4. Resident care standards in accordance with rule 59A-36.007, F.A.C.;

5. Medication practices in accordance with rule 59A-36.008, F.A.C.;

6. Do not resuscitate orders (DNROs) in accordance with rule 59A-36.009, F.A.C.;

7. Staffing standards in accordance with rule 59A-36.010, F.A.C.;

8. Staff training requirements and competency training in accordance with rule 59A-36.011, F.A.C.;

9. Alzheimer's Disease or Related Disorders training provider and curriculum approval in accordance with rule 58A-5.0194, F.A.C.;

10. Food service standards in accordance with rule 59A-36.012, F.A.C.;

11. Fiscal standards in accordance with rule 59A-36.013, F.A.C.;

12. Physical plant standards in accordance with rule 59A-36.014, F.A.C.;

13. Records in accordance with rule 59A-36.015, F.A.C.;

14. Resident contracts in accordance with rule 59A-36.018, F.A.C.;

15. Emergency management in accordance with rule 59A-36.019, F.A.C.

(d) The facility must provide agency staff with requested documents in a timely manner and allow the agency staff to obtain copies.

(e) Surveyor(s) conducts specific and general observations throughout the survey to determine compliance with: dietary standards, medication standards, infection control standards, resident activities, assistance with activities of daily living, facility practices, and resident daily routines.

(f) For facilities licensed to provide specialty services such as Limited Mental Health, Extended Congregate Care, and Limited Nursing Services: the surveyor(s) reviews the required components in accordance with rules 59A-36.020, 59A-36.021, and 59A-36.021, F.A.C.

Rulemaking Authority 429.28(3)(a) FS. Law Implemented 429.28 FS. History–New 11-28-16.

59A-36.002 Definitions.

In addition to the terms defined in section 429.02, F.S., the following definitions are applicable in this rule chapter:

(1) "Advertise" means any written, printed, oral, visual, or electronic promotion, statement of availability, qualifications, services offered, or other similar communication appearing in or on television, radio, the Internet, billboards, newspapers, magazines, business cards, flyers, brochures or other medium for the purpose of attracting potential residents to an assisted living facility. A complimentary listing of a licensed facility's name, address, and telephone number in the telephone directory is not considered advertising.

(2) "Agency Central Office" means the Agency for Health Care Administration Assisted Living Unit (ALU), located at 2727

AMERICAN OVERSIGHT

Mahan Drive, Mail Stop 30, Tallahassee, FL 32308-5403. The ALU telephone number and website address are (850)412-4304, and http://ahca.myflorida.com/MCHQ/Health_Facility_Regulation/Assisted_Living/alf.shtml.

(3) "Agency Field Office" means the Agency for Health Care Administration's Office in a particular geographic area. Information regarding local offices is available online at: http://ahca.myflorida.com/mchq/index.shtml#six.

(4) "Apartment" means a self-contained dwelling unit with a bathroom, kitchen area, and living and sleeping space that is contracted for use as a residence by one or more persons who maintain a common household.

(5) "Anti-Embolism Stockings and Hosiery" means prescribed close-fitting elastic-type coverings for therapeutic treatment of the legs. They may be knee high or thigh high length and have transparent, open-toe, or similar foot design.

(6) "Assistance with Activities of Daily Living" means individual assistance with the following:

(a) Ambulation – Providing physical support to enable the resident to move about within or outside the facility. Physical support includes supporting or holding the resident's hand, elbow, or arm; holding on to a support belt worn by the resident to assist in providing stability or direction while the resident ambulates; or pushing the resident's wheelchair. The term does not include assistance with transfer.

(b) Bathing – Assembling towels, soaps, or other necessary supplies; helping the resident in and out of the bathtub or shower; turning the water on and off; adjusting water temperatures; washing and drying portions of the body that are difficult for the resident to reach; or being available while the resident is bathing.

(c) Dressing – Helping residents to choose, put on, and remove clothing.

(d) Eating – Helping residents with or by cutting food, pouring beverages, or feeding residents who are unable to feed themselves.

(e) Grooming – Helping residents with shaving, oral care, care of the hair, or nail care.

(f) Toileting – Assisting the resident to the bathroom, helping the resident to undress, positioning the resident on the commode, and helping the resident with related personal hygiene including assistance with changing an adult brief and assistance with the routine emptying of a catheter or ostomy bag.

(7) "Assistance With Transfer" means providing verbal and physical cuing or physical assistance or both while the resident moves between bed and a standing position or between bed and chair or wheelchair. The term does not include total physical assistance with transfer provided by staff to residents.

(8) "Bedridden" means confined to bed because of inability to ambulate or transfer to a wheelchair even with assistance, or to sit safely in a chair or wheelchair without personal assistance or physical restraint.

(9) "Capacity" means the number of residents for which a facility has been licensed to provide residential care.

(10) "Case Manager" means an individual employed by or under contract with any agency or organization, public or private, who has the responsibility for assessing resident needs; planning services for the resident; coordinating and assisting residents with gaining access to needed medical, mental health, social, housing, educational or other services; monitoring service delivery; and evaluating the effects of service delivery.

(11) "Certified Nursing Assistant (CNA)" means an individual certified under chapter 464, part II, F.S.

(12) "Day Care Participant" means an individual who receives services at a facility for less than 24 hours per day.

(13) "Deficiency" means an instance of non-compliance with the requirements of part II of chapter 408, F.S., part I of chapter 429, F.S., rule chapter 59A-35, F.A.C., and this rule chapter.

(14) "Direct Care Staff" means Staff in Regular Contact or Staff in Direct Contact with residents who provide personal or nursing services to residents, including administrators and managers providing such services.

(15) "Distinct Part" means designated bedrooms or apartments, bathrooms and a living area; or a separately identified wing, floor, or building that includes bedrooms or apartments, bathrooms and a living area. The distinct part may include a separate dining area, or meals may be served in another part of the facility.

(16) "Elopement" means an occurrence in which a resident leaves a facility without following facility policy and procedures.

(17) "Food Service" means the storage, preparation, service, and clean up of food intended for consumption in a facility either by facility staff or through a formal agreement that meals will be regularly catered by a third party.

(18) "Glucose Meter" or "glucometer" means a medical device that determines the approximate concentration of glucose in the blood.

(19) "Health Care Provider" means a physician or physician's assistant licensed under chapter 458 or 459, F.S., or advanced registered nurse practitioner licensed under chapter 464, F.S.

AMERICAN OVERSIGHT

(20) "Licensed Dietitian or Nutritionist" means a dietitian or nutritionist licensed under chapter 468, part X, F.S.

(21) "Local fire safety authority" means the authority having jurisdiction as defined in rule chapter 69A-40, F.A.C.

(22) "Long-term Care Ombudsman Program (LTCOP)" means the long-term care ombudsman program established under chapter 400, Part I, F.S.

(23) "Manager" means an individual who is authorized to perform the same functions as a facility administrator, and is responsible for the operation and maintenance of an assisted living facility while under the supervision of the administrator of that facility. A manager does not include staff authorized to perform limited administrative functions during an administrator's temporary absence.

(24) "Mental Disorder" for the purposes of identifying a mental health resident, means schizophrenia and other psychotic disorders; affective disorders; anxiety related disorders; and personality and dissociative disorders. However, mental disorder does not include residents with a primary diagnosis of Alzheimer's disease, other dementias, or mental retardation.

(25) "Mental Health Care Provider" means an individual, agency, or organization providing mental health services to clients of the Department of Children and Families; an individual licensed by the state to provide mental health services; or an entity employing or contracting with individuals licensed by the state to provide mental health services.

(26) "Mental Health Case Manager" means a case manager employed by or under contract to a mental health care provider to assist mental health residents residing in a facility holding a limited mental health license.

(27) "Nurse" means a licensed practical nurse (LPN), registered nurse (RN), or advanced registered nurse practitioner (ARNP) licensed under chapter 464, F.S.

(28) "Nursing Assessment" means a written review of information collected from observation and interaction with a resident, including the resident's record and any other relevant sources of information, the analysis of the information, and recommendations for modification of the resident's care, if warranted. The assessment must contain the signature and credential initials of the person who conducted the assessment.

(29) "Nursing Progress Notes" or "Progress Report" means a written record of nursing services, other than medication administration or the taking of vital signs, provided to each resident who receives such services in a facility with a limited nursing or extended congregate care license. The progress notes must be completed by the nurse who delivered the service; must describe the date, type, scope, amount, duration, and outcome of services that are rendered; must describe the general status of the resident's health; must describe any deviations in the residents health; must describe any contact with the resident's physician; and must contain the signature and credential initials of the person rendering the service.

(30) "Optional State Supplementation (OSS)" means the state program providing monthly payments to eligible residents pursuant to section 409.212, F.S., and rule chapter 65A-2, F.A.C.

(31) "Owner" means a person, partnership, association, limited liability company, or corporation, that owns or leases the facility that is licensed by the agency. The term does not include a person, partnership, association, limited liability company, or corporation that contracts only to manage or operate the facility.

(32) "Physician" means an individual licensed under chapter 458 or 459, F.S.

(33) "Pill organizer" means a container that is designed to hold solid doses of medication and is divided according to day or time increments.

(34) "Registered Dietitian" means an individual registered with the Commission on Dietetic Registration, the accrediting body of the Academy of Nutrition and Dietetics.

(35) "Respite Care" means facility-based supervision of an impaired adult for the purpose of relieving the primary caregiver.

(36) "Significant Change" means either a sudden or major shift in the behavior or mood of a resident that is inconsistent with the resident's diagnosis, or a deterioration in the resident's health status such as unplanned weight change, stroke, heart condition, enrollment in hospice, or stage 2, 3 or 4 pressure sore. Ordinary day-to-day fluctuations in a resident's functioning and behavior, short-term illnesses such as colds, or the gradual deterioration in the resident's ability to carry out the activities of daily living that accompanies the aging process are not considered significant changes.

(37) "Staff" means any individual employed by a facility, contracting with a facility to provide direct or indirect services to residents, or employed by a firm under contract with a facility to provide direct or indirect services to residents when present in the facility. The term includes volunteers performing any service that counts toward meeting any staffing requirement of this rule chapter.

(38) "Staff in Regular Contact" or "Staff in Direct Contact" mean all staff whose duties may require them to interact with

AMERICAN OVERSIGHT

residents on a daily basis.

(39) "Third Party" means any individual or business entity providing services to residents in a facility that is not staff of the facility.

(40) "Universal Precautions" are a set of precautions designed to prevent transmission of human immunodeficiency virus (HIV), hepatitis B virus (HBV), and other bloodborne pathogens when providing first aid or health care. Universal precautions require that the blood and certain body fluids of all residents be considered potentially infectious for HIV, HBV, and other bloodborne pathogens.

(41) "Unscheduled Service Need" means a need for a personal service, nursing service, or mental health intervention that cannot be predicted in advance and that must be met promptly to ensure that the health, safety, and welfare of residents is preserved.

Rulemaking Authority 429.41, 429.929 FS. Law Implemented 429.07, 429.075, 429.11, 429.14, 429.19, 429.41, 429.47, 429.52, 429.905 FS. History–New 9-30-92, Formerly 10A-5.0131, Amended 10-30-95, 6-2-96, 4-20-98, 11-2-98, 10-17-99, 1-9-02, 7-30-06, 4-15-10, 4-17-14, 5-10-18, Formerly 58A-5.0131, 7-1-19.

59A-36.003 Licensing and Change of Ownership.

(1) LICENSE APPLICATION. An applicant for a standard assisted living facility license, a limited mental health license, an extended congregate care license, or a limited nursing services license may apply for licensure pursuant to the requirements of chapters 408, part II, 429, part I, F.S., and rule chapter 59A-35, F.A.C.

(2) CHANGE OF OWNERSHIP. In addition to the requirements for a change of ownership contained in chapter 408, part II, F.S., section 429.12, F.S., and rule chapter 59A-35, F.A.C., the following provisions relating to resident funds apply pursuant to section 429.27, F.S.:

(a) At the time of transfer of ownership, all resident funds on deposit, advance payments of resident rents, resident security deposits, and resident trust funds held by the current licensee must be transferred to the applicant. Proof of such transfer must be provided to the agency at the time of the agency survey and before the issuance of a standard license. This provision does not apply to entrance fees paid to a continuing care facility subject to the acquisition provisions in section 651.024, F.S.

(b) The transferor must provide to each resident a statement detailing the amount and type of funds held by the facility and credited to the resident.

(c) The transferee must notify each resident in writing of the manner in which the transferee is holding the resident's funds and state the name and address of the depository where the funds are being held, the amount held, and type of funds credited.

(3) CONDITIONAL LICENSE. Except as provided in section 429.14, F.S., the agency may issue a conditional license to a facility if, at the time of license renewal the facility is found to have uncorrected violations that the facility has had an opportunity to correct. The issuance of a conditional license does not change the biennial license expiration date.

(4) OSS RESIDENT DETERMINATION. With respect to the fee per bed required for a standard license, the number of OSS recipients claimed shall be the average number per month residing in the facility during the previous license period. An additional per bed charge shall be added to the bed fee for facilities whose average number of OSS residents per month was less than the number of beds designated for OSS recipients during the previous license period.

Rulemaking Authority 429.17, 429.27, 429.41 FS. Law Implemented 429.04, 429.07, 429.075, 429.11, 429.12, 429.17, 429.27, 429.41 FS. History–New 5-14-81, Amended 1-6-82, 5-19-83, 9-17-84, Formerly 10A-5.14, Amended 10-20-86, 6-21-88, 8-15-90, 9-30-92, Formerly 10A-5.014, Amended 10-30-95, 4-20-98, 10-17-99, 7-30-06, 4-17-14, 5-10-18, Formerly 58A-5.014, 7-1-19.

59A-36.004 License Requirements.

(1) SERVICE PROHIBITION. An assisted living facility may not represent that it provides any service other than a service for which it is licensed to provide.

(2) CHANGE IN USE OF SPACE REQUIRING AGENCY CENTRAL OFFICE APPROVAL. A change in the use of space that increases or decreases a facility's capacity must not be made without prior approval from the Agency Central Office. Approval must be based on the compliance with the physical plant standards provided in rule 59A-36.014, F.A.C., as well as documentation of compliance with applicable fire safety and sanitation inspection requirements referenced in rule 59A-36.005, F.A.C.

(3) CHANGE IN USE OF SPACE REQUIRING AGENCY FIELD OFFICE APPROVAL. A change in the use of space that involves converting an area to resident use, which has not previously been inspected for such use, must not be made without prior approval from the Agency Field Office. Approval must be based on compliance with the physical plant standards provided in rule

AMERICAN OVERSIGHT

59A-36.014, F.A.C., as well as documentation of compliance with applicable fire safety and sanitation inspection standards referenced in rule 59A-36.005, F.A.C.

(4) CONTIGUOUS PROPERTY. If a facility consists of more than one building, all buildings included under a single license must be on contiguous property. "Contiguous property" means property under the same ownership separated by no more than a two-lane street that traverses the property. A licensed location may be expanded to include additional contiguous property with the approval of the agency to ensure continued compliance with the requirements and standards of chapters 408, Part II, 429, Part I, F.S. and rule chapter 59A-35, F.A.C., and this rule chapter.

(5) PROOF OF INSPECTIONS. A copy of the annual fire safety and sanitation inspections described in rule 59A-36.005, F.A.C., must be submitted annually to the Agency Central Office. The annual inspections must be submitted no later than 30 calendar days after the inspections. Failure to comply with this requirement may result in administrative action pursuant to chapter 408, part II, and section 429.14, F.S., and rule chapter 59A-35, F.A.C.

(6) RESIDENTS RECEIVING STATE-FUNDED SERVICES. Upon request, the facility administrator or designee must identify residents receiving state-funded services to the agency and the department for monitoring purposes authorized by state and federal laws.

Rulemaking Authority 429.41 FS. Law Implemented 429.41, 429.44 FS. History–New 5-15-81, Amended 1-6-82, 9-17-84, Formerly 10A-5.16, Amended 6-21-88, 9-30-92, Formerly 10A-5.016, Amended 10-30-95, 10-17-99, 7-30-06, 4-15-10, 4-17-14, Formerly 58A-5.016, 7-1-19.

59A-36.005 Inspection Responsibilities.

(1) County health departments are responsible for inspecting all license applicants and licensed facilities in matters regulated by:

(a) Rule 64E-12.004, F.A.C., and rule chapter 64E-11, F.A.C., relating to food hygiene.

(b) Chapter 64E-12, F.A.C., relating to sanitary practices in community-based residential facilities.

(c) Chapter 64E-16, F.A.C., relating to biomedical waste.

(2) The local authority having jurisdiction over fire safety or State Fire Marshal is responsible for inspecting all license applicants and licensed facilities in matters regulated by section 429.41, F.S., relating to uniform fire safety standards and chapter 69A-40, F.A.C., Uniform Fire Safety Standards for Assisted Living Facilities.

(3) The agency is responsible for inspecting all license applicants and licensed facilities in all other matters regulated by this rule chapter.

Rulemaking Authority 429.41 FS. Law Implemented 429.41 FS. History–New 8-15-90, Formerly 10A-5.0161, Amended 10-30-95, 10-17-99, 3-13-14, Formerly 58A-5.0161, 7-1-19.

59A-36.006 Admission Procedures, Appropriateness of Placement and Continued Residency Criteria.

(1) ADMISSION CRITERIA.

(a) An individual must meet the following minimum criteria in order to be admitted to a facility holding a standard, limited nursing services, or limited mental health license:

1. Be at least 18 years of age.

2. Be free from signs and symptoms of any communicable disease that is likely to be transmitted to other residents or staff. An individual who has human immunodeficiency virus (HIV) infection may be admitted to a facility, provided that the individual would otherwise be eligible for admission according to this rule.

3. Be able to perform the activities of daily living, with supervision or assistance if necessary.

4. Be able to transfer, with assistance if necessary. The assistance of more than one person is permitted.

5. Be capable of taking medication, by either self-administration, assistance with self-administration, or administration of medication.

a. If the resident needs assistance with self-administration of medication, the facility must inform the resident of the professional qualifications of facility staff who will be providing this assistance. If unlicensed staff will be providing assistance with self-administration of medication, the facility must obtain written informed consent from the resident or the resident's surrogate, guardian, or attorney-in-fact.

b. The facility may accept a resident who requires the administration of medication if the facility employs a nurse who will provide this service or the resident, or the resident's legal representative, designee, surrogate, guardian, or attorney-in-fact, contracts with a third party licensed to provide this service to the resident.

AMERICAN OVERSIGHT

6. Not have any special dietary needs that cannot be met by the facility.

7. Not be a danger to self or others as determined by a physician, or mental health practitioner licensed under chapter 490 or 491, F.S.

8. Not require 24-hour licensed professional mental health treatment.

9. Not be bedridden.

10. Not have any stage 3 or 4 pressure sores. A resident requiring care of a stage 2 pressure sore may be admitted provided that:

a. The resident either:

(I) Resides in a standard or limited nursing services licensed facility and contracts directly with a licensed home health agency or a nurse to provide care; or

(II) Resides in a limited nursing services licensed facility and care is provided by the facility pursuant to a plan of care issued by a health care provider;

b. The condition is documented in the resident's record and admission and discharge logs; and,

c. If the resident's condition fails to improve within 30 days as documented by a health care provider, the resident must be discharged from the facility.

11. Residents admitted to standard, limited nursing services, or limited mental health licensed facilities may not require any of the following nursing services:

a. Artificial airway management of any kind, except that of continuous positive airway pressure may be provided through the use of a CPAP or bipap machine;

b. Assistance with tube feeding,

c. Monitoring of blood gases,

d. Management of post-surgical drainage tubes and wound vacuum devices;

e. The administration of blood products in the facility; or

f. Treatment of surgical incisions or wounds, unless the surgical incision or wound and the underlying condition have been stabilized and a plan of care has been developed. The plan of care must be maintained in the resident's record.

12. In addition to the nursing services listed above, residents admitted to facilities holding only standard and/or limited mental health licenses may not require any of the following nursing services:

a. Hemodialysis and peritoneal dialysis performed in the facility;

b. Intravenous therapy performed in the facility.

13. Not require 24-hour nursing supervision.

14. Not require skilled rehabilitative services as described in rule 59G-4.290, F.A.C.

15. Be appropriate for admission to the facility as determined by the facility administrator. The administrator must base the determination on:

a. An assessment of the strengths, needs, and preferences of the individual;

b. The medical examination report required by section 429.26, F.S., and subsection (2) of this rule, if available;

c. The facility's admission policy and the services the facility is prepared to provide or arrange in order to meet resident needs. Such services may not exceed the scope of the facility's license unless specified elsewhere in this rule; and,

d. The ability of the facility to meet the uniform fire safety standards for assisted living facilities established in rule chapter 69A-40, F.A.C.

(b) A resident who otherwise meets the admission criteria for residency in a standard licensed facility, but who requires assistance with the administration and regulation of portable oxygen or assistance with routine colostomy care of stoma site flange placement, may be admitted to a facility with a standard license as long as the facility has a nurse on staff or under contract to provide the assistance or to provide training to the resident on how to perform these functions themselves.

(c) Nursing staff may not provide training to unlicensed persons, as defined in section 429.256(1)(b), F.S., to perform skilled nursing services, and may not delegate the nursing services described in this section to certified nursing assistants or unlicensed persons. This provision does not restrict a resident or a resident's representative from contracting with a licensed third party to provide the assistance if the facility is agreeable to such an arrangement and the resident otherwise meets the criteria for admission and continued residency in a facility with a standard license.

(d) An individual enrolled in and receiving hospice services may be admitted to an assisted living facility as long as the individual otherwise meets resident admission criteria.

AMERICAN OVERSIGHT

(e) Resident admission criteria for facilities holding an extended congregate care license are described in rule 59A-36.021, F.A.C.

(2) HEALTH ASSESSMENT. As part of the admission criteria, an individual must undergo a face-to-face medical examination completed by a health care provider as specified in either paragraph (a) or (b) of this subsection.

(a) A medical examination completed within 60 calendar days before the individual's admission to a facility pursuant to section 429.26(4), F.S. The examination must address the following:

1. The physical and mental status of the resident, including the identification of any health-related problems and functional limitations,

2. An evaluation of whether the individual will require supervision or assistance with the activities of daily living,

3. Any nursing or therapy services required by the individual,

4. Any special diet required by the individual,

5. A list of current medications prescribed, and whether the individual will require any assistance with the administration of medication,

6. Whether the individual has signs or symptoms of Tuberculosis, Methicillin Resistant Staphylococcus Aureus, Scabies or any other communicable disease, which are likely to be transmitted to other residents or staff,

7. A statement on the day of the examination that, in the opinion of the examining health care provider, the individual's needs can be met in an assisted living facility; and,

8. The date of the examination, and the name, signature, address, telephone number, and license number of the examining health care provider. The medical examination may be conducted by a health care provider licensed under chapter 458, 459 or 464, F.S.

(b) A medical examination completed after the resident's admission to the facility within 30 calendar days of the admission date. The examination must be recorded on AHCA Form 1823, Resident Health Assessment for Assisted Living Facilities, March 2017, which is incorporated by reference and available online at: http://www.flrules.org/Gateway/reference.asp?No=Ref-09170. Faxed or electronic copies of the completed form are acceptable. The form must be completed as instructed.

1. Items on the form that have been omitted by the health care provider during the examination may be obtained by the facility either orally or in writing from the health care provider.

2. Omitted information must be documented in the resident's record. Information received orally must include the name of the health care provider, the name of the facility staff recording the information, and the date the information was provided.

3. Electronic documentation may be used in place of completing the section on AHCA Form 1823 referencing Services Offered or Arranged by the Facility for the Resident. The electronic documentation must include all of the elements described in this section of AHCA Form 1823.

(c) Any information required by paragraph (a), that is not contained in the medical examination report conducted before the individual's admission to the facility must be obtained by the administrator using AHCA Form 1823 within 30 days after admission.

(d) Medical examinations of residents placed by the department, by the Department of Children and Families, or by an agency under contract with either department must be conducted within 30 days before placement in the facility and recorded on AHCA Form 1823 described in paragraph (b).

(e) An assessment that has been conducted through the Comprehensive, Assessment, Review and Evaluation for Long-Term Care Services (CARES) program may be substituted for the medical examination requirements of section 429.26, F.S. and this rule.

(f) Any orders issued by the health care provider conducting the medical examination for medications, nursing, therapeutic diets, or other services to be provided or supervised by the facility may be attached to the health assessment. A health care provider may attach a DH Form 1896, Florida Do Not Resuscitate Order Form, for residents who do not wish cardiopulmonary resuscitation to be administered in the case of cardiac or respiratory arrest.

(g) A resident placed in a facility on a temporary emergency basis by the Department of Children and Families pursuant to section 415.105 or 415.1051, F.S., is exempt from the examination requirements of this subsection for up to 30 days. However, a resident accepted for temporary emergency placement must be entered on the facility's admission and discharge log and counted in the facility census. A facility may not exceed its licensed capacity in order to accept such a resident. A medical examination must be conducted on any temporary emergency placement resident accepted for regular admission.

(3) ADMISSION PACKAGE.

(a) The facility must make available to potential residents a written statement(s) that includes the following information listed below. Providing a copy of the facility resident contract or facility brochure containing all the required information meets this

AMERICAN OVERSIGHT

requirement.

1. The facility's admission and continued residency criteria;

2. The daily, weekly or monthly charge to reside in the facility and the services, supplies, and accommodations provided by the facility for that rate;

3. Personal care services that the facility is prepared to provide to residents and additional costs to the resident, if any;

4. Nursing services that the facility is prepared to provide to residents and additional costs to the resident, if any;

5. Food service and the ability of the facility to accommodate special diets;

6. The availability of transportation and additional costs to the resident, if any;

7. Any other special services that are provided by the facility and additional cost if any;

8. Social and leisure activities generally offered by the facility;

9. Any services that the facility does not provide but will arrange for the resident and additional cost, if any;

10. The facility rules and regulations that residents must follow as described in rule 59A-36.007, F.A.C.;

11. The facility policy concerning Do Not Resuscitate Orders pursuant to section 429.255, F.S., and rule 59A-36.009, F.A.C., and Advance Directives pursuant to chapter 765, F.S.;

12. If the facility is licensed to provide extended congregate care, the facility's residency criteria for residents receiving extended congregate care services. The facility must also provide a description of the additional personal, supportive, and nursing services provided by the facility including additional costs and any limitations on where extended congregate care residents may reside based on the policies and procedures described in rule 59A-36.021, F.A.C.;

13. If the facility advertises that it provides special care for individuals with Alzheimer's disease and related disorders, a written description of those special services as required in section 429.177, F.S.; and,

14. The facility's resident elopement response policies and procedures.

(b) Before or at the time of admission, the resident, or the resident's responsible party, guardian, or attorney-in-fact, if applicable, must be provided with the following:

1. A copy of the resident's contract that meets the requirements of rule 59A-36.018, F.A.C.,

2. A copy of the facility statement described in paragraph (a) of this subsection, if one has not already been provided,

3. A copy of the resident's bill of rights as required by rule 59A-36.007, F.A.C.; and,

4. A Long-Term Care Ombudsman Program brochure that includes the telephone number and address of the district office.

(c) Documents required by this subsection must be in English. If the resident is not able to read, or does not understand English and translated documents are not available, the facility must explain its policies to a family member or friend of the resident or another individual who can communicate the information to the resident.

(4) CONTINUED RESIDENCY. Except as follows in paragraphs (a) through (c) of this subsection, criteria for continued residency in any licensed facility must be the same as the criteria for admission. As part of the continued residency criteria, a resident must have a face-to-face medical examination by a health care provider at least every 3 years after the initial assessment, or after a significant change, whichever comes first. A significant change is defined in rule 59A-36.002, F.A.C. The results of the examination must be recorded on AHCA Form 1823, which is incorporated by reference in paragraph (2)(b) of this rule and must be completed in accordance with that paragraph. Exceptions to the requirement to meet the criteria for continued residency are:

(a) The resident may be bedridden for no more than 7 consecutive days.

(b) A resident requiring care of a stage 2 pressure sore may be retained provided that:

1. The resident contracts directly with a licensed home health agency or a nurse to provide care, or the facility has a limited nursing services license and services are provided pursuant to a plan of care issued by a health care provider,

2. The condition is documented in the resident's record; and,

3. If the resident's condition fails to improve within 30 days, as documented by a health care provider, the resident must be discharged from the facility.

(c) A terminally ill resident who no longer meets the criteria for continued residency may continue to reside in the facility if the following conditions are met:

1. The resident qualifies for, is admitted to, and consents to receive services from a licensed hospice that coordinates and ensures the provision of any additional care and services that the resident may need;

2. Both the resident, or the resident's legal representative if applicable, and the facility agree to continued residency;

3. A licensed hospice, in consultation with the facility, develops and implements a interdisciplinary care plan that specifies the

AMERICAN OVERSIGHT

services being provided by hospice and those being provided by the facility; and,

4. Documentation of the requirements of this paragraph is maintained in the resident's file.

(d) The facility administrator is responsible for monitoring the continued appropriateness of placement of a resident in the facility at all times.

(e) A hospice resident that meets the qualifications of continued residency pursuant to this subsection may only receive services from the assisted living facility's staff which are within the scope of the facility's license.

(f) Assisted living facility staff may provide any nursing service permitted under the facility's license and total help with the activities of daily living for residents admitted to hospice; however, staff may not exceed the scope of their professional licensure or training.

(g) Continued residency criteria for facilities holding an extended congregate care license are described in rule 59A-36.021, F.A.C.

(5) DISCHARGE. If the resident no longer meets the criteria for continued residency, or the facility is unable to meet the resident's needs, as determined by the facility administrator or health care provider, the resident must be discharged in accordance with section 429.28, F.S.

Rulemaking Authority 429.07, 429.41 FS. Law Implemented 429.07, 429.26, 429.28, 429.41 FS. History–New 9-17-84, Formerly 10A-5.181, Amended 10-20-86, 6-21-88, 8-15-90, 9-30-92, Formerly 10A-5.0181, Amended 10-30-95, 6-2-96, 10-17-99, 7-30-06, 10-9-06, 4-15-10, 10-14-10, 4-17-14, 5-10-18, Formerly 58A-5.0181, 7-1-19.

59A-36.007 Resident Care Standards.

An assisted living facility must provide care and services appropriate to the needs of residents accepted for admission to the facility.

(1) SUPERVISION. Facilities must offer personal supervision as appropriate for each resident, including the following:

(a) Monitoring of the quantity and quality of resident diets in accordance with rule 59A-36.012, F.A.C.

(b) Daily observation by designated staff of the activities of the resident while on the premises, and awareness of the general health, safety, and physical and emotional well-being of the resident.

(c) Maintaining a general awareness of the resident's whereabouts. The resident may travel independently in the community.

(d) Contacting the resident's health care provider and other appropriate party such as the resident's family, guardian, health care surrogate, or case manager if the resident exhibits a significant change.

(e) Contacting the resident's family, guardian, health care surrogate, or case manager if the resident is discharged or moves out.

(f) Maintaining a written record, updated as needed, of any significant changes, any illnesses that resulted in medical attention, changes in the method of medication administration, or other changes that resulted in the provision of additional services.

(2) SOCIAL AND LEISURE ACTIVITIES. Residents shall be encouraged to participate in social, recreational, educational and other activities within the facility and the community.

(a) The facility must provide an ongoing activities program. The program must provide diversified individual and group activities in keeping with each resident's needs, abilities, and interests.

(b) The facility must consult with the residents in selecting, planning, and scheduling activities. The facility must demonstrate residents' participation through one or more of the following methods: resident meetings, committees, a resident council, a monitored suggestion box, group discussions, questionnaires, or any other form of communication appropriate to the size of the facility.

(c) Scheduled activities must be available at least 6 days a week for a total of not less than 12 hours per week. Watching television is not an activity for the purpose of meeting the 12 hours per week of scheduled activities unless the television program is a special one-time event of special interest to residents of the facility. A facility whose residents choose to attend day programs conducted at adult day care centers, senior centers, mental health centers, or other day programs may count those attendance hours towards the required 12 hours per week of scheduled activities. An activities calendar must be posted in common areas where residents normally congregate.

(d) If residents assist in planning a special activity such as an outing, seasonal festivity, or an excursion, up to 3 hours may be counted toward the required activity time.

(3) ARRANGEMENT FOR HEALTH CARE. In order to facilitate resident access to health care as needed, the facility must:

(a) Assist residents in making appointments and remind residents about scheduled appointments for medical, dental, nursing, or mental health services.

AMERICAN OVERSIGHT

(b) Provide transportation to needed medical, dental, nursing or mental health services, or arrange for transportation through family and friends, volunteers, taxi cabs, public buses, and agencies providing transportation.

(c) The facility may not require residents to receive services from a particular health care provider.

(4) ACTIVITIES OF DAILY LIVING. Facilities must offer supervision of or assistance with activities of daily living as needed by each resident. Residents should be encouraged to be as independent as possible in performing activities of daily living.

(5) NURSING SERVICES.

(a) Pursuant to section 429.255, F.S., the facility may employ or contract with a nurse to:

1. Take or supervise the taking of vital signs,
2. Manage pill-organizers and administer medications as described in rule 59A-36.008, F.A.C.,
3. Give prepackaged enemas pursuant to a physician's order; and,
4. Maintain nursing progress notes.

(b) Pursuant to section 429.255(2), F.S., the nursing services listed in paragraph (a), may also be delivered in the facility by family members or friends of the resident provided the family member or friend does not receive compensation for such services.

(6) RESIDENT RIGHTS AND FACILITY PROCEDURES.

(a) A copy of the Resident Bill of Rights as described in section 429.28, F.S., or a summary provided by the Long-Term Care Ombudsman Program must be posted in full view in a freely accessible resident area, and included in the admission package provided pursuant to rule 59A-36.006, F.A.C.

(b) In accordance with section 429.28, F.S., the facility must have a written grievance procedure for receiving and responding to resident complaints and a written procedure to allow residents to recommend changes to facility policies and procedures. The facility must be able to demonstrate that such procedure is implemented upon receipt of a complaint.

(c) The telephone number for lodging complaints against a facility or facility staff must be posted in full view in a common area accessible to all residents. The telephone numbers are: the Long-Term Care Ombudsman Program, 1(888)831-0404; Disability Rights Florida, 1(800)342-0823; the Agency Consumer Hotline 1(888)419-3456, and the statewide toll-free telephone number of the Florida Abuse Hotline, 1(800)96-ABUSE or 1(800)962-2873. The telephone numbers must be posted in close proximity to a telephone accessible by residents and the text must be a minimum of 14-point font.

(d) The facility must have a written statement of its house rules and procedures that must be included in the admission package provided pursuant to rule 59A-36.006, F.A.C. The rules and procedures must at a minimum address the facility's policies regarding:

1. Resident responsibilities;
2. Alcohol and tobacco use;
3. Medication storage;
4. Resident elopement;
5. Reporting resident abuse, neglect, and exploitation;
6. Administrative and housekeeping schedules and requirements;
7. Infection control, sanitation, and universal precautions; and,
8. The requirements for coordinating the delivery of services to residents by third party providers.

(e) Residents may not be required to perform any work in the facility without compensation. Residents may be required to clean their own sleeping areas or apartments if the facility rules or the facility contract includes such a requirement. If a resident is employed by the facility, the resident must be compensated in compliance with state and federal wage laws.

(f) The facility must provide residents with convenient access to a telephone to facilitate the resident's right to unrestricted and private communication, pursuant to section 429.28(1)(d), F.S. The facility must allow unidentified telephone calls to residents. For facilities with a licensed capacity of 17 or more residents in which residents do not have private telephones, there must be, at a minimum, a readily accessible telephone on each floor of each building where residents reside.

(g) In addition to the requirements of section 429.41(1)(k), F.S., the use of physical restraints by a facility on a resident must be reviewed by the resident's physician annually. Any device, including half-bed rails, which the resident chooses to use and can remove or avoid without assistance, is not considered a physical restraint.

(7) THIRD PARTY SERVICES.

(a) Nothing in this rule chapter is intended to prohibit a resident or the resident's representative from independently arranging, contracting, and paying for services provided by a third party of the resident's choice, including a licensed home health agency or private nurse, or receiving services through an out-patient clinic, provided the resident meets the criteria for admission and continued

AMERICAN OVERSIGHT

residency and the resident complies with the facility's policy relating to the delivery of services in the facility by third parties. The facility's policies must require the third party to coordinate with the facility regarding the resident's condition and the services being provided.

(b) When residents require or arrange for services from a third party provider, the facility administrator or designee must allow for the receipt of those services, provided that the resident meets the criteria for admission and continued residency. The facility, when requested by residents or representatives, must coordinate with the provider to facilitate the receipt of care and services provided to meet the particular resident's needs.

(c) If residents accept assistance from the facility in arranging and coordinating third party services, the facility's assistance does not represent a guarantee that third party services will be received. If the facility's efforts to make arrangements for third party services are unsuccessful or declined by residents, the facility must include documentation in the residents' record explaining why its efforts were unsuccessful. This documentation will serve to demonstrate its compliance with this subsection.

(8) ELOPEMENT STANDARDS.

(a) Residents Assessed at Risk for Elopement. All residents assessed at risk for elopement or with any history of elopement must be identified so staff can be alerted to their needs for support and supervision. All residents must be assessed for risk of elopement by a health care provider or a mental health care provider within 30 calendar days of being admitted to a facility. If the resident has had a health assessment performed prior to admission pursuant to paragraph 59A-36.006(2)(a), F.A.C., this requirement is satisfied. A resident placed in a facility on a temporary emergency basis by the Department of Children and Families pursuant to section 415.105 or 415.1051, F.S., is exempt from this requirement for up to 30 days.

1. As part of its resident elopement response policies and procedures, the facility must make, at a minimum, a daily effort to determine that at risk residents have identification on their persons that includes their name and the facility's name, address, and telephone number. Staff trained pursuant to paragraph 59A-36.011(10)(a) or (c), F.A.C., must be generally aware of the location of all residents assessed at high risk for elopement at all times.

2. The facility must have a photo identification of at risk residents on file that is accessible to all facility staff and law enforcement as necessary. The facility's file must contain the resident's photo identification upon admission or upon being assessed at risk for elopement subsequent to admission. The photo identification may be provided by the facility, the resident, or the resident's representative.

(b) Facility Resident Elopement Response Policies and Procedures. The facility must develop detailed written policies and procedures for responding to a resident elopement. At a minimum, the policies and procedures must provide for:

1. An immediate search of the facility and premises,

2. The identification of staff responsible for implementing each part of the elopement response policies and procedures, including specific duties and responsibilities,

3. The identification of staff responsible for contacting law enforcement, the resident's family, guardian, health care surrogate, and case manager if the resident is not located pursuant to subparagraph (8)(b)1.; and,

4. The continued care of all residents within the facility in the event of an elopement.

(c) Facility Resident Elopement Drills. The facility must conduct and document resident elopement drills pursuant to sections 429.41(1)(a)3. and 429.41(1)(l), F.S.

(9) OTHER STANDARDS. Additional care standards for residents residing in a facility holding a limited mental health, extended congregate care or limited nursing services license are provided in rules 59A-36.020, 59A-36.021 and 59A-36.022, F.A.C., respectively.

Rulemaking Authority 429.41 FS. Law Implemented 429.255, 429.26, 429.28, 429.41 FS. History–New 9-17-84, Formerly 10A-5.182, Amended 10-20-86, 6-21-88, 8-15-90, 9-30-92, Formerly 10A-5.0182, Amended 10-30-95, 4-20-98, 11-2-98, 10-17-99, 7-30-06, 10-9-06, 4-15-10, 4-17-14, 5-10-18, Formerly 58A-5.0182, 7-1-19.

59A-36.008 Medication Practices.

Pursuant to sections 429.255 and 429.256, F.S., and this rule, licensed facilities may assist with the self-administration or administration of medications to residents in a facility. A resident may not be compelled to take medications but may be counseled in accordance with this rule.

(1) SELF ADMINISTERED MEDICATIONS.

(a) Residents who are capable of self-administering their medications without assistance must be encouraged and allowed to do

AMERICAN OVERSIGHT

so.

(b) If facility staff observes health changes that could reasonably be attributed to the improper self-administration of medication, staff must consult with the resident concerning any problems the resident may be experiencing in self-administering the medications. The consultation should describe the services offered by the facility that aid the resident with medication administration through the use of a pill organizer, through providing assistance with self-administration of medications, or through administering medications. The facility must contact the resident's health care provider when observable health changes occur that may be attributed to the resident's medications. The facility must document such contacts in the resident's records.

(2) PILL ORGANIZERS.

(a) Only a resident who self-administers medications may maintain a pill organizer.

(b) Unlicensed staff may not provide assistance with the contents of pill organizers.

(c) A nurse may manage a pill organizer to be used only by residents who self-administer medications. The nurse is responsible for instructing the resident in the proper use of the pill organizer. The nurse must manage the pill organizer in the following manner:

1. Obtain the labeled medication container from the storage area or the resident,

2. Transfer the medication from the original container into a pill organizer, labeled with the resident's name, according to the day and time increments as prescribed,

3. Return the medication container to the storage area or resident; and,

4. Document the date and time the pill organizer was filled in the resident's record.

(d) If there is a determination that the resident is not taking medications as prescribed after the medicinal benefits are explained, it must be noted in the resident's record and the facility must consult with the resident concerning providing assistance with self-administration or the administration of medications if such services are offered by the facility. The facility must contact the resident's health care provider regarding questions, concerns, or observations relating to the resident's medications. Such communication must be documented in the resident's record.

(3) ASSISTANCE WITH SELF-ADMINISTRATION.

(a) Any unlicensed person providing assistance with self-administration of medication must be 18 years of age or older, trained to assist with self administered medication pursuant to the training requirements of rule 59A-36.011, F.A.C., and must be available to assist residents with self-administered medications in accordance with procedures described in section 429.256, F.S. and this rule.

(b) In addition to the specifications of section 429.256(3), F.S., assistance with self-administration of medication includes, in the presence of the resident, reading the medication label aloud and verbally prompting a resident to take medications as prescribed.

(c) In order to facilitate assistance with self-administration, trained staff may prepare and make available such items as water, juice, cups, and spoons. Trained staff may also return unused doses to the medication container. Medication, which appears to have been contaminated, must not be returned to the container.

(d) Trained staff must observe the resident take the medication. Any concerns about the resident's reaction to the medication or suspected noncompliance must be reported to the resident's health care provider and documented in the resident's record.

(e) When a resident who receives assistance with medication is away from the facility and from facility staff, the following options are available to enable the resident to take medication as prescribed:

1. The health care provider may prescribe a medication schedule that coincides with the resident's presence in the facility,

2. The medication container may be given to the resident, a friend, or family member upon leaving the facility, with this fact noted in the resident's medication record,

3. The medication may be transferred to a pill organizer pursuant to the requirements of subsection (2), and given to the resident, a friend, or family member upon leaving the facility, with this fact noted in the resident's medication record, or

4. Medications may be separately prescribed and dispensed in an easier to use form, such as unit dose packaging.

(f) Assistance with self-administration of medication does not include the activities detailed in section 429.256(4), F.S.

1. As used in section 429.256(4)(g), F.S., the term "competent resident" means that the resident is cognizant of when a medication is required and understands the purpose for taking the medication.

2. As used in section 429.256(4)(h), F.S., the terms "judgment" and "discretion" mean interpreting vital signs and evaluating or assessing a resident's condition.

(g) All trained staff must adhere to the facility's infection control policy and procedures when assisting with the self-administration of medication.

(4) MEDICATION ADMINISTRATION.

AMERICAN OVERSIGHT

(a) For facilities that provide medication administration, a staff member licensed to administer medications must be available to administer medications in accordance with a health care provider's order or prescription label.

(b) Unusual reactions to the medication or a significant change in the resident's health or behavior that may be caused by the medication must be documented in the resident's record and reported immediately to the resident's health care provider. The contact with the health care provider must also be documented in the resident's record.

(c) Medication administration includes conducting any examination or other procedure necessary for the proper administration of medication that the resident cannot conduct personally and that can be performed by licensed staff.

(d) A facility that performs clinical laboratory tests for residents, including blood glucose testing, must be in compliance with the federal Clinical Laboratory Improvement Amendments of 1988 (CLIA) and chapter 483, part I, F.S. A valid copy of the State Clinical Laboratory License, if required, and the federal CLIA Certificate must be maintained in the facility. A state license or federal CLIA certificate is not required if residents perform the test themselves or if a third party assists residents in performing the test. The facility is not required to maintain a State Clinical Laboratory License or a federal CLIA Certificate if facility staff assist residents in performing clinical laboratory testing with the residents' equipment. Information about the State Clinical Laboratory License and federal CLIA Certificate is available from the Laboratory Unit, Agency for Health Care Administration, 2727 Mahan Drive, Mail Stop 32, Tallahassee, FL 32308; telephone (850)412-4500.

(5) MEDICATION RECORDS.

(a) For residents who use a pill organizer managed in subsection (2), the facility must keep either the original labeled medication container; or a medication listing with the prescription number, the name and address of the issuing pharmacy, the health care provider's name, the resident's name, the date dispensed, the name and strength of the drug, and the directions for use.

(b) The facility must maintain a daily medication observation record for each resident who receives assistance with self-administration of medications or medication administration. A medication observation record must be immediately updated each time the medication is offered or administered and include:

1. The name of the resident and any known allergies the resident may have;

2. The name of the resident's health care provider and the health care provider's telephone number;

3. The name, strength, and directions for use of each medication; and,

4. A chart for recording each time the medication is taken, any missed dosages, refusals to take medication as prescribed, or medication errors.

(c) For medications that serve as chemical restraints, the facility must, pursuant to section 429.41, F.S., maintain a record of the prescribing physician's annual evaluation of the use of the medication.

(6) MEDICATION STORAGE AND DISPOSAL.

(a) In order to accommodate the needs and preferences of residents and to encourage residents to remain as independent as possible, residents may keep their medications, both prescription and over-the-counter, in their possession both on or off the facility premises. Residents may also store their medication in their rooms or apartments if either the room is kept locked when residents are absent or the medication is stored in a secure place that is out of sight of other residents.

(b) Both prescription and over-the-counter medications for residents must be centrally stored if:

1. The facility administers the medication;

2. The resident requests central storage. The facility must maintain a list of all medications being stored pursuant to such a request;

3. The medication is determined and documented by the health care provider to be hazardous if kept in the personal possession of the person for whom it is prescribed;

4. The resident fails to maintain the medication in a safe manner as described in this paragraph;

5. The facility determines that, because of physical arrangements and the conditions or habits of residents, the personal possession of medication by a resident poses a safety hazard to other residents, or

6. The facility's rules and regulations require central storage of medication and that policy has been provided to the resident before admission as required in rule 59A-36.006, F.A.C.

(c) Centrally stored medications must be:

1. Kept in a locked cabinet; locked cart; or other locked storage receptacle, room, or area at all times;

2. Located in an area free of dampness and abnormal temperature, except that a medication requiring refrigeration must be kept refrigerated. Refrigerated medications must be secured by being kept in a locked container within the refrigerator, by keeping the

AMERICAN OVERSIGHT

refrigerator locked, or by keeping the area in which the refrigerator is located locked;

3. Accessible to staff responsible for filling pill-organizers, assisting with self-administration of medication, or administering medication. Such staff must have ready access to keys or codes to the medication storage areas at all times; and,

4. Kept separately from the medications of other residents and properly closed or sealed.

(d) Medication that has been discontinued but has not expired must be returned to the resident or the resident's representative, as appropriate, or may be centrally stored by the facility for future use by the resident at the resident's request. If centrally stored by the facility, the discontinued medication must be stored separately from medication in current use, and the area in which it is stored must be marked "discontinued medication." Such medication may be reused if prescribed by the resident's health care provider.

(e) When a resident's stay in the facility has ended, the administrator must return all medications to the resident, the resident's family, or the resident's guardian unless otherwise prohibited by law. If, after notification and waiting at least 15 days, the resident's medications are still at the facility, the medications are considered abandoned and may disposed of in accordance with paragraph (f).

(f) Medications that have been abandoned or have expired must be disposed of within 30 days of being determined abandoned or expired and the disposal must be documented in the resident's record. The medication may be taken to a pharmacist for disposal or may be destroyed by the administrator or designee with one witness.

(g) Facilities that hold a Special-ALF permit issued by the Board of Pharmacy may return dispensed medicinal drugs to the dispensing pharmacy pursuant to rule 64B16-28.870, F.A.C.

(7) MEDICATION LABELING AND ORDERS.

(a) The facility may not store prescription drugs for self-administration, assistance with self-administration, or administration unless they are properly labeled and dispensed in accordance with chapters 465 and 499, F.S., and rule 64B16-28.108, F.A.C. If a customized patient medication package is prepared for a resident, and separated into individual medicinal drug containers, then the following information must be recorded on each individual container:

1. The resident's name; and,

2. The identification of each medicinal drug in the container.

(b) Except with respect to the use of pill organizers as described in subsection (2), no individual other than a pharmacist may transfer medications from one storage container to another.

(c) If the directions for use are "as needed" or "as directed," the health care provider must be contacted and requested to provide revised instructions. For an "as needed" prescription, the circumstances under which it would be appropriate for the resident to request the medication and any limitations must be specified; for example, "as needed for pain, not to exceed 4 tablets per day." The revised instructions, including the date they were obtained from the health care provider and the signature of the staff who obtained them, must be noted in the medication record, or a revised label must be obtained from the pharmacist.

(d) Any change in directions for use of a medication that the facility is administering or providing assistance with self-administration must be accompanied by a written, faxes, or electronic copy of a medication order issued and signed by the resident's health care provider. The new directions must promptly be recorded in the resident's medication observation record. The facility may then obtain a revised label from the pharmacist or place an "alert" label on the medication container that directs staff to examine the revised directions for use in the medication observation record.

(e) A nurse may take a medication order by telephone. Such order must be promptly documented in the resident's medication observation record. The facility must obtain a written medication order from the health care provider within 10 working days. A faxed or electronic copy of a signed order is acceptable.

(f) The facility must make every reasonable effort to ensure that prescriptions for residents who receive assistance with self-administration of medication or medication administration are filled or refilled in a timely manner.

(g) Pursuant to section 465.0276(5), F.S., and rule 61N-1.006, F.A.C., sample or complimentary prescription drugs that are dispensed by a health care provider, must be kept in their original manufacturer's packaging, which must include the practitioner's name, the resident's name for whom they were dispensed, and the date they were dispensed. If the sample or complimentary prescription drugs are not dispensed in the manufacturer's labeled package, they must be kept in a container that bears a label containing the following:

1. Practitioner's name,

2. Resident's name,

3. Date dispensed,

4. Name and strength of the drug,

AMERICAN OVERSIGHT

5. Directions for use; and,

6. Expiration date.

(h) Pursuant to section 465.0276(2)(c), F.S., before dispensing any sample or complimentary prescription drug, the resident's health care provider must provide the resident with a written prescription, or a faxed or electronic copy of such order.

(8) OVER THE COUNTER (OTC) PRODUCTS. For purposes of this subsection, the term over the counter includes, but is not limited to, over the counter medications, vitamins, nutritional supplements and nutraceuticals, hereafter referred to as OTC products, that can be sold without a prescription.

(a) A facility may keep a stock supply of OTC products for multiple resident use. When providing any OTC product that is kept by the facility as a stock supply to a resident, the staff member providing the medication must record the name and amount of the OTC product provided in the resident's medication observation record. All OTC products kept as a stock supply must be stored in a locked container or secure room in a central location within the facility and must be labeled with the medication's name, the date of purchase, and with a notice that the medication is part of the facility's stock supply.

(b) OTC products, including those prescribed by a health care provider but excluding those kept as a stock supply by the facility, must be labeled with the resident's name and the manufacturer's label with directions for use, or the health care provider's directions for use. No other labeling requirements are required.

(c) Residents or their representatives may purchase OTC products from an establishment of their choice.

(d) A health care provider's order is required when a nurse provides assistance with self-administration or administration of OTC products. When an order for an OTC product exists, the order must meet the requirements of paragraphs (b) and (c) of this subsection. A health care provider's order for OTC products is not required when a resident self-administers his or her medications, or when unlicensed staff provides assistance with self-administration of medications.

Rulemaking Authority 429.256, 429.41 FS. Law Implemented 429.255, 429.256, 429.41 FS. History–New 10-17-99, Amended 7-30-06, 4-15-10, 10-14-10, 3-13-14, 5-10-18, Formerly 58A-5.0185, 7-1-19.

59A-36.009 Do Not Resuscitate Orders (DNROs).

(1) POLICIES AND PROCEDURES.

(a) Each assisted living facility must have written policies and procedures that explain its implementation of state laws and rules relative to Do Not Resuscitate Orders (DNROs). An assisted living facility may not require execution of a DNRO as a condition of admission or treatment. The assisted living facility must provide the following to each resident, or resident's representative, at the time of admission:

1. Form SCHS-4-2006, "Health Care Advance Directives – The Patient's Right to Decide," April 2006, or with a copy of some other substantially similar document, which incorporates information regarding advance directives included in chapter 765, F.S. Form SCHS-4-2006 is available from the Agency for Health Care Administration, 2727 Mahan Drive, Mail Stop 34, Tallahassee, FL 32308 or the agency's website at: http://ahca.myflorida.com/MCHQ/Health_Facility_Regulation/HC_Advance_Directives/docs/adv_dir.pdf; and,

2. DH Form 1896, Florida Do Not Resuscitate Order Form, December, 2004, which is hereby incorporated by reference. This form may be obtained by calling the Department of Health's toll free number 1(800)226-1911, extension 2780 or online at: http://www.flrules.org/Gateway/reference.asp?No=Ref-04005.

(b) There must be documentation in the resident's record indicating whether a DH Form 1896 has been executed. If a DH Form 1896 has been executed, a yellow copy of that document must be made a part of the resident's record. If the assisted living facility does not receive a copy of a resident's executed DH Form 1896, the assisted living facility must document in the resident's record that it has requested a copy.

(c) The executed DH Form 1896 must be readily available to medical staff in the event of an emergency.

(2) LICENSE REVOCATION. An assisted living facility's license is subject to revocation pursuant to section 408.815, F.S., if, as a condition of treatment or admission, the facility requires an individual to execute or waive DH Form 1896.

(3) DNRO PROCEDURES. Pursuant to section 429.255, F.S., an assisted living facility must honor a properly executed DH Form 1896 as follows:

(a) In the event a resident experiences cardiac or pulmonary arrest, staff trained in cardiopulmonary resuscitation (CPR) or a health care provider present in the facility, may withhold cardiopulmonary resuscitation (artificial ventilation, cardiac compression, endotracheal intubation and defibrillation).

AMERICAN OVERSIGHT

(b) In the event a resident is receiving hospice services and experiences cardiac or pulmonary arrest, facility staff must immediately contact hospice staff. The hospice procedures take precedence over those of the assisted living facility.

Rulemaking Authority 429.255 FS. Law Implemented 429.255 FS. History–New 4-15-10, Amended 4-17-14, Formerly 58A-5.0186, 7-1-19.

59A-36.010 Staffing Standards.

(1) ADMINISTRATORS. Every facility must be under the supervision of an administrator who is responsible for the operation and maintenance of the facility including the management of all staff and the provision of appropriate care to all residents as required by chapters 408, part II, 429, part I, F.S., and rule chapter 59A-35, F.A.C., and this rule chapter.

(a) An administrator must:

1. Be at least 21 years of age;

2. If employed on or after October 30, 1995, have, at a minimum, a high school diploma or G.E.D.;

3. Be in compliance with Level 2 background screening requirements pursuant to sections 408.809 and 429.174, F.S.;

4. Complete the core training and core competency test requirements pursuant to rule 59A-36.011, F.A.C., no later than 90 days after becoming employed as a facility administrator. Administrators who attended core training prior to July 1, 1997, are not required to take the competency test unless specified elsewhere in this rule; and,

5. Satisfy the continuing education requirements pursuant to rule 59A-36.011, F.A.C. Administrators who are not in compliance with these requirements must retake the core training and core competency test requirements in effect on the date the non-compliance is discovered by the agency or the department.

(b) In the event of extenuating circumstances, such as the death of a facility administrator, the agency may permit an individual who otherwise has not satisfied the training requirements of subparagraph (1)(a)4. of this rule, to temporarily serve as the facility administrator for a period not to exceed 90 days. During the 90 day period, the individual temporarily serving as facility administrator must:

1. Complete the core training and core competency test requirements pursuant to rule 59A-36.011, F.A.C.; and,

2. Complete all additional training requirements if the facility maintains licensure as an extended congregate care or limited mental health facility.

(c) Administrators may supervise a maximum of either three assisted living facilities or a group of facilities on a single campus providing housing and health care Administrators who supervise more than one facility must appoint in writing a separate manager for each facility. However, an administrator supervising a maximum of three assisted living facilities, each licensed for 16 or fewer beds and all within a 15 mile radius of each other, is only required to appoint two managers to assist in the operation and maintenance of those facilities.

(d) An individual serving as a manager must satisfy the same qualifications, background screening, core training and competency test requirements, and continuing education requirements as an administrator pursuant to paragraph (1)(a) of this rule. Managers who attended the core training program prior to April 20, 1998, are not required to take the competency test unless specified elsewhere in this rule. In addition, a manager may not serve as a manager of more than a single facility, except as provided in paragraph (1)(c) of this rule, and may not simultaneously serve as an administrator of any other facility.

(e) Pursuant to section 429.176, F.S., facility owners must notify the Agency Central Office within 10 days of a change in facility administrator on the Notification of Change of Administrator form, AHCA Form 3180-1006, June 2016, which is incorporated by reference and available online at: http://www.flrules.org/Gateway/reference.asp?No=Ref-09393.

(2) STAFF.

(a) Within 30 days after beginning employment, newly hired staff must submit a written statement from a health care provider documenting that the individual does not have any signs or symptoms of communicable disease. The examination performed by the health care provider must have been conducted no earlier than 6 months before submission of the statement. Newly hired staff does not include an employee transferring without a break in service from one facility to another when the facility is under the same management or ownership.

1. Evidence of a negative tuberculosis examination must be documented on an annual basis. Documentation provided by the Florida Department of Health or a licensed health care provider certifying that there is a shortage of tuberculosis testing materials satisfies the annual tuberculosis examination requirement. An individual with a positive tuberculosis test must submit a health care provider's statement that the individual does not constitute a risk of communicating tuberculosis.

2. If any staff member has, or is suspected of having, a communicable disease, such individual must be immediately removed

AMERICAN OVERSIGHT

from duties until a written statement is submitted from a health care provider indicating that the individual does not constitute a risk of transmitting a communicable disease.

(b) Staff must be qualified to perform their assigned duties consistent with their level of education, training, preparation, and experience. Staff providing services requiring licensing or certification must be appropriately licensed or certified. All staff must exercise their responsibilities, consistent with their qualifications, to observe residents, to document observations on the appropriate resident's record, and to report the observations to the resident's health care provider in accordance with this rule chapter.

(c) All staff must comply with the training requirements of rule 59A-36.011, F.A.C.

(d) An assisted living facility contracting to provide services to residents must ensure that individuals providing services are qualified to perform their assigned duties in accordance with this rule chapter. The contract between the facility and the staffing agency or contractor must specifically describe the services the staffing agency or contractor will provide to residents.

(e) For facilities with a licensed capacity of 17 or more residents, the facility must:

1. Develop a written job description for each staff position and provide a copy of the job description to each staff member; and,

2. Maintain time sheets for all staff.

(f) Level 2 background screening must be conducted for staff, including staff contracted by the facility to provide services to residents, pursuant to sections 408.809 and 429.174, F.S.

(3) STAFFING STANDARDS.

(a) Minimum staffing:

1. Facilities must maintain the following minimum staff hours per week:

Number of Residents, Day Care Participants, and Respite Care Residents	Staff Hours/Week
0-5	168
6-15	212
16- 25	253
26-35	294
36-45	335
46-55	375
56- 65	416
66-75	457
76-85	498
86-95	539

For every 20 total combined residents, day care participants, and respite care residents over 95 add 42 staff hours per week.

2. Independent living residents, as referenced in subsection 59A-36.015(3), F.A.C., who occupy beds included within the licensed capacity of an assisted living facility but do not receive personal, limited nursing, or extended congregate care services, are not counted as residents for purposes of computing minimum staff hours.

3. At least one staff member who has access to facility and resident records in case of an emergency must be in the facility at all times when residents are in the facility. Residents serving as paid or volunteer staff may not be left solely in charge of other residents while the facility administrator, manager or other staff are absent from the facility.

4. In facilities with 17 or more residents, there must be at least one staff member awake at all hours of the day and night.

5. A staff member who has completed courses in First Aid and Cardiopulmonary Resuscitation (CPR) and holds a currently valid card documenting completion of such courses must be in the facility at all times.

a. Documentation of attendance at First Aid or CPR courses pursuant to subsection 59A-36.011(5), F.A.C., satisfies this requirement.

b. A nurse is considered as having met the course requirements for First Aid. An emergency medical technician or paramedic currently certified under chapter 401, part III, F.S., is considered as having met the course requirements for both First Aid and CPR.

6. During periods of temporary absence of the administrator or manager of more than 48 hours when residents are on the premises, a staff member who is at least 21 years of age must be physically present and designated in writing to be in charge of the facility. No staff member shall be in charge of a facility for a consecutive period of 21 days or more, or for a total of 60 days within a calendar year, without being an administrator or manager.

7. Staff whose duties are exclusively building or grounds maintenance, clerical, or food preparation do not count towards

AMERICAN OVERSIGHT

meeting the minimum staffing hours requirement.

8. The administrator or manager's time may be counted for the purpose of meeting the required staffing hours, provided the administrator or manager is actively involved in the day-to-day operation of the facility, including making decisions and providing supervision for all aspects of resident care, and is listed on the facility's staffing schedule.

9. Only on-the-job staff may be counted in meeting the minimum staffing hours. Vacant positions or absent staff may not be counted.

(b) Notwithstanding the minimum staffing requirements specified in paragraph (a), all facilities, including those composed of apartments, must have enough qualified staff to provide resident supervision, and to provide or arrange for resident services in accordance with the residents' scheduled and unscheduled service needs, resident contracts, and resident care standards as described in rule 59A-36.007, F.A.C.

(c) The facility must maintain a written work schedule that reflects its 24-hour staffing pattern for a given time period. Upon request, the facility must make the daily work schedules of direct care staff available to residents or their representatives.

(d) The facility must provide staff immediately when the agency determines that the requirements of paragraph (a) are not met. The facility must immediately increase staff above the minimum levels established in paragraph (a), if the agency determines that adequate supervision and care are not being provided to residents, resident care standards described in rule 59A-36.007, F.A.C., are not being met, or that the facility is failing to meet the terms of residents' contracts. The agency will consult with the facility administrator and residents regarding any determination that additional staff is required. Based on the recommendations of the local fire safety authority, the agency may require additional staff when the facility fails to meet the fire safety standards described in rule chapter 69A-40, F.A.C., until such time as the local fire safety authority informs the agency that fire safety requirements are being met.

1. When additional staff is required above the minimum, the agency will require the submission of a corrective action plan within the time specified in the notification indicating how the increased staffing is to be achieved to meet resident service needs. The plan will be reviewed by the agency to determine if it sufficiently increases the staffing levels to meet resident needs.

2. When the facility can demonstrate to the agency that resident needs are being met, or that resident needs can be met without increased staffing, the agency may modify staffing requirements for the facility and the facility will no longer be required to maintain a plan with the agency.

(e) Facilities that are co-located with a nursing home may use shared staffing provided that staff hours are only counted once for the purpose of meeting either assisted living facility or nursing home minimum staffing ratios.

(f) Facilities holding a limited mental health, extended congregate care, or limited nursing services license must also comply with the staffing requirements of rules 59A-36.020, 59A-36.021 or 59A-36.022, F.A.C., respectively.

Rulemaking Authority 429.41, 429.52, 429.929 FS. Law Implemented 429.174, 429.176, 429.41, 429.52, 429.905 FS. History–New 5-14-81, Amended 1-6-82, 9-17-84, Formerly 10A-5.19, Amended 10-20-86, 6-21-88, 8-15-90, 9-30-92, Formerly 10A-5.019, Amended 10-30-95, 4-20-98, 11-2-98, 10-17-99, 7-30-06, 4-15-10, 4-17-14, 5-10-18, Formerly 58A-5.019, 7-1-19.

59A-36.011 Staff Training Requirements and Competency Test.

(1) ASSISTED LIVING FACILITY CORE TRAINING REQUIREMENTS AND COMPETENCY TEST.

(a) The assisted living facility core training requirements established by the department pursuant to section 429.52, F.S., shall consist of a minimum of 26 hours of training plus a competency test.

(b) Administrators and managers must successfully complete the assisted living facility core training requirements within 3 months from the date of becoming a facility administrator or manager. Successful completion of the core training requirements includes passing the competency test. The minimum passing score for the competency test is 75%. Administrators who have attended core training prior to July 1, 1997, and managers who attended the core training program prior to April 20, 1998, shall not be required to take the competency test. Administrators licensed as nursing home administrators in accordance with chapter 468, part II, F.S., are exempt from this requirement.

(c) Administrators and managers shall participate in 12 hours of continuing education in topics related to assisted living every 2 years.

(d) A newly hired administrator or manager who has successfully completed the assisted living facility core training and continuing education requirements, shall not be required to retake the core training. An administrator or manager who has successfully completed the core training but has not maintained the continuing education requirements will be considered a new

AMERICAN OVERSIGHT

administrator or manager for the purposes of the core training requirements and must:

1. Retake the assisted living facility core training; and,

2. Retake and pass the competency test.

(e) The fees for the competency test shall not exceed $200.00. The payment for the competency test fee shall be remitted to the entity administering the test. A new fee is due each time the test is taken.

(2) STAFF PRESERVICE ORIENTATION.

(a) Facilities must provide a preservice orientation of at least 2 hours to all new assisted living facility employees who have not previously completed core training as detailed in subsection (1).

(b) New staff must complete the preservice orientation prior to interacting with residents.

(c) Once complete, the employee and the facility administrator must sign a statement that the employee completed the preservice orientation which must be kept in the employee's personnel record.

(d) In addition to topics that may be chosen by the facility administrator, the preservice orientation must cover:

1. Resident's rights; and,

2. The facility's license type and services offered by the facility.

(3) STAFF IN-SERVICE TRAINING. Facility administrators or managers shall provide or arrange for the following in-service training to facility staff:

(a) Staff who provide direct care to residents, other than nurses, certified nursing assistants, or home health aides trained in accordance with rule 59A-8.0095, F.A.C., must receive a minimum of 1 hour in-service training in infection control, including universal precautions and facility sanitation procedures, before providing personal care to residents. The facility must use its infection control policies and procedures when offering this training. Documentation of compliance with the staff training requirements of 29 CFR 1910.1030, relating to blood borne pathogens, may be used to meet this requirement.

(b) Staff who provide direct care to residents must receive a minimum of 1 hour in-service training within 30 days of employment that covers the following subjects:

1. Reporting adverse incidents.

2. Facility emergency procedures including chain-of-command and staff roles relating to emergency evacuation.

(c) Staff who provide direct care to residents, who have not taken the core training program, shall receive a minimum of 1 hour in-service training within 30 days of employment that covers the following subjects:

1. Resident rights in an assisted living facility.

2. Recognizing and reporting resident abuse, neglect, and exploitation. The facility must use its abuse prevention policies and procedures when offering this training.

(d) Staff who provide direct care to residents, other than nurses, CNAs, or home health aides trained in accordance with rule 59A-8.0095, F.A.C., must receive 3 hours of in-service training within 30 days of employment that covers the following subjects:

1. Resident behavior and needs.

2. Providing assistance with the activities of daily living.

(e) Staff who prepare or serve food, who have not taken the assisted living facility core training must receive a minimum of 1-hour-in-service training within 30 days of employment in safe food handling practices.

(f) All facility staff shall receive in-service training regarding the facility's resident elopement response policies and procedures within thirty (30) days of employment.

1. All facility staff shall be provided with a copy of the facility's resident elopement response policies and procedures.

2. All facility staff shall demonstrate an understanding and competency in the implementation of the elopement response policies and procedures.

(4) HUMAN IMMUNODEFICIENCY VIRUS/ACQUIRED IMMUNE DEFICIENCY SYNDROME (HIV/AIDS). Pursuant to section 381.0035, F.S., all facility employees, with the exception of employees subject to the requirements of section 456.033, F.S., must complete a one-time education course on HIV and AIDS, including the topics prescribed in the section 381.0035, F.S. New facility staff must obtain the training within 30 days of employment. Documentation of compliance must be maintained in accordance with subsection (12), of this rule.

(5) FIRST AID AND CARDIOPULMONARY RESUSCITATION (CPR). A staff member who has completed courses in First Aid and CPR and holds a currently valid card documenting completion of such courses must be in the facility at all times.

(a) Documentation that the staff member possess current CPR certification that requires the student to demonstrate, in person,

AMERICAN OVERSIGHT

that he or she is able to perform CPR and which is issued by an instructor or training provider that is approved to provide CPR training by the American Red Cross, the American Heart Association, the National Safety Council, or an organization whose training is accredited by the Commission on Accreditation for Pre-Hospital Continuing Education satisfies this requirement.

(b) A nurse shall be considered as having met the training requirement for First Aid. An emergency medical technician or paramedic currently certified under chapter 401, Part III, F.S., shall be considered as having met the training requirements for both First Aid and C.P.R.

(6) ASSISTANCE WITH THE SELF-ADMINISTRATION OF MEDICATION AND MEDICATION MANAGEMENT. Unlicensed persons who will be providing assistance with the self-administration of medications as described in rule 59A-36.008, F.A.C., must meet the training requirements pursuant to section 429.52(6), F.S., prior to assuming this responsibility. Courses provided in fulfilment of this requirement must meet the following criteria:

(a) Training must cover state law and rule requirements with respect to the supervision, assistance, administration, and management of medications in assisted living facilities; procedures and techniques for assisting the resident with self-administration of medication including how to read a prescription label; providing the right medications to the right resident; common medications; the importance of taking medications as prescribed; recognition of side effects and adverse reactions and procedures to follow when residents appear to be experiencing side effects and adverse reactions; documentation and record keeping; and medication storage and disposal. Training shall include demonstrations of proper techniques, including techniques for infection control, and ensure unlicensed staff have adequately demonstrated that they have acquired the skills necessary to provide such assistance.

(b) The training must be provided by a registered nurse or licensed pharmacist who shall issue a training certificate to a trainee who demonstrates, in person and both physically and verbally, the ability to:

1. Read and understand a prescription label;

2. Provide assistance with self-administration in accordance with section 429.256, F.S., and rule 59A-36.008, F.A.C., including:

a. Assist with oral dosage forms, topical dosage forms, and topical ophthalmic, otic and nasal dosage forms;

b. Measure liquid medications, break scored tablets, and crush tablets in accordance with prescription directions;

c. Recognize the need to obtain clarification of an "as needed" prescription order;

d. Recognize a medication order which requires judgment or discretion, and to advise the resident, resident's health care provider or facility employer of inability to assist in the administration of such orders;

e. Complete a medication observation record;

f. Retrieve and store medication;

g. Recognize the general signs of adverse reactions to medications and report such reactions;

h. Assist residents with insulin syringes that are prefilled with the proper dosage by a pharmacist and insulin pens that are prefilled by the manufacturer by taking the medication, in its previously dispensed, properly labeled container, from where it is stored, and bringing it to the resident for self-injection;

i. Assist with nebulizers;

j. Use a glucometer to perform blood glucose testing;

k. Assist residents with oxygen nasal cannulas and continuous positive airway pressure (CPAP) devices, excluding the titration of the oxygen levels;

l. Apply and remove anti-embolism stockings and hosiery;

m. Placement and removal of colostomy bags, excluding the removal of the flange or manipulation of the stoma site; and,

n. Measurement of blood pressure, heart rate, temperature, and respiratory rate.

(c) Unlicensed persons, as defined in section 429.256(1)(b), F.S., who provide assistance with self-administered medications and have successfully completed the initial 6 hour training, must obtain, annually, a minimum of 2 hours of continuing education training on providing assistance with self-administered medications and safe medication practices in an assisted living facility. The 2 hours of continuing education training may be provided online.

(d) Trained unlicensed staff who, prior to the effective date of this rule, assist with the self-administration of medication and have successfully completed 4 hours of assistance with self-administration of medication training must complete an additional 2 hours of training that focuses on the topics listed in sub-subparagraphs (6)(b)2.h.-n. of this section, before assisting with the self-administration of medication procedures listed in sub-subparagraphs (6)(b)2.h.-n.

(7) NUTRITION AND FOOD SERVICE. The administrator or person designated by the administrator as responsible for the facility's food service and the day-to-day supervision of food service staff must obtain, annually, a minimum of 2 hours continuing

AMERICAN OVERSIGHT

education in topics pertinent to nutrition and food service in an assisted living facility. This requirement does not apply to administrators and designees who are exempt from training requirements under paragraph 59A-36.012(1)(b). A certified food manager, licensed dietician, registered dietary technician or health department sanitarian is qualified to train assisted living facility staff in nutrition and food service.

(8) EXTENDED CONGREGATE CARE (ECC) TRAINING.

(a) The administrator and ECC supervisor, if different from the administrator, must complete core training and 4 hours of initial training in extended congregate care prior to the facility receiving its ECC license or within 3 months of beginning employment in a currently licensed ECC facility as an administrator or ECC supervisor. Successful completion of the assisted living facility core training shall be a prerequisite for this training. ECC supervisors who attended the assisted living facility core training prior to April 20, 1998, shall not be required to take the assisted living facility core training competency test.

(b) The administrator and the ECC supervisor, if different from the administrator, must complete a minimum of 4 hours of continuing education every two years in topics relating to the physical, psychological, or social needs of frail elderly and disabled persons, or persons with Alzheimer's disease or related disorders.

(c) All direct care staff providing care to residents in an ECC program must complete at least 2 hours of in-service training, provided by the facility administrator or ECC supervisor, within 6 months of beginning employment in the facility. The training must address ECC concepts and requirements, including statutory and rule requirements, and the delivery of personal care and supportive services in an ECC facility.

(9) LIMITED MENTAL HEALTH TRAINING.

(a) Pursuant to section 429.075, F.S., the administrator, managers and staff, who have direct contact with mental health residents in a licensed limited mental health facility, must receive the following training:

1. A minimum of 6 hours of specialized training in working with individuals with mental health diagnoses.

a. The training must be provided or approved by the Department of Children and Families and must be taken within 6 months of the facility's receiving a limited mental health license or within 6 months of employment in a limited mental health facility.

b. Training received under this subparagraph may count once for 6 of the 12 hours of continuing education required for administrators and managers pursuant to section 429.52(5), F.S., and subsection (1) of this rule.

2. A minimum of 3 hours of continuing education, which may be provided by the ALF administrator, online, or through distance learning, biennially thereafter in subjects dealing with one or more of the following topics:

a. Mental health diagnoses; and,

b. Mental health treatment such as:

(I) Mental health needs, services, behaviors and appropriate interventions;

(II) Resident progress in achieving treatment goals;

(III) How to recognize changes in the resident's status or condition that may affect other services received or may require intervention; and,

(IV) Crisis services and the Baker Act procedures.

3. For administrators and managers, the continuing education requirement under this subsection will satisfy 3 of the 12 hours of continuing education required biennially pursuant to section 429.52(5), F.S., and subsection (1) of this rule.

4. Administrators, managers and direct contact staff affected by the continuing education requirement under this subsection shall have up to 6 months after the effective date of this rule to meet the training requirement.

(b) Administrators, managers and staff do not have to repeat the initial training should they change employers provided they present a copy of their training certificate to the current employer for retention in the facility's personnel files. They must also ensure that copies of the continuing education training certificates, pursuant to subparagraph (a)2. of this subsection, are retained in their personnel files.

(10) ALZHEIMER'S DISEASE AND RELATED DISORDERS ("ADRD") TRAINING REQUIREMENTS. Facilities which advertise that they provide special care for persons with ADRD, or who maintain secured areas as described in Chapter 4, Section 464.4.6 of the Florida Building Code, as adopted in rule 61G20-1.001, F.A.C., Florida Building Code Adopted, must ensure that facility staff receive the following training.

(a) Facility staff who interact on a daily basis with residents with ADRD but do not provide direct care to such residents and staff who provide direct care to residents with ADRD, shall obtain 4 hours of initial training within 3 months of employment. Completion of the core training program between April 20, 1998 and July 1, 2003 shall satisfy this requirement. Facility staff who

AMERICAN OVERSIGHT

meet the requirements for ADRD training providers under paragraph (g) of this subsection, will be considered as having met this requirement. Initial training, entitled "Alzheimer's Disease and Related Disorders Level I Training," must address the following subject areas:

1. Understanding Alzheimer's disease and related disorders;
2. Characteristics of Alzheimer's disease;
3. Communicating with residents with Alzheimer's disease;
4. Family issues;
5. Resident environment; and,
6. Ethical issues.

(b) Staff who have successfully completed both the initial one hour and continuing three hours of ADRD training pursuant to sections 400.1755, 429.917 and 400.6045(1), F.S., shall be considered to have met the initial assisted living facility Alzheimer's Disease and Related Disorders Level I Training.

(c) Facility staff who provide direct care to residents with ADRD must obtain an additional 4 hours of training, entitled "Alzheimer's Disease and Related Disorders Level II Training," within 9 months of employment. Facility staff who meet the requirements for ADRD training providers under paragraph (g) of this subsection, will be considered as having met this requirement. Alzheimer's Disease and Related Disorders Level II Training must address the following subject areas as they apply to these disorders:

1. Behavior management,
2. Assistance with ADLs,
3. Activities for residents,
4. Stress management for the care giver; and,
5. Medical information.

(d) A detailed description of the subject areas that must be included in an ADRD curriculum which meets the requirements of paragraphs (a) and (b) of this subsection, can be found in the document "Training Guidelines for the Special Care of Persons with Alzheimer's Disease and Related Disorders," dated March 1999, incorporated by reference, available from the Department of Elder Affairs, 4040 Esplanade Way, Tallahassee, Florida 32399-7000.

(e) Direct care staff shall participate in 4 hours of continuing education annually as required under section 429.178, F.S. Continuing education received under this paragraph may be used to meet 3 of the 12 hours of continuing education required by section 429.52, F.S., and subsection (1) of this rule, or 3 of the 6 hours of continuing education for extended congregate care required by subsection (7) of this rule.

(f) Facility staff who have only incidental contact with residents with ADRD must receive general written information provided by the facility on interacting with such residents, as required under section 429.178, F.S., within three (3) months of employment. "Incidental contact" means all staff who neither provide direct care nor are in regular contact with such residents.

(g) Persons who seek to provide ADRD training in accordance with this subsection must provide the department or its designee with documentation that they hold a Bachelor's degree from an accredited college or university or hold a license as a registered nurse, and:

1. Have 1 year teaching experience as an educator of caregivers for persons with Alzheimer's disease or related disorders, or
2. Three years of practical experience in a program providing care to persons with Alzheimer's disease or related disorders, or
3. Completed a specialized training program in the subject matter of this program and have a minimum of two years of practical experience in a program providing care to persons with Alzheimer's disease or related disorders.

(h) With reference to requirements in paragraph (g), a Master's degree from an accredited college or university in a subject related to the content of this training program can substitute for the teaching experience. Years of teaching experience related to the subject matter of this training program may substitute on a year-by-year basis for the required Bachelor's degree referenced in paragraph (g).

(11) DO NOT RESUSCITATE ORDERS TRAINING.

(a) Currently employed facility administrators, managers, direct care staff and staff involved in resident admissions must receive at least one hour of training in the facility's policies and procedures regarding Do Not Resuscitate Orders.

(b) Newly hired facility administrators, managers, direct care staff and staff involved in resident admissions must receive at least one hour of training in the facility's policy and procedures regarding DNROs within 30 days after employment.

AMERICAN OVERSIGHT

(c) Training shall consist of the information included in rule 59A-36.009, F.A.C.

(12) TRAINING DOCUMENTATION AND MONITORING.

(a) Except as otherwise noted, certificates, or copies of certificates, of any training required by this rule must be documented in the facility's personnel files. The documentation must include the following:

1. The title of the training program,
2. The subject matter of the training program,
3. The training program agenda,
4. The number of hours of the training program,
5. The trainee's name, dates of participation, and location of the training program,
6. The training provider's name, dated signature and credentials, and professional license number, if applicable.

(b) Upon successful completion of training pursuant to this rule, the training provider must issue a certificate to the trainee as specified in this rule.

(c) The facility must provide the Department of Elder Affairs and the Agency for Health Care Administration with training documentation and training certificates for review, as requested. The department and agency reserve the right to attend and monitor all facility in-service training, which is intended to meet regulatory requirements.

Rulemaking Authority 429.178, 429.41, 429.52 FS. Law Implemented 429.07, 429.075, 429.178, 429.41, 429.52 FS. History–New 9-30-92, Formerly 10A-5.0191, Amended 10-30-95, 6-2-96, 4-20-98, 11-2-98, 10-17-99, 7-5-05, 7-30-06, 10-9-06, 7-1-08, 4-15-10, 5-10-18, Formerly 58A-5.0191, 7-1-19.

59A-36.012 Food Service Standards.

(1) GENERAL RESPONSIBILITIES. When food service is provided by the facility, the administrator, or an individual designated in writing by the administrator, must be responsible for total food services and the day-to-day supervision of food services staff. In addition, the following requirements apply:

(a) If the designee is an individual who has not completed an approved assisted living facility core training course, such individual must complete the food and nutrition services module of the core training course before assuming responsibility for the facility's food service. The designee is not subject to the 1 hour in-service training in safe food handling practices.

(b) If the designee is a certified food manager, certified dietary manager, registered or licensed dietitian, dietetic registered technician, or health department sanitarian, the designee is exempt from the requirement to complete the food and nutrition services module of the core training course before assuming responsibility for the facility's food service as required in paragraph (1)(a) of this rule.

(c) An administrator or designee must perform his or her duties in a safe and sanitary manner.

(d) An administrator or designee must provide regular meals that meet the nutritional needs of residents, and therapeutic diets as ordered by the resident's health care provider for residents who require special diets.

(e) An administrator or designee must comply with the food service continuing education requirements specified in rule 59A-36.011, F.A.C.

(2) DIETARY STANDARDS.

(a) The meals provided by the assisted living facility must be planned based on the current USDA Dietary Guidelines for Americans, 2010, which are incorporated by reference and available for review at: http://www.flrules.org/Gateway/reference.asp?No=Ref-04003, and the current summary of Dietary Reference Intakes established by the Food and Nutrition Board of the Institute of Medicine of the National Academies, 2010, which are incorporated by reference and available for review at: http://iom.edu/Activities/Nutrition/SummaryDRIs/~/media/Files/Activity%20Files/Nutrition/DRIs/New%20Material/5DRI%20Values%20SummaryTables%2014.pdf. Therapeutic diets must meet these nutritional standards to the extent possible.

(b) The residents' nutritional needs must be met by offering a variety of meals adapted to the food habits, preferences, and physical abilities of the residents, and must be prepared through the use of standardized recipes. For facilities with a licensed capacity of 16 or fewer residents, standardized recipes are not required. Unless a resident chooses to eat less, the facility must serve the standard minimum portions of food according to the Dietary Reference Intakes.

(c) All regular and therapeutic menus to be used by the facility must be reviewed annually by a licensed or registered dietitian, a licensed nutritionist, or a registered dietetic technician supervised by a licensed or registered dietitian, or a licensed nutritionist to

AMERICAN OVERSIGHT

ensure the meals meet the nutritional standards established in this rule. The annual review must be documented in the facility files and include the original signature of the reviewer, registration or license number, and date reviewed. Portion sizes must be indicated on the menus or on a separate sheet.

1. Daily food servings may be divided among three or more meals per day, including snacks, as necessary to accommodate resident needs and preferences.

2. Menu items may be substituted with items of comparable nutritional value based on the seasonal availability of fresh produce or the preferences of the residents.

(d) Menus must be dated and planned at least 1 week in advance for both regular and therapeutic diets. Residents must be encouraged to participate in menu planning. Planned menus must be conspicuously posted or easily available to residents. Regular and therapeutic menus as served, with substitutions noted before or when the meal is served, must be kept on file in the facility for 6 months.

(e) Therapeutic diets must be prepared and served as ordered by the health care provider.

1. Facilities that offer residents a variety of food choices through a select menu, buffet style dining, or family style dining are not required to document what is eaten unless a health care provider's order indicates that such monitoring is necessary. However, the food items that enable residents to comply with the therapeutic diet must be identified on the menus developed for use in the facility.

2. The facility must document a resident's refusal to comply with a therapeutic diet and provide notification to the resident's health care provider of such refusal.

(f) For facilities serving three or more meals a day, no more than 14 hours must elapse between the end of an evening meal containing a protein food and the beginning of a morning meal. Intervals between meals must be evenly distributed throughout the day with not less than 2 hours nor more than 6 hours between the end of one meal and the beginning of the next. For residents without access to kitchen facilities, snacks must be offered at least once per day. Snacks are not considered to be meals for the purposes of calculating the time between meals.

(g) Food must be served attractively at safe and palatable temperatures. All residents must be encouraged to eat at tables in the dining areas. A supply of eating ware sufficient for all residents, including adaptive equipment if needed by any resident, must be on hand.

(h) A 3-day supply of nonperishable food, based on the number of weekly meals the facility has contracted with residents to serve, must be on hand at all times. The quantity must be based on the resident census and not on licensed capacity. The supply must consist of foods that can be stored safely without refrigeration. Water sufficient for drinking and food preparation must also be stored, or the facility must have a plan for obtaining water in an emergency, with the plan coordinated with and reviewed by the local disaster preparedness authority.

(3) FOOD HYGIENE. Copies of inspection reports issued by the county health department for the last 2 years pursuant to rule 64E-12.004, or chapter 64E-11, F.A.C., as applicable, depending on the licensed capacity of the assisted living facility, must be on file in the facility.

(4) CONTRACTED FOOD SERVICE. When food service is contracted by the facility, the facility must ensure that the contracted food service meets all dietary standards imposed by this rule and is adequately protected upon delivery to the facility pursuant to subsection 64E-12.004(4), F.A.C. The facility must maintain:

(a) A copy of the current contract between the facility and the food service contractor.

(b) A copy of the annually issued certificate or license authorizing the operation of the food service contractor issued by the applicable regulating agency. The license or certificate must provide documentation of the food service contractor's compliance with food service regulatory requirements.

Rulemaking Authority 429.41 FS. Law Implemented 429.41, 429.52 FS. History–New 5-14-81, Amended 1-6-82, 5-19-83, 9-17-84, Formerly 10A-5.20, Amended 10-20-86, 6-21-88, 8-15-90, 9-30-92, Formerly 10A-5.020, Amended 10-30-95, 6-2-96, 10-17-99, 4-17-14, Formerly 58A-5.020, 7-1-19.

59A-36.013 Fiscal Standards.

(1) FINANCIAL STABILITY. The facility must be administered on a sound financial basis in order to ensure adequate resources to meet resident needs pursuant to the requirements of chapter 408, part II, part I, F.S., and rule chapter 59A-35, F.A.C., and this rule chapter.

AMERICAN OVERSIGHT

(2) RESIDENT TRUST FUNDS. Funds or other property received by the facility belonging to or due a resident, including personal funds, must be held as trust funds and expended only for the resident's account. Resident funds or property may be held in one bank account if a separate written accounting for each resident is maintained. A separate bank account is required for facility funds; co-mingling resident funds with facility funds is prohibited. Written accounting procedures for resident trust funds must include income and expense records of the trust fund, including the source and disposition of the funds.

(3) SURETY BONDS. Pursuant to the requirements of section 429.27(2), F.S.:

(a) For entities that own more than one facility in the state, one surety bond may be purchased to cover the needs of all residents served by the entities.

(b) The following additional bonding requirements apply to facilities serving residents receiving OSS:

1. If serving as representative payee for a resident receiving OSS, the minimum bond proceeds must equal twice the value of the resident's monthly aggregate income, which must include any supplemental security income or social security disability income plus the OSS payments, including the personal needs allowance.

2. If holding a power of attorney for a resident receiving OSS, the minimum bond proceeds must equal twice the value of the resident's monthly aggregate income, which must include any supplemental security income or social security disability income; the OSS payments, including the personal allowance; plus the value of any property belonging to a resident held at the facility.

(c) Upon the annual issuance of a new bond or continuation bond, the facility must file a copy of the bond with the Agency Central Office.

(4) LIABILITY INSURANCE. Pursuant to section 429.275, F.S., facilities must maintain liability insurance coverage, as defined in section 624.605, F.S., that remains in force at all times. On the renewal date of the facility's policy or whenever a facility changes policies, the facility must file documentation of continued coverage with the Agency Central Office. Such documentation must be issued by the insurance company and must include the name and street address of the facility, a reference that the facility is an assisted living facility, the facility's licensed capacity, and the dates of coverage.

Rulemaking Authority 429.24, 429.27, 429.275, 429.41 FS. Law Implemented 429.27, 429.275 FS. History–New 5-14-81, Amended 1-6-82, 9-17-84, Formerly 10A-5.21, Amended 6-21-88, 8-15-90, 9-30-92, Formerly 10A-5.021, Amended 10-30-95, 6-2-96, 10-17-99, 4-17-14, Formerly 58A-5.021, 7-1-19.

59A-36.014 Physical Plant Standards.

(1) NEW FACILITIES. Newly constructed facilities to be licensed as assisted living facilities, and existing structures, not previously licensed as assisted living facilities, to be converted to assisted living facilities, as well as any subsequent additions, modifications, alterations, renovations or refurbishing of such facilities, are required by governmental entities other than the Department of Elder Affairs to adhere to certain building code and fire safety standards. Such standards may be found in:

(a) Chapter 4, Section 464, of the Florida Building Code as adopted in rule 61G20-1.001, F.A.C.;

(b) Section 633.022, F.S., Uniform Firesafety Standards and rule chapter 69A-40, F.A.C. The Uniform Fire Safety Standards for Assisted Living Facilities; and,

(c) The National Fire Protection Association codes described in section 429.41, F.S.

(2) EXISTING FACILITIES.

(a) An assisted living facility must comply with the rule or building code in effect at the time of initial licensure, as well as the rule or building code in effect at the time of any additions, modifications, alterations, refurbishment, renovations or reconstruction. Determination of the installation of a fire sprinkler system in an existing facility must comply with the requirements described in section 429.41, F.S.

(b) A facility undergoing change of ownership is considered an existing facility for purposes of this rule.

(3) OTHER REQUIREMENTS.

(a) All facilities must:

1. Provide a safe living environment pursuant to section 429.28(1)(a), F.S.;

2. Be maintained free of hazards; and,

3. Ensure that all existing architectural, mechanical, electrical and structural systems, and appurtenances are maintained in good working order.

(b) Pursuant to section 429.27, F.S., residents must be given the option of using their own belongings as space permits. When the facility supplies the furnishings, each resident bedroom or sleeping area must have at least the following furnishings:

AMERICAN OVERSIGHT

1. A clean, comfortable bed with a mattress no less than 36 inches wide and 72 inches long, with the top surface of the mattress at a comfortable height to ensure easy access by the resident,

2. A closet or wardrobe space for hanging clothes,

3. A dresser, chest or other furniture designed for storage of clothing or personal effects,

4. A table or nightstand, bedside lamp or floor lamp, and waste basket; and,

5. A comfortable chair, if requested.

(c) The facility must maintain master or duplicate keys to resident bedrooms to be used in the event of an emergency.

(d) Residents who use portable bedside commodes must be provided with privacy during use.

(e) Facilities must make available linens and personal laundry services for residents who require such services. Linens provided by a facility must be free of tears, stains and must not be threadbare.

Rulemaking Authority 429.41 FS. Law Implemented 429.27, 429.28, 429.41 FS. History–New 5-14-81, Amended 1-6-82, 5-19-83, 9-17-84, Formerly 10A-5.23, Amended 10-20-86, 6-21-88, 8-15-90, 9-30-92, Formerly 10A-5.023, Amended 10-30-95, 6-2-96, 10-17-99, 7-30-06, 4-15-10, 4-17-14, Formerly 58A-5.023, 7-1-19.

59A-36.015 Records.

The facility must maintain required records in a manner that makes such records readily available at the licensee's physical address for review by a legally authorized entity. If records are maintained in an electronic format, facility staff must be readily available to access the data and produce the requested information. For purposes of this section, "readily available" means the ability to immediately produce documents, records, or other such data, either in electronic or paper format, upon request.

(1) FACILITY RECORDS. Facility records must include:

(a) The facility's license displayed in a conspicuous and public place within the facility.

(b) An up-to-date admission and discharge log listing the names of all residents and each resident's:

1. Date of admission, the facility or place from which the resident was admitted, and if applicable, a notation indicating that the resident was admitted with a stage 2 pressure sore; and,

2. Date of discharge, reason for discharge, and identification of the facility or home address to which the resident was discharged. Readmission of a resident to the facility after discharge requires a new entry in the log. Discharge of a resident is not required if the facility is holding a bed for a resident who is out of the facility but intending to return pursuant to rule 59A-36.018, F.A.C. If the resident dies while in the care of the facility, the log must indicate the date of death.

(c) A log listing the names of all temporary emergency placement and respite care residents if not included on the log described in paragraph (b).

(d) The facility's emergency management plan, with documentation of review and approval by the county emergency management agency, as described in rule 59A-36.019, F.A.C., that must be readily available by facility staff.

(e) The facility's liability insurance policy required in rule 59A-36.013, F.A.C.

(f) For facilities that have a surety bond, a copy of the surety bond currently in effect as required by rule 59A-36.013, F.A.C.

(g) The admission package presented to new or prospective residents (less the resident's contract) described in rule 59A-36.006, F.A.C.

(h) If the facility advertises that it provides special care for persons with Alzheimer's disease or related disorders, a copy of all such facility advertisements as required by section 429.177, F.S.

(i) A grievance procedure for receiving and responding to resident complaints and recommendations as described in rule 59A-36.007, F.A.C.

(j) All food service records required in rule 59A-36.012, F.A.C., including menus planned and served and county health department inspection reports. Facilities that contract for food services, must include a copy of the contract for food services and the food service contractor's license or certificate to operate.

(k) All fire safety inspection reports issued by the local authority or the State Fire Marshal pursuant to section 429.41, F.S., and rule chapter 69A-40, F.A.C., issued within the last 2 years.

(l) All sanitation inspection reports issued by the county health department pursuant to section 381.031, F.S., and chapter 64E-12, F.A.C., issued within the last 2 years.

(m) Pursuant to section 429.35, F.S., all completed survey, inspection and complaint investigation reports, and notices of sanctions and moratoriums issued by the agency within the last 5 years.

AMERICAN OVERSIGHT

(n) The facility's resident elopement response policies and procedures.

(o) The facility's documented resident elopement response drills.

(p) For facilities licensed as limited mental health, extended congregate care, or limited nursing services, records required as stated in rules 59A-36.020, 59A-36.021 and 59A-36.022, F.A.C., respectively.

(2) STAFF RECORDS.

(a) Personnel records for each staff member must contain, at a minimum, a copy of the employment application, with references furnished, and documentation verifying freedom from signs or symptoms of communicable disease. In addition, records must contain the following, as applicable:

1. Documentation of compliance with all staff training and continuing education required by rule 59A-36.011, F.A.C.,

2. Copies of all licenses or certifications for all staff providing services that require licensing or certification,

3. Documentation of compliance with level 2 background screening for all staff subject to screening requirements as specified in section 429.174, F.S., and rule 59A-36.010, F.A.C.,

4. For facilities with a licensed capacity of 17 or more residents, a copy of the job description given to each staff member pursuant to rule 59A-36.010, F.A.C.,

5. Documentation verifying direct care staff and administrator participation in resident elopement drills pursuant to paragraph 59A-36.007(8)(c), F.A.C.

(b) The facility is not required to maintain personnel records for staff provided by a licensed staffing agency or staff employed by an entity contracting to provide direct or indirect services to residents and the facility. However, the facility must maintain a copy of the contract between the facility and the staffing agency or contractor as described in rule 59A-36.010, F.A.C.

(c) The facility must maintain the written work schedules and staff time sheets for the most current 6 months as required by rule 59A-36.010, F.A.C.

(3) RESIDENT RECORDS. Resident records must be maintained on the premises and include:

(a) Resident demographic data as follows:

1. Name,

2. Sex,

3. Race,

4. Date of birth,

5. Place of birth, if known,

6. Social security number,

7. Medicaid and/or Medicare number, or name of other health insurance carrier,

8. Name, address, and telephone number of next of kin, legal representative, or individual designated by the resident for notification in case of an emergency; and,

9. Name, address, and telephone number of the health care provider and case manager, if applicable.

(b) A copy of the Resident Health Assessment form, AHCA Form 1823 described in rule 59A-36.006, F.A.C.

(c) Any orders for medications, nursing services, therapeutic diets, do not resuscitate orders, or other services to be provided, supervised, or implemented by the facility that require a health care provider's order.

(d) Documentation of a resident's refusal of a therapeutic diet pursuant to rule 59A-36.012, F.A.C., if applicable.

(e) The resident care record described in paragraph 59A-36.007(1)(e), F.A.C.

(f) A weight record that is initiated on admission. Information may be taken from AHCA Form 1823 or the resident's health assessment. Residents receiving assistance with the activities of daily living must have their weight recorded semi-annually.

(g) For facilities that will have unlicensed staff assisting the resident with the self-administration of medication, a copy of the written informed consent described in rule 59A-36.006, F.A.C., if such consent is not included in the resident's contract.

(h) For facilities that manage a pill organizer, assist with self-administration of medications or administer medications for a resident, copies of the required medication records maintained pursuant to rule 59A-36.008, F.A.C.

(i) A copy of the resident's contract with the facility, including any addendums to the contract as described in rule 59A-36.018, F.A.C.

(j) For a facility whose owner, administrator, staff, or representative thereof, serves as an attorney in fact for a resident, a copy of the monthly written statement of any transaction made on behalf of the resident as required in section 429.27, F.S.

(k) For any facility that maintains a separate trust fund to receive funds or other property belonging to or due a resident, a copy

AMERICAN OVERSIGHT

of the quarterly written statement of funds or other property disbursed as required in section 429.27, F.S.

(l) If the resident is an OSS recipient, a copy of the Department of Children and Families form Alternate Care Certification for Optional State Supplementation (OSS), CF-ES 1006, October 2005, which is hereby incorporated by reference and available for review at: http://www.flrules.org/Gateway/reference.asp?No=Ref-04004. The absence of this form will not be the basis for administrative action against a facility if the facility can demonstrate that it has made a good faith effort to obtain the required documentation from the Department of Children and Families.

(m) Documentation of the appointment of a health care surrogate, health care proxy, guardian, or the existence of a power of attorney, where applicable.

(n) For hospice patients, the interdisciplinary care plan and other documentation that the resident is a hospice patient as required in rule 59A-36.006, F.A.C.

(o) The resident's Do Not Resuscitate Order, DH Form 1896, if applicable.

(p) For independent living residents who receive meals and occupy beds included within the licensed capacity of an assisted living facility, but who are not receiving any personal, limited nursing, or extended congregate care services, record keeping may be limited to the following at the discretion of the facility:

1. A log listing the names of residents participating in this arrangement,
2. The resident demographic data required in this paragraph,
3. The health assessment described in rule 59A-36.006, F.A.C.,
4. The resident's contract described in rule 59A-36.018, F.A.C.; and,
5. A health care provider's order for a therapeutic diet if such diet is prescribed and the resident participates in the meal plan offered by the facility.

(q) Except for resident contracts, which must be retained for 5 years, all resident records must be retained for 2 years following the departure of a resident from the facility unless it is required by contract to retain the records for a longer period of time. Upon request, residents must be provided with a copy of their records upon departure from the facility.

(r) Additional resident records requirements for facilities holding a limited mental health, extended congregate care, or limited nursing services license are provided in rules 59A-36.020, 59A-36.021 and 59A-36.022, F.A.C., respectively.

(4) RECORD INSPECTION.

(a) The resident's records must be available to the resident; the resident's legal representative, designee, surrogate, guardian, attorney in fact, or case manager; or the resident's estate, and such additional parties as authorized in writing or by law.

(b) Pursuant to section 429.35, F.S., agency reports that pertain to any agency survey, inspection, or monitoring visit must be available to the residents and the public. In facilities that are co-located with a licensed nursing home, the inspection of record for all common areas is the nursing home inspection report.

Rulemaking Authority 429.41, 429.275 FS. Law Implemented 429.24, 429.255, 429.256, 429.26, 429.27, 429.275, 429.35, 429.41, 429.52 FS. History–New 5-14-81, Amended 1-6-82, 5-19-83, 9-17-84, Formerly 10A-5.24, Amended 10-20-86, 6-21-88, 8-15-90, 9-30-92, Formerly 10A-5.024, Amended 10-30-95, 4-20-98, 11-2-98, 10-17-99, 7-30-06, 10-9-06, 4-17-14, Formerly 58A-5.024, 7-1-19.

59A-36.016 Adverse Incident Report.

(1) INITIAL ADVERSE INCIDENT REPORT. The preliminary adverse incident report required by section 429.23(3), F.S., must be submitted within 1 business day after the incident pursuant to rule 59A-35.110, F.A.C., which requires online reporting.

(2) FULL ADVERSE INCIDENT REPORT. For each adverse incident reported in subsection (1), above, the facility must submit a full report within 15 days of the incident. The full report must be submitted pursuant to rule 59A-35.110, F.A.C., which requires online reporting.

Rulemaking Authority 429.23 FS. Law Implemented 429.23 FS. History–New 1-9-02, Amended 7-30-06, 4-17-14, Formerly 58A-5.0241, 7-1-19.

59A-36.017 Liability Claim Report.

(1) MONTHLY LIABILITY CLAIM REPORT. Each assisted living facility must report monthly any liability claim filed against the facility pursuant to rule 59A-35.110, F.A.C., which requires online reporting. Each facility must comply with the reporting time frames and transmission requirements specified in section 429.23(5), F.S.

(2) If a liability claim has not been filed against the facility in a given month, no report is required.

AMERICAN OVERSIGHT

Rulemaking Authority 429.23 FS. Law Implemented 429.23 FS. History–New 1-9-02, Amended 3-13-14, Formerly 58A-5.0242, 7-1-19.

59A-36.018 Resident Contracts.

(1) Pursuant to section 429.24, F.S., the facility must offer a contract for execution by the resident or the resident's legal representative before or at the time of admission. The contract must contain the following provisions:

(a) A list of the specific services, supplies and accommodations to be provided by the facility to the resident, including limited nursing and extended congregate care services that the resident elects to receive;

(b) The daily, weekly, or monthly rate;

(c) A list of any additional services and charges to be provided that are not included in the daily, weekly, or monthly rates, or a reference to a separate fee schedule that must be attached to the contract;

(d) A provision stating that at least 30 days written notice will be given before any rate increase;

(e) Any rights, duties, or obligations of residents, other than those specified in section 429.28, F.S.;

(f) The purpose of any advance payments or deposit payments, and the refund policy for such advance or deposit payments;

(g) A refund policy that must conform to section 429.24(3), F.S.;

(h) A written bed hold policy and provisions for terminating a bed hold agreement if a facility agrees in writing to reserve a bed for a resident who is admitted to a nursing home, health care facility, or psychiatric facility. The resident or responsible party must notify the facility in writing of any change in status that would prevent the resident from returning to the facility. Until such written notice is received, the agreed upon daily, weekly, or monthly rate may be charged by the facility unless the resident's medical condition prevents the resident from giving written notification, such as when a resident is comatose, and the resident does not have a responsible party to act on the resident's behalf;

(i) A provision stating whether the facility is affiliated with any religious organization and, if so, which organization and its relationship to the facility;

(j) A provision that, upon determination by the administrator or health care provider that the resident needs services beyond those that the facility is licensed to provide, the resident or the resident's representative, or agency acting on the resident's behalf, must be notified in writing that the resident must make arrangements for transfer to a care setting that is able to provide services needed by the resident. In the event the resident has no one to represent him or her, the facility must refer the resident to the social service agency for placement. If there is disagreement regarding the appropriateness of placement, provisions outlined in section 429.26(8), F.S., will take effect;

(k) A provision that residents must be assessed upon admission pursuant to subsection 59A-36.006(2), F.A.C., and every 3 years thereafter, or after a significant change, pursuant to subsection (4), of that rule;

(l) The facility's policies and procedures for self-administration, assistance with self-administration, and administration of medications, if applicable, pursuant to rule 59A-36.008, F.A.C. This also includes provisions regarding over-the-counter (OTC) products pursuant to subsection (8) of that rule; and,

(m) The facility's policies and procedures related to a properly executed DH Form 1896, Do Not Resuscitate Order.

(2) The resident, or the resident's representative, must be provided with a copy of the executed contract.

(3) The facility may not levy an additional charge for any supplies, services, or accommodations that the facility has agreed by contract to provide as part of the standard daily, weekly, or monthly rate. The resident or resident's representative must be furnished in advance with an itemized written statement setting forth additional charges for any services, supplies, or accommodations available to residents not covered under the contract. An addendum must be added to the resident contract to reflect the additional services, supplies, or accommodations not provided under the original agreement. Such addendum must be dated and signed by the facility and the resident or resident's legal representative and a copy given to the resident or resident's representative.

Rulemaking Authority 429.24, 429.41 FS. Law Implemented 429.24, 429.41 FS. History–New 10-17-99, Amended 7-30-06, 4-15-10, 3-13-14, Formerly 58A-5.025, 7-1-19.

59A-36.019 Emergency Management.

(1) EMERGENCY PLAN COMPONENTS. Pursuant to section 429.41, F.S., each facility must prepare a written comprehensive emergency management plan in accordance with the "Emergency Management Criteria for Assisted Living Facilities," dated October 1995, which is incorporated by reference and available at http://www.flrules.org/Gateway/reference.asp?No=Ref-04010. This document is available from the local emergency management

AMERICAN OVERSIGHT

agency. The emergency management plan must, at a minimum, address the following:

(a) Provision for all hazards;

(b) Provision for the care of residents remaining in the facility during an emergency, including pre-disaster or emergency preparation; protecting the facility; supplies; emergency power; food and water; staffing; and emergency equipment;

(c) Provision for the care of residents who must be evacuated from the facility during an emergency including identification of such residents and transfer of resident records; evacuation transportation; sheltering arrangements; supplies; staffing; emergency equipment; and medications;

(d) Provision for the care of additional residents who may be evacuated to the facility during an emergency including the identification of such residents, staffing, and supplies;

(e) Identification of residents with Alzheimer's disease or related disorders, and residents with mobility limitations who may need specialized assistance either at the facility or in case of evacuation;

(f) Identification of and coordination with the local emergency management agency;

(g) Arrangement for post-disaster activities including responding to family inquiries, obtaining medical intervention for residents, transportation, and reporting to the local emergency management agency the number of residents who have been relocated, and the place of relocation; and,

(h) The identification of staff responsible for implementing each part of the plan.

(2) EMERGENCY PLAN APPROVAL. The plan must be submitted for review and approval to the local emergency management agency.

(a) If the local emergency management agency requires revisions to the emergency management plan, such revisions must be made and the plan resubmitted to the local office within 30 days of receiving notification that the plan must be revised.

(b) A new facility as described in rule 59A-36.014, F.A.C., and facilities whose ownership has been transferred, must submit an emergency management plan within 30 days after obtaining a license.

(c) The facility must review its emergency management plan on an annual basis. Any substantive changes must be submitted to the local emergency agency for review and approval.

1. Changes in the name, address, telephone number, or position of staff listed in the plan are not considered substantive revisions for the purposes of this rule.

2. Changes in the identification of specific staff must be submitted to the local emergency management agency annually as a signed and dated addendum that is not subject to review and approval.

(d) The local emergency management agency is the final administrative authority for emergency management plans prepared by assisted living facilities.

(e) Any plan approved by the local emergency management agency is considered to have met all the criteria and conditions established in this rule.

(3) PLAN IMPLEMENTATION.

(a) All staff must be trained in their duties and are responsible for implementing the emergency management plan.

(b) If telephone service is not available during an emergency, the facility must request assistance from local law enforcement or emergency management personnel in maintaining communication.

(4) FACILITY EVACUATION. The facility must evacuate the premises during or after an emergency if so directed by the local emergency management agency.

(a) The facility must report the evacuation to the local office of emergency management or designee and to the agency within 6 hours of the evacuation order. If the evacuation takes more than 6 hours, the facility must report when the evacuation is completed.

(b) The facility must not be re-occupied until the area is cleared for reentry by the local emergency management agency or its designee and the facility can meet the immediate needs of the residents.

(c) A facility with significant structural damage must relocate residents until the facility can be safely re-occupied.

(d) The facility is responsible for knowing the location of all residents until the residents have been relocated to another facility.

(e) The facility must provide the agency with the name of a contact person who must be available by telephone 24 hours a day, seven days a week, until the facility is re-occupied.

(f) The facility must assist in the relocation of residents, and must cooperate with outreach teams established by the Department of Health or emergency management agency to assist in relocation efforts. Resident needs and preferences must be considered to the extent possible in any relocation decision.

AMERICAN OVERSIGHT

(5) EMERGENCY SHELTER. In the event a state of emergency has been declared and the facility is not required to evacuate the premises, the facility may provide emergency shelter above the facility's licensed capacity provided the following conditions are met:

(a) Life safety will not be jeopardized for any individual;

(b) The immediate needs of residents and other individuals sheltered at the facility can be met by the facility;

(c) The facility reports the number of individuals over its licensed capacity and the conditions causing it to the Agency Field Office within 48 hours or as soon as practical. As an alternative, the facility may report to the Agency Central Office at (850)412-4304. If the facility will continue to be over capacity after the declared emergency ends, the agency will review requests for excess capacity on a case-by-case basis; and,

(d) The facility maintains a log of the additional individuals being housed in the facility. The log must include the individual's name, usual address, and the dates of arrival and departure. The log must be available for review by representatives of the agency, the department, the local emergency management agency or its designee. The admissions and discharge log maintained by the facility may be used for this purpose provided the information is maintained in a manner that is easily accessible.

Rulemaking Authority 429.41 FS. Law Implemented 429.41 FS. History–New 10-17-99, Amended 7-30-06, 4-17-14, Formerly 58A-5.026, 7-1-19.

59A-36.020 Limited Mental Health.

(1) LICENSE APPLICATION.

(a) Any facility intending to admit one or more mental health residents must obtain a limited mental health license from the agency before accepting the mental health resident.

(b) Facilities applying for a limited mental health license that have uncorrected deficiencies or violations found during the facility's last survey, complaint investigation, or monitoring visit will be surveyed before the issuance of a limited mental health license to determine if such deficiencies or violations have been corrected.

(2) RECORDS.

(a) A facility with a limited mental health license must maintain an up-to-date admission and discharge log containing the names and dates of admission and discharge for all mental health residents. The admission and discharge log required in rule 59A-36.015, F.A.C., satisfies this condition provided that all mental health residents are clearly identified.

(b) Staff records must contain documentation that designated staff have completed limited mental health training as required by rule 59A-36.011, F.A.C.

(c) Resident records must include:

1. Documentation, provided by a mental health care provider within 30 days of the resident's admission to the facility, that the resident is a mental health resident as defined in section 394.4574, F.S., and that the resident is receiving social security disability or supplemental security income and optional state supplementation as follows:

a. An affirmative statement on the Alternate Care Certification for Optional State Supplementation (OSS) form, CF-ES 1006, October 2005, which is hereby incorporated by reference and available for review at: http://www.flrules.org/Gateway/reference.asp?No=Ref-03988, that the resident is receiving SSI or SSDI due to a mental disorder,

b. Written verification provided by the Social Security Administration that the resident is receiving SSI or SSDI for a mental disorder. Such verification may be acquired from the Social Security Administration upon obtaining a release from the resident permitting the Social Security Administration to provide such information, or

c. A written statement from the resident's case manager or other mental health care provider that the resident is an adult with severe and persistent mental disorder. The case manager or other mental health care provider must consider the following minimum criteria in making that determination:

(I) The resident is eligible for, is receiving, or has received mental health services within the last 5 years, or

(II) The resident has been diagnosed as having a severe or persistent mental disorder.

2. An appropriate placement assessment provided by the resident's mental health care provider within 30 days of admission to the facility that the resident has been assessed and found appropriate for residence in an assisted living facility. Such assessment must be conducted by a psychiatrist, clinical psychologist, clinical social worker, psychiatric nurse, or an individual supervised by one of these professionals.

a. Any of the following documentation that contains the name of the resident and the name, signature, date, and license number, if applicable, of the person making the assessment, meets this requirement:

AMERICAN OVERSIGHT

(I) Completed Alternate Care Certification for Optional State Supplementation (OSS) form, CF-ES Form 1006,

(II) Discharge Statement from a state mental hospital completed no more than 90 days before admission to the assisted living facility provided it contains a statement that the individual is appropriate to live in an assisted living facility, or

(III) Other signed statement that the resident has been assessed and found appropriate for residency in an assisted living facility.

b. A mental health resident returning to a facility from treatment in a hopsital or crisis stabilization unit will not be considered a new admission and will not require a new assessment. However, a break in a resident's residency that requires the facility to execute a new resident contract or admission agreement will be considered a new admission and the resident's mental health care provider must provide a new assessment.

3. A Community Living Support Plan. Each mental health resident and the resident's mental health case manager must, in consultation with the facility administrator, prepare a plan within 30 days of the resident's admission to the facility or within 30 days after receiving the appropriate placement assessment in paragraph (2)(c), whichever is later, that:

a. Includes the specific needs of the resident that must be met in order to enable the resident to live in the assisted living facility and the community,

b. Includes the clinical mental health services to be provided by the mental health care provider to help meet the resident's needs, and the frequency and duration of such services,

c. Includes any other services and activities to be provided by or arranged for by the mental health care provider or mental health case manager to meet the resident's needs, and the frequency and duration of such services and activities,

d. Includes the obligations of the facility to facilitate and assist the resident in attending appointments and arranging transportation to appointments for the services and activities identified in the plan that have been provided or arranged for by the resident's mental health care provider or case manager,

e. Includes a description of other services to be provided or arranged by the facility,

f. Includes a list of factors pertinent to the care, safety, and welfare of the mental health resident and a description of the signs and symptoms particular to the resident that indicate the immediate need for professional mental health services,

g. Is in writing and signed by the mental health resident, the resident's mental health case manager, and the assisted living facility administrator or manager and a copy placed in the resident's file. If the resident refuses to sign the plan, the resident's mental health case manager must add a statement that the resident was asked but refused to sign the plan,

h. Is updated at least annually or if there is a significant change in the resident's behavioral health,

i. May include the Cooperative Agreement described in subparagraph (2)(c)4. If included, the mental health care provider must also sign the plan; and,

j. Must be available for inspection to those who have legal authority to review the document.

4. Cooperative Agreement. The mental health care provider for each mental health resident and the facility administrator or designee must prepare a written statement, within 30 days of the resident's admission to the facility or receipt of the resident's appropriate placement assessment, whichever is later. The statement:

a. Provides procedures and directions for accessing emergency and after-hours care for the mental health resident. The provider must furnish the resident and the facility with the provider's 24-hour emergency crisis telephone number;

b. Must be signed by the administrator or designee and the mental health care provider, or by a designated representative of a Medicaid prepaid health plan if the resident is on a plan and the plan provides behavioral health services in section 409.912, F.S.;

c. May cover all mental health residents of the facility who are clients of the same provider; and,

d. May be included in the Community Living Support Plan described in subparagraph (2)(c)3.

5. Missing documentation will not be the basis for administrative action against a facility if the facility can demonstrate that it has made a good faith effort to obtain the required documentation from the appropriate party. A documented request for such missing documentation made by the facility administrator within 72 hours of the resident's admission will be considered a good faith effort. The documented request must include the name, title, and phone number of the person to whom the request was made and must be kept in the resident's file.

(3) RESPONSIBILITIES OF FACILITY. In addition to the staffing and care standards of this rule chapter to provide for the welfare of residents in an assisted living facility, a facility holding a limited mental health license must:

(a) Meet the facility's obligation to assist the resident in carrying out the activities identified in the Community Living Support Plan;

(b) Provide an opportunity for private face-to-face contact between the mental health resident and the resident's mental health

AMERICAN OVERSIGHT

case manager or other treatment personnel of the resident's mental health care provider;

(c) Observe resident behavior and functioning in the facility, and record and communicate observations to the resident's mental health case manager or mental health care provider regarding any significant behavioral or situational changes that may signify the need for a change in the resident's professional mental health services, supports, and services described in the community living support plan, or that the resident is no longer appropriate for residency in the facility;

(d) If the facility initiates an involuntary mental health examination pursuant to section 394.463, F.S., the facility must document the circumstances leading to the initiation of the examination;

(e) Ensure that designated staff have completed limited mental health training as required by rule 59A-36.011, F.A.C.; and,

(f) Maintain facility, staff, and resident records in accordance with the requirements of this rule chapter.

Rulemaking Authority 429.41 FS. Law Implemented 429.075, 429.26, 429.41 FS. History–New 8-15-90, Amended 9-30-92, Formerly 10A-5.029, Repromulgated 10-30-95, Amended 6-2-96, 11-2-98, 7-30-06, Amended 4-17-14, 5-10-18, Formerly 58A-5.029, 7-1-19.

59A-36.021 Extended Congregate Care Services.

(1) LICENSING.

(a) Any facility intending to establish extended congregate care services must obtain a license from the agency before accepting residents needing extended congregate care services.

(b) Only the portion of a facility that meets the physical requirements of subsection (3), and is staffed in accordance with subsection (4), is considered licensed to provide extended congregate care services to residents who meet the admission and continued residency requirements of this rule.

(2) EXTENDED CONGREGATE CARE POLICIES. Policies and procedures established through extended congregate care services must promote resident independence, dignity, choice, and decision-making. The facility must develop and implement specific written policies and procedures that address:

(a) Aging in place;

(b) The facility's residency criteria developed in accordance with the admission and discharge requirements described in subsection (5), and extended congregate care services listed in subsection (8);

(c) The personal and supportive services the facility intends to provide, how the services will be provided, and the identification of staff positions to provide the services including their relationship to the facility;

(d) The nursing services the facility intends to provide, identification of staff positions to provide nursing services, and the license status, duties, general working hours, and supervision of such staff;

(e) Identifying potential unscheduled resident service needs and mechanisms for meeting those needs including the identification of resources to meet those needs;

(f) A process for mediating conflicts among residents regarding choice of room or apartment and roommate; and,

(g) How to involve residents in decisions concerning the resident. The services must provide opportunities and encouragement for the resident to make personal choices and decisions. If a resident needs assistance to make choices or decisions, a family member or other resident representative must be consulted. Choices must include at a minimum whether:

1. To participate in the process of developing, implementing, reviewing, and revising the resident's service plan,

2. To remain in the same room in the facility, except that a current resident transferring into an extended congregate care services may be required to move to the part of the facility licensed for extended congregate care, if only part of the facility is so licensed,

3. To select among social and leisure activities,

4. To participate in activities in the community. At a minimum the facility must arrange transportation to such activities if requested by the resident; and,

5. To provide input with respect to the adoption and amendment of facility policies and procedures.

(3) STAFFING REQUIREMENTS. The following staffing requirements apply for extended congregate care services:

(a) Supervision by an administrator who has a minimum of two years of managerial, nursing, social work, therapeutic recreation, or counseling experience in a residential, long-term care, or acute care setting or agency serving elderly or disabled persons. If an administrator appoints a manager as the supervisor of an extended congregate care facility, both the administrator and manager must satisfy the requirements of subsection 59A-36.010(1), F.A.C.

1. A baccalaureate degree may be substituted for one year of the required experience.

AMERICAN OVERSIGHT

2. A nursing home administrator licensed under chapter 468, F.S., is qualified under this paragraph.

(b) Provide staff or contract the services of a nurse who must be available to provide nursing services, participate in the development of resident service plans, and perform monthly nursing assessments for extended congregate care residents.

(c) Provide enough qualified staff to meet the needs of extended congregate care residents in accordance with rule 59A-36.010, F.A.C., and to provide the services established in each resident's service plan.

(d) Ensure that adequate staff is awake during all hours to meet the scheduled and unscheduled needs of residents.

(e) Immediately provide additional or appropriately qualified staff, when the agency determines that service plans are not being followed or that residents' needs are not being met because insufficient staffing, in accordance with the staffing standards established in rule 59A-36.010, F.A.C.

(f) Ensure and document that staff receive extended congregate care training as required in rule 59A-36.011, F.A.C.

(4) ADMISSION AND CONTINUED RESIDENCY.

(a) An individual must meet the following minimum criteria in order to receive extended congregate care services:

1. Be at least 18 years of age;

2. Be free from signs and symptoms of a communicable disease that is likely to be transmitted to other residents or staff; however, an individual who has human immunodeficiency virus (HIV) infection may be admitted to a facility, provided that he or she would otherwise be eligible for admission according to this rule;

3. Be able to transfer, with assistance if necessary. The assistance of more than one individual is permitted;

4. Not be a danger to self or others as determined by a health care provider or mental health practitioner licensed under chapter 490 or 491, F.S.;

5. Not be bedridden;

6. Not have any stage 3 or 4 pressure sores;

7. Not require any of the following nursing services:

a. Artificial airway management of any kind except that of continuous positive airway pressure may be provided through the use of a CPAP or bipap machine,

b. Nasogastric tube feeding,

c. Monitoring of blood gases,

d. Management of post-surgical drainage tubes or wound vacuums,

e. Skilled rehabilitative services as described in rule 59G-4.290, F.A.C., or

f. Treatment of a surgical incision, unless the surgical incision and the condition that caused it have been stabilized and a plan of care developed. The plan of care must be maintained in the resident's record at the facility.

8. Not require 24-hour nursing supervision; and,

9. Have been determined to be appropriate for admission to the facility by the facility administrator or manager. The administrator or manager must base his or her decision on:

a. An assessment of the strengths, needs, and preferences of the individual, the health assessment required by subsection (6) of this rule, and the preliminary service plan developed in subsection (7),

b. The facility's residency criteria, and services offered or arranged for by the facility to meet resident needs; and,

c. The ability of the facility to meet the uniform fire safety standards for assisted living facilities established in rule chapter 69A-40, F.A.C.

(b) Criteria for continued residency in an extended congregate care services must be the same as the criteria for admission, except as specified below.

1. A resident may be bedridden for up to 14 consecutive days.

2. A terminally ill resident who no longer meets the criteria for continued residency may continue to reside in the facility if the following conditions are met:

a. The resident qualifies for, is admitted to, and consents to the services of a licensed hospice that coordinates and ensures the provision of any additional care and services that may be needed,

b. Continued residency is agreeable to the resident and the facility,

c. An interdisciplinary care plan, which specifies the services being provided by hospice and those being provided by the facility, is developed and implemented by a licensed hospice in consultation with the facility; and,

d. Documentation of the requirements of subparagraph (5)(b)2., is maintained in the resident's file.

AMERICAN OVERSIGHT

3. The extended congregate care administrator or manager is responsible for monitoring the appropriateness of continued residency of a resident in extended congregate care services at all times.

4. A hospice resident that meets the qualifications of continued residency pursuant to this rule may only receive services from the assisted living facility's staff within the scope of the facility's license.

5. Staff may provide any nursing service permitted under the facility's license and total help with the activities of daily living for residents admitted to hospice. Staff may not exceed the scope of their professional licensure or training in any licensed assisted living facility.

(5) HEALTH ASSESSMENT. Before receiving extended congregate care services, all persons. including residents transferring within the same facility to that portion of the facility licensed to provide extended congregate care services, must be examined by a health care provider pursuant to rule 59A-36.006, F.A.C. A health assessment conducted no more than 60 days before receiving extended congregate care services meets this requirement. Once receiving services, a new health assessment must be obtained at least annually.

(6) SERVICE PLANS.

(a) Before receiving services, the extended congregate care administrator or manager must develop a preliminary service plan that includes an assessment of whether the resident meets the facility's residency criteria, an appraisal of the resident's unique physical, psychological and social needs and preferences, and an evaluation of the facility's ability to meet the resident's needs.

(b) Within 14 days of receiving services, the extended congregate care administrator or manager must coordinate the development of a written service plan that takes into account the resident's health assessment obtained pursuant to subsection (6); the resident's unique physical, psychological and social needs and preferences; and how the facility will meet the resident's needs including the following if required:

1. Health monitoring,
2. Assistance with personal care services,
3. Nursing services,
4. Supervision,
5. Special diets,
6. Ancillary services,
7. The provision of other services such as transportation and supportive services; and,
8. The manner of service provision, and identification of service providers, including family and friends, in keeping with resident preferences.

(c) Pursuant to the definitions of "shared responsibility" and "managed risk" as provided in section 429.02, F.S., the service plan must be developed and agreed upon by the resident or the resident's representative or designee, surrogate, guardian, or attorney-in-fact, and must reflect the responsibility and right of the resident to consider options and assume risks when making choices pertaining to the resident's service needs and preferences.

(d) The service plan must be reviewed and updated quarterly to reflect any changes in the manner of service provision, accommodate any changes in the resident's physical or mental status, or pursuant to recommendations for modifications in the resident's care as documented in the nursing assessment.

(7) EXTENDED CONGREGATE CARE SERVICES. All services must be provided in the least restrictive environment, and in a manner that respects the resident's independence, privacy, and dignity.

(a) A facility providing extended congregate care services may provide supportive services including social service needs, counseling, emotional support, networking, assistance with securing social and leisure services, shopping service, escort service, companionship, family support, information and referral, assistance in developing and implementing self-directed activities, and volunteer services. Family or friends must be encouraged to provide supportive services for residents. The facility must provide training for family or friends to enable them to provide supportive services in accordance with the resident's service plan.

(b) A facility providing extended congregate care services must make available the following additional services if required by the resident's service plan:

1. Total help with bathing, dressing, grooming and toileting,
2. Nursing assessments conducted more frequently than monthly,
3. Measurement and recording of basic vital functions and weight,
4. Dietary management including provision of special diets, monitoring nutrition, and observing the resident's food and fluid

AMERICAN OVERSIGHT

intake and output,

5. Assistance with self-administered medications, or the administration of medications and treatments pursuant to a health care provider's order. If the individual needs assistance with self-administration the facility must inform the resident of the qualifications of staff who will be providing this assistance, and if unlicensed persons will be providing such assistance, obtain the resident's or the resident's surrogate, guardian, or attorney-in-fact's informed written consent to provide such assistance as required in section 429.256, F.S.,

6. Supervision of residents with dementia and cognitive impairments,

7. Health education and counseling and the implementation of health-promoting programs and preventive regimes,

8. Provision or arrangement for rehabilitative services; and,

9. Provision of escort services to health-related appointments.

(c) Nursing staff providing extended congregate care services may provide any nursing service permitted within the scope of their license consistent with the residency requirements of this rule and the facility's written policies and procedures, provided the nursing services are:

1. Authorized by a health care provider's order and pursuant to a plan of care,

2. Medically necessary and appropriate for treatment of the resident's condition,

3. In accordance with the prevailing standard of practice in the nursing community,

4. A service that can be safely, effectively, and efficiently provided in the facility,

5. Recorded in nursing progress notes; and,

6. In accordance with the resident's service plan.

(d) At least monthly, or more frequently if required by the resident's service plan, a nursing assessment of the resident must be conducted.

(8) RECORDS. In addition to the records required in rule 59A-36.015, F.A.C., a facility providing extended congregate care services must maintain the following:

(a) The service plans for each resident receiving extended congregate care services;

(b) The nursing progress notes for each resident receiving nursing services;

(c) Nursing assessments; and,

(d) The facility's extended congregate care policies and procedures.

(9) DISCHARGE. If the facility and the resident are unable to agree on a service plan, the facility is unable to meet the resident's needs as identified in the service plan, or the resident no longer meets the criteria for continued residency, the resident must be discharged or relocated in accordance with sections 429.26 and 429.28, F.S.

Rulemaking Authority 429.07, 429.41 FS. Law Implemented 429.07, 429.255, 429.26, 429.28, 429.41 FS. History–New 9-30-92, Formerly 10A-5.030, Amended 10-30-95, 6-2-96, 4-20-98, 11-2-98, 10-17-99, 7-30-06, 4-17-14, 5-10-18, Formerly 58A-5.030, 7-1-19.

59A-36.022 Limited Nursing Services.

Any facility intending to provide limited nursing services must obtain a license from the agency.

(1) NURSING SERVICES. In addition to any nursing service permitted under a standard license pursuant to section 429.255, F.S., a facility with a limited nursing services license may provide nursing care to residents who do not require 24-hour nursing supervision and to residents who do require 24-hour nursing care and are enrolled in hospice.

(2) RESIDENT CARE STANDARDS.

(a) A resident receiving limited nursing services in a facility holding only a standard and limited nursing services license must meet the admission and continued residency criteria specified in rule 59A-36.006, F.A.C.

(b) In accordance with rule 59A-36.010, F.A.C., the facility must employ sufficient and qualified staff to meet the needs of residents requiring limited nursing services based on the number of such residents and the type of nursing service to be provided.

(c) Limited nursing services may only be provided as authorized by a health care provider's order, a copy of which must be maintained in the resident's file.

(d) Facilities licensed to provide limited nursing services must employ or contract with a nurse(s) who must be available to provide such services as needed by residents. The facility's employed or contracted nurse must coordinate with third party nursing services providers to ensure resident care is provided in a safe and consistent manner. The facility must maintain documentation of the qualifications of nurses providing limited nursing services in the facility's personnel files.

AMERICAN OVERSIGHT

(e) The facility must ensure that nursing services are conducted and supervised in accordance with chapter 464, F.S., and the prevailing standard of practice in the nursing community.

(3) RECORDS.

(a) A record of all residents receiving limited nursing services and the type of services provided must be maintained at the facility.

(b) Nursing progress notes must be maintained for each resident who receives limited nursing services.

(c) A nursing assessment conducted at least monthly must be maintained on each resident who receives a limited nursing service.

Rulemaking Authority 429.41 FS. Law Implemented 429.07, 429.255, 429.26, 429.41 FS. History–New 9-30-92, Formerly 10A-5.031, Amended 10-30-95, 10-17-99, 7-30-06, 3-13-14, 5-10-18, Formerly 58A-5.031, 7-1-19.

59A-36.023 Administrative Enforcement.

Facility staff must cooperate with agency personnel during surveys, complaint investigations, monitoring visits, license application and renewal procedures and other activities necessary to ensure compliance with Part II, Chapter 408, F.S., Part I, Chapter 429, F.S., Rule Chapter 59A-35, F.A.C., and this rule chapter.

(1) Abbreviated Survey.

(a) An applicant for license renewal who does not have any class I or class II violations or uncorrected class III violations, confirmed long-term care ombudsman program complaints, or confirmed licensing complaints within the two licensing periods immediately preceding the current renewal date, is eligible for an abbreviated biennial survey by the agency. For the purpose of this rule, a confirmed long-term care ombudsman program complaint is a complaint that is verified and referred to a regulatory agency for further action. Facilities that do not have two survey reports on file with the agency under current ownership are not eligible for an abbreviated inspection. Upon arrival at the facility, the agency must inform the facility that it is eligible for an abbreviated survey, and that an abbreviated survey will be conducted.

(b) Compliance with key quality of care standards described in the following statutes and rules will be used by the agency during its abbreviated survey of eligible facilities:

1. Section 429.26, F.S., and Rule 58A-5.0181, F.A.C., relating to residency criteria;

2. Section 429.27, F.S., and Rule 58A-5.021, F.A.C., relating to proper management of resident funds and property;

3. Section 429.28, F.S., and Rule 58A-5.0182, F.A.C., relating to respect for resident rights;

4. Section 429.41, F.S., and Rule 58A-5.0182, F.A.C., relating to the provision of supervision, assistance with the activities of daily living, and arrangement for appointments and transportation to appointments;

5. Section 429.256, F.S., and Rule 58A-5.0185, F.A.C., relating to assistance with or administration of medications;

6. Section 429.41, F.S., and Rule 58A-5.019, F.A.C., relating to the provision of sufficient staffing to meet resident needs;

7. Section 429.41, F.S., and Rule 58A-5.020, F.A.C., relating to minimum dietary requirements and proper food hygiene;

8. Section 429.075, F.S., and Rule 58A-5.029, F.A.C., relating to mental health residents' community support living plan;

9. Section 429.07, F.S., and Rule 58A-5.030, F.A.C., relating to meeting the environmental standards and residency criteria in a facility with an extended congregate care license; and

10. Section 429.07, F.S., and Rule 58A-5.031, F.A.C., relating to the provision of care and staffing in a facility with a limited nursing services license.

(c) The agency will expand the abbreviated survey or conduct a full survey if violations which threaten or potentially threaten the health, safety, or welfare of residents are identified during the abbreviated survey. The facility must be informed when a full survey will be conducted. If one or more of the following serious problems are identified during an abbreviated survey, a full biennial survey will be immediately conducted:

1. Violations of Rule Chapter 69A-40, F.A.C., relating to firesafety, that threaten the life or safety of a resident;

2. Violations relating to staffing standards or resident care standards that adversely affect the health, safety, or welfare of a resident;

3. Violations relating to facility staff rendering services for which the facility is not licensed; or

4. Violations relating to facility medication practices that are a threat to the health, safety, or welfare of a resident.

(2) Survey Deficiency.

(a) Before or in conjunction with a notice of violation issued pursuant to Part II, Chapter 408, F.S., and Section 429.19, F.S., the

AMERICAN OVERSIGHT

agency shall issue a statement of deficiency for class I, II, III, and IV violations which are observed by agency personnel during any inspection of the facility. The deficiency statement must be issued within 10 working days of the agency's inspection and must include:

1. A description of the deficiency;

2. A citation to the statute or rule violated; and

3. A time frame for the correction of the deficiency.

(b) Additional time may be granted to correct specific deficiencies if a written request is received by the agency before the expiration of the time frame included in the agency's statement.

(3) Employment of A Consultant.

(a) Medication Deficiencies.

1. If a class I, class II, or uncorrected class III deficiency directly relating to facility medication practices as established in Rule 58A-5.0185, F.A.C., is documented by agency personnel pursuant to an inspection of the facility, the agency must notify the facility in writing that the facility must employ or contract the services of a pharmacist licensed pursuant to Section 465.0125, F.S., or registered nurse as determined by the agency.

2. After developing and impementing a corrective action plan in compliance with Section 429.42(2), F.S., the initial on-site consultant visit must take place within 7 working days of the notice of a class I or class II deficiency and within 14 working days of the notice of an uncorrected class III deficiency. The facility must have available for review by the agency a copy of the license of the consultant pharmacist or registered nurse and the consultant's signed and dated review of the corrective action plan no later than 10 working days subsequent to the initial on-site consultant visit.

3. The facility must provide the agency with, at a minimum, quarterly on-site corrective action plan updates until the agency determines after written notification by the consultant and facility administrator that deficiencies are corrected and staff has been trained to ensure that proper medication standards are followed and that such consultant services are no longer required. The agency must provide the facility with written notification of such determination.

(b) Dietary Deficiencies.

1. If a class I, class II, or uncorrected class III deficiency directly related to dietary standards as established in Rule 58A-5.020, F.A.C., is documented by agency pursuant to an inspection of the facility, the agency must notify the facility in writing that the facility must employ or contract the services of a registered or licensed dietitian, or a licensed nutritionist.

2. The initial on-site consultant visit must take place within seven working days of the notice of a class I or II deficiency or within 14 working days of the notice of an uncorrected class III deficiency. The facility must have available for review by the agency a copy of the license or registration of the consultant dietitian or nutritionist and the consultant's signed and dated review of the facility's corrective action plan, if a plan is required by the agency, no later than 10 working days after the initial on-site consultant visit.

3. If a corrective action plan is required, the facility must provide the agency with, at a minimum, quarterly on-site corrective action plan updates until the agency determines after written notification by the dietary consultant and facility administrator, that deficiencies are corrected and staff has been trained to ensure that proper dietary standards are followed and consultant services are no longer required. The agency must provide the facility with written notification of such determination.

Rulemaking Authority 429.41, 429.42 FS. Law Implemented 429.19, 429.34, 429.41, 429.42 FS. History–New 9-30-92, Formerly 10A-5.033, Amended 10-30-95, 10-17-99, 1-9-02, 7-30-06, 4-15-10, 3-13-14, Formerly 58A-5.033, 7-1-19.

59A-36.024 Waivers.

The agency, in consultation with the department, may waive rules promulgated pursuant to part I, chapter 429, F.S., if the waiver request meets the conditions set forth in section 429.41(4), F.S., and demonstrates and evaluates innovative or cost-effective congregate care alternatives which will enable individuals to age in place.

(1) Application Process.

(a) Licensed assisted living facilities proposing a waiver under this statute must submit the request in writing. All requests must include the facility name and address, license number, administrator's name and contact information for the requestor, or its attorney. Petitions for waiver of rules other than for the objectives detailed in section 429.41(4), F.S., including emergency waivers, will not be considered under this section but should follow the petition for waiver provisions of section 120.542, F.S., and rule chapter 28-104, Variance or Waiver, F.A.C.

AMERICAN OVERSIGHT

(b) The written request must address the elements required in section 429.41(4), F.S. In addition, the following information must be included in order to demonstrate how a waiver of the stated rule will permit development of a concept that will achieve the purpose of the underlying statute:

1. The rule or rules for which the waiver is requested.

2. The licensee's anticipated date or dates for implementation of the concept.

3. If applying based on cost-effectiveness or cost-savings, a cost-benefit analysis of the proposed alternative to both residents or potential residents as well as facility operations.

4. An analysis of the impact the alternative will have on the relevant local community, including any barriers such as zoning or use issues, which may need resolution prior to implementation.

5. Specific performance measures with an annual projection of objectives and goals to be achieved broken into quarterly increments or an annual projection of outcome measures, if the concept will be implemented in less than 90 days.

6. If applying based on cost-effectiveness or cost-savings, an annual budget projection for the proposed alternative broken into quarterly increments.

(c) A waiver can be requested at the time of the initial license application, relicensure, or any time during the licensure period.

(d) Waiver requests must be submitted to the Agency for Health Care Administration, Assisted Living Unit, 2727 Mahan Drive, Mail Stop 30, Tallahassee, Florida 32308-5403.

(2) In accordance with section 120.542(6), F.S., the agency shall post notice of the request within fifteen (15) days of receipt of the request. The agency shall make any requests for additional information within 30 days of receipt of the request. If additional information is provided, the agency may request clarification of only that information no later than 30 days following receipt of the information. The agency shall process the waiver request pursuant to the time frame referenced in section 120.542(8), F.S.

(3) The agency, in consultation with the department, will evaluate all requests in light of the likelihood the concept, as described in detail, will achieve the underlying statutory objectives of innovative or cost effective congregate care alternatives to enable individuals to age in place, as provided in section 429.41(4), F.S. Waivers may be granted only so long as there is reasonable assurance that the health, safety or welfare of residents will not be endangered by the waiver.

(4) The agency shall grant or deny the request for waiver and enter an order summarizing the facts it relied on and reasons supporting its decision. The agency must provide notice of its order as described in section 120.542(8), F.S. The requestor shall be advised that a denial of the request may be reviewed as provided in subsection (5) of this rule.

(5) Report of Findings. A facility that has been granted a waiver must submit an annual report within 12 months of the order granting the waiver as specified in section 429.41(4), F.S. If the report is not submitted as required, the agency may revoke the waiver.

(a) The agency will review the report of findings to determine whether the waiver shall be renewed or revoked. The agency shall make the determination based on whether the facility has met the requirements outlined in subparagraph (1)(b) of this rule. The agency shall enter an order providing the general basis for making its decision and notify the licensee of its opportunity to seek review of a revocation in accordance with sections 120.569 and 120.57, F.S. and rule 28-106.111, F.A.C.

(b) The agency may also consider other material which is available relative to this review.

(c) A waiver is effective unless revoked by the agency or superseded by statutory or regulatory change.

(d) In reviewing the report of findings, the agency, in consultation with the department, shall assess whether statutory or regulatory changes should be pursued to enable other facilities to adopt the same practices.

Rulemaking Authority 429.41 FS. Law Implemented 120.542, 429.41 FS. History–New 9-30-92, Formerly 10A-5.035, Amended 10-30-95, 7-1-08, 4-17-14, Formerly 58A-5.035, 7-1-19.

59A-36.025 Emergency Environmental Control for Assisted Living Facilities.

(1) DETAILED EMERGENCY ENVIRONMENTAL CONTROL PLAN. Each assisted living facility shall prepare a detailed plan ("plan") to serve as a supplement to its Comprehensive Emergency Management Plan, to address emergency environmental control in the event of the loss of primary electrical power in that assisted living facility which includes the following information:

(a) The acquisition of a sufficient alternate power source such as a generator(s), maintained at the assisted living facility, to ensure that current licensees of assisted living facilities will be equipped to ensure ambient air temperatures will be maintained at or below 81 degrees Fahrenheit for a minimum of ninety-six (96) hours in the event of the loss of primary electrical power.

1. The required temperature must be maintained in an area or areas, determined by the assisted living facility, of sufficient size

AMERICAN OVERSIGHT

to maintain residents safely at all times and that is appropriate for resident care needs and life safety requirements. For planning purposes, no less than twenty (20) net square feet per resident must be provided. The assisted living facility may use eighty percent (80%) of its licensed bed capacity as the number of residents to be used in the calculation to determine the required square footage. This may include areas that are less than the entire assisted living facility if the assisted living facility's comprehensive emergency management plan includes allowing a resident to congregate when he or she desires in portions of the building where temperatures will be maintained and includes procedures for monitoring residents for signs of heat related injury as required by this rule. This rule does not prohibit a facility from acting as a receiving provider for evacuees when the conditions stated in section 408.821, F.S. and subsection 59A-36.019(5), F.A.C., are met. The plan shall include information regarding the area(s) within the assisted living facility where the required temperature will be maintained.

2. The alternate power source and fuel supply shall be located in an area(s) in accordance with local zoning and the Florida Building Code.

3. Each assisted living facility is unique in size; the types of care provided; the physical and mental capabilities and needs of residents; the type, frequency, and amount of services and care offered; and staffing characteristics. Accordingly, this rule does not limit the types of systems or equipment that may be used to achieve ambient temperatures at or below 81 degrees Fahrenheit for a minimum of ninety-six (96) hours in the event of the loss of primary electrical power. The plan shall include information regarding the systems and equipment that will be used by the assisted living facility and the fuel required to operate the systems and equipment.

a. An assisted living facility in an evacuation zone pursuant to chapter 252, F, S. must maintain an alternative power source and fuel as required by this subsection at all times when the assisted living facility is occupied but is permitted to utilize a mobile generator(s) to enable portability if evacuation is necessary.

b. Assisted living facilities located on a single campus with other facilities under common ownership, may share fuel, alternative power resources, and resident space available on the campus if such resources are sufficient to support the requirements of each facility's residents, as specified in this rule. Details regarding how resources will be shared and any necessary movement of residents must be clearly described in the emergency power plan.

c. A multistory facility, whose comprehensive emergency management plan is to move residents to a higher floor during a flood or surge event, must place its alternative power source and all necessary additional equipment so it can safely operate in a location protected from flooding or storm surge damage.

(b) The acquisition of sufficient fuel, and safe maintenance of that fuel at the facility, to ensure that in the event of the loss of primary electrical power there is sufficient fuel available for the alternate power source to maintain ambient temperatures at or below 81 degrees Fahrenheit for a minimum of ninety-six (96) hours after the loss of primary electrical power during a declared state of emergency. The plan must include information regarding fuel source and fuel storage.

1. Facilities must store minimum amounts of fuel onsite as follows:

a. A facility with a licensed capacity of 16 beds or less must store 48 hours of fuel onsite.

b. A facility with a licensed capacity of 17 or more beds must store 72 hours of fuel onsite.

2. An assisted living facility located in an area in a declared state of emergency area pursuant to section 252.36, F.S. that may impact primary power delivery must secure ninety-six (96) hours of fuel. The assisted living facility may utilize portable fuel storage containers for the remaining fuel necessary for ninety-six (96) hours during the period of a declared state of emergency.

3. Piped natural gas is an allowable fuel source and meets the onsite fuel supply requirements under this rule.

4. If local ordinances or other regulations limit the amount of onsite fuel storage for the assisted living facility's location, then the assisted living facility must develop a plan that includes maximum onsite fuel storage allowable by the ordinance or regulation and a reliable method to obtain the maximum additional fuel at least 24 hours prior to depletion of onsite fuel.

(c) The acquisition of services necessary to maintain, and test the equipment and its functions to ensure the safe and sufficient operation of the alternate power source maintained at the assisted living facility.

(d) The acquisition and maintenance of a carbon monoxide alarm.

(2) SUBMISSION OF THE PLAN.

(a) Each assisted living facility licensed prior to the effective date of this rule shall submit its plan to the local emergency management agency for review within 30 days of the effective date of this rule. Assisted living facility plans previously submitted and approved pursuant to emergency rule 58AER17-1 will require resubmission only if changes are made to the plan.

(b) Each new assisted living facility shall submit the plan required under this rule prior to obtaining a license.

AMERICAN OVERSIGHT

(c) Each existing assisted living facility that undergoes any additions, modifications, alterations, refurbishment, renovations or reconstruction that require modification of its systems or equipment affecting the facility's compliance with this rule shall amend its plan and submit it to the local emergency management agency for review and approval.

(3) APPROVED PLANS.

(a) Each assisted living facility must maintain a copy of its approved plan in a manner that makes the plan readily available at the licensee's physical address for review by a legally authorized entity. If the plan is maintained in an electronic format, assisted living facility staff must be readily available to access and produce the plan. For purposes of this section, "readily available" means the ability to immediately produce the plan, either in electronic or paper format, upon request.

(b) Within two (2) business days of the approval of the plan from the local emergency management agency, the assisted living facility shall submit in writing proof of the approval to the Agency for Health Care Administration.

(c) The assisted living facility shall submit a consumer-friendly summary of the emergency power plan to the Agency. The Agency shall post the summary and notice of the approval and implementation of the assisted living facility emergency power plans on its website within ten (10) business days of the plan's approval by the local emergency management agency and update within ten (10) business days of implementation.

(4) IMPLEMENTATION OF THE PLAN.

(a) Each assisted living facility licensed prior to the effective date of this rule shall, no later than June 1, 2018, have implemented the plan required under this rule.

(b) The Agency shall allow an extension up to January 1, 2019 to providers in compliance with paragraph (c) below and who can show delays caused by necessary construction, delivery of ordered equipment, zoning or other regulatory approval processes. Assisted living facilities shall notify the Agency that they will utilize the extension and keep the Agency apprised of progress on a quarterly basis to ensure there are no unnecessary delays. If an assisted living facility can show in its quarterly progress reports that unavoidable delays caused by necessary construction, delivery of ordered equipment, zoning or other regulatory approval processes will occur beyond the initial extension date, the assisted living facility may request a waiver pursuant to section 120.542, F.S.

(c) During the extension period, an assisted living facility must make arrangements pending full implementation of its plan that provides the residents with an area or areas to congregate that meets the safe indoor air temperature requirements of subsection (1) (a) for a minimum of ninety-six (96) hours.

1. An assisted living facility not located in an evacuation zone must either have an alternative power source onsite or have a contract in place for delivery of an alternative power source and fuel when requested. Within twenty-four (24) hours of the issuance of a state of emergency for an event that may impact primary power delivery for the area of the assisted living facility, it must have the alternative power source and no less than ninety-six (96) hours of fuel stored onsite.

2. An assisted living facility located in an evacuation zone pursuant to chapter 252, F.S. must either:

a. Fully and safely evacuate its residents prior to the arrival of the event; or

b. Have an alternative power source and no less than ninety-six (96) hours of fuel stored onsite, within twenty-four (24) hours of the issuance of a state of emergency for the area of the assisted living facility.

(d) Each new assisted living facility shall implement the plan required under this rule prior to obtaining a license.

(e) Existing assisted living facilities that undergo any additions, modifications, alterations, refurbishment, renovations or reconstruction that require modification of the systems or equipment affecting the assisted living facility's compliance with this rule shall implement its amended plan concurrent with any such additions, modifications, alterations, refurbishment, renovations or reconstruction.

(f) The Agency for Health Care Administration may request cooperation from the State Fire Marshal to conduct inspections to ensure implementation of the plan in compliance with this rule.

(5) POLICIES AND PROCEDURES.

(a) Each assisted living facility shall develop and implement written policies and procedures to ensure that the assisted living facility can effectively and immediately activate, operate and maintain the alternate power source and any fuel required for the operation of the alternate power source. The procedures shall ensure that residents do not experience complications from fluctuations in ambient air temperatures inside the facility. Procedures must address the care of residents occupying the facility during a declared state of emergency, specifically, a description of the methods to be used to mitigate the potential for heat related injury including:

1. The use of cooling devices and equipment;

2. The use of refrigeration and freezers to produce ice and appropriate temperatures for the maintenance of medicines requiring

AMERICAN OVERSIGHT

refrigeration;

3. Wellness checks by assisted living facility staff to monitor for signs of dehydration and heat injury; and

4. A provision for obtaining medical intervention from emergency services for residents whose life safety is in jeopardy.

(b) Each assisted living facility shall maintain the written policies and procedures in a manner that makes them readily available at the licensee's physical address for review by a legally authorized entity. If the policies and procedures are maintained in an electronic format, assisted living facility staff must be readily available to access the policies and procedures and produce the requested information. For purposes of this section, "readily available" means the ability to immediately produce the policies and procedures, either in electronic or paper format, upon request.

(c) The written policies and procedures must be readily available for inspection by each resident; each resident's legal representative, designee, surrogate, guardian, attorney in fact, or case manager; each resident's estate; and such additional parties as authorized in writing or by law.

(6) REVOCATION OF LICENSE, FINES OR SANCTIONS. For a violation of any part of this rule, the Agency for Health Care Administration may seek any remedy authorized by chapter 429, part I, or chapter 408, part II, F.S., including, but not limited to, license revocation, license suspension, and the imposition of administrative fines.

(7) COMPREHENSIVE EMERGENCY MANAGEMENT PLAN.

(a) Assisted living facilities whose comprehensive emergency management plan is to evacuate must comply with this rule.

(b) Each facility whose plan has been approved shall submit the plan as an addendum with any future submissions for approval of its comprehensive emergency management plan.

(8) NOTIFICATION.

(a) Within five (5) business days, each assisted living facility must notify in writing, unless permission for electronic communication has been granted, each resident and the resident's legal representative:

1. Upon submission of the plan to the local emergency management agency that the plan has been submitted for review and approval;

2. Upon final implementation of the plan by the assisted living facility.

(b) Each assisted living facility must maintain a copy of each notification set forth in paragraph (a) above in a manner that makes each notification readily available at the licensee's physical address for review by a legally authorized entity. If the notifications are maintained in an electronic format, facility staff must be readily available to access and produce the notifications. For purposes of this section, "readily available" means the ability to immediately produce the notifications, either in electronic or paper format, upon request.

Rulemaking Authority 429.41, FS. Law Implemented 429.19, 429.41, FS. History–New 3-26-18, Formerly 58A-5.036, 7-1-19.

59A-36.027 ALF Core Training Provider Qualifications.

(1) PRIMARY REQUIREMENTS. In order to register as an assisted living facility core training provider (hereafter referred to as "core training provider," "training provider," or "provider"), all applicants must meet the requirements outlined in Section 429.52(10), F.S. The requirements are as follows:

(a) Completion of the minimum core training requirements developed by the Agency pursuant to Section 429.52(9), F.S., and Rule 59A-36.028, F.A.C.;

(b) Successful passage of the competency test, which requires a minimum score of 75%; and,

(c) Compliance with the minimum of 12 contact hours of continuing education in topics related to assisted living every 2 years pursuant to Section 429.52(5), F.S., and paragraph 59A-36.011(1)(c), F.A.C.

(2) ADDITIONAL REQUIREMENTS. In addition to meeting the 3 primary requirements set forth in subsection (1), of this rule, applicants must meet one of the requirements outlined in Section 429.52(11), F.S., or one of the requirements established in this subsection. The requirements are as follows:

(a) A minimum of 5 years of employment with the Agency for Health Care Administration (AHCA), or formerly the Department of Health and Rehabilitative Services, as a surveyor of assisted living facilities; or

(b) A minimum of 5 years of employment in a professional position in the AHCA Assisted Living Unit; or

(c) A minimum of 5 years of employment as an educator or staff trainer for persons working in an ALF or other long-term care (LTC) settings; or

(d) A minimum of 5 years of employment as an assisted living facility core trainer, which was not directly associated with the

AMERICAN OVERSIGHT

department; or

(e) A minimum of a 4-year degree from an accredited college or university in areas of healthcare, gerontology, social work, education or human services; and a minimum of 3 years experience as an educator or staff trainer for persons working in an ALF or other LTC settings after core certification.

Rulemaking Authority 429.52 FS. Law Implemented 429.52 FS. History–New 6-15-09, Formerly 58T-1.203, 7-1-19.

59A-36.028 ALF Minimum Core Training Curriculum Requirements.

(1) CURRICULUM REQUIREMENTS. An approved core training provider must conduct core training using the curriculum outlined in AHCA Form 3180-1038, September 2019, which is incorporated by reference in this rule. The curriculum is available from the Agency for Health Care Administration, Assisted Living Unit, 2727 Mahan Drive, Tallahassee, FL 32308-5403 or the Agency's website at: http://acha.myflorida.com/MCHQ/Health_Facility_Regulation/Assisted_Living/alf.shtml.

(2) MONITORING. The Agency reserves the right to do the following:

(a) Attend and monitor core training courses;

(b) Review provider records and course materials pursuant to this rule; and,

(c) Conduct on-site monitoring, follow-up monitoring, and require implementation of a corrective action plan if the provider does not adhere to the approved curriculum.

Rulemaking Authority 429.52 FS. Law Implemented 429.52 FS. History–New 6-15-09, Formerly 58T-1.205, 7-1-19.

59A-36.029 ALF Core Training Provider Initial Registration Process.

(1) REGISTRATION PROCESS.

(a) Before core training can be conducted, an applicant must meet the training provider qualifications outlined in section 429.52(10), F.S., and rule 59A-36.027, F.A.C. Additionally, an applicant must register with, and obtain from, the Agency a unique provider registration number as set forth in this subsection.

(b) An applicant must complete ACHA Form 3180-1039, Application for Assisting Living Facility (ALF) Core Training Provider Registration, September, 2019. The form is hereby incorporated by reference and may be obtained from the Agency for Health Care Administration, Assisted Living Unit, 2727 Mahan Drive, Tallahassee, FL 32308-5403 or the Agency's website at: http://ahca.myflorida.com/MCHQ/Health_Facility_Regulation/Assisted_Living/alf.shtml.

(2) APPROVAL PROCESS. Within 30 calendar days after receiving a core training provider application, the Agency must submit written notification approving or denying the application, or requesting supplemental information or clarification.

(a) If the application is approved, the Agency must include a unique provider registration number in the notice.

(b) If the application is denied, the Agency must provide the reason or reasons for denial in the notice.

(c) If the application is determined to require supplemental information or clarification, the Agency must state the supplemental information or clarification that is being requested.

1. If the Agency does not receive the requested information within 30 calendar days of the request, the application will be deemed incomplete and closed.

2. If the Agency receives the requested information within 30 calendar days of the request, the Agency must process the training provider application within 30 calendar days after all required information is received.

Rulemaking Authority 429.52 FS. Law Implemented 429.52 FS. History–New 6-15-09, Formerly 58T-1.207, 7-1-19.

59A-36.030 Process for Maintaining ALF Core Training Provider Registration.

(1) MAINTAINING ALF CORE TRAINING PROVIDER REGISTRATION.

(a) After receiving the initial core training provider registration, the approved provider must re-register with the Agency every 2 years by submitting documentation of his or her compliance with the continuing education requirement as specified in section 429.52(5), F.S., and this rule.

(b) The provider must submit the documentation to the address referenced on AHCA Form 3180-1038. It must be submitted no later than 30 calendar days after each two-year continuing education cycle. The 2-year cycle begins on the date of the initial training provider registration. Documentation must include the following:

1. Title of the training program;

AMERICAN OVERSIGHT

2. Subject matter of the training program;

3. The training program agenda including topics discussed;

4. The core training provider's name and registration number;

5. Date(s) of participation;

6. Number of hours of the training program; and

7. The continuing education training provider's name, signature, credentials, and professional license number, if applicable.

(2) APPROVAL PROCESS.

(a) Within 30 calendar days after receiving the required continuing education documentation, the Agency must notify the provider in writing that the continuing education requirement:

1. Has been met; or

2. Has not been met and the reasons why; or

3. Has omissions or additional information is requested.

a. If the Agency does not receive the omitted or additional information within 30 calendar days of the request, the provider's registration shall be cancelled. The Agency must provide written notification of its decision, including the reason for the cancellation, no later than 30 calendar days after the deadline for the request for the omitted or additional information.

b. If the Agency receives the omitted or additional information as requested within the 30 calendar day time period, the Agency must process the core training provider's registration within 30 calendar days after all required information is received. The Agency must provide written notification to the provider of its decision.

(b) Failure to submit proof of the continuing education requirement as specified in this rule shall result in cancellation of the core training provider's registration. The Agency must provide written notification of such action no later than 30 calendar days after the information was due.

(c) If the provider's registration is cancelled under paragraphs (a) and (b) of this subsection, and the provider subsequently meets the continuing education requirement, he or she may re-apply for registration as specified in rule 59A-36.029, F.A.C., and include documentation that the continuing education requirement has been met pursuant to this rule.

Rulemaking Authority 429.52 FS. Law Implemented 429.52 FS. History–New 6-15-09, Formerly 58T-1.209, 7-1-19.

59A-36.031 Registered ALF Core Training Provider Responsibilities.

The following are the responsibilities of a registered core training provider:

(1) USE OF MINIMUM CORE TRAINING CURRICULUM. A registered core training provider is responsible for the following:

(a) Conducting core training using the minimum core training curriculum required by rule 59A-36.028, F.A.C.; and

(b) Ensuring that all changes in ALF statutes and rules are immediately incorporated into the contents of his or her core training curriculum.

(2) CERTIFICATES. After a trainee successfully completes core training, the approved training provider must issue a certificate to him or her. In addition to the provider's unique registration number, the certificate must include the information referenced in paragraph 59A-36.011(12)(a), F.A.C. The provider's signature and registration number shall serve as documentation that the trainee has completed the required training.

(3) RECORDS. Approved providers must maintain records of each course taught for a minimum of 5 years. Course records must include the following information:

(a) The title of the training program;

(b) The agenda;

(c) The curriculum and any accompanying documentation and training aids;

(d) The training provider's name and registration number;

(e) The trainees' names, dates of participation and training location; and

(f) Training evaluations and roster signed by trainees.

(4) COMPETENCY EXAM.

(a) Approved training providers must submit the names of trainees completing core training to the testing authority within 10 calendar days after completion of the course. Names must be submitted to the following address: ALF at The MacDonald Research Institute, 28953 SR 54, Wesley Chapel, FL 33543. Names may be alternately submitted via email to alftest.tmri@gmail.com.

AMERICAN OVERSIGHT

(b) The testing authority shall not process any requests for the competency exam, nor sit any individual for the exam, unless proper notice is submitted by an approved training provider pursuant to paragraph (a), of this subsection.

(5) GUEST SPEAKERS. If a core training provider uses guest trainers to teach or participate in specific training modules covered in the minimum core training curriculum referenced in rule 59A-36.028, F.A.C., the core trainer is responsible to ensure that the guest speaker meets the following minimum conditions:

(a) Has expertise in the specific subject matter; and

(b) Covers all components of the subject matter if he or she provides the module or portion of the module instruction.

Rulemaking Authority 429.52 FS. Law Implemented 429.52 FS. History–New 6-15-09, Formerly 58T-1.211, 7-1-19.

DEPARTMENT OF HEALTH ANNOUNCES TWO NEW PRESUMPTIVE POSITIVE COVID-19 CASES IN FLORIDA

TALLAHASSEE — The Florida Department of Health has announced two new presumptive positive cases of 2019 coronavirus disease (COVID-19) in Florida.

AMERICAN OVERSIGHT

New Presumptive Positive Cases

- A 66-year old female in Volusia County has been identified as a presumptive positive. This person is isolated and will continue to remain isolated until cleared by public health officials. She has a history of recent travel outside of the United States.
- A 61-year old female in Okaloosa County has been identified as a presumptive positive. This person is isolated and will continue to remain isolated until cleared by public health officials. She has a history of recent travel outside of the United States.

The Florida Department of Health is working closely with the patients, potential close contacts of each case and health care providers to isolate and monitor persons who may have been exposed to COVID-19 and implement testing of anyone who may develop COVID-19 symptoms, including fever, cough or shortness of breath.

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from the COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to this virus. As a reminder, the Department always recommends everyday preventive actions to help impede the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;

- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and

- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local county health department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the county health department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Please visit the Department's dedicated COVID-19 webpage at www.FloridaHealth.gov/COVID-19. This remains the best and most up-to-date resource for information and guidance regarding COVID-19 in Florida.

AMERICAN OVERSIGHT

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-866-779-6121** or emailing COVID-19@flhealth.gov. **The Call Center is available 24 hours a day, seven days a week.**

In addition, please visit http://www.floridahealth.gov/all-county-locations.html to locate and obtain contact information for your local CHD.

The CDC also has a website with information related to COVID-19: https://www.cdc.gov/coronavirus/2019-ncov/index.html.

About the Florida Department of Health

The department, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Follow us on Twitter at @HealthyFla and on Facebook. For more information about the Florida Department of Health please visit www.FloridaHealth.gov

Home | About Us | Medicaid | Licensure & Regulation | Report Fraud

The Agency for Health Care Administration would like to thank the Florida Health Care Association for working to develop a facility visitor screening toolkit that encompasses the most current Centers for Medicare and Medicaid Services (CMS) and Centers for Disease Control (CDC) guidelines. Ensuring all facilities are properly screening—and if necessary, restricting visitors—is of the upmost importance at this time. Although this guidance applies to nursing homes, many sections are appropriate for other facility types and should be followed where applicable.

The Agency is making this available as a resource to your facility. Please also review the recent memo from CMS outlining additional guidance to nursing homes to help them improve their infection control and prevention practices to prevent the transmission of COVID-19, including revised guidance for visitation: https://www.cms.gov/medicareprovider-enrollment-and-certificationsurveycertificationgeninfopolicy-and/qso-20-14-nh.pdf.

This visitor screening toolkit contains:

- COVID-19 (Respiratory) Checklist
- Sample Letter to Residents, Families and Visitors on Screening Protocol
- Sample Communication to Vendors or Business Partners
- COVID-19 Screener Competency Checklist

AMERICAN OVERSIGHT

- Visitor Screening Tool
- Screener Sign-In Form
- Sample Letter to Employees
- Employee Screening Tool
- Signage from the CDC, including handwashing signage
- Sample signage for visitor screening protocols

The toolkit can be found here:
https://www.fhca.org/images/uploads/pdf/FHCACOVIDVisitorScreeningToolkit.pdf

The Agency recognizes that facilities need to be overly cautious at this time to protect their patients and residents. Comprehensive screenings may include temperature taking and restricting visitors if necessary.

The Agency for Health Care Administration is committed to better health care for all Floridians. The Agency administers Florida's Medicaid program, licenses and regulates more than 44,000 health care facilities and 53 health plans, and publishes health care data and statistics at www.FloridaHealthFinder.gov. Additional information about Agency initiatives is available via Facebook (AHCAFlorida), Twitter (@AHCA_FL) and YouTube (/AHCAFlorida).

COVID-19 Update for Nursing Homes

Nursing Home Conference Call
with Health & Regulatory Partners
Wednesday, March 11, at 11:00 a.m. EST
Dial 1-866-951-1151 Room # 8484844

FHCA and Partners Nursing Home Conference Call on Coronavirus
Wednesday, March 11, at 11:00 a.m. EST
Dial 1-866-951-1151 and enter Room Number 8484844#

FHCA will host a Nursing Home/Health & Regulatory Partners Conference Call on Coronavirus Disease (COVID-19) tomorrow (Wed., March 11) at 11:00 a.m. EST.

Presenters/Areas of Focus include but are not limited to:

- *Florida Division of Emergency Management Director Jared Moskowitz:* Update on restricted entry criteria; Personal Protective Equipment (PPE) supply update
- *Agency for Health Care Administration Secretary Mary Mayhew & Leadership Team:* Nursing Home/Hospital transfer and admission protocols; survey changes pursuant to CMS Memo QSO-20-12 - Suspension of Non-Emergency Surveys; visitor screening/restrictions; isolation and COVID-19 testing protocols; Emergency Status System (ESS) reporting

AMERICAN OVERSIGHT

- *FHCA Highlights:* Visitor screening toolkit updates, hospital transfer resources, communications
- Participant Q&A

To access last week's FHCA/Partners Provider Call recordings, click here.

Recent Updates for Nursing Centers
The Florida Department of Health and Centers for Medicare and Medicaid Services (CMS) have issued guidance regarding screening and restricting visitors in nursing homes. CMS has revised its QSO-20-14-NH Memo, Guidance for Infection Control and Prevention of Coronavirus Disease 2019 (COVID-2019) in Nursing Homes (March 9, 2020). According to the Memo, facilities should *actively screen and restrict visitation* by those who meet the following criteria:

1. Signs or symptoms of a respiratory infection, such as fever, cough, shortness of breath, or sore throat
2. In the last 14 days, has had contact with someone with a confirmed diagnosis of COVID-19, or under investigation for COVID-19, or are ill with respiratory illness
3. International travel, travel on a cruise ship or travel to countries outside the United States within the last 14 days
4. Residing in a community where community-based spread of COVID-19 is occurring. Visit the Florida Department of Health COVID-19 web page for updates on confirmed Florida cases by county

Visitor Screening Toolkit
FHCA has updated our Visitor Screening Toolkit to reflect the updated guidance from CMS and the Department of Health. The toolkit includes recommendations for restricting, limiting or discouraging visitors, resources for conducting visitor and employee screenings, as well as sample signage to post in your center to alert visitors to your screening activities. It's designed to serve as a best practice to support centers' COVID-19 prevention activities. Centers should consult their legal and clinical teams when developing and implementing any company-specific procedures and protocols. Special thanks to Clear Choice Health Care and Avante Group for their contributions to this document.

SNF-Hospital Transfer Communication Tool
FHCA, in partnership with the Florida Hospital Association, has developed a SNF to Hospital and Hospital to SNF COVID-19 Transfer Communication Tool. The tool can be used to document an individual's medical status related to COVID-19 to help facilitate communication between nursing centers and hospitals during patient transfers and admissions.

Stay Informed
Please continue visiting FHCA's dedicated coronavirus web page, which includes updates from DOH, the Centers for Disease Control and Prevention

AMERICAN OVERSIGHT

(CDC), CMS and AHCA, along with links to support centers' strategies for reducing the spread of COVID-19.

FHCA will continue to provide updates on COVID-19 from our state and federal partners. If you have questions in the meantime, please contact FHCA: Deborah Franklin at dfranklin@fhca.org; Bob Asztalos at basztalos@fhca.org; or Melanie Motiska at mmotiska@fhca.org. Media inquiries can be directed to Kristen Knapp at kknapp@fhca.org.

Subject: [External] Nursing Home Guidance Going Out Tonight

Good afternoon,

I hope you both are getting some rest and staying well! I was going to ask the below question on the 3:00 call, however, we ran out of time.

We have nursing homes requesting a resident receive a COVID-19 negative test, even when they are not symptomatic or do not fit the criteria to be tested, before they will accept the patient/resident. Hospitals are expressing concern with the inability to discharge patients due to shortages of testing supplies and creating shortages in hospital beds. Is there specific guidance that can be provided to help eliminate the refusals to accept patients without first testing a patient who does not meet criteria and providing proof of the negative test?

Thank you in advance for the additional guidance coming out around staff. Will there be any additional guidance as it related to domestic travel for end-of-life situations, even including requiring the use of masks or other infection controls?

Blessings,
Diane L. Godfrey

To: ""Strickland"","" Katie; " "Philpot"","" Toby; Toby.Philpot@ahca.myflorida.com; Katie.Strickland@ahca.myflorida.com

Please review and format. I will be speaking

AHCA's top priority is the health and safety of residents and patients in the facilities we regulate

Because infection prevention and control are so foundational to the health and welfare of patients and residents, it one of the highest priorities for the Agency as we inspect facilities.

As such, AHCA has taken proactive steps to communicate with our providers regarding COVID-19.

Infection prevention protocols are ingrained in standard operating procedures across Florida health care facilities. These are practices that hospitals and nursing homes focus staff training and conduct drills on.

My agency's role is to ensure the facilities we license and regulate are vigilant in maintaining adherence to infection control and prevention protocols and quality standards that will protect the health and welfare of our state's most vulnerable.

• Facilities across Florida are held to an extremely high standard, and AHCA is vigilant in reviewing every aspect of compliance—inspecting for even the smallest misstep or gap in infection prevention practice and protocols.

We inspect for the smallest gaps in practice in order to support comprehensive adherence for staff in these facilities to basic infection protocols, like hand washing and cleaning of all surfaces in patient and resident rooms.

And infection prevention protocols are ingrained in standard operating procedures across Florida health care facilities – and they are the responsibility of everyone in the facility – from the clinical staff, to the custodial staff, to the vendors and visitors who enter facilities.

• We understand this is a rapidly evolving situation worldwide and my Agency remains committed to doing all we can to equip facilities with the best information to protect patients and residents.

AHCA sent out alerts and hosted multiple calls with nursing homes, assisted living facilities, and hospitals to ensure they are focused on best practices for infection control and prevention.

As Secretary, I recognize the trust that Florida's nursing home residents and their families place in their facilities' nurses and administrators to ensure a safe living environment.

We know that some people are at higher risk of getting very sick from this illness, including older adults and people who have serious chronic medical conditions like heart disease, diabetes or lung disease.

We know the most effective way to protect Florida's most vulnerable residents is to prevent the infection or symptoms of an infection from entering the facility.

• To that end, nursing homes and assisted living facilities, have been strongly encouraged to implement screening interventions for visitors, vendors and staff.

AMERICAN OVERSIGHT

The agency recognizes that facilities need to be overly cautious to protect their patients and residents and we appreciate the thoughtful approach to the comprehensive screening of visitors, staff and vendors. Screening for illness, international travel, travel on a cruise ship.

• This includes the need to screen those entering the facility to ensure no one has a temperature prior to entering.

• I have an important message for the public: if you are sick please do not visit a nursing home.

• And if you are sick, please only go to a hospital if you need to seek services.

• In 2019, there were 4 hospitals out of 310 and 320 nursing homes out of 695 that had some level of non-compliance related to infection prevention and control, but they did not a level of risk of harm or serious injury to patients or residents.

o 2 hospitals and 10 nursing homes with concerns of severe jeopardy

• All of those findings were thoroughly corrected and verified for compliance by our Agency.

• Let me be clear: in just a matter of weeks, a hospital or nursing home could lose their license and be shut down for failing to effectively correct the risk to patients.

• Infection control inspection criteria, as administered from the CDC and CMS, includes reviews of:
o Facility Assignment and Task Coordination
o Hand Hygiene
o Personal Protective Equipment (PPE)
o Transmission-Based Precautions
o Laundry Services
o Policies and Procedures
o Infection Surveillance
o Antibiotic Stewardship Program
o Influenza and Pneumococcal Immunizations

• Hospitals and nursing homes are executing key infection control measures, including:
o Staff members maintaining compliance with hand hygiene.
▪ Staff hand hygiene before and after contact with residents
▪ Ensuring appropriate resident hand hygiene is performed
o Appropriate use of personal protective equipment (PPE).
o Environmental cleaning

• Our Agency is engaging and communicating regularly with nursing homes across the state and engaging in stakeholder discussions to address best practices and take any questions.

• The Agency will consider immediate jeopardies for infection control issues and complaints alleging infection control concerns, including facilities with COVD-19.

• Our inspections will prioritize the facilities that currently have positive and suspected cases of COVD-19.

AMERICAN OVERSIGHT

• Per CMS, we are currently deploying staff and will visit hospitals and nursing homes that have had infection control issues in the past.

• The Department of Health is – and always has been – the lead on any infectious disease outbreak. Our Agency is there to provide resources as appropriate. If the facility does not respond or accommodate the Department of Health, then our Agency go in as the regulatory entity.

• We are here to be a partner among state agencies and to consistently provide communications and immediate assistance.

• AHCA has shared and distributed communications that equip facilities with resources for Visitor Screening.

Personal Protective Equipment

• Personal protective equipment (PPE) coordination is handled at a local level through local health departments and emergency operations centers.

• In conjunction with the Florida Division of Emergency Management and the Florida Department of Health, I want to do everything possible to make sure the needs of local communities are being met, especially health care facilities.

• To that end, I will be traveling the state over the next week to connect with facilities and will be reporting back as we work with DEM and DOH to ensure supplies, such as PPEs, are going where they are most needed.

AMERICAN OVERSIGHT

On behalf of Florida's Surgeon General and the Florida Department of Health, the Agency for Health Care Administration wants to ensure patients and staff are protected by following CDC infection prevention and control guidelines, including use of recommended personal protective equipment (PPE). Please review the information below and evaluate your facilities' practices when admitting and triaging/screening patients with respiratory symptoms as they enter your emergency department. Guidance of note includes:

- Immediately place a face mask on any individual entering the emergency department or triage/screening area of the hospital who presents with a cough, fever, runny nose, etc. This patient should be held in a separate triage area if not already.
    - If worn properly, a facemask helps block respiratory secretions produced by the wearer from contaminating other persons and surfaces.
- All staff working triage desk must wear appropriate PPE (face mask, etc.)
- Staff must be properly trained on the usage of PPE and the prevention of transmission of infectious agents.
    - Information on how to properly don, use, and doff PPE in a manner to prevent self-contamination is available here: https://www.cdc.gov/hai/pdfs/ppe/PPE-Sequence.pdf
    - Conservation guidelines for appropriate use of PPE are available here: https://www.cdc.gov/coronavirus/2019-ncov/hcp/healthcare-supply-ppe.html
    - OSHA has several respiratory training videos available here: https://www.osha.gov/SLTC/respiratoryprotection/training_videos.html
- Complete routine cleaning and disinfection procedures of spaces where patients with respiratory symptoms are triaged/screened.
- CMS announced several actions to address the spread of COVID-19, including specific guidance to hospitals. These memos from CMS were discussed on the state hospital call last week: https://www.cms.gov/newsroom/press-releases/cms-announces-actions-address-spread-coronavirus

Keep up to date on the recommendations for preventing spread of COVID-19 on CDC's website: https://www.cdc.gov/coronavirus/2019-ncov/hcp/caring-for-patients.html

The Agency encourages you to visit the Department of Health's dedicated COVID-19 webpage at www.FloridaHealth.gov/COVID-19. This remains the best and most up-to-date resource for information and guidance regarding COVID-19 in Florida.

STATE OF FLORIDA
DIVISION OF EMERGENCY MANAGEMENT

IN RE: SUSPENSION OF STATUTES, RULES, AND ORDERS, PURSUANT TO EXECUTIVE ORDER NUMBER 20-52, MADE NECESSARY BY THE COVID-19 PUBLIC HEALTH EMERGENCY

DEM ORDER NO. 20-006

EMERGENCY ORDER

WHEREAS, the Governor of the State of Florida issued Executive Order No. 20-52 in response to the COVID-19 Public Health Emergency which poses a severe threat to the entire State of Florida and requires that timely precautions are taken to protect the communities, critical infrastructure, and general welfare of this State; and,

WHEREAS, the Governor has designated the Director of the Division of Emergency Management as the State Coordinating Officer for the duration of this emergency and has delegated to the State Coordinating Officer the authority to exercise those powers delineated in sections 252.36(5)-(10), Florida Statutes; and,

WHEREAS, today, March 14, 2020, Governor DeSantis directed me, as the State Coordinating Officer, under the powers afforded by Executive Order No. 20-52, to prohibit visitation to certain facilities for thirty days from the date of this order in the State of Florida; and,

NOW THEREFORE, I hereby find that the Division of Emergency Management's timely performance of disaster response functions related to COVID-19 Public Health Emergency is hindered by the application of procedures imposed by statute, rule, and/or order. Therefore, pursuant to Section 2 of Executive Order No. 20-52, I hereby suspend sections 393.13(4), 394.459(5)(c), 400.022(1)(b), 429.28(1)(d), 429.85(1)(d),

AMERICAN OVERSIGHT

916.107(5)(7), Florida Statutes, for the particular purpose of prohibiting all individuals from visiting facilities within the State of Florida. For purposes of this order, a facility includes: Treatment Facilities under Chapter 319, Florida Statute; nursing homes as provided under Chapter 400, Florida Statute; homes for Special Services as provided under Chapter 400, Florida Statutes; Long-Term Care Hospitals, as provided under Chapter 395, Part I, Florida Statutes; Transitional Living Facilities, as provided under Chapter 400, Florida Statute; Intermediate Care Facilities for the Developmentally Disabled, as provided under Chapter 400, Florida Statutes; Assisted Living Facilities, as provided under Chapter 429, Florida Statutes; Adult Civil Facilities under Chapter 394 and Chapter 916 Florida Statutes; and Adult Family-Care Homes, as provided under Chapter 429, Florida Statutes. The order applies as follows:

1. Every facility must prohibit the entry of any individual, to the facility except in the following circumstances:

    a. Family members, friends, and visiting residents in end-of-life situations; or

    b. Hospice or palliative care workers caring for residents in end-of-life situations; or

    c. Any third-party providing necessary health care to a resident; or

    d. Facility staff; or

    e. Facility resident; or

    f. Attorney of Record; or

    g. Representatives of the federal or state government seeking entry as part of their official duties, including, but not limited to, Ombudsman, representatives of the Department of Children and Families, the Department of Health, the Agency for Health Care Administration, the Office of the Attorney General, and the Department of Elder Affairs; any law enforcement officer; and any emergency medical personnel.

AMERICAN OVERSIGHT

2. Individuals seeking entry to the facility under the above section 1 must comply with the screening requirements listed below:

a. Any person infected with COVID-19 who has not had two consecutive negative test results separated by 24 hours;

b. Any person showing or presenting signs or symptoms of a respiratory infection, including cough, fever, shortness of breath or sore throat;

c. Any person who has been in contact with any person(s) infected with COVID-19 who has not yet tested negative for COVID-19 within the past 14 days;

d. Any person who traveled through any airport within the past 14 days;

e. Any person who traveled on a cruise ship within the past 14 days;

f. Any person who has been in a community with confirmed community spread of COVID-19, as identified by the Centers for Disease Control and Prevention or a state public health agency, within the past 14 days; and

g. Any person who resides in a community with confirmed community spread of COVID-19, as identified by the Centers for Disease Control and Prevention or a state public health agency.

3. The facility must require any individual entering the facility to wear personal protective equipment.

4. Residents must be discouraged from leaving the facility.

5. The following documentation must be kept for visitation within a facility:

a. Individuals entering a facility subject to the screening criteria above may be screened using a standardized questionnaire or other form of documentation.

b. The facility is required to maintain documentation of all non-resident individuals entering the facility. Documentation must include:

1. Name of the individual;

2. Date and time of entry; and

3. The documentation used by the facility to screen the individual showing the individual did not meet any of the enumerated screening criteria.

AMERICAN OVERSIGHT

Because section 252.36(5)(a), Florida Statutes, allows the Governor to suspend the provisions of "any regulatory statute prescribing the procedures for [the] conduct of state business", and because Executive Order No. 20-52 designates the Director of the Division of Emergency Management as the State Coordinating Officer for this emergency, the requirements of sections 252.46 and 120.54(4), Florida Statutes, do not apply to this Order.

The effective dates of this Order shall correspond with the effective dates of Executive Order No. 20-52.

By Order of the State Coordinating Officer executed this 14th day of March, 2020, in Tallahassee, Leon County, Florida.

Jared Moskowitz
State Coordinating Officer
Florida Division of Emergency Management
2555 Shumard Oak Blvd.
Tallahassee, Florida 32399

Filed on this date, with

Hi Kim,

Just wanted to send you an update to let you know our Wellness Director Brenda Simmons, RN was previously an Infection Control nurse for a SNF and is leading the Camellia team in adhering to safe infection control measures.

Kim, can you please help us obtain PPE for this community? The Health Department directed us to the local Emergency Management. Captain Golden has not been able to locate a supply for the community.

Feel free to call if you have any questions, thanks for everything Kim!

Subject: Can you Mock up a Provider Alert
Attachments: AHCA-DOH COVID19 MASK PROTOCOL Flyer 3.18.20.png

To the following facilities:
NH
ALF
ICF
HSS
TLF
Hospital
Hospice
AFCH

EFFECTIVE IMMEDIATELY IN ALL RESIDENTIAL / LONG TERM CARE FACILITIES:

- **ALL STAFF AND ANYONE ENTERING THE FACILITY MUST WEAR A FACIAL MASK AT ALL TIMES**
- **GLOVES WHEN PROVIDING DIRECT CARE TO A PATIENT OR RESIDENT**

Effective immediately staff of residential and long term care facilities are to implement universal use of facial masks while in the facility. All staff, essential healthcare visitors and anyone entering the facility are to don a mask upon the start of their shift or visit and only change it once it becomes moist. It is important to keep hands away from the mask and only touch the straps of the mask. **Gloves are to be worn when providing care to the resident.** Continue to perform hand hygiene prior to donning gloves, after removing gloves, and anytime there is contact with the resident environment.

Staff in a room with a patient with respiratory symptoms of unknown cause or a patient with known or suspected COVID-19 should adhere to Standard, Contact, and Droplet Precautions with eye protection. This includes wearing gown, gloves, N95 mask (as fitted and available – if not available, at least a facial mask), and eye protection such as face shields or goggles.

In addition to securing more gowns, gloves, and masks, facilities will need to immediately order the appropriate eye protection (I.e. face shields) since many do not have this on hand. In the event you are unable to acquire the necessary PPE, please notify your local emergency management agency.

GUIDANCE ON USE AND CONSERVATION OF Personal Protective Equipment (PPE)

Facilities will need to educate their staff on the proper donning (putting on), doffing (taking off), and disposal of any PPE.

AMERICAN OVERSIGHT

Information about the recommended duration of Transmission-Based Precautions is available in the Interim Guidance for Discontinuation of Transmission-Based Precautions and Disposition of Hospitalized Patients with COVID-19

Gloves – Frequently Asked Questions

- **What type of glove is recommended to care for suspected or confirmed COVID-19 patients in healthcare settings?**
    - Nonsterile disposable patient examination gloves, which are used for routine patient care in healthcare settings, are appropriate for the care of patients with suspected or confirmed COVID-19.
- **Is double gloving necessary when caring for suspected or confirmed CoVID-19 patients in healthcare settings?**
    - CDC Guidance does not recommend double gloves when providing care to suspected or confirmed 2019-COVID patients.
- **Are extended length gloves necessary when caring for suspected or confirmed COVID-19 patients in healthcare settings?**
    - According to CDC Guidance, extended length gloves are not necessary when providing care to suspected or confirmed COVID-19 patients. Extended length gloves can be used, but CDC is not specifically recommending them at this time.
- **How I do put on (don) and take off (doff) my mask and gloves?**
    - Check to see if your facility has guidance on how to don and doff PPE. The procedure to don and doff should be tailored to the specific type of PPE that you have available at your facility.
    - If your facility does not have specific guidance, the CDC has recommended sequences for donning and doffing PPE.
    - It is important for HCP to perform hand hygiene after removing PPE. Hand hygiene should be performed by using an alcohol-based hand sanitizer that contains 60-95% alcohol or washing hands with soap and water for at least 20 seconds. If hands are visibly soiled, soap and water should be used before returning to alcohol-based hand sanitizer.

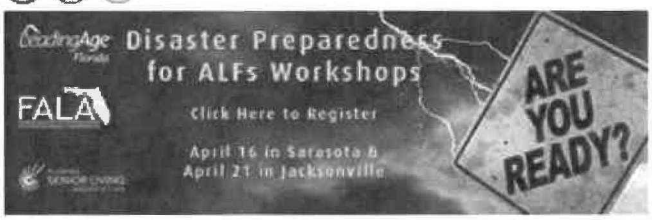
Subject: [External] Call this morning

Good morning Director Moskowitz, and Secretary Mayhew ,

In preparation for this morning call with Assisted Living Facilities and other Health Care providers I wanted to share some of the questions we have begun to receive.

1. While communities have been screening staff, residents and visitors will there be an official provision for superseding 429.28 1 (d) ...."visiting with any person of his or her choice" ?
2. Will there be any relief in regards to staffing if/when communities start seeing a rise in employees that are affected and unable to work 59A-36.010?
3. Will there be encouragement for sister or friendly communities to partner together to address staffing needs thus potentially requiring them to go over occupancy to manage the residents in one location? 429.71



AMERICAN OVERSIGHT

4. Will DOH be removing residents that are symptomatic and tested positive from these facilities and creating isolation sites as I know we do not want to inundate hospitals?
5. What specific isolation precautions should ALF's (non-medical communities) be putting into place. Remembering we have all sizes 3-350 in the state some with clinical support and majority without?

If you have any questions please feel free to call myself or Mike.

My best,

Veronica Catoe

Shena,

I need someone to do a concise summary of the attached three documents. The documents are: 1) federal infection control regs under 483, 2) CMS guidance on nursing home visitation, and 3) the Governor's executive order on facility regulation. In a separate document I need a comparison. We're trying to line up our guidance with federal guidance and regs.

Due COB, if possible.

Thanks,

FROM: Director
Quality, Safety & Oversight Group

SUBJECT: Guidance for Infection Control and Prevention of Coronavirus Disease 2019 (COVID-19) in nursing homes ***(REVISED)***

Memorandum Summary

- ***CMS is committed*** to taking critical steps to ensure America's health care facilities and clinical laboratories are prepared to respond to the threat of the COVID-19.
- **Guidance for Infection Control and Prevention of COVID-19** - CMS is providing additional guidance to nursing homes to help them improve their infection control and prevention practices to prevent the transmission of COVID-19, *including revised guidance for visitation.*
- **Coordination with the Centers for Disease Control (CDC) and local public health departments** - We encourage all nursing homes to monitor the CDC website for information and resources and contact their local health department when needed (CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html).
- *Following the Food and Drug Administration's (FDA) emergency use authorization (EUA) expanding the use of certain industrial respirators to health care personnel, CMS is clarifying that such use is appropriate in Medicare/Medicaid certified providers and suppliers.*

Background

CMS is responsible for ensuring the health and safety of nursing home residents by enforcing the standards required to help each resident attain or maintain their highest level of well-being. In light of the recent spread of COVID-19, we are providing additional guidance to nursing homes to help control and prevent the spread of the virus.

Guidance

Facility staff should regularly monitor the CDC website for information and resources (links below). They should contact their local health department if they have questions or suspect a resident of a nursing home has COVID-19. Per CDC, prompt detection, triage and isolation of

AMERICAN OVERSIGHT

potentially infectious residents are essential to prevent unnecessary exposures among residents, healthcare personnel, and visitors at the facility. Therefore, facilities should continue to be vigilant in identifying any possible infected individuals. Facilities should consider frequent monitoring for potential symptoms of respiratory infection as needed throughout the day. Furthermore, we encourage facilities to take advantage of resources that have been made available by CDC and CMS to train and prepare staff to improve infection control and prevention practices. Lastly, facilities should maintain a person-centered approach to care. This includes communicating effectively with residents, resident representatives and/or their family, and understanding their individual needs and goals of care.

Facilities experiencing an increased number of respiratory illnesses (regardless of suspected etiology) among patients/residents or healthcare personnel should immediately contact their local or state health department for further guidance.

In addition to the overarching regulations and guidance, we're providing the following information (Frequently Asked Questions) about some specific areas related to COVID-19:

Guidance for Limiting the Transmission of COVID-19 for Nursing Homes

How should facilities monitor or *restrict* visitors?
If visitors meet the criteria below, facilities may restrict their entry to the facility. Regulations and guidance related to restricting a resident's right to visitors can be found at 42 CFR §483.10(f)(4), and at F-tag 563 of Appendix PP of the State Operations Manual. Specifically, a facility may need to restrict or limit visitation rights for reasonable clinical and safety reasons. This includes, "restrictions placed to prevent community-associated infection or communicable disease transmission to the resident. A resident's risk factors for infection (e.g., chronic medical conditions) or current health state (e.g., end-of-life care) should be considered when restricting visitors. In general, visitors with signs and symptoms of a transmissible infection (e.g., a visitor is febrile and exhibiting signs and symptoms of an influenza-like illness) should defer visitation until he or she is no longer potentially infectious."

Facilities should *actively* screen *and restrict* visitation *by those who meet the following criteria*:

1. Signs or symptoms of a respiratory infection, such as fever, cough, shortness of breath, or sore throat.
2. *In the last 14 days*, has had contact with someone *with a confirmed diagnosis of COVID-19*, or under investigation for COVID-19, *or are ill with respiratory illness.*
3. International travel within the last 14 days to countries *with sustained community transmission*. For updated information on *affected* countries visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html
4. *Residing in a community where community-based spread of COVID-19 is occurring.*

For those individuals that do not meet the above criteria, facilities can allow entry but may require visitors to use Personal Protective Equipment (PPE) such as facemasks (see expanded guidance below).

Limiting visitors and individuals: Expanded recommendations:
CMS is providing the following expanded guidance to prevent the spread of COVID-19 (in addition to the information above about restricting visitors).

AMERICAN OVERSIGHT

- ***Restricting*** *means the individual should not be allowed in the facility at all, until they no longer meet the criteria above.*
- ***Limiting*** *means the individual should not be allowed to come into the facility, except for certain situations, such as end-of-life situations or when a visitor is essential for the resident's emotional well-being and care.*
- ***Discouraging*** *means that the facility allows normal visitation practices (except for those individuals meeting the restricted criteria), however the facility advises individuals to defer visitation until further notice (through signage, calls, etc.).*

1. *Limiting or Discouraging visitation:*
   a) ***Limiting:*** *For facilities that are in counties, or counties adjacent to other counties where a COVID-19 case has occurred, we recommend* ***limiting*** *visitation (except in certain situations as indicated above). For example, a daughter who visits her mother every Monday, would cease these visits, and limit her visits to only those situations when her mom has a significant issue. Also, during the visit, the daughter would limit her contact with her mother and only meet with her in her room or a place the facility has specifically dedicated for visits.*
   b) ***Discouraging:*** *For all other facilities (nationwide) not in those counties referenced above, we recommend* ***discouraging*** *visitation (except in certain situations). See below for methods to discourage visitation. Also see CDC guidance to "stay at home" https://www.cdc.gov/coronavirus/2019-ncov/specific-groups/high-risk-complications.html#stay-home.*
2. *Facilities should increase visible signage at entrances/exist, offer temperature checks, increase availability to hand sanitizer, offer PPE for individuals entering the facility (if supply allows). Also, provide instruction, before visitors enter the facility and residents' rooms, on hand hygiene, limiting surfaces touched, and use of PPE according to current facility policy while in the resident's room. Individuals with fevers, other symptoms of COVID-19, or unable to demonstrate proper use of infection control techniques should be restricted from entry. Signage should also include language to discourage visits, such as recommending visitors defer their visit for another time or for a certain situation as mentioned above.*
3. *In addition to the screening visitors for the criteria for restricting access (above), facilities should ask visitors if they took any recent trips (within the last 14 days) on cruise ships or participated in other settings where crowds are confined to a common location. If so, facilities should suggest deferring their visit to a later date. If the visitor's entry is necessary, they should use PPE while onsite. If the facility does not have PPE, the facility should restrict the individual's visit, and ask them to come back at a later date (e.g., after a 14 days with no symptoms of COVID-19).*
4. *In cases when visitation is allowable, facilities should instruct visitors to limit their movement within the facility to the resident's room (e.g., reduce walking the halls, avoid going to dining room, etc.)*
5. *Facilities should review and revise how they interact with volunteers, vendors and receiving supplies, agency staff, EMS personnel and equipment, transportation providers (e.g., when taking residents to offsite appointments, etc.), other practitioners (e.g., hospice workers, specialists, physical therapy, etc.), and take necessary actions to prevent any potential transmission. For example, do not have supply vendors transport supplies inside the facility.*

AMERICAN OVERSIGHT

Have them dropped off at a dedicated location (e.g., loading dock). Facilities can allow entry of these visitors as long as they are following the appropriate CDC guidelines for Transmission-Based Precautions. For example, hospice workers can enter a facility when using PPE properly.

6. *In lieu of visits (either through limiting or discouraging), facilities can consider:*
    a) *Offering alternative means of communication for people who would otherwise visit, such as virtual communications (phone, video-communication, etc.).*
    b) *Creating/increasing listserv communication to update families, such as advising to not visit.*
    c) *Assigning staff as primary contact to families for inbound calls, and conduct regular outbound calls to keep families up to date.*
    d) *Offering a phone line with a voice recording updated at set times (e.g., daily) with the facility's general operating status, such as when it is safe to resume visits.*
7. *When visitation is necessary or allowable, facilities should make efforts to allow for safe visitation for residents and loved ones. For example:*
    a) *Suggest limiting physical contact with residents and others while in the facility. For example, practice social distances with no hand-shaking or hugging, and remaining six feet apart.*
    b) *If possible (e.g., pending design of building), creating dedicated visiting areas (e.g., "clean rooms") near the entrance to the facility where residents can meet with visitors in a sanitized environment. Facilities should disinfect rooms after each resident-visitor meeting.*
    c) *Residents still have the right to access the Ombudsman program. If in-person access is allowable, use the guidance mentioned above. If in-person access is not available due to infection control concerns, facilities need to facilitate resident communication (by phone or other format) with the Ombudsman program or any other entity listed in 42 CFR § 483.10(f)(4)(i).*
8. *Visitor reporting:*
    a) *Advise exposed visitors (e.g., contact with COVID-19 resident prior to admission) to monitor for signs and symptoms of respiratory infection for at least 14 days after last known exposure and if ill to self-isolate at home and contact their healthcare provider.*
    b) *Advise visitors to report to the facility any signs and symptoms of COVID-19 or acute illness within 14 days after visiting the facility.*

How should facilities monitor or restrict health care facility staff?

The same screening performed for visitors should be performed for facility staff.

- Health care providers (HCP) who have signs and symptoms of a respiratory infection should not report to work.
- Any staff that develop signs and symptoms of a respiratory infection while on-the-job, should:
    - Immediately stop work, put on a facemask, and self-isolate at home;
    - Inform the facility's infection preventionist, and include information on individuals, equipment, and locations the person came in contact with; and
    - Contact and follow the local health department recommendations for next steps (e.g., testing).

AMERICAN OVERSIGHT

- Refer to the CDC guidance for exposures that might warrant restricting asymptomatic healthcare personnel from reporting to work (https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html).

Facilities should contact their local health department for questions, and frequently review the CDC website dedicated to COVID-19 for health care professionals (https://www.cdc.gov/coronavirus/2019-nCoV/hcp/index.html).

When should nursing homes consider transferring a resident with suspected or confirmed infection with COVID-19 to a hospital?
Nursing homes with residents suspected of having COVID-19 infection should contact their local health department. Residents infected with COVID-19 may vary in severity from lack of symptoms to mild or severe symptoms or fatality. Initially, symptoms may be mild and not require transfer to a hospital as long as the facility can follow the infection prevention and control practices recommended by CDC. Facilities without an airborne infection isolation room (AIIR) are not required to transfer the resident assuming: 1) the resident does not require a higher level of care and 2) the facility can adhere to the rest of the infection prevention and control practices recommended for caring for a resident with COVID-19.

Please check the following link regularly for critical updates, such as updates to guidance for using PPE: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html.

The resident may develop more severe symptoms and require transfer to a hospital for a higher level of care. Prior to transfer, emergency medical services and the receiving facility should be alerted to the resident's diagnosis, and precautions to be taken including placing a facemask on the resident during transfer. If the resident does not require hospitalization they can be discharged to home (in consultation with state or local public health authorities) if deemed medically and socially appropriate. Pending transfer or discharge, place a facemask on the resident and isolate him/her in a room with the door closed.

When should a nursing home accept a resident who was diagnosed with COVID-19 from a hospital?
A nursing home can accept a resident diagnosed with COVID-19 and still under Transmission-Based Precautions for COVID-19 as long as the facility can follow CDC guidance for Transmission-Based Precautions. If a nursing home cannot, it must wait until these precautions are discontinued. CDC has released Interim Guidance for Discontinuing Transmission-Based Precautions or In-Home Isolation for Persons with Laboratory-confirmed COVID-19. Information on the duration of infectivity is limited, and the interim guidance has been developed with available information from similar coronaviruses. CDC states that decisions to discontinue Transmission-based Precautions in hospitals will be made on a case-by-case basis in consultation with clinicians, infection prevention and control specialists, and public health officials. Discontinuation will be based on multiple factors (see current CDC guidance for further details).

Note: Nursing homes should admit any individuals that they would normally admit to their facility, including individuals from hospitals where a case of COVID-19 was/is present. ***Also, if possible, dedicate a unit/wing exclusively for any residents coming or returning from the hospital. This can serve as a step-down unit where they remain for 14 days with no***

AMERICAN OVERSIGHT

symptoms (instead of integrating as usual on short-term rehab floor, or returning to long-stay original room).

Other considerations for facilities:

- Review CDC guidance for Infection Prevention and Control Recommendations for Patients with Confirmed Coronavirus Disease 2019: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html
- Increase the availability and accessibility of alcohol-based hand rubs (ABHRs), *reinforce strong hand-hygiene practices,* tissues, no touch receptacles for disposal, and facemasks at healthcare facility entrances, waiting rooms, resident check-ins, etc.
    - Ensure ABHR is accessible in all resident-care areas including inside and outside resident rooms.
- Increase signage for vigilant infection prevention, such as hand hygiene and cough etiquette.
- Properly clean, disinfect and limit sharing of medical equipment between residents and areas of the facility.
- Provide additional work supplies to avoid sharing (e.g., pens, pads) and disinfect workplace areas (nurse's stations, phones, internal radios, etc.).

Will nursing homes be cited for not having the appropriate supplies?

CMS is aware of that there is a scarcity of some supplies in certain areas of the country. State and Federal surveyors should not cite facilities for not having certain supplies (e.g., PPE such as gowns, N95 respirators, surgical masks and ABHR) if they are having difficulty obtaining these supplies for reasons outside of their control. However, we do expect facilities to take actions to mitigate any resource shortages and show they are taking all appropriate steps to obtain the necessary supplies as soon as possible. For example, if there is a shortage of ABHR, we expect staff to practice effective hand washing with soap and water. Similarly, if there is a shortage of PPE (e.g., due to supplier(s) shortage which may be a regional or national issue), the facility should contact the local and state public health agency to notify them of the shortage, follow national guidelines for optimizing their current supply, or identify the next best option to care for residents. If a surveyor believes a facility should be cited for not having or providing the necessary supplies, the state agency should contact the CMS Branch Office.

What other resources are available for facilities to help improve infection control and prevention?

CMS urges providers to take advantage of several resources that are available:

CDC Resources:

- Infection preventionist training: https://www.cdc.gov/longtermcare/index.html
- CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html
- CDC Updates: https://www.cdc.gov/coronavirus/2019-ncov/whats-new-all.html
- CDC FAQ for COVID-19: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/infection-prevention-control-faq.html
- *Information on affected US locations: https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html*

AMERICAN OVERSIGHT

FDA Resources:

- *Emergency Use Authorizations:* https://www.fda.gov/medical-devices/emergency-situations-medical-devices/emergency-use-authorizations

CMS Resources:

- Long term care facility – Infection control self-assessment worksheet: https://qsep.cms.gov/data/252/A._NursingHome_InfectionControl_Worksheet11-8-19508.pdf
- Infection control toolkit for bedside licensed nurses and nurse aides ("Head to Toe Infection Prevention (H2T) Toolkit"): https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/SurveyCertificationGenInfo/LTC-CMP-Reinvestment
- Infection Control and Prevention regulations and guidance: 42 CFR 483.80, Appendix PP of the State Operations Manual. See F-tag 880: https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/GuidanceforLawsAndRegulations/Downloads/Appendix-PP-State-Operations-Manual.pdf

Contact: Email DNH_TriageTeam@cms.hhs.gov

NOTE: The situation regarding COVID-19 is still evolving worldwide and can change rapidly. Stakeholders should be prepared for guidance from CMS and other agencies (e.g., CDC) to change. Please monitor the relevant sources regularly for updates.

Effective Date: Immediately. This policy should be communicated with all survey and certification staff, their managers and the State/Regional Office training coordinators immediately.

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

STATE OF FLORIDA
DIVISION OF EMERGENCY MANAGEMENT

IN RE: SUSPENSION OF STATUTES, RULES, AND ORDERS, PURSUANT TO EXECUTIVE ORDER NUMBER 20-52, MADE NECESSARY BY THE COVID-19 PUBLIC HEALTH EMERGENCY

DEM ORDER NO. 20-002

EMERGENCY ORDER

WHEREAS, the Governor of the State of Florida issued Executive Order No. 20-52 in response to the COVID-19 Public Health Emergency which poses a severe threat to the entire State of Florida and requires that timely precautions are taken to protect the communities, critical infrastructure, and general welfare of this State; and,

WHEREAS, the Governor has designated the Director of the Division of Emergency Management as the State Coordinating Officer for the duration of this emergency and has delegated to the State Coordinating Officer the authority to exercise those powers delineated in sections 252.36(5)-(10), Florida Statutes; and,

NOW THEREFORE, I hereby find that the Division of Emergency Management's timely performance of disaster response functions related to COVID-19 Public Health Emergency is hindered by the application of procedures imposed by statute, rule, and/or order.

Therefore, pursuant to Section 2 of Executive Order No. 20-52, I hereby issue the following authorization(s):

I. Suspend sections 393.13(4), 400.022(1)(b), 429.28(1)(d), 429.85(1)(d) Florida Statutes, for the particular purpose of prohibiting certain individuals from visiting facilities. For purposes of this order, a facility includes nursing homes, assisted living

AMERICAN OVERSIGHT

facilities, adult family-care homes, long-term care facilities, and adult group homes. The order applies as follows:

a. Any person infected with COVID-19 who has not had two consecutive negative test results separated by 24 hours is prohibited from visiting a facility; or

b. Any person showing or presenting signs or symptoms of a respiratory infection, including cough, fever, shortness of breath or sore throat is prohibited from visiting a facility; or

c. Any person who has or may have been in close contact with a person(s) infected with COVID-19 who has not tested negative for COVID-19 is prohibited from visiting a facility until 14 days after their interaction with the person(s) who is infected with COVID-19; or

d. Any person who traveled internationally is prohibited from visiting a facility until 14 days after their return to the United States; or

e. Any person who traveled on a cruise ship is prohibited from visiting a facility until 14 days after their return to the United States; or

f. Any person who has been in a community with confirmed community spread of COVID-19, as identified by the Centers for Disease Control and Prevention or a state public health agency, is prohibited from visiting a facility within 14 days of their presence in the community with community spread; or

g. Any person who resides in a community with confirmed community spread of COVID-19, as identified by the Centers for Disease Control and

AMERICAN OVERSIGHT

Prevention or a state public health agency, is prohibited from visiting a facility.

Because section 252.36(5)(a), Florida Statutes, allows the Governor to suspend the provisions of "any regulatory statute prescribing the procedures for [the] conduct of state business", and because Executive Order No. 20-52 designates the Director of the Division of Emergency Management as the State Coordinating Officer for this emergency, the requirements of sections 252.46 and 120.54(4), Florida Statutes, do not apply to this Order.

The effective dates of this Order shall correspond with the effective dates of Executive Order No. 20-52.

By Order of the State Coordinating Officer executed this 11th day of March, 2020, in Tallahassee, Leon County, Florida.

Jared Moskowitz
State Coordinating Officer
Florida Division of Emergency Management
2555 Shumard Oak Blvd.
Tallahassee, Florida 32399

Filed on this date, with
the designated Division Clerk,
receipt of which is hereby
acknowledged.

Division Clerk

AMERICAN OVERSIGHT

§483.80 Infection Control

The facility must establish and maintain an infection prevention and control program designed to provide a safe, sanitary and comfortable environment and to help prevent the development and transmission of communicable diseases and infections.

§483.80(a) Infection prevention and control program.

The facility must establish an infection prevention and control program (IPCP) that must include, at a minimum, the following elements:

§483.80(a)(1) A system for preventing, identifying, reporting, investigating, and controlling infections and communicable diseases for all residents, staff, volunteers, visitors, and other individuals providing services under a contractual arrangement based upon the facility assessment conducted according to §483.70(e) and following accepted national standards;

§483.80(a)(2) Written standards, policies, and procedures for the program, which must include, but are not limited to:

(i) A system of surveillance designed to identify possible communicable diseases or

infections before they can spread to other persons in the facility;

(ii) When and to whom possible incidents of communicable disease or infections should be reported;

(iii) Standard and transmission-based precautions to be followed to prevent spread of infections;

(iv)When and how isolation should be used for a resident; including but not limited to:

(A) The type and duration of the isolation, depending upon the infectious agent or organism involved, and

(B) A requirement that the isolation should be the least restrictive possible for the resident under the circumstances.

(v) The circumstances under which the facility must prohibit employees with a communicable disease or infected skin lesions from direct contact with residents or their food, if direct contact will transmit the disease; and

(vi)The hand hygiene procedures to be followed by staff involved in direct resident contact.

Definitions:

"Standard Precautions": infection prevention practices that apply to all residents, regardless of suspected or confirmed diagnosis or presumed infection status. Standard precautions is based on the principle that all blood, body fluids, secretions, excretions except sweat, regardless of whether they contain visible blood, non-intact skin, and mucous membranes may contain transmissible infectious agents. Furthermore, equipment or items in the patient environment likely to have been contaminated

AMERICAN OVERSIGHT

with infectious body fluids must be handled in a manner to prevent transmission of infectious agents. Standard precautions include but are not limited to hand hygiene; use of gloves, gown, mask, eye protection, or face shield, depending on the anticipated exposure; safe injection practices, and respiratory hygiene/cough etiquette. Also, equipment or items in the patient environment likely to have been contaminated with infectious body fluids must be handled in a manner to prevent transmission of infectious agents (e.g., wear gloves for direct contact, properly clean and disinfect or sterilize reusable equipment before use on another patient).40

"Transmission-based precautions" (a.k.a. "Isolation Precautions"): actions (precautions) implemented, in addition to standard precautions that are based upon the means of transmission (airborne, contact, and droplet) in order to prevent or control infections. **NOTE**: Although the regulatory language refers to "isolation," the nomenclature widely accepted and used in this guidance will refer to "transmission-based precautions" instead of "isolation".

FROM Guidance for **INFECTION PREVENTION AND CONTROLPROGRAM:**

For purposes of this guidance, we would expect facilities to tailor the emphasis of their IPCP for visitors. We expect facilities to work to prevent transmission of infection to the resident from the visitor using reasonable precautions and national standards. For example, passive screening through the use of signs at the entrances to alert visitors with signs and symptoms of communicable diseases not to enter the facility. If a facility has a visitor exception protocol (e.g., end-of-life care), this would need to be determined by the facility. In this case, if a symptomatic visitor/family member must enter the facility, the visitor must still follow the facility's policies for prevention of transmission (e.g., following respiratory hygiene/cough etiquette procedures).

The Infection Prevention and Control Program must include the following parts:

• A system for preventing, identifying, reporting, investigating, and controlling infections and communicable diseases that: Covers all residents, staff, volunteers, visitors, and other individuals providing services under a contractual arrangement;

o Is based on the individual facility assessment;

o Follows accepted national standards;

• Written standards, policies and procedures in accordance with §483.80(a)(2);

• A system for recording incidents identified under the IPCP and corrective actions taken by the facility; and

• An antibiotic stewardship program (ASP) (F881).

From Guidance Infection Control Policies and Procedures:

Written occupational health policies that address:

AMERICAN OVERSIGHT

o Reporting of staff illnesses and following work restrictions per nationally recognized standards and guidelines;48

o Prohibiting contact with residents or their food when staff have potentially communicable diseases or infected skin lesions; o Assessing risks for tuberculosis (TB) based on regional/community data and screening staff to the extent permitted under applicable federal guidelines 49 and state law;

o Monitoring and evaluating for clusters or outbreaks of illness among staff;

o Implementing an exposure control plan in order to address potential hazards posed by blood and body fluids, from dialysis, glucose monitoring or any other point of care testing; and

Education and competency assessment: facilities must ensure staff follow the IPCP's standards, policies and procedures. Therefore, staff must be informed and competent. Knowledge and skills pertaining to the IPCP's standards, policies and procedures are needed by all staff in order to follow proper infection control practices (e.g., hand hygiene and appropriate use of personal protective equipment) while other needs are specific to particular roles, responsibilities, and situations (e.g., injection safety and point of care testing).

Process Surveillance

Process surveillance is the review of practices by staff directly related to resident care.The purpose is to identify whether staff implement and comply with the facility's IPCP policies and procedures. Some areas that facilities may want to consider for process surveillance are the following:

• Hand hygiene;

• Appropriate use of personal protective equipment (e.g., gowns, gloves, facemask);

• Injection safety;

• Point-of-care testing (e.g., during assisted blood glucose monitoring);

• Implementation of infection control practices for resident care such as but not limited to urinary catheter care, wound care, injection/IV care, fecal/urinary incontinence care, skin care, respiratory care, dialysis care, and other invasive treatments;

• Managing a blood borne pathogen exposure. **NOTE**: This may not lend itself to monitoring and feedback;

• Cleaning and disinfection products and procedures for environmental surfaces and equipment;

• Appropriate use of transmission-based precautions; and

• Handling, storing, processing, and transporting linens so as to prevent the spread of infection.

Outcome Surveillance

AMERICAN OVERSIGHT

Another component of a system of identification is outcome surveillance. For example, this addresses the criteria that staff would use to identify and report evidence of a suspected or confirmed HAI or communicable disease.

RECOGNIZING, CONTAINING AND REPORTING COMMUNICABLE DISEASEOUTBREAKS

The facility must know how to recognize and contain infectious disease outbreaks. An outbreak is the occurrence of more cases than expected in a given area or among a specific group of people over a particular period of time. If a condition is rare or has serious health implications, an outbreak may involve only one case. While a single case of a rare infectious condition or one that has serious health implications may or may not constitute an outbreak, facilities should not wait for the definition of an outbreak to act. For example, one case of laboratory confirmed influenza in a resident should alert the facility to begin an outbreak investigation. If an outbreak is identified, the facility must:

• Take the appropriate steps to diagnose and manage cases, implement appropriate precautions, and prevent further transmission of the disease as well as documentation of follow-up activity in response; and

• Comply with state and local public health authority requirements for identification, reporting, and containing communicable diseases and outbreaks.

NOTE: Some states have specific regulations regarding responding to and reporting outbreaks that must be included in the IPCP.

Residential and Long Term Care Facilities to Implement Universal Use of Facial Masks

EFFECTIVE IMMEDIATELY IN ALL RESIDENTIAL / LONG TERM CARE FACILITIES:

AMERICAN OVERSIGHT

- **ALL STAFF AND ANYONE ENTERING THE FACILITY MUST WEAR A FACIAL MASK AT ALL TIMES**
- **GLOVES WHEN PROVIDING DIRECT CARE TO A PATIENT OR RESIDENT**

Effective immediately staff of residential and long term care facilities are to implement universal use of facial masks while in the facility. All staff, essential healthcare visitors and anyone entering the facility are to don a mask upon the start of their shift or visit and only change it once it becomes moist. It is important to keep hands away from the mask and only touch the straps of the mask. **Gloves are to be worn when providing care to the resident.** Continue to perform hand hygiene prior to donning gloves, after removing gloves, and anytime there is contact with the resident environment.

Staff in a room with a patient with respiratory symptoms of unknown cause or a patient with known or suspected COVID-19 should adhere to Standard, Contact, and Droplet Precautions with eye protection. This includes wearing gown, gloves, N95 mask (as fitted and available – if not available, at least a facial mask), and eye protection such as face shields or goggles.

In addition to securing more gowns, gloves, and masks, facilities will need to immediately order the appropriate eye protection (I.e. face shields) since many do not have this on hand. In the event you are unable to acquire the necessary PPE, please notify your local emergency management agency.

GUIDANCE ON USE AND CONSERVATION OF Personal Protective Equipment (PPE)

Facilities will need to educate their staff on the proper donning (putting on), doffing (taking off), and disposal of any PPE.

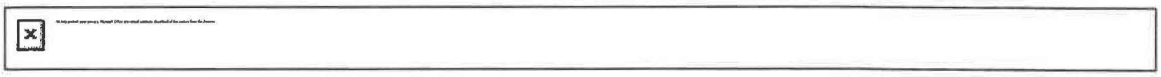
Information about the recommended duration of Transmission-Based Precautions is available in the Interim Guidance for Discontinuation of Transmission-Based Precautions and Disposition of Hospitalized Patients with COVID-19

Gloves – Frequently Asked Questions

- **What type of glove is recommended to care for suspected or confirmed COVID-19 patients in healthcare settings?**
  - Nonsterile disposable patient examination gloves, which are used for routine patient care in healthcare settings, are

AMERICAN OVERSIGHT

appropriate for the care of patients with suspected or confirmed COVID-19.



- **Is double gloving necessary when caring for suspected or confirmed CoVID-19 patients in healthcare settings?**
  - CDC Guidance does not recommend double gloves when providing care to suspected or confirmed 2019-COVID patients.

- **Are extended length gloves necessary when caring for suspected or confirmed COVID-19 patients in healthcare settings?**
  - According to CDC Guidance, extended length gloves are not necessary when providing care to suspected or confirmed COVID-19 patients. Extended length gloves can be used, but CDC is not specifically recommending them at this time.

- **How I do put on (don) and take off (doff) my mask and gloves?**
  - Check to see if your facility has guidance on how to don and doff PPE. The procedure to don and doff should be tailored to the specific type of PPE that you have available at your facility.
  - If your facility does not have specific guidance, the CDC has recommended sequences for donning and doffing PPE.
  - It is important for HCP to perform hand hygiene after removing PPE. Hand hygiene should be performed by using an alcohol-based hand sanitizer that contains 60-95% alcohol or washing hands with soap and water for at least 20 seconds. If hands are visibly soiled, soap and water should be used before returning to alcohol-based hand sanitizer.

Subject: Re: Information push request

Completely agree. Also I thought you said they weren't using the phrase person under investigation anymore? And I don't think it is all that common to use the acronym HCP regarding healthcare personnel. Finally we should consider whether or not there should be a logo from DOH along with our logo when we send this out to the hospitals are we just sending this to hospitals or is this intended to go to any other facilities?

Subject: Fwd: Information push request

Please see the draft below for review. Thank you.

The Agency for Health Care Administration wants to ensure patients and staff are protected by following CDC infection prevention and control guidelines, including use of recommended personal protective equipment (PPE). Please review the information below and evaluate your facilities' practices when admitting/triaging patients with respiratory symptoms as they enter your emergency department.

AMERICAN OVERSIGHT

Detection and Triage of PUI

Prompt detection and effective triage and isolation of potentially infectious patients are essential to prevent unnecessary exposures among patients, healthcare personnel, and visitors at the facility. Implement triage procedures to detect persons under investigation (PUI) for COVID-19 during or before patient triage or registration (e.g., at the time of patient check-in) and ensure that all patients are asked about the presence of symptoms of a respiratory infection and history of travel to areas experiencing transmission of SARS-CoV-2, the virus that causes COVID-19, or contact with possible COVID-19 patients.

Ensure proper use of personal protection equipment (PPE). Place a facemask over the patient's nose and mouth if that has not already been done and isolate the PUI for COVID-19 in an Airborne Infection Isolation Room (AIIR), if available. If worn properly, a facemask helps block respiratory secretions produced by the wearer from contaminating other persons and surfaces

Healthcare personnel who come in close contact with confirmed or possible patients with COVID-19 (this includes staff working a triage desk) should also wear the appropriate PPE. Information on how to properly don, use, and doff PPE in a manner to prevent self-contamination is available here: https://www.cdc.gov/hai/pdfs/ppe/PPE-Sequence.pdf

Train and Educate Healthcare Personnel

Provide HCP with job- or task-specific education and training on preventing transmission of infectious agents, including refresher training.

HCP must be medically cleared, trained, and fit tested for respiratory protection device use (e.g., N95 filtering facepiece respirators), or medically cleared and trained in the use of an alternative respiratory protection device (e.g., Powered Air-Purifying Respirator, PAPR) whenever respirators are required. OSHA has a number of respiratory training videos.

HCP should be educated, trained, and have practiced the appropriate use of PPE prior to caring for a patient, including attention to correct use of PPE and prevention of contamination of clothing, skin, and environment during the process of removing such equipment.

Environmental Cleaning and Disinfection

Routine cleaning and disinfection procedures are appropriate for SARS-CoV-2 in healthcare settings, including those patient-care areas in which aerosol-generating procedures are performed. Products with EPA-approved emerging viral pathogens claims are recommended for use against SARS-CoV-2. Management of laundry, food service utensils, and medical waste should also be performed in accordance with routine procedures.

Molly –

DOH (Samantha Cooksey) just said AHCA not DOH should take the lead on drafting content for the e-blast to the hospitals. Dr. Rivkees would like the information sent out to include:

AMERICAN OVERSIGHT

- Direction that upon entering the E.R. door or triage of the hospital...if someone has a cough, fever, runny nose, etc., they should immediately be placed in a mask and possibly held in a separate triage area.
- Make sure they protect their staff including those working the triage desk.
- Make sure staff are trained on airborne pathogens, how to appropriately don PPE, etc.
- Include links to information like CDC guidance or guidance on how to use PPE and surface cleaning.

DOH would like to review the draft before it is distributed to the hospitals.

Thanks,
Kim Stewart & Rebecca Willis

Subject: FW: COVID-19 Update #4: Gov. DeSantis Issues Emergency Order Re: Visitation in LTC Facilities

Here is the latest emergency order regarding COVID-19 and visitations in long-term care facilities. What follows are some of my thoughts and I request yours as well.

In reading this communique, be mindful of a few things:

1. The INTENT is to limit visitation in LTC facilities in order to minimize the risk to vulnerable individuals residing in these facilities as well as the needed staff who serve these residents.
2. There is an ENCOURAGEMENT for individuals not to visit LTC facilities in order to effectuate the INTENT of #1.
3. The particular words used in this carefully drafted order are INTENTIONAL and LIMITING!
4. It is clearly not the intent of the Governor to order ALL visitations to LTC facilities to cease.
5. The suspension of Florida Statutes concerning the right of visitation is LIMITED and intended to be the least drastic necessary with regards to the circumstances presented.
6. ONLY seven types of individuals are to be banned from visitations and only for a limited time.

Therefore, facilities that are banning ALL visitations are doing so WITHOUT authorization. Having said that, let's give them the benefit of the doubt and recognize their intent is to protect their residents. Notwithstanding, we cannot abandon our mandate to advocate for resident who request our help in protecting their rights. In doing so, we are not precluded from attempting to help the resident recognize the benefit that accrues to all residents of the facility if visitation is allowed to be VOLUNTARILY limited for a short period of time. If the resident (not family members of a competent resident) insist that we secure his or her visitation rights, we should do so with fervency.

AMERICAN OVERSIGHT

I suspect that there may be further revisions to this executive order as the President said tonight in his speech to the nation that he was "advising the suspension of all visitations in nursing homes." So stand by ...

Coronavirus Update #4 for Nursing Homes

Governor Issues Emergency Order Regarding Visitation in Long Term Care Facilities

March 11, 2020

Today, Governor Ron DeSantis issued an Emergency Order (20-002) regarding visitation in Florida's nursing homes and other facilities (nursing homes, assisted living facilities, adult family care homes, long term care facilities and adult group homes). Pursuant to Executive Order 20-52, the Governor issued the following prohibitions on visitors:

- Any person infected with COVID-19 who has not had two consecutive negative test results separated by 24 hours is prohibited from visiting a facility; or
- Any person showing or presenting signs or symptoms of a respiratory infection, including fever, cough, shortness of breath, or sore throat is prohibited from visiting a facility; or

AMERICAN OVERSIGHT

- Any person who has or may have been in close contact with a person(s) infected with COVID-19 who has not tested negative for COVID-19 is prohibited from visiting a facility until 14 days after their interaction with the person(s) who is infected with COVID-19; or
- Any person who has traveled internationally is prohibited from visiting a facility until 14 days after their return to the United States; or
- Any person who has traveled on a cruise ship is prohibited from visiting a facility until 14 days after their return to the United States; or
- Any person who has been in a community with confirmed community spread of COVID-19, as identified by the Centers for Disease Control and Prevention or a state public health agency, is prohibited from visiting a facility within 14 days of their presence in the community with community spread*; or
- Any person who resides in a community with confirmed community spread of COVID-19, as, identified by the Centers for Disease Control and Prevention or a state public health agency, is prohibited from visiting a facility.

**During his press conference, the Governor stated there are no instances of community spread in Florida.*

As you work to prevent and mitigate the spread of COVID-19 in your center, communication with your residents and their families is extremely important. Messaging should be swift, empathetic, reassuring and informative. It's important to emphasize how your center is preparing, why your visitation protocols are in place and what individuals can do to assist with these efforts.

Posting signs at your facility entrance is not enough - your communications should be broad based to help families understand why you've adopted these protocols. Consider the following to educate and inform about your screening protocols:

- Host a family council meeting in your center's courtyard to educate and inform on your screening protocols
- Host a resident council meeting to inform your residents
- Involve your social workers, activity directors and other frontline staff with direct access to your residents to communicate why these protocols are in place – for the health and safety of the residents
- Offer alternative means of communication for people who would otherwise visit, such as virtual communications (phone, video-communication, etc.)
- Create/increasing email or listserv communication to update families on your protocols
- Assign a staff member as primary contact to families for inbound calls and conduct regular outbound calls to keep families up to date
- Set up a manned hotline or offer a phone line with a voice recording updated at set times (e.g., daily) with the facility's general operating status, such as when it is safe to resume visits
- Create an infographic or video message from facility leadership to post on your social media channels
- Educate your staff on key messages regarding your screening protocols

FHCA's Visitor Screening Toolkit includes sample letters with suggested language for building content for these various forms of communications with your families.

Facilities should be prepared for media inquiries in response to this Emergency Order. It's important to designate one spokesperson to handle inquiries to ensure your messaging remains consistent. Below is a short-version of a media statement to assist centers in their response. For additional talking points, click here.

"[Our center] takes the threat of COVID-19 very seriously and have been taking proactive measures to ensure the health and safety of our residents and staff. We are following the guidance of Florida's Governor, the Department of Health and CDC and have implemented visitor screening procedures. It is essential that anyone who potentially carries the virus does not enter any of our facilities, and we are asking that individuals restrict visitation unless absolutely necessary to help keep our residents and caregivers safe and healthy."

Opening

- Governor DeSantis and the State Emergency Operations Team continue to take comprehensive steps to protect the citizens of Florida.
- This Administration is prepared to meet and respond to this public health challenge.
- Let me assure all Floridians that every flexibility we can offer to health care providers and facilities is being explored to enhance communities' ability to respond to COVID-19.
- Our charge is to equip and resource the health care workforce on the frontlines with every necessary tool to protect the most vulnerable from the threat of COVID-19.
- We are taking decisive action to help prevent the impact and spread of this disease.
- Most importantly, we cannot afford to take the risk of spread in our skilled nursing and assisted living facilities.
- We know risk is greatest for our elderly – disproportionately impacting those 65 and older and those with underlying health conditions.
- While there may not be any identified community spread at this time, we know the first line of defense is stopping spread before it gets in the door.
- For our elderly and medically frail, the risk of fatality is high.
- It's why the Governor has taken decisive action to issued stronger visitation restrictions to eliminate any possible exposure to COVID-19.

AMERICAN OVERSIGHT

Testing and Transfer

- For our nursing homes and assisted living facilities, We need to be able to quickly identify any individual in your facility that may be at risk for COVID-19.

- We need all of you, every facility, to work in coordination with your local county health department , the moment you anticipate someone may need to be tested or transferred to hospital.

- Florida's local county health departments are ready, and skilled to support you in determining what need to happen in terms of testing.

- They are ready to evaluate the precautions that may need to occur in your facility such as isolating other residents.

- To support and assist you to the extent hospital transfer is required.

- We understand that many of you are not going to have the level of PPE that is often more readily available in hospital.

- If you are in need of certain PPE, contact your local county emergency manager if you cannot get it through your regular supply chain or if that is going to be delayed.

- While it is not a guarantee that the state will be able to turn that supply around to you, it will at least be recorded as a mission and a need – so the state can have a statewide perspective on what supplies are needed where.

- But again your local county health department and their skilled staff can help support you the moment you suspect someone may need to be tested or transferred to the hospital.

- We have over 11 long-term care facilities that have a suspected or confirmed COVID-19 case.

AMERICAN OVERSIGHT

Prepare for Surge

- Hospitals across Florida must begin to plan for and develop a strategy for patient volume and complexity in the event of a surge of patients.
- CEOs, Administrators and medical team leadership must prepare now for how they will triage patients, allocate PPE resources and other critical life-saving equipment.
- Prepare contingency plans for capacity for hospitalization, ICU beds and ventilator supply.
- Develop and Refine protocols that define how patients will be triaged for admission, observation, discharge, and quarantine in a potential surge environment.
- Identifying locations and staffing plans that separate vulnerable patients from COVID-19 activities must be carefully considered.
- Hospitals systems should consider post-poneing elective surgeries, and taking additional steps to reduce non-life threatening procedure demand on doctors and nurses.
- Health systems in every community should begin planning for how they will communicate internally with their workforce, and externally to the public about hospital operations.
- A designated communications strategy will ensure patients and their families are equipped with just as much actionable information as hospital personnel.

Ventilators

- Hospitals should be taking inventory of ventilators for potential surge of critical patients.
- Ventilators assist respiratory functions – and are a vital medical support for patients in the critical stages of COVID-19.
- Hospital should be planning and preparing to acquire more ventilators, and should look at purchasing or rental markets to explore options.

Personal Protective Equipment

- All hospitals should communicate and provide training on proper donning and doffing of personal protective equipment, including fit testing of N95 masks.
- Facilities should be monitoring rates of PPE use to ensure adequate supply.

AMERICAN OVERSIGHT

- Inventories should be taken on PPE, to include burn rate of equipment, next anticipated delivery of PPE supplies and proper allocation to health care staff.

Exploring Financial Assistance for Medicaid Providers

- The state is cognizant of the economic hardships that may be faced by Medicaid Providers
- Our Agency will do everything possible to ensure providers can continue offering critical services in Florida
- We will do what is allowable within federal guidelines to ensure a prompt response to issues as they arise
- The Agency is exploring opportunities to make advanced payments to hospitals and providers that face financial hardships due to their COVID-19 response in order to stabilize and ensure continuity of care.
- Our Agency is currently monitoring the COVID-19 bill that is moving through Congress. This proposed FMAP increase could potentially provide additional funding to hospitals through the LIP program.
- Our Agency is also exploring relief for Medicaid providers with outstanding debt owed, by temporarily suspending terms of payment agreements for 90 days.

SUBJECT: Emergency Medical Treatment and Labor Act (EMTALA) Requirements and Implications Related to Coronavirus Disease 2019 (COVID-19)

Memorandum Summary

COVID-19 *and EMTALA Requirements:* This Memorandum conveys information in response to inquiries from hospitals and critical access hospitals (CAHs) concerning implications of COVID-19 for their compliance with EMTALA. This guidance applies to both Medicare and Medicaid providers.

- ***EMTALA Screening Obligation:*** Every hospital or CAH with a dedicated emergency department (ED) is required to conduct an appropriate medical screening examination (MSE) of all individuals who come to the ED, including individuals who are suspected of having COVID-19, and regardless of whether they arrive by ambulance or are walk-ins. Every ED is expected to have the capability to apply appropriate COVID-19 screening criteria when applicable, to immediately identify and isolate individuals who meet the screening criteria to be a potential COVID-19, to contact their state or local public health officials to determine next steps.

- ***EMTALA Stabilization, Transfer & Recipient Hospital Obligations:*** In the case of individuals with suspected or confirmed COVID-19, hospitals and CAHs are expected to consider current guidance of CDC and public health officials in determining whether they have the capability to provide appropriate isolation required for stabilizing treatment and/or to accept appropriate transfers. In the event of any EMTALA complaints alleging inappropriate transfers or refusal to accept appropriate transfers, CMS will take into consideration the public health guidance in effect at the time.

Background

Due to increasing public concerns with COVID-19, CMS is receiving inquiries from the hospital industry concerning implications for their compliance with EMTALA. Concerns center around

AMERICAN OVERSIGHT

the ability of hospitals and CAHs to fulfill their EMTALA screening obligations while minimizing the risk of exposure from COVID-19 infected individuals to others in the ED, including healthcare workers, and the isolation requirements for COVID-19. In addition, we have also received questions about the applicability of EMTALA stabilization, transfer and recipient hospital obligations in the case of individuals who are found to have met the screening criteria for possible COVID-19 infection or who have been determined to have COVID-19.

Please note this memorandum applies to both hospital and critical access hospital (CAH) wherever "hospital" is referenced.

EMTALA requires Medicare-participating hospitals and CAHs that have a dedicated emergency department to, at a minimum:

- Provide a medical screening exam (MSE) to every individual who comes to the ED for examination or treatment for a medical condition to determine if they have an emergency medical condition (EMC). An emergency medical condition is present when there are acute symptoms of sufficient severity such that the absence of immediate medical attention could reasonably be expected to result in serious impairment or dysfunction.

- Provide necessary stabilizing treatment for individuals with an emergency medical condition EMC within the hospital's capability and capacity; and

- Provide for transfers of individuals with EMCs, when appropriate.

Please see *Attachment 1* for a discussion of alternate screening locations and increased surges in numbers of patients presenting to the ED.

Are hospitals required to accept transfers of patients with suspected or confirmed COVID-19 from small or rural hospitals that don't have appropriate or sufficient isolation facilities or equipment to meet current state or local public health or CDC recommendations?

Hospitals with capacity and the specialized capabilities needed for stabilizing treatment are required to accept appropriate transfers from hospitals without the necessary capabilities. Hospitals should coordinate with their State/local public health officials regarding appropriate placement of individuals who meet specified COVID-19 assessment criteria, and the most current standards of practice for treating individuals with confirmed COVID-19 infection status.

As in any case concerning a hospital's EMTALA obligations with respect to transfers of individuals, CMS would evaluate the capabilities and capacity of both the referring and recipient hospitals in order to determine whether a violation has occurred. Among other things, we would take into account the CDC's recommendations at the time of the event in question in assessing whether a hospital had the requisite capabilities and capacity. We note that the CDC's recommendations focus on factors such as the individual's recent travel or exposure history and presenting signs and symptoms in differentiating the types of capabilities hospitals should have to screen and treat that individual. The presence or absence of negative pressure rooms (Airborne Infection Isolation Room (AIIR)) would not be the sole determining factor related to transferring patients from one setting to another when in some cases all that would be required would be a private room. See the CDC website for the most current infection prevention and

AMERICAN OVERSIGHT

control recommendations for hospital patients with suspected or known COVID-19: https://www.cdc.gov/coronavirus/2019-ncov/hcp/clinical-guidance-management-patients.html

In addition, all Medicare-participating hospitals with specialized capabilities are required to accept appropriate transfers of individuals with EMCs if the hospital has the specialized capabilities an individual requires for stabilization as well as the capacity to treat these individuals. This recipient hospital obligation applies regardless of whether the hospital has a dedicated emergency department.

What are the screening sites that may be set up?

Hospitals may set up alternative screening sites on campus

- The MSE does not have to take place in the ED. A hospital may set up alternative sites on its campus to perform MSEs.
  - Individuals may be redirected to these sites after being logged in. The redirection and logging can even take place outside the entrance to the ED.
  - The person doing the directing should be qualified (e.g., an RN) to recognize individuals who are obviously in need of immediate treatment in the ED.
- The content of the MSE varies according to the individual's presenting signs and symptoms. It can be as simple or as complex, as needed, to determine if an EMC exists.
- MSEs must be conducted by qualified personnel, which may include physicians, nurse practitioners, physician's assistants, or RNs trained to perform MSEs and acting within the scope of their State Practice Act.
- The hospital must provide stabilizing treatment (or appropriate transfer) to individuals found to have an EMC, including moving them as needed from the alternative site to another on-campus department.

B. Hospitals may set up screening at off-campus, hospital-controlled sites.

- Hospitals and community officials may encourage the public to go to these sites instead of the hospital for screening for influenza-like illness (ILI). *However, a hospital may not tell individuals who have already come to its ED to go to the off-site location for the MSE.*
- Unless the off-campus site is already a dedicated ED (DED) of the hospital, as defined under EMTALA regulations, EMTALA requirements do not apply.
- The hospital should not hold the site out to the public as a place that provides care for EMCs in general on an urgent, unscheduled basis. They can hold it out as an ILI screening center.
- The off-campus site should be staffed with medical personnel trained to evaluate individuals with ILIs.
- If an individual needs additional medical attention on an emergent basis, the hospital is required, under the Medicare Conditions of Participation, to arrange

AMERICAN OVERSIGHT

referral/transfer. Prior coordination with local emergency medical services (EMS) is advised to develop transport arrangements.

C. Communities may set up screening clinics at sites not under the control of a hospital

- There is no EMTALA obligation at these sites.
- Hospitals and community officials may encourage the public to go to these sites instead of the hospital for screening for ILI. *However, a hospital may not tell individuals who have already come to its ED to go to the off-site location for the MSE.*
- Communities are encouraged to staff the sites with medical personnel trained to evaluate individuals with ILIs.
- In preparation for a pandemic, the community, its local hospitals and EMS are encouraged to plan for referral and transport of individuals needing additional medical attention on an emergent basis.

EMTALA Obligations when Screening Suggests Possible COVID-19

If an individual comes to an ED of a hospital, as the term "comes to the emergency department" is defined in the regulation at §489.24(b), either by ambulance or as a walk-in, the hospital must provide the individual with an appropriate MSE. We emphasize that it is a violation of EMTALA for hospitals and CAHs with EDs to use signage that presents barriers to individuals who are suspected of having COVID-19 from coming to the ED, or to otherwise refuse to provide an appropriate MSE to anyone who has come to the ED for examination or treatment of a medical condition. However, use of signage designed to help direct individuals to various locations on the hospital property, as that term is defined in the regulation at §489.24(b), for their MSE would be acceptable. If the hospital is intending to use another location to conduct the MSE, please see *Attachment 1* for additional information.

If during the MSE the hospital concludes that an individual who has come to its ED may be a possible COVID-19 case, consistent with accepted standards of practice for COVID-19 screening, the hospital is expected to isolate the patient immediately. Although levels of services provided by EDs vary greatly across the country, it is CMS' expectation that all hospitals are able to, within their capability, provide MSEs and initiate stabilizing treatment, while maintaining the isolation requirements for COVID-19 and coordinating with their State or local public health officials, who will in turn arrange coordination, as necessary, with the CDC.

Stabilizing treatment means, with respect to an "emergency medical condition", to provide such medical treatment of the condition necessary to assure, within reasonable medical probability, that no material deterioration of the condition is likely to occur. Once an individual is admitted or the emergency medical condition ends, the obligations under EMTALA end.

At the time of this memo's publication, CDC's screening guidance (https://www.cdc.gov/coronavirus/2019-ncov/hcp/clinical-criteria.html) called for hospitals to contact their State or local public health officials when they have a case of suspected COVID-19. Officials will advise of next steps, in accordance with CDC recommendations on testing.

AMERICAN OVERSIGHT

Other Enforcement Considerations

Should CMS receive complaints alleging either inappropriate transfers by a sending hospital or refusal of a recipient hospital to accept an appropriate transfer, it will take into consideration CDC guidance and State or local public health direction at the time of the alleged noncompliance. It will also take into consideration any clinical considerations specific to the individual case(s).

Consistent with their obligations under the hospital and CAH Conditions of Participation (CoPs) §482.42 and §485.640, hospitals and CAHs are expected to adhere to accepted standards of infection control practice to prevent the spread of infectious disease and illness, including COVID-19. Standard, contact, and airborne precautions with eye protection should be used when caring for the patient as noted in CDC's Interim Health Care Infection Prevention and Control Recommendations for Patients Under Investigation for Coronavirus Disease 2019 (COVID-19). The CDC has issued extensive guidance on applicable isolation precautions and CMS strongly urges hospitals to follow this guidance. CMS recognizes the difficulties securing the recommended personal protective equipment (PPE) required for training and patient care that may be present in some circumstances at the time of this memorandum.
Hospitals and CAHs are expected under their respective CoPs at §482.11(a) and §485.608(a) to comply with Occupational Safety and Health Administration (OSHA) requirements, but CMS and state surveyors acting on its behalf do not assess compliance with requirements of other Federal agencies.

Latest CDC Guidance

The most up-to-date guidance regarding screening, testing, treatment, isolation, and other COVID-19 topics can be found on the CDC website at https://emergency.cdc.gov/han/HAN00427.asp Hospitals and CAHs are strongly urged to monitor this site as well as their State public health website and follow recommended guidelines and acceptable standards of practice. State Survey Agencies are also encouraged to monitor the CDC and their state public health websites for up-to-date information.

CMS Resources

CMS has released a memo regarding triage, assessment and discharge for hospitals which will provide additional information about responding to COVID-19 cases.
https://www.cms.gov/files/document/qso-20-13-hospitalspdf.pdf-2

CMS has additional guidance which may be beneficial related to EMTALA, and other topics surrounding health standards and quality. The document Provider Survey and Certification Frequently Asked Questions (FAQs), Declared Public Health Emergency All-Hazards are located at https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/SurveyCertEmergPrep/Downloads/All-Hazards-FAQs.pdf. These FAQs are not limited to situations involving 1135 Waivers, but are all encompassing FAQs related to public health emergencies and survey activities and functions.

AMERICAN OVERSIGHT

Questions about this memo should be addressed to QSOG_EmergencyPrep@cms.hhs.gov.

FDA Resources:

- Emergency Use Authorizations: https://www.fda.gov/medical-devices/emergency-situations-medical-devices/emergency-use-authorizations

Effective Date: Immediately. This policy should be communicated with all survey and certification staff, their managers, and the State/Regional Office training coordinators immediately.

AMERICAN OVERSIGHT

FACT SHEET

CMS
CENTERS FOR MEDICARE & MEDICAID SERVICES

Emergency Medical Treatment and Labor Act (EMTALA) &
Surges in Demand for Emergency Department (ED) Services

I. What is EMTALA?

- EMTALA is a Federal law that requires all Medicare-participating hospitals (**including critical access hospitals (CAHs)**) with dedicated EDs to perform the following for **all** individuals who come to their EDs, regardless of their ability to pay:
  - An *appropriate* medical screening exam (MSE) to determine if the individual has an Emergency Medical Condition (EMC). If there is no EMC, the hospital's EMTALA obligations end.
  - If there is an EMC, the hospital must:
    + Treat and stabilize the EMC within its capability (including inpatient admission when necessary); ***OR***
    + Transfer the individual to a hospital that has the capability and capacity to stabilize the EMC.
- Hospitals with specialized capabilities (with or without an ED) may not refuse an appropriate transfer under EMTALA if they have the capacity to treat the transferred individual.
- EMTALA ensures access to hospital emergency services; it need not be a barrier to providing care in a disaster.

II. Options for Managing Extraordinary ED Surges Under Existing EMTALA Requirements (No Waiver Required)

A. Hospitals may set up alternative screening sites on campus

- The MSE does not have to take place in the ED. A hospital may set up alternative sites on its campus to perform MSEs.
  - Individuals may be redirected to these sites after being logged in. The redirection and logging can even take place outside the entrance to the ED.
  - The person doing the directing should be qualified (e.g., an RN) to recognize individuals who are obviously in need of immediate treatment in the ED.
- The content of the MSE varies according to the individual's presenting signs and symptoms. It can be as simple or as complex, as needed, to determine if an EMC exists.

AMERICAN OVERSIGHT

- MSEs must be conducted by qualified personnel, which may include physicians, nurse practitioners, physician's assistants, or RNs trained to perform MSEs and acting within the scope of their State Practice Act.
- The hospital must provide stabilizing treatment (or appropriate transfer) to individuals found to have an EMC, including moving them as needed from the alternative site to another on-campus department.

B. Hospitals may set up screening at off-campus, hospital-controlled sites.

- Hospitals and community officials may encourage the public to go to these sites instead of the hospital for screening for influenza-like illness (ILI). *However, a hospital may not tell individuals who have already come to its ED to go to the off-site location for the MSE.*
- Unless the off-campus site is already a dedicated ED (DED) of the hospital, as defined under EMTALA regulations at 42 CFR § 489.24(b), EMTALA requirements do not apply.
- The hospital should not hold the site out to the public as a place that provides care for EMCs in general on an urgent, unscheduled basis. They can hold it out as an ILI screening center.
- The off-campus site should be staffed with medical personnel trained to evaluate individuals with ILIs.
- If an individual needs additional medical attention on an emergent basis, the hospital is required, under the Medicare Conditions of Participation, to arrange referral/transfer. Prior coordination with local emergency medical services (EMS) is advised to develop transport arrangements.

C. Communities may set up screening clinics at sites not under the control of a hospital

- There is no EMTALA obligation at these sites.
- Hospitals and community officials may encourage the public to go to these sites instead of the hospital for screening for ILI. *However, a hospital may not tell individuals who have already come to its ED to go to the off-site location for the MSE.*
- Communities are encouraged to staff the sites with medical personnel trained to evaluate individuals with ILIs.
- In preparation for a pandemic, the community, its local hospitals and EMS are encouraged to plan for referral and transport of individuals needing additional medical attention on an emergent basis.

III. EMTALA Waivers

- An EMTALA waiver allows hospitals to:
  - Direct or relocate individuals who come to the ED to an alternative off-campus site, in accordance with a State emergency or pandemic preparedness plan, for the MSE.

AMERICAN OVERSIGHT

  - Effect transfers normally prohibited under EMTALA of individuals with unstable EMCs, so long as the transfer is necessitated by the circumstances of the declared emergency.
- By law, the EMTALA MSE and stabilization requirements can be waived for a hospital **only if:**
  - The President has declared an emergency or disaster under the Stafford Act or the National Emergencies Act ; ***and***
  - The Secretary of HHS has declared a Public Health Emergency; ***and***
  - The Secretary invokes her/his waiver authority (which may be retroactive), including notifying Congress at least 48 hours in advance; ***and***
  - The waiver includes waiver of EMTALA requirements and the hospital is covered by the waiver.
- CMS will provide notice of an EMTALA waiver to covered hospitals through its Regional Offices and/or State Survey Agencies.
- Duration of an EMTALA waiver:
  - In the case of a public health emergency involving pandemic infectious disease, until the termination of the declaration of the public health emergency; ***otherwise***
  - In all other cases, 72 hours after the hospital has activated its disaster plan.
  - In no case does an EMTALA waiver start before the waiver's effective date, which is usually the effective date of the public health emergency declaration.

AMERICAN OVERSIGHT

EMTALA Obligations & 2019-Novel Coronavirus (COVID-19) Question and Answer Document

Note: *For the purpose of this document, the term "hospital" includes all types of Medicare-participating hospitals, critical access hospitals (CAHs).*

A. Patient Insurance/Payor Status

A.1. Is a Medicare-participating hospital required to provide EMTALA-mandated screening and stabilizing treatment for non-Medicare beneficiaries with likely or confirmed COVID-19?

EMTALA applies to all individuals who come to the dedicated emergency department (ED) of a Medicare-participating hospital or CAH, regardless of type or presence of insurance coverage or ability to pay. Further, Medicare-participating hospitals with specialized capabilities are required within the limits of their capability and capacity to accept appropriate transfers of individuals protected under EMTALA from other hospitals, without regard to insurance or ability to pay.

B. Specialized Capabilities

B.1. EMTALA requires that hospitals with specialized capabilities to treat COVID-19 accept appropriate transfers of individuals who require those services, if they have capacity to provide them. In the event of an EMTALA complaint related to an inappropriate transfer and/or a refusal of a recipient hospital to accept an appropriate transfer, how will CMS determine whether a hospital had the "specialized capabilities" with respect to COVID-19 required by the individual?

At the time of this FAQ document, no formally designated COVID-19 treatment centers are established. Some of the early COVID-19 cases were sent to hospitals previously designated as Ebola treatment centers however, no determination has been made that specialized centers would be developed for COVID-19 cases and therefore all hospitals are required at a minimum to screen, isolate, and begin stabilizing treatment as appropriate for any individual with suspected COVID-19 symptoms.

B.2: Are hospitals required to accept transfers of patients with suspected or confirmed COVID-19 from small or rural hospitals that don't have appropriate or sufficient isolation facilities or equipment to meet current state or local public health or CDC recommendations?

Hospitals with capacity and the specialized capabilities needed for stabilizing treatment are required to accept appropriate transfers from hospitals without the necessary capabilities. Hospitals should coordinate with their State/local public health officials regarding appropriate placement of individuals who meet specified COVID-19 assessment criteria, and the most current standards of practice for treating individuals with confirmed COVID-19 infection status.

As in any case concerning a hospital's EMTALA obligations with respect to transfers of individuals, CMS would evaluate the capabilities and capacity of both the referring and recipient hospitals in order to determine whether a violation has occurred. Among other things, we would take into account the CDC's recommendations at the time of the event in question in assessing

AMERICAN OVERSIGHT

whether a hospital had the requisite capabilities and capacity. We note that the CDC's recommendations focus on factors such as the individual's recent travel or exposure history and presenting signs and symptoms in differentiating the types of capabilities hospitals should have to screen and treat that individual. The presence or absence of negative pressure rooms (Airborne Infection Isolation Room (AIIR)) would not be the sole determining factor related to transferring patients from one setting to another when in some cases all that would be required would be a private room. See the CDC website for the most current infection prevention and control recommendations for hospital patients with suspected or known COVID-19: https://www.cdc.gov/coronavirus/2019-ncov/hcp/clinical-guidance-management-patients.html

C. Screening Examinations and Stabilizing Treatment Requirements

C.1: What are the EMTALA requirements for hospitals in regard to screening and treating individuals with possible COVID-19?

The EMTALA requirements for hospitals and CAHs are the same for individuals with possible COVID-19 symptoms as all other possible emergency medical conditions (EMCs). Hospitals and CAHs must:

- Provide an appropriate Medical Screening Exam (MSE) to every individual who comes to the Emergency Department (ED) for examination or treatment of a medical condition, to determine if they have an emergency medical condition (EMC); Provide necessary stabilizing treatment for individuals with an EMC within the hospital's capability and capacity; and
- Provide for appropriate transfers of individuals with EMCs if the hospital lacks the capability to stabilize them.

Specific to COVID-19, hospitals are encouraged to follow the CDC guidance for appropriate isolation procedures to minimize the risk of cross-contamination to other patients, visitors, and healthcare workers. For example, the CDC publishes and updates guidance related to COVID-19. Hospitals should consult the latest CDC guidance and coordinate with State/local public health authorities for guidance related to ongoing care and treatment of patients with COVID-19.

C.2: Are all hospitals expected to screen and treat individuals with possible COVID-19 symptoms?

Yes, all hospitals are expected, at a minimum to screen, isolate, and begin stabilizing treatment, as appropriate, for any individual with possible COVID-19 symptoms. Hospitals should coordinate with their State/local public health authorities regarding ongoing care and treatment.

C.3: Can hospitals ask patients to wait in their car or outside the hospital as CDC suggests in their COVID-19 guidance or is that violating EMTALA?

The MSE requirement of EMTALA requires that it be timely depending on the presenting signs and symptoms of the individual. Hospitals must perform an appropriate examination by a Qualified Medical Practitioner to determine if the patient has an emergency medical condition. If the individual, after an appropriate medical screening exam, meets the CDC criteria for potential COVID-19 and is determined to have no signs or symptoms that require immediate medical attention, then this would not present a direct EMTALA violation. In cases where a request is

AMERICAN OVERSIGHT

made for medical care that is unlikely to involve an EMC, the individual's statement that s/he is not seeking emergency care, together with brief questioning by the QMP would be sufficient to establish that there is no EMC and the hospital's EMTALA obligation would be satisfied. However, the hospital should have a system in place to monitor those patients that opt to wait in their own vehicle to ensure that their condition has not deteriorated while awaiting further evaluation. Failure to do so could expose the hospital to a potential MSE violation because the MSE was not done timely. In that case, it could also be a violation of the Condition of Participation: Emergency Services. As noted during previous public health emergency situations such as EBOLA and H1N1, CMS will take into consideration any clinical considerations specific to the individual case(s).

C.4: If a hospital does not have Intensive Care Unit (ICU) capabilities is it required to screen and, when appropriate, initiate stabilizing treatment for individuals with suspected or confirmed COVID-19?

Yes. The lack of ICU capabilities does not exempt a hospital from performing an MSE and initiating stabilizing treatment for individuals with known or suspected COVID-19 who come to the hospital's ED seeking examination or treatment. Qualified medical personnel in hospitals that conduct the screening examination should be aware of the criteria for initial COVID-19 screening and should apply such screening when appropriate. Note that the CDC guidance for COVID-19, indicates that they should do the following:

- Promptly identify and triage patients with relevant exposure history AND signs or symptoms compatible with COVID-19 https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html.

- Immediately isolate any patient with relevant exposure history and signs or symptoms compatible with COVID-19 and take appropriate steps to adequately protect staff caring for the patient, including appropriate use of personal protective equipment (PPE).

- Immediately notify the hospital/facility infection control program, other appropriate facility staff, and the state and local public health agencies that a patient has been identified who has relevant exposure AND signs or symptoms compatible with COVID-19.

C.5: May hospitals refuse to allow individuals with suspected cases of COVID-19 into their ED?

No. For every individual who "comes to the emergency department," as that term is defined in §489.24(b) of the EMTALA regulations, for evaluation or treatment of a medical condition, whether by ambulance or by walking-in, hospitals are required to provide an appropriate medical screening examination. Qualified medical personnel in hospitals that conduct the screening examination should be aware of the criteria for initial COVID-19 screening and should apply such screening when appropriate. Hospitals that refuse to screen an individual who comes to their emergency department would likely be found to have violated EMTALA, regardless of presenting signs, symptoms, and possible diagnoses.

AMERICAN OVERSIGHT

C.6: If a hospital remains open during COVID-19 or any other infectious outbreak, and is operating at or in excess of its normal operating capacity and cannot get sufficient staff, may the hospital shut down its emergency department (ED) without violating EMTALA?

Under these circumstances, EMTALA would not prohibit the hospital from closing its ED to new patients if it no longer had the capacity to screen and treat individuals (in effect, going on diversion). The hospital should follow any applicable State and local notice requirements and its own previously established plan for public notification when it goes on diversionary status. The hospital would continue to have an EMTALA obligation to individuals undergoing examination or treatment in its ED at the time it stops accepting new emergency patients. In addition, in spite of the "closure" if an individual comes to such a hospital and requests examination or treatment for an emergency medical condition, the hospital would be obligated by EMTALA to act within its capabilities to provide screening and, if necessary, stabilization.

C.7: Are all hospitals expected to have Personal Protective Equipment (PPE) and other equipment/facilities to screen and take care of suspected or confirmed COVID-19 patients?

There are no requirements established under EMTALA for hospitals to have specific PPE or equipment/facilities. Consistent with their obligations under the hospital and CAH Conditions of Participation (CoPs) at §482.42 and §485.640, hospitals and CAHs are expected to adhere to accepted standards of infection control practice to prevent the spread of COVID-19. However, the Emergency Preparedness Final Rule requires an all-hazards approach to the emergency preparedness planning and program. In February 2019, CMS updated subregulatory guidance in Appendix Z of the State Operations Manual (SOM), for facilities to plan for using an all-hazards approach, to include emerging infectious disease (EID) threats. Examples of EIDs include Influenza, Ebola, Zika Virus and others. Under this guidance, CMS specifically stated that these EIDs may require modifications to facility protocols to protect the health and safety of patients, such as isolation and personal protective equipment (PPE) measures.

The CDC has issued extensive guidance on applicable isolation precautions and CMS strongly urges hospitals to follow this guidance.

C.8: May hospitals decline to perform an MSE on an individual who comes to their ED with potential or suspected COVID-19 due to a lack of PPE or specialized equipment/facilities?

No. For every individual who "comes to the emergency department," as that term is defined in §489.24(b) of the EMTALA regulations, for evaluation or treatment of a medical condition, whether by ambulance or by walking-in, hospitals are required to provide an appropriate medical screening examination. Qualified medical personnel in hospitals that conduct the screening examination must be aware of the criteria for initial COVID-19 screening and apply such screening when appropriate. Hospitals that refuse to screen an individual who comes to their emergency department would likely be found to have violated EMTALA, regardless of presenting signs, symptoms, and possible diagnoses.

C.9: Will CMS issue EMTALA waivers for hospitals related to COVID-19?

AMERICAN OVERSIGHT

The statute governing EMTALA waivers sets a high threshold for issuing such waivers and also limits the nature and duration of an EMTALA waiver. At this time the requirements for CMS to issue EMTALA waivers have not been met (i.e., issuance of a Presidential disaster declaration and a Secretary's declaration of a public health emergency). For additional information, please visit https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/SurveyCertEmergPrep/1135-Waivers.

C.10: What about ambulances operating under emergency medical services (EMS) systems – are they subject to EMTALA?

Public health officials, EMS systems and hospitals are free to develop protocols governing where EMS should transport individuals for emergency care. This includes developing protocols specific to individuals who meet criteria to be considered suspected cases of COVID-19. A hospital owned and operated ambulance operating under communitywide protocols that direct transport of individuals to a hospital other than the hospital that owns the ambulance, for example, to the closest appropriate hospital, the individual is considered to have come to the ED of the hospital to which the individual is transported, at the time the individual is brought onto hospital property and the hospital becomes subject to EMTALA.

Even in the case of ambulances that are owned and operated by a hospital, it is permissible to transport an individual to a different hospital for screening and treatment, so long as they are operating in accordance with a communitywide EMS protocol, or they are operating under the direction of a physician who is not employed or otherwise affiliated with the hospital that owns the ambulance.

C.11: May hospitals set up alternative screening sites within the hospital to screen possible COVID-19 patients, even if they don't have an EMTALA waiver?

Yes, hospitals have flexibilities to set up alternative screening sites at other parts of the hospital, both on- and off-campus. See *Attachment 1* for additional guidance regarding surges in emergency department services.

Additionally, per the Medicare Conditions of Participation, hospitals must have policies and procedures based on the facility's emergency preparedness plan and its role under a waiver declared by the HHS Secretary, in accordance with section 1135 of the Act, in the provision of care and treatment at an alternate care site identified by public health and emergency management officials. While we recognize at the time of these FAQs, an 1135 Waiver cannot be invoked as only the HHS Secretary has declared a public health emergency, we do expect facilities to have policies and procedures on alternate care sites.

However, absent an EMTALA waiver issued by CMS pursuant to a declaration of a public health emergency, hospitals may not direct an individual who has already come to their on-site emergency department to any off-campus location for screening.

C.11(a): What constitutes an alternative hospital location? For instance, can this include a tarped-off area of another room, a room constructed in the ambulance bay, or the room previously used as the decontamination room?

AMERICAN OVERSIGHT

Hospitals have flexibilities under EMTALA to determine alternative locations outside the ED but within the hospital or on the hospital's property for screening examinations of individuals potentially exposed to or infected with COVID-19. Please see the Attachment 1: Fact Sheet for Addressing Hospital Surges

C.11(b): Do the Life Safety Code (LSC) requirements under the hospital or critical access hospital Conditions of Participation apply to alternative care sites?

Since alternative care sites are expected to be within the hospital or on the hospital's property (operating as part of the hospital/under the hospital's CMS Certification Number, they would be expected to meet LSC requirements. However, there may be situations where temporary examination areas are set up (please refer to above on alternate care sites).

Additionally, if compliance issues come up in such localized situations where no applicable section 1135 waiver [for declared public health emergencies] is available, CMS focuses on fundamentals, such as assuring medical and nursing staff have proper credentials and, in the case of medical staff, have privileges; assuring that care is safe, that patients' rights are protected and that medical records with sufficient information to promote safe care are maintained. Additionally, for facilities subject to the Life Safety Code (LSC), past experience has demonstrated that many facilities, even when functioning in a degraded status, or in the case of the establishment of alternative care sites, may continue to meet the LSC by implementing reasonable and prudent measures. For example, there were several hospitals that were damaged by Hurricane Katrina which continued to comply with the LSC by implementing reasonable and prudent measures, and therefore were able to continue operations in a degraded but safe environment for weeks or months until repairs could be completed.

Archived information on H1N1 which discussed alternate care sites can be located at: https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/SurveyCertEmergPrep/Downloads/SCLetter-10-06-Influenza.pdf

We would also encourage facilities to review resources provided by the Assistant Secretary of Preparedness and Response (ASPR) Technical Resources Assistance Center and Information Exchange (TRACIE) located here: https://asprtracie.hhs.gov/technical-resources/48/alternate-care-sites-including-shelter-medical-care/47

C.11(c): Can alternative sites include outbuildings on the campus or use of tents in the parking lot?

Alternative screening sites may be located in other buildings on the campus of a hospital or in tents in the parking lot, as long as they are determined to be an appropriate setting for medical screening activities and meet the clinical requirements of the individuals referred to that setting. We also defer to screening guidance provided by the CDC.

C.11(d): What would be an acceptable alternative location <u>on campus</u>? Must the location currently exist as a part of the certified facility?

AMERICAN OVERSIGHT

The location must be part of the certified hospital. If it is not currently part of the certified hospital, then the hospital must take steps to add the location as a new practice location of the hospital.

C.11(e): What type of approval process needs to be in place for a hospital to use an alternative location?

CMS does not require any approval process to use an alternative screening location that is already part of the certified hospital. If the hospital is adding a practice location, it must file a Form 855A with its Medicare Administrative Contractor to advise it of this action. The hospital is not required to obtain prior approval from CMS in order to bill Medicare for services at the added location. There is also no requirement for all added locations to be surveyed for compliance with the Medicare Hospital Conditions of Participation, but CMS retains the discretion to require a survey in individual cases.

States may have licensure requirements for prior approval of any additional practice locations, so hospitals are encouraged to consult with their State licensure authority on any applicable State requirements.

C.11(f): In the past when there have been disasters that resulted in ED surges alternative locations needed to be submitted and approved by State licensure authorities and also by CMS. Does this hold true for alternative locations for screening of potential COVID-19 patients?

See answer to the prior question. As stated, CMS does not require prior approval for hospitals that are adding a practice location. Hospitals should consult with their State licensure authority on any applicable State requirements.

D. Patient Rights

D.1: What action should the hospital take if an individual who meets the screening criteria for suspected COVID-19 wants to leave the hospital against medical advice?

Hospitals do not have authority to prevent the individual from leaving against medical advice. However, State or local public health authorities may have such authority under State or local law, and hospitals should coordinate with their local authorities on the appropriate way to handle an individual suspected of having COVID-19 who wants to leave the hospital environment.

Note that there is an EMTALA requirement at §489.24(d)(3) for a hospital to take all reasonable steps to secure the individual's written informed refusal (or that of the individual's representative) of further medical examination or treatment that the hospital has offered.

E. Enforcement

E.1: What will CMS do when a survey reveals that a hospital is not following nationally recognized guidelines regarding COVID-19 infection control processes?

AMERICAN OVERSIGHT

EMTALA does not establish requirements for infection control practices. However, consistent with their obligations under the hospital and CAH Medicare CoPs at §482.42 and §485.640, hospitals and CAHs are expected to adhere to accepted standards of infection control practice and Medicare conditions.

The CDC has issued extensive guidance on applicable isolation precautions and CMS strongly urges hospitals to follow this guidance. Hospitals may be cited for deficiencies under the CoPs related to failure to follow accepted infection prevention and control standards of practice. Hospitals should regularly check the official CDC COVID-19 website (https://www.cdc.gov/coronavirus/2019-ncov/index.html) and consider signing up for Sign up for the newsletter to receive weekly emails about the coronavirus disease 2019 (COVID-19) https://tools.cdc.gov/campaignproxyservice/subscriptions.aspx?topic_id=USCDC_2067.

E.2: How will CMS handle complaints about violations of EMTALA related to transfers/attempts to transfer individuals suspected or confirmed as having COVID-19?

If CMS receives complaints alleging either inappropriate transfers by a referring hospital or refusal of a recipient hospital to accept an appropriate transfer, the agency will consider the following (along with other factors) when making a determination of whether violations of EMTALA have occurred:

- The individual's clinical condition at the time of presentation to the referring hospital and at the time of the transfer request;
- The capabilities of the referring hospital,
- The screening and treatment activities performed by the referring hospital for the individual;
- Whether the request for transfer was consistent with any nationally recognized guidelines in effect at the time of the transfer request for COVID-19 screening, assessment, including guidance about transfer for further assessment or treatment of suspected or confirmed COVID-19; and,
- The capabilities of the recipient hospital and the recipient hospital's capacity at the time of the transfer request.

Quality, Safety & Oversight Group

SUBJECT: Guidance for Infection Control and Prevention Concerning Coronavirus Disease 2019 (COVID-19) by Hospice Agencies

Memorandum Summary

CMS is committed to protecting American patients by ensuring health care facilities have up-to-date information to adequately respond to COVID-19 concerns.

- ***Coordination with the Centers for Disease Control and Prevention (CDC) and local public health departments*** - We encourage all Hospice Agencies to monitor the CDC website for updated information and resources and contact their local health department when needed (CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html).

- ***Hospice Guidance and Actions*** - CMS regulations and guidance support Hospice Agencies taking appropriate action to address potential and confirmed COVID cases and mitigate transmission including screening, treatment, and transfer to higher level care (when appropriate). This guidance applies to both Medicare and Medicaid providers.

Background

The Centers for Medicare & Medicaid Services (CMS) is committed to the protection of patients and residents of healthcare facilities or homecare settings from the spread of infectious disease. This memorandum responds to questions we have received and provides important guidance for Hospice Agencies in addressing the COVID-19 outbreak and minimizing transmission to other individuals.

Guidance

Hospice Agencies should regularly monitor the CDC website (see links below) for information and contact their local health department when needed (https://www.cdc.gov/coronavirus/2019-ncov/whats-new-all.html). Also, hospice agencies should be monitoring the health status of patients, residents, visitors, volunteers, and staff under their care setting for signs or symptoms of

AMERICAN OVERSIGHT

COVID-19. Per CDC, prompt detection, triage and isolation of potentially infectious patients are essential to prevent unnecessary exposures among patients, healthcare personnel, and visitors at the facility. For exposed staff, hospice agencies should consider frequent monitoring for potential symptoms of COVID-19 as needed throughout the day.

In addition to the overarching regulations and guidance, we have provided the following information (Frequently Asked Questions) about some specific areas related to COVID-19:

Guidance for Addressing COVID-19 in Hospices (In-patient units, nursing facilities, assisted living, hospitals and home settings)

Which patients are at risk for severe disease from COVID-19?
Based upon CDC data, older adults, those with underlying chronic or life-limiting medical conditions such as hospice patients are presumed to be at greater risk of poor outcomes when infected with novel coronavirus.

Refer to the CDC guidance for people at higher risk: https://www.cdc.gov/coronavirus/2019-ncov/specific-groups/high-risk-complications.html

How should providers screen visitors and patients for COVID-19 in a Hospice that provides short-term inpatient care directly or in an inpatient unit of another facility?

Hospices should identify volunteers, visitors and patients at risk for having COVID-19 infection before or immediately upon arrival to the inpatient unit. They should be asked about the following:

1. International travel within the last 14 days to countries with sustained community transmission. For updated information on affected countries visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html
2. Signs or symptoms of a respiratory infection, such as a fever, cough, and sore throat.
3. In the last 14 days, has had contact with someone with or under investigation for COVID-19, or are ill with respiratory illness.
4. Residing in a community where community-based spread of COVID-19 is occurring.

For patients with respiratory symptoms, implement respiratory hygiene and cough etiquette (i.e., placing a facemask over the patient's nose and mouth) and isolate the patient in a private room with the door closed. If the patient cannot be immediately moved to an private location, ensure they are not allowed to wait among other patients who reside in the inpatient unit. Identify a separate, well-ventilated space that allows patients to be separated by 6 or more feet, with easy access to respiratory hygiene supplies.

Medicare requires Hospice Agencies to provide appropriate medical supplies for respiratory hygiene and cough etiquette, including 60%-95% alcohol-based hand sanitizer (ABHS), tissues, no touch receptacles for disposal, facemasks, and tissues at healthcare facility entrances.

Inform infection prevention and control services, local and state public health authorities, and other healthcare facility staff as appropriate about the presence of a person under investigation

AMERICAN OVERSIGHT

(PUI) for COVID-19. For hospice patients with symptoms, determination about whether or not to conduct diagnostic testing versus presuming a positive COVID-19 diagnosis (based on his/her symptoms and exposure) should be a decision among the patient, patient representative, hospice agency and state and local public health authority. Additional guidance for evaluating patients in U.S. for COVID-19 infection can be found on the CDC COVID-19 website.

How should hospice programs monitor or restrict health care staff or hospice volunteers?
The same screening performed for patients and visitors should be performed for hospice staff and volunteers.

- Health care providers (HCP) and volunteers who have signs and symptoms of a respiratory infection should not report to work.
- Anyone that develop signs and symptoms of a respiratory infection while on-the-job, should:
  - Immediately stop work, put on a facemask, and self-isolate at home;
  - Inform the hospice's infection control manager/team to include information on individuals, equipment, and locations the person came in contact with; and
  - Contact and follow the local health department recommendations for next steps (e.g., testing, locations for treatment).
- Refer to the CDC guidance for exposures that might warrant restricting asymptomatic healthcare personnel or volunteers from reporting to work (https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html).

Hospices should contact their local health department for questions, and frequently review the CDC website dedicated to COVID-19 for health care professionals (https://www.cdc.gov/coronavirus/2019-nCoV/hcp/index.html).

When a hospice patient is in an inpatient unit, what are recommended infection prevention and control practices, including considerations for patient placement, when evaluating and care for a patient with known or suspected COVID-19?
Recommendations for patient placement and other detailed infection prevention and control recommendations are available in the https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html.

Consider, where appropriate allowing certain types of volunteer activities to be performed via phone or other electronic devices to minimize risk of exposure in the event of a suspected or positive COVID-19 case.

Do hospice patients with known or suspected COVID-19 infection require hospitalization?
Hospice patients and/or their families should carefully discuss care options with the hospice team to ensure the goals and wishes of hospice patient are respected consistent with patient rights requirements. Patients can be managed at home if the patient is stable, the environmental exposure to COVID-19 to others in the household can be minimized, and if there are appropriate infection control precautions made and PPE available.

Patients whose symptoms are exacerbated by COVID-19 and cannot be adequately managed in the home setting, should be transferred to a hospice inpatient unit. More information is available here: https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-home-care.html.

AMERICAN OVERSIGHT

When is it safe to discontinue Transmission-based Precautions inpatient hospice patients with COVID-19?
The decision to discontinue Transmission-Based Precautions for hospitalized patients with COVID-19 should be made on a case-by-case basis in consultation with clinicians, infection prevention and control specialists, and public health officials. This decision should consider disease severity, illness signs and symptoms, and results of laboratory testing for COVID-19 in respiratory specimens.

Currently, negative RT-PCR results from at least 2 consecutive sets of nasopharyngeal and throat swabs collected at least 24 hours apart are needed before discontinuing Transmission-Based Precautions. A total of four negative specimens are needed to meet this requirement.

More detailed information about criteria to discontinue Transmission-Based Precautions are available here: https://www.cdc.gov/coronavirus/2019-ncov/hcp/disposition-hospitalized-patients.html.

When is it safe to discontinue in-home isolation for in home hospice patients with COVID-19?
The decision should be made on a case-by-case basis in consultation with clinicians and public health officials. This decision should consider disease severity, illness signs and symptoms, and results of laboratory testing for COVID-19 in respiratory specimens

Guidance for discontinuation of in-home isolation precautions is the same as that to discontinue Transmission-Based Precautions for hospitalized patients with COVID-19. **For more information, see:** https://www.cdc.gov/coronavirus/2019-ncov/hcp/disposition-in-home-patients.html

Considerations to discontinue in-home isolation include all of the following:

- Resolution of fever, without use of antipyretic medication
- Improvement in illness signs and symptoms
- Negative results of an FDA Emergency Use Authorized molecular assay for COVID-19 from at least two consecutive sets of paired nasopharyngeal and throat swabs specimens collected ≥24 hours apart (total of four negative specimens—two nasopharyngeal and two throat). See Interim Guidelines for Collecting, Handling, and Testing Clinical Specimens from Patients Under Investigation (PUIs) for 2019 Novel Coronavirus (2019-nCoV) for specimen collection guidance.

Can hospices restrict visitation of patients (in-patient unit provided directly by the hospice)?
Medicare regulations require a hospice to focus on preventing and controlling infections. Hospices may have policies regarding the visitation rights of patients and may wish to set clinical restrictions on visitation subject to patient's rights. If the inpatient hospice is not provided by the hospice itself (such as a hospital), that provider may have established additional visitation restrictions associated with that setting to address COVID-19 transmission concerns.

AMERICAN OVERSIGHT

What are the considerations when caring for a hospice patient in their home?

For hospice patients with known or suspected COVID-19 who remain in their homes, there are a number of infection prevention and control practices that should be followed. The CDC advises the patient to stay home except to get medical care, separate yourself from other people and animals in the home as much as possible (in a separate room with the door closed), call ahead before visiting your doctor, and wear a facemask in the presence of others when out of the patient room.

For everyone in the home, CDC advises covering coughs and sneezes followed by washing your hands or using an alcohol-based hand rub, not sharing personal items (dishes, eating utensils, bedding) with individuals with known or suspected COVID-19, cleaning all "high-touch" surfaces everyday, and monitoring your symptoms. Please see: https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-prevent-spread.html

CMS regulations also require that hospice agencies provide the types of necessary supplies and equipment required by the individualized plan of care. For a patient with COVID-19, this would include supplies for respiratory hygiene and cough etiquette, including 60%-95% alcohol-based hand sanitizer (ABHS). However, given supply shortages, State and Federal surveyors should not cite hospice agencies for not providing certain supplies (e.g., personal protective equipment (PPE) such as gowns, N95 respirators, surgical masks and alcohol-based hand rubs (ABHR)) if they are having difficulty obtaining these supplies for reasons outside of their control. However, we do expect providers/suppliers to take actions to mitigate any resource shortages and show they are taking all appropriate steps to obtain the necessary supplies as soon as possible.

What Personal Protective Equipment should hospice staff routinely use when visiting the home of a patient suspected of COVID-19 exposure or confirmed exposure?
If care provided to symptomatic patients who are confirmed or presumed to be COVID-19 positive is anticipated, then Hospice Agencies should refer to the CDC Interim Infection Prevention and Control Recommendations for Patients with Confirmed Coronavirus Disease 2019 (COVID-19) or Persons Under Investigation for COVID-19 in Healthcare Settings: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control- recommendations.html

Health care professionals who enter the room of a patient with known or suspected COVID-19 should adhere to Standard Precautions and use a facemask or respirator, gown, gloves, and eye protection. When available, respirators (instead of facemasks) are preferred; they should be prioritized for situations where respiratory protection is most important and the care of patients with pathogens requiring Airborne Precautions (e.g., tuberculosis, measles, varicella).

What are the considerations for discharge to a subsequent care location for hospice patients with COVID-19?
The decision should be made based on the clinical condition of the patient including careful consultation with the patient, patient representatives and/or their family, and understanding their individual needs and goals of care. If Transmission-Based Precautions must be continued in the subsequent setting, the receiving facility must be able to implement all recommended infection prevention and control recommendations. Be sure the transportation team is aware that the patient has confirmed COVID-19.

AMERICAN OVERSIGHT

Although COVID-19 patients with mild symptoms may be managed at home, the decision to discharge to home should consider the patient's ability to adhere to isolation recommendations, as well as the potential risk of secondary transmission to household members with immunocompromising conditions. More information is available here: https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-home-care.html.

If hospice care is provided in a nursing home, we have advised nursing homes that hospice workers should be allowed entry provided that hospice staff is following the appropriate CDC guidelines for Transmission-Based Precautions, and using PPE properly.

Talking Points
LeadingAge Florida 2 p.m. Call

- COVID-19 is thought to primarily spread mainly between people who are in close contact with one another through respiratory droplets, whenever an infected person coughs or sneezes.

- Symptoms of COVID-19 are like that of a respiratory infection:
  - Fever
  - Cough
  - Shortness of breath

- There is currently no vaccine to protect against COVID-19. The best way to prevent infection is to take everyday preventive actions, like avoiding close contact with people who are sick and washing your hands often.

- You can protect from yourself respiratory illness with everyday preventive actions:

AMERICAN OVERSIGHT

- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Wash your hands often with soap and water for at least 20 seconds. Use an alcohol-based hand sanitizer that contains at least 60% alcohol if soap and water are not available.
- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue away.
- Clean and disinfect frequently touched objects and surfaces.

- Providers and facilities should be reviewing CDC infection control procedures and how to effectively triage and isolate potentially infectious individuals to prevent unnecessary exposure among other patients, healthcare personnel and visitors at the facility.

- Additionally, you should ensure your workforce is trained and capable of implementing infection control procedures.

- Review your facility protocols including visitor screening to ensure precautions are in place to limit introduction of the virus.

- The CDC has provided guidance to facilities to screen patients and visitors for symptoms of acute respiratory illness (e.g., fever, cough, difficulty breathing) before entering your healthcare facility.

- CDC guidance for long-term care facilities can be found on their website: www.cdc.gov/covid19.

- The most important message from the CDC for long-term care facilities is that of prevention:
  - Prevent the introduction of respiratory germs INTO your facility;
  - Prevent the spread of respiratory germs WITHIN your facility;
  - And prevent the spread of respiratory germs BETWEEN facilities.

AMERICAN OVERSIGHT

- I am continuing to advise nursing home facilities and other long-term care providers of best practices to protect residents and staff.

Prevent the introduction of respiratory germs INTO your facility

- Post signs at the entrance instructing visitors not to visit if they have symptoms of respiratory infection.
- Let me be very clear: **If you are sick, do not visit a nursing home.**
- Ensure sick leave policies allow employees to stay home if they have symptoms of respiratory infection.
- Assess residents' symptoms of respiratory infection upon admission to the facility and implement appropriate infection prevention practices for incoming symptomatic residents.

Prevent the spread of respiratory germs WITHIN your facility

- Keep residents and employees informed.
- Monitor residents and employees for fever or respiratory symptoms.
- Support hand and respiratory hygiene, as well as cough etiquette by residents, visitors, and employees.
- Identify dedicated employees to care for COVID-19 patients and provide infection control training.
- Provide the right supplies to ensure easy and correct use of Personal Protective Equipment. There is guidance on CDC's website for this as well.

Prevent the spread of respiratory germs BETWEEN facilities

- Notify facilities prior to transferring a resident with an acute respiratory illness, including suspected or confirmed COVID-19, to a higher level of care.
- Report any possible COVID-19 illness in residents and employees to the local health department.

Please prepare to send once approval is confirmed

On behalf of Florida's Surgeon General and the Florida Department of Health, the Agency for Health Care Administration wants to ensure patients and staff are protected by following CDC infection prevention and control guidelines, including use of recommended personal protective equipment (PPE). Please review the information below and evaluate your facilities' practices when admitting and triaging/screening patients with respiratory symptoms as they enter your emergency department. Guidance of note includes:

- Immediately place a face mask on any individual entering the emergency department or triage/screening area of the hospital who presents with a cough, fever, runny nose, etc. This patient should be held in a separate triage area if not already.
    - If worn properly, a facemask helps block respiratory secretions produced by the wearer from contaminating other persons and surfaces.

AMERICAN OVERSIGHT

- All staff working triage desk must wear appropriate PPE (face mask, etc.)
- Staff must be properly trained on the usage of PPE and the prevention of transmission of infectious agents.
    - Information on how to properly don, use, and doff PPE in a manner to prevent self-contamination is available here: https://www.cdc.gov/hai/pdfs/ppe/PPE-Sequence.pdf
    - Conservation guidelines for appropriate use of PPE are available here: https://www.cdc.gov/coronavirus/2019-ncov/hcp/healthcare-supply-ppe.html
    - OSHA has several respiratory training videos available here: https://www.osha.gov/SLTC/respiratoryprotection/training_videos.html
- Complete routine cleaning and disinfection procedures of spaces where patients with respiratory symptoms are triaged/screened.
- CMS announced several actions to address the spread of COVID-19, including specific guidance to hospitals. These memos from CMS were discussed on the state hospital call last week: https://www.cms.gov/newsroom/press-releases/cms-announces-actions-address-spread-coronavirus

Keep up to date on the recommendations for preventing spread of COVID-19 on CDC's website: https://www.cdc.gov/coronavirus/2019-ncov/hcp/caring-for-patients.html

The Agency encourages you to visit the Department of Health's dedicated COVID-19 webpage at www.FloridaHealth.gov/COVID-19. This remains the best and most up-to-date resource for information and guidance regarding COVID-19 in Florida.

Subject: IMPORTANT: Travel Restrictions for Employees of the State Personnel System (COVID-19)AP

Good Afternoon AHCA Employees,

See below guidance received from the Department of Management Services as it pertains to travel restrictions for state employees.

AMERICAN OVERSIGHT

If you or your immediate household/family members have traveled internationally, and returned in the last 14 days, please raise this circumstance to your bureau chief.

Please know that AHCA's Executive Leadership Team is evaluating next steps and will pass along additional information as it becomes available.

As always if you have additional questions, please feel free to reach out to Human Resources at 850-412-3900.

Mary

Subject: [External] IMPORTANT: Travel Restrictions for Employees of the State Personnel System (COVID-19)AP

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Today, Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning

AMERICAN OVERSIGHT

home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Thank you in advance for joining in efforts to reduce the spread of COVID-19. We will continue to closely monitor and evaluate available information and guidance as this is a rapidly evolving situation.

We appreciate your patience and commitment to protecting our communities. If you have questions, please call John Apthorp at (850) 922-1274.

AMERICAN OVERSIGHT

Executive Summary

The newest strain of Coronavirus, COVID-19, became an urgent focus for Consulate Health Care in mid-February when the Centers for Disease Control (CDC), Centers for Medicare and Medicaid Services (CMS) and other Federal and State agencies announced that the threat had reached the United States and that our elderly population was at the highest risk. Our immediate objective became the protection of our residents, staff, and visitors through a heightened focus on our routine annual Influenza strategy that began in August of 2019. We implemented education and training that focused on the importance of patient and staff vaccination, hand washing, and respiratory symptoms and regular assessments. Additionally, we coordinated with our care center service and supply chain partners to secure necessary supplies and increase infection control practices. At this time, we have also activated employee and visitor screening and restrictions as recommended by the CDC and CMS.

A COVID-19 Task Force was quickly assembled under the direction and leadership of our Chief Nursing Officer, Andi Clark, which now meets daily (Mon – Fri) and is comprised of an inter-disciplinary team of subject-matter experts who are responsible for the 2-way transfer of information to and from our corporate offices and the teams on the ground. There are currently no reported cases of the virus within the organization. CMS and the CDC guidelines are updated frequently and require a great deal of interpretation by our clinical team to ensure that we are doing everything possible to avoid the threat of an outbreak. This information is promptly provided to all operational managers including posters, family and employee letters, checklists, and answers to frequently asked questions through company-wide advisories issued by our Corporate Communications department. Guidance is also being given on the best ways to maintain appropriate interaction between our centers and their local health department and local communities at large. Pandemic Plans and other emergency preparedness policies are in place and being re-trained as needed. We are confident that are efforts are focused, thorough and balanced across the multiple states, regions and local markets that we serve. We remain agile in our approach to new information as it becomes available, taking swift action to implement and execute new protocols.

Policies, Plans, & Protocols

FL-AHCA-20-0902-A-001539

Preparedness Checklist: Begin immediately

- Post signs for Hand Hygiene, respiratory etiquette, and visitors at all entrances.
- Re-educated and perform competency checks for hand hygiene and PPE.
- Annual Hand Hygiene and PPE training in Consulate University has been re-assigned with a due date of March 31.
- Begin using staff call out question and response spreadsheet.
- Ensure Infection Preventionist/designee and Department Manager is monitoring call outs utilizing the staff absence question and responses worksheet including contract staff.
- Notify family and resident representatives that visitation may be restricted during the outbreak.
- Receptionist/designee to provide visitor/vendor self-report questionnaire to complete.
- Begin using the Respiratory Line Listing sheet provided by the CDC.
- Utilize CDC line list for any staff with respiratory symptoms.
- Utilize CDC line listing for any residents with respiratory symptoms.
- Check supply of PPE including gloves, gowns, mask, goggles/eye protection and notify RVPO of inadequate supplies. Ensure PPE supplies are stored a secure location.
- Check supply of medical supplies including germicidal wipes
- Ensure adequate supply of emergency food and water

Please note the following attachments are located on ConsulNet

AMERICAN OVERSIGHT

COVID-19 – Pandemic Plan 3/2/2020 Revised 3/3/2020

Policy

COVID-19 is a respiratory illness thought to be spread mainly from person to person, between people who come in close contact to one another (about 6 feet). The virus is spread through droplets produced when an infected person coughs or sneezes. Symptoms include fever, cough and shortness of breath.

1. Staff will be trained on the facility Pandemic COVID-19 plan and related policies and procedures
2. Staff will be re-trained in Hand Hygiene and proper use of PPE including competency
3. Post signs to alert visitors to not visit if they have potentially been exposed or exhibiting signs and symptoms of COVID-19
4. Receptionist/designee to provide visitor/vendor self-report questionnaire to complete
5. Family members and resident representatives are notified prior to an outbreak that visitations may be restricted during an outbreak to protect the safety of their loved ones.
6. Post signs for hand hygiene, respiratory etiquette.
7. Prospective residents recovering from COVID-19 will be admitted after consultation with local and/or state health department and referring facility
8. Residents exhibiting signs and symptoms of COVID-19 the Infection Preventionist or designee will:
    - Isolate resident in a private room with the door closed
    - Initiate transmission based precautions based on CDC guidance (Standard, Contact, and Airborne and eye protection)
    - Contact local and/or state health department for guidance and transfer to a facility with an airborne isolation room
    - Follow CDC guidance on daily cleaning of environmental surfaces
9. The Pandemic COVID-19 Plan has been established and will be initiated when a novel virus is increasing and sustaining human-to-human transmission in the United States, and cases are occurring in the facility's state.
10. The Infection Preventionist will monitor the CDC, and state and local health departments for information and guidance on the virus
11. Infection Preventionist and Department Managers will monitor staff call outs, utilizing the call out question and response sheet. This includes contract staff

AMERICAN OVERSIGHT

Staff Self Report Questionnaire:

Staff Name_____ Date_____

Do you have a temperature of 100 or greater?	Yes	No
Have you had a temperature of 100 or greater in the last 14 days	Yes	No
Do you have a cough	Yes	No
Do you have a sore throat	Yes	No
Do you have Flu like symptoms	Yes	No
Have you had Flu like symptoms in the last 14 days	Yes	No
Have you or a family member recently (last 14 days) traveled from China	Yes	No
Have you or a family member recently (last 14 days) traveled from Italy	Yes	No
Have you or a family member recently (last 14 days) traveled from South Korea	Yes	No
Have you or a family member recently (last 14 days) traveled from Iran	Yes	No
Have you had contact with someone with or under investigation for COVID-19	Yes	No

Staff member with a Yes response should not be allowed to work – notify the ED and DON

Any staff member that develops signs and symptoms of a respiratory infection while on the job, should:

- Immediately stop working, put on a facemask, and self-isolate at home
- Inform the facility's infection preventionist, and include information on individuals, equipment, and locations the person came into contact with
- Contact and follow the local health department recommendations for next steps(e.g. testing, locations for treatment)

AMERICAN OVERSIGHT

Donning/Doffing Personal Protective Equipment

Employee Name:	Job Title:	Date:
Competency: ☐ Annual ☐ New Hire ☐ Other: _____		

INSTRUCTIONS: 1) Complete with each C.N.A.2) Complete upon HIRE/ANNUALLY/& or as indicated. 3) Complete ALL sections 4) Record any additional comments as indicated 5) Employee to sign and date 6) Facilitator to sign and date 7) DON to sign and date

Competency Criteria	Yes	No	Comments
Donning PPE			
1. Perform hand hygiene			
2. Dons gown. Opening is to the back. Ties are placed to the back and are tied in a bow not a knot			
3. Gown cuffs are pulled down to cover writs			
4. Don mask. Covers nose and mouth Respirator; Two hands used to bend/fit nose bridge Seal check performed(i.e. blow out to see if feel air around sides of respirator)			
5. Don goggles or face shield			
6. Don gloves. Gloves extend to cover wrist of gown if gown is worn.			
Doffing PPE			
7. Gloves removed in a way that prevents skin from coming in contact with exterior of glove(i.e. pinch wrist of first glove and pull off, holding dirty glove in dirty glove slide finger under edge of second glove and peel off over first glove, only touch inside of glove to discard in trash)			
8. Goggles or face shield grasp sides of goggles or face shield (i.e. least likely part to be contaminated) to remove			
9. Gown unfasten ties or break band around neck by pulling gown from the inside (at top of neck) away from body. Avoid exterior of gown coming into contact with skin and clothing. Pull arms out of gown and only touch inside of gown. Turn gown inside out to roll inward and away from your body. Discard gown.			
10. Mask or respirator. Tilt head slightly forward. Grasp bottom ties/elastic to pull over head or unhook/remove bands over ears. Pull mask away from face without touching exterior of mask. Discard Mask.			
11. Perform hand hygiene.

February 26, 2020 | COVID-19 Advisory #1
3:07 PM EST

At Consulate Health Care, the well-being of our patients, residents, staff, and visitors is our always our highest priority. For this reason, we want to let you know that we are closely following the Center for Disease Control (CDC) and all other credible resources publishing health and travel advisories for COVID-19 (Coronavirus). At this time there are no known threats to our centers, but it is important that we closely monitor new developments pertaining to this outbreak.

EMPLOYEES: It is critical that anyone who has been diagnosed with COVID-19, or anyone who has been identified by a healthcare professional as someone who has potentially been exposed and under a 14-day watch, immediately self-report your condition to your supervisor. Staff that may be experiencing any type of flu symptoms are encouraged to stay home until symptoms have subsided.

We will continue to take every precaution to ensure that the safety of our Consulate family remains everyone's top priority during this time, and we will keep you updated as more information becomes available.

To learn more about COVID-19 and to sign-up for travel alerts and health advisories, please visit: https://www.cdc.gov/

FL-AHCA-20-0902-A-001547

AMERICAN OVERSIGHT

COVID-19 ADVISORY #2
FEBRAURY 26, 2020

Good Evening - attached you will find important resources to assist you with your on-going efforts to protect our patients, residents, staff, and visitors from the threat of COVID-19.

- Immediate Steps
- COVID-19 Pandemic Plan
- COVID-19 Visitor/Vendor Self Report Questions
- COVID 19 Symptoms (English and Spanish)
- COVID 19 Stop the spread of germs – English and Spanish
- LTC Respiratory Outbreak Line Listing
- PPE Sequence Poster
- Staff Absence Worksheet
- Family Letter
- Employee Letter
    - **PLEASE NOTE**: this will be emailed to all employees with a company email address tomorrow morning. It should also be printed at centers and handed out to those who may not have access to company email and communicated during daily meetings.
- Hand Hygiene Competency
- PPE Competency

Many of these documents are available on ConsulNet and we will continue to update them as necessary. Should you have any questions or require further assistance, please contact your Supervisor or you may email CorpComm@consulatehc.com and we will direct your inquiry to the appropriate party.

Thank you for continuing to make these efforts and the safety of our Consulate family your highest priority!

FL-AHCA-20-0902-A-001548

COVID -19 ADVISORY #3 | New And Updated Resources
5:25 PM EST | March 5, 2020

On behalf of Andi Clark and our Clinical team, please find new and updated resources attached. It is important that you take time to read through these and put them into practice immediately. For your convenience, these will also be available on ConsulNet.

Many of the documents are now also being offered in Spanish, including the Family Letter.

- CDC Cough Poster
- CDC Transmission Based Precautions signs Contact, Droplet, Airborne (English and Spanish)
- How to HandWash Poster
- How to HandRub Poster
- COVID-19 Visitor/Vendor Self Report questions V2 (updated 3.5.2020)
- COVID-19 Employee Self Report questions (Updated 3.5.2020)
- COVID-19 Staff Self Report Questions log (Updated 3.5.2020)
- Standard and Transmission Based Precautions education sheet (Updated 3.5.2020)
- CMS Suspected Infection Investigation Tool
- Family Letter in Spanish

If you have questions about any of these resources or how to use them, please contact your Supervisor or email Maria.C.Heinlein@consulatehc.com.

Reminder: Please forward any media inquiries to Jennifer.l.trapp@consulatehc.com or direct callers to email Jenn directly. An official media statement has been posted to all Facebook pages and media may be referred to the care center's FB page as well. For assistance or questions about media activity, including media on-site, please call Jenn at 407-468-0181.

Thank you for your continued efforts to keep our residents, staff, and visitors safe!

March 3, 2020

AN IMPORTANT NOTICE TO ALL EMPLOYEES

We know some of you may be concerned about the spread of COVID-19 (the new coronavirus) being reported in the media and how it may impact us here at **[CENTER NAME]**. Ensuring our staff and residents are in a safe and healthy environment is our greatest concern. At this time, we don't have any cases in our **[center/community]**. The Centers for Disease Control and Prevention (CDC) have recommended a variety of steps that we are implementing to help reduce the potential for the virus to enter our building. However, we need your help in battling COVID-19. Below are some examples of how you can help protect yourselves and our residents, as well as prevent the spread throughout the community.

1. **Sick employees should stay home.** At this time, we request that you stay home if you have any symptoms of respiratory illness. Those symptoms include: cough, fever, sore throat, runny nose, and/or shortness of breath. Please contact your supervisor immediately; all policies still apply.
2. **Notify your Supervisor if you develop respiratory symptoms while at work.** These include cough, fever, sore throat, runny nose, and/or shortness of breath.
3. **Practice proper hand washing hygiene.** All employees should clean their hands before and after interaction with residents and their environment with an alcohol-based hand sanitizer that contains at least 60-95% alcohol, or wash their hands with soap and water for at least 20 seconds. Soap and water should be used preferentially if hands are visibly dirty.
4. **Cover your mouth and nose with a tissue when coughing or sneezing.** Please review the CDC's information on coughing and sneezing etiquette.
5. **Perform routine environmental cleaning.** Routinely clean all frequently touched surfaces in the workplace, such as workstations, countertops, and doorknobs. Use the cleaning agents that are usually used in these areas and follow the directions on the label. No special cleaning is necessary for COVID-19.

Our **[center/community]** is following the recommendations of the CDC on using basic contact precautions to prevent the spread which includes wearing gowns and gloves when interacting with residents who are sick as we always do. We also are staying up-to-date with the CDC recommendations as they are updated. In addition, our **[center/community]** is in close contact with the local and state health department and are following their guidance. We are posting signs on our entryway doors to notify visitors of the symptoms of COVID-19 and request that they not enter the building if they are experiencing these symptoms.

We will notify you if any residents or staff are diagnosed with COVID-19. Should you have any questions, please feel free to contact **[PLEASE FILL IN APPROPRIATE CENTER CONTACT INFORMATION AND TAILOR TO MEET YOUR CENTER'S NEEDS.]**

For additional information, please visit the www.cdc.gov/coronavirus.

Sincerely,

Consulate Health Care Management Team

AMERICAN OVERSIGHT

March 3, 2020

20

Dear Family Members,

We know some of you may be concerned about the spread of COVID-19 (the new coronavirus) being reported in the media and how it may impact us here at **[CARE CENTER]**. Ensuring residents are cared for in a safe and healthy environment is our greatest concern. At this time, we don't have any known cases in our center. The Centers for Disease Control and Prevention (CDC) have recommended a variety of steps that we are implementing to help reduce the potential for the virus to enter our building. However, we need your help in battling COVID-19. Below are some examples of how you can help protect the residents, as well as prevent the spread throughout the community.

At this time, we request that you *do not visit* the center if:

- You have any symptoms of respiratory illness. Those symptoms include: cough, fever, sore throat, runny nose, and/or shortness of breath
- You have had a fever of 100 degrees or higher
- You have traveled internationally within the last 14 days, specifically to China, S. Korea, Italy, Iran or Japan

We understand that connecting with family members is incredibly important, and there are a variety of other ways you might consider connecting with them. These may include telephone, email, text, or through Skype or Facebook.

Our center is following the recommendations of the CDC on prevention steps, including following strict handwashing procedures, and in many circumstances, wearing gowns and gloves when interacting with residents who are sick. We also are staying up-to-date with the CDC recommendations as they are updated. In addition, our [CARE CENTER] and our parent company, Consulate Health Care, is in close contact with the local and state health department and are following their guidance. We are posting signs on our entryway doors to notify visitors of the symptoms of COVID-19 and request that you not enter the building if you are experiencing these symptoms.

We will notify you if any residents or staff are diagnosed with COVID-19. Should you have any questions, please feel free to contact our center at:

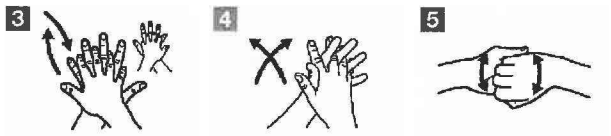
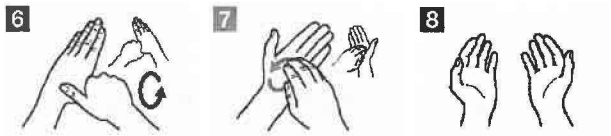
How to Handrub?



RUB HANDS FOR HAND HYGIENE! WASH HANDS WHEN VISIBLY SOILED

Duration of the entire procedure: 20-30 seconds

Apply a palmful of the product in a cupped hand, covering all surfaces;



Rub hands palm to palm;

Right palm over left dorsum with interlaced fingers and vice versa;

Palm to palm with fingers interlaced;

Backs of fingers to opposing palms with fingers interlocked;

Rotational rubbing of left thumb clasped in right palm and vice versa;

Rotational rubbing, backwards and forwards with clasped fingers of right hand in left palm and vice versa;

Once dry, your hands are safe.

May 2009

How to Handwash?

WASH HANDS WHEN VISIBLY SOILED! OTHERWISE, USE HANDRUB

Duration of the entire procedure: 40-60 seconds

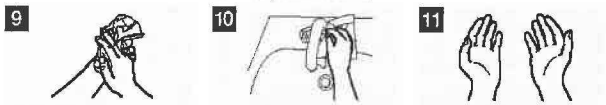
Wet hands with water;

Apply enough soap to cover all hand surfaces;

Rub hands palm to palm;

Right palm over left dorsum with interlaced fingers and vice versa;

Palm to palm with fingers interlaced;



Backs of fingers to opposing palms with fingers interlocked;

Rotational rubbing of left thumb clasped in right palm and vice versa;

Rotational rubbing, backwards and forwards with clasped fingers of right hand in left palm and vice versa;

Rinse hands with water;

Dry hands thoroughly with a single use towel;

Use towel to turn off faucet;

Your hands are now safe.

AMERICAN OVERSIGHT

- Attachment 14_FHCA SNF to Hospital Communication Form_03-11-20 (Florida Centers)
- Attachment 15_Clinical Screening Tool for PUI_03-10-20

***Please review and print all updated attachments

Additionally, we will be implementing the following today...

- Restriction of all visitors – talking points and formal letter for resident/resident representatives will be sent out later this morning
    - Each facility will work together to notify families while using the talking points provided by our legal team
    - Exceptions to include families of those on palliative services and end of life as long as they have been cleared via screening criteria – PPE to be provided to these visitors
    - Vendors will not be allowed in patient care areas – drop off of items (i.e. pharmacy, McKesson) should be delivered near exterior doors
- Activity Restrictions
    - All outside outings for residents will be restricted at this time
    - Inside activities are to be reviewed to not include activities where contact and/or contact with items are at risk (i.e. ball toss, Bingo, etc.)
        - Hold a resident council meeting **today** to discuss these steps in order to remain proactive in the protection of our residents
- Regional Support Staff Restrictions
    - All regional support staff will be encouraged to work remotely at this time, only exception will be our regional nurse consultants
    - Care Managers and Liaisons are not to visit our centers at this time – remain mindful of which hospitals are at risk when visiting for potential admissions.
- SNF to Hospital Transfer
    - Licensed nurses (Florida centers) to be educated on ***Attachment 14_FHCA SNF to Hospital Communication Form_03-11-20***. Any residents requiring a transfer to a higher level of care regardless of diagnosis will have this form completed
    - Licensed nurses to be educated on ***Attachment 15_Clinical Screening Tool for PUI_03-10-20.***
- What to do if you identify a PUI (Person Under Investigation) - this will be a resident who exhibits the symptomatology in addition to testing negative for Influenza and has a virus of unknown origin which ultimately requires transfer to the hospital
    - Place a mask over the resident (N95 if readily available)
    - Limit caregiver access until EMS arrives
    - Provide EMS with the closest egress to the resident to minimize exposure
    - Carry out terminal cleaning of room (1:10 bleach ratio) while wearing appropriate PPE
    - Follow further direction by leadership and FDOH
- N-95 masks are on order to have a supply on hand if needed for transfers – these masks will be placed on residents in the event we identify a PUI (Person Under Investigation) which would require a transfer to a higher level of care
- Minimize risk for transmission by...
    - Avoid room changes if possible – with emphasis on avoiding unit to unit transfers
    - Continue to maintain consistent staffing assignments – please avoid having staff work on multiple assignments
    - Try to limit all new admissions to one central area or unit of the building
- Temperature Checks to be carried out for...
    - All staff prior to each shift
    - Carried for the limited visitor/vendor population as described above – this includes physician and physician extenders
    - Every shift for our resident population

AMERICAN OVERSIGHT

Talking points and Formal Letter to families to follow.....additionally, more updates to follow as we are given guidance from our regulatory bodies, CDC, FDOH and FHCA

Subject: IMPORTANT INFORMATION ***Coronavirus (COVID-19) - March 09, 2020 Update #3 ***

Please find revised Visitor/Vendor ***Attachment 4_Receptionist Q&A_Coronavirus_UPDATED 03-09-20***. Attachment sent earlier was in error.

Thank you to all who joined the call as I hope we were able to answer any questions you may have had. Apologies to those who were unable to join due to volume of attendees.

Items addressed:

- Current FDOH status http://www.floridahealth.gov/diseases-and-conditions/COVID-19/index.html
- CMS memo review
- Increasing supervision/screening of visitors and vendors
- Daily monitoring of CDC line listing of resident's and staff
- Daily PPE monitoring and reporting
- Daily Infection Control rounding (ED/DNS/HSK Dir/ICP)
- Response to Person Under Investigation (PUI) – those with s/s – immediate isolation, contact of MD and Local Health Department notification
- Continued communication with your RDCO of any residents/staff/vendors who exhibit any respiratory signs or symptoms

AMERICAN OVERSIGHT

- Continued Hand Hygiene practices and monitoring of families and staff

Thank you,

Elizabeth Borer, RN | Senior VP Clinical Operations
Greystone Healthcare Management | greystonehealth.com

Good morning Team,

Please note ***Attachment 4_Receptionist Q&A_Coronavirus_UPDATED 03-09-20*** AND ***Attachment 6_Staff Checklist_Coronavirus_UPDATED_03-09-20*** which reflects "Have you exhibited respiratory symptoms such as shortness of breath, **sore throat**, fever **OR** cough?" We will be limiting visitors or vendors with **any** symptomatology until they are asymptomatic. Additionally, please read the most recent **CMS Memo released 04-04-20** as it relates to a survey priority shift of focus related to IC practices and guidance to facilities. Please take caution in denying admissions solely based on lack of Personal Protective Equipment (PPE), as this may trigger an immediate visit from your state survey agency. We need to continue to work together to ensure we have enough PPE supplies to care for our residents. We have a limited supply at the corporate office if local resources have been exhausted.

Other things to carry out...

- Set up dedicated handwashing stations near your main entrance and direct visitors/vendors to perform hand hygiene - see Lexington's best practice pictures attached 😊 – GREAT JOB TEAM LEX
- Continue to screen all employees; any staff identified post screening will be communicated to your respective RDCO for further guidance

AMERICAN OVERSIGHT

- Make sure you are ordering PPE equipment weekly to remain on allocation with McKesson as new shipments arrive – many facilities received bulk orders at the end of last week – please order the minimum as previously communicated or this will hold up your order
- Daily calls being initiated at the end of each day with corporate leadership, RDCO's and RVP's to discuss CDC line listing, current status of resident's on isolation (with reason and anticipated d/c date) and current PPE status – I will be sending out a combined PPE Status/Isolation Status Template to help with this daily communication to your RDCO to report off

For those who have been receiving questionnaires from our partnering ACO's, Advent Health PAC, etc., legal has crafted a draft and you will be receiving guidance for response today to report back – thank you Jim.

Thank you for being extremely diligent during this national focus in the ongoing prevention and control of the Coronavirus. Please reach out to me directly if you have any questions and/or concerns.

Respectfully,
Liz

Re: COVID-19 (Coronavirus)

Dear _____,

[NAME OF FACILITY] is diligently monitoring the development of COVID-19 (2019 novel Coronavirus) and taking all appropriate and necessary precautions for the safety and well-being of our community. We are working closely with local and state officials. We remain vigilant and continue to follow the Centers for Disease Control (CDC) and FLORIDA or ILLINOIS or MISSOURI Department of Health guidelines.

The care and safety of our residents and staff members are our number one priority. As such, we've taken the appropriate steps to address and prevent the exposure of the virus to anyone who may visit our facility. To further protect the health of our patients, workforce, and the community and prevent the potential spread of Coronavirus, [NAME OF FACILITY] is implementing a modified visitor policy effective March 11, 2020. This policy limits the number of visitors, restricts the number of entry points into the building, and implements screening for all visitors.

Specifically, in accordance with the Centers for Medicare & Medicaid Services (CMS) revised guidance to visitation for nursing homes, in coordination with the CDC and local health departments, and in order to protect unnecessary exposure among residents for reasonable clinical and safety reasons, NAME OF FACILITY has imposed the following visitation limitation:

Individuals are limited from visiting residents unless extenuating circumstances exist such as end-of-life situations or when a visitor is essential for the resident's emotional well-being and care.

In lieu of visits, we welcome alternate forms of communication to maintain the supportive relationship and to reassure your loved ones that the precautions in effect are intended for their protection and well-being. Please know that NAME OF FACILITY has increased the frequency of surveillance on our residents for symptoms in order to ensure prompt detection, triage, and isolation of potentially affected residents, while still taking into account the individual needs and goals of care.

We will continuously monitor the information disseminated from CMS, CDC, and local governing agencies for further guidance. However, the current visitor limitation will remain in place until further notice. Do not hesitate to call us at [XXX-XXX-XXXX] before visiting your loved one to better understand the current visitor policy.

Sincerely,

[Name of Administrator], NHA
Executive Director
[_____] Health & Rehabilitation Center

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

03-11-20: Talking Points preface for letter to families, involved parties....

- Introduce yourself
- I'm sure you have been following the news regarding the COVID-19 ("Corona virus") and it's spread and implications... (This will open conversation)
- I wanted to let you know that we have been diligent in protecting our residents since the onset
    - We have enforced precautionary measures for visitors and staff, including increased education and signage, additional hand hygiene stations, and screening of residents, vendors, and staff regarding symptoms, relevant travel. We have updated potential exposure information in accordance with the CDC, WHO, and CMS recommendations
- Most recently, CMS has revised guidance for visitation based on the vulnerability of residents in nursing homes.
- **We have chosen to adopt the CMS guidance to restrict visitation to our center unless extenuating circumstances occur.**
    - I understand this may be concerning, but the heightened risk of transmission supports this decision as being essential to keeping your loved one, and the other residents protected.
- We are sending out a letter that with further explain this precaution and of course, we will let you know immediately if there are any changes.
- In the meantime,
    - we want to let you know that we are communicating this same message to all of our residents and updating them often regarding any developments.
    - We are continuing our vigilant surveillance and rigorous screening of staff prior to reporting to work each shift
    - We are encouraging and available to help you communicate with your loved ones by other means, such as Skype, email, facetime, phone calls. We have internet access and can assist with simple technology.
    - Non-essential appointments and LOAs will also be restricted and rescheduled at a later date
    - Care Plan meetings and IDT discussions will continue as planned; however, your participation will need to be completed via telephone/skype/facetime etc.
    - If you would like an assigned contact person so you receive consistent communication, that can also be arranged.
    - We are monitoring the CDC, WHO, and CMS guidance and live coverage and are hopeful that the restrictions can be lifted in the near future.
    - I know you will probably have questions after you digest this—here are some key people you can contact:
    - Here is my cell number
    - Do you have any questions right now?

Cc: MacLafferty, Laura <Laura.MacLafferty@ahca.myflorida.com>
Subject: RE: Nursing home infection control regs

I added the federal NH infection control requirements, in addition to the state/federal hospital. The CMS memo does include a link to the federal NH and Hospital tools.

Nursing Home: Federal Infection Control

42 CFR; 483.80

The facility must establish and maintain an infection prevention and control program designed to provide a safe, sanitary and comfortable environment and to help prevent the development and transmission of communicable diseases and infections. The facility must establish an infection prevention and control program (IPCP) that must include, at a minimum, the following elements:

-A system for preventing, identifying, reporting, investigating, and controlling infections and communicable diseases for all residents, staff, volunteers, visitors, and other individuals providing services under a contractual arrangement based upon the facility assessment conducted according to §483.70(e) and following accepted national standards;

AMERICAN OVERSIGHT

-Written standards, policies, and procedures for the program, which must include, but are not limited to:

- A system of surveillance designed to identify possible communicable diseases or infections before they can spread to other persons in the facility;
- When and to whom possible incidents of communicable disease or infections should be reported;
- Standard and transmission-based precautions to be followed to prevent spread of infections;
- When and how isolation should be used for a resident; including but not limited to;
- The type and duration of the isolation, depending upon the infectious agent or organism involved, and
- A requirement that the isolation should be the least restrictive possible for the resident under the circumstances.
- The circumstances under which the facility must prohibit employees with a communicable disease or infected skin lesions from direct contact with residents or their food, if direct contact will transmit the disease; and
- The hand hygiene procedures to be followed by staff involved in direct resident contact.

A system for recording incidents identified under the facility's IPCP and the corrective actions taken by the facility.
Linens. Personnel must handle, store, process, and transport linens so as to prevent the spread of infection.
Annual review. The facility will conduct an annual review of its IPCP and update their program, as necessary.

Hospital: Federal Infection Control

42 CFR; 482.42

The hospital must provide a sanitary environment to avoid sources and transmission of infections and communicable diseases. There must be an active program for the prevention, control, and investigation of infections and communicable diseases.

-The hospital's infection prevention and control program must be integrated into its hospital-wide Quality Assurance and Performance Improvement. (QAPI) program.

- A person or persons must be designated as infection control officer or officers to develop and implement policies governing control of infections and communicable diseases.

AMERICAN OVERSIGHT

- The infection control officer or officers must develop a system for identifying, reporting, investigating, and controlling infections and communicable diseases of patients and personnel.

Hospital: State Infection Control

59A-3.250

Each hospital shall establish an infection control program involving members of the organized medical staff, the nursing staff, other professional staff as appropriate, and administration. The program shall provide for:

The surveillance, prevention, and control of infections among patients and personnel;
The establishment of a system for identifying, reporting, evaluating and maintaining records of infections;
Ongoing review and evaluation of all septic, isolation and sanitation techniques employed in the hospital; and,
Development and coordination of training programs in infection control for all hospital personnel.

Each hospital shall have written policies and procedures reflecting the scope of the infection control program outlined in subsection (1). The written policies and procedures shall be reviewed at least every two years by the infection control program members, dated at the time of each review, revised as necessary, and enforced.

The policies and procedures devised by the infection control program shall be approved by the governing board, and shall contain the following:

(a) Specific policies for the shelf life of all stored sterile items.

(b) Specific policies and procedures related to occupational exposure to blood and body fluids.

(c) Specific policies and procedures related to admixture and drug reconstitution, and to the manufacture of intravenous and irrigating fluids.

(d) Specific policies related to the handling and disposal of biomedical waste as required by chapter 64E-16, F.A.C., OSHA 29 CFR Part 1910.1030, Bloodborne Pathogens.

(e) Specific policies related to the selection, storage, handling, use and disposition of disposable items.

(f) Specific policies related to decontamination and sterilization activities performed in central services and throughout the hospital, including a requirement that steam gas (ETO) and hot air sterilizers be tested with live bacterial spores at least weekly.

(g) Specific policies regarding the indications for universal precautions, body substance isolation, CDC isolation guidelines, or equivalent and the types of isolation to be used for the prevention of the transmission of infectious diseases.

AMERICAN OVERSIGHT

(h) A requirement that soiled linen is collected in such a manner as to minimize microbial dissemination into the environment.

(i) A requirement that all cases of communicable diseases as set forth in chapter 64D-3, F.A.C., be promptly and properly reported as required by the provisions of that rule.

The individuals involved in the infection control program shall meet at least quarterly, shall maintain written minutes of all meetings, and shall make a report at least annually to the assigned professional staff and the governing board.

Each hospital shall establish an employee health policy to minimize the likelihood of transmission of communicable disease by both employees and patients. Such policies shall include work restrictions for an employee whenever it is likely that communicable disease may be transmitted until such time as a medical practitioner certifies that the employee may return to work.

COVID 19 CORONAVIRUS DISEASE

What you need to know about coronavirus disease 2019 (COVID-19)

What is coronavirus disease 2019 (COVID-19)?

Coronavirus disease 2019 (COVID-19) is a respiratory illness that can spread from person to person. The virus that causes COVID-19 is a novel coronavirus that was first identified during an investigation into an outbreak in Wuhan, China.

Can people in the U.S. get COVID-19?

COVID-19 is spreading from person to person in China, and limited spread among close contacts has been detected in some countries outside China, including the United States. At this time, however, this virus is NOT currently spreading in communities in the United States. Right now, the greatest risk of infection is for people in China or people who have traveled to China. Risk of infection is dependent on exposure. Close contacts of people who are infected are at greater risk of exposure, for example health care workers and close contacts of people who are infected with the virus that causes COVID-19. CDC continues to closely monitor the situation.

Have there been cases of COVID-19 in the U.S.?

Yes. The first case of COVID-19 in the United States was reported on January 21, 2020. The current count of cases of COVID-19 in the United States is available on CDC's webpage at https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html.

How does COVID-19 spread?

The virus that causes COVID-19 probably emerged from an animal source, but now it seems to be spreading from person to person. It's important to note that person-to-person spread can happen on a continuum. Some diseases are highly contagious (like measles), while other diseases are less so. At this time, it's unclear how easily or sustainably the virus that causes COVID-19 is spreading between people. Learn what is known about the spread of newly emerged coronaviruses at https://www.cdc.gov/coronavirus/2019-ncov/about/transmission.html.

What are the symptoms of COVID-19?

Patients with COVID-19 have had mild to severe respiratory illness with symptoms of

- fever
- cough
- shortness of breath

What are severe complications from this virus?

Many patients have pneumonia in both lungs.

How can I help protect myself?

The best way to prevent infection is to avoid being exposed to the virus that causes COVID-19.

There are simple everyday preventive actions to help prevent the spread of respiratory viruses. These include

- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Wash your hands often with soap and water for at least 20 seconds. Use an alcohol-based hand sanitizer that contains at least 60% alcohol if soap and water are not available.

If you are sick, to keep from spreading respiratory illness to others, you should

- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces.

What should I do if I recently traveled to China and got sick?

If you were in China within the past 14 days and feel sick with fever, cough, or difficulty breathing, you should seek medical care. Call the office of your health care provider before you go, and tell them about your travel and your symptoms. They will give you instructions on how to get care without exposing other people to your illness. While sick, avoid contact with people, don't go out and delay any travel to reduce the possibility of spreading illness to others.

Is there a vaccine?

There is currently no vaccine to protect against COVID-19. The best way to prevent infection is to avoid being exposed to the virus that causes COVID-19.

Is there a treatment?

There is no specific antiviral treatment for COVID-19. People with COVID-19 can seek medical care to help relieve symptoms.

COVID 19
ENFERMEDAD DEL CORONAVIRUS

Lo que necesita saber sobre la enfermedad del coronavirus 2019(COVID-19)

¿Qué es la enfermedad del coronavirus 2019 (COVID-19)?

La enfermedad del coronavirus 2019 (COVID-19) es una afección respiratoria que se puede propagar de persona a persona. El virus que causa el COVID-19 es un nuevo coronavirus que se identificó por primera vez durante la investigación de un brote en Wuhan, China.

¿Pueden las personas en los EE. UU. contraer el COVID-19?

El COVID-19 se está propagando de persona a persona en China y se ha detectado propagación limitada entre contactos cercanos en algunos países fuera de China, incluso en los Estados Unidos. En la actualidad, sin embargo, este virus NO se está propagando en comunidades en los Estados Unidos. En estos momentos, el mayor riesgo de infección es para las personas en China o las personas que han viajado a China. El riesgo de infección depende de la exposición. Los contactos cercanos de las personas infectadas tienen un riesgo mayor de exposición, por ejemplo, los trabajadores del sector de la salud y los contactos cercanos de las personas infectadas por el virus que causa el COVID-19. Los CDC continúan vigilando de cerca la situación.

¿Ha habido casos de COVID-19 en los EE. UU.?

Sí. El primer caso de COVID-19 en los Estados Unidos se notificó el 21 de enero del 2020. La cantidad actual de casos de COVID-19 en los Estados Unidos está disponible en la página web de los CDC en https://www.cdc.gov/coronavirus/2019-ncov/ cases-in-us.html.

¿Cómo se propaga el COVID- 19?

Es probable que el virus que causa el COVID-19 haya surgido de una fuente animal, pero parece que ahora se está propagando de persona a persona. Es importante notar que la propagación de persona a persona puede darse en un proceso continuo. Algunas enfermedades son altamente contagiosas (como el sarampión), mientras que otras enfermedades no lo son tanto. En estos momentos, no está claro qué tan fácil o con qué continuidad el virus que causa el COVID-19 se esté propagando entre las personas. Infórmese sobre lo que se sabe acerca de la propagación del coronavirus de reciente aparición en https://www.cdc.gov/coronavirus/2019-ncov/about/transmission-sp.html.

¿Cuáles son los síntomas del COVID-19?

Los pacientes con COVID-19 han tenido enfermedad respiratoria de leve a grave con los siguientes síntomas:

- fiebre
- tos
- dificultad para respirar

¿Cuáles son las complicaciones graves provocadas por este virus?

Muchos pacientes tienen neumonía en ambos pulmones.

¿Qué puedo hacer para ayudar a protegerme?

La mejor manera de prevenir la infección es evitar la exposición al virus que causa el COVID-19.
Hay medidas simples preventivas y cotidianas para ayudar a prevenir la propagación de virus respiratorios. Estas incluyen las siguientes:

- Evitar el contacto cercano con personas enfermas.
- Evitar tocarse los ojos, la nariz y la boca con las manos sin lavar.
- Lavarse frecuentemente las manos con agua y jabón por al menos 20 segundos. Usar un desinfectante de manos que contenga al menos un 60 % de alcohol si no hay agua y jabón disponibles.
- Si está enfermo, para prevenir la propagación de la enfermedad respiratoria a los demás, debería hacer lo siguiente:
- Quedarse en casa si está enfermo.
- Cubrirse la nariz y la boca con un pañuelo desechable al toser o estornudar y luego botarlo a la basura.
- Limpiar y desinfectar los objetos y las superficies que se tocan frecuentemente.

¿Qué debo hacer si recientemente viajé a China y me enfermé?

Si estuvo en China en los últimos 14 días, se siente enfermo y tiene fiebre, tos o dificultad para respirar, debería buscar atención médica. Llame al consultorio de su proveedor de atención médica antes de ir y dígales sobre su viaje y sus síntomas. Ellos le darán instrucciones sobre cómo conseguir atención médica sin exponer a los demás a su enfermedad. Mientras esté enfermo, evite el contacto con otras personas, no salga y postergue cualquier viaje para reducir la posibilidad de propagar la enfermedad a los demás.

¿Hay alguna vacuna?

En la actualidad no existe una vacuna que proteja contra el COVID-19. La mejor manera de prevenir la infección es evitar la exposición al virus que causa el COVID-19.

¿Existe un tratamiento?

No hay un tratamiento antiviral específico para el COVID-19. Las personas con el COVID-19 pueden buscar atención médica para ayudar a aliviar los síntomas.

AMERICAN OVERSIGHT

Flowchart to Identify and Assess 2019 Novel Coronavirus

For the evaluation of patients who may be ill with or who may have been exposed to 2019 Novel Coronavirus (2019-nCoV)

A. Identify

if in the ***past 14 days since first onset of symptoms*** a history of ***either***

Travel to China	← OR →	**Close contact with** a person known to have 2019-nCoV illness*

B. AND the person has

Fever or symptoms of lower respiratory illness
(e.g., cough or shortness of breath)

if both exposure and illness are present

↓

1. Isolate

- Place facemask on patient
- Isolate the patient in a private room or a separate area
- Wear appropriate personal protective equipment (PPE)

2. Assess clinical status

	Is fever present?	**Is respiratory illness present?**
EXAM	☐ Subjective? ☐ Measured? _____°C/F	☐ Cough? ☐ Shortness of breath?

3. Inform

- Contact health department to report at-risk patients and their clinical status
- Assess need to collect specimens to test for 2019-nCoV
- Decide disposition

If discharged to home

↓

Instruct patient

As needed depending on severity of illness and health department consultation

- Home care guidance
- Home isolation guidance

Advise patient

If the patient develops new or worsening fever or respiratory illness

- Call clinic to determine if reevaluation is needed
- If reevaluation is needed call ahead and wear facemask

* Documentation of laboratory-confirmation of 2019-nCoV may not be possible for travelers or persons caring for patients in other countries. For more clarification on the definition for close contact see CDC's Interim Guidance for Healthcare Professionals: www.cdc.gov/coronavirus/2019-nCoV/hcp/clinical-criteria.html

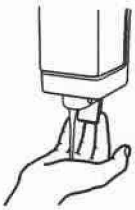
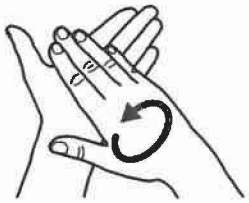
How to Handwash?

WASH HANDS WHEN VISIBLY SOILED! OTHERWISE, USE HANDRUB



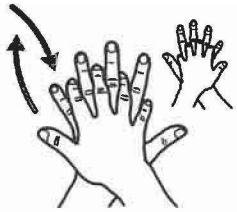
Duration of the entire procedure: 40-60 seconds

0



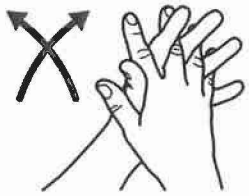
Wet hands with water;

1



Apply enough soap to cover all hand surfaces;

2

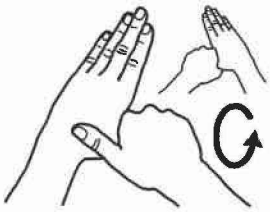


Rub hands palm to palm;

3

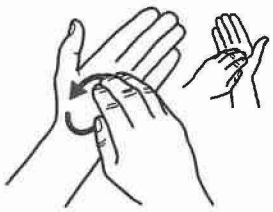
Right palm over left dorsum with interlaced fingers and vice versa;

4



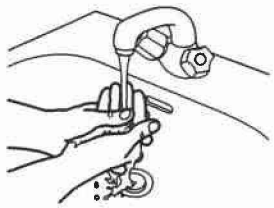
Palm to palm with fingers interlaced;

5



Backs of fingers to opposing palms with fingers interlocked;

6

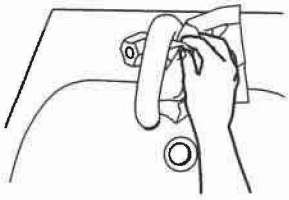


Rotational rubbing of left thumb clasped in right palm and vice versa;

7

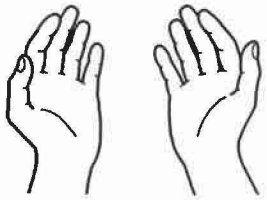
Rotational rubbing, backwards and forwards with clasped fingers of right hand in left palm and vice versa;

8



Rinse hands with water;

9



Dry hands thoroughly with a single use towel;

10

Use towel to turn off faucet;

11

Your hands are now safe.

Long-Term Care (LTC) Respiratory Surveillance Line List

Instructions for the Long-Term Care (LTC) Respiratory Surveillance Line List

The Respiratory Surveillance Line List provides a template for data collection and active monitoring of both residents and staff during a suspected respiratory illness cluster or outbreak at a nursing home or other LTC facility. Using this tool will provide facilities with a line listing of all individuals monitored for or meeting the case definition for the outbreak illness.

Each row represents an individual resident or staff member who may have been affected by the outbreak illness (i.e., case). The information in the columns of the worksheet capture data on the case demographics, location in the facility, clinical signs/symptoms, diagnostic testing results and outcomes. While this template was developed to help with data collection for common respiratory illness outbreaks the data fields can be modified to reflect the needs of the individual facility during other outbreaks.

Information gathered on the worksheet should be used to build a case definition, determine the duration of outbreak illness, support monitoring for and rapid identification of new cases, and assist with implementation of infection control measures by identifying units where cases are occurring.

AMERICAN OVERSIGHT

LTC Respiratory Surveillance Line List

Instruction Sheet for Completion of the Long-Term Care (LTC) Respiratory Surveillance Line List

Section A: Case Demographics

In the space provided per column, fill in each line with name, age and gender of each person affected by the current outbreak at your facility. Please differentiate residents (R) from staff (S).

*Staff includes all healthcare personnel (e.g., nurses, physicians and other providers, therapists, food services, environmental services) whether employed, contracted, consulting or volunteer.

For residents only: Short stay (S) residents are often admitted directly from hospitals, require skilled nursing or rehabilitation care, and are expected to have a length of stay less than 100 days. Long stay (L) residents are admitted to receive residential care or nursing support and are expected to have a length of stay that is 100 days or more. Indicate the stay type for each resident in this column.

Section B: Case Location

For resident only: Indicate the building (Bldg), unit or floor where the resident is located and the room and bed number for each resident being monitored for outbreak illness. *Answers may vary by facility due to differences in the names of resident care locations.

For staff only: For each staff member listed, indicate the floor, unit or location where that staff member had been primarily working at the time of illness onset.

Section C: Signs and Symptoms (s/s)

Symptom onset date: Record the date (month/day) each person developed or reported signs/symptoms (e.g., fever, cough, shortness of breath) consistent with the outbreak illness.

Symptoms: Fill in the box (Y or N) indicating whether or not a resident or staff member experienced each of the signs/symptoms listed within this section.

Additional documented s/s (*select all codes that apply*): In the space provided, record the code that corresponds to any additional s/s the resident or staff member experienced. If a resident or staff member experienced a s/s that is not listed, please use the space provided by "Other" to specify the s/s.
H – headache, SB – shortness of breath, LA – loss of appetite, C – chills, ST – sore throat, O – other: Specify _____

Section D: Diagnostics

Chest x-ray: Fill in the box (Y or N) indicating whether or not a chest x-ray was performed.

Type of specimen collected: (*Select all codes that apply*): In the space provided, record the type of specimen collected for laboratory testing. If the type of specimen collected is not listed, please use the space provided by "Other" to specify the specimen type.
NP – nasopharyngeal swab, OP – oropharyngeal swab, S – sputum, U – urine, O – Other: Specify _____

Date of collection: Record the date (month/day) of specimen collection.

Type of test ordered (*select all codes that apply*): In the space provided, record the code that corresponds to whether a diagnostic laboratory test was performed for each individual. If no test was performed, indicate "zero". If the laboratory test used to identify the pathogen is not listed, please use the space provided by "Other" to specify the type of test ordered.
0 – No test performed, 1 – Culture, 2 –Polymerase Chain Reaction (PCR), also called nucleic acid amplification testing includes multiplex PCR tests for several organisms using a single specimen, 3 – Urine Antigen, 4 – Other: Specify

Pathogen detected (*select all codes that apply*): In the space provided, record the code that corresponds to the bacterial and/or viral organisms that were identified through laboratory testing. If the test performed was negative, indicate "zero". If a pathogen not listed was identified through laboratory testing, please use the space provided by "Other" to specify the organism.
0 – Negative results; Bacterial: 1 – *Streptococcus pneumoniae*, 2 – *Legionella*, 3 – *Mycoplasma*
Viral: 4 – Influenza, 5 – Respiratory syncytial virus (RSV), 6 – Human metapneumovirus (HMPV), 7 – Other: Specify _____

Section E: Outcome During Outbreak

Symptom Resolution Date: Record the date that each person recovered from the outbreak illness and was symptom free for 24 hours.

Hospitalized: Fill in the box (Y or N) indicating whether or not hospitalization was required for a resident or staff member during the outbreak period. ***Note: The outbreak period is the time from the date of symptom onset for the first case to date of symptom resolution for the last case.***

Died: Fill in the box (Y or N) indicating whether or not a resident or staff member expired during the outbreak period.

Case (C) or Not a case (leave blank): Based on the clinical criteria and laboratory findings collected during the outbreak investigation, record whether or not each resident or staff member meets the case definition (C) or is not a case (leave space blank).

Long-Term Care (LTC) Respiratory Surveillance Outbreak Summary

Instructions for the Long-Term Care (LTC) Respiratory Surveillance Outbreak Summary

The Respiratory Outbreak Summary Form was created to help nursing homes and other LTC providers summarize the findings, actions and outcomes of an outbreak investigation and response. Completing this outbreak form will provide LTC facilities and other public health partners with a record of a facility's outbreak experience and highlight areas for outbreak prevention and response.

Instructions for each section of the form are described below. This form should be filled out by the designated infection preventionist with support from other clinicians in your facility (e.g., front-line nursing staff, physicians or other practitioners, consultant pharmacist, laboratory).

A LTC facility can use this form for internal documentation and dissemination of outbreak response activities. Facilities are encouraged to share this information with the appropriate public health authority by contacting the local health department. Should a facility decide to share this form with the local/state public health officials, please include facility contact information at the bottom of the form.

AMERICAN OVERSIGHT

LTC Respiratory Surveillance Outbreak Summary

Section 1: Facility Information

Health Dept. Contact Name and Phone Number: A LTC facility should have contact information (name or division, phone number) for the local and/or state health department for outbreak guidance and reporting purposes. Enter the health dept. contact information your facility used to request support during an outbreak.

Date First Notified Local Health Dept: Record the date you first contacted local or state public health during this outbreak at your facility.

Total # of residents at facility: Document the total number of residents in the facility at the time of the outbreak.

Total # of employees: Document the total number of staff working in the facility at the time of the outbreak. Staff includes all healthcare personnel (e.g., nurses, providers, consultants, therapists, food services, environmental services) whether employed, contracted or volunteer.

Summary Form Status: Information in the summary form may be completed over the course of the outbreak. Record the dates your facility started collecting information on the form and completed the outbreak summary report.

Section 2: Influenza Vaccination Status

Total # of residents vaccinated: Record the total number of residents that received the Flu Vaccine within the past year.

Total # of staff vaccinated: Record the total number of staff that received the Flu Vaccine within the past year.

Section 3:Pneumococcal Vaccination Status

Total # of residents vaccinated: Record the total number of residents that received at least one dose of the Pneumococcal Vaccine (either polysaccharide or conjugate).

Section 4: Case Definition

Provide a description of the criteria used to determine whether a resident should be considered a case in this outbreak. The description can include: signs/symptoms, presence of positive diagnostic tests, location within facility, and the timeframe during which individuals may have been involved in the outbreak (e.g., within the past 4 weeks).

Example: A Respiratory illness case includes any resident with the following symptoms: cough, shortness of breath, sputum production and fever residing on Units 2E or 2W, with onset of symptoms between Jan 15th and Feb 1st with or without a sputum specimen positive for Streptococcus pneumoniae.

Section 5: Outbreak Period Information

Outbreak start: (Date of symptom onset of first case): Record the date the first person developed signs/symptoms (e.g., fever, cough, shortness of breath) consistent with the outbreak illness.

Average length of illness: Estimate the average number of days it takes for signs/symptoms to resolve, based on clinical course among residents/staff affected by the outbreak illness.

Outbreak end: (Symptom resolution date of last case): Record the date the last person recovered from the outbreak illness and became symptom free for 24 hours.

Total # of Cases: Document the number of residents and staff (if applicable) who were identified as having the outbreak illness.

AMERICAN OVERSIGHT

LTC Respiratory Surveillance Outbreak Summary

Section 6: Staff Information

Were any ill staff delivering resident care? Check yes or no.

- If yes, try to estimate the number of ill staff involved in resident care based on date when a staff member reported symptoms compared with the date when/if staff member was excused from work.

Did any staff seek medical attention for an acute respiratory infection at any time during the outbreak? Check yes or no.

- If yes, try to estimate the number of staff that sought medical attention based on self-report.

If available, indicate if ill staff received care at an emergency department (ED). Check yes or no and estimate number of staff.

If available, indicate if ill staff was hospitalized as a result of the outbreak illness. Check yes or no and estimate number of staff.

Section 7: Diagnostic and Laboratory Tests

Chest x-ray: Fill in the box (yes or no) indicating whether or not residents and staff had an x-ray done as a part of the diagnosis of the outbreak illness. If yes, please record the # of individuals who received chest x-ray and the # of x-rays that had abnormal findings consistent with the outbreak illness.

List all bacterial (e.g., *S. pneumoniae, Mycoplasma*); viral (e.g., Influenza, RSV) organisms that were identified through laboratory testing; Use the space provided by "Other" to specify if a parasite or non-infectious cause of respiratory illness was identified.

Diagnostic testing results: In the table, each row corresponds to an organism identified during the outbreak. Use the column to specify the type of testing used to identify each organism (either microbiologic culture, PCR (also known as nucleic acid amplification) or specify if a different diagnostic test was used (e.g., Legionella urinary antigen). For each test type, document the total number of residents and staff that received laboratory confirmation by that test.

Section 8: If Influenza Identified During Outbreak:

Antiviral Treatment: Fill in the box (yes or no) indicating whether or not antiviral treatment was offered. If antiviral treatment was offered, please record the total number of residents and staff that received treatment.

Antiviral Prophylaxis Offered: Fill in the box (yes or no) indicating whether or not antiviral prophylaxis was offered to any additional residents, staff or family members at risk for infection due to the outbreak. If antiviral prophylaxis was offered, please record the total number of residents and staff that received prophylaxis.

Section 9: Resident Outcome

Hospitalizations: During the outbreak, fill in the box (yes or no) indicating whether or not hospitalization was required for any residents. If yes, please record how many residents were hospitalized.

Deaths: During the outbreak, fill in the box (yes or no) indicating whether or not any residents died. If yes, please record how many residents died during the outbreak period (deaths should be recorded even if unable to determine if outbreak illness was the cause).

Section 10: Facility Outbreak Control Interventions

In this section, check if any of the infection control strategies listed were implemented at your facility in response to the outbreak. If a practice or policy change was implemented during the outbreak that is not listed (e.g., new cleaning/disinfecting products used, change to employee sick leave policy), specify in the space provided by "Other". For each strategy, record the date the change was implemented (if available).

Section 11: # of New Cases Per Day

Please fill in the chart with the number of new cases that are residents and staff per day. Once each day is complete, add the number of new cases of residents and staff and place the sum in total column for that corresponding day.

In the space provided under the chart, record the date which corresponds to Day 1 on the outbreak period (i.e., date of outbreak start).

For HD Use Only	
Facility Licensed by State: Fill in the box (yes or no) indicating whether or not the facility is licensed by the state.	**# of Licensed Beds:** Document the total number of licensed beds at the facility.
Facility Certified by CMS: Fill in the box (yes or no) indicating whether or not the facility is certified by the Center for Medicare and Medicaid Services (CMS).	**# of staff employees:** Document the total number of facility employed staff working in the facility at the time of the outbreak.
Facility Type: Check that box that best describes the type of care the facility provides: Nursing home, Intermediate Care Facility, Assisted living Facility or Other (specify).	**# of contract employees:** Document the total number of contract/consulting providers working in the facility at the time of the outbreak.

Vista CLINICAL

3/2/2020

In an effort to provide the best service to our clients and our patients, Vista Clinical is currently researching various options to initiate COVID-19 (novel Coronavirus) PCR testing in our Clermont laboratory. As of right now, widespread testing for COVID-19 is not being performed by the CDC or the local county and state health departments. Patients must meet certain criteria to be considered for testing.

If you have a patient that is exhibiting signs and symptoms of respiratory illness we suggest that they first be tested for the respiratory pathogens that cause the majority of respiratory infection.

Vista Clinical offers a respiratory pathogens panel by PCR that tests for 14 viruses and 3 bacteria that can cause respiratory illness. The specimen for this testing is: a nasopharyngeal swab in universal transport media (UTM).

The test to order is the Respiratory Pathogens Panel. Please write this test in the notes and additional tests section of the requisition.

If more testing is necessary, contact your local County Health Department and follow their specific guidelines and instructions. The following is a link to the latest information for healthcare providers regarding COVID-19 from the Florida State Health Department. http://www.floridahealth.gov/diseases-and-conditions/COVID-19/providers/index.html

If you have any questions, please call the laboratory at 352-536-9270.

Thank you.

Robin Johnson
Director of Laboratory Operations

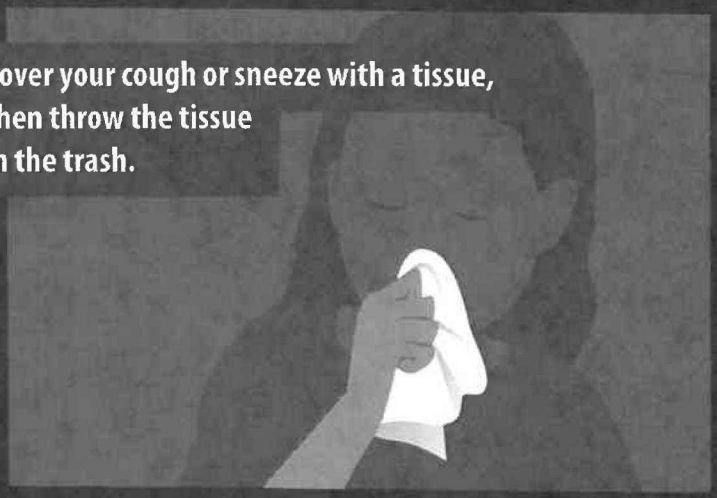
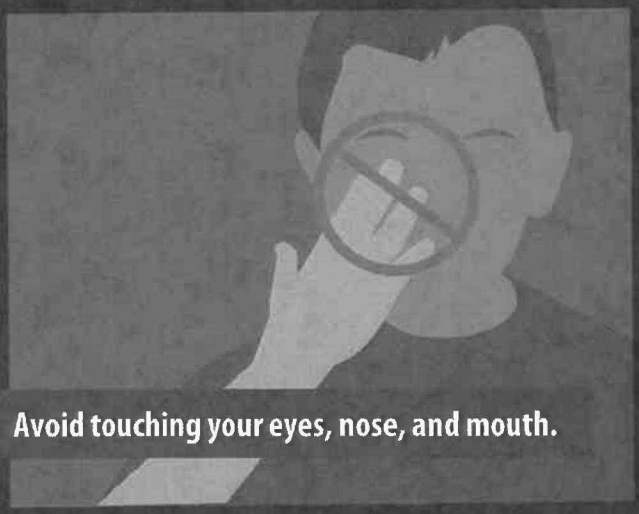
COVID 19
CORONAVIRUS DISEASE

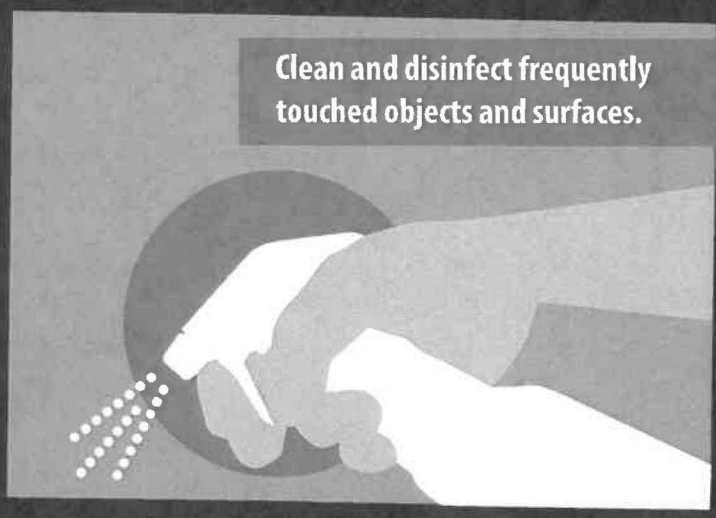


STOP THE SPREAD OF GERMS



Help prevent the spread of respiratory diseases like COVID-19.

Avoid close contact with people who are sick.



Cover your cough or sneeze with a tissue, then throw the tissue in the trash.

Avoid touching your eyes, nose, and mouth.

Clean and disinfect frequently touched objects and surfaces.

Stay home when you are sick, except to get medical care.

Wash your hands often with soap and water for at least 20 seconds.

For more information: **www.cdc.gov/COVID19**

FROM: Director
Quality, Safety & Oversight Group

SUBJECT: Guidance for Infection Control and Prevention of Coronavirus Disease 2019 (COVID-19) in nursing homes

Memorandum Summary

- ***CMS is committed*** to taking critical steps to ensure America's health care facilities and clinical laboratories are prepared to respond to the threat of the COVID-19.
- **Guidance for Infection Control and Prevention of COVID-19** - CMS is providing additional guidance to nursing homes to help them improve their infection control and prevention practices to prevent the transmission of COVID-19.
- **Coordination with the Centers for Disease Control (CDC) and local public health departments** - We encourage all nursing homes to monitor the CDC website for information and resources and contact their local health department when needed (CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html).

Background

CMS is responsible for ensuring the health and safety of nursing homes by enforcing the standards required to help each resident attain or maintain their highest level of well-being. In light of the recent spread of COVID-19, we're providing additional guidance to nursing homes to help control and prevent the spread of the virus.

Guidance

Facilities should monitor the CDC website for information and resources (links below). They should contact their local health department if they have questions or suspect a resident of a nursing home has COVID-19. Per CDC, prompt detection, triage and isolation of potentially infectious patients are essential to prevent unnecessary exposures among patients, healthcare personnel, and visitors at the facility. Therefore, facilities should continue to be vigilant in identifying any possible infected individuals. Facilities should consider frequent monitoring for potential symptoms of respiratory infection as needed throughout the day. Furthermore, we encourage facilities to take advantage of resources that have been made available by CDC and

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-001620

CMS to train and prepare staff to improve infection control and prevention practices. Lastly, facilities should maintain a person-centered approach to care. This includes communicating effectively with patients, patient representatives and/or their family, and understanding their individual needs and goals of care.

Facilities experiencing an increased number of respiratory illnesses (regardless of suspected etiology) among patients/residents or healthcare personnel should immediately contact their local or state health department for further guidance.

In addition to the overarching regulations and guidance, we're providing the following information (Frequently Asked Questions) about some specific areas related to COVID-19:

Guidance for Limiting the Transmission of COVID-19 for Nursing Homes

How should facilities monitor or limit visitors?
Facilities should screen visitors for the following:

1. International travel within the last 14 days to restricted countries. For updated information on restricted countries visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html
2. Signs or symptoms of a respiratory infection, such as a fever, cough, and sore throat.
3. Has had contact with someone with or under investigation for COVID-19.

If visitors meet the above criteria, facilities may restrict their entry to the facility. Regulations and guidance related to restricting a resident's right to visitors can be found at 42 CFR §483.10(f)(4), and at F-tag 563 of Appendix PP of the State Operations Manual. Specifically, a facility may need to restrict or limit visitation rights for reasonable clinical and safety reasons. This includes, "restrictions placed to prevent community-associated infection or communicable disease transmission to the resident. A resident's risk factors for infection (e.g., immunocompromised condition) or current health state (e.g., end-of-life care) should be considered when restricting visitors. In general, visitors with signs and symptoms of a transmissible infection (e.g., a visitor is febrile and exhibiting signs and symptoms of an influenza-like illness) should defer visitation until he or she is no longer potentially infectious (e.g., 24 hours after resolution of fever without antipyretic medication)."

How should facilities monitor or restrict health care facility staff?
The same screening performed for visitors should be performed for facility staff (numbers 1, 2, and 3 above).

- Health care providers (HCP) who have signs and symptoms of a respiratory infection should not report to work.
- Any staff that develop signs and symptoms of a respiratory infection while on-the-job, should:
    - Immediately stop work, put on a facemask, and self-isolate at home;
    - Inform the facility's infection preventionist, and include information on individuals, equipment, and locations the person came in contact with; and
    - Contact and follow the local health department recommendations for next steps (e.g., testing, locations for treatment).
- Refer to the CDC guidance for exposures that might warrant restricting asymptomatic healthcare personnel from reporting to work (https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html).

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-001621

Facilities should contact their local health department for questions, and frequently review the CDC website dedicated to COVID-19 for health care professionals (https://www.cdc.gov/coronavirus/2019-nCoV/hcp/index.html).

When should nursing homes consider transferring a resident with suspected or confirmed infection with COVID-19 to a hospital?

Nursing homes with residents suspected of having COVID-19 infection should contact their local health department. Residents infected with COVID-19 may vary in severity from lack of symptoms to mild or severe symptoms or fatality. Initially, symptoms maybe mild and not require transfer to a hospital as long as the facility can follow the infection prevention and control practices recommended by CDC. Facilities without an airborne infection isolation room (AIIR) are not required to transfer the patient assuming: 1) the patient does not require a higher level of care and 2) the facility can adhere to the rest of the infection prevention and control practices recommended for caring for a resident with COVID-19. (https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html)

The resident may develop more severe symptoms and require transfer to a hospital for a higher level of care. Prior to transfer, emergency medical services and the receiving facility should be alerted to the resident's diagnosis, and precautions to be taken including placing a facemask on the resident during transfer. If the patient does not require hospitalization they can be discharged to home (in consultation with state or local public health authorities) if deemed medically and socially appropriate. Pending transfer or discharge, place a facemask on the patient and isolate him/her in a room with the door closed.

When should a nursing home accept a resident who was diagnosed with COVID-19 from a hospital?

A nursing home can accept a patient diagnosed with COVID-19 and still under Transmission-based Precautions for COVID-19 as long as it can follow CDC guidance for transmission-based precautions. If a nursing home cannot, it must wait until these precautions are discontinued. CDC has released Interim Guidance for Discontinuing Transmission-Based Precautions or In-Home Isolation for Persons with Laboratory-confirmed COVID-19. Information on the duration of infectivity is limited, and the interim guidance has been developed with available information from similar coronaviruses. CDC states that decisions to discontinue Transmission-based Precautions in hospitals will be made on a case-by-case basis in consultation with clinicians, infection prevention and control specialists, and public health officials. Discontinuation will be based on multiple factors (see current CDC guidance for further details).

Note: Nursing homes should admit any individuals that they would normally admit to their facility, including individuals from hospitals where a case of COVID-19 was/is present.

Other considerations for facilities:

- Review CDC guidance for Infection Prevention and Control Recommendations for Patients with Confirmed Coronavirus Disease 2019: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html
- Increase the availability and accessibility of alcohol-based hand sanitizer (ABHS), tissues, no touch receptacles for disposal, and facemasks at healthcare facility entrances, waiting rooms, patient check-ins, etc.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-001622

- Ensure ABHS is accessible in all resident-care areas including inside and outside resident rooms.
- Increase signage for vigilant infection prevention, such as hand hygiene and cough etiquette.
- Properly clean, disinfect and limit sharing of medical equipment between residents and areas of the facility.
- Provide additional work supplies to avoid sharing (e.g., pens, pads) and disinfect workplace areas (nurse's stations, phones, internal radios, etc.).

What other resources are available for facilities to help improve infection control and prevention?
CMS urges providers to take advantage of several resources that are available:

CDC Resources:
- Infection preventionist training: https://www.cdc.gov/longtermcare/index.html
- CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html
- CDC Updates: https://www.cdc.gov/coronavirus/2019-ncov/whats-new-all.html
- CDC FAQ for COVID-19: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/infection-prevention-control-faq.html

CMS Resources:
- Long term care facility – Infection control self-assessment worksheet: https://qsep.cms.gov/data/252/A._NursingHome_InfectionControl_Worksheet11-8-19508.pdf
- Infection control toolkit for bedside licensed nurses and nurse aides ("Head to Toe Infection Prevention (H2T) Toolkit"): https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/SurveyCertificationGenInfo/LTC-CMP-Reinvestment
- Infection Control and Prevention regulations and guidance: 42 CFR 483.80, Appendix PP of the State Operations Manual. See F-tag 880: https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/GuidanceforLawsAndRegulations/Downloads/Appendix-PP-State-Operations-Manual.pdf

Contact: Email DNH_TriageTeam@cms.hhs.gov

Effective Date: Immediately. This policy should be communicated with all survey and certification staff, their managers and the State/Regional Office training coordinators immediately.

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

How it Spreads…

- **Person-to-person spread**
  - Between people who are in close contact with one another (within about 6 feet)
  - Through respiratory droplets produced when an infected person coughs or sneezes

******These droplets can land in the mouths or noses of people who are nearby or possibly by inhaled into the lungs***

- **Spread from contact with infected surfaces or objects**
  - It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads

FL-AHCA-20-0902-A-001628

AMERICAN OVERSIGHT

Symptoms

- May appear **2-14 days after exposure***
  - Fever
  - Cough
  - Shortness of breath

FL-AHCA-20-0902-A-001629

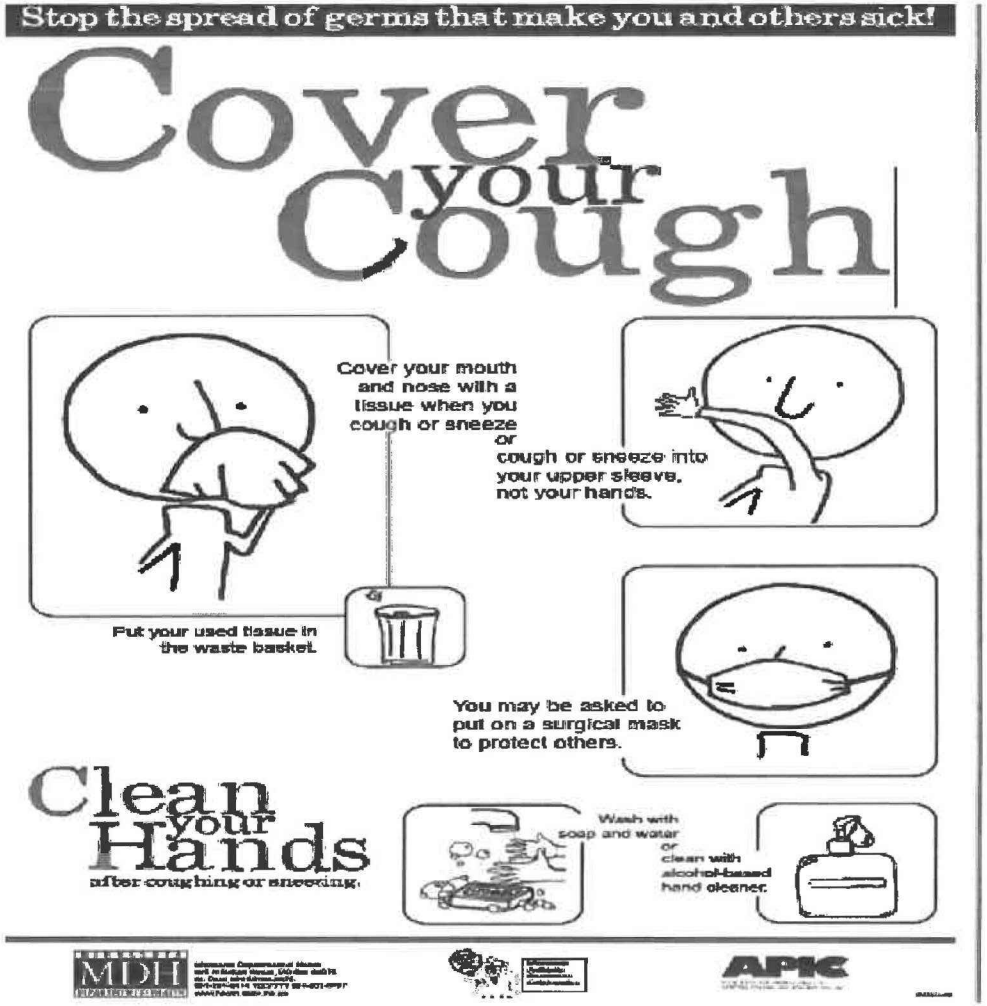
Treatment

There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19). The best way to prevent illness is to avoid being exposed to this virus. However, as a reminder, CDC always recommends everyday preventive actions to help prevent the spread of respiratory diseases, including.....

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

Prevention (cont..)



- Avoid close contact with people who are sick
- Avoid touching your eyes, nose, and mouth
- Stay home when you are sick
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash
- Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe

FL-AHCA-20-0902-A-001631

AMERICAN OVERSIGHT

Prevention (cont…) Cough Etiquette

FL-AHCA-20-0902-A-001632

Prevention (cont…)

- Follow CDC's recommendations for using a facemask
  - **CDC does not recommend that people who are well wear a facemask to protect themselves from respiratory diseases, including COVID-19**
  - Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings

AMERICAN OVERSIGHT

Prevention (cont…) - Hand Hygiene

FL-AHCA-20-0902-A-001634

AMERICAN OVERSIGHT

Prevention (cont…) – Hand Hygiene

- Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing
  - If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty

EDUCATION OVERVIEW

What is COVID-19 (Coronavirus)

- Centers for Disease Control & Prevention (CDC) and the World Health Organization (WHO) is responding to an outbreak of respiratory disease caused by a novel (new) coronavirus that was first detected in China and which has now been detected in 60 locations internationally, including in the United States
- The virus has been named "SARS-CoV-2" and the disease it causes has been named "coronavirus disease 2019" (abbreviated "COVID-19")

How Does it Spread...

- Person-to-person spread
  - Between people who are in close contact with one another (within about 6 feet).
  - Through respiratory droplets produced when an infected person coughs or sneezes

  ***These droplets can land in the mouths or noses of people who are nearby or possibly by inhaled into the lungs

- Spread from contact with infected surfaces or objects
  - It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads

Symptoms...

May appear **2-14 days after exposure***

- Fever
- Cough
- Shortness of breath

Prevention...

There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19). The best way to prevent illness is to avoid being exposed to this virus. However, as a reminder, CDC always recommends everyday preventive actions to help prevent the spread of respiratory diseases, including:

- Avoid close contact with people who are sick
- Avoid touching your eyes, nose, and mouth

This document has been created for internal use only by Risk Management, Corporate Compliance, and Quality Assurance Committees, and pursuant to legal instruction, for improvement and evaluation of resident safety, quality of care, processes, and services, as well as litigation.

AMERICAN OVERSIGHT

- Stay home when you are sick
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash
- Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe
- Follow CDC's recommendations for using a facemask
    - **CDC does not recommend that people who are well wear a facemask to protect themselves from respiratory diseases, including COVID-19**
    - Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings
- Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing
    - If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty

MARY C. MAYHEW
SECRETARY

Home | About Us | Medicaid | Licensure & Regulation | Report Fraud

The Agency for Health Care Administration would like to thank the Florida Health Care Association for working to develop a facility visitor screening toolkit that encompasses the most current Centers for Medicare and Medicaid Services (CMS) and Centers for Disease Control (CDC) guidelines. Ensuring all facilities are properly screening—and if necessary, restricting visitors—is of the upmost importance at this time. Although this guidance applies to nursing homes, many sections are appropriate for other facility types and should be followed where applicable.

The Agency is making this available as a resource to your facility. Please also review the recent memo from CMS outlining additional guidance to nursing homes to help them improve their infection control and prevention practices to prevent the transmission of COVID-19, including revised guidance for visitation: https://www.cms.gov/medicareprovider-enrollment-and-certificationsurveycertificationgeninfopolicy-and/qso-20-14-nh.pdf.

This visitor screening toolkit contains:

- COVID-19 (Respiratory) Checklist
- Sample Letter to Residents, Families and Visitors on Screening Protocol
- Sample Communication to Vendors or Business Partners
- COVID-19 Screener Competency Checklist
- Visitor Screening Tool
- Screener Sign-In Form
- Sample Letter to Employees
- Employee Screening Tool
- Signage from the CDC, including handwashing signage
- Sample signage for visitor screening protocols

AMERICAN OVERSIGHT

The toolkit can be found here:
https://www.fhca.org/images/uploads/pdf/FHCACOVIDVisitorScreeningToolkit.pdf

The Agency recognizes that facilities need to be overly cautious at this time to protect their patients and residents. Comprehensive screenings may include temperature taking and restricting visitors if necessary.

The Agency for Health Care Administration is committed to better health care for all Floridians. The Agency administers Florida's Medicaid program, licenses and regulates more than 44,000 health care facilities and 53 health plans, and publishes health care data and statistics at www.FloridaHealthFinder.gov. Additional information about Agency initiatives is available via Facebook (AHCAFlorida), Twitter (@AHCA_FL) and YouTube (/AHCAFlorida).

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

Facility Guidance on Visitor Screenings, Transfer Protocol, Facility Usage, and COVID-19 Patient Screenings

The Agency for Health Care Administration (AHCA) understands that the public health emergency regarding COVID-19 is a rapidly evolving situation. AHCA will continue to provide information and guidance to facilities from the CDC, CMS and Florida DOH.

Transfer Protocol

With recent reports of alarming potential infection rates of 55 percent or more in long-term care facilities and a potential fatality rate of nearly 20 percent, it is imperative that nursing homes and other long-term care residential providers which are unable to comply with CDC guidance for standard infection precautions for COVID-19 transmission (this includes negative pressure rooms and skilled use of N95 masks) should seek transfer individuals who fits criteria for testing or who have tested positive.

To accept a patient who is being discharged, long-term care residential providers may work to request testing of anyone that meets the criteria of being at risk of COVID-19.

Visitor Screening

Nursing homes, assisted living facilities, adult family-care homes, long-term care facilities and adult group homes: Per the recent emergency order, these facilities have specific and comprehensive screening criteria such as restricting access to individuals who have traveled internationally or on a cruise in the last 14 days, have respiratory illness symptoms or reside in community with community spread of COVID-19.

Broward County Nursing homes, ALFs, adult family-care homes, long-term care facilities and adult group homes: As of Friday, March 13, these facilities in Broward County should completely restrict visitors until further notice.

*** Residents of assisted living facilities should be screened if they return from leaving the campus. If they cannot pass the screening requirement, these residents should not be allowed back in the facility.*

Hospitals: The CDC recommends screening patients and visitors for symptoms of acute respiratory illness (e.g., fever, cough, difficulty breathing) before entering your healthcare facility. To achieve this, facilities must dedicate staff to these screenings and may need to restrict entrances.

AMERICAN OVERSIGHT

PPE Supplies

If your facility is unable to source adequate supplies of PPE through your normal supply chain, please reach out to your local emergency operations center.

Facility Space Usage

During a state of emergency, facilities are permitted to utilize space as seen fit to safeguard the lives of patients, staff, and visitors.

- This includes using spaces for patient care that may not have been designed and approved for such uses where approved facilities are not available due to surge in patients.
- Each facility is responsible for using the existing spaces and systems to the best of their ability to provide the appropriate level care and safety for patients.

Patient Screening at Alternative Site

Per CMS, hospitals may set up alternative screening sites on campus or at off-campus, hospital-controlled sites. The Florida Division of Emergency Management and local EOCs will be helping to coordinate and support efforts to stand up alternative screening sites.

- Additionally, communities may set up screening clinics at sites not under the control of a hospital.
- Screenings do not have to take place in the emergency department but must always be completed by qualified personnel with appropriate personal protective equipment.
- To review the full guidance from CMS, please see this link: https://www.cms.gov/files/document/qso-20-15-hospitalcahemtala.pdf

Across the Board AHCA Licensure Extensions for 90 Days

Increased Federal Flexibility

AMERICAN OVERSIGHT

Facility Guidance on Visitor Restrictions, Transfer Protocol, Hospital Facility Usage, and COVID-19 Patient Screenings

The Agency for Health Care Administration (AHCA) understands that the public health emergency regarding COVID-19 is a rapidly evolving situation. AHCA will continue to provide information and guidance to facilities from the CDC, CMS and Florida DOH.

Transfer Protocol

With recent reports of alarming potential infection and fatality rates, it is imperative that nursing homes and other long-term care residential providers which are unable to comply with CDC guidance for standard infection precautions for COVID-19 transmission, especially negative pressure rooms and skilled use of N95 masks, should seek transfer of individuals who fit criteria for testing or who have tested positive to facilities that can comply with these infection control requirements.

To accept any patient who is being discharged from a hospital, long-term care residential providers are encouraged to work with hospital clinicians to test through a private or hospital-certified laboratory for COVID-19 of this high-risk population.

LTC to Hospital Transfer Form: <<link>>
Hospital to LTC Transfer Form:
https://www.fhca.org/images/uploads/pdf/COVID_post_acute_transfer_FINAL_3_15_20.pdf

Visitor Restrictions and Screening

Long-term care and residential providers: Per the recent emergency order, these facilities must restrict all visitors except for narrow circumstances listed in the order: Nursing homes, assisted living facilities, group home facilities, developmental disabilities centers, homes for special services, long-term care hospitals, transitional living facilities, intermediate care facilities for the developmentally disabled, adult mental health and treatment facilities, adult forensic facilities, civil facilities, and adult family care homes

***Please note, the facility must discourage residents from leaving the facility. Residents returning to the facility will be screened for the above criteria before allowed reentry.*

Hospitals: The CDC recommends hospitals screen patients and visitors for symptoms of acute respiratory illness (e.g., fever, cough, difficulty breathing) before entering your health care facility. To achieve this, facilities must dedicate staff to these screenings and may need to restrict entrances.

AMERICAN OVERSIGHT

PPE Supplies

If your facility is unable to source adequate supplies of PPE through your normal supply chain, please coordinate with your local emergency operations center based upon any anticipated supply shortages.

Hospital Space Usage

During a state of emergency, hospitals have greater flexibility to utilize space as appropriate to care for patients.

- This includes using spaces for patient care that may not have been designed and approved for such uses.
- Each facility is responsible for using the existing spaces and systems to the best of their ability to provide the appropriate level care and safety for patients.

Patient Screening at Alternative Site

The Florida Division of Emergency Management and local EOCs will be helping to coordinate and support efforts to stand up alternative screening sites.

Across the Board AHCA Licensure Extensions for 90 Days

AHCA will be granting a 90-day extension to all licenses for health care providers and regulated facilities.

Waiver of Out of State Licenses for Health Care Professionals

A recent Emergency Order by the State Surgeon General states that health care professionals, advanced life professionals, and basic life support professionals not licensed to practice in Florida may provide care in Florida for thirty days, unless extended by the Surgeon General. Additionally, telehealth services may be rendered to patients in Florida by physicians, osteopathic physicians, physician assistants, and advanced practice registered nurses not licensed in Florida. Further, physicians, osteopathic physicians, physician assistants, and advanced practice registered nurses licensed in Florida may renew a prescription for a controlled substance for existing patients without the need to conduct a physical exam.

Increased Federal Flexibility

To take full advantage of the flexibilities provided through the declaration by President Trump of a national state of an emergency, AHCA will eliminate regulatory barriers that may delay critical health care response.

AMERICAN OVERSIGHT

- The Florida Medicaid Program released waiver guidance such as removing limits on services for Medicaid recipients diagnosed with COVID-19; eliminating prior authorization requirements hospital services, physician services, advanced practice registered nursing services, home health services, and durable medical equipment and supplies; and allowing for payment for medically necessary services provided to recipients diagnosed with COVID-19, regardless of whether the provider is located in-state or out-of-state.
- The full Florida Medicaid Health Care Alert is available here: <<insert link>>
- CMS has issued a set of blanket waivers that states may utilize in response to COVID-19.
- The Agency has already received authority for many of these waivers related to health care facilities and licensure requirements, and we are actively working to receive the federal authority needed for many of the items listed in this alert related to the Medicaid program. For a full list of the blanket waivers issued by CMS, click on this link: https://www.cms.gov/files/document/covid19-emergency-declaration-health-care-providers-fact-sheet.pdf.

Subject: March 13, 2020: Memo Release: (REVISED) Guidance for Infection Control and Prevention of Coronavirus Disease 2019 (COVID-19) in Nursing Homes

CMS memo issued March 13, 2020, QSO-20-14-NH
Revised guidance for nursing home visitation/ access

Short bullets:

- Only end of life (EOL)/compassionate care visitors may enter the facility if they meet screening and wear a mask
- Health care workers who enter (hospice, EMS, etc) must meet CDC guidelines
- Comment on surveyors (see quote below) – Must allow surveyors in (meeting screening requirements)- Wear PPE per CDC guidelines when entering a facility with COVID cases
- Facilities should cancel communal dining and group activities, take staff temps, proactively communicate visitor restrictions, and restrict ombudsman (except EOL) but enable communication.

Long bullets:

Surveyors:
"CMS and state survey agencies are constantly evaluating their surveyors to ensure they don't pose a transmission risk when entering a facility. For example, surveyors may have been in a facility with COVID-19

AMERICAN OVERSIGHT

cases in the previous 14 days, but because they were wearing PPE effectively per CDC guidelines, they pose a low risk to of transmission in the next facility, and must be allowed to enter. However, there are circumstances under which surveyors should still not enter, such as if they have a fever."

Visitors:

- Facilities SHOULD restrict all visitors and non-essential health care personnel, except for certain compassionate care situations, eg: end of life (EOL).
- For these compassionate care visits (permitted visitors):
    - Visitors will be limited to a specific room only
    - Facilities should require visitors to perform hand hygiene frequently
    - Must wear a face mask
- Decisions about visits for EOL should be made case-by-case and include careful screening of visitors for fever and respiratory symptoms.
- Permitted visitors must wear a face mask and limit
- Facilities are expected to notify potential visitors with signs, calls, letters, etc.
- If a state implements stricter requirements, (such as through a Governor's order) a facility will not be considered out of compliance with federal visitation requirements.

Health care workers:

- Follow CDC guidelines for restricting access
- Including hospice, EMS, dialysis techs that provide care to residents
- Health care workers should be permitted to enter the facility as long as they meet CDC guidelines
- Facilities should contact their local county health department for questions and review CDC guidelines.

Additional guidance:

- Adds practices facilities should implement such as cancelling communal dining and group activities
- Actively screen residents and staff for fever and respiratory symptom
- Remind residents of social distancing and hand hygiene
- Take staff temperature and document absence of SOB, new of change in cough/sore throat. If they are ill, have them put on a face mask and self-isolate at home.
- Identify staff that work at multiple facilities (e.g., agency staff, regional or corporate staff, etc.) and actively screen and restrict them appropriately
- Residents still have the right to access the Ombudsman program - Their access should be restricted per the guidance above (except in compassionate care situations), however, facilities may review this on a case by case basis. If in-person access is not available due to infection control concerns, facilities need to facilitate resident communication (by phone or other format).
- Advise visitors, and any individuals who entered the facility (e.g., hospice staff), to monitor for signs and symptoms of respiratory infection for at least 14 days after exiting the facility. If symptoms occur, advise them to self-isolate at home, contact their healthcare provider, and immediately notify the facility of the date they were in the facility, the individuals they were in contact with, and the locations within the facility they visited. Facilities should immediately screen the individuals of reported contact, and take all necessary actions based on findings.

SUBJECT: Guidance for Infection Control and Prevention of Coronavirus Disease 2019 (COVID-19) in Nursing Homes ***(REVISED)***

Memorandum Summary

- ***CMS is committed*** to taking critical steps to ensure America's health care facilities and clinical laboratories are prepared to respond to the threat of the COVID-19.
- **Guidance for Infection Control and Prevention of COVID-19 -** CMS is providing additional guidance to nursing homes to help them improve their infection control and prevention practices to prevent the transmission of COVID-19, *including revised guidance for visitation*.
- **Coordination with the Centers for Disease Control (CDC) and local public health departments -** We encourage all nursing homes to monitor the CDC website for information and resources and contact their local health department when needed (CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html).

Background

The Centers for Medicare & Medicaid Services (CMS) is responsible for ensuring the health and safety of nursing home residents by enforcing the standards required to help each resident attain or maintain their highest level of well-being. In light of the recent spread of COVID-19, we are providing additional guidance to nursing homes to help control and prevent the spread of the virus.

Guidance

Facility staff should regularly monitor the CDC website for information and resources (links below). They should contact their local health department if they have questions or suspect a resident of a nursing home has COVID-19. Per CDC, prompt detection, triage and isolation of potentially infectious residents are essential to prevent unnecessary exposures among residents, healthcare personnel, and visitors at the facility. Therefore, facilities should continue to be vigilant in identifying any possible infected individuals. Facilities should consider frequent

AMERICAN OVERSIGHT

monitoring for potential symptoms of respiratory infection as needed throughout the day. Furthermore, we encourage facilities to take advantage of resources that have been made available by CDC and CMS to train and prepare staff to improve infection control and prevention practices. Lastly, facilities should maintain a person-centered approach to care. This includes communicating effectively with residents, resident representatives and/or their family, and understanding their individual needs and goals of care.

Facilities experiencing an increased number of respiratory illnesses (regardless of suspected etiology) among patients/residents or healthcare personnel should immediately contact their local or state health department for further guidance.

In addition to the overarching regulations and guidance, we're providing the following information about some specific areas related to COVID-19:

Guidance for Limiting the Transmission of COVID-19 for Nursing Homes

For ALL facilities nationwide:
Facilities should ***restrict*** *visitation of* ***all*** *visitors and non-essential health care personnel, except for certain compassionate care situations, such as an end-of-life situation. In those cases, visitors will be limited to a specific room only. Facilities are expected to notify potential visitors to defer visitation until further notice (through signage, calls, letters, etc.). Note: If a state implements actions that exceed CMS requirements, such as a ban on all visitation through a governor's executive order, a facility would not be out of compliance with CMS' requirements. In this case, surveyors would still enter the facility, but not cite for noncompliance with visitation requirements.*

For individuals that enter in compassionate situations (e.g., end-of-life care), facilities should require visitors to perform hand hygiene and use Personal Protective Equipment (PPE), such as facemasks. Decisions about visitation during an end of life situation should be made on a case by case basis, which should include careful screening of the visitor (including clergy, bereavement counselors, etc.) for fever or respiratory symptoms. Those with symptoms of a respiratory infection (fever, cough, shortness of breath, or sore throat) should not be permitted to enter the facility at any time (even in end-of-life situations). Those visitors that are permitted, must wear a facemask while in the building and restrict their visit to the resident's room or other location designated by the facility. They should also be reminded to frequently perform hand hygiene.

Exceptions to restrictions:

- *Health care workers: Facilities should follow CDC guidelines for restricting access to health care workers found at https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html. This also applies to other health care workers, such as hospice workers, EMS personnel, or dialysis technicians, that provide care to residents. They should be permitted to come into the facility as long as they meet the CDC guidelines for health care workers. Facilities should contact their local health department for questions, and frequently review the CDC website dedicated to COVID-19 for health care professionals (https://www.cdc.gov/coronavirus/2019-nCoV/hcp/index.html).*
- *Surveyors: CMS and state survey agencies are constantly evaluating their surveyors to ensure they don't pose a transmission risk when entering a facility. For example, surveyors may have been in a facility with COVID-19 cases in the previous 14 days, but because they were wearing PPE effectively per CDC guidelines, they pose a low risk to*

AMERICAN OVERSIGHT

transmission in the next facility, and must be allowed to enter. However, there are circumstances under which surveyors should still not enter, such as if they have a fever.

Additional guidance:

1. *Cancel communal dining and all group activities, such as internal and external group activities.*
2. *Implement active screening of residents and staff for fever and respiratory symptoms.*
3. *Remind residents to practice social distancing and perform frequent hand hygiene.*
4. *Screen all staff at the beginning of their shift for fever and respiratory symptoms. Actively take their temperature and document absence of shortness of breath, new or change in cough, and sore throat. If they are ill, have them put on a facemask and self-isolate at home.*
5. *For individuals allowed in the facility (e.g., in end-of-life situations), provide instruction, before visitors enter the facility and residents' rooms, provide instruction on hand hygiene, limiting surfaces touched, and use of PPE according to current facility policy while in the resident's room. Individuals with fevers, other symptoms of COVID-19, or unable to demonstrate proper use of infection control techniques should be restricted from entry. Facilities should communicate through multiple means to inform individuals and non-essential health care personnel of the visitation restrictions, such as through signage at entrances/exits, letters, emails, phone calls, and recorded messages for receiving calls.*
6. *Facilities should identify staff that work at multiple facilities (e.g., agency staff, regional or corporate staff, etc.) and actively screen and restrict them appropriately to ensure they do not place individuals in the facility at risk for COVID-19.*
7. *Facilities should review and revise how they interact vendors and receiving supplies, agency staff, EMS personnel and equipment, transportation providers (e.g., when taking residents to offsite appointments, etc.), and other non-health care providers (e.g., food delivery, etc.), and take necessary actions to prevent any potential transmission. For example, do not have supply vendors transport supplies inside the facility. Have them dropped off at a dedicated location (e.g., loading dock). Facilities can allow entry of these visitors if needed, as long as they are following the appropriate CDC guidelines for Transmission-Based Precautions.*
8. *In lieu of visits, facilities should consider:*
    a) *Offering alternative means of communication for people who would otherwise visit, such as virtual communications (phone, video-communication, etc.).*
    b) *Creating/increasing listserv communication to update families, such as advising to not visit.*
    c) *Assigning staff as primary contact to families for inbound calls, and conduct regular outbound calls to keep families up to date.*
    d) *Offering a phone line with a voice recording updated at set times (e.g., daily) with the facility's general operating status, such as when it is safe to resume visits.*
9. *When visitation is necessary or allowable (e.g., in end-of-life scenarios), facilities should make efforts to allow for safe visitation for residents and loved ones. For example:*
    a) *Suggest refraining from physical contact with residents and others while in the facility. For example, practice social distances with no hand-shaking or hugging, and remaining six feet apart.*
    b) *If possible (e.g., pending design of building), creating dedicated visiting areas (e.g., "clean rooms") near the entrance to the facility where residents can meet with*

AMERICAN OVERSIGHT

visitors in a sanitized environment. Facilities should disinfect rooms after each resident-visitor meeting.

c) *Residents still have the right to access the Ombudsman program. Their access should be restricted per the guidance above (except in compassionate care situations), however, facilities may review this on a case by case basis. If in-person access is not available due to infection control concerns, facilities need to facilitate resident communication (by phone or other format) with the Ombudsman program or any other entity listed in 42 CFR § 483.10(f)(4)(i).*

10. *Advise visitors, and any individuals who entered the facility (e.g., hospice staff), to monitor for signs and symptoms of respiratory infection for at least 14 days after exiting the facility. If symptoms occur, advise them to self-isolate at home, contact their healthcare provider, and immediately notify the facility of the date they were in the facility, the individuals they were in contact with, and the locations within the facility they visited. Facilities should immediately screen the individuals of reported contact, and take all necessary actions based on findings.*

When should nursing homes consider transferring a resident with suspected or confirmed infection with COVID-19 to a hospital?

Nursing homes with residents suspected of having COVID-19 infection should contact their local health department. Residents infected with COVID-19 may vary in severity from lack of symptoms to mild or severe symptoms or fatality. Initially, symptoms may be mild and not require transfer to a hospital as long as the facility can follow the infection prevention and control practices recommended by CDC. Facilities without an airborne infection isolation room (AIIR) are not required to transfer the resident assuming: 1) the resident does not require a higher level of care and 2) the facility can adhere to the rest of the infection prevention and control practices recommended for caring for a resident with COVID-19.

Please check the following link regularly for critical updates, such as updates to guidance for using PPE: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html.

The resident may develop more severe symptoms and require transfer to a hospital for a higher level of care. Prior to transfer, emergency medical services and the receiving facility should be alerted to the resident's diagnosis, and precautions to be taken including placing a facemask on the resident during transfer. If the resident does not require hospitalization they can be discharged to home (in consultation with state or local public health authorities) if deemed medically and socially appropriate. Pending transfer or discharge, place a facemask on the resident and isolate him/her in a room with the door closed.

When should a nursing home accept a resident who was diagnosed with COVID-19 from a hospital?

A nursing home can accept a resident diagnosed with COVID-19 and still under Transmission-Based Precautions for COVID-19 as long as the facility can follow CDC guidance for Transmission-Based Precautions. If a nursing home cannot, it must wait until these precautions are discontinued. CDC has released Interim Guidance for Discontinuing Transmission-Based Precautions or In-Home Isolation for Persons with Laboratory-confirmed COVID-19. Information on the duration of infectivity is limited, and the interim guidance has been

AMERICAN OVERSIGHT

developed with available information from similar coronaviruses. CDC states that decisions to discontinue Transmission-based Precautions in hospitals will be made on a case-by-case basis in consultation with clinicians, infection prevention and control specialists, and public health officials. Discontinuation will be based on multiple factors (see current CDC guidance for further details).

Note: Nursing homes should admit any individuals that they would normally admit to their facility, including individuals from hospitals where a case of COVID-19 was/is present. Also, if possible, dedicate a unit/wing exclusively for any residents coming or returning from the hospital. This can serve as a step-down unit where they remain for 14 days with no symptoms (instead of integrating as usual on short-term rehab floor, or returning to long-stay original room).

Other considerations for facilities:

- Review CDC guidance for Infection Prevention and Control Recommendations for Patients with Confirmed Coronavirus Disease 2019: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html
- Increase the availability and accessibility of alcohol-based hand rubs (ABHRs), *reinforce strong hand-hygiene practices,* tissues, no touch receptacles for disposal, and facemasks at healthcare facility entrances, waiting rooms, resident check-ins, etc.
    - Ensure ABHR is accessible in all resident-care areas including inside and outside resident rooms.
- Increase signage for vigilant infection prevention, such as hand hygiene and cough etiquette.
- Properly clean, disinfect and limit sharing of medical equipment between residents and areas of the facility.
- Provide additional work supplies to avoid sharing (e.g., pens, pads) and disinfect workplace areas (nurse's stations, phones, internal radios, etc.).

Will nursing homes be cited for not having the appropriate supplies?
CMS is aware of that there is a scarcity of some supplies in certain areas of the country. State and Federal surveyors should not cite facilities for not having certain supplies (e.g., PPE such as gowns, N95 respirators, surgical masks and ABHR) if they are having difficulty obtaining these supplies for reasons outside of their control. However, we do expect facilities to take actions to mitigate any resource shortages and show they are taking all appropriate steps to obtain the necessary supplies as soon as possible. For example, if there is a shortage of ABHR, we expect staff to practice effective hand washing with soap and water. Similarly, if there is a shortage of PPE (e.g., due to supplier(s) shortage which may be a regional or national issue), the facility should contact the local and state public health agency to notify them of the shortage, follow national guidelines for optimizing their current supply, or identify the next best option to care for residents. If a surveyor believes a facility should be cited for not having or providing the necessary supplies, the state agency should contact the CMS Branch Office.

What other resources are available for facilities to help improve infection control and prevention?
CMS urges providers to take advantage of several resources that are available:

AMERICAN OVERSIGHT

CDC Resources:

- Infection preventionist training: https://www.cdc.gov/longtermcare/index.html
- CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html
- CDC Updates: https://www.cdc.gov/coronavirus/2019-ncov/whats-new-all.html
- CDC FAQ for COVID-19: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/infection-prevention-control-faq.html
- *Information on affected US locations: https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html*

CMS Resources:

- Guidance for use of Certain Industrial Respirators by Health Care Personnel: https://www.cms.gov/files/document/qso-20-17-all.pdf
- Long term care facility – Infection control self-assessment worksheet: https://qsep.cms.gov/data/252/A._NursingHome_InfectionControl_Worksheet11-8-19508.pdf
- Infection control toolkit for bedside licensed nurses and nurse aides ("Head to Toe Infection Prevention (H2T) Toolkit"): https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/SurveyCertificationGenInfo/LTC-CMP-Reinvestment
- Infection Control and Prevention regulations and guidance: 42 CFR 483.80, Appendix PP of the State Operations Manual. See F-tag 880: https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/GuidanceforLawsAndRegulations/Downloads/Appendix-PP-State-Operations-Manual.pdf

Contact: Email DNH_TriageTeam@cms.hhs.gov

NOTE: The situation regarding COVID-19 is still evolving worldwide and can change rapidly. Stakeholders should be prepared for guidance from CMS and other agencies (e.g., CDC) to change. Please monitor the relevant sources regularly for updates.

Effective Date: Immediately. This policy should be communicated with all survey and certification staff, their managers and the State/Regional Office training coordinators immediately.

/s/

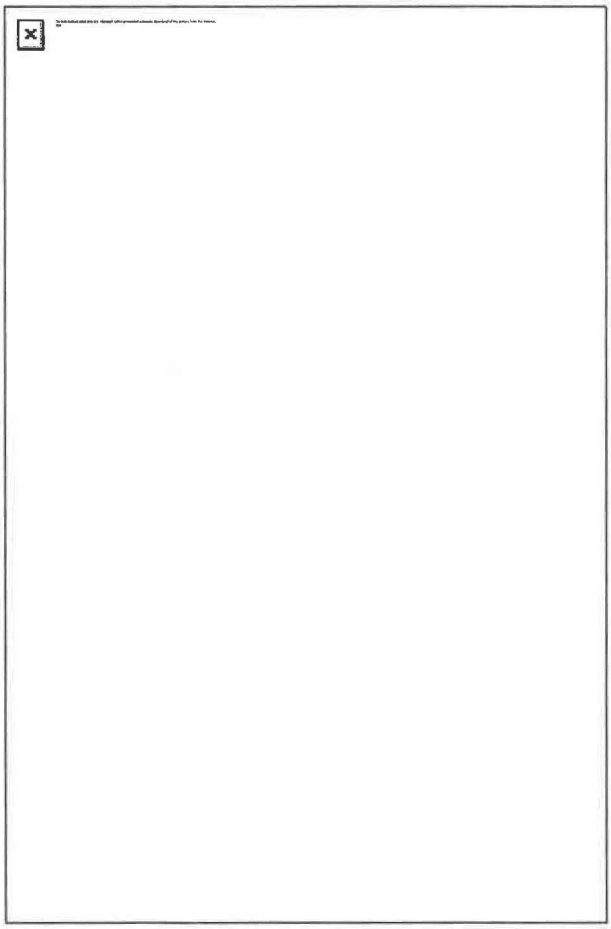
Subject: Response to COVID-19



AMERICAN OVERSIGHT

Dear Team,

As you may know, on Sunday, Governor DeSantis issued Executive Order 20-51, declaring a Public Health Emergency and establishing Florida's Response Protocol for Coronavirus Disease (COVID-19). Given that there have been two confirmed cases of COVID-19 in Florida, I urge you to be vigilant and take the necessary precautions to maintain your health and the health of those around you – including your colleagues and the vulnerable children or adults you all serve.

The Florida Department of Health (DOH) has been closely monitoring COVID-19 since November 2019, and the agency recently launched a website to share updates and helpful resources about the virus. The website also directs visitors to the Centers for Disease Control and Prevention (CDC) for more information and preventative measures, including guidelines for childcare program administrators.

Please ensure that you strictly follow these guidelines and preventative measures in the workplace and in the field, including washing your hands often and going or staying home when you feel sick.

AMERICAN OVERSIGHT

If you are requesting to go or stay home because you feel sick, you need to communicate with your supervisor and/or follow your standard operational chain of command for approval of personal leave (at this time, administrative leave is not authorized). If you are well enough to work, but believe you should stay home because of an undocumented concern that you might be contagious, you may be eligible to work from home for a temporary period – please discuss your eligibility with your supervisor, who will confer with management.

Supervisors, while you are not qualified to make a medical diagnosis, if you notice that a direct report is displaying symptoms of being sick – fever, sneezing, coughing, etc. – immediately consult with your management team about sending him or her home. To be clear, with the severity of COVID-19, it is unacceptable for someone who is or may be sick to be working.

It should also be noted, if a child or adult in your care has a suspected case of COVID-19, you must follow the protocol that is currently in place with all health care providers and practitioners, intended to contain and stop transmission of the virus. First, immediately contact your county health department or a local hospital – any hospital is equipped to handle COVID-19 – to review his or her symptoms and travel history. Then, the individual can be evaluated at the hospital, and tests will be sent to the CDC for further review.

While it is important to be aware of COVID-19, if you are healthy and taking good care of yourself, it should not prevent you from working to fulfill our shared mission: Protecting the vulnerable. To that end, until further notice, all frontline staff – such as child or adult protective investigators – are to ask the following questions prior to coming into direct contact with a potentially contagious individual or entering a home where COVID-19 may be present:

- Is anyone in your household sick, feverish, or experiencing ongoing coughing or sneezing?
- Has anyone in your household come into contact with someone who is sick, feverish, or experiencing ongoing coughing or sneezing?
- Has anyone in your household traveled outside the United States in the last three weeks?
    - *Currently, affected foreign countries include China, Iran, Italy, Japan, and South Korea.*

If the answer to any of these questions is "yes" and/or you have concerns regarding the prevalence of COVID-19 symptoms, you should try to limit physical contact, wear protective clothing (gloves), and be sure to wash your hands and sanitize any other exposed surfaces.

Additionally, all offices and facilities should continue with regular, thorough cleaning practices; display signage noting the importance of good hygiene; and be cognizant of current visitation policies, making necessary updates to limit the introduction of the virus.

Please be assured that Florida is doing everything in its power to prepare and respond to COVID-19 and the Department of Children and Families (DCF) will be available to assist as needed. Daily updates will be posted on the DOH website, and I will provide more information as I receive it.

In the meantime, if you or those you serve have any other questions pertaining to COVID-19 in Florida, please contact DOH's COVID-19 Call Center by calling 1-866-779-6121 or emailing COVID-19@flhealth.gov.

Thank you for your attention to this important matter.

God Bless,

Chad Poppell

Secretary

Communications Office
NewsMedia@flhealth.gov
(850) 245-4111

TALLAHASSEE — The Florida Department of Health is responding to COVID-19. In an effort to keep Florida residents and visitors safe and aware about the status of the virus, the Department is issuing regular updates as information becomes available. The Department will be sending this press release update every morning, seven days per week.

International Travel Advisory

The Florida Department of Health is advising all individuals who have traveled internationally to self-isolate for 14 days following their date of return to the United States.

Nile Cruise Advisory

The Florida Department of Health is advising all individuals who traveled on a river cruise on the Nile River in Egypt in February 2020 to self-isolate for 14 days following their date of return to the United States. Several passengers in the United States recently developed symptoms and have been confirmed to be infected with coronavirus disease 2019 (COVID-19), including two positive cases in Florida.

AMERICAN OVERSIGHT

COVID-19 Cases

Florida Residents Diagnosed in Florida				
	County	**Age**	**Sex**	**Known History of International Travel**
1	**Manatee**	**63**	**Male**	**No**
2	**Hillsborough**	**29**	**Female**	**Yes**

12	**Broward**	**67**	**Male**	**No**

COVID-19 Testing Results

- 18 Florida cases (17 Florida residents)
  - 12 diagnosed in Florida
  - 5 diagnosed and isolated in another state
  - 1 confirmed positive non-Florida resident isolated in Florida.
- 115 tests in state results pending
- 140 negatives
- 1,104 people monitored to date
- 302 of 1,104 are currently being monitored

People who have tested positive for COVID-19 will remain in isolation until they test negative.

COVID Public Website and Call Center

Please visit the Department's dedicated COVID-19 webpage for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-(866) 779-6121. The Call Center is available 24 hours a day**. Inquiries may also be emailed to **COVID-19@flhealth.gov**.

Department Activities

AMERICAN OVERSIGHT

- Governor Ron DeSantis issued an Executive Order directing the State Surgeon General to declare a public health emergency.
- State Surgeon General Dr. Scott Rivkees declared a public health emergency for the novel coronavirus in Florida.
- Established an incident management team to coordinate response operations.
- Activated a dedicated incident command post for on-site response activities.
- Conducted three public health and healthcare stakeholders conference calls to provide statewide updates on the current outbreak situation, response actions, and guidance for pandemic planning. Over five hundred participants joined the calls. Calls are scheduled for each Wednesday at 2:00 EST.
- Participated with the Agency for Health Care Administration (AHCA) on statewide conference calls with nursing homes, assisted living facilities, and hospitals.
- Established a public call-center for questions regarding COVID-19.
- Developed and distributed the communications approved COVID-19 Presentation to CHDs for use at community meetings.
- Developed and implemented protocols for investigation, surveillance and monitoring for COVID-19 to rapidly detect and contain cases.
- Established mechanisms for on-going monitoring and coordination with the Centers for Disease Control and Prevention (CDC) regarding epidemiological activities.
- Distributed CDC Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings to County Health Departments
- Distributed the updated Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease and a healthcare provider letter regarding Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19) to associations, licensed providers, Health Care Coalitions (HCCs) and County Health Departments (CHD).
- Implemented testing at all three State Public health Laboratories.
- Distributed updated CDC guidance for schools to CHDs and the Department of Education.
- Distributed updated Laboratory Guidance regarding implementation of testing at State Public Health Laboratories.

What you Should Know

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from COVID-19 without needing special treatment. The elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to the virus. The Department recommends everyday preventive actions to help stop the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;
- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and

AMERICAN OVERSIGHT

- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local county health department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the county health department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

About the Florida Department of Health

The Florida Department of Health, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Follow us on Facebook, Instagram and Twitter at @HealthyFla. For more information please visit www.FloridaHealth.gov.

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

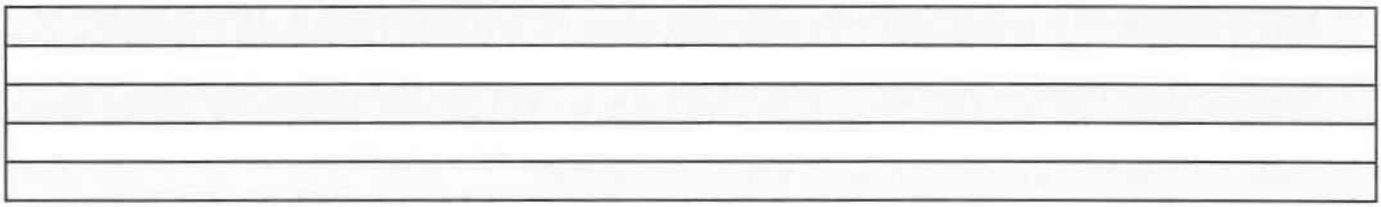
Detail
* Clarified that in jurisdictions without sustained community transmission, decisions for public health action should be based priorities of public health authorities (e.g., surveillance, contact tracing)., In jurisdictions with sustained community transmission, travelers and other potentially exposed individuals should follow local guidance. Also provided a rationale for these changes. * Updated definitions for self-observation, self-monitoring, and self-monitoring with public health supervision * Provided exposure risk definitions and recommended management for countries other than China * Updated recommendations for Crews on Passenger or Cargo Flights * Removed Workplace section * Added links to information on discontinuation of isolation for patients with laboratory-confirmed COVID-19
* Updated US case counts and deaths
* Update world case counts and deaths
* Updated triage and reporting criteria for Health Departments
* Added clarifying language to the CDC's response * Added new information on text kits and lab testing availability
* Added definitions for "congregate settings" and "social distancing"
* Updating recommendations regarding HCP contact tracing, monitoring, and work restrictions in selected circumstances. These include allowances for asymptomatic HCP who have had an exposure to a COVID-19 patient to continue to work after options to improve staffing have been exhausted and in consultation with their occupational health program. (See Additional Considerations and Recommendations at the end of the document) * Removed requirement under "self monitoring with delegated supervision" for healthcare facilities to actively verify absence of fever and respiratory symptoms when healthcare personnel (HCP) report for work. This is now optional. * Simplified risk exposure categories based on most common scenarios with focus on presence/absence of source control measures; use of personal protective equipment (PPE) by HCP; and degree of contact with the patient (i.e., prolonged versus brief) * Added language advising HCP to inform their occupational health program if they have travel or community-associated exposures as defined in Interim US Guidance for Risk Assessment and Public Health Management of Persons with Potential Coronavirus Disease (COVID-19) Exposure in Travel-associated or Community SettingsUpdating recommendations regarding HCP contact tracing, monitoring, and work restrictions in selected circumstances. These include allowances for asymptomatic HCP who have had an exposure to a COVID-19 patient to continue to work after options to improve staffing have been exhausted and in consultation with their occupational health program. (See Additional Considerations and Recommendations at the end of the document) * Removed requirement under "self monitoring with delegated supervision" for healthcare facilities to actively verify absence of fever and respiratory symptoms when healthcare personnel (HCP) report for work. This is now
* 164 total cases; 11 deaths; 19 States reporting cases
* Does not appear to be updated since 3/3 but link was added to "What's New" on 3/7



AMERICAN OVERSIGHT

* Symptoms *Caring for yourself at home *Protecting Others from Getting Sick *Caring for Someone Who is Sick
* PDF flyer for law enforcement
* PDF flyer for travelers
* Identification of higher risk for individuals and steps to take
* Interim recommended guidelines for cleaning and disenfecting * Provides definitions * Discusses timing and location of cleaning * Provideds guidance on cleaning and disinfecting surfaces, linens, clothing and other launcry items * Offers guidance on PPE and Hand Hygiene * Offers additional considerations for employers
* CDC recommends travelers, particularly those with underlying health issues, defer all cruise ship travel worldwide. * Sustained community spread of respiratory illness caused by COVID-19 has been reported in many countries. * Cruise ship passengers are at increased risk of person-to-person spread of infectious diseases, including COVID-19. * Older adults and travelers with underlying health issues should avoid situations that put them at increased risk
* Specific guidance and resources for Institutes of Higher Education
* Updated resources for ship an airline travel * Updated geographic risk assessment (by country)
* 423 Total Cases, 19 Deaths, 35 States (including DC)
* Updated list of countires with COVID-19, link to WHO world case and death counts
* Minor update on testing * Update to Situation in the U.S.
* Information on: --Cancelling or Postponing Travel --Air or Cruise Travel --Returning from Travel --Business Travel
* Update to which states currently have labs testing for COVID-19
* 647 Total Cases, 25 Deaths, 36 Jurisdictions reporting cases (including DC)
* Update on countries reporting cases and link to updated WHO report
* Update to which states currently have labs testing for COVID-19
* FAQs regarding laboratory testing
* Guidance for hemodialysis facilities
* 938 Total Cases, 29 Deaths, 39 Jurisdictions reporting cases (including DC)
* Update on countries reporting cases and link to updated WHO report
* Update to which states currently have labs testing for COVID-19
* Updated guidance on travel and travel related information
* Updated organization of page linking actions for Home, Schools, Universities, and other settings in one place.

AMERICAN OVERSIGHT

* Updated background to provide information about the risks ill HCP and visitors pose to this vulnerable population. * Added and tiered actions facilities should take depending on whether COVID-19 has been identified in their community or facility.
* Updates from the White House Coronavirus Task Force including: --CDC's framework for Mitigation --Mitigation Strategies for 3 cities --Presentation from VP's Office on "Keeping workplaces, homes, schools, or commercial establishments safe"
* 1,215 Total Cases, 36 Deaths, 43 jurisdictions reporting (including DC)
* Increased severity of Risk Assessment Level
* Updated to note that COVID-19 is now classified as a pandemic * Added FAA-CDC link for air travel safety alert
* Updated collection data and specimen count
* Created a page for the White House Task Force items
* Updated guidance for schools including a closure decision tree
* Update on the effectiveness of measures taken in Singapore
* 1,629 Cases, 41 Deaths, 47 Jurisdictions reporting cases (including DC)
* Updated global map of countries reporting COVID-19 cases
* Updated guidance on keeping your home safe
* Added Florida community mitigation plans to the original plans posted by the WH Task Force
* Updated to add increased warning for older adults with severe underlying chronic medical conditions
* Updated guidance and information for women who are pregnant or breastfeeding
* New page on when and how to get tested
* Updated to note National Emergency declaration * Updated Risk Assessment * Updated CDC Response
* CDC issued guidance to keep large gatherings below 50 people
* Update to include 9 new countries/territories/regions with active cases

FROM: Director
Quality, Safety & Oversight Group

SUBJECT: Guidance for Infection Control and Prevention Concerning Coronavirus Disease 2019 (COVID-19) in Home Health Agencies (HHAs)

Memorandum Summary

CMS is committed to protecting American patients and residents by ensuring health care facilities have up-to-date information to adequately respond to COVID-19 concerns.

- ***Coordination with the Centers for Disease Control and Prevention (CDC) and local public health departments*** - We encourage all Home Health Agencies to monitor the CDC website for information and resources and contact their local health department when needed (CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html).

- ***Home Health Guidance and Actions*** - CMS regulations and guidance support Home Health Agencies taking appropriate action to address potential and confirmed COVID cases and mitigate transmission including screening, treatment, and transfer to higher level care (when appropriate). This guidance applies to both Medicare and Medicaid providers.

Background

The Centers for Medicare & Medicaid Services (CMS) is committed to the protection of patients in the home care setting from the spread of infectious disease. This memorandum responds to questions we have received and provides important guidance for all Medicare and Medicaid participating Home Health Agencies (HHAs) in addressing the COVID-19 outbreak and minimizing transmission to other individuals.

Guidance

HHAs should monitor the CDC website (see links below) for information and resources and contact their local health department when needed. Also, HHAs should be monitoring the health status of everyone (patients/residents/visitors/staff/etc.) in the homecare setting for signs or

AMERICAN OVERSIGHT

symptoms of COVID-19. Per CDC, prompt detection, triage and isolation of potentially infectious patients are essential to prevent unnecessary exposures among patients, healthcare personnel, and visitors.

In addition to the overarching regulations and guidance, we have provided the following information (Frequently Asked Questions) about some specific areas related to COVID-19. This guidance is applicable to all Medicare and Medicaid HHA providers.

HHA Guidance for Admitting and Treating Patients with known or suspected COVID-19

Which patients are at risk for severe disease for COVID-19?
Based upon CDC data, older adults or those with underlying chronic medical conditions may be most at risk for severe outcomes.

How should HHAs screen patients for COVID-19?
When making a home visit, HHAs should identify patients at risk for having COVID-19 infection before or immediately upon arrival to the home. They should ask patients about the following:

1. International travel within the last 14 days to countries with sustained community transmission. For updated information on affected countries visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html
2. Signs or symptoms of a respiratory infection, such as a fever, cough, and sore throat.
3. In the last 14 days, has had contact with someone with or under investigation for COVID-19, or are ill with respiratory illness.
4. Residing in a community where community-based spread of COVID-19 is occurring.

For ill patients, implement source control measures (i.e., placing a facemask over the patient's nose and mouth if that has not already been done).

Inform the HHA clinical manager, local and state public health authorities about the presence of a person under investigation (PUI) for COVID-19. Additional guidance for evaluating patients in U.S. for COVID-19 infection can be found on the CDC COVID-19 website.

CMS regulations requires that home health agencies provide the types of services, supplies and equipment required by the individualized plan of care. HHA's are normally expected to provide supplies for respiratory hygiene and cough etiquette, including 60%-95% alcohol-based hand sanitizer (ABHS). State and Federal surveyors should not cite home health agencies for not providing certain supplies (e.g., personal protective equipment (PPE) such as gowns, respirators, surgical masks and alcohol-based hand rubs (ABHR)) if they are having difficulty obtaining these supplies for reasons outside of their control. However, we do expect providers/suppliers to take actions to mitigate any resource shortages and show they are taking all appropriate steps to obtain the necessary supplies as soon as possible.

How should HHAs monitor or restrict home visits for health care staff?

- Health care providers (HCP) who have signs and symptoms of a respiratory infection should not report to work.
- Any staff that develop signs and symptoms of a respiratory infection while on-the-job, should:

AMERICAN OVERSIGHT

- Immediately stop work, put on a facemask, and self-isolate at home;
- Inform the HHA clinical manager of information on individuals, equipment, and locations the person came in contact with; and
- Contact and follow the local health department recommendations for next steps (e.g., testing, locations for treatment).

• Refer to the CDC guidance for exposures that might warrant restricting asymptomatic healthcare personnel from reporting to work (https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html)

HHAs should contact their local health department for questions, and frequently review the CDC website dedicated to COVID-19 for health care professionals: https://www.cdc.gov/coronavirus/2019-nCoV/hcp/index.html

Do all patients with known or suspected COVID-19 infection require hospitalization?
Patients may not require hospitalization and can be managed at home if they are able to comply with monitoring requests. More information is available here: https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-home-care.html

What are the considerations for determining when patients *confirmed* with COVID-19 are safe to be treated at home?

Although COVID-19 patients with mild symptoms may be managed at home, the decision to remain in the home should consider the patient's ability to adhere to isolation recommendations, as well as the potential risk of secondary transmission to household members with immunocompromising conditions. More information is available here: https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-home-care.html

When should patients *confirmed* with COVID-19 who are receiving HHA services be considered for transfer to a hospital?
Initially, symptoms maybe mild and not require transfer to a hospital as long as the individual with support of the HHA can follow the infection prevention and control practices recommended by CDC. (https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html)

The patient may develop more severe symptoms and require transfer to a hospital for a higher level of care. Prior to transfer, emergency medical services and the receiving hospital should be alerted to the patient's diagnosis, and precautions to be taken including placing a facemask on the patient during transfer. If the patient does not require hospitalization they can be discharged back to home (in consultation with state or local public health authorities) if deemed medically and environmentally appropriate. Pending transfer or discharge, place a facemask on the patient and isolate him/her in a room with the door closed.

What are the implications of the Medicare HHA Discharge Planning Regulations for Patients with COVID-19?

Medicare's Discharge Planning Regulations (which were updated in November 2019)

AMERICAN OVERSIGHT

requires that HHA assess the patient's needs for post-HHA services, and the availability of such services. When a patient is discharged, all necessary medical information (including communicable diseases) must be provided to any other service provider. For COVID-19 patients, this must be communicated to the receiving service provider prior to the discharge/transfer and to the healthcare transport personnel.

What are recommended infection prevention and control practices, including considerations for family member exposure, when evaluating and caring for patients with known or suspected COVID-19?

The CDC advises the patient to stay home except to get medical care, separate yourself from other people and animals in the home as much as possible (in a separate room with the door closed), call ahead before visiting your doctor, and wear a facemask in the presence of others when out of the patient room.

For everyone in the home, CDC advises covering coughs and sneezes followed by hand washing or using an alcohol-based hand rub, not sharing personal items (dishes, eating utensils, bedding) with individuals with known or suspected COVID-19, cleaning all "high-touch" surfaces daily, and monitoring for symptoms. We would ask that HHA's share additional information with families. Please see https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-prevent-spread.html and https://www.cdc.gov/coronavirus/2019-ncov/community/home/index.html.

Detailed infection prevention and control recommendations are available in the CDC Interim Infection Prevention and Control Recommendations for Patients with Confirmed Coronavirus Disease 2019 (COVID-19) or Persons under Investigation for COVID-19 in Healthcare Settings: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html

Are there specific considerations for patients requiring therapeutic interventions?
Patients with known or suspected COVID-19 should continue to receive the intervention appropriate for the severity of their illness and overall clinical condition. Because some procedures create high risks for transmission (close patient contact during care) precautions include: 1) HCP should wear all recommended PPE, 2) the number of HCP present should be limited to essential personnel, and 3) any supplies brought into, used, and removed from the home must be cleaned and disinfected in accordance with environmental infection control guidelines.

What Personal Protective Equipment should home care staff routinely use when visiting the home of a patient suspected of COVID-19 exposure or confirmed exposure?
If care to patients with respiratory or gastrointestinal symptoms who are confirmed or presumed to be COVID-19 positive is anticipated, then HHAs should refer to the Interim Guidance for Public Health Personnel Evaluating Persons Under Investigation (PUIs) and Asymptomatic Close Contacts of Confirmed Cases at Their Home or Non-Home Residential Settings: https://www.cdc.gov/coronavirus/2019-ncov/php/guidance-evaluating-pui.html

AMERICAN OVERSIGHT

Hand hygiene should be performed before putting on and after removing PPE using alcohol-based hand sanitizer that contains 60 to 95% alcohol.

PPE should ideally be put on outside of the home prior to entry into the home. If unable to put on all PPE outside of the home, it is still preferred that face protection (i.e., respirator and eye protection) be put on before entering the home. Alert persons within the home that the public health personnel will be entering the home and ask them to move to a different room, if possible, or keep a 6-foot distance in the same room. Once the entry area is clear, enter the home and put on a gown and gloves.

Ask person being tested if an external trash can is present at the home, or if one can be left outside for the disposal of PPE. PPE should ideally be removed outside of the home and discarded by placing in external trash can before departing location. PPE should not be taken from the home of the person being tested in public health personnel's vehicle.

If unable to remove all PPE outside of the home, it is still preferred that face protection (i.e., respirator and eye protection) be removed after exiting the home. If gown and gloves must be removed in the home, ask persons within the home to move to a different room, if possible, or keep a 6-foot distance in the same room. Once the entry area is clear, remove gown and gloves and exit the home. Once outside the home, perform hand hygiene with alcohol-based hand sanitizer that contains 60 to 95% alcohol, remove face protection and discard PPE by placing in external trash can before departing location. Perform hand hygiene again.

When is it safe to discontinue Transmission-based Precautions for home care patients with COVID-19?

The decision to discontinue Transmission-Based Precautions for home care patients with COVID-19 should be made in consultation with clinicians, infection prevention and control specialists, and public health officials. This decision should consider disease severity, illness signs and symptoms, and results of laboratory testing for COVID-19 in respiratory specimens. For more details, please refer to: https://www.cdc.gov/coronavirus/2019-ncov/hcp/disposition-in-home-patients.html.

Considerations to discontinue in-home isolation include all of the following:

- Resolution of fever, without use of antipyretic medication
- Improvement in illness signs and symptoms
- Negative results of an FDA Emergency Use Authorized molecular assay for COVID-19 from at least two consecutive sets of paired nasopharyngeal and throat swabs specimens collected ≥24 hours apart* (total of four negative specimens—two nasopharyngeal and two throat). See Interim Guidelines for Collecting, Handling, and Testing Clinical Specimens from Patients Under Investigation (PUIs) for 2019 Novel Coronavirus (2019-nCoV) for specimen collection guidance.

*Initial guidance is based upon limited information and is subject to change as more information becomes available. In persons with a persistent productive cough, SARS-CoV-2-RNA might be detected for longer periods in sputum specimens than in upper respiratory tract (nasopharyngeal swab and throat swab) specimens.

AMERICAN OVERSIGHT

Protocols for Coordination and Investigation of Home Health Agencies with Actual or Suspected COVID-19 Cases

During a home health agency survey, when a COVID-19 confirmed case or suspected case (including PUI) is identified, the surveyors will confirm that the agency has reported the case to public health officials as required by state law and will work with the agency to review infection prevention and education practices. Confirm that the HHA has the most recent information provided by the CDC.

- The State should notify the appropriate CMS Regional Office of the HHA who has been identified as providing services to a person with confirmed or suspected COVID-19 (including persons under investigation) who do not need to be hospitalized;
- The State should notify the appropriate CMS Regional Office of the HHA who has been identified as providing services to a person with confirmed COVID-19 who were hospitalized and determined to be medically stable to go home.

CMS is aware of that there is a scarcity of some supplies in certain areas of the country. State and Federal surveyors should not cite providers/suppliers for not having certain supplies (e.g., personal protective equipment (PPE) such as gowns, respirators, surgical masks and alcohol-based hand rubs (ABHR)) if they are having difficulty obtaining these supplies for reasons outside of their control. However, we do expect providers/suppliers to take actions to mitigate any resource shortages and show they are taking all appropriate steps to obtain the necessary supplies as soon as possible. For example, if there is a shortage of ABHR, we expect staff to practice effective hand washing with soap and water. Similarly, if there is a shortage of PPE (e.g., due to supplier(s) shortage which may be a regional or national issue), the facility should contact the appropriate local authorities notifying them of the shortage, follow national guidelines for optimizing their current supply, or identify the next best option to care for patients. If a surveyor believes a facility should be cited for not having or providing the necessary supplies, the state agency should contact the CMS Regional Office.

Ref: QSO-20-19-ESRD

DATE: **March 10, 2020**

TO: State Survey Agency Directors

FROM: Director
Quality, Safety & Oversight Group

SUBJECT: Guidance for Infection Control and Prevention of Coronavirus Disease 2019 (COVID-19) in dialysis facilities

Memorandum Summary

- **CMS is dedicated** to the continued health and safety of patients obtaining care within dialysis facilities to ensure facilities are prepared to respond to the threat of COVID-19.
- **Dialysis Guidance and Actions** - CMS is providing additional guidance to dialysis facilities to help them focus their infection control and prevention practices to prevent the transmission of COVID-19.
- **Coordination with the Centers for Disease Control (CDC) and local public health departments** - We encourage all dialysis facilities to monitor the CDC website for updated information and resources and contact their local health department when needed (CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html).

Background

CMS is responsible for ensuring the health and safety within dialysis facilities by enforcing health and safety standards required to help facilities provide safe, quality care to dialysis patients. Due to the recent spread of COVID-19, we are providing additional guidance to dialysis facilities to help control and prevent the spread of the virus.

Guidance

Facilities should monitor the CDC website for information and resources (links below), and contact their local health department when needed. Also, facilities should be monitoring the health status of everyone (in-center and home dialysis patients/visitors/staff/etc.) in their facility for signs or symptoms of respiratory infection, including COVID-19. Per CDC, prompt detection, triage and isolation of potentially infectious patients are essential to prevent unnecessary exposures among patients, healthcare personnel, and visitors at the facility. Therefore, facilities should continue to be vigilant in identifying any possible exposed or

AMERICAN OVERSIGHT

infected individuals. Facilities should consider frequent monitoring for potential symptoms of respiratory infection as needed throughout the day. Furthermore, we encourage facilities to take advantage of resources that have been made available by CDC and CMS to train and prepare staff to improve infection control and prevention practices. Lastly, facilities should maintain open lines of communication with patients, patient representatives and/or family and other care providers to respond to the individualized needs of each patient.

Facilities experiencing an increased number of respiratory illnesses (regardless of suspected etiology) among patients/visitors or healthcare personnel should immediately contact their local or state health department for further guidance.

In addition to the requirements in the Conditions for Coverage (CFC) and associated guidance, we're providing the following information (Frequently Asked Questions) about some specific areas related to COVID-19:

Guidance for Limiting the Transmission of COVID-19 for Dialysis Facilities

What actions should dialysis facilities implement to promote early recognition and management of patients, staff and visitors?
Facilities should screen patients, staff and visitors and contact home dialysis patients for the following:

1. Signs or symptoms of a respiratory infection, such as a fever, cough, shortness of breath or sore throat.
2. Contact with someone with or under investigation for COVID-19.
3. International travel within the last 14 days to countries with widespread or ongoing community spread. For updated information on countries visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/after-travel-precautions.html
4. Residing in a community where community-based spread of COVID-19 is occurring.

Furthermore, to promptly identify and manage patients, staff or visitors with undiagnosed respiratory symptoms the following actions should be implemented:

- Facilities should identify patients with signs and symptoms of respiratory infections before they enter the treatment area.
    - Patients with symptoms of a respiratory infection should put on a facemask (i.e., surgical mask) at check-in and keep it on until they leave the facility. The facility should provide if needed.
    - Patients should inform staff of fever or respiratory symptoms immediately upon arrival at the facility (e.g., when they check in at the registration desk) (Note, the facility will likely also check patient temperature).
    - Have patients call ahead to report fever or respiratory symptoms so the facility can be prepared for their arrival or triage them to a more appropriate setting (e.g., an acute care hospital).
    - Post signs at entrances with instructions to patients with fever or symptoms of respiratory infection to alert staff so appropriate precautions can be implemented.

AMERICAN OVERSIGHT

- Facilities should provide patients and staff with instructions (in appropriate languages) about hand hygiene, respiratory hygiene, and cough etiquette.
    - Instructions should include how to use facemasks or tissues to cover nose and mouth when coughing or sneezing, to dispose of tissues and contaminated items in waste receptacles, and how and when to perform hand hygiene
- Facilities should have the following supplies available to ensure adherence to hand and respiratory hygiene, and cough etiquette. These include tissues and no-touch receptacles for disposal of tissues and hand hygiene supplies (e.g., alcohol-based hand sanitizer)
- Visitors with signs and symptoms of a transmissible infection (e.g., a visitor is febrile and exhibiting signs and symptoms of an influenza-like illness) should defer visitation until he or she is no longer potentially infectious (e.g., 24 hours after resolution of fever without antipyretic medication).

How should facilities monitor or restrict dialysis facility staff?
The same screening performed for visitors should be performed for facility staff (numbers 1, 2, and 3 above).

- Dialysis staff who have signs and symptoms of a respiratory infection should not report to work. Facilities should implement sick leave policies that are non-punitive, flexible and consistent with public health policies that allow ill staff members to stay home.

- Any staff member that develops signs and symptoms of a respiratory infection, should:
    - Immediately stop work (if working), put on a facemask, and self-isolate at home;
    - Inform the facility administrator, and collect information on individuals, equipment, and locations the person came in contact with; and
    - Contact and follow the local health department recommendations for next steps (e.g., testing, locations for treatment).
- Refer to the CDC guidance for exposures that might warrant restricting asymptomatic healthcare personnel from reporting to work (https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html).

Facilities should contact their local health department for questions, and frequently review the CDC website dedicated to COVID-19 for health care professionals (https://www.cdc.gov/coronavirus/2019-nCoV/hcp/index.html).

Where should dialysis facilities place patients with undiagnosed respiratory symptoms and/or suspected or confirmed COVID 19?

Facilities should have space in waiting areas for ill patients to sit separated from other patients by at least 6 feet. Medically-stable patients who do not have other care needs have the option to wait in a personal vehicle or outside the healthcare facility where they can be contacted by mobile phone when it is their turn to be seen. Additional placement consideration include:

- Patients with respiratory symptoms should be brought back to a designated treatment area for evaluation as soon as possible in order to minimize time in common waiting areas.

AMERICAN OVERSIGHT

- Facilities should maintain at least 6 feet of separation between masked, symptomatic patients and other patients and stations during dialysis treatment. Ideally, symptomatic patients would be dialyzed in a separate room (if available) with the door closed.
    - Hepatitis B isolation rooms may be used to dialyze patients if:
        - The patient with suspected or confirmed COVID-19 is hepatitis B surface antigen positive or;
        - The facility has no hepatitis B surface antigen positive patients who would require treatment in the isolation room.
        - If a separate room is not available, the patient should be treated at a corner or end-of-row station, away from the main flow of traffic (if available). The patient should be separated by at least 6 feet from the nearest patient stations (in all directions).

When transmission in the community is identified, the local medical system's capacity to accept hemodialysis patients for treatment may be exceeded. Public health authorities and dialysis facilities should refer to pandemic and emergency preparedness plans to help determine alternatives. Alternative options may include the need to continue dialysis in the outpatient hemodialysis setting if the patient's condition does not require a higher level of care. If a hemodialysis facility is dialyzing more than one patient with suspected or confirmed COVID-19, consideration should be given to cohorting these patients and the dialysis staff caring for them together in the unit and/or on the same shift (e.g., consider the last shift of the day). Additionally, per current CDC guidance, an airborne infection isolation room (AIIR) is not required for the evaluation or care of patients with suspected or confirmed COVID-19. AIIRs should be prioritized for patients who are critically ill or receiving aerosol-generating procedures.

What type of Personal Protective Equipment (PPE) should be used when caring for patients with undiagnosed respiratory symptoms?

When providing dialysis care, facilities should continue to follow the infection control requirements at 42 CFR §494.30 including requirements for hand hygiene, PPE, isolation and routine cleaning and disinfection procedures.

- In general, dialysis staff caring for patients with undiagnosed respiratory infections should follow Standard, Contact, and Droplet Precautions with eye protection unless the suspected diagnosis requires Airborne Precautions (e.g., tuberculosis). This includes the use of:
    - Isolation gowns
        - The isolation gown should be worn over or instead of the cover gown (i.e., laboratory coat, gown, or apron with incorporate sleeves) that is normally worn by hemodialysis personnel. This is particularly important when initiating and terminating dialysis treatment, manipulating access needles or catheters, helping the patient into and out of the station, and cleaning and disinfection of patient care equipment and the dialysis station.
        - Remove and discard the gown in a dedicated container for waste or linen before leaving the dialysis station. Disposable gowns should be discarded after use. Cloth gowns should be laundered after each use.
    - Gloves
    - Facemask

AMERICAN OVERSIGHT

- Eye protection (e.g., goggles, a disposable face shield that covers the front and sides of the face). Personal glasses and contact lenses are NOT considered adequate eye protection.

Please see discussion below of Expanded Respirator Guidance below for additional information.

How should facilities ensure appropriate cleaning and disinfection of environmental surfaces, medical devices and equipment?

- Facilities should continue to follow the infection control requirements related to cleaning and disinfection at 42 CFR §494.30 which include:
  - Ensuring items taken into the dialysis station either be disposed of, dedicated for use only on a single patient, or
  - Cleaned and disinfected per manufacturer's directions for use before being taken to a common clean area or used on another patient.
- Facilities should implement routine cleaning and disinfection procedures which are appropriate for COVID-19 in healthcare settings which include:
  - Using cleaners and water to pre-clean surfaces prior to applying an EPA-registered, hospital-grade disinfectant to frequently touched surfaces or objects for appropriate contact times as indicated on the product's label.
  - Using products with EPA-approved emerging viral pathogens claims are recommended for use against COVID-19. If there are no available EPA-registered products that have an approved emerging viral pathogen claim for COVID-19, products with label claims against human coronaviruses should be used according to label instructions.
- Facilities should provide additional work supplies to avoid sharing (e.g., pens, pads) and disinfect workplace areas (nurse's stations, phones, internal radios, etc.).

When should the dialysis facility consider transferring a patient to an alternative site for treatment?

- If the facility cannot fully implement the recommended precautions or if the patient's condition requires care that the dialysis facility is unable to provide, the patient should be transferred to another facility that is capable of implementation. Transport personnel and the receiving facility should be notified about the suspected diagnosis prior to transfer.
- While awaiting transfer, patients should wear a facemask and be separated from other patients. If stable, patients can be asked to wait in their vehicles or return home. If that is not possible, then they should be placed in a separate room with the door closed. Contact with patient should be minimized. Appropriate PPE should be used by healthcare personnel when coming within 6 feet of patients with known or suspected COVID-19.

Are there special considerations for Home Dialysis Patients?

Dialysis facilities should continue to follow the guidelines as required regarding monthly monitoring of home dialysis patients onsite at the facility. While we want to limit exposure for the home dialysis patients, COVID-19 is particularly aggressive in individuals who are elderly and those with chronic conditions including end-stage renal disease (ESRD). It is important that the home dialysis patients do not miss their onsite appointments to ensure that all dialysis procedures are followed to ensure a safe environment for the patient. Facilities should be vigilant in monitoring any changes in guidelines as new information is available.

AMERICAN OVERSIGHT

Will dialysis facilities be cited for not having the appropriate supplies?
CMS is aware of that there is a scarcity of some supplies in certain areas of the country. State and Federal surveyors should not cite facilities for not having certain supplies (e.g., PPE such as gowns, N95 respirators, surgical masks and ABHR) if they are having difficulty obtaining these supplies for reasons outside of their control. However, we do expect facilities to take actions to mitigate any resource shortages and show they are taking all appropriate steps to obtain the necessary supplies as soon as possible. For example, if there is a shortage of ABHR, we expect staff to practice effective hand washing with soap and water. Similarly, if there is a shortage of PPE (e.g., due to supplier(s) shortage which may be a regional or national issue), the facility should contact the local and state public health agency to notify them of the shortage, follow national guidelines for optimizing their current supply, or identify the next best option to care for residents. If a surveyor believes a facility should be cited for not having or providing the necessary supplies, the state agency should contact their CMS Location.

AMERICAN OVERSIGHT

DEPARTMENT OF HEALTH & HUMAN SERVICES
Centers for Medicare & Medicaid Services
7500 Security Boulevard, Mail Stop C2-21-16
Baltimore, Maryland 21244-1850

Center for Clinical Standards and Quality/Quality, Safety & Oversight Group

Ref: QSO-20-17-ALL

DATE: **March 10, 2020**

TO: State Survey Agency Directors

FROM: Director
Quality, Safety & Oversight Group

SUBJECT: Guidance for use of Certain Industrial Respirators by Health Care Personnel

Memorandum Summary

- The Centers for Medicare & Medicaid Services (CMS) CMS is committed to taking critical steps to ensure America's health care facilities are prepared to respond to the threat of the Coronavirus Disease 2019 (COVID-19) and other respiratory illnesses.
- The memo clarifies the application of CMS policies in light of recent Centers for Disease Control and Prevention (CDC) and Food and Drug Administration (FDA) guidance expanding the types of facemasks healthcare workers may use in situations involving COVID-19 and other respiratory infections.

Background

CMS is committed to taking critical steps to ensure America's health care facilities are prepared to respond to the threat of the COVID-19 and other respiratory illness. With this announcement, health care workers in providers and suppliers certified by CMS will have a more expansive range of options to protect themselves and those receiving their care. CMS will continue to explore flexibilities and innovative approaches within our regulations to allow health care entities to meet the critical health needs of the country.

Guidance

The Centers for Disease Control and Prevention (CDC) have updated their Personal Protective Equipment (PPE) recommendations for health care workers involved in the care of patients with known or suspected COVID-19. At this time, these recommendations will be considered by CMS surveyors to determine if Medicare and Medicaid providers and suppliers are complying with infection control protocols:

- Based on local and regional situational analysis of PPE supplies, facemasks are an acceptable temporary alternative when the supply chain of respirators cannot meet the demand. During this time, available respirators should be prioritized for procedures that

AMERICAN OVERSIGHT

are likely to generate respiratory aerosols, which would pose the highest exposure risk to Health Care Providers (HCP).
    - Facemasks protect the wearer from splashes and sprays.
    - Respirators, which filter inspired air, offer respiratory protection.
- When the supply chain is restored, facilities with a respiratory protection program should return to use of respirators for patients with known or suspected COVID-19. Facilities that do not currently have a respiratory protection program, but care for patients infected with pathogens for which a respirator is recommended, should implement a respiratory protection program.
- Eye protection, medical gown, and gloves continue to be recommended.
    - If there are shortages of medical gowns, they should be prioritized for aerosol-generating procedures, care activities where splashes and sprays are anticipated, and high-contact patient care activities that provide opportunities for transfer of pathogens to the hands and clothing of HCP.
- Updated recommendations regarding the need for an airborne infection isolation room (AIIR).
    - Patients with known or suspected COVID-19 should be cared for in a single-person room with the door closed. AIIRs should be reserved for patients undergoing aerosol-generating procedures.
- Updated information based on currently available information about COVID-19 and the current situation in the United States, which includes reports of cases of community transmission, infections identified in HCP, and shortages of facemasks, N95 filtering facepiece respirators (FFRs) (commonly known as N95 respirators), and gowns.
- Increased emphasis on early identification and implementation of source control (i.e., putting a face mask on patients presenting with symptoms of respiratory infection).

Additional information on CDC's recommendations above can be found here:

https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html

Further, the FDA approved the CDC request for an emergency use authorization (EUA) to allow health care personnel to use certain industrial respirators during the COVID-19 outbreak in health care settings. The FDA concluded that respirators approved by the National Institute for Occupational Safety and Health (NIOSH), but not currently meeting the FDA's requirements, may be effective in preventing health care personnel from airborne exposure, including COVID-19, which can cause serious or life-threatening disease, including severe respiratory illness.

This action allows the NIOSH-approved respirators not currently regulated by the FDA to be used in a health care setting by health care personnel during the COVID-19 outbreak, thereby maximizing the number of respirators available to meet the needs of the U.S. health care system.

PLEASE NOTE: Due to the updated CDC guidance and current supply demands of these devices (and the discards associated with testing), CMS is directing surveyors not to validate the date of the last FIT test for health care workers in Medicare and Medicaid certified facilities, until further notice.

AMERICAN OVERSIGHT

The press release announcing FDA and CDC action to increase access to respirators, including N95s, for health care personnel, can be found at: https://www.fda.gov/news-events/press-announcements/coronavirus-covid-19-update-fda-and-cdc-take-action-increase-access-respirators-including-n95s

The EUA letter can be found at https://www.fda.gov/media/135763/download.

- Appendix A: A list of approved Filtering Facepiece Respirators (FFRs) eligible for coverage under this EUA are posted on the FDA's website:
  https://www.fda.gov/media/135764/download

- Appendix B: A list of NIOSH-approved FFRs authorized under this EUA can be found here:
  https://www.fda.gov/media/135921/download

Therefore, any CMS guidance that explicitly, or by reference, indicates N-95 or PPE usage will automatically incorporate any FFRs authorized under this EUA and any guidance issued by the CDC. This memo is effective for all Medicare and Medicaid provider and certified supplier types:

1. Hospitals
2. Religious Nonmedical Health Care Institutions (RNHCIs)
3. Ambulatory Surgical Centers (ASCs)
4. Hospices
5. Psychiatric Residential Treatment Facilities (PRTFs)
6. Program of All-Inclusive Care for the Elderly (PACE)
7. Transplant Centers
8. Skilled Nursing Facilities (SNFs) and Nursing Facilities (NFs)
9. Intermediate Care Facilities for Individuals with Intellectual Disabilities- ICF/IID
10. Home Health Agencies (HHAs)
11. Comprehensive Outpatient Rehabilitation Facilities (CORFs)
12. Critical Access Hospitals (CAHs)
13. Clinics, Rehabilitation Agencies, and Public Health Agencies as Providers of Outpatient Physical Therapy and Speech-Language Pathology Services
14. Community Mental Health Centers (CMHCs)
15. Organ Procurement Organizations (OPOs)
16. Rural Health Clinics (RHCs) and Federally Qualified Health Centers (FQHCs)
17. End-Stage Renal Disease (ESRD) Facilities

Florida has a very broad public records law. Written communications to or from state officials regarding state business constitute public records. Public records are available to the public and media upon request, unless the information is

AMERICAN OVERSIGHT

subject to a specific statutory exemption. Therefore, any information that you send to this address, including your contact information, may be subject to public disclosure.

Please note that under Florida law correspondence sent to the Governor's Office, which is not confidential or exempt pursuant to chapter 119 of the Florida Statutes, is a public record made available upon request.

AMERICAN OVERSIGHT

STATE OF FLORIDA
DIVISION OF EMERGENCY MANAGEMENT

IN RE: SUSPENSION OF STATUTES, RULES, AND ORDERS, PURSUANT TO EXECUTIVE ORDER NUMBER 20-52, MADE NECESSARY BY THE COVID-19 PUBLIC HEALTH EMERGENCY

DEM ORDER NO. 20-006

EMERGENCY ORDER

WHEREAS, the Governor of the State of Florida issued Executive Order No. 20-52 in response to the COVID-19 Public Health Emergency, which poses a severe threat to the entire State of Florida and requires that timely precautions are taken to protect the communities, critical infrastructure, and general welfare of this State; and,

WHEREAS, the Governor has designated the Director of the Division of Emergency Management as the State Coordinating Officer for the duration of this emergency and has delegated to the State Coordinating Officer the authority to exercise those powers delineated in sections 252.36(5)-(10), Florida Statutes; and,

WHEREAS, today, March 14, 2020, Governor DeSantis directed me, as the State Coordinating Officer, under the powers afforded by Executive Order No. 20-52, to prohibit visitation to certain facilities for thirty days from the date of this order in the State of Florida.

NOW, THEREFORE, I, JARED MOSKOWITZ hereby find that the Division of Emergency Management's timely performance of disaster response functions related to COVID-19 Public Health Emergency is hindered by the application of procedures imposed by statute, rule, and/or order. Therefore, pursuant to Section 2 of Executive Order No. 20-52, I hereby suspend sections 393.13(4), 394.459(5)(c), 400.022(1)(b), 429.28(1)(d),

AMERICAN OVERSIGHT

429.85(1)(d), 916.107(5)(7), Florida Statutes, for the particular purpose of prohibiting all individuals from visiting facilities within the State of Florida. For purposes of this order, a facility includes: Treatment Facilities under Chapter 319, Florida Statute; nursing homes as provided under Chapter 400, Florida Statute; homes for Special Services as provided under Chapter 400, Florida Statutes; Long-Term Care Hospitals, as provided under Chapter 395, Part I, Florida Statutes; Transitional Living Facilities, as provided under Chapter 400, Florida Statute; Intermediate Care Facilities for the Developmentally Disabled, as provided under Chapter 400, Florida Statutes; Assisted Living Facilities, as provided under Chapter 429, Florida Statutes; Adult Civil Facilities under Chapter 394 and Chapter 916 Florida Statutes; and Adult Family-Care Homes, as provided under Chapter 429, Florida Statutes. The order applies as follows:

1. Every facility must prohibit the entry of any individual, to the facility except in the following circumstances:

a. Family members, friends, and visiting residents in end-of-life situations; or

b. Hospice or palliative care workers caring for residents in end-of-life situations; or

c. Any third party providing necessary health care to a resident; or

d. Facility staff; or

e. Facility residents; or

f. Attorneys of Record; or

g. Representatives of the federal or state government seeking entry as part of their official duties, including, but not limited to, Ombudsman, representatives of the Department of Children and Families, the Department of Health, the Agency for Health Care Administration, the Office of the Attorney General, and the Department of Elder Affairs; any law enforcement officer; and any emergency medical personnel.

AMERICAN OVERSIGHT

2. Individuals seeking entry to the facility under the above section 1 will not be allowed to enter if they are screened based on the criteria listed below:

a. Any person infected with COVID-19 who has not had two consecutive negative test results separated by 24 hours;

b. Any person showing or presenting signs or symptoms of a respiratory infection, including cough, fever, shortness of breath or sore throat;

c. Any person who has been in contact with any person(s) infected with COVID-19 who has not yet tested negative for COVID-19 within the past 14 days;

d. Any person who traveled through any airport within the past 14 days;

e. Any person who traveled on a cruise ship within the past 14 days;

f. Any person who has been in a community with confirmed community spread of COVID-19, as identified by the Centers for Disease Control and Prevention or a state public health agency, within the past 14 days; and

g. Any person who resides in a community with confirmed community spread of COVID-19, as identified by the Centers for Disease Control and Prevention or a state public health agency.

3. The facility must require any individual entering the facility to wear personal protective equipment.

4. Residents must be discouraged from leaving the facility.

5. The following documentation must be kept for visitation within a facility:

a. Individuals entering a facility subject to the screening criteria above may be screened using a standardized questionnaire or other form of documentation.

b. The facility is required to maintain documentation of all non-resident individuals entering the facility. Documentation must include:

1. Name of the individual;

2. Date and time of entry; and

3. The documentation used by the facility to screen the individual showing the individual did not meet any of the enumerated screening criteria.

AMERICAN OVERSIGHT

Because section 252.36(5)(a), Florida Statutes, allows the Governor to suspend the provisions of "any regulatory statute prescribing the procedures for [the] conduct of state business", and because Executive Order No. 20-52 designates the Director of the Division of Emergency Management as the State Coordinating Officer for this emergency, the requirements of sections 252.46 and 120.54(4), Florida Statutes, do not apply to this Order.

The effective dates of this Order shall correspond with the effective dates of Executive Order No. 20-52.

By Order of the State Coordinating Officer executed this 14th day of March, 2020, in Tallahassee, Leon County, Florida.

AMERICAN OVERSIGHT

Good morning,

As we continue to carry out recommendations by our regulatory partners, the CDC, WHO, CMS, FDOH and IDPH, some great questions have come up post our recent decision to restrict visitors and vendors. Additional direction as follows....

- New admission tours will be suspended at this time
- Non-essential resident external appointments are to be postponed and/or rescheduled – those requiring a medically necessary external provider follow up will be carried out while maintaining infection control practices
- New admission sign-in's will be restricted to the lobby; appropriate screening to be carried out with these new residents at the time of entry
- Outside paid-entertainment vendors will be suspended at this time
- We are avoiding all LOA practices unless medically necessary – if a family member is insistent on taking their loved one out of the facility, call me so we can walk through the next steps
- All deliveries will continue to be restricted to non-patient care areas; large bulk drop offs to dedicated O2 rooms will need to ensure transport is screened, temped and PPE provided
- The following situations will be allowed **pending** a negative screening has been completed, negative temp **(*below 100.4 – range we are monitoring*),** have demonstrated appropriate hand hygiene (documented via handwashing competency - attached) and are wearing appropriate PPE when in patient care areas:
    - Caregivers hired by families
    - Hospice and Psych Providers
    - Podiatry and Wound Care providers
    - Dental and Optometry providers
    - Physicians and physician extenders
    - Lab and X-Ray providers – please monitor these providers to ensure proper IC and PPE donning and doffing is to be carried out **in between** each resident
- Outside food – we do not recommend at this time
- We have family members who prefer to wash their loved one's laundry. Please make sure to complete an updated *personal inventory sheet* and ensure each item is labeled as we will need to launder their items at this time. Please notify this sample of resident families and communicate our plan with them
- Student clinical rotations and volunteers will be suspended at this time
- Staff who have recently gone on a cruise or return from a cruise will need to self-quarantine for 14 days upon return – a physician's note will be required prior to returning to the schedule
- Staff Temperatures – the best way to monitor staff temperatures is to record on our daily Smartlinx schedules. These schedules are kept for tracking purposes by our dedicating staffing coordinators. Review for compliance to be carried out by the DNS/ED of each center. If you have the ability to purchase Thermal Thermometers, go ahead and do so at this time. Our thermometers require probe covers which may result in exhaustion by our supplier eventually as well
- Please make sure all agency staff is screened and the same process is carried out as we do for our own employees – this includes handwashing competency (attached)
- Any/all correspondence requested from the Union, ACO's, Veterans Affairs (VA), etc. is to be forwarded to our Legal Team for review. They will assist with a response to these inquiries
- All media requests to be forwarded to Teri Marinko, SVP Customer Experience

We know this has and will continue to be a heavy lift for all of us. We are so proud of your continued efforts to ensure safety and protection to our most vulnerable...THANK YOU 🖤

With Sincere Gratitude,

The Clinical Team

Subject: IMPORTANT INFORMATION ***Coronavirus (COVID-19) - March 11, 2020 Update #4 ***

*****Please disregard prior email with incorrect subject line date....(sorry)***

Good Morning,

In this update and attached you will find the following:

- CMS Memo_IC Guidance (COVID-19) REVISED 03-09-20
- Attachment 3_Greystone Visitor Sign_Coronavirus_UPDATED_03-11-20
- Attachment 4_Receptionist Q&A_Coronavirus_UPDATED 03-11-20
- Attachment 6_Staff Checklist_Coronavirus_UPDATED_03-11-20
- Attachment 7_Admissions_Home Health Checklist_Coronavirus_UPDATED_03-11-20
- Attachment 14_FHCA SNF to Hospital Communication Form_03-11-20 (Florida Centers)
- Attachment 15_Clinical Screening Tool for PUI_03-10-20

***Please review and print all updated attachments

Additionally, we will be implementing the following today...

- Restriction of all visitors – talking points and formal letter for resident/resident representatives will be sent out later this morning
    - Each facility will work together to notify families while using the talking points provided by our legal team
    - Exceptions to include families of those on palliative services and end of life as long as they have been cleared via screening criteria – PPE to be provided to these visitors
    - Vendors will not be allowed in patient care areas – drop off of items (i.e. pharmacy, McKesson) should be delivered near exterior doors
- Activity Restrictions
    - All outside outings for residents will be restricted at this time
    - Inside activities are to be reviewed to not include activities where contact and/or contact with items are at risk (i.e. ball toss, Bingo, etc.)
        - Hold a resident council meeting **today** to discuss these steps in order to remain proactive in the protection of our residents
- Regional Support Staff Restrictions

AMERICAN OVERSIGHT

- All regional support staff will be encouraged to work remotely at this time, only exception will be our regional nurse consultants
- Care Managers and Liaisons are not to visit our centers at this time – remain mindful of which hospitals are at risk when visiting for potential admissions.

- SNF to Hospital Transfer
  - Licensed nurses (Florida centers) to be educated on ***Attachment 14_FHCA SNF to Hospital Communication Form_03-11-20***. Any residents requiring a transfer to a higher level of care regardless of diagnosis will have this form completed
  - Licensed nurses to be educated on ***Attachment 15_Clinical Screening Tool for PUI_03-10-20.***
- What to do if you identify a PUI (Person Under Investigation) - this will be a resident who exhibits the symptomatology in addition to testing negative for Influenza and has a virus of unknown origin which ultimately requires transfer to the hospital
  - Place a mask over the resident (N95 if readily available)
  - Limit caregiver access until EMS arrives
  - Provide EMS with the closest egress to the resident to minimize exposure
  - Carry out terminal cleaning of room (1:10 bleach ratio) while wearing appropriate PPE
  - Follow further direction by leadership and FDOH
- N-95 masks are on order to have a supply on hand if needed for transfers – these masks will be placed on residents in the event we identify a PUI (Person Under Investigation) which would require a transfer to a higher level of care
- Minimize risk for transmission by...
  - Avoid room changes if possible – with emphasis on avoiding unit to unit transfers
  - Continue to maintain consistent staffing assignments – please avoid having staff work on multiple assignments
  - Try to limit all new admissions to one central area or unit of the building
- Temperature Checks to be carried out for...
  - All staff prior to each shift
  - Carried for the limited visitor/vendor population as described above – this includes physician and physician extenders
  - Every shift for our resident population

Talking points and Formal Letter to families to follow.....additionally, more updates to follow as we are given guidance from our regulatory bodies, CDC, FDOH and FHCA

Thank you,

Please refrain from "reply all"

Subject: IMPORTANT INFORMATION ***Coronavirus (COVID-19) - March 09, 2020 Update ***

Good morning Team,

Please note ***Attachment 4_Receptionist Q&A_Coronavirus_UPDATED 03-09-20*** AND ***Attachment 6_Staff Checklist_Coronavirus_UPDATED_03-09-20*** which reflects "Have you exhibited respiratory symptoms such as shortness of breath, **sore throat**, fever **OR** cough?" We will be limiting visitors or vendors with **any** symptomatology until they are asymptomatic. Additionally, please read the most recent **CMS Memo released 04-04-20** as it relates to a survey priority shift of focus related to IC practices and guidance to facilities. Please take caution in denying admissions solely based on lack of Personal Protective Equipment (PPE), as this may trigger an immediate visit from your state survey agency. We need to continue to work together to ensure we have enough PPE supplies to care for our residents. We have a limited supply at the corporate office if local resources have been exhausted.

Other things to carry out…

- Set up dedicated handwashing stations near your main entrance and direct visitors/vendors to perform hand hygiene - see Lexington's best practice pictures attached 😊 – GREAT JOB TEAM LEX
- Continue to screen all employees; any staff identified post screening will be communicated to your respective RDCO for further guidance
- Make sure you are ordering PPE equipment weekly to remain on allocation with McKesson as new shipments arrive – many facilities received bulk orders at the end of last week – please order the minimum as previously communicated or this will hold up your order
- Daily calls being initiated at the end of each day with corporate leadership, RDCO's and RVP's to discuss CDC line listing, current status of resident's on isolation (with reason and anticipated d/c date) and current PPE status – I will be sending out a combined PPE Status/Isolation Status Template to help with this daily communication to your RDCO to report off

For those who have been receiving questionnaires from our partnering ACO's, Advent Health PAC, etc., legal has crafted a draft and you will be receiving guidance for response today to report back – thank you Jim.

Thank you for being extremely diligent during this national focus in the ongoing prevention and control of the Coronavirus. Please reach out to me directly if you have any questions and/or concerns.

Respectfully,
Liz

Good evening Team,

Please distribute this communication with collaterals to your respective reports.

Attached you will find additional guidance, departmental direction, preparedness, response and education overview listed within the attachment **Fleet Corporate Office Preparedness_Coronavirus.** Within this document you will find the below attachments for each respective department. Continue to frequent the *CDC* and *WHO* websites for updates and developmental changes as it relates to COVID-19 Coronavirus. As always, maintaining Infection Control Practices is the front line prevention to transmission of any pathogens.

Within the Fleet Corporate Office Preparedness_Coronavirus QRT (Quick Reference Tool) you will find the below attachments....

1. Cough Etiquette Poster (**attachment #1**)
2. Hand Hygiene Poster (**attachment #2**)
3. Greystone Visitor Sign (**attachment #3**)
4. Receptionist Q&A Screening (**attachment #4**)
5. CDC LTC Respiratory Line Listing (**attachment #5**)
6. Staff Checklist (**attachment #6**)
7. Admissions/Home Health Checklist (**attachment #7**)
8. Vista Laboratories Letter to Facilities – (**attachment #8**)
9. Stop the Spread of Germs Poster – (**attachment #9**)
10. Coronavirus CDC Fact Sheet_English – (**attachment #10**)
11. Coronavirus CDC Fact Sheet_Spanish – (**attachment #11**)
12. CDC Symptoms Poster – (**attachment #12**)
13. CDC Flowchart to Identify and Assess – (**attachment #13**)

AMERICAN OVERSIGHT

Our Communications Department will be sending a Greystone Letter Template to serve as communication to resident families and/or resident representatives discussing our proactive approach to this novel pathogen. Please reach out to your RDCO and/or myself with any questions or concerns.

Respectfully,
Liz

Subject: [External] IMPORTANT: Travel Restrictions for Employees of the State Personnel System (COVID-19)AP

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Today, Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

AMERICAN OVERSIGHT

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Thank you in advance for joining in efforts to reduce the spread of COVID-19. We will continue to closely monitor and evaluate available information and guidance as this is a rapidly evolving situation.

We appreciate your patience and commitment to protecting our communities. If you have questions, please call John Apthorp at (850) 922-1274.

Subject: March 13, 2020: Memo Release: (REVISED) Guidance for Infection Control and Prevention of Coronavirus Disease 2019 (COVID-19) in Nursing Homes

CMS memo issued March 13, 2020, QSO-20-14-NH
Revised guidance for nursing home visitation/ access

Short bullets:

- Only end of life (EOL)/compassionate care visitors may enter the facility if they meet screening and wear a mask
- Health care workers who enter (hospice, EMS, etc) must meet CDC guidelines
- Comment on surveyors (see quote below) – Must allow surveyors in (meeting screening requirements)- Wear PPE per CDC guidelines when entering a facility with COVID cases
- Facilities should cancel communal dining and group activities, take staff temps, proactively communicate visitor restrictions, and restrict ombudsman (except EOL) but enable communication.

Long bullets:

Surveyors:
"CMS and state survey agencies are constantly evaluating their surveyors to ensure they don't pose a transmission risk when entering a facility. For example, surveyors may have been in a facility with COVID-19

AMERICAN OVERSIGHT

FL-AHCA-20-0902-A-001756

cases in the previous 14 days, but because they were wearing PPE effectively per CDC guidelines, they pose a low risk to of transmission in the next facility, and must be allowed to enter. However, there are circumstances under which surveyors should still not enter, such as if they have a fever."

Visitors:

- Facilities SHOULD restrict all visitors and non-essential health care personnel, except for certain compassionate care situations, eg: end of life (EOL).
- For these compassionate care visits (permitted visitors):
    - Visitors will be limited to a specific room only
    - Facilities should require visitors to perform hand hygiene frequently
    - Must wear a face mask
- Decisions about visits for EOL should be made case-by-case and include careful screening of visitors for fever and respiratory symptoms.
- Permitted visitors must wear a face mask and limit
- Facilities are expected to notify potential visitors with signs, calls, letters, etc.
- If a state implements stricter requirements, (such as through a Governor's order) a facility will not be considered out of compliance with federal visitation requirements.

Health care workers:

- Follow CDC guidelines for restricting access
- Including hospice, EMS, dialysis techs that provide care to residents
- Health care workers should be permitted to enter the facility as long as they meet CDC guidelines
- Facilities should contact their local county health department for questions and review CDC guidelines.

Additional guidance:

- Adds practices facilities should implement such as cancelling communal dining and group activities
- Actively screen residents and staff for fever and respiratory symptom
- Remind residents of social distancing and hand hygiene
- Take staff temperature and document absence of SOB, new of change in cough/sore throat. If they are ill, have them put on a face mask and self-isolate at home.
- Identify staff that work at multiple facilities (e.g., agency staff, regional or corporate staff, etc.) and actively screen and restrict them appropriately
- Residents still have the right to access the Ombudsman program - Their access should be restricted per the guidance above (except in compassionate care situations), however, facilities may review this on a case by case basis. If in-person access is not available due to infection control concerns, facilities need to facilitate resident communication (by phone or other format).
- Advise visitors, and any individuals who entered the facility (e.g., hospice staff), to monitor for signs and symptoms of respiratory infection for at least 14 days after exiting the facility. If symptoms occur, advise them to self-isolate at home, contact their healthcare provider, and immediately notify the facility of the date they were in the facility, the individuals they were in contact with, and the locations within the facility they visited. Facilities should immediately screen the individuals of reported contact, and take all necessary actions based on findings.

SUBJECT: Guidance for Infection Control and Prevention of Coronavirus Disease 2019 (COVID-19) in Nursing Homes ***(REVISED)***

Memorandum Summary

- ***CMS is committed*** to taking critical steps to ensure America's health care facilities and clinical laboratories are prepared to respond to the threat of the COVID-19.
- **Guidance for Infection Control and Prevention of COVID-19 -** CMS is providing additional guidance to nursing homes to help them improve their infection control and prevention practices to prevent the transmission of COVID-19, *including revised guidance for visitation.*
- **Coordination with the Centers for Disease Control (CDC) and local public health departments -** We encourage all nursing homes to monitor the CDC website for information and resources and contact their local health department when needed (CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html).

Background

The Centers for Medicare & Medicaid Services (CMS) is responsible for ensuring the health and safety of nursing home residents by enforcing the standards required to help each resident attain or maintain their highest level of well-being. In light of the recent spread of COVID-19, we are providing additional guidance to nursing homes to help control and prevent the spread of the virus.

Guidance

Facility staff should regularly monitor the CDC website for information and resources (links below). They should contact their local health department if they have questions or suspect a resident of a nursing home has COVID-19. Per CDC, prompt detection, triage and isolation of potentially infectious residents are essential to prevent unnecessary exposures among residents, healthcare personnel, and visitors at the facility. Therefore, facilities should continue to be vigilant in identifying any possible infected individuals. Facilities should consider frequent

AMERICAN OVERSIGHT

monitoring for potential symptoms of respiratory infection as needed throughout the day. Furthermore, we encourage facilities to take advantage of resources that have been made available by CDC and CMS to train and prepare staff to improve infection control and prevention practices. Lastly, facilities should maintain a person-centered approach to care. This includes communicating effectively with residents, resident representatives and/or their family, and understanding their individual needs and goals of care.

Facilities experiencing an increased number of respiratory illnesses (regardless of suspected etiology) among patients/residents or healthcare personnel should immediately contact their local or state health department for further guidance.

In addition to the overarching regulations and guidance, we're providing the following information about some specific areas related to COVID-19:

Guidance for Limiting the Transmission of COVID-19 for Nursing Homes

For ALL facilities nationwide:
Facilities should ***restrict*** *visitation of* ***all*** *visitors and non-essential health care personnel, except for certain compassionate care situations, such as an end-of-life situation. In those cases, visitors will be limited to a specific room only. Facilities are expected to notify potential visitors to defer visitation until further notice (through signage, calls, letters, etc.). Note: If a state implements actions that exceed CMS requirements, such as a ban on all visitation through a governor's executive order, a facility would not be out of compliance with CMS' requirements. In this case, surveyors would still enter the facility, but not cite for noncompliance with visitation requirements.*

For individuals that enter in compassionate situations (e.g., end-of-life care), facilities should require visitors to perform hand hygiene and use Personal Protective Equipment (PPE), such as facemasks. Decisions about visitation during an end of life situation should be made on a case by case basis, which should include careful screening of the visitor (including clergy, bereavement counselors, etc.) for fever or respiratory symptoms. Those with symptoms of a respiratory infection (fever, cough, shortness of breath, or sore throat) should not be permitted to enter the facility at any time (even in end-of-life situations). Those visitors that are permitted, must wear a facemask while in the building and restrict their visit to the resident's room or other location designated by the facility. They should also be reminded to frequently perform hand hygiene.

Exceptions to restrictions:

- *Health care workers: Facilities should follow CDC guidelines for restricting access to health care workers found at https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html. This also applies to other health care workers, such as hospice workers, EMS personnel, or dialysis technicians, that provide care to residents. They should be permitted to come into the facility as long as they meet the CDC guidelines for health care workers. Facilities should contact their local health department for questions, and frequently review the CDC website dedicated to COVID-19 for health care professionals (https://www.cdc.gov/coronavirus/2019-nCoV/hcp/index.html).*
- *Surveyors: CMS and state survey agencies are constantly evaluating their surveyors to ensure they don't pose a transmission risk when entering a facility. For example, surveyors may have been in a facility with COVID-19 cases in the previous 14 days, but because they were wearing PPE effectively per CDC guidelines, they pose a low risk to*

AMERICAN OVERSIGHT

transmission in the next facility, and must be allowed to enter. However, there are circumstances under which surveyors should still not enter, such as if they have a fever.

Additional guidance:

1. *Cancel communal dining and all group activities, such as internal and external group activities.*
2. *Implement active screening of residents and staff for fever and respiratory symptoms.*
3. *Remind residents to practice social distancing and perform frequent hand hygiene.*
4. *Screen all staff at the beginning of their shift for fever and respiratory symptoms. Actively take their temperature and document absence of shortness of breath, new or change in cough, and sore throat. If they are ill, have them put on a facemask and self-isolate at home.*
5. *For individuals allowed in the facility (e.g., in end-of-life situations), provide instruction, before visitors enter the facility and residents' rooms, provide instruction on hand hygiene, limiting surfaces touched, and use of PPE according to current facility policy while in the resident's room. Individuals with fevers, other symptoms of COVID-19, or unable to demonstrate proper use of infection control techniques should be restricted from entry. Facilities should communicate through multiple means to inform individuals and non-essential health care personnel of the visitation restrictions, such as through signage at entrances/exits, letters, emails, phone calls, and recorded messages for receiving calls.*
6. *Facilities should identify staff that work at multiple facilities (e.g., agency staff, regional or corporate staff, etc.) and actively screen and restrict them appropriately to ensure they do not place individuals in the facility at risk for COVID-19.*
7. *Facilities should review and revise how they interact vendors and receiving supplies, agency staff, EMS personnel and equipment, transportation providers (e.g., when taking residents to offsite appointments, etc.), and other non-health care providers (e.g., food delivery, etc.), and take necessary actions to prevent any potential transmission. For example, do not have supply vendors transport supplies inside the facility. Have them dropped off at a dedicated location (e.g., loading dock). Facilities can allow entry of these visitors if needed, as long as they are following the appropriate CDC guidelines for Transmission-Based Precautions.*
8. *In lieu of visits, facilities should consider:*
    a) *Offering alternative means of communication for people who would otherwise visit, such as virtual communications (phone, video-communication, etc.).*
    b) *Creating/increasing listserv communication to update families, such as advising to not visit.*
    c) *Assigning staff as primary contact to families for inbound calls, and conduct regular outbound calls to keep families up to date.*
    d) *Offering a phone line with a voice recording updated at set times (e.g., daily) with the facility's general operating status, such as when it is safe to resume visits.*
9. *When visitation is necessary or allowable (e.g., in end-of-life scenarios), facilities should make efforts to allow for safe visitation for residents and loved ones. For example:*
    a) *Suggest refraining from physical contact with residents and others while in the facility. For example, practice social distances with no hand-shaking or hugging, and remaining six feet apart.*
    b) *If possible (e.g., pending design of building), creating dedicated visiting areas (e.g., "clean rooms") near the entrance to the facility where residents can meet with*

AMERICAN OVERSIGHT

visitors in a sanitized environment. Facilities should disinfect rooms after each resident-visitor meeting.

c) *Residents still have the right to access the Ombudsman program. Their access should be restricted per the guidance above (except in compassionate care situations), however, facilities may review this on a case by case basis. If in-person access is not available due to infection control concerns, facilities need to facilitate resident communication (by phone or other format) with the Ombudsman program or any other entity listed in 42 CFR § 483.10(f)(4)(i).*

10. *Advise visitors, and any individuals who entered the facility (e.g., hospice staff), to monitor for signs and symptoms of respiratory infection for at least 14 days after exiting the facility. If symptoms occur, advise them to self-isolate at home, contact their healthcare provider, and immediately notify the facility of the date they were in the facility, the individuals they were in contact with, and the locations within the facility they visited. Facilities should immediately screen the individuals of reported contact, and take all necessary actions based on findings.*

When should nursing homes consider transferring a resident with suspected or confirmed infection with COVID-19 to a hospital?

Nursing homes with residents suspected of having COVID-19 infection should contact their local health department. Residents infected with COVID-19 may vary in severity from lack of symptoms to mild or severe symptoms or fatality. Initially, symptoms may be mild and not require transfer to a hospital as long as the facility can follow the infection prevention and control practices recommended by CDC. Facilities without an airborne infection isolation room (AIIR) are not required to transfer the resident assuming: 1) the resident does not require a higher level of care and 2) the facility can adhere to the rest of the infection prevention and control practices recommended for caring for a resident with COVID-19.

Please check the following link regularly for critical updates, such as updates to guidance for using PPE: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html.

The resident may develop more severe symptoms and require transfer to a hospital for a higher level of care. Prior to transfer, emergency medical services and the receiving facility should be alerted to the resident's diagnosis, and precautions to be taken including placing a facemask on the resident during transfer. If the resident does not require hospitalization they can be discharged to home (in consultation with state or local public health authorities) if deemed medically and socially appropriate. Pending transfer or discharge, place a facemask on the resident and isolate him/her in a room with the door closed.

When should a nursing home accept a resident who was diagnosed with COVID-19 from a hospital?

A nursing home can accept a resident diagnosed with COVID-19 and still under Transmission-Based Precautions for COVID-19 as long as the facility can follow CDC guidance for Transmission-Based Precautions. If a nursing home cannot, it must wait until these precautions are discontinued. CDC has released Interim Guidance for Discontinuing Transmission-Based Precautions or In-Home Isolation for Persons with Laboratory-confirmed COVID-19. Information on the duration of infectivity is limited, and the interim guidance has been

AMERICAN OVERSIGHT

developed with available information from similar coronaviruses. CDC states that decisions to discontinue Transmission-based Precautions in hospitals will be made on a case-by-case basis in consultation with clinicians, infection prevention and control specialists, and public health officials. Discontinuation will be based on multiple factors (see current CDC guidance for further details).

Note: Nursing homes should admit any individuals that they would normally admit to their facility, including individuals from hospitals where a case of COVID-19 was/is present. Also, if possible, dedicate a unit/wing exclusively for any residents coming or returning from the hospital. This can serve as a step-down unit where they remain for 14 days with no symptoms (instead of integrating as usual on short-term rehab floor, or returning to long-stay original room).

Other considerations for facilities:

- Review CDC guidance for Infection Prevention and Control Recommendations for Patients with Confirmed Coronavirus Disease 2019: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html
- Increase the availability and accessibility of alcohol-based hand rubs (ABHRs), *reinforce strong hand-hygiene practices,* tissues, no touch receptacles for disposal, and facemasks at healthcare facility entrances, waiting rooms, resident check-ins, etc.
    - Ensure ABHR is accessible in all resident-care areas including inside and outside resident rooms.
- Increase signage for vigilant infection prevention, such as hand hygiene and cough etiquette.
- Properly clean, disinfect and limit sharing of medical equipment between residents and areas of the facility.
- Provide additional work supplies to avoid sharing (e.g., pens, pads) and disinfect workplace areas (nurse's stations, phones, internal radios, etc.).

Will nursing homes be cited for not having the appropriate supplies?
CMS is aware of that there is a scarcity of some supplies in certain areas of the country. State and Federal surveyors should not cite facilities for not having certain supplies (e.g., PPE such as gowns, N95 respirators, surgical masks and ABHR) if they are having difficulty obtaining these supplies for reasons outside of their control. However, we do expect facilities to take actions to mitigate any resource shortages and show they are taking all appropriate steps to obtain the necessary supplies as soon as possible. For example, if there is a shortage of ABHR, we expect staff to practice effective hand washing with soap and water. Similarly, if there is a shortage of PPE (e.g., due to supplier(s) shortage which may be a regional or national issue), the facility should contact the local and state public health agency to notify them of the shortage, follow national guidelines for optimizing their current supply, or identify the next best option to care for residents. If a surveyor believes a facility should be cited for not having or providing the necessary supplies, the state agency should contact the CMS Branch Office.

What other resources are available for facilities to help improve infection control and prevention?
CMS urges providers to take advantage of several resources that are available:

Subject: Fwd: Information push request

Please see the draft below for review. Thank you.

The Agency for Health Care Administration wants to ensure patients and staff are protected by following CDC infection prevention and control guidelines, including use of recommended personal protective equipment (PPE). Please review the information below and evaluate your facilities' practices when admitting/triaging patients with respiratory symptoms as they enter your emergency department.

Detection and Triage of PUI

Prompt detection and effective triage and isolation of potentially infectious patients are essential to prevent unnecessary exposures among patients, healthcare personnel, and visitors at the facility. Implement triage procedures to detect persons under investigation (PUI) for COVID-19 during or before patient triage or registration (e.g., at the time of patient check-in) and ensure that all patients are asked about the presence of symptoms of a respiratory infection and history of travel to areas experiencing transmission of SARS-CoV-2, the virus that causes COVID-19, or contact with possible COVID-19 patients.

Ensure proper use of personal protection equipment (PPE). Place a facemask over the patient's nose and mouth if that has not already been done and isolate the PUI for COVID-19 in an Airborne Infection Isolation Room (AIIR), if available. If worn properly, a facemask helps block respiratory secretions produced by the wearer from contaminating other persons and surfaces

Healthcare personnel who come in close contact with confirmed or possible patients with COVID-19 (this includes staff working a triage desk) should also wear the appropriate PPE. Information on how to properly don, use, and doff PPE in a manner to prevent self-contamination is available here: https://www.cdc.gov/hai/pdfs/ppe/PPE-Sequence.pdf

Train and Educate Healthcare Personnel

Provide HCP with job- or task-specific education and training on preventing transmission of infectious agents, including refresher training.

HCP must be medically cleared, trained, and fit tested for respiratory protection device use (e.g., N95 filtering facepiece respirators), or medically cleared and trained in the use of an alternative respiratory protection device (e.g., Powered Air-Purifying Respirator, PAPR) whenever respirators are required. OSHA has a number of respiratory training videos.

HCP should be educated, trained, and have practiced the appropriate use of PPE prior to caring for a patient, including attention to correct use of PPE and prevention of contamination of clothing, skin, and environment during the process of removing such equipment.

Environmental Cleaning and Disinfection

AMERICAN OVERSIGHT

Routine cleaning and disinfection procedures are appropriate for SARS-CoV-2 in healthcare settings, including those patient-care areas in which aerosol-generating procedures are performed. Products with EPA-approved emerging viral pathogens claims are recommended for use against SARS-CoV-2. Management of laundry, food service utensils, and medical waste should also be performed in accordance with routine procedures.

Molly –

DOH (Samantha Cooksey) just said AHCA not DOH should take the lead on drafting content for the e-blast to the hospitals. Dr. Rivkees would like the information sent out to include:

- Direction that upon entering the E.R. door or triage of the hospital...if someone has a cough, fever, runny nose, etc., they should immediately be placed in a mask and possibly held in a separate triage area.
- Make sure they protect their staff including those working the triage desk.
- Make sure staff are trained on airborne pathogens, how to appropriately don PPE, etc.
- Include links to information like CDC guidance or guidance on how to use PPE and surface cleaning.

DOH would like to review the draft before it is distributed to the hospitals.

Thanks,
Kim Stewart & Rebecca Willis

Subject: Information push request

Dr. Rivkees stopped by and requested information get pushed out to the hospitals (possibly via eblast). He stated the message should be that everyone should have a mask immediately upon entering the ED with a cough (including triage) and possibly have a separate waiting area. Also, to be sure the staff is protected (including triage desk), and trained on airborne contaminations, how to appropriately don PPE, and surface cleaning.

DOH is working on the content.

Florida has a very broad public records law. Written communications to or from state officials regarding state business constitute public records. Public records are available to the public and media upon request, unless the information is subject to a specific statutory exemption. Therefore, any information that you send to this address, including your contact information, may be subject to public disclosure.

Please note that under Florida law correspondence sent to the Governor's Office, which is not confidential or exempt pursuant to chapter 119 of the Florida Statutes, is a public record made available upon request.

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

STATE OF FLORIDA
DIVISION OF EMERGENCY MANAGEMENT

IN RE: SUSPENSION OF STATUTES, RULES, AND ORDERS, PURSUANT TO EXECUTIVE ORDER NUMBER 20-52, MADE NECESSARY BY THE COVID-19 PUBLIC HEALTH EMERGENCY

DEM ORDER NO. 20- _____

EMERGENCY ORDER

WHEREAS, the Governor of the State of Florida issued Executive Order No. 20-52 in response to the COVID-19 Public Health Emergency which poses a severe threat to the entire State of Florida and requires that timely precautions are taken to protect the communities, critical infrastructure, and general welfare of this State; and,

WHEREAS, the Governor has designated the Director of the Division of Emergency Management as the State Coordinating Officer for the duration of this emergency and has delegated to the State Coordinating Officer the authority to exercise those powers delineated in sections 252.36(5)-(10), Florida Statutes; and,

NOW THEREFORE, I hereby find that the Division of Emergency Management's timely performance of disaster response functions related to COVID-19 Public Health Emergency is hindered by the application of procedures imposed by statute, rule, and/or order.

Therefore, pursuant to Section 2 of Executive Order No. 20-52, I hereby issue the following authorization(s):

I. Suspend sections 393.13(4), 400.022(1)(b), 429.28(1)(d), 429.85(1)(d) Florida Statutes, for the particular purpose of prohibiting certain individuals from visiting

AMERICAN OVERSIGHT

nursing homes, assisted living facilities, adult family-care homes, long-term care facilities, and adult group homes for certain period of time as follows:

a. Any person infected with COVID-19 who has not had two consecutive negative test results separated by 24 hours; or

b. Any person showing or presenting signs or symptoms of a respiratory infection, including cough, fever, shortness of breath or sore throat; or

c. Any person who traveled internationally is prohibited from visiting a facility until 14 days after their return to the United States; or

d. Any person who traveled on a cruise ship is prohibited from visiting a facility until 14 days after their return to the United States; or

e. Any person who has or may have been in close contact with a person(s) infected with COVID-19 who has not tested negative for COVID-19 is prohibited from visiting a facility until 14 days after their interaction with the person(s) who is infected with COVID-19; or

f. Any person who resides in a community where community-spread of COVID-19 is occurring.

Because section 252.36(5)(a), Florida Statutes, allows the Governor to suspend the provisions of "any regulatory statute prescribing the procedures for [the] conduct of state business", and because Executive Order No. 20-52 designates the Director of the Division of Emergency Management as the State Coordinating Officer for this emergency, the requirements of sections 252.46 and 120.54(4), Florida Statutes, do not apply to this Order.

AMERICAN OVERSIGHT

The effective dates of this Order shall correspond with the effective dates of Executive Order No. 20-52.

WHEREAS, today, March 14, 2020, Governor DeSantis directed me, as the State Coordinating Officer, under the powers afforded by Executive Order No. 20-52, to prohibit visitation to certain facilities for thirty days from the date of this order in the State of Florida.

NOW, THEREFORE, I, JARED MOSKOWITZ hereby find that the Division of Emergency Management's timely performance of disaster response functions related to COVID-19 Public Health Emergency is hindered by the application of procedures imposed by statute, rule, and/or order. Therefore, pursuant to Section 2 of Executive Order No. 20-52, I hereby suspend sections 393.13(4), 394.459(5)(c), 400.022(1)(b), 429.28(1)(d),

AMERICAN OVERSIGHT

429.85(1)(d), 916.107(5), Florida Statutes, for the particular purpose of prohibiting all individuals from visiting facilities within the State of Florida. For purposes of this order, a facility includes: Treatment Facilities under Chapter 319, Florida Statute; nursing homes as provided under Chapter 400, Florida Statute; homes for Special Services as provided under Chapter 400, Florida Statutes; Long-Term Care Hospitals, as provided under Chapter 395, Part I, Florida Statutes; Transitional Living Facilities, as provided under Chapter 400, Florida Statute; Intermediate Care Facilities for the Developmentally Disabled, as provided under Chapter 400, Florida Statutes; Assisted Living Facilities, as provided under Chapter 429, Florida Statutes; Adult Civil Facilities under Chapter 394 and Chapter 916 Florida Statutes; and Adult Family-Care Homes, as provided under Chapter 429, Florida Statutes. The order applies as follows:

1. Every facility must prohibit the entry of any individual, to the facility except in the following circumstances:

    a. Family members, friends, and visiting residents in end-of-life situations;

    b. Hospice or palliative care workers caring for residents in end-of-life situations;

    c. Any third party providing necessary health care to a resident;

    d. Facility staff;

    e. Facility residents;

    f. Attorneys of Record for a resident; or

    g. Representatives of the federal or state government seeking entry as part of their official duties, including, but not limited to, Long-Term Care Ombudsman program, representatives of the Department of Children and Families, the Department of Health, the Agency for Health Care Administration, the Office of the Attorney General, and the Department of Elder Affairs; any law enforcement officer; and any emergency medical personnel.

Commented [MM1]: Should this be 916.107(5)-(7)?

Commented [MM2]: Statute 319 is Title Certificates – should this phrase be "group homes under 393…"?

Commented [MM3]: Suggest either capitalize each word or none. If all are capitalized, should Nursing Home be capitalized too on above line?

Commented [GS4]: Attorney of Record for who? The resident? Facility? Do we want to hold attorneys above their family members who are prohibited from visiting?

AMERICAN OVERSIGHT

2. Individuals seeking entry to the facility under the above section 1 will not be allowed to enter if they meet any of the screening criteria listed below:

a. Any person infected with COVID-19 who has not had two consecutive negative test results separated by 24 hours;

b. Any person showing or presenting signs or symptoms of a respiratory infection, including cough, fever, shortness of breath or sore throat;

c. Any person who has been in contact with any person(s) infected with COVID-19 who has not yet tested negative for COVID-19 within the past 14 days;

d. Any person who traveled through any airport within the past 14 days; and

e. Any person who traveled on a cruise ship within the past 14 days.

3. The facility must require any individual entering the facility to wear personal protective equipment.

4. Residents must be discouraged from leaving the facility.

5. The following documentation must be kept for visitation within a facility:

a. Individuals entering a facility subject to the screening criteria above may be screened using a standardized questionnaire or other form of documentation.

Commented [MM5]: Can we add taking temperatures?

Commented [GS6R5]: If the facility takes the temperature, then we suggest adding that to the documentation requirements.

b. The facility is required to maintain documentation of all non-resident individuals entering the facility. Documentation must include:

1. Name of the individual;

2. Date and time of entry; and

3. The documentation used by the facility to screen the individual showing the individual did not meet any of the enumerated screening criteria.

Because section 252.36(5)(a), Florida Statutes, allows the Governor to suspend the provisions of "any regulatory statute prescribing the procedures for [the] conduct of state business", and because Executive Order No. 20-52 designates the Director of the Division of Emergency Management as the State Coordinating Officer for this emergency, the requirements of sections 252.46 and 120.54(4), Florida Statutes, do not apply to this Order.

AMERICAN OVERSIGHT

The effective dates of this Order shall correspond with the effective dates of Executive Order No. 20-52.

By Order of the State Coordinating Officer executed this 14th day of March, 2020, in Tallahassee, Leon County, Florida.

AHCA has leverage in its survey and certification capacity on behalf of CMS.

42 C.F.R. **§483.80 Infection control.**

The facility must establish and maintain an infection prevention and control program designed to provide a safe, sanitary, and comfortable environment and to help prevent the development and transmission of communicable diseases and infections.

(a) *Infection prevention and control program.* The facility must establish an infection prevention and control program (IPCP) that must include, at a minimum, the following elements:

(1) A system for preventing, identifying, reporting, investigating, and controlling infections and communicable diseases for all residents, staff, volunteers, visitors, and other individuals providing services under a contractual arrangement based upon the facility assessment conducted according to §483.70(e) and following accepted national standards;

(2) Written standards, policies, and procedures for the program, which must include, but are not limited to:

(i) A system of surveillance designed to identify possible communicable diseases or infections before they can spread to other persons in the facility;

AMERICAN OVERSIGHT

(ii) When and to whom possible incidents of communicable disease or infections should be reported;
(iii) Standard and transmission-based precautions to be followed to prevent spread of infections;
(iv) When and how isolation should be used for a resident; including but not limited to:
(A) The type and duration of the isolation, depending upon the infectious agent or organism involved, and
(B) A requirement that the isolation should be the least restrictive possible for the resident under the circumstances.
(v) The circumstances under which the facility must prohibit employees with a communicable disease or infected skin lesions from direct contact with residents or their food, if direct contact will transmit the disease; and
(vi) The hand hygiene procedures to be followed by staff involved in direct resident contact.

At first blush, I am concerned about how this would conform with section 400.022(c)(2., Florida Statutes, which provides that

> ". . . Notwithstanding the visiting policy of the facility, the following individuals must be permitted immediate access to the resident:
>
> . . .
>
> 2. Subject to the resident's right to deny or withdraw consent, immediate family or other relatives of the resident."

The secretary would also like Stefan to review. The questions are:

Can a NH take temps or visitor?
Can a NH require a visitor submit to having temps taken
Same two questions for staff.

Thanks

Opening

- Governor DeSantis and the State Emergency Operations Team continue to take comprehensive steps to protect the citizens of Florida.
- This Administration is prepared to meet and respond to this public health challenge.
- Let me assure all Floridians that every flexibility we can offer to health care providers and facilities is being explored to enhance communities' ability to respond to COVID-19.
- Our charge is to equip and resource the health care workforce on the frontlines with every necessary tool to protect the most vulnerable from the threat of COVID-19.
- We are taking decisive action to help prevent the impact and spread of this disease.
- Most importantly, we cannot afford to take the risk of spread in our skilled nursing and assisted living facilities.

AMERICAN OVERSIGHT

- We know risk is greatest for our elderly – disproportionately impacting those 65 and older and those with underlying health conditions.

- While there may not be any identified community spread at this time, we know the first line of defense is stopping spread before it gets in the door.

- For our elderly and medically frail, the risk of fatality is high.

- It's why the Governor has taken decisive action to issued stronger visitation restrictions to eliminate any possible exposure to COVID-19.

Testing and Transfer

- For our nursing homes and assisted living facilities, We need to be able to quickly identify any individual in your facility that may be at risk for COVID-19.

- We need all of you, every facility, to work in coordination with your local county health department , the moment you anticipate someone may need to be tested or transferred to hospital.

- Florida's local county health departments are ready, and skilled to support you in determining what need to happen in terms of testing.

- They are ready to evaluate the precautions that may need to occur in your facility such as isolating other residents.

- To support and assist you to the extent hospital transfer is required.

- We understand that many of you are not going to have the level of PPE that is often more readily available in hospital.

- If you are in need of certain PPE, contact your local county emergency manager if you cannot get it through your regular supply chain or if that is going to be delayed.

AMERICAN OVERSIGHT

- While it is not a guarantee that the state will be able to turn that supply around to you, it will at least be recorded as a mission and a need – so the state can have a statewide perspective on what supplies are needed where.

- But again your local county health department and their skilled staff can help support you the moment you suspect someone may need to be tested or transferred to the hospital.

- We have over 11 long-term care facilities that have a suspected or confirmed COVID-19 case.

Prepare for Surge

- Hospitals across Florida must begin to plan for and develop a strategy for patient volume and complexity in the event of a surge of patients.
- CEOs, Administrators and medical team leadership must prepare now for how they will triage patients, allocate PPE resources and other critical life-saving equipment.
- Prepare contingency plans for capacity for hospitalization, ICU beds and ventilator supply.
- Develop and Refine protocols that define how patients will be triaged for admission, observation, discharge, and quarantine in a potential surge environment.
- Identifying locations and staffing plans that separate vulnerable patients from COVID-19 activities must be carefully considered.

- Hospitals systems should consider post-poneing elective surgeries, and taking additional steps to reduce non-life threatening procedure demand on doctors and nurses.

- Health systems in every community should begin planning for how they will communicate internally with their workforce, and externally to the public about hospital operations.

- A designated communications strategy will ensure patients and their families are equipped with just as much actionable information as hospital personnel.

Ventilators

- Hospitals should be taking inventory of ventilators for potential surge of critical patients.

- Ventilators assist respiratory functions – and are a vital medical support for patients in the critical stages of COVID-19.

AMERICAN OVERSIGHT

- Hospital should be planning and preparing to acquire more ventilators, and should look at purchasing or rental markets to explore options.

Personal Protective Equipment

- All hospitals should communicate and provide training on proper donning and doffing of personal protective equipment, including fit testing of N95 masks.
- Facilities should be monitoring rates of PPE use to ensure adequate supply.
- Inventories should be taken on PPE, to include burn rate of equipment, next anticipated delivery of PPE supplies and proper allocation to health care staff.

Exploring Financial Assistance for Medicaid Providers

- The state is cognizant of the economic hardships that may be faced by Medicaid Providers
- Our Agency will do everything possible to ensure providers can continue offering critical services in Florida
- We will do what is allowable within federal guidelines to ensure a prompt response to issues as they arise
- The Agency is exploring opportunities to make advanced payments to hospitals and providers that face financial hardships due to their COVID-19 response in order to stabilize and ensure continuity of care.
- Our Agency is currently monitoring the COVID-19 bill that is moving through Congress. This proposed FMAP increase could potentially provide additional funding to hospitals through the LIP program.
- Our Agency is also exploring relief for Medicaid providers with outstanding debt owed, by temporarily suspending terms of payment agreements for 90 days.

Subject: [External] RE: Call this morning

Thank you very much for the information shared on the call today. During the call, it seemed as though assisted living facilities are presently directed, superseding any provision of law to the contrary, to screen visitors in accordance with the criteria available at http://ww11.doh.state.fl.us/comm/_partners/action/covid19_screening_facilities.pdf and to deny entry to any visitor meeting these criteria. Additionally, it seemed that any resident of an assisted living facility who meets these criteria or has had contact with anyone who meets the criteria (Example discussed was a resident leaving the Assisted Living Facility to visit a relative who had recently travelled internationally) are not to be permitted to return to the assisted living facility for 14 days. To help ensure our communities are fully compliant, can you confirm that the above is accurate and whether/when there will be an official directive memorializing such? We would be glad to assist in disseminating this information to our member communities. Thank you all for your work to protect those most vulnerable during this trying time.

Thanks,
Mike

Subject: [External] Call this morning

Good morning Director Moskowitz, and Secretary Mayhew ,

In preparation for this morning call with Assisted Living Facilities and other Health Care providers I wanted to share some of the questions we have begun to receive.

1. While communities have been screening staff, residents and visitors will there be an official provision for superseding 429.28 1 (d) ...."visiting with any person of his or her choice" ?
2. Will there be any relief in regards to staffing if/when communities start seeing a rise in employees that are affected and unable to work 59A-36.010?
3. Will there be encouragement for sister or friendly communities to partner together to address staffing needs thus potentially requiring them to go over occupancy to manage the residents in one location? 429.71
4. Will DOH be removing residents that are symptomatic and tested positive from these facilities and creating isolation sites as I know we do not want to inundate hospitals?
5. What specific isolation precautions should ALF's (non-medical communities) be putting into place. Remembering we have all sizes 3-350 in the state some with clinical support and majority without?

If you have any questions please feel free to call myself or Mike.

My best,

Jason,

Here's a link to the toolkit developed:
https://www.fhca.org/images/uploads/pdf/FHCACOVIDVisitorScreeningToolkit.pdf

This toolkit was developed by the Florida Health Care Association collaboratively with the Department of Health and the Agency of Health Care Administration. It was distributed by AHCA to hospitals, nursing homes, assisted living facilities and other residential providers. We recognize that facilities need to be overly cautious at this time to protect their patients and residents.

Thanks,

Katie

RON DESANTIS
GOVERNOR

MARY C. MAYHEW
SECRETARY

Home | About Us | Medicaid | Licensure & Regulation | Report Fraud

The Agency for Health Care Administration would like to thank the Florida Health Care Association for working to develop a facility visitor screening toolkit that encompasses the most current Centers for Medicare and Medicaid Services (CMS) and Centers for Disease Control (CDC) guidelines. Ensuring all facilities are properly screening—and if necessary, restricting visitors—is of the upmost importance at this time. Although this guidance applies to nursing homes, many sections are appropriate for other facility types and should be followed where applicable.

The Agency is making this available as a resource to your facility. Please also review the recent memo from CMS outlining additional guidance to nursing homes to help them improve their infection control and prevention practices to

AMERICAN OVERSIGHT

prevent the transmission of COVID-19, including revised guidance for visitation: https://www.cms.gov/medicareprovider-enrollment-and-certificationsurveycertificationgeninfopolicy-and/qso-20-14-nh.pdf.

This visitor screening toolkit contains:

- COVID-19 (Respiratory) Checklist
- Sample Letter to Residents, Families and Visitors on Screening Protocol
- Sample Communication to Vendors or Business Partners
- COVID-19 Screener Competency Checklist
- Visitor Screening Tool
- Screener Sign-In Form
- Sample Letter to Employees
- Employee Screening Tool
- Signage from the CDC, including handwashing signage
- Sample signage for visitor screening protocols

The toolkit can be found here: https://www.fhca.org/images/uploads/pdf/FHCACOVIDVisitorScreeningToolkit.pdf

The Agency recognizes that facilities need to be overly cautious at this time to protect their patients and residents. Comprehensive screenings may include temperature taking and restricting visitors if necessary.

The Agency for Health Care Administration is committed to better health care for all Floridians. The Agency administers Florida's Medicaid program, licenses and regulates more than 44,000 health care facilities and 53 health plans, and publishes health care data and statistics at www.FloridaHealthFinder.gov. Additional information about Agency initiatives is available via Facebook (AHCAFlorida), Twitter (@AHCA_FL) and YouTube (/AHCAFlorida).

Subject: IMPORTANT: Travel Restrictions for Employees of the State Personnel System (COVID-19)AP

Good Afternoon AHCA Employees,

See below guidance received from the Department of Management Services as it pertains to travel restrictions for state employees.

AMERICAN OVERSIGHT

If you or your immediate household/family members have traveled internationally, and returned in the last 14 days, please raise this circumstance to your bureau chief.

Please know that AHCA's Executive Leadership Team is evaluating next steps and will pass along additional information as it becomes available.

As always if you have additional questions, please feel free to reach out to Human Resources at 850-412-3900.

Mary

MARY C. MAYHEW – SECRETARY
Florida Agency for Health Care Administration

Subject: [External] IMPORTANT: Travel Restrictions for Employees of the State Personnel System (COVID-19)AP

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Today, Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning

AMERICAN OVERSIGHT

home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Thank you in advance for joining in efforts to reduce the spread of COVID-19. We will continue to closely monitor and evaluate available information and guidance as this is a rapidly evolving situation.

We appreciate your patience and commitment to protecting our communities. If you have questions, please call John Apthorp at (850) 922-1274.

Here's why the state of Florida won't say how many COVID-19 tests take place in a county

Alessandro Marazzi Sassoon, Florida Today

AMERICAN OVERSIGHT

As the novel coronavirus spreads across the country, the response by states has been subjected to constant scrutiny. Florida health authorities have been particularly tight-lipped about the information they have chosen to release.

While Florida health officials are identifying the counties where positive cases of COVID-19 have been identified, including the age, gender of individuals and whether an individual engaged in foreign travel, the state so far is refusing to provide localized county-level data on how many were being tested and monitored for the virus.

Initially even that data was not released. Gov. Ron DeSantis cited health privacy laws as the reason for keeping a lid on the information during televised press conferences. But officials ended up releasing the limited data it does after public pressure.

States such as New York, on the other hand, have released much more detail about the scope of testing, monitoring and surveillance, identifying public buildings such as schools or places of worship as possible contagion points.

"We cannot confirm where patients are being monitored," the state's COVID-19 joint information center said in a statement to FLORIDA TODAY.

While the state said they "appreciate the desire" to know how the data breaks down by county, "balancing the privacy of the individuals being tested and monitored and the confidentiality of the epidemiological investigations with the responsibility to Floridians to disclose information to protect the public is a vital role of the Florida Department of Health."

"The DOH strives to protect the identity of individuals tested or affected by COVID-19, while also ensuring information necessary for the public health is available," they said. As such the DOH said it was "unable" to break down the data by community.

Under federal law, states are required to share the "minimum necessary to protect the public," said MarilynUzdavines, a health privacy law expert at Nova Southeastern University's Shepard Broad College of Law. And while she notes that providing a county-by-county breakdown of the data seems like it wouldn't identify individuals, it's at the state's discretion to decide what information it wants to make public.

"They are limited in what they can disclose under Florida Law, unless it is "necessary to public health." So someone, somewhere is making the judgement call that as of now, they can't release more info because the privacy interests outweigh public health," said Jennifer Bard, a professor at the University of Florida's Levin College of Law.

That judgement call leaves the public with little choice but to trust that they are being told what they need to know.

"We do have to just trust that the people that we've elected and put in those positions are acting for the public good," said NSU's Uzdavines.

Jay Wolfson, a public health professor and associate dean at the University of South Florida's Morsani College of Medicine, said the state, like the federal government was slow to react, and now they are doing the best they can with what they have.

AMERICAN OVERSIGHT

"We are just getting started with this, and even though it's later than it should be, the state is just organizing it's resources and trying to do a good job figuring our how it can do what it needs to do with limited resources and limited experience," he said.

"Before it begins thinking about reporting everything it has got, it needs to know that all of their data are valid and reliable and complete and have use."

For now, Wolfson notes that the relatively low number of reported cases, compared to Washington or New York states, mean the state can simply say there isn't a compelling reason to release detailed data about cases.

He suspects the state is presently able to isolate, quarantine, mitigate or otherwise manage cases such that their present focus is still broadcasting general public education telling people when to come in for testing, what to look for and "to take personal responsibility."

An outline of the process when the Department of Health is notified of a positive case was detailed to FLORIDA TODAY by the state's joint information center:

According to an email: "The Department conducts an extensive epidemiological investigation in conjunction with the CDC to identify individuals who may have had close contact with the virus. Those individuals are then notified by their county health department and instructed to self-isolate for 14 days after their exposure to the virus, and to contact their county health department and health care provider immediately if they develop symptoms."

Testing kits

Across the state, like across the nation, a shortage of testing kits continues to be an underlying problem, Wolfson notes.

On Thursday Gov. DeSantis said the state had ordered 2,500 kits, enough to perform 625,000 tests. As of Thursday afternoon, 301 tests have been negative, 30 cases have been positive, and 147 test results are pending.

Even so, Wolfson describes that additional testing capacity as a "drop of sand on the beach."

Wolfson also points out that the Department of Health is also struggling with the fact that its budget and staff have been cut over the last eight years, particularly under Gov. Rick Scott's administration.

"I think this is a wake up call for the state recognize how valuable the Department of Health is and public health function is," Wolfson said.

"I'm not gonna make apologies for the state of Florida. It's truly been a bit of a national disgrace that we've gotten started this late," he said, but added that we have to have some level of faith that the government is trying to work in our best interest.

Wolfson added that preaching preventive measures like hand-washing is far more important than knowing where testing is taking place.

AMERICAN OVERSIGHT

"The way that we have to treat this disease now from a public health perspective is not to create fear and panic, it's to say: you, individual, must take responsibility for your life and your health and your family, because no one else is going to do it," he said.

At the same time, he said, it wasn't going to be easy.

"These next few months are gonna create discomfort, confusion, anxiety, changes of habits. And we're learning more about what this may mean every day."

Gov. DeSantis recommends all mass gatherings be postponed, official state travel suspended

Governor Ron DeSantis held a news conference Thursday at 11:30 a.m. from Jackson Memorial Hospital in Miami.

DeSantis announced all official travel for state employees has been suspended for 30 days.

The governor also strongly recommended all mass gatherings be postponed, saying he did not have the authority to require them to be canceled. Health officials say they currently consider mass gatherings to be more than 250 people.

He was joined by Lieutenant Governor Jeanette Nuñez, Agency for Health Care Administration Secretary Mary Mayhew, Jackson Health System President and CEO Carlos Migoya, Miami-Dade County Mayor Carlos Giménez, Miami-Dade County Commission Chairwoman Audrey Edmonson.

Watch the full press conference below.

As coronavirus fears mount, some South Florida elders stay home or suspend daily care

BY BAILEY LEFEVER, MIAMI HERALD
MARCH 12, 2020 02:11 PM

Maria Castellano canceled her mother's physical therapy appointment Tuesday at a Westchester care center. While the therapy is important, Castellano said, protecting the 88-year-old from the coronavirus, which causes a respiratory illness that preys on elders, is more critical.

Castellano's mother, Aurelia Castellano, does physical therapy a couple of days each week with plastic balls and a stationary bike. But her mother has told her they don't sanitize the equipment between use.

"I do not feel comfortable at all that she is going there," Maria Castellano said. "They don't do that much of a cleaning for the older people."

AMERICAN OVERSIGHT

So she canceled her mother's Thursday and Friday appointments too.

Public health administrators have expressed their greatest concern for nursing home residents: In Washington, 23 of the state's 30 coronavirus deaths have been linked to a single nursing home. On Wednesday, Gov. Ron DeSantis signed an executive order restricting visitation at Florida nursing homes and assisted living facilities.

But the global pandemic is exacting other changes, both subtle and severe, among South Florida elders, many of whom depend upon health and service programs for daily care and socialization.

Across South Florida, frail and compromised elders gather for such things as physical and occupational therapy, exercise and cooking classes, computer workshops and other forms of entertainment. For some, the programs are a lifeline, their only opportunity to interact with others, exercise their minds and bodies — or even just leave the house.

Maria Castellano, 70, has lived with her mother since the older woman fell while using her walker last year. She says she sanitizes her mother's belongings regularly with alcohol and wipes. But she worries about those who don't have a caregiver — and about conditions outside the women's home.

"If we don't protect them, it's hard for a lot of these people [to protect themselves]," she said.

To date, health regulators have identified only one nursing home or ALF where the COVID-19 virus has spread. Health administrators have linked the deaths of 23 people to the Life Care Center nursing home in Kirkland, Wash. Another 64 people at LIfe Care, employees of the home, have shown symptoms of the disease, which was declared a pandemic this week by the World Health Organization.

Florida health administrators have identified 27 Florida residents known to have contracted the coronavirus, including seven from Broward County, and one from Miami-Dade — a new case was announced midday Thursday from Altamonte Springs. Two Florida residents have died from the disease, the health department said. As health administrators work to contain the virus' spread, senior centers are a particular source of concern.

Miami-Dade County holds 34 licensed rehabilitation centers. But with one of the highest concentrations of elders in the country, the region also supports 165 licensed adult day care centers and 830 assisted living facilities, according to the Florida Agency for Health Care Administration.

Resident health and safety should be the top priorities of any senior facility, said Nick Van Der Linden, a spokesman for Leading Age Florida, an industry group that represents more than 500 senior nursing homes, rehabilitation centers and assisted living facilities in Florida — with more than 80,000 clients.

Van Der Linden said the organization is making sure its member facilities follow the U.S. Centers for Disease Control and Prevention and state guidelines for screening visitors who have traveled overseas or show symptoms. The protocols include taking the temperature of all residents and staff daily, and then sending home those employees who have been exposed to the virus or show symptoms.

Some of Leading Age's facilities have been "extremely proactive," and began following these protocols as early as two weeks ago, he said.

"The number one goal is preventing the virus from entering the community and ensuring the health of our residents," he said.

AMERICAN OVERSIGHT

Letty Hidalgo-Gato lives in South Miami and goes to a therapy center to treat the pain in her right leg, which cannot be alleviated with surgery due to her age.

"I went on Monday, and I said 'Oh my God, they aren't doing anything,' " to ensure patients are protected from the spread of infection, she said.

Hidalgo-Gato said she had planned to stay away from the facility — at least for the time being — unless she could feel more confident that patients are safe from possible contagion. The 83-year-old is disappointed that she may have to stay home: She loves the treatment. And it helps ease the pain she feels from the bones in her leg grinding together.

"If I don't go, it will negatively impact me," she said.

Hidalgo-Gato decided to go back again Thursday, and found that the center now had disinfectant available and used it to wipe down her equipment when she asked — though she remarked, "I think that if you do not ask, they will not do it."

Hidalgo-Gato is also concerned about conditions at her condo at Metro South Senior Apartments in South Miami. While managers have posted signs at the condo's entrance warning residents to wash their hands, and distributed informational packets, they haven't provided hand sanitizer or disinfectant.

"People are so afraid of having the coronavirus," said Susan Soto, another of the building's residents.

The building's management said it is responding to concerns as they arise.

"While maintenance requests are still available, we will first confirm if anyone is sick in the apartment before completing the request," a notice in the lobby reads. "Specific resident requests can be accommodated on a case-by-case basis."

Residents can also fill out a form with any issues they're having, said Kristin Nalsan, regional property manager for Pinnacle, the company that runs Metro South Senior Apartments.

Soto, who is 76, has had complications since a heart attack years ago. So when she first heard the disease was spreading, she paid extra attention to it.

"The cleanliness of the building leaves a lot to be desired," Soto said.

Now, when Soto ventures downstairs in the elevator, she pulls her sleeve up over her hand to not make contact.

"Here in this building I don't want to touch anything," Castellano said.

The building on Sunset Drive has a community kitchen, foyer, patio, community room and a gym. Occasionally a maintenance worker is brought in to clean the carpets, but other than that, Castellano said, the residents do all the cleaning themselves.

"Inside of this building, there's no care for coronavirus at all, and this building is composed of people 65 or older, so they should have somebody here cleaning," Maria Castellano said.

As fears of COVID-19 have spread, Maria Castellano has discouraged her mother from leaving the apartment, and Aurelia Castellano has not been outside for more than a week.

"I'm not moving her from here at all," Maria Castellano said.

Aurelia Castellano normally paces the halls of her building every day, passing through a community kitchen and onto an outdoor patio. She loves to spend time with her neighbors, or to sit outside and get some sun.

AMERICAN OVERSIGHT

"I had to stop that, too, because, you know, this building's so dirty," her daughter said. "I don't want her to do anything outside the house."

"She told me yesterday that walking makes her feel so good," Castellano said. For now, Aurelia Castellano is stuck pacing her apartment throughout the day, Maria Castellano said. She walks in between the two rooms over and over.

It might be a while until Aurelia Castellano laces her sneakers again. And she's very upset about it, her daughter said.

She told her daughter, "Oh wow, this is the last thing we need right now."

Subject: Re: Information push request

Converted into a bulleted format for review:

The Agency for Health Care Administration wants to ensure patients and staff are protected by following CDC infection prevention and control guidelines, including use of recommended personal protective equipment (PPE). Please review the information below and evaluate your facilities' practices when admitting and triaging/screening patients with respiratory symptoms as they enter your emergency department. Guidance of note includes:

- Immediately place a face mask on any individual entering the emergency department or triage/screening area of the hospital who presents with a cough, fever, runny nose, etc. This patient should be held in a separate triage area if not already.
  - If worn properly, a facemask helps block respiratory secretions produced by the wearer from contaminating other persons and surfaces.
- All staff working triage desk must wear appropriate PPE (face mask, etc.)
- Staff must be properly trained on the usage of PPE and the prevention of transmission of infectious agents.
  - Information on how to properly don, use, and doff PPE in a manner to prevent self-contamination is available here: https://www.cdc.gov/hai/pdfs/ppe/PPE-Sequence.pdf
  - OSHA has several respiratory training videos available here: https://www.osha.gov/SLTC/respiratoryprotection/training_videos.html
- Complete routine cleaning and disinfection procedures of spaces where patients with respiratory symptoms are triaged/screened.

Keep up to date on the recommendations for preventing spread of COVID-19 on CDC's website: https://www.cdc.gov/coronavirus/2019-ncov/hcp/caring-for-patients.html

The Agency encourages you to visit the Department of Health's dedicated COVID-19 webpage at www.FloridaHealth.gov/COVID-19. This remains the best and most up-to-date resource for information and guidance regarding COVID-19 in Florida.

Subject: Re: Information push request

Made updates below. The CDC still uses PUI but I don't see where DOH does anymore. Edited to use the DOH terminology.

AMERICAN OVERSIGHT

The Agency for Health Care Administration wants to ensure patients and staff are protected by following CDC infection prevention and control guidelines, including use of recommended personal protective equipment (PPE). Please review the information below and evaluate your facilities' practices when admitting/triaging patients with respiratory symptoms as they enter your emergency department. Guidance of note includes:

- Any individual entering the emergency room or triage area of the hospital who presents with a cough, fever, runny nose, etc., should immediately be placed in a mask and possibly held in a separate triage area if not already.
- All staff working triage desk must wear appropriate PPE.
- Staff must be properly trained on the usage of PPE and the prevention of transmission of infectious agents

Detection and Triage of PUI

Prompt detection and effective triage and isolation of potentially infectious patients are essential to prevent unnecessary exposures among patients, healthcare personnel, and visitors at the facility. Implement triage procedures to detect persons under public health monitoring for COVID-19 during or before patient triage or registration (e.g., at the time of patient check-in) and ensure that all patients are asked about the presence of symptoms of a respiratory infection and history of travel to areas experiencing transmission of SARS-CoV-2, the virus that causes COVID-19, or contact with possible COVID-19 patients.

Ensure proper use of personal protection equipment (PPE). Place a facemask over the patient's nose and mouth if that has not already been done and isolate the possible COVID-19 patient in an Airborne Infection Isolation Room (AIIR), if available. If worn properly, a facemask helps block respiratory secretions produced by the wearer from contaminating other persons and surfaces

Staff who come in close contact with confirmed or possible patients with COVID-19 (this includes staff working a triage desk) should also wear the appropriate PPE. Information on how to properly don, use, and doff PPE in a manner to prevent self-contamination is available here: https://www.cdc.gov/hai/pdfs/ppe/PPE-Sequence.pdf

Train and Educate Staff

Provide staff with job- or task-specific education and training on preventing transmission of infectious agents, including refresher training.

Healthcare staff must be medically cleared, trained, and fit tested for respiratory protection device use (e.g., N95 filtering facepiece respirators), or medically cleared and trained in the use of an alternative respiratory protection device (e.g., Powered Air-Purifying Respirator, PAPR) whenever respirators are required. OSHA has a number of respiratory training videos: https://www.osha.gov/SLTC/respiratoryprotection/training_videos.html

Staff should be educated, trained, and have practiced the appropriate use of PPE prior to caring for a patient, including attention to correct use of PPE and prevention of contamination of clothing, skin, and environment during the process of removing such equipment.

Environmental Cleaning and Disinfection

Routine cleaning and disinfection procedures are appropriate for SARS-CoV-2 in healthcare settings, including those patient-care areas in which aerosol-generating procedures are performed. Products with EPA-approved emerging viral pathogens claims are recommended for use against SARS-CoV-2. Management of laundry, food service utensils, and medical waste should also be performed in accordance with routine procedures.

Completely agree. Also I thought you said they weren't using the phrase person under investigation anymore? And I don't think it is all that common to use the acronym HCP regarding healthcare personnel. Finally we should consider whether or not there should be a logo from DOH along with our logo when we send this out to the hospitals are we just sending this to hospitals or is this intended to go to any other facilities?

Can we create the TOP 5 bullets before diving into the more formal CDC Guidance

· Any individual entering the E.R. or triage of the hospital who presents with a cough, fever, runny nose, etc., should immediately be placed in a mask and possibly held in a separate triage area.

· All staff working triage desk must have and wear appropriate PPE.

Please see the draft below for review. Thank you.

The Agency for Health Care Administration wants to ensure patients and staff are protected by following CDC infection prevention and control guidelines, including use of recommended personal protective equipment (PPE). Please review the information below and evaluate your facilities' practices when admitting/triaging patients with respiratory symptoms as they enter your emergency department.

Detection and Triage of PUI

Prompt detection and effective triage and isolation of potentially infectious patients are essential to prevent unnecessary exposures among patients, healthcare personnel, and visitors at the facility. Implement triage procedures to detect persons under investigation (PUI) for COVID-19 during or before patient triage or registration (e.g., at the time

AMERICAN OVERSIGHT

of patient check-in) and ensure that all patients are asked about the presence of symptoms of a respiratory infection and history of travel to areas experiencing transmission of SARS-CoV-2, the virus that causes COVID-19, or contact with possible COVID-19 patients.

Ensure proper use of personal protection equipment (PPE). Place a facemask over the patient's nose and mouth if that has not already been done and isolate the PUI for COVID-19 in an Airborne Infection Isolation Room (AIIR), if available. If worn properly, a facemask helps block respiratory secretions produced by the wearer from contaminating other persons and surfaces

Healthcare personnel who come in close contact with confirmed or possible patients with COVID-19 (this includes staff working a triage desk) should also wear the appropriate PPE. Information on how to properly don, use, and doff PPE in a manner to prevent self-contamination is available here: https://www.cdc.gov/hai/pdfs/ppe/PPE-Sequence.pdf

Train and Educate Healthcare Personnel

Provide HCP with job- or task-specific education and training on preventing transmission of infectious agents, including refresher training.

HCP must be medically cleared, trained, and fit tested for respiratory protection device use (e.g., N95 filtering facepiece respirators), or medically cleared and trained in the use of an alternative respiratory protection device (e.g., Powered Air-Purifying Respirator, PAPR) whenever respirators are required. OSHA has a number of respiratory training videos.

HCP should be educated, trained, and have practiced the appropriate use of PPE prior to caring for a patient, including attention to correct use of PPE and prevention of contamination of clothing, skin, and environment during the process of removing such equipment.

Environmental Cleaning and Disinfection

Routine cleaning and disinfection procedures are appropriate for SARS-CoV-2 in healthcare settings, including those patient-care areas in which aerosol-generating procedures are performed. Products with EPA-approved emerging viral pathogens claims are recommended for use against SARS-CoV-2. Management of laundry, food service utensils, and medical waste should also be performed in accordance with routine procedures.

Molly –

DOH (Samantha Cooksey) just said AHCA not DOH should take the lead on drafting content for the e-blast to the hospitals. Dr. Rivkees would like the information sent out to include:

- Direction that upon entering the E.R. door or triage of the hospital...if someone has a cough, fever, runny nose, etc., they should immediately be placed in a mask and possibly held in a separate triage area.
- Make sure they protect their staff including those working the triage desk.
- Make sure staff are trained on airborne pathogens, how to appropriately don PPE, etc.
- Include links to information like CDC guidance or guidance on how to use PPE and surface cleaning.

AMERICAN OVERSIGHT

DOH would like to review the draft before it is distributed to the hospitals.

Thanks,
Kim Stewart & Rebecca Willis

Subject: Information push request

Dr. Rivkees stopped by and requested information get pushed out to the hospitals (possibly via eblast). He stated the message should be that everyone should have a mask immediately upon entering the ED with a cough (including triage) and possibly have a separate waiting area. Also, to be sure the staff is protected (including triage desk), and trained on airborne contaminations, how to appropriately don PPE, and surface cleaning.

DOH is working on the content.

In order to protect Florida's most vulnerable populations, the Florida Division of Emergency Management issued an Emergency Order temporarily restricting visitation to:

- nursing homes,
- assisted living facilities (ALF),
- adult family care facilities,
- intermediate care facilities (ICF), and
- Agency for Persons with Disabilities (APD) group homes.

The following conditions will be placed on anyone seeking to visit these facilities:

- Any person infected with COVID-19 who has not had two consecutive negative test results separated by 24 hours; or
- Any person showing or presenting signs or symptoms of a respiratory infection, including cough, fever, shortness of breath or sore throat; or
- Any person who traveled internationally is prohibited from visiting a facility until 14 days after their return to the United States; or
- Any person who traveled on a cruise ship is prohibited from visiting a facility until 14 days after their return to the United States; or
- Any person who has or may have been in close contact with a person(s) infected with COVID-19 who has not tested negative for COVID-19 is prohibited from visiting a facility until 14 days after their interaction with the person(s) who is infected with COVID-19; or
- Any person who resides in a community where community-spread of COVID-19 is occurring.

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

EFFECTIVE IMMEDIATELY IN ALL RESIDENTIAL / LONG TERM CARE FACILITIES:

- **ALL STAFF AND ANYONE ENTERING THE FACILITY MUST WEAR A FACIAL MASK AT ALL TIMES**
- **GLOVES WHEN PROVIDING DIRECT CARE TO A PATIENT OR RESIDENT**

Effective immediately staff of residential and long term care facilities are to implement universal use of facial masks while in the facility. All staff, essential healthcare visitors and anyone entering the facility are to don a mask upon the start of their shift or visit and only change it once it becomes moist. It is important to keep hands away from the mask and only touch the straps of the mask. **Gloves are to be worn when providing care to the resident.** Continue to perform hand hygiene prior to donning gloves, after removing gloves, and anytime there is contact with the resident environment.

Staff in a room with a patient with respiratory symptoms of unknown cause or a patient with known or suspected COVID-19 should adhere to Standard, Contact, and Droplet Precautions with eye protection. This includes wearing gown, gloves, N95 mask (as fitted and available – if not available, at least a facial mask), and eye protection such as face shields or goggles.

In addition to securing more gowns, gloves, and masks, facilities will need to immediately order the appropriate eye protection (I.e. face shields) since many do not have this on hand. In the event you are unable to acquire the necessary PPE, please notify your local emergency management agency.

GUIDANCE ON USE AND CONSERVATION OF Personal Protective Equipment (PPE)

Facilities will need to educate their staff on the proper donning (putting on), doffing (taking off), and disposal of any PPE.

Information about the recommended duration of Transmission-Based Precautions is available in the Interim Guidance for Discontinuation of Transmission-Based Precautions and Disposition of Hospitalized Patients with COVID-19

For more information on conserving PPEs supplies the facility should refer to the information on the CDC website.

Gloves – Frequently Asked Questions

- **What type of glove is recommended to care for suspected or confirmed COVID-19 patients in healthcare settings?**
    - Nonsterile disposable patient examination gloves, which are used for routine patient care in healthcare settings, are appropriate for the care of patients with suspected or confirmed COVID-19.

AMERICAN OVERSIGHT

- **Is double gloving necessary when caring for suspected or confirmed CoVID-19 patients in healthcare settings?**

    - CDC Guidance does not recommend double gloves when providing care to suspected or confirmed 2019-COVID patients.

- **Are extended length gloves necessary when caring for suspected or confirmed COVID-19 patients in healthcare settings?**

    - According to CDC Guidance, extended length gloves are not necessary when providing care to suspected or confirmed COVID-19 patients. Extended length gloves can be used, but CDC is not specifically recommending them at this time.

- **How I do put on (don) and take off (doff) my mask and gloves?**

    - Check to see if your facility has guidance on how to don and doff PPE. The procedure to don and doff should be tailored to the specific type of PPE that you have available at your facility.

    - If your facility does not have specific guidance, the CDC has recommended sequences for donning and doffing PPE.

    - It is important for HCP to perform hand hygiene after removing PPE. Hand hygiene should be performed by using an alcohol-based hand sanitizer that contains 60-95% alcohol or washing hands with soap and water for at least 20 seconds. If hands are visibly soiled, soap and water should be used before returning to alcohol-based hand sanitizer.

AMERICAN OVERSIGHT

Coronavirus 2019 (COVID-19) Visitor Screening Toolkit
A Resource for Long Term Care Centers
March 2020

The most effective way to protect your residents from coronavirus disease (COVID-19) is to prevent the disease from entering your nursing center. Thorough screening of staff, vendors and visitors can help prevent potential virus transmission to your residents and is essential. The following are best practices for Florida nursing centers in establishing effective screening protocols. This includes a COVID-19 Respiratory Checklist (Attachment 1) for an effective COVID-19 control and prevention process.

For additional resources and ongoing updates on COVID-19, visit the FHCA dedicated coronavirus web page at www.fhca.org/facility_operations/coronavirus.

Visitor Screening and Criteria

According to the March 4, 2020, Centers for Medicare and Medicaid Services (CMS) Memo *QSO-20-14-NH, Guidance for Infection Control and Prevention of COVID-19*, nursing homes should monitor and/or limit visitors. Nursing homes should screen visitors for the following:

- International travel within the last 14 days to CDC identified countries with travel restrictions (for updated information on travel-restricted countries visit https://www.cdc.gov/coronavirus/2019ncov/travelers/index.html)
- Has had contact with someone who tested positive or is under investigation for COVID-19
- Signs or symptoms of a respiratory infection, such as a fever, cough, and sore throat

Each nursing home should designate staff members, trained in screening protocols, monitor the entrance to the facility and actively screen all persons entering it. All visitors should sign in and out on a visitor's log.

Tools to Develop Visitor Screening Protocols:

- Template letter for residents, family members and visitors, educating them about COVID-19 and policies of the nursing home to prevent its spread (Attachment 2);
- Template communication to vendors requested they not enter the nursing home if they are potentially at risk of carrying the COVID-19 virus (Attachment 3);
- COVID-19 Screener Competency tool for documenting training for staff assigned to screen all visitors and vendors entering the nursing home (Attachment 4);
- Two template Visitor Screening Tools that may be used to screen all persons entering the nursing home (Attachment 5 and 6); and
- Screener Sign-In Log to document staff members was conducted screenings (Attachment 7).

AMERICAN OVERSIGHT

Regulations About Limiting Access to the Nursing Home

According to the March 4, 2020 CMS Memo *QSO-20-14-NH*, if visitors meet the above criteria, nursing homes may restrict their entry to the facility. Regulations and guidance related to restricting a resident's right to visitors can be found at 42 CFR §483.10(f)(4), and at CMS' State Operations Manual Appendix PP, Tag F-563. Specifically, a nursing home may need to restrict or limit visitation rights for reasonable clinical and safety reasons. This includes, "restrictions placed to prevent community-associated infection or communicable disease transmission to the resident.

A resident's risk factors for infection (e.g., immunocompromised condition) or current health state (e.g., end-of-life care) should be considered when restricting visitors. In general, visitors with signs and symptoms of a transmissible infection (e.g., a visitor is febrile and exhibiting signs and symptoms of an influenza-like illness) should defer visitation until he or she is no longer potentially infectious (e.g., 24 hours after resolution of fever without antipyretic medication)."

Employee Screening

According to the March 4, 2020, CMS Memo *QSO-20-14-NH*, the same screening performed for visitors should also be performed for facility staff. Health care providers (HCP) who have signs and symptoms of a respiratory infection should not report to work. Any staff who develop signs and symptoms of a respiratory infection while on the job, should:

- Immediately stop work, put on a facemask, and self-isolate at home;
- Inform the facility's infection preventionist, and include information on individuals, equipment, and locations the person came in contact with; and
- Contact and follow the local health department recommendations for next steps (e.g., testing, locations for treatment).

Refer to the CDC guidance for exposures that might warrant restricting at risk, yet asymptomatic healthcare personnel from reporting to work.

Tools to Develop Staff Screening Protocols:

- Sample letter to educate staff on steps implemented to help reduce the potential for the virus to enter the nursing home (Attachment 8); and
    - Employee screening tool (Attachment 9).

Posting Information

It is important to post educational information that reminds employees and visitors to follow precautions to protect residents from the COVID-19. Attached are sample signage/infographics for facility use:

- Methods to Stop the Spread of Germs (Attachment 10);
- Hand Washing How-To (Attachment 11); and
- Coronavirus (COVID-19) Precautions to displayed at all entrances to your nursing home (Attachment 12).

**The information and materials provided in this toolkit are designed to serve as a best practice to support facilities' COVID-19 prevention activities. Facilities should consult their legal and clinical teams when developing and implementing any company-specific procedures and protocols.*

AMERICAN OVERSIGHT

Covid-19 (Respiratory) Checklist

	Assigned Person(s)
1) Infection Control and Prevention - Review of Guidelines (All Staff)	
• Review of current guidelines pertaining to respiratory illnesses	
• Education of guidelines and appropriate ICP procedures (including those from CDC on COVID-19)	
• Hand hygiene, cough etiquette/respiratory hygiene, including return demonstration of hand hygiene (hand washing and use of hand sanitizer	
2) Evaluate Supplies	
• Inventory of supplies (gown, gloves, masks, face shields, cleaning supplies)	
• Soap in bathroom for hand washing	
• Hand gel supplies for front desk and hallways; also for personal/individual use	
• Temp scanners for visitor/employee screening	
3) Front-Desk/Receptionist	
• Station(s) at entrances manned by nurse(s) – from 8a to 8p	
• Signage with printed education materials for visitors	
• Use of **Visitor Screening Tool**, including visitor temp, questionnaire	
4) Monitoring of Employee and Staff	
• Listing of employees working in another facility/setting	
• Listing of employees coming back from vacation and reach out to Health Department for guidance (i.e., if coming from South Korea, off for 14 days)	
• Process for residents temp daily x 14 days, including review of PCC Dashboard for temperature	
• Process for resident's skilled respiratory evaluation daily x 14 days	
• Line listing of residents with symptoms (fever, respiratory symptoms)	
• Line listing of employees with symptoms (fever, respiratory symptoms); use **Employee Screening Tool**. ***Note:*** Any employee with fever, not allowed to work for 48 hours or until fever subsides	
5) Housekeeping	
• Regular and routine cleaning of hand-rails, door knobs, any surfaces (at least daily, more if appropriate)	
• Terminal cleaning of rooms on droplet precautions	
6) Others	
• Referral process for new admission	
• Coordinate with local hospitals	
• Coordinate with local Health Department	
• Utensils in kitchen cleaned per code

Visitor Screening Resources

The following tools are provided to assist with developing visitor screening protocols:

- Template letter for residents, family members and visitors educating them about COVID-19 and policies of the nursing center to prevent its spread (Attachment 2)
- Template communication to vendors requested they not enter the nursing center if they potentially carry the COVID-19 virus (Attachment 3)
- COVID-19 Screener Competency tool to document training for staff assigned to screen all visitors and vendors entering the nursing center (Attachment 4)
- Template Visitor Screening Tools that may be used to screen all persons entering the nursing center (Attachment 5 and 6)
- Screener Sign-In Log to document who was conducting screenings (Attachment 7)

AMERICAN OVERSIGHT

****Template Letter to Residents, Families, Visitors on Center Letterhead****

*****Please Tailor as Needed*****

To Our Residents, Family Members and Visitors:

We know some of you may be concerned about the spread of COVID-19 (the new coronavirus) being reported in the media and how it may impact us here [Insert Center Name]. Ensuring residents are cared for in a safe and healthy environment is our greatest concern. At this time, we don't have any cases in our facility. The Centers for Disease Control and Prevention (CDC) and the Florida Surgeon General have recommended a variety of steps that we are implementing to help reduce the potential for the virus to enter our building. However, we need your help in battling COVID-19. Below are some examples of how you can help protect the residents, as well as prevent the spread throughout the community.

At this time, we request that you do not visit the center if you have or have had within the last 48 hours any symptoms of respiratory illness, or if you have recently spent time with anyone exhibiting any of these symptoms. Those symptoms include: cough, fever, sore throat, runny nose, and/or shortness of breath. We understand that connecting with family members is incredibly important, and there are a variety of other ways you might consider connecting with them. These may include telephone, email, text, or through Skype or Facebook.

The Florida Surgeon General has requested that all long-term care providers immediately implement health screening measures upon entry to the facility for all visitors, family, vendors and staff. Upon arrival at the facility, please check in with the health care professional stationed at the therapy entrance who will take your temperature, ask you to answer a brief questionnaire and provide you with handwashing and Coronavirus education. This health station will be open at the Therapy Entrance from 8:00 AM to 8:00 PM, 7 days a week. We would appreciate your limiting your arrival at the facility to that time window and that entrance. If you wish to arrive during a time outside this 12 hour window, please call the facility administrator to advise and we will schedule a screening upon your arrival. We also request that pet visits be suspended for the time being.

Our center is following the recommendations of the CDC on prevention steps, including following strict handwashing procedures, and in many circumstances, wearing gowns and gloves when interacting with residents who are sick. We also are staying up-to-date with the CDC recommendations as they are updated. In addition, here [Insert Center Name]. is in close contact with the local and state health department, as well as the Agency for Health Care Administration and are following their guidance.

We will notify you if any residents or staff are diagnosed with COVID-19. Should you have any questions, please feel free to contact our center at: here [Insert Center Phone Number] or one of the managers listed below.

Thank you for your cooperation as we all work together to keep our residents safe,

[Insert Center Key Contact Information].

AMERICAN OVERSIGHT

***** Sample Communication to Vendors/Business Partners******

Good afternoon valued vendor/business partner.

In an effort to protect [insert center name] residents and staff from COVID-19, we are asking that visitors and vendors not enter/visit the center for the following reasons:

- Fever greater than 100 degrees
- Cough, sneezing, or flu-like symptoms
- Recent travel to Italy, S. Korea, China, Japan and/or Iran in the past 14 days.

If this is going to inhibit any of the providers rendering services [insert center name], please contact [insert center point of contact].

We appreciate your understanding as we ensure the health and well-being of our residents and staff.

- Employee screening tool (Attachment 9)

AMERICAN OVERSIGHT

Template Letter to Employees on Center Letterhead

Please Tailor as Needed

To Our Employees:

We know some of you may be concerned about the spread of COVID-19 (the new coronavirus) being reported in the media and how it may impact us here at **[Enter Facility Name]**. Ensuring our staff and residents are in a safe and healthy environment is our greatest concern. At this time, we don't have any cases in our **[center/community]**. The Centers for Disease Control and Prevention (CDC) have recommended a variety of steps that we are implementing to help reduce the potential for the virus to enter our building. However, we need your help in battling COVID-19. Below are some examples of how you can help protect yourselves and our residents, as well as prevent the spread throughout the community.

1. **Sick employees should stay home.** At this time, we request that you stay home if you have any symptoms of respiratory illness. Those symptoms include: cough, fever, sore throat, runny nose, and/or shortness of breath.
2. **Notify us if you develop respiratory symptoms while at work.** These include: cough, fever, sore throat, runny nose, and/or shortness of breath.
3. **Practice proper hand washing hygiene.** All employees should clean their hands before and after interaction with residents and their environment with an alcohol-based hand sanitizer that contains at least 60-95% alcohol, or wash their hands with soap and water for at least 20 seconds. Soap and water should be used preferentially if hands are visibly dirty.
4. **Cover your mouth and nose with a tissue when coughing or sneezing.** Please review the CDC's information on coughing and sneezing etiquette.
5. **Perform routine environmental cleaning.** Routinely clean all frequently touched surfaces in the workplace, such as workstations, countertops, and doorknobs. Use the cleaning agents that are usually used in these areas and follow the directions on the label. No special cleaning is necessary for COVID-19.

Our **[center/community]** is following the recommendations of the CDC on using basic contact precautions to prevent the spread which includes wearing gowns and gloves when interacting with residents who are sick as we always do. We also are staying up-to-date with the CDC recommendations as they are updated. In addition, our **[center/community]** is in close contact with the local and state health department and are following their guidance. We are posting signs on our entryway doors to notify visitors of the symptoms of COVID-19 and request that they not enter the building if they are experiencing these symptoms.

We will notify you if any residents or staff are diagnosed with COVID-19. Should you have any questions, please feel free to contact **[PLEASE FILL IN APPROPRIATE CENTER CONTACT INFORMATION AND TAILOR TO MEET YOUR CENTER'S NEEDS.]**

For additional information, please visit the CDC's coronavirus disease information page.

Sincerely,

[FILL IN YOUR CENTER INFORMATION]

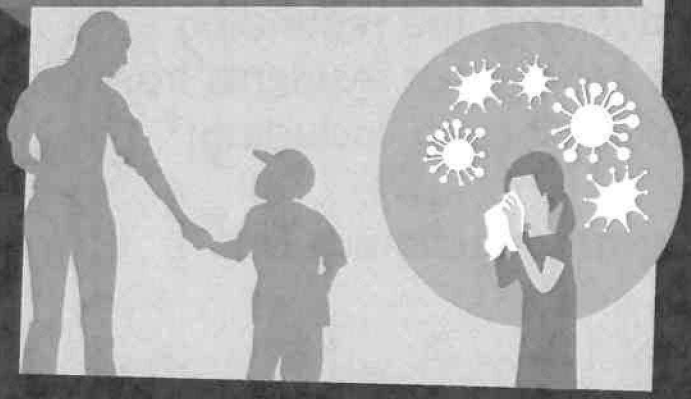
Signage/Infographics

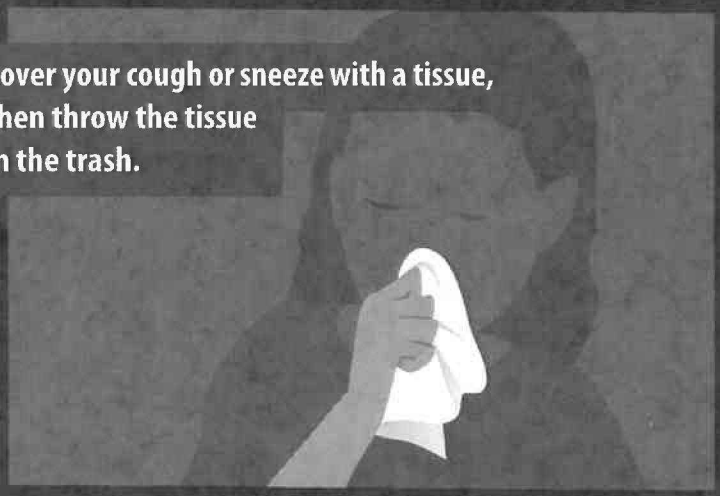
It is important to post information educating and reminding employees and visitors on precautions to protect residents from COVID-19. This section includes sample signage, including:

- Methods to Stop the Spread of Germs (Attachment 10)
- Hand Washing How-To (Attachment 11)
- Coronavirus (COVID-19) Precautions [for display at facility entrance (Attachment 12)]

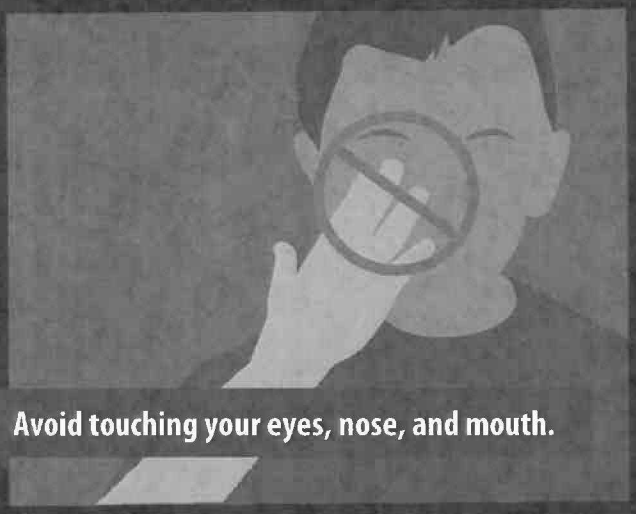


AMERICAN OVERSIGHT

COVID 19
CORONAVIRUS DISEASE

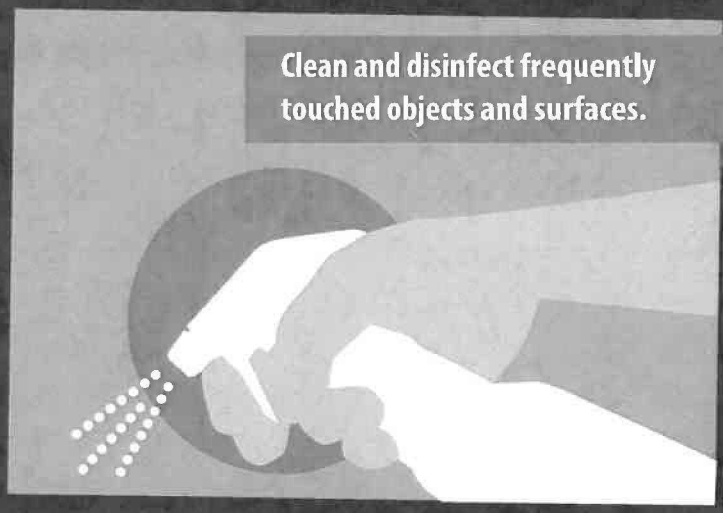


STOP THE SPREAD OF GERMS



Help prevent the spread of respiratory diseases like COVID-19.

Avoid close contact with people who are sick.



Cover your cough or sneeze with a tissue, then throw the tissue in the trash.

Avoid touching your eyes, nose, and mouth.

Clean and disinfect frequently touched objects and surfaces.

Stay home when you are sick, except to get medical care.

Wash your hands often with soap and water for at least 20 seconds.

CS314915-A

What to do if you are sick with coronavirus disease 2019 (COVID-19)

If you are sick with COVID-19 or suspect you are infected with the virus that causes COVID-19, follow the steps below to help prevent the disease from spreading to people in your home and community.

Stay home except to get medical care

You should restrict activities outside your home, except for getting medical care. Do not go to work, school, or public areas. Avoid using public transportation, ride-sharing, or taxis.

Separate yourself from other people and animals in your home

People: As much as possible, you should stay in a specific room and away from other people in your home. Also, you should use a separate bathroom, if available.

Animals: Do not handle pets or other animals while sick. See COVID-19 and Animals for more information.

Call ahead before visiting your doctor

If you have a medical appointment, call the healthcare provider and tell them that you have or may have COVID-19. This will help the healthcare provider's office take steps to keep other people from getting infected or exposed.

Wear a facemask

You should wear a facemask when you are around other people (e.g., sharing a room or vehicle) or pets and before you enter a healthcare provider's office. If you are not able to wear a facemask (for example, because it causes trouble breathing), then people who live with you should not stay in the same room with you, or they should wear a facemask if they enter your room.

Cover your coughs and sneezes

Cover your mouth and nose with a tissue when you cough or sneeze. Throw used tissues in a lined trash can; immediately wash your hands with soap and water for at least 20 seconds or clean your hands with an alcohol-based hand sanitizer that contains at least 60 to 95% alcohol, covering all surfaces of your hands and rubbing them together until they feel dry. Soap and water should be used preferentially if hands are visibly dirty.

Avoid sharing personal household items

You should not share dishes, drinking glasses, cups, eating utensils, towels, or bedding with other people or pets in your home. After using these items, they should be washed thoroughly with soap and water.

Clean your hands often

Wash your hands often with soap and water for at least 20 seconds. If soap and water are not available, clean your hands with an alcohol-based hand sanitizer that contains at least 60% alcohol, covering all surfaces of your hands and rubbing them together until they feel dry. Soap and water should be used preferentially if hands are visibly dirty. Avoid touching your eyes, nose, and mouth with unwashed hands.

Clean all "high-touch" surfaces every day

High touch surfaces include counters, tabletops, doorknobs, bathroom fixtures, toilets, phones, keyboards, tablets, and bedside tables. Also, clean any surfaces that may have blood, stool, or body fluids on them. Use a household cleaning spray or wipe, according to the label instructions. Labels contain instructions for safe and effective use of the cleaning product including precautions you should take when applying the product, such as wearing gloves and making sure you have good ventilation during use of the product.

Monitor your symptoms

Seek prompt medical attention if your illness is worsening (e.g., difficulty breathing). **Before** seeking care, call your healthcare provider and tell them that you have, or are being evaluated for, COVID-19. Put on a facemask before you enter the facility. These steps will help the healthcare provider's office to keep other people in the office or waiting room from getting infected or exposed.

Ask your healthcare provider to call the local or state health department. Persons who are placed under active monitoring or facilitated self-monitoring should follow instructions provided by their local health department or occupational health professionals, as appropriate.

If you have a medical emergency and need to call 911, notify the dispatch personnel that you have, or are being evaluated for COVID-19. If possible, put on a facemask before emergency medical services arrive.

Discontinuing home isolation

Patients with confirmed COVID-19 should remain under home isolation precautions until the risk of secondary transmission to others is thought to be low. The decision to discontinue home isolation precautions should be made on a case-by-case basis, in consultation with healthcare providers and state and local health departments.

CS 314937-D 02/24/2020

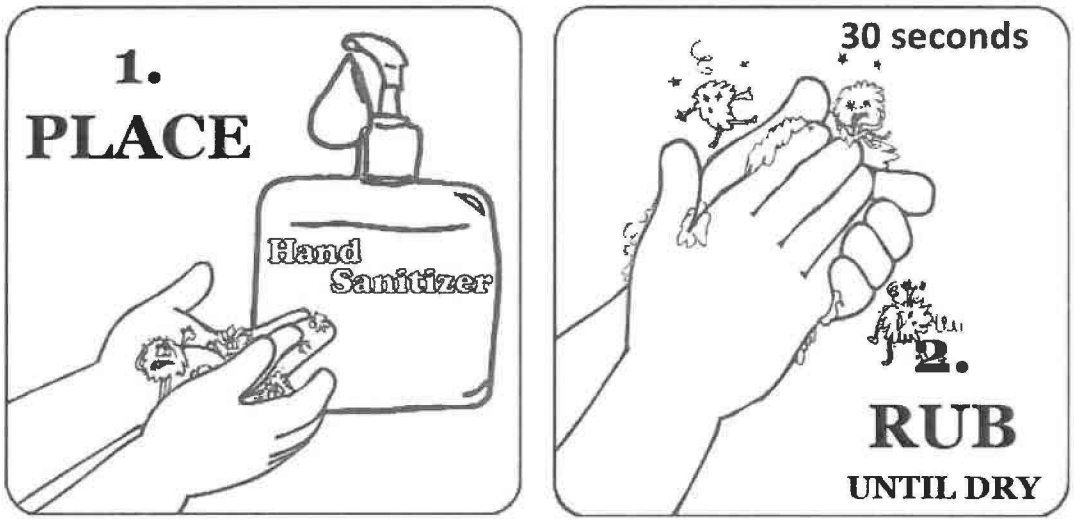
AMERICAN OVERSIGHT

Hand Washing How-To

Does it matter how I wash my hands?



You have to rub your hands for at least 20 seconds to get rid of harmful microorganisms. Follow these instructions:

Hand Sanitizer How-To

How do I clean my hands with alcohol-based hand sanitizer?

Use enough to cover all the surfaces of your hands. Air dry for 30 seconds. Follow these instructions:

AMERICAN OVERSIGHT

Coronavirus (COVID-19) Precautions

In order to protect our residents, we ask that you DO NOT visit the facility during this time if you have the following active symptoms:

- ***Fever***
- ***Cough/Sneezing Cold Symptoms***
- ***Difficulty Breathing***

In order to keep our facility free of COVID-19 we will begin screening ALL visitors prior to visiting. Any visitors that show "active" signs will not be allowed to enter.

We appreciate your understanding during this time. If you have any questions/concerns, please don't hesitate to call the facility.

Thank you for your understanding and cooperation.

DEPARTMENT OF HEALTH ANNOUNCES IMPORTANT UPDATES REGARDING COVID-19 IN FLORIDA -TWO CONFIRMED DEATHS REGARDING COVID-19

TALLAHASSEE— The Florida Department of Health has announced updates regarding the 2019 coronavirus disease (COVID-19) in Florida. Two individuals have died and two new presumptive positive cases have been identified in Broward County.

Deceased Individuals

- A previously announced COVID-19 patient in Santa Rosa County has died, following an international trip.
- A new case of a COVID-19 patient in her seventies in Lee County has died, following an international trip.

New Presumptive Positive Cases

- A 75-year old male in Broward County has been identified as a presumptive positive. This person is isolated and will continue to remain isolated until cleared by public health officials.
- A new individual in their seventies that tested presumptive positive for COVID-19 in Lee County has died, following an international trip.

The Florida Department of Health is working closely with the patients, potential close contacts of each case and health care providers to isolate and monitor persons who may have been exposed to COVID-19 and implement testing of anyone who may develop COVID-19 symptoms, including fever, cough or shortness of breath.

COVID-19 can spread from person to person through small droplets from the nose or mouth, including when an individual coughs or sneezes. These droplets may land on objects and surfaces. Other people may contract COVID-19 by touching these objects or surfaces, then touching their eyes, nose or mouth.

Symptoms of COVID-19 are fever, cough and shortness of breath. Symptoms may appear in as few as two days or as many as 14 days following exposure. Most people recover from the COVID-19 without needing special treatment. The

AMERICAN OVERSIGHT

elderly and those with underlying medical problems like high blood pressure, heart problems and diabetes, are more likely to develop serious illness.

There is currently no vaccine to prevent COVID-19. The best way to prevent illness is to avoid being exposed to this virus. As a reminder, the Department always recommends everyday preventive actions to help impede the spread of respiratory diseases, including:

- Avoiding close contact with people who are sick;
- Staying home when you are sick and avoiding contact with persons in poor health;
- Avoiding touching your eyes, nose and mouth with unwashed hands;
- Covering your cough or sneeze with a tissue, then disposing of the tissue;
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom, before eating, after blowing your nose, coughing or sneezing;

- If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty; and

- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.

The CDC does not recommend that asymptomatic, healthy people wear a facemask to protect themselves from respiratory diseases, including COVID-19. Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings (at home or in a health care facility).

A person that experiences a fever and symptoms of respiratory illness, such as fever, cough or shortness of breath, within 14 days after travel from China, Italy, Iran, South Korea, Japan and any other destination under CDC travel advisory should call ahead to their health care provider and local county health department (CHD) and mention their recent travel or close contact.

If a person has had close contact with someone showing these symptoms who has recently traveled from this area or been in contact with a person with laboratory-confirmed COVID-19, they should call ahead to a health care professional and the county health department. The health care professional will work with the Department to determine if the person should be tested for COVID-19.

Please visit the Department's dedicated COVID-19 webpage at www.FloridaHealth.gov/COVID-19. This remains the best and most up-to-date resource for information and guidance regarding COVID-19 in Florida.

For any other questions related to COVID-19 in Florida, please contact the Department's dedicated COVID-19 Call Center by calling **1-866-779-6121** or emailing COVID-19@flhealth.gov. **The Call Center is available 24 hours a day, seven days a week.**

In addition, please visit http://www.floridahealth.gov/all-county-locations.html to locate and obtain contact information for your local CHD.

The CDC also has a website with information related to COVID-19: https://www.cdc.gov/coronavirus/2019-ncov/index.html.

About the Florida Department of Health

The department, nationally accredited by the Public Health Accreditation Board, works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.

Dear Secretary Mayhew,

First of all, we want to thank you for your visit to Opis' Tierra Pines Center, as well as everything you are doing to assist our centers to keep our customers and team members safe in light of the COVID-19 pandemic. And in an effort to assist as well, Opis would like to propose an option for our customers who may become infected with COVID-19. As we know, it is not clear if hospitals will accept all patients diagnosed with COVID-19, particularly if they are not in acute distress. That puts the customers in our centers at risk for spreading the virus. We would like to do what we can to help reduce that risk.

Opis has an ALF in Eustis, Ruleme Place. It is on the same campus as our SNF, Ruleme Center. At this time, we only have 13 customers in our ALF. We would like to move those 13 ALF customers to a wing in our SNF where they would all be together. Then our ALF would be empty. We would thoroughly clean the ALF and use it as a place to transfer and quarantine our willing customers with COVID-19 via EMS from all of our Opis Centers, if they are not being admitted to

AMERICAN OVERSIGHT

the hospitals. Our ALF is equipped with all private rooms and individual PTAC systems. We wanted AHCA's approval before we move forward with this plan.

In addition to approval for the plan, we would also need:

(1) A waiver of the 30 day discharge/transfer notice to move our customers from the ALF to the SNF, as we would like to start this process immediately.
(2) A waiver on the minimum staffing requirements. As you know, staffing is becoming an issue in all centers throughout the state. We will recruit team members to staff our ALF housing the affected customers, but we would need a waiver on the minimum staffing requirements.

We are hopeful that this plan can be approved as we work to keep our customers safe. We look forward to your response.

Mission Word for March is "Highest Standards"
Each day Meranda, Senior Health Information Coordinator and Linda, Unit Manager take a walking break around the immediate vicinity of the center. While on their break someone approached them and asked if they worked for Opis Tierra Pines Center. They explained that their mom is at another center and that they have heard of the care that Opis provides and might want to move her to our center. They indicated that their Mom really needs a memory care unit. Miranda and Linda were able to describe the CaringWay Memory Care Unit and also set a time for them to come to for a tour. Because of our highest standards of care, the word is out and people are asking to move into our Opis centers.

CMS Approves First State Request for 1135 Medicaid Waiver in Florida

Action gives state greater flexibility for its COVID-19 response efforts

On March 13, 2020, President Trump declared the rapidly evolving COVID-19 situation a national emergency. This bold action enables the Centers for Medicare and Medicaid Services (CMS) to waive certain requirements in Medicare, Medicaid, and CHIP under Section 1135 authority. This includes the ability to grant state and territorial Medicaid agencies a wider range of flexibilities, and states may now submit Section 1135 waiver requests for CMS approval that will remove administrative burdens and expand access to needed services.

Shortly after the President's declaration, Florida became the first state to submit a Section 1135 waiver request in response to the COVID-19 national emergency. In keeping with CMS's commitment to ensure our state partners have the tools they need to combat COVID-19, the agency acted within days to approve a wide variety of appropriate Medicaid flexibilities.

"I want to thank Governor DeSantis for his leadership in Medicaid and for taking full advantage of federal flexibilities," said CMS Administrator Seema Verma. "CMS is committed to removing

AMERICAN OVERSIGHT

all unnecessary administrative and bureaucratic barriers that may hinder an effective response to this public health emergency, and I have directed my team to expeditiously process these requests."

The state's approval letter can be found here, and includes flexibilities that enable the state to waive prior authorization requirements to remove barriers to needed services, streamline provider enrollment processes to ensure access to care for beneficiaries, allow care to be provided in alternative settings in the event a facility is evacuated to an unlicensed facility, suspend certain nursing home screening requirements to provide necessary administrative relief, and extend deadlines for appeals and state fair hearing requests. These flexibilities will enable the state to focus its resources on combatting this outbreak and provide the best possible care to Medicaid beneficiaries in their state.

"Florida is acutely focused on eliminating unnecessary barriers on our health care providers who are on the front lines serving our communities most impacted by COVID-19," said Florida Governor Ron DeSantis. "President Trump recognizes this need and Administrator Seema Verma is providing Florida the critical flexibility for our state's Medicaid program by waiving prior authorization requirements for essential health care services and expedited provider enrollment."

CMS provides guidance to states on how to apply for Section 1135 waivers through the Medicaid Disaster Response Tool Kit, which can be found here. CMS will continue to expeditiously review and approve as appropriate all Section 1135 waivers and other requests that the agency receives to ensure that we are providing our state partners with the maximum flexibility they need to care for their Medicaid beneficiaries during the public health emergency. To support these efforts, CMS is developing checklists and tools to expedite requests and approvals for waivers and other commonly requested flexibilities.

While Florida is the first state to apply for this waiver authority, CMS expects more states will also submit similar requests. Additional Section 1135 approval letters will be posted here as they are issued.

This action, and earlier CMS actions in response to the COVID-19 virus, are part of the ongoing White House Task Force efforts. To keep up with the important work the Task Force is doing in response to COVID-19 click here www.coronavirus.gov. For information specific to CMS, please visit the Current Emergencies Website.

CENTERS FOR MEDICARE & MEDICAID SERVICES (CMS)

Special Edition – Monday, March 9, 2020

COVID-19 Response: CMS Issues FAQs to Assist Medicare Providers

On March 6, CMS issued frequently asked questions and answers (FAQs) for health care providers regarding Medicare payment for laboratory tests and other services related to the 2019-Novel Coronavirus (COVID-19).

AMERICAN OVERSIGHT

The agency is receiving questions from providers and created this document to be transparent and share answers to some of the most common questions.

Included in the FAQs is:

- Guidance on how to bill and receive payment for testing patients at risk of COVID-19.
- Details of Medicare's payment policies for laboratory and diagnostic services, drugs, and vaccines under Medicare Part B, ambulance services, and other medical services delivered by physicians, hospitals, and facilities accepting government resources.
- Information on billing for telehealth or in-home provider services. Since 2019, the Trump Administration has expanded flexibilities for CMS to pay providers for virtual check-ins and other digital communications with patients, which will make it easier for sick patients to stay home and lower the risk of spreading the infection.

This FAQ, and earlier CMS actions in response to the COVID-19 virus are part of the ongoing White House Task Force efforts. To keep up with the important work CMS is doing in response to COVID-19, visit the Current Emergencies website.

Below is an updated list of CMS' actions to date:

- March 5: Issued a second Healthcare Common Procedure Coding System (HCPCS) code for certain COVID-19 laboratory tests, in addition to three fact sheets about coverage and benefits for medical services related to COVID-19 for CMS programs
- March 4: Issued a call to action to health care providers nationwide and offered important guidance to help State Survey Agencies and Accrediting Organizations prioritize their inspections of healthcare
- February 13: Issued a new HCPCS code for providers and laboratories to test patients for COVID-19
- February 6: Gave CLIA-certified laboratories information about how they can test for SARS-CoV-2
- February 6: Issued a memo to help the nation's health care facilities take critical steps to prepare for COVID-19

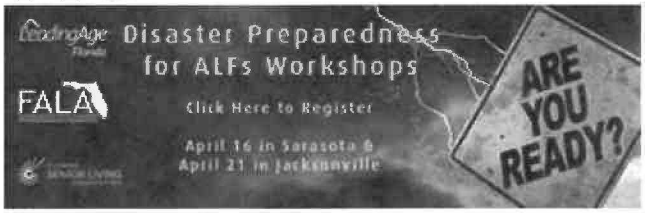
Subject: [External] Call this morning

Good morning Director Moskowitz, and Secretary Mayhew ,

In preparation for this morning call with Assisted Living Facilities and other Health Care providers I wanted to share some of the questions we have begun to receive.



1. While communities have been screening staff, residents and visitors will there be an official provision for superseding 429.28 1 (d) ...."visiting with any person of his or her choice" ?
2. Will there be any relief in regards to staffing if/when communities start seeing a rise in employees that are affected and unable to work 59A-36.010?
3. Will there be encouragement for sister or friendly communities to partner together to address staffing needs thus potentially requiring them to go over occupancy to manage the residents in one location? 429.71
4. Will DOH be removing residents that are symptomatic and tested positive from these facilities and creating isolation sites as I know we do not want to inundate hospitals?
5. What specific isolation precautions should ALF's (non-medical communities) be putting into place. Remembering we have all sizes 3-350 in the state some with clinical support and majority without?

If you have any questions please feel free to call myself or Mike.

My best,

AMERICAN OVERSIGHT

Secretary Mayhew –

Attached - per our discussion – is the file that breaks down the multi-facility SNF companies in Florida by AHCA Planning Districts in which each company has clusters of facilities. Each company was then "selected" as "Primary" (shaded in light red) or "Secondary" (shaded in light orange) for one or more Planning Districts in an effort to (as best as possible) spread out the "Isolation Centers" across companies so that none were burdened with an excessive number of facilities relative to the total number of facilities they had in the State of Florida. Most companies were selected to "participate" in this COVID-19 Emergency Isolation Center Program in 1, 2 or 3 Districts with the exception being Consulate that had 5 Primary and 1 Secondary Directs due to the large volume of SNFs (76 in total) they operate in clusters across Florida. Individual facilities from each company were not chosen because there are likely operational considerations that would be known only to the companies themselves that would make certain facilities better or worse choices for use as a COVID Isolation Center.

I have spoken to Staff from FHCA since our call earlier this evening because this needs to be viewed as a public-private partnership with general industry "buy-in". I may have helped to develop the analysis because I felt from my position as FHCA Reimbursement Committee Chair that it would eventually be necessary, but FHCA staff had been in the loop and kept apprised all along the way.

The first tab in the attached file provides grids that summarize the information. You will notice that there are a couple Districts in which Consulate was not either Primary or Secondary despite Consulate having 10+ SNFs. This was because they may have been the ONLY District in which another company had a large enough cluster of SNFs to be included OR there were other Districts in which there would not have been at least 2 Companies without Consulate being included (and clearly it would be patently unfair to ask Consulate to bear a disproportionate burden should it even become necessary to implement this type of program state-wide). The second tab actually lists the individual facilities (sorted by Planning District and multi-facility organization) for each of the multi-facility organizations that are either "Primary" or "Secondary" in the various District on the first tab.

AMERICAN OVERSIGHT

I will send the conceptual draft Memorandum of Understanding materials once I have received authorization to do so. My commitment is to get this authorization over the weekend.

I truly hope and pray that the need to implement dedicated "Isolation Centers" does not arise, but given what you already know about the lack of negative pressure environments in most SNFs I do fear that it may be better to plan for safety as opposed to being sorry.

Sincerely,
HEALTH CARE NAVIGATOR, LLC

Douglas G. Burr

Subject: Fwd: Feral cats at Headquarters

Quick reminder of what we were dealing with 95 days ago.

Just adds perspective to how fast time goes and progress that has been made since.

From: Kenyon, Brian <Brian.Kenyon@ahca.myflorida.com>
Sent: Tuesday, November 26, 2019 2:56 PM
Cc: Facilities_Requests
Subject: Feral cats at Headquarters

Good afternoon,

A number of feral cats have been seen at Headquarters. A feral cat is a wild animal and is not accustomed to human contact. **It is crucial that employees do not approach or attempt to catch these feral cats.** The Humane Society states that "feral cats are usually too fearful to be handled or adopted." Feral cats are very likely to scratch or bite anyone attempting to help them and their attacks may also cause infection or disease transmission.

Building Management will be using humane traps to catch these cats. Please do not interfere with their efforts.

Again, if you see a feral cat **do not attempt to touch it**, but instead contact Facilities_Requests@ahca.myflorida.com.

Thank you for your time and cooperation.

Please see updates below. Thank you.

Duval County – Jacksonville, Florida
Camellia at Deerwood

Senior community with assisted living facility and independent living (apartments)
**On the campus is an assisted living facility

- 91 residents in assisted living
- 19 residents in memory care
- 107 in independent living

Shared common areas for independent living, assisted living and memory care

- Individual presumptive positive – independent living [*information provided to us by DOH*]

AHCA staff spoke personally with the facility administrator and asked the ALF on campus to immediately discontinue visitation.

ALF is taking precautions:

AMERICAN OVERSIGHT

- Extra disinfecting/cleaning of facility
- Ceased usage of common areas (dining room, activities, etc.)
- Community outings discontinued
- Ceased visitors
- Screening staff; taking staff temperatures
- Screening and temperature taking of third-party health providers
- Notified residents of the situation
- Sending email to emergency contacts of residents to notify them of the situation

Please see the attached action item log from today. In addition, we reached out to John Edwards in I.T. to set up the equipment at the ESF-8 Desk (Greg McLeod is on his way to set it up now) and below are notes from the evening briefing.

- The elderly population is particularly vulnerable to the virus
- The outbreak appears to be mainly travel related
- Education of the public is essential
- Hospitals may not have all precautions in place – they need to protect patients and staff
- Unsure how long this outbreak will last nor how far it will spread
- There will be a 9 AM briefing in the morning.

DEM (Ryan.Lock@em.myflorida.com) asks for daily Agency updates (see details in the action log).

Staffing through Monday
Sunday: Sharon Woodbery (7AM to 7PM). If I can't confirm availability with Sharon tonight (she indicated previously she would be free) Rebecca Willis will cover.
Monday: Rebecca Willis (7AM to 7PM). If Rebecca works Sunday I will cover Monday.

Contact info for staffing: Sharon (850-510-7068), Rebecca (386-364-9730), and Kim (850-933-2518)

Subject: [External] IMPORTANT: Travel Restrictions for Employees of the State Personnel System (COVID-19)AP

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Today, Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

AMERICAN OVERSIGHT

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Thank you in advance for joining in efforts to reduce the spread of COVID-19. We will continue to closely monitor and evaluate available information and guidance as this is a rapidly evolving situation.

We appreciate your patience and commitment to protecting our communities. If you have questions, please call John Apthorp at (850) 922-1274.

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

COVID-19 Talking Points

Top Line Messaging

- AHCA's top priority is the health and safety of residents and patients in the facilities we regulate. As such, AHCA has taken proactive steps to communicate with our providers regarding COVID-19.

- Because infection prevention and control are so foundational to the health and welfare of patients and residents, it one of the highest priorities for the Agency as we inspect facilities.

- Infection prevention protocols are ingrained in standard operating procedures across Florida health care facilities. These are practices that hospitals and nursing homes focus staff training and conduct drills on.

- Facilities across Florida are held to an extremely high standard, and AHCA is vigilant in reviewing every aspect of compliance—inspecting for even the smallest misstep or gap in infection prevention practice and protocols.

Key Actions

- AHCA sent out alerts and hosted multiple calls with nursing homes, assisted living facilities, and hospitals to ensure they are focused on best practices for infection control and prevention.

- We understand this is a rapidly evolving situation worldwide and my Agency remains committed to doing all we can to equip facilities with the best information to protect patients and residents.

- The best protection against the spread of infection is facility maintenance and management.

- We know the most effective way to protect Florida's most vulnerable residents is to prevent the infection or symptoms of an infection from entering the facility.

- To that end, nursing homes and assisted living facilities, have been encouraged to implement screening interventions for visitors, vendors and staff.

- If you are sick do not visit a nursing home. In general, this is a good practice, but it is becoming more critical as we face COVID-19.

- We know that some people are at higher risk of getting very sick from this illness, including older adults and people who have serious chronic medical conditions like heart disease, diabetes or lung disease.

AMERICAN OVERSIGHT

Infection Control Issues at Facilities

- As Secretary, I recognize the trust that Florida's nursing home residents and their families place in their facilities' nurses and administrators to ensure a safe living environment.

- My agency's role is to ensure the facilities we license and regulate are vigilant in maintaining adherence to infection control and prevention protocols and quality standards that will protect the health and welfare of our state's most vulnerable.

- Preventing and mitigating the effects of infection in healthcare settings is among the most important tasks that Florida's hospitals, nursing homes and assisted living facilities must manage.

- And infection prevention protocols are ingrained in standard operating procedures across Florida health care facilities – and they are the responsibility of everyone in the facility – from the clinical staff, to the custodial staff, to the vendors and visitors who enter facilities.

- In 2019, there were 4 hospitals out of 310 and 320 nursing homes out of 695 that had some level of non-compliance related to infection prevention and control, but they did not a level of risk of harm or serious injury to patients or residents.
    - 2 hospitals and 10 nursing homes with concerns of severe jeopardy

- All of those findings were thoroughly corrected and verified for compliance by our Agency.

- Let me be clear: in just a matter of weeks, a hospital or nursing home could lose their license and be shut down for failing to effectively correct the risk to patients.

- Because infection and prevention and control are so foundational to the health and welfare of patients and residents, it is equally a significant priority for our agency as we inspect these facilities.

- We inspect for the smallest gaps in practice in order to support comprehensive adherence for staff in these facilities to basic infection protocols, like hand washing and cleaning of all surfaces in patient and resident rooms.

- Infection control inspection criteria, as administered from the CDC and CMS, includes reviews of:

AMERICAN OVERSIGHT

- Facility Assignment and Task Coordination
- Hand Hygiene
- Personal Protective Equipment (PPE)
- Transmission-Based Precautions
- Laundry Services
- Policies and Procedures
- Infection Surveillance
- Antibiotic Stewardship Program
- Influenza and Pneumococcal Immunizations

- Hospitals and nursing homes are executing key infection control measures, including:
  - Staff members maintaining compliance with hand hygiene.
    - Staff hand hygiene before and after contact with residents
    - Ensuring appropriate resident hand hygiene is performed
  - Appropriate use of personal protective equipment (PPE).
  - Environmental cleaning

- Our Agency is engaging and communicating regularly with nursing homes across the state and engaging in stakeholder discussions to address best practices and take any questions.

- The Agency will consider immediate jeopardies for infection control issues and complaints alleging infection control concerns, including facilities with COVD-19.

- Our inspections will prioritize the facilities that currently have positive and suspected cases of COVD-19.

- Per CMS, we are currently deploying staff and will visit hospitals and nursing homes that have had infection control issues in the past.

- The Department of Health is – and always has been – the lead on any infectious disease outbreak. Our Agency is there to provide resources as appropriate. If the facility does not respond or accommodate the Department of Health, then our Agency go in as the regulatory entity.

- We are here to be a partner among state agencies and to consistently provide communications and immediate assistance.

Visitor and Vendor Screenings

- We know the most effective way to protect Florida's most vulnerable residents is to prevent the infection or symptoms of an infection from entering the facility.

AMERICAN OVERSIGHT

- To that end, nursing homes and assisted living facilities, have been encouraged to implement screening interventions for visitors, vendors and staff.

- AHCA has shared and distributed communications that equip facilities with resources for Visitor Screening.

- The agency recognizes that facilities need to be overly cautious to protect their patients and residents and we appreciate the thoughtful approach to the comprehensive screening of visitors, staff and vendors.

- This includes the need to screen those entering the facility to ensure no one has a temperature prior to entering.

- I have an important message for the public: if you are sick please do not visit a nursing home.

- And if you are sick, please only go to a hospital if you need to seek services.

- This is a good practice always but becoming critical as we face COVID-19.

Hospital Preparedness

- Hospitals consistently drill for these type of emergencies.

- They have well established practices and procedures to help them respond to COVID-19.

- Additionally, my agency continues to send alerts to facilities to make sure they have the most up-to-date information about best practices from the CDC.

Personal Protective Equipment

- Personal protective equipment (PPE) coordination is handled at a local level through local health departments and emergency operations centers.

- In conjunction with the Florida Division of Emergency Management and the Florida Department of Health, I want to do everything possible to make sure the needs of local communities are being met, especially health care facilities.

AMERICAN OVERSIGHT

- To that end, I will be traveling the state over the next week to connect with facilities and will be reporting back as we work with DEM and DOH to ensure supplies, such as PPEs, are going where they are most needed.

Ref: QSO-20-14-NH

DATE: **March 9, 2020**

TO: State Survey Agency Directors

FROM: Director
Quality, Safety & Oversight Group

SUBJECT: Guidance for Infection Control and Prevention of Coronavirus Disease 2019 (COVID-19) in nursing homes ***(REVISED)***

Memorandum Summary

- ***CMS is committed*** to taking critical steps to ensure America's health care facilities and clinical laboratories are prepared to respond to the threat of the COVID-19.
- **Guidance for Infection Control and Prevention of COVID-19** - CMS is providing additional guidance to nursing homes to help them improve their infection control and prevention practices to prevent the transmission of COVID-19, *including revised guidance for visitation.*
- **Coordination with the Centers for Disease Control (CDC) and local public health departments** - We encourage all nursing homes to monitor the CDC website for information and resources and contact their local health department when needed (CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html).
- *Following the Food and Drug Administration's (FDA) emergency use authorization (EUA) expanding the use of certain industrial respirators to health care personnel, CMS is clarifying that such use is appropriate in Medicare/Medicaid certified providers and suppliers.*

Background

CMS is responsible for ensuring the health and safety of nursing home residents by enforcing the standards required to help each resident attain or maintain their highest level of well-being. In light of the recent spread of COVID-19, we are providing additional guidance to nursing homes to help control and prevent the spread of the virus.

Guidance

Facility staff should regularly monitor the CDC website for information and resources (links below). They should contact their local health department if they have questions or suspect a resident of a nursing home has COVID-19. Per CDC, prompt detection, triage and isolation of

AMERICAN OVERSIGHT

potentially infectious residents are essential to prevent unnecessary exposures among residents, healthcare personnel, and visitors at the facility. Therefore, facilities should continue to be vigilant in identifying any possible infected individuals. Facilities should consider frequent monitoring for potential symptoms of respiratory infection as needed throughout the day. Furthermore, we encourage facilities to take advantage of resources that have been made available by CDC and CMS to train and prepare staff to improve infection control and prevention practices. Lastly, facilities should maintain a person-centered approach to care. This includes communicating effectively with residents, resident representatives and/or their family, and understanding their individual needs and goals of care.

Facilities experiencing an increased number of respiratory illnesses (regardless of suspected etiology) among patients/residents or healthcare personnel should immediately contact their local or state health department for further guidance.

In addition to the overarching regulations and guidance, we're providing the following information (Frequently Asked Questions) about some specific areas related to COVID-19:

Guidance for Limiting the Transmission of COVID-19 for Nursing Homes

How should facilities monitor or *restrict* visitors?
If visitors meet the criteria below, facilities may restrict their entry to the facility. Regulations and guidance related to restricting a resident's right to visitors can be found at 42 CFR §483.10(f)(4), and at F-tag 563 of Appendix PP of the State Operations Manual. Specifically, a facility may need to restrict or limit visitation rights for reasonable clinical and safety reasons. This includes, "restrictions placed to prevent community-associated infection or communicable disease transmission to the resident. A resident's risk factors for infection (e.g., chronic medical conditions) or current health state (e.g., end-of-life care) should be considered when restricting visitors. In general, visitors with signs and symptoms of a transmissible infection (e.g., a visitor is febrile and exhibiting signs and symptoms of an influenza-like illness) should defer visitation until he or she is no longer potentially infectious."

Facilities should *actively* screen *and restrict* visitation *by those who meet the following criteria*:

1. Signs or symptoms of a respiratory infection, such as fever, cough, shortness of breath, or sore throat.
2. *In the last 14 days*, has had contact with someone *with a confirmed diagnosis of COVID-19*, or under investigation for COVID-19, *or are ill with respiratory illness.*
3. International travel within the last 14 days to countries *with sustained community transmission*. For updated information on *affected* countries visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html
4. *Residing in a community where community-based spread of COVID-19 is occurring.*

For those individuals that do not meet the above criteria, facilities can allow entry but may require visitors to use Personal Protective Equipment (PPE) such as facemasks (see expanded guidance below).

Limiting visitors and individuals: Expanded recommendations:
CMS is providing the following expanded guidance to prevent the spread of COVID-19 (in addition to the information above about restricting visitors).

AMERICAN OVERSIGHT

- ***Restricting*** *means the individual should not be allowed in the facility at all, until they no longer meet the criteria above.*
- ***Limiting*** *means the individual should not be allowed to come into the facility, except for certain situations, such as end-of-life situations or when a visitor is essential for the resident's emotional well-being and care.*
- ***Discouraging*** *means that the facility allows normal visitation practices (except for those individuals meeting the restricted criteria), however the facility advises individuals to defer visitation until further notice (through signage, calls, etc.).*

1. *Limiting or Discouraging visitation:*
   a) ***Limiting:*** *For facilities that are in counties, or counties adjacent to other counties where a COVID-19 case has occurred, we recommend* ***limiting*** *visitation (except in certain situations as indicated above). For example, a daughter who visits her mother every Monday, would cease these visits, and limit her visits to only those situations when her mom has a significant issue. Also, during the visit, the daughter would limit her contact with her mother and only meet with her in her room or a place the facility has specifically dedicated for visits.*
   b) ***Discouraging:*** *For all other facilities (nationwide) not in those counties referenced above, we recommend* ***discouraging*** *visitation (except in certain situations). See below for methods to discourage visitation. Also see CDC guidance to "stay at home" https://www.cdc.gov/coronavirus/2019-ncov/specific-groups/high-risk-complications.html#stay-home.*
2. *Facilities should increase visible signage at entrances/exist, offer temperature checks, increase availability to hand sanitizer, offer PPE for individuals entering the facility (if supply allows). Also, provide instruction, before visitors enter the facility and residents' rooms, on hand hygiene, limiting surfaces touched, and use of PPE according to current facility policy while in the resident's room. Individuals with fevers, other symptoms of COVID-19, or unable to demonstrate proper use of infection control techniques should be restricted from entry. Signage should also include language to discourage visits, such as recommending visitors defer their visit for another time or for a certain situation as mentioned above.*
3. *In addition to the screening visitors for the criteria for restricting access (above), facilities should ask visitors if they took any recent trips (within the last 14 days) on cruise ships or participated in other settings where crowds are confined to a common location. If so, facilities should suggest deferring their visit to a later date. If the visitor's entry is necessary, they should use PPE while onsite. If the facility does not have PPE, the facility should restrict the individual's visit, and ask them to come back at a later date (e.g., after a 14 days with no symptoms of COVID-19).*
4. *In cases when visitation is allowable, facilities should instruct visitors to limit their movement within the facility to the resident's room (e.g., reduce walking the halls, avoid going to dining room, etc.)*
5. *Facilities should review and revise how they interact with volunteers, vendors and receiving supplies, agency staff, EMS personnel and equipment, transportation providers (e.g., when taking residents to offsite appointments, etc.), other practitioners (e.g., hospice workers, specialists, physical therapy, etc.), and take necessary actions to prevent any potential transmission. For example, do not have supply vendors transport supplies inside the facility.*

AMERICAN OVERSIGHT

Have them dropped off at a dedicated location (e.g., loading dock). Facilities can allow entry of these visitors as long as they are following the appropriate CDC guidelines for Transmission-Based Precautions. For example, hospice workers can enter a facility when using PPE properly.

6. *In lieu of visits (either through limiting or discouraging), facilities can consider:*
    a) *Offering alternative means of communication for people who would otherwise visit, such as virtual communications (phone, video-communication, etc.).*
    b) *Creating/increasing listserv communication to update families, such as advising to not visit.*
    c) *Assigning staff as primary contact to families for inbound calls, and conduct regular outbound calls to keep families up to date.*
    d) *Offering a phone line with a voice recording updated at set times (e.g., daily) with the facility's general operating status, such as when it is safe to resume visits.*
7. *When visitation is necessary or allowable, facilities should make efforts to allow for safe visitation for residents and loved ones. For example:*
    a) *Suggest limiting physical contact with residents and others while in the facility. For example, practice social distances with no hand-shaking or hugging, and remaining six feet apart.*
    b) *If possible (e.g., pending design of building), creating dedicated visiting areas (e.g., "clean rooms") near the entrance to the facility where residents can meet with visitors in a sanitized environment. Facilities should disinfect rooms after each resident-visitor meeting.*
    c) *Residents still have the right to access the Ombudsman program. If in-person access is allowable, use the guidance mentioned above. If in-person access is not available due to infection control concerns, facilities need to facilitate resident communication (by phone or other format) with the Ombudsman program or any other entity listed in 42 CFR § 483.10(f)(4)(i).*
8. *Visitor reporting:*
    a) *Advise exposed visitors (e.g., contact with COVID-19 resident prior to admission) to monitor for signs and symptoms of respiratory infection for at least 14 days after last known exposure and if ill to self-isolate at home and contact their healthcare provider.*
    b) *Advise visitors to report to the facility any signs and symptoms of COVID-19 or acute illness within 14 days after visiting the facility.*

How should facilities monitor or restrict health care facility staff?

The same screening performed for visitors should be performed for facility staff.

- Health care providers (HCP) who have signs and symptoms of a respiratory infection should not report to work.
- Any staff that develop signs and symptoms of a respiratory infection while on-the-job, should:
    - Immediately stop work, put on a facemask, and self-isolate at home;
    - Inform the facility's infection preventionist, and include information on individuals, equipment, and locations the person came in contact with; and
    - Contact and follow the local health department recommendations for next steps (e.g., testing).

AMERICAN OVERSIGHT

- Refer to the CDC guidance for exposures that might warrant restricting asymptomatic healthcare personnel from reporting to work (https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html).

Facilities should contact their local health department for questions, and frequently review the CDC website dedicated to COVID-19 for health care professionals (https://www.cdc.gov/coronavirus/2019-nCoV/hcp/index.html).

When should nursing homes consider transferring a resident with suspected or confirmed infection with COVID-19 to a hospital?
Nursing homes with residents suspected of having COVID-19 infection should contact their local health department. Residents infected with COVID-19 may vary in severity from lack of symptoms to mild or severe symptoms or fatality. Initially, symptoms may be mild and not require transfer to a hospital as long as the facility can follow the infection prevention and control practices recommended by CDC. Facilities without an airborne infection isolation room (AIIR) are not required to transfer the resident assuming: 1) the resident does not require a higher level of care and 2) the facility can adhere to the rest of the infection prevention and control practices recommended for caring for a resident with COVID-19.

Please check the following link regularly for critical updates, such as updates to guidance for using PPE: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html.

The resident may develop more severe symptoms and require transfer to a hospital for a higher level of care. Prior to transfer, emergency medical services and the receiving facility should be alerted to the resident's diagnosis, and precautions to be taken including placing a facemask on the resident during transfer. If the resident does not require hospitalization they can be discharged to home (in consultation with state or local public health authorities) if deemed medically and socially appropriate. Pending transfer or discharge, place a facemask on the resident and isolate him/her in a room with the door closed.

When should a nursing home accept a resident who was diagnosed with COVID-19 from a hospital?
A nursing home can accept a resident diagnosed with COVID-19 and still under Transmission-Based Precautions for COVID-19 as long as the facility can follow CDC guidance for Transmission-Based Precautions. If a nursing home cannot, it must wait until these precautions are discontinued. CDC has released Interim Guidance for Discontinuing Transmission-Based Precautions or In-Home Isolation for Persons with Laboratory-confirmed COVID-19. Information on the duration of infectivity is limited, and the interim guidance has been developed with available information from similar coronaviruses. CDC states that decisions to discontinue Transmission-based Precautions in hospitals will be made on a case-by-case basis in consultation with clinicians, infection prevention and control specialists, and public health officials. Discontinuation will be based on multiple factors (see current CDC guidance for further details).

Note: Nursing homes should admit any individuals that they would normally admit to their facility, including individuals from hospitals where a case of COVID-19 was/is present. ***Also, if possible, dedicate a unit/wing exclusively for any residents coming or returning from the hospital. This can serve as a step-down unit where they remain for 14 days with no***

AMERICAN OVERSIGHT

symptoms (instead of integrating as usual on short-term rehab floor, or returning to long-stay original room).

Other considerations for facilities:

- Review CDC guidance for Infection Prevention and Control Recommendations for Patients with Confirmed Coronavirus Disease 2019: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html
- Increase the availability and accessibility of alcohol-based hand rubs (ABHRs), *reinforce strong hand-hygiene practices,* tissues, no touch receptacles for disposal, and facemasks at healthcare facility entrances, waiting rooms, resident check-ins, etc.
    - Ensure ABHR is accessible in all resident-care areas including inside and outside resident rooms.
- Increase signage for vigilant infection prevention, such as hand hygiene and cough etiquette.
- Properly clean, disinfect and limit sharing of medical equipment between residents and areas of the facility.
- Provide additional work supplies to avoid sharing (e.g., pens, pads) and disinfect workplace areas (nurse's stations, phones, internal radios, etc.).

Will nursing homes be cited for not having the appropriate supplies?

CMS is aware of that there is a scarcity of some supplies in certain areas of the country. State and Federal surveyors should not cite facilities for not having certain supplies (e.g., PPE such as gowns, N95 respirators, surgical masks and ABHR) if they are having difficulty obtaining these supplies for reasons outside of their control. However, we do expect facilities to take actions to mitigate any resource shortages and show they are taking all appropriate steps to obtain the necessary supplies as soon as possible. For example, if there is a shortage of ABHR, we expect staff to practice effective hand washing with soap and water. Similarly, if there is a shortage of PPE (e.g., due to supplier(s) shortage which may be a regional or national issue), the facility should contact the local and state public health agency to notify them of the shortage, follow national guidelines for optimizing their current supply, or identify the next best option to care for residents. If a surveyor believes a facility should be cited for not having or providing the necessary supplies, the state agency should contact the CMS Branch Office.

What other resources are available for facilities to help improve infection control and prevention?

CMS urges providers to take advantage of several resources that are available:

CDC Resources:

- Infection preventionist training: https://www.cdc.gov/longtermcare/index.html
- CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html
- CDC Updates: https://www.cdc.gov/coronavirus/2019-ncov/whats-new-all.html
- CDC FAQ for COVID-19: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/infection-prevention-control-faq.html
- *Information on affected US locations: https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html*

AMERICAN OVERSIGHT

FDA Resources:

- *Emergency Use Authorizations:* https://www.fda.gov/medical-devices/emergency-situations-medical-devices/emergency-use-authorizations

CMS Resources:

- Long term care facility – Infection control self-assessment worksheet: https://qsep.cms.gov/data/252/A._NursingHome_InfectionControl_Worksheet11-8-19508.pdf
- Infection control toolkit for bedside licensed nurses and nurse aides ("Head to Toe Infection Prevention (H2T) Toolkit"): https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/SurveyCertificationGenInfo/LTC-CMP-Reinvestment
- Infection Control and Prevention regulations and guidance: 42 CFR 483.80, Appendix PP of the State Operations Manual. See F-tag 880: https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/GuidanceforLawsAndRegulations/Downloads/Appendix-PP-State-Operations-Manual.pdf

Contact: Email DNH_TriageTeam@cms.hhs.gov

NOTE: The situation regarding COVID-19 is still evolving worldwide and can change rapidly. Stakeholders should be prepared for guidance from CMS and other agencies (e.g., CDC) to change. Please monitor the relevant sources regularly for updates.

Effective Date: Immediately. This policy should be communicated with all survey and certification staff, their managers and the State/Regional Office training coordinators immediately.

Notice of Emergency Rule

AGENCY FOR HEALTH CARE ADMINISTRATION Health Facility and Agency Licensing RULE NO.: RULE TITLE: 59AER20-1 Screening Requirements for Non-Residents.

SPECIFIC REASONS FOR FINDING AN IMMEDIATE DANGER TO THE PUBLIC HEALTH, SAFETY OR WELFARE: The Novel Coronavirus Disease 2019 (COVID-19) is a severe respiratory illness that can spread among humans through respiratory transmission. According to the Centers for Disease Control and Prevention (CDC), people at risk for serious illness from COVID-19 include older adults and people with serious chronic medical conditions.[1] In late 2019, a new and significant outbreak of COVID-19 emerged in China and the World Health Organization declared COVID-19 a Public Health Emergency of International Concern. The CDC also confirmed instances of community spread of COVID-19 in the United States and issued written guidance to help control the spread of COVID-19 in long-term care facilities.[2]

On March 7, 2020, the State Surgeon General and State Health Officer declared a Public Health Emergency in the State of Florida as a result of COVID-19. As of March 9, 2020, eight counties in Florida have positive cases for COVID-19. There have been two confirmed deaths in Florida as a result of COVID-19. Both individuals were elderly. On March 9, 2020, Florida Governor Ron DeSantis declared a state of emergency in Florida.

At Life Care Center nursing home of Kirkland, Washington, outside of Seattle, 15 elderly residents died as a result of a COVID-19 outbreak in the facility. According to the United States Census Bureau, Florida has the largest percentage of residents age 65 and older in the nation. Thousands of frail elders live in Florida's XXX facilities. Ensuring XXX facilities screen all visitors and staff for symptoms of COVID-19 is essential to protecting the health, safety and welfare of vulnerable residents.

This emergency rule establishes a process by which XXX facilities screen all visitors and staff for COVID-19 symptoms before allowing entry to the facility. Any visitor or staff member exhibiting symptoms of COVID-19 must be denied entry to the facility. Prompt implementation of this rule is necessary to ensure the health, safety and welfare of residents of Florida's assisted living facilities.

REASONS FOR CONCLUDING THAT THE PROCEDURE USED IS FAIR UNDER THE CIRCUMSTANCES: The procedure used to adopt this emergency rule is fair as the State of Florida is under a declaration of emergency due to the outbreak of COVID-19. This emergency rule is necessary and fair to ensure the health, safety, and welfare of the facility residents, and provides at least the procedural protection given by other statutes, the State Constitution, or the United States Constitution; and takes only that action necessary to protect the public interest under the emergency procedure.

SUMMARY OF THE RULE: This emergency rule establishes screening requirements for nursing home staff and visitors to avoid the spreading COIVD-19 to health care facilities. Screening requirements include…

THE PERSON TO BE CONTACTED REGARDING THE EMERGENCY RULE IS:

AMERICAN OVERSIGHT

59A-xxx Screening Requirements for Non-Residents.

(1) REQUIREMENTS. Any non-resident individual, including staff, seeking entry to an assisted living facility must be actively screened by the facility. Any individual who meets the screening criteria must be restricted from entering the facility or facility grounds until they no longer meet the screening criteria.
(a) The screening criteria must at a minimum include the following:
1. Signs or symptoms of a respiratory infection, such as fever, cough, shortness of breath, or sore throat;
2. In the last 14 days has travelled with someone with a confirmed diagnosis of the Novel Coronavirus Disease 2019;
3. In the last 14 days has been under investigation for the Novel Coronavirus Disease 2019;
4. In the last 14 days has travelled internationally to any countries with sustained community transmission as identified by the Centers for Disease Control and Prevention. Affected countries can be found online at https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html; or
5. Reside in a community where community-spread of the Novel Coronavirus Disease 2019 is occurring.
(b) DOCUMENTATION?
(c) For those individuals that do not meet the above criteria, facilities can allow entry but may require visitors to use Personal Protective Equipment such as facemasks

Adrian,

Please see the language below that we are interested in sending out. Thank you.

Transfer Protocol

With recent reports of alarming potential infection and fatality rates, it is imperative that nursing homes and other long-term care residential providers which are unable to comply with CDC guidance for standard infection precautions for COVID-19 transmission, especially negative pressure rooms and skilled use of N95 masks, should seek transfer of individuals who fit criteria for testing or who have tested positive to facilities that can comply with these infection control requirements.

To accept a patient who is being discharged, long-term care residential providers may work to request testing of anyone who meets the criteria of being at risk of COVID-19.

CMS memo issued March 13, 2020, QSO-20-14-NH
Revised guidance for nursing home visitation/ access

Short bullets:

- Only end of life (EOL)/compassionate care visitors may enter the facility if they meet screening and wear a mask
- Health care workers who enter (hospice, EMS, etc) must meet CDC guidelines
- Comment on surveyors (see quote below) – Must allow surveyors in (meeting screening requirements)- Wear PPE per CDC guidelines when entering a facility with COVID cases
- Facilities should cancel communal dining and group activities, take staff temps, proactively communicate visitor restrictions, and restrict ombudsman (except EOL) but enable communication.

Long bullets:

Surveyors:
"CMS and state survey agencies are constantly evaluating their surveyors to ensure they don't pose a transmission risk when entering a facility. For example, surveyors may have been in a facility with COVID-19 cases in the previous 14 days, but because they were wearing PPE effectively per CDC guidelines, they pose a low risk to of transmission in the next facility, and must be allowed to enter. However, there are circumstances under which surveyors should still not enter, such as if they have a fever."

AMERICAN OVERSIGHT

Visitors:

- Facilities SHOULD restrict all visitors and non-essential health care personnel, except for certain compassionate care situations, eg: end of life (EOL).
- For these compassionate care visits (permitted visitors):
    - Visitors will be limited to a specific room only
    - Facilities should require visitors to perform hand hygiene frequently
    - Must wear a face mask
- Decisions about visits for EOL should be made case-by-case and include careful screening of visitors for fever and respiratory symptoms.
- Permitted visitors must wear a face mask and limit
- Facilities are expected to notify potential visitors with signs, calls, letters, etc.
- If a state implements stricter requirements, (such as through a Governor's order) a facility will not be considered out of compliance with federal visitation requirements.

Health care workers:

- Follow CDC guidelines for restricting access
- Including hospice, EMS, dialysis techs that provide care to residents
- Health care workers should be permitted to enter the facility as long as they meet CDC guidelines
- Facilities should contact their local county health department for questions and review CDC guidelines.

Additional guidance:

- Adds practices facilities should implement such as cancelling communal dining and group activities
- Actively screen residents and staff for fever and respiratory symptom
- Remind residents of social distancing and hand hygiene
- Take staff temperature and document absence of SOB, new of change in cough/sore throat. If they are ill, have them put on a face mask and self-isolate at home.
- Identify staff that work at multiple facilities (e.g., agency staff, regional or corporate staff, etc.) and actively screen and restrict them appropriately
- Residents still have the right to access the Ombudsman program - Their access should be restricted per the guidance above (except in compassionate care situations), however, facilities may review this on a case by case basis. If in-person access is not available due to infection control concerns, facilities need to facilitate resident communication (by phone or other format).
- Advise visitors, and any individuals who entered the facility (e.g., hospice staff), to monitor for signs and symptoms of respiratory infection for at least 14 days after exiting the facility. If symptoms occur, advise them to self-isolate at home, contact their healthcare provider, and immediately notify the facility of the date they were in the facility, the individuals they were in contact with, and the locations within the facility they visited. Facilities should immediately screen the individuals of reported contact, and take all necessary actions based on findings.

FYI. This just came from AHA to HHS on additional federal waiver.

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

American Hospital Association™
Advancing Health in America

Washington, D.C. Office
800 10th Street, N.W.
Two CityCenter, Suite 400
Washington, DC 20001-4956
(202) 638-1100

March 16, 2020

Alex M. Azar
Secretary
U.S. Department of Health and Human Services
200 Independence Avenue, S.W.
Washington, D.C. 20201

Dear Secretary Azar:

On behalf of our nearly 5,000 member hospitals, health systems and other health care organizations, our clinician partners – including more than 270,000 affiliated physicians, 2 million nurses and other caregivers – and the 43,000 health care leaders who belong to our professional membership groups, the American Hospital Association (AHA) asks **the Secretary of Health and Human Services (HHS) to consider additional actions to temporarily suspend certain requirements in order for health care providers to better respond to the novel coronavirus (COVID-19) outbreak.**

On Jan. 31, 2020, your office declared a public health emergency in the U.S. for COVID-19, representing an important first step in combatting this virus. The public health emergency together with the President's recent national emergency declaration enabled your office to make several critical waivers consistent with section 1135 of the Social Security Act. We appreciate your swift action in making these waivers, including removing the critical access hospitals (CAH) limitation of 25 inpatient beds and 96-hour average length of stay, the long-term care hospital (LTCH) 25-day length of stay requirement, the inpatient rehabilitation facility (IRF) 60% Rule, and certain physician licensing requirements. However, much more flexibility is required to allow hospitals and health systems to most effectively respond to this emergency and provide the best care possible to patients. For example, we ask you to:

1. Waive the CAH 96-hour condition of payment in addition to the 96-hour average length of stay. This is crucial for rural areas that may not have other options for inpatient beds.
2. Waive the requirement that an LTCH patient have a prior hospital stay that includes three or more days in the intensive care unit (ICU) in order to qualify for the full payment rate. Doing so would help ensure these hospitals are able to add capacity to the health care system by caring for more appropriate patients, without penalty.

AMERICAN OVERSIGHT

3. Waive the IRF 3-hour rule, which requires that IRF patients receive at least three hours of therapy a day, the "preponderance" of which must be one-on-one. This is critical to enabling them to add capacity to the health care system.

A list of our specific suggested actions are attached.

Other important waiver flexibilities that we urge you to consider cover conditions of participation or other certification requirements, program participation, preapproval requirements and performance deadlines and timetable delays. The HHS Secretary should also immediately implement unique codes for COVID-19 disease, exposure to COVID-19 and screening for the virus. Such codes are essential to tracking COVID-19 patients or patients without the disease that require health care services. While there are codes existing for coronaviruses, they are not unique to COVID-19. For all waivers, including those already made, the HHS Secretary should also consider creating a code for providers to use to identify patients *without* COVID-19 who are receiving care under a waiver – those who are, for example, transferred to a post-acute care hospital solely in order to meet the demands of the emergency. This is much less resource intensive than documentation in the medical record.

In addition, while a number of actions require the use of section 1135 waiver authority, there also are additional steps that HHS can take without such authority. For example, we encourage the agency to require that health plans reduce access barriers, such as limiting utilization management techniques that could delay access to COVID-19 testing and treatment, and require that coverage decisions be based on presenting symptoms, not final diagnosis.

Finally, we must acknowledge and accept the unknowns we face when combatting COVID-19. Our requests today represent actions we know are necessary at this moment. If taken, these steps will help care for patients, while keeping hospital workers and the public as safe as possible. As more information becomes available, we anticipate the need for additional assistance from HHS, and ask that the agency remain flexible as our hospitals and health systems continue to care for patients during this national emergency.

Communities rely on America's hospitals and health systems to be there for them in the face of an emergency. Whether that emergency develops in the form of a natural disaster, like a hurricane or tornado, or as a virus, like COVID-19, hospitals and health systems are prepared to fulfill their commitment to patients. While our members continue to do everything they can to address COVID-19 cases, the additional action we request would help them continue to put the health and safety of patients first by removing barriers that threaten to impede decisive and quick action by providers at a time when agility and flexibility are of utmost importance.

AMERICAN OVERSIGHT

We appreciate your leadership and the ongoing work of the White House Coronavirus Task Force. We look forward to continuing to work with you during this critical time to protect the health of our nation.

Sincerely,

/s/

Richard J. Pollack
President and Chief Executive Officer

Cc: Seema Verma, Administrator, Centers for Medicare & Medicaid Services
Stephen M. Hahn, M.D., Commissioner, Food and Drug Administration
Robert R. Redfield, M.D., Director, Centers for Disease Control and Prevention

AMERICAN OVERSIGHT

ASSISTANCE MANAGING THE SURGE

Medicare Outpatient Observation Notice (MOON). In addition to the Centers for Medicare & Medicaid Services' (CMS) waiver of the skilled nursing facility (SNF) 3-day rule, waiving the MOON written and oral notification requirements is appropriate since undergoing observation care will have no implications for SNF eligibility.
Home Health (HH) Homebound Requirement. Waiving the requirement that a beneficiary must be "home-bound" in order to receive HH services would allow beneficiaries to obtain care while minimizing the risk to themselves or others.
Critical Access Hospital (CAH) 96-hour Condition of Payment. Waiving the requirement that a physician certify a patient can reasonably be expected to be discharged within 96 hours would provide critical flexibility for care in rural areas that may not have other options for inpatient care.
Medical Review Audits. Pausing all audits during the emergency, including additional documentation requests and other audit work, would help free capacity in the health care system.
HH Face-to-Face Requirement. Waiving the requirement that the certifying physician or nonphysician practitioner document a face-to-face encounter with the patient prior to certifying a patient's eligibility for the HH benefit would allow beneficiaries to obtain care while minimizing the risk to themselves or others. In these situations, a telephonic or telehealth visit may fulfill the requirements of the face-to-face requirement.
Transfer of Mechanically Ventilated Patients. Suspending the restrictions of Medicare Managed Care organizations surrounding transfer of mechanically ventilated patients to long-term care hospitals (LTCHs) would allow patients to be transferred as soon as they are physiologically stable enough. This would facilitate appropriate transfer of patients that benefit from the specialized care LTCHs provide and also add capacity to the health care system.
Federal Audits. Delaying all federal audits during the emergency, such as Medicaid disproportionate share hospital (DSH) and Payment Error Rate Measurement (PERM), would help free capacity in the health care system.
Waiving certain CMS certification requirements. If a nonprofit entity that holds multiple certificates to operate hospitals in that jurisdiction from the appropriate state licensing entity, a certificate of participation from CMS, a license from a state licensing authority to operate a new or refurnished hospital and has applied for accreditation to operate a new or refurbished hospital that facility may be deemed certified for billing by CMS and private insurance entities. The nonprofit entity would receive certification for no more than 90 days or until accreditation is received or the national emergency has ended. Entities may renew this temporary certification every 90 days for up to one year.
Physical Environment. Waiving physical environment requirements at 482.41; would allow non-hospital buildings and spaces to be used for patient care, provided sufficient safety and comfort is provided for patients and staff, thus adding capacity to the health care system.

AMERICAN OVERSIGHT

HH Review Choice Demonstration. Suspend expansion of the HH Review Choice Demonstration project to allow clinical staff to focus on accommodating coronavirus patients and those transferred to home health due to the disaster. Also, suspend ongoing demonstration activities in Illinois, Ohio and Texas.

ENSURING STAFF CAN FOCUS ON CARE DELIVERY

Additional EMTALA Sanctions Waiver. In addition to waivers issued on March 15, 2020, waiving the following EMTALA sanction would assist hospitals in most effectively managing patient care and health care system capacity: 1. Permit the medical screening examination to be conducted by other qualified staff authorized by the hospital and acting within their state scope of practice and licensure, who are not formally designated to perform medical screening examinations in the hospital by-laws or in the rules and regulations.
Practice Limitations. Waiving specific practice limitations on nurse practitioners that are more restrictive under CMS than under state licensure would help address workforce shortages.
Waiving standard death reporting requirements at 482.13(g), which would allow the reporting of the death of patients who were in seclusion or restraint to occur later than currently required. This would keep the requirement where any death where restraint may have contributed is reported within standard time limits.
Medical Record Timing. Waiving medical records timing requirements at 482.24 would allow medical records to be fully completed later than 30 days following discharge, providing flexibility to the health care system.
Verbal Orders. Waiving verbal order requirements at 482.24 would allow verbal orders to be used more frequently and authentication may occur later than 48 hours, thus providing flexibility to the health care system.
Physician Privileging. Waiving certain physician privileging requirements at 482.22(a) would allow physicians whose privileges will expire and new physicians to begin practice before full medical staff/governing body review and approval, adding capacity to the health care system.
Discharge Planning Requirements. Waiving hospital discharge planning requirements that prohibit hospitals from specifying or otherwise limiting the information provided on post-hospital services is necessary because the capacity and/or capabilities of available facilities to care for COVID-19 patients may be severely limited, effectively restricting patient choice, and this is a time consuming task that draws nurses away from direct patient care.
HH Assessments. Waiving HH requirements at 484.55 would remove a series of requirements around initial and comprehensive assessments. For example, it would allow HH agencies to perform initial assessments and determine patients' homebound status remotely or by record review, so that beneficiaries can obtain care while minimizing the risk to themselves or others. It also would grant greater flexibility with the timing of and information included in patient assessments.

AMERICAN OVERSIGHT

Expanded Use of Telehealth. Insurers should support management of scarce resources, such as personal protective equipment, and efforts to reduce community transmission by expanding access to services delivered via telehealth.
Credentialing. Requiring expedited or presumptive credentialing, such as requiring health plans to establish a process to recognize and credential community physicians who offer to work at hospitals and health systems, would help to ease workforce shortages during this time.
Patient Assessments. Granting relief to all providers on the timeframes related to pre- and post-admission patient assessment and evaluation criteria would help ensure patients are treated in a timely manner.
CMS Survey of 340B Hospitals. CMS should suspend its scheduled survey of all hospitals that participate in the 340B Drug Pricing Program collecting actual acquisition costs for specified covered outpatient drugs (SCODs). While AHA has significant issues with the survey design, our paramount concern is the significant reporting burden this survey would place on 340B hospitals during the COVID-19 national health emergency.
Administrative Timeframes. Allowing leniency in administrative timeframes, including for billing and the submission of Medicare Cost Reports, for hospitals/health systems that experience business disruptions, e.g., as a result of workforce shortages.

HELP US GET THE TOOLS WE NEED

Sterile Compounding. Waiving sterile compounding requirements at 482.25(b)(1) and USP 797 would allow face masks to be removed and retained in the compounding area to be re-donned and reused during the same work shift only to conserve scarce face mask supplies.
340B Eligibility. Providing for a limited waiver of the 340B Hospital Medicare DSH eligibility threshold for current 340B hospitals responding to the COVID-19 national health emergency and experiencing a significant change in patient mix would help ensure that hospitals do not lose their 340B status in the future as a result of a time-limited change in patient mix.
Prior Authorization for Post-acute Care (PAC). Requiring that plans waive prior authorization requirements for PAC placement would enable hospitals to free up inpatient bed capacity.
Restrictions on Telehealth Technology. Waive the restrictions on the type of technology that may be used to provide telehealth would allow patients to use the technology they have on hand, such as FaceTime and Skype, providing critical flexibility that will allow them to remain in their homes while still obtaining services. These waivers must be made in conjunction with those above on geographic and originating sites and below on HIPAA privacy requirements in order to be meaningful.
HIPAA Privacy Requirements. Waiving HIPAA privacy requirements and permitting a similar waiver of applicable security rule requirements would allow patients to use technologies such as FaceTime and Skype, as specified above. These waivers must be made in conjunction with those above on geographic and originating sites and telehealth technology in order to be meaningful.

AMERICAN OVERSIGHT

IRF 3-hour Rule. Waiver of the 3-hour rule, which requires that inpatient rehabilitation facility (IRF) patients receive at least three hours of therapy a day, the "preponderance" of which must be one-on-one, would help ensure that IRFs are able to add capacity to the health care system, without penalty.
LTCH 50% Rule. Waiving both the numerator and denominator of the requirement that LTCHs have no more than 50% of Medicare cases paid at the site-neutral rate would help ensure they are able to add capacity to the health care system by caring for appropriate patients, without penalty.
Emergency Use Authorizations (EUAs). Expediting the approval of EUAs for hospital laboratory developed tests (LDTs), including the approval of licensed automated testing systems and rapid response testing, would assist hospitals in expeditiously testing and confirming COVID-19 infection in patients and thus responding to the emergency.
Access to Coronavirus. Access to the virus and its genomic RNA would allow hospitals to validate their LDTs. Some hospitals with laboratories certified for high complexity testing under CLIA are having difficulty obtaining this material

ENSURE COVERAGE SO ALL PATIENTS CAN SEEK HELP WHEN NECESSARY

Presumptive Authorization. Requiring plans to accept presumptive authorization in instances where health plans, due to business disruption such as reduced workforce capacity, cannot adjudicate requests within a timely manner, would help ensure patients are treated in a timely manner.
Presenting Symptoms as Basis for Coverage. Generally, insurers make coverage decisions in part by assessing whether care was medically necessary, and many insurers adjudicate medical necessity using information that becomes available during the course of treatment or testing. This approach could result in many coverage denials for individuals who were originally suspected to have coronavirus but who ultimately are found to have the flu. The government should clarify that coverage decisions must be made on the presenting symptoms, not the final diagnosis.
Cost-sharing. Mandating that all forms of cost-sharing (co-pays, co-insurance, deductibles) be waived not only for testing, but also for treatment of coronavirus would help eliminate cost as a barrier to care. CMS should also require plans to reimburse providers for the full contracted amount.
Out-of-network Care. We urge the government to direct health plans to hold the patient harmless for out-of-network care, such as laboratory services, and negotiate reimbursement with the provider.
Utilization Management Requirements. Requiring health plans to ease utilization management requirements during the emergency period to account for reduced workforce would help ensure there are not bottlenecks and unnecessary delays in care. Specifically, hospitals and health systems are expected to experience staff reductions and diversions and health plans should not be permitted to deny reimbursement for care for which providers were unable to complete prior authorization or other utilization management functions due solely to workforce constraints.

AMERICAN OVERSIGHT

Ensuring Adequate Coverage and Resources. Refraining from implementing policies that would reduce Medicaid coverage and/or resources would help ensure patients get the care they need. Specifically, we ask that the Administration withdraw the proposed Medicaid Fiscal Accountability Rule, which could have a negative impact on coverage and health care system resources just as we seek to manage COVID-19 patients.
Automatic Eligibility Renewal. Allowing states six month automatic eligibility renewal would help ensure continuity of coverage.
Increase Access to Presumptive Eligibility. The Administration should remove administrative barriers to Medicaid hospital presumptive eligibility during the COVID-19 emergency to increase access to coverage.
Children's Health Insurance Program (CHIP) Eligibility Limits. Federal law restricts states from increasing their CHIP eligibility limits. We urge flexibility to states seeking to expand CHIP eligibility within their current CHIP grants to enable access to testing and treatment for uninsured children.
Uncompensated Care Pools. Allow states to reestablish or create time-limited Medicaid-funded uncompensated care pools through Medicaid Section 1115 demonstration waivers to cover the costs of the uninsured.
Special Enrollment Period. Creating a special period enrollment for the Health Insurance Marketplaces would increase access to coverage and care.
Direct Provider Reimbursement. Establishing a federal program to directly reimburse providers for costs associated with caring for the uninsured would help ensure hospital have adequate resources for addressing the emergency. While federal law now provides a mechanism for reimbursement for testing and testing-related services, this must be expanded to treatment costs as well.
Medicaid DSH. Delaying Medicaid DSH cuts and establishing a temporary Medicaid DSH allotment increase would help cover COVID-19 related testing and treatment, including equipment.

ENSURE PAYMENT FLOWS APPROPRIATELY

Telehealth Geographic and Originating Site Requirements. Waiving the geographic site requirements that limit telehealth payment to services furnished within certain geographic areas, as well as the originating site requirements that specify the particular sites at which the eligible telehealth individual must be located would provide critical flexibility to allow patients to remain in their homes while still obtaining services. These waivers must be made in conjunction with those below on telehealth technology and HIPAA privacy requirements in order to be meaningful.
LTCH 50% Rule. Waiving both the numerator and denominator of the requirement that LTCHs have no more than 50% of Medicare cases paid at the site-neutral rate would help ensure they are able to add capacity to the health care system by caring for appropriate patients, without penalty.

AMERICAN OVERSIGHT

LTCH ICU Requirement. Waiving the requirement that an LTCH patient have a prior hospital stay that includes three days or more in the intensive care unit (ICU) in order to qualify for the full payment rate would ensure they are able to add capacity to the health care system by caring for appropriate patients, without penalty.
Alternative Payment Model (APM) Flexibility. Deeming coronavirus an 'extreme and uncontrollable circumstance' for APMs that have significant hardship policies would allow the agency flexibility in making adjustments to the APM specifications, such as for episode spending or quality measurement. This would help ensure that providers are not penalized for circumstances beyond their control.
Supplemental Payments. Allow states to create new time-limited supplemental hospital payment mechanisms (fee for service and managed care) to address COVID-19 related treatment, services, testing without CMS prior approval if state appropriately documents program.
Temporary Waiver of Certain Payment Caps. Allow states to suspend any Upper Payment Limit restrictions or Medicaid DSH hospital-specific caps to address hospital payments for COVID-19 related treatment, services, testing without CMS prior approval if state appropriately documents such payments.
Site-neutral Payment Cuts. Immediately cease paying claims for clinic visits provided at excepted off-campus provider-based departments at the reduced payment rate implemented with the 2020 Medicare final rule governing the hospital outpatient prospective payment system. Instead such clinic visit claims should be paid at the rate that would have been in effect absent the payment reduction. Refraining from reducing resources in this manner would help ensure patients get the care they need.

Talking Points
FHA Call – 3:30 p.m.

- I want to extend a thank you to Governor DeSantis, Lieutenant Governor Nunez and Surgeon General Rivkees for their leadership.

- Per Governor DeSantis' Executive Order issued on March 1, 2020, all state agencies are required to cooperate with DOH as they lead response to COVID-19.

- AHCA's role is to support the efforts of DOH efforts as they coordinate with state and local partners to investigate, confirm, contain, and report any suspected cases, should they occur.

- DOH is working closely with the CDC to monitor the current outbreak of COVID-19 and is actively working to ensure that the most up-to-date CDC guidance is quickly and accurately disseminated to local partners.

- Hospitals should stay in contact with their local health departments for up-to-date guidance on COVID-19.

- Additionally, if you have any challenges with discharging, please reach out to the local health department.

Emergency Status System

AMERICAN OVERSIGHT

- I reminded everyone earlier this week, but AHCA has opened an event on the Emergency Status System for hospitals to enter census information and emergency room status updates.

- All hospitals must ensure the "Facility Info" section is up to date regarding isolation.

- Please report Staffed Capacity and Current Bed Census for all licensed and acute care beds in your facility daily by 10 AM EST and 7 PM EST until further notice.

- Please report Emergency Department Status now and as needed for status changes.

- For all standalone emergency departments, please report Emergency Department Status now and as needed when the status changes.

General Guidance

- COVID-19 is thought to primarily spread mainly between people who are in close contact with one another through respiratory droplets, whenever an infected person coughs or sneezes.

- Symptoms of COVID-19 are like that of a respiratory infection:
    - Fever
    - Cough
    - Shortness of breath

- There is currently no vaccine to protect against COVID-19. The best way to prevent infection is to take everyday preventive actions, like avoiding close contact with people who are sick and washing your hands often.

- You can protect from yourself respiratory illness with everyday preventive actions:
    - Avoid close contact with people who are sick.
    - Avoid touching your eyes, nose, and mouth with unwashed hands.
    - Wash your hands often with soap and water for at least 20 seconds. Use an alcohol-based hand sanitizer that contains at least 60% alcohol if soap and water are not available.
    - Stay home when you are sick.

AMERICAN OVERSIGHT

- Cover your cough or sneeze with a tissue, then throw the tissue away.
- Clean and disinfect frequently touched objects and surfaces.

- Providers and facilities should be reviewing CDC infection control procedures and how to effectively triage and isolate potentially infectious individuals to prevent unnecessary exposure among other patients, healthcare personnel and visitors at the facility.

- Additionally, you should ensure your workforce is trained and capable of implementing infection control procedures.

- Review your facility protocols including visitor screening to ensure precautions are in place to limit introduction of the virus.

- The CDC has provided guidance to facilities to screen patients and visitors for symptoms of acute respiratory illness (e.g., fever, cough, difficulty breathing) before entering your healthcare facility.

- CDC guidance for long-term care facilities can be found on their website: www.cdc.gov/covid19.

- The most important message from the CDC for long-term care facilities is that of prevention:
  - Prevent the introduction of respiratory germs INTO your facility;
  - Prevent the spread of respiratory germs WITHIN your facility;
  - And prevent the spread of respiratory germs BETWEEN facilities.

- I am continuing to advise nursing home facilities and other long-term care providers of best practices to protect residents and staff.

Prevent the introduction of respiratory germs INTO your facility

- Post signs at the entrance instructing visitors not to visit if they have symptoms of respiratory infection.
- Let me be very clear: **If you are sick, do not visit a nursing home.**
- Ensure sick leave policies allow employees to stay home if they have symptoms of respiratory infection.

AMERICAN OVERSIGHT

- Assess residents' symptoms of respiratory infection upon admission to the facility and implement appropriate infection prevention practices for incoming symptomatic residents.

Prevent the spread of respiratory germs WITHIN your facility

- Keep residents and employees informed.
- Monitor residents and employees for fever or respiratory symptoms.
- Support hand and respiratory hygiene, as well as cough etiquette by residents, visitors, and employees.
- Identify dedicated employees to care for COVID-19 patients and provide infection control training.
- Provide the right supplies to ensure easy and correct use of Personal Protective Equipment. There is guidance on CDC's website for this as well.

Prevent the spread of respiratory germs BETWEEN facilities

- Notify facilities prior to transferring a resident with an acute respiratory illness, including suspected or confirmed COVID-19, to a higher level of care.
- Report any possible COVID-19 illness in residents and employees to the local health department.

AMERICAN OVERSIGHT

Talking Points
FHA Call – 3:30 p.m.

Provider Type(s): All

Medicaid Telemedicine Guidance for Medical and Behavioral Health Providers

To assist with the response efforts to the 2019 novel coronavirus (COVID-19) state of emergency, the Agency for Health Care Administration (Agency) has prepared this alert to ensure providers are aware of our current Medicaid policy for telemedicine and temporary waivers/flexibilities we are enacting to reduce opportunities for community spread of the virus. The purpose of this document is to provide telemedicine guidance to providers on Florida Medicaid coverage of services using live, two-way communication.

Telemedicine Definition

AMERICAN OVERSIGHT

Telemedicine is the practice of health care delivery by a practitioner who is in a site other than the site where a recipient is located, using interactive telecommunications equipment that minimally includes real time, two-way interactive communication between a recipient and a practitioner using audio and video equipment.

Current Coverage in the Florida Medicaid Program

Statewide Medicaid Managed Care Program

Medicaid health plans have broad flexibility in covering telemedicine services, including remote patient monitoring and store-and-forward services. The Agency has encouraged plans to ensure the use of services via telemedicine is maximized (as appropriate and allowable with the practitioner's scope of practice) to be responsive to workforce shortages or to meet the needs of enrollees who are homebound or are being monitored in the home. Please contact the health plans directly to inquire about their telemedicine requirements and reimbursement rates.

Fee-for-Service Delivery System

The Agency's current telemedicine policy in the fee-for-service delivery system is available at: http://ahca.myflorida.com/medicaid/review/General/59G_1057_TELEMEDICINE.pdf.

- **Practitioners:** The Agency covers physician, physician extenders (advanced practice registered nurses and physician assistants), and clinic providers (county health departments, federally qualified health centers, and rural health clinics) through telemedicine. Covered medical services include evaluation, diagnostic, and treatment recommendations for services included on the Agency's practitioner fee schedule to the extent telemedicine is designated in the American Medical Association's Current Procedural Terminology (i.e., national coding standards). All service components included in the procedure code must be completed in order to be reimbursed. The Agency reimburses services using telemedicine at the same rate detailed on the practitioner fee schedule. Providers must append the GT modifier to the procedure code in the fee-for-service delivery system.

- **Behavioral Health:** The Agency covers behavioral health evaluation, diagnostic, and treatment recommendation services through telemedicine. The Agency reimburses the behavioral health assessment and medication management screening services through telemedicine, at the same rate detailed on the community behavioral health fee schedule. Providers must perform all service components designated for the procedure code billed. Providers must append the GT modifier in the fee-for-service delivery system.

Additional Telemedicine Flexibilities During the State of Emergency (*Applies to the Fee-For-Service Delivery System*)

During the state of emergency, the Agency is expanding services provided through telemedicine (live, two-way communication) through the fee-for-service delivery system to include the below treatment services, as medically necessary:

Service	Procedure Code	Required Modifier

AMERICAN OVERSIGHT

Brief individual medical psychotherapy, mental health	H2010 HE	GT
Brief individual medical psychotherapy, substance abuse	H2010 HF	GT
Individual Therapy	H2019 HR	GT
Family Therapy	H2019 HR	GT
Medication Management	T1015	GT
Behavioral health-related medical services: verbal interaction, mental health	H0046	GT
Behavioral health-related medical services: verbal interaction, substance abuse	H0047	GT
Medication-assisted treatment services	H0020	GT
Face-to-face contact prior to SIPP discharge and the home visit interview requirement components of Mental Health Targeted Case Management	T1017 T1017 HA T1017 HK	GT

The Agency reimburses these services using telemedicine at the same rate detailed for the procedure code on the respective Medicaid fee schedule.

Store-and-Forward & Remote Patient Monitoring

For certain evaluation and management services provided during the state of emergency period, the Agency is expanding telehealth to include store-and-forward and remote patient monitoring modalities rendered by **licensed physicians and physician extenders (including those operating within a clinic)** functioning within their scope of practice. The Agency will reimburse each service once per day per recipient, as medically necessary and at the rates detailed in the table below.

Service	**Procedure Code**	**Modifier Required**	**Reimbursement Rate**	
			Maximum Fee*	**Maximum Facility Fee****
Store-and-forward	G2010	CR	$7.69	$5.66
Telephone Communications - *Existing* Patients	99441	CR	$9.05	$8.05
	99442	CR	$17.65	$16.10
	99443	CR	$25.80	$23.94
Telephone Communications - *New* Patients	99441 CG	CR	$9.05	$8.05
	99442 CG	CR	$17.65	$16.10
	99443 CG	CR	$25.80	$23.94
Remote patient monitoring	99453	CR	$11.77	N/A
	99454	CR	$39.15	N/A

AMERICAN OVERSIGHT

	99091	CR	$37.12	N/A
	99473	CR	$7.02	N/A
	99474	CR	$9.51	$5.44
	99457	CR	$32.36	$19.80
	99458	CR	$26.48	$19.80

**On the practitioner fee schedule, this represents the fee schedule increase rate, which is the base Florida Medicaid rate with a 4% increase included for all ages.*
***The facility fee is the reimbursement rate for a practitioner performing services in one of the following places of service: outpatient hospital-off campus (19), inpatient hospital (21), outpatient hospital-on campus (22), emergency room hospital (23), or ambulatory surgical center (24), according to Medicare's designation.*

Telehealth Provider Requirements

Providers using any modality of telehealth described in this alert must:

- Ensure treatment services are medically necessary and performed in accordance with the corresponding and promulgated service-specific coverage policy and fee schedule. For new procedure codes temporarily covered during the state of emergency, services must be performed in accordance with the American Medical Association's Current Procedural Terminology procedure code definitions and guidance.
- Comply with HIPAA regulations related to telehealth communications.
    - See additional guidance provided by the Office of Civil Rights on March 17, 2020 during the state of emergency here.
- Supervision requirements within a provider's scope of practice continue to apply for services provided through telehealth.
- Documentation regarding the use of telehealth must be included in the medical record or progress notes for each encounter with a recipient.
- The patient and parent or guardian, as applicable, must be present for the duration of the service provided using telehealth except when using store and forward modalities.
- Out-of-state practitioners who are not licensed in Florida may provide telemedicine services to Florida Medicaid recipients, when appropriate, during the state of emergency in accordance with the Department of Health's emergency order (DOH 20 - 002).
    - These providers must go through the provisional enrollment process, if they are not already enrolled in Florida Medicaid. More information about the provisional enrollment process will be available on March 19, 2020 at http://www.mymedicaid-florida.com.

Additional Information

The Agency will issue subsequent guidance for other provider types (therapy services, behavior analysis services, etc.) use of telemedicine.

The Agency will continue to provide information as it becomes available.

For more information, visit the Department's COVID-19 website: www.flhealth.gov/COVID-19.

Florida Medicaid Health Care Alert

March 16, 2020

Provider Type(s): All

Medicaid Coverage of Services During the State of Emergency Related to COVID-19

The Agency for Health Care Administration (Agency) is committed to ensuring that Medicaid recipients diagnosed with the 2019 novel coronavirus (COVID-19) receive all the care needed to address their symptoms. **Florida Medicaid covers and will cover all medically necessary services required to facilitate testing and treatment of COVID-19.** The purpose of this alert is to provide guidance on the flexibilities offered to providers furnishing services to recipients impacted by COVID-19. This policy guidance applies to services rendered through both the fee-for-service (FFS) delivery system and the Statewide Medicaid Managed Care (SMMC) program.

Here is the list of modifications being made now. As the situation evolves, the Agency may make additional changes to assist providers and to meet the needs of recipients.

Prior Authorization Requirements

In order to reduce administrative burdens on key providers that are on the front line serving the populations most impacted by COVID-19, Florida Medicaid is waiving prior authorization requirements for hospital services, physician services, advanced practice registered nursing services, home health services, and durable medical equipment and supplies. This will allow these provider types to redeploy resources used to complete these functions, as needed. In addition to the services listed above, Florida Medicaid is waiving all prior authorization requirements for all services necessary to appropriately evaluate and treat Medicaid recipients diagnosed with COVID-19. Please refer to official diagnosis coding guidelines that have been published by the Centers for Disease Control (CDC).

Limits on Services

- Florida Medicaid will waive limits on services (specifically related to frequency, duration, and scope) that need to be exceeded in order to maintain the health and safety of recipients diagnosed with COVID-19 or when it is necessary to maintain a recipient safely in their home. Examples of services include: the 45-day hospital inpatient limit, home health services, durable medical equipment, in-home physician visits, etc.

- Florida Medicaid lifted all limits on early prescription refills during the state of emergency for maintenance medications, except for controlled substances. The edits prohibiting early prescription refills will remain lifted until further notice by the Agency. This will assist recipients who may need to be self-quarantined for a period of time.

- Florida Medicaid will reimburse for a 90-day supply of maintenance prescriptions when available at the pharmacy. The recipient must request that the pharmacy dispense a 90-day supply. In addition, Florida Medicaid will allow mail order delivery of maintenance prescriptions in those instances when recipients are prohibited from going to a retail

AMERICAN OVERSIGHT

pharmacy. Florida Medicaid will also pay for a 90-day supply of maintenance prescriptions through mail order delivery.

Cost Sharing

Florida Medicaid is waiving all co-payments related to testing and diagnosing COVID-19 and treating Medicaid recipients diagnosed with COVID-19.

Health Plan Appeals and Fair Hearings

If needed, recipients impacted by COVID-19 may be given more time to submit an appeal through their health plan or request a fair hearing. In addition, the Agency has sought federal approval to temporarily delay scheduling of Medicaid fair hearings and issuing fair hearing decisions during the emergency period if there are workforce shortages. The Agency would limit use of this flexibility to those instances where the enrollee is continuing to receive services pending the outcome of the fair hearing.

Preadmission Screening and Resident Reviews

All Preadmission Screening and Resident Review (PASRR) processes may be postponed until further notice by the Agency.

- Retroactively performed screenings or resident reviews must document the reason for delay in the completion of PASRR requirements.

Provider Enrollment

Florida Medicaid will pay for medically necessary services provided to recipients diagnosed with COVID-19, regardless of whether the provider is located in-state or out-of-state. To be reimbursed for services rendered to eligible Florida Medicaid recipients, providers not already enrolled in Florida Medicaid (out-of-state or in-state) must complete a provisional (temporary) enrollment application. The process for provisional provider enrollment is located at http://www.mymedicaid-florida.com. In the event of workforce shortages in the State, practitioners that are not already enrolled in Florida can seek enrollment following the instructions above.

Face-to-Face Provider Site Visits

In order to reduce community-spread of the virus, the Agency (and its Medicaid health plans) will be postponing face-to-face provider-site visit requirements (e.g., enrollment, credentialing, etc.) until further notice. Whenever possible, these requirements will be met telephonically or through audio/visual technology.

Federal Authorities

The Centers for Medicare and Medicaid Services has issued a set of blanket waivers that states may utilize in response to COVID-19. The Agency has already received authority for many of these waivers related to health care facilities and licensure requirements. The Agency is actively working to receive the federal authority needed for many of the items listed in this alert related to the Medicaid program. For a full list of the blanket waivers issued by CMS, click on this link: https://www.cms.gov/files/document/covid19-emergency-declaration-health-care-providers-fact-sheet.pdf.

The Agency will be issuing subsequent guidance related to additional flexibilities or service enhancements that will be enacted to ensure there is no disruption in care for Medicaid recipients in

AMERICAN OVERSIGHT

the event of workforce shortages or limitations in recipients seeking care in provider offices (e.g., telemedicine, expanding the participant directed option in the Long-Term Care program, etc.).

Subject: [External] Test Message - Admitting Residents with Respiratory Illness

AMERICAN OVERSIGHT

MARY C. MAYHEW
SECRETARY

Admitting Residents with Respiratory Illness

The COVID-19 pandemic is unprecedented and we are taking extreme measures to protect our families and our residents. To ensure the best quality of life for our residents, nursing homes need to understand the resident's medical history when making admissions/readmission decisions.

Respiratory Panel Tests

Respiratory panel tests are used to determine what pathogen may be causing a respiratory infection. Respiratory pathogen panel tests for the presence of bacteria and viruses in a single respiratory sample. The sample may be a nasopharyngeal swab or sputum. Differences in respiratory pathogen panels depend on which micro-organisms they can detect. Some of the common organisms that are included in these tests are Adenovirus, Influenza, Respiratory Syncytial Virus (RSV), Parainfluenza viruses, Rhinovirus, and Coronavirus. When you see Coronavirus on these panels, it is testing for coronaviruses that have been around for some time like Coronavirus HKU1, Coronavirus NL63, Coronavirus 229E, or Coronavirus OC43. The respiratory panels are NOT capable of testing for the SARS 2 CoV-2 which is the novel strain of coronavirus most often referred to as COVID-19.

Infection Prevention Precautions

CDC provides guidance in their Isolation Precautions Guideline Appendix A on the type and duration of precautions for respiratory pathogens. Respiratory infections may require standard precautions, droplet precautions, droplet and contact precautions, or contact precautions depending on the pathogen and precautions typically need to be in place for the duration of illness. This means that if a patient is being transferred to the nursing home because their illness has resolved then the nursing home can remove the precautions at the time of transfer. CDC does note that at times we may need to consider extending precautions in immunocompromised persons due to ongoing viral shedding even after they are no longer symptomatic. Please refer to the CDC guideline to

AMERICAN OVERSIGHT

identify the type of precautions needed and for how long based on the pathogen.

In summary, Respiratory infections are common and may be due to a variety of different pathogens. Florida's nursing homes have a long history of successfully caring for residents with respiratory infections and need to continue to provide care to these residents. All reasonable efforts must be made to admit residents that have a condition that can be cared for within the capacity of the nursing home.

The Agency for Health Care Administration is committed to better health care for all Floridians. The Agency administers Florida's Medicaid program, licenses and regulates more than 44,000 health care facilities and 53 health plans, and publishes health care data and statistics at www.FloridaHealthFinder.gov. Additional information about Agency initiatives is available via Facebook (AHCAFlorida), Twitter (@AHCA_FL) and YouTube (/AHCAFlorida).

COVID-19 Emergency Declaration
Health Care Providers Fact Sheet

The Trump Administration is taking aggressive actions and exercising regulatory flexibilities to help healthcare providers combat and contain the spread of 2019 Novel Coronavirus Disease (COVID-19). In response to COVID-19, CMS is empowered to take proactive steps through 1135 waivers and rapidly expand the Administration's aggressive efforts against COVID-19. As a result, the following blanket waivers are available:

- **Skilled Nursing Facilities**
  CMS is waiving the requirement at Section 1812(f) of the Social Security Act for a 3-day prior hospitalization for coverage of a skilled nursing facility (SNF) stay provides temporary emergency coverage of (SNF services without a qualifying hospital stay, for those people who need to be transferred as a result of the effect of a disaster or emergency. In addition, for certain beneficiaries who recently exhausted their SNF benefits, it authorizes renewed SNF coverage without first having to start a new benefit period.

  Second, CMS is waiving 42 CFR 483.20 to provides relief to SNFs on the timeframe requirements for Minimum Data Set assessments and transmission.

- **Critical Access Hospitals**
  CMS is waiving the requirements that Critical Access Hospitals limit the number of beds to 25, and that the length of stay be limited to 96 hours.

- **Housing Acute Care Patients In Excluded Distinct Part Units**
  CMS is waiving requirements to allow acute care hospitals to house acute care inpatients in excluded distinct part units, where the distinct part unit's beds are appropriate for acute care inpatient. The Inpatient Prospective Payment System (IPPS) hospital should bill for the care and annotate the patient's medical record to indicate the patient is an acute care inpatient being housed in the excluded unit because of capacity issues related to the disaster or emergency.

- **Durable Medical Equipment**
  Where Durable Medical Equipment Prosthetics, Orthotics, and Supplies (DMEPOS) is lost, destroyed, irreparably damaged, or otherwise rendered unusable, contractors have the flexibility to waive replacements requirements such that the face-to-face requirement, a new physician's order, and new medical necessity documentation are not required. Suppliers must still include a narrative description on the claim explaining the reason why the equipment must be replaced and are reminded to maintain documentation indicating that the DMEPOS was lost, destroyed, irreparably damaged or otherwise rendered unusable or unavailable as a result of the emergency.

AMERICAN OVERSIGHT

- **Care for Excluded Inpatient Psychiatric Unit Patients in the Acute Care Unit of a Hospital**
  CMS is waiving to allow acute care hospitals with excluded distinct part inpatient psychiatric units that, as a result of a disaster or emergency, need to relocate inpatients from the excluded distinct part psychiatric unit to an acute care bed and unit. The hospital should continue to bill for inpatient psychiatric services under the Inpatient Psychiatric Facility Prospective Payment System for such patients and annotate the medical record to indicate the patient is a psychiatric inpatient being cared for in an acute care bed because of capacity or other exigent circumstances related to the hurricane. This waiver may be utilized where the hospital's acute care beds are appropriate for psychiatric patients and the staff and environment are conducive to safe care. For psychiatric patients, this includes assessment of the acute care bed and unit location to ensure those patients at risk of harm to self and others are safely cared for.

- **Care for Excluded Inpatient Rehabilitation Unit Patients in the Acute Care Unit of a Hospital**
  CMS is waiving requirements to allow acute care hospitals with excluded distinct part inpatient Rehabilitation units that, as a result of a disaster or emergency, need to relocate inpatients from the excluded distinct part rehabilitation unit to an acute care bed and unit. The hospital should continue to bill for inpatient rehabilitation services under the inpatient rehabilitation facility prospective payment system for such patients and annotate the medical record to indicate the patient is a rehabilitation inpatient being cared for in an acute care bed because of capacity or other exigent circumstances related to the disaster or emergency. This waiver may be utilized where the hospital's acute care beds are appropriate for providing care to rehabilitation patients and such patients continue to receive intensive rehabilitation services.

  CMS is waiving requirements to allow IRFs to exclude patients from the hospital's or unit's inpatient population for purposes of calculating the applicable thresholds associated with the requirements to receive payment as an IRF (commonly referred to as the "60 percent rule") if an IRF admits a patient solely to respond to the emergency and the patient's medical record properly identifies the patient as such. In addition, during the applicable waiver time period, we would also apply the exception to facilities not yet classified as IRFs, but that are attempting to obtain classification as an IRF.

- **Supporting Care for Patients in Long-Term Care Acute Hospitals (LTCH)s**
  Allows a long-term care hospital (LTCH) to exclude patient stays where an LTCH admits or discharges patients in order to meet the demands of the emergency from the 25-day average length of stay requirement which allows these facilities to be paid as LTCHs.

- **Home Health Agencies**
  Provides relief to Home Health Agencies on the timeframes related to OASIS Transmission. Allows Medicare Administrative Contractors to extend the auto-cancellation date of Requests for Anticipated Payment (RAPs) during emergencies.

AMERICAN OVERSIGHT

- **Provider Locations**
  Temporarily waive requirements that out-of-state providers be licensed in the state where they are providing services when they are licensed in another state. This applies to Medicare and Medicaid.

- **Provider Enrollment**
  - Establish a toll-free hotline for non-certified Part B suppliers, physicians and non-physician practitioners to enroll and receive temporary Medicare billing privileges
  - Waive the following screening requirements:
    - Application Fee - 42 C.F.R 424.514
    - Criminal background checks associated with FCBC - 42 C.F.R 424.518
    - Site visits - 42 C.F.R 424.517
  - Postpone all revalidation actions
  - Allow licensed providers to render services outside of their state of enrollment
  - Expedite any pending or new applications from providers

- **Medicare appeals in Fee for Service, MA and Part D**
  - Extension to file an appeal
  - Waive timeliness for requests for additional information to adjudicate the appeal;
  - Processing the appeal even with incomplete Appointment of Representation forms but communicating only to the beneficiary;
  - Process requests for appeal that don't meet the required elements using information that is available.
  - Utilizing all flexibilities available in the appeal process as if good cause requirements are satisfied.

Medicaid and CHIP

When the President declares an emergency through the Stafford Act or National Emergency Act, and the Secretary declares a Public Health Emergency, the Secretary is authorized to waive certain Medicare, Medicaid and Children's Health Insurance Program (CHIP) authorities under Section 1135 of the Social Security Act.

There is no specific form or format that is required to submit the request for a Section 1135 waiver, but the state should clearly state the scope of the issue and the impact. States and territories may submit a Section 1135 waiver request directly to Jackie Glaze, CMS Acting Director, Medicaid & CHIP Operations Group Center for Medicaid & CHIP Services by e-mail (Jackie.Glaze@cms.hhs.gov) or letter.

AMERICAN OVERSIGHT

The following are examples of flexibilities that states and territories may seek through a Section 1135 waiver request:

- Waive prior authorization requirements in fee-for-service programs
- Permits providers located out of state/territory to provide care to another state's Medicaid enrollees impacted by the emergency
- Temporarily suspend certain provider enrollment and revalidation requirements to increase access to care.
- Temporarily waive requirements that physicians and other health care professionals be licensed in the state in which they are providing services, so long as they have an equivalent licensing in another state, and
- Temporarily suspend requirements for certain pre-admission and annual screenings for nursing home residents
- States and territories are encouraged to assess their needs and request these available flexibilities, which are more completely outlined in the Medicaid and CHIP Disaster Response Toolkit. For more information and to access the toolkit, visit: https://www.medicaid.gov/state-resource-center/disaster-response-toolkit/index.html.

For questions please email: 1135waiver@cms.hhs.gov

Thanks, Kim. As best I can tell, Gov. Cuomo simply announced this as a "policy". I'm trying to see if they did any kind of formal regulatory waivers or orders, but nothing is readily apparent.

Subject: DURING NOVEL CORONAVIRUS BRIEFING, GOVERNOR CUOMO ANNOUNCES NEW MASS GATHERINGS REGULATIONS

<ATT00001.gif.secure>
liate Release: 3/12/2020 **GOVERNOR ANDREW M.**

DURING NOVEL CORONAVIRUS BRIEFING, GOVERNOR CUOMO ANNOUNCES NEW MASS GATHERINGS REGULATIONS

Events with 500 or More Individuals in Attendance to Be Cancelled or Postponed

Any Gathering Under 500 Individuals in Attendance Will Be Required to Cut Capacity by 50 Percent

New Limits on Visitations to Nursing Homes - Only Medically Necessary Visits Will Be Allowed To Protect Most Vulnerable

First Public Drive-Through Testing Facility on the East Coast, Located in New Rochelle, Will Start Testing Tomorrow

Confirms 109 Additional Coronavirus Cases in New York State - Bringing Statewide Total to 325; New Cases in 14 Counties

During a novel coronavirus briefing, Governor Andrew M. Cuomo today announced the state will institute limits on mass gatherings, directing events with 500 or more individuals in attendance to be cancelled or postponed. Public health experts agree mass gatherings with people making sustained close contact are a place where the novel coronavirus can easily infect many people quickly and continue its spread. As such, events, gatherings, or places of business with less than 500 individuals in attendance will be required to cut capacity by 50 percent, with exceptions being made for spaces where individuals do not make sustained close contact, such as schools, hospitals, public buildings, mass transit, grocery stores and retail stores. These new regulations will go into effect Friday, March 13th at 5pm, with the exception of Broadway Theaters where the limits will go into effect this evening at 5pm.

In an effort to protect some of the most vulnerable New Yorkers, Governor Cuomo also announced only medically necessary visits will be allowed at nursing homes. This policy will be effective Friday at 5pm. The state is also asking nursing homes to set up skyping and other online communication capacity so families can tele-visit their loved ones. Additionally, the state will require health screenings for all nursing home workers each day when they enter a facility and require them to wear surgical masks to guard against any potential asymptomatic spread.

In order to increase testing capacity, the State is contracting with BioReference Laboratories to run an additional 5,000 tests per day on top of what the state is already doing. These additional 5,000 tests per day will come online next week. This additional testing capacity is on top of that of the 28 private labs the Governor announced are partnering with the state in the coming days and weeks.

AMERICAN OVERSIGHT

Additionally, the Governor announced the first public drive-through testing facility on the east coast will start testing people tomorrow in New Rochelle. Testing will be done by appointment only. New Rochelle residents who have been quarantined will be tested first.

Finally, the Governor confirmed 109 additional cases of novel coronavirus, bringing the statewide total to 325 confirmed cases in New York State. Of the 325 total individuals who tested positive for the virus, the geographic breakdown is as follows:

Albany County: 1 (1 new)
Broome County: 1 (1 new)
Delaware County: 1 (1 new)
Dutchess County: 1 (1 new)
Herkimer County: 1 (1 new)
Monroe County: 1 (1 new)
Nassau County: 41 (13 new)
New York City: 95 (43 new)
Orange County: 1 (1 new)
Rockland County: 7 (1 new)
Saratoga County: 3 (1 new)
Suffolk County: 20 (14 new)
Ulster County: 4 (3 new)
Westchester County: 148 (27 new)

"The spread of this coronavirus is not going to stop on its own, and we know that mass gatherings have been hotspots for the virus to infect large numbers of people quickly," **Governor Cuomo said.** "To help contain it, we are instituting limits on large events as well as new measures to protect our most vulnerable populations — including people in nursing homes — and preparing our healthcare system to be able to deal with any future capacity issues. While the context is key and the anxiety is outpacing the facts of this situation, we will continue taking aggressive action to protect public health and prepare for any future spread of this virus."

"Our number one priority is protecting the public health and every action the Governor and the State of New York have taken thus far have been in furtherance of that goal," **State Health Department Commissioner Dr. Howard Zucker said.** "Public health experts have been clear that limiting large public gatherings where there is potential for close contact is a critical way to slow the spread of this virus. This regulation will help keep people healthy and safe."

The Governor also announced that the State is taking measures to create a reserve workforce of health care professionals in the event of a staffing shortage and identify state facilities that can be used as temporary hospitals. The State is asking former doctors, nurses and other health care professionals to reconnect with their former employers and offer to work on an on-call basis in the cases of a staffing shortage. The State is also identifying National Guard medics for reserved staffing and contacting medical schools to identify possible reserve health care professionals. Additionally, the Department of Health is accelerating regulations to get more health care personnel trained so they can work in other areas.

For all schools in communities with the highest rates of positive cases, the state will be taking proactive steps to implement protocols that limit mass contact. Today the Governor announced SUNY Albany will cancel in person classes for the rest of the semester effective tomorrow after a positive case was confirmed today.

AMERICAN OVERSIGHT

Additionally, any business that cannot accommodate rigorous cleaning standards should contact Empire State Development at (212) 803-3100 for a close order.

Talking Points
LeadingAge Florida 2 p.m. Call

- COVID-19 is thought to primarily spread mainly between people who are in close contact with one another through respiratory droplets, whenever an infected person coughs or sneezes.

- Symptoms of COVID-19 are like that of a respiratory infection:
  - Fever
  - Cough
  - Shortness of breath

- There is currently no vaccine to protect against COVID-19. The best way to prevent infection is to take everyday preventive actions, like avoiding close contact with people who are sick and washing your hands often.

- You can protect from yourself respiratory illness with everyday preventive actions:
  - Avoid close contact with people who are sick.
  - Avoid touching your eyes, nose, and mouth with unwashed hands.
  - Wash your hands often with soap and water for at least 20 seconds. Use an alcohol-based hand sanitizer that contains at least 60% alcohol if soap and water are not available.
  - Stay home when you are sick.
  - Cover your cough or sneeze with a tissue, then throw the tissue away.
  - Clean and disinfect frequently touched objects and surfaces.

- Providers and facilities should be reviewing CDC infection control procedures and how to effectively triage and isolate potentially infectious individuals to prevent unnecessary exposure among other patients, healthcare personnel and visitors at the facility.

AMERICAN OVERSIGHT

- Additionally, you should ensure your workforce is trained and capable of implementing infection control procedures.

- Review your facility protocols including visitor screening to ensure precautions are in place to limit introduction of the virus.

- The CDC has provided guidance to facilities to screen patients and visitors for symptoms of acute respiratory illness (e.g., fever, cough, difficulty breathing) before entering your healthcare facility.

- CDC guidance for long-term care facilities can be found on their website: www.cdc.gov/covid19.

- The most important message from the CDC for long-term care facilities is that of prevention:
    - Prevent the introduction of respiratory germs INTO your facility;
    - Prevent the spread of respiratory germs WITHIN your facility;
    - And prevent the spread of respiratory germs BETWEEN facilities.

- I am continuing to advise nursing home facilities and other long-term care providers of best practices to protect residents and staff.

Prevent the introduction of respiratory germs INTO your facility

- Post signs at the entrance instructing visitors not to visit if they have symptoms of respiratory infection.
- Let me be very clear: **If you are sick, do not visit a nursing home.**
- Ensure sick leave policies allow employees to stay home if they have symptoms of respiratory infection.
- Assess residents' symptoms of respiratory infection upon admission to the facility and implement appropriate infection prevention practices for incoming symptomatic residents.

AMERICAN OVERSIGHT

Prevent the spread of respiratory germs WITHIN your facility

- Keep residents and employees informed.
- Monitor residents and employees for fever or respiratory symptoms.
- Support hand and respiratory hygiene, as well as cough etiquette by residents, visitors, and employees.
- Identify dedicated employees to care for COVID-19 patients and provide infection control training.
- Provide the right supplies to ensure easy and correct use of Personal Protective Equipment. There is guidance on CDC's website for this as well.

Prevent the spread of respiratory germs BETWEEN facilities

- Notify facilities prior to transferring a resident with an acute respiratory illness, including suspected or confirmed COVID-19, to a higher level of care.
- Report any possible COVID-19 illness in residents and employees to the local health department.

Subject: March 13, 2020: Memo Release: (REVISED) Guidance for Infection Control and Prevention of Coronavirus Disease 2019 (COVID-19) in Nursing Homes

CMS memo issued March 13, 2020, QSO-20-14-NH
Revised guidance for nursing home visitation/ access

Short bullets:

- Only end of life (EOL)/compassionate care visitors may enter the facility if they meet screening and wear a mask
- Health care workers who enter (hospice, EMS, etc) must meet CDC guidelines
- Comment on surveyors (see quote below) – Must allow surveyors in (meeting screening requirements)- Wear PPE per CDC guidelines when entering a facility with COVID cases
- Facilities should cancel communal dining and group activities, take staff temps, proactively communicate visitor restrictions, and restrict ombudsman (except EOL) but enable communication.

Long bullets:

Surveyors:
"CMS and state survey agencies are constantly evaluating their surveyors to ensure they don't pose a transmission risk when entering a facility. For example, surveyors may have been in a facility with COVID-19 cases in the previous 14 days, but because they were wearing PPE effectively per CDC guidelines, they pose a low risk to of transmission in the next facility, and must be allowed to enter. However, there are circumstances under which surveyors should still not enter, such as if they have a fever."

Visitors:

- Facilities SHOULD restrict all visitors and non-essential health care personnel, except for certain compassionate care situations, eg: end of life (EOL).
- For these compassionate care visits (permitted visitors):
    - Visitors will be limited to a specific room only
    - Facilities should require visitors to perform hand hygiene frequently
    - Must wear a face mask

AMERICAN OVERSIGHT

- Decisions about visits for EOL should be made case-by-case and include careful screening of visitors for fever and respiratory symptoms.
- Permitted visitors must wear a face mask and limit
- Facilities are expected to notify potential visitors with signs, calls, letters, etc.
- If a state implements stricter requirements, (such as through a Governor's order) a facility will not be considered out of compliance with federal visitation requirements.

Health care workers:

- Follow CDC guidelines for restricting access
- Including hospice, EMS, dialysis techs that provide care to residents
- Health care workers should be permitted to enter the facility as long as they meet CDC guidelines
- Facilities should contact their local county health department for questions and review CDC guidelines.

Additional guidance:

- Adds practices facilities should implement such as cancelling communal dining and group activities
- Actively screen residents and staff for fever and respiratory symptom
- Remind residents of social distancing and hand hygiene
- Take staff temperature and document absence of SOB, new of change in cough/sore throat. If they are ill, have them put on a face mask and self-isolate at home.
- Identify staff that work at multiple facilities (e.g., agency staff, regional or corporate staff, etc.) and actively screen and restrict them appropriately
- Residents still have the right to access the Ombudsman program - Their access should be restricted per the guidance above (except in compassionate care situations), however, facilities may review this on a case by case basis. If in-person access is not available due to infection control concerns, facilities need to facilitate resident communication (by phone or other format).
- Advise visitors, and any individuals who entered the facility (e.g., hospice staff), to monitor for signs and symptoms of respiratory infection for at least 14 days after exiting the facility. If symptoms occur, advise them to self-isolate at home, contact their healthcare provider, and immediately notify the facility of the date they were in the facility, the individuals they were in contact with, and the locations within the facility they visited. Facilities should immediately screen the individuals of reported contact, and take all necessary actions based on findings.

Residential and Long Term Care Facilities to Implement Universal Use of Facial Masks

EFFECTIVE IMMEDIATELY IN ALL RESIDENTIAL / LONG TERM CARE FACILITIES:

AMERICAN OVERSIGHT

- **ALL STAFF AND ANYONE ENTERING THE FACILITY MUST WEAR A FACIAL MASK AT ALL TIMES**
- **GLOVES WHEN PROVIDING DIRECT CARE TO A PATIENT OR RESIDENT**

Effective immediately staff of residential and long term care facilities are to implement universal use of facial masks while in the facility. All staff, essential healthcare visitors and anyone entering the facility are to don a mask upon the start of their shift or visit and only change it once it becomes moist. It is important to keep hands away from the mask and only touch the straps of the mask. **Gloves are to be worn when providing care to the resident.** Continue to perform hand hygiene prior to donning gloves, after removing gloves, and anytime there is contact with the resident environment.

Staff in a room with a patient with respiratory symptoms of unknown cause or a patient with known or suspected COVID-19 should adhere to Standard, Contact, and Droplet Precautions with eye protection. This includes wearing gown, gloves, N95 mask (as fitted and available – if not available, at least a facial mask), and eye protection such as face shields or goggles.

In addition to securing more gowns, gloves, and masks, facilities will need to immediately order the appropriate eye protection (I.e. face shields) since many do not have this on hand. In the event you are unable to acquire the necessary PPE, please notify your local emergency management agency.

GUIDANCE ON USE AND CONSERVATION OF Personal Protective Equipment (PPE)

Facilities will need to educate their staff on the proper donning (putting on), doffing (taking off), and disposal of any PPE.

Information about the recommended duration of Transmission-Based Precautions is available in the Interim Guidance for Discontinuation of Transmission-Based Precautions and Disposition of Hospitalized Patients with COVID-19

Gloves – Frequently Asked Questions

- **What type of glove is recommended to care for suspected or confirmed COVID-19 patients in healthcare settings?**
    - Nonsterile disposable patient examination gloves, which are used for routine patient care in healthcare settings, are

AMERICAN OVERSIGHT

appropriate for the care of patients with suspected or confirmed COVID-19.

- **Is double gloving necessary when caring for suspected or confirmed CoVID-19 patients in healthcare settings?**
  - CDC Guidance does not recommend double gloves when providing care to suspected or confirmed 2019-COVID patients.

- **Are extended length gloves necessary when caring for suspected or confirmed COVID-19 patients in healthcare settings?**
  - According to CDC Guidance, extended length gloves are not necessary when providing care to suspected or confirmed COVID-19 patients. Extended length gloves can be used, but CDC is not specifically recommending them at this time.

- **How do I put on (don) and take off (doff) my mask and gloves?**
  - Check to see if your facility has guidance on how to don and doff PPE. The procedure to don and doff should be tailored to the specific type of PPE that you have available at your facility.
  - If your facility does not have specific guidance, the CDC has recommended sequences for donning and doffing PPE.
  - It is important for HCP to perform hand hygiene after removing PPE. Hand hygiene should be performed by using an alcohol-based hand sanitizer that contains 60-95% alcohol or washing hands with soap and water for at least 20 seconds. If hands are visibly soiled, soap and water should be used before returning to alcohol-based hand sanitizer.

Cc: Manderfield, Patrick <Patrick.Manderfield@ahca.myflorida.com>
Subject: toolkit eblast for your review

The Agency for Health Care Administration would like to thank the Florida Health Care Association for working to develop a facility visitor screening toolkit that encompasses the most current Centers for Medicare and Medicaid Services (CMS) and Centers for Disease Control (CDC) guidelines. Ensuring all facilities are properly screening—and if necessary, restricting visitors—is of the upmost importance at this time. Although this guidance applies to nursing homes, many sections are appropriate for other facility types and should be followed where applicable.

The Agency is making this available as a resource to your facility. Please also review the recent memo from CMS outlining additional guidance to nursing homes to help them improve their infection control and prevention practices to prevent the transmission of COVID-19, including revised guidance for visitation: https://www.cms.gov/medicareprovider-enrollment-and-certificationsurveycertificationgeninfopolicy-and/qso-20-14-nh.pdf.

This visitor screening toolkit contains:

- COVID-19 (Respiratory) Checklist
- Sample Letter to Residents, Families and Visitors on Screening Protocol
- Sample Communication to Vendors or Business Partners
- COVID-19 Screener Competency Checklist
- Visitor Screening Tool
- Screener Sign-In Form
- Sample Letter to Employees

AMERICAN OVERSIGHT

- Employee Screening Tool
- Signage from the CDC, including handwashing signage
- Sample signage for visitor screening protocols

The toolkit can be found here: https://www.fhca.org/images/uploads/pdf/FHCACOVIDVisitorScreeningToolkit.pdf

The Agency recognizes that facilities need to be overly cautious at this time to protect their patients and residents. Comprehensive screenings may include temperature taking and restricting visitors if necessary.

1. Nearly 200 people monitored for coronavirus in Florida – WPEC CBS 12 West Palm Beach

---

Nearly 200 people monitored for coronavirus in Florida

by Gary Detman Monday, March 2nd 2020

Nearly 200 hundred people in Florida are under public health monitoring for possible coronavirus.

Gov. Ron DeSantis declared a public health emergency in Florida following two presumptive positive tests for coronavirus. Official confirmation must come from the Centers for Disease Control and Prevention. The affected patients are from Manatee and Hillsborough counties.

According to the Florida Department of Health, 184 people are being monitored for the virus. That number includes those at risk of having been exposed to novel coronavirus who are monitoring their health under the supervision of public health experts, as well as the close contacts of laboratory confirmed cases, and people who have returned from China in the last 14 days.

Test results on eight others are pending, and fifteen people tested negative. The state says the overall risk to the public remains low.

The governor is holding two news conferences in Florida on Monday to give new information on the state's response to the virus.

AMERICAN OVERSIGHT

Coronavirus has sickened more than 89,000 people worldwide and claimed more than 3,000 lives.

Florida sees 2 coronavirus cases, DeSantis calls for public health emergency

By David Aaro | Fox News

Florida Gov. Ron DeSantis issued an order on Sunday directing a public health emergency in the state after it recorded its first two positive cases of the new coronavirus (COVID-19).

The infected individuals are residents of Hillsborough and Manatee County, both near the Tampa Bay area. Officials said the Hillsborough County resident has a history of traveling to Italy, while the patient from Manatee County has no travel history to any of the CDC-restricted countries.

"It is necessary and appropriate to take action to ensure that COVID-19 remains controlled and that residents and visitors in Florida remain safe and secure," DeSantis said in a statement.

CORONAVIRUS KILLS 2ND MAN IN WASHINGTON STATE, OFFICIALS SAY

5,283 people are talking about this

Both patients are in isolation and actively being monitored by the Florida Department of Health. They will remain there for at least 14 days or until they test negative for COVID-19. He designated the department as the lead state agency to coordinate an emergency response.

"Tomorrow I will be in Tampa and Miami with Surgeon General Rivkees and other officials to discuss our continued statewide response on #COVID19," DeSantis tweeted at 9:43 p.m. He directed Rivkees to declare the emergency.
DeSantis referenced CDC recommended measures including voluntary home isolation when sick, covering coughs and sneezes, disposing of tissue waste properly and washing hands often with soap and water for at least 20 seconds.

Earlier on Sunday, Florida Sen. Marco Rubio said it's "not a question of if but when confirmed cases of coronavirus are found in Florida."

"We must provide accurate information on best ways to prevent it from spreading and prioritize resources to help health care workers, the elderly & those with preexisting health conditions," he added.

Rubio issued a statement after the positive cases were found.

NEW YORK SEES 1ST CORONAVIRUS CASE, CUOMO ANNOUNCES

AMERICAN OVERSIGHT

"The health and safety of every Floridian, especially the elderly and those with compromised immune systems, remain my highest priority," he said. "I will continue to work with the Trump Administration and Governor DeSantis to ensure our state has the resources and information it needs. I am working with my colleagues in Congress on a funding package to ensure Florida has every available federal resource to respond to the coronavirus, and I look forward to its swift passage in the coming weeks."

Rhode Island declared its second positive test on Sunday in a person who recently returned from Europe, while a third person from the trip is undergoing tests, health officials said. They are all from the same trip that saw the state's first positive case hours earlier.

CLICK HERE FOR FULL CORONAVIRUS COVERAGE

The man in his 40s tested positive after traveling to Italy in mid-February. Dozens are in self-quarantine and the high school that organized the trip is closed for sanitization, according to the Rhode Island Department of Health.

Italy has seen 1,694 cases of the coronavirus as of Sunday, a jump of 50 percent in just 24 hours. The country has seen 34 deaths from the virus so far, with five more recorded since yesterday.

The Associated Press contributed to this report.

3. Florida's first coronavirus cases found in Hillsborough and Manatee counties – Tampa Bay Times

---

Florida's first coronavirus cases found in Hillsborough and Manatee counties

By **Lawrence Mower**
Published Yesterday
Updated Yesterday

AMERICAN OVERSIGHT

The Hillsborough County case is an adult with a travel history to Italy. The Manatee patient is an adult Manatee County resident without a history of travel to restricted countries such as China or Iran.

TALLAHASSEE — Two people from Hillsborough and Manatee counties are the first to test positive for coronavirus in Florida, Gov. Ron DeSantis announced Sunday night.

The Hillsborough County adult had a travel history to Italy, which on Saturday became the third country to have more than 1,000 confirmed coronavirus cases, prompting the U.S. State Department to warn travelers from traveling there.

The other patient is an adult Manatee County resident without a history of travel to restricted countries such as China or Iran, according to the Florida Department of Health.

The patient sought out care and is helping state officials identify close contacts and health care workers who might have been exposed and showing symptoms.

Both people tested "presumptively positive" for the virus, indicating they had not been tested again by the U.S. Centers for Disease Control and Prevention.

Both patients will remain isolated until cleared by public health officials, the department said. Officials did not say where the patients were being treated.

The first confirmed cases of the flu-like virus prompted DeSantis to direct the state surgeon general, Scott Rivkees, to declare a public health emergency. Despite the confirmations, "the overall immediate threat to the public remains low," the Florida Department of Health said in a statement.

"The dedicated professionals at our county health departments, as well as those working at local medical providers, are well equipped to address these and future cases," DeSantis said in a statement.

READ DESANTIS' EXECUTIVE ORDER HERE

The declaration directs Rivkees to follow the guidelines established by the Centers for Disease Control in establishing protocols to control the spread of COVID-19 and educate the public on prevention, the memo states.

The governor's office announced late Sunday that DeSantis and other state officials would be holding a news conference Monday morning in Tampa and Monday afternoon in Miami.

"I have been working with federal partners and our Department of Health to ensure that communities are ready to handle the challenges presented by COVID-19," said DeSantis, adding that county health departments are "well equipped to address these and future cases."

Rivkees added the state's epidemiological teams are "aggressively pursuing every potential lead during these critical early moments of this outbreak in Florida."

The news comes two days after federal officials expanded testing criteria and Florida became capable of processing tests within the state.

On Saturday, all three Florida Department of Health labs — in Miami, Tampa and Jacksonville — became capable of testing for novel coronavirus, cutting the wait times for results to within 24 to 48 hours. For weeks, the tests were being sent to a federal lab in Atlanta, which was producing results within three to five days.

AMERICAN OVERSIGHT

RELATED: Florida state labs can test for coronavirus, cutting wait times for results

On Friday, the U.S. Centers for Disease Control and Prevention also expanded its criteria for who should be tested. Physicians should now determine whether any patient with severe pneumonia symptoms should be tested, regardless of their travel history, the agency advised.

Sunday saw a series of new confirmations of the virus. Rhode Island and New York confirmed their first cases, and additional patients were identified in Washington and California, where two health care workers tested positive for the virus.

A genetic analysis of samples in Washington indicate the virus was circulated undetected there for six weeks, causing some researchers to believe there is a substantial outbreak in that state.

The Department of Health updated its COVID-19 website on Sunday, listing the two presumptive positives to eight cases pending testing results and 184 people under monitoring. Another 15 cases came back negative.

Symptoms of the respiratory illness include fever, cough and shortness of breath and can appear in as few as two days or as many as 14, according to the department.

Most people recover from the COVID-19 without needing special treatment, but older people and those with underlying medical problems such as high blood pressure, heart problems and diabetes are more likely to develop serious illness.

The virus spreads person-to-person through droplets from the nose or mouth, transmitted through coughs and sneezes, according to health officials. There is no vaccine for the virus.

Health officials recommend simple steps for prevention, including:

- avoiding contact with people who are sick
- staying home when sick
- avoid touching your eyes, nose and mouth with unwashed hands and
- washing your hands often with soap and water.

Subject: RE: Greystone Healthcare_COVID-19 Patient Care_IMPORTANT_HCA Healthcare Directive

As we have all been saying, NH cannot follow CDC guidance for transmission based precautions (airborne) for COVID-19 residents. They are not equipped. CMS has modified their guidance for NHs several times since March 4th so we could expect the guidance to continue to change/modify as this evolves, but at the present time we know NHs are not equipped.

Stefan, if I need to connect you with my clinical lead for NH's, Michelle Dillehay, let me know.

Good morning Secretary,

I am sharing the below (see first email) communication sent to our organization by HCA Healthcare. I am concerned one (highlighted below) of the directives outlined by HCA is contrary to what the LTC industry has been directed to do. As you know, the battle cry for us, keep this out of our centers as we are not equipped to manage active cases, and this correspondence is in direct contrary. I was hoping to get further clarification from your office on how we should proceed. I thank you in advance for your leadership during this challenging time in our industry. Please feel free to reach out to Stephanie or I.

Respectfully,
Charlene Peters

Just received and sending on to you all as there are parts about admitting pts into the SNF, including those who have tested positive...and circumstances that should and should not admit as well as their requirements of form completion.

Because we work with so many HCA hospitals, I don't want the buildings to allow this to guide them vs what we are teaching and instituting.

Gregg

AMERICAN OVERSIGHT

Subject: COVID-19 Patient Care Survey-URGENT
Importance: High

Dear SNF Provider,
HCA Healthcare is working diligently to ensure our hospitals are prepared for COVID-19 and we have strong infection prevention protocols in place across all facilities. These protocols include limited entry to accommodate patient and visitor screening, visitor limitations, ensuring availability of supplies and equipment, and staffing contingency plans. We are also in communication with the Centers for Disease Control and Prevention (CDC) and the Centers for Medicare & Medicaid Services (CMS) to ensure we have the latest guidance for infection control and prevention of COVID-19.
As a valued Plus Care Network provider, we are committed to working with you to ensure we are all able to meet the needs of our communities during this challenging time. Below, you will find three requests of your facility. In return, please let me know how I can be of assistance to you.

1. **Operate in Accordance with CDC and CMS Guidelines**
   - SNFs should admit any individual they would normally admit to their facility, including individuals from hospitals where a case of COVID-19 was/is present.
   - SNFs should accept a patient diagnosed with COVID-19 and still under Transmission-based Precautions for COVID-19 as long as it can follow CDC guidance for transmission-based precautions.
   - If a nursing home cannot meet the transmission precautions, it must wait until these precautions are discontinued. The CDC has released Interim Guidance for COVID-19.

2. **Complete our COVID-19 Capabilities Survey**
   Completing this three minute survey within 48 hours helps our hospitals identify your ability to accept and care for patients with respiratory challenges including COVID-19.
   https://www.surveymonkey.com/r/HCA_COVID-19_SNF

3. **Coordinate with Your Local Hospitals**
   a. Communicate what capabilities your facility offers
   b. If your facility, at any time, begins to reach capacity
   c. If your facility is at risk of PPE and COVID-19 testing supply shortages

Thank you for your thoughtful participation as a Plus Care Network provider as well as your commitment to the health and safety of the communities we serve. As always, we are grateful for your commitment to improve the care of our patients. Above all else, we are committed to the care and improvement of human life.
With great appreciation,

Elizabeth Granchi, RN, BSN

Subject: DURING NOVEL CORONAVIRUS BRIEFING, GOVERNOR CUOMO ANNOUNCES NEW MASS GATHERINGS REGULATIONS

<ATT00001.gif.secure>

liate Release: 3/12/2020 **GOVERNOR ANDREW M.**

DURING NOVEL CORONAVIRUS BRIEFING, GOVERNOR CUOMO ANNOUNCES NEW MASS GATHERINGS REGULATIONS

Events with 500 or More Individuals in Attendance to Be Cancelled or Postponed

Any Gathering Under 500 Individuals in Attendance Will Be Required to Cut Capacity by 50 Percent

New Limits on Visitations to Nursing Homes - Only Medically Necessary Visits Will Be Allowed To Protect Most Vulnerable

First Public Drive-Through Testing Facility on the East Coast, Located in New Rochelle, Will Start Testing Tomorrow

Confirms 109 Additional Coronavirus Cases in New York State - Bringing Statewide Total to 325; New Cases in 14 Counties

During a novel coronavirus briefing, Governor Andrew M. Cuomo today announced the state will institute limits on mass gatherings, directing events with 500 or more individuals in attendance to be cancelled or postponed. Public health experts agree mass gatherings with people making sustained close contact are a place where the novel coronavirus can easily infect many people quickly and continue its spread. As such, events, gatherings, or places of business with less than 500 individuals in attendance will be required to cut capacity by 50 percent, with exceptions being made for spaces where individuals do not make sustained close contact, such as schools, hospitals, public buildings, mass transit, grocery stores and retail stores. These new regulations will go into effect Friday, March 13th at 5pm, with the exception of Broadway Theaters where the limits will go into effect this evening at 5pm.

AMERICAN OVERSIGHT

In an effort to protect some of the most vulnerable New Yorkers, Governor Cuomo also announced only medically necessary visits will be allowed at nursing homes. This policy will be effective Friday at 5pm. The state is also asking nursing homes to set up skyping and other online communication capacity so families can tele-visit their loved ones. Additionally, the state will require health screenings for all nursing home workers each day when they enter a facility and require them to wear surgical masks to guard against any potential asymptomatic spread.

In order to increase testing capacity, the State is contracting with BioReference Laboratories to run an additional 5,000 tests per day on top of what the state is already doing. These additional 5,000 tests per day will come online next week. This additional testing capacity is on top of that of the 28 private labs the Governor announced are partnering with the state in the coming days and weeks. Additionally, the Governor announced the first public drive-through testing facility on the east coast will start testing people tomorrow in New Rochelle. Testing will be done by appointment only. New Rochelle residents who have been quarantined will be tested first.

Finally, the Governor confirmed 109 additional cases of novel coronavirus, bringing the statewide total to 325 confirmed cases in New York State. Of the 325 total individuals who tested positive for the virus, the geographic breakdown is as follows:

Albany County: 1 (1 new)
Broome County: 1 (1 new)
Delaware County: 1 (1 new)
Dutchess County: 1 (1 new)
Herkimer County: 1 (1 new)
Monroe County: 1 (1 new)
Nassau County: 41 (13 new)
New York City: 95 (43 new)
Orange County: 1 (1 new)
Rockland County: 7 (1 new)
Saratoga County: 3 (1 new)
Suffolk County: 20 (14 new)
Ulster County: 4 (3 new)
Westchester County: 148 (27 new)

"The spread of this coronavirus is not going to stop on its own, and we know that mass gatherings have been hotspots for the virus to infect large numbers of people quickly," **Governor Cuomo said.** "To help contain it, we are instituting limits on large events as well as new measures to protect our most vulnerable populations — including people in nursing homes — and preparing our healthcare system to be able to deal with any future capacity issues. While the context is key and the anxiety is outpacing the facts of this situation, we will continue taking aggressive action to protect public health and prepare for any future spread of this virus."

"Our number one priority is protecting the public health and every action the Governor and the State of New York have taken thus far have been in furtherance of that goal," **State Health Department Commissioner Dr. Howard Zucker said.** "Public health experts have been clear that limiting large public gatherings where there is potential for close contact is a critical way to slow the spread of this virus. This regulation will help keep people healthy and safe."

The Governor also announced that the State is taking measures to create a reserve workforce of health care professionals in the event of a staffing shortage and identify state facilities that can be

AMERICAN OVERSIGHT

used as temporary hospitals. The State is asking former doctors, nurses and other health care professionals to reconnect with their former employers and offer to work on an on-call basis in the cases of a staffing shortage. The State is also identifying National Guard medics for reserved staffing and contacting medical schools to identify possible reserve health care professionals. Additionally, the Department of Health is accelerating regulations to get more health care personnel trained so they can work in other areas.

For all schools in communities with the highest rates of positive cases, the state will be taking proactive steps to implement protocols that limit mass contact. Today the Governor announced SUNY Albany will cancel in person classes for the rest of the semester effective tomorrow after a positive case was confirmed today.

Additionally, any business that cannot accommodate rigorous cleaning standards should contact Empire State Development at (212) 803-3100 for a close order.

VIII. [INSERT PARTY'S REFERRED TO AS NAME] HEREBY AGREES:

A. [IF APPLICABLE, INCLUDE]Monitoring

1. To provide reports as specified in **Section VII., Item B.**, Services Provided by [INSERT Party's Referred to as Name]. These reports will be used for monitoring progress or performance of the contractual services.

2. To permit persons duly authorized by the Agency to inspect any records, papers, documents, facilities, goods and services of [INSERT Party's Referred to as Name] which are relevant to this Agreement.

3. To ensure that each of its employees or subcontractors who performs activities related to the services associated with this Agreement will report to the Agency any health care facility that is the subject of these services that may have violated the law. To report concerns pertaining to a health care facility, the [INSERT Party's Referred to as Name] employee or subcontractor may contact the Agency Complaint Hotline by calling 1-888-419-3456 or by completing the online complaint form found at https://apps.ahca.myflorida.com/hcfc.

4. To ensure that each of its employees or subcontractors who performs activities related to the services associated with this Agreement, will report to the Agency areas of concern relative to the operation of any entity covered by this Agreement. To report concerns, the [INSERT Party's Referred to as Name] employee or subcontractor may contact the Agency Complaint Hotline by calling 1-877-254-1055 or by completing the online complaint form found at https://apps.ahca.myflorida.com/smmc_cirts/.

5. To ensure that reports which represent individuals receiving services are at risk for, or have suffered serious harm, impairment, or death are reported to the Agency immediately and no later than twenty four (24) clock hours after the observation is made. Reports that reflect noncompliance that does not rise to the level of concern noted above shall be reported to the Agency within ten (10) calendar days of the observation.

B. Health Insurance Portability and Accountability Act

1. To comply with the Department of Health and Human Services Privacy Regulations in the CFR, Title 45, Sections 160 and 164, regarding disclosure of protected health information as specified in **Attachment II**, Business Associate Agreement. If required by the HIPAA Compliance Officer

AMERICAN OVERSIGHT

2. To ensure it meets all Federal regulations regarding required standard electronic transactions and standards for privacy and individually identifiable health information as identified in the Health Insurance Portability and Accountability Act (HIPAA) of 1996 and the Health Information Technology for Economic and Clinical Health Act (HITECH) of 2009 and associated regulations.

3. To conduct all activities in compliance with 45 CFR 164 Subpart C to ensure data security, including, but not limited to encryption of all information that is confidential under Florida or Federal law, while in transmission and while resident on portable electronic media storage devices. Encryption is required and shall be consistent with Federal Information Processing Standards (FIPS), and/or the National Institute of Standards and Technology (NIST) publications regarding cryptographic standards.

C. Confidentiality of Information

1. To not use or disclose any confidential information, including social security numbers that may be supplied under this Agreement pursuant to law, and also including the identity or identifying information concerning a Medicaid recipient or services under this Agreement for any purpose not in conformity with State and Federal laws, except upon written consent of the recipient, or his/her guardian.

2. That all personally identifiable information, including Medicaid information, obtained by Asztalos shall be treated as privileged and confidential information and shall be used only as authorized for purposes directly related to the administration of this Agreement. Asztalos must have a process that specifies that patient-specific information remains confidential, is used solely for the purposes of data analysis or Asztalos responsibilities under this Agreement, and is exchanged only for the purpose of conducting a review or other duties outlined in this Agreement.

3. All patient-specific information received by Asztalos can be shared only with those agencies that have legal authority to receive such information and cannot be otherwise transmitted for any purpose other than those for which Asztalos is retained by the Agency. Asztalos must have in place written confidentiality policies and procedures to ensure confidentiality and to comply with all Federal and State laws (including the HIPAA and HITECH Acts) governing confidentiality, including electronic treatment records, facsimile mail, and electronic mail).

4. All subcontracts must explicitly state expectations about the confidentiality of information, and the subcontractor is held to the same confidentiality requirements as Asztalos. If provider-specific data are released to the public, Asztalos shall have policies and procedures for exercising due care in compiling and releasing such data that address statutory protections of quality assurance and confidentiality while assuring that open records requirements of Chapter 119, F.S., are met.

5. Asztalos and its subcontractors shall comply with the requirements of Section 501.171, F.S. and shall, in addition to the reporting requirements therein, report to the Agency any breach of personal information.

AMERICAN OVERSIGHT

6. Any releases of information to the media, the public, or other entities require prior approval from the Agency.

7. Ensure all services will be performed within the borders of the United States and its territories and protectorates.

8. State-owned Data shall be processed, accessed and stored in data centers that are located only in the forty-eight (48) contiguous U.S.

D. Public Records Requests

1. To comply with Section 119.0701, F.S., if applicable, and all other applicable parts of the Florida Public Records Act.

2. To keep and maintain public records that ordinarily and necessarily would be required in order to perform services under this Agreement.

3. To provide the public with access to public records on the same terms and conditions that the Agency would provide the records and at a cost that does not exceed the cost provided in Section 119.07, F.S., or as otherwise provided by law.

4. That upon request from the appropriate Agency custodian of public records, provide the Agency with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost in Section 119.07, F.S., or as otherwise provided by law.

5. To ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of this Agreement term and following completion of this Agreement if the Party does not transfer the records to the Agency.

6. To not collect an individual's social security number unless Asztalos has stated in writing the purpose for its collection. Asztalos collecting an individual's social security number shall provide a copy of the written statement to the Agency and otherwise comply with applicable portions of Section 119.071(5), F.S.

7. To meet all requirements for retaining public records and transfer, at no cost, to the Agency all public records in possession of Asztalos upon termination of this Agreement and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to the Agency in a format that is compatible with the information technology systems of the Agency.

8. If Asztalos does not comply with a public records request, the Agency shall enforce Agreement provisions in accordance with this Agreement.

AMERICAN OVERSIGHT

9. **IF Asztalos HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE PARTY'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS AGREEMENT, CONTACT THE AGENCY CUSTODIAN OF PUBLIC RECORDS FOR THIS AGREEMENT. THE AGENCY CUSTODIAN OF PUBLIC RECORDS FOR THIS AGREEMENT IS THE AGREEMENT MANAGER.**

IX. Invoices shall be submitted on Asztalos letterhead to the Agency's designated Agreement Manager within fifteen (15) calendar days of completion and Agency approval of deliverable(s). Invoice(s) shall include, at a minimum:

1. Invoice date;
2. Invoice number;
3. Agency's Agreement number;
4. Detailed description of the services rendered;
5. Date(s) on which services were rendered;
6. Payment remittance address; and
7. Other supporting documentation as requested by the Agency

X. **[IF APPLICABLE INCLUDE any other required language that is specific to this Agreement.]**

IN WITNESS THEREOF, the Parties hereto have caused this [INSERT number of pages to be spelled out] ([INSERT NUMERIC NUMBER]) page Agreement, which includes any referenced attachments, to be executed by their undersigned officials as duly authorized. This Agreement is not valid until signed and dated by all Parties.

Subject: Emergency Rule and Surge Hospital Beds

Adrian,

Attached are two documents. Our draft emergency rule restricting access to AHCA regulated facilities and options to expand hospital beds in the event of a surge.

I was initially thinking just the Governor's authority under Ch. 252 for waiving statutes, but after speaking with Nick, Director Moskowitz could also issue these same requirements in the DEM order. That way he could also include APD licenses facilities, which we cannot do under our authority.

Thanks,

Stefan Grow - GENERAL COUNSEL-AHCA

AMERICAN OVERSIGHT

Notice of Emergency Rule

AGENCY FOR HEALTH CARE ADMINISTRATION
Health Facility and Agency Licensing
RULE NO.: RULE TITLE:
59AER20-1 Facility Screening Requirements for Non-Residents
SPECIFIC REASONS FOR FINDING AN IMMEDIATE DANGER TO THE PUBLIC HEALTH, SAFETY OR WELFARE: The Novel Coronavirus Disease 2019 (COVID-19) is a severe respiratory illness that can spread among humans through respiratory transmission. According to the Centers for Disease Control and Prevention (CDC), people at risk for serious illness from COVID-19 include older adults and people with serious chronic medical conditions.[1] In late 2019, a new and significant outbreak of COVID-19 emerged in China and the World Health Organization declared COVID-19 a Public Health Emergency of International Concern. The CDC also confirmed instances of community spread of COVID-19 in the United States and issued written guidance to help control the spread of COVID-19 in long-term care facilities.[2]

On March 7, 2020, the State Surgeon General and State Health Officer declared a Public Health Emergency in the State of Florida as a result of COVID-19. As of March 13, 2020, eighteen counties in Florida have positive cases for COVID-19. There have been two confirmed deaths in Florida as a result of COVID-19. Both individuals were elderly. On March 9, 2020, Florida Governor Ron DeSantis declared a state of emergency in Florida.

At Life Care Center nursing home of Kirkland, Washington, outside of Seattle, 72 elderly residents died as a result of a COVID-19 outbreak in the facility. According to the United States Census Bureau, Florida has the largest percentage of residents age 65 and older in the nation. Thousands of frail elders and residents live in over 4,200 assisted living facilities, nursing homes, adult family care homes, intermediate care facilities, transitional living facilities, and homes for special services in Florida. Ensuring these facilities screen all visitors and staff for symptoms of COVID-19 is essential to protecting the health, safety and welfare of vulnerable residents.

This emergency rule establishes a process by which assisted living facilities, nursing homes, adult family care homes, intermediate care facilities, transitional living facilities, and homes for special services screen all visitors and staff for COVID-19 symptoms before allowing entry to the facility. Any visitor or staff member exhibiting symptoms of COVID-19 must be denied entry to the facility. Prompt implementation of this rule is necessary to ensure the health, safety and welfare of residents of Florida's assisted living facilities, nursing homes, adult family care homes, intermediate care facilities, transitional living facilities, and homes for special services.

REASONS FOR CONCLUDING THAT THE PROCEDURE USED IS FAIR UNDER THE CIRCUMSTANCES: The procedure used to adopt this emergency rule is fair as the State of Florida is under a declaration of emergency due to the outbreak of COVID-19. This emergency rule is necessary and fair to ensure the health, safety, and welfare of the facility residents, and provides at least the procedural protection given by other statutes, the State Constitution, or the United States Constitution; and takes only that action necessary to protect the public interest under the emergency procedure.

SUMMARY OF THE RULE: This emergency rule prohibits visitors to assisted living facilities, nursing homes, adult family care homes, intermediate care facilities, transitional living facilities, and homes for special services except under special circumstances and when such staff and visitors meet specific screening criteria in order to avoid the spreading of COIVD-19 to health care facilities.

THE PERSON TO BE CONTACTED REGARDING THE EMERGENCY RULE IS:

AMERICAN OVERSIGHT

59AER20-1 Facility Screening Requirements for Non-Residents.

(1) Applicability. The requirements of this emergency rule apply to the following facilities:

(a) Nursing Homes, as provided under Chapter 400, Part II, F.S.;

(b) Homes for Special Services as provided under Chapter 400, Part V, F.S.;

(c) Transitional Living Facilities, as provided under Chapter 400, Part XI, F.S.;

(d) Intermediate Care Facilities for the Developmentally Disabled, as provided under Chapter 400, Part VIII, F.S.;

(e) Assisted Living Facilities, as provided under Chapter 429, Part I, F.S.; and

(f) Adult Family-Care Homes, as provided under Chapter 429, Part II, F.S.;

(2) Limited Facility Entry.

(a) Every facility must prohibit the entry of any individual, to the facility except in the following circumstances:

1. Family members, friends, and visiting residents in end-of-life situations; or

2. Hospice or palliative care workers caring for residents in end-of-life situations; or

3. Any third-party providing necessary health care to a resident; or

4. Facility staff; or

5. Facility resident; or

6. Consistent with CMS guidance QSO-20-14-NH issued on March 13, 2020, Ombudsman representatives may access residents only during end-of-life situations; or

7. Representatives of the federal or state government seeking entry as part of their official duties, including, but not limited to, representatives of the Department of Children and Families, the Department of Health, the Agency for Health Care Administration, the Office of the Attorney General, and the Department of Elderly Affairs; any law enforcement officer; and any emergency medical personnel.

(b) Individuals seeking entry to the facility under the above circumstances in (a) must comply with the screening requirements in (3).

(c) The facility must require any individual entering the facility to wear personal protective equipment.

(d) Residents must be discouraged from leaving the facility.

(3) Screening Requirements. Any individual, including staff, seeking entry to a facility must be actively screened by the facility. An individual who meets any of the screening criteria must be prohibited from entering the facility or facility grounds until they no longer meet the screening criteria.

(a) The screening criteria must include the following:

1. Any person infected with COVID-19 who has not had two consecutive negative test results separated by 24 hours;

2. Any person showing or presenting signs or symptoms of a respiratory infection, including cough,

AMERICAN OVERSIGHT

fever, shortness of breath or sore throat;

3. Any person who has been in contact with any person(s) infected with COVID-19 who has not yet tested negative for COVID-19 within the past 14 days;

4. Any person who traveled through any airport within the past 14 days;

5. Any person who traveled on a cruise ship within the past 14 days;

6. Any person who has been in a community with confirmed community spread of COVID-19, as identified by the Centers for Disease Control and Prevention or a state public health agency, within the past 14 days; and

7. Any person who resides in a community with confirmed community spread of COVID-19, as identified by the Centers for Disease Control and Prevention or a state public health agency.

(4) Documentation.

(a) Individuals entering a facility subject to the screening criteria above may be screened using a standardized questionnaire or other form of documentation.

(b) The facility is required to maintain documentation of all non-resident individuals entering the facility. Documentation must include:

1. Name of the individual;

2. Date and time of entry; and

3. The documentation used by the facility to screen the individual showing the individual did not meet any of the enumerated screening criteria.

RON DESANTIS
GOVERNOR

MARY C. MAYHEW
SECRETARY

Inpatient Surge Beds

Scenario #1 Utilization of space within the hospital:

During a state of emergency the facility is permitted to utilize space as it see fit to safeguard the lives of patients, staff, and visitors. This includes using spaces for patient care that may not have been designed and approved for such uses where approved facilities are not available due to surge in patients. The facility is responsible for using the existing spaces and systems to the best of their ability to provide the appropriate level care and safety for patients.

(Emergency– no waivers need) – can do this now.

Scenario #2 Use of temporary structures (tents) for outpatient services and emergency screening (triage)

The use of such spaces is permitted during a state of emergency where the need arises to expand emergency services to alleviate overcrowding due a surge of patients. The facility is responsible for maintaining safe conditions and providing an appropriate care setting for the functions performed in the temporary facility including life safety, environmental control, and infection control.

(Emergency– no waivers need) – can do this now.

Scenario #3 Reopening previously licensed hospital or hospital building

Under existing applicable rules, these facilities would need to meet the requirements of the Florida Building Code, the Uniform Fire Standards for Hospitals and Nursing Homes, and federal regulations. We would expect that such facilities could be brought back into operation and comply with previously adopted codes and standards. At a minimum, the facility should be in compliance with the 2012 Life Safety Code and all critical systems should be in good working order. The facility would be permitted to be used for acute care services.

In order to implement, the following waivers would be required.
Waiver of:
61G20-1.001, F.A.C, Florida Building Code Adopted (DBPR - STATE),
59A-3.079 Physical Plant Codes and Standards Hospitals, F.A.C. (AHCA - STATE), and
69A-53, F.A.C Uniform Fire Safety Standards for Hospitals and Nursing Homes (DFS -STATE)
If Agency review is to be waived F.S. 395.0163 and 59A-3.080 would need to be waived (AHCA – STATE)
Waiver of s. 395, F.S. licensing requirements
Waiver of 42 CFR 482.1 (FEDERAL – CMS) FHA is working on the necessary waivers for these regulations

Scenario #4 Temporary use of a building that has never been licensed for inpatient care

Under existing applicable rules, these facilities would need to meet the requirements of the Florida Building Code, the Uniform Fire Standards for Hospitals and Nursing Homes, and federal regulations. This scenario should only be considered when scenarios 1 through 3 are not sufficient to provide for the needs of the community. Selected facility must be fully sprinklered, and protected by a monitored fire alarm system. If the building does not have a permanent emergency standby generator, it must be connected to a temporary mobile generator. The facility may only be used for low acuity patient (ESI level 3, 4, and 5) that are capable of self-preservation. The facility may not be used for patients on a ventilator or other life support equipment. A nurse call system, direct line of sight to the patient, or other method summoning nurse assistance must be provided. The facility must have a food plan and appropriate hygienic facilities for preparing and handling meals. A secure method for storing and distributing medication must be provided. Hand washing sinks and/or alcohol based hand scrub dispenser must be provided as directed by the facilities infection control personnel.

In order to implement, the following waivers would be required.
(Waiver of: 61G20-1.001, F.A.C, Florida Building Code Adopted (DBPR - STATE),
59A-3.079 Physical Plant Codes and Standards Hospitals, F.A.C. (AHCA - STATE), and
69A-53, F.A.C Uniform Fire Safety Standards for Hospitals and Nursing Homes (DFS - STATE)

AMERICAN OVERSIGHT

Waiver of s. 395, F.S. licensing requirements
Waiver of 42 CFR 482.1 (FEDERAL – CMS) FHA is working on the necessary waivers for these regulations
If Agency review is to be waived F.S. 395.0163 and 59A-3.080 would need to be waived (AHCA – STATE)

Subject: Testing vs Active Monitor

Samantha explained the difference. Active monitor means asymptomatic but has been exposed/ traveled.

If a person under active monitor and become symptomatic then they become a PUI, then if tested are consider "tested".

Subject: FW: COVID-19 Update #4: Gov. DeSantis Issues Emergency Order Re: Visitation in LTC Facilities

Here is the latest emergency order regarding COVID-19 and visitations in long-term care facilities. What follows are some of my thoughts and I request yours as well.

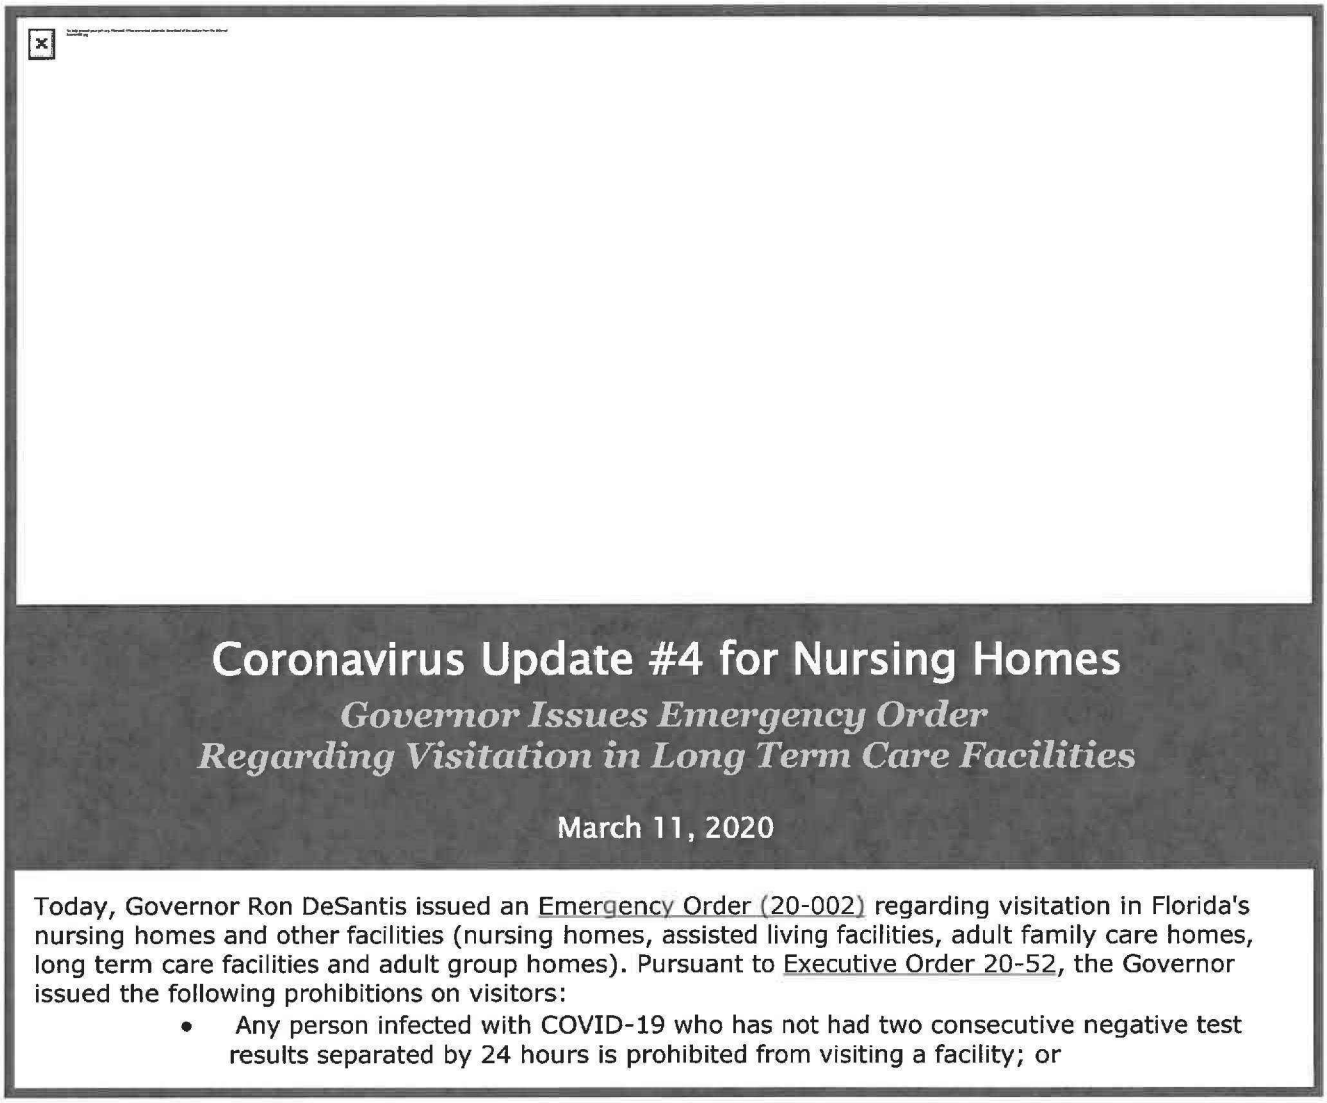
In reading this communique, be mindful of a few things:

1. The INTENT is to limit visitation in LTC facilities in order to minimize the risk to vulnerable individuals residing in these facilities as well as the needed staff who serve these residents.
2. There is an ENCOURAGEMENT for individuals not to visit LTC facilities in order to effectuate the INTENT of #1.
3. The particular words used in this carefully drafted order are INTENTIONAL and LIMITING!
4. It is clearly not the intent of the Governor to order ALL visitations to LTC facilities to cease.
5. The suspension of Florida Statutes concerning the right of visitation is LIMITED and intended to be the least drastic necessary with regards to the circumstances presented.
6. ONLY seven types of individuals are to be banned from visitations and only for a limited time.

Therefore, facilities that are banning ALL visitations are doing so WITHOUT authorization. Having said that, let's give them the benefit of the doubt and recognize their intent is to protect their residents. Notwithstanding, we cannot abandon our mandate to advocate for resident who request our help in protecting their rights. In doing so, we are not precluded from attempting to help the resident recognize the benefit that accrues to all residents of the facility if

AMERICAN OVERSIGHT

visitation is allowed to be VOLUNTARILY limited for a short period of time. If the resident (not family members of a competent resident) insist that we secure his or her visitation rights, we should do so with fervency.



I suspect that there may be further revisions to this executive order as the President said tonight in his speech to the nation that he was "advising the suspension of all visitations in nursing homes." So stand by ...

AMERICAN OVERSIGHT

- Any person showing or presenting signs or symptoms of a respiratory infection, including fever, cough, shortness of breath, or sore throat is prohibited from visiting a facility; or
- Any person who has or may have been in close contact with a person(s) infected with COVID-19 who has not tested negative for COVID-19 is prohibited from visiting a facility until 14 days after their interaction with the person(s) who is infected with COVID-19; or
- Any person who has traveled internationally is prohibited from visiting a facility until 14 days after their return to the United States; or
- Any person who has traveled on a cruise ship is prohibited from visiting a facility until 14 days after their return to the United States; or
- Any person who has been in a community with confirmed community spread of COVID-19, as identified by the Centers for Disease Control and Prevention or a state public health agency, is prohibited from visiting a facility within 14 days of their presence in the community with community spread*; or
- Any person who resides in a community with confirmed community spread of COVID-19, as, identified by the Centers for Disease Control and Prevention or a state public health agency, is prohibited from visiting a facility.

**During his press conference, the Governor stated there are no instances of community spread in Florida.*

As you work to prevent and mitigate the spread of COVID-19 in your center, communication with your residents and their families is extremely important. Messaging should be swift, empathetic, reassuring and informative. It's important to emphasize how your center is preparing, why your visitation protocols are in place and what individuals can do to assist with these efforts.

Posting signs at your facility entrance is not enough - your communications should be broad based to help families understand why you've adopted these protocols. Consider the following to educate and inform about your screening protocols:

- Host a family council meeting in your center's courtyard to educate and inform on your screening protocols
- Host a resident council meeting to inform your residents
- Involve your social workers, activity directors and other frontline staff with direct access to your residents to communicate why these protocols are in place – for the health and safety of the residents
- Offer alternative means of communication for people who would otherwise visit, such as virtual communications (phone, video-communication, etc.)
- Create/increasing email or listserv communication to update families on your protocols
- Assign a staff member as primary contact to families for inbound calls and conduct regular outbound calls to keep families up to date
- Set up a manned hotline or offer a phone line with a voice recording updated at set times (e.g., daily) with the facility's general operating status, such as when it is safe to resume visits
- Create an infographic or video message from facility leadership to post on your social media channels
- Educate your staff on key messages regarding your screening protocols

FHCA's Visitor Screening Toolkit includes sample letters with suggested language for building content for these various forms of communications with your families.

Facilities should be prepared for media inquiries in response to this Emergency Order. It's important to designate one spokesperson to handle inquiries to ensure your messaging remains consistent. Below is a short-version of a media statement to assist centers in their response. For additional talking points, click here.

"[Our center] takes the threat of COVID-19 very seriously and have been taking proactive measures to ensure the health and safety of our residents and staff. We are following the guidance of Florida's Governor, the Department of Health and CDC and have implemented visitor screening procedures. It is essential that anyone who potentially carries the virus does not enter any of our facilities, and we are asking that individuals restrict visitation unless absolutely necessary to help keep our residents and caregivers safe and healthy."

AMERICAN OVERSIGHT

STATE OF FLORIDA
DIVISION OF EMERGENCY MANAGEMENT

IN RE: SUSPENSION OF STATUTES, RULES, AND ORDERS, PURSUANT TO EXECUTIVE ORDER NUMBER 20-52, MADE NECESSARY BY THE COVID-19 PUBLIC HEALTH EMERGENCY

DEM ORDER NO. 20-002

EMERGENCY ORDER

WHEREAS, the Governor of the State of Florida issued Executive Order No. 20-52 in response to the COVID-19 Public Health Emergency which poses a severe threat to the entire State of Florida and requires that timely precautions are taken to protect the communities, critical infrastructure, and general welfare of this State; and,

WHEREAS, the Governor has designated the Director of the Division of Emergency Management as the State Coordinating Officer for the duration of this emergency and has delegated to the State Coordinating Officer the authority to exercise those powers delineated in sections 252.36(5)-(10), Florida Statutes; and,

NOW THEREFORE, I hereby find that the Division of Emergency Management's timely performance of disaster response functions related to COVID-19 Public Health Emergency is hindered by the application of procedures imposed by statute, rule, and/or order.

Therefore, pursuant to Section 2 of Executive Order No. 20-52, I hereby issue the following authorization(s):

I. Suspend sections 393.13(4), 400.022(1)(b), 429.28(1)(d), 429.85(1)(d) Florida Statutes, for the particular purpose of prohibiting certain individuals from visiting facilities. For purposes of this order, a facility includes nursing homes, assisted living

AMERICAN OVERSIGHT

facilities, adult family-care homes, long-term care facilities, and adult group homes. The order applies as follows:

a. Any person infected with COVID-19 who has not had two consecutive negative test results separated by 24 hours is prohibited from visiting a facility; or

b. Any person showing or presenting signs or symptoms of a respiratory infection, including cough, fever, shortness of breath or sore throat is prohibited from visiting a facility; or

c. Any person who has or may have been in close contact with a person(s) infected with COVID-19 who has not tested negative for COVID-19 is prohibited from visiting a facility until 14 days after their interaction with the person(s) who is infected with COVID-19; or

d. Any person who traveled internationally is prohibited from visiting a facility until 14 days after their return to the United States; or

e. Any person who traveled on a cruise ship is prohibited from visiting a facility until 14 days after their return to the United States; or

f. Any person who has been in a community with confirmed community spread of COVID-19, as identified by the Centers for Disease Control and Prevention or a state public health agency, is prohibited from visiting a facility within 14 days of their presence in the community with community spread; or

g. Any person who resides in a community with confirmed community spread of COVID-19, as identified by the Centers for Disease Control and

AMERICAN OVERSIGHT

Prevention or a state public health agency, is prohibited from visiting a facility.

Because section 252.36(5)(a), Florida Statutes, allows the Governor to suspend the provisions of "any regulatory statute prescribing the procedures for [the] conduct of state business", and because Executive Order No. 20-52 designates the Director of the Division of Emergency Management as the State Coordinating Officer for this emergency, the requirements of sections 252.46 and 120.54(4), Florida Statutes, do not apply to this Order.

The effective dates of this Order shall correspond with the effective dates of Executive Order No. 20-52.

By Order of the State Coordinating Officer executed this 11th day of March, 2020, in Tallahassee, Leon County, Florida.

Jared Moskowitz
State Coordinating Officer
Florida Division of Emergency Management
2555 Shumard Oak Blvd.
Tallahassee, Florida 32399

Filed on this date, with
the designated Division Clerk,
receipt of which is hereby
acknowledged.

Subject: RE: taking temperatures

My concern is that this may violate a residents' rights under s. 400.022, Florida Statutes.

> (1) All licensees of nursing home facilities shall adopt and make public a statement of the rights and responsibilities of the residents of such facilities and shall treat such residents in accordance with the provisions of that statement. The statement shall assure each resident the following:
> ...
> (b) The right to private and uncensored communication, including, but not limited to, receiving and sending unopened correspondence, access to a telephone, **visiting with any person of the resident's choice during visiting hours, and overnight visitation outside the facility with family and friends in accordance with facility policies**...
> (c) Any entity or individual that provides health, social, legal, or other services to a resident has the right to have reasonable access to the resident. The resident has the right to deny or withdraw consent to access at any time by any entity or individual. **Notwithstanding the visiting policy of the facility, the following individuals must be permitted immediate access to the resident:**
> ...
> 2. Subject to the resident's right to deny or withdraw consent, **immediate family or other relatives of the resident**.

However, **42 C.F.R. §483.80 Infection control** clearly requires facilities to have a plan.

The facility must establish and maintain an infection prevention and control program designed to provide a safe, sanitary, and comfortable environment and to help prevent the development and transmission of communicable diseases and infections.

(a) *Infection prevention and control program.* The facility must establish an infection prevention and control program (IPCP) that must include, at a minimum, the following elements:

> (1) A system for preventing, identifying, reporting, investigating, and controlling infections and communicable diseases for all residents, staff, volunteers, visitors, and other individuals providing services under a contractual arrangement based upon the facility assessment conducted according to §483.70(e) and following accepted national standards;
>
> (2) Written standards, policies, and procedures for the program, which must include, but are not limited to:
>
> (i) A system of surveillance designed to identify possible communicable diseases or infections before they can spread to other persons in the facility;
>
> (ii) When and to whom possible incidents of communicable disease or infections should be reported;
>
> (iii) Standard and transmission-based precautions to be followed to prevent spread of infections;
>
> (iv) When and how isolation should be used for a resident; including but not limited to:

AMERICAN OVERSIGHT

(A) The type and duration of the isolation, depending upon the infectious agent or organism involved, and

(B) A requirement that the isolation should be the least restrictive possible for the resident under the circumstances.

(v) The circumstances under which the facility must prohibit employees with a communicable disease or infected skin lesions from direct contact with residents or their food, if direct contact will transmit the disease; and

(vi) The hand hygiene procedures to be followed by staff involved in direct resident contact.

Based on this, it appears a nursing home could have this policy as part of their infection control plan.

It is conceivable a conflict could arise where a resident demands to see a family member. There is no readily apparent case law on this kind of situation.

FLORIDA MEDICAID

A Division of the Agency for Health Care Administration

Florida Medicaid Health Care Alert

March 18, 2020

Provider Type(s): All

Medicaid Telemedicine Guidance for Medical and Behavioral Health Providers

To assist with the response efforts to the 2019 novel coronavirus (COVID-19) state of emergency, the Agency for Health Care Administration (Agency) has prepared this alert to ensure providers are aware of our current Medicaid policy for telemedicine and temporary waivers/flexibilities we are enacting to reduce opportunities for community spread of the virus. The purpose of this document

AMERICAN OVERSIGHT

is to provide telemedicine guidance to providers on Florida Medicaid coverage of services using live, two-way communication.

Telemedicine Definition

Telemedicine is the practice of health care delivery by a practitioner who is in a site other than the site where a recipient is located, using interactive telecommunications equipment that minimally includes real time, two-way interactive communication between a recipient and a practitioner using audio and video equipment.

Current Coverage in the Florida Medicaid Program

Statewide Medicaid Managed Care Program

Medicaid health plans have broad flexibility in covering telemedicine services, including remote patient monitoring and store-and-forward services. The Agency has encouraged plans to ensure the use of services via telemedicine is maximized (as appropriate and allowable with the practitioner's scope of practice) to be responsive to workforce shortages or to meet the needs of enrollees who are homebound or are being monitored in the home. Please contact the health plans directly to inquire about their telemedicine requirements and reimbursement rates.

Fee-for-Service Delivery System

The Agency's current telemedicine policy in the fee-for-service delivery system is available at: http://ahca.myflorida.com/medicaid/review/General/59G_1057_TELEMEDICINE.pdf.

- **Practitioners:** The Agency covers physician, physician extenders (advanced practice registered nurses and physician assistants), and clinic providers (county health departments, federally qualified health centers, and rural health clinics) through telemedicine. Covered medical services include evaluation, diagnostic, and treatment recommendations for services included on the Agency's practitioner fee schedule to the extent telemedicine is designated in the American Medical Association's Current Procedural Terminology (i.e., national coding standards). All service components included in the procedure code must be completed in order to be reimbursed. The Agency reimburses services using telemedicine at the same rate detailed on the practitioner fee schedule. Providers must append the GT modifier to the procedure code in the fee-for-service delivery system.

- **Behavioral Health:** The Agency covers behavioral health evaluation, diagnostic, and treatment recommendation services through telemedicine. The Agency reimburses the behavioral health assessment and medication management screening services through telemedicine, at the same rate detailed on the community behavioral health fee schedule. Providers must perform all service components designated for the procedure code billed. Providers must append the GT modifier in the fee-for-service delivery system.

Additional Telemedicine Flexibilities During the State of Emergency (*Applies to the Fee-For-Service Delivery System*)

AMERICAN OVERSIGHT

During the state of emergency, the Agency is expanding services provided through telemedicine (live, two-way communication) through the fee-for-service delivery system to include the below treatment services, as medically necessary:

Service	Procedure Code	Required Modifier
Brief individual medical psychotherapy, mental health	H2010 HE	GT
Brief individual medical psychotherapy, substance abuse	H2010 HF	GT
Individual Therapy	H2019 HR	GT
Family Therapy	H2019 HR	GT
Medication Management	T1015	GT
Behavioral health-related medical services: verbal interaction, mental health	H0046	GT
Behavioral health-related medical services: verbal interaction, substance abuse	H0047	GT
Medication-assisted treatment services	H0020	GT
Face-to-face contact prior to SIPP discharge and the home visit interview requirement components of Mental Health Targeted Case Management	T1017 T1017 HA T1017 HK	GT

The Agency reimburses these services using telemedicine at the same rate detailed for the procedure code on the respective Medicaid fee schedule.

Store-and-Forward & Remote Patient Monitoring

For certain evaluation and management services provided during the state of emergency period, the Agency is expanding telehealth to include store-and-forward and remote patient monitoring modalities rendered by **licensed physicians and physician extenders (including those operating within a clinic)** functioning within their scope of practice. The Agency will reimburse each service once per day per recipient, as medically necessary and at the rates detailed in the table below.

Service	Procedure Code	Modifier Required	Reimbursement Rate	
			Maximum Fee*	Maximum Facility Fee**
Store-and-forward	G2010	CR	$7.69	$5.66
Telephone Communications - *Existing* Patients	99441	CR	$9.05	$8.05
	99442	CR	$17.65	$16.10
	99443	CR	$25.80	$23.94
Telephone Communications - *New* Patients	99441 CG	CR	$9.05	$8.05
	99442 CG	CR	$17.65	$16.10
	99443 CG	CR	$25.80	$23.94

AMERICAN OVERSIGHT

Remote patient monitoring	99453	CR	$11.77	N/A
	99454	CR	$39.15	N/A
	99091	CR	$37.12	N/A
	99473	CR	$7.02	N/A
	99474	CR	$9.51	$5.44
	99457	CR	$32.36	$19.80
	99458	CR	$26.48	$19.80

**On the practitioner fee schedule, this represents the fee schedule increase rate, which is the base Florida Medicaid rate with a 4% increase included for all ages.*
***The facility fee is the reimbursement rate for a practitioner performing services in one of the following places of service: outpatient hospital-off campus (19), inpatient hospital (21), outpatient hospital-on campus (22), emergency room hospital (23), or ambulatory surgical center (24), according to Medicare's designation.*

Telehealth Provider Requirements

Providers using any modality of telehealth described in this alert must:

- Ensure treatment services are medically necessary and performed in accordance with the corresponding and promulgated service-specific coverage policy and fee schedule. For new procedure codes temporarily covered during the state of emergency, services must be performed in accordance with the American Medical Association's Current Procedural Terminology procedure code definitions and guidance.
- Comply with HIPAA regulations related to telehealth communications.
    - See additional guidance provided by the Office of Civil Rights on March 17, 2020 during the state of emergency here.
- Supervision requirements within a provider's scope of practice continue to apply for services provided through telehealth.
- Documentation regarding the use of telehealth must be included in the medical record or progress notes for each encounter with a recipient.
- The patient and parent or guardian, as applicable, must be present for the duration of the service provided using telehealth except when using store and forward modalities.
- Out-of-state practitioners who are not licensed in Florida may provide telemedicine services to Florida Medicaid recipients, when appropriate, during the state of emergency in accordance with the Department of Health's emergency order (DOH 20 - 002).
    - These providers must go through the provisional enrollment process, if they are not already enrolled in Florida Medicaid. More information about the provisional enrollment process will be available on March 19, 2020 at http://www.mymedicaid-florida.com.

Additional Information

The Agency will issue subsequent guidance for other provider types (therapy services, behavior analysis services, etc.) use of telemedicine.

The Agency will continue to provide information as it becomes available.

For more information, visit the Department's COVID-19 website: www.flhealth.gov/COVID-19.

Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease 2019 (COVID-19)

Version 4.1 | March 10, 2020

The Florida Department of Health (Department) is prioritizing testing of symptomatic individuals who had close contact[1,2] with a laboratory-confirmed[3] COVID-19 case, are part of an outbreak, or have unexplained respiratory illness. Please see the Centers for Disease Control and Prevention (CDC) Health Alert Network 429 https://emergency.cdc.gov/han/2020/han00429.asp for additional guidance on prioritization of testing. The Department recommends other individuals be tested at a commercial laboratory (e.g., LabCorp and Quest). For all persons under investigation for COVID-19, take the following precautions:

- Ask the patient to wear a surgical mask.
- Evaluate the patient in a private room with the door closed, ideally an airborne isolation room, if available.
- Initiate contact and airborne precautions, including use of eye protection (e.g., goggles or a face shield) for all health care professionals and other staff entering the room.
- Visit **www.cdc.gov/coronavirus/2019-ncov/hcp/infection-control.html** for additional recommendations on infection control recommendations for patients under investigation for COVID-19 in health care settings.

A. Person had **close contact**[1,2] with a laboratory-confirmed[3] COVID-19 case and fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

B. Person is part of an outbreak of suspected COVID-19.

C. Person hospitalized with **unexplained respiratory illness or person who died from unexplained respiratory illness.**

D. Person traveled to or from an **affected geographic area**[5] with widespread community transmission and has fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

→ **This patient meets the criteria for testing at the Florida Department of Health Bureau of Public Health Laboratories.** The Florida Department of Health asks that you **immediately** notify both infection control personnel at your health care facility and your county health department (CHD) (**FloridaHealth.gov/CHDEpiContact**).

E. Person had community contact (e.g., attended the same gathering or stayed on the same cruise ship) with a laboratory-confirmed[3] COVID-19 case and fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

F. Person is age ≥65 years, has chronic medical conditions, or is in an immunocompromised state and has fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

→ **Consider testing at a commercial laboratory.** If commercial testing is not available, contact your CHD for patients that meet CDC priority criteria.

[1]Close contact is defined as a) being within approximately 6 feet (2 meters) of a COVID-19 case for a prolonged period; close contact can occur while caring for, living with, visiting, or sharing a healthcare waiting area or room with a COVID-19 case– or –b) having direct contact with infectious secretions of a COVID-19 case (e.g., being coughed on) If such contact occurs while not wearing recommended personal protective equipment (PPE) (e.g., gowns, gloves, NIOSH-certified disposable N95 respirator, eye protection), criteria for PUI consideration are met. Data to inform the definition of close contact are limited. Considerations when assessing close contact include the duration of exposure (e.g., longer exposure time likely increases exposure risk) and the clinical symptoms of the person with COVID-19 (e.g., coughing likely increases exposure risk as does exposure to a severely ill patient). Special consideration should be given to healthcare personnel exposed in healthcare settings.

[2]For healthcare personnel, testing may be considered if there has been exposure to a person with suspected COVID-19 without laboratory confirmation. Because of their often extensive and close contact with vulnerable patients in healthcare settings, even mild signs and symptoms (e.g., sore throat) of COVID-19 should be evaluated among potentially exposed healthcare personnel.

[3]Documentation of laboratory-confirmation of COVID-19 may not be possible for travelers or persons caring for patients in other countries.

[4]Fever may be subjective or confirmed.

[5]Affected areas are defined as geographic regions where sustained community transmission has been identified. For a list of relevant affected areas, see Coronavirus Disease 2019 Information for Travel (https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html)

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

Enhanced Surveillance and Preparedness for Coronavirus Disease 2019 (COVID-19)

March 10, 2020

The Florida Department of Health (Department) would like to update health care providers and laboratories on the detection and reporting of coronavirus disease 2019 (COVID-19). The outbreak has now spread from where it originated in China with sustained community transmission in many countries, causing an outbreak of respiratory illness. The Department is collaborating with the Centers for Disease Control and Prevention (CDC) to conduct surveillance for persons who may have been exposed to or infected with COVID-19 while traveling to impacted countries or who have had contact with a case to arrange for confirmatory testing.

As of March 9, 2020, 15 cases of COVID-19 have been identified in Florida including one non-resident and two deaths. In addition, five Floridians with COVID-19 were repatriated from China and isolated by the federal government. Most have a history of travel including to Italy, Egypt and the Dominican Republic. Multiple cases without known travel have also been identified in Florida. As a result of the increasing response needs to COVID-19, Dr. Scott Rivkees, State Surgeon General, declared a public health emergency on March 1, 2020.

Additionally, as of March 9, 2020, 472 COVID-19 infections have been confirmed in the United States (U.S.) including in persons repatriated to the U.S. with exposures in Wuhan City or on the Diamond Princess Cruise Ship. Limited person-to-person transmission has been detected in the U.S. Since the outbreak began in December 2019, over 109,000 confirmed cases have been reported worldwide. Most cases (81,000) have been detected in China. However, the outbreak is spreading quickly across the globe and has been detected in 104 countries or territories. Please continue to monitor the CDC website for updates: www.cdc.gov/coronavirus/2019-ncov/index.html

All health care providers should be prepared to identify, collect specimens, and care for patients under investigation for COVID-19. Health care providers should immediately notify infection control personnel at their health care facility if they identify a person meeting the PUI for COVID-19 criteria below.

1. Any person, including health care workers[1], who has had close contact[2] with a laboratory-confirmed[3] COVID-19 case within 14 days of symptom onset and fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

2. Person is part of a non-household outbreak of suspected COVID-19.

3. Person hospitalized with unexplained respiratory illness or person who died from unexplained respiratory illness.

4. Person traveled to or from an affected geographic area[5] with widespread community transmission and has fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

AMERICAN OVERSIGHT

5. Person had community contact (e.g., attended the same gathering or stayed on the same cruise ship) with a laboratory-confirmed COVID-19 case and fever or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

6. Person is age ≥ 65 years, has chronic medical conditions, or is in an immunocompromised state and has fever or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

Specimen Collection for a PUI for COVID-19 for Testing at Bureau of Public Health Laboratories. Specimens from patients meeting the first four (1-4) testing criteria above can be tested at the Bureau of Public Health Laboratories.

For initial diagnostic testing for COVID-19, CDC recommends collecting and testing upper respiratory (nasopharyngeal AND oropharyngeal swabs), and lower respiratory (sputum, if possible) for those patients with productive coughs. Induction of sputum is not recommended. Specimens should be collected as soon as possible once a PUI is identified, regardless of the time of symptom onset. Please consult your county health department for instructions on shipping to the Bureau of Public Health Laboratories.

Specimen Collection for a PUI for COVID-19 for Testing at Commercial Laboratories. Specimens from patients meeting the two last (5-6) testing criteria above may be sent to commercial laboratories (e.g. LabCorp and Quest) for testing. Please contact them for specific specimen collection and shipment instructions. Additional commercial laboratories are expected to start offering the COVID-19 test soon. If no commercial laboratory is available, please contact your local county health department.

Health Care Infection Prevention and Control Recommendations
CDC currently recommends a cautious approach to PUIs for COVID-19. Such patients should be asked to wear a surgical mask as soon as they are identified. They should be evaluated in a private room with the door closed, ideally an airborne infection isolation room if available. Health care personnel entering the room should use contact and airborne precautions, including the use of eye protection (e.g., goggles or a face shield). For more information, please refer to CDC's detailed infection control guidance: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html

Hospital and Health Care Professional Preparedness
The Department recommends that hospitals and health care professionals prepare to identify and treat patients with COVID-19. The CDC has developed preparedness checklists to guide this effort. They can be found here:
https://www.cdc.gov/coronavirus/2019-ncov/hcp/preparedness-checklists.html

Additional Resources
https://www.cdc.gov/coronavirus/2019-nCoV/hcp/index.html
Updated Guidance on Evaluating and Testing Persons for Coronavirus Disease 2019 (COVID-19)
https://emergency.cdc.gov/han/2020/han00429.asp

[1]For healthcare personnel, testing may be considered if there has been exposure to a person with suspected COVID-19 without laboratory confirmation.

[2]Close contact is defined as—

a) being within approximately 6 feet (2 meters), or within the room or care area, of a COVID-19 case for a prolonged period of time while not wearing recommended personal protective equipment or PPE (e.g., gowns, gloves, NIOSH-certified disposable N95 respirator, eye protection); close contact can include caring for, living with, visiting, or sharing a health care waiting area or room with a COVID-19 case – *or* –

AMERICAN OVERSIGHT

b) having direct contact with infectious secretions of a COVID-19 case (e.g., being coughed on) while not wearing recommended personal protective equipment.

[3]Documentation of laboratory-confirmation of COVID-19 may not be possible for travelers or persons caring for patients in other countries.

[4]Fever may be subjective or confirmed.

[5]Affected areas are defined as geographic regions where sustained community transmission has been identified. Countries with CDC Level 2 or 3 Travel Health Notices include: China, South Korea, Iran, Italy, and Japan (as of February 28,2020). A current list of affected areas can be found at: www.cdc.gov/coronavirus/2019-ncov/travelers/

Subject: IMPORTANT INFORMATION ***Coronavirus (COVID-19) - March 09, 2020 Update ***

Good morning Team,

AMERICAN OVERSIGHT

Please note ***Attachment 4_Receptionist Q&A_Coronavirus_UPDATED 03-09-20*** AND ***Attachment 6_Staff Checklist_Coronavirus_UPDATED_03-09-20*** which reflects "Have you exhibited respiratory symptoms such as shortness of breath, **sore throat**, fever **OR** cough?" We will be limiting visitors or vendors with **any** symptomatology until they are asymptomatic. Additionally, please read the most recent **CMS Memo released 04-04-20** as it relates to a survey priority shift of focus related to IC practices and guidance to facilities. Please take caution in denying admissions solely based on lack of Personal Protective Equipment (PPE), as this may trigger an immediate visit from your state survey agency. We need to continue to work together to ensure we have enough PPE supplies to care for our residents. We have a limited supply at the corporate office if local resources have been exhausted.

Other things to carry out...

- Set up dedicated handwashing stations near your main entrance and direct visitors/vendors to perform hand hygiene - see Lexington's best practice pictures attached 😊 – GREAT JOB TEAM LEX
- Continue to screen all employees; any staff identified post screening will be communicated to your respective RDCO for further guidance
- Make sure you are ordering PPE equipment weekly to remain on allocation with McKesson as new shipments arrive – many facilities received bulk orders at the end of last week – please order the minimum as previously communicated or this will hold up your order
- Daily calls being initiated at the end of each day with corporate leadership, RDCO's and RVP's to discuss CDC line listing, current status of resident's on isolation (with reason and anticipated d/c date) and current PPE status – I will be sending out a combined PPE Status/Isolation Status Template to help with this daily communication to your RDCO to report off

For those who have been receiving questionnaires from our partnering ACO's, Advent Health PAC, etc., legal has crafted a draft and you will be receiving guidance for response today to report back – thank you Jim.

Thank you for being extremely diligent during this national focus in the ongoing prevention and control of the Coronavirus. Please reach out to me directly if you have any questions and/or concerns.

Respectfully,
Liz

Good evening Team,

Please distribute this communication with collaterals to your respective reports.

Attached you will find additional guidance, departmental direction, preparedness, response and education overview listed within the attachment **Fleet Corporate Office Preparedness_Coronavirus.** Within this document you will find the below attachments for each respective department. Continue to frequent the *CDC* and *WHO* websites for updates and developmental changes as it relates to COVID-19 Coronavirus. As always, maintaining Infection Control Practices is the front line prevention to transmission of any pathogens.

Within the Fleet Corporate Office Preparedness_Coronavirus QRT (Quick Reference Tool) you will find the below attachments....

1. Cough Etiquette Poster (**attachment #1**)
2. Hand Hygiene Poster (**attachment #2**)
3. Greystone Visitor Sign (**attachment #3**)
4. Receptionist Q&A Screening (**attachment #4**)
5. CDC LTC Respiratory Line Listing (**attachment #5**)
6. Staff Checklist (**attachment #6**)
7. Admissions/Home Health Checklist (**attachment #7**)
8. Vista Laboratories Letter to Facilities – (**attachment #8**)
9. Stop the Spread of Germs Poster – (**attachment #9**)
10. Coronavirus CDC Fact Sheet_English – (**attachment #10**)
11. Coronavirus CDC Fact Sheet_Spanish – (**attachment #11**)
12. CDC Symptoms Poster – (**attachment #12**)
13. CDC Flowchart to Identify and Assess – (**attachment #13**)

Our Communications Department will be sending a Greystone Letter Template to serve as communication to resident families and/or resident representatives discussing our proactive approach to this novel pathogen. Please reach out to your RDCO and/or myself with any questions or concerns.

Respectfully,
Liz

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

EFFECTIVE IMMEDIATELY IN ALL RESIDENTIAL / LONG TERM CARE FACILITIES:

- **ALL STAFF ARE TO WEAR A FACIAL MASK AT ALL TIMES**

- **GLOVES WHEN PROVIDING DIRECT CARE TO A PATIENT OR RESIDENT**

Effective immediately staff of residential and long term care facilities are to implement universal use of facial masks while in the facility. All staff and essential healthcare visitors are to don a mask upon the start of their shift and only change it once it becomes moist. It is important to keep hands away from the mask and only touch the straps of the mask. **Gloves are to be worn when providing care to the resident.** Continue to perform hand hygiene prior to donning gloves, after removing gloves, and anytime there is contact with the resident environment.

Staff in a room with a patient with respiratory symptoms of unknown cause or a patient with known or suspected COVID-19 should adhere to Standard, Contact, and Droplet Precautions with eye protection. This includes wearing gown, gloves, N95 mask (as fitted and available – if not available, at least a facial mask), and eye protection such as face shields or goggles.

In addition to securing more gowns, gloves, and masks, facilities will need to immediately order the appropriate eye protection (I.e. face shields) since many do not have this on hand. In the event you are unable to acquire the necessary PPE, please notify your local emergency management agency. For more information on preserving PPEs supplies the facility should refer to the information on the CDC website.

GUIDANCE ON USE AND CONSERVATION OF Personal Protective Equipment (PPE)

Facilities will need to educate their staff on the proper donning (putting on), doffing (taking off), and disposal of any PPE.

Information about the recommended duration of Transmission-Based Precautions is available in the Interim Guidance for Discontinuation of Transmission-Based Precautions and Disposition of Hospitalized Patients with COVID-19

Gloves – Frequently Asked Questions

- **What type of glove is recommended to care for suspected or confirmed COVID-19 patients in healthcare settings?**

    - Nonsterile disposable patient examination gloves, which are used for routine patient care in healthcare settings, are appropriate for the care of patients with suspected or confirmed COVID-19.

AMERICAN OVERSIGHT

- **Is double gloving necessary when caring for suspected or confirmed CoVID-19 patients in healthcare settings?**

    - CDC Guidance does not recommend double gloves when providing care to suspected or confirmed 2019-COVID patients.

- **Are extended length gloves necessary when caring for suspected or confirmed COVID-19 patients in healthcare settings?**

    - According to CDC Guidance, extended length gloves are not necessary when providing care to suspected or confirmed COVID-19 patients. Extended length gloves can be used, but CDC is not specifically recommending them at this time.

- **How I do put on (don) and take off (doff) my mask and gloves?**

    - Check to see if your facility has guidance on how to don and doff PPE. The procedure to don and doff should be tailored to the specific type of PPE that you have available at your facility.

    - If your facility does not have specific guidance, the CDC has recommended sequences for donning and doffing PPE.

    - It is important for HCP to perform hand hygiene after removing PPE. Hand hygiene should be performed by using an alcohol-based hand sanitizer that contains 60-95% alcohol or washing hands with soap and water for at least 20 seconds. If hands are visibly soiled, soap and water should be used before returning to alcohol-based hand sanitizer.

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

We have compiled the following list of questions for your review and direction.

1.) **LOW** Can further consideration be given to prohibiting residents from leaving and returning to facilities? This presents a tremendous risk of infection to all residents. It also places a burden on thinning staff resources to screen and re-screen returning residents. Finally, it is demoralizing to other residents who are unable to safely leave the facility and are not able to visit friends and family at the facility. Suspension of 429.28(1)(e) and 429.85(1)(e) and, suspension of 429.28(1)(k) and 429.28(1)(l) for residents who choose to leave the facility is advised.
Not at this time.
Resident right still apply.

2.) Are screening criteria f. and g. from DEM Order No. 20-002 (prohibiting persons who have been in or reside in a community with confirmed community spread) to be asked of all entrants, only end-of-life family and friend visitors (DEM Order No. 20-006, 1. a.), or not at all?
DEM No. 20-006 supersedes DEM Order No. 20-002.

3.) **HIGH** What guidance/direction is available to assisted living facilities regarding limiting communal meals and activities?
Communal issue being addressed. Not related to the EO.

4.) The screening requirements of DEM Order No. 20-006 2.b., strictly applied, would prohibit staff and residents from entering the facility if they exhibit or report signs of a respiratory infection, even in cases where a physician has diagnosed the cause of the infection to be non-communicable (allergies, etc.). Is this intended?
Yes.
Two negative test in a 24-hour period applies to staff as well.

5.) MEDIUM. Does DEM Order No. 20-005 prohibit end-of-life family and friend visitors in Broward County (which would otherwise be permitted by DEM Order No. 20-006, 1. a.)?
Check Broward EO.

6.) **LOW** Are facilities authorized to restrict visitation in end-of-life situations when the patient is in a shared room and unable to provide alternative space? In one particular end-of-life case, friends and family are attempting to visit very frequently, placing the other resident at risk. Hospice does not have an inpatient bed available and the family is unwilling/unable to care for the affected resident at home.

Make arrangements to isolated.

7.) **HIGH**. Under what circumstances may non-healthcare providers of essential services (AC/plumbing repair services) and local authorities that are not law enforcement or emergency medical personnel (ex. county fire marshal) admissible to the facility? See DEM Order No. 20-006, 1. g. Would the service providers qualify as "facility staff" for purposes of DEM Order No. 20.006, 1. d. See also Rule 59A-36.001(37) (definition of "staff"). Recognizing that the fewer entrants the better, a plumbing or AC failure, etc. can necessitate the transfer of all residents if it cannot be addressed by qualified personnel.

Kim looking at this.

AMERICAN OVERSIGHT

Bob – also

8.) Under what circumstances are facilities permitted to admit new residents (are prospective residents considered "facility residents" as used in DEM Order No. 20-006, 1. a.)?

No restriction on new residents. May admit new residents.
Bob has response.

9.) It has been reported that some AHCA surveyors have indicated that assisted living facilities are to use the attached Hospital to Post-Acute Care Facility Transfer – COVID-19 Assessment (3/15/20) to determine whether a resident may be transferred from a hospital to an assisted living facility. The proposed analysis is entirely inconsistent with the screening requirements provided under DEM Order No. 20-006. For example, under the assessment on the form, a patient may be transferred to an assisted living facility if they have NOT been tested for COVID-19, regardless of whether they are presenting symptoms of respiratory infection.

Form is being revised.
This is a hospital to SNF/SNF to hospital form. It is not intended to be applied to ALFs.

10.) Under what circumstances, if any, would it be permissible to permit screened professional movers to remove a discharged resident's belongings? For example, a resident occupied a 2-bedroom apartment at a standard ALF and needed to be relocated to a higher level of care. The resident is unable to move the items, the resident's family is unable to enter the facility, and potential injury to facility staff should not be risked.

Kim.

11.) **Staffing guidance.** *** With screening procedures, illnesses, school closures, etc., it is a highly likely that it will become impossible for many facilities to meet the staffing standards prescribed by 59A-36.010. Additionally, some of the required staff training as prescribed by 59A-36.011 is becoming unavailable as in-person gatherings and activities are necessarily limited. What guidance and assistance is available to facilities and their staff? Should every facility be applying for variances or waivers from any rules they cannot comply with during this emergency?

12.) ***It has been reported that LabCorp and Quest have indicated that COVID-19 specimen collection may only occur at a physician's office or hospital. Assisted living facilities have been told by these entities that it would not be permissible for a physician to travel to the facility to do the collection. Is this accurate and is there any accommodation that can be made to more efficiently effectuate testing of multiple residents?
Contact local health officials.
Collecting in the ALFs confirmed.

AMERICAN OVERSIGHT

FL-AHCA-20-0902-A-002336

Office of Inspector General

https://oig.hhs.gov

The mission of the Office of Inspector General (OIG), as mandated by Public Law 95-452, as amended, is to protect the integrity of the Department of Health and Human Services (HHS) programs, as well as the health and welfare of beneficiaries served by those programs. This statutory mission is carried out through a nationwide network of audits, investigations, and inspections conducted by the following operating components:

Office of Audit Services

The Office of Audit Services (OAS) provides auditing services for HHS, either by conducting audits with its own audit resources or by overseeing audit work done by others. Audits examine the performance of HHS programs and/or its grantees and contractors in carrying out their respective responsibilities and are intended to provide independent assessments of HHS programs and operations. These assessments help reduce waste, abuse, and mismanagement and promote economy and efficiency throughout HHS.

Office of Evaluation and Inspections

The Office of Evaluation and Inspections (OEI) conducts national evaluations to provide HHS, Congress, and the public with timely, useful, and reliable information on significant issues. These evaluations focus on preventing fraud, waste, or abuse and promoting economy, efficiency, and effectiveness of departmental programs. To promote impact, OEI reports also present practical recommendations for improving program operations.

Office of Investigations

The Office of Investigations (OI) conducts criminal, civil, and administrative investigations of fraud and misconduct related to HHS programs, operations, and beneficiaries. With investigators working in all 50 States and the District of Columbia, OI utilizes its resources by actively coordinating with the Department of Justice and other Federal, State, and local law enforcement authorities. The investigative efforts of OI often lead to criminal convictions, administrative sanctions, and/or civil monetary penalties.

Office of Counsel to the Inspector General

The Office of Counsel to the Inspector General (OCIG) provides general legal services to OIG, rendering advice and opinions on HHS programs and operations and providing all legal support for OIG's internal operations. OCIG represents OIG in all civil and administrative fraud and abuse cases involving HHS programs, including False Claims Act, program exclusion, and civil monetary penalty cases. In connection with these cases, OCIG also negotiates and monitors corporate integrity agreements. OCIG renders advisory opinions, issues compliance program guidance, publishes fraud alerts, and provides other guidance to the health care industry concerning the anti-kickback statute and other OIG enforcement authorities.

Notices

THIS REPORT IS AVAILABLE TO THE PUBLIC
at https://oig.hhs.gov

Section 8M of the Inspector General Act, 5 U.S.C. App., requires that OIG post its publicly available reports on the OIG Web site.

OFFICE OF AUDIT SERVICES FINDINGS AND OPINIONS

The designation of financial or management practices as questionable, a recommendation for the disallowance of costs incurred or claimed, and any other conclusions and recommendations in this report represent the findings and opinions of OAS. Authorized officials of the HHS operating divisions will make final determination on these matters.

AMERICAN OVERSIGHT

Report in Brief
Date: March 2020
Report No. A-04-18-08065

U.S. DEPARTMENT OF HEALTH & HUMAN SERVICES
OFFICE OF INSPECTOR GENERAL

Florida Should Improve Its Oversight of Selected Nursing Homes' Compliance With Federal Requirements for Life Safety and Emergency Preparedness

Why OIG Did This Audit

In 2016, the Centers for Medicare & Medicaid Services (CMS) updated its life safety and emergency preparedness regulations to improve protections for all Medicare and Medicaid beneficiaries, including residents of long-term-care facilities (commonly referred to as nursing homes). Updates included requirements that nursing homes have expanded sprinkler systems and smoke detector coverage; an emergency preparedness plan that is reviewed, trained on, tested, and updated at least annually; and provisions for sheltering in place and evacuation.

Our objective was to determine whether Florida ensured that selected nursing homes that participate in the Medicare or Medicaid programs complied with CMS and State requirements for life safety and emergency preparedness.

How OIG Did This Audit

Of the approximately 700 nursing homes in Florida that were enrolled in Medicare or Medicaid, we selected a nonstatistical sample of 20 nursing homes based on risk factors, including multiple high-risk deficiencies reported to CMS by Florida.

We conducted unannounced site visits at the 20 nursing homes from July through November 2018. During the site visits, we checked for life safety violations and reviewed the nursing homes' emergency preparedness plans.

What OIG Found

Florida did not ensure that selected nursing homes that participated in the Medicare or Medicaid programs complied with CMS and State requirements for life safety and emergency preparedness. All 20 nursing homes that we visited had deficiencies in areas related to life safety or emergency preparedness. Specifically, 19 nursing homes had 100 areas of noncompliance with life safety requirements related to building exits and smoke barriers, fire detection and suppression systems, hazardous storage areas, smoking policies and fire drills, and electrical equipment. Furthermore, 16 nursing homes had 87 areas of noncompliance with emergency preparedness requirements related to written emergency plans, emergency supplies and power, plans for sheltering in place and tracking residents and staff during and after an emergency, emergency communications plans, and emergency plan training.

The instances of noncompliance occurred because of several contributing factors, specifically inadequate management oversight and staff turnover at the nursing homes. In addition, Florida did not have a standard life safety training program for all nursing home staff and generally performed life safety surveys no more frequently than once every 12 to 15 months, even at these higher risk nursing homes.

What OIG Recommends and Florida Comments

We recommend that Florida (1) follow up with the 20 nursing homes to ensure that corrective actions have been taken regarding the deficiencies we identified, (2) work with CMS on developing life safety training for nursing home staff, and (3) conduct more frequent surveys at nursing homes with a history of multiple high-risk deficiencies and follow up to ensure that corrective actions have been taken. We also made other administrative recommendations.

In written comments on our draft report, Florida agreed with our first and fifth recommendations and partially agreed with our seventh recommendation. Florida did not agree with our remaining recommendations. In addition, Florida provided general comments and concerns on our three findings and provided additional steps they have taken to address those findings. After reviewing Florida's comments, we modified our first finding to remove errors related to resident call systems and to more clearly summarize the number of deficiencies at each nursing home. We maintain that our findings and recommendations, as revised, are correct.

The full report can be found at https://oig.hhs.gov/oas/reports/region4/41808065.asp.

INTRODUCTION

WHY WE DID THIS AUDIT

In 2016, the Centers for Medicare & Medicaid Services (CMS) updated its life safety and emergency preparedness regulations to improve protections for all Medicare and Medicaid beneficiaries, including those residing in long-term-care facilities (commonly referred to as nursing homes). The updates included requirements that nursing homes have expanded sprinkler systems and smoke detector coverage; an emergency preparedness plan that is reviewed, trained on, tested, and updated at least annually; and provisions for sheltering in place and evacuation.

As part of its oversight activities, the Office of Inspector General (OIG) is conducting a series of audits nation-wide (Appendix B) to assess compliance with these new life safety and emergency preparedness requirements. This audit focuses on selected nursing homes in Florida.

OBJECTIVE

Our objective was to determine whether the Florida Agency for Health Care Administration (State agency) ensured that selected nursing homes in Florida that participate in the Medicare or Medicaid programs complied with CMS and State requirements for life safety and emergency preparedness.

BACKGROUND

Medicare and Medicaid Coverage of Nursing Homes

The Medicare and Medicaid programs cover care in nursing homes for eligible beneficiaries. Sections 1819 and 1919 of the Social Security Act (the Act) establish requirements for CMS and States to perform surveys of nursing homes to determine whether they meet Federal participation requirements. For Medicare and Medicaid, these statutory participation and survey requirements are implemented in Federal regulations at 42 CFR part 483, subpart B, and 42 CFR part 488, subpart E, respectively.

Requirements for Life Safety and Emergency Preparedness

Nursing homes are required to comply with all Federal, State, and local laws, regulations, and codes, as well as accepted professional standards and principles (42 CFR § 483.70). Federal regulations on life safety (42 CFR § 483.90) require nursing homes to comply with standards set forth in the *Life Safety Code* (National Fire Protection Association (NFPA) 101) and *Health Care Facilities Code* (NFPA 99).[1] CMS lists applicable requirements on Form CMS-2786R, Fire Safety

[1] CMS adopted the 2012 edition of both publications in a Final Rule published in 81 Fed. Reg. 26872 (May 4, 2016).

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002342

Survey Report.[2] Federal regulations on emergency preparedness (42 CFR § 483.73) include specific requirements for nursing home emergency preparedness plans and reference the *Standard for Emergency and Standby Power Systems* (NFPA 110) as part of the requirements.[3] CMS lists applicable requirements on its *Emergency Preparedness Surveyor Checklist*.[4]

The Fire Safety Survey Report and *Emergency Preparedness Surveyor Checklist* are used when CMS or a designated agency performs a nursing home survey. The results of each survey are reported and added to CMS's Automated Survey Processing Environment (ASPEN) system.

State Requirements for Emergency Preparedness

Florida Statute 400.23(2)(g) requires nursing homes to prepare and annually update a "comprehensive emergency management plan" (State emergency plan). The State emergency plan requirements preceded and significantly duplicate the Federal emergency preparedness requirements, but they are not identical. When preparing their State emergency plans, nursing homes must include risk assessment and planning, policies and procedures, a communication plan, and training and testing programs. The State emergency plan is subject to annual review and approval by the nursing home's county "local emergency management" (emergency management) agency. The State agency has provided guidance that the county emergency management agencies use to verify that nursing homes meet all State emergency plan requirements.

Florida Administrative Code (FAC) 59A-4.1265 mandates that each nursing home must prepare a detailed supplemental plan to its emergency plan to address emergency power in the event of the loss of primary electrical power.[5] FAC requires all nursing homes to maintain a safe indoor air temperature, not to exceed 81 degrees Fahrenheit, for a minimum of 96 hours in the event of the loss of primary electrical power. The nursing home's emergency management agency should review and approve all supplemental plans.

---

[2] Form CMS-2786R is available online at https://www.cms.gov/Medicare/CMS-Forms/CMS-Forms/CMS-Forms-Items/CMS009335.html.

[3] CMS adopted the 2010 edition of NFPA 110 in a Final Rule published in 81 Fed. Reg. 63860, 63929 (September 16, 2016).

[4] CMS provides online guidance for emergency preparedness at https://www.cms.gov/medicare/provider-enrollment-and-certification/surveycertemergprep/emergency-prep-rule.html.

[5] All nursing homes were required to implement their supplemental plans no later than June 1, 2018. The State agency granted an extension up to January 1, 2019, to providers who could show that necessary construction, delivery of ordered equipment, or zoning or other regulatory approval processes caused delays in implementing their plans.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002343

Responsibilities for Life Safety and Emergency Preparedness

In Florida, the State agency oversees nursing homes and is responsible for ensuring that nursing homes comply with Federal, State, and local regulations. Under an arrangement known as a "section 1864 agreement" with CMS, the State agency is responsible for completing life safety and emergency preparedness surveys at least once every 15 months at nursing homes that participate in the Medicare or Medicaid programs.[6] However, nursing homes with repeat deficiencies can be surveyed more frequently.[7]

Management and staff at nursing homes are ultimately responsible for ensuring the safety and well-being of nursing home residents and for complying with Federal, State, and local regulations. They are responsible for ensuring that facility systems such as furnaces, water heaters, kitchen equipment, generators, sprinkler and alarm systems, elevators, and other equipment are properly installed, tested, and maintained. They are also responsible for ensuring that the nursing home is free of hazards and for ensuring that emergency plans, including fire escape plans and disaster preparedness plans, are updated and tested on a regularly basis.

HOW WE CONDUCTED THIS AUDIT

As of November 2017, nearly 700 nursing homes in Florida participated in the Medicare or Medicaid programs. We selected for our audit a nonstatistical sample of 20 of these nursing homes based on various factors, including the number of high-risk deficiencies that the State agency reported to CMS's ASPEN system and the potential risk of environmental threat, such as hurricanes, ice, and extreme heat, taking into account the nursing homes' locations.[8]

We conducted unannounced site visits at the 20 nursing homes from July through November 2018. During the site visits, we checked for life safety violations and reviewed the nursing homes' emergency preparedness plans.

We conducted this performance audit in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives.

---

[6] The Act §§ 1819(g)(2)(A)(iii) and 1919(g)(2)(A)(iii). Under the agreement, the State agency agrees to carry out the provisions of sections 1864, 1874, and related provisions of the Act.

[7] 42 CFR § 488.308(c). The State agency generally conducts full comprehensive surveys every 12 to 15 months and will follow up on deficiencies either through a site visit or documentation submission depending on the nature and severity of the deficiency. For 8 of the 20 nursing homes we visited, the State agency conducted its 3 most recent comprehensive surveys no more frequently than every 12 to 15 months.

[8] We defined high-risk deficiencies as those that had potential for more than minimal harm.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002344

Appendix A contains the details of our audit scope and methodology.

FINDINGS

The State agency did not ensure that selected nursing homes in Florida that participated in the Medicare or Medicaid programs complied with CMS and State requirements for life safety and emergency preparedness. During our site visits, we identified deficiencies in areas related to life safety and emergency preparedness at all 20 nursing homes that we reviewed:

- We found 100 instances of noncompliance with life safety requirements related to building exits, smoke barriers,[9] fire detection and suppression systems, hazardous storage areas, smoking policies and fire drills, and electrical equipment power cords.

- We found 87 instances of noncompliance with emergency preparedness requirements related to written emergency plans, emergency supplies and power, plans for sheltering in place and tracking residents and staff during and after an emergency, emergency communications plans, and emergency plan training and testing.

In addition, 4 of the 20 nursing homes had not fully complied with State requirements related to the review and approval of their State emergency plans, and 14 nursing homes had not yet met State supplemental emergency plan generator requirements. Finally, the State agency could improve its collaboration with county emergency management agencies.

As a result, nursing home residents at the 20 nursing homes were at increased risk of injury or death during a fire or other emergency.

The identified deficiencies occurred because nursing homes had inadequate management oversight and had high staff turnover. In addition, the State agency did not have a standard life safety training program for all nursing home staff (not currently required by CMS) and generally performed comprehensive life safety surveys no more frequently than once every 12 to 15 months, even at these higher risk nursing homes.

Appendix C summarizes the instances of noncompliance that we identified at each nursing home.

SELECTED NURSING HOMES DID NOT COMPLY WITH LIFE SAFETY REQUIREMENTS

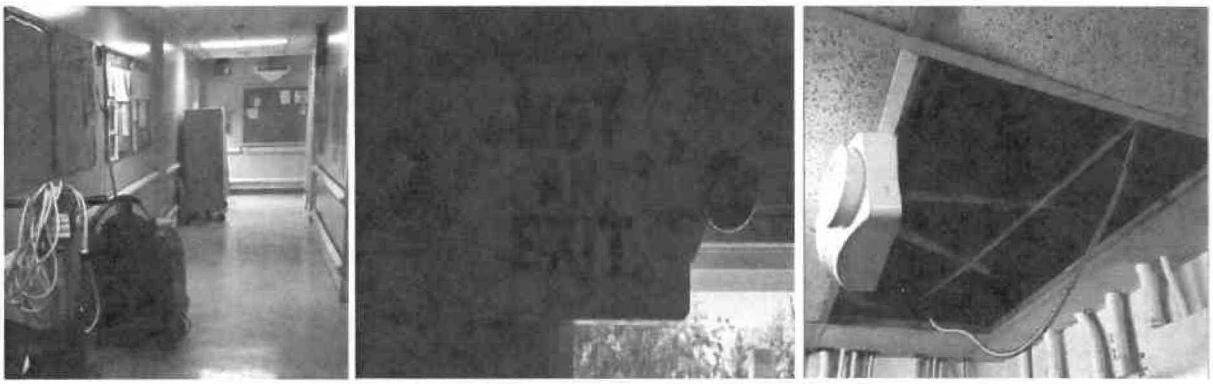
CMS's *Fire Safety Survey Report*, described above, lists the Federal regulations on life safety with which nursing homes must comply and references each with an identification number referred to as a "K-Tag."

[9] Smoke barriers restrict the movement of smoke and have a fire-resistance rating. Smoke partitions are designed to limit the movement of smoke and are not as substantial as smoke barriers. Smoke partitions may not have a fire-resistance rating.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002345

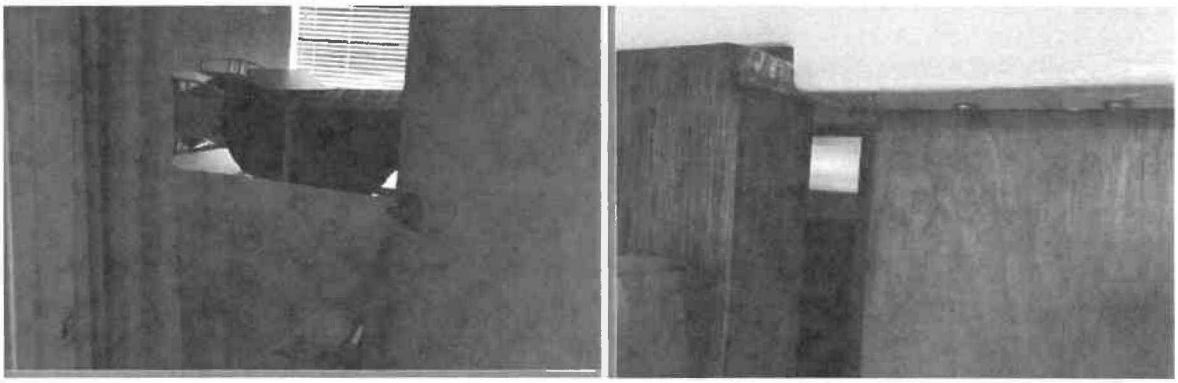
Building Exits and Smoke Barriers

In case of fire or emergency, nursing homes are required to have unobstructed exits that must be continuously maintained free of all obstructions to full use, self-closing doors in exit passageways that do not require tools or keys to open and are not manually propped open, illuminated exit signs, and sealed smoke and fire barriers. In addition, corridor doors are required to latch and should seal the room from smoke or fire (K-Tags 211, 222, 223, 293, 363, and 372).



Of the 20 nursing homes we visited, 16 had 1 or more deficiencies related to building exits and fire barriers.[10] Specifically:

- 15 nursing homes had patient sleeping room doors that were impeded from closing, would not latch, or did not fully seal;
- 7 nursing homes had self-closing doors that were propped open or missing altogether;
- 5 nursing homes had a pathway leading to exit doors that was blocked or impeded.
- 3 nursing homes had areas, such as storage rooms and electrical closets, that were inaccessible in case of a fire;
- 3 nursing homes had non-illuminated exit signs; and
- 2 nursing homes had missing or damaged smoke and fire barriers, including broken ceiling tiles and openings that could contribute to the spread of smoke and fire.



The photographs on the next page show some of the deficiencies we identified during our site visits.

[10] Among the 16 nursing homes, 35 deficiencies related to building exits and fire barriers.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002346

Photograph 1 (*left*): An emergency exit pathway was impeded.
Photograph 2 (*center*): An illuminated exit sign was covered by paper indicating that it was not an exit.
Photograph 3 (*right*): A missing ceiling tile resulted in no smoke or fire barrier.

Photograph 4 (*left*): A patient's bed blocked a room door from closing.
Photograph 5 (*right*): A patient's room door did not shut.

Fire Detection and Suppression Systems

Nursing homes are required to have sprinkler systems that must be installed, inspected, and maintained in accordance with NFPA requirements. Nursing homes must also evacuate or have fire watch procedures for times when the fire alarm or sprinkler system is out of service, and portable fire extinguishers must be inspected monthly. Smoke detectors are required in spaces open to corridors and other areas (K-Tags 346, 347, 351, 353–355).

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002347

Of the 20 nursing homes we visited, 14 had 1 or more deficiencies related to their fire detection and suppression systems.[11] Specifically:

- 10 nursing homes had sprinkler system heads that were blocked or obstructed,
- 8 nursing homes failed to inspect their portable fire extinguishers monthly (see photograph below),
- 3 nursing homes had inadequate policies and procedures for fire watches,[12]
- 2 nursing homes failed to have their sprinkler system tested and maintained, and
- 1 nursing home failed to place a battery in a smoke detector.

The photographs below show some of the deficiencies we identified during our site visits.

Photograph 6 (*left*): A fire extinguisher lacked documentation of any monthly inspections. Photograph 7 (*right*): A laundry room smoke detector had no battery installed.

Hazardous Storage Areas

In hazardous storage areas, nursing homes must store hazardous chemicals in a safe manner. In addition, nursing homes must maintain and inspect oxygen systems, install signs or placards in rooms with oxygen cylinders that include a sign indicating that the room is used for oxygen storage, post a no-smoking sign, and separately label storage spaces for full and empty cylinders. Furthermore, nursing homes must store oxygen cylinders in a safe manner so as not

[11] Among the 14 nursing homes, 24 deficiencies related to fire detection and suppression systems.

[12] When fire alarms or sprinkler systems are out of service, individuals are assigned areas to patrol to watch for fire or smoke until the systems are back in service. If a fire watch is not done, the building must be evacuated.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002348

to damage or tip over the cylinders, which could cause a dangerous pressurized oxygen release. Finally, alcohol-based hand rub dispensers must be installed in a manner that adequately protects against inappropriate access (K-Tags 321, 325, 905, and 923).

Of the 20 nursing homes we visited, 11 had 1 or more deficiencies related to hazardous storage areas.[13] Specifically:

- seven nursing homes had oxygen cylinders stored in an unsecure manner or in rooms that were improperly placarded,
- three nursing homes had gasoline cans that were not stored in approved flammable storage cabinets,
- two nursing homes failed to lock their alcohol-based hand rub dispensers, and
- one nursing home failed to properly identify and label its gas and vacuum piped system.

The photographs below show some of the deficiencies we identified during our site visits.

Photograph 10 (*left*): Unsecured filled gasoline can was stored next to a generator. Photograph 11 (*center*): Oxygen cylinders were not labeled and not stored safely. Photograph 12 (*right*): An alcohol-based hand rub dispenser was unlocked.

[13] Among the 11 nursing homes, 13 deficiencies related to hazardous storage.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002349

Smoking Policies and Fire Drills

Nursing homes are required to establish smoking policies for residents and staff. Smoking is permitted only in authorized areas where ash receptacles are provided. Furthermore, signs must identify no-smoking areas. Nursing homes are also required to conduct fire drills each calendar quarter that cover each work shift. Participation by staff members is required, and the drills must be planned and conducted by a qualified individual designated by the nursing home. The drills may be announced or unannounced and must include the transmission of a fire alarm signal and simulation of emergency fire conditions (K-Tags 712 and 741).

Of the 20 nursing homes we visited, 12 had 1 or more deficiencies related to smoking policies or fire drills.[14] Specifically:

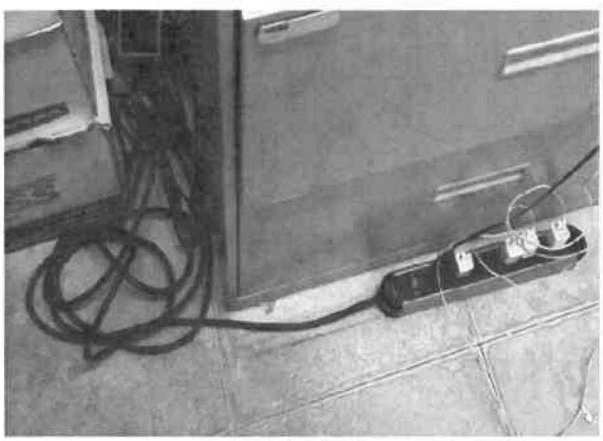
- 12 nursing homes were not following their smoking policies, such as banning smoking except in allowable marked areas, and

- 2 nursing homes did not ensure that fire drills were conducted each quarter covering all work shifts.

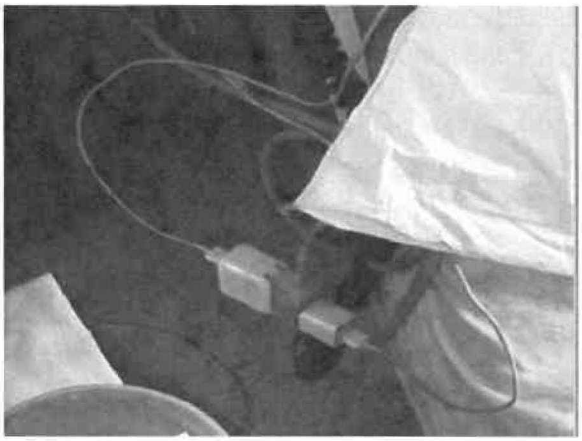
The photographs below show some of the deficiencies we identified during our site visits.

Photograph 13 (*left*): Cigarette butts (*circled*) were found in a designated no-smoking area.
Photograph 14 (*right*): More cigarette butts were found in a no-smoking area.

Electrical Equipment



If a nursing home uses power strips or extension cords, they must meet Underwriters Laboratories (UL) requirements and be used in a safe manner; they cannot be attached to other power strips. Extension cords can be used temporarily but must be removed immediately after use (K-Tag 920).



[14] Among the 12 nursing homes, 14 deficiencies related to smoking policies and fire drills.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002350

Of the 20 nursing homes we visited, 14 had 1 or more deficiencies related to electrical equipment power cords.[15] All 14 nursing homes used power strips that did not meet UL requirements. Specifically, the power strips were unsafely connected to appliances or other power strips, or extension cords were used to replace fixed wiring.

The photographs below show some of the deficiencies we identified during our site visits.

Photograph 15 (*left*): One power strip was daisy-chained with another power strip. Photograph 16 (*right*): A non-UL-approved extension cord was being used in an unsafe manner.

SELECTED NURSING HOMES DID NOT COMPLY WITH EMERGENCY PREPAREDNESS REQUIREMENTS

CMS's *Emergency Preparedness Surveyor Checklist*, described earlier, lists the Federal regulations on emergency preparedness that nursing homes must comply with and references each with an identification number referred to as an "E-Tag."

Emergency Plan

Nursing homes are required to have an emergency plan in place, and the plan must be easily located. Nursing homes are also required to update the plan at least annually; include a facility and community all-hazards risk assessment; address emergency events and resident population needs; include a continuity of operations plan; and address coordination with Federal, State, and local government emergency management officials (E-Tags 0001, 0004, 0006, 0007, and 0009).

[15] Among the 14 nursing homes, 14 deficiencies related to electrical equipment power cords.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002351

Of the 20 nursing homes we visited, 7 had 1 or more deficiencies related to their emergency plan.[16] Specifically:

- five did not include a facility and community all-hazards risk assessment in their plans,
- five did not address emergency events,
- three did not update their emergency plans annually,
- three did not address resident population needs,
- two did not have an official plan in place,
- one did not include a succession plan, and
- one did not provide for coordination with all government emergency management officials.

Emergency Supplies and Power

Nursing homes must have an emergency plan that addresses emergency supplies and power, and nursing homes are required to have adequate supplies of emergency food, water, and pharmaceuticals readily available. (As a best practice, the Federal Emergency Management Agency (FEMA) considers 3 days of emergency supplies to be sufficient.)[17] Nursing homes are also required to provide an alternate source of energy (usually a generator) to maintain temperatures to protect residents' health and safety, as well as for food storage, emergency lighting, fire protection, and sewage disposal (if applicable). Further, facilities must establish policies and procedures that determine how required heating and cooling of their facility will be maintained during an emergency situation, if there were a loss of the primary power source. Nursing homes that have generators must have them installed in a safe location and are required to perform weekly maintenance checks, monthly load tests, and annual fuel quality tests (if the generator operates on diesel fuel). Generators that operate on diesel fuel or propane gas are generally designed with a minimum fuel tank capacity to last for 3 days at half load, which factors in an emergency fuel stock and lead time for refueling with time built in for unanticipated delays. Nursing homes should also have a plan in place to keep generators

[16] Among the 7 nursing homes, 20 deficiencies related to emergency plan requirements.

[17] The 3-day standard is a best-practice recommendation, as CMS does not have a specific standard regarding what constitutes a sufficient amount of emergency supplies to have on hand. We did not audit compliance to this standard. Rather, our findings regarding a sufficient amount of generator fuel or other emergency supplies are based on a totality of the applicable criteria.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002352

fueled "as necessary" and an evacuation plan if emergency power is lost (E-Tags 0015 and 0041).

Of the 20 nursing homes we visited, 7 had 1 or more deficiencies related to emergency supplies and power.[18] Specifically:

- four had not properly tested and maintained their generators;
- three did not have sufficient generator fuel on hand to last 3 days, or sufficient plans to obtain emergency fuel or evacuate the nursing home when fuel levels reached a specified low level;
- one did not adequately address the availability of emergency supplies in its emergency plan; and
- one did not have sufficient water on hand (FEMA recommends 1 gallon per person, per day, for 3 days).[19]

Plans for Sheltering in Place and Tracking Residents and Staff During and After an Emergency

Nursing homes are required to have a plan for sheltering in place and tracking residents and staff during and after an emergency. Nursing homes must also have a plan for transferring medical records, using volunteers, and transferring residents, and procedures for waivers when providing care at alternate sites during emergencies (E-Tags 0018, 0022–0026, 0033).

Of the 20 nursing homes we visited, 9 had 1 or more deficiencies related to their emergency plans for sheltering in place and tracking residents and staff during and after emergencies.[20] Specifically:

- five did not address obtaining waivers when providing care at alternate sites during emergencies,
- three did not address sheltering in place,
- three did not address transferring medical records,
- three did not address using volunteers,

[18] Among the 7 nursing homes, 9 deficiencies related to emergency supplies and power.

[19] As noted earlier, this 3-day standard is a best-practice recommendation, as CMS does not have a specific standard regarding what constitutes a sufficient amount of water to have on hand.

[20] Among the 9 nursing homes, 17 deficiencies related to plans for evacuations, sheltering in place, and tracking residents and staff during an emergency.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002353

- two did not address tracking residents and staff, and
- one did not address transferring residents during disasters.

Emergency Communications Plan

Nursing homes are required to have a communications plan that includes names and contact information for staff, entities providing services, residents' physicians, other nearby nursing homes, government emergency management offices, and the State agency, among others. The plan must be updated at least annually. Nursing homes are also required to have primary and alternate means of communication, such as cell phones or radios; a means to communicate residents' condition information and location in the event of an evacuation; and methods to share emergency plan information with residents and their families (E-Tags 0029–0032, 0034, 0035).

Of the 20 nursing homes we visited, 11 had 1 or more deficiencies related to the adequacy of the emergency communications plans.[21] Specifically:

- 10 did not have required name and contact information,
- 4 did not have procedures for recording resident condition and location information,
- 2 did not update their plans annually,
- 2 had insufficient alternate means of communication,
- 2 did not have procedures for sharing emergency plan information with residents and their families, and
- 1 did not have an official emergency communications plan.

Emergency Plan Training

Nursing homes are required to have a training and testing program related to their emergency plan and to provide updated training annually. Initial training must be provided to new staff members, independent contractors (e.g., contracted cleaning staff), and volunteers. The training, as well as annual refresher training required for all staff, must be designed to demonstrate knowledge of emergency procedures and must be documented. Nursing homes

[21] Among the 11 nursing homes, 21 deficiencies related to emergency communications.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002354

must also conduct an annual community-based, full-scale testing exercise.[22] In addition, a second training exercise (full-scale testing exercise, facility-based exercise, or "tabletop" exercise) must be completed annually. An analysis of all training exercises (and actual events) must be completed and documented and the emergency plan revised, if necessary (E-Tags 0036, 0037, 0039).

Of the 20 nursing homes we visited, 8 had 1 or more deficiencies related to emergency plan training.[23] Specifically:

- six did not conduct annual full-scale training exercises,
- four did not conduct a second training exercise,
- three did not conduct analyses of their training exercises,
- three did not document that they provided initial training,
- two did not have training and testing programs,
- one did not update its training plan annually, and
- one did not provide annual training.

STATE AGENCY MONITORING, OVERSIGHT, AND COLLABORATION ON STATE EMERGENCY PREPAREDNESS REQUIREMENTS

Of the 20 nursing homes in our sample, 4 did not have an approved State emergency plan. All 20 either had an emergency generator in place or were planning to install a new generator and were operating under an approved extension to their supplemental emergency plan. Furthermore, county emergency management agencies reported several challenges in meeting their responsibilities for ensuring the safety and well-being of nursing home residents.

Nursing homes are required to comply with all applicable Federal, State, and local emergency preparedness requirements (42 CFR § 483.73). Florida's State emergency plan and supplemental emergency plan requirements, described earlier, list the State requirements on emergency preparedness and emergency power with which nursing homes must comply. The State agency requires county emergency management agencies to review and approve a

[22] The exercise can be facility-based if a community-based exercise is not possible. Furthermore, nursing homes are exempt from this requirement if they activated their emergency plan during the year.

[23] Among the 8 nursing homes, 20 deficiencies related to emergency plan training.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002355

nursing home's State emergency plan and supplemental emergency plan.[24] In addition, county emergency management agencies are responsible for performing emergency management functions within their county,[25] including the coordination and execution of a nursing home's State emergency plan in an actual emergency or natural disaster.

State Emergency Plan Monitoring

Four nursing homes did not have an approved State emergency plan because they failed to submit their State emergency plan to their county emergency management agency for review and approval before their previous plan expired. The nursing homes are responsible for providing their updated State emergency plans to their county emergency management agencies for review and approval before their current plan expires. Although the State agency verifies during its annual survey whether the State emergency plan is current and has been approved by the county emergency management agency, it does not track when a nursing home's State emergency plan is expiring or whether the State emergency plan has been reviewed by the county emergency management agency. Without a current State emergency plan, these nursing homes are exposing patients to increased risk of injury or death during an emergency or natural disaster.

State Supplemental Emergency Plan Oversight

All 20 of the nursing homes in our sample either had an emergency generator in place or were planning to install a new one, in accordance with their supplemental emergency plan. However, staff at 14 nursing homes indicated that a shortage of available generators combined with the engineering requirements to install a new generator to power the entire heating and cooling system required significant lead time. According to nursing home staff, shortages and engineering requirements have led to delays in receiving and installing generators to satisfy Florida supplemental emergency plan requirements. These 14 nursing homes were aware of the deadlines for their supplemental emergency plans and have been in contact with the State. After our fieldwork, the State agency granted each of these nursing homes a variance that allowed more time to comply with the supplemental emergency plan requirements. Until these 14 nursing homes install new generators, their residents will remain at increased risk in the event of a power failure.

State and County Emergency Management Collaboration

The State agency requires all nursing homes to submit and obtain approval of their State emergency plans and supplemental emergency plans through their county emergency

[24] Florida Statute 400.23(2)(g) and Florida Administrative Code 59A-4.1265.

[25] Florida Statute 252.38(1)(c).

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002356

management agencies.[26] These county emergency management agencies described several challenges to ensuring that the emergency plans are reviewed and approved without unnecessary delay.[27] Specifically, county emergency management agencies said that the State agency:

- did not provide the county any additional resources to review and approve every nursing home's State emergency plan yearly when the statute requiring approval by county emergency management agencies went into effect;

- had not developed an effective tracking system to assist in identifying delinquent or nonexistent submissions;

- had not provided enough guidance on completing its review of the nursing homes' State emergency plans;

- provided guidance that requires the county emergency management agency to verify only State emergency plan requirements, which did not include all Federal requirements detailed in the Federal regulations on emergency preparedness (42 CFR § 483.73);

- did not provide to nursing homes the results of surveyors' work on their emergency management plans to make them aware of vulnerabilities; and

- had granted new licenses to nursing homes before the county emergency management agency completed its review and approval of their supplemental emergency plans.

In addition to the challenges of reviewing and approving emergency plans, county emergency management agencies discussed broader concerns regarding the extent of their responsibility. For example, various county emergency management agencies stated the following:

- One agency did not have the engineering and electrical expertise or resources to properly validate a supplemental emergency plan. The agency stated that it did not know what the county emergency management agency's responsibility was for obtaining this expertise.

- One agency indicated that all nursing homes were using the same transportation company. If these nursing homes needed to be evacuated at the same time, the transportation company would not be able to meet the combined demand. The agency

[26] We visited 20 nursing homes in 7 counties.

[27] The emergency management agency shall complete its emergency plan review within 60 days and either approve the plan or advise the facility of necessary revisions (Florida Statute 400.23(2)(g)). Nursing homes licensed prior to the effective date of the supplemental emergency plan rules must submit their supplemental emergency plans within 30 days of the effective date of the rule (June 1, 2018). All newly licensed nursing homes must submit their plans for review and approval prior to obtaining a license (FAC 59A-4.1265(2)(a) and (b)).

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002357

stated that it did not know what the county emergency management agency's responsibility was for resolving this potential risk or for notifying the State agency.

- One county agency said that several nursing homes planned to evacuate to the same location. If these nursing homes all evacuated at the same time to the same nursing home, the receiving nursing home would not have the capacity to accommodate every evacuated resident. The agency stated that it did not know what the county emergency management agency's responsibility was for ensuring that the receiving nursing home can accommodate these patients or for notifying the State agency of this concern.

CONCLUSION

At the conclusion of our inspections, we shared the deficiencies we identified with nursing home management and staff so that they could take immediate corrective action. We also immediately shared the identified deficiencies with the State agency and CMS for followup, as appropriate. In addition, we discussed with the State agency the issues identified by the county emergency management agencies involving emergency preparedness oversight.
Although nursing home management and staff are ultimately responsible for ensuring resident safety, we maintain that the State agency can reduce the risk of resident injury or death by improving its oversight. For example, the State agency could conduct more frequent site surveys at nursing homes to follow up on deficiencies previously cited.

While conducting our onsite inspections, we found that there was frequent turnover of nursing home management and staff. In addition, although not required by CMS, the State agency did not have a standard life safety training program for all nursing home staff that management could use to educate newly hired staff on how to comply with CMS requirements for life safety. For example, there was no standardized training program to teach newly hired maintenance staff about fire extinguisher inspections, fire alarm and sprinkler maintenance, the proper way to conduct and document fire drills, or how to test and maintain electrical equipment. The State agency could explain CMS requirements for life safety and emergency preparedness to nursing homes by providing standardized life safety training.[28]

Furthermore, the State agency could improve its coordination with county emergency management agencies so that the State agency is in a better position to ensure nursing home compliance with both CMS and State requirements. We are also concerned that the State

[28] Although CMS does not specifically require this type of comprehensive life safety training, under the State agency's section 1864 agreement with CMS (described on page 3), the State agency agreed to perform certain functions, including explaining Federal requirements to providers to enable them to maintain standards of healthcare consistent with Medicare and Medicaid participation requirements (CMS *State Operations Manual* § 1010). Also, as mandated by §§ 1819(g)(1)(B) and 1919(g)(1)(B) of the Act, States must conduct periodic educational programs for the staff and residents of nursing homes to present current regulations, procedures, and policies.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002358

agency is not providing enough oversight or resources to ensure that nursing home residents are protected to the extent possible.

RECOMMENDATIONS

We recommend that the Florida Agency for Health Care Administration:

- follow up with the 20 nursing homes to ensure corrective actions have been taken regarding the life safety and emergency preparedness deficiencies identified in this report;
- work with CMS to develop standardized life safety training for nursing home staff;
- conduct more frequent surveys at nursing homes with a history of multiple high-risk deficiencies and follow up to ensure that corrective actions have been taken;
- provide additional training to nursing homes to ensure that their State emergency plan is submitted and approved without delay;
- continue to follow up with nursing homes to ensure that they implement their supplemental emergency plans;
- work with county emergency management agencies to develop a process to monitor the submission and approval of State emergency plans and supplemental emergency plans;
- expand State agency guidance to include all Federal emergency preparedness requirements in addition to the State emergency plan requirements; and
- increase communication and collaboration with the county emergency management agencies to:
    - clarify roles and responsibilities;
    - make them aware of pending, or newly licensed, nursing homes in their counties;
    - identify areas where additional expertise may be needed to ensure that nursing homes meet CMS and State requirements and to ensure the safety of nursing home residents; and
    - provide county emergency management agencies with survey results, to the extent possible, from individual nursing homes to identify specific vulnerabilities.

STATE AGENCY COMMENTS AND OFFICE OF INSPECTOR GENERAL RESPONSE

STATE AGENCY COMMENTS

In written comments on our draft report, the State agency agreed with our first and fifth recommendations and partially agreed with our seventh recommendation. The State agency did not agree with our remaining recommendations. In addition, the State agency provided general comments and expressed concerns about our three findings and outlined additional steps it has taken.

State Agency Comments on Recommendations

The State agency did not concur with the following recommendations:

- For the second recommendation, the State agency indicated that there was an abundant amount of training in the public domain for providers regarding the Federal requirements.

- For the third recommendation, the State agency indicated it is funded and takes direction from CMS, and if OIG believes there is an opportunity for improvement with funding allocation and the survey prioritization process, this recommendation should be directed at the Federal Government.

- For the fourth recommendation, the State agency indicated that the State emergency plan was approved by the local authority having jurisdiction, and each local authority had its own perspective on plan approval.

- For the sixth recommendation, the State agency indicated training has already been provided.

- For the eighth recommendation, the State agency indicated the roles of the State agency and the counties are clearly defined, and the county emergency management offices have no authority related to CMS requirements. In addition, according to State agency officials, the State agency has had extensive communication and collaboration with county emergency management agencies through State-provided training, conferences, or actual emergency events. Lastly, the State agency said that it was unfair to allege that it was deficient on the basis of discussions held with county emergency agency staff when no representative of the State agency was present for those discussions.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002360

State Agency Comments on Findings

The State agency provided general comments on each of our three findings and raised the following concerns:

- The title of our report suggests that either the State agency should conduct more frequent reviews, or its current oversight is lacking.

- The audit team did not have the same qualifications as the State agency staff who conduct nursing home life safety surveys.

- The audit team did not necessarily obtain the same level of evidence during its site visits as qualified life safety surveyors use to determine facility compliance, provide enough detail on the deficiencies identified, or accurately report the number of deficiencies identified.

- The audit team inaccurately reported deficiencies related to self-closing doors, sprinkler heads, resident call systems, gas storage cans, and gas and vacuum piped systems.

State Agency Actions Taken

In its comments, the State agency described steps it has taken or plans to take to address our findings and recommendations, including:

- the continued monitoring of the efficacy of the State's survey processes and the provision of ongoing training and feedback to staff to ensure appropriate review of the implementation of Federal regulations related to emergency preparedness;

- the implementation of a new Quality Assurance plan, related to survey results, that includes requirements that certain staff will review Federal Emergency Preparedness findings and that training will address any concerns with trends; and

- proposing amendments to the Florida Administrative Code Rule regarding emergency plans to update the State emergency preparedness requirements to better align with the new Federal regulations, thereby providing better guidance to county emergency management officials.

OFFICE OF INSPECTOR GENERAL RESPONSE

After reviewing the State agency's comments, we modified our first finding to remove deficiencies related to resident call systems and to more clearly summarize the number of deficiencies at each nursing home. We maintain that our findings and recommendations, as revised, are correct.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002361

OIG Response to State Agency Comments on Recommendations

Regarding the development of life safety and State emergency plan training for nursing home staff,[29] we understand that training on Federal requirements is available for providers in the public domain. However, the State agency has not developed Florida-specific training that is required for nursing home staff. In addition, although joint training sessions, life safety presentations, and conferences have been provided throughout the State, attendance is not mandatory or tracked. Our audit found that many staff members have never been to a training session or conference related to life safety or emergency preparedness requirements.

As we stated in our third recommendation, the State agency should conduct more frequent surveys at high-risk facilities. The State agency acknowledges that it had not yet reviewed compliance for emergency preparedness at most of the nursing homes because the regulations only recently went into effect. The emergency preparedness rules were effective November 16, 2016, with an implementation date of November 17, 2017. We performed our site visits from July through November 2018, which was 8 months to a year after the rule was implemented. These regulations had been in effect for over 20 months at the start of our audit.

Our fourth recommendation is intended to encourage the State agency to take affirmative steps to ensure nursing home staff are knowledgeable about their life safety and emergency preparedness responsibilities.[30] We believe it is the State agency's responsibility to provide training throughout Florida to ensure compliance with Federal and State requirements and not to rely on local authorities to provide that training. Therefore, we maintain this recommendation is accurate.

Our sixth recommendation encourages the State agency to develop a process to monitor the submission and approval of State emergency plans and supplemental emergency plans. The State agency did not directly respond to this recommendation, but instead described training efforts previously undertaken. We reiterate that a process to monitor the submission and approval of emergency plans would potentially detect instances of delinquent or nonexistent plans and ensure that nursing home residents are protected to the greatest extent possible.

Our eighth recommendation is for increased communication and collaboration among all parties that play a crucial role in emergency planning and response. As we discussed with the State agency, one of the reasons for this audit was to address Congressional interest in the effectiveness of communication among county, State, and Federal authorities. Accordingly, our audit steps included discussions with all parties critical to emergency planning and response to identify potential weaknesses and areas for improvement. As reflected in our report, county

[29] Recommendations 2 and 4.

[30] Although the State agency did not concur with our fourth recommendation, it did note significant steps it is taking to amend the Florida Administrative Code. This was initiated to update the State emergency preparedness requirements to better align with the new Federal regulations, thereby providing better guidance to county emergency management officials in their reviews of the plans.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002362

emergency management agencies expressed concerns about some areas of communication related to their roles and responsibilities, or suggested areas for improvement. Although we are not suggesting a compliance failure on the part of the State agency with this recommendation, we maintain that the State agency could improve the effectiveness of its oversight, and this remains a valid recommendation.

OIG Response to State Agency Concerns and Comments on Findings

The title of our report accurately summarizes our opinion based on the evidence obtained during our audit. Specifically, we believe Florida should improve its oversight of selected nursing homes' compliance with Federal requirements for life safety and emergency preparedness.

Regarding the qualifications of the auditors performing the survey work, we conducted a performance audit in accordance with generally accepted government auditing standards. Such audits cover a wide range of topics and require the audit team to have a "general knowledge of the environment in which the audited entity operates and the subject matter." The audit team met the requirements as set forth in the auditing standards. In addition, the lead auditor, who designed these audits, is certified by the National Board on Fire Service Professional Qualifications as a Fire Fighter, Fire Instructor, Fire Officer, and Safety Officer. While this individual did not perform the audit in Florida, he developed our audit guide and provided guidance when needed. Finally, we were escorted during our first review by the State's life safety lead. This individual escorted us through our life safety review and noted what the State would observe for the various tags we were reviewing. Our reviews were not intended to be a replacement for State agency surveys, or a complete survey of each facility under State survey standards. Rather, we reviewed a limited number of K- and E-Tags for compliance with Federal regulations. Therefore, we maintain that the audit team was well qualified to conduct this audit.

Regarding the conduct of our review:

- As noted in the "Methodology" section of our report, as part of our audit we met with CMS program officials, State survey agency officials, and key personnel at each nursing home surveyed. For life safety violations, we obtained photographic evidence and concurrence from the nursing home administrators and facility managers who accompanied us during all site visits. At the conclusion of each site visit, we discussed our findings with the nursing home staff and offered them the opportunity to agree with or dispute our findings. We believe the evidence obtained provides a reasonable basis for our findings and recommendations as stated.

- Regarding the detail contained in our checklists, we provided all checklists to the State agency after we completed a site visit. In addition, we held multiple meetings with the State agency to discuss all documented findings and to provide any additional evidence

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002363

needed to verify our findings. At no point during these meetings were any of our findings disputed.

- The State agency is correct in its comments that the number of deficiencies reported in our draft report did not clearly summarize the count of deficiencies. We revised our count of deficiencies at each nursing home to count numerous occurrences of a single instance of noncompliance as one deficiency rather than counting each instance separately. We updated our findings accordingly.

In response to the State agency's comments about inaccurately reported deficiencies, we have revised our findings related to self-closing doors where applicable and removed findings related to resident call systems. In addition, we have revised our language regarding sprinkler heads, gas storage cans, and gas and vacuum piped systems to clearly indicate the deficiencies identified. Regarding the remaining deficiencies, we met with the State agency on numerous occasions to discuss these items as well as to provide any photographic evidence needed to verify our findings. In addition, on the basis of our exit conferences with responsible staff at all nursing homes we visited, no findings were ever disputed as inaccurate. We maintain that our findings, as revised, are correct.

The State agency's comments are included in their entirety as Appendix D.

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002364

APPENDIX A: AUDIT SCOPE AND METHODOLOGY

SCOPE

As of November 2017, approximately 700 nursing homes in Florida participated in the Medicare or Medicaid programs. Of these 700 nursing homes, we selected a nonstatistical sample of 20 nursing homes for our audit based on risk factors, including multiple high-risk deficiencies the State agency reported to CMS's ASPEN system.

We did not assess the State agency's or nursing homes' overall internal control structures. Rather, we limited our audit of internal controls to those applicable to our audit objective.

We performed our fieldwork at the State agency's offices in Tallahassee, Florida, and conducted unannounced site visits at the 20 nursing homes throughout Florida from July through November 2018.

METHODOLOGY

To accomplish our objective, we:

- reviewed applicable Federal and State requirements;
- held discussions with CMS and State agency officials to gain an understanding of the process for conducting nursing home life safety and emergency preparedness surveys;
- obtained from CMS a list of all 700 active nursing homes in Florida that participated in the Medicare or Medicaid programs as of November 2017;
- compared the list provided by CMS with the State agency *Directory of Nursing Homes* to verify completeness and accuracy;
- obtained from CMS's ASPEN system a list of 187 nursing homes that had more than 1 deficiency in the previous 3 years that were considered high risk as follows: (1) widespread and had the potential for more than minimal harm, (2) potential for actual harm, or (3) immediate jeopardy to resident life and safety;
- from the 187 nursing homes identified in ASPEN, selected 20 nursing homes for onsite inspection (all nursing homes had multiple high-risk deficiencies, and 13 had deficiencies related to sprinkler system coverage) and, for each:
    - reviewed the deficiency reports prepared by the State agency for the nursing home's 3 most recent surveys and

AMERICAN OVERSIGHT
FL-AHCA-20-0902-A-002365

- conducted unannounced onsite inspections to check for life safety violations and review the emergency preparedness plans;

- held discussions with the county emergency management agencies with oversight responsibilities over the 20 nursing homes in our sample; and

- discussed the results of our inspections with nursing home, State agency, and CMS officials.

We conducted this performance audit in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives.

Agency for Health Care Administration
Response to HHS/OIG Draft Report A-04-18-08065 dated August 2019
Florida Should Improve Its Oversight of Selected Nursing Homes' Compliance With Federal Requirements for Life Safety and Emergency Preparedness

---

Summary of Findings

Florida did not ensure that selected nursing homes that participated in the Medicare or Medicaid programs complied with CMS and State requirements for life safety and emergency preparedness. All 20 nursing homes that we visited had deficiencies in areas related to life safety and emergency preparedness.

State Agency (SSA) response

Staff of the Florida State Survey Agency (SSA) have reviewed the draft report entitled "Florida Should Improve its Oversight of Selected Nursing Homes' Compliance with Federal Requirements for Life Safety and Emergency Preparedness". Although we appreciate the professionalism of the staff of the Office of the Inspector General, we have concerns regarding the title of the report, and the qualifications of the auditors to evaluate the nursing home life safety survey process given their limited knowledge of the survey process.

Title of Document

The title "Florida Should Improve its Oversight of Selected Nursing Homes' Compliance with Federal Requirements for Life Safety and Emergency Preparedness" suggests that either the SSA should conduct more frequent reviews which would require federal direction and funding, or the current oversight is lacking. Based on the points made in our responses, we do not believe the SSA missed significant findings during its review of these nursing homes. Rather, many of the findings could happen at any time after a satisfactory review. In other cases, the SSA had not yet reviewed compliance at most of the nursing homes for emergency preparedness since the regulations only recently went into effect.

Qualifications

SSA life safety surveyors are required to have related experience prior to hire and are certified fire inspectors. To be certified as a Fire Safety Inspector I in the State of Florida, an individual must successfully complete a minimum of 200 hours of basic certification training for Fire Safety Inspectors, or have received equivalent training in another state, and pass a state written examination.

CMS requires all Fire Safety Inspectors to complete the NFPA 99 Health Care Facilities Code Course within 12 months of being hired. Our life safety surveyors must also complete the following courses prior to independently completing a nursing home life safety inspection:

AMERICAN OVERSIGHT

FL-AHCA-20-0902-A-002371

1. Basic Life Safety Code Training Online Course which provides basic knowledge of the LSC and associated CMS regulations, policy and knowledge on evaluating facilities for LSC compliance.
2. Basic Life Safety Code: The Survey Process.
3. Life Safety Code Transition Course which takes approximately 20 hours to complete. The course begins with a pre-test and concludes with a post-test that requires a passing score of 85 percent.
4. Orientation to Basic Life Safety Code.
5. Training on compliance with the Principles of Documentation for Life Safety Code.

Additionally, prior to independently completing a Federal Emergency Preparedness survey, SSA staff must complete the 16-hour Emergency Preparedness Basic Surveyor Training Course.

These courses are in addition to the extensive orientation program provided in Florida, including one on one coaching and classroom coursework. This coursework provides a unique skill set, including in-depth knowledge of the requirements and processes on critical thinking skills related to the life safety.

When we inquired about the qualifications of the auditors to conduct onsite compliance review, we learned the auditors did not have any of the education, experience, or training as the SSA staff who conduct nursing home life safety surveys and were working from a check list of criteria after reviewing the federal regulations.

Conduct of the Review

Although the report indicates "evidence obtained provides a reasonable basis" for findings, this is not necessarily the same level of evidence used to determine facility compliance, when assessed by qualified life safety surveyors, following guidance from the Centers for Medicare and Medicaid Services (CMS).

Comments within the report that certain requirements were not met, did not provide any detail of how the determination was made. The auditors also counted every occurrence and called it an area of non-compliance. For the purposes of CMS reporting, in a single facility, numerous occurrences of a single area of non-compliance (such as doors not latching) would be counted as findings for one deficiency rather than counting each separate instance observed separately. Thus, the results of the audit appear artificially inflated.

Also of note, is the audit timing. Many deficiencies observed may not have been present at the time of the most recent SSA survey. In 18 of the 20 cases, the facility life safety

AMERICAN OVERSIGHT

FL-AHCA-20-0902-A-002372

certification survey had been done months prior to the OIG audit, which explains the dissimilarities in observations.

Finding #1

Selected Nursing Homes Did Not Comply with Life Safety Requirements

Agency Response and Corrective Action Plan

A number of the areas of concern identified by the auditors may have been a result of timing. As noted, there was a significant time span between the SSA survey and the audit in 18 of the 20 facilities. The auditors used an abbreviated version of the fire safety survey report form to record their findings during a facility audit. Worksheets and procedures are designed to assist in the gathering information about the level of fire safety provided by the facility. The K-tags on the report form are referred to as data tags on the Fire Safety Survey Report form. For each item on the report form page indicates "Met" or "Not Met" or "Not Applicable." For each item marked "Not Met," you must enter the appropriate documentation in the Explanatory Remarks section explaining the nature of the deficiency and the degree of hazard it presents.

It appears the auditors did not follow the same procedures as the state agency is required to follow. The auditors counted each finding as a deficiency which inflated the number deficiencies they reported as noncompliance. An example is specific to K-221, the auditors identified 57 deficiencies in 15 facilities, however; the correct way would be15 facilities were identified to be out of compliance with K-221. Had the auditors followed the correct process for identification of non-compliance and principles of documentation as the SSA is required to follow the correct areas of non-compliance would have been 111-K-Tags and 69-E-Tags. However; per the draft report the auditors had 249 K-Tags and 106-E-Tags. This shows the auditors inflated their findings, which also supports the SSA's statement the auditors were not qualified.

Many of the observations have the potential to change at any time, even within a day. These would include patient sleeping doors (K0221), door self-closing devices (K0223), alcohol based hand rub dispensers (K0325), missing battery for smoke detector (K0347), smoking areas (K0741), clearance between storage and sprinkler heads (K351) and power cords (K0920).

Also of note, the auditor cited at least one double door with a self-closing device for not latching (K0223); the correct K Tag is K0222 for smoke doors that require latching. Double cross corridor doors are not required to latch. Also, there are exceptions in National Fire Protection Association (NFPA 13) Chapter 8 that will allow wall storage to be higher in relation to sprinkler heads. It is not clear how the auditors determined the distance. (Examples are in NFPA 13 section A.8.5.5.1.) OIG staff did not provide any

AMERICAN OVERSIGHT

FL-AHCA-20-0902-A-002373

photographic evidence or examples. The review cites items being 18 inches from ceiling but in the code the requirement is 18 inches from sprinkler deflector.

Furthermore, it was previously noted to the auditors that Per Appendix I (Survey Procedures for Life Safety Code Surveys) and CMS 2786R (Fire Safety Survey Report) do not address nurse call systems. In NFPA 99 Chapter 7 there are requirements for the nurse call system. CMS did not adopt this chapter for Life Safety (per Survey & Certification Letter 16-28-LSC). It seems inappropriate and invalid to note a SSA failed to inspect for a regulatory area under life safety when it is not a part of the life safety survey process, as adopted by the federal government. As with many of the findings, issues with a nurse call system can happen at any time after a satisfactory survey.

The auditors cited inappropriate gas storage for the cans outside of the facility near the generator. Auditors did not state if the cans contained fuel, which would pose a hazard. Gas may be stored outside in an approved dispensing container (gas can).

The auditors also cited one nursing home related to gas and vacuum piped systems. There was no documentation available to sufficiently explain the citation. The tag cited by the auditor is for a med-gas system; this facility does not have such a system. This observation appears to be related to the city gas line for the kitchen, which is not addressed in federal requirements, nor was it noted as a compliance issue for the city.

The SSA will review findings of the audit with field office managers, life safety staff and their supervisors. This will occur during the life safety staff and managers' meeting in October 2019, field office managers' meeting in December 2019, state life safety survey training meeting in March 2020, and upcoming routine life safety surveyor/ supervisor calls. The focus of the meetings will be the requirements identified as out of compliance.

Finding #2

Selected Nursing Homes Did Not Comply with Emergency Preparedness Requirements

Agency Response and Corrective Action Plan

Effective date of the Federal Emergency Preparedness Rule was November 16, 2016, with implementation date of November 17, 2017. A number of surveys were completed by the auditors prior to SSA review of compliance with Federal Emergency Preparedness. Therefore, our staff did not have an opportunity to review compliance with these regulations at the following facilities:

AMERICAN OVERSIGHT

FL-AHCA-20-0902-A-002374

1. Consulate Health Care of Tallahassee
2. Baya Pointe Nursing and Rehabilitation Center
3. Springs at Boca Ciega Bay
4. East Bay Rehabilitation Center
5. Coral Bay Healthcare and Rehabilitation Center
6. Jupiter Medical Center Pavilion Inc.
7. Laurelwood Nursing Center
8. Freedom Square Rehabilitation & Nursing Services
9. Manorcare Health Services of Dunedin

There were also facilities that had the SSA Federal Emergency Preparedness survey early on in the process, before a March 2018 life safety meeting wherein SSA quality assurance staff had already identified concerns with the survey process and completed additional training. These include:

1. Gardens of Port St. Lucie, The (11/15/2017)
2. Finnish-American Village (12/19/2017)
3. South Campus Care Center (1/26/2018)
4. Bay Center (2/22/2018)
5. Harbor Beach Nursing and Rehabilitation Center (2/28/2018)

The SSA will continue to monitor the efficacy of our survey processes and provide ongoing training and feedback to staff to ensure appropriate review of the implementation of federal regulations. The SSA will review findings of the audit with field office managers, life safety staff and their supervisors. This will occur during our meetings with life safety staff and managers in October 2019, all field office managers in a meeting December 2019 and upcoming routine life safety surveyor/supervisor calls. The focus of the meetings will be the requirements identified as out of compliance.

In addition, in July 2019 the Bureau of Field Operations implemented a new Quality Assurance (QA) plan related to survey results. This includes a requirement that quarterly designated staff will review Federal Emergency Preparedness findings. As needed, training will address any concerns with trends.

AMERICAN OVERSIGHT

FL-AHCA-20-0902-A-002375

Finding #3

State Agency Monitoring, Oversight, and Collaboration on State Emergency Preparedness Requirements

Agency Response and Corrective Action Plan

Regarding the OIG findings that four nursing homes did not have an approved State Emergency Management Plan, one of those noted by OIG had a plan, which expired after the SSA survey (Finnish-American) and another (Stratford Court of Palm Harbor) was cited by the SSA for that issue prior to the OIG audit. The two additional nursing homes, (Avante at Leesburg, and Jacaranda Manor) had submitted their State Emergency Management Plans prior to the SSA recertification surveys. Although the plans were submitted for local approval the plans were not approved at the time of the SSA survey. The SSA has verified that both these nursing homes have approved State Emergency Management Plans.

The SSA will continue to monitor the efficacy of our survey processes and provide ongoing training and feedback to staff to ensure appropriate implementation of federal regulations. The SSA will review findings of the audit with field office managers, life safety staff and their supervisors. This will occur during our meetings with life safety staff and managers in October 2019, all field office managers in a meeting December 2019 and upcoming routine life safety surveyor/ supervisor calls. The focus of the meetings will be the requirements identified as out of compliance.

Recommendation #1

Follow up with the 20 nursing homes in our sample to ensure that corrective actions have been taken regarding the life safety and emergency preparedness deficiencies identified in this report.

Agency Response and Corrective Action Plan

We concur with this recommendation. As of the date of this report, 16 of the facilities have had recertification surveys, which encompasses all life safety and emergency management requirements. The other four had monitoring surveys conducted which focused on the OIG findings, after receipt of this report. The SSA has verified correction of all issues identified in the report.

Kimberly.smoak@ahca.myflorida.com
850-412-4516

Recommendation #2

Work with CMS to develop life safety training for nursing home staff;

Agency Response and Corrective Action Plan

We do not concur with this recommendation. Regarding comments the SSA should enhance provider training, please note there is already an abundant amount of training in the public domain for providers regarding the federal requirements.

All of the above noted courses for surveyors are available for providers at the Centers for Medicare & Medicaid Services (CMS) Integrated Surveyor Training Website (ITSW) https://surveyortraining.cms.hhs.gov/index.aspx free of charge.

Additionally, CMS provides on ISTW *Emergency Preparedness: Provider Readiness* which provides an overview of the Emergency Preparedness Final Rule as well as an overview of the 1135 Waiver Process.

The US Department of Health & Human Services sponsors the website for ASPR (Assistant Secretary for Preparedness & Response) Tracie (Technical Resources, Assistance Center, and Information Exchange) https://asprtracie.hhs.gov/technical-resources which provides free training and technical resources regarding emergency preparedness and the Federal Emergency Preparedness requirements.

Additionally, staff of the Florida SSA provided four Joint Training sessions (open to providers, state emergency management staff and survey staff) in 2018 which addressed the top ten life safety deficiencies cited in Florida, State Emergency Management Plans, Federal Emergency Preparedness (two sessions were presented by staff of the CMS Regional Office-IV).

Florida SSA staff also offered two (day-long) life safety presentations for providers; one in November 2018 and one in December 2018. In May 2019, Florida SSA staff also participated in an (all day) training offered to providers in Orlando related to life safety and emergency preparation. Previously, our staff also offered Joint Training to providers throughout the entire state in 2014 related to the Top Ten Life Safety Deficiencies, Survey Issues, CMS Survey & Certification Memos and the Life Safety Waiver Process.

Staff of the SSA also provided training at the Governor's Hurricane Conference (which is a national meeting) on emergency preparedness in May 2018 and May 2019

AMERICAN OVERSIGHT

FL-AHCA-20-0902-A-002377

including participation in a focused May 2018 focused session of nursing home providers, associations and emergency managers from Florida counties. This conference was attended by Florida emergency management officials, including county emergency operations staff and provider representatives. In November 2019, our life safety staff will be conducting training at a six hour workshop for nursing home maintenance staff and training at a Fire Fighter and Fire Inspector workshop.

Agency Contact

Kimberly.smoak@ahca.myflorida.com
850-412-4516

Recommendation #3
Conduct more frequent surveys at nursing homes with a history of multiple high-risk deficiencies;

Agency Response and Corrective Action Plan
We do not concur with this recommendation. Although there is an appreciation of the recommendation, the SSA is funded through the federal government to do work as outlined in the Mission & Priority Document, which is updated annually with SSA contractual obligations. If the auditors believe this is an opportunity for improvement with the CMS funding allocation and survey prioritization process, this recommendation should be directed at the federal government, from which the SSA takes its direction.

Agency Contact
Kimberly Smoak, Chief of Field Operations/State Survey Agency Director
Kimberly.smoak@ahca.myflorida.com
850-412-4516

Recommendation #4
Provide additional training to nursing homes to ensure that their State emergency plan is submitted and approved without delay;

Agency Response and Corrective Action Plan
We do not concur with this recommendation. The state emergency plan is approved by the local authority having jurisdiction. Since there are 67 counties in Florida, there are 67 local authorities, all of whom may have their own perspective on plan approval. The nursing homes may not be licensed initially without an approved plan.

It is incumbent for the providers to work with their local authority to ensure they are in compliance with these requirements. The SSA staff are actively working on amending the Florida Administrative Code Rule regarding emergency plans. This was initiated to

AMERICAN OVERSIGHT

FL-AHCA-20-0902-A-002378

update the state emergency preparedness requirements to better align with the new federal regulations which will provide better guidance to county emergency management officials in their reviews of the plans.

Agency Contact

Kimberly Smoak, Chief of Field Operations/State Survey Agency Director
Kimberly.smoak@ahca.myflorida.com
850-412-4516

Recommendation #5

Continue to follow up with nursing homes to ensure that they implement their supplemental emergency plans;

Agency Response and Corrective Action Plan

We concur with this recommendation. The SSA has knowledge of the status of each nursing home in Florida and will continue to enforce these requirements within our legal authority. Of the 688 nursing homes with a current license as of September 30, 2019; 294 have a fully implemented permanent generator; 261 have a temporary generator onsite; 131 have a plan to have a temporary generator delivered in the event of an emergency, and 2 plan to evacuate for any power outage. The SSA will continue to monitor state rule requirements regarding nursing homes compliance with supplemental emergency plans.

Agency Contact

Kimberly Smoak, Chief of Field Operations/State Survey Agency Director
Kimberly.smoak@ahca.myflorida.com
850-412-4516

Recommendation #6

Work with county emergency management agencies to develop a process to monitor the submission and approval of State emergency plans and supplemental emergency plans;

Agency Response and Corrective Action Plan

We do not concur with this recommendation. Staff of the SSA provided training at the Governor's Hurricane Conference (which is a national meeting) on emergency preparedness in May 2018 and May 2019. This conference was attended by Florida emergency management officials, including county emergency operations staff. In addition, emergency operations staff were invited to attend our Joint Training in four locations throughout Florida in 2018. This training included emergency preparedness for nursing homes. Thirty four emergency operations staff from throughout the state

AMERICAN OVERSIGHT

FL-AHCA-20-0902-A-002379

were in attendance. Additionally in 2018 key management staff in the SSA attended the Florida Emergency Preparedness Association conference. The SSA has been, and will continue to be available to work with county emergency management agencies to improve the process for submitting, and approval of each nursing homes' Comprehensive Emergency Management Plan.

Agency Contact
Kimberly Smoak, Chief of Field Operations/State Survey Agency Director
Kimberly.smoak@ahca.myflorida.com
850-412-4516

Recommendation #7
Expand State agency guidance to include all Federal emergency preparedness requirements in addition to the State emergency plan requirements; and

Agency Response and Corrective Action Plan
We partially concur with this recommendation. Since the State emergency plan requirements are based on state law, we are required to develop rules in accordance with, and under our state authority. There are some requirements that are similar between state and federal, however; there are not point by point. The SSA has recommended in the proposed rule amendments alignment of state criteria with much of the Federal emergency preparedness requirements.

As stated previously the SSA staff are actively working on amending the Florida Administrative Code Rule regarding emergency plans. This was initiated prior to the audit results and the intent is to develop more consistent and concise language, which will provide better guidance to county emergency management officials in their reviews of the plans. The SSA anticipates scheduling a rule workshop within the next six months to update state emergency plan requirements.

Agency Contact
Kimberly Smoak, Chief of Field Operations/State Survey Agency Director
Kimberly.smoak@ahca.myflorida.com
850-412-4516

AMERICAN OVERSIGHT

FL-AHCA-20-0902-A-002380

Recommendation #8

Increase communication and collaboration with the county emergency management agencies to:

- clarify roles and responsibilities;
- make them aware of pending, or newly licensed, nursing homes in their counties;
- identify areas where additional expertise may be needed to ensure that nursing homes meet CMS and State requirements and to ensure the safety of nursing home residents; and
- provide county emergency management agencies with survey results, to the extent possible, from individual nursing homes to identify specific vulnerabilities.

Agency Response and Corrective Action Plan

We do not concur with this recommendation. The role of the Agency for Health Care Administration (AHCA) is clearly defined, as is the role of the County Emergency Management offices. Additionally, the county emergency management offices have no authority related to the CMS requirements, although, as stated above for providers, they are afforded the same training resources on both the ISTW and ASPR Tracie websites.

County emergency management offices are notified of new providers, in that nursing homes are required to have an approved comprehensive emergency management plan as a condition of licensure from the SSA. The SSA's website, Florida Health Finder, includes posting of newly licensed facilities created specifically for emergency managers, in addition to the online posting of survey results. This information is available to the county emergency management agencies, in addition to the public.

As previously stated staff of the SSA provided training at the Governor's Hurricane Conference (which is a national meeting) on emergency preparedness in May 2018 and May 2019. This conference was attended by Florida emergency management officials, including county emergency operations staff. In addition, emergency operations staff were invited to attend our Joint Training health in four locations throughout Florida in 2018. This training included emergency preparedness for nursing homes. Thirty four emergency operations staff from throughout the state were in attendance. Additionally in 2018 key management staff in the SSA attended the Florida Emergency Preparedness Association conference.

The SSA has had extensive communication, and collaboration with county emergency management agencies through the entire state. All eight field offices meet, as

AMERICAN OVERSIGHT

FL-AHCA-20-0902-A-002381

requested, with the county emergency management agencies, which encompasses all 67 counties. SSA staff attend the Health Care Coalition meetings, which are typically conducted on a quarterly basis. In addition to meetings, management in the eight SSA field offices communicate via email and phone calls with county emergency management agencies regarding comprehensive emergency management plan reviews and approvals.

During this past year, SSA staff conducted training on the SSA's Emergency Management System (ESS) to the following Health Care Coalition's, and/or county emergency management agencies:

-Emerald Coast Health Care Coalition-Escambia, Santa Rosa, Okaloosa, Walton, Holmes, Washington, Bay, Jackson, Calhoun, Liberty counties.

-Palm Beach County Healthcare Emergency Response Coalition.

-Palm Beach County Coalition for Health and Medical Preparedness.

-Marion county Central Florida Disaster Medical Coalition.

-Volusia, Lake Seminole, Orange, Brevard, Osceola, Indian River, St. Lucie, Martin counties.

-Big Bend Health Care Coalition-Gulf, Franklin, Wakulla, Leon, Gadsden, Jefferson, Madison, Taylor counties.

-Volusia County ESF8 Community Partners Meeting-Volusia county and other surrounding and Region 5 counties.

-FDEM Region 3 Quarterly Meeting; Northeast Florida Regional Council-Nassau, Duval, Baker, Clay St. Johns, Flagler, Putnam, Bradford, Union, Alachua, Gilchrist, Levy, Marion counties.

-St. Johns County Healthcare Facility Meeting; Northeast Florida Healthcare Coalition- Nassau, Baker, Duval, Clay, St. Johns, Flagler counties.

-ESF8 Staff Boot Camp- Region 1-Escambia, Santa Rosa, Okaloosa, Walton, Holmes, Jackson, Washington, Bay, Calhoun, Gulf counties.

During the recent declared emergency event, Hurricane Dorian, staff of the SSA field offices staffed the following county Emergency Operation Centers; Volusia, Brevard,

AMERICAN OVERSIGHT

FL-AHCA-20-0902-A-002382

Palm Beach, Broward and Miami-Dade. Additionally, in two counties, Brevard and Palm Beach, staff were asked to stay overnight.

Lastly, as noted in the draft report, the auditors only held discussions with eight county emergency management agencies. It is unfair to allege that the SSA is deficient based on discussions held with county emergency agency staff when the SSA was not present for those discussions.

Subject: [External] IMPORTANT: Travel Restrictions for Employees of the State Personnel System (COVID-19)AP

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Today, Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.

AMERICAN OVERSIGHT

- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Thank you in advance for joining in efforts to reduce the spread of COVID-19. We will continue to closely monitor and evaluate available information and guidance as this is a rapidly evolving situation.

We appreciate your patience and commitment to protecting our communities. If you have questions, please call John Apthorp at (850) 922-1274.

I think we just need to evaluate if we get anything and be flexible if we need to. I don't anticipate this being a major issue.

Subject: RE: Test Message - Medicaid Coverage of Services During the State of Emergency Related to COVID-19

Also, the federal rules state the agency must allow the FFS recipient a reasonable timeframe "not to exceed 90 days" to request a hearing (42 CFR 431.221), and the SMMC recipient must request "no later than 120 calendar days" (42 CFR 438.408). So the notice language below would be appropriate if we receive a waiver of those federal rules, but not so sure without a waiver? I could see there being wiggle room with FFS cases what is "a reasonable timeframe" despite the fact it exceeds 90 days, but the SMMC rule doesn't use similar language. Ultimately, I don't think these deadlines are the thing anyone is going to complain about us extending, but just letting you know what the rules say.

Subject: RE: Test Message - Medicaid Coverage of Services During the State of Emergency Related to COVID-19

I am good with the request to feds & limiting to cases receiving COB.

The practical issue I see would be implementing "if needed . . . may be given more time to submit an appeal through their health plan or request a fair hearing". We often dismiss requests for FH because they are untimely. That language is vague, but I don't think we need to develop criteria/policy, as we could take a case by case approach as long as we are consistent with our considerations - whether there is need, whether the delay was impacted by the recent crisis, whether the time ran before or after the president issued a national emergency, etc.

AMERICAN OVERSIGHT

Also, I mentioned in the comments I sent the other day regarding State/Fed rules we may want to seek waiver on - technically, our current rule (59G-1.100) specific to our office only authorizes the Agency to waive untimeliness of a FFS FH request when AHCA fails to send a timely notice of action, or the Agency fails to act on the recipient's specific request for benefits (i.e., no notice was sent at all). There is no similar waiver provision for SMMC FH requests. However, I think we likely have discretion under the provision of the rule that allows the HO to render any decision consistent with the rule, including ensuring the hearing is conducted in a manner that "promotes the fair, just, and speedy resolution of the proceeding."

Hi Stefan - see verbiage below on alert that will go out from Medicaid which includes the below paragraph on fair hearings. Let me know if you have questions or would like to discuss. My cell is: 264-4762. Working from home today.

Health Plan Appeals and Fair Hearings

If needed, recipients impacted by COVID-19 may be given more time to submit an appeal through their health plan or request a fair hearing. In addition, the Agency has sought federal approval to temporarily delay scheduling of Medicaid fair hearings and issuing fair hearing decisions during the emergency period if there are workforce shortages. The Agency would limit use of this flexibility to those instances where the recipient is continuing to receive services pending the outcome of the fair hearing.

Florida Medicaid Health Care Alert

March 16, 2020

Provider Type(s): All

Medicaid Coverage of Services During the State of Emergency Related to COVID-19

The Agency for Health Care Administration (Agency) is committed to ensuring that Medicaid recipients diagnosed with the 2019 novel coronavirus (COVID-19) receive all the care needed to address their symptoms. **Florida Medicaid covers and will cover all medically necessary services required to facilitate testing and treatment of COVID-19.** The purpose of this alert is to provide guidance on the flexibilities offered to providers furnishing services to recipients impacted by COVID-19. This policy guidance applies to services rendered through both the fee-for-service (FFS) delivery system and the Statewide Medicaid Managed Care (SMMC) program.

Here is the list of modifications being made now. As the situation evolves, the Agency may make additional changes to assist providers and to meet the needs of recipients.

Prior Authorization Requirements

In order to reduce administrative burdens on key providers that are on the front line serving the populations most impacted by COVID-19, Florida Medicaid is waiving prior authorization requirements for hospital services, physician services, advanced practice registered nursing services, home health services, and durable medical equipment and supplies. This will allow these provider types to redeploy resources used to complete these functions, as needed. In addition to the services listed above, Florida Medicaid is waiving all prior authorization requirements for all services necessary to appropriately evaluate and treat Medicaid recipients diagnosed with COVID-19. Please refer to official diagnosis coding guidelines that have been published by the Centers for Disease Control (CDC).

Limits on Services

- Florida Medicaid will waive limits on services (specifically related to frequency, duration, and scope) that need to be exceeded in order to maintain the health and safety of recipients diagnosed with COVID-19 or when it is necessary to maintain a recipient safely in their home. Examples of services include: the 45-day hospital inpatient limit, home health services, durable medical equipment, in-home physician visits, etc.
- Florida Medicaid lifted all limits on early prescription refills during the state of emergency for maintenance medications, except for controlled substances. The edits prohibiting early prescription refills will remain lifted until further notice by the Agency. This will assist recipients who may need to be self-quarantined for a period of time.
- Florida Medicaid will reimburse for a 90-day supply of maintenance prescriptions when available at the pharmacy. The recipient must request that the pharmacy dispense a 90-day supply. In addition, Florida Medicaid will allow mail order delivery of maintenance prescriptions in those instances when recipients are prohibited from going to a retail pharmacy. Florida Medicaid will also pay for a 90-day supply of maintenance prescriptions through mail order delivery.

AMERICAN OVERSIGHT

Cost Sharing

Florida Medicaid is waiving all co-payments related to testing and diagnosing COVID-19 and treating Medicaid recipients diagnosed with COVID-19.

Health Plan Appeals and Fair Hearings

If needed, recipients impacted by COVID-19 may be given more time to submit an appeal through their health plan or request a fair hearing. In addition, the Agency has sought federal approval to temporarily delay scheduling of Medicaid fair hearings and issuing fair hearing decisions during the emergency period if there are workforce shortages. The Agency would limit use of this flexibility to those instances where the enrollee is continuing to receive services pending the outcome of the fair hearing.

Preadmission Screening and Resident Reviews

All Preadmission Screening and Resident Review (PASRR) processes may be postponed until further notice by the Agency.

- Retroactively performed screenings or resident reviews must document the reason for delay in the completion of PASRR requirements.

Provider Enrollment

Florida Medicaid will pay for medically necessary services provided to recipients diagnosed with COVID-19, regardless of whether the provider is located in-state or out-of-state. To be reimbursed for services rendered to eligible Florida Medicaid recipients, providers not already enrolled in Florida Medicaid (out-of-state or in-state) must complete a provisional (temporary) enrollment application. The process for provisional provider enrollment is located at http://www.mymedicaid-florida.com. In the event of workforce shortages in the State, practitioners that are not already enrolled in Florida can seek enrollment following the instructions above.

Face-to-Face Provider Site Visits

In order to reduce community-spread of the virus, the Agency (and its Medicaid health plans) will be postponing face-to-face provider-site visit requirements (e.g., enrollment, credentialing, etc.) until further notice. Whenever possible, these requirements will be met telephonically or through audio/visual technology.

Federal Authorities

The Centers for Medicare and Medicaid Services has issued a set of blanket waivers that states may utilize in response to COVID-19. The Agency has already received authority for many of these waivers related to health care facilities and licensure requirements. The Agency is actively working to receive the federal authority needed for many of the items listed in this alert related to the Medicaid program. For a full list of the blanket waivers issued by CMS, click on this link: https://www.cms.gov/files/document/covid19-emergency-declaration-health-care-providers-fact-sheet.pdf.

The Agency will be issuing subsequent guidance related to additional flexibilities or service enhancements that will be enacted to ensure there is no disruption in care for Medicaid recipients in

AMERICAN OVERSIGHT

the event of workforce shortages or limitations in recipients seeking care in provider offices (e.g., telemedicine, expanding the participant directed option in the Long-Term Care program, etc.).

Subject: [External] IMPORTANT: Travel Restrictions for Employees of the State Personnel System (COVID-19)AP

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Today, Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

AMERICAN OVERSIGHT

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

Thank you in advance for joining in efforts to reduce the spread of COVID-19. We will continue to closely monitor and evaluate available information and guidance as this is a rapidly evolving situation.

We appreciate your patience and commitment to protecting our communities. If you have questions, please call John Apthorp at (850) 922-1274.

Good morning Secretary Mayhew,

Please find the below and corresponding collaterals (attached zip file) for the communication and action items carried out through our organization in response to COVID-19. I believe this will satisfy the requested information however, please reach out directly with anything additional you may need, questions you may have or concerns.

Thank you for your continued leadership during this challenging industry time.

Respectfully,
Charlene

GHCM internal communication 3/12/20:

Good morning,

As we continue to carry out recommendations by our regulatory partners, the CDC, WHO, CMS, FDOH and IDPH, some great questions have come up post our recent decision to restrict visitors and vendors. Additional direction as follows....

- New admission tours will be suspended at this time

AMERICAN OVERSIGHT

- Non-essential resident external appointments are to be postponed and/or rescheduled – those requiring a medically necessary external provider follow up will be carried out while maintaining infection control practices
- New admission sign-in's will be restricted to the lobby; appropriate screening to be carried out with these new residents at the time of entry
- Outside paid-entertainment vendors will be suspended at this time
- We are avoiding all LOA practices unless medically necessary – if a family member is insistent on taking their loved one out of the facility, call me so we can walk through the next steps
- All deliveries will continue to be restricted to non-patient care areas; large bulk drop offs to dedicated O2 rooms will need to ensure transport is screened, temped and PPE provided
- The following situations will be allowed **pending** a negative screening has been completed, negative temp ***(below 100.4 – range we are monitoring)***, have demonstrated appropriate hand hygiene (documented via handwashing competency - attached) and are wearing appropriate PPE when in patient care areas:
    - Caregivers hired by families
    - Hospice and Psych Providers
    - Podiatry and Wound Care providers
    - Dental and Optometry providers
    - Physicians and physician extenders
    - Lab and X-Ray providers – please monitor these providers to ensure proper IC and PPE donning and doffing is to be carried out **in between** each resident
- Outside food – we do not recommend at this time
- We have family members who prefer to wash their loved one's laundry. Please make sure to complete an updated *personal inventory sheet* and ensure each item is labeled as we will need to launder their items at this time. Please notify this sample of resident families and communicate our plan with them
- Student clinical rotations and volunteers will be suspended at this time
- Staff who have recently gone on a cruise or return from a cruise will need to self-quarantine for 14 days upon return – a physician's note will be required prior to returning to the schedule
- Staff Temperatures – the best way to monitor staff temperatures is to record on our daily Smartlinx schedules. These schedules are kept for tracking purposes by our dedicating staffing coordinators. Review for compliance to be carried out by the DNS/ED of each center. If you have the ability to purchase Thermal Thermometers, go ahead and do so at this time. Our thermometers require probe covers which may result in exhaustion by our supplier eventually as well
- Please make sure all agency staff is screened and the same process is carried out as we do for our own employees – this includes handwashing competency (attached)
- Any/all correspondence requested from the Union, ACO's, Veterans Affairs (VA), etc. is to be forwarded to our Legal Team for review. They will assist with a response to these inquiries
- All media requests to be forwarded to Teri Marinko, SVP Customer Experience

We know this has and will continue to be a heavy lift for all of us. We are so proud of your continued efforts to ensure safety and protection to our most vulnerable...THANK YOU 🖤

With Sincere Gratitude,

The Clinical Team

COVID 19 CORONAVIRUS DISEASE

What you need to know about coronavirus disease 2019 (COVID-19)

What is coronavirus disease 2019 (COVID-19)?

Coronavirus disease 2019 (COVID-19) is a respiratory illness that can spread from person to person. The virus that causes COVID-19 is a novel coronavirus that was first identified during an investigation into an outbreak in Wuhan, China.

Can people in the U.S. get COVID-19?

COVID-19 is spreading from person to person in China, and limited spread among close contacts has been detected in some countries outside China, including the United States. At this time, however, this virus is NOT currently spreading in communities in the United States. Right now, the greatest risk of infection is for people in China or people who have traveled to China. Risk of infection is dependent on exposure. Close contacts of people who are infected are at greater risk of exposure, for example health care workers and close contacts of people who are infected with the virus that causes COVID-19. CDC continues to closely monitor the situation.

Have there been cases of COVID-19 in the U.S.?

Yes. The first case of COVID-19 in the United States was reported on January 21, 2020. The current count of cases of COVID-19 in the United States is available on CDC's webpage at https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html.

How does COVID-19 spread?

The virus that causes COVID-19 probably emerged from an animal source, but now it seems to be spreading from person to person. It's important to note that person-to-person spread can happen on a continuum. Some diseases are highly contagious (like measles), while other diseases are less so. At this time, it's unclear how easily or sustainably the virus that causes COVID-19 is spreading between people. Learn what is known about the spread of newly emerged coronaviruses at https://www.cdc.gov/coronavirus/2019-ncov/about/transmission.html.

What are the symptoms of COVID-19?

Patients with COVID-19 have had mild to severe respiratory illness with symptoms of

- fever
- cough
- shortness of breath

What are severe complications from this virus?

Many patients have pneumonia in both lungs.

How can I help protect myself?

The best way to prevent infection is to avoid being exposed to the virus that causes COVID-19.

There are simple everyday preventive actions to help prevent the spread of respiratory viruses. These include

- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Wash your hands often with soap and water for at least 20 seconds. Use an alcohol-based hand sanitizer that contains at least 60% alcohol if soap and water are not available.

If you are sick, to keep from spreading respiratory illness to others, you should

- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces.

What should I do if I recently traveled to China and got sick?

If you were in China within the past 14 days and feel sick with fever, cough, or difficulty breathing, you should seek medical care. Call the office of your health care provider before you go, and tell them about your travel and your symptoms. They will give you instructions on how to get care without exposing other people to your illness. While sick, avoid contact with people, don't go out and delay any travel to reduce the possibility of spreading illness to others.

Is there a vaccine?

There is currently no vaccine to protect against COVID-19. The best way to prevent infection is to avoid being exposed to the virus that causes COVID-19.

Is there a treatment?

There is no specific antiviral treatment for COVID-19. People with COVID-19 can seek medical care to help relieve symptoms.

For more information: **www.cdc.gov/COVID19**

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

COVID 19 ENFERMEDAD DEL CORONAVIRUS

Lo que necesita saber sobre la enfermedad del coronavirus 2019(COVID-19)

¿Qué es la enfermedad del coronavirus 2019 (COVID-19)?

La enfermedad del coronavirus 2019 (COVID-19) es una afección respiratoria que se puede propagar de persona a persona. El virus que causa el COVID-19 es un nuevo coronavirus que se identificó por primera vez durante la investigación de un brote en Wuhan, China.

¿Pueden las personas en los EE. UU. contraer el COVID-19?

El COVID-19 se está propagando de persona a persona en China y se ha detectado propagación limitada entre contactos cercanos en algunos países fuera de China, incluso en los Estados Unidos. En la actualidad, sin embargo, este virus NO se está propagando en comunidades en los Estados Unidos. En estos momentos, el mayor riesgo de infección es para las personas en China o las personas que han viajado a China. El riesgo de infección depende de la exposición. Los contactos cercanos de las personas infectadas tienen un riesgo mayor de exposición, por ejemplo, los trabajadores del sector de la salud y los contactos cercanos de las personas infectadas por el virus que causa el COVID-19. Los CDC continúan vigilando de cerca la situación.

¿Ha habido casos de COVID-19 en los EE. UU.?

Sí. El primer caso de COVID-19 en los Estados Unidos se notificó el 21 de enero del 2020. La cantidad actual de casos de COVID-19 en los Estados Unidos está disponible en la página web de los CDC en https://www.cdc.gov/coronavirus/2019-ncov/ cases-in-us.html.

¿Cómo se propaga el COVID- 19?

Es probable que el virus que causa el COVID-19 haya surgido de una fuente animal, pero parece que ahora se está propagando de persona a persona. Es importante notar que la propagación de persona a persona puede darse en un proceso continuo. Algunas enfermedades son altamente contagiosas (como el sarampión), mientras que otras enfermedades no lo son tanto. En estos momentos, no está claro qué tan fácil o con qué continuidad el virus que causa el COVID-19 se esté propagando entre las personas. Infórmese sobre lo que se sabe acerca de la propagación del coronavirus de reciente aparición en https://www.cdc.gov/coronavirus/2019-ncov/about/transmission-sp.html.

¿Cuáles son los síntomas del COVID-19?

Los pacientes con COVID-19 han tenido enfermedad respiratoria de leve a grave con los siguientes síntomas:

- fiebre
- tos
- dificultad para respirar

¿Cuáles son las complicaciones graves provocadas por este virus?

Muchos pacientes tienen neumonía en ambos pulmones.

¿Qué puedo hacer para ayudar a protegerme?

La mejor manera de prevenir la infección es evitar la exposición al virus que causa el COVID-19.
Hay medidas simples preventivas y cotidianas para ayudar a prevenir la propagación de virus respiratorios. Estas incluyen las siguientes:

- Evitar el contacto cercano con personas enfermas.
- Evitar tocarse los ojos, la nariz y la boca con las manos sin lavar.
- Lavarse frecuentemente las manos con agua y jabón por al menos 20 segundos. Usar un desinfectante de manos que contenga al menos un 60 % de alcohol si no hay agua y jabón disponibles.
- Si está enfermo, para prevenir la propagación de la enfermedad respiratoria a los demás, debería hacer lo siguiente:
- Quedarse en casa si está enfermo.
- Cubrirse la nariz y la boca con un pañuelo desechable al toser o estornudar y luego botarlo a la basura.
- Limpiar y desinfectar los objetos y las superficies que se tocan frecuentemente.

¿Qué debo hacer si recientemente viajé a China y me enfermé?

Si estuvo en China en los últimos 14 días, se siente enfermo y tiene fiebre, tos o dificultad para respirar, debería buscar atención médica. Llame al consultorio de su proveedor de atención médica antes de ir y dígales sobre su viaje y sus síntomas. Ellos le darán instrucciones sobre cómo conseguir atención médica sin exponer a los demás a su enfermedad. Mientras esté enfermo, evite el contacto con otras personas, no salga y postergue cualquier viaje para reducir la posibilidad de propagar la enfermedad a los demás.

¿Hay alguna vacuna?

En la actualidad no existe una vacuna que proteja contra el COVID-19. La mejor manera de prevenir la infección es evitar la exposición al virus que causa el COVID-19.

¿Existe un tratamiento?

No hay un tratamiento antiviral específico para el COVID-19. Las personas con el COVID-19 pueden buscar atención médica para ayudar a aliviar los síntomas.

Flowchart to Identify and Assess 2019 Novel Coronavirus

For the evaluation of patients who may be ill with or who may have been exposed to 2019 Novel Coronavirus (2019-nCoV)

A. Identify

if in the ***past 14 days since first onset of symptoms*** a history of ***either***

Travel to China	← **OR** →	**Close contact with** a person known to have 2019-nCoV illness*

B. AND the person has

Fever or symptoms of lower respiratory illness
(e.g., cough or shortness of breath)

if both exposure and illness are present

↓

1. Isolate

- Place facemask on patient
- Isolate the patient in a private room or a separate area
- Wear appropriate personal protective equipment (PPE)

2. Assess clinical status

	Is fever present?	**Is respiratory illness present?**
EXAM	☐ Subjective?	☐ Cough?
	☐ Measured? _____°C/F	☐ Shortness of breath?

3. Inform

- Contact health department to report at-risk patients and their clinical status
- Assess need to collect specimens to test for 2019-nCoV
- Decide disposition

If discharged to home

↓

Instruct patient

As needed depending on severity of illness and health department consultation

- Home care guidance
- Home isolation guidance

Advise patient

If the patient develops new or worsening fever or respiratory illness

- Call clinic to determine if reevaluation is needed
- If reevaluation is needed call ahead and wear facemask

* Documentation of laboratory-confirmation of 2019-nCoV may not be possible for travelers or persons caring for patients in other countries. For more clarification on the definition for close contact see CDC's Interim Guidance for Healthcare Professionals: www.cdc.gov/coronavirus/2019-nCoV/hcp/clinical-criteria.html

SNF to Hospital and Hospital to SNF COVID 19 Transfer Communication Tool

Use this tool to document an individual's medical status related to coronavirus disease 2019 (COVID-19) to help facilitate communication between skilled nursing facilities and hospitals during patient transfers and admissions.

Resident/Patient Name: _____

Transferring Facility: _____

Accepting Facility: _____

Date of Transfer: _____

1. **Has the patient tested positive for COVID-19?**
   ☐ Yes ☐ No

2. **Date of initial positive test:** _____

3. **If Yes, has the patient had 2 subsequent negative test results?** ☐ Yes ☐ No ☐ N/A

4. **Dates of subsequent negative tests:** _____

   If patient was positive and has subsequent negative testing STOP and call the receiving facility to have further discussion regarding current clinical status of the patient.

5. **Has the patient exhibited signs and symptoms of COVID-19 during admission to the facility** ***(Cough, Sneezing, Fever > 100, SOB, Sore Throat)?***
   ☐ Yes ☐ No

6. **Has the patient had a positive chest x-ray since admission?** ☐ Yes ☐ No ☐ N/A

7. **If answer to 6 is Yes, results:** _____

8. **Has the patient been in contact with anyone who has tested positive for COVID-19?**
   ☐ Yes ☐ No

9. **Date of Exposure:** _____

10. **Has the patient been to any of the restricted travel areas** ***(South Korea, Iran, China, Italy)*****, traveled internationally or traveled on a cruise ship in the last 14 days?** ☐ Yes ☐ No

11. **Dates and countries of travel:** _____
    _____

12. **Has anyone in your facility tested positive for COVID-19 or has been presumed positive?**
    ☐ Yes ☐ No

13. **If Yes to Question 12: Has the Department of Health Been Notified?**
    ☐ Yes ☐ No ☐ N/A

If the answer is "Yes" to question 12, STOP and have a conversation with receiving center regarding facility status.

Clinician Screening Tool for Identifying Persons Under Investigation for Coronavirus Disease 2019 (COVID-19)

Version 4.1 | March 10, 2020

The Florida Department of Health (Department) is prioritizing testing of symptomatic individuals who had close contact[1,2] with a laboratory-confirmed[3] COVID-19 case, are part of an outbreak, or have unexplained respiratory illness. Please see the Centers for Disease Control and Prevention (CDC) Health Alert Network 429 https://emergency.cdc.gov/han/2020/han00429.asp for additional guidance on prioritization of testing. The Department recommends other individuals be tested at a commercial laboratory (e.g., LabCorp and Quest). For all persons under investigation for COVID-19, take the following precautions:

- Ask the patient to wear a surgical mask.
- Evaluate the patient in a private room with the door closed, ideally an airborne isolation room, if available.
- Initiate contact and airborne precautions, including use of eye protection (e.g., goggles or a face shield) for all health care professionals and other staff entering the room.
- Visit **www.cdc.gov/coronavirus/2019-ncov/hcp/infection-control.html** for additional recommendations on infection control recommendations for patients under investigation for COVID-19 in health care settings.

A. Person had **close contact**[1,2] with a laboratory-confirmed[3] COVID-19 case and fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

B. Person is part of an outbreak of suspected COVID-19.

C. Person hospitalized with **unexplained respiratory illness or person who died from unexplained respiratory illness.**

D. Person traveled to or from an **affected geographic area**[5] with widespread community transmission and has fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

→ **This patient meets the criteria for testing at the Florida Department of Health Bureau of Public Health Laboratories.** The Florida Department of Health asks that you **immediately** notify both infection control personnel at your health care facility and your county health department (CHD) (**FloridaHealth.gov/CHDEpiContact**).

E. Person had community contact (e.g., attended the same gathering or stayed on the same cruise ship) with a laboratory-confirmed[3] COVID-19 case and fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

F. Person is age ≥65 years, has chronic medical conditions, or is in an immunocompromised state and has fever[4] or symptoms of lower respiratory illness (e.g., cough, shortness of breath).

→ **Consider testing at a commercial laboratory.** If commercial testing is not available, contact your CHD for patients that meet CDC priority criteria.

[1]Close contact is defined as a) being within approximately 6 feet (2 meters) of a COVID-19 case for a prolonged period; close contact can occur while caring for, living with, visiting, or sharing a healthcare waiting area or room with a COVID-19 case– or –b) having direct contact with infectious secretions of a COVID-19 case (e.g., being coughed on) If such contact occurs while not wearing recommended personal protective equipment (PPE) (e.g., gowns, gloves, NIOSH-certified disposable N95 respirator, eye protection), criteria for PUI consideration are met. Data to inform the definition of close contact are limited. Considerations when assessing close contact include the duration of exposure (e.g., longer exposure time likely increases exposure risk) and the clinical symptoms of the person with COVID-19 (e.g., coughing likely increases exposure risk as does exposure to a severely ill patient). Special consideration should be given to healthcare personnel exposed in healthcare settings.

[2]For healthcare personnel, testing may be considered if there has been exposure to a person with suspected COVID-19 without laboratory confirmation. Because of their often extensive and close contact with vulnerable patients in healthcare settings, even mild signs and symptoms (e.g., sore throat) of COVID-19 should be evaluated among potentially exposed healthcare personnel.

[3]Documentation of laboratory-confirmation of COVID-19 may not be possible for travelers or persons caring for patients in other countries.

[4]Fever may be subjective or confirmed.

[5]Affected areas are defined as geographic regions where sustained community transmission has been identified. For a list of relevant affected areas, see Coronavirus Disease 2019 Information for Travel (https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html)

Re: COVID-19 (Coronavirus)

Dear _____,

[NAME OF FACILITY] is diligently monitoring the development of COVID-19 (2019 novel Coronavirus) and taking all appropriate and necessary precautions for the safety and well-being of our community. We are working closely with local and state officials. We remain vigilant and continue to follow the Centers for Disease Control (CDC) and FLORIDA or ILLINOIS or MISSOURI Department of Health guidelines.

The care and safety of our residents and staff members are our number one priority. As such, we've taken the appropriate steps to address and prevent the exposure of the virus to anyone who may visit our facility. To further protect the health of our patients, workforce, and the community and prevent the potential spread of Coronavirus, [NAME OF FACILITY] is implementing a modified visitor policy effective March 11, 2020. This policy limits the number of visitors, restricts the number of entry points into the building, and implements screening for all visitors.

Specifically, in accordance with the Centers for Medicare & Medicaid Services (CMS) revised guidance to visitation for nursing homes, in coordination with the CDC and local health departments, and in order to protect unnecessary exposure among residents for reasonable clinical and safety reasons, NAME OF FACILITY has imposed the following visitation limitation:

Individuals are limited from visiting residents unless extenuating circumstances exist such as end-of-life situations or when a visitor is essential for the resident's emotional well-being and care.

In lieu of visits, we welcome alternate forms of communication to maintain the supportive relationship and to reassure your loved ones that the precautions in effect are intended for their protection and well-being. Please know that NAME OF FACILITY has increased the frequency of surveillance on our residents for symptoms in order to ensure prompt detection, triage, and isolation of potentially affected residents, while still taking into account the individual needs and goals of care.

We will continuously monitor the information disseminated from CMS, CDC, and local governing agencies for further guidance. However, the current visitor limitation will remain in place until further notice. Do not hesitate to call us at [XXX-XXX-XXXX] before visiting your loved one to better understand the current visitor policy.

Sincerely,

[Name of Administrator], NHA
Executive Director
[_____] Health & Rehabilitation Center

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

Talking Points preface for letter to families, involved parties....

- Introduce yourself
- I'm sure you have been following the news regarding the COVID-19 ("Corona virus") and it's spread and implications... (This will open conversation)
- I wanted to let you know that we have been diligent in protecting our residents since the onset
    - We have increased the frequency of our resident surveillance for symptoms, concerns, and any potential for exposure
    - We also enforced precautionary measures for visitors and staff, including increased education and signage, additional hand hygiene stations, and screening residents, vendors, and staff regarding symptoms, relevant travel, and updated potential exposure information in accordance with the CDC, WHO, and CMS recommendations
- This week CMS has revised guidance for visitation based on the vulnerability of residents in nursing homes.
- **We have chosen to adopt the CMS guidance to restrict visitation to our center unless extenuating circumstances occur.**
    - I understand this may be concerning, but the heightened risk of transmission supports this decision as being essential to keeping your loved one, and the other residents protected.
- We are sending out a letter that with further explain this precaution and of course, we will let you know immediately if there are any changes.
- In the meantime,
    - we want to let you know that we are communicating this same message to all of our residents, and updating them often regarding any developments.
    - We are continuing our vigilant surveillance and rigorous screening of staff prior to reporting to work each shift
    - We are encouraging and available to help you communicate with your loved ones by other means, such as Skype, email, facetime, phone calls. We have internet access and can assist with simple technology.
    - Non-essential appointments and LOAs will also be restricted and rescheduled at a later date
    - Care Plan meetings and IDT discussions will continue as planned, however your participation will need to be completed via telephone/skype/facetime etc
    - If you would like an assigned contact person so you receive consistent communication, that can also be arranged.
    - We are monitoring the CDC, WHO, and CMS guidance and live coverage and are hopeful that the restrictions can be lifted in the near future.
    - I know you will probably have questions after you digest this—here are some key people you can contact:
    - Here is my cell number
    - Do you have any questions right now?

Liz we should set up a recorded line with the visitation policy 24 hours –

Listserv—this would be nice for visitors who have email—unless it gets out of hand—may make it outbound only – no opportunity for reply

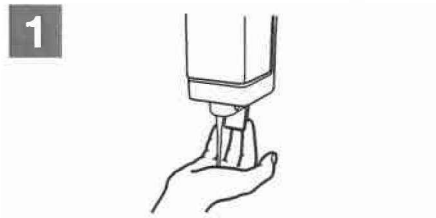
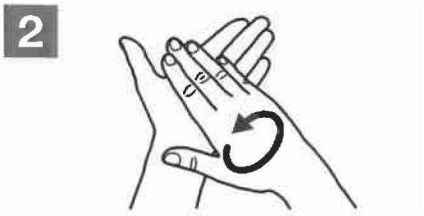
How to Handwash?

WASH HANDS WHEN VISIBLY SOILED! OTHERWISE, USE HANDRUB



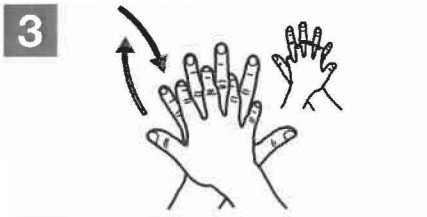
Duration of the entire procedure: 40-60 seconds

0



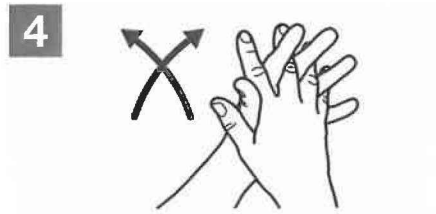
Wet hands with water;

1



Apply enough soap to cover all hand surfaces;

2

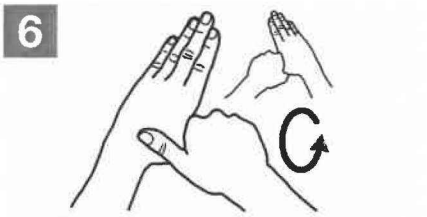


Rub hands palm to palm;

3

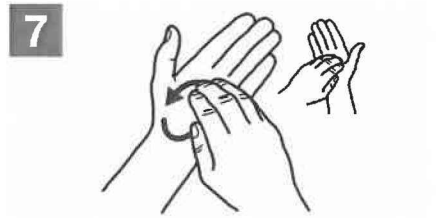
Right palm over left dorsum with interlaced fingers and vice versa;

4



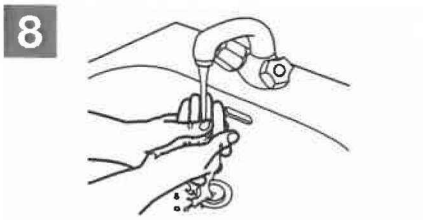
Palm to palm with fingers interlaced;

5



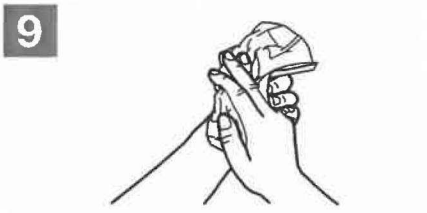
Backs of fingers to opposing palms with fingers interlocked;

6



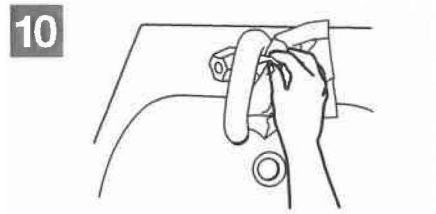
Rotational rubbing of left thumb clasped in right palm and vice versa;

7



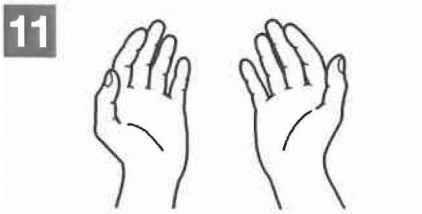
Rotational rubbing, backwards and forwards with clasped fingers of right hand in left palm and vice versa;

8



Rinse hands with water;

9



Dry hands thoroughly with a single use towel;

10

Use towel to turn off faucet;

11

Your hands are now safe.

AMERICAN OVERSIGHT

AHCA MEDIA INQUIRY
REPORTER: Mary Ellen Klas
OUTLET: The Miami Herald

INQUIRY:

We have heard from executives of nursing homes and ALFs have repeatedly told us that residents of these facilities continue to be exposed to COVID because of "staff and vendors."

Please provide us with an answer to the following questions:

** Is the state requiring the regular testing of vendors hired to provide work in nursing homes and ALFs? If not, why not?*

** Does the state require testing of staff of nursing staffing services used to provide backup service at nursing homes and ALFs? If not, why not?*

** Does AHCA require that its inspectors who enter nursing homes be tested? If not, why not?*

** Does AHCA require that its inspectors who enter nursing homes wear PPE? If so, what kind? If yes, please provide us with a copy of the guideline, or directive?*

** Does AHCA require that home health agencies that provide skilled nursing services, or unskilled nursing services have their staff regularly tested? If not, why not? If yes, please provide us with a copy of the guideline, or directive?*

** What is the current policy relating to transfer of patients from hospitals to LTC facilities? Has the agency changed the policy regarding a requirement that the patient have two negative tests before transfer?*

** Why are nursing home staff allowed to come to work while their tests are pending?*

** Why are staff who test positive allowed to come back when their symptoms subside but they have not yet tested negative? Aren't they considered still contagious?*

RESPONSE:

The Agency's emergency rule requires all staff entering the facility to be tested. This includes clinical, housekeeping, nutrition and food service, maintenance, administration, and contract staff. Vendors, such as plumbers or electricians, are not required to be tested but must be granted limited access to the facility; wear PPE in compliance with CDC guidance; and cannot have direct contact with residents.

AMERICAN OVERSIGHT

For the initial implementation of the rule, staff were permitted to work while testing results were pending. Any staff member who receives a positive result is not allowed to enter a facility.

The Agency is fully compliant with current CDC guidance regarding surveyors, including the appropriate usage of PPE when entering a facility. <<INSERT SENTENCE ABOUT PPE USAGE FROM KIM>> Additionally, the Agency will be requiring our inspectors to be regularly tested.

Home health agencies are required to have their staff tested if working in a nursing home or assisted living facility.

The Agency issued Emergency Rule 59AER20-6. A hospital is prohibited from discharging any resident who has tested positive for COVID-19 or is exhibiting symptoms consistent with COVID-19 to any long-term care facility until the resident has been cleared for discharge using either a test-based strategy or a symptom-based strategy, unless the receiving facility has a dedicated wing, unit, or building with dedicated staff to accept the COVID-19 positive resident.

Please reference the Criteria for Return to Work for Healthcare Personnel guidance from the CDC for your last question.

AMERICAN OVERSIGHT

Long-Term Care (LTC) Respiratory Surveillance Line List

Instructions for the Long-Term Care (LTC) Respiratory Surveillance Line List

The Respiratory Surveillance Line List provides a template for data collection and active monitoring of both residents and staff during a suspected respiratory illness cluster or outbreak at a nursing home or other LTC facility. Using this tool will provide facilities with a line listing of all individuals monitored for or meeting the case definition for the outbreak illness.

Each row represents an individual resident or staff member who may have been affected by the outbreak illness (i.e., case). The information in the columns of the worksheet capture data on the case demographics, location in the facility, clinical signs/symptoms, diagnostic testing results and outcomes. While this template was developed to help with data collection for common respiratory illness outbreaks the data fields can be modified to reflect the needs of the individual facility during other outbreaks.

Information gathered on the worksheet should be used to build a case definition, determine the duration of outbreak illness, support monitoring for and rapid identification of new cases, and assist with implementation of infection control measures by identifying units where cases are occurring.

AMERICAN OVERSIGHT

LTC Respiratory Surveillance Line List

Instruction Sheet for Completion of the Long-Term Care (LTC) Respiratory Surveillance Line List

Section A: Case Demographics

In the space provided per column, fill in each line with name, age and gender of each person affected by the current outbreak at your facility. Please differentiate residents (R) from staff (S).

*Staff includes all healthcare personnel (e.g., nurses, physicians and other providers, therapists, food services, environmental services) whether employed, contracted, consulting or volunteer.

For residents only: Short stay (S) residents are often admitted directly from hospitals, require skilled nursing or rehabilitation care, and are expected to have a length of stay less than 100 days. Long stay (L) residents are admitted to receive residential care or nursing support and are expected to have a length of stay that is 100 days or more. Indicate the stay type for each resident in this column.

Section B: Case Location

For resident only: Indicate the building (Bldg), unit or floor where the resident is located and the room and bed number for each resident being monitored for outbreak illness. *Answers may vary by facility due to differences in the names of resident care locations.

For staff only: For each staff member listed, indicate the floor, unit or location where that staff member had been primarily working at the time of illness onset.

Section C: Signs and Symptoms (s/s)

Symptom onset date: Record the date (month/day) each person developed or reported signs/symptoms (e.g., fever, cough, shortness of breath) consistent with the outbreak illness.

Symptoms: Fill in the box (Y or N) indicating whether or not a resident or staff member experienced each of the signs/symptoms listed within this section.

Additional documented s/s (*select all codes that apply*): In the space provided, record the code that corresponds to any additional s/s the resident or staff member experienced. If a resident or staff member experienced a s/s that is not listed, please use the space provided by "Other" to specify the s/s.
H – headache, SB – shortness of breath, LA – loss of appetite, C – chills, ST – sore throat, O – other: Specify _____

Section D: Diagnostics

Chest x-ray: Fill in the box (Y or N) indicating whether or not a chest x-ray was performed.

Type of specimen collected: (*Select all codes that apply*): In the space provided, record the type of specimen collected for laboratory testing. If the type of specimen collected is not listed, please use the space provided by "Other" to specify the specimen type.
NP – nasopharyngeal swab, OP – oropharyngeal swab, S – sputum, U – urine, O – Other: Specify _____

Date of collection: Record the date (month/day) of specimen collection.

Type of test ordered (*select all codes that apply*): In the space provided, record the code that corresponds to whether a diagnostic laboratory test was performed for each individual. If no test was performed, indicate "zero". If the laboratory test used to identify the pathogen is not listed, please use the space provided by "Other" to specify the type of test ordered.
0 – No test performed, 1 – Culture, 2 –Polymerase Chain Reaction (PCR), also called nucleic acid amplification testing includes multiplex PCR tests for several organisms using a single specimen, 3 – Urine Antigen, 4 – Other: Specify

Pathogen detected (*select all codes that apply*): In the space provided, record the code that corresponds to the bacterial and/or viral organisms that were identified through laboratory testing. If the test performed was negative, indicate "zero". If a pathogen not listed was identified through laboratory testing, please use the space provided by "Other" to specify the organism.
0 – Negative results; Bacterial: 1 – *Streptococcus pneumoniae*, 2 – *Legionella*, 3 – *Mycoplasma*
Viral: 4 – Influenza, 5 – Respiratory syncytial virus (RSV), 6 – Human metapneumovirus (HMPV), 7 – Other: Specify _____

Section E: Outcome During Outbreak

Symptom Resolution Date: Record the date that each person recovered from the outbreak illness and was symptom free for 24 hours.

Hospitalized: Fill in the box (Y or N) indicating whether or not hospitalization was required for a resident or staff member during the outbreak period. ***Note: The outbreak period is the time from the date of symptom onset for the first case to date of symptom resolution for the last case.***

Died: Fill in the box (Y or N) indicating whether or not a resident or staff member expired during the outbreak period.

Case (C) or Not a case (leave blank): Based on the clinical criteria and laboratory findings collected during the outbreak investigation, record whether or not each resident or staff member meets the case definition (C) or is not a case (leave space blank).

Long-Term Care (LTC) Respiratory Surveillance Outbreak Summary

Instructions for the Long-Term Care (LTC) Respiratory Surveillance Outbreak Summary

The Respiratory Outbreak Summary Form was created to help nursing homes and other LTC providers summarize the findings, actions and outcomes of an outbreak investigation and response. Completing this outbreak form will provide LTC facilities and other public health partners with a record of a facility's outbreak experience and highlight areas for outbreak prevention and response.

Instructions for each section of the form are described below. This form should be filled out by the designated infection preventionist with support from other clinicians in your facility (e.g., front-line nursing staff, physicians or other practitioners, consultant pharmacist, laboratory).

A LTC facility can use this form for internal documentation and dissemination of outbreak response activities. Facilities are encouraged to share this information with the appropriate public health authority by contacting the local health department. Should a facility decide to share this form with the local/state public health officials, please include facility contact information at the bottom of the form.

AMERICAN OVERSIGHT

LTC Respiratory Surveillance Outbreak Summary

Section 1: Facility Information

Health Dept. Contact Name and Phone Number: A LTC facility should have contact information (name or division, phone number) for the local and/or state health department for outbreak guidance and reporting purposes. Enter the health dept. contact information your facility used to request support during an outbreak.

Date First Notified Local Health Dept: Record the date you first contacted local or state public health during this outbreak at your facility.

Total # of residents at facility: Document the total number of residents in the facility at the time of the outbreak.

Total # of employees: Document the total number of staff working in the facility at the time of the outbreak. Staff includes all healthcare personnel (e.g., nurses, providers, consultants, therapists, food services, environmental services) whether employed, contracted or volunteer.

Summary Form Status: Information in the summary form may be completed over the course of the outbreak. Record the dates your facility started collecting information on the form and completed the outbreak summary report.

Section 2: Influenza Vaccination Status

Total # of residents vaccinated: Record the total number of residents that received the Flu Vaccine within the past year.

Total # of staff vaccinated: Record the total number of staff that received the Flu Vaccine within the past year.

Section 3:Pneumococcal Vaccination Status

Total # of residents vaccinated: Record the total number of residents that received at least one dose of the Pneumococcal Vaccine (either polysaccharide or conjugate).

Section 4: Case Definition

Provide a description of the criteria used to determine whether a resident should be considered a case in this outbreak. The description can include: signs/symptoms, presence of positive diagnostic tests, location within facility, and the timeframe during which individuals may have been involved in the outbreak (e.g., within the past 4 weeks).

Example: A Respiratory illness case includes any resident with the following symptoms: cough, shortness of breath, sputum production and fever residing on Units 2E or 2W, with onset of symptoms between Jan 15th and Feb 1st with or without a sputum specimen positive for Streptococcus pneumoniae.

Section 5: Outbreak Period Information

Outbreak start: (Date of symptom onset of first case): Record the date the first person developed signs/symptoms (e.g., fever, cough, shortness of breath) consistent with the outbreak illness.

Average length of illness: Estimate the average number of days it takes for signs/symptoms to resolve, based on clinical course among residents/staff affected by the outbreak illness.

Outbreak end: (Symptom resolution date of last case): Record the date the last person recovered from the outbreak illness and became symptom free for 24 hours.

Total # of Cases: Document the number of residents and staff (if applicable) who were identified as having the outbreak illness.

AMERICAN OVERSIGHT

LTC Respiratory Surveillance Outbreak Summary

Section 6: Staff Information

Were any ill staff delivering resident care? Check yes or no.

- If yes, try to estimate the number of ill staff involved in resident care based on date when a staff member reported symptoms compared with the date when/if staff member was excused from work.

Did any staff seek medical attention for an acute respiratory infection at any time during the outbreak? Check yes or no.

- If yes, try to estimate the number of staff that sought medical attention based on self-report.

If available, indicate if ill staff received care at an emergency department (ED). Check yes or no and estimate number of staff.

If available, indicate if ill staff was hospitalized as a result of the outbreak illness. Check yes or no and estimate number of staff.

Section 7: Diagnostic and Laboratory Tests

Chest x-ray: Fill in the box (yes or no) indicating whether or not residents and staff had an x-ray done as a part of the diagnosis of the outbreak illness. If yes, please record the # of individuals who received chest x-ray and the # of x-rays that had abnormal findings consistent with the outbreak illness.

List all bacterial (e.g., *S. pneumoniae, Mycoplasma*); viral (e.g., Influenza, RSV) organisms that were identified through laboratory testing; Use the space provided by "Other" to specify if a parasite or non-infectious cause of respiratory illness was identified.

Diagnostic testing results: In the table, each row corresponds to an organism identified during the outbreak. Use the column to specify the type of testing used to identify each organism (either microbiologic culture, PCR (also known as nucleic acid amplification) or specify if a different diagnostic test was used (e.g., Legionella urinary antigen). For each test type, document the total number of residents and staff that received laboratory confirmation by that test.

Section 8: If Influenza Identified During Outbreak:

Antiviral Treatment: Fill in the box (yes or no) indicating whether or not antiviral treatment was offered. If antiviral treatment was offered, please record the total number of residents and staff that received treatment.

Antiviral Prophylaxis Offered: Fill in the box (yes or no) indicating whether or not antiviral prophylaxis was offered to any additional residents, staff or family members at risk for infection due to the outbreak. If antiviral prophylaxis was offered, please record the total number of residents and staff that received prophylaxis.

Section 9: Resident Outcome

Hospitalizations: During the outbreak, fill in the box (yes or no) indicating whether or not hospitalization was required for any residents. If yes, please record how many residents were hospitalized.

Deaths: During the outbreak, fill in the box (yes or no) indicating whether or not any residents died. If yes, please record how many residents died during the outbreak period (deaths should be recorded even if unable to determine if outbreak illness was the cause).

Section 10: Facility Outbreak Control Interventions

In this section, check if any of the infection control strategies listed were implemented at your facility in response to the outbreak. If a practice or policy change was implemented during the outbreak that is not listed (e.g., new cleaning/disinfecting products used, change to employee sick leave policy), specify in the space provided by "Other". For each strategy, record the date the change was implemented (if available).

Section 11: # of New Cases Per Day

Please fill in the chart with the number of new cases that are residents and staff per day. Once each day is complete, add the number of new cases of residents and staff and place the sum in total column for that corresponding day.

In the space provided under the chart, record the date which corresponds to Day 1 on the outbreak period (i.e., date of outbreak start).

For HD Use Only	
Facility Licensed by State: Fill in the box (yes or no) indicating whether or not the facility is licensed by the state.	**# of Licensed Beds:** Document the total number of licensed beds at the facility.
Facility Certified by CMS: Fill in the box (yes or no) indicating whether or not the facility is certified by the Center for Medicare and Medicaid Services (CMS).	**# of staff employees:** Document the total number of facility employed staff working in the facility at the time of the outbreak.
Facility Type: Check that box that best describes the type of care the facility provides: Nursing home, Intermediate Care Facility, Assisted living Facility or Other (specify).	**# of contract employees:** Document the total number of contract/consulting providers working in the facility at the time of the outbreak.

Vista CLINICAL

3/2/2020

In an effort to provide the best service to our clients and our patients, Vista Clinical is currently researching various options to initiate COVID-19 (novel Coronavirus) PCR testing in our Clermont laboratory. As of right now, widespread testing for COVID-19 is not being performed by the CDC or the local county and state health departments. Patients must meet certain criteria to be considered for testing.

If you have a patient that is exhibiting signs and symptoms of respiratory illness we suggest that they first be tested for the respiratory pathogens that cause the majority of respiratory infection.

Vista Clinical offers a respiratory pathogens panel by PCR that tests for 14 viruses and 3 bacteria that can cause respiratory illness. The specimen for this testing is: a nasopharyngeal swab in universal transport media (UTM).

The test to order is the Respiratory Pathogens Panel. Please write this test in the notes and additional tests section of the requisition.

If more testing is necessary, contact your local County Health Department and follow their specific guidelines and instructions. The following is a link to the latest information for healthcare providers regarding COVID-19 from the Florida State Health Department. http://www.floridahealth.gov/diseases-and-conditions/COVID-19/providers/index.html

If you have any questions, please call the laboratory at 352-536-9270.

Thank you.

Robin Johnson
Director of Laboratory Operations
Vista Clinical

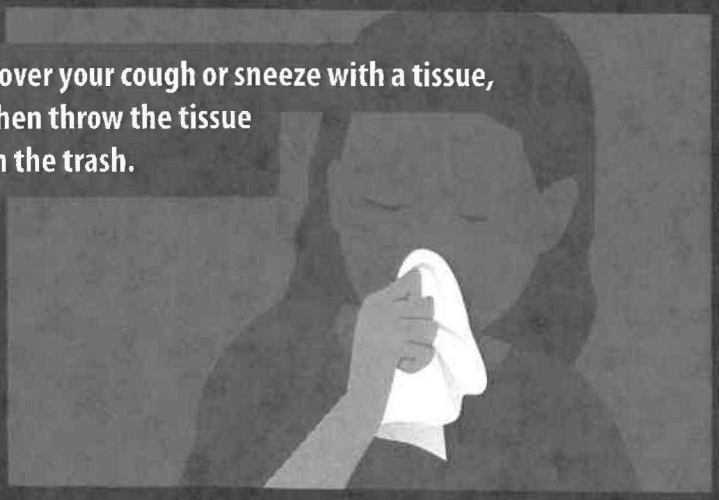
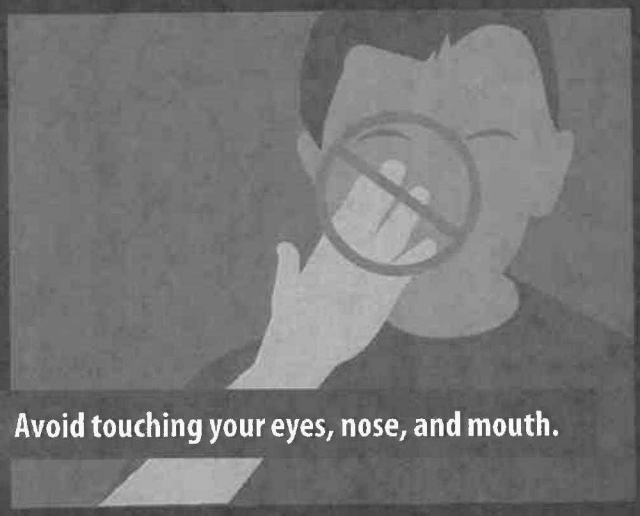
COVID 19
CORONAVIRUS DISEASE



STOP THE SPREAD OF GERMS



Help prevent the spread of respiratory diseases like COVID-19.

Avoid close contact with people who are sick.

Cover your cough or sneeze with a tissue, then throw the tissue in the trash.

Avoid touching your eyes, nose, and mouth.

Clean and disinfect frequently touched objects and surfaces.

Stay home when you are sick, except to get medical care.

Wash your hands often with soap and water for at least 20 seconds.

SUBJECT: Guidance for Infection Control and Prevention of Coronavirus Disease 2019 (COVID-19) in nursing homes ***(REVISED)***

Memorandum Summary

- ***CMS is committed*** to taking critical steps to ensure America's health care facilities and clinical laboratories are prepared to respond to the threat of the COVID-19.
- **Guidance for Infection Control and Prevention of COVID-19** - CMS is providing additional guidance to nursing homes to help them improve their infection control and prevention practices to prevent the transmission of COVID-19, *including revised guidance for visitation.*
- **Coordination with the Centers for Disease Control (CDC) and local public health departments** - We encourage all nursing homes to monitor the CDC website for information and resources and contact their local health department when needed (CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html).

Background

CMS is responsible for ensuring the health and safety of nursing home residents by enforcing the standards required to help each resident attain or maintain their highest level of well-being. In light of the recent spread of COVID-19, we are providing additional guidance to nursing homes to help control and prevent the spread of the virus.

Guidance

Facility staff should regularly monitor the CDC website for information and resources (links below). They should contact their local health department if they have questions or suspect a resident of a nursing home has COVID-19. Per CDC, prompt detection, triage and isolation of potentially infectious residents are essential to prevent unnecessary exposures among residents, healthcare personnel, and visitors at the facility. Therefore, facilities should continue to be vigilant in identifying any possible infected individuals. Facilities should consider frequent monitoring for potential symptoms of respiratory infection as needed throughout the day.

AMERICAN OVERSIGHT

Furthermore, we encourage facilities to take advantage of resources that have been made available by CDC and CMS to train and prepare staff to improve infection control and prevention practices. Lastly, facilities should maintain a person-centered approach to care. This includes communicating effectively with residents, resident representatives and/or their family, and understanding their individual needs and goals of care.

Facilities experiencing an increased number of respiratory illnesses (regardless of suspected etiology) among patients/residents or healthcare personnel should immediately contact their local or state health department for further guidance.

In addition to the overarching regulations and guidance, we're providing the following information (Frequently Asked Questions) about some specific areas related to COVID-19:

Guidance for Limiting the Transmission of COVID-19 for Nursing Homes

How should facilities monitor or *restrict* visitors?
If visitors meet the criteria below, facilities may restrict their entry to the facility. Regulations and guidance related to restricting a resident's right to visitors can be found at 42 CFR §483.10(f)(4), and at F-tag 563 of Appendix PP of the State Operations Manual. Specifically, a facility may need to restrict or limit visitation rights for reasonable clinical and safety reasons. This includes, "restrictions placed to prevent community-associated infection or communicable disease transmission to the resident. A resident's risk factors for infection (e.g., chronic medical conditions) or current health state (e.g., end-of-life care) should be considered when restricting visitors. In general, visitors with signs and symptoms of a transmissible infection (e.g., a visitor is febrile and exhibiting signs and symptoms of an influenza-like illness) should defer visitation until he or she is no longer potentially infectious."

Facilities should *actively* screen *and restrict* visitation *by those who meet the following criteria*:

1. Signs or symptoms of a respiratory infection, such as fever, cough, shortness of breath, or sore throat.
2. *In the last 14 days*, has had contact with someone *with a confirmed diagnosis of COVID-19*, or under investigation for COVID-19, *or are ill with respiratory illness.*
3. International travel within the last 14 days to countries *with sustained community transmission*. For updated information on *affected* countries visit: https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html
4. *Residing in a community where community-based spread of COVID-19 is occurring.*

For those individuals that do not meet the above criteria, facilities can allow entry but may require visitors to use Personal Protective Equipment (PPE) such as facemasks (see expanded guidance below).

Limiting visitors and individuals: Expanded recommendations:
CMS is providing the following expanded guidance to prevent the spread of COVID-19 (in addition to the information above about restricting visitors).

- ***Restricting** means the individual should not be allowed in the facility at all, until they no longer meet the criteria above.*

AMERICAN OVERSIGHT

- ***Limiting*** *means the individual should not be allowed to come into the facility, except for certain situations, such as end-of-life situations or when a visitor is essential for the resident's emotional well-being and care.*
- ***Discouraging*** *means that the facility allows normal visitation practices (except for those individuals meeting the restricted criteria), however the facility advises individuals to defer visitation until further notice (through signage, calls, etc.).*

1. *Limiting or Discouraging visitation:*
   a) ***Limiting:*** *For facilities that are in counties, or counties adjacent to other counties where a COVID-19 case has occurred, we recommend* ***limiting*** *visitation (except in certain situations as indicated above). For example, a daughter who visits her mother every Monday, would cease these visits, and limit her visits to only those situations when her mom has a significant issue. Also, during the visit, the daughter would limit her contact with her mother and only meet with her in her room or a place the facility has specifically dedicated for visits.*
   b) ***Discouraging:*** *For all other facilities (nationwide) not in those counties referenced above, we recommend* ***discouraging*** *visitation (except in certain situations). See below for methods to discourage visitation. Also see CDC guidance to "stay at home" https://www.cdc.gov/coronavirus/2019-ncov/specific-groups/high-risk-complications.html#stay-home.*
2. *Facilities should increase visible signage at entrances/exist, offer temperature checks, increase availability to hand sanitizer, offer PPE for individuals entering the facility (if supply allows). Also, provide instruction, before visitors enter the facility and residents' rooms, on hand hygiene, limiting surfaces touched, and use of PPE according to current facility policy while in the resident's room. Individuals with fevers, other symptoms of COVID-19, or unable to demonstrate proper use of infection control techniques should be restricted from entry. Signage should also include language to discourage visits, such as recommending visitors defer their visit for another time or for a certain situation as mentioned above.*
3. *In addition to the screening visitors for the criteria for restricting access (above), facilities should ask visitors if they took any recent trips (within the last 14 days) on cruise ships or participated in other settings where crowds are confined to a common location. If so, facilities should suggest deferring their visit to a later date. If the visitor's entry is necessary, they should use PPE while onsite. If the facility does not have PPE, the facility should restrict the individual's visit, and ask them to come back at a later date (e.g., after a 14 days with no symptoms of COVID-19).*
4. *In cases when visitation is allowable, facilities should instruct visitors to limit their movement within the facility to the resident's room (e.g., reduce walking the halls, avoid going to dining room, etc.)*
5. *Facilities should review and revise how they interact with volunteers, vendors and receiving supplies, agency staff, EMS personnel and equipment, transportation providers (e.g., when taking residents to offsite appointments, etc.), other practitioners (e.g., hospice workers, specialists, physical therapy, etc.), and take necessary actions to prevent any potential transmission. For example, do not have supply vendors transport supplies inside the facility. Have them dropped off at a dedicated location (e.g., loading dock). Facilities can allow entry of these visitors as long as they are following the appropriate CDC guidelines for*

AMERICAN OVERSIGHT

Transmission-Based Precautions. For example, hospice workers can enter a facility when using PPE properly.

6. *In lieu of visits (either through limiting or discouraging), facilities can consider:*
    a) *Offering alternative means of communication for people who would otherwise visit, such as virtual communications (phone, video-communication, etc.).*
    b) *Creating/increasing listserv communication to update families, such as advising to not visit.*
    c) *Assigning staff as primary contact to families for inbound calls, and conduct regular outbound calls to keep families up to date.*
    d) *Offering a phone line with a voice recording updated at set times (e.g., daily) with the facility's general operating status, such as when it is safe to resume visits.*
7. *When visitation is necessary or allowable, facilities should make efforts to allow for safe visitation for residents and loved ones. For example:*
    a) *Suggest limiting physical contact with residents and others while in the facility. For example, practice social distances with no hand-shaking or hugging, and remaining six feet apart.*
    b) *If possible (e.g., pending design of building), creating dedicated visiting areas (e.g., "clean rooms") near the entrance to the facility where residents can meet with visitors in a sanitized environment. Facilities should disinfect rooms after each resident-visitor meeting.*
    c) *Residents still have the right to access the Ombudsman program. If in-person access is allowable, use the guidance mentioned above. If in-person access is not available due to infection control concerns, facilities need to facilitate resident communication (by phone or other format) with the Ombudsman program or any other entity listed in 42 CFR § 483.10(f)(4)(i).*
8. *Visitor reporting:*
    a) *Advise exposed visitors (e.g., contact with COVID-19 resident prior to admission) to monitor for signs and symptoms of respiratory infection for at least 14 days after last known exposure and if ill to self-isolate at home and contact their healthcare provider.*
    b) *Advise visitors to report to the facility any signs and symptoms of COVID-19 or acute illness within 14 days after visiting the facility.*

How should facilities monitor or restrict health care facility staff?

The same screening performed for visitors should be performed for facility staff.

- Health care providers (HCP) who have signs and symptoms of a respiratory infection should not report to work.
- Any staff that develop signs and symptoms of a respiratory infection while on-the-job, should:
    - Immediately stop work, put on a facemask, and self-isolate at home;
    - Inform the facility's infection preventionist, and include information on individuals, equipment, and locations the person came in contact with; and
    - Contact and follow the local health department recommendations for next steps (e.g., testing).
- Refer to the CDC guidance for exposures that might warrant restricting asymptomatic healthcare personnel from reporting to work (https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html).

AMERICAN OVERSIGHT

Facilities should contact their local health department for questions, and frequently review the CDC website dedicated to COVID-19 for health care professionals (https://www.cdc.gov/coronavirus/2019-nCoV/hcp/index.html).

When should nursing homes consider transferring a resident with suspected or confirmed infection with COVID-19 to a hospital?
Nursing homes with residents suspected of having COVID-19 infection should contact their local health department. Residents infected with COVID-19 may vary in severity from lack of symptoms to mild or severe symptoms or fatality. Initially, symptoms may be mild and not require transfer to a hospital as long as the facility can follow the infection prevention and control practices recommended by CDC. Facilities without an airborne infection isolation room (AIIR) are not required to transfer the resident assuming: 1) the resident does not require a higher level of care and 2) the facility can adhere to the rest of the infection prevention and control practices recommended for caring for a resident with COVID-19.

Please check the following link regularly for critical updates, such as updates to guidance for using PPE: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html.

The resident may develop more severe symptoms and require transfer to a hospital for a higher level of care. Prior to transfer, emergency medical services and the receiving facility should be alerted to the resident's diagnosis, and precautions to be taken including placing a facemask on the resident during transfer. If the resident does not require hospitalization they can be discharged to home (in consultation with state or local public health authorities) if deemed medically and socially appropriate. Pending transfer or discharge, place a facemask on the resident and isolate him/her in a room with the door closed.

When should a nursing home accept a resident who was diagnosed with COVID-19 from a hospital?
A nursing home can accept a resident diagnosed with COVID-19 and still under Transmission-Based Precautions for COVID-19 as long as the facility can follow CDC guidance for Transmission-Based Precautions. If a nursing home cannot, it must wait until these precautions are discontinued. CDC has released Interim Guidance for Discontinuing Transmission-Based Precautions or In-Home Isolation for Persons with Laboratory-confirmed COVID-19. Information on the duration of infectivity is limited, and the interim guidance has been developed with available information from similar coronaviruses. CDC states that decisions to discontinue Transmission-based Precautions in hospitals will be made on a case-by-case basis in consultation with clinicians, infection prevention and control specialists, and public health officials. Discontinuation will be based on multiple factors (see current CDC guidance for further details).

Note: Nursing homes should admit any individuals that they would normally admit to their facility, including individuals from hospitals where a case of COVID-19 was/is present. ***Also, if possible, dedicate a unit/wing exclusively for any residents coming or returning from the hospital. This can serve as a step-down unit where they remain for 14 days with no symptoms (instead of integrating as usual on short-term rehab floor, or returning to long-stay original room).***

AMERICAN OVERSIGHT

Other considerations for facilities:

- Review CDC guidance for Infection Prevention and Control Recommendations for Patients with Confirmed Coronavirus Disease 2019: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/control-recommendations.html
- Increase the availability and accessibility of alcohol-based hand rubs (ABHRs), *reinforce strong hand-hygiene practices,* tissues, no touch receptacles for disposal, and facemasks at healthcare facility entrances, waiting rooms, resident check-ins, etc.
    - Ensure ABHR is accessible in all resident-care areas including inside and outside resident rooms.
- Increase signage for vigilant infection prevention, such as hand hygiene and cough etiquette.
- Properly clean, disinfect and limit sharing of medical equipment between residents and areas of the facility.
- Provide additional work supplies to avoid sharing (e.g., pens, pads) and disinfect workplace areas (nurse's stations, phones, internal radios, etc.).

Will nursing homes be cited for not having the appropriate supplies?

CMS is aware of that there is a scarcity of some supplies in certain areas of the country. State and Federal surveyors should not cite facilities for not having certain supplies (e.g., PPE such as gowns, N95 respirators, surgical masks and ABHR) if they are having difficulty obtaining these supplies for reasons outside of their control. However, we do expect facilities to take actions to mitigate any resource shortages and show they are taking all appropriate steps to obtain the necessary supplies as soon as possible. For example, if there is a shortage of ABHR, we expect staff to practice effective hand washing with soap and water. Similarly, if there is a shortage of PPE (e.g., due to supplier(s) shortage which may be a regional or national issue), the facility should contact the local and state public health agency to notify them of the shortage, follow national guidelines for optimizing their current supply, or identify the next best option to care for residents. If a surveyor believes a facility should be cited for not having or providing the necessary supplies, the state agency should contact the CMS Branch Office.

What other resources are available for facilities to help improve infection control and prevention?

CMS urges providers to take advantage of several resources that are available:

CDC Resources:

- Infection preventionist training: https://www.cdc.gov/longtermcare/index.html
- CDC Resources for Health Care Facilities: https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/index.html
- CDC Updates: https://www.cdc.gov/coronavirus/2019-ncov/whats-new-all.html
- CDC FAQ for COVID-19: https://www.cdc.gov/coronavirus/2019-ncov/infection-control/infection-prevention-control-faq.html
- *Information on affected US locations: https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html*

AMERICAN OVERSIGHT

CMS Resources:

- Long term care facility – Infection control self-assessment worksheet: https://qsep.cms.gov/data/252/A._NursingHome_InfectionControl_Worksheet11-8-19508.pdf
- Infection control toolkit for bedside licensed nurses and nurse aides ("Head to Toe Infection Prevention (H2T) Toolkit"): https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/SurveyCertificationGenInfo/LTC-CMP-Reinvestment
- Infection Control and Prevention regulations and guidance: 42 CFR 483.80, Appendix PP of the State Operations Manual. See F-tag 880: https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/GuidanceforLawsAndRegulations/Downloads/Appendix-PP-State-Operations-Manual.pdf

Contact: Email DNH_TriageTeam@cms.hhs.gov

NOTE: The situation regarding COVID-19 is still evolving worldwide and can change rapidly. Stakeholders should be prepared for guidance from CMS and other agencies (e.g., CDC) to change. Please monitor the relevant sources regularly for updates.

Effective Date: Immediately. This policy should be communicated with all survey and certification staff, their managers and the State/Regional Office training coordinators immediately.

FDOH: As of 7:55 a.m. ET 03/09/20

2019 Novel Coronavirus (COVID-19)

Positive Cases of COVID-19

12 – Florida Residents
5 – Florida Cases Repatriated*
1 – Non-Florida resident

Deaths

2 – Florida Residents

Number of Negative Test Results

140

Number of Pending Testing Results

115

Number of People Under Public Health Monitoring

302 – currently being monitored
1104 – people monitored to date

People Under Public Health Monitoring: The number of people under public health monitoring includes those at risk of having been exposed to COVID-19 who are monitoring their health under the supervision of public health officials.

***Florida Cases Repatriated**: The United States Department of State officially coordinated the return of a person living in Florida to the United States and those persons are isolated at a federally designated site until healthy. A repatriated case is when the United States Department of State officially coordinates the return of a Florida resident to the United States.

AMERICAN OVERSIGHT

Presumptive Positive: A Presumptive Positive is when a state health lab has a positive test without CDC confirmation.

Confirmed: A Confirmed status is given when the Presumptive Positive sample is then confirmed by the CDC.

AMERICAN OVERSIGHT

PREPAREDNESS

Skilled Nursing Facilities

- Education to be carried out with ALL STAFF
  - Symptoms/Prevention/Surveillance
  - Cough Etiquette ***(attachment #1)***
  - Hand Hygiene ***(attachment #2)***
  - Personal Protective Equipment
- Post signage
  - Visitor/Vendor entrances
    - Notify if cough, fever and/or shortness of breath present - will not allow visitors if symptoms present - *Greystone Visitor Sign* ***(attachment #3)***
    - Front Desk/Receptionist to receive education regarding this process ***(attachment #4)***
- Surveillance
  - Infection Control Preventionist (ICP) to track and trend all respiratory infections; pneumonia dx to be reviewed by respective RDCO *(CDC Line Listing - **attachment #5**)*
  - Those exhibiting s/s of cough, fever and/or shortness of breath will notify RDCO for review
  - Ongoing communication with local health department – each respective ED/DNS to make contact
- Housekeeping
  - High focus on cleaning with EPA in high risk areas; i.e. doorknobs, railings, therapy gym, mechanical lifts, visitor bathrooms, dining tables/chairs, telephones, keyboards, mouse, etc.
  - ED/DNS/ICP/HSK Director to conduct walking rounds daily
- Kitchen Sanitation
  - Meal tray carts to be disinfected after each meal service
  - Special caution of meat/poultry handling and cooking

This document has been created for internal use only by Risk Management, Corporate Compliance, and Quality Assurance Committees, and pursuant to legal instruction, for improvement and evaluation of resident safety, quality of care, processes, and services, as well as litigation.

AMERICAN OVERSIGHT

- Family/Resident Representative Communication
  - Approved mailing from home office to be sent out to resident representatives (*Communications Department to distribute*)

- Staffing
  - Education to be carried out with each staffing coordinator to report up any staff member out of the country on PTO – facility to review each with respective RDCO if they are identified in order to receive clearance to return to work (***attachment #6***)
  - New hires to be screened if they have been out of the country over the past 30 days or have had close contact with those who have been out of the country – will review each as they are identified with RDCO to clear for onboarding (***attachment #6***)

Admissions Team:

- Education – Hand Hygiene/Cough Etiquette
- Screening Criteria
  - Will not admit if resident/patient has been out of the country or has had close contact with anyone who has been out of the country – to follow screening criteria flowsheet (***attachment #7***)
  - Notify Director of Nursing prior to accepting resident for admission – DON to consult Medical Director for clearance

Home Health:

- Education - Hand Hygiene/Cough Etiquette
- Screening Criteria
  - Will not admit if resident/patient has been out of the country or has had close contact with anyone who has been out of the country – to follow screening criteria flowsheet (***attachment #7***)
  - Notify Director of Nursing prior to accepting resident for admission – DON to consult Medical Director for clearance

Corporate Home Office:

- Town Hall to be held Wednesday 03/04/20 to educate on;
  - Hand Hygiene/Cough Etiquette
  - Symptoms/Prevention/Surveillance
  - Alert management if planning on going out of the country or have had close contact to anyone who has gone out of the country
- Front Desk at corporate office to receive screening questions for any visitor/vendor's – anyone exhibiting respiratory s/s/fever/SOB and/or has been out of the country will not be allowed to visit (***attachment #4***)
- Increase in housekeeping focus to ensure daily deep cleaning of high-risk areas are being carried out...i.e. keyboards, desks, mouse, doorknobs, bathrooms

RESPONSE

Healthcare Professional Preparedness Checklist for Transport and Arrival of Patients with Confirmed or Possible COVID-19

- Assessment and triage of patients with acute respiratory symptoms
- Patient placement
- Implementation of Standard, Contact, and Airborne Precautions, including the use of eye protection
- Visitor management and exclusion
- Source control measures for patients (e.g., put facemask on suspect patients)
- Requirements for performing aerosol generating procedures (avoid)
- Be alert for patients who meet the persons under investigation (PUI) definition
- Report a potential COVID-19 case or exposure to facility infection control leads and public health officials – know your local health department contact and immediately report for guidance
- Know who, when, and how to seek evaluation by occupational health following an unprotected exposure (i.e., not wearing recommended PPE) to a suspected or confirmed coronavirus disease 2019 patient
- Know how to contact and receive information from your state or local public health agency

This document has been created for internal use only by Risk Management, Corporate Compliance, and Quality Assurance Committees, and pursuant to legal instruction, for improvement and evaluation of resident safety, quality of care, processes, and services, as well as litigation.

AMERICAN OVERSIGHT

EDUCATION OVERVIEW

What is COVID-19 (Coronavirus)

- Centers for Disease Control & Prevention (CDC) and the World Health Organization (WHO) is responding to an outbreak of respiratory disease caused by a novel (new) coronavirus that was first detected in China and which has now been detected in 60 locations internationally, including in the United States
- The virus has been named "SARS-CoV-2" and the disease it causes has been named "coronavirus disease 2019" (abbreviated "COVID-19")

How Does it Spread...

- Person-to-person spread
  - Between people who are in close contact with one another (within about 6 feet).
  - Through respiratory droplets produced when an infected person coughs or sneezes

  ***These droplets can land in the mouths or noses of people who are nearby or possibly by inhaled into the lungs

- Spread from contact with infected surfaces or objects
  - It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads

Symptoms...

May appear **2-14 days after exposure***

- Fever
- Cough
- Shortness of breath

Prevention...

There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19). The best way to prevent illness is to avoid being exposed to this virus. However, as a reminder, CDC always recommends everyday preventive actions to help prevent the spread of respiratory diseases, including:

- Avoid close contact with people who are sick
- Avoid touching your eyes, nose, and mouth

This document has been created for internal use only by Risk Management, Corporate Compliance, and Quality Assurance Committees, and pursuant to legal instruction, for improvement and evaluation of resident safety, quality of care, processes, and services, as well as litigation.

AMERICAN OVERSIGHT

- Stay home when you are sick
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash
- Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe
- Follow CDC's recommendations for using a facemask
    - **CDC does not recommend that people who are well wear a facemask to protect themselves from respiratory diseases, including COVID-19**
    - Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others. The use of facemasks is also crucial for health workers and people who are taking care of someone in close settings
- Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing
    - If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty

Sent: Tuesday, March 17, 2020 3:03 PM
To: Bland, Shushan Gemora <ShushanGemora.Bland@ahca.myflorida.com>
Cc: Zaki, Pilar <Pilar.Zaki@ahca.myflorida.com>
Subject: Statewide Federal Awards Audit for Fiscal Year 2018-19 - Subsequent Events Inquiry

Shushan,

In a Uniform Guidance compliance audit, two types of subsequent events may occur. The first type consists of events that provide additional evidence with respect to conditions that existed at the end of the reporting period that affect the entity's compliance during the reporting period. The second type consists of events of noncompliance that did not exist at the end of the reporting period but arose subsequent to the reporting period.

Our primary consideration would be for events that provide additional evidence with respect to conditions that existed at June 30, 2019, that affect the entity's compliance during the 2018-19 fiscal year. Examples include:

- Relevant internal auditors' reports issued during the subsequent period.
- Other auditors' reports identifying noncompliance that were issued during the subsequent period. (Examples might include grantor agency Inspector General' audits and audits by the Executive Office of the Governor's Inspector General.
- Regulatory agencies' reports on the entity's noncompliance that were issued during the subsequent period. (Examples might include grantor agency monitoring or investigations.)

We are also concerned with events of noncompliance that occurred during the period subsequent to June 30, 2019. An example is the discovery of noncompliance in the subsequent period of such magnitude that it caused the grantor to stop funding the program.

As indicated in the Statewide Federal Awards engagement letter, dated May 2, 2019, the Federal Awards Programs and Activities included in this audit are:

- Medicaid Cluster (CFDA Nos. 93.775, 93.777, and 93.778)
- Children's Health Insurance Program (CFDA No. 93.767)
- Refugee and Entrant Assistance State/Replacement Designee Administered Programs (CFDA No. 93.566)

AMERICAN OVERSIGHT

As such, please provide information related to any subsequent events, as described above, related to these programs.

In order to timely release the Statewide Federal Awards Audit, **a response by March 20, 2020 is required**.

Please let me know if you have any additional questions. Thank you.

Susan

Hi Stefan - see verbiage below on alert that will go out from Medicaid which includes the below paragraph on fair hearings. Let me know if you have questions or would like to discuss. My cell is: 264-4762. Working from home today.

Health Plan Appeals and Fair Hearings

If needed, recipients impacted by COVID-19 may be given more time to submit an appeal through their health plan or request a fair hearing. In addition, the Agency has sought federal approval to temporarily delay scheduling of Medicaid fair hearings and issuing fair hearing decisions during the emergency period if there are workforce shortages. The Agency would limit use of this flexibility to those instances where the recipient is continuing to receive services pending the outcome of the fair hearing.

FLORIDA MEDICAID

A Division of the Agency for Health Care Administration

Florida Medicaid Health Care Alert

March 16, 2020

Provider Type(s): All

Medicaid Coverage of Services During the State of Emergency Related to COVID-19

The Agency for Health Care Administration (Agency) is committed to ensuring that Medicaid recipients diagnosed with the 2019 novel coronavirus (COVID-19) receive all the care needed to address their symptoms. **Florida Medicaid covers and will cover all medically necessary services required to**

AMERICAN OVERSIGHT

facilitate testing and treatment of COVID-19. The purpose of this alert is to provide guidance on the flexibilities offered to providers furnishing services to recipients impacted by COVID-19. This policy guidance applies to services rendered through both the fee-for-service (FFS) delivery system and the Statewide Medicaid Managed Care (SMMC) program.

Here is the list of modifications being made now. As the situation evolves, the Agency may make additional changes to assist providers and to meet the needs of recipients.

Prior Authorization Requirements

In order to reduce administrative burdens on key providers that are on the front line serving the populations most impacted by COVID-19, Florida Medicaid is waiving prior authorization requirements for hospital services, physician services, advanced practice registered nursing services, home health services, and durable medical equipment and supplies. This will allow these provider types to redeploy resources used to complete these functions, as needed. In addition to the services listed above, Florida Medicaid is waiving all prior authorization requirements for all services necessary to appropriately evaluate and treat Medicaid recipients diagnosed with COVID-19. Please refer to official diagnosis coding guidelines that have been published by the Centers for Disease Control (CDC).

Limits on Services

- Florida Medicaid will waive limits on services (specifically related to frequency, duration, and scope) that need to be exceeded in order to maintain the health and safety of recipients diagnosed with COVID-19 or when it is necessary to maintain a recipient safely in their home. Examples of services include: the 45-day hospital inpatient limit, home health services, durable medical equipment, in-home physician visits, etc.
- Florida Medicaid lifted all limits on early prescription refills during the state of emergency for maintenance medications, except for controlled substances. The edits prohibiting early prescription refills will remain lifted until further notice by the Agency. This will assist recipients who may need to be self-quarantined for a period of time.
- Florida Medicaid will reimburse for a 90-day supply of maintenance prescriptions when available at the pharmacy. The recipient must request that the pharmacy dispense a 90-day supply. In addition, Florida Medicaid will allow mail order delivery of maintenance prescriptions in those instances when recipients are prohibited from going to a retail pharmacy. Florida Medicaid will also pay for a 90-day supply of maintenance prescriptions through mail order delivery.

Cost Sharing

Florida Medicaid is waiving all co-payments related to testing and diagnosing COVID-19 and treating Medicaid recipients diagnosed with COVID-19.

Health Plan Appeals and Fair Hearings

If needed, recipients impacted by COVID-19 may be given more time to submit an appeal through their health plan or request a fair hearing. In addition, the Agency has sought federal approval to temporarily delay scheduling of Medicaid fair hearings and issuing fair hearing decisions during the emergency period if there are workforce shortages. The Agency would limit use of this flexibility to those instances where the enrollee is continuing to receive services pending the outcome of the fair hearing.

Preadmission Screening and Resident Reviews

AMERICAN OVERSIGHT

All Preadmission Screening and Resident Review (PASRR) processes may be postponed until further notice by the Agency.

- Retroactively performed screenings or resident reviews must document the reason for delay in the completion of PASRR requirements.

Provider Enrollment

Florida Medicaid will pay for medically necessary services provided to recipients diagnosed with COVID-19, regardless of whether the provider is located in-state or out-of-state. To be reimbursed for services rendered to eligible Florida Medicaid recipients, providers not already enrolled in Florida Medicaid (out-of-state or in-state) must complete a provisional (temporary) enrollment application. The process for provisional provider enrollment is located at http://www.mymedicaid-florida.com. In the event of workforce shortages in the State, practitioners that are not already enrolled in Florida can seek enrollment following the instructions above.

Face-to-Face Provider Site Visits

In order to reduce community-spread of the virus, the Agency (and its Medicaid health plans) will be postponing face-to-face provider-site visit requirements (e.g., enrollment, credentialing, etc.) until further notice. Whenever possible, these requirements will be met telephonically or through audio/visual technology.

Federal Authorities

The Centers for Medicare and Medicaid Services has issued a set of blanket waivers that states may utilize in response to COVID-19. The Agency has already received authority for many of these waivers related to health care facilities and licensure requirements. The Agency is actively working to receive the federal authority needed for many of the items listed in this alert related to the Medicaid program. For a full list of the blanket waivers issued by CMS, click on this link: https://www.cms.gov/files/document/covid19-emergency-declaration-health-care-providers-fact-sheet.pdf.

The Agency will be issuing subsequent guidance related to additional flexibilities or service enhancements that will be enacted to ensure there is no disruption in care for Medicaid recipients in the event of workforce shortages or limitations in recipients seeking care in provider offices (e.g., telemedicine, expanding the participant directed option in the Long-Term Care program, etc.).

QUESTIONS? FLMedicaidManagedCare@ahca.myflorida.com
COMPLAINTS OR ISSUES? ON LINE http://ahca.myflorida.com/Medicaid/complaints/| **CALL** 1-877-254-1055

The Agency for Health Care Administration is committed to its mission of providing "Better Health Care for All Floridians." The Agency administers Florida's Medicaid program, licenses and regulates more than 48,000 health care facilities and 47 health maintenance organizations, and publishes health care data and statistics at www.FloridaHealthFinder.gov. Additional information about Agency initiatives is available via Facebook (AHCAFlorida), Twitter (@AHCA_FL) and YouTube(/AHCAFlorida).

CMS Approves First State Request for 1135 Medicaid Waiver in Florida

Action gives state greater flexibility for its COVID-19 response efforts

On March 13, 2020, President Trump declared the rapidly evolving COVID-19 situation a national emergency. This bold action enables the Centers for Medicare and Medicaid Services (CMS) to waive certain requirements in Medicare, Medicaid, and CHIP under Section 1135 authority. This includes the ability to grant state and territorial Medicaid agencies a wider range of flexibilities, and states may now submit Section 1135 waiver requests for CMS approval that will remove administrative burdens and expand access to needed services.

AMERICAN OVERSIGHT

Shortly after the President's declaration, Florida became the first state to submit a Section 1135 waiver request in response to the COVID-19 national emergency. In keeping with CMS's commitment to ensure our state partners have the tools they need to combat COVID-19, the agency acted within days to approve a wide variety of appropriate Medicaid flexibilities.

"I want to thank Governor DeSantis for his leadership in Medicaid and for taking full advantage of federal flexibilities," said CMS Administrator Seema Verma. "CMS is committed to removing all unnecessary administrative and bureaucratic barriers that may hinder an effective response to this public health emergency, and I have directed my team to expeditiously process these requests."

The state's approval letter can be found here, and includes flexibilities that enable the state to waive prior authorization requirements to remove barriers to needed services, streamline provider enrollment processes to ensure access to care for beneficiaries, allow care to be provided in alternative settings in the event a facility is evacuated to an unlicensed facility, suspend certain nursing home screening requirements to provide necessary administrative relief, and extend deadlines for appeals and state fair hearing requests. These flexibilities will enable the state to focus its resources on combatting this outbreak and provide the best possible care to Medicaid beneficiaries in their state.

"Florida is acutely focused on eliminating unnecessary barriers on our health care providers who are on the front lines serving our communities most impacted by COVID-19," said Florida Governor Ron DeSantis. "President Trump recognizes this need and Administrator Seema Verma is providing Florida the critical flexibility for our state's Medicaid program by waiving prior authorization requirements for essential health care services and expedited provider enrollment."

CMS provides guidance to states on how to apply for Section 1135 waivers through the Medicaid Disaster Response Tool Kit, which can be found here. CMS will continue to expeditiously review and approve as appropriate all Section 1135 waivers and other requests that the agency receives to ensure that we are providing our state partners with the maximum flexibility they need to care for their Medicaid beneficiaries during the public health emergency. To support these efforts, CMS is developing checklists and tools to expedite requests and approvals for waivers and other commonly requested flexibilities.

While Florida is the first state to apply for this waiver authority, CMS expects more states will also submit similar requests. Additional Section 1135 approval letters will be posted here as they are issued.

This action, and earlier CMS actions in response to the COVID-19 virus, are part of the ongoing White House Task Force efforts. To keep up with the important work the Task Force is doing in response to COVID-19 click here www.coronavirus.gov. For information specific to CMS, please visit the Current Emergencies Website.

Here is a summary of CMS Public Health Action on COVID-19 to date:

AMERICAN OVERSIGHT

March 13, 2020: CMS announced a series of blanket waivers and action taken across the agency's programs following the President's declaration of a national emergency. https://www.cms.gov/newsroom/press-releases/cms-takes-action-nationwide-aggressively-respond-coronavirus-national-emergency

March 13: CMS announced new measures to protect nursing home residents by significantly restricting visitors and nonessential personnel. https://www.cms.gov/newsroom/press-releases/cms-announces-new-measures-protect-nursing-home-residents-covid-19

March 13, 2020: CMS issued Frequently Asked Questions (FAQs) on Essential Health Benefits (EHB) Coverage in response to the 2019 Novel Coronavirus (COVID-19) outbreak. The FAQs detail existing federal rules governing health coverage provided through the individual and small group insurance markets that apply to the diagnosis and treatment of COVID-19. https://www.cms.gov/newsroom/press-releases/cms-publishes-faqs-ensure-individuals-issuers-and-states-have-clear-information-coverage-benefits

March 12, 2020: CMS issued Frequently Asked Questions (FAQs) to aid state Medicaid and Children's Health Insurance Program (CHIP) agencies in their response to the 2019 Novel Coronavirus (COVID-19) outbreak. https://www.cms.gov/newsroom/press-releases/cms-publishes-first-set-covid-19-frequently-asked-questions-faqs-state-medicaid-and-childrens-health

March 12, 2020: CMS posted the payment amounts determined by Local Medicare Administrative Contractors (MACs) for claims they receive for COVID-19 Test Pricing in their respective jurisdictions until Medicare establishes national payment rates. https://www.cms.gov/files/document/mac-covid-19-test-pricing.pdf

March 10, 2020: CMS issued guidance to home health agencies and dialysis facilities with actionable information for healthcare workers on screening, treatment and transfer procedures to follow when interacting with patients in response to the 2019 Novel Coronavirus (COVID-19) outbreak. https://www.cms.gov/newsroom/press-releases/cms-sends-more-detailed-guidance-providers-about-covid-19

March 10, 2020: CMS issued a frequently asked questions to ensure State Survey Agencies and accrediting organizations charged with inspecting nursing homes and other health care facilities, understand that non-emergency survey inspections are suspended. https://www.cms.gov/newsroom/press-releases/covid-19-response-news-alert-cms-issues-frequently-asked-questions-guidance-state-survey-agencies

March 10, 2020: CMS issued guidance on Medicare Advantage (MA) and Part D health and prescription drug plans informing them of the flexibilities they have to provide healthcare coverage for testing, treatments, and prevention of 2019 Novel Coronavirus Disease (COVID-19). https://www.cms.gov/newsroom/press-releases/cms-issues-guidance-help-medicare-advantage-and-part-d-plans-respond-covid-19

March 10, 2020: CMS issued guidance on the range of facemasks that can be temporarily used based on recent changes to CDC and FDA facemask and respirator guidance in light of COVID-

AMERICAN OVERSIGHT

19 and supply demands. https://www.cms.gov/newsroom/press-releases/covid-19-response-news-alert-cms-issues-key-protective-mask-guidance-healthcare-workers

On March 9, 2020: CMS delivered detailed guidance on the screening, treatment and transfer procedures healthcare workers must follow when interacting with patients to prevent the spread of COVID-19 in a hospice setting. CMS also issued additional guidance specific to nursing homes to help control and prevent the spread of the virus. https://www.cms.gov/newsroom/press-releases/cms-issues-clear-actionable-guidance-providers-about-covid-19-virus

On March 9, 2020: CMS issued a fact sheet with additional guidance for healthcare providers and patients about the telehealth benefits in the agency's Medicare program. Expanded use of virtual care, such as virtual check-ins, are important tools for keeping beneficiaries healthy, while helping to contain the community spread of the COVID-19 virus. https://www.cms.gov/newsroom/press-releases/telehealth-benefits-medicare-are-lifeline-patients-during-coronavirus-outbreak

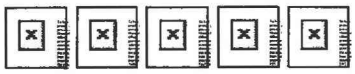
On March 9, 2020: CMS published guidance to hospitals with emergency departments (EDs) on patient screening, treatment and transfer requirements to prevent the spread of infectious disease and illness, including COVID-19. Medicare-participating hospitals are to follow both CDC guidance for infection control and Emergency Medical Treatment and Labor Act (EMTALA) requirements. https://www.cms.gov/newsroom/press-releases/cms-issues-call-action-hospital-emergency-departments-screen-patients-coronavirus

March 6, 2020: CMS issued frequently asked questions and answers (FAQs) for healthcare providers regarding Medicare payment for laboratory test and other services related to the 2019-Novel Coronavirus (COVID-19). https://www.cms.gov/newsroom/press-releases/covid-19-response-news-alert-cms-issues-frequently-asked-questions-assist-medicare-providers

March 5, 2020: CMS issued a second Healthcare Common Procedure Coding System (HCPCS) code for certain COVID-19 laboratory tests, in addition to three fact sheets about coverage and benefits for medical services related to COVID-19 for CMS programs. https://www.cms.gov/newsroom/press-releases/cms-develops-additional-code-coronavirus-lab-tests

March 4, 2020: CMS issued a call to action to healthcare providers nationwide and offered important guidance to help State Survey Agencies and Accrediting Organizations prioritize their inspections of healthcare. https://www.cms.gov/newsroom/press-releases/cms-announces-actions-address-spread-coronavirus

February 13, 2020: CMS issued a new HCPCS code for providers and laboratories to test patients for COVID-19. https://www.cms.gov/newsroom/press-releases/public-health-news-alert-cms-develops-new-code-coronavirus-lab-test



February 6, 2020: CMS gave CLIA-certified laboratories information about how they can test for SARS-CoV-2. https://www.cms.gov/medicareprovider-enrollment-and-certificationsurveycertificationgeninfopolicy-and-memos-states-and/notification-surveyors-authorization-emergency-use-cdc-2019-novel-coronavirus-2019-ncov-real-time-rt

Kim,

FHA sent me these CMS waivers and suggested they could waive CMS regulations for expanding hospital beds to unlicensed facilities or locations. Nothing here seems to address that for me. What do you think?

Stefan

Subject: [External] CMS Waiver Request 3.14.20 - COVID-19

Stefan –

I pulled the waivers we have requested from CMS in the past for Hurricanes. I edited the language to reflect COVID-19. I looked through the CMS docs from last night and the question I have is do we need to submit all of these or did we get them blanketed on the whole country. American Hospital Association is working on getting an answer from the administration on this right now.

I can send to the CMS Regional Office which is what we usually do. Just let me know what you'd like me to do.

One state issues we are having is with the AHCA observation form, it's causing a lot of issues with the patients we are holding and is causing us to have to send in additional staff to do the notification which increases risk and burns through PPE. Can we get a waiver on that ?

Thank you,

Crystal Stickle
Interim President
Florida Hospital Association

Florida CMS Waiver Requests March 14, 2020

COVID-19 Response:

Pursuant to the federal declaration of sections 201 and 301 of the National Emergencies Act (50 U.S.C. 1601 *et seq.*) and consistent with section 1135 of the Social Security Act (SSA), as amended (42 U.S.C. 1320b-5), Florida Hospital Association is requesting the following waivers from the Centers for Medicare & Medicaid Services (CMS) to respond to COVID-19.

Florida Waiver Requests
Saturday, March 14, 2020 1:00 PM EST

1. **Treatment of Medical/Surgical patients in non-PPS hospitals and/or units:**
We respectfully request a blanket waiver be issued allowing hospitals the ability to treat medical/surgical patients in non-PPS hospitals and/or units (e.g. Rehabilitation, LTCH).

2. **Waiver of Three-Day Prior hospitalization for Skilled Nursing Facility Coverage:**
We respectfully request a blanket waiver be issued allowing skilled nursing facility coverage of hospital transfers absent a qualifying three day inpatient admission and for people who are evacuated, transferred, or otherwise dislocated due to COVID -19 response efforts

3. **Waiver of Conditions of Participation and Certification:**
We respectfully request a blanket waiver be issued allowing certain conditions of participation, certification requirements, program participation or similar requirements for individual health care providers or types of health care providers, including as applicable, a hospital or provider of services, a physician or other health care practitioner or professional, a health care facility, or a supplier of health care items or services, and pre-approval requirements.

4. **Out of State Physician Practice**
We respectfully request a blanket waiver be issued allowing requirements that physicians or other health care professionals hold licenses in the State in which they provide services, if they have an equivalent license from another State (and are not affirmatively barred from practice in that State or any State a part of which is included in the emergency area).

5. **EMTALA Waiver**
We respectfully request a blanket waiver be issued for sanctions under section 1867 of the Act (the Emergency Medical Treatment and Labor Act, or EMTALA) for the direction or relocation of an individual to another location to receive medical screening pursuant to an appropriate state emergency preparedness plan or for the transfer of an individual who has not been stabilized if the transfer is necessitated by the circumstances of the declared Federal public health emergency for COVID-19.

6. **Physician Self-Referral**
We respectfully request a blanket waiver be issued for sanctions under section 1877(g) (relating to limitations on physician referral) under such conditions and in such circumstances as the Centers for Medicare & Medicaid Services determines appropriate.

AMERICAN OVERSIGHT

7. **Medicare Advantage Plans**
We respectfully request a blanket waiver be issued for limitations on payments under section 1851(i) of the Act for health care items and services furnished to individuals enrolled in a Medicare Advantage plan by health care professionals or facilities not included in the plan's network.

8. **CAH Hospitals Exceeding 25-beds**
We respectfully request a blanket waiver be issued for requirements that Critical Access Hospitals (CAH) limit the number of beds to 25, and that the length of stay be limited to 96 hours. This waiver request is limited to identified impacted counties and geographical areas. The State or impacted provider (i.e. CAH) should still forward provider information and waiver requests to the CMS Atlanta RO for tracking purposes.

9. **MDS and OASIS**
We respectfully request a blanket waiver be issued for timeframe requirements for OASIS and Minimum Data Set (MDS) assessments and transmission. The State or impacted provider (i.e. home health agencies and skilled nursing facilities, respectively) should still forward provider information and waiver requests to the CMS Atlanta RO for tracking purposes.

10. **Medicare Contractor Requirements**
We respectfully request a blanket waiver be issued for providing for the temporary suspension of Medicare contractor requirements regarding medical review and some benefit integrity responsibilities. This includes the following:
- Assurances that future retrospective denials based on inappropriate place of service will take into account the period of time and circumstances when the disaster occurred;
- Assurances that future medical review audits and denials will take into account the period of time and circumstances when the disaster occurred;
- Assurances that Medicare's two day payment policy used in determining whether an inpatient admission is reasonable and payable under Medicare Part A will take into account the period of time and circumstances when the disaster occurred;
- A delay in requests by Medicare contractors (e.g. MACs, RACs, ZPICs, CERTs) for additional documentation requests/medical records from hospitals;
- A delay in the amount of time a hospital has to appeal audit findings;
- A delay in any hearings to challenge RAC determinations; and
- A delay in the 30 day period before the RAC sends the results of their audit to the MAC for recoupment.

We are not requesting a lapse of enforcement for actions relating to fraud and abuse.

11. **Suspension of Enforcement Activities**
We respectfully request a blanket waiver be issued for the temporary suspension of survey agency requirements of plans of correction and/or other survey enforcement timelines that were in process for hospitals. We are not requesting a lapse of enforcement for actions of ill intentions.

12. **Quality Reporting and Value Based Purchasing Programs:**
We respectfully request a blanket waiver be issued for the exceptions under certain Medicare quality reporting and value-based purchasing programs to acute care hospitals, PPS-exempt cancer hospitals, inpatient psychiatric facilities, skilled nursing facilities, home health agencies, hospices, inpatient rehabilitation facilities, Renal Dialysis Facilities, long-term care hospitals, and ambulatory surgical centers.

We ask that this waiver apply to all counties based on the declaration of a Public Health Emergency by the Secretary of Health and Human Services applicable to the entire state of Florida.

AMERICAN OVERSIGHT

13. **CMS-13 Requirements**

We respectfully request a blanket waiver be issued allowing rehab hospitals the ability to treat medical/surgical patients and receive an exemption from the requirements of CMS-13 which requires that 60 percent of the patients treated at a facility paid under the rehab prospective payment system be treated for one of 13 specified conditions.

Subject: [External] IMPORTANT: Travel Restrictions for Employees of the State Personnel System (COVID-19)AP

Since the first two presumptive positive cases were identified in Florida on March 1, 2020, Governor DeSantis has proactively and aggressively prepared the state to combat Coronavirus Disease 2019 (COVID-19). The Governor's top priority is the health, safety and welfare of all Floridians.

Today, Governor DeSantis directed the Department of Management Service to provide the following direction to all employees in the State Personnel System:

Business

- All non-essential in-state and all out-of-state travel for state business is prohibited for the next 30 days.
- Florida National Guard, state Law Enforcement, state Emergency and Medical personnel are allowed to travel if the travel is deemed mission critical and is specifically approved by the agency head.
- Employees should avoid, when possible, attending large gatherings.
- Videoconferencing and virtual meetings are encouraged in lieu of travel.

Personal

- When on personal travel, state employees should follow CDC best practices for prevention and treatment of COVID-19, especially employees who are considered at-risk or who have dependents or care for those with underlying conditions or vulnerabilities.
- State employees who personally travel internationally will not be allowed to return to work for 14 days upon returning to the United States. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.
- State employees who personally travel on a cruise or to an area of the United States experiencing community spread of COVID-19 as identified by the Centers for Disease Control and Prevention or a state public health agency will not be allowed to return to work for 14 days upon returning home. Employees will need to utilize their available sick, annual or personal leave during this 14-day period. Employees who can work remotely may be able to so in consultation with their supervisor. Employees without available leave or access to a sick leave pool, and who are unable to work remotely, may be subject to leave without pay.

This travel policy applies to all employees of the State Personnel System, including the heads of executive agencies. Please consult your supervisor/HR Office and your agency's telework and leave policies for guidance regarding your specific situation.

AMERICAN OVERSIGHT

Thank you in advance for joining in efforts to reduce the spread of COVID-19. We will continue to closely monitor and evaluate available information and guidance as this is a rapidly evolving situation.

We appreciate your patience and commitment to protecting our communities. If you have questions, please call John Apthorp at (850) 922-1274.

Subject: March 13, 2020: Memo Release: (REVISED) Guidance for Infection Control and Prevention of Coronavirus Disease 2019 (COVID-19) in Nursing Homes

CMS memo issued March 13, 2020, QSO-20-14-NH
Revised guidance for nursing home visitation/ access

Short bullets:

- Only end of life (EOL)/compassionate care visitors may enter the facility if they meet screening and wear a mask
- Health care workers who enter (hospice, EMS, etc) must meet CDC guidelines
- Comment on surveyors (see quote below) – Must allow surveyors in (meeting screening requirements)- Wear PPE per CDC guidelines when entering a facility with COVID cases
- Facilities should cancel communal dining and group activities, take staff temps, proactively communicate visitor restrictions, and restrict ombudsman (except EOL) but enable communication.

Long bullets:

Surveyors:
"CMS and state survey agencies are constantly evaluating their surveyors to ensure they don't pose a transmission risk when entering a facility. For example, surveyors may have been in a facility with COVID-19 cases in the previous 14 days, but because they were wearing PPE effectively per CDC guidelines, they pose a low risk to of transmission in the next facility, and must be allowed to enter. However, there are circumstances under which surveyors should still not enter, such as if they have a fever."

Visitors:

- Facilities SHOULD restrict all visitors and non-essential health care personnel, except for certain compassionate care situations, eg: end of life (EOL).
- For these compassionate care visits (permitted visitors):
  - Visitors will be limited to a specific room only
  - Facilities should require visitors to perform hand hygiene frequently
  - Must wear a face mask
- Decisions about visits for EOL should be made case-by-case and include careful screening of visitors for fever and respiratory symptoms.
- Permitted visitors must wear a face mask and limit
- Facilities are expected to notify potential visitors with signs, calls, letters, etc.

AMERICAN OVERSIGHT

- If a state implements stricter requirements, (such as through a Governor's order) a facility will not be considered out of compliance with federal visitation requirements.

Health care workers:

- Follow CDC guidelines for restricting access
- Including hospice, EMS, dialysis techs that provide care to residents
- Health care workers should be permitted to enter the facility as long as they meet CDC guidelines
- Facilities should contact their local county health department for questions and review CDC guidelines.

Additional guidance:

- Adds practices facilities should implement such as cancelling communal dining and group activities
- Actively screen residents and staff for fever and respiratory symptom
- Remind residents of social distancing and hand hygiene
- Take staff temperature and document absence of SOB, new of change in cough/sore throat. If they are ill, have them put on a face mask and self-isolate at home.
- Identify staff that work at multiple facilities (e.g., agency staff, regional or corporate staff, etc.) and actively screen and restrict them appropriately
- Residents still have the right to access the Ombudsman program - Their access should be restricted per the guidance above (except in compassionate care situations), however, facilities may review this on a case by case basis. If in-person access is not available due to infection control concerns, facilities need to facilitate resident communication (by phone or other format).
- Advise visitors, and any individuals who entered the facility (e.g., hospice staff), to monitor for signs and symptoms of respiratory infection for at least 14 days after exiting the facility. If symptoms occur, advise them to self-isolate at home, contact their healthcare provider, and immediately notify the facility of the date they were in the facility, the individuals they were in contact with, and the locations within the facility they visited. Facilities should immediately screen the individuals of reported contact, and take all necessary actions based on findings.

Subject: [External] Florida Assisted Living Association Provider Request for Direction

Dear Emergency Response Leaders,

On behalf of our members and providers, we are asking for assistance to provide appropriate direction to providers. As you are aware: DEM Order No. 20-002 restricted visitation for certain persons presenting risk factors (enumerated as a through g). DEM Order No. 20-005 prohibited ALL individuals from visiting facilities in Broward County for 30 days. DEM Order No. 20-006 limited entry to facilities to certain individuals (described in Section 1), and provided screening criteria (a through e) which otherwise authorized entrants must meet in order to enter the facility. All of these orders remain in effect and none expressly supersedes the others as currently written.

We have compiled the following list of questions for your review and direction.

1.) Can further consideration be given to prohibiting residents from leaving and returning to facilities? This presents a tremendous risk of infection to all residents. It also places a burden on thinning staff resources to screen and re-screen returning residents. Finally, it is demoralizing to other residents who are unable to safely leave the facility and are not able to visit friends and family at the facility. Suspension of 429.28(1)(e) and 429.85(1)(e) and, suspension of 429.28(1)(k) and 429.28(1)(l) for residents who choose to leave the facility is advised.

2.) Are screening criteria f. and g. from DEM Order No. 20-002 (prohibiting persons who have been in or reside in a community with confirmed community spread) to be asked of all entrants, only end-of-life family and friend visitors (DEM Order No. 20-006, 1. a.), or not at all?

AMERICAN OVERSIGHT

FL-AHCA-20-0902-A-002506

3.) What guidance/direction is available to assisted living facilities regarding limiting communal meals and activities?

4.) The screening requirements of DEM Order No. 20-006 2.b., strictly applied, would prohibit staff and residents from entering the facility if they exhibit or report signs of a respiratory infection, even in cases where a physician has diagnosed the cause of the infection to be non-communicable (allergies, etc.). Is this intended?

5.) Does DEM Order No. 20-005 prohibit end-of-life family and friend visitors in Broward County (which would otherwise be permitted by DEM Order No. 20-006, 1. a.)?

6.) Are facilities authorized to restrict visitation in end-of-life situations when the patient is in a shared room and unable to provide alternative space? In one particular end-of-life case, friends and family are attempting to visit very frequently, placing the other resident at risk. Hospice does not have an inpatient bed available and the family is unwilling/unable to care for the affected resident at home.

7.) Under what circumstances may non-healthcare providers of essential services (AC/plumbing repair services) and local authorities that are not law enforcement or emergency medical personnel (ex. county fire marshal) admissible to the facility? See DEM Order No. 20-006, 1. g. Would the service providers qualify as "facility staff" for purposes of DEM Order No. 20.006, 1. d. See also Rule 59A-36.001(37) (definition of "staff"). Recognizing that the fewer entrants the better, a plumbing or AC failure, etc. can necessitate the transfer of all residents if it cannot be addressed by qualified personnel.

8.) Under what circumstances are facilities permitted to admit new residents (are prospective residents considered "facility residents" as used in DEM Order No. 20-006, 1. a.)?

9.) It has been reported that some AHCA surveyors have indicated that assisted living facilities are to use the attached Hospital to Post-Acute Care Facility Transfer – COVID- 19 Assessment (3/15/20) to determine whether a resident may be transferred from a hospital to an assisted living facility. The proposed analysis is entirely inconsistent with the screening requirements provided under DEM Order No. 20-006. For example, under the assessment on the form, a patient may be transferred to an assisted living facility if they have NOT been tested for COVID-19, regardless of whether they are presenting symptoms of respiratory infection.

10.) Under what circumstances, if any, would it be permissible to permit screened professional movers to remove a discharged resident's belongings? For example, a resident occupied a 2-bedroom apartment at a standard ALF and needed to be relocated to a higher level of care. The resident is unable to move the items, the resident's family is unable to enter the facility, and potential injury to facility staff should not be risked.

11.) With screening procedures, illnesses, school closures, etc., it is a highly likely that it will become impossible for many facilities to meet the staffing standards prescribed by 59A-36.010. Additionally, some of the required staff training as prescribed by 59A-36.011 is becoming unavailable as in-person gatherings and activities are necessarily limited. What guidance and assistance is available to facilities and their staff? Should every facility be applying for variances or waivers from any rules they cannot comply with during this emergency?

12.) It has been reported that LabCorp and Quest have indicated that COVID-19 specimen collection may only occur at a physician's office or hospital. Assisted living facilities have been told by these entities that it would not be permissible for a physician to travel to the facility to do the collection. Is this accurate and is there any accommodation that can be made to more efficiently effectuate testing of multiple residents?

We thank you in advance and look forward to your response.

Hospital to Post-Acute Care Facility Transfer – COVID-19 Assessment

INSTRUCTIONS: All hospitalized patients should be assessed for COVID-19 prior to transfer to a post-acute care facility. This tool should be used to document an individual's medical status related to COVID-19 and to facilitate communication between the hospital and the receiving facility during patient transfers. This document must be signed-off by the physician, APRN, or PA who completes the clinical assessment. **CHECK THE BOX FOR EACH OF THE CRITERIA APPROPRIATE TO THE PATIENT'S STATUS:**

Patient Name: _____

Transferring Facility: _____ Accepting Facility: _____

Has patient been laboratory tested for COVID-19?

☐ **YES, Patient tested for COVID-19**
Date of test_____
What was the indication for testing?

☐ **NO, Test was NOT INDICATED per CDC testing criteria. May transfer.**

☐ **Travel/Exposure** In the past 14 days, has the patient been to any of the restricted travel areas, traveled internationally, traveled on a cruise ship, or exposed to a person who has been lab tested positive for COVID-19?
Dates of travel_____ Date(s) of exposure_____

☐ **Respiratory** Signs/symptoms of a respiratory illness (cough, sneezing, fever>100, shortness of breath, sore throat).

☐ **Negative test**

If the patient was tested due to travel/exposure criteria, are they still in the 14 day post travel/exposure period where isolation is required?

☐ **YES** ☐ **NO/Not Applicable**

→ MAY NOT TRANSFER

→ MAY TRANSFER

☐ **Positive test**

Does patient meet criteria outlined in *CDC Interim Guidance for Discontinuation of Transmission-Based Precautions and Disposition of Hospitalized Patients with COVID-19?*

☐ **YES** ☐ **NO**

→ MAY NOT TRANSFER

If the patient was tested due to travel/exposure criteria, are they still in the 14 day post travel/exposure period where isolation is required?

☐ **YES** ☐ **NO**

→ MAY NOT TRANSFER

→ MAY TRANSFER

Clinical Assessment Completed by (signature)

59A-36.001 Standards and Criteria for Determining Compliance with Facility Standards and Resident Rights.

(1) DEFINITIONS.

In addition to the terms defined in section 429.02, F.S., and rule 59A-36.002, F.A.C., the following definitions are applicable in this rule chapter.

(a) "Core Survey Task" means tasks conducted by Agency survey staff that focus on core areas of regulations.

(b) "Timely Manner" means as soon as possible, but not to exceed 24 hours of Agency staff having requested materials.

(2) SURVEY PROCESS FOR RESIDENT RIGHTS.

The following core survey tasks shall be utilized during survey activities in order to determine the facility's compliance with resident rights pursuant to section 429.28, F.S., and rule 59A-36.007, F.A.C.

(a) The surveyor(s) conducts a tour of the facility to determine if the residents' health, safety, and welfare are maintained. The tour includes observations and assessments of the following:

1. Resident behavior and demeanor;
2. Adherence to facility abuse prohibition policy and procedure;
3. Adherence to infection control policy and procedure;
4. General physical plant standards in accordance with rule 59A-36.014, F.A.C.;
5. Overall appearance of residents and observations of any special care needs;

AMERICAN OVERSIGHT

6. Posting of Resident Bill of Rights and required phone numbers in accordance with rule 59A-36.007, F.A.C.;

7. Resident access to phones and unrestricted private communication;

8. Resident opportunity to exercise;

9. Staff availability and responsiveness to resident care needs;

10. Medication storage and security;

11. Chemical and physical restraint use;

12. Positioning/transferring processes utilized by staff;

13. Any specialized care provided by the facility with a specialty license;

14. Any license conditions or restrictions as a result of Agency action.

(b) The surveyor(s) conducts interviews with residents, family members/representatives, staff, and any other persons the surveyor(s) deems relevant to the survey.

1. The facility may not restrict Agency staff from conducting confidential interviews pursuant to section 429.14(6), F.S.

2. Interviews may be conducted both in person and telephonically.

(c) The surveyor(s) reviews facility records to determine compliance with:

1. Licensure requirements in accordance with rule 59A-36.004, F.A.C.;

2. Inspection responsibilities in accordance with rule 59A-36.005, F.A.C.;

3. Admissions procedures and appropriateness of placement and continued residency criteria in accordance with rule 59A-36.007, F.A.C.;

4. Resident care standards in accordance with rule 59A-36.007, F.A.C.;

5. Medication practices in accordance with rule 59A-36.008, F.A.C.;

6. Do not resuscitate orders (DNROs) in accordance with rule 59A-36.009, F.A.C.;

7. Staffing standards in accordance with rule 59A-36.010, F.A.C.;

8. Staff training requirements and competency training in accordance with rule 59A-36.011, F.A.C.;

9. Alzheimer's Disease or Related Disorders training provider and curriculum approval in accordance with rule 58A-5.0194, F.A.C.;

10. Food service standards in accordance with rule 59A-36.012, F.A.C.;

11. Fiscal standards in accordance with rule 59A-36.013, F.A.C.;

12. Physical plant standards in accordance with rule 59A-36.014, F.A.C.;

13. Records in accordance with rule 59A-36.015, F.A.C.;

14. Resident contracts in accordance with rule 59A-36.018, F.A.C.;

15. Emergency management in accordance with rule 59A-36.019, F.A.C.

(d) The facility must provide agency staff with requested documents in a timely manner and allow the agency staff to obtain copies.

(e) Surveyor(s) conducts specific and general observations throughout the survey to determine compliance with: dietary standards, medication standards, infection control standards, resident activities, assistance with activities of daily living, facility practices, and resident daily routines.

(f) For facilities licensed to provide specialty services such as Limited Mental Health, Extended Congregate Care, and Limited Nursing Services: the surveyor(s) reviews the required components in accordance with rules 59A-36.020, 59A-36.021, and 59A-36.021, F.A.C.

Rulemaking Authority 429.28(3)(a) FS. Law Implemented 429.28 FS. History–New 11-28-16.

59A-36.002 Definitions.

In addition to the terms defined in section 429.02, F.S., the following definitions are applicable in this rule chapter:

(1) "Advertise" means any written, printed, oral, visual, or electronic promotion, statement of availability, qualifications, services offered, or other similar communication appearing in or on television, radio, the Internet, billboards, newspapers, magazines, business cards, flyers, brochures or other medium for the purpose of attracting potential residents to an assisted living facility. A complimentary listing of a licensed facility's name, address, and telephone number in the telephone directory is not considered advertising.

(2) "Agency Central Office" means the Agency for Health Care Administration Assisted Living Unit (ALU), located at 2727

AMERICAN OVERSIGHT

Mahan Drive, Mail Stop 30, Tallahassee, FL 32308-5403. The ALU telephone number and website address are (850)412-4304, and http://ahca.myflorida.com/MCHQ/Health_Facility_Regulation/Assisted_Living/alf.shtml.

(3) "Agency Field Office" means the Agency for Health Care Administration's Office in a particular geographic area. Information regarding local offices is available online at: http://ahca.myflorida.com/mchq/index.shtml#six.

(4) "Apartment" means a self-contained dwelling unit with a bathroom, kitchen area, and living and sleeping space that is contracted for use as a residence by one or more persons who maintain a common household.

(5) "Anti-Embolism Stockings and Hosiery" means prescribed close-fitting elastic-type coverings for therapeutic treatment of the legs. They may be knee high or thigh high length and have transparent, open-toe, or similar foot design.

(6) "Assistance with Activities of Daily Living" means individual assistance with the following:

(a) Ambulation – Providing physical support to enable the resident to move about within or outside the facility. Physical support includes supporting or holding the resident's hand, elbow, or arm; holding on to a support belt worn by the resident to assist in providing stability or direction while the resident ambulates; or pushing the resident's wheelchair. The term does not include assistance with transfer.

(b) Bathing – Assembling towels, soaps, or other necessary supplies; helping the resident in and out of the bathtub or shower; turning the water on and off; adjusting water temperatures; washing and drying portions of the body that are difficult for the resident to reach; or being available while the resident is bathing.

(c) Dressing – Helping residents to choose, put on, and remove clothing.

(d) Eating – Helping residents with or by cutting food, pouring beverages, or feeding residents who are unable to feed themselves.

(e) Grooming – Helping residents with shaving, oral care, care of the hair, or nail care.

(f) Toileting – Assisting the resident to the bathroom, helping the resident to undress, positioning the resident on the commode, and helping the resident with related personal hygiene including assistance with changing an adult brief and assistance with the routine emptying of a catheter or ostomy bag.

(7) "Assistance With Transfer" means providing verbal and physical cuing or physical assistance or both while the resident moves between bed and a standing position or between bed and chair or wheelchair. The term does not include total physical assistance with transfer provided by staff to residents.

(8) "Bedridden" means confined to bed because of inability to ambulate or transfer to a wheelchair even with assistance, or to sit safely in a chair or wheelchair without personal assistance or physical restraint.

(9) "Capacity" means the number of residents for which a facility has been licensed to provide residential care.

(10) "Case Manager" means an individual employed by or under contract with any agency or organization, public or private, who has the responsibility for assessing resident needs; planning services for the resident; coordinating and assisting residents with gaining access to needed medical, mental health, social, housing, educational or other services; monitoring service delivery; and evaluating the effects of service delivery.

(11) "Certified Nursing Assistant (CNA)" means an individual certified under chapter 464, part II, F.S.

(12) "Day Care Participant" means an individual who receives services at a facility for less than 24 hours per day.

(13) "Deficiency" means an instance of non-compliance with the requirements of part II of chapter 408, F.S., part I of chapter 429, F.S., rule chapter 59A-35, F.A.C., and this rule chapter.

(14) "Direct Care Staff" means Staff in Regular Contact or Staff in Direct Contact with residents who provide personal or nursing services to residents, including administrators and managers providing such services.

(15) "Distinct Part" means designated bedrooms or apartments, bathrooms and a living area; or a separately identified wing, floor, or building that includes bedrooms or apartments, bathrooms and a living area. The distinct part may include a separate dining area, or meals may be served in another part of the facility.

(16) "Elopement" means an occurrence in which a resident leaves a facility without following facility policy and procedures.

(17) "Food Service" means the storage, preparation, service, and clean up of food intended for consumption in a facility either by facility staff or through a formal agreement that meals will be regularly catered by a third party.

(18) "Glucose Meter" or "glucometer" means a medical device that determines the approximate concentration of glucose in the blood.

(19) "Health Care Provider" means a physician or physician's assistant licensed under chapter 458 or 459, F.S., or advanced registered nurse practitioner licensed under chapter 464, F.S.

AMERICAN OVERSIGHT

(20) "Licensed Dietitian or Nutritionist" means a dietitian or nutritionist licensed under chapter 468, part X, F.S.

(21) "Local fire safety authority" means the authority having jurisdiction as defined in rule chapter 69A-40, F.A.C.

(22) "Long-term Care Ombudsman Program (LTCOP)" means the long-term care ombudsman program established under chapter 400, Part I, F.S.

(23) "Manager" means an individual who is authorized to perform the same functions as a facility administrator, and is responsible for the operation and maintenance of an assisted living facility while under the supervision of the administrator of that facility. A manager does not include staff authorized to perform limited administrative functions during an administrator's temporary absence.

(24) "Mental Disorder" for the purposes of identifying a mental health resident, means schizophrenia and other psychotic disorders; affective disorders; anxiety related disorders; and personality and dissociative disorders. However, mental disorder does not include residents with a primary diagnosis of Alzheimer's disease, other dementias, or mental retardation.

(25) "Mental Health Care Provider" means an individual, agency, or organization providing mental health services to clients of the Department of Children and Families; an individual licensed by the state to provide mental health services; or an entity employing or contracting with individuals licensed by the state to provide mental health services.

(26) "Mental Health Case Manager" means a case manager employed by or under contract to a mental health care provider to assist mental health residents residing in a facility holding a limited mental health license.

(27) "Nurse" means a licensed practical nurse (LPN), registered nurse (RN), or advanced registered nurse practitioner (ARNP) licensed under chapter 464, F.S.

(28) "Nursing Assessment" means a written review of information collected from observation and interaction with a resident, including the resident's record and any other relevant sources of information, the analysis of the information, and recommendations for modification of the resident's care, if warranted. The assessment must contain the signature and credential initials of the person who conducted the assessment.

(29) "Nursing Progress Notes" or "Progress Report" means a written record of nursing services, other than medication administration or the taking of vital signs, provided to each resident who receives such services in a facility with a limited nursing or extended congregate care license. The progress notes must be completed by the nurse who delivered the service; must describe the date, type, scope, amount, duration, and outcome of services that are rendered; must describe the general status of the resident's health; must describe any deviations in the residents health; must describe any contact with the resident's physician; and must contain the signature and credential initials of the person rendering the service.

(30) "Optional State Supplementation (OSS)" means the state program providing monthly payments to eligible residents pursuant to section 409.212, F.S., and rule chapter 65A-2, F.A.C.

(31) "Owner" means a person, partnership, association, limited liability company, or corporation, that owns or leases the facility that is licensed by the agency. The term does not include a person, partnership, association, limited liability company, or corporation that contracts only to manage or operate the facility.

(32) "Physician" means an individual licensed under chapter 458 or 459, F.S.

(33) "Pill organizer" means a container that is designed to hold solid doses of medication and is divided according to day or time increments.

(34) "Registered Dietitian" means an individual registered with the Commission on Dietetic Registration, the accrediting body of the Academy of Nutrition and Dietetics.

(35) "Respite Care" means facility-based supervision of an impaired adult for the purpose of relieving the primary caregiver.

(36) "Significant Change" means either a sudden or major shift in the behavior or mood of a resident that is inconsistent with the resident's diagnosis, or a deterioration in the resident's health status such as unplanned weight change, stroke, heart condition, enrollment in hospice, or stage 2, 3 or 4 pressure sore. Ordinary day-to-day fluctuations in a resident's functioning and behavior, short-term illnesses such as colds, or the gradual deterioration in the resident's ability to carry out the activities of daily living that accompanies the aging process are not considered significant changes.

(37) "Staff" means any individual employed by a facility, contracting with a facility to provide direct or indirect services to residents, or employed by a firm under contract with a facility to provide direct or indirect services to residents when present in the facility. The term includes volunteers performing any service that counts toward meeting any staffing requirement of this rule chapter.

(38) "Staff in Regular Contact" or "Staff in Direct Contact" mean all staff whose duties may require them to interact with

AMERICAN OVERSIGHT

residents on a daily basis.

(39) "Third Party" means any individual or business entity providing services to residents in a facility that is not staff of the facility.

(40) "Universal Precautions" are a set of precautions designed to prevent transmission of human immunodeficiency virus (HIV), hepatitis B virus (HBV), and other bloodborne pathogens when providing first aid or health care. Universal precautions require that the blood and certain body fluids of all residents be considered potentially infectious for HIV, HBV, and other bloodborne pathogens.

(41) "Unscheduled Service Need" means a need for a personal service, nursing service, or mental health intervention that cannot be predicted in advance and that must be met promptly to ensure that the health, safety, and welfare of residents is preserved.

Rulemaking Authority 429.41, 429.929 FS. Law Implemented 429.07, 429.075, 429.11, 429.14, 429.19, 429.41, 429.47, 429.52, 429.905 FS. History–New 9-30-92, Formerly 10A-5.0131, Amended 10-30-95, 6-2-96, 4-20-98, 11-2-98, 10-17-99, 1-9-02, 7-30-06, 4-15-10, 4-17-14, 5-10-18, Formerly 58A-5.0131, 7-1-19.

59A-36.003 Licensing and Change of Ownership.

(1) LICENSE APPLICATION. An applicant for a standard assisted living facility license, a limited mental health license, an extended congregate care license, or a limited nursing services license may apply for licensure pursuant to the requirements of chapters 408, part II, 429, part I, F.S., and rule chapter 59A-35, F.A.C.

(2) CHANGE OF OWNERSHIP. In addition to the requirements for a change of ownership contained in chapter 408, part II, F.S., section 429.12, F.S., and rule chapter 59A-35, F.A.C., the following provisions relating to resident funds apply pursuant to section 429.27, F.S.:

(a) At the time of transfer of ownership, all resident funds on deposit, advance payments of resident rents, resident security deposits, and resident trust funds held by the current licensee must be transferred to the applicant. Proof of such transfer must be provided to the agency at the time of the agency survey and before the issuance of a standard license. This provision does not apply to entrance fees paid to a continuing care facility subject to the acquisition provisions in section 651.024, F.S.

(b) The transferor must provide to each resident a statement detailing the amount and type of funds held by the facility and credited to the resident.

(c) The transferee must notify each resident in writing of the manner in which the transferee is holding the resident's funds and state the name and address of the depository where the funds are being held, the amount held, and type of funds credited.

(3) CONDITIONAL LICENSE. Except as provided in section 429.14, F.S., the agency may issue a conditional license to a facility if, at the time of license renewal the facility is found to have uncorrected violations that the facility has had an opportunity to correct. The issuance of a conditional license does not change the biennial license expiration date.

(4) OSS RESIDENT DETERMINATION. With respect to the fee per bed required for a standard license, the number of OSS recipients claimed shall be the average number per month residing in the facility during the previous license period. An additional per bed charge shall be added to the bed fee for facilities whose average number of OSS residents per month was less than the number of beds designated for OSS recipients during the previous license period.

Rulemaking Authority 429.17, 429.27, 429.41 FS. Law Implemented 429.04, 429.07, 429.075, 429.11, 429.12, 429.17, 429.27, 429.41 FS. History–New 5-14-81, Amended 1-6-82, 5-19-83, 9-17-84, Formerly 10A-5.14, Amended 10-20-86, 6-21-88, 8-15-90, 9-30-92, Formerly 10A-5.014, Amended 10-30-95, 4-20-98, 10-17-99, 7-30-06, 4-17-14, 5-10-18, Formerly 58A-5.014, 7-1-19.

59A-36.004 License Requirements.

(1) SERVICE PROHIBITION. An assisted living facility may not represent that it provides any service other than a service for which it is licensed to provide.

(2) CHANGE IN USE OF SPACE REQUIRING AGENCY CENTRAL OFFICE APPROVAL. A change in the use of space that increases or decreases a facility's capacity must not be made without prior approval from the Agency Central Office. Approval must be based on the compliance with the physical plant standards provided in rule 59A-36.014, F.A.C., as well as documentation of compliance with applicable fire safety and sanitation inspection requirements referenced in rule 59A-36.005, F.A.C.

(3) CHANGE IN USE OF SPACE REQUIRING AGENCY FIELD OFFICE APPROVAL. A change in the use of space that involves converting an area to resident use, which has not previously been inspected for such use, must not be made without prior approval from the Agency Field Office. Approval must be based on compliance with the physical plant standards provided in rule

AMERICAN OVERSIGHT

59A-36.014, F.A.C., as well as documentation of compliance with applicable fire safety and sanitation inspection standards referenced in rule 59A-36.005, F.A.C.

(4) CONTIGUOUS PROPERTY. If a facility consists of more than one building, all buildings included under a single license must be on contiguous property. "Contiguous property" means property under the same ownership separated by no more than a two-lane street that traverses the property. A licensed location may be expanded to include additional contiguous property with the approval of the agency to ensure continued compliance with the requirements and standards of chapters 408, Part II, 429, Part I, F.S. and rule chapter 59A-35, F.A.C., and this rule chapter.

(5) PROOF OF INSPECTIONS. A copy of the annual fire safety and sanitation inspections described in rule 59A-36.005, F.A.C., must be submitted annually to the Agency Central Office. The annual inspections must be submitted no later than 30 calendar days after the inspections. Failure to comply with this requirement may result in administrative action pursuant to chapter 408, part II, and section 429.14, F.S., and rule chapter 59A-35, F.A.C.

(6) RESIDENTS RECEIVING STATE-FUNDED SERVICES. Upon request, the facility administrator or designee must identify residents receiving state-funded services to the agency and the department for monitoring purposes authorized by state and federal laws.

Rulemaking Authority 429.41 FS. Law Implemented 429.41, 429.44 FS. History–New 5-15-81, Amended 1-6-82, 9-17-84, Formerly 10A-5.16, Amended 6-21-88, 9-30-92, Formerly 10A-5.016, Amended 10-30-95, 10-17-99, 7-30-06, 4-15-10, 4-17-14, Formerly 58A-5.016, 7-1-19.

59A-36.005 Inspection Responsibilities.

(1) County health departments are responsible for inspecting all license applicants and licensed facilities in matters regulated by:

(a) Rule 64E-12.004, F.A.C., and rule chapter 64E-11, F.A.C., relating to food hygiene.

(b) Chapter 64E-12, F.A.C., relating to sanitary practices in community-based residential facilities.

(c) Chapter 64E-16, F.A.C., relating to biomedical waste.

(2) The local authority having jurisdiction over fire safety or State Fire Marshal is responsible for inspecting all license applicants and licensed facilities in matters regulated by section 429.41, F.S., relating to uniform fire safety standards and chapter 69A-40, F.A.C., Uniform Fire Safety Standards for Assisted Living Facilities.

(3) The agency is responsible for inspecting all license applicants and licensed facilities in all other matters regulated by this rule chapter.

Rulemaking Authority 429.41 FS. Law Implemented 429.41 FS. History–New 8-15-90, Formerly 10A-5.0161, Amended 10-30-95, 10-17-99, 3-13-14, Formerly 58A-5.0161, 7-1-19.

59A-36.006 Admission Procedures, Appropriateness of Placement and Continued Residency Criteria.

(1) ADMISSION CRITERIA.

(a) An individual must meet the following minimum criteria in order to be admitted to a facility holding a standard, limited nursing services, or limited mental health license:

1. Be at least 18 years of age.

2. Be free from signs and symptoms of any communicable disease that is likely to be transmitted to other residents or staff. An individual who has human immunodeficiency virus (HIV) infection may be admitted to a facility, provided that the individual would otherwise be eligible for admission according to this rule.

3. Be able to perform the activities of daily living, with supervision or assistance if necessary.

4. Be able to transfer, with assistance if necessary. The assistance of more than one person is permitted.

5. Be capable of taking medication, by either self-administration, assistance with self-administration, or administration of medication.

a. If the resident needs assistance with self-administration of medication, the facility must inform the resident of the professional qualifications of facility staff who will be providing this assistance. If unlicensed staff will be providing assistance with self-administration of medication, the facility must obtain written informed consent from the resident or the resident's surrogate, guardian, or attorney-in-fact.

b. The facility may accept a resident who requires the administration of medication if the facility employs a nurse who will provide this service or the resident, or the resident's legal representative, designee, surrogate, guardian, or attorney-in-fact, contracts with a third party licensed to provide this service to the resident.

AMERICAN OVERSIGHT

6. Not have any special dietary needs that cannot be met by the facility.

7. Not be a danger to self or others as determined by a physician, or mental health practitioner licensed under chapter 490 or 491, F.S.

8. Not require 24-hour licensed professional mental health treatment.

9. Not be bedridden.

10. Not have any stage 3 or 4 pressure sores. A resident requiring care of a stage 2 pressure sore may be admitted provided that:

a. The resident either:

(I) Resides in a standard or limited nursing services licensed facility and contracts directly with a licensed home health agency or a nurse to provide care; or

(II) Resides in a limited nursing services licensed facility and care is provided by the facility pursuant to a plan of care issued by a health care provider;

b. The condition is documented in the resident's record and admission and discharge logs; and,

c. If the resident's condition fails to improve within 30 days as documented by a health care provider, the resident must be discharged from the facility.

11. Residents admitted to standard, limited nursing services, or limited mental health licensed facilities may not require any of the following nursing services:

a. Artificial airway management of any kind, except that of continuous positive airway pressure may be provided through the use of a CPAP or bipap machine;

b. Assistance with tube feeding,

c. Monitoring of blood gases,

d. Management of post-surgical drainage tubes and wound vacuum devices;

e. The administration of blood products in the facility; or

f. Treatment of surgical incisions or wounds, unless the surgical incision or wound and the underlying condition have been stabilized and a plan of care has been developed. The plan of care must be maintained in the resident's record.

12. In addition to the nursing services listed above, residents admitted to facilities holding only standard and/or limited mental health licenses may not require any of the following nursing services:

a. Hemodialysis and peritoneal dialysis performed in the facility;

b. Intravenous therapy performed in the facility.

13. Not require 24-hour nursing supervision.

14. Not require skilled rehabilitative services as described in rule 59G-4.290, F.A.C.

15. Be appropriate for admission to the facility as determined by the facility administrator. The administrator must base the determination on:

a. An assessment of the strengths, needs, and preferences of the individual;

b. The medical examination report required by section 429.26, F.S., and subsection (2) of this rule, if available;

c. The facility's admission policy and the services the facility is prepared to provide or arrange in order to meet resident needs. Such services may not exceed the scope of the facility's license unless specified elsewhere in this rule; and,

d. The ability of the facility to meet the uniform fire safety standards for assisted living facilities established in rule chapter 69A-40, F.A.C.

(b) A resident who otherwise meets the admission criteria for residency in a standard licensed facility, but who requires assistance with the administration and regulation of portable oxygen or assistance with routine colostomy care of stoma site flange placement, may be admitted to a facility with a standard license as long as the facility has a nurse on staff or under contract to provide the assistance or to provide training to the resident on how to perform these functions themselves.

(c) Nursing staff may not provide training to unlicensed persons, as defined in section 429.256(1)(b), F.S., to perform skilled nursing services, and may not delegate the nursing services described in this section to certified nursing assistants or unlicensed persons. This provision does not restrict a resident or a resident's representative from contracting with a licensed third party to provide the assistance if the facility is agreeable to such an arrangement and the resident otherwise meets the criteria for admission and continued residency in a facility with a standard license.

(d) An individual enrolled in and receiving hospice services may be admitted to an assisted living facility as long as the individual otherwise meets resident admission criteria.

AMERICAN OVERSIGHT

(e) Resident admission criteria for facilities holding an extended congregate care license are described in rule 59A-36.021, F.A.C.

(2) HEALTH ASSESSMENT. As part of the admission criteria, an individual must undergo a face-to-face medical examination completed by a health care provider as specified in either paragraph (a) or (b) of this subsection.

(a) A medical examination completed within 60 calendar days before the individual's admission to a facility pursuant to section 429.26(4), F.S. The examination must address the following:

1. The physical and mental status of the resident, including the identification of any health-related problems and functional limitations,

2. An evaluation of whether the individual will require supervision or assistance with the activities of daily living,

3. Any nursing or therapy services required by the individual,

4. Any special diet required by the individual,

5. A list of current medications prescribed, and whether the individual will require any assistance with the administration of medication,

6. Whether the individual has signs or symptoms of Tuberculosis, Methicillin Resistant Staphylococcus Aureus, Scabies or any other communicable disease, which are likely to be transmitted to other residents or staff,

7. A statement on the day of the examination that, in the opinion of the examining health care provider, the individual's needs can be met in an assisted living facility; and,

8. The date of the examination, and the name, signature, address, telephone number, and license number of the examining health care provider. The medical examination may be conducted by a health care provider licensed under chapter 458, 459 or 464, F.S.

(b) A medical examination completed after the resident's admission to the facility within 30 calendar days of the admission date. The examination must be recorded on AHCA Form 1823, Resident Health Assessment for Assisted Living Facilities, March 2017, which is incorporated by reference and available online at: http://www.flrules.org/Gateway/reference.asp?No=Ref-09170. Faxed or electronic copies of the completed form are acceptable. The form must be completed as instructed.

1. Items on the form that have been omitted by the health care provider during the examination may be obtained by the facility either orally or in writing from the health care provider.

2. Omitted information must be documented in the resident's record. Information received orally must include the name of the health care provider, the name of the facility staff recording the information, and the date the information was provided.

3. Electronic documentation may be used in place of completing the section on AHCA Form 1823 referencing Services Offered or Arranged by the Facility for the Resident. The electronic documentation must include all of the elements described in this section of AHCA Form 1823.

(c) Any information required by paragraph (a), that is not contained in the medical examination report conducted before the individual's admission to the facility must be obtained by the administrator using AHCA Form 1823 within 30 days after admission.

(d) Medical examinations of residents placed by the department, by the Department of Children and Families, or by an agency under contract with either department must be conducted within 30 days before placement in the facility and recorded on AHCA Form 1823 described in paragraph (b).

(e) An assessment that has been conducted through the Comprehensive, Assessment, Review and Evaluation for Long-Term Care Services (CARES) program may be substituted for the medical examination requirements of section 429.26, F.S. and this rule.

(f) Any orders issued by the health care provider conducting the medical examination for medications, nursing, therapeutic diets, or other services to be provided or supervised by the facility may be attached to the health assessment. A health care provider may attach a DH Form 1896, Florida Do Not Resuscitate Order Form, for residents who do not wish cardiopulmonary resuscitation to be administered in the case of cardiac or respiratory arrest.

(g) A resident placed in a facility on a temporary emergency basis by the Department of Children and Families pursuant to section 415.105 or 415.1051, F.S., is exempt from the examination requirements of this subsection for up to 30 days. However, a resident accepted for temporary emergency placement must be entered on the facility's admission and discharge log and counted in the facility census. A facility may not exceed its licensed capacity in order to accept such a resident. A medical examination must be conducted on any temporary emergency placement resident accepted for regular admission.

(3) ADMISSION PACKAGE.

(a) The facility must make available to potential residents a written statement(s) that includes the following information listed below. Providing a copy of the facility resident contract or facility brochure containing all the required information meets this

AMERICAN OVERSIGHT

requirement.

1. The facility's admission and continued residency criteria;

2. The daily, weekly or monthly charge to reside in the facility and the services, supplies, and accommodations provided by the facility for that rate;

3. Personal care services that the facility is prepared to provide to residents and additional costs to the resident, if any;

4. Nursing services that the facility is prepared to provide to residents and additional costs to the resident, if any;

5. Food service and the ability of the facility to accommodate special diets;

6. The availability of transportation and additional costs to the resident, if any;

7. Any other special services that are provided by the facility and additional cost if any;

8. Social and leisure activities generally offered by the facility;

9. Any services that the facility does not provide but will arrange for the resident and additional cost, if any;

10. The facility rules and regulations that residents must follow as described in rule 59A-36.007, F.A.C.;

11. The facility policy concerning Do Not Resuscitate Orders pursuant to section 429.255, F.S., and rule 59A-36.009, F.A.C., and Advance Directives pursuant to chapter 765, F.S.;

12. If the facility is licensed to provide extended congregate care, the facility's residency criteria for residents receiving extended congregate care services. The facility must also provide a description of the additional personal, supportive, and nursing services provided by the facility including additional costs and any limitations on where extended congregate care residents may reside based on the policies and procedures described in rule 59A-36.021, F.A.C.;

13. If the facility advertises that it provides special care for individuals with Alzheimer's disease and related disorders, a written description of those special services as required in section 429.177, F.S.; and,

14. The facility's resident elopement response policies and procedures.

(b) Before or at the time of admission, the resident, or the resident's responsible party, guardian, or attorney-in-fact, if applicable, must be provided with the following:

1. A copy of the resident's contract that meets the requirements of rule 59A-36.018, F.A.C.,

2. A copy of the facility statement described in paragraph (a) of this subsection, if one has not already been provided,

3. A copy of the resident's bill of rights as required by rule 59A-36.007, F.A.C.; and,

4. A Long-Term Care Ombudsman Program brochure that includes the telephone number and address of the district office.

(c) Documents required by this subsection must be in English. If the resident is not able to read, or does not understand English and translated documents are not available, the facility must explain its policies to a family member or friend of the resident or another individual who can communicate the information to the resident.

(4) CONTINUED RESIDENCY. Except as follows in paragraphs (a) through (c) of this subsection, criteria for continued residency in any licensed facility must be the same as the criteria for admission. As part of the continued residency criteria, a resident must have a face-to-face medical examination by a health care provider at least every 3 years after the initial assessment, or after a significant change, whichever comes first. A significant change is defined in rule 59A-36.002, F.A.C. The results of the examination must be recorded on AHCA Form 1823, which is incorporated by reference in paragraph (2)(b) of this rule and must be completed in accordance with that paragraph. Exceptions to the requirement to meet the criteria for continued residency are:

(a) The resident may be bedridden for no more than 7 consecutive days.

(b) A resident requiring care of a stage 2 pressure sore may be retained provided that:

1. The resident contracts directly with a licensed home health agency or a nurse to provide care, or the facility has a limited nursing services license and services are provided pursuant to a plan of care issued by a health care provider,

2. The condition is documented in the resident's record; and,

3. If the resident's condition fails to improve within 30 days, as documented by a health care provider, the resident must be discharged from the facility.

(c) A terminally ill resident who no longer meets the criteria for continued residency may continue to reside in the facility if the following conditions are met:

1. The resident qualifies for, is admitted to, and consents to receive services from a licensed hospice that coordinates and ensures the provision of any additional care and services that the resident may need;

2. Both the resident, or the resident's legal representative if applicable, and the facility agree to continued residency;

3. A licensed hospice, in consultation with the facility, develops and implements a interdisciplinary care plan that specifies the

AMERICAN OVERSIGHT

services being provided by hospice and those being provided by the facility; and,

4. Documentation of the requirements of this paragraph is maintained in the resident's file.

(d) The facility administrator is responsible for monitoring the continued appropriateness of placement of a resident in the facility at all times.

(e) A hospice resident that meets the qualifications of continued residency pursuant to this subsection may only receive services from the assisted living facility's staff which are within the scope of the facility's license.

(f) Assisted living facility staff may provide any nursing service permitted under the facility's license and total help with the activities of daily living for residents admitted to hospice; however, staff may not exceed the scope of their professional licensure or training.

(g) Continued residency criteria for facilities holding an extended congregate care license are described in rule 59A-36.021, F.A.C.

(5) DISCHARGE. If the resident no longer meets the criteria for continued residency, or the facility is unable to meet the resident's needs, as determined by the facility administrator or health care provider, the resident must be discharged in accordance with section 429.28, F.S.

Rulemaking Authority 429.07, 429.41 FS. Law Implemented 429.07, 429.26, 429.28, 429.41 FS. History–New 9-17-84, Formerly 10A-5.181, Amended 10-20-86, 6-21-88, 8-15-90, 9-30-92, Formerly 10A-5.0181, Amended 10-30-95, 6-2-96, 10-17-99, 7-30-06, 10-9-06, 4-15-10, 10-14-10, 4-17-14, 5-10-18, Formerly 58A-5.0181, 7-1-19.

59A-36.007 Resident Care Standards.

An assisted living facility must provide care and services appropriate to the needs of residents accepted for admission to the facility.

(1) SUPERVISION. Facilities must offer personal supervision as appropriate for each resident, including the following:

(a) Monitoring of the quantity and quality of resident diets in accordance with rule 59A-36.012, F.A.C.

(b) Daily observation by designated staff of the activities of the resident while on the premises, and awareness of the general health, safety, and physical and emotional well-being of the resident.

(c) Maintaining a general awareness of the resident's whereabouts. The resident may travel independently in the community.

(d) Contacting the resident's health care provider and other appropriate party such as the resident's family, guardian, health care surrogate, or case manager if the resident exhibits a significant change.

(e) Contacting the resident's family, guardian, health care surrogate, or case manager if the resident is discharged or moves out.

(f) Maintaining a written record, updated as needed, of any significant changes, any illnesses that resulted in medical attention, changes in the method of medication administration, or other changes that resulted in the provision of additional services.

(2) SOCIAL AND LEISURE ACTIVITIES. Residents shall be encouraged to participate in social, recreational, educational and other activities within the facility and the community.
