and Prevention (CDC)
Atlanta GA 30333

December 1, 2020

Austin Evers
American Oversight
1030 15th Street NW
Suite B255
Washington, District of Columbia 20005
Via email: foia@americanoversight.org

Dear Mr. Evers:

This letter is regarding to your attached Centers for Disease Control and Prevention and Agency for Toxic Substances and Disease Registry (CDC/ATSDR) Freedom of Information Act (FOIA) request of May 8, 2020, assigned #20-01552-FOIA.

We located 690 pages of responsive records (350 pages released in full or part; 229 pages withheld in full). After a careful review of these pages, some information was withheld from release pursuant to 5 U.S.C. §552, Exemption 5 and 6.

Exemption 5 protects inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency. Exemption 5 therefore incorporates the privileges that protect materials from discovery in litigation, including the deliberative process, attorney work-product, and attorney-client privileges. Information withheld under this exemption was protected under the deliberative process privilege. The deliberative process privilege protects the decision-making process of government agencies. The deliberative process privilege protects materials that are both predecisional and deliberative. The materials that have been withheld under the deliberative process privilege of Exemption 5 are both predecisional and deliberative, and do not contain or represent formal or informal agency policies or decisions. Examples of information withheld include drafts and pre-decisional discussions.

Exemption 6 protects information in personnel and medical files and similar files when disclosure would constitute a clearly unwarranted invasion of personal privacy. The information that has been withheld under Exemption 6 consists of personal information, such as personal cell phone numbers. We have determined that the individual(s) to whom this information pertains has a substantial privacy interest in withholding it.

We also located records belonging to the U.S. Department of State (DOS) (56 pages) and the U.S. Department of Health and Human Services (55 pages). In accordance with the Department of Health and Human Services' implementing regulations, CDC does not make decisions on the release or denial of other agencies' documents. We have referred these respective records along with your request to HHS and DOS for their release determination and direct reply to you. Contact information for each agency is as follows:

U. S. Department of State Office of Information Programs and Services
A/GIS/IPS/RL
2201 C Street N.W., Suite B266
Washington, D.C. 20520-0000
(202) 261-8484.
Kellie Robinson, Public Liaison

Department of Health and Human Services (HHS)

Freedom of Information Officer
Hubert H. Humphrey Building, Room 729H
200 Independence Avenue, SW
Washington, D.C. 20201
Email: FOIARequest@hhs.gov
Phone: 202-690-7453
Fax: 202-690-8320
FOIA Officer: Brandon Gaylord

You may contact our FOIA Public Liaison at 770-488-6277 for any further assistance and to discuss any aspect of your request. Additionally, you may contact the Office of Government Information Services (OGIS) at the National Archives and Records Administration to inquire about the FOIA mediation services they offer. The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

If you are not satisfied with the response to this request, you may administratively appeal by writing to the Deputy Agency Chief FOIA Officer, Office of the Assistant Secretary for Public Affairs, U.S. Department of Health and Human Services, Hubert H. Humphrey Building, 200 Independence Avenue, Suite 729H, Washington, D.C. 20201. You may also transmit your appeal via email to FOIARequest@psc.hhs.gov. Please mark both your appeal letter and envelope "FOIA Appeal." Your appeal must be postmarked or electronically transmitted by March 1, 2021.

Sincerely,

Roger Andoh
CDC/ATSDR FOIA Officer

Subject: RE: IMPORTANT: TP or reactive statement on impact of WHO needed ASAP

Hi Nancy-

In advance of Dr Redfield's participation in the LHHS hearing on Thursday, the response policy unit has asked us for a TP/reactive statement regarding the impacts to NCIRD of the WHO funding decision.

(b)(5)

(b)(5)

(b)(5)

Thanks,
Denise

Subject: FW: IMPORTANT: TP or reactive statement on impact of WHO needed ASAP
Importance: High

We just rec'd the below request from the policy unit in the response (see bottom of email chain)...Is it possible to put together some sort of TP on the potential impact on our programs re: issue on WHO funding? This is in prep for the hearing materials for Dr. Redfield. (b)(5)

(b)(5)

Of course they need this ASAP. Let me know if easier to talk through.

Thanks,
Brooke

POLITICO NIGHTLY

Coronavirus Special Edition

BY RENUKA RAYASAM

Presented by

Humana

'I CAN'T BREATHE' — That was the cry of George Floyd, the black man whose death at the hands of a white Minneapolis police officer set off days of protests and rioting in the Twin Cities this week. The officer was [charged today](#) with manslaughter and third-degree murder.

Floyd's words are a strange echo of another crisis that's disproportionately affecting black people.

The twin tragedies of police violence and Covid-19 are rippling across the country, and they are not entirely disconnected. [Health inequities](#) like lack of access to health care have exacerbated chronic conditions in black Americans that have made them more vulnerable to coronavirus.

Minnesota grappled with both tragedies this week. The state had 35 Covid deaths on Thursday, a new single-day high, and hit 1,000 deaths today. Black people have suffered [a third of Covid cases](#) in Minnesota and a quarter of the state's Covid hospitalizations, despite making up only 6 percent of the state's population.

The state has the 19th highest Covid-related death count in the nation, with **967** deaths by May 28.

Source: Minnesota Department of Health

Kamran Rahman / POLITICO

And neither tragedy is under control. This morning, National Guard troops were stationed around Minneapolis to stem riots as demonstrators marched through the city. At the same time, Minnesota's Democratic Gov. Tim Walz has been slowly [easing social distancing restrictions](#) to allow outdoor dining and haircuts to resume next week. The state's health commissioner said [she fears protests](#)

could trigger a surge in cases, which were already expected to peak in late June or in July. The state's [intensive care units are filling](#) with more and more patients, worrying some public health experts that the health care system in the Twin Cities could become overwhelmed.

Carolyn McClain, an emergency physician in Minneapolis, said today that she's seeing the Liberian population and other immigrant communities who work in nursing homes especially hard hit by Covid. She's also seeing more violent suicide attempts as people buckle under stay-at-home orders.

When patients are dying, they are only allowed one visitor who must be covered in protective equipment. McClain said that an ICU nurse asked her to don the gear to say goodbye to her father on her behalf because the nurse couldn't make it to the hospital in time. "She said, 'You can yell into his right ear, that you are Susan and that Susan loves him.'"

McClain compared the situation to [an earthquake](#), devastation she witnessed when she traveled to Haiti in 2010 to volunteer after a quake killed more than a hundred thousand people there. "It's a different type of devastating, but exactly as sad," she said. "I have to do this day after day after day, and I don't know when it's going to end."

A message from Humana:

At Humana, we're committed to helping our members – many of whom are at high-risk for coronavirus – stay healthy and safe by connecting them to the resources they need. [Learn More](#)

PALACE INTRIGUE

WITH OR WITHOUT WHO — President Donald Trump said today he is terminating the U.S. relationship with the World Health Organization, making good on [his April threat to withdraw](#) from the U.N. health agency he's repeatedly blamed for mishandling the coronavirus pandemic, write health care reporters [Brianna Ehley](#) and [Alice Miranda Ollstein](#). Trump last month temporarily froze U.S. funding to WHO, contending the organization botched the international response to the pandemic and has been overly deferential to China at a time when experts questioned the country's transparency over the virus. The U.S. has previously contributed over \$400 million per year to WHO's \$4.8 billion annual budget, more than any other country.

The move was panned by health experts, who claimed it would set back global efforts to defeat a virus that's killed more than 360,000

people and sickened nearly 6 million. They worry the U.S. exit from WHO would leave the country blind to an exchange of critical public health information. The Geneva-based organization is coordinating worldwide vaccine and drug trials to combat the novel virus. But severing ties with WHO has been cheered by Trump's base, which is distrustful of international bodies.

Phone home — A federal judge said today [he'll consider ordering a Guantanamo Bay war-on-terror prisoner brought to the U.S.](#) if authorities don't come up with a way for the detainee to have regular telephone contact with his attorneys, [Josh Gerstein](#) reports. The judge said he doesn't consider an email- and fax-based system the Defense Department has set up to be adequate to handle legal mail between some detainees and their lawyers. Visits have been disrupted by the coronavirus pandemic. It seems unlikely that the Trump administration would agree to move a prisoner, especially during the pandemic or a presidential campaign, so the option of better telephonic or video links to the island prison seems more viable.

AROUND THE NATION

DATA DISINFECTANT — Former Obama administration official Andy Slavitt questioned on Twitter whether an apparent spike in pneumonia cases in Florida this year meant that state officials were hiding Covid deaths, but it turned out the data showing the spike was wrong. The ensuing online debate reemphasized how public health officials don't have the [full scope of the data](#) they need to manage state reopenings. That's true across the country, not just in red states like Florida and Texas, health care reporter [Adam Cancryn](#) told your host over Slack today.

The death toll is likely higher around the country than official Covid counts show, Adam said. There's some sloppy data keeping going on, intentionally or not. But it's also because Covid kills in many ways. A doctor may accurately list pneumonia as an official cause of death,

even if the patient had Covid. The virus could be listed as a secondary cause of death.

Different states, and even some medical examiners for that matter, have their own criteria for classifying deaths. Slavitt told your host today that data has been a problem in trying to make conclusions about Covid: “There needs to be a national standard and there isn’t one.” That, along with the CDC’s low-profile role during the pandemic, is leading to a fractured record-keeping system and fueling conspiracy theories about states hiding Covid deaths. Florida, like other states, has had its own fair share of data problems. But when it comes to excess deaths, which measures how deaths compare this year to previous years, it’s actually right in the middle of the pack..

THIS MONDAY 9 a.m. EDT – "INSIDE THE RECOVERY" PART I: PLAYBOOK INTERVIEW WITH WHITE HOUSE DOMESTIC POLICY ADVISER BROOKE ROLLINS. Join Playbook co-authors Anna Palmer and Jake Sherman for a virtual discussion with newly named White House domestic policy adviser Brooke Rollins centered on President Trump’s domestic agenda, the administration strategy for the next coronavirus relief package, and the policy initiatives she believes could gain momentum before the election. [REGISTER HERE.](#)

COVID-2020

THE INCUMBENT UNDERDOG — In the latest edition of Nerdcast, [Eugene Daniels talks with](#) national political correspondent [David Siders](#) about how, three months in, the pandemic is simultaneously upending and reaffirming political allegiances. Early state polls “paint a picture of opportunity” for Biden, David said. “We should make no mistake that Biden right now ... is the frontrunner.” But Trump is nowhere near finished. “If the public health emergency abates and this

becomes singularly about the economic response, Trump has the opportunity to wipe away everything else from his presidency and talk exclusively about the economy.”

 [Listen to the latest POLITICO Nerdcast](#)

PUNCHLINES

TRUTH OR DARE — In this episode, Matt Wuerker surveys the week that was in the internet’s [long war over fake facts](#) and explains what a

“Yahtzee” means to political cartoonists.

THE GLOBAL FIGHT

COVID'S GLOBAL MARCH — While some economies are reopening, Covid-19 marches on: This week the world hit a new milestone, averaging 100,000 confirmed new infections each day, [Ryan Heath](#) emails us. The pandemic's epicenter has shifted to Brazil. One in every two people taking a test in Brazil is positive, indicating the virus is more widespread than officially acknowledged. Even so, the country averaged 19,000 confirmed new cases each day this week and deaths frequently top 1,000 each day.

On a brighter note, Spain has had only four deaths since Tuesday, a remarkable turnaround for a country that just eight weeks ago peaked at 961 deaths in a single day.

Trump cited alleged control by China of WHO today as his core reason

for withdrawing the U.S. from the body. So far, the world is yawning, with no official reactions from other world leaders. Upon U.S. withdrawal, the Bill and Melinda Gates Foundation will become the organization's biggest funders. The Gates provide around [12 percent of WHO's budget](#), compared to just 0.2 percent coming from China.

NIGHTLY NUMBER

36 percent

The share of Americans who say going to the hospital is the riskiest behavior during the pandemic, according to a [national survey](#) from the Society for Cardiovascular Angiography and Intervention. The survey showed half of respondents were more worried about coronavirus than a heart attack, even though heart disease is the country's leading killer.

ASK THE AUDIENCE

We asked you: What does your face mask or covering look like? Here are some of the pictures you sent us.

WINNERS PLAY THE LONG GAME: If there is one thread linking the greatest challenges facing our society, economy and planet, it's the tension between short-term and long-term thinking. "The Long Game," presented by Morgan Stanley, is designed for executives, investors and policymakers who are leading the conversation about how our society can thrive in the future. Engage with the sharpest minds on our biggest challenges, from pandemics to plastics, climate change to land use, inequality and the future of work. Searching for a nuanced look at these issues and possible solutions? [Subscribe today.](#)

PARTING WORDS

MAKING MASKS GREAT AGAIN — MAGA gear is an unlikely vessel for national unity, but then, [these are desperate days](#), writes [Joanna Weiss](#), contributing editor to POLITICO Magazine. Trump-themed masks, whose slogans range from “MAGA” to “Trump 2020” to “Gun Owners for Trump,” have done brisk sales. They’ve boosted mom-and-pop businesses during the shutdown. And they may be playing a role in getting all of America — divided as it remains — on board with a collective social distancing tool: As they grudgingly follow requirements, some Trump supporters say, a mask with Trump branding eases the blow.

“You’re going to find this very strange, but I’m more of an anti-mask person,” said Laura Howard, a 63-year-old grandmother of eight and a retired Walmart assistant manager from Stanton, Mich., recounting the success of her business selling “Trump 2020” masks on an Etsy store called [“isewformygrandkids.”](#) She’s tried out some other designs, including one that says “RECALL WHITMER,” but the Trump mask is by far her best seller, and the customer feedback is glowing. “A lot of them have said that they’re anti-mask, they don’t really want to wear a mask,” Howard said. “But if they have to, this is the perfect mask for them to wear.”

A message from Humana:

At Humana, we’re experts at helping our members achieve better health and recognize our unique role in supporting them during this unprecedented time. That’s why we’re:

- 1) Waiving all member medical costs for coronavirus testing and treatment
- 2) Waiving copays for primary care and outpatient behavioral health visits, including telehealth, for Medicare Advantage members through 2020

3) Proactively mailing members safety kits with masks and encouraging the use of mail order pharmacies to help people access the resources they need from the safety of their homes.

Humana is committed to doing all that we can to protect our members' health during the coronavirus. [Learn More](#)

Subject: RE: OGA Questions for the Record: 6/18 SFRC Hearing WHO/GHSA

Hi all,

After talking with Susan, we were thinking it would be good if we can compile our CGH comments by COB, July 7th to give RM an opportunity to weigh in on them before we share back with CDCW.

Please let me know if this will present any issues.

Thanks,

Emily

Hi Joel and Serena,

Please find attached OGA responses to questions for the record from Director Grigsby's hearing with the Senate Foreign Relations Committee, on COVID19 and U.S. International Pandemic Preparedness.

(b)(5)

Let us know if you have any questions.

Thanks,

Emily

Independent Oversight and Advisory Committee
for the WHO Health Emergencies Programme

Interim report on WHO's response to COVID-19
January-April 2020

Independent Oversight and Advisory Committee for the WHO Health Emergencies Programme: Interim report on WHO's response to COVID-19

Background

1. Following the West Africa Ebola outbreak in 2014-2015 and WHO's organization-wide reform, the WHO Health Emergencies Programme (WHE Programme) and the Independent Oversight and Advisory Committee (IOAC) for the WHE Programme were established, in decisions taken by the World Health Assembly at its Sixty-ninth session.¹ The WHE Programme was officially launched on 1 July 2016 to reposition WHO as a United Nations specialized agency with operational functions for managing health emergencies while maintaining normative functions. The mandate of the IOAC is to provide oversight and monitoring of WHO's implementation of the reform and of its performance in health emergencies. Since the inception of the WHE Programme, the IOAC has been monitoring progress and providing independent scrutiny of WHO's work in outbreaks and emergencies.
2. The unprecedented pandemic of coronavirus disease (COVID-19) prompted the IOAC, in conducting its advisory and accountability function, to examine the performance of the WHE Programme during the first few months of the COVID-19 outbreak. The annual IOAC report, that would normally be submitted to update the IOAC report presented to the 146th session of the Executive Board,² will be submitted to the next full governing body meeting. This report is informed by WHO Secretariat briefings, desk reviews, and interviews with a select number of headquarters/WHE staff members, and external global health experts. The IOAC emphasizes that this is not a comprehensive assessment of the WHO COVID-19 response. Rather, in keeping with the IOAC mandate, it is a compilation of observations of how the structures and processes established by WHO, through the WHE Programme and related mechanisms, functioned from January to April 2020 in the context of the COVID-19 response. The IOAC notes that WHO is composed both of its Member States and the Organization's Secretariat. The present interim report makes it clear at whom specific recommendations are aimed throughout the document.
3. Significant progress has been made in WHO's health emergency management since the reforms approved by the World Health Assembly in 2016. The IOAC recognizes that the WHE Programme has, over the past four years, increasingly demonstrated its ability to function effectively across the three levels of headquarters, regional offices and country offices. In May 2020, the WHE Programme was responding to 174 acute events globally and a total of 60 graded crises, including five grade 3 crises and 29 grade 2 crises. WHO's

¹ See document WHA69/2016/REC/1, decision WHA69 (9) and Annex 10.

² Document EB146/16.

response to the Ebola virus disease outbreak in the Democratic Republic of the Congo, and its management of the ongoing serious health emergencies in Yemen and Syria and the Rohingya crisis in Bangladesh have in many respects been a proof-of-concept test for the WHE Programme. However, the international spread of COVID-19 has highlighted the challenges of handling a global pandemic and has tested WHO as never before.

Overall situation and global context of the COVID-19 pandemic

4. On 31 December 2019, WHO became aware of cases of pneumonia of unknown etiology detected in Wuhan City, Hubei Province of China.³ Since the notification of the first cases of COVID-19, the virus has spread around the globe. As at 14 May 2020, 4 218 212 cases of COVID-19, including 290 242 deaths, had been reported to the WHO Secretariat from 216 countries, areas or territories.
5. The virus was sequenced with great speed, and the WHE Programme began providing updates and guidance to WHO Member States almost immediately. Initial information on case fatality rate, severity, and transmissibility furnished by China in early January reflected an incomplete picture of the virus, but were updated by the WHO Secretariat following a country office mission to Wuhan from 20 to 21 January. An imperfect and evolving understanding is not unusual during the early phase of a novel disease emergence. Many uncertainties still remain about COVID-19, including the actual number of infections around the world, the mortality rate, its animal reservoir population and emergence, transmission patterns, the full range of complications, seasonality, immunity, and mutation of the virus. Since this novel disease only emerged five months ago, no vaccines or approved drugs for COVID-19 are available yet. However, investments have been made in research, and developments are taking place.
6. COVID-19 has overwhelmed health systems in several hard-hit countries, and the supply chain for personal protective equipment, testing kits and medical equipment such as oxygen treatment equipment and ventilators, is under immense pressure to meet global demand. Over 100 countries have implemented either a full or partial lockdown, in the effort to contain the spread of the virus and reduce pressure on their health systems. The lockdowns are exacerbating interconnected psychological, social and economic crises including poverty, unemployment, food shortages, xenophobia, domestic abuse and social unrest. The pandemic has heightened geopolitical tension and the public health crisis has become a major issue in domestic politics in many settings.

³ SITREP-1, 21 January 2020: https://www.who.int/docs/default-source/coronaviruse/situation-reports/20200121-sitrep-1-2019-ncov.pdf?sfvrsn=20a99c10_4, accessed 25 April 2020.

International Health Regulations (2005) and country preparedness

7. The International Health Regulations (2005) (IHR),⁴ are a legally binding international agreement between 196 States Parties, including all WHO Member States, to work together for global health security. Through the IHR, countries have agreed to build their capacities to detect, assess and report public health events. WHO Secretariat plays a coordinating role and is required to adhere to IHR protocols in its conduct during a dangerous novel disease outbreak. While binding on member states, the IHR do not provide the WHO Secretariat with authority to impose sanctions on countries for non-compliance. The IHR stipulate that it is up to Member States to adhere to the Regulations, and that the WHO Secretariat may offer assistance, but has limited power or authority in its own right.
8. On 22 January 2020, under the IHR, the Director-General convened the IHR Emergency Committee to address the outbreak of COVID-19. At that meeting, Committee members expressed divergent views on whether or not the outbreak constituted a public health emergency of international concern (PHEIC), the highest level of alarm/alert established under the IHR but agreed to reconvene in a matter of days to examine the situation further. The public summary of the meeting confirmed human-to-human transmission of the virus, and provided estimates of the virus' transmissibility, fatality rate, severity rate, and other essential information. On 28 January, the Director-General traveled to China to assess the situation directly.⁵ On 30 January 2020, at the second Emergency Committee meeting, WHO declared the event a PHEIC. The WHO Secretariat issued an Emergency Committee statement⁶ reconfirming human-to-human transmission and further international exportation of cases and recommending comprehensive strategies for country preparedness. The urgency with which Member States took action based on the PHEIC varied both in terms of the timing and the comprehensiveness of public health measures in response to COVID-19. **This raises questions about whether Member States view a PHEIC declaration as a sufficiently clear trigger. The IOAC notes that the design of the PHEIC is very broad, covering everything from a limited regional outbreak such as Ebola in West Africa to a large global pandemic that touches every country. Following the present crisis, it may be useful to review and update the IHR to reflect lessons from the pandemic. The IOAC encourages Member States to consider whether: a stepped level of alerts and galvanization of response measures should be added to the IHR; to enhance the**

⁴ International Health Regulations (2005). World Health Organization: Geneva; 3rd edition, 2016 (<https://www.who.int/ihr/publications/9789241580496/en/>, accessed 14 May 2020).

⁵ WHO newsroom: <https://www.who.int/news-room/detail/28-01-2020-who-china-leaders-discuss-next-steps-in-battle-against-coronavirus-outbreak>, accessed 14 May 2020.

⁶ WHO newsroom: [https://www.who.int/news-room/detail/30-01-2020-statement-on-the-second-meeting-of-the-international-health-regulations-\(2005\)-emergency-committee-regarding-the-outbreak-of-novel-coronavirus-\(2019-ncov\)](https://www.who.int/news-room/detail/30-01-2020-statement-on-the-second-meeting-of-the-international-health-regulations-(2005)-emergency-committee-regarding-the-outbreak-of-novel-coronavirus-(2019-ncov)), accessed 25 April 2020.

openness and transparency of the Emergency Committee process; and to review whether the IHR-nominated focal points in governments are able to adequately raise the alarm to ministers within their governments when a PHEIC is declared.

9. Inputs that the IOAC received suggest that the overall level of COVID-19 data reporting by Member States under the IHR needs further improvement in terms of speed, consistency and completeness. The IOAC notes that the quality of country reports varied, making it difficult for the WHO Secretariat to conduct comparable analyses of outbreak and readiness patterns across multiple countries. **Noting the critical role of Member States in data reporting, the IOAC recommends that the WHO Secretariat further streamline the reporting process and support countries in strengthening capacity to report on the information required under the IHR.**
10. The IHR include specific measures to be taken at ports, airports and ground crossings to limit the spread of health risks to neighboring countries, while minimizing interference with world travel and trade. The WHO Secretariat issued its first travel advice on 10 January 2020,⁷ drawing the attention of Member States to IHR provisions. Subsequent recommendations regarding travel under the IHR were issued based on updated guidance.⁸ However, over 100 States Parties reported to WHO that they were taking additional measures, given that each country had different goals depending on the phase of the epidemic, the country's socio-demographic composition and its health system capacity. **The IOAC notes it may be opportune for Member States to reassess WHO Secretariat's role in providing travel advice during a pandemic.**
11. In January 2020, the IOAC was briefed that over 100 countries had undertaken voluntary joint external evaluations (JEEs) and more than 60 countries had developed National Action Plans for Health Security (NAPHSs). The IOAC noted in its previous reports that the voluntary JEE tool was useful for identifying gaps but cautioned that the impact of JEEs and NAPHSs on strengthening IHR core capacities was still unclear. The IOAC sees no clear relation between JEE scores and country preparedness and response to COVID-19, suggesting that existing metrics for public health preparedness and health care capacity do not reflect the full range of variables that affect a country's response during a severe pandemic on a massive scale. The majority of countries appeared ill-prepared and struggled to implement public health measures in response to COVID-19. **In the light of this pandemic, the IOAC recommends that Member States and the WHO Secretariat**

⁷ WHO newsroom: <https://www.who.int/news-room/articles-detail/who-advice-for-international-travel-and-trade-in-relation-to-the-outbreak-of-pneumonia-caused-by-a-new-coronavirus-in-china/>, accessed 14 May 2020.

⁸ WHO newsroom: <https://www.who.int/news-room/articles-detail/updated-who-advice-for-international-traffic-in-relation-to-the-outbreak-of-the-novel-coronavirus-2019-ncov-24-jan>, accessed 14 May 2020;

review the IHR core capacities and existing tools and framework for national and international preparedness, and consider whether they need to be updated.

12. The WHO Secretariat's response to COVID-19 was faster than for either the MERS or SARS epidemics, but this did not prompt similarly rapid action by all Member States; this may indicate a gap between the current IHR and Member State expectations of WHO Secretariat's role. This pandemic has called into question whether the existing roles and responsibilities that the IHR assign to the WHO Secretariat and to Member States are widely understood, fit for purpose and still appropriate for a pandemic. **The IOAC therefore recommends that the International Health Regulations (2005) should be reviewed by Member States in the light of the COVID-19 pandemic to ensure that the attribution of authority and roles outlined under the Regulations are in alignment with Member States' understanding and expectations. This may entail revisiting the roles and responsibilities of the WHO Secretariat and the duties of Member States.**

WHO leadership and capacity for managing a pandemic

13. Evidence collected from the IOAC desk review indicates that the initial process of providing information about the new virus was conducted within the parameters established under the IHR. On 5 January 2020, the WHE Programme published the information that it had available in its first disease outbreak news on the WHO website. On the same day, it alerted all IHR national focal points through a post on the Event Information site. It issued the first situation report on 21 January 2020. Since then, the epidemiological data have been updated on a daily basis. The Director-General has provided media briefings frequently since 4 February 2020. The WHO Secretariat also dispatched a team of 25 national and international experts to conduct a joint WHO-China mission from 16 to 24 February 2020⁹ and conducted COVID-19 technical support missions to the Islamic Republic of Iran on 10 March 2020 and to Egypt on 25 March 2020.
14. The IOAC noted the coordination across the three levels of the organization under the leadership of the Director-General and the Executive Director of the WHE Programme. Internal communication and decision-making processes have been greatly improved through WHO Health Security Council meetings (the Director-General with the Regional Directors), the Senior Leadership Group (composed of Executive Directors, the Assistant Directors-General of different programmes within the Organization and the Chief Scientist), and the incident management system in the context of the COVID-19 pandemic.

⁹ Report of the WHO-China Joint Mission on Coronavirus Disease 2019 (COVID-19) (https://www.who.int/docs/default-source/coronaviruse/who-china-joint-mission-on-covid-19-final-report.pdf?sfvrsn=fce87f4e_2, accessed 14 May 2020).

15. The WHO Secretariat activated its incident management system to coordinate the outbreak response on 1 January 2020. The incident management system has been the core of WHO daily operations and its performance has reaffirmed its potential for acute event management. However, the IOAC observes that the incident management support team is overstretched due to the huge demand generated by the pandemic. Thought needs to be given as to whether it is an adequately resourced and staffed command structure to handle the immediate public health response, produce and communicate sound scientific guidance, develop recommendations for the multiple economic and social consequences of the public health measures, support country preparedness, and equipped with the strategic capacity to manage the challenges of a pandemic of this scale, complexity and impact. **The IOAC recommends that Member States and the WHO Secretariat revisit the size and surge capacity of the WHE Programme to ensure sufficient capacity, resilience and flexibility within and beyond the incident management system to respond adequately to such multidimensional and large-scale emergencies, alongside the increasing number of graded emergencies that it routinely manages.**
16. For the 2018–2019 biennium, WHO allocated US\$ 554 million to implement its core activities in health emergency management and raised 82% of the total requirement. The current pandemic has given rise to questions on the adequacy of the WHE Programme budget, and WHO financing. The IOAC considers that less than US\$ 300 million per year is too modest a budget to implement all the activities needed to support Member States with health emergencies and, at the same time, coordinate a global response to pandemics. The IOAC also notes that a substantial proportion of the funds for WHO are earmarked voluntary contributions. This precarious financial situation has impeded strategic planning and human resources management. An increase in the assessed contributions and improved accountability function would increase the sustainability and funding predictability of WHO. **The IOAC recommends that Member States review WHO financing to ensure the WHE Programme is able to continue to play a key role in global health emergencies with appropriate capacities.**
17. Since the 2019 novel coronavirus strategic preparedness and response plan¹⁰ was launched in early February 2020, WHO has raised US\$ 408.1 million for its work across the three levels of the Organization, with a further US\$ 306.4 million pledged as at 1 May 2020. The second iteration of the strategic response and preparedness plan is expected during the first week of May, and WHO will require an estimated US\$ 1.7 billion through till the end of the year,

¹⁰ 2019 novel coronavirus strategic preparedness and response plan. Geneva: World Health Organization; 2020 (<https://www.who.int/emergencies/diseases/novel-coronavirus-2019/strategies-plans-and-operations>, accessed 14 May 2020).

leaving the Organization with a funding gap of US\$ 1.3 billion. WHO has succeeded in diversifying its donor portfolio and financing mechanisms. It has set up the COVID-19 Solidarity Response Fund¹¹ to promote global solidarity and to secure financial resources in an innovative way. As at 4 May 2020, more than US\$ 200 million had been raised from more than 229 000 individuals and organizations through the Solidarity Response Fund.

18. The IOAC acknowledges that throughout the COVID-19 pandemic, the WHE Programme has engaged closely with numerous existing networks and partnership platforms, including the Strategic and Technical Advisory Group on Infectious Hazards (STAG-IH), the Global Outbreak Alert and Response Network (GOARN), the Inter-Agency Standing Committee for health emergencies, and the global health cluster. These networks have become an important platform for epidemiological update and coordination among implementing partners. The Director-General has also reached out to public health experts to review the situation on a daily basis and seek independent advice in formulating the response strategy. Under WHO's leadership, numerous new initiatives have been put in place with various stakeholders, including from the private sector and faith-based organizations. **The IOAC encourages the WHO Secretariat to continue engaging and working collaboratively with partners and global experts and disseminating best practice.**
19. The leadership role of WHO within the United Nations in global health emergencies has been strengthened through the COVID-19 pandemic. The United Nations Crisis Management Team (UNCMT) was activated on 4 February 2020 to coordinate the entire United Nations system to support countries in responding to COVID-19. The IOAC notes that the UNCMT is being led by the WHO Secretariat for the first time and recognizes the establishment of a United Nations COVID-19 supply chain task force to scale up the supply of essential COVID-19 tools such as personal protective equipment, ventilators, and laboratory equipment.
20. The IOAC welcomes the update, released on 7 May 2020, of the Global Humanitarian Response Plan for COVID-19¹² to avoid the most destabilizing effects of the COVID-19 pandemic. The IOAC was briefed that the plan was updated using a bottom-up approach in close collaboration with NGOs. The humanitarian system is encouraged to continue engaging with local and international NGOs in implementing its response plan, and to obtain community feedback and the perspective of implementing partners on the ground.

¹¹ For information on the fund, see <https://www.who.int/emergencies/diseases/novel-coronavirus-2019/donate>, accessed 14 May 2020.

¹² Global Humanitarian Response Plan for COVID-19. Geneva: United Nations Office for the Coordination of Humanitarian Affairs; 2020 (<https://reliefweb.int/report/world/global-humanitarian-response-plan-covid-19-april-december-2020-ghrp-may-update-abridged>, accessed 14 May 2020).

21. The IOAC recognizes that WHO has published more than 50 technical guidance documents for the public, for health workers and for countries, providing advice on the COVID-19 response. However, the delay between messaging at press briefings and putting out corresponding guidance on some key response elements such as the testing strategy, mask usage and managing personal protective equipment shortages, and the long-term virus suppression strategy, has given rise to uncertainty. The IOAC observes that there is a tension between rapid communication and timely provision of guidance, and between WHO's aspirations to lead technical guidance, and the limits imposed by its workforce capacity to do so in the heat of a crisis. **The IOAC recommends that the WHE Programme make more robust use of WHO collaborating centres around the world, expert networks, such as technical advisory bodies, and public health institutes. These bodies can support WHO in generating technical recommendations, validated by WHO, and thus supplement WHO's capacity in fast-moving crises.**
22. The IOAC observes that some WHO recommendations could be challenging to implement in low-resource settings and for certain populations. The social and economic implications of recommending public health measures such as isolation and social distancing for populations living in overcrowded and insecure settings, with inadequate access to food, safe water and sanitation, or for migrants with temporary or undocumented residential status, must be taken into consideration. Additionally, because of the growing evidence of the disproportionate impact of the virus on certain populations, based on gender, class, race and ethnicity, it is important for public health guidance to take into account the differential medical and socio-economic challenges faced by these populations. The IOAC acknowledges the efforts of other United Nations agencies, under the leadership of the United Nations Deputy Secretary-General, to mitigate the socio-economic impacts of the pandemic. However, mitigating those impacts does not preclude integrating those realities into public health guidance. For this reason, the IOAC also welcomes the Inter-Agency Standing Committee's Interim Guidance,¹³ and the United Nations Sustainable Development Group's Shared Responsibility, Global Solidarity,¹⁴ which both take an integrated approach that tailors public health recommendations for different socio-economic contexts and individual characteristics and empowers communities to find local solutions and mechanisms suited to their own context.

¹³ Interim Guidance on Public Health and Social Measures for COVID-19 Preparedness and Response in Low-Capacity and Humanitarian Settings. Inter-Agency Standing Committee (IASC): May, 2020 (<https://interagencystandingcommittee.org/health/interim-guidance-public-health-and-social-measures-covid-19-preparedness-and-response>, accessed 10 May 2020).

¹⁴ Shared Responsibility, Global Solidarity: Responding to the socio-economic impacts of COVID-19. United Nations Sustainable Development Group (UNSDG): March 2020 (<https://unsdg.un.org/resources/shared-responsibility-global-solidarity-responding-socio-economic-impacts-covid-19>, accessed 10 May 2020).

23. Development of COVID-19 vaccines across the world is progressing rapidly to reduce the impact of the disease on the global population. There are also numerous therapeutic trials underway to find effective clinical management modalities and drugs to treat the disease. The IOAC recognizes the R&D blueprint as a means of coordinating the ongoing efforts of the global research community and that it has facilitated the process of multi-national vaccine and therapeutic drug trials by standardizing protocols and leveraging national capacities. As at 21 April 2020, over 100 countries had joined the Solidarity Trial to evaluate therapeutics for the treatment of COVID-19. The IOAC considers that the future challenge is not purely technical, but that there is a need for a multilateral approach to deal with the global regulation of, and access to, vaccines as they become available, and treatments. **The IOAC recommends that WHO promote the establishment of an appropriate multilateral governance mechanism for ensuring equitable access to therapeutics and vaccines for all countries and effective delivery and stewardship, drawing upon previous experience of epidemics and pandemics.**
24. Without a vaccine or effective treatments, the world will have to live with and manage the virus on the basis of existing public health measures. As countries prepare to lift lockdown measures and move toward sustained suppression, **the IOAC recommends that the WHO Secretariat support Member States to urgently plan the next steps by intensifying basic public health measures at scale, investing in global health architecture for vaccine and drug development, securing the global supply of life-saving tools, strengthening local health care systems, and empowering communities through a calibrated approach, adapted to different individual vulnerabilities and socio-economic contexts.**

Concluding remarks

25. Considering the novel nature of this virus and persistent unknown factors, the IOAC notes that WHO has demonstrated leadership and has made important progress in its COVID-19 response. The IOAC commends the WHE Programme and staff on their dedication and hard work. The IOAC also condemns the credible threats targeted against the Director-General and staff members, which have followed criticism of the Organization in the media. The IOAC commends Member States, the Director-General, the Regional Directors, and the Executive Director of the WHE Programme for their leadership and deep commitment to contain the virus. The IOAC acknowledges the Director-General's engagement of Heads of State of WHO's membership to underscore political commitment and to address the global issues in a coordinated manner. It also notes the growing coordination between United Nations institutions to address some of the wider COVID-19 impacts.
26. The IOAC reiterates that global health is a shared responsibility and Member States must play their part. **It may be useful, at an appropriate time, to independently assess the**

Organization's performance during this response and identify lessons for the future. The scope of such an assessment should be determined by Member States, and should cover both Member States' and WHO Secretariat's actions in response to the COVID-19 pandemic. The IOAC would caution that conducting such a review during the heat of the response, even in a limited manner, could disrupt WHO's ability to respond effectively. The IOAC reiterates that WHO Secretariat's actions are grounded in its duties and responsibilities under the IHR, and recommends that reviewing WHO's performance must be considered in light of the suitability of the IHR, and of Member States' adherence to the IHR in their own responses to the crisis.

- 27. The world is at a critical juncture in this unprecedented crisis and will not defeat this virus without greater global solidarity and stronger multilateral cooperation, and the execution of the forward-looking strategy required for the upcoming months of the pandemic.** The COVID-19 pandemic is having huge socio-economic impacts across the globe, on health, economies, businesses, and on the workings and interactions of all communities in a way no other emergency has had before. No single Member State can hope to defeat this virus solely with the tools that exist within their own borders. Yet there has been a palpable lack of global solidarity and common purpose. That is a recipe for extending and worsening the global outbreak, leaving all countries less secure. A successful pandemic response hinges on inter-connected global systems and networks: of scientific expertise, medical supply, trade, innovation, and production. The rising politicization of pandemic response is a material impediment to defeating the virus, while it aggravates other health, social and economic impacts. WHO cannot succeed without unified global political support during the next phases of the pandemic.

Good morning –

On June 22, we have a senior leader working session meeting at 9:30am, and on the agenda is the required “transition planning” process across the federal government.

Please note:

- The Partnership for Public Service leads the “Center for Presidential Transition”
- The Center provides a roadmap, tools, and a timeline for planning:
<https://presidentialtransition.org/wp-content/uploads/sites/6/2018/01/Presidential-Transition-Guide-2018.pdf>
- The White House released guidance: <https://www.whitehouse.gov/wp-content/uploads/2020/04/M-20-24.pdf>

(b)(5)

If you have any questions, let me know.

Thank you,
Sherri

This will add a late variable to our cash gap projections, to be delivered to SC 29 April. We had factored in half of CoAg, about \$25m and a quarter of USAID, \$10m, because of its many conditions, to be available this year. Now we will show a scenario that excludes these. Surveillance is most affected activity.

Hi Michel,

The details of this are still being sorted out. I'm providing some informal information for your awareness but it does not replace detailed official information that will be provided by the CoAg manager.

What we know is the following:

1. Right now it does not appear to impact seconded staff
2. It doesn't appear to impact funds already with WHO so those continue to be used by you.
3. There is a 60 day hold on further funding which will be reviewed then. Therefore it might have an impact the timing of supplemental funding we were planning for the CoAg. We are trying to understand this further and conveying what the impact of that would be within our reporting chains.
4. We will update you as we learn more.

On a more positive note, a review by our acquisition office indicated that the polio appropriation could support the COVID response so the COVID work of WHO staff funded on the CoAg will be allowed. More

details on this will be provided by the CoAg Manager in the coming days. This decision will be permissive of similar effort by staff of several of our other awards and aligns well with the POB decisions related to this.

I hope this short 'unofficial' response helps provide some clarity on what we think the bounds of this are at the moment.

Best,
John

WHO Director-General's Special Envoys on COVID-19

Terms of Reference

Background

WHO encourages nations and their people to get ready for COVID-19 outbreaks, diminishing the impact of outbreaks through innovative and rigorous operations, sharing up-to-date information and encouraging best fit-for-purpose responses. WHO encourages: well organized public health action; effective case-finding, contact tracing and social distancing; repurposing of clinical facilities to reduce suffering and death while protecting health workers; resilience of health systems so that they can function in the face of the COVID-19 threat; and honest, transparent and compassionate communication with individuals and communities. To help increase the reach of WHO's efforts, the WHO Director-General (DG) has appointed six Special Envoys on COVID-19.¹ They will mobilize political support, expand policy dialogue platforms – especially between countries – and advocate for policy options that characterize regional and national specificity.

Vision

The WHO Envoys support WHO's efforts to be familiar with, and to anticipate, the needs of Member States in containing the spread of the COVID-19 virus. They convey WHO's emphasis that the spread of COVID-19 can be contained and build on any existing efforts taken by the countries to encourage urgent and aggressive action at the local, national and international levels. WHO offers credible, high-level guidance on preparedness, readiness and response to COVID-19 outbreaks to countries, communities, families, individuals and stakeholders in the public and private sectors. They disseminate the DG's messages and approach where most needed and with maximum impact, generating sustained relationships and communications, promoting COVID-19-ready mindsets and ensuring the continuity and resilience of health services and the resilience of people's livelihoods.

Scope and focus

The WHO Envoys will pursue this vision through high-level advocacy, political engagement and strategic advice on preparedness, readiness and response to COVID-19 outbreaks. They will amplify the DG's analyses and messages with all stakeholders, including government, public and private sector actors, communities and individuals. They will help ensure that guidance from WHO on COVID-19 preparedness and response is implemented consistently and to a high standard. They will help limit the impact of outbreaks on already overwhelmed health systems.

High-level advocacy and political engagement

The WHO Envoys will engage with regional bodies and national governments, interpreting WHO guidance, encouraging adoption and adaptation in the light of local, national and regional circumstances. They will contribute to the mobilization, use and accounting for national resources appropriately throughout the epidemic phase and beyond. At all times they will work closely with WHO DG, Regional Directors (RDs) and country offices.

The WHO Envoys will encourage international, regional and in-country partners to support and resource regional and national-level implementation of WHO guidance with a particular focus on the resilience and capabilities of health systems in the face of crisis. They will identify and engage with platforms and networks which can aid implementation of guidance and coordination of actors.

¹ The six WHO Envoys are: Professor Dr Maha El Rabbat, former Minister of Health of Egypt; Dr David Nabarro, former special adviser to the United Nations Secretary-General on the 2030 Agenda for Sustainable Development and Climate Change; Dr John Nkengasong, Director of the African Centres for Disease Control and Prevention; Dr Mirta Roses, former Director of the WHO Region of the Americas; Dr Shin Young-soo, former Regional Director of the WHO Region of the Western Pacific; and Professor Samba Sow, Director-General of the Center for Vaccine Development in Mali.

Strategic advice

The WHO Envoys will focus on effectively disseminating the most up to date WHO guidance on all aspects of COVID-19 readiness and response. Effective preparation and response to COVID-19 necessitates informed and effective implementation of WHO guidance to a high and consistent standard to limit the impact of outbreaks on already overwhelmed health systems. The focus is on readiness for outbreaks through the identification of new cases, as well as patient care and communications, from high-level strategy to local-level operations. In addition, research action will be encouraged and coordinated by WHO in collaboration with the existing, experienced research centers and technical and financial partners in order to better understand the epidemiology, diagnostic, treatment, prevention (vaccine candidates) and control of this new virus.

Working methods

It is essential that national governments can take up, in real time, WHO guidance and gauge how it applies to them and their health systems. This is also of paramount importance in terms of ensuring that national resources are mobilized and accounted for appropriately throughout the epidemic phase and beyond.

To this end the WHO Envoys will work closely with the WHO DG, RDs and county offices, as well as Member State governments (regional, national and local), intergovernmental bodies and all technical and financial partners at local, national, regional and global levels to:

- Identify regions and prioritize countries for engagement; and
- Work with the WHO country offices to prioritize areas for urgent action and effective prioritization and deployment of resources.

The WHO Envoys will

- Promote the provision of timely and reliable information about COVID-19 and ways to minimize risks of infection, based on evolving scientific information, amplifying the messages of the WHO DG through all appropriate communication channels.
- Help establish and maintain direct channels for communications with relevant members of government including, as appropriate, Heads of State or Government to help support outbreak tracking and provide clear communications about risks and opportunities.

High-level visits

The WHO Special Envoys, with facilitation from WHO regional and country offices, will visit countries at higher-risk or with outbreaks or upon country request to transmit and interpret WHO guidance with leaders within government and beyond. These interactions will contribute to political engagement and assist with mobilizing financial and human resources for implementing this guidance.

Local-level visits

At times it will be appropriate for the WHO Special Envoys to make visits to the local level. This will be for the purposes of assessment and evaluation of activities and progress. It will also be important for the field workers, who are on the frontline, to be reassured that their work – and the risks they are taking – is appreciated and valued. This will help to retain morale of these workers. These visits should be made in conjunction with high-level Government officials from the country for maximum impact.

Joint visits

It may be appropriate at various times for the WHO Special Envoys to make joint country visits. This may be to garner extra support and political will, or for cross-sector and cross-country learning, or for diplomatic or other COVID-19 related reasons.

Networking and remote meetings

The WHO Special Envoys will maintain close contact with countries, in-country representatives and other country-specific partners, through networks and remote meetings that enable them to troubleshoot issues, to share learning and best practice and to provide technical support.

Amplifying the messages of WHO

The WHO Special Envoys will, as and when available, take part in regular teleconferences with leaders of media and related organizations as organized by, or set up on behalf of, the WHO HQ Communications Department

Connections between the WHO Special Envoys

The WHO Special Envoys will remain in close contact with each other so that they can share experiences and work to communicate the situation on the ground.

Expected achievements

Short term – within three months: Identify and prioritize countries to engage with and support them to urgently implement required preparedness, preventive and response activities.

Medium – within 6 months: Maintain and monitor the gains from the past few months. Monitor and ensure effective ongoing activities and feed learnings and required corrective actions from the first phase back to WHO.

Long term – after 12 months: Sustain progress made. Provide vital feedback of learning for future outbreaks of COVID-19 and other infections. Support countries in reviewing their health systems beyond the current outbreak to support recovery and resilience by suggesting required sustainable system changes.

Method of work

Collaboration/partnership

The WHO Special Envoys will work in close collaboration with all relevant WHO offices and departments at national, regional and global levels, as well as other relevant UN institutions, intergovernmental bodies, external partners and stakeholders from the public, private and non-governmental sectors.

Strategic geographic engagement

The WHO Special Envoys will work with the WHO Secretariat to identify appropriate opportunities to engage with Member States and stakeholders at all levels: global, regional, national and local. In engaging, the WHO Special Envoys will work together to determine who (i.e. which Envoy or combination of Envoys) is best placed to have the greatest impact at each event, meeting or other opportunity, with a view to maximizing their Regional presences, influence and access.

Division of labor among the Special Envoys

The WHO Special Envoys will work in a coordinated manner and conduct missions jointly as needed. In terms of geographic focus, the proposed division of labor among the Special Envoys is:

- African Region (anglophone): Dr John Nkengasong
- African Region (francophone): Professor Sambo Sow
- Eastern Mediterranean: Professor Dr Maha El Rabbat
- Europe and North Americas: Dr David Nabarro
- Latin Americas and Caribbean: Dr Mirta Roses
- Western Pacific and South-East Asia: Dr Young-soo Shin

Reporting

The WHO Special Envoys will provide the DG with strategic advice and will report to him on their ongoing activities and observations of important issues.

The WHO Special Envoys will regularly report on their work and the situation in the countries with which they are liaising to the DG, RDs, WHO country and Regional Offices and other WHO leadership as appropriate. A reporting template will be developed to enable this reporting.

Duration

The WHO Special Envoys will serve in this capacity for an initial period of one year, renewable on request of the DG and agreement (individually) of each Envoy.

While acting in the role, each WHO Special Envoy will act to carry out his or her Envoy duties to the extent possible, given their respective existing commitments and availabilities.

Requirements

In order to carry out these tasks, the WHO Special Envoys will require:

- A formal letter of appointment from WHO sent out through WHO diplomatic channels and via the Regional and countries offices to all the country governments, including at the highest levels.
- Human resources in the form of a small team to support their work; this team will include technical, operational, communications, logistical and administrative support.
- Funding to cover various expenses necessary to enable them to carry out their duties effectively.

Support to the WHO Special Envoys

Financial support to the functions of the WHO Special Envoys will be provided by the WHO Secretariat, including, as available and appropriate, remuneration for expertise provided by the Envoys and support for their required substantive and administrative support related to their Envoy roles.

Technical expertise and guidance on COVID-19 for the functions of the WHO Special Envoys will be provided by the WHO Secretariat. The WHO Secretariat will also provide support to the Envoys and their essential support staff for all travel undertaken to fulfill the Envoy role. All direct costs for such technical and logistic Secretariat support to be met from WHO funding.

Hello, Garrett.

I hope this note finds you well. I'm attaching a letter the community has come together to develop, in response to the announcement last week. Please know that we stand ready to meet with you and Secretary Azar on any of its details.

Thank you for your support,
Loyce

April 24, 2020

President Donald Trump
The White House
1600 Pennsylvania Avenue NW
Washington, D.C. 20500

Dear President Trump:

During this unprecedented global crisis, it is imperative for the U.S. to demonstrate leadership by working with the global community not only to stop the spread of COVID-19, but also to help strengthen the global public health architecture to mitigate a crisis of this magnitude from happening again. Therefore, we, the undersigned organizations, urge the U.S. Administration to continue to fund the World Health Organization (WHO) to end this pandemic.

The United States cannot rid this insidious virus from the country, nor around the world, without WHO.

WHO is the only organization with the technical capacity and global mandate to support the public health response of all countries during this critical time. China first alerted WHO to the possibility of a novel type of coronavirus on December 31, 2019. WHO worked closely with U.S. public health institutions like the U.S. Centers for Disease Control and Prevention (CDC) and the National Institutes of Health (NIH), as well as the global community, to collect, analyze, and disseminate public health information about COVID-19.

These actions equipped countries with advance warning and guided states' efforts to prepare for the spread of the virus. Just one day after receiving the alert from China, WHO alerted the CDC and by January 10, WHO issued guidance to countries on how to detect, test, and manage potential cases of the novel virus, and best practices to protect health workers delivering care on the frontlines of the response.

As the threat became more understood, WHO continued to engage with the Chinese government to ensure vital public health data from the Wuhan epicenter was conveyed to the global community at rapid pace – unlike during the 2002-2004 SARS epidemic. Through this engagement, China shared genetic sequencing of the novel virus, accelerating the development of vaccine candidates and therapeutics. While their transparency in many areas was still lacking, this paved the way for a WHO technical team to visit Wuhan in late January and again in February to study the disease, gaining knowledge that informed containment and response measures now being implemented by member states globally. The February visit also included scientists from NIH and CDC.

Led by WHO, work began immediately to design a global Research & Development Blueprint. Hundreds of researchers from dozens of countries participated; paving the way for more than 78 vaccine candidates being worked on in dozens of countries, with five in clinical trials. This pace is both essential and unprecedented and would not have been possible without rapid WHO engagement.

At the same time, WHO began essential, rapid work – often done collaboratively with CDC technical experts – to design more than 50 pieces of technical guidance to help countries and communities prepare. These resources have been used by hospitals and frontline staff throughout various cities and states in the United States, as well as all over the world.

Given the lack of scientifically proven and effective treatments, by March 18, WHO launched a study called the “Solidarity Trial” to compare the effectiveness of four potential treatments for COVID-19 against one another. Over 90 countries are now participating in this trial.

During an unprecedented and hugely complex public health crisis like this, there are bound to be challenges. After WHO and the global community turn the tide against COVID-19, WHO has signaled an eagerness to assess where mistakes occurred and how best to strengthen the institution and global public health response capacities of all countries in the future.

It is without question, however, that WHO efforts have been vital to flattening the curve, slowing the virus’ spread, and ultimately saving lives in the U.S. and around the world.

As the virus continues to spread into poorer countries ill equipped to combat the disease, WHO’s role will become even more vital as it supports fragile health systems already struggling to provide basic health interventions to vulnerable populations. In this capacity, WHO’s interventions will not only save lives but also ensure economic stability as the world recovers from this devastating disease.

With a COVID-19 vaccine still at least 12-18 months away, all countries must strengthen efforts to stop the spread of the virus, save lives, and restart the global economy. At a time of the worst public health disaster in the last 100 years, suspending funding to WHO would be like cutting the water supply to a firefighter in the middle of a fire. More than 1,000 organizations and individuals are joining to express their support. We believe it is critical to continue to support WHO’s work, especially as they partner closely with leading U.S. agencies like CDC, NIH, USAID and the Department of State, to keep people safe around the world and here at home.

Sincerely,

Subject: Comms Guidance: US funding & Polio Eradication in the African Region

Dear colleagues,

Following the US announcement to suspend its funding to WHO, please find below a **REACTIVE** statement for your reference.

Kindly let me know if you receive media requests on this issue.

World Health Organization (WHO) Statement on the United States of America's decision to suspend funding to WHO and its implication on polio eradication in the African Region

The World Health Organization is hopeful that the African Region will be certified to have eradicated wild poliovirus in 2020. The Africa Regional Certification Commission (ARCC), an independent body of experts charged with reviewing standardized data on the situation and making an official determination, has already accepted the documentation of 43 out of the 47 countries in the WHO African Region*, granting them a wild polio-free status. The Commission has concluded its field verification visits to the remaining four countries: Central African Republic, Cameroon, South Sudan and Nigeria. However, given the travel restrictions due to COVID-19 pandemic, the ARCC has been unable to conduct a final

documentation review of the four remaining countries before it makes its final decision. This process will resume as planned once the situation permits.

In the meantime, the polio eradication programme in the African Region is supporting COVID-19 preparedness and response with its resources, while maintaining core programmatic activities such as disease surveillance as well as preparing for a rapid scale up in vaccination efforts as soon as the COVID-19 situation has stabilized.

WHO is grateful to all its supporters and donors around the world. Each donation makes a difference. We hope that the United States' decision to suspend funding to WHO would be reconsidered. Over the years, the United States has been a generous financial partner as well as a key implementing partner supporting polio eradication efforts in Africa and around the world.

**The WHO Regional Office for Africa comprises 47 countries which include Algeria and most of sub-Saharan Africa*

Don't hesitate to get in touch if you have any questions or feedback.

All the best,

Halim

AbdelHalim AbdAllah

Communications Officer

Hi Team,

Please see the summary of the four new bills we have been tracking this week along with info on the Connolly/Chabot bill since it is so relevant to discussion. Let me know if you have any additional comments or concerns. Happy to address! Thanks for all your hard work and effort.

New:

1. [S. 3669](#)
 - Introduced: 5/7/2020

- Sponsor: Sen. Robert Menendez (D-NJ)
- Co-sponsors: Note- All minority members of SFRC
 - Sen. Benjamin Cardin (D-MD), SFRC
 - Sen. Jeanne Shaheen (D-NH), SFRC
 - Sen. Christopher Coons (D-DE), SFRC
 - Sen. Tom Udall (D-NM), SFRC
 - Sen. Chris Murphy (D-CT), SFRC
 - Sen. Tim Kaine (D-VA), SFRC
 - Sen. Edward Markey (D-MA), SFRC
 - Sen. Jeff Merkley (D-OR), SFRC
 - Sen. Corey Booker (D-NJ), SFRC
- Status: Referred to the Senate Committee on Foreign Relations
- This bill includes an addition \$9 billion in funding to help support international efforts to fight the COVID-19 pandemic, including engagement with international and multilateral organizations to help collectively stop the spread of COVID-19. The bill proposes a series of requirements including: U.S. participation in the Coalition for Epidemic Preparedness Innovations (including authorization of \$200 million); restoration of U.S. funding for WHO; increased humanitarian assistance; directing the U.S. Ambassador to the UN to increase U.S. leadership at the UN Security Council related to COVID; and directing the re-establishment of a position within the National Security Council with responsibility for global health security emergencies.
- ATTACHED DOCUMENTS: Bill analysis and summary, Full bill text, initial TA comments provided to CDCW (see analysis for full list of questions)

2. [S. 3656](#)

- Introduced: 5/7/2020
- Sponsors: Senator Murphy (D-CT) and Senator Romney (R-UT)
 - Almost identical to the content of Connolly/Chabot HR 2166 (see below for summary of content) in intent to establish a coordinating Global Health Security Interagency Review Council, inclusive of agencies mirroring H.R.2166. S.3656 does call for the creation of a Global Health Security Coordinator, but **recommends** the President to appoint an NSC official in this role. Murphy's bill also requires this person work in coordination with President's Special Coordinator for International Disaster Assistance.
- Status: Referred to Senate HELP
- Gov track chance of being enacted percentage: not available

- Murphy's bill includes that it is the sense of congress that the President should consider appointing an individual with background and expertise in public health or emergency response management to the Coordinator position, who is an NSC employee at level of Deputy Assistant to the President or higher
- DOCUMENTS ATTACHED: Full bill text

3. **H.R._ Health and Economic Recovery Omnibus Emergency Solutions Act 'HEROS' Act**

- Introduced: Not yet, vote expected potentially today, 5/5/2020 in the House
- Sponsors: Rep. Lowey (D-NY-17), Rep. Engel (D-NY-16), Rep. Maloney (D-NY-12), Rep. Nadler (D-NY-10), Rep. Palone (D-NJ-10), Rep. Scott (D-VA-3), Rep. Takano (D-CA-41), Rep. Valasquez (D-NY-7), Rep. Waters (D-CA-43)
- Status: N/A
- \$3 trillion bill for coronavirus relief, following up on the \$2 trillion aid package passed in March. The latest bill, called the HEROES Act, prioritizes granting hazard pay to front line workers and providing aid to state and local governments, which had not been allotted in previous bills. The bill also includes Global Health Security language similar to the language proposed in the recently introduced Romney/Murphy bill. It calls for the appointments of a Global Health Security Coordinator and recommends the President to appoint an NSC official in this role. Similar to the Murphy/Romney bill it also requires this person work in coordination with President's Special Coordinator for International Disaster Assistance.
- Note: While the House could vote on the measure as soon as Friday, it is not expected to gain significant traction in the Senate.
- DOCUMENTS ATTACHED: Full Bill Text

4. **S._ (Senator James Risch expected to sponsor)**

- Introduced: Unintroduced
- Co-Sponsors: Unknown
- The act intends to advance global health security interests of the United States, improve coordination among the relevant Federal departments and agencies implementing United States global health security assistance, and more effectively enable partner countries to strengthen and sustain resilient health systems and supply chains with the resources, capacity, and personnel required to prevent, detect, mitigate, and respond to infectious disease threats before they become pandemics.
- Key Sections:
 - **Section 102. Global Health Security Strategy.** Requires the President to advance a comprehensive strategy to advance the global health security interests of the United States overseas, which shall seek to: (1) improve coordination within the USG and with other donors, multilateral organizations, and key stakeholders; (2) establish clear roles, responsibilities, objectives, and monitoring and evaluation plans under the strategy; (3) build technical capacity within partner countries while reducing long-term reliance upon U.S. assistance; and (4) support innovation and public-private partnerships.
 - **Section. 103. Global Health Security Coordination.** Establishes a Coordinator of U.S. Government Activities to Advance Global Health Security and Diplomacy within the immediate office of the Secretary of State, who will have primary responsibility for the coordination, management, and oversight of U.S. diplomatic and foreign

assistance efforts to advance the U.S. Global Health Security Strategy, the Global Health Security Agenda, and the Trust Fund for Global Health Security described in Title II.

- Sec. 103 Global Health Security Coordination- Subsection “(d) Other Global Health Assistance” indicates that the functions of the coordinator for management and oversight of budgets shall not “apply to funds authorized to be appropriated or otherwise made available to carry out purposes....relating to global health that are---(1) apportioned directly to the Department of State to carry out programs authorized pursuant to the United States Leadership Against HIV/AIDS, Tuberculosis, and Malaria Act of 2003...; or (2) apportioned directly to the United States Agency for International Development to carry out programs that are not directly related to new or emerging infectious disease threats”
 - Would similar clarifying language be useful indicating that the coordinator would not have direct management and oversight of budgets appropriated to agencies outside of the jurisdiction of the committee, such as CDC through Labor H appropriations? While the measure appears to address global health security activities authorized under the authority of the Foreign Assistance Act, it could be useful to add clarity indicating that the intent of this measure is not to cross jurisdictional lines and assume management or control over appropriations derived outside of this jurisdiction.
 - **Section. 104. Global Health Emergencies.** In responding to an international infectious disease emergency, the Secretary of State, acting through the U.S. Coordinator for Global Health Security and Diplomacy, as appropriate, and USAID shall be represented at all relevant interagency meetings. The Coordinator shall lead U.S. diplomatic and coordination efforts with international organizations and key stakeholders. USAID shall serve as the program lead on emergency humanitarian response and efforts to address second order development impacts.

 - DOCUMENTS ATTACHED: Section by Section Summary, Full Bill Text

Introduced before COVID:

5. H.R. 2166- Global Health Security Act of 2019

- Introduced: 4/9/19
- Sponsor(s): Rep. Gerald Connolly (D-VA-11)
- Co-sponsor(s): Steve Chabot (R-OH-1) and 11 others
- Status: Marked up in HFA on 3-4
- Gov track chance of being enacted percentage: **3%**
- Brief summary:
 - The bill intends to “authorize a comprehensive, strategic approach for United States Foreign Assistance to developing countries to strengthen global health security, and for other purposes.”
 - Global Health Security is defined in the bill Section 8(2) as “activities supporting epidemic and pandemic preparedness and capabilities at the country and global levels in order to minimize vulnerability to acute public health events that can

endanger the health of populations across geographical regions and international boundaries." (see analysis for full details)

- The measure seeks to establish a coordination mechanism for U.S. Global Health Security Activities by establishing a Global Health Security Agenda Interagency Review Council inclusive of Departments of State, Defense, Justice, Agriculture, Labor, Homeland Security, Health and Human Services as well as agencies and offices, including EPA, OSTP, NIH, and CDC. The council would be established to support coordination across agencies. The bill instructs the President to appoint an NSC official responsible for coordination and reporting to Congress twice yearly.
- DOCUMENTS ATTACHED: Full bill text, bill summary

Please feel free to let me know if you have any questions or comments. Happy to discuss any of these in bills or other bills we are tracking in further detail.

Subject: Comms Guidance: US funding & Polio Eradication in the African Region

Dear colleagues,

Following the US announcement to suspend its funding to WHO, please find below a **REACTIVE** statement for your reference.

Kindly let me know if you receive media requests on this issue.

World Health Organization (WHO) Statement on the United States of America's decision to suspend funding to WHO and its implication on polio eradication in the African Region

The World Health Organization is hopeful that the African Region will be certified to have eradicated wild poliovirus in 2020. The Africa Regional Certification Commission (ARCC), an independent body of experts charged with reviewing standardized data on the situation and making an official determination, has already accepted the documentation of 43 out of the 47 countries in the WHO African Region*, granting them a wild polio-free status. The Commission has concluded its field verification visits to the remaining four countries: Central African Republic, Cameroon, South Sudan and Nigeria. However, given the travel restrictions due to COVID-19 pandemic, the ARCC has been unable to conduct a final

documentation review of the four remaining countries before it makes its final decision. This process will resume as planned once the situation permits.

In the meantime, the polio eradication programme in the African Region is supporting COVID-19 preparedness and response with its resources, while maintaining core programmatic activities such as disease surveillance as well as preparing for a rapid scale up in vaccination efforts as soon as the COVID-19 situation has stabilized.

WHO is grateful to all its supporters and donors around the world. Each donation makes a difference. We hope that the United States' decision to suspend funding to WHO would be reconsidered. Over the years, the United States has been a generous financial partner as well as a key implementing partner supporting polio eradication efforts in Africa and around the world.

**The WHO Regional Office for Africa comprises 47 countries which include Algeria and most of sub-Saharan Africa*

Don't hesitate to get in touch if you have any questions or feedback.

All the best,

Halim

AbdelHalim AbdAllah

Hi Rebecca,

We have some TA drafted on this bill and would like to get your thoughts on our comments and questions.

If you have time after the PCC today, it would be great to take 10 minutes to discuss the various moving pieces. I'm not sure if you are planning to join the PCC with MW and CC, or if you will follow-up after.

Thanks so much!

J

Hi Rebecca,

In follow-up to Adam's note below, today we did receive an official request from OA and CDCW to provide TA on the Risch bill. Before doing so, we wanted to make sure we are aligned with the overall

position of the agency on this. Given the various conversations happening at different levels, it would be great to chat with you following the PCC tomorrow to discuss how we should respond. As you know, there are several moving pieces related to this bill that haven't had a great deal of visibility on.

We are aiming to get a response back by mid-next week.

Thanks,
J

Writing with a quick update: Sen Risch introduced his bill (S.3829). We have not seen an introduced copy of the bill (not available on-line), but am resending a copy of the un-introduced draft and a summary. See **below**, also, comments we provided to CDC/W on the measure earlier this month.

<https://www.risch.senate.gov/public/index.cfm/sponsoredlegislation> - S.3829 - A bill to advance the global health security and diplomacy objectives of the United States, improve coordination among the relevant Federal departments and agencies implementing United States foreign assistance for global health security, and more effectively enable partner countries to strengthen and sustain resilient health systems and supply chains with the resources, capacity, and personnel required to prevent, detect, mitigate, and respond to infectious disease threats before they become pandemics, and for other purposes.

We are checking with OA and CDC W on this measure.

Hi Team,

Please see the summary of the four new bills we have been tracking this week along with info on the Connolly/Chabot bill since it is so relevant to discussion. Let me know if you have any additional comments or concerns. Happy to address! Thanks for all your hard work and effort.

New:

1. [S. 3669](#)
 - Introduced: 5/7/2020

- Sponsor: Sen. Robert Menendez (D-NJ)
- Co-sponsors: Note- All minority members of SFRC
 - Sen. Benjamin Cardin (D-MD), SFRC
 - Sen. Jeanne Shaheen (D-NH), SFRC
 - Sen. Christopher Coons (D-DE), SFRC
 - Sen. Tom Udall (D-NM), SFRC
 - Sen. Chris Murphy (D-CT), SFRC
 - Sen. Tim Kaine (D-VA), SFRC
 - Sen. Edward Markey (D-MA), SFRC
 - Sen. Jeff Merkley (D-OR), SFRC
 - Sen. Corey Booker (D-NJ), SFRC
- Status: Referred to the Senate Committee on Foreign Relations
- This bill includes an addition \$9 billion in funding to help support international efforts to fight the COVID-19 pandemic, including engagement with international and multilateral organizations to help collectively stop the spread of COVID-19. The bill proposes a series of requirements including: U.S. participation in the Coalition for Epidemic Preparedness Innovations (including authorization of \$200 million); restoration of U.S. funding for WHO; increased humanitarian assistance; directing the U.S. Ambassador to the UN to increase U.S. leadership at the UN Security Council related to COVID; and directing the re-establishment of a position within the National Security Council with responsibility for global health security emergencies.
- ATTACHED DOCUMENTS: Bill analysis and summary, Full bill text, initial TA comments provided to CDCW (see analysis for full list of questions)

2. [S. 3656](#)

- Introduced: 5/7/2020
- Sponsors: Senator Murphy (D-CT) and Senator Romney (R-UT)
 - Almost identical to the content of Connolly/Chabot HR 2166 (see below for summary of content) in intent to establish a coordinating Global Health Security Interagency Review Council, inclusive of agencies mirroring H.R.2166. S.3656 does call for the creation of a Global Health Security Coordinator, but **recommends** the President to appoint an NSC official in this role. Murphy's bill also requires this person work in coordination with President's Special Coordinator for International Disaster Assistance.
- Status: Referred to Senate HELP
- Gov track chance of being enacted percentage: not available

- Murphy's bill includes that it is the sense of congress that the President should consider appointing an individual with background and expertise in public health or emergency response management to the Coordinator position, who is an NSC employee at level of Deputy Assistant to the President or higher
- DOCUMENTS ATTACHED: Full bill text

3. **H.R._ Health and Economic Recovery Omnibus Emergency Solutions Act 'HEROS' Act**

- Introduced: Not yet, vote expected potentially today, 5/5/2020 in the House
- Sponsors: Rep. Lowey (D-NY-17), Rep. Engel (D-NY-16), Rep. Maloney (D-NY-12), Rep. Nadler (D-NY-10), Rep. Palone (D-NJ-10), Rep. Scott (D-VA-3), Rep. Takano (D-CA-41), Rep. Valasquez (D-NY-7), Rep. Waters (D-CA-43)
- Status: N/A
- \$3 trillion bill for coronavirus relief, following up on the \$2 trillion aid package passed in March. The latest bill, called the HEROES Act, prioritizes granting hazard pay to front line workers and providing aid to state and local governments, which had not been allotted in previous bills. The bill also includes Global Health Security language similar to the language proposed in the recently introduced Romney/Murphy bill. It calls for the appointments of a Global Health Security Coordinator and recommends the President to appoint an NSC official in this role. Similar to the Murphy/Romney bill it also requires this person work in coordination with President's Special Coordinator for International Disaster Assistance.
- Note: While the House could vote on the measure as soon as Friday, it is not expected to gain significant traction in the Senate.
- DOCUMENTS ATTACHED: Full Bill Text

4. **S._ (Senator James Risch expected to sponsor)**

- Introduced: Unintroduced
- Co-Sponsors: Unknown
- The act intends to advance global health security interests of the United States, improve coordination among the relevant Federal departments and agencies implementing United States global health security assistance, and more effectively enable partner countries to strengthen and sustain resilient health systems and supply chains with the resources, capacity, and personnel required to prevent, detect, mitigate, and respond to infectious disease threats before they become pandemics.
- Key Sections:
 - **Section 102. Global Health Security Strategy.** Requires the President to advance a comprehensive strategy to advance the global health security interests of the United States overseas, which shall seek to: (1) improve coordination within the USG and with other donors, multilateral organizations, and key stakeholders; (2) establish clear roles, responsibilities, objectives, and monitoring and evaluation plans under the strategy; (3) build technical capacity within partner countries while reducing long-term reliance upon U.S. assistance; and (4) support innovation and public-private partnerships.
 - **Section. 103. Global Health Security Coordination.** Establishes a Coordinator of U.S. Government Activities to Advance Global Health Security and Diplomacy within the immediate office of the Secretary of State, who will have primary responsibility for the coordination, management, and oversight of U.S. diplomatic and foreign

assistance efforts to advance the U.S. Global Health Security Strategy, the Global Health Security Agenda, and the Trust Fund for Global Health Security described in Title II.

- Sec. 103 Global Health Security Coordination- Subsection “(d) Other Global Health Assistance” indicates that the functions of the coordinator for management and oversight of budgets shall not “apply to funds authorized to be appropriated or otherwise made available to carry out purposes....relating to global health that are---(1) apportioned directly to the Department of State to carry out programs authorized pursuant to the United States Leadership Against HIV/AIDS, Tuberculosis, and Malaria Act of 2003...; or (2) apportioned directly to the United States Agency for International Development to carry out programs that are not directly related to new or emerging infectious disease threats”
 - Would similar clarifying language be useful indicating that the coordinator would not have direct management and oversight of budgets appropriated to agencies outside of the jurisdiction of the committee, such as CDC through Labor H appropriations? While the measure appears to address global health security activities authorized under the authority of the Foreign Assistance Act, it could be useful to add clarity indicating that the intent of this measure is not to cross jurisdictional lines and assume management or control over appropriations derived outside of this jurisdiction.
 - **Section. 104. Global Health Emergencies.** In responding to an international infectious disease emergency, the Secretary of State, acting through the U.S. Coordinator for Global Health Security and Diplomacy, as appropriate, and USAID shall be represented at all relevant interagency meetings. The Coordinator shall lead U.S. diplomatic and coordination efforts with international organizations and key stakeholders. USAID shall serve as the program lead on emergency humanitarian response and efforts to address second order development impacts.
- TA provided to CDCW on GHS section
 - DOCUMENTS ATTACHED: Section by Section Summary, Full Bill Text

Introduced before COVID:

5. H.R. 2166- Global Health Security Act of 2019

- Introduced: 4/9/19
- Sponsor(s): Rep. Gerald Connolly (D-VA-11)
- Co-sponsor(s): Steve Chabot (R-OH-1) and 11 others
- Status: Marked up in HFA on 3-4
- Gov track chance of being enacted percentage: **3%**
- Brief summary:
 - The bill intends to “authorize a comprehensive, strategic approach for United States Foreign Assistance to developing countries to strengthen global health security, and for other purposes.”
 - Global Health Security is defined in the bill Section 8(2) as “activities supporting epidemic and pandemic preparedness and capabilities at the country and global levels in order to minimize vulnerability to acute public health events that can

endanger the health of populations across geographical regions and international boundaries." (see analysis for full details)

- The measure seeks to establish a coordination mechanism for U.S. Global Health Security Activities by establishing a Global Health Security Agenda Interagency Review Council inclusive of Departments of State, Defense, Justice, Agriculture, Labor, Homeland Security, Health and Human Services as well as agencies and offices, including EPA, OSTP, NIH, and CDC. The council would be established to support coordination across agencies. The bill instructs the President to appoint an NSC official responsible for coordination and reporting to Congress twice yearly.
- DOCUMENTS ATTACHED: Full bill text, bill summary

Please feel free to let me know if you have any questions or comments. Happy to discuss any of these in bills or other bills we are tracking in further detail.

Hi Rebecca,

We have some TA drafted on this bill and would like to get your thoughts on our comments and questions.

If you have time after the PCC today, it would be great to take 10 minutes to discuss the various moving pieces. I'm not sure if you are planning to join the PCC with MW and CC, or if you will follow-up after.

Thanks so much!

J

Hi Rebecca,

In follow-up to Adam's note below, today we did receive an official request from OA and CDCW to provide TA on the Risch bill. Before doing so, we wanted to make sure we are aligned with the overall position of the agency on this. Given the various conversations happening at different levels, it would be

great to chat with you following the PCC tomorrow to discuss how we should respond. As you know, there are several moving pieces related to this bill that haven't had a great deal of visibility on.

We are aiming to get a response back by mid-next week.

Thanks,

J

Writing with a quick update: Sen Risch introduced his bill (S.3829). We have not seen an introduced copy of the bill (not available on-line), but am resending a copy of the un-introduced draft and a summary. See **below**, also, comments we provided to CDC/W on the measure earlier this month.

<https://www.risch.senate.gov/public/index.cfm/sponsoredlegislation> - S.3829 - A bill to advance the global health security and diplomacy objectives of the United States, improve coordination among the relevant Federal departments and agencies implementing United States foreign assistance for global health security, and more effectively enable partner countries to strengthen and sustain resilient health systems and supply chains with the resources, capacity, and personnel required to prevent, detect, mitigate, and respond to infectious disease threats before they become pandemics, and for other purposes.

We are checking with OA and CDC W on this measure.
