conducted similar to standards compliance audits, but on a reduced scale. Monitoring visits are charged to the agency at a rate of cost plus twenty-five percent.

Activities, as a general rule, involve a review of all mandatory standards, all standards found in non-compliance at the time of accreditation, and any other concerns identified by the Commission. The visit also involves a tour of the agency and interviews with staff and offenders to ensure maintenance of the requirements of accreditation. It concludes with an exit interview during which the auditor informs the agency staff of the findings of the visit.

Following the visit, the auditor prepares a monitoring visit report that addresses findings of the visit. The report includes a list of standards reviewed, explanation of non-compliance findings, results of the tour and interviews with agency staff and offenders, and discussion of any issues believed to be relevant to the agency's accreditation. The report, as with others prepared by auditors, is reviewed and sent to the agency by Standards and Accreditation staff.

AMERICAN OVERSIGHT

When a monitoring visit to the agency reveals deficiencies in maintaining compliance levels that existed at the time of accreditation, or less than 100 percent compliance with mandatory standards, the agency prepares a response providing explanation of the problems indicated in the report. When the agency has failed to maintain compliance with all mandatory standards, the monitoring visit report and the agency response are submitted to the Commission on Accreditation for Corrections for review during a regular hearing. Agency representatives are advised of the date, time, and location of the review, and are invited to attend. At the discretion of the Commission, the agency may be placed in probationary status and a revisit conducted to determine if deficiencies have been corrected.

Revocation of Accreditation

If the Commission panel believes that an agency's failure to maintain continuous compliance with certain standards is detrimental to life, health, and safety of residents and staff, the Commission may place an agency on probation. Probationary status last for a specific period of time designated by the Commission at its next regularly schedule meeting. The Commission again reviews the program and considers removing the probationary status or revoking accreditation. When the agency corrects the deficiencies within the probationary status period and the corrections have been verified and accepted, the agency resumes its status as an accredited agency. An agency that does not satisfactorily correct the deficiencies may be withdrawn from accreditation.

Another condition that may result in a rehearing and consideration of revocation is following a significant event in an agency (i.e. major disturbance, death from other than natural causes or allegations of physical/sexual abuse of offenders). Failure to notify the Standards and Accreditation Department in a timely manner may result in suspension of the agency's accreditation. Once ACA is notified of the major event, the Director of Standards and Accreditation may consult with the Executive Committee of the Commission, who may request a monitoring visit. If a visit is warranted, ACA will notify the agency and a date will be established with the concurrence of the facility. The monitoring visit will take place within14 days of this notification. The monitoring visit report will be sent to the Director of Standards within 7 days of the monitoring visit and then forwarded to the Executive Committee of the Commission. Following review of the report, a determination will be made by the Executive Committee as to whether revocation of accreditation is warranted. Prior to any rehearing, agency representatives will be notified, so that any issues may be addressed and responded to in writing.

Accreditation is revoked for the following reasons:

- Failure on the part of the agency to adhere to the provisions on the contract.
- Failure on the part of the agency to maintain continuous compliance with the standards at levels sufficient for accreditation.
- Intentional misrepresentation of facts, lack of good faith, or lack of deliberate speed or a concerted effort to progress in the accreditation process, including the implementation of plans of action.

AMERICAN OVERSIGHT

- Failure to notify ACA of significant incidents in the annual report to the Commission.

- Adverse conditions of confinement that affect the life health, and/or safety of staff and offenders.

- Failure to comply with the conditions of probation or suspension.

Standards and Accreditation Department staff notify the agency in writing of the specific reasons identified by the Commission for the revocation hearing. Agencies may appeal the decision of the Executive Committee to the full board of the Commission on Accreditation for Corrections. Appeals must be submitted within 30 days. The agency may apply to re-enter the process 180 days after the revocation of accreditation.

Expiration of Accredited Status

Accreditation is granted for a three year period. Unless the agency has applied for reaccreditation and completed activities in the process required for reaccreditation, the Commission withdraws the agency from Accreditation Status after this three year period.

For agencies in Accredited Status that are seeking subsequent accreditation, administrative extensions of Accredited Status may be granted under certain conditions. For example, relocation of the facility, staff turnover, and major renovations often warrant an extension. In these cases, a written request to the Director of Standards and Accreditation is required, outlining the reasons for extending the accreditation period. Agencies that fail to successfully complete an audit within the three year period, or do not receive an extension prior to their expiration date, are withdrawn from Accredited Status.

AMERICAN OVERSIGHT

Visiting Committee Report and Hearing Minutes

CONFIDENTIALITY

The American Correctional Association and the Commission on Accreditation for Corrections do not disclose to external parties specific information contained in this Accreditation Report or information discussed in the Accreditation Hearing. The Association encourages all participating agencies to provide information to the media about their accreditation activities, including disclosure of the Self-Evaluation and Accreditation Report.

AMERICAN OVERSIGHT

A. Introduction

The audit of the Port Isabel Service Processing Center (IHSC), Los Fresnos, Texas was conducted on June 5-6, 2017 utilizing the American Correctional Association (ACA) Standards for Performance Based, Health Care for Adult Correctional Institution, 1st Edition and the 2014 Standards Supplement. The following team conducted the audit:

(b)(6); (b)(7)(C)

B. Facility Demographics

Rated Capacity: 960 (Males - 840 and Females - 120)
Actual Population: 879 (Males - 806 and Females - 73)
Average Daily Population for the last 12 months: 1049
Average Length of Stay: 8 days

(b)(7)(E)

Age Range of Detainees: 18-74
Gender: Male/Female

(b)(7)(E)

C. Facility Description

The Port Isabel Service Processing Center (IHSC), also known as Port Isabel Detention Center (PIDC), Los Fresnos, Texas is located in the southernmost part of the state of Texas along Rural Route 510 in the eastern portion of Cameron County, approximately 20 miles north of Brownsville, Texas and 30 miles east of Harlingen, Texas. The U.S./Mexico border is approximately 22 miles south of PIDC. The Cameron County Airport to the north, the Laguna Atascosa National Wildlife Refuge to the east, agricultural fields and shrimp farms to the south, and agricultural fields to the west surrounds PIDC. PIDC is the largest ICE detention center in the US.

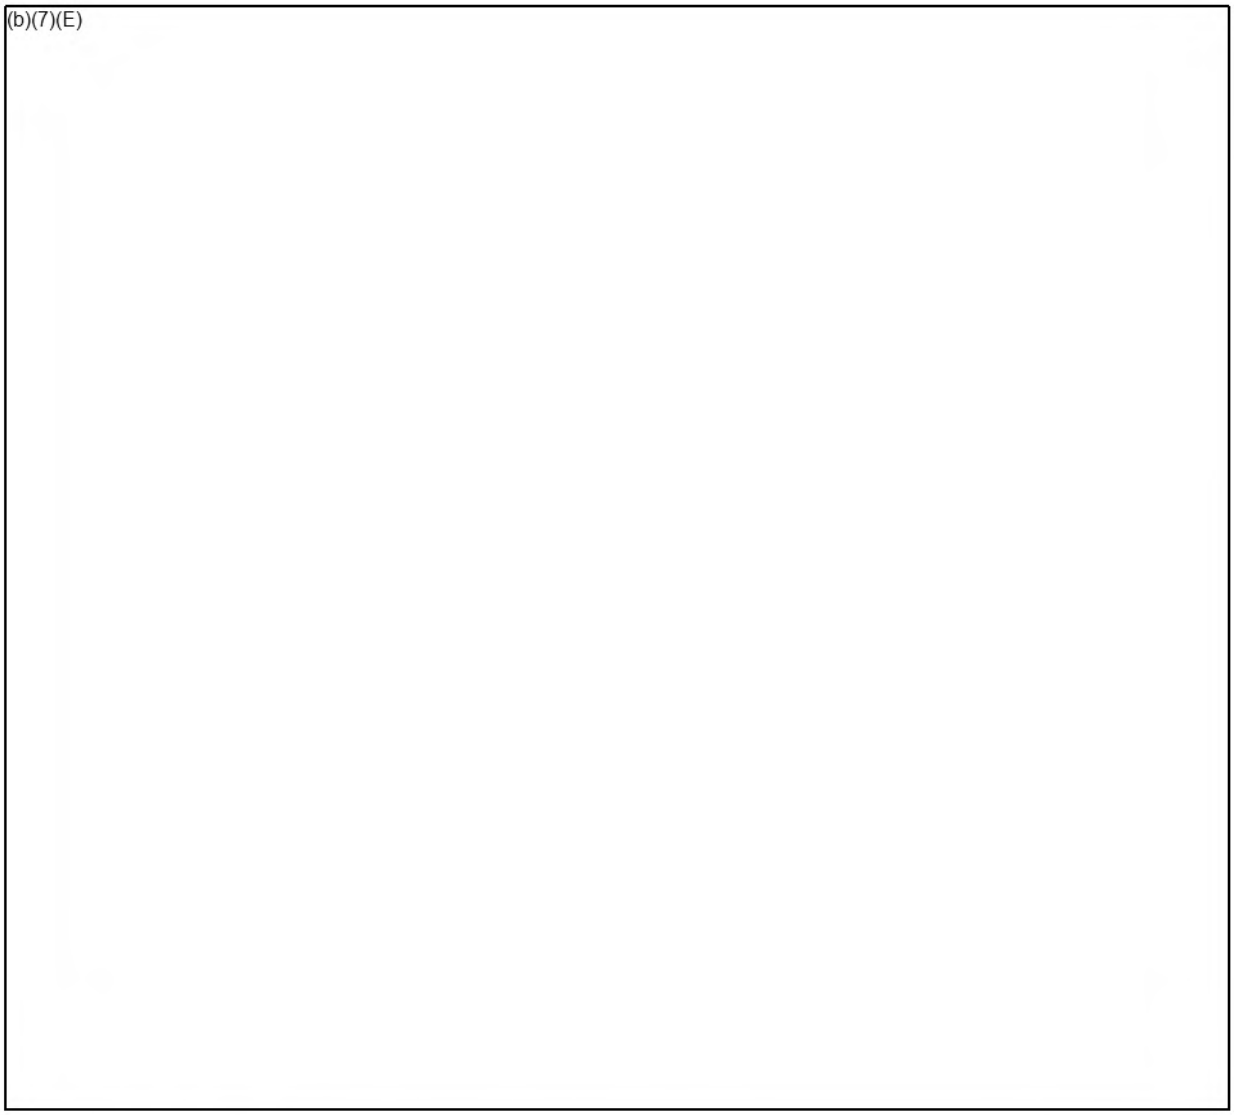
PIDC is a 350-acre facility; 262 acres of developed land and 88 acres of undeveloped native grounds that serve as a habitat for local wildlife, to include the endangered Ocelot species.

PIDC has a new administration building (administration, deportation, five executive offices for Immigration Review (EOIR) courtrooms, training area, muster room, computer lab, and Intel office), male processing area, and a health care facility with 36 short-stay beds, eight negative pressure rooms, and six mental health rooms).

AMERICAN OVERSIGHT

The Rio Grande Valley (RGV) Staging area (part of the RGV Operations) is the hub for the organization and distribution of the newly detained immigration violators. In 2007, a new 750,000 gallon water tower was completed and new water lines were installed. There are four housing units; A (Alpha Unit), B (Bravo Unit), C (Charlie Unit), and D (Delta Unit).

Formerly, the site was a military installation used by the Army Corps in the 1940s as a gunnery training facility. Then, the Navy and Air Force used the facility, which included an auxiliary airfield for defense and training activities in the 1050s and early 1960s prior to its closure. With realignment and closure of the military facilities in 1962, portions of the property were turned over to the former U.S. Immigration and Naturalization Service (INS) between 1961 and 1963. Other portions of the property, to include the hanger and airfield, were turned over to Cameron County Commissioners for the Port Isabel Airport in 1963.



From 1962 to 1963, INS performed major renovations to several buildings on the facility and established a Border Patrol Training Facility and Detention Center. In 1977, the Training Academy expanded and was relocated to the Federal Law Enforcement Training Center in Glynco, Georgia, but the detention center remained. The center is a self-supported facility that continues to house individuals detained for alleged violations of the immigration laws of the United States. These individuals comprising of males and females are detained to ensure they appear before an administrative immigration judge with EOIR. PIDC does not provide housing for individuals awaiting formal criminal charges with outside law enforcement agencies, but it does have a high security level for detainees with a previous history that are classified as close custody. All detainees at the center are solely for administrative charges. In 2006, the facility experienced and expansion with a new administration and medical building which also encompasses processing and visitation.

The demographics of the PIDC detainees currently reflected a population consisting of approximately 97% non-criminal and 3% criminal detainees (FY 2016). The facility has 14-bed Special management Unit (SMU) to assist with disciplinary and administrative cases. The previous medical department building was converted into a "Detainee Services" building consisting of a commissary, barber shop, multipurpose/chapel area, law library and leisure library. An expanse of unutilized land was converted into a large outdoor recreation areas complete with almost full size soccer field as well as a second smaller soccer field.

ICE Health Services Corps Mission Statement -"IHSC is committed to providing health care services to reduce global disease and support the safe apprehension, enforcement and removal of detained individuals involved in immigration proceedings".

AMERICAN OVERSIGHT

(b)(7)(E)

D. Pre-Audit Meeting

On Sunday, June 04, 2017 the members of the audit team were transported from the Harlingen Airport, Harlingen, Texas to the (b)(7)(E) Deportation Officer (b)(6); (b)(7)(C) with one of the Team Members arriving early at 10:15 a.m. and the Chairperson arriving later at 09:15 p.m. due to flight delay. Transportation includes simultaneous ACI team members. The distance from the airport to the hotel was approximately 1.9 miles.

The audit team met at the hotel on that evening to discuss the information provided by the Association staff and the officials from the Port Isabel Service Processing Center (IHSC). The chairperson divided the standards into the following groups:

Standards #HC 1A-01 to 3A-11 to (b)(6); (b)(7)(C)
Standards #HC 3A-12 to 7C-01 to

AMERICAN OVERSIGHT

The audit team member attended an "ice-breaker" dinner at the Texas Roadhouse restaurant approximately from 05:30 p.m. to 07:50 p.m. that evening with Lieutenant (b)(6); (b)(7)(C) Assistant Health Services Administrator-Public Health Services (PHS), (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) General conversation followed as the team member and the IHSC staff became acquainted, and general audit goals and procedures for the audit were discussed. The audit chairperson was not present at the dinner due to a flight delay.

E. The Audit Process

1. Transportation

On Monday, June 05, 2017, the audit team was picked up from the hotel by (b)(6); (b)(7)(C) the Deportation Officer at 07:34 a.m. and arriving PIDC at 8:16 a.m. The team followed the PIDC's security procedures and was escorted to the main executive conference room by (b)(6); (b)(7)(C) the Assistant Field Office Director (b)(6); (b)(7)(C) the Assistant Health Services Administrator and (b)(6); (b)(7)(C) the Nurse Manager for a brief meeting from 08:18 a.m. to 08:25 a.m.

2. Entrance Interview

At 8:26 a.m. the audit team proceeded with the formal entrance meeting at the same conference room with IHSC and the PIDC executive team for a joint (IHSC/ACI) entrance audit meeting. The audit schedule and procedures were discussed, and the IHSC staffs were asked about any problem areas of which the team should be aware. The IHSC executive staffs were advised that the audit team would meet with them each evening prior to their departure from the facility to discuss the progress of the audit up to that point, and any problems that were encountered, and the audit team will attempt to review all the mandatory standards on the first day. Escorts were requested to accompany the auditors on the tour and subsequent visits to departments, and to note the number of detainees and the names and titles of employees with whom the auditors spoke. The IHSC staffs were asked if any detainee or employee had requested to speak with the auditors. No requests had been made. The audit Chairman expressed the team's appreciation and the appreciation of the ACA for the opportunity to be involved with the IHSC audit in its initial accreditation process, and emphasized the goals of the accreditation, which are to improve the efficiency and effectiveness of correctional systems throughout the United States. The audit team was aware that the facility staff, especially the IHSC staff had worked long and hard in preparation for this event, and accordingly the team would endeavor to provide a fair, equitable and thorough audit as possible while holding them accountable to high standards. The team members would visit as many departments and areas as possible relating to the audit and meet and speak with as many staff and detainees as possible in the time available, while at the same time strive to be as non-intrusive as possible.

AMERICAN OVERSIGHT

It was requested that when audit team members paused to speak with detainees, that staffs step away so that the conversation may remain private and the team would like to observe the practice in any medical emergency. The audit team reemphasized that the purpose of the audit is to be helpful and to assist the facility in achieving its initial accreditation. Again the audit process and schedule were discussed. The entrance meeting lasted until 08:45 a.m. The following persons were in attendance:

PIDC/IHSC Staff

(b)(6); (b)(7)(C)	Quality Control Safety Compliance Officer Supervisor Detention and Deportation Officer Assistant Field Officer Director Assistant Health Services Administrator Compliance Officer Nurse Manager Chief of Security Project Manager Assistant Project Manager Food Service Manager Supervisory Detention and Deportation Office Deportation Officer Contracting Officer Representative Fleet Supervisor Detention Standards Compliance Officer Quality Control Officer Building Manager Compliance Officer (ICE) Compliance Officer (ICE) ACA-ACI Audit Chairperson ACA-ACI Audit Team Member

3. Facility Tour

The team toured the medical area and other areas relating to the IHSC audit from 08:50 a.m. to 10:51 a.m. ACA audit notices were posted throughout the facility. Staff and detainees were aware that an audit was taking place. The following persons accompanied the team on the tour and responded to the team's questions concerning facility operations:

(b)(6); (b)(7)(C)	Quality Control Safety Compliance Officer Supervisor Detention and Deportation Officer Assistant Field Officer Director Assistant Health Services Administrator Compliance Officer Nurse Manager

AMERICAN OVERSIGHT

(b)(6); (b)(7)(C)	Chief of Security Project Manager Assistant Project Manager Food Service Manager Supervisory Detention and Deportation Office Deportation Officer Contracting Officer Representative Fleet Supervisor Detention Standards Compliance Officer Quality Control Officer Building Manager Compliance Officer (ICE) Compliance Officer (ICE)

The following areas of the institution were visited and the following personnel and detainees were encountered during the course of the tour:

Staging	(b)(6); (b)(7)(C)

AMERICAN OVERSIGHT

4. Conditions of Confinement/Quality of Life

During the tour, the team evaluated the conditions of confinement at the facility. The following narrative description of the relevant programmatic services and functional areas summarizes the findings regarding the quality of life.

Food Service:

Foodservices are contracted through the Ahtna Support and Training Services, LLC, (AhtnaSTS), a Support Services and Management company. All meals provided are approved by a certified dietician and are nutritionally balanced, and are properly prepared. Meals are served in clean and safe surroundings. There is no pork products served in this facility. Medical diets are provided by the Food Service Department upon receipt of written instructions from the facility Clinical Director. Meals are served in the day room of each housing units. Detainees in the Special Management Unit (SMU), Infirmary, etc. are served in their cells. The facility utilizes a five week menu cycle, and based on two hot/one cold meals per day and 3,000 calories per day (98 grams of protein, 30% fat and 4,310 mg of Sodium). There were recommended efforts to reduce Sodium level. Meals samples are kept for 72 hours. At the time of the audit, there were 74 medical diets. These diet orders contain both start and stop dates. These may be ordered anywhere from one day to length of stay. Diabetics on insulin have midnight snacks. Medical evaluations and screenings are done on detainee workers which monitored cuts/sores, burns, runny nose; nail condition and cold/flu symptoms. Detainees are not allowed to handle food preparation. Refrigerators, freezers and the dry storage area were clean, orderly and clutter-free, and temperatures were in the appropriate ranges. The dishwasher was in proper working order, and documentation reflected temperatures in the appropriate range.

Medical Care:

Medical services at the Port Isabel Detention Center (PIDC) are contracted through the INGENESIS. They also utilize Public Health Service (PHS) and Government Service (GS) staffing. They provide medical, mental health and dental services. PIDC medical receives detainees throughout the U.S and some with the history of high-risk behaviors, compounded by lack of medical care and /or mental health treatment, and are more likely to have chronic illnesses and infectious diseases. The facility has a responsible physician (MD) and a Health Services Administrator (HSA). The working relationship between medical, mental health, program, dental and security are very remarkable. Medical staffs are well trained and caring professionals. Between June 2016 - July 2017, IHSC-PIDC provided intakes - 27,997, sick call - 11,358, procedures simple-4,825, vital signs-1,014, physical examination (simple) - 6,012, mental health appointments - 6,460 and prescriptions - 31,810.

AMERICAN OVERSIGHT

Other accreditation for the PIDC includes National Commission on Correctional Health Care (NCCHC) and Performance Based National Detention Standards 2011 (ICE). All detainees receive initial screening up arrival, and physical exam within 14 days of arrival.

(b)(7)(E)

(b)(7)(E) The audit team observed shift changes on first and second day of the audit and found the process structured. The PIDC medical has twelve examination rooms (including the medical trailer) plus one urgent care room (two exam tables). The waiting rooms have access to water, bathrooms, education materials and health pamphlets. Telemedicine is not available at the PIDC. New fulltime employees receive in-service trainings and OJT trainings.

PIDC medical has the followings:

- 3 AED's (secured and inspected)
- 2 EKG's (secured and inspected, and read on site)
- 1 Fixed wall stand digital x-ray machine
- 2 Emergency bags (secured, inspected and sealed)
- 2 Emergency stretchers with straps (secured and inspected)
- 2 Transport Gurneys (secured and inspected)
- 5 Secure administration medication rooms
- 2 Medication rooms
- 2 Pill windows
- 4 Refrigerators (Flu, TB Solutions, etc.)
- 3 Refrigerators (Specimen)
- 7 Portable oxygen cylinders (secured and inspected by Matheson Gas)
- 8 Negative pressure room (camera, toilet and sink, and inspected)
- 8 -21bed infirmary room (shower chair, shower grab bars, camera, toilet, sink and handicap accessible)
- 1 Suicide observation room (padded, camera, toilet and sink)
- 5 Single bed Isolation rooms (cameras and intercom systems)

AMERICAN OVERSIGHT

- 2 Medical emergency yard-vehicles

PIDC has a Disability Placement Program (DPP) that provides for housing accessible lockers, bunk beds with grabs bars, accessible TTY phones, volume control phones, accessible dayroom tables and accessible path of travel.

There are ample supplies of walking sticks, crutches and wheel chairs in the facility. Physical Therapy is provided through the VBMC Round Outpatient Rehabilitation, Harlingen, TX.

PIDC uses the following hospitals for inpatient hospitalization:

1. Valley Baptist Medical Center, Harlingen, TX (local ER, Surgery, Dialysis)
2. Harlingen Medical Center, Harlingen, TX (Radiology)
3. Valley Baptist Medical Center, Brownsville, TX
4. Valley Regional Medical Center, Brownsville, TX

PIDC has an agreement with the Los Fresnos Fire Department and EMS, and Port Isabel EMS (30-45 minutes) in case of medical emergencies. Non-emergent medical transportation is done by facility staff to either a hospital facility or community provider for offsite consultations. The nurses have Basic Life Support (BLS) certified through the American Heart Association (AHA). Medical maintain basic TTA protocol medicine such as Epinephrine, Narcan, Glucagon and etc. The Master SDS is maintained in medical. Officers are trained on first aid, CPR and AED, and are considered first responders. Upon admittance to the PIDC, detainees receive a detainee handbook to aid in adjustment to detention setting. This documentation contains information regarding medical services, sick call process, grievance procedures and hygiene rules. Other methods are used to inform detainees about MRSA, AIDS, Hepatitis, and the spread of HIV, blood borne pathogens and safety. PIDC has two dedicated medical emergency yard-response vehicles. There is a provision for helicopter landing, and service provided by the Valley Air Care, Harlingen, TX

Sick call is provided seven days/week in General Population (GP) and Special Management Unit (SMU) from 07:00 a.m. – 10:00 a.m. daily for females and all day for the males. Detainees sign up for .sick calls at each housing unit between the hours of 05:00 a.m. and 06: 00 a.m. the SMU has seven cells (14 beds). Detainees housed in SMU access all medical services via face to face encounters with an RN during daily rounds. Detainees housed in GP access all medical services via call out logs. The average monthly sick calls are 728. The audit team observed sick call process in GP and SMU on the second day of the audit and found the process well organized. Medical requests are triaged within five days, and any patient with symptoms is seen within one day. There is no medical copay.

AMERICAN OVERSIGHT

No detainee is denied health care service. PIDC uses detainee electronic medical records. Medical grievance is through the grievance box, collected by a grievance coordinator, and reviewed by the HSA within seven days.
PIDC averages five substantiated medical grievances per year mostly on medication preference, medication refills and time line to see a provider.

Services such as Physical Therapy, General Surgery, Cardiology, Dermatology, Endocrinology, Endodontist, Gastroenterology, Hematology, Infectious Disease, Internal Medicine, Nephrology, Neurology, Orthopedic, OBGYN, Ophthalmology, Oncology, ENT, Podiatry, Pain Management, Urology, Pulmonary, Neuro Surgery, Plastic Surgery, Oral Surgery, Rheumatology, Optometry, Asthma and Allergy, Sleep Study are provided through off-site contracted specialists. The turnaround time to see an offsite contracted specialist is emergent-immediate, urgent one-day and routine 14-days. There were no pregnant detainees or detainees on dialysis at the time of the audit. The number of chronic care detainees excluding mental health at the time of the audit was113.

PIDC has a plan for the management of communicable diseases including education on prevention, diagnosis, treatment and isolation. PIDC has an infectious disease coordinator. PIDC has eight single bed negative pressure rooms and eight rooms (21 beds) infirmary rooms. The Infirmary rooms are ADA compliant. The negative pressure rooms were serviced by the Air Management Solutions, Powder Springs, GA on 01/01/2017 with air exchanges per hours (ACH) averaging 12 per room. Some of the negative pressure and infirmary rooms were occupied at the time of the audit. MRSA precautions are in place. Universal precautions are practiced throughout the facility. There are available first aid and blood borne pathogen kits. There are eye wash stations present in appropriate areas. Hand sanitizers (non-alcohol) dispensers were located throughout medical and other areas. Sanitation and housekeeping is provided using detainee help. The total monthly TB tests are 18. An annual TB testing is conducted on all detainees after 12 months. PIDC does not offer TB sticks only chest x-rays.

Medications are stored in medication rooms and secured behind double locks. A nurse administers medications two times a day and seven days a week in GP and SMU by direct observed therapy (DOT) from 07:30 a.m. – 08:00 a.m. and 07:30 p.m. – 08:00 p.m. Prior to giving medications, detainee's identification is confirmed and mouth cavities checked after administration. The audit team observed medication administrations in the GP and SMU, including diabetic line on the second day of the audit and found the process organized and timely. All no shows or refusal to medications are documented and /or referred. The HSA checks the MARS record for missed doses. Keep on person medications are issued on 1:1 exchange. . – 06:00 a.m. and 03:15 p.m. – 03:30 p.m. At the time of the audit there were eight diabetics (five insulin and three non-insulin dependents). Insulin diabetic detainees receive mid-night snacks. The detainees are trained to self-administer selected medications.

AMERICAN OVERSIGHT

Medical diets are coordinated with the food service. The audit team examined the manual during the audit and found it current. The manual is updated regularly by medical. There were 74 medical diets at the time of the audit. The average monthly detainees on prescription medications were 474, and controlled medications were 19. Some medications are crushed per doctor's order. Detainees are provided 30-day medications upon release, and ten days for diabetics. Specific Over-The-Counter (OTC) medications are offered at the Commissary, and reviewed and approved by the Clinical Director.

PIDC has a licensed pharmacy, and supported by the following fulltime staffs: one Pharmacist (GS), and two Pharmacy Technicians (Contract). PIDC maintain stock order medications. Medications are ordered through Diamond and McKesson Pharmacy with next day delivery of 5:00 p.m. order for Diamond and 7:00 p.m. order for McKesson. The backup pharmacy is the local CVS Pharmacy. Detainees are allowed keep-on-person (KOP) medications. The pharmacy is audited by the Pharmacist monthly and the HSA quarterly. A random inventory count on sharps and controlled medications was accurate. The pharmacy has a refrigerator and a freezer for the storage of insulin, vaccines and ice packs. The audit team found the temperature log and inventory current. Facility has ample supplies for universal precautions. Basic medical supplies and materials are obtained through McKesson. The disposal of expired, unused, discontinued, recalled, over stocked medications including prescription, (pills and liquids) and narcotics are arranged through the Diamond Pharmacy and Guarantee Returns. At the time of the audit there were some medications awaiting disposal. Records are maintained on disposal process.

PIDC medical has a draw only lab. Specimens are collected on site. Blood is spun and sent out for analysis to the LabCorp five–days/week and reports received through fax/phone within 24-48 hours. STAT labs are also sent to the Valley Baptist Medical Center, Harlingen, TX and results received through fax/phone within 2-4 hours. Average monthly detainee lab tests are 345. Stericycle is contracted to pick up the biohazard and sharps wastes. The audit team checked the specimen refrigerator temperature log and found the records current. Chronic care patients receive annual screening test. Laboratory results are also incorporated into the EMR. Digital radiology is used in the facility with hard copy over-reads scanned into the electronic health record (EMR). PIDC has a fixed wall stand digital x-ray machine. The X-ray department is supported by three fulltime contracted Radiology Technicians. Radiology services (MRI, Ultrasound, etc.) are provided through Mobile Imaging of Rio, Grande Valley, TX, and STAT radiology provided at the Valley Baptist Medical Center, Harlingen, TX with results received in two hours by phone/fax.

PIDC performs detoxification from alcohol, opiates hypnotics, other stimulants and sedative hypnotic drugs. Substance abuse treatment is provided, as are a large number of behavioral health groups and classes. All detainees enrolled and participating in these groups had individual treatment plans in place.

AMERICAN OVERSIGHT

There are regularly scheduled Multi-Disciplinary Team meetings, including medication management when appropriate and necessary.

One F/T Dentist (PHS) and one F/T Dental Assistant (Contract) support PIDC dental. Dental services are provided from 07:00 a.m. - 03:30 p.m. (Monday-Friday). Dental services include basic dentistry, prophylaxis, fillings, partials, extractions, cleaning, oral cancer screenings and patient education. The detainees access dental health services through the sick call process. The audit team reviewed the licenses, registrations, records and random inventory of sharps and instruments and found them accurate. The dental area was clean. Dental instruments and sharps not used at the year of expiration are re-autoclaved and repackaged. Dental sterilization test is through MaxiTest and Crosstex Biological Monitoring Services. The Dentist has a standing order; dental emergency outside the expertise of the nurse is referred to one of the contracted hospitals. The Dentist is notified. Dental at PIDC is equipped with two digital dental bitewing x-ray machines, three dental chairs and one Panorex digital x-ray machine. The dental wait time is less than seven days. Urgent requests are seen within 24 hrs. The average monthly dental appointment is 51. Dental amalgam disposal is through CapSecure. Dosimeter reading is through PRS Dosimetry. Dental chair traps are cleaned weekly. Dental supplies and equipment service, including dental compressor service are obtained through the Henry Schein. Broken tools are documented and disposed by facility maintenance.

PIDC mental health is supported by one F/T Psychiatrist (Contract), one F/T Licensed Clinical Social Worker (PHS) and two F/T Licensed Clinical Social Workers (Contract). They provide services 24/7. Daily rounds are conducted. Detainees access mental health services via the sick call process. Staffs can refer services. There are approximately 383 detainees seen monthly. All suicide ideations are referred to Mental Health and monitored, and observed 1:1. Mental Health utilizes the six single-bed isolation rooms, including a padded cell. There are available suicide smocks and blankets. Tele-psychiatry is practiced at PIDC. PIDC maintains zero tolerance for sexual abuse and harassment. Detainees are provided information on enhanced victim services and rape crisis hotline. Detainees are provided mental health appraisals 14 days of arrival and are evaluated every 30/60/90 days depending on needs. Program services include crisis intervention, individual and group counseling and medication management. PIDC has no therapeutic community program. Severely developmentally and disabled detainees receive a mental health evaluation where appropriate and are referred for placement at the following inpatient hospitals:

1. Columbia Regional Care Center, Columbia, South Carolina
2. Nix Behavioral Center, San Antonio, Texas
3. South Texas Behavioral Center, Edinburg, Texas

AMERICAN OVERSIGHT

There were approximately 109 detainees on psychotropic medication at the time of the audit. PIDC conducts peer review evaluations. PIDC has six suicide observation rooms. In addition, four of the negative pressure rooms are dedicated to mental health. There are available suicide garments.

Laundry:

The audit team observed adequate supply of bed linens, pillows and blankets. Laundry process is done using mess bags. Bed linens, pillow cases and blankets are exchanged weekly and clothing are exchanged two times per week. Medical has adequate supplies of linens and clothing to support infirmary and medical housing. Medical wastes are contained and washed separately using biohazard dissolving bags.

F. Examination of Records

Following the facility tour, the team proceeded to the medical conference room to review the accreditation files and evaluate compliance levels of the policies and procedures. The facility has no notices of non-compliance with local, state, or federal laws or regulations.

1. Litigation

The facility had no consent decrees, class action lawsuits or adverse judgments in the past year.

2. Significant Incidents/Health Care Outcome Measures

Significant Incident Summary:

The following significant incidents occurred during the period May 2016 through April 2017.

A report of significant incidents which occurred during the accreditation period is presented below:

Escapes:	0
Disturbances:	0
Sexual Violence:	0
Homicide:	0
Assault, Detainee-on-Detainee:	12
Assault, Detainee-on-Staff:	5
Suicide:	0
Non-Compliance with a Mandatory Standard:	0
Fire:	1
Natural Disaster:	0
Unnatural Death:	0

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001107

Other: 0

The number of detainee-on-detainee assaults was 12, Detainee-on-Staff assault was five and the number of fires was 1for an average detainee daily population of 1049 for the audit period.
While some of the numbers are significant and will impact health care services, however, it was determined that the number and types of incidents reflected for the past 12 months as described above were within the appropriate range that would be expected for an institution of this size, custody level and mission.

Health Care Outcome Measures:

The audit team reviewed the health care outcome measures with the health care administrative team. During the audit period there were no deaths. There was no evidence of open medical lawsuits. There was discussion regarding the following sections on the healthcare outcomes during the audit period:

1. Section 1A (3)-Number of detainees who are new converters on a TB test that indicates newly acquired TB infection during the audit period was 73, and the number of detainees administered tests for TB infection during the audit period as part of periodic or clinically-based testing, but not intake screening was 124. PIDC provided statement that the facility is an immigration processing center and houses diverse detainee population, and some have not seen a doctor before.
2. Section 1A (13)-Number of selected hypertensive offenders at a given point in time with a B/P reading >140 mmHg/>90mmHg was 21, and the total number of detainees with hypertension who were reviewed were 25. The PIDC provided statement that there were recommended efforts to reduce sodium level in diet and improve detainee physical wellness education. The PIDC is an immigration processing center. Some of the symptoms are pre-existing.
3. Section 1A (14)-Number of selected diabetic detainees at a given point in time who are under treatment for at least six months with a hemoglobin AIC level measuring greater than 9 percent was 23, and the total number of diabetic detainees who were reviewed was 30. PIDC provided statement that the facility is an immigration processing center and houses diverse detainee population, and some have not seen a doctor before.
4. Section 1A (15)-The number of completed dental treatment plans within the past twelve (12) months was 18, and with average daily population during the reporting period of 1057. PIDC provided statement that the average length of stay of detainees is 8 days.
5. Section 4A (6)-Number of serious medication errors in the past twelve (12) months was 8. PIDC provided statement that there were no serious medical intervention or employee discipline. Additional training was provided to employees.

AMERICAN OVERSIGHT

The values stated for the measures reflected a very busy facility with high transfer detainees from diverse population and age, with a wide variety of health concerns. The medical auditor concurs with the responses.

3. Departmental Visits

The team revisited the following departments to review conditions relating to departmental policy and operations:

Department Visited	Person(s) Contacted
Intake Staging	(b)(6); (b)(7)(C)
Medical Trailer	
Medical	
Medical Infirmary	
Food Service	
Special Management Unit	
Property	

4. Shifts

a. Day and Evening Shifts

The team was present at the facility during the day and evening shifts from 08:16 a.m. to 05:40 p.m. on the first day of the audit. The team observed evening shift briefing at 03:00 p.m. comprising of medical, mental health, dental and security. The briefing was mutual and participatory. The team briefly introduced themselves and discussed the purpose of the audit and matters pertaining to the audit.

AMERICAN OVERSIGHT

The team observed diabetic line while the rest of the medical staff was busy taking care of the detainees and are pleasant and professional.

b. Night Shift

The team was present at the facility during the night shift at 07:00 a.m. on the second of the audit. The audit team observed the shift change and morning briefing. As usual, the briefing comprises of medical, mental health, dental and security. Shift briefings are a normal occurrence. The shift supervisors passed on information to the oncoming shift. A familiar and easy rapport was evident among the staff, and information was freely exchanged.

5. Status of Previously Non-compliant Standards/Plans of Action

There were no standards previously found non-compliant. This is an initial accreditation audit.

The team reviewed the status of standards previously found non-compliant, for which a waiver was not granted, and found the following:

There were no standards previously found non-compliant or granted a waiver as this is an initial accreditation audit.

G. Interviews

During the course of the audit, team members met with both staff and detainees to verify observations and/or to clarify questions concerning facility operations.

1. Detainee Interviews

The audit team interviewed and spoke to approximately 87 detainees, including the oldest and youngest of the males and females who stated that they generally felt secure at the facility and were treated fairly by staff. Their basic needs were being met and they felt that they were making positive progress towards eventual and successful release. They also felt that their basic medical needs were being met. They have ready access to sick call process and all were aware of the grievance process. Detainee morale appeared to be good and they were cooperative, respectful and were aware of the audit, and participated in the preparation for the audit. Notices of the ACA Accreditation process were observed to have been posted at different locations readily available to the detainees, and there were no detainees requested to speak privately with the audit team.

AMERICAN OVERSIGHT

2. Staff Interviews

The audit team interviewed and spoke to approximately 45 employees, including 21 medical staffs, and observed them in the performance of their duties.

The audit team observed structured medical shift change briefings. Staffs were polite, cooperative, and conducted themselves in a professional manner. There was a normal working relationship between medical, dental, mental health, programs and security, and communication flowed freely. Gender and ethnic diversity was good and morale also appeared to be good. Staff indicated that their training were excellent and are applicable to their positions and job needs.

H. Exit Discussion

The exit interview was held at 11:16 a.m. in the medical conference room with the Health Services Administrator, one ICE Deportation Officer, one Compliance Office and four Health Care staffs.

The chairperson explained the procedures that would follow the audit. The team discussed the compliance levels of the mandatory and non-mandatory standards and reviewed their individual findings with the group.

The chairperson expressed appreciation for the cooperation of everyone concerned and congratulated the facility team for the progress made and encouraged them to continue to strive to maintain their high level of professionalism in the correctional field.

Significant Incident Summary

This report is required for all **residential** accreditation programs.

This summary is required to be provided to the Chair of your visiting team upon their arrival for an accreditation audit and included in the facility's Annual Report. The information contained on this form will also be summarized in the narrative portion of the visiting committee report and will be incorporated into the final report. Please type the data. If you have questions on how to complete the form, please contact your Accreditation Specialist.

This report is for Adult Correctional Institutions, Adult Local Detention Facilities, Core Jail Facilities, Boot Camps, Therapeutic Communities, Juvenile Correctional Facilities, Juvenile Detention Facilities, Adult Community Residential Services, and Small Juvenile Detention Facilities.

COMMISSION ON ACCREDITATION FOR CORRECTIONS

STANDARDS COMPLIANCE REACCREDITATION AUDIT

CoreCivic
Houston Processing Center (CoreCivic)
Houston, Texas

June 10 - 12, 2019

VISITING COMMITTEE MEMBERS

(b)(6); (b)(7)(C) Chairperson
ACA Auditor

(b)(6); (b)(7)(C)
ACA Auditor

(b)(6); (b)(7)(C)
ACA Auditor

AMERICAN OVERSIGHT

A. Introduction

The audit of the Houston Processing Center (HPC) in Houston, Texas was conducted on June 10-12, 2019, by the following team: (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) Member.

B. Facility Demographics

Rated Capacity: 1000
Actual Population: 902
Average Daily Population for the last 12 months: 855
Average Length of Stay: 59 days
Security/Custody Level: Medium
Age Range of Offenders: 18-70
Gender: M/F
(b)(7)(E)

C. Facility Description

Mission Statement

We help government better the public good through:

CoreCivic Safety – We operate safe, secure facilities that provide high quality services and effective reentry programs that enhance public safety.

CoreCivic Community – We deliver proven and innovative practices in settings that help people obtain employment, successfully reintegrate into society and keep communities safe.

CoreCivic Properties – We offer innovative and flexible real estate solutions that provide value to government and the people they serve.

Houston Processing Center Floor Plan

AMERICAN OVERSIGHT

(b)(7)(E)

AMERICAN OVERSIGHT

The Houston Processing Center began accepting detainees from the Department of Justice Immigration & Naturalization Services (now Department of Homeland Security Immigration & Customs Enforcement/DHS-ICE) in 1984 and housed them at the Olympic Hotel until a detention facility could be constructed.

The facility's first design and construction of the 506 - bed medium security facility was designed and built in six months. The Houston Processing Center began an expansion project in March 2004 that was completed in July 2005 adding approximately 400 beds to the existing facility for a total of 905 beds. In April 2009, 95 additional beds were added bringing the facility bed capacity to 1,000. The facility currently houses criminal and undocumented adult male and female aliens for Immigration and Customs Enforcement (ICE), formerly known as INS.

The Houston Processing Center (HPC) is owned and operated by Core Civic.

The Houston Processing Center is located in the Northeast section of the City of Houston, Texas. Public transportation is available near the facility and numerous freeways and access roads are nearby. The facility enjoys immediate access to the Bush Intercontinental Airport, area hospitals, city, county and state law enforcement agencies, business and industry and all related city services (i.e., transportation, utilities and emergency services).

The majority of detainees being housed at the Houston Processing Center are criminal aliens who are prison-released and have ICE holds (or detainers) and are required to go through administrative immigration hearings before a Federal immigration judge to determine if removal or deportation is in order. In over 90% of the cases, removal or deportation does take place. The average length of stay per detainee is approximately 35 days.

The Houston Processing Center employs 321 full-time staff.

The facility is a one-story, single building facility encompassing 182,786 square feet. The detainee housing area consists of 26 dormitories that house from 20 to 60 detainees; a four cell female segregation unit; a 32 cell male segregation unit and a 16 bed medical short stay unit that includes negative air pressure cells. All dormitories have large dayroom area with tables, chairs, microwaves, televisions, Play Station video game systems and a variety of board games. The entire facility has temperature control capabilities, for both heating and cooling.

D. Pre-Audit Meeting

The team met on June 10, 2019 in Houston, to discuss the information provided by the Association staff and the officials from Houston Processing Center.

AMERICAN OVERSIGHT

The chairperson divided standards into the following groups:

Standards #1-A-01 to #4-B-09 (b)(6); (b)(7)(C) Member
Standards #4-C-01 to #4-D-28 (b)(6); (b)(7)(C) Medical Member
Standards #5-A-01 to #7 -7-07 (b)(6); (b)(7)(C) Chairperson

E. The Audit Process

1. Transportation

The team was escorted to and from the facility by (b)(6); (b)(7)(C) Quality Assurance Manager.

2. Entrance Interview

The audit team proceeded to the office of Warden Robert Lacey Jr. at 7:45 a.m. The team expressed the appreciation of the Association for the opportunity to be involved with HPC in the accreditation process.

The audit team proceeded to the large training room by Warden Lacey. The team spoke to the staff who gathered for this opening briefing and explained the ACA process. We told them that we look forward to meeting them in their work area and having them explain what part they play in the ACA process.

The following persons were in attendance:

ACA Audit Entrance Meeting
June 10, 2019

(b)(6); (b)(7)(C)	Food Service Administrator
	Classification Coordinator
	Maintenance Supervisor
	STG Coordinator
	PHS
	PHS
	Administrative Clerk
	Recreation Supervisor
	Shift Supervisor
	Detention Officer
	Chief of Unit Management

	Personnel Investigator
	Safety Manager
	Learning & Development Manager

AMERICAN OVERSIGHT

(b)(6); (b)(7)(C)	Warehouse Worker Investigator ICE / COR Facility Manager, Operations Finance Secretary Unit Manager Sr. Detention Officer Classification Officer

It was explained that the goal of the visiting team was to be as helpful and non - intrusive as possible during the conduct of the audit. The chairperson emphasized the goals of accreditation toward the efficiency and effectiveness of correctional systems throughout the United States. The audit schedule was also discussed at this time.

3. Facility Tour

The team toured the entire facility from 8:30 a.m. to 11:30 a.m. The following persons accompanied the team on the tour and responded to the team's questions concerning facility operations:

1.	(b)(6); (b)(7)(C)	Warden
2.		COUM (Acting Assistant Warden)
3.		Admin Shift Supervisor
4.		Quality Assurance Manager
5.		Quality Assurance Coordinator

Facility notices were posted throughout the facility.

4. Conditions of Confinement/Quality of Life

During the tour, the team evaluated the conditions of confinement at the facility. The following narrative description of the relevant programmatic services and functional areas summarizes the findings regarding the quality of life.

Security:

All persons, including administrative staff, entering or exiting the facility are required to enter through a metal detector and all items were searched during the entry process. All visitors entering the facility are logged in and out of the facility. Only approved items can be brought into the facility.

(b)(7)(E)

AMERICAN OVERSIGHT

(b)(7)(E)

AMERICAN OVERSIGHT

(b)(7)(E)

The warehouse was very clean and well taken care of. After checking all inventories this auditor found the chemical log off by one bottle. The warehouse supervisor found out what had happened and found the missing chemical. Someone from the kitchen had taken the item over the weekend and had forgotten to check out the chemical. A memo was put out explaining the proper procedure.

Environmental Conditions:

All housing areas had very good ventilation with no noticeable odors or collections of dust in the vent openings. There were appropriate numbers of showers that were easily accessible to the offenders.

The day room space provided enough space for offenders to program in both leisure and structured programs. The space is well maintained, clean, provides for both seating and table space, offers television. The day room space is monitored on the floor by roving officers. The space is quiet, and well managed.

The temperatures of the facility were within normal comfort ranges and lighting was adequate. Noise and lighting levels all met the standard requirements.

Sanitation:

The facility was clean and well maintained. Staff and even offenders took pride in keeping the sanitation high. This demonstrates the facility's commitment to providing for a high quality of life and conditions of confinement.

Each offender is provided clothing, undergarments, linen, personal hygiene and other materials required to maintain enough hygienic standards. Cleaning supplies are available for offenders as needed. Additional hygiene items are also available through the commissary.

Fire Safety:

The facility has a designated Fire and Safety Officer who inspects all fire and safety equipment and maintains an accurate inventory of all fire and safety equipment. A thorough inspection was completed of all fire and safety equipment. The facility fire systems were inspected as required by local and state governmental regulations and ACA standards. Fire extinguishers, SCBAs, first aid kits and AED were placed in locations affording staff timely access in emergency situations where such items would be needed.

Staff report any safety concerns and the facility addresses any issues immediately.

AMERICAN OVERSIGHT

While touring the facility, wet floor signs were used as required. All areas were clean and clear of any trip hazards or debris. There were no deficiencies regarding fire and safety identified during this audit.

Food Service:

The food service areas were clean and well organized for the number of detainees and meals served. The space provided and equipment used was appropriate for the size of the facility.

The food service tool and equipment inventory are conducted and verified during the Audit. In addition, the facility utilizes a shadow board inventory identification system which easily identifies any item which is currently being used. All utensils were engraved with a numerical identification number.

All staff and inmates were appropriately trained for working in the food service area. Staff had completed the Serve Safe Certification program in addition to all other training provided.

All coolers and freezers were well organized. Temperatures were within requirements and documented daily. Food service supplies are neatly organized and rotated appropriately.

Food temperatures were checked regularly and were properly documented. During the Audit, the team spot checked the food temperatures while the tray line was running. All temperatures were appropriate and consistent with the logged documentation.

Medical Care:

The Houston Processing Center provides medical services through Immigration and Health Corps (IHSC) and contractually with STGI. (b)(7)(E)

(b)(7)(E)

The clinic has the following areas to provide medical services: four exam rooms, two triage rooms, waiting/hold area, an urgent care room, and four negative air flow cells. These cells will have coverings if a male and a female detainee both need to be housed there.

Previously this operation had a medical unit which could house up to four patients in a room. This has changed; these rooms are now used for detainee overflow.

AMERICAN OVERSIGHT

Sick call services are available seven days a week. Detainees sign up daily per an announcement in the unit and are seen typically the next morning, but no later than 48 hours. There is no co-pay charge for the services. History and Physicals are conducted within 14 days as required. Chronic care clinics are established as needed (cardiology, hypertension, hyperlipidemia, pulmonology, infectious disease, Coumadin therapy, obstetrics/gynecology, etc.).

Upon intake, a medical screening, which includes a chest x-ray, is conducted. All females receive a pregnancy test prior to getting the chest x-ray. Staff report that x-ray results are typically returned within an hour; interpreted by a radiologist from the University of Maryland. Detainees are also screened for infectious diseases. Lionbridge interpreter service is available for communication barriers. There is also a backup service if needed (Interpret Talk). Education is provided regarding Tb, access to medical care, how to file a grievance, women's health, staying healthy, dealing with stress in addition to other general education. Pictures are used when relevant to help assist with communication with the material.

An electronic medical record is utilized which contains all required reports. Documents (such as the medication administration record) are scanned into the record. Detainees who leave are provided with a code to access their medical record upon release.

Medications are administered five times per day. This includes blood sugar testing and insulin shots. One medication line is designated for issuing keep on person (KOP) medications. Medications may be crushed upon orders of the provider. As noted, there is a full time Pharmacist and two pharmacy technicians who manage the medications and pharmacy operations. Medications are received from McKesson. They are received in storage bins with a secured seal. Upon receipt, the items are reconciled with the orders and the medications received. By having the Pharmacy on site, medications prescribed can be dispensed as quick as one hour. Narcotics controls were observed, and one item checked for accuracy. Records were in good order. Detainees can purchase commissary items in the store as well. They include hydrocortisone cream, hemorrhoid ointment, muscle rub, low dose aspirin, cough drops, eye drops, antifungal powder, anti-fungal cream, milk of magnesia, and gel insoles. Upon discharge, medication supplies are provided to the detainees, a seven to 30-day supply based on the nature of the need.

There is a room for obtaining blood samples which is drawn by the nurse. Sharps and tools were stored in this area. Counts and records were checked and found to be accurate. The facility uses LabCorp to conduct their test. Results are received electronically and signed off electronically by the physician.

As noted, there are radiology services on site. Digital x-rays are taken and performed by x-ray technicians. If an x-ray needed arises that cannot be taken at this operation, the detainee would be transferred off site.

AMERICAN OVERSIGHT

Specialty care is provided off site. It includes the following: cardiology, gastroenterology (including colonoscopy/endoscopy needs), general surgery, nephrology, neurology, obstetrics/gynecology, ophthalmology, oral surgery, orthopedic, otorhinolaryngology, physical therapy, podiatry, and infectious disease.

Medical diets are coordinated with the food service operation with the use of a contractual dietician. Medical diets include, a Diet for Health, renal diet, diabetic diets (with snacks) in addition to others as needed. The medical staff provides the appropriate clearance before detainees can work in the food service area.

Emergency services are provided using eight local hospitals are available to meet needs outside the medical clinic, for specialty care and emergencies. There is a psychiatric center used by this facility (when needed) and dialysis services. All staff is Basic Life Services (BLS) trained annually. First aid kits are available in the restrictive housing areas (maintained by the Safety office). Three AED's are located at this facility (two with the emergency medical bags, one in a third area). There is a contract with the local ambulance company to provide emergency transportation. There is a physician, mental health person and access to dental staff available 24/7.

Detainees who are going to be placed in the restrictive housing unit are screened by medical staff, in the medical clinic prior to placement. Nursing staff visit the operation daily for sick call as well as dispense medications as required.

Dental services are provided on site in a Dental Clinic. There is one full time dentist and one full time dental assistant. Panoramic digital x-rays are taken as determined medically. Dental medications are ordered through the electronic medical record which affords review by the pharmacy before dispensing. Sterilization and decontamination procedures are in place. Medical instrument as well as dental instrument sterilization is processed by the dental staff. Tools and needles are well controlled; an inventory was randomly checked and found to comply. Records reflected detailed records of maintaining tools and needles.

Mental health services are provided by (b)(7)(E) licensed mental health staff. (b)(7)(E)
(b)(7)(E)
shortly. In the interim, tele psychiatry is used. Mental health staff provides the following services: intake screening, PREA assessment, crisis intervention, individual therapy and supportive psychotherapy. This department visits the restrictive housing unit at least weekly, more often if needed. The suicide observation room is in restrictive housing. The appropriate suicide blankets and attire are available should the situation warrant its use.

Quality Assurance and performance improvement activities are ongoing. Staff meets quarterly with the Warden and provides appropriate statistical information in addition to a unique medical need that have presented.

AMERICAN OVERSIGHT

Equipment is regularly checked for accuracy and calibrating. Stickers documenting this were available on all medical equipment checked during the audit. Refrigerator temperatures are monitored daily. A system is in place to ensure the emergency bag is always in a "ready" state. Medical supplies were sufficiently stock and well organized to easily retrieve the item needed. Biohazard waste is collected by Stericycle regularly and more often if needed.

Recreation:

HPC provides, at least one hour of outdoor recreation daily, weather permitting, in spacious and well-equipped areas, one for males and one for females. In addition, both females and males have their own indoor facility, which again are available during inclement weather and likewise have a more than adequate amount of exercise equipment. Outdoor activities include basketball, soccer, handball, track/walking, and cardiovascular equipment. Indoor activities include table tennis, exercise bikes, elliptical machines and other such apparatus. The team observed all these areas being utilized during the tour except the female gym due to a new carpet being installed. Play Station is also available and donated craft items were seen being used to devise creative items. The male segregation unit had a caged area in the dayroom with games, a TV, portable phone, and a legal reference computer. In addition, just outside, there were four large outdoor exercise cages, which they are permitted to access for an unusual two hours day.

The facility makes use of recreation/exercise and leisure time activities to occupy the detainee's day since there is no other formal structured programming. At least two televisions are in each dayroom, one Spanish and one English with basic cable channels available. In addition, there is a TV specifically designated for movies which are shown on a regular basis. Even the segregation units have TV's. There are plentiful board games and cards accessible in the dayrooms during almost all but sleeping hours.

Recreation for detainees in segregation have one-hour recreation on disciplinary status seven days a week one hour. Detainees on Administrative Segregation receive two hours of recreation time seven days per week.

Religious Programming:

The program is supervised by a full-time chaplain who also volunteers representing all the major faiths requested by the detainee population.

Religious services include counseling, group prayer, bible study, and different religious organization church and worship services.

The chapel is neat and appropriate for the population. Religious materials are available upon request, inclusive of religious literature, and religious diets are provided as approved by the chaplain.

AMERICAN OVERSIGHT

Religious services and programs are provided seven days a week according to a published and posted schedule. The volunteers total approximately 145 including representatives of the Baptist, Islamic, Catholic and other Protestant faiths. Given the composition of most of the detainee population, almost 2/3 of the volunteers are Catholic. The chaplain also coordinates educational programs as well as Life Skills videos on anger management and domestic violence.

Offender Work Programs:

Detainees are not assigned internal work assignments unless they volunteer and meet the criteria, including a medical clearance and ability to understand the designated duties and requirements. Each detainee receives training and orientation before assignment. The jobs primarily include kitchen workers, laundry, commissary, barbers, and dormitory porters/sanitation workers. No detainee workers are employed outside the buildings and there are no community work projects using detainee labor.

Academic and Vocational Education:

The Unit does not offer traditional educational programs and no vocational programming at all, primarily due to the transient nature and legal status of the detainee population. However, a "Know Your Rights" / Legal Orientation Program, provided by volunteer legal representatives, is offered twice weekly for all detainees.

Social Services:

There is no formal substance abuse or other such services, the facility utilizes the Unit Management concept and has counselors readily available to address crisis situations as well as routine needs/request. Detainees are also provided with a PREA/Victim Advocate to address issues and concerns regarding sexual abuse and assault. ICE Health Services provides psychological and psychiatric services as determined. AIDS/HIV testing and educational services are available upon request. The Chaplain is available for pastoral counseling as needed.

Detainees Drug Awareness, thinking for a Change and Anger Management programming is available through the chaplain or case managers.

Visitation:

The visitation area is comprised of 15 non-contact stations with glass partitions and phone communication and one caged area for segregation visitation. No contact visits are allowed.

AMERICAN OVERSIGHT

Visiting hours are from 7:00 a.m. to 5:00 p.m. seven days a week according to a posted schedule. Detainees are permitted one visit per week for up to one hour from up to two adults and two minor children at a time. There are provisions for special and extended visits as determined by the Chief of Security. The team found the area to be spacious, clean and orderly.

Library Services:

HPC provides a general and legal library services for males and females in separate locations daily including weekends according to set schedules. Extended law library access is available upon request and with a pass. Detainees with verified court deadlines will be given priority. The male section is open from 7:00 a.m. to 5:15 p.m. and the female area is operational from 7:00 a.m. to 9:15 a.m. and then again from 6:00 p.m. to 10:30 p.m. Segregation and Short Stay Unit housing areas are afforded the opportunity to choose from a leisure reading cart and a portable computer station with electronic legal material is made available upon request. Three general reading books may be checked out for seven days whereas reference materials, legal materials and magazines may not be removed from the library. Computers are available in the Law Library for preparation of legal documents only. Printers are provided for legal documents as well. Though small, the respective libraries were well organized and equipped.

Laundry:

The facility operates two separate laundry centers. There is one laundry center located in the male housing area and one laundry center located in the female housing area. (b)(7)(E) Inmate workers are assigned on a voluntary basis to work in the laundry centers. Laundry Centers were very clean and well organized. Inmates are provided all necessary laundry items. All laundry was changed daily.

F. Examination of Records

Following the facility tour, the team proceeded to the Accreditation conference room to review the accreditation files and evaluate compliance levels of the policies and procedures. The facility has zero notices of non-compliance with local, state, or federal laws or regulations.

1. Litigation

Over the last three years, the facility had zero consent decrees, class action lawsuits or adverse judgments.

AMERICAN OVERSIGHT

2. Significant Incidents/Outcome Measures

These were reviewed for the previous 12 months. Overall, they reflect few areas of concern. Medical Outcomes reflects two active Tb cases, which is normal given the population. Emergency transports reportedly reflect such cases as appendicitis, chest pain, etc. the number of medical diets reflects the numbers prescribed; they appear high but not when considering the transient nature of the population.

3. Departmental Visits

Team members revisited the following departments to review conditions relating to departmental policy and operations:

Department revisited	Person(s) Contacted
Kitchen	(b)(6); (b)(7)(C)
Medical	
Warehouse	
Maintenance	

4. Shifts

a. Day Shift

The team was present at the facility during the day shift at 8:00 a.m. each day. Team members observed the lunch service, and visited all housing areas, speaking with staff in the units as well as the library and laundry services. On day one we toured the facility and met and spoke with all types of staff security and non-security.

b. Evening Shift - (b)(7)(E)

c. Night Shift

The team was present at the facility during the evening shift from 5:30 p.m. p.m. to 6:30 p.m. on the second day of the audit. The team watched the change of shift proceedings and interviewed and interacted with as many of the oncoming officers when possible, as well as several off going officers.

5. Status of Previously Non-compliant Standards/Plans of Action

The team reviewed the status of standards previously found non-compliant, for which a waiver was not granted, and found the following:

HPS was granted a waiver last audit for 1-A-15.

AMERICAN OVERSIGHT

G. Interviews

During the audit, team members met with both staff and offenders to verify observations and/or to clarify questions concerning facility operations.

1. Offender Interviews

The team spoke to about 30 inmates. All inmates felt safe at this unit. All but one had good comments about medical and food service. Some of the inmates spoke English but we had an interpreter if needed.

Ten female detainees were interviewed as well. Overall, they were complimentary of the operations. Areas they wanted improvement would be to have more soap available to them and food portions are small. Inmates on all the shift indicated they see the Warden and other executive staff regularly.

2. Staff Interviews

The team spoke to about 40 staff, both security and non-security. All spoke well of the warden and his management team. No staff had any bad comments. They all felt safe and we were impressed by the number of years of service that the staff seem to have at this facility. Staff indicated they see the Warden and other executive staff regularly; the supervisor is readily available to them when needed.

H. Exit Discussion

The exit interview was held at 11:00 a.m. in the training room with the warden and 61 staff in attendance.

The following persons were also in attendance:

(b)(6); (b)(7)(C) ICE
(b)(6); (b)(7)(C) ICE

The chairperson explained the procedures that would follow the audit. The team discussed the compliance levels of the mandatory and non-mandatory standards and reviewed their individual findings with the group.

The chairperson expressed appreciation for the cooperation of everyone concerned and congratulated the facility team for the progress made and encouraged them to continue to strive toward even further professionalism within the correctional field.

COMMISSION ON ACCREDITATION FOR CORRECTIONS

CoreCivic
Houston Processing Center (CoreCivic)
Houston, Texas

June 10 - 12, 2019

Visiting Committee Findings

Non-Mandatory Standards

Not Applicable

Standard #4-ALDF-1A-09

SINGLE CELLS IN GENERAL POPULATION PROVIDE AT LEAST 35 SQUARE FEET OF UNENCUMBERED SPACE. AT LEAST 70 SQUARE FEET TOTAL FLOOR SPACE IS PROVIDED WHEN THE OCCUPANT IS CONFINED FOR MORE THAN 10 HOURS PER DAY.

FINDINGS:

Facility has no single cells in unit.

Standard #4-ALDF-2A-36

INMATES PARTICIPATING IN WORK OR EDUCATIONAL RELEASE PROGRAMS ARE SEPARATED FROM INMATES IN THE GENERAL POPULATION.

FINDINGS:

Facility has not program/education.

Standard #4-ALDF-2A-37

CONFINEMENT OF JUVENILES UNDER THE AGE OF 18 IS PROHIBITED UNLESS A COURT FINDS THAT IT IS IN THE BEST INTEREST OF JUSTICE AND PUBLIC SAFETY THAT A JUVENILE AWAITING TRIAL OR OTHER LEGAL PROCESS BE TREATED AS AN ADULT FOR THE PURPOSES OF PROSECUTION, OR UNLESS CONVICTED AS AN ADULT AND REQUIRED BY STATUTE TO BE CONFINED IN AN ADULT FACILITY.

AMERICAN OVERSIGHT

FINDINGS:

No juveniles housed at the facility.

Standard #4-ALDF-2A-38

IF YOUTHFUL OFFENDERS ARE HOUSED IN THE FACILITY, THEY ARE HOUSED IN A SPECIALIZED UNIT FOR YOUTHFUL OFFENDERS EXCEPT WHEN:

- VIOLENT, PREDATORY YOUTHFUL OFFENDER POSES AN UNDUE RISK OF HARM TO OTHERS WITHIN THE SPECIALIZED UNIT, OR
- A QUALIFIED MEDICAL OR MENTAL-HEALTH SPECIALIST DOCUMENTS THAT THE YOUTHFUL OFFENDER WOULD BENEFIT FROM PLACEMENT OUTSIDE THE UNIT

A WRITTEN STATEMENT IS PREPARED DESCRIBING THE SPECIFIC REASONS FOR HOUSING A YOUTHFUL OFFENDER OUTSIDE THE SPECIALIZED UNIT AND A CASE-MANAGEMENT PLAN SPECIFYING WHAT BEHAVIORS NEED TO BE MODIFIED AND HOW THE YOUTHFUL OFFENDER MAY RETURN TO THE UNIT. THE STATEMENT OF REASONS AND CASE-MANAGEMENT PLAN MUST BE APPROVED BY THE FACILITY ADMINISTRATOR OR HIS/HER DESIGNEE. CASES ARE REVIEWED AT LEAST QUARTERLY BY THE CASE MANAGER, THE ADMINISTRATOR OR HIS OR HER DESIGNEE, AND THE YOUTHFUL OFFENDER TO DETERMINE WHETHER A YOUTHFUL OFFENDER SHOULD BE RETURNED TO THE SPECIALIZED UNIT.

FINDINGS:

No juveniles housed at the facility.

Standard #4-ALDF-2A-39

DIRECT SUPERVISION IS EMPLOYED IN THE SPECIALIZED UNIT TO ENSURE THE SAFETY AND SECURITY OF YOUTHFUL OFFENDERS.

FINDINGS:

No youthful offenders.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001142

Standard #4-ALDF-2A-40

CLASSIFICATION PLANS FOR YOUTHFUL OFFENDERS DETERMINE LEVEL OF RISK AND PROGRAM NEEDS DEVELOPMENTALLY APPROPRIATE FOR ADOLESCENTS. CLASSIFICATION PLANS INCLUDE CONSIDERATION OF PHYSICAL, MENTAL, SOCIAL, AND EDUCATIONAL MATURITY OF THE YOUTHFUL OFFENDER.

FINDINGS:

No youthful offenders.

Standard #4-ALDF-2A-41

ADEQUATE PROGRAM SPACE IS PROVIDED TO MEET THE PHYSICAL, SOCIAL, AND EMOTIONAL NEEDS OF YOUTHFUL OFFENDERS AND ALLOWS FOR THEIR PERSONAL INTERACTIONS AND GROUP ORIENTED ACTIVITIES.

FINDINGS:

No youthful offenders.

Standard #4-ALDF-2A-42

YOUTHFUL OFFENDERS IN THE SPECIALIZED UNIT FOR YOUTHFUL INMATES HAVE NO MORE THAN INCIDENTAL SIGHT OR SOUND CONTACT WITH ADULT INMATES FROM OUTSIDE THE UNIT IN LIVING, PROGRAM, DINING, OR OTHER COMMON AREAS OF THE FACILITY. ANY OTHER SIGHT OR SOUND CONTACT IS MINIMIZED, BRIEF, AND IN CONFORMANCE WITH APPLICABLE LEGAL REQUIREMENTS.

FINDINGS:

No youthful offenders.

Standard #4-ALDF-2A-43

PROGRAM PERSONNEL WHO WORK WITH YOUTHFUL OFFENDERS ARE TRAINED IN THE DEVELOPMENTAL, SAFETY, AND OTHER SPECIFIC NEEDS OF YOUTHFUL OFFENDERS. WRITTEN JOB DESCRIPTIONS AND QUALIFICATIONS REQUIRE TRAINING FOR STAFF WHO ARE RESPONSIBLE FOR PROGRAMMING OF YOUTHFUL OFFENDERS IN THE SPECIALIZED UNIT BEFORE BEING ASSIGNED TO WORK WITH YOUTHFUL OFFENDERS. TRAINING INCLUDES, BUT IS NOT LIMITED TO THE FOLLOWING AREAS:

AMERICAN OVERSIGHT

- ADOLESCENT DEVELOPMENT
- EDUCATIONAL PROGRAMMING
- CULTURAL AWARENESS
- CRISIS PREVENTION AND INTERVENTION
- LEGAL ISSUES
- HOUSING AND PHYSICAL PLANT
- POLICIES AND PROCEDURES
- MANAGEMENT OF, AND PROGRAMMING FOR, SEX OFFENDERS
- SUBSTANCE-ABUSE SERVICES
- COGNITIVE BEHAVIORAL INTERVENTIONS, INCLUDING ANGER MANAGEMENT, SOCIAL-SKILLS TRAINING, PROBLEM SOLVING
- RESISTING PEER PRESSURE
- SUICIDE PREVENTION
- NUTRITION
- MENTAL-HEALTH ISSUES
- GENDER-SPECIFIC ISSUES
- CASE-MANAGEMENT PLANNING AND IMPLEMENTATION

FINDINGS:

No youthful offenders.

Standard #4-ALDF-2C-02

WHEN A CANINE UNIT IS OPERATED BY THE FACILITY:

- THERE IS A MISSION STATEMENT, INCLUDING GOALS AND OBJECTIVES
- THE CIRCUMSTANCES IN WHICH CANINE UNITS MAY BE USED ARE CLEARLY DEFINED
- EMERGENCY PLANS ARE INTEGRATED INTO THE OVERALL EMERGENCY PLANS OF THE FACILITY
- THERE ARE CRITERIA FOR SELECTING, TRAINING AND CARING FOR ANIMALS
- THERE ARE CRITERIA FOR THE SELECTION, TRAINING, AND PHYSICAL FITNESS OF HANDLERS
- THERE IS AN APPROVED SANITATION PLAN THAT COVERS INSPECTION, HOUSING, TRANSPORTATION AND DAILY GROOMING FOR THE ANIMALS
- THERE ARE DAILY AND CURRENT RECORDS ON TRAINING, CARE OF DOGS AND SIGNIFICANT EVENTS

FINDINGS:

No canine units.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001144

Standard #4-ALDF-4A-14

WHEN REQUIRED BY STATUTE, FOOD PRODUCTS THAT ARE GROWN OR PRODUCED WITHIN THE SYSTEM ARE INSPECTED AND APPROVED BY THE APPROPRIATE GOVERNMENT AGENCY; THERE IS A DISTRIBUTION SYSTEM THAT ENSURES PROMPT DELIVERY OF FOODSTUFFS TO FACILITY KITCHENS.

FINDINGS:

No produce grown.

Standard #4-ALDF-4D-10

ANY STUDENTS, INTERNS, OR RESIDENTS DELIVERING HEALTH CARE IN THE FACILITY, AS PART OF A FORMAL TRAINING PROGRAM, WORK UNDER STAFF SUPERVISION COMMENSURATE WITH THEIR LEVEL OF TRAINING. THERE IS A WRITTEN AGREEMENT BETWEEN THE FACILITY AND TRAINING OR EDUCATIONAL FACILITY THAT COVERS THE SCOPE OF WORK, LENGTH OF AGREEMENT, AND ANY LEGAL OR LIABILITY ISSUES. STUDENTS OR INTERNS AGREE IN WRITING TO ABIDE BY ALL FACILITY POLICIES, INCLUDING THOSE RELATING TO THE SECURITY AND CONFIDENTIALITY OF INFORMATION.

FINDINGS:

Not used to perform any duties.

Standard #4-ALDF-5A-05

THERE IS A TREATMENT PHILOSOPHY WITHIN THE CONTEXT OF THE TOTAL CORRECTIONAL SYSTEM AS WELL AS GOALS AND MEASURABLE OBJECTIVES. THESE DOCUMENTS ARE REVIEWED AT LEAST ANNUALLY AND UPDATED AS NEEDED.

FINDINGS:

No programs in Houston.

Standard #4-ALDF-5A-06

THERE IS AN APPROPRIATE RANGE OF PRIMARY TREATMENT SERVICES FOR ALCOHOL AND OTHER SUBSTANCE-ABUSING INMATES THAT INCLUDE, AT A MINIMUM, THE FOLLOWING:

- INMATE DIAGNOSIS

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001145

- IDENTIFIED PROBLEM AREAS
- INDIVIDUAL TREATMENT OBJECTIVES
- TREATMENT GOALS
- COUNSELING NEEDS
- DRUG EDUCATION PLAN
- RELAPSE PREVENTION AND MANAGEMENT
- CULTURALLY SENSITIVE TREATMENT OBJECTIVES, AS APPROPRIATE
- THE PROVISION OF SELF-HELP GROUPS AS AN ADJUNCT TO TREATMENT
- PRERELEASE AND TRANSITIONAL SERVICE NEEDS
- COORDINATION EFFORTS WITH COMMUNITY SUPERVISION AND TREATMENT STAFF DURING THE PRERELEASE PHASE TO ENSURE A CONTINUUM OF SUPERVISION AND TREATMENT

FINDINGS:

No programs in Houston.

Standard #4-ALDF-5A-07

THE FACILITY USES A COORDINATED STAFF APPROACH TO DELIVER TREATMENT SERVICES. THIS APPROACH TO SERVICE DELIVERY IS DOCUMENTED IN TREATMENT PLANNING CONFERENCES AND IN INDIVIDUAL TREATMENT FILES.

FINDINGS:

No programs in Houston.

Standard #4-ALDF-5A-08

THERE ARE INCENTIVES FOR TARGETED TREATMENT PROGRAMS TO INCREASE AND MAINTAIN THE INMATE'S MOTIVATION FOR TREATMENT.

FINDINGS:

No programs in Houston.

Standard #4-ALDF-5A-10

IN FACILITIES OFFERING ACADEMIC AND VOCATIONAL TRAINING PROGRAMS, CLASSROOMS ARE DESIGNED IN CONSULTATION WITH SCHOOL AUTHORITIES. (RENOVATION, ADDITION, NEW CONSTRUCTION ONLY)

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001146

FINDINGS:

No programs in Houston.

Standard #4-ALDF-5B-13

ALL INMATES HELD FOR 30 OR MORE DAYS WHO WILL BE RELEASED TO THE COMMUNITY ARE PROVIDED WITH PREPARATION FOR RELEASE THAT INCLUDES INFORMATION ABOUT COMMUNITY RESOURCES.

FINDINGS:

No direct community releases.

Standard #4-ALDF-5B-14

WHEN THE FACILITY IS DESIGNATED TO OPERATE ANY TYPE OF PRETRIAL INTERVENTION SERVICE OR OTHER RELEASE PROGRAMS, ITS AUTHORITY AND RESPONSIBILITY ARE STATED BY STATUTE OR ADMINISTRATIVE REGULATION.

FINDINGS:

No pre-trial.

Standard #4-ALDF-5B-15

WHEN A PRETRIAL INTERVENTION PROGRAM, DIVERSION PROGRAM, PRETRIAL RELEASE PROGRAM, OR SUPERVISED RELEASE PROGRAM IS CONDUCTED IN THE FACILITY, SUFFICIENT STAFF, SPACE, AND EQUIPMENT ARE PROVIDED TO SERVICE THE PROGRAM.

FINDINGS:

No pre-trial.

Standard #4-ALDF-5B-16

WHERE TEMPORARY RELEASE PROGRAMS EXIST, THE PROGRAMS HAVE THE FOLLOWING ELEMENTS:

- WRITTEN OPERATIONAL PROCEDURES
- CAREFUL SCREENING AND SELECTION PROCEDURES
- WRITTEN RULES OF INMATE CONDUCT
- A SYSTEM FOR EVALUATING PROGRAM EFFECTIVENESS

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001147

- EFFORTS TO OBTAIN COMMUNITY COOPERATION AND SUPPORT

FINDINGS:

No temp release.

Standard #4-ALDF-5B-17

WHERE WORK RELEASE AND/OR EDUCATIONAL RELEASE ARE AUTHORIZED, THE FACILITY ADMINISTRATOR HAS AUTHORITY TO APPROVE OR DISAPPROVE PARTICIPATION FOR EACH INMATE.

FINDINGS:

No educational/vocational.

Standard #4-ALDF-5C-07

The facility can require all sentenced inmates to work if they are not assigned to programs.

FINDINGS:

No sentenced inmates.

Standard #4-ALDF-5C-09

WHERE STATUTE PERMITS, INMATES ARE ASSIGNED TO PUBLIC WORKS AND COMMUNITY SERVICE PROJECTS.

FINDINGS:

No community service.

Standard #4-ALDF-5C-13

WHERE AN INDUSTRIES PROGRAM EXISTS, ITS ESTABLISHMENT IS AUTHORIZED AND AREAS OF AUTHORITY, RESPONSIBILITY, AND ACCOUNTABILITY ARE DELINEATED.

FINDINGS:

No industry.

AMERICAN OVERSIGHT

Standard #4-ALDF-5C-14

THE NUMBER OF INMATES ASSIGNED TO INDUSTRIES OPERATIONS MEETS THE REALISTIC WORKLOAD NEEDS OF EACH OPERATING UNIT.

FINDINGS:

No industry.

Standard #4-ALDF-5C-15

THERE IS A COMPREHENSIVE QUALITY CONTROL PROCESS.

FINDINGS:

No industry.

Standard #4-ALDF-5C-16

A COST ACCOUNTING SYSTEM FOR EACH INDUSTRIES UNIT IS DESIGNED, IMPLEMENTED, AND MAINTAINED IN ACCORDANCE WITH GENERALLY ACCEPTED ACCOUNTING PRINCIPLES.

FINDINGS:

No industry.

Standard #4-ALDF-6B-06

APPROPRIATELY TRAINED INDIVIDUALS ARE ASSIGNED TO ASSIST DISABLED INMATES WHO CANNOT OTHERWISE PERFORM BASIC LIFE FUNCTIONS.

FINDINGS:

Detainees don't perform basic life action.

Standard #4-ALDF-7F-02

CONSISTENT WITH THE LAWS OF THE JURISDICTION, THERE IS A SYSTEM FOR PROVIDING NOTIFICATION TO THE REGISTERED VICTIM(S) OF A CRIME UPON THE RELEASE FROM CONFINEMENT OF THE CONVICTED INMATE OR IN THE EVENT OF AN ESCAPE. FOLLOW UP NOTIFICATION TO THE VICTIM(S) OCCURS WHEN ESCAPEES ARE RETURNED to custody.

AMERICAN OVERSIGHT

FINDINGS:

ICE does the report.

Standard #4-ALDF-7F-03

THE FACILITY ACTIVELY IDENTIFIES AND IMPLEMENTS ACTIVITIES THAT CONTRIBUTE TO THE COMMUNITY.

FINDINGS:

No community activities.

Standard #4-ALDF-7F-07

IF VOLUNTEERS ARE USED IN THE DELIVERY OF HEALTH CARE, THERE IS A DOCUMENTED SYSTEM FOR SELECTION, TRAINING, STAFF SUPERVISION, FACILITY ORIENTATION, AND A DEFINITION OF TASKS, RESPONSIBILITIES AND AUTHORITY THAT IS APPROVED BY THE HEALTH AUTHORITY. VOLUNTEERS MAY ONLY PERFORM DUTIES CONSISTENT WITH THEIR CREDENTIALS AND TRAINING. VOLUNTEERS AGREE IN WRITING TO ABIDE BY ALL FACILITY POLICIES, INCLUDING THOSE RELATING TO THE SECURITY AND CONFIDENTIALITY OF INFORMATION.

FINDINGS:

Volunteers are not used for health care.

AMERICAN OVERSIGHT

Significant Incident Summary

This report is required for all **residential** accreditation programs.

This summary is required to be provided to the Chair of your visiting team upon their arrival for an accreditation audit and included in the facility's Annual Report. The information contained on this form will also be summarized in the narrative portion of the visiting committee report and will be incorporated into the final report. Please type the data. If you have questions on how to complete the form, please contact your Accreditation Specialist.

This report is for Adult Correctional Institutions, Adult Local Detention Facilities, Core Jail Facilities, Boot Camps, Therapeutic Communities, Juvenile Correctional Facilities, Juvenile Detention Facilities, Adult Community Residential Services, and Small Juvenile Detention Facilities.

(b)(6); (b)(7)(C) Chairperson
ACA Auditor

(b)(6); (b)(7)(C)
ACA Auditor

AMERICAN OVERSIGHT

A. Introduction

The audit of the ICE Health Service Corps (IHSC) at the El Paso Processing Center (EPC), El Paso, Texas was conducted on November 5-6, 2018 utilizing the American Correctional Association (ACA) Standards for Performance Based, Health Care for Adult Local Detention Facilities, 4th Edition and the 2016 Standards Supplement. The following team conducted the audit: Ernest Umunna, Chairperson and Brenda Boyd, Team Member. This is an initial audit because the facility is using a new accreditation manual for the PB, HCALDF. The IHSC-EPC was previously accredited using the PB, HCACI manual in 2015. Other accreditations include National Commission on Correctional Health Care (NCCHC) - 12/2016 and Performance Based National Detention Standards (PBNDS) - 12/2018 (ICE).

B. Facility Demographics

Rated Capacity: 840 (Males-616 and Females-224)
Actual Population: 769 (Males-540 and Females-229) as of 11/05/2018
Average Daily Population for the last 12 months: 749
Average Length of Stay: 0 months 90 days
Security/Custody Level/Clothing designation:

C. Facility Description

The El Paso Processing Center (EPC) is part of the Department of Homeland Security, Immigration and Customs Enforcement (ICE), Enforcement and Removal Operations and the El Paso Field Office. It is the holding and processing facility for detainees while they undergo administrative proceedings regarding their right to remain in the United States.

The facility is located in East-Central El Paso, near the El Paso International Airport. The facility shares the land it sits on with the U.S. Border Patrol Sector Headquarter at 8915 Montana Avenue, El Paso, Texas 79925. The EPC's original buildings were constructed in 1968.

Modernized processing (intake/release), dining, medical, and laundry facilities were constructed between 1996 and 1998. The Executive Office for Immigration Review (EOIR) was also constructed between 1996 and 1998 and sits adjacent to the EPC. The building consists of court rooms, offices and a secured visitation/interview area. The EPC is situated on a combined 25 acre parcel of land alongside a Customs and Border Protection/Border Patrol facility and occupies the northern portion of the property. It is located on an approximately 16 acre site.

AMERICAN OVERSIGHT

Level II detainees (Orange uniforms) normally have a criminal history and Level III detainees (Red uniforms) mostly have aggravated felonies as part of their criminal history. Males and females are housed separately. Level I detainees are housed separately but may be housed with Level II detainees. Level II detainees may also be housed with Level III detainees. Level I and Level III detainees are never housed together.

There are eight separate housing buildings of various sizes and construction. Buildings 7 and 8 are the newest and have four individual "pods" or housing units, each with a capacity of 64. (b)(7)(E) (b)(7)(E) (b)(7)(E) (b)(7)(E) Each pod contains its own showers, toilets, washbasins, and water fountains, dayrooms with equipment, telephones, vending machines and washer / dryer machines for specific laundry needs.

Buildings 1 through 4 are located on the western end of the compound and are commonly referred to as "Barracks". Each of these barracks has a capacity of 64 and contains all necessary showers, toilets, washbasins, drinking fountains, dayrooms and equipment, telephones, vending machines, and washer/dryer machines. Buildings five and six, centrally located on the compound, can house 32 and 48 detainees respectively. They are also commonly referred to as "Barracks". These barracks currently house "temporary" detainees that are awaiting next day or impending transfer to another facility or to Albuquerque to be housed there as part of the agency's expedited removal program.

The mission of the El Paso Processing Center is to "provide a facility that is safe, clean, and sanitary for detainees waiting the processing of their administrative hearing and or immigration cases". The ICE Health Services Corps (IHSC) is responsible for all of the Health Care Services at the El Paso Processing Center and operates a full service clinic in a separate building located in the southeast section of the facility. The clinic includes an infirmary of six beds in an open dorm type setting and three individual negative pressure capable isolation cells. There is a pharmacy and three provider exam rooms. There is a sick call building across the medical clinic with an exam table. There is a nursing station with three stations for nursing interviews and a room near the entrance way with a pill cart that is utilized for pill call. The rest of the building includes storage, a room for drawing labs, an x - ray (digital) room, offices and a small conference room. A separate modular building houses the offices of the Mental Health Providers, the Nursing Manager, the Lead Medical Records Technician and the Administrative Assistant.

Vision

To be the best health care delivery system in detention and correctional health care.

Mission

Provide the safe delivery of high - quality care to those in ICE custody.

AMERICAN OVERSIGHT

Core Values

- Integrity: We consistently conduct business and deliver goods and services openly, honestly, and to the best of our ability.
- Commitment: We are committed to providing quality, cost - effective health care in collaboration and partnership with both federal and non-federal partners.
- Accountability: We are responsible for our personal and organizational decisions, actions, and results. We are good stewards of government funds and resources.
- Service: We strive to satisfy and meet the needs of the organization and stakeholders in support of immigration law enforcement.
- Excellence: We provide services and mission support utilizing highly qualified health care professionals in order to work towards achieving optimal outcomes.

(b)(7)(E) Units 1 to 7 house the male detainees. Units 1 to 4 have the capacity of 74, Unit 5 has the capacity 20, Unit 6 has the capacity of 44 and unit 7A-7D has the capacity of 64 each. Units 8A, 8B, 8C and 8D houses the female detainees and each has the capacity of 56. There are available Special Management Unit A (SMU-A) for admin. Males/females with capacity of 14, Special Management Unit D (SMU-D) for disciplinary males/females with capacity of eight and a Medical Housing Unit (MHU) for medical males/females with the capacity of nine. Male and female detainees are never housed together or allowed to comingle. (b)(7)(E)

(b)(7)(E)

National Commission on Correctional Health Care (NCCHC), 12/2016 and Performance Based National Detention Standards (PBNDS), 12/2018 (ICE) accredits the facility.

D. Pre-Audit Meeting

On Sunday, November 4, 2018 the members of the IHSC and ICE audit team were transported from the El Paso International Airport, El Paso, in El Paso County, Texas, to the Hawthorn Suites by Wyndham El Paso by the ICE Deportation Officer (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) The distance from the airport to the hotel was approximately 0.7 miles, 14 minutes.

The audit team members (IHSC and ICE) attended an "ice breaker" dinner at the Cattle Baron restaurant that Sunday approximately from 5:00 p.m. to 6:30 p.m. that evening with the facility representatives from the ICE and IHSC.

AMERICAN OVERSIGHT

General conversation followed as the team member and the facility staff became acquainted, and general audit goals and procedures for the audit were discussed. The audit team met at the hotel on that evening to discuss the information provided by the Association staff and the officials from the El Paso Processing Center (IHSC). The chairperson divided the standards into the following groups: Standards #4-ALDF-2A-45 to 4C-40 to (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) Chairperson and Standards #4-ALDF-4D-02 to 4D-27 to (b)(6); (b)(7)(C) Team Member.

E. The Audit Process

1. Transportation

On Monday, November 5, 2018, the audit team was picked up from the hotel by the ICE Deportation Officer (b)(6); (b)(7)(C) at 7:35 a.m. and arriving EDC at 7:45 a.m. The team followed the EDC's security procedures and was escorted into the facility by (b)(6); (b)(7)(C) Snr. Detention and Deportation Officer (SDDO), (b)(6); (b)(7)(C) GPS ACA Compliance Supervisor and Lt. (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) IHSC Compliance Officer.

2. Entrance Interview

At 7:59 a.m., the audit team proceeded with the formal entrance meeting at the facility (ICE) multipurpose room. It was a joint entrance interview with the ICE audit team. The team discussed the logistics of the tour and of conducting the two separate audits. Staffs were asked about any problem areas of which the teams should be aware. The staffs were advised that the audit team would meet with them each evening prior to their departure from the facility to discuss the progress of the audit up to that point, and any problems that were encountered, and the audit team will attempt to review all the mandatory standards on the first day. Escorts were requested to accompany the auditors on the tour and subsequent visits to departments, and to note the number of detainees and the names and titles of employees with whom the auditors spoke. The staffs were asked if any detainee or employee had requested to speak with the auditors.

No requests had been made. The audit chairperson expressed the team's appreciation and the appreciation of the ACA for the opportunity to be involved with the audits in its initial accreditation process, and emphasized the goals of the accreditation, which are to improve the efficiency and effectiveness of correctional systems throughout the United States. The chairperson explained the reason for the initial vs. reaccreditation audit.

The audit teams were aware that the staffs had worked long and hard in preparation for this event, and accordingly the teams would endeavor to provide a fair, equitable and thorough audit as possible while holding facility accountable to high standards.

AMERICAN OVERSIGHT

The team members would visit as many departments and areas as possible relating to the audit and meet and speak with as many staffs and detainees as possible in the time available, while at the same time strive to be as non-intrusive as possible.

It was requested that when audit team members paused to speak with detainees, that staffs step away so that the conversation may remain private and the team would like to observe the practice in any medical emergency. The audit team reemphasized that the purpose of the audit is to be helpful and to assist the facility in achieving its initial - accreditation. The entrance meeting lasted until 8:25 a.m. The following persons were in attendance:

(b)(6); (b)(7)(C)	Officer in Charge (ICE OIC) Assistant Officer in Charge (ICE AOIC) Supervisory Detention and Deportation Officer (ICE SDDO) Supervisory Detention and Deportation Officer (ICE SDDO) Maintenance Supervisor (ICE) Global Precision Systems (GPS)/ASSET Security Project Manager GPS/ASSET Assistant Project Manager GPS Quality Assurance/Quality Control Manager GPS Quality Assurance/Quality Control Officer GPS Food Service Manager ASSET 1st Shift Captain GPS Contract Detention Operations Supervisor GPS Contract Detention Operations Supervisor GPS ACA Compliance Supervisor SDDO, DHS/ICE/ERO/EPC GPS ACA Compliance Supervisor Lieutenant Commander Health Services Administrator Lieutenant Medical Compliance Officer

3. Facility Tour

The audit team toured the medical area and other areas relating to the IHSC audit from 8:30 a.m. to 11:35 a.m. ACA audit notices were posted throughout the facility (English and Spanish).

Staff and detainees were aware that an audit was taking place. Most of the facility was toured jointly (ICE / IHSC auditors). The following persons accompanied the team on the tour and responded to the team's questions concerning facility operations:

(b)(6); (b)(7)(C)	Lieutenant Commander Health Services Administrator Lieutenant Medical Compliance Officer

AMERICAN OVERSIGHT

(b)(6); (b)(7)(C)	GPS ACA Compliance Supervisor SDDO, DHS/ICE/ERO/EPC GPS ACA Compliance Supervisor Supervisory Detention and Deportation Officer (ICE SDDO) Supervisory Detention and Deportation Officer (ICE SDDO) Maintenance Supervisor (ICE) Global Precision Systems (GPS)/ASSET Security Project Manager GPS/ASSET Assistant Project Manager GPS Quality Assurance/Quality Control Manager GPS Quality Assurance/Quality Control Officer ASSET 1st Shift Captain GPS Contract Detention Operations Supervisor GPS Contract Detention Operations Supervisor

4. Conditions of Confinement/Quality of Life

During the tour, the team evaluated the conditions of confinement at the facility. The following narrative description of the relevant programmatic services and functional areas summarizes the findings regarding the quality of life.

Security:

(b)(7)(E)

AMERICAN OVERSIGHT

(b)(7)(E)

Environmental conditions:

Temperature, airflow and lighting are kept at comfortable levels throughout medical areas and the facility. The noise levels are low. The audit team did not observe any shouting, banging on doors, offensive smell or smell of paint. The audit team interviewed several detainees on overall environmental welfare and condition inside the facility, and they were complimentary. There is no evidence of pest or rodent infestation or complaint. All areas of the facility are clean and well maintained. The housing units were quiet and there appeared to be a very low level of tension in the units.

Sanitation:

Sanitation is provided using detainees and staff assistance. The entire building was very clean as was the rest of the facility. The medical areas were remarkably clean with all cleaning materials kept in clean rooms with no caustic or toxic chemicals present. Cleaning solutions were all distributed from a central location where they are properly diluted before distribution. The master SDS of all chemicals are kept in the main clinic and updated accordingly. Stericycle is contracted to pick up medical waste on a regular schedule. Sanitation of administrative areas is contracted through the Mavagi Enterprise, Inc., San Antonio, Texas, and trained on biohazard cleaning.

AMERICAN OVERSIGHT

Eyewash stations are located in all areas of the facility, including medical and checked for expiration and replenishment. Hand washing rules are posted in all the bathrooms.

Fire Safety:

Facility is equipped with proper sprinkler systems and working fire alarm systems. Fire extinguishers were located throughout and had been properly checked.

Fire drills had been conducted regularly and all inspections including fire extinguisher were up-to-date. Fire inspections provided by El Paso Fire department. Hazardous materials were stored properly in designated and appropriate storage areas. Safety Data Sheets comprising of all chemicals in the facility are present. Control, accountability, and inventory were maintained. Flame resistant furnishings and waste containers were observed throughout the facility. The facility is a non-smoking facility; however, there are designated smoking areas outside the secure perimeter.

Food Service:

Food Service is contracted through the Global Precision Systems (GPS). Contract was established in 12/2016. The food service area is clean. The area is inspected weekly by food service staff, monthly by the safety officer and annually be the health department. A five weeks menu cycle, approved annually by a Registered Dietitian, is utilized and based on three hot meals per day. A diet for health, hyper calorie diet, renal diet, vegetarian and texture modifications are available. There is one dining hall of 230 capacity.

The audit team observed trays and sampled one lunch meal of turkey sandwich, pack of sunflower seeds, two - slices of white bread, hot vegetable soup with meatballs, salad with 100 dressing, salt and pepper and a choice of drink or water on the first day of the audit. The meal was nutritionally adequate, palatable and temperature tested. There are no pork products served. Medical diets are provided by the food service department upon receipt of written instructions from the facility Clinical Director. Meals samples are kept for 72 hours. At the time of the audit, there were 22 medical diets. These diet orders contain both start and stops dates. These may be ordered anywhere from one day to length of stay. Pregnant detainees receive special diets and extra snacks. Medical evaluations and screenings are done on detainee workers which monitored personal hygiene, cuts/sores, burns, runny nose, nail condition and cold/flu symptoms. Detainees are not allowed to prepare meals. There is one walk-in freezer, two walk-in coolers and one dry storage. Refrigerators, freezers and the dry storage area are clean, orderly and clutter - free, and temperatures are in the appropriate ranges. The dishwasher was in proper working order, and documentation reflected temperatures in the appropriate range. The cost per meal is $1.29.

AMERICAN OVERSIGHT

Medical Care:

Medical services at the El Paso Processing Center IHSC (EPC-IHSC) are contracted through the STG International (STGi) on August 20, 2018. They also utilize Public Health Service (PHS), Government Service/ICE and as needed contracted staffing.

They provide medical, mental health and dental services. EDC medical receives transfers and in - transit, border patrol and intra and inter system transfer detainees and some with the history of high-risk behaviors, compounded by lack of medical care and or mental health treatment, and are more likely to have chronic illnesses and infectious diseases.

EPC-IHSC is an intake/releasing facility. The facility has a responsible physician (MD) and a Health Services Administrator (HSA). The working relationship between medical, mental health, program, dental and security are very remarkable. Medical staffs are well trained and caring professionals. The audit team interviewed several detainees, including the pregnant females, the youngest and oldest male and female, and they were complimentary of medical services. Telemedicine is practiced at the EPC-IHSC. The audit team observed an intake process from the border patrol on the first day of the audit, and medical responded accordingly. The medical clinic is extremely small and limited for operational efficiency and services benefiting the detainees.

EPC-IHSC medical operates three shifts: 1st shift from 7:00 a.m. to 3:30 p.m., 2nd shift from 3:00 p.m. to 11:30 p.m. and 3rd shift from 11:00 p.m. to 7:30 a.m. (Sunday-Saturday). The Public Health Service staffs are on call. Schedules allows for shift briefings. (b)(7)(E)

(b)(7)(E)

(b)(7)(E) The audit team observed shift changes on first day of the audit and found the process structured. Medical service is centralized. The EPC-IHSC medical has four examination rooms (one - urgent care and three -regular rooms). Exam rooms have panic buttons. The waiting rooms have access to water, bathrooms, education materials and health pamphlets. New fulltime employees receive in service trainings and OJT trainings. EPC-IHSC medical clinic has the followings:

AMERICAN OVERSIGHT

- ✓ 5 AEDs (secured and inspected)
- ✓ 2 EKGs (secured and inspected, and read on site)
- ✓ 1 Fixed digital chest x-ray machine
- ✓ 2 Emergency bags (secured, inspected and sealed)
- ✓ 1 Emergency stretcher with straps (secured and inspected)
- ✓ 1 Dedicated emergency medical vehicle-gulf cart
- ✓ 1 Transport gurney (secured and inspected)
- ✓ 1 Secure medication room
- ✓ 1 Medication administration room
- ✓ 3 Medication carts
- ✓ 1 Pill window
- ✓ 3 Refrigerators -Flu, TB Solutions, etc. (1-Pharmacy, 1-Lab and 1-Medline)
- ✓ 1 Refrigerator (Specimen)
- ✓ 7 Portable oxygen cylinders (secured and inspected by Argyle Wielding Supply)
- ✓ 3 Negative pressure rooms (cameras, toilets and sinks, and last professional inspection 8/28/2018)
- ✓ 1 Single room with 6-beds infirmary (call lights, showers, toilets and sinks)
- ✓ 6 Suicide observation rooms (cameras, toilets and sinks)
- ✓ 2 Padded/rubber cells (cameras and toilets)
- ✓ 1 Medical Observation room (camera and toilet)

EPC IHSC is an ADA compliant facility and has an ADA Coordinator. It complies with the Disability Placement Program (DPP) that provides for housing accessible lockers, bunk beds with grabs bars, accessible TTY phones, volume control phones, accessible dayroom tables and accessible path of travel. Building 7 and SEG A are considered ADA units. There are ample supplies of walking sticks, crutches and wheel chairs in the facility.

EPC-IHSC has an agreement with the El Paso Fire Department (0.4 miles, four minutes) for ambulance services in case of medical emergencies. Non - emergent medical transportation is done by facility staff to either a hospital facility or community provider for offsite consultations. The nurses have Basic Life Support (BLS) certifications. Medical maintain basic TTA protocol medicines. The Master SDS is maintained in medical. Officers are trained on first aid, CPR and AED, and are considered first responders. Upon admittance to the EPC - IHSC, detainees receive a detainee handbook to aid in adjustment to detention setting. This documentation contains information regarding medical services, sick call process, grievance procedures and hygiene rules. Other methods are used to inform detainees about MRSA, AIDS, Hepatitis, and the spread of HIV, blood borne pathogens and safety. Medical utilizes language line translation and video orientation. EPC-IHSC medical uses the following hospitals for inpatient hospitalization:

AMERICAN OVERSIGHT

1. Del Sol Medical Center, El Paso, Texas (ER)
2. Sierra Providence East Medical Center, El Paso, Texas (ER)
3. University Medical Center, El Paso, Texas
4. University Behavioral Health Center, El Paso, Texas (Psychiatric Inpatient)
5. Sierra Medical Center, El Paso, Texas
6. Providence Memorial Hospital, El Paso, Texas

Sick calls are provided seven days a week (Sunday-Saturday) in General Population (GP) and Segregation (SEG).

Detainees sign up for sick calls via call out logs at each housing unit between the hours of 5:30 a.m. and 6: 00 a.m. every day. (b)(5)

(b)(5)

There is a pilot program to install electronic kiosks for sick calls, grievances and etc. Detainees housed in SEG access all medical services via face to face encounters with an RN during daily rounds. The average monthly sick calls are 916. The audit team observed sick call process on the second day of the audit and found the process well organized. Medical requests are triaged daily, and any patient with symptoms is seen within hours. There is no medical copay and no detainee is denied health care service. EPC - IHSC uses detainee electronic medical records. Medical grievance is through the grievance boxes and collected by a grievance coordinator and reviewed by the HSA within seven days. There is no evidence of substantiated medical grievance.

Specialty services/consults are provided through off - site contracted specialists. The turnaround time is routine 30 days, urgent; one to three days and emergency 24 hours and depending medical acuity and specialty. Optometry service is contracted offsite through the Viscount Vision Center, El Paso, Texas and eye glasses through the Correctional Eye Care. There were four pregnant detainees at the time of the audit. All pregnant females are referred to an offsite OB-GYN specialist and are provided pregnancy literatures and snacks. The number of chronic care detainees excluding mental health at the time of the audit was 84. Over 50% of the detainees interviewed showed symptoms of severe skin rashes due to hard water and worsened by cheap body soap and lotion. The audit team recommended a review of facility water hardness and the addition or increase of water softening agent. There is one detainee on hunger strike for three weeks at the time of the audit, but takes liquid diets, and is well attended by medical.

EPC-IHSC has a plan for the management of communicable diseases including education on prevention, diagnosis, treatment and isolation. EPC - IHSC has an infectious disease coordinator. EPC-IHSC has three single bed negative pressure rooms with last inspection date of 8/28/18 by the Air Management Solutions,

AMERICAN OVERSIGHT

Powder Springs, GA. There is a single room (six beds) infirmary. MRSA precautions are in place. Universal precautions are practiced throughout the facility. There are available first aid and blood borne pathogen kits. There are eye wash stations present in appropriate areas. Hand sanitizers (non-alcohol) dispensers were located throughout medical and other areas. Unit's sanitation and housekeeping are provided by detainees.

Mavagi Enterprise is contracted to clean admin. offices and are trained on biohazard cleaning. An annual TB screening is conducted on all detainees after 12 months. EPC-IHSC offers limited TB sticks, mostly chest x-rays on site.

Medications are stored in medication rooms and secured behind double locks.

A nurse administers medications including diabetic lines three times a day / seven days a week (Sunday-Saturday) and PRN in GP and SEG. SEG is conducted cell side. Diabetics are trained to self-administer. Prior to giving medications, detainee's identification is confirmed, and mouth cavities checked after administration. The audit team observed medication administrations in the GP and SEG on the first day of the audit and found the process organized and timely. All no shows or refusal to medications are documented and or referred. The HSA checks the MARS paper record for missed doses.

The audit team examined the MARS records during the audit and found it current. There are 22 medical diets and 216 diabetics (43 - insulin and 173 - non insulin dependents) at the time of the audit. Some insulin dependent diabetics receive midnight snacks. The average monthly detainees on prescription medications are 1482, and controlled medications are zero. Some medications are crushed per doctor's order. Detainees are provided 30 day script medications upon release.

EPC - (b)(7)(E) (b)(7)(E) EPC-IHSC maintains stock order and patient specific medications, and bulk sharps. Medications are ordered through the McKesson and Diamond pharmacy. The backup pharmacy is the local Walgreen pharmacy. Detainees are allowed keep-on-person (KOP) medications. OTC meds are administered on a dose by dose by nurses. The pharmacy is audited by the Diamond Pharmacist, the Pharmacist and the HSA. A random inventory count on sharps and controlled medications is accurate. The pharmacy has a refrigerator for the storage of insulin, vaccines and ice packs. The audit team found the temperature log and inventory current. Basic medical supplies and materials are obtained through the Two Rivers and AMD medical supplies. The disposal of expired, unused, discontinued, recalled, over stocked medications including prescription, (pills and liquids) and narcotics are arranged through the Reverse Distributor - Pharma logistics. Loose pills are disposed through the use of Stericycle. At the time of the audit there were some medications awaiting disposal. Records are maintained on disposal process.

AMERICAN OVERSIGHT

(b)(5)

EPC-IHSC medical has a draw only lab. Specimens are collected on site. Blood is spun and sent out for analysis to the LabCorp five days a week, including STAT labs and reports received through fax/phone within 24 to 48 hours. Average monthly detainee lab tests are 225.

Stericycle is contracted to pick up the biohazard and sharps wastes. The audit team checked the specimen refrigerator temperature log and found the records current. Chronic care patients receive annual screening test. Laboratory results are also incorporated into the EMR. Digital radiology is used in the facility with hard copy over - reads scanned into the electronic health record (EMR). There is one fixed wall stand digital chest x-ray machine. One F/T Radiology Technician (STGi) supports the x-ray department.

Radiology services (MRI, Ultrasound, etc.), including STATS are provided through the Del Sol Medical Center, El Paso, TX and XRAD with results received within hours by phone/fax depending on urgency.

One F/T Dentist (PHS), one F/T Registered Dental Assistant (STGi) supports EPC - IHSC dental. Dental services are provided from 6:00 a.m. to 2:30 p.m. (Monday -Friday) four to seven patients a day.

Dental services include basic dentistry, filling, partial, root canal, extraction, oral surgery, cleaning, oral cancer screening and patient education. The detainee's access dental health services through the sick call log process. The audit team reviewed the licenses, registrations, records and random inventory of sharps and instruments and found them accurate. The dental area is clean. Dental instruments and sharps not used at the year of expiration are re -autoclaved and repackaged. Dental spore test is done using the ATTEST. The Dentist has a standing order; dental emergency outside the expertise of the nurse is referred to one of the contracted hospitals. Dental at EPC - IHSC is equipped with one dental bitewing digital x - ray machine, one dental chair and one Panorex digital x - ray machine. The dental wait time is less than one to two days. Urgent requests are seen within 24 hours. The average monthly dental appointment is 71. There is an amalgam separator to the compressor for dental amalgam wastes. Dosimeter reading is through the Luxel + Landauer. Dental chair traps are cleaned twice a week. Dental supplies are through the Two Rivers and AMD and equipment services are through the Henry Schein.

Mental health is supported by (b)(7)(E) (b)(7)(E) (b)(7)(E) They provide services from 7:00 a.m. to 3:30 p.m.

AMERICAN OVERSIGHT

(Monday-Friday). Detainees access mental health services via the sick call log process. Staffs can refer services. There are approximately 111 detainees seen monthly. All suicide ideations are referred to mental health and monitored and are observed 1:1. Mental health utilizes the six single - bed isolation and two padded/rubber rooms. There are available suicide smocks and blankets.

Tele-psychiatry is practiced at EPC-IHSC. EPC-IHSC maintains zero tolerance for sexual abuse and harassment. Detainees are provided information on enhanced victim services and rape crisis hotline. Rounds are done weekly and are evaluated every 30/60/90 days depending on needs. Program services include crisis intervention, individual and group counseling and medication management. EPC-IHSC has no therapeutic community program and does not house severely developmentally and disabled detainees. EPC-IHSC utilizes the University Behavioral Health Center, El Paso, Texas for psychiatric inpatient hospitalization.

There were approximately 280 detainees on psychotropic medication at the time of the audit. EPC-IHSC does not perform detoxification from alcohol, opiates hypnotics, other stimulants and sedative hypnotic drugs.

Chemical dependency treatment program is not provided. Detainees needing services are referred offsite. EPC - IHSC utilizes medical and psychiatric restraints.

Recreation:

Each housing unit has its own recreation yard at EPC. There are two Recreations Specialists who coordinate recreation activities for the detainee population. There are indoor and outdoor recreation areas. The recreation specialists also deliver detainees mails and assist in supplying the library services.

All are allowed at least two hours per day of outside activity. There are also indoor activity rooms for more sedentary activities, including board games, foosball, and television viewing. Segregation detainees are also allowed outside recreation at least once per day in a covered spacious yard. Only one segregated detainee is allowed at a time.

Religious Programming:

Religious Services staff consists of three members. There is a Chaplain and two assistants along with fifteen volunteers currently representing five religious denominations and two spiritual counselors. The Office of the Chaplain maintains open communication with the diverse religious leaders in the community to provide spiritual support on an as needed basis to allow the free exercise of the diverse religious beliefs and practices of the detainees. Many religious items such as beads, literature, prayer rugs and prayer cards are donated by the local religious community and provided to the detainees.

AMERICAN OVERSIGHT

The religious services staff maintains an active role within the facility providing support in special projects such as the opportunity for worship, religious diets, spiritual counseling, spiritual support, and crisis intervention.

Work Programs:

The facility utilizes volunteer detainee labor for various work projects. Detainees are afforded the opportunity to participate in a work program and earn money. Detainees who wish to participate in the work program will be paid one dollar a day and not be permitted to work in excess of eight hours daily, 40 hours weekly.

There is a color uniforms to distinguish male (white) and female worker (brown). Some examples of work assignments available for the detainees include kitchen, library aide, laundry, janitorial, barbershop, and grounds keeping crew, paint/wax and recreation specialist workers.

Academic and Vocational Education:

The ICE does not provide special services such as education, vocation. The primary purposes of detention are to guarantee aliens' presence in immigration court hearings and to ensure their removal from the U.S. when removal is ordered. ICE does not provide educational or vocational programs except for minors under limited conditions.

Social Services:

The facility utilizes both qualified staff members and community volunteers to deliver services such as drug and alcohol dependency counseling and mental health treatment. Services are available on an as - needed basis, and providers are contacted on an on - call basis when not on duty at the facility.

Visitation:

The EPC allows detainees to receive visits from family, friends and legal representatives. Visits are permitted during set hours on weekdays, weekends, and holidays. Interviews with attorneys are allowed seven days a week from 7:00 a.m. to 10:00 p.m. Non - contact visits are permitted during set hours and a visitation schedule is posted in all housing units. The visitation area is located in the Executive Office of Immigration Review Building (EOIR) and is managed by contract security staffs. Storage lockers are available for visitor's personal belongings. Special and contact visits are afforded to detainees by submitting a request and having it approved by a Detention Operations Supervisor. Consular officials may meet with their detained nationals at any time. Clergy may visit detainees at any time but must make prior arrangements with the Chaplain's Office.

AMERICAN OVERSIGHT

Library Services:

The EPC has a library available to all detainees for legal research and recreational reading. Library operations are coordinated by the facility Recreation Specialists and are staffed by contract security officers. Detainee library aides employed through the volunteer work program assist other detainees in the library. Library schedule is coordinated according to gender and classification status. There are 14 computers workstations, two printers, and I copier available to detainees who wish to utilize the library.

Laundry:

The Laundry operates seven commercial washers with an automatic detergent feed and seven commercial dryers. The laundry operates from six to 11 hours daily and is supervised by contract security staff and operated by volunteer detainee workers. Detainee uniforms are exchanged three times a week on Mondays, Wednesdays, and Saturdays. Sheets and towels are exchanged twice a week.

Blankets are exchanged once a week. Seasonal items issued to detainees are sweater and jackets. Upon admission, detainees receive one blanket, two sheets, one towel, two uniforms, one pair of shoes, one pair of sandals, two pair of socks, two pair of underwear, and two t - shirts. Lint traps are cleaned daily.

F. Examination of Records

Following the facility tour, the team proceeded to a medical private office to review the accreditation paper files and evaluate compliance levels of the policies and procedures. The facility has no notices of non-compliance with local, state, or federal laws or regulations.

1. Litigation

The facility had no consent decrees, class action lawsuits or adverse judgments in the past year according to records.

2. Significant Incidents/Outcome Measures

The EPC-IHSC only provided Significant Incident Summary and Health Care Outcome from October 2016 to September 2017 in consultation with the ACA and following the transition from the PB,HCACI to PB,HCALDF accreditation process.

Significant Incident Summary

The audit team reviewed the significant incident summary with the health care administrative team as provided. The number of detainees on detainee assaults without weapon was 37 and detainee on staff assault was five.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001198

While the number is noteworthy and will impact health care services, it was determined that it was within the appropriate range that would be expected for an institution of this size, population, custody level and mission.

Health Care Outcome Measures

The audit team reviewed the health care outcome measures with the health care administrative team as provided.

There were no deaths, no pharmacy dispensing errors, no suicides, no needle sticks and no nursing medication administration errors. There was discussion regarding the following sections on the healthcare outcomes section of the report during the audit period:

1. Standard 4C (5) Number of Hepatitis C positive detainees in the past 12 months was 28, and with the average daily population in the past 12 months of 780. The EPC-IHSC provided statement that facility is an ICE processing facility and receives detainees with existing diagnosis.

2. Standard 4C (6) Number of HIV positive detainees in the past 12 months was 17, and with the average daily population in the past 12 months of 780. The EPC-IHSC provided statement that facility is an ICE processing facility and receives detainees with existing diagnosis from prior lifestyles.

3. Standard 4C (8) Number of detainee's diagnosis with an Axis 1 (excluding sole diagnosis of substance abuse) during the past 12 months was 377, and with the average daily population in the past 12 months of 780. The EPC - IHSC provided statement that the facility is an ICE processing facility. Detainees have adjustment and situation disorders with anxiety.

4. Standard 4C (15) Number of detainee's admission to the infirmary (where available) in the past 12 months was 337, and with the average daily population in the past 12 months of 780. The EPC-IHSC is an ICE processing facility. The number is due to high intakes, medical observations and the need for medical clearance.

The values stated for the measures reflected a very busy facility with high intakes from diverse population, gender, age and nationality with a wide variety of health concerns. The medical auditor concurs with the responses.

3. Departmental Visits

The team revisited the following departments to review conditions relating to departmental policy and operations:

4. Shifts

a. Day / Evening Shifts

The team was present at the facility from 7:45 a.m. to 6:35 p.m. on the first day of the audit. The team observed the afternoon shift change and briefing and sharps count at 3:00 p.m. The briefing was mutual and participatory.

AMERICAN OVERSIGHT

The team briefly introduced themselves and discussed the purpose of the audit and matters pertaining to the audit. The team observed medication administration while the rest of the medical staff was busy taking care of the detainees and are pleasant and professional.

LCDR (b)(5); (b)(7)(C) Health Services Administrator (PHS), LCDR (b)(5); (b)(7)(C) Assistant Health Services Administrator (PHS), (b)(5); (b)(7)(C) (b)(5); (b)(7)(C) Contract Coordinator (STGi), (b)(5); (b)(7)(C) Medical Doctor (GS - ICE), (b)(5); (b)(7)(C) Nurse Practitioner (STGi) and 12 other medical staffs were present.

b. Night Shift

The team was present at the facility during the night shift from 7:00 a.m. to 12:21 p.m. on the second day of the audit. The audit team observed the morning shift change and briefing.

Shift briefings are a normal occurrence. The shift supervisors passed on information to the oncoming shift. A familiar and easy rapport was evident among the staff, and information was freely exchanged. LCDR (b)(5); (b)(7)(C) (b)(5); (b)(7)(C) Health Services Administrator (PHS), LCDR (b)(5); (b)(7)(C) Assistant Health Services Administrator (PHS), (b)(5); (b)(7)(C) (b)(5); (b)(7)(C) Medical Doctor (GS-ICE), (b)(5); (b)(7)(C) Nurse Practitioner (STGi) and nine other medical staffs were present.

5. Status of Previously Non-compliant Standards/Plans of Action

This audit was conducted as an initial accreditation audit of the ICE Health Services Corps for the El Paso Processing Center.

G. Interviews

During the course of the audit, team members met with both staff and detainees to verify observations and/or to clarify questions concerning facility operations.

1. Detainee Interviews

The audit team interviewed and spoke to approximately 235 detainees (168 - males and 67 - females) individual and in group, including four pregnant females who stated that they generally felt secure at the facility and were treated fairly by staff. Their basic needs were being met and they felt that they were making positive progress towards eventual and successful release. They also felt that their basic medical needs were being met. They have access to sick call process but felt that the 5:30 a.m. to 6:00 a.m. time is very limited and restricted. They were aware of the grievance process.

AMERICAN OVERSIGHT

Detainee morale appeared to be good and they were cooperative, respectful and were aware of the audit, and participated in the preparation for the audit. Notices of the ACA accreditation process were observed to have been posted at different locations readily available to the detainees.

2. Staff Interviews

The audit team interviewed and spoke to approximately 55 employees and observed them in the performance of their duties. The audit team observed structured medical shift changes briefings. Staffs were polite, cooperative, and conducted themselves in a professional manner. There was a normal working relationship between medical, dental, mental health, programs and security, and communication flowed freely.

Gender and ethnic diversity were good, and morale also appeared to be good. Staff indicated that their training were excellent and are applicable to their positions and job needs.

H. Exit Discussion

The exit interview was held at 12:10 p.m. in the ICE conference room with (b)(5); (b)(7)(C) – Officer in Charge (ICE OIC), (b)(5); (b)(7)(C) Assistant Officer in Charge (ICE AOIC) and LCDR (b)(5); (b)(7)(C) Health Services Administrator (PHS), four - Public Health Services, four - STGi, one - Government Service/ICE employees and the ACA - ICE audit team.

The chairperson explained the procedures that would follow the audit. The team discussed the compliance levels of the mandatory and non-mandatory standards and reviewed their individual findings with the group.

The chairperson expressed appreciation for the cooperation of everyone concerned and congratulated the facility team for the progress made and encouraged them to continue to strive to maintain their high level of professionalism in the correctional field.

AMERICAN OVERSIGHT

A. Introduction

The reaccreditation audit of the South Texas ICE Processing Center, Pearsall, Texas, was conducted on December 9-11, 2019, by the following team: (b)(6); (b)(7)(C) Chairperson; (b)(6); (b)(7)(C)

B. Facility Demographics

Rated Capacity: 1,904

Actual Population: 1,385

Average Daily
Population for
the last 12 months: 1,875

Average Length
of Stay: Two months

Security/Custody Level: Minimum offenders (802 Level One males, 286 Level Two males, 88 Level Three Males, 163 Level One females, 34 Level Two females and 12 Level Three females).

Age Range of
Offenders: 18-68

Gender: Female and Male

Full-Time Staff: 417

C. Facility Description

The South Texas ICE Processing Center (STIPC), operated by the GEO Group, is located on 37 acres in Pearsall, Texas, which is approximately 50 miles from the San Antonio International Airport. Pursuant to a contract with Department of Homeland Security (DHS) and Immigrations Customs Enforcement (ICE), STIPC provides civil detention for detainees who are in the United States illegally or who are seeking asylum.

The facility, consisting of a 242,195 square foot building, houses up to 1,904 male and female, minimum-security detainees within three classification levels. With the exception of a two-story Special Management Unit, the entire complex is one story. The facility design is made up of a quarter mile main hallway with housing units and departments located off each side of the hallway. The Special Management Unit is located at one end of the main hallway and consists of RHU A (36 single cells), RHU B and C (36 double cells in each) and FF (one single cell and nine double cells for females).

AMERICAN OVERSIGHT

The other 25 dormitory-style housing units are located along the main hallway and consist of either 60 or 100 beds. The dormitories have an open design (b)(7)(E) (b)(7)(E) The beds are located on each side of the dorm with dayroom seating located in the middle. The wall opposite the entry door is full glass that opens into an outside enclosed recreation yard.

In the center of the main hall, is the Administrative Area, Master Control, Medical Unit, Asylum Interview Area, Immigration Court Rooms, Food Services, Maintenance, Intake and the Property Room.

In August of 2012, the size of STIPC was expanded by 3,815 square feet. The expansion, adjacent to the existing office area, provided for an ICE training room, six new offices, nine work stations, a copy room, supply room and restrooms. The facility complex has offices for (b)(7)(E) staff members. A Judicial Area with four courtrooms also exists. The renovations also included a 22,000 square foot recreation yard with adequate space for a full size soccer field, shade pavilions and picnic tables. (b)(7)(E) (b)(7)(E) A new outdoor recreation yard was added adjacent to the existing Special Management Unit. Additionally, a major expansion of parking for staff and visitors was included in the renovations.

In March 2016, the contract between GEO Group and ICE and DHS was amended to provide housing for 130 female detainees. There are two housing units for females (100 bed dormitory and 17 bed dormitory).

DHS and ICE monitor the facility by means of periodic audits and inspections. GEO Group also monitors the facility through corporate audits and its Quality Assurance Program. ICE often uses the complex for training of offsite ICE staff and contract employees with regard to facility operations.

STIPC's mission statement states as follows: "The South Texas ICE Processing Center is a privately owned and operated detention facility for profit. The facilities primary contractual responsibility is to provide security and transportation services to the Department of Homeland Security's Immigration and Custom's Enforcement.

It is the mission of the South Texas ICE Processing Center to provide the highest level of service to our clients, our primary objective being to ensure the safety of the community, staff and those entrusted into our custody. This mission is accomplished through well-selected, trained, professional staff that exhibits dedication, integrity, responsibility, ethical conduct and pride in their daily lives.

As an employee of the South Texas ICE Processing Center, you are the most valuable and important resource of this agency. Neither this agency nor this facility can perform their vital public mission for the citizens of Texas without the professional and dedicated service of our employees.

AMERICAN OVERSIGHT

D. Pre-Audit Meeting

The team met on December 8, 2019, in Pearsall, Texas, to discuss the information provided by the Association staff and the officials from DCC.

The chairperson divided standards into the following groups:

Standards #1B-01 to 1B-06
#1C-01 TO 1C-15
#2A-01 to 2D-03
#3A-01 to 3A-02
#4A-01 to 4A-16
#4B-01 to 4B-09: (b)(6); (b)(7)(C) Chairperson

Standards #5C-01 to 5C-26
#6A-01 to 6D-01
#7A-01 to 7G-01: (b)(6); (b)(7)(C) Member

Standards #1A-01 to 1A-23
#4C-01 to 4C-41
#4D-01 to 4D-28
#5A-01 to 5A-10
#5B-01 to 5B-18 (b)(6); (b)(7)(C) Member

E. The Audit Process

1. Transportation

The team was escorted to the facility by (b)(6); (b)(7)(C) Director of Contract Compliance, Central Region.

2. Entrance Interview

The audit team was taken to the facility conference room, where they met with (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) Facility Administrator. The team expressed the appreciation of the Association for the opportunity to be involved with STIPC in the accreditation process. After being asked whether there were any issues that the audit team needed to be aware of that could affect the audit, Facility Administrator (b)(6); (b)(7)(C) indicated that there was nothing of which he was aware. After further preliminary issues were discussed, the chairperson informed Facility Administrator (b)(6); (b)(7)(C) that the audit team would try to be as non-intrusive possible while performing a thorough and fair audit.

The formal entry meeting was held in the conference room.

AMERICAN OVERSIGHT

The following persons were in attendance:

(b)(6); (b)(7)(C)

It was explained that the goal of the visiting team was to be as helpful and non-intrusive as possible during the conduct of the audit. The chairperson emphasized the goals of accreditation toward the efficiency and effectiveness of correctional systems throughout the United States. The audit schedule was also discussed at this time. All of the attendees introduced themselves and stated their positions of employment. The members of the audit team were introduced and each one was allowed to give a brief biography. The chairperson expressed appreciation for the opportunity to perform the reaccreditation audit of STIPC and stated that the audit would be thorough and fair.

3. Facility Tour

The team toured the entire complex from 9:00 a.m. to 12:30 p.m. The tour was divided into in three separate groups. The following persons accompanied the team on the tour and responded to the team's questions concerning the operations of the complex:

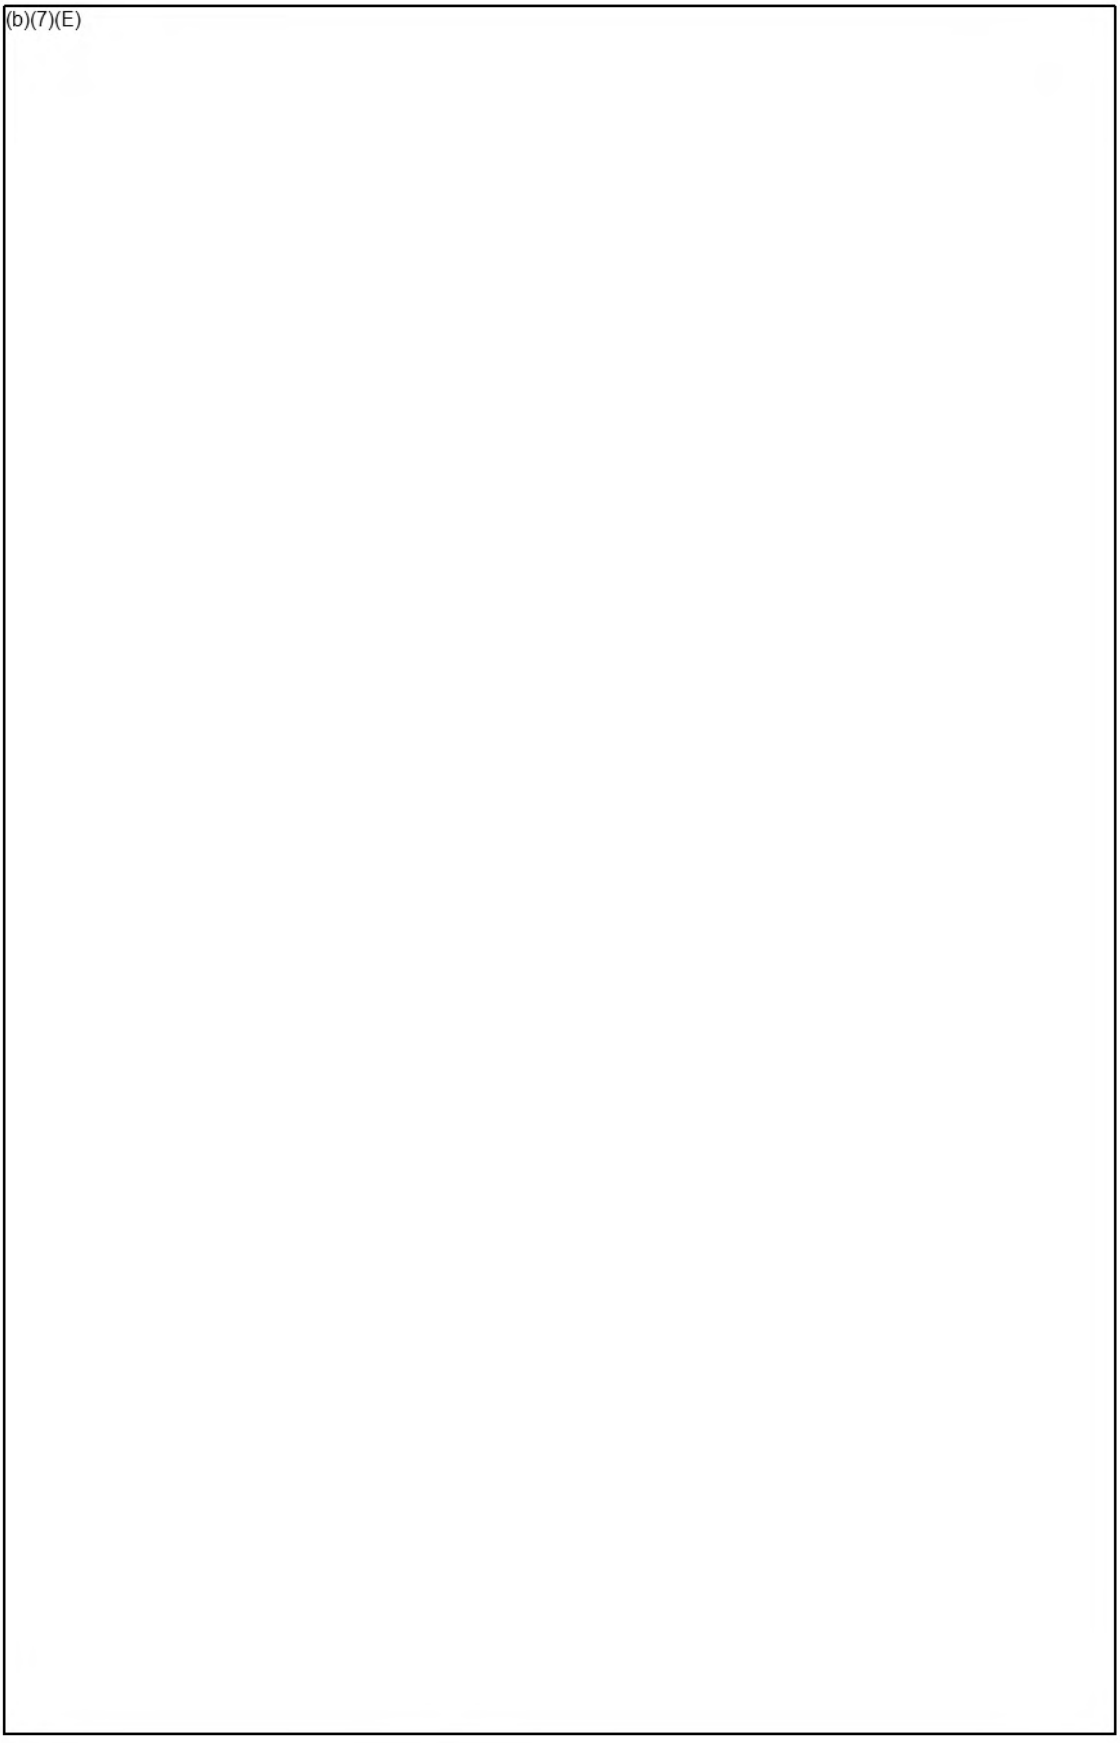
(b)(6); (b)(7)(C)

AMERICAN OVERSIGHT

(b)(6); (b)(7)(C)

Facility notices were posted throughout the facility.

4. Conditions of Confinement/Quality of Life



During the tour, the team evaluated the conditions of confinement at the facility. The following narrative description of the relevant programmatic services and functional areas summarizes the findings regarding the quality of life.

Security:

(b)(7)(E)

AMERICAN OVERSIGHT

(b)(7)(E)

AMERICAN OVERSIGHT

(b)(7)(E)

AMERICAN OVERSIGHT

(b)(7)(E)

AMERICAN OVERSIGHT

(b)(7)(E)

Environmental Conditions:

STICP's Maintenance Department, which is made up of a Facility Maintenance Manager, seven Maintenance Techs (skills in electrical, plumbing, carpentry, HVAC and general maintenance) and one accounting clerk, is responsible for the upkeep, construction and repairs of all facility equipment and structures. There are no detainee workers.

AMERICAN OVERSIGHT

Preventive maintenance schedules for the facility, to forestall structural problems, are maintained through a computerized system (developed by GEO) called the Facility Dude. As deficiencies are reported (by email, phone, verbally or electronically), work orders are prepared through Facility Dude and assigned to the appropriate craftsman who will then correct the deficiency pursuant to four priority designations: emergency (repaired immediately), high (repaired within two days), medium (repaired within seven days) or low (repaired within a reasonable time). Work orders are documented and tracked through Facility Dude. A member of the audit team was provided a demonstration of Facility Dude and was very impressed by its functionality. When maintenance jobs are beyond that which the facility's maintenance staff can address, it seeks assistance from private contractors. A system exists to monitor tools that are brought onto the grounds of the complex by private contractors.

STIPC's complex appears to be well maintained. Light, noise and airflow conditions have been tested by a qualified environmental expert and all fall within approved ranges. The facility is completely air-conditioned. The temperatures inside the complex during the time of the audit were very comfortable. Offender living areas have a sufficient number of windows providing them access to natural light. Furnishings throughout the facility, including bedding in the living areas, are in good condition and properly fire rated. The grounds of the complex, both inside and outside the perimeter, were in excellent condition.

The facility has one 500KW emergency generator, which is capable of providing the essential power needed at the complex during emergencies. The generator is inspected, and load tested weekly (45 minutes) and monthly (60 minutes). The generator is load bank tested annually. Preventive maintenance on the generator is performed quarterly by Clifford Powers. The generator was last serviced on 9-6-19. Servicing, load testing and inspecting were all documented.

The dayroom areas within the housing units have tables with attached benches for seating at each table. The dayroom area provides televisions, telephones, and four microwaves for the detainees. There is ample seating in the dayrooms to accommodate the detainees. There is a monitor that allows detainees to engage in video visitation. Detainees are allowed to check out computer tablets for up to two hours of use. Detainees can recheck a computer tablet for another two hours of use if one is available upon checking in the tablet. Recreation within the housing unit includes cards and games, such as UNO, checkers, chess, Connect4, Scrabble, SkipBo, Chinese checkers, dominos and monopoly.

The facility does not meet the standards (4-ALDF-4B-08 and 4-ALDF-4B-09) regarding ratios for showers, toilets, and washbasins. The audit team did not observe any waiting lines for the toilets, showers, or washbasins. The audit team did not receive any complaints from detainees with regard to difficulty in accessing showers, toilets or washbasins.

AMERICAN OVERSIGHT

The facility is tobacco-free. Absolutely no tobacco products are allowed on the grounds of the facility, thereby enhancing the overall environment and adding to the positive quality of life associated with a concern for detainee health and wellbeing.

Sanitation:

The facility has a detailed Housekeeping Services Plan, which it uses as a standard for maintaining its sanitation level. Detainees perform all of the cleaning in the living areas and hallways of the facility seven days a week under the supervision of members of staff. Detainees receive instruction and training with regard to the use of cleaning agents, equipment and sanitation expectations. The complex utilizes a Versa-Fill pre-diluted cleaning supply system that allows for a controlled, inventoried, and cost effective delivery of the supplies necessary for maintaining a clean and sanitary environment. The cleaning chemicals are diluted prior to distribution in plastic labeled containers from the chemical storage area on a weekly basis. Chemicals throughout the complex are securely stored. Inventories were checked and the system appears to be well managed. The supply system was adequately demonstrated for the audit team. Personal protective equipment is available for use. SDSs were present and readily available where all chemical and caustics were stored.

Shower areas and bathrooms were clean and free of odor, soap residue and mold or mildew. Living, common and administrative areas were clean. There was no accumulation of trash inside or outside of the facility. No areas of the facility had bad smells. The audit team did not observe any areas of the facility that were badly in need of paint. It was apparent during the tour of the facility that good sanitation practices are practiced. The most recent health inspection report was dated 8-22-19 with a finding of, "There is no deficiency/violation cited or noted." The audit team reviewed Weekly Fire and Safety Inspection forms. The audit team did not witness the presence or signs of insects or rodents. Detainees and members of staff take justifiable pride in their efforts to keep the facility clean.

Fire Safety:

The complex is protected from the danger of fire and smoke by the IFP-1000 fire alarm system (tested annually and last serviced on 9-17-19). Protection from fire and smoke is achieved through this system by smoke detectors, heat detectors, duct detectors, pull stations and horns/strobes. The fire alarm annunciator panel is located in Master Control, which was functioning at the time of the audit. A smoke detection panel is also present in Master Control. Additional suppression and fire safety equipment includes sprinklers (tested annually and last serviced on 9-17-19), 71 fire extinguishers (fully charged with current inspections) and eight fire hydrants (tested quarterly and last serviced 11-21-19). The kitchens utilize the Ansul hood wet chemical fire suppression systems (tested semi-annually and last serviced on 3-1-19).

AMERICAN OVERSIGHT

Fire drills are conducted quarterly and during the audit period were almost exclusively simulated. A member of the audit team was informed that in the future all fire drills would include evacuations. The most recent fire drill was carried out 11-28-19, which was documented. A member of the audit team reviewed numerous Fire Drill Reports, which are very detailed (19 questions of evaluation). Detainees who had participated in fire drills that included evacuations were able to describe the process. Exit signs and emergency lighting were operable. Evacuation plans were current, prominently displayed and appropriately approved. Weekly and monthly inspections are conducted and documented. The most recent annual fire alarm inspection was conducted on 9-17-19, which resulted in a finding of an inoperable duct detector. On 11-25-19, a Corrected Impairment form was filed verifying that the duct detector had been repaired. The most recent annual sprinkler system inspection was conducted on 9-17-19, which resulted in a finding of expired water gauges. On 10-18-19, a response to the finding was filed, indicating that the water gauges had been repaired. The most recent annual fire inspection was conducted by the State Fire Marshall on 3-19-19, wherein no deficiencies were noted. The Frio County Fire Department (five miles away) provides emergency fire response and service protection.

Food Service:

(b)(7)(E)

(b)(7)(E) The detainees receive medical clearances and are physically screened by medical prior to assignment in the kitchen. The facility provides its own food service and follows a five-week menu cycle, which is reviewed and approved by a licensed dietician. Menus are designed to provide approximately 3,200 calories per day. The cost per meal per offender ranges from .87 to .90 cents per meal. Special diets for medical and religious reasons were analyzed, approved and documented. At the time of the audit 37 medical meals and 11 religious meals were being prepared. All GEO food services employees are ServSafe certified. Detainees do not reside long enough at the facility to engage in the ServSafe program.

There is one kitchen in the facility, which is spacious and well appointed. The refrigerator, freezer and dry storage areas were clean, orderly and maintained at proper temperatures. A review of the temperature logs indicated that temperatures were checked on a regular basis. Food containers were stored off the floor and at appropriate distances from walls and ceilings. The food preparation areas were clean and orderly. The range guards were clean and free of grease. During the time of the audit, food temperatures on the serving line were checked. The food was found to be at appropriate temperatures. Food temperatures were documented. All members of the staff and offender population were properly attired, wore head coverings and observed appropriate sanitation practices.

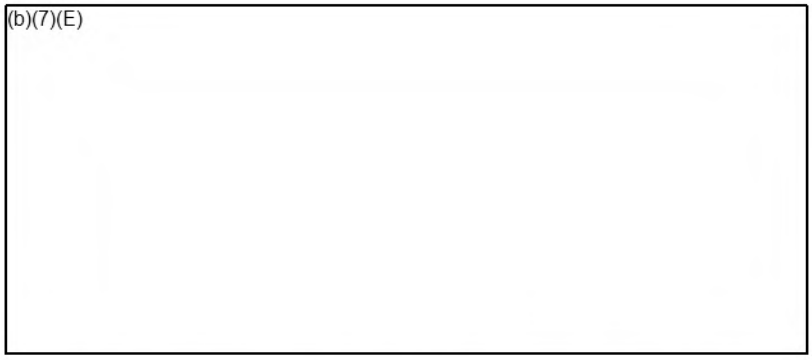
AMERICAN OVERSIGHT

A member of the audit team reviewed Opening and Closing Checklists, wherein daily detainee and staff health checks were documented.

Shadow boards, inventory logs, issue/return logs and identification chits are maintained with regard to the storage and use of kitchen tools and utensils. Tools and utensils are classified as "Restrictive" (shadowed in red) and "Non-Restrictive" (shadowed in black), when is use, restrictive tools are tethered. All the tools and utensils were securely stored in a locked cage. Tools and utensils are checked out through the use of chits and logs. Through specific inquiry, the audit team was able to verify the inventory and location of tools and utensils. Inventory of all tools and utensils are cleared at the beginning and end of every shift.

There is no detainee dining room. Detainees have their food delivered to their housing areas in insulated food trays. Breakfast is served at 5:00 a.m., lunch at 10:30 a.m. and dinner at 4:30 p.m. It takes members of staff approximately one hour to feed the detainees. Based upon the observation of a member of the audit team, the process of the delivery and serving of meals was performed professionally and efficiently. Tables with attached chairs are provided in spacious day rooms for dining. The detainees that the audit team observed eating appeared to feel free to talk and visit in a positive manner while eating their meals.

A number of detainees with whom the audit team spoke, complained about the food served at the facility. The experience of the audit team with regard to the detainee meals that were served during the time of the audit was not consistent with these complaints. Members of the audit team ate two separate meals during the audit and found them to be very good in both quality and quantity.



Medical Care:

Health care services at the South Texas ICE Processing Center (STIPC) are provided under contract with ICE Health Services Corps (IHSC). The ICE Health Service Corps has its own mission statement: "Protect, promote, and advance the health and safety of individuals in the custody of ICE by providing necessary health care through an integrated health care delivery system that is based on nationally-recognized correctional and detention health care standards."

The medical department appears well staffed with enough personnel to avoid mandatory overtime in order to be properly staffed. Staffing is as follows:

(b)(7)(E)

AMERICAN OVERSIGHT

All medical certifications and licenses were available for review and found to be current and compliant.

The space for medical services was designed for the original capacity. With the expanded population totaling 1,800 detainees and the additional services being provided, the medical unit is beginning to stretch at its seams.

Upon arrival, all detainees are informed about how to access health services and how to utilize the medical grievance system. This information is provided via a continuous play recording and in a written handbook, which all detainees are provided. Detainees are provided an initial pre-screening within two hours of their arrival. The more comprehensive initial intake screening is completed within 12 hours of their arrival. Screenings that identify any issue are referred for health appraisal, which is completed within two days. Routine arrivals without any identified medical issues are appraised or have their records reviewed within 14 days. All appraisals are reviewed and signed by a physician. Health information is provided by way of the intake video, pamphlets, signage, and oral instruction.

There is no infirmary and no medical housing at STIPC, but there are 16 medical observation rooms that provide for the temporary housing of detainees who require short-term observation. These rooms have toilets, washbasins, and showers and can accommodate one, two or four detainees at a time. During the audit there were nine patients in the medical observation unit. There is staff sight/sound coverage 24 hours a day, seven days a week by a registered nurse or higher.

Treatment rooms are located as follows: four in Behavioral Health, three in sick call clinic, four in the main clinic, one in the medical observation unit, two in Intake, and one in the restricted housing unit (also referred to as segregation).

Medical services are accessed by signing up in the housing unit between 4:45 a.m. and 5:15 a.m. These sheets are then collected and taken to the medical sick call area. Security staff from the GEO Group escort the detainees down in groups of up to 15 at a time. As detainees are seen on the same day the sick call is requested, beginning at 5:30 a.m., there is no need for sick call requests to be triaged. Any individual who needs to be referred to a physician or mid-level provider is seen that same day or the following day.

AMERICAN OVERSIGHT

Approximately 1,600 sick call visits are conducted each month.

There are no co-pays associated with any of the health care services. Emergency room equipment includes, but is not limited to, an EKG, oxygen, suction, an emergency response bag, and an AED. Emergencies are responded to with the emergency response bag and a wheelchair within the required four-minute response time.

Staff nurses from IHSC draw the lab samples, spin them, and then refrigerate them until they are deposited in the Lab Corps pick up box at the entry to the facility. Samples that require to be frozen or that are related to infectious diseases are processed at the state lab. Other lab samples are processed by Lab Corps. All results are received electronically the following day. Any results that have been red flagged due to abnormal results are called in to the medical staff at STIPC immediately, with electronic report to follow.

There are two full-time x-ray technicians who work the afternoon/evening shift from 1:00 p.m. until 11:30 p.m., covering seven days a week. Their only function is to get a digital chest x-ray on every incoming detainee for purposes of tuberculosis evaluation. Tuberculin skin testing is conducted on all positive chest x-rays only. Other requested x-rays are performed at the Frio Regional Hospital that is located across the street from the facility. All x-ray results are provided within a matter of a few hours.

There is one identified communicable disease and infection control nurse, who follows written protocol for infection control. There is an established TB surveillance program, which includes the dating of multi-use vials when they are opened and discarding them after 30 days. A log is maintained for positive labs results regarding TB, MRSA, chicken pox, and STDs. The biohazard waste is under contract with Trident Solutions. The waste is collected is the red hazard bags and sharps containers. When full, they are placed in storage in the medical unit until time for the transfer to the external storage area. The biohazard waste is picked up once a month. There is a written plan for the isolation of detainees with identified communicable diseases. There are four negative pressure rooms that are tested daily. These rooms also receive an annual ventilation inspection and service.

All facility staff and detainees are tested annually for TB. Facility staff are offered the hep B vaccine.

Chronic care clinics at STIPC include Asthma, HIV, hypertension/cardiac, seizures, pregnancy, TB, diabetes, and hyperlipemia. There are no in-house specialty clinics, and tele-health is not utilized for medical health services. Outside referrals are often scheduled the day after the referral is made, with the initial appointment scheduled for within one week. As a result, there were only 33 outstanding consults waiting to be seen and none waiting to be scheduled.

AMERICAN OVERSIGHT

Outside referrals are sent to one of the local hospitals, with the majority being sent to the Frio Regional Hospital. The medical need and availability of specialist determines where some consults are referred.

There are four AEDs, one each located in the medical trauma room, on in the CAPS (Criminal Alien Processing Services) area, one in Master Control, and the fourth located in room 104, which is sick call room within a multi-purpose area in the segregation unit. All medical staff are CPR certified. The GEO security staff receive annual CPR training.

An on-site pharmacy is staffed Monday through Friday, ten hours each day, with the pharmacists and technicians working over-lapped four-day weeks. The pharmacy maintains a bulk stock of common formulary medications. Current licensing was displayed. Medications are obtained from a formulary that is established between IHSC and McKesson. There is some night stock of available medications for "after hours" if needed. STAT orders are filled by Frio Regional Hospital, H.E.B. drugstore, or Walmart, respectively.

The pharmacy was clean and well organized. All medications were properly stored with narcotics being additionally secured. Expired/discontinued medications are gathered at the pharmacy until the collecting container is full, and then it is sent back to the central pharmacy for disposal.

The daily-issue controlled medications were properly secured behind the nurse's station, being in a medication safe that has two separate locking doors inside a locking cabinet in a room that is kept locked with restricted access. These medications are perpetually inventoried by two licensed health staff and are documented from entry into the facility through administration to the detainee or its destruction. There were no expired medications in use. Medications with restricted temperature ranges were found to be properly stored in a refrigerator designated for that purpose. Temperatures are checked and recorded daily. Open vials therein were dated and initialed upon opening.

Medications are delivered to the detainees in their housing units by nurses using a medication cart four times a day (9:00 a.m., 12:00 p.m., 4:00 p.m., 9:00 p.m.). Any prescribed narcotics are double locked on this cart. An electronic medication tracking system allows for cell-side recording of dispensing and compliance. Controlled medications are crushed prior to dispensing. Other medications are floated before ingesting. Security staff observes all intake of medications to ensure compliance. Any medication refusals are documented immediately cell-site into the electronic MARS system. Detainees can self-dispense medications such as antibiotics, anti-hypertensive, and Glucotrol.

Detainees are offered the opportunity to purchase some over-the-counter medications through commissary purchase.

AMERICAN OVERSIGHT

Available items are alcohol-free mouthwash, toothpaste, floss loops, generic Tylenol, Ibuprofen, Rolaids, hemorrhoid ointment, antibiotic ointment, cough drops, and multi-vitamin.

Inventories of the sharps and narcotics were observed being conducted. There was one question during the count that was very quickly resolved. (A recently removed insulin syringe not yet recorded). A count of prescribed medications was also observed with no concerns. All nurses conducting both counts were efficient and followed proper procedures.

Medical personnel visit the segregation unit daily at 5:00 a.m. Sick call is conducted during each round.

The facility is compliant with their alcohol/drug withdrawal guidelines, which include medical supervision.

All female detainees arriving at this facility are tested for pregnancy. No children or nursing infants are received here. Females who test positive for pregnancy are expedited by ICE for transfer or release. Until that time, they are referred immediately to a doctor for initial evaluation and the provision of vitamins and other prenatal care. A community obstetrics provider conducts an ultrasound and complete pelvic exam.

To achieve continuity of care on releasing or transferring detainees, those who are on HIV and/or TB treatment protocol are provided a 30-day supply of medications along with a referral to their country's medical system. All other chronic care conditions are provided a 14-day supply of medications. Releasing detainees are also given instruction on how to access their electronic medical records to ensure consistent care.

Internal and external peer reviews are conducted per policy and standard requirements. The multi-disciplinary team, which includes security staff, meets quarterly regarding infectious disease issues and trends. There was a recent 13-month active mumps occurrence with one possible active mumps case under observation. During the outbreak housing units were placed under quarantine status to prevent continued spreading of the disease.

An effective quality improvement committee is pro-active in identifying opportunities for improvement, developing corrective action plans, executing them and then observing the results. Yearly goals are established and monitored through program review. The medical department administration is responsible for receiving, investigating, and responding to all medical grievances.

Medical restraints are not used at STIPC. Neither students, interns, or detainees are used in the provision of health care, nor are detainees used in the provision of familial duties.

AMERICAN OVERSIGHT

It is the responsibility of ICE personnel, and not the facility GEO or IHSC staff, to notify the designated individuals regarding the serious illness, injury or death of any detainee. Informed consents are used as required, as are releases of information.

The medical records are in electronic form and are easily maintained separately from the detainee's institutional record. All non-emergent health-care contacts are conducted in confidential settings. The intake screening includes identifying potential sexual perpetrators and victims. This information is used when determining housing assignments.

Dental

There is a small, one-chair dental unit that is staffed with one full-time and one part-time dentists and two full-time dental assistants. There is no hygienist, but a dentist will do cleanings for any detainee after one year of being in the facility. A dental screening is conducted as part of the medical intake screening with full dental exams being performed within 14 days, well within the 30-day standard requirement. The dental unit does not have any waiting list for services as all patients are seen very quickly. There is no co-pay for any dental services.

The dental unit operates from 7:00 a.m. through 5:30 p.m. The very experienced dentist(s) perform extractions, root canals, fillings, and cleanings. Targeted and panoramic digital x-rays are completed on-site. Only the most extreme cases would be referred to an off-site oral surgeon for treatment. Due to the short-term retention of detainees at STIPC, the time constraints prevent initiating any dentures or partials. Detainees who arrive with dentures or partials that may need adjustment or repair may present their needs at dental sick call.

Dental instruments are sterilized and packaged after each use. A review of the dental instruments and their inventory was conducted with no discrepancies.

The members of the dental staff were delightful to engage with. Their small space was very clean and well organized, making use of every inch of space. Their positive demeanors reflected well on their working environment.

Mental Health

Mental health services are provided by (b)(7)(E) (b)(7)(E) Staff schedules overlap to provide services from 7:00 a.m. through 5:30 p.m. seven days a week. Individual treatment plans, to include crisis intervention, counseling, and medications, are developed for each patient. Telehealth is available and utilized. Weekly visits by the mental health personnel are made to the segregation unit, with additional visits being made as needed.

AMERICAN OVERSIGHT

Comprehensive suicide prevention/intervention training is in place with annual training provided to staff. When appropriate, detainees are provided safety garments that help to keep the detainee safe. During the audit there were two detainees on "constant watch", one who was dressed in the 'suicide smock'. The smock did not lend toward any embarrassment of the wearer.

Any detainee who is referred for mental health treatment does receive a comprehensive evaluation by a licensed mental health professional. The evaluation is inclusive of past and present mental health screenings, appraisals, diagnostic and assessment tests, and behavior observations. This intensive evaluation is completed within 14 days of the referral request date and is used to develop an overall treatment and/or management plan. Any detainee who exhibits needs for psychiatric treatment that exceed the mental health care that the facility can provide is referred to a more appropriate facility.

Medical Outcome Measures

After reviewing the information provided and following up with the Commander of IHSC, there remains little doubt that the best possible practices are in place to prevent or control any communicable disease breakouts, to provide appropriate medical treatment and dietary requirements for those with chronic conditions, and for all health care to be provided by properly trained and licensed professional staff.

All incoming detainees receive a chest x-ray to determine any existing of tuberculosis, as oral histories are not necessarily reliable. Over 3,000 chest x-rays were taken, and of those, there were 56 (4C(1)) with positive results who required a follow-up tuberculin skin test. All those are reported as conversions (4C(3)) as previous status was unknown. Due to the short length of time that the majority of detainees remain at STIPC, only one (4C(4)) of the 131 (4C(4b)) was able to complete the prophylaxis treatment. Any detainee who transferred or was released was provided an appropriate amount of medication to sustain their treatment until they were able to be in contact with their next provider.

There were 11 suicide attempts during the previous 12 months (4C(9)). There were no deaths as a result of these attempts during this same time period.

Medically prescribed diets are 100% compliant because all meals are individually prepared and delivered to the housing units with diet meals identified by recipient.

Section 4C(33) indicates three pharmacy dispensing errors in the past 12 months. These were due to name errors and were corrected prior to any patient receiving the incorrect medication.

Nursing medication errors (4C(34)) is reported as 55. A recent transition to an electronic medication system (sMARt) was both contributory to these errors and beneficial in the timely correction of other errors.

AMERICAN OVERSIGHT

There were: nine medications not verified in the sMARt system, leading to missed doses; seven missed doses due strictly to human errors; 11 incorrect doses; three wrong patients; six pharmacy errors; five untimely medications/immunization; five wrong medications; with other errors being such things as incorrect discontinuations, excessive insulin in a specified time frame; transcription error; lack of documentation; providing antibiotics as keep-on-person instead of the prescribed nurse-administered. It is expected that with the current level of familiarity on the sMARt medication system that these reportable errors will show a significant reduction during the upcoming accreditation cycles.

Regarding PREA matters, the facility reported a total of five alleged sexual misconduct between staff and detainees in the past 12 months, with one being a member of the medical staff. At the time of reporting this information there were no substantiated allegations. The facility also reported, and confirmed, that there were no identified sexual predators who were detained at the STIPC.

Detainee grievances regarding access to health care totaled 100 with seven found in favor of the detainee(s); there were also 64 grievances related to the quality of health care with five being found in favor of the detainee(s).

Three of the favorable grievances were concerning the length of time detainees were waiting for tooth extractions (from 19 to 29 days in September and October 2019).
A segregation detainee requested medical services outside of established sick call rounds. The detainee was referred to the procedures outlined in the detainee handbook and was seen the following day.

A complaint that keep-on-person medications were not provided was favorable. After an investigation the pharmacy provided the medication.

Approved contacts were not received within one month. The grievance investigation noted an expected delivery time of 2-3 weeks following the filing of the grievance.

A lactose-free diet was requested via the grievance procedure. Upon evaluation by a provider on the date of receipt of the grievance, the matter was resolved.

Daily wound care had been ordered. A grievance was filed when this did not occur. The nursing schedule was updated to include daily wound care as ordered.

Lab supplies were not available for a scheduled lab appointment. The supplies were obtained, and the detainee was rescheduled.

Upon returning to STIPC from an outside medical encounter, the detainee was not seen by the medical provider. An appointment was subsequently scheduled.

AMERICAN OVERSIGHT

One detainee encountered a mental health provider in the hallway and wanted services. The detainee was scheduled with a one-on-one appointment.

Another detainee wanted a sooner appointment with mental health to discuss his inability to sleep and general anxiety related to his immigration stats. The detainee was evaluated upon receipt of the grievance (the same day).

A female detainee with a history of sexual assault (victim) stated that she was mistreated by an offsite OB/GYN physician, and that he caused her psychological trauma. She was referred to mental health and the incident was reported to ICE and an investigation was completed. The OB/GYN was terminated.

Grievant stated that he did not receive his prescribed medications during pill pass. The matter was discussed with nursing staff who were advised to exhaust attempts to administer prescribed medications.

Due to an error identified in the electronic health record, a detainee did not receive his prescribed medications. The error was corrected, and the medication was provided.

A sick call encounter resulted in a referral to a provider. A grievance was filed when the detainee was not seen. An appointment was subsequently scheduled to see the provider in a timely fashion.

Recreation:

(b)(7)(E) Recreation Specialists, who have all completed an eight-hour course with regard to recreation, oversee the Recreation Department. Detainees do not assist the Specialists. The facility provides ample space for recreation. Outdoor recreation yards adjoin all of the dormitories, which have open grates at the top allowing sunlight and fresh air. Detainees are able to access the recreation yards seven days a week from 7:00 a.m. until dusk. During the tour of the facility, the audit team observed numerous detainees playing basketball in the recreation yards. The facility also has an impressive outside 22,000 square foot recreation yard with a full size soccer field (artificial turf), shade pavilions, exercise stations, and picnic tables. The large outside recreation yard is available to a housing unit only once every three weeks on a rotating basis. Some detainees complained that they received use of the soccer field only once every four weeks. Basketball, handball, soccer, body weight exercises, running and walking are the primary physical activities engaged in by detainees. Tournaments are periodically held in basketball and soccer. The facility also has three multi-purpose rooms that are utilized for activities such as yoga, bingo, and chess and checkers tournaments.

AMERICAN OVERSIGHT

Recreation activities are also available in the housing unit dayrooms. Recreation within the housing unit includes cards and games such as UNO, checkers, chess, Connect4, Scrabble, SkipBo, Chinese checkers, dominos and monopoly. Each housing unit has two televisions.

Religious Programming:

STIPC provides a full time Chaplain to serve the spiritual and pastoral needs of its detainees. The Chaplain supervises and coordinates the various religious activities, self-help programs, and services to meet the basic belief systems of each religious group within the facility. At the time of the audit, services were being provided for the following belief systems: Protestant, Catholic (Roman and Eastern Rite), Jewish, Hindu, Buddhist, Sikh and Muslim. Opportunities for creative endeavors are also provided, including the use of musical instruments. The facility also provides opportunities for detainee-led bible study and prayer groups within the housing units. Each detainee is allowed to practice their religious beliefs as long as they do not compromise the good order and security of the facility. All religious services and programming take place in three multipurpose rooms. Offenders have access to a small religious library that includes books and audio visual aids.

The Chaplain endeavors to maintain a committed group of volunteers who assist in providing the religious services and programs in which detainees are engaged. Currently, there are 17 volunteers actively engaged in serving the detainees. Volunteers receive orientation prior to being allowed to minister to detainees and annual training thereafter. The training was documented.

When there has been a death or serious illness in a detainee's family or close social circle, the Chaplain provides notification and support for the detainee upon request. The Chaplain provides spiritual counseling for the detainee population upon request.

Offender Work Programs:

Detainees may volunteer to work within the facility by submitting a completed Volunteer Work Program Application, which outlines in great detail the screening process, rules and compensation related to the Work Program. Before being assigned to a job within the facility, a detainee must receive a medical clearance and pass a background review.

The Detainee Jobs List includes: Hallway Cleaner, Tray Pusher, Kitchen, Laundry, Barber Shop, Intake Cleaners, Hygiene, Paint Crew and Shower Crew. Level three detainees are eligible only for cleaning jobs in the living areas and hallways. Detainees are paid $3.00 per day for all work assignments, with the exception of dorm porters who are paid only a $1.00 day. At the time of the audit, 32.10% of the detainees housed at the facility were assigned to jobs.

AMERICAN OVERSIGHT

During the tours of the facility, the audit team observed numerous detainees actively engaged in constructive work.

Academic and Vocational Education:

Due to the length of stay of the detainees, there are no academic or vocational education programs at the facility.

Social Services:

Detainees receive a free three-minute phone call at intake, thereby allowing them to contact family within seventy-two hours of their arrival at the facility. Following the initial phone call, detainees can make collect phone calls or use purchased phone minutes to make phone calls. Each living unit has eight to ten telephones (Talton Communications) that detainees are free to use every day from 8:00 a.m. to lights out. The housing units also have a monitor that allows the detainee to engage in video visitation with members of their family. All phone calls, except those with attorneys, are monitored and recorded.

Mail is processed in the central mailroom Monday thru Friday and delivered to the detainee the same day it is received. The facility averages approximately 50 pieces of incoming detainee mail daily. Incoming mail is passed through a metal detector, opened and searched. Detainees seal outgoing mail. For mail to be treated as special correspondence or legal mail, the name, title and office of the sender or the recipient must be clearly identified on the envelope to provide clear indication the mail is being received from or being sent to an attorney or other legal representative. Indigent detainees (less than $15) may receive five stamps a week.

Social service information regarding such things as suicide prevention, sexual abuse prevention, sexual assault prevention and immigration is made available to detainees through housing unit bulletin boards and other means. Housing unit bulletin boards also contain information with regard to the building schedule, visitation, mail, recreation schedule, religious services schedule and sick call.

Haircuts are available each day from 6:30 a.m. to 6:30 p.m. Individual dorms are scheduled for sessions providing time slots for 15 detainees. The barbershop engaged in proper tool control. A member of the audit team recommended that partial containers of barber chemicals be inventoried in a more precise manner. The facility was receptive to this recommendation.

Visitation:

STIPC has a non-contact visitation area (containing 15 visitation booths) that provides a comfortable atmosphere for detainees to maintain ties with members of their family and the community. Visitors have access to a waiting room, lockers and restrooms.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001239

While there is no designated children's area, there is a children's table in a corner of the visitor's side of the visitation area. There are three vending machines in the visitation area for use by visitors. Detainees are allowed visitation with family and friends who are on their approved visitation list, as determined by ICE. Before being allowed into the visitation area, visitors must pass through a metal detector. Visiting hours are from 6:30 a.m. to 10:00 p.m., seven days a week. Visits can last for two hours, unless the Facility Administrator has approved additional time. Detainees can visit with two adults at time and as many children as can be adequately handled. One officer is posted on the detainee side of the visitation area at all times. There are two cameras located in the visitation area. During each day of the audit, the audit team observed numerous adults and children in the visitation waiting room. The officers posted in the front entrance area dealt with visitors in a very respectful, helpful and professional manner. Video visitation is available in the living areas through Talton Communications.

Library Services:

(b)(7)(E) officers are assigned to oversee library services at the facility. On Tuesday, Wednesday and Thursday each week, the assigned officers deliver leisure library books by carts to designated housing units. Detainees are able to check out two books per week for the duration of a week. Other than books on the cart, a detainee may request a book from the library. The library contains about 1,500 books. Other than English, there are books written in Vietnamese, Chinese, Russian, Spanish and Turkish. The library does not have any large print books. Detainees are able to access newspapers and magazines through the use of computer tablets that are available in the living units. An inter-library loan service is provided through the Pearsall Public Library.

In addition to the leisure library, STIPC also has a law library, which is available to detainees upon request (spots assigned pursuant to detainee levels one, two and three) from 8:00 a.m. to 6:00 p.m. on weekdays and 8:00 a.m. to 2:00 p.m. on weekends. Detainees are able to use the law library twice a week for one-hour sessions, with the option of requesting additional time. Detainees have access to various hard volumes of Law Reporters and legal research materials. To the extent that the hard volumes provided in the library are insufficient to address their legal issue needs, detainees have access to LexisNexis, a computer software research tool. There are nine computer terminals in the law library. A word processing computer, copying of documents and notary services are available through the library staff. American Gateway, a paralegal service, is available Tuesday, Wednesday and Thursday from 10:00 a.m. to12:00 p.m.

Laundry:

(b)(7)(E)

(b)(7)(E) staff STIPC's laundry.

AMERICAN OVERSIGHT

The laundry is equipped with four commercial grade washing machines (125 lb.) and four commercial grade dryers (125 lb.). At the time of the audit, all of the washing machines and dryers were operational. The laundry operates four shifts, seven days a week. Upon arriving at STIPC, each detainee receives a standard clothing issue comprising of three sets of uniform, socks, underwear, and shirts, one towel, one wash cloth, two sheets, one blanket, one pair of shoes, and a laundry bag. Linen exchange is provided once a week on a one to one exchange. Blankets are exchanged monthly for laundering. Uniforms are also exchanged/reissued as needed. Medical laundry is submitted in a degradable bag and washed in a separate washing machine. Laundry carts are routinely sanitized. Personal property that is stored in the property room is laundered prior to storage. The personal property area contains one washer and two dryers.

The laundry area was well maintained and very clean. Lint traps are cleaned at the conclusion of all four shifts. Bleach, detergent and other chemicals were securely locked away. Inventories were appropriately accounted for and maintained. All laundry chemicals are dispensed directly to the machines by an automated dispensing system. Issue/return logs and inventory logs were present and appropriately maintained. Through specific inquiry, the audit team was able to verify the inventory and location of tools. Inventory of all tools are cleared at the end of every shift.

F. Examination of Records

Following the facility tour, the team proceeded to the conference room to review the accreditation files and evaluate compliance levels of the policies and procedures. The facility has zero notices of non-compliance with local, state, or federal laws or regulations.

1. Litigation

   Over the last three years, the unit has had no class action lawsuits or adverse judgments.

2. Significant Incidents/Outcome Measures

   The Significant Incident Summary statistics did not indicate any problem areas at the facility.

   Non-medically related Outcome Measures statistics were reasonable for the size and population of this facility and appeared to be appropriate. Medically related Outcome Measures Statistics are discussed in the Medical Care section of the report.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001241

3. Departmental Visits

Team members revisited the following departments to review conditions relating to departmental policy and operations:

(b)(7)(E)

4. Shifts

a. Day Shift – 5:45 a.m. to 2:15 p.m.

The audit team was present at the facility during the day shift from 8:10 a.m. to 2:15 p.m.

The team toured the facility and spoke to members of staff and detainees. Members of the staff were responsive and knowledgeable of their job duties. The team observed detainees working jobs, attending court, socializing and recreating. Detainees, with whom the audit team communicated, were open about sharing their observations of and experiences at the facility. There was great order and respect exhibited by the detainees. A detainee meal was eaten. The audit team reviewed standards folders.

AMERICAN OVERSIGHT

During the second day of the audit, areas were revisited, another detainee meal was eaten, a count was observed and further interviews with members of staff and detainees were conducted. The audit team continued to review standards folders.

b. Evening Shift – 1:45 p.m. to 10:15 p.m.

The audit team was present at the facility during the evening shift from 2:15 p.m. to 7:00 p.m.

The audit team continued to review files. The audit team observed in-briefing and out-briefing, where the topics covered were doctor's appointments, EMS response, appropriate length of lunches, break areas, counts, visitation procedures, proper attire and post orders. Further interviews with members of staff and detainees were conducted.

b. Night Shift – 9:45 p.m. to 6:15 a.m.

The audit team was present at the facility during the night shift from 9:45 p.m. to 10:45 p.m. A member of the audit team attended in-briefing and visited with members of the oncoming members of the security staff. A member of the audit team observed shift change in Master Control, which was carried out professionally and efficiently.

5. Status of Previously Non-compliant Standards/Plans of Action

The following standards that were previously determined to be non-compliant, remain non-compliant:

Standard #4-ALDF-4B-08
Standard #4-ALDF-4B-09
Standard #4-ALDF-5C-03

G. Interviews

During the course of the audit, team members met with both staff and detainees to verify observations and/or to clarify questions concerning facility operations.

1. Detainee Interviews

During the audit period, the audit team talked with approximately 50 detainees. The detainees were overwhelming positive about the staff and environment at the facility. All of the detainees spoken to stated that they felt safe at the facility. Detainees stated that for the most part, members of the staff were responsive to their problems and exhibited respect.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001243

Some detainees complained about members of ICE staff and their lack of responsiveness to their questions and providing information about the progress of their cases. Members of the facility administration stated that members of ICE staff make weekly visits to each housing unit. Complaints were sporadic and there were no persistent complaints regarding the basic services of medical care, mail, religion, safety or visitation. The detainee population appeared to be well aware of whom the facility staff members were, and members of staff were responsive to detainee inquiries during the tours.

2. Staff Interviews

The audit team spoke to or interviewed a significant number of members of the staff. The audit team was impressed with the number of long-term employees. The audit team found members of staff to be very cooperative and responsive with regard to requests for additional documentation and to recommendations offered by the audit team. The audit team was impressed by the passion displayed by members of staff with regard to their jobs. It was clear that members of staff were very knowledgeable about their job duties and were able to articulate those duties clearly. There was a real camaraderie evidenced among members the staff. Members of the staff expressed no complaints with regard to members of management.

H. Exit Discussion

The exit interview was held in the multi-purpose area with Facility Administrator Castro and 44 members of staff in attendance. The exit interview was held at 11:30 a.m., to ensure timely arrival at the airport.

The following persons were also in attendance:

Central Region Director Contract Compliance (b)(6); (b)(7)(C)
Central Region Director of Operations (b)(6); (b)(7)(C)

The chairperson explained the procedures that would follow the audit. The team discussed the compliance levels of the mandatory and non-mandatory standards and reviewed their individual findings with the group.

The chairperson expressed appreciation for the cooperation of everyone concerned and congratulated the facility team for the progress made and encouraged them to continue to strive toward even further professionalism within the correctional field.

December 9 - 11, 2019

Visiting Committee Findings

Non-Mandatory Standards

Non-Compliance

Standard #4-ALDF-4B-08

INMATES HAVE ACCESS TO TOILETS, AND WASHBASINS WITH TEMPERATURE CONTROLLED HOT AND COLD RUNNING WATER 24 HOURS PER DAY AND ARE ABLE TO USE TOILET FACILITIES WITHOUT STAFF ASSISTANCE WHEN THEY ARE CONFINED IN THEIR CELLS/SLEEPING AREAS. TOILETS ARE PROVIDED AT A MINIMUM RATIO OF ONE FOR EVERY 12 INMATES IN MALE FACILITIES AND ONE FOR EVERY EIGHT INMATES IN FEMALE FACILITIES AND ONE WASHBASIN FOR EVERY 12 INMATES UNLESS NATIONAL OR STATE BUILDING OR HEALTH CODES SPECIFY A DIFFERENT RATIO. URINALS MAY BE SUBSTITUTED FOR UP TO ONE-HALF OF THE TOILETS IN MALE FACILITIES. ALL HOUSING UNITS WITH THREE OR MORE INMATES HAVE A MINIMUM OF TWO TOILETS.

FINDINGS:

South Texas ICE Processing Center does not meet the required ratio of toilets and washbasins to detainees.

AGENCY RESPONSE:

Waiver Request

Detainees housed at the South Texas ICE Processing Center have access to toilets and washbasins with temperature controlled hot and cold running water twenty-four (24) hours per day and are able to use toilet facilities without staff assistance when they are confined to their sleeping areas. Based on the original structural design of the housing units it is not structurally or financially feasible to modify the plumbing fixtures. There has not been any complaints or grievances from the detainee population regarding toilet and washbasin access.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001246

The table below is a summary of toilets and washbasins with ratio comparison to total bed capacity:

Area/Dorm	Number of Beds	Number of Toilets	Ratio Toilet: Detainee	Number of Washbasins	Ratio Washbasin: Detainee
FA	100	5	20:1	4	25:1
FB	100	6	17:1	4	25:1

DQ	64	3	21:1	3	21:1
AA	48	2	24:1	2	24:1
AB	16	1	16	2	8:1

AUDITOR'S RESPONSE:

The audit team concurs with STIPC's request for a waiver. The audit team agrees with STIPC that based on the original structural design of the housing units, it is not structurally or financially feasible to modify the plumbing fixtures of the facility. Moreover, the audit team concludes that non-compliance with this standard does not result in the detainees' quality of life being unreasonably compromised, as evidenced by the lack of complaints or grievances from the detainee population regarding toilet and washbasin access.

Standard #4-ALDF-4B-09

INMATES HAVE ACCESS TO OPERABLE SHOWERS WITH TEMPERATURE-CONTROLLED HOT AND COLD RUNNING WATER, AT A MINIMUM RATIO OF ONE SHOWER FOR EVERY TWELVE INMATES. WATER FOR SHOWERS IS THERMOSTATICALLY CONTROLLED TO TEMPERATURES RANGING FROM 100 DEGREES FAHRENHEIT TO 120 DEGREES FAHRENHEIT TO ENSURE THE SAFETY OF INMATES AND TO PROMOTE HYGIENIC PRACTICES.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001247

THESE RATIOS AND TEMPERATURES SHALL APPLY UNLESS NATIONAL OR STATE BUILDING OR HEALTH CODES SPECIFY A DIFFERENT RATIO.

FINDINGS:

South Texas ICE Processing Center does not meet the required ratio of showers to detainees.

AGENCY RESPONSE:

Waiver Request

Detainees housed at the South Texas ICE Processing Center have access dormitory showers between 06:00 hours until call for "lights out" around 22:30 hours. Detainees returning from a work assignment are afforded the opportunity to shower if they arrive after the call has been made. Based on the original structural design of the housing units it is not structurally or financially feasible to modify the plumbing fixtures. There has not been any complaints or grievances from the detainee population regarding access to showers.

The table below is a summary of the number of showers in each dormitory and the ratio of showers to maximum bed capacity.

Area/Dorm	Number of Beds	Number of Showers	Ratio Shower: Detainee
FA	100	5	20:1
FB	100	5	20:1

AMERICAN OVERSIGHT

AB	16	1	16:1

AUDITOR'S RESPONSE:

The audit team concurs with STIPC's request for a waiver. The audit team agrees with STIPC that based on the original structural design of the housing units, it is not structurally or financially feasible to modify the plumbing fixtures of the facility. Moreover, the audit team concludes that non-compliance with this standard does not result in the detainees' quality of life being unreasonably compromised, as evidenced by the lack of complaints or grievances from the detainee population regarding shower access.

Standard #4-ALDF-5C-03

BOTH OUTDOOR AND COVERED/ENCLOSED EXERCISE AREAS FOR GENERAL POPULATION INMATES ARE PROVIDED IN SUFFICIENT NUMBER TO ENSURE THAT EACH INMATE IS OFFERED AT LEAST ONE HOUR OF ACCESS DAILY. USE OF OUTDOOR AREAS IS PREFERRED BUT COVERED/ENCLOSED AREAS MUST BE AVAILABLE FOR USE IN INCLEMENT WEATHER. COVERED/ENCLOSED AREAS CAN BE DESIGNED FOR MULTIPLE USES AS LONG AS THE DESIGN AND FURNISHINGS DO NOT INTERFERE WITH SCHEDULED EXERCISE ACTIVITIES. THE MINIMUM SPACE REQUIREMENTS FOR EXERCISE AREAS ARE AS FOLLOWS:

- OUTDOOR EXERCISE AREAS IN FACILITIES WHERE 100 OR MORE INMATES UTILIZE ONE RECREATION AREA – 15 SQUARE FEET PER INMATE FOR THE MAXIMUM NUMBER OF INMATES EXPECTED TO USE THE SPACE AT ONE TIME, BUT NOT LESS THAN 1,500 SQUARE FEET OF UNENCUMBERED SPACE
- OUTDOOR EXERCISE AREAS IN FACILITIES WHERE LESS THAN 100 INMATES HAVE UNLIMITED ACCESS TO AN INDIVIDUAL RECREATION AREA – 15 SQUARE FEET PER INMATE FOR THE MAXIMUM NUMBER OF INMATES EXPECTED TO USE THE SPACE AT ONE TIME, BUT NOT LESS THAN 750 SQUARE FEET OF UNENCUMBERED SPACE
- COVERED/ENCLOSED EXERCISE AREAS IN FACILITIES WHERE 100 OR MORE INMATES UTILIZE ONE RECREATION AREA HAVE 15 SQUARE FEET PER INMATE FOR THE MAXIMUM NUMBER OF INMATES EXPECTED TO USE THE SPACE AT ONE TIME, WITH A MINIMUM CEILING HEIGHT OF 18 FEET, BUT NOT LESS THAN 1,000 SQUARE FEET OF UNENCUMBERED SPACE
- COVERED/ENCLOSED EXERCISE AREAS IN FACILITIES WHERE LESS THAN 100 INMATES UTILIZE ONE RECREATION AREA HAVE 15 SQUARE FEET PER INMATE FOR THE MAXIMUM NUMBER OF INMATES EXPECTED TO USE THE SPACE AT ONE TIME, WITH A MINIMUM CEILING HEIGHT OF 18 FEET, BUT NOT LESS THAN 500 SQUARE FEET OF UNENCUMBERED SPACE.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001249

FINDINGS:

South Texas ICE Processing Center's outdoor recreation areas (unit recreation yards) do not provide the square footage requirement by the standard. South Texas ICE Processing Center does not have an indoor recreation area.

AGENCY RESPONSE:

Waiver Request

Recreation yards are adjoining the dormitory with open and easy access to all detainees from the hours of 08:00 throughout the day until 18:00 hours when the daylight has dissipated. The exercise yard is available to resident detainees seven (7) days a week. At any given time, there will be no more than 10% to 15% of a dorm's residents on the yard. Based on the original structural design of the housing units it is not structurally or financially feasible to modify the recreation space. There has not been any complaints or grievances from the detainee population regarding recreation area size.

Based in the finding presented above it is requested that a waiver for a plan of action be granted to South Texas ICE Processing Center.

AUDITOR'S RESPONSE:

The audit team concurs with STIPC's request for a waiver. The audit team agrees with STIPC that based on the original structural design of the housing units, it is not structurally or financially feasible to modify the recreation space of the facility. Moreover, the audit team concludes that non-compliance with this standard does not result in the detainees' quality of life being unreasonably compromised, as evidenced by the lack of complaints or grievances from the detainee population regarding recreation area size or lack of and indoor recreation area.

Visiting Committee Findings

Non-Mandatory Standards

Not Applicable

Standard #4-ALDF-2A-36

INMATES PARTICIPATING IN WORK OR EDUCATIONAL RELEASE PROGRAMS ARE SEPARATED FROM INMATES IN THE GENERAL POPULATION.

FINDINGS:

Since the stay of detainees being housed at South Texas ICE Processing Center is of short duration, there is no work or educational release program.

Standard #4-ALDF-2A-38

IF YOUTHFUL OFFENDERS ARE HOUSED IN THE FACILITY, THEY ARE HOUSED IN A SPECIALIZED UNIT FOR YOUTHFUL OFFENDERS EXCEPT WHEN:

- VIOLENT, PREDATORY YOUTHFUL OFFENDER POSES AN UNDUE RISK OF HARM TO OTHERS WITHIN THE SPECIALIZED UNIT, OR
- A QUALIFIED MEDICAL OR MENTAL-HEALTH SPECIALIST DOCUMENTS THAT THE YOUTHFUL OFFENDER WOULD BENEFIT FROM PLACEMENT OUTSIDE THE UNIT

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001251

A WRITTEN STATEMENT IS PREPARED DESCRIBING THE SPECIFIC REASONS FOR HOUSING A YOUTHFUL OFFENDER OUTSIDE THE SPECIALIZED UNIT AND A CASE-MANAGEMENT PLAN SPECIFYING WHAT BEHAVIORS NEED TO BE MODIFIED AND HOW THE YOUTHFUL OFFENDER MAY RETURN TO THE UNIT. THE STATEMENT OF REASONS AND CASE-MANAGEMENT PLAN MUST BE APPROVED BY THE FACILITY ADMINISTRATOR OR HIS/HER DESIGNEE. CASES ARE REVIEWED AT LEAST QUARTERLY BY THE CASE MANAGER, THE ADMINISTRATOR OR HIS OR HER DESIGNEE, AND THE YOUTHFUL OFFENDER TO DETERMINE WHETHER A YOUTHFUL OFFENDER SHOULD BE RETURNED TO THE SPECIALIZED UNIT.

FINDINGS:

South Texas ICE Processing Center does not youthful offenders.

Standard #4-ALDF-2A-39

DIRECT SUPERVISION IS EMPLOYED IN THE SPECIALIZED UNIT TO ENSURE THE SAFETY AND SECURITY OF YOUTHFUL OFFENDERS.

FINDINGS:

South Texas ICE Processing Center does not youthful offenders.

Standard #4-ALDF-2A-40

CLASSIFICATION PLANS FOR YOUTHFUL OFFENDERS DETERMINE LEVEL OF RISK AND PROGRAM NEEDS DEVELOPMENTALLY APPROPRIATE FOR ADOLESCENTS. CLASSIFICATION PLANS INCLUDE CONSIDERATION OF PHYSICAL, MENTAL, SOCIAL, AND EDUCATIONAL MATURITY OF THE YOUTHFUL OFFENDER.

FINDINGS:

South Texas ICE Processing Center does not youthful offenders.

Standard #4-ALDF-2A-41

ADEQUATE PROGRAM SPACE IS PROVIDED TO MEET THE PHYSICAL, SOCIAL, AND EMOTIONAL NEEDS OF YOUTHFUL OFFENDERS AND ALLOWS FOR THEIR PERSONAL INTERACTIONS AND GROUP ORIENTED ACTIVITIES.

FINDINGS:

South Texas ICE Processing Center does not youthful offenders.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001252

Standard #4-ALDF-2A-42

YOUTHFUL OFFENDERS IN THE SPECIALIZED UNIT FOR YOUTHFUL INMATES HAVE NO MORE THAN INCIDENTAL SIGHT OR SOUND CONTACT WITH ADULT INMATES FROM OUTSIDE THE UNIT IN LIVING, PROGRAM, DINING, OR OTHER COMMON AREAS OF THE FACILITY. ANY OTHER SIGHT OR SOUND CONTACT IS MINIMIZED, BRIEF, AND IN CONFORMANCE WITH APPLICABLE LEGAL REQUIREMENTS.

FINDINGS:

South Texas ICE Processing Center does not youthful offenders.

Standard #4-ALDF-2A-43

PROGRAM PERSONNEL WHO WORK WITH YOUTHFUL OFFENDERS ARE TRAINED IN THE DEVELOPMENTAL, SAFETY, AND OTHER SPECIFIC NEEDS OF YOUTHFUL OFFENDERS. WRITTEN JOB DESCRIPTIONS AND QUALIFICATIONS REQUIRE TRAINING FOR STAFF WHO ARE RESPONSIBLE FOR PROGRAMMING OF YOUTHFUL OFFENDERS IN THE SPECIALIZED UNIT BEFORE BEING ASSIGNED TO WORK WITH YOUTHFUL OFFENDERS. TRAINING INCLUDES, BUT IS NOT LIMITED TO THE FOLLOWING AREAS:

- ADOLESCENT DEVELOPMENT
- EDUCATIONAL PROGRAMMING
- CULTURAL AWARENESS
- CRISIS PREVENTION AND INTERVENTION
- LEGAL ISSUES
- HOUSING AND PHYSICAL PLANT
- POLICIES AND PROCEDURES
- MANAGEMENT OF, AND PROGRAMMING FOR, SEX OFFENDERS
- SUBSTANCE-ABUSE SERVICES
- COGNITIVE BEHAVIORAL INTERVENTIONS, INCLUDING ANGER MANAGEMENT, SOCIAL-SKILLS TRAINING, PROBLEM SOLVING
- RESISTING PEER PRESSURE
- SUICIDE PREVENTION
- NUTRITION
- MENTAL-HEALTH ISSUES
- GENDER-SPECIFIC ISSUES
- CASE-MANAGEMENT PLANNING AND IMPLEMENTATION

FINDINGS:

South Texas ICE Processing Center does not youthful offenders.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001253

Standard #4-ALDF-2C-02

WHEN A CANINE UNIT IS OPERATED BY THE FACILITY:

- THERE IS A MISSION STATEMENT, INCLUDING GOALS AND OBJECTIVES
- THE CIRCUMSTANCES IN WHICH CANINE UNITS MAY BE USED ARE CLEARLY DEFINED
- EMERGENCY PLANS ARE INTEGRATED INTO THE OVERALL EMERGENCY PLANS OF THE FACILITY
- THERE ARE CRITERIA FOR SELECTING, TRAINING AND CARING FOR ANIMALS
- THERE ARE CRITERIA FOR THE SELECTION, TRAINING, AND PHYSICAL FITNESS OF HANDLERS
- THERE IS AN APPROVED SANITATION PLAN THAT COVERS INSPECTION, HOUSING, TRANSPORTATION AND DAILY GROOMING FOR THE ANIMALS
- THERE ARE DAILY AND CURRENT RECORDS ON TRAINING, CARE OF DOGS AND SIGNIFICANT EVENTS

FINDINGS:

South Texas ICE Processing Center does not have a canine unit.

Standard #4-ALDF-4A-14

WHEN REQUIRED BY STATUTE, FOOD PRODUCTS THAT ARE GROWN OR PRODUCED WITHIN THE SYSTEM ARE INSPECTED AND APPROVED BY THE APPROPRIATE GOVERNMENT AGENCY; THERE IS A DISTRIBUTION SYSTEM THAT ENSURES PROMPT DELIVERY OF FOODSTUFFS TO FACILITY KITCHENS.

FINDINGS:

South Texas ICE Processing Center does not grow food products.

Standard #4-ALDF-4C-02

WHEN MEDICAL CO-PAYMENT FEES ARE IMPOSED, THE PROGRAM ENSURES THAT, AT A MINIMUM:

- ALL INMATES ARE ADVISED, IN WRITING, AT THE TIME OF ADMISSION TO THE FACILITY OF THE GUIDELINES OF THE CO-PAYMENT PROGRAM

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001254

- CO-PAYMENT FEES ARE WAIVED WHEN APPOINTMENTS OR SERVICES, INCLUDING FOLLOW-UP APPOINTMENTS, ARE INITIATED BY MEDICAL STAFF

FINDINGS:

South Texas ICE Processing Center does not assess medical copays.

Standard #4-ALDF-4D-10

ANY STUDENTS, INTERNS, OR RESIDENTS DELIVERING HEALTH CARE IN THE FACILITY, AS PART OF A FORMAL TRAINING PROGRAM, WORK UNDER STAFF SUPERVISION COMMENSURATE WITH THEIR LEVEL OF TRAINING. THERE IS A WRITTEN AGREEMENT BETWEEN THE FACILITY AND TRAINING OR EDUCATIONAL FACILITY THAT COVERS THE SCOPE OF WORK, LENGTH OF AGREEMENT, AND ANY LEGAL OR LIABILITY ISSUES. STUDENTS OR INTERNS AGREE IN WRITING TO ABIDE BY ALL FACILITY POLICIES, INCLUDING THOSE RELATING TO THE SECURITY AND CONFIDENTIALITY OF INFORMATION.

FINDINGS:

South Texas ICE Processing Center does not use students, interns or residents in the delivery of health care.

Standard #4-ALDF-4D-11

UNLESS PROHIBITED BY STATE LAW, INMATES, UNDER STAFF SUPERVISION, MAY PERFORM FAMILIAL DUTIES COMMENSURATE WITH THEIR LEVEL OF TRAINING. THESE DUTIES MAY INCLUDE THE FOLLOWING:

- PEER SUPPORT AND EDUCATION
- HOSPICE ACTIVITIES
- ASSISTING IMPAIRED INMATES ON A ONE-ON-ONE BASIS WITH ACTIVITIES OF DAILY LIVING
- SERVING AS A SUICIDE COMPANION IF QUALIFIED AND TRAINED THROUGH A FORMAL PROGRAM THAT IS PART OF A SUICIDE PREVENTION PLAN
- HANDLING DENTAL INSTRUMENTS FOR THE PURPOSE OF SANITIZING AND CLEANING, WHEN DIRECTLY SUPERVISED AND IN COMPLIANCE WITH APPLICABLE TOOL CONTROL POLICIES, WHILE IN A DENTAL ASSISTANTS TRAINING PROGRAM CERTIFIED BY THE STATE DEPARTMENT OF EDUCATION OR OTHER COMPARABLE APPROPRIATE AUTHORITY

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001255

INMATES ARE NOT TO BE USED FOR THE FOLLOWING DUTIES:

- PERFORMING DIRECT PATIENT CARE SERVICES
- SCHEDULING HEALTH CARE APPOINTMENTS
- DETERMINING ACCESS OF OTHER INMATES TO HEALTH CARE SERVICES
- HANDLING OR HAVING ACCESS TO SURGICAL INSTRUMENTS, SYRINGES, NEEDLES, MEDICATIONS, OR HEALTH RECORDS
- OPERATING DIAGNOSTIC OR THERAPEUTIC EQUIPMENT EXCEPT UNDER DIRECT SUPERVISION, BY SPECIALLY TRAINED STAFF, IN A VOCATIONAL TRAINING PROGRAM

FINDINGS:

Detainees at the South Texas ICE Processing Center do not perform familial duties.

Standard #4-ALDF-4D-12

INDIVIDUALS DESIGNATED BY THE INMATE ARE NOTIFIED IN CASE OF SERIOUS ILLNESS, SERIOUS INJURY, OR DEATH, UNLESS SECURITY REASONS DICTATE OTHERWISE. IF POSSIBLE, PERMISSION FOR NOTIFICATION IS OBTAINED FROM THE INMATE.

FINDINGS:

Members of staff of the South Texas ICE Processing Center do not make the notifications required by this standard. Members of ICE staff make the notifications required by this standard.

Standard #4-ALDF-5A-04

INMATES WITH DRUG AND ALCOHOL ADDICTION PROBLEMS ARE PROVIDED WITH SUBSTANCE ABUSE PROGRAMS, TO INCLUDE MONITORING AND DRUG TESTING.

FINDINGS:

The South Texas ICE Processing Center is under contract with DHS and ICE to provide short-term detention for individuals who are awaiting deportation hearings. Due to the short duration of care, there is no substance abuse program.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001256

Standard #4-ALDF-5A-05

THERE IS A TREATMENT PHILOSOPHY WITHIN THE CONTEXT OF THE TOTAL CORRECTIONAL SYSTEM AS WELL AS GOALS AND MEASURABLE OBJECTIVES. THESE DOCUMENTS ARE REVIEWED AT LEAST ANNUALLY AND UPDATED AS NEEDED.

FINDINGS:

The South Texas ICE Processing Center is under contract with DHS and ICE to provide short-term detention for individuals who are awaiting deportation hearings. Due to the short duration of care, there is no therapeutic treatment program.

Standard #4-ALDF-5A-06

THERE IS AN APPROPRIATE RANGE OF PRIMARY TREATMENT SERVICES FOR ALCOHOL AND OTHER SUBSTANCE-ABUSING INMATES THAT INCLUDE, AT A MINIMUM, THE FOLLOWING:

- INMATE DIAGNOSIS
- IDENTIFIED PROBLEM AREAS
- INDIVIDUAL TREATMENT OBJECTIVES
- TREATMENT GOALS
- COUNSELING NEEDS
- DRUG EDUCATION PLAN
- RELAPSE PREVENTION AND MANAGEMENT
- CULTURALLY SENSITIVE TREATMENT OBJECTIVES, AS APPROPRIATE
- THE PROVISION OF SELF-HELP GROUPS AS AN ADJUNCT TO TREATMENT
- PRERELEASE AND TRANSITIONAL SERVICE NEEDS
- COORDINATION EFFORTS WITH COMMUNITY SUPERVISION AND TREATMENT STAFF DURING THE PRERELEASE PHASE TO ENSURE A CONTINUUM OF SUPERVISION AND TREATMENT

FINDINGS:

The South Texas ICE Processing Center is under contract with DHS and ICE to provide short-term detention for individuals who are awaiting deportation hearings. Due to the short duration of care, there is no alcohol or substance abuse program.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001257

Standard #4-ALDF-5A-07

THE FACILITY USES A COORDINATED STAFF APPROACH TO DELIVER TREATMENT SERVICES. THIS APPROACH TO SERVICE DELIVERY IS DOCUMENTED IN TREATMENT PLANNING CONFERENCES AND IN INDIVIDUAL TREATMENT FILES.

FINDINGS:

The South Texas ICE Processing Center is under contract with DHS and ICE to provide short-term detention for individuals who are awaiting deportation hearings. Due to the short duration of care, there are no treatment services.

Standard #4-ALDF-5A-08

THERE ARE INCENTIVES FOR TARGETED TREATMENT PROGRAMS TO INCREASE AND MAINTAIN THE INMATE'S MOTIVATION FOR TREATMENT.

FINDINGS:

The South Texas ICE Processing Center is under contract with DHS and ICE to provide short-term detention for individuals who are awaiting deportation hearings. Due to the short duration of care, there are no treatment programs.

Standard #4-ALDF-5A-09

INMATES HAVE ACCESS TO EDUCATIONAL PROGRAMS AND, WHEN AVAILABLE, TO VOCATIONAL COUNSELING AND VOCATIONAL TRAINING. EDUCATIONAL AND VOCATIONAL PROGRAMS ADDRESS THE NEEDS OF THE INMATE POPULATION.

FINDINGS:

The South Texas ICE Processing Center is under contract with DHS and ICE to provide short-term detention for individuals who are awaiting deportation hearings. Due to the short duration of care, there are no vocational programs.

Standard #4-ALDF-5A-10

IN FACILITIES OFFERING ACADEMIC AND VOCATIONAL TRAINING PROGRAMS, CLASSROOMS ARE DESIGNED IN CONSULTATION WITH SCHOOL AUTHORITIES. (RENOVATION, ADDITION, NEW CONSTRUCTION ONLY)

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001258

FINDINGS:

The South Texas ICE Processing Center is under contract with DHS and ICE to provide short-term detention for individuals who are awaiting deportation hearings. Due to the short duration of care, there are no educational or vocational training programs.

Standard #4-ALDF-5B-14

WHEN THE FACILITY IS DESIGNATED TO OPERATE ANY TYPE OF PRETRIAL INTERVENTION SERVICE OR OTHER RELEASE PROGRAMS, ITS AUTHORITY AND RESPONSIBILITY ARE STATED BY STATUTE OR ADMINISTRATIVE REGULATION.

FINDINGS:

The South Texas ICE Processing Center is not designated to operate any pre-trial intervention service or other release program.

Standard #4-ALDF-5B-15

WHEN A PRETRIAL INTERVENTION PROGRAM, DIVERSION PROGRAM, PRETRIAL RELEASE PROGRAM, OR SUPERVISED RELEASE PROGRAM IS CONDUCTED IN THE FACILITY, SUFFICIENT STAFF, SPACE, AND EQUIPMENT ARE PROVIDED TO SERVICE THE PROGRAM.

FINDINGS:

The South Texas ICE Processing Center does not conduct any pre-trial intervention program, diversion program, pretrial release program or supervised release program.

Standard #4-ALDF-5B-16

WHERE TEMPORARY RELEASE PROGRAMS EXIST, THE PROGRAMS HAVE THE FOLLOWING ELEMENTS:

- WRITTEN OPERATIONAL PROCEDURES
- CAREFUL SCREENING AND SELECTION PROCEDURES
- WRITTEN RULES OF INMATE CONDUCT
- A SYSTEM FOR EVALUATING PROGRAM EFFECTIVENESS
- EFFORTS TO OBTAIN COMMUNITY COOPERATION AND SUPPORT

FINDINGS:

The South Texas ICE Processing Center does not have any temporary release programs.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001259

Standard #4-ALDF-5B-17

WHERE WORK RELEASE AND/OR EDUCATIONAL RELEASE ARE AUTHORIZED, THE FACILITY ADMINISTRATOR HAS AUTHORITY TO APPROVE OR DISAPPROVE PARTICIPATION FOR EACH INMATE.

FINDINGS:

The South Texas ICE Processing Center is not authorized to operate any work release or educational release programs.

Standard #4-ALDF-5C-07

THE FACILITY CAN REQUIRE ALL SENTENCED INMATES TO WORK IF THEY ARE NOT ASSIGNED TO PROGRAMS.

FINDINGS:

The South Texas ICE Processing Center does not have sentenced inmates.

Standard #4-ALDF-5C-09

WHERE STATUTE PERMITS, INMATES ARE ASSIGNED TO PUBLIC WORKS AND COMMUNITY SERVICE PROJECTS.

FINDINGS:

The South Texas ICE Processing Center is not allowed by statute to assign inmates to public works and community service projects.

Standard #4-ALDF-5C-13

WHERE AN INDUSTRIES PROGRAM EXISTS, ITS ESTABLISHMENT IS AUTHORIZED AND AREAS OF AUTHORITY, RESPONSIBILITY, AND ACCOUNTABILITY ARE DELINEATED.

FINDINGS:

The South Texas ICE Processing Center does not have an industries program.

Standard #4-ALDF-5C-14

THE NUMBER OF INMATES ASSIGNED TO INDUSTRIES OPERATIONS MEETS THE REALISTIC WORKLOAD NEEDS OF EACH OPERATING UNIT.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001260

FINDINGS:

The South Texas ICE Processing Center does not have an industries program.

Standard #4-ALDF-5C-15

THERE IS A COMPREHENSIVE QUALITY CONTROL PROCESS.

FINDINGS:

The South Texas ICE Processing Center does not have an industries program.

Standard #4-ALDF-5C-16

A COST ACCOUNTING SYSTEM FOR EACH INDUSTRIES UNIT IS DESIGNED, IMPLEMENTED, AND MAINTAINED IN ACCORDANCE WITH GENERALLY ACCEPTED ACCOUNTING PRINCIPLES.

FINDINGS:

The South Texas ICE Processing Center does not have an industries program.

Standard #4-ALDF-6B-06

APPROPRIATELY TRAINED INDIVIDUALS ARE ASSIGNED TO ASSIST DISABLED INMATES WHO CANNOT OTHERWISE PERFORM BASIC LIFE FUNCTIONS.

FINDINGS:

The South Texas ICE Processing Center does not house detainees who cannot perform basic life functions.

Standard #4-ALDF-6D-01

THE FACILITY PROVIDES SERVICES AND OPPORTUNITIES THAT ENCOURAGE INMATES TO TAKE RESPONSIBILITY FOR THEIR ACTIONS. OPPORTUNITIES ARE BASED UPON VICTIM AND COMMUNITY INPUT AND ARE FASHIONED IN A WAY THAT SEEKS TO AMELIORATE THE HARM DONE.

FINDINGS:

The South Texas ICE Processing Center is under contract with DHS and ICE to provide short-term detention for individuals who are awaiting deportation hearings. Due to the nature of confinement, the requirements of this standard do not apply.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001261

Standard #4-ALDF-7F-02

CONSISTENT WITH THE LAWS OF THE JURISDICTION, THERE IS A SYSTEM FOR PROVIDING NOTIFICATION TO THE REGISTERED VICTIM(S) OF A CRIME UPON THE RELEASE FROM CONFINEMENT OF THE CONVICTED INMATE OR IN THE EVENT OF AN ESCAPE. FOLLOW UP NOTIFICATION TO THE VICTIM(S) OCCURS WHEN ESCAPEES ARE RETURNED TO CUSTODY.

FINDINGS:

The South Texas ICE Processing Center is under contract with DHS and ICE to provide short-term detention for individuals who are awaiting deportation hearings. Due to the nature of confinement, there are no registered victims.

COMMISSION ON ACCREDITATION FOR CORRECTIONS

STANDARDS COMPLIANCE REACCREDITATION AUDIT

ICE Health Service Corps (IHSC)
LaSalle Detention Facility (IHSC)
Jena, Louisiana

November 13-14, 2017

VISITING COMMITTEE MEMBERS

(b)(6); (b)(7)(C) Chairperson
ACA Auditor

(b)(6); (b)(7)(C)
ACA Auditor

AMERICAN OVERSIGHT

A. Introduction

The audit of the LaSalle Detention Facility (IHSC), Jena, Louisiana was conducted on November 13-14, 2017 utilizing the American Correctional Association (ACA) Standards for Performance Based, Health Care for Adult Correctional Institution, 1st Edition and the 2014 Standards Supplement. The following team conducted the audit: (b)(6); (b)(7)(C) Chairperson and (b)(6); (b)(7)(C) Team Member. The facility reaccreditation audit was simultaneously audited by (b)(6); (b)(7)(C) ALDF-Chairperson, and (b)(6); (b)(7)(C) ALDF-Team Member.

B. Facility Demographics

Rated Capacity: 1328 (Males - 1096 and Females - 232)
Actual Population: 1008 (Males - 875 and Females - 133) as of 11/13/2017
Average Daily Population for the last 12 months: 1123
Average Length of Stay: 16 days
Security/Custody Level:

- ✓ Maximum (Red) - 227
- ✓ Medium (Orange) - 243
- ✓ Medium Low (Yellow) - 101
- ✓ Minimum (Blue) - 437

Age Range of Detainees: 18-74
Gender: Male/Female

(b)(7)(E)

C. Facility Description

The LaSalle Detention Facility (LDF) provides detention services, housing, and transportation for detainees who are in administrative custody of the Immigration and Customs Enforcement (ICE) Department of Homeland Security. The LDF is privately owned and operated by the GEO Group under a contract with the Department of Homeland Security. Medical services are provided by the Immigration Health Service Corporation (IHSC).The facility houses individuals, both male and female, who are pending immigration review.

AMERICAN OVERSIGHT

The facility mission is to provide the highest level of service and safety to the client, and to ensure the safety of the community, staff, and detainees in custody. The facility is physically located at 830 Pineville Road, Jena, Louisiana. The facility was constructed in 1998. An Intergovernmental Service Agreement was awarded in July of 2007 with the US Customs Enforcement allowing the LDF to provide secure detention services to male and female detainees. The facility has been operated by the GEO Group with health care services provided by IHSC since that time.

(b)(7)(E)

(b)(7)(E) There is visiting area for both contact and non-contact visiting. There are 17 housings units, including a male and female segregation pod. All general housings are open bay style. There are five medical examination rooms/nursing stations to service the units. There is an intake booking area with two medical rooms. Dorm style pods have group showers, sinks, and toilets.

During FY17, the LDF transported and processed 37,944 detainees for removal and/or deportation. GTI, the transportation division, has travelled 501,697 miles to date. Also, this FY17, the LDF underwent successful audits by the GEO Eastern Regional Office for the annual Quality Compliance Process (QCP) process and the annual audit of the Performance Based National Detention Standards. LDF passed the client mandated Sexual Abuse and Assault Prevention Intervention (SAAPI) audit with no corrective actions needed. LDF utilizes language line translation.

ICE Health Services Corps Mission Statement -"IHSC is committed to providing health care services to reduce global disease and support the safe apprehension, enforcement and removal of detained individuals involved in immigration proceedings".

AMERICAN OVERSIGHT

(b)(7)(E)

D. Pre-Audit Meeting

On Sunday, November 12, 2017 the members of the audit team were transported from the Alexandria International Airport, Alexandria, Louisiana to the Holiday Inn Express & Suites, Pineville, Louisiana by (b)(6); (b)(7)(C) Assistant Warden of Finance and Administration (AWFA).The distance from the airport to the hotel was approximately 15 miles.

The audit team met at the hotel on that evening to discuss the information provided by the Association staff and the officials from the LaSalle Detention Facility (IHSC).

AMERICAN OVERSIGHT

The chairperson divided the standards into the following groups:

Standards #HC 1A-01 to 3A-11 to (b)(6); (b)(7)(C)
Standards #HC 3A-12 to 7C-03 to

The audit team members attended an "ice-breaker" dinner at the Johnny Carinos restaurant approximately from 06:00 PM to 08:15 PM that evening with Warden David Cole, (b)(6); (b)(7)(C) GEO Corporate Accreditation Manager, ACA-ALDF audit team and 13 other LaSalle Detention Facility employees. General conversation followed as the team member and the facility staff became acquainted, and general audit goals and procedures for the audit were discussed.

E. The Audit Process

1. Transportation

On Monday, November 13, 2017, the audit teams (IHSC and ALDF) were picked up from the hotel by (b)(6); (b)(7)(C) GEO Corporate Accreditation Manager at 07:12 AM and arriving LDF at 07:58 AM. The team followed the LDF's security procedures and was escorted to the facility by (b)(6); (b)(7)(C) GEO Corporate Accreditation Manager for a brief housekeeping meeting with the David Cole, Facility Warden and the Health Services Administrator, CDR (b)(6); (b)(7)(C) The team expressed the appreciation of the Association for the opportunity to be involved with LaSalle Detention Facility in the accreditation process. The ACA-ALDF audit team participated in this pre-entrance meeting. The meeting lasted from 08:05 AM to 08:25 AM.

2. Entrance Interview

At 8:27 AM the same day, the audit team proceeded with the formal joint (IHSC and ALDF) entrance meeting at the main conference room. The audit schedule and procedures were discussed, and the staffs were asked about any problem areas of which the teams should be aware. The staffs were advised that the audit team would meet with them each evening prior to their departure from the facility to discuss the progress of the audit up to that point, and any problems that were encountered, and the audit team will attempt to review all the mandatory standards on the first day. Escorts were requested to accompany the auditors on the tour and subsequent visits to departments, and to note the number of detainees and the names and titles of employees with whom the auditors spoke. The staffs were asked if any detainee or employee had requested to speak with the auditors. No requests had been made. The audit Chairpersons expressed the team's appreciation and the appreciation of the ACA for the opportunity to be involved with the audits in its re-accreditation process, and emphasized the goals of the accreditation, which are to improve the efficiency and effectiveness of correctional systems throughout the United States.

AMERICAN OVERSIGHT

The audit teams were aware that the staffs had worked long and hard in preparation for this event, and accordingly the teams would endeavor to provide a fair, equitable and thorough audit as possible while holding them accountable to high standards. The team members would visit as many departments and areas as possible relating to the audit and meet and speak with as many staffs and detainees as possible in the time available, while at the same time strive to be as non-intrusive as possible. It was requested that when audit team members paused to speak with detainees, that staffs step away so that the conversation may remain private and the team would like to observe the practice in any medical emergency. The audit team reemphasized that the purpose of the audit is to be helpful and to assist the facility in achieving its re-accreditation. The entrance meeting lasted until 08:40 AM.

The following persons were in attendance:

David Cole	Warden
(b)(6); (b)(7)(C)	GEO Corporate Accreditation Manager
	Assistant Warden of Security Operations
	Assistant Warden of Finance and Administration
	Chief of Security
	Food Service Manager
	Executive Secretary
	Maintenance Supervisor
	Transportation Manager
	Human Resources Manager
	Classification Manager
	Captain
	Fire and Safety Manager
	PREA Compliance Manager
	Compliance Administrator
	Training Manager
	Medical Director (IHSC)
	Health Services Administrator (IHSC)
	Registered Nurse (IHSC)
	ACA-ALDF Audit Chairperson
	ACA-ALDF Audit Team Member

3. Facility Tour

The IHSC team toured the medical area and other areas relating to the IHSC audit from 08:50 AM to 10:51 AM. ACA audit notices were posted throughout the facility. Staff and detainees were aware that an audit was taking place. The following persons accompanied the team on the tour and responded to the team's questions concerning facility operations:

AMERICAN OVERSIGHT

(b)(6); (b)(7)(C)	Health Services Administrator (IHSC) Registered Nurse Warden Compliance Administrator PREA Compliance Manager Fire and Safety Manager Maintenance Supervisor Chief of Security GEO Corporate Accreditation Manager Assistant Warden of Security Operations Assistant Warden of Finance and Administration

The following areas of the institution were visited and the following personnel and detainees were encountered during the course of the tour:

Intake	(b)(6); (b)(7)(C)
Food Service	
Laundry Service

Security-Falcon Bravo Unit
Security-Falcon Charlie Unit
Central Control

(b)(6); (b)(7)(C)

4. Conditions of Confinement/Quality of Life

During the tour, the team evaluated the conditions of confinement at the facility. The following narrative description of the relevant programmatic services and functional areas summarizes the findings regarding the quality of life. The facility noise levels are noteworthy. There was no offensive order or smell of fresh paint. There was no evidence of pest or rodent infestation or complaint. All areas of the facility are clean and well maintained. Chemicals are properly stored and well controlled. MSDS sheets are available. Tools are on shadow boards and appropriately stored and inventoried. The housing units are clean with the detainee living areas being neat and organized. There is a large outdoor exercise area with a soccer field, fixed weights, and basketball hoops. Each housing unit has a day room equipped with a television, board games, puzzles and a microwave. The housing units were quiet and there appeared to be a very low level of tension in the units.

Food Service:

Food Service is provided by staff working for GEO. The food service area is clean. The area is inspected weekly by food service staff, monthly by the safety officer and annually be the health department. A six week cycle menu, approved annually by a Registered Dietitian, is utilized and based on two hot/one cold meals per day. A diet for health, hyper calorie diet, renal diet, vegetarian and texture modifications are available. LDF practices satellite feeding in the units. The audit team observed trays and sampled one lunch meal of mash potato w/gravy, country fried steak, biscuit, mixed salad w/dressing and Kool-Aid drink on the second day of the audit. The meal was nutritionally adequate, palatable and temperature tested. The cost per meal was $1.05. There is no pork products served. Medical diets are provided by the food service department upon receipt of written instructions from the facility Clinical Director. Meals samples are kept for 72 hours. At the time of the audit, there were 111 medical diets. These diet orders contain both start and stop dates. These may be ordered anywhere from one day to length of stay. Medical evaluations and screenings are done on detainee workers which monitored cuts/sores, burns, runny nose, nail condition and cold/flu symptoms.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001291

2020-ICFO-29037 2291 of 2966

Detainees are not allowed to handle food preparation. Refrigerators, freezers and the dry storage area are clean, orderly and clutter-free, and temperatures are in the appropriate ranges. The dishwasher was in proper working order, and documentation reflected temperatures in the appropriate range.

Medical Care:

Medical services at the LaSalle Detention Facility (LDF) are contracted through the INGENESIS. They also utilize Public Health Service (PHS), STG International and Akahi contract staffing. They provide medical, mental health and dental services. LDF medical receives transfers and in-transit detainees and some with the history of high-risk behaviors, compounded by lack of medical care and /or mental health treatment, and are more likely to have chronic illnesses and infectious diseases. The facility has a responsible physician (MD) and a Health Services Administrator (HSA). The working relationship between medical, mental health, program, dental and security are very remarkable. Medical staffs are well trained and caring professionals. The team interviewed the youngest female (18 years) and the oldest male (74 years) detainees; they are complimentary of medical services. Telehealth is practiced at the LDF. Other accreditation for the LDF includes National Commission on Correctional Health Care (NCCHC), 11/2017 and Performance Based National Detention Standards (PBNDS), 9/2017 (ICE). All detainees receive initial screening up arrival, and physical exam within 14 days of arrival.

LDF medical operates three shifts (b)(7)(E)

(b)(7)(E)

Director (MD). The audit team observed shift changes on first and second day of the audit and found the process structured. The LDF medical has five examination rooms plus five nursing stations (one each in the unit).The waiting rooms have access to water, bathrooms, education materials and health pamphlets. Telemedicine is not available at the LDF. New fulltime employees receive in-service trainings and OJT trainings. Staffing, space and radios for communication continues to be an issue.

AMERICAN OVERSIGHT

LDF medical has the followings:

- ✓ 2 AED's (secured and inspected)
- ✓ 2 EKG's (secured and inspected, and read on site)
- ✓ 1 Fixed digital chest x-ray machine
- ✓ 2 Emergency bags (secured, inspected and sealed)
- ✓ 2 Medical crash carts (secured, inspected and sealed)
- ✓ 1 Emergency stretcher with straps (secured and inspected)
- ✓ 1 Transport Gurney (secured and inspected)
- ✓ 1 Secure medication room
- ✓ 1 Refrigerator (Flu, TB Solutions, etc.)
- ✓ 1 Refrigerator (Specimen)
- ✓ 8 Portable oxygen cylinders (secured and inspected by Cookies DME)
- ✓ I Oxygen concentrator (secured and inspected by Cookies DME)
- ✓ 4 Negative pressure rooms (cameras, toilets and sinks, and inspected)
- ✓ 2 Suicide observation rooms (cameras, toilets and sinks)

LDF has a Disability Placement Program (DPP) that provides for housing accessible lockers, bunk beds with grabs bars, accessible TTY phones, volume control phones, accessible dayroom tables and accessible path of travel. There are ample supplies of walking sticks, crutches and wheel chairs in the facility. There is a language line translation available.

LDF uses the following hospitals for inpatient hospitalization:

1. LaSalle General Hospital, Jena, Louisiana (ER)
2. Rapides Regional Medical Center, Alexandria, Louisiana
3. St. Francis Cabrini Hospital, Alexandria, Louisiana
4. Louisiana State University Medical Center, New Orleans, Louisiana

LDF has an agreement with the Jena Fire Department (5 miles, 5 minutes), and LaSalle Parish (3.2 miles) and LaSalle General Hospital (1.4 miles) for ambulance services in case of medical emergencies. Non-emergent medical transportation is done by facility staff to either a hospital facility or community provider for offsite consultations. The nurses have Basic Life Support (BLS) certified through the American Heart Association (AHA). Medical maintain basic TTA protocol medicines. The Master SDS is maintained in medical. Officers are trained on first aid, CPR and AED, and are considered first responders. Upon admittance to the LDF, detainees receive a detainee handbook to aid in adjustment to detention setting. This documentation contains information regarding medical services, sick call process, grievance procedures and hygiene rules. Other methods are used to inform detainees about MRSA, AIDS, Hepatitis, and the spread of HIV, blood borne pathogens and safety.

AMERICAN OVERSIGHT

Sick call is provided three times a day and 7 days/week in General Population (GP) and Special Management Unit (SMU) at 06:00 AM, 09:00 AM, 06:00 PM and as needed. Detainees sign up for sick calls at each housing unit between the hours of 05:00 AM and 06: 00 AM. Detainees housed in SMU access all medical services via face to face encounters with an RN during daily rounds. Detainees housed in GP access all medical services via call out logs. The average monthly sick calls are 455. The audit team observed sick call process in GP and SMU on the second day of the audit and found the process well organized. Medical requests are triaged within 3-4 days, and any patient with symptoms is seen within one day. There is no medical copay. No detainee is denied health care service. LDF uses detainee electronic medical records. Medical grievance is through the grievance box, collected by a grievance coordinator, and reviewed by the HSA within 2 days. LDF averages three substantiated medical grievances per year mostly on medication preference, medication refills and time line to see a provider. Specialty services/consults are provided through off-site contracted specialists. The turnaround time is 72 hours. Optometry service is contracted off-site. There were three pregnant detainees at the time of the audit. All pregnant females are referred to an offsite OB-GYN specialist. The number of chronic care detainees excluding mental health at the time of the audit was 158.

LDF has a plan for the management of communicable diseases including education on prevention, diagnosis, treatment and isolation. LDF has an infectious disease coordinator. LDF has four single-bed negative pressure rooms with to date inspections and a medical housing unit. Infirmary service is provided through a contracted hospital. MRSA precautions are in place. Universal precautions are practiced throughout the facility. There are available first aid and blood borne pathogen kits. There are eye wash stations present in appropriate areas. Hand sanitizers (non-alcohol) dispensers were located throughout medical and other areas. Sanitation and housekeeping is provided through a contractor-Jani King. The total monthly TB tests are 5. An annual TB screening is conducted on all detainees after 12 months. Initial medical screening is done while the detainees are on the transfer bus. LDF offers limited TB sticks, mostly chest x-rays on site.

Medications are stored in medication rooms and secured behind double locks. A nurse administers medications including diabetic lines four times a day and seven days a week in GP and SMU at 09:00 AM, 01:00 PM, 04:30 PM, 09:00 PM and as needed. Prior to giving medications, detainee's identification is confirmed and mouth cavities checked after administration. The audit team observed medication administrations in the GP and SMU on the second day of the audit and found the process organized and timely. All no shows or refusal to medications are documented and /or referred. The HSA checks the MARS paper record for missed doses. Medical diets are coordinated with the food service. The audit team examined the manual during the audit and found it current. The manual is updated regularly by medical. There are 111 medical diets, including 51 diabetics (36-insulin and 15-non insulin dependents) at the time of the audit. Some insulin dependent diabetics receive midnight snacks.

AMERICAN OVERSIGHT

The average monthly detainees on prescription medications are 557, and controlled medications are 11. Some medications are crushed per doctor's order. Detainees are provided script medications upon release depending on illness; 15 days-normal, 22 days-TB and 38 days-HIV. Specific over-the-counter (OTC) medications are offered at the Commissary, and reviewed and approved by the Clinical Director (MD).

LDF has a dispensary, and supported by (b)(7)(E) (b)(7)(E) LDF maintain stock order medications. Medications are ordered through the Cardinal Pharmacy. The backup pharmacy is the local Jena Pharmacy. Detainees are allowed keep-on-person (KOP) medications. The pharmacy is audited by the Pharmacist monthly and the HSA quarterly. A random inventory count on sharps and controlled medications was accurate. The pharmacy has a refrigerator for the storage of insulin, vaccines and ice packs. The audit team found the temperature log and inventory current. Basic medical supplies and materials are obtained through McKesson. The disposal of expired, unused, discontinued, recalled, over stocked medications including prescription, (pills and liquids) and narcotics are arranged through the Reverse Distributor-Pharma logistics. At the time of the audit there were some medications awaiting disposal. Records are maintained on disposal process.

LDF medical has a draw only lab. Specimens are collected on site. Blood is spun and sent out for analysis to the LabCorp 5–days/week and reports received through fax/phone within 24-48 hours. STAT labs are sent to the LaSalle General Hospital and results received through fax/phone within 2-4 hours. Average monthly detainee lab tests are 230. Stericycle is contracted to pick up the biohazard and sharps wastes. The audit team checked the specimen refrigerator temperature log and found the records current. Chronic care patients receive annual screening test. Laboratory results are also incorporated into the EMR. Digital radiology is used in the facility with hard copy over-reads scanned into the electronic health record (EMR). LDF has a fixed wall stand digital chest x-ray machine. The X-ray department is supported by two fulltime contracted Radiologic Technologists. Radiology services (MRI, Ultrasound, etc.), including STATS are provided through the LaSalle General Hospital with results received within hours by phone/fax depending on level of acuity.

LDF performs detoxification from alcohol, opiates hypnotics, other stimulants and sedative hypnotic drugs. Substance abuse treatment is provided, as are a large number of behavioral health groups and classes. All detainees enrolled and participating in these groups had individual treatment plans in place. There are regularly scheduled multi-disciplinary team meetings, including medication management when appropriate and necessary.

(b)(7)(E)

Dental services are provided from 07:30 AM - 04:00 PM (Monday-Friday).

AMERICAN OVERSIGHT

Dental services include basic dentistry, prophylaxis, fillings, partials, extractions, cleaning, oral cancer screenings and patient education. The detainees access dental health services through the sick call process. The audit team reviewed the licenses, registrations, records and random inventory of sharps and instruments and found them accurate. The dental area is clean. Dental instruments and sharps not used at the year of expiration are re-autoclaved and repackaged. Dental spore test is through SPC Medical. The Dentist has a standing order; dental emergency outside the expertise of the nurse is referred to one of the contracted hospitals. The Dentist is notified. Dental at LDF is equipped with one (1) digital dental bitewing x-ray machine, one (1) dental chair and one (1) Panorex digital x-ray machine. The dental wait time is less than 7 days. Urgent requests are seen within 24 hrs. The average monthly dental appointment is 160. Dental amalgam disposal is through the Wastewise. Dosimeter reading is through Landauer Dosimetry. Dental chair traps are cleaned weekly. Dental supplies and equipment service, including dental compressor service are obtained through the Henry Schein.

Mental health is supported by (b)(7)(E) (b)(7)(E) They provide services 24/7. Daily rounds are conducted. Detainees access mental health services via the sick call process. Staffs can refer services. There are approximately 262 detainees seen monthly. All suicide ideations are referred to mental health and monitored, and are observed 1:1. Mental health utilizes the two single-bed isolation rooms. There are available suicide smocks and blankets. Tele-psychiatry is practiced at LDF. LDF maintains zero tolerance for sexual abuse and harassment. Detainees are provided information on enhanced victim services and rape crisis hotline. Rounds are done daily and are evaluated every 30/60/90 days depending on needs. Program services include crisis intervention, individual and group counseling and medication management. LDF has no therapeutic community program. Severely developmentally and disabled detainees receive a mental health evaluation where appropriate and are referred for placement at the following inpatient hospitals:

1. Columbia Regional Care Center, Columbia, South Carolina
2. Krome Transitional Unit (KTU), Miami, FL

There were approximately 25 detainees on psychotropic medication at the time of the audit.

Laundry:

Laundry services are centralized. Laundry has six commercial washers (capacity ranging from 75-130 lbs. each) and four commercial dryers (capacity ranging from 130-170 lbs. each). Dryer lint filters are cleaned after each use. The audit team observed adequate supply of bed linens, pillows and blankets. Laundry process is done using mess bags. Detainees are issued three sets of clothing upon admission. Linens are exchanged twice per week, blankets once per month and clothing twice per week.

AMERICAN OVERSIGHT

Medical has adequate supplies of linens and clothing to support medical housing. Medical wastes are contained and washed separately using biohazard dissolving bags.

F. Examination of Records

Following the facility tour, the team proceeded to a medical private office to review the accreditation paper files and evaluate compliance levels of the policies and procedures. The facility has no notices of non-compliance with local, state, or federal laws or regulations.

1. Litigation

   The facility had no consent decrees, class action lawsuits or adverse judgments in the past year according to records.

2. Significant Incidents/Health Care Outcome Measures

   Significant Incident Summary:

   During the audit period Oct 2016 through September 2017, the number of detainee-on-detainee assaults was 8.While the number is noteworthy and will impact health care services, it was determined that it was within the appropriate range that would be expected for an institution of this size, custody level and mission.

   Health Care Outcome Measures:

   The audit team reviewed the health care outcome measures with the health care administrative team. The values stated for the measures reflected a very busy facility with high transfer of detainees from diverse population and age, with a wide variety of health concerns. The audit team concurs with the measures.

3. Departmental Visits

   The team revisited the following departments to review conditions relating to departmental policy and operations:

Department Visited	Person(s) Contacted
Food Service	(b)(6); (b)(7)(C)
Medical	

AMERICAN OVERSIGHT

(b)(6); (b)(7)(C)

4. Shifts

a. Day and Evening Shifts

The team was present at the facility from 07:58 AM to 04:30 PM on the first day of the audit. The team observed evening shift briefing at 03:00 PM. The briefing was mutual and participatory. The team briefly introduced themselves and discussed the purpose of the audit and matters pertaining to the audit. The team observed medication administration while the rest of the medical staff was busy taking care of the detainees and are pleasant and professional. (b)(6); (b)(7)(C) Health Services Administrator, (b)(6); (b)(7)(C) Pharmacist, (b)(6); (b)(7)(C) Psychiatrist, (b)(6); (b)(7)(C) Nurse Manager, (b)(6); (b)(7)(C) Clinical Pharmacist, (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) Licensed Clinical Social Worker and (b)(7)(E) other medical staffs was present.

b. Night Shift

The team was present at the facility during the night shift at 05:30 AM on the second day of the audit and spoke the incoming and outgoing shifts. The audit team observed the shift change and morning briefing. Shift briefings are a normal occurrence. The shift supervisors passed on information to the oncoming shift. A familiar and easy rapport was evident among the staff, and information was freely exchanged. (b)(6); (b)(7)(C) Health Services Administrator, (b)(6); (b)(7)(C) Nurse Manager, (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) Clinical Pharmacist was present.

5. Status of Previously Non-compliant Standards/Plans of Action

There were no standards previously found non-compliant.

The team reviewed the status of standards previously found non-compliant, for which a waiver was not granted, and found the following:

There were no standards previously found non-compliant or granted a waiver.

AMERICAN OVERSIGHT

G. Interviews

During the course of the audit, team members met with both staff and detainees to verify observations and/or to clarify questions concerning facility operations.

1. Detainee Interviews

The audit team interviewed and spoke to approximately 89 detainees (males and females) including the oldest and youngest of the male and female who stated that they generally felt secure at the facility and were treated fairly by staff. Their basic needs were being met and they felt that they were making positive progress towards eventual and successful release. They also felt that their basic medical needs were being met. They have ready access to sick call process and all were aware of the grievance process. Detainee morale appeared to be good and they were cooperative, respectful and were aware of the audit, and participated in the preparation for the audit. Notices of the ACA Accreditation process were observed to have been posted at different locations readily available to the detainees. A few of the detainees requested to speak privately with the auditors regarding A/C issues in Owl-Delta Unit, and management was addressing the matter. The three pregnant females that were interviewed requested consistency in receiving extra snacks and requested additional blankets, and management was addressing the matter at the time of the audit.

2. Staff Interviews

The audit team interviewed and spoke to approximately 45 employees, excluding 27 medical staffs, and observed them in the performance of their duties. The audit team observed structured medical shift change briefings. Staffs were polite, cooperative, and conducted themselves in a professional manner. There was a normal working relationship between medical, dental, mental health, programs and security, and communication flowed freely. Gender and ethnic diversity was good and morale also appeared to be good. Staff indicated that their training were excellent and are applicable to their positions and job needs.

H. Exit Discussion

The exit interview was held independent of the ALDF audit at 11:36 AM in the medical conference/dining room with the CDR Dan Fletcher, Health Services Administrator, the facility Warden, LCDR (b)(6); (b)(7)(C) HSA, (b)(6); (b)(7)(C) Facility and twenty-six (26) IHSC staffs.

The chairperson explained the procedures that would follow the audit. The team discussed the compliance levels of the mandatory and non-mandatory standards and reviewed their individual findings with the group.

AMERICAN OVERSIGHT

The chairperson expressed appreciation for the cooperation of everyone concerned and congratulated the facility team for the progress made and encouraged them to continue to strive to maintain their high level of professionalism in the correctional field.

COMMISSION ON ACCREDITATION FOR CORRECTIONS

STANDARDS COMPLIANCE REACCREDITATION AUDIT

CoreCivic
Otay Mesa Detention Center
San Diego, California

November 11 - 13, 2019

VISITING COMMITTEE MEMBERS

(b)(6); (b)(7)(C) Chairperson
ACA Auditor

(b)(6); (b)(7)(C)
ACA Auditor

(b)(6); (b)(7)(C)
ACA Auditor

AMERICAN OVERSIGHT

A. Introduction

The reaccreditation audit of the CoreCivic Otay Mesa Detention Center in San Diego, California was conducted on November 11-13, 2019, by the following team: (b)(6); (b)(7)(C) (b)(6); (b)(7)(C) Chairperson (b)(6); (b)(7)(C) Member; and (b)(6); (b)(7)(C) Healthcare Member.

B. Facility Demographics

Rated Capacity:	2084
Actual Population (11/11/19):	1769 (1186 ICE/583 USMS)
Average Daily Population for the last 12 months:	1420
Average Length of Stay:	83 days
Security/Custody Levels contracted:	Minimum and Medium
Age Range of Detainees:	18 - 70
Gender:	Male and Female

(b)(7)(E)

C. Facility Description

The Otay Mesa Detention Center (OMDC) is privately owned and operated by CoreCivic. The facility's physical address is 7488 Calzada De La Fuente, San Diego, California. Although the facility is near a major metropolitan area, it is ideally located in an isolated area surrounded by a State Prison, County Sheriffs Detention Facility, and a County Juvenile Center, all within a three mile radius of one another. The facility is also located within three miles of the International Border San Diego-Tijuana; therefore, much of the area surrounding the facility is monitored and patrolled by US Custom and Border Patrol agents.

OMDC is considered a minimum/medium security level facility and houses adult male and female detainees through a partnership with the Immigration and Customs Enforcement Agency (ICE) and the United States Marshal Service (USMS).

AMERICAN OVERSIGHT

Three types of detainees are being are housed: 1) ICE detainees who are awaiting court, asylum in the United States, or asylum to other countries; 2) Justice Prisoner and Alien Transport System (JPATS) ICE detainees awaiting aerial transport to their home country or asylum country after deportation has been ordered; and 3) United States Marshals Service detainees awaiting sentencing or further court proceedings. The 2019 Staffing Pattern identifies 1422 ICE beds and 548 USMS beds, which fluctuate. The Intake Department processes, on average, 60 new admissions each day and 20 releases a day; the numbers are increasing due to the addition of the four new housing units. The average length of stay for ICE and USMS detainees is 83 days.

Programs and services at OMDC include High School Equivalency Test, English as a Second Language, life skills classes, religious services, volunteer services, counseling services, and recreational activities.

The Otay Mesa Detention Center mission is "to operate a safe, secure, clean, constitutional, consistent and professional facility by exhibiting our commitment to excellence, empowering the staff to conduct their duties with P-R-I-D-E, and providing care and programs for those committed in our care."

Otay Mesa Detention Center employs up to (b)(7)(E) At the time of the visit, there were (b)(7)(E) Healthcare is contracted to Department of Homeland Security, ICE Health Service Corp (IHSC) who provides (b)(7)(E) site staff. Food Service is contracted to the Trinity Service Group who provides (b)(7)(E) staff. ICE Detachment operates out of OMDC with approximately (b)(7)(E) personnel from Deportation, Removal, Asylum, and District Counsel; and the Executive Office for Immigration Review (EOIR) Immigration Court is a component of the Department of Justice (b)(7)(E) permanently assigned Judges hold court on-site at OMDC while (b)(7)(E) udges are assigned on a rotational basis for video court hearings. Prior to employment, all staff receives a background check, drug screening, TB test, and medical screening. Staff is required to attend initial and annual training at Otay Mesa Detention Center. Staff training is offered on-line through e-learning, in addition to traditional classroom training.

Original construction of the facility was complete in 2015 with an operational capacity of 1572. During the audit cycle, four units/512 beds were added with a completion date of October 14, 2019, which increased the total capacity to 2084 beds. The facility occupies approximately 37 acres of which approximately 16 acres are within the perimeter fence. A two-story conventional steel structure houses the entire facility under one roof and is cladded with insulated precast concrete wall panels. There are no buildings outside the perimeter fence.

Individuals enter through the interlocked front gates (pedestrian sally port), and then proceed to the lobby area of the administration building. The public video visitation area is on the left side of the lobby; to the right is the waiting area for both visitors and legal representatives.

AMERICAN OVERSIGHT

On the far right of the arrival lobby is a stairway to the second floor which contains: attorney visitation rooms (seven), a contact visitation room (one), asylum interview rooms (four), telephonic rooms, and the Executive Office of Immigration Review court rooms (five). The remainder of the second floor is the administration area for (b)(7)(E) mmigration and Customs Enforcement staff, and (b)(7)(E) staff of the Executive Office of Immigration Review (including (b)(7)(E) judges).

The first-floor arrival lobby has an additional secure door to the administration area, which includes offices for the warden, warden's secretary, business department, human resources, assistant wardens, investigator, and the quality assurance manager. Also, in this area is the staff computer lab, electrical room, copier/print room, staff break room and restrooms, mailroom, staff gym, conference room/facility command post, meeting room, and staff locker rooms for females and males.

Central control is located between the administration area and the main corridor and serves as the two-door slider sally port entry area into the main corridor, which runs across the detention center to all housing units and all activities areas and is approximately one quarter of a mile long.

Each housing area has handicap accessible cells/dorms, and showers and restrooms for the diverse population. Inmate housing areas are constructed of exterior and interior precast concreate walls and precast concrete modules. All units are designed for direct supervision. ICE and US Marshal detainees do not mingle, and they are not housed together.

The six dormitory style housing units provide 658 beds and are comprised of a large open dayroom area with centralized group toilet, sink, and shower areas. The 15 cell housing units provide 1420 beds (not including 6 isolation cells) and are comprised of two or four person cells with a toilet/sink combo unit and large open dayroom areas with showers and sinks. Each unit has its own partially covered recreation area located at the back of units.

The medical infirmary is comprised of two dormitory units with nine mental health beds in each dorm, 14 single cells for various mental conditions, and six negative pressure isolation rooms.

The left side of the lengthy main corridor contains Pods A-H, J-M, and Q-R. Recreation yards are attached to all housing units. Video visitation rooms are located between units to facilitate visits. Satellite law libraries are located in units for remote access to legal material.

The two restrictive/segregation housing units house male and female detainees in an administrative, disciplinary, protective, or self-admitted status. C2-Pod is dedicated as the female segregation unit, is located inside of and off to the right of C2 and includes six cells with two beds in each. D-Pod is dedicated as the male segregation unit and includes 32 cells with two beds in each. Two-man cells provide 98 total square feet and 37 square feet unencumbered space per person. Cells contain a call button tied to central control. An officer's podium is located at the entrance of each unit.

AMERICAN OVERSIGHT

Due to the location and design of C2 Segregation, access to natural lighting is non-existent in the first four cells as described under the environmental section below. An OMDC Segregation Plan was in place for services and programs available to detainees housed in segregation i.e., commissary, property, television, telephone, etc. An officer started a creative writing/poetry program for detainees, which is very popular. Documentation and interviews verified staff visits, the delivery of programs and services, and 30-minute rounds by staff. During the visit, seven females were housed in C2-Pod and 14 US Marshals and 14 ICE males were housed in D-Pod.

Interspersed along the corridor between the various pods are unit management offices and storage rooms/janitorial/chemical closets.

The right side of the main corridor contains:

- Control Center (for secure housing and video coverage of recreation yard)
- Security Offices
- N and P Pod Dormitories
- T and V Pods
- Corridor to Intake, Property, Discharge, Medical Clinic and Medical Housing
- Corridor to Commissary/Warehouse, Maintenance, Kitchen
- Corridor to Classrooms, Detainee Gymnasium, second Staff Gymnasium, and Barbershop
- All Medical Housing
- Medical/Dental/Mental Health Clinics
- Medical Clinic/Medical space (vacant)
- Elevator to upstairs Court Rooms, Attorney Visitation, and Contact Visitation
- Holding Cells
- Offices for Training Manager, Disciplinary Hearing Office, and Shift Supervisor
- Laundry
- Electrical spaces
- Dining Hall (East)
- Dining Hall (West)
- Chapel
- Law/Leisure Library

AMERICAN OVERSIGHT

D. Pre-Audit Meeting

The visiting committee met for dinner on November 10, 2019, in Chula Vista, California with executive staff to discuss the information provided by the Association staff and the officials from the CoreCivic Otay Mesa Detention Center.

The chairperson divided standards into the following groups:

Standards 1B-01 to 3A-02 and 6B-01 to 6D-01 (b)(6); (b)(7)(C)
Standards 4A-01 to 5A-10 (b)(6); (b)(7)(C) Healthcare Member
Standards 1A-01 to 1A-23, 5B-01 to 6A-09, 7A-01 to 7G-01 (b)(6); (b)(7)(C) Chairperson

E. The Audit Process

1. Transportation

The visiting committee was escorted to and from the facility each day by Quality Assurance Manager (b)(6); (b)(7)(C)

2. Entrance Interview

The visiting committee arrived at Otay Mesa Detention Center at 7:40 a.m., checked in, and cleared through front entry. The team proceeded to the warden's conference room where the formal entry meeting was held. Due to the Federal Holiday, many staff was scheduled off.

The following persons were in attendance:

(b)(6); (b)(7)(C)

AMERICAN OVERSIGHT

The team expressed the appreciation of the Association for the opportunity to be involved with the Otay Mesa Detention Center in the accreditation process. Warden LaRose stated there were no requests from the public, staff, or detainees to visit with the audit team as a result of the audit posting; there were no lawsuits during the audit cycle that had an adverse judgment against the facility or its employees; and there were no current issues that would jeopardize the accreditation status.

Warden LaRose welcomed the visiting committee and the attending staff members introduced themselves. The team members introduced themselves and provided information about their background. It was explained that the goal of the visiting team was to be as helpful and non-intrusive as possible during the conduct of the audit, team members would visit as many departments and areas as possible and meet and speak with as many staff and detainees as possible in the time available, and the team would meet with the warden at the end of each day for an out brief. The chairperson emphasized the goals of accreditation toward the efficiency and effectiveness of correctional systems throughout the United States. The audit schedule was also discussed at this time.

3. Facility Tour

The visiting committee toured the entire facility from 8:50 a.m. to 4:30 p.m. with a break for lunch. The posting of audit announcements were displayed for detainees, staff, and visitors. The following persons accompanied the team on the tour and responded to the team's questions concerning facility operations:

(b)(6); (b)(7)(C)

4. Conditions of Confinement/Quality of Life

During the tour, the team evaluated the conditions of confinement at the facility. The following narrative description of the relevant programmatic services and functional areas summarizes the findings regarding the quality of life.

AMERICAN OVERSIGHT

Security:

(b)(7)(E)

AMERICAN OVERSIGHT

(b)(7)(E)

AMERICAN OVERSIGHT

(b)(7)(E)

AMERICAN OVERSIGHT

(b)(7)(E)

Assistant Warden (b)(6); (b)(7)(C) was the assigned Prison Rape Elimination Act (PREA) Coordinator at OMDC. PREA signs were posted throughout the facility. All females must announce their presence upon entering male housing areas and vice versa for males entering female units, which was observed by the visiting committee. PREA information is provided in the detainee handbook and orientation video, which were available in English and Spanish. It was reported that the facility underwent a successful DOJ PREA audit June 23, 2018.

Classification

Since the average stay here is only about 83 days and since most detainee's face deportation, the main objective in classification is to house every detainee in a proper and secure environment based on their background, group affiliations, and to a lesser degree, their personal needs and assessments. Classification is geared towards identifying and separating criminal gang members who are hostile to each other as well as identifying potential terrorist members and those with violent tendencies for referral to investigative agencies.

Classification of the detainee population is conducted during the intake process and the detainee's security level (one, two, or three) is determined by criminal background, age group, and education level. During the initial interview, other information is gathered from the detainee, i.e. biographical information, criminal history, gang or STG affiliation, predatory history, and social habits (smoking, alcohol, drugs, etc.). All information is then verified and/or cross-referenced with official ICE or US Marshals records for validity, and a security level is assigned. The detainee is moved to the appropriate general population housing assignment according to their classification level and affiliations.

AMERICAN OVERSIGHT

Environmental Conditions:

Otay Mesa Detention Center was constructed in 2015 and is considered "new construction" under the Adult Local Detention Facilities standards. Four new housing units were added during the audit cycle with a completion date of October 14, 2019. All housing areas provide the required unencumbered living space, which ranges between 25.625 to 50.9 square feet per detainee. Handicap assessable housing is available for detainees with disabilities. (b)(6); (b)(7)(C) Facility Manager at California Correctional Facility conducted an Environmental Data Report on February 28, 2019, and reported airflow, daytime and nighttime noise levels, and lighting levels all met standard requirements. The temperature in all areas felt comfortable during the visit. Documented toilet/urinal, washbasin, and shower ratios all met standard requirements. Random fixtures were tested by the visiting committee and the hot water at showers and washbasins felt very warm to the touch. Several colorful murals were painted on walls. Furnishings throughout the facility were in good condition. Each detainee is provided one storage tote box and a clear plastic bag for the storage of personal items, and a pillowcase for laundry. Detainees are issued limited hygiene items once a week with a one for one exchange; additional items can be purchased through the commissary. A barbershop is located in each housing unit and the gym. Detainees can sign up for haircuts.

Dayrooms are immediately adjacent to cell/dormitory living areas for indoor leisure time activities and required square footage was met. Each dayroom provides telephones, a C-ORES kiosk, satellite law library, televisions, tables and seats, microwaves, igloos with water, ice in coolers, and some pods have security grade couches and a multi-purpose room. A ping pong table is located in all ICE detainee pods. D-Pod (male segregation) provides two indoor expanded metal cages/dayrooms for eligible detainees. Each pod also has a partially covered outdoor recreation area off the back of the unit. Dayrooms typically provide (14) 4'x4' skylights and two 8'0"x10'6" security windows at the end of the dayroom for natural light. Cell doors contain two 4.75"x29.5" windows for a total of 1.94 square feet transparent glazing, which is important because cells have one 41"x5" partially distorted window at the back of the cell so detainees cannot see into the mechanical room/pipe chases (windows face the two-story narrow pipe chase space, with very little light from a few skylights high above). A daylight harvesting system can control the interior lights as needed throughout the day, but this is done manually at present.

One housing area of concern, pertaining to natural light, was C2-Pod (female segregation) which is a housing unit within a housing unit. Although this is a newer facility, this housing area appears to be a design flaw. This housing area contains 6 cells that face a concrete wall. As described above, the back window is distorted because if faces the pipe chase so there is no natural light. There is one window on the door at the end of the hall in this unit, which may provide a little outside light to the first and maybe the second cell.

AMERICAN OVERSIGHT

All detainees are offered two hours of out-of-cell time for dayroom and recreation, but they are confined the remainder of the day. Detainees can self-admit themselves into segregation for an unknown amount of time and in fact, during the visit a female in Pod C2, cell 123 (b)(6); (b)(7)(C) had been in segregation since 6/14/2017 (over two years) with the exception of about four days, and she refuses to go to recreation. It was recommended that this female detainee be moved to the last cell next to the outside door/window for some natural lighting.

The maintenance department is staffed with seven general maintenance positions; due to the expansion one additional position is being added. A preventative maintenance plan was in place, which identified equipment that is checked weekly, monthly, quarterly, semi-annually, and annually; this includes ventilation, plumbing, lighting, and fire and safety systems. Staff maintains four emergency generators; no-load tests are conducted weekly and a full-load test semi-annually. The maintenance shop was very clean and organized; tools were engraved, secured on shadow boards or on carts, and were properly accounted for. Caustics were stored in flammable cabinets with the presence of safety data sheets, personal protective equipment, eyewash stations, and an oily waste can.

This is an LEED (Leadership in Energy and Environmental Design) certified Silver facility since July 31, 2015. A solar water system preheats the water for central mechanical room and provides hot water to the entire facility. The facility is piped for recycled water and hopes to connect to the Otay Water District in the future. The HVAC needs are provided by roof top mounted HVAC units aligned along the roof ridge of the building. In addition, Aqua Recycle, a laundry recycle system is in place. The system is designed to eliminate sewer and water connections by recycling washing machine discharge water.

Sanitation:

A daily housekeeping plan was in place (OMDC Policy 12-100) effective September 1, 2015. The safety manager is responsible for coordinating and monitoring chemicals and sanitation. Overall, sanitation throughout the facility was found to be at an exceptional level. Walls, ceilings, vents, floors, showers, toilets, and living areas were all clean; there was no evidence of old dirt; there were no foul odors present; offices were free of clutter; and grounds were free of trash. Ongoing cleaning was observed throughout the facility in all areas. Concentrate chemicals are initially received in Supply Room #1950 on the north back dock. Five gallon Spartan cleaning agents jugs are delivered to and diluted by dilution stations located in three janitor closets in the main corridor; thus products handled by detainees are non-hazard with a 0 or one rating; spray bottles were properly labeled; safety data sheets, personal protective equipment, and eyewash stations were present where concentrate chemicals are stored. Weekly inspections are conducted by trained/qualified staff and monthly inspections are conducted by the safety manager. Otay Water District in Spring Valley, California provides potable water.

AMERICAN OVERSIGHT

Solid waste goes to Otay City Sewage, but the facility is responsible for maintaining a grinder for large items which is cleaned out daily by maintenance staff. Eco Lab Pest Control is contracted to provide monthly pest control services.

Fire Safety:

Otay Mesa Detention Center employs one full-time safety manager to oversee the fire safety program. The facility's fire protection and detection systems include a visual and audible fire alarm system with duct smoke detectors, heat detectors, smoke detectors, and pull stations throughout, and the main annunciator is located outside of central control with sub panels throughout. An Ansul hood suppression system is located in the kitchen. A wet pipe sprinkler system is located in all areas. Systems are inspected, tested, and serviced in accordance with manufacture's recommendations by Siemens Fire Life Safety. All systems were operational during the visit. Third quarter fire drills were conducted on all shifts and in all areas of the facility for the fourth quarter 2019. Drills are simulated in special housing areas. Evacuation diagrams were properly posted throughout the facility in English and Spanish. Emergency lighting was present and exit signs were illuminated. Officers have the availability to open all electronic doors at once with a gang release located in central control and emergency keys are readily available for immediate release of detainees, if needed. Approximately 227 fire extinguishers were available throughout the facility and in all transport vehicles; tags indicated monthly inspections are conducted. Twenty-two fire hydrants are strategically located along the outer perimeter.

The Cal-Fire Marshal in San Diego is the authority having jurisdiction. On April 22, 2019, (b)(6); (b)(7)(C) Fire Prevention Specialist II, San Diego County Fire Authority conducted an annual inspection and reviewed emergency evacuation plans; there were no code violations. Weekly safety and sanitation inspections are conducted by trained/qualified staff and monthly inspections are conducted by the facility safety manager. If assistance from a fire department is required, the facility has a Memorandum of Understanding for mutual aid and support with San Diego County Rural Fire Department which is located approximately two miles from the facility, with a response time of approximately four minutes. All facility staff is trained in the implementation of facility emergency procedures. OMDC is a tobacco free facility.

The visiting committee found caustics, flammables, and toxic items to be properly stored in flammable cabinets and inventoried throughout the facility. The H42 clipper cleaner in barbershops required stricter control and accountability, which was corrected immediately. Safety Data Sheets, personal protective equipment, eyewash stations, and an oily waste can were present where chemicals are stored and distributed. All areas account for open/partially used caustic/toxic chemicals as one rather than using an accurate inventory system.

AMERICAN OVERSIGHT

The visiting committee recommends that at a minimum, dangerous materials with the words "warning, danger, keep out of reach of children" or with hazard ratings of moderate, serious, or severe be weighted for an accurate accountability.

Food Service:

The Otay Mesa Detention Center Food Service Department is operated through a contract with Trinity Services Group, Inc. to provide detainee and staff meals. Staffing includes (b)(7)(E)
(b)(7)(E)
Approximately 105 volunteer ICE detainees are assigned to work one of three shifts. One correctional officer is assigned to the kitchen to maintain security and ensure timely flow of the meal time. The large kitchen includes a food preparation area, sandwich area, bakery area, dry storage area, one walk-in refrigerator, one walk-in freezer, a dishwashing area, pots and pans area, and two blind feeding serving lines. Two detainee dining halls offer a seating capacity of 217 each. Insulated food trays are transported to the segregation units, medical, and intake. Detainees are required to swipe their ID badge at a computer prior to receiving a meal tray in the dining hall. Breakfast is served at 5:15 a.m., lunch 11:00 a.m., and dinner 4:00 p.m. The staggered feeding schedule allows detainees 20 minutes to consume their meal. A five-week cycle menu is followed, and menus are approved by a registered dietician employed by Trinity. The 2019 diet for health menu provides detainees an average of 2800 calories a day. The average meal cost is $1.386. At least two hot meals are served each day. Special diets are provided for medical and religious purposes and diet manuals were present in the kitchen and medical department. During the visit, 188 medical diets were prescribed, and 117 religious diets were approved. All staff receives free meals, which can be consumed in one of the four staff breakrooms.

The kitchen was clean, organized, and efficient during the review. Food preparation tools were engraved, neatly shadowed, inventoried, and controlled. All equipment was in good working condition. Knifes are not allowed in the kitchen; dough cutters are used instead. Paddles and dough cutters were secured by the use of a tether system, and the can opener was locked. Daily detainee and staff health checks are being conducted and documented. Safety training is provided monthly. Freezer, cooler, ambient air, and dishwashing temperatures were being maintained appropriately. Seventy-two hour meal samples were available. Hairnets, beard nets, hand washing sinks with hot water, soap, towels, trash can, and notifications signs were all in evidence. All storage was off the floor; both staff and detainee workers appeared trained in public health requirements. There was no evidence of rodents or insects. Christine Tham, Specialist with the County of San Diego Department of Environmental Health conducted an annual Sanitation and Health Inspection on April 16, 2019, with one deficiency that was corrected; OMDC received a score of 98%.

AMERICAN OVERSIGHT

The lunch meal was sampled in the kitchen on Monday. The meal consisted of two turkey frankfurter hotdogs, two hotdog buns, ½ cup steamed cabbage, one cup baked beans, one cookie, two mustard packs, and one cup beverage. The flavor, texture, temperature, appearance, and palatability were all good and the portions were of sufficient quantity.

Detainees have access to a commissary which is run by six staff and nine detainees. Keefe provides the commissary products. Commissary bags are delivered to the units. Detainees can spend up to $80.00 a week. Radio, MP3 Player/music, stamps, shoes, and clothing are not part of the spending limit. Detainees may fill out commissary orders through the C-ORES Kiosks located in the dayroom. C-Mail is available for USMS detainees. The dry storage/ambient air temperature was not being recorded in the commissary to ensure food items such as tortillas are not compromised.

Medical Care:

Healthcare services are provided by the Department of Homeland Security, ICE Health Service Corp. The facility does operate an Infirmary. Below is a list of medical staff at Otay Mesa Detention Facility:

(b)(6); (b)(7)(C); (b)(7)(E)

The Dental Department does have an autoclave in use. Spore testing of the autoclave is done on a weekly basis in accordance with the approved testing procedure.

AMERICAN OVERSIGHT

A record of the indicators and results are maintained in the Dental Department. Responsibility for testing will be the dental assistant or dental hygienist. Responsibility for maintaining spore testing results will be the dental staff.

A random inventory of accountability practices for medications and dental/medical instruments and all flammables was conducted during the on-site visit. The facility was found to have excellent accountability practices for the control of narcotics and general medications.

The medical providers are on-call 24-hours, seven days a week. Dental providers are on-call during the same time frame. Mental health providers also are on-call during the previously mentioned schedule.

STG International provides healthcare contract staff for Otay Mesa Detention Facility. Laboratory specimens are collected seven days per week and are then transferred to LabCorp. LPNs and RNs are responsible for the collection of lab specimens. The results of the lab specimens are sent to the facility electronically.

The facility does have radiology on-site. However, it is used for TB screening only. This is available seven days per week. For emergency/urgent radiology exams, the detainees are sent off-site. When radiology examinations are completed, the results are received via radiology report immediately or at least within 12 hours. The majority of results are received immediately.

Pharmacy services are provided by PHS. The facility has currently (b)(7)(E) (b)(7)(E) (b)(7)(E) The pharmacy itself is very well stocked. Medications are delivered to the facility by courier. Medications are received two to three times per week. The courier calls the pharmacy once arrived at the facility. A pharmacy staff member meets the courier in the front lobby to retrieve medication totes. Once inside the pharmacy, the staff member checks medications received against invoice before stocking. The pharmacy has designated bins in the pill line room. Pharmacy staff picks up bins on a weekly basis. The pharmacy does not utilize an automatic renewal system.

Pill lines are distributed each day of the week at 5:00, 11:00, 4:00, and 8:00. Keep-on-person medications are delivered to the detainees between 7:00 and 10:00. A detention officer is present during medication distribution times. Detainees are able to purchase over-the-counter medications from the commissary.

Detainee sick call (routine) is available seven days per week. Detainees sign up for sick call between 5:00 and 6:00 hours daily. Detainees' requests for health services are triaged seven days per week.

Restrictive housing is visited several times throughout the day for the distribution of medications, etc.

AMERICAN OVERSIGHT

The medication is distributed to detainees in restricted housing by the nurse going from room to room. An LVN or RN personally delivers the medications to the restricted housing area.

Typically, Alvarado ER is utilized for 911 emergencies. The detainee is transported by Emergency Medical Services (EMS). The hospitals detainees are transported to are Alvarado, Sharp CV, Sharp Grossmont, UCSD La Jolla, UCSD Hillcrest, Scripps CV, Scripps Hillcrest, Paradise Valley, or Select Specialty/Vibra.

The facility has a total of nine automatic external defibrillators (AEDs).

The facility does have an infirmary on-site. The infirmary has a total of 38 beds for patient care. Six of these rooms are rooms are utilized for respiratory isolation. The configuration of the infirmary beds are 18 dorm beds, four single room beds, and 6 negative pressure rooms.

The facility does have rooms used for suicidal observation. These rooms are in the medical housing unit. The facility has all the appropriate observation clothing at its disposal. The facility has the ability to watch detainees constantly while housed in these rooms. In fact, day one of the visit, there was a detainee under one-on-one direct observation.

The facility offers annual physical examinations for the detainees in the case of a long-term detainee. The annual physical examination date is determined by the detainee's date of incarceration.

The facility does a follow-up on detainees with chronic health care problems at least every 90-days; generally, much more often. The individual treatment plan for chronic care patients is developed by an advanced practice provider (nurse practitioner or physician assistant).

Optometry services are provided by an off-site provider.

Waste management is collected from the medical area and stored in an outside locked bin until it is collected. When a bin is two-thirds full, it is removed from the nursing unit and placed in the locked bins outside. Medical waste is collected and transported off facility grounds on a monthly basis. The contractor for the medical waste is provided by HealthWise Services.

The facility does utilize telemedicine. Telemedicine presentations are conducted Tuesday through Thursday. Specific telemedicine specialty clinics are for such things such as: infectious disease, diabetes, hypertension, and psychiatry. The off-site telemedicine conferences take place at the university, hospital, physician office, central office, etc., as well as Krome Detention Facility in Miami, Florida. The credentials of facility staff that present telemedicine patients are RNs, LVNs, as well as psychiatric staff.

AMERICAN OVERSIGHT

The facility utilizes electronic medical records (EMR). The facility also continues to retain a paper medical record. The EMR contains all medical, dental, and mental health information.

The facility conducts dialysis for detainees. The dialysis is done off-site by a medical contractor, Select Specialty Hospital.

This visiting committee observed staff that had a compassionate and caring approach to the detainee's well-being, both medical and mental health. Upon observation, all departments work well together, and respect was observed from all employees to one another. The medical area was clean, organized, and all medical staff presented a professional and caring approach. It was observed that security and the medical department work very well together for the safety of the staff and detainees.

Mental health services are available to all individuals in custody. Upon arrival to the facility, individuals go through the intake process at which time they are asked mental health related questions. If they answer yes to any questions, they are immediately referred to mental health. Another point of referral is from medical providers who assess during their physical examinations or other ongoing medical issues. Once the mental health referral is received, the individual is seen within 72 hours. When they are seen for the first time, a full comprehensive mental health evaluation is completed. Follow-up appointments are available as clinically warranted or as requested. Individuals are educated on their options for services at which time they can accept or decline. Services are strictly voluntary. If they decline, they are educated on the use of sick call process, which is offered daily, during which time they can sign up to request a meeting with mental health. Individuals can choose to start and stop services at will.

While in care, individuals are offered individual counseling by LCSW or Psychologists. Also, they have access to Psychiatry, Psychiatric NP, and Psych Pharmacist for medication management. Treatment is individualized in nature and they are scheduled follow up appointments, as clinically indicated.

Mental health staff members are on-site seven days out of the week during which time they are available to not only see scheduled individuals but any emergent matters that may arise.

The OMDC medical department was accredited by the National Commission on Correctional Health Care (NCCHC) September 2017.

Recreation:

Otay Mesa Detention Center employs one recreation supervisor, one recreation coordinator, and two gymnasium officers to coordinate daily recreation activities.

AMERICAN OVERSIGHT

All detainees are afforded at least one hour of recreation each day either inside or outside, and San Diego weather permits year-round access to outdoor activity. The indoor recreation schedule indicates, by housing units, the specific times detainees have access to the 7,374.57 square foot gymnasium at least one hour two days a week. The gymnasium offers basketball, volleyball, corn hole, bat mitten, and workout classes; restroom facilities are also available in the gym. Each housing unit has an outdoor recreation area off the back of the unit, which allows the detainees to go to the yards throughout the day. These yards are equipped with a basketball hoop, pullup bar, and picnic table. The outdoor yards provide 1923 square feet of space; C1 yard provides 1525.18 square feet. Special housing units have their own outdoor, cage style modules, that are reasonable in size and provide access to fresh air as follows: Seven 181.22 to 187.21 square foot partially covered outdoor modules are provided for D-Pod segregation which are equipped with a pullup bar. Three 183.12 to 187.74 square foot partially covered outdoor modules are provided for C2 segregation.

Multi-purpose rooms are also located throughout the facility and in each housing area to facilitate programs, including arts and crafts. The latest movie releases are shown on the weekends and holidays. The popular soccer fields were removed with the recent addition of four new housing units.

Religious Programming:

(b)(6); (b)(7)(C)

Otay Mesa Detention Center religious and volunteer services are planned, directed, and coordinated by two full-time chaplains. Chaplain [redacted] has a Certificate of License and Endorsement by Halbert Baptist and Certificate of Commission by Church of God in Christ. Chaplain (b)(6); (b)(7)(C) has a bachelor's degree in Master of Divinity, is endorsed by Christian Faith, has a half unit of Clinical Pastoral Education under auspices of the ACPE, Inc., and Pastoral Care Specialist Certificate. Local churches and volunteers assist in the delivery of a variety of religious and social services programs. At the time of the visit, there were 42 approved volunteers on the list. Volunteers are screened and provided eight hours orientation and initial training and four hours refresher training each year. A large multi-purpose room serves as the chapel for as many as 400 religious services and study programs; four classrooms are also available if needed. The Interfaith Service Schedule offers worship, study, counseling, and fellowship times in which all detainees may participate seven days a week. The chaplains visit the segregation units regularly. The chaplains maintain a library of books and materials that are available to the detainees, and they maintain contact with outside organizations for resources and donations. Religious diets are reviewed and approved by the chaplains. The chaplains process marriage requests, and also assist in the notification of incidents or deaths to the detainees. Religious groups/ministries on the schedule include Roman Catholic, Christian, Protestant, and Jehovah Witness. The chaplains make every effort to recruit volunteers for requested religious faiths. The visiting committee observed a large group of detainees participating in the Nancy, Victor, and Tango interfaith program on Monday.

AMERICAN OVERSIGHT

Offender Work Programs:

Federal detainees are not required to work based on contractual requirements; however, they are expected to keep their housing areas clean. Many detainees do volunteer for work assignments by submitting an application to unit staff. Work assignments are limited to inside jobs such as porter in many areas, kitchen, laundry, barber, commissary, education, library, etc. Food service workers earn $1.50 a day and all other assignments earn $1.00 a day. Written job descriptions were available, and safety training and equipment is provided. During the visit, 696 detainees were volunteering for work assignments.

Academic and Vocational Education:

The nature of the population, the restrictions on access to programs, and the short average time they remain here, combined, eliminate most reasonable opportunities for traditional programs found in other local facilities. In spite of the barriers, staff continues to develop specific programs that do target detainee population needs and also have some potential to be addressed in very short time frames. Sixteen Life Skills Programs were being offered (listed under social services) during the visit, and in August 2019, Grossmount College began offering HISET (High School Equivalency Test) to US Marshal detainees. HISET classes are held in four classrooms, and 30 females and 45 males were participating during the visit.

Otay Mesa Detention Center has over 60 different nationalities with a large Latino population that frequently does not speak English. Spanish is the major non-English language spoken by 40% of the detainee population. On November 12, 2019, Grossmount College began offering English as a Second Language classes (ESL) for US Marshal detainees. A language line is available and is frequently utilized for translation; 160 staff spoke Spanish at the time of the visit.

The HISET and ESL programs are funded through a state grant; therefore, there is no cost to the detainees.

Social Services:

Provision of social services programs are not a significant mission of OMDC due to the specialized nature of the population and the focus of the contracts by ICE and the USMS. Even programs of relatively short duration are often too long for many detainees to accomplish in their short stay, so the facility leadership and staff has focused on programs that target common detainee deficits that can be delivered quickly. As part of social services, mental health personnel provides individual counseling and crisis intervention; Grossmount College provides a HISET and English as a Second Language Program; and chaplains and community volunteers provide study groups, spiritual counseling, and visits. Services are available seven days a week and are posted in all housing units.

AMERICAN OVERSIGHT

The 16 Life Skills Programs, delivered primarily in the housing units, do give the detainees an opportunity to learn coping skills that they may lack and that can also help to deal with current stresses they are facing. The programs last four to six weeks and are facilitated by the unit teams. The programs are rotated so they are all not offered at the same time. Seventy-five detainees were enrolled in Life Skills Programs during the visit.

1. Understanding and Reducing Anger Feelings
2. Ideas for Better Communication
3. Building a Social Network
4. Unlock Your Thinking
5. Common Sense HI Prevention
6. Approaches to HIV-AIDS Prevention
7. Partners in Parenting

9. Straight Ahead Transition Skills
10. Time Out for Men
11. Time Out for Me
12. Mapping a New Roads to Recovery
13. Mapping the Journey
14. Preparation for Change
15. Mapping Your Reentry Plan
16. 12 Step AA/NA

Visitation:

Otay Mesa Detention Center recognizes the importance of visits; therefore, many opportunities are offered on the posted schedule. Video visitation is scheduled seven days a week between 8:30 a.m. to 10:30 a.m., 1:00 p.m. to 3:00 p.m., and 5:00 p.m. to 7:00 p.m. Contact Visitation is scheduled on Saturday and Sunday between 7:00 a.m. to 7:15 p.m. Visits are a minimum of one hour, and only four visitors are allowed per visit, including children.

Contact visiting is located on the second floor in the administration building. One large contact visiting room provides space for up to 217. This area only includes a water fountain, restrooms, and seating. Seven attorney visitation rooms, three asylum interview rooms, one asylum interview room with for telephonic rooms, and five court rooms are also located on the second floor. The general public video visitation area is located in the lobby area of the administration building and provides 20 video visiting stations. Video visitation areas are located in each housing unit/pod for detainees.

Visitation for U.S. Marshal detainees is non-contact and is conducted by in-house video stations. U.S. Marshal detainees may be approved on a case-by-case basis for a special visit for families traveling over 250 miles one way.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001333

ICE detainees may qualify for contact visitation if the visitor is approved by the ICE screening process, and if requested at least ten days in advance.

Library Services:

(b)(7)(E) library aides provide oversight over the general library and law library; the library space maximum capacity is 70. The library is open Monday through Friday from 5:05 a.m. to 9:25 p.m. Two soft cover books can be checked out for one week; hard cover books can only be viewed in the library. The library contains approximately 3,000 books, which includes a Spanish section. Book carts are located in the segregation units and medical infirmary and books are rotated out on Tuesday. Detainees can purchase publications from a recognized publisher, distributor, or authorized retailer. The visiting committee observed books in cells and dorms throughout the facility.

The main law library provides 12 computer stations with the Lexis Nexis program; a set of law books were also available. Each pod also has two computer stations, and segregation has one. Detainees can sign up for time in the main law library or the pod law library. Attorney phone calls are arranged with the unit staff. Photocopying, printing services, and computer assistance is available for detainees through the library staff in the main library.

Laundry:

The Otay Mesa Detention Center laundry is staffed with (b)(7)(E) and 16 detainees (b)(7)(E) Monday through Friday, 16 hours a day. Clothing, bedding, and personal hygiene are issued at intake. Detainees receive three sets of clothing and five sets of underclothes. ICE detainees wear blue, orange, or red dependent on their level; USMS detainees wear brown uniforms; and kitchen workers wear white uniforms. Every housing unit/detainee is scheduled to have their clothing and linen laundered two times a week. Blankets are laundered once a month. The laundry schedule is posted in the housing units. Equipment consists of six 165 pound and one 45 pound commercial washers, eight 165 pound commercial dryers, and one sewing machine. It was reported that lint traps are checked after every load. The chemicals are automatically dispensed to the washers from secured bulk containers. Chemicals were controlled and inventoried, an eyewash station was available, and SDS and personal protective equipment were in place. Mattress sanitizing is conducted in the intake area.

Community Relations

Otay Mesa Detention Center staff is actively involved in community organizations. It was reported that every year, a TOYS for TOTS toy drive is held collecting toys for underprivileged children in San Diego County.

AMERICAN OVERSIGHT

Patriot Packets, a collection of donated items, are currently being collected for deployed service members in the CoreCivic family. OMDC also participates in "Light the Night Against Crime," an annual event held by a non-profit organization, San Diego Crime Stoppers, focused on reducing crime in their community.

OMDC continues their involvement with STAR PAL, a San Diego based non-profit organization committed to empowering underserved youth in the community to build a safer and harmonious relationship with law enforcement. Staff recently participated in the 19th Annual Superheroes for Youth Celebrity Waiter Luncheon where local celebrities teamed up with local law enforcement to raise money for the organization. CoreCivic is currently a platinum superhero sponsor. The 2019 successful event grossing over $170,000 for STAR/PAL youth programs, providing inner-city and at-risk youth with positive experiences and critical programming led by law enforcement officers.

F. Examination of Records

Following the facility tour, the team proceeded to the warden's conference room to review the paper accreditation files and evaluate compliance levels of the policies and procedures. The Otay Mesa Detention Center utilizes CoreCivic policies and some OMDC facility policies and directives in the files. Accreditation files were organized, uniform, and easy to go through; very few files required additional documentation.

A review of six detainee case records (3 ICE/3 USMS) revealed uniformity and thorough documentation. Five staff personnel files were also reviewed; documentation was organized, complete, and medical records were maintained separately. Access is limited and files were maintained in a secure location.

The chairperson reviewed the January 23-25, 2019, Annual Detention Inspection of the OMDC, which was conducted by a team of contracted subject matter experts from the Nakamoto Group, Inc. The review was based on the ICE Performance-Based National Detention Standards. A final rating of "Meets Standard" was assigned. The chairperson met with (b)(6); (b)(7)(C) ICE Contract Monitor to discuss the January audit, his role at the facility, and the collaboration with OMDC staff (b)(6); (b)(7)(C) reported that he has a good working relationship with the OMDC staff, and any identified deficiencies are quickly resolved. He stated he was very fortunate to work with such a great group of staff the last five years.

The chairperson reviewed the May 14-16, 2019, OMDC Quality Assurance Review (QAR), which was conducted by a team of contracted subject matter experts from the Nakamoto Group, Inc. The QAR utilized the Federal Performance-Based Detention Standards for non-federal detention facilities, which provided the United States Marshal Service a comprehensive overview of the OMDC operations. The overall facility operation received a rating of "Marginal." The chairperson met with (b)(6); (b)(7)(C) USMS Contract Monitor to discuss the May audit, her role at the facility, and the collaboration with OMDC staff.

AMERICAN OVERSIGHT

(b)(6); (b)(7)(C) also reported that she has a good working relationship with OMDC staff, and any identified deficiencies are quickly resolved. She agreed that the staff and detainee morale was good and there is an open line of communication between the two.

The facility had zero notices of non-compliance with local, state, or federal laws or regulations.

1. Litigation

Over the last three years, the facility had zero consent decrees, class action lawsuits or adverse judgments; however, there are several pending lawsuits involving detainees and staff.

2. Significant Incidents/Outcome Measures

The visiting committee reviewed and discussed the Otay Mesa Detention Center Significant Incident Summary for the period of October 2018 through September 2019. The numbers reflected in the report are consistent with the overall mission and security level of the facility. There were 62 offender/offender assaults and 29 offender/staff assaults reported; only five were with a weapon (three detainee/employee), and none required outside medical treatment.

The medical auditor reviewed the Healthcare Outcome Measures with the health care administrative team; the numbers were consistent with the custody level and detainees being housed.

3. Departmental Visits

Team members revisited the following departments to review conditions relating to departmental policy and operations:

Department Visited	Person(s) Contacted
Administration	(b)(6); (b)(7)(C)
Chaplain	
Contract Monitors	
Human Resources	
Fire Safety	
Mailroom	

AMERICAN OVERSIGHT

Maintenance Medical	(b)(6); (b)(7)(C)
Records Security	
Unit Management	

4. Shifts

OMDC schedules its detention officers on one of three 8-hour shifts with a 15 minute briefing prior to each shift. An administrative shift is assigned Monday through Friday.

a. Day Shift 7:00 a.m. to 3:30 p.m.

The team was present at the facility during the day shift on Monday, Tuesday, and Wednesday. Most of this shift was spent touring the facility; speaking to department supervisors, staff, and detainees; verifying protocols; observing counts; checking key, tool, caustic and chemical control; and assessing conditions of confinement. Staff was observed performing their duties in a professional manner and detainees were observed working, enjoying recreation and leisure time, and a religious group. Staff members were very knowledgeable concerning their duties and responsibilities, and the morale was good. Serving of the lunch meal was observed and sampled, and an auditor observed the distribution of medications.

b. Swing Shift 3:00 p.m. to 11:30 p.m.

The team was present at the facility during the swing shift Monday and Tuesday. The team had the opportunity to speak with staff at their posts and observe afternoon recreation and leisure time.

c. Graveyard Shift 11:00 p.m. to 7:30 a.m.

The team was present at the facility during the graveyard shift from 10:45 to 11:30 p.m. Monday night. Oncoming officers cleared the metal detector and personal belongings were inspected.

AMERICAN OVERSIGHT

Two team members had the opportunity to speak with the oncoming officers, and one team member (b)(7)(E) observed the perimeter to be well lit. The shift roster identified (b)(7)(E) (b)(7)(E)

5. Status of Previously Non-compliant Standards/Plans of Action

Not Applicable.

G. Interviews

During the course of the audit, team members met with both staff and detainees to verify observations and/or to clarify questions concerning facility operations.

1. Offender Interviews

The team spoke with approximately 57 detainees during the course of the audit. The most common refrain of those who were interviewed was the stress of the uncertainty about their future and probable deportation. Their comments about the facility and staff were positive and indicated no major concerns about safety or security. One unit cheered on an officer as he was ending his shift, and many praised him for doing a great job in the unit. Positive comments about food and sanitation were received from all detainees the team met. Questions were asked regarding food, medical care, programs, grievances, fire drills, safety, quality of life, and other basic services at the facility. Detainees all stated they felt safe in their environment. The warden shared a letter from a detainee who had been released. The detainee expressed his gratitude to the staff for believing in him and helping him while incarcerated at OMDC.

2. Staff Interviews

Approximately 98 staff members were interviewed by the visiting committee. It was apparent that the staff had been informed of the audit and prepared for the visit. The team felt that each employee displayed a high level of professionalism and pride. All staff stated that they enjoyed working at the facility, they felt that they were well compensated and that they had a good benefits package, the training received is pertinent to the job, and they felt safe in their working environment. They stated that the executive staff was very responsive to any and all of their concerns and Warden LaRose is open to new ideas. Many correctional officers did discuss all the overtime they have to work, and they are hoping it will slow down soon.

H. Exit Discussion

The exit interview was held at 10:30 a.m. in a training room with Warden Christopher LaRose and 60 Otay Mesa Detention Center staff in attendance.

AMERICAN OVERSIGHT

The following persons from outside the facility were also in attendance:

(b)(6); (b)(7)(C)

The chairperson expressed appreciation for the hospitality and cooperation of everyone involved. The team reviewed their individual findings with the group and discussed the compliance levels of the mandatory and non-mandatory standards. Although staff has been faced with overtime challenges, they are working together, as a team, to meet contract requirements and the CoreCivic Mission. At the end of the day both staff and detainees said they felt safe. Staff was commended for their hard work and dedication to the accreditation process.

The chairperson explained that the audit team is the eyes and ears of the commission, and the Commission on Accreditation for Corrections determines and awards accreditation at the scheduled panel hearing. The procedures that follow the audit were explained.

The chairperson again thanked and congratulated the Otay Mesa Detention Center staff for the progress made and encouraged them to continue to strive toward even further professionalism within the correctional field as they begin their new audit cycle.

COMMISSION ON ACCREDITATION FOR CORRECTIONS

Core Civic
Otay Mesa Detention Center
San Diego, California

November 11 - 13, 2019

Visiting Committee Findings

Non-Mandatory Standards

Not Applicable

Standard #4-ALDF-1A-09

REVISED AUGUST 2008. SINGLE CELLS IN GENERAL POPULATION PROVIDE AT LEAST 35 SQUARE FEET OF UNENCUMBERED SPACE. AT LEAST 70 SQUARE FEET OF TOTAL FLOOR SPACE IS PROVIDED WHEN THE OCCUPANT IS CONFINED FOR MORE THAN 10 HOURS PER DAY.

FINDINGS:

Otay Mesa Detention Center does not have single cells for general population.

Standard #4-ALDF-1A-15

REVISED AUGUST 2006 (EXISTING ONLY) ALL INMATE ROOMS/CELLS PROVIDE THE OCCUPANTS WITH ACCESS TO NATURAL LIGHT.

FINDINGS:

Otay Mesa Detention Center was constructed in 2015; new construction of 4 housing units was complete in October 2019. The facility falls under new construction "plans approved after January 1, 1990," therefore, this standard does not apply. Standard 4-ALDF-1A-16 was applied for access to natural light.

Standard #4-ALDF-2A-36

INMATES PARTICIPATING IN WORK OR EDUCATIONAL RELEASE PROGRAMS ARE SEPARATED FROM INMATES IN THE GENERAL POPULATION.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001341

FINDINGS:

Otay Mesa Detention Center detainees are not allowed to participate in work or educational release programs.

Standard #4-ALDF-2A-37

REVISED AUGUST 2008. CONFINEMENT OF JUVENILES UNDER THE AGE OF 18 IS PROHIBITED UNLESS A COURT FINDS THAT IT IS IN THE BEST INTEREST OF JUSTICE AND PUBLIC SAFETY THAT A JUVENILE AWAITING TRIAL OR OTHER LEGAL PROCESS BE TREATED AS AN ADULT FOR THE PURPOSE OF PROSECUTION, OR UNLESS CONVICTED AS AN ADULT AND REQUIRED BY STATUTE TO BE CONFINED IN AN ADULT FACILITY.

FINDINGS:

Otay Mesa Detention Center does not house juvenile inmates/detainees.

Standard #4-ALDF-2A-38

IF YOUTHFUL OFFENDERS ARE HOUSED IN THE FACILITY, THEY ARE HOUSED IN A SPECIALIZED UNIT FOR YOUTHFUL OFFENDERS EXCEPT WHEN:

VIOLENT, PREDATORY YOUTHFUL OFFENDER POSES AN UNDUE RISK OF HARM TO OTHERS WITHIN THE SPECIALIZED UNIT, OR
A QUALIFIED MEDICAL OR MENTAL-HEALTH SPECIALIST DOCUMENTS THAT THE YOUTHFUL OFFENDER WOULD BENEFIT FROM PLACEMENT OUTSIDE THE UNIT

A WRITTEN STATEMENT IS PREPARED DESCRIBING THE SPECIFIC REASONS FOR HOUSING A YOUTHFUL OFFENDER OUTSIDE THE SPECIALIZED UNIT AND A CASE-MANAGEMENT PLAN SPECIFYING WHAT BEHAVIORS NEED TO BE MODIFIED AND HOW THE YOUTHFUL OFFENDER MAY RETURN TO THE UNIT. THE STATEMENT OF REASONS AND CASE-MANAGEMENT PLAN MUST BE APPROVED BY THE FACILITY ADMINISTRATOR OR HIS/HER DESIGNEE. CASES ARE REVIEWED AT LEAST QUARTERLY BY THE CASE MANAGER, THE ADMINISTRATOR OR HIS OR HER DESIGNEE, AND THE YOUTHFUL OFFENDER TO DETERMINE WHETHER A YOUTHFUL OFFENDER SHOULD BE RETURNED TO THE SPECIALIZED UNIT.

FINDINGS:

Otay Mesa Detention Center does not house juvenile inmates/detainees.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001342

Standard #4-ALDF-2A-39

DIRECT SUPERVISION IS EMPLOYED IN THE SPECIALIZED UNIT TO ENSURE THE SAFETY AND SECURITY OF YOUTHFUL OFFENDERS.

FINDINGS:

Otay Mesa Detention Center does not house juvenile inmates/detainees.

Standard #4-ALDF-2A-40

CLASSIFICATION PLANS FOR YOUTHFUL OFFENDERS DETERMINE LEVEL OF RISK AND PROGRAM NEEDS DEVELOPMENTALLY APPROPRIATE FOR ADOLESCENTS. CLASSIFICATION PLANS INCLUDE CONSIDERATION OF PHYSICAL, MENTAL, SOCIAL, AND EDUCATIONAL MATURITY OF THE YOUTHFUL OFFENDER.

FINDINGS:

Otay Mesa Detention Center does not house juvenile inmates/detainees.

Standard #4-ALDF-2A-41

REVISED AUGUST 2008. ADEQUATE PROGRAM SPACE IS PROVIDED TO MEET THE PHYSICAL, SOCIAL, AND EMOTIONAL NEEDS OF YOUTHFUL OFFENDERS AND ALLOWS FOR THEIR PERSONAL INTERACTIONS AND GROUP ORIENTED ACTIVITIES.

FINDINGS:

Otay Mesa Detention Center does not house juvenile inmates/detainees.

Standard #4-ALDF-2A-42

REVISED AUGUST 2008. YOUTHFUL OFFENDERS IN THE SPECIALIZED UNIT FOR YOUTHFUL INMATES HAVE NO MORE THAN INCIDENTAL SIGHT OR SOUND CONTACT WITH ADULT INMATES FROM OUTSIDE THE UNIT IN LIVING, PROGRAM, DINING, OR OTHER COMMON AREAS OF THE FACILITY. ANY OTHER SIGHT OR SOUND CONTACT IS MINIMIZED, BRIEF, AND IN CONFORMANCE WITH APPLICABLE LEGAL REQUIREMENTS.

FINDINGS:

Otay Mesa Detention Center does not house juvenile inmates/detainees.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001343

Standard #4-ALDF-2A-43

REVISED AUGUST 2008. PROGRAM PERSONNEL WHO WORK WITH YOUTHFUL OFFENDERS ARE TRAINED IN THE DEVELOPMENTAL, SAFETY, AND OTHER SPECIFIC NEEDS OF YOUTHFUL OFFENDERS. WRITTEN JOB DESCRIPTIONS AND QUALIFICATIONS REQUIRE TRAINING FOR STAFF WHO ARE RESPONSIBLE FOR PROGRAMMING OF YOUTHFUL OFFENDERS IN THE SPECIALIZED UNIT BEFORE BEING ASSIGNED TO WORK WITH YOUTHFUL OFFENDERS. TRAINING INCLUDES, BUT IS NOT LIMITED TO THE FOLLOWING AREAS:

- ADOLESCENT DEVELOPMENT
- EDUCATIONAL PROGRAMMING
- CULTURAL AWARENESS
- CRISIS PREVENTION AND INTERVENTION
- LEGAL ISSUES
- HOUSING AND PHYSICAL PLANT
- POLICIES AND PROCEDURES
- MANAGEMENT OF, AND PROGRAMMING FOR, SEX OFFENDERS
- SUBSTANCE-ABUSE SERVICES
- COGNITIVE BEHAVIORAL INTERVENTIONS, INCLUDING ANGER MANAGEMENT, SOCIAL-SKILLS TRAINING, PROBLEM SOLVING
- RESISTING PEER PRESSURE
- SUICIDE PREVENTION
- NUTRITION
- MENTAL-HEALTH ISSUES
- GENDER-SPECIFIC ISSUES
- CASE-MANAGEMENT PLANNING AND IMPLEMENTATION

FINDINGS:

Otay Mesa Detention Center does not house juvenile inmates/detainees.

Standard #4-ALDF-2C-02

WHEN A CANINE UNIT IS OPERATED BY THE FACILITY:

1. THERE IS A MISSION STATEMENT, INCLUDING GOALS AND OBJECTIVES;
2. THE CIRCUMSTANCES IN WHICH CANINE UNITS MAY BE USED ARE CLEARLY DEFINED;
3. EMERGENCY PLANS ARE INTEGRATED INTO THE OVERALL EMERGENCY PLANS OF THE FACILITY;
4. THERE ARE CRITERIA FOR SELECTING, TRAINING AND CARING FOR ANIMALS;

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001344

5. THERE ARE CRITERIA FOR THE SELECTION, TRAINING, AND PHYSICAL FITNESS OF HANDLERS;
6. THERE IS AN APPROVED SANITATION PLAN THAT COVERS INSPECTION, HOUSING, TRANSPORTATION AND DAILY GROOMING FOR THE ANIMALS; AND THERE ARE DAILY AND CURRENT RECORDS ON TRAINING, CARE OF DOGS AND SIGNIFICANT EVENTS.

FINDINGS:

Otay Mesa Detention Center does not have a canine unit. Canine services are provided by the Border Patrol Agents stationed in San Diego, if needed.

Standard #4-ALDF-4A-14

WHEN REQUIRED BY STATUTE, FOOD PRODUCTS THAT ARE GROWN OR PRODUCED WITHIN THE SYSTEM ARE INSPECTED AND APPROVED BY THE APPROPRIATE GOVERNMENT AGENCY; THERE IS A DISTRIBUTION SYSTEM THAT ENSURES PROMPT DELIVERY OF FOODSTUFFS TO FACILITY KITCHENS.

FINDINGS:

Otay Mesa Detention Center does not grow or produce any food products for use in the kitchen.

Standard #4-ALDF-5A-04

INMATES WITH DRUG AND ALCOHOL ADDICTION PROBLEMS ARE PROVIDED WITH SUBSTANCE ABUSE PROGRAMS, TO INCLUDE MONITORING AND DRUG TESTING.

FINDINGS:

Conventional substance abuse programs found in longer-term detention operations for normal local populations are not feasible here. This pre-trial population of illegal aliens serves an average of 83 days in the facility, followed by deportation or a rare release with little or no notice.

Otay Mesa Detention Center does not offer a substance program. The ICE contract does not require drug testing. The USMS contract requires random drug testing on 5% of detainees monthly.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001345

Standard #4-ALDF-5A-05

THERE IS A TREATMENT PHILOSOPHY WITHIN THE CONTEXT OF THE TOTAL CORRECTIONAL SYSTEM AS WELL AS GOALS AND MEASURABLE OBJECTIVES. THESE DOCUMENTS ARE REVIEWED AT LEAST ANNUALLY AND UPDATED AS NEEDED.

FINDINGS:

This pre-trial population of illegal aliens does not permit a significant treatment philosophy since most detainees will be deported in a very short time due to their illegal status.

Otay Mesa Detention Center does have measurable goals and objectives, primarily of a safety and security nature, and they are reviewed annually.

Standard #4-ALDF-5A-06

THERE IS AN APPROPRIATE RANGE OF PRIMARY TREATMENT SERVICES FOR ALCOHOL AND OTHER SUBSTANCE-ABUSING INMATES THAT INCLUDE, AT A MINIMUM, THE FOLLOWING:

- INMATE DIAGNOSIS
- IDENTIFIED PROBLEM AREAS
- INDIVIDUAL TREATMENT OBJECTIVES
- TREATMENT GOALS
- COUNSELING NEEDS
- DRUG EDUCATION PLAN
- RELAPSE PREVENTION AND MANAGEMENT
- CULTURALLY SENSITIVE TREATMENT OBJECTIVES, AS APPROPRIATE
- THE PROVISION OF SELF-HELP GROUPS AS AN ADJUNCT TO TREATMENT
- PRERELEASE AND TRANSITIONAL SERVICE NEEDS
- COORDINATION EFFORTS WITH COMMUNITY SUPERVISION AND TREATMENT STAFF DURING THE PRERELEASE PHASE TO ENSURE A CONTINUUM OF SUPERVISION AND TREATMENT.

FINDINGS:

Conventional substance abuse programs found in ALDF operations for normal local populations are not feasible here. This pre-trial population of illegal aliens serves an average of 83 days in the facility, followed by deportation or a rare release with little or no notice.

Defining longer-term treatment or relapse prevention needs, and providing pre-release preparation and coordination with the community, is not practicable or feasible.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001346

Otay Mesa Detention Center does not offer a substance program. The ICE contract does not require drug testing. The USMS contract requires random drug testing on 5% of detainees monthly.

Standard #4-ALDF-5A-07

THE FACILITY USES A COORDINATED STAFF APPROACH TO DELIVER TREATMENT SERVICES. THIS APPROACH TO SERVICE DELIVERY IS DOCUMENTED IN TREATMENT PLANNING CONFERENCES AND IN INDIVIDUAL TREATMENT FILES.

FINDINGS:

Treatment planning conferences and development of individual treatment files are impractical within the normal 83-day average stay. The nature of the population and their potential issues mandate that staffing coordination focus on threat groups, criminal gang affiliations and potential terrorist identification to ensure safety of the facility, staff, and detainees.

Standard #4-ALDF-5A-08

THERE ARE INCENTIVES FOR TARGETED TREATMENT PROGRAMS TO INCREASE AND MAINTAIN THE INMATE'S MOTIVATION FOR TREATMENT.

FINDINGS:

This very short-term illegal alien population has inadequate time for treatment during the average 83-day stay, so there are no incentives and no targeted treatment.

Standard #4-ALDF-5B-13

ALL INMATES HELD FOR 30 OR MORE DAYS WHO WILL BE RELEASED TO THE COMMUNITY ARE PROVIDED WITH PREPARATION FOR RELEASE THAT INCLUDES INFORMATION ABOUT COMMUNITY RESOURCES.

FINDINGS:

Virtually every detainee is deported; release to the community is extremely rare and unpredictable. A prerelease preparation program is not viable in this facility.

Standard #4-ALDF-5B-14

WHEN THE FACILITY IS DESIGNATED TO OPERATE ANY TYPE OF PRETRIAL INTERVENTION SERVICE OR OTHER RELEASE PROGRAMS, ITS AUTHORITY AND RESPONSIBILITY ARE STATED BY STATUTE OR ADMINISTRATIVE REGULATION.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001347

FINDINGS:

The Otay Mesa Detention Center population cannot qualify to use pretrial intervention or release programs but can seek assistance to apply for asylum.

Standard #4-ALDF-5B-15

WHEN A PRETRIAL INTERVENTION PROGRAM, DIVERSION PROGRAM, PRETRIAL RELEASE PROGRAM, OR SUPERVISED RELEASE PROGRAM IS CONDUCTED IN THE FACILITY, SUFFICIENT STAFF, SPACE, AND EQUIPMENT ARE PROVIDED TO SERVICE THE PROGRAM.

FINDINGS:

The Otay Mesa Detention Center does not conduct a pretrial intervention, diversion, pretrial release, or supervised release program due to the type of detainees housed.

Standard #4-ALDF-5B-16

WHERE TEMPORARY RELEASE PROGRAMS EXIST, THE PROGRAMS HAVE THE FOLLOWING ELEMENTS:

WRITTEN OPERATIONAL PROCEDURES
CAREFUL SCREENING AND SELECTION PROCEDURES
WRITTEN RULES OF INMATE CONDUCT
A SYSTEM FOR EVALUATING PROGRAM EFFECTIVENESS
EFFORTS TO OBTAIN COMMUNITY COOPERATION AND SUPPORT

FINDINGS:

The Otay Mesa Detention Center does not offer a temporary release program.

Standard #4-ALDF-5B-17

WHERE WORK RELEASE AND/OR EDUCATIONAL RELEASE ARE AUTHORIZED, THE FACILITY ADMINISTRATOR HAS AUTHORITY TO APPROVE OR DISAPPROVE PARTICIPATION FOR EACH INMATE.

FINDINGS:

The Otay Mesa Detention Center policy and contracts do not allow for work or education release programs.

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001348

Standard #4-ALDF-5C-07

THE FACILITY REQUIRES ALL SENTENCED INMATES TO WORK IF THEY ARE NOT ASSIGNED TO PROGRAMS.

FINDINGS:

Otay Mesa Detention center does not house sentenced inmates. ICE and USMS detainees are all pretrial and awaiting deportation. The contracts do not require detainees to work, but they may volunteer to work for minor reimbursement.

Standard #4-ALDF-5C-09

WHERE STATUTE PERMITS, INMATES ARE ASSIGNED TO PUBLIC WORKS AND COMMUNITY SERVICE PROJECTS.

FINDINGS:

Contract requirements do not permit community projects or work movement away from the facility.

Standard #4-ALDF-5C-13

WHERE AN INDUSTRIES PROGRAM EXISTS, ITS ESTABLISHMENT IS AUTHORIZED AND AREAS OF AUTHORITY, RESPONSIBILITY, AND ACCOUNTABILITY ARE DELINEATED.

FINDINGS:

The Otay Mesa Detention Center does not operate an industries program.

Standard #4-ALDF-5C-14

THE NUMBER OF INMATES ASSIGNED TO INDUSTRIES OPERATIONS MEETS THE REALISTIC WORKLOAD NEEDS OF EACH OPERATING UNIT.

FINDINGS:

The Otay Mesa Detention Center does not operate an industries program.

Standard #4-ALDF-5C-15

THERE IS A COMPREHENSIVE QUALITY CONTROL PROCESS.

AMERICAN OVERSIGHT

FINDINGS:

The Otay Mesa Detention Center does not operate an industries program.

Standard #4-ALDF-5C-16

A COST ACCOUNTING SYSTEM FOR EACH INDUSTRIES UNIT IS DESIGNED, IMPLEMENTED, AND MAINTAINED IN ACCORDANCE WITH GENERALLY ACCEPTED ACCOUNTING PRINCIPLES.

FINDINGS:

The Otay Mesa Detention Center does not operate an industries program.

Standard #4-ALDF-7F-02

CONSISTENT WITH THE LAWS OF THE JURISDICTION, THERE IS A SYSTEM FOR PROVIDING NOTIFICATION TO THE REGISTERED VICTIM(S) OF A CRIME UPON THE RELEASE FROM CONFINEMENT OF THE CONVICTED INMATE OR IN THE EVENT OF AN ESCAPE. FOLLOW UP NOTIFICATION TO THE VICTIM(S) OCCURS WHEN ESCAPEES ARE RETURNED TO CUSTODY.

FINDINGS:

The Otay Mesa Detention Center population is illegal aliens and there is no victim notification program necessary or in effect.

AMERICAN OVERSIGHT

2020-ICFO-29037 2351 of 2966

Name of Facility: Otay Mesa Detention Center
Number of Months Data Collected: 12 (October 2018 through September 2019)

		ALDF Outcome Measure Worksheet		
1A	**Outcome Measure**	**Numerator/Denominator** **The community, staff, contractors, volunteers, and inmates are protected from injury and illness caused by the physical environment.**	**Value**	**Calculat-ed O.M**
	(1)	Number of worker compensation claims filed for injuries that resulted from the physical environment in the past 12 months.	58	
	divided by	Average number of Full-Time Equivalent (FTE) staff positions in the past 12 months.	(b)(7)(E)	
	(2)	Number of illnesses requiring medical attention as a result of the physical environment of the facility in the past 12 months.	1	
	divided by	Average daily population in the past 12 months.	1420	.0007
	(3)	Number of illnesses requiring medical attention as a result of the physical environment of the facility in the past 12 months.	1	
	divided by	The number of admissions in the past 12 months.	6812	.0001
	(4)	Number of physical injuries or emotional trauma requiring treatment as a result of the physical environment of the facility in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	1420	0
	(5)	Number of physical injuries or emotional trauma requiring treatment as a result of the physical environment of the facility in the past 12 months.	0	
	divided by	The number of admissions in the past 12 months.	6812	0
	(6)	Number of sanitation or health code violations identified by external agencies in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	1420	0
	(7)	Number of health code violations corrected in the past 12 months.	0	
	divided by	The number of health code violations identified in the past 12 months.	0	0
	(8)	Number of inmate grievances related to safety or sanitation found in favor of inmates in the past 12 months.	16	

AMERICAN OVERSIGHT

	divided by	The number of inmate's grievances related to safety or sanitation in the past 12 months.	0	.1875
	(9)	Number of fire code violations corrected in the past 12 months.	0	
	divided by	The number of fire code violations cited by jurisdictional authority in the past 12 months.	0	0
	(10)	Number of inmate injuries resulting from fires requiring medical treatment in a 12-month period.	0	
	divided by	The average daily population in the past 12 months.	1420	0
	(11)	Number of inmate injuries (other than by fire) requiring medical treatment in the past 12 months.	800	
	divided by	The average daily population of inmates in the past 12 months.	1420	.5633
	(12)	Number of staff injuries resulting from fires requiring medical treatment in the past 12 months.	0	
	divided by	The average daily population of staff in the past 12 months.	(b)(7)(E)	
	(13)	Number of staff injuries (other than fire) requiring medical treatment in the past 12 months.		
	divided by	The average daily population of staff in the past 12 months.		
	(14)	Number of inmate lawsuits related to safety or sanitation found in favor of the inmate in the past 12 months.	0	
	divided by	The number of inmate lawsuits related to safety or sanitation in the past 12 months.	0	0
1B		**Vehicles are maintained and operated in a manner that prevents harm to the community, staff, contractors, volunteers, and inmates.**		
	(1)	Number of vehicle accidents resulting in property damage in the past 12 months.	4	
	divided by	The average daily population in the past 12 months.	1420	.0028
	(2)	Number of vehicle accidents resulting in injuries requiring medical treatment for any party in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	1420	0
	(3)	Amount dollar of damage from vehicle accidents in the past 12 months.	2,397	
	divided by	The average daily population in the past 12 months.	1420	1.688

AMERICAN OVERSIGHT

1C		**The number and severity of emergencies are minimized. When emergencies occur, the response minimizes the severity.**		
	(1)	Number of emergencies, caused by forces external to the facility, that result in property damage in the past 12 months.	0	
	divided by	The number emergencies.	0	0
	(2)	Number of injuries, caused by forces external to the facility, requiring medical attention that resulted from emergencies in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	1420	0
	(3)	Number of times that normal facility operations were suspended due to emergencies caused by forces external to the facility in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	1420	0
	(4)	Number of hours that facility operations were suspended due to emergencies caused by forces external to the facility in the past 12 months.	0	
	divided by	The number of emergencies caused by forces external to the facility.	0	0
	(5)	Number of emergencies that were not caused by forces external to the facility that resulted in property damage in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	1420	0
	(6)	Number of injuries requiring medical attention that resulted from emergencies that were not caused by forces external to the facility in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	1420	.0000
	(7)	Number of times that normal facility operations were suspended due to emergencies that were not caused by forces external to the facility in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	1420	0
	(8)	Number of hours that facility operations were suspended due to emergencies that were not caused by forces external to the facility in the past 12 months.	0	
	divided by	The number of emergencies.	0	0

AMERICAN OVERSIGHT

	(9)	Number of injuries resulting from fires requiring medical treatment in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	1420	0
	(10)	Number of fires that resulted in property damage in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	1420	0
	(11)	Amount dollar of property damage from fire in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	1420	0
	(12)	Number of code violations cited in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	0	0
	(13)	Number of incidents involving toxic or caustic materials in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	1420	0
	(14)	Number of incidents of inventory discrepancies in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	1420	0
2A	**Outcome Measure**	**Numerator/Denominator** **The community, staff, contractors, volunteers, and inmates are protected from harm. Events that pose risk of harm are prevented. The number and severity of events are minimized.**	**Value**	**Calculat-ed O.M**
	(1)	Number of incidents involving harm in the past 12 months.	24	
	divided by	The average daily population in the past 12 months.	1420	.0169
	(2)	Number of incidents in the past 12 months involving harm.	24	
	divided by	The number of admissions in the past 12 months.	6812	.0032
	(3)	Number of physical injuries or emotional trauma requiring treatment as a result of incidents in the past 12 months.	22	
	divided by	The average daily population in the past 12 months.	1420	.0154
	(4)	Number of physical injuries or emotional trauma requiring treatment as a result of the incidents in the past 12 months.	22	

AMERICAN OVERSIGHT

DHS-ICE-20-0618-A-001355

	divided by	The number of admissions in the past 12 months.	6812	.0032
	(5)	Number of unauthorized inmate absences from the facility in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	1420	0
	(6)	Number of instances of unauthorized access to the facility in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	1420	0
2B		**Physical force is used only in instances of self-protection, protection of the inmate or others, prevention of property damage, or prevention of escape.**		
	(1)	Number of instances in which force was used in the past 12 months.	62	
	divided by	The average daily population in the past 12 months.	1420	.0436
	(2)	Number of instances in which force was used in the past 12 months.	62	
	divided by	The number of admissions in the past 12 months.	6812	.0091
	(3)	Number of times that staff use of force were found to have been inappropriate in the past 12 months.	5	
	divided by	The number of instances in which force was used.	62	.0806
	(4)	Number of inmate grievances filed alleging inappropriate use of force in the past 12 months.	0	
	divided by	The average daily population in the past 12 months.	1420	0
	(5)	Number of grievances alleging inappropriate use of force decided in favor of inmate in the past 12 months.	0	
	divided by	The number of grievances alleging inappropriate use of force filed.	0	0
	(6)	Number of injuries requiring medical treatment resulting from staff use of force in the past 12 months.	6	
	divided by	The average daily population in the past 12 months.	1420	.0042
2C		**Contraband is minimized. It is detected when present in the facility.**		
	(1)	Number of incidents involving contraband in the past 12 months.	33	
	divided by	The average daily population in the past 12 months.	1420	.0232

AMERICAN OVERSIGHT
